J-COM JOINS 11 OTHER KANSAI AREA CABLE OPERATORS IN COALITION TO EXPLORE IP PHONE SERVICES

Companies Join Forces to Consider Collectively Offering Primary Phone Services

Tokyo, JAPAN — Jupiter Telecommunications Co., Ltd. (J-COM), the largest broadband and cable service provider in Japan based on the number of customers served, today announced its participation in a cable coalition gathered to explore the feasibility of collectively providing primary (able to place emergency calls) Internet Protocol (IP) phone services. In addition to J-COM, J-COM Kansai Co., Ltd., Cable Net Kobe Ashiya Co., Ltd., and Hokusetsu Cable Net Co., Ltd., J-COM's local cable franchises, will participate in the coalition, joining OSAKA CENTRAL CABLE NETWORK CO., LTD., Kansai Cable Net Co., Ltd., KYOTO CABLE COMMUNICATIONS Co., Ltd., Kintetsu Cable Network Co., Ltd., Cable Television Kobe Inc., Shiga Cable Network, Inc., TV KISHIWADA Co., Ltd., and Bay Communications, Inc. These companies have started studies of the feasibility of providing primary IP phone services as a group.

J-COM Phone, the current telephone service offering available through J-COM, uses switched technologies to provide primary phone service. Within the Kansai area, 18 different cable operators have been offering secondary IP phone service as one of many available Internet services.

In addition to gathering each company's marketing and engineering capabilities, the twelve company coalition has, though linking the J-COM systems primarily in the Kansai area but also in the Sapporo, Kanto and Kyushu areas, started studies on the feasibility of providing IP phone services. As a result of this linking, the areas in which cable television operators will be able to provide telephone services increased to cover approximately 9 million households. In addition, this IP phone service offering may include the current J-COM primary phone customers (more than 700,000 households) as part of a group eligible for an intra-group connection rate, and the twelve company coalition is also considering providing the primary IP phone services under a common brand.

As a result of this new service, it will become possible to provide one-stop shopping for all the informational needs of a household, including primary phone services, in addition to cable television and high-speed Internet access services. The implementation of this one-stop service will not only result in

increased customer satisfaction but will also benefit the cable industry as a whole by providing services under nationwide branding where cable operators had previously only operated regionally in Japan.

Going forward, the operators involved in the alliance will be cooperating with the All Cable Network Promotion Committee of the Japan Cable and Telecommunications Association to coordinate with other cable operators throughout the country to promote both the expansion of the cable operators' primary IP phone service area as well as to increase overall customer satisfaction.

Based in Tokyo, J-COM provides broadband services through 19 managed franchises, including cable television services (J-COM TV), high-speed cable Internet access services (J-COM Net) and telephony services (J-COM Phone) where available. These services are provided through J-COM's advanced fiber and cable network, which carries information, content and services directly to homes in our service areas.

Established in 1995, Jupiter Telecommunications Co., Ltd. (J-COM) is Japan's largest multiple system operator based on the number of subscribing customers, serving 1,870,000 subscribing households (as of September 30, 2004) in the Hokkaido, Kanto, Kansai, and Kyushu regions. Based in Tokyo, J-COM is the corporate entity that provides cable television, high-speed Internet access and telephony services to customers across Japan through 19 managed franchises operating at the local level. J-COM's principal shareholders are Liberty Media International, Sumitomo Corporation, Microsoft Corporation, Mitsui & Co., Ltd., and Matsushita Electric Industrial Co., Ltd. (as of September 30, 2004). For more information, visit J-COM's website at <http://www.jcom.co.jp/corporate/english.html>

MAEBASHI CITY TO INVEST IN J-COM'S GUNMA OPERATIONS

Tokyo, JAPAN -- Jupiter Telecommunications Co., Ltd. (J-COM), the largest broadband and cable service provider in Japan based on the number of customers served, today announced an investment from Maebashi city in one of J-COM's local franchises, J-COM Gunma Co., Ltd (J-COM Gunma). One of 19 managed franchises operated by J-COM, the city of Maebashi made a one million yen investment in exchange for newly issued shares in J-COM Gunma. The shares were issued on November 4, 2004.

J-COM Gunma launched full-fledged digital services, including terrestrial digital broadcasting, in the spring of 2004. With the investment from Maebashi, J-COM Gunma has plans to strengthen its partnership with the community and make every effort to offer services that local citizens consider useful, convenient and valuable.

J-COM Gunma's offices are in Takasaki city, Gunma prefecture. The company's capitalization is 1,102 million yen (as of November 5, 2004).

Established in 1995, Jupiter Telecommunications Co., Ltd. (J-COM) is Japan's largest multiple system operator based on the number of subscribing customers, serving 1,870,000 subscribing households (as of September 30, 2004) in the Hokkaido, Kanto, Kansai, and Kyushu regions. Based in Tokyo, J-COM is the corporate entity that provides cable television, high-speed Internet access and telephony services to customers across Japan through 19 managed franchises operating at the local level. J-COM's principal shareholders are Liberty Media International, Sumitomo Corporation, Microsoft Corporation, Mitsui & Co., Ltd., and Matsushita Electric Industrial Co., Ltd. (as of September 30, 2004). For more information, visit J-COM's website at <http://www.jcom.co.jp/corporate/english.html>
