Microsoft and RBC Soft join efforts to promote portal technologies

Moscow, July 10, 2006 – RBC Soft, a subsidiary of OAO RBC Information Systems (RTS, MICEX: RBCI) has announced about entering into a partnership agreement with Microsoft for joining efforts to promote portal technologies as part of the RBC Soft Portal solution.

RBC Soft has extensive experience in developing portal solutions based on Microsoft® SharePoint® Portal Server. Similar systems have already been implemented at the Federal Customs Service of Russia, Federal Institute of Industrial Property, General Prosecutor's Office of Russia and other institutions. The newly signed agreement provides for a more active promotion of Internet and Intranet portals by joint efforts of the two companies.

"Nowadays, management principles, including those of state authorities, are changing in response to the development of information technologies. And portal systems of different levels are one of the essential elements in establishing the e-government. Hence, the two companies' efforts aimed at making portals more popular and widespread will foster cooperation between the authorities and business, and the public," said Dmitry Khalin, head of Partner Relations at Microsoft.

About Microsoft

Founded in 1975, Microsoft is the global leader in software, business solutions and Internet technology development for personal computers and servers. The company offers a wide range of software solutions for business and personal use intended to broaden the capabilities of an individual or a company through using state-of-the-art software at any given time, in any place and on any hardware.

Microsoft's representative office, established in Moscow in November 1992 (in July 2004, was changed into Microsoft Rus Ltd.), is responsible for software sales and promotion, development of the information technologies (IT) market and implementation and customization of cutting-edge technologies in Russia.

For further details about Microsoft and its products, please visit Microsoft web servers at: www.microsoft.com/rus (in Russian); www.microsoft.com (in English).
