1. Description of Nissan group

The Nissan group consists of Nissan Motor Co., Ltd. (the "Company"), subsidiaries, affiliates, and other associated companies. Its main business includes sales and production of vehicles, forklifts, marine products and related parts. And also the Nissan group provides various services accompanying its main business, such as logistics and sales finance. The Company established Global Nissan (GNX) as a global headquarters function which is to focus on utilizing regional activities by 4 Regional Management Committees and cross regional functions like R&D, Purchasing, Manufacturing, etc., and Global Nissan Group is composed of this matrix.

The corporate group structure is as follows:

* Consolidated Subsidiaries

** Companies accounted for by equity method

• There are other associated companies; *Nissan Trading Co., Ltd., *Nissan Real Estate Development Co., Ltd.

• Our subsidiaries listed on domestic stock exchange markets are as follows:

Nissan Shatai Co., Ltd.---Tokyo Aichi Machine Industry Co., Ltd.---Tokyo, Nagoya Calsonic Kansei Corporation---Tokyo

2.Basic Policy regarding Corporate Governance and its Implementation Status

Corporate Governance is one of the most important issues of the management for Nissan, and the critical point is to make clear the responsibility of the management. At Nissan, its clear vision, management policies and objectives are published for shareholders and investors, and their achievement status and results are disclosed early and with transparency as much as possible.

Nissan has been conducting various system reforms in order to enhance Corporate Governance. To be specific, the Chief Operating Officer has been posted under the authority of the Chief Executive Officer as from April 1, 2005. This reform will bring about more efficiency of the management than that of the present management at Nissan. In addition, at the shareholders' meeting in June 2005, the number of corporate auditors will be reduced from five to four, three of whom will continue to be outside corporate auditors. In result, the independence of the audit will be strengthened by increased influence of the outside corporate auditors.

Internal auditing not only allows us to improve the self-correcting capabilities of Nissan group companies through evaluation of internal control level, but it also improves our business processes. Effective and efficient internal audits are being conducted with an appointment of Chief Internal Audit Officer who coordinates global audit activities.

Nissan appoints Ernst & Young Shin Nihon as an external auditor, the auditors not only conduct legal requirement audit, but also report to corporate auditors and internal auditors and exchange opinions among them periodically.

In addition, Nissan has established "Nissan Global Code of Conduct" and "Global Compliance Committee" for compliance with laws and ethics within the all group companies, and has provided its employees with an education program in order to avoid illegal and unethical conduct.

4. NISSAN 180 update

In the NISSAN 180 business plan, for fiscal years 2002 through 2005, the company made three commitments: to sell an additional 1 million units by the end of fiscal year 2004, measured between October 2004 and September 2005 and compared to fiscal year 2001; to achieve an 8% operating profit margin; and to achieve zero net automotive debt at constant accounting standards.

The last two commitments were achieved by the end of fiscal year 2002. Nissan's operating profit margin has been at or above 10% for every year of NISSAN 180, and net automotive debt has been eliminated. The company now has more than 200 billion yen in net cash under the new and more demanding accounting standards.

The only remaining commitment is achieving the 1 million additional sales. Here, we are in reasonably good shape. At the midpoint of the measurement period, global sales stood at 1,809,000 units, which is a slight advance compared to the commitment to reach 3,597,000 units by the end of September.

NISSAN 180 will be remembered as a period in which many significant products were introduced to satisfy specific needs of customers around the world. Products such as our first crossover and full-size truck and sport utility vehicles in North America... mini and compact cars in Japan... the Teana in China... a range of light commercial vehicles in Europe... and our revival symbol, the 350Z.

5. FY2004 business performance

Global sales came to 3,388,000 units, which exceeded our forecast of 3,380,000 units. This record level represents an increase of 10.8%, or 331,000 units, over fiscal year 2003... and is 281,000 units more than the previous record level set in 1990. In fiscal year 2004, we released nine all-new models globally.

Along with record sales, a global production record was also achieved. Nissan's manufacturing plants produced 3,378,000 units, which is 293,000 units more than the previous record.

In Japan, sales came to 848,000 units, a slight 1.4% increase. Our brand and products continue to gain recognition. The Fuga was voted the "RJC Car of the Year"... and in March, the Note, Tiida, Cube and March were among the top 10 best-selling models in Japan. Our market share increased four-tenths of a percent to 14.6%.

In the United States, sales rose 18.4%, to 1,013,000 units and, for the first time, sales crossed the 1-million mark. Our U.S. market share for the full year came to 6%, up from 5.1%.

The Nissan Division grew by 20.4%, driven by truck sales. With solid contributions from

the new Frontier, new Pathfinder and Titan, truck sales were up 47.6%... and the Altima continues to make a strong contribution to car sales.

The Infiniti Division achieved yet another record year, due to the attraction of competitive models such as our G35 sport sedan and coupe. Sales were up 6.5% from the previous year, to 132,000 units.

In Europe, where reporting is on a calendar-year basis, sales were basically flat, at 544,000 units. Strong sales of the X-TRAIL and Pick-up helped offset a lack of new passenger cars.

In General Overseas Markets, including Mexico and Canada, sales were up 19.5%, to 983,000 units. Sales in China were up 92.7% to 194,000 units... and the Teana was named the "Car of the Year 2005."

Consolidated net revenues came to 8 trillion 576.3 billion yen, up 15.4% from last year. Higher volume and mix made a positive impact of 707 billion yen. Movements in foreign exchange rates produced a negative impact of 173 billion yen. Changes in the scope of consolidation, including Dongfeng Motor and Yulon Nissan Motor, impacted revenues positively by 432 billion yen.

Consolidated operating profit improved by 4.4% to a record 861.2 billion yen. As a percentage of net revenue, our operating profit margin came to 10.0%.

Analyzing the variance between last year's operating profit and this year's, several factors are considered:

- The effect of foreign exchange rates produced a 78 billion yen negative impact.
- The change in the scope of consolidation produced a positive impact of 31 billion yen.
- The impact of higher volume and mix contributed 284 billion yen, mainly driven by the U.S. sales volume increase.
- Selling expenses increased by 114 billion yen, also mainly due to U.S. sales.
- The improvement in purchasing costs amounted to 131 billion yen.
- Product enrichment and the cost of regulations had a negative impact of 92 billion yen.
- We spent an additional 44 billion yen in R&D to reinforce product and technology development.
- Cost reductions from manufacturing efficiency were offset by the costs associated with the Canton Plant capacity expansion, resulting in increasing manufacturing and logistics expenses by 15 billion yen.
- Warranty costs had a negative impact of 41 billion yen.

- General, administrative and other expenses increased by 25.7 billion yen.

Net non-operating expenses totaled 5.5 billion yen – which is 9.7 billion less than last year.

Financial costs decreased by 5.3 billion yen to 10.4 billion yen.

Ordinary profit came to 855.7 billion yen, up from 809.7 billion yen in fiscal year 2003.

Net extraordinary losses decreased by 10.7 billion yen, mainly due to the sale of land of the former Murayama Plant.

Income before taxes came to 793.2 billion yen. Taxes came to 258 billion yen, for an effective consolidated tax rate of 33%.

Minority interests amounted to 22.9 billion yen.

Net income reached 512.3 billion yen, an increase of 8.6 billion yen.

Net automotive debt is eliminated. In fact, we had 205.8 billion yen in cash at the close of fiscal year 2004.

At the annual general meeting of shareholders on June 21, we will propose a 12-yen-per-share year-end dividend, as previously announced, giving a full-year dividend of 24 yen per share for fiscal year 2004.

By the end of NISSAN Value-Up, our plan is to pay an annual dividend of no less than 40 yen per share, which is a 66% increase over the FY04 level.

6. NISSAN Value-Up

The company's new three-year business plan for fiscal years 2005 through 2007 – NISSAN Value-Up – began to be implemented on April 1, 2005. The plan has three commitments:

1. To maintain the top level of operating profit margin among global automakers for each of the three years of the plan;
2. To achieve global sales of 4.2 million units, measured in fiscal year 2008; and
3. To achieve a 20% return on invested capital on average over the course of the plan.

Nissan will launch 28 all-new models globally during NISSAN Value-Up.

In order to implement NISSAN Value-Up, we will pursue four major breakthroughs.

- Introduction of Infiniti luxury brand globally as a Tier-1 luxury brand.
- Focus on Light Commercial Vehicles, or LCVs.
- Focus on sourcing parts and services from Leading Competitive Countries, or LCCs.
- Significant geographic expansion

7. Fiscal year 2005 financial forecast

The new fiscal year brings risks and opportunities. Risks include volatility in exchange rates, higher interest rates, higher commodity prices, higher energy prices, higher incentives, and uncertainty about the levels of growth in the United States and Japanese markets. The company's greatest opportunity lies in delivering NISSAN Value-Up quickly and effectively. Assuming a relatively flat total industry volume of 61 million units globally, Nissan's sales are forecast to come to 3,618,000 units, which is a 6.8% increase over the prior year. Worldwide, we will launch six all-new models, leading to 20 regional product events. In Japan, we will launch five models, including the new Serena and the new Otti, a minicar supplied by Mitsubishi Motors that will go on sale in June. In Europe, we will launch the Micra convertible coupe. No new model launches are planned in North America this year. We will be preparing for the significant next wave of new products to come in 2006 and 2007.

In light of all these factors, we have filed the following forecast, using a foreign exchange rate assumption for the year of 105 yen per dollar and 130 yen per euro.

- Net revenue is forecasted to be 9 trillion yen, up 4.9%.
- Operating profit is expected to be 870 billion yen, up 1% from fiscal year 2004, giving an operating profit margin of 9.7%.
- Ordinary profit is expected to reach 860 billion yen.
- Net income is forecasted to be 517 billion yen.
- Capital expenditures are expected to reach 540 billion yen.
- R&D expenses are forecast to reach 450 billion yen.

5) Basis of Annual Consolidated Financial Statements

1. Number of Consolidated Subsidiaries and Companies Accounted for by the Equity Method

(1) Consolidated subsidiaries ; 200 companies (Domestic 100, Overseas 100)

Domestic Car Dealers, Parts Distributors

Aichi Nissan Motor Co., Ltd., Tokyo Nissan Motor Co., Ltd.
Nissan Prince Tokyo Sales Co., Ltd.
Nissan Chuo Parts Sales Co., Ltd.
and 79 other companies

Domestic Vehicles and Parts Manufacturers

Nissan Shatai Co.,Ltd., Aichi Machine Industry Co., Ltd., JATCO Ltd., Calsonic Kansei Corp.
and 4 other companies

Domestic Logistics & Services Companies

Nissan Trading Co., Ltd., Nissan Financial Service Co., Ltd., Autech Japan, Inc.
and 6 other companies

Overseas subsidiaries

Nissan North America, Inc., Nissan Europe S.A.S.
Nissan Motor Manufacturing (UK) Ltd.
Nissan Mexicana, S.A. de C.V. and 96 other companies

Unconsolidated Subsidiaries ; 199 companies (Domestic 132, Overseas 67)

These 199 companies are excluded from consolidation because the effect of not consolidating them was immaterial to the Company's consolidated financial statements.

(2) Companies Accounted for by the Equity Method

Unconsolidated subsidiaries; 34 companies (Domestic 25, Overseas 9)
Affiliates; 20 companies (Domestic 17, Overseas 3)

Domestic Nissan Diesel Motor Co., Ltd., and 41 other companies
Overseas Renault S.A., Guangzhou NISSAN Trading Co., Ltd. and 10 other companies

The 165 unconsolidated subsidiaries and 42 affiliates other than the above companies were not accounted for by the equity method because the effect of not adopting the equity method to them was immaterial to the Company's consolidated net income and retained earnings.

(3) Change in the Scope of Consolidation and Equity Method of Accounting

The change in the scope of consolidation compared with fiscal year 2004 was summarized as follows:

Newly included in the scope of consolidation; 27 subsidiaries (*Dongfeng Motor Co., Ltd., Yulon Nissan Motor Co., Ltd., Siam Nissan Automobile Co., Ltd., Calsonic Kansei Corp. and 23 other companies)

Excluded from the scope of consolidation ; 13 subsidiaries (Nissan Canada Finance Inc., Shizuoka Nissan Motor Co., Ltd., Nissan Buhin Yamaguchi Hanbai Co., Ltd. and 10 other companies)

Number of companies newly accounted for by the equity method; 4 subsidiaries (Guangzhou NISSAN Trading Co., Calsonic Kansei Europe plc., and 2 other companies)

Number of companies ceased to be accounted for by the equity method of accounting; 11 (Dongfeng Motor Co., Ltd., Yulon Nissan Motor Co., Ltd., Siam Nissan Automobile Co., Ltd., Calsonic Kansei Corp. and 7 other companies)

The increase in the number of consolidated subsidiaries and companies accounted for by the equity method were primarily attributable to those newly established, due to acquisition of shares or became material to the consolidated financial statements, and the decrease were mainly due to sales or liquidations.

* During the year ended March 31, 2005, investments in Dongfeng Motor Co., Ltd. held by the Company were transferred to Nissan China Investment Co., Ltd. (NCIC). As a result, effective year ended March 31, 2005, Dongfeng Motor Co., Ltd., a joint venture, has been proportionately consolidated into NCIC in accordance with local accounting standards and was presented as a consolidated subsidiary.

2. Fiscal Period of Consolidated Subsidiaries

1) The end of FY2004 for the following consolidated subsidiaries is different from that of the Company (March 31)

December 31 : Nissan Europe S.A.S. Nissan Mexicana, S.A. de C.V.,
Nissan Motor Company South Africa (Proprietary) Limited, and 61 other overseas subsidiaries

2) With respect to the above 64 companies, the necessary adjustments were made in consolidation to reflect any significant transactions from January 1 to March 31.

3. Significant Accounting Policies

1) Valuation methods for assets

1. Securities

Held-to-maturity debt securities Held-to maturity debt securities are stated at amortized cost.

Other securities

Marketable securities Marketable securities classified as other securities are carried at fair value with changes in unrealized holding gain or loss, net of the applicable income taxes, directly included in shareholders' equity.
Cost of securities sold is calculated by the moving average method.

Non-marketable securities . Non-marketable securities classified as other securities are carried at cost determined by the moving average method.

2. Derivative financial instruments

Derivative financial instruments are stated at fair value except for forward foreign exchange contracts entered in order to hedge receivables and payables denominated in foreign currencies which have been translated and are reflected at their corresponding contract rates in the consolidated balance sheet.

3. Inventories

Inventories are carried at the lower of cost or market, cost being determined by the first-in, first-out method.

2) Depreciation of property, plant and equipment

Depreciation of property, plant and equipment is calculated principally by straight-line method based on the estimated useful lives and economic residual value determined by the Company.

3) Basis for reserves and allowances

Allowance for doubtful accounts

Allowance for doubtful accounts is provided for possible bad debt at the amount estimated based on past bad debts experience for normal receivables plus uncollectible amounts determined by reference to the collectibility of individual accounts for doubtful receivables.

Accrued warranty costs

Accrued warranty costs are provided to cover the cost of all services anticipated to be incurred during the entire warranty period in accordance with the warranty contracts and based on past experience.

Accrued retirement benefits

Accrued retirement benefits are provided principally at the amount calculated based on the estimated amount incurred at the end of the period, which is, in turn, calculated based on the retirement benefit obligation and the fair value of the pension plan assets at the end of the current fiscal year.

The net retirement benefit obligation at transition is primarily being amortized over a period of 15 years by the straight-line method.

Prior service cost is being amortized as incurred by the straight-line method over periods which are shorter than the average remaining years of service of the eligible employees.

Actuarial gain or loss is amortized in the year following the year in which the gain or loss is recognized primarily by the straight-line method over periods which are shorter than the average remaining years of service of the eligible employees.

4) Lease transactions

5) Significant hedge accounting method

Hedge accounting

Deferral hedge accounting is adopted for derivatives which qualify as hedges, under which unrealized gain or loss is deferred. When forward foreign exchange contracts and other derivative transactions are entered into in order to hedge receivables and payables denominated in foreign currencies, such receivables and payables are recorded at the contract rates.

Hedging instruments and hedged items

Hedging instruments - Derivative transactions

Hedged items - Hedged items are subject to the risk of loss as a result of market fluctuation and such changes are not reflected in their valuation.

Hedging policy

It is the Company's policy that all transactions denominated in foreign currencies are to be hedged.

Assessment of hedge effectiveness

Hedge effectiveness is determined by comparing the cumulative changes in cash flows or fair values from the hedging instruments with those from the hedged items.

Risk management policy with respect to hedge accounting

The Company manages its derivative transactions in accordance with its internal "Policies and Procedures for Risk Management."

6) Consumption Tax

Transactions subject to consumption tax are recorded at amounts exclusive of consumption tax.

7) Accounting policies adopted by foreign consolidated subsidiaries

The financial statements of the Company's subsidiaries in Mexico and other countries have been prepared based on general price-level accounting. The related revaluation adjustments made to reflect the effect of inflation in Mexico and other countries are charged or credited to operations and directly reflected in retained earnings in the accompanying consolidated financial statements.

4. Cash and cash equivalents

Cash and cash equivalents in consolidated statements of cash flows include cash, deposits which can be withdrawn on demand and highly liquid short-term investments exposed to insignificant risk of changes in value with a maturity of three months or less when purchased.

5. Accounting changes

Classification of freight and shipping costs

Until the year ended March 31, 2004, freight and shipping costs of the Company and certain consolidated subsidiaries were included in selling, general and administrative expenses. Effective April 1, 2004, the Company and those consolidated subsidiaries began to account for the freight and shipping costs as cost of sales. This change was made in order to achieve a better matching of revenues and expenses and to present gross profit more accurately by including the freight and shipping costs in cost of sales considering the fact that shipping costs to export parts to be used for manufacture in overseas countries have increased due to the expansion of manufacturing activities outside Japan.

The effect of this change was to increase cost of sales by 112,074 million yen and to decrease gross profit and selling, general and administrative expenses by the same amount for the twelve months ended March 31, 2005. Consequently, this change had no impact on operating income, ordinary income, income before income taxes and minority income and net income for the twelve months ended March 31, 2005 as compared with the corresponding amounts which would have been recorded if the previous method had been followed.

6) Notes to Consolidated Financial Statements

1. Contingent Liabilities

At March 31, 2005, the Company and its consolidated subsidiaries had the following contingent liabilities:

	(Millions of yen)
1) As guarantor of employees' housing loans from banks and others (195,030 for employees, 48,354 for others)	243,384
2) Commitments to provide guarantees of indebtedness of unconsolidated subsidiaries and affiliates at the request of lending banks	2,712
3) The outstanding balance of installment receivables sold with recourse	20,687

2. Research and Development costs included in cost of sales and general and administrative expenses

(Millions of yen)
398,148

3. Cash Flows

Cash and cash equivalents at the end of fiscal year 2004 are reconciled to the accounts reported in the consolidated balance sheet as follows:

(as of Mar. 31 2005)	(Millions of yen)
Cash on hand and in banks	300,274

2-3) Significant Accounting Policies

1. Valuation methods for assets

(1) Valuation of inventories

Inventories are carried at the lower of cost or market, cost being determined by the first-in, first-out method.

(2) Valuation of securities

1) Held-to-maturity debt securities are stated at amortized cost based on the straight-line method.

2) Investments in stock of subsidiaries and affiliates are stated at cost determined by the moving average method.

3) Other securities

Marketable securities Marketable securities classified as other securities are carried at fair value with changes in unrealized holding gain or loss, net of the applicable income taxes, directly included in shareholders' equity.
Cost of securities sold is calculated by the moving average method.

Non-marketable securities . Non-marketable securities classified as other securities are carried at cost determined by the moving average method.

(3) Accounting for derivative financial instruments

Derivative financial instruments are stated at fair value except for forward foreign exchange contracts entered into in order to hedge receivables and payables denominated in foreign currencies which have been translated and are reflected at their corresponding contract rates in the non-consolidated balance sheet.

2. Depreciation of fixed assets

(1) Depreciation of property, plant and equipment is calculated by straight-line method based on the estimated useful lives and economic residual value determined by the Company.

(2) Amortization of intangible assets is calculated by the straight-line method.

3. Basis for Reserves and Allowances

(1) Allowance for doubtful accounts

Allowance for doubtful accounts is provided for possible bad debt at the amount estimated based on the past bad debts experience for normal receivables plus uncollectible amounts determined by reference to the collectibility of individual accounts for doubtful receivables.

(2) Accrued warranty costs

Accrued warranty costs are provided to cover the cost of all services anticipated to be incurred during the entire warranty period in accordance with the warranty contracts and based on past experience.

(3) Accrued retirement benefits

Accrued retirement benefits are provided for the payment of retirement benefits at the amount calculated based on the retirement benefit obligations and the fair value of pension plan assets at the end of this fiscal year.

The net retirement benefit obligations at transition is being amortized over a period of 15 years by the straight line method.

Prior service cost is being amortized as incurred by the straight-line method over the periods which are shorter than the average remaining years of service of the eligible employees.

Actuarial gain or loss is amortized in the year following the year in which the gain or loss is recognized by the straight-line method over periods which are shorter than the average remaining years of service of the eligible employees.

4. Lease transactions

Noncancelable lease transactions are classified as operating or finance leases and accounted for accordingly.

5. Significant hedge accounting method

Hedge accounting

Deferral hedge accounting is adopted for derivatives which qualify as hedges, under which unrealized gain or loss is deferred. When forward foreign exchange contracts and other derivative transactions are entered into in order to hedge receivables and payables denominated in foreign currencies, such receivables and payables are recorded at the contract rates.

Hedging instruments and hedged items

Hedging instruments - Derivative transactions

Hedged items - Hedged items are subject to the risk of loss as a result of market fluctuation and such changes are not reflected in their valuation.

Hedging policy

It is the Company's policy that all transactions denominated in foreign currencies are to be hedged.

Assessment of hedge effectiveness

Hedge effectiveness is determined by comparing the cumulative changes in cash flows or fair values from the hedging instruments with those from the hedged items.

Risk management policy with respect to hedge accounting

The Company manages its derivative transactions in accordance with its internal "Policies and Procedures for Risk Management."

6. Consumption Tax

Transactions subject to consumption tax are recorded at amounts exclusive of consumption tax.

7. Accounting Changes

Classification of freight and shipping costs

Until the year ended March 31, 2004, freight and shipping costs of the Company were included in selling, general and administrative expenses. Effective April 1, 2004, the Company began to account for the freight and shipping costs as cost of sales. This change was made in order to achieve a better matching of revenues and expenses and to present gross profit more accurately by including the freight and shipping costs in cost of sales considering the fact that shipping costs to export parts to be used for manufacture in overseas countries have increased due to the expansion of manufacturing activities outside Japan.

The effect of this change was to increase cost of sales by 88,400 million yen and to decrease gross profit and selling, general and administrative expenses by the same amount for the FY2004 (April 1, 2004 through March 31, 2005). Consequently, this change had no impact on operating income, ordinary income, income before income taxes and net income for the FY2004 (April 1, 2004 through March 31, 2005) as compared with the corresponding amounts which would have been recorded if the previous method had been followed.

3. Directors and statutory auditors Changes

Regarding the directors and statutory auditors changes, Nissan Motor Co., Ltd. has already announced on February 21, 2005.

NISSAN REPORTS RECORD RESULTS FOR FY04

- NISSAN Value-Up business plan unveiled

TOKYO (April 25, 2005)--Nissan Motor Co., Ltd., today announced record net income of 512.3 billion yen (US \$4.76 billion, euro 3.81 billion), up 1.7% for the fiscal year ended March 31, 2005. Nissan President and CEO Carlos Ghosn also unveiled the specifics of NISSAN Value-Up, the company's three-year business plan that began April 1, 2005.

"Last year, Nissan rose to the challenge and delivered a record performance despite many headwinds, such as unfavorable exchange rates, higher commodity prices, higher incentives and higher interest rates," said Ghosn. "The fundamentals of the business are strong, our products are attractive to consumers, and Nissan is poised for sustained, profitable growth."

Nissan's consolidated net revenues amounted to 8.576 trillion yen (US \$79.7 billion, euro 63.8 billion), up 15.4% compared with the previous year. Operating profit totaled a record 861.2 billion yen (US \$8.0 billion, euro 6.4 billion), up 4.4% compared with last year, and the operating profit margin came to 10.0%, which is at the top level among global automakers. Ordinary profit amounted to 855.7 billion yen (US \$7.95 billion, euro 6.37 billion), up 5.7%.

Nissan sold a record 3,388,000 vehicles worldwide in fiscal year 2004, an increase of 10.8%, or 331,000 units. In the United States, sales advanced 18.4% to 1,013,000 units, topping the 1-million mark for the first time. In Japan, sales increased 1.4% to 848,000 units. In Europe, where sales are reported on a calendar-year basis, sales were flat at 544,000 units. Sales in General Overseas Markets, including China, Mexico and Canada, increased 19.5% to 983,000 units.

The fiscal year 2004 financial results include the 50% proportional consolidation of Dongfeng Motor Co., Ltd., Nissan's joint venture in China, and the full consolidation of Siam Nissan Automobile Co., Ltd., and Yulon Motor Co., Ltd.

NISSAN Value-Up

The NISSAN Value-Up business plan has three commitments relating to profitability, growth and return on investment. The commitments are:

- to maintain the top level of operating profit margin among global automakers for each of the three years of the plan;
- to achieve global sales of 4.2 million units, measured in fiscal year 2008; and
- to achieve a 20% return on invested capital on average over the course of the plan, excluding cash on hand.

“The story of Nissan’s revival is now complete,” said Ghosn. “NISSAN Value-Up is a clear plan with specific commitments. Within this framework for action, we will create more value for more customers, employees and shareholders in more world markets than ever before.”

Under the plan, Nissan will expand its worldwide presence, and Infiniti will be launched as a global tier-one luxury brand. Currently marketed in North America, Taiwan and the Middle East, Infiniti will be expanded to Korea, China and Russia.

Through the end of fiscal year 2007, 28 all-new Nissan and Infiniti models will be launched globally.

Other FY04 financial highlights:

Indebtedness

Nissan’s net automotive debt has been eliminated. Nissan had 205.8 billion yen (US \$1.91 billion, euro 1.53 billion) in cash at the close of fiscal year 2004.

Dividend

As previously announced, Nissan will propose a 12-yen-per-share year-end dividend at the company’s annual general shareholders meeting on June 21, 2005, for a full-year dividend of 24 yen per share for fiscal year 2004.

Outlook for FY05:

Business risks include volatility in foreign exchange rates, higher commodity prices, higher interest rates, higher energy prices, and uncertainty about the levels of growth in the U.S. and Japanese markets. Opportunities lie in the accelerated implementation of NISSAN Value-Up.

FY05 forecast:

Based on this outlook and assuming foreign exchange rates of 105 yen/dollar and 130 yen/euro, Nissan filed the following forecast for the fiscal year ending March 31, 2006, with the Tokyo Stock Exchange:

- consolidated net revenues of 9 trillion yen;
- operating profit of 870 billion yen;
- ordinary profit of 860 billion yen; and
- net income of 517 billion yen.

Note: Amounts in dollars and euros are translated for the convenience of the reader only at the foreign exchange rates of 107.6 yen/dollar and 134.4 yen/euro, the average rates for the fiscal year ending March 31, 2005.
