Vestas receives order for 48 units of the V82-1.65 MW wind turbine to Australia

The Vestas Group has received an order of 48 units of the V82-1.65 MW wind turbine for the Emu Downs Wind Farm, which will be located north of Perth in the Shire of Dandaragan, Western Australia.

The Emu Downs Wind Farm project comprises a full turnkey 79.2 MW wind farm to be delivered to a joint venture of two subsidiary companies of Stanwell Corporation Limited.

The order consists of delivery, installation and commissioning, remote control system as well as a two-year service and maintenance agreement.

Shipment of the turbines will begin in 2006 and commissioning of the wind power plant will take place during the second half of 2006.

"It is very satisfactory that the V82-1.65 MW wind turbine once again has proven its competitiveness in Australia," says Thorbjørn N. Rasmussen, President of Vestas Asia Pacific A/S and continues: "We are pleased to be awarded another large project in Australia. It clearly demonstrates Vestas' strong position on the market."

The above order does not affect the Vestas Group's expectations for 2005, cf. Stock exchange announcement No. 15/2005 of 26 May 2005.

Any questions may be addressed to the Executive Management at Vestas Wind Systems A/S, phone +45 97 30 00 00.

Yours sincerely
Vestas Wind Systems A/S
