Manson Creek Resources Ltd. is pleased to announce the acquisition of a new copper project near Kamloops, British Columbia.

The property consists of 9 staked and contiguous units totaling approximately 22.5 hectares and is considered prospective for base and precious metal bearing massive sulphide, stockwork and vein type deposits.

A 100% interest may be purchased by Manson Creek over 4 years for a cash consideration of \$50,000 and the issuance of 250,000 shares. The property vendor will retain a 2.5% NSR (Net Smelter Royalty), 2.0% of which Manson Creek may elect to repurchase for the amount of \$1,500,000.

Reported grades in previous prospecting work by the property vendor included 17 channel samples, 16 of which returned values grading between 1 and 14% Copper.

This transaction is subject to all required regulatory and exchange approvals.

All statements, other than statements of historical fact, in this news release are forward-looking statements that involve various risks and uncertainties, including, without limitation, statements regarding the potential extent of mineralization and reserves, exploration results and future plans and objectives of Manson Creek Resources Ltd. These risks and uncertainties include, but are not restricted to, the amount of geological data available, the uncertain reliability of drilling results and geophysical and geological data and the interpretation thereof and the need for adequate financing for future exploration and development efforts. There can be no assurance that such statements will prove to be accurate. Actual results and future events could differ materially from those anticipated in such statements. These and all subsequent written and oral forward-looking statements are based on the estimates and opinions of management on the dates they are made and are expressly qualified in their entirety by this notice. The Company assumes no obligation to update forward-looking statements should circumstances or management's estimates or opinions change.
