CATHAY PACIFIC ANNOUNCES 2004 INTERIM RESULTS

Cathay Pacific Airways reported a first-half profit attributable to shareholders of HK\$1,771 million in its 2004 Interim Results published today. This was in marked contrast to the HK\$1,241 million loss recorded during the SARS-affected first half of 2003.

An improving world economy and a strong recovery in Hong Kong propelled growth in both the airline's passenger and cargo operations. The airline responded by introducing new services and additional frequencies across its network.

Turnover was sharply higher at HK\$18,185 million, compared to HK\$12,275 million during the same six-month period last year. The number of passengers carried increased 59.3 percent to 6.4 million. Passenger yield improved to HK45.7 cents, up from HK42.8 cents, reflecting both the improved demand for business and leisure travel and currency gains resulting from the weaker US dollar.

Cargo volumes increased 15.8 percent to 469,909 tonnes due to continued growth of re-exports from Southern China and higher volumes carried on trunk routes to Europe, Japan and the United States. Cargo yield remained at HK\$1.72.

Higher revenues were partially offset by higher costs arising from the sharp rise in the price of fuel. The average price before hedging was 16.9 percent higher than in the same period last year. Fuel accounted for 21.8 percent of the airline's operating costs during the period.

Cathay Pacific Chairman James Hughes-Hallett said: "Prospects for the traditionally stronger second half of the year appear to be good, although the high fuel price remains a concern, which if sustained, could dampen global economic growth and the demand for air travel. We remain optimistic over our future and will continue to develop our network, strengthen Hong Kong as a global aviation hub and focus on delivering superior value to customers."

8. Share capital

During the period under review, the Group did not purchase, sell or redeem any shares in the Company. At 30th June 2004, 3,368,048,848 shares were in issue (31st December 2003: 3,343,515,048 shares).

The Company adopted a share option scheme (the "Scheme") on 10th March 1999. During the period under review, 24,533,800 shares were issued under the Scheme. Details of the Scheme can be found in note 14 to the accounts in the 2004 interim report.

9. Corporate governance

None of the Directors of the Company is aware of any information that would reasonably indicate that the Company is not, or was not for any part of the accounting period covered by the interim report, in compliance with the Code of Best Practice as set out in the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Stock Exchange").

The 2004 interim result has been reviewed by the audit committee. Details on Corporate Governance can be found in the 2003 annual report and in the 2004 interim report.

10. Interim report

The 2004 interim report will be sent to shareholders on 25th August 2004. It will also be available on the Stock Exchange's website and the Company's website www.cathaypacific.com before the end of August 2004.

Chairman's Letter

The Group made a profit attributable to shareholders of HK\$1,771 million during the first six months of 2004. This was in marked contrast to the HK\$1,241 million loss recorded in the SARS-affected first half of 2003. Turnover was HK\$18,185 million, also sharply higher than the comparative figure of HK\$12,275 million. The number of passengers carried was up 59.3% to 6.4 million, whilst the amount of cargo carried at 469,909 tonnes was 15.8% higher than in the same period last year.

Strong passenger demand, particularly on long haul services, led to record first half passenger revenue. Passenger yield was HK45.7 cents compared to HK42.8 cents in the same period in 2003, reflecting both the improved demand for travel and currency gains resulting from the weaker US dollar.

Demand for cargo services out of Hong Kong remained buoyant throughout the first half due to the continued growth in re-exports from Southern China. Cargo volumes increased on trunk routes to Europe, Japan and the United States. Cargo yield remained at HK\$1.72.

The benefits accruing from revenue growth were partially offset by a sharp increase in the price of fuel. The average fuel price, before hedging, was 16.9% higher than last year, with fuel now accounting for 21.8% of total operating costs. Fuel surcharges for both cargo and passenger services only partly offset the additional cost.

Within the Asia Pacific region, low cost carriers are entering a highly competitive and increasingly deregulated market place. It remains to be seen what impact such intensified competition will have. For our part, we will continue to provide a range of products and services tailored to meet the needs of our customers, offering both high standards of service and value for money. We will maintain our focus on productivity improvements and cost management measures, and target a further reduction of 10% in our unit cost by 2007.

In June we launched a codeshare service to Moscow with Aeroflot - Russian Airlines. The following month we introduced twice daily services to New York with the addition of a daily non-stop service using the polar route. In addition we now operate daily to Colombo and have increased flight frequencies to Osaka, Riyadh and Taipei. New freighter services will soon be launched to Munich.

Our recently launched passenger service to Beijing has strengthened Hong Kong's ties with Mainland China and we are hopeful that we will soon be able to resume services to Shanghai.

To continue our growth plans we have ordered one new Boeing 747-400 freighter and eight new Boeing and Airbus passenger aircraft for our regional fleet. We are also to take delivery of eight long haul B747-400 passenger aircraft. This will see Cathay Pacific with a fleet of 100 wide-bodied aircraft by 2006.

Prospects for the traditionally stronger second half appear to be good, although the high fuel price remains a concern which, if sustained, could dampen global economic growth and the demand for air travel. Nevertheless, we remain optimistic over our future and will continue to develop our network, strengthen Hong Kong as a global aviation hub and focus on delivering superior value to our customers.

James Hughes-Hallett

* Capacity is measured in available seat kilometres (ASK) for passenger services and available tonne kilometres (ATK) for cargo services.

Passenger services

- A very strong first half resulted in new records for both revenue and the number of passengers carried.
- Passenger revenue increased 65.9% year on year as a result of improved demand, together with a 31.4% increase in seat capacity and weak US dollar-related currency gains.
- In the first six months of 2004 6.4 million passengers were carried, an increase of 2.4 million.
- A new record of 45,803 passengers carried in a single day was set on 4th July.
- Overall load factor increased from 64.4% to 76.1%.
- Passenger yield increased to HK\$45.7, an improvement of 6.8%.
- Most long haul routes, in particular London and North America, performed consistently well.
- The Hong Kong market grew with strong front-end demand on long haul services and with more travellers taking flight and hotel packages.
- North Asian routes were relatively weak, with the Japan outbound market only recovering slowly and Taiwan suffering from increased price competition.

Cargo services

- In the first six months of 2004 we carried 469,909 tonnes of freight, an increase of 15.8% on 2003 and a 21.8% increase on 2002, a record tonnage uplift year.
- Revenue increased by 16.5% with strong export growth on trunk routes to Europe, Japan and the United States. Inbound loads from Europe, Japan, New Zealand and North America also increased.
- Demand out of Hong Kong remained strong due to the continued growth in re-exports from Southern China.
- A new one-week cargo uplift record of 21,000 tonnes was set in March.
- Cargo ATKs grew by 17.1%, load factor decreased to 68.7% while cargo yield remained at HK\$1.72.
- A new freighter service to Munich will be launched soon.
- Cathay Pacific is to be the launch customer for the B747-400 Special Freighter aircraft conversion. The first aircraft is expected to be delivered in December 2005 with five others to be delivered by 2007. Taikoo (Xiamen) Aircraft Engineering Company Limited will undertake the conversion.

Human resources

- Hong Kong based jobs for 600 cabin crew and 70 customer service officers were opened at the Youth Expo job fair.
- A new overseas base for cabin crew was created in London.
- Cathay Pacific now employs 14,800 staff in 30 countries and territories, 10,700 of whom are based in Hong Kong. Together with our subsidiaries and associates we employ over 21,000 staff in Hong Kong.
- We review our human resources and remuneration policy regularly in the light of local legislation, industry practice, market conditions and the performance of both individuals and the Company.

Review of subsidiary and associated companies

- AHK Air Hong Kong Limited launched services to Taipei and recorded a satisfactory profit in the first half of 2004.
- Cathay Pacific Catering Services (H.K.) Limited recorded a satisfactory interim profit due to increased meal volumes. However the profit margin remained under pressure due to competition and the avian flu outbreak which led to a higher food cost.
- Hong Kong Dragon Airlines Limited recorded an improved interim profit in 2004 in comparison with the previous interim which was significantly affected by the SARS outbreak.
- Hong Kong Aircraft Engineering Company Limited recorded an interim profit of HK\$232 million, representing a 22% increase from 2003.

* Capacity is measured in available seat kilometres (ASK) for passenger services and available tonne kilometres (ATK) for cargo services.

- Passenger services**
- A very strong first half resulted in new records for both revenue and the number of passengers carried.
 - Passenger revenue increased xx% year on year as a result of improved demand, together with a xx% increase in seat capacity and weak US dollar-related currency gains.
 - In the first six months of 2004 xx million passengers were carried, an increase of xx million.
 - A new record of XXX passengers carried in a single day was set on 4th July.
 - Overall load factor increased from xx% to xx%.
 - Passenger yield increased to HK\$xx, an improvement of xx%.
 - Most long haul routes, in particular London and North America, performed consistently well.
 - The Hong Kong market grew with strong front-end demand on long haul services and with more travellers taking flight and hotel packages.
 - North Asian routes were relatively weak, with the Japan outbound market only recovering slowly and Taiwan suffering from increased price competition.
- Cargo services**
- In the first six months of 2004 we carried xx tonnes of freight, an increase of xx% on 2003 and a xx% increase on 2002, a record tonnage uplift year.
 - Revenue increased by xx% with strong export growth on trunk routes to Europe, Japan and the United States. Inbound loads from Europe, Japan, New Zealand and North America also increased.
 - Demand out of Hong Kong remained strong due to the continued growth in re-exports from Southern China.
 - A new one-week cargo uplift record of xx tonnes was set in March.
 - Cargo ATK grew by xx% while load factor decreased to xx%. Cargo yield remained at HK\$xx.
 - A new freighter service to Munich will be launched soon.
 - Cathay Pacific is to be the launch customer for the B747-400 Special Freighter aircraft conversion. The first aircraft is expected to be delivered in December 2005 with five others to be delivered by 2007. Taikoo (Xiamen) Aircraft Engineering Company Limited ("TAECO") will undertake the conversion.

CHAIRMAN'S LETTER

The Group made a profit attributable to shareholders of HK\$xx million during the first six months of 2004. This was in marked contrast to the HK\$1,241 million loss recorded in the SARS-affected first half of 2003. Turnover was HK\$xx million, also sharply higher than the comparative figure of HK\$xx million. The number of passengers carried was up xx% to xx million, whilst the amount of cargo carried at xx tonnes was xx% higher than in the same period last year.

Strong passenger demand, particularly on long haul services, led to record first half passenger revenue. Passenger yield was HKxx cents compared to HK42.8 cents in the same period in 2003, reflecting both the improved demand for travel and currency gains resulting from the weaker US dollar.

Demand for cargo services out of Hong Kong remained buoyant throughout the first half due to the continued growth in re-exports from Southern China. Cargo volumes increased on trunk routes to Europe, Japan and the United States. Cargo yield remained at HK\$xx.

The benefits accruing from revenue growth were partially offset by a sharp increase in the price of fuel. The average fuel price, before hedging, was xx% higher than last year, with fuel now accounting for xx% of total operating costs. Fuel surcharges for both cargo and passenger services only partly offset the additional cost.

Within the Asia Pacific region, low cost carriers are entering a highly competitive and increasingly deregulated market place. It remains to be seen what impact such intensified competition will have. For our part, we will continue to provide a range of products and services tailored to meet the needs of our customers, offering both high standards of service and value for money. We will maintain our focus on productivity improvements and

cost management measures, and target a further reduction of xx% in our unit cost by 2007.

In June we launched a codeshare service to Moscow with Aeroflot – Russian Airlines. The following month we introduced twice daily services to New York with the addition of a daily non-stop service using the polar route. In addition we now operate daily to Colombo and have increased flight frequencies to Osaka, Riyadh and Taipei. New freighter services will soon be launched to Munich.

Our recently launched passenger service to Beijing has strengthened Hong Kong's ties with Mainland China and we are hopeful that we will soon be able to resume services to Shanghai.

To continue our growth plans we have ordered one new Boeing 747-400 freighter and eight new Boeing and Airbus passenger aircraft for our regional fleet. We are also to take delivery of eight long haul B747-400 passenger aircraft. This will see Cathay Pacific with a fleet of 100 wide-bodied aircraft by 2006.

Prospects for the traditionally stronger second half appear to be good, although the high fuel price remains a concern which, if sustained, could dampen global economic growth and the demand for air travel. Nevertheless, we remain optimistic over our future and will continue to develop our network, strengthen Hong Kong as a global aviation hub and focus on delivering superior value to our customers.
