2.5. Risks Related to Purchases of Outstanding (To Be Placed) Securities.

2.5.1. Industry risks.

Running processes of integration of alternative telecommunication companies into large international holdings.

Changes in legislation. In connection with alterations of the normative legal documents in the communications sphere, since 01.01.06 OJSC *CenterTelecom* will function as the operator of the area exchange network and join the MLD and ILD operators – OJSC *Rostelecom* and others, providing they have the corresponding license. The proceeds of OJSC *CenterTelecom* will be the payments of OJSC *Rostelecom* and other long-distance operators for zone initiation and termination of MLD and ILD calls, as well as the agent's commission settlement of accounts with customers and billing thereof, accounts receivable work, claim consideration, etc. Therefore, changes to the legislative basis of the «Communications» sphere leads to changes in technical, organizational and economical models of interoperator relationship and business processes of rendering communication services to the subscribes.

OJSC *CenterTelecom* takes into account the possible negative consequences of the mentioned risks and makes efforts to overcome such consequences.

OJSC *CenterTelecom* implements the marketing strategy, the main target of which is to keep the market share, to increase the yield of the unregulated communication services, as well as to improve the company competitiveness on the communications market.

Risks related to the change in prices of the state-regulated communication services may bring short-term lessening of demand for such services and aggravation of competition. In such circumstances OJSC *CenterTelecom* will actively promote the services rendered as per unregulated tariffs, thus preventing dramatic loss of income.

Aggravation of the situation in the industry and of the Issuer's market position may be caused by the following economic factors:

- General reduction of production output and slowing down of the economy;
- Excess of the ruble devaluation rate over the rate of tariff increase, leading to considerable growth of foreign exchange losses and appreciation of exchange debt servicing;
- Economic risks typical of the Russian Federation in general, including the level of macroeconomic instability in the country, the possibility of changes to legislation, which may lead to reduction of the Issuer's profit, or to tightening of the securities taxation scheme.

In case of adverse development, the Issuer plans to:

- use competitive advantages:

extensive network infrastructure;

high quality of service, despite the client base expansion.

- optimize the operating costs structure;
- revise the investment programme of the company;
- update the pricing and marketing policies of the company;
- modify the structure of the services rendered for the purpose of profit maximization.

OJSC *CenterTelecom* manages the risks related to the operation of the company. On the whole, the influence of the industry risks on the Issuer's activities and performance of the securities liabilities may be considered as the minimal. The company has its unified network infrastructure on the territory of Central Federal District that enables the company to render a wide range of services on the telecommunications market, preserve its competitiveness and increase the services profitability.

2.5.2. Sovereign and Regional Risks

Risks related to political and economic situation in the country (countries) and region, in which the issuer is registered as a tax-payer and/or performs the principal activity, providing that the issuer's principal activity in such a country (region) brings 10 or more percent of proceeds for the last completed accounting period preceding the finalization date of the last accounting quarter:

The Government of the Russian Federation influences the Issuer's activity taking legislative and regulative measures that may significantly affect the Issuer's financial position and performance.

The main factors of political risks occurrence are:

imperfection of the legislative basis regulating economic relations;

inefficiency of the judicial system;

power instability of the constituent entities of the Russian Federation.

The other risk factors, which may affect the Issuer's activities, also include:

- uncertainty in computation of the rates prescribed by the MAP and influence thereof on the company's operation;
- ***changes to the current legislation in the accounting sphere.***

The political situation, as well as the economic one, may be described as stable for the medium-term period.

The Russian market of telecommunication services becomes extremely competitive. Though the market of the legacy fixed communications services is, in general, divided among the regional operators, each being an absolute monopolist in rendering of such services in its own region, competition improves due to the increase in the share of new communications services, as well as due to vigorous activity of companies rendering such services.

The Central Federal District is the financial center and the place of concentration of Russian and foreign financial institutions, that is a positive factor for the Issuer's business development. This region is one of the most promising regions with developing economy. The dynamic development of the region affords ground for positive forecasting in respect of the Issuer's development.

Further economic improvement of the region will certainly have a positive effect on the Issuer's activities and its capability to meet securities liabilities.

The expected actions of the issuer in case of the adverse effect of the change in the situation in the country (countries) and region upon its business:

On the whole, the Issuer does not anticipate in the nearest future negative changes to the situation in the region and in Russia, which would affect the business and economic status of the Issuer.

However, in case of negative development of the situation in the regions of Russia and the CIS countries, the Issuer will act so as to temporally reduce the cost of the rendered services and/or expansion of the range of the services rendered.

FORECAST OF EMERGENCIES

Regional risks (*risks connected with possible military conflicts, imposing state of emergency and strikes)*

The Issuer is registered as a taxpayer and performs its main activity in the Central Federal District of Russia, where risks of military conflict occurrence, imposing state of emergency are assessed as **minimal**.

Social situation on the territory of Issuer's activity is characterized as calm. Absence of significant international conflicts, religious extremism allows performing business activity with **minimal** social and political risks.

Issuer. In case of occurrence of the said circumstances the Issuer will act pursuant to the existing legislation.

Risks connected with geographic features of the region (*natural calamities*).

Forecast of natural calamities

Though fluctuation of atmosphere circulation will continue in the 4th quarter of 2005, according to *RosHydroMet* information, no **dangerous** weather event is forecasted on the territory of Central Federal District. However, natural calamities can occur in the eastern part of Smolensk Region, Vladimir, Tula, Kursk, Orel and Kaluga Regions.

Natural fire hazards

Conditions for large-scale natural fire development on the territory of Central Federal District are absent for this period.

Earthquake

The probability that an earthquake might occur on the territory of the Central Federal District **is unlikely** in this period.

Solar and geomagnetic activity

In the 4th quarter of 2005 diminishing of solar and geomagnetic activity is forecasted. Though, low level of geomagnetic disturbances **does not exclude** certain influence on health and working capacity of working stuff and population of Central Federal District.

Climatic emergencies

All regions of Central Federal District are subject to risk of occurrence of such emergencies (hurricane, whirlwind, rainstorm, snowfall, snowstorm, heavy frost).

Temperature conditions in the 4th quarter of 2005 **will not** significantly differ from annual monthly average temperatures and in general they are expected to be near standard.

Karst processes

Danger of karst processes occurrence remains in **Moscow, Moscow Region, Tula, Kursk and Voronezh Regions**. Their activation is generally caused by noncompliance with norms of construction and maintenance of municipal underground utilities, as well as security compromise while resource development.

Risks related to the technogenic emergencies

Technogenic emergencies forecast

The general structure of the technogenic emergencies is characterized by:

serious transport accident;

fires in residential sectors and industrial facilities;

accidents on the community life support systems.

The most probable risk of the most transport accidents is anticipated: in case of **automobile transport** – within the quarter, in case of **air transport** – November, December, in case of **marine transport** – October, December.

Most emergencies of the community life support systems and fires in the residential sector is anticipated in December, of the electric systems – November – December.

Among the regions susceptible to technogenic emergencies of the local character there are **Moscow, the Moscow, Tver, Tula, Voronezh, Tambov, Kursk, Ryazan and Belgorod regions**.

The accidents of electric systems, community life support systems may lead to **substantial additional expenses of the Issuer.**

Radiation hazards

Kursk Region, Voronezh Region, Smolensk Region, Tver Region, Kaluga Region.
The working personnel and communication sites do not incur immediate danger during day-to-day operation, however, the danger of off-normal situations, including, but not limited to, the radioactivity discharge, remains.

Chemical hazards
First of all, there is a danger for such cities as **Moscow and Moscow Region,** the regions of **Bryansk, Kursk, Tambov, Tver, Tula, Ryazan, Voronezh and Yaroslavl**. The chemical hazards remain, as there is **no** guarantee of timely discovery of leakage of chemically hazardous substances (for the moment). An accident on one of the chemically hazardous sites may produce a large center of chemical contamination and bring considerable human losses.
Financial losses of the Issuer in case of radiation and chemical accidents will be **material**.

«Human factor»
The tendency for accidents and emergencies connected with the «human factor» **will remain** for the given period.
The structure of human factor impact in emergency may be presented as follows:
30% - operational imperfection;
26% - lack of knowledge and experience;
17% - errors and miscounts;
13% - inefficient knowledge application;
7% - unforeseen situations;
5% - miscellaneous;
2% - malicious actions.
Accidents and emergencies of such nature may lead to certain **material and financial losses** of the Company.

Target (program, project) **risks**
Nowadays nobody is doubtful about the necessity to introduce different target-oriented programs, projects and systems in the organizations, irrespectively of their profile. Introduction of such programs, first of all, enables the business to increase production efficiency, improve work with clients and corporate governance. However, such scheme will work, providing that introduction of the above-mentioned projects and systems **was successful**, met all the expectations. Often it is not the case.
Primary causes of failures:
1. There is a great number of programs inappropriate for the organizations where they are implemented. **Lack** of qualified specialists prevents from expert determination and selection of the necessary system products.
2. Not all the western programs are suitable for application in Russia. The cause is peculiarities of Russia, which may not be neglected – **physical structure of national organizations**. At the average, Russian organizations are much larger than those of the industrialized countries, which have few enterprises with the personnel exceeding 500 people.
For example: complex information systems of **ERP class** are developed mostly for small and medium-sized enterprise. Besides, they have defects in the sphere of scheduling algorithms and accounting.
Such risks mean equity investment in the obviously unprofitable projects.

Forecast of emergencies of socio-biological nature.
The probability of communicable diseases in the 4th quarter of
2005 remains **very high**.
Intestinal diseases are expected to become **more frequent**. With the temperature lowering, they will be accompanied by seasonal diseases - rubella, whooping cough, dysentery, typhus and others.
Flue frequency is likely to remain at the **usual seasonal level**.
Social and working conditions will contribute to the growth of socially significant diseases – neuroses and other neurotic reactions. Not only weak people, but also strong, willed individuals are susceptible to such diseases.
Epidemiological situation in respect of tuberculosis **will not change**.
The **morbidity** level is expected to remain quite high.

material effect on the Issuer's activity.

In case of the **adverse** change of the situation in the region, the Issuer will act in accordance with the legislative and normative basis regulating the legal relations arising in connection with protection of the personnel and the territory against natural and technogenic emergencies.

2.5.3. Financial risks.

The issuer's exposure to risks related to the change in the interest rates, the foreign currency exchange rate, in the context of the issuer's activities or hedging effected by the issuer with the view to reduce the adverse effect of such risks:

Development of interest rates towards growth by credit institutions is possible in case of modified economic situation in the country, as well as in case of violation by the issuer of its contractual obligations: the term of credit reimbursement, interest payment, etc., and, as a consequence, application of penal sanctions by commercial banks and increase in interest rates on credit resources usage.

The issuer's overdue borrowings indebtedness is a value of no consequence against total amount of borrowings for the third quarter. The issuer's extra costs related to penal sanctions for undue performance of the obligations have no material effect on the issuer's financial situation.

With the Central Bank of the Russian Federation reducing the refinancing rates, the issuer is operating to change the terms of the running credit agreements towards credit cost reduction. The issue of redemption of tight money is being considered.

Dependence of the issuer's financial situation, liquidity, sources of financing, performance, etc. on change of the exchange rate (currency risks):

Change of exchange rate will lead to the immediate change in the foreign currency exchange rate. OJSC *CenterTelecom* has a number of credit, commodity credit, leasing liabilities expressed in foreign currency, and substantial change of the exchange rate may affect the financial situation of the Company.

The expected actions of the issuer in case of adverse effect of the change in the exchange rate and interest rates on the issuer's activities:

In case of a substantial change in the exchange rate, with the view to minimize the impact of such risk, the issuer plans to:

- optimize the operating costs structure ;
- revise the investment program of the company;
- update the pricing and marketing policies of the company;
- modify the structure of the services rendered for the purpose of profit maximization.

Possible inflation impact on securities payments:

Until the expiration of the term of fulfillment by the Issuer of its bonded loan liabilities, the «Forecast of the Company's economic development for 2004-2010» provides for outstripping growth rate of tariffs and operating margin of the main services rendered, in comparison with the rate of inflation growth. The Issuer shall estimate the corresponding average annual inflation at the level of 10 - 12%. Such risk factor will not have material effect on the Issuer's financial performance or affect its capability to meet securities liabilities.

The inflation indexes critical for the issuer and the expected actions of the issuer, aimed at reduction of the risk caused by inflation:

According to the Issuer, the critical inflation indexes considerably exceed the inflation rate estimated for the period of 2005-2009 and constitute 30-40% per annum. With the inflation reaching the critical value, the Issuer will adequately increase the prices of its own products, lessening the adverse effect of such factor. In case inflation exceeds the specified value, the Issuer shall plan to increase the prices for the communications services, as well as to operate with the view to reduce implicit costs, take measures aimed at redemption of receivables and shorten its average term.

The indexes of the issuer's financial statements, most subject to change due to the influence of the mentioned financial risks:

The indexes of the issuer's financial accounting most subject to change due to the influence of the financial risks affecting the issuer's financial statements, the probability of the occurrence thereof and the pattern of change in the statements:

Profit-and-loss report
010 "Proceeds from sales of goods, products, work, services".
020 "Production cost of the sold goods, products, work, services"
120 "Non-operating profit"
130 "Non-operating expenses"
140 "Profit (loss) before taxation"

Probability of financial risks.

Due to the steady position of the issuer and the hard currencies, the probability of financial risks is quite doubtful at present.

Nature of changes in the statements.

The main risk affecting the Issuer's financial statements is the possibility of an abrupt change of the inflation rate against the anticipated level. The inflation rate, unless there is adequate reaction in the Issuer's business administration, may increase the production cost of the sold goods, products (work, services) shown in the financial accounting of p. No. 2 "Profit-and-loss report", pursuant to line 020, and, as the consequence, diminution of profit (loss), indicated in p. No. 2, line 140.

With the adequate reaction of the Issuer's administration to the inflation development, such inflation development will not affect the Issuer's performance. Then p. No. 2 "Profit-and-loss report" will increase the indexes under line 010 "Proceeds from sale of goods, products (work, services) and line 020 "Production cost of the sold goods, products (work, services).

2.5.4. Legal risks.

The issuer shall perform the principal activity as the long-distance operator, without any export of the communications services, or work, or goods. In this context, legal risks mostly arise, when the issuer runs its business on the domestic market that is characteristic of entrepreneurs operating on the territory of the Russian Federation.

On the foreign market the issuer's legal risks are related to the conclusion and execution of foreign trade contracts for the supply of communication equipment, work execution, service rendering.

In the sphere of exchange regulation:

Federal Law dated 18.07.2005 No. 90-FZ introduced alterations into Federal Law dated 10.12.2003 No. 173-FZ «On currency regulation and exchange control» effective since June 19, 2005. Thus, particularly, it expanded the list of the permitted exchange operations between residents (Article 9 «Currency operations between residents») and, correspondingly, expanded the terms of reference of the residents effecting currency operations (Article 14 «Rights and obligations of the residents, effecting currency operations»). It also introduced amendments into Article 16 «Reservation», Article 22 «Exchange control in the Russian Federation».

Besides, Federal Law dated 18.07.2005 No. 90-FZ «On modification of certain acts of legislature of the Russian Federation» introduced amendments into the Tax Code of the Russian Federation, concerning the specification of the procedure of transportation of currency values over the customs, specification of the functions of the customs offices in connection with the exchange control they perform.

Other federal laws in the sphere of currency regulation were not applied and did not come into force during the accounting period. The Ministry of Finance, in the Letter dated 09.08.2005 No. 05-06-03/3, clarified the order of application of the Government Regulations of the Russian Federation dated 16.05.2005 No. 302 «On the procedure of settlement of accounts and transfers between residents and non-residents of commercial credits for the term exceeding 180 calendar days in the form of advance, in the context of foreign trade activity».

In the sphere of tax regulations:

Since July 15, 2005 some essential amendments to chapter 25 «Corporate profit tax» and chapter 23 «Individual income tax» of the second part of the Tax Code of the Russian Federation, introduced by the Federal Law dated 06.06.2005 No. 58-FZ «On modification of the second part of the Tax Code of the Russian Federation and some other acts of legislature of the Russian Federation about taxes and dues», concerning the scheme of corporate profit taxation, personal income estimation by securities transactions. Some of these amendments have retroactive effect, applying to the legal relations from the previous taxable period (since January 1, 2002 and since January 1, 2005).

However, all the amendments to the tax regulations, which came into force within the accounting period, are caused only by the necessity to change the accounting policy, to adjust tax amounts, and do not expose the issuer to elevated risks.

On the whole, the alteration of the tax regulations is aimed at the more detailed regulation of legal relations in the

taxable base that shall minimize the risk of taxpayers' errors in the course of tax computation and payment. Besides, some provisions are aimed at the convergence of two systems – accounting and tax systems, elimination of the essential difference between them; that is to make fiscal accounting much easier.

Among the by-laws passed due to the above-mentioned amendments to the Tax Code of the Russian Federation, it is necessary to point out the letters of the Russian Ministry of Finance of 06.07.2005 No. 03-03-02/18 «On the order of presentation of corporate profit tax declaration, in the context of passing of the Federal Law dated 06.06.2005 No. 68-FZ» and No. 03-03-02/16 «On the order of estimation of the profit share falling on the separate subdivisions, in the context of passing of the Federal Law dated 06.06.2005 No. 68-FZ» clarifying the recalculation order for the previous accounting periods.

Among the by-laws concerning the regulation of the relations between the taxation agencies and the taxpayers, it is necessary to point out the decree of the federal tax administration dated 23.05.2005 No. MM-3-19/206@ «On confirmation of the certificate of fulfillment by the taxpayer of the obligation to pay taxes, charges, insurance contributions, penalties, and tax sanctions and instructional guidelines on filling in thereof», according to which on the 1st of June the form of such certificate came into force. Respectively, the same decree declared inoperative the forms of checking of settlement of tax, charges and contributions accounts, of informing the taxpayers on the settlement of tax, charges and contributions accounts and instructional guidelines on filling in thereof since July 1, 2005.

Thus, within the accounting period, OJSC *CenterTelecom* being a prompt taxpayer and having no overdue tax liabilities before the budgets of all levels, because of strict compliance with the tax regulations, did not run elevated risks in the context of the alteration of tax regulations.

In the sphere of customs regulations:

The sphere of customs regulations did not undergo any essential legislative modifications. Thus, the Federal Law dated 18.07.2005 No. 90-FZ «On modification of certain acts of legislation of the Russian Federation» introduced alterations into the Customs Code of the Russian Federation, concerning the specification of the customs office functions in respect of currency exchange control.

Legal risks related to modification of requirements for licensing of the issuer's principal activity or for licensing of the rights to use the objects, the circulation of which is restricted:

Pursuant to the Federal Law "On communications", the list of communications stated in the licenses and corresponding lists of license provisions shall be stipulated by the Government of the Russian Federation and are subject to annual improvement. The Government Regulation dated 18.02.2005 No. 87 states the list of communications and the list of license terms. Since that moment the licensing authority has been granting licenses in the communications sphere. Pursuant to the Decree of the President of the Russian Federation dated March 9, 2004 No.314 and the Government Regulation dated 30.06.2004 No. 318, licensing of communications activity shall be carried out by the Federal Supervision Service for Communications.

The mentioned law expanded the list of data, which is necessary to submit to the licensing authority to obtain license.

In order to extend the license term, as well as to introduce amendments related to the change of the radio-frequency spectrum and the licensed territory, the documents shall be submitted in the same scope as when the license is obtained.

Substantial legal risks, which may occur due to the change of the accounting period of juridical practice in the issues connected with the activities of OJSC *CenterTelecom*, which may affect its performance as well as the current litigation settlements, are not registered.

2.5.5. Risks related to the issuer's activities.

Substantial claims may include:

The claims the amount of which is equal to or exceeds 10 percent of the balance sheet assets of OJSC *CenterTelecom* that, as of June 30, 2005, amounts to 4 466 650 thous. rubles;

- The claims preventing the business activity or aimed at inhibition or termination thereof (claims for liquidation, for composition in bankruptcy (insolvency) of OJSC *CenterTelecom* and its subsidiaries and related companies, for assignment of assets, for challenging of rights under licenses and patents, for recovery of material tax liabilities to budget and extra-budgetary funds).

Within the accounting period, OJSC *CenterTelecom* did not participate in legal procedures, with the claim value equal to or exceeding 10 percent of the balance sheet assets.

In view of the aforesaid, it is possible to assert that there are no substantial legal risks related to OJSC *CenterTelecom* participation in current legal procedures.

However, at the present moment OJSC *CenterTelecom* is standing in court in a number of legal procedures

related to some miscellaneous aspects of its business, in which the risk of adverse judgment does not exceed the usual risk characteristic of such activities.

The risks related to inability to extend the license may result from:

1) alteration in the provisions of the law applicable to licensing;

2) restructuring of the licensing authorities.

The risks related to the issuer's possible liability for the debts of the third parties, including its subsidiaries.

The mentioned risks are not registered.

At present, the Company is not running the risk to lose consumers, whose sales volume constitutes not less than 10 percent of the total proceeds of the issuer's products (work, services) sales.

3.2.5. Markets for sales of the Issuer's products (works, services).

OJSC CenterTelecom renders services of access to the public telephone network, services of long-distance and international telephone connection, Internet and data transmission network services, communication channel lease services, wireline services, etc.

The Central Federal District which is the Company's sphere of interest, comprises 17 regions inhabited by about 20% of the RF population. According to the experts' opinion, the region accounts for 12.8% of the Russia's gross product (Moscow excluded), which corresponds to rather a high share as compared to other federal districts of Russia. According to the living standards, the region holds the 4th place among the Russian federal districts, according to per-capita income – only the seventh place. An uneven economic development of regions is typical of the CFD. The district is made up of the areas with both high maturity level – Moscow, Yaroslavl, Belgorod regions, and low maturity level – Kostroma, Ivanovo and Orel regions.

Over the recent few years, there has been a regular trend to redistribute income from different communication services to the advantage of nontraditional services, basically, cellular communication. The Central Federal District has not been an exception.

Since 1999, a share of fixed telephony in the revenue composition has been declining to the advantage of nontraditional communication services that have appeared due to the new industry technologies.

Factors that may adversely affect Issuer's sale of its goods (works, services):

- ☐ *Decline in production*
- ☐ *Decreased paying capacity of primary consumers*
- ☐ *Building up competence of alternative operators.*

Issuer's actions to mitigate the adverse effect:

1. *End of construction of multi-service networks (MSN), which provides for a significant extension of the rendered services range and amelioration of their quality at the same time.*
2. *Arrangement of package services based on up-to-date multi-service networks.*
3. *Extension of the equipped numbering capacity and increase in a number of users.*
4. *Application of open software in process improvement (especially for switching equipment).*
5. *Application of lease patterns when expanding production.*
6. *Availability of substituting services. (In particular, an IP telephony service is getting more and more widespread*

ranging communication).

7. Usage of the affiliated companies' capacities.

The way of fixed assets revaluation:

Prior to Company's aggregation on November 30, 2002, Issuer's fixed assets had not been revaluated. Fixed assets of associated companies had been balanced at their residual balance value as of November 30, 2002. However, it will be observed that some of the associated companies undertook revaluations within the period from 2000 to 2002. Due to the fact that revaluations were performed by independent companies at that moment and in different time (Voronezh, Orel, Tambov – 2000, Tula, Kaluga and Kostroma – 2001, Tver – 2000-2002) with different revaluation techniques (different valuators), the Issuer considers inappropriate to provide the data on the revaluation history for each of the associated companies within the period preceding their association.

The Company put fixed assets in the amount of 9 562 422 thousand rubles (as of September 30, 2005) in pledge under credit agreements. The encumbrance starts upon receipt of fixed assets and ends upon debt repayment of loan funds (2008). The credit agreement terms are confidential.

Current liquidity ratio	0.73	0.48

The negative index of the own current assets shows that the Issuer uses borrowed funds for implementation of its financial and economic activities. This enables the fall of own assets self-regulation ratio. The growth of permanent asset index is related to development, technical re-equipment and modernization of the telephone network aimed at the current services quality increase and provision of the new ones. Share of current assets in Company's assets structure in the analyzed period is 14.9% against 22.3 % in similar period of the previous year. It is connected with Issuer's industry specificity relating to production with a high level of capital intensiveness. Receivables prevail in current assets structure which is also connected with branch specificity. Issuer's policy in the sphere of current assets is directed to reduction of receivables and overdue debts.

Current assets financing sources are primarily raised funds which represent short-term and long-term bank credits.

Factors which can cause alterations in the policy of current assets financing:

- change of receivables level, resources level, turn-round rate of current assets;
- changes connected with amount of banking interest rates;
- change of market prices level on production supplies and other types of material assets;
- change of price level on services rendered by the Issuer.

Estimated probability of their occurrence:

- Issuer's policy on assets management in the part of receivables and resources is directed to reduction of their level and turn-round period. Negative influence of this factor on the practice of current assets financing is improbable;
- Banking credits value and refinance rate of the Central Bank of the Russian Federation tend to decrease. Negative influence of this factor on the practice of current assets financing is improbable;
- Prices on material assets used by the Issuer in business process are not subject to acute market fluctuations. Negative influence of this factor on the practice of current assets financing is improbable;

Issuer's market strategy is directed to expansion of its activity in the sectors with unregulated prices and rates. Negative influence of this factor on the practice of current assets financing is improbable.

4.5. An Analysis of Development Trends in the Area of the Issuer's Main Operations.

In the Central Federal District, the macroeconomic situation remains favourable as compared with other regions of the Russian Federation. However, the development of the economy of the Central Federal District is affected by the slackening rates of economy growth (in particular, the reducing rates of GDP growth and accelerated inflation growth) that are common for Russia.

According to L. Reiman, the communication and information technology industry's share in 2004 in this country's GDP reached 5 %. Foreign investments to the communication industry in 2004 exceeded $1.5 bln. In 2004, domestic investments to the fixed capital of the industry's businesses were up by 24.6 % and exceeded $4.1 bln.

The earnings of the communication industry in 2005 will increase by 30 % and amount to about 700 bln roubles. The volume of the information technology market in 2005 will increase by 17 % and reach 300 bln roubles. At the same time, in 2005 the volume of the investments of the industry's enterprises will amount to about 140 bln rubles.

According to a forecast by Cominfo Consulting, the total amount of the Russian telecommunication services market will, by 2006, have grown 2.6-times (as compared with 2002) amounting to over 550 bln rubles. The market for documentary telecommunications will be up 5-times due to the growth of the market for Internet access and new types of services, i. e. IP-telephony, VPN and others.

By 2006, the mobile communication market is forecasted to have grown 2.8-times due to the expansion of the customer base in regions. All analysts today agree that the further increase of the mobile communication market will be due to regions.

Over the last several years, a regular trend of redistributing a share of earnings from various types of communication services in favour of non-traditional services, mainly those of mobile communications, has been observed. The Central Federal District is no exception.

Earnings from communication services have a positive trend of growth over the industry in general.

Based on the results of JSC CenterTelecom operations in Q3, growth in the number of main phone sets was 46 478. The growth in earnings from communication services in Q3 2005 as compared with Q3 2004 is 110 %.

In future, the principal negative effect should be expected from the aggravation of the competitive situation, and especially on the part of mobile operators.

The probability of mobile operators' providing strong competition is very high, as they are actively making their way to all regional markets and expanding the range of provided services.

In future, in order to reduce the negative effect of the factors and conditions influencing the Issuer's operations, main competitive advantages are planned to be used. However, it should be noted that JSC CenterTelecom takes due account of the possible negative consequences of the said risks and makes efforts to overcome those.

National operators are the main competitors of JSC CenterTelecom. Their aggregate share, depending on the region and services type, varies from 1 to 18 %. Comincom company is successful in promoting itself on the market of the Black Earth Region (Chernozemie), and JSC Central Telegraph on that of the Moscow Region.

Corporate operators are just as dangerous. Their share is substantial on the market for long-distance

communications and Internet access, and their presence in the local-telephony segment is limited. These operators actively penetrate into the most attractive market segments. TransTeleCom is a particularly active corporate operator.

As for companies providing cellular communication services, they invade other segments of the communication services market, for instance, Internet access services.

Local operators as such are no competitors to interregional companies, since their operations are limited to individual territories; they, however, are promising partners for national and corporate operators and often provide formidable competition to the regional branches of JSC CenterTelecom on strategically important markets. IP-operators who provide formidable competition on the market for long-distance communications and Internet access deserve a separate note.

The values of the shares taken, in the Issuer's opinion, by it and by its competitors, in per cent, over the **5 last completed financial years are as follows:**

The value of the Issuer's real estate (land areas, buildings, line-and-cable communication facilities) amounted to 10 874.0 mln rubles as of September 30, 2005.

Depreciation (buildings, communication lines) amounted to
3 176.0 mln rubles as of September 30, 2005.

As it was reported earlier in report for Q2 2005, changes in the real estate value are caused by the Government of the RF's adoption, on February 11, 2005, of resolution No. 68 that approved the Regulations on the Specifics of the State Registration of Title to and Interest in Line-and-Cable Communication Facilities, which enabled the Company's branches to implement activities so as to isolate real estate from communication facilities. In reports for 2004 and Q1 2005 the value of line-and-cable communication facilities was stated based of the data of accounting statements. At the same time the authorities that effect the state registration of rights to real estate and transactions therewith and the authorities that effect technical inventory-taking so far have no unambiguous interpretation of the above resolution.

Over the reporting period, no real estate whose value would exceed 5 per cent of the balance-sheet value of the Issuer's assets was acquired and disposed of.

In the 3rd quarter of 2005, as well as during the three years preceding the end date of the accounting quarter, OJSC *CenterTelecom* did not participate in substantial legal proceedings which can (could) influence its financial and economic activities.

We additionally inform you that during the three years preceding the end date of the accounting quarter OJSC *CenterTelecom* has participated or participates as a claimant or defendant in the following legal proceedings which maximal risk of potential loss exceeded or exceeds 5 million rubles:

In the first case the court considered that claimant's statements on defendants' failure to act were not confirmed by documentary evidences; in the second case court instances established that funds for recovery of communications enterprises' expenditures were not fully provided for by federal budget for 2001 and 2002 years. The court considered that there were no grounds for satisfying the said claims in such circumstances.

OJSC *CenterTelecom* sent an appeal to the Supreme Arbitration Court of the Russian Federation on revision of these judicial deeds in the exercise of supervisory powers, but arbitrators of the Supreme Arbitration Court of the Russian Federation made decision on refusal to refer the judgments of the Arbitration Court of Moscow City and determinations of the Federal Arbitration Court of Moscow District to the Presidium of the Supreme Arbitration Court of the Russian Federation for revision in the exercise of supervisory powers.

The appeals were not satisfied by the decision dated 27.09.04, left unchanged by decision of appeals instance dated 01.02.05 and determination of cassational instance dated 26.04.05.Judicial acts were motivated by the fact that claimant's references to the circumstances stated in the recitals of decision of the Constitutional Court of the Russian Federation, not connected with the procedure of applying federal laws and court's failure to realize litigation tasks, can not be considered as newly discovered facts pursuant to p. 1 Art. 311 of the Arbitration Procedure Code of the Russian Federation.

INTRODUCTION

This Regulation on the Accounting Policy of the Organization is developed in accordance with the requirements of the laws of the RF.

For the purposes of this Regulation, the Accounting Policy of the Organization shall be understood to mean the aggregate of bookkeeping methods selected by the Organization, justified and disclosed for various users, i.e. the methods of primary observation, value measurement, current grouping and final generalization of business transactions, with the purpose of generating as prompt, complete, valid and reliable financial and managerial information as possible.

In cases where the RF system for regulatory control over accounting does not stipulate the bookkeeping method for a specific issue, the Organization, in forming the Accounting Policy, developed a corresponding accounting method based on the applicable Bookkeeping Regulations.

The accounting policy of the Organization, being the basis of the bookkeeping system, aims to ensure:

- the fulfillment of fundamental accounting principles, such as the completeness, timeliness, prudence, the priority of substance over form, consistency, rationality
- the observance of general requirements to accounting statements: completeness, materiality, neutrality, comparability, compatibility
- the reliability of the statements prepared in the Organization, i.e. accounting, tax, managerial, statistical ones
- the commonality of methods in organizing and effecting bookkeeping in the Organization in general and in its subdivisions[15]
- the prompt and flexible response of the bookkeeping system to changes in the environment of financial and economic operations, including the changes caused by modifications in legislative and regulatory acts.

This Regulation, alongside general mandatory requirements and rules, pays due regard to the specifics of the telecommunications Organization:

- the existence of internal industry-specific documents regulating the accounting process
- the existence of a substantial number of subdivisions, in a number of cases situated far from the location of the Management of the Organization.

The Regulation discloses consistently the bookkeeping methods accepted in forming the accounting policy. These methods materially impact on the evaluation and decision-making by interested users of accounting statements. Knowing how to apply these methods is required to reliably assess the financial position, cash flow or financial results of the Organization's operations.

The bookkeeping methods selected by the Organization in forming this Accounting Policy shall be approved by an Order of the Director General of the Organization and shall be applied as of January 1, 2005.

All the persons related to settling the issues regulated by the Accounting Policy shall be governed by this Regulation in their activity, i. e.:

- the management of the Organization
- the heads of regional branches and structural subdivisions responsible for arrangement and maintaining of the status of accounting in the subdivisions entrusted to them
- the employees of departments and sections who are responsible for the timely development, revision, communication of regulatory and reference information to executing subdivisions
- the employees of all departments and subdivisions who are responsible for the timely submission of source documents to the bookkeeping department
- the employees of the bookkeeping department who are responsible for the timely and quality performance of all types of accounting works and the drawing up of reliable statements of all

[15] For the purposes of this document, the subdivisions of the Organization, unless specified otherwise, shall be understood to mean its regional branches and structural subdivisions.

types
- other employees.

The Accounting Policy is formed for the year 2005 and shall not be modified except for the following cases:

- modifications in the laws of the RF or regulatory acts concerning bookkeeping
- the organization's development of new bookkeeping methods
- a material change in the operational environment as a result of re-organization, change of ownership, change in activities and so on.

Modifications to be made in the text of the Regulation on the Accounting Policy of the Organization shall be considered by the Board of Directors and approved by the Director General of the Organization.

A change in the accounting policy shall be introduced as of January 1 of the year (the beginning of the financial year) following the year it was approved in.

The Chief Accountant of the organization shall be responsible for the observance of the methodology.

In the book-keeping process, the Organization shall also apply the instructions on lines of accounting, the list of which is given in Supplement No. 2.

- the Management of the Organization
- regional branches

structural subdivisions.

1.2. The Arrangement of Accounting Departments

The concept of an **accounting department** covers a set of structural units and employees performing the operations of the collection of primary information, its processing and analysis as well as the drawing up, on its basis, reports for various user groups.

A **specialized accounting department** shall be understood to mean the Organization's structural unit performing the functions of the collection, processing and grouping of information as consolidated registers of analytical and synthetic accounting and of making entries to bookkeeping accounts. Depending on the level of the organizational structure, the following shall be included into the specialized accounting department: the bookkeeping department, the tax one, the group for consolidated statements, etc.

Functional departments (for instance, the line and cable department, the transport, the customer relationship department and so on) shall perform the functions of the collection and processing of primary information for its subsequent registration in the accounting system.

At each management level, the accounting department ensures the collection and processing of information in order to provide data to users for them to work out, justify and make decisions at their management level, as well as for provision of senior management bodies with information necessary to work out, justify and make decisions at a higher management level.

The principles of the separation of the powers and responsibilities of accounting departments at each of the three management levels (vertically) and within each management level (horizontally) shall be governed by the Regulation on the Principles of Arranging Accounting. The same Regulation shall define the structure, functions and objectives of specialized accounting departments and functional accounting ones. Duties distribution and relationships between specialized accounting departments and functional accounting ones shall be governed by the Regulation on the Principles of Arranging Accounting and the Regulation on the Document Workflow System.

The Organization's bookkeeping department, being a constituent part of the specialized accounting department and headed by the Chief Accountant, shall be charged with bookkeeping and control. The Organization's bookkeeping department shall include the subdivisions' bookkeeping departments headed immediately by the chief (senior) accountants of these subdivisions. The bookkeeping department of the Management Office of the Organization shall perform the functions of the central bookkeeping department.

For accounting purposes, costs by different types of services, works and manufactured products that are the object of costing shall be accounted for separately.

For the purposes of allocating core-operations costs to objects of costing, the Organization uses the production-process method of costs accounting.

A production process is unambiguously defined operations (a sequence of acts or the aggregate of functions and tasks) not limited in time and having a recognizable result.

For the purposes of allocating costs to objects of costing, processes shall be subdivided into core production, non-core production, auxiliary production and combined processes.

Core production processes shall include *processes performed directly for the rendering of communication services.*

Auxiliary production processes shall include *processes necessary to carry out primary and combined production processes and related indirectly to the rendering of communication services.*

Combined production processes shall include *processes necessary to carry out core production processes but not related to the rendering of communication services.*

Costs allocation bases shall be *the actual physical indicators of the Organization's production operations, the makeup of these indicators being defined in the Methodological Instructions on Expenses Accounting.*

All costs related to core activities shall be indirect ones, i. e. ones not assigned directly but distributed among objects of costing and shall be accounted for as broken down by production processes.

Costs of core activities shall be reflected on accounts 30 Core production processes and 31 Auxiliary production processes.

Costs related to non-core activities shall be accounted for on accounts 23 Auxiliary production facilities, 29 Servicing production facilities and enterprises and 44 Selling expenses as broken down by activities.

The cost value of services rendered, works performed, goods produced shall be calculated in full, without singling out managerial and commercial expenses.

Costs of combined production processes shall be reflected on account 32 Combined production processes.

© SVYAZINVEST 2004

The costs accumulated on account 31 Auxiliary production processes shall be allocated to core production processes and combined ones to account 30 Core production processes and 32 Combined production processes based on the data on allocation bases provided by production departments at the end of the reporting period.

The costs accumulated on account 30 Core production processes shall be allocated to account 20 Core production as broken down by costing objects (services) based on the data on allocation bases provided by production departments at the end of the reporting period and also to account 33 Costs of equipment operation as broken down by types of equipment of an equivalent digital network drawn up by engineering departments annually. Costs shall be allocated to equipment types in accordance with the estimated data of engineering departments on the share of equipment involved in core production processes.

The costs accumulated on account 33 Costs of equipment operation shall be allocated to account 20 Core production as broken down by costing objects (services) based on the data of engineering departments on the intensity and duration of use of each equipment type by a specific service, these data being calculated in the beginning of every year or upon material changes in the communication network topography.

For the purposes of calculating the cost value of services, works, products of non-core activities, the actual costs of services rendered, works completed and products transferred to the warehouse as accumulated on accounts 23 Auxiliary production facilities and 29 Servicing production facilities and enterprises shall be written off to account 43 Finished products (in case of turning out finished products), the corresponding production-process accounts (in case of services rendering or works performance for core activities) or account 90 Sales, subaccount 90-04 The cost value of sales for non-core activities (in case of services rendering, works performance for a third party). The debit balance of accounts 23 Auxiliary production facilities and 29 Servicing production facilities and enterprises reflects the cost value of work-in-process inventory.

The costs charged to account 32 of combined production processes Combined production processes shall be written off at the end of the reporting period to account 20 Core production in proportion to the amounts of the costs allocated to corresponding accounts.

Costs of rendering communication services as accumulated, broken down by the service type, on account 20 Core production shall be written off in full at the end of the reporting period to account 90 Sales, subaccount 90-02 Cost value of sales (for core activities) as broken down by objects of costing (by services).

The procedure for accounting for and the costing of the products (works, services) of non-core activities shall be determined by the Organization on its own, in accordance with the recommendations of industrial instructions regulating the said procedure in those industries that this type of non-core operations refers to.

The expenses of servicing production facilities and enterprises shall be allocated to the lines of their operations (sale, gratuitous transfer, rendering services to other subdivisions of the Organization) in proportion to direct expenses.

The cost of fixed assets of up to 10,000 rubles per unit, these fixed assets being written off as costs of production (selling expenses) shall, as they are issued to production, be recognized as tangible expenses.

2.7. The Procedure for Deferred Expenses Accounting

The following shall be included into deferred expenses that are recognized in the reporting period but cannot be included into the cost value of sold services, works, products of this reporting period, for instance:

Should it be impossible to specify the period within which the expense made is to be written off, the said period shall be determined by a special commission and shall be approved by the CEO of the organization (branch, structural subdivision).

For the purposes of drawing up statements, expenses related to the acquisition of software products and databases as well as expenses related to the early buyout of leased property shall be classified as other non-current assets.

For the purposes of drawing up accounting statements, the advances of a capital character shall be classified as other non-current assets.

2.9. The Procedure for Accounting for Credits and Loans Received

The organization shall convert long-term indebtedness with regard to credit and loans received to short-term one (to the corresponding subaccount of account 66 Settlements with regard to short-term credits and loans) at the moment when, under the terms of the loan and (or) credit contract, there are 365 days left before the repayment of the principal debt amount.

If the organization receives a long-term loan under the contract whose terms stipulate that the loan amount shall be repaid from time to time, then, as there are 365 days left before the repayment of the next portion of the loan, it shall be converted to the short-term portion of long-term indebtedness, to the corresponding subaccount of account 66 Settlements with regard to short-term credits and loans.

In case of concluding an agreement for the renewal of a short-term loan contract or for the postponement of the repayment deadline of the short-term portion of indebtedness with regard to a long-term loan in such a way that there will be over 365 days left before the repayment deadline of the loan or its specified portion, the indebtedness amount with regard to the loan or its partial repayment shall be converted from short-term indebtedness to long-term one (to the corresponding subaccount of account 67 Settlements with regard to long-term credits and loans).

The interest earnings due to the lender shall be accrued on a straight-line basis (monthly) in accordance with the rate stipulated in the contract. If, in accordance with the terms of the contract, interest is paid on a day other than the last day of the month, one should add to indebtedness due to the creditor the amount of interest falling on the end of the month.

For loans received in the monetary form and raised by issuing the Organization's own bills of exchange, the amount of the discount due to the bill holder shall be assigned to deferred expenses and shall subsequently be written off as operational expenses monthly, in equal portions, over the term of bill circulation.

In this case, for bills with the at sight, but not earlier clause, the supposed term of bill circulation determined in accordance with bill laws (365 (366) days plus the term from the date the bill is drawn up to the minimum date that the bill is presented for payment) shall be used as the circulation term on whose basis the discount as of the end of the reporting period shall be determined.

For loans received in the monetary form and raised by issuing the Organization's bonds, in cases where the issued bonds are sold at a price different from their face value (with a discount), the amount of the discount shall be assigned to deferred expenses and shall subsequently be written off as operational expenses monthly, in equal portions, over the term of bonds circulation.

Additional costs related to obtaining loans and credits and to the placement of borrower liabilities shall

© SVYAZINVEST 2004

be included into operational expenses in the reporting period in which the said costs were incurred.

2.10. The Procedure for Arranging Accounting for Intra-company Settlements and Information Transfer by Separate Subdivisions

For accounting for intracompany turnover, the Organization shall apply account 79 Intracompany settlements.

All financial and economic operations performed among the Organization's subdivisions shall be made on the basis of notices (advices) via the superior management level. Operations among structural subdivisions shall be made via corresponding regional branches. Operations among regional branches shall be made via the Management Office of the Organization.

2.11. The Procedure for Establishing and Using Special-Purpose Funds

The Organization shall establish no funds using the retained profit of the reporting year, excluding the funds whose establishment is provided for by the Organization's constituent documents.

The procedure for establishing and using the said funds shall be determined based on a resolution of the general meeting of the Organization's stockholders with due regard to the Law On Joint Stock Companies.

The reserve for bad debts shall be established quarterly, before accounting statements with regard to bad debts are drawn up.

The reserve for bad debts shall be established based on the results of accounts receivable inventory, and in this case the debts receivable not repaid within the time-limits stipulated by the contract and not secured with a pledge, suretyship, a banking guarantee shall be recognized as a bad debt.

Due to the fact that the individual analysis of each bad debt with regard to communication services at communication enterprises is impossible due to a large number of subscribers, the reserve shall be established for all the debts that failed to be repaid, the payment of which debts is, as of the date the reserve is established, 90 and more days overdue, and the reserve size shall be 100 per cent of the debt amount. No reserve shall be established for the debts whose payment is less than 90 days late.

4.2.2. Depreciation Charge

Depreciation for all the objects of depreciable property shall be made under the straight-line method. The selected method of depreciation charging may not be altered for the entire period that depreciation is charged for an object of depreciable property.

The useful life of intangible assets shall be approved by the CEO of the Organization based on the opinion of functional departments, under the procedure provided for by tax laws.

The classification of the fixed assets included into depreciation groups is established in the Unified Classification of Fixed Assets of OJSC CenterTelecom, as approved by an Order of the Director General of OJSC CenterTelecom.

For fixed assets not specified in depreciation groups, useful lives shall be established in accordance with the specifications or recommendations of the manufacturing organization in accordance with the opinion of functional services.

For the depreciable fixed assets being part of leased property that is included into a depreciation group, the Organization shall apply a special factor to the basic rate of depreciation, this factor not exceeding 3 and being established in accordance with the lease contract.

With regard to the depreciable fixed assets used for working in an aggressive environment and (or) with an increased number of shifts, the Organization shall apply a special factor to the basic depreciation rate, this factor not exceeding 2. The list of such fixed assets shall be established by an order of the CEO of the Organization based on the opinion of functional services.

$$K' = (1/n') \times 100\ \%,$$

where K' is the depreciation rate as a percentage of the residual value of the object of depreciable property

n' is the remaining useful life of this object of depreciable property expressed in months.

For reconstructed or upgraded fixed assets whose residual value equals zero (the object is depreciated in full), if, this in case, the maximum useful life within the depreciation group was established for this fixed asset, then an increase in the useful life shall be determined by the Company based on the technical performance (including with due regard to occupational safety requirements and other factors) of the object reconstructed (upgraded).

4.3. The Procedure for Valuating Individual Types of Property to Be Written Off (Sold)

II.Основная информация о финансово-экономическом состоянии эмитента.

2.1. Показатели финансово-экономической деятельности эмитента.

Показатели, характеризующие финансовое состояние эмитента:

Наименование показателя	9 мес. 2004 г.	9 мес. 2005 г.
Стоимость чистых активов эмитента, тыс. руб.	15203478	16015260
Отношение суммы привлеченных средств к капиталу и резервам, %	178,83	186,0
Отношение суммы краткосрочных обязательств к капиталу и резервам, %	87,55	92,68
Покрытие платежей по обслуживанию долгов, %	31,65	40,02
Уровень просроченной задолженности, %	2,00	2,04
Оборачиваемость дебиторской задолженности, раз	4,51	6,89
Доля дивидендов в прибыли, %	В годовом исчислении	В годовом исчислении
Производительность труда, руб./чел.	261 768	307 356

Для расчета приведенных показателей использовалась методика, рекомендованная Приказом ФСФР России от16.03.2005г. №05-5/пз-н.

Показатели рассчитаны по состоянию на дату окончания отчетного квартала (с использованием накопленных данных)

Сумма чистых активов эмитента за 9месяцев текущего года по сравнению с аналогичным периодом прошлого года увеличилась на 5,3 % и значительно превышает размер уставного капитала (в 2,5 раза). Разница чистых активов и уставного капитала является показателем устойчивости финансового состояния.

За 9 месяцев 2005 года изменился в сторону увеличения показатель «Отношение суммы привлеченных средств к капиталу и резервам», причем на его рост повлияло, как увеличение доли привлекаемых краткосрочных кредитов и займов, так и перевод долгосрочной задолженности по полученным кредитам и займам в состав краткосрочной в соответствии с действующим Положением по бухгалтерскому учету «Учет займов и кредитов и затрат по их обслуживанию» ПБУ 15/01 (утвержденным приказом Минфина РФ от 2 августа 2001 г. № 60н) и Положением об учетной политике ОАО «ЦентрТелеком» на 2005 год.

В результате проводимой работы по сокращению дебиторской задолженности за 9 месяцев текущего года улучшился показатель ее оборачиваемости по сравнению с соответствующим периодом прошлого года.

Описание методики (методик) определения рыночной капитализации эмитента:

Для расчета капитализации ценных бумаг взяты данные, представленные на официальном сайте НП «Фондовая биржа РТС»

Данные рассчитаны на основе двухсторонних сделок, заключенных во время торговой сессии.

Рыночная капитализация рассчитывается как произведение количества акций соответствующей категории на средневзвешенную цену одной акции этой категории, рассчитанную по 10 наиболее крупным сделкам, совершенным через организатора торговли на рынке ценных бумаг за последний месяц отчетного периода (или за 3 месяца, предшествующих завершению каждого отчетного периода (согласно Постановлению ФКЦБ России от 24.12.2003 г. №03-52/пс).

С июня 2005 года рыночная капитализация рассчитывается как произведение количества акций соответствующей категории на средневзвешенную цену одной акции этой категории, рассчитанную по 10 наиболее крупным сделкам, совершенным через организатора торговли на рынке ценных бумаг в месяце, предшествующем месяцу, в котором заканчивается последний отчетный квартал. (согласно Приказу ФСФР России от 16марта 2005 г. №05-5/пз-н).

Капитализация эмитента за 2001 год определяется как произведение количества привилегированных акций на средневзвешенную цену одной акции (по обыкновенным акциям сделок было за три месяца 3)

По предварительным прогнозам в течение периода обращения ценных бумаг эмитента, т.е. 2005 - 2009 гг. прогнозируется стабильное поступление денежных средств от текущей деятельности направленное на погашение расходов (включая выплаты по купонам и погашение облигаций эмитента 3-го и 4-го выпусков.

2.5. Риски, связанные с приобретением размещаемых (размещенных) эмиссионных ценных бумаг.

2.5.1. Отраслевые риски.

Идущие процессы интеграции альтернативных телекоммуникационных компаний в крупные

межнациональные холдинги.

Изменения в законодательной базе. В связи с изменениями нормативно-правовых документов в области связи с 01.01.06 ОАО «ЦентрТелеком» будет являться оператором сети зоновой телефонной связи и будет присоединяться к операторам МГ и МН (дальней) связи – ОАО «Ростелеком» и другим, имеющим соответствующую лицензию. Доходами ОАО «ЦентрТелеком» будут являться платежи Ростелекома и других операторов дальней связи за зоновое инициирование и завершение МГ и МН вызовов, а также агентское вознаграждение за осуществление функций по проведению расчетов с пользователями и выставление им счетов, ведение работы с дебиторами и претензионной работы и т.п. Т.о. изменения нормативной базы отрасли «Связь» приводит к изменениям технических, организационных и экономических моделей межоператорских взаимоотношений и бизнес-процессов предоставления услуг связи абонентам.

ОАО "ЦентрТелеком", учитывает возможные негативные последствия указанных рисков и предпринимает усилия по их преодолению.

ОАО "ЦентрТелеком" реализует маркетинговую стратегию, основной целью которой является сохранение доли рынка, повышение доходности от нерегулируемых услуг связи, а также повышение конкурентоспособности компании на рынке услуг связи.

Риски, связанные с изменением цен на регулируемые государством услуги связи, могут повлечь кратковременное снижение спроса на данные услуги и обострение конкуренции. В этих условиях ОАО «ЦентрТелеком» будет активно продвигать услуги, предоставляемые по нерегулируемым тарифам, тем самым не допуская существенного снижения доходов.

Ухудшение ситуации в отрасли и положения Эмитента на рынке может быть вызвано следующими экономическими факторами:

- общим падением объемов производства и снижением темпов экономического роста;
- превышением темпов девальвации рубля над темпом роста тарифов, что приведет к значительному росту отрицательных курсовых разниц и удорожанию обслуживания валютных долговых обязательств;
- экономическими рисками, присущими Российской Федерации в целом, включая уровень макроэкономической нестабильности в стране, наличие вероятности изменений в законодательстве, в результате которых возможно снижение прибыли Эмитента, либо ужесточение порядка налогообложения доходов по ценным бумагам.

В случае негативного развития ситуации Эмитент планирует:

- использовать конкурентные преимущества:

разветвленная сетевая инфраструктура;

высокое качество обслуживания, несмотря на рост клиентской базы.

- оптимизировать структуру производственных затрат;
- пересмотреть инвестиционную программу компании;
- скорректировать ценовую и маркетинговую политику компании;
- изменить структуру предоставляемых услуг в целях максимизации прибыли.

ОАО «ЦентрТелеком» управляет рисками, связанными с деятельностью компании. В целом, влияние отраслевых рисков на деятельность Эмитента и исполнение обязательств по ценным бумагам можно оценить как минимальное. У компании существует единая сетевая инфраструктура на территории ЦФО. Это позволяет оказывать широкий спектр услуг на рынке телекоммуникаций, оставаться конкурентоспособной компанией и повышать рентабельность услуг.

2.5.2. Страновые и региональные риски.

Риски, связанные с политической и экономической ситуацией в стране (странах) и регионе, в которых эмитент зарегистрирован в качестве налогоплательщика и/или осуществляет основную деятельность при условии, что основная деятельность эмитента в такой стране (регионе) приносит 10 и более процентов доходов за последний завершенный отчетный период, предшествующий дате окончания последнего отчетного квартала:

Правительство Российской Федерации оказывает влияние на деятельность Эмитента посредством

принятия законодательных и регулятивных мер, что может в значительной степени повлиять на финансовое положение и результаты деятельности Эмитента.

Основными факторами возникновения политических рисков являются:

несовершенство законодательной базы, регулирующей экономические отношения;

недостаточная эффективность судебной системы;

неустойчивость власти субъектов Российской Федерации.

К числу прочих факторов риска, которые могут повлиять на деятельность Эмитента, также относятся:

- неопределенность в образовании тарифов, устанавливаемых МАП и их влияния на операции компании;
- ***изменение действующего законодательства в области бухгалтерского учета.***

Политическую, равно как и экономическую, ситуацию в стране можно оценить как стабильную в среднесрочном периоде.

Российский рынок телекоммуникационных услуг становится чрезвычайно конкурентным. Хотя рынок услуг традиционной проводной связи в целом разделен между региональными операторами, каждый из которых в своем регионе является абсолютным монополистом по оказанию таких услуг, конкуренция усиливается за счет увеличения доли новых услуг связи, а также активной деятельности компаний, их предоставляющих.

Центральный Федеральный округ является финансовым центром и местом сосредоточения российских и зарубежных финансовых институтов, что является положительным фактором для развития деятельности Эмитента. Данный регион относится к наиболее перспективным, с быстро растущей экономикой. Его динамичное развитие дает основания делать положительный прогноз в отношении развития Эмитента.

Дальнейшее улучшение экономического состояния региона, безусловно, положительно скажется на деятельности Эмитента и благоприятно отразится на его возможностях исполнять свои обязательства по ценным бумагам.

Предполагаемые действия эмитента на случай отрицательного влияния изменения ситуации в стране (странах) и регионе на его деятельность:

Отрицательных изменений ситуации в регионе и в России в целом, которые могут негативно повлиять на деятельность и экономическое положение Эмитента, в ближайшее время Эмитентом не прогнозируется.

Однако, в случае неблагоприятного развития экономической ситуации в регионах России и странах СНГ действия Эмитента будут направлены на временное снижение стоимости предоставляемых услуг и/или расширение спектра предоставляемых услуг.

ПРОГНОЗ ЧРЕЗВЫЧАЙНЫХ СИТУАЦИЙ

Региональные риски (*риски, связанные возможными военными конфликтами, введением чрезвычайного положения и забастовками)*

Эмитент зарегистрирован в качестве налогоплательщика и осуществляет свою основную деятельность в Центральном Федеральном округе России, где риски возникновения военных конфликтов, введения чрезвычайного положения оцениваются как **минимально возможные**.

Социальная обстановка на территории деятельности Эмитента характеризуется как спокойная. Отсутствие ярко выраженных межнациональных конфликтов, религиозного экстримизма позволяет осуществлять хозяйственную деятельность с **минимальными** социально-политическими рисками.

Риск открытого военного конфликта, введение чрезвычайного положения в регионе **не может быть оценен Эмитентом**. В случае наступления указанных событий Эмитент будет действовать в соответствии с действующим законодательством.

Риски, связанные с географическими особенностями региона (*чрезвычайные ситуации природного характера*).

Прогноз природных чрезвычайных ситуаций

Хотя неустойчивость циркуляции атмосферы сохранится и в 4 квартале 2005 года по данным Росгидромета **опасных** метеорологических явлений (ОМЯ) на территории ЦФО не прогнозируется. Однако природные ЧС **территориального уровня** могут возникнуть в восточной части Смоленской области, Владимирской, Тульской, Курской, Орловской и Калужской областях.

Природные пожары

Условия для возникновения крупных природных пожаров на территории ЦФО в данный период отсутствуют.

Землетрясение

Вероятность возникновения землетрясения на территории ЦФО в данный период **маловероятна.**

Солнечная и геомагнитная активность

В 4 квартале 2005г. прогнозируется уменьшение солнечной и геомагнитной активности. Однако низкий уровень геомагнитных возмущений **не исключает** определенного влияния на самочувствие и работоспособность работающего персонала и населения ЦФО.

Климатические

Риску возникновения подобных ЧС (ураганы, смерчи, ливни, снегопады, метели, сильные морозы) подвержены **все области ЦФО**.

Температурный режим в 4 квартале 2005г. **не будет** существенно отличаться от ежегодных среднемесячных температур и в целом ожидается близким к норме.

Карстовые процессы

Опасность проявления карстовых процессов остается в **г. Москве, Московской, Тульской, Курской и Воронежской областях.** Их активизация вызывается, как правило, несоблюдением норм строительства и эксплуатации городских подземных коммуникаций, а также нарушением требований безопасности при разработке полезных ископаемых.

Риски, связанные с чрезвычайными ситуациями техногенного характера

Прогноз техногенных чрезвычайных ситуаций

В общей структуре техногенных ЧС будут преобладать:

крупные транспортные аварии;

пожары в жилом секторе и на промышленных объектах;

аварии на коммунальных системах жизнеобеспечения.

Наиболее вероятный риск возникновения наибольшего количества аварий на транспорте ожидается **на автомобильном** – в течении квартала, **на авиационном** – ноябрь, декабрь, **на морском** – октябрь, декабрь.

Наибольшее количество ЧС на коммунальных системах и пожаров в жилом секторе ожидается в декабре, на электроэнергетических системах – ноябре – декабре.

Наиболее высокая степень уязвимости к техногенным ЧС **локального** характера остается в **Моск Московской области, Тверской, Тульской, Воронежской, Тамбовской, Курской, Рязанской, Белгородской** областях.

Аварии на электроэнергетических системах, коммунальных системах жизнеобеспечения могут повлечь **существенные дополнительные финансовые расходы Эмитента.**

Радиационная опасность

Радиационно-опасными районами являются районы размещения объектов, использующих в своей деятельности ядерные реакторы: **Москва, Курская область, Воронежская область, Смоленская область, Тверская область, Калужская область**.

Работающему персоналу и объектам связи непосредственной угрозы в повседневной деятельности нет, однако угроза возникновения нештатных ситуаций, в том числе и с выбросом радиоактивных веществ, продолжает оставаться.

Химическая опасность

Риску подвержены в первую очередь г. **Москва и Московская область, Брянская, Курская, Тамбовская, Тверская, Тульская, Рязанская, Воронежская и Ярославская** области. Угроза возникновения химической опасности остается, так как полной гарантии своевременного определения начала утечки

химически опасных веществ (по состоянию на сегодняшний день) **не существует**. При аварии на одном из химически опасных объектов может возникнуть большой очаг химического заражения (след) и людские потери при этом могут оказаться весьма значительными.

Финансовые потери для Эмитента при возникновении радиационных и химических аварий будут **очень существенными**.

«Человеческий фактор»

Тенденция возникновения аварий и ЧС связанных с «человеческим фактором» в данный период **сохранится**.

Структура влияния человеческого фактора в ЧС выглядит следующим образом:

30% - нарушение правил эксплуатации;

26% - недостаток знаний и отсутствие опыта;

17% - ошибки и просчеты;

13% - неумение использовать знания;

7% - непредвиденные ситуации;

5% - прочее;

2% - умышленные.

Аварии и ЧС подобного характера могут повлечь определенные **материальные и финансовые потери** Общества.

Целевые (программные, проектные) **риски**

Сегодня никто не сомневается в необходимости внедрения различных целевых программ, проектов и систем в организациях, вне зависимости от профиля их деятельности. Их внедрение позволяет бизнесу в первую очередь повысить эффективность производства, улучшить работу с клиентами и управлением компании. Однако все это справедливо лишь в том случае, если внедрение подобных проектов, систем **прошло удачно**, оправдав возложенные надежды. Зачастую бывает иначе.

Основные причины неудач:

1. Наличие множества программ, не предназначенных для организаций на которых они внедряются. **Отсутствие** квалифицированных специалистов не позволяет грамотно определить и подобрать необходимые системные продукты.

2. Не все западные программы подходят для применения в России. Это связано с российской спецификой, которую нельзя не учитывать – это **физическая структура отечественных организаций**. В России они в среднем гораздо крупнее, чем в развитых странах, где совсем немного предприятий, на которых работает свыше 500 человек.

Например: сложные информационные системы **ERP-класса** разработаны в основном для мелких и средних предприятий. Кроме того, они имеют недостатки в области алгоритмов планирования и функциях бухучета.

Риски подобного характера – вложение собственных средств зачастую в заведомо убыточные проекты.

Прогноз чрезвычайных ситуаций биолого-социального характера

Вероятность возникновения инфекционных заболеваний в 4 квартале 2005 года остается **очень высокой**.

Ожидается **увеличение** кишечных заболеваний. К ним, с приходом холодов, присоединятся «сезонные» заболевания - краснуха, коклюш, дизентерия, тиф и прочие.

Заболеваемость гриппом вероятнее всего будет находится на **обычном сезонном уровне**.

Социально-бытовые и производственные условия будут способствовать увеличению количества социально-значимых заболеваний – неврозов и прочих невротических реакций. Им подвержены не только слабые, но и сильные, волевые люди.

Эпидемиологическая обстановка по туберкулезу **не изменится** .

Сохранится высокий уровень **смертности** населения.

Чрезвычайные ситуации БСХ, в случае их возникновения, будут иметь локальный характер и существенного влияния на деятельность Эмитента **не окажут**.

Действия Эмитента в случае **неблагоприятного** изменения ситуации в регионе (области) будет осуществляться в соответствии с законодательной и нормативной правовой базы, регулирующей правоотношения, возникающие при защите персонала и территорий от ЧС природного и техногенного характера.

2.5.3. Финансовые риски.

Подверженность эмитента рискам, связанным с изменением процентных ставок, курса обмена иностранных валют, в связи с деятельностью эмитента либо в связи с хеджированием, осуществляемым эмитентом в целях снижения неблагоприятных последствий влияния вышеуказанных рисков:

Изменение процентных ставок кредитными организациями, в сторону увеличения, возможно в случае изменения экономической ситуации в стране, а также в случае нарушения эмитентом договорных обязательств: сроков возврата кредита, уплаты процентов и пр., и как следствие, применение коммерческими банками штрафных санкций и увеличение процентных ставок за пользование кредитными ресурсами.

Сумма просроченной задолженности эмитента по заёмным средствам по отношению к общей величине заёмных средств за третий квартал является несущественной величиной. Дополнительные расходы эмитента, связанные со штрафными санкциями за несвоевременное исполнение обязательств, не оказывают какого-либо существенного влияния на финансовое состояние эмитента.

В условиях уменьшения ЦБ РФ ставок рефинансирования эмитентом реализуются мероприятия по изменению условий действующих кредитных договоров и соглашений в сторону уменьшения стоимости кредитов. Прорабатываются вопросы по досрочному погашению дорогих кредитов.

Подверженность финансового состояния эмитента, его ликвидности, источников финансирования, результатов деятельности и т.п. изменению валютного курса (валютные риски):

Изменение валютного курса приведёт к немедленному изменению курса обмена иностранных валют. ОАО «ЦентрТелеком» имеет ряд обязательств по кредитам, товарным кредитам, лизингу выраженных в иностранной валюте и значительное изменение валютного курса может оказать влияние на финансовое состояние Общества.

Предполагаемые действия эмитента на случай отрицательного влияния изменения валютного курса и процентных ставок на деятельность эмитента:

В случае существенного изменения валютного курса, с целью уменьшения влияния данного риска эмитент предполагает:

- оптимизировать структуру производственных затрат;
- пересмотреть инвестиционную программу компании;
- увеличить стоимость тарифов на оказываемые услуги связи;
- скорректировать ценовую и маркетинговую политику компании;
- изменить структуру предоставляемых услуг в целях максимизации прибыли.

Возможное влияние инфляции на выплаты по ценным бумагам:.

До конца срока исполнения Эмитентом своих обязательств по облигационным займам, «Прогнозом экономического развития Общества на период 2004-2010 гг.» предусмотрен опережающий темп роста тарифов и операционной маржи на основные оказываемые услуги по сравнению с темпами роста инфляции. Соответствующая среднегодовая инфляция оценивается Эмитентом на уровне 10 - 12%. Данный фактор риска не окажет существенного влияния на финансовые показатели деятельности Эмитента и не скажется на его способности исполнять обязательства по ценным бумагам.

Критические для эмитента значения инфляции и предполагаемые действия эмитента по уменьшению риска, вызванного инфляцией:

По мнению Эмитента, критические значения инфляции лежат значительно выше величины инфляции прогнозируемой на 2005-2009 года и составляют 30-40% годовых. При достижении критических значений инфляции Эмитент будет производить адекватное увеличение цен на собственную продукцию, уменьшая при этом негативное влияние вышеназванного фактора. В случае если значение инфляции превысит указанные значения, Эмитент планирует увеличить цены на реализуемые услуги связи, а также провести мероприятия по сокращению внутренних издержек, принять меры по снижению дебиторской задолженности и сокращению ее средних сроков.

Показатели финансовой отчетности эмитента, наиболее подверженные изменению в результате влияния указанных финансовых рисков:

Показатели финансовой отчетности эмитента, наиболее подверженные изменению в результате влияния финансовых рисков, влияющих на показатели финансовой отчетности эмитента, вероятность их возникновения и характер изменений в отчетности:

Отчет о прибылях и убытках
010 "Выручка по продаже товаров, продукции, работ, услуг".
020 "Себестоимость проданных товаров, продукции, работ, услуг"
120 "Внереализационные доходы"
130 "Внереализационные расходы"
140 "Прибыль (убыток) до налогообложения

Вероятность возникновения финансовых рисков.

Вероятность возникновения в настоящее время финансовых рисков из-за стабильного состояния эмитента, а также относительно стабильного состояния твёрдых валют невелика.

Характер изменений в отчетности.

Основным риском, влияющим на финансовую отчетность Эмитента, является возможность резкого изменения темпов инфляции от прогнозируемого уровня. Рост инфляции, если не последует адекватная реакция в управлении деятельностью Эмитента, может вызвать увеличение себестоимости проданных товаров, продукции (работ, услуг) отражаемых в бухгалтерской отчетности ф. № 2 "Отчет о прибылях и убытках" по строке 020 и как следствие, уменьшение прибыли (убытков) отражаемых в ф. № 2 по строке 140.

При осуществлении адекватной реакции руководством Эмитента на рост инфляции, ее увеличение может не повлиять на результаты деятельности. Тогда в ф. № 2 "Отчет о прибылях и убытках" будут увеличены показатели по стр. 010 "Выручка от продажи товаров, продукции (работ, услуг) и строке 020 "себестоимость проданных товаров, продукции (работ, услуг).

2.5.4. Правовые риски.

Эмитент осуществляет основную деятельность в качестве оператора связи, не осуществляя при этом экспорта оказываемых им услуг связи, равно как и работ или товаров. В связи с этим правовые риски имеют место, в основном, при осуществлении эмитентом своей деятельности на внутреннем рынке, что характерно для большинства субъектов предпринимательской деятельности, работающих на территории Российской Федерации.

На внешнем рынке правовые риски эмитента связаны с заключением и исполнением внешнеторговых контрактов на поставку оборудования связи, выполнение работ, оказание услуг.

В сфере валютного законодательства:

Федеральным законом от 18.07.2005 № 90-ФЗ были внесены изменения в Федеральный закон от 10.12.2003 № 173-ФЗ «О валютном регулировании и валютном контроле», вступивший в силу 19 июня 2005г. Так, в частности, расширен перечень разрешенных валютных операций между резидентами (статья 9 «Валютные операции между резидентами») и, соответственно, расширен и дополнен круг полномочий резидентов при осуществлении валютных операций (статья 14 «Права и обязанности резидентов при осуществлении валютных операций»). Внесены также коррективы в статью 16 «Резервирование», статью 22 «Валютный контроль в Российской Федерации».

Кроме того, Федеральным законом от 18.07.2005 № 90-ФЗ «О внесении изменений в некоторые законодательные акты Российской Федерации» были внесены изменения в Таможенный кодекс Российской Федерации, касающиеся уточнения порядка перемещения через таможенную границу валютных ценностей, уточнения функций таможенных органов в связи с осуществлением ими валютного контроля.

Другие федеральные законы в области валютного регулирования в отчетном периоде не принимались и не вступали в силу. Минфин в письме от 09.08.2005 № 05-06-03/3 разъяснил порядок применения постановления Правительства Российской Федерации от 16.05.2005 № 302 «О порядке осуществления расчетов и переводов между резидентами и нерезидентами коммерческих кредитов на срок более 180 календарных дней в виде предварительной оплаты в связи с осуществлением внешнеторговой деятельности».

В сфере налогового законодательства:

С 15 июля 2005г. вступили в силу некоторые значительные изменения главы 25 «Налог на прибыль организаций» и главы 23 «Налог на доходы физических лиц» части второй Налогового кодекса Российской Федерации, внесенные Федеральным законом от 06.06.2005 № 58-ФЗ 2О внесении изменений в часть вторую Налогового кодекса Российской Федерации и некоторые другие законодательные акты Российской Федерации о налогах и сборах», касающиеся порядка налогообложения прибыли организаций, определения

доходов физических лиц по операциям с ценными бумагами. Часть из этих поправок имеет обратную силу, распространяясь на правоотношения, возникшие в более ранние налоговые периоды (с 1 января 2002 г. и с 1 января 2005г.).

Однако все вступившие в силу в отчетном периоде изменения налогового законодательства связаны только с необходимостью изменения учетной политики, корректировки сумм налогов и не несут для эмитента повышенных рисков.

В целом, изменения налогового законодательства направлены на более детальную регламентацию налоговых правоотношений, уточнение состава расходов и доходов, учитываемых при определении налогооблагаемой базы, что должно миниминизировать риск ошибок налогоплательщиков при исчислении и уплате налогов. Кроме того, некоторые положения направлены на сближение двух учетных систем – бухгалтерской и налоговой, устранение их существенных различий, что должно упростить налоговый учет.

Из подзаконных актов, изданных в связи с вышеуказанными изменениями Налогового кодекса Российской Федерации, можно назвать письма Минфина России от 06.07.2005 № 03-03-02/18 «О порядке представления деклараций по налогу на прибыль организаций в связи с принятием Федерального закона от 06.06.2005 № 68-ФЗ» и № 03-03-02/16 «О порядке определения доли прибыли, приходящейся на обособленные подразделения, в связи с принятием Федерального закона от 06.06.2005 № 68-ФЗ», разъясняющие порядок пересчета за прошедшие отчетные периоды.

Из подзаконных актов, касающихся регламентации взаимоотношений налоговых органов и налогоплательщиков, следует назвать приказ Федеральной налоговой службы от 23.05.2005 № ММ-3-19/206@ «Об утверждении справки об исполнении налогоплательщиком обязанности по уплате налогов, сборов, страховых взносов, пеней и налоговых санкций и методических указаний по их заполнению», в соответствии с которым с 1 июля введена форма такой справки. Соответственно, этим же приказом с 1 июля 2005г. признаны утратившими силу формы по сверке расчетов по налогам, сборам, взносам, информированию налогоплательщиков о состоянии расчетов по налогам, сборам, взносам и методические указания по их заполнению.

Таким образом, в отчетном периоде ОАО «ЦентрТелеком», являющийся добросовестным налогоплательщиком и не имеющий просроченной задолженности по налогам и сборам в бюджеты всех уровней вследствие соблюдения и правильного применения норм налогового законодательства, не имел повышенных рисков в связи с изменением налогового законодательства.

В сфере таможенного законодательства:

В сфере таможенного регулирования не произошло каких-либо существенных изменений законодательства. Так, Федеральным законом от 18.07.2005 № 90-ФЗ «О внесении изменений в некоторые законодательные акты Российской Федерации» были внесены изменения в Таможенный кодекс Российской Федерации, касающиеся уточнения функций таможенных органов в связи с осуществлением ими валютного контроля.

Правовые риски, связанные с изменением требований по лицензированию основной деятельности эмитента либо лицензированию прав пользования объектами, нахождение которых в обороте ограничено:

В соответствии с Федеральным законом "О связи" перечень наименований услуг связи, вносимых в лицен[redacted], и соответствующие перечни лицензионных условий устанавливаются Правительством РФ и ежегодно уточняются. Постановлением Правительства РФ от 18.02.2005 № 87 утверждены перечень наименований услуг связи и перечень лицензионных условий. С этого момента лицензирующим органом выдаются лицензии в области связи. В соответствии с указом Президента РФ от 9 марта 2004 № 314 и постановлением Правительства РФ от 30.06.2004 № 318 лицензирование деятельности в области связи осуществляет Федеральная служба по надзору в сфере связи.

Указанным законом расширен перечень информации, который представляется в лицензирующий орган для получения лицензии.

Для продления срока действия лицензии, а также внесения изменений и дополнений, связанных с изменением радиочастотного спектра и территории действия лицензии, документы представляются в том же объеме, что и при получении.

Существенные правовые риски, могущие возникнуть в связи с изменением в отчётном периоде судебной практики по вопросам, связанным с деятельностью ОАО «ЦентрТелеком», которые могут негативно сказаться на результатах его деятельности, а также на результаты текущих судебных процессов, отсутствуют.

2.5.5. Риски, связанные с деятельностью эмитента.

Считаем, что к существенным искам могут быть отнесены:

иски, цена которых равна или превышает 10 процентов балансовой стоимости активов ОАО «ЦентрТелеком»,

что на 30 июня 2005 года составляет 4 466 650 тыс. руб.;

- иски, которые препятствуют осуществлению хозяйственной деятельности или направлены на её запрещение или прекращение (иски о ликвидации, о признании ОАО «ЦентрТелеком» и его дочерних и зависимых обществ несостоятельными (банкротами), об отчуждении имущества (активов), об оспаривании прав из лицензий, патентов, о взыскании задолженности по налогам и сборам в бюджет и внебюджетные фонды в существенном размере).

В отчётном периоде в судебных процессах, цена которых была бы равна или превышала 10 процентов балансовой стоимости активов, ОАО «ЦентрТелеком» участия не принимало.

В связи с вышеизложенным можно утверждать, что существенные правовые риски, связанные с участием ОАО «ЦентрТелеком» в текущих судебных процессах, отсутствуют.

Между тем в настоящее время ОАО «ЦентрТелеком» является стороной в ряде судебных процессов, которые касаются текущих вопросов в его деятельности и риск неблагоприятного решения по которым не превышает обычного для такого рода деятельности.

Риски, связанные с отсутствием возможности продлить действие лицензии могут быть связаны:

1) с изменением норм действующего законодательства в области лицензирования;

2) с реорганизацией лицензирующих органов.

Риски, связанные с возможной ответственностью эмитента по долгам третьих лиц, в том числе его дочерних обществ.

Указанные риски отсутствуют.

В настоящее время в Обществе не существует риска потери потребителей, на оборот с которыми приходится не менее чем 10 процентов общей выручки от продажи продукции (работ, услуг) эмитента.

ОАО «ЦентрТелеком» - один из крупнейших российских операторов телекоммуникаций. Оказывает другим операторам услуги по присоединению к сети связи общего пользования.

В условиях конкуренции компания ведёт активную рыночную политику: сохраняя доминирующее положение в секторе стационарной телефонии, наращивает объёмы продаж новых услуг, тарифы на которые не регулируются государством.

В секторе традиционной телефонии доля ОАО «ЦентрТелеком» по доходам в целом и во всех регионах сохраняется на уровне выше 75 %, имеет невысокий темп снижения. Доля Общества на рынке местной связи составляет 90,6%, доля рынка по доходам от дальней связи составляет 84%. При планируемых компанией темпах развития услуг позиция в секторе традиционных услуг будет сохранена.

В сегменте рынка услуг по доступу к Интернет конкуренция особенно сильна. Региональные филиалы ОАО «ЦентрТелеком» пока удерживают лидирующие позиции, их услугами пользуются в среднем 60% корпоративных пользователей и около 70% в секторе «население». Доля ОАО «ЦентрТелеком» на рынке услуг Интернет в ЦФО составляет порядка 58 %.

В отчетном квартале изменений, касающихся филиалов не происходило.

3.2.2. Основная хозяйственная деятельность эмитента.

Основная хозяйственная деятельность ОАО «ЦентрТелеком» - предоставление телекоммуникационных услуг связи в Центральном федеральном округе.

Доля доходов от предоставления услуг связи (доходов от основной деятельности) в общей сумме выручки за 3 квартал 2005 года (отчетный квартал) составляет 98,48 %.

Доля доходов от услуг связи в выручке, %	98.48

ОАО «ЦентрТелеком» ведёт свою основную деятельность на территории Российской Федерации.

Виды услуг связи, обеспечивающие более 10% выручки:

- предоставление местного телефонного соединения (разговора) – 46,71 %;
- предоставление междугородного и международного телефонного соединения (разговора) – 33,60 %.

9	Прочие услуги связи (непрофильные виды деятельности)	26,28
10	Доходы от прочей реализации (непрофильные виды деятельности)	113,75

Сезонность в предоставлении услуг связи проявляется в увеличении в летний период междугородных и международных телефонных соединений, а также в увеличении количества передаваемых телеграмм, и в уменьшении телефонных соединений с повремённой системой оплаты.

Рост выручки по местной телефонной связи (городской и сельской) на 28,93% в текущем году по сравнению с соответствующим периодом прошлого года произошел за счет увеличения тарифов на предоставление этих услуг связи абонентам ОАО «ЦентрТелеком» и увеличения объема предоставляемых услуг (прироста количества основных телефонных аппаратов). Значительный прирост выручки (33,09% и 43,97%) показали такие подотрасли связи как радиосвязь, радиовещание, телевидение, спутниковая связь и предоставление новых видов услуг связи, т.к. Общество с каждым годом уделяет все большее внимание развитию современных, прогрессивных и востребованных услуг связи.

Структуру затрат по услугам связи, на производство и продажу которых приходится не менее 10 процентов общего объёма выручки (по ОАО «ЦентрТелеком» - это предоставление местного телефонного соединения и предоставления междугородного и международного телефонных соединения), нет возможности представить, поскольку в филиалах Общества данная информация не отражается в необходимом разрезе статей затрат.

Имеющие существенное значение новые виды продукции (работ, услуг), предлагаемые эмитентом на рынке его основной деятельности, в той степени, насколько это соответствует общедоступной информации о таких видах продукции (работ, услуг):

В 2004 году началась и в 2005 году продолжается активная работа по созданию Центров обработки вызовов, на базе которых планируется оказание новых услуг, таких как: телемаркетинг, HelpDesk, поддержка карточных платформ. 3.2.5. Рынки сбыта продукции (работ, услуг) эмитента.

Основной деятельностью эмитента на рынке Центрального федерального округа (ЦФО) является предоставление услуг связи. ОАО «ЦентрТелеком» предоставляет услуги по доступу к телефонной сети общего пользования, услуги междугородной и международной телефонной связи, услуги Интернет и услуги сети передачи данных, услуги по аренде каналов, услуги проводного вещания и др.

В Центральный федеральный округ, который является сферой сосредоточения интересов Общества, входит 17 регионов, где проживает около 20 процентов населения РФ. Доля округа в валовом продукте России (без учета Москвы) оценивается экспертами на уровне 12,8%, что соответствует достаточно большому удельному весу по сравнению с другими федеральными округами России. По уровню жизни округ занимает 4-ое место среди Российских федеральных округов, а по доходам на душу населения - только седьмое. Для ЦФО характерно неравномерное экономическое развитие регионов. Округ объединяют регионы как с высоким уровнем развития – Московская, Ярославская, Белгородская области, так и с низким – Костромская, Ивановская и Орловская области.

В течение последних нескольких лет наблюдается закономерная тенденция перераспределения доли доходов от различных видов услуг связи в пользу нетрадиционных услуг, в основном, мобильной связи. Не стал исключением и Центральный федеральный округ.

Начиная с 1999 года, доля фиксированной телефонии в структуре доходов начала снижаться в пользу нетрадиционных услуг связи, которые появились благодаря новым технологиям в отрасли.

Факторы, которые могут негативно повлиять на сбыт эмитентом его продукции (работ, услуг):

спад производства

снижение платежеспособности основных потребителей

нарастающая конкуренция со стороны альтернативных операторов.

Действия эмитента по уменьшению негативного влияния:

1. *Завершение строительства МСС (мультисервисных сетей), что дает возможность существенно расширить спектр предоставляемых услуг и одновременно улучшить их качество.*

2. *Формирование «пакетных» услуг на базе современных мультисервисных сетей.*
3. *Расширение задействованной номерной емкости и увеличение числа абонентов.*
4. *Использование открытого программного обеспечения в технологических процессах (особенно для коммутационного оборудования).*
5. *Использование лизинговых схем в процессе расширения производства.*
6. *Наличие услуг-заменителей. (В частности, в настоящее время все большее распространение получает услуга IP-телефонии, которая при определенном изменении конъюнктуры рынка может выступить заменой услуги традиционной дальней связи).*
7. *Использование потенциала дочерних компаний.*

3.2.6. Сведения о наличии у эмитента лицензий.

Сеть связи ОАО «ЦентрТелеком» постоянно совершенствуется. Строятся новые электронные станции и узлы коммутации, создаются цифровые линии связи, организуются радиорелейные цифровые линии. Емкость цифровых АТС от общей монтированной емкости составляет по оперативным данным на 01.10.2005г. 49,5%. Развитие сети за счет установки электронных АТС отечественного и зарубежного производства позволяет помимо увеличения емкости сети, расширять спектр предоставляемых современных услуг связи, таких как Интернет, ISDN, передача данных и т.д.

Из общего количества монтированной емкости сети общего пользования ОАО "ЦентрТелеком", городские телефонные номера составляют 85%, номера сельских АТС – 15%. Это свидетельствует о преобладании в структуре местной связи компании городской телефонной сети.

Линейно-кабельные сооружения местной сети связи ОАО «ЦентрТелеком» создаются и используются для предоставления услуг в рамках действующих лицензий. Общая протяженность кабельных сетей в настоящий момент составляет 736,765 тыс. км и постоянно наращивается, из них с волоконно-оптическим кабелем 5,861 тыс. км.

Междугородная связь

ОАО "ЦентрТелеком" предоставляет услуги междугородной и международной связи на основе договоров с ведущим оператором дальней связи России ОАО "Ростелеком".

Коммутация трафика между местной телефонной сетью и магистральной сетью Ростелекома осуществляется автоматическими междугородными станциями (АМТС). В настоящий момент в ОАО «ЦентрТелеком» эксплуатируется 26 АМТС.

Для организации межстанционной и внутризоновой связи используются как волоконно-оптические, так и радиорелейные линии связи.

Протяженность внутризоновых линий передачи по оперативным данным на 01.10.2005 г. составляет 32295,5 км, из них волоконно-оптических линий передачи – 13414,85 км, что является базой для обеспечения высококачественных цифровых каналов и соединительных линий. Применяются только сертифицированные и отвечающие самым высоким требованиям волоконно-оптические кабели. За 3 квартал 2005 г. введено в эксплуатацию 185,5 км внутризоновых ВОЛС.

Все районные центры и города областного подчинения имеют выход на автоматическую междугородную телефонную связь. Компания самостоятельно выставляет счета за услуги дальней связи своим абонентам, собирает плату за предоставленные услуги и производит расчеты с ОАО «Ростелеком» за пропуск трафика дальней связи.

Способ проведения переоценки основных средств:

До укрупнения компании, произошедшего 30 ноября 2002 г., переоценка основных средств эмитента не производилась. Основные средства присоединенных компаний принимались на баланс по своей остаточной балансовой стоимости на 30 ноября 2002 г. Однако следует отметить, что в некоторых из присоединенных компаний в период с 2000 по 2002 год переоценки действительно проводились. В силу того, что переоценки проводились независимыми на тот момент компаниями, а также по причине разного времени (Воронеж, Орел, Тамбов – 2000 год, Тула, Калуга и Кострома – 2001 год, Тверь – 2000-2002 год) и метода проведения оценок (разные оценщики) эмитент считает нецелесообразным приводить подробные данные по истории переоценок в каждой из присоединенных компаний в период до присоединения.

По состоянию на 01.01.2004г. Общество не переоценивало основные средства.

Общество передало в залог под кредитные договора основных средств на сумму 9 562 422 тыс.руб. (по состоянию на 30.09.05г.). Обременение возникает с момента получения кредитных средств, заканчивается в момент погашения задолженности по кредитным средствам (2008 год). Условия кредитных договоров носят конфиденциальный характер.

4.1.2.Факторы, оказавшие влияние на изменение размера выручки от продажи эмитентом товаров, продукции, работ, услуг и прибыли (убытков) эмитента от основной деятельности.

Год	**Изменение размера выручки,** тыс. руб. (3 кв.2005г-3 кв. 2004г.)	**Факторы, оказавшие влияние на изменение размера выручки** *(Влияние инфляции, изменение курсов иностранных валют, решения государственных органов, иные экономические, финансовые, политические и прочие факторы)*
3 кв.2005г.	720 603,7	За счет увеличения объема основных услуг – 17,7 % За счет повышения тарифов и других факторов – 82,3 %

Увеличение размера выручки 3 квартала текущего года по отношению к соответствующему периоду прошлого года связано с увеличением доходов от основной хозяйственной деятельности (увеличение объема основных услуг, повышение тарифов на услуги связи).

4.2. Ликвидность эмитента, достаточность капитала и оборотных средств.

Наименование показателя	9 мес. 2004 г.	9 мес. 2005 г.
Собственные оборотные средства, тыс. руб.	-16741591	-21741196
Индекс постоянного актива	2,10	2,36
Коэффициент текущей ликвидности	0,73	0,48
Коэффициент быстрой ликвидности	0,52	0,28
Коэффициент автономии собственных средств	0,37	0,36

Для расчета приведенных показателей использовалась методика, рекомендованная

Приказом Федеральной службы по финансовым рынкам от 16.03.05 г. №05-5/пз-н.

Показатели рассчитаны по состоянию на дату окончания отчетного квартала (с использованием накопленных данных)

Отрицательное значение собственных оборотных средств свидетельствует о том, что для осуществления финансово- хозяйственной деятельности эмитент пользуется привлеченными средствами. Это сказывается на снижении коэффициента автономии собственных средств. Рост индекса постоянного актива вызван расширением, техническим перевооружением и модернизацией телефонной сети, направленными на улучшение качества услуг связи и предоставление новых услуг связи. Сокращение общей величины оборотных активов, в основном, за счет сокращения дебиторской задолженности, в отчетном периоде привело к снижению коэффициентов текущей и быстрой ликвидности.

Операционные расходы за 3 квартал 2005 г. (стр.070+100) составили – 814 660 тыс. руб.

Собственный капитал по состоянию на 30.09.05 составил –15 520 232 тыс. руб.

Краткосрочные обязательства по состоянию на 30.09.05 составили- 14 383 616 тыс. руб.

В соответствии с методикой, рекомендованной нормативными актами федеральных органов исполнительной власти по рынку ценных бумаг, собственный капитал эмитента считается достаточным для покрытия текущих операционных расходов и исполнения краткосрочных обязательств, т. к. стр.490 ф.1 бухгалтерского баланса за 9 месяцев 2005 г. больше стр. 690 ф.1 в 1,1 раза. Размер среднедневных операционных расходов эмитента за 2 квартал 2005 г. составляет 9 091 тыс. руб., за 3 квартал 2005 г. – 9 052 тыс. руб., прогноз на 4 квартал 2005 г. - 11426 тыс. руб. Эмитент предполагает, что величина оборотных средств в 4 кв. 2005 г. будет достаточной для покрытия прогнозируемых текущих операционных расходов.

За 9 месяцев 2005 г. величина оборотных активов снизилась против 9 месяцев 2004 г. и составила 72,5 % в основном, за счет сокращения дебиторской задолженности и краткосрочных финансовых вложений.

В структуре активов компании доля оборотных средств в анализируемом периоде составила 14,9 % против 22,3 % за аналогичный период прошлого года. Это связано с отраслевой спецификой эмитента, относящегося к производствам с высоким уровнем фондоемкости. В структуре оборотных активов преобладает дебиторская задолженность, что также связано с отраслевой спецификой. Политика эмитента в области оборотных средств направлена на сокращение дебиторской задолженности, снижение просроченной задолженности.

Источниками финансирования оборотных средств являются, в основном, привлеченные средства, которые представляют собой краткосрочные и долгосрочные банковские кредиты.

Факторы, которые могут повлечь изменение в политике финансирования оборотных средств:

- изменение уровня дебиторской задолженности, уровня запасов, скорости оборачиваемости оборотных средств;
- изменения, связанные с величиной банковских процентных ставок;
- изменение уровня рыночных цен на производственные запасы и другие виды товарно-материальных ценностей;

- изменение уровня цен на реализуемые эмитентом услуги.

Оценка вероятности их появления:

- политика Эмитента по управлению активами в части дебиторской задолженности и запасов направлена на уменьшение их уровня и сроков оборачиваемости. Негативное влияние данного фактора на практику финансирования оборотных средств маловероятно;
- стоимость банковских кредитов и ставка рефинансирования ЦБ РФ имеют тенденцию к снижению. Негативное влияние данного фактора на практику финансирования оборотных средств маловероятно;
- цены на используемые Эмитентов в процессе хозяйственной деятельности товарно-материальные ценности не подвержены резким рыночным колебаниям. Негативное влияние данного фактора на практику финансирования оборотных средств маловероятно;

рыночная стратегия Эмитента направлена на расширение деятельности в секторах с нерегулируемыми ценами и тарифами. Негативное влияние данного фактора на практику финансирования оборотных средств маловероятно

4.5. Анализ тенденций развития в сфере основной деятельности эмитента.

В Центральном федеральном округе макроэкономическая ситуация по-прежнему остается благоприятной относительно других регионов РФ. Однако на развитии экономики ЦФО сказывается общее для России замедление темпов роста экономики. (В частности, снижение темпов роста ВВП и ускорение роста инфляции).

Как сообщил Л.Рейман, доля отрасли связи и информационных технологий в 2004 г. в ВВП страны достигла 5%. Иностранные инвестиции в отрасль связи в 2004 г. превысили $1,5 млрд. В 2004 г. отечественные инвестиции в основной капитал предприятий отрасли выросли на 24,6% и превысили $4,1 млрд.

Доходы отрасли связи в РФ в 2005 г. увеличатся на 30% и составят порядка 700 млрд. руб. Объем рынка информационных технологий в 2005 г. увеличится на 17% и достигнет 300 млрд. руб. При этом в 2005 г. объем инвестиций предприятий отрасли составит около 140 млрд. руб.

По прогнозу "Коминфо Консалтинг", общий размер российского рынка телекоммуникационных услуг к 2006 году вырастет в 2,6 раза (по сравнению с 2002 г.) и составит свыше 550 миллиардов рублей. Рынок документальной электросвязи вырастет в 5 раз за счет роста рынка Интернет доступа и новых видов услуг – IP-телефонии, VPN и других.

К 2006 году рост рынка мобильной связи прогнозируется в 2,8 раза, за счет расширения абонентской базы в регионах. Все аналитики сегодня сходятся во мнении, что рынок мобильной связи в дальнейшем будет увеличиваться за счет регионов.

В течение последних нескольких лет наблюдается закономерная тенденция перераспределения доли доходов от различных видов услуг связи в пользу нетрадиционных услуг, в основном, мобильной связи. Не стал исключением и Центральный федеральный округ.

Доходы от услуг связи имеют позитивную тенденцию роста в целом по отрасли.

По итогам работы ОАО «ЦентрТелеком» в 3-м квартале прирост основных телефонных аппаратов составил 46 478 шт. Рост доходов от услуг связи в 3-м квартале 2005 года по сравнению с 3-м кварталом 2004 года составляет 110 %.

В будущем основное негативное влияние стоит ожидать от обострения конкурентной ситуации, и особенно со стороны мобильных операторов.

Вероятность того, что мобильные операторы составят серьезную конкуренцию очень велика, т.к. они активно продвигаются на все региональные рынки и расширяют спектр предоставляемых услуг.

В будущем для снижения негативного эффекта факторов и условий, влияющих на деятельность эмитента планируется использовать основные конкурентные преимущества. Однако необходимо отметить, что ОАО «ЦентрТелеком» учитывает возможные негативные последствия указанных рисков

и принимает усилия по их преодолению.

Основными конкурентами ОАО "ЦентрТелеком" являются **национальные операторы**. Их совокупная доля, в зависимости от региона и вида услуг, колеблется от 1 до 18%. Успешно продвигается на рынке Черноземья компания "Коминком", на рынке Московской области – ОАО "Центральный телеграф".

Не менее опасны ведомственные операторы. Их доля существенна на рынке дальней связи и доступа в Интернет, а присутствие в сегменте местной телефонии ограничено. Эти операторы активно проникают в самые привлекательные сегменты рынка. Особенно активным ведомственным оператором является "ТрансТелеком".

Что касается компаний, предоставляющих услуги сотовой связи, то они внедряются в другие сегменты рынка услуг связи, например, услуги доступа в Интернет.

Локальные операторы сами по себе не являются конкурентами МРК, поскольку их работа ограничена отдельными территориями, но они являются перспективными партнёрами для национальных и ведомственных операторов, а также зачастую составляют серьезную конкуренцию региональным филиалам ОАО "ЦентрТелеком" на стратегически важных рынках. Отдельно стоит отметить IP-операторов, составляющих серьезную конкуренцию на рынке дальней связи и доступа в Интернет.

7.7. Сведения об участии эмитента в судебных процессах в случае, если такое участие может существенно отразиться на финансово-хозяйственной деятельности эмитента.

Считаем, что к существенным искам могут быть отнесены:

- иски, цена которых равна или превышает 10 процентов балансовой стоимости активов ОАО «ЦентрТелеком», что на 30 июня 2005 года составляет 4 466 650 тыс. руб.;

- иски, которые препятствуют осуществлению хозяйственной деятельности или направлены на её запрещение или прекращение (иски о ликвидации, о признании ОАО «ЦентрТелеком» и его дочерних и зависимых обществ несостоятельными (банкротами), об отчуждении имущества (активов), об оспаривании прав из лицензий, патентов, о взыскании задолженности по налогам и сборам в бюджет и внебюджетные фонды в существенном размере).

В 3-ем квартале 2005 года, а также в течение трёх лет, предшествующих дате окончания отчётного квартала, ОАО «ЦентрТелеком» не принимало участие в существенных судебных процессах, которые могут (могли) отразиться на его финансово-хозяйственной деятельности.

Дополнительно сообщаем, что ОАО «ЦентрТелеком» за 3 года, предшествующих дате окончания отчётного квартала, участвовало или участвует на дату окончания отчётного квартала в качестве истца или ответчика в следующих судебных разбирательствах, по которым максимальный риск потенциального убытка превышал или превышает 5 млн. рублей:

1. В 2003 году Арбитражными судами Московского округа было отказано в удовлетворении двух исковых заявлений, предъявленных от имени и в интересах ОАО "ЦентрТелеком" о взыскании с Российской Федерации в лице Министерства финансов за счет казны Российской Федерации **8 058 тыс. руб.** и **5 975 тыс. руб.** расходов, связанных с предоставлением Московским филиалом ОАО «ЦентрТелеком» льгот по оплате услуг связи ветеранам.

В первом случае суд посчитал, что не подтверждены документальными доказательствами утверждения истца о бездействии ответчиков; во втором случае судебными инстанциями было установлено, что в федеральном бюджете на 2001 и 2002 годы средства на компенсацию затрат предприятий связи были предусмотрены не в полном объеме. Суд счёл, что при таких обстоятельствах отсутствуют основания для удовлетворения вышеуказанных исков.

ОАО "ЦентрТелеком" была направлена жалоба в Высший Арбитражный Суд Российской Федерации о пересмотре этих судебных актов в порядке надзора, но судьями ВАС РФ были вынесены определения об отказе в передаче в Президиум ВАС РФ решений Арбитражного суда г. Москвы и постановлений ФАС Московского округа для пересмотра в порядке надзора.

В третьем квартале 2004 года в Арбитражный суд г. Москвы ОАО «ЦентрТелеком» были направлены заявления о пересмотре решений по вновь открывшимся обстоятельствам (в качестве вновь открывшего обстоятельства было приведено вынесенное Конституционным Судом Российской Федерации определение от 11.05.2004 об отказе в принятии к рассмотрению жалобы ОАО «ЦентрТелеком» на нарушения конституционных прав и свобод ст. 30 ФЗ от 16.02.1995 «О связи» и п. 2 ст. 180 Бюджетного Кодекса РФ»).

Определением от 27.09.04, оставленным без изменения постановлением апелляционной инстанции от 01.02.05 и постановлением кассационной инстанции от 26.04.05, в удовлетворении заявлений отказано. Судебные акты мотивированы тем, что ссылки заявителя на приведенные в мотивировочной части определения КС РФ обстоятельства, не связанные с порядком применения федеральных законов и не реализацией судом задач судопроизводства, не могут в силу п. 1 ст. 311 Арбитражного процессуального кодекса Российской Федерации рассматриваться в качестве вновь открывшихся обстоятельств.

2. В Арбитражный суд г. Москвы от имени и в интересах ОАО «ЦентрТелеком» в декабре 2003 года было подано исковое заявление о взыскании убытков, возникших в связи с предоставлением Тульским филиалом ОАО «ЦентрТелеком» льгот по оплате услуг связи ветеранам. Цена иска составляет **92 989 тыс. руб.**

Ответчиком - представителем Российской Федерации - в исковом заявлении указано Министерство финансов Российской Федерации.

24.05.2004 Арбитражный суд г. Москвы рассмотрел вышеуказанный иск к Российской Федерации, удовлетворив исковые требования ОАО "ЦентрТелеком" о взыскании указанной суммы с Министерства финансов. Апелляционная инстанция постановлением от 01.09.04. апелляционную жалобу Министерства финансов Российской Федерации удовлетворила, а в иске ОАО "ЦентрТелеком" отказала. 25 октября 2004 года кассационная инстанция оставила постановление апелляционной инстанции без изменения, а кассационную жалобу ОАО «ЦентрТелеком» без удовлетворения.

18.03.2005 в Конституционный Суд Российской Федерации ОАО «ЦентрТелеком» направлена жалоба на нарушение конституционных прав, в которой заявитель просит КС РФ проверить конституционность пункта 2 статьи 124 ГК РФ в том толковании, в котором его применили федеральные арбитражные суды Московского округа в деле ОАО «ЦентрТелеком».

Определением КС РФ от 05 июля 2005 года в принятии жалобы ОАО «ЦентрТелеком» отказано.

3. 13 мая 2004 года Арбитражным судом г. Москвы было вынесено решение об удовлетворении иска, предъявленного от имени и в интересах ОАО «ЦентрТелеком» к Российской Федерации в лице Министерства финансов, Министерства труда и социального развития России, Управления социальной защиты населения Тамбовской области о взыскании **10 432 тыс. руб.** убытков, понесённых в результате предоставления Тамбовским филиалом ОАО «ЦентрТелеком» льгот по оплате услуг связи ветеранам. Апелляционная и кассационная инстанции оставили решение суда первой инстанции без изменения. Министерством труда и социального развития было подано заявление в Высший Арбитражный Суд Российской Федерации о пересмотре вышеуказанных судебных актов в порядке надзора. Определением ВАС РФ заявителю было отказано в направлении судебных дел в Президиум ВАС РФ для пересмотра в порядке надзора.

4. 28 июня 2004 года Арбитражным судом Воронежской области по предъявленному Воронежским филиалом ОАО «ЦентрТелеком» иску было принято решение о взыскании с казны Российской Федерации убытков, понесённых ОАО «ЦентрТелеком» в связи с предоставлением льгот по оплате услуг связи отдельным категориям граждан, в размере **10 607 тыс. руб.** Исполнительный лист исполнен в установленном порядке.

5. Воронежским филиалом ОАО «ЦентрТелеком» в Арбитражный суд Воронежской области в 2004 году было предъявлено **3 иска** на общую сумму **49 708 тыс. руб.** о взыскании с казны Российской Федерации убытков, понесённых ОАО «ЦентрТелеком» в связи с предоставлением льгот по оплате услуг связи отдельным категориям граждан по законам «О ветеранах», «О социальной защите инвалидов в Российской Федерации» и Закону «О социальной защите граждан, подвергшихся воздействию радиации вследствие аварии на Чернобыльской АЭС». Иски удовлетворены судом первой инстанции решениями от 15.12.04 и 21.12.04. Исполнительные листы исполнены в установленном порядке.

6. Воронежским филиалом ОАО «ЦентрТелеком» в Арбитражный суд Воронежской области в 2003 году был предъявлен иск о взыскании с казны Российской Федерации убытков, понесённых ОАО «ЦентрТелеком» в связи с предоставлением льгот по оплате услуг связи отдельным категориям граждан. Цена иска составляла **20 646 тыс. руб.** Иск удовлетворён решением суда первой инстанции. Исполнительный лист исполнен в установленном порядке.

7. В 2003 году Московский филиал ОАО «ЦентрТелеком» предъявил иск к Московской

областной регистрационной палате и Муниципальному образованию «Чеховский район Московской области» в лице Администрации района о признании недействительным зарегистрированного права собственности Муниципального образования на городскую телефонную и радиотрансляционную сеть, принадлежащих ОАО «ЦентрТелеком», и признании права собственности ОАО «ЦентрТелеком».

Стоимость объектов оценивается в **8 041 тыс. руб.**

Решением суда первой инстанции от 15.04.2004 исковые требования ОАО «ЦентрТелеком» были удовлетворены.

Однако Федеральный Арбитражный суд Московского округа счёл, что суд первой инстанции не исследовал надлежащим образом все обстоятельства, имеющие значение для рассмотрения дела по существу и вынесения решения.

Постановлением ФАС МО от 07 июля 2004 года Решение Арбитражного суда Московской области от 15 апреля 2004 года отменено и дело передано на новое рассмотрение в первую инстанцию.

Иск находится в стадии рассмотрения.

8. В 2003-2004 годах ФГУП «Российская телевизионная и радиовещательная сеть» (ФГУП «РТРС») предъявило к ОАО «ЦентрТелеком» три иска о признании недействительной приватизации компаний электросвязи, присоединённых в результате реорганизации к ОАО «ЦентрТелеком», в части передачи им имущества телерадиопередающих центров:

1) В Арбитражный суд Калужской области ФГУП «РТРС» предъявило иск о признании п. 6.1. Устава ОАО «ЦентрТелеком» недействительным в части включения в уставный капитал ОАО «ЦентрТелеком» четырёх объектов: башни в г. Малоярославце, РЛС Киров-Манино-Людиново, РЛС Манино-Бетлица, РЛС Киров-Новоалександровский Калужской области. Остаточная стоимость имущества составляет 7 846 тыс. руб., хотя иск был заявлен на общую сумму **27 438 тыс. руб.**

В качестве третьего лица, заявляющего самостоятельные требования, в деле приняло участие Территориальное управление Министерства имущества России.

Решением суда первой инстанции от 25.06.2004 в иске ФГУП «РТРС» отказано.

Апелляционная инстанция решение суда первой инстанции отменила и вынесла новое решение об удовлетворении иска ФГУП «РТРС».

Кассационная инстанция постановление суда апелляционной инстанции отменила и решение суда первой инстанции от 25.06.2004 об отказе ФГУП «РТРС» в иске оставила без изменения.

2) В Арбитражный суд Московской области был предъявлен иск о применении последствий ничтожной сделки приватизации ГПСИ «Россвязьинформ» Московской области в части включения в уставной капитал ОАО «ЦентрТелеком» здания телетранслятора в г. Ступино Московской области и возврата его в государственную собственность Российской Федерации. Остаточная стоимость здания равна нулю (износ 100%).

Решением Арбитражного суда Московской области от 09.08.04 в удовлетворении иска ФГУП «РТРС» отказано.

Постановлением ФАС МО от 09.12.04 решение суда первой инстанции отменено, дело направлено на новое рассмотрение в суд первой инстанции.

Решением Арбитражного суда Московской области от 14.03.05 в удовлетворении иска ФГУП «РТРС» вновь отказано.

Постановлением ФАС МО от 13 июля 2005 года решение Арбитражного суда Московской области от 14 марта 2005 года оставлено без изменения, а кассационная жалоба ФГУП «Российская телевизионная и радиовещательная сеть» - без удовлетворения.

3) 15 мая 2003 года был предъявлен иск о применении последствий недействительности ничтожной сделки в части включения в уставный капитал ОАО «Электросвязь» Рязанской области здания ОРТПЦ, находящегося в г. Рязани. Остаточная стоимость здания составляет **397,54 тыс. руб.** Решением суда первой инстанции от 14.01.2004 в иске ФГУП «РТРС» отказано. Погашение Облигаций производится платёжным агентом по поручению Эмитента (далее по тексту - Платежный агент), функции которого выполняет:

Акционерный Коммерческий Банк "Московский Деловой Мир" (открытое акционерное общество)

Эмитентом в срок не позднее 10 (десяти) рабочих дней до даты совершения таких назначений либо их отмены в газетах "Ведомости" и/или "Известия".

Если дата погашения Облигаций приходится на выходной день - независимо от того, будет ли это государственный выходной день или выходной день для расчетных операций, - то выплата надлежащей суммы производится в первый рабочий день, следующий за выходным. Владелец Облигации не имеет права требовать начисления процентов или какой-либо иной компенсации за такую задержку в платеже.

Погашение Облигаций производится по номинальной стоимости.

Погашение Облигаций производится в валюте Российской Федерации в безналичном порядке в пользу владельцев Облигаций.

Презюмируется, что номинальные держатели - депоненты НДЦ уполномочены получать суммы погашения по Облигациям. Депонент НДЦ и/или иное лицо, не уполномоченные своими клиентами получать суммы погашения по Облигациям, не позднее чем на 3 (третий) рабочий день до установленной даты погашения Облигаций, передают в НДЦ список владельцев Облигаций, который должен содержать все реквизиты, указанные ниже в Перечне владельцев и/или номинальных держателей Облигаций.

Погашение Облигаций производятся в пользу владельцев Облигаций, являющихся таковыми по состоянию на конец операционного дня НДЦ, предшествующего 6 шестому рабочему дню до даты погашения Облигаций (далее по тексту – "Дата составления перечня владельцев и/или номинальных держателей Облигаций").

Исполнение обязательства по отношению к владельцу, включенному в перечень владельцев и/или номинальных держателей Облигаций, признается надлежащим, в том числе в случае отчуждения Облигаций после Даты составления перечня владельцев и/или номинальных держателей Облигаций.

Не позднее, чем на 2 (второй) рабочий день до даты погашения Облигаций НДЦ предоставляет Эмитенту и/или Платёжному агенту перечень владельцев и/или номинальных держателей Облигаций, составленный на Дату составления перечня владельцев и/или номинальных держателей Облигаций, включающий в себя следующие данные:

а) полное наименование лица, уполномоченного получать суммы погашения по Облигациям.

В случае если Облигации переданы владельцем номинальному держателю и номинальный держатель уполномочен на получение сумм погашения по Облигациям, указывается полное наименование номинального держателя.

В случае если Облигации не были переданы номинальному держателю и/или номинальный держатель не уполномочен владельцем на получение сумм погашения по Облигациям, указывается полное наименование владельца Облигаций (Ф.И.О. владельца - для физического лица);

Владельцы Облигаций, их уполномоченные лица, в том числе депоненты НДЦ, самостоятельно отслеживают полноту и актуальность реквизитов банковского счета, предоставленных ими в НДЦ. В случае не предоставления или несвоевременного предоставления в НДЦ указанных реквизитов, исполнение таких обязательств производится лицу, предъявившему требование об исполнении обязательств и являющемуся владельцем Облигаций на дату предъявления требования. При этом исполнение Эмитентом обязательств по Облигациям производится на основании данных НДЦ.

Не позднее чем на 2 (второй) рабочий день до даты погашения Облигаций Эмитент перечисляет необходимые денежные средства на счёт Платёжного агента.

На основании перечня владельцев и/или номинальных держателей Облигаций, предоставленного НДЦ, Платёжный агент рассчитывает суммы денежных средств, подлежащих выплате каждому из лиц, указанных в перечне владельцев и/или номинальных держателей Облигаций.

Размер процентного (купонного) дохода по облигациям:

Купонный (процентный) период		*Размер купонного (процентного) дохода*
Дата начала	*Дата окончания*	

1. Купон: 1 Процентная ставка по первому купону определяется путем проведения аукциона среди потенциальных покупателей Облигаций в первый день первичного размещения облигаций выпуска. В день проведения аукциона по определению процентной ставки по первому купону Облигаций Члены Секции подают заявки на аукцион с использованием торговой системы ММВБ как за свой счет, так и за счет и по поручению клиентов. Время подачи заявок на аукцион по определению процентной ставки по первому купону Облигаций устанавливается ММВБ по согласованию с Эмитентом и Андеррайтерами. Заявки на приобретение Облигаций Членами Секции направляются в адрес одного из Андеррайтеров с указанием следующих значимых условий:

а.1) Цена покупки - 100 % от номинальной стоимости;

а.2) Количество Облигаций, которое потенциальный покупатель хотел бы приобрести, в случае если Эмитент назначит процентную ставку по первому купону Облигаций большую или равную указанной в заявке приемлемой процентной ставки;

а.3) Величину приемлемой для инвестора процентной ставки по первому купону. Под термином "Величина приемлемой процентной ставки" понимается величина процентной ставки по первому купону, при объявлении которой Эмитентом потенциальный инвестор был бы готов купить количество Облигаций, указанных в заявке по цене 100 % от номинала. Величина приемлемой процентной ставки должна быть выражена в процентах годовых с точностью до одной сотой процента.

Денежные средства должны быть зарезервированы в сумме, достаточной для полной оплаты Облигаций, указанных в заявках, с учетом комиссионных сборов ММВБ.

Заявки, в которых одно или несколько из перечисленных выше значимых условий не соответствуют требованиям, изложенным в пунктах а.1-а.3, а также заявки, не обеспеченные

достаточным количеством денежных средств, к участию в аукционе по определению процентной ставки не допускаются.

По окончании периода подачи заявок на аукцион по определению процентной ставки по первому купону ММВБ составляет реестры введенных заявок, поданных в адрес каждого из Андеррайтеров, и передает их Эмитенту и Андеррайтерам. Андеррайтеры на основании переданных от ММВБ реестров заявок формируют сводный реестр заявок.

На основании анализа сводного реестра заявок, поданных на аукцион, Эмитент принимает решение о величине процентной ставки по первому купону и сообщает о принятом решении Андеррайтерам и ММВБ в письменном виде.

Андеррайтеры публикуют сообщение о величине процентной ставки по первому купону при помощи торговой системы ММВБ путем отправки электронных сообщений всем Членам Секции.

Последним днем торгов Облигациями на ММВБ является дата составления перечня владельцев и/или номинальных держателей Облигаций для выплаты купонного дохода по последнему купону и погашения данного выпуска Облигаций.*

Порядок выплаты купонного (процентного) дохода:

Выплата доходов по Облигациям по всем купонам производится в валюте Российской Федерации в безналичном порядке депонентам НДЦ. Владелец Облигации, если он не является депонентом НДЦ, может уполномочить держателя Облигаций - депонента НДЦ получать суммы от выплаты доходов по Облигациям. Выплата доходов по Облигациям производятся депонентам НДЦ в пользу владельцев Облигаций, являющихся таковыми по состоянию на конец операционного дня НДЦ, предшествующего 6 (шестому) рабочему дню до даты выплаты дохода по Облигациям (далее по тексту - "Дата составления перечня держателей Облигаций"). Исполнение обязательств по отношению к владельцу, включенному в список владельцев Облигаций, признается надлежащим в том числе в случае отчуждения Облигаций после даты составления списка владельцев Облигаций.

Не позднее 3 (трех) рабочих дней до даты выплаты доходов по Облигациям НДЦ предоставляет Эмитенту и/или Платёжному агенту перечень держателей Облигаций, составленный на Дату составления перечня держателей Облигаций, включающий в себя следующие данные:

а) Полное наименование держателя Облигаций.

б) Количество Облигаций, учитываемых на счетах депо соответствующего держателя Облигаций.

в) Место нахождения и почтовый адрес держателя Облигаций.

г) Реквизиты банковского счёта держателя Облигаций, а именно:

- расчетный счет держателя;

- банковский идентификационный код банка держателя.
д) Налоговый статус депонента НДЦ (резидент, нерезидент с постоянным представительством в Российской Федерации, нерезидент без постоянного представительства в Российской Федерации и т.д.)
Держатель самостоятельно отслеживает полноту и актуальность реквизитов банковского счета, предоставленных им в НДЦ. В случае непредставления или несвоевременного предоставления НДЦ указанных реквизитов исполнение таких обязательств производится лицу, предъявившему требование об исполнении обязательств и являющемуся владельцем облигаций на дату предъявления требования. При этом исполнение Эмитентом обязательств по облигациям производится на основании данных НДЦ.
Не позднее 2 (Двух) дней до даты выплаты доходов по Облигациям Эмитент перечисляет необходимые денежные средства на счёт Платёжного агента. На основании перечня держателей Облигаций, предоставленного Депозитарием, Платёжный агент рассчитывает суммы денежных средств, подлежащих выплате каждому из держателей Облигаций, уполномоченных на получение сумм доходов по Облигациям.
В дату выплаты доходов по Облигациям Платёжный агент перечисляет необходимые денежные средства на счета держателей Облигаций в пользу владельцев Облигаций. В случае, если одно лицо уполномочено на получение сумм доходов по Облигациям со стороны нескольких владельцев Облигаций, то такому лицу перечисляется общая сумма без разбивки по каждому владельцу Облигаций.
Если дата погашения Облигаций выпадает на выходной день, независимо от того, будет ли это государственный выходной день или выходной день для расчетных операций, то выплата надлежащей суммы производится в первый рабочий день, следующий за выходным. Доход в виде дивидендов	9%	15%	9%	30%

ПОРЯДОК НАЛОГООБЛОЖЕНИЯ ФИЗИЧЕСКИХ ЛИЦ.

Вид налога – налог на доходы.

К доходам от источников в Российской Федерации относятся:

- дивиденды и проценты, полученные от российской организации, а также проценты, полученные от российских индивидуальных предпринимателей и (или) иностранной организации в связи с деятельностью ее постоянного представительства в РФ;
- доходы от реализации в РФ акций или иных ценных бумаг, а также долей участия в уставном капитале организаций.

Налоговая база.

Доходом налогоплательщика, полученным в виде материальной выгоды, является материальная выгода, полученная от приобретения ценных бумаг. Налоговая база определяется как превышение рыночной стоимости ценных бумаг, определяемой с учетом предельной границы колебаний рыночной цены ценных бумаг, над суммой фактических расходов налогоплательщика на их приобретение. Порядок определения рыночной цены ценных бумаг и предельной границы колебаний рыночной цены ценных бумаг устанавливается федеральным органом, осуществляющим регулирование рынка ценных бумаг.

При определении налоговой базы по доходам по операциям с ценными бумагами учитываются доходы, полученные по следующим операциям:

- купли - продажи ценных бумаг, обращающихся на организованном рынке ценных бумаг;
- купли - продажи ценных бумаг, не обращающихся на организованном рынке ценных бумаг.

Доход (убыток) по операциям купли - продажи ценных бумаг определяется как разница между суммами доходов, полученными от реализации ценных бумаг, и документально подтвержденными расходами на приобретение, реализацию и хранение ценных бумаг, фактически произведенными налогоплательщиком, либо имущественными вычетами, принимаемыми в уменьшение доходов от сделки купли - продажи.

К указанным расходам относятся:

- суммы, уплачиваемые продавцу в соответствии с договором;
- оплата услуг, оказываемых депозитарием;
- комиссионные отчисления профессиональным участникам рынка ценных бумаг, скидка, уплачиваемая (возмещаемая) управляющей компании паевого инвестиционного фонда при продаже (погашении) инвестором инвестиционного пая паевого инвестиционного фонда, определяемая в соответствии с порядком, установленным законодательством Российской Федерации об инвестиционных фондах;
- биржевой сбор (комиссия);
- оплата услуг регистратора;
- другие расходы, непосредственно связанные с куплей, продажей и хранением ценных бумаг, произведенные за услуги, оказываемые профессиональными участниками рынка ценных бумаг в рамках их профессиональной деятельности.

При реализации акций (долей, паев), полученных налогоплательщиком при реорганизации организаций, расходами на их приобретение признается стоимость, определяемая в соответствии с пунктами 4 - 6 статьи 277 НК РФ, при условии документального подтверждения налогоплательщиком расходов на приобретение акций (долей, паев) реорганизуемых организаций.

Доход (убыток) по операциям купли - продажи ценных бумаг, обращающихся на организованном рынке ценных бумаг, уменьшается (увеличивается) на сумму процентов, уплаченных за пользование денежными средствами, привлеченными для совершения сделки купли - продажи ценных бумаг, в пределах сумм, рассчитанных исходя из действующей ставки рефинансирования Центрального банка Российской Федерации.

По операциям с ценными бумагами, обращающимися на организованном рынке ценных бумаг, размер убытка определяется с учетом предельной границы колебаний рыночной цены ценных бумаг.

К ценным бумагам, обращающимся на организованном рынке ценных бумаг, относятся ценные бумаги, допущенные к обращению у организаторов торговли, имеющих лицензию федерального органа, осуществляющего регулирование рынка ценных бумаг.

Под рыночной котировкой ценной бумаги, в том числе пая паевого инвестиционного фонда, обращающегося на организованном рынке ценных бумаг, понимается средневзвешенная цена ценной бумаги по сделкам, совершенным в течение торгового дня через организатора торговли. Если по одной и той же ценной бумаге сделки совершались через двух и более организаторов торговли, налогоплательщик вправе самостоятельно выбрать рыночную котировку ценной бумаги, сложившуюся у одного из организаторов торговли. В случае если средневзвешенная цена организатором торговли не рассчитывается, за средневзвешенную цену принимается половина суммы максимальной и минимальной цен сделок, совершенных в течение торгового дня через этого организатора торговли.

Налоговая база по каждой операции определяется отдельно.

Доход (убыток) по операциям купли-продажи ценных бумаг определяется как сумма доходов по совокупности сделок с ценными бумагами соответствующей категории, совершенных в течение налогового периода, за вычетом суммы убытков

Если расходы налогоплательщика на приобретение, реализацию и хранение ценных бумаг не могут быть отнесены непосредственно к расходам на приобретение, реализацию и хранение конкретных ценных бумаг, указанные расходы распределяются пропорционально стоимостной оценке ценных бумаг, на долю которых относятся указанные расходы. Стоимостная оценка ценных бумаг определяется на дату осуществления этих расходов.

В случае если расходы налогоплательщика не могут быть подтверждены документально, он вправе воспользоваться имущественным налоговым вычетом, предусмотренным абзацем первым подпункта 1 пункта 1 статьи 220 НК. Имущественный налоговый вычет или вычет в размере фактически произведенных и документально подтвержденных расходов предоставляется налогоплательщику при расчете и уплате налога в бюджет у источника выплаты дохода (брокера, доверительного управляющего, управляющей компании, осуществляющей доверительное управление имуществом, составляющим паевой инвестиционный фонд, или у иного лица, совершающего операции по договору поручения или по иному подобному договору в пользу налогоплательщика) либо по окончании налогового периода при подаче налоговой декларации в налоговый орган.

Если расчет и уплата налога производятся источником выплаты дохода (брокером, доверительным управляющим, управляющей компанией, осуществляющей доверительное управление имуществом, составляющим паевой инвестиционный фонд, или иным лицом, совершающим операции по договору поручения или по иному подобному договору в пользу налогоплательщика) в налоговом периоде, имущественный налоговый вычет предоставляется источником выплаты дохода с возможностью последующего перерасчета по окончании налогового периода при подаче налоговой декларации в налоговый орган.

При наличии нескольких источников выплаты дохода имущественный налоговый вычет предоставляется только у одного источника выплаты дохода по выбору налогоплательщика.

Налоговая база по операциям купли-продажи ценных бумаг (погашения инвестиционных паев паевых инвестиционных фондов) определяется как доход, полученный по результатам налогового периода по операциям с ценными бумагами.

Убыток по операциям с ценными бумагами, обращающимися на организованном рынке ценных бумаг, полученный по результатам указанных операций, совершенных в налоговом периоде, уменьшает налоговую базу по операциям купли - продажи ценных бумаг данной категории.

Доход по операциям купли - продажи ценных бумаг, не обращающихся на организованном рынке ценных бумаг, которые на момент их приобретения отвечали требованиям, установленным для ценных бумаг, обращающихся на организованном рынке ценных бумаг, может быть уменьшен на сумму

убытка, полученного в налоговом периоде, по операциям купли - продажи ценных бумаг, обращающихся на организованном рынке ценных бумаг.

При реализации акций (долей, паев), полученных налогоплательщиком при реорганизации организаций, срок их нахождения в собственности налогоплательщика исчисляется с даты приобретения в собственность акций (долей, паев) реорганизуемых организаций.

Дата фактического получения дохода:

- день выплаты дохода, в том числе перечисления дохода на счета налогоплательщика в банках либо по его поручению на счета третьих лиц - при получении доходов в денежной форме;
- день приобретения ценных бумаг – при получении дохода в виде материальной выгоды.

Налоговая база по операциям купли - продажи ценных бумаг и операциям с финансовыми инструментами срочных сделок определяется по окончании налогового периода. Расчет и уплата суммы налога осуществляются налоговым агентом по окончании налогового периода или при осуществлении им выплаты денежных средств налогоплательщику до истечения очередного налогового периода.

Налоговыми агентами признаются российские организации, от которых или в результате отношений с которыми налогоплательщик получил доходы. Налоговые агенты обязаны исчислить, удержать у налогоплательщика и уплатить сумму налога. В случае, если источником выплаты дохода является лицо, совершающее операции по договору поручения или по иному подобному договору в пользу налогоплательщика, то обязанности налогового агента исполняет лицо, фактически выплачивающее доход налогоплательщику.

При осуществлении выплаты денежных средств налоговым агентом до истечения очередного налогового периода налог уплачивается с доли дохода, определяемого в соответствии с настоящей статьей, соответствующей фактической сумме выплачиваемых денежных средств. Доля дохода определяется как произведение общей суммы дохода на отношение суммы выплаты к стоимостной оценке ценных бумаг, определяемой на дату выплаты денежных средств, по которым налоговый агент выступает в качестве брокера. При осуществлении выплаты денежных средств налогоплательщику более одного раза в течение налогового периода расчет суммы налога производится нарастающим итогом с зачетом ранее уплаченных сумм налога.

Стоимостная оценка ценных бумаг определяется исходя из фактически произведенных и документально подтвержденных расходов на их приобретение.

Под выплатой денежных средств понимаются выплата наличных денежных средств, перечисление денежных средств на банковский счет физического лица или на счет третьего лица по требованию физического лица.

При невозможности удержать у налогоплательщика исчисленную сумму налога источником выплаты дохода налоговый агент (брокер, доверительный управляющий или иное лицо, совершающее операции по договору поручения, договору комиссии, иному договору в пользу налогоплательщика) в течение одного месяца с момента возникновения этого обстоятельства в письменной форме уведомляет налоговый орган по месту своего учета о невозможности указанного удержания и сумме задолженности налогоплательщика. Уплата налога в этом случае производится в соответствии со статьей 228 НК.

ПОРЯДОК НАЛОГООБЛОЖЕНИЯ ЮРИДИЧЕСКИХ ЛИЦ.

Вид налога – налог на прибыль.

К доходам относятся:

- выручка от реализации имущественных прав (доходы от реализации);
- внереализационные доходы в виде процентов по ценным бумагам и другим долговым обязательствам и/или от долевого участия в других организациях.

Налоговая база.

Доходы налогоплательщика от операций по реализации или иного выбытия ценных бумаг (в том числе погашения) определяются исходя из цены реализации или иного выбытия ценной бумаги, а также суммы накопленного процентного (купонного) дохода, уплаченной покупателем налогоплательщику, и суммы процентного (купонного) дохода, выплаченной налогоплательщику эмитентом. При этом в

доход налогоплательщика от реализации или иного выбытия ценных бумаг не включаются суммы процентного (купонного) дохода, ранее учтенные при налогообложении.

Доходы налогоплательщика от операций по реализации или от иного выбытия ценных бумаг (в том числе от погашения), номинированных в иностранной валюте, определяются по курсу Центрального банка Российской Федерации, действовавшему на дату перехода права собственности либо на дату погашения.

Расходы при реализации (или ином выбытии) ценных бумаг определяются исходя из цены приобретения ценной бумаги (включая расходы на ее приобретение), затрат на ее реализацию, размера скидок с расчетной стоимости инвестиционных паев, суммы накопленного процентного (купонного) дохода, уплаченной налогоплательщиком продавцу ценной бумаги. При этом в расход не включаются суммы накопленного процентного (купонного) дохода, ранее учтенные при налогообложении.

При определении расходов по реализации (при ином выбытии) ценных бумаг цена приобретения ценной бумаги, номинированной в иностранной валюте (включая расходы на ее приобретение), определяется по курсу Центрального банка Российской Федерации, действовавшему на момент принятия указанной ценной бумаги к учету. Текущая переоценка ценных бумаг, номинированных в иностранной валюте, не производится.

При реализации акций, полученных акционерами при реорганизации организаций, ценой приобретения таких акций признается их стоимость, определяемая в соответствии с пунктами 4 - 6 статьи 277 НК РФ.

Проценты по договорам кредита, займа и иным аналогичным договорам, иным долговым обязательствам (включая ценные бумаги) учитываются на дату признания дохода (расхода) в соответствии со статьей 328 Налогового Кодекса РФ.

Датой признания дохода и расхода по операциям с облигациями на основании статьи 329 Налогового кодекса РФ является дата реализации указанных облигаций

Ценные бумаги признаются обращающимися на организованном рынке ценных бумаг только при одновременном соблюдении следующих условий:

1) если они допущены к обращению хотя бы одним организатором торговли, имеющим на это право в соответствии с национальным законодательством;

2) если информация об их ценах (котировках) публикуется в средствах массовой информации (в том числе электронных) либо может быть представлена организатором торговли или иным уполномоченным лицом любому заинтересованному лицу в течение трех лет после даты совершения операций с ценными бумагами;

3) если по ним рассчитывается рыночная котировка, когда это предусмотрено соответствующим национальным законодательством.

В целях настоящего пункта под национальным законодательством понимается законодательство того государства, на территории которого осуществляется обращение ценных бумаг (заключение гражданско-правовых сделок, влекущих переход права собственности на ценные бумаги, в том числе и вне организованного рынка ценных бумаг).

Рыночной ценой ценных бумаг, обращающихся на организованном рынке ценных бумаг, для целей налогообложения признается фактическая цена реализации или иного выбытия ценных бумаг, если эта цена находится в интервале между минимальной и максимальной ценами сделок (интервал цен) с указанной ценной бумагой, зарегистрированной организатором торговли на рынке ценных бумаг на дату совершения соответствующей сделки. В случае совершения сделки через организатора торговли под датой совершения сделки следует понимать дату проведения торгов, на которых соответствующая сделка с ценной бумагой была заключена. В случае реализации ценной бумаги вне организованного рынка ценных бумаг датой совершения сделки считается дата определения всех существенных условий передачи ценной бумаги, то есть дата подписания договора.

В случае реализации ценных бумаг, обращающихся на организованном рынке ценных бумаг, по цене ниже минимальной цены сделок на организованном рынке ценных бумаг при определении финансового результата принимается минимальная цена сделки на организованном рынке ценных бумаг.

Под накопленным процентным (купонным) доходом понимается часть процентного (купонного) дохода, выплата которого предусмотрена условиями выпуска такой ценной бумаги, рассчитываемая пропорционально количеству дней, прошедших от даты выпуска ценной бумаги или даты выплаты

предшествующего купонного дохода до даты совершения сделки (даты передачи ценной бумаги).

В отношении ценных бумаг, не обращающихся на организованном рынке ценных бумаг, для целей налогообложения принимается фактическая цена реализации или иного выбытия данных ценных бумаг при выполнении хотя бы одного из следующих условий:

1) если фактическая цена соответствующей сделки находится в интервале цен по аналогичной (идентичной, однородной) ценной бумаге, зарегистрированной организатором торговли на рынке ценных бумаг на дату совершения сделки или на дату ближайших торгов, состоявшихся до дня совершения соответствующей сделки, если торги по этим ценным бумагам проводились у организатора торговли хотя бы один раз в течение последних 12 месяцев;

2) если отклонение фактической цены соответствующей сделки находится в пределах 20 процентов в сторону повышения или понижения от средневзвешенной цены аналогичной (идентичной, однородной) ценной бумаги, рассчитанной организатором торговли на рынке ценных бумаг в соответствии с установленными им правилами по итогам торгов на дату заключения такой сделки или на дату ближайших торгов, состоявшихся до дня совершения соответствующей сделки, если торги по этим ценным бумагам проводились у организатора торговли хотя бы один раз в течение последних 12 месяцев.

Доход налогоплательщика-акционера, реализующего акции, полученные им при увеличении уставного капитала акционерного общества, определяется как разница между ценой реализации и первоначально оплаченной стоимостью акции, скорректированной с учетом изменения количества акций в результате увеличения уставного капитала.

Налоговая база по операциям с ценными бумагами определяется налогоплательщиком отдельно, за исключением налоговой базы по операциям с ценными бумагами, определяемой профессиональными участниками рынка ценных бумаг. При этом налогоплательщики (за исключением профессиональных участников рынка ценных бумаг, осуществляющих дилерскую деятельность) определяют налоговую базу по операциям с ценными бумагами, обращающимися на организованном рынке ценных бумаг, отдельно от налоговой базы по операциям с ценными бумагами, не обращающимися на организованном рынке ценных бумаг.

При реализации или ином выбытии ценных бумаг оценка выбывающих эмиссионных ценных бумаг производится по методу стоимости первых по времени приобретения ценных бумаг (ФИФО), оценка выбывающих неэмиссионных ценных бумаг – по фактической стоимости каждой бумаги.

Налогоплательщики, получившие убыток (убытки) от операций с ценными бумагами в предыдущем налоговом периоде или в предыдущие налоговые периоды, вправе уменьшить налоговую базу, полученную по операциям с ценными бумагами в отчетном (налоговом) периоде (перенести указанные убытки на будущее) в порядке и на условиях, которые установлены статьей 283 НК.

При этом убытки от операций с ценными бумагами, не обращающимися на организованном рынке ценных бумаг, полученные в предыдущем налоговом периоде (предыдущих налоговых периодах), могут быть отнесены на уменьшение налоговой базы от операций с такими ценными бумагами, определенной в отчетном (налоговом) периоде. Убытки от операций с ценными бумагами, обращающимися на организованном рынке ценных бумаг, полученные в предыдущем налоговом периоде (предыдущих налоговых периодах), могут быть отнесены на уменьшение налоговой базы от операций по реализации данной категории ценных бумаг.

В течение налогового периода перенос на будущее убытков, понесенных в соответствующем отчетном периоде от операций с ценными бумагами, обращающимися на организованном рынке ценных бумаг, и ценными бумагами, не обращающимися на организованном рынке ценных бумаг, осуществляется раздельно по указанным категориям ценных бумаг соответственно в пределах прибыли, полученной от операций с такими ценными бумагами.

В случае если получателем процентного дохода от долговых обязательств любого вида, включая облигации с правом на участие в прибылях и конвертируемые облигации, является иностранная организация, не осуществляющая деятельность в РФ через постоянное представительство, налог с таких доходов исчисляется и удерживается налоговым агентом. При этом если источником выплаты дохода является лицо, совершающее операции по договору поручения или по иному подобному договору в пользу налогоплательщика, то обязанности налогового агента исполняет лицо, фактически выплачивающее доход иностранной организации, не осуществляющей деятельность через постоянное представительство в РФ.

В случае выплаты налоговым агентом иностранной организации доходов, которые в соответствии с международными договорами (соглашениями) облагаются налогом в Российской Федерации по пониженным ставкам, исчисление и удержание суммы налога с доходов производятся налоговым агентом по соответствующим пониженным ставкам при условии предъявления иностранной организацией налоговому агенту подтверждения, предусмотренного пунктом 1 статьи 312 НК РФ. При этом в случае выплаты доходов российскими банками по операциям с иностранными банками подтверждение факта постоянного местонахождения иностранного банка в государстве, с которым имеется международный договор (соглашение), регулирующий вопросы налогообложения, не требуется, если такое местонахождение подтверждается сведениями общедоступных информационных справочников.

Сумма налога на доходы от долевого участия в деятельности организаций (дивиденды) определяется с учетом следующих положений.

Если источником дохода налогоплательщика является иностранная организация, сумма налога в отношении полученных дивидендов определяется налогоплательщиком самостоятельно исходя из суммы полученных дивидендов и ставки 15%.

При этом налогоплательщики, получающие дивиденды от иностранной организации, в том числе через постоянное представительство иностранной организации в Российской Федерации, не вправе уменьшить сумму налога, исчисленную в соответствии со статьей 275НК РФ, на сумму налога, исчисленную и уплаченную по месту нахождения источника дохода, если иное не предусмотрено международным договором.

Если источником дохода налогоплательщика является российская организация, указанная организация признается налоговым агентом и определяет сумму налога с учетом положений пункта 2 статьи 275 НК РФ.

При этом сумма налога, подлежащая удержанию из доходов налогоплательщика - получателя дивидендов, исчисляется налоговым агентом исходя из общей суммы налога, исчисленной в порядке, установленном пунктом 2 статьи 275 НК РФ, и доли каждого налогоплательщика в общей сумме дивидендов.

Общая сумма налога определяется как произведение ставки налога 9% и разницы между суммой дивидендов, подлежащих распределению между акционерами (участниками) в текущем налоговом периоде, уменьшенной на суммы дивидендов, подлежащих выплате налоговым агентом в соответствии с пунктом 3 статьи 275 НК РФ в текущем налоговом периоде, и суммой дивидендов, полученных самим налоговым агентом в текущем отчетном (налоговом) периоде и предыдущем отчетном (налоговом) периоде, если данные суммы дивидендов ранее не участвовали в расчете при определении облагаемого налогом дохода в виде дивидендов. В случае, если полученная разница отрицательна, обязанность по уплате налога не возникает и возмещение из бюджета не производится.

В случае, если российская организация - налоговый агент выплачивает дивиденды иностранной организации и (или) физическому лицу, не являющемуся резидентом Российской Федерации, налоговая база налогоплательщика - получателя дивидендов по каждой такой выплате определяется как сумма выплачиваемых дивидендов и к ней применяется ставка 15% или 30%.

ВВЕДЕНИЕ

Настоящее Положение об Учетной политике Организации разработано в соответствии с требованиями законодательства Российской Федерации.

Для целей настоящего Положения под Учетной политикой Организации понимается выбранная Организацией обоснованная и раскрытая для различных пользователей совокупность способов ведения бухгалтерского учета – первичного наблюдения, стоимостного измерения, текущей группировки и итогового обобщения фактов хозяйственной деятельности – с целью формирования максимально оперативной, полной, объективной и достоверной финансовой и управленческой информации.

В случаях, когда системой нормативного регулирования бухгалтерского учета Российской Федерации не установлен способ ведения бухгалтерского учета по конкретному вопросу, при формировании Учетной политики Организацией осуществлялась разработка соответствующего способа учета, исходя из действующих Положений по бухгалтерскому учету.

Учетная политика Организации, являясь основой системы бухгалтерского учета, призвана обеспечить:

выполнение таких основополагающих принципов учета, как полнота, своевременность, осмотрительность, приоритет содержания перед формой, непротиворечивость, рациональность;

соблюдение общих требований к бухгалтерской отчетности: полноты, существенности, нейтральности, сравнимости, сопоставимости;

достоверность отчетности, подготавливаемой в Организации - бухгалтерской, налоговой, управленческой, статистической;

единство методики при организации и ведении бухгалтерского учета в Организации в целом и в ее подразделениях[15];

оперативность и гибкость реагирования системы бухгалтерского учета на изменения условий осуществления финансово-хозяйственной деятельности, в том числе обусловленных изменениями законодательных и нормативных актов.

В настоящем Положении наряду с общими обязательными требованиями и правилами учтены особенности Организации электросвязи:

наличие внутренних документов, регламентирующих учетный процесс под углом зрения отраслевой специфики;

наличие значительного количества подразделений, в ряде случаев территориально удаленных от места расположения Дирекции Организации;

Положение последовательно раскрывает принятые при формировании учетной политики способы бухгалтерского учета, существенно влияющие на оценку и принятие решений заинтересованными пользователями бухгалтерской отчетности, без знания о применении которых невозможна достоверная оценка финансового положения, движения денежных

[15] Для целей данного документа под подразделениями Организации, если не указано иное, понимаются региональные филиалы и структурные подразделения

средств или финансовых результатов деятельности Организации.

Способы ведения бухгалтерского учета, избранные Обществом при формировании настоящей Учетной политики, утверждаются Приказом генерального директора Организации и применяются с первого января 2005 года.

Настоящим Положением в своей деятельности должны руководствоваться все лица, связанные с решением вопросов, регламентируемых Учетной политикой:

руководство Организации;

руководители региональных филиалов и структурных подразделений, отвечающие за организацию и состояние учета во вверенных им подразделениях;

работники служб и отделов, отвечающие за своевременную разработку, пересмотр, доведение нормативно-справочной информации до подразделений-исполнителей;

работники всех служб и подразделений, отвечающие за своевременное предоставление первичных документов в бухгалтерию;

работники бухгалтерской службы, отвечающие за своевременное и качественное выполнение всех видов учетных работ и составление достоверной отчетности всех видов;

другие работники.

Учетная политика сформирована на 2005 год и не подлежит изменению за исключением следующих случаев:

изменения законодательства Российской Федерации или нормативных актов по бухгалтерскому учету;

разработки организацией новых способов ведения бухгалтерского учета;

существенного изменения условий деятельности в результате реорганизации, смены собственников, изменения видов деятельности и т.п.

Изменения, вносимые в текст Положения об Учетной политике Организации, рассматриваются Советом Директоров и утверждаются генеральным директором Организации.

Изменение учетной политики должно вводиться с 1 января года (начала финансового года), следующего за годом ее утверждения.

Ответственность за соблюдение методологии возлагается на Главного бухгалтера организации.

В процессе ведения бухгалтерского учета Организация применяет также методические указания по направлениям учета, перечень которых приведен в Приложении №2.

1. ОРГАНИЗАЦИОННЫЕ АСПЕКТЫ УЧЕТНОЙ ПОЛИТИКИ

1.1. Общие сведения об Организации электросвязи

Виды деятельности Организации определены ее Уставом.

Организация электросвязи имеет три уровня управления:
Дирекция Организации;
региональные филиалы;
структурные подразделения.

1.2. Принципы организации учетных служб

Понятие **"учетная служба"** определяет комплекс структурных единиц и должностных лиц, выполняющих операции по сбору первичной информации, ее обработке и анализу, а также составлению на ее основе отчетов для различных групп пользователей.

Под **специализированной учетной службой** понимается структурная единица Организации, выполняющая функции сбора, обработки и группировки информации в виде сводных регистров аналитического и синтетического учета, внесения записей на счета бухгалтерского учета. В зависимости от уровня организационной структуры в состав специализированной учетной службы входят: бухгалтерия, налоговый отдел, группа сводной отчетности и пр.

Функциональные службы (например, линейно-кабельный цех, транспортный цех, отдел по работе с клиентами и т.п.) выполняют функции по сбору и обработке первичной информации для ее дальнейшей регистрации в системе учета.

На каждом уровне управления учетная служба обеспечивает сбор и обработку информации с целью предоставления данных пользователям для выработки, обоснования и принятия решений на своем уровне управления, а также для обеспечения вышестоящих органов управления информацией, необходимой для выработки, обоснования и принятия решений на более высоком уровне управления.

Принципы разделения полномочий и ответственности учетных служб на каждом из трех уровней управления (по вертикали) и внутри каждого уровня управления (по горизонтали) регулирует "Положение о принципах организации учета". Этим же Положением определяются структура, функции и задачи специализированных и функциональных учетных служб. Распределение обязанностей и взаимоотношения между специализированными и функциональными учетными службами регулируются Положением о принципах организации учета и Положением о системе документооборота.

Ведение бухгалтерского учета и контроля возлагается на бухгалтерскую службу Организации как составную часть специализированной учетной службы, возглавляемую главным бухгалтером. Бухгалтерская служба Организации включает в себя бухгалтерии подразделений, непосредственно возглавляемые главными (старшими) бухгалтерами этих подразделений. Функции центральной бухгалтерии выполняет бухгалтерия Дирекции Организации.

1.3. Порядок организации документооборота и технология обработки учетной документации

В Организации правила и порядок организации документооборота, график

документооборота, технология обработки первичных учетных документов, в том числе:

порядок создания первичных документов;

порядок проверки первичных документов;

порядок и сроки их передачи для отражения в бухгалтерском учете;

порядок передачи документов в архив

регламентируется Положением о системе документооборота.

В Организации применяются унифицированные формы первичной учетной документации, утвержденные Госкомстатом РФ.

При оформлении финансово-хозяйственных операций, по которым не предусмотрены унифицированные формы, применяются самостоятельно разработанные формы первичных учетных документов (в том числе включенные в Положение о системе документооборота), содержащие обязательные реквизиты, установленные Федеральным Законом от 21.11.1996 №129-ФЗ «О бухгалтерском учете».

Право подписи первичных учетных документов устанавливаются внутренними организационно-распорядительными документами.

Для проведения инвентаризации на уровне Дирекции Организации и Управлений региональных филиалов создаются постоянно действующие инвентаризационные комиссии, состав которых утверждается:

Подробный порядок организации и проведения инвентаризации имущества и обязательств Организации определен в Положении о порядке проведения инвентаризации активов и обязательств и мерах по обеспечению сохранности активов.

1.5. Порядок составления бухгалтерской отчетности Организации

Бухгалтерская отчетность Организации составляется в порядке и в сроки, предусмотренные Федеральным Законом от 21.11.96 №129-ФЗ "О бухгалтерском учете" и другими нормативными актами Российской Федерации, регламентирующими ведение бухгалтерского учета и отчетности.

Бухгалтерская отчетность Организации формируется бухгалтерией Дирекции Организации на основании обобщенной информации об имуществе, обязательствах и результатах деятельности Организации с учетом информации, предоставляемой бухгалтериями региональных филиалов. Формирование отчетности бухгалтериями региональных филиалов производится на основании данных, предоставляемых бухгалтериями структурных подразделений.

При составлении бухгалтерской отчетности применяются формы, разработанные Организацией с учетом рекомендаций, содержащихся в соответствующих нормативных документах.

Внутренние формы бухгалтерской отчетности, а также конкретные сроки их представления приведены в Положении о порядке формирования бухгалтерской отчетности Организации.

1.6. Рабочий план счетов Организации

При ведении бухгалтерского учета всеми подразделениями Организации используется Единый план счетов (Приложение 1).

Порядок использования Единого плана счетов, включая распределение компетенции по ведению счетов и субсчетов бухгалтерского учета между бухгалтерскими службами разных уровней управления Организации, регламентируется Инструкцией по применению Единого плана счетов.

© СВЯЗЬИНВЕСТ 2004

2. Методические аспекты Учетной политики

2.1. Порядок учета нематериальных активов

Сумма амортизационных отчислений по нематериальным активам определяется ежемесячно по нормам, рассчитанным, исходя из их первоначальной стоимости и срока полезного использования линейным способом.

Ожидаемый срок полезного использования нематериальных активов определяется при их постановке на учет специально созданной комиссией и утверждается генеральным директором Организации.

Амортизационные отчисления по нематериальным активам отражаются в бухгалтерском учете путем накопления на счете 05 "Амортизация нематериальных активов" сумм амортизации начисленной линейным способом.

2.2. Порядок учета основных средств

Переоценка основных средств в 2005 г. не производится.

Начисление амортизации по объектам основных средств производится линейным способом исходя из первоначальной стоимости или восстановительной стоимости (в случае проведения переоценки) объекта основных средств и нормы амортизации, исчисленной исходя из срока полезного использования этого объекта.

Срок полезного использования по группам однородных объектов основных средств определяется комиссией по приемке основных средств в соответствии с Единой классификацией основных средств ОАО «ЦентрТелеком», утвержденной Приказом Генерального директора.

По приобретенным основным средствам, ранее бывшим в эксплуатации, срок полезного использования определяется исходя из сроков фактической эксплуатации и предполагаемых сроков полезного использования основных средств в Организации.

Объекты основных средств стоимостью не более 10000 рублей за единицу, а также книги, брошюры и т.п. издания, приобретенные начиная с 01.01.2002 года, списываются на затраты производства (расходы на продажу) по мере отпуска их в производство или эксплуатацию с использованием счета 02 «Амортизация основных средств». В целях обеспечения сохранности этих объектов в производстве или при эксплуатации в Организации осуществляется надлежащий контроль за их движением на счете 01 «Основные средства».

Готовые к эксплуатации объекты, которые планируются к использованию в составе основных средств, до момента начала эксплуатации числятся в составе вложений во внеоборотные активы.

Объекты недвижимости, по которым закончены капитальные вложения, оформлены соответствующие первичные учетные документы по приемке-передаче, принимаются к бухгалтерскому учету в качестве основных средств с начала их фактической эксплуатации с выделением на отдельном субсчете к счету учета основных средств.

По основным средствам, полученным по договорам лизинга, устанавливается срок полезного

использования равный сроку действия договора лизинга.

Затраты на проведение всех видов ремонтов включаются в себестоимость того отчетного периода, в котором они были произведены. Резерв предстоящих расходов на ремонт основных средств не создается.

2.3. Порядок учета материально-производственных запасов

Формирование фактической себестоимости материально-производственных запасов (МПЗ) в бухгалтерском учете Организации осуществляется с использованием счетов 15 "Заготовление и приобретение материальных ценностей" и 16 "Отклонение в стоимости материальных ценностей".

Бухгалтерский учет материально – производственных запасов на счетах 10 "Материалы" и 41 "Товары" осуществляется по учетным ценам.

Материально-производственные запасы (сырье, материалы, товары) принимаются к бухгалтерскому учету по учетной цене, под которой понимается:

при приобретении МПЗ за плату – цена поставщика в соответствии с договором поставки (купли-продажи);

при изготовлении МПЗ самой организацией – сумма фактических затрат, связанных с их производством;

при внесении МПЗ в счет вклада в уставный капитал организации – денежная оценка, согласованная учредителями с учетом требований Закона «Об акционерных обществах»;

при получении МПЗ по договору дарения (безвозмездно), а также остающихся от выбытия основных средств и другого имущества – текущая рыночная стоимость на дату принятия к бухгалтерскому учету;

при получении МПЗ по договорам, предусматривающим исполнение обязательств (оплату) неденежными средствами – стоимость активов, переданных или подлежащих передаче Организацией[16].

Транспортно-заготовительные расходы (ТЗР) и расходы по доведению материалов до состояния, в котором они пригодны к использованию в предусмотренных в Организации целях, учитываются в бухгалтерском учете на счете 16 «Отклонения в стоимости материалов» независимо от удельного веса ТЗР или величины отклонений к учетной стоимости материала.

Товары в розничной торговле, учитываемые на счете 41.02, отражаются в бухгалтерском учете по продажным ценам.

Затраты по заготовке и доставке товаров, предназначенных для реализации через розничную и оптовую торговую сеть, до складов Организации учитываются в составе издержек обращения.

Готовая продукция учитывается по фактической производственной себестоимости изготовления

[16] Стоимость активов, переданных или подлежащих передаче Организацией, устанавливаются исходя из цены, по которой в сравнимых обстоятельствах обычно Организация определяет стоимость аналогичных активов. При невозможности установить стоимость ценностей, переданных или подлежащих передаче организацией, стоимость материально- производственных запасов, полученных организацией по договорам, предусматривающим исполнение обязательств (оплату) неденежными средствами, определяется исходя из стоимости, по которой в сравнимых обстоятельствах приобретаются аналогичные материально-производственные запасы.

© СВЯЗЬИНВЕСТ 2004

без использования счета 40 "Выпуск продукции (работ, услуг)".

В составе материально-производственных запасов учитываются материальные ценности, которые нецелесообразно учитывать в составе основных средств независимо от срока службы в силу нерациональности пообъектного учета. К таким предметам относятся: канцтовары, посуда, мелкий хозяйственный инвентарь и рабочие инструменты.

Спецодежда, приобретенная в собственность организацией, принимается к учету в сумме фактических затрат на приобретение по дебету счета 10 «Материалы».

Спецодежда стоимостью не более 10000 руб. за единицу при любом сроке использования, а также спецодежда со сроком полезного использования не превышающим 12 месяцев при любой стоимости за единицу списывается на счета учета затрат полностью по мере передачи в эксплуатацию.

Спецодежда стоимостью более 10000 руб. за единицу и сроком полезного использования, превышающим 12 месяцев, после передачи в эксплуатацию учитывается на счете «Специальная одежда в эксплуатации» с погашением стоимости равными долями в течение срока полезного использования.

Оценка выбывающих материально–производственных запасов производится следующими способами:

По способу средней себестоимости:

сырье;

материалы;

готовая продукция;

товары для перепродажи.

По себестоимости каждой единицы:

драгоценные металлы.

2.4. Порядок пересчета активов и обязательств, выраженных в иностранной валюте

Пересчет стоимости денежных знаков в кассе Организации, средств на счетах в кредитных организациях, денежных и платежных документов, краткосрочных ценных бумаг, средств в расчетах (включая по заемным обязательствам) с юридическими и физическими лицами, остатков средств целевого финансирования, полученных из бюджета или иностранных источников в рамках технической или иной помощи Российской Федерации в соответствии с заключенными соглашениями (договорами), выраженной в иностранной валюте, в рубли производится на дату совершения операции в иностранной валюте, а также на отчетную дату составления бухгалтерской отчетности.

2.5. Порядок формирования доходов

Для целей учета обычные виды деятельности Организации подразделяются на профильные и непрофильные.

Под профильными видами подразумеваются те виды деятельности, которые непосредственно связаны с оказанием услуг связи. Все остальные виды деятельности являются непрофильными.

Обычными видами деятельности признаются:

профильные виды деятельности:

2.6. Порядок формирования расходов

Для целей учета расходов обычные виды деятельности Организации подразделяются на профильные и непрофильные.

В бухгалтерском учете ведется раздельный учет затрат по видам услуг, работ и производимой продукции, которые являются объектами калькулирования.

Для целей распределения затрат по профильным видам деятельности на объекты калькулирования Организация использует метод учета затрат по производственным процессам.

Производственным процессом называется однозначно определяемая деятельность (последовательность действий или совокупность функций и заданий), не ограниченная во времени и имеющая распознаваемый результат.

Для целей распределения затрат на объекты калькулирования процессы подразделяются на основные производственные процессы, вспомогательные производственные процессы и совместные процессы.

К основным производственным процессам относятся процессы, совершаемые непосредственно для оказания услуг связи.

К вспомогательным производственным процессам относятся процессы, необходимые для осуществления основных и совместных производственных процессов и опосредованно связанные с оказанием услуг связи.

К совместным производственным процессам относятся процессы, необходимые для

осуществления основных производственных процессов, но не связанные с оказанием услуг связи.

Базами распределения затрат являются фактические натуральные показатели производственной деятельности Организации, состав которых определен в Методических указаниях по учету расходов.

Все затраты, связанные с профильными видами деятельности, являются косвенными, то есть не относимыми прямо, а распределяемыми между объектами калькулирования, и учитываются в разрезе производственных процессов.

Затраты по профильным видам деятельности отражаются на счетах 30 "Основные производственные процессы" и 31 "Вспомогательные производственные процессы".

Затраты, связанные с непрофильными видами деятельности, учитываются на счетах 23 "Вспомогательные производства", 29 "Обслуживающие производства и хозяйства" и 44 «Расходы на продажу» в разрезе видов деятельности.

Производится калькуляция полной себестоимости оказанных услуг, выполненных работ, произведенной продукции без выделения управленческих и коммерческих расходов.

Затраты по совместным производственным процессам отражаются на счете 32 "Совместные производственные процессы".

Затраты, собранные на счете 31 "Вспомогательные производственные процессы", распределяются между основными и совместными производственными процессами на счета 30 "Основные производственные процессы" и 32 "Совместные производственные процессы" на основании данных о базах распределения, предоставляемых производственными службами в конце отчетного периода.

Затраты, собранные на счете 30 "Основные производственные процессы", распределяются на счет 20 "Основное производство" по объектам калькулирования (услугам) на основании данных о базах распределения, предоставляемых производственными службами в конце отчетного периода, а также на счет 33 "Затраты на эксплуатацию оборудования" по видам оборудования условной цифровой сети, составляемой инженерными службами ежегодно. Распределение затрат по видам оборудования производится в соответствии с расчетными данными инженерных служб о доле задействования оборудования в основных производственных процессах.

Затраты, собранные на счете 33 "Затраты на эксплуатацию оборудования" распределяются на счет 20 "Основное производство" по объектам калькулирования (услугам) на основании данных инженерных служб об интенсивности и продолжительности использования каждого из видов оборудования конкретной услугой, которые рассчитываются в начале каждого года или при существенных изменениях в топографии сети связи.

Для целей расчета себестоимости услуг, работ, продукции непрофильных видов деятельности, фактические затраты на оказанные услуги, законченные работы и продукцию, переданную на склад, собранные на счетах 23 "Вспомогательные производства" и 29 "Обслуживающие производства и хозяйства", списываются на счет 43 "Готовая продукция" (в случае выпуска готовой продукции), соответствующие счета производственных процессов (в случае оказания услуг или выполнения работ для профильных видов деятельности) или счет 90 "Продажи" субсчет 90-04 "Себестоимость продаж по непрофильным видам деятельности" (в случае оказания услуг, выполнения работ на сторону). Сальдо по дебету счетов 23 "Вспомогательные

производства" и 29 "Обслуживающие производства и хозяйства" отражает стоимость остатков незавершенного производства.

Затраты, отнесенные на счет совместных производственных процессов 32 "Совместные производственные процессы", списываются в конце отчетного периода на счета 20 "Основное производство" пропорционально суммам затрат, отнесенным на соответствующие счета.

Затраты на оказание услуг связи, собранные по видам услуг на счете 20 "Основное производство" полностью списываются в конце отчетного периода на счет 90 "Продажи" субсчет 90-02 "Себестоимость продаж (по профильным видам деятельности)" с аналитикой по объектам калькулирования (услугам).

Порядок учета и калькулирования себестоимости продукции (работ, услуг) непрофильных видов деятельности устанавливается Организацией самостоятельно в соответствии с рекомендациями отраслевых инструкций, регулирующих указанный порядок в тех отраслях, к которым относится данный вид непрофильной деятельности.

Распределение расходов обслуживающих производств и хозяйств по направлениям их деятельности (реализация, безвозмездная передача, оказание услуг другим подразделениям Организации) производится пропорционально прямым расходам.

Стоимость основных средств до 10000 рублей за единицу, списанных на затраты производства (расходы на продажу) по мере отпуска их в производство признается расходами материального характера.

2.7. Порядок учета расходов будущих периодов

К расходам будущих периодов относятся следующие расходы, которые признаны в отчетном периоде, но не могут быть включены в себестоимость реализованных услуг, работ, продукции этого отчетного периода, например:

расходы, связанные с освоением новых производств или видов продукции до возникновения фактов их реализации;

расходы на оплату отпусков будущих периодов;

расходы на приобретение лицензий;

расходы по страхованию имущества;

расходы, связанные с приобретением программных продуктов и баз данных по договорам купли-продажи или договорам мены, если эти активы не соответствуют условиям, установленным для нематериальных активов;

расходы, связанные с досрочным выкупом лизингового имущества;

прочие.

Расходы будущих периодов подлежат равномерному списанию за счет соответствующих источников покрытия в течение периода, к которому они относятся. При невозможности определить период, в течение которого должен быть списан произведенный расход, указанный период устанавливается специально созданной комиссией и утверждается руководителем организации (филиала, структурного подразделения).

Для целей составления отчетности расходы, связанные с приобретением программных продуктов и баз данных, а также расходы, связанные с досрочным выкупом лизингового имущества классифицируются как прочие внеоборотные активы.

Порядок учета расчетов

© СВЯЗЬИНВЕСТ 2004

Расчеты неденежными средствами отражаются в учете обособленно с использованием счета 76.15.

Организация осуществляет перевод долгосрочной задолженности (дебиторской и кредиторской) в состав краткосрочной в момент, когда по условиям договора до даты погашения задолженности остается 365 дней.

Для целей составления отчетности авансы капитального характера классифицируются как прочие внеоборотные активы.

2.9. Порядок учета кредитов и займов полученных

Организация осуществляет перевод долгосрочной задолженности по полученным кредитам и займам в состав краткосрочной (на соответствующий субсчет счета 66 «Расчеты по краткосрочным кредитам и займам») в момент, когда по условиям договора займа и (или) кредита до возврата основной сумм долга остается 365 дней.

Если организация получает долгосрочный заем по договору, условиями которого предусмотрено периодическое погашение суммы займа, то по мере того, как до погашения очередной части займа остается 365 дней, она переводится в состав краткосрочной части долгосрочной задолженности на соответствующий субсчет счета 66 «Расчеты по краткосрочным кредитам и займам».

В случае заключения соглашения о пролонгации договора краткосрочного займа или перенесении срока погашения краткосрочной части задолженности по долгосрочному займу таким образом, что срок погашения займа или его указанной части будет составлять более 365 дней, сумма задолженности по займу или его частичному погашению должна быть переведена из краткосрочной задолженности в состав долгосрочной задолженности (на соответствующий субсчет счета 67 «Расчеты по долгосрочным кредитам и займам»).

Причитающийся к уплате заимодавцу доход в виде процентов начисляется равномерно (ежемесячно) в соответствии со ставкой, установленной в договоре. Если в соответствии с условиями договора уплата процентов приходится не на последний день месяца, следует доначислить задолженность перед кредитором на сумму процентов, приходящуюся на конец месяца.

По займам, полученным в денежной форме и привлеченным путем выпуска собственных векселей Организации, сумма дисконта, причитающегося к оплате векселедержателю, относится на расходы будущих периодов, с последующим списанием в состав операционных расходов ежемесячно равными долями в течение срока обращения векселей.

При этом по векселям с оговоркой "по предъявлении, но не ранее" в качестве срока обращения, исходя из которого определяется дисконт на конец отчетного периода, используется предполагаемый срок обращения векселей, определяемый в соответствии с вексельным законодательством (365 (366) дней плюс срок от даты составления векселя до минимальной даты предъявления векселя к платежу).

По займам, полученным в денежной форме и привлеченным путем выпуска облигаций Организации, в случаях продажи эмитированных облигаций по цене отличной от их номинала (с дисконтом), сумма дисконта относится на расходы будущих периодов, с последующим

© СВЯЗЬИНВЕСТ 2004

списанием в состав операционных расходов ежемесячно равными долями в течение срока обращения облигаций.

Включение дополнительных затрат, связанных с получением займов и кредитов, размещением заемных обязательств, в состав операционных расходов производится в том отчетном периоде, в котором были понесены указанные затраты.

2.10. Порядок организации учета внутрихозяйственных расчетов и передачи информации обособленными подразделениями

Для учета внутрихозяйственного оборота Организацией применяется счет 79 "Внутрихозяйственные расчеты".

Все финансово-хозяйственные операции, осуществляемые между подразделениями Организации, производятся на основании извещений (авизо) через вышестоящий уровень управления. Операции между структурными подразделениями проводятся через соответствующие региональные филиалы. Операции между региональными филиалами проводятся через Дирекцию Организации.

2.11. Порядок создания и использования фондов специального назначения

Организация не создает какие-либо фонды за счет нераспределенной прибыли отчетного года за исключением фондов, создание которых предусмотрено учредительными документами Организации.

Порядок создания и использования указанных фондов определяется на основании решения общего собрания акционеров Организации с учетом требований Закона «Об акционерных обществах».

2.12. Порядок создания и использования резервов

Организация создает следующие виды резервов:

резерв под обесценение финансовых вложений (на конец отчетного года);

резервы по сомнительным долгам (ежеквартально);

резерв под снижение стоимости материальных ценностей (на конец отчетного года);

резерв предстоящих расходов по выплате вознаграждений по итогам года членам совета директоров, правления, ревизионной комиссии (на конец отчетного года).

Резерв сомнительных долгов создается ежеквартально перед составлением бухгалтерской отчетности в отношении сомнительных долгов.

Резерв сомнительных долгов создается по результатам инвентаризации дебиторской задолженности, при этом сомнительным долгом признается дебиторская задолженность, которая не погашена в сроки, установленные договором и не обеспечена залогом, поручительством, банковской гарантией.

Учитывая, индивидуальный анализ каждого сомнительного долга по услугам связи на предприятиях связи невозможен в силу большого числа абонентов, резерв создается по всем непогашенным долгам, оплата которых на дату создания резерва просрочена на 90 и более дней, в размере 100 процентов суммы долга. По долгам, оплата которых задержана менее чем на 90 дней, резерв не создается.

2.13. Порядок учета государственной помощи

Бюджетные средства (субвенции, субсидии) признаются в бухгалтерском учете по мере фактического получения денежных средств и ресурсов, отличных от денежных средств.

2.14. Порядок учета финансовых вложений.

Финансовые вложения для целей бухгалтерского учета классифицируются по видам вложений и их срочности.

При продаже, ином выбытии, включая погашение ценных бумаг, оценка выбывающих эмиссионных ценных бумаг производится по методу стоимости первых по времени приобретения ценных бумаг (ФИФО), оценка выбывающих неэмиссионных ценных бумаг – по фактической стоимости каждой бумаги.

По срочности финансовые вложения делятся на:

долгосрочные – вложения, осуществленные с намерением получать доходы по ним более 12 месяцев после отчетной даты, если установленный срок их погашения превышает 12 месяцев после отчетной даты;

краткосрочные:

вложения, осуществленные без намерения получать доходы по ним более 12 месяцев;

вложения, установленный срок погашения которых не превышает 12 месяцев после отчетной даты;

ценные бумаги, приобретенные для перепродажи, независимо от срока их погашения.

Долгосрочные финансовые вложения подлежат переводу в краткосрочные:

вследствие изменения намерений получить по ним доход более 12 месяцев после отчетной даты;

если срок до даты их погашения стал не более 12 месяцев после отчетной даты.

Краткосрочные финансовые вложения, установленный срок погашения которых превышает 12 месяцев после отчетной даты, подлежат переводу в долгосрочные (на соответствующий субсчет) при изменении первоначального намерения получить по ним доход в течение не более 12 месяцев после отчетной даты.

Оценка срочности вложений производится подразделением (лицом), назначенным приказом руководителя Организации и фиксируется в передаваемом в бухгалтерию документе по установленной Организацией форме.

Первоначальная стоимость финансовых вложений, приобретаемых за плату, формируется в сумме фактических затрат, связанных с их приобретением.

Первоначальная стоимость финансовых вложений, приобретаемых по договорам, предусматривающим оплату в рублях в сумме, эквивалентной сумме в иностранной валюте (условных денежных единицах) формируется с учетом суммовых разниц, возникающих до принятия активов в качестве финансовых вложений.

По долговым ценным бумагам не производится отнесение на финансовые результаты разницы между суммой фактических затрат на приобретение ценной бумаги и ее номинальной стоимостью.

Стоимость финансовых вложений, по которым можно определить в установленном порядке

текущую рыночную стоимость, корректируется на конец отчетного года.

Порядок учета расходов на научно-исследовательские, опытно-конструкторские и технологические работы.

Для целей составления отчетности признаются прочими внеоборотными активами завершенные научно-исследовательские, опытно-конструкторские и технологические работы, по которым получены результаты, не подлежащие правовой охране по действующему законодательству или подлежащие правовой охране, но не оформленные в установленном законодательством порядке.

Расходы на НИОКР списываются линейным способом на расходы по обычным видам деятельности с 1-го числа месяца, следующего за месяцем, в котором было начато фактическое применение полученных результатов в производстве продукции, оказании услуг, либо для управленческих нужд.

Списание расходов на научно-исследовательские, опытно-конструкторские и технологические работы осуществляется равномерно линейным способом в течение 3 лет.

УЧЕТНАЯ ПОЛИТИКА ДЛЯ ЦЕЛЕЙ НАЛОГООБЛОЖЕНИЯ ОТКРЫТОГО АКЦИОНЕРНОГО ОБЩЕСТВА «ЦЕНТРАЛЬНАЯ ТЕЛЕКОММУНИКАЦИОННАЯ КОМПАНИЯ»

на 2005 год

Москва
2004

Общие положения

Настоящее Положение об учетной политике Открытого акционерного общества «Центральная телекоммуникационная компания» (далее – Организация) для целей налогообложения разработано в соответствии с требованиями налогового законодательства Российской Федерации.

В настоящем Положении под учетной политикой Организации для целей налогообложения понимается выбранная Организацией совокупность правил организации и технологии реализации способов ведения налогового учета с целью формирования полной и достоверной информации о порядке учета для целей налогообложения хозяйственных операций, осуществленных в течение отчетного (налогового) периода, а также обеспечения информацией внутренних и внешних пользователей для контроля за правильностью, полнотой и своевременностью исчисления и уплаты налогов.

В случаях, когда системой нормативного регулирования налогового учета Российской Федерации не установлен способ ведения налогового учета по конкретному вопросу, при формировании учетной политики Организацией осуществлялась разработка соответствующего способа учета, исходя из действующего налогового законодательства.

Учетная политика Организации для целей налогообложения, являясь основой системы налогового учета, призвана обеспечить:

выполнение таких основополагающих принципов учета, как полнота, точность, своевременность, непротиворечивость, рациональность, непрерывность и последовательность;

соблюдение установленных налоговым законодательством требований к налоговой отчетности;

единство методики при организации и ведении налогового учета в Организации в целом и в ее подразделениях[17];

оперативность и гибкость реагирования системы налогового учета на изменения условий осуществления финансово-хозяйственной деятельности и налогообложения;

правильное, полное и своевременное исчисление и уплату налогов.

В настоящем Положении наряду с общими обязательными требованиями и правилами учтены особенности Организации электросвязи:

наличие внутренних документов, регламентирующих учетный процесс под углом зрения отраслевой специфики;

наличие значительного количества подразделений, в ряде случаев территориально удаленных от места нахождения Организации;

К способам ведения налогового учета относятся:

методы группировки и оценки фактов хозяйственной деятельности, погашения стоимости активов, признания доходов и расходов;

приемы организации документооборота;

система внутреннего контроля;

способы использования данных бухгалтерского учета и системы учетных регистров;

иные соответствующие способы, методы и приемы учета.

Способы ведения налогового учета, избранные Обществом при формировании настоящей Учетной политики, утверждаются Приказом генерального директора Организации и применяются с первого января 2005 года.

В Организации созданы следующие подразделения:

филиал (региональный филиал, РФ) – обособленное подразделение, расположенное вне места нахождения (государственной регистрации юридического лица) Организации, осуществляющее функции, определенные положением о филиале, и наделенное имуществом, которое учитывается на отдельном балансе филиала и балансе Организации;

обособленное подразделение организации - иное территориально обособленное от Организации

[17] Для целей данного документа под подразделениями Организации, если не указано иное, понимаются региональные филиалы и структурные подразделения

подразделение, по месту нахождения которого оборудованы стационарные рабочие места.

Настоящим Положением в своей деятельности должны руководствоваться все лица, связанные с решением вопросов, регламентируемых Учетной политикой для целей налогообложения:

руководство Организации;

руководители региональных филиалов и структурных подразделений, отвечающие за организацию и состояние учета во вверенных им подразделениях;

работники служб и отделов, отвечающие за своевременную разработку, пересмотр, доведение нормативно-справочной информации до подразделений-исполнителей;

работники всех служб и подразделений, отвечающие за своевременное предоставление первичных документов в бухгалтерию и/или налоговые службы;

работники бухгалтерской (налоговой) службы, отвечающие за своевременное и качественное выполнение всех видов работ по налоговому учету и составлению налоговой отчетности;

Учетная политика для целей налогообложения сформирована на 2005 год и не подлежит изменению за исключением следующих случаев:

изменения законодательства о налогах и сборах;

изменения применяемых методов учета.

В случае если Организация начала осуществлять новые виды деятельности, она также обязана определить и включить в учетную политику для целей налогообложения принципы и порядок отражения для целей налогообложения этих видов деятельности.

Изменения, вносимые в текст Положения об учетной политике Организации для целей налогообложения утверждаются генеральным директором Организации.

Решение о внесении изменений в учетную политику для целей налогообложения при изменении применяемых методов учета принимается с начала нового налогового периода, а при изменении законодательства о налогах и сборах не ранее чем с момента вступления в силу изменений норм указанного законодательства.

Общие принципы организации и ведения налогового учета

Основными задачами организации налогового учета являются:

определение общих принципов разделения полномочий и ответственности налоговых и других учетных служб на каждом уровне управления (по вертикали) и внутри каждого уровня управления (по горизонтали);

создание единой системы нормативных документов Организации, регламентирующих деятельность налоговых и других учетных служб в системе ведения налогового учета Организации.

Налоговый учет осуществляется налоговой службой на всех уровнях управления Организации (в филиалах, представительствах и структурных подразделениях филиалов). Налоговые службы создаются в виде отделов (секторов), налоговых групп бухгалтерий и подчиняются главным (старшим) бухгалтерам.

Ответственность за организацию и ведение налогового учета несут генеральный директор и главный бухгалтер Организации, руководитель и бухгалтер регионального филиала, структурного подразделения.

В соответствии со статьей 19 НК РФ плательщиком налогов и сборов является Организация. Подразделения Организации исполняют обязанности налогоплательщика и налогового агента в соответствии с налоговым законодательством и нормативными документами Организации, регулирующими ведение налогового учета по отдельным налогам.

Распределение функций по ведению налогового учета и отчетности, исчислению и уплате налогов и других обязательных платежей между уровнями управления определяется налоговым законодательством по конкретным налогам и настоящей Учетной политикой. Порядок ведения налогового учета на каждом уровне управления и документооборот между уровнями управлениями могут определяться отдельными Методическими указаниями по исчислению и уплате налогов.

Налоговые декларации составляются на основании синтетических регистров налогового учета. Синтетические регистры налогового учета ведутся в форме листов деклараций по соответствующим налогам с дополнительной детализацией (расшифровкой).

Состав и формы регистров налогового учета по налогу на прибыль приведены в Приложении 1 к настоящему Положению.

Организация учета по налогу на добавленную стоимость

3.1 Порядок ведения журналов регистрации счетов-фактур, книги покупок и книги продаж

Организация ведет книгу покупок и книгу продаж, журналы учета полученных и выставленных счетов-фактур с использованием вычислительной техники. Не позднее 20 числа месяца, следующего за отчетным, книга покупок распечатывается, страницы пронумеровываются, прошнуровываются и скрепляются печатью.

Журналы учета полученных и выставленных счетов-фактур, книг покупок и книг продаж ведутся в электронном виде региональными филиалами и структурными подразделениями в виде разделов единых журналов учета полученных и выставленных счетов-фактур, единой книги покупок и единой книги продаж Организации.

Счет-фактура составляется с использованием компьютера, но может быть заполнен от руки.

Счет-фактура, книга покупок, книга продаж подписываются генеральным директором и главным бухгалтером Организации либо иными должностными лицами. Круг лиц, уполномоченных подписывать данные документы, определяется приказом по Организации (филиалу, структурному подразделению).

При оказании услуг связи счета-фактуры выставляются одновременно с платежно-расчетными документами один раз в месяц не позднее пятого числа месяца, следующего за истекшим месяцем.

При оказании услуг связи физическим лицам счета-фактуры не выписываются. Организацией составляется единый счет-фактура на общую сумму оказанных услуг физическим лицам за отчетный период.

Счета-фактуры на оказанные услуги (выполненные работы, отгруженные товары) выставляются покупателям дирекцией, региональными филиалами и структурными подразделениями (в соответствии с утвержденной структурой Организации).

Нумерация счетов-фактур в книге покупок и книге продаж производится в порядке возрастания номеров. При этом используются составные номера с индексом подразделения. Присвоение номеров производится в соответствии с кодификацией обособленных подразделений, разработанной Организацией. Код подразделения является составной частью номера счета-фактуры.

Разделы книг покупок и продаж за отчетный период представляются в электронном виде региональными филиалами и структурными подразделениями в дирекцию Организации для оформления единой книги покупок и единой книги продаж и составления деклараций по налогу на добавленную стоимость.

Вторые экземпляры выставленных счетов-фактур, книги покупок и книги продаж хранятся в электронном виде. При необходимости вышеуказанные документы могут быть распечатаны полностью и оформлены в надлежащем порядке.

3.2. Момент определения налоговой базы при реализации товаров, работ, услуг

В целях исчисления налога на добавленную стоимость моментом определения налоговой базы при реализации (передаче) товаров (работ, услуг) Организацией признается день оплаты отгруженных товаров (выполненных работ, оказанных услуг).

3.3. Порядок ведения раздельного учета операций, не облагаемых налогом на добавленную стоимость

Организация ведет раздельный учет операций, облагаемых и не облагаемых налогом.

Суммы налога, предъявленные продавцами товаров (работ, услуг) Организации, принимаются к вычету либо учитываются в стоимости этих товаров (работ, услуг) в той пропорции, в которой

они используются для производства и (или) реализации товаров (работ, услуг), операции по реализации которых подлежат либо не подлежат налогообложению (освобождаются от налогообложения). Указанная пропорция определяется исходя из стоимости отгруженных товаров (работ, услуг), операции по реализации которых подлежат налогообложению (освобождены от налогообложения), в общей стоимости товаров (работ, услуг), отгруженных за налоговый период.

В случае если в течение налогового периода доля совокупных расходов на производство товаров (работ, услуг), операции по реализации которых не подлежат налогообложению, не превышает 5 процентов общей величины совокупных расходов на производство, суммы налога, предъявленные продавцами товаров (работ, услуг) Организации, пропорциональное деление сумм входного НДС не осуществляется. При этом все суммы налога, предъявленные Организации продавцами используемых в производстве товаров (работ, услуг) в указанном налоговом периоде, подлежат вычету в порядке, установленном законодательством.

3.4. Порядок ведения раздельного учета операций, облагаемых налогом на добавленную стоимость по разным ставкам

Организация ведет раздельный учет операций, облагаемых налогом по разным ставкам.

Суммы налога, предъявленные продавцами товаров (работ, услуг) Организации, приходящиеся на операции, облагаемые НДС, подлежат распределению на операции, облагаемые по ставке 0%, и на операции, облагаемые по ставке, отличной от 0 %.

Такое распределение осуществляется в следующем порядке:

На операции, облагаемые по ставке 0 %, относятся только те суммы налога, предъявленные продавцами товаров (работ, услуг) Организации, которые приходятся на приобретенные товары (работы, услуги), использованные исключительно при осуществлении таких операций.

Остальные суммы, предъявленные продавцами товаров (работ, услуг) Организации, относятся на операции, облагаемые по ставке, отличной от 0 %.

3.5. Служебная электросвязь

Служебная электросвязь в соответствии с законодательством РФ связи не может быть использована для оказания услуг связи на условиях договора возмездного оказания услуг связи, вследствие чего не признается объектом налогообложения по НДС. Порядок признания Организацией телефонной связи служебной приведен в разделе 4.1 настоящего Положения.

Организация налогового учета по налогу на прибыль

Общий порядок признания доходов и расходов

В целях исчисления налога на прибыль доходы Организации признаются по методу начисления, то есть в том отчетном (налоговом) периоде, в котором они имели место, независимо от фактического поступления денежных средств, иного имущества (работ, услуг) и (или) имущественных прав.

Доходы от сдачи в аренду имущества Организации признаются доходами от реализации.

Доходы от предоставления в пользование прав на результаты интеллектуальной деятельности и приравненные к ним средства индивидуализации (в частности, от предоставления в пользование прав, возникающих из патентов на изобретения, промышленные образцы и другие виды интеллектуальной собственности) признаются внереализационными.

Для учета доходов от реализации для целей налогообложения принимается группировка доходов, аналогичная принятой для целей учета доходов в бухгалтерском учете (п.2.5. Учетной политики по бухгалтерскому учету).

С учетом специфики оказания услуг связи по отдельным видам деятельности устанавливается следующий момент признания дохода:

предоставление местного телефонного соединения (разговора) абонентам фиксированной связи в городской и сельской местности – последний день месяца, в котором оказаны услуги;

предоставление местного телефонного соединения с городского таксофона – последний день месяца, в котором оказана услуга;

предоставление междугороднего (внутризонового) телефонного соединения, в том числе с использованием таксофона – последний день месяца, в котором оказана услуга;

предоставление междугороднего (внутризонового) телефонного соединения в местах коллективного пользования – день предоставления услуги;

предоставление международного телефонного соединения, в том числе с использование таксофона – последний день месяца, в котором предоставлена услуга;

предоставление международного телефонного соединения в местах коллективного пользования – день предоставления услуги;

передача внутренних и международных телеграмм - день предоставления услуги;

пользование абонентской радиоточкой - последний день месяца, в котором оказана услуга;

услуги Интернет - последний день месяца, в котором оказана услуга.

Для внереализационных доходов устанавливается следующий момент их признания:

Для внереализационных доходов, указанных в п. 4 ст. 271 НК РФ, в соответствии с порядком, установленным данной нормой.

Для имущества, выявленного в результате инвентаризации – дата оформления результатов инвентаризации.

Для отдельных расходов, связанных с производством и реализацией, устанавливается следующий момент их признания:

Амортизация признается в качестве расхода ежемесячно, исходя из суммы начисленной амортизации, рассчитываемой в соответствии с порядком, установленным статьями 259 и 322 НК РФ и положениями настоящей Политики в части, не урегулированной НК РФ.

Расходы на служебную связь, предоставляемую в соответствии со статьей 50 Закона РФ от 07.07.2003 № 126-ФЗ «О связи» и в порядке, определяемом Минсвязи РФ, признаются расходами в целях налогообложения в том отчетном (налоговом) периоде, в котором они были понесены.

Служебной связью в частности признается:

- использование сетей операторов связи для пропуска сигнальной информации, в том числе связанной с установлением соединения, по сети этого оператора, и связь, установленная между двумя операторами через магистральные линии связи;

- связь, установленная между операторами и/или пользователями услуг связи для вызова абонента;

- передача аварийных сообщений и т.п.

Документом, подтверждающим служебный характер электросвязи, является приказ руководителя филиала (структурного подразделения), утверждающего перечень лиц (категории работников), уполномоченных на использование электросвязи в служебных целях, и номеров телефонов, с которых и/или на которые такая связь может устанавливаться.

Для признания служебной связи в качестве расхода для целей налогообложения должны выполняться следующие условия:

связь используется для целей оперативно-технического и административного управления сетями связи;

связь осуществляется работниками Организации с использованием определенных номеров Организации;

служебная связь предоставляется в порядке, определяемом федеральным органом исполнительной власти в области связи.

Расходы в виде лизинговых платежей признаются на дату расчётов в соответствии с условиями заключенных договоров.

Прямыми расходами по профильным видам деятельности признаются:

Материальные затраты на приобретение сырья и (или) материалов, используемых в профильных видах деятельности и (или) образующих их основу либо являющихся необходимым

компонентом при их осуществлении;

Расходы на оплату труда персонала, участвующего в профильных видах деятельности, а также суммы единого социального налога, начисленного на указанные суммы расходов на оплату труда. Суммы страховых взносов в Пенсионный фонд РФ прямыми расходами не являются. Персоналом, участвующим в профильных видах деятельности, признаются работники, участвующие в основных производственных процессах.

Суммы начисленной амортизации по основным средствам, используемым при осуществлении профильных видов деятельности.

Косвенными расходами признаются все остальные расходы, связанные с профильными видами деятельности, за исключением внереализационных.

Формирование остатков незавершенного производства и готовой продукции на складе и отгруженной, но не реализованной в отчетном (налоговом) периоде, по профильным видам деятельности не предусмотрено.

Прямые расходы по непрофильным видам деятельности определяются в порядке, предусмотренном статьей 318 НК РФ. По отдельным непрофильным видам деятельности возможно формирование остатков незавершенного производства, наличие готовой продукции на складе и отгруженной, но не реализованной в отчетном (налоговом) периоде. По таким видам деятельности прямые расходы, осуществленные в отчетном (налоговом) периоде, подлежат распределению на остатки незавершенного производства, готовой продукции на складе и отгруженной, но не реализованной в отчетном (налоговом) периоде.

Дата осуществления расходов определяется в порядке, установленном статьей 272 НК РФ.

Учет амортизируемого имущества и операций с ним

Формирование стоимости амортизируемого имущества

Формирование стоимости амортизируемого имущества производится в соответствии со статьей 257 НК РФ.

Перечень расходов, не формирующих первоначальную стоимость амортизируемого имущества, определен в Приложении 1 к настоящему Положению.

Начисление амортизации

Начисление амортизации по всем объектам амортизируемого имущества производится линейным способом. Выбранный метод начисления амортизации не может быть изменен в течение всего периода начисления амортизации по объекту амортизируемого имущества.

Срок полезного использования нематериальных активов утверждается руководителем Организации по заключению функциональных служб в порядке, предусмотренном налоговым законодательством.

Классификация основных средств, включаемых в амортизационные группы, установлена в Единой классификации основных средств ОАО «ЦентрТелеком», утвержденной Приказом Генерального директора ОАО «ЦентрТелеком».

Для основных средств, которые не указаны в амортизационных группах, срок полезного использования устанавливается в соответствии с техническими условиями или рекомендациями организации изготовителя в соответствии с заключением функциональных служб.

Для амортизируемых основных средств, входящих в состав лизингового имущества, включенного в состав амортизационной группы у Организации, к основной норме амортизации применяется специальный коэффициент, но не выше 3, устанавливаемый в соответствии с договором лизинга.

В отношении амортизируемых основных средств, используемых для работы в условиях агрессивной среды и (или) повышенной сменности, к основной норме амортизации Организация применяет специальный коэффициент, но не выше 2. Перечень таких основных средств устанавливается приказом руководителя Организации по заключению функциональных служб.

По легковым автомобилям и пассажирским микроавтобусам, имеющим первоначальную

стоимость соответственно более 300 тысяч рублей и 400 тысяч рублей, основная норма амортизации применяется со специальным коэффициентом 0,5.

Применение понижающих коэффициентов амортизации по другим объектам основных средств не предусмотрено.

По приобретенным объектам основных средств, бывшим в эксплуатации, норма амортизации определяется с учетом срока полезного использования, уменьшенного на количество месяцев эксплуатации данного имущества предыдущим собственником. Если срок эксплуатации предыдущим собственником превышает срок полезного использования данного основного средства, то оставшийся срок полезного использования устанавливается с учетом требований правил техники безопасности и других факторов.

Если основное средство состоит из объектов, имеющих различный срок амортизации, то Организация рассчитывает амортизационные отчисления отдельно по каждой составной части исходя из этих разных сроков.

Модернизация, реконструкция и техническое перевооружение амортизируемых основных средств

Увеличение или оставление без изменения срока полезного использования реконструированного или модернизированного основного средства должно быть произведено с учетом утвержденных планов по его замене, требований техники безопасности и других факторов, подтверждено функциональными службами и утверждено руководителем Организации.

В отношении каждого объекта основных средств, подвергшегося реконструкции, модернизации или техническому перевооружению, сумма месячной амортизации определяется как произведение остаточной стоимости основного средства после проведения указанных работ на норму амортизации, исчисленную для данного объекта по формуле:

$$K' = (1/n') \times 100\%,$$

где K' - норма амортизации в процентах к остаточной стоимости объекта амортизируемого имущества;

n' – оставшийся срок полезного использования данного объекта амортизируемого имущества, выраженный в месяцах.

По реконструированным или модернизированным основным средствам, остаточная стоимость по которым равна нулю (объект полностью самортизирован), и при этом для данного основного средства был установлен максимальный в пределах амортизационной группы срок полезного использования, увеличение срока полезного использования определяется Обществом исходя из технических характеристик (в том числе с учётом требований охраны труда и других факторов) реконструированного (модернизированного) объекта.

Порядок оценки стоимости отдельных видов списываемого (реализуемого) имущества

В целях исчисления налога на прибыль

При определении размера материальных расходов при списании сырья и материалов, используемых при производстве (изготовлении) товаров (выполнении работ, оказании услуг), применяется метод оценки по средней стоимости.

При реализации покупных товаров их стоимость оценивается по средней стоимости.

При реализации и ином выбытии эмиссионных ценных бумаг их стоимость оценивать по стоимости первых по времени приобретений (по методу ФИФО). Иные ценные бумаги оцениваются при выбытии по стоимости каждой единицы.

Формирование резервов для целей налогообложения

Организация создает следующие виды резервов, признаваемых для целей налогообложения:

по сомнительным долгам.

Резерв по сомнительным долгам

Для целей создания резерва дебиторская задолженность учитывается в размерах, предъявленных продавцом покупателю, в том числе с учетом налога на добавленную стоимость.

Результаты инвентаризации дебиторской задолженности для целей формирования резерва по сомнительным долгам оформляются актом по форме согласно Приложению № 2 к настоящему Положению.

Порядок признания расходами процентов по долговым обязательствам

Предельная величина процентов для целей налогообложения по долговым обязательствам в рублях принимается равной ставке рефинансирования ЦБ РФ, увеличенной в 1,1 раза, по долговым обязательствам в иностранной валюте – равной 15%.

Организация раздельного учета

Организация ведет раздельно учет операций, облагаемых в соответствии с положениями главы 25 НК РФ «Налог на прибыль», и операций, попадающих под действие специальных налоговых режимов.

В рамках видов деятельности, облагаемых налогом на прибыль, Организация ведет раздельный налоговый учет доходов и расходов, а также прибыли и убытков, по тем видам деятельности, по которым положениями главы 25 НК РФ предусмотрен отличный от общего порядок учета прибыли и убытка, а также в тех случаях, когда прибыль по отдельным операциям облагается по ставке, отличной от 24%, в частности:

доходов (расходов), получаемых (осуществляемых) по операциям с ценными бумагами, обращающимися на организованном рынке ценных бумаг;

доходов (расходов), получаемых (осуществляемых) по операциям с ценными бумагами, не обращающимися на организованном рынке ценных бумаг;

доходов (расходов), получаемых (осуществляемых) по операциям с государственными и муниципальными ценными бумагами;

доходов (расходов), получаемых (осуществляемых) обслуживающими производствами и хозяйствами;

доходов (расходов), получаемых (осуществляемых) в случае получения целевого финансирования;

доходов, получаемых в виде дивидендов;

доходов (расходов), получаемых (осуществляемых) при уступке (переуступке) права требования;

доходов (расходов), получаемых (осуществляемых) при ликвидации, продаже и прочем выбытии амортизируемого имущества.

Порядок уплаты налога

По итогам каждого отчетного (налогового) периода Организация исчисляет сумму авансового платежа, исходя из ставки налога и прибыли, подлежащей налогообложению, рассчитанной нарастающим итогом с начала налогового периода до окончания отчетного (налогового) периода. В течение отчетного периода Организация исчисляет сумму ежемесячного авансового платежа.

Доля прибыли, приходящаяся на обособленные подразделения, определяется как средняя арифметическая величина удельного веса среднесписочной численности работников и удельного веса остаточной стоимости амортизируемого имущества этого обособленного подразделения соответственно в среднесписочной численности работников и остаточной стоимости амортизируемого имущества в целом по Организации.

Среднесписочная численность работников определяется в соответствии с порядком, утвержденным Госкомстатом РФ, т.е. путем суммирования среднесписочной численности работников за все месяцы отчетного (налогового) периода и деления полученной суммы на количество месяцев отчетного (налогового) периода.
