Paris, 12 September 2005 – JCDecaux SA (Euronext Paris: DEC), the number two outdoor advertising company worldwide and the number one in airport advertising, announced today that it has renewed its advertising concession for John F. Kennedy International Airport and La Guardia Airport, with a new 10-year contract that also includes Newark Liberty International Airport (previously held by Clear Channel), the New Jersey – Manhattan rail link (known as PATH in the New York area) and the Port Authority Bus Terminal and George Washington Bridge Bus Station (previously held by Viacom), as well as brand new opportunities at the Port Authority's bridges, tunnels, marine terminals and other properties.

This new contract resulted from a competitive bid process that attracted several outdoor advertising competitors. The Port Authority was seeking proposals from firms with broad experience, capable of maximizing advertising revenues from its diverse portfolio of assets, including many that have never been offered to advertisers before. In addition to traditional venues such as the airports, the New Jersey – Manhattan rail link and bus terminals where JCDecaux will develop new, innovative display products, this new program will also offer new prestigious and exciting advertising locations including Port Authority Bridges and Tunnels that are crossed by more than 250 million passengers annually.

Commenting on this award, **Jean-François Decaux, Chairman of the Board and co-Chief Executive Officer** said : *"We are very pleased to continue and expand our successful collaboration with the Port Authority of New York and New Jersey. Airport advertising is a worldwide business and New York, with close to 100 million passengers per year, is the second largest airport platform. Combined with our other advertising platforms both in Europe such as London, Paris and Frankfurt, and in Asia with Hong Kong and Shanghai; JCDecaux is best positioned to take advantage of the fast growing airport market with expected annual growth of 4.1% during the next 15 years, leading to almost doubling passenger numbers from 3.9 billion last year to 7.4 billion by the end of the next decade."*
