WA-191-P **BOUNTY-3**

Woodside Petroleum Ltd., a participant in the WA-191-P Joint Venture, located in the Carnarvon Basin, reports that operations on the Bounty-3 well were completed on the 24 February 2004 with the Ocean Epoch drilling rig moving to the Exeter-4 well location.

Since the last report, 8½ inch hole was drilled from 3,075 metres to a total depth of approximately 3,800 metres, wireline logs were run, and the well was plugged and abandoned.

Preliminary wireline log evaluation indicates a small oil accumulation was intersected which will require further analysis in order to establish its commercial significance.

All reported depths are referenced to the rig rotary table.

Woodside's interest in WA-191-P is 8.2%. Other participants are Santos Ltd. (Operator, 33.3977%), Kufpec Australia Pty. Ltd. (33.4023%) and Nippon Oil Exploration (Dampier) Ltd. (25.0%).
