**GTECH INTERNATIONAL RESOURCES LIMITED****Notes to the Financial Statements for the three month period ended 31 January 2005****1. Nature and Continuance of Operations**

The company was incorporated under the laws of the Yukon Territory and is registered extra-provincially in the Province of British Columbia, Canada.

The company was in the process of exploring its mineral properties and had not determined whether these properties contained ore reserves that were economically recoverable. The Company has written-off all amounts shown for mineral properties and their related deferred costs. The Company is currently considering opportunities in the biotechnology field.

**2. Significant Accounting Policies****(a) Mineral Properties and Deferred Costs**

The Company has written-off all of its mineral property interests and retains a residual royalty entitlement in respect of its Aurex exploration property.

**(b) Fair value of financial instruments**

The carrying amount of cash and cash equivalents, accounts receivable and accounts payable and accrued liabilities approximate their fair value due to their short-term nature.

**(c) Stock option plan**

The company has no formal stock-based compensation plan. Options are granted periodically by the directors and compensation expense is recognized when stock or stock options are issued using the fair value method. Any consideration paid by directors, employees or consultants on exercise of stock options or purchase of stock is credited to share capital. No stock options were issued during the years ended 30 April 2003 and 2004 and the current interim period.

**(continued)****(d) Income taxes**

Effective 1 January 2000, the company adopted the new recommendations of the Canadian Institute of Chartered Accountants with respect to accounting for income taxes, whereby income taxes are calculated using the liability method of accounting. Temporary differences arising from the difference between the tax basis of an asset or liability and its carrying amount on the balance sheet are used to calculate future income tax liabilities or assets. These new standards also require that the future income tax liabilities or assets are measured using tax rates and laws expected to apply in the periods that the temporary differences are expected to reverse. The Company has currently provided for a full valuation allowance against any potential tax assets.

The implementation of the new recommendation, which was applied retroactively, has had no effect on these consolidated financial statements.

**(e) Use of estimates**

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the period. Actual results may differ from these estimates.

**(f) Investment**

The Company's investments are carried at cost and are considered non-current assets as the Company intends to hold them for a period of greater than one year. If there is an aggregate loss in value that is other than temporary, defined as existing over two consecutive year ends, the component loss investments are written-down to their estimated market values.
