2003 CONSOLIDATED SALES

2003 consolidated sales amounts to **2,898.9 million euros**, down -1,1% compared with figures for 2002, but **up +3,4 % on a like-for-like basis and at constant exchange rates**.

Business was better than expected at the year's end in France; previous trends on other markets persisted with the decline in the USA and growth continued in Southern Europe and in emerging countries, with the exception of India.

The operating income will be affected by the exchange rate effect but the sustained level of extraordinary items should lead to an improved net income compared with the previous financial year.

The board of directors meeting held to settle the accounts will take place on 16 February 2004.
