## **NEWS RELEASE**

January 29, 2004

TSX Trading Symbol: **FNC**  
S.E.C. Exemption: 12(g)3-2(b)

The Company wishes to announce that it has acquired by map staking, approximately 32,000 hectares or 80,000 acres of ground in the vicinity of the recently announced high grade nickel discovery acquired by Quinto Technology Inc. in the Manicougan Reservoir district of Quebec's North Shore. Grades up to 4.75% nickel have been reported from this recent grassroots discovery. Formal confirmation of these claims by the Quebec Government is expected shortly.

Work continues on the Company's Mingan Titanium Option. Further drilling has been suspended, and a winter road is being constructed into the property for purposes of removing test samples. Heavy equipment will be left on the property for a stripping and trenching program designed to further assess the geometry of the massive hemoilmenite bodies. This program is scheduled following breakup in May and June this year.

### **ON BEHALF OF THE BOARD**

"Peter H. Smith", Ph.D., P.Eng., President
