2. Business Lines

There has been no material change in information regarding Business Lines of our group (the Company and its related companies) during the current interim consolidated accounting period.

3. State of Affiliated Companies

In the "Manufacture and sales of industrial materials," Myoko Shinko Co., Ltd. merged with Arisawa Polywork Co., Ltd., Yuai Sangyo, Ltd. and Arisawa Logistics, Ltd. in April 2003, and the corporate name was changed to Arisawa Sogyo Co., Ltd.

4. State of Employees

(1) State of Consolidated Companies

(as of September 30, 2003)

Business Segments	Number of employees
Operation of manufacture and sales of industrial materials etc.	901
Other operations	11
Total	912

Note: The number of employees indicates full-time employees and does not include part-time and temporary employees.

(2) State of the Submitting Company

(as of September 30, 2003)

Number of Employees	642
---------------------	-----

Notes: The number of employees indicates full-time employees and does not include part-time and temporary employees.

(3) Labor Union

There is no material matter concerning the labor-management relationship.

2. Condition of Business

1. Outline of Business Performance, etc.

(1) Performance

The economic situation during the interim consolidated accounting period continued to be severe, as it was affected by factors that included continuing sluggish individual consumption and no improvement in the employment situation, while the performance of domestic enterprises improved and capital investment gradually increased. Overseas, economies slumped due to the aftereffects of the war in Iraq and the impact of SARS.

Under such an environment, our corporate group (consisting of the submitting company, consolidated subsidiaries and companies covered by the equity method) has concentrated business resources in the fields of electronic materials and display materials and made efforts at speed up in the development of new products as well as streamlining our management resources and carrying out thorough cost reductions.

As a result, our performance during the current interim consolidated accounting period amounted to sales of ¥22,393 million, representing an increase of 32.4% over the previous interim consolidated accounting period. Ordinary profits rose by 76.0% over the previous interim consolidated accounting period, to ¥3,800 million as a result of factors such as the capacity utilization effect by increase in sales. Interim net profits increased by 64.1% over the previous interim consolidated accounting period, to ¥2,169 million.

Performance of segments by type of business were as follows.

1) Business of Manufacture and Sales of Industrial-use Materials, etc.

In the electronic materials sector of our business of manufacturing and sales of industrial and other materials, there was an increase in demand for IT-related devices such as flexible printed board materials for mobile phones, digital cameras and DVDs (amount of orders received increased by 74.6% to ¥8,530 million, while production output increased by 78.0%, when compared to the previous interim consolidated accounting period on a unitary basis for the submitting company), whereby sales rose by 74.4% against the previous interim consolidated accounting period, to ¥10,206 million.

In the field of display related materials, due to the increase in demand for rear-projection TVs, as Fresnel lenses (an increase of 20.8% in the amount of orders received, to ¥5,156 million, and an increase of 23.7% in production output when compared to the previous interim consolidated accounting period on a unitary basis for the submitting company) and front panels for plasma display panels (an increase of 16.7% in the amount of orders received, to ¥370 million and an increase of 17.0% in production output when compared to the previous interim consolidated accounting period, on a unitary basis for the submitting company) were strong, sales increased by 14.9% over the previous interim consolidated accounting period, to ¥7,312 million.

In the field of electric insulation materials and industrial-use structural materials, etc., sales increased by 6.6% over the previous interim consolidated accounting period, to ¥4,550 million due to the increase in sales of FRP pipes for seawater desalination equipment.

As a result, overall sales increased by 33.9% over the previous interim consolidated accounting period, to ¥22,068 million and operating profit reached ¥3,338 million, which was an increase of 85.8% over the previous interim consolidated accounting period.

2) Other Business

While driving ranges experienced poor growth and sales of sports recreation equipment were sluggish due to the stagnate sales at large retailing shops, the group made efforts to streamline management, including cost reductions to respond to the said situation.

As a result, sales recorded ¥342 million, a decrease of 24.3% from the previous interim consolidated accounting period, and operating profit was ¥18 million (in the previous interim consolidated accounting period, loss of ¥7 million).

The category for regional segments does not apply as our corporate group only engages in business within Japan. It should also be noted that the amounts of sales, orders and the like stated in this section do not include the amount of consumption and local consumption tax, etc.

(2) Cash Flows

On a consolidated basis regarding our cash and cash equivalents (hereinafter referred to as "Funds") during the current interim consolidated accounting period, the balance of Funds at the end of the current interim consolidated accounting period decreased by ¥4,263 million from the end of the previous interim consolidated accounting period to ¥3,679 million due to the increase in expenses for acquisition of tangible fixed assets (an increase of 254.8% from the previous interim consolidated accounting period) and the increase in the corporate income tax, etc., paid (an increase of 222.3% from the previous interim consolidated accounting period), while interim net profit before taxes increased to ¥3,464 million (an increase of 65.4% from the previous interim consolidated accounting period) due to sales expansion.

The following is the status of each of the cash flow categories during the interim consolidated accounting period.

(Cash Flow from Operating Activities)

While interim net profit before taxes increased to ¥3,464 million due to sales expansion (an increase of 65.4% from the previous interim consolidated accounting period), as a result of an increase in accounts receivable (increased by ¥1,144 million from the balance at the end of previous consolidated fiscal year), inventories (increased by ¥1,155 million for the same period) and corporate income taxes, etc., paid (an increase of 222.3% from the previous interim consolidated accounting period), cash inflow from operating activities was ¥2,398 million (decreased by 15.7% from the previous interim consolidated accounting period).

(Cash Flow From Investing Activities)

Cash outflow from investment activities was ¥4,049 million (cash inflow of ¥336 million in the previous interim consolidated accounting period) as a result of an increase in expenses for acquisition of tangible fixed assets, etc., (an increase of 254.8% from the previous interim consolidated accounting period).

(Cash Flow from Financing Activities)

While the income from issuance of shares increased by the effectuation of stock options (an increase of 1,851.0% from the previous interim consolidated accounting period), due to the repayment of short-term borrowings (decreased by ¥417 million from the balance at the end of previous consolidated fiscal year) and an increase in dividends paid (an increase of 20.7% from the previous interim consolidated accounting period), cash outflow from financing activities was ¥440 million (a decrease of 8.3% from the previous interim consolidated accounting period).

2. Manufacturing, Orders and Sales

The group (both the submitting company and its consolidated subsidiaries) has many different categories of products manufactured and sold, in widely differing areas, and even products of the same type are not necessarily the same in their volume, construction, form or other elements. There are also products which are not manufactured on a produce to order basis, and we do not indicate production volume or order volume in monetary amounts or quantities for each segment by type of business. For this reason we have indicated the relationships for performance for each segment by type of business in "1. Outline of Business Performance, etc.," with respect to the status of manufacturing, orders and sales.

The following states the percentages of sales by major customer and percentage of total sales during the previous interim consolidated accounting period and the current interim consolidated accounting period.

Customer	Previous interim consolidated accounting period (April 1, 2002 to September 30, 2002)		Current interim consolidated accounting period (April 1, 2003 to September 30, 2003)	
	Amount (thousands of yen)	Ratio (%)	Amount (thousands of yen)	Ratio (%)
Sumitomo Shoji Plastics	2,462,684	14.6	6,401,099	28.6
Tomen Corporation	3,091,019	18.3	2,767,997	12.4
Kuraray	2,315,721	13.7	2,292,699	10.2

Note: The amounts in the above table do not include consumption tax.

3. Issues Requiring Attention by the Company

There are no material changes regarding subjects that must be dealt with by the group (the Company and consolidated subsidiaries) during the current interim consolidated accounting period.

4. Important Agreement, etc., for Operation

No applicable matters.

5. Research and Development Activities

Our group's research and development activities involve the business of manufacturing and selling industrial materials. Most of the research and development activities are conducted by the submitting company, which works to develop technologies for its manufacturing divisions and its consolidated subsidiaries. As a technology development company we are constantly pursuing research and development of new technologies and products which directly meet the needs of users, mainly in the fields of electronic materials, display materials and compound materials.

Examples of electronic materials include fiberglass cloths for printed circuit boards, pre-preg for special printed circuit boards, FPC, and flexible printed board materials. Examples of display materials include large Fresnel lenses for rear projection TVs, anti-reflective coat display plates, and materials related to three-dimensional images; while for compound materials examples include materials related to super-conductivity, materials for aircraft interiors, electrical insulation materials and materials related to electronics equipment.

In order to adapt to rapid changes in markets that have taken place in recent years and to carry out product development in a timely manner at an early stage, the technology division works to invest its resources affirmatively concentrating on growth sectors, based on a flexible organization, to launch new products, to incubate next generation products, to promote technologies that offer a future, and to improve basic technology.

As of the end of the interim consolidated fiscal period we had 147 personnel involved in research and development activities, and our research and development expenses during this period amounted to ¥1,150 million.

The following are major research achievements in our manufacturing and sales of industrial materials during the current interim consolidated fiscal period.

- Development of Materials for New Grade Two-layered Flexible Printed Board

In the latter half of the previous business year, we entered the market of two-layered boards consisting of copper leafs and polyimides on a large scale and continued to make a wide variety of goods conforming to market needs through development of a new grade. We have steadily increased the volume of shipment both in Japan and abroad, focusing on circuit board use, which requires high-density mounting and micro processing. In addition to the previous three-layered boards, which maintained a large share of the market, by increasing our share of two-layered boards, we are establishing ourselves as a general FPC use materials manufacturer.

- Development of Flex Rigid Board Use Materials

Utilizing our unique cloth fabrication and resin coating technology, we have developed pre-preg materials, with unique characteristics such as reliability for adhesiveness with FPC and non-flaw and workability improved type (chippability, etc.). We also manufacture environmentally friendly non-halogen types, which are adopted in flex rigid multi-layered boards, used for various mobile electronic devices, and expect high growth in the future. Demand for pre-preg materials using an ultra-thin 20 μ glass cloth, which was developed by the Company, is largely increasing as it has superior reliability of through holes, being suitable for multi-layered FPC use.

- Development of Migration Resistant Flexible Printed Board Materials

For responding to high voltage, represented by PDP (Plasma Display Panel) driver use, and for fine pitch in conjunction with downsizing and higher device functions, flexible printed board use materials, which are superior in migration resistant characteristics as materials with high insulation reliability, have been required. With the optimum composition of adhesives, we have developed a product (PI board and cover lay) that passed migration resistance test at 85°C × 85% × 250V × 1000hr as well as securing wire bonding and flat characteristics, which are required for PDP use. In connection with coating technology to ultra-thin films, represented by 4.2 μ Aramica, we started application development of an alternate field of resist ink.

- Commercialization of Three-dimensional Image Use Optical Sheet

We have established technology for mass production of three dimensional image use Xpol (registered trademark), responding to high precision and fine LCDs, newly designed Fresnel lenses and anisotropic diffusers, etc., and have carried out delivery to users. These are used for 7 inch 3D display without spectacles and have been placed on the market.

- Development of AR (Anti-Reflection) Film

The Company has developed AR film mainly used for PDP (Plasma Display Panel), with our eyes set on digital high-definition broadcasting and will start a full-scale sales drive from the second half. AR film is a film which makes displays easier to watch by making the reflection on the display screen extremely small, utilizing the interference of light. Also using high capacity adhesive materials, we have completed a group of films with reliable adhesion to any object of adhesion. In this connection, as the Company has first established ultra-thin precision coating technology on the order of nano (1nm = 1 × 10⁻⁹ m) for film, it became immediately applicable to not only AR films but also precision coating demands, which enabled us to expand product item lines.

- Development of Aramid Binding Tape for Large Power Generators

We have developed binding tape of aramid fiber for binding coils of rotors in adjustable speed power generators. This is one-way pre-preg of aramid fiber, which is superior in creep characteristics and is made by epoxy resin and is used for materials essential to operating long time steady rotors of adjustable speed power generators, which sharply change rotation speeds.

3. State of Facilities

1. State of Major Facilities

There was no significant change in major facilities during the present interim consolidated accounting period.

2. Plan of New Installation and Retirement, etc., of Facilities

(1) The following are major changes in connection with adding or refurbishing significant facilities during the interim consolidated accounting period that were in the planning stage as of the end of the previous consolidated fiscal year:

1) New Facilities

Regarding new installation of electric insulation material manufacturing facilities of the Arisawa Polywork Co., Ltd. (a consolidated subsidiary, the company name was changed to Arisawa Sogyo Co., Ltd. through a merger with Myoko Shinko Co., Ltd. as of April, 2003) in the business of manufacture and sales of industrial materials, the plan was suspended due to a revision in our demand forecast.

2) Refurbishing

There are no new plans for refurbishing during the present interim consolidated accounting period.

(2) The following are major completed new or refurbished facilities during the interim consolidated accounting period that were in the planning stage as of the end of the previous consolidated fiscal year.

1) New Facilities

Electronic materials manufacturing facilities of the submitting company in the business of industrial material manufacture and sales were completed in September, 2003 and we expect to start operations from the second half. Regarding display material manufacturing facilities, facilities accounting for 64% of the plan at the beginning of year were completed and started operations from August, 2003.

Since our group has many products that differ in content and form, and since the facilities used for each of these products can be shared, it is very difficult to state the increased capacity of the manufacturing facilities of our group, and for this reason we have omitted entry of this category.

(3) The following constitutes new plans for significant facilities which have newly determined in the interim consolidated accounting period.

Company name Name of production center	Location	Name of segment by type of business	Nature of facilities	Projected total investment (¥1,000)	Existing payments (¥1,000)	Method of funding	Projected starting date	Projected completion date	Increased capacity after completion
Submitting company: Nakatahara Factory	Joetsu-city Niigata	Manufacturing and selling industrial materials	Electronic materials manufacturing facilities	2,481,300	837,063	Internal funding	June 2003	March 2004	(Note 2)
			Display materials manufacturing facilities	79,300	41,582	Internal funding	June 2003	December 2003	

- Note: 1. The projected investment amount does not include consumption tax or local consumption tax, etc.
 2. Since our group has many products that differ in content and form, and since the facilities used for each of these products can be shared, it is very difficult to state the increased capacity of the manufacturing facilities of our group, and for this reason we have omitted entry of this category.

4. State of the Company

1. State of Equity Shares, etc.

(1) Total Number of Shares, etc.

1) Total number of shares

Class	Authorized number of shares to be issued
Common Stock	57,000,000
Total	57,000,000

*Note: Articles of Incorporation stipulate the following.
The authorized number of shares to be issued is 57,000,000. Retirement of shares, however, will decrease this number proportionately.*

2) Shares issued

Class	Number of shares issued and outstanding At the end of the interim accounting period (as of September 30, 2003)	Number of shares issued and outstanding As of date submitted (as of December 19, 2003)	Name of stock exchange Where listed or securities dealers association where registered	Contents

For the purposes of audit certification in compliance with Article 193-2 of the Securities and Exchange Law, we audited the interim consolidated financial statements for the interim consolidated accounting period (from April 1, 2002 to September 30, 2002) of the consolidated fiscal year from April 1, 2002 to March 31, 2003; that is, the interim consolidated balance sheet, the interim consolidated profit and loss statement, the interim consolidated earned surplus statement and interim consolidated cash flow statement, all of which are listed in the "State of Accounting" of Arisawa Manufacturing Co., Ltd.

We conducted interim audit standards, which are generally accepted as fair standards for interim auditing, and implemented such audit procedures as should be generally implemented. Namely, we have omitted a portion of the audit procedures for auditing financial statements as should be generally implemented in compliance with No. 2 of the implementing standard for interim audit. Also regarding consolidated subsidiaries, etc., we implemented audit procedures consisting of analytical procedures, questionnaires and reviews, in compliance with No. 3. of the implementing standard for interim audits.

As a result of the interim audit, we recognize that the accounting policies and procedures adopted for the interim consolidated financial statements by the Company are in accordance with generally accepted standards for preparation of interim consolidated financial statements and consistently used in accordance with the same standards as those for the previous consolidated fiscal year, and that the method of notation of the interim consolidated financial statements of the Company is in compliance with the "Regulations Concerning Terms, Forms and Preparation Method of Interim Consolidated Financial Statements, etc." (Ministerial Ordinance No. 24 of the Ministry of Finance of 1999).

Accordingly, we recognize and certify that the said interim consolidated financial statements present beneficial information regarding the financial position as of September 30, 2003 and the results of operations and cash flows for the interim consolidated accounting period ending as of September 30, 2002 (from April 1, 2002 to September 30, 2002) of Arisawa Manufacturing Co., Ltd. and its consolidated subsidiaries.

There exists no special interest between the Company and this audit corporation or the responsible partners to be stated under the provisions of the Certified Public Accountant Law.

For the purposes of audit certification in compliance with Article 193-2 of the Securities and Exchange Law, this audit corporation audited the interim consolidated financial statements for the interim consolidated accounting period (from April 1, 2003 to September 30, 2003) of the consolidated fiscal year from April 1, 2003 to March 31, 2004; that is, the interim consolidated balance sheet, the interim consolidated profit and loss statement, the interim consolidated earned surplus statement and interim consolidated cash flow statement, all of which are listed in the "State of Accounting" of Arisawa Manufacturing Co., Ltd. Preparation of these interim consolidated financial statements shall be the responsibility of the management and the responsibility of this audit corporation is to present our opinions on the interim consolidated financial statements from an independent standpoint.

This audit corporation implemented the interim audit in accordance with the standards for interim audit in Japan. The standards for interim audit require this audit corporation to obtain a reasonable assurance of whether there is any material falsely represented in the whole interim consolidated statements that might prejudice the judgment of investors in relation to beneficial information in the interim consolidated financial statements. The interim audit was implemented in accordance with the audit procedures mainly consisting of analytical procedures, and applying additional audit procedures as appropriate. This audit corporation determines that we were able to obtain a reasonable foundation for presenting our opinions on the interim consolidated financial statements as a result of the interim audit.

This audit corporation recognizes and certifies that the said interim consolidated financial statements present beneficial information regarding the financial position as of September 30, 2003 and the results of operations and cash flows for the interim consolidated accounting period ending as of September 30, 2003 (from April 1, 2003 to September 30, 2003) of Arisawa Manufacturing Co., Ltd. and its consolidated subsidiaries, conforming to the generally accepted standards for preparation of interim consolidated financial statements in Japan.

There exists no special interest between the Company and this audit corporation or the responsible partners to be stated under the provisions of the Certified Public Accountant Law.
