^(a) Restated following first application of IFRS 2 Share-based Payments

^(b) Profit for the period attributable to the Group

^(c) Net profit ^(b) before amortisation of goodwill, impairments, restructuring costs, results on disposals and significant one-off items. The tax impact on the above items is also adjusted for. 2004 comparatives have also been restated for comparable share-based payment cost.

Overview

Introduction

The current year has started well for Nestlé, particularly in terms of sales performance, with organic growth of 5.2%. The focus on the two efficiency programmes, Operation EXCELLENCE 2007 and Project FitNes, has contributed to a 10 basis points improvement in the Group's reported EBITA margin, or 30 basis points at constant currencies on a comparable share-based payment cost basis. In the shorter term, this improvement enhances the prospects for an ongoing, sustainable improvement in the Group's operating performance. Also during the first half, the market implementations of the GLOBE program have accelerated, and about 30% of the Food and Beverage businesses will be using GLOBE's processes, data and systems by the end of the year. This is a key element for the longer term transformation of the Group.

The trading environment has continued to be challenging throughout the first half of the year. Raw and packaging material costs have remained volatile, with some reaching recent highs; and consumer demand has remained fragile in some European countries.

Financial Review

Sales

Sales grew to CHF 43.5 billion, an increase of 2.4% over January-June 2004, despite the negative impacts of currencies of -1.8% and divestitures, net of acquisitions, of -1.0%. The key growth driver was organic growth of 5.2%. This was within the Nestlé long-term trend target of 5-6% and comprised 3.4% real internal growth (RiG) and 1.8% pricing.

Profitability

The Group's EBITA (Earnings Before Interest, Taxes and Amortisation of Goodwill), increased 3.4% to CHF 5.2 billion, whilst the reported EBITA margin improved 10 basis points to 12.0% of sales. The EBITA figure has been restated for 2004 following the retrospective application of new International Financial Reporting Standards (IFRS) adopted as from 1 January 2005. On a comparable share-based payment cost, EBITA increased 4.2%, and the EBITA margin improved 30 basis points in constant currencies.

Net profit (Profit for the period attributable to the Group) increased 32.4% to CHF 3.7 billion to give a net profit margin of 8.5% of sales, an increase of 190 basis points. Earnings per share grew 32.4% to CHF 9.48. The 2005 net profit is not comparable to 2004 mainly due to the new accounting treatment of goodwill as from 1 January 2005 following the adoption of IFRS 3 (Business Combinations). The underlying earnings per share increased 11.2% to CHF 9.95.

Financial position

Nestlé delivered strong cash flow from operations of CHF 3.4 billion, an increase of 0.7% over the first half of 2004, whilst free cash flow increased 5.3%.

Net indebtedness fell from CHF 15.4 billion at the end of June 2004 to CHF 12.4 billion at the end of June 2005. The ratio of net debt to equity fell from 40% at the end of June 2004 to 27% at the end of June 2005.

The Share buy-back programme, announced in February, began in July, with the intention to buy back shares to a value of up to one billion Swiss francs during the second half of the year. By early August, Nestlé had acquired 585 000 shares at a cost of CHF 196 million.

Capital expenditure was CHF 1.2 billion, or 2.8% of sales, a 20 basis points decrease over 2004. Cash expenditure on acquisitions, net of divestitures, was CHF 0.6 billion.

Business review

Zone Europe achieved an improvement in organic growth to 1.5%, compared to the corresponding period in 2004. That improvement was the result of a better performance in Western Europe and, in particular, from the European PetCare business, Great Britain, the Iberian region and a number of the smaller markets. France, Germany as well as Italy remained difficult, even though there were signs of improvement. Organic growth in Eastern Europe amounted to 6.2%. The EBITA margin for the Zone decreased from 11.3% to 10.8%, as the Zone continued to focus on defending or improving its market share positions.

Zone Americas had a very good start to the year, with organic growth of 7.2%. There were excellent performances across North America, specially in the Nestlé Prepared Foods Company, as well as in the recently acquired businesses, Nestlé Purina PetCare Company and Dreyer's Grand Ice Cream Holdings. Canada and the two key Latin American markets, Brazil and Mexico, delivered strong real internal growth. The EBITA margin for the Zone increased from 12.8% to 13.6%, with the USA particularly strong.

Zone Asia, Oceania and Africa achieved organic growth of 6.0% in the first half of the year. Growth in Greater China was held back by a large-scale product exchange due to a local regulatory compliance issue, which reduced consumer demand across all Nestlé-branded product categories in that market. The situation has been addressed and a recovery plan implemented to rebuild consumer confidence and demand during the second half. Japan, Africa and the Philippines, which started the year slowly, are accelerating. There were good performances from a number of Asian markets, as well as the Middle East. The EBITA margin for the Zone fell from 17.8% to 15.9%, reflecting the costs of the product exchange in China, a tough competitive environment for Soluble coffee in Japan and higher raw material costs, especially milk.

Nestlé Waters achieved organic growth of 5.9%. The North American business continued its recent trend of very strong growth, whilst the European business recovered from the poor growth levels in 2004. There was good growth also in the emerging market businesses. The EBITA margin for Nestlé Waters decreased from 9.4% to 8.2%, as a result of a substantial increase in the price of PET and a very competitive global trading environment.

In Other activities, there were excellent performances from Alcon and Nespresso in particular. Organic growth was 10.2%, whilst the EBITA margin increased 410 basis points to 26.8%.

Among the product categories, Beverages grew organically 6.4%, Milk products, Nutrition and Ice cream 5.2% and PetCare 5.3%. Pharmaceutical products delivered 9.2% organic growth. Prepared dishes and cooking aids was slightly slower at 3.8%, whilst the Chocolate, confectionery and biscuits product group did well in general, but is still suffering in Russia. Both the Prepared dishes and cooking aids and Chocolate, confectionery and biscuits product groups improved their margins by over 100 basis points, whilst Pharmaceutical products increased by 190 basis points. PetCare achieved a 30 basis point improvement, whilst the margins of the Beverages and Milk products, Nutrition and Ice cream product groups decreased by over 100 basis points, reflecting higher input costs, in particular PET and milk, as well as the product exchange in China.

Outlook

Trading conditions will continue to be challenging in a number of markets, whilst commodity costs and currencies are likely to remain volatile. Despite this difficult environment, the Group's operating efficiency plans, Operation EXCELLENCE 2007 and Project FitNes, are on track to deliver their combined gross savings target of CHF 1.2 billion for the year, necessary to offset the input cost pressures. Nestlé is therefore well placed to achieve its organic growth target and a further margin improvement in constant currencies.

Annex

Accounting policies

The unaudited interim financial statements comply with the recognition criteria and the measurement methods of international Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and with those of the Interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) of the IASB.

The accounting conventions and accounting policies are the same as those applied in the 2004 Consolidated accounts, except for changes mentioned below.

Changes in accounting policies and modifications of the scope of consolidation

Changes in accounting policies and where applicable changes in accounting estimates

The Group, which has been complying with IFRS/IAS since 1989, has applied the following IFRSs and revised IASs as from 1 January 2005 onwards:

IFRS 2 -- Share-based Payment

The Group has equity-settled and cash-settled share-based payment transactions.

Equity-settled share-based payment transactions are recognised in the income statement against equity. They are fair valued at grant date, measured using the Black and Scholes model.

Liabilities arising from cash-settled share-based payment transactions are recognised in the income statement. They are fair valued at each reporting date, measured using the Black and Scholes model.

Equity-settled share-based payments impact the 2005 half-yearly consolidated income statement for CHF 111 million. The related deferred tax assets amount to CHF 17 million.

Comparative information has been restated for grants of share options (equity-settled) awarded after 7 November 2002 and not vested at 1 January 2005. Equity-settled share-based payments impact the 2004 half-yearly consolidated income statement for CHF 80 million (2004 full-year: CHF 131 million). The related deferred tax assets positively impact the 2004 half-yearly consolidated income statement for CHF 16 million (2004 full-year: positive CHF 23 million).

Liabilities arising from cash-settled share-based payment transactions were already recognised in the income statement. At 30 June 2004, "Trade and other payables" and "Accruals and deferred income" included cash-settled share-based payments respectively for CHF 27 million (31 December 2004: CHF 33 million) and CHF 4 million (31 December 2004: CHF 9 million). These amounts were reclassified into "Employee benefits liabilities".

IFRS 3 -- Business Combinations; and consequential amendments to IAS 38 (Impairment of Assets) and IAS 39 (Intangible Assets)

Under these standards, goodwill and intangible assets with indefinite useful lives are no longer amortised but tested for impairment annually.

The impairment tests are performed during the same period of the year by allocating goodwill and indefinite life intangible assets to cash generating units (CGUs). The Group defines its CGUs based on the way that it monitors such assets. Usually, the cash flows correspond to estimates made by management in their operating plans and business strategies covering a period of five years. They are then projected to 50 years using a steady or declining growth rate. The discount rate reflects the current assessment of the time value of money and the risks specific to the CGUs (essentially country risk) except when such risks have been included in the determination of the cash flows. Both the cash flows and the discount rates are deflated.

As per the transitional provisions, comparative financial statements have not been restated. Therefore the 2005 half-yearly report comprises impairment of goodwill of CHF 180 million whereas the 2004 half-yearly report includes goodwill amortisation of CHF 808 million and no impairment of goodwill. The changes related to intangible assets with indefinite useful lives are not material.

Intangible assets arising on acquisitions for which the agreement date is on or after 31 March 2004 are recognised separately from goodwill when they are identifiable and can be reliably measured. Intangible assets are classified as finite or indefinite life assets.

Finite life intangible assets continue to be depreciated on the basis of useful lives which are determined on the basis of the shorter of the economic or the contractual life of such assets.

IFRS 5 -- Non-current Assets Held for Sale and Discontinued Operations

IFRS 5 requires that non-current assets held for sale and related assets and liabilities be presented separately in the current section of the balance sheet and measured at the lower of fair value less cost to sell and carrying amount. Such assets shall be tested for impairment and shall no longer be depreciated. The transitional provisions require a prospective application of this standard.

The sales, expenses, pre-tax profit and income tax of discontinued operations shall also be disclosed. The Group had no discontinued operations at 30 June 2005.

IAS 1 -- Presentation of Financial Statements

The amendment to IAS 1 requires minority interests to be disclosed within equity. The presentation of the consolidated income statement, consolidated balance sheet and consolidated statement of changes in equity has been modified accordingly.

IAS 16 -- Property, Plant and Equipment (PP&E)

Depreciation of PP&E is now provided on components that have homogenous useful lives. Furthermore residual values have been taken into consideration for head offices (30%) and for distribution centres (20%). All other assets have zero residual values. Previously all the residual values were assumed to be nil.

The useful lives are now as follows :

Buildings	20–35 years vs.	25–50 years
Machinery and equipment	10–20 years vs.	10–15 years
Tools, furniture, information technology and sundry equipment	3–8 years	(unchanged)
Vehicles	5 years	(unchanged)

Useful lives and residual values are reviewed annually.

The change in useful lives and the introduction of residual values do not result in material effects on the Group financial statements. These changes have been applied prospectively as changes in accounting estimates.

IAS 21 -- The Effects of Changes in Foreign Exchange Rates

The current interpretation of the amendment to this standard restricts the treatment as net investment in a foreign operation to intra group loans granted by the parent. Those are denominated in either the functional currency (CHF) of the parent or of the foreign operation. As a result, exchange gains or losses and related hedging results that do not satisfy the aforementioned criteria are recorded in the income statement as from 1 January 2005 onwards.

The Group applies this change prospectively because it is not practicable to recalculate the impact of the change in classification of intra group loans that have been granted since several years. This change impacts the 2005 half-yearly report with a reduction of net financing cost of CHF 38 million.

IAS 39 – Financial Instruments: Recognition and Measurement and IAS 32 – Financial Instruments: Disclosure and Presentation

The Group has applied the new amendment “Cash Flow Hedge Accounting of Forecast Intragroup Transaction” on 1 January 2005, i.e. before the effective date of 1 January 2006. Indeed the Group has always applied cash flow hedge accounting for currency hedges on forecasted internal purchases of raw materials and finished goods.

The changes of IAS 32 criteria, determining when a financial instrument is a liability or equity, imply that a premium cashed on a bond issue with warrants is classified as a liability. As a result, the premium received in relation with the Turbo Zero Equity-Link bond issue has been reclassified as at 1 January 2005.

Future changes in accounting policies that may affect the Group on or after 31 December 2005

IFRIC 4 – Determining if an Arrangement contains a Lease

This interpretation requires that when an entity enters into an agreement that does not take the legal form of a lease but conveys the right to use an asset, the entity shall separate the lease payments from the other payments under the agreement if the entity has the right to control the use of the underlying asset subject to the contract. Then the entity shall determine whether the lease component of the agreement is a financial or an operating lease in accordance with IAS 17. The Group has entered into several outsourcing or take or pay agreements that may qualify under IFRIC 4 and will determine whether these contain lease arrangements.

IAS 19 – Employee Benefits – Actuarial Gains and Losses, Group Plans and Disclosures

The Group will not apply the option of recognising actuarial gains and losses in equity and will continue with its current treatment of recognising actuarial gains and losses in the income statement.

The Group will disclose the experience adjustments arising on plan assets and liabilities.

Modification of the scope of consolidation

During the interim period, the scope of consolidation has been affected by acquisitions and disposals. The principal businesses are detailed below.

Fully consolidated

Newly included:

Wagner, Germany, frozen food, 49% ^(a) (January)

^(a) The Group exercises control; further financial investments are subject to regulatory review.

Notes

1. Seasonality

The business of the Group does not present pronounced cyclical patterns, seasonal evolutions in some countries or product groups being compensated within the Group.

2. Segmental information

By management responsibility and geographic area

in millions of CHF	January/June		January/June

Nestlé Holdings (U.K.) PLC, United Kingdom	EUR 300	4.75%	4.75%	2001-2005	(a)	465
Total repayments						308

(a) Subject to an interest rate and/or currency swap that creates a liability at floating rates in the currency of the issuer.

(b) Stock Warrants and Applicable Note Securities (SWANS)

The issuer had warrants attached which gave the right to acquire Nestlé S.A. shares. The debt component (issue of the notes) was recognised under bonds for USD 243 million at inception, while the equity component (premium on warrants issued) was recognised under equity for USD 51 million.

Between March and May 2005, 29 855 warrants (99.5%) were exercised. The resulting 1 287 940 shares in Nestlé S.A. were exchanged with the bonds of Nestlé Holding, Inc. for USD 289 million (CHF 302 million). An amount of CHF 2 million was repaid in cash on 9 May 2005 for the 145 warrants not exercised.

(c) Was subject to an interest rate and/or currency swap that created a liability at floating rates in the currency of the issuer.

7. Acquisitions

in millions of CHF	January/June 2005	January/June 2004
Fair value of net assets acquired		
Property, plant and equipment	77	13
Financial assets	18	23
Intangible assets	291	—
Minority interests	(67)	(1)
Purchase of minority interests in existing participations	24	27
Net working capital	18	(23)
Financial liabilities	(21)	(2)
Employee benefits, deferred taxes and provisions	(143)	28
