NEWS RELEASE

St Jude Extends Father Brown Zone at Depth

Vancouver, December 21, 2004 - St. Jude Resources Ltd. (SJD-TSX.V) is pleased to report that new drilling, at the Father Brown deposit has extended the mineralization down dip to approximately 150 meters. The company is encouraged by the results which include intersections of **4 meters of 27.39 g/t, 4 meters of 9.75 g/t and 7.65 meters of 4.40 g/t.** These results confirm that the high grade gold mineralization at Father Brown continues at depth. Previous drill highlights include **14 meters of 37.57g/t, 11 meters of 6.71 g/t, and 4 meters of 41.82 g/t** . A table of new results is set out below:

Hole #	Dip Degr e	Azimuth	Coordinates		From - To (m)	Interval Width (m)	Grade g/t Au
			North (m)	East (m)			
FBZ-94	-80	90	3325	2777	107-111	4	27.39
FBZ-95	-45	90	3225	2750	133.6 - 135	1.4	7.11
FBZ-96	-70	90	3225	2749	126 - 127	1	10.28
					137 - 141	4	9.75
FBZ-97	-90	90	3225	2749	159 - 163	4	4.24
FBZ-98	-90	90	3375	2738	138.6- 146.25	7.65	4.40

The Father Brown deposit is located between the Adoikrom and Dabokrom deposits at the south end of the Hwini Butre project in Ghana (see attached map). Like most deposits in the region, including the 45 million ounce Obuasi Mine to the north, the resources are contained within a series of smaller pods developed as open pits. Prior to this new drilling St. Jude had calculated a total measured and indicated resource within eight pods at Hwini Butre and Benso of 1,316,000 ounces with an additional 25,000 ounces in the inferred category. Based on previous drilling the company is optimistic that this new mineralization will increase the resource at Hwini Butre.

St. Jude's exploration team will continue to aggressively explore for new ounces. Early in the new year the company will continue drill programs on its advanced projects in Ghana, Burkina Faso and Niger. These drill programs include further resource definition at existing deposits and exploration drilling on several prospective targets. St. Jude's exploration program is under the direct supervision of George A. Flach, B.Sc., P.Geo., who is the qualified person responsible for the design and management of the drill program.

In the new year the company will also be considering the appointment of a financial advisor to evaluate and pursue strategic relationships.

Third Quarter Results

At the end of the company's third financial quarter, the company had no debt and working capital in excess of \$11.1 million, which is sufficient to meet the company's financial needs and planned exploration and development expenditures. Exploration costs on the company's resource properties for the quarter amounted to \$1,300,938. Administrative expenses and overhead totalled \$1,563,914, which includes a non cash compensation expense in the amount of \$1,355,324.

St. Jude is a leading West African explorer focused on the discovery and development of gold deposits amenable to low cost mining techniques. The company's West African projects now cover over 2,900 sq. km. (716,605 acres) of one of the richest and most productive gold belts. With an experienced exploration team, financial resources, new discoveries and several advanced exploration targets, St. Jude is well positioned to continue its strong growth.
