The Company wishes to announce that it has fulfilled its earn-in requirements on the Mingan Titanium Option, and now holds a 50% interest in these iron titanium properties held by the Sheridan Platinum Group.

Trenching has been completed on the main property for the season, and several areas of previously unrecognized massive hemoilmenite outcrop have been identified. These will be properly mapped and further trenched when weather conditions permit.

Work has begun on the removal of a bulk sample from the property. On site test work on this material is scheduled for winter/spring, 2005.
