* Interim dividends were paid to entitled shareholders on August 27, 2004.

(a) Amounts under \$500,000

The proposed final dividends will be payable on May 20, 2005, subject to shareholders' approval at the Annual General Meeting to be held on April 29, 2005. Notice is hereby given that the Share Transfer Books and Register of Members of the Company for ordinary shares will be closed from May 10, 2005 to May 11, 2005, both dates inclusive. Duly completed transfers received by the Company's Registrar, Barbinder & Co Pte Ltd of 8 Cross Street #11-00 PWC Building, Singapore 048424 up to 5.00 p.m. on May 9, 2005 will be registered to determine shareholders' entitlement to the proposed final dividends. In respect of ordinary shares in the securities accounts with The Central Depository (Pte) Limited ("CDP"), the final dividends will be paid by DBSH to CDP, which will in turn distribute the dividend entitlements to shareholders.

Financial Review

DBSH Group's net profit attributable to members ("NPAM") was \$321 million for fourth quarter 2004, up 10% over fourth quarter 2003. Year-on-year, NPAM almost doubled to \$2.018 billion. Excluding the one-time gains of \$187 million from sale of the Group's 10% stake in Wing Lung Bank and \$310 million gain from sale of the Group's 59% stake in DBS Thai Danu Bank Public Company Limited ("DTDB") in year 2004, NPAM would show a 48% increase over the previous year to \$1.521 billion. Lower provision charge and higher net interest income contributed to the better bottom-line profit.

- Operating income of \$1.022 billion was 3% lower than fourth quarter 2003 mainly due to a 9% decline in non-interest income from lower treasury gains. For the full year, operating income (excluding one-time gains) rose 6%, largely due to higher net interest income from growth in customer loans and debt securities.
- Operating expenses rose 10% over fourth quarter 2003 to \$530 million in fourth quarter 2004 mainly due to higher staff costs and advertising and promotion expenses. Year-on-year, operating expenses increased 9% to \$2.006 billion.
- Cost-to-income ratio (excluding goodwill amortisation) was 51.9% for fourth quarter 2004 and 45.8% for fourth quarter 2003. Excluding one-time gains, cost-to-income ratio would have been 45.3% for year 2004 as compared to 43.9% for year 2003.
- Provision write-back of \$31 million was recorded in fourth quarter 2004 as compared to a \$82 million charge in the same quarter last year. The reduced provisions were due to: (a) a lower specific provision charge for loans arising from loan recoveries, improving asset quality and higher collateral valuations; (b) write-backs in provisions made previously for marketable securities as market prices improved; (c) adoption of a transitional general provisioning framework ahead of Basle II and in line with revised MAS provisioning guidelines (MAS Notice 612). Provision charge for the full year was \$47 million as compared to \$541 million a year ago.

DBS Bank (Hong Kong) Limited

For fourth quarter 2004, net profit after taxation for DBS Bank (Hong Kong) Limited declined 10% from fourth quarter 2003 to \$126 million. The decline was mainly due to lower operating income, higher operating expenses, partly offset by lower provision charge. Compared with 2003, net profit after taxation for the year 2004 increased 27% due to higher operating income and lower provisions. In the fourth quarter 2004, DBS Bank (Hong Kong) Limited divested part of its stake in Banco de Oro Universal Bank, a bank in the Philippines, recording a \$12 million gain^{1/}. The remaining stake was subsequently disposed in first quarter 2005.

- Net interest income was down 4% from fourth quarter 2003 mainly due to the narrower spread between the Prime rate and HIBOR^{2/}, partly offset by a 12% rise in customer loans. Compared to third quarter 2004, net interest income decreased 2% due to continued competitive price pressures, negating a 3% increase in customer loans. Compared to 2003, net interest income for the year increased 5%, mainly due to the widening spread between the Prime rate and HIBOR and growth in customer loans, partly offset by price pressures.
- Non-interest income declined 10% from fourth quarter 2003 mainly due to lower income from sales of treasury investment products. Non-interest income for the year 2004 improved 3%, mainly due to increase in fee and commission income offset by lower income from sales of treasury investment products.
- Operating expenses were 10% higher compared to fourth quarter 2003 and 6% higher than third quarter 2004 due to ongoing investments in people and systems to capture business opportunities. Year-on-year, operating expenses were 8% higher.
- Provision charge decreased 24% compared to fourth quarter 2003. For the full year, provision charge was 47% lower than the year 2003, reflecting the stronger economic environment and property market.

Net Interest Income and Net Interest Margin

Exhibit 1

Group Net Interest Income and Net Interest Margin

Net interest income grew 1% over fourth quarter 2003 but declined 1% from third quarter 2004 to \$636 million in fourth quarter 2004.

- Excluding DTDB's net interest income from fourth quarter 2003, net interest income increased 6% in fourth quarter 2004. This was largely due to growth in interest bearing assets especially in customer loans which grew 13% year-on-year (excluding DTDB), partially offset by lower net interest margin.
- Net interest margin for fourth quarter 2004 was 1.75%, lower than 1.81% in fourth quarter 2003 and 1.83% in third quarter 2004. The decrease was mainly due to the costs of a growing deposit base in Singapore and higher borrowing costs in general in Hong Kong. In addition, short-term interbank-pegged deposit rates rose faster than loan yields. Additional funding costs were also contributed by higher carrying costs for subordinated debts, including a US\$750 million issue that closed during the quarter.

Non-interest income in fourth quarter 2004 declined 9% from fourth quarter 2003 and 13% from third quarter 2004 to \$386 million. For the full year, non-interest income increased 30% to \$2.362 billion. Excluding the \$497 million one-time gains in year 2004, non-interest income was 2% higher.

- Fee and commission income remained strong in fourth quarter 2004. Compared to the year-ago quarter, lower stockbroking fees from quieter regional equity markets was offset by strong growth in investment banking and wealth management fees. Compared to the previous quarter, higher investment banking fees which included income from lead-managing real estate investment trusts was offset by lower wealth management fees. For the year, fee and commission income increased 15% to \$1.013 billion contributed by higher wealth management, stockbroking, investment banking, loan related, and trade and remittance fees.
- Other income was \$120 million in fourth quarter 2004, a 22% fall from the same quarter last year. Net gain on treasury related activities were lower due to lower profits from interest rate and credit derivatives in fourth quarter 2004. Excluding the one-time gains in 2004, other income declined 12% for the year due to lower income from sales of treasury structured investment products and lower net gain on investment securities.
- The ratio of non-interest income to total operating income was 37.8% for the quarter and 47.9% for the year.

- Excluding goodwill amortisation, operating expenses for fourth quarter 2004 increased 10% to \$530 million over fourth quarter 2003 and 8% over third quarter 2004. The increase was mainly due to higher staff costs from bonus accrual in line with the stronger bottom-line performance this year and business expansion. Occupancy expenses were lower in fourth quarter 2004 largely due to write-offs arising from relocation in fourth quarter 2003. Spending on advertising and promotions for retail products were higher with new product launches and branding initiatives in fourth quarter 2004. For the year, operating expenses increased 9% to \$2.006 billion mainly due to higher staff costs, advertising and promotion expenses and technology-related expenses.
- Staff headcount at end December 2004 was 11,454, a 3% increase over end September 2004 as DBS continues to invest in skilled resources to meet its expansion needs.

Net provision of \$31 million was written back in fourth quarter 2004, as compared to a \$82 million charge in fourth quarter 2003 and \$17 million charge in third quarter 2004. For the year, total provision charge decreased 91% to \$47 million.

- Specific provision charge for loans reduced 54% from fourth quarter 2003 to \$36 million in fourth quarter 2004 due to better economic conditions and overall credit quality of the loan portfolio. There was a \$53 million write-back in specific provision for securities, properties and other assets in fourth quarter 2004 due to improved valuations. For the year, total specific provision charge was reduced by 88% to \$52 million.
- There was a \$14 million write-back in general provision in fourth quarter 2004 following the adoption of a transitional general provisioning framework ahead of Basle II and in line with revised MAS provisioning guidelines (MAS Notice 612), as compared to a \$11 million charge in the same quarter last year. For the year, general provision written-back was \$5 million compared to a \$89 million additional provision in 2003.

At December 31, 2004, total assets were \$176 billion.

- Net customer loans grew 4% from end September 2004 to \$69.7 billion at end December 2004, mainly driven by housing loans and loans granted to general commerce sector and financial institutions, investment & holding companies.
- Compared to end September 2004, customer deposits grew 6% mainly due to savings and fixed deposits.
- The Group's loan-to-deposit ratio at end December 2004 was 61.5%. Including DBSH Group's portfolio of non-trading debt securities, the ratio of loan and non-trading debt securities to deposits was 82.0%.

NA : Not applicable

Notes:

^{1/} NPL rate is computed based on total non-bank customer NPLs (excluding non-performing debt securities and contingent items) divided by total gross non-bank customer loans.

^{2/} Regional countries ("RC") include Malaysia, Indonesia, Thailand, Korea and the Philippines.

- The volume of non-performing loans ("NPLs") remained stable at \$1.9 billion between end September 2004 and end December 2004. Out of the \$1.9 billion NPLs, \$0.4 billion or 22% were restructured NPLs.
- Singapore's NPLs was \$1 billion and accounted for 50% of the Group's NPLs, while Hong Kong's NPLs of \$0.5 billion accounted for 25%.
- The ratio of NPLs to the total non-bank loans ("NPL rate") further improved from 2.6% at end September 2004 to 2.5% at end December 2004. The NPL rates for Hong Kong, regional countries and other countries operations improved to 2.0%, 5.6% and 5.0% respectively, at end December 2004 due to a reduction in non-bank NPLs and a higher loan base.

Loan Grading

Of the total \$1.9 billion NPLs at end December 2004, 71% were classified as substandard, 9% as doubtful and the remaining 20% in the loss category. 52% of the NPLs were secured by collateral.

Cumulative Specific and General Provisions

Total cumulative specific and general provisions at end December 2004 were 186.4% of unsecured NPLs, and 88.6% of total NPLs.

DBSH Group operates in four main geographical areas :

- **"Singapore"**, which includes the operations of the Asian Currency Unit.
- **"Hong Kong"**, which includes branch and subsidiary operations in Hong Kong.
- **"Regional countries"**, which includes branch and subsidiary operations in Malaysia, Indonesia, Thailand, South Korea and the Philippines.
- **"Rest of the world"**, which are mainly branch operations in China, India, Taiwan, United States and United Kingdom.

Excluding \$497 million one-time gains reflected under Singapore operations in year 2004, the net profit attributable to members composition would be Singapore 63%, Hong Kong 32%, Regional countries 4% and Rest of the world 1%.

Business Segment Analysis

The business segment results represent the customer segments of the respective businesses and are determined by:

- Income and direct expenses attributable to each customer and other segment; and
- Management accounting policies relating to the allocation of indirect expenses and funds transfer pricing between the central treasury unit and the customer/other segments.

The various customer segments are described below, along with a description of the change in net profit after taxation for fourth quarter 2004 over fourth quarter 2003.

• Consumer Banking

Consumer Banking focuses on providing products and services to individual customers. The products and services offered to customers include credit facilities (mortgage, personal loans, etc.), credit cards, deposit collection, remittance services and asset management products.

The net profit after taxation was in line with fourth quarter 2003.

• Enterprise Banking

Enterprise Banking focuses on providing products and services to small and medium enterprises. The products and services offered to customers include credit facilities (overdraft, factoring/accounts receivable purchase, trade financing, commercial/industrial property financing, hire purchase and government financing and assistance schemes), deposit, payment and collection services and treasury products.

The increase in net profit after taxation (\$7 million, 10%) was mainly attributable to higher interest income from increased loan and deposit volumes and higher deposit margins.

• Investment Banking

Investment Banking caters to the business needs of large corporate customers and financial institutions. The products and services offered to customers include direct lending, advisory banking services, bond issuance, equity financing, syndicated financing, mergers and acquisitions advisory services, debt restructuring advisory services, private equity, nominee and trustee services and cash management services.

The decrease in net profit after taxation (\$23 million, 24%) was mainly due to lower gains from investment securities.

• Treasury and Markets

Treasury and Markets is primarily involved in market making, structuring and trading of financial products including foreign exchange, securities and interest rate/ credit/ equity/ foreign exchange derivatives. Income from treasury products and services relating to customers of other segments is reflected in the respective customer segments.

The decrease in net profit after taxation (\$14 million, 56%) was mainly due to lower treasury gains from interest rate and credit derivatives.

The other segments of the analysis are:

• Funding Portfolio

The Funding Portfolio managed by Treasury and Markets is the net aggregate of the Group's interest earning assets and interest bearing liabilities. The income generated from this portfolio is predominantly interest in nature.

• **Central Operations**

Central Operations encompasses a range of activities resulting from central corporate decisions and the related income and expenses not attributed to business segments. These include the central treasury unit, funding costs of DBSH Group's associated and subsidiary companies and gains/losses on properties as well as certain subsidiaries including stock brokerage and asset management.

The following table analyses the results, total assets and total liabilities by business segments:

**REPORT OF THE AUDITORS
TO THE MEMBERS OF DBS GROUP HOLDINGS LTD (INCORPORATED IN
SINGAPORE)**

We have audited the accompanying financial statements of DBS Group Holdings Ltd ("the Company") and its subsidiaries ("the Group") for the year ended December 31, 2004. These financial statements are the responsibility of the Company's Directors. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Singapore Standards on Auditing. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion,

- (a) the consolidated financial statements of the Group and the balance sheet of the Company are properly drawn up in accordance with the provisions of the Singapore Companies Act, Chapter 50 ("the Act") and Singapore Financial Reporting Standards so as to give a true and fair view of the state of affairs of the Group and of the Company at December 31, 2004, the results, changes in equity and cash flows of the Group for the financial year ended on that date; and
- (b) the accounting and other records required by the Act to be kept by the Company and by those subsidiaries incorporated in Singapore of which we are the auditors have been properly kept in accordance with the provisions of the Act.

4. Financial Derivatives

Financial derivatives are financial instruments whose characteristics are derived from the underlying assets, or from interest and exchange rates or indices. These include forwards, swaps, futures and options.

The following tables summarise the contractual or underlying principal amounts of derivative financial instruments held or issued for trading and non-trading purposes. The notional or contractual amounts of these instruments indicate the volume of transactions outstanding at the balance sheet date; they do not represent amounts at risk.

In the financial statements, trading derivative financial instruments are revalued on a gross position basis and the unrealised gains or losses are reflected in "Other assets" or "Other liabilities" respectively. Non-trading derivative financial instruments are accounted for on an accrual basis.

FULL-YEAR DIVIDEND RATE RISES 33% TO 40 CENTS PER SHARE

SINGAPORE, February 18 2005 - DBS Group Holdings today reported a 97% increase in net earnings for full-year 2004 to a record \$2.02 billion. Net profits in the fourth quarter rose 10% to \$321 million.

The full-year performance was augmented by \$497 million in one-time gains recorded in the second quarter. Excluding these gains, net profits of \$1.52 billion from continuing operations were still the highest ever and represented a 48% rise over the whole of 2003. It surpassed the previous record of \$1.39 billion set in 2000. Return on equity was the highest in four years at 12.7%.

DBS Bank (Hong Kong)'s full year net profits rose 27% to \$534 million as operating income grew 4% and provision charges fell 47%.

Fourth-quarter earnings were supported by continued loan growth and write-backs in provisions for investment securities, offsetting lower treasury income that resulted from sluggish market conditions worldwide.

DBS Vice Chairman and CEO Jackson Tai said: "Leaving aside the one-time gains, the drive towards record net earnings started more than eight quarters ago when we dedicated ourselves to growing recurring income from our customer franchise, including that from our consumer and SME loan book.

"Strong loan growth and our broad base of fee income helped cushion the slowdown in market activity that affected many financial institutions in the latter part of last year. Our larger asset base, more diversified business platform, and a continued strong pipeline of business will support DBS' growth, whether from our twin hubs of Singapore and Hong Kong or from our growing presence in Greater China and the rest of South and Southeast Asia."

Net interest income declines marginally, loans continue to grow

Fourth-quarter net interest income declined 1% from the previous quarter to \$636 million but was 1% higher compared to the fourth quarter of 2003. Net interest margins eased eight basis points from 1.83% in the third quarter to 1.75%, mainly

attributable to the costs of a growing deposit base in Singapore and higher borrowing costs in general in Hong Kong. In addition, short-term, interbank-pegged deposit rates rose faster than loan yields. Additional funding expenses were also incurred by higher carrying costs for subordinated debt including a US\$750 million issue that closed during the quarter.

Loans grew 4% during the quarter to \$69.7 billion. The expansion was led by corporate, SME and consumer loans in Singapore, as well as corporate and SME loans in Hong Kong and the region.

For the whole of 2004, DBS' loan book grew 8%, with margins stable at 1.79% while full-year net interest income rose 8% to \$2.57 billion. The loan-deposit ratio was 62% compared to 60% in December 2003. Adjusting for the deconsolidation of DTDB, loans rose 13% during the year and net interest income by 10%.

Fee income climbs 15% for full year from all-round business growth

Fourth-quarter fee income was stable at \$249 million compared to a year ago as well as the previous quarter. Against fourth quarter 2003, a drop in stockbroking revenues and loan-related fees was compensated by higher income from investment banking and wealth management sales.

Sales of wealth management products slowed in the fourth quarter as uncertainties in the financial markets and prospects of a slowdown in the global economy dampened investors' sentiment.

Sales of unit trusts and treasury products for the fourth quarter totalled \$1.80 billion, down 19% from \$2.22 billion in the third quarter. Compared to 2003, total sales for last year were flat at \$8.81 billion.

For the full year, fee income rose 15% to \$1.01 billion with increases chalked up in almost all categories. Fees from investment banking rose 25% to \$104 million, trade and remittances were up 15% to \$128 million, loan-related income was up 18% to \$183 million, stockbroking grew 17% to \$198 million, and wealth management jumped 47% to \$132 million.

Fourth-quarter net gain on treasury activities of \$93 million fell 23% from a year ago and 36% from the previous quarter due to the year-end slowdown in customer flows and a further flattening of the yield curve amid rising interest rates. For the full year, net gain on treasury activities fell 9% to \$590 million.

Operating expenses rise 10% on higher wage and advertising costs

Operating expenses for the fourth quarter increased 10% from the previous year to \$530 million. Wage costs for the quarter rose 17% to \$253 million as a result of higher bonus accruals and headcount. Additional expenses were also incurred for advertising and promotions for consumer banking products both in Singapore and Hong Kong.

For the full year, operating expenses of \$2.01 billion were 9% higher than in 2003. The cost-income ratio (excluding one-time gains) rose from 44% in 2003 to 45%. Headcount increased 10% to 11,454 and wage costs by 15% to \$953 million compared to 2003 (after adjusting for the deconsolidation of DTDB) but staff levels remained 9% below the peak in 2001. A \$25 million or 9% rise in technology costs was offset by lower occupancy costs.

NPLs fall to 2.5% with provision coverage at 89%

NPLs fell to 2.5% of total loans compared to 5.2% in December 2003. Total non-performing assets, including non-performing debt securities and contingent liabilities, amounted to \$1.92 billion, compared to \$3.78 billion in December 2003. 71% of non-performing assets were classified as sub-standard, the least severe category.

A net specific provision write-back of \$17 million was made during the quarter. It included a \$53 million write-back for investment securities as better economic conditions resulted in improved valuations. In addition, there was a net general provision write-back of \$14 million during the quarter, reflecting the implementation of a transitional framework for general provisions place ahead of the adoption of Basle II. The general provision write-back was also in line with recently released guidelines from the Monetary Authority of Singapore. Provision coverage for non-performing assets, including debt securities and contingent liabilities, stood at 89% compared to 63% in December 2003.

The capital adequacy ratio (CAR) stood at 15.8%, with the tier-1 ratio at 11.3%. Both ratios were above the minimum required by MAS. The tier-2 ratio of 4.5% included US\$750 million of subordinated debt from October 2004.

The Board of Directors declared a final dividend of 22 cents per share, which together with the interim payout of 18 cents per share brings the full dividend rate to 40 cents. This is a 33% increase over the 30 cents per share paid out for full-year 2003.
