**Overview of the bonds issued by the Issuer.**

Category of the securities: *certified non-convertible interest-bearing series 02 bearer bonds*

Series: *02*

Type: *interest-bearing*

Form of the securities: *documented bearer bonds*

Nominal value of one bond of the issue: *RUR1,000*

Mode of placement: *public subscription*

Bond placement period: *Placement start and end date is July 23, 2002*

Terms and arrangements of the bond issue placement:

As of the date of publishing by the Issuer of the notice of the state registration of the bond issue in the course of information disclosure regarding the securities issue all interested parties may review the decision

to issue bonds and the bond issue prospectus at the following addresses:

Joint-Stock Central Telecommunication Company  
6 Degtiarny Per., building 2, K-50, GSP-9, Moscow, 101999, Russia

Joint-Stock Commercial Bank Moskovski Delovoy Mir JSC (Moscow Business World)  
3 Sadovnicheskaya Street, Moscow, 113035, Russia. Telephone: (+7 095) 795-2521

Private Joint-Stock Company Raiffeisenbank Austria  
17/1 Troitskaya Street, Moscow, 129090, Russia. Telephone: (+7 095) 721-99-29

Private Joint-Stock Company Investment Company Troyka-Dialog  
4 Romanov Per., Moscow, 103009, Russia. Telephone: (+7 095) 258-05-00

The bond placement is effected by entering into sale-purchase deals at the bond placement price set by the Issuer's Board of Directors (starting from the second day from the bond placement start date the buyer during the closing of the sale-purchase deal shall also pay the coupon interest accrued on the bonds).

Closing of bond placement deals shall start on the first day of the bond placement period and end on the bond placement end date specified for the bond issue.

Bond placement shall be effected at the Securities Market Section of Private JSC Moscow Interbank Currency Exchange (henceforth MICEX).

Deals on the bond placement are made in the negotiations mode conducted at MICEX's Securities Market Section by granting applications for sale/purchase of the bonds filed using trade and settlement system of MICEX.

The Seller of the bonds is the Underwriters, acting in their own names, but on a commission and for expenses of the issuer. The issue underwriters are Joint-Stock Commercial Bank Moskovski Delovoy Mir JSC (Moscow Business World – Public Joint-Stock Company), Private Joint-Stock Company Raiffeisenbank Austria, Private Joint-Stock Company Investment Company Troyka-Dialog (henceforth the “Underwriters”).

A potential buyer of bonds who is a member of MICEX's Securities Market Section acts on its own.

In the event that a potential bond buyer is not a member of MICEX's Securities Market Section it/he/she should conclude a relevant agreement with any broker, who is a member of MICEX's Securities Market Section, and issue an order to the broker to acquire bonds of the issue.

A potential bond buyer shall open a relevant depo account with Not-for-profit Partnership National Depository Center (henceforth NDC) effecting the centralized custody storage of the bonds of the issue, or with another depository who is a depository with respect to NDC. Arrangements and period for opening account are according to rules of procedure of the relevant depositories.

Members of MICEX's Securities Market Section (the “Dealers”) acting in their own names and for their own sake, or in their own name but on behalf and for the sake and at the expense of potential buyers, who are not dealers, may on any business day within the bond placement period file an application for a bond purchase at the placement price identifying number of bonds planned to be purchased.

The applications for securities purchases should be granted by the Underwriters in full, provided that the number of bonds identified in the application for purchase does not exceed the number of the unplaced bonds of the issue. If the number of bonds identified in the application for purchase does exceed the number of bonds remaining unplaced, the application for bond purchase should be granted to the amount of unplaced bonds of the issue.

Underwriters shall grant the applications for bond purchase according to First Come – First Served order. If the total bond issue is placed the further applications are not accepted.

A mandatory condition for a bond purchase on MICEX during the bond placement is depositing of the buyer's funds on the account of the member of MICEX's Securities Market Section on whose behalf the application was filed, with MICEX's Clearing Chamber. The amount of deposited funds shall be enough to cover the whole payment for the bonds identified in the applications for bond purchases, including all applicable MICEX's fees and charges. If the conditions stated in a bond purchase application meet the requirements above, the Underwriter shall accept the application at MICEX on the date of filing and the application should be registered with MICEX. The sold bonds shall be entered by the Depository into the bond buyer's depo account at the date of executing the sale-purchase transaction.

Placement period: *from July 23, 2002 through July 23, 2002*

Placement price: *RUR1,000*

Number of actually placed securities pursuant to the registered report on the results of the issue: *600,000*

Security provided for the bond issue:

Entity providing the security: *Bassian invest Limited Liability Company*

Type of security: *Surety*

Monetary value of the security: *RUR600,000,000 and the accrued interest*

Conditions of the collateral provision:

Agreement to provide surety to Joint-Stock Central Telecommunication Company for the purpose of bond issue #611/02 – DO of April 30, 2002 concluded by and between the Issuer and Bassian invest LLC identifies the Agreement as an offer, open for third parties – owners of the bonds to join it through bond acquisition. Third parties gain the right to demand from Bassian invest to meet its obligations under the said Agreement as of the moment of bond acquisition by them, the said bonds being covered by the Agreement to provide surety for the Issuer's obligations. Disposal of the bonds by their owners is deemed as a waiver of the rights with respect to Bassian invest LLC granted by the said Agreement. With the transfer of rights for the bonds to the bond purchaser the latter gains the rights of a bond owner under the said Agreement and in the same scope and under the terms and conditions, as existed at the moment of the transfer of rights for the acquired bonds.

*Acquisition of bonds means conclusion by the bond purchaser of a contract under which the surety for the bond issue is provided. With the transfer of rights for the bonds to the bond purchaser the latter gains the rights of a bond owner under the said contract and in the same scope and under the terms and conditions, as existed at the moment of the transfer of rights for the acquired bonds.*

Bassian invest LLC undertakes to meet for the issuer its obligations toward the bond owners only after it was established that the issuer is unable to meet its obligations to the bond owners.

Bassian invest LLC undertakes to perform the issuer's obligations to the bond owners entitled to demand from the surety performance of its obligations according to the concluded Agreement subject to simultaneous fulfillment of the following conditions:

- the issuer failed to pay or paid partially coupon income as a percentage of the bond nominal value to bond owners at the time set out in decision on the bond issue and bond issue prospectus;
- the issuer failed to pay or paid partially the nominal value of bonds on the redemption to the bond owners at the time set out in decision on the bond issue and bond issue prospectus;

Simultaneous existence of these conditions constitutes an instance of default of the issuer on its obligations toward owners.

Should the fact of the issuer default be established Bassian invest LLC undertakes within 2 (two) days from the date when the default was established as a fact to meet the issuer's obligations to pay the bond nominal value and coupon to all bond owners.

The arrangements and procedure of performance by Bassian invest LLC of the issuer's obligations toward the bond owners are identical to the same set out for the issuer as described in decision on the bond issue and bond issue prospectus.

Arrangements for concluding deals on the first day of placement

An auction for the determination of the first coupon interest rate for the bond issue shall start and end on the first day of the bond placement period. The arrangements for holding the auction to determine the first coupon interest rate for the bond issue are set forth in item 57.11 of the Bond Issue prospectus and item 8.3 of the decision on the bond issue.

Upon expiry of the period for filing applications for the auction to determine the first coupon interest rate MICEX shall compile registers of the entered applications filed with each of the Underwriters, and submit them to the Issuer and/or Underwriters. Based on the submitted registers of the applications the Underwriters compile a compounded list of applications.

Based on the analysis of compounded list of purchase applications filed for the auction the Issuer shall

determine the first coupon interest rate and in writing advise of it both MICEX and Underwriters.

Underwriters shall publish a notice of the first coupon interest rate using MICEX's trade system by sending electronic messages to all members of MICEX's Securities Market Section.

Upon receiving from the Issuer of a written notice of the first coupon interest rate Underwriters based on the compounded list of applications filed for the auction to determine the first coupon interest rate identify the general list of applications to be granted by them and the order of granting them. Underwriters shall put on the general list of accepted applications only those applications where the acceptable interest rate stated in the application by the prospective buyer of bonds is less or equal to the first coupon interest rate determined by the Issuer based on the results of the auction held by it.

By an acceptable first coupon interest rate is meant the first coupon interest rate which if announced by the Issuer will lead to a potential buyer's willingness to buy the number of bonds specified in its application at the par value.

- The Underwriters determine the order of granting applications, based on the following criteria:  
In the first place applications where the least first coupon interest rates are stated.
- If there are multiple applications for bond purchase registered in the list and stating the same first coupon interest rate, the applications filed earlier in time shall be granted in the first place.

After the general list of accepted by Underwriters applications is compiled and the order of granting them is identified, the Underwriters shall compile specific lists of applications to be granted, filed with each Underwriter and the order of granting them by each Underwriter specifically.

After compiling specific lists of applications to be granted, filed with each Underwriter and the order of granting them by each Underwriter specifically Underwriters shall grant these applications. Granting applications by the Underwriters shall start at the same agreed upon moment.

If on the first day of the bond issue placement the Underwriters accepted applications of prospective investors filed for the action to determine the first coupon interest rate and carrying on aggregate the number of bonds equal the total volume of the bond issue (i.e. 2,000,000 bonds), there shall be no further placement of the bond issue.

Arrangements for bond placement on the subsequent days of the placement.

If on the first day of the bond placement after the Underwriters have granted all applications filed for the auction to determine the first coupon interest rate, a part of the issue remains unplaced on the second and following days of the placement the remaining bonds will be placed.

Starting from the second day of the bond placement the bond buyer when completing a sale-purchase transaction shall also pay the accrued coupon income (the ACI) on the bonds, calculated by the following formula:

$$ACI = C_j * Nom * (t - T_j - 1) / 365 / 100 \%$$

where

Nom – nominal value per bond;

C<sub>j</sub> – the relevant coupon interest rate(per cent p.a.)

T<sub>j</sub>–the first day of the start of the jth coupon period;

t – current date.

j – the consecutive number of the relevant coupon period: 1-6;

The amount of the accrued coupon income is calculated with accuracy of 1 copeck (round-off follows mathematical rules, i.e. the quantity of copecks remains the same if the next less significant digit is less than 5, and is increased by 1, if the next digit is from 5 through 9 inclusive).

On the second and the subsequent bond placement days members of MICEX's Securities Market Section file applications for purchase of bonds both on their own expense and for the expense and pursuant to customers' orders. The time for filing applications for purchase is set by relevant MICEX's rules upon concurrence of the Issuer and/or the Underwriters. Applications for bond purchase are filed with one of the Underwriters and should specify the following significant conditions:

a.1) Purchase price - 100 % of the nominal value;

a.2) Number of bonds that the potential buyer would like to purchase.

Upon expiry of the period for filing applications for the bond purchase MICEX shall compile a list of entered

applications filed with each Underwriter and submit it to the Issuer and/or the Underwriters. Based on the submitted list of filed applications the Underwriters shall compile a general list of applications.

After the general list of accepted by Underwriters applications is compiled and the order of granting them is identified, the Underwriters shall compile specific lists of applications to be granted, filed with each Underwriter, and the order of granting them by each Underwriter specifically.

After compiling specific lists of applications to be granted, accepted by each Underwriter and the order of granting them by each Underwriter specifically, Underwriters shall grant these applications. Granting applications by the Underwriters shall start at the same agreed upon moment.

Terms and conditions and arrangements for placement of the bond issue

Specifics of the bond placement on the first day of placement

The bonds shall be placed pursuant to effective regulations and rules of Private JSC Moscow Interbank Currency Exchange.

Potential buyers who are members of MICEX's Securities Market Section are admitted for purchasing bonds. In the event that a potential bond buyer is not a member of MICEX's Securities Market Section it should conclude a relevant agreement with any broker, who is a member of MICEX's Securities Market Section, and issue an order to the broker to acquire bonds of the issue.

A potential buyer of bonds who is a member of MICEX's Securities Market Section (Section Members) acts on its own.

A potential bond buyer shall open a relevant depo account with Not-for-profit Partnership National Depository Center (henceforth NDC), or with another depository who is a depositor with respect to NDC. The Underwriters shall grant only those applications of the Section members which were earlier included in the list of accepted applications. Each Underwriter shall grant applications in the order specified earlier when compiling the list of accepted applications.

If the amount of bonds to be purchased specified in the application exceeds the number of bonds left unplaced, the relevant Underwriter shall grant the applications to the extent of the left unplaced bonds of the issue

The time for conducting transactions during the auction to determine the interest rate and closing placement deals shall be determined by MICEX upon agreement with the Issuer and/or Underwriters.

A mandatory condition to be met for bond purchase during their placement is a deposit of the buyer's funds on an account of the Section Member in whose name the application is filed, with Non-bank Credit organization Private joint-stock company Clearing House of Moscow Interbank Currency Exchange (the "MICEX CH"). The deposited funds shall be enough to cover in full the payment for the bonds specified in the applications and all applicable commissions and fees charged by MICEX. If an application meets the above requirements the application shall be accepted by the Underwriter on the day of its filing and registered by MICEX.

Bonds sold on the day of completing the sale-purchase deal during the bond placement in MICEX's Securities Market Section shall be transferred to the depo accounts of the bond buyers – depositors of NDC and other depositories – NDC's depositors on the date of closing the sale-purchase transaction

#### 2.3.4 Other liabilities of the issuer

No other liabilities

### 2.4 The objectives of securities issues and channeling the proceeds from placement of issued securities

In the reporting quarter no securities issues (either public or private) were undertaken by the issuer; no funds were raised through placement of issued securities.

### 2.5.1. Risks in the telecommunications industry

The key risk factors taken into account by the Company in doing business are:

1. Enactment as of January 1, 2004 of the new Federal Telecommunications Act setting forth a new legal basis of activities in the telecommunications industry and identifying the legal status of government bodies. The Act may increase regulatory pressure on the Company, and until required regulations are enacted there will be an inevitable period of uncertainty and discrepancies connected with interpretation of the Act by regulatory bodies. According to the new Act the Company shall apply identical terms and conditions of interconnection and traffic carrying for all network operators providing services the same services, and render interconnection and traffic carrying services to these operators under the same terms and conditions and with the same quality of services, as the Company offers to its structural units and affiliated entities. Also, according to the new Telecommunications Act payments for local telephone calls shall be made according to the subscriber's choice (an individual natural person) applying either monthly rental or per-minute billing. The Company management is not in a position to predict how the new Act may affect the Company operations.
2. Ongoing industry consolidation resulting in the integration of alternative telecom operators to create large national holdings.

It should be noted, however, that CenterTelecom anticipates likely negative impacts of these risk factors and undertakes necessary measures to alleviate the consequences.

Currently JSC CenterTelecom implements marketing strategies aimed primarily at maintaining its market share, increasing revenues generated by non-regulated telecommunications services, and improving the Company's competitive edge.

**The following economic factors may result in worsening of the Issuer market position and of the situation in the telecom industry as a whole:**

- **falling demand of the businesses due to declining oil and gas and non-ferrous metal prices on the world markets;**
- **general reduction in production output and economy growth rates;**
- **rouble depreciation rates surpassing tariff growth resulting in significant growth of negative translation adjustments and higher costs of servicing hard currency nominated liabilities;**
- **growing competition in the mobile communications of Russian and foreign operators, expansion on the mobile market by operators using competing standards;**
- **increase of settlement rates charged by Rostelecom – the principal domestic long-distance and international carrier, providing to the Issuer an access to the nationwide and international networks;**
- **economic risks inherent to the Russian Federation as a whole, including the level of macro-economic instability in the country, probability of changes in the legislation resulting to possible reduction in the Issuer profit, or hardening regulations governing taxation of income from securities.**

The Issuer is expected to undertake the following actions, should changes occur.

In the event of negative developments the Issuer is going to capitalize on the following competitive strengths:

- fairly extensive network infrastructure
- high quality of service despite ever growing number of subscribers;

Additionally, the Issuer plans:

- to optimize production costs structure;
- to revise the investment program of the Company;
- to adjust pricing and marketing policies of the Company;
- to change the break down of service offerings to maximize profit.

Risks related to possible changes in prices for raw materials, services used by the Issuer in its activities are mainly risks involving changes of rates charged by Rostelecom for leasing circuits and for international telecom services, and changes in prices charged by key equipment suppliers. These risks do not significantly affect the Issuer operations.

Risks connected to changes in prices for government regulated telecommunications services may result in short-term decline in demand for these services and tougher competition. In such circumstances JSC CenterTelecom will aggressively promote services offered at unregulated prices, thus preventing significant reduction of revenues.

JSC CenterTelecom successfully manages risks inherent to the Company activities. On the whole, exposure of the

Issuer to the industrial risks and performance of obligations on its securities can be assessed as minimal. The Company owns a single united network infrastructure in the Central Federal District, enabling provision of a wide range of services in the telecom market, remaining a competitive company and improved margins of services provision.

## 2.5.2 Sovereign and regional risks.

### FORECAST OF EMERGENCIES

1. Regional risks (risks related to possible military conflicts, introduction of the state of emergency and industrial actions/strikes).

The Issuer is registered as a taxpayer and performs its core business activities in the Central Federal District (Okrug) of the RF, where risks of military conflicts, introduction of the state of emergency are estimated as minimal possible.

Social situation in the territory of the Issuer business operations is viewed as calm. No explicit ethnic conflicts or religious extremism should allow to carry on business running minimal social and political risks.

The risk of an overt military conflict, introduction of the state of emergency in the area cannot be assessed by the Issuer. Should these circumstances occur the Issuer will act pursuant to effective legislation.

2. Risks related to the geographic features of the region (emergencies of the natural character).

Forecast of natural disasters.

Though instabilities of the atmospheric circulation will remain in 4Q2004, there will be no dangerous meteorological phenomena in the territory of the CFD.

The heaviest damage to the economy of the Central Federal District and highest social tension are caused by forest and peat fires, fires in population centers and industrial facilities, disruptions in fuel and heat supply and utilities functioning, transport system disruptions.

Solar and geomagnetic activity

In 4Q2004 solar and geomagnetic activity is forecast to be mild. However lower level of geomagnetic disturbances cannot exclude a certain degree of influence on the health and general working ability of the employed personnel and population of the CFD.

Natural fires

Currently conditions for large natural fires in the CFD do not exist.

Earthquakes

Earthquakes in the territory of the CFD in the reporting period are extremely unlikely to happen.

Climatic emergencies

All regions of the CFD are running the risk of such natural disasters (hurricanes, tornadoes, heavy snow falls, deep frosts)/

Heavy snowfalls are forecast in some regions of the CFD in mid 4Q2004; however, they will not significantly affect the Issuer operations.

The meteorological situation (the temperature pattern) in 4Q2004 will not differ significantly from annual average monthly temperatures.

3. Risks related to man induced emergencies

Forecast of man induced emergencies.

Generally, the prevailing types of man induced emergencies will be:

- major transportation failures;
- fires in residential housing and industrial sites;
- utilities failures (cold/hot water supply, central heating, etc.);

Transportation dangers

The highest risk of most frequent transport failures is expected during the quarter in automobile transportation, in November-December in air transportation.

The highest risks of man induced local emergencies remains in Moscow, the Moscow region, Tver, Tula, Voronezh, Tambov, Kursk, Ryazan, Belgorod regions, as regions with developed transport and industrial infrastructure carrying such risks in the first place.

### Radiation danger

Areas carrying the highest risk of radiation leaks are those where nuclear reactors are deployed: Moscow, Kursk, Voronezh, Smolensk, Tver, Kaluga regions.

There is no direct danger for personnel and telecommunications facilities during normal operations, though a remote danger of accidents, including nuclear leaks, still remains.

### Chemical danger

Mostly, Moscow and the Moscow region, Bryansk, Kursk, Tambov, Tver, Tula, Ryazan, Voronezh and Yaroslavl regions run the risk of chemical accidents. The chemical danger still exists, as there is no hard guarantee of timely prevention of chemical leaks (as of today). In case of a major accident a huge area may be affected (contamination footprint) leading to a high toll of casualties.

### Forecast of biological and social emergencies

Probability of contagious diseases in 4Q2004 is expected to remain.

Incidence rates of influenza will probably remain on the normal seasonal level.

It is expected that incident rates of some contagious diseases (salmonellosis, hepatitis, meningococcosis, diphtheria, measles) will fall.

Increased illness rates connected with rubella, pertussis, flux, typhoid are predicted.

Social and life, as well as working conditions will aggravate social diseases and neurosis and neurotic reactions.

TB situation will remain in general serious.

Mortality level will remain high.

Emergency situations connected with biological and social causes should they occur will be locally limited and should not significantly affect the Issuer activities.

The Issuer actions to be undertaken in case of unfavorable changes in the situation in the area (region) will be in line with effective regulations and legislation governing legal relationship arising while protecting personnel and territories from emergencies of natural and man induced character.

## 2.5.3 Financial risks

The issuer's activities are affected by financial risks such as overdue credit repayments and interest payments, and as a consequence, imposing fines and late payment charges and increasing interest rates charged by commercial banks for using loan funds. The highest degree of the risk is inherent to accounts payable.

Overdue debt connected with borrowed funds as compared to the total value of borrowed funds over the past three years on average did not exceed 2.1%, which is rather insignificant. Additional expenses of the issuer resulting from fines and additional late payment charges do not significantly affect the issuer's financial position.

As refinancing rates set by the CB of Russia diminish, the issuer takes measures to amend terms and conditions of the concluded loan agreements towards lower capital costs of the granted loan facilities and early repayment of high capital cost loans.

Susceptibility of the Issuer financial position (its liquidity, financing sources, results of operations, etc.) to currency exchange rate volatility.

JSC CenterTelecom has some obligations under credit facilities, supplier credits, leasing liabilities nominated in foreign currencies, so that substantial changes in the currency exchange rates may affect the Company financial position.

Projected actions to be undertaken by the Issuer in case of negative impact of currency exchange rate changes and interest rates on the Issuer operations.

In case of significant changes in currency exchange rates in order to reduce the impact of this risk the Issuer intends to do the following:

- to optimize production costs structure;
- to revise the investment program of the Company;
- to raise tariffs charged by the Company for rendered telecommunications services;
- to adjust pricing and marketing policies of the Company;
- to change the break down of service offerings to maximize profit.

### *Impact of inflation on payments made on securities:*

Before the deadline for meeting by the Issuer of its obligations under its bond issues, the Company Economic Development forecast for 2004-2010 envisages annual tariff growth rates and operating margins growth for offered services exceeding those of the inflation. The relevant annual inflation rates are estimated by the Issuer at the level

of 10-12%. The risk will not significantly affect financial performance of the issuer; nor will it influence its ability to meet its obligations connected with securities.

Critical for the Issuer inflation rates and projected actions of the issuer aimed at reduction of the inflation risks  
In the Issuer's view critical inflation rate values are far beyond the inflation rates forecast for 2004-2009, in the vicinity of 30-40% yearly. Should inflation rates reach their critical for the issuer values the Issuer intends to adequately raise prices for its services to compensate the negative impact of this factor. If inflation rates exceed the critical values, the issuer intends to raise prices for services rendered and undertake cost cutting exercises, reduce accounts receivable and average period in arrears of accounts receivable.

Indicators of financial reports of the issuer most susceptible to changes due to impact of financial risks affecting financial reports of the issuer; probability of their occurrence and nature of changes in reported indicators.

Profit and loss account (income statement)

Line 010 Revenues from sales of goods, products, works, services

Line 020 Costs of goods sold (products, works, services)

Line 120 Non-sales revenue (income)

Lin1 130 Non-sales costs

Line 140 Pre-tax profit (loss)

The main factor affecting financial statements of the issuer is sharp deviation of the inflation rates from the predicted ones.

Inflation growth unless adequate measures in business management are undertaken by the Issuer, could result in growing costs of sold goods, products, (works, services) reflected in financial statement Form 2 Profit and loss account Line 020, and as a consequence, reduction of posted profit (loss) in Form 2 Line 140.

If adequate countermeasures to resist growing inflation rates are taken by the Issuer management, the growth may not significantly affect operation results. Then in Form 2 Profit and loss account figures in Line 010 Revenues from sales of goods, products (works, services) and Line 020 Costs of sold goods, products (works, services) will be up.

#### **2.5.4. Legal risks**

The Issuer carries out its core operations as a telecommunications carrier without export of services, and works and goods likewise. Therefore legal risks related to the Issuer business arise mostly in activities of the Issuer on the internal market, which is characteristic of a majority of businesses in the territory of the Russian Federation.

The issuer runs certain risks involved in direct export contract for purchases of equipment required for its operations, viz. provision of telecommunications services. In 4Q2004 the issuer received products from a foreign supplier under a previously concluded contract, so that legal risks of the issuer were connected only with the necessity of compliance with relevant provisions of customs legislations. No new external trade contracts were concluded in the reporting period.

A part of telecommunications equipment required for doing business directly as a telecommunications operator is acquired by the Issuer under leasing terms with foreign suppliers as counterparties, granting the right to buy out the relevant piece of equipment upon expiry of the lease term. In 4Q2004 the issuer's lessors received equipment purchased under external trade contracts and earmarked for leasing to the issuer under capital lease agreements; therefore, these lessors run the risks involved in the performance under external trade contracts for purchase of equipment.

In the currency control regulations:

The Federal Law On currency regulation and currency control #173-FZ of December 10, 2003 took effect on June 17, 2004. To enforce the Law a number of regulations and other legal acts were enacted amending relevant federal laws and effective regulations as required.

In particular:

Federal Law #118-FZ of August 18, 2004 On amending Code of Administrative Offences of the Russian Federation and Customs Code of the Russian Federation enacted as from October 1, 2004 a new issue of Article 15.25 Violation of Currency Regulations Legislation of the Russian Federation and acts of currency regulation authorities. Compared to the previous issue of the Article the new version significantly extends the grounds for taking to account for administrative violations including besides those directly related to currency operations which are illegal, some violations that could be made in conducting illegal currency operations, in particular, a violation of execution of foreign trade deal passport, violations in making deposits to support currency operations, violation of rules and deadlines for submitting reports and accounts dealing with currency operations, etc.

A significant part of provisions introducing amendments in the currency legislation and other legal acts regulating

currency operation, set forth in previously passed legal acts, took effect as from January 1, 2005.

Thus, in the normal course of business both on internal and external markets the issuer run normal business risks related to compliance with requirements of currency regulations in conducting currency operations.

**Tax legislation:**

No amendments made into the tax legislations took effect in 4Q2004. A majority of amendments introduced into the tax legislation by federal laws passed earlier including amendments to part one and two of the Tax Code of the Russian Federation will take effect as from January 1, 2005.

As far as regulations are concerned there were no legal acts enacted in the reporting quarter that significantly affect these area of law. New forms for verification of settlements with the budget and advising taxpayers of the state of their budget settlements, as well as Guidelines for filling out the forms were enacted as of November 1, 2004 by Order of the Ministry for Taxes and Duties of the RF #SAE-3-27/483 of August 31, 2004.

However, being a conscientious taxpayer without any overdue payments with respect to taxes and duties to budgets of all levels and due to strict abidance and correct application of tax regulations the Issuer runs no higher risks.

**Customs legislation:**

Due to enactment as from January 1, 2004 of the new Customs Code of the Russian Federation passed by Federal Law #63-FZ of May 28, 2003 required amendments in federal laws are being introduced, and supporting regulations are aligned.

Nevertheless, no amendments significantly affecting the issuer operation introduced earlier in the customs legislation by relevant federal laws, including amendments to the Customs Code of the Russian Federation, federal laws On Customs Duties, On the Basics of External Economic Activities, etc. took effect in 4Q2004. A significant part of these changes will take effect as of 2005.

As far as regulations are concerned there were no legal acts enacted in the reporting quarter that significantly affect these area of law. Thus, in the reporting period the issuer run normal legal risks related to the necessity of compliance by the issuer with the provisions governing customs clearance of products received under previously concluded external trade contracts. Risks involved in delivery and acceptance of equipment from foreign suppliers to be leased by the issuer were run by the lessors providing their services to the issuer.

Legal risks related to changes in requirements for licensing of the core business of the issuer, or licensing facilities/sites with restricted negotiability.

According to the new Federal Telecommunications Act enacted as of January 1, 2004 the list of services to be stated in licenses and respective lists of licensing requirements shall be set by the Russian Government to reviewed annually. Until now theses government regulations are not passed making it impossible for the Company to obtain new licenses to expand its activities in telecommunications.

The new law also expanded the list of data to be provided to the licensing authority required for the license to be issued.

In order to renew a license or make amendments/changes related to changes in radiofrequency spectrum and service area of the license the same documents should be submitted as when initially applying for a license.

Pursuant to the Presidential Decree of March 9, 2004 # 314 and Ordinance of the Government of the RF #163 of April 6, 2004 the Federal Telecommunications Supervision Service is entrusted with licensing of activities in telecommunications.

These changes may cause additional expenses of the licensee in performing telecommunications activities.

There are no significant legal risks that may arise due to changes in the judiciary practice in the reporting period connected with activities of the Company and adversely affect the results of its operations, and the outcome of ongoing litigations.

#### **2.5.5. Risks inherent to the activities of the issuer**

The following lawsuits can be treated as significant ones:

- law suits valued at over 10% of the book-value of the Company, or 4,104,006,800 roubles as on September 30, 2004;
- lawsuits hampering business activities of the issuer or aimed at their prohibition or discontinuance (suits requesting wind-up of the Company, admission of insolvency or bankruptcy of the Company or its daughter and affiliated companies, alienation of property (assets), contesting license or patent rights, recovery of arrears in taxes and budget payments and out-of-budget funds in a significant amount).

In the reporting period the Company was not a party to court proceedings involving lawsuits valued at or over 10% of the assets carrying value.

In view of the above it can be stated that there were no significant legal risks involved in the Company participation as a party in ongoing litigations.

Risks related to a non-renewal of the issuer's licenses to carry out certain activities or to use facilities with restricted usage:

Risks related to inability to renew licenses may be related to:

- 1) changes in the applicable law governing licensing;
- 2) reorganization of licensing authorities.

Risks related to possible liability of the issuer for debt of third parties, including its daughter companies.

In 4Q2004 the Company concluded two surety contracts with the Saving Bank of the RF for OAO Russian Telecommunications Networks and a surety contract with the Saving Bank of the RF for OAO RTC-Leasing.

### **III. Detailed profile of the issuer**

#### **3.1. Background and history of the Issuer**

##### **3.1.1. Registered corporate name of the issuer.**

According to the Charter of JSC CenterTelecom as approved by the general meeting of shareholders (minutes #10 of February 20, 2003) the corporate registered name of the issuer is "Joint-Stock Central Telecommunication Company", abbreviated to JSC CenterTelecom.

The company emerged in June 1994 (state registration certificate #127 of June 20, 1994) as a result of a transformation of state enterprise for telecommunications and informatization Rossvyazininform (GPSI) of the Moscow region into a public joint-stock company Elektrosvyaz of the Moscow region. Public joint-stock company Elektrosvyaz of the Moscow region (abbreviated as Elektrosvyaz of the Moscow region) was renamed as (open) joint-stock company Elektrosvyaz of the Moscow region (Amendments and additions #3 to the Charter of Joint-Stock Company Elektrosvyaz of the Moscow region approved by Meeting of shareholders of AO Elektrosvyaz of the Moscow region, minutes #3 of June 27, 1997), abbreviated as Elektrosvyaz of the Moscow region. The changes were registered by the Moscow region registration chamber on July 23, 1997. On June 1, 2001 the Company was given a new name – Joint-Stock Central Telecommunication Company, or JSC CenterTelecom in short.

##### **3.1.2 Information about registration of the issuer with state authorities**

The Company was registered pursuant to ordinance # 567-r dated June 9, 1994 of the Chief of Administration of the Moscow region, state registration certificate # 127 of June 20, 1994.

The Company is re-registered with the Moscow region registration chamber, state registration certificate of a legal entity # 50:10:00124 of July 23, 1997.

Pursuant to the Federal Law On the state registration of legal entities the Company is registered with the Inspection of the Ministry for Taxes and Levies of the RF for the town of Khimki in the Unified register of legal entities on November 1, 2002, a generic number of 1025006174710.

The certificate confirming making an entry in the Unified register of legal entities registered before July 1, 2002 is # 001494534 and dated November 1, 2002.

##### **3.1.3. Evolvement and development of the issuer**

Period of existence of the issuer: *from June 1994 up to now.*

*The Issuer is established for an unlimited term.*

The Issuer background and development history.

*JSC CenterTelecom – a telecommunications carrier in the Center of the European part of Russia was established on October 1, 1886. At that time a postal and telegraph service district was organized in the territory of the Moscow and Ryazan provinces of the tsarist Russia functioning as a telecommunications operator. In 1890 the service took over the country telephone network of the Moscow region; since then the Moscow regional operator offers the full range of customer telecommunications services. In 1994 postal services were separated; and during the privatization process the company was transformed into a public joint-stock company. As of December 1, 2002 16 public telecommunications operators in the Central and Central-Black-soil areas of the Russian Federation joined JSC CenterTelecom as its regional branches (wholly owned subsidiaries).*

*With over 6 million access lines CenterTelecom is one of Russia's largest fixed line telecoms, boasting 6 million access lines and owning a telecommunications infrastructure in Russia's most populated Federal districts with 20%*

of Russia's total population, fairly well developed manufacturing industry, agriculture, innovative ventures. CenterTelecom's customers and subscribers in 17 constituent entities of the RF are government agencies and bodies, general public and a prevailing majority of businesses. CenterTelecom was granted licenses to provide a wide range of telecom services: traditional POTS, Internet access, data, air and cable TV, wireline and UHF sound program broadcasting, trunking, lease of channels and other facilities, to offer public network interconnection to other operators.

Under stiff competitive conditions the Company pursues proactive marketing policies, maintaining domineering positions in the fixed line telephony, expanding its sales of new services where rates are not regulated by the government.

In the traditional telephony CenterTelecom's share is maintained over 75% both across the regions and overall in the CFD, slightly falling. The Company share of the local telecommunications services is 91%, the long-distance market share is 85%. Given the service development rate projected by the Company its position in the traditional service market will be preserved.

Competition is particularly tough in the Internet access segment. CenterTelecom regional operating branches manage to keep intact their leading positions with on average 60% of corporate and 70% of individual customers. CenterTelecom share of Internet service market in the CFD was around 57.7% in 2004.

The goals of setting up JSC CenterTelecom:

**The main goals for setting up the Company are making profit and provision of telecommunications services to population, government bodies and other organizations.**

**The Company mission: Its mission the Company views in offering modern high-quality telecommunications solutions and world class service in the territory of the Central Federal District with the aim:**

- to satisfy customers' needs based on a personalized approach to everyone;
- to ensure growing shareholders value and income and make proper contribution into development of the society where the Company is doing business;
- to build up long-term mutually beneficial relations with partners based on mutual trust, integrity and transparency;
- to ensure comprehensive realization of the potential of each employee;
- to perform the duties of the public telecommunications operator.

### 3.2.4 Suppliers of the issuer accounting for at least 10% of all supplies of tangible materials, and their shares in the total value of supplies.

The Issuer's suppliers accounting for over 10 per cent of all supplies of tangible items, specifying their respective

shares in the total value of supplies the last elapsed reporting quarter period:

Full corporate name of the supplier	Share in the total supplies
Technoserv A/S Limited Liability Company	11 %
Private Joint-Stock Company Open Technologies 98	10.0 %

The import portion in the supplies to the Issuer: *In 4Q2004 import supplies accounted for over 10.1% of the total supplies to the Issuer.*

The issuer forecast of the availability of these supply sources in future: *will be available*

Full corporate name of the supplier	Share in the total supplies
Technoserv A/S Limited Liability Company	14.8%
Private Joint-Stock Company Business Computer Center	10.2%
Private Joint-Stock Company DataTel	15%

Possible alternative sources:

Following recommendations of JSC Svyazinvest telecommunications equipment is procured through system integrators.

There are no local equivalents on the Russian telecommunications market of digital switching equipment and synchronous digital hierarchy (SDH) transmission systems.

### 3.2.5 Markets for sales of the issuer's products (works, services)

The core business of the issuer on the market in the Central Federal District is provision of telecommunications services. JSC CenterTelecom offers access to PSTN, domestic long-distance and international telephone services, Internet access and data, lease of channels, wireline broadcasting, etc.

The Central Federal District where the Company interests are focused consists of 17 regions (oblasts) with a population accounting for 20% of Russia's total. The district share of Russia's GDP (less Moscow) is estimated by experts at 12.8% signifying a fairly large share compared to other federal districts. In terms of the living standards the district is ranked forth among Russia's seven federal districts, while in terms of the per capita income it is only the seventh. Uneven development of the region is quite evident. There are both fairly well developed regions like the Moscow, Yaroslavl, Belgorod regions, and less developed regions like Kostroma, Ivanovo and Orel.

During past several years a justifiable trend of redistribution of revenues generated by different types of telecommunications services in favor of modern advanced services mostly mobile services was quite obvious. The Central federal District is not an exception. Starting from 1999 the share of traditional telephony (POTS) in the revenues break down fell from 87% to mere 66% benefiting modern services emerged owing to technology development.

Negative factors that are likely to adversely affect sales of the issuer's services.

- *economy downturn*
- *decline in solvency of major customers*
- *stiffer competition of alternative operators.*

In such a case the Company will take the following measures:

1. *Completion of the build-out of multiservice networks (MSNs) enabling a significant expansion of the range of offered services with simultaneous improvement of quality of service.*
2. *Implementation of packaged services based on modern multiservice networks*
3. *Increasing the activated switching capacity and raising the number of subscribers.*
4. *Utilizing open source software products to enable the workflow and technology processes (particular to ensure functioning of switching equipment).*
5. *Making use of leasing for expanding the output.*

Provision of substitute services (In particular, there is a surge observed in proliferation of IP-telephony, that under certain changes in market situation may become a substitute for long-distance service). Migration to packet switching from circuit switching for long-distance service.

### 3.2.6 Policies of using current assets and inventories

Ratio	Calculation following guidelines recommended by FCSM of Russia	9 months of 2003	9 months of 2004
Turnover ratio (days)	365/Costs/Year average inventories	31.17	19.57

The issuer's current assets policies are aimed basically at reducing accounts receivable and inventories, and accelerating the current assets turnover in days.

Acceleration of the turnover for 9 months of 2004 over 9 months of 2003 is due to the reduction by 36% of inventories and growth by 33% of the costs in the reporting period compared to the same period last year.

Information on this item will be provided in the quarterly report for 1Q2005 when annual financial statements for 2004 are compiled.

### 3.2.7 Raw materials

As JSC CenterTelecom core business is provision of telecommunication services, there are no "raw materials" used in the process; materials are used .

### 3.2.8 Major competition

Currently CenterTelecom is doing business in the territory of the Central Federal District in 17 regions (Belgorod, Bryansk, Vladimir, Voronezh, Ivanovo, Kaluga, Kostroma, Kursk, Lipetsk, Moscow, Orel, Ryazan, Smolensk, Tambov, Tver, Tula and Yaroslavl regions).

Market share of CenterTelecom regional subsidiaries in the telecom service market of the CFD at the 2004 end was 62% (including local cellular operators, but excluding revenues of BeeLine and MTS).

Main competitors of CenterTelecom are **national carriers**. Their combined market share depending on the service type and the region is varying from 1 to 18%. Comincom company is successfully promoting its services in the Black-Soil area, while JSC Central Telegraph is gaining ground in the market of the Moscow region.

Private network operators are no less threatening. Their share is significant in the long-distance market and Internet access, while in the local telephony market their exposure is fairly limited. These operators aggressively penetrate most lucrative market segments. TransTelecom pursues particularly active policies.

As far as the cellular companies are concerned they are searching for entries to other market segments, for instance, Internet access.

Local operators themselves are not competitors of the MegaRegional Company JSC CenterTelecom (henceforth MRC), as their operation areas are limited, though they are prospective partners for national and private network operators, and often present serious competition to regional subsidiaries of JSC CenterTelecom on strategically important markets. IP-operators should be noted specifically, as they offer serious competition on the long-distance and IP access markets.

It should be noted that CenterTelecom's strategic plans envisage changing terms and conditions of interconnection with these carriers to use local operators as channels for promotion of CenterTelecom's services (if the ownership structure of local operators does not ensure control of national operators over them).

Despite active pushing of competitors of CenterTelecom to regional markets CenterTelecom continues to gather substantial infrastructural and financial capacity while for a majority of alternative operators this is impossible to do.

One of the **threatening trends** for JSC CenterTelecom in the telecom market of the CFD is over-saturation of the Moscow market and predicted by analysts shifting of telecom activities into regions, resulting in tougher competition.

It seems necessary to state the market shares, captured in the issuer's opinion, by the issuer itself and its major competitors **for the past 5 financial years**:

Company	Market share in 2002, %	Market share in 2003, %	Market share in 2003, %
JSC CenterTelecom	73%	63%	62%
Equant	1%	1.2%	1.3%
Golden Telecom	3%	3.6%	5%*
Transtelecom	1.4%	2.4%	2.8%
Comincom	0.2%	0.4%	-

Source: CominfoConsulting

\*GoldenTelecom's market share in 2004 factors in its merger with Comincom.

As JSC CenterTelecom was set up as a unified company in 2002, the information is shown starting from 2002.

Data of revenues from sales of services is unavailable due to lack of information.

Competitive strengths of the Issuer:

- *extensive infrastructure*
- *high quality of service despite growing subscriber base.*

The extent to which, in the issuer's opinion, the competitive strengths affects the competitiveness of its products (works, services):

- *Extensive infrastructure enables offering of a full range of services, including those using advanced technology solutions, thus improving competitiveness of the Company;*
- *High quality of service ensures strong positive image of the Company and attracts new customers.*

## b) Telecommunications networks

### *Local telecommunications*

JSC CenterTelecom is the principal operator in the telecom market of central Russia for provision of an access to the local telephone network.

JSC CenterTelecom is the largest among MultiRegional telecommunications companies created in 2002. The Company owns a well developed telecommunications infrastructure in the most densely populated area of Russia, accounting for about 20% of Russia's total population.

The Company operates in 17 constituents entities of the Russian Federation.

JSC CenterTelecom provides a wide range of services, like POTS, Internet, data, on-air and Cable TV, wireline and UHF radio, lease of channels and other resources, etc. The Company also offers public network interconnection to other operators.

*Installed switching capacity of JSC CenterTelecom telephone network as of January 1, 2005 according to current information is 6,802,645 subscriber lines.*

Nowadays local telephone networks constitute a complex system with some 9,000 switches of different makes. Telecommunications network of JSC CenterTelecom is constantly improved and modernized. New digital exchanges and switching nodes are brought into service, digital links and microwave lines are built. Capacity of digital switches as of January 1, 2005 accounts for 48.0% of the total installed switching capacity. Installation of modern digital switches both locally made and from foreign vendors not only expands network switching capacity but also makes it possible to offer a wider range of services, including Internet, ISDN, data, etc.

Urban telephone lines account for 85 % of the total PSTN capacity of JSC CenterTelecom, while capacity of rural networks makes up the rest (15%); evidencing a clear dominance of urban telephone networks in the overall structure of local telecommunications of the Company.

Cable and linear assets of the local networks of JSC CenterTelecom are installed and used for provision of services according to licenses. Total length of the cable links is 715,239 km, and the figure is constantly growing, of which some 4.992 thousand are fiber-optic links.

### Long-distance telecommunications

JSC CenterTelecom offers domestic long-distance and international telecommunication services based on agreements with Russia's leading long-distance carrier – OJSC Rostelecom.

Traffic between local telephone networks and trunk network of Rostelecom is routed via long-distance exchanges. At the moment JSC CenterTelecom owns 24 such switches. In 2004 S-12 long-distance switches was installed in Tula (8,400 ports) and Yaroslavl (8,220) ports. A Kvartz long-distance switch (3,408 circuits) was decommissioned in Orel. Long-distance switches were upgraded in the following cities: Vladimir (2,580 ports), Solnechnogorsk, Chekhov (6,870 ports), Tambov (3,390 ports). Both fiber-optic and microwave links are used for trunk links and distribution networks.

The length of intra tariff band trunk transmission channels according to current data as of January 1, 2005 is 32,0889.1 km, including 13,129.8 km of fiber-optic links laying a solid basis for provision of high-quality digital channels and trunk links. Only certified for compliance and meeting strict requirements fiber-optic cables are used. Some 2,381 km of intra tariff-band fiber-optic links were commissioned for service in 2004.

All local centers and key regional cities have an access to IDD telephone service. The Company bills its customers for long-distance services, collects payments in respect of the services rendered, and settles accounts with Rostelecom for carrying long-distance traffic.

### SUMMARY

of radio frequencies allocated by bodies of the State radio-frequency service according to applicable law for provision of telecommunications services using radio-electronic means in the Central Federal District of the Russian Federation

In order to provide telecommunications services using means of radio-electronic communications the following frequency resources were allocated to JSC CenterTelecom:

1. To provide on-air TV and radio broadcasting (TV and sound program on-air broadcasting) in the territory of the Belgorod, Vladimir, Voronezh, Ivanovo, Kaluga, Kostroma, Kursk, Lipetsk, Moscow, Tambov, Tver, Yaroslavl regions – altogether 132 radio frequency assignments, executed in 42 permits granted by the Federal State Unitary Enterprise Main Radio Frequency Center and Ministry of Communications (the "permits").

2. To provide cellular radio-telephone services using NMT-450 standard in the territory of Ivanovo, Kostroma and Yaroslavl regions – altogether 440 frequency assignments, executed in 8 permits.
3. To provide cellular radio-telephone services in the territory of Tambov region: using GSM-900 – altogether 712 frequency assignments in 6 permits; using GSM-1800 standards – 36 frequency assignments in one permit.
4. To provide cellular radio-telephone services using AMPS/DAMPS standards in the territory of Tula – altogether 24 frequency assignments in one permit.
5. To provide mobile radio-telephone service using MRT 1327 (Altay) standard in the territory of the Belgorod, Vladimir, Voronezh, Ivanovo, Kaluga, Kursk, Lipetsk, Moscow, Orel, Ryazan, Smolensk, Tver, Tula, Yaroslavl regions – altogether 910 frequency assignments in 27 permits.
6. To provide personal radio-paging services in the territory of the Ivanovo and Yaroslavl regions – altogether 15 frequency assignments in two permits.
7. To provide local telephony services using wireless access systems in the territory of the Belgorod, Vladimir, Voronezh, Ivanovo, Kaluga, Kostroma, Kursk, Lipetsk, Moscow, Orel, Ryazan, Smolensk, Tula regions – altogether 229 radio frequency assignments (radio channels) in 66 permits.

Additionally, 484 frequency assignments in 108 permits were secured for provisioning of transmission systems on local and trunk lines using microwave facilities.

### 3.4 Plans of future activities of the issuer

In 2005 scheduled developments to expand and upgrade the existing local and trunk networks will be continued based on implementation of new technologies. In 1Q2005 it is planned to commission for operation facilities with installed switching capacity of over 30 thousand lines. Gradual migration of PSTN to multiservice networks enabling provision of versatile services and increase of the throughput using xDSL technology remains the key development strategy.

The capex plan for 2005 envisages extension of multiservice networks by an upgrade of hardware and software platforms to enable real time management of information flow, improved quality and security of business process management in many of the Company subsidiaries.

In MRC JSC CenterTelecom it is planned to purchase switching equipment and deployment of infrastructure for implementation of data processing center of Oracle E-Business Suite, installation of transit nodes and information security systems.

The plan also includes deployment of a corporate data network within the framework of Svyazinvest restructuring. JSC CenterTelecom plans to create the network based on recommended equipment produced by Juniper Networks.

In subsidiaries of JSC CenterTelecom installation of a corporate video-conference system is scheduled for completion. The principal goal of the system implementation is to arrange operation meeting of senior managers, distant learning for staff, provision of conference calls and operations for commercial purposes.

Before the consolidation of the Company that took place on November 30, 2002, there was no revaluation of the issuer's fixed assets. Fixed assets of the merged companies were valued for accounting purposes at their depreciated book value as at November 30, 2003. Though it should be noted that in some of the merged companies in 2000-2002 revaluations were actually carried out. As revaluations were made by independent at that time companies and due to different revaluation time (Voronezh, Orel, Tambov – 2000, Tula, Kaluga, Kostroma – 2001, Tver – 2000-2002) and various valuation techniques (different appraisers) the issuer does not think it makes any sense to report detailed data on revaluation history for each of the merged companies before the consolidation.

For 9 months of 2004 JSC CenterTelecom put into operation fixed assets totaling RUR4,239,117 thousand.

Information on lien/encumbrance of fixed assets:

The Company pledged under credit facility agreements fixed assets valued at RUR6,750,045 thousand (as of September 30, 2004). The pledge takes effect as of the credit facility drawdown and terminates at the moment of repayment of outstanding amounts under credit facility agreements (up to 2008). Terms and conditions of credit facility agreements are confidential.

Information on acquisition, replacement, retirement of fixed assets valued at 10% or more of the total fixed assets value, and other fixed assets at the issuer's discretion, existing at the date of approval of the issue prospectus: *no information*

Information as on December 31, 2004 will provided in the quarterly report for 1Q2005 when annual financial statements for 2004 are compiled.

### 3.7.2 Value of immovable property of the issuer

Information as on December 31, 2004 will provided in the quarterly report for 1Q2005 when annual financial statements for 2004 are compiled.

According to accounting data the value of the immovable property of the issuer (land lots, buildings, telecommunications facilities) as on September 30, 2004 was RUR14,233.79 million. Depreciation (buildings, telecommunications lines) as on September 30, 2004 was RUR6,155.32 million.

The total value of immovable property includes value of telecommunications facilities (cable ducts, telecommunications lines). It should be noted that the list of telecommunications facilities to be state registered is not finalized yet; neither the state registration procedure is identified. Article 8 of the Telecommunications Act stipulates that arrangements for state registration of telecommunications facilities shall be determined by the Government of the Russian Federation. According to Par. 21 of the Order of the Russian Government #1776-r of December 4, 2003 it was planned to pass regulations On specifics of the state registration of ownership and other property rights for linear cable telecommunications facilities in 4Q2004. At the moment of writing the regulations were not passed.

### **4.3 Amount, structure and sufficiency of the issuer's capital and current assets**

#### **4.3.1 Value and structure of the issuer's capital and current assets**

The charter (authorized) capital of the issuer as on December 31, 2004 is 631,199,896.5 rubles, in keeping with the foundation documents.

Detailed information on the capital structure and current assets of the issuer will be provided in the quarterly report for 1Q2005, after annual financial statements for 2004 are compiled.

#### **4.3.2 Sufficiency of the capital and current assets of the issuer**

According to guidelines recommended by regulations issued by federal stock market regulatory bodies of Russia, the issuer's own capital is deemed sufficient to cover current operating expenses and meet short-term liabilities, as the amount stated in line 490 of Form 1 of the balance sheet for 9 months of 2004 exceeds that of line 690 by 1.14 times. Average daily operating expenses and debt servicing amounts of the Issuer in 2Q2004 were RUR8,159 thousand, and RUR12,981 thousand for 3Q2004. Forecast for 4Q2004 is RUR8,282 thousand. The Issuer expects that current assets in 4Q2004 will be enough to finance current operating expenses anticipated in 4Q2004.

Information as on December 31, 2004 will be provided in the quarterly report for 1Q2005, after annual financial statements for 2004 are compiled.

#### **4.3.3 Cash and cash equivalents**

The issuer's needs in cash funds in 2005 are anticipated at RUR36,278,017 thousand, of which RUR9,941,785 thousand are earmarked for 1Q2005.

Sources for financing are cash flow from rendering telecommunications services, proceeds from other realizations and other financing (mainly short and long-term bank loans and credits).

Possible factors that are likely to affect growing cash financing requirements of the Issuer are: changes in investment policies, changes in market prices for raw materials, tangible items, services, power supply and energy resources, changes in tax policies, interest rate policies of the CB of Russia, etc.

Lending from commercial banks and proceeds of bond issues are main financing sources to fund investment policies of the issuer. Loan agreements set forth provisions common in the practice of the Issuer for doing business with credit organizations: interest rate, total amount, terms and period of repayment, security provided for lender. Violation of basic terms and conditions of doing business with lending organizations may negatively affect the issuer's image and standing and subsequently be an obstacle for securing loan resources.

### 4.4 Policies and expenses of the issuer in respect of R&D, licenses and patents, new designs and research reports

Currently the Federal Service for intellectual property, patents and trade marks is reviewing an application for a patent A Broadcasting Network. According to the application the issue is now being examined.

Under a contract for taking stock of intellectual property items and other results of intellectual activities in the structural units of the Upper Volga subsidiary of JSC CenterTelecom in Yaroslavl region, a technical audit is under way to identify such items. 10 items of intellectual are now identified capable of gaining legal protection under copy-right law, and document package regarding these items is formed to filed with the Federal Service for intellectual property, patents and trade marks.

Patent application are filed with the Federal Service for intellectual property, patents and trade marks for issuing a patent for the invention and useful model of the Indenture of an underground small channel number telecommunications facility.

The Company owns:

1. Trademark Certificate # 200257 of March 11, 2001. The trademark is used by the Company to differentiate and make distinct and recognizable its products, works and services. The registration of the Company trademark is effective across the whole of the Russian territory for 10 years as of October 16, 2000.
2. Patent for invention #2231125 of September 10, 2004 for a device for transmission of alarm signals on seized digital channels.

Patent validity term, trademarks (service marks) registration are defined according to applicable law. Effective legislation provides for extension of validity term of patents and registered trademark (service mark) registration.

### 4.5 Trend analysis of the core business of the issuer

December 31, 2004 Rosstat (Russian statistics service) made public the first forecast of Russia's GDP for 9 months of 2004. Results of the telecommunications industry were frustrating: growth rates in 3Q2004 fell significantly, and by the year end the telecom contribution into the GDP may even decrease compared to 2003; though telecom industry is not an exception – falling growth rates are observed in the economy as a whole.

Despite the fact that the telecom share in the GDP for the period January-September 2004 increased over the same period in 2003 from 1.9% to 2.0%, the third quarter of the year offered a nasty surprise: for that period the telecom share of the GDP turned out to be the lowest since 2002 – only 1.8%.

According to CominfoConsulting forecast the total Russian telecommunications market volume by 2006 will jump 2.6 times (as compared to 2002) and reach over RUR550 billion. Data market will grow 5 times through expansion of Internet access and acceptance of new services, like IP-telephony, VPN, etc.

**Mobile communications market will grow by 2.8 times (from 2002 level) due to expansion of subscriber base. All industry analysts agree that further mobile market growth will be in the regions.**

Over past several years revenues generated by various services are naturally rebalanced in favor of advanced services, mostly mobile services. The CFD is not an exception. Starting from 1999 the share of fixed line telephony in revenues fell from 87% to 66% due to evolving new technologies.

Revenues generated by telecommunications services tend to grow steadily in the industry. Expected growth of revenues in 2004 over 2003 is expected to be 130%.

The number of subscriber lines grew by 115,177 lines in 4Q2004. Growth of revenues from telecommunications services in 4Q2004 over 4Q2003 is 116%.

In the future the key negative impact should be expected from tougher competition, particularly, on the part of mobile operators.

The probability of tougher competition of mobile operators is very high, as they are aggressively expanding into all regional markets and widening the range of service offerings.

JSC CenterTelecom is going to benefit from its competitive advantages to mitigate the negative effects of conditions and factors affecting its activities. It should be noted however that JSC CenterTelecom is realizing possible adverse implications of the changes and takes measure to overcome them.

Currently JSC CenterTelecom implements a marketing strategy aimed primarily at maintaining its market share, increasing revenues generated by non-regulated telecommunications services, and improving the Company's competitive edge on telecommunications service market. Key strategies are developed for the period up to 2006.

### **Structure and terms of reference of bodies for controlling business and financial operations of the issuer**

#### *Article 18 (Charter of JSC CenterTelecom)* **SUPERVISION OF COMPANY FINANCIAL AND ECONOMIC ACTIVITY**

18.1 In order to supervise financial and economic activity an internal audit commission and a special structural subdivision implementing internal supervision shall be created within the Company and an independent auditor shall be engaged.

18.2 The internal audit commission is an independent supervisory body of the Company. Its seven members shall be elected at the annual General Meeting of Shareholders for the period up to the next annual General Meeting of Shareholders.

18.2.1 The authority of individual members or the all members of the internal audit commission may be terminated early by a resolution of the General Meeting of Shareholders.

In the event of early termination of the authority of members of the internal audit commission the authority of the new members of the internal audit commission shall remain in effect until the next annual General Meeting of Shareholders.

In the event that the number of members of the internal audit commission falls below half the number of elected members of the internal audit commission the Board of Directors must convene an extraordinary General Meeting of Shareholders to elect a new internal audit commission. The remaining members of the internal audit commission shall perform their functions until the new internal audit commission is elected at the extraordinary General Meeting of Shareholders.

- 18.2.2 The following matters are referred to the authority of the internal audit commission:
- verifying the accuracy of data in reports and other financial documents of the Company;
  - discovering breaches of procedures established by legal acts of the Russian Federation on maintaining accounts and presenting financial reports;
  - verifying the compliance with legal norms of the calculation and payment of taxes;
  - discovering infringements of legal acts of the Russian Federation in accordance with which the Company conducts its financial and economic activity;
  - assessing the economic feasibility of the Company's financial and economic operations.
- 18.2.3 The internal audit commission shall review the Company's financial and economic activity based on the Company's results for the year.  
The Company's financial and economic activity shall also be reviewed:
- at the initiative of the Company's internal audit commission;
  - pursuant to a resolution of the Company's General Meeting of Shareholders;
  - pursuant to a resolution of the Company's Board of Directors;
  - pursuant to a request of a shareholder (shareholders) of the Company holding a total of at least 10 percent of voting shares in the Company in respect of all matters within the authority of the General Meeting of Shareholders on the date that the request is presented.
- 18.2.4 Pursuant to a request of the internal audit commission, officers of the Company's management bodies must provide documents concerning the Company's financial and economic activity.
- 18.2.5 Working procedures for the internal audit commission and the amount and procedure for payment of the fees of members of the internal audit commission shall be determined in the Regulation On the Internal Audit Commission of the Company, to be approved by the General Meeting of Shareholders.
- 18.3 In order to ensure permanent internal supervision over performance of all economic operations a special structural subdivision shall be established within the Company that will be independent of the Company's executive bodies. The activity of such subdivision shall be under supervision of the Company's Board of Directors.  
The functions of such structural subdivision, the procedure for performance of its activities and the procedure for appointing employees, requirements with respect to such employees shall be determined by an internal document approved by the Company's Board of Directors.
- 18.4 In order to verify and confirm the accuracy of the annual financial reports the Company shall each year engage a professional auditor, independent from any material interests connected with the Company or its shareholders.
- 18.4.1 The auditor shall audit the Company's financial and economic activity in accordance with legal acts of the Russian Federation on the basis of an agreement entered into with it.
- 18.4.2 The General Meeting of Shareholders shall approve the Company's auditor. The terms of the agreement to be entered into with the auditor, including the amount of fees payable for its services, shall be approved by the Company's Board of Directors.
- 18.4.3 The Company's activity must be audited at any time pursuant to a request of a shareholder with a total interest in the charter capital of 10 percent or more. Shareholders initiating an audit review shall submit to the Board of Directors a written request indicating the grounds of such request, the name of the shareholders and the quantity and category (type) of shares belonging to such shareholders and bearing the signature of the shareholder or its authorized representative. If the demand is signed by an authorized representative a copy of the power of attorney must be attached to it.

#### **Information regarding the internal system of control and supervision over financial and business activities of the issuer.**

The Internal Control Department was set up in JSC CenterTelecom's General Directorate in 2003. There are two units in the department: the audit unit, and methodology and risk unit, totaling 9 employees. The Director of the Internal Audit Department is Ms. L. Dyliaeva. All members have higher education professional (in economics) education, and two are certified auditors. Alongside with the department internal audit units are set up in 15 subsidiaries directly reporting to the subsidiary's director.

The department of internal audit of the General Directorate reports to the Board of Directors and according to the Regulations shall annually submit a report on the department activities. According to sub-clause 15.4 of the Charter rules of procedure of the internal audit shall be approved by the Management Board of the Company.

Main functions of the department include regular verification of compliance of business and financial operations of the Company, its subsidiaries and structural units with the Company interests; protection of the

Company's assets: independent assessment and analysis of the financial position of Company as a whole and its subsidiaries and structural units; regular control over compliance of the Company and its subsidiaries and structural units with statutory and other legal acts (including internal regulations) regulating their activities, and with resolutions of General meetings of Shareholders, the Board of Directors, sole person and collective executive bodies of the Company; consulting on issues of financial and tax legislation; working with external auditors, tax and other controlling authorities.

According to the schedule of work of the department approved by the Board of Directors on March 5, 2004, for 2004 there were 16 checks of financial and business activities of subsidiaries and their structural units (including 4 comprehensive checks of subsidiaries and 2 unscheduled checks of structural units).

The program of checks of subsidiaries includes all types of activities.

The following employees take part in the checks: experts of the Internal Audit Department, experts of internal audit units in subsidiaries, experts of the General Directorate in various lines of business.

During 2004 experts of the Internal Audit Department developed guidelines for conducting audits. Also, experts of the Internal Audit Department take part in various commissions (stock-taking, transfer-accept ad hoc commissions when management of subsidiaries changes, etc), in the development of the master-plan of the Corporate Restructuring Department, Master system based on Oracle E-Business Suite ERP.

Employees of the Internal Audit Department arrange workshops for employees of internal audit departments of subsidiaries in order to improve their expertise.

### 7.6 Information about litigations involving the issuer that may materially affect its financial and business operations.

The following lawsuits can be deemed as significant:

- lawsuits to the amount in excess of 10% of the Company's assets, the amount being equal to RUR4,104,006,800 as on September 30, 2004;
- lawsuits hampering normal business operations or aimed at their prohibition or termination (lawsuits demanding winding up of the Company, ruling on bankruptcy or insolvency of the Company or its daughter or affiliated companies, assignment of property (assets), contesting or jeopardizing licensed or patented rights, recovery of overdue levies and taxes payable to budget and out-of-budget funds in significant amounts).

In 4Q2004 and during three years preceding the reporting quarter end the Company was not involved in any lawsuit that may (might) significantly affect its financial and business activities.

Additionally, please be advised, that in 2003-2004 the Company was involved or takes part as a defendant or plaintiff in the following lawsuits where the risk of potential losses is or was in excess of RUR8 million.

1. The Federal Arbitration Court of the Central Federal District on January 13, 2003 made a court ruling leaving as it stood the decision of the Court of Arbitration of the Lipetsk region, and did not grant the appeal filed by the Inspectorate for the Right-bank district of Lipetsk of the Ministry of Taxes and Duties (MNS). The lawsuit requesting to invalidate the decision of the Inspectorate of the MNS for the Right-bank district of Lipetsk was filed against JS Lipetskelektrosvyaz (currently Lipetski subsidiary of JSC CenterTelecom).

The Arbitration Court of the Lipetsk region by its decision invalidated a decision made by the chief of the said Inspectorate.

In its appeal the applicant requested to repeal the court decision due to wrong application of the corporeal right law. The Inspection claimed that regulations governing tax reliefs related to profit tax were applied wrongfully.

The Inspectorate exercised a desk inspection of the tax profit calculation made by the Company.

In the course of the desk inspection the Inspectorate found that the Company wrongfully requested a tax relief amounted to RUR73,364,714 as the amount exceeded the net (undistributed) profit according to the profit and loss account (line 190), and incorrectly applied the profit tax relief allocated to cover loss of previous years. According to the results of the desk inspection the Inspectorate issued a statement and the Inspectorate chief made a decision to recover the undervalued amount of taxes to be payable by the Company in the amount of RUR6,572,951, an additional charge of RUR410,809, late payment charges of RUR269,178 and to fine the Company according to Par. 1 of Article 122 of the Tax Code of the Russian Federation in the amount of RUR891,970; the total charged amount was RUR8,144,908.

The Federal Arbitration Court of the Central Federal District ruled that the lower court correctly drew a conclusion that the profit tax relief according to Article 6 of the Law On the profit of businesses and organizations of the Russian Federation shall be calculated based on the taxable profit.

To confirm the validity of actions to apply the tax profit relief amounting to RUR73,364,714 the Company submitted the calculations and supporting documents justifying the application of the tax relief.

Par. 7 Article 7 of the Law On the profit of businesses and organizations stipulates that tax reliefs in total shall not decrease the actual tax amount calculated net of the tax reliefs by more than 50%.

The Company met this requirement.

The Inspectorate's claim that amounts set to cover losses shall be evenly allocated during 5 consecutive years was not founded on legislation governing taxes and duties.

The Court did not find any violations of the applicable law on taxes and duties when calculating the amount of the profit tax relief.

The Federal Arbitration Court ruled that under these circumstances there were no grounds to grant the appeal of the Inspectorate.

**II.** In 2003 Moscow Courts of Arbitration rejected two lawsuits drawn up and filed by a legal counsel engaged by JSC CenterTelecom acting on behalf and in the interests of JSC CenterTelecom and requesting to recover expenses of RUR8,057,531 and RUR5,975,041 related to benefits for enjoyed by some categories of customers with respect to payments for telecommunications services rendered. The amount shall be payable by the Russian Federation represented by the Ministry of Finance from the treasury funds.

In the first case the court decided that the plaintiffs claims of inaction of the defendants were not substantiated by documents; in the second case the court ruled that "the federal budget for 2001 and 2002 did not provide in full for compensations of expenses incurred by telecommunications companies. Under such circumstances there were no grounds to grant the request.

The plaintiff's claims that the Russian Federation is an equal party in the civil law relation with legal entities were dismissed by the court.

According to Par. 2 Article 124 of the Civil Code of the Russian Federation provisions regulating participation of legal entities in the relations governed by civil law shall be applied to public legal formations, unless other arrangements are stipulated by law or follow from specific features of such formations.

From the specific feature of the state it follows that given the lack of funds in the federal budget the harm-doer.

Granting the lawsuits under the stated circumstances would entail actual revision of the budget and infliction of harm to an unlimited circle of persons".

The legal counsel acting on behalf and in the interest of JSC CenterTelecom compiled and filed a complaint with the Supreme Court of Arbitration of the RF to retry these two cases in the course of exercising supervisory powers; however, judges of the Court brought the decisions to refuse to submit the decisions of the Court of Arbitration and rulings of the Federal Court of Arbitration of the Central Federal District to the Presidium of the Supreme Court for revision in the course of exercising supervisory powers.

In 3Q2004 the engaged legal counsel acting on behalf and in the interests of JSC CenterTelecom drafted and filed again lawsuits over the same subject-matter between the same parties due to newly discovered facts (an order issued by the Constitution Court was cited as the newly discovered fact). The court of the first appearance rejected the lawsuits. The appeal court confirmed the decisions of the courts of the first instances. At the reporting quarter end an appeal was filed with the relevant authority.

**III.** In December 2003 an engaged legal counsel acting on behalf and in the interests of JSC CenterTelecom drafted and filed a lawsuits demanding to recover losses incurred due to benefits provided by the Company to veterans in the Tula regions related to payments for telecommunications services. The claimed amount is RUR92,989,136.

The defendant in the lawsuit was named as the Ministry of Finance of the RF as a representative of the Russian Federation.

In the course of initial hearings the department of social protection of the administration of the Tula region and the Ministry of Labor and Social Development were named as co-defendants.

On May 25, 2004 Moscow Court of Arbitration issued the decision in the lawsuit brought by JSC CenterTelecom against the Russian Federation satisfying the demand of JSC CenterTelecom to recover the said amount payable by the Ministry of Finance (MoF); however the court ruling was appealed, and the appellate court by its judgement of September 1, 2004 agreed with the appeal filed by the MoF and dismissed the lawsuit brought by JSC CenterTelecom. The court of appeal refused to grant JSC CenterTelecom's appeal and left the decisions unchanged.

By the end of the reporting quarter following a complaint filed by JSC CenterTelecom, the Supreme Court of Arbitration of the Russian Federation initiated supervisory proceedings.

**IV.** Moscow Court of Arbitration on May 13, 2004 ruled in favor of JSC CenterTelecom in its lawsuit filed against the Ministry of Finance, Ministry of Labor, Department of Social Protection of the Tambov region demanding reimbursement of RUR10,241,700 incurred by due to benefits provided according to the federal Law on veterans in respect of payments for telecommunications services. The appellate court supported the ruling.

**V.** During 2003 Voronezhski subsidiary of JSC CenterTelecom filed 3 lawsuits with the Court of Arbitration of the Voronezh regions to the total amount of RUR20.805 million of debt arising from provision of benefits to some categories of customers in respect of payments for telecommunications services. During the litigations the amount to be

reimbursed was increased up to RUR23,237,506. The court ruled to recover the said amount in favor of the Company.

VI. On June 25, 2004 the Court of Arbitration of the Voronezh region issued a decision in the lawsuit filed by Voronezhski subsidiary of JSC CenterTelecom to recover income lost by the Company due to provision of benefits offered to some categories of customers in respect of payments for telecommunications services amounted to RUR10,607,180.57.

VII. In July 2004 Voronezhski subsidiary of JSC CenterTelecom filed with the Court of Arbitration of the Voronezh region 3 lawsuits to the total amount of award of RUR49,707,988.74 of lost income to be recovered and payable by the Russian Federation arisen in respect of provision of benefits in respect of payments for telecommunications services rendered to some categories of customers according to law On Veteran, On social protection of disabled people and On social protection of persons exposed to harmful effects of Chernobyl nuclear disaster. The court of the first instance sustained the case, the rulings took the legal effect.

VIII. In 2003 JSC CenterTelecom filed a lawsuit against Moscow region registration chamber and Municipal authority of Chekhov district of the Moscow region represented by the Administration of the district requesting to invalidate the registration of the registered ownership rights of the Municipal authority on the town telephone and radio-relaying networks owned by the Company and to recognize the ownership right of the Company. The assessed value of the assets is RUR8,040,712.

On November 18, 2002 a department of Moscow region registration chamber on Chekhov district illegally registered ownership rights of the Municipal authority of Chekhov district of the Moscow region and issued certificates of the state registration of the rights on town and rural telephone and sound-program broadcasting networks.

The basis for the state registration of the ownership rights of the Municipal authority of Chekhov district of the Moscow region was statements issued by the Department of property relation of the Administration of the Chekhov district of the Moscow region.

However, Article 17 of the Federal Law On the state registration of ownership rights on immovable property and transactions involving immovable property does not mention as grounds for the state registration of ownership rights such things as statements issued by departments of property relations of local administrations that were submitted to the Moscow region registration chamber to support the ownership right registration.

Moscow region registration chamber by its illegal registration of the ownership right of the Municipal authority of Chekhov district of the Moscow region on the said immovable property violated the ownership rights of JSC CenterTelecom for the segments of the urban and rural telephone and radio broadcasting networks.

The facilities were and have been used by JSC CenterTelecom as its assets owned by the Company both before privatization and currently.

Linear-cable plant was included in the Privatization plan of the state enterprise for telecommunications and informatization Rossvyazinform of the Moscow region, was included in the itemized list of building and facilities contributed to the charter capital of Company as on July 1, 1992. Moreover, after privatization new cable linear plant facilities were commissioned for service ordered and paid for by JSC CenterTelecom, and JSC CenterTelecom also performed maintenance and repair of the plant as confirmed by contracts/purchase orders.

The Municipal authority cannot and could never be the owner of the disputed property.

The said formerly state-owned property during privatization process of the state enterprise for telecommunications and informatization Rossvyazinform of the Moscow region was transferred to JSC Elektrosvyaz of the Moscow region (now JSC CenterTelecom).

The court of the first instance tried the case on the merits on April 15, 2004. JSC CenterTelecom's requests were completely granted.

Nevertheless the Federal Court of Arbitration of the Moscow district rendered that the lower court failed to duly consider all circumstances essential for trying the case on the merits and handing down the ruling.

By Order of the Federal Court of Arbitration of the Moscow district of July 14, 2004 the ruling of the Court of Arbitration of the Moscow region was cancelled and the case was sent for a review by the court of the first instance. The case trial on the merits was set on February 28, 2005.

IX. In 2003-2004 the FGUP Russian TV and sound program broadcasting network (FGUP RTRS) filed 3 lawsuits against the Company requesting to invalidate as null and void the privatization of telecommunications companies merged into JSC CenterTelecom in the part related to transfer to them of property of broadcasting centers:

- 1) On May 15, 2003 a lawsuit was filed requesting to apply the consequences of a null and void transaction related to the inclusion into the charter capital of JSC Elektrosvyaz of the Ryazan region of the building of the ORTVTC in the city of Ryazan. The book value of the building is RUR397.54 thousand. The court of the first instance by its decision on January 14, 2004 dismissed the lawsuit. The appellate court and higher courts confirmed the decision of

the lower court.

**1. Coupon: 1** First coupon interest rate is set at an auction among potential buyers of bonds on the first day of the initial bond placement. On the auction day setting the first coupon interest rate Members of the section shall file application using MICEX trading system both on behalf and at the expense of themselves and their customers. The time for filing applications at auction for setting interest rate of the first coupon attached to the bonds shall be decided on by MICEX upon agreement with the issuer and the underwriters. Applications for buying bonds by members of the section shall be filed with one of the underwriters, specifying the following material items:

a.1) Purchase price - 100 % of the nominal value;

a.2) Quantity of bonds that the potential buyer be prepared to purchase should the Issuer set the first coupon interest rate higher or equal to the rate indicated in the application as an acceptable interest rate.

a.3) An acceptable for the investor the first coupon interest rate. By "the acceptable interest rate" is meant the rate if declared by the issuer would make the potential buyer willing to purchase the number of bonds identified in the application at par. The value of the acceptable interest rate should be indicated per annum with accuracy of one hundredth of a percent.

Funds shall be allocated to ensure full payment of the bonds as specified in the application, taking into account MICEX commissions.

Application non-compliant with one of the requirements of items a.1-a.3, and those failing to allocate sufficient funds will not be admitted for participation in the auction for setting the interest rate.

Upon expiry of the period for filing application for the auction to set the first coupon interest rate MICEX shall compile the list of entered applications, filed with each underwriter, and submit them to the issuer and underwriters. The latter based on the lists of applications submitted by MICEX compile the final consolidated list of applications. Based on the review of the consolidated list of the applications filed for the auction the issuer make a decision on the value of the first coupon interest rate and advice of it the underwriters and MICEX.

Underwriters publish notice of the first coupon interest rate through MICEX trading system by e-mailing all section members.

  - bank identification number of the holder's bank.
- e) tax status of the NDC depositor (resident, non-resident with a permanent representative office in the Russian Federation, non-resident without a permanent representative office in the Russian Federation, etc.)

A bondholder is responsible for timely and accurate provision of bank details to NDC. If the information is not available or provided to NDC after time, such obligations are performed toward the person who filed the request to perform the obligation and recognized as a bond owner as on the date of filing the request. The issuer shall perform obligations under the bond issue based on NDC data.

Not later than 2 (two) days before bond income payment date the Issuer shall remit the necessary amounts to the payment agent.

Based on the list of bondholders, provided by NDC, the payment agent calculates the amounts payable to each bondholder authorized to receive bond income payments.

On the bond income payment day the payment agent shall remit as required the necessary funds into accounts of bondholders in favor of the bond owners.

In the event that one person is authorized to receive bond income payments by several bond owners the person in question shall receive the total amount without breakdown on each of the authorizing bondholders.

If the redemption day is a public holiday, whether a state public holiday or a non-operational day for making settlements, the payment of the payable amount shall be effected on the first business day following the holiday.

A bond owner is not entitled to seek interest accrual or any other compensation for such delayed payment.

--	--	--	--

**Payment procedure for coupon (interest) payments:**

Coupon (interest) payments on the issued bonds are made by the payment agent pursuant to the order of the Issuer and at its expense by bank transfers/remittance of funds in favor of the bond owners. It is presumed that nominal holders – depositors of NDC are authorized to receive bond coupon payments.

Bond owners, their duly authorized persons, including NDC depositors are responsible for timely and accurate provision of bank details to NDC, and take all risks resulting from failure to provide or untimely provision of information. In the event of non-provision (untimely provision) to the NDC of the information required for performance by the issuer of its obligations under the bond issue, such obligations are performed with respect to the person who filed the request to perform the obligation and recognized as a bond owner as on the date of filing the request. The issuer shall perform obligations under the bond issue based on NDC data, and the performance of the issuer's obligations in such a case shall be deemed due and complete.

In the event that information provided by a bond owner or a nominal holder, or bank details and other relevant information available in NDC and necessary for performance by the issuer of its obligations do not allow for the timely remittance of funds by the payment agent, the delay shall be treated as a delay in performance of obligations under the bond issue, and the bond owner in question shall not be entitled to demand accrual of interest or any other compensation for such delay in payment. The issuer in the circumstances set forth in the contract with NDC shall have the right to request confirmation of such data with the records of the rights on the bonds.

Payments of coupon of the bonds shall be performed in favor of the bonds owners who are recognized as such at the end of a business day preceding the 7 (seventh) business day before the maturity day ("the record day").

Performance of the obligations related to coupon payments shall be effected on the basis of the list of owners and/or nominal holders of bonds provided by NDC (hereinafter "the list of bond holders and/or nominal holders")

An NDC depositor and/or other person not authorized by its customers to receive coupon payments on the bonds not later than on the 6 (sixth) business day before the date set for making coupon payments on the bonds shall submit to NDC a list of bond owners containing all necessary details as specified below for the List of holders and/or nominal holders of the Bonds.

If among bond owners who authorized a nominal holder to receive coupon payments on the bonds there are non-residents and/or individuals, the nominal holder in question shall provide the following information related to such persons:

## 8.8 Taxation of income incurred on placed and to be placed issued securities

### Taxation of income received from participation in the organization in the form of dividends

Taxation of income received from placed and being placed issued securities of the Issuer is governed by the Tax Code of the Russian Federation (henceforth the "TC"), and other legal acts of the Russian Federation, passed according to the Tax Code of the Russian Federation.

#### TAX RATES

Type of income	Legal entities		Natural persons	
	Residents	Non-residents	Residents	Non-residents
Coupon income	24% (of which: 5% to the federal budget; 17% - to the budget of the relevant constituent entities; 2% - to the local budget)	20%	13%	30%
Income from realization of securities	24% (of which: 6% to the federal budget; 16% - to the budget of the relevant constituent entities; 2% - to the local budget)	20%	13%	30%
Dividends	6%	15%	6%	30%

#### TAXATION OF NATURAL PERSONS

Type of tax - income tax.

The following income falls in the category of income received from sources in the Russian Federation:

- dividend and interest payments received from Russian organizations, and interest payments received from Russian individuals-entrepreneurs and (or) from a foreign organization in connection with activities of its permanent representative office in Russia;

- proceeds from realization in the RF of shares or other securities, and stakes in the charter capital of organizations.

#### Taxation base

A taxpayer's income received as a material benefit is the material benefit received from purchase of securities. The tax base is defined as the surplus of the market value of the securities determined taking into account the limits of market price fluctuations, over the actual cost of the securities for the taxpayer. The procedures of identifying the market price of the securities and limits of market price fluctuations are set forth by federal authority regulating stock markets.

The following income is taken into account in determining taxation base for income received from transactions with securities:

- sale-purchase deals with securities traded on organized stock market;
- sale-purchase deals with securities not traded on organized stock market

Income (loss) on sale-purchase deals with securities is defined as the difference between the proceeds from realization of securities and expenses related to the acquisition, realization and safe-keeping of securities actually incurred by the taxpayer and supported by documents, or property deductions accepted for reduction of proceeds from sale-purchase deals.

Such expenses include:

- amounts paid out to the seller according to the agreement;
- payments in respect of depositary services;
- commissions paid to professional participants of stock market, discount paid (recovered) by a unit fund management company during sale (cancellation) by an investor of his interest in the unit fund determined according to the procedure set forth by applicable Russian law on unit funds;
- stock exchange charges (commission);
- payments in respect of registrar's services;
- other expenses directly related to sales, purchases and safe-keeping of securities, paid for in respect of services rendered by professional participants of securities market during their professional activities/

Income (loss) from deals with securities traded on organized securities market shall be increased (reduced) by the amount of interest paid for using funds raised for closing sale-purchase deals with securities, within the limits calculated on the basis of the effective refinancing rate set by the Central Bank of the Russian Federation.

The amount of loss incurred from transactions with securities traded on organized securities market is determined taking into account the limits of the market price fluctuations of securities.

By the market price of securities listed on organized stock market is meant an average weighted price of the securities across the deals closed over a trading day through the trading arranger. If deals with the same securities were closed through more than one trading arranger the taxpayer is entitled to choose on its own the market price of the securities calculated according to data from a particular trade arranger. If the average weighted market price of the specific securities is not calculated by a trade arranger, the average weighted market price is deemed as the arithmetic mean of the minimum and maximum prices in the deals closed through the trade arranger over the day.

The tax base is determined separately for each transaction.

Income (loss) from sale-purchase deals with securities is defined as the sum of income amounts across the deals with securities of a certain type closed in the tax period, less the amount of loss.

If a taxpayer's expenses incurred in acquisitions, realization and safe-keeping of securities cannot be directly charged to the costs of acquisition, realization and safe-keeping of particular securities, these expenses shall be allocated pro rata to the evaluated cost of securities to which these expenses are charged. The evaluated cost of securities is determined as on the date of incurring these expenses.

If a taxpayer's expenses cannot be supported by documents, the taxpayer is entitled to resort to the property tax deduction as provide for in par. 1 of sub-item 1 of item 1 of Article 220 of the TC of RF. A property tax deduction or deductions amounted to all actually incurred expenses supported by documents shall be provided to the taxpayer by the income payment source at the moment of calculation and payment of taxes to the state budget (by the broker, trust managers, managing company performing trust management of property, constituting an investment unit fund or by other person conducting transactions under an agency contract or other similar agreement in favor of the taxpayer), or upon expiry of the tax period filing tax returns with tax authorities.

If the tax calculation and payment are offset by the source of income outpayments (by the broker, trust managers, managing company performing trust management of property, constituting an investment unit fund or by other person conducting transactions under an agency contract or other similar agreement in favor of the taxpayer) in the tax period,

the property tax deductions are provided to the taxpayer by the source of income payments with a possibility of subsequent offsetting upon expiry of the tax period when filing a tax return with tax authorities.

If there are more than one source of income payments the property tax deductions are provided by only one source of income payments at the discretion of the taxpayer.

The tax base for securities sale-purchase deals (cancellation of investments in investment unit funds) is defined as the income received upon expiry of a tax period for securities deals.

Loss from deals with securities traded on organized stock market incurred as the result of a tax period shall reduce the tax base for sale-purchase deals with this particular type of securities.

Income from sale-purchase deals with securities not traded on organized securities market that at the moment of the acquisition trading did not meet requirements to be met by securities traded on organized securities market can be reduced by the amount of loss incurred in the tax period from sale-purchase deals with securities trade on organized securities market.

The date of the actual receipt of income:

- the date of income payment including remittance of income amounts into the taxpayer's accounts with banks, or by the taxpayer's order into accounts of third persons – if income is received in cash funds;
- the date of securities acquisition if income is received as material benefits.

Tax base with respect of securities sale-purchase deals and forward deals with financial instruments is defined upon expiry of a tax period. Calculation and payment of the tax amounts are effected by the tax agent upon expiry of a tax period or while making income payments in favor of a taxpayer before expiry of a tax period.

Tax agents are recognized as Russian organizations generating income or paying income to a taxpayer. Tax agents shall calculate, withhold from the taxpayer and pay out the tax amount. If the tax payment source is a person acting under an agency agreement or other similar contract in favor of the taxpayer, the obligations of a tax agent shall be fulfilled by the person actually paying the income to the taxpayer.

If a tax agent is making cash payments before expiry of the subsequent tax period, the tax amount is paid according to the portion of income defined according to this clause with respect to actually paid out cash income. The income portion is determined as the total income amount multiplied by a ratio of the paid amount to the valuation of securities defined at the date of payment of cash funds in respect of which the relevant tax agent acted as a broker. If there were multiple payments of cash funds to a taxpayer during a tax period the due tax amount is accumulated taking into account previous tax payments.

Securities valuations are identified based on actually incurred and supported by documents expenses related to acquisition of relevant securities.

By cash fund payments are meant payments of cash funds, remittances of cash funds into a bank account of a natural person or to a third party bank account pursuant to the natural person's order.

If it is proved impossible to withhold the calculated tax amount by the source of income payments the tax agent (the broker, trust manager other person conducting transactions under an agency contract, commission contract or other similar agreement in favor of the taxpayer) within one month from the moment of occurrence of these circumstances shall inform in writing the relevant tax authorities at the location of its registration about the impossibility of withholding and the tax amount owned by the taxpayer. In the event of such circumstances taxes are paid pursuant to Article 228 of the Tax Code of the RF.

## TAXATION OF LEGAL ENTITIES

Type of tax - income tax.

Received income includes:

- proceeds from realization of property rights (income received from realization);
- income not related to realization received in the form of interest payments on securities and other debt instruments and/or interest participation in other organizations.

Tax base

A taxpayer's income received from realization or other disposal of securities (including redemption) is defined on the basis of the price of the realization or other disposal of securities, and amount of interest income (coupons) paid by the purchaser to the taxpayer, and amount of interest income (coupons) paid by the issuer to the taxpayer; the interest income (coupons) received from realization or other disposal of securities and already taken into account for taxation purposes being excluded.

Expenses incurred from realization (other disposal) of securities are determined on the basis of the purchase price of the

securities (including purchase expenses), realization costs, discounts applicable to the calculated values of investment units, accrued interest income (coupons) paid by the taxpayer to the seller of securities the interest income (coupons) already taken into account for taxation purposes being excluded.

Interest under credit facilities, loans and other similar agreements, other debt obligations (including securities) are taken into account at the date income posting according to Article 328 of the Tax Code of the Russian Federation.

The date of income and expense recognition with respect to bond transactions shall be the date of realization of the said bonds according to Article 329 of the Tax Code of the Russian Federation.

Securities are considered as publicly traded on organized stock market if the following three conditions are satisfied at the same time:

- 1) the securities in question are accepted for trading by at least one trading arranger entitled to do so according to effective national legislation;
- 2) if price information (price quotations) is published in mass media (including electronic ones), or can be provided by a trading arranger or other authorized person to any interested party within three years after closing deals with securities;
- 3) if listed market prices of securities are calculated according to effective national legislation.

For tax purposes the market price of securities traded on organized stock market shall be the actual price of realization or other disposal of securities, if this price is less than maximum and more than minimum prices of deals (the "price interval") involving the securities in question, registered by the trading arranger on securities market on the date of closing the relevant deal. If securities traded on organized securities market are realized at prices below the minimal price of deals closed on organized market the financial result is determined on the basis of the minimal price of deal on the organized stock market.

By an accrued interest income (coupon) is meant a part of the interest (coupon) income payable under the term and conditions of such securities issue calculated pro rata to the number of days elapsed from the date of issue of such securities or from the date of previous coupon payments until the date of closing the deal (transfer of securities).

With respect to securities not traded on organized stock market the actual price of realization or other disposal of securities is accepted for tax purposes subject to meeting at least one of the following conditions:

- 1) if the actual price of the relevant deals is in the price interval of the similar (identical, same type) securities registered by a trading arranger on stock market at the date of closing the deal or at the date of the latest trading before closing the deal, if trading in such securities took place with the trading arranger at least once in the past 12 months;
- 2) if the deviation of the actual price of the relevant deal is within 20% in excess of or below the weighted average price of similar (identical, same type) securities calculated by the trading arranger on organized stock market according to the rules set forth by the said trading arranger upon results of trading at the date of closing such deal or at the date of the latest trading before closing the deal, if trading in such securities took place with the trading arranger at least once in the past 12 months.

The income of a taxpayer disposing of shares received by him/her in the process of increasing the charter capital of a joint-stock company is defined as the difference between the price of realization and initially paid-up share price adjusted according to changes in the quantity of shares due to the increase in the charter capital.

Tax base with respect to securities transaction is defined by the taxpayer separately barring the tax base for securities transactions defined by professional participants of securities market. Taxpayers (barring the tax base for securities transactions defined by professional participants of securities market carrying out broker activities) shall define the tax base for transactions with securities traded on organized stock market, separately from the tax base for transactions with securities not traded on any organized securities market.

Valuation of securities being realized or otherwise disposed of is carried by the First In First Out (FIFO) method for issued disposed of securities, and by actual cost of securities for non-issued securities.

Taxpayers receiving income (loss) from transactions with securities in the previous tax period or previous tax period are entitled to reduce their tax base for transaction with securities in the reporting (tax) period (defer the said loss) according to terms and conditions set forth in Article 283 of the Tax Code of the Russian Federation.

Loss from transaction with securities not traded on any organized securities market incurred in the previous tax period (previous tax periods) can be charged to the reduction of the tax base from transactions with such securities defined in the reporting (tax) period. Loss from transaction with securities traded on organized securities market incurred in the previous tax period (previous tax periods) can be charged to the reduction of the tax base from transactions on realization of given category of securities.

Within a tax period losses incurred in the relevant reporting period from transactions with securities traded and not traded on organized securities market shall be deferred separately for these categories of securities respectively within the limits of profits received from transaction with such securities.

If the recipient of the interest from a debt obligations of any type including bonds carrying the right of participation in profits and convertible bonds, is a foreign organization, not performing activities through its permanent representative office in the Russian Federation, the tax from such income is calculated and withheld by the tax agent. If the source of such income payments is a person performing activities under an agency agreement or other similar agreement in favor of the taxpayer the tax agent obligations shall be fulfilled by the person actually paying income to a foreign organization, which does not have operations through its permanent representative office in the Russian Federation.

If a tax agent makes income payments to a foreign organization taxable in the Russian Federation according to international treaties (agreements) under reduced rates, the tax agent shall calculate and withhold the tax at the relevant reduced rates subject to provision by the foreign organization of supporting documents to the tax agent as stipulated by par. 1 of Article 312 of the Tax Code of the Russian Federation. In the vent of income payments made by Russian banks on transactions with foreign banks confirmation of the permanent domicile of the bank in an overseas country with which an international treaty (agreement) regulating tax issues is concluded, shall not be required if such domicile is confirmed by information available from a public domain directories.
