## AD HOC RELEASE

### **PALFINGER AG posts record revenue and earnings in the 1st quarter of 2005**

Revenue increase of 40.9 percent – earnings increase of 183.9 percent

Bergheim/Salzburg, 11 May 2005

In the first quarter of 2005, Palfinger posted record revenue and earnings, marking the best quarter in the corporate history of the Palfinger Group. This outstanding development was the result of favorable market conditions and the Global Palfinger Structure as well as structural improvement projects with long-term effects at Palfinger. Area Europe and the Cranes product group, which is marked by a tendency towards higher performance groups and high-grade fittings, contributed most of the growth.

In the first quarter revenue increased by 40.9 percent from EUR 86.4m to EUR 121.7m. Compared to the same period of the year before, profit from operations (EBIT) almost tripled and stood at EUR 17.2m after EUR 6.1m. EBIT has thus already reached the level of the first half of 2004. The EBIT margin doubled to 14.1 percent, compared to 7.0 percent recorded in the first quarter of 2004.

Profit before tax increased to EUR 17.1m from EUR 5.5m in the previous-year period, and consolidated net profit reached the record level of EUR 12.9m after EUR 3.5m in the same period in 2004.

The gearing ratio reached a new record low of 16.5 percent, the equity ratio at 49.3 percent remains at a high level.

Based on the outstanding results of the first quarter and high order backlog, Management anticipates further increases in revenue and earnings in the second quarter. From today's point of view, Management expects double-digit growth rates in revenue and earnings for the 2005 financial year depending on the development of the materials sector, capacity expansions, and potential development of hydraulic systems.

## PRESS INFORMATION

### **PALFINGER acquires the UK market leader in commercial and passenger tail lifts**

- 100 percent acquisition of Ratcliff Tail Lifts Ltd.
- PALFINGER becomes market leader in the largest European market for commercial and passenger tail lifts

Bergheim/Salzburg, June 14<sup>th</sup> 2005

Subject to the regulatory approval by the Austrian antitrust authority, PALFINGER AG, listed on the Vienna stock exchange is going to fully acquire the UK based Ratcliff Tail Lifts Ltd, a subsidiary of the Ratcliff Group Ltd. The company, which has a third of the UK market, has 40 years of experience in the design and production of lifts for the commercial and passenger markets.

The company employs over 200 staff and generates annual sales of about EUR 30 million (approaching GBP 20 million). Its customer base is predominantly made up of major fleets such as retailers, logistics, distribution and service operations, rental companies and community transport operators. „We are now the number one in Europe’s biggest market for tail lifts“, says PALFINGER CEO Wolfgang Anzengruber.

With the acquisition of Ratcliff Tail Lifts Ltd. PALFINGER assumes the market leadership position in the UK market and also broadens its range with Ratcliff’s innovative and proven products. In addition, the move will strengthen and support the pace of entry of PALFINGER’s tail lift range in the UK. PALFINGER and Ratcliff have been co-operating in this area already for some time.

The two companies will be integrated as soon as possible, whilst existing production, sales and service arrangements will remain unchanged. Ratcliff Tail Lifts Ltd. will become a 100 percent subsidiary of PALFINGER AG. Ratcliff will continue to exist as a trade and company name. The existing management team of Ratcliff Tail Lifts Ltd. will continue to run the business under the new ownership. The business will retain a level of autonomy and independence, enabling the local management to take all necessary steps to further increase profitability. „We expect additional synergies especially in the purchasing area, which will gradually have a positive effect on operational and financial results“, explains PALFINGER CMO Herbert Ortner.

The UK is Europe’s biggest market for tail lifts with a volume of about EUR 60 million (GBP 37.5 million). The three major markets for tail lifts are the USA, United Kingdom and Continental Europe. These markets are characterised by wide differences in product preference, operator practice, design opinion and build quality.

Since 2003/2004, the United Kingdom has been the biggest European market. Steady growth in sales has been sustained while the market has remained buoyant. Importantly, the market in the UK has always expressed an emphasis and preference for service quality and premium branding. Future operating regulations and safety legislation are also expected to increase demand in the replacement market and encourage investment in higher specification equipment.

„With Ratcliff Tail Lifts Ltd. we have acquired a solid and profitable base in the tail lifts business with a relatively low operational risk“, concludes Anzengruber.

The existing marketing, distribution and servicing arrangements for cranes, hook-loaders, access platforms and forklifts are not affected by this acquisition.

	<b>127,240</b>	<b>116,197</b>	<b>116,251</b>
<b>Total equity and liabilities</b>	<b>336,345</b>	<b>311,574</b>	<b>290,825</b>

Segment revenue was increased by 45.1 percent, from EUR 59.8m to EUR 86.8m. In the first quarter of 2005 EBIT rose to EUR 19.6m, almost triple the value of EUR 6.9m reached in the same quarter in 2004. The EBIT margin rose to 22.6 percent.

However, specific shortages in the availability of materials and current capacity utilization set limits on further growth of this magnitude.

The increase compared to the previous-year period, which was also strongly marked by the reduction of production capacity as a result of ERP restructuring measures, is thus expected to level off in the months ahead.

The Hydraulic Systems and Services segment comprises the Palift, Palgate, Crayler, Railway, Mobiler and Bison product divisions, as well as Services. Costs incurred due to restructuring measures at the Guima subsidiary (Palift) and the effects of the acquisition and integration of Bison are putting a strain on the results of this segment, which was marked by a setback in earnings compared to the previous quarters despite increased revenue.

However, these **strategic costs** are the foundation for future successful development and corresponding results. While first results at Palift are expected to come to fruition in the months ahead, the Bison product area is still in the process of development until the end of the year.

The Palift division recorded excellent order intake in the first quarter. Safeguarding of planned relocations and series launches of new products necessitated incremental expenditure and longer delivery times.

In the Palgate division, Palfinger signed an exclusive contract with the leading British manufacturer Ratcliff for the supply of Tukaway tailgates.

The Crayler division recorded first big-ticket contracts in North America. To increase competitive ability, additional focus is being placed on cost reductions and sourcing activities in the US region.

The Railway division was marked by significant improvements in revenue and earnings. The current focus of activities is on securing planned capacity utilization for the second half of the year.

The integration of Bison was successfully continued during the first quarter. The assembly of aerial work platforms was bundled in Löbau and the new product range introduced at Palfinger dealerships.

In line with product sales, development of spare parts sales was positive. In Services, process flows are being introduced in the areas on an ongoing basis, thus expanding Palfinger's position as the industry's service champion.

Compared to the same previous-year period, revenue in this segment increased by 31.4 percent from EUR 26.6m to EUR 34.9m. Because of the developments outlined above, EBIT was set back to EUR -2.4m.

#### Outlook

Based on the outstanding results of the first quarter and the high order backlog, Management anticipates further increases in revenue and earnings in the second quarter.

From today's point of view, Management expects double-digit growth rates in revenue and earnings for the 2005 financial year depending on the development of the materials sector, capacity expansions, and potential development of hydraulic systems.

Further key issues of the past months included optimization of global sourcing and first steps towards the establishment of the Area Asia.

Management presented the company at international investor conferences and road shows in the past months. From EUR 42.10 at the end of 2004, the price of the Palfinger share rose to EUR 43.92 as at 31 March 2005. Since the end of March, the share has also been available in the USA as Level 1 ADR.

A dividend of EUR 1.10 (2004: EUR 0.60) was approved at the Annual General Meeting on 13 April 2005. This represents a dividend yield of 3.8 percent (2004: 3.5 percent) using the average share price for 2004. Hubert Palfinger junior was unanimously appointed to the Supervisory Board.

#### **Performance by region**

In the segment Europe and the Rest of the World the positive trend of the past quarters continued. Over-proportionate increases, especially in the order intake for cranes in Australia, France, Ireland, Italy, and Spain were in line with positive market developments. Revenue in France nearly doubled. Performance in Germany remained weak, as in the last two quarters of 2004, though revenue still improved in comparison to the excellent result of the first quarter of 2004 thanks to order intake of the previous year. Above-average revenue increases in Austria and Great Britain in the first three months were also the result of high order intake in 2004.

Compared to the previous-year period, revenue in this segment rose by 44.2 percent, from EUR 75.8m to EUR 109.3m. The over-proportionate increase in the result from EUR 6.0m to EUR 17.5m is not only due to the weak performance in the same period in 2004 but also reflects the outstanding development of the cranes segment and capacity utilization of production and assembly plants.

In the segment North and South America revenue increased by 17.4 percent from EUR 10.6m to EUR 12.5m, mainly as a result of revenue growth in South America.

In South America the increase in revenue due to high order intake and the increase in value of the Brazilian real led to a significant improvement in performance.

In North America Palfinger was represented at the Conexpo trade show and the dealers' conference to further drive the brand in the area, though outstanding order intake has not translated into corresponding revenue increases so far. The main reason is longer delivery times for cranes and components because of high capacity utilization in European production plants. At the same time, European producer prices, which are increasing as a result of further dollar devaluation, could only partially be passed on to the market. These conditions together with increased market cultivation activities in the Cranes, Crayler, and Palift divisions led to a negative result for this area in the first quarter.

In the first quarter of 2005, profit from operations in the segment North and South America is negative at EUR -0.3m after EUR 0.02m in the same period in 2004.

#### **Performance by product group**

In the reporting quarter, developments in the Cranes segment were positively affected by a shift in demand towards high-performance cranes and high-grade fittings.

Order intake for knuckle-boom cranes and at Epsilon rose compared to the first quarter of the previous year. Positive is the fact that countries outside the main sales markets showed higher percentage increases than the established markets, especially in Eastern Europe where revenue increased by more than 70 percent. In the first quarter, Epsilon once again set new industry standards with product innovations in the forestry cranes sector.

## Income statement for the period ended 31 March 2005

<sup>1</sup> Minority interests are included in Capital and reserves from 1 January 2005.

Thanks to excellent order intake, order backlog increased during the reporting period, especially in the Cranes, Palift, and Crayler divisions. Because of this increase, which was also effected by the integration of Bison components, some plants reached capacity limits, which will be rectified through investments in expansion, especially in steel construction.

Strong demand for high-performance cranes led to additional supply bottlenecks and longer delivery times for some crane models. Because of the lead times necessary for introduced measures to take effect, delivery times are not expected to conform to the principles formulated in RAP ("Rapid Process") until the fourth quarter of 2005.

In line with the increase in EBIT and improved net finance cost, profit before tax increased to EUR 17.1m from EUR 5.5m in the previous-year period, and consolidated net profit reached the record level of EUR 12.9m after EUR 3.5m in the same period in 2004.

#### Consolidated net profit (EUR m)

#### New provision according to IFRS

According to a new provision pursuant to IFRS (1.68) minority interests are to be included in capital and reserves from 1 January 2005. In line with this provision minority interests are now included in capital and reserves and previous years' figures have been adjusted accordingly. As a result the absolute change in capital and reserves also affects the basis for the calculation of performance ratios (i.e. gearing ratio).

#### Group assets, finances, and earnings

In line with increases in revenue and production, active working capital rose to EUR 200.2m (03/2004: EUR 165.8m), while at the same time passive working capital increased to EUR 131.9m (03/2004: EUR 105.7m). Despite the revenue increase of 40.9 percent in the first quarter, net working capital only rose by 13.7 percent compared to the previous-year value to EUR 68.3m as of 31 March 2005. Non-current assets at EUR 128.0m remained almost the same as the year-end value of 2004 (EUR 124.0m).

Investment in property, plant, and equipment amounted to EUR 3.3m and was mostly made up of investments made as part of the Location Optimization Program, rationalization measures, and to increase capacities. The development of capital employed, at EUR 193.9m (+10.2 percent on previous year), was thus highly positive in relation to revenue development (+40.9 percent on previous year).

Operative cash flows in the reporting period were at EUR 4.4m from EUR -2.3m in the same period of the year before. Free cash flow was at EUR 1.9m after -4.7m in the first quarter of 2004. The gearing ratio reached a new record low of 16.5 percent (03/2004: 27.7 percent; 12/2004: 16.6 percent). The equity ratio at 49.3 percent remains at a high level despite the increase of active working capital. Both performance ratios in conjunction with cash flow prove that Palfinger is able to finance over-proportionate growth under its own steam.

#### Other events

One of the central areas of activity in the first quarter was the integration of Bison and the associated consolidation of aerial work platform assembly in Löbau. Initial synergies have already been realized in purchasing and distribution.

# Quarterly report for the period ended 31 March 2005

## Economic background

The first months of the 2005 financial year were marked by a deceleration in global economic activity, though the individual growth trends of the previous quarters continued. China still boasts the highest economic growth rate, followed by Latin America and the USA with growth rates similar to each other. Economic development in the euro zone remained moderate and clearly behind growth in the new EU member states in Eastern Europe.

In the first quarter of 2005 the US dollar gained ground against the euro following peak levels at the end of 2004, however, another decline is anticipated. Compared to the first quarter of 2004 the US dollar lost 6 percent, while both the Canadian dollar and the Brazilian real gained 2 percent and 4 percent respectively against the euro.

For the second quarter decreased growth is projected for the United States economy, and momentum also remains restrained in the euro zone. A number of early indicators forecast acceleration from the middle of the year.

## Group performance

In the first quarter of 2005 revenue and earnings rose to the highest levels in Palfinger's corporate history. This outstanding development was the result of favorable market conditions and the Global Palfinger Structure as well as structural improvement projects with long-term effects at Palfinger. Area Europe and the Cranes product group, which is marked by a tendency towards higher performance groups and high-grade fittings, contributed most of the growth.

In the first quarter revenue increased by 40.9 percent from EUR 86.4m to EUR 121.7m. Compared to the same period of the year before, profit from operations (EBIT) almost tripled and stood at EUR 17.2m after EUR 6.1m. EBIT has thus already reached the level of the first half of 2004. The EBIT margin doubled to 14.1 percent, compared to 7.0 percent recorded in the first quarter of 2004.

Revenue (EUR m)

EBIT (EUR m)

Compared to the same period in 2004 the first quarter of 2005 was marked by increased revenue in all regional areas and product areas. However, revenue development in the first quarter of 2004 had been affected by expansive ERP restructuring measures and resultant temporary capacity adjustments in production.

The strategic projects implemented in 2004, especially the relocation of cylinder production to Tenevo, Bulgaria, are positively reflected in the results. The integration of Bison, the relocation of Guima components to Bulgaria, and market development projects in North and South America and Asia progressed as planned, thus securing future growth.
