**File No. 824883 – Frequent Issuer Status of
Hypothekenbank in Essen AG**

SUPL

Dear Sir or Madam,

Please find enclosed Essen Hyp's website as of August 31, 2004.
We send you this information in order to fulfill our obligations for the
frequent issuer status of Hypothekenbank in Essen AG / Germany.

We would be obliged if you could confirm that you have received this
information by returning the enclosed answer form to us.

Thank you very much for your assistance.

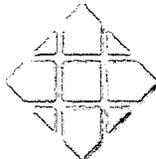

Yours faithfully,

Hypothekenbank in Essen
Aktiengesellschaft

Essen Hyp: Key competence in capital market business

The focus of Essen Hyp's business is on lending to national and international public-sector debtors. In addition the Bank gives long-term mortgage loans to finance both commercial property and private housing.

Accordingly we make great use of the international capital markets on which, besides the "traditional" *Pfandbrief*, more and more Jumbo and Global *Pfandbriefe* are being issued.

Essen Hyp is one of the largest issuers of Jumbo *Pfandbriefe* worldwide.

Economic Growth and Interest Rate Outlook for the United States 2004/2005

Economic Growth

No doom and gloom – it's full steam ahead!

I took the title of this report from my G3 publication of summer 2002. Today it is even more accurate than ever. Growth of U.S. GDP has accelerated to the tremendous annualized rate of 8.2% in the third quarter of last year, according to the revised data of the U.S. Department of Commerce, after an already solid growth rate of 3.1% in the previous quarter. I again expect strong economic growth with an annualized rate of more than 5% for the final quarter of last year. In December 2003 the ISM index for the manufacturing industry reached the highest level in 20 years. However, the great majority of market observers did not comment euphorically on this economic development. In contrast, they doubted once more the sustainability of the economic recovery. One could think of a latent anti-Americanism, had no famous U.S. economist been among those doubting economists as well. Although one piece of positive economic news is followed by another, market participants stick to their pessimistic growth view. At the beginning, market participants thought the economic recovery would be certain only when corporate profits start to rise – in the third quarter of 2003 the S&P 500 profits rose by 23% compared to the same period of 2002. Then skeptics demanded a rise in investment activity – in the third quarter of 2003 investment in equipment and software rose in real terms by 7% compared to the same period of the previous year. The objection heard several times, that the increase of investment activity was merely a result of the hedonic method of deflationary adjustment, is answered by the fact that investment activity, counted in current prices, has expanded only less slightly. Finally, the argument, the economic recovery would slacken due to missing indicators for a stabilization of the labor market, was added. In the meantime employment has risen for six successive months, according to the households survey. In the recent past the high growth in the U.S. was modified, indicating single effects like increased military expenditure, the cash inflow through refinancing residential properties and the tax cuts of the Bush government. But these objections are neither convincing due to the following reasons:

- The proportion of defense spending of U.S. GDP has constantly decreased since the end of the Korean War in 1953 and was at only 4% in 2002. Actually, the U.S. government increased defense spending by nearly 13% year-over-year in the third quarter of 2003, but due to its decreased economic importance this surge of military spending has contributed less than a half percentage point to the change rate of GDP of 3.6% in the third quarter of 2003.
- Since July 2003 the rising interest rates of mortgage loans with 30-years maturity have made the unprecedented flood of refinancing applications for residential properties slowly disappear. According to anecdotal reports, home owners have, in the course of these refinancings, usually borrowed a higher amount against their property than before. Various analysts are of the opinion that the resulting inflow of liquidity has contributed considerably to the very high private consumption spending in the third quarter of 2003. During this

period the disposable income as well as private consumption – in nominal amounts respectively – has risen by annualized rates of more than 8%, while the savings rate remained constant at 2.3%. Consequently, private households have completely used up the tax cut of summer 2003 (increase of the child allowance and the lowering of the income tax rates). This, however, makes clear that the inflow of liquidity from refinancing cannot be exhausted yet. This is supported by the fact that the amount of savings and money market funds (mutual funds), measured in percent of disposable income, has recently reached an all-time high. Therefore, a considerable decelerated growth of private consumer spending is not expected. In addition, the slump in the home market has still not taken place, despite all prophecies of doom. The index established by the National Association of Home Builders remained, in January 2004, slightly below its quarterly high of October 2003.

- In addition, the retroactive effecting tax cut of last summer will result in a tax refunds increase of an estimated 55 billion U.S. dollars in the first half of the year. This repeated expansionary stimulus corresponds to 0.5% of the nominal GDP. Experience of earlier tax cuts, as well as the recent strong rise in consumer confidence, suggest that the coming tax cuts will also largely be converted into private consumption. It is astonishing that there is no argument in favor of high private consumption spending resulting from the positive wealth effect which started in spring with friendly stock markets. Wealth of households has, with about 42,000 billion U.S. dollars at the end of the third quarter in 2003, already exceeded the local low of the third quarter of 2002 by 3,500 billion U.S. dollars, and are currently not far away the all-time high of the first quarter of 2000. At that time a surge of the personal savings rate, and thus a slump in private consumption spending, resulting from the negative wealth effect accompanying the bursting of the speculative bubble on the stock markets, was forecast by the pessimists. This slump did not materialize, thanks to an only slight increase in the personal savings rate. Moreover, the low savings rate level in the United States compared to Germany and Japan is, in my view, not an indicator for a nation with an excessive debt burden, but rather an expression of the citizens' positive income expectations which are based on a markedly favorable demographic situation compared to all other industrialized nations. Be that as it may: there is enough time until the fiscal-political stimulation peters out to guarantee a transition from the current economic recovery to a self-supporting expansion.

The self-supporting expansion will develop along a high growth path. This fact is based on the previously mentioned favorable demographic development but first and foremost on the *impressive progress of productivity in the U.S. economy*. According to revised data, growth in labor productivity has accelerated from an average 1.5% p.a. during the first half of the 90s and 2.4% p.a. during the second half, up to enormous 3.9% p.a. in the years 2000 to 2003 [1] (see current graph). It can be assumed that recent progress in productivity will level off in the course of a continued recovery of the labor market. Nevertheless, the acceleration of growth in productivity since the beginning of this millennium is still so strong, seen against the background of this argument, that it could conceal another rise of trend growth. This is even more likely due to the fact that the average growth of GDP slowed down from 4.1% p.a. in the second half of the 90s to 2.0% p.a. in the years 2000 to 2003 [2]. That given, an acceleration of productivity growth can no more be regarded merely as a cyclic phenomenon: the thesis of a "new economy" was proven during the recession in 2001 at the latest. In addition, according to a current study [3] computer investments unfold their entire productivity-increasing effect only after a delay of 7 years. As a result of an investment increase in information processing and software [4] by an average of

almost 20% per year during the second half of the 90s, the application of new technical inventions will continuously lead to significant productivity gains in the coming years. This year private consumption and investment in equipment and software will be the two main economic growth supporters. But also inventory increases will noticeably contribute to GDP growth rate. Private consumption will benefit from the previously mentioned tax refunds and a brightening on the labor market. In a first step the latter will contribute to the increase of disposable income through a rise in employment. In the further course of the year consumer's purchasing power could produce another step-up due to rising wages, because growth of real wage fell behind productivity performance in the past quarters. Investment in equipment and software will be quickened by the double-digit growing profits and the improved depreciation allowances which are valid until the end of 2004. Moreover, four years after the Y2K boom big reinvestments in the information technology sector are already lined up to go.

Despite the depreciation of the U.S. dollar the current account deficit will not narrow because the brisk domestic demand will go along with a strong import growth. Net exports will consequently not contribute to GDP growth.

The average annual growth rate of GDP in 2004 will be approximately 5.5%. This remarkably strong growth can partly be traced back to a statistical overhang in 2003. In 2005, however, the speed of expansion will slow down somewhat to a still high growth rate of about 4.5%.

Although the economic engine is again running fast, an acceleration in inflation is not visible. In contrast and fortunately for the bond market, in the middle of December the U.S. Department of Labor reported a slowdown in the consumer price index less energy and food of 0.1% in November, compared to previous month, in seasonal-adjusted terms. Compared to the previous year the so-called core rate was, at only 1.1%, the lowest since May 1963. In view of a still large underutilization of capacities and decreasing unit labor costs – in the third quarter of 2003 unit labor costs dropped by 2.2% compared to same quarter of last year – this year's change rate will significantly fall below the 2% mark of last year. This is neither countered by the present weakness of the U.S. dollar nor by the bullish commodity market. A comparable situation in the years from 1994 to 1996 did not result in an accelerated surge in prices and, thus, proved that the development of unit labor costs determines the development of consumer prices. Accordingly, the ghost of a deflation has vanished into thin air due to the most recent depreciation of the U.S. dollar and the surge in commodity prices. The fact that the year-over-year change rate of 2% equaled the Federal Reserve Bank of Cleveland calculated median CPI for several months, may thus be regarded as the first indicator for a slow deceleration of the more than 20 year-old disinflation trend. The Open Market Committee of the Federal Reserve (FOMC) agrees with the evaluation of a lessening deflation risk. Its communiqué of December 9, 2003 states: "The probability of an unwelcome fall in inflation has diminished in recent months and now appears almost equal to that of a rise in inflation [5]". It further states: "However, with inflation quite low and resource use slack, the Committee believes that policy accommodation can be maintained for a considerable period [6]". Capital market participants are now trying to figure out at what time the "considerable period of time" will be over. In accordance with a recent Bloomberg survey the majority of economists schedule the beginning of the next interest rates hike phase for the second half of this year. However, I forecast the beginning of the key interest rate increase as early as in the first half of the year. This point of view is firstly supported by the expectation that the expansionary pace in the United States will be considerably above the growth trend also in the coming quarters and thus, current under-utilization of capacities will decrease. Jack Guynn, President of the Federal Reserve Bank of Atlanta, recently commented the U.S. monetary policy as follows: "If the economic expansion continues

to build momentum and breadth, it will be appropriate at some point to bring policy back to a longer-run setting that is more consistent with noninflationary, sustainable growth [7].” Secondly, financial market conditions have noticeably brightened. This is visible in the recovery of the stock market and the narrowing of interest spreads of corporate bonds compared to government bonds. Thirdly, deflation expectations of capital market participants have vaporized – if they ever actually existed. Notwithstanding my expectation of continuously low inflation rates, the necessity for a more extreme expansionary monetary policy is waning. The tightening of the monetary reins, as I forecast, will inevitably initiate a sellout at the long end of the interest rate curve. Among market players the predominant expectation that the Federal Reserve will keep on its expansive stance for a long time, should have decisively contributed to the stabilization of long-term yields at a comparatively low level. The absence of a key interest rate hike by the Federal Reserve during the last year is thus very likely the main reason for my misleading forecast of strongly surging U.S. capital market yields as of spring 2003. Hence, the Deutsche Bundesbank writes:

“...despite the sharp increase in recent months, the actual interest rate level in the United States is still significantly lower than the interest rate level estimated on the basis of these two important explanatory factors [8].” Another explanation for the rather low U.S. yield level may be that bond dealers and fund managers are a lot less optimistic regarding economic growth than their colleagues in the economic research departments. But due to the fact that my forecast is located at the upper margin of the range determined by the forecasts of the economic research departments, the way to considerably higher yields is predetermined even according to this way of argumentation, if my growth forecast actually comes about. Therefore, I expect that 10-year U.S. Treasury Notes will yield 5.4% at the end of this year. The predicted yield increase will also continue next year.

Germany: Are economists now too bearish about Germany?

May/June 2004

During the last three years economists have been much too upbeat about the German economy. Thus, in the course of each year they have had to slash their GDP forecasts back to reality.

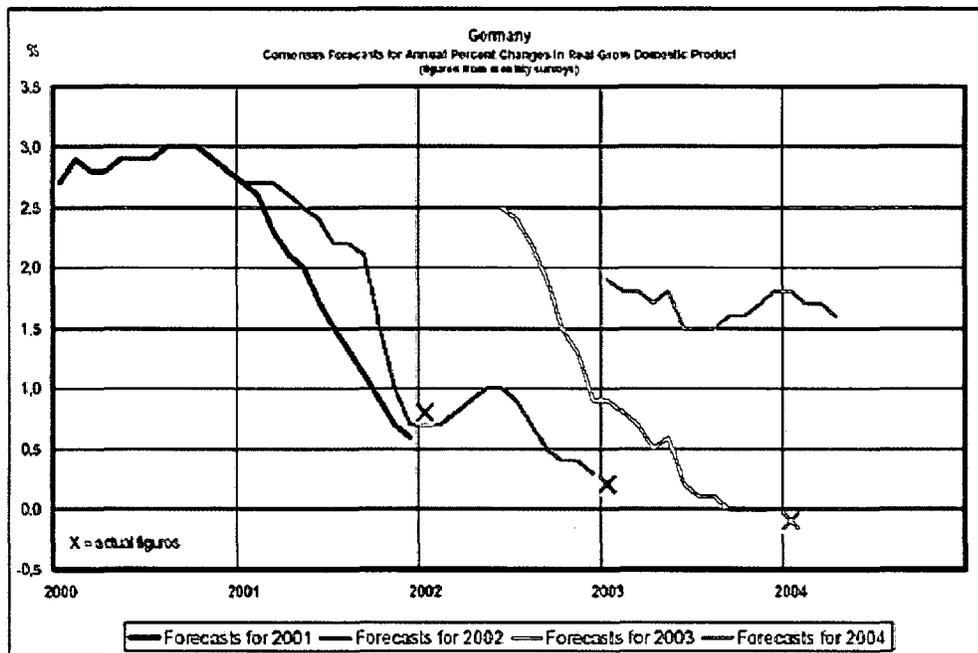

Chart 1 - Source: Consensus Forecast

Actual real GDP growth rates were, on average, as much as 2.3 percentage points below the initial consensus projections. Consensus growth forecasts for the current year have once again been scaled back, albeit only from 1.9% in January 2003 to 1.6% in April 2004. Recently the six leading German economic think tanks, in the framework of their common economic outlook, revised downwards their German growth projection for 2004 from 1.7% in autumn 2003 to 1.5% in spring 2004. What's more, the ZEW Indicator of Economic Sentiment for Germany went south in May and thereby posted the fifth consecutive decline in optimism.

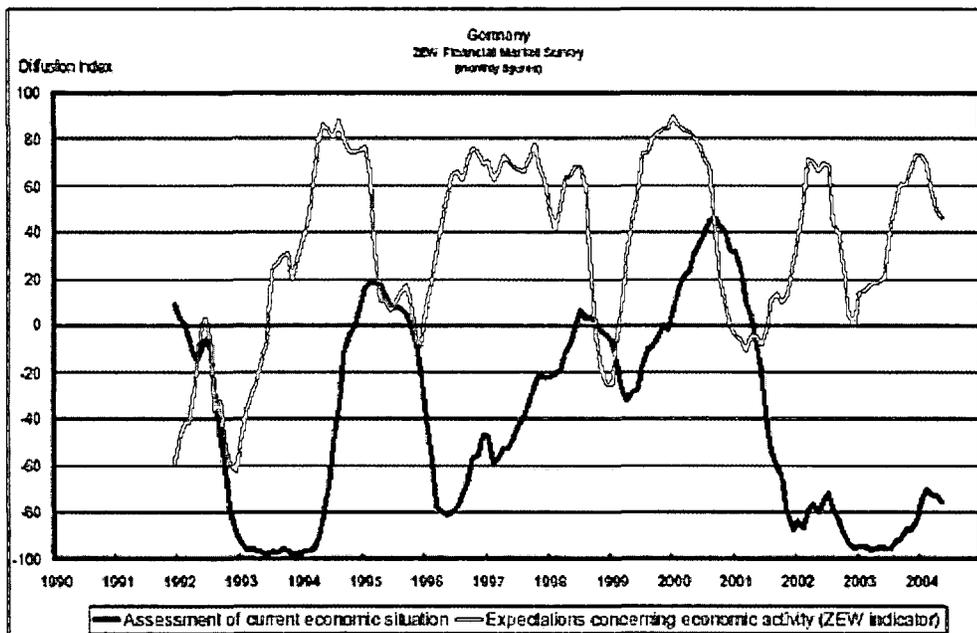

Chart 2 - Sources: Bloomberg, ZEW

(The ZEW indicator shows the balance between positive and negative expectations among analysts and institutional investors for economic activity in six months' time.)

So the \$64,000 question might be whether recent downward revisions are, as in the last three years, the beginning of worse to come. But, having burnt their fingers too often before, economists might have moved too far to the other side by joining the doomsayers. Hence, given these lowered expectations it might now be possible for Germany to generate positive surprises on growth. The following arguments give some positive backing for an outpacing of consensus expectations.

- First of all, it has to be said that the benchmark for the consensus forecasts is the headline real GDP growth rate published by the Federal Statistical Office. This figure is not working-day adjusted. But as Germany has more working days in 2004 than in the previous year, a working-day adjusted growth rate of only 0.9% will be sufficient to reach the consensus forecast of 1.5% for the unadjusted rate. Hence, the actual target to be reached is quite low.
- Second, since the second half of last year, growth forecasts for the two most important German trading partners outside the euro area, the United States and the United Kingdom, have been continuously revised upwards. In April 2004 the consensus growth forecasts for 2004 stood at 4.6% and 3.1%, respectively. What's more, 2004 growth projections for eastern Europe have also been raised, from 4.3% in June 2003 to 5.0% in April 2004. Currently, around 12% of all German goods' exports go to eastern Europe. So, outside Germany, most economies - including the supertankers United States, China and Japan - are booming. Germany will without doubt benefit from this bright outlook for the world economy. Despite the launch of the euro in 1999, Germany is far from being a closed economy. Exports to countries outside the euro area (as a percentage of nominal GDP) have risen from 13.5% in 1991 to 21.2% in 2003.

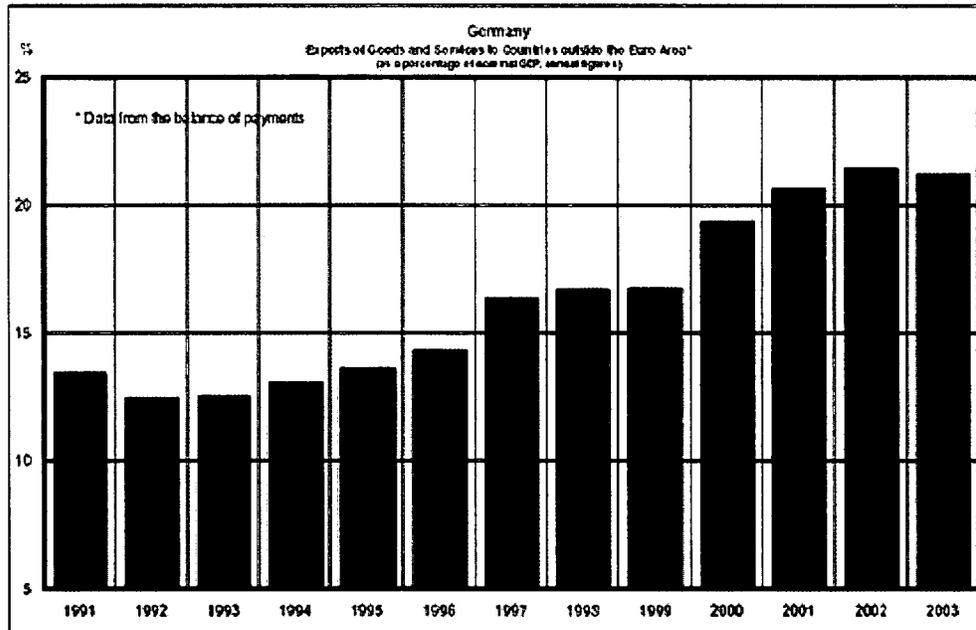

Chart 3 - Sources: Deutsche Bundesbank, Bloomberg and own calculations

The United States and Japan, in comparison to that, have current export shares of only around 10%, respectively. In addition, the competitiveness of German companies has improved as a result of the euro depreciation in recent weeks. In March 2004, the indicators of the German economy's price competitiveness, calculated by the Bundesbank, were only slightly above their levels of a year ago. Turning to euro area member states, Germany's most important trading partner, France, is doing well. In the light of better than expected GDP figures for the first quarter of 2004, Christoph Weil, Senior Economist at Commerzbank, recently raised his forecast for French real GDP growth in 2004 from 2.0% to 2.5%. Moreover, Germany will gain market shares from other euro area member states. Whereas German unit labor costs edged up by a meager 0.7% in 2003, unit labor costs for the euro area as a whole rose by 2.2% during the same period of time. What's more, as nearly half of German goods exports consist of capital equipment, German exporters will benefit in particular from the global rebound in investment demand. This is already being registered in the order books of the engineering industry. According to figures from the Federation of the Engineering Industries (VDMA), foreign orders in this sector surged by 41% in the year to March.

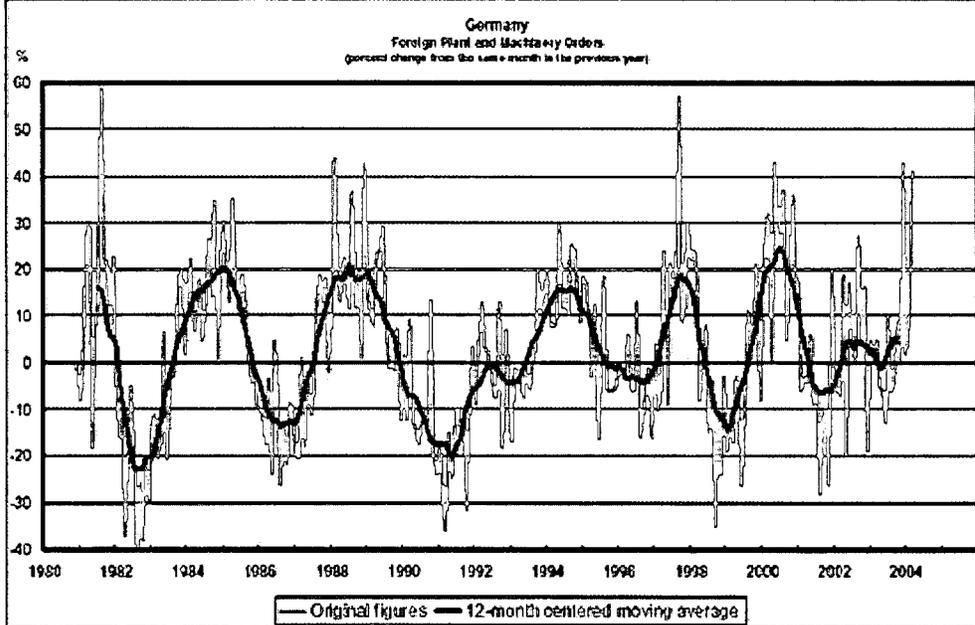

Chart 4- Source: Bloomberg

It is true that the Bundesbank's preliminary March figures for industrial production and factory orders paint a rather gloomy picture of the German economy. But there are rumors in the market that these figures will be revised markedly upwards.

- The brightening export outlook also has some positive spill-over effects for investment. Real machinery and equipment investment rose at an annualized rate of almost 8% in the fourth quarter of last year, after twelve consecutive quarters of decline. In addition, orders received by capital goods producers from the domestic market indicate a slight increase in investment spending in the first quarter of this year. But in contrast to the United States and Japan, German corporations have not yet paid back their "Bubble Economy" debts.

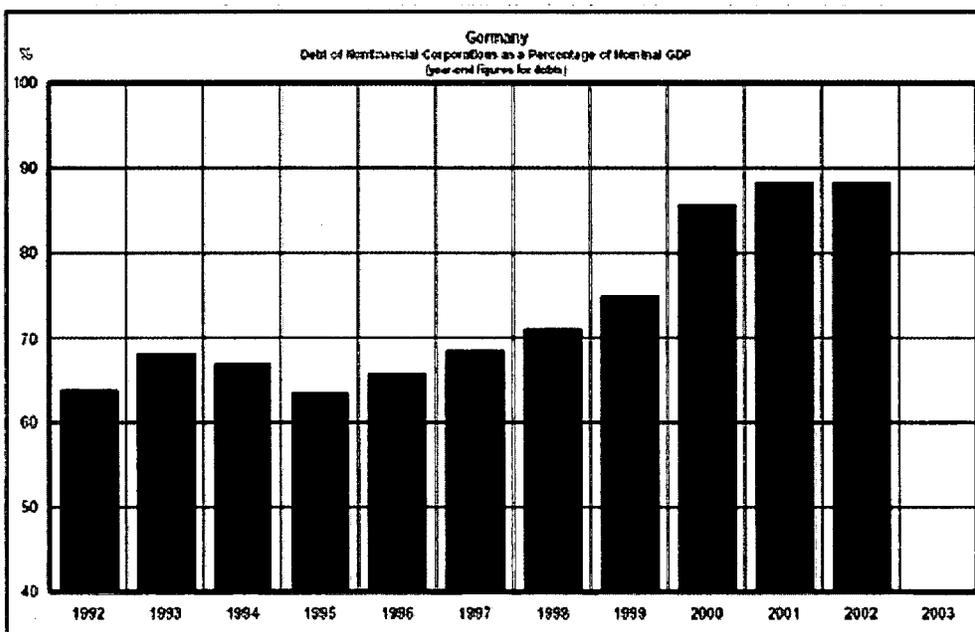

Chart 5 - Sources: Deutsche Bundesbank, Bloomberg and own calculations

At the end of 2002 the debt of German corporations (as a percentage of nominal GDP) was only a touch below the peak posted in the previous year, and since then the debt situation has hardly improved. According to provisional figures from the Bundesbank, the debt ratio abated only slightly at the end of 2003. This, in turn, will

induce corporations to use a large part of their earnings for reducing excessive debts, thus having less money available for investment. At least (bottom up) earnings estimates have been revised upwards in recent months.

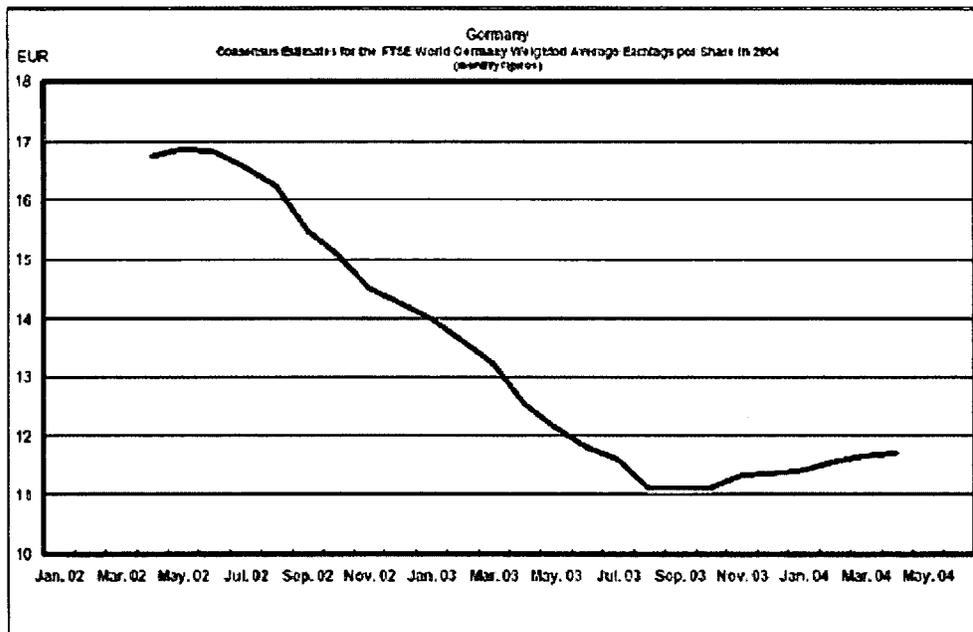

Chart 6- Source: Thomson Financial

This would under normal circumstances certainly have triggered a marked pick-up in investment expenditure, but in the current climate only a modest investment recovery is on the cards.

- Germany's problem child is private consumption. In the two previous years, consumer expenditure was hampered by meager growth in gross wages and salaries and a rise in the tax wedge (including social security contributions). In addition, consumers scaled back purchases because they perceived consumer prices - rightly or not - to have jumped markedly in the aftermath of the introduction of euro notes and coins in January 2002. However, after having peaked in August 2002, perceived inflation has since fallen, lessening the burden on private consumption. What's more, the tax wedge is expected to diminish somewhat in this year as the federal government has partially brought forward the income tax cuts originally scheduled for 2005 into 2004.

The basic income tax rate was reduced from 19.9% to 16.0%, the top rate from 48.5% to 45.0%. In addition to this, the federal government is trying to reverse the permanent increase of the mandatory contributions to the social security system, which are equally shared between employers and employees. For this purpose, the government reached a compromise with the CDU/CSU-led opposition on a reform of the statutory healthcare insurance system, aiming to reduce costs by EUR 10 billion in 2004 - and even more in the following years. The reform measures effective since the beginning of this year include among others: higher patient charges for prescription drugs; a reduction of prescription drugs covered by the statutory health insurance; cancellation of insurance benefits for spectacles and introduction of a EUR 10 fee for the first consultation with a doctor in each quarter. Early figures indicate that the reform measures might have the desired effect. According to the National Association of Statutory Health Insurance Physicians, consultations are estimated to have decreased by around 10% in the first quarter of 2004, compared with the same period in the previous year.

This fits in with news on expenditure on medicine borne by the compulsory health insurance system, which went down by around 15% over the same period.

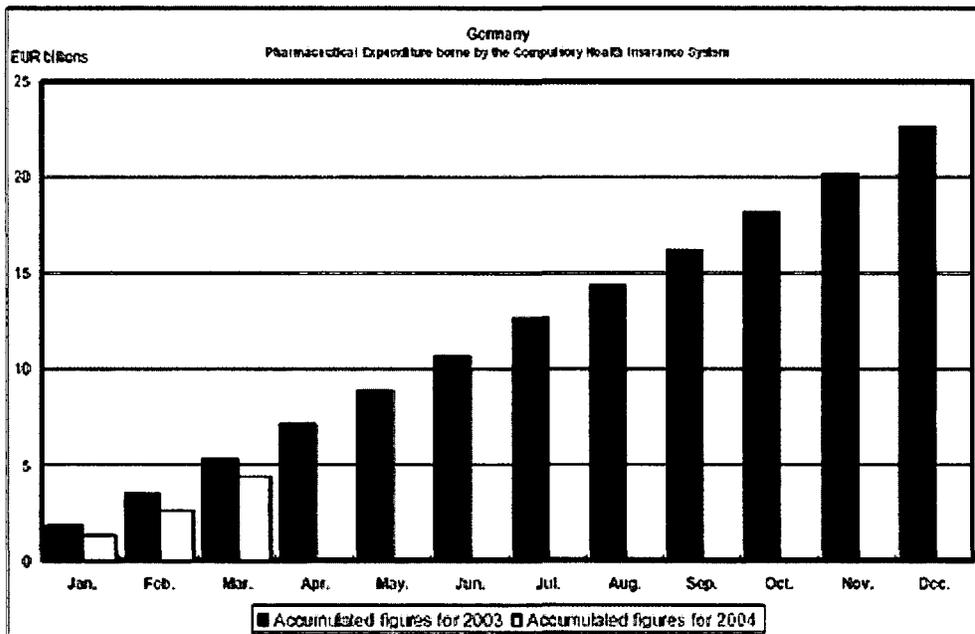

Chart 7 - Sources: Federal Association of German Pharmacists Federations (Bundesvereinigung Deutscher Apothekerverbände), own calculations

But these current figures have to be taken with a big pinch of salt as more patients went to the doctor in late 2003, in anticipation of fewer social benefits thereafter. Hence, data on consultations and spending on medicine for the early months of 2004 are probably biased downwards. In addition, there are anecdotal reports that physicians tend now to prescribe more of the (expensive) drugs which are still covered by the statutory health insurance in order to help lower income patients to save money.

Nevertheless, the two biggest German health insurance funds, Barmer Ersatzkasse and DAK, with a total of around 15 million insured people, have already trimmed their contribution rates and are considering further cuts. A lower social contribution rate has two positive effects on the German economy: an increase in disposable income of private households and a decline of non-wage labor costs for corporations. In addition to this, the German stock market recovery and the planned legislation to allow stores to open 24 hours a day, may lift consumers' buying propensity somewhat.

In view of a strong world economy and historically low central bank rates, even a lame duck like Germany should start to fly. Last week the Federal Statistical Office published first data on economic trends in the initial quarter of 2004. According to this press release, German real GDP rose by 0.4% in quarter-on-quarter terms with seasonal and calendar adjustments, thus beating market expectations. What's more, the GDP figure for the 4th quarter of 2003 was revised slightly upwards, thus increasing the statistical overhang from 2003. Given this good start to the year, it is in my opinion too late for economists to jump on the doomsayer's bandwagon. Hence, I expect German real GDP to grow by 2.0% in 2004. This should definitely take a further ECB rate cut off the agenda.

Special thanks go to Christoph Weil, Senior Economist at Commerzbank, for his helpful comments.

Roadshows

The entry of the Jumbo into the international capital markets gave the German mortgage banks the opportunity of winning new investors for the German *Pfandbrief* at an international level. Essen Hyp reacted promptly and focussed its internationally targeted funding strategies on investors' needs.

Since its first international roadshow in October 1997 which went from London, via Asia, to the United States, Essen Hyp has been presenting itself and its products on a regular basis to international investors in all important financial and commercial centers of the world.

We will continue to commit ourselves to the task of intensifying our close contact with national and international investors.

During the roadshows investors have been asking many questions on, for example, the German legal system, the distinction between the German *Pfandbrief* and other products, the quality of our cover fund, etc. Information on these and other related issues can be found in our Glossary.

Our latest roadshow presentation is available for download here.

The German Corporate Governance Code Commission set up by the German government, presented the German Corporate Governance Code on February 26, 2002. This Code of best practice describes key statutory provisions for the management and supervision of German listed companies and embodies internationally and nationally recognized standards for good and responsible governance. It is intended to make the German system of corporate governance transparent and understandable, and also to promote the trust of international and national investors, customers, employees and the general public in the management and supervision of listed companies.

The shares of Essen Hyp are not listed on a stock exchange. This is why certain legal requirements and stipulations set out in the German Corporate Governance Code, which are applicable to German listed companies, are not relevant to Essen Hyp

Nevertheless, and in view of maximum transparency, Essen Hyp expressly welcomes and supports the German Corporate Governance Code and the goals and objectives it pursues. The Corporate Governance Code of Essen Hyp complies with most of the requirements set out in the German Corporate Governance Code. Given that Essen Hyp's shares are not listed on a stock exchange and that the bank is thus not in a position to satisfy those requirements of the Code that are mandatory for listed companies, the bank does not expressly state which recommendations of the Corporate Governance Code are not complied with for this reason.

- ▷ Declaration of Compliance with the German Corporate Governance Code (PDF)
- ▷ Corporate Governance Code of Hypothekenbank in Essen Aktiengesellschaft (PDF)

Declaration of Compliance with the German Corporate Governance Code pursuant to Section 161 of the German Stock Corporation Act (*AktG*)

Preliminary remark: The shares of Hypothekbank in Essen Aktiengesellschaft (hereinafter also referred to as “Essen Hyp“ or the “bank“) are not listed on a stock exchange. At present, the Hypothekbank in Essen Aktiengesellschaft has only two shareholder groups: Commerzbank Aktiengesellschaft, with a majority stake, and the Schuppli Group holding the remaining shares. This explains why certain legal requirements and stipulations set out in the German Corporate Governance Code, which are applicable to German listed companies, are not relevant to Essen Hyp.

Nevertheless, Hypothekbank in Essen Aktiengesellschaft expressly welcomes and supports the German Corporate Governance Code and the goals and objectives it pursues. The Corporate Governance Code of Hypothekbank in Essen Aktiengesellschaft complies with the recommendations of the German Governance Code Commission, announced in the official section of the electronic Federal Gazette (*Bundesanzeiger*) on May 21, 2003, except for those restrictions which relate to the fact that Essen Hyp is not a German listed company and does not produce consolidated accounts, and except also for the following recommendations:

Pursuant to Section 2.3.2 the bank shall inform all domestic and foreign shareholders, shareholders' associations and financial services' providers, who, in the preceding 12 months, have requested such notification, of the convening of the General Meeting, and shall provide them with the convention documents upon request, also using electronic channels. The shares of Hypothekbank in Essen Aktiengesellschaft are not listed on a stock exchange. Hypothekbank in Essen Aktiengesellschaft has only two shareholder groups: the Commerzbank Aktiengesellschaft and the Schuppli Group. All shareholders are known to the bank. This is why Essen Hyp makes use of the simplifications as regards the invitation to and convening of General Meetings laid down in the German Stock Corporation Act (*AktG*). Thus, Essen Hyp does not announce its General Meetings externally, e.g. in the Federal Gazette (*Bundesanzeiger*), and, contrary to the provisions laid down in Section 2.3.1, the agenda and the reports and documents required for the General Meeting are not published on Essen Hyp's company website.

Given that both shareholders are represented in the Supervisory Board and in the Presiding Committee as the committee responsible for the employment contracts of the members of the Board of Managing Directors, the Supervisory Board does not discuss and review the structure of the Board's compensation system as laid down in Section 4.2.2.

Contrary to Section 4.2.4 the information and figures on the compensation of the members of the Board of Managing Directors are not individualized.

Pursuant to Section 5.3.2 the Supervisory Board shall set up an Audit Committee which, in particular, handles issues of accounting and risk management. Given that the Supervisory Board of Essen Hyp is composed of not more than 6 members, the Board refrained from setting up such an Audit Committee. Risk management issues are the responsibility of the Credit Committee of the Supervisory Board, which also deals with the bank's credit and market risks. Issues relating to the annual audit are addressed by the Supervisory Board itself.

Due to our bank's shareholder structure we have refrained from specifying an age limit within the meaning of Section 5.4.1.

Contrary to Section 5.4.5 the information and figures on the compensation of the members of the Supervisory Board are not individualized.

Given that all shareholders carrying voting rights are directly or indirectly represented in the Supervisory Board, conflicts of interest are dealt with exclusively within the Supervisory Board in accordance with Section 5.5.2. Contrary to Section 5.5.3 the General Meeting is not informed about such conflicts of interest.

Given that no shares of Essen Hyp are in free flow or listed on a stock exchange, and that the bank does not have any stock option programs or comparable incentives in place, the provisions laid down in Sections 4.2.3, 6.6 and 7.1.3 of the German Corporate Governance Code are not relevant to Essen Hyp.

As long as Hypothekenbank in Essen Aktiengesellschaft compiles its Annual Accounts in accordance with the provisions of the German Commercial Code (*HGB*), it will not pass information to third parties by means of Annual Reports or Interim Reports compiled in accordance with the International Accounting Standards (*IAS*), as stipulated in Section 7.1.1. Apart from the Annual Accounts and Interim Reports, the two shareholder groups of the company receive additional information during the Supervisory Board meetings, so that the above reports are not the only source of information available to them.

Essen, September 17, 2003

The Board of Managing Directors

The Supervisory Board

1 Preamble

1.1 Implementation of the German Corporate Governance Code.

The German Corporate Governance Code Commission (the “Code Commission”) set up by the German government, presented the German Corporate Governance Code on February 26, 2002. This Code of best practice describes key statutory provisions for the management and supervision of German listed companies and embodies internationally and nationally recognized standards for good and responsible governance. It is intended to make the German system of corporate governance transparent and understandable, and also to promote the trust of international and national investors, customers, employees and the general public in the management and supervision of listed companies.

The German Corporate Governance Code contains the following three elements:

- a presentation of applicable law
- recommendations of the Code Commission regarding the management and supervision of companies
- suggestions

This Code of best practice, as amended on November 7, 2002, has been officially published by the Federal Ministry of Justice, and is complemented by a provision in the German Stock Corporation Act (*AktG*) pursuant to which the Board of Managing Directors and the Supervisory Board of listed stock corporations (*Aktiengesellschaften*) are required to declare every year whether these recommendations were complied with and which recommendations were not applied (the “comply-or-explain declaration”).

The shares of Hypothekenbank in Essen Aktiengesellschaft (hereinafter also referred to as “Essen Hyp“ or the “bank“) are not listed on a stock exchange. At present, Hypothekenbank in Essen Aktiengesellschaft has only two shareholder groups: Commerzbank Aktiengesellschaft, with a majority stake, and the Schuppli Group holding the remaining shares. This is why certain legal requirements and stipulations set out in the German Corporate Governance Code, which are applicable to German listed companies, are not relevant to Essen Hyp.

Nevertheless, Hypothekenbank in Essen Aktiengesellschaft expressly welcomes and supports the German Corporate Governance Code and the goals and objectives it pursues. The Corporate Governance Code of Hypothekenbank in Essen Aktiengesellschaft (hereinafter referred to as the “Code”) complies with the requirements set out in the German Corporate Governance Code, except from those restrictions which relate to the fact that Essen Hyp is not a German listed company and does not set up consolidated accounts.

The Code clarifies the rights of shareholders who provide Essen Hyp with the necessary equity capital and bear the entrepreneurial risk. At the same time, it presents the rules set out in the Articles of Association and the rules of procedure for the Supervisory Board and the Board of Managing Directors.

1.2 Board system of Hypothekenbank in Essen Aktiengesellschaft

A dual board system is prescribed by law for Hypothekenbank in Essen Aktiengesellschaft as a German stock corporation.

The Board of Managing Directors is responsible for managing the company. Its members are jointly accountable for the management of the company, whereby the individual members are responsible for the areas assigned to them within the framework of Board resolutions. The chairman of the Board of Managing Directors co-ordinates the work of the Board members. Subject to certain legal provisions, such as Section 15 of the German Banking Act (*KWG*), Board resolutions are passed with the majority of votes cast.

The Supervisory Board appoints, supervises and advises the members of the Board of Managing Directors and is directly involved in decisions of fundamental importance to the company. The chairman of the Supervisory Board co-ordinates the work of the Supervisory Board.

Two thirds of the members of the Supervisory Board are elected by the shareholders at the General Meeting. The two remaining members of the Supervisory Board are staff representatives who are elected by the bank's employees at a secret ballot. The chairman of the Supervisory Board is appointed by the Commerzbank Aktiengesellschaft, being the majority shareholder. His deputy is appointed by the minority shareholder. Subject to certain legal provisions, Supervisory Board resolutions are passed with the majority of votes cast. In the case of a tie – also at elections – the chairman of the meeting has the casting vote. Both, the representatives elected by the shareholders and the staff representatives are obliged to act in the company's best interests.

The company's accounting follows the 'true and fair view' principle and presents a view of the company's net assets, financial position and earnings situation that corresponds to the actual circumstances.

As a rule this Code will be reviewed and, if necessary, adjusted once a year in the light of national and international developments and changes within the company.

2 Shareholders and General Meeting

2.1 Shareholders

2.1.1 Shareholders exercise their rights at the General Meeting and vote there.

2.1.2 Each share carries one vote. There are no shares with multiple voting rights, preferential voting rights (golden shares) or maximum voting rights.

2.2 General Meeting

2.2.1 The Board of Managing Directors submits the Annual Financial Statements to the General Meeting. The General Meeting decides on the appropriation of profit and the discharge of the acts of the Board of Managing Directors and of the Supervisory Board. It also elects the shareholders' representatives to the Supervisory Board and the auditors.

Furthermore, the General Meeting decides on the Articles of Association, the object of the company, amendments to the Articles of Association and essential corporate measures such as, in particular, inter-company agreements and transformations and the issuance of new shares, convertible bonds, bonds with warrants and profit-sharing certificates, or it authorizes the Board of Managing Directors to issue them with the approval of the Supervisory Board. In addition, the General Meeting decides on the authorization to purchase own shares.

2.2.2 When new shares are issued, shareholders shall have a subscription right reflecting their respective share of the equity capital, unless the General Meeting decides otherwise.

2.2.3 Each shareholder is entitled to participate in the General Meeting, to take the floor on matters on the agenda and to submit materially relevant questions and proposals.

2.2.4 The chairman of the General Meeting shall ensure that the meeting runs smoothly.

2.3 Invitation to the General Meeting, Proxies

2.3.1 The Board of Managing Directors shall convene the General Meeting at least once a year, giving details of the agenda. A quorum of shareholders is entitled to require that a General Meeting be convened and the agenda extended. The Board of Managing Directors shall not only make available the reports and documents that are required by law for the General Meeting, including the Annual Report, during the meeting itself, but also send them to the shareholders on request.

- 2.3.2 The bank facilitates the personal exercising of shareholders' rights and also assists the shareholders in the use of proxies. The Board of Managing Directors arranges for the appointment of a representative to exercise shareholders' voting rights in accordance with their instructions.

3 Co-operation between the Board of Managing Directors and the Supervisory Board

- 3.1 The Board of Managing Directors and the Supervisory Board shall co-operate closely to the benefit of the company.
- 3.2 The Board of Managing Directors co-ordinates the bank's business strategy with the Supervisory Board and discusses the current state of strategy implementation with the Supervisory Board at regular intervals.
- 3.3 Pursuant to specific provisions set out in the Articles of Association, by the Supervisory Board and in the German Banking Act (*KWG*), transactions of fundamental importance require the approval of the Supervisory Board. These transactions include decisions or measures which fundamentally alter the company's asset, financial or earnings situation, as well as fundamental credit decisions.
- 3.4 Providing the Supervisory Board with sufficient information is the joint responsibility of the Board of Managing Directors and the Supervisory Board.

The Board of Managing Directors shall inform the Supervisory Board regularly, without delay and comprehensively, about all issues that are relevant to Essen Hyp with regard to planning, business development, the risk situation and risk management. The Board of Managing Directors reports on deviations of the actual plans from previously formulated targets, indicating the reasons for these deviations.

The Supervisory Board specifies the information and reporting duties of the Board of Managing Directors. The reports of the Board of Managing Directors to the Supervisory Board are, as a rule, to be submitted in writing. Documents required for decision-making such as, in particular, the Annual Financial Statements and the Auditors' Report are, to the extent possible, forwarded to the members of the Supervisory Board in due time prior to the meeting.

- 3.5 Good corporate governance requires an open dialogue between the Board of Managing Directors and the Supervisory Board, as well as amongst the members within the Board of Managing Directors and the Supervisory Board. The strict observance of confidentiality is of paramount importance for this.

All Board members shall ensure that the staff members they employ also comply with the obligation to maintain confidentiality.

- 3.6 As necessary, the Supervisory Board meets without the Board of Managing Directors.
- 3.7 In the event of a takeover bid, the Board of Managing Directors and the Supervisory Board of the bank as the target company must submit a statement of their reasoned position so that the shareholders can make an informed decision on the bid.

After the announcement of a takeover bid, the Board of Managing Directors may not take any actions outside the ordinary course of business that could prevent the success of the bid unless the Board of Managing Directors has been authorized by the General Meeting, or the Supervisory Board has given its approval. In making their decisions, the Board of Managing Directors and the Supervisory Board are obliged to act in the best interests of the shareholders and of the company.

- 3.8 The members of the Board of Managing Directors and the Supervisory Board shall comply with the rules of proper corporate management. If they violate the due care and diligence of a prudent and conscientious member of the Board of Managing Directors or the Supervisory Board, they are liable to the bank for damages.

The bank has taken out a directors' and officers' liability insurance (D&O insurance) policy for the Board of Managing Directors and the Supervisory Board, placed through the majority shareholder, the Commerzbank Aktiengesellschaft. A suitable deductible has been agreed for both the members of the Board of Managing Directors and the members of the Supervisory Board.

- 3.9 Pursuant to Section 15 of the German Banking Act (*KWG*) the extension of loans from the company to members of the Board of Managing Directors or the Supervisory Board or their relatives (spouses and children who are still minors) requires the unanimous approval of the Board of Managing Directors, as well as the prior consent of the Supervisory Board.
- 3.10 The Board of Managing Directors and the Supervisory Board shall report in each year's Annual Report on the company's Corporate Governance. This includes the explanation of possible deviations from the recommendations of the German Corporate Governance Code.

4 The Board of Managing Directors

4.1 Tasks and Responsibilities

- 4.1.1 The Board of Managing Directors is responsible for independently managing the company. In doing so, it is obliged to act in the company's best interests and undertakes to increase the sustainable value of the company.
- 4.1.2 The Board of Managing Directors develops the company's strategy, co-ordinates it with the Supervisory Board and ensures its implementation.

4.1.3 The Board of Managing Directors shall ensure that all provisions set out by law are complied with.

4.1.4 The Board of Managing Directors ensures appropriate risk management and risk controlling within the company.

4.2 Composition and Compensation

4.2.1 The Board of Managing Directors is composed of several persons and has a chairman. Rules of procedure, which require the approval of the Supervisory Board, govern co-operation within the Board of Managing Directors. The Board of Managing Directors co-operates on a basis of trust with the bank's other bodies and the employee representatives to the benefit of the company.

4.2.2 The compensation of the members of the Board of Managing Directors is fixed by the Presiding Committee of the Supervisory Board at an appropriate amount, based on a performance assessment. Criteria for determining the appropriateness of the compensation are, in particular, the tasks of the respective Board member, his personal performance, the performance of the Board of Managing Directors as a whole, the economic situation, and the performance and future prospects of the bank, taking into account its competitors.

4.2.3 The overall compensation of the members of the Board of Managing Directors is composed of a fixed salary and variable elements. The variable part of the compensation includes result- and performance-linked components and is based on the achievement of the bank's business success, the results of the business segments for which the respective Board member is responsible, and his individual performance. All compensation components must be appropriate, both individually and in total.

4.2.4 The compensation of the members of the Board of Managing Directors is reported in the Notes to the Annual Accounts, broken down into fixed salary and variable components, each in a single sum.

4.3 Conflicts of Interest

4.3.1 During their employment with Essen Hyp, the members of the Board of Managing Directors are subject to a comprehensive non-competition obligation.

4.3.2 In connection with their work, the members of the Board of Managing Directors and employees may neither demand nor accept from third parties payments or other benefits for themselves or for any other person, nor grant unlawful advantages to third parties.

- 4.3.3 The members of the Board of Managing Directors are bound by the company's best interests. No member of the Board of Managing Directors will pursue personal interests in his decisions, or use business opportunities intended for Essen Hyp for himself.
- 4.3.4 Each member of the Board of Managing Directors must disclose conflicts of interest to the Supervisory Board without delay and inform the other members of the Board of Managing Directors. All transactions between the company and the members of the Board of Managing Directors, persons they are closely related to or companies they have a personal association with must meet the standards that are customary in the sector. Important transactions require the approval of the Supervisory Board or the Committee responsible according to the rules of procedure of the Supervisory Board.
- 4.3.5 Sideline activities of the members of the Board of Managing Directors, especially Supervisory Board mandates outside the company, are subject to the approval of the Supervisory Board.

5 The Supervisory Board

5.1 Tasks and Responsibilities

- 5.1.1 The task of the Supervisory Board is to provide continuous advice to and to monitor the work of the Board of Managing Directors in the management of the company. The Supervisory Board must be involved in all decisions that are of fundamental importance to the company.
- 5.1.2 The Supervisory Board appoints and dismisses the members of the Board of Managing Directors. Together with the Board of Managing Directors, the Presiding Committee of the Supervisory Board ensures that there is long-term successor planning. The Supervisory Board has delegated the preparations for the appointment of members to the Board of Managing Directors to the Presiding Committee, which also lays down the conditions of the employment contracts, including compensation.

A re-appointment prior to one year before the end of the appointment period with a simultaneous termination of the current appointment may only take place under special circumstances. For members of the Board of Managing Directors there is a fixed age limit of 65 years.

- 5.1.3 The Supervisory Board has issued rules of procedure.

5.2 Tasks and Powers of the Chairman of the Supervisory Board

The chairman of the Supervisory Board co-ordinates the work within the Supervisory Board and chairs its meetings.

The chairman of the Supervisory Board also chairs the Presiding Committee which, inter alia, deals with the employment contracts of the members of the Board of Managing Directors.

The chairman of the Supervisory Board maintains close contact with the Board of Managing Directors, and with the chairman in particular, in order to discuss the strategy, business development and risk management of the company. The chairman of the Supervisory Board shall, without delay, be informed by the chairman of the Board of Managing Directors of any events material for the assessment of the company's situation and development, or for the management of the company. The chairman of the Supervisory Board shall then inform the Supervisory Board and, as necessary, convene an extraordinary meeting of the Supervisory Board.

5.3 Formation of Committees

- 5.3.1 Depending on the specific features of the company and the number of Supervisory Board members, the Supervisory Board has formed a Presiding Committee and a Credit Committee from within itself. These two committees serve to increase the efficiency of the Supervisory Board's work and deal with more complex issues. The chairman of each committee regularly reports to the Supervisory Board on the work of the respective committee.
- 5.3.2 The rules of procedure of the Supervisory Board provide for committees to make decisions in place of the Supervisory Board. The Presiding Committee prepares Supervisory Board meetings, at which personnel decisions are to be made.
- 5.3.3 The Supervisory Board can delegate other subjects to be handled by one or several committees. These subjects include the strategy of the company, the compensation of the members of the Board of Managing Directors, investments and financing.

5.4 Composition and Compensation

- 5.4.1 When submitting proposals for the election of Supervisory Board members, care shall be taken that the Supervisory Board, is, at all times, composed of members who, as a whole, have the required knowledge, ability and expertise to properly complete their tasks and are sufficiently independent. Furthermore, the international activities of the company and potential conflicts of interest are taken into account.

- 5.4.2 To ensure the Supervisory Board's independent advice and supervision of the Board of Managing Directors, not more than one former member of the Board of Managing Directors shall be a member of the Supervisory Board. Moreover, Supervisory Board members shall not hold directorships or similar positions with main competitors of the bank or provide any advisory services to them.
- 5.4.3 The members of the Supervisory Board shall ensure that they have sufficient time to perform their mandate. Members of the Board of Managing Directors of a listed company shall not accept more than five Supervisory Board mandates in non-group listed companies.
- 5.4.4 The election or re-election of all Supervisory Board members takes place at the same time, and as a rule for the longest admissible period of office. Elections to replace members are for the remaining period of office of a member of the Supervisory Board who resigns prematurely, or, if the resigning member's period of office was shorter than the regular period of office in accordance with sentence 1 of this Section, up to the end of the period of office of the other members of the Supervisory Board who have been appointed for the longest admissible period of office.
- 5.4.5 The compensation of the members of the Supervisory Board is specified in the Articles of Association. It is based upon the responsibilities and tasks of the members of the Supervisory Board, as well as the economic situation and performance of the company. Also taken into account are the holding of a chair or deputy chair position in the Supervisory Board, as well as the chairmanship and membership in any Supervisory Board committee.

The members of the Supervisory Board receive fixed as well as performance-related compensation. The latter is based upon the dividend payments to the bank's shareholders. .

The compensation of the members of the Supervisory Board is reported in the Notes to the Annual Accounts, broken down according to components, each in a single sum. Should, by way of exception, compensation be paid to the members of the Supervisory Board or advantages extended for services provided individually, in particular, advisory or agency services, these payments are shown separately in the Notes to the Annual Accounts.

- 5.4.6 If a member of the Supervisory Board has taken part in less than half of the meetings of the Supervisory Board in a financial year, this will be noted in the Report of the Supervisory Board.

5.5 Conflicts of Interest

- 5.5.1 All members of the Supervisory Board are bound to act in the company's best interests. No member of the Supervisory Board will pursue personal interests in his decisions, or use business opportunities intended for Essen Hyp for himself.

- 5.5.2 Each member of the Supervisory Board shall inform the chairman of the Supervisory Board of any conflicts of interest, especially those which may result from a consultant or directorship position with clients, suppliers, lenders or other business partners. If necessary, the chairman of the Supervisory Board will then have the Presiding Committee discuss the issue. The chairman of the Supervisory Board shall disclose his own conflicts of interest to the Supervisory Board or the Presiding Committee.
- 5.5.3 Material and not merely temporary conflicts of interest with respect to the person of a Supervisory Board member shall result in the termination of his mandate.
- 5.5.4 Advisory and other service agreements between a member of the Supervisory Board and the bank require the Supervisory Board's approval.

5.6 Examination of Efficiency

The Supervisory Board shall examine the efficiency of its activities on a regular basis.

6 Transparency

- 6.1 The Board of Managing Directors shall disclose without delay any new facts within the company's field of activity that are not known publicly if they are likely to substantially influence the price of the company's listed securities, due to their impact on the asset and financial situation or general business development.
- 6.2 As soon as the company becomes aware of the fact that an individual acquires, sells or by any other means exceeds or falls short of 5, 10, 25, 50 or 75% of the voting rights in the company, the Board of Managing Directors shall disclose this fact without delay.
- 6.3 The company's treatment of all shareholders in respect of information shall be the same. The company shall also disclose all new facts made known to financial analysts and similar addressees to its shareholders without delay.
- 6.4 The company shall use suitable communication media, such as the internet, to inform shareholders and investors in a prompt and uniform manner.
- 6.5 Any information which the company discloses abroad in compliance with applicable capital market law provisions will also be disclosed domestically without delay.
- 6.6 As part of the bank's regular information policy, the dates of its most important regular publications (including the Annual Report, Interim Reports, General Meeting) are published sufficiently in advance in a 'financial calendar'.
- 6.7 Any information on the company disclosed by Essen Hyp shall also be published on the bank's website. The website shall have a clear structure.

7.1 Reporting

7.1.1 Third parties receive their information through the Annual Financial Statements. During the financial year, they receive additional information in the form of interim reports that are published at the end of the second and third quarters. The Annual Financial Statements and Interim Reports are prepared according to national legislation, i.e. the provisions set out in the German Commercial Code (*HGB*), which also form the basis for taxation.

7.1.2 The Annual Financial Statements are prepared by the Board of Managing Directors and examined by the auditors and the Supervisory Board. The Annual Financial Statements shall be publicly accessible within 90 days of the end of the financial year; Interim Reports shall be publicly accessible within 45 days of the end of the reporting period.

7.1.3 The company publishes a list of third party companies in which it has a participating interest that is not of minor importance for the company. The trading portfolios of the bank, on which voting rights are not exercised, are disregarded in this context. In accordance with the German Commercial Code (*HGB*) the following information is provided in the bank's Annual Accounts: name and registered office of the company, the amount of the interest, the amount of equity and the operating result of the past financial year.

7.1.4 Notes on the relationships with shareholders who are considered 'related parties' pursuant to the applicable accounting regulations, shall be provided in the Annual Financial Statements.

7.2 Audit of the Annual Financial Statements

7.2.1 Prior to submitting a proposal for election, the Supervisory Board will obtain a statement from the proposed auditor stating whether, and where applicable, which professional, financial and other relationships exist between the auditor and its executive bodies and head auditors on the one hand, and the company and its Board members on the other hand, that could call its independence into question. This statement shall include the extent to which other services were performed for the company in the past year, especially in the field of consultancy, or which are contracted for the following year.

The Supervisory Board agrees with the auditor that the chairman of the Supervisory Board will be informed immediately of any grounds for disqualification or partiality occurring during the audit, unless such grounds are removed immediately.

7.2.2 The Supervisory Board shall commission the auditor to carry out the audit and conclude an agreement on the latter's fee.

- 7.2.3 The Supervisory Board shall arrange for the auditor to report on all facts and events of importance for the tasks of the Supervisory Board which arise during the performance of the audit.

The Supervisory Board shall arrange for the auditor to inform it and/or note in the Auditors' Report if, during the performance of the audit, the auditor comes across facts which show a misstatement by the Board of Managing Directors and Supervisory Board on the Corporate Governance Code.

- 7.2.4 The auditor takes part in the Supervisory Board's deliberations on the Annual Financial Statements and reports on the relevant results of the audit. He is available to answer the questions the members of the Supervisory Board may have.

* The amendment of the German Mortgage Bank Act (HBG), which took effect on April 9, 2004, stipulates that German mortgage banks must, in addition to the "**de facto**" **overcollateralization**, maintain a **securing excess cover** of 2%. This securing excess cover must also be maintained when calculating the present value, including stress scenarios (upward/downward yield curve shifts). The calculation of the present value is governed by the Net Present Value Directive (Barwertverordnung) published by the Federal Financial Supervisory Authority (BaFin) in December 2003. To ensure that the mandatory overcollateralization is maintained at all times, banks are required to simulate stress scenarios in accordance with the static or the dynamic approach. For the static approach, the stress scenario is calculated on the basis of a parallel yield curve shift by +/- 250 basis points.

For the dynamic approach, a number and distribution of maturities appropriate to the scope and structure of the institution's transactions has to be selected on the respective yield curve. The minimum number of maturities is six, including the following: 1 month, 1 year, 5 years, 7 years, 10 years and 15 years.

Essen Hyp uses the dynamic approach.

Risk monitoring systems

Hypothekebank in Essen AG aims not only to protect its corporate value, but also to increase it within an existing risk limitation framework. This requires us to continuously develop our internal organization and to optimize our models and procedures in order to identify, quantify and handle potential risks. This is the only way to ensure their transparency and manageability. The information which we receive from our comprehensive risk management system not only forms the basis for our strategic decisions, but also enables us to recognize new opportunities.

Whereas, on the one hand, the management of Hypothekebank in Essen AG must ensure a responsible business strategy that focuses on creating added value, it must also install effective control mechanisms. The business activities of mortgage banks as specialist banks are subject to certain legal constraints set out in the German Mortgage Bank Act (HBG) and relative directives issued by the Federal Financial Supervisory Authority (BaFin). Compliance with these regulations, as well as the obligation to meet the ever increasing requirements of market participants, necessitates the efficient handling of risks and are, as such, characteristic of a modern mortgage bank's image. Due to the far-reaching internationalization, market transparency and product diversity, business transactions have become ever more demanding and complex. In this context not only market, liquidity, credit and counterparty risks but also operational risks are of major importance.

Essen Hyp defines the term 'risk' as a possible loss resulting from unexpected changes, which might lead to adverse deviations from the bank's projected asset development and its financial and earnings performance. Appropriate forecast periods have been assumed for each type of risk.

- Market risks hold the danger of losses resulting from adverse changes in prices or price-influencing parameters. Here, interest rate risks are by far the most important risk category for Essen Hyp. Establishing the total of possible overnight losses constitutes the main aspect of our risk analysis. We also determine the exposure to losses for longer holding periods. Currency risks are ruled out by specific hedging transactions.
- Liquidity risks hold the danger that, in the case of illiquid markets, contractual payment obligations cannot be met in a timely manner or even at all, or that due to market disturbances or an insufficient market depth, deals either cannot be wound up, or if so only with losses.
- Credit and counterparty risks consist in the partial or total failure of any of our business partners to fulfill their obligations under a legally binding contract.
- In accordance with Basel II, Essen Hyp defines operational risks as the danger of losses resulting from inadequate or defective internal processes and systems, human or technical failures, or from external events. Legal risks resulting from the legal framework, legal actions or contracts are also included in our understanding of operational risks.

Risk management under two different accounting standards. So far Hypothekebank in Essen AG has prepared its annual accounts and financial statements in accordance with the provisions of the German Commercial Code (HGB). However, given that the consolidated accounts of the Commerzbank AG are now being compiled in accordance with the International Accounting Standards/International Financing Reporting Standards (IAS/IFRS), Essen Hyp was required to introduce IAS/IFRS as an additional accounting system. As a non-trading book institution, Essen Hyp primarily manages its interest rate positions at a macro level. However, risk management under IAS/IFRS focuses much more on market values. Thus, derivatives and loans not originated by the bank are reported at market value due to the fact that the Commerzbank Group does not make use of the category 'held to maturity'.

Whether or not changes in the market value affect the bank's net income depends on their classification on the balance sheet. Due to this partial reporting at market value (the so-called 'mixed model') we were required to split our interest rate book into different portfolios for corporate management purposes. This enables us to manage potential effects on our balance sheet within the scope of predefined limits. We measure our performance under IAS/IFRS on a daily basis in order to show the potential effects of asset and liability management measures.

Internal controlling	Internal Audit Department

Risk management structure – Tasks and responsibilities. The risk management policies of Essen Hyp have been decided by the Board of Managing Directors in accordance with the Group's guidelines. These policies form the basis of our bank's risk management and control system.

The following table shows the allocation of the most important tasks relating to risk control and risk management to the responsible organizational units.

Risk acceptance. Up to the end of the first quarter of the period under review the acceptance of risks was the responsibility of the departments dealing with customers and products. It was their task to identify, evaluate and actively manage risk positions. However, following the implementation of the Minimum Requirements for Lending Operations (MaK) in 2003 these procedures have been revised. Risk acceptance is now mainly the responsibility of the relevant back office/transaction management function in order to ensure a credit risk management that is independent of market developments.

Risk monitoring

Market risks – Value at risk (VaR). The data required for risk measurement is taken from the gap report, which is updated by the Controlling Department on a daily basis and which indicates the mismatches per quarter. The risks deriving from gap positions in the case of interest rate fluctuations, are measured and quantified on market-to-market key figures. The arbitrage-free zero-coupon discount factors used for this purpose are calculated daily. These calculations are made on the basis of a yield curve composed of the current public-sector Pfandbrief yields and interest swap rates. With the help of these discount factors, the accruing cash flows from interest and principal payments are discounted and summarized into a key figure. As a next step the unchanged cash flows are discounted by new discount factors, calculated from a simulated market price change and a holding period of one business day. This simulation is carried out by applying the historical yields of the past 255 trading days. The calculated 254 market scenarios form the basis for the respective revaluation of the current portfolio and the calculation of the differences between the individual market values. The corresponding maximum change in the interest rate book's value is then calculated on the basis of a confidence level of 97.5%. The VaR of the entire interest rate book describes the bank's aggregate market risk.

The efficiency and reliability of this method is permanently monitored with the help of back-testing procedures, i.e. the projected VaR is compared to the actual market value changes on a daily basis. Any outliers, i.e. market value changes outside the forecast interval, are identified by using a onesided confidence interval, which covers both positive and negative changes in value.

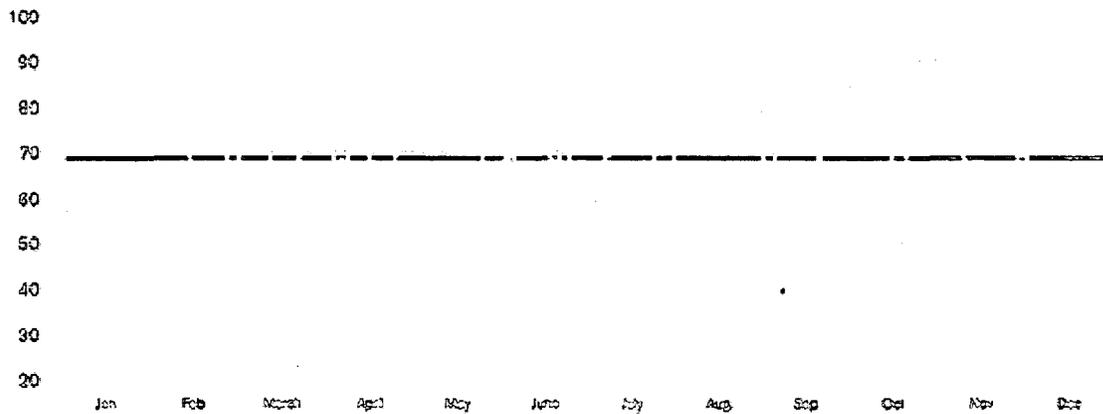

In 2003, we observed nine outliers when using a 97.5% confidence level. These outliers were mostly due to rather extreme market movements triggered by the Iraq conflict. In order to limit losses exceeding the confidence level of 97.5%, another upper limit for losses has been fixed, taking into account worst case scenarios. The potential for such losses is also calculated daily.

The worst case scenario is set up in such a way that the maximal overnight changes in interest rates for each key point on the yield curve are determined on a stand-alone basis and for a period of 10 years. These uncorrelated figures are then applied to the current yield curve by means of a yield curve shift. The Board of Managing Directors, in co-operation with the Supervisory Board and the Commerzbank AG, fixes limits for the VaR, as well as for worst case scenarios. These limits have to be complied with at all times. The VaR utilization of the authorized limit came to 59.2% as of December 31, 2003 and to 70.4% on an annual average. The utilization of the limit for worst case scenarios stood at 42.1% on the balance sheet date, while the annual average was 53.9%.

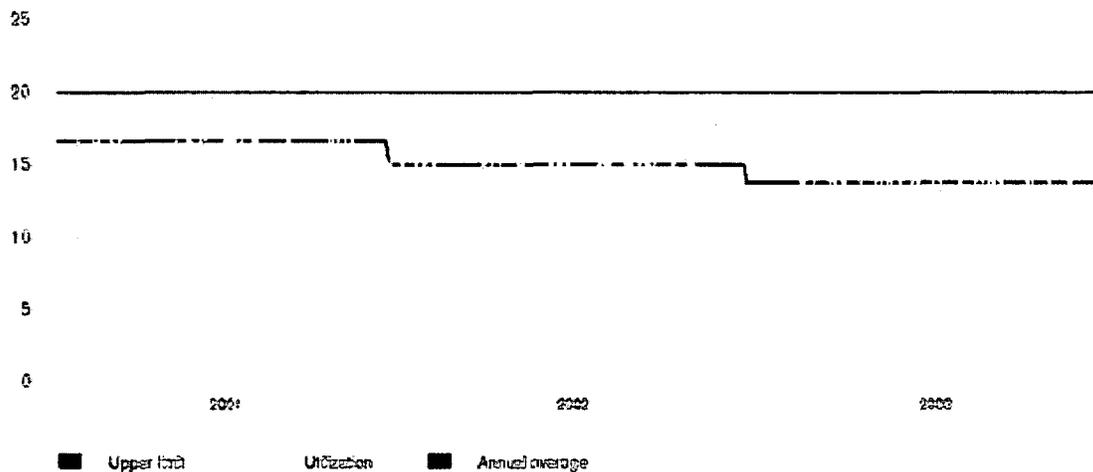

In addition to this, we simulate various stress test scenarios in order to be in a position to better assess and limit possible losses arising from extreme market movements, which are generally not appropriately represented by VaR models. Thus stress testing represents a suitable complement to the VaR analyses which use historical simulation.

Apart from the calculation of the VaR and the possibilities for simulations based upon user-defined parameters, the underlying portfolio can be adjusted by simulating the impact of changed interest rate curves, as well as the effects of planned new lending operations close to their point in time. For its VaR, market value and interest rate risk calculations, Essen Hyp uses the well-established ATLAS software, as well as other valuation tools developed within the bank.

Value at risk on a daily basis and on an annual average of the authorized limit in 2003 in %

Utilization of the authorized limit under the 'traffic light system' on a daily basis and on an annual average in % (since March 1, 2001)

'Traffic light system'. Pursuant to the requirements set out by the Federal Financial Supervisory Authority (BaFin), Essen Hyp also calculates the potential market value loss of the whole portfolio in the case of a general interest rate increase of 1 basis point and 100 basis points from one business day to another. These calculations are carried out for all maturities, taking into account certain predefined breakpoints (the so-called 'traffic light system'). This basis point value, calculated with the help of the key rate method, may, in the case of an interest rate increase of 100 basis points, not exceed a certain limit in proportion to the liable capital. This limit is fixed by the BaFin.

These figures are calculated on a daily basis. In 2003 the average limit utilization within this 'traffic light system' came to 13.8%, while, on the balance sheet date, it stood at 9.3%. We not only report this data to the rating agencies Moody's, Standard & Poor's and FitchRatings, but also publish it on our website in an aggregate form and on a regular basis in order to provide investors with an insight into the level of interest rate risk incurred by the bank.

Internal reporting. On each business day, the Board of Managing Directors, as well as the Head of Treasury and the Head of Corporate Management, are provided with information on the development of the gap report's market value, the VaR level, the utilization of the different risk limits and the level of interest rate risk calculated with the help of the 'traffic light system'. Moreover, the market values of our public-sector and mortgage Pfandbriefe and their respective cover pools, as well as the changes in value under predefined stress scenarios, are calculated and reported.

Furthermore, the Head of Treasury reports on the bank's short-term and long-term liquidity situation in the course of the weekly meetings of the Board of Managing Directors.

As a part of our corporate management activities, our Asset Liability Committee (ALCO) meets on a weekly basis. This Committee deals with and, within the scope of its competencies, decides on the bank's interest rate positions, the development of key figures as regards earnings and risk exposure, and reporting requirements. The ALCO is composed of the member of the Board of Managing Directors who is responsible for the Treasury Department (or his deputy), the heads of all operational and back-office units, and the heads of the Controlling and Research Department. The Chairman of the Committee reports on the decisions and recommendations of the ALCO in the course of the weekly Board meetings.

On a monthly basis the Board of Managing Directors receives several detailed reports from the individual departments and sections. For instance, the report prepared by the Controlling Department, provides, inter alia, information on the transactions effected in the previous month and the development of the market value. Furthermore, this report contains an overview of the pending forward transactions, including options and repurchase agreements. The monthly report prepared by the Accounting and Taxes Department provides information on the development of the balance sheet and profit and loss account in accordance with the provisions of both the German Commercial Code (HGB) and IAS/IFRS. The monthly report submitted by the Settlements Department includes, amongst other things, information on the structure of the bank's loan portfolios. The Notifying and Credit Research Department provides information about the ratings of our borrowers, including, if applicable, information on changes in the assessment of their credit quality. And, finally, the Market Conformity Checking Section reports on its assessment of the market conformity of the transactions entered into. Within the framework of implementing the Minimum Requirements for Lending Operations (MaK) we have set up the necessary internal procedures to draw up quarterly reports in accordance with these requirements. These quarterly reports are based on the monthly reports referred to above. The first quarterly report which covered the third quarter of 2003 was completed in February 2004.

Credit and counterparty risks

Public-sector loans and securities issued by other borrowers. With a percentage of 80.8% of our total assets, public-sector loans and loans to credit institutions governed by private law and to other borrowers constitute the core business of Essen Hyp in accordance with the bank's overall business strategy. As of December 31, 2003, the volume of this portfolio came to €59.9bn, including pro-rata interest of €1.3bn.

The high quality of our public-sector cover assets, amounting to €50.8bn as of December 31, 2003, is reflected on the one hand by the low average risk weighting pursuant to the BIS standards and, on the other hand, by the external ratings of the leading international rating agencies. In terms of the BIS standards, 61.9% of these assets are classified at a risk weighting of 0%, 14.6% at 10% and 23.5% at 20%. A breakdown of the loan portfolio by rating reveals that 30.6% of the assets have been awarded a triple A, 45.7% a double A, 5.3% a single A and 0.6% a triple B. Those assets which were not rated by an external rating agency, i.e. 17.8 % of the total loan volume, include loans to credit institutions governed by public law (41.6%) and national and international public-sector bodies (58.4%), whose excellent credit quality was confirmed by our internal credit quality analysis. The composition of our loan portfolio which is held in trust by a trustee in order to serve as cover for our public-sector Pfandbriefe, can be seen on our website. This site is updated monthly and provides investors with information on the structure and quality of our cover pool, while complying with banking secrecy provisions.

As a basic principle, an investment grade rating is the prerequisite for the granting of loans to foreign public-sector bodies, as well as to credit institutions governed by private law and other borrowers. Our non-cover

transactions (excluding derivatives) with these counterparties amounted to €4.3bn as of December 31, 2003. While 0.2% of these counterparties were rated triple A, 22.4% were rated double A, 69.7% single A and 4.3% triple B. Loans totaling less than €0.2bn were not rated by an external rating agency. The breakdown of our non-cover loans under different criteria is also published in detail on our website. These figures are updated periodically.

Hypothekenbank in Essen AG rigorously complies with the 'gentlemen's agreement' concluded between the member institutions of the Association of German Mortgage Banks (VDH) and the Federal Financial Supervisory Authority (BaFin). This agreement stipulates that new commitments that are not eligible for cover may only be entered into if the respective counterparty has a minimum rating of A-/A3 by an external rating agency or a comparable internal rating. The total volume of loans whose rating is downgraded to a level below the minimum rating of A-/A3 during their term, is limited to one time the bank's liable own capital.

Ratings of our cover assets	as of Dec 31, 2003	
	in € m	in %

BBB+ / Baa1 / BBB+	262	0.52
BBB- / Baa2 / BBB-	32	0.06
Not rated	9,036	17.78
Total	50,821	100.00

Country risks. In order to co-ordinate all questions concerning country risks and to implement appropriate measures, Essen Hyp makes use of the Commerzbank Group's know-how. Risk limits are fixed on the basis of internal and external credit quality assessments and in close co-operation with our supervisory bodies, also taking into account the total credit exposure of the Commerzbank Group.

The bank granted loans totaling €1.2bn, in the form of securities that are listed on European stock markets, to EU candidate countries which will become EU members on May 1, 2004. These securities have an average maturity of nine and a maximum maturity of ten years. Essen Hyp did not place any investments in emerging market countries.

Derivatives. Essen Hyp reduces counterparty risk by applying bilateral outline agreements, most of which include netting arrangements. Again, as far as these agreements are concerned, uniform contractual regulations are in place within the Group. The structure of our derivative portfolio, broken down by counterparty rating, can be seen in the following table (see also p. 86 of the Notes on the Bank's Annual Accounts).

Counterparty ratings	in € m/remaining time to maturity			
	< 1 year	1-5 years	> 5 years	Total
Rating				
Triple A	60	447	4,930	5,437
Double A	4,530	26,600	16,815	47,945
Single A	10,655	50,086	35,194	95,935
not rated	5,195	39,543	23,737	68,475

To a certain extent the entries of our non-rated counterparties relate to German subsidiaries of foreign credit institutions with a good rating. In the table below we have, in most cases, notionally attributed the ratings of these foreign credit institutions to the respective counterparties as an 'implicit rating'.

Implicit counterparty ratings	in € m/remaining time to maturity			
	< 1 year	1-5 years	> 5 years	Total
Rating				
Single A	5,195	39,474	23,512	68,181
not rated	0	69	225	294
Total	5,195	39,543	23,737	68,475

Currently no interest rate derivatives for a collateralization at market value. The 4th Financial Market Promotion Act (Finanzmarktförderungsgesetz), which took effect in 2002, and the related amendments to the German Mortgage Bank Act (HBG) permit the inclusion of derivatives in the cover pool. The reason for this is that a match between the nominal value of the outstanding Pfandbriefe and the nominal value of the cover assets, as is currently required by law, does not take into account changes in value resulting from interest rate fluctuations. It is intended to eliminate these interest rate risks by stipulating that maintaining a present-value surplus cover is a prerequisite for issuing Pfandbriefe. Present-value surplus cover means that the market value of the cover assets must, at all times, exceed the market value of the Pfandbriefe outstanding. Currency swap transactions, which have been entered into prior to the implementation of the 4th Financial Market Promotion Act for the purpose of eliminating currency risks relating to foreign-currency loans in the cover pool, have been included in our market-value cover pool at their market value as of December 31, 2003 (€-9m).

However, Hypothekenbank in Essen AG currently has no reason to include interest rate derivatives in its cover pool. The market value of our cover assets has always exceeded the market value of our public-sector Pfandbriefe outstanding. The relevant reports are made available to the rating agencies on a quarterly basis. In addition to this, market values and market value changes are published on our website. Nevertheless, we entered into negotiations with our derivative counterparties in order to be able to include derivatives in our cover pool with their consent should this turn out to be necessary.

Risks relating to mortgage lending

The assessment of credit risks relating to mortgage lending is the responsibility of the Property Financing Department, and, in particular, the Transaction Management Section. Further assistance is provided by the Mortgage Lending Risk Management Department, and by our subsidiaries, Essen Hyp Immobilien GmbH and Immobilien Expertise GmbH. The responsibilities and competencies with regard to the granting of loans are clearly and unambiguously defined in organization instructions, which are available to our staff in electronic form. As far as the granting of small residential loans is concerned, Essen Hyp makes use of an adequate customer and property scoring system, which is also applied when co-operating within the Group. However, in view of the implementation of Basel II, we will revise this system in close co-ordination with our parent company, the Commerzbank AG, in order to obtain a scoring system for the assessment of small residential loans and the borrowers' credit quality, which is in line with the new requirements on internal ratings. When granting loans that are not classified as small residential loans, Essen Hyp not only attaches particular importance to the borrower's credit standing but, above all, to the valuation of the property concerned (including the determination of the lending value (Beleihungswert) in accordance with the German Mortgage Bank Act (HBG)), which is carried out by the certified valuers of our subsidiary Immobilien Expertise GmbH. The sustainable income from the charged property after deduction of the non-recoverable operating expenses must at all times exceed the interest and principal payments due to our bank. Essen Hyp drew up specific guidelines for both domestic and international property financing, which were approved by the Credit Committee of the Supervisory Board. These guidelines stipulate, amongst other things, the minimum debt service cover (DSC) ratios, and they also include a list of property types which are currently not eligible as security for mortgage loans or for which a loan can only be granted if certain conditions are met.

For the timely recognition of credit risks, we established an early warning system which enables us to plot latent risks in a more efficient way, taking into account potential risk factors, such as interrupted performance, an adverse development of the sector, risks of rent losses or adverse impacts on the quality of the property location. The processing of loans in default or other loans showing performance interruptions (and thus bearing a certain risk potential) has been restructured in accordance with the Minimum Requirements for Lending Operations (MaK). As in the previous years, we have permanently monitored the risks inherent in our stakes in large-volume property portfolios, and especially those in the East German Federal States. In this context a number of risk-mitigating measures were taken, such as requiring additional security, restructuring certain commitments, and, finally, ensuring an adequate provision for possible loan losses in accordance with the strict standards of Hypothekenbank in Essen AG.

Prior to each of its periodical Committee meetings, the Credit Committee of the Supervisory Board is informed about the progress of non-performing loans exceeding a certain amount and about the structure of our mortgage loan portfolio.

Internal ratings

The changes in the regulatory framework governing credit risks and their capital backing as set out in the Basel II requirements, as well as the provisions regarding loan administration procedures laid down in the Minimum Requirements for Lending Operations (MaK), make great demands on all German banks. This is why Essen Hyp pushed the development of suitable methods for calculating the minimum capital requirements and for measuring risks in accordance with the internal rating based (IRB) approach for both public-sector and mortgage lending in 2003. This was done in close co-operation with our parent company, the Commerzbank AG. Furthermore, we participated in two joint projects on loss given default (LGD) grading and probability of default (PD) rating. These projects aim at optimizing the elements which are required to obtain a PD rating that satisfies the Basel II requirements, and at developing the related rating tools while taking into account the special characteristics of German mortgage banks.

The LGD project for mortgage lending operations focuses on developing a rating tool which calculates the loss rate for each individual loan after the occurrence of an event of default and the subsequent liquidation of the loan security. This calculation takes into account general criteria which apply to all member institutions of the Association of German Mortgage Banks (VDH), such as the recovery rate or the duration of the liquidation process, as well as individual parameters specific to each bank, such as recovery costs or the period of time between default and liquidation. Each participating bank is thus in a position to individually calculate the loss given default (LGD) for any mortgage loan on the basis of the relevant loan security. Upon completion of the project we received another tool for calculating our capital requirements, the LGD component. The first version of this LGD component has already been incorporated in our internal EDP systems. Final testing, the implementation of subprojects and the inclusion of complementary data are planned for the business year 2004. It is worth mentioning in this context that, in 2003, Essen Hyp and several other VDH members entered into a legally binding agreement to continue the LGD project. This includes, in particular, refining the calculation tools described above and evaluating the data provided by the participating banks. The project is managed by the Hyp Real Estate Rating Services GmbH, a wholly owned subsidiary of the Association of German Mortgage Banks (VDH). Upon the full integration of the LGD grading into our internal EDP systems in 2004 we will be able to systematically calculate the LGD – and thus to internally measure the loss in an event of default – in accordance with the advanced IRB approach.

The negotiations on the joint project 'PD rating for commercial properties', entered into with the publishing house Bank Verlag Köln, the RES Consult GmbH Leipzig (a company owned by the University of Leipzig) and the Department of Statistics of the University of Regensburg, were successfully concluded in mid-2003. Based upon the know-how of the six participating banks as regards property financing, a PD prototype with certain rating functions has been developed and made available to the individual banks. Later on, this prototype will be replaced by the final rating tool, which has yet to be developed in full. Using this tool, we are in a position to measure the probability of default for each loan that is allocated to one of the internal rating categories. The time horizon applied is one year. As soon as this rating procedure is applied by all banks involved in the project, they will be in a position to calculate the probability of default of each borrower on the basis of the available data and in accordance with the Basel II requirements. The quantity and quality of the available data plays a key role in ensuring reliable PD ratings. The banks involved in the PD rating project have committed themselves to

continuously providing suitable data, which then forms the basis for an adequate calibration and validation. In the framework of implementing the new IRB requirements, and in accordance with the Minimum Requirements for Lending Operations (MaK), Essen Hyp has started to carry out the first practical rating analyses using the new PD tool.

Once the rating components described above have been implemented, our bank will satisfy all requirements that have to be met in order to set up an individual risk classification. We will thus be eligible to adopt the advanced internal ratings approach under Basel II for deriving our capital requirements and for pricing purposes. As before, Essen Hyp will develop its PD rating system for mortgage loans for in close co-operation with the Commerzbank AG.

Provision for possible loan losses

Through the formation of individual and, in the case of latent credit risks, of general risk provisions, the discernible risks of the lending business are adequately taken into account. Until now there has been no need for individual value adjustments or provisions in respect of our lending business with public-sector borrowers or entities governed by public law.

Based upon thorough analyses, our Property Financing Department continually gauges which risk provisioning measures need to be taken in order to ensure the quality of the bank's planning.

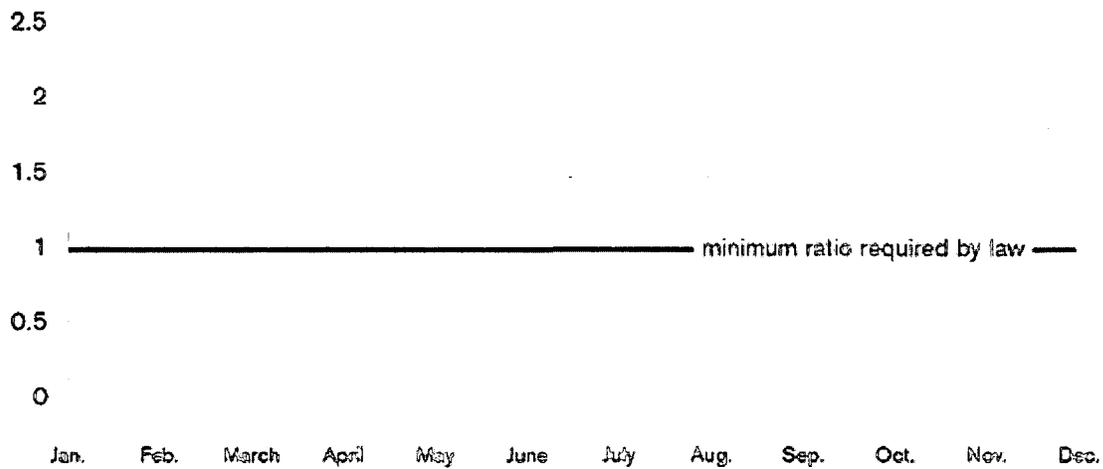

Liquidity risks

The bank's liquidity management is the responsibility of our Treasury Department. It is based upon the daily listing of all payment flows. An adequate assessment of the liquidity situation requires that the public-sector, corporate and bank bonds held as assets are extremely liquid. This ensures that they can be disposed of or sold under agreements to repurchase at short notice – within the scope of nominal overcollateralization – should the need for liquidity arise. The bank calculates its liquidity risk by showing the volume of mismatches in a capital outflow account and then determining the ratio between these mismatches and the existing short-term funding limits, plus liquidity reserves. Our liquidity positions are additionally managed pursuant to the Grundsatz II requirements concerning the adequacy of a credit institution's liquidity provision. Our bank's liquidity ratio calculated according to Grundsatz II was 1.21 at the end of the year (minimum ratio required by law: 1.0).

Operational risks

In anticipation of the Basel II requirements concerning risk management and the monitoring of operational risks, Essen Hyp categorized all relevant risks according to their nature as early as in 2001. As a result, our bank not only meets the Basel II criteria, but also complies with the risk categorization that is applied within the Commerzbank Group as a whole. Accordingly, existing or potential risks in the individual departments and sections are identified by means of a self assessment in which most of our employees participate.

Development of our liquidity ratio in accordance with Grundsatz II

The statements and analyses made by the participants in this self assessment cover IT issues (i.e. impacts of system failures, the quality of software administration, interface functionality, protection against wrong user input), internal procedures (quality and comprehensiveness of organizational directives, competencies as regards the initiation, approval and conclusion of business transactions), together with potential criminal and unauthorized acts (control mechanisms, protection of customer data and system and application files). In November 2003 this self assessment was carried out for the third time. We have developed a specific database in order to adequately record, administer and analyze the results.

In addition to this, Essen Hyp is involved in a Commerzbank Group project which focuses on the collection of data on operational risk losses. In anticipation of the legal requirements which will have to be met under both the standard approach and the IRB approach, it has become necessary to collect, record and analyze operational risk losses in a systematic way. The aim is to quantify operational risks by calculating a value at risk figure. Against this background Essen Hyp has recorded and reported all losses exceeding €5,000 since the beginning of 2002. Since mid-2003 our bank has been integrated into the Commerzbank's intranet-based 'Loss Collection Tool', which serves to collect and assess all operational risk losses incurred within the Group. Since then we have reported the losses incurred in our bank by directly entering the relevant information into the database. By analyzing the losses incurred in the Group as a whole we expect to obtain detailed information on the future management of this type of operational risk. In 2003 we also reported, for the first time, the legal risks taken by our bank to our parent company. Within Essen Hyp, the Board of Managing Directors receives a monthly report on all operational risk losses incurred. The total volume of losses resulting from operational risks incurred by Essen Hyp in 2003 was € 111,000.

However, even before the introduction of the self assessments and the collection of losses as described above, Essen Hyp was concerned about the issue of operational risks. In order to detect possible weak points, we have, for several years, been analyzing the 'classical' operational risks relating to the bank's structural and procedural organization, EDP, internal and external electronic communication (intranet, internet, e-mail), availability of qualified staff, adequate equipment and legal matters. With regard to certain specific issues we seek external advice from consultants and other specialists. For instance, external specialists have been tasked with analyzing and validating the safety of our IT systems at regular intervals, e.g. in view of so-called 'hacker attacks'.

Other pre-emptive measures in terms of operational risks include the preparation and improvement of contingency plans for all business units. To rule out potential EDP failures, the bank has two separate central computer systems located in different parts of Essen, one of which serves as a back-up system, should the working system fail. Our reserve headquarters referred to above is situated in the same premises as our back-up system, so that a continuation of the bank's key business activities is ensured for a transitional period should the bank's headquarters be destroyed or severely damaged. Thus a trouble-free 24-hour data flow,

without interruption of operations in an emergency, is ensured. In addition to this, we continued our qualification program for employees in the operational units and in the back offices during 2003 by organizing certified seminars on job-specific as well as general issues. To the extent possible, this aims at preventing errors that result from a lack of expertise.

Legal risks

Essen Hyp's Legal Department acts as an internal service provider for all legal matters. This includes providing general and specific legal advice on contracts, outline agreements and agreements that are not standard constructions. By integrating the Legal Department from the beginning, limitations of our scope of activity resulting from existing legal frameworks can be quickly recognized. At the same time, we are in a position to make use of the whole range of legally permissible options in an innovative way. Our Legal Department is also involved in the processing of non-performing loans. If required, we additionally seek external legal advice. When dealing with mortgage and public-sector loans to foreign borrowers, we always make use of the services of international law firms.

The Legal Department regularly provides the Board of Managing Directors with information on the latest legal developments, related risks and their potential impact on our bank's business activities.

Internal auditing

Internal auditing forms an integral part of our internal monitoring system. The Internal Audit Department, which functions independently of all working procedures, has been tasked by the Board of Managing Directors with controlling the existing structures and procedures in terms of the early recognition of potential risks. The main focus is put on examining and evaluating the quality of the safety measures and the prescribed internal controls integrated in the working procedures. Feedback about the structuring and suitability of the bank's risk management system is provided to the Board of Managing Directors and to the individual departments and sections. Material findings by the Internal Audit Department are reported to the Supervisory Board during its subsequent ordinary Supervisory Board meeting. During the first meeting in every new financial year the Supervisory Board is informed about all important findings by the Internal Audit Department, and also about the extent to which deficiencies observed in the past financial year have been remedied. Should the Internal Audit, at any time, reveal material deficiencies, the Chairman of the Supervisory Board has to be informed immediately.

The Internal Audit Department acts according to a long-term inspection plan, which is continually improved. This plan also forms the basis for an annual inspection scheme agreed by the Board of Managing Directors and submitted to the Chairman of the Supervisory Board for information purposes. The inspections stipulated in this scheme cover all parts of the bank. Checks on correct working procedures and systems are carried out at fixed intervals. As far as specific risks and legal requirements, such as provisions relating to the German Money Laundering Act (*Geldwäschegesetz*), are concerned, inspections are carried out at least once per year. The inspection intervals are fixed in the long-term inspection scheme. This also ensures that each of the bank's working procedures is, as a matter of principle, inspected once every three years. In terms of a risk-oriented and process-specific inspection, the audit mainly focuses on the bank's structural and procedural organization risk management and controlling mechanisms and the internal monitoring system for all working procedures within Essen Hyp.

The early recognition and limitation of all currently measurable and qualifiable operational risks constitute the main tasks of the Internal Audit Department. Our EDP Audit, which is integrated in the Internal Audit Department, is primarily charged with all issues relating to electronic data processing, such as the maintenance of the safety and consistency of our electronic files by controlling the granting of licenses to access the system, and by limiting the number of users.

The findings of each inspection are recorded in an audit report. These reports are made available to the relevant departments, the Board of Managing Directors and the external auditors.

Future prospects

Due to regulatory as well as Group-internal requirements, the importance of risk management is set to further

increase in the future. The Minimum Requirements for Trading Activities (MaH) and the Minimum Requirements for Lending Operations (MaK), together with the Basel II requirements, play a key role in our risk management activities. Equal importance is attached to the further development of our organizational structures and procedures. In the coming years, the further development and sophistication of our risk management system will, as before, focus on ensuring an adequate, e.g. transparent, capital allocation for all existing, recognizable and potential operational risks in the framework of the implementation of the recommendations of the Basel Committee on Banking Supervision.

Risk Management

Interest rate risk

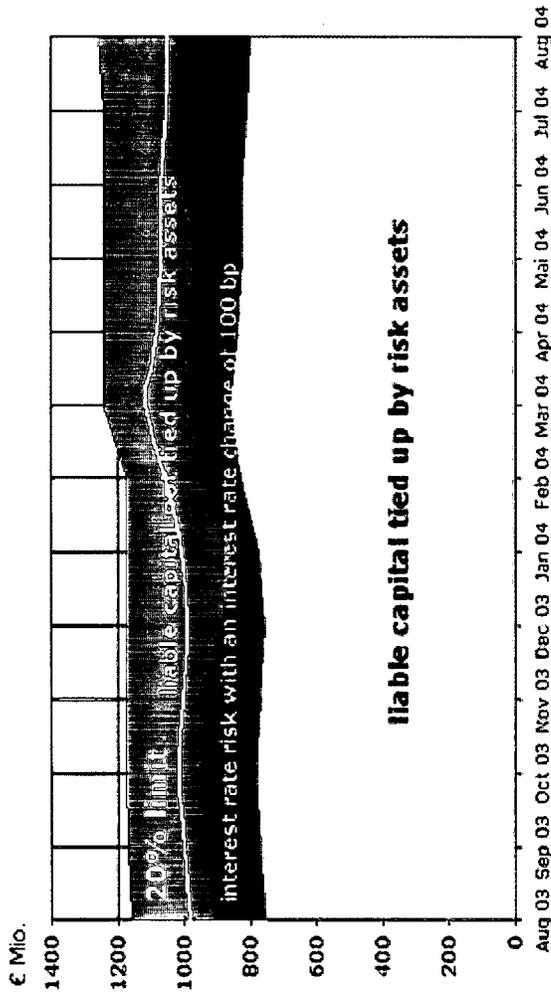

Essen Hyp not only calculates the value at risk, but also, since the beginning of 2001, the potential market value loss of the whole portfolio in the case of a general interest rate rise of 1 basis point (bp) and 100 bp from one business day to another. These calculations are executed for all maturities, taking into consideration certain predefined breakpoints ("traffic light system"). Essen Hyp thus complies with the requirements set out by the German Federal Financial Supervisory Authority (BaFin), which are binding on all mortgage banks since April 1, 2001. This basis point value, calculated with the help of the key rate method, may, in the case of an interest rate increase of 100bp, not exceed a certain limit in proportion to the liable capital pursuant to Section 10 of the German Banking Act (KWG). This limit is fixed by the German Federal Financial Supervisory Authority (BaFin).

Date	Average utilization
31/08/2004	17.39%
31/07/2004	17.55%
30/06/2004	13.08%
31/05/2004	10.22%
30/04/2004	11.36%
31/03/2004	10.83%
29/02/2004	9.43%
31/01/2004	6.63%
31/12/2003	10.59%
30/11/2003	12.64%
31/10/2003	14.99%
30/09/2003	14.36%
31/08/2003	13.05%

These figures are calculated daily and are reported to the BaFin monthly in arrears. Own capital is charged at zero percent interest. The transaction that has the longest running maturity is taken into consideration. Since April 2001 Essen Hyp also makes these reports available to the rating agencies Moody's, Standard & Poor's and Fitch.

However, the coefficient calculated with the help of this method does not indicate to what extent the liable capital is already exposed to other credit risks. Nonetheless, with a total capital ratio of 12.5% (percentage required by law: 8%) and a core capital ratio of 6.5% (percentage required by law: 4%) as of August 31, 2004, Essen Hyp has "free capital" as a further security in addition to the limitation of interest rate risks in accordance with the BaFin stipulations and to the limitation of the interest rate risks through value at risk calculations.

Liabe capital not tied up by risk assets

© Hypothekenbank in Essen AG

Pursuant to Sections 10 (1) and 10a (1) of the German Banking Act (*KWG*), *Grundsatz I* establishes rules concerning the adequacy of a credit institution's equity capital. Pursuant to Grundsatz I the ratio of the liable capital of an institution to its risk weighted assets must not fall below 8% at the close of each business day (Tier II capital ratio), while the ratio of the core capital of an institution to its risk weighted assets must not fall below 4% at the close of each business day (Tier I capital ratio).

Grundsatz II concerns the adequacy of a credit institution's liquidity provision. It is required and sufficient that the liquid assets cover all actual and potential liquidity outflows over the following twelve months. Since December 1, 2000 German mortgage banks have to comply with *Grundsatz II*.

Date	Ratio	Required by law

Investment of available funds

Quantitative and qualitative restrictions

Compliance with the self-restrictions regarding the total volume of securities held as assets and rated below A- or A3

These self-restrictions, which form part of a "gentlemen's agreement" between the Association of German Mortgage Banks (VDH) and the Federal Financial Supervisory Authority (BAFin), stipulate that any and all bonds and unit certificates that are acquired pursuant to Sections 5(3)(3d) and 5(3)(5) of the German Mortgage Bank Act (HBG) on the investment of available funds, must have a minimum rating of A3/A- by the rating agencies Moody's, Standard & Poor's and/or Fitch Ratings. In the case of divergent ratings, the worst rating applies. In addition to this, the total volume of bonds and unit certificates acquired pursuant to Sections 5(3)(3d) and 5(3)(5) of the German Mortgage Bank Act (HBG) whose rating is downgraded to a level below the minimum rating of A3/A- during their term, is limited to one time the liable own capital of Essen Hyp.

Hypothekenbank in Essen AG hereby confirms that it complies with the agreed self-restrictions regarding the investment of available funds.

Outline

In co-operation with its member institutions, the Association of German Mortgage Banks (VDH) has established a code of conduct for the issuers of Jumbo *Pfandbriefe*.

This Code of Conduct contains (a) rules of conduct and (b) disclosure requirements, with which the mortgage banks will voluntarily comply:

- a. The rules of conduct nos. 1) to 3), which apply to the issuers of Jumbo *Pfandbriefe*, stipulate that
 - new issues and increases are to be announced duly in advance in order to make sure that there is sufficient time for the book-building process;
 - new issues and increases are to be marked to the market at all times;
 - as a rule, increases are to be launched by the laid down minimum number of market makers.
- b. The rule of conduct no. 4) lays down minimum standards on the information to be disclosed. This will allow investors to evaluate the quality of cover assets. The information, which should be updated at least quarterly, is to be published in suitable electronic media.

Since mid-2001 Essen Hyp has been publishing detailed information about its cover pools, derivatives and interest rate risks. This information has been complemented by further details in accordance with the provisions of the Code of Conduct.

* The amendment of the German Mortgage Bank Act (HBG), which took effect on April 9, 2004, stipulates that German mortgage banks must, in addition to the "de facto" overcollateralization, maintain a securing excess cover of 2%. This securing excess cover must also be maintained when calculating the present value, including stress scenarios (upward/downward yield curve shifts). The calculation of the present value is governed by the Net Present Value Directive (Barwertverordnung) published by the Federal Financial Supervisory Authority (BaFin) in December 2003. To ensure that the mandatory overcollateralization is maintained at all times, banks are required to simulate stress scenarios in accordance with the static or the dynamic approach. For the static approach, the stress scenario is calculated on the basis of a parallel yield curve shift by +/- 250 basis points. For the dynamic approach, a number and distribution of maturities appropriate to the scope and structure of the institution's transactions has to be selected on the respective yield curve. The minimum number of maturities is six, including the following: 1 month, 1 year, 5 years, 7 years, 10 years and 15 years.

Essen Hyp uses the dynamic approach.

During the past 100 years, *Pfandbrief* investors have never failed to receive full repayment – a clear proof of the *Pfandbrief*'s high level of safety. This is just one reason why *Pfandbriefe* account for as much as 38% of all fixed income securities in Germany and have also become more and more popular with international investors.

In recent years the *Pfandbrief* market has seen significant changes due to the increasing volume of *Pfandbriefe* that are issued in the form of Jumbos and Globals. In autumn 2003 the *Pfandbrief* issuers within the Association of German Mortgage Banks (VDH) agreed upon an amendment of the minimum standards for issuing Jumbo *Pfandbriefe*. The new standards envisage a minimum size of €750m for a newly issued Jumbo *Pfandbrief*, instead of previously €500m. Further, the issuer must increase the issue size to at least €1bn within 180 calendar days. Moreover, buybacks of Jumbo *Pfandbriefe* have been included in the minimum standards and subjected to strict transparency requirements. This requirement safeguards the status of Jumbo *Pfandbriefe* as a highly liquid market segment.

The updated minimum standards for the issuance of Jumbo *Pfandbriefe* enter into force with immediate effect, the Federal Cartel Office (Bundeskartellamt) having raised no objections.

More detailed information on the new minimum standards for the issuance of Jumbo *Pfandbriefe* is available on the website of the Association of German Mortgage Banks.

The strict requirements of the German Mortgage Bank Act (HBG), in conjunction with the comprehensive banking supervision exercised by the Federal Financial Supervisory Authority (BAFin), ensure that German mortgage banks maintain a particularly high safety standard. The German Mortgage Bank Act stipulates, amongst other things, that:

- the scope of business activities permitted to German mortgage banks is restricted to the granting of public-sector and mortgage loans;
- loans may only be granted if the securities offered meet the quality standards set out by law;
- a match between maturities and interest rates of the lending and funding business must be ensured at all times.

In addition to this, the German Mortgage Bank Act contains a number of provisions to ensure the quality of the assets serving as cover for public-sector and mortgage *Pfandbriefe*. A key prerequisite for including an asset in the cover pool is, for example, that the *Pfandbrief* creditor's preferential claim must be guaranteed in the event of bankruptcy. Furthermore, there are provisions that govern the legal structuring of the cover assets, the composition and management of the cover pool and, for mortgage *Pfandbriefe*, the establishment of the lending value.

A mortgage bank must ensure that sufficient cover is available at all times, so that the principal and interest payments from the loans included in the public-sector and mortgage cover pools match, or even better, exceed the principal and interest payments due to the *Pfandbrief* creditors. All cover assets are held on trust by a trustee who is appointed by the Federal Financial Supervisory Authority (BAFin). Any disposal of a cover asset by a mortgage bank requires the trustee's prior approval.

Experience has shown that the provisions of the German Mortgage Bank Act constitute a suitable basis for the supervision of the mortgage banks' business activities.

Amendment of the German Mortgage Bank Act (HBG) as of July 1, 2002

A) A wider range of business activities

A1.) Expansion of mortgage lending activities

Following the amendment of the German Mortgage Bank Act (HBG), German mortgage banks are now allowed to expand their non-cover business activities in the area of mortgage lending to the non-European G7 countries (United States, Canada, Japan). The total volume of these transactions, plus the total volume of mortgage loans granted to the Central European full member states of the OECD (i.e. Hungary, Czech Republic, Slovakia and Poland) is limited to five times the liable own capital (Section 5 (1) (2b) of the German Mortgage Bank Act), Japan limited to three times the liable own capital.

A2.) Expansion of public-sector lending activities

Public-sector loans that are eligible for cover may now be extended to central governments, regional governments and local authorities in Switzerland, the United States, Canada and Japan. In addition to this, loans to the central governments of other European full member states of the OECD (i.e. Poland, the Czech Republic, Slovakia and Hungary) may

now also be funded through the issuance of public-sector Pfandbriefe (Section 5 (1) (1) (a) and 5 (1) (1) (c) of the German Mortgage Bank Act).

The previously permitted range of public-sector cover transactions in EU member states and contracting states to the Agreement of the European Economic Area (EEA) was also expanded. It is now possible to grant public-sector loans to non-profit administrative organizations, which are subordinated to the central governments, regional governments or local authorities in these countries (Section 5 (1) (1) (d) of the German Mortgage Bank Act).

B) Inclusion of derivatives in the cover pool

For the first time, the derivative transactions entered into by German mortgage banks have been put on a legal basis. Pursuant to Section 5 (1) (4a) of the German Mortgage Bank Act German mortgage banks are now in principle entitled to enter into derivative transactions. In addition to this, the mortgage banks have the possibility of including derivatives in their Pfandbrief cover pools as ordinary cover (Section 6 (6) of the German Mortgage Bank Act).

An English translation of the German Mortgage Bank Act (HBG) can be retrieved from the website of the Association of German Mortgage Banks www.hypverband.de.

Essen Hyp EUR 20,000,000,000 Debt Issuance Program (DIP)

Essen Hyp's €20bn Debt Issuance Program, which was launched on May 28, 1998 increased to €20bn in July 2002, aims to facilitate Essen Hyp's funding on the international capital markets.

The main intention of this Program is to provide structured financing transactions. However, any underlying risk exposure of a structured deal must be hedged against. In general, the required swap will be entered into with the dealer proposing the transaction. As a rule, each swap counterparty must have a minimum rating of AA- (S&P).

Jumbo *Pfandbriefe*, Global public-sector *Pfandbriefe* and similar benchmarks are launched outside the DIP.

The Program allows international fund-raising in almost any currency by means of a syndicated or non-syndicated, public or private placement. Funding proceeds are swapped back into EURIBOR. Pursuant to the German Mortgage Bank Act, Essen Hyp as a mortgage bank is not allowed to run any currency risks.

Maturities under this Program can reach up to 30 years, depending on the type of transaction. There is no specific maturity target.

Notes, including public-sector *Pfandbriefe*, may be issued in bearer or registered form. Depending on the agreement between issuer and dealer, Notes can be launched as Fixed Rate Notes, Floating Rate Notes, Indexed Notes, Dual Currency Notes or Zero Coupon Notes. The minimum volume per drawing is €5m.

Essen Hyp's DIP is listed on the Luxembourg stock exchange. The terms and conditions of the DIP also provide for a listing of bearer notes (including public-sector *Pfandbriefe*) on the Düsseldorf stock exchange, or any other stock exchange. Registered Notes (including public-sector *Pfandbriefe*) are not listed on any stock exchange.

The following ratings have been assigned to the Notes listed under Essen Hyp's Debt Issuance Program:

	Standard & Poor's	Moody's
Public-sector <i>Pfandbriefe</i>	AAA	Aa1
Senior Unsecured Debt	BBB+	A2
Subordinated Debt	BBB	A3

The Program is governed by German Law.

Our Debt Issuance Program has been arranged by Commerzbank and Merrill Lynch International. The dealers are ABN AMRO, Barclays Capital, Commerzbank, Goldman Sachs International, HSBC Trinkaus & Burkhardt, Lehman Brothers, Merrill Lynch International, Morgan Stanley, Schroder Salomon Smith Barney, Deutsche Bank, UBS Warburg, Credit Lyonnais and SG Investment Banking. The Program allows for reverse inquiry. Bids are welcome.

Following the launch of its €5bn Commercial Paper Program in December 1998, Essen Hyp has been able to issue short-term notes since the beginning of 1999.

Essen Hyp actively uses this Program in order to ensure flexible funding at low cost.

The Program allows drawings in EUR and any other internationally recognized currencies, as agreed between Essen Hyp and the dealer(s). The Notes that are issued under the Program must have a maturity of not less than two days. Clearing can be made through Euro Clear and Clear Stream Banking. In accordance with the existing legal and regulatory requirements, the maximum maturity in both cases is two years less one day. The minimum amount of the Notes is €2.5bn. There is no issuance of Definitive Notes under this Program.

One of the special features of the Program is that it allows for the issuance of

- Fixed-Rate Notes or
- Floating Rate Notes or
- Discounted Notes

all of which may be listed on a German stock exchange. The Notes may be deposited with the European Central Bank as Tier I securities.

Unless otherwise agreed, Floating Rate Notes under the Program have a maturity of at least six months and a minimum period of three months between two interest payment dates. Unless otherwise agreed, the EURIBOR is taken as the reference rate.

The Program itself is listed on the official market of the Düsseldorf stock exchange. Individual Notes may be listed with official quotations on the Düsseldorf stock exchange, or on any other stock exchange. However, Notes to be listed must have a minimum maturity of three months.

The Program offers a high degree of flexibility for both the dealer(s) and the issuer. Further day-to-day dealers are welcome.

Rating: Standard & Poor's: A-2 (Standard & Poor's)
P-1 (Moody's)

Arranger: Commerzbank AG

Frequent dealers: Commerzbank AG, Deutsche Bank AG, Société Générale

Day-to-day dealer: Goldman Sachs, London; Barclays, London; Dresdner, FFM; JP Morgan Chase, London; Lehman Brothers, London

The Program is a supplement to Essen Hyp's Debt Issuance Program, which was signed in May 1998 and increased to €20bn in July 2002.

Whether office buildings or shopping malls – real estate financing has become a global business. Major first-class projects can only be put into practice at a profit if matching lenders are found on the international capital markets. Investors, developers and real estate companies look for banking partners who are familiar with the highly complex real estate business. Developing successful strategies that ensure maximum planning security requires the expertise of specialists. And these specialists are at your disposal at Hypothekbank in Essen AG (Essen Hyp) – because our real estate markets are global.

Bringing in their knowledge of the individual countries and real estate market segments, our experts from various departments will, together with you, work out a tailored and innovative financing structure for your project – for existing properties and future investments alike. Available options include loan volumes from ten million euros (or the equivalent amount in foreign currencies) to several hundred million euros, terms of up to 10 years or more, fixed or floating interest rates. Essen Hyp participates in loan syndicates, but is also prepared to act as a stand-alone lender. We will accompany your project right from the start. Further to our expertise, we offer you a committed team and competitive loan terms: as a mortgage bank, Essen Hyp is entitled to issue *Pfandbriefe* and thus benefits from excellent funding opportunities.

Your partner for international real estate projects.

In addition to mortgage lending in Germany, our core activity is the granting of loans on the West European and North American real estate markets, mainly concentrating on Great Britain, France, Belgium, the Netherlands, Spain, Switzerland, the United States and Canada. Essen Hyp is thus active on the world's most important real estate markets.

We are particularly interested in properties that benefit from a good location in major West European and North American cities. By providing the necessary funds and developing loan structures that are tailored to the borrowers' specific requirements, we make an active contribution to the successful realization of each individual transaction. In addition to this, we are also prepared to support regional real estate projects.

Capable of dealing with selected projects.

The properties that interest us most are office buildings,

Morrison Street, Edinburgh,
Scotland

"The Exchange" is an up-and-coming office district in the center of Edinburgh. Essen Hyp participates in the financing of a state-of-the-art administrative building with a total office area of 50,000 sqm. The project was completed in 2001.

Arc de Seine, Paris

This office building in whose financing Essen Hyp is involved is located south west of the city center of Paris. It was completed in 2001 and offers a total floor area of 45,151 sqm.

logistics centers, shopping malls (provided that they are located in the catchment area of major cities and benefit from low vacancy rates) and multi-tenant residential properties. A particular focus is on existing properties that are fully let under long-term leases and to tenants of good standing. Our customers include leading national investors as well as well-known international borrowers who are active on international, national or regional real estate markets.

Borrower-specific financing structures.

Essen Hyp's international mortgage lending activities are bundled at our International Property Financing Desk. Our committed and efficient team will advise you of all relevant facts and decisions within a short period of time, so that you can put your plans into practice without delay. A basic decision will be made within a few days after receiving an enquiry for a loan. Having obtained and reviewed all documents needed for decision-making, we will issue an irrevocable lending commitment within a period of time agreed with you. The entire financing transaction – from counseling via loan commitment and disbursement to full redemption – will be accompanied by one particular internal expert who is familiar with all project-specific requirements and will always be at your disposal.

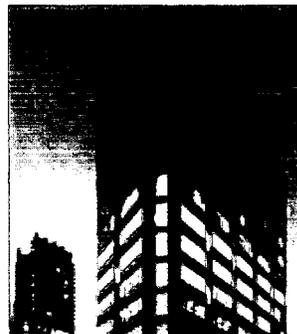

We are currently expanding our network of international representative offices so that you can additionally benefit from local contact partners. Establishing and maintaining fruitful and long-lasting customer relations always is the main objective of our efforts.

City Point, London

With 37 floors, the City Point Tower is the second highest building in the City of London, benefiting from an excellent location. Essen Hyp participates as a syndicate partner in the financing of this property which was reopened in 1998. The building offers a total office area of 54,000 sqm, retail units totaling 4,700 sqm and storage space of 8,200 sqm.

Milton & Shire, London

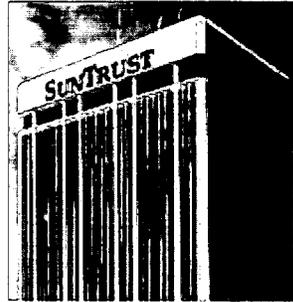

Built in 1996, this office building is located on the northern edge of the City of London. Essen Hyp arranged the financing of an effective floor area totaling 42,500 sqm, with offices accounting for 39,800 sqm of this figure.

Quality is the key to success.

We see our task in providing you with specialist knowledge to ensure the long-term success of your project. Our credit decision is based on the in-depth analysis and evaluation of all risks that are inherent in a transaction. Important factors to be looked at are the state of the property, location, investment profitability and tenant credit quality. Each property to be financed is appraised by our internal appraisers or by external specialists who are based in the region concerned and have to give evidence of their qualification and their experience with regard to the respective property type. The question as to whether a property can be used for multiple purposes and the cash flows from rental income are the most important parameters in our project analyses. We are only prepared to accept a loan transaction if our analysis comes to the conclusion that the project meets our high requirements for profitability and safety and that the risks are calculable over the long term.

The standard securities we require for providing a loan include a first-ranking mortgage over the property, the assignment of rental income and insurance proceeds and, in certain cases, additional securities to be agreed individually.

Sun Trust International
Center, Miami

This 31-floor property in whose financing Essen Hyp participates as a syndicate partner is located in the heart of downtown Miami and offers a total office area of 38,900 sqm.

Long Acre, London

In Central London, a few steps from the famous Covent Garden, Essen Hyp participates as a syndicate partner in the financing of an office building (total office area of 18,000 sqm), which will be fully restored by 2003. All offices will allow a flexible room shaping and design, thus meeting the needs of first-class companies with specific requirements.

Hergen Dieckmann has been working in the national – and later also international – lending business for several years, including the management of a number of real estate projects. As Relationship Manager, he maintains close contact with investors and banks. The permanent observation of the national and international real estate markets, a key prerequisite for qualified research, is also part of his responsibilities.

Thomas Link has been working as an attorney in the international real estate business for several years. Based on this expertise, he is tasked with the systematic project analysis and smooth handling of transactions. As Relationship Manager, he maintains close contact with customers and partners, as well as with external lawyers and appraisers. In order to ensure a functioning workflow he acts as the intermediary between all parties involved in the loan process.

▷ Thomas Link

Rainer Polenz has been living and working in London for more than 20 years. In his function as the Head of Department of a German bank, he gained a deep understanding of the UK real estate market. Mr. Polenz now heads Essen Hyp's UK representative office. He is in charge with customer relations and product marketing, establishing and maintaining close contacts with the national and international banks that are active on the UK real estate market. In addition, he monitors the development of the projects in which Essen Hyp is involved.

▷ Rainer Polenz

Assem El Alami worked as an attorney in Berlin before being employed as an in-house counsel by a German mortgage bank. He made a substantial contribution to the setting up of the bank's international financing business. Having been appointed head of the bank's representative office in Paris, he assumed responsibility for real estate financing in France and Spain. Now with Essen Hyp, he heads our bank's representative office and is our specialist for the French real estate market.

▷ Assem El Alami

Qualification and Training

Interview with Marita Kraft, Vice President and Head of the Personnel Department, on the bank's comprehensive training program

What are the particular characteristics of the training program that Hypothesenbank in Essen AG offers to its employees?

In the past we made frequent use of external training programs and seminars in order to improve the qualification of our employees. However, we realized that, in many cases, only a small portion of the huge amount of information provided in the framework of these programs is actually relevant to our bank's business activities. This is why we have decided to focus on in-house seminars that are either tailored to a homogenous group of employees and their specific job requirements or address our executive staff in general and cover multidisciplinary issues. These seminars are held by experts from international training academies, from university or from within our own institution. The quality of our training program will be certified by means of an internationally acknowledged certificate.

Could you please give an example?

The series of lectures within our 'Essen Hyp University' program deals with issues that are particularly important for our bank, such as risk controlling, corporate management, property financing or international accounting. There will be a total of 24 lectures, held every two weeks. These lectures are designed for and attended by our executive staff, junior executives and skilled employees, i.e. 50% of our total number of staff. A characteristic of this training program is that the Ruhr Graduate School, an academy for further education within the University of Essen, analyzes and certifies the academic relevance of each lecture. At the same time, this academy provides us with university lecturers. The employees who attend these lectures will be awarded a certificate issued by the University of Essen.

Why does Essen Hyp make such efforts to promote the further training of its employees?

Our comprehensive offer basically has three objectives: the transfer of knowledge, multidisciplinary thinking and action and the development of personal skills. By organizing this training program, we wish to promote corporate thinking, expertise that goes beyond one particular workplace, and the personal skills of our employees. The key question with regard to a certain task will no longer be: "Who is responsible for this?" but rather: "Who can do it in the best, quickest and most efficient way?"

Does this also include language training?

Yes, definitely. For an internationally operating bank, it is essential that an employee answering the phone is able to 'do his job' in English. This is why more than 90 of our employees, i.e. nearly 70% of our total number of staff, have been attending on-the-job conversation courses for years. We have recruited a native speaker of English who basically 'visits' his customers, i.e. our employees, at their workplaces and trains their language skills by dealing with job-related issues and questions. Since August 2001 we have also been offering French classes, albeit to a much more limited number of staff.

Can you say something about the acceptance of these measures by your

employees?

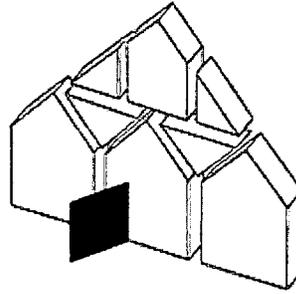

I can only look at this question by pointing to the 'half life period' of our knowledge. Of course, all these training measures are optional offers to our employees, which they can accept or refuse. However, the great willingness to accept these offers – the high number of participants is a clear sign of this – and the predominantly very good final results show that our employees agree with the aim of these measures, i.e. to ensure their own – and therefore our bank's – future competitiveness. The employees' investment in this respect is their spare time, as the majority of these training measures take place after regular working hours or during the week-ends, without any compensation through time off.

Success needs far-sightedness - guided by this motto, Hypothekenbank in Essen AG, which was founded in 1987, has become one of the leading mortgage banks in Germany within just one decade. The bank's business activities basically rest on two pillars: the granting of public-sector and mortgage loans. Our mortgage lending activities range from the extension of retail loans to finance detached or semi-detached houses or owned flats in Germany to the financing of large commercial properties on the domestic market, as well as abroad. To refinance these lending activities Essen Hyp is active on the national and international capital markets. In this context, one of our key objectives is to increase the popularity of our most important funding instrument, the Pfandbrief, with national and international investors. The fact that we have been awarded excellent ratings from the three leading rating agencies is just one proof of the quality of our work. Essen Hyp's most important shareholder is the Commerzbank AG.

You can find more detailed information on our bank, its management and its business activities on the following pages. Should you have any further questions please feel free to contact us and we will be happy to provide you with any information you require.

We have tasked prompter AG, Binger Straße 14-16, 55122 Mainz/Germany, with the credit servicing process, i.e. the granting and management of loans and the administration of the securities that relate to these loans.

For this purpose, we have authorized and empowered prompter AG to carry out any task relating to credit servicing on our behalf, even prior to loan approval. This authorization includes, in particular, the

correspondence with notaries public, land registries, authorities and credit institutions, as well as the issuing of declarations in conjunction with our claims, legal charges and other securities.

Since July 2003 the STATER Deutschland GmbH & Co KG, Hochkreuzallee 1, 53175 Bonn, is also responsible for the credit service, i.e. the administration of loans.

Hypothekbank in Essen AG - Fifteen years

Introduction

Hubert Schulte-Kemper
Chairman of the Board
of Managing Directors

Those who trust in themselves have future! This was our conviction when founding Hypothekbank in Essen AG in 1987 - and all skeptics, and despite the fact that a mortgage bank to be founded dated back as many as 26 years. We took the project challenges which needed to be overcome. The belief in a good idea has always been the driving force.

Hard work is the key to success. However, it goes without saying that a bank does not top results when standing alone. What has been - and will be - decisive is to find partners who have the courage to explore new shores and who trust in our work. We like to thank you very much for your commitment, which has been a key factor in our success. It was not least due to your support that we have become the second largest Jumbos and Globals in Germany and succeeded in capturing a market share of 15% in the past 15 years.

Striving for success is important, but it is even more important never to forget where you come from. To be aware of one's origins helps to release the necessary energy and to set positive examples. This is why our identification with, and close connection to, the Ruhr region have always been an integral part of our self-conception. We are a long-standing member of the "Initiativkreis Ruhrgebiet", a working group aiming at promoting the Ruhr area, and participated in a number of major events. In addition to this, Essen Hyp regularly organizes expositions and round table discussions on science and culture.

As a part of these activities we had the pleasure of welcoming a number of illustrious guests and partners to the premises of our bank. For more than one and a half decades we have established and cultivated contacts all over the world.

Even though we were right from the beginning confident that we would put our bank into practice, the success of the project by far exceeded our expectations. Today Hyp enjoys an excellent standing on the global *Pfandbrief* markets. Trusting in our courage to realize new ideas, we face the future with confidence. We look forward to the future together with you.

A handwritten signature in black ink, reading "H. Schulte-Kemper".
