**VIC/P37(v)****HALLADALE-1 DW-2 AND HALLADALE-1 DW-3**

Woodside Energy Ltd., a wholly owned subsidiary of Woodside Petroleum Ltd., reports that operations on exploration well Halladale-1 DW-2 were concluded at 15:00 hrs AEST on 21 April 2005. Interpretation of wireline log and pressure data indicates that the well intersected gas over a gross interval of 21 metres true vertical depth (23 metres measured depth along hole) within interbedded sandstones and shales of the Waarre Formation. Halladale-1 DW-2 has been plugged and abandoned as planned.

Following the conclusion of operations on Halladale-1 DW-2, a third deviated well, Halladale-1 DW-3, was drilled to obtain aquifer pressures in the Waarre Formation down-flank of the Halladale gas accumulation discovered by Halladale-1 DW-2. Halladale-1 DW-3 reached a total depth of 1969 metres measured depth along hole. Wireline pressure data has been acquired and the well is in the process of being plugged and abandoned as planned.

The 'Ocean Patriot' semi-submersible rig has been drilling the wells, located in Otway Basin permit VIC/P37(v), approximately 4 km from shore and 24 km west of the coastal township of Port Campbell. Water depth at the location is 45.9m below mean sea level. Origin Energy Resources Limited is Operator of the permit, with drilling operations managed by Woodside under an agreement with Origin. The rig is expected to be released from the location by 28 April 2005.

Joint venture participants in VIC/P37(v) are Woodside Energy Ltd. (62.5%) and Origin Energy Resources Limited (37.5%).
