KUMBA - KUMBA AMONG FIRST COMPANIES TO QUALIFY FOR THE JSE SRI INDEX

KUMBA RESOURCES LIMITED

JSE SHARE CODE: KMB

ISIN: ZAE000034310

KUMBA AMONG FIRST COMPANIES TO QUALIFY FOR THE JSE SRI INDEX

Kumba Resources Limited (Kumba) is among the first group of companies listed on the Johannesburg Securities Exchange South Africa (JSE) All Share Index to comply with the requirements of the new JSE Socially Responsible Investment (SRI) Index.

At the launch of the JSE SRI Index last night, it was revealed that Kumba is one of the first 51 of the 160 All Share Index companies to meet the requirements of the corporate governance, economic, social and environmental criteria.

The data provider for the index, Sustainability Research & Intelligence, commented that Kumba performed "exceptionally well in respect of the four areas measured. Its disclosure level in terms of quantitative and qualitative information is especially commendable".

Kumba's chief executive, Dr Con Fauconnier, welcomed the launch of the JSE SRI Index. "The index provides an opportunity for all listed companies to set out their policies, systems and processes in a uniform and transparent manner.

"It enables companies to critically analyse their triple bottom-line efforts. This is an evolving arena where all participants continue to learn from one another on their journey towards sustainability.

"Being included on the inaugural JSE SRI Index provides Kumba stakeholders with an assurance that the company is on the right track."

Due to the developmental approach the JSE has taken towards the index, it has opted to not release company specific scores. Updated each year, the maiden index does not include rankings.

KUMBA RESOURCES LIMITED - NEWS RELEASE: KUMBA INCREASES IRON CORE SUPPLY TO
CORUS

Kumba Resources Limited

JSE Share Code: KMB

ISIN: ZAE000034310

NEWS RELEASE: KUMBA INCREASES IRON CORE SUPPLY TO CORUS

25 May 2004

South African diversified metals and mining company Kumba Resources Limited ("Kumba") has signed a contract with major Anglo-Dutch steel producer Corus for a five-year supply of Sishen iron ore.

The contract is the first to include an option to purchase new iron ore products from Kumba's Sishen mine expansion project. The expansion will take Sishen's current output of 27Mtpa to 28Mtpa by end of 2004, with a further increase to 38Mtpa by 2007. The final feasibility study for the project will be completed in August 2004 and is expected to be approved for implementation the following month.

In terms of the contract, Kumba will supply Sishen ore to Corus from 1 April 2004 to 31 March 2009. The tonnage supplied is set to increase from 2,6Mtpa during 2004/05 to 3,3Mtpa in 2008/09 plus an additional annual tonnage of between 450 000 t and 750 000 t.

The relationship between Corus and Kumba dates back to 1977 when Sishen exports to Corus" UK operations commenced. The first shipment of 71 053 t of Sishen ore was loaded on to the MV. "King George" in January 1977. The relationship has subsequently developed to the extent that Corus has become Kumba's largest single export customer in terms of volume.

At the signing ceremony of the new contract in South Africa, Dr Patrick Doolan, director of supplies and transport at Corus, and Matie von Wielligh, general manager of Kumba's iron ore division, expressed their appreciation for the parties" mutual co-operation and their commitment to further develop and expand the strong working relationship between the two companies.

ISIN: ZAE000034310

KUMBA RESOURCES LIMITED - NEWS RELEASE

7 July 2004

KUMBA TO CONDUCT PRE-FEASIBILITY STUDY ON SENEGAL IRON ORE PROJECT

Metals and mining company Kumba Resources Limited (Kumba) today signed an agreement with Miferso, a Government of Senegal-owned project development company, granting it the right to conduct and develop a pre-feasibility study on the Faleme iron ore project situated in the south-eastern region of the country. The development is in line with Kumba's strategy of seeking growth opportunities that generate value for its shareholders and consolidating the company's position as one of the principal diversified mining companies in Africa.

The agreement also gives Kumba subsidiary Kumba International BV, at completion of the pre-feasibility study, an option to acquire an 80% interest in the Faleme project from Miferso and to subsequently conduct a bankable feasibility study. Kumba will conduct limited exploration during the 10-month pre-feasibility study to prove that the mineral resource can support at least a 20-year life of mine with a sustainable 12Mtpa production output. At the same time, Miferso will develop a business case for the funding, construction and operation of the rail and port infrastructure required.

"The Faleme project consists of three elements, namely a mine and associated infrastructure; a 741km railway line of which 311km still has to be constructed; and a new deep-water port for iron ore exports to be developed near Dakar," said Richard Wadley, Kumba's executive director for strategy and business development.

It is estimated that the preliminary capital cost of about US\$950 million would be split between the mine and port handling facilities (US\$306 million), the railway line and rolling stock (US\$537 million), and the new deep-water port (US\$107 million).

"In terms of the agreement Kumba will limit its commercial responsibility to the development of the mine and port handling facilities. The financing and development of the rail and port infrastructure will be the responsibility of Miferso and the Government of Senegal.

"Kumba will use its technical, financial and project development expertise to assist Miferso with the development of the infrastructure business case," said Wadley.

The Faleme project is attractive to Kumba as its proximity to Europe in relation to other global iron ore operations offers reduced sea-borne transport costs and shipping time, and a competitive advantage in the European market. In addition, the 260Mt resource has an acceptable in-situ Fe content of 58% and lump fine ratio of 50:50 with low impurities.

The project is aligned with Nepad (New Partnership for Africa's Development) and will, if implemented, be one of the largest public and private sector partnerships for the development of local infrastructure in West Africa.

16 July 2004

TRADING STATEMENT

This trading statement is issued in accordance with the revised JSE Securities Exchange South Africa Listings Requirements, which became effective on 1 September 2003. The results for Kumba Resources Limited (Kumba) for the 12 months ending 30 June 2004 will be released on 4 August 2004. It should be noted that the Group has changed its year end from 30 June to 31 December, in line with that of its major shareholder, Anglo American plc. To this end the Group will report reviewed results for the 12-month period, which ended 30 June 2004, and audited results for the 18-month period ending 31 December 2004.

Notwithstanding the strong operational performance by the Group and the higher than expected iron ore price settlements, effective 1 April 2004 which applied for the last three months of the period under review, the following factors have had a negative effect on Group profits when compared to the corresponding period in the previous year:

- the continued appreciation of the Rand against the US dollar,
- an increase in leave pay accrual to cost of employment,
- a higher effective tax rate, and
- certain non-recurring charges relating to Ticor Chemicals Company and

Base Metals.

As a result, the Group expects both attributable and headline earnings per share for the year ending 30 June 2004 to be materially below that of the year ended 30 June 2003. The forecasts have not been reviewed or reported on by the Group's auditors.

("Kumba")

THE TRANSPORT AND HANDLING OF IRON ORE THROUGH THE SISHEN SALDANHA EXPORT CHANNEL

Shareholders are referred to the announcement on 27 August 2004 of the annual financial results of Transnet Limited ("Transnet") for the year ended 31 March 2004, and, in particular, to the negative fair value adjustment of R4 532 million resulting from the current pricing arrangements for the transport and handling of iron ore from the Northern Cape through the Sishen-Saldanha export channel. The price payable to Transnet for its services under the agreement between Transnet and Sishen Iron Ore Company (Proprietary) Limited ("the agreement") is determined with reference to two external variables, namely, the ruling US Dollar-denominated iron ore price and the ruling Rand/US Dollar exchange rate. The pricing arrangements have been regarded as an embedded derivative for the purposes of accounting standard AC 133 and accounted for accordingly by Transnet.

As a result, Transnet and Kumba have agreed to co-operate and jointly review the contractual pricing mechanism in the agreement in an endeavour to reach a mutually beneficial solution. At the same time, the parties will progress their negotiations for an increase in the tonnage of iron ore transported by Transnet through the Sishen-Saldanha export channel to accommodate Kumba's iron ore expansions in the Northern Cape. The transport of Kumba's current iron ore tonnage to Saldanha Bay will not be interrupted. Shareholders will be informed of the outcome of these discussions.

JOINT NEWS RELEASE

KUMBA RESOURCES LIMITED

TRANSNET LIMITED

27 August 2004

ACCOUNTING STANDARD AC 133 RESULTS IN KUMBA AND TRANSNET AGREEING TO JOINTLY
REVIEW IRON ORE EXPORT AGREEMENT

Diversified metals and mining company Kumba Resources (Kumba) and national
transport and logistics company, Transnet Limited (Transnet), today announced
that they will jointly review their current agreement regarding the transport
and handling of iron ore from Kumba's Sishen mine in the Northern Cape to the
export facilities at the port of Saldanha on the west coast.

The decision to review the agreement was precipitated by the annual financial
results which included a negative fair value adjustment of R4 532 million
resulting from the current pricing arrangements for the transport and handling
of iron ore from the Northern Cape through the Sishen-Saldanha export channel.
These pricing arrangements have been regarded as embedded derivatives for the
purposes of accounting standard AC 133 and accounted for accordingly by
Transnet.

The price payable by wholly-owned Kumba subsidiary, Sishen Iron Ore Company
(Pty) Limited, to Transnet for its services under the agreement is determined by
two external variables, namely the US Dollar-denominated iron ore price and the
South African Rand/US Dollar exchange rate.

While the review of the current agreement is driven by the implications of the
AC133 accounting treatment of the agreement, the parties have been engaging one
another for some time to provide for a further 19Mtpa growth in Kumba's exports
of iron ore.

"Transnet and Kumba will work together to review the contractual pricing
mechanism in the existing contract in an endeavour to reach a mutually
beneficial solution. At the same time, existing negotiations to increase rail
capacity on the Sishen-Saldanha line to accommodate Kumba's iron ore expansions
in the Northern Cape are continuing. We remain committed to providing optimum
services to one of our most valuable customers," said Maria Ramos, Transnet's
group chief executive.

"The existing rail arrangements are not affected and will continue to run to the
mutual benefit of Kumba and Transnet. We will continue to engage closely with
Transnet regarding rail and port capacity needed to support Kumba's expansion
plans at the Sishen mine and planned Sishen South mine," said Dr Con Fauconnier,
Kumba's chief executive.

The review process will start in September 2004.

DISPUTE RELATING TO HOPE DOWNS IRON ORE PROJECT IN AUSTRALIA

Shareholders are advised that the Board of Directors of Kumba, with the support of its controlling shareholder, Anglo American plc, has approved its investment in and the development of the Hope Downs Iron Ore Project (the "Hope Downs Project"). Shareholders of Kumba should, however, be aware that Downs Holding BV ("Downs Holding"), a wholly-owned subsidiary of Kumba, is presently in dispute with Hope Downs Iron Ore Pty Ltd ("HDIO") in Australia in respect of the Hope Downs Project.

The dispute, which has been referred to arbitration for hearing in October 2004, arises pursuant to an agreement dated 29 January 1998 between, inter alia, Downs Holding and HDIO and relates specifically to the acquisition by Anglo American plc of a controlling interest in Kumba and whether or not HDIO has unreasonably withheld or delayed its approval of such change in control. If HDIO is successful in the arbitration, HDIO will be entitled to purchase the interest of Downs Holding in the Hope Downs Project at a fair value to be determined in terms of the agreement between the parties. Legal opinion has confirmed that Kumba should be successful in the arbitration.

7 October 2004

KUMBA ON COURSE TO ACHIEVE MINIMUM R800 MILLION IMPROVEMENT IN NET OPERATING PROFIT

Diversified metals and mining company Kumba Resources Limited (Kumba) today announced that a business improvement project running throughout the group is on course to achieve a sustainable minimum R800 million improvement in net operating profit by December 2005, the full impact of which is expected to be realised in the group's 2006 financial year.

The project was launched in February 2004 to counter certain threats to Kumba's businesses, including the strong Rand and declining and volatile commodity prices that have impacted negatively on the group's performance. It will reduce costs, increase product throughput and revenue, and improve business processes.

The minimum R800 million target was set using a forecasted exchange rate of R7/\$. The project has identified value creating opportunities that will contribute to the long-term survival of Kumba's businesses.

"A detailed process has been followed to assess our position and the potential for improvement in order to add value to all our stakeholders. We have now reached the stage where we can accurately map the way forward to meet the challenges posed by the external factors that impact on our performance," said Dr Con Fauconnier, Kumba's chief executive. "From February to date we analysed different alternatives to achieve the improvements. We have now arrived at the stage where we unfortunately have to

contemplate potential job losses of approximately 400 employees. No final decisions have been made on initiatives that may impact on employees and today we notified our employees and recognised trade unions that we will engage with them in a consultation process starting on 21 October 2004," said Dr Fauconnier.

"As a responsible employer, we have a rigorous process to minimise potential job losses. This includes limiting both external appointments and the appointment of contractors, a suspension of the employment of temporary staff where possible, voluntary retrenchment and early retirement packages, and the redeployment of potentially affected employees. We value our employees and are managing the situation with due care and consideration for the individuals who may be affected," added Dr Fauconnier.

ANGLO AMERICAN AND KUMBA SIGN HEADS OF AGREEMENT TO DEVELOP NEW QUEENSLAND COKING COAL MINE

Anglo American plc and its South African subsidiary Kumba Resources Limited announced today that Anglo Coal Australia (Anglo Coal) and Kumba Australia Pty Ltd (Kumba) have signed a Heads of Agreement (HoA) that could lead to the development of a major coking coal mine in central Queensland, Australia. The HoA covers the investigation into the joint development of Kumba's Moranbah South Mining Development Lease (MDL) in combination with the southern portion of Anglo Coal's adjacent Grosvenor lease. These areas are located to the south of the township of Moranbah in the Bowen Basin coalfield of central Queensland. The coalfield hosts extensive high grade coking coal resources that already support several large mining operations, including the nearby Anglo Coal mine of Moranbah North.

Kumba inherited its Moranbah South MDL from Iscor, which conducted exploration of the property during the 1990s, prior to the separation of its mining interests in 2001 to form Kumba.

An extensive exploration and evaluation programme, to be funded by Anglo Coal as part of the HoA, will commence immediately, leading to the development of a feasibility study.

FOR IMMEDIATE RELEASE

27 October 2004

KUMBA'S COAL GROWTH STRATEGY MOVES AHEAD WITH TWO MAJOR PROJECTS

Diversified metals and mining company Kumba Resources Limited (Kumba) today announced that the Kumba Board has approved construction of two South African projects that support its strategy to grow the coal business through optimal market positioning and resultant value growth.

The projects at the Grootegeluk and Leeuwan coal mines, situated in Limpopo and Mpumalanga provinces respectively, will require a combined capital expenditure of R411 million.

A new R320 million beneficiation module at Grootegeluk will generate a further 0,7 million tons per annum (Mtpa) of semi-soft coking coal for supply to Ispat Iscor, which announced last week that it is to construct a new coke battery at its Newcastle plant to manufacture market coke for the expanding domestic market. A 10-year agreement has been concluded to supply Ispat Iscor with the product at a market-related price.

"The Grootegeluk project is expected to be completed by July 2006 and will increase Grootegeluk's semi-soft coking coal output to 2,5Mtpa. It will reinforce the mine's position as the world's largest coal beneficiation complex," said Ernst Venter, Kumba's coal business general manager. In a second coal development, Kumba will invest R91 million to expand production at its Leeuwan coal mine near Delmas by 60%, boosting output from 1,7Mtpa to 2,7Mtpa. The expansion is due for completion by June 2005. A jig plant will be constructed at Leeuwan to supply Eskom with an additional 1Mtpa of power station coal for its Majuba power station.

The combined growth in sales tonnage from the Grootegeluk and Leeuwan projects will amount to 1,7Mtpa, increasing Kumba's total coal production to 21,7Mtpa.

The South African developments follow last week's announcement that Kumba has signed a Heads of Agreement with Anglo Coal Australia that could lead to the development of a major coking coal mine in the Bowen Basin of central Queensland, Australia. The agreement covers the investigation into the joint development of Kumba's Moranbah South Mining Development Lease in combination with the southern portion of Anglo Coal Australia's adjacent Grosvenor lease. ends

KUMBA UNSUCCESSFUL IN HOPE DOWNS ARBITRATION

Diversified metals and mining company Kumba Resources Limited (Kumba) today announced that it has been unsuccessful in the arbitration process initiated to resolve a dispute between Kumbas wholly-owned subsidiary, Downs Holding BV (Downs), and Hope Downs Iron Ore Pty Limited (HDIO), a subsidiary of Kumbas Australian partner in the Hope Downs joint venture, Hancock Prospecting Pty Limited (Hancock). The dispute arose from Anglo American plc acquiring a controlling interest in Kumba in December 2003 and concerned whether HDIO had unreasonably withheld or delayed its approval of the change in control.

While disappointed at the outcome, Kumba is studying the decision of the arbitrators. In terms of the agreement between Downs and HDIO, HDIO may elect to acquire Kumbas interest in the project at a value to be determined by agreement and failing agreement by an independent expert. The market will be advised of further developments. In the meanwhile, Kumba will continue to pursue its many other development opportunities.

**KUMBA LODGES APPEAL AGAINST HOPE DOWNS ARBITRATION
DECISION**

Kumba announced on 21 December 2004 that it had been unsuccessful in the Hope Downs arbitration. The arbitration related to a dispute between Kumba's wholly owned subsidiary Downs Holding BV (**Downs**) and Hope Downs Iron Ore Pty Limited (**HDIO**), as to whether HDIO had acted unreasonably in withholding its approval of Anglo American plc as the new controlling company of Downs. Kumba has decided to appeal against the arbitration decision to the Supreme Court of Western Australia. In order to comply with the deadline for lodging an appeal and to preserve its rights, Kumba today lodged the papers required for the appeal with the Supreme Court.

The market will continue to be advised on further developments.

**KUMBA LODGES AN APPEAL AGAINST THE ARBITRATION DECISION IN
THE SUPREME COURT OF WESTERN AUSTRALIA
QUESTIONS AND ANSWERS
JANUARY 2005**

Q: Is there a buy-out arrangement?

A: HDIO has an option to acquire Kumba's (Downs') interest in the project at an agreed value, or failing agreement, a fair value to be determined by an independent expert. It is, however, not a foregone conclusion that the option will be exercised.

Q: What is your estimate of the valuation, if this is to be determined?

A: Kumba is not in a position to comment on the value currently as it is in the process of valuing its interest in the project. It will however be determined in terms of a contractual mechanism provided for in the agreement between Downs and HDIO.

Q: What are the changes of success for the appeal?

A: Kumba believes that it has good legal grounds for appeal, but in these matters it is always difficult to estimate the probability of success. We will continue to seek the best advice there is on the matter and may review our decision from time to time.

Q: If Kumba does appeal, how long will the process take to reach a decision?

A: Kumba is not sure about the exact timeline but our preliminary advice suggests that it may take 3 - 6 months.

Q: Does the appeal delay the determination of fair value for Kumba's Project Interest?

A: At this stage the process for the determination of fair value will continue.

Q: If it comes to Hancock paying out Kumba's share, surely this will be very beneficial to Kumba?

A: Should Kumba receive what it perceives as fair value for its interest in the project Kumba can deploy the proceeds in its other exciting growth prospects:

1. Iron Ore opportunities in the Northern Cape
2. Coal in the Waterberg

Q: What are the other development opportunities you will pursue?

A: Inter alia:

1. Sishen expansion project to increase production from 28Mtpa to 38Mtpa
2. The Faleme iron ore prospect in Senegal
3. Expansions in the Waterberg coalfield

("Kumba")

TRADING STATEMENT

Shareholders are reminded that Kumba has changed its year-end from 30 June to 31 December and that its audited financial results for the 18 month period ended 31 December 2004 will be announced on 17 February 2005. Kumba has published its interim results for the 6 month period ended 31 December 2003 and for the 12 month period ended 30 June 2004 which were reviewed by its auditors.

In the announcement of its second interim results for the 12 months ended 30 June 2004, Kumba expected stronger commodity prices to have a positive impact on the group's financial results although earnings will continue to be affected by the rand.

The group benefited from higher iron ore and coal prices and sales volumes for the 6 month period ended 31 December 2004 which were partially offset by the further strengthening of the rand. An average exchange rate of R6.38 to the US dollar was realised for this period compared with R7.04 for the corresponding period ended 31 December 2003.

As a result, the group's unaudited headline earnings per share for the 6 months ended 31 December 2004 are expected to exceed the reviewed headline earnings per share of 81,5 cents for the 6 months period ended 31 December 2003 by between 75% and 85%.

The financial results on which this trading statement is based have not been reviewed or audited by the group's auditors.

JOINT NEWS RELEASE

TRANSNET LIMITED & KUMBA RESOURCES LIMITED

FOR IMMEDIATE RELEASE

26 January 2005

National transport company Transnet Limited (Transnet) and diversified metals and mining company Kumba Resources Limited (Kumba) today jointly announced that they have signed a Heads of Agreement regarding a new contract for the transport and handling of iron ore from the Northern Cape through the Sishen-Saldanha export channel.

The Heads of Agreement provides for the pricing mechanism to be a Rand-based tariff and caters for Kumba's current growth plans to increase iron ore exports.

The elements contained in the Heads of Agreement will be adopted in a new Definitive Agreement which, subject to the approval of the Transnet and Kumba boards, is expected to be concluded during the first quarter of 2005.

This new agreement will make a positive contribution to the growth of South Africa's iron ore industry and enhance the good co-operation between Transnet and Kumba.

ends

Editor's Note:

Kumba Resources Limited, one of the largest South African-based mining companies listed on the JSE Securities Exchange, is a focused metals and mining company with a diverse commodity portfolio consisting of iron ore, heavy minerals, coal, base metals and industrial minerals. www.kumbaresources.com
