Gazprom Announces Launch of Benchmark-Size 144A Bond Offering

Moscow, 14 February 2003. OAO Gazprom, the world's largest producer and exporter of natural gas and supplier of approximately 25% of Europe's natural gas, today announced that it will launch a bond offering in the United States and internationally pursuant to exemptions from the registration requirements of the U.S. Securities Act of 1933 afforded by Rule 144A and Regulation S thereunder. The company will begin investor presentations in Europe on February 17 and in the United States on February 18. The bonds will have a maturity of ten years. The proceeds of the offering will be used for general corporate purposes, including in particular for the retirement of short-term indebtedness. Dresdner Kleinwort Wasserstein and Morgan Stanley have been appointed as joint bookrunners.

This announcement is being distributed only to, and is directed at (a) persons outside the United Kingdom, (b) persons who have professional experience in matters relating to investments who fall within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001 (the "order") and (c) high net worth entities, and other persons to whom it may otherwise lawfully be communicated, falling within Article 49(2) of the Order (all such persons together being referred to as "relevant persons"). This announcement must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this announcement relates is available only to relevant persons and will be engaged in only with relevant persons. Stabilisation/FSA.

This announcement is not for publication or distribution or release in the United States of America (including its territories and possessions, any State of the United States and the District of Columbia). This announcement does not constitute or form part of an offer or solicitation of an offer to purchase or subscribe for securities in the United States or any other jurisdiction. The securities referred to herein have not been and will not be registered under the U.S. Securities Act of 1933, as amended, and may not be offered or sold in the United States or to or for the benefit of U.S. persons, except pursuant to an applicable exemption from registration. No public offering of securities is being made in the United States.

GAZPROM REPORTS IAS RESULTS FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2002

Moscow - 14 February 2003 - OAO Gazprom today reported unaudited consolidated interim condensed financial results under IAS 34 'Interim Financial Reporting' for the three and nine months ended 30 September 2002.

The following table sets forth a summary unaudited consolidated interim condensed statement of operations for the three and nine months ended 30 September 2002 compared with the same periods in 2001. All items are presented in millions of Russian roubles in terms of the equivalent purchasing power of the rouble as of 30 September 2002, except as noted.

ended	Three months ended		Nine months
	30 September		30
September	2002	2001	2002
2001			
Sales (net of excise tax and VAT) 510,307	128,126	134,242	420,396

Net profit 37,206	7,047	25,607	15,963
Basic and diluted earnings per share 1.78 (in Roubles)	0.34	1.22	0.76

Revenues for the nine months ended September 30, 2002 were RR 420,396 million or 17.6% lower than in 2001 due to a decrease in revenues from sales of natural gas sold to Europe and a general decrease in revenues from sales of gas condensate and oil and gas products. Revenues for the three months ended September 30, 2002 were RR128,126 million or 4.6% lower than the same quarter in 2001.

The details of our sales prices and volumes for the three and nine months ended September 30, 2002 and 2001 are disclosed in the following table:

months ended RR'million (unless otherwise indicated) September 30	Three months ended		Nine
	September 30

Total sales (net of excise tax and VAT)	128,126	134,242	420,396
510,307			

The average price of gas exported to Europe for the nine months ended September 30, 2002 decreased by 23.4% compared to the nine months ended September 30, 2001 following the decrease in U.S.dollar oil prices in the second half of 2001. The 3 bcm or 3.3% increase in volumes of sales of natural gas to Europe for the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001 was primarily due to increased volumes sold to Germany and Turkey under existing long-term contracts. The smaller decline in export gas prices relating to the third quarter of 2002 reflects partial recovery of oil prices earlier in 2002 which increased our prices in the third quarter of 2002.

In the third quarter of 2002 price of sales of natural gas to FSU countries increased primarily due to the 34.0% increase in the contract price of "transit gas" sales to Ukraine. Volumes of sales of natural gas to the Former Soviet Union countries increased by 3 bcm or 10.3% primarily due to a 17.6% increase in shipment volumes to Ukraine in the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001.

The decrease in volumes of sales of natural gas in the domestic Russian market in the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001 was primarily due to a 6 bcm decrease in gas sales volumes by Sibur, which substantially reduced its operations at the end of 2001 and during the first six months of 2002. Sibur increased its activity in the third quarter of 2002 after reaching an amicable agreement with its creditors but this increase was insufficient to offset the decrease in the first six months of 2002.

Sales of gas condensate and oil and gas products decreased primarily due to the reduction in operations at Sibur at the end of 2001 and during the first six months of 2002.

Our operating expenses decreased by RR 18,623 million, or 5%, to RR 325,550 million in the nine months ended September 30, 2002 compared to the same period in 2001, primarily due to decrease of processing services and purchased oil and gas products and provision expenses. Other costs generally remained at approximately the same levels as last year.

Our finance costs increased by RR 16,005 million in the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001 principally as a result of lower gains on the restructuring of tax liabilities which, in 2001, offset our interest expense. Interest expense was RR 24,364 million for the nine months ended September 30, 2002 compared to RR 29,047 million for the nine month period ended September 30, 2001 due to a decrease in interest expense on taxes payable, following the reduction in the amount of overdue taxes payable and our borrowing costs. Our net finance benefit decreased by RR 14,151 million in the three months ended September 30, 2002 compared to the three months ended September 30, 2001 principally as a result of lower gains on restructured tax liabilities, which offset our interest expense for the corresponding period in the previous year.

Profits tax expense decreased by RR 72,148 million or 45% in the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001. Our overall tax rate was 84% and 82% for the nine months ended September 30, 2002 and 2001. In the three months ended September 30, 2002 compared to 2001 profits tax expense decreased by RR 2,788 million or 13.2% primarily due to the decrease in IAS profits.

Our net debt balance (defined as short-term borrowings and current portion of long-term borrowings, short-term promissory notes payable, long-term borrowings,

long-term promissory notes payable and restructured tax liabilities less cash and cash equivalents and balances of cash and cash equivalents restricted as to withdrawal under the terms of certain borrowings and other contractual obligations) at September 30, 2002 compared to December 31, 2001 decreased by RR 9,268 million or 2.2% from RR 427,748 million to RR 418,480 million. Our net debt balance, at September 30, 2002 compared to June 30, 2002 decreased by RR 12,498 million or 2.9% from RR 430,978 million to RR 418,480 million.

OAO Gazprom is the world's largest natural gas company, and the world's largest publicly traded hydrocarbons company, in terms of reserves, production and transportation.

LUKOIL AND GAZPROM AGREED ON GAS SUPPLIES

Today Vagit Alekperov, President of OAO LUKOIL ("LUKOIL"), and Alexei Miller, Chairman of the Board of OAO Gazprom ("Gazprom"), signed a cooperation agreement for gas supplies from Nakhodkinskoye field of Bolshekhetskaya Depression (Yamalo-Nenets autonomous district).

The parties agreed that LUKOIL is to sell to Gazprom up to 0.75 bln. cu. m. of gas in the 4<sup>th</sup> quarter of 2005 and up to 8 bln. cu. m. of gas - in 2006. Gazprom committed to pay for gas and its transport via the Russian Unified gas supply system.

The document also determines the pricing formula according to which Gazprom will be buying gas from Nakhodkinskoye field at the Yamburg compressor station.

This Agreement shall be an additional part of the general agreement on strategic partnership between LUKOIL and Gazprom for 2002-2005. The general agreement confirms, in particular, the joint implementation of projects on exploration and development of oil and gas fields in Yamalo-Nenets autonomous district, Nenets autonomous district and Russian sector of the Caspian Sea.

"The agreement which has been signed today demonstrates a significant expansion of cooperation between two major Russian energy companies. I am confident that this document lays a foundation for a civilized gas market in the country," said Alexei Miller, Chairman of the Board of OAO Gazprom.

"Today's event is another step on our way to implementing joint projects. LUKOIL's cooperation with Gazprom will be strengthened further in the future as the Company becomes one of the largest gas producers", said Vagit Alekperov, President of OAO LUKOIL.

Information Notice  
on Holding Annual General Shareholders' Meeting  
of OAO Gazprom

The Board of Directors of Open Joint Stock Company Gazprom (the company is located at: 16, Nametkina st., Moscow, Russian Federation) informs of the holding of the OAO Gazprom General Shareholders' Meeting on June 27, 2003. The meeting will be held at the location of the Company in the conference hall of the CD Building.

The meeting will begin at 10 a.m. The meeting will be held in the form of a joint presence of shareholders to discuss the items of the agenda and adopt decisions on matters put to vote.

The list of shareholders entitled to participate in the General Shareholders' Meeting has been drawn up on the basis of the OAO Gazprom shareholders' register as of the beginning of the operation day of May 12, 2003.

Participants will be registered by the Counting Commission on June 25, from 10 a.m. to 5 p.m. and on June 27, from 9 a.m. at:

Conference Hall of the CD Building, 16, Nametkina st., Moscow, Russian Federation.

Phone number of the Counting Commission is (095) 719-40-15.

In order to be registered, a meeting participant shall produce:

- a shareholder (physical person) - an identifying document;
- a representative of a shareholder (physical person) - a power of attorney issued by the shareholder and a document identifying the bearer;
- a representative of a shareholder (legal entity) - a power of attorney issued by the legal entity and a document identifying the bearer;
- head of a legal entity - company shareholder - a document authorizing him/her to participate in the meeting and an identifying document;
- successors to persons included in the list of persons entitled to participate in the meeting shall also produce documents certifying their powers and identity.

As of May 12, 2003, the OAO Gazprom shareholders' register includes around 500 thousand share owners, residing in the Russian Federation and abroad, which makes it hard to invite all shareholders to participate in the Meeting.

Considering the above, shareholders are proposed to exercise their right to participate in the annual general shareholders' meeting through their representatives authorized by written powers of attorney or by delivering to the Company filled in ballot papers. The filled in ballot papers shall be sent by mail or delivered personally to the following address: OAO Gazprom, 16, Nametkina St., 117997 Moscow, V-420, GSP-7. Only ballot papers received by the Company prior to 6.00 p.m. on June 24, 2003 will be counted for determining the quorum present at the meeting and for drawing up the results of the vote.

Agenda of the meeting:

1. On approval of the Annual Report, annual accounting statements, including profit and loss report (profit and loss accounts) of the Company, as well as distribution of profit, including payment (declaration) of dividends, and losses of the company based on the results of the year 2002.
2. On the amount of, time for and form of payment of dividends on all types of the company shares.
3. On the remuneration to the members of the Board of Directors and internal Audit Commission.
4. On approval of the company's external auditor.
5. On introduction of amendments to the Regulation on the OAO Gazprom General Shareholders' Meeting .
6. On introduction of amendments and additions to the company's Charter.
7. On election of the company's internal Audit Commission.
8. On election of the company's Board of Directors.

Information (materials) submitted in preparation to the meeting may be reviewed starting from June 6 at the premises of OAO Gazprom at the following address: 16, Nametkina St., Moscow, Russian Federation; at the regional depositaries of AB Gazprombank (ZAO) and at the specialized registrar (the holder of the register) at the following address:

71/32, ul. Novocheryomushkinskaya, 117884, Moscow; shareholders -employees of OAO Gazprom may also review the materials at the place of their employment.

RECOMMENDATIONS

of the Board of Directors on the Payment of Annual Dividends  
Based on the Results of the OAO Gazprom Activities  
in 2002

The OAO Gazprom Board of Directors recommends to the Annual General Shareholders' Meeting to adopt a decision on the payment of annual dividends based on the results of the Company's activities in 2002 in the amount of 0.40 rubles per ordinary share with the face value of 5 rubles and to fix December 31, 2003 as the last day for the payment of dividends.

The dividends have been calculated in accordance with the OAO Gazprom dividend policy adopted by decision of the Board of Directors No. 15 of April 11, 2001.

LUKOIL AND GAZPROM SIGNED GAS SUPPLY AGREEMENT

Today Vagit Alekperov, President of OAO LUKOIL ('LUKOIL' or 'the Company'), and Alexei Miller, Chairman of the Board of OAO Gazprom ('Gazprom'), signed a gas supply agreement ('Agreement').

In accordance with this Agreement, LUKOIL will sell to Gazprom up to 0.75 bcm of natural gas in 2005 and in 2006 - up to 8 bcm of natural gas produced at Nakhodkinskoye field of Bolshekhetskaya Depression (Yamalo-Nenets Autonomous District).

Gazprom committed to pay for gas and its transport via the Unified gas supply system of Russia.

The Agreement also determines the pricing formula according to which Gazprom will purchase gas extracted at Nakhodkinskoye field at the custody metering unit of the Yamburg compressor station.

Gas price is set at the level of not lower than USD22.5 per thou. cubic m (VAT excluded).

In 2002 LUKOIL produced 1.19 bcm of natural gas. In accordance with the Company's plans, natural gas production is likely to reach 38.5 bcm by 2013.

Information Statement  
on the Holding  
of an Annual General Shareholders' Meeting  
of OAO Gazprom

The Board of Directors of Open Joint Stock Company Gazprom (the company is located at: 16 Nametkina st., Moscow, Russian Federation) informs of the holding of OAO Gazprom's annual General Shareholders' Meeting on June 25, 2004. The meeting will be held at the location of the Company in the conference hall of the CD Building.

The meeting will begin at 10 a.m. The meeting will be held in the form of a joint presence of shareholders to discuss the items of the agenda and adopt decisions on matters put to vote.

The list of shareholders entitled to participate in the annual General Shareholders' Meeting has been drawn up on the basis of the OAO Gazprom shareholders' register as of the end of the operation day of May 7, 2004.

Participants in the meeting will be registered by the Counting Commission on June 23 from 10 a.m. to 5 p.m. and on June 25 from 9 a.m. at: Conference Hall of the CD Building, 16 Nametkina st., Moscow, Russian Federation.

Phone number of the Counting commission is (095) 719-40-15.

In order to be registered, a meeting participant shall produce:

- a shareholder (physical person) - an identifying document;
- a representative of a shareholder (physical person) - a power of attorney issued by the shareholder and a document identifying the representative;
- a representative of a shareholder (legal entity) - a power of attorney issued by the legal entity and a document identifying the representative;
- head of a legal entity that is a shareholder in the company - a document confirming his/her authority to participate in the meeting and an identifying document;
- successors to persons included in the list of persons entitled to participate in the meeting shall also produce documents confirming their powers as successors,

As of May 7, 2004, the OAO Gazprom shareholders' register includes around 500 thousand share owners; residing in the Russian Federation and abroad, which makes it difficult for all of the shareholders to participate in the meeting.

Considering the above, it is recommended that shareholders exercise their right to participate in the annual General Shareholders' Meeting through their representatives authorized by written powers of attorney or by delivering filled-in voting ballots to the Company. Ballots may be sent by mail or delivered personally to the following address: OAO Gazprom, 16 Nametkina st., Moscow. V-420, GSP-7, 117997. Only ballots received by the Company prior to 6.00 p.m. on June 22, 2004 will be taken into account in determining whether the quorum is present at the meeting and in drawing up the results of the vote.

Agenda of the Meeting:

1. Approval of the annual report, the annual accounting statements, including the profit and loss report (profit and loss accounts) of the Company, as well as distribution of profit, including payment (declaration) of dividends, and losses of the Company based on the results of the fiscal year.
2. The amount of, time for and form of payment of annual dividends on the Company's shares.
3. Remuneration of members of the Board of Directors and Audit Commission of the Company
4. Approval of the Company's external auditor.
5. Introduction of amendments and additions No. 1 to the Charter of the Company.
6. Introduction of amendments and additions No. 2 to the Charter of the Company.
7. Introduction of amendments and additions No. 3 to the Charter of the Company.
8. Election of members of the Board of Directors of the Company.
9. Election of members of the Audit Commission of the Company.
10. Approval of interested-party transactions that may be entered into by OAO Gazprom in the future in the ordinary course of business.

The information (materials) to be made available in preparation for the meeting may be reviewed starting from June 5 at the premises of OAO Gazprom at the following address: 16 Nametkina st., Moscow, Russian Federation; at the regional depositories of AB Gazprombank (ZAO) and at the specialized registrar (the holder of the register) at the following address: 71/32 Novocheryomushkinskaya st., Moscow, 117420; the shareholders who are OAO Gazprom employees may also review the materials at the place of their employment.

OAO Gazprom launched a debut bond tranche in euro

On September 16, 2003 OAO Gazprom launched and priced a 1 billion bond due 2010 as the first tranche under a US\$5 billion programme for the issuance of Loan Participation Notes.

The transaction was priced at par with a coupon of 7.8%. Deutsche Bank and UBS Investment Bank acted as joint arrangers of the Programme and lead managers of the issue.

Deal highlights

- The issue was targeted at Euro investors and achieved a very broad geographical distribution. This is the largest ever Euro denominated corporate bond by an emerging markets issuer.
- Largest Euro denominated Eurobond from Russian and largest corporate Euro denominated transaction
- First Euro deal by Gazprom
- The longest maturity in euro for Russian issuer
- First Russian corporate EMTN Programme.

May 26, 2004 GAZPROM'S BOARD OF DIRECTORS REVIEWED RUBLE BOND PLACEMENT ISSUE

Gazprom's Board of Directors resolved yesterday to place three A ruble bond issues, worth RUR 5 billion each and with a maturity of 3, 4 and 5 years, respectively.

The bonds are planned to be floated in 2004/2005, subject to the market situation and the corporate cash needs.

Gazprom intends to arrange for simultaneous registration of the 3 above-mentioned bond issues and, thus, will obtain an opportunity to swiftly respond to potential changes on the market and to decide on the floatation date of the issue with the best parameters under given market conditions.

The funds attracted will be used for financing of general corporate needs.

Reference:

Gazprom placed its 1st A1 RUR 3 billion bond issue in July 1999 and repaid it in April 2003. The 2nd A2 RUR 5 billion bond loan was placed in November 2002.

On 3 February 2004, Gazprom successfully placed the A3 RUR 10 billion bonds with a 3-year maturity. The bonds were floated at 100.69% of the face value, which is 8% of effective annual yield. The transaction became the largest loan ever taken in the history of the Russian capital market.

GAZPROM REPORTS ITS CONSOLIDATED FINANCIAL RESULTS  
UNDER INTERNATIONAL FINANCIAL REPORTING STANDARDS  
FOR THE YEAR ENDED 31 DECEMBER 2003

On 12 July 2004 OAO Gazprom issued its audited consolidated financial statements prepared in accordance with the International Financial Reporting Standards (IFRS) for the year ended 31 December 2003.

The table below presents the condensed statement of operations for 2003 compared to 2002. As the characteristics of the economic environment of the Russian Federation indicate that hyperinflation has ceased, effective from 1 January 2003, we no longer apply the provisions of IAS 29 "Financial Reporting in Hyperinflationary Economies". Accordingly, no adjustment for the effects of changes in general purchasing power have been made for periods starting from 1 January 2003 and all RR amounts related to financial information for periods prior to 2003 are expressed in constant RR as of 31 December 2002 purchasing power, unless otherwise stated. All amounts are expressed in millions of Russian Roubles unless otherwise stated.

PRESS-RELEASE

Summary of the working group meeting  
On consolidation of the assets of OJSC Gazprom and OJSC Rosneft

Today Chairman of Gazprom's Management Committee A.B. Miller held a briefing with Gazprom's managers of main Divisions of the Company. During the briefing Mr Miller notified the managers that the Government of Russian Federation had proposed a scenario to increase its stake in OJSC Gazprom by means of share transfer. Such increase will be realised by the transfer of the shares of the OJSC Rosneft, which will become a 100% owned subsidiary of Gazprom.

The working group tasked with the second stage Gazprom reform was assigned with responsibility to prepare the Action Plan on Integration of Assets of OJSC Gazprom and OJSC Rosneft.

At present time, the Government of Russian Federation and Gazprom commenced joint discussions on a scenario of such exchange on the basis of the market principles.

Information Statement  
on the Holding  
of an Extraordinary General Shareholders' Meeting  
of OAO Gazprom

The Board of Directors of Open Joint Stock Company Gazprom (the company is located at: 16 Nametkina st., Moscow, Russian Federation) informs of the holding of OAO Gazprom's Extraordinary General Shareholders' Meeting in the form of absent voting (the completed voting ballots to be submitted through November 16, 2004).

The list of shareholders entitled to participate in the Extraordinary General Shareholders' Meeting has been drawn up on the basis of the data from OAO Gazprom shareholders' register as of the end of the operation day of September 30, 2004.

Phone number of the Counting Commission is (095) 719-40-15.

You can exercise your right to vote by sending to OAO Gazprom completed voting ballots signed personally or by your authorized representative. The ballot signed by authorized representative shall be sent together with documents confirming the right of the representative to act on behalf of the shareholder or the duly certified copies of such documents. Ballots may be sent by mail or delivered personally to the following address: OAO Gazprom, 16 Nametkina St., Moscow, V-420,GSP-7, 117997.

Successors of the persons included in the list of persons entitled to participate in the meeting shall also submit documents confirming their powers as successors.

Agenda of the Meeting includes one topic: "Introduction of the amendments to the Charter of OAO Gazprom". The proposed amendments intend to exclude from the Charter the obligation of the shareholder who acquires more than 30% of issued shares of OAO Gazprom to repurchase the shares of other shareholders (the obligation applies upon every subsequent acquisition of 5% of OAO Gazprom shares by such shareholder).

The information (materials) to be made available in the course of the preparation for the meeting may be reviewed starting from October 21 at the premises of OAO Gazprom at the following address: 16 Nametkina st, Moscow, Russian Federation and at the specialized registrar (the holder of the register) at the following address: 71/32 Novocheryomushkinskaya st., Moscow, 117420; the shareholders who are OAO Gazprom employees may also review the materials at the place of their employment.

GAZPROM ruble bond issue of A5 series for 5 bn. rub.

On October 12, 2004 Gazprom issued ruble bonds of A5 series. The bonds are issued for the amount of 5 bn. Rubles with 3 years maturity, nominal value - 1000 rub. each.

At the Moscow International Currency Exchange an auction was held with the aim to determine the coupon rate which was set at 7,58% to be paid every 182 days. There were 120 orders filed by the investors for the amount exceeding 9 bn. rub. of which 73 orders were satisfied.

The bond issue was arranged by Renaissance Capital Investment Group and OAO "Rosbank". IC Horizon and UFG were the co-arrangers and OAO "Federal Fund Corporation" acted as the financial consultant of the bond issue.

Raised financial resources will be used to finance capital expenditures for the reconstruction of existing production capacities and to realize new prospective projects. The proceeds from the bond issue will be also allocated to refinance the portion of the current debt and for optimization of the company's debt profile.

30 November 2004

Joint-Stock Company "Gazprom"  
PRESS-RELEASE

Management Committee of OAO Gazprom today examined proposals from OOO Gazpromneft as well as from Deutsche Bank (the Gazprom's adviser on strategic development of the oil business segment) regarding participation of OOO Gazpromneft in the auction to buy 76.79% of shares in AO Yuganskneftegaz. The Committee agreed upon OOO Gazpromneft to file the final binding offer for the amount defined according to the economic effectiveness of such purchase.

The Management Committee also found advisable for Gazprom to raise funding for the purposes of lending the funds to OOO Gazpromneft, which will take part in the auction to buy the shares in AO Yuganskneftegaz, This should be followed by adjustments made to Gazprom's budget for the years 2004-2005.

The Management Committee decided to submit for consideration of the Company's Board of Directors the issue to approve transactions concerned with participation of OOO Gazpromneft in the auction to buy 76.79% of shares in AO Yuganskneftegaz.

GAZPROM PLACED THE A4 SERIES BOND ISSUE WORTH RUR 5 BILLION

On 16 February 2005 Gazprom placed a 5 billion rouble five-year bond series A4 with face value of 1000 rouble.

The coupon yield payable every 182nd day was set at 8.22% as a result of competitive evaluation at the Moscow Inter-Bank Currency Exchange. Investors placed 98 bids for the total sum exceeding RUR 10 billion. During the auction, 77 bids were accepted.

Renaissance Capital Investment Group and Rosbank acted as managers of the issue. Co-managers were Horizon Investment Company and United Financial Group, with the Federal Stock Corporation involved as a financial consultant.

The raised financing will be used for financing capital expenditures to maintain current operational level, the new projects to be introduced, the short-term debt servicing and the optimization of debt structure.

OFFICE OF THE  
CORPORATE

Salomon Brothers AG (the "Bank") is issuing an aggregate principal amount of U.S.\$500,000,000 9.125 per cent. Fixed-Rate Loan Participation Notes due 2007 (the "Notes") for the sole purpose of financing a 5-year loan (the "Loan") to Open Joint Stock Company Gazprom (the "Borrower" or "Gazprom") pursuant to a loan agreement dated 19 April 2002 (the "Loan Agreement") between the Bank and the Borrower. The Bank will charge by way of first fixed charge as security for its payment obligations in respect of the Notes its rights and interests as lender under the Loan Agreement to The Bank of New York as trustee (the "Trustee"), for the benefit of the holders of the Notes (the "Noteholders") and will transfer its administrative rights under the Loan Agreement to the Trustee.

In each case where amounts of principal, interest and additional amounts (if any) are stated to be payable in respect of the Notes, the obligation of the Bank to make any such payment shall constitute an obligation only to account to the Noteholders, on each date upon which such amounts of principal, interest and additional amounts (if any) are due in respect of the Notes, for an amount equivalent to all principal, interest and additional amounts (if any) actually received by or for the account of the Bank pursuant to the Loan Agreement. The Bank will have no other financial obligation under the Notes. **Noteholders will be deemed to have accepted and agreed that they will be relying solely and exclusively on the credit and financial standing of the Borrower in respect of the financial servicing of the Notes.**

Interest on the Notes will be payable semi-annually in arrear on 25 April and 25 October in each year commencing on 25 October 2002 as described under "Terms and Conditions of the Notes — Interest". The Notes will bear interest of 9.125 per cent. per annum.

Except as set forth herein (see "Taxation"), payments in respect of the Notes will be made without any deduction or withholding for or on account of taxes of the Russian Federation or the Federal Republic of Germany. The Loan may be prepaid at its principal amount, together with accrued interest, at the option of the Borrower upon the Borrower or the Bank being required to deduct or withhold any such Russian or German taxes from payments to be made by them in respect of the Notes or pursuant to the Loan Agreement, or following enforcement of the security created in the Trust Deed and upon the Borrower or the Trustee being required to deduct or withhold any taxes of the Russian Federation or the jurisdiction in which the Trustee is then resident. The Loan may also be prepaid if it becomes unlawful for the Loan or the Notes to remain outstanding, as set out in the Loan Agreement, and thereupon (subject to the receipt of the relevant funds from the Borrower) the principal amount of all outstanding Notes will be prepaid by the Bank, together with accrued interest.

**AN INVESTMENT IN THE NOTES INVOLVES A HIGH DEGREE OF RISK. SEE "INVESTMENT CONSIDERATIONS".**

Application has been made to list the Notes on the Luxembourg Stock Exchange.

**THE NOTES HAVE NOT BEEN NOR WILL BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE "SECURITIES ACT"), OR WITH ANY SECURITIES REGULATORY AUTHORITY OF ANY STATE OR OTHER JURISDICTION OF THE UNITED STATES AND ACCORDINGLY MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, U.S. PERSONS EXCEPT IN CERTAIN TRANSACTIONS EXEMPT FROM OR NOT SUBJECT TO THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT.**

The Notes will be represented by a global Note (the "Global Note"), without interest coupons, which will be deposited with a common depository for Euroclear Bank S.A./N.V., as operator of the Euroclear System ("Euroclear") and Clearstream Banking, société anonyme ("Clearstream, Luxembourg"), on or about the Closing Date, 25 April 2002. Ownership interests in the Global Note will be shown on, and transfers thereof will be effected only through, records maintained by Euroclear and Clearstream Luxembourg and their respective participants. Notes in definitive form will be issued only in limited circumstances.

Gazprom, having made all reasonable enquiries, confirms that (i) this Offering Circular contains all information with respect to Gazprom, Gazprom and its subsidiaries taken as a whole (the "Group"), the Loan Agreement and the Notes that is material in the context of the issue and offering of the Notes; (ii) the statements contained in the Offering Circular relating to Gazprom and the Group are in every material particular true and accurate and not misleading; (iii) the opinions, expectations and intentions expressed in this Offering Circular with regard to Gazprom and the Group are honestly held, have been reached after considering all relevant circumstances and are based on reasonable assumptions; (iv) there are no other facts in relation to Gazprom, the Group, the Loan Agreement or the Notes the omission of which would, in the context of the issue and offering of the Notes, make any statement in this Offering Circular misleading in any material respect; and (v) all reasonable enquires have been made by Gazprom to ascertain such facts and to verify the accuracy of all such information and statements. Gazprom accepts responsibility accordingly. No representation or warranty, express or implied, is made by Salomon Brothers International Limited ("SBIL"), Credit Suisse First Boston (Europe) Limited, the Bank or any of their affiliates or any person acting on their behalf or any of the other Managers (as defined in "Subscription and Sale" below) as to the accuracy or completeness of the information contained in this document, and none of such persons has attempted to verify such information. SBIL, however, accepts responsibility for all information with respect to the Bank.

Information contained under the headings "Overview of the Russian Federation" and "Overview of the Russian Gas Industry and its Regulation" includes extracts from information and data publicly released by official and other sources and Gazprom accepts responsibility for accurately reproducing such information and data but accepts no further responsibility in respect of such information and data.

This Offering Circular contains certain forward-looking statements. Such statements reflect significant assumptions and subjective judgments by Gazprom's management and those assumptions and judgments may or may not prove to be correct. There can be no assurance that the future events anticipated by Gazprom's management will occur.

This Offering Circular does not constitute an offer of, or an invitation by or on behalf of the Bank, Gazprom or the Managers to subscribe or purchase, any Notes. The distribution of this Offering Circular and the offering of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Offering Circular comes are required by Gazprom, the Bank and the Managers to inform themselves about and to observe any such restrictions. None of the Bank, Gazprom or the Managers has authorised any offer of Notes to the public in the United Kingdom within the meaning of the Public Offers of Securities Regulations 1995 (the "Regulations"). Notes may not lawfully be offered or sold to persons in the United Kingdom except in circumstances which do not result in an offer to the public in the United Kingdom within the meaning of the Regulations or otherwise in compliance with all applicable provisions of the Regulations. For a description of certain further restrictions on offers and sales of Notes and distribution of this Offering Circular, see "Subscription and Sale" below.

No person is authorised to provide any information or to make any representation not contained in this Offering Circular and any information or representation not so contained must not be relied upon as having been authorised by or on behalf of the Gazprom, the Bank, the Trustee, or the Managers. The delivery of this document at any time does not imply that the information contained in it is correct as at any time subsequent to its date.

In this Offering Circular, references to "Roubles" and "RUR" are to the lawful currency for the time being of Russia, references to "U.S. dollars", "dollars", "U.S.\$" and "\$" are to the lawful currency for the time being of the United States of America, references to "DM" are to the former currency of the Federal Republic of Germany and references to "euro" refer to the currency introduced at the start of the third stage of European economic and monetary union. This Offering Circular contains conversions of certain amounts into dollars at specified rates solely for the convenience of the reader. No representation is made that the Rouble or dollar amounts referred to herein could have been or could be converted into Roubles or dollars, as the case may be, at these rates, at any particular rate or at all. Any discrepancies in the tables herein between the amounts listed and the total thereof are due to rounding.

Save where indicated to the contrary, all statements with respect to A, B and C<sub>1</sub>, natural gas, gas condensate and oil reserves are in accordance with figures prepared on the basis of Russian classifications and methodologies, which differ in certain respects from international and U.S. classifications and methodologies—see Appendix B Part 1—"Overview of the Russian Gas Industry and its Regulation".

Schroder is a trademark of Schroders Holdings plc and is used under licence by Salomon Brothers International Limited.

**IN CONNECTION WITH THIS ISSUE, SALOMON BROTHERS INTERNATIONAL LIMITED MAY OVER-ALLOT OR EFFECT TRANSACTIONS WITH A VIEW TO SUPPORTING THE MARKET PRICE OF THE NOTES AT A LEVEL HIGHER THAN THAT WHICH MIGHT OTHERWISE PREVAIL FOR A LIMITED PERIOD AFTER THE ISSUE DATE. HOWEVER, THERE MAY BE NO OBLIGATION ON SALOMON BROTHERS INTERNATIONAL LIMITED TO DO THIS. SUCH STABILISING, IF COMMENCED, MAY BE DISCONTINUED AT ANY TIME, AND MUST BE BROUGHT TO AN END AFTER A LIMITED PERIOD.**

#### **EXCHANGE RATES AND EXCHANGE CONTROLS**

The value of the Rouble depreciated significantly against the dollar from 1991 through the first half of 1995, but stabilised, in part due to new policies adopted by the Central Bank of Russia, until August 1998 when the Rouble depreciated significantly against the dollar following the Russian Government's decision to temporarily stop supporting the Rouble. See "Investment Considerations—Investment Considerations Related to Russia—Exchange Rates, Exchange Controls and Repatriation Restrictions". The Rouble/dollar exchange rate, published by the Central Bank of Russia and expressed as a number of Roubles per U.S.\$1.00, was RUR 20.65, RUR 27.00, RUR 28.16 and RUR 30.14 at year-end 1998, 1999, 2000 and 2001, respectively. The rate on 19 April 2002 was RUR 31.16 per U.S.\$1.00.

#### **ENFORCEABILITY OF CIVIL LIABILITIES IN RUSSIA**

Gazprom is an open joint-stock company organised under the laws of the Russian Federation. The majority of the directors and executive officers of Gazprom reside in Russia. As a result, it may not be possible for investors to effect service of process outside Russia upon Gazprom or such persons. Moreover, substantially all the assets of Gazprom and of such persons are located in Russia, except for certain trading subsidiaries with assets located abroad, and it may not be possible for investors to enforce in Russia judgments rendered against them. Judgments rendered by a court in any jurisdiction outside Russia will be recognised by courts in Russia only if an international treaty providing for the recognition and enforcement of judgments in civil cases exists between the Russian Federation and the country where the judgment is rendered. No such treaty exists between the Russian Federation and the United Kingdom.

## INVESTMENT CONSIDERATIONS

***An investment in the Notes involves a high degree of risk. Prospective investors should therefore consider carefully the following factors in evaluating the Notes prior to making any investment decision. Each of the factors highlighted below could have a material adverse effect on Gazprom's business, operations and financial condition which, in turn, could have a material adverse effect on Gazprom's ability to service its payment obligations under the Loan.***

### Investment Considerations Relating to Gazprom

#### ***Corporate Governance, Disclosure and Accounting Standards***

The corporate affairs of Gazprom are governed by its Charter, internal regulations adopted pursuant to its Charter and by laws governing companies incorporated in Russia. The rights of shareholders and the responsibilities of members of the Board of Directors and the Management Committee under Russian law are different from, and may be subject to certain requirements not generally applicable to, corporations organised in the United States, the United Kingdom or other jurisdictions.

A principal objective of the securities laws of the United States, the United Kingdom, Russia and other countries is to promote full and fair disclosure of all material corporate information to the public. Gazprom is subject to Russian law which requires, *inter alia*, Gazprom to publish annual financial statements in accordance with Russian Accounting Regulations, together with an independent auditor's report. Nonetheless, there is less publicly available information about Gazprom than there is available for comparable listed companies in, for example, the United States or the United Kingdom.

Recently, however, there have been certain improvements in corporate governance and information disclosure standards in Russia, as the Russian regulatory authorities have paid increasingly more attention to such issues. In particular, the Russian Ministry of Finance has issued an edict requiring all Russian companies to prepare their financial statements in accordance with new standards, based on IAS, with effect from 2002. In addition, since 1997 the Russian Ministry of Finance has required all joint stock companies whose shares are publicly traded to produce annual financial statements prepared in accordance with IAS in addition to financial statements prepared in accordance with Russian accounting standards. Gazprom has published financial statements in accordance with IAS since 1996.

In accordance with Russian legislation, Gazprom is obliged to file quarterly reports on its activities to the Federal Commission on the Securities Markets within 30 days after the end of the relevant quarter. Such reports include certain information on the company, its management, subsidiaries, affiliates, selected financial and business information (such as events of litigation, quarterly accounts prepared in accordance with the Russian accounting standards etc.). Gazprom has regularly published such reports since the fourth quarter of 1998 and generally complies with the reporting requirements, although in the past Gazprom did not always meet the deadlines for filing such reports for technical reasons and was fined a nominal amount.

In addition, Russian law requires certain disclosure by open joint stock companies, such as the disclosure of annual reports, annual accounts (audited and approved by shareholders), any material facts affecting the financial condition and the business of the relevant company, certain board of directors' resolutions and lists of affiliated companies.

The Russian Federal Securities Market Commission is currently working on the corporate governance code to be adopted by all Russian public companies.

In light of the current focus on corporate governance issues, Gazprom has reviewed its own position on such issues and has established a special committee headed by a First Deputy Chairman of the Management Committee to develop a corporate governance charter for Gazprom. The Board of Directors is also considering new suggested procedures to ensure the proper co-ordination of transactions and to increase the level of control by the Board of Directors over the work of the Management Committee.

In May 2001, the Board of Directors adopted a code of practice entitled "Procedure for approving transactions involving stocks, shares or participation shares owned by Gazprom, its subsidiaries or

affiliated companies" (the "Procedure"). The principal aim of the Procedure is to increase the level of control exercised by the Board of Directors over the acquisition, disposal, charging or transfer by Gazprom or any member of the Group of any stocks, shares or participation shares. The Procedure provides that decisions in respect of such transactions shall be undertaken only after an appropriate commercial appraisal and with the approval of the Board of Directors.

On 23 January 2001, the Board of Directors appointed PricewaterhouseCoopers to examine certain aspects of Gazprom's financial and operating activities and, in particular, its operating relationship with Itera, a U.S. registered company that operates as an independent supplier of gas in Russia and the FSU. PricewaterhouseCoopers presented their report (the "Report") to a meeting of the Board of Directors on 31 July 2001.

The Board of Directors has taken the decision that the Report will remain confidential and that it will not publish or disclose the contents of the Report. The Board of Directors have considered the Report and have found that certain of its recommendations have already been addressed by the adoption of the Procedure. The Board of Directors has directed the Management Committee to draw up plans for the implementation of those recommendations made in the Report that are not addressed by the Procedure.

### ***Regulatory Risks***

Gazprom is, and is likely to remain for the foreseeable future, a regulated monopoly. In Russia, natural gas prices are subject to extensive control by governmental authorities and are generally lower than the prices charged to Western European off-takers. Domestic gas sale prices for households are currently less than natural gas prices applicable to industrial end users. In the future, natural gas prices for all customers are likely to be gradually increased. Gazprom believes that the State regulation of natural gas prices for domestic end-users will be abandoned in the future in favour of free market prices. State regulation is to be maintained for natural gas transportation tariffs only.

No assurance can be given, that the regulation of natural gas prices will be relaxed, that the Government will not reimpose price controls or that consumers will pay or will be able to pay increased natural gas prices. If the Government decides to keep natural gas prices at artificially low levels, thereby effectively forcing Gazprom to continue to subsidise the rest of the Russian economy, there is a risk that Gazprom will not generate sufficient cash flows to proceed with investments in certain natural gas fields (for instance the Yamal peninsula reserves) or to continue to develop export pipelines.

### ***Taxation***

Gazprom is subject to a broad range of taxes imposed at federal, regional and local levels and is one of the largest sources of tax revenue to the federal authorities, as well as to the regional and local authorities in those regions and localities in which it operates. The combination of political pressure on the federal, regional and local authorities to address social and economic issues (and in particular the non-payment of salaries and pensions) and the difficulties associated with collecting taxes from companies and enterprises in financial difficulties, all increase the risk that the Government, as well as regional and local governments, will seek to mitigate these problems by increasing Gazprom's already substantial tax burden.

### ***Relationship with the Government***

The Government has exercised, and can be expected to continue to exercise, a significant influence over Gazprom's operations.

The Russian Federation currently owns 38.37% of Gazprom's Shares in issue. The Government, through its control of 38.37% of the Gazprom Shares and its representatives on the Board of Directors, has the ability to influence the policies and operations of Gazprom. The Government has previously required Russian companies, including Gazprom, to take actions — such as the undertaking of projects and the supply of goods and services to customers — that may not be in the best interests of such companies or their shareholders. For example, the Government sets the prices for domestic gas delivered by Gazprom at a low level and requires Gazprom to supply natural gas to certain customers notwithstanding their inability to pay for natural gas supplied, thus effectively subsidising the Russian economy.

Gazprom's exploration and production licences are granted and are subject to renewal or extension by federal and local authorities. These licences are also subject to revocation in the event that Gazprom fails to comply with the terms and conditions of such licences.

In order to achieve consistency in the regulation of natural gas supplies throughout Russia, the federal authorities have assumed responsibility for the development and implementation of state policy with respect to the supply of natural gas and the industrial and environmental safety of such supplies in Russia. However, regional and local authorities have a significant degree of autonomy in exercising their rights over the use of land and natural resources (including natural gas). Accordingly, the relationship between the relevant federal, regional and local authorities as well as between Gazprom and such authorities can have a significant impact on the conditions under which companies like Gazprom can operate in any particular region.

### ***Reorganisation***

The risk of a reorganisation of Gazprom into several smaller and less powerful production and transportation companies has been and continues to be the subject of much domestic and international press speculation. There have at times been calls from certain Russian politicians and Government officials for Gazprom's natural gas operations to be divided into a number of companies, or for particular functions to be re-allocated to other entities. Although the adoption of Federal Law "On Gas Supply in the Russian Federation" No. 69-FZ dated 31 March 1999 (the "Gas Supply Law") mitigates the risk of reorganisation and both the Government and Gazprom have made clarifying statements about any potential future restructuring of Gazprom, Gazprom is not fully protected against the risks of a Government-led reorganisation.

### ***Gas Sales***

Gazprom sells a substantial portion of its natural gas in Europe, which is Gazprom's primary source of foreign currency revenues and stable cash flows. For more than 30 years, Gazprom and its predecessors have sold natural gas to Western Europe, generally pursuant to long-term contracts with payment linked to world prices for oil products. Such prices can fluctuate and are determined by supply and demand and other factors over which Gazprom has no control. Should world oil product prices deteriorate substantially in the future, European natural gas prices are likely to decline as well, resulting in a reduction in export revenues for Gazprom. Should natural gas export prices remain low for a prolonged period, Gazprom is likely to experience a cash flow deficit, and will have to either borrow extra funds to proceed with its current investment programmes or reduce its investment commitments.

### ***Delayed and Non-Collectable Payments by Customers; Dependence on Non-Cash Settlement***

Gazprom's cash flow may be affected by the limited ability of its customers in Russia and certain countries in the former Soviet Union (the "FSU") to pay for natural gas. There is no assurance that money owed to Gazprom by its customers in Russia and the FSU will be paid in full. As is the case with many Russian companies, Gazprom has had to accept various forms of non-cash settlement, including negotiable promissory notes, bonds, equity interests in natural gas companies and goods and services as payment for supplies to customers in Russia and the FSU. Non-cash settlement of transactions has had in the past, and may continue to have in the future, an adverse effect on the ability of Gazprom to fund operational or capital expenditures required to be made in cash and to make tax payments when due.

### ***Competition from Alternative Fuels and Oversupply of Gas in Europe***

Gazprom faces varying degrees of competition in each of its major markets from providers of alternative fuels, such as oil and coal. No assurance can be given that Gazprom will be able to compete effectively with such providers of alternative fuels.

Gazprom is also subject to competition in Europe from other natural gas suppliers which could affect the prices and volumes of Gazprom's sales to Europe. One of the major risks faced by Gazprom relates to the balance of supply and demand in the European natural gas markets. The progressive liberalisation of the European natural gas market itself does not represent a major threat to Gazprom, unless it leads to an oversupply of natural gas to the European markets. If oversupply of natural gas becomes a reality, natural gas purchasers will be able to negotiate lower prices on long-term supply

contracts with producers such as Gazprom. Whilst Gazprom's management are hopeful that current prices in the European markets are sustainable, especially in light of forecasted growth in European natural gas demand, the emergence of new large suppliers of natural gas could result in an oversupply of natural gas.

Gazprom has received a request for information from the European Commission with respect to certain clauses in Gazprom's contracts with various Italian utilities, under which the Italian utilities are prevented from selling gas on to other off-takers in Western Europe outside of the Italian market. A successful challenge of such clauses by the European Commission would mean that such Italian utilities could be free to sell gas to other off-takers outside of the Italian market, leading to increased competition in the gas market for Gazprom and the possibility of lower prices. Gazprom has responded to this request and is currently in discussions with the European Commission.

Although Russia has signed the Energy Charter Treaty, an international treaty for establishing and improving the legal framework for corporate international co-operation in energy matters, the State Duma has not yet ratified the Treaty (see Appendix B — Part I — "Overview of the Russian Gas Industry and its Regulation"). Gazprom's management believes that ratification of the Energy Charter Treaty would result in the opening up of the energy markets in Russia to foreign investment as well as its pipelines to the transportation of natural gas from Central Asia to West European markets. Accordingly, any such ratification of the Treaty could open the markets in which Gazprom operates to substantially higher competition and affect Gazprom's long-term supply contracts with its European customers.

### ***Operational Risks***

A large percentage of Gazprom's gas production is located in Western Siberia, where remoteness and the harsh climate complicate and increase the cost of production and affect Gazprom's ability to transport its natural gas economically.

Gazprom's gas exploration, production and transportation operations may be adversely affected by many factors, including the breakdown or failure of equipment or processes, performance below expected levels of output or efficiency, labour disputes, natural disasters, weather conditions, terrorist attacks or sabotage to Gazprom's extensive pipeline network. Gazprom has only limited insurance in relation to its assets and operations and, therefore, the financial effect of any such factors would generally have to be satisfied out of Gazprom's cash flow.

Gazprom owns and operates Russia's Unified Gas Supply System ("UGSS"), which is responsible for the gathering, processing, transportation, storage and delivery of substantially all natural gas supplies in Russia (except for supplies to the Norilsk, Yakutsk and Sakhalin regions). This extensive network of pipelines and compressor installations has been largely developed over the past 30 years. Much of the pipeline is over 10 years old with some parts of the pipeline over 30 years old. A significant part of the pipeline is protected by chemical processes of limited duration and effectiveness. In addition, large segments of the network are located in regions with harsh climates, where construction, maintenance and refurbishment is very difficult. Although there have been no significant delays or curtailments of the supply of natural gas to Gazprom's customers recently, no assurance can be given that such delays or curtailments will not occur in the future due to the stress and corrosion of pipelines, defective construction of compressor stations, problems associated with the harsh climate or the insufficient maintenance or refurbishment of the network.

Gazprom is dependent on the links between its pipeline network and pipeline networks elsewhere for the export of natural gas. Although it is Gazprom's strategy to diversify its export routes, it is currently dependent on pipelines in the Ukraine to deliver a large proportion of its sales of natural gas to Western Europe. It is also dependent on the Ukrainian pipeline system for a significant amount of its storage capacity. At the same time, the Ukraine is dependent on Gazprom to meet its domestic requirements for natural gas. Although this interdependence is taken into account in negotiations over a number of matters, including the terms of payment for natural gas supplied by Gazprom and transit fees, Gazprom has no control over the Ukrainian pipeline and cannot prevent any material disruption in the flow of Gazprom's natural gas through the Ukraine. It can only monitor the flow of natural gas in and out of the Ukraine.

Gazprom plans to expand its export capacity and to diversify its export routes, through capital investments in the Yamal-Europe and Blue Stream Projects and other export-oriented projects, such

as the Transbalkan Project. It is possible, however, that these plans will be affected, *inter alia*, by a drop in the demand for natural gas in Europe, difficulties related to localised planning and construction processes and Gazprom's ability to obtain external financing on acceptable terms. No assurance can be given that Gazprom will be able to meet its construction targets.

### **Capital Requirements**

Gazprom must increase its capital expenditure significantly over the next five years in order to improve its natural gas, gas condensate and oil production to meet the anticipated demand of customers in Western Europe, Russia and certain FSU countries. Gazprom expects to fund such capital expenditure through internal sources and external financing. There can be, however, no assurance that Gazprom will be able to generate sufficient funds to meet its capital requirements in the future. Lack of sufficient funds in the future may require Gazprom to delay or abandon some or all of its anticipated capital expenditures.

### **Environmental Risks**

Gazprom's operations, which are often innovative and potentially hazardous, are subject to the risk of liability arising from environmental damage or pollution and the cost of any associated remedial work in relation thereto. Gazprom has an established environmental policy and monitors its operations in an effort to meet applicable environmental standards. Gazprom made provision in its 2000 IAS financial statements and will, in all likelihood, make a provision in its IAS financial statements for the year ended 31 December 2001 for such environmental liabilities where it was probable that an obligation exists and the amount could be reasonably estimated. Such provisions have been made in accordance with what Gazprom believes is a reasonable and prudent policy which takes into account payments made in prior years, among other factors. However, in Russia in particular, federal, regional and local authorities may enforce existing laws and regulations more strictly than they have done in the past and may impose stricter environmental standards or higher levels of fines and penalties for violations than those now in effect. Accordingly, Gazprom's management is unable to estimate the future financial impact of Gazprom's environmental obligations.

### **Exchange Rate Risks**

Fluctuations in exchange rates influence the results of Gazprom's operations. Gazprom's export receivables are denominated in U.S. dollars or other hard currencies whilst its domestic receivables are denominated in Roubles. Most of Gazprom's operational expenditure is denominated in Roubles, whilst a portion of its capital expenditure is incurred in foreign currencies. The majority of Gazprom's borrowings are denominated in currencies other than Roubles, principally the U.S. dollar and the Euro. Gazprom's financial results may be positively or negatively affected by fluctuations in the value of the Rouble against other currencies, particularly the U.S. dollar and the Euro.

### **Russian Reserves Classifications and Methodologies**

The information relating to natural gas, gas condensate and oil reserves contained in this Offering Circular has been prepared on the basis of Russian classifications and methodologies, which differ significantly from standard international and U.S. classifications and methodologies in particular with respect to the manner in which and the extent to which commercial factors are taken into account in calculating reserves. Accordingly, the information relating to reserves contained herein is subject to adjustments necessary to make it consistent with standard international and U.S. classifications and methodologies. However, Gazprom's management believe that such adjustments, while likely to result in a decrease of the A, B and C<sub>1</sub> reserves reported herein, will not be material and that the amount of Gazprom's reserves as adjusted is sufficient to meet all Gazprom's delivery obligations. Gazprom's management has based its assumptions on an evaluation by internationally recognised independent reservoir engineers, DeGolyer & MacNaughton, which in 1999 carried out an evaluation of gas, gas condensate and oil reserves in the 18 largest gas and gas condensate fields, which accounted for approximately 72% of Gazprom's proved and probable gas reserves. (See Appendix B Part II).

### **Investment Considerations Relating to Russia**

Gazprom is a Russian company, and substantially all of its assets are located in Russia. There are certain risks associated with an investment in Russia. The following are some non-exhaustive examples.

## ***Political Risks***

Since 1991, Russia has been evolving from a socialist state with a centrally planned economy to a pluralist democracy with a market economy. The process of political and economic reform is not yet complete, and no assurance can be given that it will continue. The Russian political system remains vulnerable to social and ethnic unrest and any significant political instability could adversely affect the value of foreign investments in Russia and Gazprom's ability to export natural gas and/or oil. The Government has until recently been characterised by frequent change, having experienced five changes in Prime Minister since March 1998. The value of investments in Russia, including investments in Gazprom, could be reduced if such frequent change resumes or if the current President or Government chooses to curtail political liberties or move away from market-oriented reforms.

Significant Russian legislation has been enacted since 1991 to protect private property against expropriation and re-nationalisation by the Government, but there can be no assurance that such protections would be enforced in the event of an attempted expropriation or re-nationalisation, or that privatisation (including Gazprom's privatisation) will not be reversed.

In addition, as Russia is a federation of republics and regions, conflicts of interest between central and regional authorities and other conflicts of interest could negatively affect the value of investments in Russia and, in particular, could create an uncertain operating environment that may hinder Gazprom's long-term planning ability.

Ethnic and religious differences in Russia have given rise to tensions, and in some cases, military conflict. Such events could have a material adverse effect on the value of investments in Russia and on the financial condition of a company such as Gazprom.

## ***Economic Risks***

Russia's economy has undergone a rapid transformation marked by periods of significant instability since the end of the Soviet era. In particular, the Government's decision in August 1998 to temporarily stop supporting the Rouble and its servicing of certain domestic and foreign debts, as well as the imposition of a moratorium on the repayment of private foreign currency debt caused the currency to collapse and led to an overall financial crisis. It is possible that Russia may default on its domestic and foreign debt in the future or take actions that could adversely effect its financial stability. Other economic risks that could negatively impact the financial condition of Gazprom include:

- failure by the Government to continue to access funding from the International Monetary Fund or restore access to the international capital markets or improve and maintain the requisite level of tax collection;
- failure by the Government to address systemic problems within Russia's economy, such as sustained periods of relatively high inflation, a weak banking system, high national debt relative to gross domestic product, widespread tax evasion, high levels of organised criminal activity and corruption and substantial levels of unemployment and underemployment which affect the environment in which Gazprom operates and could adversely effect Gazprom's business as a result; and
- fluctuations in the global economy (including, in particular, fluctuations in world prices for oil and natural gas), which may adversely affect Russia's economy and Gazprom's business.

Gazprom produces about 6-8% of Russia's gross domestic product ("GDP") and contributes a substantial amount of the total tax payments to the federal budget, despite not being paid for a significant portion of its sales to the domestic market. Although the non-payment situation improved significantly last year (largely because high commodity prices and a massive trade surplus resulted in a budget surplus), and continues to improve this year, there is no guarantee that it will not deteriorate in the future.

## ***Legal and Regulatory Risks***

The following aspects of Russia's legal system create uncertainty with respect to many of the legal and business decisions that Gazprom's management make:

- there may be inconsistencies between laws, Presidential decrees, Government resolutions and ministerial orders, and between local, regional and federal legislation and regulations;

- decrees, resolutions and regulations may be adopted by governmental authorities and agencies without clear constitutional or legislative basis and with a high degree of discretion;
- substantial gaps in the regulatory structure may be created by the delay or absence of regulations implementing certain legislation;
- there is a lack of judicial and administrative guidance on interpreting applicable rules and limited precedential value of judicial decisions;
- Russia has a judiciary with limited experience in interpreting and applying market-oriented legislation and which is vulnerable to economic and political influence; and
- Russia has weak enforcement procedures for court judgments and there is no guarantee that a foreign investor will obtain effective redress in a Russian court.

Because of the developing nature of Russia's legal and regulatory framework regarding property ownership and securities, there exists a significant risk that Gazprom's ability to attract future investment from international capital markets may be limited. Some of the issues that cause this risk include:

- Russia's securities registration system is less developed than in other countries;
- Russia's regulatory environment is uncertain, which could expose Gazprom to increased costs and hinder its ability to operate its business;
- Russia's tax system gives rise to significant uncertainties and risks that may complicate Gazprom's tax planning and business decisions; and
- Russia has restrictive currency regulations which have in the recent past and may in the future interfere with Gazprom's ability to conduct routine business transactions and attract investment.

#### ***Exchange Rates, Exchange Controls and Repatriation Restrictions***

In recent years, the Rouble has experienced a significant depreciation relative to the dollar and there has been significant instability in the Rouble exchange rate. See "Exchange Rates and Exchange Controls".

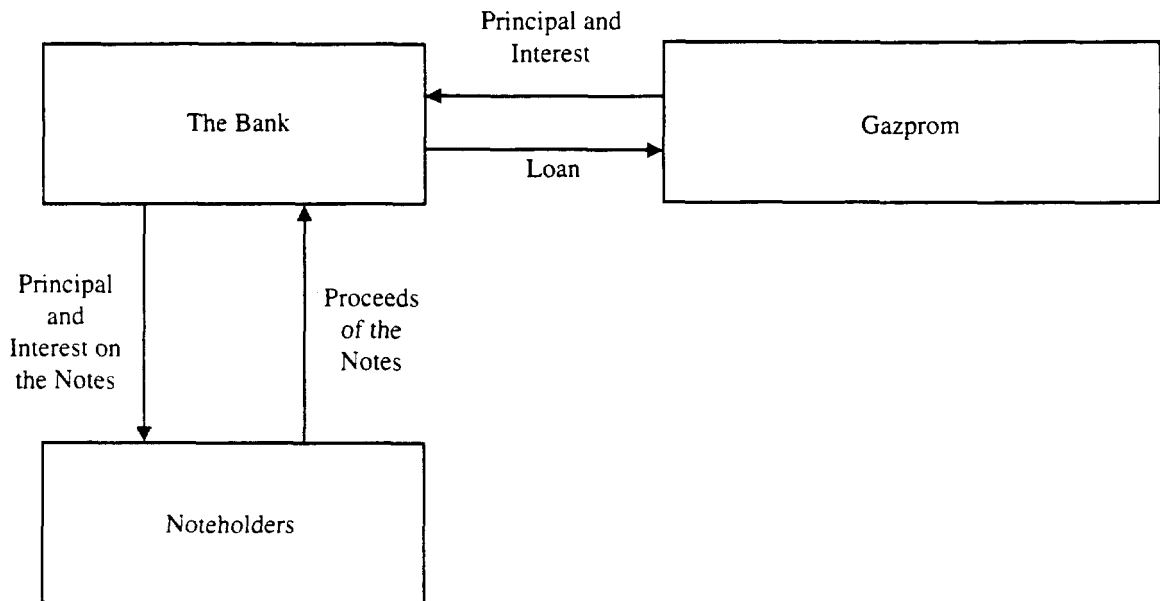

The Rouble is generally not convertible outside of Russia. A market exists within Russia for the conversion of Roubles into other currencies, but it is limited in size and is subject to rules limiting such conversion. There can be no assurance that such a market will continue indefinitely. Current Russian law permits Gazprom to convert its Roubles into foreign currency to make payments to meet its financial obligations but there can be no guarantee that such conversion will be permitted in the future. Moreover, the banking system in Russia is not yet fully developed and considerable delays may occur in the transfer of funds within, and the remittance of funds out of, Russia.

#### **Investment Consideration Relating to the German Insolvency Code**

Clause 4.1 of the Trust Deed provides for an English law charge in favour of the Trustee for the benefit of the Noteholders over certain amounts as well as certain claims and other rights of the Bank under the Loan. Section 166(2) of the German Insolvency Code which came into force on 1 January 1999 provides that receivables assigned for security purposes may not, after opening of insolvency proceedings involving the assignor, be enforced by the assignee but by the insolvency administrator, which will be entitled to deduct from the enforcement proceeds up to 9% as fees plus value added tax thereon. This Section 166(2) may affect the security given pursuant to Clause 4.1 of the Trust Deed, since it cannot be excluded that a German court will not hold that an English law charge should be subject to such Section 166(2).

## TRANSACTION SUMMARY

The transaction will be structured as a loan to Gazprom by the Bank. The Bank will issue Notes to Noteholders for the sole purpose of funding the Loan. The Notes will be constituted by a trust deed (the "Trust Deed") to be entered into between the Bank and The Bank of New York (the "Trustee"). Pursuant to the Trust Deed the Bank will charge by way of first fixed charge as security certain of its rights and interests under the Loan (other than certain Reserved Rights, as defined in the Trust Deed) to the Trustee for the benefit of the Noteholders and will transfer its administrative rights under the Loan Agreement to the Trustee as security (the "Security Interests") for its payment obligations in respect of the Notes. As a consequence of the transfer of the administrative rights under the Loan Agreement the Trustee shall assume the administrative rights of the Bank as set out in the relevant provisions of the Trust Deed. If and when the first fixed charge of certain of the Bank's rights and interests under the loan is enforced, the Trustee will assume the rights of the Bank under the Loan as set out in the relevant provisions of the Trust Deed, and the Trustee will assume certain rights and obligations towards the Noteholders, as more fully set out in the Trust Deed. This offering is made on a limited recourse basis and the Bank will not have any obligations to the Noteholders save for to account to the Noteholders for amounts equivalent to the amounts of payments of principal and interest under the Loan if and to the extent received from Gazprom.

## SUMMARY INFORMATION

Gazprom is the world's largest natural gas company in terms of reserves, transportation and production volumes. As at 31 December 2001, wholly-owned Gazprom subsidiaries held production licences for 26.0 tcm of A, B and C<sub>1</sub> natural gas reserves (classified in accordance with Russian standards: see Appendix B – Part I – “Overview of the Russian Gas Industry and its Regulation”) and subsidiaries, in which Gazprom holds less than 100% of the Shares, held production licences for another 5.0 tcm of A, B and C<sub>1</sub> natural gas reserves, of which 2.1 tcm is attributable to Gazprom in proportion to its actual shareholding. The Group's total A, B and C<sub>1</sub> natural gas reserves of 28.1 tcm are equivalent to approximately 60% of Russia's estimated total for such reserves. In addition, as at 31 December 2001, Gazprom through its wholly owned subsidiaries or through subsidiaries, in which Gazprom holds less than 100% of the Shares, held production licences for approximately 1,293.8 million tonnes of A, B and C<sub>1</sub> gas condensate (which represents approximately two thirds of such reserves in Russia) and 584.6 million tonnes of A, B and C<sub>1</sub> oil reserves (in proportion to Gazprom's actual shareholding).

Gazprom's subsidiaries produced a total of 512.0 bcm of natural gas in 2001 (compared to 523.2 bcm in 2000), and this amounted to approximately 88.1% of Russia's natural gas production in that year. As at 31 December 2001, the Group's total number of wells consisted of 9,302 natural gas wells and 569 oil wells.

Gazprom owns and operates the UGSS, a single centrally controlled system for natural gas production, processing, transportation, storage and deliveries. The UGSS includes the world's largest high pressure trunk pipeline system. The network is powered by 253 compressor stations with a total capacity of approximately 42,600 megawatts. The pipeline network (of approximately 150,000 km) is the most critical link in the system delivering natural gas to consumers within Russia and abroad. Seasonal peak loads are levelled off using 22 underground natural gas storage facilities with an active storage capacity of approximately 57.9 bcm. Gazprom's dispatch management centre, located in Moscow, controls and manages the transportation of gas in Russia.

Gazprom is the largest supplier of natural gas to Europe. Its market share (according to CEDIGAZ — “Natural Gas in the World — 2001”, Survey July 2001) in the European natural gas market was 25.9% in 2000. Gazprom also supplies most of the natural gas consumed in Russia and certain countries in the FSU. In 2001, Gazprom exported 127.0 bcm of natural gas to Europe. A further 39.60 bcm of natural gas was exported to the FSU. Deliveries of natural gas to Russian consumers in 2001 amounted to 278.9 bcm.

Revenue from natural gas exports to Europe for the year ended 31 December 2000 amounted to U.S.\$15.5 billion (including excise tax but net of VAT) (compared to U.S.\$9.9 billion for the year ended 31 December 1999). Sales of natural gas in the FSU market for the year ended 31 December 2000 account for the revenue of U.S.\$2.3 billion (including excise tax but net of VAT) as compared to U.S.\$2.5 billion for the year ended 31 December 1999. Revenue from natural gas sales in Russia for the year ended 31 December 2000 totalled U.S.\$3.3 billion (including excise tax but net of VAT) (compared to U.S.\$3.6 billion for the year ended 31 December 1999).

***The U.S.\$ amounts are provided for convenience only and should not be construed as representations that the Rouble amounts have been or could be converted into U.S.\$ at that or any other rate or as being representative of U.S.\$ amounts that would have resulted if Gazprom reported its IAS financial statements in U.S.\$.***

## SELECTED FINANCIAL INFORMATION

The summary consolidated financial information set out below has been derived from Gazprom's unaudited consolidated financial statements for the nine months ended 30 September 2001 (the latest unaudited "Interim Data") and the audited consolidated financial statements as for the years ended 31 December 2000, 1999 and 1998 (the latest audited "Annual Data"), prepared in accordance with IAS.

The Interim Data is not necessarily indicative of the results that may be expected for the full year.

The Annual Data relating to the statement of operations data for 2000, 1999 and 1998 and to the balance sheet data at 31 December 2000, 1999 and 1998 have been extracted without material adjustment from, and should be read in conjunction with, the 2000 and 1999 Consolidated Financial Statements set out elsewhere in this Offering Circular, restated in terms of the equivalent purchasing power of the Rouble at 30 September 2001.

Balance Sheet Data	30 September	30 September	31 December	31 December	31 December	31 December	31 December	31 December
	2001 in US\$ millions (1)(3)	2001 in RR millions(2)(3)	2000 in U.S.\$ millions (1)	2000 in RR millions (2)	1999 in U.S.\$ millions (1)	1999 in RR millions (2)	1998 in U.S.\$ millions (1)	1998 in RR millions (2)

## CAPITALISATION

The following table sets out Gazprom's unaudited consolidated short-term loans and current portion of long-term borrowings, long-term borrowings and shareholders' equity as at 30 September 2001 based on Gazprom's unaudited IAS consolidated financial statements for the nine-month period ended 30 September 2001, adjusted to give effect to the receipt of the Loan.

	At 30 September 2001		As adjusted
	(in millions of Roubles) <sup>(2)</sup>	(in millions of U.S.\$) <sup>(1)(2)</sup>	(in millions of U.S.\$) <sup>(1)(2)</sup>
Shareholders' equity:			
Share capital .....	271,214	9,228	9,228
Treasury shares .....	(10,222)	(348)	(348)
Retained earnings and other reserves .....	<u>1,187,125</u>	<u>40,392</u>	<u>40,392</u>
Total shareholders' equity .....	<u>1,448,117</u>	<u>49,272</u>	<u>49,272</u>
Short-term loans and current portion of long-term borrowings (including promissory notes) .....	194,629	6,622	6,622
Long-term borrowings (including promissory notes) .....	<u>207,462</u>	<u>7,059</u>	<u>7,559</u>
Total capitalisation .....	<u><u>1,850,208</u></u>	<u><u>62,954</u></u>	<u><u>63,454</u></u>

Notes:

(1) Totals may not add due to rounding. The U.S.\$ amounts shown above have been translated from the Rouble amounts at the rate of RUR 29.39 = U.S.\$1.00, which is the rate published by the Central Bank on 30 September 2001. These amounts are provided for convenience only and should not be construed as representations that the Rouble amounts have been or could be converted into U.S.\$ at that or any other rate.

(2) Unaudited.

Consolidated cash and cash equivalents, including cash restricted from withdrawal under the terms of certain of the borrowings and under banking regulations, were RUR 60,898 million (U.S.\$2,072 million).

There have been no material changes in the total capitalisation of Gazprom since 30 September 2001, other than, as at 28 February 2002, additional long-term borrowings of RUR 37,502 million (U.S.\$1,276 million).

## USE OF PROCEEDS

The proceeds from the offering of the Notes will be used by the Bank for the sole purpose of financing the Loan. The Loan, in principal amount of U.S.\$500,000,000, which is being funded in full by the Notes, will, after meeting the costs and expenses of the offering of the Notes, be used for working capital and general corporate purposes.

## OA0 GAZPROM

### Privatisation and Formation

Gazprom was reorganised into a joint stock company in 1993 in accordance with the Presidential Decree No. 1333 of 5 November 1992 ("Decree No. 1333"). Under Decree No. 1333, Gazprom was made responsible for ensuring the efficient operation and development of the UGSS. The UGSS had previously been the responsibility of the State Gas Concern "Gazprom", the State controlled entity charged with the task of operating and developing the UGSS prior to the 1993 reorganisation. Pursuant to Decree No. 1333 and Presidential Decree of the Russian Federation No. 2116 of 6 December 1993, Gazprom was charged with the responsibility of providing for natural gas export deliveries through Gazexport, its wholly-owned specialised foreign trade subsidiary, which became part of the State Gas Concern "Gazprom" in 1991 and was also appointed "state contractor" for natural gas exports.

Decree No. 1333 charged Gazprom with the following principal tasks:

- ensuring a reliable supply of natural gas to consumers in Russia and to foreign customers;
- conducting a co-ordinated policy for maintaining and further developing the UGSS;
- controlling the operation of the UGSS;
- financing and constructing natural gas pipelines and high pressure outlets so as to service areas of Russia where natural gas was previously unavailable; and
- providing access for any independent producer of natural gas to the transportation system in proportion to the amount of natural gas produced by such independent producer in Russia.

The original Charter of Gazprom was approved by Order No. 138 of the Council of Ministers of the Russian Federation issued on 17 February 1993 and Gazprom was registered as an open joint stock company on 25 February 1993. In 1993 and 1994 licences were issued to Gazprom, pursuant to the Subsoil Resources Law 1992, granting Gazprom rights to exploit hydrocarbon reserves.

Decree No. 1333 provided for the transfer to Gazprom of 100% of the share capital of enterprises comprising the UGSS, controlling equity stakes (not less than 51%) in a number of other entities reorganised into joint stock companies, the interests of the State Gas Concern "Gazprom" in Russian and foreign enterprises and other assets of the State Gas Concern "Gazprom", the privatisation of which was not restricted. Decree No. 1333 also provided for all rights and obligations of the State Gas Concern "Gazprom" to inure to Gazprom's benefit, including its rights to use underground deposits and natural resources, as well as its rights and obligations under the State Gas Concern "Gazprom's" contracts. Gas producing enterprises Yakutgazprom and Norilskgazprom, which used to be part of the State Gas Concern "Gazprom", were reorganised into separate and independent joint stock companies.

Decree No. 1333, Directive No. 58-rp of the President of the Russian Federation dated 26 January 1993, Gazprom's privatisation plan and certain other legislative acts issued by the President and the Government provided for:

- 15.0% of Gazprom Shares to be sold by closed subscription to employees and the management of the enterprises comprising the UGSS (which had been transferred to Gazprom);
- 33.9% of Gazprom Shares to be sold to Russian individuals in return for privatisation vouchers (of which 0.87% have not been sold and remain within Federal ownership);
- 40.0% of Gazprom Shares were fixed for three years within Federal ownership;
- 1.1% of Gazprom Shares to be transferred to joint stock company "Rosgazifikatsiya" (a supplier of natural gas to end-consumers); and
- 10.0% of Gazprom Shares held in the Federal Property Fund to be purchased by Gazprom itself before 1 June 1993 at nominal value in exchange for privatisation vouchers. These were to be placed within a year in the securities market and the proceeds were to be used for the development of natural gas fields in Yamal and other regions.

Presidential Decree of the Russian Federation No. 399 of 20 March 1996 extended the original period for which 40% of Gazprom Shares were to be retained in Federal ownership by a further three years. Pursuant to Presidential Decree of the Russian Federation No. 887 of 25 July 1998, the percentage of Gazprom Shares to be retained within Federal ownership was reduced to 35%, in anticipation of the sale of 5% of the Gazprom Shares, of which 2.5% was subsequently acquired by Ruhrgas during a privatisation auction held in December 1998.

Although Gazprom's privatisation plan envisaged the sale of the other 2.5% of Gazprom Shares in the second quarter of 1999, these Gazprom Shares remained in Federal ownership, together with the 0.87% of Gazprom Shares not placed during the privatisation programme in 1993 and 1994. Accordingly, the total State share holding currently comprises 38.37% of Gazprom Shares. The Gas Supply Law states that 35% of the UGSS owner's shares (i.e. Gazprom) must be retained in Federal ownership for an indefinite period of time.

Pursuant to the terms of a trust agreement dated 20 December 1997 (the "Trust Agreement") between the Government and Gazprom, Gazprom holds 35% of the Gazprom Shares in a trust for the benefit of the Government, must keep them separate from its other assets and has certain reporting requirements. Furthermore, Gazprom may not sell, transfer or otherwise dispose of these Gazprom Shares and may not issue derivatives on or pledge these Gazprom Shares without the written approval of the Government. In the last two years Gazprom has not exercised their right to vote on behalf of the Government at any shareholder meetings, as Government representatives had exercised the right to vote their 35% shareholding themselves. In addition, Gazprom Shares could not be voted on certain major issues (including the election of members of the Board of Directors) without the written approval of the Government. The Trust Agreement was originally valid until 31 March 1999 but its term was extended on a rolling one-year basis until such time as either Gazprom or the Government provide notice to the other party that they wish to amend or terminate the Trust Agreement. As at the date of this Offering Circular no such notice had been given by either party.

However, these Gazprom Shares were never transferred to Gazprom as "trust manager" in Gazprom's share register and are currently voted by representatives of the Government. Pursuant to Article 6 of the Federal Law "On Privatisation of State Property and Principles of Municipal Property privatisation in the Russian Federation" No. 123-FZ dated 21 July 1997 (as amended), the Government proposes candidates to the Board of Directors and Audit Commission, to be approved by a General Meeting of Shareholders. The Government also appoints representatives at General Meetings of Shareholders who are obliged to act in accordance with the directions of the Government. Currently, there are six Government representatives on the Board of Directors who can be replaced by the Government at any time.

Gazprom's name was changed from RAO Gazprom to OAO Gazprom by a shareholders' resolution passed on 26 June 1998.

### **Shareholding Structure**

Currently, Gazprom's charter capital is RUR 118,367,564,500, consisting of 23,673,512,900 shares with a nominal value RUR 5 each.

Pursuant to Government Resolution No. 654 of 30 May 1997, Gazprom's shares are traded in Russia on the Moscow Stock Exchange, the St. Petersburg Stock Exchange, the Yekaterinburg Stock Exchange and the Siberian Stock Exchange.

Gazprom has held annual and extraordinary shareholders meetings since 1995. The number of shareholders has decreased from approximately 1,030,000 in 1995 to approximately 537,000 as at 30 June 2001.

In accordance with the Presidential Decree of the Russian Federation No. 529 of 28 May 1997, foreign equity participation (as defined in Decree No. 529) in Gazprom was restricted to 9% of the Gazprom Shares. The Presidential Decree of the Russian Federation No. 943 of 10 August 1998 authorised the sale of a further 5% of Gazprom Shares to foreign shareholders. In fact, only 2.5% out of the 5% authorised was actually sold and therefore foreign equity participation is currently limited to 11.5% of Gazprom's Shares. The Gas Supply Law provides that the share of foreign individuals and organisations in the charter capital of Gazprom may not exceed 20%.

In 1996, Gazprom placed shares representing 1.98% of its charter capital on the foreign markets in the form of American Depository Shares (“ADS”). Due to the restrictions on foreign equity ownership (which prevents the purchase of Gazprom Shares by foreign participants in the domestic market), the issue of ADSs created a dual market in Gazprom Shares, with the ADSs trading at a substantial premium over the Gazprom Shares in the domestic market. In 1999, Ruhrgas acquired a further 1% of Gazprom Shares in the form of ADSs and between December 2000 and January 2001 an additional 1.44% of Gazprom’s Shares were sold to foreign investors in the form of ADSs. Gazprom ADSs are currently listed on the London Stock Exchange.

President Putin has established a working group to look at ways in which to liberalise the current dual market in Gazprom Shares.

The following table summarises Gazprom’s shareholding structure as at 31 December 2001.

<u>Shareholders</u>	<u>%</u>
Russian Federation .....	38.37
Russian shareholders .....	50.13
Foreign shareholders .....	11.50
Gazprom Shares <sup>(1)</sup> .....	7.08
ADS <sup>(2)</sup> .....	4.42
Total .....	<u>100.00</u>

Notes:

- (1) Including 4.58% held by Gazprom Finance B.V., Gazprom’s wholly-owned financial vehicle. This shareholding is intended to be used to secure Gazprom’s liabilities and issue derivative financial instruments. Also including a 2.5% shareholding acquired by Ruhrgas at a privatisation auction which was held pursuant to Presidential Decree No. 1316 of 31 October 1998.
- (2) Including a 1% shareholding acquired by Ruhrgas.

Among the Russian shareholders owning more than 5% of Gazprom Shares is Stroytransgaz, a Russian construction company which is often engaged by Gazprom for various construction projects (see “Business—Transportation”). These shares were acquired by Stroytransgaz from Gazprom, who had bought these shares as part of the 1995 Government authorised sale of 10% of Gazprom’s Shares to Gazprom. Gazprom paid for the shares in privatisation vouchers at the then effective nominal value. Stroytransgaz acquired 4.8% of Gazprom Shares in 1995 as part of the settlement of a debt owed by Gazprom to Stroytransgaz for various construction services rendered. The effective price paid by Stroytransgaz for the shares was equal to the average 1995 privatisation sale price. The remaining balance of the 10% of Gazprom Shares authorised for sale by the Government was acquired by Gazprombank and Gazfund.

As at 30 September 2001 (the last available accounts), certain members of the Board of Directors and close members of their families owned significant shareholdings in Stroytransgaz.

### Corporate Structure

In accordance with the Government’s current policy of maintaining an integrated natural gas industry, Gazprom owns all of the transportation assets necessary for the operation of the UGSS. Furthermore, its subsidiaries have the right to develop a substantial portion of Russia’s natural gas and gas condensate reserves and certain of its oil reserves. Gazprom operates in and outside of Russia through a number of limited liability and joint stock companies, either wholly or majority owned by Gazprom.

Gazprom’s head office, located in Moscow, exercises a substantial degree of managerial and financial control over the operations of Gazprom’s subsidiaries. Head office functions include strategy, planning, external financing, financial reporting, allocation of financial resources within the Group for the purposes of capital expenditure and supervision of principal areas of operations, such as construction, drilling, transportation, natural gas sales in the FSU and equipment procurement.

Gazprom’s wholly and majority owned subsidiaries are also engaged in engineering, research, non-core production activities and non-core construction activities supporting the operation of the UGSS as well as other commercial activities, including banking (see “Investment in Non-Core Activities”). Gazprom also participates in a number of natural gas transportation and marketing joint ventures involving foreign partners (see “International Projects and Alliances”).

The dispatch management centre, based at the head office, continuously monitors, controls and manages Gazprom's natural gas transportation system throughout Russia. Operational information, including data on produced and transported natural gas volumes, is also processed at the head office. Gazprom's internal financial reporting systems provide for the preparation of consolidated accounts and for the monitoring of cash receipts and cash requirements of the Group companies.

Gazprom's natural gas production subsidiaries are engaged in the development and operation of natural gas fields and related natural gas processing facilities. The four principal wholly-owned natural gas production subsidiaries, Urengoygazprom, Yamburggazdobycha, Nadymgazprom and Noyabrskgazdobycha, are located in Western Siberia. Together they accounted for 92.5% of the Group's total natural gas production in 2001. Drilling and exploration operations are carried out by Gazprom's subsidiary, Burgaz.

Gazprom's natural gas transportation subsidiaries are responsible for the transportation of natural gas along trunk pipelines and the supply of natural gas to customers within their respective regions. Presently, there are a total of 17 wholly-owned natural gas transportation subsidiaries, of which four are also engaged in natural gas production and/or processing.

Other subsidiaries of Gazprom are responsible for a number of other functions, including technical supervision of the pipeline systems, research and development, data processing, banking and procurement.

Currently, Gazprom wholly owns 57 subsidiaries, has an interest of greater than 50% in 45 entities and an equity interest of between 21% and 50% (inclusive) in 38 other entities. Gazexport holds interests in a number of foreign joint ventures.

Gazprom's main subsidiaries were, as at 31 December 2000, as follows:

<u>Subsidiary</u>	<u>Principal Activity</u>	<u>Gazprom's Direct Shareholding</u>
Astrakhangazprom	Production of hydrocarbons	100%
Bashtransgaz	Gas transportation	100%
Burgaz	Exploration, construction of oil and natural gas wells	100%
VNIIGAZ	Research and development	100%
Volgogradtransgaz	Gas transportation	100%
Volgotransgaz	Gas transportation	100%
Gazkomplektimpex	Procurement and logistics	100%
Gaznadzor	Supervision of compliance of wells operation technology	100%
Gazobezопасnost	Gas safety supervision	100%
Gazpromavia	Air freight	100%
Gazprominvestholding	Investment and finance activity	100%
Gazprom-Media	Media Holding Company	100%
Gazprom Finance B.V.	Financial and investment activity	100%
Gaztorgpromstroy	Trading of the agricultural products and consumer goods	100%
Gazflot	Shipping	100%
Gazfund	Pension Fund	100%
Gazexport	Foreign trade	100%
Gazsvyaz	Operation of telecommunication facilities	100%
Zarubezhgaz Erdgashandel GmbH ("ZGG")	Holding company representing interests of the Group in a number of gas sale and gas transportation companies in Central Europe	100%
Informgaz	Working out information technologies	100%
IRC Gazprom	Advertising and publishing activity	100%
Kavkaztransgaz	Gas transportation	100%
Kaspiygazprom	Gas exploration, production and transportation	100%
Kubangazprom	Gas production and transportation	100%
Lentransgaz	Gas transportation	100%
Mezhregiongaz	Gas supplies to Russian consumers	100%
Mostransgaz	Gas transportation	100%

<u>Subsidiary</u>	<u>Principal Activity</u>	<u>Gazprom's Direct Shareholding</u>
Nadymgazprom . . . . .	Production of hydrocarbons	100%
Nadymstroygazdobycha . . . . .	Production of hydrocarbons	100%
Novourengoy Gaz Chemical Complex . . . . .	Hydrocarbons processing	100%
Noyabrskgazdobycha . . . . .	Production of hydrocarbons	100%
Orenburggazprom . . . . .	Production of hydrocarbons	100%
Permtransgaz . . . . .	Gas transportation	100%
Samaratransgaz . . . . .	Gas transportation	100%
Severgazprom . . . . .	Gas production, processing and transportation	100%
Servisgazprom . . . . .	Exploitation of buildings, material and technical supply	100%
Szhizhennyi gaz . . . . .	Realisation of liquefied gas	100%
Surgutgazprom . . . . .	Gas processing and transportation	100%
Tatransgaz . . . . .	Gas transportation	100%
Tomsktransgaz . . . . .	Gas transportation	100%
Tyumenniigiprogaz . . . . .	Research and development	100%
Tyumentransgaz . . . . .	Gas transportation	100%
Ulyanovskgazservice . . . . .	Gas transportation	100%
Uraltransgaz . . . . .	Gas transportation	100%
Urengoygazprom . . . . .	Production of hydrocarbons	100%
Yamalgazinvest . . . . .	Yamal project implementation	100%
Yamburggazdobycha . . . . .	Production of hydrocarbons	100%
Yugtransgaz . . . . .	Gas transportation	100%

All of these subsidiaries are incorporated in the Russian Federation, with the exception of Gazprom Finance B.V. and ZGG, which are incorporated in The Netherlands and Germany, respectively. Gazprom Finance B.V. was established in February 1999 for the purpose of obtaining financing for the Group outside Russia. ZGG acts as the holding company for the Group's interests in a number of gas distribution, storage and transportation companies operating in Central Europe.

#### Other subsidiary undertakings

<u>Subsidiary</u>	<u>Principal Activity</u>	<u>Percent of share capital held at 31 December 2000</u>
		<u>%</u>
Gazavtomatika . . . . .	Science	51
Gazenergосervice . . . . .	Equipment repairs	51
Gazprombank . . . . .	Banking	97
Gazsibcontract . . . . .	Investing, trading	51
Kostromatrubininvest . . . . .	Production and sale of pipes	99
Lebedinsky GOK . . . . .	Industry	57
National Reserve Bank . . . . .	Banking	40
Spetsgazavtotrans . . . . .	Transport services	51
Volgogradneftemash . . . . .	Production of oil and gas refinery equipment	51
Vostokgazprom . . . . .	Production, processing and sale of gas and gas condensate	63
Zapsibgazprom . . . . .	Construction	34

The Group's interest in the equity capital of National Reserve Bank is 40.2% and in OAO Zapsibgazprom is 33.9%. However, as the principal shareholder, the Group continues to exercise effective control over the activities of the above companies and they are still considered as subsidiaries.

As at 30 September 2001, the principal subsidiaries of the Group remained unchanged since 31 December 2000 except for the changes disclosed below.

In January 2001, Gazprom acquired 51% of the voting shares of AK Sibur, a leading seller in Russia of hydrocarbons and producer of chemicals. With effect from 1 January 2001, AK Sibur was consolidated into the accounts of the Group. On 25 March 2002 a shareholders meeting of AK Sibur cancelled a proposed issue of shares of AK Sibur which would have diluted Gazprom's shareholding in AK Sibur.

In January 2001, Gazprom exchanged its 57% interest in Lebedinsky GOK and 17% interest in Oskolsky EMK for a 48% interest in ZAO Gazmetall. ZAO Gazmetall is a metallurgical holding company with controlling interests in Lebedinsky GOK and Oskolsky EMK.

## **Management Structure**

In accordance with Russian Joint Stock Companies Law and Gazprom's Charter, Gazprom's governing bodies are the General Meeting of Shareholders, the Board of Directors, the Management Committee and the Management Committee Chairman.

The General Meeting of Shareholders is Gazprom's highest governing body and has exclusive power over amendments to the Charter, the reorganisation or liquidation of Gazprom, the election of individuals to the Board of Directors and to the Audit Commission (responsible for control over Gazprom's business and financial activities), determination of the maximum amount of authorised shares, increases to the charter capital (where reserved for the General Meeting of Shareholders by law and by the Charter), reduction of the charter capital, approval of the annual report and annual accounts, determination of whether or not Gazprom is to enter into major transactions (the value of which exceeds 50% of the total value of Gazprom's assets) and approval of certain "interested party" transactions, as defined in Article 81 of the Federal Law "On Joint Stock Companies" No. 208-FZ dated 26 December 1995 (the "Joint Stock Companies Law").

The Board of Directors oversees Gazprom's business activities and consists of eleven members, including six members who hold positions in government bodies, two non-executive Directors, one representative of Ruhrgas, one representative of Gazprombank and one member of the Management Committee.

Gazprom's Board of Directors is responsible for the general management of Gazprom, except for those matters which, by law, are within the exclusive powers of the General Meeting of Shareholders. The Board of Directors has certain powers that are within its jurisdiction. These include the power to determine the priorities of Gazprom's operations; to call General Meetings of Shareholders and to determine the agenda for such meetings; to determine the record date for General Meetings of Shareholders and for the payment of dividends; to increase the charter capital of Gazprom (except where such increase is within the competence of the General Meeting of Shareholders); to issue bonds or other securities; to appoint the executive bodies of Gazprom (i.e. the Management Committee and the Chairman of the Management Committee); to decide on early termination of the powers of these bodies; to determine the remuneration of Management Committee members; to recommend dividends; to use the reserve fund and other funds; to open branch and representative offices; to adopt decisions on major transactions and certain "interested party" transactions; to approve a contract with any person that may be vested with the powers of Gazprom's executive body; and to approve the Regulations of the Management Committee.

Members of the Board of Directors are elected by the Shareholders through a system of cumulative voting for terms of one year and may be re-elected any number of times. The General Meeting of Shareholders may also terminate the authority of all members of the Board of Directors. Members of the Management Committee may not comprise more than one quarter of the Board of Directors and there must be at least nine Directors at all times. The Chairman of the Board of Directors is elected by the members of the Board of Directors by a majority vote of all members of the Board of Directors and may be re-elected at any time by a special resolution requiring at least a two-thirds majority. The Chairman of the Management Committee cannot simultaneously serve as the Chairman of the Board of Directors.

The Management Committee and the Chairman of the Management Committee are the executive bodies that manage Gazprom's day-to-day affairs. Members of the Management Committee are appointed by the Board of Directors for a period of five years. The Board of Directors has the right to terminate the authority of any Management Committee members as well as the Chairman of the Management Committee. The powers and jurisdiction of the Management Committee include the preparation and submission of Gazprom's long-term projects and strategic programmes to the Board of Directors; management of natural gas flows and supervision of the operation of the UGSS; decisions on the financing of production, scientific, technical, social, and environmental programmes; approval of regulations relating to secondary market trading in Gazprom Shares; and the timely submission of annual reports and other financial information to all relevant federal, regional and local authorities.

The Chairman of the Management Committee may act on behalf of Gazprom *ex officio* without a power of attorney. He may issue orders and other internal documents, approve staff schedules, decide when to convene and hold meetings of the Management Committee and address any questions that do not fall within the exclusive jurisdiction of the General Meeting of Shareholders, the Board of Directors or the Management Committee.

The Management Committee meets at least twice every month in accordance with a schedule which is approved by the Chairman of the Management Committee.

In practice, the Board of Directors is responsible for formulating Gazprom's strategy, and the Management Committee is responsible for implementing such plans and managing Gazprom on a day-to-day basis.

As at the date of this Offering Circular the membership of the Board of Directors was as follows:

<u>Name</u>	<u>Year of Birth</u>	<u>Position</u>
R. Vyakhirev .....	1934	Chairman of the Board of Directors
D. Medvedev .....	1965	Deputy Chairman of the Board of Directors, First Deputy Chief of the Presidential Administration of the Russian Federation
B. Bergmann .....	1943	Chairman of the Management Committee of Ruhrgas
B. Fedorov .....	1958	Leader of the political movement "Russia, Ahead!"
F. Gazizullin .....	1946	Minister of Property Relations of the Russian Federation
G. Gref .....	1964	Minister for Economic Development and Trade of the Russian Federation
V. Hristenko .....	1957	Deputy Prime Minister of the Russian Federation
A. Levitskaya .....	1954	First Deputy of the Russian Government Administration
V. Sheremet .....	1941	First Deputy Chairman of Gazprom's Management Committee
V. Tarasov .....	1940	Chairman of the Management Committee of Gazprombank; President of Non-Governmental Pension Fund Gazfund
I. Yuzhanov .....	1960	Minister of Antimonopoly Policy and Entrepreneurial Support of the Russian Federation

The current membership of Gazprom's Management Committee is as follows:

<u>Name</u>	<u>Year of Birth</u>	<u>Position</u>
A. Miller . . . . .	1962	Chairman of the Management Committee
V. Sheremet . . . . .	1941	First Deputy Chairman of the Management Committee
A. Ananenko . . . . .	1952	Deputy Chairman of the Management Committee
E. Vasilieva . . . . .	1959	Deputy Chairman of the Management Committee; Chief Accountant
N. Guslisty . . . . .	1933	Deputy Chairman of the Management Committee
Y. Komarov . . . . .	1945	Deputy Chairman of the Management Committee
S. Lukash . . . . .	1957	Deputy Chairman of the Management Committee
A. Ryazanov . . . . .	1953	Deputy Chairman of the Management Committee
V. Saveliev . . . . .	1954	Deputy Chairman of the Management Committee
M. Akselrod . . . . .	1946	Management Committee Member (Capital Construction and Equipment and Technical Supplies)
B. Budzulyak . . . . .	1946	Management Committee Member (Transportation System)
M. Dokuchayev . . . . .	1958	Management Committee Member
V. Ilyushin . . . . .	1947	Management Committee Member (Relationships with Regional Authorities)
A. Krasnenkov . . . . .	1961	Management Committee Member (Property Management)
B. Nikitin . . . . .	1940	Management Committee Member (Off-Shore Fields Developing)
N. Gornovsky . . . . .	1958	Management Committee Member, Mezhhregiongas General Director
V. Podyuk . . . . .	1946	Management Committee Member (Gas and Hydrocarbons Production & Processing)
V. Rezunenko . . . . .	1935	Management Committee Member (Long-Term Development Planning)
A. Semenyaka . . . . .	1965	Management Committee Member (Corporate Financing)
V. Fadeyev . . . . .	1939	Management Committee Member (Sales of Gas, Gas Condensate and Oil in Russia and the FSU)

The cumulative direct ownership of shares by the members of Gazprom's Management Board and the Board of Directors in Gazprom Shares is 0.037% and 0.025%, respectively.

## Employees

In 2001, Gazprom's work force broken down by area of employment was as follows<sup>(1)</sup>:

<u>Type of Activities</u>	<u>Number of Employees</u>
Construction . . . . .	29,943
Exploration and drilling . . . . .	15,224
Gas transportation . . . . .	107,363
Production and processing . . . . .	46,026
Other . . . . .	118,713
<b>Total . . . . .</b>	<b>317,269</b>

(1) These figures represent average employee count for the year 2001.

## BUSINESS

### Principal Markets

#### Overview

Gazprom is the world's largest exporter of natural gas. Gazprom exports natural gas through its wholly-owned trading subsidiary, Gazexport, on an agency basis. Exports of gas condensate, oil and oil products are also made through Gazexport.

Gazprom is currently the only supplier of Russian natural gas to Europe. According to CEDIGAZ—"Natural Gas in the World — 2001", Survey July 2001, it supplied 20.9% of natural gas consumed in Western Europe and 57.3% of natural gas consumed in Central and Eastern Europe in 2000. In 2001, Gazprom delivered 127.0 bcm of natural gas to Europe of which Western Europe accounted for 86.6 bcm and Central and Eastern Europe accounted for 40.4 bcm. Germany, Italy, France, Turkey, the Czech Republic, Slovakia, Hungary, Poland, Austria and Finland accounted for Gazprom's largest export markets in Europe. Gazprom is actively looking to increase its European exports through investments in joint ventures, such as Wingas in Germany and Gazum in Finland (see "International Projects and Alliances").

In 2001, Gazprom supplied substantially all of the natural gas consumed in Russia and a significant amount of the natural gas consumed in the Ukraine, Belarus, Moldova, Lithuania, Latvia and Estonia. Natural gas deliveries to consumers in Russia and to countries in the FSU accounted for 278.9 bcm and 39.6 bcm of natural gas in 2001, respectively. The Ukraine and Belarus are the largest consumers of natural gas supplied by Gazprom in the FSU.

The following table sets out Gazprom's natural gas deliveries by geographical market.

<u>Gas Deliveries</u>	<u>Year Ended 31 December</u>		
	<u>1999</u>	<u>2000</u>	<u>2001</u>

Industry experts believe that natural gas is gaining an increasing share of the world energy market as a result of it being an effective and environmentally clean fuel. According to the BP Statistical Review of World Energy (June 2001), natural gas consumption, as a percentage of energy consumption in Western Europe, has increased in recent years and Gazprom expects this trend to continue. This is primarily due to its attractiveness as a controllable and reliable fuel, the growth in natural gas-fired power generating capacity, an increase in the use of natural gas in the domestic sector (particularly in Central and Eastern Europe), a decline in the attractiveness of nuclear power and environmental considerations (which have reduced the attractiveness of fuels such as coal). In 2000, natural gas consumption accounted for approximately 22.9% of energy consumption in Western Europe and approximately 22.5% in Central and Eastern Europe.

The following table sets forth energy and natural gas consumption in Gazprom's principal markets for the period from 1998 to 2000 as well as the percentage of natural gas consumed as a proportion of total energy in such markets for each year.

	1998	1999	2000

- (1) Defined for the purposes of this summary as the following countries: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Luxembourg, Republic of Ireland, Italy, The Netherlands, Norway, Portugal, Spain, Switzerland, Sweden, Turkey and the United Kingdom.
- (2) Energy consumption comprises commercially traded fuels only.
- (3) Oil, gas, nuclear, hydroelectric and coal.
- (4) Defined for the purposes of this summary as the following countries: Bulgaria, Czech Republic, Hungary, Poland, Romania and Slovakia.

According to the BP Statistical Review of World Energy (June 2001), natural gas consumption in Western Europe increased by 4.8% from 1998 to 1999 and by 4.1% from 1999 to 2000. It also increased as a percentage of primary energy consumption during both of these years. In 2000, natural gas consumption as a percentage of primary energy consumption ranged from 2.0% in Sweden to 40.5% in The Netherlands. Germany and Italy, Gazprom's major Western European markets, are among the most gas user intensive countries in Western Europe, with gas accounting for 21.6% and 34.6% respectively, of their total energy consumption in 2000. The proportion of gas to total energy consumption in Western Europe is projected by the International Energy Agency to continue to increase.

Energy consumption in Central and Eastern European markets decreased by 5.0% from 1998 to 2000 and natural gas consumption decreased by 5.3% over the same period.

Gas consumption in Russia and the FSU represented 22.8% of worldwide natural gas consumption in 2000. In the FSU, energy consumption decreased by 0.4% from 1998 to 2000 and gas consumption increased by 3.6% during the same period. In Russia, overall energy consumption increased by 4.4%, whilst natural gas consumption increased by 3.4% from 1998 to 2000. The proportion of natural gas to total energy consumption decreased in Russia and increased in the FSU over the same period by 0.6% and 2.1% respectively.

### **Western Europe**

Gazprom operates in the international gas markets through Gazexport. In 2001, Gazprom exported 86.6 bcm of natural gas to Western Europe (compared to 90.4 bcm in 2000) which represented 19.4% of Gazprom's total natural gas supplies in 2001.

The following table sets out Gazprom's natural gas export volumes to Western Europe for the years 1999 to 2001:

<u>Country</u>	<u>1999</u> <i>(bcm)</i>	<u>2000</u> <i>(bcm)</i>	<u>2001</u> <i>(bcm)</i>
Germany .....	34.9	34.1	32.6
Italy .....	19.8	21.8	20.2

Source: Gazprom.

(1) Included amongst Western Europe for the purpose of this table.

(2) Totals may not add up due to rounding.

Gazprom and its predecessors have delivered natural gas to Western Europe since the late 1960s providing Gazprom with a significant amount of commercial experience in the region. Gazprom, acting through Gazexport, supplies natural gas to its Western European customers on the basis of long-term contracts, the initial terms of which are generally 20 years or longer. Outstanding long-term supply contracts with major Western European customers have remaining terms of between 7 years and 24 years. The majority of these contracts contain similar features, including take-or-pay clauses and price setting mechanisms, mostly based on European petroleum product prices, and do not allow for unilateral termination, except in cases of prolonged force majeure. Certain contracts (although not the majority), prohibit the re-export of natural gas. Currently, Gazprom's principal Western European customers are Ruhrgas (Germany), WIEH/Wingas (Germany), SNAM (Italy), Gaz de France (France), OMV (Austria) and Botas (Turkey). Gazprom is paid in foreign currency for the natural gas it sells in Western Europe.

In the opinion of Gazprom's management, one of the most promising and fastest growing export markets is Turkey, where natural gas consumption amounted to approximately 15.0 bcm in 2000, of which Gazprom exports accounted for 10.2 bcm, or 69% of the total natural gas consumption. According to estimates of the Turkish natural gas company Botas, Turkish natural gas consumption will reach 55.0 bcm by 2010 and 82.7 bcm a year by 2020. Gazprom's natural gas exports to Turkey are delivered via the Transbalkan Pipeline through the Ukraine, Romania and Bulgaria (see "International Projects and Alliances").

During recent years, Gazprom has negotiated a number of agreements which are expected to result in increased exports to Western Europe. In particular, between 1998 and 2000, new contracts were entered into with Gasunie (The Netherlands) for annual deliveries of 4 bcm (within the plateau period as set out in and as defined in the relevant contract) from 2001 until 2021; with Wingas (Germany) for annual deliveries of 4 bcm (within the plateau period as set out in and as defined in the relevant contract) from 1999 until 2023, plus an additional 1.8 bcm annually from 2000 until 2016; with Ruhrgas (Germany) for annual deliveries of 1.5 bcm from 2000 until 2010; and with Fragas (France) for annual deliveries of up to 2.0 bcm from 1999 until 2004. In addition, contracts with Ruhrgas requiring natural gas deliveries of 13 bcm a year have been extended until 2020.

## Central and Eastern Europe

Gazprom enjoys a dominant position in the Central and Eastern European gas markets due to existing historical, economic and political reasons as well as the proximity of the Central and Eastern European Markets to Russia.

In 2001, Gazprom exported 40.4 bcm of natural gas to Central and Eastern Europe (38.6 bcm in 2000), which amounted to 9.1% of the total natural gas supplied by Gazprom in 2001. The following table sets out natural gas export volumes to Central and Eastern Europe for the years 1999 to 2001:

<u>Country</u>	<u>1999</u> <u>(bcm)</u>	<u>2000</u> <u>(bcm)</u>	<u>2001</u> <u>(bcm)</u>
Slovakia .....	7.5	7.9	7.5

Source: Gazprom.

(1) Totals may not add up due to rounding.

Until recently, Gazprom contracted with its Central and Eastern European customers for the supply of natural gas on the basis of shorter-term contracts. In the last few years, Gazprom (acting through Gazexport) has adopted a policy of negotiating medium-term and long-term contracts with a gradual introduction of Western European contract standards as the market economies of Central and Eastern Europe further develop. The majority of the existing contracts contain similar features, including take-or-pay clauses and price setting mechanisms (which are mostly based on European liquid oil product prices) and do not allow for unilateral termination. Certain contracts (although not the majority), prohibit the re-export of natural gas. Gazprom supplies natural gas in Central and Eastern Europe through state-owned natural gas distribution companies and in certain countries through joint ventures in gas marketing and distribution companies. Gazprom considers the formation of new joint ventures for the transportation and marketing of Russian natural gas as a promising form of co-operation with Central and Eastern European countries. Gazprom is paid in fully convertible currency for the natural gas it sells in Central and Eastern Europe.

Prior to 1999, Gazprom had supplied a significant volume of its natural gas to Central and Eastern Europe under the Yamburg Inter-Governmental Agreements, agreements which originally provided for the settlement of construction costs by the delivery of natural gas to certain countries in Central and Eastern Europe and the German Democratic Republic (now part of the Federal Republic of Germany). These Agreements expired in 1999. On 10 October 2001 an agreement was entered into between the Government and the Czech Republic whereby it was agreed that, in consideration of a single payment to the Czech Republic of approximately U.S.\$3,500,000 (to be made prior to 10 November 2001), the Government be released from all outstanding obligations to deliver or to procure the delivery by Gazprom of gas to the Czech Republic at preferential rates pursuant to the Yamburg Inter-Governmental Agreements. This payment has not yet been made as the Czech Republic has yet to fulfill certain conditions precedent to the agreement.

## The FSU

Historically, Gazprom has had, and continues to have, a dominant position in the supply of natural gas to the FSU. In 2001, Gazprom exported 39.6 bcm of natural gas (43.4 bcm in 2000) which constituted approximately 8.9% of the total natural gas supplied by Gazprom in 2001) to six countries of the FSU: the Ukraine, Belarus, Moldova, Lithuania, Latvia and Estonia. Of the 39.6 bcm of natural gas exported, approximately 55% constituted deliveries to the Ukraine.

The following table sets out natural gas export volumes to the FSU countries (excluding Russia) for the years 1999 to 2001:

<u>Country</u>	<u>1999</u>	<u>2000</u>	<u>2001</u>
	<i>(bcm)</i>	<i>(bcm)</i>	<i>(bcm)</i>
Ukraine .....	29.5	27.2	21.9
Belarus .....	12.2	10.8	11.6
Moldova .....	2.2	1.8	2.1
Lithuania .....	1.8	2.0	2.2
Latvia .....	1.0	1.0	1.1
Estonia .....	0.5	0.6	0.7
Total .....	<u>47.2</u>	<u>43.4</u>	<u>39.6</u>

Source: Gazprom.

Current annual contract prices for natural gas supplied by Gazprom to the FSU countries are higher than current Russian domestic prices and are settled on the level close to the world prices taking into account prices for alternative kinds of fuel and intergovernmental agreements in existence with these countries.

Gazprom has limited its export supplies to the FSU countries (which have experienced economic decline over recent years) in order to avoid further exposure to non-paying customers. However, Gazprom expects these markets to recover and plans to supply 49.5 bcm of natural gas to the FSU by 2005 and 45.8 bcm by 2010. In 2000 Gazprom signed long-term contracts with consumers in Lithuania, Latvia and Estonia (the "Baltic States") to supply 25.5 bcm of natural gas between 2000 and 2005.

The Ukraine, Gazprom's largest FSU customer, is traversed by major pipeline routes from the natural gas fields of Western Siberia to export markets in Europe and is the source of substantial amounts of industrial supplies for Gazprom. Gas exports from Russia to the Ukraine are based on annual inter-governmental agreements with respect to prices and export volumes. Currently, Gazprom is dependent on the Ukraine for the transit of substantially all its natural gas sold in Western Europe. However, the Yamal-Europe and Blue Stream pipelines, which are nearing completion, will reduce Gazprom's dependence on the Ukraine for the transportation of natural gas to Western Europe. On the other hand, the Ukraine is dependent on Gazprom to meet its domestic natural gas requirements. This interdependence is taken into account in negotiations over a number of matters, including the terms of payment for natural gas supplied by Gazprom and transit fees charged by the Ukraine.

Although the prices charged by Gazprom in the FSU are lower than those charged in Western Europe, the failure of a number of FSU customers to pay Gazprom for supplies of natural gas has resulted in substantial debts to Gazprom. As at 31 December 2001, natural gas with a sales value of more than U.S.\$2.0 billion (including VAT levied in Russia but excluding charges for late payment) had been supplied to customers in the FSU for which payment had not been received. All of the amounts owed were due from customers in the Ukraine (U.S.\$1.4 billion), Belarus (U.S.\$157 million) and Moldova (U.S.\$512 million), Gazprom's largest natural gas markets in the FSU. Lithuania, Latvia and Estonia were the most reliable paying customers among the natural gas-consuming FSU countries. Since June 2000, in line with Gazprom's policy to limit supplies to non-paying customers, deliveries of natural gas to the Ukraine are in payment for Gazprom's use of transit services through the Ukraine only. Accordingly no further debts for the non-payment of gas delivered to the Ukraine have accrued.

Gazprom's management is taking specific measures to reduce arrears for payments of natural gas owed by FSU customers. In 2000, Moldova restructured a portion of its debt to Gazprom by issuing U.S.\$90 million worth of sovereign notes with a Repayment Schedule over seven years. In 2001 Gazprom's contribution of U.S.\$60 million into the charter capital of the Moldova Gas was set off against indebtedness in relation to gas supplied in 1997. An amount of U.S.\$276 million owed by the Ukraine was set off against delivery of military hardware to the Ministry of Defence of the Russian Federation. In consideration of this delivery of military hardware Gazprom received tax credits to an equivalent value of the amount owed by the Ukraine. Towards the end of 2001, the Government, the Cabinet of Ministers of the Ukraine and the Government of Moldova signed agreements which provided for the restructuring of the Ukraine's and Moldova's debt for the previously supplied natural gas in the amounts of U.S.\$1.4 billion and U.S.\$0.9 billion respectively, although the restructuring arrangements with respect to the Ukraine are yet to be finalised.

### ***Russia***

According to Goskomstat (the State Committee for Statistics), the share of natural gas production as a percentage of the total volume of primary energy production in Russia increased from 20.5% in 1980 to 39.7% in 1990 and to 49.2% in 1999, while the share of oil production decreased from 38.9% in 1990 to 30.4% in 1999 and coal production from 14.5% in 1990 to 12.2% in 1999. The strict regulatory controls imposed on the rise of natural gas prices compared to other fuels has led to the shift towards the increased use of natural gas. As a result of this pricing policy adopted by the Government, natural gas prices at the end of the year 2001 were 1.4 times lower than power-generating coal and three times lower than fuel oil as referenced against 1 tonne of equivalent fuel. In contrast to many other major industrial economies where gas is primarily used for household consumption, in Russia natural gas is sold principally for use in electricity generation and heavy industry. Gazprom believes that electricity generation accounted for 38.6% of total natural gas consumption in Russia in 2001, while industrial users accounted for 32.4%, households consumed 14.5%, and budget and municipal organisations accounted for 14.5%.

Currently, wholesale natural gas prices and transportation tariffs are regulated by the State authorities. Wholesale prices for natural gas supplied to household consumers are lower than the prices for natural gas supplied to industrial consumers. Pursuant to the Resolution of the Government of the Russian Federation No. 1021 dated 29 December 2000, the Government intends to abandon the State regulation of prices for natural gas delivered to end-consumers. Instead, the Government intends to continue regulating tariffs for natural gas transportation services provided by Gazprom (See Appendix B – Part I "Overview of the Russian Gas Industry and its Regulation").

In 2001, Gazprom delivered 278.9 bcm of natural gas (compared to 255.0 bcm in 2000) to Russian consumers. This amounts to 62.6% of the total natural gas supplied by Gazprom in 2001.

Gazprom's natural gas sales to domestic users are confined to natural gas supplies to wholesalers rather than end users. In 2001, approximately 85% of the total volume of natural gas sold by Gazprom within Russia was distributed through third party regional natural gas distribution companies and 15% of natural gas was sold by Gazprom directly to large industrial consumers.

Mezhregiongaz (a wholly-owned subsidiary of Gazprom) accounts for substantially all of Gazprom's domestic sales of natural gas. In most regions of Russia, Mezhregiongaz sells natural gas through regional gas companies which enter into direct sales contracts with end consumers in the power generation, industrial and utilities sectors. Gas for household use is delivered by the regional gas companies through gas distribution companies. In addition to selling gas to households, gas distribution companies deliver gas to all companies through low and middle pressure pipelines.

Simultaneously with the formation of regional gas companies, Mezhregiongaz altered its contracting policies. In addition to long-term contracts with terms of up to 10 years (subject to annual delivery volume adjustments), Mezhregiongaz now widely uses one year gas supply contracts. The main terms and conditions of such contracts are as follows:

- full payment for any natural gas received by the consumer. Such payment, less any advance deposits, must be made on or before the 10th day of the month immediately following the month of the relevant natural gas deliveries to that consumer;

- in the event of the consumer's failure to pay for natural gas supplies on the due date, a penalty will be charged. Should a consumer continue to fail to pay, its natural gas supplies will be restricted and finally, the consumer may be disconnected; and
- natural gas off-take by consumers in excess of the agreed daily quotas without the prior consent of the supplier entails a surcharge payable on such excess consumption (winter surcharge of 50% and summer surcharge of 10%).

#### *Delayed Payments for Gas Deliveries in Russia*

During 2001, positive results have been achieved with respect to the collection of payments for natural gas delivered to Russian consumers. This has been due to the resurgence of the Russian economy and Gazprom's co-operation with consumers and administrations of the various republics, federal cities, autonomous regions and other Russian Subjects. As at 1 January 2002, arrears of payments for natural gas supplied to Russian customers (including Russian VAT but excluding late payment charges) amounted to approximately RUR 44.9 billion (equivalent to approximately U.S.\$1.67 billion), compared to RUR 80.1 billion (equivalent to approximately U.S.\$2.98 billion) as at 1 January 2001. Cash accounted for 83.3% of sales proceeds collected in 2001 compared to 61.7% in 2000.

There are a number of consumers, pursuant to various Government regulations, who can not be disconnected. These consumers include organisations such as hospitals, household utilities (such as water and electricity suppliers), military and state telecommunication organisations as well as other consumers whose operations are vital for the Russian population's life support and environmental safety.

#### **Competition**

Gazprom is currently a major supplier of natural gas in Europe. European gas markets are, however, undergoing significant restructuring as a result, in particular, of the EU Gas Directive which came into force in 1998. The purpose of the Directive is to deregulate and liberalise the EU gas market.

This has resulted in increased competition among the major suppliers of natural gas to the region, namely Russia, Norway, Algeria and The Netherlands. Gazprom's substantial reserves and, the proximity of major Russian natural gas fields to Europe are expected to support Gazprom's competitive position in the Western European market.

The table below shows the proportion of European natural gas supply attributable to each major supplier of natural gas to the European market in 2000.

<u>Country</u>	<u>% OF EUROPEAN NATURAL GAS SUPPLY</u>
Russia (Gazprom) . . . . .	25.9
United Kingdom . . . . .	21.7
The Netherlands . . . . .	13.6
Algeria . . . . .	12.1
Norway . . . . .	10.2
Denmark . . . . .	1.6
Italy . . . . .	3.1
Germany . . . . .	4.3
Other Europe . . . . .	7.5

Source: CEDIGAZ—"Natural Gas in the World — 2001", Survey July 2001.

Whilst production in the countries of Western Europe falls as natural gas reserves in the region are depleted, a rise in exports from Algeria and Norway is becoming more pronounced as these two natural gas producing countries strive to increase their market share.

In Russia and the FSU countries, Gazprom faces competition from other oil and natural gas suppliers, in particular from independent suppliers in Russia and natural gas producing companies in Turkmenistan, Kazakhstan and Uzbekistan. Since April 1998, the independent Russian suppliers have been granted non-discriminatory access to the existing UGSS capacity in Russia. The independent suppliers (24 in total, including major users such as Itera, Pur-Land, Tomskneft, Arctic Gas, TransNafta and others) have historically been, and continue to be, competitors to Gazprom, mainly because of, in Gazprom's view, the Government's protectionist policy in providing preferential terms of gas sales for such independent suppliers (for example, zero excise tax on the sale of gas in Russia, which was in force until 1 July 2000 and a low transportation tariff set by the Federal Energy Commission for transportation of natural gas through the UGSS). Additionally, such independent suppliers can generally be more flexible than Gazprom with respect to the contractual terms and conditions that they can offer to customers in Russia and the FSU as they are not bound by the same strict regulatory requirements that apply to Gazprom.

In 2001, the independent suppliers accounted for 11.6% of natural gas transported through the UGSS. However, the competitive position of alternative suppliers is limited by the relatively small size of their reserve base, a relatively high cost of production and their dependence on access to Gazprom's transportation network.

Itera is the largest independent user of the UGSS. In addition to its own production, Itera purchased natural gas from the Yamal-Nenets Region, which received natural gas from Gazprom in lieu of mineral resource base restoration tax payments to the Region's budget. Since 1 January 2001 Gazprom has discontinued the practice of supplying natural gas in lieu of tax payments to the Yamal-Nenets Region.

Itera has significantly increased its reserve base by acquiring licences for exploration and production of natural gas reserves in Russia, as well as by acquiring other companies holding such licences, including those where Gazprom has or has had minority stakes.

In 1998, Itera acquired Gazprom's 51% stake in Rospan, a Russian natural gas producing company with over 240 bcm of licensed reserves which, due to a difficult basin structure, required a high level of capital investment for such reserves to be developed.

On 1 April 2002, the Group completed the repurchase of 32% of the shares in Purgas from Itera pursuant to the repurchase option provided by a share purchase agreement dated 10 February 1999. Purgas has a licence for the development of the substantial Gubkinskoye gas field in Western Siberia. In connection with the return of these Purgas shares Gazprom has paid Itera approximately RUR 5.8 billion.

Initially, Itera focused on customers in the Ukraine, Moldova and Belarus with a poor record of payments for natural gas supplies. Itera enjoys a higher degree of flexibility in dealing with these customers as compared to Gazprom which is reliant on these countries for transit of natural gas to Europe and whose contractual terms for the supply of natural gas are dependent on inter-governmental agreements with those countries.

Gazprom has confirmed that all transactions with Itera have been conducted on an arm's length basis and on normal commercial terms and that no member of Gazprom's Management Committee or Board of Directors or any member of their respective families or person over whom or whose assets or resources any such member of the Management Committee has direct or indirect control or significant influence or over whom any such member, together with any other party or parties has common control or significant influence, own, directly or indirectly, any equity interest in Itera.

On 23 January 2001, the Board of Directors of Gazprom appointed PricewaterhouseCoopers to review the financial, property, commercial and production relations between Gazprom and the Itera group for the years 1997 to 2000. In May 2001, the Board of Directors also adopted a code of practice entitled "Procedure for approving transactions involving stocks, shares or participation shares owned by Gazprom, its subsidiaries or affiliated companies" (the "Procedure"). PricewaterhouseCoopers has completed its review and presented the resulting report (the "Report") to a meeting of the Board of Directors on 31 July 2001.

The Board of Directors has taken the decision that the Report will remain confidential and that it will not publish or disclose the contents of the Report. The Board of Directors has considered the Report and have found that certain of its recommendations have already been addressed by the

adoption of the Procedure. The Board of Directors has directed the Management Committee to draw up plans for the implementation of those recommendations made in the Report that are not addressed by the Procedure.

## Reserves

As at 31 December 2001, Gazprom's wholly-owned subsidiaries held production licenses for approximately 26.0 tcm of A, B and C<sub>1</sub> natural gas reserves and subsidiaries, in which Gazprom holds less than 100% of the shares, held production licenses for another 5.0 tcm of A, B and C<sub>1</sub> natural gas reserves, of which 2.1 tcm is attributable to Gazprom in proportion to its actual shareholding. Gazprom's total A, B and C<sub>1</sub> estimated natural gas reserves of 28.1 tcm are equivalent to approximately 60% of the total estimated A, B and C<sub>1</sub> natural gas reserves in Russia.

Gazprom estimates its hydrocarbon reserves in accordance with Russian classifications and methodologies. Russian reserves classification standards differ significantly from standards accepted by international practices, in particular, with respect to the manner in which and the extent to which commercial factors are taken into account. Once they are reviewed and approved by the Central Reserve Commission, reserve estimates may be subject to minor changes. The results are to be published in the State Balance of Natural Resources.

In 1997-1999, DeGoyler & MacNaughton, a U.S. independent engineering consultancy evaluated, on the basis of international classifications and methodologies, approximately 72% of Gazprom and its subsidiaries' proved and probable natural gas reserves as defined by the Society of Petroleum Engineers (representing 18 of Gazprom's oil and gas fields). DeGoyler & MacNaughton (see Appendix B — Part II) confirmed:

- high accuracy of estimates for initial geological hydrocarbon reserves (approximately 98%);
- high percentage of reserves migrating to proved category (within a 90% accuracy); and
- economic effectiveness of gas condensate production in the audited fields.

As at 31 December 1999, proved and probable natural gas reserves in Gazprom's evaluated fields amounted to 18.9 tcm according to DeGoyler & MacNaughton. With a 10% discount rate factored in, these reserves had an estimated net present value of U.S.\$40.4 billion as at 31 December 1999.

Gazprom is in the process of obtaining a revised and updated independent evaluation of its natural gas reserves on the basis of international classifications and methodologies.

Substantially all hydrocarbon exploration and production licences held by Gazprom's subsidiaries were granted in 1993-1995 in accordance with the Law on Subsoil adopted in 1992 and Regulations on the Licensing and Use of Subsoil issued in 1992.

Extension of licences upon expiration is subject to approval by the federal and regional authorities which are signatories to the licences. The licences impose certain obligations on Gazprom to provide employment, develop local infrastructure, pay certain local and federal taxes and meet certain requirements relating to environmental matters. Licences may be suspended or revoked if the licencees fail to comply with their terms (See "Appendix B — Part I — Overview of the Russian Gas Industry and its Regulation"). Gazprom believes that it is substantially in compliance with the terms of all of its material subsoil licences (although technical breaches may have occurred).

As at 31 December 2001, the Group held:

- 80 production licences with initial terms of 20 to 25 years, with remaining terms of mostly between 13 and 20 years;
- 15 combined exploration and production licences with initial terms of 25 years, with remaining terms of mostly between 18 and 25 years; and
- 27 exploration and appraisal licences with initial terms up to 5 years (without development rights) and with remaining terms of up to 5 years.

Gazprom's reserves are highly concentrated. Out of total A, B and C<sub>1</sub> natural gas reserves of 28.1 tcm, 22.9 tcm (or 81.5%) are located in Western Siberia. Most of these reserves are concentrated in very large fields, such as Urengoiskoye, Bovanenkovskoye, Yamburgskoye and Zapolyarnoye. More than half of Gazprom's reserves are in the Senomanian deposit which is characterised by low bedding depth, high delivery rates of wells and dry natural gas.

As at 31 December 2001, Gazprom, through its wholly owned subsidiaries or through subsidiaries, in which Gazprom holds less than 100% of the Shares, held production licences for approximately 1,293.8 million tonnes of A, B and C<sub>1</sub> gas condensate reserves (attributable to Gazprom in proportion

to its actual shareholding), of which 779.7 million tonnes (or 60.3%) are located in Western Siberia, and 584.6 million tonnes of oil, of which 473.7 million tonnes (or 81.0%) are located in Western Siberia. The remaining reserves are located in other regions of Russia.

The following table sets out, as at 31 December 2001, a summary of all Gazprom's hydrocarbon reserves for which production licences had been awarded:

<u>Region</u>	<u>Gas (A+B+C<sub>1</sub>)</u> <i>(tcm)</i>	<u>Gas Condensate (A+B+C<sub>1</sub>)</u> <i>(million tonnes)</i>	<u>Oil (A+B+C<sub>1</sub>)</u> <i>(million tonnes)</i>

Kharasaveiskoye .....	1.3
<b>Barents Sea:</b>	
Shtokmanovskoye (Gazprom's share) .....	1.4

Source: Gazprom.

In 2000-2001, Gazprom discovered two large offshore natural gas fields (Kamennomysskoye and Severokamennomysskoye) in the delta of the river Ob. Tentative estimates of A, B, C<sub>1</sub> and C<sub>2</sub> natural gas reserves in those fields exceed 450 bcm, which would add approximately 1-2% to Gazprom's existing reserve base (calculated on the basis of Russian classifications and methodologies).

Gazprom's current strategy is to focus on the exploration of new fields and natural gas-bearing horizons in proximity to already developed fields so as to achieve a balance between production and reserves growth.

The following table sets out the number of wells drilled by Gazprom in the period from 1999 to 2001, the number of productive wells and an estimate of the total A, B and C<sub>1</sub> natural gas reserves in such wells:

	<u>1999</u>	<u>2000</u>	<u>2001</u>
Number of exploration wells drilled .....	18	14	12
of which: productive .....	12	10	5
Addition to natural gas reserves resulting from geological exploration (bcm) ...	185.8	76.1	166.2

Source: Gazprom.

## **Production**

### **Overview**

In 2001, Gazprom produced 512.0 bcm of natural gas, 9.5 million tonnes of gas condensate and 704.4 thousand tonnes of oil compared to 523.2 bcm of natural gas, 9.3 million tonnes of gas condensate and 719.0 thousand tonnes of oil produced in 2000 respectively.

Gazprom produces natural gas, gas condensate and oil from 72 fields located in various regions of the Russian Federation. The main production regions are as follows:

- *West-Siberian region.* Gazprom's main natural gas production region which is characterised by severe weather conditions. There are 12 active natural gas, gas condensate and oil and gas condensate fields which account for 92.5% of natural gas, 52.4% of gas condensate and 72.2% of oil produced by Gazprom. Several production subsidiaries, including Nadymgazprom, Urengoygazprom, Yamburggazdobycha and Noyabrskgazdobycha operate in this region.
- *Urals region.* There is one active oil and gas condensate field, Orenburgskoye, which accounts for 4.5% of natural gas, 3.8% of gas condensate and 27.3% of oil produced by Gazprom. The operating company for this field is Orenburggazprom, which produces, processes and transports natural gas.
- *North-European region.* This region is characterised by severe weather conditions and has 4 active gas condensate fields accounting for 0.6% of natural gas and 4.0% of gas condensate produced by Gazprom. The operating production company for this region is Severgazprom.
- *Volga region.* There is one active gas condensate field in the region, Astrakhanskoye, which accounts for 2.1% of natural gas and 38.7% of gas condensate produced by Gazprom. The operating company for this field is Astrakhangazprom.
- *Northern Caucasus Region.* There are 54 fields which account for 0.4% of natural gas, 1.1% of gas condensate and 0.5% of oil produced by Gazprom. Production of hydrocarbons is carried out by Kubangazprom and Kavkaztransgaz.

### **Gas**

In 2001, Gazprom produced 512.0 bcm of natural gas (compared to 523.2 bcm in 2000) which accounted for approximately 88.1% of the total amount of natural gas produced in Russia. The remainder of natural gas production in Russia is by independent natural gas producers as well as by certain oil companies.

As at 31 December 2001, Gazprom had a total of 9,302 natural gas wells and 569 oil wells in its fields.

The table below illustrates natural gas production for Gazprom's major natural gas fields for the period from 1999 to 2001:

	<u>1999</u>	<u>2000</u>	<u>2001</u>
	<i>(bcm)</i>	<i>(bcm)</i>	<i>(bcm)</i>
Urengoiskoye .....	209.1	193.3	180.4
Yamburgskoye .....	175.9	168.0	165.4
Medvezhiye .....	38.9	35.8	33.3
Komsomolskoye .....	30.4	30.5	31.0
Yamsoveiskoye .....	21.2	21.9	20.6

Others .....	<u>5.9</u>	<u>4.9</u>	<u>11.3</u>
Total Western Siberia .....	507.0	484.0	473.5
Orenburg .....	24.8	24.1	22.8
Other .....	<u>13.8</u>	<u>15.1</u>	<u>15.7</u>
Total Gazprom .....	<u>545.6</u>	<u>523.2</u>	<u>512.0</u>

Source: Gazprom.

(1) The licence to develop the Western-Tarkosalinskoye field is held by Purneftegazgeologia, an entity unrelated to Gazprom. Gazprom is contracted to develop the field and builds its infrastructure, receiving 90% of natural gas production in return. The figures in the table reflect the 90% of the natural gas production that Gazprom is to receive pursuant to the terms of the contract with Purneftegazgeologia.

Gazprom is also developing new fields, particularly in the Nadym-Pur-Taz region, with a view to utilising the increased transmission capacity which will become available following the completion of the construction of the Yamal-Europe pipelines.

Between 1996 and 2001, Gazprom commenced the development of the West-Tarkosalinskoye field, the Yamsoveiskoye field, the Kharvutinskoye area of the Yamburgskoye gas condensate field and the Western and Northern areas of the Komsomolskoye field. In addition, two gas processing units have been put on stream at the Astrakhanskoye natural gas condensate field; both units have been commissioned at the Neocom deposit of the Yamburgskoye gas condensate field and a combined gas processing plant has been put into operation at the Yubileynoye field. In 2001, total production of gas from these fields amounted to 100.4 bcm. In addition, 22 booster compressor stations with total installed capacity of 1,343 megawatts commenced operation between 1996 and 2001, and 1,038 operating wells were brought on stream.

Infrastructure is being developed at the Zapolyarnoye field. This field commenced commercial production in the third quarter of 2001, after a gas treatment plant ("GTP") had been placed in operation which allowed 7.1 bcm of gas to be delivered during the remainder of 2001. During 2002 it is anticipated that this GTP will reach its full operating capacity of 35 bcm per annum.

By the end of 2002 it is further anticipated that a second GTP will come into operation, taking the Zapolyarnoye field's total gas production to 40.8 bcm per annum.

Once the planned third of GTP is commissioned in 2004, gas production is expected to rise to 70 bcm per annum. It is anticipated that the Zapolyarnoye field will reach full capacity equal to 100 bcm by 2005. Gazprom believes that this peak rate of gas production can be sustained for a 12 year period. Gazprom believes that by bringing the Zapolyarnoye field on stream will compensate for the declining production in mature fields such as Urengoyskoye and the overall decrease in natural gas production in Western Siberia.

Gazprom intends to maintain an average annual production level of 530 bcm between the years 2003 and 2010. In order to maintain such average annual production levels, Gazprom has determined that the gas and gas condensate fields of both the Yamal Peninsula and the Karskoye Sea shelf need to have commenced production in addition to the anticipated production levels at developed fields with existing infrastructure in the years 2007 to 2010.

## Gas Condensate

Gazprom's gas condensate production in 2001 amounted to 9.5 million tonnes (compared to 9.3 million tonnes in 2000). 91.1% of such gas condensate was produced from the Urengoiskoye, Astrakhanskoye and Yamburgskoye fields. Gazprom intends to increase condensate production, particularly in the Yamburgskoye and Astrakhanskoye fields and bring on stream the En-Yahinskoye field during 2003.

The table below illustrates gas condensate production from Gazprom's major fields for the period 1999 to 2001:

	1999	2000	2001
	(thousand tons)	(thousand tons)	(thousand tons)
Urengoiskoye .....	3,772.7	3,516.5	3,635.6
Yamburgskoye .....	1,554.5	1,519.3	1,335.7
Astrakhanskoye .....	3,046.9	3,413.4	3,670.5
Others .....	799.5	846.0	840.2
Total .....	<u>9,173.6</u>	<u>9,295.2</u>	<u>9,482.0</u>

Source: Gazprom.

The production of gas condensate has increased over recent years as new gas condensate fields have been brought on stream.

## Oil

In 2001, Gazprom produced approximately 704.4 thousand tonnes of oil (compared to 719.0 thousand tonnes in 2000) from the perimeters of its two main gas condensate fields, namely Urengoyskoye and Orenburgskoye.

The table below illustrates oil production in Gazprom's major fields for the period 1999 to 2001:

	1999	2000	2001
	(thousand tons)	(thousand tons)	(thousand tons)
Urengoyskoye .....	543.1	512.0	508.3
Orenburgskoye .....	173.4	205.5	192.6
Others .....	—	1.5	3.5
Total .....	<u>716.5</u>	<u>719.0</u>	<u>704.4</u>

Source: Gazprom.

## Gas and Gas Condensate Processing

Gazprom operates six natural gas and gas condensate refineries which remove hazardous and corrosive substances from natural gas and gas condensate, thoroughly dry the natural gas and prepare it for transportation. The stabilisation of gas condensate results in liquefied gases and a broad range of oil products.

Natural gas and gas condensate refineries are sophisticated, state of the art plants that combine chemical facilities with petroleum refining facilities. Some plants have implemented unique technologies for treating natural gas with a high sulphur content (the Astrakhan plant treats natural gas with hydrogen sulphide and carbon dioxide content reaching 40%), and produce odorants, technical carbon and gaseous and liquid helium. All such plants are directly linked to respective gas condensate fields and constitute single technologically-related complexes.

*Astrakhan Gas Refinery.* This is an all-round refinery for the processing of natural gas with a high sulphur content and gas condensate extracted from the Astrakhan gas condensate field. The plant comprises two lines, each having an annual capacity of 6 bcm of refined natural gas. The refinery's products include:

- dry market-grade natural gas which is fed into trunk pipelines;
- natural gas-derived sulphur;
- motor gasoline;
- diesel;
- residual fuel oil;
- industrial-grade propane/butane mixture; and
- industrial-grade butane.

*Orenburg Gas Refinery.* One of the world's largest refineries, it processes natural gas with a high sulphur content and gas condensed hydrocarbons. The refinery's products include:

- dry market-grade natural gas;
- stabilised gas condensate;
- liquefied natural gas;
- multi-component hydrocarbon distillate (MHD);
- natural gas-derived sulphur; and
- odorants.

*Orenburg Helium Plant.* This is Russia's largest producer of helium. The plant's products include:

- gaseous and liquefied helium;
- ethane;
- multi-component hydrocarbon distillate (MHD); and
- liquefied natural gas.

*Sosnogorskys Gas Refinery.* The refinery's products include:

- dry market-grade natural gas;
- liquefied natural gas;
- stabilised gas condensate;
- motor gasoline; and
- technical carbon.

The West Siberian refining complex comprises two facilities: the Urengoy Condensate Preparation Plant and the Surgut Condensate Stabilisation Plant.

*Urengoy Condensate Preparation Plant.* The plant's products include:

- de-ethanised natural gas (used as feedstock for further refining at the Novo-Urengoy Gas Chemistry Complex—see "International Projects and Alliances");
- stabilised gas condensate;
- motor gasoline; and
- diesel.

*Surgut Condensate Stabilisation Plant.* One of the world's largest refining complexes, it processes oil and gas condensate mixture produced from the West Siberian fields. The refinery's products include:

- stabilised condensate;
- motor gasoline;
- diesel;
- liquefied gases; and
- isopentane.

The table below shows the volumes of key products which were produced and refined by the Group in the period from 1999 to 2001:

	<u>Measuring Unit</u>	<u>1999</u>	<u>2000</u>	<u>2001</u>
<b>Processing of the raw material:</b>				
Gas processing .....	bcm	34.8	35.3	34.6
Primary processing of oil and gas condensate .....	thousand tonnes	4,950	4,881	4,966
<b>Processing product:</b>				
Dry natural gas .....	bcm	28.0	27.9	27.1
Liquefied natural gas .....	thousand tonnes	1,364	1,834	2,111
Ethane .....	thousand tonnes	310	302	286
Stable condensate .....	thousand tonnes	5,912	6,049	6,048
Gazoline .....	thousand tonnes	1,103	1,124	1,216
Diesel fuel .....	thousand tonnes	1,521	1,513	1,617
Furnace fuel oil .....	thousand tonnes	358	380	384
Sulphur .....	thousand tonnes	4,068	4,484	4,695
Helium .....	thousand cubic metres	4,628	5,274	5,336
Odorant .....	thousand tonnes	3,177	3,316	3,411
Technical carbon .....	thousand tonnes	24	26	29
De-ethanised natural gas .....	mcm	797	733	736.5

Source: Gazprom.

## Transportation

Gazprom owns and operates the UGSS, a single centrally controlled system for natural gas production, processing, transportation, storage and deliveries. The UGSS includes the world's largest high pressure trunk pipeline system with approximately 150,000 km of pipelines. Gas transportation is powered by 253 compressor stations with a total capacity of approximately 42,600 MW. Seasonal peak loads are levelled off using 22 underground natural gas storage facilities with an active storage capacity of approximately 57.9 bcm.

Gas for domestic consumption and export is transported for an average distance of approximately 2,500 km in Russia. Gazprom's dispatch management centre, located in Moscow, controls and manages the transportation of gas in Russia.

The total volume of natural gas consumed by the pipeline system was approximately 45.7 bcm in 2001, 86% of which was used for internal consumption and the rest absorbed by technical losses (including natural gas leakage).

The following table sets forth some key figures in respect of the UGSS natural gas balance for 1999 to 2001 (excluding Central Asia transit gas):

	<u>1999</u>	<u>2000</u>	<u>2001</u>
	<i>(bcm)</i>	<i>(bcm)</i>	<i>(bcm)</i>
Total natural gas transported (including natural gas produced by independent suppliers) .....	607.7	608.8	590.3
Underground storage:			
Withdrawals .....	(52.5)	(53.3)	(48.3)
Additions .....	52.6	60.3	46.8
Changes in natural gas volume within UGSS pipelines .....	(0.3)	0.3	0.4
Exports:			
Western Europe .....	88.4	90.4	86.6
Central and Eastern Europe .....	38.4	38.6	40.4
FSU .....	77.7	63.6	52.9
Technological needs and transportation system losses <sup>(1)</sup> .....	<u>50.8</u>	<u>47.1</u>	<u>45.7</u>
Deliveries within Russia/Russian Economy .....	<u>299.8</u>	<u>308.4</u>	<u>317.5</u>

Source: Gazprom.

(1) Includes own consumption required to run the natural gas pump turbines, plus technological losses, including gas leakages.

Gazprom's pipeline system transports natural gas principally from the large Western Siberian fields westward towards the heavily populated regions of Russia, the main export markets of Western and Central and Eastern Europe, Turkey and certain FSU countries. Other parts of the pipeline system originate in the Volga-Urals region natural gas fields, including the Orenburgskoye and Astrakhanskoye fields. Several large pipeline systems from Kazakhstan also enter Russia from natural gas fields in Turkmenistan, Uzbekistan and Kazakhstan.

All of the natural gas exported by Gazprom to Europe (except Finland) is transported through pipelines maintained by other countries, primarily the Ukraine. Gazprom pays transit fees for the use of these pipelines. The negotiations of these fees and access to these pipelines are important elements of Gazprom's export business. Transit fees are a significant element of the natural gas price to end users in Europe.

The maintenance of Gazprom's natural gas transportation business is organised on a regional basis through specialised gas transportation subsidiaries and a number of production subsidiaries which also operate pipelines. The gas transportation subsidiaries are responsible for the operation and maintenance of pipelines and for the transit of natural gas to regional and local distribution companies or directly to end-consumers. Gazprom's subsidiaries have laid, at their own expense, 1,000 km of gas transportation pipelines in 2001. Gazprom also owns various interests in regional and local distribution companies equating to around a 10% market share of the Russian gas distribution business.

The high level of integration of Gazprom's pipeline network, achieved by the use of multiple and parallel pipelines, inter-connectors and underground storage facilities, ensure that natural gas deliveries to distributors, export customers and consumers are reliable. Gazprom believes that within the past ten years there have been no significant supply interruptions to consumers, despite several pipeline failures, as a result of the use of available spare transportation capacity within the UGSS.

The construction of Gazprom's gas pipeline system was started 57 years ago with the first Saratov-Moscow pipeline, however the majority of Gazprom's gas pipeline system was constructed during the period from 1970 to 1990. The age of the pipeline system, as at 1 January 2001, is shown in the table below:

<u>Years Since Construction</u>	<u>Length (km)</u>	<u>%</u>
Up to 10 years .....	25,169	17
11-20 years .....	63,239	43
21-33 years .....	39,360	26
Over 33 years .....	<u>21,132</u>	<u>14</u>
Total .....	<u>148,900</u>	<u>100</u>

Source: Gazprom.

The continuous and long term operation of the pipeline system, combined with ageing and worn and obsolete equipment, dictate the maintenance requirements of the gas lines and compressor station facilities. Annual capital repairs and preventative maintenance programmes are carried out with a view to enhancing efficient gas flow distribution, reliable gas supply and technological and environmental safety of the transportation operations. Maintenance work is preceded by gas pipeline inspection achieved through various means. In 2001, 11,300 km of pipelines were inspected using in-the-pipe probes, while 40,000 km of trunk gas lines were checked using electric measurements. Following such diagnostic checks, 1,111 km of pipelines and 251 underwater crossings were overhauled. As a result of such pipeline repairs, the incidence of faults that involve interruptions or restrictions of gas supply dropped from 0.58 per 1000 km of pipelines in 1985 to 0.19 in 2001.

Under the auspices of the EBRD, 13 Western European companies, (in conjunction with Gazprom's specialists) conducted a two-year study of the UGSS between 1993 and 1995, in order to assess the system's condition and to formulate measures for improving its performance. The final

report, which was based on an analysis of the operation of the UGSS in 1995, showed that, in most cases, the extensive branching structure of the UGSS, together with the availability of spare pipeline through put capacity, enabled natural gas flow to be either re-routed or increased in the case of an emergency.

Gazprom is continually working to improve the UGSS. It has developed a detailed programme to refurbish a number of its compressor stations and gas pipelines by year end 2005. The programme includes plans for the replacement of worn out and obsolete compressor gas pumping units with state-of-the-art hardware as well as the implementation of process controls and optimisation systems, both for individual pipelines and for the system as a whole. To date, this programme has resulted in 53 gas pumping units being refurbished and 35 replaced. The new units have a total power output of 508MW.

Gazprom believes that the programme will allow it to achieve a significant reduction in its in-house gas consumption as well as a reduction in atmospheric pollution. The programme has already delivered improvements with emissions in 2000 being 26,200 tons lower than in 1999. This figure includes a reduction of carbon oxide emissions by 4.7% and of nitrogen oxides emissions by 5.6%.

Gazprom outsources a significant amount of its pipeline construction work to third party contractors through a tender process. Construction contracts are awarded to the most competitive bidder by the Gazprom Tender Committee. Sroytransgaz has been a successful bidder for a large number of Gazprom's construction projects, due to the competitive terms that it has offered and its historical experience of previous successful co-operation with Gazprom.

Gazprom has confirmed that all transactions with Sroytransgaz have been conducted on an arm's length basis and on normal commercial terms.

Gazprom provides the independent suppliers with access to the UGSS subject to the following requirements:

- Availability of spare transport capacity for the time period proposed by the independent supplier;
- Adequate quality and technical parameters of natural gas suppliers;
- Availability of secondary routes for supply and off-take of natural gas equipped with adequate metering devices; and
- Availability of natural gas supplies and relevant customer demand for the proposed time period.

During the year 2001 a total of 24 independent gas suppliers, with a cumulative volume of gas transported equating to 11.6% of total volume of gas transported through the UGSS, had access to Gazprom's transportation system.

### **Underground Storage**

Currently Gazprom operates 22 underground storage facilities in Russia. By the beginning of the 2001/2002 heating season market-grade natural gas reserves equal to 60 bcm of gas were stored in these storage facilities. The capacity of the underground storage facilities allowed Gazprom to supply 17% of the annual volume of gas consumption from these facilities of which 25% were supplied in winter. Currently 5 new underground gas storage facilities are under construction.

In 2001, pursuant to existing contracts, Gazprom arranged storage of a total of 1.6 bcm of Russian natural gas in Latvia and Germany and 3.6 bcm in Ukraine under previously agreed storage lease contracts.

### **Electricity**

The operation of the industrial facilities owned by Gazprom is supported by Gazprom's own generation facilities. Currently Gazprom operates 73,500 km of electricity transmission lines and 9,400 electric power stations with a total capacity of 8.6 million kW.

Production of electricity in 2001 reached 1,506.3 GWh, which is an increase of 34.8% on the previous year.

## Communication

Gazprom has developed an extensive internal communications network, which it maintains and operates in conjunction with the UGSS with a view to ensuring the technical reliability and safety of the UGSS.

The system consists of a ground based network and a satellite system. The ground based network includes 72,000 km of cable communication lines, 17,100 km of multi-channel radio lines and 628 automated telephone stations with total capacity of 245,000 numbers. The satellite system consists of the satellite "Yamal-100" and 105 land-earth stations which transmit to and receive signals from the satellite.

## Strategy

Gazprom's main strategic objective is to increase profitability and to further strengthen its position in the domestic, FSU and European gas markets while continuing to satisfy the demand for natural gas and to improve payment discipline in Russia.

***Increase efficiency of domestic operations:*** The efficiency of domestic operations is contingent on the improvement of payment discipline and the profitability of domestic sales.

***Improve profitability of domestic sales:*** The domestic natural gas prices are controlled by the state. Gazprom continues to work with state bodies to eliminate the current disparity between export and domestic gas prices. The Government has decided to increase domestic natural gas prices by 20% as of 15 February 2002.

***Further improve payment discipline:*** Gazprom has improved and intends to further improve payment discipline in the domestic market by imposing stricter payment requirements and targeting its largest debtors.

***Achieve planned long-term production levels:*** Gazprom plans to maintain future production at an average annual level of 530 bcm for the next ten years. In 2001, the Zapolyarnoye natural gas field with an anticipated annual production level of 100 bcm was brought on stream.

***Expanded export capacity:*** Gazprom is working on the construction and expansion of its export transportation network, including the Yamal-Europe, Blue Stream and Trans-Balkan pipeline projects, provide diversification of routes and greater security of gas deliveries to Gazprom's principal markets.

***Maintenance of long-term natural gas supply contracts:*** Gazprom intends to maintain its portfolio of long-term natural gas supply contracts with European customers, capitalising on an increasing demand for gas in the region and its track record as a reliable supplier.

***Vertical integration and diversification into petrochemicals production:*** This strategy is being pursued both domestically and internationally through acquisitions and joint ventures aimed at capturing wider distribution and value-added margins and securing its competitive position in the domestic, FSU and European gas markets. Gazprom holds 51% of voting shares in Sibur, a major Russian petrochemical company which owns assets in certain FSU countries as well as in Central and Eastern Europe.

***New Markets:*** Gazprom plans to develop new markets with particular focus on Southern Europe, the United Kingdom and China.

## **International Projects and Alliances**

### ***The Yamal-Europe Pipeline Project***

In order to increase the export of Russian natural gas to Europe, Gazprom is proceeding with the Yamal-Europe project. The Yamal-Europe project consists of constructing pipelines from the northern parts of the Tyumen region in Russia to Germany, running through the territories of Belarus and Poland. The projected annual capacity of the first stage of the pipeline is approximately 30 bcm. The new transportation route, is being constructed in reverse order, i.e. from the consuming regions to the production areas.

In October 1999 the most important section of the first pipeline (approximately 1,230 km) running from compressor station Nesvizhskaya in Belarus to connect with the German STEGAL pipeline and three compressor stations became operational.

The commissioned facilities account for more than 50% of the pipeline potential output. Gas supplies via Yamal-Europe started on 7 November 1999. The owner of the German section of this pipeline is Wingas, the joint venture between Gazprom and Wintershall and of the Polish section is Europol Gaz, a joint venture in which Gazprom, PGNiG (the 100% state-owned Polish gas company) and Polish joint stock company Gaztrading participate. Completion of the remaining pipeline section within Belarus is expected to take place in 2002-2003.

In addition, in Russia, construction of the gas lines of the pipeline from Torzhok to the Belarus border is expected to be completed in 2002-2003. Torzhok is a key pipeline junction north of Moscow where several of Gazprom's trunk pipelines converge.

In addition to increasing exports, the Yamal-Europe Project is expected to enhance supply reliability through the creation of a new export route. Connecting the Yamal-Europe pipeline to the existing natural gas transportation network in Germany will allow for the full integration of this pipeline into the European gas network.

A decision of Gazprom as to whether to construct a second Yamal-Europe trunk pipeline will depend on (i) demand for natural gas in western Europe and (ii) the economic efficiency of exporting gas in this manner.

### ***Blue Stream Project***

In alliance with key Italian gas purchaser and distributor ENI, Gazprom is constructing a new gas trunk pipeline from Russia via the Black Sea to Turkey. It is anticipated that annual volume of natural gas exports along this pipeline will amount to 16 bcm from 2008. Gazprom expects to commence natural gas exports to Turkey via the Blue Stream Project route in 2002. It is anticipated that, by 2008, the total volume of Russian natural gas exports to Turkey will be 30 bcm. Upon completion, this project will further open the promising Turkish market to Gazprom.

In November 1998, Gazprom and ENI entered into a memorandum of understanding to participate on an equal basis in Blue Stream Pipeline Company B.V., a special project company for the development and operation of a natural gas transportation system from Dzubga (including the Beregovaya compressor station located in the vicinity of Dzubga in Russia) to Samsun in Turkey (the "Offshore Section"). This system will be connected to Gazprom's existing pipeline network through a new pipeline running from Izobylnoye to Beregovaya (the "Onshore Section"). The Onshore Section and the Offshore Section together constitute the Blue Stream Project.

The pipeline from Russia to Turkey will be approximately 760 km long of which about 390 km will run under the Black Sea. The Onshore Section of the Blue Stream Project is connected to the existing Gazprom pipeline network through a pipeline from Frolovo to Izobilnoye, which was commissioned in 1998.

A pipeline connection from Russia to Turkey running through the Black Sea is over 980 km shorter when compared to an onshore pipeline passing through the territories of the Ukraine, Moldova, Romania and Bulgaria.

The total estimated construction cost of the Offshore and Onshore Sections of the Blue Stream Project is approximately U.S.\$3.3 billion. The value of the turnkey contract for the construction of the Offshore Section of the pipeline and the Beregovaya compressor station is approximately U.S.\$1.7 billion.

To fund the project Gazprom and Blue Stream Pipeline Company B.V. has signed agreements with a consortium of Western European and Japanese banks to raise loans to finance the Blue Stream Project. The total amount of loans available to Gazprom and Blue Stream Pipeline Company B.V. for the Blue Stream project is U.S.\$1.76 billion where Gazprom is the borrower of record in respect of U.S.\$573 million (the first tranche of which, amounting to U.S.\$117 million, was drawn down by Gazprom in May 2001) and Blue Stream Pipeline Company B.V. is the borrower in respect of U.S.\$1.187 billion. At 30 September 2001 Blue Stream Pipeline Company B.V. drew down RUR 23,747 million (U.S.\$808 million of the credit facility, of which RUR 11,697 million (U.S.\$398 million) was guaranteed by Gazprom. The remainder of the financing for the Offshore Section of the Blue Stream Project is covered by the various contributions of the equity sponsors of the project, Gazprom and SNAM (ENI's subsidiary) and a U.S.\$866 million loan provided under the guarantee of SNAM. Any additional financing required for the Onshore Section of the Blue Stream Project will be provided by Gazprom out of its own funds and through other debt financing. For example, in February 2001, Gazprom received a loan for these purposes of €250 million from a consortium of international banks led by Bayerische Hypo-und Vereins Bank. The loans received by Gazprom to implement this project are issued on a secured basis.

### **ENI**

On 11 February 1998, Gazprom concluded a strategic alliance agreement with ENI. The agreement envisaged co-operation between the parties on the exploration and production of hydrocarbons. In accordance with the terms and conditions of the strategic alliance agreement, the parties are to establish a joint venture whose aim is to study and develop the paleozoic deposits of the Astrakhan field. The constitutive documents for the joint venture are in their final drafting stages.

### **Shell**

On 17 November 1997, Gazprom signed a strategic alliance agreement with Shell, which contemplated the parties' joint co-operation on several projects, including a project associated with prospecting, assessment, development and production of oil and natural gas from the Neokomian deposits of the Zapolyarnoye field, which totals 516.5 bcm of A, B, C<sub>1</sub>, and C<sub>2</sub> natural gas reserves (according to Russian classifications and methodologies), 88.8 million tonnes of gas condensate reserves and 59.4 million tonnes of oil reserves. Gazprom has, in co-operation with Shell, performed a preliminary review and a feasibility study of the project. The joint venture is expected to produce approximately 14.6 bcm of natural gas and 2 million tonnes of gas condensate per year by the third year of operation.

So far, the parties are in the process of negotiating the draft joint venture agreement, coordinating projects for Shell's participation in the extension of the gas transportation system, and negotiating the terms of financing and implementation of the production sharing agreement. In accordance with the strategic alliance agreement, Shell proposed to create an international consortium to oversee investment in the Ukraine's gas transit system, the main objective of which would be to organise proper management and control over that system. The parties are presently continuing consultations in respect of the above issues. Gazprom and Shell are continuing negotiations with Petro China in connection with a West-East trans-Chinese gas pipeline construction project. In December 2001 the parties signed an Intermediate Framework Agreement on the creation of a joint venture company by the Gazprom-Shell consortium and Petro China.

### **BASF**

Gazprom is supplying an increasing proportion of natural gas to the Western and Central and Eastern European markets via transportation and marketing companies in which it has equity interests.

In Germany, Gazprom and BASF agreed to undertake joint marketing of natural gas and to build and operate gas pipelines and supply networks in 1990. This agreement led to the construction of the STEGAL gas pipeline which, with a total length of 313 km, connects the MIDAL gas pipeline with the Czech natural gas pipeline system.

Gazexport, through its German subsidiary, Zarubezhgaz Erdgashandel ("ZGG"), owns a 35% shareholding in Wingas. Wingas in turn owns the MIDAL-STEGAL pipeline system and a natural gas storage facility at Rehden with a current utilised capacity of 4.2 bcm. The total amount invested into the MIDAL-STEGAL pipeline system and the gas storage facility at Rehden amounts to approximately DM 4 billion, including Gazprom's contribution of DM 1.4 billion.

Gazexport and Wintershall each have a 50% shareholding in the gas trading company Wintershall Erdgas Handelshaus ("WIEH"). WIEH purchases its natural gas supplies exclusively from Gazprom under long-term contracts. Two long-term natural gas supply contracts have been concluded with WIEH for a total annual volume of 13.8 bcm. Sales by WIEH are to Wingas, Verbundnetzgas, a major natural gas distributor in eastern Germany (of which ZGG owns approximately 5%) and BASF. Wingas' gas sales are to municipal undertakings, gas utilities and major industrial consumers. Gazprom has concluded two long-term natural gas supply contracts with Wingas for a total annual volume of 5.8 bcm. In 2001, Gazprom supplied 13.5 bcm of natural gas to Wingas and WIEH for sale in Germany and some other Western European countries. Overall, Gazprom supplied 111.1 bcm of natural gas to WIEH and Wingas between 1991 and 2001. During the same period, Gazprom supplied 30.0 bcm of natural gas to WIEH for resale in Bulgaria and Romania.

At the end of 1998, the 294 km long WEDAL pipeline became operational, linking the Wingas pipeline network with the Belgian pipeline system and the Interconnector pipeline which links the UK gas transportation system to the continent. Gazprom has acquired a 10% interest in the Interconnector pipeline. Initially, the WEDAL pipeline was designed to transport UK gas under contracts between Wingas, British Gas and Conoco and provides Wingas with the security of supply from diverse transportation sources. Gas supplies from Continental Europe to the UK may also be carried through the Interconnector pipeline.

At the end of 1999, a 340 km pipeline, known as the YAGAL pipeline, with a capacity of 26.0 bcm per year was put into operation. This pipeline connects the Yamal-Europe pipeline with the STEGAL pipeline. The completion of this pipeline enabled Gazprom to expand its supplies of natural gas to European countries and improved the reliability and flexibility of supplies of Russian natural gas to Germany.

Under the strategic alliance agreement between Gazprom and BASF, a feasibility study for the joint development of the Achimovsk formations of the Urengoykoye field was jointly prepared and coordinated by Gazprom and Wintershall. The terms and conditions of the joint venture are currently being negotiated.

### ***Transbalkan Pipeline Project***

Gazprom is evaluating the possibility of increasing and diversifying its gas transportation routes to the Balkan states and Turkey. In order to increase natural gas supplies to the Balkan states, Gazprom, in association with various national companies, is working on the expansion and modernisation of the existing pipeline network in the Ukraine, Romania and Bulgaria (the Transbalkan Pipeline Project).

Expansion of transit capacities within the Ukraine providing for the construction of a gas pipeline and a compressor station is being gradually implemented. A compressor station, Tarutino, was put into operation in 2001 within the operating transit gas pipeline Ananiev-Tiraspol-Izmail. At present the next phase of the project, the construction of loopings within the gas pipeline Ananiev-Tiraspol-Izmail, is being introduced. The Transbalkan pipeline project envisages the completion of construction and expansion of the transit capacities within Romania and Bulgaria in 2002.

### ***South Pars***

On 28 September 1997, Total (now TotalFinaElf), signed an agreement with the National Iranian Oil Company for the development of the second and third phases of the South Pars field. Gazprom, Petrolian Nasional Berhad (Petronas), the Malaysian state oil company and Total signed a partnership agreement for the development of the project, with a total cost of U.S.\$2 billion. Pursuant to the terms of the agreement, Gazprom obtained a 30% interest.

Presently, the construction of two production platforms and two off-shore pipelines is almost completed and the completion of an on-shore gas complex is expected in March 2002. Production of natural gas and gas condensate and oil is expected to start in April 2002.

## **Rosneft**

Within the framework of an agreement entered into by Gazprom and Rosneft on 4 October 2001 to create a joint venture company for the development of Kharampurskoe, Byngayakhinskoe, Etypurovskoe, Prirazlomnoe and Shtokmanovskoe fields, work is being carried out on the Kharampurskoe field project.

## **Novy Urengoy Chemical Complex**

The Novy Urengoy Chemical Complex was designed in cooperation with Salzgitter Anlagenbau and Linde, with some BASF participation. The majority of the equipment necessary to build the Novy Urengoy Chemical Complex in Western Siberia has been delivered.

The Novy Urengoy Chemical Complex will process 1.62 million tonnes of de-ethanised natural gas a year, yielding 340 thousand tonnes of ethylene to be used as feedstock for 300 thousand tonnes of high pressure polyethylene. By-products will include 280 thousand tonnes of long distillate of light hydrocarbons as well as up to 920 thousand tonnes of annual methane gas production. The loan agreement for the financing of this project is currently being negotiated.

## **Other Joint Ventures**

In addition to its activities in Germany, Gazprom has also established further joint ventures to transport and market natural gas in other European markets. In certain countries, Gazprom's subsidiaries or affiliates also distribute natural gas. Gazprom's strategy of acquiring equity participations in gas transportation companies and gas marketing companies, which has been successfully implemented in Germany, has also been applied in other European markets. In Finland, Gazprom acquired a 26% interest in the national gas distribution system in 1994 through the formation of Gasum, a joint venture with Neste (now Fortum). Gasum is the sole distributor of natural gas in Finland and is supplied exclusively by Gazprom. In Poland, Europol Gaz, a joint venture in which Gazprom has a 49% interest, is engaged in the construction of the Polish section of the Yamal-Europe Project. Post completion, Europol Gaz will own the Polish section of the transit pipeline and transport Russian natural gas to Germany. The following table summarises the main natural gas transportation and marketing joint ventures in which Gazprom, or Gazexport, participated in other European markets as at 30 September 2001:

<b>Country</b>	<b>Entity</b>	<b>Interest</b>	<b>Joint Venture Partner</b>	<b>Description</b>
Austria	GWH Gas und Warenhandelsgesellschaft	50%	OMV	Gas marketing and general trading company
Bulgaria	Overgaz	50%	Overgaz	Gas transportation and marketing of Russian natural gas in Balkan countries
Finland	Gasum	25%	Fortum Oy, Ruhrgas, The State of Finland, Finnish companies	Gas transportation and marketing
France	FRAGAZ	50%	Gaz de France	Gas trading and general trading activities
Greece	Prometheus Gas	50%	Copelouzos Group	Gas marketing and natural gas transport management
Hungary	Panrusgaz	33%	MOL	Gas marketing
Italy	Promgas	50%	SNAM	Gas marketing
Poland	Europol Gaz	49%	PGNiG Gas Trading	Transportation, construction, ownership and operation of the Polish section of the Yamal-Europe project
Poland	Gas Trading	16%	PGNiG, Bartimpex, WIEH Wenglokoks	Gas marketing
Slovakia	Slovrusgaz	50%	SPP	Gas transportation and marketing, general trading business
Turkey	Turusgaz	45%	Botas, Gama	Gas marketing

Source: Gazprom.

## Non-Core Investments

The Group engages in various non-core activities which are ancillary to its main business. These supporting operations include construction and production of construction materials, food processing and procurement, transportation (including auto transport and aviation), and manufacturing of equipment for the gas industry and telecommunications amongst others.

In addition, Gazprom has investments in various other businesses which are not related to its core operations. Such investments mainly represent equity holdings which have been received in the course of privatisation (e.g. interests in agricultural, civil, construction, medical care enterprises and others), acquired either through debt for equity swaps (e.g. stakes in regional utility companies) or directly for strategic and other considerations. Amongst the Group's largest investments is Gazprombank, although Gazprom's liability is limited to the extent of its equity participation, Russia's fourth largest bank if measured by total assets, which services the majority of Gazprom's banking needs; Gazfund, the largest private pension fund in Russia, which Gazprom uses to provide pension services to its employees; and Gazprom-Media, Gazprom's media holding company with stakes in a number of media outlets, including NTV, Russia's largest independent TV channel. Following recent successful litigation to enforce the share pledge that was given as collateral for the guarantee by Gazprom of loans to Media-MOST, NTV's parent company Gazprom-Media, as of the date of this Offering Circular, controls a 65% stake in NTV and more than 50% in a number of other Media-MOST companies. Gazprom has, however, recently started preparations for the sale of its stakes in NTV and other Media-MOST companies and has obtained an independent evaluation of these stakes.

## Capital Expenditure

Net cash used for investment activities decreased by 3% from U.S.\$2,218 million in 1999 to U.S.\$2,156 million in 2000. An overall 15% increase in cash capital expenditure from U.S.\$1,635 million in 1999 to U.S.\$1,884 million in 2000 was made possible by the availability of cash flow generated internally through improved operating performance.

The majority of Gazprom's fixed asset investments (both cash and non-cash) were related to capital expenditure on the transportation infrastructure and production assets. Capital expenditure on the transportation infrastructure comprised U.S.\$1,617 million, or 35% of total capital expenditure in 2000, down from U.S.\$3,269 million in 1999 due to the completion of certain pipeline construction projects. Capital expenditure on production assets comprised U.S.\$1,687 million, or 36% of total capital expenditure in 2000, increasing from U.S.\$1,246 million in 1999 in line with Gazprom's strategy to develop new gas fields, including Zapolarnoye, in order to maintain production volumes.

Capital expenditure by category for 1999-2000 amounted to the following:

	Year ended 31 December 2000 in U.S.\$ million (1)	Year ended 31 December 2000 in RUR million(2)	Year ended 31 December 1999 in U.S.\$ million (1)	Year ended 31 December 1999 in RUR million(2)
Transportation .....	1,617	47,515	3,269	96,063
Production .....	1,687	49,578	1,246	36,623
Refining .....	103	3,025	71	2,073
Distribution .....	13	379	48	1,414
Other .....	<u>1,205</u>	<u>35,425</u>	<u>1,065</u>	<u>31,293</u>
Total .....	<u>4,625</u>	<u>135,922</u>	<u>5,698</u>	<u>167,466</u>

Notes:

- (1) Totals may not add due to rounding. The U.S.\$ amounts shown above have been translated from the Rouble amounts at the rate of RUR 29.39 = U.S.\$1.00, which is the rate published by the Central Bank of Russia on 30 September 2001.
- (2) All Rouble amounts have been restated in terms of the equivalent purchasing power of the Rouble as at 30 September 2001.

*The U.S.\$ amounts are provided for convenience only and should not be construed as representations that the Rouble amounts have been or could be converted into U.S.\$ at that or any other rate or as being representative of U.S.\$ amounts that would have resulted if Gazprom reported its IAS financial statements in U.S.\$.*

Net cash used for investment activities for the nine month period ended 30 September 2001 was RUR 32,092 million (U.S.\$1,092 million).

In 2001, for the implementation of the investment programme Gazprom approved a U.S.\$3.23 billion capital expenditure budget. In 2002 Gazprom plans to direct approximately U.S.\$4.5 billion for the implementation of the investment programme, an increase attributable to the objective of maintenance of gas production at the level of 520 bcm.

### **Research and Development**

Gazprom has pursued a policy of investing in research and development in a number of priority scientific and technical areas. There has been a focus on expanding the mineral resource base of the gas industry, developing hydrocarbon deposits in new regions (for example, Ob-Taz Estuary, Arctic offshore fields and the Yamal Peninsula), improving the reliability of the UGSS, developing off-shore oil and gas reserves, creating energy and resource saving technologies and next generation equipment, increase in the use of alternative resources of hydrocarbon raw materials, improved organisational and management systems of Gazprom, optimised financial, investment and pricing policies and increased ecological and industrial safety.

Total spending on research and development amounted to U.S.\$165 million in 2000 which is an increase of 55% from U.S.\$107 million in 1999. For the nine month period ending on 30 September 2001 total spending on research and development was U.S.\$67 million.

### **Environmental Matters**

Gazprom's current environmental standards and policy follow existing Russian environmental regulations and laws. Gazprom generally considers, with due regard to existing Russian and international environmental standards, the environmental impact at the planning stage and takes this impact into consideration at all later stages of the project. To date, there have been no serious accidents that have had a significant environmental impact.

Gazprom has developed and continues to improve a system for monitoring harmful leaks, water contamination, and the quality of air, water and soil in the Russian regions in which UGSS objects are located based on International Standard ISO 14000. In a number of regions this system has become an integral part of the Russian Federation's unified State Ecological Monitoring System.

In accordance with Russian legal requirements relating to environmental protection, Gazprom makes obligatory payments to ecological funds and state authorities for environment pollution: RUR 74.1 million in 1999; RUR 75.8 in 2000 and RUR 119.0 million in 2001. The increase in the amount of the obligatory payments is the result of the annual introduction of increasing correction coefficients. Moreover Gazprom paid the following environmental penalties: RUR 0.85 million in 1999, RUR 0.8 million in 2000 and RUR 0.5 million in 2001 relating to environmental protection purposes.

Gazprom's 1999 balance sheet, prepared in accordance with IAS, contains provisions for environmental payments (which take into account probable liabilities that can be reasonably estimated). Such provisions have been made in accordance with what Gazprom believes is a reasonable and prudent policy which takes into account payments made in prior years, among other factors. However, in Russia in particular, Federal, regional and local authorities may enforce existing laws and regulations more strictly than they have done in the past and may impose stricter environmental standards or higher levels of fines and penalties for violations than those now in effect. Accordingly, Gazprom's management is unable to estimate the future financial impact of Gazprom's environmental obligations with a high degree of certainty. However, Gazprom does not expect environmental obligations to have a material, adverse effect on its future financial condition.

### **Litigation and Investigations**

Gazprom has been and continues to be, from time to time, the subject of legal proceedings and other investigations in the ordinary course of its business.

In January 2001, the Accounting Chamber of the Russian Federation completed a five month audit of Gazprom. The audit report stated that in 2000 there was a decline in Gazprom's gas production compared to 1999; that there was a decline in capital expenditure; that Gazprom transferred natural gas to the Yamal-Nenets autonomous region as payment for the mineral resource base restoration tax; that there was an increased growth in accounts receivable and payable, that Gazprom had granted

low or interest-free loans to third parties; that Gazprom had made long-term investments in non-core activities and that Gazprom in 1998 and 1999 was granted, contrary to tax legislation, a special tax regime which resulted in 1999 of the underpayment to the Federal Budget of RUR 22,020 million.

Gazprom has received a request for information from the European Commission with respect to exclusivity clauses in Gazprom's contracts with various Italian utilities, under which Italian utilities are prevented from selling gas on to other off-takers in Western Europe outside of the Italian market. Gazprom has responded to this request and is currently in discussions with the European Commission.

Rosgazifikatsia has filed a claim against SR-DRAGA (Gazprom's Share Registrar) to recover damages in the amount of RUR 717.2 million as a result of the alleged negligent performance of its obligations as a Registrar in relation to one specific share transfer. Gazprom, under Russian law, is liable for the actions of its Registrar and accordingly was joined as a third party to such claim. The claim was upheld by the court of first instance and SR-DRAGA was ordered to pay RUR 539 million in settlement of the claim. After various appeals SR-DRAGA finally succeeded in having the judgment of the court of first instance overturned.

Inkcombank filed a claim against Gazprom to recover debt in the amount of U.S.\$72.4 million under a facility agreement. The court in the first instance considered the claim and ordered Gazprom to pay Inkcombank U.S.\$71.6 million. Gazprom has filed an appeal against the decision. In the course of proceedings in the court of appeal, the parties have entered into an amicable settlement agreement under which Gazprom has agreed to pay U.S.\$44.7 million to Inkcombank and Inkcombank has waived its claim to the remaining part of the debt.

There has been recent press comment and speculation over potential proceedings surrounding recent allegations made by a Russian Federal Tax Police official of tax evasion by Gazprom. However, as at the date of this Offering Circular no official statement had been issued by the Tax Police and no proceedings in this regard had been commenced. Gazprom believes that if any such proceedings are instigated they will be unmeritorious.

Further, there have been recent press reports that a shareholder of Gazprom has filed a lawsuit against PricewaterhouseCoopers, Gazprom's auditor, alleging improprieties in the audits conducted by PricewaterhouseCoopers.

These proceedings and investigations have not had, and are not expected to have, individually or in the aggregate, a material adverse effect on Gazprom's business, operations and financial condition or on Gazprom's ability to service its payment obligations under the Loan.

## LOAN AGREEMENT

*The following is the text of the Loan Agreement which has been entered into between the Bank and Gazprom:*

**LOAN AGREEMENT**, dated 19 April 2002 **BETWEEN**

- (1) OPEN JOINT STOCK COMPANY GAZPROM ("Gazprom");**
- (2) SALOMON BROTHERS AG (the "Bank").**

**WHEREAS**, the Bank has at the request of Gazprom agreed to make available to Gazprom a loan facility in the amount of U.S.\$500,000,000 on the terms and subject to the conditions of this Agreement; and

**WHEREAS**, it is intended that the Bank will issue certain loan participation notes based on amounts payable by Gazprom under the loan facility.

**NOW IT IS HEREBY AGREED** as follows:

### **1 Definitions and Interpretation**

#### **1.1 Definitions**

In this Agreement (including the recitals), the following terms shall have the meanings indicated.

**"Advance"** means the advance to be made under Clause 3 of the sum equal to the amount of the Facility.

**"Affiliates"** of any specified Person means any other Person, directly or indirectly, controlling or controlled by or under direct or indirect control with such specified Person. For the purposes of this definition, "control" when used with respect to any Person means the power to direct the management and policies of such Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise; and the terms "controlling" and "controlled" have meanings correlative to the foregoing.

**"Agreed Form"** means that the form of the document in question has been agreed between the proposed parties thereto and that either a copy thereof has been signed for the purpose of identification on behalf of each of Linklaters and Denton Wilde Sapte or such document has been signed on behalf of the parties thereto and delivered to Linklaters to be held in escrow pending release on the Closing Date;

**"Agreement"** means this Agreement as originally executed or as it may be amended from time to time.

**"Business Day"** means a day on which (a) the London Interbank Market is open for dealings between banks generally, and (b) if on that day a payment is to be made hereunder, commercial banks generally are open for business in New York City and in the city where the specified office of the Principal Paying Agent is located.

**"Consolidated Net Tangible Assets"** means the total of all assets less (i) total liabilities, (ii) goodwill, trade names, trade marks, service marks, patents, licences, organisational expenses, research and development expenses, unamortised debt discount and expense, unamortised deferred charges and all other like intangible assets, (iii) all write-ups of fixed assets, net of accumulated depreciation thereon, after 31 December 2000 excluding, for the avoidance of doubt, any restatement for changes in the general purchasing power of the Rouble in accordance with IAS 29 "Financial Reporting in Hyperinflationary Economics" and revaluations supported by an independent appraisal completed by an appropriately qualified firm and (iv) preferred stock, if any, all as set forth on the most recent consolidated balance sheet of Gazprom and its consolidated Subsidiaries prepared in accordance with IAS.

**"Dollars", "\$" and "U.S.\$"** means the lawful currency of the United States of America.

**"Encumbrance"** means any mortgage, charge, pledge, lien (other than a lien arising solely by operation of law which is discharged within 45 days of arising) or other security interest securing any obligation of any Person or any other type of preferential arrangement (including any title transfer and retention arrangement) having a similar effect.

**"Environmental Law"** means any applicable law in any jurisdiction in which any member of the Group conducts business which relates to the pollution or protection of the environment or harm to or the protection of human health or the health of animals or plants.

**"Event of Default"** has the meaning assigned to such term in sub-Clause 11.1 hereof.

**"Facility"** means the facility specified in Clause 2.

**"Financial Indebtedness"** means any obligation for the payment of money in any currency, other than an obligation for the payment of money in the lawful currency for the time being of the Russian Federation payable to any person domiciled, resident or having its head office or principal place of business in the Russian Federation, whether sole, joint or several, and whether actual or contingent, in respect of:

- (a) moneys borrowed or raised (including the capitalised value of obligations under financial leases and hire purchase agreements and deposits, but excluding moneys raised by way of the issue of share capital (whether or not for a cash consideration) and any premium on such share capital) and interest and other charges thereon or in respect thereof;
- (b) any liability under any debenture, bond, note, loan stock or other security or under any acceptance or documentary credit, bill discounting or note purchase facility or any similar instrument;
- (c) any liability in respect of the deferred acquisition cost of property, assets or services to the extent payable after the time of acquisition or possession thereof by the party liable, but not including any such liability in respect of normal trade credit for a period not exceeding six months for goods or services supplied;
- (d) any liability under any interest rate or currency hedging agreement;
- (e) any liability under or in respect of any bonding facility, guarantee facility or similar facility; and
- (f) (without double counting) any guarantee or other assurance against financial loss in respect of such moneys borrowed or raised, interest, charges or other liability (whether the person liable in respect of such moneys borrowed or raised, interest, charges or other liability is or is not a member of the Group),

but not where the same relates to or is in connection with any Project Financing.

**"Group"** means Gazprom and its Subsidiaries taken as a whole.

**"IAS"** means the International Accounting Standards issued by the International Accounting Standards Committee (as amended, supplemented or re-issued from time to time).

**"Interest Payment Date"** means 25 April and 25 October of each year.

**"Loan"**, at any time, means an amount equal to the aggregate principal amount of the Facility granted by the Bank pursuant to this Agreement.

**"Material Adverse Effect"** means a material adverse effect on (a) the financial condition or operations of Gazprom and its Principal Subsidiaries or (b) Gazprom's ability to perform its obligations under this Agreement or (c) the validity or enforceability of this Agreement or the rights or remedies of the Bank under this Agreement.

**"Notes"** means the U.S.\$500,000,000 9.125 per cent. loan participation notes due 2007 proposed to be issued by the Bank pursuant to the Trust Deed for the purpose of financing the Loan.

**"Noteholder"** means the person in whose name the Note is registered in the register of the noteholders (or in the case of joint holders, the first named holder thereof).

**"Officers' Certificate"** means a certificate signed by an officer of Gazprom who shall be the principal executive officer, principal accounting officer or principal financial officer of Gazprom.

**"Opinion of Counsel"** means a written opinion from international legal counsel who is acceptable to the Bank.

**"Paying Agency Agreement"** means the paying agency agreement dated the date hereof, as amended, varied or supplemented between the Bank, Gazprom, The Bank of New York and Kredietbank S.A. Luxembourgeoise relating to the Notes.

**"Permitted Encumbrance"** means:

- (i) any Encumbrance existing on the date of this Agreement;
- (ii) any Encumbrance existing on any property, income or assets of any corporation at the time such corporation becomes a Subsidiary of Gazprom and not created in contemplation of such event, provided that no such Encumbrance shall extend to any other property, income or assets;
- (iii) any Encumbrance on any property, income or assets of any corporation existing at the time such corporation is merged or consolidated with or into Gazprom or any Subsidiary of Gazprom and not created in contemplation of such event, provided that no such Encumbrance shall extend to any other property, income or assets;
- (iv) any Encumbrance on any property or assets securing Financial Indebtedness of Gazprom or any Subsidiary incurred or assumed for the purpose of financing all or part of the cost of acquiring, purchasing, constructing or developing such property or assets, provided that no such Encumbrance shall extend to any other property or assets, the principal amount of the Financial Indebtedness secured by such Encumbrance shall not exceed the cost of acquiring, purchasing, constructing or developing such property or assets, and such Encumbrance attaches to such property or assets concurrently with or within 90 days after the acquisition or purchase, or the commencement of the construction or development, thereof;
- (v) any Encumbrance on any property or assets securing Financial Indebtedness of Gazprom or any Subsidiary incurred or assumed for the purpose of financing all or part of the cost of repairing or refurbishing such property or assets, provided that no such Encumbrance shall extend to any other property or assets, the principal amount of the Financial Indebtedness secured by such Encumbrance shall not exceed the cost of such repairs or refurbishments, and such Encumbrance attaches to such property or assets concurrently with or within 90 days after the commencement of such repairs or refurbishments;
- (vi) any Encumbrance existing on any property, income or assets prior to the acquisition thereof by Gazprom or any Subsidiary and not created in contemplation of such acquisition, provided that no such Encumbrance shall extend to any other property, income or assets;
- (vii) any Encumbrance on the property, income or assets of any Subsidiary securing intercompany Financial Indebtedness of such Subsidiary owing to Gazprom or another Subsidiary;
- (viii) any Encumbrance securing Financial Indebtedness incurred in connection with a Project Financing if the Encumbrance is solely on the property, income, assets or revenues of the project for which the financing was incurred;
- (ix) any Encumbrance securing Financial Indebtedness not exceeding 50 per cent. of Gazprom's Consolidated Net Tangible Assets at any time of determination;

- (x) any Encumbrance arising out of the refinancing, extension, renewal or refunding of any Financial Indebtedness of Gazprom or any Subsidiary secured by any Permitted Encumbrance, provided that such Financial Indebtedness is not increased and, if the property, income or assets securing any such Financial Indebtedness are changed in connection with any such refinancing, extension, renewal or refunding, the value of the property, income or assets securing such Financial Indebtedness is not increased;
- (xi) any Encumbrance over any goods or products, or documents, insurance policies or sale contracts in relation to any goods or products, arising in the ordinary course of trading in connection with the provision of a letter of credit or any similar transaction where such Encumbrance secures only so much of the acquisition cost or selling price (and amounts incidental thereto) of such goods or products which is required to be paid within 120 days after the date upon which liability in respect of the same was first incurred; and
- (xii) a right of set-off, right to combine accounts or any analogous right which any bank or other financial institution may have relating to any credit balance of any member of the Group.

**"Person"** means any individual, corporation, partnership, limited liability company, joint venture, association, joint-stock company, trust, unincorporated organization, government, or any agency or political subdivision thereof or any other entity.

**"Potential Event of Default"** means any event which is, or after notice or passage of time or both would be, an Event of Default.

**"Principal Subsidiary"** means at any relevant time a Subsidiary of Gazprom;

- (i) whose total assets or gross revenues (or, where the Subsidiary in question prepares consolidated accounts, whose total consolidated assets or gross consolidated revenues, as the case may be) represent not less than 5% of the total consolidated assets or the gross consolidated revenues of Gazprom and its Subsidiaries, all as calculated by reference to the then latest audited accounts (or consolidated accounts as the case may be) of such Subsidiary and the then latest audited consolidated accounts of Gazprom and its consolidated Subsidiaries; or
- (ii) to which is transferred all or substantially all the assets and undertaking of a Subsidiary which immediately prior to such transfer is a Principal Subsidiary.

**"Project Financing"** means any financing of all or part of the costs of the acquisition, construction, development or operation of any asset or project if the person or persons providing such financing expressly agrees to limit its recourse solely to the asset or project financed and the revenues derived from such asset or project as the principal source of repayment for the moneys advanced.

**"Rate of Interest"** has the meaning assigned to such term in Clause 4.1.

**"Repayment Date"** means 25 April 2007.

**"Same-Day Funds"** means Dollar funds settled through the New York Clearing House Interbank Payments System or such other funds for payment in Dollars as the Bank may at any time determine to be customary for the settlement of international transactions in New York City of the type contemplated hereby.

**"Subscription Agreement"** means the agreement dated the date hereof between the Bank, Gazprom, Salomon Brothers International Limited and Credit Suisse First Boston (Europe) Limited providing for the issuance of the Notes.

**"Subsidiary"** means, with respect to any Person, (i) any corporation, association or other business entity of which at least 50% of the total voting power of shares of Capital Stock entitled (without regard to the occurrence of any contingency) to vote in the election of directors, managers or trustees thereof is at the time owned or controlled, directly or indirectly, by such Person or one or more of the other Subsidiaries of such Person (or any combination thereof)

and (ii) any partnership (a) the sole general partner or the managing general partner of which is such Person or a Subsidiary of such person or (b) the only general partners of which are such Person or of one or more Subsidiaries of such Person (or any combination thereof).

**"Taxes"** means any taxes (including interest or penalties thereon) which are now or at any time hereafter imposed, assessed, charged, levied, collected, demanded, withheld or claimed by the Russian Federation, the Federal Republic of Germany or any taxing authority thereof or therein or any organisation of which the Russian Federation or the Federal Republic of Germany may be a member or with which the Russian Federation or the Federal Republic of Germany may be associated or any country or state from or through which Gazprom makes payments hereunder, provided, however, that for the purposes of this definition the references to the Federal Republic of Germany shall, upon the occurrence of the Relevant Event (as this term is defined in the Trust Deed), be deemed to be references to the jurisdiction in which the Trustee is domiciled for tax purposes; and the term "Taxation" shall be construed accordingly.

**"Trust Deed"** means the trust deed to constitute the Notes for the equal and rateable benefit of the Noteholders to be dated the Closing Date between the Bank and the Trustee as amended, varied or supplemented from time to time.

**"Trustee"** means The Bank of New York acting through its London Branch, as trustee under the Trust Deed and any successor thereto as provided thereunder.

## **1.2 Other Definitions**

Unless the context otherwise requires, terms used in this Agreement which are not defined in this Agreement but which are defined in the Trust Deed, the Notes, the Paying Agency Agreement or the Subscription Agreement shall have the meanings assigned to such terms therein.

## **1.3 Interpretation**

Unless the context or the express provisions of this Agreement otherwise require, the following shall govern the interpretation of this Agreement.

- 1.3.1** All references to "Clause" or "sub-Clause" are references to a Clause or sub-Clause of this Agreement.
- 1.3.2** The terms "hereof", "herein" and "hereunder" and other words of similar import shall mean this Agreement as a whole and not any particular part hereof.
- 1.3.3** Words importing the singular number include the plural and vice versa.
- 1.3.4** All references to "taxes" include all present or future taxes, levies, imposts and duties of any nature and the terms "tax" and "taxation" shall be construed accordingly.
- 1.3.5** The table of contents and the headings are for convenience only and shall not affect the construction hereof.

## **2 Facility**

### **2.1 Facility**

On the terms and subject to the conditions set forth herein, the Bank hereby agrees to lend Gazprom and Gazprom hereby agrees to borrow from the Bank U.S.\$500,000,000.

### **2.2 Purpose**

The proceeds of the Advance less the sums to be applied in accordance with Clause 3.2 will be used for working capital and general corporate purposes but the Bank shall not be concerned with the application thereof.

### **2.3 Facility Fee**

In connection with the Facility, Gazprom shall upon (and subject to) the making of the Advance to Gazprom by the Bank pay a fee in Dollars to the Bank equal to U.S.\$50,000.

### **3 Drawdown**

#### **3.1 Drawdown**

On the terms and subject to the conditions set forth herein, on the Closing Date the Bank shall make the Advance to Gazprom and Gazprom shall make a single drawing in the full amount of the Facility.

#### **3.2 Fees and Expenses**

In consideration of the Bank making the Advance to Gazprom, Gazprom hereby agrees that it shall pay to the Bank, in Same-Day funds, an amount equivalent to the aggregate total of commissions, fees costs and expenses as set forth in sub-Clauses 8.1, 8.2 and 8.4 of the Subscription Agreement, sub-Clauses 10.1 and 10.2 of the Paying Agency Agreement, Clause 1 and 4 of the Side Letter between the Trustee and Gazprom dated 25 April 2002 (the "**Trustees Side Letter**") and sub-Clause 2.3 and Clause 13 hereof and hereby further agrees that such amount shall be deducted from the amount of the Advance.

Gazprom undertakes to fulfil all of its other payment obligations in respect of the Subscription Agreement and the Paying Agency Agreement in addition to its payment obligations as set out above.

#### **3.3 Disbursement**

Subject to the conditions set forth herein, on the Closing Date the Bank shall transfer the amount of the Advance less the amount to be paid by Gazprom pursuant to sub-Clause 3.2 above to Gazprom's account number 40702840400007000001 at Gazprombank Moscow, Swift Code: GAZPRUMM, Account Number: 04414534 at Deutsche Bank Trust Company Americas, New York, NY, Swift Code: BKTR US 33.

### **4 Interest**

#### **4.1 Rate of Interest**

Gazprom will pay interest in Dollars to the Bank on the outstanding principal amount of the Loan from time to time hereunder at the rate of 9.125 per cent. per annum (the "**Rate of Interest**").

#### **4.2 Payment**

Interest at the rate specified in Clause 4.1 above shall accrue from day to day, starting from (and including) the Closing Date and shall be paid in arrear not later than 10.00 a.m. (New York City time) one Business Day prior to each Interest Payment Date. Interest on the Loan will cease to accrue from the due date for repayment thereof unless payment of principal is improperly withheld or refused, in which event interest will continue to accrue (before or after any judgement) at the Rate of Interest to but excluding the date on which payment in full of the principal thereof is made. If interest is required to be calculated for a period of less than one year, it will be calculated on the basis of a 360-day year consisting of 12 months of 30 days each and, in the case of an incomplete month the number of days elapsed.

### **5 Repayment and Prepayment**

#### **5.1 Repayment**

Except as otherwise provided herein, Gazprom shall repay the Loan not later than 10.00 a.m. (New York City time) one Business Day prior to the Repayment Date.

#### **5.2 Special Prepayment**

If, as a result of the application of or any amendments to or change in the double tax treaty between the Russian Federation and the Federal Republic of Germany or the laws or regulations of the Russian Federation or the Federal Republic of Germany or of any political sub-division thereof or any authority therein or the enforcement of the security provided for in the Trust Deed, Gazprom would thereby be required to make or increase any payment due hereunder as provided in Clauses 6.2 or 6.3, or if (for whatever reason) Gazprom would have to or has been required to pay additional amounts pursuant to Clause 8, then Gazprom may (without premium or penalty), upon not less than 10 days' notice to the Bank (which notice shall be irrevocable), prepay the Loan in whole (but not in part).

### **5.3 Illegality**

If, at any time, by reason of the introduction of any change after the date of this Agreement in any applicable law or regulation or regulatory requirement or directive of any agency of any state the Bank reasonably determines (such determination being accompanied by an opinion of Counsel with the cost of such opinion of Counsel being borne solely by Gazprom) that it is or would be unlawful or contrary to such regulation, regulatory requirement or directive for the Bank to allow all or part of the Loan or the Notes to remain outstanding or for the Bank to maintain or give effect to any of its obligations in connection with this Agreement and/or to charge or receive or to be paid interest at the rate then applicable to the Loan, then upon notice by the Bank to Gazprom in writing (setting out in reasonable detail the nature and extent of the relevant circumstances), Gazprom and the Bank shall consult in good faith as to a basis which eliminates the application of such circumstances; provided, however, that the Bank shall be under no obligation to continue such consultation if a basis has not been determined within 30 days of the date on which it so notified Gazprom. If such a basis has not been determined within the 30 days, then upon notice by the Bank to Gazprom in writing, Gazprom shall prepay the Loan in whole (but not in part) on the next Interest Payment Date or on such earlier date as the Bank shall certify to be necessary to comply with such requirements.

### **5.4 Payment of Other Amounts**

If the Loan is to be prepaid by Gazprom pursuant to any of the provisions of Clauses 5.2 or 5.3, Gazprom shall, simultaneously with such prepayment, pay to the Bank accrued interest thereon to the date of actual payment and all other sums payable by Gazprom pursuant to this Agreement.

### **5.5 Provisions Exclusive**

Gazprom may not voluntarily prepay the Loan except in accordance with the express terms of this Agreement. Any amount prepaid may not be reborrowed.

## **6 Payments**

### **6.1 Making of Payments**

All payments of principal and interest to be made by Gazprom under this Agreement shall be made to the Bank not later than 10.00 a.m. (New York City time) one Business Day prior to each Interest Payment Date or the Repayment Date (as the case may be) in Same-Day Funds to the Bank's account no. 7384418400 with the Principal Paying Agent. The Bank agrees with Gazprom that it will not deposit any other monies into such account and that no withdrawals shall be made from such account other than as provided for and in accordance with the Trust Deed and the Paying Agency Agreement.

### **6.2 No Set-Off, Counterclaim or Withholding; Gross-Up**

All payments to be made by Gazprom under this Agreement shall be made in full without set-off or counterclaim and (except to the extent required by law) free and clear of and without deduction for or on account of any Taxes. If Gazprom shall be required by applicable law to make any deduction or withholding from any payment under this Agreement for or on account of any Taxes, it shall increase any payment due hereunder to such amount as may be necessary to ensure that the Bank receives a net amount in Dollars equal to the full amount which it would have received had payment not been made subject to such Taxes, shall account to the relevant authorities for the relevant amount of such Taxes so withheld or deducted within the time allowed for such payment under the applicable law and shall deliver to the Bank without undue delay evidence satisfactory to the Bank of such deduction or withholding and of the accounting therefor to the relevant taxing authority. If the Bank pays any amount in respect of such Taxes, Gazprom shall reimburse the Bank in Dollars for such payment on demand.

### **6.3 Withholding on Notes**

If the Bank notifies Gazprom (setting out in reasonable detail the nature and extent of the obligation with such evidence as Gazprom may reasonably require) that it has become obliged to make any withholding or deduction for or on account of any Taxes from any payment which it is obliged to make under or in respect of the Notes in circumstances where the Bank is required to pay additional amounts pursuant to Condition 8 of the Notes, Gazprom agrees to pay to the Bank, on the date on which payment is due to the Noteholders, such additional amounts as are equal to the said additional amounts which the Bank must pay pursuant to Condition 8 of the

Notes; provided, however, that the Bank shall immediately upon receipt from any Paying Agent of any sums paid pursuant to this provision, to the extent that the Noteholders, as the case may be, are not entitled to such additional amounts pursuant to the terms and conditions of the Notes, pay such additional amounts to Gazprom (it being understood that neither the Bank, nor the Principal Paying Agent nor any Paying Agent shall have any obligation to determine whether any Noteholder is entitled to such additional amount).

#### **6.4 Reimbursement**

To the extent that the Bank subsequently obtains or uses any tax credit or allowance or other reimbursements relating to a deduction or withholding with respect to which Gazprom has made a payment pursuant to this Clause 6 or obtains any reimbursement from the Trustee pursuant to the terms of the Trust Deed, it shall pay to Gazprom so much of the benefit it received as will leave the Bank in substantially the same position as it would have been had no additional amount been required to be paid by Gazprom pursuant to this Clause 6 or had no reimbursement been paid to the Bank pursuant to the Trust Deed; provided, however, that the question of whether any such benefit has been received, and accordingly, whether any payment should be made to Gazprom, the amount of any such payment and the timing of any such payment, shall be determined solely by the Bank. The Bank shall have the absolute discretion whether, and in what order and manner, it claims any credits or refunds available to it, and the Bank shall in no circumstances be obliged to disclose to Gazprom any information regarding its tax affairs or computations.

#### **6.5 Mitigation**

If at any time either party hereto becomes aware of circumstances which would or might, then or thereafter, give rise to an obligation on the part of Gazprom to make any deduction, withholding or payment as described in Clauses 6.2 or 6.3, then, without in any way limiting, reducing or otherwise qualifying the Bank's rights, or Gazprom's obligations, under such Clauses, such party shall promptly upon becoming aware of such circumstances notify the other party, and, thereupon the parties shall consider and consult with each other in good faith with a view to finding, agreeing upon and implementing a method or methods by which any such obligation may be avoided or mitigated and, to the extent that both parties can do so without taking any action which in the reasonable opinion of such party is prejudicial to its own position, take such reasonable steps as may be reasonably available to it to avoid such obligation or mitigate the effect of such circumstances. Gazprom agrees to reimburse the Bank for all reasonable costs and expenses incurred by the Bank in connection with this Clause.

### **7 Conditions Precedent**

#### **7.1 Documents to be Delivered**

The obligation of the Bank to make the Advance shall be subject to the receipt by the Bank on or prior to the Closing Date of an executed copy of each of the following documents, each (other than the document referred to in Clause 7.1.4 below) dated the Closing Date, in the Agreed Form.

**7.1.1** An opinion of Denton Wilde Sapte, counsel to Gazprom, regarding issues of Russian law.

**7.1.2** An opinion of Linklaters regarding issues of English law and Russian law.

**7.1.3** An opinion of Cleary, Gottlieb, Steen and Hamilton regarding issues of German law.

**7.1.4** A letter from PricewaterhouseCoopers regarding certain Russian tax matters.

#### **7.2 Further Conditions**

The obligation of the Bank to make the Advance shall be subject to the further conditions precedent that as of the Closing Date (a) the representations and warranties made and given by Gazprom in Clause 9 shall be true and accurate as if made and given on the Closing Date with respect to the facts and circumstances then existing, (b) no event shall have occurred and be continuing that constitutes, or that, with the giving of notice or the lapse of time, or both, would constitute, an Event of Default, (c) Gazprom shall not be in breach of any of the terms, conditions and provisions of this Agreement and (d) the Subscription Agreement and the Trust Deed shall have been executed and delivered, and the Bank shall have received the full amount of the net subscription moneys for the Notes pursuant to the Subscription Agreement.

## **8 Change in Law or Banking Practices; Increase in Cost**

### **8.1 Compensation**

In the event that after the date of this Agreement there is any change in or introduction of any tax, law, regulation, regulatory requirement or official directive (whether or not having the force of law but, if not having the force of law, the observance of which is in accordance with the generally accepted financial practice of financial institutions in the country concerned) or in the interpretation or application thereof by any person charged with the administration thereof and/or any compliance by the Bank in respect of the Loan or the Facility with any request, policy or guideline (whether or not having the force of law but, if not having the force of law, the observances of which is in accordance with the generally accepted financial practice of financial institutions in the country concerned) from or of any central or other fiscal, monetary or other authority, agency or any official of any such authority, which:

- 8.1.1** subjects or will subject the Bank to any Taxes with respect to payments of principal of or interest on the Loan or any other amount payable under this Agreement (other than any Taxes payable by the Bank on its overall net income or any Taxes referred to in Clauses 6.2 or 6.3); or
- 8.1.2** increases or will increase the taxation of or changes or will change the basis of taxation of payments to the Bank of principal of or interest on the Loan or any other amount payable under this Agreement (other than any such increase or change which arises by reason of any increase in the rate of tax payable by the Bank on its overall net income or as a result of any Taxes referred to in Clauses 6.2 or 6.3); or
- 8.1.3** imposes, modifies, or deems applicable any capital adequacy, reserve or deposit requirements attributable to this Agreement or to a class of business or transaction which, in the reasonable opinion of the Bank, includes this Agreement, against assets held by, or deposits in or for the amount of, or credit extended by an office of the Bank; provided, however, that the foregoing shall not include any increase in the rate of tax payable on the overall net income of the Bank as a result of any change in the manner in which the Bank is required to allocate resources to this Agreement; or
- 8.1.4** imposes or will impose on the Bank any other condition affecting this Agreement, the Facility or the Loan,  
and if as a result of any of the foregoing:
  - (i) the cost to the Bank of making, funding or maintaining the Loan or the Facility is increased; or
  - (ii) the amount of principal, interest or other amount payable to or received by the Bank hereunder is reduced; or
  - (iii) the Bank makes any payment or foregoes any interest or other return on or calculated by reference to the gross amount of any sum receivable by it from Gazprom hereunder or makes any payment or foregoes any interest or other return on or calculated by reference to the gross amount of the Loan, then subject to the following, and in each such case:
    - (A) the Bank shall, as soon as practicable after becoming aware of such increased cost, reduced amount or payment made or foregone, give written notice to Gazprom, together with a certificate signed by two authorised officials of the Bank describing in reasonable detail the introduction or change or request which has occurred and the country or jurisdiction concerned and the nature and date thereof and demonstrating the connection between such introduction, change or request and such increased cost, reduced amount or payment made or foregone, and setting out in reasonable detail the basis on which such amount has been calculated, and all relevant supporting documents evidencing the matters set out in such notes; and

- (B) Gazprom, in the case of clauses (i) and (iii) above, shall on demand by the Bank, pay to the Bank such additional amount as shall be necessary to compensate the Bank for such increased cost, and, in the case of clause (ii) above, at the time the amount so reduced would otherwise have been payable, pay to the Bank such additional amount as shall be necessary to compensate the Bank for such reduction, payment or foregone interest or other return; provided, however, that in the case of clause 8.1.3 above (relating to a class of business or transaction which, in the reasonable opinion of the Bank, includes this Agreement), the amount of such increased cost shall be deemed not to exceed an amount equal to the proportion thereof which is directly attributable to this Agreement.

provided that this Clause 8.1 will not apply to or in respect of any matter for which the Bank has already been compensated under Clause 6.2 or 6.3.

## **8.2 Mitigation**

In the event that the Bank becomes entitled to make a claim pursuant to Clause 8.1, the Bank shall consult in good faith with Gazprom and shall use reasonable efforts (based on the Bank's reasonable interpretation of any relevant tax, law, regulation, requirement, official directive, request, policy or guideline) to reduce, in whole or in part, Gazprom's obligations to pay any additional amount pursuant to such sub-Clause, except that nothing in this Clause 8.2 shall obligate the Bank to incur any costs or expenses in taking any action which, in the reasonable opinion of the Bank, is prejudicial to its interests.

## **9 Representations and Warranties**

### **9.1 Gazprom's Representations and Warranties**

Gazprom represents and warrants to the Bank as follows, to the intent that such shall form the basis of this Agreement and shall remain in full force and effect at the date hereof and shall be deemed to be repeated by Gazprom on the Closing Date.

- 9.1.1** Gazprom is duly organised and incorporated and validly existing under the laws of the Russian Federation and has the power and legal right to own its property, to conduct its business as currently conducted and to enter into and to perform its obligations under this Agreement and to borrow the Advance; Gazprom has taken all necessary corporate, legal and other action required to authorise the borrowing of the Advance on the terms and subject to the conditions of this Agreement and to authorise the execution and delivery of this Agreement and all other documents to be executed and delivered by it in connection with this Agreement, and the performance of this Agreement in accordance with its terms.
- 9.1.2** This Agreement has been duly executed and delivered by Gazprom and constitutes a legal, valid and binding obligation of Gazprom enforceable in accordance with its terms, subject to applicable bankruptcy, insolvency, moratorium and similar laws affecting creditors' rights generally, and subject, as to enforceability, (i) to general principles of equity (regardless of whether enforcement is sought in a proceeding in equity or at law); (ii) with respect to the enforceability of a judgment whether there is a treaty in force relating to the mutual recognition of foreign judgments; and (iii) to the fact that the gross-up provisions contained in Clause 6.2 or Clause 6.3 may not be enforceable under Russian law.
- 9.1.3** The execution, delivery and performance of this Agreement by Gazprom will not conflict with or result in any breach or violation of (i) any law or regulation or any order of any governmental, judicial or public body or authority in the Russian Federation, (ii) the constitutive documents, rules and regulations of Gazprom or (iii) any agreement or other undertaking or instrument to which Gazprom is a party or which is binding upon Gazprom or any of its assets, nor result in the creation or imposition of any Encumbrance on any of its assets pursuant to the provisions of any such agreement or other undertaking or instrument.

- 9.1.4** All consents, authorisations or approvals of, or filings with, any governmental, judicial and public bodies and authorities of the Russian Federation required by Gazprom in connection with the execution, delivery, performance, legality, validity, enforceability, and admissibility in evidence of this Agreement have been obtained or effected and are and shall remain in full force and effect.
- 9.1.5** No event has occurred that constitutes, or that, with the giving of notice or the lapse of time, or both, would constitute, an Event of Default or a default under any agreement or instrument evidencing any Financial Indebtedness of Gazprom, and no such event will occur upon the making of the Advance.
- 9.1.6** There are no judicial, arbitral or administrative actions, proceedings or claims pending or, to the knowledge of Gazprom, threatened, against Gazprom or any of its Principal Subsidiaries, the adverse determination of which could have a Material Adverse Effect.
- 9.1.7** Except for Encumbrances of the types referred to in the definition of Permitted Encumbrances in Clause 1.1 hereof, Gazprom and each of its Principal Subsidiaries has the right of ownership (as that expression is defined under the laws of the Russian Federation) to its property free and clear of all Encumbrances which if created could have a Material Adverse Effect and Gazprom's obligations under the Loan rank at least pari passu with all its other unsecured and unsubordinated Financial Indebtedness (apart from any obligations mandatorily preferred by law).
- 9.1.8** The most recent audited consolidated financial statements of Gazprom:
- (i) were prepared in accordance with IAS; and
  - (ii) save as disclosed therein, present fairly in all material respects the assets and liabilities as at that date and the results of operations of Gazprom during the relevant financial year.
- 9.1.9** There has been no material adverse change since 31 December 2000 in the financial condition, results of business operations or prospects of Gazprom or the Group taken as a whole.
- 9.1.10** The execution, delivery and enforceability of this Agreement is not subject to any tax, duty, fee or other charge, including, without limitation, any registration or transfer tax, stamp duty or similar levy, imposed by or within the Russian Federation or any political subdivision or taxing authority thereof or therein.
- 9.1.11** Neither Gazprom nor its property has any right of immunity from suit, execution, attachment or other legal process on the grounds of sovereignty or otherwise in respect of any action or proceeding relating in any way to this Agreement.
- 9.1.12** Gazprom is in compliance in all material respects with all applicable provisions of law except where failure to be so in compliance would not have a Material Adverse Effect.
- 9.1.13** Neither Gazprom, nor any of its Principal Subsidiaries has taken any corporate action nor, to the best of the knowledge and belief of Gazprom, have any other steps been taken or legal proceedings been started or threatened in writing against Gazprom or any of its Principal Subsidiaries for its bankruptcy, winding-up, dissolution, external administration or re-organisation (whether by voluntary arrangement, scheme of arrangement or otherwise) or for the appointment of a receiver, administrator, administrative receiver, conservator, custodian, trustee or similar officer of its or of any or all of its assets or revenues.
- 9.1.14** There are no strikes or other employment disputes against Gazprom which are pending or, to Gazprom's knowledge, threatened in writing which could have a Material Adverse Effect.
- 9.1.15** In any proceedings taken in the Russian Federation in relation to this Agreement, the choice of English law as the governing law of this Agreement and any arbitration award obtained in England pursuant to Clause 14.10 in relation to this Agreement will be recognised and enforced in the Russian Federation after compliance with the applicable procedural rules and all other legal requirements in Russia.

- 9.1.16** Under the laws of the Russian Federation, it will not be required to make any deduction or withholding from any payment it may make hereunder, provided that the Bank obtains an advance exemption from withholding taxes with respect to such payment.
- 9.1.17** Its execution of this Agreement constitutes, and its exercise of its rights and performance of its obligations thereunder will constitute, private and commercial acts done and performed for private and commercial purposes.
- 9.1.18** It has no overdue tax liabilities which could have a Material Adverse Effect other than those which it has disclosed to the Bank prior to the date hereof or which it is contesting in good faith.
- 9.1.19** All licences, consents, examinations, clearances, filings, registrations and authorisations which are or may be necessary to enable Gazprom and any of its Principal Subsidiaries to own its assets and carry on its business are in full force and effect and, if not, the absence of which could have a Material Adverse Effect.
- 9.1.20** With respect to the offer and sale of the Notes pursuant to the Subscription Agreement, neither Gazprom nor any of its Affiliates nor any person acting on its or their behalf (i) has engaged or will engage in any directed selling efforts (as defined in Regulations S under the U.S. Securities Act of 1933 ("**Regulation S**")) and Gazprom, its Affiliates and any persons acting on its or their behalf have complied and will comply with the offering restrictions requirement of Regulation S.
- 9.1.21** Gazprom, and each of its Principal Subsidiaries, is in compliance with all Environmental Law except where failure to do so could not have a Material Adverse Effect.

## **9.2 Bank's Representations and Warranties:**

The Bank represents and warrants to Gazprom as follows.

- 9.2.1** The Bank is duly incorporated under the laws of and is a resident for German taxation purposes in the Federal Republic of Germany and has full power and capacity to execute this Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement and to undertake and perform the obligations expressed to be assumed by it herein and therein and the Bank has taken all necessary action to approve and authorise the same.
- 9.2.2** The execution of this Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement and the undertaking and performance by the Bank of the obligations expressed to be assumed by it herein and therein will not conflict with, or result in a breach of or default under, the laws of the Federal Republic of Germany or the constitutive documents, rules and regulations of the Bank or any agreement or instrument to which it is a party or by which it is bound or in respect of indebtedness in relation to which it is a surety.
- 9.2.3** This Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement constitute legal, valid and binding obligations of the Bank.
- 9.2.4** All authorisations, consents and approvals required by the Bank for or in connection with the execution of this Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement, the performance by the Bank of the obligations expressed to be undertaken by it herein and therein have been obtained and are in full force and effect.

## **10 Covenants**

### **10.1 Negative Pledge**

So long as any amount remains outstanding hereunder, neither Gazprom nor any Principal Subsidiary will create or permit to subsist any Encumbrance (other than a Permitted Encumbrance) upon or in respect of any of its undertakings, property, income, assets or revenues, present or future, to secure any Financial Indebtedness unless, at the same time or prior thereto, Gazprom's obligations hereunder are secured equally and rateably therewith or

benefit from such other security or other arrangement, as the case may be, in each case to the satisfaction of the Trustee.

#### **10.2 Maintenance of Authorisations**

So long as any amount remains outstanding hereunder, Gazprom shall take all necessary action to obtain, and do or cause to be done all things reasonably necessary to ensure the continuance of, all consents, licences, approvals and authorisations, and make or cause to be made all registrations, recordings and filings, which may at any time be required to be obtained or made in the Russian Federation for the execution, delivery or performance of this Agreement or for the validity or enforceability thereof.

#### **10.3 Mergers**

So long as any amount remains outstanding hereunder, Gazprom shall not, without the prior written consent of the Bank, enter into any reorganisation (whether by way of a merger, accession, division, separation or transformation, as these terms are construed by applicable Russian legislation), or participate in any other type of corporate reconstruction and Gazprom shall ensure that no Principal Subsidiary enter into any reorganisation (whether by way of a merger, accession, division, separation or transformation as these terms are construed by applicable Russian legislation), or participate in any other type of corporate reconstruction if such reorganisation or other type of corporate reconstruction could have a material adverse effect on Gazprom's ability to perform its obligations under this Agreement or the validity or enforceability of this Agreement or the rights or remedies of the Bank under this Agreement.

#### **10.4 Disposals**

So long as any amount remains outstanding hereunder, Gazprom shall not and Gazprom shall ensure that no member of the Group shall, without the prior written consent of the Bank, (disregarding (i) sales of stock in trade in the ordinary course of business and assignments of or other arrangements over the rights or revenues arising from contracts for the sale of gas, gas condensate, crude oil or any other hydrocarbon products, (ii) any lease or related transaction and (iii) assets or rights not related to the extraction, production, transportation, marketing or supply of gas) sell, transfer or otherwise dispose of, by one or more transactions or series of transactions (whether related or not), the whole or any part of its revenues or its assets (which for the avoidance of doubt excludes payments of cash, or other consideration, for the acquisition of any asset on normal commercial terms) which have the aggregate value in excess of U.S.\$1,000,000,000 or the equivalent thereof to a person that is not a member of the Group.

#### **10.5 Maintenance of Property**

So long as any amount remains outstanding hereunder, Gazprom and any Principal Subsidiaries will cause all property used in the carrying on by it of its business for the time being to be kept in good repair and working order as, in the judgment of Gazprom or any Principal Subsidiary, may be reasonably necessary so that the business may be carried on and the failure to keep such property in such condition would have a Material Adverse Effect.

#### **10.6 Payment of Taxes and Other Claims**

So long as any amount remains outstanding hereunder, Gazprom shall pay or discharge or cause to be paid or discharged, before the same shall become overdue, all taxes, assessments and governmental charges levied or imposed upon, or upon the income, profits or property of Gazprom; provided that Gazprom shall not be required to pay or discharge or cause to be paid or discharged any such tax, assessment, charge or claim (a) whose amount, applicability or validity is being contested in good faith by appropriate proceedings and for which adequate reserves in accordance with IAS or other appropriate provision has been made or (b) whose amount, together with all such other unpaid or undischarged taxes, assessments, charges and claims, does not in the aggregate exceed U.S.\$100,000,000.

#### **10.7 Withholding Tax Exemption**

**10.7.1** The Bank shall use its best endeavours to provide Gazprom no later than 10 business days before the first interest payment date (and thereafter as soon as possible at the beginning of each calendar year but not later than 10 business days prior to the first

interest payment date in that year) with the certificate, issued and certified by the competent German authorities, confirming that the Bank is resident in Germany, provided that the Bank shall not be responsible for any failure to provide, or any delays in providing, such residency certificate as a result of any action or inaction of the competent German authorities, but shall notify Gazprom as soon as is practicable about any such failure or delay with an indication of the action taken by the Bank to obtain such residency certificate.

- 10.7.2** Gazprom and the Bank agree that, should the Russian legislation regulating the procedure for obtaining an exemption from Russian income tax withholding change then the procedure referred to in Clause 10.7.1 will be deemed changed accordingly.

## **10.8 Maintenance of Insurance**

So long as any amount remains outstanding hereunder, Gazprom and any Principal Subsidiary shall keep those of their properties which are of an insurable nature insured with insurers who implement good business practices and are believed by Gazprom or such Principal Subsidiary, as the case may be, to be responsible against loss or damage to the extent that property of similar character is usually so insured by corporations in the same jurisdictions similarly situated.

## **10.9 Reports**

- 10.9.1** So long as any amount remains outstanding hereunder, Gazprom will furnish to the Bank commencing with the year ending 31 December 2001, within 9 months of the relevant year-end audited annual financial statements prepared in accordance with IAS, including a report thereon by Gazprom's certified independent accountants.
- 10.9.2** On each Interest Payment Date, Gazprom shall deliver to the Bank a written notice in the form of an Officers' Certificate stating whether any Potential Event of Default or Event of Default has occurred and, if it has occurred and shall be continuing, what action Gazprom is taking or proposes to take with respect thereto.
- 10.9.3** Gazprom will on request of the Bank provide the Bank with such further information, other than information which Gazprom determines in good faith to be confidential, about the business and financial condition of Gazprom and its Subsidiaries as the Bank may require (including pursuant to Clauses 15.5 and 15.12 of the Trust Deed).

## **10.10 Compliance with Terms of Trust Deed**

The Bank agrees that it will observe and comply with its obligations set out in the Trust Deed and will not agree to any amendment to the terms of such Trust Deed without prior consultation, if reasonably practicable, with Gazprom. In addition, the Bank agrees that it will only exercise its power to appoint a new Trustee pursuant to Clause 27.1 of the Trust Deed with the consent of Gazprom (such consent not to be unreasonably withheld or delayed).

## **11 Events of Default**

### **11.1 Events of Default**

If one or more of the following events of default (each, an "**Event of Default**") shall occur and be continuing, the Bank shall be entitled to the remedies set forth in Clause 11.3.

- 11.1.1** Gazprom fails to pay within three Business Days any amount payable hereunder as and when such amount becomes payable in the currency and in the manner specified herein, provided that such default will not be an Event of Default if (i) it occurs by reason only of administrative or technical difficulties affecting the transfer of the funds due from Gazprom, (ii) Gazprom issued the appropriate transfer and payment instructions in sufficient time to permit the transfer and payment of the amount due to be made on its due date and (iii) the Bank receives from Gazprom that amount within six Business Days after the due date for payment.

- 11.1.2** Gazprom fails to perform or observe any of its other obligations under this Agreement and (except where in any such case that failure is not capable of remedy when no such notices as is hereinafter mentioned will be required) that failure continues for the period of 30 days (or such longer period as the Bank may permit) next following the submission by the Bank to Gazprom of notice in writing requesting the same to be remedied.
- 11.1.3** Any representation or warranty of Gazprom or any statement deemed to be made by Gazprom in this Agreement or in any other document, certificate or notice delivered to the Bank in connection with this Agreement or the issue of Notes proves to have been inaccurate, incomplete or misleading in any material respect at the time it was made or repeated or deemed to have been made or repeated.
- 11.1.4** Gazprom or any Principal Subsidiary (i) fails to pay any of its Financial Indebtedness as and when such Financial Indebtedness becomes payable, taking into account any applicable grace period or (ii) fails to perform or observe any covenant or agreement to be performed or observed by it contained in any other agreement or in any instrument evidencing any of its Financial Indebtedness if, as a result of such failure, any other party to such agreement or instrument is entitled to exercise, and has not irrevocably waived, the right to accelerate the maturity of any amount owing thereunder; provided, that the total amount of such Financial Indebtedness unpaid or capable of being accelerated exceeds U.S.\$20,000,000 (or its equivalent in another currency); provided however that this Clause 11.1.4 shall not apply to foreign currency Financial Indebtedness owed to Russian Persons.
- 11.1.5** Gazprom or any Principal Subsidiary commences negotiations with its creditors generally with a view to the general readjustment or rescheduling of its indebtedness or makes a general assignment for the benefit of or a composition with its creditors generally; provided that in the case of a Principal Subsidiary the same could have a Material Adverse Effect.
- 11.1.6** Gazprom or any Principal Subsidiary takes any corporate action or any order is made by a competent court for its winding-up, dissolution, external administration or re-organisation whether by way of voluntary arrangement, scheme of arrangement or otherwise or for the appointment of a liquidator, receiver, administrator, administrative receiver, conservator, custodian, trustee or similar officer of it or of all or a material part of its revenues and assets.
- 11.1.7** Gazprom or any Principal Subsidiary (i) fails or is unable to pay its debts generally as they become due or (ii) commences a voluntary case in bankruptcy or any other action or proceeding for any other relief under any law affecting creditors' rights as is similar to bankruptcy law, or (iii) a bankruptcy (insolvency) petition in respect of Gazprom or any Principal Subsidiary is accepted by any competent court and bankruptcy proceedings are initiated by such competent court, or any action is brought in and accepted by any competent court for the liquidation of Gazprom or any Principal Subsidiary or a Russian federal law that provides for the liquidation of Gazprom as operator of the Unified Gas Supply System is adopted and comes into effect.
- 11.1.8** Any governmental authorisation necessary for the performance of any obligation of Gazprom under this Agreement fails to be in full force and effect.
- 11.1.9** Any governmental authority or court takes any action that has a material adverse effect on Gazprom's ability to perform its obligations under this Agreement or the validity or enforceability of this Agreement or the rights or remedies of the Bank under this Agreement.
- 11.1.10** Any execution or distress is levied against, or an encumbrancer takes possession of, the whole or any material part of, the assets of Gazprom or any event occurs which under the laws of any jurisdiction has a similar or analogous effect and the same could have a Material Adverse Effect unless such execution, distress, enforcement of an Encumbrance or similar or analogous event is being contested in good faith by Gazprom and is not removed, paid out, stayed or discharged within 30 days of such execution, distress being levied, taking of possession or similar or analogous act, as the case may be.

- 11.1.11** The aggregate amount of unsatisfied judgements, decrees or orders of courts of competent jurisdiction or other appropriate and competent law-enforcement bodies for the payment of money against Gazprom and its Principal Subsidiaries in the aggregate exceeds U.S.\$5,000,000, or the equivalent thereof in any other currency or currencies and there is a period of 30 days following the entry thereof during which such judgment, decree or order is not discharged, waived or the execution thereof stayed and such default continues for ten days after the notice specified in Clause 11.2.
- 11.1.12** Any seizure, compulsory acquisition, expropriation, nationalisation or renationalisation after the date of this Agreement by or under the authority of a government authority of all or part (the book value of which is fifteen per cent. (15%) or more of the book value of the whole) of the assets or all or more than fifteen per cent. (15%) of the voting or non-voting shares of Gazprom or any Principal Subsidiary is made by any person.
- 11.1.13** Gazprom or any of its Principal Subsidiaries ceases to carry on the principal business it carries on at the date hereof.
- 11.1.14** At any time it is or becomes unlawful for Gazprom to perform or comply with any or all of its obligations under this Agreement or any of such obligations (subject as provided in Clause 9.1.2) are not, or cease to be, legal, valid, binding and enforceable.
- 11.1.15** Any event occurs which under the laws of any relevant jurisdiction has an analogous effect to any of the events referred to in any of the foregoing paragraphs.

## **11.2 Notice of Default**

Gazprom shall deliver to the Bank and the Trustee, within 30 days after becoming aware thereof, written notice of any event which is a Potential Event of Default or an Event of Default, its status and what action Gazprom is taking or proposes to take with respect thereto.

## **11.3 Default Remedies**

If any Event of Default shall occur and be continuing, the Bank may, by notice in writing to Gazprom, (a) declare the obligations of the Bank hereunder to be terminated, whereupon such obligations shall terminate, and (b) declare all amounts payable hereunder by Gazprom that would otherwise be due after the date of such termination to be immediately due and payable, whereupon all such amounts shall become immediately due and payable, all without diligence, presentment, demand of payment, protest or notice of any kind, which are expressly waived by Gazprom; provided, however, that if any event of any kind referred to in Clause 11.1.7 occurs, the obligations of the Bank hereunder shall immediately terminate, and all amounts payable hereunder by Gazprom that would otherwise be due after the occurrence of such event shall become immediately due and payable, all without diligence, presentment, demand of payment, protest or notice of any kind, which are especially waived by Gazprom.

## **11.4 Rights Not Exclusive**

The rights provided for herein are cumulative and are not exclusive of any other rights, powers, privileges or remedies provided by law.

## **12 Indemnity**

### **12.1 Indemnification**

Gazprom undertakes to the Bank that if the Bank, each director, officer, employee or agent (other than the Principal Paying Agent or any of the Paying Agents) of the Bank (each an "Indemnified Party") incurs any loss, liability, cost, claim, charge, expense (including all legal fees properly incurred) demand or damage (a "Loss") which may be properly incurred in respect of this Agreement (or enforcement thereof), and/or the issuance, constitution, sale, listing and/or enforcement of the Notes and/or the Notes being outstanding (excluding a Loss that is the subject of the undertakings contained in Clauses 8 and 13 and Clause 14.6 of this Agreement (it being understood that the Bank may not recover twice in respect of the same Loss)) Gazprom shall pay to the Indemnified Party on demand an amount equal to such Loss

(as evidenced by an invoice distributed to Gazprom by the Bank in accordance with Clause 14.4) unless, in any such case, such Loss was either caused by such Indemnified Parties' negligence or wilful misconduct or arise out of a breach of the representations and warranties of the Bank contained in the First Schedule to the Subscription Agreement; provided that this Clause 12.1 will not apply to or in respect of any Taxes with respect to payments of principal and interest on the Loan or any other amount payable under this Agreement.

## **12.2 Independent Obligation**

Clause 12.1 constitutes a separate and independent obligation of Gazprom from its other obligations under or in connection with this Agreement or any other obligations of Gazprom in connection with the issuance of the Notes by the Bank and shall not affect, or be construed to affect, any other provision of this Agreement or any such other obligations.

## **12.3 Evidence of Loss**

A certificate of the Bank setting forth the amount of losses, expenses and liabilities described in Clause 12.1 and specifying in full detail the basis therefor shall be prima facie evidence of the amount of such losses, expenses and liabilities.

## **12.4 Survival**

The obligations of Gazprom pursuant to Clauses 6.2, 6.3 and 12.1 shall survive the execution and delivery of this Agreement, the drawdown of the Facility and the repayment of the Loan, in each case by Gazprom.

## **13 Expenses**

### **13.1 Reimbursement of Front-end Expenses for the Extension of the Loan By The Bank**

Gazprom shall, subject to the terms contained in a side letter of even date herewith, reimburse the Bank in Dollars on demand for all reasonable costs and expenses incurred by the Bank in connection with the negotiation, preparation and execution of this Agreement and all related documents, the Notes and all related documents, including, without limitation, the fees and expense of its counsel.

### **13.2 Reimbursement of Ongoing Expenses for the Extension of the Loan By The Bank**

In addition, Gazprom hereby agrees to make any and all payments, and to pay any and all commissions, costs and expenses, in Dollars, owing to Salomon Brothers International Limited and Credit Suisse First Boston (Europe) Limited or any third party by the Bank under or in respect of the Subscription Agreement, including, without limitation, the payments required under Clauses 5 and 8 of the Subscription Agreement. Gazprom shall also reimburse the Bank for any indemnification or other payment obligations of the Bank under or in respect of the Trust Deed (other than the obligation of the Bank to make payments of principal, interest or additional amounts in respect of the Notes).

## **14 General**

### **14.1 Evidence of Debt**

The entries made in the account referred to in Clause 6.1 shall, in the absence of manifest error, constitute prima facie evidence of the existence and amounts of Gazprom's obligations recorded therein.

### **14.2 Stamp Duties**

Gazprom shall pay all stamp, registration and documentary taxes or similar charges (if any) imposed by any person in the Russian Federation or the Federal Republic of Germany which may be payable or determined to be payable in connection with the execution, delivery, performance, enforcement, or admissibility into evidence of this Agreement and shall indemnify the Bank against any and all costs and expenses which may be incurred or suffered by the Bank with respect to, or resulting from, delay or failure by Gazprom to pay such taxes or similar charges.

### 14.3 Waivers

No failure to exercise and no delay in exercising, on the part of the Bank or Gazprom, any right, power to privilege hereunder and no course of dealing between Gazprom and the Bank shall operate as a waiver thereof, nor shall any single or partial exercise of any right, power or privilege preclude any other or further exercise thereof, or the exercise of any other right, power or privilege. The rights and remedies herein provided are cumulative and not exclusive of any rights, or remedies provided by applicable law.

### 14.4 Notices

All notices, requests, demands or other communications to or upon the respective parties hereto shall be given or made by telex or otherwise in writing and shall be deemed to have been duly given or made at the time of delivery, if delivered by hand or courier or if sent by facsimile transmission or by airmail, to the party to which such notice, request, demand or other communication is required or permitted to be given or made under this Agreement addressed as follows:

- (a) if to Gazprom:

OAQ Gazprom  
16 Nametkina Street  
117884 Moscow  
Russian Federation

Telecopier: (7095) 719 8352  
Attention: Corporate Finance Department

- (b) if to the Bank:

Salomon Brothers AG  
Frankfurter Welle  
Reuterweg 16  
60323 Frankfurt am Main

Telecopier: (49 69) 232 570  
Attention: Operations Department

or to such other address or telecopier number as any party may hereafter specify in writing to the other.

### 14.5 Assignment

**14.5.1** This Agreement shall inure to the benefit of and be binding upon the parties, their respective successors and any permitted assignee or transferee of some or all of a party's rights or obligations under this Agreement. Any reference in this Agreement to any party shall be construed accordingly and, in particular, references to the exercise of rights and discretions by the Bank, following the enforcement of the security and/or assignment referred to in Clause 14.5.3 below, shall be references to the exercise of such rights or discretions by the Trustee (as Trustee). Notwithstanding the foregoing, the Trustee shall not be entitled to participate in any discussions between the Bank and Gazprom or any agreements of the Bank or Gazprom pursuant to Clauses 6.4 or 6.5 or Clause 8.

**14.5.2** Gazprom shall not assign or transfer all or any part of its rights or obligations hereunder to any other party except as otherwise expressly permitted herein.

**14.5.3** The Bank may not assign or transfer, in whole or in part, any of its rights and benefits or obligations under this Agreement except (i) the charge by way of first fixed charge granted by the Bank in favour of the Trustee (as Trustee) of the Bank's rights and

benefits under this Agreement and (ii) the absolute assignment by the Bank to the Trustee of certain rights, interests and benefits under this Agreement, in each case, pursuant to Clause 4 of the Trust Deed.

#### **14.6 Currency Indemnity**

To the fullest extent permitted by law, the obligation of Gazprom in respect of any amount due in Dollars under this Agreement shall, notwithstanding any payment in any other currency (whether pursuant to a judgment or otherwise), be discharged only to the extent of the amount in Dollars that the Bank may, in accordance with normal banking procedures, purchase with the sum paid in such other currency (after any premium and costs of exchange) on the Business Day immediately following the day on which the Bank receives such payment. If the amount in Dollars that may be so purchased for any reason falls short of the amount originally due (the "**Due Amount**"), Gazprom hereby agrees to indemnify and hold harmless the Bank against any deficiency in Dollars. Any obligation of Gazprom not discharged by payment in Dollars shall, to the fullest extent permitted by applicable law, be due as a separate and independent obligation and, until discharged as provided herein, shall continue in full force and effect. If the amount in Dollars that may be purchased exceeds that Due Amount the Bank shall promptly pay the amount of the excess to Gazprom.

#### **14.7 Prescription**

Subject to the Bank having received the principal amount thereof or interest thereon from Gazprom, the Bank shall forthwith repay to Gazprom the principal amount or the interest amount thereon, respectively, of any Notes upon such Notes becoming void pursuant to Condition 11 of the Notes.

#### **14.8 Contracts (Rights of Third Parties) Act 1999**

A person who is not a party to this Agreement has no right under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of this Agreement.

#### **14.9 Choice of Law**

This Agreement shall be governed by, and construed in accordance with, the laws of England.

#### **14.10 Jurisdiction**

**14.10.1** For the exclusive benefit of the other party, each of Gazprom and the Bank hereby irrevocably agrees that the courts of England shall have jurisdiction to settle any disputes which may arise out of or in connection with this Agreement and that accordingly any suit, action or proceeding (collectively, "**Proceedings**") arising out of or in connection with this Agreement may be brought in such courts.

**14.10.2** Each of the parties irrevocably waives any objection which it may now or hereafter have to the laying of the venue of any Proceedings in any such court referred to in this Clause 14 and any claim that any such Proceedings have been brought in an inconvenient forum and further irrevocably agrees that a final and conclusive judgment in any Proceedings brought in the English courts with competent jurisdiction shall be conclusive and binding and may be enforced in the courts of any other jurisdiction.

**14.10.3** Nothing contained in this Agreement shall limit the right of any party to take Proceedings against another party in any other court of competent jurisdiction to the extent permitted by any applicable law, nor shall the taking of Proceedings in connection with this Agreement in one or more jurisdictions preclude the taking of Proceedings in any other jurisdiction or in any other court of competent jurisdiction in connection with this Agreement to the extent by any applicable law.

**14.10.4** Gazprom hereby agrees that, at the option of the Bank, any dispute, controversy, claim or cause of action brought by any party against another party or arising out of or relating to this Loan Agreement may be settled by arbitration in accordance with the

Rules of the London Court of International Arbitration, which rules are deemed to be incorporated by reference into this clause. The place of arbitration shall be London, England and the language of the arbitration shall be English. The number of arbitrators shall be three, each of whom shall be disinterested in the dispute or controversy, shall have no connection with any party thereto and shall be an attorney experienced in international securities transactions. Each party shall nominate an arbitrator, who, in turn, shall nominate the Chairman of the Tribunal. If a dispute, claim controversy or cause of action shall involve more than two parties, the parties thereto shall attempt to align themselves in two sides (i.e. claimant and respondent) each of which shall appoint an arbitrator as if there were only two sides to such dispute, claim controversy or cause of action. If such alignment and appointment shall not have occurred within twenty (20) calendar days after the initiating party serves the arbitration demand or if a Chairman has not been selected within thirty (30) calendar days of the selection of the second arbitrator, the Arbitration Court of the London Court of International Arbitration shall appoint the three arbitrators or the Chairman, as the case may be. The parties and the Arbitration Court may appoint arbitrators from among the nationals of any country, whether or not a party is a national of that country. The arbitrators shall have no authority to award punitive or other punitive type damages and may not, in any event, make any ruling, finding or award that does not conform to the terms and conditions of this Agreement.

Fees of the arbitration (excluding each party's preparation, travel, attorneys' fees and similar costs) shall be borne in accordance with the decision of the arbitrators. The decision of the arbitrators shall be final, binding and enforceable upon the parties and judgment upon any award rendered by the arbitrators may be entered in any court having jurisdiction thereof. In the event that the failure of a party to comply with the decision of the arbitrators requires any other party to apply to any court for enforcement of such award, the non-complying party shall be liable to the other for all costs of such litigation, including reasonable attorneys' fees.

**14.10.5 Bank's Process agent:** The Bank agrees that the process by which any Proceedings in England are begun may be served on it by being delivered to Citibank, N.A., General Counsel, Citigroup Centre, 33 Canada Square, Canary Wharf, London E14 5LB or its other principal place of business in England for the time being or at any other address for the time being at which process may be served on such person in accordance with Part XXIII of the Companies Act 1985 (as modified or re-enacted from time to time). If such person is not or ceases to be effectively appointed to accept service of process on the Bank's behalf, the Bank shall, on the written demand of Gazprom, appoint a further person in England to accept service of process on its behalf and, failing such appointment within 15 days, Gazprom shall be entitled to appoint such a person by written notice to the Bank. Nothing in this Clause shall affect the right of Gazprom to serve process in any other manner permitted by law.

**14.10.6 Borrower's Process agent:** Gazprom agrees that the process by which any Proceedings in England are begun may be served on it by being delivered to Gazprom (U.K.) Limited at 35 Vine Street, London EC3N 2AA or its other principal place of business in England for the time being or at any other address for the time being at which process may be served on such person in accordance with Part XXIII of the Companies Act 1985 (as modified or re-enacted from time to time). If such person is not or ceases to be effectively appointed to accept service of process on Gazprom's behalf, Gazprom shall, on the written demand of the Bank, appoint a further person in England to accept service of process on its behalf and, failing such appointment within 15 days, the Bank shall be entitled to appoint such a person by written notice to Gazprom. Nothing in this Clause shall affect the right of the Bank to serve process in any other manner permitted by law.

#### **14.11 Counterparts**

This Agreement may be executed in any number of counterparts and all of such counterparts taken together shall be deemed to constitute one and the same agreement.

**IN WITNESS WHEREOF**, the parties hereto have caused this Agreement to be executed on the date first written above.

## TERMS AND CONDITIONS OF THE NOTES

*The following is the text of the Terms and Conditions of the Notes, which contain summaries of certain provisions of the Trust Deed, and which will be attached to the Notes in definitive form, if any, and (subject to the provisions thereof) apply to the Global Note.*

The U.S.\$500,000,000 Fixed Rate Loan Participation Notes due 2007 (the "Notes" which expression includes any further Notes issued pursuant to Condition 15 and forming a single series herewith), without coupons, of Salomon Brothers AG (the "Bank") are constituted by a trust deed (the "Trust Deed", which expression includes such trust deed as from time to time modified in accordance with the provisions therein contained and any deed or other document expressed to be supplemental thereto, as from time to time so modified) dated 25 April 2002 and made between the Bank and The Bank of New York (the "Trustee", which expression shall include any successors) as trustee for the holders of the Notes (the "Noteholders").

The Bank has authorised the creation, issue and sale of the Notes for the sole purpose of financing a U.S.\$500,000,000 5-year loan (the "Loan") to Open Joint Stock Company GAZPROM (the "Borrower"). The Bank and the Borrower have recorded the terms of the Loan in a loan agreement (the "Loan Agreement") dated 19 April 2002 between the Bank and the Borrower.

In each case where amounts of principal, interest and additional amounts (if any) are stated herein or in the Trust Deed to be payable in respect of the Notes, the obligations of the Bank to make any such payment shall constitute an obligation only to procure to be paid to the Noteholders on each date upon which such amounts of principal, interest and additional amounts (if any) are due in respect of the Notes, an amount equivalent to sums of principal, interest and additional amounts (if any) actually received by or for the account of the Bank pursuant to the Loan Agreement.

The Bank has charged by way of first fixed charge in favour of the Trustee certain of its rights and interests as lender under the Loan Agreement (other than any rights and benefits constituting Reserved Rights (as defined in the Trust Deed) as security for its payment obligations in respect of the Notes and under the Trust Deed and has assigned absolutely certain other rights under the Loan Agreement to the Trustee (the "Loan Administration Assignment" and together with the charge by way of first fixed charge, the "Security Interests"). In certain circumstances, the Trustee can (subject to it being indemnified and/or secured to its satisfaction) be required by Noteholders holding at least one quarter of the principal amount of the Notes outstanding or by an Extraordinary Resolution (as defined in the Trust Deed) of the Noteholders to exercise certain of its powers under the Trust Deed (including those arising under the Loan Administration Assignment).

Payments in respect of the Notes will be made (subject to the receipt of the relevant funds from the Borrower) pursuant to a paying agency agreement (the "Agency Agreement") dated 25 April 2002 and made between the Bank, The Bank of New York, New York Branch as paying agent and the registrar (the "Registrar", which expressions shall include any successors), The Bank of New York, London Branch as the principal paying agent (the "Principal Paying Agent") and Kredietbank S.A. Luxembourgeoise as paying agent and transfer agent (the "Transfer Agent"), which expressions shall include any successors, the Borrower and the Trustee.

Copies of the Trust Deed, the Loan Agreement and the Agency Agreement are available for inspection at the principal office of the Trustee being, at the date hereof, at One Canada Square, London E14 5AL and at the specified office of the Paying Agent in Luxembourg.

The statements contained in these Terms and Conditions include summaries or restatements of, and are subject to, the detailed provisions of the Trust Deed, the Loan Agreement (the form of which is scheduled to and incorporated in the Trust Deed) and the Agency Agreement. Noteholders are entitled to the benefit of, are bound by, and are deemed to have notice of, all the provisions thereof.

### **1 Status**

The sole purpose of the issue of the Notes is to provide the funds for the Bank to finance the Loan. The Notes constitute the obligation of the Bank to apply the proceeds from the issue of the Notes solely for financing the Loan and to account to the Noteholders for an amount equivalent to sums

of principal, interest and additional amounts (if any) actually received by or for the account of the Bank pursuant to the Loan Agreement.

The Trust Deed provides that payments in respect of the Notes equivalent to the sums actually received by or for the account of the Bank by way of principal, interest or additional amounts (if any) pursuant to the Loan Agreement will be made *pro rata* among all Noteholders, on the date of, and in the currency of, and subject to the conditions attaching to, the equivalent payment pursuant to the Loan Agreement. The Bank shall not be liable to make any payment in respect of the Notes other than as expressly provided herein and in the Trust Deed. As provided therein, the Bank shall be under no obligation to exercise in favour of the Noteholders any rights of set-off or of banker's lien or to combine accounts or counterclaim that may arise out of other transactions between the Bank and the Borrower.

Noteholders have notice of, and have accepted, these Terms and Conditions and the contents of the Trust Deed and the Loan Agreement, and have hereby accepted that:

- (a) neither the Bank nor the Trustee makes any representation or warranty in respect of, or shall at any time have any responsibility for, or, save as otherwise expressly provided in the Trust Deed or in paragraph (f) below, liability or obligation in respect of the performance and observance by the Borrower of its obligations under the Loan Agreement or the recoverability of any sum of principal or interest (or any additional amounts) due or to become due from the Borrower under the Loan Agreement;
- (b) neither the Bank nor the Trustee shall at any time have any responsibility for, or obligation or liability in respect of, the financial condition, creditworthiness, affairs, status or nature of the Borrower;
- (c) neither the Bank nor the Trustee shall at any time be liable for any representation or warranty or any act, default or omission of the Borrower under or in respect of the Loan Agreement;
- (d) neither the Bank nor the Trustee shall at any time have any responsibility for, or liability or obligation in respect of, the performance and observance by the Principal Paying Agent, any of the Paying Agents, the Registrar or the Transfer Agent of their respective obligations under the Agency Agreement;
- (e) the financial servicing and performance of the terms of the Notes depend solely and exclusively upon performance by the Borrower of its obligations under the Loan Agreement and its covenant, credit and financial standing. The Borrower has represented and warranted to the Bank in the Loan Agreement that the Loan Agreement constitutes a legal, valid and binding obligation of the Borrower; and
- (f) the Bank and the Trustee shall be entitled to rely on self-certification of the Borrower as a means of monitoring whether the Borrower is complying with its obligations under the Loan Agreement and shall not otherwise be responsible for investigating any aspect of the Borrower's performance in relation thereto and, subject as further provided in the Trust Deed, the Trustee will not be liable for any failure to make the usual or any investigations which might be made by a security holder in relation to the property which is the subject of the Trust Deed and held by way of security for the Notes, and shall not be bound to enquire into or be liable for any defect or failure in the right or title of the Bank to the assigned property whether such defect or failure was known to the Trustee or might have been discovered upon examination or enquiry or whether capable of remedy or not, nor will it have any liability for the enforceability of the security created by the Security Interests whether as a result of any failure, omission or defect in registering or filing or otherwise protecting or perfecting such security; the Trustee has no responsibility for the value of such security.

Under the Trust Deed, the obligations of the Bank in respect of the Notes rank *pari passu* and ratably without any preference among themselves.

In the event that the payments under the Loan Agreement are made by the Borrower to, or to the order of, the Trustee or (subject to the provisions of the Trust Deed) the Principal Paying Agent, they will *pro tanto* satisfy the obligations of the Bank in respect of the Notes.

Save as otherwise expressly provided herein and in the Trust Deed, no proprietary or other direct interest in the Bank's right under or in respect of the Loan Agreement or the Loan exists for the benefit of the Noteholders. Subject to the terms of the Trust Deed, no Noteholder will have any entitlement to enforce the Loan Agreement or direct recourse to the Borrower except through action by the Trustee pursuant to the Loan Administration Assignment granted to the Trustee in the Trust Deed. Neither the Bank nor, following the enforcement of the Security Interests created in the Trust Deed, the Trustee shall be required to take proceedings to enforce payment under the Loan Agreement unless it has been indemnified and/or secured by the Noteholders to its satisfaction.

## **2 Form and Denomination**

The Notes are issued in fully registered form, and in the denomination of U.S.\$1,000 or integral multiples thereof, without interest coupons.

## **3 Register, Title and Transfers**

The Registrar will maintain a register (the "Register") in respect of the Notes in accordance with the provisions of the Agency Agreement. In these Conditions the "holder" of a Note means the person in whose name such Note is for the time being registered in the Register (or, in the case of a joint holding, the first named thereof) and "Noteholder" shall be construed accordingly. A Note will be issued to each Noteholder in respect of its registered holding.

The holder of each Note shall (except as otherwise required by law) be treated as the absolute owner of such Note for all purposes (whether or not it is overdue and regardless of any notice of ownership, trust or any other interest therein, any writing on the Note relating thereto (other than the endorsed form of transfer) or any notice of any previous loss or theft of such Note) and no person shall be liable for so treating such holder.

A Note may be transferred upon surrender of the relevant Note, with the endorsed form of transfer duly completed, at the specified office of the Registrar or at the specified office of the Transfer Agent, together with such evidence as the Registrar or the Transfer Agent may reasonably require to prove the title of the transferor and the authority of the individuals who have executed the form of transfer. Where not all the Notes represented by the surrendered Note are the subject of the transfer, a new Note in respect of the balance of the Note will be issued to the transferor.

Subject to the last paragraph of this Condition, within five business days of the surrender of a Note in accordance with the immediately preceding paragraph above, the Registrar will register the transfer in question and deliver a new Note to each relevant holder at its specified office or (at the request and risk of such relevant holder) by uninsured first class mail (airmail if overseas) to the address specified for the purpose by such relevant holder. In this paragraph, "business day" means a day on which commercial banks are open for business (including dealings in foreign currencies) in the city where the Registrar has its specified office.

The transfer of a Note will be effected without charge but against such indemnity as the Registrar may require in respect of any tax or other duty of whatsoever nature which may be levied or imposed in connection with such transfer.

Noteholders may not require transfers to be registered during the period of 15 days ending on the due date for any payment of principal or interest in respect of the Notes.

## **4 Restrictive Covenant**

As provided in the Trust Deed, so long as any of the Notes remains outstanding (as defined in the Trust Deed), the Bank will not, without the prior written consent of the Trustee, agree to any amendments to or any modification or waiver of, or authorise any breach or proposed breach of, the terms of the Loan Agreement and will act at all times in accordance with any instructions of the Trustee from time to time with respect to the Loan Agreement, except as otherwise expressly provided in the Loan Agreement. Any such amendment, modification, waiver or authorisation made with the consent of the Trustee shall be binding on the Noteholders and, unless the Trustee

agrees otherwise, any such amendment or modification shall be notified by the Bank to the Noteholders in accordance with Condition 14.

## **5 Interest**

On each Interest Payment Date the Bank shall account to the Noteholders for an amount equivalent to amounts of interest actually received by or for the account of the Bank pursuant to the Loan Agreement, which interest under the Loan is equal to 9.125% per annum as set out in Clause 4 of the Loan Agreement. Interest shall continue to accrue on overdue interest at the same rate per annum up to the maximum extent permitted by applicable law.

If interest is required to be calculated for any period of less than a year, it will be calculated on the basis of a year of 360 days consisting of 12 months of 30 days each and, in the case of an incomplete month, the actual number of days elapsed.

In this Condition 5, "Interest Payment Date" means 25 April and 25 October of each year.

## **6 Redemption**

Unless previously prepaid or repaid, the Borrower will be required to repay the Loan on 25 April 2007 and, subject to such repayment, as set forth in the Loan Agreement, all the Notes then remaining outstanding will on that date be redeemed or repaid by the Bank at 100% of the principal amount thereof.

If the Loan should become repayable (and be repaid) pursuant to the Loan Agreement prior to 25 April 2007, as set forth in the Loan Agreement, all Notes then remaining outstanding will thereupon become due and redeemable or repayable at par together with accrued interest (and, subject to the Loan being repaid together with accrued interest, shall be redeemed or repaid) and the Bank will endeavour to give not less than 8 days' notice thereof to the Trustee and the Noteholders.

## **7 Payments**

Payments of principal shall be made by U.S. dollar cheque drawn on, or by transfer to a U.S. dollar account maintained by the payee with, a bank in New York City upon surrender of the relevant Notes at the specified office of the Principal Paying Agent or at the specified office of the Transfer Agent.

Payments of interest shall be made by U.S. dollar cheque drawn on, or by transfer to a U.S. dollar account maintained by the payee with, a bank in New York City and (in the case of interest payable on redemption) upon surrender of the relevant Notes at the specified office of the Principal Paying Agent or at the specified office of the Transfer Agent.

All payments in respect of the Notes are subject in all cases to any applicable fiscal or other laws and regulations, but without prejudice to the provisions of Condition 8. No commissions or expenses shall be charged to the Noteholders in respect of such payments.

If the due date for payments of interest or redemption is not a business day, the holder of a Note shall not be entitled to payment of the amount due until the next following business day and shall not be entitled to any further interest or other payment in respect of any such delay. In this paragraph, "business day" means a day on which the London Interbank Market is open for dealings between banks generally, and if on that day a payment is to be made hereunder, commercial banks generally are open for business in New York City and in the city where the specified office of the Principal Paying Agent is located.

Each payment in respect of a Note will be made to the person shown as the holder in the Register at the opening of business (in the place of the Registrar's specified office) on the fifteenth day before the due date for such payment.

The Agency Agreement provides that the Bank may at any time, with the prior written approval of the Trustee, vary or terminate the appointment of the Principal Paying Agent or any of the Paying Agents, and appoint additional or other paying agents provided that so long as the Notes are listed on the Luxembourg Stock Exchange (the "Stock Exchange"), there will be a paying agent and

transfer agent with a specified office in Luxembourg or such other place in accordance with the rules of the Stock Exchange. Any such variation, termination or appointment shall only take effect (other than in the case of insolvency, when it shall be of immediate effect) after not more than 45 days' and not less than 30 days' notice thereof shall have been given to the Noteholders.

In addition, if the due date for redemption or repayment of a Note is not an Interest Payment Date, interest accrued from the preceding Interest Payment Date or, as the case may be, from the Closing Date, shall be payable only as and when actually received by or for the account of the Bank pursuant to the Loan Agreement.

Save as directed by the Trustee at any time after the security created in the Trust Deed becomes enforceable, the Bank will require the Borrower to make all payments of principal and interest to be made pursuant to the Loan Agreement to the Principal Paying Agent for the account of the Bank. Under the Security Interests the Bank will charge by way of first fixed charge all the rights, title and interest in and to all sums of money then or in the future deposited in such account in favour of the Trustee for the benefit of the Noteholders.

## 8 Taxation

All payments in respect of the Notes by or on behalf of the Bank will be made without deduction or withholding for or on account of any present or future taxes or duties of whatever nature imposed or levied by or on behalf of the Federal Republic of Germany or any authority thereof or therein having the power to tax, unless the deduction or withholding of such taxes or duties is required by law.

In such event, the Bank shall make such additional payments as shall result in the receipt by the Noteholders of such amount as would have been received by them if no such withholding or deduction had been required. However, the Bank shall only make such additional payments to the extent and at such time as it shall receive equivalent sums from the Borrower under the Loan Agreement. To the extent that the Bank does not receive any such equivalent sum, the Bank shall account to the relevant Noteholder for an additional amount equivalent to a *pro rata* proportion of such additional amount (if any) as is actually received by, or for the account of, the Bank pursuant to the provisions of the Loan Agreement on the date of, in the currency of, and subject to any conditions attaching to the payment of such additional amount to the Bank provided that no such additional amount will be payable:

- (i) to a Noteholder who (a) is able to avoid such deduction or withholding by satisfying any statutory requirements or by making a declaration of non-residence or other claim for exemption to the relevant tax authority; or (b) is liable for such taxes or duties by reason of his having some connection with the Federal Republic of Germany other than the mere holding of such Notes or the receipt of payments in respect thereof;
- (ii) in respect of a Note presented for payment of principal more than 30 days after the Relevant Date except to the extent that such additional payment would have been payable if such Note had been presented for payment on such thirtieth day;
- (iii) where such withholding or deduction is imposed on a payment to an individual and is required to be made pursuant to any European Union Directive on the taxation of savings implementing the conclusions of the ECOFIN Council meeting of 26-27 November 2000 or any law implementing or complying with, or introduced in order to conform to, such Directive; or
- (iv) in respect of a Note presented for payment by or on behalf of a Noteholder who would have been able to avoid such withholding or deduction by presenting the relevant Note to another Paying Agent in a Member State of the European Union.

As used herein, "Relevant Date" (i) means the date on which the equivalent payment under the Loan Agreement first becomes due but (ii) if the full amount payable by the Borrower has not been received by, or for the account of, the Bank pursuant to the Loan Agreement on or prior to such date, means the date on which such full amount shall have been so received and notice to that effect shall have been duly given to the Noteholders by or on behalf of the Bank.

Any reference herein or in the Trust Deed to payments in respect of the Notes shall be deemed also to refer to any additional amounts which may be payable in accordance with the Trust Deed and this Condition 8 or any undertaking given in addition thereto or in substitution therefor pursuant to the Trust Deed.

## **9 Enforcement**

The Trust Deed provides that only the Trustee may pursue the remedies under the general law, the Trust Deed or the Notes to enforce the rights of the Noteholders and no such Noteholder will be entitled to pursue such remedies unless the Trustee (having become bound to do so in accordance with the terms of the Trust Deed) fails to do so within a reasonable period and such failure is continuing.

The Trust Deed also provides that, in the case of an Event of Default (as defined in the Loan Agreement), or of a Relevant Event (as defined in the Trust Deed), the Trustee may, and shall, if requested to do so by Noteholders owning 25% in aggregate principal amount of the Notes outstanding, or if directed to do so by an Extraordinary Resolution and, in either case, subject to it being secured and/or indemnified to its satisfaction, declare all amounts payable under the Loan Agreement by the Borrower to be due and payable (in the case of an Event of Default), or enforce the security created in the Trust Deed in favour of the Trustee (in the case of a Relevant Event). Upon repayment of the Loan following an Event of Default and a declaration as provided herein, the Notes will be redeemed or repaid and thereupon shall cease to be outstanding.

## **10 Meetings of Noteholders; Modification of Notes, Trust Deed and Loan Agreement; Waiver; Substitution of the Bank**

The Trust Deed contains provisions for convening meetings of Noteholders to consider any matter affecting their interests, including any modification of, or any arrangement in respect of, the Notes or the Trust Deed. Noteholders will vote *pro rata* according to the principal amount of their Notes. Special quorum provisions apply for meetings of Noteholders convened for the purpose of amending certain terms concerning, *inter alia*, the amount payable on, and the currency of payment in respect of, the Notes and the amounts payable and currency of payment under the Loan Agreement. Any resolution duly passed at a meeting of Noteholders will be binding on all the Noteholders, whether present or not.

The Trustee may agree, without the consent of the Noteholders, to any modification of the Notes and the Trust Deed or, following the creation of the Security Interests, the Loan Agreement which in the opinion of the Trustee is of a formal, minor or technical nature, is made to correct a manifest error or is not materially prejudicial to the interests of the Noteholders. The Trustee may also waive or authorise or agree to the waiving or authorising of any breach or proposed breach by the Bank of the Terms and Conditions of the Notes or the Trust Deed or, following the creation of the Security Interests, by the Borrower of the terms of the Loan Agreement, or determine that any event which would or might otherwise give rise to a right of acceleration under the Loan Agreement shall not be treated as such, if in the opinion of the Trustee, to do so would not be materially prejudicial to the interests of the Noteholders (as a class). Any such modification, waiver or authorisation shall be binding on the Noteholders and, unless the Trustee agrees otherwise, any such modification shall be promptly notified to the Noteholders.

The Trust Deed contains provisions to the effect that the Bank may, having obtained the consent of the Borrower and the Trustee (which latter consent may be given without the consent of the Noteholders) and having complied with such reasonable requirements as the Trustee may direct in the interests of the Noteholders, substitute any entity in place of the Bank as creditor under the Loan Agreement, as issuer and principal obligor in respect of the Notes and as principal obligor under the Trust Deed, subject to the relevant provisions of the Trust Deed and the substitute's rights under the Loan Agreement being charged and assigned, respectively, to the Trustee as security for the payment obligations of the substitute obligor under the Trust Deed and the Notes.

In connection with the exercise of any of its powers, trusts, authorities or discretions, the Trustee shall have regard to the interests of the Noteholders as a class and, in particular, shall not have regard to the consequences of such exercise for individual Noteholders resulting from their being

for any purpose domiciled or resident in, or otherwise connected with, or subject to the jurisdiction of, any particular territory. No Noteholder is entitled to claim from the Bank or the Trustee any indemnification or payment in respect of any tax consequence of any such exercise upon individual Noteholders.

## **11 Prescription**

Notes will become void unless presented for payment of principal within ten years (in the case of principal) or five years (in the case of interest) from the due date for payment in respect thereof.

## **12 Indemnification of Trustee**

The Trust Deed contains provisions for the indemnification of the Trustee and for its relief from responsibility, including provisions relieving it from taking proceedings to enforce payment unless indemnified to its satisfaction.

The Trustee's responsibilities are solely those of trustee for the Noteholders on the terms of the Trust Deed. Accordingly, the Trustee makes no representations and assumes no responsibility for the validity or enforceability of the Loan Agreement or the security created in respect thereof or for the performance by the Bank of its obligations under or in respect of the Notes and the Trust Deed or by the Borrower in respect of the Loan Agreement.

## **13 Replacement of Notes**

If a Note shall become mutilated, defaced, lost, stolen or destroyed it may, subject to all applicable laws and regulations and requirements of the Stock Exchange, be replaced at the specified office of the Registrar in New York on payment of such costs, expenses, taxes and duties as may be incurred in connection therewith and on such terms as to evidence, security and indemnity and otherwise as may reasonably be required by or on behalf of the Bank or the Trustee. Mutilated or defaced Notes must be surrendered before replacements will be issued.

## **14 Notices**

All notices shall be deemed to have been duly given if (i) posted to such holders at their respective addresses as shown on the register of Noteholders maintained by the Registrar and (ii) so long as the Notes are listed on the Stock Exchange, published in a daily newspaper of general circulation in Luxembourg approved by the Trustee, currently expected to be the *Luxemburger Wort*. Any such notice shall be deemed to have been given on the first date on which both conditions shall have been met.

In case by reason of any other cause it shall be impracticable to publish any notice to holders of Notes as provided above, then such notification to such holders as shall be given with the approval of the Trustee shall constitute sufficient notice to such holders for every purpose hereunder.

## **15 Further Issues**

The Bank may from time to time, without the consent of the Noteholders, create and issue further Notes having the same terms and conditions as the Notes in all respects (or in all respects except for the first payment of interest) so as to form a single series with the Notes. Such further Notes shall be issued under a deed supplemental to the Trust Deed. The Trust Deed contains provisions for convening a single meeting of Noteholders and the holders of Notes of other series in certain circumstances where the Trustee so decides.

## **16 Contracts (Rights of Third Parties) Act 1999**

No person shall have any right to enforce any term or condition of the Notes under the Contracts (Rights of Third Parties) Act 1999.

## **17 Governing Law**

The Notes and the Trust Deed are governed by and shall be construed in accordance with, English law. The Bank has submitted in the Trust Deed to the jurisdiction of the courts of England and has appointed an agent for the service of process in England.

## SUMMARY OF PROVISIONS RELATING TO THE NOTES IN GLOBAL FORM

The Notes will be represented by a Global Note which will be registered in the name of The Bank of New York Depository (Nominees) Limited as nominee for, and deposited with, a common depository for Euroclear and Clearstream, Luxembourg.

The Global Note will become exchangeable in whole but not in part (free of charge to the holder), for definitive Notes ("Definitive Notes") if (a) Euroclear or Clearstream, Luxembourg is closed for business for a continuous period of 14 days (other than by reason of holidays) or announces an intention permanently to cease business or (b) if the Bank would suffer a material disadvantage in respect of the Notes as a result of a change in the laws or regulations (taxation or otherwise) of any jurisdiction referred to in Condition 8 which would not be suffered were the Notes in definitive form.

Whenever the Global Note is to be exchanged for Definitive Notes, such Definitive Notes will be issued in an aggregate principal amount equal to the principal amount of the Global Note following delivery, by or on behalf of the registered holder of the Global Note, Euroclear and/or Clearstream, Luxembourg, to the Registrar of such information as is required to complete and deliver such Definitive Notes (including, without limitation, the names and addresses of the persons in whose names the Definitive Notes are to be registered and the principal amount of each such person's holding) against the surrender of the Global Note at the Specified Office of the Registrar or the Transfer Agent. Such exchange will be effected in accordance with the provisions of the Agency Agreement, the Trust Deed and the Global Note.

In addition, the Global Note will contain a provision which modifies the Terms and Conditions of the Notes as they apply to the Notes evidenced by the Global Note. The following is a summary of this provision:

*Notices:* Notwithstanding Condition 14 (*Notices*), so long as the Global Note is held by or on behalf of Euroclear, Clearstream, Luxembourg or any other clearing system (an "Alternative Clearing System"), notices to Noteholders represented by the Global Note may be given by delivery of the relevant notice to Euroclear, Clearstream, Luxembourg or (as the case may be) such Alternative Clearing System; *provided, however, that*, so long as the Notes are listed on the Luxembourg Stock Exchange and its rules so require, notices will also be published in a leading daily newspaper having general circulation in Luxembourg (which is expected to be the *Luxemburger Wort*).

## TAXATION

*Prospective purchasers of the Notes are advised to consult their own tax advisers as to the consequences under the tax laws of the country of which they are residents, of a purchase of Notes, including but not limited to, the consequences of receipt of interest and sale or redemption of the Notes. The following is a general description of certain tax laws relating to the Notes and the Loan as in effect on the date hereof and does not purport to be a comprehensive discussion of the tax treatment of the Notes*

### **Russian Federation**

#### **General**

The following is a summary of certain Russian tax considerations relevant to purchase, ownership and disposition of the Notes as well as concerning taxation of payments of interest on the Loan. The summary is based on the laws of Russia in effect on the date of this Offering Circular. The summary does not seek to address the applicability of, and procedures in relation to, taxes levied by regions, municipalities or other non-federal level authorities of Russia. Nor does the summary seek to address the availability of double tax treaty relief, and it should be noted that there may be practical difficulties involved in claiming double tax treaty relief. Prospective investors should consult their own advisers regarding the tax consequences of investing in the Notes. No representation with respect to the Russian tax consequences to any particular holder is made hereby.

Many aspects of Russian tax law are subject to significant uncertainty. Further, the substantive provisions of Russian tax law applicable to financial instruments may be subject to more rapid and unpredictable change and inconsistency than in jurisdictions with more developed capital markets. In particular, the interpretation and application of such provisions will in practice rest substantially with local tax inspectorates.

For the purposes of this summary, a "non-resident holder" means a physical person actually present in Russia for an aggregate period of less than 183 days in a given calendar year or a legal person or organisation in each case not organised under Russian law which holds and disposes of the Notes otherwise than through a permanent establishment in Russia.

The Russian tax treatment of interest payments made by Gazprom to the Bank under the Loan Agreement may affect the holders of the Notes. See below "Taxation of Interest on the Loan".

#### **Non-Resident Holders**

A non-resident holder of a Note will not be subject to any Russian taxes on receipt from the Bank of amounts payable in respect of principal, of, or interest on, the Note subject to what is said in "Taxation of Interest on the Loan".

A non-resident holder generally should not be subject to any Russian taxes in respect of gains or other income realised on the sale or other disposition of the Notes outside Russia provided there is no income from a source within Russia.

A non-resident holder which is a legal person or organisation should not be subject to withholding tax on any gain on the disposal of Notes even if payment is received from within Russia, although there is some residual uncertainty regarding the treatment of any part of such gain which is attributable to accrued interest on the Notes. Accrued interest may be distinguished from the total gain and taxed at a rate of 20%. The separate taxation of the interest accrued may create a tax liability in relation to interest even in a situation of a capital loss on the disposal of the Notes.

A non-resident holder who is a physical person will generally be subject to tax at the rate of 30% on the gross proceeds from the disposal of the Notes less any available cost deductions (taxable base) where the proceeds of such disposal are received from a source within Russia, subject to any available double tax treaty relief. If the Notes are disposed of in Russia, the proceeds of such disposal are likely to be regarded for personal income tax purposes as income from a source within Russia. In certain circumstances, if the disposal proceeds are payable by a Russian organisation, individual entrepreneur or a Russian permanent establishment of a foreign organisation, the payer may be required to withhold this tax. There is a risk that the taxable base may be affected by changes in the exchange rates between the currency of acquisition of the Notes, the currency of sale and Roubles.

### **Resident Holders**

A holder of a Note who is a physical or legal person resident in Russia for tax purposes is subject to all applicable Russian taxes.

### **Taxation of Interest on the Loan**

In general, payments of interest on borrowed funds by a Russian entity to a non-resident legal person are subject to Russian withholding tax at the rate of 20%, absent reduction or elimination pursuant to the terms of an applicable double tax treaty. Based on professional advice it has received, Gazprom believes that payments of interest on the Loan should not be subject to withholding under the terms of the double taxation treaty between Russia and the Federal Republic of Germany. However there can be no assurance that such relief will be obtained. If, as a result of the enforcement by the Trustee of the security granted to it by the Bank by way of the security interests created in the Trust Deed, interest under the Loan becomes payable to the Trustee, the benefit of the double tax treaty between Russia and the Federal Republic of Germany would cease and payments of interest may be subject to Russian withholding tax.

VAT is not applied to the rendering of financial services involving the provision of a loan in monetary form. Therefore no VAT will be payable in Russia on interest payments.

If the payments under the Loan Agreement are subject to any withholding (as a result of which the Bank would reduce payments under the Notes in the amount of such withholding), Gazprom is obliged to increase payments as may be necessary so that the net payments received by the Bank will not be less than the amount it would have received in the absence of such withholding. It should be noted however that gross-up provisions in contracts may not be enforceable under Russian law. In the event that Gazprom fails to increase payments, such failure would constitute an Event of Default under the Loan Agreement. If Gazprom is obliged to increase payments, it may prepay the Loan in full. In such case, all outstanding Notes would be redeemable at par with accrued interest.

### **Federal Republic of Germany**

The following is a general discussion of certain German income tax consequences of the acquisition, ownership and disposition of Notes to original purchasers of the Notes. This summary is based on the laws currently in force and as applied in practice on the date of this Offering Circular, which are subject to change, possibly with retroactive effect.

### **Tax Residents**

Under German law, as currently in effect, payments of interest on the Notes to persons who are residents of Germany (that is, persons whose residence, customary place of abode, head office or central management is located in Germany) are subject to German personal or corporate income tax. If the Notes are kept or administered in a domestic securities deposit account by a German financial institution, which term includes a German branch of a foreign financial institution but excludes a foreign branch of a German financial institution, interest payments in respect of such Notes will be subject to a 30% capital yield tax (*Zinsabschlagsteuer*) and a 5.5% solidarity surcharge on such tax. As a result, such payments will be subject to a total withholding tax charge of 31.65%. The *Zinsabschlagsteuer* and solidarity surcharge withheld from such payments are later credited as prepayments against the German personal or corporate income tax and the respective solidarity surcharge of the recipient.

If a holder sells a Note during a current interest period, the accrued interest received in connection therewith (*Stückzinsen*) will also be subject to personal or corporate income tax and the 30% *Zinsabschlagsteuer* and solidarity surcharge. *Stückzinsen* paid by a holder upon the purchase of a Note reduces the personal or corporate income tax base and, under certain circumstances, the taxable base for the *Zinsabschlagsteuer* and solidarity surcharge.

### **Non-Tax Residents**

Payments of interest to persons who are not tax residents of Germany and have no connection with Germany other than the receipt of payments in respect of the Notes are exempt from the German withholding tax and solidarity surcharge.

If the interest from a Note kept or administered in a German securities deposit account is received by persons who are not residents of Germany and for whom interest paid in respect of the Notes constitutes income from German sources (e.g., income effectively connected with a German trade or business), the 30% *Zinsabschlagsteuer* and the 5.5% solidarity surcharge are applicable but can be credited toward the German personal or corporate income tax liability of such non-residents.

### ***Other Taxes***

Gains realised by persons who are not tax residents of Germany from the sale or other disposition of Notes that are not held as part of a permanent establishment or fixed base in Germany will not be subject to tax in Germany. No stamp, issue, registration, or similar taxes or duties will be payable in Germany in connection with the issuance, delivery or execution of the Notes.

### **EU Withholding Tax**

The European Union is currently considering proposals for a new directive regarding the taxation of savings income. Subject to a number of important conditions being met, it is proposed that Member States will be required to provide to the tax authorities of another Member State details of payments of interest or other similar income paid by a person within its jurisdiction to an individual resident in that other Member State, subject to the right of certain Member States to opt instead for a withholding system for a transitional period in relation to such payments.

## **SALOMON BROTHERS AG**

The Bank is licensed under the laws of the Federal Republic of Germany and is supervised and regulated by the German Banking Supervisory Authority and the German Bundesbank. The Bank was licensed as a bank with effect from 22 October 1986 in Frankfurt am Main and is engaged in various banking and investment banking activities.

The Bank is affiliated to Salomon Brothers International Limited but is not an affiliate of the Borrower.

The fully paid up share capital of the Bank is DM 450,000,000, and the amount of its capital reserves as of 31 December 2001 was DM 2,816,945.

The Members of the Management Board of the Bank are Dr Frank Müller, Christoph Lampert and Dieter Visser.

Since the Bank's sole obligation in respect of the Notes is to make certain payments as and when payments on the Loan are received pursuant to the Loan Agreement, financial information relating to the Bank is not included in this Offering Circular.

## SUBSCRIPTION AND SALE

Salomon Brothers International Limited, Credit Suisse First Boston (Europe) Limited, and Alpha Bank A.E., Bayerische Hypo-und Vereinsbank AG, Commerzbank Aktiengesellschaft, ING Bank N.V., London Branch, GazInvest Finance B.V., MDM Bank, Vnesheconombank and Westdeutsche Landesbank Girozentrale, London Branch, (together the "Managers") have, pursuant to the terms and conditions set forth in a subscription agreement, dated 19 April 2002 (the "Subscription Agreement"), jointly and severally agreed with the Bank, subject to the satisfaction of certain conditions set forth therein, to subscribe and pay for the Notes at the issue price of 100% of the principal amount of the Notes. The Subscription Agreement also provides for the Managers to receive commissions of 1.00% of the principal amount of the Notes. The Borrower has agreed to pay certain costs in connection with the offering of the Notes and to reimburse the Managers, the Bank and the Trustee for certain of their expenses in connection with the offering of the Notes. The Managers are entitled to be released and discharged from their obligations under the Subscription Agreement in certain circumstances prior to payment being made to the Bank.

The Notes have not been and will not be registered under the United States Securities Act of 1933 (the "Securities Act") and may not be offered or sold within the United States or to, or for the account or benefit of, any "U.S. person" as defined in Regulation S under the Securities Act, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. The Managers have represented and agreed that neither they nor any of their affiliates nor any person acting on their behalf have offered or sold or will offer or sell any Notes as part of their distribution except outside the United States in offshore transactions (as defined in Regulation S under the Securities Act) meeting the requirements of Rule 903 of Regulation S under the Securities Act. In addition, until 40 days after commencement of the offering, an offer or sale of Notes within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act.

Each Manager has represented and agreed that (i) it has not offered or sold and prior to the expiry of the period of six months from the payment date will not offer or sell any Notes to persons in the United Kingdom except to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of their business or otherwise in circumstances which have not resulted and will not result in an offer to the public in the United Kingdom within the meaning of the Public Offers of Securities Regulations 1995, (ii) it has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000 (the "FSMA")) received by it in connection with the issue or sale of any Notes in circumstances in which section 21(1) of the FSMA does not apply to the Borrower or the Loan Guarantor, and (iii) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the Notes in, from or otherwise involving the United Kingdom.

No sales prospectus (*Verkaufsprospekt*) under the German Securities Sales Prospectus Act (*Wertpapier-Verkaufsprospektgesetz*) has been, or will be, prepared by the Bank or the Managers in connection with the offering of the Notes. Each Manager has represented, warranted and undertaken that it has offered and sold, and will offer and sell, the Notes only in full accordance with the German Securities Sales Prospectus Act.

Each Manager has agreed that the Notes will not be offered, transferred or sold as part of their initial distribution or at any time thereafter to or for the benefit of any persons (including legal entities) resident, incorporated, established or having their usual residence in the Russian Federation or to any person located within the territory of the Russian Federation unless to the extent otherwise permitted under Russian law.

Each Manager has agreed that it has complied and will comply with applicable laws and regulations in each jurisdiction which it offers, sells or delivers Notes or distributes this Offering Circular (and any amendments thereof and supplements thereto) or any other offering or publicity material relating to the Notes, the Bank or the Borrower.

The Borrower is a party to the Subscription Agreement and has given certain representations and warranties, covenants and indemnities to the Managers and the Bank therein.

## GENERAL INFORMATION

1. The Notes represented by the Global Note have been accepted for clearance through Euroclear and Clearstream, Luxembourg with a Common Code of 014665510. The International Securities Identification Number for the Notes is XS0146655104.
2. In connection with the application to list the Notes on the Luxembourg Stock Exchange, a legal notice relating to the issue of the Notes and a copy of the Charter of Gazprom (together with an English translation) will be deposited with the Chief Registrar of the District Court in Luxembourg ("*Greffier en Chef du Tribunal d'Arrondissement de et à Luxembourg*") where such documents may be examined and copies obtained.
3. Gazprom and the Bank have obtained all necessary consents, approvals and authorisations in Russia and Germany in connection with the Loan and the issue and performance of the Notes. The Loan and the issue of the Notes were authorised by the Resolution of the Board of Directors of Gazprom passed on 21 March 2002, and the Resolution of the Management Committee of Gazprom passed on 28 September 2001.
4. No consents, approvals, authorisations or orders of any regulatory authorities are required by the Bank under the laws of the Federal Republic of Germany for the maintenance of the Loan or for the issue of the Notes.
5. There has been no significant change in the financial or trading position or prospects of Gazprom or the Group since 31 December 2000 and no material adverse change in the financial or trading position or prospects of Gazprom or of the Group since 31 December 2000.
6. Except as disclosed in this Offering Circular, neither Gazprom nor any of its subsidiaries is involved in any litigation or arbitration proceedings relating to claims or amounts that are material in the context of the issue of the Notes nor, so far as Gazprom is aware, is any such litigation or arbitration pending or threatened.
7. Copies in English of the latest annual report and consolidated annual accounts of Gazprom and the latest interim consolidated unaudited accounts of Gazprom may be obtained, and copies of the Trust Deed in respect of the Notes (including the forms of the Global Note and definitive Notes), the Agency Agreement and the Loan Agreement will be available for inspection, at the specified offices of the Trustee and the Paying Agent in Luxembourg during normal business hours, so long as any of the Notes are outstanding.

Gazprom publishes interim consolidated unaudited financial statements, prepared in accordance with IAS for the 6 month period ended 30 June and for the 9 month period ended 30 September in each year. Gazprom does not publish non-consolidated annual or interim financial statements, prepared in accordance with IAS.

## APPENDIX A — OVERVIEW OF THE RUSSIAN FEDERATION

### THE RUSSIAN FEDERATION

*The following information has been extracted from publicly available sources. It has not been independently verified by Gazprom. Neither Gazprom nor the Managers accept any responsibility for the accuracy or completeness of this information.*

#### **General**

The Russian Federation, or Russia, is a sovereign and democratic federal republic, consisting of 89 sub-federal political units (the "Federation Subjects"), and is constituted as a federation of republics, territories, regions, cities of federal importance and autonomous regions. It is the largest state to emerge from the former Soviet Union, covering an area of approximately 17.1 million square kilometres. Russia covers one-tenth of the world's land surface, making it the largest country in the world, almost twice the size of the United States.

Of the population of approximately 145 million, approximately 82% is ethnic Russian and a high percentage (approximately 73%) live in cities and towns. The two largest cities are Moscow, with approximately 8.55 million inhabitants, and St. Petersburg, with approximately 4.7 million inhabitants.

Russia is a leading world producer of natural resources. The oil and gas industry plays an important role in the domestic economy. There are also substantial mineral deposits including iron, nickel, copper, diamonds and gold, as well as timber.

#### **International Relations**

Russia is a member of the United Nations (and a permanent member of the Security Council), the IMF, the World Bank, the International Finance Corporation and the European Bank for Reconstruction and Development. Russia succeeded to the former Soviet Union's "observer status" to the General Agreement on Tariffs and Trade (currently, the World Trade Organisation) which was granted in May 1990 and in June 1993 made an official announcement of its intention to join the General Agreement on Tariffs and Trade. Discussions regarding Russia's admission to the World Trade Organisation were held between 1995 and 1998 and the next round of negotiations is scheduled for later this year. Russia has also been awarded Most Favoured Nation status by several members of the Organisation for Economic Co-operation and Development ("OECD"). Russia has been granted observer status in a number of OECD committees and formally applied for membership in May 1996.

#### **Political Structure and Recent Political Developments**

##### ***Federal Structure***

In 1990, Russia declared its sovereignty (though not its independence from the Soviet Union). In December 1991 Russia, Belarus and Ukraine joined together to dissolve the Soviet Union and form the Commonwealth of Independent States (the "CIS"). The CIS was subsequently joined by another 9 former Soviet republics. Members of the CIS have entered into a series of political and economic agreements among themselves.

The Federation Treaty of 31 March 1992, signed by the majority of the Federation Subjects, initially gave to each a measure of control over budgetary and external policy as well as over the natural resources of their territories, and the Constitution of Russia (the "Constitution") and individual treaties between the Federation and some of the Federation Subjects subsequently confirmed and refined the terms of the division of authority between the Federation and its subjects.

In general, disputes between the Federal authorities and Federation Subjects have been resolved peacefully through a political process. The military confrontation in the Chechen Republic has been the exception. There has been military confrontation in the Chechen Republic between December 1994 and August 1996 (followed by a peace treaty in May 1997) and then again from August 1999 to date, with the fighting now reduced to sporadic outbreaks. In January 2001 President Putin announced plans for a significant reduction in troop numbers and an eventual end to anti-terrorist operations. A local police force is being formed to gradually take over the maintenance of order from the Russian military, and almost 15 billion Roubles (over U.S.\$500 million) has been promised in aid for reconstruction of Chechnya. However, the situation is not stable and there have been no official talks between the federal authorities and rebel leaders. It is expected that the future of the Chechen Republic will only be decided after the completion of operations by the Russian interior and military troops.

## **Constitution**

The Constitution provides for a tripartite governmental structure in which the power of the State is divided between the executive, legislative and judicial branches, each independent of the others. The Constitution also establishes a federal system, allocating responsibilities between federal and sub-federal authorities and setting out the principles of local government.

### **Executive, Legislative and Judicial Branches**

The Executive branch consists of the President and the Government of Russia.

The President of Russia has broad powers. The President is Head of State and Supreme Commander of the Armed Forces, with authority to declare states of military emergency and other states of emergency, subject to approval by the Federation Council and has responsibility for foreign policy and national defence. The President has the power to issue decrees and orders having the force of law (although these may not contradict the Constitution or federal legislation), to suspend acts of sub-federal executive authorities and to call a national referendum on matters of special importance. The President also has the power to veto bills passed by the Federal Assembly and, under certain circumstances, to dissolve the State Duma. The President also enjoys significant powers of appointment, including the power to appoint the Prime Minister (with the consent of the Duma) and other members of the Government (who are nominated by the Prime Minister). The President may also dismiss deputy prime ministers and federal ministers at any time. In addition, the President nominates candidates for Governor of the Central Bank (for appointment by the Duma) and the Prosecutor General (for appointment by the Federation Council) and also nominates judges for the Constitutional Court, the Supreme Court and the Supreme Arbitration Court (for appointment by the Federation Council).

The President is elected in a national election for a term of four years. The Constitution provides for the early termination of the President's term of office in the event of his death, resignation or impeachment, or if he is persistently unable to exercise his powers for reasons of health, in which case the Prime Minister fulfils the responsibilities of the President until a new President is elected. New presidential elections must be held within three months of any such early termination.

The Government of Russia comprises the Prime Minister, deputy prime ministers and federal ministers, all of whom are appointed by the President as described above. The Government is automatically dissolved after each presidential election, in order to permit the President to form a new Government. The Government is responsible for implementing federal laws, presidential decrees and international agreements. In particular, the Government is responsible for preparing and implementing the federal budget, establishing a unified financial, credit and monetary policy, carrying out social policy, preserving public order and defending the rights and freedoms of citizens.

The Legislative branch is the Federal Assembly, which consists of a lower chamber, the State Duma, and an upper chamber, the Federation Council.

The State Duma consists of 450 deputies, elected by a mixed system of majority vote and proportional representation. Half of the deputies are elected by majority vote in individual electoral districts. The other half are chosen from "party lists" on the basis of a nationwide election, with seats being allocated in proportion to the number of votes received by the party. Generally, only parties receiving more than 5% of the votes qualify for these "party list" seats. "Party list" deputies are free to change their party affiliations during their terms in office without the need for a new election. The State Duma sits for four years and no person may simultaneously serve as a State Duma deputy and hold a position in the Government.

The Federation Council represents Russia's 89 Federation Subjects. Each Federation Subject has two representatives on the Federation Council, one representing its legislative body and the other representing its executive branch.

The Judicial branch is represented by the Constitutional Court, the Supreme Court and the Supreme Arbitration Court as well as lower courts of general jurisdiction and arbitration courts.

## **Political Parties and Elections**

Presidential elections were most recently held on 26 March 2000. The elections were scheduled to take place in the summer of 2000 but the premature resignation of President Yeltsin on 31 December 1999 brought these elections forward to March. At the time of Yeltsin's resignation, Vladimir Putin was the Prime Minister and, therefore, was elevated to the post of acting President.

Putin was successful in the first round of voting for the Presidential elections and secured over 52% of the votes cast with a turnout of 68.74% (more than 50% of the votes cast is required in order to be elected). His nearest challenger was the Communist candidate Gennady Zyuganov, who received almost 30% of votes.

The Government was appointed between May and July 2000. It has embarked on a course of significant reforms comparable to those in early 1992 aimed at strengthening the unity of the State and tightening federal control over the Federation Subjects.

In May 2000 President Putin reformed the structure of Presidential representatives in the regions. The Federation Subjects were divided into seven "federal areas" and authorised representatives with broad powers were appointed by the President to each federal area. The rights of the authorised representatives of the President include the right to participate in all activities of representative bodies of the Federation Subjects, to control the implementation of Presidential decrees and orders and federal economic programmes, and to control the use of federal property and federal funds by the Federation Subjects. The authorised representatives of the President in the Federation Subjects are financed by the Administration of the President.

The Duma elections were held on 19 December 1999 with the following results: — the Communist party led by Gennady Zyuganov won 24.3% of the votes cast; the Unity party led by Sergei Shoigou, the Minister of Emergency Situations 23.2%; the Fatherland-All Russia party led by former prime minister Yevgeny Primakov, Moscow Mayor Yuri Luzhkov and St Petersburg Mayor Vladimir Yakovlev 13.1%; the Union of Right Forces led by former prime minister Sergei Kiriyenko 8.6%; the Yabloko party led by Grigory Yavlinsky 5.9% and the "Zhirinovsky bloc" led by Vladimir Zhirinovskiy 6.4%. Other parties received the remaining 18.5%.

As a result of the distribution of seats among political parties and winners in majority vote constituencies, the communists and their allies lost control over the Duma, which now has a broadly pro-Presidential majority.

## **Economic Conditions and Recent Economic Developments**

Following the dissolution of the Soviet Union, particularly during 1991 and 1992, Russia experienced an economic crisis, evidenced by a decline in industrial production and GDP, significant price increases, a decline in the average standard of living and an increase in foreign debt. In response, the Government instituted a series of measures designed to achieve financial stabilisation and price liberalisation and to create an impetus for a transition to a market economy. The Government has freed most wholesale and retail prices, reduced defence allocations, cut state subsidies, introduced a substantial value-added tax, removed most non-tariff restrictions on foreign trade and launched a broad privatisation effort.

Russia's financial stabilisation programme came under severe pressure in the second half of 1997 and the first half of 1998, when the repercussions of the Asian currency and financial crises and sharp falls in world prices for oil and other commodities adversely affected the Government's ability to continue to finance its budget deficits and to maintain the value of the Rouble against the U.S. dollar. On 17 August 1998, the Government and the Central Bank announced a three-part programme intended to address these pressures. First, the Rouble trading corridor was revised from 5.25-7.15 Roubles for one U.S. dollar to 6.00-9.5 roubles for one U.S. dollar. This corridor was subsequently abandoned. Second, domestic GKO/OFZ bonds issued prior to 17 August 1998 and maturing before 31 December 1999 were to be restructured into new longer-term instruments and trading of these instruments was suspended pending the restructuring. Finally, for a period of 90 days Russian private sector residents were restricted from conducting certain foreign exchange operations of a capital nature, including payments of foreign currency under forward contracts and repurchase agreements and principal payments on long-term credits.

The events of 17 August led to:

- a severe devaluation of the Rouble;
- a sharp increase in the rate of inflation;
- the near collapse of the country's banking system;
- significant defaults by Russian public and private borrowers on their foreign currency obligations;
- dramatic declines in the prices of Russian debt and equity securities (including Russia eurobonds); and
- an inability of Russian borrowers to raise funds internationally.

The situation stabilised rapidly, however, and 1999-2001 witnessed several positive developments. These included:

- a slow-down in the decline, and then a stabilisation, in the value of the Rouble against the U.S. dollar (and appreciation of the value of the Rouble against the U.S. dollar in real terms);
- a decline in consumer price inflation;
- an increase in real industrial output, resulting in part from the devaluation of the Rouble;
- an improved balance of trade, resulting in part from the devaluation of the Rouble and a significant increase in oil prices;
- improved tax collection, resulting in a significant primary fiscal surplus;
- increasing prices for Russian debt and equity securities;
- a decrease in the share of barter transactions, both in inter-enterprise transactions and in the execution of regional budgets; and
- the restructuring of a significant portion of Russia's Rouble-denominated domestic indebtedness and the reduction and restructuring of its London Club indebtedness.

President Putin's government has announced plans for substantial economic reforms (including the tax reform, the pension reform, the housing and utilities reform) and has begun the process of implementing some of those reforms.

### ***Privatisation***

Russia commenced its privatisation programme in early 1992. About 15,000 medium- and large-scale enterprises employing more than 70% of the industrial workforce had been privatised through the mass voucher privatisation programme by mid-1994. In a relatively short period of time, the companies in which the Government had had less than a majority equity interest came to represent over 50% of both GDP and employment.

The first stage of the Russian privatisation process, the so-called voucher privatisation, was completed in the summer of 1994. The second (post-voucher) phase of the privatisation process started in late July 1994, consisting of cash sales to domestic and foreign strategic investors with the primary objective of transferring control over the privatised companies to private management and ownership. The transfer of assets from state to private control continued in 1995 through a loans for shares programme, cash auctions and investment tenders. As at 31 December 2000, there were more than 900 joint stock companies which were 25 to 50% state owned and 371 joint stock companies which were more than 50% state owned.

In July 1997, a new privatisation law came into effect. The new law provides for several methods to privatise state-owned enterprises including cash auctions, commercial tenders, sales of shares to enterprise employees, buy-outs of state property under lease, contributions of state-owned assets to the charter capital of other business entities, the transformation of State and municipal entities into open joint stock companies and the issuance of state debt securities convertible into the equity of joint stock companies with subsequent sales of these equity securities to the holders of State debt.

The August 1998 financial crisis resulted in the suspension of several planned privatisation tenders. The Government has announced its intent to return to some of its privatisation plans.

## Gross Domestic Product

The following table sets forth certain information regarding Russia's nominal GDP for the years 1996 to 2001:

	1996	1997	1998	1999	2000	2001 <sup>(2)</sup>
Nominal GDP (RUR billions) . . . . .	2,145.7	2,478.6	2,741.1	4,757.2	7,063.4	6,545.0 <sup>(3)</sup>
Nominal GDP per capita (RUR) . . . . .	14,523.2	16,826.4	18,659.0	32,515.0	48,527.0	45,419.8
Consumer Price Index <sup>(1)</sup> (%) . . . . .	147.8	114.7	127.8	185.7	120.8	121.8
Total population, millions (end of period) . . . . .	147.1	146.7	146.3	145.6	144.8	144.1

Note:

(1) Average on the annual basis (Source: Central Bank website, 22 January 2002).

(2) The figures for 2001 are given for the first eleven months averaged on the annual basis.

(3) The figure is given for the period from January to September 2001, averaged on the annual basis.

Source: Goskomstat's Russian Annual Statistics (2001 Edition), Goskomstat's website, 22 January 2002.

## Employment

Employment has declined in Russia since reforms were initiated. The level of unemployment increased in 1998 due to the Russian financial crisis, and the labour market still remains relatively depressed. According to the Central Bank of Russia figures (based on the methodology of the International Labour Organisation), the total number of unemployed in October 2001 was 6.2 million (8.7% of the labour force), compared to 7.0 million (9.8% of the labour force), at the end of 2000 and 8.9 million (12.2% of the labour force) at the end of 1999.

## Balance of Payments

The following table sets forth Russia's consolidated balance of payments for the years 1996 to 2001:

	Consolidated Balance of Payments					9 months of 2001
	1996	1997	1998	1999	2000	
			<i>(U.S.\$ millions)</i>			
<b>Current account</b> . . . . .	11,753	2,060	687	24,731	46,291	28,557
Goods and non-factor services . . . . .	17,115	11,107	12,813	31,845	52,958	32,547
Trade balance . . . . .	22,471	17,025	16,869	36,129	60,703	40,379
Non-factor services . . . . .	(5,356)	(5,918)	(4,056)	(4,284)	(7,745)	(7,832)
Income . . . . .	(5,434)	(8,692)	(11,790)	(7,716)	(6,736)	(3,965)
Current transfers . . . . .	72	(356)	(337)	601	69	(25)
<b>Capital and financial account</b> . . . . .	(6,860)	2,791	8,397	(17,695)	(37,050)	(22,371)
Capital account . . . . .	(463)	(797)	(382)	(328)	10,955	(10,289)
Financial account . . . . .	(6,397)	3,588	8,779	(17,367)	(48,005)	(12,081)
Direct investments . . . . .	1,656	1,681	1,492	1,101	(494)	(403)
Portfolio investments, net . . . . .	4,410	45,775	8,618	(946)	(10,303)	(267)
Other investments . . . . .	(13,821)	(41,912)	(6,585)	(15,569)	(21,215)	(1,939)
Reserve assets . . . . .	2,841	(1,936)	5,305	(1,778)	(16,010)	(9,619)
Adjustments of reserve assets <sup>(1)</sup> . . . . .	(1,484)	(20)	(50)	(176)	17	147
<b>Errors and omissions, net</b> . . . . .	(4,892)	(4,851)	(9,084)	(7,036)	(9,241)	(6,187)

Note:

(1) Adjustments of the reserve assets were introduced in order to reconcile the data in the payment balance and international investment position of Russia formed in accordance with the IMF guidelines with the national official statistical data on international reserves.

Certain data presented in this table differs from the previously published data due to revisions made by the Central Bank of Russia.

Source: Central Bank website, 22 January 2002.

## Official International Reserves

The following table sets forth information with respect to official international reserves as at 1 January for the years 1997 to 2002:

	Official international reserves					
	1 January 1997	1 January 1998 <sup>(1)</sup>	1 January 1999 <sup>(2)</sup>	1 January 2000	1 January 2001	1 January 2002
	<i>(U.S.\$ millions)</i>					
Gold and currency reserves . . . . .	15,324	17,784	12,223	12,456	27,972	36,622
Currency reserves . . . . .	11,276	12,895	7,801	8,457	24,264	32,542
Foreign currency . . . . .	11,271	12,771	7,800	8,455	24,263	32,538
SDRs . . . . .	5	122	0	1	1	3
Reserve position on IMF . . . . .	1	1	1	1	1	1
Gold <sup>(3)</sup> . . . . .	4,047	4,889	4,422	3,998	3,708	4,080

### Notes:

- (1) From 1 August 1998 deposited gold is included in the international reserves figures.
- (2) From 1 September 1999 the amount of reserves excludes foreign currency balances in correspondent accounts of resident banks with the Central Bank of Russia, except for the funds transferred to Vnesheconombank for the purposes of servicing state external debt.
- (3) Valuing gold at U.S.\$300 per fine troy ounce.

Source: Central Bank's website (22 January 2002).

## Monetary policy

The decrease of the budget deficit between 1992 and 1997 with its expected elimination in 2001, and the increased access of the Government to financing from sources other than the Central Bank, have reduced the pace of monetary expansion. Prior to the 1998 financial crisis, slower monetary growth and increased exchange rate stability have helped the Central Bank to reduce inflation from over 2000% in 1992 to 11% in December 1997. In 1998, however, inflation rose sharply again. After the crisis, the Government changed its policy towards the Rouble and proclaimed a debt moratorium and a mandatory restructuring of a significant share of domestic Rouble debt. Consumer price inflation was reduced to 20.2% as at the end of 2000, from a level of 36.5% for the year 1999.

The Central Bank introduced a currency intervention band in July 1995. Another two "half-year" currency bands followed at the end of 1995 and in mid-1996. As confidence in the continuity of the exchange rate policy grew, the Central Bank introduced a full-year band for 1997. In November 1997, exchange rate policy was adjusted further, to allow the authorities more flexibility in accommodating shifts in short-term capital flows. The new (flat) trading band was announced for the three years from 1998 to 2000. This was supposed to help sustain the decline in inflation and domestic interest rates. However, in 1998 the Government dropped the currency trading band and allowed the Rouble to float freely. By the end of 1999, the Rouble had stabilised at around 25 Roubles to the U.S. dollar. Since then, the Central Bank has conducted a tight monetary policy through a system of barriers to limit the flow of currency out of Russia and direct currency interventions helping to reduce inflation and keep the Rouble under control.

The Rouble was redenominated, 1,000-fold, effective as of 1 January 1998. The old bills were in circulation until 1999 and will continue to be accepted by the Central Bank until 2002.

The Rouble is fully convertible for current account transactions. In June 1996, the Russian Government committed itself to compliance with the obligations of Article VIII of the IMF Charter.

## External Debt

As at 1 January 2001 the state external debt of the Russian Federation amounted to U.S.\$144.5 billion (including indebtedness of the former USSR accepted by Russia). A significant proportion of that debt (U.S.\$48.6 billion) is owed to the Paris Club of sovereign creditors. The Government has been making efforts to restructure this Paris Club debt and reschedule payments. However, these efforts have not so far been successful. If the Paris Club debt is not restructured, Russia will face substantial foreign debt payments in 2003.

Source of figures: Ministry of Finance website, 22 January 2002.

## **Social Conditions**

The Russian standard of living declined with the beginning of economic reforms amid the country's severe economic problems. This decline has primarily affected the elderly and other segments of the population that are dependent on Government benefits. While reported real wages dropped sharply as a result of price liberalisation, Russian consumers have benefited from the wider range and improved quality of products available to them. Today, imported and domestic consumer products are available, although many goods are often beyond the means of most Russians and the market share of imported goods has been decreasing.

## **Legal Environment**

Russian law has undergone radical changes in recent years. Whole bodies of law unknown in the Soviet era have been adopted, covering a wide range of areas including corporate, securities, anti-trust, privatisation, property, banking and bankruptcy law. The adoption of the first, second and third parts of the new Civil Code, the Securities Market Law and the Joint Stock Companies Law are further important steps in establishing a comprehensive legal framework. At the same time, confusion and uncertainty continue to exist with respect to the state of law in Russia, not least because the pace of its development often results in ambiguities and inconsistencies.

Much business-related legislation remains to be put in place. The absence of comprehensive business laws and regulations presents particularly difficult problems for businesses operating in Russia. Business-related legislation is also susceptible to revision in reaction to political influences and the pressure on the Government to generate revenue or to conserve foreign currency. In addition, a significant amount of Russian legislation has been adopted based on a more or less explicit understanding that it would serve as a general framework, with more detailed issues to be subsequently clarified by amendment or administrative regulation. In many cases, this clarification is yet to occur.

Regulations are interpreted and applied with little consistency and the decisions of one Government official may be overruled or contested by another. Moreover, many of the new Russian laws have never been interpreted by courts or administrative bodies. Both the Soviet experience and recent Russian practice suggest that the enforcement of legal rights in Russia will continue to be subject to greater discretion and political influence than is usual for most Western jurisdictions.

## **Exchange Controls and Repatriation**

Russian currency exchange legislation limits the exchangeability of Roubles for foreign currency and the use of foreign currency in Russia. Russian currency legislation currently permits, and Russian foreign investment legislation currently guarantees, the right of foreign investors to convert Rouble income received on investments in Russia (including dividends, profits and interest) and to transfer it abroad. However, the actual repatriation of proceeds from the sale of certain investments may be postponed for as long as 365 days.

Foreign currency may be freely exchanged for Roubles in Russia, but the exchange of Roubles for foreign currency in Russia is restricted and Roubles may not be exported or exchanged outside Russia. Non-residents may freely convert foreign currency into Roubles, but may only do so through Rouble accounts which are subject to strict regulations.

The currency exchange rules govern transactions in foreign currencies and currency valuables (including foreign currency-denominated securities) between Russian residents (including citizens, permanent residents and legal entities established under Russian law) and foreign currency and Rouble transactions between residents and non-residents. Russian currency legislation distinguishes between "current" foreign currency transactions and foreign currency transactions involving a "movement of capital".

"Current" foreign currency transactions generally may be freely carried out between residents and between residents and non-residents. "Movement of capital" transactions in foreign currency, generally require a licence from the Central Bank subject to exemptions enacted by the Central Bank. The prevailing view is that the licence is only required for Russian residents involved in such "movement of capital" transactions. Cash transactions in foreign currency are generally prohibited within Russia.

Following the financial crisis of 1998, additional regulations on foreign currency exchange were enacted. For example, the mandatory exchange of 75% of export revenues of Russian companies was required to be effected through the domestic foreign currency market. This requirement has been assisting the Central Bank in increasing its foreign currency reserves. The mandatory exchange requirement has been recently reduced to 50% of export revenues.

In 2001, certain steps were taken to remove some of the more onerous currency control requirements. In particular, Russian companies can now receive long term loans from foreign lenders without a Central Bank licence provided that certain conditions are met.

### **Taxation and Duties**

The current Russian system of taxation has been characterised by rapid and unpredictable changes. The Government has an acute need for revenues because of the large deficit in public finance at all levels. Thus, the nature and amount of taxes applicable to a business's activities could ultimately turn out to be different from what is expected. Widespread non-compliance with tax laws and inconsistent enforcement by tax inspectorates contribute to the system's shortcomings. While taxation of non-income operations has been significantly reduced, businesses are still required to pay significant taxes even if they realise no profits.

The first part and certain chapters of the second part of the new Tax Code became effective in 1999 and 2001-2002 respectively. The main objectives of the Tax Code are to reduce the total number of taxes (from about 200 existing in 1999), improve the stability, transparency and fairness of the system by eliminating many tax exemptions, and to reduce the overall tax burden on the Russian economy. The Ministry of Finance and the Tax Ministry continue to work on the tax system by radically reducing the number of laws and harmonising Russian legislation with that of developed countries.

Entities carrying on commercial activity in Russia must be registered with the tax inspectorate in each location in which they operate, and must submit an annual tax declaration in addition to certain quarterly and monthly reporting requirements. There is a single profits tax system, but the rates are split between payments to the federal, regional and local governments. At the present time, the profits tax is imposed at a federal rate of 7.5%, a regional rate of between 10.5% and 14.5% and a local rate of 2%. This results in an overall rate ranging from 20% to 24%.

Social tax is payable by employers and is imposed on the employee's wage cost at a maximum rate of 35.6%. A regressive rate is applied to higher wage costs, with the minimum rate as low as 2%.

Value added tax, at the rate of 20% ("VAT"), is imposed on the customs value of imports of goods, and on supplies or deemed supplies of goods, works and services in the Russian territory. Certain goods are subject to VAT at a lower 10% rate. Exports, educational, medical and certain other services are generally exempt from VAT.

In addition to the foregoing taxes and duties, each subject of Russia and each local authority may impose certain regional and local taxes within the limits established by Federal legislation. The taxes include retail sales tax (up to 5% of retail revenues) and corporate property tax (up to 2% of the property's value annually).

Foreign entities are subject to a withholding tax at source on Russian source income that is not attributable to a permanent establishment. The withholding tax is imposed at the following basic rates: 15% for dividends and other income from participation in Russian enterprises, and 20% for royalties, interest, management fees and most other income. This withholding tax may be reduced pursuant to a double taxation treaty in effect between Russia and other countries for foreign legal entities and individuals who are resident in such countries. This reduction in withholding tax pursuant to such treaties may be obtained either via a refund (as long as such refund claim is made within three years from the end of the year in which the tax was paid) or by direct application of the double taxation treaty by the payer. In either case, the foreign legal entity or individual would be required to obtain official certification from its home jurisdiction confirming its residence (for the purposes of the treaty in the country which is a party to a double taxation treaty with Russia).

Personal income tax for tax residents is levied at a single flat rate of 13% which is effective as of 1 January 2001 and applicable to most types of income.

## APPENDIX B — PART I — OVERVIEW OF THE RUSSIAN GAS INDUSTRY AND ITS REGULATION

*The information set forth in this section is based on publicly available information*

### GENERAL

The Russian natural gas industry developed during the Soviet era and expanded rapidly after the discovery in the 1960s of significant reserves in the exceptionally large natural gas fields of Western Siberia. Russia experienced a profound crisis in the early 1990s as a result of the dissolution of the Soviet Union, suffering a decline in industrial production and GDP.

Between 1990 and 1999, the Government's policies on natural gas industry structure and prices resulted in the demand for natural gas and natural gas production levels remaining relatively stable in comparison to the production of other energy sources over the same period, such as oil and coal. Total natural gas production only declined by 7.6%, whereas the production of oil and coal declined by 41.7% and 36.7% respectively. Moreover there has been a continuous substitution during this period of the use of oil and coal by natural gas, primarily because domestic natural gas prices have been kept at a low level.

Since the dissolution of the Soviet Union, the oil and coal industries have been restructured into several regional enterprises, but the structure of the UGSS, which is the basis for natural gas production, transportation, storage and supplies in the Russian Federation, has been preserved.

### CLASSIFICATION OF RESERVES

Russian methods for calculating and classifying reserves differ from generally accepted practices in the United States and other countries. Reserves which are calculated using different methods cannot be accurately reconciled.

The following is a summary of an extract taken from a classification document concerning reserves and potential and forecasted oil and natural gas resources, which was approved by the Order of the Ministry of Natural Resources No. 126 dated 7 February 2001.

#### ***Categories of reserves and potential and forecasted oil and natural gas resources.***

Natural Gas, gas condensate and oil reserves and their components, which have industrial value, are subdivided depending on the degree to which they subsist into explored reserves (represented by the categories A, B, and C<sub>1</sub>), and into preliminary estimated reserves (represented by the category C<sub>2</sub>). Oil and natural gas resources are subdivided depending on the degree to which they subsist into potential resources (represented by the category C<sub>3</sub>), and into forecasted resources (represented by the categories D<sub>1</sub> and D<sub>2</sub>).

*Category A*—Deposit reserves (or a part of a deposit), which have been analysed in sufficient detail to comprehensively define the type, shape and size of the deposit; the level of the oil and natural gas saturation; the reservoir type; the nature of changes in the reservoir characteristics; the oil and natural gas saturation of the productive strata of the deposit; the content and characteristics of the oil, natural gas and condensate; as well as major features of the deposit which determine the conditions of its development (mode of operations, well productivity, strata pressure, the oil, natural gas and condensate balance, hydro- and piezoconductivity and other features).

Category A reserves are calculated on the part of the deposit drilled in accordance with an approved development project for the oil or natural gas field.

*Category B*—Deposit reserves (or a part of a deposit), the oil and natural gas content of which is determined on the basis of commercial flows of oil or natural gas from wells at various hypsometric marks.

The type, shape and size of the deposit; the level of the oil and natural gas saturation; the reservoir type; the nature of changes in the characteristics of the reservoir; the oil and natural gas saturation of the productive strata; the content and characteristics of the oil, natural gas and condensate under stratum, standard conditions and other parameters; and also other major features of the deposit which define the conditions for its development, are all analysed so as to enable a deposit development project to be drawn up.

Category B reserves are calculated on the part of a deposit drilled in accordance with either an approved technological development scheme for an oil field or a trial industrial development project for a natural gas field.

Category C<sub>1</sub> deposit reserves (or a part of a deposit), the oil and natural gas content of which is determined on the basis of commercial flows of oil or natural gas from wells (a number of wells are probed by exploration drilling) and on the basis of positive results from geological and geophysical analyses of untested wells. The type, shape and size of the deposit, and the conditions for bedding the oil and natural gas bearing reservoir are determined by the results of drilling exploratory and operational wells and are verified by approved methods for a given region and by geological and geophysical analytical methods.

The lithological content, the reservoir type and characteristics, the oil and natural gas saturation, the oil displacement rate, and the level of the oil and natural gas saturation of the productive strata, are determined through an analysis of the core and materials from geophysical well testing. The content and characteristics of the oil, natural gas and condensate under stratum and standard conditions are analysed according to test data from the wells. The commercial value of the oil "edge" is determined by the oil and natural gas deposit. Well productivity, hydroconductivity and piezoconductivity of the stratum, stratum pressure, temperature, and the oil, natural gas and condensate balance are analysed through testing and studies of the wells. The hydrogeological and geocryological conditions are determined by the results of well drilling and through comparison with neighbouring explored fields.

Category C<sub>1</sub> reserves are calculated on results of geological exploratory work and production drilling. They are analysed in order to enable preliminary data to be drawn up for a technological development plan for an oil field, or for a project for the trial industrial development of a natural gas field.

*Category C<sub>2</sub> preliminary estimated reserves* — reserves of a deposit (part of a deposit), which availability is based on the results of geological and geophysical research in the unexplored part of the deposit adjoining plots containing reserves of higher categories and in the untested deposits of the explored fields. The shape and the size of the deposit. Conditions of bedding, level and reservoir types of the layers, content and characteristics of oil, gas and condensate are determined in general terms based on the results of geological and geophysical exploration subject to information on a better explored part of the deposit or by analogy with the explored fields.

Category C<sub>2</sub> reserves are used to determine perspectives of the field and planning of geological and exploration works and geological and production exploration upon the transfer of wells to the higher layers. Category C<sub>2</sub> reserves are partially used for the purposes of compiling project documentation for the development of the deposits.

## REGULATION

The Russian legal system's rapid evolution during the last ten years is particularly evident in the context of natural gas industry regulation. Below is a brief overview of some key aspects of current regulatory requirements in the natural gas industry.

The regulation of legal and economic relations in the Russian natural gas industry is mainly based on the Constitution of the Russian Federation, the Civil Code of the Russian Federation, the Law of the Russian Federation "On Subsoil Resources" No. 2395-1 dated 21 February 1992 as amended (the "Subsoil Resources Law"), the Federal Law "On Natural Monopolies" No. 147-FZ dated 17 August 1995 (the "Natural Monopoly Law"), the Federal Law "On the Continental Shelf of the Russian Federation" No. 187-FZ dated 30 November 1995 and the Gas Supply Law. The most important recent piece of legislation is the Gas Supply Law which creates a regulatory framework for natural gas exploration, production, transportation, storage and supplies.

Under the Gas Supply Law, the federal authorities have substantial jurisdiction over natural gas supplies, including, *inter alia*: the development and implementation of State policy on natural gas supply; the regulation of strategic natural gas reserves; control over the industrial and environmental safety of the natural gas supply systems; and standardisation and certification. The aim of this is to achieve consistency in the regulation of natural gas supply throughout Russia.

The Government's role is to approve: a) the various procedures for the approval of projected natural gas production levels and the sales balance in Russia; b) the Federal Programme of Gasification<sup>(1)</sup> in Russia; c) the principles for setting natural gas prices and natural gas transportation tariffs; d) the regulations for natural gas deliveries; e) the procedure for providing independent organisations with access to the natural gas transportation and distribution networks; and f) the categories of customers to whom natural gas deliveries cannot be restricted or suspended.

The Ministry of Energy of the Russian Federation is specifically responsible, in relation to the natural gas industry, for the practical implementation of State policy and the co-ordination of the activities of the federal executive bodies.

The Ministry of Natural Resources of the Russian Federation is responsible for regulating the exploration, use and protection of natural resources, including *inter alia*, licensing of the production and exploration of subsoil resources.

The federal legislation provides the regional and local authorities with a degree of autonomy in the exercise of their rights over the use of land and the natural resources. It also stipulates that the use of subsoil is under the joint jurisdiction of the federal and regional authorities.

Within their jurisdictions, the regional governing authorities have substantial power over the issues which arise on projects related to the exploration of oil and natural gas fields, pipelines, oil refineries and other enterprises. Such authorities, in co-operation with the regional bodies of the Ministry of Natural Resources, grant licences for the exploration and production of subsoil resources (except for the licences granted for subsoil plots located in Russia's internal waters, territorial sea or on its continental shelf). In addition, such authorities usually control the transfer of rights for the use of land, and regulation of issues relating to the environment, employees' health and safety, social security, and certain financial matters. The relationship between the relevant federal, regional and local authorities, as well as between any one natural gas company and such authorities, has a significant impact on the conditions under which a natural gas company can operate in any particular region.

### ***Subsoil Licensing***

In 1992, the Subsoil Resources Law introduced a licensing system for the use of subsoil in order to study, explore and produce natural resources in Russia. During the initial stages (1992-1995), licences were granted to the mining organisations without a tender or an auction, for fields where exploration and production was already in process. For new fields and subsoil plots, however, licences were awarded through auctions or tenders, conducted by the governing body of the relevant subject of the Russian Federation and the Ministry of Natural Resources or its regional authority. The most important criterion for determining the preferred bidder of the auction is the lump sum amount ("bonus") the bidder is prepared to pay for the right to use the subsoil. Not only should the preferred bidder submit the most technically and economically competent proposal, but its proposal must also address environmental, safety and national security issues.

The Subsoil Law also allows for licences to be issued without a tender procedure, for geological exploration of a subsoil plot subject to discovery of mineral resources fields by the subsoil user at its own account and upon enactment of a production sharing agreement (PSA).

The licence for subsoil use has a number of integral components one of which is the licensing agreement, which, *inter alia*, identifies the terms and conditions for the use of the subsoil, the rights and obligations of the licensee and the manager of the subsoil plot, the level of payments, etc. There are usually three signatories to any licensing agreement: the regional authority of the Russian region where the field is located, the Ministry of Natural Resources or its relevant regional authority (committee) and the licensee.

<sup>(1)</sup> The Presidential Decree No. 742 dated 20 May 1996 adopted a Federal Programme of Gasification for 1996-2000. In summer 2000, the Government made a decision to reduce the budgeted costs for special-purpose federal programmes. The Ministry of Energy is in the process of preparing a new draft of the Gasification Programme.

There are three types of licences applicable to the study, exploration and production of natural resources: for geological exploration of the subsoil plot without production right, for exploration and production of natural resources and combined licences for study, exploration, evaluation and further production of natural resources. Under the Subsoil Resources Law, licences are granted for a fixed or indefinite term which is stipulated in the license: for the exploration licences (up to five years) and for the exploration and production licences generally (either for a period for which the field is operational<sup>(2)</sup> or for a short term of up to one year). The Subsoil Resources Law allows the subsoil user to request an extension of the existing licence in order to complete either the exploration of the field or the procedures necessary to vacate the land once the exploitation of the subsoil is complete, provided such user complies with the terms and conditions of the licence. Indefinite term licences are also provided for the construction and operation of facilities used for the burial of waste, and for underground facilities, which are either unrelated to mining production or used for the storage of natural gas and liquefied hydrocarbons.

Licences granted in accordance with the Subsoil Resources Law cannot be sold or transferred to another entity except in limited circumstances (set out in the Subsoil Law), such as to a spin off company or a 50 per cent or a majority owned subsidiary of the licensee. A licence cannot be held by more than one legal entity, unless the right to use the subsoil is granted to a consortium, in which case the licence is issued in the name of only one member of the consortium and other members are listed in the licence.

Under a licence agreement, the licensee makes a number of commitments, for example: to extract an agreed volume of natural resources each year; to keep environmental pollutants within specified limits; and to clean up environmental contamination. When the licence expires, the licensee must return the relevant land, at its own expense, to a condition which is adequate for future use. The licensee can be fined or the licence can be revoked in the event of repeated or significant breaches of the licence conditions and laws, or the right to subsoil use can be terminated if the licence remains unused for a substantial period of time. The right to use the subsoil resources may also be suspended, restricted, or terminated early by the licensing authorities either on the occurrence of a direct threat to the lives or health of people working or residing in an area where licensed activities are carried on, or on the emergence of force majeure events such as wars or natural disasters.

Although most of the conditions set out in a licence and its integral components are based on mandatory rules contained in Russian law, there are a number of provisions in a licensing agreement which may be amended by further agreement between the licensing authorities and a licensee, provided that the correct procedures are observed.

An exploration and production licence holder is subject to a quarterly tax for production of mineral resources, which is calculated as a certain percentage of the value of the resources it extracts. Current legal acts establish the 16.5% tax rate for the production of natural gas and gas condensate.

A holder of a licence for geological exploration with the purpose of exploration and evaluation of hydrocarbons has to make regular payments for the allotment use based on the total area of such allotment (in square meters) and a specific rate ranging from RUR 120 to RUR 360 per sq.m.

Regular payments for subsoil use are payable on a quarterly basis in accordance with the procedures established by the Government of the Russian Federation. The exact rates for calculation of payments are determined by the executive bodies of the regions of the Russian Federation.

Regular payments for subsoil use do not substitute the relevant tax obligations applicable to the licence holder in accordance with general tax legislation.

---

<sup>(2)</sup> Previously production licences were restricted to a maximum term of twenty years but this restriction was abolished as of 13 January 2000 by Federal Law No. 20-FZ dated 2 January 2000 "On amendment of the Law of the Russian Federation "On Subsoil Resources"

## ***The Unified Gas Supply System***

In accordance with the Gas Supply Law, the UGSS is the basis for natural gas supplies throughout Russia. It is defined as a production complex consisting of technologically and economically integrated objects managed on a centralised basis and designated for natural gas production, transportation, storage and supply.

Gazprom is currently the owner of the UGSS. Under the Gas Supply Law the owner of the UGSS has a number of responsibilities, including ensuring the reliable supply of natural gas within Russia; maintaining and developing the UGSS network; monitoring the function of UGSS facilities; ensuring the performance of international treaties and natural gas supply agreements entered into by Russia; procuring the use of equipment and processes for power-saving and environmental safety in the UGSS; ensuring industrial safety within the UGSS; and disaster management.

The Gas Supply Law does not permit the division of the UGSS and the liquidation of its owner is only permitted by Federal Law. The Gas Supply Law also regulates the ownership of shares in the company which owns the UGSS (currently Gazprom). In particular, foreign persons and companies are not permitted to own more than 20 per cent of the owner's issued share capital. Furthermore, at least 35 per cent of the owner's issued share capital must remain in the ownership of the State. The sale or any other transfer of title of such owner's shares can only be carried out if a Federal Law is issued permitting such sale or transfer.

## ***Transportation and Supply of Gas***

The relationship between the natural gas suppliers and off-takers is governed by the Regulation on Natural Gas Supplies within the territory of the Russian Federation approved by Government Resolution No. 162 of 5 February 1998.

A right of priority to enter into natural gas supply agreements is given to off-takers which purchase natural gas for State and utility consumers as well as households, and to off-takers that wish to extend their existing natural gas supply agreements.

The off-takers which are financed by the federal budget are obliged to enter into State gas supply contracts with natural gas suppliers. The contracts are entered into in accordance with the supply procedure, established by Russian legislation, for products which are required for State needs.

In accordance with Government Resolution No. 858 dated 14 July 1997, Gazprom is obliged to provide independent suppliers with access to its natural gas transportation system in Russia. However, this is subject to the availability of spare capacity in the natural gas transportation system, the natural gas from independent suppliers being of sufficient quality, and the availability of connecting and branch pipelines to consumers.

In accordance with the Gas Supply Law, consumers are obliged to pay for natural gas supplies and transportation services. If consumers fail to make such payments, suppliers have the right to limit or suspend their natural gas supplies to such consumers in accordance with specific procedures provided for by a number of Government resolutions. The Government of the Russian Federation has issued a number of resolutions (e.g. Government Resolution No. 601 dated 17 June 1998 and Government Resolution No. 1 dated 5 January 1998) regulating restriction or suspension of supplies to certain customers. These consumers include, *inter alia*, medical institutions, military units, nuclear plants, communication organisations and utilities (for which the limitation or suspension of the supply of fuel and energy resources might result in threats to people's lives or severe environmental consequences).

## ***Prices and Tariffs***

Gas prices and transportation tariffs in Russia are regulated by the Natural Monopoly Law and the Gas Supply Law, as well as by a number of supplemental Government resolutions. Government Resolution No. 1021 of 29 December 2000 "On State Regulation of Gas Prices and Tariffs for Gas Transportation in the Territory of the Russian Federation" ("Resolution No. 1021") stipulates the main provisions relating to natural gas prices and transportation tariffs.

The Federal Energy Commission of the Russian Federation ("FEC") is the authority which regulates natural monopolies, including the establishment and regulation of natural gas prices and tariffs. In accordance with Resolution No. 1021, the FEC establishes the level of:

- wholesale natural gas prices;

- tariffs for gas transportation services through trunk pipelines within the territory of the Russian Federation;
- tariffs for gas transportation services through trunk pipelines for independent organisations;
- tariffs for gas transportation through pipelines owned by independent gas transportation organisations;
- tariffs for gas transportation through supply networks belonging to gas distribution companies; and
- payments for the supply and marketing services rendered by gas distribution companies.

### ***Environmental Requirements***

Environmental rules and standards are regulated by a number of Russian federal laws and regulations. Federal Law No. 7-FZ "On Environmental Protection" of 10 January 2002 (the "Environmental Protection Law"), is one of the principal laws regulating environmental issues. The Environmental Protection Law establishes a "pay-to-pollute" regime and is administered by the Ministry of Natural Resources and local authorities. Fees are assessed for both pollution within the limits agreed on emissions and effluents and for pollution in excess of these limits. There are additional fines for certain other breaches of environmental regulations in place. The Environmental Protection Law does not stipulate precise requirements for the clean-up of pollution, although it does contain an obligation to fully compensate for all environmental losses caused by pollution. In the event of a dispute concerning losses caused by breaches of environmental laws and regulations, the court may impose clean-up obligations subject to the agreement of the parties.

Exploration licences and production licences generally require certain environmental commitments. Although such commitments may be stringent in a particular licence, the penalties for failing to comply are generally low, and the clean-up requirements are not onerous.

### ***Regulating the Activities of Natural Monopolies***

The Natural Monopoly Law defines "natural monopoly" as a condition of the commodities market where the demand for products is satisfied more effectively in the absence of competition. The Natural Monopoly Law sets out, *inter alia*, a regime for the regulation of entities which have a natural monopoly over natural gas transportation. It has also established an authority (currently the FEC), which has control over:

- transactions involving the acquisition of title to (or the rights to use) assets where the value of such assets exceeds 10% of the natural monopoly entity's own capital (as calculated in accordance with its latest audited balance-sheet). Such transactions should not be related to the industry of the natural monopoly entity;
- investments, the value of which exceeds 10% of the natural monopoly entity's own capital (as calculated in accordance with its latest audited balance sheet). Such investments should not be related to the industry of the natural monopoly entity;
- sales, leases or other transactions, whereby the natural monopoly entity disposes of assets used in the industry which it monopolises. The value of such assets exceeds 10% of the value of the natural monopoly entity's own capital (as calculated in accordance with its latest audited balance sheet).

The FEC can penalise a natural monopoly entity and insist that it takes certain actions in the event that it breaches the Natural Monopoly Law. Furthermore, the FEC has rights to access information on a natural monopoly entity, whether it be held by such entity itself, Government bodies or local authorities.

The following are the FEC's main methods of regulating the activities of natural monopolies:

- price regulation—setting prices and tariffs and their maximum levels;
- identifying consumers entitled to obligatory services and setting natural monopoly minimum supply levels in the event that it is impossible to meet such consumers' demands (with a view to protecting the rights and legal interests of citizens, State security, the environment and cultural values).

Gazprom, as a natural monopoly entity in natural gas transportation, must submit ongoing reports on its activities and drafts of capital investment plans to the FEC.

The FEC, as a regulatory authority, has the right:

- to decide on the implementation, amendment or suspension of methods of regulating natural monopoly activities referred to in the Natural Monopoly Law (including setting prices and tariffs);
- to instruct natural monopoly entities to cease breaching the Natural Monopoly Law; to enter into contracts with those consumers entitled to an obligatory service; to make amendments to existing contracts; and to transfer revenues from activities which contravene the Natural Monopoly Law to the federal budget;
- to fine natural monopoly entities for violations of the Natural Monopoly Law.

## **ENERGY CHARTER**

The Energy Charter ("EC") was conceived as a means to strengthen the relationship which existed in the energy sector between the USSR, the countries of Central and Eastern Europe and the countries of Western Europe.

The proposal for co-operation in the energy sector and creation of the EC was initially made by then Dutch Prime Minister, Mr. Lubbers, at a meeting of the European Council in Dublin in June 1990. The EC was officially adopted in December 1991. It is a political declaration on co-operation between east and west in the energy sector and is not legally binding on any of its parties. At present, the EC has been signed by 52 states, including the countries of the European Union.

By December 1994, following three years of negotiations, the general intentions contained in the Energy Charter were put into a legally binding form—the Energy Charter Treaty (the "ECT"). As at 1 August 2001, the ECT had been signed by 52 countries, including Russia and the member states of the EU, and has been ratified by 46 countries.

The main objectives of the ECT are:

- to provide a stable energy supply;
- to provide effective production, processing, transportation, distribution and consumption of energy resources;
- to assist in the development of the European energy market and the improvement of the global energy market through implementing principles of non-discriminatory access and free market pricing;
- to legally protect the interests of energy related companies and entities (from countries which are signatories to the ECT) on issues relating to investments, transit, trade, and dispute resolution procedures.

Russia signed the ECT in December 1994, but has not yet ratified it. The question of ratification has been discussed on a number of occasions in the State Duma of the Federal Council of the Russian Federation. The most recent hearing took place on 26 January 2001, where it was decided that the issue of ratification should be referred to the President of Russia, with a request that the Security Council be authorised, for the sake of the country's security, to analyse the economic and political consequences of the ratification of the ECT. Although Russia has not ratified the ECT, it is a member of the Energy Charter Conference and participates in the Energy Charter Secretariat's day to day activities. As at 1 March 2002 the issue of ECT's ratification has not been submitted to the next parliamentary hearings.

## **EUROPEAN UNION GAS DIRECTIVE**

On 22 June 1998, the European Parliament and the Council of the European Union adopted a directive on common rules for the internal market in natural gas (the "Directive"). The Directive came into force on 10 August 1998.

The Directive establishes common rules for the transmission, distribution, supply and storage of natural gas. It lays down rules for the organisation and function of the natural gas sector (including liquefied natural gas), access to the market, the operation of transmission and distribution systems, and the criteria and procedures applicable to the granting of authorisations for the transmission, distribution, supply and storage of natural gas. It requires the Member States to open up their natural gas markets to competition on a staged basis—20% by August 2000, 28% by August 2002 and 33% by August 2008. These are minimum requirements and Member States may accelerate the rate by which they open their markets, if they so wish.

The implementation of the Directive has led to significant structural changes in the European natural gas market. The Directive is bringing about a significant liberalisation of the European natural gas market, which goes further than the Directive's minimum requirements. Almost 80% of the total EU market has now been opened up to competition. The EU Commission is considering the possibility of introducing a further Directive which would require total liberalisation of European natural gas markets by 2004.

Russia is the largest natural gas supplier into Western Europe (followed by Algeria and Norway). Current EU projections show that in order to meet the rapidly increasing demand for natural gas and to compensate for the decline in the production of natural gas within the EU, there will be an ever increasing dependence upon imports from outside the EU. The electricity industry and other sectors of the economy are increasingly using natural gas because of its favourable ecological characteristics, resulting in a rising demand for natural gas.

As a result of the liberalisation of the EU's natural gas market, short term contracts and single transactions involving natural gas have become more popular. In time, this may have a significant effect on the state of the market, however the long-term "take-or-pay" contracts, under which most of Europe's natural gas is supplied by Gazprom and other traditional exporters, provide the only guarantee for secure and stable natural gas supplies, whilst at the same time balancing the interests of both exporters and importers. This is because such contracts are the main element of major natural gas export financing projects, which provide to a producer a guaranteed return on capital investments. Furthermore, these contracts guarantee reliable natural gas supplies to the purchaser for an extended period of time.

**APPENDIX B — PART II — DEGOLYER & MACNAUGHTON LETTER**

OAO Gazprom  
16A, Nametkina Street  
117884, Moscow B-420  
Russia

Gentlemen,

DeGolyer and MacNaughton has prepared estimates of the extent and value of the proved and probable natural gas, oil, condensate, and gas liquids reserves and the extent only of the possible natural gas, oil, condensate, and gas liquids reserves of certain fields in Russia owned by OAO Gazprom (Gazprom). The 18 fields evaluated are located in western Siberia and the Volga-Ural Province of Russia and include the following:

Bovanenko	Viengapursk
Gubkinsk	West Tarkosalinsk
Kharasevai	Yamburg
Komsomolsk	Yamsovieyskoye
Medvezhye	Yen-Yakha
North Urengoi	Yeti-Purovskoye
Orenburg	Yubileyne
Urengoi	Yuzhno Russkoye
Urengoi Oil	Zapolarnoye

The estimated proved, probable, and possible gas, oil, condensate, and gas liquids reserves owned by Gazprom, as of December 31, 1999, in the fields evaluated in the Reports, expressed in billions of cubic meters (BCM) and billions of cubic feet (BCF) or millions of metric tons (MMmt) and millions of barrels (MMbbl) are summarised below:

	Gazprom Separator Gas		Gazprom Oil, Condensate, and Gas Liquids	
	English Units <i>(BCF)</i>	Metric Units <i>(BCM)</i>	English Units <i>(MMbbl)</i>	Metric Units <i>(MMmt)</i>
Proved Developed .....	264,483.53	7,489.34	692.22	84.15
Proved Undeveloped .....	358,576.53	10,153.74	1,108.52	138.64
Total .....	<u>623,059.80</u>	<u>17,643.08</u>	<u>1,800.74</u>	<u>222.79</u>
Probable* .....	44,949.00	1,272.82	863.47	109.17
Possible* .....	46,078.77	1,304.80	1,492.98	191.76

\* Probable and possible reserves have not been adjusted to account of risk.

The Gazprom future net revenue and present worth to be derived from the production and sale of the proved and proved-plus-probable reserves owned by Gazprom in the fields evaluated in the Reports, as of December 31, 1999, are estimated below, expressed in millions of United States dollars (MM U.S.\$). Values were estimated in United States dollars (U.S.\$) using the exchange rate effective December 31, 1999, which was Russian Rubles 27.00 per U.S.\$1.00.

	<u>Future Net Revenue*</u>	<u>Present Worth at 10 Percent*</u>
	<i>(MM U.S.\$)</i>	<i>(MM U.S.\$)</i>
Proved Developed .....	48,465.71	21,547.96
Proved Undeveloped .....	<u>157,732.29</u>	<u>18,591.90</u>
Total .....	<u>206,198.00</u>	<u>40,139.86</u>
Proved plus Probable** .....	228,302.75	40,394.73

\* In the preparation of these estimates, future income tax expenses have been taken into account at the field level and for transportation of gas for export.

\*\* There has been no adjustment applied to the value of probable reserves to account for risk.

The estimates of reserves, future net revenue, and present worth of future net revenue summarized are subject to the definitions, assumptions, qualifications, explanations, and conclusions expressed in the Reports. These summaries should be considered in view of the conditions of the Reports and are susceptible to being misunderstood apart from the Reports.

Very truly yours,

DeGOLYER and MacNAUGHTON

## APPENDIX C — GLOSSARY OF TERMS

"Accounting Chamber"	State Finance control authority of the Russian Federation, formed by the Federation Council, the upper chamber of the Russian Parliament
"Audit Commission"	a Commission approved by a Shareholders' General Meeting which is responsible for control over Gazprom's business and financial activities
"bcm"	billion cubic meters, as measured under one atmosphere of pressure at 20°C
"Blue Stream Project"	the construction by Gazprom, in alliance with key Italian natural gas purchaser and distributor ENI, of a new natural gas trunk pipeline from Russia via the Black Sea to Turkey
"Board of Directors"	Gazprom's board of directors consisting of eleven members and appointed pursuant to the Joint Stock Companies Law and the Charter
"Central Bank"	Central Bank of the Russian Federation
"Central and Eastern Europe"	for the purposes of this Offering Circular: Bosnia, Bulgaria, Croatia, the Czech Republic, the former Yugoslavia, Hungary, Macedonia, Poland, Romania, Slovakia, Slovenia and Yugoslavia
"Central Reserve Commission"	the Ministry of Natural Resources Central Commission for State Examination of Mineral Resources Reserves established pursuant to an Order of the Geology and Subsoil Committee of the Government No. 20 dated 23 April 1992
"Charter"	Gazprom's Charter of 31 May 1996, as amended
"COMECON"	a former economic association of communist countries founded in 1949, comprised of the Soviet Union, Bulgaria, Czechoslovakia, East Germany, Hungary, Mongolia, Poland, Romania and Cuba
"Constitution"	the constitution of the Russian Federation adopted on 12 December 1993
"Dispatch Management Centre"	Gazprom's dispatch management centre responsible for monitoring natural gas supplies through the UGSS, located in Gazprom's head office in Moscow
"EBRD"	European Bank for Reconstruction and Development
"Energy Charter Treaty"	treaty between European states the main objective of which is to assist in the development of the European energy market.
"EU"	European Union
"EU Gas Directive"	a directive adopted by the European Parliament and the Council, which came into force in August 1998, with the purpose of establishing common rules for the organisation and functioning of the European natural gas market
"Europe"	for the purposes of this Offering Circular, Central and Eastern Europe and Western Europe
"FEC"	Federal Energy Commission of the Russian Federation established pursuant to Government Decree No. 960 dated 13 August 1996 which is responsible, <i>inter alia</i> , for regulating domestic gas prices, transportation tariffs and natural resources monopoly activities
"Federal Property Fund"	State agency established under Presidential Decree No. 2173 dated 17 December 1993, which is responsible for privatisation of federal property

"FSU"	excluding Russia, the countries which comprised the former Soviet Union: Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kirgizstan, Latvia, Lithuania, Moldova, Tajikistan, Turkmenistan, the Ukraine and Uzbekistan
"Gazprom Shares"	the ordinary registered shares of Gazprom
"Gazprom Tender Committee"	a committee established within Gazprom which is responsible for holding tenders and auctions for Gazprom's various projects
"General Meeting of Shareholders"	Gazprom's highest authority in accordance with its charter, with exclusive power over various aspects of Gazprom's management
"International Energy Agency"	an energy forum with 25 member countries, which is an authoritative source for energy statistics worldwide
"kW"	kilowatts
"mcm"	thousand cubic meters, as mentioned under one atmosphere of pressure at 20° C
"Management Committee"	an executive body of Gazprom, which along with the Management Committee Chairman, manages Gazprom's day-to-day affairs and implements the strategic plans of the Board of Directors
"Management Committee Chairman"	an executive body of Gazprom responsible for issues which do not fall within the exclusive jurisdiction of the General Meeting of Shareholders, the Board of Directors or the Management Committee
"mtoe"	million metric tonnes of oil equivalent
"Novy Urengoy Gas Chemistry Complex"	a natural gas processing complex designed by Gazprom in cooperation with Salzgitter Anlagenbau and Linde, with some BASF participation, which is to be built in Novy Urengoy Region in Western Siberia
"Paris Club"	an informal grouping of 19 sovereign states which, in their role as creditors, strive to find and implement co-ordinated and sustainable solutions to the payment difficulties experienced by certain debtor countries
"OECD"	Organisation for Economic Co-operation and Development
"SACE"	Istituto per i Servizi Assicurativi del Commercio Estero (the Italian export agency)
"State Ecological Monitoring System"	a system, outlined in Government Decree No. 622 dated 23 August 2000, which monitors environmental conditions using various facilities
"State Gas Concern Gazprom"	the State controlled entity charged with the task of operating and developing the UGSS prior to Gazprom's 1993 reorganisation into a joint stock company
"State Balance of Natural Resources"	an annual record prepared by the Ministry of Natural Resources pursuant to the Subsoil Law stating the level of mineral raw materials subsisting within Russia and within the Subjects of the Russian Federation
"Subjects of the Russian Federation"	State legal formations which jointly comprise the Russian Federation. In accordance with the Constitution, there are six types of Russian Federation "Subjects": the republic of the Russian Federation, countries, regions, federal cities, autonomous regions and autonomous districts
"take-or-pay" contract	a contract under which a purchaser agrees to take natural gas from a supplier for an agreed period and price and to pay an agreed sum to a supplier should the purchaser be unable to continue to buy

“tcm”	trillion cubic meters, as measured under one atmosphere of pressure at 20°C
“tonne”	one metric tonne
“Transbalkan Pipeline Project”	Gazprom’s project on the expansion and modernisation of the existing pipeline network in the Ukraine, Romania and Bulgaria
“Western Europe”	Andorra, Austria, Belgium, Canary Islands, Channel Islands, Cyprus, Denmark, Finland, France, Germany, Gibraltar, Greece, Greenland, Iceland, Republic of Ireland, Isle of Man, Italy, Liechtenstein, Luxembourg, Malta, Monaco, The Netherlands, Norway, Portugal, San Marino, Spain, Sweden, Switzerland, Turkey and the United Kingdom
“UGSS”	Unified Gas Supply System
“US” or “U.S.”	United States of America
“Yamal-Europe Project”	Gazprom’s project, which consists of the construction of pipelines (total length approximately 5,900 km) from the northern part of the Tyumen region in the Russian Federation to Germany, running through the territories of Belarus and Poland.
“Yamburg Agreement”	a number of contracts made between government authorities of the former USSR and a number of Central and Eastern European countries in 1985-1992 which provided for gas deliveries by Gazprom.

#### CONVERSION TABLE

metric measure	U.S. measure
1 bcm . . . . .	35,316,000,000 cubic feet
1 tcm . . . . .	35,316,000,000,000 cubic feet
1 tonne . . . . .	1,000 kilos, 2,204.6 pounds
1 kilometer . . . . .	approximately 0.62 miles
1 metric tonne of oil equivalent . . . . .	25.2 Quadrillion Btus (British Thermal Unit) approximately 1,125 cubic meters of natural gas.

## AUDITORS' REPORT

To the Shareholders of OAO Gazprom

1. We have audited the accompanying consolidated balance sheets of OAO Gazprom and its subsidiaries and associates (the "Group") as of 31 December 2000 and 1999, and the related consolidated statements of operations, of cash flows and of changes in shareholders' equity for the years then ended. These financial statements are the responsibility of the Group's management. Our responsibility is to express an opinion on the consolidated financial statements based on our audits.
2. We conducted our audits in accordance with International Standards on Auditing. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.
3. In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group at 31 December 2000 and 1999, and the results of its operations and its cash flows for the years then ended in accordance with International Accounting Standards.
4. Without qualifying our opinion, we draw your attention to Note 24 to the consolidated financial statements. The Government of the Russian Federation is the principal shareholder of the Group and governmental economic and social policies affect the Group's financial position, results of operations and cash flows.
5. Further, we draw your attention to Note 28 to the consolidated financial statements. The consolidated financial statements as of 31 December 2000 and 1999, as previously issued, have been restated for changes in the general purchasing power of the Russian Rouble in accordance with International Accounting Standard 29 "Financial Reporting in Hyperinflationary Economies" with all amounts stated in terms of the measuring unit current at 30 September 2001.

Moscow, Russian Federation

28 June 2001, except for Note 28, as to which the date is 30 January 2002

Chairman of the Management Committee  
30 January 2002

E.A. Vasilieva  
Chief Accountant  
30 January 2002

The accompanying notes are an integral part of these consolidated financial statements.

## **ОАО ГАЗПРОМ**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 30 September 2001, except as noted)

#### **1 NATURE OF OPERATIONS**

ОАО Газпром was established as a Russian joint stock company by Presidential Decree No. 1333 dated 5 November 1992. The Annual General Meeting of shareholders, held on 26 June 1998, approved a recommendation from the Board of Directors on revising the name of the Company in order to comply with the federal law on joint stock companies. Consequently, the Company became the open joint stock company Gazprom or ОАО Газпром.

ОАО Газпром and its subsidiaries and associates (the "Group") operate one of the largest gas pipeline systems in the world and are responsible for substantially all gas production and high pressure gas transportation in the Russian Federation. The Group is also a major exporter of gas to European countries.

The Group is directly involved in the following principal activities:

- Production—exploration and production of gas and other hydrocarbons;
- Refining—processing of gas condensate and other hydrocarbons, and sales of other hydrocarbon products;
- Transportation—transportation of gas; and
- Distribution—domestic and export sale of gas.

The weighted average number of employees during 2000, 1999 and 1998 was 306, 298 and 309 thousand respectively.

#### **2 ECONOMIC ENVIRONMENT IN THE RUSSIAN FEDERATION**

The economy of the Russian Federation continues to display characteristics of an emerging market. These characteristics include, but are not limited to, the existence of:

- a currency that is not freely convertible outside of the country;
- extensive currency controls;
- a low level of liquidity in the public and private debt and equity markets; and
- high inflation.

Transactions on the Russian stock exchange market are influenced by underdeveloped infrastructure, especially registration and settlement systems which are in the process of formation as well as the regulation basis.

The prospects for future economic stability in the Russian Federation are largely dependent upon the effectiveness of economic measures undertaken by the government, together with legal, regulatory, and political developments.

#### **3 BASIS OF PRESENTATION**

These financial statements are prepared in accordance with International Accounting Standards ("IAS"). The Group subsidiaries and associated undertakings maintain their statutory financial statements in accordance with the Regulation on Accounting and Reporting of the Russian Federation ("RAR") or the accounting regulations of the country in which the particular Group company is resident. The financial statements of the Group's subsidiaries and associated undertakings resident in the Russian Federation, which account for substantially all the assets and liabilities of the Group, are based on their statutory records, which are maintained under the historical cost convention with adjustments and reclassifications recorded in the financial statements for the purpose of fair presentation in accordance with IAS. Similar adjustments are recorded in the financial statements in respect of Group companies not resident in the Russian Federation.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 30 September 2001, except as noted)

#### 3 BASIS OF PRESENTATION (continued)

The preparation of consolidated financial statements in conformity with IAS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

The adjustments and reclassifications made to the statutory accounts for the purpose of IAS reporting include the restatement for changes in the general purchasing power of the Russian Rouble ("RR") in accordance with IAS 29, "Financial Reporting in Hyperinflationary Economies" ("IAS 29") (see Note 28).

These statements are prepared in accordance with all International Accounting Standards effective for financial statements covering periods ended 31 December 2000.

#### Reclassifications

Minor reclassifications have been made to certain prior year balances to conform to the current year presentation.

#### 4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies followed by the Group are set out below.

#### Consolidation

Significant subsidiary companies in which the Group, directly or indirectly, has an interest of more than 50% of the voting rights or is otherwise able to exercise control over the operations have been consolidated. Subsidiaries are consolidated from the date on which effective control is transferred and are no longer consolidated from the date of disposal. All intercompany transactions, balances and unrealised surpluses and deficits on transactions between group companies have been eliminated. Separate disclosure is made of minority interests.

Acquisitions of subsidiaries are recorded in accordance with the purchase accounting method. The consolidated financial statements of the Group reflect the results of operations of any subsidiaries acquired from the date control is established.

Assets and liabilities of subsidiaries acquired are restated to comply with uniform Group accounting policies. Any excess of the cost of an acquisition over the fair value of the Group's share of the identifiable net assets of the acquired subsidiary/associated undertaking at the date of acquisition is recorded as goodwill. In respect of associates, goodwill is included in investments in associated undertakings.

#### Associated undertakings

Associated undertakings are undertakings over which the Group has significant influence, but which it does not control. Provisions are recorded for long-term impairment in value. Associated undertakings are accounted for using the equity method.

Equity accounting involves recognising in the income statement the Group's share of the associated undertakings' profit or loss for the year. The Group's interest in the associate is carried in the balance sheet at an amount that reflects its share of the net assets of the associate and includes goodwill on the acquisition.

## OA0 GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 30 September 2001, except as noted)

#### 4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

##### **Mutual cancellation and barter transactions**

A significant portion of accounts receivable arising from sales are settled either through a chain of non-cash transactions (mutual cancellations), sometimes involving several enterprises, or, to a lesser extent, through direct settlement by goods from the final customer (barter). A portion of operations, including capital expenditures, is transacted by mutual cancellations or barter. Such transactions are excluded from investing and financing activities in the consolidated statement of cash flows. Net cash received from operating activities in the consolidated statement of cash flow also represents actual cash flow transactions. However, individual items within operating activities are stated inclusive of both cash and non-cash transactions due to the significance of non-cash transactions in the form of barter and mutual-cancellation offsets. Management believes the costs which would be required to be expended to determine such information would outweigh the benefits of having such information.

Receivables and payables that are expected to be settled by mutual settlements, barter or other non-cash settlements, are recognised based on management's estimate of the fair value to be received or given up. Approximately, 22%, 40% and 46% of accounts receivable from gas sales settled during the years ended 31 December 2000, 1999 and 1998, respectively, were settled in this manner.

##### **Deferred tax**

Deferred tax assets and liabilities are calculated in respect of temporary differences using a balance sheet liability method for financial reporting and accounting for deferred income taxes. Deferred tax is recorded for all temporary differences arising between the tax basis of assets and liabilities and their carrying values for financial reporting purposes. A deferred tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised. Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date.

##### **Foreign currencies**

The balance sheets of foreign subsidiaries and associated undertakings and the monetary assets and liabilities which are held by the Group and denominated in foreign currencies at the year end are translated into Roubles at the exchange rates prevailing at the year end. Exchange differences arising on the retranslation of the net assets of foreign subsidiaries and associated undertakings are recognised as translation differences and included in shareholders' equity. Statements of operations of foreign entities are translated at average exchange rates for the year.

Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of operations.

##### **Property, plant and equipment**

Property, plant and equipment are carried at historical cost restated to the equivalent purchasing power of the RR at 31 December 2000 on the basis of the indices included in Note 28.

Gas and oil exploration and production activities are accounted for in accordance with the successful efforts method. Under the successful efforts method, costs of successful development and exploratory wells are capitalised. Costs of unsuccessful exploratory wells are expensed upon determination that the well does not justify commercial development. Other exploration costs are expensed as incurred.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 30 September 2001, except as noted)

#### 4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Major renewals and improvements are capitalised. Maintenance, repairs and minor renewals are expensed as incurred. Minor renewals include all expenditures that do not result in a technical enhancement of the asset beyond its original capability. Gains and losses arising from the disposal of property, plant and equipment are included in the consolidated statement of operations as incurred.

Interest costs on borrowings to finance the construction of property, plant and equipment are capitalised as part of the cost of the asset during the period of time that is required to complete and prepare the asset for its intended use.

The return to a governmental authority of social assets (such as housing, rest houses, schools and medical facilities) vested to the Group at privatisation are recorded only upon both the transfer of title to, and termination of operating responsibility for, the social assets. These disposals are deemed to be shareholder transactions because they represent a return of assets for the benefit of governmental authorities, as contemplated in the original privatisation arrangements. Consequently, such disposals are accounted for as a charge to other reserves.

Depreciation is calculated on all assets on a straight line basis. Depreciation on wells and production equipment has been calculated on cost restated to the equivalent purchasing power of the Rouble at 31 December 2000, using the straight line method rather than, as is the more generally accepted international industry practice, on the unit-of-production method. As a result, gas production and changes in gas reserves do not impact the computation of the Group's depreciation. The estimated useful lives of the Group's assets are as follows:

	<u>Years</u>
Pipelines .....	33
Wells and production equipment .....	12-40
Machinery and equipment .....	10-18
Buildings .....	30-40
Roads .....	20-40
Social assets .....	10-40

Assets under construction are not depreciated.

#### **Investments**

Long-term investments, excluding bonds, are reflected at cost restated to the equivalent purchasing power of the RR at 31 December 2000. Bonds are reflected at amortised cost. Provision for impairment is only made where, in the opinion of the Group's management, there is a diminution in value, which is other than temporary. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the consolidated statement of operations.

#### **Marketable securities**

Marketable securities are valued at the lower of cost restated to the equivalent purchasing power of the Rouble at 31 December 2000 on the basis of indices included in Note 28, or market value.

#### **Accounts receivable**

Accounts receivable are carried at anticipated realisable value. An impairment estimate is made for doubtful receivables based on a review of all outstanding amounts at the year end. This estimate reflects, inter alia, the payment record of specific debtors and management's perception of the economic risks and factors specific to customers operating in certain regions and markets. Bad debts are written off in the year in which they are identified.

## **OAO GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)** (In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 30 September 2001, except as noted)

#### **4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

##### **Inventories**

Inventories are valued at the lower of net realisable value or weighted average cost restated to the equivalent purchasing power of the RR at 31 December 2000 on the basis of indices included in Note 28.

##### **Provisions**

Provisions including provisions for environmental liabilities, are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

##### **Impairment of assets**

At each balance sheet date management assess whether there is any indication that the recoverable value of the Group's assets has declined below the carrying value. When such a decline is identified, the carrying amount is reduced to the recoverable amount. The amount of the reduction is recorded in the consolidated statement of operations in the period in which the reduction is identified.

##### **Pension and other post-retirement benefits**

Mandatory contributions to the governmental pension scheme are expensed when incurred and are included within staff costs in the operating expenses. The cost of providing other immaterial discretionary pension payments and other post-retirement obligations (including constructive) is accrued and charged to the consolidated statement of operations so as to spread the regular cost over the service lives of employees.

##### **Revenue recognition**

Sales are recognised for financial reporting purposes when products are delivered to customers and title passes and are stated net of value-added tax ("VAT"), excise taxes and other similar compulsory payments.

Interest income is recognised as it accrues (taking into account the effective yield on the asset), unless collectibility is in doubt.

##### **Research and development**

Research and development expenditure is recognised as an expense except that costs incurred on development projects are recognised as development assets to the extent that such expenditure is expected to have future benefits. However, development costs initially recognised as an expense are not recognised as an asset in a subsequent period.

Development costs that have been capitalised are amortised from the commencement of the commercial production of the product to which they relate on a straight line basis over estimated useful lives.

##### **Financial instruments**

Financial instruments carried on the balance sheet include cash and bank balances, investments, receivables, trade creditors and borrowings. The particular recognition methods adopted are disclosed in the individual policy statements associated with each item.

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

#### **4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

The Group is also party to derivative financial instruments including forward and spot transactions and option contracts in foreign exchange, gold and securities markets. The Group's normal policy is to measure these instruments using contractual rates, with resultant gains or losses being reported within the consolidated statement of operations. Following the financial crisis of August 1998, the Group adopted specific accounting methods as follows:

##### *Index Forwards*

The Group has either paid the amount due under index contracts, and realised a loss (gain), or negotiated a settlement for a lesser amount and has recognised a loss (gain) based on the agreed terms, or has not settled with the counterparty. Where no settlements or agreements have been reached the loss on the index contracts has been recognised by applying the rate of exchange ruling at the date of the contract maturity, for domestic counterparties, and the year end exchange rate, for foreign counterparties. This difference in the application of exchange rates is due to the fact that settlements with domestic counterparties in the normal course of business have been performed in RR, and with foreign counterparties in foreign currency. Management has not recorded a gain where no settlement or agreements have been reached due to the uncertainty of collectibility.

Gains and losses recognised on the index contracts have been offset within each counterparty since management believes that there is a legally enforceable right to offset these amounts, and it intends to settle all the contracts with the same counterparty on a net basis.

##### *Deliverable Forwards*

The Group has either paid the amount due under deliverable contracts and recognised a loss (gain), or negotiated a settlement for a lesser amount and has recognised a loss (gain) based on the agreed terms, or has not settled with the counterparty. Where no settlements or agreements have been reached the loss on the deliverable contracts has been recognised based on the year end exchange rate, plus interest and penalties where applicable. Management has not recorded a gain where no settlement or agreements have been reached due to the uncertainty of collectibility.

Gains and losses on the deliverable contracts have not been offset within counterparties.

##### *Options*

Where conditions of an option agreement include the actual delivery of currency, the Group has treated a loss (gain) in the same way as for the deliverable forwards contracts, otherwise the Group has used the index forwards approach.

##### **Cash and cash equivalents**

Cash comprises cash on hand and demand deposits. Cash equivalents comprise short-term investments which are readily converted to cash and have an original maturity of three months or less.

##### **Treasury shares**

Treasury shares are recorded at cost, using the specific identification method. The gains (losses) arising from treasury share transactions are recognised as a movement in shareholders' equity, net of associated costs including taxation.

##### **Dividends**

Dividends are recognised as a liability at the balance sheet date only if they are proposed or declared before or on the balance sheet date.

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**New Accounting Developments**

A new International Accounting Standard, IAS 39 "Financial Instruments: Recognition and Measurement" came into effect on 1 January 2001. The Standard requires all financial assets and financial liabilities to be recognised on the balance sheet, including all derivatives. Management has not yet evaluated the impact of this standard on the Group's consolidated financial statements for the year ending 31 December 2001.

**5 SEGMENT INFORMATION**

Management does not separately identify segments within the Group, as it operates as a vertically integrated business with substantially all external sales generated by the gas distribution business. However, following the practice suggested by IAS 14, "Segment Reporting", Revised 1997 ("IAS 14") for vertically integrated businesses, information can be analysed based on the following business segments:

- Production—extraction of gas and other hydrocarbons;
- Refining—processing of gas and other hydrocarbons, and sales of other hydrocarbon products;
- Transport—transportation of gas;
- Distribution—sales of gas in the Russian Federation and abroad; and
- Other—other activities, including banking.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 30 September 2001, except as noted)

#### 5 SEGMENT INFORMATION (continued)

The inter-segment revenues mainly consist of:

Production—sale of gas to the Distribution segment and sale of hydrocarbons to the Refining segment;

- Refining—sale of refined products to other segments;
- Transport—rendering transportation services to the Distribution segment; and
- Distribution—sale of gas to the Transport segment for technological needs.

Internal transfer prices are established by the management of the Group with the objective of providing for the specific medium and long-term funding requirements of the individual segments. Provisions for guarantees (see Note 25) have been included within unallocated expenses. Also included within unallocated expenses are corporate expenses, including provision for the impairment of other investments.

External expenses within Other for the year ended 31 December 1998 include losses on derivatives and loan losses totalling RR 34,141 and RR 7,673, respectively.

Segment assets consist primarily of property, plant and equipment and current assets. Unallocated assets include other investments and deferred tax assets. Segment liabilities comprise operating liabilities, excluding items such as taxes payable, borrowings, and deferred tax liabilities.

Capital expenditures comprise additions to property, plant and equipment. Charges for impairment relate only to those charges made against allocated assets. A significant portion of operations is transacted by mutual cancellations or barter. As disclosed in Note 4, such transactions are reported on the same basis as cash transactions. Consequently, expenses paid by mutual cancellations or barter are not disclosed as non-cash expenses in this note.

Substantially all of the Group's operating assets are located in the Russian Federation. Gas sales to different geographical regions are disclosed in Note 19.

#### 6 CASH AND CASH EQUIVALENTS

Balances included within cash and cash equivalents in the consolidated balance sheet represent cash in hand and balances with banks. Included within other current assets are balances of cash and cash equivalents totalling RR 36,300, RR 29,162 and RR 20,391 at 31 December 2000, 1999 and 1998, respectively, which are restricted as to withdrawal under the terms of certain of the borrowings (see Note 15). In addition, other current assets include balances of cash RR 5,692, RR 4,946 and RR 2,534 at 31 December 2000, 1999 and 1998, respectively, which are restricted in subsidiary banks as to withdrawal under banking regulations.

#### 7 MARKETABLE SECURITIES

At 31 December 2000, marketable securities include Ukrainian eurobonds of RR 6,687 held by National Reserve Bank (see Note 11). The remaining carrying value of marketable securities principally comprises Russian government bonds.

**OAO GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**8 ACCOUNTS RECEIVABLE AND PREPAYMENTS**

	31 December		
	2000	1999	1998
Trade receivables (net of a provision for doubtful accounts of RR 79,702, RR 69,564 and RR 103,930 at 31 December 2000, 1999 and 1998, respectively) . . . . .	196,934	211,882	228,241
Prepayments and advances paid (net of a provision for doubtful accounts of RR 6,164 and RR 7,916 at 31 December 2000 and 1999, respectively) . . . . .	31,930	22,920	38,263
Other receivables (net of a provision for doubtful accounts of RR 29,256, RR 26,903 and RR 20,509 at 31 December 2000, 1999 and 1998, respectively) . . . . .	73,765	66,446	71,341
	<u>302,629</u>	<u>301,248</u>	<u>337,845</u>

Substantially all trade receivables are currently receivable in accordance with their contractual terms and, accordingly, are classified as current assets. Management has considered the likelihood of collection of receivables beyond 2001 when determining the amount of the provision for doubtful accounts.

RR 90,672, RR 103,754 and RR 84,000 of trade receivables were denominated in hard currency, mainly United States ("US") dollars, at 31 December 2000, 1999 and 1998, respectively.

Other receivables include RR 25,551, RR 32,893 and RR 41,184 of receivables relating to the operations of Gazprombank and National Reserve Bank (see Note 23) at 31 December 2000, 1999 and 1998, respectively. These balances mainly represent loans issued to other banks and customers at commercial rates ranging from 4.7% to 23.6% per annum at 31 December 2000, 3.0% to 40.0% per annum at 31 December 1999 and 1.0% to 40.0% per annum at 31 December 1998 .

**9 INVENTORIES**

Note	31 December		
	2000	1999	1998
Materials and supplies . . . . .	33,574	28,223	29,491
20 Gas (in pipelines and storage) . . . . .	28,512	24,138	26,395
Goods for resale . . . . .	3,853	4,081	7,005
Other . . . . .	1,586	2,559	2,205
	<u>67,525</u>	<u>59,001</u>	<u>65,096</u>

Inventories are presented net of a provision for obsolescence of RR 13,766, RR 9,398 and RR 12,207 at 31 December 2000, 1999 and 1998, respectively.

Goods for resale are stated at their net realisable value at 31 December 2000, 1999 and 1998, respectively.

**OAO GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**10 PROPERTY, PLANT AND EQUIPMENT (continued)**

Assets under construction are presented net of a provision for impairment of RR 87,541, RR 59,030 and RR 35,620 at 31 December 2000, 1999 and 1998, respectively. Additions of assets under construction are stated net of transfers to other property, plant and equipment categories.

Included in additions above is capitalised interest of RR 17,951, RR 12,758 and RR 5,617 for the years ended 31 December 2000, 1999 and 1998, respectively. A capitalisation rate of 8.2% (1999 and 1998—8.1%) was used representing the average actual borrowing cost of the loans used to finance the projects.

Included in the property, plant and equipment above are fully depreciated assets which are still in service of RR 264,766, RR 263,277 and RR 229,785 at 31 December 2000, 1999 and 1998, respectively.

Depreciation disclosed above includes RR 869, RR 967 and RR 1,061 for the years ended 31 December 2000, 1999 and 1998, respectively, which is considered a cost of self constructed assets and thus capitalised rather than expensed in the consolidated statement of operations. Similarly, RR 10,594, RR 10,568 and RR 9,667 of depreciation for the years ended 31 December 2000, 1999 and 1998, respectively, is capitalised as a component of gas inventories and expensed in the consolidated statement of operations when the gas is sold.

The Group's gas fields are operated under licenses granted by federal and local authorities. These licenses to develop and extract hydrocarbons expire between 2013 and 2016, however they may be extended. Management intends to extend the existing licenses on properties expected to produce hydrocarbons subsequent to their current expiration dates.

**11 INVESTMENTS**

Stella Vitae	Lithuania	Gas distribution and transportation	30	30	30
Turusgaz	Turkey	Gas distribution	45	45	45

During 1999, the Group was the principal shareholder in AEB and executed effective control over the Bank. In April 2000, a portion of the controlling interest the Group held in AEB was sold, leaving the Group with a 26% interest in AEB (see Note 24). Thus, due to the inability of the Group to control the operations of AEB from April 2000, AEB was accounted for under the equity method.

Dividends received from associated undertakings were RR 1,318, RR 1,238 and RR 393 for the years ended 31 December 2000, 1999 and 1998, respectively.

**Other investments**

At 31 December 1999 and 1998, other investments included Ukrainian Ministry of Finance bonds held by National Reserve Bank with a carrying value of RR 5,894 and RR 9,995, respectively. These bonds were issued by the Ukrainian government in settlement of gas sales made to the Ukraine in 1994. The bonds were denominated in US dollars, carry an interest rate of 8.5% per annum and were redeemable between June 1999 and March 2006. At 31 December 1999 and 1998 the Group had pledged Ukrainian bonds against certain short-term borrowings. In April 2000, the Group was elected to participate in a restructuring program and exchanged these bonds for US dollar denominated eurobonds issued by the Cabinet of Ministers of Ukraine bearing interest at 11.0% per annum. The new eurobonds mature between March 2001 and March 2007 with repayment of principal to be made in semi-annual installments, commencing in March 2001. Upon exchange of the original bonds the Group transferred the eurobonds to marketable securities at their estimated fair value (see Note 7).

At 31 December 2000 and 1999, the Group had a 14.3% interest in ZAO Media-Most. This interest in ZAO Media-Most was acquired in November 1999 via the settlement of a ZAO Media-Most debt to the Group. ZAO Media-Most is one of the largest publishing and entertainment companies operating in the Russian Federation.

At 31 December 1999, the Group held collateral representing an interest of 17.1% in ZAO Media-Most in exchange for providing certain loan guarantees on behalf of ZAO Media-Most. During 2000, ZAO Media-Most defaulted on its payment obligation and the Group fulfilled its obligations.

In November 2000, the Group signed agreements with ZAO Media-Most to change the collateral under the guarantees, both those fulfilled in 2000 and those outstanding at 31 December 2000 (see Note 25) to interests in NTV and other ZAO Media-Most operating companies. The Group then exercised its rights to take ownership of interests in ZAO Media-Most operating companies and a further interest in NTV.

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**11 INVESTMENTS (continued)**

At 31 December 2000, the Group held a 46% interest in NTV and 25% plus one share interest in various other ZAO Media-Most operating companies.

Outstanding guarantees of the Group made on behalf of ZAO Media-Most as at 31 December 2000 amounted to RR 8,399 with collateral in the form of interests in NTV and other ZAO Media-Most operating companies (see Note 25).

The Group is currently in negotiations to sell its investments in NTV and other ZAO Media-Most operating companies.

**12 ACCOUNTS PAYABLE AND ACCRUED CHARGES**

	31 December		
	2000	1999	1998
Trade payables .....	32,330	28,876	28,086

Less: long term portion of restructured tax liabilities .....	(10,099)	—	—
	<u>130,593</u>	<u>184,342</u>	<u>185,490</u>

**OAO GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**13 TAXES PAYABLE (continued)**

The deferred amounts included in the taxes above are payable upon settlement of the related trade receivable balances. Substantially all accrued taxes above, excluding the deferred amounts and restructured liability (see below) incur interest at a rate of 1/300 of the refinancing rate of the Central Bank of the Russian Federation (the refinancing rate was last set at 25.0% per annum on 4 November 2000). Interest does not accrue on tax penalties and interest.

During 2000 the Group negotiated the restructuring of its tax liabilities in accordance with current tax regulations.

The long-term portion of the restructured tax and penalties liability has the following maturity profile:

	<u>31 December 2000</u>
Due for repayment:	
Between one and two years .....	2,595
Between two and five years .....	7,769
After five years .....	<u>16,948</u>
	27,312
Less: discount recorded upon restructured taxes .....	<u>(17,213)</u>
	<u><u>10,099</u></u>

The above balances have been discounted using the marginal RR rate of borrowings of the Group of 21.2% in order to present the debt at its fair value.

**14 SHORT-TERM LOANS AND CURRENT PORTION OF LONG-TERM BORROWINGS**

	<u>31 December</u>		
	<u>2000</u>	<u>1999</u>	<u>1998</u>
Short-term loans .....	140,032	94,829	49,948
Current portion of long-term borrowings (see Note 15) .....	<u>53,278</u>	<u>50,366</u>	<u>13,374</u>
	<u><u>193,310</u></u>	<u><u>145,195</u></u>	<u><u>63,322</u></u>

Short-term borrowings include RR denominated bank borrowings with interest rates varying from 17% to 37% for the year ended 31 December 2000, from 35% to 40% for the year ended 31 December 1999 and from 58% to 61% for the year ended 31 December 1998.

Short-term borrowings also include RR 65,671, RR 28,516 and RR 12,131 of short-term promissory notes at 31 December 2000, 1999 and 1998, respectively.

30 September 2001, except as noted)

15 LONG-TERM BORROWINGS

	Currency	Due	31 December		
			2000	1999	1998
Long-term borrowings payable to:					
A French banking consortium . . . . .	US dollar	2000-2005	91,104	111,192	115,956
A German banking consortium . . . . .	US dollar	2000-2005	68,895	94,697	96,629
An Italian banking consortium . . . . .	US dollar	2000-2007	36,791	48,974	55,984
A German consortium . . . . .	Euro	2000-2009	20,433	27,841	18,618
An International banking consortium . . .	Deutsche mark	2000-2005	14,462	18,885	22,878
A German banking consortium . . . . .	Euro	2000-2009	11,262	16,074	20,586
A German bank consortium . . . . .	Euro	2000-2002	7,728	11,546	18,486
A Cyprus banking consortium . . . . .	US dollar	2000-2005	8,688	9,940	—
Other long-term borrowings . . . . .			<u>34,665</u>	<u>31,058</u>	<u>10,026</u>
Total long-term borrowings . . . . .			294,028	370,207	359,163
Less: current portion of long-term borrowings . . . . .			<u>(53,278)</u>	<u>(50,366)</u>	<u>(13,374)</u>
			<u>240,750</u>	<u>319,841</u>	<u>345,789</u>

	31 December		
	2000	1999	1998
Due for repayment:			
Between one and two years . . . . .	62,533	71,606	45,975
Between two and five years . . . . .	147,148	185,944	185,184
After five years . . . . .	<u>31,069</u>	<u>62,291</u>	<u>114,630</u>
	<u>240,750</u>	<u>319,841</u>	<u>345,789</u>

Interest rates on the borrowings are variable and linked, mainly, to LIBOR, except for interest on the Italian borrowing, which is fixed at 5.7%. The annual interest rates on US dollar denominated borrowings range from 5.7% to 10.7% per annum at 31 December 2000, from 5.7% to 10.5% per annum at 31 December 1999 and from 5.7% to 7.4% per annum at 31 December 1998. The annual interest rates on Euro denominated borrowings range from 3.8% to 6.1% per annum at 31 December 2000. The annual interest rates on DM denominated borrowings range from 4.8% to 8.4% per annum at 31 December 2000, from 3.2% to 8.0% per annum at 31 December 1999 and from 3.7% to 8.5% per annum at 31 December 1998. Substantially all borrowings are secured by contractual obligations to sell gas in Western Europe and the associated cash flows (see Note 6). The amount payable to an international banking consortium is also secured by certain assets of ZGG-Zarubezhgaz Erdgashandels GmbH, a wholly owned subsidiary.

The fair value of the fixed rate Italian loan is RR 32,342, RR 38,945 and RR 42,599 at 31 December 2000, 1999 and 1998, respectively. The carrying amounts of variable rate loans approximate fair value.

The Group has no subordinated debt and no debt which may be converted into an equity interest in the Group.

Long-term borrowings include RR 3,085 and RR 3,542 at 31 December 2000 and 1999, respectively, of coupon non-documentary bearer bonds issued by OAO Gazprom in 1999. The issue amounted to 3.0 million bonds, each with a nominal value of RR 1,000 and a due date of 15 April 2003. During the year 2000, the Group repurchased 481,187 bonds. The total amount recorded for the bonds excludes the discount related to future periods.

At 31 December 2000 long-term borrowings also include RR 7,058 of promissory notes with due dates beyond 2001.

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**15 LONG-TERM BORROWINGS (continued)**

The US dollar to RR exchange rates were 28.16, 27.00 and 20.65 at 31 December 2000, 1999 and 1998, respectively. The Euro to RR exchange rates were 26.14 and 27.32 at 31 December 2000 and 1999, respectively. The DM to RR exchange rates were 13.37, 13.92 and 12.35 at 31 December 2000, 1999 and 1998, respectively.

**16 PROFIT TAX**

Profit tax expense in the consolidated statement of operations is stated net of RR 935 and RR 143 of tax attributable to gains arising on treasury share transactions for the year ended 31 December 2000 and 1999, respectively (see Note 4). No profit tax expense was associated with treasury share transactions for the year ended 31 December 1998.

The Group accrued profit tax at rates of 30.0% and 38.0% on profits from non-banking and banking activities, respectively, computed in accordance with the Russian tax legislation. Before enactment of such rates on 1 April 1999, the corresponding tax rates were 35.0% and 43.0%. Starting from 1 January 2001 the profit tax rates were increased effectively to 35.0% and 43.0%, respectively. IAS profit before profit tax for financial reporting purposes is reconciled to profit tax expense as follows:

	Year ended 31 December		
	2000	1999	1998
IAS profit(loss) before profit tax . . . . .	175,873	26,410	(214,502)
Theoretical tax (charge) credit at a statutory rate thereon . . . . .	(52,762)	(7,923)	75,075
Tax effect of items which are not deductible or assessable for taxation purposes:			
Non-temporary element of monetary gains and losses . . . . .	(51,898)	(109,098)	(228,246)
Non-deductible expenses . . . . .	(45,270)	(45,700)	89,738
Statutory tax concessions . . . . .	22,527	14,866	—
Other non-temporary differences . . . . .	(6,084)	9,271	7,166
Inflation effect on deferred profit tax balance at beginning of year . . .	6,001	3,201	(11,462)
Effect of increase in taxable base due to statutory revaluation . . . . .	263,775	—	—
Effect of change in tax rate . . . . .	15,978	585	—
Profit tax benefit (expense) . . . . .	<u>152,267</u>	<u>(134,798)</u>	<u>(67,729)</u>

The non-temporary impact of monetary gains and losses reflects the effect on the theoretical tax charge of inflation with respect to non-monetary items of a non-temporary nature (primarily social assets and equity).

Differences between Russian statutory taxation regulations and IAS give rise to certain temporary differences between the carrying value of certain assets and liabilities for financial reporting purposes and for profits tax purposes. The tax effect of the movement on these temporary differences is recorded at the rate of 35.0% or 43.0% as applicable.

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**16 PROFIT TAX (continued)**

	31 December 2000	Change in tax rate	Differences recognition and reversals	31 December 1999	Change in tax rate	Acquisitions	Differences recognition and reversals	31 December 1998
<b>Tax effects of taxable temporary differences:</b>								
Accounts receivable . . . . .	(29,966)	(4,282)	(9,734)	(15,950)	2,273	—	3,494	(21,717)
Inventories . . . . .	(3,982)	(569)	2,274	(5,687)	865	—	1,711	(8,263)
Investments . . . . .	(902)	(128)	(415)	(359)	709	—	5,711	(6,779)
<b>Tax effects of deductible temporary differences:</b>								
Property, plant and equipment . . . . .	142,673	20,382	227,656	(105,365)	418	(1,175)	(100,617)	(3,991)
Provision for doubtful accounts . . . . .	4,022	575	1,242	2,205	962	—	10,448	(9,205)
Tax losses carryforward . . . . .	—	—	(5,773)	5,773	(3,438)	—	(23,675)	32,886
<b>Total net deferred tax asset (liability) . . . . .</b>	<u>111,845</u>	<u>15,978</u>	<u>215,250</u>	<u>(119,383)</u>	<u>1,789</u>	<u>(1,175)</u>	<u>(102,928)</u>	<u>(17,069)</u>

Deferred tax assets and liabilities arise mainly from differences in the taxable and financial reporting bases of property, plant and equipment. These differences are due to the fact that a significant proportion of the tax base is based upon independent appraisals while the financial reporting base is historical cost restated for changes in the general purchasing power of the RR (see Note 3).

At 31 December 1999 the Group recognised a deferred tax liability of RR 119,383, mainly as the tax base was lower than the financial reporting base for property, plant and equipment. The difference was due to the fact that a significant portion of the tax basis is based upon independent appraisal which was last recognised at 1 January 1998. At 31 December 2000 the Group has recognised a deferred tax asset of RR 263,775; this asset arises due to the temporary differences resulting from a revaluation of the carrying value of property, plant and equipment recognised in the Russian financial statements at 1 January 2001. The result of the revaluation is allowable for profit tax purposes under Russian statutory taxation regulations, effectively increasing the taxable base of property, plant and equipment.

The temporary differences associated with undistributed earnings of subsidiaries amount to RR 41,835, RR 16,770 and RR 20,580 at 31 December 2000, 1999 and 31 December 1998, respectively. A deferred tax liability on these temporary differences was not recognised because management controls the timing of the reversal of the temporary differences and believes that they will not reverse in the foreseeable future.

**17 PROVISIONS FOR LIABILITIES AND CHARGES**

Notes	31 December		
	2000	1999	1998
26 Provision for losses on derivatives . . . . .	13,180	18,991	28,743
25 Provision for guarantees . . . . .	9,938	18,691	24,333

Other . . . . .	10,165	7,760	6,345
	<u>38,382</u>	<u>50,329</u>	<u>64,946</u>
Less: current portion of provisions for liabilities and charges . . . . .	(9,938)	(7,714)	—
	<u>28,444</u>	<u>42,615</u>	<u>64,946</u>

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)**

**18 SHAREHOLDERS' EQUITY**

**Share capital**

Share capital authorised, issued and paid in totalled RR 271,193 at 31 December 2000, 1999 and 1998 and consists of 23.7 billion ordinary shares, each with a nominal value of RR 5.

**Treasury shares**

At 31 December 2000, 1999 and 31 December 1998, subsidiaries of OAO Gazprom held 2,684 million, 2,614 and 2,327 million, respectively, of the ordinary shares of OAO Gazprom.

**Retained earnings and other reserves**

Included in retained earnings and other reserves are the effects of the cumulative restatement to the equivalent purchasing power of the Rouble at 31 December 2000, and cumulative translation differences of RR 17,175, RR 16,460 and RR 15,055 arising on the retranslating of the net assets of foreign subsidiaries and associated undertakings at 31 December 2000, 1999 and 1998, respectively.

Other reserves include a statutory fund for social assets, created at the time of privatisation in accordance with Russian legislation. The Group is negotiating to return certain of these assets to governmental authorities, though this process is expected to be protracted. Social assets with a net book value of RR 6,182, RR 5,156 and RR 5,183 have been transferred to governmental authorities during the years ended 31 December 2000, 1999 and 1998, respectively. These transactions have been recorded as a charge to other reserves.

The statutory accounting reports of the parent company, OAO Gazprom, are the basis for profit distribution and other appropriations. The basis of distribution is defined by legislation as the current year net profit, as calculated in accordance with RAR. For 2000, the statutory profit for the parent company was RR 55,371. However, the legislation and other statutory laws and regulations dealing with profit distribution are open to legal interpretation and accordingly management believes at present it would not be appropriate to disclose an amount for the distributable reserves in these consolidated financial statements.

In 2000, the Group accrued interim dividends in the amount of RR 0.07 per share. In addition to the interim dividend, in 2001 the Board of Directors recommended payment of a final dividend for the year ended 31 December 2000 in the amount of RR 0.23 per share. Because this decision of the Group management was reached after the balance sheet date, the amount of final dividend proposed is not recognised in the consolidated balance sheet. Dividends accrued and paid for the year 1999, amounted of RR 0.10 per share. Taking into account the statutory loss recorded by the parent company for the year ended 31 December 1998, dividends were not accrued for that year.

**OAO GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**19 SALES**

	Year ended 31 December		
	2000	1999	1998
Gas sales (including excise tax, net of VAT) to customers in:			
Russian Federation .....	98,380	104,603	198,802
Former Soviet Union (excluding Russian Federation) .....	66,726	73,390	71,109
Europe .....	454,383	291,379	255,094
Gross sales of gas .....	619,489	469,372	525,005
Excise tax .....	<u>(101,662)</u>	<u>(81,710)</u>	<u>(122,806)</u>
Net sales of gas .....	517,827	387,662	402,199
Sales of gas condensate and other oil products (net of sales taxes) .....	33,770	18,157	18,608
Gas transportation sales .....	30,487	23,843	28,801
Other revenues .....	33,796	26,861	23,572
	<u>615,880</u>	<u>456,523</u>	<u>473,180</u>

Commencing in 1999 the Group has been participating in the creation of regional companies involved in the distribution of gas in Russia. The interest of the Group in the majority of such companies amounts to less than 20% of their respective share capital.

Gas sales (net of VAT and excise tax) to customers in Russia include sales made to the regional companies of 141 billion cubic meters (bcm) and 43 bcm, or RR 47,173 and RR 13,612 for 2000 and 1999, respectively. Sales are made to the regional companies at prices marginally below regulated prices set for sales to final customers in Russia.

Transportation charges are provided at rates established by the Federal Energy Commission.

Gas transportation sales (net of VAT and excise tax) are primarily comprised of sales to companies of the Itera Group totaling RR 24,808 (71 bcm), RR 17,568 (57 bcm) and RR 11,152 (20 bcm) for the years ended 31 December 2000, 1999 and 1998, respectively. Trade receivables in respect of gas transportation services supplied to Itera amounted to RR 12,340, RR 3,852 and RR 108 at 31 December 2000, 1999 and 1998, respectively. Itera Group is a producer and distributor of gas in the Russian Federation and the former Soviet Union.

**OA0 GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**20 OPERATING EXPENSES**

	Year ended 31 December		
	2000	1999	1998
External transit costs	89,046	88,208	73,450
Depreciation	80,216	71,930	69,609
Staff costs	49,568	45,047	56,455
Taxes other than on income	46,845	40,644	53,910
Provision for doubtful accounts and debts written off	32,432	18,045	38,533
Materials	35,949	24,940	26,176
Provision for impairment of assets under construction	28,511	23,411	19,819
Provision for impairment and write-off of other long-term assets	21,668	18,908	12,200
Disposal of property, plant and equipment	11,866	12,057	12,123
Gas purchases	10,121	2,139	2,701
Electricity	9,234	8,947	14,386
Provision for inventory obsolescence	6,861	2,492	5,303
Research and development	4,865	3,133	4,605
Provision for impairment of investments	2,246	9,776	31,094
Goods for resale	1,905	906	4,636
Provisions for guarantees and other charges	1,105	9,913	24,685
Tax penalties	296	485	1,851
Derivative (gains) loss	(3,230)	(4,580)	34,142
Other	36,885	48,183	65,668
	<u>466,389</u>	<u>424,584</u>	<u>551,346</u>

Operating expenses include RR 25,625, RR 21,499 and RR 24,560 attributable to maintenance and repairs for the years ended 31 December 2000, 1999 and 1998, respectively.

Gas purchases and gas in storage (see Note 9) increased significantly in 2000, principally due to the purchase of 9 bcm of Turkmenistan gas from Itera LLC for RR 14,590.

Taxes other than on income consist of:

	Year ended 31 December		
	2000	1999	1998
Road users and housing fund taxes	24,143	21,926	25,492
Mineral use tax (royalty)	8,614	6,536	10,627
Property tax	4,956	4,639	7,350
Mineral restoration tax	4,327	3,397	5,570
Other taxes	4,805	4,146	4,871
	<u>46,845</u>	<u>40,644</u>	<u>53,910</u>

Taxes other than on income included in operating expenses are computed as follows:

- Road users and housing fund taxes—are charged on sales in Russia and vary by region and locality but generally in 2000 did not exceed 2.5% and 1.5%, respectively of sales in the respective region; from 1 January 2001 road use tax is 1 % of sales, housing tax is abolished.
- Mineral use tax is imposed at rates ranging from 6.0% to 16.0% of the sales value of gas and hydrocarbons produced. The actual rates of the tax are dictated in field licenses and are based on various factors;
- Property tax is imposed at a maximum rate of 2.0% on the average annual net book value of fixed assets, intangible assets and inventory. Legislation provides for the exclusion of trunk pipelines from the taxable base; and

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**20 OPERATING EXPENSES—(Continued)**

- Mineral restoration tax is imposed at the rate of 10.0% of the sales value of gas and hydrocarbons sold by the production subsidiaries. Under current legislation, up to 100.0% of mineral restoration tax assessments may be offset by a sum equal to the value of certain exploration works performed and paid for by the Group. The Group recovered 39.9% in 2000 and 34.0% in 1999 and 1998 of mineral restoration tax assessments.

All taxes and rates discussed above are calculated based on amounts recorded in accordance with Russian statutory accounting regulations.

**21 PROFIT (LOSS) PER SHARE**

Basic profit (loss) per share has been calculated by dividing the net profit (loss) for the year by the weighted average number of shares outstanding during the year. Diluted profit (loss) per share is the same as basic profit (loss) per share.

There were 20.9 billion, 21.1 billion and 21.4 billion weighted average shares outstanding for the years ended 31 December 2000, 1999 and 1998, respectively.

**22 NET CASH PROVIDED BY OPERATING ACTIVITIES**

Gazflot	Orenburggazprom	Yamburggazdobytcha

All of these subsidiaries are incorporated in the Russian Federation, with the exception of Gazprom Finance B.V. and ZGG, which are incorporated in the Netherlands and Germany, respectively. Gazprom Finance B.V. was established in February 1999 for the purpose of obtaining financing for the Group outside Russia. ZGG acts as the holding company for the Group's interests in a number of gas distribution, storage and transportation companies operating in Central Europe. Other companies are mainly involved in production, transportation and sale of gas.

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 30 September 2001, except as noted)**

**23 PRINCIPAL SUBSIDIARY UNDERTAKINGS (continued)**

The Group's interest in the equity capital of National Reserve Bank is 40.2% and in OAO Zapsibgazprom is 33.9%. However, as the principal shareholder, the Group continues to exercise effective control over the activities of the above companies and they are still considered as subsidiaries.

In August 1999, the Group acquired 46.0% of the share capital of Lebedinsky GOK (LGOK), a mining and dressing company operating in the Russian Federation. This acquisition increased the total share of the Group in the share capital of LGOK to 57.0%. The acquisition was recorded under the purchase accounting method. The acquisition was funded by cash. No goodwill resulted from this transaction.

LGOK contributed revenues of RR 3,088 and net income of RR 220 to the Group for the period from August 1999 to 31 December 1999.

The assets and liabilities arising from acquisition are as follows:

Cash and cash equivalents . . . . .	113
Receivables . . . . .	2,030
Inventories . . . . .	792
Other current assets . . . . .	342

**24 RELATED PARTIES**

Related parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions.

**Government**

The Government of the Russian Federation, the principal shareholder of the Group, owns approximately 38.37% of the issued shares of the Group. Governmental economic and social policies affect the Group's financial position, results of operations and cash flows.

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**24 RELATED PARTIES (continued)**

As a condition of privatisation in 1992, the Government imposed an obligation on the Group to provide an uninterrupted supply of gas to customers in the Russian Federation at government controlled prices.

**Directors' remuneration**

In 2000 the Company paid to members of the Board of Directors and Management Committee remuneration (salary and bonuses) for the total amount of approximately RR 64. The remuneration of members of the Board of Directors is subject to approval by the General shareholders meeting. Compensation paid to members of the Management Committee is determined by the terms of annual employment contracts.

**Other**

Included within other long-term assets are USD denominated receivables from EuRoPolGaz s.a. in the amount of RR 13,828, RR 16,803 and RR 17,734 at 31 December 2000, 1999 and 1998, respectively. Included within associated undertakings (see Note 11) is an interest-bearing loan receivable from EuRoPolGaz s.a., in the amount of RR 26,742, RR 26,139 and RR 15,556 at 31 December 2000, 1999 and 1998, respectively, issued by Gazprombank, a subsidiary of the Group.

Also included within associated undertakings (see Note 11) is an interest-bearing loan receivable from WINGAS GmbH, in the amount of RR 14,784, RR 18,496 and RR 16,892 at 31 December 2000, 1999 and 1998, respectively. In determining the interest rates for related party financing, the Group follows a pricing policy which requires positive interest margins to be earned on all lendings to related parties.

Included within accounts receivable (see Note 8) are accounts receivable from Group associates (excluding EuRoPolGaz s.a.) in the amount of RR 19,382, RR 21,216 and RR 17,703 as at 31 December 2000, 31 December 1999 and 31 December 1998 respectively.

During 2000, 1999 and 1998 the Group supplied gas to its associates in the amount of RR 41,621, RR 26,584 and RR 36,713, respectively.

Gas is sold to associates, except for that sold to ZAO Gazsnabtransit of Moldova, on the basis of long-term contracts, at market prices based on world oil and gas prices. Gas prices per thousand cubic meters ("tcm") for such sales ranged from USD 64 to USD 133 in 2000, from USD 50 to USD 84 in 1999 and from USD 63 to USD 87 in 1998. Gas is sold to ZAO Gazsnabtransit based on annual contracts with fixed prices. Prices of gas per tcm sold to Moldova amounted to USD 80, USD 60 and USD 58 in 2000, 1999 and 1998, respectively.

Amounts due from ZAO Gazsnabtransit at the reporting date are presented net of a bad debt provision of RR 13,537.

In addition, the Group purchased gas transportation services from certain of the associated undertakings, principally EuRoPolGaz s.a., which amounted to RR 7,002, RR 551 and RR 141 for 2000, 1999 and 1998, respectively. The cost of these services was determined based on prices of gas sold to these companies.

In the normal course of business, the Group enters into transactions with OAO Stroytransgaz for the construction of pipelines in the Russian Federation on the basis of the results of tenders. During 2000, 1999 and 1998 certain representatives of the Group Board of Directors and members of their families owned significant shareholdings in OAO Stroytransgaz.

OAO Stroytransgaz rendered constructions services for the Group in the amounts of RR 27,017, RR 22,817 and RR 4,562 for the years ended 31 December 2000, 1999 and 1998, respectively. As at 31 December 2000, 1999 and 1998, the Group had advances and receivables due from OAO

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)**

**24 RELATED PARTIES (continued)**

Stroytransgaz in the amounts of RR 1,935, RR 790 and RR 2,035, respectively. As at 31 December 2000, 1999 and 1998, the Group had accounts payable to OAO Stroytransgaz in respect of construction of RR 10,393, RR 5,642 and RR 706 respectively. As at 31 December 2000 and 1999, Gazprombank, the Group's principal banking subsidiary, had loans receivable from OAO Stroytransgaz of RR 1,171 and RR 220, respectively. Included within other long-term assets is a receivable due from OAO Stroytransgaz in connection with finance arrangements for construction for the Group undertaken by OAO Stroytransgaz in the amounts of RR 6,667, RR 9,802 and RR 5,771 at 31 December 2000, 1999 and 1998, respectively.

During 2000, 1999 and 1998 certain members of the families of certain members of the Board of Directors of the Company owned significant interests in OOO Interprokom.

OOO Interprokom acts as an agent for the Group in the acquisition of equipment and is remunerated for those services based on a fixed commission percentage. OOO Interprokom acted as an agent in the Group's acquisition of RR 5,263, RR 4,072 and RR 2,448 of equipment in the years ended 31 December 2000, 1999 and 1998, respectively. As at 31 December 2000 and 1998, the Group had advances and receivables due from OOO Interprokom in the amount of RR 2,793 and RR 733, respectively. As at 31 December 1999 the Group had payables to OOO Interprokom in the amount of RR 2,983. Commission paid to OOO Interprokom amounted to RR 70, RR 26 and RR 11 for the years ended 31 December 2000, 1999 and 1998, respectively.

Gazprombank, the Group's principal banking subsidiary, had outstanding import letters of credit issued on behalf of OOO Interprokom and sub-contractors of OOO Interprokom in the amount of RR 9,246, RR 5,333 and RR 4,029 at 31 December 2000, 1999 and 1998, respectively. These import letters of credit are issued to third party suppliers in connection with the purchase of equipment by OOO Interprokom on behalf of the Group.

During 2000, a member of the Council of Gazprombank acquired from that bank an 8.5% interest in AEB for RR 244. AEB is an associated undertaking of the Group at 31 December 2000 (see Note 11). A loss of RR 199 was recognized under IAS on the disposal. This loss was the result of a decrease in the Group's share in the net assets of AEB and translation differences recognised on the disposed shares.

**25 COMMITMENTS AND CONTINGENT LIABILITIES**

**Operating environment**

The operations and earnings of the Group continue, from time to time and in varying degrees, to be affected by political, legislative, fiscal and regulatory developments, including those related to environmental protection, in the Russian Federation. Due to the capital-intensive nature of the industry, the Group is also subject to physical risks of various kinds. The nature and frequency of these developments and events associated with these risks as well as their effect on future operations and earnings, are not predictable.

**Legal proceedings**

At 31 December 2000, RR 6,160 of assets of one of the Group's banking subsidiaries were the subject of a legal restraint in connection with a claim arising from derivative transactions with a foreign counterparty. At 31 December 2000, the Group had provided RR 3,842 against the claim (see Note 17).

The Group is a party to certain legal proceedings arising in the ordinary course of business. Additionally, the Group is subject to various environmental laws regarding handling, storage, and

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)**

**25 COMMITMENTS AND CONTINGENT LIABILITIES (continued)**

disposal of certain products and is subject to regulation by various governmental authorities. In the opinion of management, there are no current legal proceedings or other claims outstanding which could have a material adverse effect on the result of operations or financial position of the Group.

**Taxation**

Tax legislation in the Russian Federation is subject to varying interpretations and frequent changes. Further, the interpretation of tax legislation by tax authorities as applied to the transactions and activity of the Group may not coincide with that of management. As a result, transactions may be challenged by tax authorities and the Group may be assessed additional taxes, penalties and interest, which can be significant. The Group's tax records remain open to review by the tax and customs authorities with respect to tax liabilities for three years.

**Group changes**

The Group is continuing to undergo significant restructuring and reform initiatives and the future direction and effects of such reforms are the subject of political considerations. Potential reforms in tariff setting policies, settlements of outstanding debts by governmental entities, and other government initiatives could each have a significant, but undeterminable, effect on enterprises operating in the Group.

**Environmental matters**

The Group has operated in the gas exploration, extraction and transportation industry in the Russian Federation for many years. The normal activities of the Group have probably resulted in damage to the environment. The enforcement of environmental regulation in the Russian Federation is evolving and the enforcement posture of government authorities is continually being reconsidered. The Group periodically evaluates its obligations under environmental regulations. As obligations are determined, they are recognised immediately. Expenditures that extend the life of the related property or mitigate or prevent future environmental contamination are capitalised. Potential liabilities which might arise as a result of stricter enforcement of existing regulations, civil litigation or changes in legislation or regulation cannot be estimated, but could be material. In the current enforcement climate, under existing legislation, management believes that there are no significant liabilities for environmental damage, other than amounts that have been accrued in the consolidated financial statements.

**Social commitments**

The Group significantly contributes to the maintenance and upkeep of the local infrastructure and the welfare of its employees in the areas of its production, including contributions toward the construction, development and maintenance of housing, hospitals, transport services, recreation and other social needs in the geographical areas in which it operates.

**Financial guarantees**

The Group had outstanding issued guarantees to third parties in the amount of RR 56,979, RR 63,127 and RR 70,325 (including guarantees denominated in USD of USD 1,659 million, USD 1,700 million and USD 1,819 million) at 31 December 2000, 1999 and 1998, respectively.

Management believes that the Group will be required to settle certain of the obligations resulting from the guarantees. A provision of RR 9,938, RR 18,691 and RR 24,333 has been recorded within provisions for liabilities and charges in respect of the guarantees issued at 31 December 2000, 1999 and 1998, respectively. It is anticipated that the majority of the provision will be used during 2001.

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

		47,041	44,436	45,992

The guarantee issued on behalf of Interconnector (UK) Limited, in which the Group has a 10% interest, was provided to a third party financing company in connection with lease obligations of Interconnector (UK) Limited.

**Capital commitments**

In the normal course of business, the Group has entered into contracts for the purchase of property, plant and equipment. The Board has approved a capital expenditure budget for 2001 of RR 110,752, including RR 49,242 in respect of capital expenditures related to the Yamal project (that includes, in particular, construction of the Yamal-Europe pipeline).

**Supply commitments**

The Group has entered into long-term supply contracts for periods ranging from 5 to 20 years with various companies operating in Europe. The volumes and prices in these contracts are subject to change due to various contractually defined factors. At 31 December 2000, no loss is expected to result from these long-term commitments.

**26 FINANCIAL INSTRUMENTS**

**Financial risk management**

The Group exports gas to European countries and attracts substantial amount of foreign currency denominated long-term borrowings and is thus exposed to foreign exchange risk. Foreign currency denominated assets (see Note 8) and liabilities (see Note 15) together with long-term sales commitments to European countries (see Note 25) give rise to foreign exchange exposure.

The Group is exposed to interest rate risk through market value fluctuations of interest-bearing long-term borrowings (see Note 15).

The Group does not have formal hedging arrangements to mitigate interest rate risks or foreign exchange risks of the Group's operations. However, on a long-term perspective management believes that the Group is secured from financial risks; foreign currency denominated sales are secured by long-term contracts to supply gas to European countries and the revenue from such contracts is used to cover repayment of foreign currency denominated borrowings.

**Fair values**

The fair value of financial instruments is determined with reference to various market information and other valuation methods as considered appropriate. At 31 December 2000, 1999 and 1998, the

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
 (In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
 30 September 2001, except as noted)

**26 FINANCIAL INSTRUMENTS (continued)**

fair values of financial instruments other than long-term investments, trade receivables and trade payables are held by the Group did not materially differ from their carrying value. The historical cost carrying amount of receivables and payables subject to normal trade credit terms approximates their fair value. Management does not believe it is practicable to estimate the fair value of long-term investments, other trade receivables and trade payables. These financial instruments are not traded at financial market and an objective estimate of fair value is not, therefore, available. Information on the fair values of off-balance sheet derivative instruments is included below.

**Credit risks**

Financial instruments, which potentially subject the Group to concentrations of credit risk primarily consist of accounts receivables. Credit risks related to accounts receivable are systematically monitored and are considered when bad debt provisions are established. A significant portion of the Group's accounts receivable are from local gas distribution companies and energy companies. Although collection of these receivables could be influenced by governmental and economic factors affecting these industries, management believes there is no significant risk of losses to the Group, other than to the extent to which provision for doubtful accounts has already been made.

Cash is placed in financial institutions which are considered at time of deposit to have minimal risk of default.

**Off-balance sheet derivative instruments**

At 31 December 2000, the Group had outstanding contracts with banks operating in the Russian Federation and foreign banks, whereby it had agreed to buy or sell Roubles in exchange for another currency at an exchange rate agreed at the date of the contract. Management believes that it is possible that contracts between banks operating in the Russian Federation may become void or other remedial measures may eventually become available. In the event the outstanding contracts are declared void or settled at an amount different than the amount stipulated in the contract, the losses and gains would be adjusted and the difference would be recognised in the consolidated statement of operations in the period that the settlement occurs.

Foreign exchange off-balance sheet financial instruments are generally traded in an over-the-counter market with professional market counterparties on standardised contractual terms and conditions. At 31 December 2000 the Group had outstanding contracts to purchase gold at the market price at the date of maturity and to purchase securities under contractual prices. The Group expects to settle these deals in the normal course of business. There were no outstanding contracts for precious metals or securities at 31 December 1999 and 1998.

The nominal amounts for off-balance sheet financial instruments are not reflected in the consolidated balance sheet.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 30 September 2001, except as noted)

#### 26 FINANCIAL INSTRUMENTS (continued)

The following table provides an analysis of the principal or agreed amounts of contracts outstanding at the year-end and the associated losses or gains arising thereon. The table includes both the contracts for which the date of maturity has past due and no settlements had been completed as at 31 December 2000, and the contracts with maturity dates subsequent to 31 December 2000. The amounts included in the table are presented on a net basis after gross positions were grouped and netted off by counterparty.

	Domestic			Foreign		
	Principal or agreed amount	Loss	Gain	Principal or agreed amount	Loss	Gain
Deliverable forward currency .....	4,378	—	187	452	—	—
Deliverable forward gold deals .....	1,070	—	—	—	—	—
Deliverable forward securities deals .....	—	—	—	345	(1)	—
Index forward currency .....	58,753	(9,338)	4,362	—	—	—
Purchase of foreign currency option .....	7,546	—	1,798	—	—	—
Written foreign currency option .....	—	—	—	9,730	(3,842)	—
Total gross position .....	<u>71,747</u>	<u>(9,338)</u>	<u>6,347</u>	<u>10,527</u>	<u>(3,843)</u>	<u>—</u>

The economic conditions in the Russian Federation have had a significant adverse effect on the ability of many banks operating principally in the Russian Federation to fulfil their contractual obligations. Accordingly, management has not recorded the receivable and above noted gains based on the evaluation of the credit worthiness of the counterparties.

#### 27 POST BALANCE SHEET EVENTS

In January 2001 OAO Gazprom purchased an interest of 51% in the voting shares of AK Sibur. AK Sibur is a leading Russian company selling oil, gas and chemical products. The consideration of RR 2,514 million was settled in a combination of cash, promissory notes of a subsidiary of the Group and shares in certain Group entities. The process of determining the fair values of assets and liabilities acquired has not yet been finalised and therefore, it is not practical to disclose this information. AK Sibur will be consolidated in the financial statements for the year ended 31 December 2001.

In January 2001 the Board of Directors of OAO Gazprom initiated an investigation into the financial, property, commercial and operational relationships between OAO Gazprom and the Itera Group of companies. The accompanying notes to the consolidated financial reports do not reflect any results of this investigation, which is ongoing.

During 2000 OAO Gazprom signed agreements with a consortium of West European banks and with Japanese banks on obtaining loans to finance OAO Gazprom's interest in the Blue Stream project. The first tranche under these agreements of USD 117 was received in the second quarter of 2001. In addition, during the first quarter of 2001 a loan in the amount of Euro 250 million was provided by a consortium of West European banks.

**OAO GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**  
(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001, except as noted)

**28 ADJUSTMENTS FOR HYPERINFLATION**

In accordance with IAS 29 the consolidated financial statements as of and for the years ended 31 December 2000 and 1999 were originally prepared in terms of the measuring unit current at the balance sheet date. The restatement was calculated from the conversion factors derived from the Russian Federation Consumer Price Index, published by the Russian State Committee on Statistics ("Goscomstat"), and from indices obtained from other published sources for years prior to 1992.

The significant guidelines followed in restating the consolidated financial statements are:

- all amounts are stated in terms of the measuring unit current at 31 December 2000;
- monetary assets and liabilities are not restated because they are already expressed in terms of the monetary unit current at 31 December 2000;
- non-monetary assets and liabilities (items which are not expressed in terms of the monetary unit current at 31 December 2000) and shareholders' equity, including the share capital, are restated by applying the relevant conversion factors;
- all items in the consolidated statements of operations and of cash flows are restated by applying appropriate conversion factors;
- the effect of inflation on the Group's net monetary position is included in the consolidated statement of operations as a net monetary gain or loss; and
- comparative amounts for 1999 and 1998 are restated using the conversion factors 1.2 and 1.6 respectively in order to state them in terms of the measuring unit current at 31 December 2000.

All amounts originally stated in the consolidated financial statements in terms of the measuring unit current at the balance sheet date have been subsequently restated using the conversion factor of 1.1 in order to state them in terms of the monetary unit current at 30 September 2001. The restatement makes the consolidated financial statements more meaningful when compared to the interim consolidated financial statements for the nine months ended 30 September 2001.

The indices used to restate the consolidated financial statements, based on 1988 prices (1988=100) for the five years ended 31 December 2000 and period ended 30 September 2001, and the respective conversion factors used were:

	Index	Conversion Factor to 31 December 2000	Conversion Factor to 30 September 2001
31 December 1996 .....	594,110	3.4	3.8
31 December 1997 .....	659,403	3.0	3.5
31 December 1998 .....	1,216,400	1.6	1.9
31 December 1999 .....	1,661,481	1.2	1.4
31 December 2000 .....	1,995,937	1.0	1.1
30 September 2001 .....	2,276,965	—	1.0

The consolidated statement of operations includes net monetary gains of RR 46,647, RR 70,220 and RR 117,771 for the years ended 31 December 2000, 1999 and 1998, respectively, because on average the Group had net monetary liabilities in reporting years.

## REVIEW REPORT

To the Shareholders of OAO Gazprom

1. We have reviewed the accompanying consolidated interim condensed balance sheet of OAO Gazprom and its subsidiaries and associates (the "Group") as at 30 September 2001, and the related consolidated interim condensed statements of operations for the three and nine months then ended, and the related consolidated condensed statements of cash flows and of changes in shareholders' equity for the nine months then ended. This consolidated interim condensed financial information is the responsibility of the Group's management. Our responsibility is to issue a report on this consolidated interim condensed financial information based on our review.
2. We conducted our review in accordance with the International Standard on Auditing applicable to review engagements. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the consolidated interim condensed financial information is free of material misstatement. A review is limited primarily to inquiries of Group personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.
3. Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim condensed financial information has not been properly prepared in accordance with International Accounting Standard 34 "Interim Financial Reporting".
4. Without qualifying the results of our review, we draw your attention to Note 22 to the consolidated interim condensed financial information. The Government of the Russian Federation is the principal shareholder of the Group and governmental economic and social policies affect the Group's financial position, results of operations and cash flows.

Moscow, Russian Federation

# **ОАО ГАЗПРОМ**

## **INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001)**

### **1 NATURE OF OPERATIONS**

RAO Gazprom was established as a Russian joint stock company by Presidential Decree No. 1333 dated 5 November 1992. The Annual General Meeting of shareholders, held on 26 June 1998, approved a recommendation from the Board of Directors on revising the name of the Company in order to comply with the federal law on joint stock companies. Consequently, the Company became the open joint stock company Gazprom or OAO Gazprom.

OAO Gazprom and its subsidiaries and associates (the "Group") operate one of the largest gas pipeline systems in the world and are responsible for substantially all gas production and high pressure gas transportation in the Russian Federation. The Group is also a major exporter of gas to European countries.

The Group is directly involved in the following principal activities:

- Production—exploration and production of gas and other hydrocarbons;
- Refining—processing of gas condensate and other hydrocarbons, and sales of other hydrocarbon products;
- Transportation—transportation of gas; and
- Distribution—domestic and export sale of gas.

The gas business is subject to seasonal fluctuations. The volumes of gas shipped during the third quarter and the first nine months of the year represent, on average, approximately 16% and 71% of annual volumes shipped to customers, respectively.

### **2 ECONOMIC ENVIRONMENT IN THE RUSSIAN FEDERATION**

The economy of the Russian Federation continues to display characteristics of an emerging market. These characteristics include, but are not limited to, the existence of:

- a currency that is not freely convertible outside of the country;
- extensive currency controls;
- a low level of liquidity in the public and private debt and equity markets; and
- high inflation.

Transactions on the Russian stock exchange market are influenced by underdeveloped infrastructure, especially registration and settlement systems which are in the process of formation as well as regulation basis.

The prospects for future economic stability in the Russian Federation are largely dependent upon the effectiveness of economic measures undertaken by the government, together with legal, regulatory, and political developments.

### **3 BASIS OF PRESENTATION**

These financial statements are prepared in compliance with International Accounting Standard 34 "Interim Financial Reporting". The Group subsidiaries and associated undertakings maintain their statutory financial statements in accordance with the Regulation on Accounting and Reporting of the Russian Federation ("RAR") or the accounting regulations of the country in which the particular Group company is resident. The financial statements of the Group's subsidiaries and associated undertakings resident in the Russian Federation, which account for substantially all the assets and liabilities of the Group, are based on their statutory records, which are maintained under the historical cost convention

**ОАО ГАЗПРОМ**

**INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001)**

with adjustments and reclassifications recorded in the financial statements for the purpose of fair presentation in accordance with IAS. Similar adjustments are recorded in the financial statements in respect of Group companies not resident in the Russian Federation.

The preparation of consolidated financial statements in conformity with IAS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

The adjustments and reclassifications made to the statutory accounts for the purpose of IAS reporting include the restatement for changes in the general purchasing power of the Russian Rouble ("RR") in accordance with IAS 29, "Financial Reporting in Hyperinflationary Economies" ("IAS 29"). IAS 29 requires that financial statements prepared in the currency of a hyperinflationary economy be stated in terms of the measuring unit current at the balance sheet date. The restatement was calculated from the conversion factors derived from the Russian Federation Consumer Price Index, published by the Russian State Committee on Statistics ("Goscomstat"), and from indices obtained from other published sources for years prior to 1992.

The indices used to restate the consolidated financial statements, based on 1988 prices (1988=100) for the sixty-nine months ended 30 September 2001, and the respective conversion factors used are:

<u>Year</u>	<u>Index</u>	<u>Conversion Factor</u>
31 December 1996 .....	594,110	3.8
31 December 1997 .....	659,403	3.5
31 December 1998 .....	1,216,400	1.9
31 December 1999 .....	1,661,481	1.4
30 September 2000 .....	1,895,584	1.2
31 December 2000 .....	1,995,937	1.1
30 September 2001 .....	2,276,965	1.0

The significant guidelines followed in restating the consolidated financial statements are:

- all amounts are stated in terms of the measuring unit current at 30 September 2001;
- monetary assets and liabilities are not restated because they are already expressed in terms of the monetary unit current at 30 September 2001;
- non-monetary assets and liabilities (items which are not expressed in terms of the monetary unit current at 30 September 2001) and shareholders' equity, including the share capital, are restated by applying the relevant conversion factors;
- all items in the consolidated statements of operations and of cash flows are restated by applying appropriate conversion factors;
- the effect of inflation on the Group's net monetary position is included in the consolidated statement of operations as a net monetary gain or loss; and
- comparative amounts for the first nine months of 2000 and for the 2000 consolidated financial statements are restated using the conversion factors of 1.2 and 1.1, respectively, in order to state them in terms of the monetary unit current at 30 September 2001.

The consolidated statement of operations includes net monetary gains of RR 23,042 and RR 41,971 for the periods ended 30 September 2001 and 2000, respectively, because on average the Group had net monetary liabilities in both years.

## OAD GAZPROM

### INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 30 September 2001)

The US dollar to RR exchange rates were 29.39 and 28.16 at 30 September 2001 and 31 December 2000, respectively. The Euro to RR exchange rates were 26.86 and 26.14 at 30 September 2001 and 31 December 2000, respectively.

#### Reclassifications

Certain reclassifications have been made to prior year balances to conform to the current year presentation.

#### 4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies followed by the Group are consistent with those disclosed in the financial statements for the year ended 31 December 2000.

Changes in accounting policies related to the nine months ended 30 September 2001 are disclosed below.

#### Financial instruments

The Group adopted IAS 39 "Financial Instruments: Recognition and Measurement" at 1 January 2001. The financial effects of adopting IAS 39 are displayed in Note 16.

The effects of IAS 39 on investments and accounting for derivative financial instruments are disclosed in the accounting policies below.

#### Investments

At 1 January 2001 the Group adopted IAS 39 and classified its investments into the following categories: trading, held-to-maturity and available-for-sale.

Investments that are acquired principally for the purpose of generating a profit from short-term fluctuations in price are classified as trading investments and included in current assets. Investments with fixed maturity that the management has the intent and ability to hold to maturity are classified as held-to-maturity and are included in non-current assets; during the period the Group did not hold any investments in this category. Investments intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in fair value, are classified as available-for-sale. These are included in non-current assets unless management has the expressed intention of holding the investments for less than 12 months from the balance sheet date or unless they will need to be sold to raise operating capital, in which case they are included in current assets. Management determines the appropriate classification of its investments at the time of the purchase and re-evaluates such designation on a regular basis.

All purchases and sales of investments are recognized on the trade date, which is the date that the Group commits to purchase or sell the asset. Cost of purchase includes transaction costs. Trading and available-for-sale investments are subsequently re-measured to fair value. Realized and unrealised gains and losses arising from changes in the fair value of trading and available-for-sale investments are included in the income statement in the period in which they arise.

Prior to the adoption of IAS 39 the Group had valued its marketable equity securities at the lower of cost restated to the equivalent purchasing power of the Rouble at the reporting date on the basis of indices included in Note 3, or market value.

Long-term investments were reflected at cost restated to the equivalent purchasing power at the reporting date. Provision for impairment was only made where, in the opinion of the Group's management, there was a diminution in value, which was other than temporary. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount was charged or credited to the consolidated statement of operations.

**INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001)**

In the cash flow statement, purchases and sales of trading investments are presented within the section on operating activities as part of changes in working capital.

in the income statement, changes in fair values of trading investments are recorded in other operating expenses.

**Financial risk factors**

The Group's activities expose it to a variety of financial risks, including the effects of: changes in debt and equity market prices, foreign currency exchange rates and interest rates. The Group's overall risk management focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the financial performance of the Group.

- Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures primarily with respect to the US dollar and the Euro.

In an operational sense, the Group's exposure to foreign exchange risk is reduced by the existence of both costs (principally transit expenses) and income denominated in foreign currency. Similarly, the Group has significant receivables denominated in foreign currency, which in effect act as a partial economic hedge against similarly denominated liabilities, principally long-term borrowings.

The Group has investments in foreign entities (see Notes 11, 22), whose net assets are exposed to currency translation risk. Currency exposure of the net assets of the subsidiaries is reduced primarily through borrowings denominated in Euros.

- Interest rate risk

The Group borrows long-term debt principally at variable (LIBOR referenced) rates. Currently the Group does not operate a formal management programme focusing on the unpredictability of financial markets or seeking to minimize potential adverse effects on the financial performance of the Group. The Group has no significant interest-bearing assets.

- Credit risk

Financial instruments, which potentially subject the Group to concentrations of credit risk primarily consist of accounts receivable. Credit risks related to accounts receivable are systematically monitored and are considered when doubtful debt provisions are created. A significant portion of the Group's accounts receivable are from local gas distribution companies and energy companies. Although collection of these receivables could be influenced by governmental and other economic factors affecting these industries, management believes there is no significant risk of losses to the Group, other than to the extent to which provision for doubtful accounts has already been made.

The Group does not have formal hedging arrangements to mitigate interest rate risks or foreign exchange risks of the Group's operations.

The Group does not apply hedge accounting in preparation of financial statements.

**Fair value estimation**

The fair value of publicly traded derivatives and trading and available-for-sale securities is based on quoted market prices at the balance sheet date.

The fair value of unquoted financial instruments is estimated from the future cash flows expected from both the periodic income generated by the investments and from their disposal, discounted by a rate that reflects the risk inherent in the investment.

INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 30 September 2001)

Quoted market prices or dealer quotes for the specific or similar instruments are used for fair value estimation of long-term debt. Other techniques, such as estimated discounted value of future cash flows, are used to determine fair value for the remaining financial instruments.

The face values, less any estimated credit adjustments for financial assets and liabilities with a maturity of less than one year, are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate available to the Group for similar financial instruments.

**5 SEGMENT INFORMATION**

Management does not separately identify segments within the Group as it operates as a vertically integrated business with substantially all external sales generated by the gas distribution business. However, following the practice suggested by IAS 14, "Segment Reporting", Revised 1997 ("IAS 14") for vertically integrated businesses, information can be analysed based on the following business segments:

- Production—exploration and production of gas and other hydrocarbons;
- Refining—processing of gas condensate and other hydrocarbons, and sales of other hydrocarbon products;
- Transportation—transportation of gas;
- Distribution—domestic and export sale of gas; and
- Other—other activities, including banking.

**ОАО ГАЗПРОМ**

**INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001)**

**6 CASH AND CASH EQUIVALENTS**

Balances included within cash and cash equivalents in the consolidated balance sheet represent cash in hand and balances with banks. Included within other current assets are balances of cash and cash equivalents totalling RR 42,478 and RR 36,303 at 30 September 2001 and 31 December 2000, respectively, which are restricted as to withdrawal under the terms of certain borrowings. In addition, other current assets include balances of cash RR 5,628 and RR 5,693 at 30 September 2001 and 31 December 2000, respectively, which are restricted in subsidiary banks as to withdrawal under banking regulations.

**7 SHORT-TERM INVESTMENTS**

	<u>30 September 2001</u>	<u>31 December 2000</u>
Trading investments . . . . .	14,042	15,312
Available-for-sale investments . . . . .	10,500	12,039
	<u>24,542</u>	<u>27,351</u>

Trading investments comprise primarily marketable equity and debt securities held by the Group's banks with a view to generating short-term profits. These investments are traded in active markets and are valued at market at the close of business on reporting date by reference to stock exchange quoted bid prices.

Available-for-sale investments comprise primarily promissory notes of third parties held by the Group entities and maturing within twelve months of the balance sheet date or other debt and equity securities intended for sale within the same period.

**8 ACCOUNTS RECEIVABLE AND PREPAYMENTS**

	<u>30 September 2001</u>	<u>31 December 2000</u>
Trade receivables . . . . .	193,958	193,770
Prepayments and advances paid . . . . .	33,930	30,781
Other receivables . . . . .	48,481	56,216
	<u>276,369</u>	<u>280,767</u>

Accounts receivable and prepayments are presented net of a provision for impairment of RR 88,428 and RR 103,149 at 30 September 2001 and 31 December 2000, respectively.

**9 INVENTORIES**

Inventories are presented net of a provision for obsolescence of RR 13,582 and RR 13,767 at 30 September 2001 and 31 December 2000, respectively.

12. RESTRUCTURED TAX LIABILITIES

During 2001 the Group additionally negotiated the restructuring of its tax liabilities in accordance with current tax regulations.

The long-term portion of the restructured tax and penalties liability has the following maturity profile:

	<u>30 September 2001</u>	<u>31 December 2000</u>
Due for repayment: .....	54,263	27,314
Between one and two years .....	6,304	2,594
Between two and five years .....	14,623	7,770
After five years .....	<u>33,336</u>	<u>16,950</u>
Less: discount recorded upon restructured taxes .....	<u>(35,121)</u>	<u>(17,214)</u>
	19,142	10,100

The discount recorded upon restructured taxes is disclosed in the statements of operations as a part of net finance costs in the amount of RR 20,860 and RR 20,031 for three and nine months ended 30 September 2001 respectively.

13 LONG-TERM BORROWINGS

	<u>Currency</u>	<u>Due</u>	<u>30 September 2001</u>	<u>31 December 2000</u>
Long-term borrowings payable to:				
A French banking consortium .....	US dollar	2001-2005	77,559	91,111
A German banking consortium .....	US dollar	2001-2005	49,761	68,900

Hypo Vereins Bank .....	Euro	2001-2006	6,791	—
Fuji Bank .....	US dollar	2003-2010	4,047	—
Other long-term borrowings .....			<u>15,361</u>	<u>27,609</u>
Total long-term borrowings .....			237,548	286,992
Less: current portion of long-term borrowings .....			<u>(52,067)</u>	<u>(53,282)</u>
			<u>185,481</u>	<u>233,710</u>
			<u>185,481</u>	<u>233,710</u>
Due for repayment:			<u>185,481</u>	<u>233,710</u>
Between one and two years .....			58,733	60,705
Between two and five years .....			108,022	142,846
After five years .....			<u>18,726</u>	<u>30,159</u>
			<u>185,481</u>	<u>233,710</u>

The loan payable to an Italian banking consortium is a fixed rate loan and had a fair value of RR 24,434 and RR 32,344 at 30 September 2001 and 31 December 2000, respectively. All other loans are variable rate loans and the carrying amounts approximate fair value.

**INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001)**

The Group has no subordinated debt and no debt that may be converted into an equity interest in the Group.

Other long-term borrowings include RR 2,821 and RR 3,085 at 30 September 2001 and 31 December 2000, respectively, of coupon non-documentary bearer bonds issued by OAO Gazprom in 1999. The issue amounted to 3.0 million bonds, each with a nominal value of RR 1,000 and a due date of 15 April 2003. During the years 2000 and 2001, the Group repurchased 577,277 bonds. The total liability recorded in respect of the bonds excludes the unamortised discount related to future periods.

**14. PROFIT TAX**

The Group accrues profit tax at the rate of 35% and 43% on profits from non-banking and banking activities, correspondingly, computed in accordance with the Russian tax legislation. The tax rates applied were enacted on 1 January 2001.

In August 2001 Profit tax chapter of the Tax Code was enacted, which introduced a new profit tax rate of 24% for non-banking and banking activities. This rate will become effective starting from 1 January 2002.

Differences between the recognition criteria in Russian statutory taxation regulations and IAS give rise to certain temporary differences between the carrying value of certain assets and liabilities for financial reporting purposes and for profits tax purposes. The tax effect of the movement on these temporary differences is recorded at the rate of 24%, 35% or 43%, as appropriate.

The partial reversal of the deferred tax asset during the three month and nine month periods ended 30 September 2001 of RR 3,620 and RR 64,484, respectively, is mostly due to the impact of inflation eroding the tax-deductible value of the Group's property, plant and equipment.

	<u>30 September 2001</u>	<u>Differences recognition and reversals</u>	<u>Effect of changes in tax rules</u>	<u>31 December 2000</u>
<b>Tax effects of taxable temporary differences:</b>				
Accounts receivable .....	(11,649)	12,981	5,339	(29,969)

Provision for doubtful accounts .....	16,314	(2,339)	14,631	4,022
<b>Total net deferred tax asset (liability) .....</b>	<b>47,369</b>	<b>(64,881)</b>	<b>397</b>	<b>111,853</b>

**INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001)**

**15. SHAREHOLDERS' EQUITY**

**Share capital**

Share capital authorised, issued and paid in totals RR 271,214 at 30 September 2001 and 31 December 2000 and consists of 23.7 billion ordinary shares, each with a historical par value of RR5.

**Dividends**

During the first nine months of 2001, the Group accrued and paid final dividends for the year ended 31 December 2000 in the amount of RR 0.23 per share.

**Treasury shares**

At 30 September 2001 and 31 December 2000, subsidiaries of OAO Gazprom held 2,729 million and 2,684 million, respectively, of the ordinary shares of OAO Gazprom. The Group controls the voting rights for those shares.

## ОАО ГАЗПРОМ

### INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001)

#### 19 EARNINGS PER SHARE

Earnings per share has been calculated by dividing the net profit for the three and nine month periods by the weighted average number of shares outstanding during each period.

There were 20.9 billion weighted average shares outstanding for the three and nine months ended 30 September 2001 and 21.1 billion weighted average shares outstanding for the three and nine months ended 30 September 2000.

#### 20 SUBSIDIARY UNDERTAKINGS

Principal subsidiaries of the Group remain unchanged since 31 December 2000 except for the changes disclosed below.

##### Acquisition of AK SIBUR

In January 2001 the Group acquired 51% of the voting shares of AK SIBUR. AK SIBUR is a leading Russian company primarily engaged in gas and chemical products trading on domestic market as well as light hydrocarbon processing.

During the three month and nine month periods ended 30 September 2001 the acquired business contributed to the Group revenues of RR 10,389 and RR 36,001 and operating profit of RR 9 and RR 2,218, respectively.

Details of net assets acquired and goodwill are as follows:

Purchase consideration:

Cash paid	720
Promissory notes of Group companies	1,138
Shares in other investments	<u>657</u>
Total purchase consideration	2,515
Fair value of identifiable net assets acquired	<u>(943)</u>
Goodwill	<u>1,572</u>

Other than for short-term investments, the fair value of the net assets approximated the book value of the net assets acquired. Goodwill is amortised over ten years and is included within other long-term assets.

The net cash flow arising from the acquisition is as follows:

Total purchase consideration	<u>2,515</u>
Less:	
Cash and cash equivalents acquired	(1,003)
Promissory notes of the Group companies	(1,138)
Shares in other investments	<u>(657)</u>
Net cash inflow on acquisition	<u>283</u>

##### Lebedinsky GOK

In January 2001 the Group exchanged its 57% interest in Lebedinsky GOK and 17% interest in Oskolsky EMK for a 48% interest in ZAO Gazmetall. ZAO Gazmetall is a metallurgical holding company with controlling interests in Lebedinsky GOK and Oskolsky EMK. As Gazprom intends to sell its shares of ZAO Gazmetall, the investment has been classified as an available-for-sale investment.

## **OAO GAZPROM**

### **INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001)**

#### **20 SUBSIDIARY UNDERTAKINGS (continued)**

During the three months ended 30 September 2001 management revalued the investment in ZAO Gazmetall to its current market value of RR 2,000, recognising the net effect of revaluation in gains and losses on available-for-sale securities in the Statement of Operations.

#### **21 COMMITMENTS AND CONTINGENCIES**

##### **Financial guarantees**

The Group had outstanding guarantees issued to third parties in the amount of RR 51,256 and RR 56,983 (including guarantees denominated in USD of USD 1,726 million and USD 1,659 million) at 30 September 2001 and 31 December 2000, respectively.

In July 2001 ZAO Media-Most defaulted on a payment obligation of RR 7,711 under a loan agreement. This balance was settled by the Group in accordance with a loan guarantee agreement. The terms of the guarantee agreement provided for collateral in respect of the guarantee in the form of a 19% interest in NTV and a 25% interest in a number of other ZAO Media-Most operating companies.

At 30 September 2001 the Group held a 65% interest in NTV and 25% plus one share interest in a number of ZAO Media-Most operating companies. These stakes were included in short-term available-for-sale investments. Further 25% interests in the other ZAO Media-Most operating companies were held in collateral till November 2001 and then were also transferred into the Group's ownership.

In accordance with management assessments a provision of RR nil and RR 9,939 has been recorded within provisions for liabilities and charges in respect of the guarantees still in issue at 30 September 2001 and 31 December 2000, respectively.

##### **Blue Stream Pipeline Company B.V.**

In April 2000, credit facilities were provided to BSPC, an associated undertaking (see Note 11), by a group of Italian and Japanese banks for the amount of RR 60,338 (USD 2,053 million). At 30 September 2001 BSPC had used RR 23,747 (USD 808 million) of the credit facility of which RR 11,697 (USD 398 million) was guaranteed by the Group.

#### **22 RELATED PARTIES**

Related parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions.

##### **Government**

The Government of the Russian Federation, the principal shareholder of the Group, owns approximately 38.37% of the issued shares of the Group. Governmental economic and social policies affect the Group's financial position, results of operations and cash flows.

As a condition of privatisation in 1992, the Government imposed an obligation on the Group to provide an uninterrupted supply of gas to customers in the Russian Federation at government controlled prices.

##### **Associated undertakings**

Included within other long-term assets are USD denominated receivables from EuRoPolGaz s.a. in the amount of RR 11,397 and RR 13,830 at 30 September 2001 and 31 December 2000, respectively. Included within associated undertakings (see Note 11) is a loan receivable from

## OAD GAZPROM

### INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001)

#### 22 RELATED PARTIES (continued)

EuRoPolGaz s.a., in the amount of RR 25,913 and RR 26,744 at 30 September 2001 and 31 December 2000, respectively, issued by Gazprombank, a subsidiary of the Group, at an interest rate of LIBOR + 2.6 %.

Also included within associated undertakings (see Note 11) is a loan receivable from WINGAS GmbH, in the amount of RR 12,095 and RR 14,785 at 30 September 2001 and 31 December 2000, respectively. The interest rates vary for different loan tranches. At 30 September 2001 the aggregate effective interest rate for the loan receivable from WINGAS GmbH was LIBOR + 2.17%.

Included within accounts receivable (see Note 8) are accounts receivable from Group associates (excluding EuRoPolGaz s.a.) in the amount of RR 13,934 and RR 19,382 as at 30 September 2001 and 31 December 2000, respectively.

During periods ended 30 September 2001 and 2000 the Group recorded sales of gas to its associates in the amount of RR 58,233 and RR 51,111, respectively.

Gas is sold to associates, except for that sold to ZAO Moldovagaz, on the basis of long-term contracts, at market prices based on world oil and gas prices. Gas prices per thousand cubic meters for such sales ranged from USD67 to USD144 and from USD64 to USD129 in the nine months ended 30 September 2001 and 2000, respectively. Gas is sold to ZAO Moldovagaz based on annual contracts with fixed prices. Prices of gas per thousand cubic meters sold to Moldova amounted to USD80 in the nine months ended 30 September 2001 and 2000.

In addition, the Group purchased gas transportation services from certain of the associated undertakings, principally EuRoPolGaz s.a., which amounted to RR 6,276 and RR 5,338 for the nine months ended 30 September 2001 and 2000, respectively. The cost of these services was determined based on prices of gas sold to these companies.

#### Other

In the normal course of business, the Group enters into transactions with OAO Stroytransgaz for the construction of pipelines in the Russian Federation on the basis of the results of tenders. During the nine months ended 30 September 2001 and year ended 31 December 2000 certain representatives of the Group Board of Directors and members of their families owned significant shareholdings in OAO Stroytransgaz.

OAO Stroytransgaz rendered construction services for the Group in the amounts of RR 27,963 and RR 27,490 for the nine months ended 30 September 2001 and 2000, respectively. As at 30 September 2001 and 31 December 2000, the Group had advances and receivables due from OAO Stroytransgaz in the amounts of RR 3,989 and RR 1,935, respectively. As at 30 September 2001 and 31 December 2000, the Group had accounts payable to OAO Stroytransgaz in respect of construction of RR 12,286 and RR 10,393, respectively. As at 30 September 2001 and 31 December 2000, Gazprombank, the Group's principal banking subsidiary, had loans receivable from OAO Stroytransgaz of RR 829 and RR 1,170, respectively. Included within other long-term assets is a receivable due from OAO Stroytransgaz in connection with finance arrangements for construction for the Group undertaken by OAO Stroytransgaz in the amount of RR 3,518 and RR 6,667 at 30 September 2001 and 31 December 2000.

During the nine months ended 30 September 2001 and year ended 31 December 2000 certain members of the families of certain members of the Board of Directors of the Company owned significant interests in OOO Interprokom.

**INTERIM CONDENSED NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
30 September 2001)**

**22 RELATED PARTIES (continued)**

ООО Interprokom acts as an agent for the Group in the acquisition of equipment and is remunerated for those services based on a fixed commission percentage. ООО Interprokom acted as an agent in the Group's acquisition of RR 7,342 and RR 4,404 of equipment in the nine months ended 30 September 2001 and 2000, respectively. As at 30 September 2001 and 31 December 2000, the Group had advances and receivables due from ООО Interprokom in the amount of RR 889 and RR 2,794, respectively. Commission paid to ООО Interprokom amounted to RR 62 and RR 52 for the nine months ended 30 September 2001 and 2000, respectively.

Gazprombank, the Group's principal banking subsidiary, had outstanding import letters of credit issued on behalf of ООО Interprokom and sub-contractors of ООО Interprokom in the amount of RR 8,320 and RR 9,246 at 30 September 2001 and 31 December 2000 and, respectively. These import letters of credit are issued to third party suppliers in connection with the purchase of equipment by ООО Interprokom on behalf of the Group.

**23 POST BALANCE SHEET EVENTS**

During the fourth quarter of 2001 the Group signed a number of long-term loan agreements with a consortium of Hungarian banks for USD 130 million, with a consortium led by the Moscow Narodny Bank Ltd. for USD 200 million, with Deutsche Bank for USD 100 million and with Vneshtorgbank for USD 670 million. Terms of the above agreements vary from one to five years.

In December 2001 a subsidiary of Gazprombank issued eurobonds for the total amount of Euro 200 million under Gazprombank's guarantees.

## Open Joint Stock Company Gazprom

U.S.\$●,000,000

●%

### Loan Participation Notes due ●

issued by, but without recourse to, Salomon Brothers AG  
for the purpose of financing a loan to

Open Joint Stock Company Gazprom

Issue Price: ●%

RECEIVED  
 2005 APR -5 PM 2:20  
 OFFICE OF THE  
 CORPORATE SECRETARY

Salomon Brothers AG (the "Bank") is issuing an aggregate principal amount of U.S.\$●,000,000 ●% Loan Participation Notes due ● (the "Notes"). The sole purpose of issuing the Notes is to finance a ●-year loan (the "Loan") to Open Joint Stock Company Gazprom (the "Borrower" or "Gazprom") pursuant to a loan agreement dated ● 2002 (the "Loan Agreement") among the Bank and the Borrower. The Bank will charge, by way of first fixed charge as security for its payment obligations in respect of the Notes, its rights and interests as lender under the Loan Agreement to The Bank of New York as trustee (the "Trustee"), for the benefit of the holders of the Notes (the "Noteholders") and will assign its administrative rights under the Loan Agreement to the Trustee (the "Loan Administration Assignment").

In each case where amounts of principal, interest and additional amounts (if any) are stated to be payable in respect of the Notes, the obligation of the Bank to make any such payment shall constitute an obligation only to account to the Noteholders, on each date upon which such amounts of principal, interest and additional amounts (if any) are due in respect of the Notes, for an amount equivalent to all principal, interest and additional amounts (if any) actually received by or for the account of the Bank pursuant to the Loan Agreement. The Bank will have no other financial obligation under the Notes. Noteholders will be deemed to have accepted and agreed that they will be relying solely and exclusively on the credit and financial standing of the Borrower in respect of the financial servicing of the Notes.

Interest on the Notes will be payable semi-annually in arrear on ● and ● in each year commencing on ● 2002 as described under "Terms and Conditions of the Notes — Interest". The Notes will bear interest of ●% per annum.

The Issue Price of the Notes is ●% of their principal amount.

Except as set forth herein (see "Taxation"), payments in respect of the Notes will be made without any deduction or withholding for or on account of taxes of the Russian Federation or the Federal Republic of Germany. The Loan may be prepaid at its principal amount, together with accrued interest, at the option of the Borrower upon the Borrower or the Bank being required to deduct or withhold any such Russian or German taxes from payments to be made by them in respect of the Notes or pursuant to the Loan Agreement, or following enforcement of the security created in the Trust Deed and upon the Borrower or the Trustee being required to deduct or withhold any taxes of the Russian Federation or the jurisdiction in which the Trustee is then resident. The Loan may also be prepaid if it becomes unlawful for the Loan or the Notes to remain outstanding, as set out in the Loan Agreement, and thereupon (subject to the receipt of the relevant funds from the Borrower) the principal amount of all outstanding Notes will be prepaid by the Bank, together with accrued interest.

AN INVESTMENT IN THE NOTES INVOLVES A HIGH DEGREE OF RISK. SEE "INVESTMENT CONSIDERATIONS".

Application has been made to list the Notes on the Luxembourg Stock Exchange.

**THE NOTES HAVE NOT BEEN NOR WILL BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE "SECURITIES ACT"), OR WITH ANY SECURITIES REGULATORY AUTHORITY OF ANY STATE OR OTHER JURISDICTION OF THE UNITED STATES AND ACCORDINGLY MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, U.S. PERSONS EXCEPT IN CERTAIN TRANSACTIONS EXEMPT FROM OR NOT SUBJECT TO THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT.**

The Notes will be represented by a global Note (the "Global Note"), without interest coupons, which will be deposited with a common depository for Euroclear Bank S.A./N.V., as operator of the Euroclear System ("Euroclear") and Clearstream Banking, société anonyme ("Clearstream, Luxembourg"), on or about the Closing Date, ● 2002. Ownership interests in the Global Note will be shown on, and transfers thereof will be effected only through, records maintained by Euroclear and Clearstream Luxembourg and their respective participants. Notes in definitive form will be issued only in limited circumstances.

Joint Lead Managers

Credit Suisse First Boston

Schroder Salomon Smith Barney

The date of this Preliminary Offering Circular is 25 September 2002

Blue Stream Project. Offshore Pipeline Vessel

Gazprom, having made all reasonable enquiries, confirms that (i) this Offering Circular contains all information with respect to Gazprom, Gazprom and its subsidiaries taken as a whole (the "Group"), the Loan Agreement and the Notes that is material in the context of the issue and offering of the Notes; (ii) the statements contained in the Offering Circular relating to Gazprom and the Group are in every material particular true and accurate and not misleading; (iii) the opinions, expectations and intentions expressed in this Offering Circular with regard to Gazprom and the Group are honestly held, have been reached after considering all relevant circumstances and are based on reasonable assumptions; (iv) there are no other facts in relation to Gazprom, the Group, the Loan Agreement or the Notes the omission of which would, in the context of the issue and offering of the Notes, make any statement in this Offering Circular misleading in any material respect; and (v) all reasonable enquiries have been made by Gazprom to ascertain such facts and to verify the accuracy of all such information and statements. Gazprom accepts responsibility accordingly. No representation or warranty, express or implied, is made by Salomon Brothers International Limited ("SBIL"), Credit Suisse First Boston (Europe) Limited, the Bank or any of their affiliates or any person acting on their behalf or any of the other Managers (as defined in "Subscription and Sale" below) as to the accuracy or completeness of the information contained in this document, and none of such persons has attempted to verify such information. SBIL, however, accepts responsibility for all information with respect to the Bank.

Information contained under the headings "Overview of the Russian Federation" and "Overview of the Russian Gas Industry and its Regulation" includes extracts from information and data publicly released by official and other sources and Gazprom accepts responsibility for accurately reproducing such information and data but accepts no further responsibility in respect of such information and data.

This Offering Circular contains certain forward-looking statements. Such statements reflect significant assumptions and subjective judgments by Gazprom's management and those assumptions and judgments may or may not prove to be correct. There can be no assurance that the future events anticipated by Gazprom's management will occur.

This Offering Circular does not constitute an offer of, or an invitation by or on behalf of the Bank, Gazprom or the Managers to subscribe or purchase, any Notes. The distribution of this Offering Circular and the offering of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Offering Circular comes are required by Gazprom, the Bank and the Managers to inform themselves about and to observe any such restrictions. None of the Bank, Gazprom or the Managers has authorised any offer of Notes to the public in the United Kingdom within the meaning of the Public Offers of Securities Regulations 1995 (the "Regulations"). Notes may not lawfully be offered or sold to persons in the United Kingdom except in circumstances which do not result in an offer to the public in the United Kingdom within the meaning of the Regulations or otherwise in compliance with all applicable provisions of the Regulations. For a description of certain further restrictions on offers and sales of Notes and distribution of this Offering Circular, see "Subscription and Sale" below.

No person is authorised to provide any information or to make any representation not contained in this Offering Circular and any information or representation not so contained must not be relied upon as having been authorised by or on behalf of the Gazprom, the Bank, the Trustee, or the Managers. The delivery of this document at any time does not imply that the information contained in it is correct as at any time subsequent to its date.

In this Offering Circular, references to "Roubles", "RUR" and "RR" are to the lawful currency for the time being of Russia, references to "U.S. dollars", "dollars", "U.S.\$" and "\$" are to the lawful currency for the time being of the United States of America, references to "DM" are to the former currency of the Federal Republic of Germany and references to "euro" refer to the currency introduced at the start of the third stage of European economic and monetary union. This Offering Circular contains conversions of certain amounts into dollars at specified rates solely for the convenience of the reader. No representation is made that the Rouble or dollar amounts referred to herein could have been or could be converted into Roubles or dollars, as the case may be, at these rates, at any particular rate or at all. Any discrepancies in the tables herein between the amounts listed and the total thereof are due to rounding.

Save where indicated to the contrary, all statements with respect to A, B and C1, natural gas, gas condensate and oil reserves are in accordance with figures prepared on the basis of Russian

classifications and methodologies, which differ in certain respects from international and U.S. classifications and methodologies — see Appendix B Part 1 — “Overview of the Russian Gas Industry and its Regulation”.

**IN CONNECTION WITH THIS ISSUE, SALOMON BROTHERS INTERNATIONAL LIMITED MAY OVER-ALLOT OR EFFECT TRANSACTIONS WITH A VIEW TO SUPPORTING THE MARKET PRICE OF THE NOTES AT A LEVEL HIGHER THAN THAT WHICH MIGHT OTHERWISE PREVAIL FOR A LIMITED PERIOD AFTER THE ISSUE DATE. HOWEVER, THERE MAY BE NO OBLIGATION ON SALOMON BROTHERS INTERNATIONAL LIMITED TO DO THIS. SUCH STABILISING, IF COMMENCED, MAY BE DISCONTINUED AT ANY TIME, AND MUST BE BROUGHT TO AN END AFTER A LIMITED PERIOD.**

### **EXCHANGE RATES AND EXCHANGE CONTROLS**

The value of the Rouble depreciated significantly against the dollar from 1991 through the first half of 1995, but stabilised, in part due to new policies adopted by the Central Bank of Russia, until August 1998 when the Rouble depreciated significantly against the dollar following the Russian Government's decision to temporarily stop supporting the Rouble. See “Investment Considerations – Investment Considerations Related to Russia – Exchange Rates, Exchange Controls and Repatriation Restrictions”. The Rouble/dollar exchange rate, published by the Central Bank of Russia and expressed as a number of Roubles per U.S.\$1.00, was RUR 27.00, RUR 28.16 and RUR 30.14 at year-end 1999, 2000 and 2001, respectively. The rate on 24 September 2002 was RUR 31.63 per U.S.\$1.00.

### **ENFORCEABILITY OF CIVIL LIABILITIES IN RUSSIA**

Gazprom is an open joint-stock company organised under the laws of the Russian Federation. The majority of the directors and executive officers of Gazprom reside in Russia. As a result, it may not be possible for investors to effect service of process outside Russia upon Gazprom or such persons. Moreover, substantially all the assets of Gazprom and of such persons are located in Russia, except for certain trading subsidiaries with assets located abroad, and it may not be possible for investors to enforce in Russia judgments rendered against them. Judgments rendered by a court in any jurisdiction outside Russia will be recognised by courts in Russia only if an international treaty providing for the recognition and enforcement of judgments in civil cases exists between the Russian Federation and the country where the judgment is rendered. No such treaty exists between the Russian Federation and the United Kingdom.

## INVESTMENT CONSIDERATIONS

***An investment in the Notes involves a high degree of risk. Prospective investors should therefore consider carefully the following factors in evaluating the Notes prior to making any investment decision. Each of the factors highlighted below could have a material adverse effect on Gazprom's business, operations and financial condition which, in turn, could have a material adverse effect on Gazprom's ability to service its payment obligations under the Loan.***

### **Investment Considerations Relating to Gazprom**

#### ***Corporate Governance, Disclosure and Accounting Standards***

The corporate affairs of Gazprom are governed by its Charter, internal regulations adopted pursuant to its Charter and by laws governing companies incorporated in Russia. The rights of shareholders and the responsibilities of members of the Board of Directors and the Management Committee under Russian law are different from, and may be subject to certain requirements not generally applicable to, corporations organised in the United States, the United Kingdom or other jurisdictions.

A principal objective of the securities laws of the United States, the United Kingdom, Russia and other countries is to promote full and fair disclosure of all material corporate information to the public. Gazprom is subject to Russian law which requires, *inter alia*, Gazprom to publish annual financial statements in accordance with Russian Accounting Regulations, together with an independent auditor's report. Nonetheless, there is less publicly available information about Gazprom than there is available for comparable listed companies in, for example, the United States or the United Kingdom.

Recently, however, there have been certain improvements in corporate governance and information disclosure standards in Russia, as the Russian regulatory authorities have paid increasingly more attention to such issues. It is generally expected that all Russian companies will be required to prepare their financial statements in accordance with new standards, based on IAS, with effect from 2004. In addition, since 1997, the Russian Ministry of Finance has required all joint stock companies whose shares are publicly traded to produce annual financial statements prepared in accordance with IAS in addition to financial statements prepared in accordance with Russian accounting standards. Gazprom has published financial statements in accordance with IAS since 1996.

In accordance with Russian legislation, Gazprom is obliged to file quarterly reports on its activities to the Federal Commission on the Securities Markets within 30 days after the end of the relevant quarter. Such reports include certain information on the company, its management, subsidiaries, affiliates, selected financial and business information (such as events of litigation, quarterly accounts prepared in accordance with the Russian accounting standards etc.). Gazprom has regularly published such reports since the fourth quarter of 1998 and generally complies with the reporting requirements, although in the past Gazprom did not always meet the deadlines for filing such reports for technical reasons and was fined a nominal amount.

In addition, Russian law requires certain disclosure by open joint stock companies, such as the disclosure of annual reports, annual accounts (audited and approved by shareholders), any material facts affecting the financial condition and the business of the relevant company, certain board of directors' resolutions and lists of affiliated companies.

The Russian Federal Securities Market Commission has recently published the corporate governance code and is recommending it be adopted by all Russian public companies.

In light of the current focus on corporate governance issues, Gazprom has reviewed its own position on such issues and has established a special committee headed by a First Deputy Chairman of the Management Committee to develop a corporate governance code for Gazprom. Such code was adopted by the Annual Shareholders Meeting of Gazprom in June 2002. The Board of Directors is also considering new suggested procedures to ensure the proper co-ordination of transactions and to increase the level of control by the Board of Directors over the work of the Management Committee.

In May 2001, the Board of Directors adopted a code of practice entitled "Procedure for approving transactions involving stocks, shares or participation shares owned by Gazprom, its subsidiaries or affiliated companies" (the "Procedure"). The principal aim of the Procedure is to increase the level of control exercised by the Board of Directors over the acquisition, disposal, charging or transfer by Gazprom or any member of the Group of any stocks, shares or participation shares. The Procedure provides that decisions in respect of such transactions shall be undertaken only after an appropriate commercial appraisal and with the approval of the Board of Directors.

In early 2001, the Board of Directors appointed PricewaterhouseCoopers to examine certain aspects of Gazprom's financial and operating activities and, in particular, its operating relationship with Itera, a U.S. registered company that operates as an independent supplier of gas in Russia and the FSU. PricewaterhouseCoopers presented their report (the "Report") to a meeting of the Board of Directors in July 2001.

The Board of Directors took the decision that the Report will remain confidential and that it will not publish or disclose the contents of the Report. The Board of Directors considered the Report and have found that certain of its recommendations have already been addressed by the adoption of the Procedure. The Board of Directors has directed the Management Committee to draw up plans for the implementation of those recommendations made in the Report that are not addressed by the Procedure.

### ***Regulatory Risks***

Gazprom is, and is likely to remain for the foreseeable future, a regulated monopoly. In Russia, natural gas prices are subject to extensive control by governmental authorities and are generally lower than the prices charged to Western European off-takers. Domestic gas sale prices for households are currently less than natural gas prices applicable to industrial end users. In the future, natural gas prices for all customers are likely to be gradually increased. Gazprom believes that the State regulation of natural gas prices for domestic end-users will be abandoned in the future in favour of free market prices. State regulation is to be maintained for natural gas transportation tariffs only.

No assurance can be given, that the regulation of natural gas prices will be relaxed, that the Government will not reimpose price controls or that consumers will pay or will be able to pay increased natural gas prices. If the Government decides to keep natural gas prices at artificially low levels, thereby effectively forcing Gazprom to subsidise the rest of the Russian economy, there is a risk that Gazprom will not generate sufficient cash flows to proceed with planned investments in certain natural gas fields (for instance the Yamal peninsula reserves) or to continue to develop export pipelines.

### ***Subsoil Licensing***

There have been press reports that the Government is considering proposals to replace the current subsoil licensing regime with a new system based on concession agreements between the subsoil user and the State. It is not clear yet whether these proposals will be implemented and what effect this will have on Gazprom's business. However, there can be no assurance that such changes will not have an adverse effect on Gazprom's business.

### ***Taxation***

Gazprom is subject to a broad range of taxes imposed at federal, regional and local levels and is one of the largest sources of tax revenue to the federal authorities, as well as to the regional and local authorities in those regions and localities in which it operates. The combination of political pressure on the federal, regional and local authorities to address social and economic issues (and in particular the non-payment of salaries and pensions) and the difficulties associated with collecting taxes from companies and enterprises in financial difficulties, all increase the risk that the Government, as well as regional and local governments, will seek to mitigate these problems by increasing Gazprom's already substantial tax burden.

### ***Relationship with the Government***

The Government has exercised, and can be expected to continue to exercise, a significant influence over Gazprom's operations.

The Russian Federation currently owns 38.37% of Gazprom's Shares in issue. The Government, through its control of 38.37% of the Gazprom Shares and its representatives on the Board of Directors, has the ability to influence the policies and operations of Gazprom. The Government has previously required Russian companies, including Gazprom, to take actions — such as the undertaking of projects and the supply of goods and services to customers — that may not be in the best interests of such companies or their shareholders. For example, the Government sets the prices for domestic gas delivered by Gazprom at a low level and requires Gazprom to supply natural gas to certain customers notwithstanding their inability to pay for natural gas supplied.

Gazprom's exploration and production licences are granted and are subject to renewal or extension by federal and local authorities. These licences are also subject to revocation in the event that Gazprom fails to comply with the terms and conditions of such licences.

In order to achieve consistency in the regulation of natural gas supplies throughout Russia, the federal authorities have assumed responsibility for the development and implementation of state policy with respect to the supply of natural gas and the industrial and environmental safety of such supplies in Russia. However, regional and local authorities have a significant degree of autonomy in exercising their rights over the use of land and natural resources (including natural gas). Accordingly, the relationship between the relevant federal, regional and local authorities as well as between Gazprom and such authorities can have a significant impact on the conditions under which companies like Gazprom can operate in any particular region.

### ***Reorganisation***

The risk of a reorganisation of Gazprom into several smaller and less powerful production and transportation companies has been and continues to be the subject of much domestic and international press speculation. There have at times been calls from certain Russian politicians and Government officials for Gazprom's natural gas operations to be divided into a number of companies, or for particular functions to be re-allocated to other entities. Although the adoption of Federal Law "On Gas Supply in the Russian Federation" No. 69-FZ dated 31 March 1999 (the "Gas Supply Law") mitigates the risk of reorganisation and both the Government and Gazprom have made clarifying statements about any potential future restructuring of Gazprom, Gazprom is not fully protected against the risks of a Government-led reorganisation.

### ***Gas Sales***

Gazprom sells a substantial portion of its natural gas in Europe, which is Gazprom's primary source of foreign currency revenues and stable cash flows. For more than 30 years, Gazprom and its predecessors have sold natural gas to Western Europe, generally pursuant to long-term contracts with payment linked to world prices for oil products. Such prices can fluctuate and are determined by supply and demand and other factors over which Gazprom has no control. Should world oil product prices deteriorate substantially in the future, European natural gas prices are also likely to decline, resulting in a reduction in export revenues for Gazprom. Should natural gas export prices remain low for a prolonged period, Gazprom is likely to experience a cash flow deficit, and will have to either borrow extra funds to proceed with its current investment programmes or reduce its investment commitments.

The European Commission has recently expressed a desire to see a move from long-term contracts in favour of short-term contracts. Such an alteration to the basis on which Gazprom conducts its business could further increase Gazprom's exposure to currency and gas and oil price fluctuations as well as potentially limit Gazprom's ability to support long term investment plans. Gazprom is currently in discussions with the EU in this regard, but there can be no assurance that the outcome of these discussions will be to Gazprom's benefit.

### ***Delayed and Non-Collectable Payments by Customers; Dependence on Non-Cash Settlement***

Gazprom's cash flow may be affected by the limited ability of its customers in Russia and certain countries in the former Soviet Union (the "FSU") to pay for natural gas. There is no assurance that money owed to Gazprom by its customers in Russia and the FSU will, in the foreseeable future, be paid in full. As is the case with many Russian companies, Gazprom has had to accept various forms of non-cash settlement, including negotiable promissory notes, bonds, equity interests in natural gas companies and goods and services as payment for supplies to customers in Russia and the FSU. Non-cash settlement of transactions has had in the past, and may continue to have in the future, an adverse effect on the ability of Gazprom to fund operational or capital expenditures required to be made in cash and to make tax payments when due.

### ***Competition from Alternative Fuels and Oversupply of Gas in Europe***

Gazprom faces varying degrees of competition in each of its major markets from providers of alternative fuels, such as oil and coal. No assurance can be given that Gazprom will be able to compete effectively with such providers of alternative fuels.

Gazprom is also subject to competition in Europe from other natural gas suppliers which could affect the prices and volumes of Gazprom's sales to Europe. One of the major risks faced by Gazprom relates to the balance of supply and demand in the European natural gas markets. The progressive liberalisation of the European natural gas market itself does not represent a major threat to Gazprom, unless it leads to an oversupply of natural gas to the European markets. If oversupply of natural gas becomes a reality, natural gas purchasers will be able to negotiate lower prices on long-term supply contracts with producers such as Gazprom. Whilst Gazprom's management are hopeful that current prices in the European markets are sustainable, especially in light of forecasted growth in European natural gas demand, the emergence of new large suppliers of natural gas could result in an oversupply of natural gas.

Gazprom has received a request for information from the European Commission with respect to certain clauses in Gazprom's contracts with various Italian utilities, under which the Italian utilities are prevented from selling gas on to other off-takers in Western Europe outside of the Italian market. Similar clauses are included in Gazprom's contracts with many European off-takers. A successful challenge of such clauses by the European Commission would mean that such off-takers could be free to sell gas to other off-takers outside of the relevant market, leading to increased competition in the gas market for Gazprom and the possibility of lower prices. Gazprom has responded to this request and has agreed with the European Commission that such clauses will not appear in future contracts and that it will not enforce the relevant provision in existing contracts.

Although Russia has signed the Energy Charter Treaty, an international treaty for establishing and improving the legal framework for corporate international co-operation in energy matters, the State Duma has not yet ratified the Treaty (see Appendix B — Part I — "Overview of the Russian Gas Industry and its Regulation"). Gazprom's management believes that ratification of the Energy Charter Treaty would result in the opening up of the energy markets in Russia to foreign investment as well as its pipelines to the transportation of natural gas from Central Asia to West European markets. Accordingly, any such ratification of the Treaty could open the markets in which Gazprom operates to substantially higher competition and affect Gazprom's long-term supply contracts with its European customers.

### ***Operational Risks***

A large percentage of Gazprom's gas production is located in Western Siberia, where remoteness and the harsh climate complicate and increase the cost of production and affect Gazprom's ability to transport its natural gas economically.

Gazprom's gas exploration, production and transportation operations may be adversely affected by many factors, including the breakdown or failure of equipment or processes, performance below expected levels of output or efficiency, labour disputes, natural disasters, weather conditions, terrorist attacks or sabotage to Gazprom's extensive pipeline network. Gazprom has only limited insurance in

relation to its assets and operations and, therefore, the financial effect of any such factors would generally have to be satisfied out of Gazprom's cash flow.

Gazprom owns and operates Russia's Unified Gas Supply System ("UGSS"), which is responsible for the gathering, processing, transportation, storage and delivery of substantially all natural gas volumes in Russia (except for supplies to the Norilsk, Yakutsk and Sakhalin regions). This network of pipelines and compressor installations has been largely developed over the past 50 years. Much of the pipeline is over 10 years old with some parts of the pipeline over 30 years old. A significant part of the pipeline is protected by chemical processes of limited duration and effectiveness. In addition, large segments of the network are located in regions with harsh climates, where construction, maintenance and refurbishment is very difficult. Considerable sums of money are required each year to maintain the UGSS. Although there have been no significant delays or curtailments of the supply of natural gas to Gazprom's customers recently, no assurance can be given that such delays or curtailments will not occur in the future due to the stress and corrosion of pipelines, defective construction of compressor stations, problems associated with the harsh climate or the insufficient maintenance or refurbishment of the network as a result of insufficient funds being available.

Gazprom is dependent on the links between its pipeline network and pipeline networks elsewhere for the export of natural gas. Although it is Gazprom's strategy to diversify its export routes, it is currently dependent on pipelines in the Ukraine to deliver a large proportion of its sales of natural gas to Western Europe. It is also dependent on the Ukrainian pipeline system for a significant amount of its storage capacity. At the same time, the Ukraine is dependent on Gazprom to meet its domestic requirements for natural gas. Although this interdependence is taken into account in negotiations over a number of matters, including the terms of payment for natural gas supplied by Gazprom and transit fees, Gazprom has no control over the Ukrainian pipeline and cannot prevent any material disruption in the flow of Gazprom's natural gas through the Ukraine. It can only monitor the flow of natural gas in and out of the Ukraine.

Gazprom plans to expand its export capacity and to diversify its export routes, through capital investments in the Yamal-Europe and Blue Stream Projects and other export-oriented projects, such as the Transbalkan Project. It is possible, however, that these plans will be affected, *inter alia*, by a drop in the demand for natural gas in Europe, difficulties related to localised planning and construction processes and Gazprom's ability to obtain external financing on acceptable terms. No assurance can be given that Gazprom will be able to meet its construction targets.

### **Capital Requirements**

Gazprom must increase its capital expenditure significantly over the next five years in order to improve its natural gas, gas condensate and oil production processes and to maintain and upgrade the UGSS to meet the anticipated demand of customers in Western Europe, Russia and certain FSU countries. In order to meet current production targets over the next 10 years new gas fields will need to be developed. Gazprom expects to fund necessary capital expenditure through internal sources and external financing. There can be, however, no assurance that Gazprom will be able to generate sufficient funds to meet its capital requirements in the future. Lack of sufficient funds in the future may require Gazprom to delay or abandon some or all of its anticipated capital expenditure.

### **Environmental Risks**

Gazprom's operations, which are often innovative and potentially hazardous, are subject to the risk of liability arising from environmental damage or pollution and the cost of any associated remedial work in relation thereto. Gazprom has an established environmental policy and monitors its operations in an effort to meet applicable environmental standards. Gazprom has made a provision in its IAS financial statements for such environmental liabilities where it was probable that an obligation exists and the amount could be reasonably estimated. Such provisions have been made in accordance with what Gazprom believes is a reasonable and prudent policy which takes into account payments made in prior years, among other factors. However, in Russia in particular, federal, regional and local authorities may enforce existing laws and regulations more strictly than they have done in the past and may impose stricter environmental standards or higher levels of fines and penalties for violations than those now in

effect. Accordingly, Gazprom's management is unable to estimate the future financial impact of Gazprom's environmental obligations.

### ***Exchange Rate Risks***

Fluctuations in exchange rates influence the results of Gazprom's operations. Gazprom's export receivables are denominated in U.S. dollars or euros whilst its domestic receivables are denominated in Roubles. Most of Gazprom's operational expenditure is denominated in Roubles, whilst a portion of its capital expenditure is incurred in foreign currencies. The majority of Gazprom's borrowings are denominated in currencies other than Roubles, principally the U.S. dollar and the Euro. Gazprom's financial results may be positively or negatively affected by fluctuations in the value of the Rouble against other currencies, particularly the U.S. dollar and the Euro.

### ***Russian Reserves Classifications and Methodologies***

The information relating to natural gas, gas condensate and oil reserves contained in this Offering Circular has been prepared on the basis of Russian classifications and methodologies, which differ significantly from standard international and U.S. classifications and methodologies in particular with respect to the manner in which and the extent to which commercial factors are taken into account in calculating reserves. Accordingly, the information relating to reserves contained herein is subject to adjustments necessary to make it consistent with standard international and U.S. classifications and methodologies. However, Gazprom's management believe that such adjustments, while likely to result in a decrease of the A, B and C1 reserves reported herein, will not be material and that the amount of Gazprom's reserves as adjusted is sufficient to meet all Gazprom's delivery obligations. Gazprom's management has based its assumptions on an evaluation by internationally recognised independent reservoir engineers, DeGolyer & MacNaughton, which in 2000 carried out an evaluation of gas, gas condensate and oil reserves in the 18 largest gas and gas condensate fields, which accounted for approximately 84% of Gazprom's proved and probable gas reserves. (See Appendix B Part II).

### ***Investment Considerations Relating to Russia***

Gazprom is a Russian company, and substantially all of its assets are located in Russia. There are certain risks associated with an investment in Russia. The following are some non-exhaustive examples.

#### ***Political Risks***

Since 1991, Russia has been evolving from a socialist state with a centrally planned economy to a pluralist democracy with a market economy. The process of political and economic reform is not yet complete, and no assurance can be given that it will continue. The Russian political system remains vulnerable to social and ethnic unrest and any significant political instability could adversely affect the value of foreign investments in Russia. The Government had until recently been characterised by frequent change, having experienced five changes in Prime Minister since March 1998. The value of investments in Russia, including investments in Gazprom, could be reduced if such frequent change resumes or if the current President or Government chooses to curtail political liberties or move away from market-oriented reforms.

Significant Russian legislation has been enacted since 1991 to protect private property against expropriation and re-nationalisation by the Government, but there can be no assurance that such protections would be enforced in the event of an attempted expropriation or re-nationalisation, or that privatisation (including Gazprom's privatisation) will not be reversed.

In addition, as Russia is a federation of republics and regions, conflicts of interest between central and regional authorities and other conflicts of interest could negatively affect the value of investments in Russia and, in particular, could create an uncertain operating environment that may hinder Gazprom's long-term planning ability.

Ethnic and religious differences in Russia have given rise to tensions, and in some cases, military conflict. Such events could have a material adverse effect on the value of investments in Russia and on the financial condition of a company such as Gazprom.

### ***Economic Risks***

Russia's economy has undergone a rapid transformation marked by periods of significant instability since the end of the Soviet era. In particular, the Government's decision in August 1998 to temporarily stop supporting the Rouble and its servicing of certain domestic and foreign debts, as well as the imposition of a moratorium on the repayment of private foreign currency debt caused the currency to collapse and led to an overall financial crisis. It is possible that Russia may default on its domestic and foreign debt in the future or take actions that could adversely effect its financial stability. Other economic risks that could negatively impact the financial condition of Gazprom include:

- failure by the Government to restore access to the international capital markets or maintain the requisite level of tax collection;
- failure by the Government to address systemic problems within Russia's economy, such as sustained periods of relatively high inflation, a weak banking system, high national debt relative to gross domestic product, widespread tax evasion, high levels of organised criminal activity and corruption and substantial levels of unemployment and underemployment which affect the environment in which Gazprom operates and could adversely effect Gazprom's business as a result; and
- fluctuations in the global economy (including, in particular, fluctuations in world prices for oil and natural gas), which may adversely affect Russia's economy and Gazprom's business.

Gazprom produces about 6-8% of Russia's gross domestic product ("GDP") and contributes a substantial amount of the total tax payments to the federal budget, despite not being paid for a significant portion of its sales to the domestic market. Although the non-payment situation improved significantly last year (largely because high commodity prices and a massive trade surplus resulted in a budget surplus), and continues to improve this year, there is no guarantee that it will not deteriorate in the future.

### ***Legal and Regulatory Risks***

The following aspects of Russia's legal system create uncertainty with respect to many of the legal and business decisions that Gazprom's management make:

- there may be inconsistencies between laws, Presidential decrees, Government resolutions and ministerial orders, and between local, regional and federal legislation and regulations;
- decrees, resolutions and regulations may be adopted by governmental authorities and agencies without clear constitutional or legislative basis and with a high degree of discretion;
- substantial gaps in the regulatory structure may be created by the delay or absence of regulations implementing certain legislation;
- there is a lack of judicial and administrative guidance on interpreting applicable rules and limited precedential value of judicial decisions;
- Russia has a judiciary with limited experience in interpreting and applying market-oriented legislation and which is vulnerable to economic and political influence; and
- Russia has weak enforcement procedures for court judgments and there is no guarantee that a foreign investor will obtain effective redress in a Russian court.

Because of the developing nature of Russia's legal and regulatory framework regarding property ownership and securities, there exists a significant risk that Gazprom's ability to attract future investment from international capital markets may be limited. Some of the issues that cause this risk include:

- Russia's securities registration system is less developed than in other countries;
- Russia's regulatory environment is uncertain, which could expose Gazprom to increased costs and hinder its ability to operate its business;
- Russia's tax system gives rise to significant uncertainties and risks that may complicate Gazprom's tax planning and business decisions; and
- Russia has restrictive currency regulations which have in the recent past and may in the future interfere with Gazprom's ability to conduct routine business transactions and attract investment.

### ***Exchange Rates, Exchange Controls and Repatriation Restrictions***

In recent years, the Rouble has experienced a significant depreciation relative to the dollar and there has been significant instability in the Rouble exchange rate. See "Exchange Rates and Exchange Controls".

The Rouble is generally not convertible outside of Russia. A market exists within Russia for the conversion of Roubles into other currencies, but it is limited in size and is subject to rules limiting such conversion. There can be no assurance that such a market will continue indefinitely. Current Russian law permits Gazprom to convert its Roubles into foreign currency to make payments to meet its financial obligations but there can be no guarantee that such conversion will be permitted in the future. Moreover, the banking system in Russia is not yet fully developed and considerable delays may occur in the transfer of funds within, and the remittance of funds out of, Russia.

### ***Investment Consideration Relating to the German Insolvency Code***

The Trust Deed provides for an English law charge in favour of the Trustee for the benefit of the Noteholders over certain amounts as well as certain claims and other rights of the Bank under the Loan. Section 166(2) of the German Insolvency Code provides that receivables assigned under German law for security purposes may, after the opening of insolvency proceedings involving the assignor, only be enforced by the assignee if the insolvency administrator does not exercise its power of discretion to enforce the receivables. If the insolvency administrator so does, it will be entitled to withhold in favour of the bankruptcy estate from the enforcement proceeds a flat-rate fee for establishment and enforcement a total of nine per cent. subject to adjustment in case of higher or lower actual costs of enforcement, in each case plus value added tax, if any, thereon pursuant to Sections 170(1) and 171 of the Insolvency Code. If the insolvency administrator allows the assignee to enforce the receivables, the assignee will be obliged to pay a flat-rate fee of 4 per cent. plus value added tax, if any, thereon to the bankruptcy estate pursuant to Sections 170(2) and 171(1) of the Insolvency Code. This Section 166(2) of the Insolvency Code may affect the security given pursuant to the Trust Deed, since it cannot be excluded that a German court would hold that an English law charge should be subject to such Section 166(2).

## TRANSACTION SUMMARY

The transaction will be structured as a loan to Gazprom by the Bank. The Bank will issue Notes to Noteholders for the sole purpose of funding the Loan. The Notes will be constituted by a trust deed (the "Trust Deed") to be entered into between the Bank and The Bank of New York (the "Trustee"). Pursuant to the Trust Deed the Bank will charge by way of first fixed charge as security certain of its rights and interests under the Loan (other than certain Reserved Rights, as defined in the Trust Deed) to the Trustee for the benefit of the Noteholders and will transfer its administrative rights under the Loan Agreement to the Trustee as security (the "Security Interests") for its payment obligations in respect of the Notes. As a consequence of the transfer of the administrative rights under the Loan Agreement the Trustee shall assume the administrative rights of the Bank as set out in the relevant provisions of the Trust Deed. If and when the first fixed charge of certain of the Bank's rights and interests under the loan is enforced, the Trustee will assume the rights of the Bank under the Loan as set out in the relevant provisions of the Trust Deed, and the Trustee will assume certain rights and obligations towards the Noteholders, as more fully set out in the Trust Deed. This offering is made on a limited recourse basis and the Bank will not have any obligations to the Noteholders save for to account to the Noteholders for amounts equivalent to the amounts of payments of principal and interest under the Loan if and to the extent received from Gazprom.

## SUMMARY INFORMATION

Gazprom is the world's largest natural gas company in terms of reserves, transportation and production volumes. As at 31 December 2001, wholly-owned Gazprom subsidiaries held production licences for 26.0 tcm of A, B and C1 natural gas reserves (classified in accordance with Russian standards: see Appendix B – Part I – “Overview of the Russian Gas Industry and its Regulation”) and subsidiaries, in which Gazprom holds less than 100% of the Shares, held production licences for another 5.0 tcm of A, B and C1 natural gas reserves, of which 2.1 tcm is attributable to Gazprom in proportion to its shareholding. The Group's total A, B and C1 natural gas reserves of 28.1 tcm are equivalent to approximately 60% of Russia's estimated total for such reserves. In addition, as at 31 December 2001, Gazprom through its wholly owned subsidiaries or through subsidiaries in which Gazprom holds less than 100% of the Shares, held production licences for approximately 1,293.8 million tonnes of A, B and C1 gas condensate (which represents approximately two thirds of such estimated reserves in Russia) and 584.6 million tonnes of A, B and C1 oil reserves (in proportion to Gazprom's actual shareholding).

Gazprom's subsidiaries produced a total of 512.0 bcm of natural gas in 2001 (compared to 523.2 bcm in 2000), and this amounted to approximately 88.1% of Russia's natural gas production in that year. As at 31 December 2001, the Group's total number of wells consisted of 9,302 natural gas wells and 569 oil wells.

Gazprom owns and operates the UGSS, a single centrally controlled system for natural gas production, processing, transportation, storage and deliveries. The UGSS includes the world's largest high pressure trunk pipeline system. The network is powered by 254 compressor stations with a total capacity of approximately 42,600 megawatts. The pipeline network (of more than 150,000 km) is the most critical link in the system delivering natural gas to consumers within Russia and abroad. Seasonal peak loads are levelled off using 22 underground natural gas storage facilities with an active storage capacity of approximately 57.9 bcm. Gazprom's dispatch management centre, located in Moscow, controls and manages the transportation of gas in Russia.

Gazprom is the largest supplier of natural gas to Europe. Its market share (according to CEDIGAZ — “Natural Gas in the World — 2001”, Survey August 2002) in the European natural gas market was 25.9% in 2001. Gazprom also supplies most of the natural gas consumed in Russia and certain countries in the FSU. In 2001, Gazprom exported 127.0 bcm of natural gas to Europe. A further 39.6 bcm of natural gas was exported to the FSU. Deliveries of natural gas to Russian consumers in 2001 amounted to 282.1 bcm.

Revenue from natural gas exports to Europe for the year ended 31 December 2001 amounted to U.S.\$15.0 billion (including excise tax but net of VAT) (compared to U.S.\$15.7 billion for the year ended 31 December 2000). Sales of natural gas in the FSU market for the year ended 31 December 2001 produced revenue of U.S.\$1.6 billion (including excise tax but net of VAT) as compared to U.S.\$2.3 billion for the year ended 31 December 2000. Revenue from natural gas sales in Russia for the year ended 31 December 2001 totalled U.S.\$3.8 billion (including excise tax but net of VAT) (compared to U.S.\$3.4 billion for the year ended 31 December 2000).

## SELECTED FINANCIAL INFORMATION

The summary consolidated financial information set out below has been derived from Gazprom's audited consolidated financial statements as for the years ended 31 December 2001, 2000 and 1999 (the latest audited "Annual Data"), prepared in accordance with IAS. The U.S.\$ amounts set out below were not included in the Annual Data and are provided for convenience only. They should not be construed as representations that the Rouble amounts have been or could be converted into U.S.\$ at that or any other rate or as being representative of U.S.\$ amounts that would have resulted if Gazprom reported its IAS financials in U.S.\$.

The Annual Data relating to the statement of operations data for 2001, 2000 and 1999 and to the balance sheet data at 31 December 2001, 2000 and 1999 have been extracted from, and should be read in conjunction with, the 2001 and 2000 Consolidated Financial Statements set out elsewhere in this Offering Circular.

Balance Sheet Data	31 December	31 December	31 December	31 December	31 December	31 December
	2001	2001	2000	2000	1999	1999

**Notes:**

- (1) The U.S.\$ amounts shown above have been translated from the Rouble amounts at the rate of RUR 30.14 = U.S.\$1.00, which was the rate published by the Central Bank of Russia on 31 December 2001.
- (2) The selected Rouble financial data should also be read in conjunction with the more detailed consolidated financial statements set out elsewhere in this Offering Circular.
- (3) Extracted from the 2001 Consolidated Financial Statements.
- (4) Extracted from the 2001 Consolidated Financial Statements in order to reflect opening balance sheet adjustments and other financial statements reclassification required by the adoption of a new accounting standard (IAS 39 "Financial Instruments").
- (5) Extracted from the 2000 Consolidated Financial Statements restated for changes in the general purchasing power of the Russian Rouble in accordance with International Accounting Standard 29 "Financial Reporting in Hyperinflationary Economies" with all amounts stated in terms of the measuring unit current at 31 December 2001.

## OTHER SELECTED FINANCIAL INFORMATION

The following selected financial data has been extracted, save as set out below, from, and should be read in conjunction with, the Annual Data. The U.S.\$ amounts set out below were not included in the Annual Data and are provided for convenience only. They should not be construed as representations that the Rouble amounts have been or could be converted into U.S.\$ at that or any other rate or as being representative of U.S.\$ amounts that would have resulted if Gazprom reported its IAS financials in U.S.\$.

Analysis of Gas Sales (including excise tax, net of VAT)

	2001				2000				1999			
	Europe	FSU	Russia	Total	Europe	FSU	Russia	Total	Europe	FSU	Russia	Total

<b>Total capitalisation .....</b>	<b>1,932,291</b>	<b>64,110</b>	<b>●</b>

**Notes:**

- (1) The U.S.\$ amounts shown above have been translated from the Rouble amounts at the rate of RUR 30.14 = U.S.\$1.00, which is the rate published by the Central Bank on 31 December 2001. The U.S.\$ amounts set out below were not included in the Annual Data and are provided for convenience only. They should not be construed as representations that the Rouble amounts have been or could be converted into U.S.\$ at that or any other rate or as being representative of U.S.\$ amounts that would have resulted if Gazprom reported its IAS financials in U.S.\$.
- (2) Unaudited.
- (3) Adjusted to give effect to the receipt of the Loan but not adjusted to give effect to any other changes subsequent to 31 December 2001.

Consolidated cash and cash equivalents, including cash restricted from withdrawal under the terms of certain of the borrowings and under banking regulations, were RUR 86,735 million (U.S.\$2,878 million).

There have been no material changes in the total capitalisation of Gazprom since 31 December 2001, other than, as at 31 July 2002, additional long-term borrowings and issuance of promissory notes in an aggregate amount of U.S.\$2,264 million and repayments of long term borrowings and promissory notes of U.S.\$1,343 million. Since 31 July 2002, there have also been additional long-term borrowings in an aggregate amount of U.S.\$95 million and the issuance of additional long-term promissory notes in an aggregate amount of RUR 5,375 million (U.S.\$178 million).

## **USE OF PROCEEDS**

The proceeds from the offering of the Notes will be used by the Bank for the sole purpose of financing the Loan. The Loan, in principal amount of U.S.\$●, which is being funded in full by the Notes, will, after meeting the costs and expenses of the offering of the Notes, be used for working capital and general corporate purposes.

## ОАО ГАЗПРОМ

### Privatisation and Formation

Gazprom was reorganised into a joint stock company in 1993 in accordance with the Presidential Decree No. 1333 of 5 November 1992 ("Decree No. 1333"). Under Decree No. 1333, Gazprom was made responsible for ensuring the efficient operation and development of the UGSS. The UGSS had previously been the responsibility of the State Gas Concern "Gazprom", the State controlled entity charged with the task of operating and developing the UGSS prior to the 1993 reorganisation. Pursuant to Decree No. 1333 and Presidential Decree of the Russian Federation No. 2116 of 6 December 1993, Gazprom was charged with the responsibility of providing for natural gas export deliveries through Gazexport, its wholly-owned specialised foreign trade subsidiary, which became part of the State Gas Concern "Gazprom" in 1991 and was also appointed "state contractor" for natural gas exports.

Decree No. 1333 charged Gazprom with the following principal tasks:

- ensuring a reliable supply of natural gas to consumers in Russia and to foreign customers;
- conducting a co-ordinated policy for maintaining and further developing the UGSS;
- controlling the operation of the UGSS;
- financing and constructing natural gas pipelines and high pressure outlets so as to service areas of Russia where natural gas was previously unavailable; and
- providing access for any independent producer of natural gas to the transportation system in proportion to the amount of natural gas produced by such independent producer in Russia.

The original Charter of Gazprom was approved by Order No. 138 of the Council of Ministers of the Russian Federation issued on 17 February 1993 and Gazprom was registered as an open joint stock company on 25 February 1993. In 1993 and 1994 licences were issued to Gazprom, pursuant to the Subsoil Resources Law 1992, granting Gazprom rights to exploit hydrocarbon reserves.

Decree No. 1333 provided for the transfer to Gazprom of 100% of the share capital of enterprises comprising the UGSS, controlling equity stakes (not less than 51%) in a number of other entities reorganised into joint stock companies, the interests of the State Gas Concern "Gazprom" in Russian and foreign enterprises and other assets of the State Gas Concern "Gazprom", the privatisation of which was not restricted. Decree No. 1333 also provided for all rights and obligations of the State Gas Concern "Gazprom" to inure to Gazprom's benefit, including its rights to use underground deposits and natural resources, as well as its rights and obligations under the State Gas Concern "Gazprom's" contracts. Gas producing enterprises Yakutgazprom and Norilskgazprom, which used to be part of the State Gas Concern "Gazprom", were reorganised into separate and independent joint stock companies.

Decree No. 1333, Directive No. 58-rp of the President of the Russian Federation dated 26 January 1993, Gazprom's privatisation plan and certain other legislative acts issued by the President and the Government provided for:

- 15.0% of Gazprom Shares to be sold by closed subscription to employees and the management of the enterprises comprising the UGSS (which had been transferred to Gazprom);
- 33.9% of Gazprom Shares to be sold to Russian individuals in return for privatisation vouchers (of which 0.87% have not been sold and remain within Federal ownership);
- 40.0% of Gazprom Shares were fixed for three years within Federal ownership;
- 1.1% of Gazprom Shares to be transferred to joint stock company "Rosgazifikatsiya" (a supplier of natural gas to end-consumers); and

- 10.0% of Gazprom Shares held in the Federal Property Fund to be purchased by Gazprom itself before 1 June 1993 at nominal value in exchange for privatisation vouchers. These were to be placed within a year in the securities market and the proceeds were to be used for the development of natural gas fields in Yamal and other regions.

Presidential Decree of the Russian Federation No. 399 of 20 March 1996 extended the original period for which 40% of Gazprom Shares were to be retained in Federal ownership by a further three years. Pursuant to Presidential Decree of the Russian Federation No. 887 of 25 July 1998, the percentage of Gazprom Shares to be retained within Federal ownership was reduced to 35%, in anticipation of the sale of 5% of the Gazprom Shares, of which 2.5% was subsequently acquired by Ruhrgas during a privatisation auction held in December 1998.

Although Gazprom's privatisation plan envisaged the sale of the other 2.5% of Gazprom Shares in the second quarter of 1999, these Gazprom Shares remained in Federal ownership, together with the 0.87% of Gazprom Shares not placed during the privatisation programme in 1993 and 1994. Accordingly, the total State share holding currently comprises 38.37% of Gazprom Shares. The Gas Supply Law states that 35% of the UGSS owner's shares (i.e. Gazprom) must be retained in Federal ownership for an indefinite period of time.

Pursuant to the terms of a trust agreement dated 20 December 1997 (the "Trust Agreement") between the Government and Gazprom, Gazprom holds 35% of the Gazprom Shares in a trust for the benefit of the Government, must keep them separate from its other assets and has certain reporting requirements. Furthermore, Gazprom may not sell, transfer or otherwise dispose of these Gazprom Shares and may not issue derivatives on or pledge these Gazprom Shares without the written approval of the Government. In the last two years Gazprom has not exercised their right to vote on behalf of the Government at any shareholder meetings, as Government representatives had exercised the right to vote their 35% shareholding themselves. In addition, Gazprom Shares could not be voted on certain major issues (including the election of members of the Board of Directors) without the written approval of the Government. The Trust Agreement was originally valid until 31 March 1999 but its term was extended on a rolling one-year basis until such time as either Gazprom or the Government provide notice to the other party that they wish to amend or terminate the Trust Agreement. As at the date of this Offering Circular no such notice had been given by either party.

However, these Gazprom Shares were never transferred to Gazprom as "trust manager" in Gazprom's share register and are currently voted by representatives of the Government. Pursuant to Article 6 of the Federal Law "On Privatisation of State Property and Principles of Municipal Property privatisation in the Russian Federation" No. 123-FZ dated 21 July 1997 (as amended), the Government proposes candidates to the Board of Directors and Audit Commission, to be approved by a General Meeting of Shareholders. The Government also appoints representatives at General Meetings of Shareholders who are obliged to act in accordance with the directions of the Government. Currently, there are six Government representatives on the Board of Directors who can be replaced by the Government at any time.

Gazprom's name was changed from RAO Gazprom to OAO Gazprom by a shareholders' resolution passed on 26 June 1998.

### **Shareholding Structure**

Currently, Gazprom's charter capital is RUR 118,367,564,500, consisting of 23,673,512,900 shares with a nominal value RUR 5 each.

Pursuant to Government Resolution No. 654 of 30 May 1997, Gazprom's shares are traded in Russia on the Moscow Stock Exchange, the St. Petersburg Stock Exchange, the Yekaterinburg Stock Exchange and the Novosibirsk Stock Exchange.

Gazprom has held shareholders meetings since 1995. The number of shareholders has decreased from approximately 1,030,000 in 1995 to approximately 515,366 as at 13 May 2002.

In accordance with the Presidential Decree of the Russian Federation No. 529 of 28 May 1997, foreign equity participation (as defined in Decree No. 529) in Gazprom was restricted to 9% of the

Gazprom Shares. The Presidential Decree of the Russian Federation No. 943 of 10 August 1998 authorised the sale of a further 5% of Gazprom Shares to foreign shareholders. In fact, only 2.5% out of the 5% authorised was actually sold and therefore foreign equity participation is currently limited to 11.5% of Gazprom's Shares. The Gas Supply Law provides that the share of foreign individuals and organisations in the charter capital of Gazprom may not exceed 20%.

In 1996, Gazprom placed shares representing 1.98% of its charter capital on the foreign markets in the form of American Depository Shares ("ADS"). Due to the restrictions on foreign equity ownership (which prevents the purchase of Gazprom Shares by foreign participants in the domestic market), the issue of ADSs created a dual market in Gazprom Shares, with the ADSs trading at a substantial premium over the Gazprom Shares in the domestic market. In 1999, Ruhrgas acquired a further 1% of Gazprom Shares in the form of ADSs and between December 2000 and January 2001 an additional 1.44% of Gazprom's Shares were sold to foreign investors in the form of ADSs. Gazprom ADSs are currently listed on the London Stock Exchange.

President Putin has established a working group to look at ways in which to liberalise the current dual market in Gazprom Shares.

The following table summarises Gazprom's shareholding structure as at 13 May 2002.

Shareholders	%
Russian Federation .....	38.37
Russian shareholders .....	50.13
Foreign shareholders .....	11.50
Gazprom Shares <sup>(1)</sup> .....	7.08
ADS <sup>(2)</sup> .....	4.42
<b>Total</b> .....	<b>100.00</b>

Notes:

(1) Including 4.58% held by Gazprom Finance B.V., Gazprom's wholly-owned financial vehicle. This shareholding is intended to be used to secure Gazprom's liabilities and issue derivative financial instruments. Also including a 2.5% shareholding acquired by Ruhrgas at a privatisation auction which was held pursuant to Presidential Decree No. 1316 of 31 October 1998.

(2) Including a 1% shareholding acquired by Ruhrgas.

Since 1995 more than 5% of Gazprom Shares have been owned by Stroytransgaz, a Russian construction company which is often engaged by Gazprom for various construction projects (see "Business—Transportation"). These Gazprom Shares were acquired by Stroytransgaz from Gazprom, who had bought these Gazprom Shares as part of the 1995 Government authorised sale of 10% of Gazprom's Shares to Gazprom. Gazprom paid for the Gazprom Shares in privatisation vouchers at the then effective nominal value. Stroytransgaz acquired 4.8% of Gazprom Shares in 1995 as part of the settlement of a debt owed by Gazprom to Stroytransgaz for various construction services rendered. The effective price paid by Stroytransgaz for the Gazprom Shares was equal to the average 1995 privatisation sale price. This transaction was recently challenged by Gazprom. Stroytransgaz and Gazprom have reached an agreement whereby Stroytransgaz will return the Gazprom Shares to Gazprom. The consideration to be paid by Gazprom for the return of the Gazprom Shares amounts to approximately 10% of the current market value of the Gazprom Shares. As at the date of this Offering Circular neither the consideration had been paid nor the Gazprom Shares returned. The remaining balance of the 10% of Gazprom Shares authorised for sale by the Government was acquired by Gazprombank and Gazfund.

During the year ended 31 December 2001, certain members of the Board of Directors and close members of their families owned significant shareholdings in Stroytransgaz.

### Corporate Structure

In accordance with the Government's current policy of maintaining an integrated natural gas industry, Gazprom owns all of the transportation assets necessary for the operation of the UGSS. Furthermore, its subsidiaries have the right to develop a substantial portion of Russia's natural gas and

gas condensate reserves and certain of its oil reserves. Gazprom operates in and outside of Russia through a number of limited liability and joint stock companies, either wholly or majority owned by Gazprom.

Gazprom's head office, located in Moscow, exercises a substantial degree of managerial and financial control over the operations of Gazprom's subsidiaries. Head office functions include strategy, planning, external financing, financial reporting, allocation of financial resources within the Group for the purposes of capital expenditure and supervision of principal areas of operations, such as construction, drilling, transportation, natural gas sales in the FSU and equipment procurement.

Gazprom's wholly and majority owned subsidiaries are also engaged in engineering, research, non-core production activities and non-core construction activities supporting the operation of the UGSS as well as other commercial activities, including banking (see "Investment in Non-Core Activities"). Gazprom also participates in a number of natural gas transportation and marketing joint ventures involving foreign partners (see "International Projects and Alliances").

The dispatch management centre, based at the head office, continuously monitors, controls and manages Gazprom's natural gas transportation system throughout Russia. Operational information, including data on produced and transported natural gas volumes, is also processed at the head office. Gazprom's internal financial reporting systems provide for the preparation of consolidated accounts and for the monitoring of cash receipts and cash requirements of the Group companies.

Gazprom's natural gas production subsidiaries are engaged in the development and operation of natural gas fields and related natural gas processing facilities. The four principal wholly-owned natural gas production subsidiaries, Urengoygazprom, Yamburggazdobycha, Nadymgazprom and Noyabrskgazdobycha, are located in Western Siberia. Together they accounted for 92.5% of the Group's total natural gas production in 2001. Drilling and exploration operations are carried out by Gazprom's subsidiary, Burgaz.

Gazprom's natural gas transportation subsidiaries are responsible for the transportation of natural gas along trunk pipelines and the supply of natural gas to customers within their respective regions. Presently, there are a total of 17 wholly-owned natural gas transportation subsidiaries, of which four are also engaged in natural gas production and/or processing.

Other subsidiaries of Gazprom are responsible for a number of other functions, including technical supervision of the pipeline systems, research and development, data processing, banking and procurement.

Currently, Gazprom wholly owns 56 subsidiaries, has an interest of greater than 50% in 44 entities and an equity interest of between 21% and 50% (inclusive) in 36 other entities. Gazexport holds interests in a number of foreign joint ventures.

Gazprom's main subsidiaries were, as at 31 December 2001, as follows:

**Principal subsidiary undertakings, 100% owned**

Astrakhangazprom	Gazsviaz	Permtransgaz
Bashtransgaz	Zarubezhgaz Erdgashandel GmbH (ZGG)	Samaratransgaz
Burgaz	Informgaz	Severgazprom
VNIlgaz	IRTs Gazprom	Servicegazprom
Volgogradtransgaz	Kavkaztransgaz	Liquified gas
Volgotransgaz	Kaspygazprom	Surgutgazprom
Gazkomplektimpex	Kubangazprom	Tatransgaz
Gaznadzor	Leadville Investments Limited	Tomsktransgaz
Gazobezopasnost	Lentransgaz	TyumenNIlgiprokaz
Gazpromavia	Mezhregiongaz	Tyumentransgaz
Gazprominvestholding	Mostransgaz	Uraltransgaz
Gazprom-Media	Nadymgazprom	Urengoygazprom
Gazprom Finance B.V.	Nadymstroygazdobytcha	Yugtransgaz
Gaztorgpromstroy	Novourengoiy GOC	Yamalgazinvest
Gazflot	Noyabrskgazdobytcha	Yamburggazdobytcha
Gazexport	Orenburggazprom	

All of these subsidiaries are incorporated in the Russian Federation, with the exception of Gazprom Finance B.V., ZGG and Leadville Investments Limited, which are incorporated in the Netherlands, Germany and Cyprus, respectively. Gazprom Finance B.V. was established in February 1999 for the purpose of obtaining financing for the Group outside Russia. ZGG acts as the holding company for the Group's interests in a number of gas distribution, storage and transportation companies operating in Central Europe. Leadville Investments Limited was established in 2000 to manage the Group's investments in Russian media companies. Other companies are mainly involved in production, transportation and sale of gas.

**Principal subsidiary undertakings, less than 100% owned**

	Percent of share capital held as of	
	31 December	
	2001	2000
OAQ Gazavtomatika .....	49	51
OAQ Gazenergoservice.....	51	51
AB Gazprombank (ZAO) .....	98	97
OAQ Gazsibcontract .....	96	51
ZAO Gerosgaz.....	51	51
ZAO Kostromatrubinvest .....	99	99
OAQ Lebedinsky GOK.....	—	57
OAQ AKB National Reserve Bank.....	40	40
OAQ AK Sibur .....	51	—
ZAO AKB Sovfintrade .....	94	65
OAQ Spetsgazavtotrans .....	51	51
OAQ Volgogradneftemash .....	51	51
OAQ Vostokgazprom .....	51	51
OAQ Zapsibgazprom .....	34	34

In 2001 the Group's interest in OAQ Gazavtomatika decreased from 51% to 49% as the Group did not participate in an additional share issue by OAQ Gazavtomatika.

In August 2001 the Group participated in the fourth stock issue of ZAO AKB Sovfintrade and as a result, the Group's interest in the bank's share capital increased from 65% to 94%, including 26% held by AB Gazprombank (ZAO).

As of 31 December 2001, the Group's interest in the equity capital of OAO AKB National Reserve Bank was 40%, in OAO Zapsibgazprom – 34% and OAO Gazavtomatika – 49%. However, due to the fact that the Group continued to exercise control over activities of the above companies, they were still considered as subsidiaries. As at the date of this Offering Circular, the Group has no interest in the equity capital of OAO AKB National Reserve Bank and has a 51% interest in the equity capital of OAO Zapsibgazprom.

### **Acquisition of OAO AK SIBUR**

In January 2001 the Group acquired 51% of the voting shares of OAO AK Sibur. OAO AK Sibur is a leading seller of petrochemical products in Russia, it is also involved in light hydrocarbons processing. The consideration of RR 2,619 million was settled by a combination of cash, promissory notes of Group companies and other securities.

In December 2001 the Group subsidiary OAO AK Sibur purchased interests in the following companies:

<u>Companies (subsidiaries and associated undertakings)</u>	<u>Purchased interest as of 31 December 2001 (%)</u>
OAO Kemerovsky Azot.....	75
OAO Kautchuk .....	100
OAO Uralorgsintez .....	51
OAO Volzhsky AKZ .....	51
OAO Sibur-Tyumen .....	42
OAO Stirol .....	42

Interests in the above companies, all of which are involved in the petrochemical industry in the Russian Federation, were purchased from OOO IT. Total fair value of consideration paid to OOO IT was RR 6,491 million, of which RR 3,691 million was attributable to acquired subsidiaries. The Group management is currently unable to assess whether the transaction with OOO IT is a related party transaction or if OOO IT is a related company to former management of OAO AK Sibur.

In 2001-2002 OAO AK Sibur experienced financial difficulties and as a result was put under the control of a court appointed external administrator . On 10 September 2002 the creditors' meeting approved a settlement agreement which was subsequently approved by the court and which provides for the restructuring and rescheduling of OAO AK Sibur's debts. Certain subsidiaries of OAO AK Sibur (including, in particular, OAO Sibur-Tyumen) are also subject to disputes and proceedings involving various parties. Gazprom's policy in relation to OAO AK Sibur's petrochemical assets is to ensure that OAO AK Sibur retain all such assets that can be technologically and economically integrated into the Group's business.

### **Lebedinsky GOK**

In January 2001 the Group exchanged a 57% interest in Lebedinsky GOK and a 17% interest in Oskolsky EMK for a 48% interest in ZAO Gazmetall. ZAO Gazmetall is a metallurgical holding company with controlling interests in Lebedinsky GOK and Oskolsky EMK. As the Group intends to sell its shares of ZAO Gazmetall, the investment has been classified as an available-for-sale investment. During the third quarter of 2001 management revalued the investment in ZAO Gazmetall to its estimated current market value of RR 2,000 million, recognising the net effect of revaluation in gains and losses on available-for-sale securities in the consolidated statement of operations for the latest Annual Data. In March 2002 the Group made an agreement to sell its 48% interest in ZAO Gazmetall for USD70 million. In accordance with the agreement the buyer of the above shares is OAO Oskolsky Metallurgical Plant, a subsidiary of ZAO Gazmetall.

## Management Structure

In accordance with Russian Joint Stock Companies Law and Gazprom's Charter, Gazprom's governing bodies are the General Meeting of Shareholders, the Board of Directors, the Management Committee and the Management Committee Chairman.

The General Meeting of Shareholders is Gazprom's highest governing body and has exclusive power over amendments to the Charter, the reorganisation or liquidation of Gazprom, the election of individuals to the Board of Directors and to the Audit Commission (responsible for control over Gazprom's business and financial activities), determination of the maximum amount of authorised shares, increases to the charter capital (where reserved for the General Meeting of Shareholders by law and by the Charter), reduction of the charter capital, approval of the annual report and annual accounts, determination of whether or not Gazprom is to enter into major transactions (the value of which exceeds 50% of the total value of Gazprom's assets) and approval of certain "interested party" transactions, as defined in Article 81 of the Federal Law "On Joint Stock Companies" No. 208-FZ dated 26 December 1995 (as amended) (the "Joint Stock Companies Law").

The Board of Directors oversees Gazprom's business activities and consists of eleven members, including six members who hold positions in government bodies, two non-executive Directors, one representative of Ruhrgas, one representative of Gazprombank and one member of the Management Committee.

Gazprom's Board of Directors is responsible for the general management of Gazprom, except for those matters which, by law, are within the exclusive powers of the General Meeting of Shareholders.

The Board of Directors has certain powers that are within its jurisdiction. These include the power to determine the priorities of Gazprom's operations; to approve annual budgets; to call General Meetings of Shareholders and to determine the agenda for such meetings; to determine the record date for General Meetings of Shareholders; to increase the charter capital of Gazprom (except where such increase is within the competence of the General Meeting of Shareholders); to issue bonds or other securities; to appoint the executive bodies of Gazprom (i.e. the Management Committee and the Chairman of the Management Committee); to decide on early termination of the powers of these bodies; to approve candidates for the position of a Deputy Chairman of the Management Committee; to determine the remuneration of Management Committee members; to recommend dividends; to use the reserve fund and other funds; to open branch and representative offices; to establish procedures for entering into transactions; and to adopt decisions on major transactions and certain "interested party" transactions.

Members of the Board of Directors are elected by the Shareholders through a system of cumulative voting for terms of one year and may be re-elected any number of times. The General Meeting of Shareholders may also terminate the authority of all members of the Board of Directors. Members of the Management Committee may not comprise more than one quarter of the Board of Directors and there must be at least nine Directors at all times. The Chairman of the Board of Directors is elected by the members of the Board of Directors by a majority vote of all members of the Board of Directors and may be re-elected at any time by a special resolution requiring at least a two-thirds majority. The Chairman of the Management Committee cannot simultaneously serve as the Chairman of the Board of Directors.

The Management Committee and the Chairman of the Management Committee are the executive bodies that manage Gazprom's day-to-day affairs. Members of the Management Committee are appointed by the Board of Directors for a period of five years. The Board of Directors has the right to terminate the authority of any Management Committee members as well as the Chairman of the Management Committee. The powers and jurisdiction of the Management Committee include the preparation and submission of Gazprom's long-term projects and strategic programmes to the Board of Directors; management of natural gas flows and supervision of the operation of the UGSS; control over performance of Gazprom's investment, financial and other programmes; and the approval of accounting and reporting procedures ensuring the timely submission of annual reports and other financial information to all relevant authorities.

The Chairman of the Management Committee may act on behalf of Gazprom ex officio without a power of attorney. He may issue orders and other internal documents, approve staff schedules, hold meetings of the Management Committee and resolve any questions that do not fall within the exclusive jurisdiction of the General Meeting of Shareholders, the Board of Directors or the Management Committee.

The Management Committee meets regularly in accordance with semi-annual schedules which are approved by the Management Committee.

In practice, the Board of Directors is responsible for formulating Gazprom's strategy, and the Management Committee is responsible for implementing such plans and managing Gazprom on a day-to-day basis.

As at the date of this Offering Circular the membership of the Board of Directors was as follows:

<u>Name</u>	<u>Year of Birth</u>	<u>Position</u>
D. Medvedev .....	1965	Chairman of the Board of Directors, First Deputy Head of the Presidential Administration of the Russian Federation
D. Ananenko .....	1952	First Deputy Chairman of the Board of Directors
B. Bergmann.....	1943	Chairman of the Management Committee of Ruhrgas
B. Fedorov .....	1958	Leader of the political movement "Russia, Ahead!"
F. Gazizullin .....	1946	Minister of Property Relations of the Russian Federation
G. Gref .....	1964	Minister for Economic Development and Trade of the Russian Federation
V. Hristenko .....	1957	Deputy Prime Minister of the Russian Federation
A. Levistskaya.....	1954	First Deputy of the Russian Government Administration
A Miller .....	1962	Chairman of the Management Committee
M. Sereda .....	1970	Head of Gazprom's Management Committee Office
I. Yuzhanov .....	1960	Minister of Antimonopoly Policy and Entrepreneurial Support of the Russian Federation

The current membership of Gazprom's Management Committee is as follows:

<u>Name</u>	<u>Year of Birth</u>	<u>Position</u>
A. Miller.....	1962	Chairman of the Management Committee
A. Ananenko.....	1952	Deputy Chairman of the Management Committee
E. Vasilieva.....	1959	Deputy Chairman of the Management Committee; Chief Accountant
Y. Komarov.....	1945	Deputy Chairman of the Management Committee
S. Lukash.....	1957	Deputy Chairman of the Management Committee
A. Ryazanov.....	1953	Deputy Chairman of the Management Committee
B. Yurlov.....	1948	Deputy Chairman of the Management Committee
M. Akselrod.....	1946	Management Committee Member (Capital Construction and Equipment and Technical Supplies)
B. Budzulyak.....	1946	Management Committee Member (Transportation System)
A. Krasnenkov.....	1961	Management Committee Member (Property Management)
A. Kruglov.....	1969	Management Committee Member (Head of Corporate Finance)
B. Nikitin.....	1940	Management Committee Member (Off-Shore Fields Developing)
N. Gornovsky.....	1958	Management Committee Member, Mezhhregiongas General Director
V. Rezunenko.....	1935	Management Committee Member (Long-Term Development Planning)
V. Saveliev.....	1954	Management Committee Member
A. Semenyaka.....	1965	Management Committee Member (Adviser to the Chairman)

The cumulative direct ownership of shares by the members of Gazprom's Management Committee and the Board of Directors in Gazprom Shares is 0.014% and less than 0.001%, respectively.

## Employees

In 2001, Gazprom's work force broken down by area of employment was as follows<sup>(1)</sup>:

<u>Type of Activities</u>	<u>Number of Employees</u>
Construction.....	29,943
Exploration and drilling.....	15,224
Gas transportation.....	107,363
Production and processing.....	46,026
Other.....	118,713
Total.....	<u>317,269</u>

Note:

(1) These figures represent average employee count for the year 2001.

## BUSINESS

### Principal Markets

#### Overview

Gazprom is the world's largest exporter of natural gas. Gazprom exports natural gas through its wholly-owned trading subsidiary, Gazexport, on an agency basis. Exports of gas condensate, oil and oil products are also made through Gazexport.

Gazprom is currently the only supplier of Russian natural gas to Europe. According to CEDIGAZ — "Natural Gas in the World — 2001", Survey August 2002, it supplied 20.9% of natural gas consumed in Western Europe and 57.3% of natural gas consumed in Central and Eastern Europe in 2001. In 2001, Gazprom delivered 127.0 bcm of natural gas to Europe of which Western Europe accounted for 86.6 bcm and Central and Eastern Europe accounted for 40.4 bcm. Germany, Italy, France, Turkey, the Czech Republic, Slovakia, Hungary, Poland, Austria and Finland accounted for Gazprom's largest export markets in Europe. Gazprom is actively looking to increase its European exports through investments in joint ventures, such as Wingas in Germany and Gazum Oy in Finland (see "International Projects and Alliances").

In 2001, Gazprom supplied substantially all of the natural gas consumed in Russia and a significant amount of the natural gas consumed in the Ukraine, Belarus, Moldova, Lithuania, Latvia and Estonia. Natural gas deliveries to consumers in Russia and to countries in the FSU accounted for 278.9 bcm and 39.6 bcm of natural gas in 2001, respectively. Ukraine and Belarus are the largest consumers of natural gas supplied by Gazprom in the FSU.

The following table sets out Gazprom's natural gas deliveries by geographical market.

Gas Deliveries	Year Ended 31 December			6 month period ended 30 June
	1999 (bcm)	2000 (bcm)	2001 (bcm)	2002 (bcm)
Western Europe .....	88.4	90.4	86.6	44.8
Central and Eastern Europe .....	38.4	38.6	40.4	21.0
Total Europe .....	126.8	129.0	127.0	65.8
FSU .....	47.2	43.4	39.6	23.1
Russia .....	260.1	255.0	282.1	145.4
Total Russia and FSU .....	307.3	298.4	321.7	168.5
Total .....	434.1	427.4	448.7	234.3

Industry experts believe that natural gas is gaining an increasing share of the world energy market as a result of it being an effective and environmentally clean fuel. According to the BP Statistical Review of World Energy (June 2002), natural gas consumption, as a percentage of energy consumption in Europe, has increased in recent years and Gazprom expects this trend to continue. This is primarily due to the growth in natural gas-fired power generating capacity, an increase in the use of natural gas in the domestic sector (particularly in Central and Eastern Europe), a decline in the attractiveness of nuclear power and environmental considerations (which have reduced the attractiveness of fuels such as coal). In 2002, natural gas consumption accounted for approximately 22.4% of energy consumption in Western Europe and approximately 23.5% in Central and Eastern Europe. The following table sets forth energy and natural gas consumption in Gazprom's principal markets for the period from 1999 to 2001 as well as the percentage of natural gas consumed as a proportion of total energy in such markets for each year.

	1999	2000	2001
	<i>(mtoe, except for percentages)</i>		
<b>Western Europe</b> <sup>(1)</sup>

- (1) Defined for the purposes of this table as the following countries: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Luxembourg, Republic of Ireland, Italy, The Netherlands, Norway, Portugal, Spain, Switzerland, Sweden, Turkey and the United Kingdom.
- (2) Energy consumption comprises commercially traded fuels only.
- (3) Oil, gas, nuclear, hydroelectric and coal.
- (4) Defined for the purposes of this table as the following countries: Bulgaria, Czech Republic, Hungary, Poland, Romania and Slovakia.

According to the BP Statistical Review of World Energy (June 2002), natural gas consumption in Western Europe increased by 4.1% from 1999 to 2000 and fell by 1.9% from 2000 to 2001. It increased as a percentage of primary energy consumption during 2000 and 2001. In 2001, natural gas consumption as a percentage of primary energy consumption ranged from 1.3% in Sweden to 39.8% in The Netherlands. Germany and Italy, Gazprom's major Western European markets, are among the most gas user intensive countries in Western Europe, with gas accounting for 22.3% and 32.7% respectively, of their total energy consumption in 2001. The proportion of gas to total energy consumption in Western Europe is projected by the International Energy Agency to continue to increase.

Energy consumption in Central and Eastern European markets increased by 3.1% from 1999 to 2001 and natural gas consumption increased by 5.3% over the same period.

Gas consumption in Russia and the FSU represented 22.8% of worldwide natural gas consumption in 2001. In the FSU, energy consumption increased by 2.7% from 1999 to 2001 and gas consumption increased by 3.2% during the same period. In Russia, overall energy consumption increased by 2.6%, whilst natural gas consumption increased by 2.7% from 1999 to 2001. The proportion of natural gas to total energy consumption decreased in Russia and increased in the FSU over the same period by 0.1% and 0.2% respectively.

## Western Europe

Gazprom operates in the international gas markets through Gazexport. In 2001, Gazprom exported 86.6 bcm of natural gas to Western Europe (compared to 90.4 bcm in 2000) which represented 19.4% of Gazprom's total natural gas supplies in 2001.

The following table sets out Gazprom's natural gas export volumes to Western Europe for the periods indicated:

Country	Year Ended 31 December			6 month period ended 30 June
	1999	2000	2001	2002
	(bcm)	(bcm)	(bcm)	(bcm)
Germany .....	34.9	34.1	32.6	16.2
Italy .....	19.8	21.8	20.2	10.7
France .....	13.4	12.9	11.2	5.5

Source: Gazprom.

(1) Included amongst Western Europe for the purpose of this table.

(2) Totals may not add up due to rounding.

Gazprom and its predecessors have delivered natural gas to Western Europe since the late 1960s providing Gazprom with a significant amount of commercial experience in the region. Gazprom, acting through Gazexport, supplies natural gas to its Western European customers on the basis of long-term contracts, the initial terms of which are generally 20 years or longer. Outstanding long-term supply contracts with major Western European customers have remaining terms of between 6 years and 21 years. The majority of these contracts contain similar features, including take-or-pay clauses and price setting mechanisms, mostly based on European petroleum product prices, and do not allow for unilateral termination, except in cases of prolonged force majeure. Certain contracts prohibit the re-export of natural gas. Gazprom is discussing pre-export clauses with the European Commission and has agreed that such clauses will not appear in any future contracts. Currently, Gazprom's principal Western European customers are Ruhrgas (Germany), WIEH/Wingas (Germany), SNAM (Italy), Gaz de France (France), OMV (Austria) and Botas (Turkey). Gazprom is paid in foreign currency for the natural gas it sells in Western Europe.

In the opinion of Gazprom's management, one of the most promising and fastest growing export markets is Turkey, where natural gas consumption amounted to 15.5 bcm in 2001, of which Gazprom exports accounted for 11.1 bcm, or 72% of the total natural gas consumption. According to estimates of the Turkish natural gas company Botas, Turkish natural gas consumption will reach 55.0 bcm by 2010 and 82.7 bcm a year by 2020. Gazprom's natural gas exports to Turkey are delivered via the Transbalkan Pipeline through the Ukraine, Romania and Bulgaria and will be delivered via the Bluestream Pipeline when this same becomes operational by the end of 2002 (see "International Projects and Alliances"). Recent economic difficulties experienced by Turkey have not affected the volume of Gazprom's exports to Turkey nor have they resulted in delays in payment.

During recent years, Gazprom has negotiated a number of agreements which are expected to result in increased exports to Western Europe. In particular, since 1998 new contracts were entered into with Gasunie (The Netherlands) for annual deliveries of 4 bcm (within the plateau period as set out in and as defined in the relevant contract) from 2001 until 2021; with Wingas (Germany) for annual deliveries of 4 bcm (within the plateau period as set out in and as defined in the relevant contract) from 1999 until 2023, plus an additional 1.8 bcm annually from 2000 until 2016; with Ruhrgas (Germany) for annual deliveries of 1.5 bcm from 2000 until 2010; and with Frangaz (France) for annual deliveries of up to 2.0 bcm from 1999 until 2004. In addition, contracts with Ruhrgas requiring natural gas deliveries of 13 bcm a year have been extended until 2020. Under existing contracts the volume of gas to be supplied to the European markets on a take or pay basis will reach, as a minimum, 165 bcm by 2010.

## Central and Eastern Europe

Gazprom enjoys a dominant position in the Central and Eastern European gas markets due to existing historical, economic and political reasons as well as the proximity of the Central and Eastern European markets to Russia.

In 2001, Gazprom exported 40.4 bcm of natural gas to Central and Eastern Europe (38.6 bcm in 2000), which amounted to 9.1% of the total natural gas supplied by Gazprom in 2001. The following table sets out natural gas export volumes to Central and Eastern Europe for the periods indicated:

Country	Year Ended 31 December			6 month period ended 30 June
	1999	2000	2001	2002
	(bcm)	(bcm)	(bcm)	(bcm)
Hungary .....	7.4	6.5	8.0	4.5
Slovakia.....	7.5	7.9	7.5	4.0

Source: Gazprom.

(1) Totals may not add up due to rounding.

Until recently, Gazprom contracted with its Central and Eastern European customers for the supply of natural gas on the basis of shorter-term contracts. In the last few years, Gazprom (acting through Gazexport) has adopted a policy of negotiating medium-term and long-term contracts with a gradual introduction of Western European contract standards as the market economies of Central and Eastern Europe further develop. The majority of the existing contracts contain similar features, including take-or-pay clauses and price setting mechanisms (which are mostly based on European liquid oil product prices) and do not allow for unilateral termination. Gazprom supplies natural gas in Central and Eastern Europe through state-owned natural gas distribution companies and in certain countries through joint ventures in gas marketing and distribution companies. Gazprom considers the formation of new joint ventures for the transportation and marketing of Russian natural gas as a promising form of co-operation with Central and Eastern European countries. Gazprom is paid in fully convertible currency for the natural gas it sells in Central and Eastern Europe.

Prior to 1999, Gazprom had supplied a significant volume of its natural gas to Central and Eastern Europe under the Yamburg Inter-Governmental Agreements, agreements which originally provided for the settlement of construction costs by the delivery of natural gas to certain countries in Central and Eastern Europe and the German Democratic Republic (now part of the Federal Republic of Germany). These Agreements expired in 1999. On 10 October 2001 an agreement was entered into between the Government and the Czech Republic whereby it was agreed that, in consideration of a single payment to the Czech Republic of approximately U.S.\$3,500,000 (to be made prior to 10 November 2001), the Government be released from all outstanding obligations to deliver or to procure the delivery by Gazprom of gas to the Czech Republic at preferential rates pursuant to the Yamburg Inter-Governmental Agreements. This payment has not yet been made as the Czech Republic has yet to fulfil certain conditions precedent to the agreement.

## The FSU

Historically, Gazprom has had, and continues to have, a dominant position in the supply of natural gas to the FSU. In 2001, Gazprom exported 39.6 bcm of natural gas (43.4 bcm in 2000) which constituted approximately 8.9% of the total natural gas supplied by Gazprom in 2001) to six countries of the FSU: the Ukraine, Belarus, Moldova, Lithuania, Latvia and Estonia. During the six months ended 30 June 2002, Gazprom delivered a further 23.1 bcm of natural gas to the FSU countries. Ukraine accounted for over 60% of these deliveries during this period.

The following table sets out natural gas export volumes to the FSU countries (excluding Russia) for the periods indicated:

Country	Year Ended 31 December			6 month period ended 30 June
	1999 <i>(bcm)</i>	2000 <i>(bcm)</i>	2001 <i>(bcm)</i>	2002 <i>(bcm)</i>
Ukraine .....	29.5	27.2	21.9	13.9
Belarus .....	12.2	10.8	11.6	6.0
Lithuania .....	1.8	2.0	2.2	1.2
Moldova.....	2.2	1.8	2.1	1.2
Latvia.....	1.0	1.0	1.1	0.5
Estonia .....	0.5	0.6	0.7	0.3
Total.....	47.2	43.4	39.6	23.1

Source: Gazprom.

Current annual contract prices for natural gas supplied by Gazprom to the FSU countries are higher than current Russian domestic prices and are settled on the level close to the world prices taking into account prices for alternative kinds of fuel and intergovernmental agreements in existence with these countries.

In 1999-2001 Gazprom limited its export supplies to the FSU countries (which have experienced economic decline over recent years) in order to avoid further exposure to non-paying customers. However, Gazprom expects these markets to recover and plans to supply 49.5 bcm of natural gas to the FSU by 2005 and 45.8 bcm by 2010. In 2000 Gazprom signed long-term contracts with consumers in Lithuania, Latvia and Estonia (the "Baltic States") to supply 25.5 bcm of natural gas between 2000 and 2005.

The Ukraine, Gazprom's largest FSU customer, is traversed by major pipeline routes from the natural gas fields of Western Siberia to export markets in Europe and is the source of substantial amounts of industrial supplies for Gazprom. Gas exports from Russia to the Ukraine are based on annual inter-governmental agreements with respect to prices and export volumes. Currently, Gazprom is dependent on the Ukraine for the transit of substantially all its natural gas sold in Western Europe. However, the Yamal-Europe and Blue Stream pipelines, which are nearing completion, will reduce Gazprom's dependence on the Ukraine for the transportation of natural gas to Western Europe. On the other hand, the Ukraine is dependent on Gazprom to meet its domestic natural gas requirements. This interdependence is taken into account in negotiations over a number of matters, including the terms of payment for natural gas supplied by Gazprom and transit fees charged by the Ukraine.

Although the prices charged by Gazprom in the FSU are lower than those charged in Western Europe, the failure of a number of FSU customers to pay Gazprom for supplies of natural gas has resulted in substantial debts to Gazprom. As at 31 December 2001, natural gas with a sales value of more than U.S.\$2.0 billion (including VAT levied in Russia but excluding charges for late payment) had been supplied to customers in the FSU for which payment had not been received. The amounts owed were due from customers in the Ukraine (U.S.\$1.4 billion), Belarus (U.S.\$157 million) and Moldova (U.S.\$512 million), Gazprom's largest natural gas markets in the FSU. As at 30 June 2002, the amounts owed by these countries had not changed materially and totalled U.S.\$2.2 billion. The amounts owed

by customers in Belarus increased by U.S.\$43 million and by those in Moldova—by U.S.\$47 million. As at 30 June 2002, the amounts owed totalled U.S.\$2.2 billion, with the amount owed by customers in Belarus having increased by U.S.\$43 million and from those customers in Moldova by U.S.\$47 million. The Baltic States were the most reliable paying customers among the natural gas-consuming FSU countries. Since June 2000, in line with Gazprom's policy to limit supplies to non-paying customers, deliveries of natural gas to the Ukraine are in payment for Gazprom's use of transit services through the Ukraine only. Accordingly no further debts for the non-payment of gas delivered to the Ukraine have accrued.

Gazprom's management is taking specific measures to reduce arrears for payments of natural gas owed by FSU customers. In 2000, Moldova restructured a portion of its debt to Gazprom by issuing U.S.\$90 million worth of sovereign notes with a Repayment Schedule over seven years. In 2001 Gazprom's contribution of U.S.\$60 million into the charter capital of the Moldova Gas was set off against indebtedness in relation to gas supplied in 1997. An amount of U.S.\$276 million owed by the Ukraine was set off against delivery of military hardware to the Ministry of Defence of the Russian Federation. In consideration of this delivery of military hardware Gazprom received tax credits to an equivalent value of the amount owed by the Ukraine. Towards the end of 2001, the Government, the Cabinet of Ministers of the Ukraine and the Government of Moldova signed agreements which provided for the restructuring of the Ukraine's and Moldova's debt for the previously supplied natural gas in the amounts of U.S.\$1.4 billion and U.S.\$0.9 billion respectively, although the restructuring arrangements with respect to the Ukraine are yet to be finalised.

## **Russia**

According to Goskomstat (the State Committee for Statistics), the share of natural gas production as a percentage of the total volume of primary energy production in Russia increased from 20.5% in 1980 to 39.7% in 1990 and to 47.7% in 2000, while the share of oil production decreased from 38.9% in 1990 to 32.8% in 2000 and coal production from 14.5% in 1990 to 12.2% in 2000. The strict regulatory controls imposed on the rise of natural gas prices compared to other fuels has led to the shift towards the increased use of natural gas. As a result of this pricing policy adopted by the Government, natural gas prices at the end of the year 2001 were 1.4 times lower than power-generating coal and three times lower than fuel oil as referenced against 1 tonne of equivalent fuel. In contrast to many other major industrial economies where gas is primarily used for household consumption, in Russia natural gas is sold principally for use in electricity generation and heavy industry. Gazprom believes that electricity generation accounted for 38.6% of total natural gas consumption in Russia in 2001, while industrial users accounted for 32.4%, households consumed 14.5%, and budget and municipal organisations accounted for 14.5%.

Currently, wholesale natural gas prices and transportation tariffs are regulated by the State authorities. Wholesale prices for natural gas supplied to household consumers are lower than the prices for natural gas supplied to industrial consumers. Pursuant to the Resolution of the Government of the Russian Federation No. 1021 dated 29 December 2000, the Government intends to abandon the State regulation of prices for natural gas delivered to end-consumers. Instead, the Government intends to continue regulating tariffs for natural gas transportation services provided by Gazprom (See Appendix B – Part I "Overview of the Russian Gas Industry and its Regulation").

In 2001, Gazprom delivered 282.1 bcm of natural gas (compared to 255.0 bcm in 2000) to Russian consumers. This amounts to 62.6% of the total natural gas supplied by Gazprom in 2001. During the six months ended 30 June 2002, Gazprom delivered 145.4 bcm of natural gas to Russian customers.

Gazprom's natural gas sales to domestic users are confined to natural gas supplies to wholesalers rather than end users. In 2001, approximately 85% of the total volume of natural gas sold by Gazprom within Russia was distributed through third party regional natural gas distribution companies and 15% of natural gas was sold by Gazprom directly to large industrial consumers.

Mezhregiongaz (a wholly-owned subsidiary of Gazprom) accounts for substantially all of Gazprom's domestic sales of natural gas. Mezhregiongaz either sells natural gas through regional gas companies and gas distribution companies which enter into direct sales contracts with end consumers

and gas distribution companies., as well as through its regional branches which enter into direct sales contracts with end consumers and gas distribution companies on behalf of Mezhhregiongaz. Gas for household use is delivered by the regional gas companies through gas distribution companies. In addition to selling gas to households, gas distribution companies deliver gas to all companies through low and middle pressure pipelines.

Gazprom has recently accumulated controlling equity stakes in various regional distribution companies that own low pressure pipeline assets with a cumulative pipeline length of 329 thousand kilometres. Such equity stakes were transferred to Gazprom in lieu of a debt repayment. Gazprom believes that due to the new cost based system of tariffication for gas distribution the operation of such regional distribution companies will not be loss making.

Simultaneously with the formation of regional gas companies, Mezhhregiongaz altered its contracting policies. In addition to long-term contracts with terms of up to 10 years (subject to annual delivery volume adjustments), Mezhhregiongaz now widely uses one year gas supply contracts. The main terms and conditions of such contracts are as follows:

- full payment for any natural gas received by the consumer. Such payment, less any advance deposits, must be made on or before the 10th day of the month immediately following the month of the relevant natural gas deliveries to that consumer;
- in the event of the consumer's failure to pay for natural gas supplies on the due date, a penalty will be charged. Should a consumer continue to fail to pay, its natural gas supplies will be restricted and finally, the consumer may be disconnected; and
- natural gas off-take by consumers in excess of the agreed daily quotas without the prior consent of the supplier entails a surcharge payable on such excess consumption (winter surcharge of 50% and summer surcharge of 10%).

### **Delayed Payments for Gas Deliveries in Russia**

During 2001, positive results have been achieved with respect to the collection of payments for natural gas delivered to Russian consumers. This has been due to the resurgence of the Russian economy and Gazprom's co-operation with consumers and administrations of the various republics, federal cities, autonomous regions and other Subjects of the Russian Federation. As at 30 June 2002, arrears of payments for natural gas supplied to Russian customers (including Russian VAT but excluding late payment charges) amounted to approximately RUR 43.4 billion. As at 31 December 2001, such arrears amounted to approximately RUR 43.5 billion compared, compared to RUR 80.1 billion as at 31 December 2000. Cash accounted for 91.9% of sales proceeds collected during the first six months ended 30 June 2002 and 83.3% and 61.7% in 2001 and 2000, respectively.

Pursuant to various Government regulations, there are certain consumers who can not be disconnected. These consumers include organisations such as hospitals, household utilities (such as water and electricity suppliers), military and state telecommunication organisations as well as other consumers whose operations are vital for the Russian population's life support and environmental safety.

### **Competition**

Gazprom has been and continues to be a major supplier of natural gas in Europe. European gas markets are, however, undergoing significant restructuring as a result, in particular, of the EU Gas Directive which came into force in 1998. The purpose of the Directive is to deregulate and liberalise the EU gas market.

This has resulted in increased competition among the major suppliers of natural gas to the region, namely Russia, Norway, Algeria and The Netherlands. Gazprom's substantial reserves and the proximity of major Russian natural gas fields to Europe are expected to support Gazprom's competitive position in the Western European market.

The table below shows the proportion of European natural gas supply attributable to each major supplier of natural gas to the European market in 2001 *[Update — table does not add up]*.

<u>Country</u>	<u>% OF EUROPEAN NATURAL GAS SUPPLY</u>
Russia (Gazprom) .....	25.9
United Kingdom .....	21.7
The Netherlands.....	13.6
Algeria .....	11.7
Norway .....	10.6
Denmark.....	1.6
Italy.....	3.1
Germany.....	4.1
Nigeria .....	1.1
Other .....	6.4

Source: CEDIGAZ —“Natural Gas in the World — 2001”, Survey August 2002.

Whilst production in the countries of Western Europe falls as natural gas reserves in the region are depleted, a rise in exports from Algeria and Norway is becoming more pronounced as these two countries strive to increase their market share.

In Russia and the FSU countries, Gazprom faces competition from other oil and natural gas suppliers, in particular from independent suppliers in Russia and natural gas producing companies in Turkmenistan, Kazakhstan and Uzbekistan. Since April 1998, the independent Russian suppliers have been granted non-discriminatory access to the existing UGSS capacity in Russia. The independent suppliers (24 in total, including major users such as Itera, Pur-Land, Tomskneft, Arctic Gas, TransNafta and others) have historically been, and continue to be, competitors to Gazprom, mainly because of, in Gazprom's view, the Government's protectionist policy in providing preferential terms of gas sales for such independent suppliers (for example, zero excise tax on the sale of gas in Russia, which was in force until 1 July 2000 and a low transportation tariff set by the Federal Energy Commission for transportation of natural gas through the UGSS). Additionally, such independent suppliers can generally be more flexible than Gazprom with respect to the contractual terms and conditions that they can offer to customers in Russia and the FSU as they are not bound by the same strict regulatory requirements that apply to Gazprom.

In 2001, the independent suppliers accounted for 11.6% of natural gas transported through the UGSS. However, the competitive position of alternative suppliers is limited by the relatively small size of their reserve base, a relatively high cost of production and their dependence on access to Gazprom's transportation network.

Itera is the largest independent user of the UGSS. In addition to its own production, Itera purchased natural gas from the Yamal-Nenets Region, which received natural gas from Gazprom in lieu of mineral resource base restoration tax payments to the Region's budget. Since 1 January 2001 Gazprom has discontinued the practice of supplying natural gas in lieu of tax payments to the Yamal-Nenets Region.

Itera has significantly increased its reserve base by acquiring licences for exploration and production of natural gas reserves in Russia, as well as by acquiring other companies holding such licences, including those where Gazprom has or has had minority stakes. In April 2002, the Group completed the repurchase of 32% of the shares in Purgas from Itera pursuant to the repurchase option provided by a share purchase agreement dated 10 February 1999. Purgas has a licence for the development of the substantial Gubkinskoye gas field in Western Siberia. In connection with the return of these Purgas shares, Gazprom has paid Itera RR32 thousand and financed the repayment of RR5.8 billion financing provided by Itera to Purgas to finance development work.

In 1998, Itera acquired Gazprom's 51% stake in Rospan, a Russian natural gas producing company with over 240 bcm of licensed reserves which, due to a difficult basin structure, required a high level of capital investment for such reserves to be developed.

In August 2002 the Board of directors of Gazprom approved the increase of Gazprom's share in the equity capital of OAO Severneftegazprom from 49% to 100% through the exchange of minority stakes in Tarkosalneftegas and Sibneftegas held by Gazprom's subsidiaries for a 51% stake in OAO Severneftegazprom held by ITERA's affiliates TNG Power GmbH and TNG Services. OAO Severneftegazprom holds the licence to the Yuzhno-Russkoye field with proven natural gas reserves of 600 bcm. Annual production at the Yuzhno-Russkoye field is estimated at 15 bcm.

Initially, Itera focused on customers in the Ukraine, Moldova and Belarus with a poor record of payments for natural gas supplies. Itera enjoys a higher degree of flexibility in dealing with these customers as compared to Gazprom which is reliant on these countries for transit of natural gas to Europe and whose contractual terms for the supply of natural gas are dependent on inter-governmental agreements with those countries.

Gazprom has confirmed that all transactions with Itera have been conducted on an arm's length basis and on normal commercial terms and that no member of Gazprom's Management Committee or Board of Directors or any member of their respective families or person over whom or whose assets or resources any such member of the Management Committee has direct or indirect control or significant influence or over whom any such member, together with any other party or parties has common control or significant influence, own, directly or indirectly, any equity interest in Itera.

In early 2001, the Board of Directors of Gazprom appointed PricewaterhouseCoopers to review the financial, property, commercial and production relations between Gazprom and the Itera group for the years 1997 to 2000. In May 2001, the Board of Directors also adopted a code of practice entitled "Procedure for approving transactions involving stocks, shares or participation shares owned by Gazprom, its subsidiaries or affiliated companies" (the "Procedure"). PricewaterhouseCoopers has completed its review and presented the Report to a meeting of the Board of Directors in July 2001. The Board of Directors took the decision that the Report will remain confidential and that it will not publish or disclose the contents of the Report. The Board of Directors considered the Report and found that certain of its recommendations had already been addressed by the adoption of the Procedure. The Board of Directors has directed the Management Committee to draw up plans for the implementation of those recommendations made in the Report that are not addressed by the Procedure.

## **Reserves**

As at 31 December 2001, Gazprom's wholly-owned subsidiaries held production licenses for approximately 26.0 tcm of A, B and C1 natural gas reserves and subsidiaries, in which Gazprom holds less than 100% of the shares, held production licenses for another 5.0 tcm of A, B and C1 natural gas reserves, of which 2.1 tcm is attributable to Gazprom in proportion to its actual shareholding. Gazprom's total A, B and C1 estimated natural gas reserves of 28.1 tcm are equivalent to approximately 60% of the total estimated A, B and C1 natural gas reserves in Russia.

Gazprom estimates its hydrocarbon reserves in accordance with Russian classifications and methodologies. Russian reserves classification standards differ significantly from standards accepted by international practices, in particular, with respect to the manner in which and the extent to which commercial factors are taken into account. Once they are reviewed and approved by the Central Reserve Commission, reserve estimates may be subject to minor changes. The results are to be published in the State Balance of Natural Resources.

In 1997-2000, DeGolyer & MacNaughton, a U.S. independent engineering consultancy evaluated, on the basis of international classifications and methodologies, approximately 84% of Gazprom and its subsidiaries' proved and probable natural gas reserves as defined by the Society of Petroleum Engineers (representing 18 of Gazprom's oil and gas fields). DeGolyer & MacNaughton (see Appendix B — Part II) confirmed:

- high accuracy of estimates for initial geological hydrocarbon reserves (approximately 98%);
- high percentage of reserves migrating to proved category (within a 90% accuracy); and
- economic effectiveness of gas condensate production in the audited fields.

As at 31 December 2000, proved and probable natural gas reserves in Gazprom's evaluated fields amounted to 18.5 tcm according to DeGolyer & MacNaughton. With a 10% discount rate factored in, these reserves had an estimated net present value of U.S.\$49.4 billion as at 31 December 2000.

Gazprom is in the process of obtaining a revised and updated independent evaluation of its natural gas reserves on the basis of international classifications and methodologies.

Substantially all hydrocarbon exploration and production licences held by Gazprom's subsidiaries were granted in 1993-1995 in accordance with the Law on Subsoil adopted in 1992 and Regulations on the Licensing and Use of Subsoil issued in 1992.

Extension of licences upon expiration is subject to approval by the federal and regional authorities which are signatories to the licences. The licences impose certain obligations on Gazprom to provide employment, develop local infrastructure, pay certain local and federal taxes and meet certain requirements relating to environmental matters. Licences may be suspended or revoked if the licencees fail to comply with their terms (See "Appendix B — Part I — Overview of the Russian Gas Industry and its Regulation"). Gazprom believes that it is substantially in compliance with the terms of all of its material subsoil licences (although technical breaches may have occurred).

As at 30 June 2002, the Group held:

- 80 production licences with initial terms of 20 to 25 years, with remaining terms of mostly between 13 and 20 years;
- 15 combined exploration and production licences with initial terms of 25 years, with remaining terms of mostly between 18 and 25 years; and
- 27 exploration and appraisal licences with initial terms up to 5 years (without development rights) and with remaining terms of up to 5 years.

Gazprom's reserves are highly concentrated. Out of total A, B and C1 natural gas reserves of 28.1 tcm, 22.9 tcm (or 81.5%) are located in Western Siberia. Most of these reserves are concentrated in very large fields, such as Urengoiszkoye, Bovanenkovskoye, Yamburgskoye and Zapolyarnoye. More than half of Gazprom's reserves are in the Senomanian deposit which is characterised by low bedding depth, high delivery rates of wells and dry natural gas.

As at 31 December 2001, Gazprom, through its wholly owned subsidiaries or through subsidiaries, in which Gazprom holds less than 100% of the Shares, held production licences for approximately 1,293.8 million tonnes of A, B and C1 gas condensate reserves (attributable to Gazprom in proportion to its actual shareholding), of which 779.7 million tonnes (or 60.3%) are located in Western Siberia, and 584.6 million tonnes of oil, of which 473.7 million tonnes (or 81.0%) are located in Western Siberia. The remaining reserves are located in other regions of Russia.

The following table sets out, as at 31 December 2001, a summary of all Gazprom's hydrocarbon reserves for which production licences had been awarded:

Region	Gas	Gas	Oil
	(A+B+C <sub>1</sub> )	Condensate (A+B+C <sub>1</sub> )	(A+B+C <sub>1</sub> )
	(tcm)	(million tonnes)	(million tonnes)
<b>Reserves controlled through the wholly-owned subsidiaries</b>

Note:

(1) Includes the North Urengoi, Pestsov, West Pestsov and Yen-Yahinsk fields (Senomanian formation).

The following table sets out, as at 31 December 2001, A, B and C1 natural gas reserves at Gazprom's major natural gas fields currently under development:

<u>Fields</u>	<u>Reserves (A+B+C) (tcm)</u>
Yamal Peninsula:	
Bovanenkovskoye.....	4.4
Kharasaveiskoye .....	1.3
Barents Sea:	
Shtokmanovskoye (Gazprom's share) .....	1.4

Source: Gazprom.

In 2000-2001, Gazprom discovered two large offshore natural gas fields (Kamennomysskoye and Severokamennomysskoye) in the delta of the River Ob. Tentative estimates of A, B, C1 and C2 natural gas reserves in those fields exceed 450 bcm, which would add approximately 1-2% to Gazprom's existing reserve base (calculated on the basis of Russian classifications and methodologies).

Gazprom's current strategy is to focus on the exploration of new fields and natural gas-bearing horizons in proximity to already developed fields so as to achieve a balance between production and reserves growth.

The following table sets out the number of wells drilled by Gazprom in the period from 1999 to 2001, the number of productive wells and an estimate of the total A, B and C1 natural gas reserves in such wells:

	<u>1999</u>	<u>2000</u>	<u>2001</u>
Number of exploration wells drilled of which:			
productive .....	18	14	12
Addition to natural gas reserves resulting from geological exploration (bcm) .....	12	10	5
Total.....	<u>186</u>	<u>76</u>	<u>166</u>

## **Production**

### **Overview**

In 2001, Gazprom produced 512.0 bcm of natural gas, 9.5 million tonnes of gas condensate and 704.4 thousand tonnes of oil compared to 523.2 bcm of natural gas, 9.3 million tonnes of gas condensate and 719.0 thousand tonnes of oil produced in 2000 respectively.

Gazprom produces natural gas, gas condensate and oil from 72 fields located in various regions of the Russian Federation. The main production regions are as follows:

- *West-Siberian region.* Gazprom's main natural gas production region which is characterised by severe weather conditions. There are 12 active natural gas, gas condensate and oil and gas condensate fields which account for 92.5% of natural gas, 52.4% of gas condensate and 72.2% of oil produced by Gazprom. Several production subsidiaries, including Nadymgazprom, Urengoygazprom, Yamburggazdobycha and Noyabrskgazdobycha operate in this region.
- *Urals region.* There is one active oil and gas condensate field, Orenburgskoye, which accounts for 4.5% of natural gas, 3.8% of gas condensate and 27.3% of oil produced by Gazprom. The operating company for this field is Orenburggazprom, which produces, processes and transports natural gas.

- *North-European region.* This region is characterised by severe weather conditions and has 4 active gas condensate fields accounting for 0.6% of natural gas and 4.0% of gas condensate produced by Gazprom. The operating production company for this region is Severgazprom.
- *Volga region.* There is one active gas condensate field in the region, Astrakhanskoye, which accounts for 2.1% of natural gas and 38.7% of gas condensate produced by Gazprom. The operating company for this field is Astrakhangazprom.
- *Northern Caucasus Region.* There are 54 fields which account for 0.4% of natural gas, 1.1% of gas condensate and 0.5% of oil produced by Gazprom. Production of hydrocarbons is carried out by Kubangazprom and Kavkaztransgaz.

## Gas

In 2001, Gazprom produced 512.0 bcm of natural gas (compared to 523.2 bcm in 2000) which accounted for approximately 88.1% of the total amount of natural gas produced in Russia. The remainder of natural gas production in Russia is by independent natural gas producers as well as by certain oil companies.

As at 31 December 2001, Gazprom had a total of 9,305 natural gas wells and 569 oil wells in its fields.

The table below illustrates natural gas production for Gazprom's major natural gas fields for the periods indicated:

	Year Ended 31 December			6 month period ended
	1999	2000	2001	30 June
	(bcm)	(bcm)	(bcm)	(bcm)
Urengoiskoye .....	209.1	193.3	180.4	86.5

Total Western Siberia .....	507.0	484.0	473.5	246.1
Orenburg .....	24.8	24.1	22.8	10.9
Others .....	13.8	15.1	15.7	7.8
Total Gazprom.....	545.6	523.2	512.0	264.8

Source: Gazprom.

Note:

- (1) The licence to develop the Western-Tarkosalinskoye field is held by Purneftegazgeologia, an entity unrelated to Gazprom. Gazprom is contracted to develop the field and builds its infrastructure, receiving 90% of natural gas production in return. The figures in the table reflect the 90% of the natural gas production that Gazprom is to receive pursuant to the terms of the contract with Purneftegazgeologia.

Gazprom is also developing new fields, particularly in the Nadym-Pur-Taz region, with a view to utilising the increased transmission capacity which will become available following the completion of the construction of the Yamal-Europe pipelines.

Between 1996 and 2001, Gazprom commenced the development of the West-Tarkosalinskoye field, the Yamsoveiskoye field, the Kharvutinskoye area of the Yamburgskoye gas condensate field and the Western and Northern areas of the Komsomolskoye field. In addition, two gas processing units have

been put on stream at the Astrakhanskoye natural gas condensate field; both units have been commissioned at the Neocom deposit of the Yamburgskoye gas condensate field and a combined gas processing plant has been put into operation at the Yubileynoye field. In 2001, total production of gas from these fields amounted to 100.4 bcm. In addition, 22 booster compressor stations with total installed capacity of 1,343 megawatts commenced operation between 1996 and 2001, and 1,038 operating wells were brought on stream.

Infrastructure is being developed at the Zapolyarnoye field. This field commenced commercial production in the third quarter of 2001, after a gas treatment plant ("GTP") had been placed in operation which allowed 7.1 bcm of gas to be delivered during the remainder of 2001. By the end of 2002 it is anticipated that this GTP will reach its full operating capacity of 35 bcm per annum. For the 6 month period ended 30 June 2002 gas production was 15.8 bcm.

By the end of 2005, once the planned second and third of GTP are commissioned, gas production is expected to rise to 100 bcm per annum. Gazprom believes that this peak rate of gas production can be sustained for a 12 year period. Gazprom believes that by bringing the Zapolyarnoye field on stream will compensate for the declining production in mature fields such as Urengoykoye and the overall decrease in natural gas production in Western Siberia.

Gazprom intends to maintain an average annual production level of 530 bcm between the years 2003 and 2010. In order to maintain such average annual production levels. Gazprom has determined that the gas and gas condensate fields of both the Yamal Peninsula and the Karskoye Sea shelf need to have commenced production in addition to the anticipated production levels at developed fields with existing infrastructure in the years 2007 to 2010.

### **Gas Condensate**

Gazprom's gas condensate production in 2001 amounted to 9.5 million tonnes (compared to 9.3 million tonnes in 2000). 91.1% of such gas condensate was produced from the Urengoykoye, Astrakhanskoye and Yamburgskoye fields. Gazprom intends to increase condensate production, particularly in the Yamburgskoye and Astrakhanskoye fields and bring on stream the En-Yahinskoye field during 2003.

The table below illustrates gas condensate production from Gazprom's major fields for the periods indicated:

	Year Ended 31 December			6 month period ended 30 June
	1999 (thousand tons)	2000 (thousand tons)	2001 (thousand tons)	2002 (thousand tons)
Urengoykoye .....	3,772.7	3,516.5	3,635.6	1,745.4
Yamburgskoye .....	1,554.5	1,519.3	1,335.7	761.8
Astrakhanskoye.....	3,046.9	3,413.4	3,670.5	1,860.3
Others .....	799.5	846.0	840.2	422.1
Total.....	9,173.6	9,295.2	9,482.0	4,789.6

Source: Gazprom.

The production of gas condensate has increased over recent years as new gas condensate fields have been brought on stream.

### **Oil**

In 2001, Gazprom produced approximately 704.4 thousand tonnes of oil (compared to 719.0 thousand tonnes in 2000) from the perimeters of its two main gas condensate fields, namely Urengoykoye and Orenburgskoye.

The table below illustrates oil production in Gazprom's major fields for the periods indicated:

	Year Ended 31 December			6 month period ended 30 June
	1999	2000	2001	2002
	(thousand tons)	(thousand tons)	(thousand tons)	(thousand tons)
Urengoykoye .....	543.1	512.0	508.3	254.4
Orenburgskoye .....	173.4	205.5	192.6	94.2
Others .....	–	1.5	3.5	–
Total.....	716.5	719.0	704.4	348.6

Source: Gazprom.

### Gas and Gas Condensate Processing

Gazprom operates six natural gas and gas condensate refineries which remove hazardous and corrosive substances from natural gas and gas condensate, thoroughly dry the natural gas and prepare it for transportation. The stabilisation of gas condensate results in liquefied gases and a broad range of oil products.

Natural gas and gas condensate refineries are sophisticated, state of the art plants that combine chemical facilities with petroleum refining facilities. Some plants have implemented unique technologies for treating natural gas with a high sulphur content (the Astrakhan plant treats natural gas with hydrogen sulphide and carbon dioxide content reaching 40%), and produce odorants, technical carbon and gaseous and liquid helium. All such plants are directly linked to respective gas condensate fields and constitute single technologically-related complexes.

*Astrakhan Gas Refinery.* This is a refinery for the processing of natural gas with a high sulphur content and gas condensate extracted from the Astrakhan gas condensate field. The plant comprises two lines, each having an annual capacity of 6 bcm of refined natural gas. The refinery's products include:

- dry market-grade natural gas which is fed into trunk pipelines;
- natural gas-derived sulphur;
- motor gasoline;
- diesel;
- residual fuel oil;
- industrial-grade propane/butane mixture; and
- stabilised gas condensate.

*Orenburg Gas Refinery.* One of the world's largest refineries, it processes natural gas with a high sulphur content and gas condensed hydrocarbons. The refinery's products include:

- dry market-grade natural gas;
- stabilised gas condensate;
- liquefied natural gas;
- multi-component hydrocarbon distillate (MHD);
- natural gas-derived sulphur; and
- odorants.

*Orenburg Helium Plant.* This is Russia's largest producer of helium. The plant's products include:

- gaseous and liquefied helium;
- ethane;
- multi-component hydrocarbon distillate (MHD); and
- liquefied natural gas.

*Sosnogorskys Gas Refinery.* The refinery's products include:

- dry market-grade natural gas;
- liquefied natural gas;
- stabilised gas condensate;
- motor gasoline; and
- technical carbon.

The West Siberian refining complex comprises two facilities: the Urengoy Condensate Preparation Plant and the Surgut Condensate Stabilisation Plant.

*Urengoy Condensate Preparation Plant.* The plant's products include:

- de-ethanised natural gas (used as feedstock for further refining at the Novo-Urengoy Gas Chemistry Complex—see "International Projects and Alliances");
- de-ethanised condensate;
- stabilised gas condensate;
- motor gasoline; and
- diesel.

*Surgut Condensate Stabilisation Plant.* One of the world's largest refining complexes, it processes oil and gas condensate mixture produced from the West Siberian fields. The refinery's products include:

- stabilised condensate;
- motor gasoline;
- diesel;
- liquefied gases; and
- pentane-hexane fractions.

The table below shows the volumes of key products which were produced and refined by the Group in the periods indicated:

	Measuring Unit	Year Ended 31 December			6 month period ended 30 June
		1999	2000	2001	2002
<b>Processing of the raw material:</b>					
Gas processing .....	bcm	35	35	35	17
Primary processing of oil and gas condensate .....	thousand tonnes	4,950	4,881	4,966	2,633

Source: Gazprom.

## Transportation

Gazprom owns and operates the UGSS, a single centrally controlled system for natural gas production, processing, transportation, storage and deliveries. The UGSS includes the world's largest high pressure trunk and distribution pipeline system with approximately 155,000 km of pipelines. Gas transportation is powered by 254 compressor stations with a total capacity of approximately 42,600 MW. Seasonal peak loads are levelled off using 22 underground natural gas storage facilities.

Gas for domestic consumption and export is transported for an average distance of approximately 2,500 km in Russia. Gazprom's dispatch management centre, located in Moscow, controls and manages the transportation of gas in Russia.

The total volume of natural gas consumed by the pipeline system was approximately 45.7 bcm in 2001, 86% of which was used for internal consumption and the rest absorbed by technical losses (including natural gas leakage).

The following table sets forth some key figures in respect of the UGSS natural gas balance for the periods indicated (excluding Central Asia transit gas):

Gas Balance Items	Year Ended 31 December			6 month period ended 30 June
	1999	2000	2001	2002
	(bcm)	(bcm)	(bcm)	(bcm)
<b>Total gas supplies, including</b> .....	607.7	608.8	590.3	302.6
Gazprom's own production .....	533.4	510.1	499.0	257.9
Gas from independent suppliers.....	17.9	33.4	40.5	21.9
Withdrawals from underground storage .....	52.5	53.3	48.3	20.5
<b>Total deliveries, including</b> .....	607.7	608.8	590.3	302.6
Additions to underground storage.....	52.6	60.3	46.8	22.0
Deliveries to customers in Russia.....	299.8	308.4	317.5	162.6
Exports to Europe .....	126.8	129.0	127.0	65.8
Deliveries to customers in CIS and Baltic countries .....	77.7	63.6	52.9	27.5
Technological needs and transportation system losses <sup>(1)</sup> .....	50.8	47.1	45.7	24.5
Changes in natural gas volume within UGSS pipelines.....	-	0.4	0.4	0.2

Source: Gazprom.

Note:

(1) Includes own consumption required to run the natural gas pump turbines, plus technological losses, including gas leakages.

Gazprom's pipeline system transports natural gas principally from the large Western Siberian fields westward towards the heavily populated regions of Russia, the main export markets of Western and Central and Eastern Europe, Turkey and certain FSU countries. Other parts of the pipeline system originate in the Volga-Urals region natural gas fields, including the Orenburgskoye and Astrakhanskoye fields. Several large pipeline systems from Kazakhstan also enter Russia from natural gas fields in Turkmenistan, Uzbekistan and Kazakhstan.

All of the natural gas exported by Gazprom to Europe (except Finland) is transported through pipelines maintained by other countries, primarily the Ukraine. Gazprom pays transit fees for the use of these pipelines. The negotiations of these fees and access to these pipelines are important elements of Gazprom's export business. Transit fees are a significant element of the natural gas price to end users in Europe.

The maintenance of Gazprom's natural gas transportation business is organised on a regional basis through specialised gas transportation subsidiaries and a number of production subsidiaries which also operate pipelines. The gas transportation subsidiaries are responsible for the operation and maintenance of pipelines and for the transit of natural gas to regional and local distribution companies or directly to end-consumers. Gazprom's subsidiaries have laid, at their own expense, 1,000 km of gas transportation pipelines in 2001. Gazprom also owns various interests in regional and local distribution companies equating to around a 10% market share of the Russian gas distribution business.

The high level of integration of Gazprom's pipeline network, achieved by the use of multiple and parallel pipelines, inter-connectors and underground storage facilities, ensure that natural gas deliveries to distributors, export customers and consumers are reliable. Gazprom believes that within the past ten years there have been no significant supply interruptions to consumers, despite several pipeline failures, as a result of the use of available spare transportation capacity within the UGSS.

The construction of Gazprom's gas pipeline system was started 57 years ago with the first Saratov-Moscow pipeline, however the majority of Gazprom's gas pipeline system was constructed during the period from 1970 to 1990. The age of the pipeline system, as at 30 June 2002, is shown in the table below:

	%
Up to 10 years .....	22
11-20 years .....	41
21-33 years .....	23
Over 33 years.....	14
Total .....	100

Source: Gazprom.

The continuous and long term operation of the pipeline system, combined with ageing and worn and obsolete equipment, dictate the maintenance requirements of the gas lines and compressor station facilities. Annual capital repairs and preventative maintenance programmes are carried out with a view to enhancing efficient gas flow distribution, reliable gas supply and technological and environmental safety of the transportation operations. Maintenance work is preceded by gas pipeline inspection achieved through various means. In 2001, 11,300 km of pipelines were inspected using in-the- pipe probes, while 40,000 km of trunk gas lines were checked using electric measurements. Following such diagnostic checks, 1,111 km of pipelines and 251 underwater crossings were overhauled. As a result of such pipeline repairs, the incidence of faults that involve interruptions or restrictions of gas supply dropped from 0.58 per 1000 km of pipelines in 1985 to 0.19 in 2001.

Under the auspices of the EBRD, 13 Western European companies, (in conjunction with Gazprom's specialists) conducted a two-year study of the UGSS between 1993 and 1995, in order to assess the system's condition and to formulate measures for improving its performance. The final report, which was based on an analysis of the operation of the UGSS in 1995, showed that, in most cases, the extensive branching structure of the UGSS, together with the availability of spare pipeline through put capacity, enabled natural gas flow to be either re-routed or increased in the case of an emergency.

Gazprom is continually working to improve the UGSS. It has developed a detailed programme to refurbish a number of its compressor stations and gas pipelines by year end 2005. The programme includes plans for the replacement of worn out and obsolete compressor gas pumping units with state-of- the-art hardware as well as the implementation of process controls and optimisation systems, both for individual pipelines and for the system as a whole. To date, this programme has resulted in 53 gas pumping units being refurbished and 35 replaced. The new units have a total power output of 508MW.

Gazprom believes that the programme will allow it to achieve a significant reduction in its in-house gas consumption as well as a reduction in atmospheric pollution. The programme has already delivered improvements with emissions in 2001 being 6,600 tons lower than in 2000. This figure includes a reduction of carbon oxide emissions by 3.5% and of nitrogen oxides emissions by 0.3%.

Gazprom outsources a significant amount of its pipeline construction work to third party contractors through a tender process. Construction contracts are awarded to the most competitive bidder by the Gazprom Tender Committee. Stroytransgaz has been a successful bidder for a large number of Gazprom's construction projects, due to the competitive terms that it has offered and its historical experience of previous successful co-operation with Gazprom. Gazprom has determined to establish its own construction company — Gazpromstroy, although Gazprom's management have indicated that it will continue to contract with Stroytransgaz and other contractors should the contractual terms offered by Stroytransgaz and other contractors prove to be more competitive.

Gazprom has confirmed that all transactions with Stroytransgaz have been conducted on an arm's length basis and on normal commercial terms.

Gazprom is in the process of acquiring a 25% equity interest in Stroytransgaz.

Gazprom provides the independent suppliers with access to the UGSS subject to the following requirements:

- Availability of spare transport capacity for the time period proposed by the independent supplier;
- Adequate quality and technical parameters of natural gas suppliers;
- Availability of secondary routes for supply and off-take of natural gas equipped with adequate metering devices; and
- Availability of natural gas supplies and relevant customer demand for the proposed time period.

During the year 2001 a total of 24 independent gas suppliers, with a cumulative volume of gas transported equating to 11.6% of total volume of gas transported through the UGSS, had access to Gazprom's transportation system.

### **Underground Storage**

Currently Gazprom operates 22 underground storage facilities in Russia. By the beginning of the 2002/2003 heating season market-grade natural gas reserves equal to 61.7 bcm of gas were stored in these storage facilities. The capacity of the underground storage facilities allows Gazprom to supply 17% of the annual volume of gas consumption from these facilities of which 25% is supplied in winter. Currently 5 new underground gas storage facilities are under construction.

In 2002 — for the autumn/winter 2002/2003 - pursuant to existing contracts, Gazprom arranged storage of 4.3, 2.5 and 2.1 bcm of natural gas in Ukraine, Germany and Latvia, respectively.

### **Electricity**

The operation of the industrial facilities owned by Gazprom is supported by Gazprom's own generation facilities. Currently Gazprom operates 9,500 electric power stations with a total capacity of 8.6 million kW. Production of electricity in 2001 reached 1.2 billion kW.

### **Communication**

Gazprom has developed an extensive internal communications network, which it maintains and operates in conjunction with the UGSS with a view to ensuring the technical reliability and safety of the UGSS.

The system consists of a ground based network and a satellite system. The ground based network includes 72,000 km of cable communication lines, 17,100 km of multi-channel radio lines and 628 automated telephone stations with total capacity of 245,000 numbers. The satellite system consists of the satellite "Yamal-100" and 105 land-earth stations which transmit to and receive signals from the satellite.

### **Strategy**

Gazprom's main strategic objective is to increase profitability and to further strengthen its position in the domestic, FSU and European gas markets while continuing to satisfy the demand for natural gas and to improve payment discipline in Russia.

**Increase efficiency of domestic operations:** The efficiency of domestic operations is contingent on the improvement of payment discipline and the profitability of domestic sales.

**Improve profitability of domestic sales:** The domestic natural gas prices are controlled by the state. Gazprom continues to work with state bodies to eliminate the current disparity between export and domestic gas prices. The Government increased domestic natural gas prices by 15% as of 1 July 2002 following on from a 20% increase as of 15 February 2002.

**Further improve payment discipline:** Gazprom has improved and intends to further improve payment discipline in the domestic market by imposing *stricter payment requirements and targeting its largest debtors*.

**Achieve planned long-term production levels:** Gazprom plans to maintain future production at an average annual level of 530 bcm for the next ten years.

**Expanded export capacity:** Gazprom is working on the construction and expansion of its export transportation network, including the Yamal-Europe, Blue Stream and Trans-Balkan pipeline projects, provide diversification of routes and greater security of gas deliveries to Gazprom's principal markets.

**Core Business Investment Programme:** Gazprom recognises the need in the next 10 years to continue and further increase its core business investment programme.

**Maintenance of long-term natural gas supply contracts:** Gazprom, subject to discussions with the European Commission, intends to maintain its portfolio of long-term natural gas supply contracts with European customers, capitalising on an increasing demand for gas in the region and its track record as a reliable supplier.

**Vertical integration and diversification into petrochemicals production:** This strategy is being pursued both domestically and internationally through acquisitions and joint ventures aimed at capturing wider distribution and value-added margins and securing its competitive position in the domestic, FSU and European gas markets. Gazprom holds 51% of voting shares in OAO AK Sibur, a major Russian petrochemical company which owns assets in certain FSU countries as well as in Central and Eastern Europe.

**New Markets:** Gazprom plans to develop new markets with particular focus on Southern Europe, the United Kingdom and China.

## INTERNATIONAL PROJECTS AND ALLIANCES

### **The Yamal-Europe Pipeline Project**

In order to increase the export of Russian natural gas to Europe, Gazprom is proceeding with the Yamal-Europe project. The Yamal-Europe project consists of constructing pipelines from the northern parts of the Tyumen region in Russia to Germany, running through the territories of Belarus and Poland. The projected annual capacity of the first stage of the pipeline is approximately 32 bcm. The new transportation route, is being constructed in reverse order, i.e. from the consuming regions to the production areas.

In October 1999 the most important section of the first pipeline (approximately 1,230 km) running from compressor station Nesvizhskaya in Belarus to connect with the German STEGAL pipeline and four compressor stations became operational.

The commissioned facilities account for more than 50% of the pipeline potential output. Gas supplies via Yamal-Europe started on 7 November 1999. The owner of the German section of this pipeline is Wingas, the joint venture between Gazprom and Wintershall and of the Polish section is Europol Gaz, a joint venture in which Gazprom, PGNiG (the 100% state-owned Polish gas company) and Polish joint stock company Gaztrading participate.

In addition to increasing exports, the Yamal-Europe Project is expected to enhance supply reliability through the creation of a new export route. Connecting the Yamal-Europe pipeline to the existing natural gas transportation network in Germany will allow for the full integration of this pipeline into the European gas network.

A decision of Gazprom as to whether to construct a second Yamal-Europe trunk pipeline will depend on demand for natural gas in western Europe.

### **Blue Stream Project**

In alliance with key Italian gas purchaser and distributor ENI, Gazprom is constructing a new gas trunk pipeline from Russia via the Black Sea to Turkey. It is anticipated that annual volume of natural gas ex-ports along this pipeline will amount to 16 bcm from 2008. Gazprom expects to commence natural gas ex-ports to Turkey via the Blue Stream Project route by the end of 2002. It is anticipated that, by 2008, the total volume of Russian natural gas exports to Turkey will be 30 bcm. Upon completion, this project will further open the promising Turkish market to Gazprom.

In November 1998, Gazprom and ENI entered into a memorandum of understanding to participate on an equal basis in Blue Stream Pipeline Company B.V., a special project company for the development and operation of a natural gas transportation system from Dzubga (including the Beregovaya compressor station located in the vicinity of Dzubga in Russia) to Samsun in Turkey (the "Offshore Section"). This system will be connected to Gazprom's existing pipeline network through a new pipeline running from Izobylnoye to Beregovaya (the "Onshore Section"). The Onshore Section and the Offshore Section together constitute the Blue Stream Project.

The pipeline from Russia to Turkey is approximately 760 km long of which about 390 km runs under the Black Sea. The Onshore Section of the Blue Stream Project is connected to the existing Gazprom pipeline network.

The pipeline route from Russia to Turkey running through the Black Sea is over 1000 km shorter in comparison to an onshore pipeline passing through the territories of the Ukraine, Moldova, Romania and Bulgaria.

The total estimated construction cost of the Offshore and Onshore Sections of the Blue Stream Project is approximately U.S.\$3.3 billion. The value of the turnkey contract for the construction of the Offshore Section of the pipeline and the Beregovaya compressor station is approximately U.S.\$1.7 billion.

To fund the project Gazprom and Blue Stream Pipeline Company B.V. entered into agreements with a syndicate of Western European and Japanese banks to raise loans to finance the Blue Stream Project. The total amount available to Gazprom and Blue Stream Pipeline Company B.V. for the Blue Stream project is U.S.\$1.76 billion. Of this amount Gazprom is able to borrow U.S.\$573 million (U.S.\$490 million had been drawn by Gazprom as at 10 September 2002) and Blue Stream Pipeline Company B.V. is able to borrow the balance of U.S.\$1.187 billion. At 10 September 2002 Blue Stream Pipeline Company B.V. had drawn U.S.\$184 million of the credit facility, of which U.S.\$114 million has been guaranteed by Gazprom. The remainder of the financing for the Offshore Section of the Blue Stream Project is covered by the various equity contributions of the sponsors of the project, Gazprom and SNAM (ENI's subsidiary) and a U.S.\$866 million loan to Blue Stream Pipeline Company B.V. with the guarantee of SNAM. The outstanding financing required for the Onshore Section of the Blue Stream Project is to be provided by Gazprom from its own funds and through other debt financing. For example, in February 2001, Gazprom received a loan for these purposes of euro 250 million from a consortium of international banks led by Bayerische Hypo- und Vereinsbank. The loans received by Gazprom to implement this project are issued on a secured basis.

### **Shell**

On 17 November 1997, Gazprom signed a strategic alliance agreement with Shell, which contemplated the parties' joint co-operation on several projects. So far, the parties are in the process of negotiating the draft joint venture agreement, coordinating projects for Shell's participation in the extension of the gas transportation system, and negotiating the terms of financing and implementation of the production sharing agreement. In accordance with the strategic alliance agreement, Shell proposed to create an international consortium to oversee investment in the Ukraine's gas transit system, the main objective of which would be to organise proper management and control over that system. The parties are presently continuing consultations in respect of the above issues.

### **Petro China**

On 4 July 2002 Gazprom, Royal Dutch/Shell and ExxonMobil, acting as a consortium, signed a framework agreement with Petro China on the creation of a joint venture on the West-East pipeline project in China. The project envisages the production of natural gas in the Sintszyan-Uigur region in China, the construction of a pipeline of approximately 4,000km in length to Shanghai and the sale of gas in the eastern Chinese market. The parties are in the process of negotiating the terms of the joint venture on the construction and operating of the pipeline as well as on the conclusion of gas production sharing agreements and on the establishment of a Unified Trading Company responsible for gas sales to consumers. All negotiations are planned to be completed by the end of 2002.

### **BASF**

Gazprom is supplying an increasing proportion of natural gas to the Western and Central and Eastern European markets via transportation and marketing companies in which it has equity interests.

In Germany, Gazprom and BASF agreed to undertake joint marketing of natural gas and to build and operate gas pipelines and supply networks in 1990. This agreement led to the construction of the STEGAL gas pipeline which, with a total length of 313 km, connects the MIDAL gas pipeline with the Czech natural gas pipeline system.

Gazexport, through its German subsidiary, Zarubezhgaz Erdgashandel ("ZGG"), owns a 35% share-holding in Wingas. Wingas in turn owns the MIDAL-STEGAL pipeline system and a natural gas storage facility at Rehden with a current utilised capacity of 4.2 bcm. The total amount invested into the MIDAL-STEGAL pipeline system and the gas storage facility at Rehden amounts to approximately DM 4 billion, including Gazprom's contribution of DM 1.4 billion.

Gazexport and Wintershall each have a 50% shareholding in the gas trading company Wintershall Erdgas Handelshaus ("WIEH"). WIEH purchases its natural gas supplies exclusively from Gazprom under long-term contracts. Two long-term natural gas supply contracts have been concluded with WIEH for a total annual volume of 13.8 bcm. Sales by WIEH are to Wingas, Verbundnetzgas, a

major natural gas distributor in eastern Germany (of which ZGG owns approximately 5%) and BASF. Wingas' gas sales are to municipal undertakings, gas utilities and major industrial consumers. Gazprom has concluded two long-term natural gas supply contracts with Wingas for a total annual volume of 5.8 bcm. In 2001, Gazprom supplied 13.5 bcm of natural gas to Wingas and WIEH for sale in Germany and some other Western European countries. Overall, Gazprom supplied 111.1 bcm of natural gas to WIEH and Wingas between 1991 and 2001. During the same period, Gazprom supplied 30.0 bcm of natural gas to WIEH for resale in Bulgaria and Romania.

At the end of 1998, the 294 km long WEDAL pipeline became operational, linking the Wingas pipe-line network with the Belgian pipeline system and the Interconnector pipeline which links the UK gas transportation system to the continent. Gazprom has acquired a 10% interest in the Interconnector pipeline. Initially, the WEDAL pipeline was designed to transport UK gas under contracts between Wingas, British Gas and Conoco and provides Wingas with the security of supply from diverse transportation sources. Gas supplies from Continental Europe to the UK may also be carried through the Interconnector pipeline.

At the end of 1999, a 340 km pipeline, known as the YAGAL pipeline, with a capacity of 26.0 bcm per year was put into operation. This pipeline connects the Yamal-Europe pipeline with the STEGAL pipeline. The completion of this pipeline enabled Gazprom to expand its supplies of natural gas to European countries and improved the reliability and flexibility of supplies of Russian natural gas to Germany.

Under the strategic alliance agreement between Gazprom and BASF, a feasibility study for the joint development of the Achimovsk formations of the Urengoyskoye field was jointly prepared and coordinated by Gazprom and Wintershall. The terms and conditions of the joint venture are currently being negotiated.

### **Transbalkan Pipeline Project**

Gazprom is evaluating the possibility of increasing and diversifying its gas transportation routes to the Balkan states and Turkey. In order to increase natural gas supplies to these states, Gazprom, in association with various national companies, is working on the expansion and modernisation of the existing pipeline network in the Ukraine, Romania and Bulgaria (the Transbalkan Pipeline Project).

Expansion of transit capacities within the Ukraine is being gradually implemented. A compressor station, Tarutino, was put into operation in 2001 within the operating transit gas pipeline Ananiev-Tiraspol-Izmail. At present the next phase of the project, the construction of loopings within the gas pipeline Annaniev-Tiraspol-Izmail, is being introduced. The construction and expansion of transit capacities in Bulgaria and Romania has been, as at the date of this Offering Circular, largely completed.

### **South Pars**

On 28 September 1997, Total (now TotalFinaElf), signed an agreement with the National Iranian Oil Company for the development of the second and third phases of the South Pars field. Gazprom, Petrolian Nacional Berhad (Petronas), the Malaysian state oil company and Total signed a partnership agreement for the development of this project, with a total anticipated project cost of approximately U.S.\$2 billion. Pursuant to the terms of the agreement, Gazprom obtained a 30% interest.

The construction of two production platforms, two off-shore pipelines and an on-shore gas complex has been completed. Production of natural gas and gas condensate and oil started in March 2002 and the export of gas condensate started in April 2002. The gas processing plant is expected to be operating at full capacity by October 2002.

### **Rosneft**

Within the framework of an agreement entered into by Gazprom and Rosneft on 4 October 2001 to create a joint venture company for the development of Kharampurskoe, Prirazlomnoe and Shtokmanovskoe fields, work is being carried out on the Kharampurskoe field project.

## Novy Urengoy Chemical Complex

The Novy Urengoy Chemical Complex was designed in cooperation with Salzgitter Anlagenbau and Linde, with some BASF participation.

The Novy Urengoy Chemical Complex will process 1.62 million tonnes of de-ethanised natural gas a year, yielding 340 thousand tonnes of ethylene to be used as feedstock for 300 thousand tonnes of high pressure polyethylene. By-products will include 280 thousand tonnes of long distillate of light hydrocarbons as well as up to 920 thousand tonnes of annual methane gas production.

## Other Joint Ventures

In addition to its activities in Germany, Gazprom has also established further joint ventures to transport and market natural gas in other European markets. In certain countries, Gazprom's subsidiaries or affiliates also distribute natural gas. Gazprom's strategy of acquiring equity participations in gas transportation companies and gas marketing companies, which has been successfully implemented in Germany, has also been applied in other European markets. In Finland, Gazprom acquired a 26% interest in the national gas distribution system in 1994 through the formation of Gasum, a joint venture with Neste (now Fortum). Gasum is the sole distributor of natural gas in Finland and is supplied exclusively by Gazprom. In Poland, Europol Gaz, a joint venture in which Gazprom has a 48% interest, is engaged in the construction of the Polish section of the Yamal-Europe Project. Post completion, Europol Gaz will own the Polish section of the transit pipeline and transport Russian natural gas to Germany. The following table summarises the main natural gas transportation and marketing joint ventures in which Gazprom, or Gazexport, participated in other European markets as at 31 December 2001:

Country	Entity	Interest	Joint Venture Partner	Description
Austria	GWH Gas und Warenhandelsgesellschaft	50%	OMV	Gas marketing and general trading company
Bulgaria	Overgaz	50%	Overgaz	Gas transportation and marketing of Russian natural gas in Balkan countries
Finland	Gasum	25%	Fortum Oy, Ruhrgas, The State of Finland, Finnish companies	Gas transportation and marketing
France	FRAGAZ	50%	Gaz de France	Gas trading and general trading activities
Greece	Prometheus Gas	50%	Copelouzos Group	Gas marketing and natural gas transport management
Hungary	Panrusgaz	33%	MOL	Gas marketing
Italy	Promgas	50%	SNAM	Gas marketing
Poland	Europol Gaz	49%	PGNiG Gas Trading	Transportation, construction, ownership and operation of the Polish section of the Yamal-Europe project
Poland	Gas Trading	16%	PGNiG, Bartimpex, WIEH Wenglokoks	Gas and Oil marketing
Slovakia	Slovrusgaz	50%	SPP	Gas transportation and marketing, general trading business
Turkey	Turusgaz	45%	Botas, Gama	Gas marketing

Source: Gazprom.

Other foreign associate undertakings related to gas distribution and transportation include: Armrosgazprom in Armenia with Gazprom's stake of 45%, BSPC in Netherlands - 50%, Latvias Gaze in Latvia - 25%, Stella Vitae in Lithuania - 30% and Moldovagaz in Moldova with 50%.

In March 2002, the consortium of German Ruhrgas and French Gaz de France acquired a 49% interest in the share capital of Slovenski Plenarenski Premysel ("SPP") for U.S.\$2,700 million. SPP is a Slovak national company, engaged in gas production and transportation. Pursuant to the agreement

with the consortium, Gazprom has the ability to purchase one third of the stake from the consortium by 31 March 2004.

### **Non-Core Investments**

The Group engages in various non-core activities which are ancillary to its main business. These supporting operations include construction and production of construction materials, food processing and procurement, transportation (including auto transport and aviation), and manufacturing of equipment for the gas industry and telecommunications amongst others.

In addition, Gazprom has investments in various other businesses which are not related to its core operations. Such investments mainly represent equity holdings which have been received in the course of privatisation (e.g. interests in agricultural, civil, construction, medical care enterprises and others), acquired either through debt for equity swaps (e.g. stakes in regional utility companies) or directly for strategic and other considerations. Amongst the Group's largest investments is Gazprombank, although Gazprom's liability is limited to the extent of its equity participation, Russia's fourth largest bank if measured by total assets, which services the majority of Gazprom's banking needs; Gazfund, the largest private pension fund in Russia, which Gazprom uses to provide pension services to its employees; and Gazprom-Media, Gazprom's media holding company with stakes in a number of media outlets, including NTV, Russia's largest independent TV channel. Following recent successful litigation to enforce the share pledge that was given as collateral for the guarantee by Gazprom of loans to Media-MOST, NTV's parent company Gazprom-Media, as of the date of this Offering Circular, controls a 65% stake in NTV and also 50% plus one share in a number of operating subsidiaries of Media-Most.

Gazprom has indicated that it will dispose of non-core assets in the appropriate market conditions in the future.

### **Capital Expenditure**

Net cash used for investment activities was U.S.\$3,102 million in 2001 compared to U.S.\$2,189 million in 2000 and U.S.\$2,252 million in 1999. The overall increase in cash capital expenditure from U.S.\$1,914 million in 2000 to U.S.\$2,694 million in 2001 was made possible by the availability of cash flow generated internally through improved operating performance.

The majority of Gazprom's fixed asset investments (both cash and non-cash) were related to capital expenditure on the transportation infrastructure and production assets. Capital expenditure on the transportation infrastructure comprised U.S.\$2,228 million, or 45% of total capital expenditure in 2001, up from U.S.\$1,642 million in 2000. In 2001 capital expenditure on production assets comprised U.S.\$2,043 million, or 41% of total capital expenditure in 2001, increasing from U.S.\$1,713 million in 2000 in line with Gazprom's strategy to develop new gas fields, including Zapolarnoye, in order to maintain production volumes.

Capital expenditure by category for 1999-2001 amounted to the following:

	Year ended 31 December 2001 in U.S.\$ million <sup>(1)</sup>	Year ended 31 December 2001 in RUR million	Year ended 31 December 2000 in U.S.\$ million <sup>(1)</sup>	Year ended 31 December 2000 in RUR million <sup>(2)</sup>	Year ended 31 December 1999 in U.S.\$ million <sup>(1)</sup>	Year ended 31 December 1999 in RUR million <sup>(2)</sup>
Transportation .....	2,228	67,143	1,642	49,493	3,320	100,062
Production .....	2,043	61,586	1,713	51,643	1,266	38,148
Refining .....	178	5,359	105	3,151	72	2,159
Distribution .....	3	96	13	394	49	1,473
Other .....	506	15,261	1,224	36,899	1,081	32,596
<b>Total .....</b>	<b>4,958</b>	<b>149,445</b>	<b>4,697</b>	<b>141,580</b>	<b>5,788</b>	<b>174,438</b>

Notes:

- (1) Totals may not add due to rounding. The U.S.\$ amounts shown above have been translated from the Rouble amounts at the rate of RUR 30.14 = U.S.\$1.00, which is the rate published by the Central Bank of Russia on 31 December 2001.
- (2) Restated in terms of the equivalent purchasing power of the Rouble as at 31 December 2001. The U.S.\$ amounts set out below were not included in the Annual Data and are provided for convenience only. They should not be construed as representations that the Rouble amounts have been or could be converted into U.S.\$ at that or any other rate or as being representative of U.S.\$ amounts that would have resulted if Gazprom reported its IAS financials in U.S.\$.

Gazprom recognises the need in the next 10 years to continue and further increase its core business investment programme. Gazprom believes that in order to meet anticipated future demand and to maintain production levels at an average of 530 bcm it will need to finance by the end of 2010 approximately U.S.\$10 billion to repair, modernise and reconstruct the UGSS, approximately U.S.\$20 billion to construct new pipelines and approximately U.S.\$20 billion to develop new production facilities at new gas fields to replenish reserves.

Capital expenditure depends on (i) Gazprom's ability to continue to sell gas at or above current price levels and (ii) accessing external sources of finance.

By 31 December 2003, in addition to the projected capital expenditure, U.S.\$7 billion of short term and the current portion of long term debt falls due for repayment. Gazprom expects to be able to refinance a significant portion of this short term debt on similar terms and to replace a large portion of its short term debt with longer term financing by accessing the international capital and loan markets.

## Research and Development

Gazprom has pursued a policy of investing in research and development in a number of priority scientific and technical areas. There has been a focus on expanding the mineral resource base of the gas industry, developing hydrocarbon deposits in new regions (for example, ObTaz Estuary, Arctic offshore fields and the Yamal Peninsula), improving the reliability of the UGSS, developing off-shore oil and gas reserves, creating energy and resource saving technologies and next generation equipment, increase in the use of alternative resources of hydrocarbon raw materials, improved organisational and management systems of Gazprom, optimised financial, investment and pricing policies and increased ecological and industrial safety.

Total spending on research and development amounted to U.S.\$168.2 million in 2000 which is an increase of 55% from U.S.\$108.3 million in 1999. For year ending on 31 December 2001 total spending on research and development was U.S.\$125.7 million.

## Environmental Matters

Gazprom's current environmental standards and policy follow existing Russian environmental regulations and laws. Gazprom generally considers, with due regard to existing Russian and international environmental standards, the environmental impact at the planning stage and takes this impact into consideration at all later stages of the project. To date, there have been no serious accidents that have had a significant environmental impact.

Gazprom has developed and continues to improve a system for monitoring harmful leaks, water contamination, and the quality of air, water and soil in the Russian regions in which UGSS objects are located based on International Standard ISO 14000. In a number of regions this system has become an integral part of the Russian Federation's unified State Ecological Monitoring System.

In accordance with Russian legal requirements relating to environmental protection, Gazprom makes obligatory payments to ecological funds and state authorities for environment pollution: RUR 74.1 million in 1999; RUR 75.8 in 2000 and RUR 119.0 million in 2001. The increase in the amount of the obligatory payments is the result of the annual introduction of increasing correction coefficients. Moreover Gazprom paid the following environmental penalties: RUR 0.85 million in 1999, RUR 0.8 million in 2000 and RUR 0.5 million in 2001 relating to environmental protection purposes. It is expected that the amount payable for environmental pollution will increase following forthcoming changes in legislation.

Gazprom's balance sheet, prepared in accordance with IAS, contains provisions for environmental payments (which take into account probable liabilities that can be reasonably estimated). Such provisions have been made in accordance with what Gazprom believes is a reasonable and prudent policy which takes into account payments made in prior years, among other factors. However, in Russia in particular, Federal, regional and local authorities may enforce existing laws and regulations more strictly than they have done in the past and may impose stricter environmental standards or higher levels of fines and penalties for violations than those now in effect. Accordingly, Gazprom's management is unable to estimate the future financial impact of Gazprom's environmental obligations with a high degree of certainty. However, Gazprom does not expect environmental obligations to have a material, adverse effect on its future financial condition.

### **Litigation and Investigations**

Gazprom has been and continues to be, from time to time, the subject of legal proceedings and other investigations in the ordinary course of its business.

In January 2001, the Accounting Chamber of the Russian Federation completed a five month audit of Gazprom. The audit report stated that in 2000 there was a decline in Gazprom's gas production compared to 1999; that there was a decline in capital expenditure; that Gazprom transferred natural gas to the Yamal-Nenets autonomous region as payment for the mineral resource base restoration tax; that there was an increased growth in accounts receivable and payable, that Gazprom had granted low or interest-free loans to third parties; that Gazprom had made long-term investments in non-core activities and that Gazprom in 1998 and 1999 was granted, contrary to tax legislation, a special tax regime which resulted in 1999 of the under-payment to the Federal Budget of RUR 22,020 million.

Gazprom has received a request for information from the European Commission with respect to exclusivity clauses in Gazprom's contracts with various Italian utilities, under which Italian utilities are prevented from selling gas on to other off-takers in Western Europe outside of the Italian market. Gazprom has responded to this request and is currently in discussions with the European Commission.

Rosgazifikatsia has filed a claim against SR-DRAGA (Gazprom's Share Registrar) to recover damages in the amount of RUR 717.2 million as a result of the alleged negligent performance of its obligations as a Registrar in relation to one specific share transfer. Gazprom, under Russian law, is liable for the actions of its Registrar and accordingly was joined as a third party to such claim. The claim was upheld by the court of first instance and SR-DRAGA was ordered to pay RUR 539 million in settlement of the claim. After various appeals SR-DRAGA succeeded in having the judgment of the court of first instance overturned. The decision of the Appellate Court has been appealed in the Higher Arbitration Court. The hearing has yet to be scheduled.

Inkombank filed a claim against Gazprom to recover debt in the amount of U.S.\$72.4 million under a facility agreement. The court in the first instance considered the claim and ordered Gazprom to pay Inkombank U.S.\$71.6 million. Gazprom has filed an appeal against the decision. In the course of proceedings in the court of appeal, the parties have entered into an amicable settlement agreement under which Gazprom has agreed to pay U.S.\$44.7 million to Inkombank and Inkombank has waived its claim to the remaining part of the debt.

Neftegaspstavka filed two claims against Gazprom for damages resulting from Gazprom's refusal to grant Neftegaspstavka access to its pipelines, allegedly in breach of anti-monopoly regulation. The first claim, relating to damages incurred in 1999, in the amount of RUR 160 million has been granted by the court. The second claim, relating to damages incurred in 2000, in the amount of RUR 700 million is pending.

There has been recent press comment and speculation over potential proceedings surrounding recent allegations made by a Russian Federal Tax Police official of tax evasion by Gazprom. However, as at the date of this Offering Circular no official statement had been issued by the Tax Police and no proceedings in this regard had been commenced. Gazprom believes that if any such proceedings are instigated they will be unmeritorious.

Local tax authorities in Moscow have recently demanded that Gazprom must pay RUR 29 billion to the budget on account of unpaid excise duties. The dispute arose out of differences between Gazprom and the local tax authorities in the interpretation of excise duty regulations. Gazprom has appealed the tax authorities' order in court and has successfully stayed its execution. The court is scheduled to consider Gazprom's appeal on 25 October 2002.

The General Prosecutor's Office has been conducting an environmental audit on Gazprom to establish compliance with Russian environmental regulations and has indicated that in certain instances Gazprom is in breach of such regulations. Whilst it is difficult to establish the cost of remedying any such breach, Gazprom does not believe any such additional cost to be material in the context of its business as a whole.

These proceedings and investigations have not had, and are not expected to have, individually or in the aggregate, a material adverse effect on Gazprom's business, operations and financial condition or on Gazprom's ability to service its payment obligations under the Loan.

## LOAN AGREEMENT

*The following is the text of the Loan Agreement which has been entered into between the Bank and Gazprom:*

**LOAN AGREEMENT**, dated ● 2002 **BETWEEN**

- (1) **OPEN JOINT STOCK COMPANY GAZPROM** ("Gazprom");
- (2) **SALOMON BROTHERS AG** (the "Bank").

**WHEREAS**, the Bank has at the request of Gazprom agreed to make available to Gazprom a loan facility in the amount of U.S.\$ ●00,000,000 on the terms and subject to the conditions of this Agreement; and

**WHEREAS**, it is intended that the Bank will issue certain loan participation notes based on amounts payable by Gazprom under the loan facility.

**NOW IT IS HEREBY AGREED** as follows:

### **1 Definitions and Interpretation**

#### **1.1 Definitions**

In this Agreement (including the recitals), the following terms shall have the meanings indicated.

**"Advance"** means the advance to be made under Clause 3 of the sum equal to the amount of the Facility.

**"Affiliates"** of any specified Person means any other Person, directly or indirectly, controlling or controlled by or under direct or indirect control with such specified Person. For the purposes of this definition, "control" when used with respect to any Person means the power to direct the management and policies of such Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise; and the terms "controlling" and "controlled" have meanings correlative to the foregoing.

**"Agreed Form"** means that the form of the document in question has been agreed between the proposed parties thereto and that either a copy thereof has been signed for the purpose of identification on behalf of each of Linklaters and Cleary, Gottlieb, Steen, Hamilton, Moscow or such document has been signed on behalf of the parties thereto and delivered to Linklaters to be held in escrow pending release on the Closing Date.

**"Agreement"** means this Agreement as originally executed or as it may be amended from time to time.

**"Business Day"** means a day on which (a) the London Interbank Market is open for dealings between banks generally, and (b) if on that day a payment is to be made hereunder, commercial banks generally are open for business in Frankfurt am Main, New York City and in the city where the specified office of the Principal Paying Agent is located.

**"Consolidated Net Tangible Assets"** means the total of all assets less (i) total liabilities, (ii) goodwill, trade names, trade marks, service marks, patents, licences, organisational expenses, research and development expenses, unamortised debt discount and expense, unamortised deferred charges and all other like intangible assets, (iii) all write-ups of fixed assets, net of accumulated depreciation thereon, after 31 December 2001 excluding, for the avoidance of doubt, any restatement for changes in the general purchasing power of the Rouble in accordance with IAS 29 "Financial Reporting in Hyperinflationary Economics" and revaluations supported by an independent appraisal completed by an appropriately qualified firm and (iv) preferred stock, if any, all as set forth on the most recent consolidated balance sheet of Gazprom and its consolidated Subsidiaries prepared in accordance with IAS.

**"Dollars"**, **"\$"** and **"U.S.\$"** means the lawful currency of the United States of America.

**"Encumbrance"** means any mortgage, charge, pledge, lien (other than a lien arising solely by operation of law which is discharged within 45 days of arising) or other security interest securing any obligation of any Person or any other type of preferential arrangement (including any title transfer and retention arrangement) having a similar effect.

**"Environmental Law"** means any applicable law in any jurisdiction in which any member of the Group conducts business which relates to the pollution or protection of the environment or harm to or the protection of human health or the health of animals or plants.

**"Event of Default"** has the meaning assigned to such term in sub-Clause 11.1 hereof.

**"Facility"** means the facility specified in Clause 2.

**"Financial Indebtedness"** means any obligation for the payment of money in any currency, other than an obligation for the payment of money in the lawful currency for the time being of the Russian Federation payable to any person domiciled, resident or having its head office or principal place of business in the Russian Federation, whether sole, joint or several, and whether actual or contingent, in respect of:

- (a) moneys borrowed or raised (including the capitalised value of obligations under financial leases and hire purchase agreements and deposits, but excluding moneys raised by way of the issue of share capital (whether or not for a cash consideration) and any premium on such share capital) and interest and other charges thereon or in respect thereof;
- (b) any liability under any debenture, bond, note, loan stock or other security or under any acceptance or documentary credit, bill discounting or note purchase facility or any similar instrument;
- (c) any liability in respect of the deferred acquisition cost of property, assets or services to the extent payable after the time of acquisition or possession thereof by the party liable, but not including any such liability in respect of normal trade credit for a period not exceeding six months for goods or services supplied;
- (d) any liability under any interest rate or currency hedging agreement;
- (e) any liability under or in respect of any bonding facility, guarantee facility or similar facility; and
- (f) (without double counting) any guarantee or other assurance against financial loss in respect of such moneys borrowed or raised, interest, charges or other liability (whether the person liable in respect of such moneys borrowed or raised, interest, charges or other liability is or is not a member of the Group),

but not where the same relates to or is in connection with any Project Financing.

**"Group"** means Gazprom and its Subsidiaries taken as a whole.

**"IAS"** means the International Accounting Standards issued by the International Accounting Standards Committee (as amended, supplemented or re-issued from time to time).

**"Interest Payment Date"** means ● and ● of each year.

**"Loan"**, at any time, means an amount equal to the aggregate principal amount of the Facility granted by the Bank pursuant to this Agreement.

**"Material Adverse Effect"** means a material adverse effect on (a) the financial condition or operations of Gazprom and its Principal Subsidiaries or (b) Gazprom's ability to perform its obligations under this Agreement or (c) the validity or enforceability of this Agreement or the rights or remedies of the Bank under this Agreement.

**“Notes”** means the U.S.\$●00,000,000 ● per cent. loan participation notes due ● proposed to be issued by the Bank pursuant to the Trust Deed for the purpose of financing the Loan.

**“Noteholder”** means the person in whose name the Note is registered in the register of the noteholders (or in the case of joint holders, the first named holder thereof).

**“Officers’ Certificate”** means a certificate signed by an officer of Gazprom who shall be the principal executive officer, principal accounting officer or principal financial officer of Gazprom.

**“Opinion of Counsel”** means a written opinion from international legal counsel who is acceptable to the Bank.

**“Paying Agency Agreement”** means the paying agency agreement dated the date hereof, as amended, varied or supplemented between the Bank, Gazprom, The Bank of New York and Kredietbank S.A. Luxembourgoise relating to the Notes.

**“Permitted Encumbrance”** means:

- (i) any Encumbrance existing on the date of this Agreement;
- (ii) any Encumbrance existing on any property, income or assets of any corporation at the time such corporation becomes a Subsidiary of Gazprom and not created in contemplation of such event, provided that no such Encumbrance shall extend to any other property, income or assets;
- (iii) any Encumbrance on any property, income or assets of any corporation existing at the time such corporation is merged or consolidated with or into Gazprom or any Subsidiary of Gazprom and not created in contemplation of such event, provided that no such Encumbrance shall extend to any other property, income or assets;
- (iv) any Encumbrance on any property or assets securing Financial Indebtedness of Gazprom or any Subsidiary incurred or assumed for the purpose of financing all or part of the cost of acquiring, purchasing, constructing or developing such property or assets, provided that no such Encumbrance shall extend to any other property or assets, the principal amount of the Financial Indebtedness secured by such Encumbrance shall not exceed the cost of acquiring, purchasing, constructing or developing such property or assets, and such Encumbrance attaches to such property or assets concurrently with or within 90 days after the acquisition or purchase, or the commencement of the construction or development, thereof;
- (v) any Encumbrance on any property or assets securing Financial Indebtedness of Gazprom or any Subsidiary incurred or assumed for the purpose of financing all or part of the cost of repairing or refurbishing such property or assets, provided that no such Encumbrance shall extend to any other property or assets, the principal amount of the Financial Indebtedness secured by such Encumbrance shall not exceed the cost of such repairs or refurbishments, and such Encumbrance attaches to such property or assets concurrently with or within 90 days after the commencement of such repairs or refurbishments;
- (vi) any Encumbrance existing on any property, income or assets prior to the acquisition thereof by Gazprom or any Subsidiary and not created in contemplation of such acquisition, provided that no such Encumbrance shall extend to any other property, income or assets;
- (vii) any Encumbrance on the property, income or assets of any Subsidiary securing intercompany Financial Indebtedness of such Subsidiary owing to Gazprom or another Subsidiary;
- (viii) any Encumbrance securing Financial Indebtedness incurred in connection with a Project Financing if the Encumbrance is solely on the property, income, assets or revenues of the project for which the financing was incurred;

- (ix) any Encumbrance securing Financial Indebtedness not exceeding 50 per cent. of Gazprom's Consolidated Net Tangible Assets at any time of determination;
- (x) any Encumbrance arising out of the refinancing, extension, renewal or refunding of any Financial Indebtedness of Gazprom or any Subsidiary secured by any Permitted Encumbrance, provided that such Financial Indebtedness is not increased and, if the property, income or assets securing any such Financial Indebtedness are changed in connection with any such refinancing, extension, renewal or refunding, the value of the property, income or assets securing such Financial Indebtedness is not increased;
- (xi) any Encumbrance over any goods or products, or documents, insurance policies or sale contracts in relation to any goods or products, arising in the ordinary course of trading in connection with the provision of a letter of credit or any similar transaction where such Encumbrance secures only so much of the acquisition cost or selling price (and amounts incidental thereto) of such goods or products which is required to be paid within 120 days after the date upon which liability in respect of the same was first incurred; and
- (xii) a right of set-off, right to combine accounts or any analogous right which any bank or other financial institution may have relating to any credit balance of any member of the Group.

**"Person"** means any individual, corporation, partnership, limited liability company, joint venture, association, joint-stock company, trust, unincorporated organisation, government, or any agency or political subdivision thereof or any other entity.

**"Potential Event of Default"** means any event which is, or after notice or passage of time or both would be, an Event of Default.

**"Principal Subsidiary"** means at any relevant time a Subsidiary of Gazprom;

- (i) whose total assets or gross revenues (or, where the Subsidiary in question prepares consolidated accounts, whose total consolidated assets or gross consolidated revenues, as the case may be) represent not less than 5% of the total consolidated assets or the gross consolidated revenues of Gazprom and its Subsidiaries, all as calculated by reference to the then latest audited accounts (or consolidated accounts as the case may be) of such Subsidiary and the then latest audited consolidated accounts of Gazprom and its consolidated Subsidiaries; or
- (ii) to which is transferred all or substantially all the assets and undertaking of a Subsidiary which immediately prior to such transfer is a Principal Subsidiary.

**"Project Financing"** means any financing of all or part of the costs of the acquisition, construction, development or operation of any asset or project if the person or persons providing such financing expressly agrees to limit its recourse solely to the asset or project financed and the revenues derived from such asset or project as the principal source of repayment for the moneys advanced.

**"Rate of Interest"** has the meaning assigned to such term in sub-Clause 4.1.

**"Repayment Date"** means ●.

**"Same-Day Funds"** means Dollar funds settled through the New York Clearing House Interbank Payments System or such other funds for payment in Dollars as the Bank may at any time determine to be customary for the settlement of international transactions in New York City of the type contemplated hereby.

**"Subscription Agreement"** means the agreement dated the date hereof between the Bank, Gazprom, Salomon Brothers International Limited and Credit Suisse First Boston (Europe) Limited providing for the issuance of the Notes.

**"Subsidiary"** means, with respect to any Person, (i) any corporation, association or other business entity of which at least 50% of the total voting power of shares of Capital Stock entitled

(without regard to the occurrence of any contingency) to vote in the election of directors, managers or trustees thereof is at the time owned or controlled, directly or indirectly, by such Person or one or more of the other Subsidiaries of such Person (or any combination thereof) and (ii) any partnership (a) the sole general partner or the managing general partner of which is such Person or a Subsidiary of such person or (b) the only general partners of which are such Person or of one or more Subsidiaries of such Person (or any combination thereof).

**"Taxes"** means any taxes (including interest or penalties thereon) which are now or at any time hereafter imposed, assessed, charged, levied, collected, demanded, withheld or claimed by the Russian Federation, the Federal Republic of Germany or any taxing authority thereof or therein or any organisation of which the Russian Federation or the Federal Republic of Germany may be a member or with which the Russian Federation or the Federal Republic of Germany may be associated or any country or state from or through which Gazprom makes payments hereunder, provided, however, that for the purposes of this definition the references to the Federal Republic of Germany shall, upon the occurrence of the Relevant Event (as this term is defined in the Trust Deed), be deemed to be references to the jurisdiction in which the Trustee is domiciled for tax purposes; and the term "Taxation" shall be construed accordingly.

**"Trust Deed"** means the trust deed to constitute the Notes for the equal and rateable benefit of the Noteholders to be dated the Closing Date between the Bank and the Trustee as amended, varied or supplemented from time to time.

**"Trustee"** means The Bank of New York acting through its London Branch, as trustee under the Trust Deed and any successor thereto as provided thereunder.

## **1.2 Other Definitions**

Unless the context otherwise requires, terms used in this Agreement which are not defined in this Agreement but which are defined in the Trust Deed, the Notes, the Paying Agency Agreement or the Subscription Agreement shall have the meanings assigned to such terms therein.

## **1.3 Interpretation**

Unless the context or the express provisions of this Agreement otherwise require, the following shall govern the interpretation of this Agreement.

**1.3.1** All references to "Clause" or "sub-Clause" are references to a Clause or sub-Clause of this Agreement.

**1.3.2** The terms "hereof", "herein" and "hereunder" and other words of similar import shall mean this Agreement as a whole and not any particular part hereof.

**1.3.3** Words importing the singular number include the plural and vice versa.

**1.3.4** All references to "taxes" include all present or future taxes, levies, imposts and duties of any nature and the terms "tax" and "taxation" shall be construed accordingly.

**1.3.5** The table of contents and the headings are for convenience only and shall not affect the construction hereof.

## **2 Facility**

### **2.1 Facility**

On the terms and subject to the conditions set forth herein, the Bank hereby agrees to lend Gazprom, and Gazprom hereby agrees to borrow from the Bank, U.S.\$[\_]00,000,000.

### **2.2 Purpose**

The proceeds of the Advance will be used for working capital and general corporate purposes but the Bank shall not be concerned with the application thereof.

## **2.3 Facility Fee**

In connection with the Facility, Gazprom shall, on the Closing Date, upon (and subject to) the making of the Advance to Gazprom by the Bank pay a fee in Dollars to the Bank equal to U.S.\$50,000.

## **3 Drawdown**

### **3.1 Drawdown**

On the terms and subject to the conditions set forth herein, on the Closing Date the Bank shall make the Advance to Gazprom and Gazprom shall make a single drawing in the full amount of the Facility.

### **3.2 Fees and Expenses**

In consideration of the Bank making the Advance to Gazprom, Gazprom hereby agrees that it shall pay to Salomon Brothers International Limited ("**SBIL**"), for the account of SBIL and the relevant other parties, in Same-Day Funds, an amount equivalent to the aggregate total of commissions, fees, costs and expenses as set forth in sub-Clauses 8.1, 8.2 and 8.4 of the Subscription Agreement, sub-Clauses 10.1 and 10.2 of the Paying Agency Agreement, Clauses 1 and 4 of the Side Letter between the Trustee and Gazprom dated ● 2002 (the "**Trustees Side Letter**") and sub-Clauses 2.3 and 13.1 hereof as provided in the fees and expenses side letter dated ● 2002 between Gazprom, SBIL and the other parties thereto. Gazprom further agrees that it shall, on or before the Business Day immediately preceding the Closing Date, provide the Bank and SBIL with written confirmations from each of Gazprombank and [Deutsche Bank Trust Company Americas, New York], Gazprombank's correspondent bank, that irrevocable instructions have been issued by Gazprom and Gazprombank, respectively, for the payment of such aggregate amount to SBIL, for the account of SBIL and the relevant other parties, on or before the Closing Date.

Gazprom undertakes to fulfil all of its other payment obligations in respect of the Subscription Agreement and the Paying Agency Agreement in addition to its payment obligations as set out above.

### **3.3 Disbursement**

Subject to the conditions set forth herein, on the Closing Date the Bank shall transfer the amount of the Advance to Gazprom's account number 4070284040000 7000001 at Gazprombank Moscow, Swift Code: GAZPRUMM, Account Number: 04414534 at Deutsche Bank Trust Company Americas, New York, NY, Swift Code: BKTR US33.

## **4 Interest**

### **4.1 Rate of Interest**

Gazprom will pay interest in Dollars to the Bank on the outstanding principal amount of the Loan from time to time hereunder at the rate of ● per cent. per annum (the "**Rate of Interest**").

### **4.2 Payment**

Interest at the rate specified in Clause 4.1 above shall accrue from day to day, starting from (and including) the Closing Date and shall be paid in arrear not later than 10.00 a.m. (New York City time) one Business Day prior to each Interest Payment Date. Interest on the Loan will cease to accrue from the due date for repayment thereof unless payment of principal is improperly withheld or refused, in which event interest will continue to accrue (before or after any judgement) at the Rate of Interest to but excluding the date on which payment in full of the principal thereof is made. If interest is required to be calculated for a period of less than one year, it will be

calculated on the basis of a 360-day year consisting of 12 months of 30 days each and, in the case of an incomplete month, the number of days elapsed.

## **5 Repayment and Prepayment**

### **5.1 Repayment**

Except as otherwise provided herein, Gazprom shall repay the Loan not later than 10.00 a.m. (New York City time) one Business Day prior to the Repayment Date.

### **5.2 Prepayment on Put Settlement Date**

- (a) Following notification from the Bank, the Borrower shall prepay the Loan (without premium or penalty), to the extent of the aggregate principal amount of the Notes to be properly redeemed in accordance with Condition 6 of the terms and conditions of the Notes, two Business Days prior to the Put Settlement Date.
- (b) The Bank shall notify the Borrower, not more than three Business Days after receipt of notice thereof from the Paying Agent, of the amount of the Loan to be prepaid as a consequence of the exercise by Holders of the option contained in Condition 6 of the terms and conditions of the Notes.

“Put Settlement Date” means [●] *[Insert Date]*

### **5.3 Special Prepayment**

If, as a result of the application of or any amendments to or change in the double tax treaty between the Russian Federation and the Federal Republic of Germany or the laws or regulations of the Russian Federation or the Federal Republic of Germany or of any political sub-division thereof or any authority therein or the enforcement of the security provided for in the Trust Deed, Gazprom would thereby be required to make or increase any payment due hereunder as provided in sub-Clauses 6.2 or 6.3, or if (for whatever reason) Gazprom would have to or has been required to pay additional amounts pursuant to Clause 8, then Gazprom may (without premium or penalty), upon not less than 10 days' notice to the Bank (which notice shall be irrevocable), prepay the Loan in whole (but not in part).

### **5.4 Illegality**

If, at any time, by reason of the introduction of any change after the date of this Agreement in any applicable law or regulation or regulatory requirement or directive of any agency of any state the Bank reasonably determines (such determination being accompanied by an Opinion of Counsel with the cost of such Opinion of Counsel being borne solely by Gazprom) that it is or would be unlawful or contrary to such regulation, regulatory requirement or directive for the Bank to allow all or part of the Loan or the Notes to remain outstanding or for the Bank to maintain or give effect to any of its obligations in connection with this Agreement and/or to charge or receive or to be paid interest at the rate then applicable to the Loan, then upon notice by the Bank to Gazprom in writing (setting out in reasonable detail the nature and extent of the relevant circumstances), Gazprom and the Bank shall consult in good faith as to a basis which eliminates the application of such circumstances; provided, however, that the Bank shall be under no obligation to continue such consultation if a basis has not been determined within 30 days of the date on which it so notified Gazprom. If such a basis has not been determined within the 30 days, then upon notice by the Bank to Gazprom in writing, Gazprom shall prepay the Loan in whole (but not in part) on the next Interest Payment Date or on such earlier date as the Bank shall certify to be necessary to comply with such requirements.

### **5.5 Payment of Other Amounts**

If the Loan is to be prepaid by Gazprom pursuant to any of the provisions of Clauses 5.3 or 5.4, Gazprom shall, simultaneously with such prepayment, pay to the Bank accrued interest thereon

to the date of actual payment and all other sums payable by Gazprom pursuant to this Agreement.

## **5.6 Provisions Exclusive**

Gazprom may not voluntarily prepay the Loan except in accordance with the express terms of this Agreement. Any amount prepaid may not be reborrowed.

## **6 Payments**

### **6.1 Making of Payments**

All payments of principal and interest to be made by Gazprom under this Agreement shall be made to the Bank not later than 10.00 a.m. (New York City time) one Business Day prior to each Interest Payment Date or the Repayment Date (as the case may be) in Same-Day Funds to the Bank's account no. ● with the Principal Paying Agent. The Bank agrees with Gazprom that it will not deposit any other monies into such account and that no withdrawals shall be made from such account other than as provided for and in accordance with the Trust Deed and the Paying Agency Agreement.

### **6.2 No Set-Off, Counterclaim or Withholding; Gross-Up**

All payments to be made by Gazprom under this Agreement shall be made in full without set-off or counterclaim and (except to the extent required by law) free and clear of and without deduction for or on account of any Taxes. If Gazprom shall be required by applicable law to make any deduction or withholding from any payment under this Agreement for or on account of any Taxes, it shall increase any payment due hereunder to such amount as may be necessary to ensure that the Bank receives a net amount in Dollars equal to the full amount which it would have received had payment not been made subject to such Taxes, shall account to the relevant authorities for the relevant amount of such Taxes so withheld or deducted within the time allowed for such payment under the applicable law and shall deliver to the Bank without undue delay evidence satisfactory to the Bank of such deduction or withholding and of the accounting therefor to the relevant taxing authority. If the Bank pays any amount in respect of such Taxes, Gazprom shall reimburse the Bank in Dollars for such payment on demand.

### **6.3 Withholding on Notes**

If the Bank notifies Gazprom (setting out in reasonable detail the nature and extent of the obligation with such evidence as Gazprom may reasonably require) that it has become obliged to make any withholding or deduction for or on account of any Taxes from any payment which it is obliged to make under or in respect of the Notes in circumstances where the Bank is required to pay additional amounts pursuant to Condition 8 of the Notes, Gazprom agrees to pay to the Bank, on the date on which payment is due to the Noteholders, such additional amounts as are equal to the said additional amounts which the Bank must pay pursuant to Condition 8 of the Notes; provided, however, that the Bank shall immediately upon receipt from any Paying Agent of any sums paid pursuant to this provision, to the extent that the Noteholders, as the case may be, are not entitled to such additional amounts pursuant to the terms and conditions of the Notes, pay such additional amounts to Gazprom (it being understood that neither the Bank, nor the Principal Paying Agent nor any Paying Agent shall have any obligation to determine whether any Noteholder is entitled to such additional amount).

### **6.4 Reimbursement**

To the extent that the Bank subsequently obtains or uses any tax credit or allowance or other reimbursements relating to a deduction or withholding with respect to which Gazprom has made a payment pursuant to this Clause 6 or obtains any reimbursement from the Trustee pursuant to the terms of the Trust Deed, it shall pay to Gazprom so much of the benefit it received as will leave the Bank in substantially the same position as it would have been had no additional amount been

required to be paid by Gazprom pursuant to this Clause 6 or had no reimbursement been paid to the Bank pursuant to the Trust Deed; provided, however, that the question of whether any such benefit has been received, and accordingly, whether any payment should be made to Gazprom, the amount of any such payment and the timing of any such payment, shall be determined solely by the Bank. The Bank shall have the absolute discretion whether, and in what order and manner, it claims any credits or refunds available to it, and the Bank shall in no circumstances be obliged to disclose to Gazprom any information regarding its tax affairs or computations.

## **6.5 Mitigation**

If at any time either party hereto becomes aware of circumstances which would or might, then or thereafter, give rise to an obligation on the part of Gazprom to make any deduction, withholding or payment as described in sub-Clauses 6.2 or 6.3, then, without in any way limiting, reducing or otherwise qualifying the Bank's rights, or Gazprom's obligations, under such Clauses, such party shall promptly upon becoming aware of such circumstances notify the other party, and, thereupon the parties shall consider and consult with each other in good faith with a view to finding, agreeing upon and implementing a method or methods by which any such obligation may be avoided or mitigated and, to the extent that both parties can do so without taking any action which in the reasonable opinion of such party is prejudicial to its own position, take such reasonable steps as may be reasonably available to it to avoid such obligation or mitigate the effect of such circumstances. Gazprom agrees to reimburse the Bank for all reasonable costs and expenses incurred by the Bank in connection with this Clause.

## **7 Conditions Precedent**

### **7.1 Documents to be Delivered**

The obligation of the Bank to make the Advance shall be subject to the receipt by the Bank on or prior to the Closing Date of an executed copy of each of the following documents, each (other than the document referred to in sub-Clauses 7.1.4 and 7.1.5 below) dated the Closing Date, in the Agreed Form.

- 7.1.1** An opinion of Cleary, Gottlieb, Steen & Hamilton, Moscow, counsel to Gazprom, regarding issues of Russian law.
- 7.1.2** An opinion of Linklaters regarding issues of English law and Russian law.
- 7.1.3** An opinion of Cleary, Gottlieb, Steen and Hamilton, Frankfurt am Main, regarding issues of German law.
- 7.1.4** A letter from PricewaterhouseCoopers regarding certain Russian tax matters.
- 7.1.5** Written confirmation of irrevocable payment instructions referred to in sub-Clause 3.2 above.

### **7.2 Further Conditions**

The obligation of the Bank to make the Advance shall be subject to the further conditions precedent that as of the Closing Date (a) the representations and warranties made and given by Gazprom in Clause 9 shall be true and accurate as if made and given on the Closing Date with respect to the facts and circumstances then existing, (b) no event shall have occurred and be continuing that constitutes, or that, with the giving of notice or the lapse of time, or both, would constitute, an Event of Default, (c) Gazprom shall not be in breach of any of the terms, conditions and provisions of this Agreement and (d) the Subscription Agreement and the Trust Deed shall have been executed and delivered, and the Bank shall have received the full amount of the proceeds of the issue of the Notes pursuant to the Subscription Agreement.

## **8 Change in Law or Banking Practices; Increase in Cost**

### **8.1 Compensation**

In the event that after the date of this Agreement there is any change in or introduction of any tax, law, regulation, regulatory requirement or official directive (whether or not having the force of law but, if not having the force of law, the observance of which is in accordance with the generally accepted financial practice of financial institutions in the country concerned) or in the interpretation or application thereof by any person charged with the administration thereof and/or any compliance by the Bank in respect of the Loan or the Facility with any request, policy or guideline (whether or not having the force of law but, if not having the force of law, the observances of which is in accordance with the generally accepted financial practice of financial institutions in the country concerned) from or of any central or other fiscal, monetary or other authority, agency or any official of any such authority, which:

**8.1.1** subjects or will subject the Bank to any Taxes with respect to payments of principal of or interest on the Loan or any other amount payable under this Agreement (other than any Taxes payable by the Bank on its overall net income or any Taxes referred to in sub-Clauses 6.2 or 6.3); or

**8.1.2** increases or will increase the taxation of or changes or will change the basis of taxation of payments to the Bank of principal of or interest on the Loan or any other amount payable under this Agreement (other than any such increase or change which arises by reason of any increase in the rate of tax payable by the Bank on its overall net income or as a result of any Taxes referred to in sub-Clauses 6.2 or 6.3); or

**8.1.3** imposes, modifies, or deems applicable any capital adequacy, reserve or deposit requirements attributable to this Agreement or to a class of business or transaction which, in the reasonable opinion of the Bank, includes this Agreement, against assets held by, or deposits in or for the amount of, or credit extended by an office of the Bank; provided, however, that the foregoing shall not include any increase in the rate of tax payable on the overall net income of the Bank as a result of any change in the manner in which the Bank is required to allocate resources to this Agreement; or

**8.1.4** imposes or will impose on the Bank any other condition affecting this Agreement, the Facility or the Loan,

and if as a result of any of the foregoing:

(i) the cost to the Bank of making, funding or maintaining the Loan or the Facility is increased; or

(ii) the amount of principal, interest or other amount payable to or received by the Bank hereunder is reduced; or

(iii) the Bank makes any payment or foregoes any interest or other return on or calculated by reference to the gross amount of any sum receivable by it from Gazprom hereunder or makes any payment or foregoes any interest or other return on or calculated by reference to the gross amount of the Loan, then subject to the following, and in each such case:

(A) the Bank shall, as soon as practicable after becoming aware of such increased cost, reduced amount or payment made or foregone, give written notice to Gazprom, together with a certificate signed by two authorised officials of the Bank describing in reasonable detail the introduction or change or request which has occurred and the country or jurisdiction concerned and the nature and date thereof and demonstrating the connection between such introduction, change or request and such increased cost, reduced amount or payment made or foregone, and setting out in reasonable detail the basis on

which such amount has been calculated, and all relevant supporting documents evidencing the matters set out in such notes; and

- (B) Gazprom, in the case of clauses (i) and (iii) above, shall on demand by the Bank, pay to the Bank such additional amount as shall be necessary to compensate the Bank for such increased cost, and, in the case of clause (ii) above, at the time the amount so reduced would otherwise have been payable, pay to the Bank such additional amount as shall be necessary to compensate the Bank for such reduction, payment or foregone interest or other return; provided, however, that in the case of sub-Clause 8.1.3 above (relating to a class of business or transaction which, in the reasonable opinion of the Bank, includes this Agreement), the amount of such increased cost shall be deemed not to exceed an amount equal to the proportion thereof which is directly attributable to this Agreement.

provided that this sub-Clause 8.1 will not apply to or in respect of any matter for which the Bank has already been compensated under sub-Clause 6.2 or 6.3.

## **8.2 Mitigation**

In the event that the Bank becomes entitled to make a claim pursuant to sub-Clause 8.1, the Bank shall consult in good faith with Gazprom and shall use reasonable efforts (based on the Bank's reasonable interpretation of any relevant tax, law, regulation, requirement, official directive, request, policy or guideline) to reduce, in whole or in part, Gazprom's obligations to pay any additional amount pursuant to such sub-Clause, except that nothing in this sub-Clause 8.2 shall obligate the Bank to incur any costs or expenses in taking any action which, in the reasonable opinion of the Bank, is prejudicial to its interests.

## **9 Representations and Warranties**

### **9.1 Gazprom's Representations and Warranties**

Gazprom represents and warrants to the Bank as follows, to the intent that such shall form the basis of this Agreement and shall remain in full force and effect at the date hereof and shall be deemed to be repeated by Gazprom on the Closing Date.

**9.1.1** Gazprom is duly organised and incorporated and validly existing under the laws of the Russian Federation and has the power and legal right to own its property, to conduct its business as currently conducted and to enter into and to perform its obligations under this Agreement and to borrow the Advance; Gazprom has taken all necessary corporate, legal and other action required to authorise the borrowing of the Advance on the terms and subject to the conditions of this Agreement and to authorise the execution and delivery of this Agreement and all other documents to be executed and delivered by it in connection with this Agreement, and the performance of this Agreement in accordance with its terms.

**9.1.2** This Agreement has been duly executed and delivered by Gazprom and constitutes a legal, valid and binding obligation of Gazprom enforceable in accordance with its terms, subject to applicable bankruptcy, insolvency, moratorium and similar laws affecting creditors' rights generally, and subject, as to enforceability, (i) to general principles of equity (regardless of whether enforcement is sought in a proceeding in equity or at law); (ii) with respect to the enforceability of a judgment whether there is a treaty in force relating to the mutual recognition of foreign judgments; and (iii) to the fact that the gross-up provisions contained in sub-Clause 6.2 or sub-Clause 6.3 may not be enforceable under Russian law.

**9.1.3** The execution, delivery and performance of this Agreement by Gazprom will not conflict with or result in any breach or violation of (i) any law or regulation or any order of any governmental, judicial or public body or authority in the Russian Federation, (ii) the

constitutive documents, rules and regulations of Gazprom or (iii) any agreement or other undertaking or instrument to which Gazprom is a party or which is binding upon Gazprom or any of its assets, nor result in the creation or imposition of any Encumbrance on any of its assets pursuant to the provisions of any such agreement or other undertaking or instrument.

- 9.1.4** All consents, authorisations or approvals of, or filings with, any governmental, judicial and public bodies and authorities of the Russian Federation required by Gazprom in connection with the execution, delivery, performance, legality, validity, enforceability, and admissibility in evidence of this Agreement have been obtained or effected and are and shall remain in full force and effect.
- 9.1.5** No event has occurred that constitutes, or that, with the giving of notice or the lapse of time, or both, would constitute, an Event of Default or a default under any agreement or instrument evidencing any Financial Indebtedness of Gazprom, and no such event will occur upon the making of the Advance.
- 9.1.6** There are no judicial, arbitral or administrative actions, proceedings or claims pending or, to the knowledge of Gazprom, threatened, against Gazprom or any of its Principal Subsidiaries, the adverse determination of which could have a Material Adverse Effect.
- 9.1.7** Except for Encumbrances of the types referred to in the definition of Permitted Encumbrances in sub-Clause 1.1 hereof, Gazprom and each of its Principal Subsidiaries has the right of ownership (as that expression is defined under the laws of the Russian Federation) to its property free and clear of all Encumbrances which if created could have a Material Adverse Effect and Gazprom's obligations under the Loan rank at least pari passu with all its other unsecured and unsubordinated Financial Indebtedness (apart from any obligations mandatorily preferred by law).
- 9.1.8** The most recent audited consolidated financial statements of Gazprom:
- (i) were prepared in accordance with IAS; and
  - (ii) save as disclosed therein, present fairly in all material respects the assets and liabilities as at that date and the results of operations of Gazprom during the relevant financial year.
- 9.1.9** There has been no material adverse change since 31 December 2001 in the financial condition, results of business operations or prospects of Gazprom or the Group taken as a whole.
- 9.1.10** The execution, delivery and enforceability of this Agreement is not subject to any tax, duty, fee or other charge, including, without limitation, any registration or transfer tax, stamp duty or similar levy, imposed by or within the Russian Federation or any political subdivision or taxing authority thereof or therein.
- 9.1.11** Neither Gazprom nor its property has any right of immunity from suit, execution, attachment or other legal process on the grounds of sovereignty or otherwise in respect of any action or proceeding relating in any way to this Agreement.
- 9.1.12** Gazprom is in compliance in all material respects with all applicable provisions of law except where failure to be so in compliance would not have a Material Adverse Effect.
- 9.1.13** Neither Gazprom, nor any of its Principal Subsidiaries has taken any corporate action nor, to the best of the knowledge and belief of Gazprom, have any other steps been taken or legal proceedings been started or threatened in writing against Gazprom or any of its Principal Subsidiaries for its bankruptcy, winding-up, dissolution, external administration or re-organisation (whether by voluntary arrangement, scheme of arrangement or otherwise) or for the appointment of a receiver, administrator, administrative receiver, conservator, custodian, trustee or similar officer of its or of any or all of its assets or revenues.

- 9.1.14** There are no strikes or other employment disputes against Gazprom which are pending or, to Gazprom's knowledge, threatened in writing which could have a Material Adverse Effect.
- 9.1.15** In any proceedings taken in the Russian Federation in relation to this Agreement, the choice of English law as the governing law of this Agreement and any arbitration award obtained in England pursuant to Clause 14.10 in relation to this Agreement will be recognised and enforced in the Russian Federation after compliance with the applicable procedural rules and all other legal requirements in Russia.
- 9.1.16** Under the laws of the Russian Federation, it will not be required to make any deduction or withholding from any payment it may make hereunder, provided that the Bank obtains an advance exemption from withholding taxes with respect to such payment.
- 9.1.17** Its execution of this Agreement constitutes, and its exercise of its rights and performance of its obligations thereunder will constitute, private and commercial acts done and performed for private and commercial purposes.
- 9.1.18** It has no overdue tax liabilities which could have a Material Adverse Effect other than those which it has disclosed to the Bank prior to the date hereof or which it is contesting in good faith.
- 9.1.19** All licences, consents, examinations, clearances, filings, registrations and authorisations which are or may be necessary to enable Gazprom and any of its Principal Subsidiaries to own its assets and carry on its business are in full force and effect and, if not, the absence of which could have a Material Adverse Effect.
- 9.1.20** With respect to the offer and sale of the Notes pursuant to the Subscription Agreement, neither Gazprom nor any of its Affiliates nor any person acting on its or their behalf (i) has engaged or will engage in any directed selling efforts (as defined in Regulations S under the U.S. Securities Act of 1933 ("Regulation S")) and Gazprom, its Affiliates and any persons acting on its or their behalf have complied and will comply with the offering restrictions requirement of Regulation S.
- 9.1.21** Gazprom, and each of its Principal Subsidiaries, is in compliance with all Environmental Law except where failure to do so could not have a Material Adverse Effect.

## **9.2 Bank's Representations and Warranties:**

The Bank represents and warrants to Gazprom as follows.

- 9.2.1** The Bank is duly incorporated under the laws of and is a resident for German taxation purposes in the Federal Republic of Germany and has full power and capacity to execute this Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement and to undertake and perform the obligations expressed to be assumed by it herein and therein and the Bank has taken all necessary action to approve and authorise the same.
- 9.2.2** The execution of this Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement and the undertaking and performance by the Bank of the obligations expressed to be assumed by it herein and therein will not conflict with, or result in a breach of or default under, the laws of the Federal Republic of Germany or the constitutive documents, rules and regulations of the Bank or any agreement or instrument to which it is a party or by which it is bound or in respect of indebtedness in relation to which it is a surety.
- 9.2.3** This Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement constitute legal, valid and binding obligations of the Bank.
- 9.2.4** All authorisations, consents and approvals required by the Bank for or in connection with the execution of this Agreement, the Trust Deed, the Paying Agency Agreement and the

Subscription Agreement, the performance by the Bank of the obligations expressed to be undertaken by it herein and therein have been obtained and are in full force and effect.

## **10 Covenants**

### **10.1 Negative Pledge**

So long as any amount remains outstanding hereunder, neither Gazprom nor any Principal Subsidiary will create or permit to subsist any Encumbrance (other than a Permitted Encumbrance) upon or in respect of any of its undertakings, property, income, assets or revenues, present or future, to secure any Financial Indebtedness unless, at the same time or prior thereto, Gazprom's obligations hereunder are secured equally and rateably therewith or benefit from such other security or other arrangement, as the case may be, in each case to the satisfaction of the Trustee.

### **10.2 Maintenance of Authorisations**

So long as any amount remains outstanding hereunder, Gazprom shall take all necessary action to obtain, and do or cause to be done all things reasonably necessary to ensure the continuance of, all consents, licences, approvals and authorisations, and make or cause to be made all registrations, recordings and filings, which may at any time be required to be obtained or made in the Russian Federation for the execution, delivery or performance of this Agreement or for the validity or enforceability thereof.

### **10.3 Mergers**

So long as any amount remains outstanding hereunder, Gazprom shall not, without the prior written consent of the Bank, enter into any reorganisation (whether by way of a merger, accession, division, separation or transformation, as these terms are construed by applicable Russian legislation), or participate in any other type of corporate reconstruction and Gazprom shall ensure that no Principal Subsidiary enters into any reorganisation (whether by way of a merger, accession, division, separation or transformation as these terms are construed by applicable Russian legislation), or participates in any other type of corporate reconstruction if such reorganisation or other type of corporate reconstruction could have a material adverse effect on Gazprom's ability to perform its obligations under this Agreement or the validity or enforceability of this Agreement or the rights or remedies of the Bank under this Agreement.

### **10.4 Disposals**

So long as any amount remains outstanding hereunder, Gazprom shall not and Gazprom shall ensure that no member of the Group shall, without the prior written consent of the Bank, (disregarding (i) sales of stock in trade in the ordinary course of business and assignments of or other arrangements over the rights or revenues arising from contracts for the sale of gas, gas condensate, crude oil or any other hydrocarbon products, (ii) any lease or related transaction and (iii) assets or rights not related to the extraction, production, transportation, marketing or supply of gas) sell, transfer or otherwise dispose of, by one or more transactions or series of transactions (whether related or not), the whole or any part of its revenues or its assets (which for the avoidance of doubt excludes payments of cash, or other consideration, for the acquisition of any asset on normal commercial terms) which have the aggregate value in excess of U.S.\$1,000,000,000 or the equivalent thereof to a person that is not a member of the Group.

### **10.5 Maintenance of Property**

So long as any amount remains outstanding hereunder, Gazprom and any Principal Subsidiaries will cause all property used in the carrying on by it of its business for the time being to be kept in good repair and working order as, in the judgment of Gazprom or any Principal Subsidiary, may be reasonably necessary so that the business may be carried on and the failure to keep such property in such condition would have a Material Adverse Effect.

## **10.6 Payment of Taxes and Other Claims**

So long as any amount remains outstanding hereunder, Gazprom shall pay or discharge or cause to be paid or discharged, before the same shall become overdue, all taxes, assessments and governmental charges levied or imposed upon, or upon the income, profits or property of Gazprom; provided that Gazprom shall not be required to pay or discharge or cause to be paid or discharged any such tax, assessment, charge or claim (a) whose amount, applicability or validity is being contested in good faith by appropriate proceedings and for which adequate reserves in accordance with IAS or other appropriate provision has been made or (b) whose amount, together with all such other unpaid or undischarged taxes, assessments, charges and claims, does not in the aggregate exceed U.S.\$100,000,000.

## **10.7 Withholding Tax Exemption**

**10.7.1** The Bank shall use its best endeavours to provide Gazprom no later than 10 business days before the first interest payment date (and thereafter as soon as possible at the beginning of each calendar year but not later than 10 business days prior to the first interest payment date in that year) with the certificate, issued and certified by the competent German authorities, confirming that the Bank is resident in Germany, provided that the Bank shall not be responsible for any failure to provide, or any delays in providing, such residency certificate as a result of any action or inaction of the competent German authorities, but shall notify Gazprom as soon as practicable about any such failure or delay with an indication of the actions taken by the Bank to obtain such residency certificate.

**10.7.2** Gazprom and the Bank agree that, should the Russian legislation regulating the procedure for obtaining an exemption from Russian income tax withholding change then the procedure referred to in sub-Clause 10.7.1 will be deemed changed accordingly.

## **10.8 Maintenance of Insurance**

So long as any amount remains outstanding hereunder, Gazprom and any Principal Subsidiary shall keep those of their properties which are of an insurable nature insured with insurers who implement good business practices and are believed by Gazprom or such Principal Subsidiary, as the case may be, to be responsible against loss or damage to the extent that property of similar character is usually so insured by corporations in the same jurisdictions similarly situated.

## **10.9 Reports**

**10.9.1** So long as any amount remains outstanding hereunder, Gazprom will furnish to the Bank commencing with the year ending 31 December 2001, within 9 months of the relevant year-end audited annual financial statements prepared in accordance with IAS, including a report thereon by Gazprom's certified independent accountants.

**10.9.2** On each Interest Payment Date, Gazprom shall deliver to the Bank a written notice in the form of an Officers' Certificate stating whether any Potential Event of Default or Event of Default has occurred and, if it has occurred and shall be continuing, what action Gazprom is taking or proposes to take with respect thereto.

**10.9.3** Gazprom will on request of the Bank provide the Bank with such further information, other than information which Gazprom determines in good faith to be confidential, about the business and financial condition of Gazprom and its Subsidiaries as the Bank may require (including pursuant to Clauses 15.5 and 15.12 of the Trust Deed).

## **10.10 Compliance with Terms of Trust Deed**

The Bank agrees that it will observe and comply with its obligations set out in the Trust Deed and will not agree to any amendment to the terms of such Trust Deed without prior consultation, if reasonably practicable, with Gazprom. In addition, the Bank agrees that it will only exercise its

power to appoint a new Trustee pursuant to Clause 27.1 of the Trust Deed with the consent of Gazprom (such consent not to be unreasonably withheld or delayed).

## **11 Events of Default**

### **11.1 Events of Default**

If one or more of the following events of default (each, an "Event of Default") shall occur and be continuing, the Bank shall be entitled to the remedies set forth in sub-Clause 11.3.

- 11.1.1** Gazprom fails to pay within three Business Days any amount payable hereunder as and when such amount becomes payable in the currency and in the manner specified herein, provided that such default will not be an Event of Default if (i) it occurs by reason only of administrative or technical difficulties affecting the transfer of the funds due from Gazprom, (ii) Gazprom issued the appropriate transfer and payment instructions in sufficient time to permit the transfer and payment of the amount due to be made on its due date and (iii) the Bank receives from Gazprom that amount within six Business Days after the due date for payment.
- 11.1.2** Gazprom fails to perform or observe any of its other obligations under this Agreement and (except where in any such case that failure is not capable of remedy when no such notices as is hereinafter mentioned will be required) that failure continues for the period of 30 days (or such longer period as the Bank may permit) next following the submission by the Bank to Gazprom of notice in writing requesting the same to be remedied.
- 11.1.3** Any representation or warranty of Gazprom or any statement deemed to be made by Gazprom in this Agreement or in any other document, certificate or notice delivered to the Bank in connection with this Agreement or the issue of Notes proves to have been inaccurate, incomplete or misleading in any material respect at the time it was made or repeated or deemed to have been made or repeated.
- 11.1.4** Gazprom or any Principal Subsidiary (i) fails to pay any of its Financial Indebtedness as and when such Financial Indebtedness becomes payable, taking into account any applicable grace period or (ii) fails to perform or observe any covenant or agreement to be performed or observed by it contained in any other agreement or in any instrument evidencing any of its Financial Indebtedness if, as a result of such failure, any other party to such agreement or instrument is entitled to exercise, and has not irrevocably waived, the right to accelerate the maturity of any amount owing thereunder; provided, that the total amount of such Financial Indebtedness unpaid or capable of being accelerated exceeds U.S.\$20,000,000 (or its equivalent in another currency); provided however that this sub-Clause 11.1.4 shall not apply to foreign currency Financial Indebtedness owed to Russian Persons.
- 11.1.5** Gazprom or any Principal Subsidiary commences negotiations with its creditors generally with a view to the general readjustment or rescheduling of its indebtedness or makes a general assignment for the benefit of or a composition with its creditors generally; provided that in the case of a Principal Subsidiary the same could have a Material Adverse Effect.
- 11.1.6** Gazprom or any Principal Subsidiary takes any corporate action or any order is made by a competent court for its winding-up, dissolution, external administration or re-organisation whether by way of voluntary arrangement, scheme of arrangement or otherwise or for the appointment of a liquidator, receiver, administrator, administrative receiver, conservator, custodian, trustee or similar officer of it or of all or a material part of its revenues and assets.
- 11.1.7** Gazprom or any Principal Subsidiary (i) fails or is unable to pay its debts generally as they become due or (ii) commences a voluntary case in bankruptcy or any other action or proceeding for any other relief under any law affecting creditors' rights as is similar to bankruptcy law, or (iii) a bankruptcy (insolvency) petition in respect of Gazprom or any

Principal Subsidiary is accepted by any competent court and bankruptcy proceedings are initiated by such competent court, or any action is brought in and accepted by any competent court for the liquidation of Gazprom or any Principal Subsidiary or a Russian federal law that provides for the liquidation of Gazprom as operator of the Unified Gas Supply System is adopted and comes into effect.

- 11.1.8** Any governmental authorisation necessary for the performance of any obligation of Gazprom under this Agreement fails to be in full force and effect.
- 11.1.9** Any governmental authority or court takes any action that has a material adverse effect on Gazprom's ability to perform its obligations under this Agreement or the validity or enforceability of this Agreement or the rights or remedies of the Bank under this Agreement.
- 11.1.10** Any execution or distress is levied against, or an encumbrancer takes possession of, the whole or any material part of, the assets of Gazprom or any event occurs which under the laws of any jurisdiction has a similar or analogous effect and the same could have a Material Adverse Effect unless such execution, distress, enforcement of an Encumbrance or similar or analogous event is being contested in good faith by Gazprom and is not removed, paid out, stayed or discharged within 30 days of such execution, distress being levied, taking of possession or similar or analogous act, as the case may be.
- 11.1.11** The aggregate amount of unsatisfied judgements, decrees or orders of courts of competent jurisdiction or other appropriate and competent law-enforcement bodies for the payment of money against Gazprom and its Principal Subsidiaries in the aggregate exceeds U.S.\$5,000,000, or the equivalent thereof in any other currency or currencies and there is a period of 30 days following the entry thereof during which such judgment, decree or order is not discharged, waived or the execution thereof stayed and such default continues for ten days after the notice specified in sub-Clause 11.2.
- 11.1.12** Any seizure, compulsory acquisition, expropriation, nationalisation or renationalisation after the date of this Agreement by or under the authority of a government authority of all or part (the book value of which is fifteen per cent. (15 per cent.) or more of the book value of the whole) of the assets or all or more than fifteen per cent. (15 per cent.) of the voting or non-voting shares of Gazprom or any Principal Subsidiary is made by any person.
- 11.1.13** Gazprom or any of its Principal Subsidiaries ceases to carry on the principal business it carries on at the date hereof.
- 11.1.14** At any time it is or becomes unlawful for Gazprom to perform or comply with any or all of its obligations under this Agreement or any of such obligations (subject as provided in sub-Clause 9.1.2) are not, or cease to be, legal, valid, binding and enforceable.
- 11.1.15** Any event occurs which under the laws of any relevant jurisdiction has an analogous effect to any of the events referred to in any of the foregoing paragraphs.

## **11.2 Notice of Default**

Gazprom shall deliver to the Bank and the Trustee, within 30 days after becoming aware thereof, written notice of any event which is a Potential Event of Default or an Event of Default, its status and what action Gazprom is taking or proposes to take with respect thereto.

## **11.3 Default Remedies**

If any Event of Default shall occur and be continuing, the Bank may, by notice in writing to Gazprom, (a) declare the obligations of the Bank hereunder to be terminated, whereupon such obligations shall terminate, and (b) declare all amounts payable hereunder by Gazprom that would otherwise be due after the date of such termination to be immediately due and payable,

whereupon all such amounts shall become immediately due and payable, all without diligence, presentment, demand of payment, protest or notice of any kind, which are expressly waived by Gazprom; provided, however, that if any event of any kind referred to in sub-Clause 11.1.7 occurs, the obligations of the Bank hereunder shall immediately terminate, and all amounts payable hereunder by Gazprom that would otherwise be due after the occurrence of such event shall become immediately due and payable, all without diligence, presentment, demand of payment, protest or notice of any kind, which are especially waived by Gazprom.

#### **11.4 Rights Not Exclusive**

The rights provided for herein are cumulative and are not exclusive of any other rights, powers, privileges or remedies provided by law.

### **12 Indemnity**

#### **12.1 Indemnification**

Gazprom undertakes to the Bank that if the Bank, each director, officer, employee or agent (other than the Principal Paying Agent or any of the Paying Agents) of the Bank (each an "**Indemnified Party**") incurs any loss, liability, cost, claim, charge, expense (including all legal fees properly incurred) demand or damage (a "**Loss**") which may be properly incurred in respect of this Agreement (or enforcement thereof), and/or the issuance, constitution, sale, listing and/or enforcement of the Notes and/or the Notes being outstanding (excluding a Loss that is the subject of the undertakings contained in Clauses 8 and 13 and sub-Clause 14.6 of this Agreement (it being understood that the Bank may not recover twice in respect of the same Loss)) Gazprom shall pay to the Indemnified Party on demand an amount equal to such Loss (as evidenced by an invoice distributed to Gazprom by the Bank in accordance with sub-Clause 14.4) unless, in any such case, such Loss was either caused by such Indemnified Parties' negligence or wilful misconduct or arise out of a breach of the representations and warranties of the Bank contained in the First Schedule to the Subscription Agreement; provided that this sub-Clause 12.1 will not apply to or in respect of any Taxes with respect to payments of principal and interest on the Loan or any other amount payable under this Agreement.

#### **12.2 Independent Obligation**

Sub-Clause 12.1 constitutes a separate and independent obligation of Gazprom from its other obligations under or in connection with this Agreement or any other obligations of Gazprom in connection with the issuance of the Notes by the Bank and shall not affect, or be construed to affect, any other provision of this Agreement or any such other obligations.

#### **12.3 Evidence of Loss**

A certificate of the Bank setting forth the amount of losses, expenses and liabilities described in sub-Clause 12.1 and specifying in full detail the basis therefor shall be prima facie evidence of the amount of such losses, expenses and liabilities.

#### **12.4 Survival**

The obligations of Gazprom pursuant to sub-Clauses 6.2, 6.3 and 12.1 shall survive the execution and delivery of this Agreement, the drawdown of the Facility and the repayment of the Loan, in each case by Gazprom.

### **13 Expenses**

#### **13.1 Reimbursement of Front-end Expenses for the Extension of the Loan by the Bank**

Gazprom shall, subject to the terms contained in a side letter of even date herewith, reimburse the Bank in Dollars on demand for all reasonable costs and expenses incurred by the Bank in connection with the negotiation, preparation and execution of this Agreement and all related

documents, the Notes and all related documents, including, without limitation, the fees and expense of its counsel.

### **13.2 Reimbursement of Ongoing Expenses for the Extension of the Loan by the Bank**

In addition, Gazprom hereby agrees to make any and all payments, and to pay any and all commissions, costs and expenses, in Dollars, owing to Salomon Brothers International Limited and Credit Suisse First Boston (Europe) Limited or any third party by the Bank under or in respect of the Subscription Agreement, including, without limitation, the payments required under Clauses 5 and 8 of the Subscription Agreement. Gazprom shall also reimburse the Bank for any indemnification or other payment obligations of the Bank under or in respect of the Trust Deed (other than the obligation of the Bank to make payments of principal, interest or additional amounts in respect of the Notes).

## **14 General**

### **14.1 Evidence of Debt**

The entries made in the account referred to in sub-Clause 6.1 shall, in the absence of manifest error, constitute prima facie evidence of the existence and amounts of Gazprom's obligations recorded therein.

### **14.2 Stamp Duties**

Gazprom shall pay all stamp, registration and documentary taxes or similar charges (if any) imposed by any person in the Russian Federation or the Federal Republic of Germany which may be payable or determined to be payable in connection with the execution, delivery, performance, enforcement, or admissibility into evidence of this Agreement and shall indemnify the Bank against any and all costs and expenses which may be incurred or suffered by the Bank with respect to, or resulting from, delay or failure by Gazprom to pay such taxes or similar charges.

### **14.3 Waivers**

No failure to exercise and no delay in exercising, on the part of the Bank or Gazprom, any right, power to privilege hereunder and no course of dealing between Gazprom and the Bank shall operate as a waiver thereof, nor shall any single or partial exercise of any right, power or privilege preclude any other or further exercise thereof, or the exercise of any other right, power or privilege. The rights and remedies herein provided are cumulative and not exclusive of any rights, or remedies provided by applicable law.

### **14.4 Notices**

All notices, requests, demands or other communications to or upon the respective parties hereto shall be given or made by telex or otherwise in writing and shall be deemed to have been duly given or made at the time of delivery, if delivered by hand or courier or if sent by facsimile transmission or by airmail, to the party to which such notice, request, demand or other communication is required or permitted to be given or made under this Agreement addressed as follows:

(a) if to Gazprom:

    OAO Gazprom  
    16 Nametkina Street  
    117884 Moscow  
    Russian Federation  
    Telecopier: (7 095) 719 8352  
    Attention: Corporate Finance Department

(b) if to the Bank:

Salomon Brothers AG  
Frankfurter Welle  
Reuterweg 16  
60323 Frankfurt am Main  
Federal Republic of Germany  
Telecopier: (49 69) 232 570  
Attention: Operations Department

or to such other address or telecopier number as any party may hereafter specify in writing to the other.

#### **14.5 Assignment**

**14.5.1** This Agreement shall inure to the benefit of and be binding upon the parties, their respective successors and any permitted assignee or transferee of some or all of a party's rights or obligations under this Agreement. Any reference in this Agreement to any party shall be construed accordingly and, in particular, references to the exercise of rights and discretions by the Bank, following the enforcement of the security and/or assignment referred to in sub-Clause 14.5.3 below, shall be references to the exercise of such rights or discretions by the Trustee (as Trustee). Notwithstanding the foregoing, the Trustee shall not be entitled to participate in any discussions between the Bank and Gazprom or any agreements of the Bank or Gazprom pursuant to sub-Clauses 6.4 or 6.5 or Clause 8.

**14.5.2** Gazprom shall not assign or transfer all or any part of its rights or obligations hereunder to any other party except as otherwise expressly permitted herein.

**14.5.3** The Bank may not assign or transfer, in whole or in part, any of its rights and benefits or obligations under this Agreement except (i) the charge by way of first fixed charge granted by the Bank in favour of the Trustee (as Trustee) of the Bank's rights and benefits under this Agreement and (ii) the absolute assignment by the Bank to the Trustee of certain rights, interests and benefits under this Agreement, in each case, pursuant to Clause 4 of the Trust Deed.

#### **14.6 Currency Indemnity**

To the fullest extent permitted by law, the obligation of Gazprom in respect of any amount due in Dollars under this Agreement shall, notwithstanding any payment in any other currency (whether pursuant to a judgment or otherwise), be discharged only to the extent of the amount in Dollars that the Bank may, in accordance with normal banking procedures, purchase with the sum paid in such other currency (after any premium and costs of exchange) on the Business Day immediately following the day on which the Bank receives such payment. If the amount in Dollars that may be so purchased for any reason falls short of the amount originally due (the "**Due Amount**"), Gazprom hereby agrees to indemnify and hold harmless the Bank against any deficiency in Dollars. Any obligation of Gazprom not discharged by payment in Dollars shall, to the fullest extent permitted by applicable law, be due as a separate and independent obligation and, until discharged as provided herein, shall continue in full force and effect. If the amount in Dollars that may be purchased exceeds that Due Amount the Bank shall promptly pay the amount of the excess to Gazprom.

#### **14.7 Prescription**

Subject to the Bank having received the principal amount thereof or interest thereon from Gazprom, the Bank shall forthwith repay to Gazprom the principal amount or the interest amount thereon, respectively, of any Notes upon such Notes becoming void pursuant to Condition 11 of the Notes.

#### **14.8 Contracts (Rights of Third Parties) Act 1999**

A person who is not a party to this Agreement has no right under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of this Agreement.

#### **14.9 Choice of Law**

This Agreement shall be governed by, and construed in accordance with, the laws of England.

#### **14.10 Jurisdiction**

**14.10.1** For the exclusive benefit of the other party, each of Gazprom and the Bank hereby irrevocably agrees that the courts of England shall have jurisdiction to settle any disputes which may arise out of or in connection with this Agreement and that accordingly any suit, action or proceeding (collectively, "**Proceedings**") arising out of or in connection with this Agreement may be brought in such courts.

**14.10.2** Each of the parties irrevocably waives any objection which it may now or hereafter have to the laying of the venue of any Proceedings in any such court referred to in this Clause 14 and any claim that any such Proceedings have been brought in an inconvenient forum and further irrevocably agrees that a final and conclusive judgment in any Proceedings brought in the English courts with competent jurisdiction shall be conclusive and binding and may be enforced in the courts of any other jurisdiction.

**14.10.3** Nothing contained in this Agreement shall limit the right of any party to take Proceedings against another party in any other court of competent jurisdiction to the extent permitted by any applicable law, nor shall the taking of Proceedings in connection with this Agreement in one or more jurisdictions preclude the taking of Proceedings in any other jurisdiction or in any other court of competent jurisdiction in connection with this Agreement to the extent by any applicable law.

**14.10.4** Gazprom hereby agrees that, at the option of the Bank, any dispute, controversy, claim or cause of action brought by any party against another party or arising out of or relating to this Loan Agreement may be settled by arbitration in accordance with the Rules of the London Court of International Arbitration, which rules are deemed to be incorporated by reference into this clause. The place of arbitration shall be London, England and the language of the arbitration shall be English. The number of arbitrators shall be three, each of whom shall be disinterested in the dispute or controversy, shall have no connection with any party thereto and shall be an attorney experienced in international securities transactions. Each party shall nominate an arbitrator, who, in turn, shall nominate the Chairman of the Tribunal. If a dispute, claim controversy or cause of action shall involve more than two parties, the parties thereto shall attempt to align themselves in two sides (i.e. claimant and respondent) each of which shall appoint an arbitrator as if there were only two sides to such dispute, claim controversy or cause of action. If such alignment and appointment shall not have occurred within twenty (20) calendar days after the initiating party serves the arbitration demand or if a Chairman has not been selected within thirty (30) calendar days of the selection of the second arbitrator, the Arbitration Court of the London Court of International Arbitration shall appoint the three arbitrators or the Chairman, as the case may be. The parties and the Arbitration Court may appoint arbitrators from among the nationals of any country, whether or not a party is a national of that country. The arbitrators shall have no authority to award punitive or other punitive type damages and may not, in any event, make any ruling, finding or award that does not conform to the terms and conditions of this Agreement.

Fees of the arbitration (excluding each party's preparation, travel, attorneys' fees and similar costs) shall be borne in accordance with the decision of the arbitrators. The decision of the arbitrators shall be final, binding and enforceable upon the parties and judgment upon any award rendered by the arbitrators may be entered in any court having jurisdiction thereof. In the event that the failure of a party to comply with the decision of

the arbitrators requires any other party to apply to any court for enforcement of such award, the non-complying party shall be liable to the other for all costs of such litigation, including reasonable attorneys' fees.

**14.10.5 Bank's Process agent:** The Bank agrees that the process by which any Proceedings in England are begun may be served on it by being delivered to Citibank, N.A., General Counsel, Citigroup Centre, 33 Canada Square, Canary Wharf, London E14 5LB or its other principal place of business in England for the time being or at any other address for the time being at which process may be served on such person in accordance with Part XXIII of the Companies Act 1985 (as modified or re-enacted from time to time). If such person is not or ceases to be effectively appointed to accept service of process on the Bank's behalf, the Bank shall, on the written demand of Gazprom, appoint a further person in England to accept service of process on its behalf and, failing such appointment within 15 days, Gazprom shall be entitled to appoint such a person by written notice to the Bank. Nothing in this Clause shall affect the right of Gazprom to serve process in any other manner permitted by law.

**14.10.6 Borrower's Process agent:** Gazprom agrees that the process by which any Proceedings in England are begun may be served on it by being delivered to Gazprom (U.K.) Limited at 35 Vine Street, London EC3N 2AA or its other principal place of business in England for the time being or at any other address for the time being at which process may be served on such person in accordance with Part XXIII of the Companies Act 1985 (as modified or re-enacted from time to time). If such person is not or ceases to be effectively appointed to accept service of process on Gazprom's behalf, Gazprom shall, on the written demand of the Bank, appoint a further person in England to accept service of process on its behalf and, failing such appointment within 15 days, the Bank shall be entitled to appoint such a person by written notice to Gazprom. Nothing in this Clause shall affect the right of the Bank to serve process in any other manner permitted by law.

#### **14.11 Counterparts**

This Agreement may be executed in any number of counterparts and all of such counterparts taken together shall be deemed to constitute one and the same agreement.

## TERMS AND CONDITIONS OF THE NOTES

*The following is the text of the Terms and Conditions of the Notes, which contain summaries of certain provisions of the Trust Deed, and which will be attached to the Notes in definitive form, if any, and (subject to the provisions thereof) apply to the Global Note.*

The U.S.\$●00,000,000 Fixed Rate Loan Participation Notes due ● (the “**Notes**” which expression includes any further Notes issued pursuant to Condition 15 and forming a single series herewith), without coupons, of Salomon Brothers AG (the “**Bank**”) are constituted by a trust deed (the “**Trust Deed**”, which expression includes such trust deed as from time to time modified in accordance with the provisions therein contained and any deed or other document expressed to be supplemental thereto, as from time to time so modified) dated ● 2002 and made between the Bank and The Bank of New York (the “**Trustee**”, which expression shall include any successors) as trustee for the holders of the Notes (the “**Noteholders**”).

The Bank has authorised the creation, issue and sale of the Notes for the sole purpose of financing a U.S.\$●00,000,000 ● year loan (the “**Loan**”) to Open Joint Stock Company Gazprom (the “**Borrower**”). The Bank and the Borrower have recorded the terms of the Loan in a loan agreement (the “**Loan Agreement**”) dated ● 2002 between the Bank and the Borrower.

In each case where amounts of principal, interest and additional amounts (if any) are stated herein or in the Trust Deed to be payable in respect of the Notes, the obligations of the Bank to make any such payment shall constitute an obligation only to account to the Noteholders on each date upon which such amounts of principal, interest and additional amounts (if any) are due in respect of the Notes, for an amount equivalent to sums of principal, interest and additional amounts (if any) actually received by or for the account of the Bank pursuant to the Loan Agreement.

The Bank has charged by way of first fixed charge in favour of the Trustee certain of its rights and interests as lender under the Loan Agreement (other than any rights and benefits constituting Reserved Rights (as defined in the Trust Deed)) as security for its payment obligations in respect of the Notes and under the Trust Deed (the “**Charge**”) and has assigned absolutely certain other rights under the Loan Agreement to the Trustee (the “**Loan Administration Assignment**” and together with the Charge, the “**Security Interests**”). In certain circumstances, the Trustee can (subject to it being indemnified and/or secured to its satisfaction) be required by Noteholders holding at least one quarter of the principal amount of the Notes outstanding or by an Extraordinary Resolution (as defined in the Trust Deed) of the Noteholders to exercise certain of its powers under the Trust Deed (including those arising under the Loan Administration Assignment).

Payments in respect of the Notes will be made (subject to the receipt of the relevant funds from the Borrower) pursuant to a paying agency agreement (the “**Agency Agreement**”) dated ● 2002 and made between the Bank, The Bank of New York, New York Branch as paying agent and the registrar (the “**Registrar**”, which expressions shall include any successors), The Bank of New York, London Branch as the principal paying agent (the “**Principal Paying Agent**”) and Kredietbank S.A. Luxembourgeoise as paying agent and transfer agent (the “**Transfer Agent**”), which expressions shall include any successors, the Borrower and the Trustee.

Copies of the Trust Deed, the Loan Agreement and the Agency Agreement are available for inspection at the principal office of the Trustee being, at the date hereof, at One Canada Square, London E14 5AL at the specified office of the Principal Paying Agent and at the specified office of the Paying Agent in Luxembourg.

The statements contained in these Terms and Conditions include summaries or restatements of, and are subject to, the detailed provisions of the Trust Deed, the Loan Agreement (the form of which is scheduled to and incorporated in the Trust Deed) and the Agency Agreement. Noteholders are entitled to the benefit of, are bound by, and are deemed to have notice of, all the provisions thereof.

## 1 Status

The sole purpose of the issue of the Notes is to provide the funds for the Bank to finance the Loan. The Notes constitute the obligation of the Bank to apply the proceeds from the issue of the Notes solely for financing the Loan and to account to the Noteholders for an amount equivalent to sums of principal, interest and additional amounts (if any) actually received by or for the account of the Bank pursuant to the Loan Agreement.

The Trust Deed provides that payments in respect of the Notes equivalent to the sums actually received by or for the account of the Bank by way of principal, interest or additional amounts (if any) pursuant to the Loan Agreement will be made *pro rata* among all Noteholders, on the date of, and in the currency of, and subject to the conditions attaching to, the equivalent payment pursuant to the Loan Agreement. The Bank shall not be liable to make any payment in respect of the Notes other than as expressly provided herein and in the Trust Deed. As provided therein, the Bank shall be under no obligation to exercise in favour of the Noteholders any rights of set-off or of banker's lien or to combine accounts or counterclaim that may arise out of other transactions between the Bank and the Borrower.

Noteholders have notice of, and have accepted, these Terms and Conditions and the contents of the Trust Deed and the Loan Agreement, and have hereby accepted that:

- (a) neither the Bank nor the Trustee makes any representation or warranty in respect of, or shall at any time have any responsibility for, or, save as otherwise expressly provided in the Trust Deed or in paragraph (f) below, liability or obligation in respect of the performance and observance by the Borrower of its obligations under the Loan Agreement or the recoverability of any sum of principal or interest (or any additional amounts) due or to become due from the Borrower under the Loan Agreement;
- (b) neither the Bank nor the Trustee shall at any time have any responsibility for, or obligation or liability in respect of, the financial condition, creditworthiness, affairs, status or nature of the Borrower;
- (c) neither the Bank nor the Trustee shall at any time be liable for any representation or warranty or any act, default or omission of the Borrower under or in respect of the Loan Agreement;
- (d) neither the Bank nor the Trustee shall at any time have any responsibility for, or liability or obligation in respect of, the performance and observance by the Principal Paying Agent, any of the Paying Agents, the Registrar or the Transfer Agent of their respective obligations under the Agency Agreement;
- (e) the financial servicing and performance of the terms of the Notes depend solely and exclusively upon performance by the Borrower of its obligations under the Loan Agreement and its covenant, credit and financial standing. The Borrower has represented and warranted to the Bank in the Loan Agreement that the Loan Agreement constitutes a legal, valid and binding obligation of the Borrower; and
- (f) the Bank and the Trustee shall be entitled to rely on self-certification of the Borrower as a means of monitoring whether the Borrower is complying with its obligations under the Loan Agreement and shall not otherwise be responsible for investigating any aspect of the Borrower's performance in relation thereto and, subject as further provided in the Trust Deed, the Trustee will not be liable for any failure to make the usual or any investigations which might be made by a security holder in relation to the property which is the subject of the Trust Deed and held by way of security for the Notes, and shall not be bound to enquire into or be liable for any defect or failure in the right or title of the Bank to the assigned property whether such defect or failure was known to the Trustee or might have been discovered upon examination or enquiry or whether capable of remedy or not, nor will it have any liability for the enforceability of the security created by the Security Interests whether as a result of any failure, omission or defect in registering or filing or otherwise protecting or perfecting such security; the Trustee has no responsibility for the value of such security.

Under the Trust Deed, the obligations of the Bank in respect of the Notes rank *pari passu* and ratably without any preference among themselves.

In the event that the payments under the Loan Agreement are made by the Borrower to, or to the order of, the Trustee or (subject to the provisions of the Trust Deed) the Principal Paying Agent, they will *pro tanto* satisfy the obligations of the Bank in respect of the Notes.

Save as otherwise expressly provided herein and in the Trust Deed, no proprietary or other direct interest in the Bank's right under or in respect of the Loan Agreement or the Loan exists for the benefit of the Noteholders. Subject to the terms of the Trust Deed, no Noteholder will have any entitlement to enforce the Loan Agreement or direct recourse to the Borrower except through action by the Trustee pursuant to the Loan Administration Assignment granted to the Trustee in the Trust Deed. Neither the Bank nor, following the enforcement of the Security Interests created in the Trust Deed, the Trustee shall be required to take proceedings to enforce payment under the Loan Agreement unless it has been indemnified and/or secured by the Noteholders to its satisfaction.

## **2 Form and Denomination**

The Notes are issued in fully registered form, and in the denomination of U.S.\$1,000 or integral multiples thereof, without coupons.

## **3 Register, Title and Transfers**

The Registrar will maintain a register (the "**Register**") in respect of the Notes in accordance with the provisions of the Agency Agreement. In these Conditions the "holder" of a Note means the person in whose name such Note is for the time being registered in the Register (or, in the case of a joint holding, the first named thereof) and "Noteholder" shall be construed accordingly. A Note will be issued to each Noteholder in respect of its registered holding.

The holder of each Note shall (except as otherwise required by law) be treated as the absolute owner of such Note for all purposes (whether or not it is overdue and regardless of any notice of ownership, trust or any other interest therein, any writing on the Note relating thereto (other than the endorsed form of transfer) or any notice of any previous loss or theft of such Note) and no person shall be liable for so treating such holder.

A Note may be transferred upon surrender of the relevant Note, with the endorsed form of transfer duly completed, at the specified office of the Registrar or at the specified office of the Transfer Agent, together with such evidence as the Registrar or the Transfer Agent may reasonably require to prove the title of the transferor and the authority of the individuals who have executed the form of transfer. Where not all the Notes represented by the surrendered Note are the subject of the transfer, a new Note in respect of the balance of the Note will be issued to the transferor.

Subject to the last paragraph of this Condition, within five business days of the surrender of a Note in accordance with the immediately preceding paragraph above, the Registrar will register the transfer in question and deliver a new Note to each relevant holder at its specified office or (at the request and risk of such relevant holder) by uninsured first class mail (airmail if overseas) to the address specified for the purpose by such relevant holder. In this paragraph, "business day" means a day on which commercial banks are open for business (including dealings in foreign currencies) in the city where the Registrar has its specified office.

The transfer of a Note will be effected without charge but against such indemnity as the Registrar may require in respect of any tax or other duty of whatsoever nature which may be levied or imposed in connection with such transfer.

Noteholders may not require transfers to be registered during the period of 15 days ending on the due date for any payment of principal or interest in respect of the Notes.

#### **4 Restrictive Covenant**

As provided in the Trust Deed, so long as any of the Notes remains outstanding (as defined in the Trust Deed), the Bank will not, without the prior written consent of the Trustee, agree to any amendments to or any modification or waiver of, or authorise any breach or proposed breach of, the terms of the Loan Agreement and will act at all times in accordance with any instructions of the Trustee from time to time with respect to the Loan Agreement, except as otherwise expressly provided in the Loan Agreement. Any such amendment, modification, waiver or authorisation made with the consent of the Trustee shall be binding on the Noteholders and, unless the Trustee agrees otherwise, any such amendment or modification shall be notified by the Bank to the Noteholders in accordance with Condition 14.

#### **5 Interest**

On each Interest Payment Date the Bank shall account to the Noteholders for an amount equivalent to amounts of interest actually received by or for the account of the Bank pursuant to the Loan Agreement, which interest under the Loan is equal to ● per cent. per annum as set out in Clause 4 of the Loan Agreement. Interest shall continue to accrue on overdue interest at the same rate per annum up to the maximum extent permitted by applicable law.

If interest is required to be calculated for any period of less than a year, it will be calculated on the basis of a year of 360 days consisting of 12 months of 30 days each and, in the case of an incomplete month, the actual number of days elapsed.

In this Condition 5, "Interest Payment Date" means ● and ● of each year.

#### **6 Redemption**

Unless previously prepaid or repaid, the Borrower will be required to repay the Loan on ● and, subject to such repayment, as set forth in the Loan Agreement, all the Notes then remaining outstanding will on that date be redeemed or repaid by the Bank at 100 per cent. of the principal amount thereof.

The Bank shall, at the option of the Holder of any Note redeem such Note on [●] (the "Put Settlement Date") at its principal amount together with accrued interest. To exercise such option a Holder must deposit the Note or Notes to be redeemed with any Paying Agent together with a duly completed put redemption notice (the "Put Option Notice") in the form obtainable from any of the Paying Agents, not more than 60 but not less than 30 days prior to the Put Settlement Date. No Note so deposited may be withdrawn. *Provided, however*, that if, prior to the Put Settlement Date, a Relevant Event has occurred or, upon due presentation of any Note on the Put Settlement Date, payment of the redemption moneys is improperly withheld or refused, such Note shall, without prejudice to the exercise of the Put Option, be returned to the Holder by uninsured first class mail (airmail if overseas) at such address as may have been given by such Holder in the relevant Put Option Notice.

Subject to timely receipt of the relevant amounts from the Borrower under the Loan Agreement, the Bank shall redeem the Notes in accordance with this Condition 6 on the Put Settlement Date, subject as provided in Condition 7 (*Payments*).

If the Loan should become repayable (and be repaid) pursuant to the Loan Agreement prior to ●, as set forth in the Loan Agreement, all Notes then remaining outstanding will thereupon become due and redeemable or repayable at par together with accrued interest (and, subject to the Loan being repaid together with accrued interest, shall be redeemed or repaid) and the Bank will endeavour to give not less than 8 days' notice thereof to the Trustee and the Noteholders.

#### **7 Payments**

Payments of principal shall be made by U.S. dollar cheque drawn on, or by transfer to a U.S. dollar account maintained by the payee with, a bank in New York City upon surrender of the relevant Notes at the specified office of the Principal Paying Agent or at the specified office of the Transfer Agent.

Payments of interest shall be made by U.S. dollar cheque drawn on, or by transfer to a U.S. dollar account maintained by the payee with, a bank in New York City and (in the case of interest payable on redemption) upon surrender of the relevant Notes at the specified office of the Principal Paying Agent or at the specified office of the Transfer Agent.

All payments in respect of the Notes are subject in all cases to any applicable fiscal or other laws and regulations, but without prejudice to the provisions of Condition 8. No commissions or expenses shall be charged to the Noteholders in respect of such payments.

If the due date for payments of interest or redemption is not a business day, the holder of a Note shall not be entitled to payment of the amount due until the next following business day and shall not be entitled to any further interest or other payment in respect of any such delay. In this paragraph, "business day" means a day on which the London Interbank Market is open for dealings between banks generally, and if on that day a payment is to be made hereunder, commercial banks generally are open for business in Frankfurt am Main, New York City and in the city where the specified office of the Principal Paying Agent is located.

Each payment in respect of a Note will be made to the person shown as the holder in the Register at the opening of business (in the place of the Registrar's specified office) on the fifteenth day before the due date for such payment.

The Agency Agreement provides that the Bank may at any time, with the prior written approval of the Trustee, vary or terminate the appointment of the Principal Paying Agent or any of the Paying Agents, and appoint additional or other paying agents provided that so long as the Notes are listed on the Luxembourg Stock Exchange (the "**Stock Exchange**"), there will be a paying agent and transfer agent with a specified office in Luxembourg or such other place in accordance with the rules of the Stock Exchange. Any such variation, termination or appointment shall only take effect (other than in the case of insolvency, when it shall be of immediate effect) after not more than 45 days' and not less than 30 days' notice thereof shall have been given to the Noteholders in accordance with Condition 14.

In addition, if the due date for redemption or repayment of a Note is not an Interest Payment Date, interest accrued from the preceding Interest Payment Date or, as the case may be, from the Closing Date, shall be payable only as and when actually received by or for the account of the Bank pursuant to the Loan Agreement.

Save as directed by the Trustee at any time after the security created in the Trust Deed becomes enforceable, the Bank will require the Borrower to make all payments of principal and interest to be made pursuant to the Loan Agreement to the Principal Paying Agent to an account in the name of the Bank. Under the Charge, the Bank will charge by way of first fixed charge all the rights, title and interest in and to all sums of money then or in the future deposited in such account in favour of the Trustee for the benefit of the Noteholders.

## **8 Taxation**

All payments in respect of the Notes by or on behalf of the Bank will be made without deduction or withholding for or on account of any present or future taxes or duties of whatever nature imposed or levied by or on behalf of the Federal Republic of Germany or any authority thereof or therein having the power to tax, unless the deduction or withholding of such taxes or duties is required by law.

In such event, the Bank shall make such additional payments as shall result in the receipt by the Noteholders of such amount as would have been received by them if no such withholding or deduction had been required. However, the Bank shall only make such additional payments to the extent and at such time as it shall receive equivalent sums from the Borrower under the Loan Agreement. To the extent that the Bank does not receive any such equivalent sum, the Bank shall account to the relevant Noteholder for an additional amount equivalent to a *pro rata* proportion of such additional amount (if any) as is actually received by, or for the account of, the Bank pursuant to the provisions of the Loan Agreement on the date of, in the currency of, and subject to any conditions attaching to the payment of such additional amount to the Bank provided that no such additional amount will be payable:

- (i) to a Noteholder who (a) is able to avoid such deduction or withholding by satisfying any statutory requirements or by making a declaration of non-residence or other claim for exemption to the relevant tax authority; or (b) is liable for such taxes or duties by reason of his having some connection with the Federal Republic of Germany other than the mere holding of such Notes or the receipt of payments in respect thereof;
- (ii) in respect of a Note presented for payment of principal more than 30 days after the Relevant Date except to the extent that such additional payment would have been payable if such Note had been presented for payment on such thirtieth day;
- (iii) where such withholding or deduction is imposed on a payment to an individual and is required to be made pursuant to any European Union Directive on the taxation of savings implementing the conclusions of the ECOFIN Council meeting of 26-27 November 2000 or any law implementing or complying with, or introduced in order to conform to, such Directive; or
- (iv) in respect of a Note presented for payment by or on behalf of a Noteholder who would have been able to avoid such withholding or deduction by presenting the relevant Note to another Paying Agent in a Member State of the European Union.

As used herein, "Relevant Date" (i) means the date on which the equivalent payment under the Loan Agreement first becomes due but (ii) if the full amount payable by the Borrower has not been received by, or for the account of, the Bank pursuant to the Loan Agreement on or prior to such date, means the date on which such full amount shall have been so received and notice to that effect shall have been duly given to the Noteholders by or on behalf of the Bank.

Any reference herein or in the Trust Deed to payments in respect of the Notes shall be deemed also to refer to any additional amounts which may be payable in accordance with the Trust Deed and this Condition 8 or any undertaking given in addition thereto or in substitution therefor pursuant to the Trust Deed.

## **9 Enforcement**

The Trust Deed provides that only the Trustee may pursue the remedies under the general law, the Trust Deed or the Notes to enforce the rights of the Noteholders and no such Noteholder will be entitled to pursue such remedies unless the Trustee (having become bound to do so in accordance with the terms of the Trust Deed) fails or neglects to do so within a reasonable period and such failure or neglect is continuing.

The Trust Deed also provides that, in the case of an Event of Default (as defined in the Loan Agreement), or of a Relevant Event (as defined in the Trust Deed), the Trustee may, and shall, if requested to do so by Noteholders owning 25 per cent. in aggregate principal amount of the Notes outstanding, or if directed to do so by an Extraordinary Resolution and, in either case, subject to it being secured and/or indemnified to its satisfaction, declare all amounts payable under the Loan Agreement by the Borrower to be due and payable (in the case of an Event of Default), or enforce the security created in the Trust Deed in favour of the Trustee (in the case of a Relevant Event). Upon repayment of the Loan following an Event of Default and a declaration as provided herein, the Notes will be redeemed or repaid and thereupon shall cease to be outstanding.

## **10 Meetings of Noteholders; Modification of Notes, Trust Deed and Loan Agreement; Waiver; Substitution of the Bank**

The Trust Deed contains provisions for convening meetings of Noteholders to consider any matter affecting their interests, including any modification of, or any arrangement in respect of, the Notes or the Trust Deed. Noteholders will vote *pro rata* according to the principal amount of their Notes. Special quorum provisions apply for meetings of Noteholders convened for the purpose of amending certain terms concerning, *inter alia*, the amount payable on, and the currency of payment in respect of, the Notes and the amounts payable and currency of payment under the Loan Agreement. Any resolution duly passed at a meeting of Noteholders will be binding on all the Noteholders, whether present or not.

The Trustee may agree, without the consent of the Noteholders, to any modification of the Notes and the Trust Deed or, following the creation of the Security Interests, the Loan Agreement which in the opinion of the Trustee is of a formal, minor or technical nature, is made to correct a manifest error or is not materially prejudicial to the interests of the Noteholders. The Trustee may also waive or authorise or agree to the waiving or authorising of any breach or proposed breach by the Bank of the Terms and Conditions of the Notes or the Trust Deed or, following the creation of the Security Interests, by the Borrower of the terms of the Loan Agreement, or determine that any event which would or might otherwise give rise to a right of acceleration under the Loan Agreement shall not be treated as such, if in the opinion of the Trustee, to do so would not be materially prejudicial to the interests of the Noteholders (as a class). Any such modification, waiver or authorisation shall be binding on the Noteholders and, unless the Trustee agrees otherwise, any such modification shall be promptly notified to the Noteholders.

The Trust Deed contains provisions to the effect that the Bank may, having obtained the consent of the Borrower and the Trustee (which latter consent may be given without the consent of the Noteholders) and having complied with such reasonable requirements as the Trustee may direct in the interests of the Noteholders, substitute any entity in place of the Bank as creditor under the Loan Agreement, as issuer and principal obligor in respect of the Notes and as principal obligor under the Trust Deed, subject to the relevant provisions of the Trust Deed and the substitute's rights under the Loan Agreement being charged and assigned, respectively, to the Trustee as security for the payment obligations of the substitute obligor under the Trust Deed and the Notes.

In connection with the exercise of any of its powers, trusts, authorities or discretions, the Trustee shall have regard to the interests of the Noteholders as a class and, in particular, shall not have regard to the consequences of such exercise for individual Noteholders resulting from their being for any purpose domiciled or resident in, or otherwise connected with, or subject to the jurisdiction of, any particular territory. No Noteholder is entitled to claim from the Bank or the Trustee any indemnification or payment in respect of any tax consequence of any such exercise upon individual Noteholders.

## **11 Prescription**

Notes will become void unless presented for payment of principal within ten years (in the case of principal) or five years (in the case of interest) from the due date for payment in respect thereof.

## **12 Indemnification of Trustee**

The Trust Deed contains provisions for the indemnification of the Trustee and for its relief from responsibility, including provisions relieving it from taking proceedings to enforce payment unless indemnified to its satisfaction.

The Trustee's responsibilities are solely those of trustee for the Noteholders on the terms of the Trust Deed. Accordingly, the Trustee makes no representations and assumes no responsibility for the validity or enforceability of the Loan Agreement or the security created in respect thereof or for the performance by the Bank of its obligations under or in respect of the Notes and the Trust Deed or by the Borrower in respect of the Loan Agreement.

## **13 Replacement of Notes**

If a Note shall become mutilated, defaced, lost, stolen or destroyed it may, subject to all applicable laws and regulations and requirements of the Stock Exchange, be replaced at the specified office of the Registrar in New York or at the specified office of the Paying Agent in Luxembourg on payment of such costs, expenses, taxes and duties as may be incurred in connection therewith and on such terms as to evidence, security and indemnity and otherwise as may reasonably be required by or on behalf of the Bank or the Trustee. Mutilated or defaced Notes must be surrendered before replacements will be issued.

## **14 Notices**

All notices shall be deemed to have been duly given if (i) posted to such holders at their respective addresses as shown on the register of Noteholders maintained by the Registrar and (ii) so long as the Notes are listed on the Stock Exchange, published in a daily newspaper of general circulation in Luxembourg approved by the Trustee, currently expected to be the *Luxemburger Wort*. Any such notice shall be deemed to have been given on the first date on which both conditions shall have been met.

In case by reason of any other cause it shall be impracticable to publish any notice to holders of Notes as provided above, then such notification to such holders as shall be given with the approval of the Trustee shall constitute sufficient notice to such holders for every purpose hereunder.

## **15 Further Issues**

The Bank may from time to time, without the consent of the Noteholders, create and issue further Notes having the same terms and conditions as the Notes in all respects (or in all respects except for the first payment of interest) so as to form a single series with the Notes. Such further Notes shall be issued under a deed supplemental to the Trust Deed. The Trust Deed contains provisions for convening a single meeting of Noteholders and the holders of Notes of other series in certain circumstances where the Trustee so decides.

## **16 Contracts (Rights of Third Parties) Act 1999**

No person shall have any right to enforce any term or condition of the Notes under the Contracts (Rights of Third Parties) Act 1999.

## **17 Governing Law**

The Notes and the Trust Deed are governed by and shall be construed in accordance with, English law. The Bank has submitted in the Trust Deed to the jurisdiction of the courts of England and has appointed an agent for the service of process in England.

## SUMMARY OF PROVISIONS RELATING TO THE NOTES IN GLOBAL FORM

The Notes will be represented by a Global Note which will be registered in the name of The Bank of New York Depository (Nominees) Limited as nominee for, and deposited with, a common depository for Euroclear and Clearstream, Luxembourg. The Global Note will become exchangeable in whole but not in part (free of charge to the holder), for definitive Notes ("Definitive Notes") if (a) Euroclear or Clearstream, Luxembourg is closed for business for a continuous period of 14 days (other than by reason of holidays) or announces an intention permanently to cease business or (b) if the Bank would suffer a material disadvantage in respect of the Notes as a result of a change in the laws or regulations (taxation or otherwise) of any jurisdiction referred to in Condition 8 which would not be suffered were the Notes in definitive form.

Whenever the Global Note is to be exchanged for Definitive Notes, such Definitive Notes will be is-sued in an aggregate principal amount equal to the principal amount of the Global Note following delivery, by or on behalf of the registered holder of the Global Note, Euroclear and/or Clearstream, Luxembourg, to the Registrar of such information as is required to complete and deliver such Definitive Notes (including, without limitation, the names and addresses of the persons in whose names the Definitive Notes are to be registered and the principal amount of each such person's holding) against the surrender of the Global Note at the Specified Office of the Registrar or the Transfer Agent. Such exchange will be effected in accordance with the provisions of the Agency Agreement, the Trust Deed and the Global Note.

In addition, the Global Note will contain a provision which modifies the Terms and Conditions of the Notes as they apply to the Notes evidenced by the Global Note. The following is a summary of this provision:

Notices: Notwithstanding Condition 14 (Notices), so long as the Global Note is held by or on behalf of Euroclear, Clearstream, Luxembourg or any other clearing system (an "Alternative Clearing System"), notices to Noteholders represented by the Global Note may be given by delivery of the relevant notice to Euro-clear, Clearstream, Luxembourg or (as the case may be) such Alternative Clearing System; provided, how-ever, that, so long as the Notes are listed on the Luxembourg Stock Exchange and its rules so require, notices will also be published in a leading daily newspaper having general circulation in Luxembourg (which is expected to be the *Luxemburger Wort*).

## TAXATION

*Prospective purchasers of the New Notes are advised to consult their own tax advisers as to the consequences under the tax laws of the country of which they are residents, of a purchase of Notes, including but not limited to, the consequences of receipt of interest and sale or redemption of the Notes. The following is a general description of certain tax laws relating to the Notes and the Loan as in effect on the date hereof and does not purport to be a comprehensive discussion of the tax treatment of the Notes.*

### Russian Federation

#### General

The following is a summary of certain Russian tax considerations relevant to purchase, ownership and disposition of the Notes as well as concerning taxation of payments of interest on the Loan. The summary is based on the laws of Russia in effect on the date of this Offering Circular. The summary does not seek to address the applicability of, and procedures in relation to, taxes levied by regions, municipalities or other non-federal level authorities of Russia. Nor does the summary seek to address the availability of double tax treaty relief, and it should be noted that there may be practical difficulties involved in claiming double tax treaty relief. Prospective investors should consult their own advisers regarding the tax consequences of investing in the Notes. No representation with respect to the Russian tax consequences to any particular holder is made hereby.

Many aspects of Russian tax law are subject to significant uncertainty. Further, the substantive provisions of Russian tax law applicable to financial instruments may be subject to more rapid and unpredictable change and inconsistency than in jurisdictions with more developed capital markets. In particular, the interpretation and application of such provisions will in practice rest substantially with local tax inspectorates.

For the purposes of this summary, a “non-resident holder” means a physical person actually present in Russia for an aggregate period of less than 183 days in a given calendar year or a legal person or organisation in each case not organised under Russian law which holds and disposes of the Notes otherwise than through a permanent establishment in Russia.

The Russian tax treatment of interest payments made by Gazprom to the Bank under the Loan Agreement may affect the holders of the Notes. See below “Taxation of Interest on the Loan”.

#### Non-Resident Holders

A non-resident holder of a Note will not be subject to any Russian taxes on receipt from the Bank of amounts payable in respect of principal, of, or interest on, the Note subject to what is said in “Taxation of Interest on the Loan”.

A non-resident holder generally should not be subject to any Russian taxes in respect of gains or other income realised on the sale or other disposition of the Notes outside Russia provided there is no income from a source within Russia.

A non-resident holder which is a legal person or organisation should not be subject to withholding tax on any gain on the disposal of Notes even if payment is received from within Russia, although there is some residual uncertainty regarding the treatment of any part of such gain which is attributable to accrued interest on the Notes. Accrued interest may be distinguished from the total gain and taxed at a rate of 20%. The separate taxation of the interest accrued may create a tax liability in relation to interest even in a situation of a capital loss on the disposal of the Notes.

A non-resident holder who is a physical person will generally be subject to tax at the rate of 30% on the gross proceeds from the disposal of the Notes less any available cost deductions (taxable base) where the proceeds of such disposal are received from a source within Russia, subject to any available double tax treaty relief. If the Notes are disposed of in Russia, the proceeds of such disposal are likely to be regarded for personal income tax purposes as income from a source within Russia. In certain

circumstances, if the disposal proceeds are payable by a Russian organisation, individual entrepreneur or a Russian permanent establishment of a foreign organisation, the payer may be required to withhold this tax. There is a risk that the taxable base may be affected by changes in the exchange rates between the currency of acquisition of the Notes, the currency of sale and Roubles.

### **Resident Holders**

A holder of a Note who is a physical or legal person resident in Russia for tax purposes is subject to all applicable Russian taxes.

### **Taxation of Interest on the Loan**

In general, payments of interest on borrowed funds by a Russian entity to a non-resident legal person are subject to Russian withholding tax at the rate of 20%, absent reduction or elimination pursuant to the terms of an applicable double tax treaty. Based on professional advice it has received, Gazprom believes that payments of interest on the Loan should not be subject to withholding under the terms of the double taxation treaty between Russia and the Federal Republic of Germany. However there can be no assurance that such relief will be obtained. If, as a result of the enforcement by the Trustee of the security granted to it by the Bank by way of the security interests created in the Trust Deed, interest under the Loan becomes payable to the Trustee, the benefit of the double tax treaty between Russia and the Federal Republic of Germany would cease and payments of interest may be subject to Russian withholding tax.

VAT is not applied to the rendering of financial services involving the provision of a loan in monetary form. Therefore no VAT will be payable in Russia on interest payments.

If the payments under the Loan Agreement are subject to any withholding (as a result of which the Bank would reduce payments under the Notes in the amount of such withholding), Gazprom is obliged to increase payments as may be necessary so that the net payments received by the Bank will not be less than the amount it would have received in the absence of such withholding. It should be noted however that gross-up provisions in contracts may not be enforceable under Russian law. In the event that Gazprom fails to increase payments, such failure would constitute an Event of Default under the Loan Agreement. If Gazprom is obliged to increase payments, it may prepay the Loan in full. In such case, all outstanding Notes would be redeemable at par with accrued interest.

### **Federal Republic of Germany**

The following is a general discussion of certain German income tax consequences of the acquisition, ownership and disposition of Notes to original purchasers of the Notes. This summary is based on the laws currently in force and as applied in practice on the date of this Offering Circular, which are subject to change, possibly with retroactive effect. The information provided below does not purport to be a complete, exhaustive or final summary of the tax law and practice currently applicable in the Federal Republic of Germany.

### **Resident Holders**

Under German law, as currently in effect, payments of interest on the Notes to persons who are residents of Germany (that is, persons whose residence, customary place of abode, seat or place of management is located in Germany) are subject to German personal or corporate income tax. If the Notes are kept or administered in a domestic securities deposit account by a German financial institution, which term includes a German branch of a foreign financial institution but excludes a foreign branch of a German financial institution, interest payments in respect of such Notes will be subject to a 30% advanced interest income tax (*Zinsabschlagsteuer*) and a 5.5% solidarity surcharge on such tax. As a result, such payments will be subject to a total withholding tax charge of 31.65%. The *Zinsabschlagsteuer* and solidarity surcharge withheld from such payments are later credited as prepayments against the German personal or corporate income tax and the respective solidarity surcharge of the recipient.

If a holder sells a Note during a current interest period, the accrued interest received in connection therewith (*Stückzinsen*) will also be subject to 30% *Zinsabschlagsteuer* and 5.5% solidarity surcharge, as above creditable against the personal or corporate income tax and the 30% *Zinsabschlagsteuer* and solidarity surcharge. *Stückzinsen* paid by a holder upon the purchase of a Note reduces the personal or corporate income tax base and, under certain circumstances, the taxable base for the *Zinsabschlagsteuer* and solidarity surcharge.

### **Non-Resident Holders**

Payments of interest to persons who are not tax residents of Germany and have no connection with Germany other than the receipt of payments in respect of the Notes are in general exempt from the *Zinsabschlagsteuer* and solidarity surcharge.

If the interest from a Note kept or administered in a German securities deposit account by a German financial institution, which term includes a German branch of a foreign financial institution but excludes a foreign branch of a German financial institution, is received by persons who are not residents of Germany and who are taxable in Germany only with respect to certain German source income, and if, according to German tax law, such interest falls into a category of taxable income from German sources (e.g., income effectively connected with a German trade or business) which is subject to a limited income tax liability on a special basis, the 30% *Zinsabschlagsteuer* and the 5.5% solidarity surcharge are applicable but can be credited against the German personal or corporate income tax liability of such non-residents.

### **Other Taxes**

Gains realised by persons who are not tax residents of Germany from the sale or other disposition of Notes that are not held as part of a permanent establishment or fixed base in Germany will not be subject to tax in Germany. No stamp, issue, registration, or similar taxes or duties will be payable in Germany in connection with the issuance, delivery or execution of the Notes.

### **EU Withholding Tax**

The European Union is currently considering proposals for a new directive regarding the taxation of savings income. Subject to a number of important conditions being met, it is proposed that Member States will be required to provide to the tax authorities of another Member State details of payments of interest or other similar income paid by a person within its jurisdiction to an individual resident in that other Member State, subject to the right of certain Member States to opt instead for a withholding system for a transitional period in relation to such payments.

## **SALOMON BROTHERS AG**

The Bank is licensed under the laws of the Federal Republic of Germany and is supervised and regulated by the German Banking Supervisory Authority and the German Bundesbank. The Bank was licensed as a bank with effect from 22 October 1986 in Frankfurt am Main and is engaged in various banking and investment banking activities.

The Bank is affiliated to Salomon Brothers International Limited but is not an affiliate of the Borrower.

The fully paid up share capital of the Bank is DM 450,000,000, and the amount of its capital reserves as of 31 December 2001 was DM 2,816,945.

The Members of the Management Board of the Bank are Dr Frank Müller, Christoph Lampert, Dieter Visser and Dr. Christian Ganssmüller.

Since the Bank's sole obligation in respect of the New Notes is to make certain payments as and when payments on the Loan are received pursuant to the Loan Agreement, financial information relating to the Bank is not included in this Offering Circular.

## SUBSCRIPTION AND SALE

Salomon Brothers International Limited and Credit Suisse First Boston (Europe) Limited (together the "Managers") have, pursuant to the terms and conditions set forth in a subscription agreement, dated ● 2002 (the "Subscription Agreement"), jointly and severally agreed with the Bank, subject to the satisfaction of certain conditions set forth therein, to subscribe and pay for the Notes at the issue price of 100% of the principal amount of the Notes. The Subscription Agreement also provides for the Managers to receive commissions of ●% of the principal amount of the Notes. The Borrower has agreed to pay certain costs in connection with the offering of the Notes and to reimburse the Managers, the Bank and the Trustee for certain of their expenses in connection with the offering of the Notes. The Managers are entitled to be released and discharged from their obligations under the Subscription Agreement in certain circumstances prior to payment being made to the Bank.

The Notes have not been and will not be registered under the United States Securities Act of 1933 (the "Securities Act") and may not be offered or sold within the United States or to, or for the account or benefit of, any "U.S. person" as defined in Regulation S under the Securities Act, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. The Managers have represented and agreed that neither they nor any of their affiliates nor any person acting on their behalf have offered or sold or will offer or sell any Notes as part of their distribution except outside the United States in offshore transactions (as defined in Regulation S under the Securities Act) meeting the requirements of Rule 903 of Regulation S under the Securities Act. In addition, until 40 days after commencement of the offering, an offer or sale of Notes within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act.

Each Manager has represented and agreed that (i) it has not offered or sold and prior to the expiry of the period of six months from the payment date will not offer or sell any Notes to persons in the United Kingdom except to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of their business or otherwise in circumstances which have not resulted and will not result in an offer to the public in the United Kingdom within the meaning of the Public Offers of Securities Regulations 1995, (ii) it has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000 (the "FSMA")) received by it in connection with the issue or sale of any Notes in circumstances in which section 21(1) of the FSMA does not apply to the Borrower and (iii) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the Notes in, from or otherwise involving the United Kingdom.

No sales prospectus (*Verkaufsprospekt*) under the German Securities Sales Prospectus Act (*Wertpapier-Verkaufsprospektgesetz*) has been, or will be, prepared by the Bank or the Managers in connection with the offering of the Notes. Each Manager has represented, warranted and undertaken that it has offered and sold, and will offer and sell, the Notes only in full accordance with the German Securities Sales Prospectus Act.

Each Manager has agreed that the Notes will not be offered, transferred or sold as part of their initial distribution or at any time thereafter to or for the benefit of any persons (including legal entities) resident, incorporated, established or having their usual residence in the Russian Federation or to any person located within the territory of the Russian Federation unless to the extent otherwise permitted under Russian law.

Each Manager has agreed that it has complied and will comply with applicable laws and regulations in each jurisdiction which it offers, sells or delivers Notes or distributes this Offering Circular (and any amendments thereof and supplements thereto) or any other offering or publicity material relating to the Notes, the Bank or the Borrower.

The Borrower is a party to the Subscription Agreement and has given certain representations and warranties, covenants and indemnities to the Managers and the Bank therein.

## GENERAL INFORMATION

1. The Notes represented by the Global Note have been accepted for clearance through Euroclear and Clearstream, Luxembourg with a Common Code of ●. The International Securities Identification Number for the Notes is XS01●.
2. In connection with the application to list the Notes on the Luxembourg Stock Exchange, a legal notice relating to the issue of the Notes and a copy of the Charter of Gazprom (together with an English translation) will be deposited with the Chief Registrar of the District Court in Luxembourg ("*Greffier en Chef du Tribunal d'Arrondissement de et à Luxembourg*") where such documents may be examined and copies obtained.
3. Gazprom and the Bank have obtained all necessary consents, approvals and authorisations in Russia and Germany in connection with the Loan and the issue and performance of the Notes. The Loan and the issue of the Notes were authorised by the Resolution of the Management Committee of Gazprom passed on ● 2002.
4. No consents, approvals, authorisations or orders of any regulatory authorities are required by the Bank under the laws of the Federal Republic of Germany for the maintenance of the Loan or for the issue of the Notes.
5. There has been no significant change in the financial or trading position or prospects of Gazprom or the Group since 31 December 2001 and no material adverse change in the financial or trading position or prospects of Gazprom or of the Group since 31 December 2001.
6. Except as disclosed in this Offering Circular, neither Gazprom nor any of its subsidiaries is involved in any litigation or arbitration proceedings relating to claims or amounts that are material in the con-text of the issue of the Notes nor, so far as Gazprom is aware, is any such litigation or arbitration pending or threatened.
7. Copies in English of the latest annual report and consolidated annual accounts of Gazprom and the latest interim consolidated unaudited accounts of Gazprom may be obtained, and copies of the Trust Deed in respect of the Notes (including the forms of the Global Note and definitive Notes), the Agency Agreement and the Loan Agreement will be available for inspection, at the specified offices of the Trustee and the Paying Agent in Luxembourg during normal business hours, so long as any of the Notes are outstanding.
8. Gazprom publishes interim consolidated unaudited financial statements, prepared in accordance with IAS for the 6 month period ended 30 June and for the 9 month period ended 30 September in each year. Gazprom does not publish non-consolidated annual or interim financial statements, prepared in accordance with IAS.

## **APPENDIX A — OVERVIEW OF THE RUSSIAN FEDERATION**

*The following information has been extracted from publicly available sources. It has not been independently verified by Gazprom. Neither Gazprom nor the Managers accept any responsibility for the accuracy or completeness of this information.*

### **General**

The Russian Federation, or Russia, is a sovereign and democratic federal republic, consisting of 89 subfederal political units (the "Federation Subjects"), and is constituted as a federation of republics, territories, regions, cities of federal importance and autonomous regions. It is the largest state to emerge from the former Soviet Union, covering an area of approximately 17.1 million square kilometres. Russia covers one-tenth of the world's land surface, making it the largest country in the world, almost twice the size of the United States.

Of the population of approximately 145 million, approximately 82% is ethnic Russian and a high percentage (approximately 73%) live in cities and towns. The two largest cities are Moscow, with approximately 8.55 million inhabitants, and St. Petersburg, with approximately 4.7 million inhabitants.

Russia is a leading world producer of natural resources. The oil and gas industry plays an important role in the domestic economy. There are also substantial mineral deposits including iron, nickel, copper, diamonds and gold, as well as timber.

### **International Relations**

Russia is a member of the United Nations (and a permanent member of the Security Council), the IMF, the World Bank, the International Finance Corporation and the European Bank for Reconstruction and Development. Russia succeeded to the former Soviet Union's "observer status" to the General Agreement on Tariffs and Trade (currently, the World Trade Organisation) which was granted in May 1990 and in June 1993 made an official announcement of its intention to join the General Agreement on Tariffs and Trade. Discussions regarding Russia's admission to the World Trade Organisation started in 1995 and are continuing. Russia has also been awarded Most Favoured Nation status by several members of the Organisation for Economic Cooperation and Development ("OECD"). Russia has been granted observer status in a number of OECD committees and formally applied for membership in May 1996.

### **Political Structure and Recent Political Developments**

#### *Federal Structure*

In 1990, Russia declared its sovereignty (though not its independence from the Soviet Union). In December 1991 Russia, Belarus and Ukraine joined together to dissolve the Soviet Union and form the Commonwealth of Independent States (the "CIS"). The CIS was subsequently joined by another 9 former Soviet republics. Members of the CIS have entered into a series of political and economic agreements among them-selves.

The Federation Treaty of 31 March 1992, signed by the majority of the Federation Subjects, initially gave to each a measure of control over budgetary and external policy as well as over the natural resources of their territories, and the Constitution of Russia (the "Constitution") and individual treaties between the Federation and some of the Federation Subjects subsequently confirmed and refined the terms of the division of authority between the Federation and its subjects.

In general, disputes between the Federal authorities and Federation Subjects have been resolved peacefully through a political process. The military confrontation in the Chechen Republic has been the exception. There has been military confrontation in the Chechen Republic between December 1994 and August 1996 (followed by a peace treaty in May 1997) and then again from August 1999 to date, with the fighting now reduced to sporadic outbreaks. In January 2001 President Putin announced plans for a significant reduction in troop numbers and an eventual end to anti-terrorist operations. A local police

force is being formed to gradually take over the maintenance of order from the Russian military, and substantial amounts have been promised in aid for reconstruction of Chechnya. However, the situation is not stable and there have been no official talks between the federal authorities and rebel leaders. It is expected that the future of the Chechen Republic will only be decided after the completion of operations by the Russian interior and military troops.

### *Constitution*

The Constitution provides for a tripartite governmental structure in which the power of the State is divided between the executive, legislative and judicial branches, each independent of the others. The Constitution also establishes a federal system, allocating responsibilities between federal and subfederal authorities and setting out the principles of local government.

### *Executive, Legislative and Judicial Branches*

The Executive branch consists of the President and the Government of Russia.

The President of Russia has broad powers. The President is Head of State and Supreme Commander of the Armed Forces, with authority to declare states of military emergency and other states of emergency, subject to approval by the Federation Council and has responsibility for foreign policy and national defence. The President has the power to issue decrees and orders having the force of law (although these may not contradict the Constitution or federal legislation), to suspend acts of subfederal executive authorities and to call a national referendum on matters of special importance. The President also has the power to veto bills passed by the Federal Assembly and, under certain circumstances, to dissolve the State Duma. The President also enjoys significant powers of appointment, including the power to appoint the Prime Minister (with the consent of the Duma) and other members of the Government (who are nominated by the Prime Minister). The President may also dismiss deputy prime ministers and federal ministers at any time. In addition, the President nominates candidates for Governor of the Central Bank (for appointment by the Duma) and the Prosecutor General (for appointment by the Federation Council) and also nominates judges for the Constitutional Court, the Supreme Court and the Supreme Arbitration Court (for appointment by the Federation Council).

The President is elected in a national election for a term of four years. The Constitution provides for the early termination of the President's term of office in the event of his death, resignation or impeachment, or if he is persistently unable to exercise his powers for reasons of health, in which case the Prime Minister fulfils the responsibilities of the President until a new President is elected. New presidential elections must be held within three months of any such early termination.

The Government of Russia comprises the Prime Minister, deputy prime ministers and federal ministers, all of whom are appointed by the President as described above. The Government is automatically dissolved after each presidential election, in order to permit the President to form a new Government. The Government is responsible for implementing federal laws, presidential decrees and international agreements. In particular, the Government is responsible for preparing and implementing the federal budget, establishing a unified financial, credit and monetary policy, carrying out social policy, preserving public order and defending the rights and freedoms of citizens.

The Legislative branch is the Federal Assembly, which consists of a lower chamber, the State Duma, and an upper chamber, the Federation Council.

The State Duma consists of 450 deputies, elected by a mixed system of majority vote and proportional representation. Half of the deputies are elected by majority vote in individual electoral districts. The other half are chosen from "party lists" on the basis of a nationwide election, with seats being allocated in proportion to the number of votes received by the party. Generally, only parties receiving more than 5% of the votes qualify for these "party list" seats. "Party list" deputies are free to change their party affiliations during their terms in office without the need for a new election. The State Duma sits for four years and no person may simultaneously serve as a State Duma deputy and hold a position in the Government.

The Federation Council represents Russia's 89 Federation Subjects. Each Federation Subject has two representatives on the Federation Council, one representing its legislative body and the other representing its executive branch.

The Judicial branch is represented by the Constitutional Court, the Supreme Court and the Supreme Arbitration Court as well as lower courts of general jurisdiction and arbitration courts.

### *Political Parties and Elections*

Presidential elections were most recently held on 26 March 2000. The elections were scheduled to take place in the summer of 2000 but the premature resignation of President Yeltsin on 31 December 1999 brought these elections forward to March. At the time of Yeltsin's resignation, Vladimir Putin was the Prime Minister and, therefore, was elevated to the post of acting President.

Putin was successful in the first round of voting for the Presidential elections and secured over 52% of the votes cast with a turnout of 68.74% (more than 50% of the votes cast is required in order to be elected). His nearest challenger was the Communist candidate Gennady Zyuganov, who received almost 30% of votes.

The Government was appointed between May and July 2000. It has embarked on a course of significant reforms comparable to those in early 1992 aimed at strengthening the unity of the State and tightening federal control over the Federation Subjects.

In May 2000 President Putin reformed the structure of Presidential representatives in the regions. The Federation Subjects were divided into seven "federal areas" and authorised representatives with broad powers were appointed by the President to each federal area. The rights of the authorised representatives of the President include the right to participate in all activities of representative bodies of the Federation Subjects, to control the implementation of Presidential decrees and orders and federal economic programmes, and to control the use of federal property and federal funds by the Federation Subjects. The authorised representatives of the President in the Federation Subjects are financed by the Administration of the President.

The Duma elections were held on 19 December 1999 with the following results: — the Communist party led by Gennady Zyuganov won 24.3% of the votes cast; the Unity party led by Sergei Shoigou, the Minister of Emergency Situations 23.2%; the Fatherland All Russia party led by former prime minister Yevgeny Primakov, Moscow Mayor Yuri Luzhkov and St Petersburg Mayor Vladimir Yakovlev 13.1%; the Union of Right Forces led by former prime minister Sergei Kiriyenko 8.6%; the Yabloko party led by Grigory Yavlinsky 5.9% and the "Zhirinovskiy bloc" led by Vladimir Zhirinovskiy 6.4% Other parties received the remaining 18.5%

As a result of the distribution of seats among political parties and winners in majority vote constituencies, the communists and their allies lost control over the Duma, which now has a broadly pro-Presidential majority.

### **Economic Conditions and Recent Economic Developments**

Following the dissolution of the Soviet Union, particularly during 1991 and 1992, Russia experienced an economic crisis, evidenced by a decline in industrial production and GDP, significant price increases, a de-cline in the average standard of living and an increase in foreign debt. In response, the Government instituted a series of measures designed to achieve financial stabilisation and price liberalisation and to create an impetus for a transition to a market economy. The Government has freed most wholesale and retail prices, reduced defence allocations, cut state subsidies, introduced a substantial value added tax, removed most non-tariff restrictions on foreign trade and launched a broad privatisation effort.

Russia's financial stabilisation programme came under severe pressure in the second half of 1997 and the first half of 1998, when the repercussions of the Asian currency and financial crises and sharp falls in world prices for oil and other commodities adversely affected the Government's ability to continue to finance its budget deficits and to maintain the value of the rouble against the U.S. dollar. On 17 August 1998, the Government and the Central Bank announced a three-part programme intended

to address these pressures. First, the rouble trading corridor was revised from 5.25-7.15 roubles for one U.S. dollar to 6.00-9.5 roubles for one U.S. dollar. This corridor was subsequently abandoned. Second, domestic GKO/OFZ bonds issued prior to 17 August 1998 and maturing before 31 December 1999 were to be restructured into new longer-term instruments and trading of these instruments was suspended pending the restructuring. Finally, for a period of 90 days Russian private sector residents were restricted from conducting certain foreign exchange operations of a capital nature, including payments of foreign currency under forward contracts and repurchase agreements and principal payments on long-term credits.

The events of 17 August led to:

- a severe devaluation of the rouble;
- a sharp increase in the rate of inflation;
- the near collapse of the country's banking system;
- significant defaults by Russian public and private borrowers on their foreign currency obligations;
- dramatic declines in the prices of Russian debt and equity securities (including Russia eurobonds); and
- an inability of Russian borrowers to raise funds internationally.

The situation stabilised rapidly, however, and 1999-2001 witnessed several positive developments. These included:

- a slow-down in the decline, and then a stabilisation, in the value of the rouble against the U.S. dollar (and appreciation of the value of the rouble against the U.S. dollar in real terms);
- a decline in consumer price inflation;
- an increase in real industrial output, resulting in part from the devaluation of the rouble;
- an improved balance of trade, resulting in part from the devaluation of the rouble and a significant increase in oil prices;
- improved tax collection, resulting in a significant primary fiscal surplus;
- increasing prices for Russian debt and equity securities;
- a decrease in the share of barter transactions, both in interenterprise transactions and in the execution of regional budgets; and
- the restructuring of a significant portion of Russia's rouble denominated domestic indebtedness and the reduction and restructuring of its London Club indebtedness.

President Putin's Government has announced plans for substantial economic reforms (including the tax reform, the pension reform, the housing and utilities reform) and has begun the process of implementing some of those reforms.

### *Privatisation*

Russia commenced its privatisation programme in early 1992. About 15,000 medium and large scale enterprises employing more than 70% of the industrial workforce had been privatised through the mass voucher privatisation programme by mid 1994. In a relatively short period of time, the companies in which the Government had had less than a majority equity interest came to represent over 50% of both GDP and employment.

The first stage of the Russian privatisation process, the so called voucher privatisation, was completed in the summer of 1994. The second (post voucher) phase of the privatisation process started in late July 1994, consisting of cash sales to domestic and foreign strategic investors with the primary

objective of transferring control over the privatised companies to private management and ownership. The transfer of assets from state to private control continued in 1995 through a loans for shares programme, cash auctions and investment tenders. As at 31 December 2000, there were more than 900 joint stock companies which were 25 to 50% state owned and 371 joint stock companies which were more than 50% state owned.

In April 2002, a new privatisation law came into effect. The new law provides for several methods to privatise state owned enterprises including cash auctions, commercial tenders, contributions of state owned assets to the charter capital of other business entities, the transformation of State and municipal entities into open joint stock companies, sales of state owned shares of open joint stock companies outside Russia, sales of shares of open joint stock companies through organisers of trade in the securities market, sales of state and municipal property through public offerings, sales of state and municipal property without the price indication and sales of shares of open joint stock companies held in trust.

The August 1998 financial crisis resulted in the suspension of several planned privatisation tenders. The Government has announced its intent to return to some of its privatisation plans.

### *Gross Domestic Product*

The following table sets forth certain information regarding Russia's nominal GDP for the years 1996 to 2001:

	1996	1997	1998	1999	2000	2001 <sup>(2)</sup>
Nominal GDP (RUR billions) .....	2,145.7	2,478.6	2,741.1	4,757.2	7,063.4	6,545.0 <sup>(3)</sup>
Nominal GDP per capita (RUR) .....	14,523.2	16,826.4	18,659.0	32,515.0	48,527.0	45,419.8
Consumer Price Index <sup>(1)</sup> (%) .....	147.8	114.7	127.8	185.7	120.8	121.5
Total population, millions (end of period) .....	147.1	146.7	146.3	145.6	144.8	144.1

(1) Average on the annual basis (Source: Central Bank website, 28 August 2002).

(2) The figures for 2001 are given for the first eleven months averaged on the annual basis.

(3) The figure is given for the period from January to September 2001, averaged on the annual basis.

Source: Goskomstat's Russian Annual Statistics (2001 Edition), Goskomstat's website.

### *Employment*

Employment has declined in Russia since reforms were initiated. The level of unemployment increased in 1998 due to the Russian financial crisis, and the labour market still remains relatively depressed. According to the Central Bank of Russia figures (based on the methodology of the International Labour Organisation), the total number of unemployed in April 2002 was 5.9 million (8.3% of the labour force) as compared to 6.2 million (8.7% of the labour force at the end of 2001), 7.0 million (9.9% of the labour force), at the end of 2000 and 8.9 million (12.4% of the labour force) at the end of 1999.

<b>Errors and omissions, net</b> .....	(4,851)	(9,084)	(7,036)	(9,355)	(9,185)	(1,149)

Source: Central Bank website, 28 August 2002. Certain data presented in this table differs from the previously published data due to revisions made by the Central Bank of Russia.

## Official International Reserves

The following table sets forth information with respect to official international reserves as at 1 January for the years 1997 to 2002:

	Official international reserves					
	1 January 1997	1 January 1998 <sup>(1)</sup>	1 January 1999 <sup>(2)</sup>	1 January 2000	1 January 2001	1 January 2002
	<i>(U.S.\$ millions)</i>					
Gold and currency reserves .....	15,324	17,784	12,223	12,456	27,972	36,622
Currency reserves .....	11,276	12,895	7,801	8,457	24,264	32,542
Foreign currency .....	11,271	12,771	7,800	8,455	24,263	32,538
SDRs .....	5	122	0	1	1	3
Reserve position on IMF .....	1	1	1	1	1	1
Gold <sup>(3)</sup> .....	4,047	4,889	4,422	3,998	3,708	4,080

(1) From 1 August 1998 deposited gold is included in the international reserves figures.

(2) From 1 September 1999 the amount of reserves excludes foreign currency balances in correspondent accounts of resident banks with the Central Bank of Russia, except for the funds transferred to Vnesheconombank for the purposes of servicing state external debt.

(3) Valuing gold at U.S.\$300 per fine troy ounce.

## Monetary policy

The decrease of the budget deficit between 1992 and 1997 with its expected elimination in 2001, and the increased access of the Government to financing from sources other than the Central Bank, have reduced the pace of monetary expansion. Prior to the 1998 financial crisis, slower monetary growth and increased ex-change rate stability have helped the Central Bank to reduce inflation from over 2000% in 1992 to 11% in December 1997. In 1998, however, inflation rose sharply again. After the

crisis, the Government changed its policy towards the rouble and proclaimed a debt moratorium and a mandatory restructuring of a significant share of domestic rouble debt. Consumer price inflation was reduced to 20.2% as at the end of 2000, from a level of 36.5% for the year 1999.

The Central Bank introduced a currency intervention band in July 1995. Another two "half-year" currency bands followed at the end of 1995 and in mid 1996. As confidence in the continuity of the exchange rate policy grew, the Central Bank introduced a full year band for 1997. In November 1997, exchange rate policy was adjusted further, to allow the authorities more flexibility in accommodating shifts in short-term capital flows. The new (flat) trading band was announced for the three years from 1998 to 2000. This was supposed to help sustain the decline in inflation and domestic interest rates. However, in 1998 the Government dropped the currency trading band and allowed the rouble to float freely. By the end of 1999, the rouble had stabilised at around 25 roubles to the U.S. dollar. Since then, the Central Bank has conducted a tight monetary policy through a system of barriers to limit the flow of currency out of Russia and direct currency interventions helping to reduce inflation and keep the rouble under control.

The rouble was redenominated, 1,000 fold, effective as at 1 January 1998. The old bills were in circulation until 1999 and will continue to be accepted by the Central Bank until 2002.

The rouble is fully convertible for current account transactions. In June 1996, the Russian Government committed itself to compliance with the obligations of Article VIII of the IMF Charter.

### *External Debt*

As at 1 January 2002 the state external debt of Russia amounted to U.S.\$130.1 billion (including indebtedness of the former USSR accepted by Russia). A significant proportion of that debt (U.S.\$42.3 billion) is owed to the Paris Club of sovereign creditors. The Government has been making efforts to restructure this Paris Club debt and reschedule payments. However, these efforts have not so far been successful. If the Paris Club debt is not restructured, Russia will face substantial foreign debt payments in 2003.

---

Source of figures: Ministry of Finance website, 28 August 2002.

### **Social Conditions**

The Russian standard of living declined with the beginning of economic reforms amid the country's severe economic problems. This decline has primarily affected the elderly and other segments of the population that are dependent on Government benefits. While reported real wages dropped sharply as a result of price liberalisation, Russian consumers have benefited from the wider range and improved quality of products available to them. Today, imported and domestic consumer products are available, although many goods are often beyond the means of most Russians.

### **Legal Environment**

Russian law has undergone radical changes in recent years. Whole bodies of law unknown in the Soviet era have been adopted, covering a wide range of areas including corporate, securities, anti-trust, privatisation, property, banking and bankruptcy law. The adoption of the first, second and third parts of the new Civil Code, the Securities Market Law and the Joint Stock Companies Law are further important steps in establishing a comprehensive legal framework. At the same time, confusion and uncertainty continue to exist with respect to the state of law in Russia, not least because the pace of its development often results in ambiguities and inconsistencies.

Much business related legislation remains to be put in place. The absence of comprehensive business laws and regulations presents particularly difficult problems for businesses operating in Russia. Business related legislation is also susceptible to revision in reaction to political influences and the pressure on the Government to generate revenue or to conserve foreign currency. In addition, a significant amount of Russian legislation has been adopted based on a more or less explicit

understanding that it would serve as a general framework, with more detailed issues to be subsequently clarified by amendment or administrative regulation. In many cases, this clarification is yet to occur.

Regulations are interpreted and applied with little consistency and the decisions of one Government official may be overruled or contested by another. Moreover, many of the new Russian laws have never been interpreted by courts or administrative bodies. Both the Soviet experience and recent Russian practice suggest that the enforcement of legal rights in Russia will continue to be subject to greater discretion and political influence than is usual for most Western jurisdictions.

### **Exchange Controls and Repatriation**

Russian currency exchange legislation limits the exchangeability of roubles for foreign currency and the use of foreign currency in Russia. Russian currency legislation currently permits, and Russian foreign investment legislation currently guarantees, the right of foreign investors to convert rouble income received on investments in Russia (including dividends, profits and interest) and to transfer it abroad. However, the actual repatriation of proceeds from the sale of certain investments may be postponed for as long as 365 days.

Foreign currency may be freely exchanged for roubles in Russia, but the exchange of roubles for foreign currency in Russia is restricted and roubles may not be exported or exchanged outside Russia. Non-residents may freely convert foreign currency into roubles, but may only do so through rouble accounts which are subject to strict regulations.

The currency exchange rules govern transactions in foreign currencies and currency valuables (including foreign currency denominated securities) between Russian residents (including citizens, permanent residents and legal entities established under Russian law) and foreign currency and rouble transactions between residents and non-residents. Russian currency legislation distinguishes between "current" foreign currency transactions and foreign currency transactions involving a "movement of capital".

"Current" foreign currency transactions generally may be freely carried out between residents and between residents and non-residents. "Movement of capital" transactions in foreign currency, generally require a licence from the Central Bank subject to exemptions enacted by the Central Bank. The prevailing view is that the licence is only required for Russian residents involved in such "movement of capital" transactions. Cash transactions in foreign currency are generally prohibited within Russia.

Following the financial crisis of 1998, additional regulations on foreign currency exchange were enacted. For example, the mandatory exchange of 75% of export revenues of Russian companies was required to be effected through the domestic foreign currency market. This requirement has been assisting the Central Bank in increasing its foreign currency reserves. The mandatory exchange requirement has been recently reduced to 50% of export revenues.

In 2001, certain steps were taken to remove some of the more onerous currency control requirements. In particular, Russian companies can now receive long term loans from foreign lenders without a Central Bank licence provided that certain conditions are met.

### **Taxation and Duties**

The current Russian system of taxation has been characterised by rapid and unpredictable changes. The Government has an acute need for revenues because of the large deficit in public finance at all levels. Thus, the nature and amount of taxes applicable to a business's activities could ultimately turn out to be different from what is expected. Widespread non-compliance with tax laws and inconsistent enforcement by tax inspectorates contribute to the system's shortcomings. While taxation of non-income operations has been significantly reduced, businesses are still required to pay significant taxes even if they realise no profits.

The first part and certain chapters of the second part of the new Tax Code became effective in 1999 and 2001, 2002 respectively. The main objectives of the Tax Code are to reduce the total number of taxes (from about 200 existing in 1999), improve the stability, transparency and fairness of the system by eliminating many tax exemptions, and to reduce the overall tax burden on the Russian economy. The

Ministry of Finance and the Tax Ministry continue to work on the tax system by radically reducing the number of laws and harmonising Russian legislation with that of developed countries.

Entities carrying on commercial activity in Russia must be registered with the tax inspectorate in each location in which they operate, and must submit an annual tax declaration in addition to certain quarterly and monthly reporting requirements. There is a single profits tax system, but the rates are split between payments to the federal, regional and local governments. At the present time, the profits tax is imposed at a federal rate of 7.5%, a regional rate of between 10.5% and 14.5% and a local rate of 2%. This results in an overall rate ranging from 20% to 24%.

Social tax is payable by employers and is imposed on the employee's wage cost at a maximum rate of 35.6%. A regressive rate is applied to higher wage costs, with the minimum rate as low as 2%.

Value added tax, at the rate of 20% ("VAT"), is imposed on the customs value of imports of goods, and on supplies or deemed supplies of goods, works and services in the Russian territory. Certain goods are subject to VAT at a lower 10% rate. Exports, educational, medical and certain other services are generally exempt from VAT.

In addition to the foregoing taxes and duties, each subject of Russia and each local authority may impose certain regional and local taxes within the limits established by Federal legislation. The taxes include retail sales tax (up to 5% of retail revenues) and corporate property tax (up to 2% of the property's value annually).

Foreign entities are subject to a withholding tax at source on Russian source income that is not attributable to a permanent establishment. The withholding tax is imposed at the following basic rates: 15% for dividends and other income from participation in Russian enterprises, and 20% for royalties, interest, management fees and most other income. This withholding tax may be reduced pursuant to a double taxation treaty in effect between Russia and other countries for foreign legal entities and individuals who are resident in such countries. This reduction in withholding tax pursuant to such treaties may be obtained either via a re-fund (as long as such refund claim is made within three years from the end of the year in which the tax was paid) or by direct application of the double taxation treaty by the payer. In either case, the foreign legal entity or individual would be required to obtain official certification from its home jurisdiction confirming its residence (for the purposes of the treaty in the country which is a party to a double taxation treaty with Russia).

Personal income tax for tax residents is levied at a single flat rate of 13% which is effective as at 1 January 2001 and applicable to most types of income.

## **APPENDIX B – PART I – OVERVIEW OF THE RUSSIAN GAS INDUSTRY AND ITS REGULATION**

The information set forth in this section is based on publicly available information

### **General**

The Russian natural gas industry developed during the Soviet era and expanded rapidly after the discovery in the 1960s of significant reserves in the exceptionally large natural gas fields of Western Siberia. Russia experienced a profound crisis in the early 1990s as a result of the dissolution of the Soviet Union, suffering a decline in industrial production and GDP.

Between 1990 and 1999, the Government's policies on natural gas industry structure and prices resulted in the demand for natural gas and natural gas production levels remaining relatively stable in comparison to the production of other energy sources over the same period, such as oil and coal. Total natural gas production only declined by 7.6%, whereas the production of oil and coal declined by 41.7% and 36.7% respectively. Moreover there has been a continuous substitution during this period of the use of oil and coal by natural gas, primarily because domestic natural gas prices have been kept at a low level.

Since the dissolution of the Soviet Union, the oil and coal industries have been restructured into several regional enterprises, but the structure of the UGSS, which is the basis for natural gas production, transportation, storage and supplies in the Russian Federation, has been preserved.

### **Classification Of Reserves**

Russian methods for calculating and classifying reserves differ from generally accepted practices in the United States and other countries. Reserves which are calculated using different methods cannot be accurately reconciled.

The following is a summary of an extract taken from a classification document concerning reserves and potential and forecasted oil and natural gas resources, which was approved by the Order of the Ministry of Natural Resources No. 126 dated 7 February 2001.

### **Categories of reserves and potential and forecasted oil and natural gas resources.**

Natural Gas, gas condensate and oil reserves and their components, which have industrial value, are subdivided depending on the degree to which they subsist into explored reserves (represented by the categories A, B, and C1), and into preliminary estimated reserves (represented by the category C2). Oil and natural gas resources are subdivided depending on the degree to which they subsist into potential resources (represented by the category C3), and into forecasted resources (represented by the categories D1 and D2).

Category A – Deposit reserves (or a part of a deposit), which have been analysed in sufficient detail to comprehensively define the type, shape and size of the deposit; the level of the oil and natural gas saturation; the reservoir type; the nature of changes in the reservoir characteristics; the oil and natural gas saturation of the productive strata of the deposit; the content and characteristics of the oil, natural gas and condensate; as well as major features of the deposit which determine the conditions of its development (mode of operations, well productivity, strata pressure, the oil, natural gas and condensate balance, hydro and piezoconductivity and other features).

Category A reserves are calculated on the part of the deposit drilled in accordance with an approved development project for the oil or natural gas field.

Category B – Deposit reserves (or a part of a deposit), the oil and natural gas content of which is determined on the basis of commercial flows of oil or natural gas from wells at various hypsometric marks.

The type, shape and size of the deposit; the level of the oil and natural gas saturation; the reservoir type; the nature of changes in the characteristics of the reservoir; the oil and natural gas saturation of the productive strata; the content and characteristics of the oil, natural gas and condensate under stratum, standard conditions and other parameters; and also other major features of the deposit which define the conditions for its development, are all analysed so as to enable a deposit development project to be drawn up.

Category B reserves are calculated on the part of a deposit drilled in accordance with either an approved technological development scheme for an oil field or a trial industrial development project for a natural gas field.

Category C<sub>1</sub> deposit reserves (or a part of a deposit), the oil and natural gas content of which is determined on the basis of commercial flows of oil or natural gas from wells (a number of wells are probed by exploration drilling) and on the basis of positive results from geological and geophysical analyses of untested wells. The type, shape and size of the deposit, and the conditions for bedding the oil and natural gas bearing reservoir are determined by the results of drilling exploratory and operational wells and are verified by approved methods for a given region and by geological and geophysical analytical methods.

The lithological content, the reservoir type and characteristics, the oil and natural gas saturation, the oil displacement rate, and the level of the oil and natural gas saturation of the productive strata, are determined through an analysis of the core and materials from geophysical well testing. The content and characteristics of the oil, natural gas and condensate under stratum and standard conditions are analysed according to test data from the wells. The commercial value of the oil "edge" is determined by the oil and natural gas deposit. Well productivity, hydroconductivity and piezoconductivity of the stratum, stratum pressure, temperature, and the oil, natural gas and condensate balance are analysed through testing and studies of the wells. The hydrogeological and geocryological conditions are determined by the results of well drilling and through comparison with neighbouring explored fields.

Category C<sub>1</sub> reserves are calculated on results of geological exploratory work and production drilling. They are analysed in order to enable preliminary data to be drawn up for a technological development plan for an oil field, or for a project for the trial industrial development of a natural gas field.

Category C<sub>2</sub> preliminary estimated reserves – reserves of a deposit (part of a deposit), which availability is based on the results of geological and geophysical research in the unexplored part of the deposit adjoining plots containing reserves of higher categories and in the untested deposits of the explored fields. The shape and the size of the deposit. Conditions of bedding, level and reservoir types of the layers, content and characteristics of oil, gas and condensate are determined in general terms based on the results of geological and geophysical exploration subject to information on a better explored part of the deposit or by analogy with the explored fields.

Category C<sub>2</sub> reserves are used to determine perspectives of the field and planning of geological and exploration works and geological and production exploration upon the transfer of wells to the higher layers. Category C<sub>2</sub> reserves are partially used for the purposes of compiling project documentation for the development of the deposits.

## **Regulation**

The Russian legal system's rapid evolution during the last ten years is particularly evident in the context of natural gas industry regulation. Below is a brief overview of some key aspects of current regulatory requirements in the natural gas industry.

The regulation of legal and economic relations in the Russian natural gas industry is mainly based on the Constitution of the Russian Federation, the Civil Code of the Russian Federation, the Law of the Russian Federation "On Subsoil Resources" No. 2395-1 dated 21 February 1992 as amended (the "Subsoil Resources Law"), the Federal Law "On Natural Monopolies" No. 147-FZ dated 17 August 1995 as amended (the "Natural Monopoly Law"), the Federal Law "On the Continental Shelf of the Russian Federation" No. 187-FZ dated 30 November 1995 as amended and the Gas Supply Law. The

most important recent piece of legislation is the Gas Supply Law which creates a regulatory framework for natural gas exploration, production, transportation, storage and supplies.

Under the Gas Supply Law, the federal authorities have substantial jurisdiction over natural gas supplies, including, *inter alia*: the development and implementation of State policy on natural gas supply; the regulation of strategic natural gas reserves; control over the industrial and environmental safety of the natural gas supply systems; and standardisation and certification. The aim of this is to achieve consistency in the regulation of natural gas supply throughout Russia.

The Government's role is to approve: a) the various procedures for the approval of projected natural gas production levels and the sales balance in Russia; b) the Federal Programme of Gasification(1) in Russia; c) the principles for setting natural gas prices and natural gas transportation tariffs; d) the regulations for natural gas deliveries; e) the procedure for providing independent organisations with access to the natural gas transportation and distribution networks; and f) the categories of customers to whom natural gas deliveries cannot be restricted or suspended.

The Ministry of Energy of the Russian Federation is specifically responsible, in relation to the natural gas industry, for the practical implementation of State policy and the co-ordination of the activities of the federal executive bodies.

The Ministry of Natural Resources of the Russian Federation is responsible for regulating the exploration, use and protection of natural resources, including *inter alia*, licensing of the production and exploration of subsoil resources.

The federal legislation provides the regional and local authorities with a degree of autonomy in the exercise of their rights over the use of land and the natural resources. It also stipulates that the use of subsoil is under the joint jurisdiction of the federal and regional authorities.

Within their jurisdictions, the regional governing authorities have substantial power over the issues which arise on projects related to the exploration of oil and natural gas fields, pipelines, oil refineries and other enterprises. Such authorities, in co-operation with the regional bodies of the Ministry of Natural Resources, grant licences for the exploration and production of subsoil resources (except for the licences granted for subsoil plots located in Russia's internal waters, territorial sea or on its continental shelf). In addition, such authorities usually control the transfer of rights for the use of land, and regulation of issues relating to the environment, employees' health and safety, social security, and certain financial matters. The relationship between the relevant federal, regional and local authorities, as well as between any one natural gas company and such authorities, has a significant impact on the conditions under which a natural gas company can operate in any particular region.

### **Subsoil Licensing**

In 1992, the Subsoil Resources Law introduced a licensing system for the use of subsoil in order to study, explore and produce natural resources in Russia. During the initial stages (1992-1995), licences were granted to the mining organisations without a tender or an auction, for fields where exploration and production was already in process. For new fields and subsoil plots, however, licences were awarded through auctions or tenders, conducted by the governing body of the relevant subject of the Russian Federation and the Ministry of Natural Resources or its regional authority. The most important criterion for determining the preferred bidder of the auction is the lump sum amount ("bonus") the bidder is prepared to pay for the right to use the subsoil. Not only should the preferred bidder submit the most technically and economically competent proposal, but its proposal must also address environmental, safety and national security issues.

The Subsoil Law also allows for licences to be issued without a tender procedure, for geological exploration of a subsoil plot subject to discovery of mineral resources fields by the subsoil user at its own account and upon enactment of a production sharing agreement (PSA).

The licence for subsoil use has a number of integral components one of which is the licensing agreement, which, *inter alia*, identifies the terms and conditions for the use of the subsoil, the rights and obligations of the licensee and the manager of the subsoil plot, the level of payments, etc. There are usually three signatories to any licensing agreement: the regional authority of the Russian region where

the field is located, the Ministry of Natural Resources or its relevant regional authority (committee) and the licensee.

There are three types of licences applicable to the study, exploration and production of natural resources: for geological exploration of the subsoil plot without production right, for exploration and production of natural resources and combined licences for study, exploration, evaluation and further production of natural resources. Under the Subsoil Resources Law, licences are granted for a fixed or indefinite term which is stipulated in the license: for the exploration licences (up to five years) and for the exploration and production licences generally (either for a period for which the field is operational<sup>(2)</sup> or for a short term of up to one year). The Subsoil Resources Law allows the subsoil user to request an extension of the existing licence in order to complete either the exploration of the field or the procedures necessary to vacate the land once the exploitation of the subsoil is complete, provided such user complies with the terms and conditions of the licence. Indefinite term licences are also provided for the construction and operation of facilities used for the burial of waste, and for underground facilities, which are either unrelated to mining production or used for the storage of natural gas and liquefied hydrocarbons.

Licences granted in accordance with the Subsoil Resources Law cannot be sold or transferred to another entity except in limited circumstances (set out in the Subsoil Law), such as to a spin off company or a 50 per cent or a majority owned subsidiary of the licensee. A licence cannot be held by more than one legal entity, unless the right to use the subsoil is granted to a consortium, in which case the licence is issued in the name of only one member of the consortium and other members are listed in the licence.

Under a licence agreement, the licensee makes a number of commitments, for example: to extract an agreed volume of natural resources each year; to keep environmental pollutants within specified limits; and to clean up environmental contamination. When the licence expires, the licensee must return the relevant land, at its own expense, to a condition which is adequate for future use. The licensee can be fined or the licence can be revoked in the event of repeated or significant breaches of the licence conditions and laws, or the right to subsoil use can be terminated if the licence remains unused for a substantial period of time. The right to use the subsoil resources may also be suspended, restricted, or terminated early by the licensing authorities either on the occurrence of a direct threat to the lives or health of people working or residing in an area where licensed activities are carried on, or on the emergence of force majeure events such as wars or natural disasters.

Although most of the conditions set out in a licence and its integral components are based on mandatory rules contained in Russian law, there are a number of provisions in a licensing agreement which may be amended by further agreement between the licensing authorities and a licensee, provided that the correct procedures are observed.

An exploration and production licence holder is subject to a quarterly tax for production of mineral resources, which is calculated as a certain percentage of the value of the resources it extracts. Current legal acts establish the 16.5% tax rate for the production of natural gas and gas condensate.

A holder of a licence for geological exploration with the purpose of exploration and evaluation of hydrocarbons has to make regular payments for the allotment use based on the total area of such allotment (in square meters) and a specific rate ranging from RUR 120 to RUR 360 per sq.m.

Regular payments for subsoil use are payable on a quarterly basis in accordance with the procedures established by the Government of the Russian Federation. The exact rates for calculation of payments are determined by the executive bodies of the regions of the Russian Federation.

Regular payments for subsoil use do not substitute the relevant tax obligations applicable to the licence holder in accordance with general tax legislation.

### **The Unified Gas Supply System**

In accordance with the Gas Supply Law, the UGSS is the basis for natural gas supplies throughout Russia. It is defined as a production complex consisting of technologically and economically

integrated objects managed on a centralised basis and designated for natural gas production, transportation, storage and supply.

Gazprom is currently the owner of the UGSS. Under the Gas Supply Law the owner of the UGSS has a number of responsibilities, including ensuring the reliable supply of natural gas within Russia; maintaining and developing the UGSS network; monitoring the function of UGSS facilities; ensuring the performance of international treaties and natural gas supply agreements entered into by Russia; procuring the use of equipment and processes for power-saving and environmental safety in the UGSS; ensuring industrial safety within the UGSS; and disaster management.

The Gas Supply Law does not permit the division of the UGSS and the liquidation of its owner is only permitted by Federal Law. The Gas Supply Law also regulates the ownership of shares in the company which owns the UGSS (currently Gazprom). In particular, foreign persons and companies are not permitted to own more than 20 per cent of the owner's issued share capital. Furthermore, at least 35 per cent of the owner's issued share capital must remain in the ownership of the State. The sale or any other transfer of title of such owner's shares can only be carried out if a Federal Law is issued permitting such sale or transfer.

### **Transportation and Supply of Gas**

The relationship between the natural gas suppliers and off-takers is governed by the Regulation on Natural Gas Supplies within the territory of the Russian Federation approved by Government Resolution No. 162 of 5 February 1998.

A right of priority to enter into natural gas supply agreements is given to off-takers which purchase natural gas for State and utility consumers as well as households, and to off-takers that wish to extend their existing natural gas supply agreements.

The off-takers which are financed by the federal budget are obliged to enter into State gas supply contracts with natural gas suppliers. The contracts are entered into in accordance with the supply procedure, established by Russian legislation, for products which are required for State needs.

In accordance with Government Resolution No. 858 dated 14 July 1997, Gazprom is obliged to provide independent suppliers with access to its natural gas transportation system in Russia. However, this is subject to the availability of spare capacity in the natural gas transportation system, the natural gas from independent suppliers being of sufficient quality, and the availability of connecting and branch pipelines to consumers.

In accordance with the Gas Supply Law, consumers are obliged to pay for natural gas supplies and transportation services. If consumers fail to make such payments, suppliers have the right to limit or suspend their natural gas supplies to such consumers in accordance with specific procedures provided for by a number of Government resolutions. The Government of the Russian Federation has issued a number of resolutions (e.g. Government Resolution No. 364 dated 29 May 2002 and Government Resolution No. 1 dated 5 January 1998) regulating restriction or suspension of supplies to certain customers. These consumers include, inter alia, medical institutions, military units, nuclear plants, communication organisations and utilities (for which the limitation or suspension of the supply of fuel and energy resources might result in threats to people's lives or severe environmental consequences).

### **Prices and Tariffs**

Gas prices and transportation tariffs in Russia are regulated by the Natural Monopoly Law and the Gas Supply Law, as well as by a number of supplemental Government resolutions. Government Resolution No. 1021 of 29 December 2000 "On State Regulation of Gas Prices and Tariffs for Gas Transportation in the Territory of the Russian Federation" as amended ("Resolution No. 1021") stipulates the main provisions relating to natural gas prices and transportation tariffs.

The Federal Energy Commission of the Russian Federation ("FEC") is the authority which regulates natural monopolies, including the establishment and regulation of natural gas prices and tariffs. In accordance with Resolution No. 1021, the FEC establishes the level of:

- wholesale natural gas prices;
- tariffs for gas transportation services through trunk pipelines for independent organisations;
- tariffs for gas transportation through pipelines owned by independent gas transportation organisations;
- tariffs for gas transportation through supply networks belonging to gas distribution companies; and
- payments for the supply and marketing services rendered by gas distribution companies.

### **Environmental Requirements**

Environmental rules and standards are regulated by a number of Russian federal laws and regulations. Federal Law No. 7-FZ “On Environmental Protection” of 10 January 2002 (the “Environmental Protection Law”), is one of the principal laws regulating environmental issues. The Environmental Protection Law establishes a “pay-to-pollute” regime and is administered by the Ministry of Natural Resources and local authorities. Fees are assessed for both pollution within the limits agreed on emissions and effluents and for pollution in excess of these limits. There are additional fines for certain other breaches of environmental regulations in place. The Environmental Protection Law does not stipulate precise requirements for the clean-up of pollution, although it does contain an obligation to fully compensate for all environmental losses caused by pollution. In the event of a dispute concerning losses caused by breaches of environmental laws and regulations, the court may impose clean-up obligations subject to the agreement of the parties.

Exploration licences and production licences generally require certain environmental commitments. Although such commitments may be stringent in a particular licence, the penalties for failing to comply are generally low, and the clean-up requirements are not onerous.

### **Regulating the Activities of Natural Monopolies**

The Natural Monopoly Law defines “natural monopoly” as a condition of the commodities market where the demand for products is satisfied more effectively in the absence of competition. The Natural Monopoly Law sets out, inter alia, a regime for the regulation of entities which have a natural monopoly over natural gas transportation. It has also established an authority (currently the FEC), which has control over:

- transactions involving the acquisition of title to (or the rights to use) assets where the value of such assets exceeds 10% of the natural monopoly entity’s own capital (as calculated in accordance with its latest audited balance-sheet). Such transactions should not be related to the industry of the natural monopoly entity;
- investments, the value of which exceeds 10% of the natural monopoly entity’s own capital (as calculated in accordance with its latest audited balance sheet). Such investments should not be related to the industry of the natural monopoly entity;
- sales, leases or other transactions, whereby the natural monopoly entity disposes of assets used in the industry which it monopolises. The value of such assets exceeds 10% of the value of the natural Monopoly entity’s own capital (as calculated in accordance with its latest audited balance sheet).

The FEC can penalise a natural monopoly entity and insist that it takes certain actions in the event that it breaches the Natural Monopoly Law. Furthermore, the FEC has rights to access information on a natural monopoly entity, whether it be held by such entity itself, Government bodies or local authorities.

The following are the FEC’s main methods of regulating the activities of natural monopolies:

- price regulation – setting prices and tariffs and their maximum levels;
- identifying consumers entitled to obligatory services and setting natural monopoly minimum supply levels in the event that it is impossible to meet such consumers' demands (with a view to protecting the rights and legal interests of citizens, State security, the environment and cultural values).

Gazprom, as a natural monopoly entity in natural gas transportation, must submit ongoing reports on its activities and drafts of capital investment plans to the FEC.

The FEC, as a regulatory authority, has the right:

- to decide on the implementation, amendment or suspension of methods of regulating natural monopoly activities referred to in the Natural Monopoly Law (including setting prices and tariffs);
- to instruct natural monopoly entities to cease breaching the Natural Monopoly Law; to enter into contracts with those consumers entitled to an obligatory service; to make amendments to existing contracts; and to transfer revenues from activities which contravene the Natural Monopoly Law to the federal budget;
- to fine natural monopoly entities for violations of the Natural Monopoly Law.

## **Energy Charter**

The Energy Charter ("EC") was conceived as a means to strengthen the relationship which existed in the energy sector between the USSR, the countries of Central and Eastern Europe and the countries of Western Europe.

The proposal for co-operation in the energy sector and creation of the EC was initially made by then Dutch Prime Minister, Mr. Lubbers, at a meeting of the European Council in Dublin in June 1990. The EC was officially adopted in December 1991. It is a political declaration on co-operation between east and west in the energy sector and is not legally binding on any of its parties. At present, the EC has been signed by 52 states, including the countries of the European Union.

By December 1994, following three years of negotiations, the general intentions contained in the Energy Charter were put into a legally binding form—the Energy Charter Treaty (the "ECT"). As at 1 August 2001, the ECT had been signed by 52 countries, including Russia and the member states of the EU, and has been ratified by 46 countries.

The main objectives of the ECT are:

- to provide a stable energy supply;
- to provide effective production, processing, transportation, distribution and consumption of Energy resources;
- to assist in the development of the European energy market and the improvement of the global energy market through implementing principles of non-discriminatory access and free market pricing;
- to legally protect the interests of energy related companies and entities (from countries which are signatories to the ECT) on issues relating to investments, transit, trade, and dispute resolution procedures.

Russia signed the ECT in December 1994, but has not yet ratified it. The question of ratification has been discussed on a number of occasions in the State Duma of the Federal Council of the Russian Federation. The most recent hearing took place on 26 January 2001, where it was decided that the issue of ratification should be referred to the President of Russia, with a request that the Security Council be authorised, for the sake of the country's security, to analyse the economic and political consequences of the ratification of the ECT. Although Russia has not ratified the ECT, it is a member of

the Energy Charter Conference and participates in the Energy Charter Secretariat's day to day activities.

### **European Union Gas Directive**

On 22 June 1998, the European Parliament and the Council of the European Union adopted a directive on common rules for the internal market in natural gas (the "Directive"). The Directive came into force on 10 August 1998.

The Directive establishes common rules for the transmission, distribution, supply and storage of natural gas. It lays down rules for the organisation and function of the natural gas sector (including liquefied natural gas), access to the market, the operation of transmission and distribution systems, and the criteria and procedures applicable to the granting of authorisations for the transmission, distribution, supply and storage of natural gas. It requires the Member States to open up their natural gas markets to competition on a staged basis – 20% by August 2000, 28% by August 2002 and 33% by August 2008. These are minimum requirements and Member States may accelerate the rate by which they open their markets, if they so wish.

The implementation of the Directive has led to significant structural changes in the European natural gas market. The Directive is bringing about a significant liberalisation of the European natural gas market, which goes further than the Directive's minimum requirements. Almost 80% of the total EU market has now been opened up to competition. The EU Commission is considering the possibility of introducing a further Directive which would require total liberalisation of European natural gas markets by 2004.

Russia is the largest natural gas supplier into Western Europe (followed by Algeria and Norway). Current EU projections show that in order to meet the rapidly increasing demand for natural gas and to compensate for the decline in the production of natural gas within the EU, there will be an ever increasing dependence upon imports from outside the EU. The electricity industry and other sectors of the economy are increasingly using natural gas because of its favourable ecological characteristics, resulting in a rising demand for natural gas.

As a result of the liberalisation of the EU's natural gas market, short term contracts and single transactions involving natural gas have become more popular. In time, this may have a significant effect on the state of the market, however the long-term "take-or-pay" contracts, under which most of Europe's natural gas is supplied by Gazprom and other traditional exporters, provide the only guarantee for secure and stable natural gas supplies, whilst at the same time balancing the interests of both exporters and importers. This is because such contracts are the main element of major natural gas export financing projects, which provide to a producer a guaranteed return on capital investments. Furthermore, these contracts guarantee reliable natural gas supplies to the purchaser for an extended period of time.

OAO Gazprom  
16A, Nametkina Street  
117884, Moscow B-420  
Russia

Gentlemen,

DeGolyer and MacNaughton has prepared estimates of the extent and value of the proved and probable natural gas, oil, condensate, gas liquids, and sulfur reserves and the extent only of the possible natural gas, oil, condensate, gas liquids, and sulfur reserves of certain fields in Russia owned by OAO Gazprom (Gazprom). The 18 fields evaluated are located in western Siberia and the Volga-Ural Province of Russia and include the following:

Astrakhan	Urengoi Oil
Bovanenko	Viengapursk
Kharasevai	West Tarkosalinsk
Komomolsk	Yamburg
Medvezhye	Yamsovieyakoye
North Urengoi	Yen-Yakha
Novy Port	Yeti-Purovskoye
Orenburg	Yubileyne
Urengoi	Zapolarnoye

The estimated proved, probable, and possible gas, oil, condensate, gas liquids, and sulfur reserves owned by Gazprom, as of December 31, 2000, in the fields evaluated in the Reports, expressed in billions of cubic meters (BCM) and billions of cubic feet (BCF), millions of metric tons (MMmt) and millions of barrels (MMbbl), or millions of metric tons (MMmt) and millions of U.S. tons (MM U.S.t) are summarized below:

	Gazprom Separator Gas		Gazprom Oil, Condensate, and Gas Liquids	
	English Units	Metric Units	English Units	Metric Units
	(BCF)	(BCM)	(MMbbl)	(MMmt)
Proved Developed .....	216,062.29	8,118.20	804.80	97.70
Proved Undeveloped .....	382,660.63	10,895.74	1,593.11	197.12
Total .....	<u>598,722.92</u>	<u>16,953.94</u>	<u>2,597.91</u>	<u>294.82</u>
Probable* .....	54,497.15	1,543.18	1,440.85	176.30
Possible* .....	91,930.44	2,614.90	5,703.93	701.76

\* Probable and possible reserves have not been adjusted to account of risk.

Note: Sulfur reserves are only applicable to the Astrakhan field and are shown in Attachment II.

The Gazprom future net revenue and present worth to be derived from the production and sale of the proved and proved-plus-probable reserves owned by Gazprom in the fields evaluated in the Reports, as of December 31, 2000, are estimated below, expressed in millions of United States dollars (MM U.S.\$). Values were estimated in United States dollars (U.S.\$) using the exchange rate effective December 31, 2000, which was Russian Rubles 28.16 per U.S.\$1.00.

	<b>Future net Revenue*</b>	<b>Present Worth at 10 Percent*</b>
	<i>(MM U.S.\$)</i>	<i>(MM U.S.\$)</i>
Proved Developed .....	56,356.87	26,906.64
Proved Undeveloped .....	125,818.85	21,981.05
Total .....	<u>182,175.82</u>	<u>48,887.69</u>
Proved plus Probable** .....	204,873.13	49,370.01

\* In the preparation of these estimates, future income tax expenses have been taken into account at the field level and for transportation of gas for export.

\*\* There has been no adjustment applied to the value of probable reserves to account for risk.

The estimates of reserves, future net revenue, and present worth of future net revenue summarized are subject to the definitions, assumptions, qualifications, explanations, and conclusions expressed in the Reports. These summaries should be considered in view of the conditions of the Reports and are susceptible to being misunderstood apart from the Reports.

Very truly yours,

DeGOLYER and MacNAUGHTON

## APPENDIX C – GLOSSARY OF TERMS

“Accounting Chamber”	State Finance control authority of the Russian Federation, formed by the Federation Council, the upper chamber of the Russian Parliament
“Audit Commission”	a Commission approved by a Shareholders’ General Meeting which is responsible for control over Gazprom’s business and financial activities
“bcm”	billion cubic meters, as measured under one atmosphere of pressure at 20°C
“Blue Stream Project”	the construction by Gazprom, in alliance with key Italian natural gas purchaser and distributor ENI, of a new natural gas trunk pipeline from Russia via the Black Sea to Turkey
“Board of Directors”	Gazprom’s board of directors consisting of eleven members and appointed pursuant to the Joint Stock Companies Law and the Charter
“Central Bank”	Central Bank of the Russian Federation
“Central and Eastern Europe”	for the purposes of this Offering Circular: Bosnia, Bulgaria, Croatia, the Czech Republic, the former Yugoslavia, Hungary, Macedonia, Poland, Romania, Slovakia, Slovenia and Yugoslavia
“Central Reserve Commission”	the Ministry of Natural Resources Central Commission for State Examination of Mineral Resources Reserves established pursuant to an Order of the Geology and Subsoil Committee of the Government No. 20 dated 23 April 1992
“Charter”	Gazprom’s Charter of 31 May 1996, as amended
“COMECON”	a former economic association of communist countries founded in 1949, comprised of the Soviet Union, Bulgaria, Czechoslovakia, East Germany, Hungary, Mongolia, Poland, Romania and Cuba
“Constitution”	the constitution of the Russian Federation adopted on 12 December 1993
“Dispatch Management Centre”	Gazprom’s dispatch management centre responsible for monitoring natural gas supplies through the UGSS, located in Gazprom’s head office in Moscow
“EBRD”	European Bank for Reconstruction and Development
“Energy Charter Treaty”	treaty between European states the main objective of which is to assist in the development of the European energy market.
“EU”	European Union
“EU Gas Directive”	a directive adopted by the European Parliament and the Council, which came into force in August 1998, with the purpose of establishing common rules for the organisation and functioning of the European natural gas market
“Europe”	for the purposes of this Offering Circular, Central and Eastern Europe and Western Europe

“FEC”	Federal Energy Commission of the Russian Federation established pursuant to Government Decree No. 960 dated 13 August 1996 which is responsible, <i>inter alia</i> , for regulating domestic gas prices, transportation tariffs and natural resources monopoly activities
“Federal Property Fund”	State agency established under Presidential Decree No. 2173 dated 17 December 1993, which is responsible for privatisation of federal property
“FSU”	excluding Russia, the countries which comprised the former Soviet Union: Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kirgizstan, Latvia, Lithuania, Moldova, Tajikistan, Turkmenistan, the Ukraine and Uzbekistan
“Gazprom Shares”	the ordinary registered shares of Gazprom
“Gazprom Tender Committee”	a committee established within Gazprom which is responsible for holding tenders and auctions for Gazprom’s various projects
“General Meeting of Shareholders”	Gazprom’s highest authority in accordance with its charter, with exclusive power over various aspects of Gazprom’s management
“International Energy Agency”	an energy forum with 25 member countries, which is an authoritative source for energy statistics worldwide
“kW”	kilowatts
“mcm” pressure at 20° C	thousand cubic meters, as mentioned under one atmosphere of pressure at 20° C
“Management Committee”	an executive body of Gazprom, which along with the Management Committee Chairman, manages Gazprom’s day-to-day affairs and implements the strategic plans of the Board of Directors
“Management Committee Chairman”	an executive body of Gazprom responsible for issues which do not fall within the exclusive jurisdiction of the General Meeting of Shareholders, the Board of Directors or the Management Committee
“mtoe”	million metric tonnes of oil equivalent
“Paris Club”	an informal grouping of 19 sovereign states which, in their role as creditors, strive to find and implement co-ordinated and sustainable solutions to the payment difficulties experienced by certain debtor countries
“OECD”	Organisation for Economic Co-operation and Development
“SACE”	Istituto per i Servizi Assicurativi del Commercio Estero (the Italian export agency)
	a system, outlined in Government Decree No. 622 dated 23 August 2000, which monitors environmental conditions using various facilities

“State Gas Concern Gazprom”	<p>the State controlled entity charged with the task of operating and developing the UGSS prior to Gazprom’s 1993 reorganisation into a joint stock company</p> <p>an annual record prepared by the Ministry of Natural Resources pursuant to the Subsoil Law stating the level of mineral raw materials subsisting within Russia and within the Subjects of the Russian Federation</p>
“Subjects of the Russian Federation”	State legal formations which jointly comprise the Russian Federation. In accordance with the Constitution, there are six types of Russian Federation “Subjects”: the republic of the Russian Federation, countries, regions, federal cities, autonomous regions and autonomous districts
“take-or-pay”	contract a contract under which a purchaser agrees to take natural gas from a supplier for an agreed period and price and to pay an agreed sum to a supplier should the purchaser be unable to continue to buy
“tcm” pressure at 20°C	trillion cubic meters, as measured under one atmosphere of pressure at 20°C
“tonne”	one metric tonne
“Transbalkan Pipeline Project”	Gazprom’s project on the expansion and modernisation of the existing pipeline network in the Ukraine, Romania and Bulgaria
“Western Europe”	Andorra, Austria, Belgium, Canary Islands, Channel Is-lands, Cyprus, Denmark, Finland, France, Germany, Gibraltar, Greece, Greenland, Iceland, Republic of Ireland, Isle of Man, Italy, Liechtenstein, Luxembourg, Malta, Monaco, The Nether-lands, Norway, Portugal, San Marino, Spain, Sweden, Switzerland, Turkey and the United Kingdom
“UGSS”	Unified Gas Supply System
“US”	or
“U.S.”	United States of America
“Yamal-Europe Project”	Gazprom's project, which consists of the construction of pipelines (total length approximately 5,900 km) from the northern part of the Tyumen region in the Russian Federation to Germany, running through the territories of Belarus and Poland.
“Yamburg Agreement”	a number of contracts made between government authorities of the former USSR and a number of Central and Eastern European countries in 1985-1992 which provided for gas deliveries by Gazprom.

### CONVERSION TABLE

<u>metric measure</u>	<u>U.S. measure</u>
1 bcm .....	35,316,000,000 cubic feet
1 tcm .....	35,316,000,000,000 cubic feet
1 tonne .....	1,000 kilos, 2,204.6 pounds
1 kilometer .....	approximately 0.62 miles
1 metric tonne of oil equivalent.....	25.2 Quadrillion Btus (British Thermal Unit) approximately 1,125 cubic meters of natural gas.

**ОАО ГАЗПРОМ**  
**IAS CONSOLIDATED FINANCIAL STATEMENTS**  
**31 DECEMBER 2000**

## **AUDITORS' REPORT**

To the Shareholders of OAO Gazprom

1. We have audited the accompanying consolidated balance sheet of OAO Gazprom and its subsidiaries and associates (the "Group") as of 31 December 2000 and the related consolidated statements of operations, of cash flows and of changes in shareholders' equity for the year then ended. These financial statements are the responsibility of the Group's management. Our responsibility is to express an opinion on the consolidated financial statements based on our audit.
2. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.
3. In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group at 31 December 2000, and the results of its operations and its cash flows for the year then ended in accordance with International Accounting Standards.
4. Without qualifying our opinion, we draw your attention to Note 24 to the consolidated financial statements. The Government of the Russian Federation is the principal shareholder of the Group and governmental economic and social policies affect the Group's financial position, results of operations and cash flows.
5. Further, we draw your attention to Note 28 to the consolidated financial statements. The consolidated financial statements as of 31 December 2000 and 1999, as previously issued, have been restated for changes in the general purchasing power of the Russian Rouble in accordance with International Accounting Standard 29 "Financial Reporting in Hyperinflationary Economies" with all amounts stated in terms of the measuring unit current at 31 December 2001.

## **OAO GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)**

#### **1 NATURE OF OPERATIONS**

RAO Gazprom was established as a Russian joint stock company by Presidential Decree No. 1333 dated 5 November 1992. The Annual General Meeting of shareholders, held on 26 June 1998, approved a recommendation from the Board of Directors on revising the name of the Company in order to comply with the federal law on joint stock companies. Consequently, the Company became the open joint stock company Gazprom or OAO Gazprom.

OAO Gazprom and its subsidiaries and associates (the "Group") operate one of the largest gas pipeline systems in the world and are responsible for substantially all gas production and high pressure gas transportation in the Russian Federation. The Group is also a major exporter of gas to European countries.

The Group is directly involved in the following principal activities:

- Production – exploration and production of gas and other hydrocarbons;
- Refining — processing of gas condensate and other hydrocarbons, and sales of other hydrocarbon products;
- Transportation – transportation of gas; and
- Distribution — domestic and export sale of gas.

The weighted average number of employees during 2000 and 1999 was 306 thousand and 298 thousand respectively.

#### **2 ECONOMIC ENVIRONMENT IN THE RUSSIAN FEDERATION**

The economy of the Russian Federation continues to display characteristics of an emerging market. These characteristics include, but are not limited to, the existence of:

- a currency that is not freely convertible outside of the country;
- extensive currency controls;
- a low level of liquidity in the public and private debt and equity markets; and
- high inflation.

Transactions on the Russian stock exchange market are influenced by underdeveloped infrastructure, especially registration and settlement systems which are in the process of formation as well as the regulation basis.

The prospects for future economic stability in the Russian Federation are largely dependent upon the effectiveness of economic measures undertaken by the government, together with legal, regulatory, and political developments.

#### **3 BASIS OF PRESENTATION**

These financial statements are prepared in accordance with International Accounting Standards ("IAS"). The Group subsidiaries and associated undertakings maintain their statutory financial statements in accordance with the Regulation on Accounting and Reporting of the Russian Federation ("RAR") or the accounting regulations of the country in which the particular Group company is resident.

## **ОАО ГАЗПРОМ**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### **3 BASIS OF PRESENTATION—(Continued)**

The financial statements of the Group's subsidiaries and associated undertakings resident in the Russian Federation, which account for substantially all the assets and liabilities of the Group, are based on their statutory records, which are maintained under the historical cost convention with adjustments and reclassifications recorded in the financial statements for the purpose of fair presentation in accordance with IAS. Similar adjustments are recorded in the financial statements in respect of Group companies not resident in the Russian Federation.

The preparation of consolidated financial statements in conformity with IAS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

The adjustments and reclassifications made to the statutory accounts for the purpose of IAS reporting include the restatement for changes in the general purchasing power of the Russian Rouble ("RR") in accordance with IAS 29, "Financial Reporting in Hyperinflationary Economies" ("IAS 29") (see Note 28).

These statements are prepared in accordance with all International Accounting Standards effective for financial statements covering periods ended 31 December 2000.

#### **Reclassifications**

Minor reclassifications have been made to certain prior year balances to conform to the current year presentation.

#### **4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The principal accounting policies followed by the Group are set out below.

#### **Consolidation**

Significant subsidiary companies in which the Group, directly or indirectly, has an interest of more than 50% of the voting rights or is otherwise able to exercise control over the operations have been consolidated. Subsidiaries are consolidated from the date on which effective control is transferred and are no longer consolidated from the date of disposal. All intercompany transactions, balances and unrealised surpluses and deficits on transactions between group companies have been eliminated. Separate disclosure is made of minority interests.

Acquisitions of subsidiaries are recorded in accordance with the purchase accounting method. The consolidated financial statements of the Group reflect the results of operations of any subsidiaries acquired from the date control is established.

Assets and liabilities of subsidiaries acquired are restated to comply with uniform Group accounting policies. Any excess of the cost of an acquisition over the fair value of the Group's share of the identifiable net assets of the acquired subsidiary/associated undertaking at the date of acquisition is recorded as goodwill. In respect of associates, goodwill is included in investments in associated undertakings.

## **OA O GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)**

#### **4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES—(Continued)**

##### **Associated undertakings**

Associated undertakings are undertakings over which the Group has significant influence, but which it does not control. Provisions are recorded for long-term impairment in value. Associated undertakings are accounted for using the equity method.

Equity accounting involves recognising in the income statement the Group's share of the associated undertakings' profit or loss for the year. The Group's interest in the associate is carried in the balance sheet at an amount that reflects its share of the net assets of the associate and includes goodwill on the acquisition.

##### **Mutual cancellation and barter transactions**

A significant portion of accounts receivable arising from sales are settled either through a chain of non-cash transactions (mutual cancellations), sometimes involving several enterprises, or, to a lesser extent, through direct settlement by goods from the final customer (barter). A portion of operations, including capital expenditures, is transacted by mutual cancellations or barter. Such transactions are excluded from investing and financing activities in the consolidated statement of cash flows. Net cash received from operating activities in the consolidated statement of cash flow also represents actual cash flow transactions. However, individual items within operating activities are stated inclusive of both cash and non-cash transactions due to the significance of non-cash transactions in the form of barter and mutual-cancellation offsets. Management believes the costs which would be required to be expended to determine such information would outweigh the benefits of having such information.

Receivables and payables that are expected to be settled by mutual settlements, barter or other non-cash settlements, are recognised based on management's estimate of the fair value to be received or given up. Approximately, 22% and 40% of accounts receivable from gas sales settled during the years ended 31 December 2000 and 1999, respectively, were settled in this manner.

##### **Deferred tax**

Deferred tax assets and liabilities are calculated in respect of temporary differences using a balance sheet liability method for financial reporting and accounting for deferred income taxes. Deferred tax is recorded for all temporary differences arising between the tax basis of assets and liabilities and their carrying values for financial reporting purposes. A deferred tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised. Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date.

##### **Foreign currencies**

The balance sheets of foreign subsidiaries and associated undertakings and the monetary assets and liabilities which are held by the Group and denominated in foreign currencies at the year end are translated into Roubles at the exchange rates prevailing at the year end. Exchange differences arising on the retranslation of the net assets of foreign subsidiaries and associated undertakings are recognised as translation differences and included in shareholders' equity. Statements of operations of foreign entities are translated at average exchange rates for the year.

## OA0 GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### 4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES—(Continued)

Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of operations.

##### Property, plant and equipment

Property, plant and equipment are carried at historical cost restated to the equivalent purchasing power of the RR at 31 December 2000 on the basis of the indices included in Note 3.

Gas and oil exploration and production activities are accounted for in accordance with the successful efforts method. Under the successful efforts method, costs of successful development and exploratory wells are capitalised. Costs of unsuccessful exploratory wells are expensed upon determination that the well does not justify commercial development. Other exploration costs are expensed as incurred.

Major renewals and improvements are capitalised. Maintenance, repairs and minor renewals are expensed as incurred. Minor renewals include all expenditures that do not result in a technical enhancement of the asset beyond its original capability. Gains and losses arising from the disposal of property, plant and equipment are included in the consolidated statement of operations as incurred.

Interest costs on borrowings to finance the construction of property, plant and equipment are capitalised as part of the cost of the asset during the period of time that is required to complete and prepare the asset for its intended use.

The return to a governmental authority of social assets (such as rest houses, housing, schools and medical facilities) vested to the Group at privatisation are recorded only upon both the transfer of title to, and termination of operating responsibility for, the social assets. These disposals are deemed to be shareholder transactions because they represent a return of assets for the benefit of governmental authorities, as contemplated in the original privatisation arrangements. Consequently, such disposals are accounted for as a charge to other reserves.

Depreciation is calculated on all assets on a straight line basis. Depreciation on wells and production equipment has been calculated on cost restated to the equivalent purchasing power of the Rouble at 31 December 2000, using the straight line method rather than, as is the more generally accepted international industry practice, on the unit-of-production method. As a result, gas production and changes in gas reserves do not impact the computation of the Group's depreciation. The estimated useful lives of the Group's assets are as follows:

	Years
Pipelines.....	33
Wells and production equipment .....	12-40
Machinery and equipment .....	10-18
Buildings.....	30-40
Roads.....	20-40
Social assets .....	10-40

Assets under construction are not depreciated.

## **ОАО ГАЗПРОМ**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)**

#### **4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES—(Continued)**

##### **Investments**

Long-term investments, excluding bonds, are reflected at cost restated to the equivalent purchasing power of the RR at 31 December 2000. Bonds are reflected at amortised cost. Provision for impairment is only made where, in the opinion of the Group's management, there is a diminution in value, which is other than temporary. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the consolidated statement of operations.

##### **Marketable securities**

Marketable securities are valued at the lower of cost restated to the equivalent purchasing power of the Rouble at 31 December 2000 on the basis of indices included in Note 3, or market value.

##### **Accounts receivable**

Accounts receivable are carried at anticipated realisable value. An impairment estimate is made for doubtful receivables based on a review of all outstanding amounts at the year end. This estimate reflects, inter alia, the payment record of specific debtors and management's perception of the economic risks and factors specific to customers operating in certain regions and markets. Bad debts are written off in the year in which they are identified.

##### **Inventories**

Inventories are valued at the lower of net realisable value or weighted average cost restated to the equivalent purchasing power of the RR at 31 December 2000 on the basis of indices included in Note 3.

##### **Provisions**

Provisions including provisions for environmental liabilities, are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

##### **Impairment of assets**

At each balance sheet date management assess whether there is any indication that the recoverable value of the Group's assets has declined below the carrying value. When such a decline is identified, the carrying amount is reduced to the recoverable amount. The amount of the reduction is recorded in the consolidated statement of operations in the period in which the reduction is identified.

##### **Pension and other post-retirement benefits**

Mandatory contributions to the governmental pension scheme are expensed when incurred and are included within staff costs in the operating expenses. The cost of providing other immaterial discretionary pension payments and other post-retirement obligations (including constructive) is accrued and charged to the consolidated statement of operations so as to spread the regular cost over the service lives of employees.

## ОАО ГАЗПРОМ

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### 4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES—(Continued)

##### Revenue recognition

Sales are recognised for financial reporting purposes when products are delivered to customers and title passes and are stated net of value-added tax ("VAT"), excise taxes and other similar compulsory payments.

Interest income is recognised as it accrues (taking into account the effective yield on the asset), unless collectibility is in doubt.

##### Research and development

Research and development expenditure is recognised as an expense except that costs incurred on development projects are recognised as development assets to the extent that such expenditure is expected to have future benefits. However, development costs initially recognised as an expense are not recognised as an asset in a subsequent period.

Development costs that have been capitalised are amortised from the commencement of the commercial production of the product to which they relate on a straight line basis over estimated useful lives.

##### Financial instruments

Financial instruments carried on the balance sheet include cash and bank balances, investments, receivables, trade creditors and borrowings. The particular recognition methods adopted are disclosed in the individual policy statements associated with each item.

The Group is also party to derivative financial instruments including forward and spot transactions and option contracts in foreign exchange, gold and securities markets. The Group's normal policy is to measure these instruments using contractual rates, with resultant gains or losses being reported within the consolidated statement of operations. Following the financial crisis of August 1998, the Group adopted specific accounting methods as follows:

##### *Index Forwards*

The Group has either paid the amount due under index contracts, and realised a loss (gain), or negotiated a settlement for a lesser amount and has recognised a loss (gain) based on the agreed terms, or has not settled with the counterparty. Where no settlements or agreements have been reached the loss on the index contracts has been recognised by applying the rate of exchange ruling at the date of the contract maturity, for domestic counterparties, and the year end exchange rate, for foreign counterparties. This difference in the application of exchange rates is due to the fact that settlements with domestic counterparties in the normal course of business have been performed in RR, and with foreign counterparties in foreign currency. Management has not recorded a gain where no settlement or agreements have been reached due to the uncertainty of collectibility.

Gains and losses recognised on the index contracts have been offset within each counterparty since management believes that there is a legally enforceable right to offset these amounts, and it intends to settle all the contracts with the same counterparty on a net basis.

## OAD GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### 4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES—(Continued)

##### *Deliverable Forwards*

The Group has either paid the amount due under deliverable contracts and recognised a loss (gain), or negotiated a settlement for a lesser amount and has recognised a loss (gain) based on the agreed terms, or has not settled with the counterparty. Where no settlements or agreements have been reached the loss on the deliverable contracts has been recognised based on the year end exchange rate, plus interest and penalties where applicable. Management has not recorded a gain where no settlement or agreements have been reached due to the uncertainty of collectibility.

Gains and losses on the deliverable contracts have not been offset within counterparties.

##### *Options*

Where conditions of an option agreement include the actual delivery of currency, the Group has treated a loss (gain) in the same way as for the deliverable forwards contracts, otherwise the Group has used the index forwards approach.

##### **Cash and cash equivalents**

Cash comprises cash on hand and demand deposits. Cash equivalents comprise short-term investments which are readily converted to cash and have an original maturity of three months or less.

##### **Treasury shares**

Treasury shares are recorded at cost, using the specific identification method. The gains (losses) arising from treasury share transactions are recognised as a movement in shareholders' equity, net of associated costs including taxation.

##### **Dividends**

Dividends are recognised as a liability at the balance sheet date only if they are proposed or declared before or on the balance sheet date.

##### **New Accounting Developments**

A new International Accounting Standard, IAS 39 "Financial Instruments: Recognition and Measurement" came into effect on 1 January 2001. The Standard requires all financial assets and financial liabilities to be recognised on the balance sheet, including all derivatives. Management has not yet evaluated the impact of this standard on the Group's consolidated financial statements for the year ending 31 December 2001.

#### 5 SEGMENT INFORMATION

Management does not separately identify segments within the Group, as it operates as a vertically integrated business with substantially all external sales generated by the gas distribution business. However, following the practice suggested by IAS 14, "Segment Reporting", Revised 1997 ("IAS 14") for vertically integrated businesses, information can be analysed based on the following business segments:

## **OAO GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)**

#### **5 SEGMENT INFORMATION—(Continued)**

The inter-segment revenues mainly consist of:

- Production – sale of gas to the Distribution segment and sale of hydrocarbons to the Refining segment;
- Refining – sale of refined products to other segments;
- Transport – rendering transportation services to the Distribution segment; and
- Distribution – sale of gas to the Transport segment for technological needs.

Internal transfer prices are established by the management of the Group with the objective of providing for the specific medium and long-term funding requirements of the individual segments. Provisions for guarantees (see Note 25) have been included within unallocated expenses. Also included within unallocated expenses are corporate expenses, including provision for the impairment of other investments.

Segment assets consist primarily of property, plant and equipment and current assets. Unallocated assets include other investments and deferred tax assets. Segment liabilities comprise operating liabilities, excluding items such as taxes payable, borrowings, and deferred tax liabilities.

Capital expenditures comprise additions to property, plant and equipment. Charges for impairment relate only to those charges made against allocated assets. A significant portion of operations is transacted by mutual cancellations or barter. As disclosed in Note 4, such transactions are reported on the same basis as cash transactions. Consequently, expenses paid by mutual cancellations or barter are not disclosed as non-cash expenses in this note.

Substantially all of the Group's operating assets are located in the Russian Federation. Gas sales to different geographical regions are disclosed in Note 19.

#### **6 CASH AND CASH EQUIVALENTS**

Included within cash and cash equivalents in the consolidated balance sheet are balances totalling RR 17,235 and RR 18,346 at 31 December 2000 and 1999, respectively, representing cash in hand and balances with banks. Included within other current assets are balances of cash and cash equivalents totalling RR 37,811 and RR 30,376 at 31 December 2000 and 1999, respectively, which are restricted as to withdrawal under the terms of certain of the borrowings (see Note 15). In addition, other current assets include balances of cash RR 5,929 and RR 5,151 at 31 December 2000 and 1999, respectively, which are restricted in subsidiary banks as to withdrawal under banking regulations.

#### **7 MARKETABLE SECURITIES**

At 31 December 2000, marketable securities include Ukrainian eurobonds of RR 6,965 held by National Reserve Bank (see Note 11). The remaining carrying value of marketable securities principally comprises Russian government bonds.

**OAO GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
31 December 2001, except as noted)

**8 ACCOUNTS RECEIVABLE AND PREPAYMENTS**

	31 December	
	2000	1999
Trade receivables (net of a provision for doubtful accounts of RR 83,021 and RR 72,460 at 31 December 2000 and 1999, respectively) .....	205,132	220,702
Prepayments and advances paid (net of a provision for doubtful accounts of RR 6,421 and RR 8,246 at 31 December 2000 and 1999, respectively) ....	33,260	23,875
Other receivables (net of a provision for doubtful accounts of RR 30,473 and RR 28,022 at 31 December 2000 and 1999, respectively) .....	76,836	69,212
	315,228	313,789

Substantially all trade receivables are currently receivable in accordance with their contractual terms and, accordingly, are classified as current assets. Management has considered the likelihood of collection of receivables beyond 2001 when determining the amount of the provision for doubtful accounts.

RR 94,446 and RR 108,072 of trade receivables are denominated in hard currency, mainly United States ("US") dollars, at 31 December 2000 and 1999, respectively.

Other receivables include RR 26,614 and RR 34,262 of receivables relating to the operations of Gazprombank and National Reserve Bank (see Note 23) at 31 December 2000 and 1999, respectively. These balances mainly represent loans issued to other banks and customers at commercial rates ranging from 4.7% to 23.6% per annum at 31 December 2000 and 3% to 40% per annum at 31 December 1999.

**9 INVENTORIES**

	31 December	
	2000	1999
<i>Note</i>		
20 Materials and supplies .....	34,972	29,398
Gas (in pipelines and storage) .....	29,699	25,142
Goods for resale .....	4,014	4,251
Other .....	1,650	2,665
	70,335	61,456

Inventories are presented net of a provision for obsolescence of RR 14,339 and RR 9,790 at 31 December 2000 and 1999, respectively.

Goods for resale are stated at their net realisable value at 31 December 2000 and 1999, respectively.

Assets under construction are presented net of a provision for impairment of RR 83,350 and RR 61,488 at 31 December 2000 and 1999, respectively. Additions of assets under construction are stated net of transfers to other property, plant and equipment categories.

Included in additions above is capitalised interest of RR 18,699 and RR 13,289 for the years ended 31 December 2000 and 1999, respectively. A capitalisation rate of 8.2% (1999 — 8.1%) was used representing the average actual borrowing cost of the loans used to finance the projects.

Included in the property, plant and equipment above are fully depreciated assets which are still in service of RR 275,788 and RR 274,237 at 31 December 2000 and 1999, respectively.

Depreciation disclosed above includes RR 905 and RR 1,006 for the years ended 31 December 2000 and 1999, respectively, which is considered a cost of self constructed assets and thus capitalised rather than expensed in the consolidated statement of operations. Similarly, RR 11,035 and RR 11,008 of depreciation for the years ended 31 December 2000 and 1999, respectively, is capitalised as a component of gas inventories and expensed in the consolidated statement of operations when the gas is sold.

The Group's gas fields are operated under licenses granted by federal and local authorities. These licenses to develop and extract hydrocarbons expire between 2013 and 2016, however they may be extended. Management intends to extend the existing licenses on properties expected to produce hydrocarbons subsequent to their current expiration dates.

During 1999, the Group was the principal shareholder in AEB and executed effective control over the Bank. In April 2000, a portion of the controlling interest the Group held in AEB was sold, leaving the Group with a 26% interest in AEB (see Note 24). Thus, due to the inability of the Group to control the operations of AEB from April 2000, AEB was accounted for under the equity method.

Dividends received from associated undertakings were RR 1,137 and RR 1,290 for the years ended 31 December 2000 and 1999, respectively.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### 11 INVESTMENTS (continued)

##### Other investments

At 31 December 1999, other investments included Ukrainian Ministry of Finance bonds held by National Reserve Bank with a carrying value of RR 6,141. These bonds were issued by the Ukrainian government in settlement of gas sales made to the Ukraine in 1994. The bonds were denominated in US dollars, carry an interest rate of 8.5% per annum and were redeemable between June 1999 and March 2006. At 31 December 1999 the Group had pledged Ukrainian bonds against certain short-term borrowings. In April 2000, the Group was elected to participate in a restructuring program and exchanged these bonds for US dollar denominated eurobonds issued by the Cabinet of Ministers of Ukraine bearing interest at 11.0% per annum. The new eurobonds mature between March 2001 and March 2007 with repayment of principal to be made in semi-annual installments, commencing in March 2001. Upon exchange of the original bonds the Group transferred the eurobonds to marketable securities at their estimated fair value (see Note 7).

At 31 December 2000 and 1999, the Group had a 14.3% interest in ZAO Media-Most. This interest in ZAO Media-Most was acquired in November 1999 via the settlement of a ZAO Media-Most debt to the Group. ZAO Media-Most is one of the largest publishing and entertainment companies operating in the Russian Federation.

At 31 December 1999, the Group held collateral representing an interest of 17.1% in ZAO Media-Most in exchange for providing certain loan guarantees on behalf of ZAO Media-Most. During 2000, ZAO Media-Most defaulted on its payment obligation and the Group fulfilled its obligations.

In November 2000, the Group signed agreements with ZAO Media-Most to change the collateral under the guarantees, both those fulfilled in 2000 and those outstanding at 31 December 2000 (see Note 25) to interests in NTV and other ZAO Media-Most operating companies. The Group then exercised its rights to take ownership of interests in ZAO Media-Most operating companies and a further interest in NTV.

At 31 December 2000, the Group held a 46% interest in NTV and 25% plus one share interest in various other ZAO Media-Most operating companies.

Outstanding guarantees of the Group made on behalf of ZAO Media-Most as at 31 December 2000 amounted to RR 8,749 with collateral in the form of interests in NTV and other ZAO Media-Most operating companies (see Note 25).

The Group is currently in negotiations to sell its investments in NTV and other ZAO Media-Most operating companies.

Other payables.....	37,070	34,792
	<u>101,250</u>	<u>90,037</u>

**OAO GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
31 December 2001, except as noted)

**12 ACCOUNTS PAYABLE AND ACCRUED CHARGES (continued)**

Other payables includes RR 16,441 and RR 13,793 related to the operations of the Group's banking subsidiaries at 31 December 2000 and 1999, respectively. These balances mainly represent amounts due to the banks' customers with terms at commercial rates ranging from 3.6% to 11.6% per annum at 31 December 2000 and 7.2% to 10.0 % per annum at 31 December 1999.

**13 TAXES PAYABLE**

	31 December	
	2000	1999
Excise tax (including deferred amounts of RR 24,141 and RR 30,841 at 31 December 2000 and 1999, respectively) .....	40,388	55,714
Tax penalties and interest .....	39,857	43,255
VAT, net (including deferred amounts of RR 4,051 and RR 16,453 at 31 December 2000 and 1999, respectively) .....	25,724	41,422
Road use and housing fund taxes (including deferred amounts of RR 2,943 and RR 6,603 at 31 December 2000 and 1999, respectively) .....	12,628	22,880
Profit tax.....	9,813	11,053
Mineral use and mineral restoration taxes (including deferred amounts of RR 2,025 and RR 1,596 at 31 December 2000 and 1999, respectively) .....	9,458	7,190
Pension fund and other social taxes .....	2,742	1,723
Other taxes .....	5,938	8,779
	146,548	192,016
Less: long term portion of restructured tax liabilities .....	10,519	—
	136,029	192,016

The deferred amounts included in the taxes above are payable upon settlement of the related trade receivable balances. Substantially all accrued taxes above, excluding the deferred amounts and restructured liability (see below) incur interest at a rate of 1/300 of the refinancing rate of the Central Bank of the Russian Federation (the refinancing rate was last set at 25.0% per annum on 4 November 2000). Interest does not accrue on tax penalties and interest.

During 2000 the Group negotiated the restructuring of its tax liabilities in accordance with current tax regulations.

The long-term portion of the restructured tax and penalties liability has the following maturity profile:

	31 December 2000
Due for repayment:	
Between one and two years.....	2,703
Between two and five years .....	8,092
After five years .....	17,654
	28,449
Less: discount recorded upon restructured taxes .....	17,930
	10,519

**OA0 GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
31 December 2001, except as noted)

**13 TAXES PAYABLE (continued)**

The above balances have been discounted using the marginal RR rate of borrowings of the Group of 21.2% in order to present the debt at its fair value.

**14 SHORT-TERM LOANS AND CURRENT PORTION OF LONG-TERM BORROWINGS**

	31 December	
	2000	1999
Short-term loans .....	145,862	98,776
Current portion of long-term borrowings (see Note 15) .....	55,496	52,462
	201,358	151,238

Short-term borrowings include RR denominated bank borrowings with interest rates varying from 17% to 37% for the year ended 31 December 2000 and from 35% to 40% for the year ended 31 December 1999.

Short-term borrowings also include RR 68,405 and RR 29,704 of short-term promissory notes at 31 December 2000 and 1999, respectively.

**15 LONG-TERM BORROWINGS**

	Currency	Due	31 December	
			2000	1999
Long-term borrowings payable to:				
A French banking consortium .....	US dollar	2000-2005	94,897	115,821

## OA0 GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### 15 LONG-TERM BORROWINGS (continued)

Interest rates on the borrowings are variable and linked, mainly, to LIBOR, except for interest on the Italian borrowing, which is fixed at 5.7%. The annual interest rates on US dollar denominated borrowings range from 5.7% to 10.7% per annum at 31 December 2000 and from 5.7% to 10.5% per annum at 31 December 1999. The annual interest rates on Euro denominated borrowings range from 3.8% to 6.1% per annum at 31 December 2000. The annual interest rates on DM denominated borrowings range from 4.8% to 8.4% per annum at 31 December 2000 and from 3.2% to 8.0% per annum at 31 December 1999. Substantially all borrowings are secured by contractual obligations to sell gas in Western Europe and the associated cash flows (see Note 6). The amount payable to an international banking consortium is also secured by certain assets of ZGG-Zarubezhgaz Erdgashandels GmbH, a wholly owned subsidiary.

The fair value of the fixed rate Italian loan is RR 33,688 and RR 40,566 at 31 December 2000 and 1999, respectively. The carrying amounts of variable rate loans approximate fair value.

The Group has no subordinated debt and no debt which may be converted into an equity interest in the Group.

Long-term borrowings include RR 3,213 and RR 3,689 at 31 December 2000 and 1999, respectively, of coupon non-documentary bearer bonds issued by OAO Gazprom in 1999. The issue amounted to 3.0 million bonds, each with a nominal value of RR 1,000 and a due date of 15 April 2003. During the year 2000, the Group repurchased 481,187 bonds. The total amount recorded for the bonds excludes the discount related to future periods.

At 31 December 2000 long-term borrowings also include RR 7,351 of promissory notes with due dates beyond 2001.

The US dollar to RR exchange rates were 28.16 and 27.00 at 31 December 2000 and 1999, respectively. The Euro to RR exchange rates were 26.14 and 27.32 at 31 December 2000 and 1999, respectively. The DM to RR exchange rates were 13.37 and 13.92 at 31 December 2000 and 1999, respectively.

#### 16 PROFIT TAX

Profit tax expense in the consolidated statement of operations is stated net of RR 974 and RR 149 of tax attributable to gains arising on treasury share transactions for the year ended 31 December 2000 and 1999, respectively (see Note 4).

**OAO GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
31 December 2001, except as noted)

**16 PROFIT TAX (continued)**

The Group accrued profit tax at rates of 30.0% and 38.0% on profits from non-banking and banking activities, respectively, computed in accordance with the Russian tax legislation. Starting from 1 January 2001 the profit tax rates were increased effectively to 35.0% and 43.0%, respectively. IAS profit before profit tax for financial reporting purposes is reconciled to profit tax expense as follows:

	Year ended 31 December	
	2000	1999
DIAS profit before profit tax .....	183,195	27,508
Theoretical tax charge at a statutory rate thereon .....	(54,958)	(8,253)
Tax effect of items which are not deductible or assessable for taxation purposes:		
Non-temporary element of monetary gains and losses.....	(54,058)	(113,639)
Non-deductible expenses .....	(47,154)	(47,602)
Statutory tax concessions .....	23,465	15,485
Other non-temporary differences.....	(6,340)	9,656
Inflation effect on deferred profit tax balance at beginning of year .....	6,251	3,334
Effect of increase in taxable base due to statutory revaluation.....	274,756	-
Effect of change in tax rate .....	16,643	610
Profit tax benefit (expense) .....	<u>158,605</u>	<u>(140,409)</u>

The non-temporary impact of monetary gains and losses reflects the effect on the theoretical tax charge of inflation with respect to non-monetary items of a non-temporary nature (primarily social assets and equity).

Differences between Russian statutory taxation regulations and IAS give rise to certain temporary differences between the carrying value of certain assets and liabilities for financial reporting purposes and for profits tax purposes. The tax effect of the movement on these temporary differences is recorded at the rate of 35.0% or 43.0% as applicable.

	31 December 2000	Change in tax rate	Differences recognition and reversals	31 December 1999
<b>Tax effects of taxable</b>				
<b>temporary differences:</b>				
Accounts receivable .....	(31,214)	(4,459)	(10,139)	(16,616)
Inventories .....	(4,148)	(593)	2,368	(5,923)
Investments .....	(940)	(134)	(431)	(374)
<b>Tax effects of deductible temporary</b>				
<b>differences:</b>				
Property, plant and equipment .....	148,613	21,231	237,134	(109,752)
Provision for doubtful accounts.....	4,190	599	1,291	2,299
Tax losses carryforward .....	-	-	(6,013)	6,013
Total net deferred tax asset (liability) .....	<u>116,501</u>	<u>16,644</u>	<u>224,210</u>	<u>(124,353)</u>

Deferred tax assets and liabilities arise mainly from differences in the taxable and financial reporting bases of property, plant and equipment. These differences are due to the fact that a significant proportion of the tax base is based upon independent appraisals while the financial reporting base is historical cost restated for changes in the general purchasing power of the RR (see Note 3).

## OAD GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### 16 PROFIT TAX (continued)

At 31 December 1999 the Group recognised a deferred tax liability of RR 124,353, mainly as the tax base was lower than the financial reporting base for property, plant and equipment. The difference was due to the fact that a significant portion of the tax basis is based upon independent appraisal which was last recognised at 1 January 1998. At 31 December 2000 the Group has recognised a deferred tax asset of RR 274,756; this asset arises due to the temporary differences resulting from a revaluation of the carrying value of property, plant and equipment recognised in the Russian financial statements at 1 January 2001. The result of the revaluation is allowable for profit tax purposes under Russian statutory taxation regulations, effectively increasing the taxable base of property, plant and equipment.

The temporary differences associated with undistributed earnings of subsidiaries amount to RR 43,577 and RR 17,469 at 31 December 2000 and 31 December 1999, respectively. A deferred tax liability on these temporary differences was not recognised because management controls the timing of the reversal of the temporary differences and believes that they will not reverse in the foreseeable future.

#### 17 PROVISIONS FOR LIABILITIES AND CHARGES

<i>Notes</i>	31 December	
	2000	1999
26 Provision for losses on derivatives .....	13,730	19,781
25 Provision for guarantees .....	10,352	19,470
Provision for environmental liabilities .....	5,311	5,090
Other .....	10,588	8,082
	39,981	52,423
Less: current portion of provisions for liabilities and charges .....	(10,352)	(8,035)
	<u>29,629</u>	<u>44,388</u>

#### 18 SHAREHOLDERS' EQUITY

##### Share capital

Share capital authorised, issued and paid in totaled RR 282,483 at 31 December 2000 and 31 December 1999 and consists of 23.7 billion ordinary shares, each with a nominal value of RR 5.

##### Treasury shares

At 31 December 2000 and 31 December 1999, subsidiaries of OAO Gazprom held 2,684 million and 2,614 million, respectively, of the ordinary shares of OAO Gazprom.

##### Retained earnings and other reserves

Included in retained earnings and other reserves are the effects of the cumulative restatement to the equivalent purchasing power of the Rouble at 31 December 2000, and cumulative translation differences of RR 17,891 and RR 17,146 arising on the retranslating of the net assets of foreign subsidiaries and associated undertakings at 31 December 2000 and 1999, respectively.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
31 December 2001, except as noted)

#### 18 SHAREHOLDERS' EQUITY (continued)

Other reserves include a statutory fund for social assets, created at the time of privatisation in accordance with Russian legislation. The Group is negotiating to return certain of these assets to governmental authorities, though this process is expected to be protracted. Social assets with a net book value of RR 6,440 and RR 5,371 have been transferred to governmental authorities during the years ended 31 December 2000 and 1999, respectively. These transactions have been recorded as a charge to other reserves.

The statutory accounting reports of the parent company, OAO Gazprom, are the basis for profit distribution and other appropriations. The basis of distribution is defined by legislation as the current year net profit, as calculated in accordance with RAR. For 2000, the statutory profit for the parent company was RR 57,676. However, the legislation and other statutory laws and regulations dealing with profit distribution are open to legal interpretation and accordingly management believes at present it would not be appropriate to disclose an amount for the distributable reserves in these consolidated financial statements.

In 2000, the Group accrued interim dividends in the amount of RR 0.07 per share. In addition to the interim dividend, in 2001 the Board of Directors recommended payment of a final dividend for the year ended 31 December 2000 in the amount of RR 0.23 per share. Because this decision of the Group management was reached after the balance sheet date, the amount of final dividend proposed is not recognised in the consolidated balance sheet. Dividends accrued and paid for the year 1999, amounted of RR 0.1 per share.

#### 19 SALES

	Year ended 31 December	
	2000	1999
Gas sales (including excise tax, net of VAT) to customers in:		
Russian Federation .....	102,477	108,958
Former Soviet Union (excluding Russian Federation) .....	69,503	76,445
Europe .....	473,298	303,509
Gross sales of gas .....	645,278	488,912
Excise tax .....	(105,894)	(85,112)
Net sales of gas .....	539,384	403,800
Sales of gas condensate and other oil products (net of sales taxes) .....	35,177	18,914
Gas transportation sales .....	31,757	24,836
Other revenues .....	35,202	27,980
	641,520	475,530

Commencing in 1999 the Group has been participating in the creation of regional companies involved in the distribution of gas in Russia. The interest of the Group in the majority of such companies amounts to less than 20% of their respective share capital.

Gas sales (net of VAT and excise tax) to customers in Russia include sales made to the regional companies of 141 billion cubic meters (bcm) and 43 bcm, or RR 41,354 and RR 11,933 for 2000 and 1999, respectively. Sales are made to the regional companies at prices marginally below regulated prices set for sales to final customers in Russia.

Transportation charges are provided at rates established by the Federal Energy Commission.

**OAO GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
31 December 2001, except as noted)

**19 SALES (continued)**

Gas transportation sales (net of VAT and excise tax) are primarily comprised of sales to companies of the Itera Group totaling RR 21,748 (71 bcm) and RR 15,366 (57 bcm) for the years ended 31 December 2000 and 1999, respectively. Trade receivables in respect of gas transportation services supplied to Itera amounted to RR 10,818 and RR 3,377 at 31 December 2000 and 1999, respectively. Itera Group is a producer and distributor of gas in the Russian Federation and the former Soviet Union.

**20 OPERATING EXPENSES**

	Year ended 31 December	
	2000	1999
External transit costs .....	92,753	91,880
Depreciation.....	83,555	74,924
Staff costs .....	51,632	46,922
Taxes other than on income .....	48,796	42,337
Provision for doubtful accounts and debts written off .....	33,782	18,796
Materials .....	37,446	25,979
Provision for impairment of assets under construction .....	29,697	24,385
Provision for impairment and write-off of other long-term assets .....	22,570	19,694
Disposal of property, plant and equipment .....	12,360	12,559
Gas purchases .....	10,543	2,228
Electricity .....	9,618	9,320
Provision for inventory obsolescence .....	7,146	2,596
Research and development .....	5,068	3,264
Provision for impairment of investments .....	2,340	10,183
	Year ended 31 December	
	2000	1999
Goods for resale .....	1,984	945
Provisions for guarantees and other charges .....	1,151	10,325
Tax penalties .....	309	505
Derivative gains .....	(3,365)	(4,771)
Other .....	38,420	50,190
	485,805	442,261

Operating expenses include RR 26,692 and RR 22,394 attributable to maintenance and repairs for the years ended 31 December 2000 and 1999, respectively.

Gas purchases and gas in storage (see Note 9) increased significantly in 2000, principally due to the purchase of 9 bcm of Turkmenistan gas from Itera LLC for RR 15,197.

## OA0 GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### 20 OPERATING EXPENSES (continued)

Taxes other than on income consist of:

	Year ended 31 December	
	2000	1999
Road users and housing fund taxes .....	25,148	22,838
Mineral use tax (royalty) .....	8,972	6,808
Property tax .....	5,163	4,834
Mineral restoration tax .....	4,507	3,538
Other taxes .....	5,006	4,319
	<u>48,795</u>	<u>42,337</u>

Taxes other than on income included in operating expenses are computed as follows:

- Road users and housing fund taxes – are charged on sales in Russia and vary by region and locality but generally in 2000 did not exceed 2.5% and 1.5%, respectively of sales in the respective region; from 1 January 2001 road use tax is 1 % of sales, housing tax is abolished.
- Mineral use tax is imposed at rates ranging from 6.0% to 16.0% of the sales value of gas and hydrocarbons produced. The actual rates of the tax are dictated in field licenses and are based on various factors;
- Property tax is imposed at a maximum rate of 2.0% on the average annual net book value of fixed assets, intangible assets and inventory. Legislation provides for the exclusion of trunk pipelines from the taxable base; and
- Mineral restoration tax is imposed at the rate of 10.0% of the sales value of gas and hydrocarbons sold by the production subsidiaries. Under current legislation, up to 100.0% of mineral restoration tax assessments may be offset by a sum equal to the value of certain exploration works performed and paid for by the Group. In 2000 and 1999, the Group recovered 39.9% and 34.0% of mineral restoration tax assessments, respectively.

All taxes and rates discussed above are calculated based on amounts recorded in accordance with Russian statutory accounting regulations.

#### 21 PROFIT (LOSS) PER SHARE

Basic profit (loss) per share has been calculated by dividing the net profit (loss) for the year by the weighted average number of shares outstanding during the year. Diluted profit (loss) per share is the same as basic profit (loss) per share.

There were 20.9 billion and 21.1 billion weighted average shares outstanding for the years ended 31 December 2000 and 1999, respectively.

Gazprom Finance B.V.	Nadymstroygazdobytcha	Ulianovskgazservice
Gaztorgpromstroy	Novourengoy GOC	Yugtransgaz
Gazflot	Noyabrskgazdobytcha	Yamalgazinvest
Gazfund	Orenburggazprom	Yamburggazdobytcha

All of these subsidiaries are incorporated in the Russian Federation, with the exception of Gazprom Finance B.V. and ZGG, which are incorporated in the Netherlands and Germany, respectively. Gazprom Finance B.V. was established in February 1999 for the purpose of obtaining financing for the Group outside Russia. ZGG acts as the holding company for the Group's interests in a number of gas distribution, storage and transportation companies operating in Central Europe. Other companies are mainly involved in production, transportation and sale of gas.

##### Other subsidiary undertakings

	Percent of share capital held at 31 December	
	2000	1999
Gazavtomatika .....	51	51
Gazenergосervice .....	51	51
Gazprombank .....	97	93

Change in minority interest as a result of (disposal) acquisition.....	(265)	1,795
Minority interest at the end of reporting period .....	10,355	8,819

#### 24 RELATED PARTIES

Related parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions.

##### Government

The Government of the Russian Federation, the principal shareholder of the Group, owns approximately 38.37% of the issued shares of the Group. Governmental economic and social policies affect the Group's financial position, results of operations and cash flows.

As a condition of privatisation in 1992, the Government imposed an obligation on the Group to provide an uninterrupted supply of gas to customers in the Russian Federation at government controlled prices.

##### Directors' remuneration

In 2000 the Company paid to members of the Board of Directors and Management Committee remuneration (salary and bonuses) for the total amount of approximately RR 66. The remuneration of members of the Board of Directors is subject to approval by the General shareholders meeting. Compensation paid to members of the Management Committee is determined by the terms of annual employment contracts.

##### Other

Included within other long-term assets are USD denominated receivables from EuRoPolGaz s.a. in the amount of RR 14,404 and RR 17,502 at 31 December 2000 and 1999, respectively. Included within associated undertakings (see Note 11) is an interest-bearing loan receivable from EuRoPolGaz s.a., in the amount of RR 27,855 and RR 27,228 at 31 December 2000 and 1999, respectively, issued by Gazprombank, a subsidiary of the Group.

Also included within associated undertakings (see Note 11) is an interest-bearing loan receivable from WINGAS GmbH, in the amount of RR 15,399 and RR 19,267 at 31 December 2000 and 1999, respectively. In determining the interest rates for related party financing, the Group follows a pricing policy which requires positive interest margins to be earned on all lendings to related parties.

Included within accounts receivable (see Note 8) are accounts receivable from Group associates (excluding EuRoPolGaz s.a.) in the amount of RR 20,189 and RR 22,099 as at 31 December 2000 and 31 December 1999 respectively.

During 2000 and 1999 the Group supplied gas to its associates in the amount of RR 43,353 and RR 27,691, respectively.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### 24 RELATED PARTIES (continued)

Gas is sold to associates, except for that sold to ZAO Gazsnabtransit of Moldova, on the basis of long-term contracts, at market prices based on world oil and gas prices. Gas prices per thousand cubic meters ("tcm") for such sales ranged from USD 64 to USD 133 in 2000 and from USD 50 to USD 84 in 1999. Gas is sold to ZAO Gazsnabtransit based on annual contracts with fixed prices. Prices of gas per tcm sold to Moldova amounted to USD 80 and USD 60 in 2000 and 1999, respectively.

Amounts due from ZAO Gazsnabtransit at the reporting date are presented net of a bad debt provision of RR 14,100.

In addition, the Group purchased gas transportation services from certain of the associated undertakings, principally EuRoPolGaz s.a., which amounted to RR 7,293 and RR 574 for 2000 and 1999, respectively. The cost of these services was determined based on prices of gas sold to these companies.

In the normal course of business, the Group enters into transactions with OAO Stroytransgaz for the construction of pipelines in the Russian Federation on the basis of the results of tenders. During 2000 and 1999 certain representatives of the Group Board of Directors and members of their families owned significant shareholdings in OAO Stroytransgaz.

OAO Stroytransgaz rendered constructions services for the Group in the amounts of RR 28,141 and RR 23,767 for the years ended 31 December 2000 and 31 December 1999, respectively. As at 31 December 2000 and 31 December 1999, the Group had advances and receivables due from OAO Stroytransgaz in the amounts of RR 2,015 and RR 822, respectively. As at 31 December 2000 and 31 December 1999, the Group had accounts payable to OAO Stroytransgaz in respect of construction of RR 10,826 and RR 5,877 respectively. As at 31 December 2000 and 31 December 1999, Gazprombank, the Group's principal banking subsidiary, had loans receivable from OAO Stroytransgaz of RR 1,219 and RR 229, respectively. Included within other long-term assets is a receivable due from OAO Stroytransgaz in connection with finance arrangements for construction for the Group undertaken by OAO Stroytransgaz in the amounts of RR 6,944 and RR 10,210 at 31 December 2000 and 1999, respectively.

During 2000 and 1999 certain members of the families of certain members of the Board of Directors of the Company owned significant interests in OOO Interprokom.

OOO Interprokom acts as an agent for the Group in the acquisition of equipment and is remunerated for those services based on a fixed commission percentage. OOO Interprokom acted as an agent in the Group's acquisition of RR 5,482 and RR 4,242 of equipment in the years ended 31 December 2000 and 1999, respectively. As at 31 December 2000, the Group had advances and receivables due from OOO Interprokom in the amount of RR 2,910. As at 31 December 1999 the Group had payables to OOO Interprokom in the amount of RR 3,107. Commission paid to OOO Interprokom amounted to RR 72 and RR 27 for the years ended 31 December 2000 and 1999, respectively.

Gazprombank, the Group's principal banking subsidiary, had outstanding import letters of credit issued on behalf of OOO Interprokom and sub-contractors of OOO Interprokom in the amount of RR 9,630 and RR 5,555 at 31 December 2000 and 1999, respectively. These import letters of credit are issued to third party suppliers in connection with the purchase of equipment by OOO Interprokom on behalf of the Group.

During 2000, a member of the Council of Gazprombank acquired from that bank an 8.5% interest in AEB for RR 254. AEB is an associated undertaking of the Group at 31 December 2000 (see Note 11). A loss of RR 208 was recognized under IAS on the disposal. This loss was the result of a decrease in the Group's share in the net assets of AEB and translation differences recognised on the disposed shares.

## ОАО ГАЗПРОМ

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### 25 COMMITMENTS AND CONTINGENT LIABILITIES

##### Operating environment

The operations and earnings of the Group continue, from time to time and in varying degrees, to be affected by political, legislative, fiscal and regulatory developments, including those related to environmental protection, in the Russian Federation. Due to the capital-intensive nature of the industry, the Group is also subject to physical risks of various kinds. The nature and frequency of these developments and events associated with these risks as well as their effect on future operations and earnings, are not predictable.

##### Legal proceedings

At 31 December 2000, RR 6,416 of assets of one of the Group's banking subsidiaries were the subject of a legal restraint in connection with a claim arising from derivative transactions with a foreign counterparty. At 31 December 2000, the Group had provided RR 4,002 against the claim (see Note 17).

The Group is a party to certain legal proceedings arising in the ordinary course of business. Additionally, the Group is subject to various environmental laws regarding handling, storage, and disposal of certain products and is subject to regulation by various governmental authorities. In the opinion of management, there are no current legal proceedings or other claims outstanding which could have a material adverse effect on the result of operations or financial position of the Group.

##### Taxation

Tax legislation in the Russian Federation is subject to varying interpretations and frequent changes. Further, the interpretation of tax legislation by tax authorities as applied to the transactions and activity of the Group may not coincide with that of management. As a result, transactions may be challenged by tax authorities and the Group may be assessed additional taxes, penalties and interest, which can be significant. The Group's tax records remain open to review by the tax and customs authorities with respect to tax liabilities for three years.

##### Group changes

The Group is continuing to undergo significant restructuring and reform initiatives and the future direction and effects of such reforms are the subject of political considerations. Potential reforms in tariff setting policies, settlements of outstanding debts by governmental entities, and other government initiatives could each have a significant, but undeterminable, effect on enterprises operating in the Group.

##### Environmental matters

The Group has operated in the gas exploration, extraction and transportation industry in the Russian Federation for many years. The normal activities of the Group have probably resulted in damage to the environment. The enforcement of environmental regulation in the Russian Federation is evolving and the enforcement posture of government authorities is continually being reconsidered. The Group periodically evaluates its obligations under environmental regulations. As obligations are determined, they are recognised immediately. Expenditures that extend the life of the related property or mitigate or prevent future environmental contamination are capitalised. Potential liabilities which might arise as a result of stricter enforcement of existing regulations, civil litigation or changes in legislation or regulation cannot be estimated, but could be material. In the current enforcement climate, under existing legislation, management believes that there are no significant liabilities for environmental damage, other than amounts that have been accrued in the consolidated financial statements.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
31 December 2001, except as noted)

#### 25 COMMITMENTS AND CONTINGENT LIABILITIES (continued)

##### Social commitments

The Group significantly contributes to the maintenance and upkeep of the local infrastructure and the welfare of its employees in the areas of its production, including contributions toward the construction, development and maintenance of housing, hospitals, transport services, recreation and other social needs in the geographical areas in which it operates.

##### Financial guarantees

The Group had outstanding issued guarantees to third parties in the amount of RR 59,351 and RR 56,755 (including guarantees denominated in USD of USD 1,659 million and USD 1,700 million) at 31 December 2000 and 1999, respectively.

Management believes that the Group will be required to settle certain of the obligations resulting from the guarantees. A provision of RR 10,352 and RR 19,470 has been recorded within provisions for liabilities and charges in respect of the guarantees issued at 31 December 2000 and 1999, respectively. It is anticipated that the majority of the provision will be used during 2001.

<i>Notes</i>	31 December	
	2000	1999
<b>Guarantees issued on behalf of :</b>		
Interconnector (UK) Limited .....	33,460	38,539
11 ZAO Media-Most .....	8,749	18,232

	48,999	46,285

The guarantee issued on behalf of Interconnector (UK) Limited, in which the Group has a 10 % interest, was provided to a third party financing company in connection with lease obligations of Interconnector (UK) Limited.

##### Capital commitments

In the normal course of business, the Group has entered into contracts for the purchase of property, plant and equipment. The Board has approved a capital expenditure budget for 2001 of RR 115,362, including RR 51,292 in respect of capital expenditures related to the Yamal project (that includes, in particular, construction of the Yamal-Europe pipeline).

##### Supply commitments

The Group has entered into long-term supply contracts for periods ranging from 5 to 20 years with various companies operating in Europe. The volumes and prices in these contracts are subject to change due to various contractually defined factors. At 31 December 2000, no loss is expected to result from these long-term commitments.

## **OAO GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)**

#### **26 FINANCIAL INSTRUMENTS**

##### **Financial risk management**

The Group exports gas to European countries and attracts substantial amount of foreign currency denominated long-term borrowings and is thus exposed to foreign exchange risk. Foreign currency denominated assets (see Note 8) and liabilities (see Note 15) together with long-term sales commitments to European countries (see Note 25) give rise to foreign exchange exposure.

The Group is exposed to interest rate risk through market value fluctuations of interest-bearing long-term borrowings (see Note 15).

The Group does not have formal hedging arrangements to mitigate interest rate risks or foreign exchange risks of the Group's operations. However, on a long-term perspective management believes that the Group is secured from financial risks; foreign currency denominated sales are secured by long-term contracts to supply gas to European countries and the revenue from such contracts is used to cover repayment of foreign currency denominated borrowings.

##### **Fair values**

The fair value of financial instruments is determined with reference to various market information and other valuation methods as considered appropriate. At 31 December 2000 and 1999, the fair values of financial instruments other than long-term investments, trade receivables and trade payables are held by the Group did not materially differ from their carrying value. The historical cost carrying amount of receivables and payables subject to normal trade credit terms approximates their fair value. Management does not believe it is practicable to estimate the fair value of long-term investments, other trade receivables and trade payables. These financial instruments are not traded at financial market and an objective estimate of fair value is not, therefore, available. Information on the fair values of off-balance sheet derivative instruments is included below.

##### **Credit risks**

Financial instruments, which potentially subject the Group to concentrations of credit risk primarily consist of accounts receivables. Credit risks related to accounts receivable are systematically monitored and are considered when bad debt provisions are established. A significant portion of the Group's accounts receivable are from local gas distribution companies and energy companies. Although collection of these receivables could be influenced by governmental and economic factors affecting these industries, management believes there is no significant risk of losses to the Group, other than to the extent to which provision for doubtful accounts has already been made.

Cash is placed in financial institutions which are considered at time of deposit to have minimal risk of default.

##### **Off-balance sheet derivative instruments**

At 31 December 2000, the Group had outstanding contracts with banks operating in the Russian Federation and foreign banks, whereby it had agreed to buy or sell Roubles in exchange for another currency at an exchange rate agreed at the date of the contract. Management believes that it is possible that contracts between banks operating in the Russian Federation may become void or other remedial measures may eventually become available. In the event the outstanding contracts are declared void or settled at an amount different than the amount stipulated in the contract, the losses and gains would be adjusted and the difference would be recognised in the consolidated statement of operations in the period that the settlement occurs.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at  
31 December 2001, except as noted)

#### 26 FINANCIAL INSTRUMENTS (continued)

Foreign exchange off-balance sheet financial instruments are generally traded in an over-the-counter market with professional market counterparties on standardised contractual terms and conditions. At 31 December 2000 the Group had outstanding contracts to purchase gold at the market price at the date of maturity and to purchase securities under contractual prices. The Group expects to settle these deals in the normal course of business. There were no outstanding contracts for precious metals or securities at 31 December 1999.

The nominal amounts for off-balance sheet financial instruments are not reflected in the consolidated balance sheet.

The following table provides an analysis of the principal or agreed amounts of contracts outstanding at the year-end and the associated losses or gains arising thereon. The table includes both the contracts for which the date of maturity has past due and no settlements had been completed as at 31 December 2000, and the contracts with maturity dates subsequent to 31 December 2000. The amounts included in the table are presented on a net basis after gross positions were grouped and netted off by counterparty.

The economic conditions in the Russian Federation have had a significant adverse effect on the ability of many banks operating principally in the Russian Federation to fulfil their contractual obligations. Accordingly, management has not recorded the receivable and above noted gains based on the evaluation of the credit worthiness of the counterparties.

#### 27 POST BALANCE SHEET EVENTS

In January 2001 OAO Gazprom purchased an interest of 51% in the voting shares of AK Sibur. AK Sibur is a leading Russian company selling oil, gas and chemical products. The consideration of RR 2,204 million was settled in a combination of cash, promissory notes of a subsidiary of the Group and shares in certain Group entities. The process of determining the fair values of assets and liabilities acquired has not yet been finalised and therefore, it is not practical to disclose this information. AK Sibur will be consolidated with effect from 1 January 2001.

## **OAO GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)**

#### **27 POST BALANCE SHEET EVENTS (continued)**

In January 2001 the Board of Directors of OAO Gazprom initiated an investigation into the financial, property, commercial and operational relationships between OAO Gazprom and the Itera 27 Group of companies. The accompanying notes to the consolidated financial reports do not reflect any results of this investigation, which is ongoing.

During 2000 OAO Gazprom signed agreements with a consortium of West European banks and with Japanese banks on obtaining loans to finance OAO Gazprom's interest in the Blue Stream project. The first tranche under these agreements of USD 117 was received in the second quarter of 2001. In addition, during the first quarter of 2001 a loan in the amount of Euro 250 million was provided by a consortium of West European banks.

#### **28 ADJUSTMENTS FOR HYPERINFLATION**

In accordance with IAS 29 the consolidated financial statements as of and for the year ended 31 December 2000 was originally prepared in terms of the measuring unit current at the balance sheet date. The restatement was calculated from the conversion factors derived from the Russian Federation Consumer Price Index, published by the Russian State Committee on Statistics ("Goscomstat"), and from indices obtained from other published sources for years prior to 1992.

The significant guidelines followed in restating the consolidated financial statements are:

- all amounts are stated in terms of the measuring unit current at 31 December 2000;
- monetary assets and liabilities are not restated because they are already expressed in terms of the monetary unit current at 31 December 2000;
- non-monetary assets and liabilities (items which are not expressed in terms of the monetary unit current at 31 December 2000) and shareholders' equity, including the share capital, are restated by applying the relevant conversion factors;
- all items in the consolidated statements of operations and of cash flows are restated by applying appropriate conversion factors;
- the effect of inflation on the Group's net monetary position is included in the consolidated statement of operations as a net monetary gain or loss; and
- comparative amounts for 1999 are restated using the conversion factors 1.20 in order to state them in terms of the measuring unit current at 31 December 2000.

All amounts originally stated in the consolidated financial statements in terms of the measuring unit current at the balance sheet date have been subsequently restated using the conversion factor of 1.19 in order to state them in terms of the monetary unit current at 31 December 2001. The restatement makes the consolidated financial statements more meaningful when compared to the consolidated financial statements for the year ended 31 December 2001.

## OA0 GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble at 31 December 2001, except as noted)

#### 28 ADJUSTMENTS FOR HYPERINFLATION (continued)

The indices used to restate the consolidated financial statements, based on 1988 prices (1988 = 100) for the five years ended 31 December 2001, and the respective conversion factors used were:

<u>Year</u>	<u>Index</u>	<u>Conversion Factor</u>
1997	659,403	3.60
1998	1,216,400	1.95
1999	1,661,481	1.43
2000	1,995,937	1.19
2001	2,371,572	1.00

The consolidated statement of operations includes net monetary gains of RR 48,588 and RR 73,143 for the years ended 31 December 2000 and 1999, respectively, because on average the Group had net monetary liabilities in reporting years.

**ОАО ГАЗПРОМ**  
**IAS CONSOLIDATED FINANCIAL STATEMENTS**  
**31 DECEMBER 2001**

## **AUDITORS' REPORT**

To the Shareholders of OAO Gazprom

1. We have audited the accompanying consolidated balance sheet of OAO Gazprom and its subsidiaries (the "Group") as of 31 December 2001 and the related consolidated statements of operations, of cash flows and of changes in shareholders' equity for the year then ended. These financial statements are the responsibility of the Group's management. Our responsibility is to express an opinion on the consolidated financial statements based on our audit.
2. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.
3. In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as of 31 December 2001, and the results of its operations and its cash flows for the year then ended in accordance with International Accounting Standards.
4. Without qualifying our opinion, we draw your attention to Note 26 to the consolidated financial statements. The Government of the Russian Federation is the principal shareholder of the Group and governmental economic and social policies affect the Group's financial position, results of operations and cash flows.

## **OAO GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

#### **1 NATURE OF OPERATIONS**

RAO Gazprom was established as a Russian joint stock company by Presidential Decree No. 1333 dated 5 November 1992. The Annual General Meeting of shareholders, held on 26 June 1998, approved a recommendation from the Board of Directors on revising the name of the Company in order to comply with the federal law on joint stock companies. Consequently, the Company became the open joint stock company Gazprom or OAO Gazprom.

OAO Gazprom and its subsidiaries (the "Group") operate one of the largest gas pipeline systems in the world and are responsible for substantially all gas production and high pressure gas transportation in the Russian Federation. The Group is also a major exporter of gas to European countries.

The Group is directly involved in the following principal activities:

- Production – exploration and production of gas and other hydrocarbons;
- Refining – processing of gas condensate and other hydrocarbons, and sales of other hydrocarbon products;
- Transportation – transportation of gas; and
- Distribution – domestic and export sale of gas.

The weighted average number of employees during 2001 and 2000 was 300 thousand and 306 thousand respectively.

#### **2 ECONOMIC ENVIRONMENT IN THE RUSSIAN FEDERATION**

The economy of the Russian Federation continues to display characteristics of an emerging market. These characteristics include, but are not limited to, the existence of:

- a currency that is not freely convertible outside of the country;
- extensive currency controls;
- a low level of liquidity in the public and private debt and equity markets; and
- high inflation.

Transactions on the Russian stock exchange market are influenced by underdeveloped infrastructure, especially registration and settlement systems which are in the process of formation as well as regulation basis.

The prospects for future economic stability in the Russian Federation are largely dependent upon the effectiveness of economic measures undertaken by the government, together with legal, regulatory, and political developments.

#### **3 BASIS OF PRESENTATION**

These financial statements are prepared in accordance with International Accounting Standards ("IAS"). The Group subsidiaries and associated undertakings maintain their statutory financial statements in accordance with the Regulation on Accounting and Reporting of the Russian Federation ("RAR") or the accounting regulations of the country in which the particular Group company is resident. The financial statements of the Group's subsidiaries and associated undertakings resident in the Russian Federation, which account for substantially all the assets and liabilities of the Group, are based

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

on their statutory records, which are maintained under the historical cost convention with adjustments and reclassifications recorded in the financial statements for the purpose of fair presentation in accordance with IAS. Similar adjustments are recorded in the financial statements in respect of Group companies not resident in the Russian Federation.

The preparation of consolidated financial statements in conformity with IAS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

The adjustments and reclassifications made to the statutory accounts for the purpose of IAS reporting include the restatement for changes in the general purchasing power of the Russian Rouble ("RR") in accordance with IAS 29, "Financial Reporting in Hyperinflationary Economies" ("IAS 29"). IAS 29 requires that financial statements prepared in the currency of a hyperinflationary economy be stated in terms of the measuring unit current at the balance sheet date. The restatement was calculated from the conversion factors derived from the Russian Federation Consumer Price Index, published by the Russian State Committee on Statistics ("Goscomstat"), and from indices obtained from other published sources for years prior to 1992.

The indices used to restate the consolidated financial statements, based on 1988 prices (1988=100) for the five years 31 December 2001, and the respective conversion factors used are:

<u>Year</u>	<u>Index</u>	<u>Conversion Factor</u>
1997.....	659,403	3.60
1998.....	1,216,400	1.95
1999.....	1,661,481	1.43
2000.....	1,995,937	1.19
2001.....	2,371,572	1.00

The significant guidelines followed in restating the consolidated financial statements are:

- all amounts are stated in terms of the measuring unit current as of 31 December 2001;
- monetary assets and liabilities are not restated because they are already expressed in terms of the monetary unit current as of 31 December 2001;
- non-monetary assets and liabilities (items which are not expressed in terms of the monetary unit current as of 31 December 2001) and shareholders' equity, including the share capital, are restated by applying the relevant conversion factors;
- all items in the consolidated statements of operations and of cash flows are restated by applying appropriate conversion factors;
- the effect of inflation on the Group's net monetary position is included in the consolidated statement of operations as a net monetary gain or loss; and
- comparative amounts for 2000 are restated using the conversion factor 1.19 in order to state them in terms of the monetary unit current as of 31 December 2001.

The consolidated statement of operations includes net monetary gains of RR 29,113 and RR 52,406 for the periods ended 31 December 2001 and 2000, respectively, because on average the Group had net monetary liabilities in both years.

## **OAD GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

The US dollar to RR exchange rates were 30.14 and 28.16 as of 31 December 2001 and 31 December 2000, respectively. The Euro to RR exchange rates were 26.49 and 26.14 as of 31 December 2001 and 31 December 2000, respectively.

#### **Reclassifications**

Certain reclassifications have been made to prior year balances to conform to the current year presentation.

#### **4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The principal accounting policies followed by the Group are set out below.

##### **Consolidation**

Significant subsidiary companies in which the Group, directly or indirectly, has an interest of more than 50% of the voting rights or is otherwise able to exercise control over the operations have been consolidated.

Subsidiaries are consolidated from the date on which effective control is transferred and are no longer consolidated from the date from which control ceases. All intercompany transactions, balances and unrealized surpluses and deficits on transactions between group companies have been eliminated. Separate disclosure is made of minority interests.

Acquisitions of subsidiaries are recorded in accordance with the purchase accounting method. The consolidated financial statements of the Group reflect the results of operations of any subsidiaries acquired from the date control is established.

Assets and liabilities of subsidiaries acquired are restated to comply with uniform Group accounting policies. Any excess of the cost of an acquisition over the fair value of the Group's share of the identifiable net assets of the acquired subsidiary/associated undertaking at the date of acquisition is recorded as goodwill. Goodwill on acquisition of subsidiary undertakings is included in other long-term assets. Goodwill on acquisition of associated undertakings is included in investments in associated undertakings. Goodwill is amortised using the straight-line method over the shorter of its estimated useful life or 20 years.

##### **Associated undertakings**

Associated undertakings are undertakings over which the Group has significant influence, but which it does not control. Associated undertakings are accounted for using the equity method. Provisions are recorded for any impairment in value.

The equity method involves recognising in the statement of operations the Group's share of the associated undertakings' profit or loss for the year, less dividends received. The Group's interest in each associate is carried at the balance sheet at an amount that reflects cost, including the goodwill at acquisition, plus share of profit and losses less dividends received less amortisation of goodwill. Equity accounting is discontinued when the carrying amount of the investment in an associated undertaking reaches zero, unless the Group has incurred obligations or guaranteed obligations in respect of the associated undertaking.

## **OAO GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

#### **Joint ventures**

Joint ventures are contractual agreements whereby two or more parties undertake economic activity, which is subject to joint control. Jointly controlled entities are accounted for using the equity method.

#### **Mutual cancellation and barter transactions**

A significant portion of accounts receivable arising from sales are settled either through a chain of non-cash transactions (mutual cancellations), sometimes involving several enterprises, or, to a lesser extent, through direct settlement by goods from the final customer (barter). A portion of operations, including capital expenditures, is transacted by mutual cancellations or barter. Such transactions are excluded from investing and financing activities in the consolidated statement of cash flows. Net cash received from operating activities in the consolidated statement of cash flow also represents actual cash flow transactions. However, individual items within operating activities are stated inclusive of both cash and non-cash transactions due to the significance of non-cash transactions in the form of barter and mutual-cancellation offsets. Management believes the costs which would be required to be expended to determine such information would outweigh the benefits of having such information.

Receivables and payables that expect to be settled by mutual settlements, barter or other non-cash settlements, are recognized based on management's estimate of the fair value to be received or given up. Approximately, 18% and 22% of accounts receivable from gas sales settled during the years ended 31 December 2001 and 2000, respectively, were settled in this manner.

#### **Deferred tax**

Deferred tax assets and liabilities are calculated in respect of temporary differences using a balance sheet liability method for financial reporting and accounting for deferred income taxes. Deferred tax is recorded for all temporary differences arising between the tax basis of assets and liabilities and their carrying values for financial reporting purposes. A deferred tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised. Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date.

#### **Foreign currencies**

The balance sheets of foreign subsidiaries and associated undertakings and the monetary assets and liabilities which are held by the Group and denominated in foreign currencies at the year end are translated into Roubles at the exchange rates prevailing at the year end. Exchange differences arising on the retranslation of the net assets of foreign subsidiaries and associated undertakings are recognised as translation differences and included in shareholders' equity. Statements of operations of foreign entities are translated at average exchange rates for the year.

Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of operations.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

#### Property, plant and equipment

Property, plant and equipment are carried at historical cost after deduction of accumulated depreciation restated to the equivalent purchasing power of the RR as of 31 December 2001 on the basis of the indices included in Note 3.

Gas and oil exploration and production activities are accounted for in accordance with the successful efforts method. Under the successful efforts method, costs of successful development and exploratory wells are capitalised. Costs of unsuccessful exploratory wells are expensed upon determination that the well does not justify commercial development. Other exploration costs are expensed as incurred.

Major renewals and improvements are capitalised. Maintenance, repairs and minor renewals are expensed as incurred. Minor renewals include all expenditures that do not result in a technical enhancement of the asset beyond its original capability. Gains and losses arising from the disposal of property, plant and equipment are included in the consolidated statement of operations as incurred.

Interest costs on borrowings to finance the construction of property, plant and equipment are capitalised as part of the cost of the asset during the period of time that is required to complete and prepare the asset for its intended use.

The return to a governmental authority of social assets (such as rest houses, housing, schools and medical facilities) vested to the Group at privatisation are recorded only upon both the transfer of title to, and termination of operating responsibility for, the social assets. These disposals are deemed to be shareholder transactions because they represent a return of assets for the benefit of governmental authorities, as contemplated in the original privatisation arrangements. Consequently, such disposals are accounted for as a charge to other reserves.

Depreciation is calculated on a straight-line basis. Depreciation on wells and production equipment has been calculated on cost restated to the equivalent purchasing power of the Rouble as of 31 December 2001, using the straight line method rather than, as is the more generally accepted international industry practice, on the unit-of-production method as the difference is not material. Assets under construction are not depreciated.

As the Group operates in the gas exploration, extraction and transportation industry in the Russian Federation, its normal activity probably results in damage to the environment. The Group annually evaluates its contingent obligations under environmental regulations. Environmental provisions are determined as the fair value of costs for restoration of wells and plants. As obligations are determined, they are recognised immediately. Expenditures that extend the life of the related property or mitigate or prevent future environmental contamination are capitalised.

The estimated useful lives of the Group's assets are as follows:

	<u>Years</u>
Pipelines.....	33
Wells and production equipment .....	12-40
Machinery and equipment .....	10-18
Buildings.....	30-40
Roads.....	20-40
Social assets .....	10-40

## **OA O GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

#### **Investments**

As of 1 January 2001 the Group adopted IAS 39 and classified its investments into the following categories: trading, held-to-maturity and available-for-sale.

Investments that are acquired principally for the purpose of generating a profit from short-term fluctuations in price are classified as trading investments and included in current assets. Investments with fixed maturity that the management has the intent and ability to hold to maturity are classified as held-to-maturity and are included in non-current assets; during the period the Group did not hold any investments in this category. Investments intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in fair value, are classified as available-for-sale. These are included in non-current assets unless management has the expressed intention of holding the investments for less than 12 months from the balance sheet date or unless they will need to be sold to raise operating capital, in which case they are included in current assets. Management determines the appropriate classification of its investments at the time of the purchase and re-evaluates such designation on a regular basis.

All purchases and sales of investments are recognized on the trade date, which is the date that the Group commits to purchase or sell the asset. Cost of purchase includes transaction costs. Trading and available-for-sale investments are subsequently re-measured to fair value. The most part of available-for-sale investments comprise principally non-marketable equity securities, which are not publicly traded or listed on the Russian stock exchange and, due to the nature of the local financial markets, it is not possible to obtain current market value for these investments. For these investments, fair value is estimated by reference to the discounted operating cash flows of the investee. For other investments traded in active markets, fair value is determined by reference the current market value at the close of business on 31 December 2001.

Realized and unrealized gains and losses arising from changes in the fair value of trading and available-for-sale investments are included in the statement of operations in the period in which they arise.

Prior to the adoption of IAS 39 the Group had valued its marketable equity securities at the lower of cost restated to the equivalent purchasing power of the Rouble at the reporting date on the basis of indices included in Note 3, or market value. Long-term investments were reflected at cost restated to the equivalent purchasing power at the reporting date. Provision for impairment was only made where, in the opinion of the Group's management, there was a diminution in value, which was other than temporary. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount was charged or credited to the consolidated statement of operations.

In the cash flow statement, purchases and sales of trading investments are presented within the section on operating activities as part of changes in working capital.

In the statement of operations, changes in fair values of trading investments are recorded in other operating expenses.

#### **Cash and cash equivalents**

Cash comprises cash on hand and demand deposits. Cash equivalents comprise short-term investments which are readily converted to cash and have an original maturity of three months or less.

## **ОАО GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

#### **Treasury shares**

Treasury shares are recorded at cost, using the specific identification method. The gains (losses) arising from treasury share transactions are recognised as a movement in shareholders' equity, net of associated costs including taxation.

#### **Dividends**

Dividends are recognised as a liability and deducted from equity in the period in which they are declared.

#### **Accounts receivable**

Trade receivables are carried at original invoice amount less provision made for impairment of these receivables. Such provision for impairment of trade receivables is established if there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the carrying amount and the recoverable amount, being the present value of expected cash flows, discounted at the market rate of interest for similar borrowers at the origination of receivables.

#### **Inventories**

Inventories are valued at the lower of net realisable value or weighted average cost restated to the equivalent purchasing power of the RR as of 31 December 2001 on the basis of indices included in Note 3.

#### **Borrowings**

Borrowings are recognised initially at the fair value of the proceeds received (which is determined using the prevailing market rate of interest for a similar instrument, if significantly different from the transaction price), net of transaction costs incurred. In subsequent periods, borrowings are recognised at amortised cost, using the effective yield method.

#### **Provisions**

Provisions, including provisions for environmental liabilities, are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

#### **Impairment of assets**

At each balance sheet date management assess whether there is any indication that the recoverable value of the Group's assets has declined below the carrying value. When such a decline is identified, the carrying amount is reduced to the recoverable amount. The amount of the reduction is recorded in the consolidated statement of operations in the period in which the reduction is identified.

#### **Pension and other post-retirement benefits**

The Group operates a defined benefit plan. Pension costs are assessed using the projected unit credit method: the cost of providing pensions is charged to operating expenses within the consolidated statement of operations so as to spread the regular cost over the service lives of employees. The pension obligation is measured at the present value of the estimated future cash outflows using interest

## **OAD GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

rates of government securities, which have the terms to maturity approximating the terms of the related liability. Actuarial gains and losses are recognised over the average remaining service life of employees.

The Group owns and controls NPF Gazfund, which administers the Group's defined benefit plan. Members of Group's management are trustees of NPF Gazfund. The assets of NPF Gazfund primarily consists of shares of OAO Gazprom. The parent/subsidiary relationship between the Group and NPF Gazfund means that the assets held by NPF Gazfund do not meet the definition of plan assets and are, therefore, recognized in the consolidated balance sheet as treasury shares or other investments, as appropriate.

Mandatory contributions to the State pension plan, which is defined as a contribution plan, are expensed when incurred and are included within staff costs in operating expenses. The cost of providing other discretionary post-retirement obligations (including constructive) is charged to the consolidated statement of operations so as to spread the regular cost over the service lives of employees.

#### **Revenue recognition**

Sales are recognised for financial reporting purposes when products are delivered to customers and title passes and are stated net of VAT, excise taxes and other similar compulsory payments.

#### **Interest**

Interest income and expense are recognised in the statement of operations for all interest bearing instruments on an accrual basis using the effective yield method. Interest income includes coupons earned on fixed income investment and trading securities and accrued discount and premium on treasury bills and other discounted instruments. When loans become doubtful of collection, they are written down to their recoverable amounts and interest income is thereafter recognised based on the rate of interest that was used to discount the future cash flows for the purpose of measuring the recoverable amount.

#### **Research and development**

Research and development expenditure is recognised as an expense as incurred. Costs incurred on development projects are recognised as intangible assets to the extent that such expenditure is expected to generate future economic benefits. However, development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Development costs that have been capitalised are amortised from the commencement of the commercial production of the product on a straight-line basis over the period of its expected benefit.

#### **Financial instruments**

The Group adopted IAS 39 "Financial Instruments: Recognition and Measurement" as of 1 January 2001. The financial effects of adopting IAS 39 are disclosed in Note 18.

Financial instruments carried on the balance sheet include cash and bank balances, investments, receivables, accounts payable and borrowings. The particular recognition methods adopted are disclosed in the individual policy statements associated with each item.

#### **Financial risk factors**

The Group's activities expose it to a variety of financial risks, including the effects of: changes in debt and equity market prices, foreign currency exchange rates and interest rates. The Group's overall

## **OAO GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

risk management focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the financial performance of the Group.

- **Foreign exchange risk**

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures primarily with respect to the US dollar and the Euro.

In an operational sense, the Group's exposure to foreign exchange risk is reduced by the existence of both costs (principally transit expenses) and income denominated in foreign currency. Similarly, the Group has significant receivables denominated in foreign currency, which in effect act as a partial economic hedge against similarly denominated liabilities, principally long-term borrowings.

The Group has investments in foreign entities (see Notes 11 and 25), whose net assets are exposed to currency translation risk. Currency exposure of the net assets of the subsidiaries is reduced primarily through borrowings denominated in Euro. Exchange differences on the euro loans are recognized in the statement of operations.

- **Interest rate risk**

The Group borrows long-term debt principally at variable (LIBOR referenced) rates. Currently the Group does not operate a formal management programme focusing on the unpredictability of financial markets or seeking to minimize potential adverse effects on the financial performance of the Group. The Group has no significant interest-bearing assets.

- **Credit risk**

Financial instruments, which potentially subject the Group to concentrations of credit risk primarily consist of accounts receivable. Credit risks related to accounts receivable are systematically monitored and are considered when impairment provisions are created. A significant portion of the Group's accounts receivable are from local gas distribution companies and energy companies. Although collection of these receivables could be influenced by governmental and other economic factors affecting these industries, management believes there is no significant risk of losses to the Group, other than to the extent to which provision for impairment of receivables has already been made.

The Group does not have formal hedging arrangements to mitigate interest rate risks or foreign exchange risks of the Group's operations.

#### **Accounting for derivative financial instruments**

As part of trading activities, primarily by the banking subsidiaries, the Group is also party to derivative financial instruments including forward and options contracts in foreign exchange and precious metals. The Group's normal policy is to measure these instruments at fair value using contractual rates, with resultant gains or losses being reported within the consolidated statement of operations.

The Group does not apply hedge accounting in preparation of its financial statements.

#### **Fair value estimation**

The fair value of publicly traded derivatives and trading and available-for-sale securities is based on quoted market prices at the balance sheet date.

## ОАО ГАЗПРОМ

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

Quoted market prices or dealer quotes for the specific or similar instruments are used for fair value estimation of long-term debt. Other techniques, such as estimated discounted value of future cash flows, are used to determine fair value for the remaining financial instruments. The fair value of unquoted financial instruments is estimated from the future cash flows expected from both the periodic income generated by the investments and from their disposal, discounted by a rate that reflects the risk inherent in the investment.

The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate available to the Group for similar financial instruments.

The fair value of accounts receivable for disclosure purposes is estimated by discounting the value of expected cash flows at the market rate of interest for similar borrowers at the balance sheet date.

#### 5 SEGMENT INFORMATION

Management does not separately identify segments within the Group as it operates as a vertically integrated business with substantially all external sales generated by the gas distribution business. However, following the practice suggested by IAS 14, "Segment Reporting", Revised 1997 ("IAS 14") for vertically integrated businesses, information can be analysed based on the following business segments:

- Production – exploration and production of gas and other hydrocarbons;
- Refining – processing of gas condensate and other hydrocarbons, and sales of other hydrocarbon products;
- Transportation – transportation of gas;
- Distribution – domestic and export sale of gas; and
- Other – other activities, including banking.

Unallocated operating expenses .....						(26,176)
<b>Operating profit .....</b>						<b>158,262</b>

The inter-segment revenues mainly consist of:

- Production – sale of gas to the Distribution segment and sale of hydrocarbons to the Refining segment;
- Refining – sale of refined products to other segments;
- Transport – rendering transportation services to the Distribution segment; and
- Distribution – sale of gas to the Transport segment for operational needs.

Internal transfer prices are established by the management of the Group with the objective of providing for the specific medium and long-term funding requirements of the individual segments. Provisions for guarantees (see Note 27) have been included within unallocated expenses. Also included within unallocated expenses are corporate expenses, including provision for the impairment of other investments.

Segment assets consist primarily of property, plant and equipment and current assets. Unallocated assets include other investments and deferred tax assets. Segment liabilities comprise operating liabilities, excluding items such as taxes payable, borrowings, and deferred tax liabilities.

Capital expenditures comprise additions to property, plant and equipment. Charges for impairment and provisions relate only to those charges made against allocated assets and include provisions for accounts receivable, assets under construction, investments, inventory and other long-term assets.

Substantially all of the Group's operating assets are located in the Russian Federation. Gas sales to different geographical regions are disclosed in Note 21.

## 6 CASH AND CASH EQUIVALENTS

Balances included within cash and cash equivalents in the consolidated balance sheet represent cash in hand and balances with banks. Included within restricted cash are balances of cash and cash equivalents totalling RR 34,269 and RR 38,608 as of 31 December 2001 and 31 December 2000, respectively, which are restricted as to withdrawal under the terms of certain borrowings. In addition, restricted cash comprises of balances of cash RR 5,881 and RR 5,929 as of 31 December 2001 and

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

31 December 2000, respectively, in subsidiary banks, which are restricted as to withdrawal under banking regulations.

#### 7 SHORT-TERM INVESTMENTS

	31 December	
	2001	2000
Trading investments .....	13,188	15,948
Available-for-sale investments .....	14,058	12,539
	<u>27,246</u>	<u>28,487</u>

Trading investments primarily comprise marketable equity and debt securities held by the Group's banking subsidiaries with a view to generating short-term profits. These investments are traded in active markets and are valued at market at the close of business on reporting date by reference to stock exchange quoted bid prices.

Available-for-sale investments primarily comprise promissory notes of third parties and maturing within twelve months of the balance sheet date or other debt and equity securities intended for sale within twelve months of the balance sheet date.

#### 8 ACCOUNTS RECEIVABLE AND PREPAYMENTS

	31 December	
	2001	2000
Trade receivables (net of impairment provision of RR 93,520 and RR 83,021 as of 31 December 2001 and 2000, respectively) .....	141,020	201,821
Prepayments and advances paid (net of impairment provision of RR 9,972 and RR 6,421 as of 31 December 2001 and 2000, respectively) ..	41,152	32,060
Other receivables (net of impairment provision of RR 27,144 and RR 17,993 as of 31 December 2001 and 2000, respectively) .....	52,025	58,552
	<u>234,197</u>	<u>292,433</u>

The fair value of accounts receivable and prepayments is RR 242,993 as of 31 December 2001.

Management has considered the likelihood of collection of receivables beyond 2002 when determining the amount of the impairment provision on receivables.

RR 71,096 and RR 94,446 of trade receivables are denominated in hard currency, mainly US dollars, as of 31 December 2001 and 2000, respectively.

Other receivables include RR 35,429 and RR 26,614 relating to the operations of AB Gazprombank (ZAO) and National Reserve Bank (see Note 25) as of 31 December 2001 and 2000, respectively. These balances mainly represent deposits with other banks and loans issued to customers at commercial rates, depending on credit risks and maturities. As of 31 December 2001, the average year-end interest rate on banking deposits and loans ranged from 12.6% to 16.6% on balances denominated in Russian Roubles and from 2.3% to 10.7% on balances denominated in foreign currency. As of 31 December 2000, the average year-end interest rate on banking deposits and loans ranged from 4.7% to 23.6% on balances denominated in Russian Roubles and from 4.9% to 11.5% on balances denominated in foreign currency.

As of 31 December 2001 and 2000, AB Gazprombank (ZAO) had pledged deposits with banks and other financial institutions of RR 7,444 and RR 10,067, respectively. There are pledged as collateral

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

for borrowings received by OAO Gazprom and credit exposures of Altalanos Ertektorgalmi Bank Rt ("AEB").

The fair value of banking deposits and loans approximate the carrying values, as the majority are short-term in nature and at commercial rates.

#### 9 INVENTORIES

	31 December	
	2001	2000
Materials and supplies .....	32,045	34,972
Gas (in pipelines and storage) .....	32,845	29,699
Refined products .....	3,340	497
Goods for resale .....	6,008	5,167
	74,238	70,335

Inventories are presented net of a provision for obsolescence of RR 14,060 and RR 14,339 as of 31 December 2001 and 31 December 2000, respectively.

Assets under construction are presented net of a provision for impairment of RR 88,997 and RR 83,348 as of 31 December 2001 and 2000, respectively.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

For the year ended 31 December 2001, disposals include RR 13,615 related to the disposal of OAO Lebedinsky GOK (see Note 25).

Included in additions above is capitalized interest of RR 16,380 and RR 18,699 for the years ended 31 December 2001 and 2000, respectively. Capitalization rates of 7.3% and 8.2% were used representing the weighted average actual borrowing cost of the relevant loans for the years ended 31 December 2001 and 2000, respectively.

Included in the property, plant and equipment above are fully depreciated assets which are still in service of RR 512,019 and RR 275,788 as of 31 December 2001 and 2000, respectively. Also included in additions above are non-cash additions of RR 42,680 and RR 56,564 for the years ended 31 December 2001 and 2000, respectively.

Depreciation disclosed above includes RR 571 and RR 905 for the years ended 31 December 2001 and 2000, respectively, which is considered a cost of self-constructed assets and thus capitalized rather than expensed in the consolidated statement of operations. Similarly, RR 12,814 and RR 11,035 of depreciation for the years ended 31 December 2001 and 2000, respectively, is capitalized as a component of gas inventories and expensed in the consolidated statement of operations when the gas is sold.

Included in the property, plant and equipment are social assets (such as rest houses, housing, schools and medical facilities) vested to the Group at privatisation of RR 38,644 and RR 43,300 as of 31 December 2001 and 2000, respectively. The Group intends to continue the transfers of social assets to governmental authority as stipulated in original privatisation arrangements.

The Group's gas fields are operated under licenses granted by federal and local authorities. These licenses to develop and extract hydrocarbons expire between 2013 and 2019, however they may be extended. Management intends to extend the existing licenses on properties expected to produce hydrocarbons subsequent to their current expiration dates.

	32,507	31,562

South Pars is a joint venture with Total South Pars and Parsi International Ltd. established in 1997 to provide services to National Iranian Oil Company in relation to development of South Pars oil and gas field in Iran. Under the terms of agreement OAO Gazprom has a 30% interest in the joint venture. Management have assessed the recoverable amount of the Group's investment in the South Pars joint venture based on the present value of expected future cash flows and applying a discount rate of 16%. As a result, a RR 1,770 impairment has been recognised and recorded within operating expenses in the consolidated statements of operations for the year ended 31 December 2001. The impairment is primarily due to revised timing of cash inflows and outflows associated with the joint venture.

Available for sale investments include the Group's 14.3% interest in ZAO Media-Most. The interest in ZAO Media-Most was acquired in 1999 via the settlement of ZAO Media-Most's debt to the

## OAO GAZPROM

Group. ZAO Media-Most is a holding company owning interests in a number of mass media companies (see Note 27).

#### 13 ACCOUNTS PAYABLE AND ACCRUED CHARGES

	31 December	
	2001	2000
Trade payables.....	40,099	33,676
Accounts payable in respect of acquisition of property, plant and equipment..	30,306	27,141
Advances received.....	1,930	2,063
Accruals and deferred income .....	2,400	1,300
Other payables.....	28,426	37,070
.....	103,161	101,250

Other payables includes RR 11,800 and RR 16,441 related to the operations of the Group's banking subsidiaries as of 31 December 2001 and 2000, respectively. These balances mainly represent amounts due to the banks' customers with terms at commercial rates, varying by maturity of deposit, ranging from 2.4% to 8.5% per annum as of 31 December 2001 and from 3.6% to 11.6% per annum as of 31 December 2000.

#### 14 TAXES PAYABLE

	31 December	
	2001	2000
Excise tax (including deferred amounts of RR 20,875 and RR 24,141 as of 31 December 2001 and 2000, respectively).....	34,123	40,388
Tax penalties and interest .....	20,034	39,857
Net VAT .....	979	25,724
Road users tax (including deferred amounts of RR 2,261 and RR 2,943 as of 31 December 2001 and 2000, respectively) .....	5,572	12,628
Profit tax.....	463	9,813
Royalty and mineral restoration taxes (including deferred amounts of RR 2,043 and RR 2,025 as of 31 December 2001 and 2000, respectively)..	6,220	9,458
State pension fund and other social taxes .....	549	2,742
Other taxes .....	6,181	5,938
.....	74,121	146,548
Less: long term portion of restructured tax liabilities .....	(19,073)	(10,519)
	55,048	136,029

The deferred amounts included in the taxes above are payable upon settlement of the related trade receivable balances. Substantially all accrued taxes above, excluding the deferred amounts and restructured tax liabilities (see below) incur interest at a rate of 1/300 of the refinancing rate of the Central Bank of the Russian Federation per day (the refinancing rate was last set at 25.0% per annum on 4 November 2000). Interest does not accrue on tax penalties and interest.

As of 31 December 2000, net VAT comprised current, deferred and restructured VAT liabilities of RR 18,360, RR 4,051 and RR 3,313, respectively. As of 31 December 2001, net VAT represents only restructured VAT payable as the Group had net VAT prepayments for current and deferred VAT amounting to RR 12,772; these receivables are included within other current assets.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

As of 31 December 2000, profit tax payable included current, differed and restructured liabilities of RR 8,985, RR nil and RR 828, respectively. As of 31 December 2001, profit tax payable represents only restructured profit tax as the Group had a net prepayment for current profit tax amounting to RR 7,278; these receivables are included within other current assets.

In 2001 excise tax rate for gas sales to CIS countries was reduced from 30% to 15%, effective from 1 January 2001. Meanwhile, certain excise tax exemptions were abolished effective 1 October 2001 (see Note 27).

During 2001 the Group continued to negotiate the restructuring of its tax liabilities in accordance with current tax regulations. The Group's current restructuring agreements presume payments of outstanding restructured taxes over a period of ten years through 2011, in accordance with agreed payment schedules. Interest expense on restructured tax liabilities is accrued quarterly based on outstanding restructured tax liabilities, applying the refinancing rate of the Central Bank of the Russian Federation.

The long-term portion of the restructured tax and penalties liabilities has the following maturity profile:

	31 December	
	2001	2000
Due for repayment:		
Between one and two years .....	3,994	2,703
Between two and five years.....	6,061	8,092
After five years.....	39,756	17,654
	49,811	28,449
Less: unamortized discount on restructured taxes .....	(30,738)	(17,930)
	19,073	10,519

The gain recorded upon restructured taxes is disclosed in the statements of operations as a part of net finance costs in the amount discounting of RR 18,699 and RR 20,011 for the years ended 31 December 2001 and 2000, respectively. The amortization of the discount on restructured taxes is recorded within other interest expense and amounted to RR 3,052 and RR 2,081 for the years ended 31 December 2001 and 2000, respectively.

#### 15 SHORT-TERM BORROWINGS AND CURRENT PORTION OF LONG-TERM BORROWINGS

	31 December	
	2001	2000
Short-term borrowings:		
RR denominated borrowings .....	67,947	74,806
Foreign currency denominated borrowings .....	20,723	2,652
	88,670	77,458
Current portion of long-term borrowings (see Note 16) .....	79,059	55,496
	167,729	132,954

Short-term RR denominated borrowings had average interest rates ranging from 5.0% to 25.0% and 17.0% to 37.0% for the years ended 31 December 2001 and 2000, respectively. Short-term foreign currency denominated borrowings had average interest rates ranging from 6.5% to 15.0% and from 7.0% to 18.0% for the years ended 31 December 2001 and 2000, respectively.

**OAO GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

The Group's short-term promissory notes payable had average interest rates ranging from 18.0% to 24.7% and 18.0% to 53.0% for the years ended 31 December 2001 and 2000, respectively.

After five years.....			15,757	32,361
			<u>206,231</u>	<u>243,421</u>

Long-term borrowings include fixed rate loans with a carrying value of RR 59,144 and RR 38,323 and fair value of RR 50,355 and RR 33,687 as of 31 December 2001 and 2000, respectively. All other long-term borrowings have variable interest rates linked to LIBOR, and the carrying amounts approximate fair value.

## ОАО ГАЗПРОМ

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

The weighted average effective interest rates at the balance sheet date were as follows:

	31 December	
	2001	2000
Fixed rate long-term borrowings .....	8.86%	7.64%
Variable rate long-term borrowings .....	6.33%	7.38%

Substantially all long-term borrowings received from international banking consortiums are secured by contractual obligations to sell gas in Europe.

The Group has no subordinated debt and no debt that may be converted into an equity interest in the Group.

Other long-term borrowings include RR 2,786 and RR 3,182 as of 31 December 2001 and 31 December 2000, respectively, of coupon non-documentary bearer bonds issued by OAO Gazprom in 1999. The issue amounted to 3.0 million bonds, each with a nominal value of 1,000 roubles each and a due date of 15 April 2003.

During the years 2000 and 2001, the Group repurchased 577 thousand bonds. The total liability recorded in respect of the bonds excludes the unamortized discount related to future periods.

The Group's long-term promissory notes payable had average interest rates ranging from 22.0% to 26.5% and 21.5% to 51.0% for the years ended 31 December 2001 and 2000, respectively.

Included within the current portion of long-term borrowings as of 31 December 2001 is an interest free loan provided by RAO UES with a fair value of RR 8,754 and nominal value of RR 10,140. The loan was received on 27 December 2001. The purpose of the loan is to finance settlements of current tax liabilities of the Group's subsidiaries. The loan is to be settled by the delivery of gas from January 2002 to December 2002.

**ОАО ГАЗПРОМ**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

**17 PROFIT TAX**

The Group accrues current profit tax at the rate of 35% and 43% on profits from non-banking and banking activities, correspondingly, computed in accordance with the Russian tax legislation. The tax rates applied were enacted on 1 January 2001.

Profit before profit tax for financial reporting purposes is reconciled to profit tax expense as follows:

	31 December	
	2001	2000
Profit before profit tax and minority interest.....	201,294	183,195
Theoretical tax charge at a statutory rate thereon .....	(70,453)	(54,958)
Tax effect of items which are not deductible or assessable for taxation purposes:		
Non-temporary element of net monetary gains.....	(80,379)	(54,058)
Non-deductible expenses .....	(33,220)	(47,154)
Statutory tax concessions .....	11,919	23,465
Other non-temporary differences.....	(9,004)	(6,340)
Inflation effect on deferred profit tax balance at beginning of year .....	6,458	6,251
Effect of increase in taxable base due to statutory revaluation.....	-	274,756
Effect of change in tax rate .....	(10,512)	16,643
Profit tax (expense) benefit .....	<u>(185,191)</u>	<u>158,605</u>

The non-temporary impact of monetary gains reflects the effect of inflation on the theoretical tax charge with respect to non-monetary items of a non-temporary nature (primarily social assets and equity).

Profit tax expense in the consolidated statement of operations is stated net of RR 825 and RR 974 of tax attributable to gains arising on treasury share transactions for the year ended 31 December 2001 and 2000, respectively (see Note 4).

In August 2001 the Profit tax chapter of the Tax Code was enacted, which introduced a new profit tax rate of 24%. This rate will become effective starting from 1 January 2002.

Differences between the recognition criteria in Russian statutory taxation regulations and IAS give rise to certain temporary differences between the carrying value of certain assets and liabilities for financial reporting purposes and for profit tax purposes. The tax effect of the movement on these temporary differences is recorded at the rate of 24%, as appropriate.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

	31 December 2001	Effect of Changes in tax rate	Differences recognition and reversals	31 December 2000
<b>Tax effects of taxable temporary differences:</b>				
Accounts receivable .....	(17,136)	7,854	6,224	(31,214)
Investments .....	(818)	375	(253)	(940)
<b>Tax effects of deductible temporary differences:</b>				
Property, plant and equipment .....	29,163	(13,366)	(106,084)	148,613
Inventories .....	2,587	(1,185)	7,920	(4,148)
Impairment provision for accounts receivable.....	-	(4,190)	-	4,190
<b>Total net deferred tax asset (liability) .....</b>	<b>13,796</b>	<b>(10,512)</b>	<b>(92,193)</b>	<b>116,501</b>

Deferred tax assets and liabilities arise mainly from differences in the taxable and financial reporting bases of property, plant and equipment. These differences are due to the fact that a significant proportion of the tax base is based upon independent appraisals while the financial reporting base is historical cost restated for changes in the general purchasing power of the RR (see Note 3).

The deferred tax expense of RR 106,084 for the year ended 31 December 2001 mostly arose due to the impact of inflation eroding the tax-deductible value of the Group's property, plant and equipment.

The temporary differences associated with undistributed earnings of subsidiaries amount to RR 47,493 and RR 43,577 as of 31 December 2001 and 31 December 2000, respectively. A deferred tax liability on these temporary differences was not recognized because management controls the timing of the reversal of the temporary differences and believes that they will not reverse in the foreseeable future.

## 18 FINANCIAL INSTRUMENTS

The Group adopted IAS 39 at 1 January 2001. The impact on shareholders' equity at 1 January 2001 was a net gain of RR 545 in retained earnings for the re-measurement of available-for-sale securities, stated at fair value as of 1 January 2001. In accordance with IAS 39, the comparative financial statements for the year ended 31 December 2000 are not restated.

### Available-for-sale investments: amounts reported in the statement of operations

	31 December 2001
Unrealized fair value losses, net .....	(1,052)
Realized net gains on sale.....	189
<b>Total loss on available-for-sale investments .....</b>	<b>(863)</b>

Foreign exchange off-balance sheet financial instruments are generally traded in an over-the-counter market with professional market counterparties on standardized contractual terms and conditions. As of 31 December 2001 the Group's banking subsidiaries had outstanding contracts to purchase and sell precious metals at the market price at the date of maturity. The Group expects to settle these contracts in the normal course of business.

The nominal amounts for off-balance sheet financial instruments are not reflected in the consolidated balance sheet.

The following table provides an analysis of the principal or agreed amounts of contracts outstanding at the year-end. The table includes both the contracts for which the date of maturity has past due and no settlements had been completed as of 31 December 2001, and the contracts with

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

maturity dates subsequent to 31 December 2001. The amounts included in the table are presented on a net basis after gross positions were grouped and netted off by counterparty, where appropriate.

	Principal or agreed amount	
	Domestic	Foreign
Deliverable forward currency .....	2,954	574
Deliverable forward precious metal contracts .....	2,049	-
Written foreign currency option contracts .....	-	10,135
<b>Total</b> .....	<b>5,003</b>	<b>10,709</b>

At 31 December 2001 the Group had outstanding forward foreign exchange contracts with Russian and foreign banks whereby it had agreed to buy or sell Russian Roubles in exchange for another currency at an exchange rate agreed to at the date of the contract. Some of these contracts were entered into prior to 17 August 1998 and matured during 1998, but have not yet been settled. The Group has been able to settle outstanding contracts with a few counterparties and any resultant gains or losses have been recorded in the consolidated statement of operations.

The Civil Code of the Russian Federation stipulates a three-year period for commencing action to enforce contracts. This period expired during 2001. On the basis of legal advice regarding the enforceability of these contracts under Russian law, market practices and the activities of other participants in the derivatives market in Russia, as well as a significant passage of time, Management is of the opinion that these contracts with domestic banks are no longer legally enforceable, and that therefore no losses will arise for the Group as a result of these contracts.

Management has therefore not recorded any liabilities in respect of these contracts with domestic banks in the consolidated financial statements of the Group for the year ended 31 December 2001. Previously recorded liabilities under these contracts, amounting to RR 8,113, have been released and recorded as derivative gains within operating expenses for the year ended 31 December 2001.

#### 19 PROVISIONS FOR LIABILITIES AND CHARGES

Notes	31 December	
	2001	2000
Provision for pension obligations .....	12,093	9,307
27 Provision for guarantees .....	-	10,352
27 Provision for environmental liabilities .....	1,196	5,311

## 20 SHAREHOLDERS' EQUITY

### Share capital

Share capital authorised, issued and paid in totals RR 282,483 as of 31 December 2001 and 31 December 2000 and consists of 23.7 billion ordinary shares, each with a historical par value of RR 5.

### Dividends

In 2000, the Group accrued and paid total dividends in the amount of RR 0.17 (including interim dividends in the amount of RR 0.07 per share as well as final dividends in respect of 1999, in the amount of RR 0.10 per share). In 2001, the Group accrued and paid final dividends for the year ended 31 December 2000 in the amount of RR 0.23 per share.

In 2002 the Board of Directors recommended payment of a final dividend for the year ended 31 December 2001 in the amount of RR 0.44 per share. Because this decision of the Group management was reached after the balance sheet date, the final dividend proposed in respect of 2001 has not been recognised in the consolidated balance sheet. The final dividend of RR 10,416 (including income tax on dividends in the amount of RR 625) will be paid prior to 31 December 2002.

### Treasury shares

As of 31 December 2001, subsidiaries of OAO Gazprom held 2,672 million of the ordinary shares of OAO Gazprom (as of 31 December 2000 – 2,684 million). The Group controls the voting rights of these shares.

### Retained earnings and other reserves

Included in retained earnings and other reserves are the effects of the cumulative restatement to the equivalent purchasing power of the Rouble as of 31 December 2001, and cumulative translation differences of RR 1,331 and RR (745) arising on the retranslating of the net assets of foreign subsidiaries and associated undertakings as of 31 December 2001 and 2000, respectively.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

Other reserves include a statutory fund for social assets, created at the time of privatisation in accordance with Russian legislation. The Group is negotiating to return certain of these assets to governmental authorities, though this process is expected to be protracted. Social assets with a net book value of RR 4,656 and RR 6,440 have been transferred to governmental authorities during the years ended 31 December 2001 and 2000, respectively. These transactions have been recorded as a charge to other reserves.

The statutory accounting reports of the parent company, OAO Gazprom, are the basis for profit distribution and other appropriations. The basis of distribution is defined by legislation as the current year net profit, as calculated in accordance with RAR. For 2001, the statutory profit for the parent company was RR 71,928. However, the legislation and other statutory laws and regulations dealing with profit distribution are open to legal interpretation and accordingly management believes at present it would not be appropriate to disclose an amount for the distributable reserves in these consolidated financial statements.

#### 21 SALES

	Year ended 31 December 2001	2000
Gas sales (including excise tax, net of VAT) to customers in:		
Russian Federation .....	115,694	102,477
Former Soviet Union (excluding Russian Federation) .....	48,837	69,503
Europe .....	452,265	473,298
Gross sales of gas .....	616,796	645,278
Excise tax .....	(107,031)	(105,894)
Net sales of gas .....	509,765	539,384
Sales of gas condensate and oil and gas products (net of sales taxes) .....	64,838	35,177
Gas transportation sales .....	15,832	31,757
Other revenues .....	28,890	35,202
	<u>619,325</u>	<u>641,520</u>

Commencing in 1999 the Group has been participating in the creation of regional companies involved in the distribution of gas in Russia. The interest of the Group in the majority of such companies as of 31 December 2001 and 2000 amounted to less than 20% of their respective share capital (see Note 28).

Gas sales (net of VAT and excise tax) to customers in Russia include sales made to the regional companies of 222 billion cubic meters (bcm) and 141 bcm, or RR 81,752 and RR 49,137 for 2001 and 2000, respectively. Sales are made to the regional companies at prices approximately 4% below regulated prices set for sales to final customers in Russia.

Transportation charges are provided at rates established by the Federal Energy Commission.

Gas transportation sales (net of VAT) are primarily comprised of sales to companies of the Itera Group totalling RR 13,843 (64 bcm) and RR 25,841 (71 bcm) for the years ended 31 December 2001 and 2000, respectively. Trade receivables in respect of gas transportation services supplied to the Itera Group amounted to RR 10,419 and RR 12,854 as of 31 December 2001 and 2000, respectively. The Itera Group is a producer and distributor of gas in the Russian Federation and the former Soviet Union.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

#### 22 OPERATING EXPENSES

	Year ended 31 December	
	2001	2000
Depreciation.....	86,751	83,555
Transit costs.....	82,614	92,753
Staff costs .....	51,647	51,632
Materials .....	48,638	38,969
Taxes other than on income .....	40,210	48,796
Impairment provision for accounts receivable and debts written off .....	30,464	31,374
Repairs and maintenance .....	17,766	15,245
Purchased refined products .....	14,945	-
Processing services.....	10,941	-
Electricity .....	9,929	9,618
Purchased gas.....	6,485	10,543
Provision for impairment of assets under construction .....	5,649	29,697
Losses on disposal of property, plant and equipment.....	5,081	12,360
Research and development.....	3,787	5,068
Cost of goods for resale .....	2,753	1,543
Provision for impairment and write-off of investments and other long-term assets .....	2,673	26,561
Provisions for guarantees and other charges .....	-	1,151
Provision for inventory obsolescence .....	-	7,146
Derivative gains .....	(8,113)	(3,365)
Other .....	23,345	20,612
	435,565	483,258

During the year ended 31 December 2000, the Group purchased 9.0 bcm of Turkmenian gas from Itera LLC for RR 15,197. No gas was purchased from Itera LLC in 2001. Additionally, in 2001 various Group subsidiaries purchased 1.4 bcm of gas from other Itera Group companies for RR 740.

Purchases and processing of refined products mainly relate to the acquisition of OAO AK Sibur in January 2001 (see Note 25).

Due to changes in the tax legislation of the Russian Federation, effective 1 January 2001, accounts receivable written off are subject to VAT. For the year ended 31 December 2001, this resulted in a charge of RR 10,303 related to VAT on accounts receivable balances written off during the period. The charge is included within the impairment provision for accounts receivable and debts written off.

Taxes other than on income consist of:

	Year ended 31 December	
	2001	2000
Royalty.....	10,974	8,972
Road users tax and housing fund .....	8,621	25,148
Property tax .....	8,307	5,163
Mineral restoration tax .....	7,896	4,507
Other taxes .....	4,412	5,006
.....	40,210	48,796

Taxes other than on income included in operating expenses are computed as follows:

## ОАО ГАЗПРОМ

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

- Road users tax – is charged on sales of Group entities; changes in legislation effective 1 January 2001 reduced the road users tax from 2.5% to 1.0% and abolished the housing fund tax.
- Royalty is imposed at rates ranging from 6% to 16% of the sales value of gas and hydrocarbons produced. The actual rates of the tax are dictated in field licenses and are based on various factors;
- Property tax is imposed at a maximum rate of 2% on the average annual net book value of fixed assets, intangible assets, inventory and (effective from 1 January 2001) on assets under construction which were not completed within contracted terms. Legislation provides for the exclusion of trunk pipelines from the taxable base; and
- Mineral restoration tax is imposed at the rate of 10.0% of the sales value of gas and hydrocarbons sold by the production subsidiaries. Under current legislation, up to 100.0% of mineral restoration tax assessments may be offset by a sum equal to the value of certain exploration works performed and paid for by the Group. In 2001 and 2000, the Group recovered 32.4% and 39.9% of mineral restoration tax assessments, respectively.

All taxes and rates discussed above are calculated based on amounts recorded in accordance with Russian statutory accounting regulations.

#### 23 EARNINGS PER SHARE

Earnings per share has been calculated by dividing the net profit for the year by the weighted average number of shares outstanding during the year, excluding the average number of ordinary shares purchased by the Group and held as treasury shares (see Note 20).

There were 21.0 billion weighted average shares outstanding for the year ended 31 December 2001 and 21.0 billion weighted average shares outstanding for the year ended 31 December 2000.

Gazprom Finance B.V.	Nadymstroygazdobytcha	Yugtransgaz
Gaztorgpromstroy	Novourengoy sky GCC	Yamalgazinvest
Gazflot	Noyabrskgazdobytcha	Yamburggazdobytcha
Gazexport	Orenburggazprom	

All of these subsidiaries are incorporated in the Russian Federation, with the exception of Gazprom Finance B.V., ZGG and Leadville Investments Limited, which are incorporated in the Netherlands, Germany and Cyprus, respectively. Gazprom Finance B.V. was established in February 1999 for the purpose of obtaining financing for the Group outside Russia. ZGG acts as the holding company for the Group's interests in a number of gas distribution, storage and transportation companies operating in Central Europe. Leadville Investments Limited was established in 2000 to manage the Group's investments in Russian media companies. Other companies are mainly involved in production, transportation and sale of gas.

##### Principal subsidiary undertakings, less than 100% owned

	Percent of share capital held as of 31 December	
	2001	2000
OAO Gazavtomatika .....	49	51
OAO Gazenergосervice.....	51	51
AB Gazprombank (ZAO) .....	98	97
OAO Gazsibcontract .....	96	51
ZAO Gerosgaz .....	51	51
ZAO Kostromatrubinvest .....	99	99

OAO Volgogradneftemash .....	51	51
OAO Vostokgazprom .....	51	51
OAO Zapsibgazprom .....	34	34

In 2001 the Group's interest in OAO Gazavtomatika decreased from 51% to 49% as the Group did not participate in an additional share issue by OAO Gazavtomatika.

## 0

### 0AO GAZPROM

#### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

#### 25 SUBSIDIARY UNDERTAKINGS—(Continued)

In August 2001 the Group participated in the fourth stock issue of ZAO AKB Sovintrade and as a result, the Group's interest in the bank's share capital increased from 65% to 94%, including 26% held by AB Gazprombank (ZAO).

As of 31 December 2001, the Group's interest in the equity capital of OAO AKB National Reserve Bank is 40%, in OAO Zapsibgazprom – 34% and OAO Gazavtomatika – 49%. However, due to the fact that the Group continued to exercise control over activities of the above companies, they were still considered as subsidiaries.

#### Acquisition of OAO AK SIBUR

In January 2001 the Group acquired 51% of the voting shares of OAO AK Sibur. OAO AK Sibur is a leading seller of petrochemical products in Russia, it is also involved in light hydrocarbons processing. The consideration of RR 2,619 was settled by a combination of cash, promissory notes of Group companies and other securities.

Details of net assets acquired and goodwill are as follows:

Purchase consideration:

Cash paid .....	750
Promissory notes of Group companies .....	1,185
Shares in other investments.....	684
Total purchase consideration .....	2,619
Fair value of identifiable net assets acquired.....	(982)
Goodwill .....	1,637

Other than for short-term investments, the fair value of the net assets approximated the book value of the net assets acquired.

The net cash flow arising from the acquisition is as follows:

Total purchase consideration .....	2,619
Less:	
Cash and cash equivalents acquired .....	(1,042)
Promissory notes of the Group companies .....	(1,185)
Shares in other investments.....	(684)
Net cash received on acquisition .....	(292)

OAO AK Sibur is one of the founders of OAO Gazsibcontract with a 45% interest in the charter capital. As a result of acquiring OAO AK Sibur the Group's effective share in the charter capital of OAO Gazsibcontract increased from 51% to 74%.

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

#### 25 SUBSIDIARY UNDERTAKINGS—(Continued)

In December 2001 the Group subsidiary OAO AK Sibur purchased interests in the following companies:

Companies (subsidiaries and associated undertakings)	Purchased interest as of 31 December 2001 (%)
OAO Kemerovsky Azot.....	75
OAO Kautchuk .....	100
OAO Uralorgsintez .....	51
OAO Volzhsky AKZ .....	51
OAO Sibur-Tyumen .....	42
OAO Stinol .....	42

Interests in the above companies, all of which are involved in the petrochemical industry in the Russian Federation, were purchased from OOO IT. Total fair value of consideration paid to OOO IT was RR 6,491, of which RR 3,691 was attributable to acquired subsidiaries. The Group management is currently unable to assess whether the transaction with OOO IT is a related party transaction or if OOO IT is a related company to former management of OAO AK Sibur.

Details of net assets acquired and goodwill are as follows:

Purchase consideration:

Promissory notes of OAO AK Sibur's related parties and contractors at fair value.....	3,691
Total purchase consideration .....	3,691
Less fair value of identifiable net assets acquired .....	(1,252)
Goodwill at acquisition .....	2,439
Less goodwill impaired.....	(2,439)
Unamortised goodwill as of 31 December 2001 .....	-

#### Lebedinsky GOK

In January 2001 the Group exchanged a 57% interest in Lebedinsky GOK and a 17% interest in Oskolsky EMK for a 48% interest in ZAO Gazmetall. ZAO Gazmetall is a metallurgical holding company with controlling interests in Lebedinsky GOK and Oskolsky EMK. As the Group intends to sell its shares of ZAO Gazmetall, the investment has been classified as an available-for-sale investment. During the third quarter of 2001 management revalued the investment in ZAO Gazmetall to its estimated current market value of RR 2,000, recognising the net effect of revaluation in gains and losses on available-for-sale securities in the consolidated statement of operations (See Note 7). In March 2002 the Group made an agreement to sell its 48% interest in ZAO Gazmetall for USD70 million. In accordance with the agreement the buyer of the above shares is OAO Oskolsky Metallurgical Plant, a subsidiary of ZAO Gazmetall.

## OAO GAZPROM

Change in minority interest as a result of acquisitions/(disposals) .....	111	(265)
Minority interest at the end of reporting period .....	15,104	10,355

#### 26 RELATED PARTIES

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions.

##### Government

The Government of the Russian Federation, the principal shareholder of the Group, owns approximately 38.37% of the issued shares of the Group. Governmental economic and social policies affect the Group's financial position, results of operations and cash flows.

As a condition of privatisation in 1992, the Government imposed an obligation on the Group to provide an uninterrupted supply of gas to customers in the Russian Federation at government controlled prices.

##### Directors' remuneration

The Company paid to members of the Board of Directors and Management Committee remuneration (salary and bonuses) of approximately RR 73 and RR 67 for the years ended 31 December 2001 and 2000, respectively. The remuneration of members of the Board of Directors is subject to approval by the General shareholders meeting. Compensation paid to members of the Management Committee is determined by the terms of annual employment contracts.

##### Associated undertakings

Included within associated undertakings (see Note 11) is the loan receivable from EuRoPol GAZ S.A., in the amount of RR 27,030 and RR 27,855 as of 31 December 2001 and 2000, respectively, issued by AB Gazprombank (ZAO), a subsidiary of the Group, at an interest rate of LIBOR + 2.6 %. Also included within associated undertakings (see Note 11) are USD denominated receivables from EuRoPol GAZ S.A. as a component of the carrying amount of RR 10,854 and RR 14,405 as of 31 December 2001 and 2000, respectively.

Also included within associated undertakings (see Note 11) is a loan receivable from WINGAS GmbH, in the amount of RR 11,928 and RR 15,399 as of 31 December 2001 and 2000, respectively. The interest rates vary for different loan tranches. As of 31 December 2001 the aggregate effective interest rate for the loan receivable from WINGAS GmbH was LIBOR + 2.17%.

Included within accounts receivable (see Note 8) are accounts receivable from Group associates (excluding EuRoPol GAZ S.A.) in the amount of RR 29,016 and RR 13,140 as of 31 December 2001 and 2000, respectively.

## ОАО ГАЗПРОМ

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

#### 26 RELATED PARTIES—(Continued)

During periods ended 31 December 2001 and 2000 the Group recorded sales of gas to its associates in the amount of RR 72,407 and RR 64,669, respectively.

Gas is sold to associates, except for that sold to AO Moldovagaz, on the basis of long-term contracts, at index prices based on world oil and gas prices. Gas prices per thousand cubic meters for such sales ranged from USD 75 to USD 144 and from USD 64 to USD 133 in the year ended 31 December 2001 and 2000, respectively. Gas is sold to AO Moldovagaz based on annual contracts with fixed prices. Prices of gas per thousand cubic meters sold to Moldova amounted to USD80 in the year ended 31 December 2001 and 2000, respectively.

The Group's impairment provision on accounts receivable included RR 12,490 and RR 14,100 in respect of amounts due from AO Moldovagaz as of 31 December 2001 and 2000, respectively.

In addition, the Group purchased gas transportation services from certain of the associated undertakings, principally EuRoPol GAZ S.A., which amounted to RR 8,738 and RR 10,166 for the year ended 31 December 2001 and 2000, respectively. The cost of these services was determined based on prices of gas sold to these companies.

As of 31 December 2001, the Group had accounts payable as contribution to charter capital due to ZAO Armrosgazprom of USD 126 million (RR 3,798). The Group expects to pay its contribution into the charter capital of ZAO Armrosgazprom by July 2002, the date established under legislation of the Armenian Republic as the deadline for shareholders to settle their obligations.

#### ОАО АК Сибур

Set out below is condensed financial statement information for ОАО АК Сибур as of and for the year ended 31 December 2001, before Group intercompany eliminations and adjustments for minority interests:

	As of 31 December 2001
Non-current assets.....	6,670
Current assets .....	20,102
Non-current liabilities .....	(4,300)
Current liabilities.....	(40,017)
<b>Net liabilities</b> .....	<b>(17,545)</b>
	Years ended 31 December 2001
Sales .....	49,694
Operating expenses .....	(57,935)
<b>Net loss</b> .....	<b>(20,590)</b>

## OAO GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

#### 26 RELATED PARTIES—(Continued)

	Years ended 31 December 2001
<u>Operating expenses include:</u>	
Materials.....	16,514
Purchases and processing of refined products .....	14,945
External processing of refined products .....	10,941
Provision for impairment and write-off of other long-term assets .....	5,189
Impairment provision for accounts receivable and debts written off .....	5,147
Purchased gas .....	2,679
Other .....	2,520
	<hr/> 57,935 <hr/>

A substantial portion of OAO AK Sibur's transactions were executed with related parties. OAO AK Sibur's related party transactions included those with its associated undertakings and the following companies:

ZAO Gazoneftekhimicheskaya Companya	OAO Tobolskiy NKhK
Megler Group	OAO Tomsky NKhZ
OAO Omskshina	OAO Voronezhsyntezkauchuk
Petrochemical Holding AG	OAO Yaroslavskiy Shinniy Zavod
OAO Salavatnefteorgsintez	

In the first quarter of 2002 external supervision has been introduced in respect of OAO AK Sibur under decision of the arbitration court. The arbitration court has cancelled the decision on placement of additional stock issue as a result of which OAO Gazprom could have lost control over OAO AK Sibur. OAO Gazprom maintains control over OAO AK Sibur.

#### OAO Stroytransgaz

In the normal course of business, the Group enters into transactions with OAO Stroytransgaz for the construction of pipelines in the Russian Federation on the basis of the results of tenders. During the years ended 31 December 2001 and 31 December 2000 certain representatives of the Group Board of Directors and members of their families owned significant shareholdings in OAO Stroytransgaz.

OAO Stroytransgaz rendered construction services for the Group in the amounts of RR 41,135 and RR 28,141 for the year ended 31 December 2001 and 2000, respectively. As of 31 December 2001 and 31 December 2000, the Group had advances and receivables due from OAO Stroytransgaz in the amounts of RR 7,390 and RR 2,015, respectively. As of 31 December 2001 and 31 December 2000, the Group had accounts payable to OAO Stroytransgaz in respect of construction of RR 16,166 and RR 10,826, respectively. Included within other long-term assets is a receivable due from OAO Stroytransgaz in connection with finance arrangements for construction for the Group undertaken by OAO Stroytransgaz in the amount of RR 3,518 and RR 6,944 as of 31 December 2001 and 31 December 2000.

#### AEB

In 2001 and 2000 the Group raised short-term loans from AEB, an associated undertaking of AB Gazprombank (ZAO), for the total amount of RR 2,939 (11.0% — 14.8% p.a.) and RR 2,923 (12.5% p.a.), respectively.

## **ОАО ГАЗПРОМ**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

#### **26 RELATED PARTIES—(Continued)**

##### **ООО Interprokom**

During the years ended 31 December 2001 and 2000, respectively, certain members of the families of certain members of the Board of Directors of the Company owned significant interests in ООО Interprokom.

ООО Interprokom acts as an agent for the Group in the acquisition of equipment and is remunerated for those services based on a fixed commission percentage. ООО Interprokom acted as an agent in the Group's acquisition of RR 10,086 and RR 5,482 of equipment year ended 31 December 2001 and 2000, respectively. As of 31 December 2001 and 2000, the Group had advances and receivables due from ООО Interprokom in the amount of RR 565 and RR 2,910, respectively. Commission paid to ООО Interprokom amounted to RR 93 and RR 72 for year ended 31 December 2001 and 2000, respectively. As of 31 December 2001 and 2000, the Group had accounts payable to ООО Interprokom in respect of equipment supplies of RR 7,564 and RR 6,050, respectively.

AB Gazprombank (ZAO), the Group's principal banking subsidiary, had outstanding import letters of credit issued on behalf of ООО Interprokom and sub-contractors of ООО Interprokom in the amount of RR 8,470 and RR 9,630 as of 31 December 2001 and 2000 and, respectively. These import letters of credit are issued to third party suppliers in connection with the purchase of equipment by ООО Interprokom on behalf of the Group.

#### **27 COMMITMENTS AND CONTINGENCIES**

##### **Operating environment**

The operations and earnings of the Group continue, from time to time and in varying degrees, to be affected by political, legislative, fiscal and regulatory developments, including those related to environmental protection, in the Russian Federation. Due to the capital-intensive nature of the industry, the Group is also subject to physical risks of various kinds. The nature and frequency of these developments and events associated with these risks as well as their effect on future operations and earnings, are not predictable.

##### **Legal proceedings**

The Group is a party to certain legal proceedings arising in the ordinary course of business. Additionally, the Group is subject to various environmental laws regarding handling, storage, and disposal of certain products and is subject to regulation by various governmental authorities. In the opinion of management, there are no current legal proceedings or other claims outstanding which could have a material adverse effect on the result of operations or financial position of the Group.

##### **Taxation**

Tax legislation in the Russian Federation is subject to varying interpretations and frequent changes. Further, the interpretation of tax legislation by tax authorities of as applied to the transactions and activity of the Group may not coincide with that of management. As a result, transactions may be challenged by tax authorities and the Group may be assessed additional taxes, penalties and interest, which can be significant. Under Russian legislation, penalties are levied at 20% of the tax amount underpaid and interest is charged at a rate of 1/300 of the refinancing rate of the Central Bank of the Russian Federation per day (see Note 14). The Group's tax records remain open to review by the tax and customs authorities with respect to tax liabilities for three years.

## **OAO GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

#### **27 COMMITMENTS AND CONTINGENCIES—(Continued)**

In June 2002, the tax authorities completed an audit of the accrual and payment of natural gas excise tax by OAO Gazprom covering the period from 1 January 1999 to 30 June 2001. Following the completion of this excise tax audit, the tax authorities issued a tax act to OAO Gazprom. In accordance with estimations of the tax authorities included within the tax act, the amount of additional potential excise tax due is RR 19,037, exclusive of penalties and interest. The major part of this amount relates to the tax audit's interpretation of the method of determination of gas volumes exempt from excise tax under Russian tax law. OAO Gazprom management intends to dispute the total amount of the tax authorities' claim in court as it does not comply with the tax legislation. Accordingly no accrual has been recorded. Management does not believe that the financial effect of this contingency will be material to the Group.

#### **Group changes**

The Group is continuing to undergo significant restructuring and reform initiatives and the future direction and effects of such reforms are the subject of political considerations. Potential reforms in tariff setting policies, settlements of outstanding debts by governmental entities, and other government initiatives could each have a significant, but undeterminable, effect on enterprises operating in the Group.

#### **Environmental matters**

The Group periodically evaluates its obligations under environmental regulations. Potential liabilities which might arise as a result of stricter enforcement of existing regulations, civil litigation or changes in legislation or regulation cannot be estimated, but could be material. In the current enforcement climate, under existing legislation, management believes that there are no significant liabilities for environmental damage, other than amounts that have been accrued in the consolidated financial statements.

#### **Social commitments**

The Group significantly contributes to the maintenance and upkeep of the local infrastructure and the welfare of its employees in the areas of its production, including contributions toward the construction, development and maintenance of housing, hospitals, transport services, recreation and other social needs in the geographical areas in which it operates.

#### **Financial guarantees**

The Group had outstanding issued guarantees to third parties in the amount of RR 69,739 and RR 59,351 (including guarantees denominated in USD of USD 2,502 million and USD 1,659 million) as of 31 December 2001 and 2000, respectively.

Management believes that the Group will be required to settle certain of the obligations under the guarantees issued. Provisions of RR nil and RR 10,352 were recorded within provisions for liabilities and charges as of 31 December 2001 and 2000, respectively, in respect of the outstanding issued guarantees.

**OAD GAZPROM**

**NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

**27 COMMITMENTS AND CONTINGENCIES—(Continued)**

<i>Notes</i>	Year ended 31 December	
	2001	2000
Outstanding guarantees issued on behalf of :		
BSPC.....	19,015	—
Interconnector (UK) Limited.....	33,154	33,460
11 ZAO Media-Most .....	—	8,749
Itera Group companies .....	3,897	5,617
OAO AK Sibur .....	—	5,397
Other .....	13,673	6,128
	69,739	59,351
19 Less: provisions for guarantees.....	(—)	(10,352)
	69,739	48,999

In April 2000, credit facilities were provided to BSPC, an associated undertaking (see Note 11), by a group of Italian and Japanese banks for the amount of RR 61,877 (USD 2,053 million) for the construction of the offshore portion of the Blue Stream pipeline. In 2001, the Group was obligated to provide guarantees on behalf of BSPC in respect of RR 35,776 (USD 1,187) related to these credit facilities. As of 31 December 2001 BSPC had used RR 33,934 (USD 1,126 million) of the credit facilities of which RR 19,015 (USD 631 million) was guaranteed by the Group, pursuant to its obligation.

The Group provided guarantees on behalf of Interconnector (UK) Limited in connection with equipment and fixed assets leased for the construction of the Interconnector gas pipeline linking the United Kingdom to Continental Europe. The Group has a 10% interest in Interconnector (UK) Limited.

In July 2001 ZAO Media-Most defaulted on a payment obligation of RR 8,749 under a loan agreement. This balance was settled by the Group in accordance with a loan guarantee agreement. The terms of the guarantee agreement provided for collateral in respect of the guarantee in the form of a 19% interest in NTV and a 25% interest in a number of other ZAO Media-Most operating companies.

As of 31 December 2001 the Group held a 65% interest in NTV and 50% plus one share interest in a number of ZAO Media-Most operating companies. These interests are included in short-term available-for-sale investments as the Group does not view investments in these companies as long-term investments and intends to sell its interest in these companies.

Line "Other" includes mainly guarantees issued by subsidiaries under contracts for purchasing equipment, construction and installation works. As of 31 December 2001 this balance includes guarantees issued by OAO AK Sibur to third parties of RR 6,709.

**Capital commitments**

In the normal course of business, the Group has entered into contracts for the purchase of property, plant and equipment. The Board has approved a capital expenditure budget for 2002 of RR 140,800 including RR 55,666 in respect of capital expenditures related to the Yamal project (that includes, in particular, construction of the Yamal-Europe pipeline).

## **OAO GAZPROM**

### **NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS**

**(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)**

#### **27 COMMITMENTS AND CONTINGENCIES—(Continued)**

##### **Supply commitments**

The Group has entered into long-term supply contracts for periods ranging from 5 to 20 years with various companies operating in Europe. The volumes and prices in these contracts are subject to change due to various contractually defined factors. As of 31 December 2001 no loss is expected to result from these long-term commitments.

#### **28 POST BALANCE SHEET EVENTS**

##### **Financial investments**

In March 2002 a consortium of the German gas company Ruhrgas and French gas company Gaz de France acquired a 49% interest in Slovensky Plynarensky Priemysel (SPP) for USD 2,700 million. SPP is the State gas company in Slovakia involved in gas production and transportation. Under an agreement with the consortium, the Group has the ability to purchase an interest from the consortium before 31 March 2004.

In connection with changes in RF Federal law No.208-FZ of 26 December 1995 "On Joint Stock Companies", effective from 1 January 2002, the Group was not able to exercise its conversion rights on preference shares in OAO AKB National Reserve Bank. The Group has, therefore, lost the opportunity to obtain voting rights on these shares and no longer exercises control over the activities of the bank (see Note 25). In June 2002, the Board of Directors approved the sale of the Group's interest in OAO AKB National Reserve Bank.

In April 2002 the Federal Securities Commission cancelled the registration of additional stock issued by OAO Zapsibgazprom, a subsidiary of the Group. As a result, the Group increased its interest in the charter capital of OAO Zapsibgazprom to 51%. At present, at the Group's initiative, external supervision has been introduced in respect of OAO Zapsibgazprom under decision of the arbitration court.

In the second quarter of 2002 the Federal Securities Commission cancelled the registration of additional stock issued by OAO Severneftegazprom, which if not cancelled would have reduced the Group's interest in the company's charter capital to 20%. As a result, the Group's interest in the charter capital of OAO Severneftegazprom is 49%.

In April 2002, the Group completed the repurchase of 32% of the shares in ZAO Purgas from Itera pursuant to the repurchase option provided by a share purchase agreement dated 10 February 1999. As a result Group's interest in ZAO Purgas rose from 19% to 51%. ZAO Purgas has a licence for the development of the Gubkinskoye gas field in western Siberia. In connection with the acquisition of these ZAO Purgas shares, the Group paid Itera RR 32 thousand and financed ZAO Purgas repaying RR 5,800 of financing provided by Itera to ZAO Purgas to finance development work.

In April 2002, the shareholders of EuRoPol GAZ s.a., an associated company of the Group, agreed to increase the charter capital of the company. The decision is aimed at providing additional financing for the further construction of the Polish section of the Yamal – Europe pipeline. The amount and timing of the additional contribution into charter capital is under consideration by the shareholders.

During the first quarter of 2002, the Group increased its interest in the majority of the regional companies, in which it held investments, from less than 20% to 51%. These companies are involved in the distribution of gas in Russia (see Note 21).

## OA0 GAZPROM

### NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble as of 31 December 2001)

#### 28 POST BALANCE SHEET EVENTS—(Continued)

##### Borrowings

During the first quarter of 2002 the Group signed an additional agreement of USD 50 million for a five-year period with a consortium led by Moskovsky Narodny Bank Ltd. (interest rate LIBOR +3.75%), a loan agreement of USD 300 million for a six year period with a consortium led by Bayerische Hupo und Ferajnsbank AG (interest rate LIBOR + 3.75%), loan agreements of USD 150 million with Deutsche Bank AG (London) for a one year period (interest rate – 9.5%) and of USD 50 million with the AEB bank for a one year period (interest rate – 8.5%).

During the second quarter of 2002 the Group signed additional loan agreement of USD 200 millions for a two-year period with ABN AMRO Bank N.V. (interest rate – LIBOR+6.15%) and a loan agreement of USD 250 million for a six-year period with a consortium led by Societe Generale (interest rate – LIBOR+3.65%).

In April 2002 the Group issued USD 500 million of Loan Participation Notes due 2007 with an interest rate of 9.125%.

##### Changes in the profit taxation

Chapter 25 "Profit Tax" of the Russian Federation Tax Code became effective since 1 January 2002.

Among other changes the profit taxation procedure has been changed as follows:

- reduced tax rate;
- elimination of the majority of allowances;
- recognition of sales revenue for tax purposes on an accrual basis.
- different depreciation rates for different groups of fixed assets;

Currently it is impossible to accurately assess the impact of the changes in the taxation procedure on the financial position and financial results of the Group.

Starting from 1 January 2002 the Group has been implementing the required tax accounting policy which provides separate accounting for tax liabilities and settlements with the budget in accordance with requirements of Chapter 25 of the Tax Code of the Russian Federation.

##### Changes in taxation of mineral resources

Effective 1 January 2002, royalty, mineral restoration tax and oil condensate have been replaced with a mineral severance tax, which will be imposed at the rate of 16.5% of the value of gas and RR 340 per ton of oil and gas condensate produced. The latter rate is subject to adjustments depending on fluctuations of oil price and the RR exchange rate.

● per cent.

## Loan Participation Notes due 2013

issued by, but without recourse to, Morgan Stanley Bank AG  
for the purpose of financing a loan to

Open Joint Stock Company Gazprom

Issue Price: 100%

RECEIVED  
2005 APR - 5  
OFFICE OF INTERNAL  
CORPORATE AFFAIRS

Morgan Stanley Bank AG (the "Bank") is issuing an aggregate principal amount of U.S.\$ ●● per cent. Loan Participation Notes due 2013 (the "Notes") for the sole purpose of financing a ten-year loan (the "Loan") to OAO Gazprom (the "Borrower," "Gazprom" or the "Company") pursuant to a loan agreement dated ● 2003 (the "Loan Agreement") between the Bank and the Borrower. Subject as provided in the Trust Deed (as defined herein) the Bank will charge by way of first fixed charge as security for its payment obligations in respect of the Notes its rights and interests as lender under the Loan Agreement to The Bank of New York as trustee (the "Trustee"), for the benefit of the holders of the Notes (the "Noteholders") and will assign its administrative rights under the Loan Agreement to the Trustee (the "Loan Administration Assignment").

In each case where amounts of principal, interest and additional amounts (if any) are stated to be payable in respect of the Notes, the obligation of the Bank to make any such payment shall constitute an obligation only to account to the Noteholders, on each date upon which such amounts of principal, interest and additional amounts (if any) are due in respect of the Notes, for an amount equivalent to all principal, interest and additional amounts (if any) actually received by or for the account of the Bank pursuant to the Loan Agreement. The Bank will have no other financial obligation under the Notes. **Noteholders will be deemed to have accepted and agreed that they will be relying solely and exclusively on the credit and financial standing of the Borrower in respect of the financial servicing of the Notes.**

Interest on the Notes will be payable semi-annually in arrear on ● and ● in each year commencing on ● 2003 as described under "Terms and Conditions of the Notes—Interest." The Notes will bear interest of ● % per annum.

The issue price of the Notes is 100% of their principal amount.

Except as set forth herein (see "Taxation"), payments in respect of the Notes will be made without any deduction or withholding for or on account of taxes of the Russian Federation or the Federal Republic of Germany. The Loan may be prepaid at its principal amount, together with accrued interest, at the option of the Borrower upon the Borrower or the Bank being required to deduct or withhold any such Russian or German taxes from payments to be made by them in respect of the Notes or pursuant to the Loan Agreement, or following enforcement of the security created in the Trust Deed and upon the Borrower or the Trustee being required to deduct or withhold any taxes of the Russian Federation or the jurisdiction in which the Trustee is then resident. The Loan may also be prepaid if it becomes unlawful for the Loan or the Notes to remain outstanding, as set out in the Loan Agreement, and thereupon (subject to the receipt of the relevant funds from the Borrower) the principal amount of all outstanding Notes will be prepaid by the Bank, together with accrued interest.

### AN INVESTMENT IN THE NOTES INVOLVES A HIGH DEGREE OF RISK. SEE "RISK FACTORS."

The Notes and the Loan (collectively, the "Securities") have not been, and will not be, registered under the U.S. Securities Act of 1933 (the "Securities Act") and, subject to certain exceptions, may not be offered and sold within the United States or to, or for the account or benefit of, U.S. persons. The Notes will be offered and sold (i) within the United States to qualified institutional buyers (as defined in Rule 144A under the Securities Act ("Rule 144A")) that are also qualified purchasers as defined in Section 2(a)(51) of the U.S. Investment Company Act of 1940 (the "Investment Company Act") in reliance on the exemption from registration provided by Rule 144A (the "Rule 144A Notes"); and (ii) to certain persons in offshore transactions in reliance on Regulation S under the Securities Act (the "Regulation S Notes"). The Bank has not been and will not be registered under the Investment Company Act. The Notes are being sold in reliance on the exemption from the provisions of Section 5 of the Securities Act provided by Rule 144A.

Application has been made to list the Notes on the Luxembourg Stock Exchange. Application has also been made for the Rule 144A Notes to be designated as eligible for trading in the Private, Offering, Resale and Trading through Automated Linkages ("PORTAL") System of the National Association of Securities Dealers, Inc.

The Regulation S Notes and the Rule 144A Notes will be offered and sold in denominations of U.S.\$10,000 or integral multiples thereof except that no Rule 144A Note will be issued in an amount less than U.S.\$100,000. The Regulation S Notes will be evidenced by a global Note (the "Regulation S Global Note"), without interest coupons, which will be registered in the name of The Bank of New York Depository (Nominees) Limited as nominee of, and deposited on or about ● 2003 (the "Closing Date") with The Bank of New York, as common depository for European Bank S.A./N.V. as operator of the Euroclear System ("Euroclear") and Clearstream Banking, société anonyme ("Clearstream, Luxembourg"). The Rule 144A Notes will be evidenced by a global Note (the "Rule 144A Global Note" and, together with the Regulation S Global Note, the "Global Notes"), without interest coupons, which will be registered in the name of Cede & Co. as nominee for, and deposited on or about the Closing Date with The Bank of New York, as custodian for The Depository Trust Company ("DTC"). Ownership interests in the Global Notes will be shown on, and transfers thereof will be effected only through, records maintained by DTC, Euroclear, Clearstream, Luxembourg and their respective participants. Notes in definitive form will be issued only in limited circumstances.

**Morgan Stanley**

The date of this offering circular is ● 2003

The information contained in this preliminary offering circular is subject to completion and amendment. This preliminary offering circular does not constitute an offer to sell or the solicitation of an offer to buy nor may there be any sale of the Notes in any jurisdiction in which such offer, solicitation or sale would be unlawful.

Gazprom, having made all reasonable enquiries, confirms that (i) this offering circular contains all information with respect to Gazprom, Gazprom and its subsidiaries taken as a whole (the "Group"), the Loan Agreement and the Notes that is material in the context of the issue and offering of the Notes; (ii) the statements contained in this offering circular relating to Gazprom and the Group are in every material particular true and accurate and not misleading; (iii) the opinions, expectations and intentions expressed in this offering circular with regard to Gazprom and the Group are honestly held, have been reached after considering all relevant circumstances and are based on reasonable assumptions; (iv) there are no other facts in relation to Gazprom, the Group, the Loan Agreement or the Notes the omission of which would, in the context of the issue and offering of the Notes, make any statement in this offering circular misleading in any material respect; and (v) all reasonable enquires have been made by Gazprom to ascertain such facts and to verify the accuracy of all such information and statements. Gazprom accepts responsibility accordingly. Morgan Stanley & Co. International Limited ("MSIL") accepts responsibility for all information with respect to the Bank.

This offering circular does not constitute an offer of, or an invitation by or on behalf of the Bank, Gazprom or the Managers to subscribe or purchase, any Notes. The distribution of this offering circular and the offering of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this offering circular comes are required by Gazprom, the Bank and the Managers to inform themselves about and to observe any such restrictions. None of the Bank, Gazprom or the Managers has authorized any offer of Notes to the public in the United Kingdom within the meaning of the Public Offers of Securities Regulations 1995 (the "Regulations"). Notes may not lawfully be offered or sold to persons in the United Kingdom except in circumstances which do not result in an offer to the public in the United Kingdom within the meaning of the Regulations or are otherwise in compliance with all applicable provisions of the Regulations. For a description of certain further restrictions on offers and sales of Notes and distribution of this offering circular, see "Subscription and Sale" below.

No person is authorized to provide any information or to make any representation not contained in this offering circular and any information or representation not so contained must not be relied upon as having been authorized by or on behalf of the Gazprom, the Bank, the Trustee, or the Managers. The delivery of this document at any time does not imply that the information contained in it is correct as at any time subsequent to its date.

In connection with this issue, ● or any person acting for it may over-allot or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail for a limited period after the issue date. However, there may be no obligation on ● or any agent of it to do this. Such stabilizing, if commenced, may be discontinued at any time, and must be brought to an end after a limited period.

The information contained in this document has not been reviewed by the U.S. Securities and Exchange Commission (the "SEC"). Should we file a registration statement in the future, the SEC would require modification or reformulation of the information contained in this document, including in particular the information about our hydrocarbon reserves.

**NO REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, IS MADE BY THE MANAGERS AS TO THE ACCURACY OR COMPLETENESS OF THE INFORMATION SET FORTH IN THIS DOCUMENT, AND NOTHING CONTAINED IN THIS DOCUMENT IS, OR SHALL BE RELIED UPON AS, A PROMISE OR REPRESENTATION, WHETHER AS TO THE PAST OR THE FUTURE. NONE OF THE MANAGERS ASSUMES ANY RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF THE INFORMATION SET FORTH IN THIS DOCUMENT. EACH PERSON CONTEMPLATING MAKING AN INVESTMENT IN THE NOTES MUST MAKE ITS OWN INVESTIGATION AND ANALYSIS OF THE CREDITWORTHINESS OF GAZPROM AND THE BANK AND ITS OWN DETERMINATION OF THE SUITABILITY OF ANY SUCH INVESTMENT, WITH PARTICULAR REFERENCE TO ITS OWN INVESTMENT OBJECTIVES AND EXPERIENCE, AND ANY OTHER FACTORS WHICH MAY BE RELEVANT TO IT IN CONNECTION WITH SUCH INVESTMENT.**

None of Gazprom, the managers or any of their respective representatives is making any representation to any offeree or purchaser of the Notes offered hereby regarding the legality of an investment by such offeree or purchaser under appropriate legal investment or similar laws. Each investor should consult with his own advisors as to the legal, tax, business, financial and related aspects of purchase of the Notes.

## NOTICE TO NEW HAMPSHIRE RESIDENTS

NEITHER THE FACT THAT A REGISTRATION STATEMENT, OR AN APPLICATION FOR A LICENSE HAS BEEN FILED UNDER CHAPTER 421-B OF THE NEW HAMPSHIRE REVISED STATUTES WITH THE STATE OF NEW HAMPSHIRE NOR THE FACT THAT A SECURITY IS EFFECTIVELY REGISTERED OR A PERSON IS LICENSED IN THE STATE OF NEW HAMPSHIRE CONSTITUTES A FINDING BY THE SECRETARY OF STATE OF NEW HAMPSHIRE THAT ANY DOCUMENT FILED UNDER RSA 421-B IS TRUE, COMPLETE AND NOT MISLEADING. NEITHER ANY SUCH FACT NOR THE FACT THAT AN EXEMPTION OR EXCEPTION IS AVAILABLE FOR A SECURITY OR A TRANSACTION MEANS THAT THE SECRETARY OF STATE OF NEW HAMPSHIRE HAS PASSED IN ANY WAY UPON THE MERITS OR QUALIFICATIONS OF, OR RECOMMENDED OR GIVEN APPROVAL TO, ANY PERSON, SECURITY OR TRANSACTION. IT IS UNLAWFUL TO MAKE, OR CAUSE TO BE MADE, TO ANY PROSPECTIVE PURCHASER, CUSTOMER, OR CLIENT ANY REPRESENTATION INCONSISTENT WITH THE PROVISIONS OF THIS PARAGRAPH.

### ENFORCEABILITY OF JUDGMENTS

We are an open joint-stock company incorporated under the laws of the Russian Federation and most of our assets are currently located outside the United States and the United Kingdom. In addition, all of our directors and executive officers are residents of countries other than the United States and the United Kingdom. As a result, it may not be possible for you to:

- effect service of process within the United States or the United Kingdom upon any of our directors or executive officers named in this offering circular; or
- enforce, in the U.S. or English courts, judgments obtained in U.S. or English courts against us or any of our directors and executive officers named in this offering circular in any action, including actions under the civil liability provisions of the U.S. securities laws.

In addition, it may be difficult for you to enforce, in original actions brought in courts in jurisdictions located outside the United States, liabilities predicated upon the U.S. securities laws.

Judgments rendered by a court in any jurisdiction outside the Russian Federation will be recognized by courts in Russia only if an international treaty providing for the recognition and enforcement of judgments in civil cases exists between the Russian Federation and the country where the judgment is rendered. No such treaty exists between the United States and the Russian Federation or the United Kingdom and the Russian Federation for the reciprocal enforcement of foreign court judgments.

The Trust Deed is governed by English law and provides for disputes, controversies and causes of action brought by any party thereto against us to be settled by arbitration in accordance with the Rules of the London Court of International Arbitration. The Russian Federation is a party to the United Nations (New York) Convention on the Recognition and Enforcement of Foreign Arbitral Awards. However, it may be difficult to enforce arbitral awards in the Russian Federation due to:

- the inexperience of the Russian courts in international commercial transactions;
- official and unofficial political resistance to the enforcement of awards against Russian companies in favor of foreign investors; and
- the inability of Russian courts to enforce such orders, and corruption.

GENERAL INFORMATION .....	184
OVERVIEW OF THE RUSSIAN GAS INDUSTRY AND ITS REGULATION .....	185
GLOSSARY OF TERMS .....	192
INDEX TO FINANCIAL STATEMENTS .....	F-1
APPENDIX A—DEGOLYER AND MACNAUGHTON LETTER .....	A-1

In this document, the terms “Company,” “we,” “us” and “our” refer to OAO Gazprom and its subsidiaries, unless the context otherwise requires. The term “western Europe” refers to the countries of Andorra, Austria, Belgium, Cyprus, Denmark, Finland, France, Germany, Greece, Greenland, Iceland, Republic of Ireland, Italy, Liechtenstein, Luxembourg, Malta, Monaco, The Netherlands, Norway, Portugal, San Marino, Spain, Sweden, Switzerland, Turkey and the United Kingdom. The term “central and eastern Europe” refers to the countries of Bosnia, Bulgaria, Croatia, Czech Republic, Former Yugoslav Republic of Macedonia (“FYROM”), Hungary, Poland, Romania, Slovakia, Slovenia and Yugoslavia. The term “FSU” refers to the countries of Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Tajikistan, Turkmenistan, Ukraine and Uzbekistan.

We measure our gas condensate and crude oil in metric tons. This document contains conversions of certain volumes from tons into barrels solely for the convenience of the reader. The conversion of volumes from metric tons to barrels varies at each of our fields due to different geological conditions. In this document, however, we use a conversion rate for all conversions of tons to barrels of one ton = 7.33 barrels. This document also contains conversions of cubic meters of natural gas and barrels of gas condensate and crude oil into barrels of oil equivalent solely for the convenience of the reader. In this document, we use a conversion rate for all conversions of one cubic meter of natural gas = 5.885 barrels of oil equivalent, one barrel of gas condensate = one barrel of oil equivalent and one barrel of crude oil = one barrel of oil equivalent.

Information contained under the heading “Overview of the Russian Gas Industry and its Regulation” includes extracts from information and data publicly released by official and other sources, and we accept responsibility for accurately reproducing such information and data but accept no further responsibility in respect of such information and data.

In this document, references to “roubles” and “RR” are to the lawful currency for the time being of the Russian Federation, references to “U.S. dollars,” “dollars,” “U.S.\$” and “\$” are to the lawful currency for the time being of the United States of America and references to “euro” are to the currency introduced at the start of the third stage of European economic and monetary union. This document contains conversions of certain amounts into dollars at specified rates solely for the convenience of the reader. The U.S. dollar amounts have been translated

from the RR amounts at the rate of RR31.64 = U.S.\$1.00, which is the rate published by the Central Bank of Russia on September 30, 2002. With effect from January 1, 1998, the rouble was redenominated, with one new rouble being set equal to one thousand old roubles. All references herein to amounts in "roubles" are references to new roubles, and any rouble amounts relating to the period prior to January 1, 1998 have been restated in new roubles. No representation is made that the rouble or dollar amounts referred to herein could have been or could be converted into roubles or dollars, as the case may be, at these rates, at any particular rate or at all.

## FORWARD-LOOKING STATEMENTS

Certain statements in this document are not historical facts and are “forward-looking.” This document contains certain forward-looking statements in various locations, including, without limitation, under the headings “Summary,” “Risk Factors,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Business.” We may from time to time make written or oral forward-looking statements in reports to shareholders and in other communications. Examples of such forward-looking statements include, but are not limited to:

- statements of our plans, objectives or goals, including those related to products or services;
- statements of future economic performance; and
- statements of assumptions underlying such statements.

Forward-looking statements that may be made by us from time to time (but that are not included in this document) may also include projections or expectations of revenues, income (or loss), earnings (or loss) per share, dividends, capital structure or other financial items or ratios.

Words such as “believes,” “anticipates,” “expects,” “estimates,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that the predictions, forecasts, projections and other forward-looking statements will not be achieved. You should be aware that a number of important factors could cause actual results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- inflation, interest rate and exchange rate fluctuations;
- the price of natural gas;
- the effects of, and changes in, the policy of the government of the Russian Federation (the “Government”);
- the effects of competition in the geographic and business areas in which we conduct operations;
- the effects of changes in laws, regulations, taxation or accounting standards or practices;
- our ability to increase market share for our products and control expenses;
- acquisitions or divestitures;
- technological changes;
- the effects of international political events on our business; and
- our success at managing the risks of the aforementioned factors.

This list of important factors is not exhaustive. When relying on forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, especially in light of the political, economic, social and legal environment in which we operate. Such forward-looking statements speak only as of the date on which they are made, and are subject to any continuing obligations under the Listing Rules of the Luxembourg Stock Exchange. Accordingly, we do not undertake any obligation to update or revise any of them, whether as a result of new information, future events or otherwise. We do not make any representation, warranty or prediction that the results anticipated by such forward-looking statements will be achieved, and such forward-looking statements represent, in each case, only one of many possible scenarios and should not be viewed as the most likely or standard scenario.

**THIS PAGE INTENTIONALLY LEFT BLANK**

## SUMMARY

### Overview

We are the world's largest natural gas company, and the world's largest publicly-traded hydrocarbons company, in terms of reserves, production and transportation. We supply substantially all of the natural gas consumed in Russia, approximately 50% of the natural gas consumed in the six FSU countries to which we export our natural gas—Belarus, Ukraine, Moldova, Lithuania, Estonia and Latvia—and approximately 26% of the natural gas consumed in Europe. For the year ended December 31, 2001, our net sales were RR683.9 billion (U.S.\$21.6 billion) and our operating profit was RR197.7 billion (U.S.\$6.2 billion). For the nine months ended September 30, 2002 and 2001, our net sales were RR420.4 billion (U.S.\$13.3 billion) and RR510.3 billion (U.S.\$16.1 billion), respectively, and our operating profit was RR94.8 billion (U.S.\$3.0 billion) and RR166.1 billion (U.S.\$5.3 billion), respectively. As of September 30, 2002, we had total assets of RR2,360 billion (U.S.\$74.6 billion) and total shareholders' equity of RR1,642 billion (U.S.\$51.9 billion).

*Reserves.* We estimate our reserves using Russian classifications and methodologies (the "Russian reserves system"), which differ significantly from internationally accepted classifications and methodologies developed by the Society of Petroleum Engineers and approved by the Joint Reserves Evaluation Committee ("SPE International Standards"), in particular with respect to the manner in which and the extent to which commercial factors are taken into account in calculating reserves. As of September 30, 2002, we had Russian reserves system A, B and C1 reserves (including that portion of reserves attributable to us through shareholdings in our subsidiaries, entities in which we hold less than 50% and joint ventures) of 28.4 tcm of natural gas, 1.3 billion tons (9.4 bbls) of gas condensate and 573.9 million tons (4.2 bbls) of crude oil, for a total of 180,992 mmboe. Most of our natural gas reserves are located in western Siberia and are tightly geographically concentrated. As of September 30, 2002, our three largest fields, Urengoiskoye, Yamburgskoye and Zapolyarnoye, all located in the Yamal-Nenets Region in western Siberia, accounted for 13.3 tcm of A, B and C1 natural gas reserves, or 46.8% of our total A, B and C1 natural gas reserves. The remainder of our reserves outside of western Siberia are located in the Barents Sea and southern Russia.

Since 1997, DeGolyer and MacNaughton, an independent U.S. petroleum engineering consulting firm, has been evaluating our reserves according to SPE International Standards. As of December 31, 2000, DeGolyer and MacNaughton had evaluated 18 fields, representing approximately 85%, 70% and 56% of our A, B and C1 reserves of natural gas, gas condensate and crude oil, respectively. See "Business—Reserves and Production." Based on this evaluation, we had proved reserves at these 18 fields as of December 31, 2000 of 17.0 tcm of natural gas, 286.2 million tons (2,098 mmbbls) of gas condensate and 8.5 million tons (63 mmbbls) of crude oil and probable reserves of 1.5 tcm of natural gas, 77.5 million tons (568 mmbbls) of gas condensate and 98.8 million tons (724 mmbbls) of crude oil. We believe that the 18 fields evaluated by DeGolyer and MacNaughton are likely to contain most of our reserves which would be deemed proved or probable upon a full evaluation of our upstream properties.

*Exploration and Production.* As of December 31, 2002, we held 18 licenses for exploration and assessment (without development rights) with terms of up to five years, 16 combined hydrocarbon exploration, assessment and production licenses with terms of 25 years and with remaining terms of between 18 and 25 years, and 77 production licenses with terms of 20 to 25 years and with remaining terms of between 13 and 20 years. In 2001, we produced 512.0 bcm of natural gas, 9.5 million tons (69.6 mmbbls) of gas condensate and 704 thousand tons (5.2 mmbbls) of crude oil, for a total of 3,088.3 mmboe as compared with 523.2 bcm of natural gas, 9.3 million tons (68.2 mmbbls) of gas condensate and 719 thousand tons (5.3 mmbbls) of crude oil, for a total of 3,153.0 mmboe in 2000. Our natural gas production represented approximately 88.1% of total natural gas production in Russia in 2001. Four of our production subsidiaries, Urengoigazprom, Yamburggazdobycha, Noyabrskgazdobycha and Nadymgazprom, produced 92.5% of our natural gas in 2001. During the nine months ended September 30, 2002, we produced 377.3 bcm of natural gas, 7.2 million tons (52.7 mmbbls) of gas condensate and 523 thousand tons (3.8 mmbbls) of crude oil, for a total of 2,277.2 mmboe compared with 371.0 bcm of natural gas, 7.1 million tons (51.7 mmbbls) of gas condensate and 524.1 thousand tons (3.8 mmbbls) of crude oil, for a total of 2,220.7 mmboe during the nine months ended September 30, 2001. The Zapolyarnoye field which came on stream in the third quarter of 2001, produced approximately 24.7 bcm of natural gas in the first nine months of 2002, accounting for approximately 6.5% of our total natural gas production in that period.

According to preliminary estimates, in 2002 we produced 521.9 bcm of natural gas, 9.9 million tons (72.6 mmbbls) of gas condensate and 706 thousand tons (5.2 mmbbls) of crude oil. Our production of natural gas in 2002 represented the first annual increase in our production since 1999.

*Transportation.* We own and operate Russia's Unified Gas Supply System (the "UGSS"), which gathers, processes, transports, stores and delivers substantially all the natural gas sold in Russia. The UGSS comprises the world's largest high-pressure trunk pipeline system, with a total length of over 155,000 km, 256 compressor stations and 23 underground natural gas storage facilities. We control and manage the transportation of gas in the UGSS network from our central dispatch management center, located in Moscow. We transported 590.3 bcm and 608.8 bcm of natural gas through the UGSS in 2001 and 2000, respectively, and 424.6 bcm and 422.3 bcm of natural gas in the nine months ended September 30, 2002 and 2001, respectively. Although we use most of the UGSS capacity for the transportation of the natural gas we produce, we also provide gas transportation services to third parties. Third-party use accounted for 12.9% and 15.4% of the total volume of natural gas supplied through the UGSS in 2001 and 2000, respectively, and 13.2% and 12.9% of the total volume of natural gas supplied through the UGSS in the nine months ended September 30, 2002 and 2001, respectively.

As discussed more fully below, beginning in the late 1990s, we began acquiring interests in regional gas distribution companies. The regional gas distribution companies own and operate medium- and low-pressure pipelines that transport gas to end consumers.

*Processing and Refining.* Our refining operations consist of the operations of our principal wholly owned refining facilities and our majority owned subsidiary Sibur, which substantially increased its operations only in the third quarter of 2002 after reaching an amicable agreement with its creditors and emerging from external supervision. For a discussion of Sibur, see "Business—Refining." Our wholly owned refining facilities process natural gas for pipeline transportation, stabilize gas condensate and refine natural gas, gas condensate and crude oil into refined products. The processing, stabilizing and refining of natural gas, gas condensate and crude oil is carried out by six integrated refineries that remove hazardous and corrosive substances from natural gas and gas condensate and produce a broad range of products. The refineries also stabilize and refine gas condensate and crude oil as a single crude oil and condensate mixture. Processed and refined products derived from natural gas include dry marketable natural gas, de-ethanized natural gas, liquefied natural gas, ethane, helium, sulfur and odorant. Stabilized and refined products derived from gas condensate and crude oil include stable gas condensate, gas condensate distillate, diesel fuel, furnace fuel oil and automobile gasoline. In 2001, we processed and refined 34.6 bcm of natural gas and 10.1 million tons (74.0 mmbbls) of gas condensate and crude oil, for a total volume of 277.6 mmboe, compared to 35.3 bcm of natural gas, 9.3 million tons (68.2 mmbbls) of gas condensate and crude oil, for a total volume of 276.0 mmboe in 2000. During the nine months ended September 30, 2002, we refined 25.1 bcm of natural gas, 7.5 million tons (55.0 mmbbls) of gas condensate and crude oil, for a total volume of 202.7 mmboe, as compared with 25.9 bcm of natural gas, 7.5 million tons (55.0 mmbbls) of gas condensate and crude oil, for a total volume of 207.4 mmboe in the nine months ended September 30, 2001. We also provide gas condensate refining services for third parties.

*Exports.* We export our natural gas through our wholly-owned trading subsidiary, Gazexport. We exported to Europe approximately 24.8% and 24.7% of the natural gas we produced in 2001 and 2000, respectively, and approximately 25.2% and 24.8% of the natural gas we produced in the nine months ended September 30, 2002 and 2001, respectively. Our exports to Europe also accounted for approximately 27.2% and 26.9% of the volume of natural gas we sold in 2001 and 2000, respectively, and 29.5% and 28.3% of the volume of natural gas we sold in the nine months ended September 30, 2002 and 2001, respectively. Net sales of natural gas to Europe accounted for 69.4% and 70.9% of our total net gas sales in 2001 and 2000, respectively, and 64.8% and 70.4% of our total net gas sales in the nine months ended September 30, 2002 and 2001, respectively. According to the statistical survey CEDIGAZ—"Natural Gas in the World—2001," Survey August 2002, we supplied 20.2% of the natural gas consumed in western Europe and 58.9% of the natural gas consumed in central and eastern Europe in 2001. Most of our exports are transported by pipeline through Ukraine and through the Yamal-Europe pipeline, part of which came on stream in 1999.

*Domestic sales.* We sell our products domestically through our wholly-owned subsidiary Mezhrefiongaz and its 43 majority-owned regional marketing subsidiaries to large industrial consumers, to regional gas distribution companies and to household consumers. Historically, Mezhrefiongaz sold natural gas to third-party regional gas distribution companies and to large industrial consumers. Beginning in the late 1990s, we began acquiring interests through debt for equity swaps in regional gas distribution companies that had failed to pay for the gas we sold them. We currently have controlling interests in 89, and non-controlling interests in an additional 84, of the 318 regional gas distribution companies in Russia. The regional gas distribution companies own and operate medium- and low-pressure pipelines that transport gas to end consumers. When we acquire controlling interests in the regional gas distribution companies, we are able to capture the transportation and regional energy sales tariffs that are payable to them in respect of the transportation services they provide.

We are beginning to implement a strategy to streamline our domestic marketing operations by removing Mezhhregiongaz from our marketing chain and reassigning it primary responsibility to collect unpaid debts and develop our electronic trading market for gas. We believe that removing Mezhhregiongaz from the marketing chain will result in cost and tax savings and increase the efficiency of our marketing.

*New senior management.* Our annual general shareholders' meeting in June 2001 began a process that has led to the replacement of substantially all of the senior management team that ran our business since the early 1990s. Our new senior management team devoted its attention first to familiarizing itself with our extensive operations and to intensifying our efforts to reacquire certain assets disposed of in prior years. Our senior management is now engaged in the development and implementation of our strategy, including initiatives relating to the disposition of non-core assets, cost reductions, debt reduction, priorities for the development of gas fields and infrastructure, and our relationship with the Government. See "Business—Strategy" and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources."

*Relationship with the Government.* The Russian Federation currently owns 38.37% of our charter capital, and representatives of the Government hold six of the 11 seats on our Board of Directors. Moreover, as of December 31, 2002, our subsidiaries held approximately 15.11% of our shares, which they are entitled to vote as owners. In addition, we are a "natural monopoly" under the Russian Federal Law "On Natural Monopolies" No. 147-FZ dated August 17, 1995. As a result, the Government regulates the prices we charge for gas in the domestic market, the tariffs we charge for the transportation of third parties' gas through the UGSS and other matters affecting our business. For example, we are required to have our budget, capital expenditure program and borrowing program approved by the Government. Through its share ownership, representation on our Board of Directors and role as our regulator, the Government has a strong influence over our operations. At the same time, we play a significant role in Russia's financial system and economy. According to the International Energy Agency—Russia Energy Survey, 2002, we accounted for 20% of federal budget revenues, 20% of foreign exchange earnings and approximately 6% of GDP of the Russian Federation in 2000. See "Risk Factors—Risks Relating to our Business—The Government has exercised, and can be expected to continue to exercise, a strong influence over our operations."

## **History and Privatization**

Prior to 1991, the Russian gas industry was regulated by the Council of Ministers of the gas industry. State-owned concern "Gazprom", which was formed in 1991, was the successor to the Council of Ministers of the gas industry. This state-owned concern formed the basis for our transformation into a joint stock company in accordance with Presidential Decree No. 1333 of November 5, 1992 "On the Transformation of the State Gas Concern Gazprom into Russian Joint Stock Company Gazprom" ("Decree No. 1333") and Resolution of the Council of Ministers of the Government of the Russian Federation No. 138 of February 17, 1993 "On the Establishment of Russian Joint Stock Concern Gazprom" ("Order No. 138"). We are responsible for ensuring the efficient operation and development of the UGSS and for natural gas exports through Gazexport, our wholly-owned foreign trade subsidiary.

We are charged by the Government with the following principal tasks:

- ensuring a reliable supply of natural gas to customers in Russia and to foreign customers and supplying gas abroad under inter-governmental and inter-state agreements;
- conducting a coordinated technical and industrial policy for maintaining and further developing the UGSS;
- controlling the operation of the UGSS;
- financing and constructing natural gas pipelines and high pressure outlets to service areas of Russia where natural gas was previously unavailable; and
- providing access for any independent producer of natural gas to the UGSS in proportion to the amount of natural gas produced by such independent producer in Russia.

Our functions as owner of the UGSS and providing access to the UGSS are now regulated in accordance with the Federal Law "On Gas Supply in the Russian Federation."

The Council of Ministers of the Russian Federation approved our original Charter, and we were registered as an open joint stock company on February 25, 1993. In 1993 and 1994 the Government issued us with licenses pursuant to the Subsoil Resources Law of 1992, granting us rights to exploit hydrocarbon reserves.

The Russian Federal Law "On Gas Supply in the Russian Federation" states that at least 35% of the UGSS owner's shares (i.e., Gazprom) must be retained in federal ownership for an indefinite period of time and may only be disposed of pursuant to federal law. These shares, together with the 0.87% of our shares not placed during the privatization program in 1993 and 1994 and the 2.5% of our shares not sold in the second quarter of 1999, comprise the 38.37% of our shares currently held by the Government.

### **Strategy**

Our main strategic objective is to maintain and strengthen our position as a leading gas company, both domestically and globally, by continuing to adapt to a rapidly changing business environment. To achieve this objective, we plan to:

- meet our production targets, including our natural gas production target of 530 bcm in 2003 and thereafter;
- ensure the effective, reliable and balanced supply of gas to Russian customers; and
- fulfill our long-term export contracts and inter-governmental agreements on gas supply.

In implementing these plans, we intend to apply the following principles:

- managing our business effectively, with a view to enhancing the profitability of our assets and reducing our costs;
- respecting our shareholders' rights, including those of our major shareholder — the Russian Government — as well as those of our minority shareholders;
- improving our corporate governance and the transparency of our business activities; and
- inculcating in our managers a sense of personal responsibility for the success of our business.

To implement these strategic objectives, plans and principles, we have developed near-term and medium- to long-term strategic priorities.

#### *Near-term Strategic Priorities*

Our near-term strategic priorities are to improve our transportation network and overall operating and financial performance, as well as to take the steps required now to enable us to develop our gas fields over the medium and longer term. Our near-term strategy includes:

**Improving our domestic transportation network.** Safe, reliable and cost-effective transportation within Russia of the natural gas we produce is essential to our business. In addition, because we expect the production of gas by independent companies within Russia to increase, reliable and cost-effective transportation within Russia of independently-produced gas will become increasingly important to us. In addition to the pipes, pumping stations and other critical features of our pipeline network, underground storage facilities also play a key role in ensuring the reliability of gas supply. Accordingly, we are planning significant investments in the next several years to improve the performance of the UGSS. Our budgeted capital expenditures on our transportation network for 2003 are RR93.2 billion, of which RR17.6 billion is planned for refurbishing the UGSS, mainly to replace pipes and reconstruct gas pumping stations, and for constructing and modernizing underground storage facilities. The remainder is planned for the expansion of our transportation network, largely outside Russia, as discussed more fully below.

**Reducing costs and improving investment efficiency.** Our operating environment is becoming increasingly competitive, and our ability to control costs will be a key determinant of our success domestically and abroad. We believe we can reduce our operating, financial and investment costs and improve our investment efficiency in future years. We have developed and approved a plan for 2003 to reduce operating, investing and financing costs by more than RR40 billion as measured by Russian Accounting Regulations (which differ very significantly from IAS).

**Paying down debt and optimizing our remaining debt portfolio.** As our current leverage ratio (net debt divided by net debt plus shareholders' equity) was only 20.3% as of September 30, 2002, we do not believe we have an excessive debt burden and intend to continue using debt financing. However, most of our outstanding financial debt matures in the next several years. In 2003, we will seek to pay down a portion of our debt, partly with savings we intend to realize through our cost cutting program, and intend to continue our efforts to diversify the financing instruments we employ. In doing so, we plan to continue to focus on reducing the share of short-term debt in our total debt portfolio, lowering the cost of debt (in part by reducing the amount of promissory notes in our debt portfolio), and better balancing fixed versus floating interest rate risk and currency risk. By paying down a portion of our debt and optimizing our remaining debt portfolio we believe we should be able to enhance our ability to access the international capital markets through a wider variety of instruments and maturities.

**Improving corporate governance by introducing best-practice management techniques and increased levels of transparency.** At our last shareholders' meeting, we approved a new corporate governance charter outlining procedures for the protection of shareholders' rights. In addition, our Board of Directors adopted resolutions on September 27, 2002 whereby all transactions, whether with interested parties or not, involving (i) our shares, or interests or participations that we or our subsidiaries hold in other companies; (ii) loans or other borrowings having a value of greater than 0.3% of our net balance sheet assets determined under Russian accounting principles; and (iii) purchases or disposals of assets having a value greater than 0.3% of our net balance sheet assets determined under Russian Accounting Regulations require prior approval by our Board of Directors. Our new management team, now consisting of an expanded and almost entirely new Management Committee, has also recently launched several initiatives to measure more accurately and improve our operating and financial performance, including programs related to optimizing domestic sales (including increasing cash collection), cost cutting, deployment of investment capital and debt management. Finally, we intend to continue our efforts with respect to increasing transparency through ongoing publication of interim and year-end IAS accounts, improved levels of disclosure for public market financings, and improved relations with our shareholders.

**Increasing cash generation from domestic sales through price increases, streamlining of sales structures and continued improvements in payment discipline.** Natural gas prices in Russia are regulated by the Government. Over the past three years, increases in nominal domestic gas prices, on a cumulative basis, have failed fully to recover the effects of inflation. Although the average domestic price of gas was 15.5% higher in real terms in 2001 than in 2000, and 2.1% higher in the first nine months of 2002 than in the comparable period in 2001, domestic gas prices remain below international prices (even after netting back export and customs duties and transportation costs). The Government increased nominal gas prices by an average of 20% for the year 2003 for both industrial consumers and household consumers by raising the price of gas for industrial consumers by 20% from January 1, 2003 and for household consumers by 23% from February 1, 2003, and we continue to work with the Government to reduce the current disparity between export and domestic natural gas prices. We are also improving payment discipline in the domestic market by imposing stricter payment requirements and targeting our largest debtors. In addition, we intend to streamline our domestic sales structure by removing our wholly-owned subsidiary, Mezhrefiongaz, from the marketing chain and dealing directly with our regional marketing companies. Mezhrefiongaz is being downsized and reassigned primary responsibility to collect unpaid debts for natural gas and develop an electronic trading market for natural gas at unregulated prices.

**Continuing to implement our asset reacquisition program and making further sales of non-core assets.** Commencing in 2000, we began to implement a program to reacquire certain assets, including certain assets disposed of through transactions with Itera under our previous management. See "Certain Transactions—Itera." We have recently succeeded in reacquiring some of these assets and continue to pursue others. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Certain Acquisitions and Dispositions." We are also implementing a program of divesting certain non-core properties, and have recently sold shareholdings in a number of companies including Gazmetall, National Reserve Bank,

Red October wood-working plant and Druzhkovski ZGA, and intend to continue divesting inefficient non-core activities. We may also sell significant stakes in non-core businesses as the first step in a divestment plan. Through divestment of non-core assets, we believe we can improve our overall performance.

*Medium- to long-term strategic priorities*

Our medium- to long-term strategic priorities are to continue to increase production and profitability, including by:

**Developing cost-effective new production from our existing reserves base to replace declines in our largest old fields.** Based on (i) our current export contract portfolio; (ii) anticipated future demand and prices domestically; and (iii) our reserves base, we believe that achieving annual natural gas production of 530 bcm and maintaining our production at that level for the foreseeable future is strategically optimal. In light of expected continuing declines from three of our largest old west Siberian fields (Urengoiskoye, Yamburgskoye and Medvezhye), we intend to continue to invest in developing new production. Since 1994, we have invested RR72.9 billion in developing the Zapolyarnoye field, production from which was launched in 2001 and reached approximately 36.8 bcm in 2002. We intend to invest another RR68.8 billion in developing the Zapolyarnoye field to full capacity, including a pipeline connecting the field to the UGSS. We intend to complete the development of Zapolyarnoye by 2006, after which production should reach 100 bcm per year. We also intend to invest in new production from our other western and eastern Siberian, Far Eastern and southern Russian deposits and also in off-shore fields, including Obsk-Tazovskaya. See "Business—Reserves and Production—Development Activities." To develop and maintain this production as efficiently as possible, we intend to work closely with international energy service companies and local institutes, both of which are essential to ensuring the best use of latest technologies.

**Further developing transportation infrastructure to meet growing demand for gas and increase our flexibility in delivering gas to export and domestic markets.** To meet domestic gas supply requirements and our contractual export obligations, we are developing new pipeline construction projects, such as Yamal-Europe (Torzhok-Poland), Russia-Turkey (Blue Stream), Zapolyarnoye-Urengoi, north areas of the Tyumen region-Torzhok, and Pochinky-Izobilnoye-SSPHG. We expect demand for gas in our core export market (Europe) to grow, and our export obligations to those markets to grow as well. We have recently completed and launched the first stage of the Blue Stream pipeline from Russia to Turkey under the Black Sea, with planned capacity of 16 bcm per year. We have also recently announced plans to develop a north European pipeline, from northwest Russia (under the Baltic Sea) to the German shore, with capacity of 20 bcm per year. The anticipated cost of the north European pipeline is U.S.\$3 billion, the financing of which we are currently discussing with potential partners. We are also proceeding with the Yamal-Europe project. The purpose of the project is to meet our contractual obligations to supply natural gas to Europe and to diversify export routes. Connecting the Yamal-Europe pipeline to the existing natural gas transportation network in Germany will allow for the full integration of this pipeline into the European gas network. In addition, we are currently analyzing opportunities in Asian markets and the potential attractiveness of investments in gas production and transportation infrastructure to meet anticipated demand growth, particularly in China.

**Enhancing our refining capabilities.** Our long-term refining strategy is to enhance our competitive position in Russia, the FSU and Europe, in particular by building on our 51% interest in OAO Sibur, one of Russia's leading petrochemical companies. We plan to modernize our gas processing and refining facilities at Sibur and elsewhere in order to increase our production of refined products overall (and our refining throughput) as well as the depth of our refining, allowing us to produce higher margin products.

**Enhancing profitability by taking advantage of the profitable and growing European export markets and by increasing cash generation from domestic and FSU sales.** In the first nine months of 2002, net sales of natural gas to Europe represented 29.5% of our total gas sales volumes and 64.8% of our net gas sales. We expect to increase our export sales volumes under our export contracts. This should allow us to enhance profitability. In addition, we intend to continue our current efforts to (i) improve the profitability of our domestic sales by lobbying the Government for price increases; (ii) improve payment discipline; and (iii) sell gas on the planned open domestic exchanges at prices above regulated prices.

**Continuing to develop strategic partnerships, both internationally and in Russia.** We have entered into various strategic partnerships, both domestically and abroad, and are continually seeking new opportunities to maximize the value of our assets through these relationships. We have established a joint venture, WINGAS, with BASF Group ("BASF") which owns several pipelines in Germany and allows us to access that market further downstream than by delivering at the border only. We have also entered into a strategic partnership agreement with Royal Dutch/Shell Group for various projects, including the development of the Neokomian layer of our Zapolyarnoye field and the construction with Petro China and Exxon/Mobil of a west-east pipeline in China. Domestically, in November 2002, we entered into a strategic partnership agreement with OAO LUKOIL ("LUKOIL"), Russia's largest oil producer. LUKOIL produces natural gas at fields in western Siberia that are located close to our major natural gas fields. The agreement provides, *inter alia*, for cooperation in oil and gas projects in Russia and other countries, such as Uzbekistan, Kazakhstan, Turkmenistan, Iran and Iraq. We have not yet undertaken any projects under this agreement. Two specific projects are, however, currently under consideration: the joint development of hydrocarbon structures in the Caspian Sea; and the transportation of hydrocarbons and condensate through our pipeline network. In the latter, LUKOIL intends to construct an approximately 160 km section of pipeline connecting its fields to our existing pipeline infrastructure in western Siberia and to transfer the pipeline to us in exchange for guaranteed access to our transportation network. The project would be completed in 2006. We have also entered into cooperation agreements with OAO NK Rosneft ("Rosneft"), including agreements for the development of the Shtokmanovskoye field. We anticipate entering into strategic agreements with other domestic independent producers in the future.

**Building our research and development capabilities further to ensure low-cost development, production and transportation of our gas to increasingly competitive markets.** We invest in research and development in a number of scientific and technical areas. In general, our research and development focuses on expanding our mineral resource base, developing hydrocarbon deposits in new regions (for example, the Ob-Taz Estuary, Arctic offshore fields and the Yamal Peninsula), maintaining the reliability of the UGSS, ensuring production in fields that are being developed, optimizing financial, investment and pricing policies and increasing ecological and industrial safety. We are focusing on several specific projects, including researching how to extract natural gas cost-effectively from the Yamal Peninsula fields and increasing the efficiency of gas transportation via our pipelines.

### **The Russian Gas Industry**

The Russian natural gas industry developed during the Soviet era and expanded rapidly after the discovery in the 1960s of significant reserves in the exceptionally large natural gas fields of western Siberia. Russia experienced a profound crisis in the early 1990s as a result of the dissolution of the Soviet Union, suffering a decline in industrial production and GDP.

Between 1990 and 1999, the Government's policies on natural gas industry structure and prices kept demand for natural gas and natural gas production relatively stable in comparison to demand for other energy sources over the same period, such as oil and coal. Total natural gas production declined by only 7.6% over the period, whereas the production of oil and coal declined by 41.7% and 36.7%, respectively. Moreover there has been a shift away from the use of oil and coal in favor of natural gas over the period, primarily because domestic natural gas prices have been kept at a low level.

Since the dissolution of the Soviet Union, the oil and coal industries have been restructured into several regional enterprises whereas the natural gas industry (including production, refining, transportation and sales) has remained unified.

## Summary Consolidated Financial Information

The summary consolidated financial information set forth below shows our historical consolidated financial information as of December 31, 2001, 2000 and 1999 and for the years then ended and as of September 30, 2002 and 2001 and for the nine months then ended. The annual consolidated financial information as of December 31, 2001, 2000 and 1999 and for the years then ended has been extracted from, and should be read in conjunction with, the annual audited consolidated financial statements included elsewhere in this offering circular. The interim consolidated financial information as of September 30, 2002 and 2001 and for the nine months then ended has been extracted from, and should be read in conjunction with, the unaudited consolidated interim condensed financial information included elsewhere in this offering circular. The annual and interim consolidated financial information should also be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" below.

Our annual consolidated financial statements have been prepared in accordance with International Accounting Standards ("IAS"). Our interim consolidated condensed financial information has been prepared in accordance with IAS 34 "Interim Financial Reporting" ("IAS 34"). IAS differs in certain respects from generally accepted accounting principles applied in the United States ("U.S. GAAP"). For a summary of certain differences between IAS and U.S. GAAP that are relevant to us, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Summary of Certain Differences between IAS and U.S. GAAP."

Our consolidated financial information includes a restatement for changes in the general purchasing power of the RR in accordance with IAS 29, "Financial Reporting in Hyperinflationary Economies" ("IAS 29"). IAS 29 requires that financial statements prepared in the currency of a hyperinflationary economy such as Russia's be stated in terms of the measuring unit current at the most recent balance sheet date. The restatement is calculated from the conversion factors derived from the Russian Federation Consumer Price Index, published by the Russian Statement Committee on Statistics ("Goskomstat"), and from indices obtained from other published sources for years prior to 1992.

The impact of stating our financial information in terms of the measuring unit current at the most recent balance sheet date is to:

- inflate current period transactions recorded in the statement of operations of the local statutory books by the average rate of inflation for the period in order to state them in terms of the purchasing power of the RR as of the balance sheet date (i.e., using the average inflation factor of 1.0335 for all relevant transactions in the nine months ended September 30, 2002);
- restate the period end non-monetary assets and liabilities and shareholders' equity, including share capital, in terms of the measuring unit current as of the period end; and
- restate all comparatives, both monetary and non-monetary items, in terms of the purchasing power of the RR as of the most recent balance sheet date (i.e., for the information included in this offering circular, to inflate the comparatives in terms of the purchasing power of the RR as of September 30, 2002).

The restatement of all comparatives, in particular, can have a significant impact on our reported sales and operating margins. For example, sales expressed in constant RR will decrease if increases in nominal prices are lower than inflation and will increase less than might otherwise be expected even when increases in nominal prices are higher than inflation. Our ability to increase the prices we charge for our gas sales in the domestic market is constrained by Government regulations, and the impact of U.S. dollar and euro price increases for our export sales has been offset in recent periods by the real appreciation of the RR (i.e., by a rate of inflation that is higher than the rate at which the RR is depreciating against the U.S. dollar or euro). As a result, our reported sales have lagged behind the increases in our actually realized prices in nominal terms. On the other hand, our costs, which are mainly in RR and are generally not regulated, have tended to increase in line with or even above inflation in recent periods.

In addition, the restatement of all comparatives can have a significant impact on our debt balances. For example, even though we borrowed more than we repaid during the nine months ended September 30, 2002 and the years ended December 31, 2001, 2000, 1999, the restatement of our comparatives into current purchasing power results in our reported debt balances having declined. (The ratios we show below are not affected by this, because the other components of the ratios are subject to similar adjustments.)

All RR amounts set forth below are expressed in constant RR as of September 30, 2002 purchasing power. The U.S. dollar amounts set forth below were not included in our annual consolidated financial statements or our interim consolidated condensed financial information and are provided for convenience only. They should not be construed as representations that the RR amounts have been or could be converted into U.S. dollars at that or any other rate or as being representative of the U.S. dollar amounts that would have resulted if we reported in U.S. dollars. The U.S. dollar amounts have been translated from the RR amounts at the rate of RR31.64 = U.S.\$1.00, which is the rate published by the Central Bank of Russia on September 30, 2002.

Net debt/Adjusted EBITDA	N/A		N/A		1.40		1.31		2.37	

Notes:

- (1) Includes impairment provisions for accounts receivable and prepayments, assets under construction, investments and other long-term assets, guarantees and other charges, and inventory obsolescence.
- (2) Interest expense on taxes payable and other interest expense, offset by interest income. See note 3 below for an explanation of interest expense on taxes payable.
- (3) Exchange gain and gain on restructured taxes, less exchange loss.

On September 3, 1999 the Government issued regulation # 1002 allowing certain companies to negotiate the restructuring of various overdue taxes, interest and fines due to the federal government authorities over ten years. Interest accrues on the restructured tax payables (excluding interest and fines) at a rate of 5.5% per annum, representing 1/10 of the Central Bank of Russia's annual refinancing rate (55%) as specified in the regulation, and is paid quarterly. Current tax payments must be made timely. If the terms of the restructuring are violated, the original nominal value of the tax payable (including interest and fines) becomes due with additional interest of 1/300 of the Central Bank refinancing rate accruing for each day since the restructuring agreement.

During the years ended December 31, 2001 and 2000 and the nine month period ended September 30, 2002, certain of our subsidiaries signed such restructuring agreements. This resulted in the recognition of a gain in each of the respective periods based on the difference between the estimated fair value of the new agreements (based on discounted future cash flows) and the carrying amount of the old payables. This gain is reflected in gain on restructured taxes. Following the restructurings, we recognize the amortization of the discount and the interest accruing under the restructuring agreements as interest expense on taxes payable, which also includes interest that accrues when tax payments are overdue.

- (4) Monetary gain and share of net income (losses) of associated undertakings and gains (losses) on available-for-sale investments. Monetary gain reflects the effect of inflation on our net monetary liability position as a result of the application of IAS 29.
- (5) Cash and cash equivalents and certain restricted cash include balances of cash and cash equivalents restricted as to withdrawal under the terms of certain borrowings and other contractual obligations but exclude cash restricted as to withdrawal under banking regulations.
- (6) Operating profit plus depreciation and the provisions referred to in note 1 above except for provisions for accounts receivable and prepayments. Provisions for accounts receivable and prepayments were RR7,467 million, RR15,920 million, RR33,638 million, RR34,643 million and RR20,088 million for the nine months ended September 30, 2002 and 2001 and the years ended December 31, 2001, 2000 and 1999, respectively. Adjusted EBITDA should not be considered as an alternative to net profits, operating profit, net cash provided by operating activities or any other measure of performance under IAS.
- (7) Interest expense on taxes payable and other interest expense. See note 3 above for an explanation of interest expense on taxes payable.
- (8) Gross interest expense less interest income.
- (9) Short-term borrowings and current portion of long-term borrowings, short-term promissory notes payable, long-term borrowings, long-term promissory notes payable and restructured tax liabilities.
- (10) Total debt less cash and cash equivalents and balances of cash and cash equivalents restricted as to withdrawal under the terms of certain borrowings and other contractual obligations.

### Summary Reserves Information

We estimate our reserves of natural gas, gas condensate and crude oil using the "Russian reserves system," which differs significantly from SPE International Standards, in particular with respect to the manner in which and the extent to which commercial factors are taken into account in calculating reserves. See "Business—Reserves and Production—Reserves."

The estimation of reserves of natural gas, gas condensate and crude oil can be broken down into two components: (i) geological reserves, or the quantities of natural gas, gas condensate and crude oil contained in the subsoil and (ii) extractable reserves, or the portion of geological reserves whose extraction from the subsoil as of the date the reserves are calculated is economically efficient given the market conditions and rational use of modern extraction equipment and technologies and taking into account compliance with the requirements of subsoil and environmental protection.

The Russian reserves system is based solely on an analysis of geological reserves. Explored reserves are represented by categories A, B, and C1; preliminary estimated reserves are represented by category C2; potential resources are represented by category C3; and forecasted resources are represented by the categories D1 and D2. We have included in this offering circular only information about our explored reserves, or reserves in categories A, B and C1.

While the Russian reserves system focuses on the actual physical presence of hydrocarbons in geological formations, and reserves are estimated based on the probability of such physical presence, SPE International Standards take into account not only the probability that hydrocarbons are physically present in a given geological formation but also the economic viability of recovering the reserves (including such factors as exploration and drilling costs, ongoing production costs, transportation costs, taxes, prevailing prices for the products, and other factors that influence the economic viability of a given deposit).

Under SPE International Standards, reserves are classified as "proved," "probable" and "possible," based on both geological and commercial factors. SPE International standards differ in certain material respects from standards applied by the United States Securities and Exchange Commission. See "Business—Reserves and Production—Differences between SPE International Standards and SEC Standards."

The following table provides certain summary information about our combined A, B and C1 reserves as of September 30, 2002 and as of December 31, 2001, 2000 and 1999:

	At September 30,	At December 31,

Combined (mmboe) .....	180,992	179,312	183,721	185,598

Note:

(1) Totals may not add due to rounding.

As of December 31, 2000, DeGolyer and MacNaughton, an independent U.S. petroleum engineering consulting firm, had evaluated according to SPE International Standards approximately 85%, 70% and 56% of our A, B and C1 reserves of natural gas, gas condensate and crude oil, respectively, at our 18 principal fields. See "Business—Reserves and Production." Based on this evaluation, we had proved reserves at these 18 fields as of December 31, 2000 of approximately 17.0 tcm of natural gas, 286.2 million tons (2,098 mmbbls) of gas condensate and 8.5 million tons (63 mmbbls) of crude oil and probable reserves of 1.5 tcm of natural gas, 77.5 million tons (568 mmbbls) of gas condensate and 98.8 million tons (724 mmbbls) of crude oil. We believe that the 18 fields evaluated by DeGolyer and MacNaughton are likely to contain most of our reserves which would be deemed proved or probable upon a full audit of our upstream properties.

### Summary Production Information

The following table presents summary production information for the periods indicated. Our production activities are more fully described in "Business—Reserves and Production."

	For the nine months ended September 30,		For the year ended December 31,

## Summary Sales and Operating Information

The following table summarizes certain sales and operating information for the periods indicated. You should read this information together with our annual audited consolidated financial statements prepared in accordance with IAS and unaudited consolidated interim condensed financial information prepared in accordance with IAS 34 and included elsewhere in this offering circular and the information under "Management's Discussion and Analysis of Financial Condition and Results of Operations." Our sales and operations are more fully described in "Business."

As noted above under "Summary Consolidated Financial Information," our consolidated financial information includes a restatement for changes in the general purchasing power of the RR in accordance with IAS 29. As discussed more fully there and in "Management's Discussion and Analysis of Financial Condition and Results of Operations," this has had a significant impact on the financial information we report.

All RR amounts in the following table are expressed in constant RR as of September 30, 2002 purchasing power. The U.S. dollar amounts were not included in our annual or interim consolidated financial information and are provided for convenience only. They should not be construed as representations that the RR amounts have been or could be converted into U.S. dollars at that or any other rate or as being representative of U.S. dollar amounts that would have resulted if we reported in U.S. dollars. The U.S. dollar amounts have been translated from the RR amounts at the rate of RR31.64 = U.S.\$1.00, which is the rate published by the Central Bank of Russia on September 30, 2002.

## THE OFFERING

*The following summary contains basic information about the Notes and the Loan and should be read in conjunction with, and is qualified in its entirety by, the information set forth under "Terms and Conditions of the Notes" and "The Loan Agreement" appearing elsewhere in this offering circular.*

### **Transaction Summary**

The transaction will be structured as a loan to Gazprom by the Bank. The Bank will issue Notes to Noteholders for the sole purpose of funding the Loan. The Notes will be constituted by a trust deed (the "Trust Deed") to be entered into between the Bank and The Bank of New York (the "Trustee"). Pursuant to the Trust Deed the Bank will charge by way of first fixed charge as security certain of its rights and interests under the Loan (other than certain Reserved Rights, as defined in the Trust Deed) to the Trustee for the benefit of the Noteholders and will assign its administrative rights under the Loan Agreement to the Trustee as security (the "Security Interests") for its payment obligations in respect of the Notes. As a consequence of the assignment of the administrative rights under the Loan Agreement the Trustee shall assume the administrative rights of the Bank as set out in the relevant provisions of the Trust Deed. If and when the first fixed charge of certain of the Bank's rights and interests under the Loan is enforced, the Trustee will assume the rights of the Bank under the Loan as set out in the relevant provisions of the Trust Deed, and the Trustee will assume certain rights and obligations towards the Noteholders, as more fully set out in the Trust Deed. This offering is made on a limited recourse basis and the Bank will not have any obligations to the Noteholders save for to account to the Noteholders for amounts equivalent to the amounts of payments of principal and interest under the Loan if and to the extent received from Gazprom.

## The Notes

Issuer .....	Morgan Stanley Bank AG
Joint Lead Managers .....	Dresdner Bank AG London Branch and Morgan Stanley & Co. International Limited
Issue Amount .....	U.S.\$●
Issue Price .....	● % of the principal amount of the Notes
Maturity Date .....	●, 2013
Trustee .....	The Bank of New York
Registrar .....	The Bank of New York
Paying Agent .....	The Bank of New York
Transfer Agent .....	Kredietbank S.A. Luxembourgeoise
Interest .....	The Notes will bear interest from ●, 2003 at a rate of ●% per year on each ● and ●. The first interest payment will be made on ●, 2003.
Status .....	The Notes will constitute the obligation of the Bank to apply the proceeds from the issue of the Notes solely for financing the Loan and to account to the Noteholders for an amount equivalent to sums of principal, interest and additional amounts (if any) actually received by or for the account of the Bank pursuant to the Loan Agreement, all as more fully described in "Terms and Conditions of the Notes—Status."
Security .....	<p>The Notes will be secured by a first fixed charge on:</p> <p>all of the Bank's rights to principal, interest and other amounts paid and payable under the Loan Agreement and its right to receive amounts paid and payable under any claim, award or judgment relating to the Loan Agreement (in each case, other than its right to amounts in respect of certain Reserved Rights); and</p> <p>sums held from time to time in an account in London in the name of the Bank with The Bank of New York, account number 5851498400, together with the debt represented thereby (other than interest from time to time earned thereon and the Reserved Rights) pursuant to the Trust Deed.</p>
Assignment of Administrative Rights .....	The Bank will assign its administrative rights under the Loan Agreement (save for those rights charged or excluded above) to the Trustee upon the closing of the offering of the Notes.
Form .....	The Notes will be issued in registered form. The Notes will be in denominations in aggregate principal amount of U.S.\$10,000 each, provided that Rule 144A Notes shall be held in amounts of not less than U.S.\$100,000 and will be represented by global notes. The global notes will be exchangeable for Notes in individual form in the limited circumstances specified in the global notes.

Optional Redemption by the Bank in Limited Circumstances .....	All as more fully described in the Loan Agreement, the Notes may be redeemed at the option of the Bank in whole, but not in part, at any time, upon giving notice to the Trustee, at the principal amount thereof, together with accrued and unpaid interest and additional amounts, if any, to the date of redemption in the event that it becomes unlawful for the Bank to fund the Loan or allow the Loan to remain outstanding under the Loan Agreement or allow the Notes to remain outstanding. In such a case, the Bank would require the Loan to be repaid in full.
Mandatory Redemption .....	The Bank is required to redeem in whole, but not in part, the Notes at 100% of the aggregate principal amount plus accrued and unpaid interest and all additional amounts, if any, if we elect to repay the Loan in the event we are required to pay additional amounts on account of Russian or German withholding taxes or in the event that we are required to pay additional amounts on account of certain costs incurred by the Bank pursuant to the Loan Agreement.
Relevant Events .....	In the case of certain events in relation to the Bank (as defined in the "Terms and Conditions of the Notes"), the Trustee may, subject as provided in the Trust Deed, enforce the security created in the Trust Deed in favor of the Noteholders.
Withholding Tax .....	All payments of principal and interest in respect of the Notes will be made free and clear of all taxes, duties, fees or other charges of the Federal Republic of Germany, other than as required by law. If any such taxes, duties, fees or other charges are payable, the sum payable by the Borrower to the Bank will be required (subject to certain exceptions) to be increased to the extent necessary to ensure that the Noteholders receive the net sum which they would have received free from any liability in respect of any such deduction or withholding had no such deduction or withholding been made or required to be made. The sole obligation of the Bank in this respect will be to pay to the Noteholders sums equivalent to the sum received from our company.
Transfer Restrictions .....	We have not registered the Notes under the Securities Act. You may only offer or sell the Notes in transactions exempt from or not subject to the registration requirements of the Securities Act. See "Transfer Restrictions."
Listing .....	We have applied to list the Notes on the Luxembourg Stock Exchange.
Governing Law .....	The Notes will be governed by English law.
<b>The Loan</b>	
Bank .....	Morgan Stanley Bank AG
Borrower .....	OAO Gazprom
Principal Amount .....	U.S.\$●
Interest .....	The loan will bear interest from ●, 2003 at a rate of ●% per year on each ● and ●. The first interest payment will be made on ●, 2003.
Security and Ranking .....	The Loan will not be secured by any collateral. The Loan will effectively rank below all of our secured debt and the debt and other liabilities of our subsidiaries.

Optional Redemption .....	The Loan may be prepaid at our option in whole, but not in part, at any time, at the principal amount thereof, together with accrued and unpaid interest and additional amounts, if any, to the date of repayment, for tax reasons or by reason of certain increased costs.
Mandatory Repayments .....	In the event that it becomes unlawful for the Bank to fund the Loan or allow the Loan to remain outstanding under the Loan Agreement or allow the Notes to remain outstanding, we may be required by the Bank to repay the Loan in full.
Certain Covenants .....	The Bank will have the benefit of certain covenants made by Gazprom, including a negative pledge and restrictions on mergers and disposals, all as fully described in the Loan Agreement.
Events of Default .....	In the case of an Event of Default (as defined in the Loan Agreement), the Trustee may, subject as provided in the Trust Deed, require the Bank to declare all amounts payable under the Loan Agreement by our company to be due and payable.
Use of Proceeds .....	The Bank will lend the net proceeds of the offering to us. We intend to use the net proceeds from the offering for general corporate purposes including in particular retirement of short-term indebtedness.
Withholding Tax .....	All payments of principal and interest under the Loan will be made free and clear of all taxes, duties, fees or other charges of the Russian Federation, other than as required by law. If any such taxes, duties, fees or other charges are payable, the sum payable by the Borrower will be required (subject to certain conditions) to be increased to the extent necessary to ensure that the Noteholders receive the net sum which they would have received free from any liability in respect of any such deduction or withholding had no such deduction or withholding been made or required to be made. The sole obligation of the Bank in this respect will be to pay to the Noteholders sums equivalent to the sum received from the Borrower.

## RISK FACTORS

*Prospective investors should consider carefully the risks set forth below and the other information contained in this offering circular prior to making any investment decision with respect to the Notes. Each of the risks highlighted below could have a material adverse effect on our business, operations and financial condition which, in turn, could have a material adverse effect on our ability to service our payment obligations under the Loan and thus on debt service on the Notes. In addition, the trading price of the Notes could decline due to any of these risks, and you could lose some or all of your investment.*

*You should note that the risks described below are not the only risks we face. We have described only the risks we consider to be material. However, there may be additional risks that we currently consider not to be material or of which we are not currently aware, and any of these risks could have the effects set forth above.*

### Risks Relating to Our Business

**The prices of the natural gas we sell in Europe under long-term contracts are linked to international prices for oil products, and so a decline in international prices for oil products could adversely affect us.**

We sell a substantial portion of our natural gas in Europe, which is our primary source of foreign currency revenues and cash flows. For more than 30 years, we and our predecessors have sold natural gas to purchasers in western Europe, generally pursuant to long-term contracts with prices linked to international prices for oil products. Changes in the prices we realize on natural gas under our long-term contracts with European customers typically lag about six to nine months behind changes in oil product prices. Such prices have fluctuated widely in response to changes in many factors, over which we have no control. These factors include:

- economic and political developments in oil producing regions, particularly in the Middle East;
- global and regional supply and demand, and expectations regarding future supply and demand, for oil products;
- the ability of members of the Organization of Petroleum Exporting Countries, or OPEC, and other crude oil producing nations to agree upon and maintain specified global production levels and prices;
- other actions taken by major crude oil producing or consuming countries;
- prices and availability of alternative fuels;
- global economic and political conditions;
- prices and availability of new technologies; and
- weather conditions.

Should international oil product prices deteriorate, the natural gas prices we realize under our long-term contracts with European customers would decline as well, resulting in a reduction in our export revenues. A decline in our European natural gas export revenues would adversely affect our business, results of operations, cash flows and financial condition, and our ability to finance planned capital expenditures.

In addition, the European Commission has recently expressed a desire to see a move from long-term contracts in favor of short-term contracts. Such an alteration of the basis on which we conduct our business could further increase our exposure to currency and gas and oil price fluctuations as well as potentially limit our ability to support long-term investment plans. We have held discussions with the EU in this regard and it has recognized the importance of long-term contracts to the continued development of the oil and gas industry. There can be no assurance that the EU will continue to support the use of long-term contracts, however, or that the outcome of further discussions will be to our benefit.

During the next ten years, export contracts accounting for over one-third of the volume of natural gas we currently export to Europe will expire. Close to half of these volumes are under contracts that will expire in 2012. Most of the contracts that are expiring contain clauses that provide for automatic renewal unless one party objects. Although we believe that these contracts will be renewed, no assurance can be given that we will be able to do so on favorable pricing and other terms or at all.

**We are required to supply natural gas to customers in Russia at prices that are regulated by the Government and that are lower than international natural gas prices.**

We are, and are likely to remain for the foreseeable future, a regulated monopoly. In Russia, natural gas prices are subject to control by governmental authorities and are significantly lower than the prices we charge to western European off-takers even after netting back export and customs duties and transportation costs. Moreover, domestic natural gas prices for households are currently less than natural gas prices for industrial and commercial end users, and the wholesale prices we are able to charge for gas delivered to households reflect this discount.

The Government has stated that, over time, natural gas prices for all customers in Russia will gradually be increased. Moreover, we believe that Government regulation of natural gas prices for domestic end-users will be abandoned in the long run in favor of free market prices; we believe that in the long run state regulation is likely to be maintained for natural gas transportation tariffs only.

No assurance can be given, however, that natural gas prices in Russia will increase, that consumers will be willing or able to pay increased natural gas prices or that the regulation of natural gas prices will be relaxed. If the Government decides to keep natural gas prices at artificially low levels, thereby effectively forcing us to continue to subsidize the rest of the Russian economy, there is a risk that we will not generate sufficient revenues to proceed with investments in the development of certain natural gas fields (for instance the Yamal peninsula reserves) or to continue to develop export pipelines, or that we will be able to take these steps only through outside financing beyond currently anticipated requirements. If we are unable to develop these fields or export pipelines, or if we are able to do so only on the basis of additional outside financing, our future results of operations, cash flows and financial condition could be adversely affected.

In accordance with the Gas Supply Law, consumers are obliged to pay for natural gas supplies and transportation services. If consumers fail to make such payments, suppliers have the right to limit or suspend natural gas supplies to such consumers in accordance with specific procedures provided for by a number of Government resolutions. The Government of the Russian Federation has, however, issued a number of resolutions (e.g. Government Resolution No. 1 dated January 5, 1998 and Government Resolution No. 364 dated May 29, 2002) regulating the restriction or suspension of supplies to certain customers. These consumers include, *inter alia*, medical institutions, military units, nuclear plants, communication organizations and certain vital utilities.

**Delayed, non-collectable and non-cash payments by our customers in Russia and the FSU could adversely affect us.**

Our cash flows are adversely affected by the limited ability, or the inability, of our customers in Russia and FSU countries to pay for our natural gas. There can be no assurance that amounts owed to us by our customers in Russia and the FSU will be paid in full or, if paid in full, that payment will be in cash. As is the case with many Russian companies, we have had to accept various forms of non-cash settlement, including negotiable promissory notes, bonds, equity interests in natural gas companies and goods and services as payment for supplies to customers in Russia and the FSU. Recently, cash payments have increased as a proportion of our sales proceeds. For example, the percentage of non-cash settlements related to domestic sales decreased from 65% in 1999 to 23% in 2001. See "Managements Discussion and Analysis of Financial Condition and Results of Operation—Certain Factors Affecting our Results of Operations—Non-cash settlements." Non-cash settlement of transactions has had in the past, and may continue to have in the future, an adverse effect on our ability to fund operational or capital expenditures required to be made in cash and to make tax and other mandatory payments when due.

**We bear a substantial tax burden.**

We are subject to a broad range of taxes imposed at federal, regional and local levels and we are one of the largest sources of tax revenue to the federal authorities, as well as to the regional and local authorities in those regions and localities in which we operate. The combination of political pressure on the federal, regional and local authorities to address social and economic issues (and in particular the non-payment of salaries and pensions) and the difficulties associated with collecting taxes from companies and enterprises in financial difficulties, all increase the risk that the Government, as well as regional and local governments, will seek to mitigate these problems by increasing to the extent possible our already substantial tax burden.

**The Government has exercised, and can be expected to continue to exercise, a strong influence over our operations.**

The Russian Federation currently owns 38.37% of our shares, and representatives of the Government hold six of the 11 seats on our Board of Directors. Moreover, as of December 31, 2002, our subsidiaries held approximately 15.11% of our shares, which they are entitled to vote as owners. In addition, we are a “natural monopoly” under the Russian Federal Law “On Natural Monopolies” No. 147-FZ dated August 17, 1995. As a result, the Government regulates the prices we charge for gas in the domestic market, the tariffs we charge for the transportation of third parties’ gas through the UGSS and other matters affecting our business. For example, we are required to have our budget, capital expenditure program and borrowing program approved by the Government. Through its share ownership, representation on our Board of Directors and role as our regulator, the Government has a strong influence over our operations. The Government has previously required Russian companies, including us, to take actions—such as the undertaking of projects and the supply of goods and services to customers—that may not be in the best interests of such companies or their shareholders. For example, the Government sets the prices for domestic gas delivered by us at a low level and requires us to supply natural gas to certain customers notwithstanding their inability to pay for the natural gas supplied.

**State authorities may reorganize our business to increase competition in the gas sector.**

The possibility that we may be reorganized into several smaller and less powerful production and transportation companies has been and continues to be the subject of much domestic and international press speculation. There have at times been public statements by certain Russian politicians and Government officials calling for our natural gas operations to be divided into a number of companies, or for particular functions to be re-allocated to other entities. Although the adoption of the Russian Federal Law “On Gas Supply in the Russian Federation” No. 69-FZ dated March 31, 1999 (the “Gas Supply Law”) mitigates the risk of reorganization and both we and the Government have made clarifying statements about any potential future restructuring, we are not fully protected against the risks of a state-led reorganization.

**Our new senior management may not be successful in implementing our strategy.**

Our June 2001 annual general meeting of shareholders began a process that has led to the replacement of the senior management team that had run our business since the early 1990s. Our new senior management team devoted its attention first to familiarizing itself with our extensive operations and to intensifying our efforts to reacquire certain assets disposed of in prior years. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Certain Acquisitions and Dispositions.” Our senior management is now engaged in the implementation of our strategy, and no assurance can be given that it will be successful. See “Business—Strategy.”

**Our licenses may be suspended, amended or terminated prior to the end of their terms, and we may not be able to obtain or maintain various permits and authorizations.**

The licensing regime in Russia for the exploration, development and production of natural gas, gas condensates and crude oil is governed primarily by the Law on Subsoil and numerous regulations issued thereunder. We currently conduct our operations under multiple exploration and production licenses, substantially all of which are held by our subsidiaries and related entities. Our exploration and production licenses extend through the period between 2013 and 2019. Most of our licenses also provide that they may be terminated if we fail to comply with license requirements, do not make timely payments of levies and taxes for the use of the subsoil, systematically fail to provide information, go bankrupt or fail to fulfill any capital expenditure and/or production obligations.

Although we believe we are currently in material compliance with the requirements of our licenses, we may not be able to remain in compliance with some or all of these requirements in the future. If we fail to fulfill the specific terms of any of our licenses or if we operate in the license areas in a manner that violates Russian law, Government regulators may impose fines on us or suspend or terminate our licenses. Any suspension, amendment or termination of our licenses, could have an adverse effect on our operations, financial position or the value of our assets.

In addition, we are required to obtain and maintain permits or approvals to develop our fields and retain our licenses. If we fail to obtain or maintain these permits and authorizations, we may be required to delay our investment program, or our licenses could be terminated, and this may reduce our cash flows and adversely affect our business.

**We must increase our capital expenditures in order to satisfy the anticipated demand of our customers.**

Over the next several years, we must improve our natural gas, gas condensate and oil production capabilities to meet the anticipated demand of customers in western Europe, Russia and certain FSU countries and offset declines in our main producing fields. Our principal planned developments include modernizing our pipeline system, further developing the Zapolyarnoye field and developing our fields in the Yamal Peninsula. These developments will require significant capital expenditures over the next several years. We expect to fund such capital expenditure through internal sources and external financing. There can be no assurance, however, that we will be able to generate and raise sufficient funds to meet such capital requirements in the future or to do so at a reasonable cost. Lack of sufficient funds in the future may require us to delay or abandon some or all of our anticipated projects.

**Exploratory drilling involves numerous risks, including the risk that we will encounter no commercially productive natural gas reserves.**

We are exploring in various geographical regions, including western Siberia and the Barents Sea, which are characterized by their remoteness from population centers, challenging environmental conditions and high costs. The cost of drilling, completing and operating wells is often uncertain. As a result, we may incur cost overruns or may be required to curtail, delay or cancel drilling operations because of a variety of factors, including unexpected drilling conditions, pressure or irregularities in geological formations, equipment failures or accidents, adverse weather conditions, compliance with governmental requirements and shortages or delays in the availability of drilling rigs and the delivery of equipment. Our overall drilling activity or drilling activity in particular project areas may be unsuccessful in that we may not find commercially productive reservoirs.

**If we fail to develop our undeveloped fields, our production levels will decline materially.**

We expect the volume of natural gas produced in our three leading fields, Yamburgskoye, Medvezhye and Urengoiyskoye, to decline significantly over the next eight years. Our future production of natural gas is highly dependant on developing the natural gas reserves in our other large fields. If we are unsuccessful we may not meet our long-term production targets, which could adversely affect our ability to meet our contractual export commitments and domestic supply obligations.

**We encounter competition from alternative fuels and other natural gas producers and suppliers in Europe.**

We face varying degrees of competition in each of our major markets in Europe from providers of alternative fuels, such as oil and coal. No assurance can be given that we will be able to compete effectively with such providers of alternative fuels.

We also encounter competition in Europe from other natural gas suppliers (especially from The Netherlands, Norway and Algeria), which could affect the prices and volumes of our sales to Europe. If an oversupply of natural gas occurs, natural gas purchasers may be able to negotiate lower prices on supply contracts with producers such as ourselves. Although we believe that current prices in the European markets are sustainable over the medium term, especially in light of the forecast growth in European natural gas demand, an economic slow down in Europe or the emergence of new large suppliers of natural gas could result in an oversupply, and downward pressure on natural gas prices.

In addition, during the next ten years, export contracts accounting for over one-third of the volume of natural gas we currently export to Europe will expire. Close to half of these volumes are under contracts that will expire in 2012. Most of the contracts that are expiring contain clauses that provide for automatic renewal unless one party objects. Although we believe that these contracts will be renewed, no assurance can be given that we will be able to do so on favorable pricing and other terms or at all.

We recently received a request for information from the European Commission with respect to so-called destination clauses in our contracts with Italian utilities, under which the Italian utilities are prevented from re-exporting Russian gas. Similar clauses are included in our contracts with many other European off-takers. A successful challenge of such clauses by the European Commission would mean that such off-takers could be free to sell natural gas supplied by us to other off-takers outside of the relevant market, leading to increased competition and the possibility of lower prices. We are currently engaged in a dialogue with the European Commission regarding these clauses. The European Commission's original position was that the inclusion of destination clauses violated EU law. During the course of discussions, the European Commission modified its position and recognized the need to find alternatives to destination clauses that are economically viable for suppliers of natural gas. We have found such a solution with ENI and are negotiating alternatives with various other off-takers. However, there can be no assurance that our discussions with the European Commission will lead to a beneficial result or that the current position of the European Commission will not change.

In addition, the western European gas market is undergoing significant change as a result of the EU Gas Directive (the "Gas Directive"), which came into force on August 10, 1998. The purpose of the Gas Directive is to deregulate and liberalize the EU gas market by introducing greater competition into the market and reducing gas prices for the end-user. The Gas Directive seeks to accomplish these objectives by opening up transmission and distribution infrastructure to third parties and establishing fair tariffs for third-party use of natural gas transportation infrastructure and greater transparency of transportation and distribution costs by an unbundling of the accounts for gas transportation, distribution and storage.

The Gas Directive may also promote the emergence of a short-term price or "spot" market for natural gas. Because of the time it takes to transport our natural gas from our western Siberian natural gas fields to western European markets, it would be difficult for us to engage in spot transactions involving physical settlement. The emergence of a spot market may also make it more difficult for us to negotiate long-term supply contracts under which we currently export a majority of our natural gas and may decrease the period between pricing revisions under new long-term contracts, which are currently set at three years for most contracts.

Despite this liberalization of the natural gas market, however, the price of natural gas in western Europe has remained steady and prices for different regions have not converged significantly. In addition, the EU is currently considering initiatives (the so-called Prodi Initiatives) that seek to increase Russian natural gas imports to Europe over the next fifteen years to meet the region's future gas needs. Nonetheless, the Gas Directive will increase competition in European gas markets as a greater number of suppliers gain access to the natural gas infrastructure, which may adversely affect our long-term supply contracts with European customers.

Russia has signed the Energy Charter Treaty, an international treaty for establishing and improving the legal framework for corporate international co-operation in energy matters, however, the State Duma has not yet ratified the Treaty. See "Overview of the Russian Gas Industry and its Regulation." We believe that ratification of the Energy Charter Treaty would result in greater access to the energy markets in Russia for foreign investment as well as the further access by third parties to our pipelines, including for the transportation of natural gas from Central Asia to western European markets. Accordingly, although we believe that we could benefit from increased third-party access and influence the manner in which access was distributed, the ratification of the Energy Charter Treaty could also lead to substantially increased competition and affect our long-term supply contracts with European customers.

**We face certain operational risks which may result in losses and additional expenditures.**

A large number of our gas production facilities are located in western Siberia, where remoteness and the harsh climate complicate and increase the cost of production and affect our ability to transport our natural gas economically.

Our gas exploration, production and transportation operations may be adversely affected by many factors, including the breakdown or failure of equipment or processes, performance below our expected levels of output or efficiency, labor disputes, natural disasters, weather conditions, terrorist attacks or sabotage to our extensive pipeline network. We have only limited insurance in relation to our assets and operations and, therefore, the financial effect of any such factors would generally have to be satisfied out of our cash flow. For example, we do not carry insurance for environmental damage arising from accidents on our property, for business interruption or against terrorist attacks. See "Business—Support Activities—Insurance."

We own and operate Russia's Unified Gas Supply System, which is responsible for the gathering, processing, transportation, storage and delivery of substantially all natural gas supplies in Russia (except for supplies to the Norilsk, Yakutsk and Sakhalin regions). This extensive network of pipelines and compressor installations has been largely developed over the past 30 years. Much of the pipeline is over 10 years old with some parts of the pipeline over 30 years old. A significant part of the pipeline is protected by chemical processes of limited duration and effectiveness. In addition, large segments of the network are located in regions with harsh climates, where construction, maintenance and refurbishment is difficult and costly. Considerable sums of money are required each year to maintain the Unified Gas Supply System. Although there have been no significant delays or curtailments of the supply of natural gas to our customers recently, no assurance can be given that such delays or curtailments will not occur in the future due to the stress and corrosion of pipelines, defective construction of compressor stations, problems associated with the harsh climate or the insufficient maintenance or refurbishment of the network.

We are dependent on the links between our pipeline network and other pipeline networks that we do not control for the export of natural gas. Although it is our strategy to diversify our export routes, we are currently dependent on pipelines in Ukraine to deliver a large proportion of the natural gas we sell to customers in western Europe. We are also dependent on the Ukrainian pipeline system for a significant amount of our storage capacity. At the same time, Ukraine is dependent on us to meet its domestic requirements for natural gas. Although this interdependence is taken into account in negotiations over a number of matters, including the terms of payment for natural gas supplied by us and transit fees, and we have recently entered into an agreement with the Ukrainian government for the creation of a consortium to operate the Ukrainian pipeline system, we currently have no control over the Ukrainian pipeline and cannot prevent any material disruption in the flow of our natural gas through Ukraine. In the past, some of our gas has been diverted as it passed through Ukraine. We can only monitor the flow of natural gas into and out of Ukraine and therefore may not be able to detect losses when and where they occur.

We plan to expand our export capacity and to diversify our export routes through additional capital investments in the Yamal-Europe and Blue Stream Projects and through other export-oriented projects, such as the Transbalkan Project and the north European pipeline project under the Baltic Sea that we have recently announced. It is possible, however, that these plans will be affected by, among other things, difficulties related to localized planning and construction processes and our ability to obtain external financing on acceptable terms. No assurance can be given that we will be able to meet our construction targets. If we do not, we could experience difficulties in meeting our contractual obligations to supply gas under certain of our long-term contracts.

**We depend on regular access to the domestic rouble bank loan and rouble debt markets to meet a significant portion of our financing requirements.**

Our financing strategy involves the refinancing of a portion of our short-term rouble-denominated indebtedness with long-term borrowings in convertible currencies, such as the U.S. dollar and the euro. However, we fund a portion of our debt financing requirements with short-term, rouble-denominated debt, and are thus dependent on access to short-term rouble financing. This includes access to both the domestic rouble-denominated bank loan market as well as to the growing domestic market for short- to medium-term, rouble-denominated bonds. Our ability to continue to access the rouble debt markets in amounts sufficient to meet our financing needs could be adversely affected by a number of factors, including economic conditions in Russia, the health of the Russian banking and financial system in general and the extent of the exposure of individual Russian banks and other investors in the rouble debt market to Gazprom risk. If we are unable to continue to access the short-term rouble bank loan and debt markets as required, our financial condition and results of operations could be materially and adversely affected.

**As an energy company we face significant environmental risks.**

Our operations, which are often potentially hazardous, are subject to the risk of liability arising from environmental damage or pollution and the cost of any associated remedial work in relation thereto. We have an established environmental policy and monitor our operations in an effort to meet applicable environmental standards. We made provision in our financial statements prepared in accordance with International Accounting Standards ("IAS") for such environmental liabilities where it was probable that an obligation exists and the amount could be reasonably estimated. Such provisions have been made in accordance with what we believe is a reasonable and prudent policy which takes into account payments made in prior years, among other factors. However, in Russia in particular, federal, regional and local authorities may enforce existing laws and regulations more strictly than they have done in the past and may impose stricter environmental standards, or higher levels of fines and penalties for violations, than those now in effect. Accordingly, we are unable to estimate the future financial impact of our environmental obligations.

**The Russian reserves system differs significantly from SPE International Standards and the standards applied by the United States Securities and Exchange Commission.**

Most of the information relating to natural gas, gas condensate and oil reserves contained in this offering circular has been prepared on the basis of the Russian reserves system, which differs significantly from SPE International Standards and the standards applied by the United States Securities and Exchange Commission, in particular with respect to the manner in which and the extent to which commercial factors are taken into account in calculating reserves.

As of December 31, 2000, DeGolyer and MacNaughton had evaluated according to SPE International Standards approximately 85%, 70% and 56% of our A, B and C1 reserves of natural gas, gas condensate and crude oil, respectively, our gas, gas condensate and oil reserves at our 18 principal fields. We believe that the 18 fields evaluated by DeGolyer and MacNaughton are likely to contain most of our reserves which would be deemed proved or probable upon a full audit of our upstream properties. See "Business—Reserves and Production—Reserves."

**Violations of existing international or U.S. sanctions could subject us to penalties that could have an adverse effect on us.**

International and U.S. sanctions have been imposed on companies engaging in certain types of transactions with specified countries or companies in those countries.

Since 1997, we have been involved, in partnership with TotalFinaElf and Petronas, in a project to develop the second and third phases of the South Pars field, located in the Iranian segment of the Persian Gulf. In May 1998, the U.S. Department of State issued a determination that the investment made by our partners and us in Iran's South Pars gas and condensate field constituted activity covered by the Iran and Libya Sanctions Act ("Sanctions Act"), and, at the same time, communicated its decision to waive sanctions under Section 9(c) of the Sanctions Act with respect to such investment. The waiver applies to activities in the South Pars field only, and not to any other activities we may conduct in Iran. See "Business—Marketing—Projects and Alliances in Reserves and Production."

In November 2002 we concluded a strategic partnership agreement with LUKOIL that, among other things, provides for cooperation with respect to potential oil and gas projects in a number of countries, including Iraq and Iran. We have not yet undertaken any projects under this agreement.

If we violate existing international or U.S. sanctions, penalties could include a prohibition or limitation on our ability to obtain goods and services on the international market or to access the U.S. or international capital markets. We are not currently involved in any transactions in Iran, Iraq or other countries that could result in sanctions against us or for which we have not received a waiver of such sanctions.

**Risks Relating to the Russian Federation**

We are a Russian company and substantially all of our fixed assets are located in, and a significant portion of our revenues are derived from, Russia. There are certain risks associated with an investment in Russia.

**Governmental instability could adversely affect the value of investments in Russia, including the Notes.**

Since 1991, Russia has sought to transform itself from a one-party state with a centrally-planned economy to a pluralist democracy with a market-oriented economy. The course of reform has in some respects been uneven, and the composition of the Russian Government—in particular, the prime minister and the other heads of federal ministries—has at times been highly unstable. Six different prime ministers, for example, headed governments between March 1998 and May 2000. On December 31, 1999, President Yeltsin unexpectedly resigned and Vladimir Putin, prime minister at the time, became the acting president and was subsequently elected president on March 26, 2000. While President Putin has maintained governmental stability and policies generally oriented towards the continuation of economic reforms, no assurance can be given that such conditions will continue over time. State Duma elections are to be held at the end of 2003, and presidential elections in 2004. The value of investments in Russia, including the Notes, could be reduced and our prospects could be harmed if governmental instability recurs or if reform policies are reversed.

**Conflict between federal and regional authorities and other domestic political conflicts could create an uncertain operating environment that would hinder our long-term planning ability and could adversely affect the value of investments in Russia.**

The Russian Federation consists of 89 sub-federal political units, some of which exercise considerable autonomy over their internal affairs pursuant to agreements with the federal authorities. In practice, the division of authority between federal and regional governmental authorities remains uncertain and contested. This uncertainty could hinder the operation and the expansion of our business.

For example, to achieve consistency in the regulation of natural gas supplies throughout Russia, the federal authorities have assumed responsibility for the development and implementation of state policy with respect to the supply of natural gas and the industrial and environmental safety of such supplies in Russia. However, regional and local authorities have a significant degree of autonomy in exercising their rights over the use of land and natural resources (including natural gas). Accordingly, the relationship between the relevant federal, regional and local authorities as well as between us and such authorities can have a significant impact on the conditions under which we can operate in any particular region.

In addition, ethnic, religious, historical and other divisions have, on occasion, given rise to communal tensions and military conflict. From 1994 to 1996 and since 1999, Russian military forces have been engaged in operations in Chechnya, bringing normal economic activity within Chechnya to a halt and disrupting the economy of the neighboring region, and groups associated with the Chechen opposition have committed various acts of terrorism in population centers in Russia, resulting in significant loss of life, injury and damage to property. The spread of violence, or political measures taken to counter violence, such as the imposition of a state of emergency, could hinder the operation and the expansion of our business.

## **Economic Risks**

### **Economic instability in Russia could adversely affect our business.**

Since the dissolution of the Soviet Union, the Russian economy has experienced at various times:

- significant declines in gross domestic product;
- hyperinflation;
- an unstable currency;
- high Government debt relative to gross domestic product;
- a weak banking system providing limited liquidity to Russian enterprises;
- high levels of loss-making enterprises that continued to operate due to the lack of effective bankruptcy proceedings;
- significant use of barter transactions and illiquid promissory notes to settle commercial transactions;
- widespread tax evasion;
- growth of “black” and “gray” market economies;
- high levels of capital flight;
- corruption and extensive penetration of organized crime into the economy;
- significant increases in unemployment and underemployment; and
- high poverty levels among the Russian population.

The Russian economy has been subject to abrupt downturns. In particular, on August 17, 1998, in the face of a rapidly deteriorating economic situation, the Russian Government defaulted on its rouble-denominated securities, the Central Bank stopped its support of the rouble and a temporary moratorium was imposed on certain hard currency payments. These actions resulted in an immediate and severe devaluation of the rouble and a sharp increase in the rate of inflation; a dramatic decline in the prices of Russian debt and equity securities; and an inability of Russian issuers to raise funds in the international capital markets.

These problems were aggravated by the near collapse of the Russian banking sector after the events of August 17, 1998. This further impaired the ability of the banking sector to act as a consistent source of liquidity to Russian companies, and resulted in the losses of bank deposits in some cases.

There can be no assurance that recent trends in the Russian economy, such as the increase in the gross domestic product, a relatively stable rouble, and a reduced rate of inflation, will continue or will not be abruptly reversed. Moreover, the recent fluctuations in international oil and natural gas prices, the strengthening of the

rouble in real terms relative to the U.S. dollar and the consequences of a relaxation in monetary policy, or other factors, could adversely affect Russia's economy and our business in the future.

**We face inflation and foreign exchange rate risks that could adversely affect our results of operations.**

Over 60% of our gross sales (including excise tax and net of VAT) for the nine months ended September 30, 2002 and 67%, 74% and 51% for the years ended December 31, 2001, 2000 and 1999, respectively, were denominated in U.S. dollars or euro, while most of our costs were denominated in RR. The relative movement of inflation and exchange rates therefore significantly affects our results of operations. In particular, our operating margins are generally adversely affected by a real appreciation of the rouble against the U.S. dollar or euro (i.e., by an inflation rate that is higher than the rate at which the rouble is depreciating against the U.S. dollar or euro), because this will generally cause our costs to increase in real terms relative to our sales revenues. Conversely, our operating margins are generally positively affected by a real depreciation of the rouble against the U.S. dollar or euro, because this will generally cause our costs to decrease in real terms relative to our sales revenues. Continued real appreciation of the rouble against the U.S. dollar and the euro could adversely affect our financial condition and results of operations. See "Management's Discussion and Analysis of Results of Operations—Certain Factors Affecting our Results of Operations—Impact of the change in purchasing power of the RR and fluctuations in RR exchange rates against the U.S. dollar and euro."

At the same time, a high rate of inflation in Russia results in a decline in the value of our rouble-denominated monetary assets, such as rouble deposits, domestic debt instruments and accounts receivable.

**We may have difficulty converting roubles into other currencies, which could adversely affect our business.**

We are currently required to repatriate and convert into roubles 50% of our proceeds from export sales, though in the past this percentage has been as high as 75%. The percentage of proceeds we are required to repatriate and convert into roubles may be increased or decreased from time to time by the Russian authorities. Restrictions on our ability to convert our rouble revenues into foreign currencies, or to reconvert the roubles we obtain pursuant to the mandatory repatriation and conversion requirements, may adversely affect our business, results of operations and our ability to repay the Notes. The rouble is not convertible outside the Commonwealth of Independent States, so our ability to hedge against fluctuations by converting to other currencies is significantly limited. Within Russia, our ability to convert roubles into other currencies is subject to rules and procedures that restrict the purposes for which conversion and payment in foreign currencies is allowed. In addition, because of the limited development of the foreign currency market in Russia, we may experience difficulty converting roubles into other currencies, although we have been successful to date in doing so.

**If we fail to receive a license from the Central Bank of Russia when needed, or if an existing license is taken away from us, we may be adversely affected.**

Most capital transactions with foreign currencies require transaction-specific currency licenses from the Central Bank of Russia, and we have obtained such licenses in connection with a number of our secured borrowings, and guarantees. Although we have been successful in obtaining Central Bank licenses in the past, no assurance as to our future success in obtaining such licenses can be given. Applying for a currency license is a burdensome and time-consuming process. The Central Bank of Russia may impose additional requirements or deny our request for currency licenses on an arbitrary basis, which could harm our business and results of operations. The loss of a Central Bank license, the breach of the terms of a Central Bank license or our failure to obtain Central Bank licenses in the future could result in significant delays in purchasing equipment, cash flow difficulties and fines and penalties and non-payment of our obligations.

**Russia's physical infrastructure is in very poor condition, which could disrupt normal business activity.**

As a general matter, Russia's physical infrastructure largely dates back to Soviet times and has not been adequately funded and maintained over the past decade. Particularly affected are the rail and road networks, power generation and transmission, communication systems and building stock. For example, during the winter of 2000-2001, electricity and heating shortages in Russia's far-eastern Primorye region seriously disrupted the local economy. Road conditions throughout Russia are poor, with many roads not meeting minimum requirements for usability and safety. The Government is actively considering plans to reorganize the nation's rail, electricity and telephone systems. Any such reorganization may result in increased charges and tariffs while failing to generate the anticipated capital investment needed to repair, maintain and improve these systems.

The deterioration of Russia's physical infrastructure harms the national economy, disrupts the transportation of goods and supplies, adds costs to doing business in Russia and can interrupt business operations, and this could have a material adverse effect on our business.

**Fluctuations in the global economy may adversely affect Russia's economy and our business.**

Russia's economy is vulnerable to market downturns and economic slowdowns elsewhere in the world. As has happened in the past, financial problems or an increase in the perceived risks associated with investing in emerging economies could dampen foreign investment in Russia and adversely affect the Russian economy. Additionally, because Russia is one of the world's largest producers of, and a major exporter of, natural gas and oil, the Russian economy is especially sensitive to the price of natural gas and oil on the world markets, and a decline in the price of natural gas and oil could slow or disrupt the Russian economy. These developments could severely limit our access to capital and could adversely affect the purchasing power of our customers and thus our business.

**Social Risks**

**Crime and corruption could disrupt our ability to conduct our business and could materially adversely affect our financial condition and results of operations.**

The political and economic changes in Russia since the early 1990s have resulted in reduced policing of society and increased lawlessness. Organized criminal activity has reportedly increased significantly since the dissolution of the Soviet Union, particularly in large metropolitan centers and with respect to a substantial increase in property crime in large cities. In addition, the Russian and international press have reported high levels of official corruption in Russia and the FSU, including the bribing of officials for the purpose of initiating investigations by Government agencies. Press reports have also described instances in which Government officials have engaged in selective investigations and prosecutions to further interests of the Government and individual officials. Additionally, published reports indicate that a significant number of Russian media regularly publish slanted articles in return for payment. Our business, and the value of the Notes, could be adversely affected by illegal activities, corruption or by claims implicating us in illegal activities.

**Social instability could increase support for renewed centralized authority, nationalism or violence and thus materially adversely affect our ability to conduct our business effectively.**

The failure of the Government and many private enterprises to pay full salaries on a regular basis and the failure of salaries and benefits generally to keep pace with the rapidly increasing cost of living have led in the past, and could lead in the future, to labor and social unrest. For example, in 1998, miners in several regions of Russia, demanding payment of overdue wages, resorted to strikes that included blocking major railroads. Such labor and social unrest may have political, social and economic consequences, such as increased support for a renewal of centralized authority; increased nationalism, with restrictions on foreign involvement in the economy of Russia; and increased violence. Any of these could restrict our operations and lead to a loss of revenue, materially adversely affecting us.

**Risks Relating to the Russian Legal System and Russian Legislation**

**Weaknesses relating to the Russian legal system and Russian legislation create an uncertain environment for investment and for business activity.**

Russia is still developing the legal framework required by a market economy. Several fundamental Russian laws have only recently become effective. The recent nature of much of Russian legislation and the rapid evolution of the Russian legal system place the enforceability and underlying constitutionality of laws in doubt and result in ambiguities, inconsistencies and anomalies. In addition, Russian legislation often leaves substantial gaps in the regulatory infrastructure. Among the risks of the current Russian legal system are:

- since 1991, Soviet law has been largely, but not entirely, replaced by a new legal regime as established by the 1993 Federal Constitution, the 1995 Civil Code and by other federal laws, and by decrees, orders and regulations issued by the president, the Government and federal ministries, which are, in turn, complemented by regional and local rules and regulations. These legal norms, at times, overlap or contradict one another;
- limited judicial and administrative guidance on interpreting Russian legislation;

- the relative inexperience of judges in interpreting Russian legislation;
- a high degree of discretion on the part of governmental authorities; and
- bankruptcy procedures that are not well developed and are subject to abuse.

All of these weaknesses could affect our ability to enforce our rights under contracts, or to defend us against claims by others.

**Inexperience and lack of independence of certain members of the judiciary and the difficulty of enforcing court decisions and governmental discretion in instigating, joining and enforcing claims could prevent us or investors from obtaining effective redress in a court proceeding, including in respect of expropriation or nationalization.**

The independence of the judicial system and its immunity from economic, political and nationalistic influences in Russia remain largely untested. The court system is understaffed and underfunded. Judges and courts are generally inexperienced in the area of business and corporate law. Russia is a civil law jurisdiction and, as such, judicial precedents have no binding effect on subsequent decisions. In addition, most court decisions are not readily available to the public. Enforcement of court judgments can in practice be very difficult in Russia. All of these factors make judicial decisions in Russia difficult to predict and effective redress uncertain. Additionally, court claims are often used in furtherance of political aims. We may be subject to such claims and may not be able to receive a fair hearing. Additionally, court judgments are not always enforced or followed by law enforcement agencies.

There are also legal uncertainties relating to property rights. During Russia's transformation from a centrally planned economy to a market economy, legislation has been enacted to protect private property against expropriation and nationalization. However, it is possible that due to the lack of experience in enforcing these provisions and due to political changes, these protections would not be enforced in the event of an attempted expropriation or nationalization, or in the event our business is reorganized. Expropriation or nationalization of any of our entities, their assets or portions thereof, or their break-up into separate companies, potentially with little or no compensation, could have a material adverse effect on our operations and revenues, and on the value of the Notes.

**Unlawful or arbitrary Government action may have an adverse effect on our business.**

Government authorities have a high degree of discretion in Russia and at times exercise their discretion arbitrarily, without hearing or prior notice, and sometimes in a manner that is contrary to law. Moreover, the Government also has the power in certain circumstances, by regulation or Government act, to interfere with the performance of, nullify or terminate contracts. Unlawful or arbitrary governmental actions have included withdrawal of licenses, sudden and unexpected tax audits, criminal prosecutions and civil actions. Federal and local government entities have also used common defects in matters surrounding share issuances and registration as pretexts for court claims and other demands to invalidate such issuances and registrations and/or to void transactions, often for political purposes. Unlawful or arbitrary government action, if directed at us, could have a material adverse effect on our business, and on the value of the Notes.

**The rights of our shareholders, the public reporting requirements and the Russian Accounting Regulations to which we are subject differ significantly from comparable listed companies in other jurisdictions.**

Our corporate affairs are governed by our Charter, internal regulations adopted pursuant to our Charter and by laws governing companies incorporated in Russia. The rights of shareholders and the responsibilities of members of the Board of Directors and the Management Committee under Russian law are different from, and may be subject to certain requirements not generally applicable to, corporations organized in the United States, the United Kingdom or other jurisdictions. See "Management—Description of our Management."

We are subject to Russian law, which contains certain regular disclosure requirements including the requirement to publish annual financial statements in accordance with Russian Accounting Regulations, together with an independent auditor's report. In addition, since 1997, the Russian Ministry of Finance has required all joint stock companies that are natural monopolies to produce annual financial statements prepared in accordance with IAS in addition to financial statements prepared in accordance with Russian accounting standards. We have

published financial statements in accordance with IAS since 1996. Due to the large number of our subsidiaries, the wide geographic range of our business and the fact that our systems and processes are tailored for Russian statutory requirements, it takes us longer than most western companies to prepare our consolidated annual and interim financial reports and our consolidated periodic internal accounts.

In accordance with Russian legislation, we are obliged to file quarterly reports on our activities to the Federal Commission on the Securities Markets within 30 days after the end of the relevant quarter. Such reports include certain information about us, our management, subsidiaries, affiliates, selected financial and business information (such as events of litigation, quarterly accounts prepared in accordance with Russian accounting standards, etc.) but do not contain all of the information contained in our IAS financial statements. We have regularly published such reports since the fourth quarter of 1998 and generally comply with the reporting requirements, although in the past we did not always meet the deadlines for filing such reports for technical reasons and were fined a nominal amount. We have not yet filed our quarterly report for the period ended December 31, 2002.

In addition, Russian law requires certain disclosure by open joint stock companies, such as the disclosure of annual reports, annual accounts (audited and approved by shareholders), any material facts affecting the financial condition and the business of the relevant company, certain board of directors' resolutions and lists of affiliated companies.

The Russian Federal Securities Market Commission has recently issued a corporate governance code and is recommending that it be adopted by all Russian public companies.

In light of the current focus on corporate governance issues, we reviewed our own position on such issues and established a special committee headed by a First Deputy Chairman of the Management Committee to develop a corporate governance code for the Company. Such a code was adopted by the Annual Shareholders Meeting of the Company in June 2002. In addition, on September 27, 2002, our Board of Directors enacted procedures to improve the co-ordination of transactions and to increase the level of control by the Board of Directors over the work of the Management Committee. See "Certain Transactions."

Despite these initiatives, there is nonetheless less publicly-available information about us than there is available for comparable listed companies in, for example, the United States or the United Kingdom.

**Shareholder liability under Russian legislation could cause us to become liable for the obligations of our subsidiaries.**

The Civil Code, the Federal Law on Joint Stock Companies and the Federal Law on Limited Liability Companies generally provide that shareholders in a Russian joint stock company or members in a Russian limited liability company are not liable for the obligations of the joint stock company or limited liability company and bear only the risk of loss of their investment. An exception to this rule, however, is when the shareholder of a joint stock company or limited liability company is capable of making decisions for such company. A company capable of making such decisions is called an effective parent. The company whose decisions are capable of being so determined is called an effective subsidiary. Under certain circumstances the effective parent bears joint and several responsibility for transactions concluded by the effective subsidiary in carrying out these decisions. In addition, an effective parent is secondarily liable for an effective subsidiary's debts if an effective subsidiary becomes insolvent or bankrupt resulting from the action or inaction of an effective parent. Accordingly, in our position as effective parent of the subsidiaries in which we own, directly or indirectly, more than 50% of the charter capital, we could be liable for their debts. This liability, which is joint and several with the liability of the subsidiaries, could materially adversely affect us.

**Some transactions between us and interested parties or affiliated companies require the approval of disinterested directors or shareholders and our failure to obtain approvals could cause our business to suffer.**

Russian law requires a company that enters into transactions with certain types of its affiliates that are referred to as "interested party transactions" to comply with special approval procedures. Under Russian law, an "interested party" includes (i) members of the board of directors or the collegial executive body of the company, (ii) the CEO of the company (including a managing organization or manager), (iii) any person that owns, together with that person's affiliates, at least 20% of the company's voting shares or (iv) a person who on legal grounds has the right to give mandatory instructions to the company, if any of the above listed persons, or a close relative or affiliate of such person, is:

- a party to a transaction with the company, whether directly or as a representative or intermediary, or a beneficiary of the transaction; .
- the owner of at least 20% of the shares in a company that is a party to a transaction with the company, whether directly or as a representative or intermediary, or a beneficiary of the transaction; or
- a member of the board of directors or the collegial executive body or the CEO of a company that is a party to a transaction with the company, whether directly or as a representative or intermediary, or a beneficiary of the transaction or an officer of the managing organization of such company.

Transactions between members of a consolidated corporate group may be considered to be interested party transactions in certain circumstances, even when the companies involved are wholly-owned by the parent company.

Under applicable Russian law, interested party transactions are to be approved by a majority of the disinterested independent members of the board of directors of the company. Where all the directors are interested, or are not independent, or if the subject matter of the transaction exceeds 2% of the balance sheet assets of the company determined under Russian accounting principles with certain exceptions for share placements), a majority vote of the disinterested shareholders of the company is required. The consequence of not having obtained the appropriate approval is that the transaction in question may be declared invalid upon a claim by the company or any of its shareholders.

In certain circumstances, such as when an interested party transaction is entered into between companies within our Group, the transaction will not always be submitted to the boards of directors of the companies for advance approval because, under Russian law, the lack of advance approval makes the transaction voidable, but not void. If any transaction is challenged in court, the matter of approving it will be submitted for consideration to the boards of directors. In 2000, 2001 and 2002, the Board of Directors of OAO Gazprom approved certain transactions after, rather than before, they were consummated, and since 1996 the Board of Directors has never recognized any such transaction to be contrary to OAO Gazprom's interests or denied approval thereof *post factum*. We cannot be certain that any such *post factum* approval would be obtained in the future or, if obtained, would be effective under Russian Law.

In accordance with certain existing judicial practice with respect to the consideration of claims seeking the invalidation of transactions in other legal contexts, *post factum* approval has been regarded as being a sufficient basis for the claim to be rejected. While there can be no assurance that a claim for a violation of the interested party transaction approval requirements would also be rejected, we have proceeded when we have believed it to be necessary to do so on the basis that judicial practice in this area would be similar. However, on the basis that the Joint Stock Company Law, following the amendments which became effective on January 1, 2002, now explicitly requires that interested party transactions should be approved in advance, it is unclear whether future judicial practice will uphold *post factum* approval of interested party transactions concluded after January 1, 2002. Any successful challenge to our interested party transactions could result in the invalidation of transactions that are important to our business. See "Certain Transactions."

**Russian tax law is not fully developed and is subject to frequent changes which could have an adverse effect on us.**

We are subject to a broad range of taxes imposed at the federal, regional and local levels, including but not limited to excise and export duties, income tax, mineral severance tax, property tax and social taxes. See "Management's Discussion and Analysis of Financial Condition and Results of Operation—Certain Factors Affecting our Results of Operations—Our high tax burden."

Laws related to these taxes, such as the Tax Code, have been in force for a short period relative to tax laws in more developed market economies and the government's implementation of these tax laws is often unclear or inconsistent. Accordingly, few precedents with regard to the interpretation of these laws have been established. Often, differing opinions regarding legal interpretation exist both between companies subject to such taxes and the government and within government ministries and organizations, such as the Ministry of Taxes and Duties and its various inspectorates, creating uncertainties and areas of conflict. Generally, tax declarations remain open and subject to inspection by tax and/or customs authorities for a period of three years following the tax year. The fact that a year has been reviewed by tax authorities does not close that year, or any tax declaration applicable to that year, from further review during the three-year period. These facts create tax risks in Russia substantially more significant than typically found in countries with more developed tax systems.

The taxation system in Russia is subject to frequent change and inconsistent enforcement at the federal, regional and local levels. Until the recent adoption of the new Tax Code, the system of tax collection was relatively ineffective, resulting in the continual imposition of new taxes in an attempt to raise government revenues. There can be no assurance that the Tax Code will not be changed in the future in a manner adverse to the stability and predictability of the tax system. These factors, plus the potential for government deficits, raise the risk of a sudden imposition of additional taxes on us. This could adversely affect us.

The Government is currently revising the Russian tax system. The new tax system is intended to reduce the number of taxes and the overall tax burden on businesses and to simplify the tax laws. However, the revised tax system relies heavily on the judgments of local tax officials and fails to address many of the existing problems. The current tax system imposes a significant tax burden on Russian companies and suffers from numerous inefficiencies. Even if further reforms to tax legislation are enacted, they may not result in a reduction of the tax burden on Russian companies and the establishment of a more efficient tax system. Conversely, they may introduce additional tax collection measures. Accordingly, we may have to pay significantly higher taxes, which could have a material adverse effect on our business.

### **Risks Relating to the Notes and the Trading Market**

**The Bank's rights to receive payments under the Loan (and therefore its ability to make payments under the Notes as they fall due) are effectively subordinated to any liabilities of our subsidiaries and could be adversely affected if any of these subsidiaries declares bankruptcy, liquidates or reorganizes.**

Most of our operations are conducted through our subsidiaries and to a large extent we depend on the earnings and cash flows of these subsidiaries to meet our debt obligations, including our obligations under the Loan. In addition, our subsidiaries' assets constitute a significant part of our operating assets. Finally, our subsidiaries have significant liabilities, including accounts payable and accrued charges, taxes payable, restructured tax liabilities, other long-term liabilities and provisions for liabilities and charges. Because our subsidiaries do not guarantee the payment obligations of our parent company, OAO Gazprom, under the Loan or the Bank's payment obligations under the Notes, neither the Bank nor you will have any direct claim on our subsidiaries' cash flows or assets. In the event of a bankruptcy, liquidation or reorganization of any of our subsidiaries, their creditors will generally be entitled to payment of their claims from the cash flows and assets of those subsidiaries before any cash flows or assets are made available for distribution to us as a shareholder. This may adversely affect our ability to service our payment obligations under the Loan.

**We have borrowed under a number of secured credit facilities and we will seek to continue to incur secured debt in the future.**

As of September 30, 2002, our parent company, OAO Gazprom, the obligor under the Loan, had borrowed approximately U.S.\$7.35 billion under various secured credit facilities, and OAO Gazprom expects to incur additional secured debt in the future. The assets securing these obligations consist primarily of our export receivables under our long-term contracts with European customers.

We understand that the Government is subject to a negative pledge clause in its borrowings from the International Bank of Reconstruction and Development (the "IBRD"). The negative pledge clause prevents any entity owned or controlled by, or operating for the account or benefit of, the Government from pledging any of its assets to secure further borrowings unless the IBRD is equally and ratably secured. Whether we should be considered such an entity, and thus subject to this negative pledge clause, is uncertain. This uncertainty will be heightened if the Government increases its direct ownership interest in us to more than 50% of our shares. Were the negative pledge clause in the Government's IBRD borrowings to apply, we do not know whether the Government would be prepared to let us continue to borrow on a secured basis, or whether potential lenders would continue to be willing to loan to us on a secured basis.

**The lack of a public market for the Notes could reduce the value of your investment.**

There is no existing market for the Notes. The Notes are expected to be listed on the Luxembourg Stock Exchange and to be eligible for trading in the PORTAL System by qualified institutional buyers in the United States. However, there can be no assurance that a liquid market will develop for the Notes, that holders of the Notes will be able to sell their Notes, or that such holders will be able to sell their Notes for a price that reflects their value.

### **Payments we make under the Loan may be subject to Russian withholding tax.**

In general, payments of interest on borrowed funds by a Russian entity to a non-resident legal person are subject to Russian withholding tax at the rate of 20%, absent reduction or elimination pursuant to the terms of an applicable double tax treaty. Based on professional advice we have received, we believe that payments of interest on the Loan should not be subject to withholding under the terms of the double tax treaty between Russia and the Federal Republic of Germany. However, there can be no assurance that such relief will be obtained. In addition, if interest under the Loan becomes payable to the Trustee pursuant to the Trust Deed, any benefit of the double tax treaty between Russia and the Federal Republic of Germany will cease and payments of interest could be subject to Russian withholding tax.

Prior to January 1, 2002, a claim for treaty relief from Russian withholding tax was subject to preliminary approval by the Russian tax authorities after review of relevant contracts. As of January 1, 2002, such preliminary approval from and contract disclosure to the Russian tax authorities is no longer required. As a result of this new procedure, the Russian tax authorities may review the Bank's eligibility for treaty relief in greater detail during tax audits.

If the payments under the Loan are subject to any withholding of Russian tax (as a result of which the Bank would reduce payments under the Notes in the amount of such withholding), we are obliged to increase payments as may be necessary so that the net payments received by the Noteholders will not be less than the amounts they would have received in the absence of such withholding. It should be noted, however, that gross-up provisions may not be enforceable under Russian law. If we are obliged to increase payments, we may, subject to certain conditions, prepay the Loan in full. In such case, all outstanding Notes would be redeemable at par with accrued interest. See "Terms and Conditions of the Notes."

### **Tax might be withheld on dispositions of the Notes in Russia, reducing their value.**

If a non-resident holder that is a legal person or organization sells Notes and receives proceeds from a source within Russia, there is a risk that the part of the payment, if any, representing accrued interest may be subject to a 20% Russian withholding tax. Where proceeds from a disposition of the Notes are received from a source within Russia by an individual non-resident holder, a similar withholding tax would be charged at a rate of 30% on gain from the disposition. The imposition or possibility of imposition of this withholding tax could adversely affect the value of the Notes.

### **Financial instability in emerging markets could cause the price of the Notes to suffer.**

Financial instability in Russia and other emerging market countries in 1997 and 1998 adversely affected market prices in the world's securities markets for the debt and equity securities of companies that operate in those countries. Financial instability in emerging market countries other than Russia could adversely affect the market price of the Notes, even if the Russian economy remains relatively stable.

## **Risks Relating to the German Insolvency Code**

### **Provisions of the German Insolvency Code may adversely affect the security given pursuant to the Trust Deed.**

Clause 4.1 of the Trust Deed provides for an English-law charge in favor of the Trustee for the benefit of Noteholders over certain amounts as well as certain claims and other rights of the Bank under the Loan. Section 166(2) of the German Insolvency Code provides that receivables assigned under German law for security purposes may, after the opening of insolvency proceedings involving the assignor, only be enforced by the assignee if the insolvency administrator does not exercise its power of discretion to enforce the receivables. If the insolvency administrator so does, it will be entitled to withhold in favor of the bankruptcy estate from the enforcement proceeds a flat-rate fee for establishment and enforcement a total of 9% subject to adjustment in case of higher or lower actual costs of enforcement, in each case plus value added tax, if any, thereon pursuant to Sections 170(1) and 171 of the Insolvency Code. If the insolvency administrator allows the assignee to enforce the receivables, the assignee will be obliged to pay a flat-rate fee of 4% plus value added tax, if any, thereon to the bankruptcy estate pursuant to Sections 170(2) and 171(1) of the Insolvency Code. The provisions of Section 166(2) of the Insolvency Code may affect the security given pursuant to the Trust Deed and, although we have been informed that the Bank believes that the better view is that an English-law charge should be subject to Section 166(2), the issue is not free from doubt and the possibility cannot be excluded that a German court will hold that an English-law charge should be subject to such Section 166(2).

## USE OF PROCEEDS

The proceeds from the offering of the Notes will be used by the Bank for the sole purpose of financing the Loan. The net proceeds of the Loan, expected to be U.S.\$● million after the deduction of commissions and expenses relating to the offering of the Notes, will be used by us for general corporate purposes, including, in particular, retirement of short-term indebtedness.

## CAPITALIZATION

The following table shows our unaudited consolidated cash and cash equivalents, certain restricted cash, short-term loans and promissory notes, current portion of long-term borrowings and total capitalization, including long-term borrowings, long-term promissory notes payable and shareholders' equity, as of September 30, 2002, extracted from our unaudited consolidated interim condensed financial information as of and for the nine months ended September 30, 2002 and as adjusted to give effect to the application of the net proceeds of the offering as described under "Use of Proceeds." For further information regarding our financial condition, see "Selected Consolidated Financial Information," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial information included elsewhere in this offering circular.

All RR amounts are expressed in constant RR as of September 30, 2002 purchasing power. The U.S. dollar amounts set forth below were not included in our annual audited consolidated or unaudited consolidated interim condensed financial information and are provided for convenience only. They should not be construed as representations that the Rouble amounts have been or could be converted into U.S. dollars at that or any other rate or as being representative of U.S. dollar amounts that would have resulted if we reported in U.S. dollars. The U.S. dollar amounts have been translated from the RR amounts at the rate of RR31.64 = U.S.\$1.00, which is the rate published by the Central Bank of Russia on September 30, 2002.

	<u>As of September 30, 2002</u>		<u>As adjusted</u>
	<u>(in millions of Roubles)<sup>(2)</sup></u>	<u>(in millions of U.S.\$)<sup>(2)</sup></u>	<u>(in millions of U.S.\$)<sup>(2)(3)</sup></u>
Cash and cash equivalents and certain restricted cash <sup>(1)</sup> .....	71,223	2,251	●
Short-term borrowings and current portion of long-term borrowings .....	195,569	6,181	●
Short-term promissory notes payable .....	54,318	1,717	
Long-term borrowings .....	216,785	6,852	●
Long-term promissory notes payable .....	11,396	360	
Shareholders' equity			
Share capital .....	311,918	9,858	●
Treasury shares .....	(17,858)	(564)	●
Retained earnings and other reserves .....	<u>1,348,117</u>	<u>42,608</u>	<u>●</u>
Total shareholders' equity .....	<u>1,642,177</u>	<u>51,902</u>	<u>●</u>
Total capitalization <sup>(4)</sup> .....	<u><u>1,870,358</u></u>	<u><u>59,114</u></u>	<u><u>●</u></u>

Notes:

- (1) Includes cash restricted as to withdrawal under the terms of certain borrowings and other contractual obligations but excludes cash restricted as to withdrawal under banking regulations.
- (2) Unaudited.
- (3) Adjusted to give effect to the receipt of the Loan but not adjusted to give effect to any other changes subsequent to September 30, 2002.
- (4) Totals may not add due to rounding.

There have been no material changes in our total capitalization since September 30, 2002, other than, as at December 31, 2002, a RR35,168 million net increase in long-term borrowings and a RR9,961 million net increase in long-term promissory notes payable, incurred by OAO Gazprom and Gazprombank.

## SELECTED CONSOLIDATED FINANCIAL INFORMATION

The selected consolidated financial information set forth below shows our historical consolidated financial information as of December 31, 2001, 2000 and 1999 and for the years then ended and as of September 30, 2001 and 2002 and for the nine months then ended. The annual consolidated financial information as of December 31, 1999, 2000 and 2001 and for the years then ended has been extracted from, and should be read in conjunction with, the annual audited consolidated financial statements included elsewhere in this offering circular. The interim consolidated financial information as of September 30, 2002 and 2001 and for the nine months then ended has been extracted from, and should be read in conjunction with, the unaudited consolidated interim condensed financial information included elsewhere in this offering circular. The annual and interim consolidated financial information should also be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" below.

Our annual consolidated financial statements have been prepared in accordance with IAS. Our interim consolidated condensed financial information is prepared in accordance with IAS 34. IAS differs in certain respects from U.S. GAAP. For a summary of certain differences between IAS and U.S. GAAP that are relevant to us, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Summary of Certain Differences between IAS and U.S. GAAP."

Our consolidated financial information include a restatement for changes in the general purchasing power of the RR in accordance with IAS 29. IAS 29 requires that financial statements prepared in the currency of a hyperinflationary economy such as Russia's be stated in terms of the measuring unit current at the most recent balance sheet date. The restatement is calculated from the conversion factors derived from the Russian Federation Consumer Price Index, published by Goskomstat, and from indices obtained from other published sources for years prior to 1992.

The impact of stating our financial information in terms of the measuring unit current at the most recent balance sheet date is to:

- inflate current period transactions recorded in the statement of operations of the local statutory books by the average rate of inflation for the period in order to state them in terms of the purchasing power of the RR as of the balance sheet date (i.e. using the average inflation factor of 1.0335 for all relevant transactions in the nine months ended September 30, 2002);
- restate the period end non-monetary assets and liabilities and shareholders' equity, including share capital, in terms of the measuring unit current as of the period end; and
- restate all comparatives, both monetary and non-monetary items, in terms of the purchasing power of the RR as of the most recent balance sheet date (i.e. for the information included in this offering circular, to inflate the comparatives in terms of the purchasing power of the RR as of September 30, 2002).

The restatement of all comparatives, in particular, can have a significant impact on our reported sales and operating margins. For example, sales expressed in constant RR will decrease if increases in nominal prices are lower than inflation and will increase less than might otherwise be expected even when increases in nominal prices are higher than inflation. Our ability to increase the prices we charge for our gas sales in the domestic market is constrained by Government regulations, and the impact of U.S. dollar and euro price increases for our export sales has been offset in recent periods by the real appreciation of the RR (i.e., by a rate of inflation that is higher than the rate at which the RR is depreciating against the U.S. dollar or euro). As a result, our reported sales have lagged behind the increases in our actually realized prices in nominal terms. On the other hand, our costs, which are mainly in RR and are generally not regulated, have tended to increase in line with or even above inflation in recent periods.

In addition, the restatement of all comparatives can have a significant impact on our debt balances. For example, even though we borrowed more than we repaid during the nine months ended September 30, 2002 and the years ended December 31, 2001, 2000 and 1999, the restatement of our comparatives into current purchasing power results in our reported debt balances having declined. (The ratios we show below are not affected by this, because the other components of the ratios are subject to similar adjustments.)

All RR amounts set forth below are expressed in constant RR as of September 30, 2002 purchasing power. The U.S. dollar amounts set forth below were not included in our annual consolidated financial statements or our interim consolidated condensed financial information and are provided for convenience only. They should not be construed as representations that the RR amounts have been or could be converted into U.S. dollars at that or any

other rate or as being representative of the U.S. dollar amounts that would have resulted if we reported in U.S. dollars. The U.S. dollar amounts have been translated from the RR amounts at the rate of RR31.64 = U.S.\$1.00, which is the rate published by the Central Bank of Russia on September 30, 2002.

Notes:

- (1) Includes impairment provisions for accounts receivable and prepayments, assets under construction, investments and other long-term assets, guarantees and other charges, and inventory obsolescence.
- (2) Interest expense on taxes payable and other interest expense, offset by interest income. See note 3 below for an explanation of interest expense on taxes payable.
- (3) Exchange gain and gain on restructured taxes, less exchange loss.

On September 3, 1999 the Government issued regulation # 1002 allowing certain companies to negotiate the restructuring of various overdue taxes, interest and fines due to federal government authorities over ten years. Interest accrues on the restructured tax payables (excluding interest and fines) at a rate of 5.5% per annum, representing  $\frac{1}{10}$  of the Central Bank of Russia's annual refinancing rate (55%) as specified in the regulation, and is paid quarterly. Current tax payments must be made timely. If the terms of the restructuring agreement are violated, the original nominal value of the tax payable (including interest and fines) becomes due with additional interest of  $\frac{1}{300}$  of the Central Bank refinancing rate accruing for each day since the restructuring agreement.

During the years ended December 31, 2001 and 2000 and the nine month period ended September 30, 2002, certain of our subsidiaries signed such restructuring agreements. This resulted in the recognition of a gain in each of the respective periods based on the difference between the estimated fair value of the new agreements (based on discounted future cash flows) and the carrying amount of the old payables. This gain is reflected in gain on restructured taxes. Following the restructurings, we recognize the amortization of the discount and the interest accruing under the restructuring agreements as interest expense on taxes payable, which also includes interest that accrues when tax payments are overdue.

- (4) Monetary gain and share of net income (losses) of associated undertakings and gains (losses) on available-for-sale investments. Monetary gain reflects the effect of inflation on our net monetary liability position as a result of the application of IAS 29.
- (5) Cash and cash equivalents and certain restricted cash include balances of cash and cash equivalents restricted as to withdrawal under the terms of certain borrowings and other contractual obligations but exclude cash restricted as to withdrawal under banking regulations.
- (6) Operating profit plus depreciation and the provisions referred to in note 1 above except the provisions for accounts receivable and prepayments. Provisions for accounts receivable and prepayments were RR7,467 million, RR15,920 million, RR33,638 million, RR34,643 million and RR20,088 million for the nine months ended September 30, 2002 and 2001 and the years ended December 31, 2001, 2000 and 1999, respectively. Adjusted EBITDA should not be considered as an alternative to net profits, operating profit, net cash provided by operating activities or any other measure of performance under IAS.
- (7) Interest expense on taxes payable and other interest expense. See note 3 above for an explanation of interest expense on taxes payable.
- (8) Gross interest expense less interest income.
- (9) Short-term borrowings and current portion of long-term borrowings, short-term promissory notes payable, long-term borrowings, long-term promissory notes payable and restructured tax liabilities.
- (10) Total debt less cash and cash equivalents and balances of cash and cash equivalents restricted as to withdrawal under the terms of certain borrowings and other contractual obligations.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

*You should read the following discussion and analysis of our financial condition and results of operations as of September 30, 2002 and 2001 and December 31, 2001, 2000 and 1999 and the periods then ended in conjunction with our unaudited interim consolidated condensed financial information as of and for the nine months ended September 30, 2002 and 2001 and the audited financial statements as of and for the years ended December 31, 2001, 2000 and 1999. The Consolidated Financial Statements and the related Notes thereto have been prepared in accordance with International Accounting Standards ("IAS"), which differ in certain respects from generally accepted accounting principles applied in the United States. For a summary of the significant differences between IAS and U.S. GAAP that are relevant to Gazprom, see "Summary of Certain Differences Between IAS and U.S. GAAP." All RR amounts are expressed in constant RR as of September 30, 2002 purchasing power. The U.S. dollar amounts, except as indicated, have been translated from the RR amounts at the rate of  $RR31.64 = U.S.\$1.00$ , which is the rate published by the Central Bank of Russia on September 30, 2002.*

### OVERVIEW

We are the world's largest natural gas company, and the world's largest publicly-traded hydrocarbons company, in terms of reserves, transportation and production volumes. Our revenues are primarily derived from sales of natural gas to western and central Europe, Russia and other former Soviet Union countries.

We divide our operations into the following four main business segments:

- Production (referred to elsewhere in the offering circular as "Exploration and Production"): exploration, development and production operations relating to natural gas and other hydrocarbons. These activities are primarily located within Russia.
- Refining: processing and refining of natural gas, gas condensate and other hydrocarbons (including crude oil), and sales of hydrocarbon products. Operations relating to refining of natural gas, gas condensate and oil significantly increased during 2001 due to our acquisition of OAO AK Sibur ("Sibur") (see "—Certain Acquisitions and Dispositions").
- Transportation: transportation of natural gas through the world's largest high-pressure trunk pipeline system (155,000 km). We own and operate a single centrally controlled system for natural gas production, processing, transportation, storage and deliveries. Beginning in the late 1990s, we began acquiring interests in regional gas distribution companies that own and operate medium- and low-pressure pipelines.
- Distribution (referred to elsewhere in the offering circular as "Marketing"): domestic and export sale of gas. We are the world's largest exporter of natural gas.

Other businesses primarily comprise banking, insurance, construction and media. These businesses are not separately reflected in our financial statements because they do not represent individually material segments.

Our four main business segments are mutually dependent, with a significant portion of the revenues of one segment being a part of the costs of another segment. In particular, our Distribution and Refining segments purchase natural gas from our Production segment and transportation services from our Transportation segment. We establish internal transfer prices to provide short to medium-term funding requirements of the individual segments. Accordingly, the results of operations of these segments on a stand-alone basis do not necessarily represent that segment's underlying financial position and results of operations as if it was a stand-alone business. For this reason, we do not analyse any of our main segments separately in the discussion that follows.

### CRITICAL ACCOUNTING POLICIES

Our financial statements reflect the selection and application of accounting policies that require management to make significant estimates and assumptions. We believe that the following are some of the most critical accounting policies that currently affect our financial condition and results of operations.

## **Gas and oil exploration and production activities**

Gas and oil exploration and production activities are accounted for in accordance with the successful efforts method as it provides a timelier accounting of the success or failure of our exploration and production activities. Under the successful efforts method, costs of successful development and exploratory wells are capitalised. Costs of unsuccessful exploratory wells are expensed upon determination that the well does not justify commercial development. Other exploration costs are expensed as incurred.

Assets associated with exploration and production activities are depreciated on a straight-line basis calculated on the basis of cost restated to the equivalent purchasing power of the RR as of the reporting date. IAS does not specifically require the use of the units-of-production method for the depreciation, depletion and amortization of gas production assets, primarily because there is no specific accounting standard for oil and gas producing companies. In making our estimates of depreciation, and considering the corresponding asset lives, we include in proved reserves those reserves that relate to quantities that will be produced beyond the initial license period date in circumstances where the company has both the right to request and the intent to renew the license.

## **Site restoration and environmental costs**

Site restoration costs that may be incurred by us at the end of the operating life of certain of our facilities and properties are recognised on a straight-line basis over the asset's productive life. Liabilities for environmental obligations are recorded when it is probable that such obligations have been incurred and the amounts can be reasonably estimated.

IAS prescribes the recording of liabilities for these costs. Estimating the amounts and timing of these obligations that should be recorded requires significant judgment. This judgment is based on cost and engineering studies using currently available technology and is based on current environmental regulations. Liabilities for site restoration are subject to change because of change in laws, regulations and their interpretation.

## **Impairment provision for accounts receivable**

The impairment provision for accounts receivable is based on our assessment of the collectibility of specific customer accounts. If there is a deterioration of a major customer's creditworthiness or actual defaults are higher than our estimates, the actual results could differ from these estimates.

## **Impairment of other assets and accounting for provisions**

At each balance sheet date we assess whether there is any indication that the recoverable amount of our assets has declined below the carrying value. The recoverable amount is the higher of an asset's net selling price and its value in use. When such a decline is identified, the carrying amount is reduced to the recoverable amount. The amount of the reduction is recorded in the consolidated statement of operations in the period in which the reduction is identified.

Our accounting for provisions includes provisions against investments, other long-term assets, inventory obsolescence and legal exposures. We accrue these provisions when our assessments indicate that it is probable that a liability has been incurred or an asset will not be recovered, and an amount can be reasonably estimated. Our estimates for these liabilities are based on currently available facts and our estimates of the ultimate outcome or resolution of the liability in the future. Actual results may differ from our estimates, and our estimates can be revised in the future, either negatively or positively, depending upon the outcome or expectations based on the facts surrounding each exposure. Because of our operating cycle, certain significant decisions about capital construction projects are made after the end of our fiscal year. Accordingly we typically have larger charges in the fourth quarter of our fiscal year as compared to other quarters. For example, in 2001 we recorded a fourth quarter impairment provision of RR6,238 million related to assets under construction compared to a nil impairment provision for the first nine months of 2001.

## **Profit tax and other taxes**

Tax legislation in the Russian Federation is subject to varying interpretations and frequent changes.

Deferred tax assets and liabilities are calculated in respect of temporary differences using a balance sheet liability method for financial reporting and accounting for deferred income taxes. Deferred tax is recorded for all temporary differences arising between the tax basis of assets and liabilities and their carrying values for financial reporting purposes. A deferred tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized. Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date.

## **CERTAIN FACTORS AFFECTING OUR RESULTS OF OPERATIONS**

The primary factor that affects our results is the price for which we can sell our natural gas and other hydrocarbon products, both internationally and in Russia. Other factors affecting our results are:

- the impact of changes in the purchasing power of the RR resulting from inflation in Russia and of fluctuations in RR exchange rates against the U.S. dollar and euro;
- our high tax burden;
- interest rates and discounts on promissory notes;
- non-cash settlements; and
- impairment of assets.

### **The export price of natural gas**

Our results are heavily reliant on natural gas export prices. Prices for the natural gas we export declined in 1999, strengthened considerably in 2000 and 2001 in U.S. dollar terms (although they declined in constant RR terms in 2001), and then weakened during the first six months of 2002, after which prices strengthened, although not to an extent sufficient to fully offset the prior price declines in 2002. Export gas prices to European countries are indexed mainly to oil product prices as stipulated in long-term contracts and, therefore, fluctuate based on world oil prices. Due to the formulae underlying our long-term contracts, our prices are not as volatile on a short-term basis as spot oil prices and tend to lag upward and downward movements in oil prices by approximately six to nine months.

The European Union Gas Directive of June 22, 1998, which established common rules for the transmission, distribution, supply and storage of natural gas in the European market, may cause substantial changes to existing European market structures and to the overall level and volatility of prices. See “Business—Marketing—Europe—Western Europe” and “Business—Competition—Western Europe.”

Natural gas export prices for sales to FSU countries are generally based on one-year fixed price contracts negotiated based on prevailing oil prices. Average natural gas export prices to FSU countries are more than 50% below the level of those for European countries. This is partly due to lower transportation costs and excise tax burdens but is principally due to the impact of intergovernmental agreements, which effectively limit the prices we can charge to FSU countries.

The weather is another factor affecting demand for and, therefore, the price of natural gas. Changes in weather conditions from year to year can influence demand for natural gas and to some extent gas condensate and oil products.

We do not enter into any significant hedging arrangements to mitigate the price risk of our sales activities.

The following table shows our average natural gas export price to Europe and FSU (including excise tax and net of VAT) countries for the nine month periods ended September 30, 2002 and 2001 and the years ended December 31, 2001, 2000 and 1999, expressed in average actual realized nominal U.S. dollar and in average constant RR terms:

	Nine months ended September 30,		Year ended December 31,		
	2002	2001	2001	2000	1999
	(Including excise tax, net of VAT)				
Our natural gas export price to Europe (average actual realized U.S.\$ per mcm <sup>(1)</sup> )	100.4	126.6	122.6	98.4	57.9
Our natural gas export price to Europe (average actual realized U.S.\$ per mcf <sup>(1)</sup> )	2.8	3.6	3.5	2.8	1.7
Our natural gas export price to Europe (average constant RR per mcm)	3,124.2	4,078.2	3,932.5	4,051.3	2,643.0
Our natural gas export price to FSU countries (average actual realized U.S.\$ per mcm <sup>(1)</sup> )	42.5	41.1	41.5	45.4	40.9
Our natural gas export price to FSU countries (average actual realized U.S.\$ per mcf <sup>(1)</sup> )	1.2	1.2	1.2	1.3	1.2
Our natural gas export price to FSU countries (average constant RR per mcm)	1,334.8	1,347.4	1,359.6	1,814.3	1,788.4

Note:

(1) Average actual realized nominal prices and not convenience translations of constant RR prices.

#### Regulation of domestic natural gas prices and transportation tariffs

Natural gas prices and transportation tariffs in Russia are regulated by the Natural Monopoly Law and the Gas Supply Law, as well as by a number of supplemental Government resolutions, and do not currently fluctuate based on supply and demand. The Federal Energy Commission of the Russian Federation ("FEC") regulates natural monopolies, including the establishment and regulation of natural gas prices and transportation tariffs.

Natural gas prices in Russia have remained significantly below export prices (even after netting back export tariffs, excise duties and transportation costs) primarily due to Governmental regulation, via the FEC. Over the last five years the FEC has reset domestic gas tariffs at rates that, on a cumulative basis, failed to recover fully the effects of inflation. As of September 30, 2002 the domestic natural gas price was 94% higher in nominal RR terms than in 1997, whereas cumulative inflation over the same period was 397%.

Since 2000, however, domestic natural gas prices have increased faster than inflation. Our average domestic natural gas sales prices were equivalent to RR451.9 per mcm in the first nine months of 2002, RR424.7 per mcm in 2001 and RR367.7 per thousand cubic meters in 2000, all expressed in constant RR. Our average domestic natural gas price in 1999 was RR389.5 per thousand cubic meters expressed in constant RR.

The following table shows our average domestic natural gas price (including excise tax and net of VAT) for the nine-month periods ended September 30, 2002 and 2001 and the years ended December 31, 2001, 2000 and 1999, expressed in average actual realized nominal RR terms and in constant RR terms:

	Nine months ended September 30,		Year ended December 31,		
	2002	2001	2001	2000	1999
	(Including excise tax, net of VAT)				
Our domestic natural gas price (average actual realized RR per mcm)	434.5	367.7	357.9	254.7	218.3
Our domestic natural gas price (average actual realized RR per mcf)	12.3	10.0	10.1	7.2	6.2
Our domestic natural gas price (average constant RR per mcm) <sup>(1)</sup>	451.9	442.8	424.7	367.7	389.5
Our domestic natural gas price (average constant RR per mcf) <sup>(1)</sup>	12.8	12.5	12.0	10.4	10.9
Our domestic natural gas price (average U.S.\$ per mcm) <sup>(2)</sup>	13.7	12.1	11.9	9.0	8.1
Our domestic natural gas price (average U.S.\$ per mcf) <sup>(2)</sup>	0.39	0.34	0.34	0.26	0.23

Notes:

(1) Constant RR price in terms of the equivalent purchasing power of the RR as of September 30, 2002.

(2) Translated from average actual realized RR price for convenience only using period-end exchange rates.

The Government's policy is gradually to increase the regulated natural gas price, and ultimately to abandon natural gas price regulation altogether. The Government is also considering the introduction of an unregulated wholesale domestic market where some natural gas can be sold at prices determined by market forces. See "Business—Marketing—Russia—Domestic Market Conditions." Concerns about inflation, and political considerations, constrain the Government's ability to move too rapidly in this direction, however. For example, we recently proposed that natural gas prices should increase by 38% on average in 2003 (40% for industrial consumers and 20% for household consumers), but the Government approved an average increase of only 20% (a 20% increase for industrial consumers commencing January 1, 2003 and a 23% increase for household consumers commencing February 1, 2003).

During the nine months ended September 30, 2002 and the years ended December 31, 2001, 2000 and 1999, our sales revenues derived from the transport of gas produced by third parties were relatively small. As independent production of natural gas increases, however, we would expect our sales revenues from the transport of natural gas to increase as well. For a discussion of our transport tariffs, see "Business—Transportation—Third party access to the UGSS."

### **Impact of the change in purchasing power of the RR and fluctuations in RR exchange rates against the U.S. dollar and the euro**

*Impact of inflation accounting and presentation in our financial statements of constant RR.* Our financial results, including comparatives, include a restatement for changes in the general purchasing power of the RR in accordance with IAS 29, "Financial Reporting in Hyperinflationary Economies" ("IAS 29"). IAS 29 requires that financial statements prepared in the currency of a hyperinflationary economy such as Russia's be stated in terms of the measuring unit current at the balance sheet date. The restatement is calculated from the conversion factors derived from the Russian Federation Consumer Price Index, published by the Russian State Committee on Statistics ("Goskomstat"), and from indices obtained from other published sources for years prior to 1992.

The impact of stating our financial information in terms of the measuring unit current at the most recent balance sheet date is to:

- inflate the current period transactions recorded in the statement of operations of the local statutory books by the average rate of inflation for the period in order to state them in terms of the purchasing power of the RR as of the balance sheet date (i.e. using the average inflation factor of 1.0335 for all relevant transactions in the nine months ended September 30, 2002);
- restate the period end non-monetary assets and liabilities and shareholders' equity, including share capital, in terms of the measuring unit current as of the period-end; and
- restate all comparatives, monetary and non-monetary items, in terms of the purchasing power of the RR as of the most recent balance sheet date (i.e. for the information included in this offering circular, to inflate the comparatives in terms of the purchasing power of the RR as of September 30, 2002).

The restatement of all comparatives, in particular, can have a significant impact on our reported sales and operating profit. For example, sales expressed in constant RR will decrease if increases in nominal prices are lower than inflation and will increase less than might otherwise be expected even when increases in nominal prices are higher than inflation. Our ability to increase the prices we charge for our natural gas sales in the domestic market is constrained by Government regulations and, as we discuss more fully below, the impact of U.S. dollar and euro price increases for our export sales has been offset in recent periods by the real appreciation of the RR (i.e., by a rate of inflation that is higher than the rate at which the RR is depreciating against the U.S. dollar or euro). As a result, our reported sales have lagged behind the increases in our average actual realized prices in nominal terms. On the other hand, our costs, which are mainly in RR and generally not regulated, have tended to increase in line with or even above inflation in recent periods.

In addition, the restatement of all comparatives can have a significant impact on our debt balances. For example, even though we borrowed more than we repaid during the nine month period ended September 30, 2002 and during the years ended December 31 2001, 2000 and 1999, the restatement of our comparatives into current purchasing power resulted in our reported debt balances declining at each period end. For a discussion of our debt obligations, see "—Liquidity and Capital Resources—Debt obligations."

*Impact of inflation and changes in exchange rates on export sales and operating margins.* Over 60% of our gross sales (including excise tax and net of VAT) for the nine months ended September 30, 2002 and 67%, 74% and 51% for the years ended December 31, 2001, 2000 and 1999, respectively were denominated in U.S. dollars or euros, while most of our costs were denominated in RR. The relative movements of inflation and exchange rates therefore significantly affect our results of operations. In particular, our operating margins are generally adversely affected by a real appreciation of the RR against the U.S. dollar or euro, because this will generally cause our costs to increase in real terms relative to our sales revenues. Conversely, our operating margins are generally positively affected by a real depreciation of the RR against the U.S. dollar or euro, because this will generally cause our costs to decrease in real terms relative to our sales revenues.

The following table sets forth the rates of inflation in Russia, the rates of nominal depreciation of the RR against the U.S. dollar and euro and the rates of real change in the value of the RR against the U.S.\$ and euro for the periods shown.

	Nine months ended September 30,		Year ended December 31,		
	2002	2001	2001	2000	1999
Inflation (CPI) .....	10.4%	14.1%	18.8%	20.1%	36.6%
Nominal depreciation of the RR against the U.S.\$ .....	5.0%	4.4%	7.0%	4.3%	30.8%
Real appreciation of the RR against the U.S.\$ .....	5.2%	9.3%	11.0%	15.2%	4.5%
Nominal depreciation (appreciation) of the RR against the euro .....	16.1%	2.8%	1.3%	(3.9)%	13.0%
Real appreciation (depreciation) of the RR against the euro .....	(4.9)%	11.0%	17.2%	25.0%	20.8%

Period to period comparisons of our export sales revenues, as restated in constant RR, have been significantly affected by the real change in the value of the RR against the U.S. dollar and the euro. If our actual realized U.S. dollar or euro prices and the related sales for any periods being compared are the same, but between the periods the RR has appreciated in real terms against the U.S. dollar or the euro, the related sales expressed in constant RR will decline from one period to the next. And if the real appreciation of the RR is great enough, our export prices and sales expressed in constant RR will decline from one period to the next even in circumstances where our actual realized U.S. dollar prices and the related sales have increased. Conversely, if the RR has depreciated in real terms against the U.S. dollar or the euro, our prices and the related sales expressed in constant RR will increase from one period to the next if our actual realized U.S. dollar or euro prices and related sales remain unchanged, and may increase even if our U.S. dollar or euro prices and related sales decline.

*Impact of Monetary Effects.* Our results of operations have also been substantially affected by the impact of nominal devaluation and inflation on the value of our monetary assets and liabilities. Nominal devaluation of the RR has generally resulted in foreign exchange gains on monetary assets denominated in foreign currencies and foreign exchange losses on monetary liabilities denominated in foreign currencies. These gains and losses are recorded on a net basis in our statements of operations under the caption "Exchange loss (gain)." Inflation has resulted in purchasing-power gains on monetary liabilities and purchasing power losses on monetary assets; because our financial statements are price-level restated, these gains and losses are recorded on a net basis in our statements of operations under the caption "Monetary gain."

## **Our high tax burden**

We are subject to a wide range of taxes imposed at federal, regional, and local levels and are one of the largest sources of tax revenue to the federal authorities in Russia, as well as to the regional and local authorities in those regions and localities in which we operate. The combination of political pressure on the federal, regional and local authorities to address social and economic issues (and in particular the non-payment of salaries and pensions) and the difficulties associated with collecting taxes from companies and enterprises in financial difficulties, all increase the risk that the Government, as well as regional and local governments, will seek to mitigate these problems by increasing our already substantial tax burden.

Given the relative size of our activities in Russia, our tax burden is largely determined by the taxes payable in Russia.

In addition to profits tax, we are subject to a number of other taxes in Russia, many of which are based on revenue or volumetric measures. Geological and royalty taxes, mineral extraction taxes and road taxes are calculated based on the revenue generated from exploration and production activities. Social taxes and contributions are a function of salaries and wages. Other significant taxes to which we are subject include:

- excise and export tariffs;

- property tax;
- sales tax and VAT; and
- housing fund tax (abolished effective January 1, 2001).

Our effective profit tax rates (current and deferred tax expense/benefit as a percentage of IAS profit before profit tax and minority interest) for the nine month period ended September 30, 2002 and the years ended December 31, 2001, 2000 and 1999 were 83.6%, 92.0%, a benefit of 86.6%, and 510.4%, respectively, while the statutory income tax rates in Russia were 24%, 35%, 30% and 30% in 2002, 2001, 2000 and 1999, respectively. The significant difference between our effective profit tax rates and the statutory rates and the volatility of those rates since 1999 has been the result of:

- significant non-deductible expenses, primarily relating to social expenses;
- significant deferred tax benefits and expenses. The revaluation of property, plant and equipment for statutory tax purposes resulted in a deferred tax benefit in 2000. In each period, temporary differences related to property, plant and equipment affected deferred taxes due to the fact that a significant proportion of the tax base is based on independent appraisals while the financial reporting base is historical cost restated for changes in the general purchasing power of the RR;
- the impact of accounting for inflation which has increased our effective tax rate; and
- changes in Russian taxation legislation.

Current profit tax expense for the nine month period ended September 30, 2002 and the years ended December 31 2001, 2000 and 1999 was RR41,490 million, RR91,080 million, RR90,819 million and RR38,715 million, respectively. This represents a current profit tax rate (current profit tax expense as a percentage of IAS profit before tax and minority interest) for the nine month period ended September 30, 2002 and the years ended December 31, 2001, 2000 and 1999 of 40.1%, 41.0%, 44.9% and 127.4%, respectively.

Effective January 1, 2002, the Russian Government adopted new taxation legislation. This tax legislation included a number of changes, the most significant of which were:

- a decrease in the profit tax rate from 35% to 24%;
- the elimination of upper limits on the deductibility of expenses considered to be in the normal course of business;
- a general decrease in the useful lives of property, plant and equipment for tax accounting purposes;
- the elimination of independent appraisals or use of indices to increase the tax base of property, plant and equipment (capped to 30% of any increase associated with a revaluation as of January 1, 2002 and totally eliminated thereafter). No independent appraisal was undertaken or revaluation recorded for tax purposes as of January 1, 2002 as we projected tax losses at our parent company, which holds most of our property, plant and equipment, in light of the decrease in the tax depreciation lives of property, plant and equipment and did not want to increase the taxable base for property tax purposes;
- the elimination of investment tax credits, although this will have no significant impact because since June 1999 we have been unable to claim such credits due to the structure of our capital funding programs with subsidiaries. The capital funding program was structured in such a way to maximize management control over capital expenditures throughout our consolidated Group. We believe that the advantages of tighter control outweighed additional tax costs associated with the inability to claim the investment tax credits;
- the ability to deduct interest on business loans regardless of the source and use; and
- the ability to offset exploration expenditure against profit tax instead of against mineral restoration taxes.

We expect that our current and overall effective profit tax rates as percentages of IAS profit will continue to be high for the foreseeable future.

On September 3, 1999 the Government issued regulation # 1002 allowing certain companies to restructure various overdue taxes, interest and fines due to the federal government authorities over ten years. During the years ended December 31, 2000 and 2001 and the nine month period ended September 30, 2002, certain of our subsidiaries signed such restructuring agreements. This resulted in the recognition of a gain in each of the respective periods based on the difference between the estimated fair value of the new agreements (based on discounted future cash flows) and the carrying amount of the old payables. This gain is reflected as gain on restructured taxes. Following the restructurings, we recognize the amortization of the discount as interest expense on taxes payable. Interest accrues on the restructured tax payables (excluding interest and fines) at a rate of 5.5% per annum, representing  $\frac{1}{10}$  of the Central Bank of Russia's annual financing rate (55%) as specified in the regulation, and is paid quarterly. This interest is also included in interest expense on taxes payable. If the terms of the restructuring are violated, the original nominal value of the tax payable (including interest and fines) becomes due with additional interest of  $\frac{1}{300}$  of the Central Bank refinancing rate accruing daily.

### Interest rates

We have significant short-term and long-term debt obligations with both fixed and variable interest rates. Fluctuations in interest rates therefore affect our financial results. We do not have any significant hedging arrangements to mitigate interest rate risks resulting from our financing activities.

### Non-cash settlements

Historically, in common with other Russian companies, we have entered into agreements to settle a number of transactions by the transfer of goods and services, as opposed to cash. This results principally from the following factors:

- high inflation in Russia;
- unreliable banking services; and
- gas that we produce is required for the day-to-day operations of a number of our key suppliers.

As the general economic climate in Russia has improved, the value of these transactions has decreased significantly.

While the use of barter transactions and illiquid promissory notes to settle commercial transactions continues to be prevalent in Russia, our reliance on such non-cash transactions has decreased as a proportion of the value of transactions. As can be seen in the table below, the percentage of non-cash settlements (i) related to total sales decreased from 30% in the year ended December 31, 1999 to 15% in the nine month period ended September 30, 2002; (ii) related to domestic sales decreased from 65% in the year ended December 31, 1999 to 22% in the nine month period ended September 30, 2002; and (iii) related to capital expenditures decreased from 56% in the year ended December 31, 1999 to 40% in the nine month period ended September 30, 2002.

	Nine months ended September 30,	Year ended December 31,		
	2002	2001	2000	1999
% of non cash settlements related to total sales .....	15%	18%	22%	30%
% of non cash settlements related to domestic sales .....	22%	23%	31%	65%
% of non cash settlements related to total capital expenditures .....	40%	31%	47%	56%

Barter transactions have been substantially reduced and now non-cash settlements primarily represent mutual cancellations using promissory notes. We give promissory notes, mainly those of OAO Gazprom, to our suppliers in exchange for services or products. Such promissory notes are comparatively liquid in the Russian market and are commonly traded by other Russian companies. The difference between the carrying value of the payables being settled and the face value of the promissory notes is recorded within net finance costs. Promissory notes are shown separately in our balance sheet. See "—Liquidity and Capital Resources—Debt Obligations."

### Impairment of assets

Historically, our results have been significantly affected by impairment provisions on accounts receivable, inventory, assets under construction, property, plant and equipment, investments and other long-term assets. Such provisions for the years ended December 31, 2001, 2000 and 1999 were RR44,768 million, RR115,356 million and RR81,661 million, respectively.

Our provisions for accounts receivable have been significant. As of September 30, 2002, the aggregate balance sheet provision for accounts receivable and prepayments was RR135,944 million or 34.1% of the gross receivable balance. Provisions for accounts receivable have related mainly to non-payment for natural gas sold to Ukraine, Moldova and Yugoslavia and certain domestic consumers.

Our provisions for impairment of assets under construction have also been significant. As of September 30, 2002, the aggregate balance sheet provision related to assets under construction was RR98,270 million or 28% of gross assets under construction. This primarily relates to the following projects: RR29,965 million provision for Khorosoveiskoye and Bovananenkovo fields development, including part of Obskaya-Bovananenkovo railroad construction; RR19,003 million for the Novy Urengoy Chemical Complex; and RR7,645 million for the Long-Yugan-Salekhard-Labytnangi-Kharp pipeline. Although these projects have not been mothballed, under the current investment program we do not believe they will generate positive cash flows in the future.

The cumulative provision against assets under construction has continued to increase, though at a slower rate. The decrease in these provisions in recent periods primarily reflects the strategy of current management to focus on priority projects in a systematic way.

Because of our operating cycle, certain significant decisions about capital construction projects are made after the end of our fiscal year. Accordingly, we typically have larger charges in the fourth quarter of our fiscal year as compared to other quarters. For a discussion of our impairment provisions in the nine-month periods ended September 30, 2002 and 2001, see “—Results of Operations—Nine months ended September 30, 2002 versus nine months ended September 30, 2001.”

## **CERTAIN ACQUISITIONS AND DISPOSITIONS**

Since January 1, 1999, we have made a number of acquisitions and dispositions.

### **January 1, 1999 through September 30, 2002**

In August 1999, we acquired 46% of the share capital of Lebedinsky GOK (“LGOK”), a mining and ore enrichment company operating in the Russian Federation. This acquisition increased our total share in LGOK to 57%, allowing us to consolidate LGOK as a subsidiary from August 1999. The consideration was RR2,467 million in cash.

In January 2001, we exchanged a 57% interest in LGOK and a 17% interest in the Oskolsky Steel Combine for a 48% interest in ZAO Gazmetall (“Gazmetall”). Gazmetall is a metallurgical holding company with controlling interests in LGOK and the Oskolsky Steel Combine. Following the exchange, we intended to sell our shares in Gazmetall, and accordingly our investment was classified as available-for-sale. In March 2002, we sold our 48% interest in Gazmetall for RR2,215 million. The financial effect of these transactions was not material to the financial position or results of operations of our Group.

In January 2001, we acquired 51% of the voting shares of Sibur, a leading producer and marketer of petrochemical products in Russia. The consideration of RR2,892 million consisted of a combination of cash, promissory notes issued by companies in our Group and other securities. Sibur was consolidated as a subsidiary effective from January 1, 2001.

In April 2002, the Federal Securities Commission cancelled the registration of additional stock issued by our subsidiary OAO Zapsibgazprom (“Zapsibgazprom”). As a result, we increased our interest in the ordinary share capital of Zapsibgazprom from 34.0% to 51.0%.

In July 2002, we acquired additional interests in ZAO Media-Most, in NTV and in other media subsidiaries, increasing our interests in NTV from 65% to 95.6% and in ZAO Media-Most from 14.3% to 78.2%. We also increased our controlling interests in the other media subsidiaries. This transaction is an integral part of the restructuring of our media assets. Additionally, we acquired payables and promissory notes to third parties due from these companies. The consideration was partially settled in cash and partially through the forgiveness of debt owed to us.

## Recent Developments

In October 2002, we signed a framework agreement to sell non-controlling interests in several media companies, including NTV, to Eurofinance Group (as nominee), the consideration for which is to be partially settled in cash and partially through the settlement of certain debt obligations of ZAO Media-Most and its media companies to us. The disposed interests primarily comprised those acquired in July 2002. Under the framework agreement, Eurofinance Group is to contribute cash and these acquired interests into a new media holding company, which will be controlled and majority-owned by OAO Gazprom. Our contribution into the new holding company will comprise the remaining interests in our media subsidiaries. The transactions are expected to close in the second quarter of 2003.

In October 2002 we settled accounts payable due as a contribution to the charter capital of ZAO Armrosgazprom of U.S.\$126 million, which was outstanding as of September 30, 2002.

In September 2002 we entered into an agreement with OAO Sroytransgaz to establish a joint activity. The joint activity was formally established in October 2002, and we contributed promissory notes of OAO Gazprom with a fair value of RR4,565 million (face value RR5,719 million) payable in January 2004 and OAO Sroytransgaz contributed 1,144 million ordinary shares in OAO Gazprom (or 4.83% of our shares). We control the voting rights for our ordinary shares held by the joint activity.

In October 2002, we signed an amendment to the Rosshelf joint activity agreement that provided for an additional participant, ZAO Sevmorneftegaz. The Rosshelf joint activity was established to develop the Prirazlomnoye and Shtokmanovskoye fields in the Barents Sea. ZAO Sevmorneftegaz is a company jointly controlled by our subsidiary, ZAO Rosshelf, and OAO Rosneft-Purneftegaz. Under the agreement ZAO Sevmorneftegaz will make a non-cash contribution valued at RR4,334 million, in exchange for a 48.9% interest in the Rosshelf joint activity. The effect of this transaction was to decrease our direct and indirect interest in the Rosshelf joint activity from 99.1% to 62.9%.

In December 2002, we disposed of our 12% interest in OAO Arcticgas with a carrying value of RR1 million in exchange for 25.6% of the voting shares of Zapsibgazprom and additional cash consideration of U.S.\$ 2.95 million, increasing our interest in the ordinary share capital of Zapsibgazprom from 51.1% to 76.7%.

## Our asset reacquisition program

Our new senior management has intensified our asset reacquisition program, through which we have reacquired, and are seeking to reacquire, certain assets, including from Itera.

In April 2002, we completed the repurchase of 32% of the shares in ZAO Purgaz ("Purgaz") from Itera pursuant to a repurchase option provided by the share purchase agreement, dated February 10, 1999, under which we had sold the shares to Itera for their nominal value. As a result, our interest in Purgaz rose from 19% to 51%, and we consolidated Purgaz as a subsidiary from April 2002. Purgaz has a license for the development of the Gubkinskoye gas field in western Siberia. In connection with the acquisition of these Purgaz shares, we paid Itera RR35 thousand in cash (the nominal value of the shares) and financed Purgaz's repayment of RR6,325 million of financing originally provided by Itera to Purgaz to finance development work. Purgaz contributed 4.5 bcm of natural gas sales volumes, RR768 million of revenues and RR354 million of operations profit to our results for the nine months ended September 30, 2002 following its consolidation in April 2002.

Prior to 2001, Zapsibgazprom owned a controlling stake in OAO Severneftegazprom, and Itera had also acquired shares. OAO Severneftegazprom holds licenses for the development of the South Russia gas field and the Yavoronskoye gas field. In 2001, Itera acquired control over OAO Severneftegazprom. We have very recently reacquired control through the purchase of shares from a number of holders, including Itera, and we now own 100% of OAO Severneftegazprom.

ZAO Achimneftegaz was created as a wholly-owned subsidiary of our subsidiary, Urengoigazprom, to accelerate development of the Achimov layer gas condensate deposit in the Urengoiskoye field, the license to which is held by Urengoigazprom. Achimneftegaz is currently working on project documentation for the development and production of the second section of the Achimov layer of the field. Several years ago, ZAO CTI-Systema, an Itera affiliate, acquired a 49% stake in Achimneftegaz. We are currently taking measures to acquire a 48% stake in Achimneftegaz from ZAO CTI-Sigma.

In the past, over a period of several years, Itera acquired interests, and we reduced our interests, in other companies that hold licences to develop gas fields. We are not seeking to reacquire interests in these fields.

## RESULTS OF OPERATIONS

The following table and discussion is a summary of our consolidated results of operations for the nine month periods ended September 30, 2002 and 2001 and the years ended December 31, 2001, 2000 and 1999. Each line-item is also shown as a percentage of our total sales.

	Nine months ended September 30,				Year ended December 31,					
	2002		2001		2001		2000		1999	
	RR million	% of sales	RR million	% of sales	RR million	% of sales	RR million	% of sales	RR million	% of sales

Average price, nominal RR per mcm (including excise tax and net of VAT)	434.5	367.7
Average price, constant RR per mcm (including excise tax and net of VAT)	451.9	442.8
<i>Total sales of gas</i>		
Gross sales (including excise tax, net of VAT)	429,314	505,057
Excise tax	(76,183)	(84,248)
Net sales	353,131	420,809
Excise tax as a percentage of sales	17.7%	16.7%
Volumes in bcm	326.3	326.9
Sales of gas condensate and other oil and gas products (net of excise tax and VAT)	34,447	53,345
Gas transportation sales (net of excise tax and VAT)	11,920	12,839
Other sales	20,898	23,314
<b>Total sales (net of excise tax and VAT)</b>	<b><u>420,396</u></b>	<b><u>510,307</u></b>

Note:

(1) VAT is not charged on sales to Europe.

(2) Average actual prices and not a convenience translation.

Sales revenues (net of excise tax and VAT) fell by RR89,911 million or 17.6% to RR420,396 million in the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001. Sales of gas (net of excise tax and VAT) accounted for 84.0% of total sales in the nine months ended September 30, 2002 but were RR67,678 million or 16.1% lower than in the same period of 2001.

Sales of natural gas to Europe (net of excise tax) decreased by RR67,349 million or 22.7% to RR229,002 million in the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001. This was primarily due to a 23.4% decrease in the average price of gas exported to Europe expressed in constant RR from RR4,078.2 per mcm in the nine months ended September 30, 2001 to RR3,124.2 per mcm in the nine months ended September 30, 2002, reflecting a 20.7% decrease in the average actual U.S. dollar gas export price per mcm from U.S.\$126.6 in the nine months ended September 30, 2001 to U.S.\$100.4 in the nine months ended September 30, 2002 following the decrease in U.S. dollar oil prices in the second half of 2001, and the fact that cumulative devaluation of the RR against the U.S. dollar lagged behind cumulative inflation for the comparable periods. The cumulative inflation index for the period from the beginning of 2001 to September 30, 2002 was 31.2% while the RR devaluation effect against the U.S. dollar for the same period was 12.3%. The decrease in export gas prices was partially offset by the 3.0 bcm or 3.3% increase in export sales volumes. The increase in sales volumes was primarily due to increased volumes sold to Germany and Turkey under existing long-term contracts.

Sales of natural gas to FSU countries (net of excise tax and VAT) remained almost flat at RR35,555 million in the nine months ended September 30, 2002 compared to RR35,393 million in the nine months ended September 30, 2001. Sales volumes increased by 10.3% or 3.0 bcm to 32.0 bcm in the nine months ended September 30, 2002, primarily due to the 17.6% increase in shipments to Ukraine, while shipments to other FSU countries remained at the same level. Sales volumes to Ukraine increased as they now represent 'transit gas' i.e. consideration for transportation services provided in Ukraine, which eliminates our collection risk. The average U.S. dollar price for FSU natural gas sales increased by 2.4% to U.S.\$42.5 per mcm in the nine months ended September 30, 2002, primarily due to a 34.0% increase in the contract price of transit gas sales to Ukraine from U.S.\$50 per mcm to U.S.\$67 per mcm in the third quarter of 2002. Despite an increase in the average U.S. dollar price for FSU gas sales, the constant RR gas price decreased 0.9%, reflecting the fact that cumulative devaluation of the RR against the U.S. dollar lagged behind cumulative inflation for the comparable periods. Excise tax increased 94.5% or RR3,479 million, primarily due to a change in excise tax legislation effective October 1, 2001, whereby sales of dry gas became subject to excise tax whereas previously such sales had been exempt. The majority of our natural gas sales to the Baltic countries are shipments of dry gas.

Sales of natural gas in the domestic market (net of excise tax and VAT) decreased by RR491 million or 0.5% to RR88,574 million in the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001. This decrease was primarily due to a 3.2% or 6.6 bcm decrease in domestic sales volumes in the nine months ended September 30, 2002 compared to the same period of 2001, which more than offset the 2.1% increase in average constant RR domestic price. The decrease in domestic sales volumes was primarily due to a 5.8 bcm decrease in gas sales volumes by Sibur, which substantially reduced its operations at the end of 2001 and during the first six months of 2002. Sibur increased its activity in the third quarter of 2002 after reaching an amicable agreement with its creditors, but this increase was insufficient to offset the decrease in the first six months of 2002. Nominal average domestic natural gas sales prices increased 18.2% from RR367.7 per mcm in the nine months ended September 30, 2001 to RR434.5 per mcm in the nine months ended September 30, 2002 following the 20.0% and a further 15.0% increase in domestic prices to industrial consumers effective March 1, 2002 and July 1, 2002, respectively, and a 15.0% increase in domestic prices to the general population effective August 1, 2002. Average constant RR domestic natural gas price increased only 2.1% as the increase in nominal prices was largely eroded due to 15.0% inflation in the year ended September 30, 2002.

Total excise taxes on natural gas sales decreased 9.6% or RR8,065 million to RR76,183 million in the nine months ended September 30, 2002 compared to RR84,248 million in the nine months ended September 30, 2001, representing 17.7% and 16.7% of gross sales of gas in the respective periods.

Sales of gas condensate and oil and gas products decreased by RR18,898 million or 35.4% to RR34,447 million in the nine months ended September 30, 2002 compared to RR53,345 million in the nine months ended September 30, 2001. This decrease was primarily due to the reduction in operations at Sibur at the end of 2001 and during the first six months of 2002. Sibur's level of operations began to increase beginning in the third quarter of 2002.

Gas transportation sales decreased by RR919 million or 7.2% to RR11,920 million in the nine months ended September 30, 2002 compared to RR12,839 million in the nine months ended September 30, 2001. A 6.0% increase in average tariffs was largely offset by the 5.0% decrease in transportation volumes and was insufficient to offset inflation of 15.0% for the year ended 30 September, 2002. A predominant amount of third-party transportation sales are to Itera and was transported under U.S. dollar denominated contracts.

Other sales decreased by RR2,468 million or 10.4% to RR20,898 million in the nine months ended September 30, 2002 compared to RR23,314 million in the nine months ended September 30, 2001. Other sales represent activities including construction works, gas storage services, drilling works and sales of other services and goods.

### Operating expenses

Operating expenses decreased by RR18,623 million or 5.4% to RR325,550 million in the nine months ended September 30, 2002 compared to RR344,173 million in the nine months ended September 30, 2001. Operating expenses increased as a percentage of sales from 67.4% in the first nine months of 2001 to 77.4% in the first nine months of 2002. The table below presents a breakdown of operating expenses in each period:

	Nine months ended September 30,			
	2002		2001	
	RR million	% of sales	RR million	% of sales
Transit costs .....	67,520	16.1%	67,854	13.4%
Depreciation .....	65,509	15.6%	67,070	13.1%
Staff costs .....	46,673	11.1%	42,045	8.2%
Taxes other than on income .....	31,903	7.6%	31,009	6.1%
Processing services and purchased oil and gas products .....	13,867	3.3%	26,383	5.2%
Provision expenses .....	8,364	2.0%	13,938	2.7%
Other .....	91,714	21.8%	95,874	18.5%
<b>Total operating expenses .....</b>	<b><u>325,550</u></b>	<b><u>77.4%</u></b>	<b><u>344,173</u></b>	<b><u>67.4%</u></b>

#### *Depreciation*

Depreciation decreased to RR65,509 million in the nine months ended September 30, 2002 from RR67,070 million in the nine months ended September 30, 2001. This decrease was primarily due to an increase in the amount of depreciation included in the cost of gas in storage from RR4,520 million in the nine months ended September 30, 2001 to RR5,843 million in the nine months ended September 30, 2002. The depreciation associated with those volumes will be expensed in future periods when the gas is sold.

#### *Staff costs*

Staff costs increased to RR46,673 million in the nine months ended September 30, 2002 from RR42,045 million in the nine months ended September 30, 2001. There was no significant change in the number of employees but the increase was primarily due to an increase in staff salaries above inflation.

#### *Processing services and purchased oil and gas products*

Processing services and purchased oil and gas products decreased by RR12,516 million or 47.4% to RR13,867 million in the nine months ended September 30, 2002 primarily due to the substantial reduction in Sibur's operations at the end of 2001 and during the first six months of 2002. Sibur's level of operations began to increase beginning in the third quarter of 2002.

#### *Provision expenses*

Provision expenses decreased by RR5,574 million or 40.0% to RR8,364 million in the nine months ended September 30, 2002 compared to RR13,938 million in the nine months ended September 30, 2001. Provision expense for the nine months ended September 30, 2001 includes a RR10,212 million charge as a result of

changes in tax legislation effective from January 1, 2001 which required a provision for VAT to be recorded for accounts receivable balances that were provided for (including those provided for in prior periods). Absent this charge, provisions increased by RR4,638 million in the first nine months of 2002. The increase was primarily attributable to provisions for certain of Sibur's receivables.

In prior years we have recorded larger provisions in the fourth quarter than in previous quarters. Although we may incur additional provisions in the fourth quarter of 2002, including in relation to assets under construction and other property, plant and equipment, we anticipate that our total provision expense for the year ended December 31, 2002 will be less than for the year ended December 31, 2001.

#### Net finance (costs) benefit

	Nine months ended September 30,			
	2002		2001	
	RR million	% of sales	RR million	% of sales
Net exchange loss .....	(8,305)	(2.0)%	(1,139)	(0.2)%
Interest expense .....	(24,364)	(5.8)%	(29,047)	(5.7)%
Interest income .....	6,307	1.5%	7,678	1.5%
Gains on and extinguishment of restructured liabilities .....	11,851	2.8%	24,002	4.7%
	<u>(14,511)</u>	<u>(3.5)%</u>	<u>1,494</u>	<u>0.3%</u>

Our net exchange loss increased by RR7,166 million, or 629.1%, to RR8,305 million in the nine months ended September 30, 2002, reflecting (i) a 5.0% devaluation of the RR against the U.S. dollar and a 16.1% devaluation of the RR against the euro in the nine months ended September 30, 2002 on our U.S. dollar and euro denominated receivables and borrowings and (ii) an increase in our net foreign currency liability position.

Interest expense decreased by RR4,683 million to RR24,364 million in the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001 primarily due to a RR3,089 million decrease in interest expense on taxes payable, following the reduction in overdue taxes payable, and a reduction in our borrowing costs resulting from the improved interest rate environment.

Gains on and extinguishment of restructured liabilities decreased by RR12,151 million to RR11,851 million in the nine months ended September 30, 2002. This was primarily due to a significant reduction in tax payables eligible for restructuring in 2002, offset by RR3,221 million of gains on the restructuring of Sibur's debts, following the approval of the settlement agreement with Sibur's creditors on September 10, 2002. We also recognized gains due to the forgiveness by certain tax authorities of fines relating to overdue taxes that had previously been restructured.

#### Share of net income of associated undertakings

Share in net income of associates decreased by RR468 million to RR2,314 million in the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001, due to our share of the net loss recorded by Sibur-Tyumen of RR1,205 million, offset by the RR355 million increase in income from EuRoPol GAZ S.A and RR639 million of income from National Reserve Bank. We ceased to exercise control over the activities of National Reserve Bank from January 1, 2002. Accordingly, effective January 1, 2002 our investment in National Reserve Bank was classified as an associated undertaking until we disposed of 37% of our ordinary shares and all of our preference shares of the bank in July 2002.

#### Gains (losses) on available-for-sale investments

In the nine months ended September 30, 2002 we recognized gains on available-for-sale investments of RR1,024 million compared to losses of RR2,802 million in the nine months ended September 30, 2001. The change resulted primarily from losses of RR2,000 million on promissory notes held by Sibur and a RR1,876 million write-down of our investment in Gazmetall in the nine months ended 30 September 2001.

### **Monetary gain**

Monetary gain decreased by RR6,677 million to RR19,824 million in the nine months ended September 30, 2002 compared to the nine months ended September 30, 2001 due to the decrease in the rate of inflation and our lower net monetary liability position.

### **Profit tax**

Profit tax expense decreased RR72,148 million or 45.5% to RR86,570 million in the nine months ended September 30, 2002 compared to RR158,718 million in the nine months ended September 30, 2001.

Our current profit tax expense decreased by RR43,064 million to RR41,490 million in the nine months ended September 30, 2002 from RR84,554 million in the nine months ended September 30, 2001. Our current profit tax rate was 40.1% and 43.6% for the nine months ended September 30, 2002 and 2001, respectively. Our high current profit tax rate resulted in part from Russian tax regulations that limit the deductibility of some of our operating expenses. The decrease in our current tax rate was primarily due to the application of revised tax depreciation lives for property, plant and equipment following the enactment of Chapter 25 "Profit tax" of the Russian Federation Tax Code on January 1, 2002. The revised tax depreciation tax lives, which became generally shorter, gave rise to current period tax losses in the statutory books of OAO Gazprom. We recognized the results of the assessment of the revised tax depreciation lives for property, plant and equipment in the three months ended September 30, 2002 when such an assessment was completed. Revised tax returns were then filed for the nine months ended September 30, 2002. The current tax benefit as a result of changing depreciation lives was partially offset by RR22,689 million of current profit tax expense in the nine months ended September 30, 2002 related to a "transition period" profit tax, which is a one time current tax charge resulting from the change in tax legislation, effective January 1, 2002, to recognize profit tax on an accrual rather than a cash basis. Transition period profit tax is payable over a period of five years.

Our high overall tax rate of 83.6% and 81.8% for the nine months ended September 30, 2002 and 2001, respectively, resulted from the impact of inflation accounting, which among other things, increases the book value of our fixed assets compared to their tax basis, resulting in a deferred tax expense. Our deferred tax expense was RR45,080 million and RR74,164 million for the nine months ended September 30, 2002 and 2001, respectively. The depreciation adjustment and transition period profit tax charge did not affect our overall tax rate in 2002 because they were offset by corresponding deferred tax expense and benefit, respectively.

### **Minority interests**

Minority interest was a RR964 million expense in the nine months ended September 30, 2002 compared to a RR1,815 million benefit in the nine months ended September 30, 2001. This was primarily due to a reduction of the minority interest in Sibur's loss in 2002 due to more of those losses being reflected in the consolidated results of operations.

*Year ended December 31, 2001 versus year ended December 31, 2000*

**Sales**

The following tables set out our volumes and realized prices for the years ended December 31, 2001 and 2000.

	Year ended December 31,	
	2001	2000

Other sales .....	31,900	38,870
<b>Total sales (net of excise tax and VAT) .....</b>	<b><u>683,859</u></b>	<b><u>708,366</u></b>

Note:

(1) VAT is not charged on sales to Europe.

(2) Average actual prices and not a convenience translation.

Sales revenues (net of excise tax and VAT) fell by RR24,507 million or 3.5% to RR683,859 million in 2001 compared to 2000. Sales of gas accounted for 82.3% of total sales in 2001 but were RR32,705 million or 5.5% lower than in 2000. The decrease in sales of gas together with the RR24,554 million or 33.2% decrease in gas transportation and other sales more than offset the RR32,752 million or 84.3% increase in sales of gas condensate and other oil and gas products.

Sales of natural gas to Europe (net of excise tax) decreased by RR31,757 million or 7.5% to RR390,594 million in 2001 compared to 2000. This was primarily due to a 1.5% or 2.0 bcm decrease in sales volumes and a decrease in prices in constant RR terms. Following the increase in U.S. dollar oil prices in the first half of 2001, average U.S. dollar export gas prices increased 24.6% in 2001 to U.S.\$122.6 per mcm compared to 2000. Nevertheless, average constant RR export gas prices to Europe, decreased by 3.0% to RR3,932.5 per mcm, reflecting the fact that devaluation of the RR against the U.S. dollar continued to lag behind inflation. The

cumulative inflation index for the period from the beginning of 2000 to the end of 2001 was 42.7% while the RR devaluation effect against the U.S. dollar was only 11.6%. Sales volumes decreased as customers took minimum volumes under their long-term contracts following the increase in U.S. dollar prices paid by our customers.

Sales of natural gas to FSU countries (net of excise tax and VAT) decreased by RR17,878 million or 27.5% to RR47,190 million in 2001 compared to 2000. This was primarily due to a 25.1% decrease in the average constant RR price of gas and a 6.4% decrease in FSU sales volumes. The main reason for the decrease in FSU sales volumes was a 15% reduction in sales volumes to Ukraine from 26 bcm in 2000 to 22 bcm in 2001 which more than offset the increased shipments of gas shipped to Belarus, Moldova and Baltic countries. In light of Ukraine's poor payment history, we restricted our shipments to Ukraine to those required to cover transit services. The 25.1% decrease in the average constant RR price of gas to RR1,359.6 per mcm reflected a 8.6% decrease in the average actual U.S. dollar gas price to U.S.\$ 41.5 per mcm, as 'transit gas' is priced lower than that for normal FSU shipments to the Ukraine, and the fact that cumulative devaluation of the RR against the U.S.\$ continued to lag behind cumulative inflation.

Sales of natural gas in the domestic market (net of excise tax and VAT) increased by RR16,930 million or 15.6% to RR125,099 million in 2001 compared to 2000. Government control, via the FEC, of domestic gas prices has meant in recent years increases in nominal domestic gas prices, on a cumulative basis, failed to recover fully the effects of inflation. However, 2001 saw the beginning of the reversal of this trend, as the nominal average domestic price increased 40.5% from 2000 to 2001, rising from RR254.7 mcm to RR357.9 mcm. Thus, despite 18.8% inflation in 2001, the average constant RR domestic price was 15.5 % higher in 2001 compared to 2000. The increase in constant RR prices more than offset the 2.2% decrease in domestic sales volumes, which fell 6.9 bcm to 300.8 bcm in 2001. This decrease was primarily due to the reduction in sales volumes of our production subsidiaries to regional government authorities in order to settle mineral restoration tax and royalty liabilities.

Total excise taxes on natural gas sales increased 1.1% to RR118,183 million in 2001 from RR116,928 million in 2000, representing 17.4% and 16.4% of gross sales of natural gas in 2001 and 2000, respectively.

Sales of gas condensate and oil and gas products increased by RR32,752 million or 84.3% to RR71,594 million in 2001 compared to RR38,842 million in 2000. This increase was the result of the acquisition of Sibur in January 2001, which accounted for 61% of sales of gas condensate and oil and gas products in 2001.

Gas transportation sales decreased by 50.2% to RR17,482 million in 2001 from RR35,066 million in 2000. This was primarily due to lower revenues from sales to Itera. In 2001, Itera transported gas purchased mainly from independent producers in Central Asia and Kazakhstan, whereas in 2000 it transported gas purchased from us in the Yamal-Nenets districts resulting in shorter transit distances and therefore less revenue.

Other sales decreased by 17.9% to RR31,900 million in 2001 compared to RR38,870 million in 2000. This decrease was primarily due to lower construction and other services.

## Operating expenses

Operating expenses decreased by 8.9% in 2001 to RR486,148 million from RR533,614 million in 2000. The table below presents a breakdown of operating expenses in each period:

	Year ended December 31,			
	2001		2000	
	RR million	% of sales	RR million	% of sales
Depreciation .....	95,790	14.0%	92,261	13.0%
Transit costs .....	91,222	13.3%	102,418	14.5%
Staff costs .....	57,029	8.3%	57,012	8.0%
Materials .....	57,169	8.4%	43,030	6.1%
Taxes other than on income .....	44,400	6.5%	53,881	7.6%
Impairment provision for accounts receivable and prepayments .....	33,638	4.9%	34,643	4.9%
Purchased refined products .....	16,502	2.4%	—	0.0%
Processing services .....	12,081	1.8%	—	0.0%
Electricity .....	10,964	1.6%	10,620	1.5%
Purchased gas .....	7,161	1.0%	11,641	1.6%
Provision for impairment of assets under construction .....	6,238	0.9%	32,791	4.6%
Provision for impairment of other property, plant and equipment .....	2,446	0.4%	9,431	1.3%
Losses on disposal of property, plant and equipment .....	3,164	0.5%	4,217	0.6%
Other provisions .....	2,446	0.4%	38,491	5.4%
Other .....	45,898	6.7%	43,178	6.1%
	<b>486,148</b>	<b>71.1%</b>	<b>533,614</b>	<b>75.3%</b>

### *Depreciation*

Depreciation increased to RR95,790 million in 2001 from RR92,261 million in 2000, an increase of RR3,529 million or 3.8%. This increase reflected a higher depreciable fixed asset base, as more assets were put into operation, mainly in projects such as the Zapolyarnoye field, the Zapolyarnoye-Urengoi pipeline and the Yamburgskoye and Urengoiszkoye fields. The increase in the balance of fully depreciated assets, from RR304,525 million in 2000 to RR565,371 million in 2001, partly offset the increase of depreciation caused by property, plant and equipment additions in 2000 and 2001.

### *Transit costs*

Transit costs decreased by 10.9% from RR102,418 million in 2000 to RR91,222 million in 2001. Transit costs relate principally to fees charged by Ukraine and Poland for the transit of gas to markets in Europe.

The decrease was due to the fact that transit costs are largely U.S. dollar denominated and the rate of devaluation of the RR against the U.S. dollar was below the rate of inflation in 2001. Volumes of transit services provided were consistent with 2000. U.S. dollar denominated gas transportation tariffs through the Ukraine were constant during 2000 and 2001 and approximated U.S.\$1.09 per mcm per 100 km. U.S. dollar denominated gas transportation tariffs through Poland were constant during 2000 and 2001 and approximated U.S.\$1.3 per mcm per 100 km.

### *Staff costs*

Staff costs were almost were RR57,029 million in 2001 and RR57,012 million in 2000. There was no significant change in the number of employees, and staff salaries increased in line with inflation.

### *Materials*

The cost of materials used in our activities increased by RR14,139 million or 32.9% from RR43,030 million in 2000 to RR57,169 million in 2001. The increase is primarily due to the consolidation of Sibur from January 1, 2001 and the general increases in our materials prices in excess of inflation.

### *Taxes other than on income*

Taxes other than on income consist of:

	Year ended December 31,	
	2001	2000
Royalty .....	12,117	9,907
Road users tax and housing fund tax .....	9,519	27,768
Property tax .....	9,173	5,701
Mineral restoration tax .....	8,719	4,977
Other taxes .....	4,872	5,528
	<u>44,400</u>	<u>53,881</u>

Taxes other than on income decreased by RR9,481 million from RR53,881 million in 2000 to RR44,400 million in 2001. Both royalty and mineral restoration tax, payable by production subsidiaries, increased by RR2,210 million and RR3,472 million, respectively, in line with the increase in internal gas prices. Road users tax decreased by RR18,249 million in 2001 compared to 2000, reflecting a decrease in the road users tax rate from 2.5% to 1% (effective from January 1, 2001). Effective from January 1, 2001, the housing fund tax was abolished which in prior periods was calculated at 1.5% of our sales revenues, resulting in a RR3,998 million decrease. Property taxes increased by RR5,472 million in 2001 compared to 2000 due to a statutory revaluation of our property, plant and equipment as of January 1, 2001 and changes in property tax legislation.

### *Impairment provision for accounts receivable and prepayments*

The impairment provision for accounts receivable and prepayments decreased 3.0% from RR34,643 million in 2000 to RR33,638 million in 2001 (including RR11,377 million related to VAT provisions on accounts receivable, as explained below). As at December 31, 2001, the balance of provisions related to accounts receivable and prepayments was RR150,521 million or 36.0% of the gross receivable balance.

Changes in the tax legislation of the Russian Federation, effective January 1, 2001, required a provision for VAT to be recorded for accounts receivable balances that are provided for (including those that were provided for in prior periods), whereas previously the related VAT was not required to be provided for or paid. For the year ended December 31, 2001, this resulted in a charge of RR11,377 million.

*Purchased refined products and processing services*

Purchased refined products and processing services pertains to activities of Sibur, consolidated from January 1, 2001.

*Purchased gas*

The cost of purchased gas decreased 38.5% from RR11,641 million in 2000 to RR7,161 million in 2001. A RR10,036 million decrease in the cost of purchased gas relates to the one-time purchase of Turkmenistan gas from Itera in 2000, which was made in order to fulfill our contractual obligations to European customers. This decrease was partially offset by RR2,965 million of cost of gas purchased in 2001 by Sibur, which purchases external gas in certain regions for further processing.

*Provision for impairment of assets under construction*

Provision expense related to impairment of assets under construction decreased by 81.0% from RR32,791 million in 2000 to RR6,238 million in 2001 in line with our strategy to focus our capital program on priority projects and thereby reduce our total number of projects. The provision for impairment was recorded in the fourth quarter of 2001.

*Provision for impairment of other property, plant and equipment*

The provision for impairment of other property, plant and equipment decreased from RR9,431 million in 2000 to RR2,446 million in 2001. This was primarily due to the reduction in the number of properties being abandoned, such as development and exploration wells.

*Other provisions*

Expenses in respect of other provisions decreased by 93.6% from RR38,491 million in 2000 to RR2,446 million in 2001, primarily due to a RR26,883 million decrease in the provision expense on investments and other long-term assets, a RR7,891 million decrease in the provision for inventory obsolescence and a RR1,271 million decrease in the provision for guarantees and other charges.

The decrease in the provision expense on investments and other long-term assets was primarily due to the reduction in new investments in non-core activities for which a provision amount had been recorded in prior periods. The decrease in the provision expense on inventory obsolescence was primarily due to the disposal of previously surplus stock of production materials and improved inventory turnover.

**Net finance costs**

	Year ended December 31,	
	2001	2000
Net exchange loss .....	(5,187)	(3,388)
Interest income .....	13,605	14,973
Gain on restructured taxes, interest and fines .....	20,647	22,096
Interest expense .....	(39,620)	(61,907)
	<u>(10,555)</u>	<u>(28,226)</u>

Our net exchange loss increased by RR1,799 million from RR3,388 million in 2000 to RR5,187 million in 2001, reflecting the impact of the 7% devaluation of the RR against the U.S. dollar and the 1.3% devaluation of the RR against the euro on receivables and borrowings expressed in foreign currencies. Interest expense

decreased RR22,287 million to RR39,620 million in 2001, in line with our efforts to restructure our profit tax liabilities. Pursuant to tax legislation enacted in 1999, we were allowed to restructure federal tax payables (principal, interest and fines), existing as of the date of the legislation. Interest accrues on the tax payables (excluding interest and fines) at a rate of 5.5% per annum and is paid quarterly. The restructured amounts must be settled in accordance with agreed repayment schedules and current tax payments must be made timely.

During the years ended December 31, 2001 and 2000, several of our subsidiaries entered into contracts with Government authorities to restructure overdue taxes, interest and fines so that those liabilities would be settled by installment payments due over 10 years. The RR20,647 million gain in 2001 on restructured taxes, interest and fines (RR22,096 million in 2000) represented the difference between the estimated fair value of the new agreements (based on discounted future cash flows) and the carrying amount of the old payables (RR55,001 million).

#### Share of net income of associated undertakings

Share of net income of associated undertakings increased RR3,085 million to RR3,920 million in 2001 due to our share of the net income (loss) recorded by WINGAS GmbH increasing from a RR233 million loss in 2000 to RR1,072 million of income in 2001, RR1,055 million of income from Turusgaz, RR467 million of income from Moldovagaz and RR314 million of income from Altalanos Evtkeforgalmi Bank Rt ("AEB") in 2001.

#### Losses on available for sale investments

Losses on available for sale investments decreased by RR1,991 million to RR953 million in 2001, primarily due to the RR6,181 million reduction in provisions against long-term and short-term promissory notes and RR1,449 million of unrealised gains on available-for-sale securities, partially offset by RR4,654 million of losses on promissory notes held by Sibur and the RR1,967 million write-down of our investment in Gazmetall following an independent valuation.

#### Monetary gain

Monetary gain decreased by RR25,721 million to RR32,146 million in 2001 due to the fall in the rate of inflation and our lower net monetary liability position.

#### Profit tax

	<u>Year ended December 31,</u>	
	<u>2001</u>	<u>2000</u>
Profit before profit tax and minority interest .....	222,269	202,284
Theoretical tax charge at the statutory rate thereon .....	(77,794)	(60,685)
Tax effect of items which are not deductible or assessable for taxation purposes:		
Non-temporary element of net monetary gains .....	(88,754)	(59,691)
Non-deductible expenses .....	(36,682)	(52,067)
Statutory tax concessions .....	13,162	25,910
Other non-temporary differences .....	(9,943)	(7,000)
Inflation effect on deferred profit tax balance at beginning of year .....	7,131	6,902
Effect of increase in taxable base due to statutory revaluation .....	—	303,386
Effect of change in tax rate .....	(11,608)	18,377
<b>Profit tax (expense) benefit .....</b>	<b><u>(204,488)</u></b>	<b><u>175,132</u></b>

Our current profit tax expense increased by RR261 million from RR90,819 million in 2000 to RR91,080 million in 2001. Our effective current profit tax rate decreased from 44.9% in 2000 to 41.0% in 2001. Our high current profit tax rate for 2001 and 2000 resulted in part from Russian tax regulations that limited the deductibility of some of our operating expenses.

Our overall tax rate for 2001 of 92% primarily resulted from the impact of non-deductible expenses as described above, as well as from inflation accounting, which among other things, increases the book value of our fixed assets compared to their tax basis, resulting in a deferred tax expense, and the impact of the reduction in Russian tax rates from 35% to 24%, which reduced our net deferred tax asset, resulting in a deferred tax expense. Our deferred tax expense was RR113,408 million for the year ended December 31, 2001.

Our total profit tax benefit in 2000 consisted primarily of a deferred tax benefit of RR303,386 million, representing the deferred tax impact of recording an upward revaluation of our fixed assets for Russian statutory purposes, partially offset by the impact of non-deductible expenses as described above, and by deferred tax expense related to the impact of inflation accounting, which among other things as noted above, increases the book value of our fixed assets compared to their tax basis, resulting in a deferred tax expense.

**Minority interest**

Minority interest expense increased by RR3,132 million to RR5,121 million in 2001 primarily due to the increased profitability of National Reserve Bank, our banking subsidiary, following an increase in the value of its investment portfolio and the release of prior year provisions against outstanding forward exchange contracts which had been entered into prior to August 17, 1998. Such contracts became unenforceable against National Reserve Bank in 2001 in accordance with requirements of the Civil Code of the Russian Federation.

*Year ended December 31, 2000 versus year ended December 31, 1999*

**Sales**

The following tables set out our volumes and realized prices for the years ended December 31, 2000 and 1999.

<b>Total sales (net of excise tax and VAT) .....</b>	<b><u>708,366</u></b>	<b><u>525,080</u></b>

Note:

(1) VAT is not charged on sales to Europe.

(2) Average actual prices and not a convenience translation.

Total sales revenues (net of excise tax and VAT) increased by 34.9% or RR183,286 million to RR708,366 million in 2000 compared to 1999. Net sales of gas accounted for 84.0% of total sales in 2000 and increased RR149,712 million or 33.6% to RR595,588 million in 2000.

Sales of natural gas to Europe (net of excise tax) increased by RR156,532 million or 58.9% to RR422,351 million in 2000 compared to 1999. This was primarily due to a 53.3% increase in constant RR prices and a 2.2 bcm increase in sales volumes. The increase in constant RR prices during 2000 was the result of an increase in the underlying U.S. dollar prices for oil at the end of 1999. A 1.7% increase in the sales volumes was achieved through new agreements with Yugoslavia, the Czech Republic and Slovakia.

Sales of natural gas to FSU (net of excise tax and VAT) countries decreased by RR5,717 million or 8.1% to RR65,068 million in 2000 compared to 1999. This was primarily due to a 4.9 bcm or 10.4% decrease in FSU sales volumes to 42.3 bcm in 2000, which was partially offset by the 1.4% increase in the constant RR price to RR1,814.3 per mcm in 2000. The main reason for the decrease in FSU sales volumes was our decision to reduce sales to FSU countries due to their poor payment history and re-direct these volumes to European countries. The increase in constant RR prices was primarily due to higher U.S. dollar prices for gas sold to Moldova and the Baltic countries.

Sales of natural gas in the domestic market (net of excise tax and VAT) decreased by RR1,103 million or 1.0% to RR108,169 million in 2000 compared to 1999. In May 2000, the FEC increased domestic natural gas prices by 16% from RR228 per mcm to RR265 per mcm. The nominal average domestic price in 2000 was 16.7% higher than in 1999, rising from RR218.3 mcm to RR254.7 mcm. However, this nominal improvement was more than offset by the cumulative underlying inflation causing the real average domestic price to decrease 5.6% to RR367.7 per mcm in 2000 compared to 1999. Domestic sales also decreased due to the 1.2 bcm or 0.3% decrease in sales volumes to 307.7 bcm in 2000.

Total excise taxes on gas sales increased by 24.4% to RR116,928 million in 2000 compared to 1999, representing 16.4% and 17.4% of gross sales in gas in 2000 and 1999, respectively. The increase was primarily due to the increase in the value of gas sales to Europe, partially offset by an increase in the volume of non-excisable gas sold and an increase in foreign currency denominated transit costs and other export which are deductible for excise tax purposes.

Sales of gas condensate and other oil and gas products increased by 86.0% from RR20,885 million in 1999 to RR38,842 million in 2000, primarily due to the increase in domestic and export gas condensate and oil and gas products prices and an increase in sales volumes.

Gas transportation sales increased by 27.9% from RR27,425 million in 1999 to RR35,066 million in 2000, primarily due to a 17% increase in transportation tariffs, established by FEC, and new transit agreement signed with existing and new customers.

Other sales increased by 25.8% from RR30,894 million in 1999 to RR38,870 million in 2000 primarily due to higher sales from selling materials, construction and drilling services.

## Operating expenses

Operating expenses increased in real terms by 10% from RR486,467 million in 1999 to RR533,614 million in 2000. The table below presents a breakdown of operating expenses in each period:

	Year ended December 31,			
	2000		1999	
	RR million	% of sales	RR million	% of sales
Transit costs .....	102,418	14.5%	101,454	19.3%
Depreciation .....	92,261	13.0%	82,731	15.8%
Staff costs .....	57,012	8.0%	51,811	9.9%
Taxes other than on income .....	53,881	7.6%	46,749	8.9%
Materials .....	43,030	6.1%	31,483	6.0%
Impairment provision for accounts receivable and prepayments .....	34,643	4.9%	20,088	3.8%
Impairment provision for assets under construction .....	32,791	4.6%	26,926	5.1%
Electricity .....	10,620	1.5%	10,291	2.0%
Purchased gas .....	11,641	1.6%	2,460	0.5%
Impairment provision for other property, plant and equipment .....	9,431	1.3%	9,103	1.7%
Losses on disposal of property, plant and equipment .....	4,217	0.6%	4,765	0.9%
Other provisions .....	38,491	5.4%	46,048	8.8%
Other .....	43,178	6.1%	52,558	10.0%
	<b>533,614</b>	<b>75.3%</b>	<b>486,467</b>	<b>92.6%</b>

### *Depreciation*

Depreciation increased by 11.5% from RR82,731 million in 1999 to RR92,261 million in 2000, primarily due to a higher fixed asset base, as more assets were put into operation in both 1999 and 2000. The cost of property, plant and equipment subject to depreciation rose by more than 10%.

### *Materials*

The cost of materials increased by 36.7% from RR31,483 million in 1999 to RR43,030 million in 2000, primarily due to the increased cost of materials in excess of inflation.

### *Taxes other than on income*

	Year ended December 31,	
	2000	1999
Royalty .....	9,907	7,517
Road users tax and housing fund tax .....	27,768	25,218
Property tax .....	5,701	5,335
Mineral restoration tax .....	4,977	3,908
Other taxes .....	5,528	4,771
	<u>53,881</u>	<u>46,749</u>

Taxes other than on income rose by RR7,132 million or 15.3%. This increase was partly the result of higher prices attributable to natural gas sales by our production enterprises, and the consequently higher level of both mineral use tax (royalty) and mineral restoration tax, both of which are based on production sales. Road users and housing taxes also rose due to the significantly higher non-gas sales, such as transportation services and gas condensate sales.

### *Purchased gas*

The cost of purchased gas increased from RR2,460 million in 1999 to RR11,641 million in 2000. In 2000 we purchased 9 bcm of Turkmenian gas from Itera at a cost of U.S.\$45 per mcm. No gas was purchased from Itera in 1999.

### *Impairment provision for accounts receivable and prepayments*

The impairment provision expense for accounts receivable and prepayments increased by 72.5% from RR20,088 million in 1999 to RR34,643 million in 2000. In overall terms trade receivables continued to fall in 2000, partly as result of the continuing drop in the value of domestic sales, and partly due to both the reduced level of sales to FSU countries, primarily Ukraine, and the higher level of provisioning against those receivables. The increase in the provision expense for accounts receivable and prepayments in 2000 reflected an increased provision against Ukrainian sales due to the continuing uncertainty of collections. The total balance sheet provision for accounts receivable related to Ukrainian sales was 63% of gross accounts receivable due from Ukraine as of December 31, 2000.

### *Other provisions*

Other provision expenses decreased by 16.4% from RR46,048 million in 1999 to RR38,491 million in 2000. The decrease is primarily attributable to a RR2,451 million decrease in the provision expense on investments and other long-term assets, and the RR10,131 million decrease in the provision for guarantees and other charges. Decreases in these provisions more than offset the RR5,024 million increase in the provision for inventory obsolescence.

The provision expense on investments and other long-term assets decreased primarily due to a reduction in investments in non-core activities, for which a provision amount had been recorded in prior periods, and a decrease in the balance sheet provision related to our other investments. This main reason for the decrease is attributable to National Reserve Bank, one of our banking subsidiaries, participating in a restructuring program to

exchange Ukrainian Ministry of Finance bonds for U.S. dollar denominated eurobonds, which were reclassified from other investments to marketable securities and recorded at their estimated fair value. This resulted in the release of the prior provision against the Ukrainian Ministry of Finance bonds amounting to RR2,762 million.

The decrease in the provision expense for guarantees and other charges reflects the reduction in new guarantees provided and payments under existing guarantees.

The provision expense related to impairment of assets under construction increased due to an increase in the number of projects started and then placed "on-hold."

#### Net finance costs

	December 31,	
	2000	1999
Net exchange loss .....	(3,388)	(55,594)
Interest income .....	14,973	17,017
Gain on restructured taxes, interest and fines .....	22,096	—
Interest expense .....	(61,907)	(47,772)
	<u>(28,226)</u>	<u>(86,349)</u>

Our net exchange loss decreased by RR52,206 million, reflecting the 3.9% appreciation of the RR against the euro, the other currency in which we had significant hard-currency borrowings.

During the year ended December 31, 2000, several of our subsidiaries entered into contracts with the governmental authorities to restructure overdue taxes, interest and fines so that those liabilities would be settled by installment payments due over 10 years. The gain on restructured taxes, interest and fines represented the difference between the estimated fair value of the new agreements (based on discounted future cash flows) and the carrying amount of the old payables.

#### Share of net income (losses) of associated undertakings

Share of net income (losses) of associated undertakings changed from a RR774 million loss in 1999 to RR835 million of income in 2000 primarily due to the share of net income reported by Turusgaz (RR843 million) and AEB (RR565 million), more than offsetting the share of losses recorded by WINGAS GmbH (RR232 million) and Moldovagaz (RR390 million).

#### Monetary gain

Monetary gain decreased by RR22,898 million to RR57,867 million in 2000 due to the fall in the rate of inflation and our lower net monetary liability position.

#### Profit tax

	Year ended December 31,	
	2000	1999
Profit before profit tax and minority interest .....	202,284	30,378
Theoretical tax charge at the statutory rate thereon .....	(60,685)	(9,113)
Tax effect of items which are not deductible or assessable for taxation purposes:		
Non-temporary element of net monetary gains .....	(59,691)	(125,481)
Non-deductible expenses .....	(52,067)	(52,562)
Statutory tax concessions .....	25,910	17,099
Other non-temporary differences .....	(7,000)	10,663
Inflation effect on deferred profit tax balance at beginning of year .....	6,902	3,681
Effect of increase in taxable base due to statutory revaluation .....	303,386	—
Effect of change in tax rate .....	18,377	672
<b>Profit tax benefit (expense) .....</b>	<b><u>175,132</u></b>	<b><u>(155,041)</u></b>

Our current profit tax expense was RR90,819 million compared to RR38,715 million in 1999. Our effective current profit tax rate decreased from 127.4% in 1999 to 44.9% in 2000. Our high current profit tax rate for 2000 and 1999 resulted in part from Russian tax regulations that limited the deductibility of some of our operating expenses.

Our overall tax benefit in 2000 resulted primarily from a deferred tax benefit of RR303,386 million representing the deferred tax impact of recording an upward revaluation of our fixed assets in our Russian statutory and tax books purposes, partially offset by the impact of non-deductible expenses as described above and deferred tax expense related to the impact of inflation accounting, which among other things, increases the book value of our fixed assets compared to their tax basis, resulting in a deferred tax expense. Our deferred tax benefit was RR265,951 million for the year ended December 31, 2000 compared to a deferred tax charge of RR116,326 million for the year ended December 31, 1999. Our overall effective profit tax rate for 1999 of 510% resulted from the impact of non-deductible expenses and inflation accounting.

### Minority interest

Minority interest expense increased from RR288 million in 1999 to RR1,989 million in 2000 primarily due to higher profits reported by subsidiaries, in which we owns less than 100%, including Gazprombank and LGOK.

### LIQUIDITY AND CAPITAL RESOURCES

We make significant capital expenditures to explore for natural gas, to develop our natural gas fields and to produce our natural gas, gas condensate and crude oil, and to maintain and expand the UGSS and international pipelines. Our capital expenditures (including cash advances to contractors and suppliers, which are recorded within other long-term assets) were RR114,711 million in the first nine months of 2002 (against a budget of RR145,517 million for all of 2002), RR170,927 million in 2001, RR156,331 million in 2000 and RR157,570 million in 1999. Our budgeted capital expenditure for 2003 is RR179,800 million.

We make a significant portion of our capital expenditures using consideration other than cash. See "Liquidity and Capital Resources—Capital expenditures." In the first nine months of 2002 and for the years ended December 31, 2001 and 2000, our operating cash flows exceeded our cash capital expenditures by significant margins, but were not sufficient to cover our combined cash and non-cash capital expenditures. In the year ended December 31, 1999, our operating cash flows were below our cash capital expenditures as well as our combined cash and non-cash capital expenditures.

Following is a table of our cash and non-cash capital expenditures:

	Nine months ended September 30,	Year ended December 31,		
	2002	2001	2000	1999
Cash capital expenditures .....	62,914	101,522	63,684	55,284
Interest paid and capitalized .....	5,787	16,029	19,109	14,203
Mutual cancellations and barter settlements <sup>(1)</sup> .....	—	47,127	62,458	74,060
Other non-cash expenditures .....	46,010	6,249	11,080	14,023
<b>Total capital expenditures .....</b>	<b><u>114,711</u></b>	<b><u>170,927</u></b>	<b><u>156,331</u></b>	<b><u>157,570</u></b>

Note:

(1) A meaningful breakdown of this amount is not available for the nine month period ended September 30, 2002. For this nine month period these amounts are combined with "other non-cash expenditures."

Other significant uses of our cash flows include servicing our debt and paying dividends. Interest paid was RR10,011 million, RR25,706 million, RR36,850 million and RR24,227 million, in the first nine months of 2002 and the years ended December 31, 2001, 2000 and 1999 respectively. Interest paid and capitalized was RR5,787 million, RR16,029 million, RR19,109 million and RR14,203 million in those periods, respectively. We paid dividends of RR1,934 million, RR6,461 million, RR3,980 million and RR1,231 million, for the first nine months of 2002 and for the years ended December 31, 2001, 2000 and 1999, respectively.

In the nine months ended September 30, 2002 and the years ended December 31, 2001, 2000 and 1999, our borrowings exceeded our repayments of debt. Our borrowings net of repayments (including bonds and promissory notes) were RR23,925 million, RR26,555 million, RR15,144 million and RR91,949 million for the first nine months of 2002 and for the years ended December 31, 2001, 2000 and 1999, respectively. However, as a result of the inflation of our prior period debt balances due to the application of inflation accounting under IAS 29, our debt balances reported in our financial statements have declined significantly despite these net borrowings. See “—Debt Obligations.” Our cash and cash equivalents increased in 1999, decreased in 2000, and increased in 2001 and decreased again in the first nine months of 2002.

Our plan for 2003 is to finance our budgeted capital expenditures, interest and dividends mainly out of operating cash flows, which we are planning to increase through our cost cutting program and through higher domestic tariffs and higher realized prices for, and increased volumes of, the natural gas we export. In addition, we expect sales of our non-core assets to contribute to the financing of our budgeted capital expenditures, interest and dividends. At the same time, we intend to reduce our debt through net repayments, and improve our mix of indebtedness. We plan to accomplish this by retiring a portion of our short-term RR denominated debt (in particular our short-term RR denominated promissory notes) and by refinancing other RR denominated debt with long-term borrowings in convertible currencies. There can be no assurance that we will be able to implement this plan.

### Cash Flows

The following table summarizes the statements of cash flows for the nine months ended September 30, 2002 and 2001 and years ended December 31, 2001, 2000 and 1999.

	Nine months ended September 30,		Year ended December 31,		
	2002	2001	2001	2000	1999
			RR million		
Net cash provided by operating activities .....	44,986	97,817	156,451	111,903	21,699
Net cash used for investing activities .....	(76,830)	(39,179)	(115,114)	(72,864)	(74,977)
Net cash provided by (used for) financing activities .....	11,634	(58,544)	(5,977)	(35,707)	56,471

#### *Net cash provided by operating activities*

Net cash provided by operating activities amounted to RR44,986 million in the nine months ended September 30, 2002 compared to RR97,817 million in the nine months ended September 30, 2001. This was primarily due to lower margins generated by our gas sales during the nine months ended September 30, 2002, which followed the 23% reduction in the average realized constant RR prices on our gas sales to Europe, and negative changes in our working capital position, reflecting a decrease in accounts payable and taxes payable and increased gas inventories. These two factors more than offset the decrease in profit taxes paid.

Net cash provided by operating activities amounted to RR156,451 million in the year ended December 31, 2001 compared to RR111,903 million in the year ended December 31, 2000. The increase was primarily due to a RR85,485 million positive impact from working capital changes reflecting better cash collections from domestic customers, partially offset by increases in tax payments.

Net cash provided by operating activities amounted to RR111,903 million in the year ended December 31, 2000 compared to RR21,699 million in the year ended December 31, 1999. The increase was primarily due to higher margins generated by our gas sales to Europe following the recovery of world oil prices in 1999, partially offset by the negative impact of working capital changes, reflecting an increase in accounts receivable and inventories offset in part by an increase in accounts payable and taxes payable, and increases in tax payments during 2000.

#### *Net cash from investing activities*

Net cash used for investing activities amounted to RR76,830 million in the nine months ended September 30, 2002 compared to RR39,179 million in the nine months ended September 30, 2001. This was primarily due to our ability to utilize higher cash flows generated by our financing activities during the nine months ended September 30, 2002 for the implementation of a number of major construction projects.

Net cash used for investing activities amounted to RR115,114 million in the year ended December 31, 2001 compared to RR72,864 million in the year ended December 31, 2000. The 58.0% increase was primarily due to the RR37,838 million increase in cash capital expenditures to RR101,522 million in the year ended December 31, 2001.

Net cash used for investing activities amounted to RR72,864 million in the year ended December 31, 2000 compared to RR74,977 million in the year ended December 31, 1999. The 2.8% decrease in cash used for investing activities was primarily due to incremental outflow of RR2,467 million paid in 1999 for acquisition of a Lebedinsky GOK subsidiary.

#### *Net cash flows from financing activities*

Net cash provided by financing activities amounted to RR11,634 million in the nine months ended September 30, 2002 compared to RR58,544 million of net cash used for financing activities in the nine months ended September 30, 2001. This was primarily due to additional borrowings, mainly short-term, in the nine months ended September 30, 2002 generating an incremental RR35,471 million cash inflow; a RR23,120 million decrease in outflows relating to a reduction in redemptions of promissory notes; and a RR11,587 million decrease in interest expense and other cash used for financing activities.

Net cash used for financing activities amounted to RR5,977 million in the year ended December 31, 2001 compared to RR35,707 million in the year ended December 31, 2000. The 83% decrease was mainly the result of an increase in net proceeds from long-term borrowings, which exceeded the net outflows from the redemption of promissory notes, and a reduction in interest paid.

Net cash used for financing activities amounted to RR35,707 million in the year ended December 31, 2000 compared to net cash provided by financing activities of RR56,471 million in the year ended December 31, 1999. The change was primarily due to a reduction in net proceeds from short and long-term borrowings in 2000 compared to 1999.

#### **Working Capital**

Our working capital surplus (current assets less current liabilities) was RR36,934 million as of September 30, 2002 and RR43,203 million as of December 31, 2001. The RR6,269 million reduction in our working capital in 2002 was primarily due to abnormally high cash and cash equivalents at December 31, 2001, which we either utilized as part of capital expenditure program or invested in various non-current assets during the first nine months of 2002. We believe that we have sufficient working capital to meet our requirements for at least the next twelve months; however, we are dependent on the short-term credit markets to finance our working capital. See "Risk Factors—Risks Relating to our Business—We depend on regular access to the domestic rouble bank loan and rouble debt markets to meet a significant portion of our financing requirements."

As of December 31, 2001, our working capital surplus amounted to RR43,203 million compared to RR3,983 million as of December 31, 2000. The RR39,220 million increase in working capital was primarily due to an increase in cash and cash equivalents by RR36,218 million, an increase in other working capital components by RR10,759 million and a decrease in taxes payable by RR89,420 million. Those increases were partially offset by a decrease in accounts receivable and prepayments by RR75,659 million.

#### **Capital expenditures**

Total capital expenditures (including cash advances to contractors and suppliers, which are recorded within other long-term assets) decreased from RR157,570 million in 1999 to RR156,331 million in 2000 and then increased to RR170,927 million in 2001.

Most of our capital expenditures during these periods were for the transportation infrastructure and production assets. Capital expenditures on the transportation infrastructure comprised RR77,293 million, or 45.2% of total capital expenditure in 2001, increasing from RR54,650 million in 2000. In 2001 capital expenditure on production assets comprised RR70,896 million, or 41.5% of total capital expenditure in 2001, increasing from RR57,024 million in 2000 in line with our strategy to develop new gas fields, including Zaplarnoye, to maintain stable production volumes.

Total capital expenditures by segment for the years ended December 31, 2001, 2000 and 1999 amounted to the following:

	Year ended December 31,		
	2001	2000	1999
	RR million		
Transportation .....	77,293	54,650	98,040
Production .....	70,896	57,024	37,377
Refining .....	5,059	3,479	2,115
Distribution .....	111	435	1,443
Other .....	17,568	40,743	18,595
<b>Total .....</b>	<b><u>170,927</u></b>	<b><u>156,331</u></b>	<b><u>157,570</u></b>

Total capital expenditures were RR104,257 million and RR101,234 million for the nine months ended September 30, 2002 and 2001. The increase was primarily due to increased funding of major projects including the Zapolarnoye field development, Blue Stream and Yamal-Europe pipelines.

Budgeted total capital expenditure by segment for the years ended December 31, 2002 was, and for the year ending December 31, 2003 is, as follows:

	Year ended	Year ending
	December 31, 2002	December 31, 2003
	RR million	
Transportation .....	71,448	93,231
Production .....	65,567	77,906
Refining .....	2,220	3,183
Distribution .....	67	51
Other .....	6,215	5,429
<b>Total .....</b>	<b><u>145,517</u></b>	<b><u>179,800</u></b>

Note:

The budget excludes expenditures for Sibur, Vostokgazprom and Purgaz.

For the fourth quarter of 2002, we estimate that our capital expenditure was approximately RR42 billion, bringing total estimated capital expenditure to approximately RR146 billion for the year ended December 31, 2002 compared to approximately RR171 billion for the year ended December 31, 2001.

The Board of Directors has approved a capital expenditure budget for 2003 of RR179,800 million, including RR73,840 million in respect of capital expenditures related to the Yamal project (including RR21,128 million for construction of pipeline Zapolarnoye-Urengoi, RR20,950 million for construction of pipeline SRTO-Torzhok and RR13,929 million for the development of the Zapolarnoye gas field). Future capital expenditures are expected to be made principally on export pipelines development, production and drilling development, and refining capacities.

The actual amount and timing of capital expenditures made are subject to change depending on economic and political conditions. Management cannot rule out strategic acquisitions if opportunities arise.

### Debt obligations

Our borrowings net of repayments were RR23,925 million, RR26,535 million, RR15,144 million and RR91,949 million for the nine months ended September 30, 2002 and the years ended December 31, 2001, 2000 and 1999, respectively. However, as a result of the restatement in constant rouble terms of all our comparatives in accordance with inflation accounting under IAS 29, our debt balances are reported to have declined despite these net borrowings.

The overall decline in our borrowings as reported in our financial statements resulted from opposite movements in our long-term and short-term borrowings. Our long-term borrowings (including the current portion of long-term borrowings and long-term promissory notes payable), which are predominantly denominated in convertible currencies (mainly the U.S. dollar and the euro), are reported to have declined in constant RR terms at December 31, 2001 compared to December 31, 1999, and then to have increased at September 30, 2002. Our

short-term borrowings (excluding the current portion of long-term borrowings but including short-term promissory notes payable), which are predominantly denominated in RR, are reported to have increased in constant RR terms at December 31, 2001 compared to December 31, 1999, and then to have declined at September 30, 2002, reflecting in part our strategy of refinancing short-term RR denominated debt with long-term borrowings denominated in convertible currencies.

The following table shows our borrowings at September 30, 2002 and at December 31, 2001, 2000 and 1999 expressed in constant RR terms:

	September 30,	December 31,		
	2002	2001	2000	1999
	RR million			
<b>Long-term borrowings</b>				
Fixed interest rate borrowings .....	81,017	99,859	70,542	88,658
Weighted average interest rates for fixed rate borrowings .....	9.5%	9.1%	7.6%	5.8%
Variable interest rate borrowings .....	256,000	215,158	259,522	337,143
Weighted average interest rates for variable rate borrowings .....	5.0%	6.4%	7.4%	7.4%
<b>Total long-term borrowings</b> .....	<b>337,017</b>	<b>315,017</b>	<b>330,064</b>	<b>425,801</b>
RR denominated borrowings .....	32,732	36,687	31,753	35,721
Foreign currency denominated borrowings .....	304,285	278,330	298,311	390,080
<b>Total long-term borrowings</b> .....	<b>337,017</b>	<b>315,017</b>	<b>330,064</b>	<b>425,801</b>
Less: current portion of long-term borrowings .....	(120,232)	(87,297)	(61,279)	(57,930)
Add: long-term promissory notes, net of discount .....	11,396	13,677	8,117	—

<b>Total short-term debt borrowings</b> .....	<b>249,887</b>	<b>252,733</b>	<b>222,340</b>	<b>166,998</b>
<b>Total borrowings</b> .....	<b>478,068</b>	<b>494,130</b>	<b>499,242</b>	<b>534,868</b>

The following table shows our actual U.S. dollar and euro denominated long-term borrowings (expressed in U.S. dollars) at September 30, 2002 and at December 31, 2001, 2000 and 1999 as well as the same balances expressed in constant RR terms.

In millions	September 30,	December 31,		
	2002	2001	2000	1999
<b>Long-term convertible-currency-denominated borrowings</b>				
U.S.\$ denominated (expressed in US\$) .....	7,788	6,088	6,397	7,157
euro denominated <sup>(1)</sup> (expressed in US\$) .....	1,829	2,275	1,677	2,009
<b>Total long-term convertible-currency-denominated borrowings expressed in U.S.\$</b> .....	<u>9,617</u>	<u>8,363</u>	<u>8,074</u>	<u>9,166</u>
<b>Total long-term convertible-currency-denominated borrowings expressed in constant RR</b> .....	<u>304,285</u>	<u>278,330</u>	<u>298,311</u>	<u>390,080</u>

Note:

(1) Converted at the euro to U.S.\$ exchange rate of 0.98, 0.88, 0.93 and 1.01 as of September 30, 2002, December 31, 2001, December 31, 2000 and December 31, 1999, respectively.

Our actual long-term borrowings denominated in convertible currencies decreased significantly in 2000, as we refinanced a portion of our borrowings denominated in convertible currencies with short-term borrowings largely denominated in RR. From December 31, 2000 to September 30, 2002, however, our actual long-term borrowings denominated in convertible currencies grew, as we increasingly financed our capital expenditures with long-term borrowings in the capital markets and began to refinance our short-term obligations.

A significant portion of our long-term borrowings denominated in convertible currencies are collateralized by receivables under certain of our export contracts.

#### Contractual obligations and other commitments

The following table shows our schedule of repayments for long-term borrowings, (excluding long-term promissory notes) at September 30, 2002 and December 31, 2001, expressed in constant RR terms.

Schedule of repayment for long-term borrowings (excluding long-term promissory notes)	September 30, 2002	December 31, 2001
Within one year .....	120,232	87,297
Between one and two years .....	92,368	88,304
Between two and five years .....	104,950	119,730
After five years .....	19,467	19,686
	<u>337,017</u>	<u>315,017</u>

The amount of outstanding guarantees issued to third parties increased by RR22,901 million to RR77,006 million at December 31, 2001 as compared to December 31, 2000. RR20,996 million of the increase was due to guarantees issued to banks for the construction of the offshore portion of the Blue Stream pipeline. As of December 31, 2001 our guarantees balance included RR11,950 million of guarantees issued by subsidiaries under contracts for purchases of equipment, construction and installation works.

We have significant obligations to supply gas under long-term contract with European customers.

#### QUALITATIVE AND QUANTITATIVE DISCLOSURES AND MARKET RISKS

We are exposed to market risk from changes in both foreign currency exchange rates and interest rates. We are exposed to foreign exchange risk to the extent that our sales revenues and costs are denominated in currencies other than RR. We are subject to market risk from changes in interest rates that may affect the cost of our financing. Other than in our banking subsidiaries, we do not use financial instruments, such as foreign exchange forward contracts, foreign currency options, interest rate swaps and forward rate agreements, to manage these market risks. We also do not hold or issue derivative or other financial instruments for trading purposes.

### *Foreign Currency Risk*

Our principal exchange rate risk involves changes in the value of the RR relative to the US\$ and euro. At September 30, 2002, approximately RR266,711 million and RR67,759 million of our indebtedness was denominated in U.S.\$ and euros, respectively (out of approximately RR415,776 million of our total indebtedness at that date). Decreases in the value of the RR relative to the U.S.\$ or euro will increase the cost in RR of our foreign currency denominated costs and expenses and of our debt service obligations for foreign currency denominated indebtedness. A depreciation of the RR relative to the U.S.\$ or euro will also result in a decrease in cost in the RR value of our foreign currency denominated expenses and indebtedness. We believe that the risks associated with our foreign currency exposure are mitigated by the fact that a significant portion of our revenues, approximately 65% for the nine months ended September 30, 2002, are U.S.\$ or euro denominated. As of September 30, 2002 the RR had depreciated against the U.S.\$ by approximately 4.7% and the euro by 12.0% since January 1, 2002.

A hypothetical, instantaneous and unfavorable 10% change in currency exchange rates on December 31, 2001 would have resulted in additional interest expense, including default interest, of approximately RR2,079 million (nominal) per year, reflecting the increased costs in RR of servicing our foreign currency denominated indebtedness held at December 31, 2001. A hypothetical, instantaneous and unfavorable 10% change in currency exchange rates as of December 31, 2001 would have resulted in an estimated foreign exchange loss of approximately RR27,279 million on foreign currency denominated indebtedness held at December 31, 2001.

### *Interest Rate Risk*

We are exposed to interest rate risk in our indebtedness that bears interest at floating rates. At December 31, 2001, we had approximately RR412,926 million in loans outstanding, of which approximately RR197,768 million bore interest at fixed rates and approximately RR215,158 million bore interest at floating rates determined by reference to the London inter-bank offered rate ("LIBOR") for U.S.\$ and euro deposits.

A hypothetical, instantaneous and unfavorable change of 100 basis points in the interest rate applicable to floating rate financial liabilities held at December 31, 2001 would have resulted in additional net interest expense of approximately RR1,949 million (nominal) per year. This sensitivity analysis is based on the assumption of an unfavorable 100 basis point movement of the interest rate applicable to each homogenous category of financial liabilities. A homogeneous category is defined according to the currency in which financial liabilities are denominated and assumes the same interest rate movement within each homogeneous category (e.g. U.S.\$ and euro)

### *Derivatives*

For the purpose of reducing currency risk, our banking subsidiaries use a number of derivative instruments. These comprise forward foreign exchange contracts and written foreign currency option contracts. The objective, when using any derivative instrument, is to ensure that the risk to reward profile of any transaction is optimized. The normal policy is to measure these instruments at their fair value, using the spot rate at the year end as the basis for the fair value measurement with resultant gains or losses being reported within gains less losses arising from dealing in foreign currencies within the statement of operations. These derivatives are not material to the Group.

### *Commodity risk*

Substantially all of our natural gas, gas condensate and other hydrocarbon export sales to Europe are sold under long-term contracts. Our natural gas export prices to Europe are based on a formula linked to world crude oil prices. Worldwide political developments and the actions of the Organization of Petroleum Exporting Countries affect crude oil prices and thus our natural gas export prices. We do not use any derivative instruments to hedge our production in order to decrease our price risk exposure.

### *Securities price risk*

We are exposed to movements in the prices of marketable securities that we hold in our investment portfolio. Specifically, as of September 30, 2002, we held RR7,670 million of corporate shares and bonds and RR7,847 million of state and municipal securities. A change in Russia's sovereign credit rating, or an external event that impacts Russian debt and equity prices, could have an impact on the market value of our trading securities.

## SUMMARY OF CERTAIN DIFFERENCES BETWEEN IAS AND U.S. GAAP

The financial information included herein is prepared and presented in accordance with IAS. Certain differences exist between IAS and U.S. GAAP, which might be material to the financial information herein. The matters described below summarize certain differences between IAS and U.S. GAAP that may be material. The Company has not prepared a complete reconciliation of its consolidated financial statements and related footnote disclosures between IAS and U.S. GAAP and has not quantified such differences. Accordingly, no assurance is provided that the following summary of differences between IAS and U.S. GAAP is complete. Potential investors should consult their own professional advisors for an understanding of the differences between IAS and U.S. GAAP, and how those differences might affect the financial information herein.

IAS	U.S. GAAP
<b>Accounting framework</b>	
Historical cost basis, adjusted for inflation by applying the consumer price index, due to Russia being considered highly inflationary. However, generally financial assets and liabilities must be carried at fair value.	Similar to IAS for entities operating in a highly inflationary economy.
<b>Depreciation of property, plant and equipment</b>	
The depreciable amount of an item of property, plant and equipment must be allocated on a systematic basis over its useful life, reflecting the pattern in which the asset's benefits are consumed by the entity. Any changes in the depreciation method used are treated as change in accounting estimate reflected in the depreciation charge for the current and prospective periods.	Similar to IAS, except that U.S. GAAP classifies a change in the depreciation method as a change in accounting policy. The cumulative effect of the change is then reflected in the current year's income statement.
We use the straight-line method for depreciating all our property, plant and equipment. In making depreciation estimates, and considering the corresponding asset lives, the company includes periods beyond the initial license period date in circumstances where the company has both the right to request and the intent to renew such licenses.	U.S. GAAP has specific accounting guidance for oil and gas producing companies that requires the application of the units-of-production method for depreciation, depletion and amortization of oil and gas producing assets. Additionally, for the purpose of calculating depreciation, depletion and amortization charges under the units-of-production method and complying with other specific oil and gas accounting prescribed by US GAAP, the definitions of proved reserves are the definitions adopted by the SEC for its reporting purposes that are in effect on the dates for which such calculations and other disclosures are required under US GAAP. Previously reported quantities are not revised retroactively if the SEC definitions are changed.
<b>Impairment of assets</b>	
An entity must assess annually whether there are any indications that an asset may be impaired. If there is any such indication, the assets must be tested for impairment. An impairment loss must be recognized in the statement of operations when an asset's carrying amount exceeds its recoverable amount (see below).	Similar to IAS except that for assets to be held and used, impairment is first measured by reference to undiscounted cash flows. If impairment exists the entity must measure impairment by comparing the asset's carrying value to its fair value. If there is no impairment by reference to undiscounted cash flows, no further action is required but the useful life of the asset must be reconsidered. Assets classified as held for disposal must be measured at the lower of the carrying amount and fair value less selling costs.

The impairment loss is the difference between the asset's carrying amount and its recoverable amount. The recoverable amount is the higher of the asset's net selling price and its value in use. Value in use is the future cash flows to be derived from the particular asset, discounted to present value using a pre-tax market determined rate that reflects the current assessment of the time value of money and the risks specific to the asset.

An impairment loss recognized for an asset should be reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized, in which case, the carrying amount of the asset should be increased to its recoverable amount.

### Comprehensive income

IAS does not require disclosure of comprehensive income.

The impairment loss is based on the asset's fair value, being either market value (if an active market for the asset exists) or the sum of discounted future cash flows. The discount rate reflects the risk specific to that asset.

For assets to be disposed of, the loss recognized is the excess of the asset's carrying amount over its fair value less cost to sell. Such assets are not depreciated or amortized during the selling period.

Prohibits reversals of impairment losses for assets to be held and used. Subsequent revisions, both increases and decreases, to the carrying amount of an asset to be disposed, must be reported as adjustments to the carrying amount of the asset but limited by the carrying amount at the date the decision to dispose of the asset is made.

U.S. GAAP requires disclosure of comprehensive income, which is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances from nonowner sources. It includes all changes in equity during a period except those resulting from investments by owners and distribution to owners.

### Business combinations

Business combinations can be in the form of either an acquisition or a uniting of interest. Acquisitions are the most common and uniting of interests are severely restricted.

The date of acquisition is the date on which the acquirer obtains control over the acquired entity.

The purchase method records the assets and liabilities of the acquired entity at fair value. The cost of acquisition is the amount of cash or cash equivalents paid, (or fair value of non-monetary assets exchanged). Where consideration comprises an exchange of shares, specific guidance applies under each of the two frameworks. Under IAS, shares issued as consideration are recorded at their fair value as at the date of the exchange, being the date when the acquirer obtains control over the net assets and operations of the acquiree. When the acquisition occurs in stages, the fair value of the shares issued as purchase consideration is determined at each exchange date. In an active market the published price of a share at the date of exchange is the best evidence of fair value.

All business combinations initiated after June 30, 2001 are acquisitions and accounted for in accordance with one method—the purchase method. Before June 30, 2001, business combinations were accounted for using either the purchase method or the pooling-of-interests method.

The date of acquisition is the date on which assets are received or securities are issued.

Similar to IAS.

Shares issued as consideration are measured at their market price over a reasonable period of time (interpreted to be a few days) before and after the parties reach an agreement on the purchase price and the proposed transaction is announced. The date for measuring the value of marketable securities must not be influenced by the need to obtain shareholder or regulatory approval.

**Definition of a subsidiary**

Focuses on the concept of the power to control in determining whether a parent/subsidiary relationship exists. Control is the parent's ability to govern the financial and operating policies of a subsidiary to obtain benefits. Subsidiaries are consolidated from the date on which effective control is transferred and are no longer consolidated from the date control ceases. Generally companies own more than 50% of the voting interests in these subsidiaries.

Focuses on a controlling financial interest through ownership of a majority voting interest, coupled with control.

**Goodwill**

Capitalize and amortize over its useful life. There is a rebuttable presumption that the useful life of goodwill does not exceed 20 years. In very rare cases goodwill may be demonstrated to have a useful life in excess of 20 years. If the useful life does exceed 20 years, amortization is still mandatory and the reasons for rebutting the presumption must be disclosed.

For fiscal years beginning after December 15, 2001 goodwill should not be amortized but should be tested for impairment at least annually at the reporting unit level. For prior periods, goodwill was required to be capitalized and amortized over a useful life not to exceed 40 years. It was also required to be tested for impairment if factors indicated that impairment may exist.

Negative goodwill relating to expected future losses or expenses identified in the acquirer's plan for the acquisition must be recognized in the statement of operations when those losses/expenses occur. Otherwise negative goodwill not exceeding the fair value of acquired identifiable, non-monetary assets must be recognized in the statement of operations on a systematic basis over the useful lives of such assets. Where negative goodwill exceeds the fair value of non-monetary assets it must be immediately recognized in the statement of operations.

Treatment of an excess of fair value of acquired net assets over cost of acquisition under U.S. GAAP is similar to IAS with the exception of provision for expected future losses which is not allowable as part of fair-value exercise for the purposes of determination of goodwill under U.S. GAAP.

**Inventories**

Carried at the lower of cost or net realizable value (being sale proceeds less all further costs to bring the inventories to completion). Reversal is required for a subsequent increase in value of inventory previously written down.

Broadly consistent with IAS, in that the lower of cost and market value is used to value inventories. Market value is defined as being current replacement cost subject to an upper limit of net realizable value and a lower limit of net realizable value less a normal profit margin. Reversal of a write down is prohibited.

**Taxation**

Current and deferred taxes are measured based on tax laws and rates that have been enacted or "substantively enacted" by the balance sheet date. "... in some jurisdictions, announcements of tax rates (and tax laws) by the government have the substantive effect of actual enactment, which may follow the announcement by a period of several months. In these circumstances, tax assets and liabilities are measured using the announced tax rate (and tax laws)."

Current and deferred taxes are measured using enacted tax laws and rates. For federal tax purposes in the United States, the enactment date is the date that the president signs the tax law. Enactment of a new tax law is viewed as a discrete event of the period of enactment.

**Restructured Liabilities**

Liabilities are remeasured (extinguished) and gain or loss recognized when there is a significant modification of terms.

Liabilities are remeasured and gain or loss recognized in accordance with EITF 96-19, "Debtors Accounting for a Modification in Exchange of Debt Instruments which is more restrictive than IAS concerning what represents a significant modification of terms.

**Deferred tax assets**

Deferred tax assets are recognized when it is probable that future taxable profits will be available against which the deferred tax asset can be utilized. The carrying amount of the deferred tax asset is reviewed at each balance sheet date and reduced if appropriate.

Similar to IAS but recognize all deferred tax assets and provide a valuation allowance if it is more likely than not that some portion, or all, of the deferred tax asset will not be realized. There are a number of specific differences in application.

**Segment reporting**

Report primary and secondary (business and geographic) segments based on risks and returns.

Report based on internal reporting segments. Operating segments are those business activities for which discrete information is available, and whose operating results are regularly reviewed by the entity's chief operating decision maker in determining resource allocation and assessing performance.

**Related parties**

There is no specific requirement in IAS to disclose the name of the related party (other than the ultimate parent entity) or the amounts involved in a transaction. Disclosure of "pricing policy" is required along with the elements of transactions necessary for an understanding of the financial statements.

Transactions involving related parties cannot be presumed to be carried out on an arm's-length basis, as the requisite conditions of competitive, free-market dealings may not exist. U.S.GAAP requires the disclosure of any changes in the method of establishing "terms" for related party transactions and the resulting effect on the financial statements. In addition disclosure of the nature of the relationship, a description of the transaction, the amounts for each period, and the amounts due to or from related parties is required.

**Supplemental oil and gas disclosures**

No specific oil and gas accounting standards exist under IAS and no requirement to publish supplemental oil and gas disclosures.

Unaudited supplemental oil and gas disclosures are required for public companies.

## BUSINESS

### Overview

We are the world's largest natural gas company, and the world's largest publicly-traded hydrocarbons company, in terms of reserves, production and transportation. We supply substantially all of the natural gas consumed in Russia, approximately 50% of the natural gas consumed in the six FSU countries to which we export our natural gas—Belarus, Ukraine, Moldova, Lithuania, Estonia and Latvia—and approximately 26% of the natural gas consumed in Europe. For the year ended December 31, 2001, our net sales were RR683.9 billion (U.S.\$21.6 billion) and our operating profit was RR197.7 billion (U.S.\$6.2 billion). For the nine months ended September 30, 2002 and 2001, our net sales were RR420.4 billion (U.S.\$13.3 billion) and RR510.3 billion (U.S.\$16.1 billion), respectively, and our operating profit was RR94.8 billion (U.S.\$3.0 billion) and RR166.1 billion (U.S.\$5.3 billion), respectively. As of September 30, 2002, we had total assets of RR2,360 billion (U.S.\$74.6 billion) and total shareholders' equity of RR1,642 billion (U.S.\$51.9 billion).

*Reserves.* We estimate our reserves using the Russian reserves system, which differs significantly from SPE International Standards, in particular with respect to the manner in which and the extent to which commercial factors are taken into account in calculating reserves. As of September 30, 2002, we had Russian reserves system A, B and C1 reserves (including that portion of reserves attributable to us through shareholdings in our subsidiaries, entities in which we hold less than 50% and joint ventures) of 28.4 tcm of natural gas, 1.3 billion tons (9.4 bbls) of gas condensate and 573.9 million tons (4.2 bbls) of crude oil, for a total of 180,992 mmboe. Most of our natural gas reserves are located in western Siberia and are tightly geographically concentrated. As of September 30, 2002, our three largest fields, Urengoiyskoye, Yamburgskoye and Zapolyaroye, all located in the Yamal-Nenets Region in western Siberia, accounted for 13.3 tcm of A, B and C1 natural gas reserves, or 46.8% of our total A, B and C1 natural gas reserves. The remainder of our reserves outside of western Siberia are located in the Barents Sea and southern Russia.

Since 1997, DeGolyer and MacNaughton, an independent U.S. petroleum engineering consulting firm, has been evaluating our reserves according to SPE International Standards. As of December 31, 2000, DeGolyer and MacNaughton had evaluated 18 fields, representing approximately 85%, 70% and 56% of our A, B and C1 reserves of natural gas, gas condensate and crude oil, respectively. See "Business—Reserves and Production." Based on this evaluation, we had proved reserves at these 18 fields as of December 31, 2000 of 17.0 tcm of natural gas, 286.2 million tons (2,098 mmbls) of gas condensate and 8.5 million tons (63 mmbls) of crude oil and probable reserves of 1.5 tcm of natural gas, 77.5 million tons (568 mmbls) of gas condensate and 98.8 million tons (724 mmbls) of crude oil. We believe that the 18 fields evaluated by DeGolyer and MacNaughton are likely to contain most of our reserves which would be deemed proved or probable upon a full evaluation of our upstream properties.

*Exploration and Production.* As of December 31, 2002, we held 20 licenses for exploration and assessment (without development rights) with terms of up to five years, 16 combined hydrocarbon exploration, assessment and production licenses with terms of 25 years and with remaining terms of between 18 and 25 years and 77 production licenses with terms of 20 to 25 years and with remaining terms of between 13 and 20 years. In 2001, we produced 512.0 bcm of natural gas, 9.5 million tons (69.6 mmbls) of gas condensate and 704 thousand tons (5.2 mmbls) of crude oil, for a total of 3,088.3 mmboe, as compared with 523.2 bcm of natural gas, 9.3 million tons (68.2 mmbls) of gas condensate and 719 thousand tons (5.3 mmbls) of crude oil, for a total of 3,152.4 mmboe in 2000. Our natural gas production represented approximately 88.1% of total natural gas production in Russia in 2001. Four of our production subsidiaries, Urengoiyazprom, Yamburggazdobycha, Noyabrskgazdobycha and Nadyngazprom, produced 92.5% of our natural gas in 2001. During the nine months ended September 30, 2002, we produced 377.3 bcm of natural gas, 7.2 million tons (52.7 mmbls) of gas condensate and 523 thousand tons (3.8 mmbls) of crude oil, for a total of 2,277.2 mmboe, compared with 371.0 bcm of natural gas, 7.1 million tons (51.7 mmbls) of gas condensate and 524.1 thousand tons (3.8 mmbls) of crude oil, for a total of 2,239.3 mmboe during the nine months ended September 30, 2001. The Zapolyaroye field, which came on stream in the third quarter of 2001, produced approximately 24.7 bcm of natural gas in the first nine months of 2002, accounting for approximately 6.5% of our total natural gas production in that period.

According to preliminary estimates, in 2002 we produced 521.9 bcm of natural gas, 9.9 million tons (72.6 mmbls) of gas condensate and 706 thousand tons (5.2 mmbls) of crude oil. Our production of natural gas in 2002 represented the first annual increase in our production since 1999.

*Transportation.* We own and operate Russia's Unified Gas Supply System (the "UGSS"), which gathers, processes, transports, stores and delivers substantially all the natural gas sold in Russia. The UGSS comprises the world's largest high-pressure trunk pipeline system, with a total length of over 155,000 km, 256 compressor stations and 23 underground natural gas storage facilities. We control and manage the transportation of gas in the UGSS network from our central dispatch management center, located in Moscow. We transported 630.6 bcm and 633.5 bcm of natural gas through the UGSS in 2001 and 2000, respectively, and 456.4 bcm and 451.9 bcm of natural gas in the nine months ended September 30, 2002 and 2001, respectively. Although we use most of the UGSS capacity for the transportation of the natural gas we produce, we also provide gas transportation services to third parties. Third-party use accounted for 12.9% and 15.4% of the total volume of natural gas supplied through the UGSS in 2001 and 2000, respectively, and 13.2% and 12.9% of the total volume of natural gas supplied through the UGSS in the nine months ended September 30, 2002 and 2001, respectively.

As discussed more fully below, beginning in the late 1990s, we began acquiring interests in regional gas distribution companies. These regional gas distribution companies own and operate medium- and low-pressure pipelines that transport gas to end consumers.

*Processing and Refining.* Our refining operations consist of the operations of our principal wholly owned refining facilities and our majority owned subsidiary Sibur, which substantially increased its operations only in the third quarter of 2002 after reaching an amicable agreement with its creditors and emerging from external supervision. For a discussion of Sibur, see "—Refining." Our wholly owned refining facilities process natural gas for pipeline transportation, stabilize gas condensate and refine natural gas, gas condensate and crude oil into refined products. The processing, stabilizing and refining of natural gas, gas condensate and crude oil is carried out by six integrated refineries that remove hazardous and corrosive substances from natural gas and gas condensate and produce a broad range of products. The refineries also stabilize and refine gas condensate and crude oil as a single crude oil and condensate mixture. Processed and refined products derived from natural gas include dry marketable natural gas, de-ethanized natural gas, liquefied natural gas, ethane, helium, sulfur and odorant. Stabilized and refined products derived from gas condensate and crude oil include stable gas condensate, gas condensate distillate, diesel fuel, furnace fuel oil and automobile gasoline. In 2001, we processed and refined 34.6 bcm of natural gas and 10.1 million tons (74.0 mmbbls) of gas condensate and crude oil, for a total volume of 277.6 mmboe, compared to 35.3 bcm of natural gas, 9.3 million tons (68.2 mmbbls) of gas condensate and crude oil, for a total volume of 276.0 mmboe in 2000. During the nine months ended September 30, 2002, we refined 25.1 bcm of natural gas, 7.5 million tons (55.0 mmbbls) of gas condensate and crude oil, for a total volume of 202.7 mmboe, as compared with 25.9 bcm of natural gas, 7.5 million tons (55.0 mmbbls) of gas condensate and crude oil, for a total volume of 207.4 mmboe in the nine months ended September 30, 2001. We also provide gas condensate refining services for third parties.

*Exports.* We export our natural gas to Europe through our wholly-owned trading subsidiary, Gazexport. We exported to Europe approximately 24.8% and 24.7% of the natural gas we produced in 2001 and 2000, respectively, and approximately 25.2% and 24.8% of the natural gas we produced in the nine months ended September 30, 2002 and 2001, respectively. Our exports to Europe also accounted for approximately 27.2% and 27.0% of the volume of natural gas we sold in 2001 and 2000, respectively, and 29.5% and 28.3% of the volume of natural gas we sold in the nine months ended September 30, 2002 and 2001, respectively. Net sales of natural gas to Europe accounted for 69.4% and 70.9% of our total net gas sales in 2001 and 2000, respectively, and 64.8% and 70.4% of our total revenues from gas sales in the nine months ended September 30, 2002 and 2001, respectively. According to the statistical survey CEDIGAZ—"Natural Gas in the World—2001," Survey August 2002, we supplied 20.2% of the natural gas consumed in western Europe and 58.9% of the natural gas consumed in central and eastern Europe in 2001. Most of our exports are transported by pipeline through Ukraine and through the Yamal-Europe pipeline, part of which came on stream in 1999.

*Domestic sales.* We sell our products domestically through our wholly-owned subsidiary Mezhrefiongaz and its 43 majority-owned regional marketing subsidiaries to large industrial consumers, to regional gas distribution companies and to household consumers. Historically, Mezhrefiongaz sold natural gas to third-party regional gas distribution companies and to large industrial consumers. Beginning in the late 1990s, we began acquiring interests through debt for equity swaps in regional gas distribution companies which had failed to pay for the gas we sold them. We currently have controlling interests in 89, and non-controlling interests in an additional 84, of the 318 regional gas distribution companies in Russia. When we acquire controlling interests in the regional gas distribution companies, we are able to capture the transportation and regional energy sales tariffs that are payable to them in respect of the transportation services they provide.

We are beginning to implement a strategy to streamline our domestic marketing operations by removing Mezhrefiongaz from our marketing chain and reassigning it primary responsibility to collect unpaid

debts and develop our electronic trading market for gas. We believe that removing Mezhhregiongaz from the marketing chain will result in cost and tax savings and increase the efficiency of our marketing.

*New senior management.* Our annual general shareholders' meeting in June 2001 began a process that has led to the replacement of substantially all of the senior management team that ran our business since the early 1990s. Our new senior management team devoted its attention first to familiarizing itself with our extensive operations and to intensifying our efforts to reacquire certain assets disposed of in prior years. Our senior management is now engaged in the implementation of our strategy, including initiatives relating to the disposition of non-core assets, cost reductions, debt reduction, priorities for the development of gas fields and infrastructure, and our relationship with the Government. See "Business—Strategy" and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources."

*Relationship with the Government.* The Russian Federation currently owns 38.37% of our shares, and representatives of the Government hold six of the 11 seats on our Board of Directors. Moreover, as of December 31, 2002, our subsidiaries held approximately 15.11% of our shares, which they are entitled to vote as owners. In addition, we are a "natural monopoly" under the Russian Federal Law "On Natural Monopolies" No. 147-FZ dated August 17, 1995. As a result, the Government regulates the prices we charge for gas in the domestic market, the tariffs we charge for the transportation of third parties' gas through the UGSS and other matters affecting our business. For example, we are required to have our budget, capital expenditure program and borrowing program approved by the Government. Through its share ownership, representation on our Board of Directors and role as our regulator, the Government has a strong influence over our operations. At the same time, we play a significant role in Russia's financial system and economy. According to the International Energy Agency—Russia Energy Survey, 2002, we accounted for 20% of federal budget revenues, 20% of foreign exchange earnings and approximately 6% of GDP of the Russian Federation in 2000. See "Risk Factors—Risks Relating to our Business—The Government has exercised, and can be expected to continue to exercise, a strong influence over our operations."

## **Strategy**

Our main strategic objective is to maintain and strengthen our position as a leading gas company, both domestically and globally, by continuing to adapt to a rapidly changing business environment. To achieve this objective, we plan to:

- meet our production targets, including our natural gas production target of 530 bcm in 2003 and thereafter;
- ensure the effective, reliable and balanced supply of gas to Russian customers; and
- fulfill our long-term export contracts and inter-governmental agreements on gas supply.

In implementing these plans, we intend to apply the following principles:

- managing our business effectively, with a view to enhancing the profitability of our assets and reducing our costs;
- respecting our shareholders' rights, including those of our major shareholder — the Russian Government — as well as those of our minority shareholders;
- improving our corporate governance and the transparency of our business activities; and
- inculcating in our managers a sense of personal responsibility for the success of our business.

To implement these strategic objectives, plans and principles, we have developed near-term and medium- to long-term strategic priorities.

### *Near-term Strategic Priorities*

Our near-term strategic priorities are to improve our transportation network and overall operating and financial performance, as well as to take the steps required now to enable us to develop our gas fields over the medium and longer term. Our near-term strategy includes:

**Improving our domestic transportation network.** Safe, reliable and cost-effective transportation within Russia of the natural gas we produce is essential to our business. In addition, because we expect the production of gas by independent companies within Russia to increase, reliable and cost-effective transportation within Russia of independently-produced gas will become increasingly important to us. In addition to the pipes, pumping stations and other critical features of our pipeline network, underground storage facilities also play a key role in ensuring the reliability of gas supply. Accordingly, we are planning significant investments in the next several years to improve the performance of the UGSS. Our budgeted capital expenditures on our transportation network for 2003 are RR93.2 billion, of which RR17.6 billion is planned for refurbishing the UGSS, mainly to replace pipes and reconstruct gas pumping stations, and for constructing and modernizing underground storage facilities. The remainder is planned for the expansion of our transportation network, including outside Russia, as discussed more fully below.

**Reducing costs and improving investment efficiency.** Our operating environment is becoming increasingly competitive, and our ability to control costs will be a key determinant of our success domestically and abroad. We believe we can reduce our operating, financial and investment costs and improve our investment efficiency in future years. We have developed and approved a plan for 2003 to reduce operating, investing and financing costs by more than RR40 billion as measured by Russian Accounting Regulations (which differ very significantly from IAS).

**Paying down debt and optimizing our remaining debt portfolio.** As our current leverage ratio (net debt divided by net debt plus shareholders' equity) was only 20.3% as of September 30, 2002, we do not believe we have an excessive debt burden and intend to continue using debt financing. However, most of our outstanding financial debt matures in the next several years. In 2003, we will seek to pay down a portion of our debt, partly with savings we intend to realize through our cost cutting program, and intend to continue our efforts to diversify the financing instruments we employ. In doing so, we plan to continue to focus on reducing the share of short-term debt in our total debt portfolio, lowering the cost of debt (in part by reducing the amount of promissory notes in our debt portfolio), and better balancing fixed versus floating interest rate risk and currency risk. By paying down a portion of our debt and optimizing our remaining debt portfolio we believe we should be able to enhance our ability to access the international capital markets through a wider variety of instruments and maturities.

**Improving corporate governance by introducing best-practice management techniques and increased levels of transparency.** At our last shareholders' meeting, we approved a new corporate governance charter outlining procedures for the protection of shareholders' rights. In addition, our Board of Directors adopted resolutions on September 27, 2002 whereby all transactions, whether with interested parties or not, involving (i) our shares, or interests or participations that we or our subsidiaries hold in other companies; (ii) loans or other borrowings having a value of greater than 0.3% of our net balance sheet assets determined under Russian accounting principles; and (iii) purchases or disposals of assets having a value greater than 0.3% of our net balance sheet assets determined under Russian Accounting Regulations require prior approval by our Board of Directors. Our new management team, now consisting of an expanded and almost entirely new Management Committee, has also recently launched several initiatives to measure more accurately and improve our operating and financial performance, including programs related to optimizing domestic sales (including increasing cash collection), cost cutting, deployment of investment capital and debt management. Finally, we intend to continue our efforts with respect to increasing transparency through ongoing publication of interim and year-end IAS accounts, improved levels of disclosure for public market financings, and improved relations with our shareholders.

**Increasing cash generation from domestic sales through price increases, streamlining of sales structures and continued improvements in payment discipline.** Natural gas prices in Russia are regulated by the Government. Over the past three years, increases in nominal domestic gas prices, on a cumulative basis, have failed fully to recover the effects of inflation. Although the average domestic price of gas was 15.5% higher in real terms in 2001 than in 2000, and 2.1% higher in the first nine months of 2002 than in the comparable period in 2001, domestic gas prices remain below international prices (even after netting back export and customs duties

and transportation costs). The Government increased nominal gas prices by an average of 20% for the year 2003 for both industrial consumers and household consumers by raising the price of gas for industrial consumers by 20% from January 1, 2003 and for household consumers by 23% from February 1, 2003, and we continue to work with the Government to reduce the current disparity between export and domestic natural gas prices. We are also improving payment discipline in the domestic market by imposing stricter payment requirements and targeting our largest debtors. In addition, we intend to streamline our domestic sales structure by removing our wholly-owned subsidiary, Mezhrefiongaz, from the marketing chain and dealing directly with our regional marketing companies. Mezhrefiongaz is being downsized and reassigned primary responsibility to collect unpaid debts for natural gas and develop an electronic trading market for natural gas at unregulated prices.

**Continuing to implement our asset reacquisition program and making further sales of non-core assets.** Commencing in 2000, we began to implement a program to reacquire certain assets, including certain assets disposed of through transactions with Itera under our previous management. See “Certain Transactions—Itera.” We have recently succeeded in reacquiring some of these assets and continue to pursue others. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Certain Acquisitions and Dispositions.” We are also implementing a program of divesting certain non-core properties, and have recently sold shareholdings in a number of companies including Gazmetall, National Reserve Bank, Red October wood-working plant and Druzhkovski ZGA, and intend to continue divesting inefficient non-core activities. We may also sell significant stakes in non-core businesses as the first step in a divestment plan. Through divestment of non-core assets, we believe we can improve our overall performance.

#### *Medium- to long-term strategic priorities*

Our medium- to long-term strategic priorities are to continue to increase production and profitability, including by:

**Developing cost-effective new production from our existing reserves base to replace declines in our largest old fields.** Based on (i) our current export contract portfolio; (ii) anticipated future demand and prices domestically; and (iii) our reserves base, we believe that achieving annual natural gas production of 530 bcm and maintaining our production at that level for the foreseeable future is strategically optimal. In light of expected continuing declines from three of our largest old west Siberian fields (Urengoiskeye, Yamburgskoye and Medvezhye), we intend to continue to invest in developing new production. Since 1994, we have invested RR72.9 billion in developing the Zapolyarnoye field, production from which was launched in 2001 and reached approximately 36.8 bcm in 2002. We intend to invest another RR68.8 billion in developing the Zapolyarnoye field to full capacity, including a pipeline connecting the field to the UGSS. We intend to complete the development of Zapolyarnoye by 2006, after which production should reach 100 bcm per year. We also intend to invest in new production from our other western and eastern Siberian, Far Eastern and southern Russian deposits and also in off-shore fields, including Obsk-Tazovskaya. See “Business—Reserves and Production—Development Activities.” To develop and maintain this production as efficiently as possible, we intend to work closely with international energy service companies and local institutes, both of which are essential to ensuring the best use of latest technologies.

**Further developing transportation infrastructure to meet growing demand for gas and increase our flexibility in delivering gas to export and domestic markets.** To meet domestic gas supply requirements and our contractual export obligations, we are developing new pipeline construction projects, such as Yamal-Europe (Torzhok-Poland), Russia-Turkey (Blue Stream), Zapolyarnoye-Urengoi, north areas of the Tyumen region-Torzhok, and Pochinky-Izobilnoye-SSPHG. We expect demand for gas in our core export market (Europe) to grow, and our export obligations to those markets to grow as well. We have recently completed and launched the first stage of the Blue Stream pipeline from Russia to Turkey under the Black Sea, with planned capacity of 16 bcm per year. We have also recently announced plans to develop a north European pipeline, from northwest Russia (under the Baltic Sea) to the German shore, with capacity of 20 bcm per year. The anticipated cost of the north European pipeline is U.S.\$3 billion, the financing of which we are currently discussing with potential partners. We are also proceeding with the Yamal-Europe project. The purpose of the project is to meet our contractual obligations to supply natural gas to Europe and to diversify export routes. Connecting the Yamal-Europe pipeline to the existing natural gas transportation network in Germany will allow for the full integration of this pipeline into the European gas network. In addition, we are currently analyzing opportunities in Asian markets and the potential attractiveness of investments in gas production and transportation infrastructure to meet anticipated demand growth, particularly in China.

**Enhancing our refining capabilities.** Our long-term refining strategy is to enhance our competitive position in Russia, the FSU and Europe, in particular by building on our 51% interest in OAO Sibur, one of Russia's leading petrochemical companies. We plan to modernize our gas processing and refining facilities at Sibur and elsewhere in order to increase our production of refined products overall (and our refining throughput) as well as the depth of our refining, allowing us to produce higher margin products.

**Enhancing profitability by taking advantage of the profitable and growing European export markets and by increasing cash generation from domestic and FSU sales.** In the first nine months of 2002, net sales of natural gas to Europe represented 29.5% of our total gas sales volumes and 64.8% of our net gas sales. We expect to increase our export sales volumes under our export contracts. This should allow us to enhance profitability. In addition, we intend to continue our current efforts to (i) improve the profitability of our domestic sales by lobbying the Government for price increases; (ii) improve payment discipline; and (iii) sell gas on the planned open domestic exchanges at prices above regulated prices.

**Continuing to develop strategic partnerships, both internationally and in Russia.** We have entered into various strategic partnerships, both domestically and abroad, and are continually seeking new opportunities to maximize the value of our assets through these relationships. We have established a joint venture, WINGAS, with BASF which owns several pipelines in Germany and allows us to access that market further downstream than by delivering at the border only. We have also entered into a strategic partnership agreement with Royal Dutch/Shell Group for various projects, including the development of the Neokomian layer of our Zapolyarnoye field and the construction with Petro China and Exxon/Mobil of a west-east pipeline in China. Domestically, in November 2002, we entered into a strategic partnership agreement with LUKOIL, Russia's largest oil producer. LUKOIL produces natural gas at fields in western Siberia that are located close to our major natural gas fields. The agreement provides, *inter alia*, for cooperation in oil and gas projects in Russia and other countries, such as Uzbekistan, Kazakhstan, Turkmenistan, Iran and Iraq. We have not yet undertaken any projects under this agreement. Two specific projects are, however, currently under consideration: the joint development of hydrocarbon structures in the Caspian Sea; and the transportation of hydrocarbons and condensate through our pipeline network. In the latter, LUKOIL intends to construct an approximately 160 km section of pipeline connecting its fields to our existing pipeline infrastructure in western Siberia and to transfer the pipeline to us in exchange for guaranteed access to our transportation network. The project would be completed in 2006. We have also entered into cooperation agreements with Rosneft, including agreements for the development of the Shtokmanovskoye field. We anticipate entering into strategic agreements with other domestic independent producers in the future.

**Building our research and development capabilities further to ensure low-cost development, production and transportation of our gas to increasingly competitive markets.** We invest in research and development in a number of scientific and technical areas. In general, our research and development focuses on expanding our mineral resource base, developing hydrocarbon deposits in new regions (for example, the Ob-Taz Estuary, Arctic offshore fields and the Yamal Peninsula), maintaining the reliability of the UGSS, ensuring production in fields that are being developed, optimizing financial, investment and pricing policies and increasing ecological and industrial safety. We are focusing on several specific projects, including researching how to extract natural gas cost-effectively from the Yamal Peninsula fields and increasing the efficiency of gas transportation via our pipelines.

### **History and Privatization**

Prior to 1991, the Russian gas industry was regulated by the Council of Ministers of the gas industry. State-owned concern "Gazprom," which was formed in 1991, was the successor to the Council of Ministers of the gas industry. This state-owned concern formed the basis for our transformation into a joint stock company in accordance with Presidential Decree No. 1333 of November 5, 1992. "On the Transformation of the State Gas Concern Gazprom into Russian Joint Stock Company Gazprom" ("Decree No. 1333") and Resolution of the Council of Ministers of the Government of the Russian Federation No. 138 of February 17, 1993 "On the Establishment of Russian Joint Stock Concern Gazprom" ("Order No. 138"). Decree No. 1333 made us responsible for ensuring the efficient operation and development of the UGSS. Decree No. 1333 and the Presidential Decree of the Russian Federation No. 2116 of December 6, 1993 made us responsible for natural gas exports through Gazexport, our wholly-owned foreign trade subsidiary.

Decree No. 1333 charged us with the following principal tasks:

- ensuring a reliable supply of natural gas to customers in Russia and to foreign customers, and supplying gas abroad under inter-governmental and inter-state agreements;

- conducting a coordinated technical and investment policy for maintaining and further developing the UGSS;
- controlling the operation of the UGSS;
- financing and constructing natural gas pipelines and high pressure outlets to service areas of Russia where natural gas was previously unavailable; and
- providing access for any independent producer of natural gas to the UGSS in proportion to the amount of natural gas produced by such independent producer in Russia, subject to Government regulation of the natural gas price mechanism.

Our functions as owner of the UGSS and providing access to the UGSS are now regulated in accordance with the Federal Law "On Gas Supply in the Russian Federation."

The Council of Ministers of the Russian Federation approved our original Charter in Order No. 138, and we were registered as an open joint stock company on February 25, 1993. In 1993 and 1994 the Government issued us with licenses pursuant to the Subsoil Resources Law of 1992, granting us rights to exploit hydrocarbon reserves.

Decree No. 1333 provided for the transfer to us of 100% of the share capital of enterprises comprising the UGSS, controlling equity stakes (not less than 51%) in a number of other entities that had been reorganized into joint stock companies, the interests of State Gas Concern "Gazprom" in Russian and foreign enterprises, and other assets of State Gas Concern "Gazprom," the privatization of which was not restricted. Decree No. 1333 also provided for all rights and obligations of State Gas Concern "Gazprom" to inure to our benefit, including its rights to use underground deposits and natural resources, as well as its rights and obligations under contracts. Gas producing enterprises Yakutgazprom and Norilskgazprom, which had been part of State Gas Concern "Gazprom," were reorganized into separate joint stock companies independent from us.

Decree No. 1333, Directive No. 58-rp of the President of the Russian Federation dated January 26, 1993, our privatization plan and certain other legislative acts issued by the President and the Government provided for:

- 15.0% of our shares to be sold by closed subscription to employees and the management of the enterprises comprising the reorganized UGSS;
- 33.9% of our shares to be sold to Russian individuals in return for privatization vouchers (of which 0.87% has not been sold and remains within Federal ownership);
- 40.0% of our shares to be fixed for three years in federal ownership;
- 1.1% of our shares to be transferred to joint stock company "Rosgazifikatsiya" (a supplier of natural gas to end consumers); and
- 10.0% of our shares to be purchased by us before June 1, 1993 at nominal value in exchange for privatization vouchers and to be placed in the securities market within one year to finance the development of natural gas fields.

Presidential Decree of the Russian Federation No. 399 of March 20, 1996 extended by a further three years the original period during which 40% of our shares were to be retained in Federal ownership. Presidential Decree of the Russian Federation No. 887 of July 25, 1998 reduced the percentage of our shares to be retained in Federal ownership to 35%, in anticipation of the sale of 5% of our shares. The Government subsequently sold 2.5% of our shares to Ruhrgas through a privatization auction in December 1998. Although our privatization plan envisaged the sale of the other 2.5% in the second quarter of 1999, these shares were not sold and continue to be owned by the Government.

The Russian Federal Law "On Gas Supply in the Russian Federation" No. 69-FZ dated March 31, 1999 (the "Gas Supply Law") states that at least 35% of the UGSS owner's shares (i.e. Gazprom) must be retained in federal ownership for an indefinite period of time and may only be disposed of pursuant to federal law. These shares, together with the 0.87% of our shares not placed during the privatization program in 1993 and 1994 and the 2.5% of our shares not sold in the second quarter of 1999, comprise the 38.37% of our shares currently held by the Government.

### **Corporate Structure**

We operate through a number of direct and indirect wholly- or majority-owned subsidiaries. In addition, we hold direct and indirect equity interests of between 21% and 50% in a number of other entities. Our subsidiaries include natural gas production subsidiaries; natural gas transportation subsidiaries; and subsidiaries responsible

for a number of other activities, including technical supervision of our pipeline systems, oil and gas well drilling, research and development, data processing, banking and procurement. We also hold controlling stakes in about 100 of the approximately 200 regional gas distribution companies in Russia, and the 100 gas distribution companies that we control account for about 80% of the volume of natural gas delivered to end consumers in Russia.

We do not separately identify segments within our Group as we operate as an integrated business. However, information about our business can be analyzed based on five segments: (i) exploration and production (referred to in the notes to our financial statements as “production”); (ii) transportation; (iii) refining; (iv) marketing (referred to in the notes to our financial statements as “distribution”); and (v) other (which includes banking activities).

*Head office.* Our head office, located in Moscow, exercises a substantial degree of managerial and financial control over the operations of our subsidiaries. Head office functions include strategy, planning, external financing, financial reporting, allocation of financial resources and supervision of principal areas of operations, such as construction, drilling, production, transportation, natural gas sales in Russia (as of January 1, 2003) and the FSU and equipment procurement.

The dispatch management center, based at our head office, continuously monitors, controls and manages our natural gas transportation system throughout Russia. We also process operational information, including data on produced and transported natural gas volumes, at our head office. Our head office is also responsible for internal financial reporting for the preparation of consolidated accounts and for the monitoring of our cash receipts and cash requirements.

*Exploration and Production.* We operate our production segment through our production subsidiaries, which develop and operate our natural gas fields and related natural gas processing facilities. Our four principal natural gas production subsidiaries, Urengoigazprom, Yamburggazdobycha, Nadymgazprom and Noyabrskgazdobycha, are located in western Siberia. Together they accounted for 92.5% of our total natural gas production in 2001. Exploration and drilling operations are carried out by our wholly-owned subsidiary, Burgaz, which acts as both a direct service provider and a general contractor.

*Transportation.* We have a total of 19 wholly-owned natural gas transportation subsidiaries, of which five also produce and/or process natural gas. Our natural gas transportation subsidiaries are responsible for the transportation of natural gas along trunk pipelines and for the delivery of natural gas within their respective regions. As discussed more fully below, beginning in the late 1990s, we began acquiring interests in regional gas distribution companies, which own and operate medium- and low-pressure pipelines that transport gas to end consumers.

*Refining.* We operate our refining segment through our five principal refining subsidiaries, four of which are also engaged in natural gas production and transportation activities and engage in refining activities principally to remove corrosive substances from the natural gas they produce and to prepare it for transportation. In January 2001 we acquired 51% of the voting shares of Sibur, a leading seller of petrochemical products in Russia that is also involved in light hydrocarbons processing. The acquisition of Sibur, one of Russia’s leading hydrocarbon refining companies, has expanded our refining capacity. See “Business—Refining—Sibur.”

*Marketing.* We export our products through our wholly-owned trading subsidiary, Gazexport. We sell our products domestically through our wholly-owned subsidiary Mezhrefiongaz and its 43 majority-owned regional marketing subsidiaries to large industrial consumers, to regional gas distribution companies and to household consumers. Historically, Mezhrefiongas sold natural gas to third-party regional gas distribution companies and to large industrial consumers. Beginning in the late 1990s, we began acquiring interests through debt for equity swaps in regional gas distribution companies that had failed to pay for the gas we sold them. We currently have controlling interests in 89, and non-controlling interests in an additional 84, of the 318 regional gas distribution companies in Russia. The regional gas distribution companies own and operate medium- and low-pressure pipelines that transport gas to end consumers.

When we acquire controlling interests in the regional gas distribution companies, we are able to capture the transportation and regional energy sales tariffs that are payable to them in respect of the transportation services they provide.

We are beginning to implement a strategy to streamline our domestic marketing operations by removing Mezhrefiongaz from our marketing chain and reassigning it primary responsibility to collect unpaid debts and

develop our electronic trading market for gas. We believe that removing Mezhhregiongaz from the marketing chain will result in cost and tax savings and increase the efficiency of our marketing.

*Other.* We are engaged in various non-core activities that support our business. These activities include technical supervision of the pipeline system, construction activities supporting the operation of the UGSS, research and development and non-core production activities such as the production of construction and telecommunications equipment. We also own Gazprombank, Russia's fifth largest bank measured by total assets, which meets most of our domestic banking needs, Gazfund, the largest private pension fund in Russia, which we use to provide pension services to our employees, and Sogaz, an insurance company which provides us with our insurance coverage.

We also own various other businesses that are not related to our core operations. These include Gazprom-Media, a holding company that owns various media production and distribution channels, other media companies and various other agricultural, civil, construction, medical care, insurance and telecommunications activities. In addition, we participate in a number of natural gas transportation and marketing joint ventures involving foreign partners. See "Business—Transportation—International Projects and Alliances for Transportation."

## Reserves and Production

We are the world's largest producer of natural gas, and of hydrocarbons generally. Our major reserves and production areas are western and eastern Siberia, southern Russia, the Volga region and northern European Russia. As of September 30, 2002, we had Russian reserves system A, B and C1 reserves (including that portion of reserves attributable to us through shareholdings in our subsidiaries, entities in which we hold less than 50% and joint ventures) of 28.4 tcm of natural gas, 1.3 billion tons (9.4 bbls) of gas condensate and 573.9 million tons (4.2 bbls) of crude oil, for a total of 180,992.5 mmbbls.

Based on an evaluation conducted by DeGolyer and MacNaughton under SPE International Standards, we had 17.0 tcm of proved natural gas reserves, 1.5 tcm of probable natural gas reserves and 18.5 tcm of combined proved and probable natural gas reserves in 18 of our fields as of December 31, 2000. The 18 fields also contained proved reserves of 286.2 million tons (2,098 mmbbls) of gas condensate and 8.5 million tons (63 mmbbls) of crude oil and probable reserves of 77.5 million tons (568 mmbbls) of gas condensate and 98.8 million tons (724 mmbbls) of crude oil as of December 31, 2000. We believe that the 18 fields audited by DeGolyer and MacNaughton are likely to contain most of our reserves which would be deemed proved or probable upon a full audit of our upstream properties.

As of December 31, 2002, we held 20 exploration and assessment licenses with terms of up to five years (without development rights), 16 combined hydrocarbon exploration, assessment and production licenses with terms of 25 years, and with remaining terms of between 18 and 25 years, and 77 exploration and production licenses with terms of 20 to 25 years and with remaining terms of between 13 and 20 years. We are in material compliance with all of our subsoil licenses.

In 2001, we produced 512.0 bcm of natural gas, 9.5 million tons (69.6 mmbbls) of gas condensate and 704 thousand tons (5.2 mmbbls) of crude oil, for a total of 3,088.3 mmbbls. According to preliminary estimates, in 2002 we produced 521.9 bcm of natural gas, 9.9 million tons (72.6 mmbbls) of gas condensed and 706 thousand tons (5.2 mmbbls) of crude oil. Our production of natural gas in 2002 represented the first annual increase in our production since 1999.

We have budgeted approximately U.S.\$20 billion through 2010 to develop new production facilities in line with our plans to achieve annual natural gas production of 530 bcm and to maintain that level for the foreseeable future. We have also entered into a number of strategic alliances and joint ventures with major western oil and gas companies to develop fields in the Barents Sea, the Caspian Sea, western Siberia, China and the Persian Gulf (South Pars).

The following table sets forth certain data for our production segment for the periods indicated.

	For the year ended or as at December 31,		
	2001	2000	1999
<b>Total natural gas production</b> (bcm) .....	512.0	523.2	545.6
<b>Depreciation</b> (million RR) .....	29,577	27,323	25,614
<b>Capital Expenditure</b> (million RR) .....	68,003	57,024	42,123
<b>Total Assets</b> (million RR) .....	514,238	514,739	510,037

## *Reserves*

We estimate our hydrocarbon reserves in accordance with the Russian reserves system. We have also had the reserves in 18 of our fields evaluated according to SPE International Standards by DeGolyer and MacNaughton, an independent petroleum engineering consulting firm, and this has yielded estimates of our proved and probable reserves as of December 31, 2000. In 2003, we plan to have the reserves of these 18 fields evaluated in accordance with SPE International Standards as of December 31, 2001 together with three additional fields evaluated in accordance with SPE International Standards as of December 31, 2002.

The Russian reserves system differs significantly from SPE International Standards, in particular with respect to the manner in which and the extent to which commercial factors are taken into account in calculating reserves, as described more fully below.

### *Russian Reserves System*

The estimation of reserves of natural gas, gas condensate and crude oil can be broken down into two components: (i) geological reserves, or the quantities of natural gas, gas condensate and crude oil contained in the subsoil and (ii) extractable reserves, or the portion of geological reserves whose extraction from the subsoil as of the date the reserves are calculated is economically efficient given market conditions and rational use of modern extraction equipment and technologies and taking into account compliance with the requirements of subsoil and environmental protection.

The Russian reserves system is based solely on an analysis of geological reserves. Explored reserves are represented by categories A, B, and C1; preliminary estimated reserves are represented by category C2; potential resources are represented by category C3; and forecasted resources are represented by the categories D1 and D2. We have included in this offering circular only information about our explored reserves, or reserves in categories A, B and C1.

*Category A* reserves are calculated on the part of a deposit drilled in accordance with an approved development project for the oil or natural gas field. They represent reserves that have been analyzed in sufficient detail to define comprehensively the type, shape and size of the deposit; the level of the hydrocarbon saturation; the reservoir type; the nature of changes in the reservoir characteristics; the hydrocarbon saturation of the productive strata of the deposit; the content and characteristics of the hydrocarbons; and the major features of the deposit that determine the conditions of its development (mode of operations, well productivity, strata pressure, natural gas, gas condensate and oil balance, hydro- and piezoconductivity and other features).

*Category B* reserves are calculated on the part of a deposit drilled in accordance with either a trial industrial development project in the case of a natural gas field or an approved technological development scheme in the case of an oil field. They represent reserves in which natural gas, gas condensate and oil content is determined on the basis of commercial flows from wells at various depths.

*Category C1* reserves are calculated based on the results of both commercial flows from operational wells and geological exploratory work, which are analysed to determine the type, shape and size of the deposit and the structure of the hydrocarbon bearing reservoir. The lithological content, reservoir type and characteristics, hydrocarbon saturation, liquid hydrocarbon displacement rate, level of hydrocarbon saturation of the productive strata, content and characteristics of the hydrocarbons under stratum and standard conditions productivity, hydro- and piezoconductivity of the stratum, stratum pressure, temperature, hydrocarbon balance and hydro-geological and geocryological conditions are analysed according to test data from drilled wells, core analyses and comparisons with neighboring explored fields. Based on these analyses, preliminary data for trial industrial development in the case of a natural gas field or a technological development project in the case of an oil field is drawn up.

For a description of C2, C3, D1 and D2 reserves, see "Overview of the Russian Gas Industry and Its Regulation—Classification of Reserves."

### *SPE International Standards*

While the Russian reserves system focuses on the actual physical presence of hydrocarbons in geological formations, and reserves are estimated based on the probability of such physical presence, SPE International Standards take into account not only the probability that hydrocarbons are physically present in a given

geological formation but also the economic viability of recovering the reserves (including such factors as exploration and drilling costs, ongoing production costs, transportation costs, taxes, prevailing prices for the products, and other factors that influence the economic viability of a given deposit).

Under SPE International Standards, reserves are classified as “proved,” “probable” and “possible,” based on both geological and commercial factors. We have included in this offering circular information about our proved and probable reserves as of December 31, 2000, based on the evaluation by DeGolyer and MacNaughton of 18 of our fields.

*Proved reserves* include reserves that are confirmed with a high degree of certainty through an analysis of the development history and/or volume method analysis of the relevant geological and engineering data. Proved reserves are those that, based on the available evidence and taking into account technical and economic factors, have a better than 90% chance of being produced.

*Probable reserves* are those reserves in which hydrocarbons have been located within the geological structure with a lesser degree of certainty because fewer wells have been drilled and/or certain operational tests have not been conducted. Probable reserves are those reserves that, on the available evidence and taking into account technical and economic factors, have a better than 50% chance of being produced.

An evaluation of proved and probable natural gas reserves naturally involves multiple uncertainties. The accuracy of any reserves evaluation depends on the quality of available information and engineering and geological interpretation. Based on the results of drilling, testing and production after the audit date, reserves may be significantly restated upwards or downwards. Changes in the price of natural gas, gas condensate or oil may also affect our proved and probable reserves estimates, as well as estimates of our future net revenues and net present worth, because the reserves are evaluated, and the future net revenues and net present worth are estimated, based on prices and costs as of the audit date.

#### *Differences between SPE International Standards and SEC Standards*

DeGolyer and MacNaughton conducted its evaluation of our 18 fields using SPE International Standards, which differ in certain material respects from standards applied by the United States Securities and Exchange Commission (the “SEC Standards”). The principal differences include the following:

*Certainty of Existence.* Under SPE International Standards, reserves in undeveloped drilling sites that are located more than one well location from a commercial producing well may be classified as proved reserves if there is “reasonable certainty” that they exist. Under SEC Standards, it must be “demonstrated with certainty” that reserves exist before they may be classified as proved reserves.

*Duration of License.* Under SPE International Standards, proved reserves are projected to the economic production life of the evaluated fields. Under SEC Standards, oil and gas deposits may not be classified as proved reserves if they will be recovered after the expiration of a current license period unless the license holder has the right to renew the license and there is a demonstrated history of license renewal.

Accordingly, information relating to our estimated natural gas, gas condensate and oil reserves included in this offering circular is not indicative of information that would be reported under SEC Standards.

We currently do not intend to engage DeGolyer and MacNaughton to evaluate our reserves to SEC Standards. If at some point in the future we were to do so, the adoption of SEC Standards could potentially cause the amount of estimated proved natural gas, gas condensate and oil reserves reported by us in future periods to be lower than would otherwise be reported under SPE International Standards. A relative decrease in the amount of estimated proved developed natural gas, gas condensate and oil reserves reported by us could, if material, affect the amount of depreciation and depletion expense, impairment charges or certain other financial information derived from or relating thereto reported by us in our consolidated financial statements in future periods.

#### *Our Reserves*

We estimate that we had A, B and C1 reserves of 28.4 tcm of natural gas, 1.3 billion tons (9.4 bbls) of gas condensate and 573.9 million tons (4.2 bbls) of crude oil, for a total of 180,992 mmboc as of September 30,

2002. Our wholly-owned production subsidiaries held mineral resource licenses at December 31, 2001 for 26.0 tcm of A, B and C1 natural gas reserves, while associated companies held licenses for another 5.6 tcm of A, B and C1 natural gas reserves (of which 2.4 tcm was attributable to us in proportion to our actual shareholding). This included 3.5 bcm of natural gas reserves owned by enterprises in which we own 50% or more (with our proportionate share equaling 2.0 bcm) and 2.1 bcm owned by enterprises in which we own less than 50% (with our proportionate share equaling 0.4 bcm). Our total A, B and C1 natural gas reserves represent approximately 60% of the total A, B and C1 natural gas reserves in Russia. Most of these reserves are concentrated in the very large fields of Urengoiyskoye, Yamburgskoye, Zapolyarnoye, Bovanenkovskoye, Kharasoveiskoye, Medvezhye and Komsomolskoye with combined A, B and C1 gas reserves of over 500 bcm. More than half of our A, B and C1 natural gas reserves are in Cenomanian deposits, which are characterized by low bedding depth, high delivery rates of wells and dry natural gas.

As of December 31, 2000, DeGolyer and MacNaughton had evaluated our proved and probable reserves at 18 of our fields. The following table shows as of December 31, 2000 our total A, B and C1 natural gas, gas condensate and crude oil reserves and our A, B and C1 and proved and probable natural gas, gas condensate and crude oil reserves in these 18 fields. The 18 fields contained 101% of our total A and B natural gas reserves (see note 1 to the table below), 83% of our total C1 natural gas reserves and 85% of our total combined A, B and C1 natural gas reserves as of December 31, 2000. Approximately 96% of the proved and probable reserves evaluated in accordance with SPE International Standards are located in western Siberia. The remaining 4% are located in the Orenburg and Astrakhan Regions.

The correlation between A, B and C1 reserves and proved and probable reserves may differ in the fields that have not yet been evaluated by DeGolyer and MacNaughton, and we may not have any proved or probable reserves in those fields. Moreover, the correlation may vary at different times for the same fields.

All reserves amounts are given in proportion to our actual shareholding in non-wholly-owned subsidiaries, equity basis companies and joint ventures.

	As of December 31, 2000

Crude Oil (mmbbls) .....	0	2,664	2,664	63 <sup>(2)</sup>	724 <sup>(2)</sup>	787 <sup>(2)</sup>

Notes:

(1) Includes 90% of the reserves of the West Tarkosalinsk field. We do not hold a production license for this field; however, we have entered into an agreement with Purneftegazgeologia, the holder of the production license, pursuant to which we receive 90% of the production from the field in exchange for developing it. DeGolyer and MacNaughton included in its evaluation the West Tarkosalinsk field and credited 90% of the reserves of that field as our reserves. When we estimate our A, B and C1 reserves, we do not include any of the reserves of the West Tarkosalinsk field as our reserves.

(2) Amounts differ from those provided in the DeGolyer and MacNaughton letter attached as Appendix A because in this offering circular we use a conversion rate from metric tons to barrels of 1 ton = 7.33 barrels. Amounts in barrels provided in the DeGolyer and MacNaughton letter are calculated based on the specific gravities of each field.

The following table sets out our A, B and C1 and proved and probable natural gas reserves in our major fields as of December 31, 2000. The major fields contained 85% of our total A and B natural gas reserves, 86% of our total C1 natural gas reserves and 86% of our total combined A, B and C1 natural gas reserves as of December 31, 2000. They also contained 84% of our A and B natural gas reserves in the 18 fields evaluated by DeGolyer and MacNaughton, 103% of our C1 natural gas reserves in such fields and 101% of our combined A, B and C1 natural gas reserves in such fields, and 90% of our proved natural gas reserves, 82% of our probable

natural gas reserves and 89% of our combined proved and probable natural gas reserves, as of December 31, 2000.

The correlation between A, B and C1 reserves and proved and probable reserves may differ in the fields that have not yet been audited by DeGolyer and MacNaughton, and we may not have any proved or probable reserves in those fields. Moreover, the correlation may vary at different times for the same fields.

All reserves amounts are given in proportion to our actual shareholding in non-wholly-owned subsidiaries, equity basis companies and joint ventures.

Our A and B reserves in these major fields declined in the period from December 31, 2000 through December 31, 2002, while our C1 reserves increased, primarily due to the production of our A and B reserves and a reclassification of C2 reserves to C1 reserves and new discoveries.

#### *Licenses*

As of December 31, 2002, we held:

- 20 exploration and assessment licenses with terms of up to five years (without development rights);
- 16 combined hydrocarbon exploration, assessment and production licenses with initial terms of 25 years, and with remaining terms of mostly between 18 and 25 years; and
- 77 production licenses with initial terms of 20 to 25 years, and with remaining terms of mostly between 13 and 20 years.

We hold our subsoil licenses either directly or through our wholly-owned subsidiaries. The following table sets out which of our subsidiaries hold these licenses, and the number and type of licenses each of them held as of December 31, 2002.

	Type of License			Total
	Exploration and Assessment	Exploration, Assessment and Production	Production	
Gazprom .....	4	2	0	6
Astrakhangazprom .....	0	1	1	2
Bashtransgaz .....	0	0	1	1
Kaspiygazprom .....	0	7	0	6
Kavkaztransgaz .....	0	0	13	13
Kubangazprom .....	0	4	38	42
Nadymgazprom .....	0	0	6	6
Noyabrskgazdobycha .....	1	0	4	5
Orenburggazprom .....	4	1	1	6
Severgazprom .....	7	0	4	11
Surgutgazprom .....	0	0	1	1
Tyumentransgaz .....	0	0	3	3
Uraltransgaz .....	1	0	0	1
Urengoigazprom .....	1	0	3	4
Yamburggazdobycha .....	2	1	2	5
All Subsoil Users .....	20	16	77	112

None of our exploration, assessment and production licenses or production licenses expires in the next ten years.

In accordance with federal legislation, licenses are issued by the federal subsoil management authority jointly with the authority of the relevant constituent entity of the Russian Federation. Most of our hydrocarbon exploration, assessment and production licenses were granted in 1993 through 1996 in accordance with the Subsoil Resources Law, as well as regulatory acts issued in 1992 that govern the licensing and use of the subsoil. The principal negotiations in obtaining licenses involve the timing for bringing fields on stream. The timing we propose is generally accepted.

Extension of licenses is subject to the approval of the federal and regional authorities that issue the licenses. The licenses impose certain obligations on us to provide employment, develop local infrastructure, pay local and federal taxes and meet certain requirements relating to environmental matters. Licenses may be suspended or revoked if we fail to comply with their terms. See "Overview of the Russian Gas Industry and its Regulation—Russian Regulation." We believe we are in substantial compliance with the terms of all of our material subsoil licenses (although minor technical breaches may have occurred such as untimely submission of materials for official evaluation and preparation of development documents). As of the date of this offering circular, there have been no suspensions of production as a result of decisions by the relevant federal and regional authorities. See "Risk Factors—Risks Relating to our Business—Our licenses may be suspended, amended or terminated prior to the end of their terms, and we may not be able to obtain or maintain various permits and authorizations."

#### *Exploration Activities*

We are continually engaged in the exploration for new deposits of natural gas. This involves geological and seismic exploration in our existing license areas and fields, as well as exploration work in prospective new fields.

Approximately 78% of the 64 exploration and appraisal wells we have drilled since January 1, 1999 have yielded discoveries or positive appraisals confirming our estimates regarding hydrocarbons in place. In 2001, we drilled 16 exploration and appraisal wells, of which 11 yielded discoveries or positive appraisals confirming estimates regarding hydrocarbons in place. In the nine months ended September 30, 2002, we drilled 15 exploration and appraisal wells, of which 14 yielded discoveries or positive appraisals confirming estimates of

hydrocarbons in place. Our current exploration strategy is to focus on the exploration of new fields and natural gas-bearing horizons in close proximity to fields that have already been developed and have processing and transportation infrastructure. We believe that this strategy will allow us to maximize the percentage of successful drilling at as low a cost as possible and to minimize the investment required for processing and implementation.

In 2000 and 2001 we made significant discoveries on two large offshore natural gas fields, the Kamennomysskoye and Severokamennomysskoye fields, in the delta of the Ob River. We are currently in the process of estimating the reserves of these fields. We are currently conducting exploration activities in eastern and western Siberia, the Republics of Bashkortostan, Dagestan and Komi, and the Arkhangelsk, Astrakhan, Orenburg, Krasnodar and Stavropol regions. The Government is currently considering a development and exploration program for eastern Siberia in which we would be responsible for coordinating the development of natural gas fields and transportation infrastructure in the region.

The following table sets out data by geographic region on the exploration wells we drilled in the periods indicated:

#### *Production Activities*

We produce natural gas, gas condensate and crude oil from 72 fields located in various regions of the Russian Federation. The majority of our natural gas production is from the Cenomanian layer, which is located approximately 1,500 meters below the surface. Our main production regions are as follows:

*Western Siberia region.* This is our main natural gas production region and is characterized by severe weather conditions. There are 12 active natural gas, gas condensate and crude oil fields in the Nadym-Pur-Taz region of western Siberia, which accounted for 92.5% of our natural gas, 52.4% of our gas condensate and 72.2% of our crude oil production in 2001. Our three leading fields, Yamburgskoye, Medvezhye and Urengoiyskoye, as well as the Zapolyarnoye field are located in this region. Our production subsidiaries, Nadymgazprom, Urengoiygazprom, Yamburggazdobycha and Noyabrskgazdobycha, operate in this region.

*Volga region.* There is one active oil and gas condensate field, Orenburgskoye, in the Volga region which accounted for 4.5% of our natural gas, 3.8% of our gas condensate and 27.3% of our crude oil production in 2001. The operating company for this field is Orenburggazprom, which produces, processes and transports natural gas.

*Northern European Russia.* This region is characterized by severe weather conditions and has four active gas condensate fields which accounted for 0.6% of our natural gas and 4.0% of our gas condensate production in 2001. The operating production company for this region is Severgazprom.

*Southern Russia.* This area is comprised of two regions, Astrakhan Oblast and the northern Caucasus. The Astrakhan region contains one active gas condensate field, Astrakhanskoye, which accounted for 2.1% of our natural gas and 38.7% of our gas condensate production in 2001. The operating company for this field is Astrakhangazprom. These 54 fields in the northern Caucasus region accounted for 0.4% of our natural gas, 1.1% of our gas condensate and 0.5% of our crude oil production in 2001. This production is carried out by Kubangazprom and Kavkaztransgaz.

In 2001, we produced 512.0 bcm of natural gas, 9.5 million tons (69.6 mmbbls) of gas condensate and 704 thousand tons (5.2 mmbbls) of crude oil, for a total of 3,088.3 mmboe.

*Natural Gas.* In 2001, we produced 512.0 bcm of natural gas (compared to 523.2 bcm in 2000) and accounted for approximately 88.1% of the natural gas produced in Russia. We plan to achieve annual production of 530 bcm in 2003 and to maintain that level of production for the foreseeable future.

*Gas Condensate.* We produced 9.5 million tons (69.6 mmbbls) of gas condensate in 2001 (compared to 9.3 million tons (68.2 mmbbls) in 2000). Our production of gas condensate has increased in recent years as we have commissioned new gas condensate fields, including new areas at the Yamburgskoye field. We intend to continue to increase our gas condensate production, particularly in the Yamburgskoye and Astrakhanskoye fields, and to bring on stream the Yen-Yakhinskoye field during 2003.

*Crude oil.* In 2001, we produced approximately 704 thousand tons (5.2 mmbbls) of crude oil (compared to 719 thousand tons (5.3 mmbbls) in 2000) from the crude oil perimeters of the two fields at which we produce crude oil, Urengoiskoye and Orenburgskoye.

According to preliminary estimates, in 2002, we produced 521.9 bcm of natural gas, 9.9 million tons of gas condensate (72.6 mmbbls) and 706 thousand tons (5.2 mmbbls) of crude oil.

The following table sets out certain production data by region for the periods indicated:

	For the nine months ended September 30,

## Major Fields

The following tables set out certain production and other information for our major fields in the periods indicated. The fields accounted for 88.0%, 87.8%, 88.1%, 88.2% and 89.4% of our total natural gas production in the nine months ended September 30, 2002 and 2001 and the year ended December 31, 2001, 2000 and 1999, respectively. The production licenses for these fields are held by wholly-owned subsidiaries.

### Production Costs

Our production costs are influenced mainly by the geographical composition of the hydrocarbon deposit under production and cost of operating and maintaining the infrastructure to support production in a particular region.

Current production costs at our three leading fields, Urengoiskoye, Yamburgskoye and Medvezhye will likely increase because we will be required to use more expensive extraction techniques to compensate for declining pressure in the deposits and to extract natural gas from deeper, more geologically complex deposits. Production costs at our fields in the Yamal Peninsula are also expected to be high. Our strategy is to mitigate these higher costs of production through the development and use of new technologies and through the low costs of production at our Zapolyarnoye field due to the geological structure of its deposit and the proximity of the field to existing infrastructure.

### Development Activities

We are engaged in developing new fields for commercial production and aim to achieve and maintain annual production of 530 bcm of natural gas beginning in 2003 and continuing for the foreseeable future. The development of our fields involves drilling and completing production wells, installing units for processing of natural gas for transportation and installing booster compressor stations to compensate for the loss of pressure in our fields with declining production.

The following table sets out data by region on the development wells we drilled in the period from 1999 to 2001 and for the nine months ended September 30, 2002 and 2001:

	For the nine months ended September 30,		For the year ended December 31,		
	2002	2001	2001	2000	1999
Western Siberia .....	119	108	117	39	84
Volga region (Povolzhski) .....	3	2	5	0	3
Northern European Russia .....	0	0	0	0	2
Southern Russia .....	16	2	6	1	1
<b>Total</b> .....	<b>138</b>	<b>112</b>	<b>128</b>	<b>40</b>	<b>90</b>

There is typically a lag time of several years between discovery and development of a field. Our strategy is to develop fields only when required to meet our production plans.

The Urengoiskoye, Yamburgskoye and Medvezhye fields in the Nadym-Pur-Taz region of western Siberia have historically accounted for the bulk of our production. Production from these three leading fields has been declining in recent years and will continue to decline significantly in the years ahead. See "Risk Factors—Risks Relating to our Business—If we fail to develop our undeveloped fields, our production levels will decline materially" and "—Production Activities." To achieve and maintain our targeted production level, we plan by 2008 to bring our Zapolyarnoye field to its targeted production level of 100 bcm per year, to finalize the completion of the Yubileinoe field and the Kharvutinskoye area of the Yamburgskoye field, and to commence development of the Pestsovoye field, the Aneryakhinskoye area of the Yamburgskoye field, the Valanginian layers of Yen-Yakhinskoye field and the Cenomanian layers of the Vyngayakhinskoye and Etyurovskoye fields. After 2008, we plan to maintain our production level by bringing on stream the Valanginian layer of the Zapolyarnoye field and the Bovanenkovskoye or Kharasaveiskoye fields of the Yamal peninsula.

We are currently engaged in significant development projects including:

*Zapolyarnoye field.* This field is located adjacent to our main producing fields in the Nadym-Pur-Taz region and we are currently developing its Cenomanian layer, which is characterized by low bedding depth, high

delivery rates of wells and dry natural gas. The field commenced commercial production in the third quarter of 2001 after we commissioned a gas treatment plant (“GTP”) with a design capacity of 35 bcm, which enabled us to produce 7.1 bcm of natural gas during the remainder of 2001. During the first nine months of 2002, this GTP enabled us to produce 24.7 bcm of natural gas. In December 2002 we commissioned a second GTP, which increased the Zapolyarnoye field’s total annual natural gas production capacity to 67.5 bcm. After we commission a planned third GTP in 2004, we expect annual natural gas production to increase by another approximately 32.5 bcm. We anticipate that we will complete development of the field by 2006, after which production should reach 100 bcm per year. We expect to make additional investments of approximately RR68.8 billion in the development of the field, including for transportation facilities to connect the field to our existing pipeline infrastructure. We anticipate that we will be able to sustain production of 100 bcm per year for about a 12-year period after 2006 and that the development of the Zapolyarnoye field will partially compensate for the declining production in our mature fields and the overall decrease in our natural gas production in western Siberia.

*Yubileinoye field.* This field has been under development since 1993. In 2001, production from the field was 17.4 bcm. We expect the field to be fully operational in 2003, with a production level of 20 bcm per year. We plan additional investments in the development of the field to be U.S.\$125 million.

*Kharvutinskoye area of the Yamburgskoye gas condensate field.* This area is located in the Nadym-Pur-Taz region. It was brought on stream in 1996 and produced 4.5 bcm of natural gas in 2001. In 2002 the A, B and C1 reserves of this area were adjusted upward and it is anticipated that natural gas production in the area will reach 25-30 bcm per year by 2005. We have made it a high priority to increase gas production in this area and have planned for capital investments of RR37.8 billion (U.S.\$1.2 billion) through 2008 for development projects in the area.

*Pestsovoye field.* The Pestsovoye field is located in western Siberia. We have budgeted investments of U.S.\$1.04 billion through 2004 to complete developing this field for commercial production and bring it on stream in 2004. The field is expected to reach a planned annual production capacity of 27.5 bcm of natural gas per year in 2004.

*Aneryakhinskoye area of the Yamburgskoye field.* This field is located in western Siberia. We have budgeted capital investments of U.S.\$332 million through 2004 to develop natural gas production in this area of the Yamburgskoye field and anticipate bringing it on stream in 2004. This area is expected to reach its planned production capacity of 10 bcm of natural gas per year by 2005.

*Yen-Yakhinskoye field.* This field is located in western Siberia. We have budgeted capital investments of U.S.\$507 million through 2004 to develop the Valanginian layer of this field and anticipate bringing it on stream in 2003. We anticipate that this field will produce 5 bcm of natural gas per year by 2005.

*Vyngayakhinskoye and Etypurovskoye fields.* These fields are located in western Siberia. We have budgeted capital investments of an aggregate of U.S.\$471 million through 2004 to develop these two fields. We anticipate that the Vyngayakhinskoye field will come on stream in 2003 and produce 20 bcm of natural gas per year and that the Etypurovskoye field will come on stream in 2004 and produce 15 bcm of natural gas per year by 2005. See “—Reserves and Production—Projects and Alliances in Reserves and Production—Rosneft.”

*Yamal Peninsula.* The Yamal Peninsula is located to the north of, and is characterized by harsher climatic conditions than, the Nadym-Pur-Taz region. The Yamal Peninsula’s explored reserves are in excess of 10 tcm and are concentrated primarily in the Bovanenkovskoye, Kharasaveiskoye and Kruzenshternovskoye fields. We hold production licenses for the Bovanenkovskoye and Kharasaveiskoye gas condensate fields and the Novoportovskoye crude oil field. In conjunction with the Yamal-Nenets regional administration, we developed a “Program for Comprehensive Commercial Development of Hydrocarbon Deposits on the Yamal Peninsula and under its Adjacent Waters” and submitted the plan to the Ministry of Energy of the Russian Federation (the “Ministry of Energy”) and other interested agencies in April 2002. On November 27, 2002, the Government instructed various federal ministries to accelerate their review of the draft program to allow for its submission for final approval by the Government. The Government is considering giving the development program the status of a federal program, which could have beneficial tax implications for us or result in other Government

exemptions. Development of hydrocarbon resources in the Yamal Peninsula is planned to commence after 2008. The natural gas production potential of the Yamal Peninsula's open in-land fields is estimated at 250 bcm per year for natural gas and a total of 10 to 12 million tons of liquid hydrocarbons. We anticipate that the production of natural gas from these fields will help enable us to maintain an aggregate annual natural gas production rate of 530 bcm in the long-term.

*Shtokmanovskoye field.* The Shtokmanovskoye field is an off-shore field located north-west of the Yamal Peninsula. In 1996, we entered into an agreement on cooperation with regard to Shtokmanovskoye project with ZAO Rosshelf (our subsidiary) and certain foreign participants, including Conoco (USA), Neste (Finland) (since renamed Fortum Group S.A.), Norsk Hydro (Norway) and TotalFinaElf (France). This agreement expired in 2002, and we are currently developing this field and the Prirazlomnoye field under a joint activity agreement with Rosshelf and Sevmorneftegaz, a joint venture in which our subsidiary Rosshelf and Rosneft-Purneftegaz each have a 50% stake. Sevmorneftegaz holds a 48.9% stake in the Rosshelf joint activity. Our direct and indirect interest in the Rosshelf joint activity is 62.9%. The Shtokmanovskoye field is being developed within the framework of a development plan that calls for a planned eventual annual production of 90 bcm of natural gas. We estimate that this development project will require investments of U.S.\$13.2 billion. We are currently conducting production testing and research to determine when and how to bring the field into production. In 2002, certain of our western partners under the original agreement on cooperation confirmed their intent to continue joint activities and we are currently negotiating the terms of their continued involvement.

*Eastern Siberia and the Far East.* On July 16, 2002, the Government issued Decision No. 975-r appointing us to coordinate the implementation of a program for creating in eastern Siberia and the Far East a unified natural gas production, transportation and supply system taking into account eventual gas exports to China and other Asian-Pacific countries. Our potential involvement in specific projects in eastern Siberia and the Far East is currently under consideration.

#### *Projects and Alliances in Reserves and Production*

##### *Shell*

On November 17, 1997, we signed a strategic alliance agreement with Royal Dutch/Shell Group ("Shell"), which contemplates the parties' joint cooperation on several projects.

We have agreed to cooperate on a project associated with the prospecting, assessment, development and production of crude oil, gas condensate and natural gas from the Neokomian deposits of the Zapolyarnoye field, which total 735.1 bcm of A, B and C1 natural gas reserves, 88.1 million tons (729.3 mmbbls) of A, B and C1 gas condensate reserves and 43.6 million tons (330.6 mmbbls) of A, B and C1 crude oil reserves. The project is expected to produce approximately 14.6 bcm of natural gas and 2 million tons (16.6 mmbbls) of gas condensate per year by the third year of operation. We are in the process of negotiating a joint venture and production sharing agreements for this project. The project is also currently undergoing expert evaluation by the Yamal-Nenets autonomous region territorial commission for the development of hydrocarbon fields.

For a discussion of our joint participation with Shell in several transportation projects, see "Business—Transportation—International Projects and Alliances for Transportation."

##### *ENI*

On February 11, 1998, we concluded a strategic alliance agreement with ENI Group ("ENI") that contemplates the joint study and development of the Paleozoic deposits of the Astrakhanskoye field.

##### *South Pars*

Since 1997, we have been involved in a project to develop the second and third phases of the South Pars field, located in the Iranian segment of the Persian Gulf, with a total cost of U.S.\$2 billion. We hold a 30% interest in the project. Our partners in this project are TotalFinaElf, which holds a 40% interest, and Petronas, which holds a 30% interest.

Since the project was launched, two off-shore production platforms (SPD3 and SPD4) and two off-shore pipelines have been completed and commissioned. In March 2002 the first gas deliveries from the field were made to Iran's IGAT gas transportation system. In April 2002 we began export shipments of gas condensate. In August 2002 we received our first revenues from this project. The gas refining complex is expected to reach its full capacity by early 2003. Operation of the on- and off-shore facilities is expected to be transferred to the

Iranian National Oil Company in June 2003. We will continue to participate in the joint committee for management of the project and will receive a portion of the gas condensate produced at the field as remuneration and to cover our expenses.

In August 1996, the United States adopted the Iran and Libya Sanctions Act (the "Sanctions Act"). The Sanctions Act requires the President of the United States to impose two or more of certain enumerated sanctions on any person or company, regardless of nationality, that makes investments in Iran of U.S.\$20 million or more, or in Libya of U.S.\$40 million or more, that directly contribute to the enhancement of Iran's or Libya's ability to develop their respective petroleum resources. In May 1998, the U.S. Department of State issued a determination that the investment made by our partners and us in Iran's South Pars gas and condensate field constituted activity covered by the Sanctions Act, and, at the same time, communicated its decision to waive sanctions under section 9(c) of the Sanctions Act with respect to such investment. The waiver only applies to activities in the South Pars field and does not address other activities in Iran. The Sanctions Act was renewed for an additional five year period in August 2001.

*Rosneft*

We entered into a framework agreement with Rosneft on October 4, 2001 to create a joint venture company for the development of the Kharampurskoe, Vyngayakhinskoye, Etypurovskoe, Prirazlomnoe and Shtokmanovskoye fields, and work is currently being conducted in accordance with the terms of this agreement. In October 2002 we and our subsidiary Rosshelf amended the Rosshelf joint activity agreement pursuant to which we were developing projects for the Prirazlomnoe and Shtokmanovskoye fields. The amendment allowed a third company, Sevmorneftegaz to participate in the development project and joint activity agreement. Sevmorneftegaz, has been organized that is now developing projects for the Prirazlomnoe and Shtokmanovskoye fields. Sevmorneftegaz is a company jointly controlled by Rosneft-Purneftegaz and our subsidiary, Rosshelf. Sevmorneftegaz holds a 48.9% stake in the Rosshelf joint activity. Our direct and indirect interest in the Rosshelf joint activity is 62.9%.

*Wintershall*

Under a strategic alliance agreement with BASF (see "Business—Transportation—International Projects and Alliances for Transportation"), we prepared a feasibility study for the joint development of the Achimovsk formations of the Urengoiskoye field jointly with Wintershall. We plan to establish a joint venture with Wintershall to develop gas deposits in the northern Urengoi region of western Siberia with the aim of producing approximately 10 bcm of natural gas per year by 2010. Wintershall has indicated that it plans to provide all of the initial capital expenditure required to develop such gas deposits. The terms and conditions of the joint venture are currently being negotiated, and it has been agreed that we and Wintershall will have equal stakes in the venture.

**Transportation**

We own and operate the UGSS, a single, centrally-controlled system for natural gas preparation, transportation and storage. In 2001, the UGSS transported 630.6 bcm of natural gas. Transportation for third parties accounted for approximately 81.3 bcm, or 12.9%, of the natural gas transported by us and generated RR17,482 in revenues for us in 2001.

The following table sets out certain data for our transportation segment for the periods indicated:

	As of or for the year ended December 31,		
	2001	2000	1999
<b>Total volume transported</b> (bcm) .....	630.6	633.5	618.2
<b>of which for third parties</b> (bcm) .....	81.3	97.7	75.0
<b>Depreciation</b> (million RR) .....	61,604	59,527	54,739
<b>Capital expenditures</b> (million RR) .....	74,139	54,650	110,488
<b>Total Assets</b> (million RR) .....	1,254,003	1,267,266	1,278,810

The UGSS includes the world's largest high-pressure trunk pipeline system, with over 155,000 km of pipelines. Gas transportation is powered by 256 compressor stations with a total capacity of approximately 42,600 MW. Seasonal peak loads are leveled off using 23 underground natural gas storage facilities with an active storage capacity of approximately 62 bcm.

During the last several years there has not been any material interruption of the flow of natural gas through the UGSS. We have been able to use the reserve capacity of the UGSS to meet our scheduled delivery commitments even when there have been minor disruptions in the system.

In Russia, the UGSS transports natural gas an average distance of approximately 2,400 km for domestic consumption and 3,400 km for export. Our dispatch management center, located in Moscow, controls and manages the UGSS and all natural gas transportation in Russia.

The pipeline system consumed approximately 45.7 bcm of natural gas in 2001, 86% of which was used to power its operations and the rest of which was accounted for by technological losses, including gas lost during maintenance work on the pipelines.

The following table sets forth data on the natural gas balance of the UGSS for the periods indicated (including natural gas in transit from Central Asia):

Gas Balance Items	For the nine months ended September 30,		For the year ended December 31,		
	2002	2001	2001	2000	1999
	(bcm)	(bcm)	(bcm)	(bcm)	(bcm)
<b>Total gas supplies, including</b>	456.4	451.9	630.6	633.5	618.2
Gazprom's own production <sup>(1)</sup>	367.6	361.4	499.0	510.3	534.1
Gas from independent suppliers (including gas bought by Gazprom and gas from Central Asia) <sup>(2)</sup>	64.6	56.2	78.1	68.7	30.2
Withdrawals from underground storage <sup>(3)</sup>	20.6	29.7	48.3	53.3	52.5
Reduction in natural gas volume within UGSS pipelines	3.6	4.6	5.2	1.2	1.4
<b>Total deliveries, including</b>	456.4	451.9	630.6	633.5	618.2
Additions to underground storage	43.8	44.6	46.8	60.3	52.6
Deliveries to customers in Russia	213.5	214.4	317.5	308.4	299.8
Deliveries to Europe	94.8	92.0	127.0	129.0	126.8
Deliveries to FSU countries, including	66.3	63.8	88.0	87.0	87.2
Transit deliveries from Central Asian countries	28.4	25.0	35.1	23.4	9.5
Technological needs and transportation system losses <sup>(4)</sup>	34.4	32.8	45.7	47.1	50.8
Increase in natural gas volume within UGSS pipelines	3.6	4.3	5.6	1.7	1.0

Notes:

- (1) Amounts are less than yearly total production because some of the natural gas we produce is used in northern cities near our fields and thus does not enter the UGSS.
- (2) Includes Purgaz volumes even though Purgaz was consolidated into our Group as of April 1, 2002.
- (3) Includes gas of independent suppliers.
- (4) Includes own consumption required to run natural gas compressor stations plus technological losses, including gas lost during repair work.

Our pipeline system transports natural gas principally from large western Siberian fields westward toward the more heavily populated regions of Russia, certain FSU countries, central and eastern Europe and western Europe. Other parts of the pipeline system originate in the natural gas fields of the southern Russia-Volga region, including the Orenburgskoye and Astrakhanskoye fields. Several large pipeline systems enter Russia from Kazakhstan, transporting natural gas from fields in Turkmenistan, Uzbekistan and Kazakhstan.

All of the natural gas we export to Europe (except Finland) is transported outside of Russia through pipelines maintained by other countries, primarily Ukraine. We pay transit fees for the use of these pipelines. The negotiations of these fees and access to these pipelines are important elements of our export business. Transit fees are a significant element of the natural gas price to end users in Europe. See "Business—Marketing."

Natural gas is transported to the western, central and eastern European markets through the system of trunk pipelines from Urengoi to Uzhgorod (Urengoi—Uzhgorod, Urengoi—Center, Yamburg—Yelets, Progress) and from Nadym to Ivatsevichi (Nadym—Poonga, Poonga—Vyktyl-Ukhta, Ukhta—Torzhok, Torzhok—Minsk—Ivatsevichi).

*Third-party Access to the UGSS*

Since 1998, independent Russian suppliers have been granted non-discriminatory access to existing UGSS capacity. We provide independent suppliers with access to the UGSS subject to the following requirements:

- availability of spare transport capacity for the time period proposed by the independent supplier;
- quality and technical parameters of the natural gas supplies;
- availability of input connections from suppliers and output connections to consumers and natural gas recovery and quality control stations; and
- availability of natural gas supplies and relevant customer demand for the proposed time period.

In 2001, a total of 24 independent gas suppliers, with a cumulative volume of gas transported of approximately 81.3 bcm, or 12.9% of the total volume of gas transported through the UGSS, had access to our transportation system. Itera was the largest third-party user of the UGSS in 2001.

Tariffs charged to unaffiliated third parties for the transportation of natural gas through our trunk pipelines are established by the Federal Energy Commission and have recently been adjusted for fluctuations in the level of regulated wholesale prices for natural gas (which are also established by the Federal Energy Commission).

Tariffs charged to unaffiliated third parties for the transportation of Russian natural gas as of August 1, 2002 are set forth below:

- RR13.8 per mcm per 100 km (not including VAT) for consumers located within the customs territory of the Russian Federation and member states of the Customs Union Agreement (Kazakhstan, Kyrgyzstan, Tajikistan, Belarus and Russia);
- U.S.\$0.92 per mcm per 100 km (not including VAT) to be paid in RR at the exchange rate of the Central Bank of the Russian Federation as of the date of payment for consumers located outside the customs territory of the Russian Federation and member states of the Customs Union Agreement.

Tariffs charged for the transportation of gas from Central Asia are unregulated.

Our gas transport sales were RR11.9 billion and RR12.8 billion for the nine months ended September 30, 2002 and 2001, respectively, and RR17.5 billion for the year ended 2001. Most of the third-party natural gas we transported through the UGSS during this period was for Itera and was transported under U.S. dollar-denominated contracts. A significant portion of this gas was sourced from Central Asia, and thus the tariffs were unregulated.

In November 2002 we entered into a strategic partnership agreement with LUKOIL, which produces natural gas at fields in western Siberia that are located close to our major natural gas fields. The agreement provides, *inter alia*, for cooperation in oil and gas projects in Russia and other countries, such as Uzbekistan, Kazakhstan, Turkmenistan, Iran and Iraq. We have not yet undertaken any projects under this agreement. Two specific projects are, however, currently under consideration: the joint development of hydrocarbon structures in the Caspian Sea; and the transportation of hydrocarbons and condensate through our pipeline network. In the latter, LUKOIL intends to construct an approximately 160 km section of pipeline connecting its fields to our existing pipeline infrastructure in western Siberia and to transfer the pipeline to us in exchange for guaranteed access to our transportation network. The project would be completed in 2006.

#### *Organization of the Transportation Segment*

Our transportation segment is highly integrated to ensure reliable natural gas deliveries to distributors, export customers and consumers. The high level of integration of our pipeline network is achieved through the use of multiple and parallel pipelines, inter-connectors and underground storage facilities. We believe that within the past ten years there have been no significant supply interruptions to consumers, despite several pipeline failures, as a result of the use of available spare transportation capacity within the UGSS. The various sub-components that constitute our integrated pipeline system are described more fully below.

- *High pressure trunk pipeline.* Our high pressure trunk pipeline transports natural gas from production areas to refining facilities and natural gas consumers. The trunk pipeline consists of multiple parallel lines of large diameter pipes (defined as pipes with diameters of 1,420 mm, 1,220 mm or 1,020 mm). The total length of these large diameter trunk pipelines is 91,900 km.
- *Regional and local distribution.* On a regional basis, our specialized gas transportation subsidiaries and a number of our production subsidiaries that operate high pressure pipelines organize the transportation of natural gas. Our gas transportation subsidiaries are responsible for the operation and maintenance of high pressure pipelines and for the transit of natural gas to regional and local distribution companies or directly to industrial end consumers. Beginning in the late 1990s, we began acquiring interests through debt for equity swaps in regional gas distribution companies which had failed to pay for the gas we sold them. We currently have controlling interests in 89, and non-controlling interests in an additional 84, of the approximately 318 regional gas distribution companies in Russia. The regional gas distribution companies own and operate medium- and low-pressure pipelines that transport gas to end consumers.

- *Storage.* Currently we operate 23 underground storage facilities in Russia. By the beginning of the 2002/2003 heating season, we had stored 61.7 bcm of market-grade natural gas reserves in these facilities. We generally supply approximately 17% of the daily volume of natural gas consumed in Russia during the heating season from these facilities, and up to 25% of the daily volume on extremely cold days. We are currently constructing four new underground gas storage facilities. Aggregate investment in storage facilities in 2001, including operational drilling, amounted to RR2.8 billion. In 2002, we arranged under previously concluded storage lease contracts for the storage of Russian natural gas supplies for the autumn and winter season of 2002/2003 in underground storage facilities in Ukraine, Germany and Latvia of 4.3 bcm, 2.5 bcm and 2.1 bcm of natural gas, respectively.

#### *Age and Maintenance*

While construction of our gas pipeline system commenced 57 years ago with the first Saratov-Moscow pipeline, most of our gas pipeline system was constructed from 1970 to 1990. The age of the pipeline system, as of September 30, 2002, is shown in the table below:

<u>Years Since Construction</u>	<u>Length</u> (km)	<u>%</u>
Up to 10 years .....	34,100	22
11-20 years .....	63,550	41
21-33 years .....	35,650	23
Over 33 years .....	21,700	14
Total .....	<u>155,000</u>	<u>100</u>

We carry out annual capital repairs and preventative maintenance to improve the efficiency of gas distribution, the reliability of gas supply and technological and environmental safety. Maintenance work is preceded by gas pipeline inspections achieved through various means. In 2001, we inspected approximately 11,300 km of pipelines with in-the-pipe probes, while we checked approximately 40,000 km of trunk gas lines using electric measurements. As a result of these diagnostic checks, we undertook repairs to approximately 1,111 km of pipelines and 251 underwater crossings. As a result of such pipeline repairs and an improvement in the technology of our pipeline, the incidence of faults that involve interruptions or restrictions of gas supply dropped from 0.58 per 1,000 km of pipelines in 1985 to 0.19 per 1,000 km in 2001.

Under the auspices of the European Bank of Reconstruction and Development ("EBRD"), 13 western European companies in conjunction with our specialists conducted a two-year study of the UGSS between 1993 and 1995 to assess the system's condition and to formulate measures for improving its performance. The final report, which was based on an analysis of the operation of the UGSS in 1995, showed that, in most cases, the extensive branching structure of the UGSS, together with the availability of spare pipeline throughput capacity, enabled us to re-route or to increase natural gas flow in case of an emergency.

We are continually working to improve the UGSS. In 2002, we approved an investment program to refurbish a number of gas transportation facilities by year-end 2006. The main objectives of this program include:

- ensuring the supply of our projected volumes of gas, especially from the Nadym-Pur-Taz region, to both our domestic and export markets;
- ensuring the reliability of gas transportation and supply to gas consumers in Russia;
- improving industrial and ecological safety measures; and
- ensuring the efficiency of the transportation system through energy saving measures, optimizing our utilization of the system and lowering maintenance costs.

We anticipate that the program will require investments of RR230.6 billion from its inception in 2002 through 2006, of which RR155.7 billion or 67.5% will be spent on the restructuring of key technological facilities, such as compressor stations and pipelines, and RR74.9 billion or 32.5% on the restructuring of support systems facilities, such as our energy, water supply, communications and electrochemical protection infrastructure. For 2003, we have budgeted capital expenditures of RR93.2 billion on our transportation system, RR17.6 billion of which will be dedicated to refurbishment of compressor stations, existing pipelines and system-wide facilities, and the balance of which will be dedicated to the expansion of the pipeline system.

Since the commencement of this program in 2002, we have refurbished 53 gas pumping units and replaced 35 units. The new units have a total power output of 508 MW. The program has already allowed us to reduce our

hazardous emissions by 26,200 tons in 2000 as compared to 1999. This figure includes a reduction of carbon monoxide emissions by 4.7% and of nitric oxides emissions by 5.6%. We anticipate that by 2006, the program will increase our gas transportation throughput capacity in the UGSS by 15 bcm per year, increase our gas export throughput capacity by 5 bcm per year, decrease the UGSS internal use of gas by 5 bcm per year and decrease hazardous emissions, especially of nitric oxides, by 45,000 tons per year.

We outsource a significant amount of our pipeline construction work to third-party contractors through a tender process. Our tender committee awards contracts to the most competitive bidder. Stroytransgaz has been a successful bidder for a large number of our construction projects, due to the competitive terms that it has offered and its historical experience of successful cooperation with us. See "Certain Transactions."

### *International Projects and Alliances for Transportation*

#### *Blue Stream Project*

In alliance with ENI, we are constructing a new gas trunk pipeline from Russia under the Black Sea to Turkey. We estimate that annual volumes of natural gas exports along this pipeline will reach 16 bcm starting in 2010. The Italian engineering firm Saipem, partly owned by ENI, has laid the undersea pipeline, and initial gas flow through the pipeline commenced in December 2002.

In November 1998, we entered into a memorandum of understanding with ENI to participate on an equal basis in the Blue Stream Pipeline Company B.V., a special purpose vehicle for the construction, ownership and operation of a natural gas transportation system from Dzubga in Russia (including the nearby Beregovaya compressor station) to Samsun in Turkey (the "Offshore Section"). We and ENI each have a 50% stake in the Blue Stream Pipeline Company B.V., which will receive transportation proceeds for the gas transported through the Offshore Section, and we and ENI will share these proceeds in proportion to our respective ownership interests. This system will be connected to our existing pipeline network through a new pipeline running from Izobylnoye to Beregovaya (the "Onshore Section"). The Onshore Section and the Offshore Section together constitute the Blue Stream Project.

The pipeline from Russia to Turkey is approximately 760 km long, of which about 390 km runs under the Black Sea. The Onshore Section of the Blue Stream Project is connected to the existing Gazprom pipeline network through a pipeline from Frolovo to Izobylnoye, which was commissioned in 1998.

The total estimated construction cost of the Offshore and Onshore Sections of the Blue Stream Project is approximately U.S.\$3.3 billion. The value of the turnkey contract for the construction of the Offshore Section of the pipeline and the Beregovaya compressor station is approximately U.S.\$1.7 billion.

To arrange for our share of the third-party financing required for the Blue Stream Project, we and the Blue Stream Pipeline Company B.V. have entered into three loan agreements secured by export receivables with consortia of western European and Japanese banks. The total amount of financing provided by these facilities is U.S.\$1.760 billion. For these facilities, we act as borrower and/or as guarantor for the Blue Stream Pipeline Company B.V. The financing also benefits from guarantees provided by the national export credit agencies of the lending banks' respective countries. As of January 1, 2003, U.S.\$1.694 billion of this financing has been drawn. The remainder of the financing for the Offshore Section of the Blue Stream Project is covered by the various contributions of Gazprom, SNAM (ENI's subsidiary) and a U.S.\$866 million loan provided to the Blue Stream Pipeline Company B.V. under the guarantee of SNAM. Any additional financing required for the Onshore Section of the Blue Stream Project is our responsibility. In this regard, we received a euro 250 million loan in February 2001 from a consortium of international banks led by Bayerische Hypo-und Vereinsbank AG.

#### *The Yamal-Europe Pipeline Project*

We are proceeding with the Yamal-Europe project, which consists of constructing pipelines from our fields in western Siberia to Germany through Belarus and Poland. The purpose of the Yamal-Europe Project is to meet our contractual obligations to supply natural gas to Europe and to diversify export supplies. Connecting the Yamal-Europe pipeline to the existing natural gas transportation network in Germany will allow for the full integration of this pipeline into the European gas network.

The Yamal-Europe pipelines are being constructed in such a way that it will be possible to utilize some of the segments and pumping station capacity in connection with existing gas transportation facilities as market demands require before the entire system comes on line.

During the first stage of development, the pipeline will transport natural gas from existing and new fields of the Nadym-Pur-Taz region. In the future, gas will be supplied from the Bovanenskoye field on the Yamal Peninsula.

The projected annual capacity for the first trunk pipeline is approximately 32 bcm. We have budgeted capital investments through 2005 of U.S.\$2.1 billion for the construction of the portion of the pipeline from Torzhok, Russia to the Polish border.

In October 1999 the most important section of the first pipeline (approximately 1,230 km), connecting the compressor station Nesvizhskaya in Belarus to the German STEGAL pipeline and three compressor stations, became operational.

The completed facilities account for more than 50% of the pipeline's potential capacity. Gas supplies via the Yamal-Europe pipeline started on November 7, 1999. In 2000 and 2001, 13.8 bcm and 15.5 bcm of natural gas, respectively, were transported through the pipeline. The German section of the pipeline is owned by WINGAS, our joint venture with Wintershall. The Polish section is owned by EuRoPol GAZ, a joint venture in which we participate with PGNiG S.A. (the 100% state-owned Polish gas company), and Gaztrading (a Polish company involved in natural gas trading).

Completion of the remaining pipeline section within Belarus is expected to take place in 2003. In addition, we expect to complete construction of the gas lines of the pipeline from Torzhok, Russia to the Belarus border in 2003-2004. Torzhok is a key pipeline junction north of Moscow where several of our trunk pipelines converge.

We are deciding, based on demand for natural gas in western Europe and the economic efficiency of exporting gas in this manner whether to construct a second Yamal-Europe trunk pipeline.

#### *North European Pipeline Project*

We are currently in the early stages of a pipeline project that would connect our pipelines in northern European Russia with the German pipeline system via the Baltic Sea. The pipeline would have an annual capacity of about 20 bcm of natural gas in a single-line configuration and would be 1,189 km long, and would run from Vyborg, Russia to Greifswald, Germany. We anticipate that construction of the pipeline will take approximately four years to complete once implementation of the plan has commenced. The anticipated cost of constructing the north European pipeline is about U.S.\$3 billion. The pipeline will not transit any countries other than Germany and Russia and will thus avoid the political and economic risks related to the reliability of transit deliveries through third countries. The EU has designated the project a high priority European project in the Trans-European Gas Network, which is expected to help us secure long-term financing for the project. Major oil and gas companies such as Fortum Group, Ruhrgaz, Wintershall, Gazunie Shell, Norsk Hydro, TotalFinaElf and BP have expressed interest in partnering with us on this project and we are currently considering various financing arrangements, including loan financing.

#### *UK Interconnector Pipeline*

In 1994, we acquired a 10% stake in the Interconnector pipeline, a pipeline connecting Belgium and the UK that allows for gas flow in both directions. As a result of our 10% stake, our current annual quotas in the Interconnector pipeline are 2 bcm of natural gas from the UK to continental Europe and 0.85 bcm of natural gas from continental Europe to the UK. Beginning in 2005, we expect throughput to the UK via the Interconnector pipeline to increase in conjunction with an anticipated increase in natural gas imports by the UK. We have applied to participate in the capacity expansion, as a result of which our annual quota in the Continental Europe to UK direction of the Interconnector pipeline would increase to 2.2 bcm.

#### *West-East Project in China*

On July 4, 2002, together with Shell and Exxon/Mobil, we signed a framework agreement with Petro China on creating a joint venture on the west-east pipeline project in China. The project envisages the production of natural gas in the Sintszyan-Uigur region in China, the construction of a pipeline of approximately 4,000 km in length to Shanghai and the sale of gas in the eastern Chinese market.

The parties are in the process of negotiating the terms of the joint venture on the construction and operation of the pipeline as well as on the conclusion of gas production sharing agreements and on the establishment of a unified trading company responsible for gas sales to consumers. Negotiations are due to be completed by the second quarter of 2003.

### *Transbalkan Pipeline Project*

We are evaluating the possibility of increasing and diversifying our gas transportation routes to the Balkan states and Turkey. To increase natural gas supplies to the Balkan states, we are working in association with various national companies on the expansion and modernization of the existing pipeline network in Ukraine, Romania and Bulgaria.

Gastransit, a joint Russian-Ukrainian-Turkish venture in which we have a 37% direct stake and an indirect stake through our 45% interest in Turusgaz, is gradually implementing the expansion of transit capacities within Ukraine providing for the construction of a gas pipeline and a compressor station. A compressor station at Tarutino within the operating transit gas pipeline Ananiev-Tiraspol-Izmail was put into operation in 2001. The compressor station was constructed with the use of an EBRD loan and equity funds of shareholders (including Gazprom funds in the amount of U.S.\$9.62 million). At present, the next phase of the project is being constructed with the use of an additional EBRD loan and, subordinated to it, loans from Gastransit shareholders (including Gazprom funds in the amount of U.S.\$8.1 million). This phase consists of the construction of loopings within the Ananiev-Tiraspol-Izmail gas pipeline. The construction and expansion of transit capacities within Bulgaria has been largely completed and construction in Romania is planned to be completed in the first quarter of 2003. The construction was carried out with Romanian and Bulgarian funds and a commodities credit from Gazprom.

This project will increase the throughput of the pipelines at the border with Turkey to up to 14 bcm per year and ensure contractual volumes of supply of Russian gas to the Balkan countries and Turkey.

### *Cooperation with Wintershall*

In 1990, we entered into a long-term cooperation agreement with Wintershall AG (a wholly-owned subsidiary of BASF), on the basis of which we established WINGAS. In compliance with this agreement a joint venture, WINGAS was organized in 1993. We hold a 35% and Wintershall holds a 65% stake. WINGAS has participated in the construction of and owns the following system of trunk pipelines:

*STEGAL Pipeline.* The STEGAL gas pipeline was completed in 1992. The pipeline is 323 km long and has a design capacity of 12 bcm per year. It passes through Germany and connects the MIDAL gas pipeline with the Czech natural gas pipeline system.

*MIDAL Pipeline.* Built in 1993, the MIDAL Pipeline has a total length of 642 km. Its capacity is 13 bcm per year. It goes through the territory of Germany and connects a natural gas storage facility at Emden (on the border with Holland) with a BASF chemical plant in Ludwigshafen.

*WEDAL Pipeline.* The 314 km WEDAL pipeline became operational at the end of 1998, linking the WINGAS pipeline network with the Belgian pipeline system and the Interconnector pipeline, in which we have a 10% interest, which links the UK gas transportation system to the continent. Initially, the WEDAL pipeline was designed to transport UK gas under contracts between WINGAS, British Gas and Conoco and to provide WINGAS with a secure supply of gas from diverse transportation sources. Gas supplies from continental Europe to the UK may also be carried through the Interconnector pipeline.

*YAGAL Pipeline.* At the end of 1999, a 340 km pipeline, known as the YAGAL pipeline, with a design capacity of 29 bcm per year was put into operation. This pipeline connects the Yamal-Europe pipeline with the STEGAL pipeline. The completion of this pipeline enabled us to expand our supplies of natural gas to European countries and improved the reliability and flexibility of supplies of Russian natural gas to the European market.

### **Refining**

Our refining operations consist of the operations of our principal wholly owned refining facilities and our majority owned subsidiary Sibur, which substantially increased its operations only in the third quarter of 2002 after reaching an amicable agreement with its creditors and emerging from external supervision.

Our wholly owned refining facilities process natural gas for pipeline transportation, stabilize gas condensate and refine natural gas, gas condensate and crude oil into refined products. The processing, stabilizing and refining of natural gas, gas condensate and crude oil is carried out by six integrated refineries that remove hazardous and corrosive substances from natural gas and gas condensate and produce a broad range of products. In 2001, we processed and refined 34.6 bcm of natural gas and refined 10.1 million tons (74.0 mmbbls) of gas condensate and crude oil, compared to 35.3 bcm of natural gas, 9.3 million tons (68.2 mmbbls) of gas condensate and crude oil, for a total volume of 276.0 mmbbls in 2000. During the nine months ended September 30, 2002, we refined 25.1 bcm of natural gas, 7.5 million tons (55.0 mmbbls) of gas condensate and crude oil, for a total volume of 202.7 mtoe, as compared with 25.9 bcm of natural gas, 7.5 million tons (55.0 mmbbls) of gas condensate and crude oil, for a total volume of 207.4 mmbbls in the nine months ended September 30, 2001.

Our total annual processing and refining capacity as of December 31, 2001 was 49.5 bcm of natural gas and 20.8 million tons (152.5 mmbbls) of gas condensate and crude oil. We sell our refined products domestically and in the FSU and Europe. Our refineries provided approximately 4.3% and 3.2% of the automobile gasoline and diesel fuel, respectively, produced in Russia in 2001.

We operate our refining segment through Astrakhangazprom, Orenburggazprom, Severgazprom, Surgutgazprom and Urengoigazprom, which are wholly-owned subsidiaries that combine refining with either production or transportation. As of January 1, 2003, we have centralized our refining segment and we now hold all of our refinery assets at the head office level. We have also discontinued the practice of selling our raw products to and then purchasing refined products from the refineries in favor of paying a fee to our refineries for the services they provide. We expect that these changes will result in considerable tax savings and the centralization of our cash flows.

Our natural gas and gas condensate refineries are sophisticated plants that combine chemical facilities with petroleum processing and refining facilities. Each of our refineries is directly linked to gas or gas condensate fields and constitutes a single technologically-related complex, the principal function of which is to process natural gas for transportation via our trunk pipelines. Our refineries produce such products as dry market-grade natural gas, stabilized gas condensate, liquefied natural gas, technical carbon and motor gasoline from natural gas and gas condensate. Some of our plants have implemented unique technologies for treating natural gas with a high sulfur content (the Astrakhan plant treats natural gas with hydrogen sulfide and carbon dioxide content of 15-25%), and produce odorants, technical carbon and gaseous and helium.

We plan to increase our production of gas condensate and crude oil and more fully utilize our excess processing and refining capacity, both through our majority-owned subsidiary Sibur and by partnering with western oil companies to further develop certain of our gas condensate fields. See "Business—Reserves and Production—Projects and Alliances in Reserves and Production." We also plan to increase the volume of refined products we produce. For example, we plan to increase our annual production of automobile gasoline and jet fuel to 2.3 million tons (16.9 mmbbls) and 240 thousand tons (1.8 mmbbls), respectively, over the next three years.

Over the next three years, we plan to invest RR38 billion (U.S.\$ 1.2 billion) to reconstruct and refurbish equipment at our natural gas and gas condensate refineries. We anticipate that these refurbishments will increase our refining capacity to 52.5 bcm of natural gas per year by 2005. We also intend to increase the amount of gas condensate and crude oil we refine to 11.2 million tons (82.1 mmbbls) per year by 2005 by increasing the capacity of refinery facilities that have extra feedstock available. We also anticipate increasing the initial processing of gas condensate and crude oil to 6.6 million tons (48.4 mmbbls) per year by 2005.

The following are our major refineries:

*Astrakhan Gas Refinery.* This refinery is operated by our subsidiary Astrakhangazprom. It is an integrated refinery, the first stage of which came on-stream in 1986 and the second in 1997. The Astrakhan Gas Refinery processes natural gas with a high sulfur content and gas condensate extracted from the Astrakhan gas condensate field and it receives all of its feedstock from this field. The plant comprises two lines, with a total annual capacity of 10.5 bcm of processed natural gas and an annual gas condensate stabilization capacity of 7.3 million tons (53.5 mmbbls). In 2001, the refinery processed 10.5 bcm of our natural gas and 3.7 million tons (27.1 mmbbls) of our unstable gas condensate. The refinery's products include dry market-grade natural gas that is fed into trunk pipelines; natural gas-derived sulfur; motor gasoline; diesel; furnace fuel oil; and industrial-grade propane/butane mixture. All of the refinery's products were sold domestically in 2001. As part of our strategy to deepen our feedstock processing, we plan to build polyethylene production facilities that will enhance the overall efficiency of the Astrakhan refinery. We plan to invest RR20.3 billion through 2005 to develop and refurbish this refinery.

*Orenburg Gas Refinery.* This facility is operated by our subsidiary Orenburggazprom, and forms part of the integrated Orenburg Gas Chemical Complex, which also includes the Orenburg Helium Plant. It came on-stream in 1974 and is one of the world's largest gas refineries. It processes natural gas with a high sulfur content and gas condensate. The refinery has an annual capacity of 37.5 bcm of natural gas and a capacity of 3 million tons (30.0 mmbbls) of gas condensate per year. In 2001 the refinery processed 22.8 bcm of our natural gas and 550 thousand tons (4.0 mmbbls) of our gas condensate and crude oil. The refinery's products include dry market-grade natural gas; stabilized gas condensate; liquefied natural gas; multi-component hydrocarbon distillate (MHD); natural gas-derived sulfur; and odorants.

*Orenburg Helium Plant.* This facility is operated by our subsidiary Orenburggazprom, and is Russia's largest producer of helium. The first stage of the plant came on-stream in 1974, the second in 1975 and the third in 1978. The refinery has an annual capacity of 15 bcm of natural gas and it processed 13.9 bcm of our natural gas in 2001. The plant's products include dry market-grade natural gas; gaseous and liquefied helium; ethane; multi-component hydrocarbon distillate (MHD); and liquefied natural gas. All of the plant's refined products were sold domestically in 2001. We plan to invest RR11.2 billion through 2005 into developing and refurbishing this processing complex.

*Sosnogorsky Gas Refinery.* This refinery is operated by our subsidiary Severgazprom. It came on-stream in 1946 and has an annual capacity of 1.5 bcm of natural gas and 1.25 million tons (9.2 mmbbls) of unstable gas condensate per year. In 2001, the refinery processed 1.4 bcm of our natural gas and 370 thousand tons (2.7 mmbbls) of our gas condensate and crude oil in 2001. The refinery's products include dry market-grade natural gas; liquefied natural gas; stabilized gas condensate; motor gasoline; and technical carbon. In 2001, the refinery exported 47.2% and 48.5% of the stable gas condensate and liquefied gas, respectively, that it refined. The rest of the refinery's output was sold domestically. Over the past three years, the refinery has been refurbished both with internally generated funds from our refining subsidiary Severgazprom and with borrowings in the amount of euro 108 million which was used for the reconstruction of the refinery's gas refining facilities. We plan to invest RR549.4 million through 2005 for the reconstruction of the refinery's facilities. We anticipate that these projects will enable us to significantly increase the depth of feedstock processing and the percentage of liquefied gas, such as propane and butane, that we can extract from natural gas.

Our western Siberian processing and refining complex comprises two facilities, the Urengoi Condensate Preparation Plant and the Surgut Condensate Stabilization Plant.

*Urengoi Condensate Preparation Plant.* This plant is operated by our subsidiary Urengoigazprom. The first stage of this plant came on-stream in 1985 and the second in 2001. The plant's main function is to process feedstock for the Surgut Condensate Stabilization Plant. The annual capacity of the plant is 6 million tons (44.0 mmbbls) of gas condensate and it had a throughput of 4.9 million tons (35.9 mmbbls) of our gas condensate in 2001, in addition to gas condensate from third parties. The plant's products include de-ethanized gas condensate (which is used as feedstock for the Surgut Condensate Stabilization Plant); motor gasoline; and diesel fuel. We have budgeted investments of RR700 million through 2005 for an overhaul of the facility.

*Surgut Condensate Stabilization Plant.* This plant is operated by our subsidiary Surgutgazprom and is one of the world's largest processing and refining complexes. It processes a crude oil and gas condensate mixture produced from the western Siberian fields and came on-stream in 1985. It has an annual capacity of approximately 8 million tons (58.6 mmbbls) of gas condensate and had a throughput of 3.6 million tons (26.4 mmbbls) of our gas condensate in 2001, in addition to a significant quantity of gas condensate from third parties. The refinery's products include stabilized condensate; motor gasoline; and diesel fuel; liquefied gases; and pentane-hexane fraction. In 2001, 14.1% and 4.5% of the plant's stable gas condensate output and liquefied gas output, respectively, were exported.

The Surgut Condensate Stabilization Plant is currently operating at close to full capacity, while the Urengoi Condensate Preparation Plant, which provides it with its feedstock, is working under its capacity. A bottleneck may occur at the refinery in the next several years as more independent producers utilize the Surgut Condensate Stabilization Plant. To mitigate this risk, we have budgeted investment expenditures of RR1.6 billion through 2005 to further develop the capacity of the Surgut Condensate Stabilization facility.

The table below sets forth data on our six refining plants and the volume amounts of key products which we produced in 2001:

	Astrakhan Gas Refinery	Orenburg Gas Refinery	Orenburg Helium Plant	Sosnogorsky Gas Refinery	Urengoi Condensate Preparation Plant	Surgut Condensate Stabilization Plant	Total <sup>(1)</sup>
<b>Year built</b> .....	1986	1974	1974	1946	1985	1985	
<b>Raw material processing:</b>							
Gas processing (bcm) ....	10.49	22.78	13.87	1.38	0	0	34.68 <sup>(2)</sup>
Primary processing of gas condensate and crude oil (mmbbl) .....	26.97	4.03	0	2.71	39.99	26.60	74.00 <sup>(3)</sup>
<b>Initial processing of gas condensate and oil (mmbbls):</b>	16.79	0	0	0	3.25	15.82	35.86
<b>Post-process product:</b>							
Dry natural gas (bcm) ....	5.28	0	20.72	1.07	0	0	27.07
Liquefied natural gas (thousand tons) .....	252	721	0	125	32	981	2,111
Ethane (thousand tons) ....	0	0	286	0	0	0	286
Stable condensate (thousand tons) .....	451	573	0	227	465	674	2,390
Gasoline (thousand tons) ..	959	0	0	0	17	209	1,185

Note:

- (1) Totals may not add due to rounding.
- (2) Total does not add because 13.87 bcm of natural gas initially processed at the Orenburg Gas Refinery is thereafter further processed at the Orenburg Helium Plant. Although this amount is processed by both facilities, it is counted only once in the total.
- (3) Total does not add because 26.60 mmbbls of gas condensate and crude oil initially processed at the Urengoi Condensate Preparation Plant is thereafter further refined at the Surgut Condensate Stabilization Plant. Although this amount is processed by both facilities, it is counted only once in the total.

### Sibur

We acquired 51% of the voting shares of Sibur in January 2001. Sibur is a leading seller of petrochemical products in Russia and is also involved in light hydrocarbon processing. In 2001, Sibur had a throughput of 11.8 bcm of natural gas and processed 5.5 million tons of hydrocarbon feedstock.

Sibur owns, through various subsidiaries, and operates a number of natural gas processing and refining plants in western Siberia and Perm and is a market leader in refined hydrocarbon products.

In the first quarter of 2002 external supervision of Sibur was introduced as a result of proceedings initiated by us and approved under decision of the arbitration court. In September 2002, Sibur reached an amicable settlement agreement with its creditors, which was subsequently approved by an arbitration court. We are actively seeking to restructure Sibur's debt.

Sibur sells synthetic rubber, polymers, monomers, condensed gases and tires, among other products, on the domestic and export markets. Sibur receives most of its export revenues in fully convertible currency. Sibur's three largest export markets are China, Finland and the Baltic States. We are exploring the expansion of Sibur's

exports to the Chinese market, which we estimate comprises about 15% of the international market for refined hydrocarbon products. Feedstock for the increase in refining output that such an expansion into the Chinese market would entail is anticipated to come from both Russia and the Middle East.

We plan to restructure Sibur to create a vertically integrated refining company that will engage in the full cycle of natural gas processing and manufacturing, ranging from the production of natural gas and liquid hydrocarbons to the processing of natural gas for transportation to the production of complex refined petroleum products such as tire rubber. Through 2010, we intend to focus on restructuring the indebtedness of the Sibur Group, improving Sibur's financial management and investing in Sibur's production facilities, many of which require renovation.

We intend to make capital expenditures in cost reduction projects related to Sibur of RR5 billion through 2010, such as improving internal power generation at Sibur's facilities; RR4.5 billion for the modernization of Sibur's natural gas processing infrastructure; RR14.7 billion for exploration and gas production projects to help us realize our target of producing 1.2 bcm of natural gas a year and 2 million tons of liquid hydrocarbons per year through joint ventures between Sibur and our production subsidiaries; and RR15 billion for the development of our refining operations. We intend to finance these expenditures with borrowings and through the formation of joint ventures with Russian and foreign partners.

#### *International Projects and Alliances in Refining*

##### *Novy Urengoi Chemical Complex*

The technical plan for the Novy Urengoi Chemical Complex was designed in cooperation with Salzgitter Anlagenbau and Linde, with some BASF participation. Most of the equipment necessary to build the Novy Urengoi Chemical Complex in western Siberia was delivered in 1997.

The Novy Urengoi Chemical Complex will process 1.62 million tons of de-ethanized natural gas per year, yielding 340 thousand tons of ethylene to be used as feedstock for 300 thousand tons of high pressure polyethylene. Other products will include 280 thousand tons of long distillate of light hydrocarbons, as well as up to 920 thousand tons of annual methane gas production. A loan agreement to finance this project is currently being negotiated.

#### **Marketing**

We are the world's largest exporter of natural gas. We export natural gas (as well as gas condensate, crude oil, oil products and liquefied natural gas) through our wholly-owned subsidiary, Gazexport. We also sell these products domestically to industrial consumers, to regional gas distribution companies and, through our own regional gas distribution companies, to other end consumers. In 2001, our sales of natural gas to Europe (net of excise tax) were RR390,594 million; our sales of natural gas to the FSU (net of excise tax and VAT) were RR47,190 million; and our sales of natural gas in Russia (net of excise tax and VAT) were RR125,099 million.

We are currently the only supplier of Russian natural gas to Europe. We exported to Europe approximately 24.8% of the natural gas we produced in 2001. Our exports to Europe also accounted for approximately 27.2% of the volume of natural gas we sold in 2001 and for 69.4% of our net gas sales. We supplied 20.2% of the natural gas consumed in western Europe and 58.9% of the natural gas consumed in central and eastern Europe in 2001 according to the CEDIGAZ—"Natural Gas in the World—2001," Survey August 2002. In 2001, we delivered 127.0 bcm of natural gas to Europe, of which western Europe accounted for 86.6 bcm and central and eastern Europe for 40.4 bcm. Germany, Italy, Turkey and France were our largest export markets in Europe. We are actively seeking to increase our European export efficiency and have entered into various joint ventures abroad, such as WINGAS in Germany and Gasym in Finland. See "—International Projects and Alliances in Marketing." These joint ventures allow us to capture a margin from sales further down stream in the markets we serve in addition to receiving export proceeds from deliveries at the borders of the markets we serve.

In 2001, we supplied substantially all of the natural gas consumed in Russia and approximately 50% of the natural gas consumed in six FSU countries, Ukraine, Belarus, Moldova, Lithuania, Latvia and Estonia. Natural gas deliveries to consumers in Russia and to countries in these six FSU countries totaled 300.8 bcm and 39.6 bcm of natural gas in 2001, respectively. Ukraine and Belarus are the largest consumers of the natural gas we supply to the FSU.

The following table sets out by volume our natural gas deliveries by geographical market for the periods indicated:

Gas Deliveries	Nine months ended September 30,		Year Ended December 31,		
	2002 (bcm)	2001 (bcm)	2001 (bcm)	2000 (bcm)	1999 (bcm)

Total Russia and FSU .....					
Total .....	326.3	326.9	467.4	479.0	486.2

### The Natural Gas Market

Natural gas is gaining an increasing share of the world energy market because it is an effective and environmentally clean fuel. According to the BP Statistical Review of World Energy (June 2002) (the "BP Review"), natural gas consumption, as a percentage of energy consumption in western Europe, has increased in recent years and we expect this trend to continue. This is primarily due to the growth in natural gas-fired power generating capacity, an increase in the use of natural gas in the domestic sector (particularly in central and eastern Europe), a decline in the attractiveness of nuclear power, and environmental considerations (which have reduced the attractiveness of fuels such as coal). In 2001, natural gas consumption accounted for approximately 22.4% of energy consumption in western Europe and approximately 23.5% in central and eastern Europe.

The following table sets forth primary energy and natural gas consumption in our principal markets for the period from 1991 to 2001 as well as the percentage of natural gas consumed as a proportion of primary energy consumption in such markets for each year:

	2001	1996	1991
	(mtoe, except for percentages)		
<b>Western Europe<sup>(1)</sup></b>			
Energy consumption <sup>(2)</sup> .....	1624.7	1542.5	1459.3
Gas consumption .....	363.8	315.9	245.8
Gas consumption as a percentage of primary energy consumption <sup>(3)</sup> .....	22.4%	20.5%	16.8%
<b>Central and Eastern Europe<sup>(4)</sup></b>			
Energy consumption .....	228.7	257.0	263.5
Gas consumption .....	53.7	59.2	53.5
Gas consumption as a percentage of energy consumption .....	23.5%	23.0%	20.3%
<b>FSU</b>			
Energy consumption .....	306.4	313.8	513.1
Gas consumption .....	158.2	156.7	211.0
Gas consumption as a percentage of energy consumption .....	51.6%	49.9%	41.1%
<b>Russia</b>			
Energy consumption .....	643.0	647.2	862.2
Gas consumption .....	335.4	341.9	388.0
Gas consumption as a percentage of energy consumption .....	52.2%	52.8%	45.0%

Source: BP Statistical Review of World Energy (June 2002).

#### Notes:

- (1) Defined for the purposes of this summary as the following countries: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Luxembourg, Republic of Ireland, Italy, The Netherlands, Norway, Portugal, Spain, Switzerland, Sweden, Turkey and the United Kingdom.
- (2) Energy consumption comprises commercially traded fuels only.
- (3) Oil, gas, nuclear, hydroelectric and coal.
- (4) Defined for the purposes of this summary as the following countries: Bulgaria, Czech Republic, Hungary, Poland, Romania and Slovakia.

According to the BP Review, natural gas consumption in western Europe represented 16.8% of worldwide natural gas consumption in 2001. In the period from 1991 through 2001, the proportion of natural gas to primary energy consumption in western Europe rose from 16.8% to 22.4%. According to the International Energy Agency, this trend is expected to continue.

### *Europe*

In 2001, we delivered 127.0 bcm of natural gas to Europe (compared to 129.0 bcm in 2000). According to our preliminary estimates, we exported approximately 129 bcm of natural gas to Europe in 2002. In 2003 we expect to increase our exports to Europe to 134 bcm.

We export natural gas to Europe mostly pursuant to long-term contracts, which generally include the following terms:

- price-setting mechanisms that are based on prices for competing energy sources such as oil products and to some extent coal;
- price adjustment clauses pursuant to which the formulae for determining the price of natural gas under the contracts can be reviewed and adjusted once every three years if market conditions have changed;
- clauses that prevent unilateral termination except in instances of prolonged force majeure;
- extension clauses which provide for the automatic extension of the contract upon expiration unless one of the parties objects; and
- “take-or-pay” provisions that provide (i) that off-takers who have purchased less than the minimum contracted-for annual volume of natural gas at year’s end are required to pay for some portion (but generally not all) of the amount of natural gas that constitutes the shortfall and (ii) that this payment is credited to the off-taker if, in a subsequent year, the off-taker purchases more than the minimum contracted for volume of natural gas.

Certain of our contracts contain “destination clauses” that prohibit the re-export of Russian natural gas by the importer. We received a request for information from the European Commission with respect to these clauses in our contracts with Italian utilities. We are currently engaged in a dialogue with the European Commission regarding these clauses. The European Commission’s original position was that the inclusion of destination clauses violated EU law. During the course of discussions, the European Commission modified its position and recognized the need to find alternatives to destination clauses that are economically viable for suppliers of natural gas. We have found such a solution with ENI and are negotiating alternatives with various other off-takers.

During the next ten years, beginning mainly in 2008, export contracts accounting for over one third of the volume of natural gas we currently export to Europe will expire. Close to half of these volumes are under contracts that will expire in 2012.

We believe that our contracts which are scheduled to expire will be renewed. We are currently negotiating for the extension of long-term contracts that expire between 2008 and 2012 with Ruhrgas, Gaz de France, OMV Group (“OMV”) and WIEH (a joint venture with Wintershall). These contracts relate to aggregate minimum natural gas volumes of approximately 29 bcm per year. Our new and extended contracts will not contain destination clauses. We are also currently renegotiating certain export contracts with Polish off-takers.

### Western Europe

In 2001, we exported 86.6 bcm of natural gas to western Europe (compared to 90.4 bcm in 2000), which represented 18.5% of our total natural gas sales volumes in 2001. According to our preliminary estimates, we exported 87.1 bcm of natural gas to western Europe in 2002.

The following table sets out our natural gas export volumes to western European countries for the periods indicated:

Country	For the nine months ended September 30,		For the year ended December 31,			
	2002	2001	2002 <sup>(1)</sup>	2001	2000	1999
	(bcm)	(bcm)	(bcm)	(bcm)	(bcm)	(bcm)
Austria .....	3.8	3.6	5.2	4.9	5.1	5.4
Finland .....	3.1	3.4	4.6	4.6	4.3	4.2
France .....	8.0	8.2	11.4	11.2	12.9	13.4
Germany .....	23.7	23.3	31.5	32.6	34.1	34.9
Greece .....	1.2	1.1	1.6	1.5	1.6	1.5
Italy .....	14.7	15.3	19.3	20.2	21.8	19.8
The Netherlands .....	1.0	0	1.4	0.1	0	0
Switzerland .....	0.2	0.2	0.3	0.3	0.4	0.4
Turkey .....	8.8	7.7	11.8	11.1	10.3	8.8
Total <sup>(1)</sup> .....	<u>64.5</u>	<u>62.8</u>	<u>87.1</u>	<u>86.6</u>	<u>90.4</u>	<u>88.4</u>

#### Notes:

(1) Figures presented for the year ended December 31, 2002 are preliminary estimates.

(2) Totals may not add due to rounding.

We have delivered natural gas to western Europe since the late 1960s, providing us with a significant amount of commercial experience in the region. Acting through Gazexport, we supply natural gas to our western European customers on the basis of long-term contracts, the initial terms of which are generally 20 years or longer. Outstanding long-term supply contracts with major western European customers have remaining terms of between six and 21 years.

Currently, our principal western European customers are Ruhrgas (Germany), ENI (Italy), Gaz de France Group (France), OMV (Austria) and Botas International Ltd. (Turkey) and our joint ventures in Germany: WINGAS, in which we have a 35% stake and WIEH, in which we have a 50% stake. We are paid in U.S. dollars and euro for the natural gas we sell in western Europe.

One of our most promising and fastest growing export markets is Turkey. According to statistics compiled by Botas, Turkey's state-owned gas company, natural gas consumption in Turkey amounted to approximately 16.0 bcm in 2001, of which our exports accounted for 11.1 bcm, or 69.4%, compared to consumption of approximately 14.6 bcm in 2000, of which our exports accounted for 10.3 bcm, or 69.9%. Our natural gas exports to Turkey are delivered via the Transbalkan Pipeline through Ukraine, Romania and Bulgaria, and we have recently completed and launched a pipeline under the Black Sea which will link Russia directly with the Turkish market. See "Business—Marketing—International Projects and Alliances in Marketing."

During recent years, we have negotiated a number of agreements which should result in increased exports to western Europe. In particular, between 1998 and 2000, we entered into new contracts with Gasunie (The Netherlands) for annual deliveries of up to 4 bcm (within the plateau period, or the period during which the maximum annual amount of gas is contracted for under the agreement) from 2001 through 2021; with WINGAS (Germany) for annual deliveries of up to 4 bcm (within the plateau period) from 1999 through 2023, plus an additional 1.8 bcm annually from 2000 through 2016; with Ruhrgas (Germany) for annual deliveries of up to 1.5 bcm from 2000 to 2010; and with Fragas (France) for annual deliveries of up to 2.0 bcm from 1999 through 2004. In addition, we have extended contracts with Ruhrgas for natural gas deliveries of up to 13 bcm a year through 2020. Because these contracts were renewed, there was no ramp-up period for deliveries to be made under the contracts and gas deliveries were at the plateau period from the renewal date for such contracts. In 2002, we used our allotted Interconnector capacity to the UK to sell approximately 0.73 bcm of natural gas in the UK market. In addition, we sold over 1 bcm of natural gas on the Belgian spot market. We intend to increase our sales on the UK and Belgian markets, in part by using our Interconnector pipeline capacity. Our future sales on these markets will, however, depend on market conditions (primarily prices) as well as the availability of transportation capacity and uncommitted natural gas.

Western European gas markets are undergoing significant restructuring, particularly the Gas Directive is to deregulate and liberalize the EU gas market by introducing greater competition into the market and reducing gas prices for the end-user. The Gas Directive seeks to accomplish these objectives by opening up transmission and distribution infrastructure to third parties and establishing fair tariffs for third-party use of natural gas transportation infrastructure and greater transparency of transportation and distribution costs by an unbundling of the accounts for gas transportation, distribution and storage. The Gas Directive will increase competition in European gas markets as a greater number of suppliers gain access to the natural gas infrastructure. See “— Competition—Western Europe.” In addition, the EU is currently considering initiatives (the so-called Prodi Initiatives) that seek to increase Russian natural gas imports to Europe over the next 15 years to meet the region’s future gas needs.

#### *Central and Eastern Europe*

We enjoy a dominant position in supply to the central and eastern European gas markets for historical, economic, political and geographic reasons.

In 2001, we exported 40.4 bcm of natural gas to central and eastern Europe, up from 38.6 bcm in 2000, which represented 8.6% of our total 2001 natural gas sales volumes. According to our preliminary estimates, we exported 41.4 bcm of natural gas to central and eastern Europe in 2002. We are paid in U.S. dollars for the natural gas we sell in central and eastern Europe.

The following table sets out natural gas export volumes to central and eastern European countries for the periods indicated:

<u>Country</u>	<u>For the nine months ended September 30,</u>		<u>For the year ended December 31,</u>			
	<u>2002</u>	<u>2001</u>	<u>2002<sup>(1)</sup></u>	<u>2001</u>	<u>2000</u>	<u>1999</u>

Total <sup>(2)</sup> .....	<u>30.4</u>	<u>29.1</u>	<u>41.4</u>	<u>40.5</u>	<u>38.6</u>	<u>38.3</u>

Notes:

(1) Figures presented for the year ended December 31, 2002 are preliminary estimates.

(2) Totals may not add due to rounding.

Prior to 1999, we had supplied a significant volume of our natural gas to central and eastern Europe under the Yamburg Inter-Governmental Agreements, which originally provided for the settlement of construction costs by the delivery of natural gas to certain countries in central and eastern Europe and the German Democratic Republic (now part of the Federal Republic of Germany). These Agreements expired in 1999. In the last four years, we have adopted a policy of negotiating medium-term and long-term contracts with our central and eastern European customers and gradually introducing western European contract terms into these contracts. Most of our central and eastern Europe export contracts now contain clauses similar to those discussed above. See “— Europe.”

We supply natural gas in central and eastern Europe to state-owned natural gas distribution companies and in certain countries to joint ventures in which we participate in gas marketing and distribution.

*The FSU*

Historically, we have had, and continue to have, a dominant position in the supply of natural gas to the FSU. In 2001, we exported to six countries of the FSU 39.6 bcm of natural gas compared to 42.3 bcm in 2000, which represented approximately 8.5% of our total 2001 natural gas sales volumes. Of the 39.6 bcm of natural gas exported, Ukraine accounted for approximately 56%. Our sales to the FSU are made in U.S. dollars.

The following table sets out our natural gas export volumes to FSU countries for the periods indicated.

Country	For the nine months ended September 30,		For the year ended December 31,		
	2002 (bcm)	2001 (bcm)	2001 (bcm)	2000 (bcm)	1999 (bcm)
Belarus .....	8.4	8.5	11.6	10.8	12.2
Estonia .....	0.4	0.4	0.7	0.6	0.5
Latvia .....	0.7	0.7	1.1	1.0	1.0
Lithuania .....	1.6	1.5	2.2	2.0	1.8
Moldova .....	1.5	1.4	2.2	1.8	2.1
Ukraine .....	19.4	16.5	22.0	26.1	29.5
Total <sup>(1)</sup> .....	<u>32.0</u>	<u>29.0</u>	<u>39.6</u>	<u>42.3</u>	<u>47.2</u>

Note:

(1) Totals may not add due to rounding.

Current annual contract prices for the natural gas we supply to FSU countries are higher than current Russian domestic prices but lower than the prices we realize on sales to Europe.

From 1999 to 2001, we limited our export supplies to certain FSU countries to avoid further exposure to non-paying customers. However, we expect these markets to recover. We plan to supply 49.5 bcm of natural gas annually to the FSU by 2005, decreasing to 45.8 bcm annually by 2010. In 2000, we signed long-term contracts with consumers in the Baltic States, which have historically maintained low levels of arrears, to supply 25.5 bcm of natural gas between 2000 and 2005.

Gas deliveries to Ukraine, Belarus and Moldova are made pursuant to contracts with the national natural gas companies Naftogaz Ukrainy, Beltransgaz and Moldovagaz, respectively. These contracts are negotiated annually pursuant to intergovernmental agreements. The contracts set out price parameters for the natural gas being sold and transit rates for natural gas through the relevant country. Sales to FSU countries are made directly by Gazprom.

Ukraine, our largest FSU customer, is traversed by major pipeline routes from the natural gas fields of western Siberia to export markets in Europe and is the source of substantial amounts of our industrial supplies, such as pipes and construction equipment. Currently, we are dependent on Ukraine for the transit of substantially all our natural gas sold in western Europe. We have entered into agreements which guarantee us access to the Ukrainian pipeline system, and in 2003, we are guaranteed access to 100 bcm of capacity in the Ukrainian pipeline system. However, the Yamal-Europe and Blue Stream pipelines, which are nearing completion, and the proposed North European pipeline under the Baltic Sea, will reduce our dependence on Ukraine for the transportation of natural gas to western Europe (including Turkey). See "Business—Transportation—International Projects and Alliances for Transportation." Moreover, Ukraine is dependent on us to meet its domestic natural gas requirements. This interdependence is taken into account in negotiations over a number of matters, including the terms of payment for natural gas supplied by us and transit fees charged by Ukraine.

On October 7, 2002, the Russian and Ukrainian governments signed an Agreement on Strategic Cooperation in the Gas Industry which envisions the creation of a consortium to manage and develop Ukraine's gas transportation system and to ensure reliable supplies to customers. Pursuant to this Agreement, we entered into an agreement in October 2002 with Naftogaz Ukrainy to create a joint venture which will upgrade and increase the capacity of the Ukrainian natural gas transportation network and ensure reliable transportation of natural gas across the Ukraine. Although the present joint venture plan envisions that we and Naftogaz Ukrainy would each have a 50% stake in the venture, we are exploring the possibility of including a western

European partner. It is expected that the constituent documents of the venture, which will be a Ukrainian company, will be registered in early 2003 and that the preliminary planning phase during which a contractor to oversee the pipeline will be chosen will be completed by August 2003.

The failure of a number of FSU customers to pay us for supplies of natural gas has resulted in substantial debts to us. As at September 30, 2002, natural gas with a sales value of more than U.S.\$2.23 billion (including VAT levied in Russia but excluding charges for late payment) had been supplied to customers in the FSU for which payment had not been received. All of the amounts owed were due from customers in Ukraine (U.S.\$1.458.9 million), Belarus (U.S.\$195.2 million) and Moldova (U.S.\$562.6 million), our largest natural gas markets in the FSU. Lithuania, Latvia and Estonia are the most reliable paying customers among the natural gas-consuming FSU countries. Since June 2000, in line with our policy to limit supplies to customers who do not pay for the gas we supply to them, deliveries of natural gas to Ukraine are in payment for our use of transit services through Ukraine only. Accordingly, no further debts for the non-payment of gas delivered to Ukraine have accrued since that time. In addition, we have recently concluded gas export agreements with Belarus which require all payments for deliveries of gas in 2003 to be made in cash.

We are also taking specific measures to reduce arrears for payments of natural gas owed by FSU customers. In 2000, Moldova restructured a portion of its debt to us by issuing U.S.\$90 million worth of sovereign notes with a repayment schedule over seven years. In 2001, our contribution of U.S.\$60 million into the charter capital of Moldova Gas was set off against indebtedness in relation to gas supplied in 1997. An amount of U.S.\$276 million owed by Ukraine was set off against delivery of military hardware to the Ministry of Defense of the Russian Federation. In consideration of this delivery of military hardware, we received tax credits in an amount equal to the amount owed to us by Ukraine. Towards the end of 2001, the Government signed agreements with the Cabinet of Ministers of Ukraine and with the Government of Moldova which provided for the restructuring of Ukraine's and Moldova's remaining debt for previously supplied natural gas in the amounts of U.S.\$1.4 billion and U.S.\$0.9 billion, respectively, although the restructuring arrangements with respect to Ukraine have not been finalized.

#### *Russia*

In 2001, we sold 300.8 bcm of natural gas, down from 307.7 bcm in 2000, in Russia. This represented 64.4% of our total natural gas sales volumes in 2001 and 83.7% of the natural gas supplied in Russia.

*Domestic Market Conditions.* According to our calculations, the share of natural gas as a percentage of the total volume of primary energy consumption in Russia increased from 42.1% in 1990 to 49.6% in 2000, while the share of crude oil consumption decreased from 28.9% in 1990 to 20.8% in 2000 and coal consumption from 20.1% in 1990 to 16.7% in 2000. The Government regulates natural gas prices but does not regulate the prices of crude oil or coal. As a result, the price of natural gas at the end of the year 2001 was approximately 65% of the price of power-generating coal and 30% of the price of fuel oil as referenced against one toe.

The result of the regulation of natural gas at below market prices has been a shift in Russia toward increased use of natural gas compared with other sources of energy. Russia has the world's most gas-intensive economy; in contrast to many other major industrial economies where gas is primarily used for household consumption, natural gas in Russia is used principally for electricity generation and in the metallurgical and chemical industries. We believe that electricity generation accounted for 38.6% of total natural gas consumption in Russia in 2001, while industrial users accounted for 32.4%, households consumed 14.5% and federal budget and municipal organizations accounted for 14.5%.

We have undertaken various initiatives to attempt to improve pricing in the domestic gas market. In February 1997, as a result of our initiatives, the Government adopted a decision whereby Russian industrial gas prices were split into three geographical zones in an attempt to reflect the different costs of shipping gas to market. Consumers further from a production field generally pay higher prices for natural gas. For example, the highest price bands include Stavropol Territory, the Rostov area and the Kaliningrad area, which are located far from our fields. A similar geographical division of gas prices was applied to gas for household consumption in October 1997. In December 1997 and July 1998, a further differentiation of gas prices took effect along six geographical zones for both household and industrial consumers. As of November 1999, gas prices are fixed for all customers along seven geographic price bands.

Wholesale prices for natural gas supplied to industrial consumers in the Russian Federation are higher than wholesale prices for natural gas supplied to household consumers. The following table sets forth the FEC regulated nominal wholesale natural gas prices for industrial consumers in the Russian Federation for the periods indicated in nominal RR per mcm (including excise tax but excluding VAT). The excise tax is approximately 15%.

<u>Price bands</u>	<u>From Nov. 1, 1999</u>	<u>From May 1, 2000</u>	<u>From Jan. 20, 2001</u>	<u>From Feb. 15, 2002</u>	<u>From July 1, 2002</u>	<u>From Jan. 1, 2003</u>

The total price paid by industrial consumers for natural gas includes the wholesale price, a transportation tariff and, since January 1, 2003, in certain cases a regional energy sales tariff. The wholesale price, which is established by the FEC, is paid to us, and covers the 15% excise tax. The transportation and energy sales tariffs, which are also established by the FEC, but which vary by region, are paid to the regional gas distribution companies that transport the gas through their medium- and low-pressure pipelines to the industrial consumers.

The following table sets forth the FEC regulated nominal wholesale gas prices for household consumers in the Russian Federation for the periods indicated in nominal RR per mcm (excluding VAT).

<u>Price bands</u>	<u>From Nov. 1, 1999</u>	<u>From May 1, 2000</u>	<u>From Mar. 1, 2001</u>	<u>From Feb. 15, 2002</u>	<u>From Aug. 1, 2002</u>	<u>From Feb. 1, 2003</u>

Weighted average .....	200	231	289	347	402	495

The total price paid by household consumers for natural gas is established by the regional authorities and covers the wholesale price, a transportation tariff and, in some regions, a regional energy sales tariff. In some cases, the total price may also cover a utilities or municipal maintenance fee. The wholesale price, which is established by the FEC, is paid to us. The transportation and energy sales tariffs, which are also established by the FEC, but which vary by region, are paid to the regional gas distribution companies that transport the gas through their medium- and low-pressure pipelines to the household consumers. The utilities and municipal maintenance fees, which represent the difference between the total price set by the regional authorities and the transportation and energy sales tariffs set by the FEC, are paid to the relevant municipal entities.

The pricing structure for household consumers is complicated by a variety of factors. These include multiple price sub-categories (for example, pensioners and war veterans pay discounted prices); the fact that a large proportion of residential gas is used by district heating systems to create heat; the inability of individual household consumers to regulate the heating in their apartments; the lack of metering devices on individual apartments (gas fees are generally included as part of the monthly rent); and the fact that certain customers cannot be cut off for non-payment because of legal and technical constraints.

We submitted to the Government a proposal for a gas price increase in 2003 of 40% for industrial consumers and 20% for household consumers. The Government increased gas prices by an average of 20% for the year 2003 for both industrial consumers and household consumers by raising the price of gas for industrial

consumers by 20% from January 1, 2003 and for household consumers by 23% from February 1, 2003. Wholesale prices for household consumers remain on average 28% lower than wholesale prices for industrial consumers.

The Government is currently considering a special resolution which would enable us to sell approximately 16 bcm of natural gas, or about 5% of the total amount of natural gas sold domestically in Russia, at unregulated market rates in 2003.

In accordance with Resolution of the Government of the Russian Federation No. 1021 dated December 29, 2000, "On Government Regulation of Gas Prices and Tariffs for Gas Transportation Services in the Territory of the Russian Federation" (the "Energy Strategy"), the Government intends ultimately to abandon state regulation of prices for natural gas delivered to end-consumers in favor of continuing to regulate tariffs for the natural gas transportation services we provide. As part of the development of the Energy Strategy of the Russian Federation by the Ministry of Energy, we have submitted our proposals with respect to reforming gas tariffs for the period until 2010.

*Domestic Sales.* We sell our products domestically through our wholly-owned subsidiary Mezhrefiongaz and its 43 majority-owned regional marketing subsidiaries to large industrial consumers, to regional gas distribution companies and to household consumers. Historically, Mezhrefiongaz sold natural gas to third-party regional gas distribution companies and to large industrial consumers. Beginning in the late 1990s, we began acquiring interests through debt for equity swaps in regional gas distribution companies which had failed to pay for the gas we sold them. We currently have controlling interests in 89, and non-controlling interests in an additional 84, of the approximately 318 regional gas distribution companies in Russia. The regional gas distribution companies own and operate medium- and low-pressure pipelines that transport gas to end consumers.

When we acquire controlling interests in the regional gas distribution companies, we are able to capture the transportation and regional energy sales tariffs that are payable to them in respect of the transportation services they provide as described above.

We are beginning to implement a strategy to streamline our domestic marketing operations.

One part of our strategy is to remove Mezhrefiongaz from the marketing chain, allowing us to sell gas directly through the approximately 43 majority-owned regional marketing subsidiaries. We believe that removing Mezhrefiongaz from the marketing chain will result in cost and tax savings and increase the efficiency of our marketing. Accordingly, we plan to reduce Mezhrefiongaz's current personnel of 320 by approximately 80%. Mezhrefiongaz will be reassigned primary responsibility to focus on coordinating the collection of receivables for gas deliveries that are currently outstanding and on the development of an electronic trading market for gas. The electronic trading market, currently intended as a spot market trading platform, should facilitate free market sales of natural gas by ourselves and independent producers with access to the UGSS by monitoring and matching supply, demand and adequate transportation capacity through to the point of demand.

Another part of our strategy is to remove from the marketing chain the regional gas distribution companies that we control. Currently, some of our regional gas distribution companies still buy gas from our marketing subsidiaries and market and sell it to end users. Our strategy is to have our 43 marketing subsidiaries contract directly with the customers of all the regional gas distribution companies that we control. We have begun to implement our strategy, and in more and more regions our marketing subsidiaries increasingly are contracting directly with and collecting payments directly from end consumers. Our regional gas distribution companies will continue to transport the gas we sell from our high-pressure pipelines through their medium- and low-pressure pipelines to the end consumers.

In the past several years, we have shifted from long-term domestic gas supply contracts with terms of up to 10 years (subject to annual delivery volume adjustments) to one year gas supply contracts with our industrial customers and regional gas distribution companies. These contracts require customers to make full payment (excluding any advanced deposits) for the natural gas they received on or before the 10th day of the month immediately following the month of delivery. They may contain penalty terms for late payment and customers' supplies of natural gas may be restricted and eventually stopped if non-payment continues. In addition, surcharges may be levied for gas supplied in excess of the contracted for daily quotas (50% in winter and 10% in summer).

*Delayed Payments for Gas Deliveries in Russia.* During the mid and early 1990's, natural gas prices rose very rapidly for all domestic customers, partly to keep pace with high inflation and partly to reflect the much higher prices received from exports to Europe. The sharp rise in price led to an increase in non-payment by Russian customers and settlement in forms other than cash. The increase in the price of natural gas had a particularly pronounced negative impact on the power generating industry, which accounted for most of the non-payments.

In 1999 through 2002, we improved our cash collection dramatically for natural gas delivered to Russian consumers. This was due generally to the resurgence of the Russian economy and more specifically to our cooperation with consumers and administrations of the various republics, federal cities, autonomous regions and other subjects of the Russian Federation. As of September 30, 2002, gross accounts receivable for natural gas supplied to Russian customers amounted to approximately RR51.9 billion (equivalent to approximately U.S.\$1.6 billion), compared to RR55.5 billion (equivalent to approximately U.S.\$1.8 billion) as of December 31, 2001 (for both dates including Russian VAT but excluding late payment charges).

Pursuant to various Government regulations, we do not have the right to limit natural gas deliveries to a number of categories of consumers, including hospitals, household utilities (such as water and electricity suppliers), military and state telecommunication organizations, as well as other consumers whose operations are vital for Russia's national security and environmental safety.

### *International Projects and Alliances in Marketing*

#### *WIEH Marketing Arrangement*

In 1990, we and BASF agreed to undertake the joint marketing of natural gas and to build and operate a network of trunk gas pipelines in Germany. See "Business—Transportation—International Projects and Alliances in Transportation."

We and Wintershall AG (a wholly-owned subsidiary of BASF) each have a 50% shareholding in the trading company Wintershall Erdgas Handelshaus ("WIEH"). WIEH purchases its natural gas supplies exclusively from Gazexport under long-term contracts. Two long-term natural gas supply contracts have been concluded with WIEH for a total annual volume of 13.9 bcm. WIEH sells gas to Wingas, Verbundnetzgas, a major natural gas distributor in eastern Germany (of which ZGG, a wholly-owned subsidiary of Gazexport, owns approximately 5%) and BASF. Wingas sells gas to municipal undertakings, gas utilities and major industrial consumers. We have concluded two long-term natural gas supply contracts with Wingas for a total annual volume of 5.8 bcm during the plateau period. In 2001, we supplied 13.5 bcm of natural gas to Wingas and WIEH for sale in Germany and some other western European countries. Overall, we supplied 111.1 bcm of natural gas to WIEH and Wingas between 1991 and 2001. During the same period, we supplied 35.0 bcm of natural gas to WIEH for resale in Bulgaria and Romania.

#### *Beltransgaz privatization*

The Belarussian parliament has approved the privatization of Beltransgaz, the Belarussian state-owned gas transportation and distribution company, on terms and conditions that are expected to be announced in July 2003. We are considering the possibility of investing in Beltransgaz when and if it is privatized. We believe that such an investment would allow us to market gas to end consumers in Belarus, where the price of natural gas is higher than in Russia.

#### *Other Joint Ventures*

In addition to our activities in Germany, we have established further joint ventures to transport and market natural gas in other European markets. In certain countries, our subsidiaries or affiliates also distribute natural gas. We have begun to implement our strategy of acquiring equity participations in gas transportation companies and gas marketing companies, which was a success in Germany, in other European markets. In Finland, we acquired a 25% interest in the national gas distribution system in 1994 through the formation of Gasum Oy, a joint venture with Neste Oy (since renamed Fortum Group S.A.). Gasum Oy is the sole distributor of natural gas in Finland, and we are its sole supplier. In Poland, EuRoPol GAZ S.A., a joint venture with PGNiG S.A., a state-owned Polish gas company, is engaged in the construction of the Polish section of the Yamal-Europe Project. We hold a 48% interest in EuRoPol Gaz. When construction is completed, EuRoPol Gaz will own the Polish section

of the transit pipeline and transport Russian natural gas to Germany. The following table summarizes the main natural gas transportation and marketing joint ventures in which we, or Gazexport, participated in other European markets as at December 31, 2002.

<u>Country</u>	<u>Entity</u>	<u>Interest</u>	<u>Joint Venture Partner</u>	<u>Description</u>
Austria .....	GWH Gas und Warenhandelsgesellschaft	50%	OMV	Gas marketing and general trading company
Bulgaria .....	Overgaz Inc.	50%	AO Overgaz Holding	Marketing of Russian natural gas in Balkan countries
Estonia .....	AO Eesti Gaas	37%	Ruhrgas AG, Fortum Oy, Itera Latvia, other shareholders	Marketing of natural gas, development of Estonia's gas transportation networks
Finland .....	Gasym Oy	25%	Fortum Oy, Ruhrgas, the State of Finland, Finnish companies	Gas transportation and marketing
	NordGaz Oy	50%	Fortum Oy	Transportation of natural gas and operation of gas transportation network
France .....	Fragaz	50%	Gaz de France Group	Gas trading and general trading activities
Greece .....	Prometheus Gas	50%	Copelouzos Group	Gas marketing and construction of gas transportation systems
Hungary .....	Panrusgaz	31%	MOL Group	Gas marketing
Italy .....	Promgas	50%	ENI	Gas marketing
Latvia .....	AO Latvias Gaze	25%	Itera-Latvia, Ruhrgas Energie Beteiligungs, E.ON Energie AG, The State of Latvia, other shareholders	Marketing of natural gas and liquefied gas, development and modernization of Latvia's natural gas and services industries
Lithuania .....	Stella Vitae	30%	Auri, other shareholders	Marketing of gas, crude oil and refined products
Poland .....	EuRoPol GAZ S.A.	48%	PGNiG S.A.	Transportation, construction, ownership and operation of the Polish section of the Yamal-Europe project
	Gas Trading	16%	PGNiG S.A., Bartimpex S.A., WIEH, Wenglokoks	Gas marketing
Slovakia .....	Slovrusgaz	50%	SPP	Gas transportation and marketing, general trading business
Turkey .....	Turusgaz	45%	Botas International Ltd., Gama Industrial Plants Manufacturing and Erection Corp.	Gas marketing

We and our subsidiaries also own stakes in companies located in Armenia, Belarus, Kazakhstan, Moldova, The Netherlands, Ukraine, the United Kingdom and Yugoslavia.

### Competition

The oil and gas industry is currently subject to several important influences that impact the industry's competitive landscape. These include the following:

*Consolidation.* In the past few years, the strategic and competitive landscape of oil and gas markets have been transformed by mergers and acquisitions, driven mainly by aspirations for greater profits and intensified competition to capture the growing potential of new, attractive business opportunities.

*Technological Advances.* Technological innovations in the oil and gas industry have improved the technical-economic performance in finding and developing hydrocarbon resources. Active and effective application of advanced technology has helped to improve geologic exploration success rates, to increase field

life and recovery rates from existing fields and to reduce full project cycle costs. In general, there is comparable access to technology across the industry, and to achieve our strategic and financial goals, we will seek to compete by applying available technology to complex projects.

*Environmental and Social Concerns.* Oil and gas companies are also facing increasing demands to conduct their operations consistent with environmental protection and social goals. Investors, customers and governments are more actively following companies' performance with respect to environmental responsibility, human rights and development of alternative and renewable fuel resources.

As a result of these influences and the factors described above we expect competition to intensify in each of the markets we serve.

#### *Western Europe*

The table below shows the proportion of western European natural gas supply attributable to each supplier of natural gas to the European market in 2001.

<u>Country</u>	<u>% of European Natural Gas Supply</u>
Russia (Gazprom) .....	25.5
United Kingdom .....	21.3
The Netherlands .....	14.5
Algeria .....	11.0
Norway .....	11.0
Germany .....	4.3
Italy .....	2.9
Denmark .....	1.7
Nigeria .....	1.4
Other .....	6.4

Source: CEDIGAZ—"Natural Gas in the World—2001," Survey August 2002.

Natural gas supplies to western Europe have outpaced demand in the past seven years and, according to specialists from the International Energy Agency, this trend will continue until 2007-2008. As a result, we anticipate exporting natural gas to Europe at close to the minimum amounts defined in our export contracts over this period. Over the long-term, however, production in the countries of western Europe will continue to decline due to the depletion of natural gas reserves in the region and exports from Russia, Algeria and Norway are likely to increase further.

Western European gas markets are undergoing significant restructuring as a result, in particular, of the Gas Directive which came into force on August 10, 1998. As noted above, the purpose of the Gas Directive is to deregulate and liberalize the EU gas market by stimulating competition in the gas market and reducing gas prices for the end-user. The Gas Directive seeks to accomplish these objectives by opening up gas transmission and distribution infrastructure to third parties and establishing fair tariffs on third-party use of natural gas transportation infrastructure and greater transparency of transportation and distribution costs by an unbundling of the accounts for gas transportation, distribution and storage. It may also promote the emergence of a short-term price and "spot" markets for natural gas. Because of the distance of our western Siberian natural gas fields from consumers in Europe, it would be difficult for us to engage in spot transactions involving physical settlement. We believe, however, that natural gas is likely to continue to be supplied under long-term export contracts, both because long-term contracts provide a stable supply of natural gas and because long-term supply contracts are essential in enabling us to finance investment in our natural gas exploration and development. The Gas Directive may also increase demand for natural gas in Europe if it succeeds in reducing prices and could lead to greater export volumes to Europe. Moreover, the EU is currently considering initiatives (the so-called Prodi Initiatives) that seek to increase Russian natural gas exports to Europe over the next 15 years to meet Europe's future gas needs. We expect that the substantial gas reserves owned by Gazprom will support our competitive position as a major supplier of natural gas to the western European market.

We recently received a request for information from the European Commission with respect to destination clauses in our contracts with various Italian utilities, under which the Italian utilities are prevented from re-exporting Russian gas. We are currently engaged in a dialogue with the European Commission regarding these clauses. The European Commission's original position was that the inclusion of destination clauses violated EU law. During the course of discussions, the European Commission modified its position and recognized the need to find alternatives to destination clauses that are economically viable for suppliers of natural gas. We have found such a solution with ENI and are negotiating alternatives with various other off-takers.

In response to the changes in the European market brought about by the Gas Directive, we have entered into a number of marketing joint ventures and we now have joint ventures in, among other countries, Finland, Austria, France, Italy, Hungary and Germany. See "Business—Marketing—International Projects and Alliances in Marketing."

Developed reserves and production of natural gas and crude oil in Europe are expected to decline in the next several years. For example, production of natural gas in the United Kingdom is expected to decrease by 2004 and, accordingly, its imports will increase to keep pace with the growth of demand. According to estimates by EC experts, the dependence of EU member states on imports of gas from third-party countries will grow from 40% in 2000 to 70% in 2020, which may lead to increased in Russian gas exports.

#### *Central and Eastern Europe*

The competitive pressures we face in central and eastern Europe are similar to those we face in western Europe, namely a liberalization of the natural gas market and competition from other suppliers. As a result of existing historical and economic factors, as well as the geographical proximity of central and eastern European markets to Russia, we still consider ourselves to be the main supplier of gas to countries in this region. Despite the steps taken by central and eastern European countries to diversify their sources of gas supplies, we believe we will retain our role as the leading supplier of gas to central and eastern Europe.

#### *Russia and the FSU*

In Russia, we face competition from other crude oil and natural gas suppliers, in particular from independent suppliers in Russia. In the FSU, we face competition from independent suppliers in Russia and natural gas producing companies in Turkmenistan, Kazakhstan and Uzbekistan. Since April 1998, independent Russian suppliers have been granted non-discriminatory access to existing UGSS capacity in Russia. The independent suppliers (24 in total in 2001, the largest of which include Itera, Surgutneftegas, Transneftegaz, Trading House "Soyuz," TransNafta and Orensol) have historically been, and continue to be, our competitors. In our view, this position is mainly a result of the Government's policy of offering preferential terms for gas sales by such independent suppliers (for example, an exemption from excise tax on the sale of gas in Russia, which was in force until July 1, 2000, and a low transportation tariff set by the Federal Energy Commission for transportation of natural gas through the UGSS). Additionally, such independent suppliers can generally be more flexible than we can be with respect to the contractual terms and conditions that they can offer to customers in Russia and the FSU, as they are not bound by the same strict regulatory requirements that apply to us. See "Overview of the Russian Gas Industry and its Regulation—Russian Regulation."

In 2001, the independent suppliers accounted for 12.9% of natural gas transported through the UGSS. However, the competitive position of alternative suppliers is limited by the relatively small size of their reserves base, relatively high costs of production and their dependence on access to our transportation network.

### **Research and Development**

We have pursued a policy of investing in research and development in a number of scientific and technical areas. In general, our research and development focuses on:

- economically efficient ways to develop newly discovered fields in regions such as the Obsk-Tazobskaya Bay, the Yamal Peninsula, the Barents Shelf and the Karsk Sea, eastern Siberia and the Russian Far East that are characterized by difficult climatic and geological conditions;
- maintaining production from existing fields with declining reserves;
- creating technology for the effective development of small natural gas fields and non-traditional resources, for example methane from coal fields;

- developing a diagnostic system, technical funds and a new generation of technology and equipment for maintaining the dependability and effectiveness of the UGSS; and
- creating energy-saving technology and equipment, and developing a comprehensive energy-saving scientific-technical program.

### **Support Activities**

We engage in various activities that support our main business, including insurance, banking and the largest pension fund in Russia, Gazfund, which we use to provide pension services for our employees.

Because of the broad geographic range of our core business, the remoteness of our fields and the relatively undeveloped infrastructure in the regions in which we produce natural gas, we operate our own electricity generation and communications operations as well as various other activities, such as food processing and procurement and transportation (including auto transport and aviation), to support the activities of the employees who work in the exploration, production, and transport of gas, much of which is in remote locations.

We currently operate 73,500 km of electricity transmission lines and 9,400 electric power stations with a total capacity of 8.6 million kW. Production of electricity in 2001 reached 1,168.5 million kWh, compared to 1,117.1 million kWh and 939.4 million kWh in 2000 and 1999, respectively.

We operate an extensive internal communications network, which we maintain and operate in conjunction with the UGSS to help ensure the technical reliability and safety of the UGSS. The network consists of a ground-based network and a satellite system. The ground based network includes 72,000 km of cable communication lines, 17,100 km of multi-channel radio lines and 628 automated telephone stations with total capacity of 245,000 numbers. The satellite system consists of the satellite "Yamal-100" and 105 land-earth stations that transmit to and receive signals from the satellite.

#### *Insurance*

Exploration for and production, refining and transportation of natural gas, gas condensate and crude oil is hazardous. Natural disasters, operator error or other occurrences can result in oil spills, blowouts, cratering, fires, equipment failure and loss of well control, which can injure or kill people, damage or destroy wells and production facilities, and damage property and the environment.

We are insured through our wholly-owned insurance subsidiary Sogaz, which in turn reinsures 95% of the coverage it provides to us through the international reinsurance market, mainly with western insurance companies. Our insurance coverage falls into three categories: (i) insurance of the fixed assets owned or leased by the our head company, including pipelines, compressor and gas distribution stations, gas processing plants, wells and production equipment and production and non-production buildings; (ii) insurance of the natural gas we transport through the UGSS in Russia; and (iii) insurance of liabilities arising out of our legislatively mandated obligation to refund damages caused to third parties and environmental damages resulting from malfunctions in the production facilities. We do not carry insurance for environmental damage arising from accidents on our property, business interruption insurance or insurance against terrorist attacks. We do not have full insurance for all of our plant facilities and are currently discussing with Sogaz the possibility of increasing the insurance coverage of our refineries and of fixed assets owned by our subsidiaries. See "Risk Factors—Risks Relating to our Business—We face certain operational risks which may result in losses and additional expenditures."

#### *Gazprombank*

Gazprombank, Russia's fifth largest bank as measured by total assets, services a majority of our banking needs. Gazprombank was founded in 1990 with the primary goal of improving the quality and effectiveness of financial services to our Group and the Russian gas industry as a whole. Gazprombank's principal services comprise lending, deposit taking, securities and foreign exchange trading and trade finance. Gazprombank also generates income from providing settlement services for interregional payments for gas supplies, plastic card operations, depository and custodial services and servicing financings for our Group. Since its founding, Gazprombank has developed a network of 31 branch offices and 44 regional representative offices located throughout the Russian Federation. The bank also has shareholdings in ten other banks, which extends its network to approximately 200 banking offices in 55 regions of Russia and Belarus. Its network extends to the principal regions where gas is extracted, produced and transported and to many of the largest financial and industrial centers in the Russian Federation.

As of September 30, 2002, we owned directly or through our subsidiaries 98.02% of Gazprombank's charter capital. Our liability in Gazprombank is limited to the extent of our equity participation. Most of Gazprombank's funding is from, and most of its credit exposures are to, our Group. Gazprombank's activities are closely linked to the requirements of our Group and pricing is determined accordingly.

Gazprombank had total assets under IAS as recorded in its unaudited IAS consolidated financial statements as of September 30, 2002 of U.S.\$4,129 million, of which transactions with our group accounted for U.S.\$1,674 million, and total liabilities of U.S.\$3,280 million, of which transactions with our Group accounted for U.S.\$1,059 million. As of that dates, transactions of Gazprombank with members of our Group accounted for U.S.\$2,026 million (41%) of Gazprombank's total gross exposures (including assets and off-balance sheet commitments).

As of September 30, 2002, approximately 57% of Gazprombank's total loans outstanding were either directly to or were guaranteed by members of our Group, 48% of its current accounts and deposits were due to our Group (as well as a significant additional portion due to one of our associated companies), a majority of its trade finance activity related to our Group and most of its securities trading activities were in respect of our shares. Gazprombank's principal customers that were not in our Group included enterprises in engineering, petrochemical and transport sectors, food industry and high tech machinery, pension funds and insurance companies. In addition, Gazprombank has recently expanded its operations into the precious metals and precious stones sector.

### **Non-Core Businesses**

In addition to the support activities described above, we have investments in various other businesses that are not related to our core operations. Such investments mainly represent equity holdings which have been received in the course of privatization (e.g. interests in agricultural, civil, construction and medical care enterprises), acquired either through debt for equity swaps (e.g. stakes in regional utility companies) or directly for strategic and other considerations. Among our largest investments is that in Gazprom-Media, our subsidiary that manages our investments in a number of media holding companies, including NTV, Russia's largest independent TV channel. Following recent successful litigation to enforce a share pledge that was given as collateral for the guarantee by us of loans to Media-MOST, NTV's parent company, as of September 30, 2002 we had a controlling interest of 95.65% in NTV and controlling interests in a number of other media companies.

### **Health, Safety and Environment**

Our operations in Russia are subject to a number of environmental laws and regulations. These laws govern, among other things, regulations on the composition of emissions into the atmosphere, wastewater discharges and discharges to the sea, the use, handling and disposal of hazardous substances and wastes, soil and groundwater contamination and employee health and safety. As we are a production company, environmental liability risks are inherent in our operations. See "Risk Factors—Risks Relating to our Business—As an energy company we face significant environmental risks" and "Overview of the Russian Gas Industry and its Regulation—Russian Regulation—Environmental Requirements."

Our current environmental standards and policy follow existing Russian environmental regulations and laws, international conventions, treaties and environmental agreements. We have developed and continue to improve a system for monitoring harmful leaks, water contamination, and the quality of air, water and soil in the Russian regions in which the UGSS infrastructure is located. In a number of regions this system has become an integral part of the Russian Federation's unified State Ecological Monitoring System. We have completed certifications of seven of our facilities according to International Standard ISO 14000, a widely recognized set of environmental standards developed by the International Organization for Standardization (the "ISO"), a non-governmental body composed of national standard making bodies from over 140 countries. We intend to conduct such certifications at our other facilities and intend to confirm that our environmental protection management system as a whole is ISO 14000 compliant.

In August 2002, we presented a report derived from these certifications to the General Prosecutor's Office, which identified several instances in which we were not in compliance with Russian environmental regulations. We have now brought our practices in line with the regulations in all but one of the areas identified by the General Prosecutor's Office and will be fully compliant in 2003.

To date, we have not had any serious accidents that have had a significant environmental impact.

The Russian Federal Law on Environmental Protection, dated December 19, 1991, establishes a “pay-to-pollute” regime administered by the Ministry of Natural Resources and regional authorities. In accordance with this regime, we make statutory payments to ecological funds and state authorities for environmental pollution. We paid (in nominal RR amounts) RR74.1 million in 1999; RR75.8 million in 2000; and RR119.0 million in 2001. The increase in the amount of statutory payments is the result of the annual introduction of increasing correction coefficients. We have also paid (in nominal RR amounts) the following environmental penalties: RR0.85 million in 1999; RR0.8 million in 2000; and RR0.5 million in 2001 relating to environmental protection. Forthcoming changes in environmental legislation are expected to eliminate the “pay-to-pollute” regime in favor of increasing punitive payments for environmental violations. Since we paid only a small amount in environmental penalties, we anticipate that the environmental protection payments we make will decrease overall with the enactment of this new legislation.

Our balance sheet, prepared in accordance with IAS, contains provisions for environmental payments (which take into account probable liabilities that can be reasonably estimated). Such provisions have been made in accordance with what we believe is a reasonable and prudent policy that takes into account payments made in prior years, among other factors. However, in Russia in particular, federal, regional and local authorities may enforce existing laws and regulations more strictly than they have done in the past and may impose stricter environmental standards or higher levels of fines and penalties for violations than those now in effect. Accordingly, we are unable to estimate the future financial impact of our environmental obligations with a high degree of certainty. However, we do not expect environmental obligations to have a material adverse effect on our future financial condition.

We have one trade union, the Gazprom Inter-Regional Trade Union Organization of the Oil, Gas and Construction Employees of the Russian Federation, to which 88.1% of our employees belonged as of December 31, 2002. We have entered into a tariff agreement with the union which, among other things, sets forth our health and safety procedures. Compliance with these obligations is monitored by the trade union. On the basis of a package of social and labor-related, organizational and technical, health-care and preventive, and sanitary and hygienic measures, we have developed and operate a unified labor protection and industrial safety management system and our subsidiary companies and organizations are developing labor protection agreements and financing their activities. Our tariff agreement with the trade union is scheduled to be renegotiated at the end of 2003. We anticipate that our obligations with respect to employee health and safety procedures will not change materially under a new agreement with the union.

### **Litigation and Investigations**

We are from time to time, the subject of legal proceedings and other investigations in the ordinary course of our business.

In January 2001, the Accounting Chamber of the Russian Federation completed a five month audit of the Company. The audit report stated that in 2000 there was a decline in our gas production compared to 1999; that there was a decline in capital expenditure; that we transferred natural gas to the Yamal-Nenets autonomous region as payment for the mineral resource base restoration tax; that there was an increased growth in accounts receivable and payable; that we had granted low or interest-free loans to third parties; that we had made long-term investments in non-core activities; and that in 1998 and 1999 we were granted a special tax regime. We do not anticipate that we will be required to make any payments pursuant to this audit.

We recently received a request for information from the European Commission with respect to destination clauses in our contracts with various Italian utilities, under which the Italian utilities are prevented from re-exporting Russian gas. We are currently engaged in a dialogue with the European Commission regarding these clauses. The European Commission’s original position was that the inclusion of destination clauses violated EU law. During the course of discussions, the European Commission modified its position and recognized the need to find alternatives to destination clauses that are economically viable for suppliers of natural gas.

Rosgazifikatsiya has filed a claim against SR-DRAGA (our share registrar) to recover damages in the amount of RR717.2 million as a result of the alleged negligent performance of its obligations as a registrar in relation to one specific share transfer of 50 million of our shares that were owned by Rosgazifikatsiya. Under Russian law, we are liable for the actions of our registrar and accordingly were joined as a codefendant to the claim. The court of first instance ordered SR-DRAGA to pay RR539 million in settlement of the claim. After

appeals by SR-DRAGA the Federal Arbitration Court of the Moscow Region overturned the decision of the court of first instance. Rosgazifikatsiya appealed the decision to the Supreme Arbitration Court, which remanded it for a new review in the court of first instance. We believe the claims to be without merit and are vigorously defending against them.

Inkombank filed a claim against us to recover debt in the amount of U.S.\$72.4 million under a credit facility agreement. The dispute stemmed from our attempt to set off our obligations to Inkombank under the facility against amounts owed to us by Inkombank after Inkombank had gone into receivership. The court of first instance considered the claim and ordered us to pay Inkombank U.S.\$71.6 million; we filed an appeal against the decision. In the course of proceedings in the court of appeal, we entered into an amicable settlement agreement under which we agreed to pay U.S.\$44.7 million to Inkombank and Inkombank waived its claim to the remaining part of the debt.

Neftegaspostavka has filed two claims against us for damages resulting from our refusal to grant Neftegaspostavka access to our pipelines, allegedly in breach of anti-monopoly regulation. The first claim, which relates to damages incurred in 1999, was satisfied in a court which imposed a fine on us of RR177 million. The second claim, which relates to damages incurred in 2000, was heard by the Moscow City Arbitration Court, which granted an award of RR726 million to Neftegaspostavka. We appealed the latter judgment, and in December 2002 the appeals court set damages at RR480 million. We appealed the judgment of the Moscow City Arbitration Court to the court of cassation. On January 24, 2003, the Federal Arbitration Court of the Moscow Circuit overturned prior judicial acts with respect to Neftegaspostavka's claims and referred the case to the court of first instance for a new trial.

There has been recent press commentary and speculation over potential proceedings following allegations by a Russian Federal Tax Police official that we had evaded taxes. However, as at the date of this offering circular no official statement had been issued by the Tax Police and no proceedings in this regard had been commenced. We believe that if any such proceedings are instigated, they will be without merit.

Local tax authorities in Moscow have recently demanded that we pay RR29 billion to the budget on account of unpaid excise duties. The dispute arose out of differences between us and the local tax authorities in the interpretation of excise duty regulations. We appealed the tax authorities' order in court and on October 28, 2002, the court ruled that we should pay the tax authorities approximately RR3 million. No appeal of the decision has been filed by the tax authorities and it has come into force.

These proceedings and investigations have not had, and are not expected to have, individually or in the aggregate, a material adverse effect on our business, operations and financial condition or on our ability to service our payment obligations under the Notes.

## Employees

As of December 31, 2001, OAO Gazprom and its principal subsidiaries had 310,711 employees. The table below sets forth the number of our employees by type of activity as of December 31, 2001, 2000 and 1999:<sup>(1)</sup>

<u>Type of Activities</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
Construction .....	29,943	33,158	30,521
Exploration and drilling .....	15,224	14,546	14,064
Gas transportation .....	107,363	105,195	101,156
Production and processing .....	46,026	37,720	35,653
Other .....	118,713	121,219	116,205
Total .....	317,269	311,838	297,599

Note:

(1) These figures represent average employee count for each year.

We have one trade union to which 88.1% of our employees belonged as of December 31, 2002. We have never experienced any strikes, work stoppages, labor disputes or actions that have affected the operation of our business and we consider our relationship with our employees to be good.

## MANAGEMENT

The current members of our Board of Directors are as follows:

<u>Name</u>	<u>Position</u>	<u>Age</u>	<u>Term expires</u>
D. Medvedev	Chairman of the Board of Directors; First Deputy Head of the Presidential Administration of the Russian Federation	37	August 28, 2003
A. Miller	Deputy Chairman of the Board of Directors; Chairman of the Management Committee	40	August 28, 2003
A. Ananenkov	Deputy Chairman of the Management Committee	45	August 28, 2003
B. Bergmann	Chairman of the Management Committee of Ruhrgas	59	August 28, 2003
B. Fedorov	Leader of the political movement "Russia, Ahead!"	44	August 28, 2003
F. Gazizullin	Minister of Property Relations of the Russian Federation	56	August 28, 2003
G. Gref	Minister for Economic Development and Trade of the Russian Federation	38	August 28, 2003
V. Hristenko	Deputy Prime Minister of the Russian Federation	45	August 28, 2003
A. Levistskaya	First Deputy of the Russian Government Administration	48	August 28, 2003
M. Sereda	Head of Gazprom's Management Committee Office	32	August 28, 2003
I. Yuzhanov	Minister of Antimonopoly Policy and Entrepreneurial Support of the Russian Federation	42	August 28, 2003

The current members of our Management Committee are as follows:

<u>Name</u>	<u>Position</u>	<u>Age</u>	<u>Term expires</u>
A. Miller	Chairman of the Management Committee; Deputy Chairman of the Board of Directors	40	May 29, 2006
A. Ananenkov	Deputy Chairman of the Management Committee	45	December 16, 2006
E. Vasilieva	Deputy Chairman of the Management Committee; Chief Accountant	43	November 26, 2006
Y. Komarov	Deputy Chairman of the Management Committee	57	August 20, 2003
S. Lukash	Deputy Chairman of the Management Committee	45	November 26, 2006
A. Ryazanov	Deputy Chairman of the Management Committee	49	November 26, 2006
B. Yurlov	Deputy Chairman of the Management Committee	54	June 19, 2007
M. Akselrod	Management Committee Member (Capital Construction and Transport)	56	November 26, 2006
B. Budzulyak	Management Committee Member (Gas Transportation System)	56	June 18, 2006
A. Krasnenkov	Management Committee Member (Property Management)	41	November 26, 2006
A. Kruglov	Management Committee Member (Head of Corporate Finance)	33	June 19, 2007
N. Gornovsky	Management Committee Member; General Director of Mezhhregiongaz	44	March 20, 2007
V. Rezenenko	Management Committee Member (Long-Term Development Planning)	67	June 18, 2006
N. Guslisty	Deputy Chairman of the Management Committee	69	September 26, 2007
V. Ilyushin	Management Committee Member (Relationships with Regional Authorities)	55	September 26, 2007
V. Leviev	Management Committee Member; General Director of Gazkomplektimpex	46	September 26, 2007
A. Medvedev	Management Committee Member; General Director of Gazexport	47	September 26, 2007
V. Podyuk	Management Committee Member (Gas, Gas Condensate and Oil Production)	56	September 26, 2007
K. Seleznev	Management Committee Member (Marketing, Gas and Liquid Hydrocarbon Processing)	28	September 26, 2007
K. Chuichenko	Management Committee Member (Legal)	37	September 26, 2007

### Director Biographies

*D. Medvedev.* Dmitri Anatolievich Medvedev has been the Chairman of our Board of Directors since June 2002. Previously, Mr. Medvedev was the Chairman of the Board of Directors from June 2000 through June 2001

and our Deputy Chairman of the Board of Directors of the Company from June 2001 through June 2002. Mr. Medvedev is First Deputy Head of the Presidential Administration of the Russian Federation (since 2000). He was Deputy Head of the Presidential Administration of the Russian Federation (1999-2000), Deputy Head of the Administration of the Government of the Russian Federation (1999) and an assistant at Leningrad State University (1990-1997).

*A. Ananekov.* Alexander Georgievich Ananekov has been a member of our Board of Directors since June 2002 and the Deputy Chairman of our Management Committee since December 2001. Mr. Ananekov is also Chairman of the Board of Directors of Open Joint Stock Company Vostokgazprom (since May 2002); a member of the Board of Directors of Joint Stock Bank Gazprombank (since April 2000); and a member of the Board of Directors of Open Joint Stock Company Zapsibcombank (since April 1997). Mr. Ananekov was General Director of Yamburggazdobycha from 1997 through 2001.

*B. Bergmann.* Burckhard Bergmann is a member of our Board of Directors. He is elected to the Board by Ruhrgas AG, one of our major shareholders. Mr. Bergmann has been the Chairman of the Executive Board of Ruhrgas AG since June 2001. He is also currently serving as a member of numerous supervisory boards, including the Supervisory Board of Allianz Lebensversicherungs-AG and as the Chairman of the Supervisory Board of VNG-Verbundnetz Gas AG and Mittel-Europäische Gasleitungsgesellschaft mbH.

*B. Fedorov.* Boris Grigorievich Fedorov has been a member of our Board of Directors since July 2000. He is also a member of the supervisory board of the Savings Bank of Russia (since July 1999). Mr. Fedorov was a member of the Board of Directors of Russian Joint Stock Company UES (1999-2001); Chairman of the Board of Directors of Unified Financial Group (through 1998); and Chairman of the Board of Directors of Vostok-Zapad Bank from (1997-1998).

*F. Gazizullin.* Farit Rafikovich Gazizullin has been a member of our Board of Directors since June 1999. He was the Chairman of our Board of Directors from June 1998 through June 1999. Mr. Gazizullin is also a member of the Board of Directors of Open Joint Stock Company FSK UES (since January 2002) and a member of the Board of Directors of Open Joint Stock Company SO-TsDU UES (since June 2002). Mr. Gazizullin is the Minister for Property Relations of the Russian Federation (since 2000). He was the Minister for State Property of the Russian Federation (1998-2000); Deputy Chairman of the Government of the Russian Federation—Minister for the State Property of the Russian Federation (1997-1998); and First Deputy Chairman of the State Committee for Property of the Russian Federation and the First Deputy Minister for the State Property of the Russian Federation (1996-1997).

*G. Gref.* German Oskarovich Gref has served as a member of our Board of Directors since June 1999. From 1998-2000 he was First Deputy Minister for State Property of the Russian Federation. From 2000 to the present he has served as Minister for Economic Development and Trade of the Russian Federation.

*V. Hristenko.* Victor Borisovich Hristenko has been a member of our Board of Directors since 2000. In 1998 he served as Deputy Prime Minister of the Russian Federation. From 1998 to 1999 he served as First Deputy Minister of Finance of the Russian Federation. In 1999 he was acting state-secretary of the First Deputy Minister of Finance of the Russian Federation. From 1999 to 2000 he served as First Deputy Prime Minister of the Russian Federation. From 2000 to the present he has served as Deputy Prime Minister of the Russian Federation.

*A. Levitskaya.* Alexandra Yurievna Levitskaya is a member of our Board of Directors. She is the First Deputy Head of the Presidential Administration of the Russian Federation (since June 2002). She was the assistant Head of the Administration of the President of the Russian Federation (1999-2000); President of the Federal Stock Corporation (1998-1999); and Director of the Department for Administrative Questions and the Executive Director of Open Joint Stock Company Federalnaya Fondovaya Corporatsiya (Federal Stock Corporation) (1995-1998).

*A. Miller.* Alexei Borisovich Miller has been the Deputy Chairman of our Board of Directors since June 2002 and the Chairman of our Management Committee since May 2001. He was selected to his position as Chairman of the Management Committee by the Government of the Russian Federation, our major shareholder. Mr. Miller is also Chairman of the Board of Directors of Joint Stock Bank Gazprombank (since June 2002) and a member of the Board of Directors of Closed Joint Stock Company Russian Company for the Reclamation of the Shelf (since May 2002). Mr. Miller was deputy Minister of Energy of the Russian Federation (2000-2001); Chairman of the Supervisory Council of Joint Stock Company EuRoPol GAZ (March-June 2002); Chairman of the Management

Committee of Joint Stock Company Nord Transgaz (2001-2002); Chairman of the Board of Directors of Open Joint Stock Company Vostokgazprom (2001-2002); General Director of the Open Joint Stock Company Baltiiskaya Truboprovodnaya Sistema (Baltic Pipeline System) (1999-2000); and Director for Development and Investments in Open Joint Stock Company Morskoy Port St. Petersburg (1998-1999).

*M. Sereda.* Mikhail Leonidovich Sereda has been a member of our Board of Directors since June 2002 and Head of our Administration of our Management Committee since July 2001. Mr. Sereda is also a member of the Board of Directors of Joint Stock Company Global Bank for Values Circulation (since August 2001); a member of the Supervisory Board of Wintershal Erdgaz Handelshaus GmbH (since March 2002); a member of the Supervisory Board of WINGAS GmbH (since March 2002); a member of the Board of Directors of Gazprom UK Ltd. (since April 2002); a member of the Board of Directors of Joint Stock Bank Gazprombank (since June 2002); a member of the Board of Directors of Open Joint Stock Company Vostokgazprom (since June 2002); and the Managing Director of Limited Liability Company Gazprom Finance B.V. (since July 2002). Mr. Sereda was the Deputy Head for Economy of Branch BTS of Open Joint Stock Company Verhnevolzhskie Magistralnye Nefteprovody (Verhnevolzhskie Trunk Pipelines). (May-July 2001); Deputy General Director for Finance of Open Joint Stock Company Baltic Pipeline System (now Branch BTS of Open Joint Stock Company Verhnevolzhskie Magistralnye Nefteprovody (Verhnevolzhskie Trunk Pipelines) (1999-2001); a Leading Economist of the Credit Department of the St. Petersburg Branch of the Savings Bank of Russia (1998-1999); and the Senior Economist of the Credit Department of the St. Petersburg Branch of the Savings Bank of Russia (1997-1998).

*I. Yuzhanov.* Ilya Arturovich Yuzhanov is a member of our Board of Directors. He is also a member of the Boards of Directors of Open Joint Stock Company FSK UES and Open Joint Stock Company SO-TsDU UES (since July 2002) and was a member of the Board of Directors of Russian Joint Stock Company UES (2000-2001). Mr. Yuzhanov has been the Minister of the Russian Federation for the Antimonopoly Policy and Support of Entrepreneurship (MAP of Russia) since May 1999. Previously, he was the Deputy General Director of the Open Joint Stock Company Mezhtseobrazovaniye Nauchno-Proizvodstvennoye Obiedineniye Polimetal (Interregional Scientific-and-Manufacturing Union Polimetal) (April-May 1999); Minister of the Russian Federation for Land Politics, Constructions and Accommodation and Public Economy (May-October 1998); Chairman of the State Committee of the Russian Federation for Land Recourses and Land Utilization (1997-1998); and Chairman of St. Petersburg Committee for Land Recourses and Land Utilization (1994-1997).

### **Management Committee Biographies**

*A. Miller.* See “—Director Biographies.”

*A. Ananekov.* See “—Director Biographies.”

*E. Vasilieva.* Elena Alexandrovna Vasilieva has been the Deputy Chairman of our Management Committee, and our Chief Accountant since September 2001. Ms. Vasilieva is also a member of the Board of Directors of Open Joint Stock Company Lazurnaya (since June 2002); a member of the Board of Directors of Closed Joint Stock Company Yamalgazinvest (since June 2002); a member of the Board of Directors of Joint Stock Bank Gazprombank (since June 2002); a member of the Board of Directors of Gazprom UK Ltd. (since April 2002); and a member of the Supervisory Board of Slavrusgaz (since November 2002). Ms. Vasilieva was the Chief Accountant of Open Joint Stock Company Baltic Pipeline System and the Chief Accountant of branch BTS of Open Joint Stock Company Verhnevolzhskie Trunk Pipelines (1999-2001) and was Deputy Chief Accountant of Open Joint Stock Company St. Petersburg Seaport.

*Y. Komarov.* Yuri Alexandrovich Komarov has been the Deputy Chairman of the Management Committee since 2002 and a member of the Management Committee since 1998. Mr. Komarov is the Chairman of the Board of Directors at Closed Joint Stock Company Gaztransit; Chairman of the Board of Directors of Joint Stock Company Yugrosgaz; Chairman of the Board of Directors of Closed Joint Stock Company Zarubezhneftegaz; and a member of the Management Committee of BSPC.

*S. Lukash.* Sergey Alexeevich Lukash has been the Deputy Chairman of our Management Committee since September 2001. He is also Chairman of the Supervisory Committee of Open Joint Stock Company Moldovagaz (since May 2002); Chairman of the Supervisory Committee of Open Joint Stock Company EuRoPol GAZ (since April 2002); Chairman of the Board of Directors of Open Joint Stock Company Sogaz (since April 2002); Chairman of the Board of Directors of NPF Gazfond (since December 2001); a member of the Board of Directors

of Open Joint Stock Company Gazprom-Media (since June 2002); a member of the Board of Directors of Open Joint Stock Company Belgazprombank (since March 2002); and a member of the Board of Directors of Gazprom UK Ltd. (since April 2002). Mr. Lukash served in the Russian Armed Forces until the end of 2001.

*A. Ryazanov.* Alexander Nikolaevich Ryazanov has been the Deputy Chairman of our Management Committee since November 2001. He also serves as Chairman of the Board of Directors of Joint Stock Company Sibur; as Chairman of the Board of Directors of Joint Stock Company Volgogradneftemash; as Chairman of the Board of Directors of Joint Stock Company Salavatnefteorgsyntez; as a member of the Supervisory Committee of Joint Stock Company Gazum; and as a member of the Board of Directors of Joint Stock Company Zapsibgazprom. Mr. Ryazanov served as a delegate of the State Duma of the Federal Assembly of the Russian Federation from December 1999 through November 2001. He was a delegate to the legislative body of Tyumen region and a deputy of the legislative body of Khanty-Mansiisk autonomous region (1999); and General Director of Open Joint Stock Company Surgutskii Gazopererabatyvayushii Zavod (Surgut Gas-Processing Plant) (1996-1999).

*B. Yurlov.* Boris Dmitrievich Yurlov has been the Deputy Chairman of our Management Committee since June 2002. Mr. Yurlov was Deputy Manager of Affairs of the President of the Russian Federation (2000-2002) and Director of the Department of Credit Financing of the Savings Bank of Russia (1998-2000).

*M. Akselrod.* Mikhail Arkadievich Akselrod has been a member of our Management Committee and Head of our Department of Capital Construction and Transportation since September 2001. Mr. Akselrod also serves as Chairman of the Board of Directors of Closed Joint Stock Company Informgazinvest (since August 2002); Chairman of the Board of Directors of Closed Joint Stock Company Yamalgazinvest (since July 2002); a member of the Board of Directors of Limited Liability Company Gazpromrazvitie (since October 2002); a member of the Board of Directors of Closed Joint Stock Company Gazpromstroieniengineering (since October 2002); Chairman of the Board of Directors of the Closed Joint Stock Company Kostromatrubinvest (since April 2002); Chairman of the Board of Directors of Open Joint Stock Company Spetsavtotrans (since June 2002); Chairman of the Board of Directors of Open Joint Stock Company Tsentrgaz (since April 2002); a member of the Board of Directors of Open Joint Stock Company Druzhba (since June 2002); a member of the Board of Directors of Open Joint Stock Company Zavod po Proizvodstvu Trub Bolshogo Diametra (since May 2002); Chairman of the Board of Directors of Open Joint Stock Company Krasnodargazstroi (since May 2002); a member of the Management of Joint Stock Company Turusgaz (since February 2002); and General Director of Closed Joint Stock Company Gazpromstroieniengineering (since June 2002). He was the Deputy Director (1999-2000), Director for Investments and Constructions of Lenenergo (2000-2001) and Director for Use of Stations (2001) of Open Joint Stock Company Lenenergo; and President of Company Trade House Yappilya (from 1995-1999).

*B. Budzulyak.* Bogdan Vladimirovich Budzulyak has been a member of our Management Committee since 1993. Mr. Budzulyak is also a member of the Administrative Council of Joint Stock Company Promgas (Italy); Chairman of the Administrative Council of Joint Stock Company Overgas Inc. (Bulgaria); Chairman of the Administrative Council of Joint Stock Company Topenergy (Bulgaria); a member of the Management Committee of Joint Stock Company Panrusgas (Hungary); a member of the Supervisory Council of Joint Stock Company EuRoPol GAZ (Poland); the Chairman of the Board of Directors of Closed Joint Stock Company Gaztelekom; Chairman of the Board of Directors of Open Joint Stock Company Gazcom; Chairman of the Board of Directors of Limited Liability Company Gazpromenergo; a member of the Board of Directors of Open Joint Stock Company Vostokgazprom; Chairman of the Board of Directors of Open Joint Stock Company Tomskgazprom; the Chairman of the Board of Directors of Closed Joint Stock Company Iskra-Avigaz; a member of the Board of Directors of Closed Joint Stock Company Yamalgazinvest; Chairman of the Board of Directors of Closed Joint Stock Company AKB Moskovskii Vekselnyi Bank; Chairman of the Board of Directors of Open Joint Stock Company Global Exchange Russian Gas; and Chairman of the Board of Directors of Closed Joint Stock Company Trade House Rus-gaz.

*A. Krasnenkov.* Alexander Viktorovich Krasnenkov has been a member of our Management Committee and Head of our Department for Property Management and Corporate Relations since 2001. He is also a member of the Board of Directors of Open Joint Stock Company Sibur; a member of the Board of Directors of Joint Stock Bank Gazprombank; a member of the Board of Directors of Open Joint Stock Company Vostokgazprom; and a member of the Board of Directors of Open Joint Stock Company Volgogradneftemash (all since 2002). Mr. Krasnenkov was the General Director and a member of the Board of Directors of Open Joint Stock Company Hotel Complex Astoria from 1993 through 2001 and he was the General Director of Open Joint Stock Company Astoria Management and Consulting Group from 1997 through 2001; Chairman of the Board of Directors of

Open Joint Stock Company Tsentrgaz (since April 2002); member of the Board of Directors of Open Joint Stock Company Druzhba (since June 2002); Member of the Board of Directors of Open Joint Stock Company Zapsibgazprom (since May 2002); member of the Board of Directors of Open Joint Stock Company Zavod po Proizvodstvu Trub Bolshogo Diametra (since May 2002); and Chairman of the Board of Directors of Open Joint Stock Company Krasnodargazstroj.

*A. Kruglov.* Andrei Vyacheslavovich Kruglov has been a member of our Management Committee since 2002 and Head of our Department of Corporate Finance since April 2002. Mr. Kruglov is also a member of the Boards of Directors of Open Joint Stock Company Sibur (since June 2002) and of Joint Stock Company Global Bank for Value Circulation (since September 2002). He was Head of Group of Financial-and-Credit Cooperation of the Department of Technical Cooperation with Foreign Countries and International Organizations of the Managing Department for Foreign Economic Cooperation of St. Petersburg Administration (since 1997); Head of the Department for Foreign Trade and Investments of the Managing Department for Foreign Economic Cooperation of St. Petersburg Administration (since 1999); and Deputy Director of Limited Liability Company Invest-In (2001-2002).

*N. Gornovsky.* Nikolai Nikolaevich Gornovsky has been a member of our Management Committee since 2002. He is also a member of the Board of Directors of Insurance Company Sogaz (since April 2002) and Chairman of the Board of Directors of Limited Liability Company Commercial Bank Gazenergoprombank (since May 2002). He has been the general Director of Limited Liability Company Mezhhregiongaz since January 2002. Mr. Gornovsky was General Director of Open Joint Stock Company Kompaniya Proektnoi Privatizatsii (2000-2002); Counsel to the Chairman of the Russian Fund of Federal Property (2000); and Director, Deputy Director for General Questions and the General Director of Closed Joint Stock Company Annita (1999-2000).

*V. Rezenenko.* Vladimir Ivanovich Rezenenko has been a member of our Management Committee since 1989. He has also been a member of the Board of Directors of Open Joint Stock Company Promgaz since 2002. Mr. Rezenenko was a member of the Board of Directors of Limited Liability Company Gazpromrazvitie (1998-2002); Joint Stock Company Volta (1997-2002); Closed Joint Stock Company Turtsegaz (1997-2002); Closed Joint Stock Company Armrosgazprom (1997-2002); Joint Stock Company Nord Transgaz (1997-2002); Open Joint Stock Company institute Yuzh NII Giprogaz (1997-2002); Closed Joint Stock Company Gaztransit (1997-2002); and Joint Stock Company Rospan International (1997-1998).

*N. Guslisty.* Nikolai Nikiforovich Guslistyi has been a member and Deputy Chairman of our Management Committee since April 1997. He is also Chairman of the Board of Directors of Limited Liability Company Gazprommedstrakh (since April 1998) and Chairman of the Board of Directors of Commercial Bank Olimpiiskii (since February 1998). Mr. Guslistyi was Chairman of the Boards of Directors of Limited Liability Company Volgogradneftemash and of Open Joint Stock Company Lazurnaya (1996-2002); and was a member of the management and General Director of PKP Gazcompromselstroj (1997).

*V. Ilyushin.* Viktor Vasilievich Ilyushin has been a member of our Management Committee since 1997 and the Department Head since May 1997. Mr. Ilyushin is also a member of the Board of Directors of Joint Stock Company Gazprommedstrakh (since June 2002).

*V. Leviev.* Vladimir Arkadievich Leviev has been a member of our Management Committee since September 2002. He is also General Director of Limited Liability Company Gazkomplektimpex (since February 2002). Mr. Leviev was General Director of UGP (FGUP) for the Management of Property Abroad of the Managing Department for the Affairs of the President of the Russian Federation (2000-2002); Head of the Managing Department in the Regional Department of the Ministry of Press, Television and Radio Broadcasting for St. Petersburg and Leningrad area (1999-2000); First Deputy General Director and a member of the Management Committee of Open Joint Stock Company Tele-radio Company Petersburg (1998-1999); General Director and First Deputy Chairman of State Television and Radio Company (STRC) Petersburg-5 kanal (1997-1998); and General Director of Limited Liability Company Margo (1991-1997).

*A. Medvedev.* Alexander Ivanovich Medvedev has been a member of our Management Committee since 2002. He is the General Director of Limited Liability Company Gazexport. Mr. Medvedev was the Director of Company IMAG GmbH (1997, 1998-2002) and Vice-President of Open Joint Stock Company Vostochnaya Neftyanaya Kompaniya (1997-1998).

*V. Podyuk.* Vasili Grigorievich Podyuk has been a member of our Management Committee and Head of our Department for Gas, Gas Condensate and Oil Production since August 1997. He is also a member of the Board of Directors of Open Joint Stock Company Commercial Bank Severgazbank (since April 2002) and a member of the Board of Directors of Closed Joint Stock Company Informgazinvest (since June 2002). Mr. Podyuk was a member of the Board of Directors of Open Joint Stock Company Sibur (2001-2002); a member of the Board of Directors of Gazprom UK Ltd. (1999-2002); and Chairman of the Supervisory Council of Open Joint Stock Company Cherepovetskii Azot (2000-2001).

*K. Seleznev.* Kirill Gennadievich Seleznev has been a member of our Management Committee since September 2002 and is Head of our Department for Marketing and Processing of Gas and Liquid Hydrocarbons. He is also Chairman of the Board of Directors of Closed Joint Stock Company ArmRosgazprom (since June 2002); Chairman of the Board of Directors of Closed Joint Stock Company Sevmorneftegaz (since August 2002); a member of the Board of Directors of Joint Stock Company Latvias Gaze (since June 2002); a member of the Board of Directors of Open Joint Stock Company Sibur (since June 2002); a member of the Board of Directors of Closed Joint Stock Company Rosshelf (since May 2002); and a member of the Board of Directors of Open Joint Stock Company Druzhba (since June 2002). He was the Head of the Tax Group (2000-2001) and Deputy Head of the Administration of the Management of the Open Joint Stock Company Baltic Pipeline System (2001-2002); Chief Specialist of the Group for the Coordination of Investment Activities of Open Joint Stock Company St. Petersburg Sea Port (1999-2000); leading Securities Specialist of the Stock Operations Department of Open Joint Stock Company Investment-and Finance Group Management-Investments-Development (1998-1999); and Manager of Limited Liability Company Baltic Financial Company (1997-1998).

*K. Chuichenko.* Konstantin Anatolievich Chuichenko has been a member of our Management Committee since September 2002 and Head of the Legal Department since May 2001. Mr. Chuichenko is also Chairman of the Board of Directors of Closed Joint Stock Company Gazpromstroieniengineering; a member of the Board of Directors of Closed Joint Stock Company TNT-Teleset (since July 2002); Chairman of the Board of Directors of Open Joint Stock Company Gazprom-Media (since July 2002); Chairman of the Board of Directors of Open Joint Stock Company Zapsibgazprom (since May 2002); a member of the Board of Directors of Open Joint Stock Company Lazurnaya (since June 2002); a member of the Board of Directors of Open Joint Stock Company Gazprommedstrakh (since June 2002); and a member of the Moscow branch of the International St. Petersburg Bar Association (1997-2001).

## **Description of our Management**

In accordance with Russian Law "On Joint Stock Companies" and our Charter, we are governed by our General Meeting of Shareholders, Board of Directors, Management Committee and the Management Committee Chairman. The General Meeting of Shareholders is our highest governing body and, among other things, elects our Board of Directors. In practice, our Board of Directors is responsible for formulating our strategy and the Management Committee is responsible for implementing the strategy and managing the Company on a day-to-day basis.

### *General Meeting of Shareholders*

The General Meeting of Shareholders takes place annually, usually in June. The following decisions can be taken only by the General Meeting of Shareholders: amendments to the Charter, the reorganization or liquidation of the Company (in accordance with Article 14 of the Russian Federal Law "On Gas Supplies in the Russian Federation"), the election of the members of our Board of Directors and Audit Commission (which is responsible for controlling our operating activities), determination of the quantity, category, nominal price, number of authorized shares, increases in the charter capital (where such decision is reserved for the General Meeting of Shareholders by law and by the Charter), reduction of the charter capital, approval of the annual report and annual accounts, approval of large transactions and transactions that involve interested parties (in accordance with the terms of Chapters X and XI of the Federal Law "On Joint Stock Companies").

### *Board of Directors*

The Board of Directors is responsible for the general management of our activities. At the present time the Board of Directors consists of 11 members. Six members of the Board of Directors hold positions in the Government. The Chairman of the Management Committee, a member of the Management Committee and a member of our administration were all elected to the Board of Directors.

The powers of our Board of Directors include the following: to determine the priorities of our operations; to approve annual budgets; to call General Meetings of Shareholders and to determine the agenda for such meetings; to determine the record date for General Meetings of Shareholders and for the payment of dividends; to increase our charter capital (except where such increase is within the competence of the General Meeting of Shareholders); to issue bonds or other securities in accordance with the Law "On Joint Stock Companies"; to appoint our executive bodies (i.e. the Management Committee and the Chairman of the Management Committee); to decide on early termination of the powers of these bodies; to nominate candidates for the position of Deputy Chairman of the Management Committee; to determine the remuneration of the Chairman and members of the Management Committee; to recommend the size of dividends; to use the reserve and other funds; to create branch and representative offices; to specify the means of effecting transactions; to adopt decisions on certain major transactions and certain "interested party" transactions; and to establish the terms of cooperation with subsidiaries and organizations of which Gazprom holds stock and equity participations.

Members of the Board of Directors are elected by the shareholders through a system of cumulative voting for terms of one year and may be re-elected any number of times. The General Meeting of Shareholders may also terminate the authority of all members of the Board of Directors. Members of the Management Committee may not comprise more than one-quarter of the Board of Directors and there must be at least nine Directors at all times. The Chairman of the Board of Directors is elected by the members of the Board of Directors by a majority vote of all members of the Board of Directors and may be re-elected at any time by a special resolution requiring at least a two-thirds majority. The Chairman of the Management Committee cannot simultaneously serve as the Chairman of the Board of Directors.

#### *Management Committee*

The Management Committee and the Chairman of the Management Committee manage our day-to-day affairs. The Chairman and members of the Management Committee are appointed by the Board of Directors for a term of five years. The Board of Directors has the right to terminate the authority of any Management Committee members as well as the Chairman of the Management Committee.

The competence of the Management Committee includes: (i) development of forward-looking plans and principal programs, including our annual budget and investment programs, preparation of reports on the implementation of those programs for submission to our Board of Directors; (ii) organization of gas flow management and management of the UGSS; (iii) organizing control over the development of our current and prospective plans and programs; (iv) exercising control for securing the organization and reliability of our bookkeeping accounts and the timely preparation of the annual report and other financial reports; and (iv) presenting information about our activities for the use of shareholders, creditors, and the media.

The Management Committee meets at least twice every month in accordance with a schedule which is approved by the Chairman of the Management Committee.

#### *Chairman of the Management Committee*

The Chairman of the Management Committee has authority to act in our name without power of attorney, present our interests, approve staff, issue orders and decrees, give instructions to be carried out by all the employees of Gazprom, and issue internal documents with respect to the current activities with the exception of internal documents which are within the competence of our other management organs.

### **Additional Information about our Directors and Management Committee Members**

#### *Directors' and Officers' Compensation*

Our shareholders determine the compensation of directors at each General Meeting of Shareholders. Our Charter does not contain any provisions directly relating to the power of directors to approve remuneration (including pensions or other benefits) for themselves or any other member of our Board of Directors.

In the year ended December 31, 2002, we paid compensation (salaries and bonuses) to our directors and members of the Management Committee of RR81 million.

#### *Share Ownership of Directors, Management Committee Members and Employees*

The aggregate direct ownership of shares by the members of our Management Committee and Board of Directors was 0.019% and 0.003%, respectively, at September 30, 2002.

## SHAREHOLDING STRUCTURE

As of December 31, 2002, our charter capital was RR118,367,564,500, consisting of 23,673,512,900 shares with a nominal value of RR5 each.

Pursuant to Government Resolution No. 654 of May 30, 1997, our shares are traded in Russia on the Moscow Stock Exchange, the St. Petersburg Stock Exchange, the Yekaterinburg Stock Exchange and the Siberian Stock Exchange.

We have held shareholders' meetings since 1995. The number of our shareholders has decreased from 1,029,998 in 1995 to approximately 506,282 as at June 28, 2002.

Presidential Decree of the Russian Federation No. 529 of May 28, 1997 limited foreign equity participation in the Company to 9% of our shares. Presidential Decree of the Russian Federation No. 943 of August 10, 1998 authorized the sale of a further 5% of our shares to foreign shareholders. Only 2.5% out of the 5% authorized has actually been sold and therefore the current level of foreign equity participation is currently 11.5%. The Gas Supply Law also limits foreign shareholdings in our charter capital to 20%.

In 1996, we placed shares representing 1.98% of our charter capital on the foreign markets in the form of American Depositary Shares ("ADS"). Due to the restrictions on foreign equity ownership that prevent the purchase of our shares by foreign participants in the domestic market, the issue of ADSs created a dual market in our shares, with the ADSs trading at a substantial premium over our shares in the domestic market. In 1999, Ruhrgas acquired 1% of our shares in the form of ADSs. Between December 2000 and January 2001 an additional 1.44% of our shares were sold to foreign investors in the form of ADSs. Currently, 4.42% of our shares are held in the form of ADSs. Our ADSs are currently listed on the London Stock Exchange. In April 2001, President Putin established a working group to examine ways in which to liberalize the current dual market in our shares.

The following table summarizes our shareholding structure as at December 31, 2002:

<u>Shareholders</u>	<u>%</u>
Russian Federation <sup>(1)</sup> .....	38.37
Our subsidiaries <sup>(2)</sup> .....	15.11
Foreign shareholders other than our subsidiaries <sup>(3)</sup> .....	6.92
Other <sup>(4)</sup> .....	39.60
<b>Total</b> .....	<u><u>100.00</u></u>

Notes:

- (1) Six of the 11 members of our Board of Directors are representatives of the Government.
- (2) Includes (i) 4.83% previously held by Stroytransgaz and currently held by one of our subsidiaries and Stroytransgaz pursuant to a joint activity agreement entered into in 2002 under which we have the right to vote the shares; (ii) 4.58% held by Gazprom Finance B.V., Gazprom's wholly-owned financial vehicle, which shareholding is intended to be used to secure Gazprom's liabilities and issue derivative financial instruments; and (iii) 4.70% held by the Gazprom pension fund. Our subsidiaries are entitled to vote the shares they own.
- (3) Includes Ruhrgas holdings of (i) 2.5% of Gazprom shares acquired through a privatization auction which was held pursuant to Presidential Decree No. 1316 of October 31, 1998; and (ii) 1% in the form of ADSs.
- (4) Includes shares held by our employees.

## CERTAIN TRANSACTIONS

### Interested Party Transaction under Russian Law

Russian law requires a company that enters into transactions with certain types of its affiliates that are referred to as "interested party transactions" to comply with special approval procedures. Under Russian law, an "interested party" includes (i) members of the board of directors or the collegial executive body of the company, (ii) the CEO of the company (including a managing organization or manager), (iii) any person that owns, together with that person's affiliates, at least 20% of the company's voting shares or (iv) a person who on legal grounds has the right to give mandatory instructions to the company, if any of the above listed persons, or a close relative or affiliate of such person, is:

- a party to a transaction with the company, whether directly or as a representative or intermediary, or a beneficiary of the transaction;
- the owner of at least 20% of the shares in a company that is a party to a transaction with the company, whether directly or as a representative or intermediary, or a beneficiary of the transaction; or
- a member of the board of directors or the collegial executive body or the CEO of a company that is a party to a transaction with the company, whether directly or as a representative or intermediary, or a beneficiary of the transaction or an officer of the managing organization of such company.

Transactions between members of a consolidated corporate group may be considered to be interested party transactions in certain circumstances, even when the companies involved are wholly-owned by the parent company.

Under applicable Russian law, interested party transactions are to be approved by a majority of the disinterested independent members of the board of directors of the company. Where all the directors are interested, or are not independent, or if the subject matter of the transaction exceeds 2% of the balance sheet assets of the company determined under Russian accounting principles (with certain exceptions for share placements), a majority vote of the disinterested shareholders of the company is required. The consequence of not having obtained the appropriate approval is that the transaction in question may be declared invalid upon a claim by the company or any of its shareholders.

In certain circumstances, such as when an interested party transaction is entered into between companies within our Group, the transaction will not always be submitted to the boards of directors of the companies for advance approval because, under Russian law, the lack of advance approval makes the transaction voidable, but not void. If any transaction is challenged in court, the matter of approving it will be submitted for consideration to the boards of directors. In 2000, 2001 and 2002, the Board of Directors of OAO Gazprom approved certain transactions after, rather than before, they were consummated, and since 1996 the Board of Directors has never recognized any such transaction to be contrary to OAO Gazprom's interests or denied approval thereof *post factum*. In accordance with certain existing judicial practice with respect to the consideration of claims seeking the invalidation of transactions in other legal contexts, *post factum* approval has been regarded as being a sufficient basis for the claim to be rejected. While there can be no assurance that a claim for a violation of the interested party transaction approval requirements would also be rejected, we have proceeded when we have believed it to be necessary to do so on the basis that judicial practice in this area would be similar. However, on the basis that the Joint Stock Company Law, following the amendments which became effective on January 1, 2002, now explicitly requires that interested party transactions should be approved in advance, it is unclear whether future judicial practice will uphold *post factum* approval of interested party transactions concluded after January 1, 2002.

We have put in place procedures to monitor our interested party transactions, which include keeping a register of all such transactions and maintaining a quarterly-updated database of information provided to us by our managers and directors about companies in which they or their families hold positions on management bodies or have equity interests. In addition, our Board of Directors adopted a resolution on September 27, 2002 whereby all transactions, whether with interested parties or not, involving (i) shares, interests or participations held by us or our subsidiaries in other companies; (ii) loans or other borrowings having a value of greater than 0.3% of our balance sheet assets determined under Russian accounting principles; or (iii) purchases or disposals of fixed assets having a value greater than 0.3% of our balance sheet assets determined under Russian accounting principles require prior approval by our Board of Directors.

The foregoing information relates to transactions and agreements entered into by our parent company, OAO Gazprom. Our subsidiaries are subject to the same (or similar) legal requirements regarding the approval of interested party transactions.

## **Transactions with the Government of the Russian Federation**

The Government owns approximately 38.37% of our issued shares and controls our Board of Directors. See “Business—Marketing—Delayed Payments for Gas Deliveries in Russia” and “Risk Factors—Risks Relating to our Business—The Government has exercised, and can continue to be expected to exercise, a strong influence over our operations.” In the normal course of our business, we sell gas to the Government and certain Government-owned or -controlled entities. The price at which we sell gas to these entities is the same regulated price at which we sell gas to other domestic consumers. Some of these entities fall into the category of consumers whom we are prevented from disconnecting pursuant to Government regulation.

## **Transactions with Stroytransgaz**

Certain former members of our Board of Directors and members of their families own or owned significant shareholdings in Stroytransgaz. In the mid-1990s, Stroytransgaz acquired about 5% of our shares as part of the settlement of a debt owed by us to Stroytransgaz for various construction services Stroytransgaz provided. The shares we transferred to Stroytransgaz were part of a 10% block of our shares that we and our subsidiary Gazfund acquired from the Government in 1995 for nominal value using privatization vouchers. This nominal value was used as the basis for determining the number of shares to be transferred to Stroytransgaz in respect of the debt we owed them for the construction services they provided. We recently challenged this transaction with Stroytransgaz and have now reached an agreement for the return of 4.83% of our shares to one of our subsidiaries. The agreement is in the process of being implemented, and these shares are currently held jointly by one of our subsidiaries and Stroytransgaz pursuant to a joint activity agreement under which we have the right to vote the shares.

In the normal course of business, we enter into transactions with Stroytransgaz for the construction of pipelines in the Russian Federation which we outsource to third-party contractors through a tender process. Stroytransgaz has been a successful bidder in a large number of these tenders. Stroytransgaz rendered construction services for us in the amounts of RR41,135 million and RR28,141 million during 2001 and 2000, respectively.

## **Transactions with Interprokom**

Family members of certain former members of our Board of Directors and a member of the Management Committee own significant interests in Interprokom.

Interprokom acts as our agent in the acquisition of equipment and is remunerated for those services based on a fixed commission percentage. Interprokom acted as an agent in our acquisition of RR10,086 million and RR5,482 million of equipment during 2001 and 2000, respectively. Commissions paid to Interprokom amounted to RR93 million and RR72 million during 2001 and 2000, respectively.

Gazprombank, our principal banking subsidiary, had outstanding import letters of credit issued on behalf of Interprokom and sub-contractors of Interprokom in the amount of RR9,353 million and RR10,633 million as of December 31, 2001 and 2000, respectively. These import letters of credit are issued to third-party suppliers in connection with the purchase of equipment by Interprokom on our behalf.

## **Transactions with Itera**

Beginning around 1997, under our previous management, we entered into a number of transactions with Itera, a company that operates as an independent supplier of gas in Russia and the FSU. Certain of these transactions were questioned by some of our minority shareholders. The transactions involved acquisitions by Itera of interests in certain of our gas fields, tax arrangements involving Itera in the Yamal-Nenets and Nadym-Pur-Taz regions of Russia, purchases of gas from Itera, the transportation of gas owned by Itera through the UGSS, loans to Itera and guarantees of Itera indebtedness. In early 2001, our Board of Directors appointed our independent auditors, PricewaterhouseCoopers, to examine certain aspects of our financial and operating activities and, in particular, our operating relationship with Itera. PricewaterhouseCoopers presented its report (the “Report”) at a meeting of our Board of Directors in July 2001. The Report made certain recommendations, some of which have been implemented and others of which are in the process of being implemented. Partly as a result of the Report, we intensified our asset reacquisition program through which we have reacquired, and are seeking to reacquire, assets from Itera. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Certain Acquisitions and Dispositions—Our asset reacquisition program.”

## LOAN AGREEMENT

*The following is the text of the Loan Agreement that has been entered into between us and the Bank.*

**LOAN AGREEMENT**, dated • 2003 **between:**

- (1) **OPEN JOINT STOCK COMPANY GAZPROM**, a company established under the laws of the Russian Federation whose registered office is at 16 Nametkina Street, 117884 Moscow, Russian Federation (“**Gazprom**”); and
- (2) **MORGAN STANLEY BANK AG**, a bank established under the laws of the Federal Republic of Germany whose registered office is at Junghofstrasse 13-15, 60311 Frankfurt am Main, Federal Republic of Germany (the “**Bank**”).

**Whereas**, the Bank has at the request of Gazprom agreed to make available to Gazprom a loan facility in the amount of U.S.\$• on the terms and subject to the conditions of this Agreement; and

**Whereas**, it is intended that the Bank will issue certain loan participation notes based on amounts payable by Gazprom under the loan facility.

Now it is hereby agreed as follows:

### **1 Definitions and Interpretation**

#### **1.1 Definitions**

In this Agreement (including the recitals), the following terms shall have the meanings indicated:

“**Advance**” means the advance to be made under Clause 3 of the sum equal to the amount of the Facility.

“**Affiliates**” of any specified Person means any other Person, directly or indirectly, controlling or controlled by or under direct or indirect control with such specified Person. For the purposes of this definition, “control” when used with respect to any Person means the power to direct the management and policies of such Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise; and the terms “controlling” and “controlled” have meanings correlative to the foregoing.

“**Agreed Form**” means that the form of the document in question has been agreed between the proposed parties thereto and that either a copy thereof has been signed for the purpose of identification on behalf of each of Linklaters and Cleary, Gottlieb, Steen and Hamilton, Moscow, or such document has been signed on behalf of the parties thereto and delivered to Linklaters to be held in escrow pending release on the Closing Date.

“**Agreement**” means this Agreement as originally executed or as it may be amended from time to time.

“**Business Day**” means a day on which (a) the London Interbank Market is open for dealings between banks generally, and (b) if on that day a payment is to be made hereunder, commercial banks generally are open for business in Frankfurt am Main, New York City and in the city where the specified office of the Principal Paying Agent is located.

“**Consolidated Net Tangible Assets**” means the total of all assets less (i) total liabilities, (ii) goodwill, trade names, trade marks, service marks, patents, licences, organisational expenses, research and development expenses, unamortised debt discount and expense, unamortised deferred charges and all other like intangible assets, (iii) all write-ups of fixed assets, net of accumulated depreciation thereon, after 30 September 2002 excluding, for the avoidance of doubt, any restatement for changes in the general purchasing power of the Rouble in accordance with IAS 29 “Financial Reporting in Hyperinflationary Economics” and revaluations supported by an independent appraisal completed by an appropriately qualified firm and (iv) preferred stock, if any, all as set forth on the most recent consolidated balance sheet of Gazprom and its consolidated Subsidiaries prepared in accordance with IAS, as consistently applied.

“**Dollars**”, “**\$**” and “**U.S.\$**” means the lawful currency of the United States of America.

“**Encumbrance**” means any mortgage, charge, pledge, lien (other than a lien arising solely by operation of law which is discharged within 45 days of arising) or other security interest securing any obligation of

any Person or any other type of preferential arrangement (including any title transfer and retention arrangement) having a similar effect.

**“Environmental Law”** means any applicable law in any jurisdiction in which any member of the Group conducts business which relates to the pollution or protection of the environment or harm to or the protection of human health or the health of animals or plants.

**“Event of Default”** has the meaning assigned to such term in sub-Clause 11.1 hereof.

**“Facility”** means the facility specified in Clause 2.

**“Financial Indebtedness”** means any obligation for the payment of money in any currency, other than an obligation for the payment of money in the lawful currency for the time being of the Russian Federation payable to any person domiciled, resident or having its head office or principal place of business in the Russian Federation, whether sole, joint or several, and whether actual or contingent, in respect of:

- (a) moneys borrowed or raised (including the capitalised value of obligations under financial leases and hire purchase agreements and deposits, but excluding moneys raised by way of the issue of share capital (whether or not for a cash consideration) and any premium on such share capital) and interest and other charges thereon or in respect thereof;
- (b) any liability under any debenture, bond, note, loan stock or other security or under any acceptance or documentary credit, bill discounting or note purchase facility or any similar instrument;
- (c) any liability in respect of the deferred acquisition cost of property, assets or services to the extent payable after the time of acquisition or possession thereof by the party liable, but not including any such liability in respect of normal trade credit for a period not exceeding six months for goods or services supplied;
- (d) any liability under any interest rate or currency hedging agreement;
- (e) any liability under or in respect of any bonding facility, guarantee facility or similar facility; and
- (f) (without double counting) any guarantee or other assurance against financial loss in respect of such moneys borrowed or raised, interest, charges or other liability (whether the person liable in respect of such moneys borrowed or raised, interest, charges or other liability is or is not a member of the Group),

but not where the same relates to or is in connection with any Project Financing.

**“Group”** means Gazprom and its Subsidiaries taken as a whole.

**“IAS”** means the International Accounting Standards issued by the International Accounting Standards Board (as amended, supplemented or re-issued from time to time).

**“Interest Payment Date”** means ● and ● of each year.

**“Loan”**, at any time, means an amount equal to the aggregate principal amount of the Facility granted by the Bank pursuant to this Agreement.

**“Material Adverse Effect”** means a material adverse effect on (a) the financial condition or operations of Gazprom or its Principal Subsidiaries or (b) Gazprom’s ability to perform its obligations under this Agreement or (c) the validity, legality or enforceability of this Agreement or the rights or remedies of the Bank under this Agreement.

**“Notes”** means the U.S.\$● ● per cent. loan participation notes due 2013 proposed to be issued by the Bank pursuant to the Trust Deed for the purpose of financing the Loan.

**“Noteholder”** means the person in whose name the Note is registered in the register of the noteholders (or in the case of joint holders, the first named holder thereof).

**“Officers’ Certificate”** means a certificate signed by an officer of Gazprom who shall be the principal executive officer, principal accounting officer or principal financial officer of Gazprom.

**“Opinion of Counsel”** means a written opinion from international legal counsel who is acceptable to the Bank.

**“Paying Agency Agreement”** means the paying agency agreement dated the date hereof, as amended, varied or supplemented between the Bank, Gazprom, The Bank of New York and Kredietbank S.A. Luxembourgise relating to the Notes.

**“Permitted Encumbrance”** means:

- (i) any Encumbrance existing on the date of this Agreement;
- (ii) any Encumbrance existing on any property, income or assets of any corporation at the time such corporation becomes a Subsidiary of Gazprom and not created in contemplation of such event, provided that no such Encumbrance shall extend to any other property, income or assets;
- (iii) any Encumbrance on any property, income or assets of any corporation existing at the time such corporation is merged or consolidated with or into Gazprom or any Subsidiary of Gazprom and not created in contemplation of such event, provided that no such Encumbrance shall extend to any other property, income or assets;
- (iv) any Encumbrance on any property or assets securing Financial Indebtedness of Gazprom or any Subsidiary incurred or assumed for the purpose of financing all or part of the cost of acquiring, purchasing, constructing or developing such property or assets, provided that no such Encumbrance shall extend to any other property or assets, the principal amount of the Financial Indebtedness secured by such Encumbrance shall not exceed the cost of acquiring, purchasing, constructing or developing such property or assets, and such Encumbrance attaches to such property or assets concurrently with or within 90 days after the acquisition or purchase, or the commencement of the construction or development, thereof;
- (v) any Encumbrance on any property or assets securing Financial Indebtedness of Gazprom or any Subsidiary incurred or assumed for the purpose of financing all or part of the cost of repairing or refurbishing such property or assets, provided that no such Encumbrance shall extend to any other property or assets, the principal amount of the Financial Indebtedness secured by such Encumbrance shall not exceed the cost of such repairs or refurbishments, and such Encumbrance attaches to such property or assets concurrently with or within 90 days after the commencement of such repairs or refurbishments;
- (vi) any Encumbrance existing on any property, income or assets prior to the acquisition thereof by Gazprom or any Subsidiary and not created in contemplation of such acquisition, provided that no such Encumbrance shall extend to any other property, income or assets;
- (vii) any Encumbrance on the property, income or assets of any Subsidiary securing intercompany Financial Indebtedness of such Subsidiary owing to Gazprom or another Subsidiary;
- (viii) any Encumbrance securing Financial Indebtedness incurred in connection with a Project Financing if the Encumbrance is solely on the property, income, assets or revenues of the project for which the financing was incurred;
- (ix) any Encumbrance securing Financial Indebtedness not exceeding 50 per cent. of Gazprom’s Consolidated Net Tangible Assets at any time of determination;
- (x) any Encumbrance arising out of the refinancing, extension, renewal or refunding of any Financial Indebtedness of Gazprom or any Subsidiary secured by any Permitted Encumbrance, provided that such Financial Indebtedness is not increased and, if the property, income or assets securing any such Financial Indebtedness are changed in connection with any such refinancing, extension, renewal or refunding, the value of the property, income or assets securing such Financial Indebtedness is not increased;
- (xi) any Encumbrance over any goods or products, or documents, insurance policies or sale contracts in relation to any goods or products, arising in the ordinary course of trading in connection with the provision of a letter of credit or any similar transaction where such Encumbrance secures only so much of the acquisition cost or selling price (and amounts incidental thereto) of such goods or products which is required to be paid within 120 days after the date upon which liability in respect of the same was first incurred; and
- (xii) a right of set-off, right to combine accounts or any analogous right which any bank or other financial institution may have relating to any credit balance of any member of the Group.

“**Person**” means any individual, corporation, partnership, limited liability company, joint venture, association, joint-stock company, trust, unincorporated organization, government, or any agency or political subdivision thereof or any other entity.

“**Potential Event of Default**” means any event which is, or after notice or passage of time or both would be, an Event of Default.

“**Principal Subsidiary**” means at any relevant time a Subsidiary of Gazprom:

- (i) whose total assets or gross revenues (or, where the Subsidiary in question prepares consolidated accounts, whose total consolidated assets or gross consolidated revenues, as the case may be) represent not less than 5 per cent. of the total consolidated assets or the gross consolidated revenues of Gazprom and its Subsidiaries, all as calculated by reference to the then latest audited accounts (or consolidated accounts as the case may be) (in each case, produced on the basis of IAS, consistently applied) of such Subsidiary and the then latest audited consolidated accounts of Gazprom (produced on the basis of IAS, consistently applied) and its consolidated Subsidiaries; or
- (ii) to which is transferred all or substantially all the assets and undertaking of a Subsidiary which immediately prior to such transfer is a Principal Subsidiary.

“**Project Financing**” means any financing of all or part of the costs of the acquisition, construction, development or operation of any asset or project if the person or persons providing such financing expressly agrees to limit its recourse solely to the asset or project financed and the revenues derived from such asset or project as the principal source of repayment for the moneys advanced.

“**Rate of Interest**” has the meaning assigned to such term in sub-Clause 4.1.

“**Repayment Date**” means ●, 2013.

“**Roubles**” means the lawful currency of the Russian Federation.

“**Same-Day Funds**” means Dollar funds settled through the New York Clearing House Interbank Payments System or such other funds for payment in Dollars as the Bank may at any time determine to be customary for the settlement of international transactions in New York City of the type contemplated hereby.

“**Subscription Agreement**” means the agreement dated the date hereof between the Bank, Gazprom, Dresdner Bank AG London Branch and Morgan Stanley & Co. International Limited providing for the issuance of the Notes.

“**Subsidiary**” means, with respect to any Person, (i) any corporation, association or other business entity of which at least 50 per cent. of the total voting power entitled (without regard to the occurrence of any contingency) to vote in the election of directors, managers or trustees thereof is at the time owned or controlled, directly or indirectly, by such Person or one or more of the other Subsidiaries of such Person (or any combination thereof) and (ii) any partnership (a) the sole general partner or the managing general partner of which is such Person or a Subsidiary of such person or (b) the only general partners of which are such Person or of one or more Subsidiaries of such Person (or any combination thereof).

“**Taxes**” means any taxes (including interest or penalties thereon) which are now or at any time hereafter imposed, assessed, charged, levied, collected, demanded, withheld or claimed by the Russian Federation, the Federal Republic of Germany or any taxing authority thereof or therein provided, however, that for the purposes of this definition the references to the Federal Republic of Germany shall, upon the occurrence of the Relevant Event (as this term is defined in the Trust Deed), be deemed to be references to the jurisdiction in which the Trustee is domiciled for tax purposes; and the term “Taxation” shall be construed accordingly.

“**Trust Deed**” means the trust deed to constitute the Notes for the equal and rateable benefit of the Noteholders to be dated the Closing Date between the Bank and the Trustee as amended, varied or supplemented from time to time.

“**Trustee**” means The Bank of New York acting through its London Branch, as trustee under the Trust Deed and any successor thereto as provided thereunder.

## **1.2 Other Definitions**

Unless the context otherwise requires, terms used in this Agreement which are not defined in this Agreement but which are defined in the Trust Deed, the Notes, the Paying Agency Agreement or the Subscription Agreement shall have the meanings assigned to such terms therein.

## **1.3 Interpretation**

Unless the context or the express provisions of this Agreement otherwise require, the following shall govern the interpretation of this Agreement:

**1.3.1** All references to "Clause" or "sub-Clause" are references to a Clause or sub-Clause of this Agreement.

**1.3.2** The terms "hereof", "herein" and "hereunder" and other words of similar import shall mean this Agreement as a whole and not any particular part hereof.

**1.3.3** Words importing the singular number include the plural and vice versa.

**1.3.4** All references to "taxes" include all present or future taxes, levies, imposts and duties of any nature and the terms "tax" and "taxation" shall be construed accordingly.

**1.3.5** The table of contents and the headings are for convenience only and shall not affect the construction hereof.

## **2 Facility**

### **2.1 Facility**

On the terms and subject to the conditions set forth herein, the Bank hereby agrees to lend Gazprom, and Gazprom hereby agrees to borrow from the Bank, U.S.\$●.

### **2.2 Purpose**

The proceeds of the Advance will be used for general corporate purposes, including, in particular, retirement of short term indebtedness, but the Bank shall not be concerned with the application thereof.

### **2.3 Facility Fee**

In connection with the Facility, Gazprom shall pay a fee in Dollars to the Bank equal to U.S.\$●.

## **3 Drawdown**

### **3.1 Drawdown**

On the terms and subject to the conditions set forth herein, on the Closing Date the Bank shall make the Advance to Gazprom and Gazprom shall make a single drawing in the full amount of the Facility.

### **3.2 Fees and Expenses**

In consideration of the Bank making the Advance to Gazprom, Gazprom hereby agrees that it shall, two Business Days before the Closing Date, pay to the Bank, in Same-Day Funds, the amount of the reimbursable expenses incurred by the Bank, which expenses shall include the amount of all of the commissions, fees, costs and expenses as set forth in sub-Clauses 8.1, 8.2 and 8.3 of the Subscription Agreement, sub-Clause 11.1 of the Paying Agency Agreement, Clauses 1 and 4 of the side letter between the Trustee, the Bank and Gazprom dated ● 2003 (the "Trustee Side Letter") and sub-Clauses 2.3 and 13.1 hereof pursuant to an invoice submitted by the Bank to Gazprom in the total amount of U.S.\$●.

### **3.3 Disbursement**

Subject to the conditions set forth herein, on the Closing Date the Bank shall transfer the amount of the Advance to Gazprom's account number ● at Gazprombank Moscow, Swift Code: GAZPRUMM, Account Number: ● at Deutsche Bank Trust Company Americas, New York, NY, Swift Code: BKTR US33.

## **4 Interest**

### **4.1 Rate of Interest**

Gazprom will pay interest in Dollars to the Bank on the outstanding principal amount of the Loan from time to time hereunder at the rate of ● per cent. per annum (the "Rate of Interest").

## **4.2 Payment**

Interest at the rate specified in Clause 4.1 above shall accrue from day to day, starting from (and including) the Closing Date and shall be paid in arrear not later than 10.00 a.m. (New York City time) one Business Day prior to each Interest Payment Date. Interest on the Loan will cease to accrue from the due date for repayment thereof unless payment of principal is improperly withheld or refused, in which event interest will continue to accrue (before or after any judgment) at the Rate of Interest to but excluding the date on which payment in full of the principal thereof is made. If interest is required to be calculated for a period of less than one year, it will be calculated on the basis of a 360-day year consisting of 12 months of 30 days each and, in the case of an incomplete month the number of days elapsed.

## **5 Repayment and Prepayment**

### **5.1 Repayment**

Except as otherwise provided herein, Gazprom shall repay the Loan not later than 10.00 a.m. (New York City time) one Business Day prior to the Repayment Date.

### **5.2 Special Prepayment**

If, as a result of the application of or any amendments to or change in the double tax treaty between the Russian Federation and the Federal Republic of Germany or the laws or regulations of the Russian Federation or the Federal Republic of Germany or of any political sub-division thereof or any authority therein or the enforcement of the security provided for in the Trust Deed, Gazprom would thereby be required to make or increase any payment due hereunder as provided in sub-Clauses 6.2 or 6.3, or if (for whatever reason) Gazprom would have to or has been required to pay additional amounts pursuant to Clause 8, then Gazprom may (without premium or penalty), upon not less than 10 days' notice to the Bank (which notice shall be irrevocable), prepay the Loan in whole (but not in part).

### **5.3 Illegality**

If, at any time, by reason of the introduction of any change after the date of this Agreement in any applicable law or regulation or regulatory requirement or directive of any agency of any state the Bank reasonably determines (such determination being accompanied by an Opinion of Counsel with the cost of such Opinion of Counsel being borne solely by Gazprom) that it is or would be unlawful or contrary to such applicable law, regulation, regulatory requirement or directive for the Bank to allow all or part of the Loan or the Notes to remain outstanding or for the Bank to maintain or give effect to any of its obligations in connection with this Agreement and/or to charge or receive or to be paid interest at the rate then applicable to the Loan, then upon notice by the Bank to Gazprom in writing (setting out in reasonable detail the nature and extent of the relevant circumstances), Gazprom and the Bank shall consult in good faith as to a basis which eliminates the application of such circumstances; provided, however, that the Bank shall be under no obligation to continue such consultation if a basis has not been determined within 30 days of the date on which it so notified Gazprom. If such a basis has not been determined within the 30 days, then upon notice by the Bank to Gazprom in writing, Gazprom shall prepay the Loan in whole (but not in part) on the next Interest Payment Date or on such earlier date as the Bank shall certify to be necessary to comply with such requirements.

### **5.4 Payment of Other Amounts**

If the Loan is to be prepaid by Gazprom pursuant to any of the provisions of Clauses 5.2 or 5.3, Gazprom shall, simultaneously with such prepayment, pay to the Bank accrued interest thereon to the date of actual payment and all other sums payable by Gazprom pursuant to this Agreement.

### **5.5 Provisions Exclusive**

Gazprom may not voluntarily prepay the Loan except in accordance with the express terms of this Agreement. Any amount prepaid may not be reborrowed.

## **6 Payments**

### **6.1 Making of Payments**

All payments of principal and interest to be made by Gazprom under this Agreement shall be made to the Bank not later than 10.00 a.m. (New York City time) one Business Day prior to each Interest Payment Date or the Repayment Date (as the case may be) in Same-Day Funds to the Bank's account

no. 5851498400 with the Principal Paying Agent. The Bank agrees with Gazprom that it will not deposit any other monies into such account and that no withdrawals shall be made from such account other than as provided for and in accordance with the Trust Deed and the Paying Agency Agreement.

**6.2 No Set-Off, Counterclaim or Withholding; Gross-Up**

All payments to be made by Gazprom under this Agreement shall be made in full without set-off or counterclaim and (except to the extent required by law) free and clear of and without deduction for or on account of any Taxes. If Gazprom shall be required by applicable law to make any deduction or withholding from any payment under this Agreement for or on account of any Taxes, it shall increase any payment due hereunder to such amount as may be necessary to ensure that the Bank receives a net amount in Dollars equal to the full amount which it would have received had payment not been made subject to such Taxes, shall account to the relevant authorities for the relevant amount of such Taxes so withheld or deducted within the time allowed for such payment under the applicable law and shall deliver to the Bank without undue delay evidence satisfactory to the Bank of such deduction or withholding and of the accounting therefor to the relevant taxing authority. If the Bank pays any amount in respect of such Taxes, Gazprom shall reimburse the Bank in Dollars for such payment on demand. For the avoidance of doubt, this Clause 6.2 is without prejudice to the obligation of the Bank to use its best endeavours to obtain a certificate from the competent German authorities pursuant to Clause 10.7.1

**6.3 Withholding on Notes**

If the Bank notifies Gazprom (setting out in reasonable detail the nature and extent of the obligation with such evidence as Gazprom may reasonably require) that it has become obliged to make any withholding or deduction for or on account of any Taxes from any payment which it is obliged to make under or in respect of the Notes in circumstances where the Bank is required to pay additional amounts pursuant to Condition 8 of the Notes as set out in Schedule 2 of the Trust Deed, Gazprom agrees to pay to the Bank, not later than 10:00 am (New York City time) one Business Day prior to the date on which payment is due to the Noteholders in Same-Day Funds to the Bank's account no. 5851498400 with the Principal Paying Agent, such additional amounts as are equal to the said additional amounts which the Bank must pay pursuant to Condition 8 of the Notes as set out in Schedule 2 of the Trust Deed; provided, however, that the Bank shall immediately upon receipt from any Paying Agent of any sums paid pursuant to this provision, to the extent that the Noteholders, as the case may be, are not entitled to such additional amounts pursuant to the terms and conditions of the Notes, pay such additional amounts to Gazprom (it being understood that neither the Bank, nor the Principal Paying Agent nor any Paying Agent shall have any obligation to determine whether any Noteholder is entitled to such additional amount).

**6.4 Reimbursement**

To the extent that the Bank subsequently obtains or uses any tax credit or allowance or other reimbursements relating to a deduction or withholding with respect to which Gazprom has made a payment pursuant to this Clause 6 or obtains any reimbursement from the Trustee pursuant to the terms of the Trust Deed, it shall pay to Gazprom so much of the benefit it received as will leave the Bank in substantially the same position as it would have been had no additional amount been required to be paid by Gazprom pursuant to this Clause 6 or had no reimbursement been paid to the Bank pursuant to the Trust Deed; provided, however, that the question of whether any such benefit has been received, and accordingly, whether any payment should be made to Gazprom, the amount of any such payment and the timing of any such payment, shall be determined solely by the Bank. The Bank shall have the absolute discretion whether, and in what order and manner, it claims any credits or refunds available to it, and the Bank shall in no circumstances be obliged to disclose to Gazprom any information regarding its tax affairs or computations, provided that the Bank shall notify Gazprom of any tax credit or allowance or other reimbursement it receives from the Trustee pursuant to the Trust Deed.

**6.5 Mitigation**

If at any time either party hereto becomes aware of circumstances which would or might, then or thereafter, give rise to an obligation on the part of Gazprom to make any deduction, withholding or payment as described in sub-Clauses 6.2 or 6.3, then, without in any way limiting, reducing or otherwise qualifying the Bank's rights, or Gazprom's obligations, under such Clauses, such party shall promptly upon becoming aware of such circumstances notify the other party, and, thereupon the parties shall consider and consult with each other in good faith with a view to finding, agreeing upon and implementing a method or methods by which any such obligation may be avoided or mitigated and, to the extent that both parties can do so without taking any action which in the reasonable opinion of such party is prejudicial to its own position, take such reasonable steps as may be reasonably available to it to

avoid such obligation or mitigate the effect of such circumstances. Gazprom agrees to reimburse the Bank for all properly incurred costs and expenses (including but not limited to legal fees) incurred by the Bank in connection with this Clause.

## **7 Conditions Precedent**

### **7.1 Documents to be Delivered**

The obligation of the Bank to make the Advance shall be subject to the receipt by the Bank on or prior to the Closing Date of an executed copy of each of the following documents, each (other than the document referred to in sub-Clause 7.1.4 below) dated the Closing Date, in the Agreed Form:

- 7.1.1** An opinion of Cleary, Gottlieb, Steen and Hamilton, Moscow, counsel to Gazprom, regarding issues of Russian law.
- 7.1.2** An opinion of Linklaters regarding issues of English law and Russian law.
- 7.1.3** An opinion of Linklaters Oppenhoff & Rädler regarding issues of German law.
- 7.1.4** A letter from PricewaterhouseCoopers regarding certain tax matters.
- 7.1.5** Evidence that the persons mentioned in sub-Clause 14.10.6 hereof have agreed to receive process in the manner specified therein.

### **7.2 Further Conditions**

The obligation of the Bank to make the Advance shall be subject to the further conditions precedent that as of the Closing Date (a) the representations and warranties made and given by Gazprom in Clause 9 shall be true and accurate as if made and given on the Closing Date with respect to the facts and circumstances then existing, (b) no event shall have occurred and be continuing that constitutes, or that, with the giving of notice or the lapse of time, or both, would constitute, an Event of Default, (c) Gazprom shall not be in breach of any of the terms, conditions and provisions of this Agreement, (d) the Subscription Agreement, the Trust Deed and the Paying Agency Agreement shall have been executed and delivered, and the Bank shall have received the full amount of the proceeds of the issue of the Notes pursuant to the Subscription Agreement and (e) the Bank shall have received in full the amount referred to in sub-Clause 3.2 above.

## **8 Change in Law or Banking Practices; Increase in Cost**

### **8.1 Compensation**

*In the event that after the date of this Agreement there is any change in or introduction of any tax, law, regulation, regulatory requirement or official directive (whether or not having the force of law but, if not having the force of law, the observance of which is in accordance with the generally accepted financial practice of financial institutions in the country concerned) or in the interpretation or application thereof by any person charged with the administration thereof and/or any compliance by the Bank in respect of the Loan or the Facility with any request, policy or guideline (whether or not having the force of law but, if not having the force of law, the observances of which is in accordance with the generally accepted financial practice of financial institutions in the country concerned) from or of any central or other fiscal, monetary or other authority, agency or any official of any such authority, which:*

- 8.1.1** subjects or will subject the Bank to any Taxes with respect to payments of principal of or interest on the Loan or any other amount payable under this Agreement (other than any Taxes payable by the Bank on its overall net income or any Taxes referred to in sub-Clauses 6.2 or 6.3); or
- 8.1.2** increases or will increase the taxation of or changes or will change the basis of taxation of payments to the Bank of principal of or interest on the Loan or any other amount payable under this Agreement (other than any such increase or change which arises by reason of any increase in the rate of tax payable by the Bank on its overall net income or as a result of any Taxes referred to in sub-Clauses 6.2 or 6.3); or
- 8.1.3** imposes, modifies, or deems applicable any capital adequacy, reserve or deposit requirements attributable to this Agreement or to a class of business or transaction which, in the reasonable opinion of the Bank, includes this Agreement, against assets held by, or deposits in or for the amount of, or credit extended by an office of the Bank; provided, however, that the foregoing

shall not include any increase in the rate of tax payable on the overall net income of the Bank as a result of any change in the manner in which the Bank is required to allocate resources to this Agreement; or

**8.1.4** imposes or will impose on the Bank any other condition affecting this Agreement, the Facility or the Loan,

and if as a result of any of the foregoing:

- (i) the cost to the Bank of making, funding or maintaining the Loan or the Facility is increased; or
- (ii) the amount of principal, interest or other amount payable to or received by the Bank hereunder is reduced; or
- (iii) the Bank makes any payment or foregoes any interest or other return on or calculated by reference to the gross amount of any sum receivable by it from Gazprom hereunder or makes any payment or foregoes any interest or other return on or calculated by reference to the gross amount of the Loan, then subject to the following, and in each such case:
  - (A) the Bank shall, as soon as practicable after becoming aware of such increased cost, reduced amount or payment made or foregone, give written notice to Gazprom, together with a certificate signed by two authorised officials of the Bank describing in reasonable detail the introduction or change or request which has occurred and the country or jurisdiction concerned and the nature and date thereof and demonstrating the connection between such introduction, change or request and such increased cost, reduced amount or payment made or foregone, and setting out in reasonable detail the basis on which such amount has been calculated, and all relevant supporting documents evidencing the matters set out in such notes; and
  - (B) Gazprom, in the case of clauses (i) and (iii) above, shall on demand by the Bank, pay to the Bank such additional amount as shall be necessary to compensate the Bank for such increased cost, and, in the case of clause (ii) above, at the time the amount so reduced would otherwise have been payable, pay to the Bank such additional amount as shall be necessary to compensate the Bank for such reduction, payment or foregone interest or other return; provided, however, that in the case of sub-Clause 8.1.3 above (relating to a class of business or transaction which, in the reasonable opinion of the Bank, includes this Agreement), the amount of such increased cost shall be deemed not to exceed an amount equal to the proportion thereof which is directly attributable to this Agreement,

provided that this sub-Clause 8.1 will not apply to or in respect of any matter for which the Bank has already been compensated under sub-Clauses 6.2 or 6.3.

## **8.2 Mitigation**

In the event that the Bank becomes entitled to make a claim pursuant to sub-Clause 8.1, the Bank shall consult in good faith with Gazprom and shall use reasonable efforts (based on the Bank's reasonable interpretation of any relevant tax, law, regulation, requirement, official directive, request, policy or guideline) to reduce, in whole or in part, Gazprom's obligations to pay any additional amount pursuant to such sub-Clause, except that nothing in this sub-Clause 8.2 shall obligate the Bank to incur any costs or expenses in taking any action which, in the reasonable opinion of the Bank, is prejudicial to its interests.

## **9 Representations and Warranties**

### **9.1 Gazprom's Representations and Warranties**

Gazprom represents and warrants to the Bank as follows, to the intent that such shall form the basis of this Agreement and shall remain in full force and effect at the date hereof and shall be deemed to be repeated by Gazprom on the Closing Date:

**9.1.1** Gazprom is duly organised and incorporated and validly existing under the laws of the Russian Federation and has the power and legal right to own its property, to conduct its business as

currently conducted and to enter into and to perform its obligations under this Agreement and to borrow the Advance; Gazprom has taken all necessary corporate, legal and other action required to authorise the borrowing of the Advance on the terms and subject to the conditions of this Agreement and to authorise the execution and delivery of this Agreement and all other documents to be executed and delivered by it in connection with this Agreement, and the performance of this Agreement in accordance with its terms.

- 9.1.2** This Agreement has been duly executed and delivered by Gazprom and constitutes a legal, valid and binding obligation of Gazprom enforceable in accordance with its terms, subject to applicable bankruptcy, insolvency, moratorium and similar laws affecting creditors' rights generally, and subject, as to enforceability, (i) to general principles of equity (regardless of whether enforcement is sought in a proceeding in equity or at law); (ii) with respect to the enforceability of a judgment whether there is a treaty in force relating to the mutual recognition of foreign judgments; and (iii) to the fact that the gross-up provisions contained in sub-Clause 6.2 or 6.3 may not be enforceable under Russian law.
- 9.1.3** The execution, delivery and performance of this Agreement by Gazprom will not conflict with or result in any breach or violation of (i) any law or regulation or any order of any governmental, judicial or public body or authority in the Russian Federation, (ii) the constitutive documents, rules and regulations of Gazprom or (iii) any agreement or other undertaking or instrument to which Gazprom is a party or which is binding upon Gazprom or any of its assets, nor result in the creation or imposition of any Encumbrance on any of its assets pursuant to the provisions of any such agreement or other undertaking or instrument.
- 9.1.4** All consents, authorisations or approvals of, or filings with, any governmental, judicial and public bodies and authorities of the Russian Federation required by Gazprom in connection with the execution, delivery, performance, legality, validity, enforceability, and admissibility in evidence of this Agreement have been obtained or effected and are in full force and effect.
- 9.1.5** No event has occurred that constitutes, or that, with the giving of notice or the lapse of time, or both, would constitute, an Event of Default or a default under any agreement or instrument evidencing any Financial Indebtedness of Gazprom, and no such event will occur upon the making of the Advance.
- 9.1.6** There are no judicial, arbitral or administrative actions, proceedings or claims pending or, to the knowledge of Gazprom, threatened, against Gazprom or any of its Principal Subsidiaries, the adverse determination of which could have a Material Adverse Effect.
- 9.1.7** Except for Encumbrances of the types referred to in the definition of Permitted Encumbrances in sub-Clause 1.1 hereof, Gazprom and each of its Principal Subsidiaries has the right of ownership (as that expression is defined under the laws of the Russian Federation) to its property free and clear of all Encumbrances which if created could have a Material Adverse Effect and Gazprom's obligations under the Loan rank at least *pari passu* with all its other unsecured and unsubordinated Financial Indebtedness (apart from any obligations mandatorily preferred by law).
- 9.1.8** The most recent audited consolidated financial statements of Gazprom:
- (i) were prepared in accordance with IAS, as consistently applied; and
  - (ii) save as disclosed therein, present fairly in all material respects the assets and liabilities as at that date and the results of operations of Gazprom during the relevant financial year.
- 9.1.9** There has been no material adverse change since 30 September 2002 in the financial condition, results of business operations or prospects of Gazprom or the Group taken as a whole.
- 9.1.10** The execution, delivery and enforceability of this Agreement is not subject to any tax, duty, fee or other charge, including, without limitation, any registration or transfer tax, stamp duty or similar levy, imposed by or within the Russian Federation or any political subdivision or taxing authority thereof or therein.
- 9.1.11** Neither Gazprom nor its property has any right of immunity from suit, execution, attachment or other legal process on the grounds of sovereignty or otherwise in respect of any action or proceeding relating in any way to this Agreement.

- 9.1.12 Gazprom is in compliance in all material respects with all applicable provisions of law except where failure to be so in compliance would not have a Material Adverse Effect.
- 9.1.13 Neither Gazprom, nor any of its Principal Subsidiaries has taken any corporate action nor, to the best of the knowledge and belief of Gazprom, have any other steps been taken or legal proceedings been started or threatened in writing against Gazprom or any of its Principal Subsidiaries for its bankruptcy, winding-up, dissolution, external administration or re-organisation (whether by voluntary arrangement, scheme of arrangement or otherwise) or for the appointment of a receiver, administrator, administrative receiver, conservator, custodian, trustee or similar officer of its or of any or all of its assets or revenues.
- 9.1.14 There are no strikes or other employment disputes against Gazprom which are pending or, to Gazprom's knowledge, threatened in writing which could have a Material Adverse Effect.
- 9.1.15 In any proceedings taken in the Russian Federation in relation to this Agreement, the choice of English law as the governing law of this Agreement and any arbitration award obtained in England pursuant to Clause 14.10 in relation to this Agreement will be recognised and enforced in the Russian Federation after compliance with the applicable procedural rules and all other legal requirements in Russia.
- 9.1.16 Under the laws of the Russian Federation, it will not, subject to sub-Clause 10.7.1, be required to make any deduction or withholding from any payment it may make hereunder.
- 9.1.17 Its execution of this Agreement constitutes, and its exercise of its rights and performance of its obligations thereunder will constitute, private and commercial acts done and performed for private and commercial purposes.
- 9.1.18 It has no overdue tax liabilities which could have a Material Adverse Effect other than those which it has disclosed to the Bank prior to the date hereof or which it is contesting in good faith.
- 9.1.19 All licences, consents, examinations, clearances, filings, registrations and authorisations which are or may be necessary to enable Gazprom and any of its Principal Subsidiaries to own its assets and carry on its business are in full force and effect and, if not, the absence of which could have a Material Adverse Effect.
- 9.1.20 With respect to the offer and sale of the Notes pursuant to the Subscription Agreement:
- (i) neither Gazprom nor any of its affiliates, nor any person acting on its or their behalf (i) has made offers or sales of any security, or solicited offers to buy, or otherwise negotiated in respect of, any security, under circumstances that would require the registration of the Notes or the Loan (collectively, the "**Securities**") under the U.S. Securities Act of 1933 (the "**Securities Act**"); or (ii) has engaged in any form of general solicitation of general advertising (within the meaning of Regulation D) in connection with any offer or sale of the Securities in the United States; and
  - (ii) neither Gazprom nor any of its affiliates (as defined in Rule 405 under the Securities Act), nor any person acting on its or their behalf (i) has engaged or will engage in any directed selling efforts (as defined in Regulations S under the Securities Act ("**Regulation S**")) and Gazprom, its Affiliates and any persons acting on its or their behalf have complied and will comply with the offering restrictions requirement of Regulation S.
- 9.1.21 Gazprom, and each of its Principal Subsidiaries, is in compliance with all Environmental Law except where failure to do so could not have a Material Adverse Effect.

## 9.2 Bank's Representations and Warranties

The Bank represents and warrants to Gazprom as follows:

- 9.2.1 The Bank is duly incorporated under the laws of and is a resident for German taxation purposes in the Federal Republic of Germany and has full power and capacity to execute this Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement and to undertake and perform the obligations expressed to be assumed by it herein and therein and the Bank has taken all necessary action to approve and authorise the same.

- 9.2.2** The execution of this Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement and the undertaking and performance by the Bank of the obligations expressed to be assumed by it herein and therein will not conflict with, or result in a breach of or default under, the laws of the Federal Republic of Germany or the constitutive documents, rules and regulations of the Bank or any agreement or instrument to which it is a party or by which it is bound or in respect of indebtedness in relation to which it is a surety.
- 9.2.3** This Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement constitute legal, valid and binding obligations of the Bank.
- 9.2.4** All authorisations, consents and approvals required by the Bank for or in connection with the execution of this Agreement, the Trust Deed, the Paying Agency Agreement and the Subscription Agreement, the performance by the Bank of the obligations expressed to be undertaken by it herein and therein have been obtained and are in full force and effect.

## **10 Covenants**

### **10.1 Negative Pledge**

So long as any amount remains outstanding hereunder, neither Gazprom nor any Principal Subsidiary will create or permit to subsist any Encumbrance (other than a Permitted Encumbrance) upon or in respect of any of its undertakings, property, income, assets or revenues, present or future, to secure any Financial Indebtedness unless, at the same time or prior thereto, Gazprom's obligations hereunder are secured equally and rateably therewith or benefit from such other security or other arrangement, as the case may be, in each case to the satisfaction of the Trustee.

### **10.2 Maintenance of Authorisations**

So long as any amount remains outstanding hereunder, Gazprom shall take all necessary action to obtain, and do or cause to be done all things reasonably necessary to ensure the continuance of, all consents, licences, approvals and authorisations, and make or cause to be made all registrations, recordings and filings, which may at any time be required to be obtained or made in the Russian Federation for the execution, delivery or performance of this Agreement or for the validity or enforceability thereof.

### **10.3 Mergers**

So long as any amount remains outstanding hereunder, Gazprom shall not, without the prior written consent of the Bank, enter into any reorganisation (whether by way of a merger, accession, division, separation or transformation, as these terms are construed by applicable Russian legislation), or participate in any other type of corporate reconstruction and Gazprom shall ensure that no Principal Subsidiary enter into any reorganisation (whether by way of a merger, accession, division, separation or transformation as these terms are construed by applicable Russian legislation), or participate in any other type of corporate reconstruction if such reorganisation or other type of corporate reconstruction could have a material adverse effect on Gazprom's ability to perform its obligations under this Agreement or the validity or enforceability of this Agreement or the rights or remedies of the Bank under this Agreement.

### **10.4 Disposals**

So long as any amount remains outstanding hereunder, Gazprom shall not and Gazprom shall ensure that no member of the Group shall, without the prior written consent of the Bank, (disregarding (i) sales of stock in trade in the ordinary course of business and assignments of or other arrangements over the rights or revenues arising from contracts for the sale of gas, gas condensate, crude oil or any other hydrocarbon products, (ii) any lease or related transaction and (iii) dispositions of assets or rights not related to the extraction, production, transportation, marketing or supply of gas) sell, transfer or otherwise dispose of, by one or more transactions or series of transactions (whether related or not), the whole or any part of its revenues or its assets (which for the avoidance of doubt excludes payments of cash, or other consideration, for the acquisition of any asset on normal commercial terms) which have the aggregate value in excess of U.S.\$1,000,000,000 or the equivalent thereof to a person that is not a member of the Group.

### **10.5 Maintenance of Property**

So long as any amount remains outstanding hereunder, Gazprom and any Principal Subsidiaries will cause all property used in the carrying on by it of its business for the time being to be kept in good repair

and working order as, in the judgment of Gazprom or any Principal Subsidiary, may be reasonably necessary so that the business may be carried on and the failure to keep such property in such condition would have a Material Adverse Effect.

#### **10.6 Payment of Taxes and Other Claims**

So long as any amount remains outstanding hereunder, Gazprom shall pay or discharge or cause to be paid or discharged, before the same shall become overdue, all taxes, assessments and governmental charges levied or imposed upon, or upon the income, profits or property of Gazprom; provided that Gazprom shall not be required to pay or discharge or cause to be paid or discharged any such tax, assessment, charge or claim (a) whose amount, applicability or validity is being contested in good faith by appropriate proceedings and for which adequate reserves in accordance with IAS as consistently applied or other appropriate provision has been made or (b) whose amount, together with all such other unpaid or undischarged taxes, assessments, charges and claims, does not in the aggregate exceed U.S.\$100,000,000.

#### **10.7 Withholding Tax Exemption**

**10.7.1** The Bank shall use its best endeavours to provide Gazprom no later than 10 Business Days before the first Interest Payment Date (and thereafter as soon as possible at the beginning of each calendar year but not later than 10 Business Days prior to the first Interest Payment Date in that year) with the certificate, issued and certified by the competent German authorities, as the case may be, confirming that the Bank is resident in Germany, provided that the Bank shall not be liable for any failure to provide, or any delays in providing, such residency certificate as a result of any action or inaction of the competent German authorities, but shall notify Gazprom without delay about any such failure or delay with a written description of the actions taken by the Bank to obtain such residency certificate. In the event that the Bank has not complied with its duty to use best endeavours as set out in this sub-Clause, Gazprom has a right of recourse against the Bank in respect of such non-compliance.

**10.7.2** Gazprom and the Bank agree that, should the Russian legislation regulating the procedure for obtaining an exemption from Russian income tax withholding change then the procedure referred to in sub-Clause 10.7.1 will be deemed changed accordingly.

#### **10.8 Maintenance of Insurance**

So long as any amount remains outstanding hereunder, Gazprom and any Principal Subsidiary shall keep those of their properties which are of an insurable nature insured with insurers who implement good business practices and are believed by Gazprom or such Principal Subsidiary, as the case may be, to be responsible against loss or damage to the extent that property of similar character is usually so insured by corporations in the same jurisdictions similarly situated.

#### **10.9 Reports**

**10.9.1** So long as any amount remains outstanding hereunder, Gazprom will furnish to the Bank commencing with the year ending 31 December 2001, within 9 months of the relevant year-end audited annual financial statements prepared in accordance with IAS as consistently applied, including a report thereon by Gazprom's certified independent accountants.

**10.9.2** On each Interest Payment Date, Gazprom shall deliver to the Bank a written notice in the form of an Officers' Certificate stating whether any Potential Event of Default or Event of Default has occurred and, if it has occurred and shall be continuing, what action Gazprom is taking or proposes to take with respect thereto.

**10.9.3** Gazprom will on request of the Bank provide the Bank with such further information, other than information which Gazprom determines in good faith to be confidential, about the business and financial condition of Gazprom and its Subsidiaries as the Bank may require (including pursuant to Clauses 14.5 and 14.12 of the Trust Deed).

#### **10.10 Compliance with Terms of Trust Deed**

The Bank agrees that it will observe and comply with its obligations set out in the Trust Deed and will not agree to any amendment to the terms of such Trust Deed without prior consultation, if reasonably practicable, with Gazprom. In addition, the Bank agrees that it will only exercise its power to appoint a new Trustee pursuant to Clause 26.1 of the Trust Deed with the consent of Gazprom (such consent not to be unreasonably withheld or delayed).

## **11 Events of Default**

### **11.1 Events of Default**

If one or more of the following events of default (each, an “**Event of Default**”) shall occur and be continuing, the Bank shall be entitled to the remedies set forth in sub-Clause 11.3:

- 11.1.1** Gazprom fails to pay within three Business Days any amount payable hereunder as and when such amount becomes payable in the currency and in the manner specified herein, provided that such default will not be an Event of Default if (i) it occurs by reason only of administrative or technical difficulties affecting the transfer of the funds due from Gazprom, (ii) Gazprom issued the appropriate transfer and payment instructions in sufficient time to permit the transfer and payment of the amount due to be made on its due date and (iii) the Bank receives from Gazprom that amount within six Business Days after the due date for payment.
- 11.1.2** Gazprom fails to perform or observe any of its other obligations under this Agreement and (except where in any such case that failure is not capable of remedy when no such notices as is hereinafter mentioned will be required) that failure continues for the period of 30 days (or such longer period as the Bank may permit) next following the submission by the Bank to Gazprom of notice in writing requesting the same to be remedied.
- 11.1.3** Any representation or warranty of Gazprom or any statement deemed to be made by Gazprom in this Agreement or in any other document, certificate or notice delivered to the Bank in connection with this Agreement or the issue of Notes proves to have been inaccurate, incomplete or misleading in any material respect at the time it was made or repeated or deemed to have been made or repeated.
- 11.1.4** Gazprom or any Principal Subsidiary (i) fails to pay any of its Financial Indebtedness as and when such Financial Indebtedness becomes payable, taking into account any applicable grace period or (ii) fails to perform or observe any covenant or agreement to be performed or observed by it contained in any other agreement or in any instrument evidencing any of its Financial Indebtedness if, as a result of such failure, any other party to such agreement or instrument is entitled to exercise, and has not irrevocably waived, the right to accelerate the maturity of any amount owing thereunder; provided, that the total amount of such Financial Indebtedness unpaid or capable of being accelerated exceeds U.S.\$20,000,000 (or its equivalent in another currency); provided however that this sub-Clause 11.1.4 shall not apply to foreign currency Financial Indebtedness owed to Russian Persons.
- 11.1.5** Gazprom or any Principal Subsidiary commences negotiations with its creditors generally with a view to the general readjustment or rescheduling of its indebtedness or makes a general assignment for the benefit of or a composition with its creditors generally; provided that in the case of a Principal Subsidiary the same could have a Material Adverse Effect.
- 11.1.6** Gazprom or any Principal Subsidiary takes any corporate action or any order is made by a competent court for its winding-up, dissolution, external administration or re-organisation whether by way of voluntary arrangement, scheme of arrangement or otherwise or for the appointment of a liquidator, receiver, administrator, administrative receiver, conservator, custodian, trustee or similar officer of it or of all or a material part of its revenues and assets.
- 11.1.7** Gazprom or any Principal Subsidiary (i) fails or is unable to pay its debts generally as they become due or (ii) commences a voluntary case in bankruptcy or any other action or proceeding for any other relief under any law affecting creditors’ rights as is similar to bankruptcy law, or (iii) a bankruptcy (insolvency) petition in respect of Gazprom or any Principal Subsidiary is accepted by any competent court and bankruptcy proceedings are initiated by such competent court, or any action is brought in and accepted by any competent court for the liquidation of Gazprom or any Principal Subsidiary or a Russian federal law that provides for the liquidation of Gazprom as operator of the Unified Gas Supply System is adopted and comes into effect.
- 11.1.8** Any governmental authorisation necessary for the performance of any obligation of Gazprom under this Agreement fails to be in full force and effect.
- 11.1.9** Any governmental authority or court takes any action that has a material adverse effect on Gazprom’s ability to perform its obligations under this Agreement or the validity or enforceability of this Agreement or the rights or remedies of the Bank under this Agreement.

- 11.1.10 Any execution or distress is levied against, or an encumbrancer takes possession of, the whole or any material part of, the assets of Gazprom or any event occurs which under the laws of any jurisdiction has a similar or analogous effect and the same could have a Material Adverse Effect unless such execution, distress, enforcement of an Encumbrance or similar or analogous event is being contested in good faith by Gazprom and is not removed, paid out, stayed or discharged within 30 days of such execution, distress being levied, taking of possession or similar or analogous act, as the case may be.
- 11.1.11 The aggregate amount of unsatisfied final judgments, decrees or orders of courts of competent jurisdiction or other appropriate and competent law-enforcement bodies for the payment of money against Gazprom and its Principal Subsidiaries in the aggregate exceeds U.S.\$25,000,000, or the equivalent thereof in any other currency or currencies and there is a period of 30 days following the entry thereof during which such judgment, decree or order is not appealed, discharged, waived or the execution thereof stayed and such default continues for ten days after the notice specified in sub-Clause 11.2.
- 11.1.12 Any seizure, compulsory acquisition, expropriation, nationalisation or renationalisation after the date of this Agreement by or under the authority of a government authority of all or part (the book value of which is fifteen per cent. (15 per cent.) or more of the book value of the whole) of the assets or all or more than fifteen per cent. (15 per cent.) of the voting or non-voting shares of Gazprom or any Principal Subsidiary is made by any person.
- 11.1.13 Gazprom or any of its Principal Subsidiaries ceases to carry on the principal business it carries on at the date hereof.
- 11.1.14 At any time it is or becomes unlawful for Gazprom to perform or comply with any or all of its obligations under this Agreement or any of such obligations (subject as provided in sub-Clause 9.1.2) are not, or cease to be, legal, valid, binding and enforceable.
- 11.1.15 Any event occurs which under the laws of any relevant jurisdiction has an analogous effect to any of the events referred to in any of the foregoing paragraphs.

## 11.2 Notice of Default

Gazprom shall deliver to the Bank and the Trustee, within 30 days after becoming aware thereof, written notice of any event which is a Potential Event of Default or an Event of Default, its status and what action Gazprom is taking or proposes to take with respect thereto.

## 11.3 Default Remedies

If any Event of Default shall occur and be continuing, the Bank may, by notice in writing to Gazprom, (a) declare the obligations of the Bank hereunder to be immediately terminated, whereupon such obligations shall terminate, and (b) declare all amounts payable hereunder by Gazprom that would otherwise be due after the date of such termination to be immediately due and payable, whereupon all such amounts shall become immediately due and payable, all without diligence, presentment, demand of payment, protest or notice of any kind, which are expressly waived by Gazprom; provided, however, that if any event of any kind referred to in sub-Clause 11.1.7 occurs, the obligations of the Bank hereunder shall immediately terminate, and all amounts payable hereunder by Gazprom that would otherwise be due after the occurrence of such event shall become immediately due and payable, all without diligence, presentment, demand of payment, protest or notice of any kind, which are especially waived by Gazprom.

## 11.4 Rights Not Exclusive

The rights provided for herein are cumulative and are not exclusive of any other rights, powers, privileges or remedies provided by law.

## 12 Indemnity

### 12.1 Indemnification

Gazprom undertakes to the Bank that if the Bank, each director, officer, employee or agent (other than the Principal Paying Agent or any of the Paying Agents) of the Bank (each an "Indemnified Party") incurs any loss, liability, cost, claim, charge, expense (including all legal fees properly incurred) demand or damage (a "Loss") which may be properly incurred in respect of this Agreement (or enforcement thereof), and/or the issuance, constitution, sale, listing and/or enforcement of the Notes and/or the Notes being outstanding (excluding a Loss that is the subject of the undertakings contained in Clauses 8 and 13

and sub-Clause 14.6 of this Agreement (it being understood that the Bank may not recover twice in respect of the same Loss)) Gazprom shall pay to the Indemnified Party on demand an amount equal to such Loss (as evidenced by an invoice distributed to Gazprom by the Bank in accordance with sub-Clause 14.4) unless, in any such case, such Loss was either caused by such Indemnified Parties' negligence or wilful misconduct or arise out of a breach of the representations and warranties of the Bank contained in the First Schedule to the Subscription Agreement; provided that this sub-Clause 12.1 will not apply to or in respect of any Taxes with respect to payments of principal and interest on the Loan or any other amount payable under this Agreement.

## **12.2 Independent Obligation**

Sub-Clause 12.1 constitutes a separate and independent obligation of Gazprom from its other obligations under or in connection with this Agreement or any other obligations of Gazprom in connection with the issuance of the Notes by the Bank and shall not affect, or be construed to affect, any other provision of this Agreement or any such other obligations.

## **12.3 Evidence of Loss**

A certificate of the Bank setting forth the amount of losses, expenses and liabilities described in sub-Clause 12.1 and specifying in full detail the basis therefor shall be prima facie evidence of the amount of such losses, expenses and liabilities.

## **12.4 Survival**

The obligations of Gazprom pursuant to sub-Clauses 6.2, 6.3 and 12.1 shall survive the execution and delivery of this Agreement, the drawdown of the Facility and the repayment of the Loan, in each case by Gazprom.

## **13 Expenses**

### **13.1 Reimbursement of Front-end Expenses for the Extension of the Loan by the Bank**

Gazprom shall, pursuant to sub-Clause 3.2 hereof, reimburse the Bank in Dollars for all reasonable costs and expenses incurred by the Bank in connection with the negotiation, preparation and execution of this Agreement and all related documents, the Notes and all related documents, including, without limitation, the fees and expense of its counsel.

### **13.2 Payment of Ongoing Expenses**

In addition, Gazprom hereby agrees to pay to the Bank on demand in Dollars all ongoing commissions, costs, fees and expenses (including, without limitation, enforcement costs), payable by the Bank under or in respect of this Agreement, the Subscription Agreement, the Paying Agency Agreement, the Trust Deed and the Trustee Side Letter. Gazprom shall also pay the Bank for any indemnification or other payment obligations of the Bank under or in respect of the Paying Agency Agreement, the Trust Deed and/or the Trustee Side Letter (other than the obligation of the Bank to make payments of principal, interest or additional amounts in respect of the Notes). Payments to the Bank referred to in this sub-Clause 13.2 shall be made by Gazprom at least two Business Days before the relevant payment is to be made or expense incurred.

## **14 General**

### **14.1 Evidence of Debt**

The entries made in the account referred to in sub-Clause 6.1 shall, in the absence of manifest error, constitute prima facie evidence of the existence and amounts of Gazprom's obligations recorded therein.

### **14.2 Stamp Duties**

**14.2.1** Gazprom shall pay all stamp, registration and documentary taxes or similar charges (if any) imposed on Gazprom by any person in the Russian Federation or the Federal Republic of Germany which may be payable or determined to be payable in connection with the execution, delivery, performance, enforcement, or admissibility into evidence of this Agreement and shall indemnify the Bank against any and all costs and expenses which may be incurred or suffered by the Bank with respect to, or resulting from, delay or failure by Gazprom to pay such taxes or similar charges.

**14.2.2** Gazprom agrees that if the Bank incurs a liability to pay any stamp, registration and documentary taxes or similar charges (if any) imposed by any person in the Russian Federation or the Federal Republic of Germany which may be payable or determined to be

payable in connection with the execution, delivery, performance, enforcement, or admissibility into evidence of this Agreement, Gazprom shall reimburse the Bank on demand an amount equal to such stamp or other documentary taxes or duties and shall indemnify the Bank against any and all costs and expenses which may be incurred or suffered by the Bank with respect to, or resulting from, delay or failure by Gazprom to procure the payment of such taxes or similar charges.

#### **14.3 Waivers**

No failure to exercise and no delay in exercising, on the part of the Bank or Gazprom, any right, power to privilege hereunder and no course of dealing between Gazprom and the Bank shall operate as a waiver thereof, nor shall any single or partial exercise of any right, power or privilege preclude any other or further exercise thereof, or the exercise of any other right, power or privilege. The rights and remedies herein provided are cumulative and not exclusive of any rights, or remedies provided by applicable law.

#### **14.4 Notices**

All notices, requests, demands or other communications to or upon the respective parties hereto shall be given or made in the English language by telex or otherwise in writing and shall be deemed to have been duly given or made at the time of delivery, if delivered by hand or courier or if sent by facsimile transmission or by airmail, to the party to which such notice, request, demand or other communication is required or permitted to be given or made under this Agreement addressed as follows:

##### **14.4.1** if to Gazprom:

    OAO Gazprom  
    16 Nametkina Street  
    117884 Moscow  
    Russian Federation  
  
    Telecopier: (7 095) 719 8352  
    Attention: Corporate Finance Department

##### **14.4.2** if to the Bank:

    Morgan Stanley Bank AG  
    Junghofstrasse 13-15  
    60311 Frankfurt am Main  
    Federal Republic of Germany  
  
    Telecopier: (49) 69 2166 2399  
    Attention: New Issues Operations

or to such other address or telecopier number as any party may hereafter specify in writing to the other.

#### **14.5 Assignment**

**14.5.1** This Agreement shall inure to the benefit of and be binding upon the parties, their respective successors and any permitted assignee or transferee of some or all of a party's rights or obligations under this Agreement. Any reference in this Agreement to any party shall be construed accordingly and, in particular, references to the exercise of rights and discretions by the Bank, following the enforcement of the security and/or assignment referred to in sub-Clause 14.5.3 below, shall be references to the exercise of such rights or discretions by the Trustee (as Trustee). Notwithstanding the foregoing, the Trustee shall not be entitled to participate in any discussions between the Bank and Gazprom or any agreements of the Bank or Gazprom pursuant to sub-Clauses 6.4 or 6.5 or Clause 8.

**14.5.2** Gazprom shall not assign or transfer all or any part of its rights or obligations hereunder to any other party.

**14.5.3** The Bank may not assign or transfer, in whole or in part, any of its rights and benefits or obligations under this Agreement except (i) the charge by way of first fixed charge granted by the Bank in favour of the Trustee (as Trustee) of the Bank's rights and benefits under this Agreement and (ii) the absolute assignment by the Bank to the Trustee of certain rights, interests and benefits under this Agreement, in each case, pursuant to Clause 4.2 of the Trust Deed.

#### **14.6 Currency Indemnity**

To the fullest extent permitted by law, the obligation of Gazprom in respect of any amount due in Dollars under this Agreement shall, notwithstanding any payment in any other currency (whether pursuant to a judgment or otherwise), be discharged only to the extent of the amount in Dollars that the Bank may, in accordance with normal banking procedures, purchase with the sum paid in such other currency (after any premium and costs of exchange) on the Business Day immediately following the day on which the Bank receives such payment. If the amount in Dollars that may be so purchased for any reason falls short of the amount originally due (the “**Due Amount**”), Gazprom hereby agrees to indemnify and hold harmless the Bank against any deficiency in Dollars. Any obligation of Gazprom not discharged by payment in Dollars shall, to the fullest extent permitted by applicable law, be due as a separate and independent obligation and, until discharged as provided herein, shall continue in full force and effect. If the amount in Dollars that may be purchased exceeds that Due Amount the Bank shall promptly pay the amount of the excess to Gazprom.

#### **14.7 Prescription**

Subject to the Bank having received the principal amount thereof or interest thereon from Gazprom, the Bank shall forthwith repay to Gazprom the principal amount or the interest amount thereon, respectively, of any Notes upon such Notes becoming void pursuant to Condition 11 of the Notes.

#### **14.8 Contracts (Rights of Third Parties) Act 1999**

A person who is not a party to this Agreement has no right under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of this Agreement.

#### **14.9 Choice of Law**

This Agreement shall be governed by, and construed in accordance with, the laws of England.

#### **14.10 Jurisdiction**

**14.10.1** For the exclusive benefit of the other party, each of Gazprom and the Bank hereby irrevocably agrees that the courts of England shall have jurisdiction to settle any disputes which may arise out of or in connection with this Agreement and that accordingly any suit, action or proceeding (collectively, “**Proceedings**”) arising out of or in connection with this Agreement may be brought in such courts.

**14.10.2** Each of the parties irrevocably waives any objection which it may now or hereafter have to the laying of the venue of any Proceedings in any such court referred to in this Clause 14 and any claim that any such Proceedings have been brought in an inconvenient forum and further irrevocably agrees that a final and conclusive judgment in any Proceedings brought in the English courts with competent jurisdiction shall be conclusive and binding and may be enforced in the courts of any other jurisdiction.

**14.10.3** Nothing contained in this Agreement shall limit the right of any party to take Proceedings against another party in any other court of competent jurisdiction to the extent permitted by any applicable law, nor shall the taking of Proceedings in connection with this Agreement in one or more jurisdictions preclude the taking of Proceedings in any other jurisdiction or in any other court of competent jurisdiction in connection with this Agreement to the extent by any applicable law.

**14.10.4** Each of the parties hereby agrees that, at the option of the other party, any dispute, controversy, claim or cause of action brought by any party against another party or arising out of or relating to this Loan Agreement may be settled by arbitration in accordance with the Rules of the London Court of International Arbitration, which rules are deemed to be incorporated by reference into this Clause. The place of arbitration shall be London, England and the language of the arbitration shall be English. The number of arbitrators shall be three, each of whom shall be disinterested in the dispute or controversy, shall have no connection with any party thereto and shall be an attorney experienced in international securities transactions. Each party shall nominate an arbitrator, who, in turn, shall nominate the Chairman of the Tribunal. If a dispute, claim controversy or cause of action shall involve more than two parties, the parties thereto shall attempt to align themselves in two sides (i.e. claimant and respondent) each of which shall appoint an arbitrator as if there were only two sides to

such dispute, claim controversy or cause of action. If such alignment and appointment shall not have occurred within twenty (20) calendar days after the initiating party serves the arbitration demand or if a Chairman has not been selected within thirty (30) calendar days of the selection of the second arbitrator, the Arbitration Court of the London Court of International Arbitration shall appoint the three arbitrators or the Chairman, as the case may be. The parties and the Arbitration Court may appoint arbitrators from among the nationals of any country, whether or not a party is a national of that country. The arbitrators shall have no authority to award punitive or other punitive type damages and may not, in any event, make any ruling, finding or award that does not conform to the terms and conditions of this Agreement.

Fees of the arbitration (excluding each party's preparation, travel, attorneys' fees and similar costs) shall be borne in accordance with the decision of the arbitrators. The decision of the arbitrators shall be final, binding and enforceable upon the parties and judgment upon any award rendered by the arbitrators may be entered in any court having jurisdiction thereof. In the event that the failure of a party to comply with the decision of the arbitrators requires any other party to apply to any court for enforcement of such award, the non-complying party shall be liable to the other for all costs of such litigation, including reasonable attorneys' fees.

**14.10.5 Bank's Process Agent:** The Bank agrees that the process by which any Proceedings in England are begun may be served on it by being delivered to Morgan Stanley & Co. International Limited, 25 Cabot Square, Canary Wharf, London E14 4QA or its other principal place of business in England for the time being or at any other address for the time being at which process may be served on such person in accordance with Part XXIII of the Companies Act 1985 (as modified or re-enacted from time to time). If such person is not or ceases to be effectively appointed to accept service of process on the Bank's behalf, the Bank shall, on the written demand of Gazprom, appoint a further person in England to accept service of process on its behalf and, failing such appointment within 15 days, Gazprom shall be entitled to appoint such a person by written notice to the Bank. Nothing in this Clause shall affect the right of Gazprom to serve process in any other manner permitted by law.

**14.10.6 Borrower's Process Agent:** Gazprom agrees that the process by which any Proceedings in England are begun may be served on it by being delivered to Gazprom (U.K.) Limited at 35 Vine Street, London EC3N 2AA or its other principal place of business in England for the time being or at any other address for the time being at which process may be served on such person in accordance with Part XXIII of the Companies Act 1985 (as modified or re-enacted from time to time). If such person is not or ceases to be effectively appointed to accept service of process on Gazprom's behalf, Gazprom shall, on the written demand of the Bank, appoint a further person in England to accept service of process on its behalf and, failing such appointment within 15 days, the Bank shall be entitled to appoint such a person by written notice to Gazprom. Nothing in this Clause shall affect the right of the Bank to serve process in any other manner permitted by law.

#### **14.11 Counterparts**

This Agreement may be executed in any number of counterparts and all of such counterparts taken together shall be deemed to constitute one and the same agreement.

#### **14.12 Language**

The language which governs the interpretation of this Agreement is the English language.

#### **14.13 Amendments**

Except as otherwise provided by its terms, this Agreement may not be varied except by an agreement in writing signed by the parties.

#### **14.14 Partial Invalidity**

The illegality, invalidity or unenforceability to any extent of any provision of this Agreement under the law of any jurisdiction shall affect its legality, validity or enforceability in such jurisdiction to such extent only and shall not affect its legality, validity or enforceability under the law of any other jurisdiction, nor the legality, validity or enforceability of any other provision.

**IN WITNESS WHEREOF**, the parties hereto have caused this Agreement to be executed on the date first written above.

## TERMS AND CONDITIONS OF THE NOTES

*The following is the text of the Terms and Conditions of the Notes, which contain summaries of certain provisions of the Trust Deed, and which will be attached to the Notes in definitive form, if any, and (subject to the provisions thereof) apply to the Global Notes.*

The U.S.\$●● per cent. Loan Participation Notes due ● (the “**Notes**”, which expression includes any further Notes issued pursuant to Condition 15 and forming a single series herewith), without coupons, of Morgan Stanley Bank AG (the “**Bank**”) are constituted by a trust deed (the “**Trust Deed**”, which expression includes such trust deed as from time to time modified in accordance with the provisions therein contained and any deed or other document expressed to be supplemental thereto, as from time to time so modified) dated ● 2003 and made between the Bank and The Bank of New York (the “**Trustee**”, which expression shall include any successors) as trustee for the holders of the Notes (the “**Noteholders**”).

The Bank has authorised the creation, issue and sale of the Notes for the sole purpose of financing a U.S.\$●● year loan (the “**Loan**”) to Open Joint Stock Company GAZPROM (the “**Borrower**”). The Bank and the Borrower have recorded the terms of the Loan in a loan agreement (the “**Loan Agreement**”) dated ● 2003 between the Bank and the Borrower.

In each case where amounts of principal, interest and additional amounts (if any) are stated herein or in the Trust Deed to be payable in respect of the Notes, the obligations of the Bank to make any such payment shall constitute an obligation only to account to the Noteholders on each date upon which such amounts of principal, interest and additional amounts (if any) are due in respect of the Notes, for an amount equivalent to sums of principal, interest and additional amounts (if any) actually received by or for the account of the Bank pursuant to the Loan Agreement.

The Bank has charged by way of first fixed charge in favour of the Trustee certain of its rights and interests as lender under the Loan Agreement (other than any rights and benefits constituting Reserved Rights (as defined in the Trust Deed) as security for its payment obligations in respect of the Notes and under the Trust Deed (the “**Charge**”) and has assigned absolutely certain other rights under the Loan Agreement to the Trustee (the “**Loan Administration Assignment**”) and together with the Charge, the “**Security Interests**”). In certain circumstances, the Trustee can (subject to it being indemnified and/or secured to its satisfaction) be required by Noteholders holding at least one quarter of the principal amount of the Notes outstanding or by an Extraordinary Resolution (as defined in the Trust Deed) of the Noteholders to exercise certain of its powers under the Trust Deed (including those arising under the Loan Administration Assignment).

Payments in respect of the Notes will be made (subject to the receipt of the relevant funds from the Borrower) pursuant to a paying agency agreement (the “**Agency Agreement**”) dated ● 2003 and made between the Bank, The Bank of New York, New York Branch as paying agent and the registrar (the “**Registrar**”, which expressions shall include any successors), The Bank of New York, London Branch as the principal paying agent (the “**Principal Paying Agent**”) and Kredietbank S.A. Luxembourgeoise as paying agent and transfer agent (the “**Transfer Agent**”), which expressions shall include any successors, the Borrower and the Trustee.

Copies of the Trust Deed, the Loan Agreement and the Agency Agreement are available for inspection at the principal office of the Trustee being, at the date hereof, at One Canada Square, London E14 5AL, at the specified office of the Principal Paying Agent and at the specified office of the Paying Agent in Luxembourg.

The statements contained in these Terms and Conditions include summaries or restatements of, and are subject to, the detailed provisions of the Trust Deed, the Loan Agreement (the form of which is scheduled to and incorporated in the Trust Deed) and the Agency Agreement. Noteholders are entitled to the benefit of, are bound by, and are deemed to have notice of, all the provisions thereof.

### 1 Status

The sole purpose of the issue of the Notes is to provide the funds for the Bank to finance the Loan. The Notes constitute the obligation of the Bank to apply the proceeds from the issue of the Notes solely for financing the Loan and to account to the Noteholders for an amount equivalent to sums of principal, interest and additional amounts (if any) actually received by or for the account of the Bank pursuant to the Loan Agreement.

The Trust Deed provides that payments in respect of the Notes equivalent to the sums actually received by or for the account of the Bank by way of principal, interest or additional amounts (if any) pursuant to the Loan Agreement will be made pro rata among all Noteholders, on the date of, and in the currency of, and subject to the conditions attaching to, the equivalent payment pursuant to the Loan Agreement. The Bank shall not be liable to make any payment in respect of the Notes other than as expressly provided herein and in the Trust Deed. As provided therein, the Bank shall be under no obligation to exercise in favour of the Noteholders any rights of set-off or of banker's lien or to combine accounts or counterclaim that may arise out of other transactions between the Bank and the Borrower.

Noteholders have notice of, and have accepted, these Terms and Conditions and the contents of the Trust Deed and the Loan Agreement, and have hereby accepted that:

- 1.1 neither the Bank nor the Trustee makes any representation or warranty in respect of, or shall at any time have any responsibility for, or, save as otherwise expressly provided in the Trust Deed or in paragraph 1.6 below, liability or obligation in respect of the performance and observance by the Borrower of its obligations under the Loan Agreement or the recoverability of any sum of principal or interest (or any additional amounts) due or to become due from the Borrower under the Loan Agreement;
- 1.2 neither the Bank nor the Trustee shall at any time have any responsibility for, or obligation or liability in respect of, the financial condition, creditworthiness, affairs, status or nature of the Borrower;
- 1.3 neither the Bank nor the Trustee shall at any time be liable for any representation or warranty or any act, default or omission of the Borrower under or in respect of the Loan Agreement;
- 1.4 neither the Bank nor the Trustee shall at any time have any responsibility for, or liability or obligation in respect of, the performance and observance by the Principal Paying Agent, any of the Paying Agents, the Registrar or the Transfer Agent of their respective obligations under the Agency Agreement;
- 1.5 the financial servicing and performance of the terms of the Notes depend solely and exclusively upon performance by the Borrower of its obligations under the Loan Agreement and its covenant, credit and financial standing. The Borrower has represented and warranted to the Bank in the Loan Agreement that the Loan Agreement constitutes a legal, valid and binding obligation of the Borrower; and
- 1.6 the Bank and the Trustee shall be entitled to rely on self-certification of the Borrower as a means of monitoring whether the Borrower is complying with its obligations under the Loan Agreement and shall not otherwise be responsible for investigating any aspect of the Borrower's performance in relation thereto and, subject as further provided in the Trust Deed, the Trustee will not be liable for any failure to make the usual or any investigations which might be made by a security holder in relation to the property which is the subject of the Trust Deed and held by way of security for the Notes, and shall not be bound to enquire into or be liable for any defect or failure in the right or title of the Bank to the assigned property whether such defect or failure was known to the Trustee or might have been discovered upon examination or enquiry or whether capable of remedy or not, nor will it have any liability for the enforceability of the security created by the Security Interests whether as a result of any failure, omission or defect in registering or filing or otherwise protecting or perfecting such security; the Trustee has no responsibility for the value of such security.

Under the Trust Deed, the obligations of the Bank in respect of the Notes rank *pari passu* and rateably without any preference among themselves.

In the event that the payments under the Loan Agreement are made by the Borrower to, or to the order of, the Trustee or (subject to the provisions of the Trust Deed) the Principal Paying Agent, they will *pro tanto* satisfy the obligations of the Bank in respect of the Notes.

Save as otherwise expressly provided herein and in the Trust Deed, no proprietary or other direct interest in the Bank's right under or in respect of the Loan Agreement or the Loan exists for the benefit of the Noteholders. Subject to the terms of the Trust Deed, no Noteholder will have any entitlement to enforce the Loan Agreement or direct recourse to the Borrower except through action by the Trustee pursuant to the Loan Administration Assignment granted to the Trustee in the Trust Deed. Neither the Bank nor, following the enforcement of the Security Interests created in the Trust Deed, the Trustee shall be required to take proceedings to enforce payment under the Loan Agreement unless it has been indemnified and/or secured by the Noteholders to its satisfaction.

**2 Form and Denomination**

The Notes are issued in fully registered form, and in the denomination of U.S.\$10,000 or integral multiples thereof, without interest coupons; provided that the Rule 144A Notes shall be held in amounts of not less than U.S.\$100,000.

**3 Register, Title and Transfers**

The Registrar will maintain a register (the “**Register**”) in respect of the Notes in accordance with the provisions of the Agency Agreement. In these Conditions the “holder” of a Note means the person in whose name such Note is for the time being registered in the Register (or, in the case of a joint holding, the first named thereof) and “Noteholder” shall be construed accordingly. A Note will be issued to each Noteholder in respect of its registered holding.

The holder of each Note shall (except as otherwise required by law) be treated as the absolute owner of such Note for all purposes (whether or not it is overdue and regardless of any notice of ownership, trust or any other interest therein, any writing on the Note relating thereto (other than the endorsed form of transfer) or any notice of any previous loss or theft of such Note) and no person shall be liable for so treating such holder.

A Note may be transferred upon surrender of the relevant Note, with the endorsed form of transfer duly completed, at the specified office of the Registrar or at the specified office of the Transfer Agent, together with such evidence as the Registrar or the Transfer Agent may reasonably require to prove the title of the transferor and the authority of the individuals who have executed the form of transfer. Where not all the Notes represented by the surrendered Note are the subject of the transfer, a new Note in respect of the balance of the Note will be issued to the transferor.

Subject to the last paragraph of this Condition, within five business days of the surrender of a Note in accordance with the immediately preceding paragraph above, the Registrar will register the transfer in question and deliver a new Note to each relevant holder at its specified office or (at the request and risk of such relevant holder) by uninsured first class mail (airmail if overseas) to the address specified for the purpose by such relevant holder. In this paragraph, “business day” means a day on which commercial banks are open for business (including dealings in foreign currencies) in the city where the Registrar has its specified office.

The transfer of a Note will be effected without charge but against such indemnity as the Registrar may require in respect of any tax or other duty of whatsoever nature which may be levied or imposed in connection with such transfer.

Noteholders may not require transfers to be registered during the period of 15 days ending on the due date for any payment of principal or interest in respect of the Notes.

**4 Restrictive Covenant**

As provided in the Trust Deed, so long as any of the Notes remains outstanding (as defined in the Trust Deed), the Bank will not, without the prior written consent of the Trustee, agree to any amendments to or any modification or waiver of, or authorise any breach or proposed breach of, the terms of the Loan Agreement and will act at all times in accordance with any instructions of the Trustee from time to time with respect to the Loan Agreement, except as otherwise expressly provided in the Loan Agreement. Any such amendment, modification, waiver or authorisation made with the consent of the Trustee shall be binding on the Noteholders and, unless the Trustee agrees otherwise, any such amendment or modification shall be notified by the Bank to the Noteholders in accordance with Condition 14.

**5 Interest**

On each Interest Payment Date the Bank shall account to the Noteholders for an amount equivalent to amounts of interest actually received by or for the account of the Bank pursuant to the Loan Agreement, which interest under the Loan is equal to ● per cent. per annum as set out in Clause 4 of the Loan Agreement. Interest shall continue to accrue on overdue interest at the same rate per annum up to the maximum extent permitted by applicable law.

If interest is required to be calculated for any period of less than a year, it will be calculated on the basis of a year of 360 days consisting of 12 months of 30 days each and, in the case of an incomplete month, the actual number of days elapsed.

In this Condition 5, “Interest Payment Date” means ● and ● of each year.

## 6 Redemption

Unless previously prepaid or repaid, the Borrower will be required to repay the Loan on ● and, subject to such repayment, as set forth in the Loan Agreement, all the Notes then remaining outstanding will on that date be redeemed or repaid by the Bank at 100 per cent. of the principal amount thereof.

If the Loan should become repayable (and be repaid) pursuant to the Loan Agreement prior to ●, as set forth in the Loan Agreement, all Notes then remaining outstanding will thereupon become due and redeemable or repayable at par together with accrued interest (and, subject to the Loan being repaid together with accrued interest, shall be redeemed or repaid) and the Bank will endeavour to give not less than eight days' notice thereof to the Trustee and the Noteholders.

The Bank, subject to the Borrower's written consent (which consent shall not be unreasonably withheld or delayed), may compel any beneficial owner of Notes initially sold pursuant to Rule 144A under the U.S. Securities Act of 1933 (the "**Securities Act**") to sell its interest in such Notes, or may sell such interest on behalf of such holder, if such holder is a U.S. person that is not a qualified institutional buyer (as defined in Rule 144A under the Securities Act) and a qualified purchaser (as defined in Section 2(a)(51) of the U.S. Investment Company Act of 1940).

## 7 Payments

Payments of principal shall be made by U.S. dollar cheque drawn on, or by transfer to a U.S. dollar account maintained by the payee with, a bank in New York City upon surrender of the relevant Notes at the specified office of the Principal Paying Agent or at the specified office of the Transfer Agent.

Payments of interest shall be made by U.S. dollar cheque drawn on, or by transfer to a U.S. dollar account maintained by the payee with, a bank in New York City and (in the case of interest payable on redemption) upon surrender of the relevant Notes at the specified office of the Principal Paying Agent or at the specified office of the Transfer Agent.

All payments in respect of the Notes are subject in all cases to any applicable fiscal or other laws and regulations, but without prejudice to the provisions of Condition 8. No commissions or expenses shall be charged to the Noteholders in respect of such payments.

If the due date for payments of interest or principal is not a business day, the holder of a Note shall not be entitled to payment of the amount due until the next following business day and shall not be entitled to any further interest or other payment in respect of any such delay. In this paragraph, "business day" means a day on which the London Interbank Market is open for dealings between banks generally, and if on that day a payment is to be made hereunder, commercial banks generally are open for business in Frankfurt am Main, New York City and in the city where the specified office of the Principal Paying Agent is located.

Each payment in respect of a Note will be made to the person shown as the holder in the Register at the opening of business (in the place of the Registrar's specified office) on the fifteenth day before the due date for such payment.

The Agency Agreement provides that the Bank may at any time, with the prior written approval of the Trustee, vary or terminate the appointment of the Principal Paying Agent or any of the Paying Agents, and appoint additional or other paying agents provided that so long as the Notes are listed on the Luxembourg Stock Exchange (the "**Stock Exchange**") and the rules of the Stock Exchange so require, there will be a paying agent and transfer agent with a specified office in Luxembourg or such other place in accordance with the rules of the Stock Exchange. Any such variation, termination or appointment shall only take effect (other than in the case of insolvency, when it shall be of immediate effect) after not more than 45 days' and not less than 30 days' notice thereof shall have been given to the Noteholders in accordance with Condition 14.

In addition, if the due date for redemption or repayment of a Note is not an Interest Payment Date, interest accrued from the preceding Interest Payment Date or, as the case may be, from the Closing Date shall be payable only as and when actually received by or for the account of the Bank pursuant to the Loan Agreement.

Save as directed by the Trustee at any time after the security created in the Trust Deed becomes enforceable, the Bank will require the Borrower to make all payments of principal and interest to be made pursuant to the Loan Agreement to the Principal Paying Agent to an account in the name of the Bank. Under the Charge, the Bank will charge by way of first fixed charge all the rights, title and

interest in and to all sums of money then or in the future deposited in such account in favour of the Trustee for the benefit of the Noteholders.

## 8 Taxation

All payments in respect of the Notes by or on behalf of the Bank will be made without deduction or withholding for or on account of any present or future taxes or duties of whatever nature imposed or levied by or on behalf of the Federal Republic of Germany or any authority thereof or therein having the power to tax, unless the deduction or withholding of such taxes or duties is required by law.

In such event, the Bank shall make such additional payments as shall result in the receipt by the Noteholders of such amount as would have been received by them if no such withholding or deduction had been required only to the extent and only at such time as the Bank receives an equivalent payment from the Borrower under the Loan Agreement. To the extent that the Bank does not receive any such equivalent payment from the Borrower, the Bank will account to the relevant Noteholder for an additional amount equivalent to a pro rata proportion of such additional amount (if any) as is actually received by, or for the account of, the Bank pursuant to the Loan Agreement on the date of, in the currency of, and subject to any conditions attaching to the payment of such additional amount to the Bank provided that no such additional amount will be payable:

- 8.1 to a Noteholder who (a) is able to avoid such deduction or withholding by satisfying any statutory requirements or by making a declaration of non-residence or other claim for exemption to the relevant tax authority; or (b) is liable for such taxes or duties by reason of his having some connection with the Federal Republic of Germany other than the mere holding of such Note or the receipt of payments in respect thereof;
- 8.2 in respect of a Note presented for payment of principal more than 30 days after the Relevant Date except to the extent that such additional payment would have been payable if such Note had been presented for payment on such 30th day;
- 8.3 where such withholding or deduction is imposed on a payment to an individual and is required to be made pursuant to any European Union Directive on the taxation of savings implementing the conclusions of the ECOFIN Council meeting of 26-27 November 2000 or any law implementing or complying with, or introduced in order to conform to, such Directive; or
- 8.4 in respect of a Note presented for payment by or on behalf of a Noteholder who would have been able to avoid such withholding or deduction by presenting the relevant Note to another Paying Agent in a Member State of the European Union.

As used herein, "**Relevant Date**" (i) means the date on which any payment under the Loan Agreement first becomes due but (ii) if the full amount payable by the Borrower has not been received by, or for the account of, the Bank pursuant to the Loan Agreement on or prior to such date, it means the date on which such moneys shall have been so received and notice to that effect shall have been duly given to the Noteholders by or on behalf of the Bank in accordance with Condition 14.

Any reference herein or in the Trust Deed to payments in respect of the Notes shall be deemed also to refer to any additional amounts which may be payable in accordance with the Trust Deed and this Condition 8 or any undertaking given in addition thereto or in substitution therefor pursuant to the Trust Deed.

## 9 Enforcement

The Trust Deed provides that only the Trustee may pursue the remedies under the general law, the Trust Deed or the Notes to enforce the rights of the Noteholders and no such Noteholder will be entitled to pursue such remedies unless the Trustee (having become bound to do so in accordance with the terms of the Trust Deed) fails or neglects to do so within a reasonable period and such failure or neglect is continuing.

The Trust Deed also provides that, in the case of an Event of Default (as defined in the Loan Agreement), or of a Relevant Event (as defined in the Trust Deed), the Trustee may, and shall, if requested to do so by Noteholders owning 25 per cent. in aggregate principal amount of the Notes outstanding, or if directed to do so by an Extraordinary Resolution and, in either case, subject to it being secured and/or indemnified to its satisfaction, declare all amounts payable under the Loan Agreement by the Borrower to be due and payable (in the case of an Event of Default), or enforce the security created in the Trust Deed in favour of the Trustee (in the case of a Relevant Event). Upon repayment of the Loan following an Event of Default and a declaration as provided herein, the Notes will be redeemed or repaid and thereupon shall cease to be outstanding.

**10 Meetings of Noteholders; Modification of Notes, Trust Deed and Loan Agreement; Waiver; Substitution of the Bank**

The Trust Deed contains provisions for convening meetings of Noteholders to consider any matter affecting their interests, including any modification of, or any arrangement in respect of, the Notes or the Trust Deed. Noteholders will vote pro rata according to the principal amount of their Notes. Special quorum provisions apply for meetings of Noteholders convened for the purpose of amending certain terms concerning, *inter alia*, the amount payable on, and the currency of payment in respect of, the Notes and the amounts payable and currency of payment under the Loan Agreement. Any resolution duly passed at a meeting of Noteholders will be binding on all the Noteholders, whether present or not.

The Trustee may agree, without the consent of the Noteholders, to any modification of the Notes and the Trust Deed or, following the creation of the Security Interests, the Loan Agreement which in the opinion of the Trustee is of a formal, minor or technical nature, is made to correct a manifest error or is not materially prejudicial to the interests of the Noteholders. The Trustee may also waive or authorise or agree to the waiving or authorising of any breach or proposed breach by the Bank of the Terms and Conditions of the Notes or the Trust Deed or, following the creation of the Security Interests, by the Borrower of the terms of the Loan Agreement, or determine that any event which would or might otherwise give rise to a right of acceleration under the Loan Agreement shall not be treated as such, if, in the opinion of the Trustee, to do so would not be materially prejudicial to the interests of the Noteholders (as a class). Any such modification, waiver or authorisation shall be binding on the Noteholders and, unless the Trustee agrees otherwise, any such modification shall be promptly notified to the Noteholders.

The Trust Deed contains provisions to the effect that the Bank may, having obtained the consent of the Borrower and the Trustee (which latter consent may be given without the consent of the Noteholders) and having complied with such reasonable requirements as the Trustee may direct in the interests of the Noteholders, substitute any entity in place of the Bank as creditor under the Loan Agreement, as issuer and principal obligor in respect of the Notes and as principal obligor under the Trust Deed, subject to the relevant provisions of the Trust Deed and the substitute's rights under the Loan Agreement being charged and assigned, respectively, to the Trustee as security for the payment obligations of the substitute obligor under the Trust Deed and the Notes.

In connection with the exercise of any of its powers, trusts, authorities or discretions, the Trustee shall have regard to the interests of the Noteholders as a class and, in particular, shall not have regard to the consequences of such exercise for individual Noteholders resulting from their being for any purpose domiciled or resident in, or otherwise connected with, or subject to the jurisdiction of, any particular territory. No Noteholder is entitled to claim from the Bank or the Trustee any indemnification or payment in respect of any tax consequence of any such exercise upon individual Noteholders.

**11 Prescription**

Notes will become void unless presented for payment of principal within 10 years (in the case of principal) or five years (in the case of interest) from the due date for payment in respect thereof.

**12 Indemnification of Trustee**

The Trust Deed contains provisions for the indemnification of the Trustee and for its relief from responsibility, including provisions relieving it from taking proceedings to enforce payment unless indemnified to its satisfaction.

The Trustee's responsibilities are solely those of trustee for the Noteholders on the terms of the Trust Deed. Accordingly, the Trustee makes no representations and assumes no responsibility for the validity or enforceability of the Loan Agreement or the security created in respect thereof or for the performance by the Bank of its obligations under or in respect of the Notes and the Trust Deed or by the Borrower in respect of the Loan Agreement.

**13 Replacement of Notes**

If a Note shall become mutilated, defaced, lost, stolen or destroyed it may, subject to all applicable laws and regulations and requirements of the Stock Exchange, be replaced at the specified office of the Registrar in New York or at the specified office of the Paying Agent in Luxembourg on payment of such costs, expenses, taxes and duties as may be incurred in connection therewith and on such terms as to evidence, security and indemnity and otherwise as may reasonably be required by or on behalf of the Bank or the Trustee. Mutilated or defaced Notes must be surrendered before replacements will be issued.

**14 Notices**

All notices shall be deemed to have been duly given if (i) posted to such holders at their respective addresses as shown on the register of Noteholders maintained by the Registrar and (ii) so long as the Notes are listed on the Stock Exchange, published in a daily newspaper of general circulation in Luxembourg approved by the Trustee, currently expected to be the *Luxemburger Wort*. Any such notice shall be deemed to have been given on the first date on which both conditions shall have been met.

In case by reason of any other cause it shall be impracticable to publish any notice to holders of Notes as provided above, then such notification to such holders as shall be given with the approval of the Trustee shall constitute sufficient notice to such holders for every purpose hereunder.

**15 Further Issues**

The Bank may from time to time, without the consent of the Noteholders, create and issue further Notes having the same terms and conditions as the Notes in all respects (or in all respects except for the first payment of interest) so as to form a single series with the Notes. Such further Notes shall be issued under a deed supplemental to the Trust Deed. The Trust Deed contains provisions for convening a single meeting of Noteholders and the holders of Notes of other series in certain circumstances where the Trustee so decides.

**16 Contracts (Rights of Third Parties) Act 1999**

No person shall have any right to enforce any term or condition of the Notes under the Contracts (Rights of Third Parties) Act 1999.

**17 Governing Law**

The Notes and the Trust Deed are governed by, and shall be construed in accordance with, English law. The Bank has submitted in the Trust Deed to the jurisdiction of the courts of England and has appointed an agent for the service of process in England.

## MORGAN STANLEY BANK AG

The Bank is licensed under the laws of the Federal Republic of Germany and is supervised and regulated by the German Banking Supervisory Authority and the German Bundesbank. The Bank, which was formerly known as Morgan Stanley GmbH, was licensed as a bank with effect from July 11, 1985 in Frankfurt am Main and is engaged in various banking and investment banking activities.

The Bank is affiliated with Morgan Stanley & Co. International Limited but is not an affiliate of the Borrower.

The fully paid up share capital of the Bank is euro 5 million and the amount of its capital reserves as of November 30, 2001 was euro 21,359 million.

The Members of the Management Board of the Bank are Dr. Lutz R. Raettig and Hans Jörg Schüttler.

Since the Bank's sole obligation in respect of the Notes is to make certain payments as and when payments on the Loan are received pursuant to the Loan Agreement, financial information relating to the Bank is not included in this offering circular.

## TRANSFER RESTRICTIONS

### Rule 144A Notes

Each purchaser of Rule 144A Notes within the United States, by accepting delivery of this offering circular and the Notes, will be deemed to have represented, agreed and acknowledged that:

- (1) It is (a) a qualified institutional buyer within the meaning of Rule 144A (a "QIB") that is also a qualified purchaser as defined in Section 2(a)(51) of the Investment Company Act (a "QP"), (b) not a broker-dealer which owns and invests on a discretionary basis less than U.S.\$25 million in securities of unaffiliated issuers; (c) not a participant-directed employee plan, such as a 401(k) plan, (d) acting for its own account, or for the account of another QIB that is also a QP, (e) not formed for the purpose of investing in the Bank, and (f) aware, and each beneficial owner of such Notes has been advised, that the sale of such Notes to it is being made in reliance on Rule 144A.
- (2) It will (a) along with each account for which it is purchasing, hold and transfer beneficial interests in the Rule 144A Notes in a principal amount that is not less than U.S.\$100,000 and (b) provide notice of these transfer restrictions to any subsequent transferees.
- (3) It understands that the Rule 144A Notes have not been and will not be registered under the Securities Act and may not be offered, sold, pledged or otherwise transferred except (a) in accordance with Rule 144A to a person that it and any person acting on its behalf reasonably believe is a QIB that is also a QP purchasing for its own account or for the account of a QIB that is also a QP or (b) in an offshore transaction in accordance with Rule 903 or Rule 904 of Regulation S under the Securities Act ("Regulation S"), in each case in accordance with any applicable securities laws of any State of the United States.
- (4) It understands that the Bank has the power under the Trust Deed to compel any beneficial owner of Rule 144A Notes that is a U.S. person and is not a QIB and a QP to sell its interest in the Rule 144A Notes, or may sell such interest on behalf of such owner. The Bank has the right to refuse to honor the transfer of an interest in the Rule 144A Notes to a U.S. person who is not a QIB and a QP.
- (5) It understands that the Rule 144A Notes, unless otherwise agreed between the Bank and the Trustee in accordance with applicable law, will bear a legend to the following effect:

THIS NOTE AND THE LOAN IN RESPECT HEREOF HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933 (THE "SECURITIES ACT") OR WITH ANY SECURITIES REGULATORY AUTHORITY OF ANY STATE OR OTHER JURISDICTION OF THE UNITED STATES AND MAY NOT BE OFFERED, SOLD, PLEDGED OR OTHERWISE TRANSFERRED EXCEPT (1) IN ACCORDANCE WITH RULE 144A UNDER THE SECURITIES ACT ("RULE 144A") TO A PERSON THAT THE HOLDER AND ANY PERSON ACTING ON ITS BEHALF REASONABLY BELIEVE IS A QUALIFIED INSTITUTIONAL BUYER WITHIN THE MEANING OF RULE 144A (A "QIB") THAT IS ALSO A QUALIFIED PURCHASER AS DEFINED IN THE INVESTMENT COMPANY ACT OF 1940 (A "QP") THAT (A) IS NOT A BROKER-DEALER WHICH OWNS AND INVESTS ON A DISCRETIONARY BASIS LESS THAN \$25 MILLION IN SECURITIES OF UNAFFILIATED ISSUERS, (B) IS NOT A PARTICIPANT-DIRECTED EMPLOYEE PLAN, SUCH AS A 401(K) PLAN, (C) WAS NOT FORMED FOR THE PURPOSE OF INVESTING IN THE ISSUER OF THIS NOTE, (D) IS ACQUIRING THIS NOTE FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF A QIB THAT IS ALSO A QP, IN A PRINCIPAL AMOUNT THAT IS NOT LESS THAN U.S.\$100,000 AND (E) WILL PROVIDE NOTICE OF THESE TRANSFER RESTRICTIONS TO ANY SUBSEQUENT TRANSFEREE, OR (2) IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH RULE 903 OR RULE 904 OF REGULATION S UNDER THE SECURITIES ACT, IN EACH CASE IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES. TRANSFER IN VIOLATION OF THE FOREGOING WILL BE OF NO FORCE OR EFFECT, WILL BE VOID *AB INITIO*, AND WILL NOT OPERATE TO TRANSFER ANY RIGHTS TO THE TRANSFEREE, NOTWITHSTANDING ANY INSTRUCTIONS TO THE CONTRARY TO THE ISSUER OF THIS NOTE, THE TRUSTEE OR ANY INTERMEDIARY. THE ISSUER HAS THE RIGHT UNDER THE TRUST DEED TO COMPEL ANY BENEFICIAL OWNER THAT IS A U.S. PERSON AND IS NOT A QIB AND A QP TO SELL ITS INTEREST IN THIS NOTE, OR MAY SELL SUCH INTEREST ON BEHALF OF SUCH BENEFICIAL OWNER. THE ISSUER HAS THE RIGHT TO REFUSE TO HONOR A TRANSFER OF AN INTEREST IN THIS NOTE TO A U.S. PERSON WHO IS NOT A QIB AND A QP. THE ISSUER HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE INVESTMENT COMPANY ACT OF 1940.

- (6) It understands and acknowledges that its purchase and holding of such Notes constitutes a representation and agreement by it that either (a) it is not an employee benefit plan as described in Section 3(3) of the

United States Employee Retirement Income Security Act of 1974, as amended (“ERISA”) and subject to ERISA, or a plan subject to Section 4975 of the United States Internal Revenue Code of 1986, as amended, (the “Code”), or a governmental plan or church plan which is subject to any federal, state or local law that is substantially similar to the provisions of Section 406 of ERISA or Section 4975 of the Code, or an entity whose assets are treated as assets of any such plan or (b) its purchase and holding of a Note will not constitute a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or any substantially similar provisions of any federal, state or local law.

- (7) It acknowledges that the Bank, Gazprom, the Registrar, the Managers and their affiliates, and others will rely upon the truth and accuracy of the above acknowledgements, representations and agreements and agrees that, if any of the acknowledgements, representations or agreements deemed to have been made by it by its purchase of Rule 144A Notes is no longer accurate, it shall promptly notify the Bank, Gazprom and the Managers. If it is acquiring any Notes as a fiduciary or agent for one or more investor accounts, it represents that it has sole investment discretion with respect to each of those accounts and that it has full power to make the above acknowledgements, representations and agreements on behalf of each account.
- (8) It understands that the Rule 144A Notes will be evidenced by a global Note (the “Rule 144A Global Note”). Before any interest in the Rule 144A Global Note may be offered, sold, pledged or otherwise transferred to a person who takes delivery in the form of an interest in the Regulation S Global Note, it will be required to provide a Transfer Agent with a written certification (in the form provided in the Paying Agency Agreement) as to compliance with applicable securities laws.

**Prospective purchasers are hereby notified that sellers of the Notes may be relying on the exemption from the provisions of Section 5 of the Securities Act provided by Rule 144A.**

### **Regulation S Notes**

Each purchaser of Regulation S Notes outside the United States and each subsequent purchaser of Regulation S Notes in resales prior to the expiration of the distribution compliance period, by accepting delivery of this offering circular and the Regulation S Notes, will be deemed to have represented, agreed and acknowledged that:

- (1) It is, or at the time Regulation S Notes are purchased will be, the beneficial owner of such Regulation S Notes and (a) it is not a U.S. person and it is located outside the United States (within the meaning of Regulation S) and (b) it is not an affiliate of the Bank, Gazprom or a person acting on behalf of such an affiliate.
- (2) It understands that the Regulation S Notes have not been and will not be registered under the Securities Act and, prior to the expiration of the distribution compliance period, it will not offer, sell, pledge or otherwise transfer such Notes except (a) in accordance with Rule 144A to a person that it and any person acting on its behalf reasonably believes is a QIB that is also a QP purchasing for its own account or the account of a QIB that is also a QP or (b) in an offshore transaction in accordance with Regulation S, in each case in accordance with any applicable securities laws of any State of the United States.
- (3) It understands that the Regulation S Notes will be evidenced by a global Note (the “Regulation S Global Note”). Before any interest in the Regulation S Global Note may be offered, sold, pledged or otherwise transferred to a person who takes delivery in the form of an interest in the Rule 144A Global Note, it will be required to provide a Transfer Agent with a written certification (in the form provided in the Paying Agency Agreement) as to compliance with applicable securities laws.
- (4) It understands and acknowledges that its purchase and holding of such Notes constitutes a representation and agreement by it that either (a) it is not an employee benefit plan as described in section 3(3) of ERISA and subject to ERISA, or a plan subject to section 4975 of the Code, or a governmental plan or church plan which is subject to any federal, state or local law that is substantially similar to the provisions of section 406 of ERISA or section 4975 of the Code, or an entity whose assets are treated as assets of any such plan or (b) its purchase and holding of a note will not constitute a non-exempt prohibited transaction under section 406 of ERISA or section 4975 of the Code or any substantially similar provisions of any federal, state or local law.
- (5) It acknowledges that the Bank, Gazprom, the Registrar, the Managers and their affiliates and others will rely upon the truth and accuracy of the above acknowledgements, representations and agreements and agree that, if any of the acknowledgements, representations or agreements deemed to have been made by it by its purchase of Notes is no longer accurate, it shall promptly notify the Bank, Gazprom and the Managers. If it is acquiring any Notes as a fiduciary or agent for one or more investor accounts, it represents that it has sole investment discretion with respect to each of those accounts and that it has full power to make the above acknowledgements, representations and agreements on behalf of each account.

## BOOK-ENTRY, DELIVERY AND FORM

### The Global Notes

The Regulation S Notes will be evidenced on issue by the Regulation S Global Note deposited with, and registered in the name of a nominee for, The Bank of New York as common depository for Euroclear and Clearstream, Luxembourg. Beneficial interests in the Regulation S Global Note may be held only through Euroclear or Clearstream, Luxembourg at any time. See "Book-Entry Procedures for the Global Notes." By acquisition of a beneficial interest in the Regulation S Global Note, the purchaser thereof will be deemed to represent, among other things, that it is not a U.S. person, and that, if it determines to transfer such beneficial interest prior to the expiration of the 40 day distribution compliance period, it will transfer such interest only to a person whom the seller reasonably believes (a) to be a non-U.S. Person in an offshore transaction in accordance with Rule 903 or Rule 904 of Regulation S or (b) to be a person who takes delivery in the form of an interest in the Rule 144A Global Note. See "Transfer Restrictions".

The Rule 144A Notes will be evidenced on issue by the Rule 144A Global Note deposited with The Bank of New York as custodian for, and registered in the name of Cede & Co. as nominee of, DTC. Beneficial interests in the Rule 144A Global Note may only be held through DTC at any time. See "Book-Entry Procedures for the Global Notes." By acquisition of a beneficial interest in the Rule 144A Global Note, the purchaser thereof will be deemed to represent, among other things, that it is a QIB that is also a QP and that, if in the future it determines to transfer such beneficial interest, it will transfer such interest in accordance with the procedures and restrictions contained in the Trust Deed. See "Transfer Restrictions."

Beneficial interests in Global Notes will be subject to certain restrictions on transfer set forth therein and in the Trust Deed, as set forth in Rule 144A, and the Notes will bear the applicable legends regarding the restrictions set forth under "Transfer Restrictions." A beneficial interest in the Regulation S Global Note may be transferred to a person who takes delivery in the form of an interest in the Rule 144A Global Note in denominations greater than or equal to the minimum denominations applicable to interests in the Rule 144A Global Note and only upon receipt by the Registrar of a written certification (in the form provided in the Paying Agency Agreement) to the effect that the transferor reasonably believes that the transferee is a QIB that is also a QP and that such transaction is in accordance with any applicable securities laws of any state of the United States or any other jurisdiction. Beneficial interests in the Rule 144A Global Note may be transferred to a person who takes delivery in the form of an interest in the Regulation S Global Note only upon receipt by the Registrar of a written certification (in the form provided in the Paying Agency Agreement) from the transferor to the effect that the transfer is being made to a non-U.S. Person and in accordance with Regulation S.

Any beneficial interest in the Regulation S Global Note that is transferred to a person who takes delivery in the form of an interest in the Rule 144A Global Note will, upon transfer, cease to be an interest in the Regulation S Global Note and become an interest in the Rule 144A Global Note, and, accordingly, will thereafter be subject to all transfer restrictions and other procedures applicable to beneficial interests in the Rule 144A Global Note for as long as it remains such an interest. Any beneficial interest in the Rule 144A Global Note that is transferred to a person who takes delivery in the form of an interest in the Regulation S Global Note will, upon transfer, cease to be an interest in the Rule 144A Global Note and become an interest in the Regulation S Global Note and, accordingly, will thereafter be subject to all transfer restrictions and other procedures applicable to beneficial interests in the Regulation S Global Note for so long as it remains such an interest. No service charge will be made for any registration of transfer or exchange of Notes, but the Registrar may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

Except in the limited circumstances described below, owners of beneficial interests in Global Notes will not be entitled to receive physical delivery of certificated Notes in definitive form (the "Definitive Notes"). The Notes are not issuable in bearer form.

### Amendments to Conditions

Each Global Note contains provisions that apply to the Notes that they represent, some of which modify the effect of the above Terms and Conditions of the Notes. The following is a summary of those provisions:

- *Payments.* Payments of principal and interest in respect of Notes evidenced by a Global Note will be made against presentation for endorsement and, if no further payment falls to be made in respect of the relevant Notes, surrender of such Global Note to or to the order of the Principal Paying Agent or such other Paying Agent as shall have been notified to the relevant Noteholders for such purpose. A record of each payment so

made will be endorsed in the appropriate schedule to the relevant Global Note, which endorsement will be *prima facie* evidence that such payment has been made in respect of the relevant Notes.

- *Notices.* So long as any Notes are evidenced by a Global Note and such Global Note is held on behalf of a clearing system, notices to Noteholders may be given by delivery of the relevant notice to that clearing system for communication by it to entitled account holders in substitution for delivery thereof as required by the Terms and Conditions of such Notes provided that for so long as the Notes are listed on the Luxembourg Stock Exchange and the rules of the Luxembourg Stock Exchange so require, notices will also be published in a leading newspaper having general circulation in Luxembourg (which is expected to be the *Luxemburger Wort*).
- *Meetings.* The holder of each Global Note will be treated as being one person for the purposes of any quorum requirements of, or the right to demand a poll at, a meeting of Noteholders and in any such meeting as having one vote in respect of Notes for which the relevant Global Note may be exchanged.
- *Trustee's Powers.* In considering the interests of Noteholders while the Global Notes are held on behalf of a clearing system, the Trustee may have regard to any information provided to it by such clearing system or its operator as to the identity (either individually or by category) of its account holders with entitlements to each Global Note and may consider such interests as if such account holders were the holders of any Global Note.
- *Cancellation.* Cancellation of any Note required by the Terms and Conditions of the Notes to be cancelled will be effected by reduction in the principal amount of the applicable Global Note.

### **Exchange for Definitive Notes**

#### *Exchange*

Each Global Note will be exchangeable, free of charge to the holder, on or after its Exchange Date (as defined below), in whole but not in part, for Notes in definitive form if: (i) a Global Note is held by or on behalf of a clearing system and such clearing system is closed for business for a continuous period of 14 days (other than by reason of holidays, statutory or otherwise) or announces an intention permanently to cease business or does in fact do so, by the holder giving notice to the Registrar or any Transfer Agent or (ii) if the Bank would suffer a material disadvantage in respect of the Notes as a result of a change in the laws or regulations (taxation or otherwise) of any jurisdiction referred to in Condition 8 which would not be suffered were the Notes in definitive form and a note to such effect signed by two Members of the Management Board of the Bank is delivered to the Trustee, by the Bank giving notice to the Registrar or any Transfer Agent and the Noteholders, of its intention to exchange the relevant Global Note for Definitive Notes on or after the Exchange Date (as defined below) specified in the notice.

The Registrar will not register the transfer of, or exchange of interests in, a Global Note for Definitive Notes for a period of 15 calendar days ending on the date for any payment of principal or interest in respect of the Notes.

If only one of the Global Notes (the "Exchanged Global Note") becomes exchangeable for Definitive Notes in accordance with the above paragraphs, transfers of Notes may not take place between, on the one hand, persons holding Definitive Notes issued in exchange for beneficial interests in the Exchanged Global Note and, on the other hand, persons wishing to purchase beneficial interests in the other Global Note.

"Exchange Date" means a day falling not later than 90 days after that on which the notice requiring exchange is given and on which banks are open for business in the city in which the specified office of the Registrar and any Transfer Agent is located.

#### *Delivery*

In such circumstances, the relevant Global Note shall be exchanged in full for Definitive Notes and the Bank will, at the cost of the Bank (but against such indemnity as the Registrar or any relevant Transfer Agent may require in respect of any tax or other duty of whatever nature which may be levied or imposed in connection with such exchange), cause sufficient Definitive Notes to be executed and delivered to the Registrar for completion, authentication and dispatch to the relevant Noteholders. A person having an interest in a Global Note must provide the Registrar with (a) a written order containing instructions and such other information as the Bank and the Registrar may require to complete, execute and deliver such Notes and (b) in the case of the Rule

144A Global Note only, a fully completed, signed certification substantially to the effect that the exchanging holder is not transferring its interest at the time of such exchange or, in the case of simultaneous sale pursuant to Rule 144A, a certification that the transfer is being made in compliance with the provisions of Rule 144A to a QIB that is also a QP. Definitive Notes issued in exchange for a beneficial interest in the Rule 144A Global Note shall bear the legend applicable to transfer pursuant to Rule 144A, as set out under "Transfer Restrictions."

### *Legends*

The holder of a Definitive Note may transfer the Notes evidenced thereby in whole or in part in the applicable minimum denomination by surrendering it at the specified office of the Registrar or any Transfer Agent, together with the completed form of transfer thereon. Upon the transfer, exchange or replacement of a Rule 144A Definitive Note bearing the legend referred to under "Transfer Restrictions," or upon specific request for removal of the legend on a Rule 144A Definitive Note, the Bank will deliver only Rule 144A Definitive Notes that bear such legend, or will refuse to remove such legend, as the case may be, unless there is delivered to the Bank and the Registrar such satisfactory evidence, which may include an opinion of counsel, as may reasonably be required by the Bank that neither the legend nor the restrictions on transfer set forth therein are required to ensure compliance with the provisions of the Securities Act and the Investment Company Act.

### **Book-Entry Procedures for the Global Notes**

#### *Euroclear, Clearstream, Luxembourg and DTC*

Custodial and depository links have been established between Euroclear, Clearstream, Luxembourg and DTC to facilitate the initial issue of the Notes and cross-market transfers of the Notes associated with secondary market trading. See "Book Entry Ownership—Settlement and Transfer of Notes" .

#### *Euroclear and Clearstream, Luxembourg*

Euroclear and Clearstream, Luxembourg each hold securities for their customers and facilitate the clearance and settlement of securities transactions through electronic book-entry transfer between their respective accountholders. Indirect access to Euroclear and Clearstream, Luxembourg is available to other institutions which clear through or maintain a custodial relationship with an accountholder of either system. Euroclear and Clearstream, Luxembourg provide various services including safekeeping, administration, clearance and settlement of internationally-traded securities and securities lending and borrowing. Euroclear and Clearstream, Luxembourg also deal with domestic securities markets in several countries through established depository and custodial relationships. Euroclear and Clearstream, Luxembourg have established an electronic bridge between their two systems across which their respective customers may settle trades with each other. Their customers are worldwide financial institutions including underwriters, securities brokers and dealers, banks, trust companies and clearing corporations. Investors may hold their interests in such Global Notes directly through Euroclear or Clearstream, Luxembourg if they are accountholders ("Direct Participants") or indirectly ("Indirect Participants" and together with Direct Participants, "Participants") through organizations which are accountholders therein.

#### *DTC*

DTC has advised the Bank as follows: DTC is a limited purpose trust company organised under the laws of the State of New York, a "banking organisation" under the laws of the State of New York, a member of the U.S. Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code and a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act. DTC was created to hold securities for its participants and facilitate the clearance and settlement of securities transactions between Participants through electronic computerised book-entry changes in accounts of its participants, thereby eliminating the need for physical movement of certificates. Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organisations. Indirect access to DTC is available to others, such as banks, securities brokers, dealers and trust companies, that clear through or maintain a custodial relationship with a DTC Direct Participant, either directly or indirectly.

Investors may hold their interests in Rule 144A Global Note directly through DTC if they are Direct Participants in the DTC system, or as Indirect Participants through organisations which are Direct Participants in such system.

DTC has advised the Bank that it will take any action permitted to be taken by a holder of Notes only at the direction of one or more Direct Participants and only in respect of such portion of the aggregate principal amount

of the relevant Rule 144A Global Notes as to which such participant or participants has or have given such direction. However, in the circumstances described under “Exchange for Definitive Notes”, DTC will surrender the relevant Rule 144A Global Notes for exchange for individual Rule 144A Definitive Notes (which will bear the legend applicable to transfers pursuant to Rule 144A).

### **Book-Entry Ownership**

#### *Euroclear and Clearstream, Luxembourg*

The Regulation S Global Note will have an ISIN and a Common Code and will be registered in the name of a nominee for, and deposited with The Bank of New York as common depository on behalf of, Euroclear and Clearstream, Luxembourg.

#### *DTC*

The Rule 144A Global Note will have a CUSIP number and will be deposited with The Bank of New York, as custodian (the “Custodian”) for and registered in the name of Cede & Co. as nominee of, DTC. The Custodian and DTC will electronically record the principal amount of the Notes held within the DTC System.

#### *Relationship of Participants with Clearing Systems*

Each of the persons shown in the records of Euroclear, Clearstream, Luxembourg or DTC as the holder of a Note evidenced by a Global Note must look solely to Euroclear, Clearstream, Luxembourg or DTC (as the case may be) for his share of each payment made by the Bank to the holder of such Global Note and in relation to all other rights arising under the Global Note, subject to and in accordance with the respective rules and procedures of Euroclear, Clearstream, Luxembourg or DTC (as the case may be). The Bank expects that, upon receipt of any payment in respect of Notes evidenced by a Global Note, the common depository by whom such Note is held, or nominee in whose name it is registered, will immediately credit the relevant participants’ or accountholders’ accounts in the relevant clearing system with payments in amounts proportionate to their respective beneficial interests in the principal amount of the relevant Global Note as shown on the records of the relevant clearing system or its nominee. The Bank also expects that payments by Direct Participants in any clearing system to owners of beneficial interests in any Global Note held through such Direct Participants in any clearing system will be governed by standing instructions and customary practices. Save as aforesaid, such persons shall have no claim directly against the Bank in respect of payments due on the Notes for so long as the Notes are evidenced by such Global Note and the obligations of the Bank will be discharged by payment to the registered holder, as the case may be, of such Global Note in respect of each amount so paid. None of the Bank, the Trustee or any Agent will have any responsibility or liability for any aspect of the records relating to or payments made on account of ownership interests in any Global Note or for maintaining, supervising or reviewing any records relating to such ownership interests.

#### *Settlement and Transfer of Notes*

Subject to the rules and procedures of each applicable clearing system, purchases of Notes held within a clearing system must be made by or through Direct Participants, which will receive a credit for such Notes on the clearing system’s records. The ownership interest of each actual purchaser of each such Note (the “Beneficial Owner”) will in turn be recorded on the Direct and Indirect Participants’ records. Beneficial Owners will not receive written confirmation from any clearing system of their purchase, but Beneficial Owners are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which such Beneficial Owner entered into the transaction. Transfers of ownership interests in Notes held within the clearing system will be affected by entries made on the books of Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in such Notes, unless and until interests in any Global Note held within a clearing system are exchanged for Definitive Notes.

No clearing system has knowledge of the actual Beneficial Owners of the Notes held within such clearing system and their records will reflect only the identity of the Direct Participants to whose accounts such Notes are credited, which may or may not be the Beneficial Owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers. Conveyance of notices and other communications by the clearing systems to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

The laws of some jurisdictions may require that certain persons take physical delivery in definitive form of securities. Consequently, the ability to transfer interests in a Global Note to such persons may be limited. Because DTC can only act on behalf of Direct Participants, who in turn act on behalf of Indirect Participants, the ability of a person having an interest in the Rule 144A Global Note to pledge such interest to persons or entities that do not participate in DTC, or otherwise take actions in respect of such interest, may be affected by a lack of physical certificate in respect of such interest.

*Trading between Euroclear and/or Clearstream, Luxembourg Participants*

Secondary market sales of book-entry interests in the Notes held through Euroclear or Clearstream, Luxembourg to purchasers of book-entry interests in the Notes held through Euroclear or Clearstream, Luxembourg will be conducted in accordance with the normal rules and operating procedures of Euroclear and Clearstream, Luxembourg and will be settled using the procedures applicable to conventional Eurobonds.

*Trading between DTC Participants*

Secondary market sales of book-entry interests in the Notes between DTC participants will occur in the ordinary way in accordance with DTC rules and will be settled using the procedures applicable to United States corporate debt obligations in DTC's Same-Day Funds Settlement ("SDFS") system in same-day funds, if payment is effected in U.S. Dollars, or free of payment, if payment is not effected in U.S. Dollars. Where payment is not effected in U.S. Dollars, separate payment arrangements outside DTC are required to be made between the DTC participants.

*Trading between DTC seller and Euroclear/Clearstream, Luxembourg purchaser*

When book-entry interests in Notes are to be transferred from the account of a DTC participant holding a beneficial interest in the Rule 144A Global Note to the account of a Euroclear or Clearstream, Luxembourg accountholder wishing to purchase a beneficial interest in the Regulation S Global Note (subject to the certification procedures provided in the Paying Agency Agreement), the DTC participant will deliver instructions for delivery to the relevant Euroclear or Clearstream, Luxembourg accountholder to DTC by 12 noon, New York time, on the settlement date. Separate payment arrangements are required to be made between the DTC participant and the relevant Euroclear or Clearstream, Luxembourg participant. On the settlement date, the custodian of the Rule 144A Global Note will instruct the Registrar to (i) decrease the amount of Notes registered in the name of Cede & Co. and evidenced by the Rule 144A Global Note of the relevant class and (ii) increase the amount of Notes registered in the name of the nominee of the common depository for Euroclear and Clearstream, Luxembourg and evidenced by the Regulation S Global Note. Book-entry interests will be delivered free of payment to Euroclear or Clearstream, Luxembourg, as the case may be, for credit to the relevant accountholder on the first business day following the settlement date.

*Trading between Euroclear/Clearstream, Luxembourg seller and DTC purchaser*

When book-entry interests in the Notes are to be transferred from the account of a Euroclear or Clearstream, Luxembourg accountholder to the account of a DTC participant wishing to purchase a beneficial interest in the Rule 144A Global Note (subject to the certification procedures provided in the Paying Agency Agreement), the Euroclear or Clearstream, Luxembourg participant must send to Euroclear or Clearstream, Luxembourg delivery free of payment instructions by 7:45 pm, Brussels or Luxembourg time, one business day prior to the settlement date. Euroclear or Clearstream, Luxembourg, as the case may be, will in turn transmit appropriate instructions to the common depository for Euroclear and Clearstream, Luxembourg and the Registrar to arrange delivery to the DTC participant on the settlement date. Separate payment arrangements are required to be made between the DTC participant and the relevant Euroclear or Clearstream, Luxembourg accountholder, as the case may be. On the settlement date, the common depository for Euroclear and Clearstream, Luxembourg will (a) transmit appropriate instructions to the custodian of the Rule 144A Global Note who will in turn deliver such book-entry interests in the Notes free of payment to the relevant account of the DTC participant and (b) instruct the Registrar to (i) decrease the amount of Notes registered in the name of the nominee of the common depository for Euroclear and Clearstream, Luxembourg and evidenced by the Regulation S Global Note; and (ii) increase the amount of Notes registered in the name of Cede & Co. and evidenced by the Rule 144A Global Note.

Although Euroclear, Clearstream, Luxembourg and DTC have agreed to the foregoing procedures in order to facilitate transfers of beneficial interest in Global Notes among participants and accountholders of Euroclear, Clearstream, Luxembourg and DTC, they are under no obligation to perform or continue to perform such

procedure, and such procedures may be discontinued at any time. None of the Bank, the Trustee or any Agent will have the responsibility for the performance by Euroclear, Clearstream, Luxembourg or DTC or their respective Direct or Indirect Participants of their respective obligations under the rules and procedures governing their operations.

*Pre-issue Trades Settlement*

It is expected that delivery of Notes will be made against payment therefore on the Closing Date thereof, which could be more than three business days following the date of pricing. Under Rule 15c6-1 under the Exchange Act, trades in the United States secondary market generally are required to settle within three business days (T+3), unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade Notes in the United States on the date of pricing or the next succeeding business days until three days prior to the relevant Closing Date will be required, by virtue of the fact the Notes initially will settle beyond T+3, to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement. Settlement procedures in other countries will vary. Purchasers of Notes may be affected by such local settlement practices and purchasers of Notes between the date of pricing and the relevant Closing Date should consult their own adviser.

## SUBSCRIPTION AND SALE

Dresdner Bank AG London Branch, Morgan Stanley & Co. International Limited and ● (together the "Managers") have, pursuant to the terms and conditions set forth in a subscription agreement dated ● (the "Subscription Agreement"), jointly and severally agreed with the Bank, subject to the satisfaction of certain conditions set forth therein, to subscribe and pay for the Notes at the issue price of ●% of the principal amount of the Notes. The Subscription Agreement also provides for the Managers to receive commissions of ●% of the principal amount of the Notes. The Borrower has agreed to pay certain costs in connection with the offering of the Notes and to reimburse the Managers, the Bank and the Trustee for certain of their expenses in connection with the offering of the Notes. The Managers are entitled to be released and discharged from their obligations under the Subscription Agreement in certain circumstances prior to payment being made to the Bank.

Terms used in this section have the meanings given to them by Regulation S.

The Notes have not been and will not be registered under the Securities Act or the securities laws of any other place. In the Subscription Agreement, each Manager has agreed that:

- the Notes may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except pursuant to an exemption from the registration requirements of the Securities Act or in transactions not subject to those registration requirements; and
- except as permitted by the Subscription Agreement it will not offer or sell the Notes (i) as part of their distribution at any time or (ii) otherwise until 40 days after the later of the commencement of the offering and the Closing Date, within the United States or to, or for the account or benefit of, U.S. persons, and it will have sent to each dealer to which it sells Notes (other than a sale pursuant to Rule 144A) during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Notes within the United States or to, or for the account or benefit of, U.S. persons.

The Notes are being offered and sold outside of the United States to non-U.S. persons in reliance on Regulation S. The Subscription Agreement provides that the Managers may through their respective U.S. broker-dealer affiliates arrange for the offer and resale of Notes within the United States only to persons whom they reasonably believe are QIBs and QPs who can represent that (a) they are QPs who are QIBs within the meaning of Rule 144A; (b) they are not broker-dealers who own and invest on a discretionary basis less than U.S.\$25 million in securities of unaffiliated issuers; (c) they are not a participant-directed employee plan, such as a 401(k) plan; (d) they are acting for their own account, or the account of another QIB who is a QP; (e) they are not formed for the purpose of investing in the Bank; (f) each account for which they are purchasing will hold and transfer at least U.S.\$100,000 in principal amount of Notes at any time and (g) they will provide notice of the transfer restrictions set forth in this offering circular to any subsequent transferees.

In addition, until ● 2003 (40 days after commencement of the offering), an offer or sale of the Notes within the United States by a dealer not participating in the offering may violate the registration requirements of the Securities Act, unless the dealer makes the offer or sale in compliance with Rule 144A or another exemption from registration under the Securities Act.

Each Manager has represented and agreed that (i) it has not offered or sold and, prior to the expiry of the period of six months from the issue date of the Notes, will not offer or sell any Notes to persons in the United Kingdom except to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of their business or otherwise in circumstances which have not resulted and will not result in an offer to the public in the United Kingdom within the meaning of the Public Offers of Securities Regulations 1995, (ii) it has complied and will comply with all applicable provisions of the Financial Services and Markets Act 2000 (the "FSMA") with respect to anything done by it in relation to the Notes in, from or otherwise involving the United Kingdom and (iii) it has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) received by it in connection with the issue or sale of any Notes in circumstances in which section 21(1) of the FSMA does not apply to the Bank.

No sales prospectus (*Verkaufsprospekt*) under the German Securities Sales Prospectus Act (*Wertpapier-Verkaufsprospektgesetz*) has been, or will be, prepared by the Bank or the Managers in connection with the offering of the Notes. Each Manager has represented, warranted and undertaken that it has offered and sold, and will offer and sell, the Notes only in full accordance with the German Securities Sales Prospectus Act.

Each Manager has agreed that the Notes will not be offered, transferred or sold as part of their initial distribution or at any time thereafter to or for the benefit of any persons (including legal entities) resident, incorporated, established or having their usual residence in Russia or to any person located within the territory of Russia unless and to the extent otherwise permitted under Russian law.

The offering of the Notes in Italy has not been registered with the *Commissione Nazionale per le Società e la Borsa* ("CONSOB") pursuant to Italian securities legislation and, accordingly, the initial purchasers have represented and agreed that they have not offered, and will not offer, any Notes in the Republic of Italy in a solicitation to the public at large (*sollecitazione all'investimento*) within the meaning of Article 1, paragraph 1, letter (t) of Legislative Decree no. 58 of 24 February 1998, and that sales of the Notes in the Republic of Italy shall only be: (a) to investors qualifying under Article 31, paragraph 2, of CONSOB Regulation no. 11522 of 1 July 1998, as amended, and such Notes shall be placed, sold and/or offered, neither in the primary nor in the secondary market to individuals residing in the Republic of Italy; and (b) effected in compliance with Article 129 of the Legislative Decree no. 385 of 1 September 1993 and the implementing instructions of the Bank of Italy, pursuant to which the issue or offer of securities in the Republic of Italy is subject to prior notification to the Bank of Italy, unless an exemption, depending inter alia on the amount of the issue and the characteristics of the securities, applies; and (c) effected in accordance with any other Italian securities, tax and exchange control and other applicable laws and regulations and any other applicable requirement or limitation which may be imposed by CONSOB or the Bank of Italy; and (d) made by an investment firm, bank or financial intermediary permitted to conduct such activities in the Republic of Italy in accordance with the relevant provisions of Italian law.

Each Manager has agreed that it has, to the best of its knowledge and belief, complied and will comply with applicable laws and regulations in each jurisdiction which it offers, sells or delivers Notes or distributes this offering circular (and any amendments thereof and supplements thereto) or any other offering or publicity material relating to the Notes, the Bank or the Borrower.

## TAXATION

*Prospective purchasers of the Notes are advised to consult their own tax advisers as to the consequences under the tax laws of the country of which they are residents of a purchase of Notes, including, but not limited to, the consequences of the receipt of interest and the sale or redemption of Notes. The following is a general description of certain tax laws relating to the Notes and the Loan as in effect on the date hereof and does not purport to be a comprehensive discussion of the tax treatment of the Notes.*

### **Russian Federation**

The following is a summary of certain Russian tax considerations relevant to the purchase, ownership and disposition of Notes by non-resident holders, including information regarding the taxation of payments on the Loan. The summary is based on the laws of Russia in effect on the date of this offering circular. The summary does not seek to address the applicability of, and procedures in relation to, taxes levied by regions, municipalities or other non-federal level authorities of Russia, nor does the summary seek to address the availability of double tax treaty relief in respect of the Notes, or practical difficulties involved in obtaining such double tax treaty relief. Prospective investors should consult their own tax advisers regarding the tax consequences of investing in the Notes in their own particular circumstances. No representation with respect to the Russian tax consequences to any particular holder is made hereby.

Many aspects of Russian tax law are subject to significant uncertainty. Further, the substantive provisions of Russian tax law applicable to financial instruments may be subject to more rapid and unpredictable change and inconsistency than in jurisdictions with more developed capital markets. In this regard, the interpretation and application of such provisions will in practice rest substantially with local tax inspectorates.

For the purposes of this summary, a “non-resident holder” means a physical person actually present in Russia for an aggregate period of less than 183 days in a given calendar year or a legal person or organization in each case not organized under Russian law which holds and disposes of the Notes otherwise than through a permanent establishment in Russia.

The Russian tax treatment of interest payments made by Gazprom to the Bank under the Loan Agreement may affect the holders of the Notes. See “Taxation of the Loan” below.

### *Taxation of the Notes*

A non-resident holder will not be subject to any Russian taxes in respect of interest payments on the Notes received from the Bank.

A non-resident holder also generally should not be subject to any Russian taxes in respect of a redemption, sale or other disposition of the Notes outside of Russia, provided that the proceeds of such disposition are not received from a source within Russia.

In the event that proceeds of a disposition of Notes are received from a source within Russia, a non-resident holder that is a legal person or organization should not be subject to any Russian taxation in respect of the proceeds, provided that no portion thereof is attributable to accrued interest. There is some residual uncertainty regarding the treatment of the portion of such proceeds, if any, that is attributable to accrued interest, and such portion may be taxed at a rate of 20%, even if the disposal results in a capital loss. Non-resident holders that are legal persons or organizations should consult their own tax advisers with respect to this possibility.

A non-resident holder who is a physical person will generally be subject to tax at a rate of 30%, subject to any available double tax treaty relief, in respect of gain from a disposition of Notes if the proceeds are received from a source within Russia. In this regard, if the Notes are disposed of in Russia, the proceeds of such disposition are likely to be regarded as received from a Russian source. In certain circumstances, if the disposal proceeds are payable by a Russian organization, individual entrepreneur or a Russian permanent establishment of a foreign organization, the payer may be required to withhold this tax. In such a situation, there is a risk that the taxable base may be affected by changes in the exchange rates between the currency of acquisition of the Notes, the currency of sale and Roubles. Non-resident holders who are physical persons should consult their own tax advisers with respect to this possibility.

### *Taxation of the Loan*

In general, payments of interest on borrowed funds by a Russian entity to a non-resident legal person are subject to Russian withholding tax at the rate of 20%, absent reduction or elimination pursuant to the terms of an applicable double tax treaty. Based on professional advice it has received, Gazprom believes that payments of interest on the Loan should not be subject to withholding under the terms of the double tax treaty between Russia and the Federal Republic of Germany. However, there can be no assurance that such relief will be obtained. In addition, if interest under the Loan becomes payable to the Trustee pursuant to the Trust Deed, any benefit of the double tax treaty between Russia and the Federal Republic of Germany will cease and payments of interest could be subject to Russian withholding tax.

Prior to January 1, 2002, a claim for treaty relief from Russian withholding tax was subject to preliminary approval by the Russian tax authorities after review of relevant contracts. As of January 1, 2002, such preliminary approval from and contract disclosure to the Russian tax authorities is no longer required. As a result of this new procedure, the Russian tax authorities may review the Bank's eligibility for treaty relief in greater detail during tax audits.

If payments under the Loan are subject to any withholding of Russian tax (as a result of which the Bank would reduce payments under the Notes in the amount of such withholding), Gazprom is obliged (subject to certain conditions) to increase payments as may be necessary so that the net payments received by the Noteholders will not be less than the amounts they would have received in the absence of such withholding. It should be noted, however, that gross-up provisions may not be enforceable under Russian law. If Gazprom is obliged to increase payments, it may, subject to certain conditions, prepay the Loan in full. In such case, all outstanding Notes would be redeemable at par with accrued interest.

No VAT will be payable in Russia in respect of the Loan.

### **Federal Republic of Germany**

The following is a general discussion of certain German income tax consequences of the acquisition, ownership and disposition of Notes by original purchasers who are not tax residents of the Federal Republic of Germany. For this purpose, a tax resident of the Federal Republic of Germany is a person whose residence, customary place of abode, seat or place of management is located in the Federal Republic of Germany. The summary is based on laws currently in force and as applied in practice on the date of this offering circular, all of which are subject to change, possibly with retroactive effect. The information provided below does not purport to be a complete, exhaustive or final summary of the tax law and practice currently applicable in the Federal Republic of Germany, and prospective investors should consult their own tax advisors regarding the tax consequences of investing in the Notes in their own particular circumstances.

Under current law, payments of interest on the Notes to persons who are not tax residents of the Federal Republic of Germany and have no connection with the Federal Republic of Germany other than the receipt of such payments will generally be exempt from German taxation. The government has announced plans, however, to introduce a new form of final withholding tax on interest, primarily directed at the taxation of German tax residents, which would come into effect retroactively as of January 1, 2003. Whether and to what extent the planned changes will be enacted is subject to the legislative process and cannot be predicted in advance. It is still unclear whether the planned changes would affect the taxation of interest earned by persons who are not tax residents of the Federal Republic of Germany, and prospective investors should consult their own tax advisers with respect to this possibility.

Under current law, persons who are not tax residents of the Federal Republic of Germany and have no connection with the Federal Republic of Germany other than the holding of the Notes will not be subject to German tax on any capital gains from a sale or other disposition of Notes. Whether the announced plans of the government to introduce a new form of final withholding tax will affect the taxation of capital gains is still unclear, and prospective investors should consult their own tax advisers with respect to this possibility.

No stamp, issue, registration, or similar taxes or duties will be payable in the Federal Republic of Germany in connection with the issuance, delivery or execution of the Notes.

## European Union

The European Union is currently in the process of finalizing a new directive regarding the taxation of savings income. Under the current proposal, each Member State other than Austria, Belgium, and Luxembourg would be required, beginning in 2004, to provide the tax authorities of each other Member State with details of payments of interest or other similar income paid by a person within its jurisdiction to individuals resident in such other Member State. Beginning on the same date, Austria, Belgium and Luxembourg would impose a withholding tax on such income. The withholding tax rate would initially be 15%, increasing to 20% after 2006 and 35% after 2009. If and when (i) the European Union enters into exchange of information agreements with Switzerland, Liechtenstein, Monaco, Andorra and San Marino; and (ii) the Council of the European Union confirms that the United States is sufficiently committed to exchange of information pursuant to bilateral agreements, Austria, Belgium and Luxembourg would cease to apply the withholding tax and would instead comply with the automatic exchange of information rules applicable to the other Member States. Although some issues regarding the proposal remain to be resolved (notably, a precondition that Switzerland agree to a withholding tax regime similar to that applicable to Austria, Belgium and Luxembourg), the Council of the European Union intends to finalize and approve the directive on March 21, 2003. Holders should consult their own tax advisers regarding the implications of the directive in their particular circumstances.

## United States

The following is a discussion of the material United States federal income tax consequences of the acquisition, ownership and disposition of Notes by citizens or individual residents of the United States, U.S. domestic corporations or other persons that are subject to U.S. federal income tax on a net income basis in respect of an investment in the Notes ("U.S. Holders"). Unless otherwise stated, this discussion is limited to the tax consequences to those persons who are original beneficial owners of the Notes and who hold such Notes as capital assets for tax purposes. This discussion does not purport to be a comprehensive description of all tax considerations that may be relevant to a decision to purchase the Notes by any particular investor and does not address specific tax consequences that may be relevant to particular persons (including, for example, financial institutions, broker-dealers, insurance companies, tax-exempt organizations, persons that have a functional currency other than the U.S. dollar and persons in special situations, such as those who hold Notes as part of a straddle, hedge, conversion transaction, or other integrated investment). This discussion does not address U.S. federal alternative minimum tax consequences, and does not describe any tax consequences arising under U.S. federal gift and estate tax laws or under the tax laws of any state, local or foreign jurisdiction. This discussion is based upon the Internal Revenue Code of 1986, as amended, the Treasury Department regulations promulgated thereunder, and administrative and judicial interpretations thereof, all as of the date hereof and all of which are subject to change, possibly on a retroactive basis.

Prospective purchasers of the Notes are urged to consult their own tax advisers concerning the United States federal income tax consequences of acquiring, owning and disposing of the Notes in their particular circumstances, as well as the application of state, local and foreign income and other tax laws.

Interest on a Note will generally be includable in the income of a U.S. Holder in accordance with the U.S. Holder's regular method of accounting for U.S. federal income tax purposes.

Upon the sale, exchange, redemption, retirement at maturity or other disposition of a Note, a U.S. Holder generally will recognize taxable gain or loss equal to the difference between (i) the sum of cash plus the fair market value of all other property received on such disposition (except to the extent such cash or property is attributable to accrued but unpaid interest, which will be taxable as ordinary income), and (ii) such beneficial owner's adjusted tax basis in the Note. A U.S. Holder's adjusted tax basis in a Note generally will equal the cost of the Note to such Holder.

Gain or loss recognized on the disposition of a Note generally will be capital gain or loss, and will be long-term capital gain or loss if, at the time of such disposition, the U.S. Holder's holding period for the Note is more than 12 months. The deductibility of capital losses by U.S. Holders is subject to limitations.

## CERTAIN ERISA CONSIDERATIONS

The U.S. Employee Retirement Income Security Act of 1974, as amended (“ERISA”) imposes fiduciary standards and certain other requirements on employee benefit plans subject thereto, including collective investment funds, separate accounts, and other entities or accounts whose underlying assets are treated as assets of such plans pursuant to the U.S. Department of Labor “plan assets” regulation, 29 CFR Section 2510.3-101 (the “Plan Assets Regulation”) (collectively, “ERISA Plans”) and on those persons who are fiduciaries with respect to ERISA Plans. Investments by ERISA Plans are subject to ERISA’s general fiduciary requirements, including the requirement of investment prudence and diversification and the requirement that an ERISA Plan’s investments be made in accordance with the documents governing the Plan. The prudence of a particular investment will be determined by the responsible fiduciary of an ERISA Plan by taking into account the ERISA Plan’s particular circumstances and all of the facts and circumstances of the investment including, but not limited to, the matters discussed in “Risk Factors” and the fact that in the future there may be no market in which such fiduciary will be able to sell or otherwise dispose of the Notes. Accordingly, each fiduciary of an ERISA Plan should consider the fiduciary standards of ERISA in the context of the ERISA Plan’s particular circumstances before authorising an investment in the Notes.

In addition, Section 406 of ERISA and Section 4975 of the U.S. Internal Revenue Code of 1986, as amended, (the “Code”) prohibit certain transactions involving the assets of an ERISA Plan (as well as those plans that are not subject to ERISA but which are subject to Section 4975 of the Code (together with ERISA Plans, “Plans”) and certain persons (referred to as “parties in interest” or “disqualified persons”) having certain relationships to such Plans, unless a statutory or administrative exemption applies to the transaction. In particular, a sale or exchange of property or an extension of credit between a Plan and a “party in interest” or “disqualified person” may constitute a prohibited transaction. A party in interest or disqualified person who engages in a prohibited transaction may be subject to excise taxes or other liabilities under ERISA and the Code.

Prohibited transactions within the meaning of Section 406 of ERISA or Section 4975 of the Code may arise if the Notes are acquired by a Plan with respect to which the Bank or an Affiliate is a party in interest or a disqualified person. Certain exemptions from the prohibited transaction provisions of Section 406 of ERISA and Section 4975 of the Code may apply depending in part on the type of Plan fiduciary making the decision to acquire a Note and the circumstances under which such decision is made. Included among these exemptions are Prohibited Transaction Class Exemption (“PTCE”) 91-38 (relating to investments by bank collective investment funds), PTCE 84-14 (relating to transactions effected by a “qualified professional asset manager”), PTCE 90-1 (relating to investments by insurance company pooled separate accounts), PTCE 95-60 (relating to investments by insurance company general accounts) and PTCE 96-23 (relating to transactions determined by an in-house asset manager). There can be no assurance that any of these class exemptions or any other exemption will be available with respect to any particular transaction involving the Notes.

Under a “look-through rule” set forth in the Plan Assets Regulation, if a Plan invests in an “equity interest” of an entity that is neither a “publicly-offered security” nor a security issued by an investment company registered under the Investment Company Act, the Plan’s assets include both the equity interest and an undivided interest in each of the entity’s underlying assets, unless it is established that the entity is an “operating company” or that equity participation in the entity by “benefit plan investors” is not “significant”. Equity participation in an entity by “benefit plan investors” is “significant” if 25% or more of the value of any class of equity interest in the entity is held by “benefit plan investors.” An equity interest does not include debt (as determined by applicable local law) which does not have substantial equity features. An equity interest includes an undivided interest in property. The term “benefit plan investor” includes Plans and employee benefit plans (as defined in Section 3(3) of ERISA), whether or not subject to ERISA. Under these rules, the Loan may be deemed to be a “plan asset” of an investing Plan for purposes of ERISA and Section 4975 of the Code if the Notes are treated as equity of the Bank for ERISA purposes and if benefit plan investors purchase or hold 25% or more of the Notes and no exception is applicable under the Plan Assets Regulation. If the Loan were deemed to be a “plan asset” of investing Plans, it would be subject to the requirements of ERISA, including the requirement under ERISA, and a regulation promulgated thereunder (the “Indicia of Ownership Rules”), that no fiduciary under ERISA may maintain the indicia of ownership of assets of a Plan outside the jurisdiction of the Federal district courts of the United States except in certain qualifying locations and subject to certain specified conditions. Following the Loan Administration Assignment, a signed copy of the Trust Deed and Loan Agreement will be held by the Bank of New York. Any fiduciary or other person making the decision to purchase the Notes on behalf of or with “plan assets” of a Plan should consult their advisers concerning the potential application of the Plan Assets Rule to a purchase of the Notes and to the Loan.

BY ITS PURCHASE AND HOLDING OF A NOTE, EACH PURCHASER AND EACH TRANSFEREE WILL BE DEEMED TO HAVE REPRESENTED AND WARRANTED EITHER THAT (A) IT IS NOT AN EMPLOYEE BENEFIT PLAN AS DESCRIBED IN SECTION 3(3) OF ERISA AND SUBJECT TO ERISA, OR A PLAN SUBJECT TO SECTION 4975 OF THE CODE, OR A GOVERNMENTAL PLAN OR CHURCH PLAN WHICH IS SUBJECT TO ANY FEDERAL, STATE OR LOCAL LAW THAT IS SUBSTANTIALLY SIMILAR TO THE PROVISIONS OF SECTION 406 OF ERISA OR SECTION 4975 OF THE CODE, OR AN ENTITY WHOSE ASSETS ARE TREATED AS ASSETS OF ANY SUCH PLAN OR (B) ITS PURCHASE AND HOLDING OF A NOTE WILL NOT CONSTITUTE A NON-EXEMPT PROHIBITED TRANSACTION UNDER SECTION 406 OF ERISA OR SECTION 4975 OF THE CODE OR ANY SUBSTANTIALLY SIMILAR PROVISIONS OF ANY FEDERAL, STATE OR LOCAL LAW.

Governmental plans and certain church plans, while not subject to the fiduciary responsibility provisions of ERISA or the provisions of Section 4975 of the Code, may nevertheless be subject to state or other laws that are substantially similar to the foregoing provisions of ERISA and the Code. Fiduciaries of any such plans should consult with their counsel before purchasing Notes.

Any Plan fiduciary that proposes to cause a Plan to purchase Notes should consult with its counsel regarding the applicability of the fiduciary responsibility and prohibited transaction provisions of ERISA and Section 4975 of the Code to such an investment, and to confirm that such investment will not constitute or result in a prohibited transaction or any other violation of an applicable requirement of ERISA.

The sale of Notes to a Plan is in no respect a representation by the Bank that such an investment meets all relevant legal requirements with respect to investments by Plans generally or any particular Plan, or that such an investment is appropriate for Plans generally or any particular Plan.

## GENERAL INFORMATION

- (1) The Notes have been accepted for clearance through Euroclear, Clearstream, Luxembourg and DTC. The common code of the Regulation S Notes is ● and the ISIN is ●. The CUSIP number of the Rule 144A Notes is ● and the ISIN is ●. In addition, application has been made for the Rule 144A Notes to be designated as eligible for trading on PORTAL.
- (2) In connection with the application to list the Notes on the Luxembourg Stock Exchange, a legal notice relating to the issue of the Notes and a copy of the Charter of Gazprom (together with an English translation) will be deposited with the Chief Registrar of the District Court in Luxembourg ("*Greffier en Chef du Tribunal d'Arrondissement de et à Luxembourg*") where such documents may be examined and copies obtained.
- (3) Gazprom and the Bank have obtained all necessary consents, approvals and authorizations in Russia and Germany in connection with the Loan and the issue and performance of the Notes. The Loan was authorized by the Resolution of the Management Committee of Gazprom passed on ●. The issuance of the Notes was authorized by the Bank by a resolution of the Management Board passed on ●.
- (4) No consents, approvals, authorisations or orders of any regulatory authorities are required by the Bank under the laws of the Federal Republic of Germany for the maintaining of the Loan or for the issue and performance of the Notes.
- (5) Except as disclosed in this offering circular, there has been no significant change in the financial or trading position or prospects of Gazprom or the Group since September 30, 2002 and no material adverse change in the financial or trading position or prospects of Gazprom or of the Group since September 30, 2002.
- (6) Except as disclosed in this offering circular, neither Gazprom nor any of its subsidiaries is involved in any litigation or arbitration proceedings relating to claims or amounts that are material in the context of the issue of the Notes nor, so far as Gazprom is aware, is any such litigation or arbitration pending or threatened.
- (7) Copies in English of the latest annual report and consolidated annual accounts of Gazprom and the latest interim consolidated unaudited accounts of Gazprom may be obtained, and copies of the Trust Deed in respect of the Notes (including the forms of the Global Notes and Definitive Notes), the Paying Agency Agreement and the Loan Agreement will be available for inspection, at the specified offices of the Trustee and the Paying Agent in Luxembourg during normal business hours, so long as any of the Notes are outstanding.
- (8) Gazprom publishes interim consolidated unaudited condensed financial statements, prepared in accordance with IAS 34, for the six month period ended June 30 and for the nine month period ended September 30 in each year. Gazprom does not publish non-consolidated annual or interim financial statements prepared in accordance with IAS. Gazprom does not publish audited or unaudited interim or year-end consolidated or non-consolidated financial statements prepared in accordance with U.S. GAAP nor does it publish audited or unaudited interim financial statements or year-end non-consolidated financial statements prepared in accordance with Russian Accounting Regulations.
- (9) Certain information with respect to Gazprom's natural gas, gas condensate and crude oil reserves associated with Gazprom's natural gas, gas condensate and crude oil properties is derived from the report of DeGolyer and MacNaughton, an internationally recognized firm of independent reservoir engineers, dated December 31, 2000, and has been included herein upon the authority of said firm as experts with respect to the matters covered by such report and in giving such report.

## OVERVIEW OF THE RUSSIAN GAS INDUSTRY AND ITS REGULATION

*The information set forth in this section is based on publicly available information.*

### General

The Russian natural gas industry developed during the Soviet era and expanded rapidly after the discovery in the 1960s of significant reserves in the exceptionally large natural gas fields of western Siberia. Russia experienced a profound crisis in the early 1990s as a result of the dissolution of the Soviet Union, suffering a decline in industrial production and GDP.

Between 1990 and 1999, the Government's policies on natural gas industry structure and prices kept demand for natural gas and natural gas production relatively stable in comparison to demand for other energy sources over the same period, such as oil and coal. Total natural gas production declined by only 7.6% over the period, whereas the production of oil and coal declined by 41.7% and 36.7%, respectively. Moreover there has been a shift away from the use of oil and coal in favor of natural gas over the period, primarily because domestic natural gas prices have been kept at a low level.

Since the dissolution of the Soviet Union, the oil and coal industries have been restructured into several regional enterprises whereas the natural gas industry (including production, refining, transportation and sales) has remained unified.

### Classification of Reserves

Russian methods for calculating and classifying reserves differ from generally accepted practices in the United States and other countries. Reserves which are calculated using different methods cannot be accurately reconciled.

#### *Categories of reserves and potential and forecasted oil and natural gas resources*

Natural gas, gas condensate and oil reserves are categorized under the Russian reserves system based on their physical presence in a deposit. Explored reserves are represented by categories A, B and C1; preliminary estimated reserves are represented by category C2; potential resources are represented by category C3; and forecasted resources are represented by the categories D1 and D2. For a description of categories A, B and C1, see "Business—Reserves and Production."

**Category C2** reserves are preliminary estimated reserves of a deposit calculated on the basis of geological and geophysical research of unexplored sections of deposits adjoining sections of a field containing reserves of higher categories and of untested deposits of explored fields. The shape, size, structure, level, reservoir types, content and characteristics of the hydrocarbon deposit are determined in general terms based on the results of the geological and geophysical exploration and information on the more fully explored portions of a deposit. Category C2 reserves are used to determine the development potential of a field and to plan geological, exploration and production activities.

**Category C3** reserves are prospective reserves prepared for the drilling of (i) traps within the oil-and-gas bearing area, delineated by geological and geophysical exploration methods tested for such area and (ii) the formation of explored fields which have not yet been exposed by drilling. The form, size and stratification conditions of the assumed deposit are estimated from the results of geological and geophysical research. The thickness, reservoir characteristics of the formations, the composition and the characteristics of hydrocarbons are assumed to be analogous to those for explored fields. Category C3 reserves are used in the planning of prospecting and exploration work in areas known to contain other reserve bearing fields.

**Category D1** reserves are calculated based on the results of regional geological, geophysical and geochemical research and by analogy with explored fields within the region being evaluated. Category D1 reserves are reserves in lithological and stratigraphic series that are evaluated within the boundaries of large regional structures confirmed to contain commercial reserves of oil and gas.

**Category D2** reserves are calculated using assumed parameters on the basis of general geological concepts and by analogy with other, better studied regions with explored oil and gas fields. Category D2 reserves are

reserves in lithological and stratigraphic series that are evaluated within the boundaries of large regional structures not yet confirmed to contain commercial reserves of oil and gas. The prospects for these series to prove to be oil-and-gas-bearing are evaluated based on geological, geophysical and geochemical research.

The evaluation of gas reserves in newly discovered natural gas or oil-and-gas deposits is carried out under the Russian reserves system using the volume method. The volume method determines the volume of reserves by examining the filtration and capacitive parameters of the deposit based on (i) the area of the deposit; (ii) the effective depth of hydrocarbon saturation; and (iii) the porousness of the deposit and the level of saturation of the hydrocarbons, taking into account thermobaric conditions.

The evaluation of natural gas reserves in deposits already under development is carried out under the Russian reserves system using both the volume method and the material balance method. The material balance method takes into account temporal changes in the effective reservoir pressure as a result of the extraction of the hydrocarbons and the resultant influx of water.

### **Russian Regulation**

The Russian legal system's rapid evolution during the last ten years is particularly evident in the context of natural gas industry regulation. Below is a brief overview of some key aspects of the current regulatory regime for the natural gas industry.

The regulation of legal and economic relations in the Russian natural gas industry is based on the following legislation: Constitution of the Russian Federation, the Civil Code of the Russian Federation, the Law of the Russian Federation "On Subsoil Resources" No. 2395-1 dated February 21, 1992 as amended (the "Subsoil Resources Law"), the Federal Law "On Natural Monopolies" No. 147-FZ dated August 17, 1995 (the "Natural Monopoly Law"), the Federal Law "On the Continental Shelf of the Russian Federation" No. 187-FZ dated November 30, 1995 and the Gas Supply Law. The most important recent piece of legislation is the Gas Supply Law which creates a regulatory framework for natural gas exploration, production, transportation, storage and supplies.

Under the Gas Supply Law, Russian federal authorities have jurisdiction over natural gas supplies, including, *inter alia*, the development and implementation of Government policy on natural gas supply; the regulation of strategic natural gas reserves; control over the industrial and environmental safety of the natural gas supply systems; and standardization and certification.

The Government (i) sets the projected natural gas production levels and the sales balance in Russia; (ii) sets the Federal Program of Gasification\* in Russia; (iii) determines the level of natural gas prices and natural gas transportation tariffs; (iv) regulates natural gas deliveries; (v) sets procedures for providing independent organizations with access to the natural gas transportation and distribution networks; and (vi) defines the categories of customers to whom natural gas deliveries cannot be restricted or suspended.

The Ministry of Energy is specifically responsible for the practical implementation of Government fuel and energy industry policy and the coordination of the activities of the federal executive bodies.

The Ministry of Natural Resources of the Russian Federation is responsible for regulating the exploration, use and protection of natural resources. It is the body which licenses the production and exploration of subsoil resources.

The Constitution of the Russian Federation stipulates that the use of subsoil is under the joint jurisdiction of the federal and regional authorities.

Under the Gas Supply Law, regional governing authorities have substantial power to regulate projects related to the exploration of oil and natural gas fields and the transportation and refining of oil and natural gas. In cooperation with the Ministry of Natural Resources, regional authorities grant licenses for the exploration and

\* The Presidential Decree No. 742 dated May 20, 1996 adopted a Federal Program of Gasification for 1996-2000. In the summer of 2000, the Government decided to reduce the budgeted costs for special-purpose federal programs. The Ministry of Energy is in the process of preparing a new draft of the Gasification Program.

production of subsoil resources (except for subsoil plots located in Russia's internal waters, territorial seas or on its continental shelf which fall under exclusive Federal jurisdiction). Regional authorities usually also have jurisdiction over land use, environmental, employee health and safety, social security and certain financial regulations. The relationship between the relevant federal, regional and local authorities, as well as between any one natural gas company and such authorities, has a significant impact on the conditions under which a natural gas company can operate in any particular region.

### *Subsoil Licensing*

In 1992, the Subsoil Resources Law introduced a licensing system governing the study, exploration and production of natural resources from the subsoil in Russia. Until 1995, licenses for fields where exploration and production was already in process were granted without a tender offer. Licenses for new fields and subsoil plots, however, were awarded through auctions or tenders conducted by the governing body of the relevant regional government and the Ministry of Natural Resources. The most important criterion for granting the license at these auctions was the lump sum amount the bidder was prepared to pay for the right to use the subsoil, but technical, environmental, safety and national security factors were also taken into consideration.

In certain instances, such as upon the enactment of production sharing agreements between the development company, investors and regional and federal governments, the Subsoil Resources Law allows for licenses to be issued without a tender procedure.

Licensing agreements for subsoil use identify the terms and conditions for the use of the subsoil, the rights and obligations of the licensee and the manager of the subsoil plot and the level of payments. There are usually three parties to any licensing agreement: the regional authority of the region where the field is located, the Ministry of Natural Resources and the licensee.

There are four types of licenses applicable to the study, exploration and production of natural resources (i) licenses for geological exploration of the subsoil plot; (ii) licenses for exploration and assessment of natural resources; (iii) licenses for production of natural resources; and (iv) combined licenses for exploration, assessment and production of natural resources. Under the Subsoil Resources Law, licenses are granted for the term stipulated in the license: up to five years for exploration and either for a period for which the field is operational<sup>†</sup> or for a short-term of up to one year for production. The Subsoil Resources Law allows the subsoil user to request an extension of the existing license in order to complete either the exploration of the field or the procedures necessary to vacate the land once the exploitation of the subsoil is complete, provided such user complies with the terms and conditions of the license. Indefinite term licenses are provided for the construction and operation of waste burial facilities, and underground storage facilities.

Licenses granted in accordance with the Subsoil Resources Law cannot be sold or transferred to another entity except in limited circumstances, such as to a spin-off company or a subsidiary in which the licensee has a 50% or greater share. Generally, a license cannot be held by more than one legal entity.

Under a licensing agreement, the licensee makes a number of commitments. For example, the licensee agrees to bring the field on stream by a certain date; to extract an agreed volume of natural resources each year; to keep environmental pollutants within specified limits; and to clean up environmental contamination. When the license expires, the licensee must return the relevant land, at its own expense, to a condition which is adequate for future use. The licensee can be fined or the license can be revoked in the event that it remains unused for a period of time, as a result of repeated or significant breaches of the law or the conditions of the license, upon the occurrence of a direct threat to the lives or health of people working or residing in an area where licensed activities are carried on, or upon the occurrence of *force majeure* events.

Although most of the conditions set out in a license are based on mandatory rules contained in Russian law, there are a number of provisions in a licensing agreement which are negotiated between the parties.

<sup>†</sup> Previously exploration and assessment and production licenses were restricted to a maximum term of 20 years and 25 years, respectively, but this restriction was abolished as of January 13, 2000 by Federal Law No. 20-FZ dated January 2, 2000 "On Amendment of the Law of the Russian Federation On Subsoil Resources."

The holder of an exploration, assessment and production license is subject to a quarterly tax calculated as a certain percentage of the value of the resources extracted. The Tax Code currently establishes a rate of 16.5% for the production of natural gas and gas condensate.

A holder of a license for exploration and assessment of hydrocarbons is to make quarterly payments for the use of the subsoil based on the total area of its allotment and a rate ranging from RR120 to RR360 per square meter. Fees for combined exploration, assessment and production licenses are negotiated by the parties to each license.

These payments for subsoil are in addition to relevant tax obligations applicable to the license holder in accordance with general tax legislation.

#### *The Unified Gas Supply System*

The UGSS is defined by the Gas Supply Law as a centrally managed, technologically and economically regulated system of gas production, transportation, storage and supply.

Gazprom is currently the owner of the UGSS. Under the Gas Supply Law the owner of the UGSS has a number of responsibilities, including ensuring a reliable supply of natural gas within Russia; maintaining and developing the UGSS network; monitoring the function of UGSS facilities; ensuring the natural gas supply agreements entered into by Russia; procuring the use of equipment and processes for power-saving and environmental safety in the UGSS; ensuring industrial safety within the UGSS; and disaster management.

The Gas Supply Law does not permit the division of the UGSS or the liquidation of its owner without the consent of the Government. The Gas Supply Law also regulates the ownership of shares in the company which owns the UGSS. In particular, foreign persons and companies are not permitted to own more than 20% of the owner's issued ordinary shares and at least 35% of the owner's issued ordinary shares must be owned by the Government. The sale or any other transfer of title of such owner's shares can only be carried out if a Federal Law is issued permitting such sale or transfer.

#### *Transportation and Supply of Gas*

The relationship between natural gas suppliers and off-takers is governed by the Regulation on Natural Gas Supplies within the territory of the Russian Federation approved by Government Resolution No. 162 of February 5, 1998.

A right of priority to enter into natural gas supply agreements is given to off-takers that purchase natural gas for the Government, utility, consumers and households, and to certain off-takers wishing to extend their existing natural gas supply agreements.

In accordance with Government Resolution No. 858 dated July 14, 1997, Gazprom is obliged to provide independent suppliers with access to its natural gas transportation system in Russia. This requirement is subject to the availability of spare capacity in the natural gas transportation system, natural gas from independent suppliers being of sufficient quality and the availability of connecting and branch pipelines to consumers.

In accordance with the Gas Supply Law, consumers are obliged to pay for natural gas supplies and transportation services. If consumers fail to make such payments, suppliers have the right to limit or suspend natural gas supplies to such consumers in accordance with specific procedures provided for by a number of Government resolutions. The Government of the Russian Federation has, however, issued a number of resolutions (e.g. Government Resolution No. 1 dated January 5, 1998 and Government Resolution No. 364 dated May 29, 2002) regulating the restriction or suspension of supplies to certain customers. These consumers include, *inter alia*, medical institutions, military units, nuclear plants, communication organizations and certain vital utilities.

#### *Prices and Tariffs*

Gas prices and transportation tariffs in Russia are regulated by the Natural Monopoly Law and the Gas Supply Law as well as by a number of supplemental Government resolutions. Government Resolution No. 1021 of December 29, 2000 "On State Regulation of Gas Prices and Tariffs for Gas Transportation in the Territory of the Russian Federation" as amended sets out the main provisions relating to natural gas prices and transportation tariffs.

The Federal Energy Commission of the Russian Federation (“FEC”) regulates natural monopolies and establishes and regulates natural gas prices and tariffs. In accordance with Resolution No. 1021, the FEC establishes the level of:

- wholesale natural gas prices;
- tariffs for gas transportation services through trunk pipelines for independent organizations;
- tariffs for gas transportation through pipelines owned by independent gas transportation organizations;
- tariffs for gas transportation through supply networks; and
- payments for the supply and marketing services rendered by gas distribution companies to end-users.

#### *Environmental Requirements*

Environmental rules and standards are regulated by a number of Russian federal laws and regulations. Federal Law No. 7-FZ “On Environmental Protection” of January 10, 2002 (the “Environmental Protection Law”), is one of the principal environmental laws. The Environmental Protection Law establishes a “pay-to-pollute” regime and is administered by the Ministry of Natural Resources and local authorities. Fees are assessed for both pollution within the limits agreed on emissions and effluents and for pollution in excess of these limits. There are additional fines for certain other breaches of environmental regulations. The Environmental Protection Law contains an obligation to make compensation payments to the budget for all environmental losses caused by pollution. In the event of a dispute concerning losses caused by breaches of environmental laws and regulations, the prosecutor’s office or other authorized governmental bodies may bring suit, though there is no private right of action. Courts may impose clean-up obligations subject to the agreement of the parties in lieu of or in addition to imposing fines.

Exploration licenses and production licenses generally require certain environmental commitments. Although such commitments may be stringent in a particular license, the penalties for failing to comply and clean-up requirements are generally low.

#### *Regulating the Activities of Natural Monopolies*

The Natural Monopoly Law defines “natural monopoly” as a condition of the commodities market in which the demand for products is satisfied more effectively in the absence of competition and in which another product cannot readily be substituted for the monopoly product. The Natural Monopoly Law sets out, *inter alia*, a regime for the regulation of entities which have a natural monopoly over natural gas transportation. It has also established an authority (currently the FEC) which supervises:

- transactions involving the acquisition by a natural monopoly entity of title to (or the rights to use) assets where the value of such assets exceeds 10% of the natural monopoly entity’s own capital (as calculated in accordance with its latest audited balance sheet). Such transactions may not be related to the industry of the natural monopoly entity;
- investments whose value exceeds 10% of the natural monopoly entity’s own capital (as calculated in accordance with its latest audited balance sheet). Such investments may not be related to the industry of the natural monopoly entity; and
- sales, leases or other transactions, whereby the natural monopoly entity disposes of assets used in the industry which it monopolizes where the value of such assets exceeds 10% of the value of the natural monopoly entity’s own capital (as calculated in accordance with its latest audited balance sheet).

The FEC can penalize a natural monopoly entity and insist that it take certain actions if the entity breaches the Natural Monopoly Law. The FEC may access information on a natural monopoly entity, whether it be held by such entity itself, Government bodies or local authorities.

The FEC’s principal methods of regulating the activities of natural monopolies are:

- price regulation; and
- identifying consumers entitled to obligatory services and setting natural monopoly minimum supply levels for such consumers (with a view to protecting the rights and legal interests of citizens, state security, the environment and cultural values).

As a natural monopoly entity, Gazprom must submit ongoing reports on its activities and drafts of capital investment plans to the FEC. The FEC has the right (i) to implement, amend or suspend the Natural Monopoly Law regulations; (ii) to instruct natural monopoly entities to enter into contracts with those consumers entitled to obligatory service; (iii) to make amendments to existing contracts; (iv) to transfer revenues from activities which contravene the Natural Monopoly Law to the federal budget; and (v) to fine natural monopoly entities for violations of the Natural Monopoly Law.

### **Energy Charter Treaty**

The Energy Charter ("EC") was conceived at a meeting of the European Council in June 1990 as a means to strengthen the relationship which existed in the energy sector between the USSR, the countries of central and eastern Europe and the countries of western Europe. The EC was officially adopted in December 1991. It is a political declaration on co-operation between east and west in the energy sector and is not legally binding on any of its parties. At present, the EC has been signed by 52 countries, including the countries of the European Union.

In December 1994, following three years of negotiations, the general intentions contained in the EC were put into a legally binding form, the Energy Charter Treaty (the "ECT"). As at July 23, 2002, the ECT had been signed by 52 countries, including Russia and the member states of the EU, and has been ratified by 46 countries.

The main objectives of the ECT are to: (i) provide a stable energy supply; (ii) provide effective production, processing, transportation, distribution and consumption of energy resources; (iii) assist in the development of the European energy market and the improvement of the global energy market through implementing principles of non-discriminatory access and free market pricing; (iv) legally protect the interests of energy-related companies and entities on issues relating to investments, transit, trade and dispute resolution procedures.

Although Russia signed the ECT in December 1994, it has not yet ratified it. The question of ratification has been discussed on a number of occasions in the State Duma of the Federal Council of the Russian Federation. The most recent hearing took place on January 26, 2001, where it was decided that the issue of ratification should be referred to the President of Russia, with a request that the Security Council be authorized, for the sake of the country's security, to analyze the economic and political consequences of the ratification of the ECT. Although Russia has not ratified the ECT, it is a member of the Energy Charter Conference and participates in the Energy Charter Secretariat's day-to-day activities.

### **European Union Gas Directive**

On June 22, 1998, the European Parliament and the Council of the European Union adopted a directive on common rules for the internal market in natural gas (the "Directive"). The Directive came into force on August 10, 1998.

The Directive establishes common rules for the transmission, distribution, supply and storage of natural gas. It sets out rules for the organization of the natural gas sector (including liquefied natural gas), access to the market, the operation of transmission and distribution systems, and the criteria and procedures for authorizing the transmission, distribution, supply and storage of natural gas. The Directive requires member states to open up their natural gas markets to competition on a staged basis: 20% by August 2000, 28% by August 2002 and 33% by August 2008. Member states may accelerate the rate at which they open their markets if they so wish, and many have done so.

The implementation of the Directive has led to significant structural changes in the European natural gas market. The Directive is bringing about a significant liberalization of the European natural gas market, which goes further than the Directive's minimum requirements. Almost 80% of the total EU market has now been opened up to competition. The EU Commission is considering the possibility of introducing a further Directive which would require total liberalization of European natural gas markets by 2004.

Russia is the largest natural gas supplier into western Europe, followed by Algeria and Norway. Current EU projections show that in order to meet the rapidly increasing demand for natural gas and to compensate for the decline in the production of natural gas within the EU, there will be an increasing dependence upon imports from outside the EU. The electricity industry and other sectors of the economy are increasingly using natural gas because of its favorable ecological characteristics, which has increased demand.

As a result of the liberalization of the EU's natural gas market, short-term contracts and single transactions involving natural gas have become more popular. In time, this may have a significant effect on the state of the market. The long-term "take-or-pay" contracts, under which most of Europe's natural gas is supplied by Gazprom and other traditional exporters, however, provide for secure and stable natural gas supplies while at the same time balancing the interests of both exporters and importers. Such contracts are also the main element of major natural gas export financing projects, which provide producers with capital needed for investments and exploration. As a result, it is unlikely that long-term natural gas contracts will be replaced by spot-transactions.

## GLOSSARY OF TERMS

“Accounting Chamber”	State Finance control authority of the Russian Federation, formed by the Federation Council, the upper chamber of the Russian Parliament
“Baltic Countries”	Lithuania, Latvia and Estonia
“bbls”	Billions of barrels
“bcm”	Billion cubic meters, as measured under one atmosphere of pressure at 20°C
“Blue Stream Project”	The construction and operation by Gazprom, in alliance with key Italian natural gas purchaser and distributor ENI, of a new natural gas trunk pipeline from Russia via the Black Sea to Turkey
“Board of Directors”	Gazprom’s board of directors consisting of 11 members and appointed pursuant to the Joint Stock Companies Law and the Charter
“boe”	Barrel of oil equivalent
“Central Asia”	Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan
“Central Bank”	Central Bank of the Russian Federation
“central and eastern Europe”	For the purposes of this offering circular: Bosnia, Bulgaria, Croatia, Czech Republic, former Yugoslav Republic of Macedonia (“FYROM”), Hungary, Poland, Romania, Slovakia, Slovenia and Yugoslavia
“Charter”	Gazprom’s Charter of May 31, 1996, as amended
“Constitution”	The constitution of the Russian Federation adopted on December 12, 1993
“EBRD”	European Bank for Reconstruction and Development
“Energy Charter Treaty”	Treaty between European states the main objective of which is to assist in the development of the European energy market.
“EU”	European Union
“EU Gas Directive”	A directive adopted by the European Parliament and the Council, which came into force in August 1998, with the purpose of establishing common rules for the organization and functioning of the European natural gas market
“Europe”	For the purposes of this offering circular, central and eastern Europe and western Europe

“FEC” .....	Federal Energy Commission of the Russian Federation established pursuant to Government Decree No. 960 dated August 13, 1996 which is responsible, <i>inter alia</i> , for regulating domestic gas prices, transportation tariffs and natural resources monopoly activities
“FSU” .....	Excluding Russia, the countries which formerly comprised the Soviet Union: Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Tajikistan, Turkmenistan, Ukraine and Uzbekistan
“General Meeting of Shareholders” .....	Gazprom’s highest authority in accordance with its Charter, with exclusive power over various aspects of Gazprom’s management
“International Energy Agency” .....	A forum with 26 member countries that is an authoritative source for energy statistics worldwide
“kW” .....	Kilowatts
“mcm” .....	Thousand cubic meters, as measured under one atmosphere of pressure at 20°C
“Management Committee” .....	An executive body of Gazprom, which along with the Management Committee Chairman, manages Gazprom’s day-to-day affairs and implements the strategic plans of the Board of Directors
“Management Committee Chairman” .....	An executive of Gazprom who is responsible for issues that do not fall within the exclusive jurisdiction of the General Meeting of Shareholders, the Board of Directors or the Management Committee
“mtoe” .....	Million metric ton of oil equivalent
“mmbbls” .....	Millions of barrels
“Novy Urengoi Gas Chemistry Complex” .....	A natural gas processing complex designed by Gazprom in cooperation with Salzgitter Anlagenbau and Linde, with some BASF participation, which is to be built in Novy Urengoi Region in western Siberia
“State Duma” .....	Lower chamber of the Russian parliament
“State Ecological Monitoring System” .....	A system, outlined in Government Decree No. 622 dated August 23, 2000, which monitors environmental conditions using various facilities
“State Gas Concern Gazprom” .....	The State controlled entity charged with the task of operating and developing the UGSS prior to Gazprom’s 1993 reorganization into a joint stock company
“Subjects of the Russian Federation” .....	State legal formations which jointly comprise the Russian Federation. In accordance with the Constitution, there are six types of Russian Federation “Subjects:” republics of the Russian Federation, krai, regions, federal cities, autonomous regions and autonomous districts

“take-or-pay” contract .....	A contract under which a purchaser agrees to take natural gas from a supplier for an agreed period and price and to pay an agreed sum to a supplier should the purchaser be unable to continue to buy
“tcm” .....	Trillion cubic meters, as measured under one atmosphere of pressure at 20°C
“toe” .....	Metric ton of oil equivalent
“ton” .....	One metric ton
“Transbalkan Pipeline Project” .....	Gazprom’s project on the expansion and modernization of the existing pipeline network in the Ukraine, Romania and Bulgaria
“western Europe” .....	For the purposes of this offering circular Andorra, Austria, Belgium, Cyprus, Denmark, Finland, France, Germany, Greece, Greenland, Iceland, Republic of Ireland, Italy, Liechtenstein, Luxembourg, Malta, Monaco, The Netherlands, Norway, Portugal, San Marino, Spain, Sweden, Switzerland, Turkey and the United Kingdom
“UGSS” .....	Unified Gas Supply System
“US” or “U.S.” .....	United States of America
“UK” .....	United Kingdom
“Yamal-Europe Project” .....	Gazprom’s project, which consists of the construction of pipelines (total length approximately 5,900 km) from the northern part of the Tyumen region in the Russian Federation to Germany, running through the territories of Belarus and Poland
“Yamburg Agreement” .....	A number of contracts made between government authorities of the former USSR and a number of central and eastern European countries in 1985-1992 which provided for gas deliveries by Gazprom
“Yugoslavia” .....	The former Yugoslavia or the current Serbia and Montenegro, as the context may require.

#### CONVERSION TABLE

<u>metric measure</u>	<u>U.S. measure</u>
1 bcm .....	35,316,000,000 cubic feet
1 tcm .....	35,316,000,000,000 cubic feet
1 ton .....	1,000 kilos, 2,204.6 pounds, 7.33 barrels
1 kilometer .....	approximately 0.62 miles
1 metric ton of oil equivalent .....	25.2 Quadrillion Btus (British Thermal Unit) approximately 1,125 cubic meters of natural gas
1 barrel of gas condensate .....	1 barrel of oil equivalent (boe)
1 cubic meter of natural gas .....	5.885 barrels of oil equivalent (boe)

**IAS CONSOLIDATED FINANCIAL STATEMENTS**  
**31 DECEMBER 2001 and 2000**

## AUDITORS' REPORT

To the Shareholders of OAO Gazprom

1. We have audited the accompanying consolidated balance sheets of OAO Gazprom and its subsidiaries (the "Group") as of 31 December 2001 and 2000, and the related consolidated statements of operations, of cash flows and of changes in shareholders' equity for each of the years then ended. These financial statements are the responsibility of the Group's management. Our responsibility is to express an opinion on the consolidated financial statements based on our audits.
2. We conducted our audits in accordance with International Standards on Auditing. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.
3. In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as of 31 December 2001 and 2000, and the results of its operations and its cash flows for the years then ended in accordance with International Accounting Standards.
4. Without qualifying our opinion, we draw your attention to Note 26 to the consolidated financial statements. The Government of the Russian Federation is the principal shareholder of the Group and governmental economic and social policies affect the Group's financial position, results of operations and cash flows.
5. Further, we draw your attention to Note 29 to the consolidated financial statements. The consolidated financial statements as of 31 December 2001 and 2000, as previously issued, have been restated for changes in the general purchasing power of the Russian Rouble in accordance with International Accounting Standard 29 "Financial Reporting in Hyperinflationary Economies" with all amounts stated in terms of the measuring unit current as of 30 September 2002.

Moscow, Russian Federation

26 June 2002, except for Note 29, as to which the date is 10 February 2003

# ОАО ГАЗПРОМ

## NOTES TO THE IAS CONSOLIDATED FINANCIAL STATEMENTS

(In millions of Russian Roubles in terms of the equivalent purchasing power of the Rouble  
as of 30 September 2002, except as noted)

### 1 NATURE OF OPERATIONS

RAO Gazprom was established as a Russian joint stock company by Presidential Decree No. 1333 dated 5 November 1992. The Annual General Meeting of shareholders, held on 26 June 1998, approved a recommendation from the Board of Directors on revising the name of the Company in order to comply with the federal law on joint stock companies. Consequently, the Company became the open joint stock company Gazprom or OAO Gazprom.
