NABI debuts its new hybrid-electric 60-BRT

NABI Bus Industries (BSE:NABI) showcased the new articulated vehicle at APTA's International Public Transportation Expo in Dallas, Texas, USA.

NABI's new 5-door vehicle utilizes advanced technology such as multiplex electronic features, a proven diesel-electric hybrid drive system, bridge-plate technology and "kneeling" for easy boarding. The driver's area is enhanced both ergonomically and in design. In spite of the large size, the bus has a turning radius that equals that of a 40-foot bus. With doors on both sides, the 60-BRT is perfect for left or right side platform boarding, typically on single-lane dedicated busways or airports.

Because many cities have a growing interest in BRT, the high-capacity vehicles and the fuel economical operation, NABI has answered the call for an attention-getting, stylish vehicle that attracts passengers, yet still appeals to operators and maintenance personnel. These sleek, aerodynamically designed 60-BRT vehicles are changing the paradigm of public transport in USA.

NABI already received 216 firm and 406 optional orders for the CNG version of the 60-BRT.
