BAA announces June traffic figures

BAA's seven UK airports handled 12.8 million passengers in June, an increase of 7.0% over the same month last year.

The North Atlantic market experienced growth of 8.2%, Other Long Haul markets added 17.8%, and European scheduled traffic saw an increase of 9.6%. Domestic traffic also increased, adding 4.5% while short haul charter traffic experienced a 6.0% decline.

Passenger numbers increased at each individual airport, with Stansted recording the fastest growth of the London airports adding 10.7%. The airport is now operating above the 20 million passengers per annum mark. Heathrow increased 7.0% and Gatwick added 5.1%, with growth in long and short haul scheduled traffic offsetting the 6.0% decline in short haul charters.

At BAA's Scottish airports a 6.3% increase was recorded with rapid growth in North Atlantic and other long haul services more than compensating for an 8.1% drop in short haul charters. Glasgow's traffic overall was up by 5.6% and Edinburgh by 7.7%. Aberdeen recorded a 5.1% increase.

Air transport movements rose 4.2% while the resurgence in air cargo activity continued with tonnage increasing by 7.4%.

**Financial year first quarter: April to June 2004 compared to April to June 2003**

During the first quarter of the financial year 2004/05, BAA's UK airports handled 36 million passengers. This represents an increase of 9.7% against the first quarter of the financial year 2003/04.
