RELEASE

Jeruk -1 Drilling Report

Santos Limited, operator for the Sampang PSC, offshore East Java, has announced that the Jeruk -1 well has been plugged and abandoned following evaluation operations.

Santos announced that "the well reached a total depth of 5,027 metres. Lost drill pipe in the hole prevented the well being drilled and evaluated to the planned total depth of 5,250 metres. An open-hole drill stem test of the Kujung carbonate objective section flowed oil and water emulsion (up to 80% water) at the rate of 4,700 barrels per day, 0.3 million cubic feet of gas per day and 470 barrels of water per day.

An assessment of what follow up activity may be undertaken is currently being made."

Jeruk -1 was drilled by Santos as a sole risk operation. Cue did not participate in the well.

Participants in the Sampang PSC are :

Cue Sampang Pty Ltd	15%
Santos (Sampang) Pty Ltd	45% (Operator)
Coastal Indonesia Sampang Ltd (El Paso)	40%

Any queries regarding the announcement should be directed to the company on (03) 96297577 or email mail@cuenrg.com.au.

A handwritten signature in black ink, appearing to read "R. Coppin".
