Unaxis – a leading global high-tech corporation

Unaxis (SWX: UNAX) is a globally leading company in the field of thin film, vacuum and precision technology. Based on these core competencies, Unaxis develops production systems, components, and services for high-technology products. The company's commercial activities center on protective coatings for precision tools and components (Coating Services), systems for producing vacuums and conveying process gases (Vacuum Solutions), production systems for data storage devices (Data Storage Solutions), optical components (Optics), aerospace technology (Space Technology), as well as production equipment for solar modules. Unaxis also applies its core competencies as a major provider of semiconductor technology (Semiconductor Equipment). Unaxis currently employs approximately 6 500 individuals and, in its 2005 financial year, recorded sales of CHF 1 605 billion. The company, headquartered in Pfäffikon SZ, Switzerland, has a globe-spanning infrastructure that encompasses approximately 80 subsidiaries in 25 countries.

Unaxis Solar signs know-how transfer contract with Roth & Rau AG from Germany

Pfäffikon SZ, May 22, 2006 – Unaxis Solar has concluded a know-how transfer contract with Roth & Rau AG from Hohenstein-Ernstthal in Saxony, Germany. This means that Unaxis' skills in process and production technology for the mass production of solar modules will be expanded by Roth & Rau's expertise in the manufacturing of efficient production lines.

Platforms delivered by Roth & Rau will be used by Unaxis as a new, standard front end for transparent conductive oxide (TCO) and silicon thin film coating systems. The transfer will enable Unaxis to launch its new TCO system six months early than previously scheduled. It also provides Unaxis with the know-how required for manufacturing classical monocrystalline silicon modules. This makes Unaxis a comprehensive provider of solar module manufacturing systems and a world leader in the technology of solar module production.

Roth & Rau AG, which recently went public, has been among the leading providers of PECVD systems for antireflection coating and the passivation of crystalline silicon solar cells in the solar market for five years. Roth & Rau also provides components and process systems for plasma- and ion beam-based thin film and surface modification techniques that are applied in numerous industries and in research and development processes.

The General Meeting approved the proposed name change with a wide majority of 99.83 percent. The integration of the various corporate units and the internal and external use of a single brand are of paramount importance for the future success of the enterprise ("one company"). The name "OC Oerlikon Corporation" is to give rise to a more close-knit corporate culture and a uniform market image and presence. It is an indication of a new start and new growth and at the same time evocative of the company's rich industrial tradition. Associated with this name are values such as quality, reliability and innovation made in Switzerland. The change of name is of great symbolic significance to employees, customers, investors and partners alike.

For journalists:

Extracts from the presentation of Board Chairman Georg Stumpf:

"Unaxis is a world leader in thin film coating".

"All Formula One engines are coated by Unaxis thin film systems".

"We remain committed to Switzerland as a production and research location. This is also reflected in the name Oerlikon".

"We have decided to expand the trainee programme by over 20 percent".

Extracts from the speech of CEO Thomas P. Limberger:

"A sales growth of 15 percent in fiscal 2006 is definitely on the cards."

"The name Oerlikon Corporation is intended to create a feeling of unity and belonging. It also expresses values such as reliability, tradition, innovation and Swissness."

"Unaxis is set to expand its range of services. Customer focus is essential for Unaxis."

"Counting votes by electronic means enabled a swift and smooth handling of the decision taking procedure. All items were approved by majorities of over 99 percent"
