Atlas Copco
Second quarter report 2005
(unaudited)

Record sales and profits

- Very strong performances by all business areas
- Orders received up 24%, up 11% in volume.
- Revenues reached MSEK 13 062 (10 680), up 10% in volume.
- Operating profit increased 45% and the margin reached 17.5% (14.8).
- Profit after financial items increased 42% to MSEK 2 128 (1 502).
- Net profit was MSEK 1 461 (1 112) and earnings per share SEK 2.32 (1.76).
 - The expected capital gain from the divestment of the professional electric tools business is not included. Final closing balance will be decided in arbitration.
- Operating cash flow totaled MSEK 955 (774). Net cash flow, including share redemption, amounted to MSEK -4 366.

The consolidated accounts are prepared in accordance with International Financial Reporting Standards (IFRS). Financial information for 2004 is restated and excludes discontinued operations (the professional electric tools business), unless otherwise stated.

Near-term demand outlook

The demand for Atlas Copco's products and services is expected to remain at a high level.

Demand from manufacturing and process industries is expected to stay favorable. Activity in the construction industry is expected to continue to increase somewhat. Demand from the mining industry is expected to remain strong.

Atlas Copco Group

Summary of half-year results

Orders received by the Atlas Copco Group in the first six months of 2005 increased 20%, to MSEK 25 828 (21 478). Volume for comparable units increased 9%, price increases added 3% and structural changes 10%, while the negative currency translation effect was 2%. Revenues increased 20%, to MSEK 24 230 (20 275), corresponding to 11% volume growth.

The Group's operating profit increased 39% to MSEK 4 029 (2 905), corresponding to a margin of 16.6% (14.3). The negative impact of changes in exchange rates compared with the

previous year was approximately MSEK 100 for the first half year. Profit after financial items amounted to MSEK 3 793 (2 733), up 39% and corresponding to a margin of 15.7% (13.5). Net profit totaled MSEK 2 628 (2 034), or SEK 4.17 (3.22) per share. Previous year's net profit includes discontinued operations and the profit per share is adjusted for the share split in May 2005.

Operating cash flow before acquisitions, divestments and dividends equaled MSEK 1 972 (1 636).

Review of second quarter

Market development

Demand for the Group's products and services in **North America** developed favorably. Increased demand from the manufacturing and process industries was noted for production related equipment and aftermarket products, as well as for investment goods. The non-residential construction segment continued to improve, which benefited the demand for rental equipment and services. The other construction segments – residential building and public infrastructure – showed a continued strong growth. The demand from the mining industry continued at the high level seen in recent periods.

In **South America**, the demand development remained very positive across the continent. All major customer segments, the manufacturing, process and mining, as well as the construction industries, developed well.

The demand in **Europe** was favorable but the growth was slower than in the other regions. Mining and construction equipment had a good development in Eastern Europe and in the Nordic countries. The demand for equipment and related aftermarket to the manufacturing and process industries improved in most markets. Germany and Italy, however, continued to be relatively weak. Overall demand from the construction sector improved further in the region.

The **Africa/Middle East** region developed positively. Mining and construction equipment as well as industrial tools were in good demand.

The demand in **Asia** improved. Substantial growth was recorded in Japan, India and South East Asia, while sales in China stabilized. The development in **Australia** continued to be positive with healthy demand from most customer segments.

	100	100

Earnings and profitability

Operating profit increased 45% to MSEK 2 292 (1 584) corresponding to an operating margin of 17.5% (14.8). The improvement was spread over all business areas and resulted primarily from higher revenue volumes and price increases. This more than offset the effects of higher material costs and increased marketing and sales activities. The changes in exchange rates, compared to the previous year, had a net positive effect of about MSEK 50.

Net financial items were MSEK -164 (-82). The net interest cost increased, primarily as a result of negative fair market valuations of debt related derivative instruments. The increased short-term USD interest rates compared to previous year also affected the interest net somewhat negatively. Exchange differences on financial instruments were MSEK -16 (+7).

Profit after financial items improved 42%, to MSEK 2 128 (1 502), to a margin of 16.3% (14.1). Net profit totaled MSEK 1 456 (1 112) or SEK 2.32 (1.76) per share. Previous year's net profit includes discontinued operations and the profit per share is adjusted for the share split in May 2005. The expected one-time gain from the divestment of the professional electric tools business, MSEK 200 in originally estimated capital gain and MSEK 200 in currency hedging gain, is not included. The final closing balance of the business is in dispute and will be decided in arbitration as per the terms and conditions in the purchase agreement, which is a process that can take several quarters to finalize. The final result will be accounted for as net profit from discontinued operations.

The return on capital employed during the 12 months to June 30, 2005 was 25%, and the return on shareholders' equity was 23%. Both figures include discontinued operations. Previous year's 12 month figures are not meaningful comparisons as restatement to IFRS is only made from January 1, 2004. The Group currently uses a weighted average cost of capital (WACC) of 8% (pre-tax equivalent approximately 12%), as an investment and overall performance benchmark.

Cash flow and investments

Cash flow from operations before changes in working capital reached MSEK 2 487 (1 894), corresponding to 19% (18) of Group revenues. Working capital decreased by MSEK 47 (increased by 26). An increase in receivables and inventory, in line with the strong sales growth, was more than offset by an increase in supplier credits. Total cash flow from operations reached MSEK 2 534 (1 868).

Cash flow from net investments, excluding acquisitions and divestments of businesses, was

MSEK -1 579 (-1 094). Operating cash flow equalled MSEK 955 (774).

Net indebtedness

The Group's net indebtedness, defined as the difference between interest-bearing liabilities and liquid assets, amounted to MSEK 8 912 (11 365), of which MSEK 2 281 (2 263) was attributable to employee benefits. The debt/equity ratio, defined as net indebtedness divided by shareholders' equity, was 41% (54).

Asbestos cases in the United States

As of June 30, 2005, Atlas Copco had 206 asbestos cases filed with a total of 19 076 individual claimants. It is important to note that none of these cases identifies a specific Atlas Copco product. In each case there are several defendants, on average 113 companies per case.

The Group dedicates substantial time and professional resources to monitor and follow each of these cases. Based on a continuous assessment of the actual exposure, the Group has not recorded any provisions related to these pending cases.

People

On June 30, 2005, the number of employees was 26 173 (26 334). For comparable units, the number of employees increased by 1 251 from June 30, 2004.

Distribution of shares

Share capital equaled MSEK 786 (1 048) at the end of the period, distributed as follows.

Class of share	Shares outstanding
A shares	419 697 048
B shares	209 109 504
Total A and B shares	628 806 552

Share redemption

The resolution of the Annual General Meeting to do a share split and to redeem 209 602 184 redemption shares was executed in the second quarter. Atlas Copco AB's A and B redemption shares were redeemed in June and approximately BSEK 4.2 was distributed to the shareholders. See also www.atlascopco.com/redemption

Simultaneously, 209 602 184 series C-shares were issued to and subscribed by Svenska Handelsbanken AB, with the sole purpose to enable a prompt payment to the shareholders. These C-shares will be redeemed as soon as Atlas Copco AB has received the court's approval for the corresponding reduction of the restricted capital. As a consequence, the cash received from the C-share issue does not fulfil the requirement for equity in the consolidated accounts, and is booked as a short-term liability.

Compressor Technique

The Compressor Technique business area consists of five divisions in the following product areas: industrial compressors, portable compressors, generators, gas and process compressors, as well as specialty rental.

MSEK	April–June			January–June		
	2005	2004	Change %	2005	2004	Change %
Orders received	5 434	4 776	+14	10 328	9 391	+10
Revenues	5 207	4 549	+14	9 630	8 665	+11
Operating profit	962	808	+19	1 775	1 555	+14
- as a percentage of revenues	18.5	17.8		18.4	17.9	
Return on capital employed, %	66					

- Continued strong demand resulted in record order intake.
- Positive sales development in all regions, particularly strong in the Americas.
- Record profits, corresponding to an operating margin of 18.5%.

Orders and revenues

MSEK	April – June	
	Orders Received	Revenues
2004	4 776	4 549
Structural change, %	+1	+1

% , last 12 months	June	June
	2005	2004
North America	13	12
South America	5	4
Europe	51	50
Africa/Middle East	7	7
Asia/Australia	24	27
	100	100

The demand remained very favorable in most regions and customer segments. Order volume grew 10% compared to an already healthy second quarter 2004.

Orders for stationary industrial compressors, as well as the related aftermarket business, continued to grow steadily in most regions. Small and medium-sized oil-injected machines, serving a wide variety of standard industrial applications, had good volume growth. Within the oil-free compressor range, the best development was achieved for the turbo-compressors, which normally serve applications for compression of large volumes of air.

Geographically, a strong growth was again recorded in almost all countries in North and South America. In Western Europe, the growth was modest, and the development in

Eastern Europe leveled off from the previous very strong trend. Most countries in Asia recorded favorable development, both for machines and the aftermarket. Very strong growth was achieved in India and Japan, while sales in China almost equaled the high level of the second quarter 2004. In Australia and Africa/Middle East, sales of industrial compressors and the aftermarket were higher compared to the previous year.

Orders for gas and process compressors increased significantly thanks to large orders. The most notable orders were received for an application on board ships that will carry liquid natural gas from gas fields in the Middle East.

Demand for portable compressors increased further in the quarter and a very strong volume growth was recorded in North and South America, as well as in the Middle East. In Europe, large size portable compressors were in high demand.

The specialty rental business, primarily rental of portable air and power, experienced another strong quarter, with significant growth both organically and from the acquired companies Guimerá in Spain and Kolfor in Great Britain.

Lubenecké továrny Svoboda a.s. in the Czech Republic, referred to as Lutos, was acquired in June. Lutos has annual sales of MSEK 41, and 87 employees and manufactures and markets a range of air compressors for low pressures, so called blowers

Operating profit increased 19% to MSEK 962 (808), corresponding to an operating margin of 18.5% (17.8). The operating margin benefited from the increases in revenue volume and prices, but was negatively affected by higher material and marketing costs. The changes in exchange rates had a small unfavorable effect on the margin.

Return on capital employed (last 12 months) was 66%.

Construction and Mining Technique

The Construction and Mining Technique business area consists of seven divisions in the following product areas: drilling rigs, rock drilling tools, exploration equipment, construction tools, and loading equipment.

MSEK	April–June		Change %	January–June		Change %
	2005	2004		2005	2004	
Orders received	4 166	2 547	+64	7 705	4 722	+63
Revenues	3 771	2 359	+60	6 983	4 383	+59
Operating profit	485	245	+98	832	438	+90
- as a percentage of revenues	12.9	10.4		11.9	10.0	
Return on capital employed, %	24					

- Continued strong demand in mining and improvement in construction.
- Strong volume growth, both for comparable units and in acquired companies.
- Record profit, both in absolute and in margin.

Orders and revenues

MSEK	April – June	
	Orders Received	Revenues
2004	2 547	2 359
Structural change, %	+42	+37
Currency, %	+1	+2

Volume, %	+17	+18
Total, %	+64	+60
2005	4 166	3 771

Geographic distribution of orders received

% , last 12 months	June	June
	2005	2004
North America	26	16
South America	10	9
Europe	32	41
Africa/Middle East	12	14
Asia/Australia	20	20
	100	100

The strong demand from the mining industry continued. Investments in open pit and underground mines contributed to a very strong order development for new equipment, both for comparable and acquired units. Orders for rotary drilling rigs for open pit mining and related applications were particularly strong. Order volumes for underground drilling and loading equipment increased strongly, while sales of exploration equipment weakened somewhat. The aftermarket business, including consumables, continued to grow at a steady rate. For comparable units, the best sales development was noted in North America and Eastern Europe.

The demand from the construction industry improved and volumes increased in all regions and in most product areas. The order intake for crawler rigs for surface applications, such as quarries and infrastructure projects, continued to develop positively. The favorable trend for light construction equipment, primarily breakers and drills, continued, while the demand for underground drilling rigs for infrastructure projects was unchanged. The overall development was strong in North America, Asia, the Nordic countries and the Middle East.

The companies acquired in the middle of 2004 have improved the geographical balance of sales and the integration of the businesses is progressing according to plan.

To improve flow and expand capacity, an investment of MSEK 40 in an extension of the assembly plant for loaders and mine trucks will be made in Örebro, Sweden.

Product development activity continued to yield results. Atlas Copco's first four boom drilling rig, the world's most productive, was commissioned at a tunneling project in Finland.

Operating profit increased to MSEK 485 (245), corresponding to a margin of 12.9% (10.4). The profit improvement was primarily a result of higher revenue volumes. The sharp increase in the USD rate gave a favorable currency effect on the operating margin compared to the previous year, while price increases compensated for increased component costs. Costs for integration of the acquisitions had a slight negative impact on the profit, but less than in the previous year (-15).

Return on capital employed (last 12 months) was 24%.

Rental Service

The Rental Service business area consists of one division in the equipment rental industry in North America, providing services to construction and industrial markets.

MSEK	April-June		Change %	January-June		Change %
	2005	2004		2005	2004	
Revenues	2 812	2 669	+5	5 182	5 013	+3
Operating profit	621	414	+50	1 009	642	+57
- as a percentage of revenues	22.1	15.5		19.5	12.8	
Return on capital employed, %	13					

- 14% rise in rental revenue in USD. Continued strong pricing.
- All-time high operating profit margin.
- Fleet efficiency and higher profits drove return on operating capital to 23%.

Revenues

MSEK	April - June	
	Total Revenues	Rental Revenues
2004	2 669	1 946
Structural change, %	-4	0
Currency, %	-2	-2
Price, %	+6	+9
Volume, %	+5	+5
Total, %	+5	+12
2005	2 812	2 177

Geographic distribution of revenues

The Rental Service business area has all of its revenues in North America.

Spending in the most important segment for the business area – non-residential construction – grew by an estimated 5-6%, with good growth seen in the manufacturing, communication and commercial categories. Total construction activity in the United States continued to grow at a healthy pace, supported by double-digit growth in the residential construction market. Industrial activity, measured by capacity utilization, remained flat at 79%.

Rental revenues, accounting for 77% of total revenues, increased 14% in USD, consisting of an increase in rental rates of 9% and an increase in volume of 5%. Same store rental revenue increased 17% and the total number of stores was 466 (481 at the end of June 2004). Sales of used equipment, representing 16% of total revenues, increased 18% in USD. Sales of merchandise, spare parts and new equipment, accounting for 7% of total revenues, decreased 42% in USD, mainly due to the divestment of the non-core IAT distributor business in November 2004. In

total, revenues increased 5%, to MSEK 2 812 (2 669), affected also by a negative currency translation effect of 2%.

Operating profit increased 50% to MSEK 621 (414), corresponding to a margin of 22.1% (15.5), the highest ever for any quarter. The very strong profit development was again the combined result of improvements in many areas; a continued positive development of rental rates, increased rental volume and the effects of ongoing capital and cost-efficiency measures. Operating costs were slightly down, in spite of the volume increase and generally higher activity level. Profit margin before non-cash items such as depreciation and amortization (EBITDA) improved to 40% (31).

Return on total capital employed (past 12 months) was 13%, i.e. above the Group's weighted average cost of capital. Return on operating capital (excluding goodwill) improved further to 23% as a result of the profit increase and higher capital turnover.

Rental fleet utilization was 69% (66) in the quarter, and the last 12 month average increased to 68% (65). Net investments in the fleet increased, reflecting the volume growth for equipment rental, increased sales of used equipment, and the already high fleet utilization level. At the end of the quarter, total rental fleet at original cost was 2% higher than previous year while fleet-on-rent increased 6%. The quality of the rental fleet improved further as the average fleet age was reduced to 2.8 years (3.4).

The operating cash flow was very strong, benefiting from much higher operating profits and favorable payment conditions from key equipment suppliers.

Industrial Technique

The Industrial Technique business area consists of two divisions in the following product areas: industrial power tools, and assembly systems.

MSEK	April–June		Change %	January–June		Change %
	2005	2004		2005	2004	
Orders received	1 591	1 334	+19	2 984	2 581	+16
Revenues	1 464	1 251	+17	2 804	2 434	+15
Operating profit	280	215	+30	542	428	+27
- as a percentage of revenues	19.1	17.2		19.3	17.6	
Return on capital employed, %	63					

Discontinued operations are excluded in previous year's figures.

- Strong order volume growth in most regions.
- Important new orders in Japan.
- Operating margin improved significantly.

Orders and revenues

MSEK	April – June	
	Orders Received	Revenues
2004 reported	2 732	2 650

Total, %	+19	+17
2005	1 591	1 464

Geographic distribution of orders received

%, last 12 months	June	June
	2005	2004
North America	29	29
South America	3	2
Europe	53	55
Africa/Middle East	4	4
Asia/Australia	11	10
	100	100

The demand for industrial tools and their aftermarket remained robust from all major customer segments: the motor vehicle industry, the automotive aftermarket and the general industry. Order intake increased 19% with double digit volume growth and an 8% contribution from acquired businesses. The aftermarket business developed very favorably and grew more rapidly than the equipment sales.

The development in North and South America was solid in all areas and another

quarter of strong growth was recorded. In Europe, order intake increased moderately. Order intake in the rest of the world grew strongly, most notably in Japan, where important new orders for sophisticated fastening tools for car assembly plants were received.

A number of new industrial tools and aftermarket products were launched. The tools introduced ranged from general duty industrial tools to innovative electric tools for quality assured tightening.

Operating profit increased to MSEK 280 (215), corresponding to a margin of 19.1% (17.2). The margin improved, primarily as a result of strong revenue volume, a positive currency effect and a favorable sales mix. These positive effects more than offset costs related to investments in market organization.

Return on capital employed (last 12 months) was 63%.

The divestment of the professional electric tools business to Techtronic Industries Co. Ltd. was closed on January 3, 2005. The business area has an agreement with Techtronic Industries to continue as a distributor of professional electric tools in some markets. This represents approximately 2% of the business area's sales and is included in structural changes in the table above.

Discontinued operations

The orders received and revenues for the divested electric tools business in Q2 2004 were MSEK 1 398 and MSEK 1 399 respectively. Operating profit was MSEK 123.

Previous near-term demand outlook

(Published April 27, 2005)

The demand for Atlas Copco's products and services is expected to remain at current high level.

Demand from manufacturing and process industries is expected to stay favorable in most markets. Activity in the construction industry is expected to continue to increase somewhat in North America and in most developing countries. Demand from the mining industry is expected to remain strong.

Accounting principles

As of January 1, 2005, the consolidated accounts of the Atlas Copco Group are prepared in accordance with IFRS. The interim report is prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Financial Accounting Standards Council's recommendation RR 31 Consolidated interim reporting.

Atlas Copco has restated historical financial information as from January 1, 2004 in order to provide comparative information for the corresponding periods in the 2005 interim and annual reports. Financial information for periods prior to January 1, 2004 will not be restated.

The effect of the restatements of earnings and the balance sheet for each quarter and full year 2004 was presented in the appendix of the first quarter report 2005.

* Annual revenues and number of employees at time of acquisition/divestment.

Due to the relatively small size of the acquisitions in Q1-Q2 2005, full disclosure as per IFRS 3 is not given in this interim report. The annual report for 2005 will, however, include all stipulated disclosures.

Financial targets

The overall objective for the Atlas Copco Group is to grow and to achieve a return on capital employed that will always exceed the Group's average cost of capital.

The current targets are:

- to have an annual revenue growth of 8%;
- to reach an operating margin of 15%; and
- to challenge and continuously improve the efficiency of operating capital in terms of fixed assets, stocks, receivables, and rental fleet utilization.

This will have the result that shareholder value is created and continuously increased.

Forward-looking statements

Some statements in this report are forward-looking, and the actual outcomes could be materially different. In addition to the factors explicitly discussed, other factors could have a material effect on the actual outcomes. Such factors include, but are not limited to, general business conditions, fluctuations in exchange rates and interest rates, political developments, the impact of competing products and their pricing, product development, commercialization and technological difficulties, interruptions in supply, and major customer credit losses.

Atlas Copco AB

Atlas Copco AB and its subsidiaries are sometimes referred to as the Atlas Copco Group, the Group or Atlas Copco. Atlas Copco AB is also sometimes referred to as Atlas Copco. Any mentioning of the Board of Directors or the Directors refers to the Board of Directors of Atlas Copco AB.

Brock comments on Atlas Copco's Q2 results 2005

Stockholm, Sweden, July 18, 2005: Today Atlas Copco reported record sales and record profits. *"The development has been very strong in all business areas, including acquired units,"* says Gunnar Brock, President and CEO. *"We expect the demand for Atlas Copco's products and services to remain at a high level in the near-term future."*

Orders received were up 24% to MSEK 13 838 (11 201) in the quarter. Revenues increased 22% to MSEK 13 062 (10 680), up 10% in volume for comparable units. The operating profit increased 45% and the margin reached a new all-time high, 17.5%. Profit after financial items was up 42% to MSEK 2 128 (1 502), a margin of 16.3% (14.1).

Atlas Copco's market coverage has expanded and territory management has improved. *"We have employed new sales engineers and service technicians on many markets and that brings results. In India for example, we have almost doubled sales in just two years. We have established new customer centers in several places, to further improve customer relations and aftermarket support."*

Atlas Copco has further enhanced its sales activities and has received a number of breakthrough orders. *"We have established ourselves within the liquid natural gas segment with our compressors, and in car assembly plants in Japan with our sophisticated fastening tools."*

Both the financial performance and the fleet utilization in the Rental Service business area are at record level. *"The quality of the rental fleet is top-of-the-line and the average fleet age is today 2.8 years."*

Continuous research and development to secure innovative products is a success factor for the Atlas Copco Group. *"A new range of industrial compressors and new tools were launched and have been well received by the customers. We are proud to have our new tunneling rig, the most productive on the market, in production in a project in Finland. We also invest in production to meet future demand and are investing MSEK 40 in Sweden to increase production flow and assembly capacity for loaders and mine trucks."*

Atlas Copco is an international industrial Group with its head office in Stockholm, Sweden. In 2004, the Group had revenues of approximately BSEK 49, with 98% of revenues outside Sweden. The Group has more than 25 000 employees. The Group produces and markets compressed air equipment and generators, construction and mining equipment, industrial tools, and assembly systems and offers related service and equipment rental. The Atlas Copco Group includes famous brands such as Atlas Copco, RSC Equipment Rental, and CP. More information can be found on atlascopco.com.
