# Mobistar and Telenet conclude a partnership agreement

**Barcelona, the 14th of February 2006** – Telenet and Mobistar announced today a partnership agreement, which will enable both operators to mutually expand their offers.

After in-depth discussions with different operators, Telenet decided to use Mobistar's infrastructure and experience to develop a range of mobile services under its own brand. This offer will be launched this summer.

With this agreement, Mobistar confirms its open position for a partnership which will enable to develop its market share in an increasingly competitive environment. It will allow Mobistar to considerably strengthen its position, in particular in the northern part of the country.

This agreement also focuses on the use of the Telenet's WiFi network. These WiFi hotspots present interesting convergence opportunities in the context of the 'mobile data' activities developed by Mobistar on the basis of EDGE and UMTS technologies. In this way Mobistar will be the first operator to offer a multi-standards mobile broadband access throughout the country.

The experience of both operators in terms of audiovisual and digital content also leads to real convergence and synergies opportunities, which will be further exploited.

*Mobistar (EURONEXT BRUSSELS: MOBB) is one of the main actors in the world of telecommunications in Belgium, active in mobile telephony, fixed telephony, ADSL and on other markets with a strong growth potential (data transmission, etc.). Mobistar is part of the Orange Group which brings together most of the mobile activities of France Telecom. Mobistar is listed on the Brussels Stock Exchange. On 31 December 2005 Mobistar counted a total of 2,912,806 active customers for mobile telephony. For further information: [www.mobistar.be](http://www.mobistar.be)*
