Novolipetsk Steel (NLMK) reconfirmed its Quality Management System compliance with international requirements for automotive steel production

AUG 22 A 9:13
OF INTERNATIONAL
CORPORATE FINANCE

NLMK's Quality Management System (QMS) has successfully passed its second supervisory audit to comply with the requirements of ISO/TS 16949:2002 (Quality management systems – Particular requirements for the application of ISO 9001:2000 for automotive production and relevant service part organizations).

Experts from the certifying body, TÜV CERT (Germany), performed the audit and verified all the ongoing processes of the site's Quality Management System together with the regulatory documentation, production facilities activities and technical support services operating in the production of flat steel for automotive application.

The experts conducting the audit confirmed that all the processes of Company's QMS comply with international requirements and acknowledged the Company's technical excellence and high organizational level.

Being a leading steel supplier to the automotive industry, in 2005 Novolipetsk Steel (NLMK) shipped more than 400,000 tonnes of steel, including high-quality automotive IF steel sheet, possessing improved stamping properties for the manufacture of auto body parts.

For reference:

The process of development and implementation of ISO/TS 16949:2002 is based on ISO 9001:2000, but the stringency of its requirements is significantly higher. The certification based on the requirements of this standard proves a high quality level of the Russian steel producer, and it offers an opportunity to be recognized as a potential supplier to global automotive companies.

Novolipetsk Steel (NLMK) agrees to acquire additional 30% interest in its key logistics provider

Novolipetsk Steel, NLMK (LSE: NLMK) today announced that it has completed the acquisition of an additional 30% stake in LLC NTK from LLC EuroAsian Transport Company. As a result of this transaction NLMK now has a stake of 100% in LLC NTK.

LLC NTK is the key logistics provider for NLMK, arranging the transportation of the company's supplies of raw materials and providing delivery of steel products to customers in Russia and abroad. LLC NTK manages NLMK's relations with Russian Railways and, in relation to the exported products, with port authorities.

This acquisition is in line with the previously announced internal restructuring plan. One of key steps of the restructuring plan is a further consolidation of NLMK's core assets.

Trading update for Q2 2006

OJSC Novolipetsk Steel (LSE: NLMK) today released the following regular trading update for Q2 2006. To view our production results, please, click [HERE](#).

Novolipetsk Steel (NLMK) Management Board members approved

The new structure and members of the Company's Management Board were approved at the Board of Directors meeting held on June 19, 2006.

Management Board members:

Mr. Alexey Lapshin – President, Chairman of the Management Board;
Mr. Vladimir Nastich – Senior Vice-president, Head of Steel Division;
Mr. Alexander Saprykin – Vice-president, Head of Iron Ore Division;
Mr. Alexander Zarapin – Vice-president, Head of Coal Division;
Mr. Igor Anisimov – Vice-president, Purchasing;
Ms. Galina Aglyamova – Vice-president, CFO;
Mr. Yuri Larin - Vice-president, Technology & Environment;
Mr. Stanislav Tsyrlin – Vice-president, HR & Management System;
Mr. Dmitry Baranov – Vice-president, Sales.

Decisions on changes in NLMK's management structure and new Management Board membership, as well as the Company's President (Chairman of the Management Board) appointment were made at the Annual General Meeting of Shareholders of OJSC "NLMK", held on June 6, 2006, within the framework of the Company's internal restructuring plan.

OJSC Novolipetsk Steel (NLMK), the LSE listed leading Russian steel producer, today announces its consolidated results for the 1st Quarter 2006.

Highlights:

○ Strong 1Q 2006 financial results

- Sales revenues were USD 1,123 million
- Cash flows from operating activities were USD 159.1 million
- EBITDA* margin was 35%
- Cash and cash equivalents USD 2,271 million as of 31 March, 2006

○ Dynamic asset portfolio management policy

- Building up steel rolling capacity in core markets through the acquisition of DanSteel A/S, the Danish steel manufacturer, for USD 104 million;
- Acquiring a controlling stake in OJSC Combinat KMaruda;
- Disposal of minority share in OJSC Lebedinsky GOK, resulting in USD 298 million net income.

○ Total amount of capital expenditures for acquisition and reconstruction of fixed assets was USD 91.2 million

○ Launching the implementation of the internal restructuring plan to optimize the management structure and maximize operational efficiency as well as to optimize NLMK's structure and to focus the Company's efforts on its core business

Financial highlights for the 1st Quarter ended 31 March, 2006

USD, million	As of 31 March, 2006	As of 31 March, 2005	Change, %
Sales Revenue	1,123	1,271	-12%
Gross profit	444	654	-32%
Operating income	380	610	-38%
EBITDA	390	646	-40%
EBITDA Margin, (%)	35%	51%	
EPS (earnings per share)	0.0911	0.0710	28%

NLMK's spokesman, Anton Bazulev, commented:

" The company delivered a robust first quarter performance in the face of difficult market conditions with steel prices falling significantly during most of the period. Our strategy of intensifying vertical integration, increasing the proportion of output from high value-added products and enhancing our operational effectiveness both enabled us to weather the impact from these conditions and continues to position us for further progress.

These attributes, together with the current revival in the market, lead us to expect that 2006 revenues will be approximately 15% higher than in 2005 and that comparative profit levels will recover from the first quarter downturn. Our strong management team and our successful strategy of long-term sustainable development confirm our confidence in the future."

* EBITDA = Net income (post minorities) + income tax ± net interest ± gains/(losses) on investment +

depreciation

Management Board Comments

Over recent years Novolipetsk Steel (NLMK) remains one of the most efficient steel producers in Russia and worldwide. NLMK's strategy, aimed at increasing the Company's value, creating long-term competitive advantages and reducing dependence on market conditions, underlies NLMK's continued stable performance and allows meeting the challenges of unfavorable external factors in a flexible way.

As the prices on the steel market took a downturn in the second half of 2005, NLMK's financial results decreased in the 1st Quarter 2006 as compared with the 1st Quarter 2005. Sales revenues were USD 1,123 million, EBITDA was USD 390 million. Net cash provided by operating activities totaled USD 159 million.

Cash provided by operating activities and proceeds from the disposal of financial investments in the 1st Quarter 2006 fully covered capital expenditures and acquisitions of new subsidiaries. Growth in cash and cash equivalents was USD 347 million for 3 months of the current year resulting in the free cash of USD 2,271 million as of the end of the 1st Quarter 2006.

Production output of main steel products increased in the 1st Quarter 2006 as compared with the same period of the previous year. Thus, steel manufacturing was increased by 4.4% to 2.29 million tonnes. NLMK produced 2.12 million tonnes of finished steel products (+2.3% on 2005 level). Output of galvanized, pre-painted and grain-oriented steel increased by 55.7%, 69.2% and 19.3%, respectively, and reached 92, 81 and 35 thousand tonnes, respectively. Output of main steel products was maintained at almost the same level as in the 4th Quarter 2005.

Steel Segment

Steel segment continues to be the key segment of the Company. In the 1st Quarter 2006, this segment generated USD 1,048 million sales revenue from external customers and USD 336 million from operating activities. Steel segment includes the primary production asset - OJSC NLMK, DanSeel A/S, steel rolling subsidiary and other companies whose business is steel production procurement and sales of finished products. The share of steel segment was 93.3% in consolidated revenues and 88.6% in operating income as compared to 93.5% and 80.4%, respectively, in the 1st Quarter 2005. Consolidation of DanSeel A/S's (Danish steel-rolling company) financial results in the 1st Quarter 2006 served as a factor which to certain extent compensated for the steel segment operating income decline.

Though steel products prices increased slightly at the end of the 1st Quarter 2006, on the average, these prices were significantly lower in the reporting period as compared to 1st Quarter 2005 level, thus, bringing the decline in sales revenue from external customers by 11.8% and in operating income - by 31.4%.

1st Quarter 2006 steel segment financial results differ insignificantly from those of the 4th Quarter, 2005. The steel segment revenue increased by USD 32.9 million, or 3.2 %, gross profit increased by USD 21 million, or 5.9% and operating income went down by USD 28.5 million, or 7.8 % in the reporting period as compared to the previous quarter (results of retroactive consolidation of DanSteel A/S from December).

Mining segment

As of the 1st Quarter 2006 NLMK's mining segment comprises OJSC Stoilensky GOK, OJSC Dolomite, OJSC Stagdok, and OJSC Combinat KMAruda that supply raw materials for NLMK's manufacturing facilities in Lipetsk and also sell a portion of raw materials to third parties.

Stoilensky GOK is the principal mining company within NLMK. In the 1st Quarter 2006, it produced 2.72 million tonnes of iron-ore concentrate and 0.262 million tonnes of sinter ore. In the 1st Quarter 2006, the output of Dolomite was 0.405 million tonnes of flux dolomite. Stagdok, which supplies limestone, produced 0.72 million tonnes of fluxing limestone in the same period.

In the 1st Quarter 2006, the mining segment's revenue from external customers was USD 16.4 million, which is 48.2% lower than the level reached in 1st Quarter 2005. The segment revenue, including

intersegmental transactions, was USD 109.6 million (-40.2% on the same period in 2005 and -3% on the 4th Quarter 2005). Revenue decline is attributable to the considerable decrease in iron-ore prices while the product output remained almost unchanged.

As 85% sales volume (in value terms) of the mining segment is generated by intercompany transactions, this segment's share in the 1Q 2006 consolidated sales revenue was 1.5%.

Decreased iron-ore prices led to the mining segment's operating income reduction of 71% from USD 101 million in the 1st Quarter 2005 up to USD 30 million in the same period of 2006. The segment's share in consolidated operating profit lowered by 40.8% or USD 21 million in comparison with the 4th Quarter 2005.

Starting from March 2006, OJSC Combinat KMA Ruda (KMAruda) is a member of the NLMK. In the 1st Quarter 2006, OJSC Combinat KMA Ruda produced 0.44 million tonnes of iron-ore concentrate. In February-March 2006, NLMK purchased 43.37% of the outstanding common shares, which resulted in an increase of NLMK's ownership up to 76.26%. NLMK's ownership was subsequently increased up to 84.85% in April 2006, as a result of acquisition of additional 8.59% shares from minority shareholders. Stoilensky GOK together with KMAruda fully cover NLMK's requirements for iron-ore concentrate, and concentrate surplus is sold to third parties.

Other Segments

Other segments include the financial results of OJSC Tuapse Commercial Sea Port (TMTP) – Black Sea port operator, the fifth-largest port in Russia, OJSC Lipetskbank, LLC LIS Chance and the Lipetskaya Municipal Energy Company (LMEC) that supplies electric power to the local population.

In the 1st Quarter 2006, the other segment's revenue from external customers was USD 59.1 million, which is 15.7% higher than the level of the same period in 2005 and 29.9% higher than in the previous quarter. Such increased revenue is largely attributed to the companies' output growth.

In the 1st Quarter 2006, other segments' operating income totaled USD 13.3 million, which is 4.3% lower than in the same period in 2005, as a result of the increased cost of sales of goods and services by LMEC.

Consolidated financial results

In the 1st Quarter 2006, as a result of deteriorating steel market conditions compared with the beginning of the previous year, sales decreased by 12% to USD 1,123 million despite the steel products' sales growth. NLMK managed to avoid a sharp decline in revenue thanks to its flexible sale policies. In the 1st Quarter 2006, the domestic market accounted for 42% of revenue as compared with 34% in the same period in 2005. Similar to 2005, due to the greater volumes of shipment of grain-oriented steel and pre-painted steel products, the proportion of products featuring high added value considerably increased in the structure of shipments from NLMK in the 1st Quarter 2006.

As the prices for steel products stabilized, NLMK saw the increase of USD 42 million or 3.9% in the sales revenue in the 1st Quarter 2006 as compared to the previous period.

The production cost went slightly up from USD 542 million to USD 605 million or by 11.5% in the 1st Quarter 2006 against the same period in 2005 (6.1% against the 4th Quarter 2005). As a result of higher production cost in the context of lower revenue, NLMK's operating income in the 1st Quarter 2006 decreased by 37.7% as compared the same period in 2005 and amounted to USD 380 million. In the same time, the gross profit went up by USD 6.3 million, or 1.4% as compared to the previous period and operating income was lower by 11.2% against the 4th Quarter 2005 result.

In the 1st Quarter 2006, EBITDA was USD 390 million, EBITDA margin was 35%. The decrease in EBITDA margin in 1st Quarter 2006 is primarily attributable towards substantially lower steel prices as compared to the 1st Quarter 2005 and consolidation of new assets with lower profitability. For comparison, in the 1st Quarter 2005, EBITDA was USD 646 million and EBITDA margin was 51%, while in the 4th Quarter 2005 these indicators were USD 467 million and 43%. respectively.

In the 1st Quarter 2006, depreciation charges were almost the same as in the 1st and 4th Quarters 2005 and amounted to USD 74 million.

US dollar rate decrease had a negative impact on NLMK's financial results: foreign currency exchange loss was USD 57 million in the 1st Quarter 2006.

Income before tax was USD 727 million in the 1st Quarter 2006, having increased by 20.6% against the 1Q 2005 level. The growth was 62.9% in comparison with the 4th Quarter 2005.

In the 1st Quarter 2006, net income was USD 546 million that is 28% higher than in the same period of the previous year and represented growth of 60.8% against the previous quarter. The January 2006 sale of the stake in Lebedinsky GOK served as the main driver of higher profits. If the effect of the Lebedinsky GOK share sale were eliminated, NLMK's net profit would have been USD 248 million in the 1st Quarter 2006 or 42% lower against the same period in 2005. This decrease is attributable to lower sales revenue and higher production costs.

Earnings per share (EPS) were USD 0.0911 in the 1st Quarter 2006.

Consolidated balance sheet data

In the 1st Quarter 2006, NLMK's assets increased by 10% against 31 December 2005 and reached USD 6,825 million. The Company's assets grew mostly by means of net profit.

Profitable business allows NLMK to finance its own activities and the development of the Company primarily from its own funds. A share of the Company's own capital in the structure of the sources used to finance NLMK's operations is permanently high and exceeded 80% over the last three years; at the end of the 1st Quarter 2006, it was 84%.

Highly liquid assets of NLMK substantially exceed the amount of its debt. The NLMK's cash and cash equivalents position as at 31.03.2006 amounted to USD 2,271 million.

Over the last four years, the working capital ratio of NLMK did not drop below 4.8. At the end of the 1st Quarter 2006, it reached 7.1.

In the 1st Quarter 2006, annualized return on assets (ROA) was 34% and annualized return on equity (ROE) was 40%. These ratios are higher than in the 1st and 4th Quarters 2005 due to an increase in the Company's net profit as a result of the sale of its financial investments in the reporting quarter including divestment of interest in Lebedinsky GOK.

In the 1st Quarter 2006, the Company's current assets increased by USD 429 million or by 12% against the levels seen on 31 December 2005. Primarily this growth was achieved through a rise in cash and cash equivalents which increased by USD 347 million.

Cash flow

Net operational cash flow was USD 159 million in the 1st Quarter 2006, which is almost 74.5% more than net cash used for fixed assets construction and acquisition that amounted to USD 91.2 million.

In the 1st Quarter 2006, net cash flow from investing activities was USD 227 million. Positive result of NLMK's investing activities was due to the sale of its financial investments of USD 403 million.

Since practically no loans or borrowings are used to finance the Company's operations, the main cash outflow associated with the financial activities in the 1st Quarter 2006 was caused by the Company's merger & acquisition projects, including USD 104 million spent on acquisition of DanSteel A/S (Danish steel-rolling company).

In the 1st Quarter 2006, the net increase in cash and cash equivalents was approximately USD 275 million, and NLMK's cash balance was USD 2,271 million as of the end of the 1st Quarter 2006. In addition, US currency weakening resulted in USD 72 million increase of NLMK's cash and cash equivalents for the first quarter of 2006. Thus, the combined increase of cash and cash equivalents during

the reporting period comprised USD 347 million.

The Company's sustainable financial position allows for a flexible business development strategy. Creation of additional shareholder values remains NLMK's priority, and NLMK will continue to pursue the policy based on stringent financial discipline and balanced investment projects.

Outlook

Revival of the steel market at the end of the 1st Quarter 2006 allowed steelmaking companies to increase selling prices. This recovery trend is expected to continue in the 2nd and 3rd Quarters 2006. Afterwards the market is likely to stabilize. We estimate that average prices of NLMK in 2006 will be at the levels seen last year.

NLMK plans to increase its steel output to match 2004 levels. Production of iron-ore concentrate at the Stoilensky GOK will increase.

We expect that revenues in 2006 will be approximately 15% higher than in 2005. This will be influenced by bigger sales volumes and by adding new assets to Novolipetsk Steel. Profits from operations will remain at last year's levels.

The sale of a stake in Lebedinsky GOK in January 2006 will be the key factor driving growth of the Company's profit before tax and net profit.

NLMK's strategy for long-term sustainable development and its highly qualified team of managers allow us to make a positive forecast and look confidently into the future.

Environment protection technology of Novolipetsk Steel (NLMK) named the Best Ecological Project in 2006

Novolipetsk Steel (NLMK) is delighted to announce that it became the winner of the Annual Contest "Best Ecological Project" organized by the Federal Service for Ecological, Technological and Nuclear Supervision and "Industrial Ecology" magazine.

Industrial companies, environment protection professionals and R&D organizations took part in the contest with 150 projects.

NLMK won the award for implementation of modern control systems and waste handling technologies. NLMK presented at the contest its waste neutralization technology developed and implemented by the Company (this technology is used for neutralization of polychlorinebiphenyl (PCB) waste (sovtol and sovol) synthetic oils that were widely applied in electrical equipment several decades ago).

This technology provides successful solutions for safe disposal of power transformers containing sovtol and other overage electrical equipment that posed serious ecological problems.

Since the start of implementation of the environmental protection project in 1999, over 520 tonnes of liquid PCB, 267 transformers contaminated by sovtol, over 2300 capacitors containing sovol and over 10 tonnes of materials contaminated by PCB have been recycled. By 2015 the Company is planning to put out of operation all the equipment containing PCB and neutralize all waste of this type.

16-06-2006

New members of Company's Board Committees approved

New members of three Board Committees of Novolipetsk Steel (NLMK) - Strategic Planning Committee, Audit Committee and Personnel, Remunerations and Social Policy Committee – were approved.

Vladimir Skorokhdov, Nikolai Gagarin, Nikolai Lyakishev, Oleg Bagrin, Carl Doering, Alexey Lapshin and Vladimir Nastich were elected to the Strategic Planning Committee, chaired by Vladimir Lisin. The Committee works out and submits to the Board of Directors the recommendations on priority guidelines for the Company and its development strategies, including long-term measures for enhancement of the Company's efficiency, increase in assets, profitability and attractiveness for investments.

Oleg Bagrin and Igor Fyodorov were elected to the Audit Committee, chaired by Randolph Reynolds. This committee works out and submits to the Board of Directors the recommendations on efficient control of financial and economic activities of the Company, including annual independent external auditing of financial statements

Carl Doering, Stanislav Tsyrlin and Sergey Melnik were elected to serve on the Personnel, Remunerations and Social Policy Committee, chaired by Dmitry Gindin. The main objective of this committee is drafting recommendations on personnel policy of the Company and remuneration to members of management bodies and Internal Audit Commission of the Company. The Committee also deals with social issues of the Company, environmental safety and cooperation with state and local authorities.

15-06-2006

NLMK's Chairman Vladimir Lisin met Kemerovo region Governor Aman Tuleev

The Governor of the Kemerovo region, Aman Tuleev, and Chairman of the Board of Novolipetsk Steel (NLMK), Vladimir Lisin, met on June 13 in Kemerovo and discussed measures to improve the situation in the field of industrial safety. During the meeting they also discussed possible arrangements to increase salaries of the employees of "Prokopievskugol" Coal Company, a newly-acquired NLMK subsidiary.

During the meeting Vladimir Lisin stressed that "serious efforts are needed to achieve stability, and we have the opportunity to increase the level of efficiency at "Prokopievskugol".

Following the meeting, Aman Tuleev said: "NLMK is recognized as the leader in the Russian steel-making industry. We believe strongly that "Prokopievskugol" is going to benefit hugely from the ownership of NLMK which is renowned as a socially-responsible employer".

The Governor assured the owners of "Prokopievskugol" that the regional authorities and Prokopyevsk city administration were ready to provide all necessary assistance.

For reference: "Prokopievskugol" is a coal company that owns 7 mines and 3 processing plants. The annual output of Prokopievskugol is about 3 mln tonnes of coking coal and 2 mln tonnes of energy coal.

15-06-2006

An anti-dumping duty on cold-rolled steel in South Africa lifted

The Republic of South Africa revoked a 76.1% anti-dumping duty on NLMK's cold-rolled steel.

Before 2002 Company's annual exports to the Republic of South Africa varied from 3.5 to 5 thousand tonnes of cold-rolled steel. When the antidumping duties were imposed exports of that kind of products to South Africa were completely suspended.

In 2005 Novolipetsk Steel initiated a procedure for revision of anti-dumping measures imposed by the Republic of South Africa against Company's cold-rolled steel products. In the course of the revision the exhaustive documentation was submitted to the International Trade Administration Commission of the Republic of South Africa followed by the determination that imports from Russia did not injure the South-African industry.

As a result of withdrawal of anti-dumping duties NLMK gained a possibility to freely supply its cold-rolled steel products to dynamically growing South African market.

09-06-2006

Novolipetsk Steel (NLMK) Agrees to Acquire 100% Interest in VIZ Stal

Novolipetsk Steel, NLMK (LSE: NLMK), the leading Russian steel producer, is pleased to announce that it has agreed to acquire 100% of the issued share capital of VIZ Stal, the second largest Russian electrical steel manufacturer, for USD 550 million. The acquisition is to be financed in full from NLMK's existing cash funds.

Based in Ekaterinburg, VIZ Stal is a rolling facility which specializes exclusively in electrical steels. VIZ Stal produces cold-rolled electrical steel sheet, and has a 56% share of the Russian grain-oriented steel market and about 11% of the world market. VIZ Stal's production capacity is approximately 200,000 tonnes of electrical steel per annum. Sales revenue of VIZ Stal for the first half of 2006 is estimated at USD 250 million. The EBITDA margin for the same period is expected to exceed 50%. NLMK has a long-standing relationship with VIZ Stal, being its supplier of hot-rolled coils. The acquisition will make NLMK number one in Russia and among the top three in the world market for electrical steel.

For NLMK, the acquisition of VIZ Stal is an important step in the development of high value-added product portfolio. NLMK's management has already identified substantial synergies with the newly acquired asset and expects to improve VIZ Stal's cost structure while enhancing the modernization and efficiency of its production facilities.

Mr. Vladimir Lisin, NLMK's Chairman and controlling shareholder, commented: "At a time of an increasing competition for quality assets, the acquisition of VIZ Stal allows NLMK to become a major player in the electrical steel business. The electrical steel market offers one of the highest profit margins in the industry. This acquisition is in line with the key element of NLMK's strategy - our 'profits before tonnes' approach."

PRESS-RELEASE

Novolipetsk Steel (NLMK)

07 June 2006

RESULTS OF VOTING AT THE 2006 ANNUAL GENERAL MEETING

Novolipetsk Steel (LSE: NLMK) announces the results of resolutions proposed at the Annual General Meeting held on 6 June 2006.

NLMK's shareholders have approved the recommended final dividend for 2005 of USD 0.0711 (RUR 2.0) per ordinary share. Including the already paid interim dividend of USD 0.0352 (RUR 1.0) per ordinary share for the first six months of 2005, the total dividend for the year is USD 0.1063 (RUR 3.0) per ordinary share. The AGM has also voted for amendments to the existing Dividend Policy. NLMK's Dividend Policy now sets minimum dividend payments of 20% of US GAAP net income (previously 15% of US GAAP net income) and targets an average dividend payment of 30% of US GAAP net income during next five years.

NLMK's shareholders approved amendments to main corporate documents including the Charter, Regulations on the Board of Directors, Regulations on the Management Board, and Corporate Governance Code. These changes are primarily designed to implement the Internal Restructuring Plan that was announced on March 31, 2006. The Plan is aimed at centralizing key management functions at the Group level and increasing the efficiency of the Company's business processes.

NLMK shareholders have elected members of the Board of Directors. The cumulative voting results are presented below. According to approved amendments to the Corporate Governance Code, the maximum term for a Board member to be considered independent should not exceed 5 years. NLMK currently has 4 independent directors out of 9 on the Board: Mr. Dmitriy Gindin, Mr. Karl Doering, Mr. Nikolai Lyakishev, Mr. Randolph Reynolds.

NLMK shareholders approved the remuneration of members of NLMK's Board of Directors for 2005. The remuneration was determined in accordance with the "Regulations on the Board of Directors members' remuneration." The total remuneration of Board Members for 2005 amounted to USD 1,603,750 including annual bonus of USD 1.5 million.

NLMK shareholders have approved the resolution substituting General Director (CEO) position with the President (Management Chairman). Mr. Alexey Lapshin was elected the President of the Company.

Biography of Mr. Alexey Lapshin:

Alexey Lapshin has been Managing Director of DanSteel A/S since the company was acquired by NLMK in January 2006. Previously, he was a management and technical consultant with DanSteel A/S for four years. Mr. Lapshin was Chief of Department in LLC Rumelco from 1999 to 2002 and at the same time was on the Board of NLMK. From 1994 to 1999, Mr. Lapshin held positions in various metal companies, while he also managed development of "Stinol" refrigerator manufacturing plant in Lipetsk as a consultant. Mr. Lapshin started his career at Gaiskiy GOK in 1967, joining "Yuzhuralnickel" metal production facility in 1975-1994, where he started as a foreman and raised through the ranks to become Deputy CEO. He graduated from Orsk Oil Technical College and has a metallurgical engineering degree from the All-union Polytechnic Institute.

Mr. Lapshin has many years management experience and a proven professional track record in the steel industry both in Russia and abroad.

NLMK being a member of the international association "International Iron and Steel Institute" has obtained an AGM approval on the membership in this organization.

The following resolutions were put to NLMK's shareholders on a poll at the Annual General Meeting and the results of voting were as follows:

<u>Resolution</u>	<u>Votes For</u>	<u>Votes Against</u>	<u>Votes Abstained</u>	<u>Results</u>
1.1 To approve the Company's 2005 Annual Report and annual financial statements for the 2005 financial year	5 315 939 769	0	467 326	carried
1.2 To declare the payment of dividends for 2005 totaling 3 rubles per common share. Considering that the interim dividend paid for H1 2005 was 1 ruble per common share, to pay a final dividend of 2 rubles per common share. The final dividend shall be paid on 4 September 2006 by funds transfer	5 431 554 454	1 001	261 261	carried
2.1 To approve the revised Charter of OJSC NLMK	5 427 257 898	641 063	4 030 840	carried
2.2 To approve the revised Regulations on the Board of Directors of OJSC NLMK	5 423 698 803	648 070	7 437 809	carried
2.3 To approve the revised Regulations on the Management of OJSC NLMK	5 423 640 194	1 832 064	6 408 976	carried
2.4 To approve the revised Corporate Governance Code of OJSC NLMK	5 424 157 215	672 094	7 007 400	carried
2.5 To approve the revised Dividend Policy of OJSC NLMK	5 408 190 140	611 033	6 897 961	carried
3. Election of members of the Board of Directors of OJSC NLMK*				
4. To elect Mr. Alexey Lapshin President (Management Chairman) of the Company	5 425 949 567	408 612	6 288 350	carried
5. To elect Company's Internal Auditing Commission				
5.1 Mr. Valery Kulikov	5 423 492 500	116 319	5 065 566	carried

5.2	Mrs. Natalia Kurasevich	5 422 737 745	289 294	5 153 857	carried
5.3	Mrs. Olga Savushkina	5 423 709 470	147 152	4 992 490	carried
5.4	Mrs. Galina Shipilova	5 422 952 076	153 158	4 979 477	carried
6.1	To approve CJSC "PricewaterhouseCoopers Audit"	5 427 759 707	714 137	2 260 475	carried
6.2	To entrust CJSC "PricewaterhouseCoopers Audit" with financial statement audit of OJSC "NLMK" in accordance with the US Generally Accepted Accounting Principles (US GAAP)	5 428 861 605	751 177	2 413 603	carried
7.	To approve the remuneration of members of OJSC NLMK Board of Directors	5 421 150 053	1 833 287	9 402 920	carried
8.	To approve the decision of OJSC NLMK to participate in the international association "International Iron and Steel Institute"	5 431 460 733	66 066	1 009 603	carried

* Cumulative voting results are presented below.

The resolution on the Board members' election is voted upon by cumulative voting, i.e. one voting share gives the number of votes equal to the number of the members in the Board of Directors. When voting, the shareholder is entitled to cast all his votes in favor of one nominee or to distribute them between several nominees. In accordance with the cumulative voting results, the following Board members were elected:

Board Members	
1.	Mr. Vladimir Lisin
2.	Mr. Vladimir Skorokhodov
3.	Mr. Oleg Bagrin
4.	Mr. Igor Fyodorov
5.	Mr. Nikolai Gagarin
6.	Mr. Dmitriy Gindin
7.	Mr. Karl Doering
8.	Mr. Nikolai Lyakishev
9.	Mr. Randolph Reynolds

Independent auditors confirmed compliance of NLMK's quality management system with international standards

NLMK has passed recertification audit for compliance of its quality management system with the requirements of ISO-9001 : 2000 international standard, as well as compliance audit of the quality management system used for the production of hot rolled coils from carbon steel grades in accordance with the requirements of EC Directive – 97/23/EG and German Technical Rules - AD 2000 W.

Under audit procedure at NLMK's steel production site in Lipetsk, the TUV CERT (Germany) experts have investigated all quality management system processes, workflow procedures and operating activities of production units and technical support services. The auditors have confirmed high level of NLMK's technical development and managerial control, as well as the compliance of all elements of the quality management system with international requirements.

The compliance of the quality management system with ISO-9001: 2000 international standard proves the fact that all NLMK's value chain business processes are organized in accordance with international requirements and best practices.

Novolipetsk Steel (NLMK) introduces own scientific developments into production

Novolipetsk Steel (NLMK) has started construction of the first in Russia grain-oriented electrical steel laser treatment system with planned annual production capacity of up to 40 thousand tonnes. The implementation of this project elaborated within the framework of Company's R&D activities will allow producing a new high value-added steel product with high level of magnetic properties.

The new unit will be applied in production of flats for versatile transformer cores. NLMK has invested approximately RUR 1.5 million into the development of laser treatment technology.

Under the first phase of the technical upgrading program, covering the period from 2000 to 2005, NLMK carried out 220 R&D projects aimed at optimization of technological processes, and development of new technologies and equipment. In the area of R&D activities NLMK cooperates with leading universities and research centers in Russia and other countries.

Novolipetsk Steel (NLMK) included in MSCI Emerging Markets Index

OJSC Novolipetsk Steel (LSE: NLMK) is pleased to note today's announcement that the Company's Global Depositary Shares (GDSs) will be included in the Morgan Stanley Capital International (MSCI) Emerging Markets Index effective 31 May, 2006. As a result the pro-forma weight of NLMK GDS in the index will increase to 0.12%.

NLMK is the first Russian steelmaker to be added to MSCI Emerging Markets Index. The decision by MSCI to include NLMK's GDSs in its Emerging Markets Index will provide the opportunity for equity participation to a wider range of international investors. The index is traditionally used by fund managers worldwide to measure stock performance in emerging markets and allocate assets accordingly.

Anton Bazulev, NLMK's spokesman, commented:

"NLMK's inclusion in the index is expected to raise the Company's international profile and make its shares more attractive to a wider group of international portfolio managers."

PRESS-RELEASE

03 May 2006

Q1 2006 RAS Financial Results for NLMK Group's major companies

OJSC Novolipetsk Steel (NLMK) (LSE: NLMK) today announces Q1 2006 Russian Accounting Standards (RAS) financial results for its major companies *.

The filing of RAS accounting results is a Russian regulatory requirement. In addition, NLMK has been preparing financial reports in accordance with the US GAAP accounting standards since 1998. RAS accounting results differ materially from US GAAP accounting results and are not comparable to financial statements prepared in accordance with US GAAP. The RAS accounting results of NLMK Group's major companies are not indicative of the financial condition or results of these entities under US GAAP. Reference should be made only to consolidated financial statements prepared in accordance with US GAAP for information with respect to NLMK Group's financial condition and results of operations.

Highlights

- **Revenues and gross profit for the steel segment decreased due to price reduction on steel products.**

NLMK's steel segment financial results decreased in Q1 2006 compared to Q1 2005 due to a weak pricing environment that started in the second half of 2005. Despite the improvement of the steel market situation in Q1 2006, the average prices in the beginning of 2006 are substantially below record levels of Q1 2005. However, the price decrease on basic raw materials in Q1 2006 enabled NLMK to reduce operating costs in comparison with Q1 2005. The net income growth in Q1 2006 in comparison with Q1 2005 benefited from the divestment of NLMK's 12% stake in Lebedinsky GOK.

- **Profit decrease at major mining companies**

Revenues decreased at the major mining companies - Stoilensky GOK and KMA Ruda – in Q1 2006 by 35.98% and 39.52% respectively in comparison with Q1 2005. Net income of these companies for the same period went down by 53.32% and 76.35% compared to Q1 2005 results. The profit decrease in mining operations was caused by a weak pricing environment combined with steady production volumes.

- **Net interest and similar income growth by 46.6% at OJSC "Lipetskcombank"**

OJSC "Lipetskcombank" Q1 2006 total interest and similar income rose 64.32% in comparison with Q1 2005. The bank's net interest and similar income grew by 46.60%. At the same time, the bank's net income went down by 41.53% in comparison with Q1 2005. The net income decrease at OJSC "Lipetskcombank" in Q1 2006 is primarily attributable to expenses for the development of multi-branch banking.

- **Considerable revenue and profit growth at OJSC "Stagdok" and OJSC "Dolomite"**

OJSC "Dolomite" and OJSC "Stagdok" revenue growth for Q1 2006 amounted to 27.51% and 26.82% respectively compared to Q1 2005 results. The net profit of OJSC "Dolomite" for Q1 2006 grew by 3.8 in comparison with Q1 2005. The increased prices of limestone was a key driver of the favorable performance in Q1 2006.

- **Net income decrease by 8.13% at OJSC "TMTP" due to negative currency translation differences**

OJSC "TMTP" Q1 2006 revenues grew by 4.60% in comparison with Q1 2005 benefiting from the growing freight turnover. However, the port's net income in Q1 2006 went down by 8.13% in comparison with Q1 2005 due to negative currency translation differences.

OJSC "NLMK" will publish US GAAP consolidated financial results for Q1 2006 in June 2006.

** Indicated companies of the Group include: Novolipetsk Steel (NLMK), Stoilensky GOK, KMA Ruda, OJSC "Lipetskcombank", OJSC "Stagdok", OJSC "Dolomite" and OJSC "TMTP".*

*** KMA Ruda forms part of NLMK's Group since March 2006.*

OJSC Novolipetsk Steel (NLMK) Completes Tender Offer for Ordinary Shares in OJSC "KMA Ruda"

OJSC Novolipetsk Steel (NLMK) announces that it completed a tender offer for OJSC KMA Ruda ordinary shares on 27 April, 2006. As a result of the tender offer, NLMK purchased 8.59% ordinary shares increasing its ownership in KMA Ruda to 84.85%.

KMA Ruda is a mining company located within 350 kilometers of NLMK's production facilities in Lipetsk. The company holds a leading position among Russian deep-mining companies. KMA Ruda supplies NLMK with iron ore concentrate.

NLMK enhances its energy self-sufficiency

A new turbine generator with a total installed capacity of 25MW has been commissioned at the Cogeneration Plant of OJSC "NLMK".

Its exploitation will improve reliability of energy supply to the blast furnace facilities and other shops, reduce iron and steel production cost without any additional environmental load. Commissioning of the unit will result in reducing consumption of power sourced from the Unified Energy System of Russia by 3% (166 mln. kWh) already in 2006 that will allow the Company to save 46 million rubles in the current year.

Cogeneration Plant load optimization and generating capacity expansion enable to increase Company's self-sufficiency in electric energy up to 43%. At the same time electrical energy generation cost at OJSC "NLMK" is almost 1.5 times lower than the purchase price.

The turbine generator construction project valued at 300 m rubles has been implemented during the course of 3 years within a framework of Phase I of the Company's Technical Upgrading Programme.

Novolipetsk Steel (NLMK) releases Trading Update for Q1 2006

OJSC Novolipetsk Steel (LSE: NLMK) today released the following regular trading update for Q1 2006.*

The table below shows the production volume of NLMK's principal steel products on its main site for Q1 2006:

	Q1 2006	Q1 2005	Change	
	Amount	Amount	Amount	%
(in million of metric tonnes, except for percentages)				
Pig Iron	2.20	2.12	0.08	4.0
Steel	2.29	2.19	0.10	4.4
Slabs	0.98	0.90	0.08	8.9
Hot-rolled steel	0.43	0.51	-0.08	-14.6
Cold-rolled steel	0.59	0.54	0.05	7.8
Hot dip galvanized steel	0.09	0.06	0.03	55.7
Pre-painted steel	0.08	0.05	0.03	69.2
Non-grain-oriented steel	0.088	0.093	0.005	-5.9
Grain-oriented steel	0.04	0.03	0.01	19.3

The table below shows principal product tonnage produced at NLMK's Danish subsidiary, DanSteel A/S:

	Q1 2006	Q1 2005	Change	
	Amount	Amount	Amount	%
(in thousands of metric tonnes, except for percentages)				
Heavy plates	114	146	-32	-27.7

The table below shows the average price realized for each of NLMK's main steel segments** for Q1 2006:

	USD per tonne (FCA)			Change	
	Q1 2006	Q1 2005	USD	%	
Pig Iron	181	263	-82	-31.2	
Slabs	255	428	-173	-40.4	
Hot-rolled steel	426	516	-90	-17.4	
Cold-rolled steel	508	615	-107	-17.4	
Hot dip galvanized steel	745	818	-73	-8.9	
Pre-painted steel	880	926	-46	-5.0	
Non-grain-oriented steel	601	818	-217	-26.5	
Grain-oriented steel	2909	1769	1140	64.4	

The table below shows the DanSteel A/S average heavy plate prices** for Q1 2006:

	USD per tonne (FCA)		Change	
	Q1 2006	Q1 2005	USD	%
Heavy plates	649	888	-239	-36.8

Anton Bazulev, NLMK's spokesman, commented:

"We recently announced our new forecast of increasing steel output to 10 million tonnes by 2010. NLMK's steel production volumes for the first quarter of 2006 rose 4.4% in comparison to Q1 2005. In addition, the company substantially increased the production of high value-added products during the first quarter. Despite a slight fall in prices at the beginning of the year, we continue to maintain a stable outlook for the global steel market."

** All information on production volumes is preliminary and may be subject to change.*

*** excluding freight charge.*

NLMK is holding Annual General Meeting in June

On April 17, 2006 a meeting of NLMK's Board of Directors has made a decision to conduct a General Shareholders' Meeting on June 6, 2006.

The general annual meeting of the Company's shareholders will address the following agenda items:

1. Approval of the Company's 2005 annual report, annual financial statements, including statement of income, and allocation of profit (including dividend payment) and losses of financial year 2005.
2. Approval of new edition of the Company's Charter, Regulations on the Board of Directors, Regulations on Management Board, Code of Corporate Governance, Dividend Policy of NLMK.
3. Election of members to the Company's Board of Directors.
4. Election of President (Chairman of the Management Board) of the Company.
5. Election of members to the Company's Audit Commission.
6. Approval of the Auditor.
7. Payment of remuneration to the members of the Board of Directors.
8. Membership of the Company in the International Association "International Iron and Steel Institute".

The Company's Board of Directors recommended the general shareholders' meeting to approve the decision on declaring dividends on common issued shares for 2005 in cash in the amount of 3.00 Rubles (USD 0.1063) per common share. Taking into account previous interim dividend payments for the first half of 2005 of 1.00 Ruble (USD 0.0352) per common share, it is recommended to pay additionally 2 Rubles (USD 0.0711) per common share.

The list of persons entitled to participate in the general annual meeting of the Company's shareholders will be prepared on the basis of NLMK Shareholders' Register as at 12:00 a.m., April 18, 2006.

Preliminary Results for the Year Ended 31 December, 2005

OJSC Novolipetsk Steel (NLMK), the LSE listed leading Russian steel producer, today announces its preliminary results for the year ended 31 December, 2005.

HIGHLIGHTS

- Strong 2005 financial results

- o Sales revenues were USD 4,469 million
- o Cash flows from operating activities were USD 1,515 million
- o EBITDA* margin was 47%
- o Cash and cash equivalents USD 1,897 million as at 31 December, 2005
- o 65% total dividend increase to USD 0.1063 per ordinary share

- Continued dynamic development through M&A activities

- o Acquisition of a license to develop a high quality coking coal deposit, Zhernovskoe-1, scheduled to supply 50% of the company's needs by 2009
- o Building up steel rolling capacity in core markets through the acquisition of DanSteel A/S, the Danish steel manufacturer, for USD 104 million

- Successful completion of the USD 1.26 billion first phase of the technical upgrading program, bringing NLMK to highly competitive operational level. The Company continues to implement second stage of the program estimated at USD 3.2 billion.

- Successful listing on the LSE representing 7.46%** of the existing issued ordinary share capital, global offering raised USD 609 million, resulting in a market capitalisation of USD 8.7 billion.

- Launch of an internal restructuring plan to optimise the management structure and maximise operational efficiency.

- NLMK received the highest corporate credit ratings among Russian steel companies.

Continued M&A activity in 2006

- o Altai Koks, Prokopievskugol
- o Lebedinsky GOK, KMAruda

NLMK's Chairman, Dr. Vladimir Lisin, commented:

"I am delighted to present NLMK's strong financial results and strategic developments for the year ended 31 December, 2005. In 2005, NLMK's revenues amounted to USD 4,469 million and the company produced an EBITDA margin of 47%. The Group successfully listed on the London Stock Exchange at the end of 2005. NLMK's strong financial position allowed it to increase total dividends for the year by 65%. These results enable NLMK to maintain its position as the world's most profitable steel company."

* *EBITDA = Net income (post minorities) + income tax – interest earned + losses on disposal + depreciation*

** *including greenshoe option*

*** *dividends for 9 months of 2004*

CHAIRMAN'S STATEMENT

I am delighted to present NLMK's strong financial results and strategic developments for the year ended 31 December, 2005. This has been an outstanding year for our company. We have made strong progress in fulfilling our strategic goals, enhancing our main competitive advantages as one of the world's most profitable steel producers and creating value for all our shareholders.

Last year, the main objectives were to bring the company to the international stock market, achieve further vertical integration through M&A activities to deliver substantial synergy benefits, and successfully accomplish the first phase of the technical upgrading program. I believe that NLMK's outstanding share price performance since the commencement of trading on the London Stock Exchange on 15 December, 2005, is a strong endorsement of our corporate strategy.

Our successful listing on the LSE raised NLMK's international profile and increased the company's global liquidity. The NLMK Global Offer comprised 7.46% of its existing issued ordinary share capital. According to analysts' reports, NLMK is now the most liquid steel stock in Russia.

Despite the fact that the market environment significantly deteriorated in the second half of the year, the company maintained a high level of revenues. In 2005, NLMK's revenues amounted to USD 4,469 million, remaining almost at the record level attained in 2004. The slight decrease in operating income from 2004 is primarily a result of the reduction of steel output caused by scheduled maintenance activities. However, it is particularly pleasing to note that in this challenging pricing and cost environment, we were able to produce a 47% EBITDA margin. This result enables NLMK to maintain its position as the world's most profitable steel company.

NLMK's continued strong cash generation, with net income at USD 1,385 million for 2005, allows us to fund an ongoing technical upgrading program. We have already spent USD 1.26 billion on the first phase of the program, targeting state-of-the-art technologies to become a best in class operator. The total cost of the technical upgrading program for the next five years will be a lot more ambitious. The strong balance sheet forms the basis of NLMK's organic growth. Thus, we are planning to expand rolling capacity, focusing on the production of high value-added products, from 4.8 million tonnes at present to over 6 million tonnes by 2010.

The strong cash flows from our operations give NLMK the capacity to finance its production costs, capital expenditures and M&A activities, in full, from existing cash funds. The company has excess cash and the Board has decided that a large portion of it will now be returned to shareholders. NLMK's Board is proposing to amend the stated dividend policy so that it now targets minimum dividend payments of 20% of US GAAP net income (previously 15% of US GAAP net income) and to target an average dividend payment during a five-year period of 30% of US GAAP net income. The recommended final dividend for 2005 will be USD 0.0711 per ordinary share. Last year, we paid a single dividend of USD 0.0352 for the first six months of 2005. The total dividend for the year is therefore USD 0.1063. In addition, starting in 2006, the Board will recommend using the proceeds from divesting non-core businesses for special dividends payments. Thus, we remain committed to the strong dividend policy.

In regard to the main components of the corporate strategy, we continued to focus on strengthening vertical integration as the company's key competitive advantage. As a result of further consolidation of iron ore assets, NLMK has now achieved 100% self-sufficiency in iron ore, and used strategic acquisition opportunities in the coal-mining sector to purchase a license for the Zhernovskoe-1 coal deposits in Western Siberia. Along with the recent acquisition of coking coal and coke facilities, JSC "Altai-koks" and "Prokopiievskugol" Coal Company, completed last month, this will allow us to achieve 100% self-sufficiency in coking coal by 2009.

The second pillar of the vertical integration strategy is purchasing high-quality rolling capacities in our strategic markets. In 2005, NLMK participated in the privatization auction for the stake in Erdemir to extend the company's access to the Turkish market. However, the auction price escalated to levels beyond adequate value creation opportunities. I would like to confirm, once again, that we continue to look selectively at value enhancing M&A opportunities. The acquisition of DanSteel A/S at the beginning of 2006 demonstrates that NLMK's fundamental approach is based on introducing value-added products as opposed to simply increasing capacity.

We are expecting to come back to 2004 production levels (of more than 9 million tonnes of crude steel) this year and to bring steel production to over 10 million tonnes by 2010. Our policy remains focused on improving NLMK's EBITDA, the key benchmark of our operating performance, and strengthening company's market leadership. As previously announced, the Board has approved an internal restructuring plan aimed at centralizing key management functions in accordance with NLMK's value chain. Optimizing the company's business processes provides an upside potential for maximizing operational efficiencies and delivering organic growth.

The outlook for the global economy is positive. The core markets demonstrate stable growth and strong underlying demand for NLMK's products. We anticipate that prices and demand will continue at or near current levels throughout 2006, allowing NLMK to produce strong operating profit and margins.

We continue to ensure constant enhancement of our corporate governance practices. In 2005 we elected four independent Board members who took active part in implementing the principles of our new Corporate Governance Code. We also endeavour to ensure timely and precise disclosure of information and to provide maximum transparency of our financial and business operations.

In conclusion, I want to thank all our employees, Board members and management team who contributed to NLMK's success story in 2005. Your dedication, experience, and industry knowledge are NLMK's most valuable assets.

MANAGEMENT BOARD'S COMMENTS

Over recent years Novolipetsk Steel has shown consistently stable results, remaining a market leader in terms of cost efficiency. This was achieved within NLMK's strategy, aimed at increasing the Company's value, creating long-term competitive advantages and reducing dependence on market conditions.

Even though prices on the steel market took a downturn in the second half of 2005, it was a successful

year for NLMK. Sales revenues were USD 4,469 million; EBITDA was USD 2,094 million, with an EBITDA margin of 47%. Net cash provided by operating activities reached USD 1,515 million, fully covering the Company's cash used in investing and financing activities, and contributed to the growth in cash and cash equivalents of USD 548 million (up 40.6% from 2004), which totaled USD 1,897 million at the year-end.

Production output of steel products decreased in 2005 due to major repairs of the blast furnace and converter facilities. Steel manufacturing was reduced by 7.2% to 8.47 million tonnes, finished steel products were down 7.0% to 7.98 million tonnes. Output was reduced mainly by lowering commercial slab production (-14.9% on 2004 levels), while flat-rolled steel products output was maintained at almost the same level as last year, at 4.78 million tons (-0.8%).

NLMK's production policy provides for major repairs of primary equipment in periods of poor conditions in sales markets. This policy was applied in 2005.

Steel Segment

Steel segment continues to be the key segment of the Company. In 2005, this segment generated USD 4 175 million sales revenue from external customers and USD 1 519 million from operating activities. Steel segment includes the Parent company - OJSC NLMK as well as service companies whose business is metal production procurement and sales of final products. The share of steel segment was 93.4% in consolidated revenues and 81.7% in operating profit.

In 2005, export steel prices were fluctuating: the price level was stable at the beginning of the year, dropped and remained low in the course of the second quarter. In the third quarter the prices were stable and finally in fourth quarter prices for selected products increased. Overall, in 2005 prices for the principal types of flat-rolled steel products in the major regional markets of the world dropped by 8–35% (depending upon the region and product type).

The global negative pricing environment has resulted in a price decrease on the domestic market. Despite the growing influence of world prices on domestic prices, domestic price fluctuation was not as big as world price fluctuation.

Decreased steel prices in second half of 2005 and production decline resulted in a 5.1% decline in the 2005 sales revenue from external customers and in a 25.4% drop in operating income.

The steel segment revenue decrease resulted not only from the fall in sales revenue, but also from a substantial growth of raw materials prices. Although in the second half of 2005 coal and iron ore prices went down, the average price level was higher than in 2004.

Mining segment

NLMK's mining segment comprises OJSC Stoilensky GOK, OJSC Dolomit and OJSC Stagdok, a companies that produce metal raw materials for the Parent company.

Stoilensky GOK is the principal mining company within the Group. In 2005, it produced 10.81 million tonnes of iron-ore concentrate and 1.08 million tonnes of agglomerated ore. In 2005, the output of its subsidiary Dolomit, a dolomite producer, was 1.81 million tonnes of flux dolomite. Stagdok, which supplies limestone, produced 2.94 million tonnes of fluxing limestone in the same period.

In 2005, the mining segment's revenue from external customers was USD 119.5 million, which exceeds the level of 2004 by 59.4%. The segment revenue, including intersegmental transactions, was USD 580.1 million (+40,7% on 2004). Revenue growth is attributable to the growth of segment product prices, and to the effect of consolidation with Stoilensky GOK starting from the second quarter of 2004.

As 79.4% sales volume (in value terms) of the mining segment is generated by intercompany transactions, this segment's share in the 2005 consolidated sales revenue was 2.7%.

Increased iron-ore prices led to the mining segment's operating profit growth of 53.1% from USD 186 million in 2004 up to USD 291 million in 2005. The segment's share in consolidated operating profit was 15.6%.

Starting from the second quarter, NLMK had significant influence over OJSC Combinat KMA Ruda (KMARuda), which in 2005 produced 1.85 million tons of iron-ore concentrate. In February-March 2006, additional KMA Ruda shares were acquired, which resulted in an increase of NLMK's ownership up to 76.26%. Stoilensky GOK together with KMARuda fully cover NLMK's requirement for iron-ore concentrate, and concentrate surplus is sold to third parties.

Other Segments

Other segments include the OJSC Tuapse Commercial Sea Port (TMTP) – the fifth largest Black Sea port in Russia, OJSC Lipetskcombank, LLC LIS Chance and the Lipetskaya Municipal Energy Company (LMEC) that supplies electric power to the local population.

In 2005, these segments' revenue from external customers amounted to USD 174.5 million, or up 172% on the 2004 figure. Such significant revenue growth is largely attributed to asset consolidation, in particular, TMTP was consolidated only in July 2004, and the LMEC, after it was created in May 2004, began active operations in the second half of the year.

In 2005, other segments' operating income totalled USD 39.7 million, or 119% against the 2004 level, as a result of consolidation and increased TMTP cargo handling volumes and profit margin.

Consolidated financial result

As a result of both lower volumes of metal products shipped and worsening market conditions, in 2005 sales decreased by 1.5% to USD 4,469 million. NLMK managed to avoid a sharp decline in revenue by modifying its sale policies. NLMK rechanneled part of its export flows to the domestic market, where the price decline was of a smaller magnitude; as a result of this, in 2005 the domestic market accounted for 42% of revenue as compared with 36% in 2004. 2005 witnessed better structure of shipments from NLMK. Due to the greater volumes of shipment of grain-oriented steel and polymer-coated rolled products as well as lower volumes of raw iron and slabs, the proportion of products featuring high added value considerably increased.

NLMK has a well-developed distribution network. In 2005, NLMK's sales covered over 60 countries of the world. Its geographical proximity to clients creates additional advantages to NLMK. These are industrial regions of Russia, Europe, Turkey, Middle East and India, which account for approximately 70% of sales.

Allocation of total revenue by geographical segments in 2005 was as follows:

Russia	USD 1,883 million
Asia and Oceania	USD 848 million
EU countries	USD 626 million
Middle East, including Turkey	USD 571 million
North America	USD 307 million
Other regions	USD 234 million

The Company seeks to diversify its sales, both by product and market outlet. That strategy enables NLMK to concentrate its effort and capital expenditures on those market segments, which ensure the highest profits.

Apart from the increase in proportion of sales to Russia, in 2005 sales to Asia and Oceania rose from 14% to 19% in comparison with 2004. The proportion of sales in North America fell from 14% to 7%. Also, there was a slight decrease in the proportion of sales to EU countries (from 17% down to 14%), whereas the share of Middle East countries, including Turkey (13% in 2005) and other regions (5% in 2005) remained at the same level.

One of NLMK's priorities is to reinforce its status as a metals company with low cost of production. To this end, NLMK pursues a range of activities to ensure stringent control of operating costs.

As a result of this course of action, despite a considerable rise in prices of raw materials and energy in comparison with 2004, operating costs in 2005 only increased by 12%. (For information: prices of raw materials including transportation costs increased as follows: coking coal by 33%, natural gas by 18%, electricity by 8%).

As a result of higher production cost in the context of lower revenue, NLMK's gross profit in 2005 decreased by 14% as compared with 2004 and amounted to USD 2,067 million. A relatively insignificant decrease in gross profits as compared with both price decline rate in the metal markets and growth rate of prices of raw materials was attained due to the coordinated work of all Parent company's subdivisions (including sales & distribution, production and technical functions), and Group's mining segment.

In 2005, EBITDA was USD 2,094 million, representing 47% of sales. For comparison, in 2004, EBITDA was USD 2,563 million and EBITDA margin was 56.5%.

In 2005, depreciation charges were USD 283.6 million or 16% higher than in 2004. Higher depreciation resulted from commissioning new manufacturing facilities and expansion of the Group through acquisition of Stoilensky GOK and TMTP in 2004.

In 2005, interest expense rose by 22% up to USD 15.1 million primarily due to the growing scale of operations of the Group's subsidiary bank. An increase in interest income by 97% up to USD 98.9 million is explained by expanding operations of the subsidiary bank in addition to a rise in the deposited cash and cash equivalents.

In 2005, profit before interest and tax (EBIT) was USD 1,797 million that is 22% less than in 2004. In 2005, profit before tax and minority interest was USD 1,906 million having decreased by 19% against the 2004 level.

Income tax reported in the profit and loss statement for 2005 was USD 495.7 million that is USD 76.4 million or 13% less than in 2004. A reduction in tax is caused by lower financial results for the reporting year.

In 2005, net profit was USD 1,385 million that is 22% less than in 2004. Earnings per share (EPS) were USD 0.23 in 2005.

In spite of a decrease in profits, NLMK remains one of the most efficient steel plants in Russia and worldwide.

Consolidated balance sheet data

At the end of 2005, NLMK's assets increased by 17% and reached USD 6,051 million. The Company's assets grew mostly by means of net profit.

Profitable business allows NLMK to finance its own activities and the development of the group primarily from its own funds. A share of the Company's own capital in the structure of the sources used to finance NLMK's operations is permanently high and exceeded 80% over the last three years; at the end of 2005, it was 84%.

Highly liquid assets of NLMK substantially exceed the amount of its debt and as a consequence NLMK has negative net debt, which amounted to USD (1,669 million) at 31.12.2005.

Over the last five years, the working capital ratio of NLMK did not drop below 4.8. At the end of 2005 it reached 6.0.

The structure of NLMK's balance sheet is evidence of high financial stability and absolute business solvency of the Company. Strong financial position is confirmed by the highest credit ratings amongst Russia's steel companies.

In 2005, return on assets (ROA) was 24% and return equity (ROE) was 29%. These indicators are lower than in 2004 due to a decrease in the Company's net profit in parallel with an increase in its assets and share capital.

In 2005, the Company's current assets increased by USD 715 million or by 28% against 2004. Primarily

this growth was achieved through a rise in cash and cash equivalents which increased by USD 548 million.

Cash Flow

NLMK's operational cash flow fully covers the requirements of Investment and Financial activities. During the previous years, it ensured increased generation of the Company's cash and cash equivalents.

Net operational cash flow was USD 1,515 million in 2005, which is almost 2.6 times more than net cash used for fixed assets construction and acquisition that equaled USD 573 million.

Since practically no loans or borrowings are used to finance the Company's operations, the main cash outflow associated with financial activities is dividend payment to shareholders.

In 2005, the net increase in cash and cash equivalents was approximately USD 548.1 million, and the NLMK cash balance was USD 1,897 million as of the end of 2005, which is up 40.6% on 2004.

The Company's sustainable financial position allows for a flexible business development strategy. Creation of additional shareholder values remains NLMK's priority, and NLMK will continue to pursue the policy based on stringent financial discipline and balanced investment projects.

Capital Expenditure

In 2005, NLMK successfully completed the first phase of the Technical Upgrading Program, covering the period from 2000 to 2005. The program was developed by experts representing leading R&D centers and design institutes. In connection with the program development, the best practices of iron-and-steel companies in Europe, Asia and Americas were used.

The total costs of acquisition and construction of NLMK's fixed assets from 2000 through 2005 were USD 1,549 million.

The first phase of the Technical Upgrading Program saw reconstruction and large-scale overhauls of the existing operating facilities and construction of new ones. Renovation and expansion of its basic production assets have allowed the Company to strengthen its competitive position in the sales markets by expanding its product portfolio, increasing product quality and reducing production costs.

The total amount of capital expenditures in 2005 was USD 573 million, which is higher by USD 304 million as against the 2004 level. The considerable increase resulted from expenditures allotted to the following facilities:

- reconstruction of coke furnace battery #1,
- overhaul of Blast Furnace #5,
- reconstruction of the aspiration system of Blast Furnace #5 casting yard,
- construction of a cast iron desulphurization section in converter plant #1,
- replacement of one of the 300-ton converters in converter plant #2,
- replacement of the automated control system at the cold-rolling mill 2030,
- construction of a continuous hot galvanizing unit #3.

In addition, integration within the NLMK Group of large industrial companies in 2004 gave rise to an increase in the amount of capital expenditures in the mining and "Other" segments. Thus, in 2005 capital expenditures in the mining segment totaled USD 67.5 million, in the "Other" segment – USD 12.8 million against USD 44.5 million and USD 5.2 million respectively in 2004.

Vertical integration

The company's vertical integration ensures a high level of independence from suppliers of raw materials and significantly improves the potential for long-term planning of operations.

In 2004 the company acquired shares of Stoilensky GOK, one of the largest iron-ore producers in Russia, which decreased the company's dependence on the iron-ore concentrate's price fluctuation.

In 2005 NLMK acquired a license to explore and produce coal at the Zhernovskoe-1 site of the

Zhernovskiy coal deposit (Kemerovskaya Oblast, Russia). Based on the current estimates, the coal production and enrichment plant will be commissioned in 2008 and starting from 2009 its output will meet 50% of NLMK's demand for coking coal.

In January 2006 NLMK acquired 100% of the shares of DanSteel A/S (Danish steel-rolling company) from its shareholders who had previously acquired this company in November 2005. The consideration totaled USD 104 million. DanSteel A/S production output of hot-rolled plate is approximately 500,000 tons per year. Since 2002 NLMK has been the leading slab supplier to DanSteel.

In February-March 2006, the company completed the deal to acquire 43.37% shares in OJSC Combinat KMA Ruda (KMAruda), provider of iron-ore raw materials, for USD 60.6 million, bringing the NLMK share in the KMAruda charter capital to 76.26%. At present, Stoilensky GOK and KMAruda supply 100% of NLMK's iron ore concentrate requirements.

In March 2006 an agreement was reached to acquire from a group of investors an 82% interest in OJSC Altai-Koks (Altai-Koks), coke-chemical plant, and a 100% interest in holding company Kuzbass Asset Holdings Limited, Gibraltar, which owns 100% of interest in Prokopievskugol Coal Company, for a total of about USD 750 million.

In January-April 2006, another 6.18% of Altai-Koks shares were purchased from various minority shareholders. Thus, the deal will result in the total Group's ownership of Altai-Koks shares reaching 88%.

Altai-Koks is the leader among the Russian coke-chemical companies. It produces high-quality coke and chemical products. Altai-Koks has production capacity of 3.8 million tons, which is expected to increase up to five million tons by 2007. Prokopievskugol Coal Company has stable position in production and processing of high-value grades of coking coal in Kemerovskaya Oblast. Prokopievskugol Coal Company has at its disposal seven mines and three enrichment plants with the total production of five million tons per year, including three million tonnes of coking coal.

Outlook

We foresee improved market conditions in 2006: prices on principal steel products are expected to grow from current level, both on the domestic and foreign markets. Yet the average price level will be slightly lower than in 2005.

NLMK plans to increase its metals output to match 2004 levels. Production of iron-ore concentrate at the Stoilensky GOK will increase.

We expect that revenues in 2006 will be slightly higher than in 2005. This will be influenced by bigger sales volumes and by adding new assets to the Group. Profits from operations will remain at last year's levels.

NLMK's strategy for sustainable development and its highly qualified team of managers allow us to make a positive forecast and look confidently into the future.

REPORT OF INDEPENDENT AUDITORS

To the Board of Directors of OJSC Novolipetsk Steel

We have audited the accompanying consolidated balance sheets of OJSC Novolipetsk Steel and its subsidiaries (the "Group") as at December 31, 2005, 2004 and 2003, and the related consolidated statements of income, cash flows and stockholders' equity and comprehensive income for the years then ended. These consolidated financial statements are the responsibility of the Group's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 10 to the consolidated financial statements, the cost of certain property, plant and equipment was determined with the assistance of an independent appraiser, who provided US dollar estimates of the fair value of the Group's property, plant and equipment.

In our opinion, except for the effects of using the appraisal to determine the carrying value for certain property, plant and equipment as discussed in the preceding paragraph, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Group as at December 31, 2005, 2004 and 2003 and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

1 BACKGROUND

OJSC Novolipetsk Steel (the "Parent Company") and its subsidiaries (together – the "Group") is one of the largest iron and steel holdings in the Russian Federation with facilities that allow the Group to operate an integrated steel production cycle. The Parent Company is a Russian Federation open joint stock company in accordance with the Civil Code of the Russian Federation. The Parent Company was originally established as a State owned enterprise in 1934 and was privatized in the form of an open joint stock company on January 28, 1993. On August 12, 1998 the Parent Company's name was re-registered as an open joint stock company in accordance with the Law on Joint Stock Companies of the Russian Federation.

The Group's principal activity is the production and sale of ferrous metals, primarily consisting of pig iron, steel slabs, hot rolled steel, cold rolled steel, galvanized cold rolled sheet and cold rolled sheet with polymeric coatings. These products are sold both in the Russian Federation and abroad. The Group also operates in the mining and has relatively insignificant interests in the financial and seaport segments (Note 22).

The Group's main operations are in the Lipetsk region of the Russian Federation and are subject to the legislative requirements of both the Russian Federation and the Lipetsk regional authorities.

The Group's primary subsidiaries, located in Lipetsk and other regions of the Russian Federation, comprise:

- Mining companies OJSC Stoilensky GOK (acquired in 2004), OJSC StAGDoK and OJSC Dolomite. The principal activity of these companies is mining and processing of iron-ore raw concentrate, fluxing limestone and metallurgical dolomite.
- Transport company OJSC Tuapse Trade Seaport ("OJSC TMTP") and its subsidiaries (acquired in 2004). The principal business activity of OJSC TMTP is cargo loading and unloading, transshipment of cargo to sea transport and vice versa.
- Trading companies LLC Trading House NLMK, LLC Stahl, LLC Vimet and LLC Larmet. The principal activity of the trading companies is the purchase of raw materials for the Group's metallurgical production and the sale of metal products.
- The commercial bank OJSC Lipetskcombank and its subsidiary. The bank possesses a general banking license issued by the Central Bank of the Russian Federation, a license for foreign currency operations and a license for brokerage activity. The bank provides banking services to commercial and retail customers and other Group companies.
- The insurance company LLC LIS Chance and its subsidiaries. The principal business activities of these companies are corporate property insurance, voluntary medical insurance, vehicle insurance and public liability insurance to commercial and retail customers and other Group companies.

2 BASIS OF PREPARATION

(a) Statement of compliance

The Group maintains its accounting records in accordance with the legislative requirements of the Russian Federation. The accompanying consolidated financial statements have been prepared from those accounting records and adjusted as necessary to comply, in all material respects, with the requirements of accounting principles generally accepted in the United States of America ("US GAAP").

(b) Functional and reporting currency

The accounting records of the Group are maintained in Russian rubles and the Parent Company prepares its statutory financial statements and reports in that currency to its stockholders in accordance with the laws of the Russian Federation.

The Group's functional currency is considered to be the Russian ruble. The accompanying consolidated financial statements have been prepared using the US dollar as the Group's reporting currency. The translation into US dollars has been performed in accordance with the provisions of SFAS No. 52, *Foreign Currency Translation*.

2 BASIS OF PREPARATION (continued)

The Russian economy ceased to be considered hyperinflationary as of January 1, 2003. At January 1, 2003, the monetary and non-monetary assets and liabilities of the Group as well as the related stockholders' equity balance were translated into Russian rubles at the current exchange rate prevailing at January 1, 2003. This translation established a new functional currency basis for the Group. For periods subsequent to January 1, 2003, the functional currency of the consolidated financial statements (Russian rubles) are translated into the reporting currency (US dollars) utilizing period-end exchange rates for assets and liabilities, period average exchange rates for consolidated income statement accounts and historic rates for equity accounts in accordance with the relevant provisions of SFAS No. 52. As a result of these translation procedures, a cumulative translation adjustment of (\$170,495), \$214,649 and \$171,472 as at December 31, 2005, 2004 and 2003, respectively, which accounts for such translation gains and losses, was recorded directly in stockholders' equity.

The deferred income tax effect of \$145,133 resulting from the change in functional currency was recorded directly in stockholders' equity as at January 1, 2003.

The Central Bank of the Russian Federation's closing rates of exchange at December 31, 2005, 2004 and 2003 were 1 US dollar to 28.7825, 27.7487 and 29.4545 Russian rubles, respectively. The annual weighted average exchange rates were 28.2864, 28.8150 and 30.6877 Russian rubles to 1 US dollar for the years ended December 31, 2005, 2004 and 2003, respectively.

(c) Consolidation principles

These consolidated financial statements include all majority-owned and controlled subsidiaries of the Group. All significant intercompany accounts and transactions have been eliminated.

3 SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies have been applied in the preparation of the consolidated financial statements. These accounting policies have been consistently applied by the Group from one reporting period to another with the exception of newly adopted accounting pronouncements.

(a) Use of estimates

The preparation of financial statements in accordance with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and revenue and expenses during the periods reported. Estimates are used when accounting for certain items such as allowances for doubtful accounts; employee compensation programs; depreciation and amortization lives; property, plant, and equipment valuation allowances; asset retirement obligations; legal and tax contingencies; inventory values; valuations of investments and determining when investment impairments are other than temporary; goodwill; assets and liabilities assumed in a purchase business combinations and deferred tax assets, including valuation allowances. Estimates are based on historical experience, where applicable, and other assumptions that management believes are reasonable under the circumstances. Actual results may differ from those estimates under different assumptions or conditions.

(b) Cash and cash equivalents

Cash and cash equivalents comprise cash balances, cash on current accounts with banks, bank deposits and other highly liquid short-term investments with original maturities of less than three months.

(c) Restricted cash

Restricted cash comprise funds legally or contractually restricted as to withdrawal.

(d) Accounts receivable

Receivables are stated at cost less an allowance for doubtful debts. Management quantifies this allowance based on current information regarding the customers' ability to repay their obligations. Amounts previously written off which are subsequently collected are recognized as income.

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Value added tax

Value added tax related to sales and services rendered is payable to the tax authorities upon the collection of receivables from customers. Input VAT is reclaimable against sales VAT upon payment for purchases. VAT related to sales / purchases and services rendered / used which have not been settled at the balance sheet date (VAT deferred) is recognised in the balance sheet on a gross basis and disclosed separately as a current asset and liability. Where allowance has been made for doubtful debts, loss is recorded for the gross amount of the debtor, including VAT.

(f) Inventories

Inventories are stated at the lower of acquisition cost inclusive of completion expenses or market value. Inventories are released to production or written off otherwise at average cost. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads.

The provision for obsolescence is calculated on the basis of slow-moving and obsolete inventories analysis. Such items are provided for in full.

(g) Investments in marketable debt and equity securities

Marketable debt and equity securities consist of investments in corporate debt and equity securities where the Group does not exert control or significant influence over the investee. The Group classifies marketable debt and equity securities using three categories: trading, held-to-maturity and available-for-sale. The specific identification method is used for determining the cost basis of all such securities.

Trading securities

Trading securities are bought and held principally for the purpose of selling them in the near term. Trading securities are carried in the consolidated balance sheet at their fair value. Unrealized holding gains and losses on trading securities are included in the consolidated statement of income.

Held-to-maturity securities

Held-to-maturity securities are those securities which the Group has the ability and intent to hold until maturity. Such securities are recorded at amortized cost.

Premiums and discounts are amortized and recorded in the consolidated statement of income over the life of the related security held-to-maturity, as an adjustment to yield using the effective interest method.

Available-for-sale securities

All marketable securities not included in trading or held-to-maturity are classified as available-for-sale.

Available-for-sale securities are recorded at their fair value. Unrealized holding gains and losses, net of the related tax effect, are excluded from earnings and reported as a separate component of accumulated other comprehensive income in the stockholders' equity until realized. Realized gains and losses from the sale of available for sale securities, less tax, are determined on a specific identification basis. Dividend and interest income are recognized when earned.

(h) Investments in associates and non-marketable securities

Investments in associates

Associates are those enterprises in which the Group has significant influence, but not control, over the financial and operating policies. Investments in associates are accounted for using the equity method of accounting. The consolidated financial statements include the Group's share of the total recognized gains and losses of associates from the date that significant influence effectively commences until the date that significant influence effectively ceases.

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

Investments in non-marketable securities

Investments in non-marketable securities where the Group does not exercise control or significant influence over the investee are carried at cost less provisions for any other than temporary diminution in value. Provisions are calculated for the investments in companies which are experiencing significant financial difficulties for which recovery is not expected within a reasonable period in the future, or under bankruptcy proceedings.

(i) **Property, plant and equipment**

Owned assets

Items of property, plant and equipment are stated at acquisition cost less accumulated depreciation and impairment losses (Note 3(k)). The cost of self-constructed assets includes the cost of materials, direct labor and an appropriate proportion of production overheads.

Property, plant and equipment also includes assets under construction and plant and equipment awaiting installation.

Where an item of property, plant and equipment comprises major components having different useful lives, they are accounted for as separate items of property, plant and equipment.

Leased assets

Leases that meet the definition of capital leases under the requirements of SFAS No. 13, *Accounting for Leases*, are classified accordingly. Plant and equipment acquired by way of capital lease are stated at the lower of its fair value or the present value of the minimum lease payments at inception of the lease, less accumulated depreciation (refer below) and impairment losses (Note 3(k)).

Subsequent expenditures

Expenditures incurred to replace a component of an item of property, plant and equipment that is accounted for separately, are capitalized with the carrying amount of the component subject to depreciation. Other subsequent expenditures are capitalized only when they increase the future economic benefits embodied in an item of property, plant and equipment. All other expenditures are recognized as expenses in the consolidated statement of income as incurred.

Capitalized interest

Interest is capitalized in connection with the construction of major production facilities. The capitalized interest is recorded as part of the asset to which it relates, and is depreciated over the asset's useful life.

Mineral rights

Mineral rights acquired in business combinations are recorded in accordance with provisions of SFAS No. 141, *Business Combinations*, ("SFAS No. 141") at their fair values at the date of acquisition, based on their appraised fair value. The Group reports mineral rights as a separate component of property, plant and equipment in accordance with the consensus reached by Emerging Issues Task Force on Issue No. 04-2, *Whether Mineral Rights Are Tangible or Intangible Assets*.

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

Depreciation and amortization

Depreciation is charged on a straight-line basis over the estimated useful lives of the individual assets. Plant and equipment under capital leases and subsequent capitalized expenses are depreciated on a straight-line basis over the estimated useful life of the individual assets. Depreciation commences from the time an asset is put into operation. Depreciation is not charged on assets to be disposed of or land. The range of estimated useful lives is as follows:

Buildings and land and buildings improvements	20 – 45 years
Machinery and equipment	2 – 40 years
Vehicles	5 – 25 years

Mineral rights are amortized using the straight-line basis over the license term given approximately even production during the period of license.

(j) Goodwill and intangible assets

Goodwill represents the excess of purchase price over the fair value of net assets acquired. The Group adopted the provisions of SFAS No. 142, *Goodwill and Other Intangible Assets*, (“SFAS No. 142”) as of January 1, 2002. Under SFAS No. 142 goodwill and intangible assets with indefinite useful lives are subject to impairment test at least annually and on an interim basis when an event occurs or circumstances change between annual tests that would more-likely-than-not result in impairment.

Under SFAS No. 142, goodwill is assessed for impairment by using the fair value based method. The group determines fair value by utilizing discounted cash flows. The impairment test required by SFAS No. 142 includes a two-step approach. Under the first step, companies must compare fair value of a “reporting unit” to its carrying value. A reporting unit is the level at which goodwill impairment is measured and it is defined as an operating segment or one level below it if certain conditions are met. If the fair value of the reporting unit is less than its carrying value, step two is required to determine if goodwill is impaired.

Under step two, the amount of goodwill impairment is measured by the amount, if any, that the reporting unit’s goodwill carrying value exceeds its “implied” fair value of goodwill. The implied fair value of goodwill is determined by deducting the fair value of all tangible and intangible net assets of the reporting unit (both recognized and unrecognized) from the fair value of the reporting unit (as determined in the first step).

The Group performs the required annual goodwill impairment test at the end of each calendar year.

The excess of the fair value of net assets acquired over purchase cost is determined as negative goodwill, and is allocated to the acquired non-current assets, except for deferred taxes, if any, until they are reduced to zero.

Intangible assets that have limited useful lives are amortized on a straight-line basis over the shorter of their useful or legal lives.

(k) Impairment of long-lived assets

Long-lived assets, such as property, plant and equipment, mineral rights and purchased intangibles, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated undiscounted future cash flows, an impairment charge is recognized for the amount by which the carrying amount of the asset exceeds the fair value of the asset, generally determined by reference to the discounted future cash flows. Assets held for sale that meet certain criteria are measured at the lower of their carrying amount or fair value less cost to sell.

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

(l) Pension and postretirement benefits other than pensions

The Group follows the Pension and Social Insurance legislation of the Russian Federation, which requires contributions to the Russian Federation Pension Fund by the employer calculated as a percentage of current gross salaries. Such contributions are expensed as incurred.

The Parent Company and some other Group companies have an agreement with a non-Government pension fund (the "Fund") in accordance with which contributions are made on a monthly basis. Contributions are calculated as a certain fixed percentage of the employees' salaries. These pension benefits are accumulated in the Fund during the employment period and distributed by the Fund subsequently. As such, all these benefits are considered as made under a defined contribution plan and are charged to expense as incurred. Accordingly, the Group has no long-term commitments to provide funding, guarantees, or other support to the Fund.

In addition, lump sum benefits are paid to employees of a number of the Group's companies on retirement depending on the employment period and the salary level of the individual employee. The scheme is considered as a defined benefit plan. The expected future obligations to the employees are assessed by the Group's management and accrued in the consolidated financial statements, however these are not material.

(m) Asset retirement obligations

The Group's land, buildings and equipment are subject to the provisions of SFAS No. 143, *Accounting for Asset Retirement Obligations*. Based on the current requirements under the laws of the Russian Federation and various contractual agreements associated with these assets, the Group has no material commitments related to the retirement of its long-lived assets.

(n) Long-term borrowings

Long-term borrowings are recognized initially at cost. Subsequent to the initial recognition, long-term borrowings are stated at amortized cost with any difference between cost and redemption value being recognized in the consolidated statement of income over the period of the borrowings.

When borrowings are repurchased or settled before maturity, any difference between the amount received and the carrying amount is recognized immediately in the consolidated statement of income.

(o) Commitments and contingencies

Contingent liabilities, including environmental remediation costs, arising from claims, assessments, litigation, fines, penalties and other sources are recorded when it is probable that a liability can be assessed and the amount of the assessment and / or remediation can be reasonably estimated.

Estimated losses from environmental remediation obligations are generally recognized no later than completion of remedial feasibility studies. Group companies accrue expenses associated with environmental remediation obligations when such expenses are probable and reasonably estimable. Such accruals are adjusted as further information becomes available or circumstances change.

(p) Income tax

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to be applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period when a different tax rate is enacted.

Pursuant to the provisions of SFAS No. 109, *Accounting For Income Taxes*, the Group provides valuation allowances for deferred tax assets for which it does not consider realization of such assets to be more likely than not.

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

The deferred tax effect associated with the temporary differences that arose from the change in the functional currency of the Group (from the US dollar to the Russian ruble) when Russia ceased to be considered highly inflationary on January 1, 2003, was reflected as an adjustment to the cumulative translation adjustment component of accumulated other comprehensive income on January 1, 2003.

(q) Dividends

Dividends are recognized as a liability in the period in which they are declared.

(r) Revenue recognition

Goods sold

Revenue from the sale of goods is recognized in the consolidated statement of income when there is a firm arrangement, the price is fixed and determinable, delivery has occurred, and collectibility is reasonably assured.

Interest income

Interest income is recognized in the consolidated statement of income as it is earned.

(s) Expenses

Operating lease payments

Operating leases are recognized as an expense in the consolidated statement of income as incurred.

Interest expense

All interest and other costs incurred in connection with borrowings are expensed as incurred as part of interest expense, except for interest which is incurred on construction projects and capitalized (Note 3(i)).

(t) Non-cash transactions

Non-cash settlements represent offset transactions between customers and suppliers, when exchange equivalent is defined and goods are shipped between the parties without exchange of cash.

The related sales and purchases are recorded in the same manner as cash transactions. The fair market value for such transactions is based on the value of similar transactions in which monetary consideration is exchanged with a third party.

Purchases of property, plant and equipment under capital lease arrangements are also recognized as non-cash transactions.

(u) Recent accounting pronouncements

In March 2005, the FASB issued Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations*. The interpretation requires entities to record a liability for the fair value of a conditional asset retirement obligation if the fair value of the liability can be reasonably estimated. The term "conditional asset retirement obligation" refers to a legal obligation to perform an asset retirement activity in which the timing and (or) method of settlement are conditional on a future event that may or may not be within the control of the entity. The interpretation shall be effective no later than December 31, 2005 and early adoption is encouraged. The adoption of this interpretation in 2005 did not have a material impact on its consolidated financial statements.

In May 2005, the FASB issued Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections*, ("SFAS No. 154") which replaces APB Opinion No. 20, *Accounting Changes*, and FASB Statement No. 3, *Reporting Accounting Changes in Interim Financial Statements*. This Statement provides guidance on the accounting for and reporting of accounting changes and error corrections. It establishes, unless impracticable, retrospective application as the required method for reporting a change in accounting principle in the absence of explicit transition requirements specific to the newly adopted accounting principle. The Statement shall be effective for accounting changes made in fiscal years beginning after December 15, 2005. The impact of SFAS No. 154 will depend on the accounting change, if any, in a future period.

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

(v) Segment reporting

According to SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*, segment reporting follows the internal organizational and reporting structure of the Group. The Group's organization comprises two reportable segments:

- Steel segment, comprising production and sales of steel products, primarily pig iron, steel slabs, hot rolled steel, cold rolled steel, galvanized cold rolled sheet and cold rolled sheet with polymeric coatings,
- Mining segment, comprising mining, processing and sales of iron ore, fluxing limestone and metallurgical dolomite, which supplies raw materials to the steel segment and third parties,

and other segments, not reported separately in the consolidated financial statements.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies.

4 CASH AND CASH EQUIVALENTS

	As at December 31, 2005	As at December 31, 2004	As at December 31, 2003

Other cash equivalents	179	16,257	997
	1,896,741	1,348,615	729,641

Other cash equivalents as at December 31, 2004 include a deposit of \$16,217 made as a mandatory condition of participation in a privatization tender and recovered by the Group on its completion in February 2005.

5 RESTRICTED CASH

	As at December 31, 2005	As at December 31, 2004	As at December 31, 2003
Obligatory cash reserves	7,979	5,094	8,104
Long-term bank deposit	-	-	15,000
	7,979	5,094	23,104

Restricted cash balances as at December 31, 2005, 2004 and 2003 include obligatory cash reserves, placed with the Central Bank of the Russian Federation by the subsidiary bank in accordance with statutory requirements applicable to credit institutions.

Restricted cash balance as at December 31, 2003 also includes a US dollar denominated 6.5% bank deposit with a maturity date of October 2006. The Group pledged this deposit as a guarantee for a related party obligation to a third party. In 2004 the contract of pledge was discontinued due to the termination of the underlying obligation. The deposit was recorded within long-term investments as at December 31, 2004 (Note 6(e)).

6 INVESTMENTS

Balance sheet classification of investments:

	As at December 31, 2005	As at December 31, 2004	As at December 31, 2003
Short-term investments and current portion of long-term investments	27,040	21,153	180,797

				13,869	15,284	13,121

6 INVESTMENTS (continued)

In 2006 the Group sold 11.96% share in OJSC Lebedinsky GOK to a third party for \$400 million (Note 26(c)).

Shares in OJSC Lipetsk power generating company, OJSC Lipetsk energy management company, OJSC Lipetsk energy sales company and OJSC Lipetsk mains systems were acquired by the Parent Company due to reorganization of OJSC Lipetskenergo in 2005. There was no cash outflow to the Group as a result of this transaction.

(e) Long-term bank deposits

Long-term bank deposits amounted to \$1,000 and \$16,000 as at December 31, 2005 and 2004. The long-term bank deposit of \$15,000 was recorded within restricted cash as at December 31, 2003 (Note 5).

7 ACCOUNTS RECEIVABLE

	As at December 31, 2005	As at December 31, 2004	As at December 31, 2003
Trade accounts receivable	401,770	357,948	245,404
Advances given to suppliers	55,589	57,260	23,834
Taxes receivable	194,848	157,736	95,634
Accounts receivable from employees	1,646	1,192	896
Other accounts receivable	18,633	22,765	18,556
	<u>672,486</u>	<u>596,901</u>	<u>384,324</u>
Allowance for doubtful debts	<u>(12,432)</u>	<u>(8,339)</u>	<u>(6,578)</u>
	<u>660,054</u>	<u>588,562</u>	<u>377,746</u>

As at December 31, 2005 and 2004, the Group had accounts receivable from Steelco Mediterranean Trading Ltd., Cyprus, Tuscany Intertrade (UK) and Moorfield Commodities Company, UK, each of which exceeded 10% of the gross trade accounts receivable balances. The outstanding balances owed by these debtors totaled \$155,798, \$108,670 and \$65,748 at December 31, 2005, \$140,265, \$102,908 and \$50,342 at December 31, 2004.

As at December 31, 2003 accounts receivable from Steelco Mediterranean Trading Ltd., Cyprus and Tuscany Intertrade (UK) exceeded 10% of the gross trade accounts receivable balances and totaled \$121,658 and \$87,272, respectively.

8 INVENTORIES

	As at December 31, 2005	As at December 31, 2004	As at December 31, 2003
Raw materials	348,860	333,414	201,610

	<u>501,556</u>	<u>475,303</u>	<u>301,303</u>

9 OTHER CURRENT AND NON-CURRENT ASSETS

	As at December 31, 2005	As at December 31, 2004	As at December 31, 2003
Other current assets			
Short-term loans provided by the subsidiary bank	163,055	131,267	53,904
Other current assets	51,875	20,047	12,781
	214,930	151,314	66,685
Allowance for doubtful loans	(6,010)	(2,566)	(3,349)
Total other current assets	208,920	148,748	63,336
Other non-current assets			
Long-term loans provided by the subsidiary bank	71,138	37,500	21,851
Other non-current assets	62,609	30,484	14,983
Total other non-current assets	133,747	67,984	36,834

Weighted average interest rates on loans, provided to companies (including other banks) and individuals in 2005 by the subsidiary bank of the Group were 10.7% p.a. for loans denominated in Russian rubles and 12.7% p.a. for foreign currency loans.

10 PROPERTY, PLANT AND EQUIPMENT

	As at December 31, 2005	As at December 31, 2004	As at December 31, 2003
Land	55,575	46,466	35,442
Mineral rights	522,802	500,996	-
Buildings	708,004	715,759	550,005
Land and buildings improvements	757,066	798,892	686,332
Machinery and equipment	4,234,424	4,320,088	3,831,976
Vehicles	219,431	205,297	105,027
Construction in progress and advances for construction and acquisition of property, plant and equipment	465,425	254,271	270,574
Leased assets	-	862	21,819
Other	37,229	38,787	7,011
	6,999,956	6,881,418	5,508,186
Accumulated depreciation	(4,606,407)	(4,623,790)	(4,175,607)
Net book value	2,393,549	2,257,628	1,332,579

According to US GAAP, the Group's property, plant and equipment should be reported at their actual historical depreciated cost. However, due to the absence of reliable US GAAP accounting records and impairment calculations, the book value of certain property, plant and equipment was determined with the assistance of an independent appraiser, which management considers provided the best basis for the recognition and depreciation of such items. The appraiser provided US dollar estimates of the fair value, determined on the basis of depreciated replacement cost, which the Group has recorded as its property, plant and equipment balance as of January 1, 2000. As at December 31, 2005, 2004 and 2003, the net book value of these items amounted to 21%, 28% and 49% of total net book value of property, plant and equipment, respectively.

10 PROPERTY, PLANT AND EQUIPMENT (continued)

In August 2005, the Group acquired a license for exploration and mining of Zhernovsky coal deposit, expiring in 2025. The carrying value of this license as at December 31, 2005 is \$38,272.

The remaining part of mineral rights was acquired by Group in 2004 through a business combination (Note 21). They expire January 1, 2016 and management believes that they will be extended at the initiative of the Group.

11 GOODWILL AND OTHER INTANGIBLE ASSETS

(a) Goodwill

	<u>Goodwill</u>
Balance as at January 1, 2004	-
Acquired in new subsidiaries (Note 21)	173,677
Cumulative translation adjustment (Note 2(b))	<u>6,138</u>
Balance as at December 31, 2004	179,815
Cumulative translation adjustment (Note 2(b))	<u>(6,458)</u>
Balance as at December 31, 2005	<u>173,357</u>

Goodwill arising on acquisitions was allocated to the appropriate business segment in which each acquisition took place. Goodwill arising from the acquisition of a controlling interest in OJSC Stoilensky GOK amounted to \$95,501 was allocated to the mining segment. Goodwill related to the acquisition of OJSC TMTP and its subsidiaries of \$78,176 was allocated to other non-reportable segments (Note 21).

Negative goodwill of \$110,837 generated on acquisitions of minority interest in OJSC Stoilensky GOK was allocated to the acquired assets other than current assets in accordance with SFAS No. 141.

The Group performed a test for impairment of goodwill at December 31, 2005 and 2004 which indicated no impairments at such dates.

(b) Other intangible assets

	<u>Total useful life, months</u>	<u>Gross book value as at December 31, 2005</u>	<u>Gross book value as at December 31, 2004</u>
Customers relationships OJSC TMTP (oil)	66	10,865	11,270
Customers relationships OJSC TMTP (dry cargo)	<u>66</u>	<u>12,036</u>	<u>12,484</u>

Balance as at December 31, 2005	92,576

15 STOCKHOLDERS' EQUITY

(a) Stock

In May 2004, the Parent Company made a stock split through an additional issue of 5,987,240,000 common stock with a par value of 1 Russian ruble each. These shares were distributed to all existing shareholders of the Parent Company in proportion to their interest held at the date of additional shares distribution. Shareholders are eligible for 1,000 additional shares per share held. In accordance with legal requirements the stock split was followed by a transfer from cumulative retained earnings to capital stock at par value totaling to \$206,733.

As at December 31, 2005, 2004 and 2003, the Parent Company's share capital consisted of 5,993,227,240, 5,993,227,240 and 5,987,240 issued common shares (5,993,227,240 at all the dates given the retrospective effect of the stock split), respectively, with a par value of 1 Russian ruble each. For each common share held, the stockholder has the right to one vote at the annual stockholders' meeting.

In August 2004 the Group increased the statutory reserve of the Parent Company up to the amount of \$10,267 following the change in common stock value.

(b) Dividends

Dividends are paid on common stock at the recommendation of the Board of Directors and approval at the annual Stockholders' Meeting, subject to certain limitations as determined by Russian legislation. Profits available for distribution to stockholders in respect of any reporting period are determined by reference to the statutory financial statements of the Parent Company. At December 31, 2005, 2004 and 2003 the retained earnings of the Parent Company, in accordance with the legislative requirements of the Russian Federation, available for distribution amounted to \$4,137,791, \$3,411,114 and \$1,855,959, respectively, converted into US dollars using exchange rates at December 31, 2005, 2004 and 2003, respectively.

The dividend policy, which was approved by a General Shareholders' Meeting on June 25, 2004, provides for a minimum annual dividend payment of at least 15% of annual net income and sets an objective of making dividend payments of 25% of annual net income, as determined in accordance with US GAAP.

15 STOCKHOLDERS' EQUITY (continued)

In May 2005 the Parent Company declared dividends for the year ended December 31, 2004 of 1.8 Russian ruble per share for the total of \$385,556, including interim dividends for the nine months ended September 30, 2004 of 1 Russian ruble per share (\$214,081). In September 2005 the Parent Company declared interim dividends for the six months ended June 30, 2005 of 1 Russian ruble per share for the total of \$210,792. Dividends payable amount to \$2,572 at December 31, 2005 (Note 12).

In 2004 and 2003 the Parent Company declared dividends of 0.6 and 312.5 Russian rubles per share based on the results of 2003 and 2002, respectively, for a total of \$124,834 and \$61,675.

At the dates dividends were declared, owners of 5,993,227,240 shares were eligible to receive dividends for all periods mentioned, except the results of year 2002, where owners of 5,987,240 shares were eligible (Note 15(a)).

16 INCOME TAX

	<u>For the year ended December 31, 2005</u>	<u>For the year ended December 31, 2004</u>	<u>For the year ended December 31, 2003</u>
Current tax expense	495,521	608,166	236,533
Deferred tax (benefit) / expense:			
origination and reversal of temporary differences	<u>162</u>	<u>(35,945)</u>	<u>(13,498)</u>
Total income tax expense	<u>495,683</u>	<u>572,221</u>	<u>223,035</u>

The corporate income tax rate in Russia applicable to the Group was 24% in 2005, 2004 and 2003.

Income before income tax is reconciled to the income tax expense as follows:

	<u>For the year ended December 31, 2005</u>	<u>For the year ended December 31, 2004</u>	<u>For the year ended December 31, 2003</u>
Income before tax	1,876,063	2,364,002	881,734
Income tax at applicable tax rate	450,255	567,360	211,616
Increase in income tax resulting from:			
non-deductible expenses	<u>45,428</u>	<u>4,861</u>	<u>11,419</u>
Total income tax expense	<u>495,683</u>	<u>572,221</u>	<u>223,035</u>

16 INCOME TAX (continued)

The tax effects of temporary differences that give rise to the deferred tax assets and deferred tax liabilities are presented below:

	<u>As at December 31, 2005</u>	<u>As at December 31, 2004</u>	<u>As at December 31, 2003</u>
<i>Deferred tax assets</i>			
Accounts payable and other liabilities	8,486	6,948	8,659
Non-current liabilities	88	222	2,455
Accounts receivable	1,066	1,129	1,572
Other	381	-	-
Allowance	-	(28)	-
	<u>10,021</u>	<u>8,271</u>	<u>12,686</u>
<i>Deferred tax liabilities</i>			
Property, plant and equipment	(272,202)	(302,529)	(160,021)
Intangible assets	(4,156)	(5,183)	-
Inventories	(12,906)	(6,031)	(11,145)
Other	(15,094)	-	(1,236)
	<u>(304,358)</u>	<u>(313,743)</u>	<u>(172,402)</u>
Total deferred tax liability	<u>(294,337)</u>	<u>(305,472)</u>	<u>(159,716)</u>

An allowance for deferred tax assets is recognized in respect of the temporary differences, where it is not probable that future taxable profit will be available and therefore realization of these tax assets is doubtful.

The deferred tax effect of establishing a new functional currency basis at January 1, 2003 (Note 2(b)) was recorded within the cumulative translation adjustment directly in other comprehensive income within stockholders' equity.

At December 31, 2005, \$130,253 (December 31, 2004: \$155,663) of the deferred tax liability on property, plant and equipment relate to differences between the US GAAP and tax carrying values of property, plant and equipment of the acquired subsidiaries. As noted in Note 21(c), the US GAAP carrying value was recorded at fair value on acquisition.

17 EARNINGS PER SHARE

	<u>Year ended December 31, 2005</u>	<u>Year ended December 31, 2004</u>	<u>Year ended December 31, 2003</u>
Average number of shares			
before restatement	5,993,227,240	3,948,404,836	5,987,240
after restatement	5,993,227,240	5,993,227,240	5,993,227,240
Net income (thousands of US dollars)	<u>1,385,336</u>	<u>1,772,501</u>	<u>656,456</u>
Basic and diluted net income per share (US dollars)	<u>0.2312</u>	<u>0.2958</u>	<u>0.1095</u>

Basic net income per share of common stock is calculated by dividing net income by the weighted average number of shares of common stock outstanding during the reporting period, after giving retroactive effect to any stock splits.

In May 2004, the Parent Company made a stock split through an additional issue of 5,987,240,000 common stock with a par value of 1 Russian ruble each (Note 15(a)). Earnings per share data for 2004 and 2003 have been restated to reflect this share distribution.

The average shares outstanding for purposes of basic and diluted earnings per share information were 5,993,227,240 for the years ended December 31, 2005, 2004 and 2003.

The Parent Company does not have potentially dilutive shares outstanding.

18 NON-CASH TRANSACTIONS

Approximately \$7,300, \$4,400 and \$3,000 of the Group's 2005, 2004 and 2003 revenues, respectively, were settled in the form of mutual offset against the liability to pay for raw materials supplied.

Prices for goods sold and purchased through non-cash settlement arrangements are fixed in the respective contracts and generally reflect current market prices.

In 2004 and 2003, the Group acquired equipment and vehicles under capital lease arrangements with the right to buy out leased assets upon completion of the underlying agreements. The amount of capital lease liabilities incurred during the years ended December 31, 2004 and 2003, was \$19,920 and \$17,059, respectively. In 2004 the majority of capital lease liabilities were settled (Note 20).

In 2004 the Group acquired assets and liabilities as a result of acquisitions of new subsidiaries (Note 21).

19 FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties.

Management believes, that the carrying amounts of financial assets and liabilities approximate to a reasonable estimate of their fair value.

The fair values of available-for-sale securities are based on quoted market prices for these or similar instruments.

20 CAPITAL AND OPERATIONAL LEASES

At December 31, 2004 and 2003, net book value of the machinery, equipment and vehicles held under the capital lease arrangements with a related party was:

	<u>As at December 31, 2005</u>	<u>As at December 31, 2004</u>	<u>As at December 31, 2003</u>
Machinery and equipment	-	198	4,620
Vehicles	-	664	17,199
	-	862	21,819
Accumulated depreciation	-	(87)	(1,067)
Net value of property, plant and equipment obtained under capital lease arrangements	-	775	20,752

In September 2004, the Group cancelled the majority of its capital lease arrangements and bought out leased assets. The capital lease liability in the amount of \$30,625 at the date of cancellation was settled. The difference of \$6,656 between the carrying amount of the capital lease liability settled and purchase price was accounted as an adjustment of the carrying value of the assets.

The discount rates used for the calculation of the present value of net minimum lease payments was 14%. Capital lease charges of \$3,155 and \$3,405 were recorded in the consolidated statements of income for the years ended December 31, 2004 and 2003, respectively.

The Group incurred expenses in respect of operational leases of \$7,347, \$6,595 and \$5,584 in 2005, 2004 and 2003, respectively.

21 BUSINESS COMBINATIONS

(a) OJSC Stoilensky GOK

In March 2004 the companies under common control of the controlling shareholders of the Parent Company ("the Companies under common control") transferred to the Parent Company 59.8% and in November 2004 – 31.1% of the outstanding common shares of OJSC Stoilensky GOK. In these consolidated financial statements, the Group accounted for these transfers retrospectively, in a manner similar to pooling by reflecting the controlling shareholders' book value of their acquisition cost in such transfers of \$598,735 as capital contributions. The Group transferred cash consideration to such control parties of \$636,453 which is reflected as distributions to controlling shareholders.

A part of the primary acquisition cost in the amount of \$60,761 represents transaction related fees paid for by the Companies under common control. The acquisition agreements contain no material future contingent payments or commitments. The acquisitions resulted in the Group's ownership of 91.4% of the voting shares of the company. Prior to March 2004 the Group's 0.5% interest in OJSC Stoilensky GOK was accounted for at cost.

This transaction was consummated to acquire one of the largest iron-ore concentrate and agglomerated ore producers in Russia in order to secure long-term supplies of raw materials for the Group.

The acquisition of OJSC Stoilensky GOK by the control party was accounted for using the purchase method of accounting. The entity was consolidated by the Group for the first time as at the effective date of obtaining control by the control party which management considers to be March 31, 2004. The results of operations of the acquired entity were included in the consolidated statement of income starting from April 1, 2004.

In October and November 2004 the Group acquired, at an auction for sale of a state-owned shareholding and from other minority shareholders, an additional 5.6% of the common stock of OJSC Stoilensky GOK for a consideration of \$22,793 paid in cash.

The Group generated positive goodwill of \$95,501 on acquisition of the controlling stock (59.8%) and negative goodwill \$110,837 on subsequent acquisitions. Negative goodwill was allocated to the acquired assets other than current assets in accordance with SFAS No. 141.

(b) OJSC TMTP

In June 2004 the Group acquired 69.4% of the common stock of OJSC TMTP for a consideration of \$189,172 paid in cash to unrelated parties. The Group also obtained control over its subsidiaries OJSC Tuapse Dockyard, OJSC Tuapsegrazhdanstroi, LLC Nafta-T and LLC Karavella. The agreement contains no future contingent payments or commitments.

This transaction was consummated to provide smooth transportation of the Group's products within the respective area of export sales.

The acquisition of OJSC TMTP and its subsidiaries was accounted for using the purchase method of accounting. OJSC TMTP and its subsidiaries were consolidated for the first time as of the effective date of obtaining control which management considers to be June 30, 2004. The results of operations of the acquired entities were included in the consolidated statement of income starting from July 1, 2004.

21 BUSINESS COMBINATIONS (continued)

(c) Fair values of the assets acquired and liabilities assumed

The following table summarizes the fair values of the assets acquired and liabilities assumed in the business combinations, determined in accordance with SFAS No. 141 provisions. The fair values of property, plant and equipment, including mineral extraction rights, and intangible assets were established by independent appraisers:

	OJSC Stoilensky GOK	OJSC TMTP and its subsidiaries	Total acquisitions
Current assets	29,197	56,270	85,467
Mineral rights	486,880	-	486,880
Other property, plant and equipment	223,307	95,545	318,852
Intangible assets	-	22,712	22,712
Other non-current assets	616	1,000	1,616
Goodwill (Note 11(a))	95,501	78,176	173,677
Total assets acquired	835,501	253,703	1,089,204
Current liabilities	(49,577)	(5,969)	(55,546)
Non-current liabilities	(4,139)	(1,208)	(5,347)
Deferred income tax liability	(154,280)	(14,184)	(168,464)
Total liabilities assumed	(207,996)	(21,361)	(229,357)
Minority interest	(5,977)	(43,170)	(49,147)
Fair value of net assets acquired	621,528	189,172	810,700
Less: cash acquired	(1,070)	(38,109)	(39,179)
Fair value of net assets acquired, net of cash acquired	620,458	151,063	771,521
Transfers of subsidiary interests from common control parties reflected as capital contribution, net of cash received of \$1,070	597,665	-	597,665
Fair value of net assets acquired from third parties, net of cash acquired of \$38,109 at OJSC TMTP and its subsidiaries	22,793	151,063	173,856
Fair value of net assets acquired, net of cash acquired	620,458	151,063	771,521

The transfers of subsidiary interests were recorded in the statement of stockholders' equity as capital contributions of \$598,735, comprising \$597,665 of non-cash contributions and \$1,070 of cash owned by the subsidiary at the dates of contributions. The payments to the common control parties for the transfer of the shares in OJSC Stoilensky GOK of \$636,453 were recorded as a reduction in stockholders' equity.

(d) Other acquisitions

In 2004 the Group made a number of immaterial acquisitions of stock in other Group's subsidiaries and an immaterial acquisition of the controlling stock in LLC Independent Transport Company from related parties for the total consideration of \$2,617 (Note 24).

21 BUSINESS COMBINATIONS (continued)

(e) Pro forma financial statements

The following unaudited pro forma statements of income are presented relating to the acquisitions by the Group of OJSC Stoilensky GOK and OJSC TMTP and its subsidiaries (together – “TMTP Group”) in the transactions accounted for as purchases. The unaudited pro forma statements of income are based on the consolidated statements of income of the Group and TMTP Group and individual statements of income of OJSC Stoilensky GOK.

The unaudited pro forma statements of income combine the results of operations of the Group, OJSC Stoilensky GOK (acquired by the Group as of March 31, 2004) and TMTP Group (acquired by the Group as of June 30, 2004) for the years ended December 31, 2004 and 2003 as if the acquisitions occurred on January 1, 2004 and 2003, respectively. These unaudited pro forma statements of income should be read in conjunction with the consolidated financial statements of the Group.

Unaudited proforma income statement data for the year ended December 31, 2004 and 2003 are as follows:

	<u>For the year ended December 31, 2004</u>	<u>For the year ended December 31, 2003</u>
Sales revenue	4,620,124	2,720,714
Operating income	2,217,107	841,781
Income before income tax and minority interest	2,354,558	815,623
Income before minority interest	1,781,686	605,035
Net income	1,760,792	602,621
Net income per share (US dollars)	<u>0.2938</u>	<u>0.1006</u>

The above statements give effect to the following pro forma adjustments necessary to reflect the acquisitions:

- (a) A depreciation charge and respective deferred tax effect for the periods preceding business combinations was calculated on the basis of appraised fair value of property and equipment, including mineral rights, acquired in new subsidiaries.
- (b) An amortization charge and respective deferred tax effect for the periods preceding business combination was calculated on the basis of appraised fair value of intangible assets identified and separated from goodwill in the process of TMTP Group’s purchase price allocation.
- (c) Minority interest in net income of acquired subsidiaries for the periods preceding business combinations was calculated on the basis of interest owned by the Group at December 31, 2004.

The unaudited proforma amounts are provided for informational purposes only and do not purport to present the results of operations of the Group had the transactions assumed therein occurred on or as of the date indicated, nor is it necessarily indicative of the results of operations which may be achieved in the future.

22 SEGMENTAL INFORMATION

The Group has two reportable business segments: steel and mining. These segments are combinations of subsidiaries, have separate management teams and offer different products and services. The above two segments meet criteria for reportable segments. Subsidiaries are consolidated by the segment to which they belong based on their products and management.

Revenue from segments that does not exceed the quantitative thresholds is primarily attributable to the two operating segments of the Group. Those segments include the trade seaport services business, represented by OJSC TMTP and its subsidiaries, and finance business, comprising banking and insurance services to commercial and retail customers. None of these segments has met any of the quantitative thresholds for determining reportable segments.

The Group accounts for intersegmental sales and transfers as if the sales or transfers were to third parties.

The Group's management evaluates performance of the segments based on segment revenues, gross profit, operating income and income before minority interest.

Segmental information for the year ended December 31, 2005 is as follows:

	Steel	Mining	All other	Totals	Intersegmental operations and balances	Consolidated
Revenue from external customers	4,174,715	119,496	174,515	4,468,726	-	4,468,726
Intersegment revenue	4,402	460,579	5,154	470,135	(470,135)	-
Depreciation and amortization	(197,110)	(69,354)	(17,158)	(283,622)	-	(283,622)
Gross profit	1,667,880	318,227	65,939	2,052,046	14,947	2,066,993
Operating income	1,518,890	290,904	39,712	1,849,506	10,533	1,860,039
Interest income	58,741	10,736	30,249	99,726	(854)	98,872
Interest expense	(1)	(28)	(15,916)	(15,945)	854	(15,091)
Income tax	(394,344)	(68,093)	(14,541)	(476,978)	(18,705)	(495,683)
Income before minority interest	1,165,120	224,778	44,524	1,434,422	(23,862)	1,410,560
Segment assets, including goodwill	4,422,873	1,071,717	706,761	6,201,351	(150,283)	6,051,068
Capital expenditures	(492,984)	(67,467)	(12,769)	(573,220)	-	(573,220)

Segmental information for the year ended December 31, 2004 is as follows:

	Steel	Mining	All other	Totals	Intersegmental operations and balances	Consolidated
Revenue from external customers	4,399,606	74,965	64,115	4,538,686	-	4,538,686
Intersegment revenue	3,365	337,344	204	340,913	(340,913)	-
Depreciation and amortization	(174,646)	(59,972)	(9,038)	(243,656)	-	(243,656)
Gross profit	2,182,293	207,805	20,873	2,410,971	(4,643)	2,406,328
Operating income	2,037,325	186,105	18,084	2,241,514	(18,650)	2,222,864
Interest income	31,110	2,382	17,236	50,728	(659)	50,069

Income tax	(530,694)	(40,818)	(4,238)	(575,750)	3,529	(572,221)
Income before minority interest	1,639,276	140,813	17,322	1,797,411	(5,630)	1,791,781
Segment assets, including goodwill	3,767,196	984,495	654,131	5,405,822	(239,901)	5,165,921
Capital expenditures	(219,673)	(44,541)	(5,245)	(269,459)	-	(269,459)

22 SEGMENTAL INFORMATION (continued)

Segmental information for the year ended December 31, 2003 is as follows:

	Steel	Mining	All other	Totals	Intersegmental operations and balances	Consolidated
Revenue from external customers	2,450,193	17,179	650	2,468,022	-	2,468,022
Intersegment revenue	1,017	23,099	-	24,116	(24,116)	-
Depreciation and amortization	(155,439)	(2,054)	(316)	(157,809)	-	(157,809)
Gross profit / (loss)	1,004,013	4,973	(55)	1,008,931	7,952	1,016,883
Operating income / (loss)	884,209	2,598	(289)	886,518	(4,244)	882,274
Interest income	23,820	-	10,394	34,214	(581)	33,633
Interest expense	(3,151)	(691)	(4,083)	(7,925)	581	(7,344)
Income tax	(221,372)	(435)	(1,228)	(223,035)	-	(223,035)
Income before minority interest	653,775	2,193	3,504	659,472	(773)	658,699
Segment assets	3,022,399	19,431	125,427	3,167,257	(81,992)	3,085,265
Capital expenditures	(232,955)	(2,803)	(3,521)	(239,279)	-	(239,279)

The allocation of total revenue by territory is based on the location of end customers who purchased the Group's products from international traders (Note 23(c)) and the Group. It does not reflect the geographical location of the international traders. The Group's total revenue from external customers by geographical area for the years ended December 31, 2005, 2004 and 2003, was as follows:

	For the year ended December 31, 2005	For the year ended December 31, 2004	For the year ended December 31, 2003
Russia	1,882,839	1,628,242	1,043,880
Asia and Oceania	847,605	628,238	533,987
European Union	626,332	783,014	384,139
Middle East, including Turkey	571,331	636,044	348,743
North America	306,996	657,427	46,354
Other regions	233,623	205,721	110,919
	4,468,726	4,538,686	2,468,022

Geographically, all assets, production and administrative facilities of the Group are located in Russia.

As disclosed in Note 23(c), the Group sells to three international traders that accounted for a majority of the Group's export sales in 2005, 2004 and 2003. LLC Insaur-Stal accounted for in excess of 10% of the Group's 2004 and 2003 domestic sales.

23 RISKS AND UNCERTAINTIES

(a) Operating environment of the Group

The Russian Federation economy continues to display some characteristics of an emerging market. These characteristics include, but are not limited to, the existence of a currency that is not freely convertible in most countries outside of the Russian Federation, restrictive currency controls, and relatively high inflation. The tax, currency and customs legislation within the Russian Federation is subject to varying interpretations, and changes, which can occur frequently.

Whilst there have been improvements in the economic trends, the future economic direction of the Russian Federation is largely dependent upon the effectiveness of economic, financial and monetary measures undertaken by the Government, together with tax, legal and political developments.

(b) Convertibility of Russian ruble

Exchange restrictions and controls exist relating to converting Russian rubles into other currencies. At present, the Russian ruble is not a convertible currency outside of the Russian Federation and, further, the Group is required to convert 10% of its foreign currency earnings into Russian rubles starting 2005 (25% before 2005). Future movements in the exchange rate between the Russian ruble and the US dollar will affect the reported US dollar amounts related to the Russian ruble carrying values of the Group's assets and liabilities. Such movements may also affect the Group's ability to realize assets presented in US dollars in these consolidated financial statements. Accordingly, any translation of ruble amounts to US dollars should not be construed as a representation that such ruble amounts have been, could be, or will in the future be converted into US dollars at the exchange rate shown or at any other exchange rate.

(c) Commercial risks

The Group minimizes its sales risks by having a wide range of geographical zones for sales, which allows the Group to respond quickly to unexpected changes in the situation on one or more sales markets on the basis of an analysis of the existing and prospective markets.

The Group's exports in monetary terms in 2005 were 58% (2004: 64%, 2003: 58%) of the total sales.

The Group relies on export sales to generate foreign currency earnings. As the Group exports a significant portion of its production, it is exposed to foreign currency risk as well as global economic and political risks.

Due to its foreign currency denominated assets and liabilities, the Group is subject to the risk arising from foreign exchange rate fluctuations. The Group's objective in managing its exposure to foreign currency fluctuations is to minimize earnings and cash flow volatility associated with foreign exchange rate changes. The net foreign currency position as at December 31, 2005 is as follows:

	US Dollar	EURO	Other currencies
Cash and cash equivalents	960,508	487,582	-
Accounts receivable	286,855	205,741	1,197
Other current assets	14,446	-	-
Investments and long-term deposit	1,559	-	-
Other non-current assets	27,223	4,465	-
Accounts payable and other liabilities	(26,863)	(15,215)	(389)
Other long-term liabilities	(8,500)	-	-

23 RISKS AND UNCERTAINTIES (continued)

The Group sells to three international traders that account for the majority of its export sales. In 2005, Steelco Mediterranean Trading Ltd., Cyprus, Tuscany Intertrade (UK), and Moorfield Commodities Company, UK, purchased 41%, 26% and 17% of the Group's export sales, respectively (2004: 43%, 30% and 17%; 2003: 45%, 33% and 9%). These companies were indirect shareholders of the Parent Company during 2003. The maximum shareholdings during 2003 were 7.59%, 9.99% and 7.59%, and at December 31, 2003 were 4.16%, 4.11% and 4.16%, respectively. In 2004 these companies ceased to be indirect shareholders of the Parent Company. Price fluctuations of sales to these companies are in line with general trends in global price fluctuations. The Group's export prices are comparable to the prices of Russian competitors. In August 2005, 1.199% of the share capital of the Parent Company was acquired by a company beneficially owned by the shareholders of these traders.

The Group's future profitability and overall performance is strongly affected by the prices of ferrous metal products set in the international metal trading market that are subject to significant fluctuations.

24 RELATED PARTY TRANSACTIONS

Related parties relationships are determined with reference to SFAS No. 57, *Related Party Disclosures*. Balances as at December 31, 2005, 2004 and 2003 and transactions for the years ended December 31, 2005, 2004 and 2003 with related parties of the Group consist of the following:

(a) Sales to and purchases from related parties

Sales

Sales to related parties, either the Companies under common control or companies under control or significant influence of the Group's management, were \$38,436, \$45,715 and \$24,502 for the years ended December 31, 2005, 2004 and 2003, respectively, which accounts for 0.9%, 1% and 1% of the total sales revenue. Related accounts receivable equaled \$33,178, \$6,501 and \$7,397 as at December 31, 2005, 2004 and 2003, respectively.

Purchases and services

Purchases of raw materials, technological equipment and management services from the Companies under common control, were \$22,247, \$114,255 and \$77,216 for the years ended December 31, 2005, 2004 and 2003, respectively. Purchases of energy from the companies under significant influence of the Group's management (OJSC Lipetsk energy sales company and other companies, which originated from reorganization of OJSC Lipetskenergo (Note 6(d)), in 2005, and OJSC Lipetskenergo in 2004 and 2003), were \$140,005, \$106,377 and \$85,735 for the years ended December 31, 2005, 2004 and 2003, respectively.

In 2004 and 2003, the Group made payments to one of the Companies under common control, acting as an agent between the Group and railroad companies, for the transportation of raw materials and the Group's products. The payments include both railroad tariff (transferred to railroad companies), and agent fee, retained by the agent. The agent fee and purchases of other materials from this Company under common control amounted to \$8,452 and \$2,979 for the years ended December 31, 2004 and 2003, respectively.

Accounts payable to the related parties were \$4,152, \$2,044 and \$7,689 as at December 31, 2005, 2004 and 2003, respectively.

24 RELATED PARTY TRANSACTIONS (continued)

(b) Financial transactions

The subsidiary bank of the Group had loans receivable from related parties, either associates or companies under control or significant influence of the Group's management, of \$10,633, \$7,538 and \$9,221 as at December 31, 2005, 2004 and 2003, respectively.

Deposits and current accounts of related parties, either the Companies under common control or companies under control or significant influence of the Group's management, in the subsidiary bank amounted to \$88,090, \$28,642 and \$8,217 as at December 31, 2005, 2004 and 2003, respectively.

Deposits and current accounts of Group companies in a bank under significant influence of the Group's management (OJSC Bank Zenit) amounted to \$70,967 as at December 31, 2005 (nil at December 31, 2004 and 2003). Related interest income from these deposits and current accounts for the year ended December 31, 2005 amounted to \$10,235.

The Group leased property, plant and equipment under capital lease arrangements with one of the Companies under common control. The amount of capital lease liabilities incurred during the years ended December 31, 2004 and 2003, was \$19,920 and \$17,059, respectively. The capital lease liabilities to this related party as at December 31, 2004 and 2003 amounted to \$545 and \$17,677, respectively.

The Group granted interest free loans to management in the total amount of \$817, \$71 and \$40 for the years ended December 31, 2005, 2004 and 2003, respectively. The aggregate amount of such loans outstanding as at December 31, 2005, 2004 and 2003 was \$514, \$60 and \$38, respectively.

As at December 31, 2003, the Group had issued guarantees to the Companies under common control amounting to \$38,980 in respect of borrowings from non-group companies (Note 25(h)). There were no guarantees issued to related parties as at December 31, 2005 and 2004.

In 2003 the Parent Company's shareholders repaid remaining portion of the long-term interest free loan in the amount of \$71,415. A gain on the early repayment of the loan in the amount of \$20,984 was recognized in the consolidated statement of income for the year ended December 31, 2003.

(c) Acquisitions and investments

In 2004 the Companies under common control transferred to the Parent Company 91.4% of the outstanding common shares of OJSC Stoilensky GOK. Such transfers of \$598,735 were recorded as capital contributions. The Group transferred cash consideration to such control parties of \$636,453 which is reflected as distributions to controlling shareholders (Note 21(a)).

In the second half of 2004 the Group made a number of immaterial acquisitions of stock in the Group's companies OJSC Dolomit, OJSC StAGDoK, and an immaterial acquisition of the controlling stock in LLC Independent Transport Company from the Companies under common control in the total amount of \$2,617 (Note 21(d)); acquired non-marketable securities, shares in OJSC Lipetskenenergo, for \$944 from one of the Companies under common control, and sold non-marketable securities, shares in OJSC Moscow Pipe Plant Filit, OJSC Almet'yevsky Pipe Plant and CJSC Engels Pipe Plant, for the total consideration of \$2,430 to the Companies under common control (Note 6(d)). The Group sold an investment in associate CJSC Korpus to one of the Companies under common control for the consideration of \$3,124 (Note 6(c)). In 2003 the Group sold its share in OJSC Coal Mining Company Kuzbassugol for the consideration of \$38,104 to one of the Companies under common control.

(d) Contributions to non-governmental pension fund and charity fund

Total contributions to a non-governmental pension fund amounted to \$2,729, \$2,607 and \$2,216 in 2005, 2004 and 2003, respectively. The Group has the right to appoint and dismiss top management of the fund as the major contributor to its capital. The Group has no long-term commitments to provide funding, guarantees, or other support to the fund.

Contributions to the charity fund controlled by the Parent Company's management were \$6,941 in 2004. There were no such contributions in 2005 and 2003.

24 RELATED PARTY TRANSACTIONS (continued)

(e) Stock-based compensation

In August 2005, the controlling shareholder of the Parent Company effectively sold 200,100,000 of NLMK shares to companies beneficially owned by certain members of its Board of Directors and management of the Group. The purchase price of these shares was based on the Russian Trade System ("RTS") trading price at the date of the transaction. This purchase price is payable by December 31, 2006 with no interest charged on the outstanding debt. The respective shares were pledged to secure the payment. There were no shares under such arrangements as at and for the years ended December 31, 2004 and 2003. The only movements which took place in the year ended December 31, 2005 were as described above.

This transaction was achieved through contractual arrangements between companies owned by the controlling shareholder of the Parent Company and companies beneficially owned by certain members of NLMK's Board of Directors and management of the Group, and therefore there was no cash outflow to the Group as a result of this transaction.

The Group applied SFAS No. 123, *Accounting for Stock-Based Compensation*, ("SFAS No. 123") for the purposes of accounting for this transaction, and estimated the fair value of the options at \$31,463. Management of the Group estimated that \$1,132 of this value related to the services provided by the individuals to the Group, and accordingly recorded an expense in general and administrative expenses in the year ended December 31, 2005, with a corresponding increase in stockholders' equity. The arrangement effectively represents the granting of options, at zero consideration, to buy shares at the RTS trading price of the shares on the grant date (in August 2005), the option expiring on December 31, 2006.

The following assumptions were made in applying the Black-Scholes model in estimating the fair values of the options for the purposes of applying SFAS No. 123: risk-free interest rate on Russian dollar-denominated bonds of 4.5%, expected life of 1.33 years, expected volatility of 25.91%, and expected dividend yield of 4.24%.

25 COMMITMENTS AND CONTINGENCIES

(a) Anti-dumping investigations

The Group's export trading activities are subject to from time to time compliance reviews of importers' regulatory authorities. The Group's export sales were considered within several anti-dumping investigation frameworks. The Group takes steps to address negative effects of the current and potential anti-dumping investigations and participates in the settlement efforts coordinated through the Russian authorities. No provision arising from any possible agreements as a result of anti-dumping investigations has been made in the accompanying consolidated financial statements.

(b) Litigation

The Group, in the ordinary course of business, is the subject of, or party to, various pending or threatened legal actions. The management of the Group believes that any ultimate liability resulting from these legal actions will not significantly affect its financial position or results of operations, and no amount has been accrued in the consolidated financial statements.

(c) Environmental matters

The enforcement of environmental regulation in Russian Federation is evolving and the enforcement posture of government authorities is continually being reconsidered. The Group periodically evaluates its obligations under environmental regulations. As obligations are determined, they are recognised immediately. Potential liabilities, which might arise as a result of changes in existing regulations, civil litigation or legislation, cannot be estimated but could be material. In the current enforcement climate under existing legislation, management believes that the Group has met the Government's federal and regional requirements concerning environmental matters, therefore there are no significant liabilities for environmental damage or remediation.

25 COMMITMENTS AND CONTINGENCIES (continued)

(d) Insurance

The Russian insurance market is in a developing stage and some forms of insurance protection common in other parts of the world are not yet generally available in the Russian Federation.

The Group has entered into insurance contracts to insure property, plant and equipment, land transport, an aircraft and purchased accident and health insurance, inter-city motor vehicle passenger insurance and medical insurance for employees. Furthermore, the Group has purchased operating entities civil liability coverage for dangerous production units.

(e) Capital commitments

Management estimates the outstanding agreements in connection with equipment supply and construction works amounted to \$264,903, \$52,230 and \$6,000 as at December 31, 2005, 2004 and 2003, respectively.

(f) Social commitments

The Group makes contributions to mandatory and voluntary social programs. The Group's social assets, as well as local social programs, benefit the community at large and are not normally restricted to the Group's employees. The Group has transferred certain social operations and assets to local authorities, however, management expects that the Group will continue to fund certain social programs through the foreseeable future. These costs are recorded in the year they are incurred.

(g) Tax contingencies

Russian tax, currency and customs legislation is subject to varying interpretations, and changes, which can occur frequently. Management's interpretation of such legislation as applied to the transactions and activity of the Group may be challenged by the relevant regional and federal authorities. Recent events within the Russian Federation suggest that the tax authorities may be taking a more assertive position in their interpretation of the legislation and assessments, and it is possible that transactions and activities that have not been challenged in the past may be challenged. As a result, significant additional taxes, penalties and interest may be assessed. Fiscal periods remain open to review by the authorities in respect of taxes for three calendar years preceding the year of review. Under certain circumstances reviews may cover longer periods.

As at December 31, 2005 management believes that its interpretation of the relevant legislation is appropriate and the Group's tax, currency and customs positions will be sustained. Where management believes it is probable that a position cannot be sustained, an appropriate amount has been accrued for in these consolidated financial statements.

(h) Financial guarantees issued

As at December 31, 2005 and 2004, the Group has issued guarantees to third parties amounting to \$540 and \$1,365. As at December 31, 2003 the Group had issued guarantees to related parties amounting to \$38,980 in respect of borrowings from non-group companies (Note 24(b)). No amount has been accrued in the consolidated financial statements for the Group's obligation under these guarantees as the projected outflows from such guarantees are immaterial.

26 SUBSEQUENT EVENTS

(a) Acquisition of DanSteel A/S shares

In January 2006, a company under common control outside of the Group transferred to the Parent Company 100% of the outstanding common shares of DanSteel A/S, a steel-rolling company acquired by the common control party in November 2005. The Group transferred cash consideration of \$104,000 to such control party. The transaction value was determined based on an independent appraisal.

The consideration paid will be reflected as distribution to controlling shareholders in the consolidated financial statements for the year ending December 31, 2006. Carrying values of the assets and liabilities contributed will be reflected in the consolidated financial statements for the year ending December 31, 2006 as capital contribution from controlling shareholders:

26 SUBSEQUENT EVENTS (continued)

Current assets	138,257
Property, plant and equipment	14,471
Intangible assets	2,567
Other non-current assets	4,904
Total assets	160,199
Current liabilities	(50,300)
Non-current liabilities	(35,753)
Deferred income tax liability	(10,164)
Total liabilities	(96,217)
Carrying value of net assets contributed	63,982

In the consolidated financial statements for the three years ending December 31, 2006, this business combination will be accounted for retrospectively, as if this transaction had taken place in November 2005 (the date of purchase by the controlling shareholder).

(b) Acquisition of OJSC Combinat KMAruda shares

In February-March 2006, the Parent Company purchased from third parties 43.37% of the outstanding common shares of OJSC Combinat KMAruda, and iron ore producer, for consideration of \$60,597. The acquisition resulted in the Group's ownership of 76.26%. These transactions were consummated to improve the upstream integration of the Group.

The following table summarizes the preliminary fair values of the assets acquired and liabilities assumed in this business combination, determined in accordance with SFAS No. 141 provisions. The fair values of property, plant and equipment, including mineral extraction rights, and intangible assets were based on estimates of independent appraisers (in relation to the 43.37% stake acquired):

Current assets	7,873
Mineral rights	18,926
Other property, plant and equipment	15,687
Other non-current assets	8,849
Goodwill	16,836
Total assets acquired	68,171
Current liabilities	(1,432)
Deferred income tax liability	(6,142)
Total liabilities assumed	(7,574)
Fair value of net assets acquired	60,597

26 SUBSEQUENT EVENTS (continued)

(c) Disposal of OJSC Lebedinsky GOK shares

In January 2006, the Parent Company sold to third parties 11.96% of the outstanding common shares of OJSC Lebedinsky GOK for consideration of \$400 million; carrying value of these shares at December 31, 2005 was \$9,456 (Note 6(d)). This transaction was consummated in line with Group's strategy for investment management.

(d) Acquisition of coal mines and coke plants

In March 2006, the Parent Company signed agreements to acquire from third parties 82% of the outstanding common shares of OJSC Altai-koks, coke-chemical plant, and 100% of the outstanding common shares of holding company Kuzbass Asset Holdings Limited, Gibraltar, which owns 100% of Prokopievskugol Coal Company for a consideration of approximately USD 750 million.

OJSC Altai-koks is among leading coke-chemical plants in Russia. It produces high-quality coke and chemical products. In January – April 2006, the Parent Company acquired additional 6.18% in OJSC Altai-koks from other minority shareholders. The acquisitions resulted in the Group's ownership of more than 88% of the voting shares of the company.

Prokopievskugol Coal Company is the leader in high-grade coking coal production and processing in the Kemerovo region of Russia. It owns seven mines and three processing plants.

These acquisitions were made in line with Group's vertical integration strategy, aiming on additional competitive advantages through the stable supply of key raw materials. The acquired companies will be consolidated by the Group for the first time as at the effective date of obtaining control which management considers to be April 2006.

Management considers disclosure of fair values of assets acquired and liabilities assumed in this business combination to be not practicable, given the effective date of obtaining control.

Novolipetsk Steel (NLMK) declares its Resource Efficiency Policy

Novolipetsk Steel adopted its Resource Efficiency Policy declaring lowering production costs and reduction of energy intensity in steel production process as its primary goals.

The Policy determines improvement of technological processes and material resources management system, production facilities upgrading and strict compliance with legal regulatory requirements on resource efficiency as its strategic objectives to meet the goals declared.

The full text of the Company's Resource Efficiency Policy can be found at the Company's web site.

Novolipetsk Steel (NLMK) completes acquisition of 82% interest in coke producer JSC "Altai-koks" and 100% interest in "Prokopievskugol" Group of Coal Companies

Further to the announcement of March 29th, 2006, OJSC Novolipetsk Steel (LSE: NLMK) has completed the acquisition of an 82% interest in "Altai-koks", coke-chemical plant, and a 100% interest in holding company Kuzbass Asset Holdings Limited, Gibraltar, which owns 100% of interest in "Prokopievskugol" Coal Company for about USD 750 million. As previously stated, the deal was financed in full from NLMK's existing cash funds

PRESS-RELEASE

03-04-2006

2005 RAS Financial Results for NLMK Group's major companies

OJSC Novolipetsk Steel (NLMK) (LSE: NLMK) today announces 2005 Russian Accounting Standards (RAS) financial results for its major companies *.

The filing of RAS accounting results is a Russian regulatory requirement. In addition, NLMK has been preparing financial reports in accordance with the US GAAP accounting standards starting 1998. RAS accounting results differ materially from US GAAP accounting results and are not comparable to financial statements prepared in accordance with US GAAP. The RAS accounting results of NLMK Group's major companies are not indicative of the financial condition or results of operations of these entities under US GAAP. Reference should be made only to consolidated financial statements prepared in accordance with US GAAP for information with respect to NLMK Group's financial condition and results of operations.

Highlights

- **Revenues and net profit for the steel segment decreased due to price reduction on steel products, increase of prices for raw materials and planned overhaul of production facilities.**

NLMK's steel segment profit in 2005 decreased due to weak pricing environment in the second half of the year as well as significant price increase on basic raw materials. The profit was also reduced due to planned technical overhaul and a certain drop in production. The Company's management decided to decrease volumes of production, which mostly related to the production of slabs, in order to support prices in the weak pricing environment.

- **Profit growth at major mining companies.**

Revenue increase at major mining companies - Stoilensky GOK and KMA Ruda - for 2005 amounted to 37.73% and 49.73% correspondingly. Net income of these companies for 2005 grew by 57.80% and 89.30%. The profit growth in mining operations benefited from favorable pricing conditions and considerable volume of investments within the technical upgrading program.

- **Considerable profit growth at OJSC "Stagdok" and OJSC "Dolomit".**

OJSC "Stagdok" and OJSC "Dolomit" profit growth for 2005 amounted to 25.98% and 30.07% correspondingly. Net profit of these companies for 2005 grew by 161.10% и 261.70%. The output growth as well as rising prices on limestone and metallurgical dolomite was the key drivers of the considerable increase.

- **Profit growth at OJSC "Lipetskcombank"**

OJSC "Lipetskcombank" 2005 revenues came up 53.37% in comparison with the previous year. The bank's net profit grew by 22.85%. The favorable performance of OJSC "Lipetskcombank" in 2005 is primarily attributable to growing credit portfolio and operations volume on the securities market as well as enhancing banking services product range.

- **Considerable revenues and profit growth at OJSC "TMTP"**

OJSC "TMTP" 2005 revenues and net income grew by 17.37% and 74.26% correspondingly. The profit growth benefited from the growing freight turnover including petroleum products and dry cargo turnover.

OJSC "NLMK" will publish US GAAP consolidated financial results for the year ended December 31, 2005 in April, 2006.

* Indicated companies of the Group include: Novolipetsk Steel (NLMK), Stoilensky GOK, KMA Ruda, OJSC "Stagdok", OJSC "Dolomit", OJSC "TMTP" and OJSC "Lipetskcombank".

Novolipetsk Steel (NLMK) adopts internal restructuring plan

OFFICE OF INTERNATIONAL
CORPORATE FINANCE

Novolipetsk Steel (LSE: NLMK) today announced that it has embarked on an internal restructuring plan aimed at:

- optimizing the asset portfolio of the Company
- strengthening vertical integration of the Company; and
- building up an efficient management structure.

The restructuring plan approved by the Board puts forward the following key steps:

- to optimize the composition of the Company through further consolidation of NLMK's core assets: steel, mining and supporting businesses
- to continue the strategy of divesting NLMK's stakes in non-core assets, including financial and auxiliary transportation assets;
- to develop a divisional management structure organized along the key segments of the Company's value chain: technology division, mining division, steel division and sales division;
- to set up a Corporate Centre consolidating the following functions: strategic planning, finance, external relations, HR, legal services, IT, environmental compliance.

NLMK's asset portfolio management strategy has a clear focus on maximizing the value of existing assets and getting the maximum return from the divestment of non-core businesses. The most recent M&A activities of the Company have included divestment of the minority interest in Lebedinsky GOK, acquisition of DanSteel A/S, consolidation of an iron ore producer KMA-Ruda, purchase of majority interest in coke producer Altai-Koks and 100% interest in Prokopievskugol Coal Company.

The management structure reorganization and creation of functional divisions is a response to the growing size and importance of the R&D, mining and sales units of the Company. These divisions significantly enhance the performance of the flagship steel division, expanding the Company's value chain.

The Corporate Centre is being set up to increase the efficiency of the Company's business processes by centralizing key management functions. This will result in the increased quality and transparency of decision-making and greater management accountability to shareholders.

Commenting on today's announcement, Dr. Vladimir Lisin, Chairman and controlling shareholder of NLMK, said:

"Our business is successfully growing as a result of NLMK's solid strategy and strong commitment to development as a leading global steel producer. The Board believes that focusing NLMK on its core businesses and improving its management structure will further boost growth and shareholder value."

NLMK expands capacities of its mechanical engineering complex

New equipment, designed for producing spare parts used in hydraulic cylinders of metallurgical facilities, has been commissioned at NLMK's Maintenance Works.

The equipment enables production of spare parts from new-generation composites characterized by improved mechanical properties such as strength and temperature endurance that substantially prolong life cycle of the parts. Specially tailored computer programme of the unit automatically defines proper parameters and modes of processing, thus ensuring high precision in manufacturing.

The project worth RUR 10.64 mln, financed within the framework of Phase I of the Technical Upgrading Programme, is aimed at further enhancement of the Company's technical capabilities. Implementation of the project will allow for a higher quality of maintenance and repair operations and ensure reliable operation of main facilities.

To upgrade and maintain production facilities of the Company, in 2005 mechanical engineering complex manufactured equipment and spare parts for the amount exceeding RUR 4.06 billion.

Novolipetsk Steel (NLMK) agrees to acquire 82% interest in coke producer JSC "Altai-koks" and 100% interest in Group of Coal Companies "Prokopievskugol"

OJSC Novolipetsk Steel NLMK (LSE: NLMK) is pleased to announce that it has agreed to acquire from a group of investors an 82% interest in "Altai-koks", coke-chemical plant, and a 100% interest in holding company Kuzbass Asset Holdings Limited, Gibraltar, which owns 100% of interest in "Prokopievskugol" Coal Company for about USD 750 million. The acquisition is to be financed in full from NLMK's existing cash funds.

JSC "Altai-koks" is the leader among coke-chemical plants in Russia. It produces high-quality coke and chemical products. In 2005 JSC "Altai-koks" production of coke amounted to 3.8 million tonnes. By the end of 2006 a new coking plant with capacity of 1.14 million tonnes per year will be put in operation. As a result, total capacity of JSC "Altai-koks" will amount to almost 5 million tonnes per year.

As of today, NLMK has already accumulated approximately 6.12% interest in JSC "Altai-koks" through the market purchases. As a result of today's transaction, the total stake in JSC "Altai-koks" on NLMK balance sheet will amount to 88%.

"Prokopievskugol" Group is the leader in high-grade coking coal production and processing in the Kemerovo region. It produces more than 5 million tonnes of coal per year and has about 350 million tonnes of coal reserves including 220 million tonnes of high-grade coking coal. "Prokopievskugol" Group owns seven mines and three processing plants. The total production volume of coking coal concentrate is over 3 million tonnes per year, which is about 50% of NLMK's requirements. Together with Zhernovskoe-1 coal deposit (expected to reach the planned production capacity in 2009) NLMK will achieve total self-sufficiency in coking coal.

Dr. Vladimir Lisin, NLMK's Chairman, commented

"This acquisition is an important step in the implementation of NLMK's vertical integration strategy. It enables us to secure additional competitive advantage through the stable supply of key raw materials at lower cost. We believe that these new assets will enable NLMK to become fully self-sufficient in coke and optimize production process within the company, as well as to become an important player on Russian coke products market".

In 2005 NLMK implemented more than 30 environmental projects in Lipetsk

In 2005, implementation of major environmental projects on the main production site of NLMK in Lipetsk resulted in reduction of its total atmospheric emissions by more than 14 thousand tonnes as compared to the previous year. Total financing of environment protection projects amounted to nearly RUR 1.3 billion.

Introduction of resource-saving and low waste technologies during the implementation of Stage I (2000-2005) of the Technical Upgrade Programme allowed the Company to minimize the impact of its activities on the environment. Within a year period the Company completed revamping of Coke Battery No.1, aspiration systems of Blast Furnace No.5 casthouse and the Sinter Plant. A modern industrial waste incineration facility was installed. Environmental facilities of the Company's principal production plants underwent a major overhaul. Implementation of new waste processing technologies reduced total volume of accumulated waste by more than 450 thousand tonnes.

Last year the Company launched a project aimed at a large-scale upgrading of industrial water supply system, and currently continues modernization of integrated sewage treatment facilities of NLMK and of the city of Lipetsk.

In 2005 NLMK successfully passed an independent re-certification audit of its Environmental Management System for the compliance with the international standard ISO-14001 of 2004 version. Last year NLMK obtained a license from the Russian Federal Agency for Hydrometeorology and Environmental Monitoring ("Roshydromet"), which allows the Company to monitor the industrial impact on the environment.

In 2005 NLMK adopted the core strategic document in environment protection: Environmental Policy of NLMK that declares the Company's principal objective, which is to reduce negative impact of production activities on the environment and to provide favorable ambient conditions for the residents of Lipetsk. The document is available on the Company's web-site www.nlmksteel.com.

FOR INFORMATION:

Since the Technical Upgrade Programme was launched, environmental expenditures of the Company have been increased more than tenfold. In 2000 more than RUR 100 million were allocated to environment protection programmes, in 2004 this type of investments increased to RUR 747 million and in 2005 the sum was nearly RUR 1.3 billion. Due to an increase of investments, the total atmospheric emissions of NLMK's production facilities have been reduced by more than 10 per cent as compare to 2000. River water intake and purified effluents discharge into the Voronezh River have decreased by 18 percent.

Novolipetsk Steel (NLMK) releases 2005 trading update

OJSC Novolipetsk Steel (LSE: NLMK) today released its trading update for Q4 2005 and for the twelve months ended 31 December 2005.*

The table below shows the production volume of NLMK's principal steel products for the periods indicated:

	Q4 ended December 31,				Year ended December 31,			
	Q4 2004 Amount	Q4 2005 Amount	Change		2004 Amount	2005 Amount	Change	
			Amount	%			Amount	%
	(in million of tonnes, except for percentages)							
Pig Iron	2.27	2.16	(0.12)	(5.1)	8.99	7.89	(1.11)	(12.3)
Steel	2.21	2.28	0.07	3.2	9.12	8.47	(0.65)	(7.2)
Finished steel products	2.08	2.18	0.10	4.8	8.58	7.98	(0.60)	(7.0)
Slabs	1.01	1.00	(0.02)	(1.8)	3.76	3.20	(0.56)	(14.9)
Rolled steel products	1.07	1.18	0.12	11.0	4.81	4.78	(0.04)	(0.8)
Hot-rolled steel	0.48	0.46	(0.02)	(4.2)	1.98	2.04	0.06	2.9
Cold-rolled steel	0.58	0.72	0.14	23.6	2.83	2.74	(0.09)	(3.3)

* All information on production volumes is preliminary and may be subject to change.

Anton Bazulev, NLMK's spokesman, commented:

“We are satisfied with our overall production performance. Despite a substantial downturn in the global steel market, NLMK has achieved its production targets, taken the opportunity to undertake equipment overhauls and maintained production discipline. All these measures have helped to support our solid margins. We remain on track to implement our production goals and further technical upgrading targets in 2006. NLMK is well placed to achieve optimal results on that strong basis in 2006”.

Novolipetsk Steel completes the acquisition of 100% interest in DanSteel A/S

Further to the announcement of January 5th, 2006, OJSC Novolipetsk Steel (LSE: NLMK) has completed the acquisition of DanSteel A/S, the Danish steel manufacturer, for USD104 million. As previously stated, the deal was financed in full from NLMK's existing cash funds.

Mr. Anton Bazulev, NLMK's spokesman, commented

"This deal demonstrates the strong commitment of NLMK to controlled international expansion and to increase downstream production capacities."

 [back](#)

OJSC Novolipetsk Steel (NLMK) completes the sale of 12% interest in Lebedinsky GOK

Further to the announcement on December 30th, 2005, OJSC Novolipetsk Steel, NLMK (LSE: NLMK) has completed the sale of its 12% interest (2,336,867 ordinary shares) in Lebedinsky GOK to CJSC "OEMK-Invest". As stated earlier, the deal is valued at USD 400 million in cash. This disposal is in line with NLMK's strategy of managing actively its asset portfolio.

OJSC Novolipetsk Steel (NLMK) Agrees to Acquire 100% Interest In DanSteel A/S

OJSC Novolipetsk Steel, NLMK (LSE: NLMK) today announced that it has agreed to acquire DanSteel A/S (“DanSteel”), the Danish steel manufacturer, for USD104 million. The acquisition is to be financed in full from NLMK’s existing cash funds.

DanSteel produces around half a million tonnes of hot rolled steel heavy plates and maintains up-to-date customized production facilities. NLMK has a long-standing client relationship with DanSteel, being its major supplier of quality steel slabs since 2002. In the first 6 months of 2005 DanSteel’s gross revenues were USD\$194 million, EBITDA amounted to USD\$19.8 million, and total assets constituted USD\$153 million.

DanSteel is currently 100% owned by Jysk Staalindustri ApS, which is controlled by NLMK’s main shareholder. Before the acquisition was agreed, an independent evaluation of DanSteel’s market value was performed by KPMG.

The acquisition is an important step in the implementation of NLMK’s growth strategy in the area of high value-added products aimed at achieving market-share gain in Western Europe and sustainable value enhancement.

Mr. Vladimir Lisin, NLMK’s Chairman and controlling shareholder, commented:

“The acquisition of DanSteel advances NLMK’s stated strategy - to pursue acquisitions of rolling capacities in its core markets, to increase production of finished value added products and to attain additional added value.”

OJSC Novolipetsk Steel (NLMK) Agrees to Sell 12% Interest in Lebedinsky GOK and to Acquire Additional Stake in KMA Ruda

OJSC Novolipetsk Steel, NLMK (LSE: NLMK) today announced that it has agreed to sell its entire stake of 12% (2,336,867 ordinary shares) in Lebedinsky GOK to CJSC "OEMK-Invest" for USD 400 million in cash. Lebedinsky GOK is an iron ore mining and processing enterprise in Russia.

NLMK has also agreed to acquire from the companies affiliated to the shareholders of Lebedinsky GOK an additional 25% stake in KMA Ruda, bringing its total ownership to a controlling stake of 58%. KMA Ruda is a mining company located within 350 kilometers from NLMK's production facilities in Lipetsk. The enterprise already supplies NLMK with iron ore concentrate, maintaining an annual production capacity of 1.8 million tonnes. This acquisition enables NLMK to consolidate KMA Ruda on its balance sheet and to fully control its operations.

The two transactions are implemented within the framework of NLMK's strategy of active management of its asset portfolio, in which NLMK seeks to increase control over its core mining and steel assets and to divest its non-core and portfolio investments.

Mr. Anton Bazulev, NLMK's Head of Investor Relations commented: "The active management of our asset portfolio is an integral part of NLMK's growth strategy. The well-timed adjustments of our asset positions are vitally important to strengthening our market leadership."

NLMK's subsidiary, Stoilensky GOK, puts into operation additional capacities of iron ore concentrate production

Dec 30th, 2005 a new concentrator facility was put into operation at Stoilensky GOK, a subsidiary of NLMK, which supplies substantially all of the Company's iron ore concentrate. The construction began in May this year and was finished as scheduled. The total investment is 492 million rubles (USD17 million), which agrees with the plans announced earlier. The implementation of this project provides a possibility for an increase in the annual production volume of iron ore concentrate by Stoilensky GOK of around 800,000 t/y (8%) compared to 2004 numbers.

NLMK completes first half 2005 interim dividends payment

At the Extraordinary Shareholders' Meeting on September 26, 2005, NLMK declared the dividends of RUR 1 per one common share for the first six months of 2005 amounted to USD 210,792 thousand.

As of December 25, 2005, the bulk of its amount (99.5%) has been paid by the Company to its shareholders.

For reference:

On June 25, 2004, the General Shareholders' Meeting of NLMK approved dividend policy of the Company, the main object of which is to secure stability of dividend payments to the Company's shareholders.

 [back](#)

International audit confirmed quality of NLMK'S products

Supervisory audit has just re-confirmed compliance of NLMK's ship-building steel slabs with the requirements of Germanischer Lloyd Rules.

In the course of the audit independent experts examined operations of steel-making plant and controlling laboratories. The auditors noted skills of NLMK's personnel with regard to requirements to ship-building steel production as well as Company's technical and organizational level.

The Company will be awarded a renewed Certificate which will approve compliance of ship-building steel slabs production with the requirements of Germanischer Lloyd Rules. It allows the customers to apply the products of NLMK in ship-building without any restrictions as well as testifies technological development of the Company.

For reference:

The Quality Management System which complies with the requirements of international standards ISO 9001:2000 and ISO/TS 16949:2002 was implemented at NLMK. At the beginning of 90s the Company was among the first Russian companies to obtain Certificates of Compliance from Lloyd Register with regard to ship-building steel grades. In 2002 – 2003 ship-building steel slabs production was audited by the following certifying bodies – Germanischer Lloyd, U.K. Lloyd Register of Shipping (UK), Det Norske Veritas (Norway), Bureau Veritas (France), American Bureau of Shipping, Italian Register of Shipping, Russian Maritime Register of Shipping. Upon their results the Company was awarded Certificates of Compliance with MAKO Rules (International Association of Classifying Bodies) in area of ship-building. At present the Company has Certificates issued by 10 Russian and foreign certifying bodies.

NLMK OBTAINED ROSHIDROMET'S ECOLOGICAL MONITORING LICENSE

NLMK has obtained the license of Russian Federal Agency for Hydrometeorology and Environmental Monitoring (Roshidromet) for meteorological and related activities, including air and soil pollution measurements. It entitles the Company to monitor the man-caused industrial impact upon the environment. The research information will be forwarded to the Unified State Environmental Data Fund.

The key condition for Roshidromet's license obtaining was the availability of qualified personnel and necessary ecological monitoring equipment under the requirements of Russian Law, national and international standards.

This year NLMK has been successfully re-audited for the Company's Environmental Management System conformance to standard ISO-14001:2004. NLMK's ecological solutions are based on comprehensive monitoring of environmental impact of its operations.

NLMK ANNOUNCES 9M 05 CONSOLIDATED US GAAP RESULTS

The NLMK Group's consolidated sales revenue for the first nine months of 2005 (under US GAAP) was USD 3,387.7 million, an increase of 5.4% compared to the first nine months of 2004.

Gross profit decreased by 3.1% to USD 1,629.1 million. Net income was USD 1,045.8 million, a decrease of 19.2% compared to the first nine months of 2004.

Net income represented the main source of growth in NLMK's total assets in the first nine months of 2005. As of September 30, 2005, total assets amounted to USD 5,966.6 million, an increase of 15.5% from December 31, 2004.

The presentation of the US GAAP consolidated 9M 05 interim financial results is available at [Facts and Figures](#) section of the site.

NLMK WINS NATIONAL AWARD FOR ENVIRONMENTAL PROTECTION

Novolipetsk Steel (NLMK) has been recognized for its performance in environmental management as a winner of the national competition, "The Leader in Environmental Protection in Russia", organized by the Department for Social Development and Environmental Protection of the Government of the Russian Federation.

The ceremony at which the Company was awarded the distinction was held in Moscow in the Kremlin and attended by various government officials as well as public environmental organizations. NLMK's Director for Environmental Safety, Mr. Eugeny Samsikov, received a medal for "Achievements in Environmental Protection".

The award recognizes the Company's solid performance in environmental management in Russia. Earlier this year, an independent audit re-certified NLMK's Environmental Management System as complying with the ISO-14001 standard.

NLMK'S RECOMMISSIONED COKE BATTERY TO DELIVER FIRST PRODUCT

Novolipetsk Steel (NLMK) has recommissioned its 460 000 tonnes per annum Coke Battery No.1.

One of the oldest batteries of the Coke Plant has been replaced by a new and technologically more advanced unit equipped with fumeless coke chambers charging and dust free coke discharge systems. The enhancement of the battery is expected to result in improvements to both the safety of the process and working conditions. Emissions from the facility's operations are expected to drop to a third of the previous levels after the recommissioning.

CAPEX for the Coke Battery No.1 recommissioning amounted to approximately RUR 1.6 billion.

Since the launch of the Technical Upgrading and Development Programme in 2000, NLMK has recommissioned Coke Batteries No.5 and No. 6, and their emissions are currently among the lowest for this kind of facility in Russia.

For reference:

Novolipetsk Steel has significantly revamped its coke facilities. Fumeless coke chambers charging and dust-free coke discharge systems are successfully operating at the revamped batteries. The recent introduction of environment-friendly technologies has resulted in significant reductions in emissions by the Company's coke facilities.

NLMK'S NEW GALVANIZING LINE

NLMK's new continuous hot-dip galvanizing line has yielded its first 11 thousand tonnes. The line has a total capacity of up to 340 000 tonnes per annum; input materials are cold-rolled steel (annealed and unannealed) and hot-rolled pickled steel strips of 0.4 mm to 4.0 mm thickness.

The production capabilities of the line will allow the Company to react promptly to the changing market environment by adjusting the line according to the products demanded by both domestic and foreign customers. Galvanized strips made of hot-rolled pickled steel that are 1.5mm to 4.0 mm thick are used in modular building structures. To date, this product has only been imported to Russia.

The project was implemented within the framework of the Phase 1 of the Technical Upgrading and Development Programme scheduled for 2000-2005 at a cost of approximately USD 100 million.

It is expected that the start-up of the third hot-dip galvanizing line will help to increase NLMK's total galvanizing output capacity to up to 900 000 tonnes per annum.

3Q 2005 NLMK UNAUDITED UNCONSOLIDATED RAS RESULTS PUBLISHED

In the first nine months of 2005, NLMK produced 5.73 mln. tonnes of pig iron (-15% compared to the same period of the previous year); 6.18 mln. tonnes of steel (-10%); 5.8 mln. tonnes of finished rolled products (-11%); 9.45 mln. tonnes of sinter (-8%) as well as 2.84 mln. tonnes of coke (-14%).

According to the unaudited unconsolidated financial results prepared in accordance with Russian Accounting Standards (RAS) for the first nine month of 2005, NLMK's sales revenue amounted to RUR 89,813.8 mln, a decrease of 0.4 % from the first nine months of 2004.

NLMK's gross profit was down by 16.39% from the first nine months of 2005 to RUR 39,231.71 mln. Net profit amounted to RUR 27,441.4 mln, a decrease of 19.61% from the first nine months of 2004 following a deterioration in the steel market.

Net profit represents the main source of the growth in NLMK's net assets, which, as of nine months of 2005, amounted to RUR 121,569.85 mln, an increase of 15.35% from its total assets value as of 31 December 2004.

In the fourth quarter of 2005, NLMK expects an improving pricing environment, as witnessed by recent market prices that are 10-15% higher than in the third quarter.

For reference:

Tax payments by NLMK for the first nine months of 2005 amounted to RUR 7.28 bln (an increase of 9% from the first nine months of 2004). The average production personnel salary of the Company reached RUR 12,660 (an increase of 20% from September 2004).

NLMK ANNOUNCES 1H 05 CONSOLIDATED US GAAP RESULTS

The NLMK Group's consolidated revenues in 1H 05 (under US GAAP) equaled US\$2,377 million, an increase of 20.2% YOY.

Gross profit increased by 19.3% up to US\$1,209 million. Net profit amounted to US\$838 million, an increase of 16.9% YOY.

Net profit represent the main source of NLMK's assets growth that, as of 1H 05, amounted to US\$5,828 million, an increase of 12.8% to total assets value as of December 31, 2004.

According to Ms. Galina Aglyamova, NLMK's Deputy General Director for Economics and Finance, "Growth of financial results of NLMK has been achieved despite of steel market downslide in the second quarter of 2005. The growth is mainly driven by acquiring of raw materials and transportation assets in 2004 in the framework of vertical integration strategy implemented by the NLMK. Better financial results were ensured by incorporation of the newly acquired entities in the consolidated statement of the Group. 1H 05 operating income of non-steel making assets of the Group grew to US\$206 million, thus exceeding 1H 04 numbers by 5.2 times".

The full version of the interim consolidated financial statements under US GAAP as of June 30, 2005, December 31, 2004 and as of the six month period ended in June 30, 2005 and 2004, along with independent auditors' report is available at www.nlmk.ru.

NLMK ANNOUNCES JANUARY-AUGUST 2005 NON-CONSOLIDATED RAS RESULTS

According to preliminary results, in the first eight months of 2005 NLMK produced 5.04 mln. tonnes of pig iron (-16% compared to the corresponding period of 2004); 5.43 mln. tonnes of steel (-12%); 5.11 mln. tonnes of finished rolled products (-12%); 8.32 mln. tonnes of sinter (-10%) as well as 2.53 mln. tonnes of coke (-14%).

Sales revenue grew to RUR 80.26 bln. (+2%); pre-tax profit amounted to RUR 33.06 bln. (-16%). Profit decrease resulted mainly from planned decrease in production volume as well as steel market downslide.

Tax payments of NLMK to the budgets of all levels for the first eight months period of 2005 increased by 5% and amounted to RUR 11.16 bln. In August 2005, average Company's production personnel salary reached RUR 12,900 (+20% to August 2004 level).

The Company's financial results for the first month of 2005 have been prepared in accordance with Russian Accounting Standards (RAS).

NLMK BECOMES A MEMBER OF INTERNATIONAL IRON AND STEEL INSTITUTE

NLMK became a member of International Iron and Steel Institute (IISI), one of the world's largest non-profit associations of steel companies producing more than 75% of world steel.

The respective decision was taken at the Annual Conference of IISI in Seoul, South Korea, in which Dr. Vladimir Lisin, Chairman of NLMK's Board of Directors, took part. Now, he will represent the Company at the Board of Directors of IISI.

Membership in the Institute provides an opportunity for NLMK to defend Russian producers' interests in the world community of steel-makers and further develop its business considering the tendencies and strategic objectives common for the industry.

Reference note: International Iron and Steel Institute (IISI) was founded in 1967. The Institute is headquartered in Brussels, Belgium. IISI has a membership of more than 185 steel-making companies, national and regional steel federations and associations, and steel research institutes. IISI is the world forum for the global steel industry. The members of the Board of Directors of IISI are the key managers of the world's leading steel companies.

NLMK'S SUBSIDIARY OJSC "DOLOMIT" SUMMARIZES ITS PERFORMANCE FOR EIGHT MONTHS

For the first eight months of 2005, extraction of dolomite accounted for 2 million tonnes, 1.1 million tonnes of marketable fluxed dolomite were produced, and 1.23 million tonnes were shipped to customers.

The Company's sales revenues totaled RUR 166.4 million, an increase of 21% as compared to the same period last year; net profit rose 163.5% to RUR 13.6 million. The Company increased tax allocations to budgets of all levels by 3.4% as compared to January - August last year.

Starting from 2005, in the framework of the Technical Upgrading and Development Programme at OJSC "Dolomit", special machinery and equipment has been renewed - a crawler-mounted shovel, a bulldozer and a mobile substation were purchased for nearly RUR 14 million. Another power shovel and a bus are to be acquired by the end of the year.

Sustainable performance of the largest Russian producer of furnace dolomites allowed it to allocate nearly RUR 3 million for social development, including around RUR 1 million for the social infrastructure maintenance. Over RUR 0.3 million were donated to charity. The Company's employees' children enjoyed their rest in recreational centers of Lipetsk Region and Black Sea Coast, and that was subsidized by the Company.

EXTRAORDINARY GENERAL MEETING OF NLMK'S SHAREHOLDERS HELD

Extraordinary General Meeting of shareholders of Novolipetsk Steel was held by way of proxy voting.

The Meeting is declaring a dividend for 1H 2005 of RUR 1 for each common share. Total dividend payments for 1H 2005 account for RUR 5,993,227,240.

Dividends will be paid to shareholders till December 25, 2005: to legal entities – by transfer to their bank accounts, to NLMK employees – to be added to their monthly salary, and to other individuals – by transfer through OJSC Lipetskcombank.

For information:

At the Annual General Meeting of NLMK shareholders held on June 25, 2004, the Company's Dividend Policy was approved. NLMK's dividend policy is that the dividend payment should be not less than 15% of net profit (defined in accordance with US GAAP). The Company will aim to pay as dividends 25% of its net profit (defined in accordance with US GAAP).

In January – June 2005, NLMK's revenues under Russian Accounting Standards increased to RUR 62.78 billion or by 13% as compared to the same period of the last year. Net profit of NLMK in accordance with Russian Accounting Standards for 1H 2005 accounted for RUR 20.97 billion, an increase of 2.1%.

NLMK COMPLIANCE WITH GLOBAL ENVIRONMENTAL STANDARDS CONFIRMED BY INTERNATIONAL AUDIT

NLMK has completed ISO-14001 of 2004 version recertification audit for its Environmental Management System.

In 2002, the Company was among the first in Russian metallurgy sector to be awarded an international certificate of compliance with the environmental standard ISO-14001:1996 ("Environmental Management System") and further on successfully passed annual audits.

Within the scope of the new recertification audit, TUV CERT experts conducted audit of production divisions, technical services and working documentation of NLMK. The auditors could make sure that all the units of the Company's Environmental Management System operate efficiently.

NLMK's main facilities have the lowest specific environmental impact figures among Russian steel companies. Since the very launch of the Technical Upgrading and Development Program in 2000, NLMK has reduced the amount of all contaminating emissions by 6.3% due to improvements of technological processes. While meeting ecological objectives the Company relies on integrated monitoring of data on environmental effects of production activities, thus allowing the Company to effectively invest in new technologies. At present, about US\$90 million have already been invested in environmental projects of the first stage of the Program.

By 2010-2012, NLMK plans to achieve the reduction of specific emissions by 040% compared to the year 2004. Water pollution will decrease 230%, and fluid industrial waste will decrease 5-fold. Specific water consumption for the Company's needs is to be reduced by 130%.

12.09.2005

NLMK SUBSIDIARY "LIPETSKCOMBANK" SUMMARIZES ITS PERFORMANCE FOR EIGHT MONTHS

In the first eight months of the year, profit of the Bank reached RUR154.5 million, a 170% increase compared to the same period of 2004. Successfully implementing its retail business strategy, the bank attracted from private individuals RUR 2.8 bn in deposits, that represents 270% growth YoY.

Term liabilities attracted from legal entities (deposits and promissory notes) grew 120%, reaching RUR 3.3 bn., while credit portfolio of the Bank rose 140% and totaled RUR 6.3 bn.

VLADIMIR LISIN IS NAMED THE LEADING MANAGER OF THE RUSSIAN METALLURGY

NLMK's Chairman of the Board Dr. Vladimir Lisin, has been named top manager of Russia's metals industry by the Institutional Investor international magazine.

The international journal published its rating based on the pole of leading analysts and investment managers in Russia and abroad. The classification included leaders of seven economic sectors: metallurgy, engineering, financial services, power supply, consumer, oil and gas, telecoms.

Vladimir Lisin enjoys investors' high praise for the foundation of the most effective and profitable company in the metals sector of the Russian economy. In particular, the analysts pointed out that NLMK directed its investments at the production of high value added and marketable products, such as galvanized steel and pre-painted steel. In 2004, the Company's revenues under US GAAP increased by 86%, that amounted to more than US\$ 4.5 billion, while net profits increased by 170% and reached almost US\$1.8 billion.

NEW ENVIRONMENTAL TECHNOLOGY INTRODUCED AT CO-GENERATION POWER PLANT OF NLMK

Application of a new automatic system of fuel regulation and air supply in NLMK Co-generation Power Plant allows reducing by 25% the impact of high pressure steam generation on the environment.

New technology optimizes combustion processes of BF & coke oven gases utilized as fuel in boiler units of Co-generation Power Plant. It decreases level of combustion products released into atmosphere.

The project valued at 0.9 mln. rubles has been implemented within the framework of environmental measures aimed at reduction of the impacts of industrial production on the environment. From the start-up of the Technical Upgrading Programme in 2000, technology processes optimization allowed to reduce volume of emissions of all basic polluting agents at Novolipetsk Steel by 6.3% .

NLMK COMPLETED REVAMPING OF CONTINUOUS PICKLING LINE IN STRIP FINISHING SHOP

After completing the upgrade of acid section as part of an overhaul, NLMK has put into operation a continuous pickling line for hot-rolled strip with 1.15 m tpy annual capacity, which will allow to increase output of hot-rolled pickled strip with high surface quality for further re-rolling.

The upgraded facility is equipped with state-of-the-art pickling and rinsing tanks; the hydrochloric acid fume extraction system has been replaced. The reconstruction will significantly improve personnel working conditions and will result in an almost 4-times reduction of hydrochloric acid fume emissions.

The project cost is about RUR 365 m. It has been completed in the framework of the first stage of Technical Upgrade Program launched in 2000. For 2000-2005 the total amount of investments in the upgrade of production facilities will amount to US\$1.3 bln.

NLMK EXPANDS CAREER-GUIDANCE PROGRAMME FOR SCHOOLS

Since September, NLMK will continue implementation of its innovative project aimed at gifted schoolchildren, assisting them entering profile and Company-based educational institutions, and providing further employment. Last year about 600 senior teens from 16 secondary schools of Lipetsk were involved in the project.

The project included training of 120 winners and awardees of city, district and region contests at the Regional Centre of Internet Education at Lipetsk State Technical University, competitions and conferences. At the next step of the project, a class with intensified technical and foreign language courses, that NLMK is interested in, is formed at one of the city schools. There are plans to expand cooperation with leading technical universities of Russia including Bauman State Technical University of Moscow.

This year NLMK has launched a long-term programme of future employees' education - "Student of NLMK". It provides education for children of Company employees in leading Russian technical universities in metallurgy disciplines.

According to Mr. Sergey Melnik, Director for HR and General Issues, NLMK's future is in young, talented specialists, educated in the leading professional institutions. Therefore, the goal of the Company is to raise attractiveness of metallurgy education among young people choosing future profession and, later, working at NLMK.

There are tailor-made programmes available for young specialists joining the Company, helping their adaptation and leadership skills' development. There is also a one-time bonus system established for graduates of higher, general and primary education who had attended training at NLMK under student programmes and are employed now.

NLMK HAS REPLACED ANTI-DUMPING DUTIES IN THE EU WITH PRICE UNDERTAKING

On August 28 a new arrangement for shipments of grain-oriented electrical steel (GOES) produced by NLMK to the European Union came into force. It provides for suspending of anti-dumping duty payment of 11.5%, in exchange for a system of minimum reference prices and regular reporting of the Company to the EU Commission.

By concluding a minimum price undertaking, NLMK has used a possibility provided by EU legislation to replace an anti-dumping duty by a commitment to adhere to bottom prices established by EU Commission. It will allow NLMK to keep and diversify its presence in GOES market of EU-25 without any loss of its profit for payment of anti-dumping duties.

FOR REFERENCE:

Starting from 1995, when the first anti-dumping investigation was initiated, deliveries of GOES produced by NLMK to EU countries were bounded. It resulted in qualitative limitation of this product export to Europe. In May 2004 EU Commission cancelled the qualitative arrangements and established an actually prohibitive duty of 40.1%. The most recent investigation resulted in the introduction of 11.5% anti-dumping duty for NLMK shipments (for comparison, US companies got a duty between 31.5% and 37.8%)

POST RECONSTRUCTION BLAST FURNACE BLOW-IN AT NLMK

The NLMK's second largest blast furnace No.5 (over 2.7 mln. tpy of iron) has been put into operation after modernization.

Performed revamping allows to increase product quality and puts the furnace among the most environmentally safe in Europe. Complete refractory lining and chilling equipment change and partial housing replacement have been performed, and new hydraulic equipment installed. Production is now monitored by a new automated control system.

In parallel the reconstruction of cast house aspiration system (gas cleaning) was concluded. High performance electric precipitators were installed, and automated control system was mounted, enabling to improve personnel on-job environment and to significantly reduce the ecological impact of the facility.

The US\$46 mln. project has been implemented within the frames of Technical Upgrading Program performed by the company with the total budget for the first stage (2000-2005) above US\$1.3 bln.

STOILENSKY GOK, A SUBSIDIARY OF NOVOLIPETSK STEEL, CONTINUES TO IMPLEMENT TECHNICAL UPGRADING AND DEVELOPMENT PROGRAMME

Over 700 million rubles have been invested in maintenance and upgrading of Stoilensky GOK facilities in the first half of 2005.

578 million rubles have been spent on the purchasing of more than 50 units of mining and transport equipment - 7 large dump trucks, 3 excavators, a drilling machine, 10 boxcars, a hauler, as well as 11 trucks, 7 buses, 3 truck cranes, etc. The new equipment will guarantee continuous fault-free operation in the open pit, and will cover the previous years' gap in loose stripping excavation.

The ongoing setup of the automation system controlling the first crushing stage will result in a 2% increase of the beneficiation plant efficiency, and will raise the mills productivity by 5%. Special equipment will allow not only check milling quality, but also control and monitor the milling process. At the same time, energy consumption will be reduced.

Total estimated investment in technical upgrading will exceed 1 billion rubles in 2005.

NLMK BOARD COMMITTEES' MEMBERS APPOINTED

Members of three committees under the Board of Directors of NLMK have been appointed: Auditing Committee, Strategic Planning Committee, Personnel and Remuneration Committee.

Vladimir Skorokhodov, Nikolai Gagarin and Nikolai Lyakishev were elected to the Strategic Planning Committee, chaired by Vladimir Lisin. The Committee develops and submits to the Board of Directors recommendations on business priorities of the Company and its development strategies, including measures for enhancement of the Company's efficiency in the long term, increase in assets, profitability and investment appeal.

Oleg Bagrin and Igor Fyodorov were elected to the Auditing Committee, chaired by Randolph Reynolds. This committee develops and submits to the Board of Directors recommendations on efficient control of financial and economic activities of the Company, including annual independent external auditing of financial statements.

Dmitry Gindin, Stanislav Tsyrlin and Sergey Melnik were elected to serve on the Personnel and Remunerations Committee, chaired by Oleg Kiselyov. Main objectives of the Committee is drafting recommendations on Human Resources policy of the Company and remuneration to members of management bodies and Auditing Committee of the Company. The Committee also deals with social issues of the Company, environmental safety and cooperation with state and local authorities.

For reference:

A new Corporate Management Code was approved at the Extraordinary General Shareholders' Meeting on December 3, 2004. It complies with international standards; one of its main objectives is promoting the role of independent directors (<http://www.nlmk.ru/eng/company/data/nlmk-kodecs.doc>).

Basing on its provisions, a new Board of Directors was elected at the Annual General Meeting held in Lipetsk on May, 20. Four independent directors became its members: Dmitry Gindin, Oleg Kiselyov, Nikolai Lyakishev and Randolph Reynolds.

NLMK DEVELOPS RAILWAY INFRASTRUCTURE

NLMK continues to implement the programme of reconstruction of "Novolipetsk" railway junction.

Last year, one of the railway depots underwent major overhaul which allowed it to operate the trains up to 70 railcars long loaded with iron ore. In 2005-2006, the Company is upgrading the facilities to increase the maximum load capacity to 6 thousand tonnes to be transported to Novorossiysk and Tuapse ports.

To enhance railway cargo transportation efficiency a video monitoring system for monitoring cargo condition in railcars will be installed in one of the depots. Also, a new car repair facility is planned to be installed.

Total amount of the Company's investments in "Novolipetsk" station will exceed 170 million rubles. The reconstruction of the junction will allow it to significantly increase its throughput capacity.

At present, the Company runs 1,694 units of in-house rolling stock and 2,357 units leased from Russian Railways (OAO "RZD") Company to provide raw materials input and finished products output. The volume of NLMK's cargo transported annually by railways is about 90 million tonnes.

NLMK SUBSIDIARY - STOILENSKY GOK IS IMPROVING WORKING CONDITIONS FOR ITS PERSONNEL

In the first half of 2005, over 60 million roubles were allocated by Stoilensky GOK for improvement of working conditions of its personnel.

Air conditioners were purchased and installed at Rail Transportation Shop and Network and Substation Shop. 190 square meters of lighting system were renewed in power dispatch service rooms. Air conditioners were installed on 20 power shovels. There were installed three lighting masts at the main office building, also offices were repaired at Concentrating Mill.

In addition to repaired buildings of Calculation Bureaus on Company's site Concrete Preparation Unit, Cafeteria No. 6 in Rail Transportation Shop underwent major repair, open pit was fenced. On the Company's site recreation areas were re-equipped.

 [back](#)

NLMK SUBSIDIARY - STOILENSKY GOK IS IMPLEMENTING SOCIAL PROGRAMMES

In the first half of 2005 over 33 million roubles were allocated by Stoilensky GOK for implementation of social programmes.

Over 13 million roubles were spent on purchase of places at recreation and spa resorts for the Company's employees and summer holiday camps for children. This summer, about 1000 children of the Company's employees will be on holidays in health center "Prometeus" (Lipetsk Region) and summer-camp "Vita" (the city of Anapa on the Black sea shore).

Over 8.7 million roubles were allocated by the Company for monthly additional payments to its retired employees as well as veterans of the World War II. Welfare assistance of over 1.1 million roubles was made to employees of the Company, pensioners, single mothers and families of dependent children, inclusive of over 400 thousand roubles as lump-sum family allowance at childbirth.

Stoilensky GOK continues its patronage over Starooskol orphanage. Summer vacations are being arranged for children, and tutors receive a monthly additional payment to their wages.

Within the first 6 months of the current year, Starooskol Interior Affairs Department, Infantile Pulmonologic Health Centre, Education Department, the Society of the Blinds received charitable contributions made by Stoilensky GOK. 1.7 million roubles were transferred by the Company to the account of "Belgorje to creators of the Great Victory" marathon taken place in Belgorod Region in honor of 60th anniversary of the Victory in the World War II.

1H 2005 NLMK unconsolidated RAS results published

In the first 6 months of 2005 NLMK produced 3.82 mln. tonnes of pig iron (-15% compared to the same period of the previous year); 4.09 mln. tonnes of steel (-11%); 3.85 mln. tonnes of finished rolled products (-11%); 6.23 mln. tonnes of sinter (-10%), as well as 1.92 mln. tonnes of coke (-12%). Reduction of physical production volumes is related to scheduled repairs, including Blast Furnace No. 5 category II overhaul performed in April-June, 2005.

Net sales revenue amounted to 62.78 billion rubles (+13%). Despite reduction of physical production volumes in the first 6 months of 2005, NLMK's pre-tax profit grew up to 27.55 billion rubles (+2%). Net profit in the 2nd quarter of 2005 was down by 1,133.4 billion rubles or by 10.3% compared to the net profit of the 1st quarter of 2005. Profit decrease resulted mainly from the decrease in production volume and steel market downslide.

Tax payments by NLMK for the first 6 months of 2005 went up by 19% and amounted to 8.86 billion rubles. In June 2005 average Company's production personnel salary reached 11,975 rubles (+18% to June 2004 level).

See our web-site Section "Facts and Figures", sub-section "Annual reports and presentations" for more details.

NLMK is increasing output of high value added products

NLMK has initiated a complex of measures targeted at technical upgrading of cold rolled grain-oriented (GO) steel production which covers the period till 2010. Commissioning of additional capacities will allow the Company to increase output by 20% and to reach monthly production of 12 thousand tonnes of this steel grade.

Construction of a new pickling line, reversing mill, protective coating line, insulation coating line, 16 bell-type furnaces, slitting and coil packaging line, strip laser treatment line has been planned in the course of the upgrading. 5-stand mill and two continuous annealing lines will be reconstructed. More productive equipment will substitute for current welding machines at insulation coating lines.

Since 2003 NLMK has been applying a new production scheme for GO steel which involves converter steel-making, concasting, improved ladle treatment and hot rolling at wide-strip rolling mill. Implementation of a new system coupled with large-scale equipment reconstruction of cold rolling shop has resulted in improvement of steel quality of 0.27-0.3 mm gage and output of 0.23 mm gage steel in production quantities.

NLMK pre-qualified to bid for Erdemir

The Privatisation Administration of Turkey ("PA") has informed Novolipetsk Steel Corporation ("NLMK") that it has been pre-qualified to participate in the privatisation tender for Eregli Demir ve Celik Fabrikalari AS ("Erdemir"), Turkey's largest steel producer.

NLMK and Erdemir have a long-standing and sustainable business relationship developed through the last decade. Today, Erdemir sources the majority of its semi-finished steel requirements from NLMK.

NLMK views the potential acquisition of a stake in Erdemir as an opportunity to develop its close relationship with the company and augment its exposure to the increasing demand for flat steel products within Turkey's growing industrial sector.

NLMK successfully passed quality management system oversight audit

The first oversight audit of the Quality Management System for compliance with the requirements of ISO/TS 16949-2002 international standard (Quality Management Systems - Particular requirements for the application of ISO 9001:2000 for automotive production and relevant service part organizations) has been successfully completed at NLMK.

The audit was performed by the specialists of an independent certification body TUV CERT (Germany) licensed by the International Automotive Task Force (IATF).

Last year, NLMK was the first among Russian steel companies to receive the certificate for compliance of the Quality Management System with the requirements of ISO/TS 16949-2002 international standard. It became an integral part of the Company's development program aimed at improvement of the quality management system, cost reduction, manufacture of new types of products and expanding the range of services to the clients. Development and implementation of ISO/TS 16949 is based on ISO 9001:2000 standard, but its requirements are much stricter. Certification for compliance with this standard is a proof of significant development of NLMK's production capabilities as well as its recognition as a suitable supplier to worldwide automotive industry.

Reference note:

In 1999, NLMK successfully passed certification for compliance with the requirements of ISO 9002 international standard, revision of 1994. In 2002, the Environment Management System of the Company was certified in accordance with ISO 14001 international standard requirements. In 2003, the Quality Management System of NLMK received ISO 9001:2000 certificate. This year, following the audit of the Quality Management and Environment Management Systems Volvo representatives awarded NLMK the highest supplier category "A".

NLMK Presented its Environmental Protection Program 2006-2010

A meeting between the Company management with Lipetsk city officials, heads of environmental bodies of Lipetsk Region, and experts from Human Ecology and Environmental Hygiene Research Institute named after A.N. Sysin was held at Novolipetsk Steel.

Interim results of the first stage of NLMK's Reconstruction and Development Program (2000-2005), as well as the new project of the Environmental Protection Program for 2006-2010, were introduced to the participants.

Today NLMK has the best results among Russian steel producers in terms of decreasing the basic facilities' impact on the environment. The Company annually undergoes an independent audit confirming its environmental protection system's compliance with universally recognized ISO 14001. NLMK annually keeps building up its investments into environmental protection activities, which totaled US\$ 4.6 million in 2000 and amounted to US\$ 25.9 million in 2004.

Implementation of environmental protection measures within the framework of the new project (2006-2010) will allow cutting the Company's gross emissions by 35% and specific emissions by 40% as compared with 2000. As a result of NLMK's water supply and drainage system modernization river water consumption for production purposes will decrease 2 times by 2008 as compared with 2004. This will match the best results in the industry. NLMK's effluents volume will drop 5 times. Implementation of the scheduled measures will allow neutralizing and using almost 100% of the current waste products for the environmental protection purposes and as raw material additives, also it will give an impetus to the utilization of the previously accumulated wastes.

Having visited NLMK's ecological facilities in operation and under construction the heads of environmental bodies of Lipetsk Region and Research Institute experts recognized high production standards and comprehensive approach to environmental protection problem solving.

 [back](#)

NLMK is improving its environment monitoring system

An additional control system of converter gas composition has been introduced at NLMK, due to which it is possible to adjust operation of equipment on-line in order to reduce environmental impact. The new project at the cost of 4.5 m rubles is aimed at further improvement of process lines monitoring system in terms of environment, which has been implemented at NLMK since 2003.

The control system is equipped with precision gas analyzers and performs measurements in automatic mode without manual intervention. The software provides for the possibility of archiving the incoming data for further analysis and process optimization.

The Company conducts extensive environmental surveys aimed at obtaining objective data regarding industrial impact on environment. This year NLMK will continue implementation of a state-of-the-art automatic emissions monitoring system at other facilities. In 2005 investments into environment protection measures at NLMK will exceed 1 billion rubles.

NLMK implements programs for young specialists

NLMK is implementing the system of additional payment to young specialists employed by the Company from higher and secondary technical educational institutions.

Additional payments will be intended for graduates who trained in the Company under students' contracts and who were employed by the Company within three months' period after graduation. Additional payment in the amount of 7 - 17 thousand rubles is made within the first four months of a young specialist's work in the Company.

In the current year NLMK has reserved vacancies for over 500 graduates of various educational institutions. Young employees of NLMK have opportunity to participate in the programs aimed at adaptation to work in the Company, discovery of leadership potential of employees and career development. In particular, the program being implemented named "NLMK's young specialist" will enable the Company to form active and professionally competent reserve of the Company's management.

Further development of staff potential and provision of the Company with highly-qualified personnel will be facilitated by the target program "NLMK's student". It provides for full or partial payment of studies both of the Company's employees and of their children applying to out-of-town higher educational institutions strategically important for NLMK.

NLMK is also involved in team-work with specialized educational institutions. This year a group of senior student rolling specialists of Lipetsk State Technical University (LGTU) have started their training in the Company. Additional training under experimental methods is being carried out in the process areas in the actual operation mode and complies with the requirements of state educational standards on qualification "Master of technics and technology". NLMK's leading specialists, LGTU representatives and representatives of other specialized higher educational institutions act as teachers.

NLMK's management is sure that the innovative educational model will shortly provide the Company with new specialists having good basic training and practical skills. In the current year the Company is planning to enroll LGPU students of majors pertaining to steel-making, energy and transport on a competitive basis.

NLMK will expand the slag treatment volumes

NLMK started construction of grinding and screening complex with the capacity of 700 thousand tons of blast-furnace slag per year thus allowing to increase the amount of fractional crushed stone by 40%. The products meeting all the necessary standards can be widely used in house-building and road construction.

The grinder incorporated in the complex grinds slag down to the necessary fractions. The finished products will be shipped to the consumers directly from the line without additional transportation.

The new complex is designed by the Company specialists, part of the equipment is manufactured at the plant. The project value is 100 million rubles. Its implementation will end in 2005. The investment return period is expected to be 3 years at the most.

FOR REFERENCE:

In 2005 special testing of the leading R&D Russian institute in the road construction field, unitary enterprise "SoyuzdorNII" confirmed compliance of NLMK's steel slag with the necessary requirements applied to the materials used during construction of federal roads. This year the Company is planning to sell 1 million tons of steel slag to the consumers.

 [back](#)

NLMK Has Successfully Undergone Quality Management System Audits

One more time NLMK has confirmed Company's quality management system conformity with the requirements of the international standard ISO 9001:2000. Re-certification of quality management system of hot rolled stock production for its compliance with the EU requirements (Directive 97/23/EG) was carried out successfully.

In the course of audits, the representatives of TUV CERT (Germany) certification center studied NLMK's quality management system and the operation of primary shops in detail, and carried out a test of a lot of output product.

For information:

Quality management system conforming to the requirements of the international standards ISO 9000 has been working at NLMK since 1999. In 2002, the Company was one of the first in the industry to get the certificate of conformance to the requirements of the international ecological standard ISO-14001:1996 for its environment management system. In 2004, NLMK was the first to undergo the certification for compliance of its quality management system with the international standard ISO/TS 16949:2002 determining the requirements for automotive industry suppliers. Today NLMK's products have certificates of such certification centers as TUV CERT (Germany), Bureau Veritas (France), Lloyd's Register (Great Britain), American Bureau of Shipping (the USA), Det Norske Veritas (Norway), Russian Marine Shipping Register and others.

 [back](#)

In 2005 the wages of NLMK employees will rise by more than 20 %

Average monthly salary of NLMK employees upon the results of 2005 will be more than 12500 rubles. It is more than 20 % higher than the level of 2004 and by 9-10% exceeds the anticipate inflation rate in the country.

Upon the results of the first six months of this year the management decided to pay to NLMK employees a lump sum bonus in the amount of 30 % of average monthly earnings. For this purpose 160 million rubles are additionally reserved in the budget supply.

Increasing wages level of NLMK personnel directly related to switch-over to a different system of labor remuneration and motivation. It envisages initial 10 % growth of workers' monthly wages, as well as significant increase of the sizes of tariffs and official salaries. After consideration of the results of the second quarter the specialists and managers of the Company, who switched over to a new system of labor remuneration, will already get quarterly bonus which accounts for individual results of work.

Incentive of the employees is also promoted within the framework of tutorship system, which have already spread over several hundreds of employees ready to hand over their expertise and experience to the new generation. Each year the Company arranges for more than 30 different professional mastership competitions, where winners gain prizes 20 to 50 thousand rubles.

The Company realizes the program that envisages complete or partial payment for getting higher education both by the employees of the Company and by their children. Among the Company's plans is realization of "Young Specialist" program, whose aim is to reveal the most talented graduates from those, who came to the Company. Upon the results of the Program they will be offered high wages and possibility to improve their living conditions.

Winners of Inventors and Innovators Contest Were Determined at NLMK

2005 JUN 22 A 9:19
OFFICE OF INTERNATIONAL
CORPORATE FINANCE

Seventeen best inventors and innovators among Company's specialists were chosen at Novolipetsk Steel.

The winners of the contest were selected by the jury according to the quantity of proposals given and expected affordability from introduction. Furthermore, in the nomination of "The Best Instructor for Young Innovators" electrician of BOF Shop No. 2 Oleg Umantsev, deputy head of Water Supply Shop Viktor Kulikov, electro-gas welder of Waste Treatment Shop Vassily Korostelev were voted the best. In the nomination "The Youngest Innovator" 23-year old metalworker of Cold Rolling Shop No.5 Sergey Pikalov was awarded. The day before the Inventor and Innovator's Day diplomas and cash bonuses were presented to the contest winners.

From the beginning of the current year, about 1200 people took part in invention and innovation activity at NLMK including over 200 of young employees. Applications were submitted for 1400 technical innovations; 15 applications were submitted for prospective inventions, and 4 applications were for practical devices. Two inventions and 1247 technical innovations were applied in industry. Six patents for inventions and six favorable patent decisions were obtained. Authors' works are aimed at product improving, optimization of processing and equipment operation, reduction of plant's environmental impact.

In 2004 the Company's economic effect due to the use of inventions, efficient devices and technical innovations constituted about 177 million rubles. About 33 million rubles were paid out to the authors as remuneration.

Four independent managers were elected to the list of the Board of the Directors

During the annual stockholders meeting, which took place on May 20, NLMK elected new composition of the Company Board of the Directors, which is formed by: Bagrin O.V., Gagarin N.A., Gindin D.A., Kiselyov O.V., Lisin V.S., Lyakishev N.P., Reynolds R.N., Skorohodov V.N., Fyodorov I.P..

Thus, four independent managers are elected to the Board of the Directors of NLMK: Dmitry Gindin, Oleg Kiselyov, Nicolai Lyakishev and Randolph Reynolds.

Gindin Dmitry Aronovich was born in 1946. In 1970 he graduated from Moscow Steel and Alloys Institute. Today he is the General Manager of JSC "Moscow Factory "Sapfir"" (since 2000), the President of Association Factory-Farm Corporation "Stoylenskaya Niva" (since 2004), the Vice-President of LLC "Managing company "UNIKOR"" (since 2005).

Kiselyov Oleg Vladimirovich was born in 1953. In 1979 graduated from Moscow Steel and Alloys Institute. Since 2001 up to now he is the Manager of LLC "Mosexpo-Metall". In 2002-2004 he was the General Manager of JSC "Shestoy Telecanal" and the General Manager of NP "Media-Socium". Since January 2004 he is the President of the Investment Group "Renaissance Capital".

Lyakishev Nicolai Pavlovich was born in 1929. In 1954 he graduated from Moscow Steel and Alloy Institute. From 1954 till 1987 he worked in Bardin's Central Research Institute of Ferrous Metallurgy (1977-1987 - the Director of the Scientific Research Institute). Since 1987 up to now he works in Baikov's Institute of Metallurgy and Materials Science of the Russian Academy of Sciences (until the year 2004 - the director - then - the research manager of the institute). Doctor of Technical Science (1975), professor (1979), full member (academic) of Russian Academy of Sciences (1987), Foreign Member of Engineering Academy of Science in China and of national Academy of science in Ukraine.

Randolf N. Reynolds was born in 1941 in Louisville (USA). He worked in Reynolds Metals Company (Louisville town, USA) from 1969 till 2000, when the company joined Alcoa Inc. The last posts are Executive Vice-president in international business, Vice Chairman of the Board of the Directors. He was the member of the Board of the Directors of First Union National Bank, Co-chairman of Russian Interregional Social Organization "Dostigenia Molodih". In the present time he is the Manager of Industrial Advisors Services, Inc. (Richmond, USA), Member of the Management of Red Cross Department, Richmond, USA.

According to the results of NLMK work for the financial year General annual stockholders' meeting can make a decision about the payment of bonus at the rate of up to 0,1% of net profit of the Company for the accounting period, determined by the generally accepted in the USA principals of business accounting (US GAAP), to each member of the Board of the Directors, on the basis of profit and loss statement and the order of profit, approved by the annual NLMK shareholder's meeting of the annual report.

 [back](#)

NLMK has summed up five months performance

Upon preliminary information in the period January - May 2005 Novolipetsk Steel produced 3.27 mln. tons of pig iron (-14,1% to similar period of 2004), 3.47 mln. tons of crude steel (- 10%), 3.27 mln. tons of rolled stock (-9,8%), 5.28 mln. tons of sinter (-9,1%), and 1.62 mln. tons of coke (- 11,7%).

Decrease in production for 5 months of 2005 as compared to a corresponding period of 2004 was caused by deterioration of global steel market conditions due to increase of inventories and low business activity in main steel-consuming world regions.

Within the period of low market demand NLMK implemented scheduled capital repairs and upgrading of some production facilities in frame of the Technical Upgrading Program.

At present reconstruction of coke batteries 1 and 2, Hot dip galvanizing line and Continuous pickling line in Cold Rolling Shop 4 is under way. Capital repair at sinter plant as well as repair of two BOFs in BOF shops have been already completed.

Capital repair of BF 5 has been finished. Due to changes of steel market conditions the Company's Management has made a decision to postpone commissioning of this production facility from June to a later time.

 [back](#)

NLMK HAS PRODUCED THE MILLIONTH TON OF PREPAINTED ROLLED STOCK

NLMK has produced the millionth ton of prepainted rolled stock, which is widely used for manufacturing of building structures, facade facing, wall panels, roofs, as well as household appliances face parts.

Nowadays the Company's output of prepainted rolled stock constitutes 56% of all-Russia output, NLMK's share in the prepainted rolled stock domestic market amounts to 36%. Since the prepainted rolled stock production implementation (1991), its output volume has increased by 47 times.

In 2004 NLMK commissioned the second Colour Coating Line for cold-rolled stock, its capacity is 200 thousand tons per year. Last year the Company sold 223 thousand tons of steel to consumers. More than 70% of the produced prepainted rolled stock was sold in the domestic market. In 2005 the export of this product grew by 14%.

For further downstream products sales development NLMK has introduced new types of prepainted steel products, which are characterized by higher corrosion resistance, chemical and thermal stability. NLMK's steel products with BASF (Germany) and Akzo Nobel (Sweden) colour coating have been certified by TUV CERT auditing body for compliance to European standard DIN EN 10169-1, as well as audited on the yearly basis by Gosstroy of Russia.

In 2005 the Company plans to produce 285 thousand tons of galvanized rolled stock with prepainting (polymer, paints and varnishes).

 [back](#)

NLMK has won the auction on the development of coal area in Kuznetsk Basin

NLMK became the winner of the auction gaining the right to develop the lot "Zhernovski-1" of Zhirnovsk coal-field (Kemerov region). The development of this area will be one more large-scale project aimed at the realization of the Company's strategy of the raw material self-sufficiency.

Coking coal supply in the "Zhernovski-1" area (grade GZHO, GZH, ZH) amounts to about 240mln tons according to the preliminary estimate. Under the terms of the auction, the winner will have to build the first stage of the mining plant with the facility of 1,5 mln tons of coal per year during the period of 10,5 years after the license registration, and then the second stage with the facility of not less than 3 mln tons per year. After reaching the full capacity the production volume will be more than 5 mln tons per year.

The auction winner will get the license of the lot development right for the period of 20 years with a more precise time definition after preparing the technical project of the area development.

For information:

NLMK annual demand in coal concentrate amounts to about 5,9 mln tons. Today the Company buys it in Kuznetsk, Vorkuta and Uzhno-Yakut coal-field.

 [back](#)

NLMK annual shareholders meeting

Annual shareholders' meeting of OJSC "Novolipetsk Iron and Steel Corporation" has taken place. In the course of the meeting the Company's Annual Report for the year 2004, annual accounting report, profit and loss report and profit distribution including dividends payment in accordance with financial results were approved.

The shareholders elected members of the Company's Board of Directors, Auditing Committee members and Director General, approved the Company's auditor and a new revision of the Regulations on Remuneration to Board of Directors' members.

The newly-voted-for members of NLMK Board of Directors are: Bagrin O. V., Gagarin N. A., Gindin D. A., Kiselev O. V., Lisin V. S., Lyakishev N. P., Randolph Reynolds, Skorokhodov V. N., Fedorov I. P.

V. P. Nastich was elected NLMK's Director General.

The approved Company's auditor for the year 2005 is ZAO "PriceWaterHouseCoopersAudit". By the shareholders' decision this company was also charged with the audit of financial reporting in accordance with generally accepted USA accounting principles (US GAAP).

In accordance with outcome of 2004 the decision on payment of dividends on issued common stock in cash in the amount of 1,8 rubles per one common share was made. Taking into account paid intermediary dividends for 9 months of the year 2004 in the amount of 1 ruble per one common share it was decided to pay additional 0,8 rubles per one common share. The payment will be effected before August 18, 2005.

According to Russian accounting standards NLMK's revenue in 2004 amounted to 126,18 billion rubles, net profit - 49,85 billion rubles. Complete data on the financial reporting will be given on web-site www.nlmk.ru.

 [back](#)

NLMK sums up outcome of 2004 in accordance with international standards

According to financial indicators calculated in compliance with American financial reporting standards US GAAP the Company's revenue amounted to 4,538 billion USD which is by 84% higher than the similar figure for the year 2003.

Gross profit has increased by 2,4 times to 2,406 billion USD. Net profit has reached 1,772 billion USD (growth by 2,7 times).

Due to the fact that the Company has not used loans and credits NLMK's net profit is the main source of the assets growth which by the end of 2004 amounted to 5,165 USD (+67%).

Main profit growth factors were product price increase and production volume growth.

18.05.2005

NLMK Has Refurbished Cold Rolling Mill Control System

New control system of NLMK's Cold Rolling Mill promotes the strip treatment quality enhancement due to higher adjustment accuracy and rolling process stability.

The state-of-the art imported equipment includes the mill drives control system as well as software. It guarantees high gage and flatness control accuracy along the strip length. The data received by the control panel is automatically logged by software for further adjustment of technological units operation.

The new investment project in the value of USD 20 mln has been implemented within framework of NLMK's Technical Revamping Program. The estimated volume of the Company's investments in production revamping for years 2000-2005 will exceed USD 1,3 billion.

 [back](#)

NLMK Has Modernized Sintering Production

NLMK has completed overhaul of sintering machine No. 4 (with sinter production capacity exceeding 3 mln tpy) at the Sintering Production. Its revamping will enable the Company to increase the yearly sinter production by 50 thou t and enhance ecological safety of the plant.

During the overhaul power equipment was replaced, a new powder-gas emissions treatment system, which decreases the plant environmental impact by 3%, was installed.

The total overhaul costs have amounted to 73 mln rubles. The greater part of equipment and spare parts was manufactured by NLMK's Repair Shop specialists.

The project has been implemented within framework of NLMK's Technical Revamping Program launched in 2000. The estimated total volume of investments at the first stage of the Program (2000-2005) will exceed USD 1,3 billion. It is planned to revamp one more sintering machine at the Sintering production.

 [back](#)

NLMK Revamps Cold Rolling Production

In 2006 NLMK will introduce the new hot rolled coils winding equipment in the Cold Rolling Production, it will promote product mix expansion and quality improvement.

Three new hydraulic coilers with auxiliary equipment will be installed in the hot rolling mill for high strength steel coils winding with thickness 20 mm and width ranging from 900 to 1850 mm.

The equipment price has amounted to EUR 26 mln. The project is being implemented within framework of NLMK's Technical Revamping Program launched in 2000. The estimated total volume of investments at the first stage of the Program (2000-2005) will exceed USD 1,3 billion.

 [back](#)

NLMK improves quality of colour-coated steel

Novolipetsk Iron and Steel Corporation is the first in Russia to produce ferrous products with new types of polymeric coatings having improved quality characteristics.

NLMK rolled products with polyurethane and PVDF (polyvinyliden fluoride) coatings have a greater corrosion, chemical and thermal resistance. All this allows to increase their life time by 1,5-3 times as compared to conventional colour-coatings and expand their industrial application fields.

At present NLMK produces rolled stock with colour-coatings of four main types. During the last few years the Company developed a number of new specialized polyester coatings for application on ferrous products used in construction and home appliances production.

Steel produced by NLMK with colour-coatings by BASF (Germany) and Akzo Nobel (Sweden) is certified by auditing authority TUV CERT as to its compliance with the European standard DIN EN 10169-1. From 1998 NLMK colour-coated rolled stock undergoes annual audit by Gosstroy Russia.

For reference: NLMK - the largest in Russia producer of colour-coated rolled stock (the Company's share at the domestic market is over 50%). In 2004 the Company sold 223 thousand tons of such ferrous products, which is 25% more than the figure for the previous year. Russian consumers were shipped more than 70% of all the colour-coated rolled products output. In 2004 export deliveries of these products by NLMK grew by 14%.

 [back](#)

12.04.2005

NLMK continues to implement resource-saving technologies in the refractory production

The Company began to reconstruct a limekiln with the capacity 400 tons per hour in the Refractory Shop. This reconstruction will increase its capacity by 16% and reduce the impact of the plant upon the environment.

The modernized limekiln's fuel rate will be decreased by 13%, which will enable the Company to save more than 3,8 million m³ of natural gas annually. It will be the fourth plant in the mill with the advanced resource-saving technology of saw material preheating.

The reconstruction will take 40 days. The project in the value of 10,6 million rubles is being implemented in the framework of NLMK's Technical Revamping Program, the total investments volume on the first stage (2000-2005) has exceeded USD 1.3 billion.

 [back](#)

NLMK has implemented a new environmental project

NLMK has completed the implementation of the environmental project that will enable the plant to reduce the effect of the iron-containing industrial waste water upon the river Voronezh. According to the new technology, up to 200 m³ per hour of wastewater contaminated with iron salts is treated with the help of special reagents. After that the water will be used again in the technological cycle.

Being the biggest water consuming enterprise in the region, NLMK continues implementing water-protective structures in the framework of NLMK's Technical Revamping Program, the total investments volume on the first stage (2000-2005) has exceeded USD 1.3 billion. Due to these measures, the river water consumption and treated wastewater discharge in the Voronezh river have decreased by 20% since 2000.

In order to further reduce the effect upon the river, the Company begins to implement the large-scale program of water-supply and drainage system reconstruction. It will enable the Company to reduce treated wastewater discharge by 5 times and river water consumption by 2 times by 2007 (as compared to 2003). This year NLMK will continue introduction of advanced water treatment technologies in the integral sewage disposal plants of the plant and Lipetsk, the Company will also take a complex of water-protective measures in a number of shops.

This year the Company plans to invest about USD 36 million in the implementation of environmental projects. The total volume of investments in the different nature-conservative measures has amounted to USD 70 million.

 [back](#)

NLMK Is Modernizing Blast Furnace Production

Overhaul and modernization of blast furnace 5 has been launched at NLMK, it will help to improve production quality and make the line one of the safest for the environment in Europe. The blast furnace has the second highest output at NLMK (more than 2,7 million tons per year).

Refractory lining and cooling equipment will be replaced completely and blast furnace shell will be replaced partially. New hydraulic equipment will be introduced in order to optimize iron tapping. A new automatic control system will be used to control production process with modernized equipment.

Cast house will be also modernized during the overhaul.

During repair period reconstruction of aspiration system (gas cleaning) of cast house will be completed. Installation of high-efficiency electrofilter and automatic control system will allow to improve work conditions and decrease impact on environment. Due to adoption of new technologies gas cleaning system will be 1,5-2 times more effective, and furnace tapping will have minimum impact on environment.

Project implementation will cost around 46 million dollars and will take 2,5 months. It will be carried out in the framework of NLMK technical revamping and development program. Total amount of investment for the first stage (2000-2005) is more than 1,3 billion dollars. The Company has already invested 935 billion dollars since 2000. This year it is planned to invest over 400 million dollars.

 [back](#)

The shooting complex of the "Lipetsk metallurg" sports club is to host the cup of club teams

On 25 - 27 March a sporting - compact cup of club teams is to take place in the "Lipetsk metallurg" sports complex in Lipetsk. The all-Russian competition is to be held by the Russian Shooting Union, the National Sporting Federation and the "Lipetsk metallurg" sports club.

The tournament in which more than 140 sportsmen and 20 teams are to take part is to open the all-Russian calendar of sporting competitions for the year of 2005. Within the 2 days the shooters are to beat 200 targets each at 8 grounds.

For the new season new shooting grounds have been equipped at the sports club's shooting range and modern equipment for target-launching has been bought, which will allow to diversify the programme of the competition as much as possible.

The modernization of the shooting complex of the "Lipetsk metallurg" sports club is to continue in 2005 and it is to become one of the biggest in Russia. New grounds for sporting and classic shooting as well as a well equipped recreation zone are to be built.

NOTE:

Sporting - compact is one of the kinds of sports-hunting shooting united by the term "sporting". 25-target shooting takes place at bordered grounds or at standard grounds of round and trench stands or at grounds of similar sizes. The maximum distance from the target is 35m.

The programme of the competition:

The opening ceremony - 6.30 p.m. 25 March;

The first day of the competition (100 targets) - 10.00 a.m. - 5.00 p.m. 26 March;

The second day of the competition (100 targets) - 10.00 a.m. - 5.00 p.m. 27 March;

The closing ceremony and the rewarding of the winners - 6 p.m. 27 March

NLMK subsidiary - Stoylensky GOK has summed up the results of its work in February

In January - February 2005 152 thousand tons of shipping ore was processed , 1,73 mln. tons of concentrate was worked out. 1,74 mln. tons of concentrate and 219,5 thousand tons of sintering ore has been loaded to consumers.

The gain from the sale of the commodity output for the 2 months is 2,75 billion rubles, which is 2,4 times more than the analogous figures of the last year. The gain before taxation has increased by 7 times and is 1,9 billion rubles.

Tax payments to the budgets of all levels and off-budget funds for January -February 2005 have increased by almost 3 times and have exceeded 700 mln.rubles.

In February the average salary at the Stoylensky GOK was 14,2 thousand rubles

NLMK Continues By-product Coke Shop Reconstruction

Coke-oven battery No.2 with capacity of 455 thousand ton of coke per year at By-product Coke Shop was stopped for reconstruction. The upgrade of the facility will ensure its reliable and accident-free operation increasing the capacity up to 460 thousand ton per year and decreasing environmental pollution 3 times.

Coke-oven battery will be the fourth in By-product Coke Shop of NLMK to use modern technologies of dust-free coke pushing when 99% of hazardous emissions are trapped. Since the beginning of the technical reequipment program in 2000 coke-oven batteries No. 5 and 6 have been completely rebuilt. Today they are among the most environmentally friendly ones in Russia. The reconstruction of coke-oven battery No.1 and by-product block will be completed current year.

Coke-oven battery No.2 reconstruction project investments will amount to 45 million dollars. The reconstruction of the next facility will be completed in September 2006.

The total company investments into NLMK complex technical reequipment program exceed 935 million dollars. NLMK plans to invest over 1,3 billion dollars into financing the first stage of the program scheduled for 2000-2005.

 [back](#)

NLMK Reviews February Work Results

In January and February NLMK produced 1,44 million ton of pig iron (-7% as compared to the same period last year); 1,47 million ton of steel (-3%); 1,38 million ton of finished steel (-3%); 2,26 million ton of agglomerate (-0,8%); and 645 thousand ton of coke (-11%)

Commodity output was to the amount of 22,33 billion rubles exceeding the 2004 similar period index by 47%. Sales proceeds (products, jobs and services) amount to 21,89 billion rubles (+45%). Before-tax profit increased to 9,58 billion rubles (+62%).

NLMK 2 months tax payments to the budgets of all levels increased 1,9 times and amounted to approximately 2 billion rubles. Company industrial personnel average wage in February was 9950 rubles (+17% as compared to February 2004).

2006 AUG 22 A 9 19
OFFICE OF INTERNATIONAL
CORPORATE RELATIONS

NLMK implements a new labor incentive system

Starting from May in some NLMK's divisions a new labor incentive system providing for a significant increase in the fixed part of the personnel's salary was implemented. It is aimed at increasing motivation of the Company's employees, rewarding of high-skilled personnel and attraction of young people. On average, wage categories of the Company's employees will increase by 76%, and allowance for harmful labor conditions - by 60%. The most qualified workers will get high quarterly and yearly bonuses. For the management, specialists and service personnel the rates scale will be replaced by a system of official salaries, fixing the minimum possible salary. The material incentive of management and specialists will depend both on the current results of their work and the results of annual attestation. At present the new payment system covers more than 2.2 thousand of production personnel and by the end of the year will cover all the Company's employees. From this year on allowances and bonuses for training young personnel will be paid. According to NLMK's Director for Personnel and Common Issues, Serguey Melnik, all these measures will increase material incentive, get the personnel interested in the results of their work and stimulate their professional growth. NOTE: NLMK's policy of social partnership repeatedly received a high evaluation at a regional and federal level. The Company won the all-Russian contest "Russian organization of a high social efficiency" three times. At the beginning of this year NLMK reconfirmed its reputation as a socially responsible employer, having won a regional contest of the best enterprises (in nomination "Remuneration of labor and social payments).

 [back](#)

NLMK plans to increase investments in environment protection projects up to 1 billion rubles in 2005

NLMK plans to implement more than 30 environment protection measures this year for the total amount of over 1 bln. rubles, due to which total emissions will decrease by almost 7 thousand tons per year. This favorable environmental effect will be achieved due to resource-saving and low-waste technologies implemented in the course of Stage I of Technical Upgrading Program (2000-2005) with the total capex exceeding USD 1.3 billion.

In order to decrease emissions, the air cleaning systems in the sinter plant, BF and refractory shops will be upgraded. State-of-the-art environment-friendly plants will be started, such as reheating furnace No.4 in Hot Rolling Shop and coke battery No.1.

Due to revamping of wastes processing facilities as early as in 2006 the Company will be able to neutralize them almost completely (up to 99.5%) and reuse them in the technological process. This will be supported by start-up of a state-of-the-art industrial wastes combustion plant as well as an increase in capacity of BF and coke-plant sludge processing unit.

This year NLMK will start implementing a large-scale revamping program of its water supply and drainage systems. As early as in 2007 it will result in fivefold (against 2003) reduction of purified effluents discharge into the Voronezh River and almost twofold reduction of river water intake. For the purpose of further reduction of the Company's impact on the river NLMK plans to implement several water protection measures at cogeneration plant and cold rolling production. The joint sewage treatment facilities of NLMK and the city of Lipetsk will be further upgraded. Several new water purification facilities will be built, including UV water disinfection plant.

NOTE:

NLMK increases its investments into environment protection measures. In 2000 they amounted to USD 4.6 mln, and in 2004 - USD 25.9 mln. As of now, capex into NLMK's Technical Upgrading Program exceeded USD 935 mln, of which more than USD 70 mln were invested into environmental projects. Within the period from 2000 to 2005 the investments into environment protection measures are expected to exceed USD 90 million.

 [back](#)

NLMK has paid interim dividends

NLMK has completed paying out dividends by the results of nine months of 2004 under the placed common shares of the Company. Payments have been effected in cash in the amount of 1 (one) ruble per common share. Payment of interim dividends is in line with the Company's strategic goals and confirms conformity of NLMK's corporate governance policy to the best international standards, as well as contributes to attraction of investments. As of March 3, 2005 the payments under the Company's common shares amounted to RR 5 875 718 864.

 [back](#)

NLMK's women employees will get presents for the International Women's Day (March 8)

On the threshold of Women's Day 25 best women employees will be given the status of NLMK's labor veterans, 100 women will be given honorary diplomas, and all those who excelled in their work will get monetary remunerations in addition to awards. Besides, almost 15 000 women working for NLMK will get bonuses timed to the Women's Day, including those, who are on a maternity leave. The Company management allocated about 7 mln rubles for rewarding its women employees. Traditionally NLMK's women will be congratulated by the Company management, representatives of Lipetsk administration and municipal deputies' council. On March 7 on the stage of Lipetsk Drama Theater a concert for NLMK's women employees and labor veterans will take place, where singers from Moscow Musical Comedy and "XXI" orchestra under the conductor Pavel Ovsyannikov will participate. NOTE: At present women make 36% of the total number of NLMK's personnel, many of them have executive positions. NLMK's women are provided with social guarantees, exceeding the norms of federal labor legislation. In particular pregnant women are given on demand a leave before the actual maternity leave paid for in the amount of current rate or salary considering the salary increase. Women on a child rearing leave are paid monthly compensations in the amount of minimum remuneration of labor in the Russian Federation.

 [back](#)

In 2005 NLMK to increase investments into technical upgrading of its production facilities

NLMK plans to invest over USD 400 mln into upgrading and development of production facilities at all stages of steel-making process.

Coke plant will complete reconstruction of its coke battery with the capacity of 460 000 t/y. The new equipment as well as upgrading of raw material charging technology, coke discharge and quenching processes will triply reduce environmental impact by the battery.

The Company will complete overhaul of the second biggest in terms of capacity Blast Furnace No.5 (up to 2.8 mln t of hot metal per year) along with reconstruction of casthouse aspiration system. Highly efficient precipitators and automatic control system will make the furnace one of the most environmentally safe in Europe.

Within the steel-making sector two new hot metal desulfurization units will be installed with the total capacity of 3.8 mln tons per year. Due to this the Company will produce up to 7 mln tons of low-sulfur hot metal annually and increase its production of steel with improved properties.

At NLMK's Cold Rolling Production a new automatic control system for the cold rolling mill has been implemented. Construction of the 3rd hot-dip galvanizing line with the capacity of 340 000 t/y will be completed. Due to the possibilities of equipment NLMK will be the first among the CIS companies to produce galvanized hot-rolled pickled strip with gages from 1.5 to 4.0 mm.

Starting from early 2000 the Company's investments into the comprehensive technical upgrading program exceeded USD 935 mln. In total NLMK plans to invest more than 1.3 bln dollars into the first stage of program 2000 - 2005.

 [back](#)

Expansion of NLMK's products application range

NLMK hosted a business seminar, where more than 20 engineering and road-constructional companies of the Central Federal District participated. The seminar participants discussed the possibility of using NLMK's steel-making slag in the construction of local and federal roads. Special tests conducted by the leading R&D institute in Russia in the field of road building FGUP "SoyuzdorNII" confirmed conformance of NLMK's steel-making slag to all the necessary requirements to the materials used for federal road building. At the same time this product of NLMK's is less expensive than other road-building materials. In 2005 NLMK plans to sell 1 mln tons of steel-making slags to the consumers. NOTE: Steel-making slags are a by-product of steel-making process, used for manufacture of asphalt and other road-building materials. NLMK is the largest producer of crushed rock from steel-making slags: 1.86 mln. tons of crushed rock were produced in 2004, of which 876 thousand tons were shipped to the consumers in Russia and Belarus. 95% of NLMK's production and consumption wastes are neutralized and processed for further use in internal technological processes, for land restoration and supply to other consumers. The Company's specialists have implemented lately unique processes for safe processing of slags and sludges, oily wastes and electrical machinery containing ultratoxic compounds - sovol and sovtol.

 [back](#)

Stoylensky GOK successfully starts 2005

In January 86 thousand tons of high grade ore was processed, and 915 thousand tons of concentrate was produced. Stoylensky shipped to its customers 923 thousand tons of concentrate and 118 thousand tons of sintering ore. The proceeds from commodity products sales amounted to RR 1.4 bln, which is 2.4 times higher than last year. Sales profit increased by 4.8 times and amounted to RR 940 mln. The Company invested about 60 mln rubles into upgrading and revamping of facilities within the frames of technical upgrading program. Tax payments to the budgets of all levels and off-budget funds made RR 327 mln in January 2005, which is 2.3 times higher than last year.

 [back](#)

NLMK Helps Motherland Defenders

In the run up to the Motherland Defender Day NLMK management decided to give moneyed assistance to unemployed male veterans of the company.

At present around 150 young NLMK workers are serving the armed forces of Russia. Each of them is guaranteed employment at NLMK upon his return, as well as moneyed assistance and availability of loans on concessionary terms. NLMK rehired 113 workers after their military service; all in all NLMK hired over 400 former servicemen.

Since 2001 NLMK subsidiary - insurance company "Shans" - has been providing additional insurance coverage of up to 45 000 rubles for each drafee worker besides mandatory military insurance, envisaged by RF law.

According to Sergey Melnik, company's Director for Personnel and General Issues, it has been a tradition for NLMK to provide comprehensive help to servicemen. In the past year NLMK charity fund "Miloserdiye" provided the funds for sanatorium and resort treatment of Lipetsk air-base servicemen families. Together with Soldier Mother Committee our company Labor Union Committee repeatedly organized food and clothing drives, provided help and support to servicemen in military hospitals.

 [back](#)

NLMK's products were highly evaluated by the customers

"Rostselmach Plant" awarded NLMK with an Honorable Diploma in 2004 for the high quality of its products. Among more than 100 suppliers of the largest manufacturer of agricultural machinery in Russia NLMK was named the only company, whose products fully conform to high requirements of machinery producers. At the ceremony of diploma awarding "Rostselmach" management noted on NLMK's reliability as a partner fully performing all the contractual obligations. The Company's technical facilities provide for the possibility to produce high-quality metal products, certified and conforming to the requirements of international standards. The Company's activity in the quality control area is supported by the certificate of conformance to International Standard ISO 9001:2000 according to the results of certification audit TUV CERT (Germany). In 2004 NLMK shipped to "Rostselmach" approx. 34 thousand tons of steel products having covered 75% of its demand in hot-rolled steel and 80% - in cold-rolled steel.

 [back](#)

NLMK sums up January results

In January 2005 NLMK produced commodity goods for the amount of RR 11.68 bln, which is 51% higher against this period last year. NLMK produced 769 thousand tons of iron (-3%), 784 thousand tons of steel (-0,5%), 725 thousand tons of finished rolled products (-2%), 1,2 mln tons of sinter (+2%) and 344 thousand tons of coke (-8%). Favorable conditions in the steel market provided for improvement of NLMK's economic performance compared to last January. The Company's proceeds from sales of products (works, services) amounted to RR 11.31 bln (+50%). Earnings before taxes amounted to RR 5.02 bln. Due to this NLMK doubled the volume of tax payments to the budgets of all levels up to RR 573 mln. The average wages of the Company's manufacturing personnel reached 11.2 thousand rubles in January (+20% against January 2004).

 [back](#)

NLMK's subsidiary bank - "Lipetskkombank" - increases credit portfolio

The income of JSC "Lipetskkombank" in January 2005 amounted to RR 17.7 mln, which is 8 times more than last year. Balance currency exceeded RR 10 bln (growth by 2.5 times), and the bank's credit portfolio increased by 20% in January and amounted to RR 5.7 bln. The bank continues the policy of active attraction of the population's savings: a new type of deposits for natural persons was introduced, which is characterized by a longer period and higher interest rates. The volume of bank deposits in January 2005 reached RR 2.4 bln (3.5 times more against last year). The bank further develops the system of cashless payments using plastic cards, which give their owners a possibility to pay for public utilities, cable TV and communication services via cash machines. At present 48 cash machines of "Lipetskkombank" are operating in the Lipetsk region. In February a new branch of "Lipetskkombank" was opened in Sary Oskol in Belgorod region, and NLMK's subsidiary "Stoylensky GOK" (mining company) became its first corporate client. Within the frames of wage project more than 6 thousand plastic cards were issued, which will be serviced by the city cash machines.

 [back](#)

Volvo named NLMK one of the best suppliers

Auditors of Volvo Group from Sweden visited NLMK, to audit functioning of NLMK's quality assurance and environment management systems. In the course of audit they were informed of production route, quality, and environmental safety of steel products supplied to the EC countries.

Volvo representatives visited steel-making and rolling facilities and were informed about environmental control measures at the stage of steel-making raw materials preparation. By the audit results Swedish experts recognized full conformity of quality and environment management systems current at NLMK to the strict requirements of international standards and European market. In accordance with Volvo's practice of its suppliers evaluation NLMK was assigned the highest supplier category - category "A".

NLMK's policy is aimed at further development of supplies of products conforming to the international quality, reliability and environmental safety standards. This is supported by the Company's certificates of conformance to the acknowledged world standards ISO 9001:2000, ISO/TS 16949:2002 and ISO 14001:1996.

Last year NLMK exported its products to more than 70 countries of the world. The Company's exports amounted to 7 mln. tons or 70% of total sales. 29% of all export sales were directed to European Union countries.

 [bac](#)

NLMK Improves Employee Working Conditions

In 2004 over 11000 saplings and shrubs were planted, 1600 m2 of lawns and flowerbeds were laid out, 60000 m2 of roads and 3800 m2 of sidewalks were repaired in the territory of NLMK. Injuries index dropped 2 times compared to that in 2000. The company completed a full assessment of work places in all production shops. A new Personnel Working Conditions Improvement, Industrial Injuries Level and Sickness Rate Decrease program is being designed.

During the current year new technologies allowing to significantly improve the personnel working conditions will be implemented being in the framework of the company technical reequipment and development program with total investments amounting to 1,4 billion dollars. A thermal dust and gas emissions treatment facility for pitch coke furnaces will be installed in By-product Coke Production Shop. Dust treatment facilities will operate at charge material preparation section of Basic Oxygen Furnace Shop, major reconstruction of blast furnace No.5 foundry aspiration system will be completed in blast furnace production shop.

During 2005 lighting system will be repaired in all main facilities, in some shops heating and ventilation will be improved. Repair of shop first-aid posts, canteens, showers, sidewalks, facades and planting of trees will continue.

 [back](#)

Information message

Ivan Vasilyevich Frantsenyuk, President of NLMK, suddenly passed away at the age of 78 on February 9, current year.

The civil funeral rites are to be held on February 11, 9:00 a.m. at NLMK Palace of Culture. The burial will take place on February 11, 1:00 p.m. at the Lipetsk city cemetery (Tube Mill district).

For your information:

Ivan Vasilyevich Frantsenyuk was born on December 1, 1927 in Khmel'nitskaya Oblast. He graduated from Zhdanovskiy Metallurgical Institute in 1951. 1951-1954 he was a technologist of Chief metallurgist department at Voronezh Works named after Kalinin. He started his career with Novolipetsk Iron and Steel Works in position of a Rolling Production Shop shift in charge in 1954. 1955-1956 he spent working for Magnitogorsk Metallurgical Works. In 1956 he returned to Novolipetsk Iron and Steel Works working his way from Rolling Production Shop shift in charge to chief engineer of the corporation. In 1978 he was appointed NLMK director, in 1992 he was elected Novolipetsk Iron and Steel Corporation Director General and NLMK President in 2004.

He was a Doctor of technical sciences and was the author of approximately 200 scientific works, 12 books and more than 180 certificates and patents for inventions in the field of ferrous metals production, metallurgical production automation and mechanization. He was a Full Member of the Russian Engineering Academy and an Honorary Member of the RF Academy of Natural Sciences.

He was a Hero of Socialist Labor. He was awarded two Orders of the Red Banner of Labor, the Order of October Revolution, the Order of Friendship of Peoples, the 3rd class Order for "Services to Motherland", the 2nd class Order for "Services to Motherland", Sergius of Radonezh Order. He was a USSR State Prize winner, RF Honored Metallurgist, RF Honorary Metallurgist, Honorary Lipetsk and Lipetsk Oblast Citizen.

 [back](#)

NLMK Power Saving Program is Effected

The Power Saving Program measures taken in 2005 will allow NLMK to reduce the steel production specific energy consumption to 6,4 Gcal/t, which is one of the best indices for Russian companies with full production cycle.

Power consumption decrease will be achieved due to implementation of new resource saving technologies, equipment and power lines upgrade, optimizing the technological equipment load and conversion to cheaper energy sources.

Current year the company will start its new projects aimed at power safety improvement and stable operation in line with technical reequipment and development program with investments amounting to 1,4 billion dollars. A new 25 MW power generator will be built in oxygen production shop and two units for air separation products will also be installed. Two gas-consuming units will also be reconstructed.

NLMK's Fuel and Energy Shop almost completely uses the by-product of blast furnace production - blast furnace gas - as fuel. It used to be utilized by burning. All these measures to improve the power resources efficiency allow to not only decrease the purchasae of energy by 8 per cent, but decrease the production impact on the environment.

For your information:

170 energy saving measure were taken in 2004 allowing to decrease specific natural gas consumption by 3% and energy consumption by 1,35%. NLMK metallurgical production specific energy consumption decreased by 1,4% with increase in steel casting by 3% and now equals 6,456 Gcal/t. Preliminary results show that total finance economy totals 75 million rubles due to implementation of energy saving technologies. Since 2000 the Company's production modernization investments have exceeded 935 million dollars.

New Continuous Galvanizing Line Assembly Began at NLMK

The commissioning of the line with 340 thousand ton capacity will allow NLMK to produce up to 900 thousand ton of galvanized rolled products per year and take the leading position among the producers in Russian market.

The new line is designed for production of galvanized 0,4-4,0 mm thick metal. First time in CIS equipment features allow NLMK to start production of hot rolled pickled strip with thickness 1,5-4,0 mm. This product is used in production of power construction metal structures and at present is imported to Russia.

At present production facility construction is completed, power lines are connected and first-priority equipment assembly is underway. Danieli is in charge of construction and assembly. The project worth approximately 70 million Euro is to be completed in the second half of 2005. It is carried out in the framework of the company technical reequipment and development program with total investments amounting to 1,4 billion dollars. Since 2000 the Company's production modernization investments have exceeded 935 million dollars.

NLMK Increases Fuel and Energy Complex Capacity

NLMK began installation of a new 25 MW turbogenerator for its power lines. Its commissioning in 2006 will allow the company to improve reliability of power supply system and additionally produce 135 million kW/hour of energy per year. The total production volume will make 40% of total NLMK needs.

Construction, replanning of the older facility and foundation construction are carried out at present. Upon completion the assembly of the second steam turbine, turbogenerator and power line connections will be started. Secondary fuel (blast furnace and coke-oven gas) is used to provide high-pressure steam for steam generator.

The project worth approximately 230 million rubles is carried out in the framework of the company technical reequipment and development program in force since 2000 with total investments amounting to 1,4 billion dollars. The annual return investment of turbogenerator implementation will be 56 million rubles. At present modernization and production development investments exceed 935 million dollars.

In 2005 NLMK will continue its work for its own Fuel and Energy Complex capacity increase. Today it fully provides heat, water, compressed air and hydrogen for the company needs.

 [back](#)

NLMK Modernizes Continuous Galvanizing Line

A successive stage of NLMK Continuous Galvanizing Line reconstruction at Rolling Production Shop with the line capacity of 390 thousand ton of metal per year was completed. This will allow to improve the product quality, ensure satisfaction of consumer requirements towards galvanized rolled products and reach more stable equipment operation.

Assembly of main units - skin pass mill, stretcher, and tensioning drives - was carried out in the course of modernization. The line was equipped with automatic control system, as well as with machinery for strip tensioning and side shearing.

Continuous Galvanizing Line reconstruction worth 730 million rubles is carried out in the framework of the company technical reequipment program in force since 2000 with total investments amounting to 1,4 billion dollars. At present modernization and production development investments exceed 935 million dollars.

NLMK Subsidiary - Stoylenskiy Iron-ore Beneficiating Plant - Increases Financing of Social Welfare Programs

Over 60 million rubles was directed by Stoylenskiy Iron-ore Beneficiating Plant to support a number of social welfare programs in 2004, which is 3 times more the amount of the financing as of 2003.

11,5 million rubles was provided for company employees sanatorium and resort treatment and children summer camps. 1200 employees' children spent summer in different health improving camps.

Over 12 million rubles was spent on financing monthly payments to retired company employees - pensioners and WWII participants, including welfare support to budgetary organizations veterans. Furthermore, company employees, large families, employees upon child birth and single mothers annually receive welfare support.

In 2004 the company provided help to educational institutions for children, law enforcement bodies, and organizations of disabled. City airport support funds were provided. Approximately 30 million rubles was spent by Stoylenskiy iron-ore beneficiating plant for relocation of people from sanitary-hygienic zone in 2004. This allowed 35 families to buy new homes and it is planned for 19 more families to be compensated for relocation. Sanitary-hygienic zone creation provides for possibility of stable operation in the mine and extraction volume increase.

Associated bank NLMK - "Lipetskkombank" - sum up the results of the year 2004

The profit of the bank for the year 2004 is 126,3 million rubbles (+ 33% to the level of 2003). The credit portfolio has increased in 2 times and reached the point of 4.7 billion rubbles. Net assets of the Bank are more than 10 billion rubbles, liquid assets - 5.1 billion rubbles.

For the year the sum of the received individual investments is 1,69 billion rubbles, and the total volume of the capital received from individuals is 2,3 billion rubbles, what is 4,8 times as big as for the year 2003. The volume of funds of corporative clients has increased in 3 times and made 6,6 billion rubbles.

In the year 2004 "Lipetskkombank" together with NLMK finished the realization of the salary project with the usage of credit cards. In the present time more than 68 thousand credit cards are released, which are served by 46 bancomats and 166 POS-terminals of the trade- service net of Lipetsk. The owners of the "Lipetskkombank" credit cards have the opportunity to pay for the public utilities, municipal telephone and services of cable television through bancomats.

"Lipetskkombank" is an active participant of the municipal program of the support and the development of miner business. The share of the Bank in the total volume of the credits, given in the year 2004 to Lipetsk entrepreneurs by the credit organizations of the town, is 28%.

"Lipetskkombank" plans on the year 2005 further development of the affiliated branch, working-out and introduction of new credit programs for individuals and also the preparation for the inclusion of the Bank in the system of the deposit insurance.

 [back](#)

In 2004 NLMK invested in environmental measures more than 700 million rubbles.

In 2004 the carrying-out of more than 20 environmental measures allowed NLMK to essentially reduce the influence of the production on the environment. Under the increase of steel output on 270 thousand tons, the Company reduced specific emissions by 8% compared to the previous year.

In 2004 for the first time in Russia a new ecologically safe line on the oil wastes utilization was worked out and implemented at NLMK. The equipment of iron-containing wastes of blast furnace & coke-oven & by-product plants as well as gas emissions cleaning system of by-product plant were put into operation. The system of chemical water treatment of heat engineering shop was updated providing to reduce river water usage in the production & diminish salts content in industrial effluents.

In the course of year the company's specialists continued to develop the network of ecological monitoring. New gas analyzing equipment was commissioned in sinter production allowing to continuously control atmospheric air contamination sources. Existing network in the territory of the company & the city consisting of 32 inspection wells & 2 stationary monitoring stations help obtain on-line information on production effect onto environment.

In 2004 the Company passed the scheduled supervisory audit on the correspondence with the requirements of an international ecological standard ISO-14001: 1996. The certificated organ TUV CERT (Germany) proved the compliance of the environmental system of the plant with the universally recognized standard.

For information:

In 1992 the concentration of hydrogen sulphide, ammonia, naphthalene, benzol, phenol and other polluting substances in the emissions of NLMK exceeded the standards by 1,5-4 times. The implementation of the wide-scale program of technical reequipment of NLMK with total cost 1,4 billion dollars since the year 2000 allowed the company to reach the level when the concentration of the polluting substances doesn't not exceed the legally established standards. Only for the last 2 years the overall emissions in the atmosphere reduced by 24 thousand tons, and the emissions of more toxic substances were cut down by several times (ammonia - by 2 times, naphthalene- by 5 times, cyanic hydrogen - by 16 times, phenol - by 20 times). About 935 million dollars have already been invested in modernization of the production, including about 90 million dollars - in the environmental projects. Since 2000 the consumption of river water and the drainage of industrial effluents into the Voronezh river decreased by 20%. The degree of wastage utilization increased from 88% (in 2000) to 96%. Today NLMK is proud of the best results in Russia on detrimental effect reduction of main productions onto the environment among steel-making companies.

 [back](#)

In 2004 NLMK increased the investments in technical reconstruction of the production

In 2004 NLMK invested 295 million dollars in modernization and the development of the production. The sum became the largest in the limit of the implemented from 2000 program of the plant technical reequipment with the total volume of investments 1,4 billion dollars. In the course of year the projects embracing all the basic industries of NLMK were accomplished.

The facility of hot metal desulfurization with the 3,2 million tons capacity per year of metal with low concentration of sulfur was put into operation in steel making production, and also the construction of second priority for the cleaning of dust-laden air on one of the process stages was finished.

In rolling production a new facility for pre-painting of hot-dip galvanized steel is put into operation; the power rating of the facility is 200 thousand tons of metal per year. A new automatic control system of hot-dip galvanizing line was established and butt welding machines in a continuous pickling line & cold rolling mill were replaced. For the first time in Russian metallurgy the computer-based system of strip quality control was set in operation, it ensures a full automatic control of the quality of the metal surface during hot rolling.

A facility that produces hydrogen with the capacity of 6000 m³/h was put into operation in gas shop; it fully provides for the needs of the plant in the kind of production.

The slurries utilizing division with 198 thousand tons capacity of iron-containing raw material per year was built, it allows to treat formed waste products and to reduce 50-70 thousand tons of the earlier accumulated slurries, which are used in the technological process for the second time. For the first time in Russia the specialists of NLMK worked out and implemented a new ecologically safe program on oil wastes utilization with the 5,5 thousand tons capacity per year. Its exploitation gives the possibility without any damage for the environment to fully process all oil wastes of the plant.

All in all in 2000 the Company invested in modernization and development 935 million dollars.

 [back](#)

In 2004 the affiliate company of NLMK - JSC "STAGDOK" - increased the output of the main types of the production

In 2004 JSC "STAGDOK" mined 4,2 million of limestone (+5,3% to the similar period of the year 2003), produced 3,15 million tons of finished commodity (+5,1%). 3,51 million tons of finished commodity were incarnated to the consumers (+4,8%).

Tax payments of the Company to the budgets of all levels and off-budget funds reached 88 million rubbles (+21,3% to the rate of 2003).

JSC "STAGDOK" investments in the framework of the program of technical reconstruction amounted to 18 million rubbles in 2004. New machinery and equipment was bought for the repair of railway lines, the automatic systems of control and account of electric power were established.

The Company continues to be the leader in the Russian market of fluxing limestone (up to 22% of total amount of mining in Russia), fully providing the needs of NLMK in this kind of raw material. In 2005 JSC "STAGDOK" will continue the development of Sitivsky section of Sokolsko-Sitovsky deposits with the known supplies of limestone in the volume more than 200 tons (on 01.01.2000)

 [back](#)

In 2004 NLMK increased the volume of the delivery of metal production

In 2004 NLMK dispatched to the consumers more than 9,5 million tons of metal production, what is on 5,5% more than the rate of the previous year.

For 12 months NLMK increased the shipment of the output with high added cost. The Company incarnated 392 thousand tons of dynamo steel (+38% to the level of 2003), 223 thousand tons of galvanized rolled steel with polymeric coating (+25,5%), 119 thousand tons of transformer steel (+9,5%).

NLMK production is exported in more than 70 countries of the world. Export deliveries of the Company amounted to 7 million tons, or 73% of the total volume of the production. The mainstream export markets in the previous year were left without changes: EC countries (28% of all export), North America (23%), South-East Asia (22%) and the Middle East (22%). The share of electrical steel increased in the volume of export deliveries: dynamo - 57%, transformer - 11%.

In 2004 the major part of sale in the domestic market fell at the consumers of the Central and Povolgesky regions, including the enterprises of automobile industry and building industry. In the Russian market The Company incarnated more than 70% of the total volume of metal with polymeric coating, 88% of galvanized rolled steel and 50% of cold-rolled steel.

 [back](#)

The affiliate company of NLMK - Stoylensky GOK successfully finished the year 2004.

In 2004 10,96 million tons of concentrate are produced, 1,61 million tons of rich ore. 10, 93 million tons of iron ore concentrate and 1,65 million tons of sintering ore are loaded to the consumers.

The commodity output was produced to the sum of 10,87 billion tons. The sales proceeds amounted to 10,92 billion rubbles (+92% to the level of 2003), sales income - 6 billion rubbles (the grow is more than in 13 times).

In 2004 Stoylensky GOK paid taxes to the budgets of all levels to the sum of 3,2 billion rubbles (the grow is in 2,1 times). The share of the plant tax payments in the budgets of Stary Oskol increased from 22% (in 2003) to 32%.

The investments of the plant in the framework of the program of technical reconstruction amounted to 812 million rubbles in 2004.

 [back](#)

NLMK introduces a new system of industrial adaptation of young specialists

The introduction from February 25 of a new system of education will help the graduates of the profile educational institution of NLMK - Lipetsk State Technical University to adapt quickly to the conditions of work in one of the largest metallurgical companies of Russia. The initiative of the direction of the plant was discussed at the meeting of the vice-chairman of the Board of the directors of NLMK Vladimir Scorohodov with the students and teachers of institutes of higher education.

The project planned for four months presupposes the additional training of the senior students at the technological sections of the hot-rolling shop in the real production regime. As the teachers there are leading specialists of NLMK, representatives of LSTU and other profile colleges. The program of training will live up to the demands of the state educational standards in the qualification "Master of Technics and Technology", specialization - "metallurgy".

A new system envisages a competition for the candidates, truly interested in getting the industrial experience and the possibilities to go up the career leader. In the course of industrial training the Company will conclude the long-term treaties with highly perspective students.

A new form of training doesn't have the counterpart in Russia and as a perspective can become an innovation basis for the professional training of the future personal of metallurgical companies of the country.

As Vladimir Scorohodov said, "today young vigorous specialists with a good training base and practical skills are especially demanded at the plant. They are expected to master new equipment, introduced in the framework of a program of technical reconstruction of NLMK."

In the current year NLMK has reserved for 200 LSTU graduates workplaces in the most important sections.

Today NLMK together with the leading institutes of higher education carries on an extensive scientific work. It results in the introduction of new technical developments in the production, the improvement of the quality of metal production, the effectiveness increase in the production. To support the gifted LSTU students 30 special scholarships, establish under the initiative of the chairman of the Board of NLMK Vladimir Lisin are paid out monthly.

 [back](#)

NLMK finished successfully the year 2004

According to provisional data, for the last year proceeds from production sales increased in 1,7 times and amounted to 126 billion rubbles. The income before the taxation increased in 2,1 times and was more than 62,5 billion rubbles, what is the highest rate among the ferrous metallurgy enterprises in Russia.

NLMK increased the volumes of production of the main type of the output if compared to the previous year. They produced 9 million tons of cast iron (+4% to the level of 2003); 9,1 million tons of steel (+3%), 8,6 million tons of finished steel (+4%), 13,8% million tons of agglomerate (+2%), 4,4 million tons of coke (+2%).

The production of NLMK is imported into more than 70 countries of the world. Export deliveries of the Company amounted to 7 million tons, or 73% of the total volume of the produced output.

In 2004 the Company transferred in the budgets of all levels more than 18 billion rubbles, what is on 79% more than the similar figure of 2003. It is expected that according to the results of 2004 the share of tax payments of NLMK in tax income of the budget of Lipetsk region will increase from 52% (in 2003) to 61%.

The growth of the wages of the employees was 24% during the year.

 [back](#)

In 2004 non-governmental pension fund "Social development " increased the pension reserves.

Pension reserve of the non-governmental pension fund "Social development ", the founder of which is NLMK, increased 42% in 2004 if compared to 2003 and amounted to 752 million rubbles. 7,2 million rubbles were paid out as pensions.

The Fund serves more than 43 thousand participants under the treaties of the non-governmental pension fund. According to the results of the 2004 the investment income, distributed among the accounts of the participants, amounted to 11,38% a year.

NLMK is the main founder and the guarantor of the fulfillment of engagements of the Fund. Among the depositors are JSC "Stagdok", JSC "Dolomit", CSC "Engelsky tube mill", JSC "Lipetskkombank", RP "Stinol", JSC "Lipetsk gipromez", "Stoylensky GOK" and others. The joint deposit of the founders of NPF "Social development " increased up to 30 million rubbles in 2004.

In the present day situation NPF "Social development" is among the 25 most successful non-governmental pension fund of Russia and is the largest in the Central-Chernozem zone. In 2005 The Fund plans to continue the programs of the compulsory pension insurance of citizens, in the framework of which more than 200 treaties are already concluded with the clients.

 [back](#)

In the year 2004 the affiliate enterprise of NLMK -JSC " DOLOMIT" - got the highest industrial figures

In 2004 the Company achieved the highest for the last 10 years figures of production and shipment of commodity output.

For 12 months the commodity output is produced to the sum of 213,4 million rubbles (in comparable prices), what is 10% higher the level of the year 2003. The shipment amounts to 2,08 million tons (+11%). The dolomite mining has increased up to 3,3 million tons (+8%), the production of the commodity flux dolomite has increased up to 1,82 million tons (+125).

In the framework of the technical reequipment program the Company acquired modern mining equipment and bought new machinery. In 2004 the investments in the development of the industry exceeded 31 million rubbles.

 [back](#)

14.01.2005

NLMK got the listing in RTS

From January 14 the current year the stocks of NLMK are included in the Quoted list "B" of the List securities, allowed to the tenders in NP "Stock Exchange RTS".

Listing in RTS is one of the steps to the increase of the capitalization of the Company.

The Company share capital is 5993227240 (five billion nine hundred ninety three million two hundred seven thousand two hundred fourteen) rubbles and consists of 5993227240 (five billion nine hundred ninety three million two hundred seven thousand two hundred fourteen) placed common stocks, nominal price 1 (one rubble).

It is expected, that according the results of the year 2004 the profit of the plant (acc. to PBY RF) will reach 126,1 billion rubbles, what is on 68% more than the rate of the year 2003, the net profit will be 47,3 billion rubbles (+110%).

 [back](#)

NLMK introduces new environmental technologies

In by-product coke and steel making plants of NLMK the realization of environmental measures, aimed at the increase of the environmental security of the facilities and the decrease of the man-caused load on the environment has been completed.

For by-product coke plant the company's specialists developed and introduced thermal neutralization of dust and gas emissions of pitch coke production furnace that is by-product of coking coal treatment. The unique equipment will reduce the ecological load of facilities by 14 times, trapping and neutralizing up to 93% of all polluting chemicals (hydrocarbon, sulfur combinations and others), earlier emitted into the atmosphere. The cost of the environmental project is 6 billion rubles.

The construction of the second stage of the dust-cleaning systems of the charge material preparation section is finished in the BOF shop of NLMK. The new facility with highly effective bag filters will be put into operation. Its exploitation will let reduce the amount of dust in the air of the working zone up to the normative rate and cut the emissions in the atmosphere by 46%. The costs connected with the introduction of measures will be 18 billion rubbles.

In the year 2004 NLMK invested about 700 million rubles into realization of more than 20 environmental measures. About 90 million rubles has already been invested into different ecological projects of the first stage (2000-2005) of the large scale technical reconstruction program realization which costs more than 1,3 billion dollars.

The report of Open Joint Stock Company "Novolipetsk Steel" (hereinafter OJSC NLMK) on the observance of corporate performance standards (for the purpose of admitting and maintaining securities in the official list "B" of the Partnership) for January-May of 2005.

No.	List of corporate performance standards	Observance (full, partial, none)	Remarks*
General requirements to issuers			
	An issuer has to form a board of directors elected by cumulative vote.	Observed	Article 31 of OJSC NLMK Charter
	The issuer's board of directors shall include independent directors (at least 1) who: <ul style="list-style-type: none"> • must not be officers or employees of the issuer on the moment of election and 3 years before the election; • must not be officers of another company in which any of the issuer's officers is a member of Personnel and Remuneration Committee with the Board of Directors; • must not be spouses, parents, children, brothers or sisters of the issuer's officers; • must not be affiliated parties of the issuer and its affiliated parties; • must not be parties to engagements with the issuer, according to which they can acquire property (receive monetary funds) with the value of at least 10 percent of the aggregate annual income of the said parties, except receiving remuneration for the participation in the activities of the company's board of directors; • must not be state representatives; • must not be issuer's members of the board of directors for over 5 years. 	Observed	Paragraph 2.3 Regulations on the Board of Directors of OJSC NLMK approved at an extraordinary GSM (Minutes No. 20 of 03.12.2004) Independent directors in the Company's current Board of Directors are: O.V. Kiselyov; D.A. Gindin; N.P. Lyakishev; R. Reynolds.

	<p>Within the issuer's board of directors a committee has to be established with the exclusive functions of appraising candidate Company's auditors, reviewing auditor opinions, appraising efficiency of issuer's internal control procedures and preparation of proposals regarding their improvement (Audit Committee), headed by an independent director.</p> <p>The Audit Committee can only consist of independent directors and, should it be impossible due to rational reasons, only of independent and non-executive directors (directors who are not sole executive bodies and (or) members of the issuer's corporate executive body).</p> <p>The results of reviewing issuer's auditor opinion performed by the Audit Committee have to be made available as materials to the issuer's annual general sharers meeting.</p>	Partially observed	<p>Regulations on the Audit Committee approved by a decision of the Board of Directors of OJSC NLMK on 01.02.2005, Minutes No.121</p> <p>Committee Chairman – O.V. Bagrin</p>
	The issuer must establish a corporate executive body	Observed	<p>- Para 38 of OJSC NLMK Charter;</p> <p>- Regulations on the Management Board of OJSC NLMK approved by an extraordinary GSM (Minutes No.20 dd. 03.12.2004)</p>
	<p>Responsibilities of members of the board of directors, of the corporate executive management body, of the person acting as a sole executive body, also one of the management company and officers thereof, regarding the disclosure of information on issuer's securities holding, as well as sale and (or) purchase of issuer's securities, must be stipulated in the issuer's internal documents.</p>	Observed	<p>- Paragraph 3.6 Regulations on the Board of Directors of OJSC NLMK approved at an extraordinary GSM (Minutes No. 20 of 03.12.2004);</p> <p>- Paragraph 5.8. Regulations on the Management Board of OJSC NLMK approved at an extraordinary GSM (Minutes No. 20 of 03.12.2004).</p>
	<p>The issuer must disclose information on the size of remuneration received by members of the board of directors, members of the corporate executive body, and by the person acting as a sole executive body, also one of the management company and manager.</p>	Observed	<p>The information is disclosed in paragraph 5.3 of OJSC NLMK Quarterly reports available in the Internet at http://www.nlmk.ru/rus/index/quarterindex.php 3.</p>
	<p>The issuer's board of directors will approve a document on handling information pertaining to issuer's activity, to Company's securities and transactions with them, which is not public, and which, if disclosed, can have a material effect on market value of issuer's securities.</p>	Not observed	
	<p>The issuer's board of directors will approve a document stipulating the procedures of internal control over issuer's financial and economic activities, while monitoring of their observance is the responsibility of a separate issuer's structural unit which reports all faults found to the Audit Committee.</p>	Partially observed	<p>The Company has a structural unit executing internal control over financial and economic activities.</p>

Additional requirements to issuers – shareholding companies

	Announcement of conducting a general shareholders meeting shall be made at least 30 days before its date, unless a longer notice is provided for by the law.	Observed	Para 20.1 Charter of OJSC NLMK (new revision) approved at an extraordinary GSM (Minutes No. 20 of 03.12.2004);
	The shareholding company has undertaken not to exempt a purchaser from his obligation to offer shareholders to sell their common shares of the Company (issuing securities convertible into common shares) in case of acquiring 30 and more percent of shareholding company's common shares.	Observed	Exemption of a purchaser from his obligation to offer shareholders selling their owned common shares of the Company (issuing securities convertible into common securities) in case of acquiring 30 and more percent of the Company's common shares is not provided for in any of the Company's documents.

- international passenger and cargo transportation by highway transport;
- cargo transportation by trucks;
- recirculation, storage, handling, disposal, land filling, destruction of industrial and other wastes (materials, substances);
- blasting;
- environmental protection activities (services);
- assembly and maintenance of traffic engineering equipment;
- production of construction materials, structures, and products;
- commercial fishery and fish-farming;
- production, bottling, industrial storage and wholesale of finished alcohol products, wine stock and semi-finished wine products;
- healthcare activities;
- cities and local settlements' utility systems operation ;
- activities related to ionizing radiation sources (generators);
- passenger transportation by highway transport;
- construction, reengineering , repair, maintenance of highways and road installations (other than federal);
- production of agricultural products;
- special code communication;
- educational activities .

CHAPTER 2. The Company's charter capital, stocks, bonds, and other securities. Funds. Register of the Company's shareholders.

Section 4. Charter Capital

4.1. The Charter Capital of the Company is 5,993,227,240 (five billion nine hundred ninety three million two hundred twenty seven thousand two hundred and forty) Roubles divided into 5,993,227,240 (five billion nine hundred ninety three million two hundred twenty seven thousand two hundred and forty) outstanding common shares with a par value of 1 (one) Rouble per share.

4.2. The Company's shares shall be registered and issued in the book-entry form.

Section 5. Authorized for issuance shares

5.1. The Company may distribute common registered shares (shares authorized for issuance) in addition to outstanding shares specified in section 4.

5.2. The number of such additionally offered shares shall not exceed the number of shares authorized for issuance.

Section 6. Bonds and other issued securities of the Company.

6.1. The Company may distribute bonds and other issued securities in accordance with the applicable legislation of the Russian Federation.

6.2. Distribution of the Company's bonds convertible into shares and other issued securities convertible into shares shall be on the basis of the corresponding resolution by the Company's Board of Directors. Such resolution on distribution shall stipulate the form, period, and other conditions concerning the redemption of bonds.

Section 7. Payment for shares and other issued securities

7.1. Additional shares and other issued securities of the Company distributed by subscription may be distributed only if fully paid.

7.2. Additional shares of the Company distributed by subscription may be paid in cash, securities, other types of property, or by proprietary rights, or other rights of monetary value. Form of payment for additional shares and other securities shall be stipulated in the resolution on distribution of such securities. Payment for other issued securities shall be only in the monetary form.

7.3. The price of the Company's additional shares distributed by subscription shall be determined by the Company's Board of Directors in accordance with the Federal law "On joint-stock companies", but shall not be less than their par value.

Section 8. Increase of the Charter Capital.

8.1. Charter Capital of the Company may be increased by increasing the par value of shares or by placing additional shares.

8.2. Resolution on the increase of the Company's Charter Capital by increasing the par value of shares shall be adopted by the General Meeting of Shareholders.

8.3. Resolution on increase of the Company's Charter Capital by placing additional shares shall be adopted by the General Meeting of Shareholders or by the Board of Directors of the Company in accordance with this Charter and the Federal law "On joint-stock companies".

Resolution of the Board of Directors of the Company on the increase of Charter Capital of the Company through offering additional shares shall be adopted by the unanimous vote of the Board of Directors of the Company, provided that the votes of directors who have withdrawn are disregarded. If no unanimous resolution is reached, the increase of Charter Capital shall be considered by the General Meeting of Shareholders.

8.4. The number of additional shares, method and price of their placing, form of payment for additional shares and other conditions of placing shall be determined by the resolution on the increase of Charter Capital of the Company by placing additional shares.

8.5. Increase of the Company's Charter Capital by placing additional shares may be accomplished at the expense of the Company's property. Increase of the Company's Charter Capital by increasing the par value of shares shall be accomplished only at the expense of the Company's property.

Section 9. Reduction of Charter Capital.

9.1. Charter Capital of the Company may be reduced by the reduction of the par value of shares or by the reduction of their total number, including purchase and redemption of a part of shares, in cases stipulated in the Federal law "On joint-stock companies".

9.2. Any reduction of the Company's Charter Capital by the reduction of the par value of shares or by purchase and redemption of a part of shares in order to reduce their total number, as well as the appropriate amendments in the Charter of the Company, requires a resolution adopted by the General Meeting of Shareholders.

9.3. The Company shall notify its creditors in writing of the reduction of the Company's Charter Capital and of its new amount within 30 days from the date of the resolution on reduction of its Charter Capital, and shall publish the appropriate statement of the resolution in the print edition designed for publications on legal entities' state registration. In this event the creditors of the

Company may, within 30 days from the date of the said notification or within 30 days from the date of the said publication, demand in writing an early termination or performance of the Company's corresponding obligations and recovery of the damages incurred.

Section 10. Repurchase of outstanding shares by the Company.

10.1. The Company may repurchase its outstanding shares by the resolution of the Board of Directors of the Company with regard to the restrictions provided for by the Federal law "On joint-stock companies".

The shares repurchased by the Company do not give any voting rights, are disregarded in the calculation of votes and do not give any dividend rights. Such shares shall be sold at their market value not later than one year from the date of their repurchase. Upon expiration of this period the General Meeting of Shareholders shall adopt the resolution on reduction of the Company's Charter Capital by way of redemption of such shares.

10.2. The resolution on repurchase of shares shall stipulate the categories (classes) of repurchased shares, the number of shares of each category (class) repurchased by the Company, repurchase price, form and period of payment and repurchase period.

Repurchase price shall be paid in cash.

10.3. The Company shall, upon demand of shareholders, repurchase the shares upon which the repurchase resolution has been adopted. If the total number of shares upon which the shareholders demanded repurchase exceeds the number of shares, which the Company can repurchase, such shares shall be repurchased from the shareholders pro rata their applications.

The Company shall give notice to the shareholders of the repurchase of shares not later than 30 days before the beginning of the repurchase period.

Section 11. Funds and net assets of the Company

11.1. The Company shall create and establish a Reserve Fund amounting to not less than 5 per cent of its Charter Capital. The amount of the Reserve Fund shall be determined by the resolution of the Company's Board of Directors. The Reserve Fund of the Company shall be formed by compulsory annual contributions. The amount of annual contributions shall not be less than 5 (five) per cent of net profit until the amount of the Reserve Fund as determined by the Board of Directors of the Company in accordance with the Charter of the Company is achieved. The Reserve Fund of the Company is designed to cover its damages, as well as to redeem the Company's bonds and repurchase its shares if no other funds are available. The Reserve Fund may not be used for any other purposes.

11.2 The value of net assets of the Company shall be estimated on the basis of accounting reports according to the procedure stipulated by the Ministry of Finance of the Russian Federation and the Federal authority of the securities market.

Section 12. Dividend payment procedure

12.1. The Company may decide on (announce) the payment of dividends on outstanding shares based on the results of the first quarter, six months, nine months of a financial year and (or) a financial year, unless otherwise stipulated by the applicable legislation of the Russian Federation. The resolution on payment (announcement) of dividends on the basis of the results in the first quarter, six months, nine months of a financial year may be passed within three months from the date of expiration of the corresponding period.

The Company shall pay dividends announced on each category (class) of the shares.

12.2. The resolution on payment (announcement) of dividends on outstanding shares, stipulating the amount of a dividend, form, procedure and period of its payment, shall be adopted by the General Meeting of Shareholders of the Company. The amount of dividends shall not exceed the amount

advised by the Board of Directors of the Company. Dividends shall be paid from the net profit of the Company within 90 (ninety) days from the date of resolution on the payment of dividends. Dividends shall be paid in cash.

12.3. The list of persons entitled to receive dividends shall be compiled as of the date of compiling the list of persons entitled to participate in the General Meeting of Shareholders of the Company, where the resolution on payment of such dividends shall be adopted. To compile the list of persons entitled to receive dividends, nominee shareholders shall submit the information on their beneficiaries.

Section 13. Register of the Company's shareholders

13.1. The register of the Company's shareholders shall be kept by a Registrar – a professional participant in the securities market, whose duty shall be the keeping of the register of registered securities' holders in accordance with the contract concluded between the Company and the Registrar on the basis of an appropriate resolution by the Company's Board of Directors.

13.2. The Registrar shall, upon the request of a shareholder or a nominal holder of shares, confirm his/her title to shares by providing an extract from the register of the Company's shareholders, such extract not having the status of a security.

13.3. The person whose name is entered in the register of the Company's shareholders shall promptly inform the Registrar of any changes in his details and the details of his beneficiaries. If they fail to provide such information the Company and the Registrar shall not be held responsible for the damages incurred in connection with such failure.

CHAPTER 3. Rights of shareholders

Section 14. Shareholders' Rights – owners of common shares

14.1. Each common share of the Company provides its holder with the equal proprietary and non-proprietary rights, including the right:

- a) to participate in the management of the Company, including participation in the General Meeting of Shareholders with the right to vote on issues within its competence both personally and by proxy;
- b) to receive dividends or, in case of liquidation of the Company, receive a part of its property;
- c) to sell or otherwise dispose of all and any shares in full or in part to other persons in compliance with the procedure stipulated in the applicable legislation;
- d) to receive information on economic and commercial activities of the Company in compliance with the procedure stipulated in the applicable legislation of the Russian Federation and the Charter of the Company.

If the Company distributes voting shares and convertible securities in voting shares paid in cash by means of open subscription, holders of voting shares of the Company shall have the preemptive right to purchase such securities in a amount proportionate to the number of voting shares of the Company held by them.

Additionally distributed shares shall furnish the voting right only after they are fully paid, and the results of their distribution are ratified by the Board of Directors.

CHAPTER 4. General Meeting of Shareholders

Section 15. Supreme management body of the Company

15.1. The Supreme management body of the Company is the General Meeting of Shareholders (hereinafter "General Meeting").

Section 16. Competence of the General Meeting of Shareholders

16.1. Competence of the General Meeting of Shareholders includes:

- 1) Introduction of amendments and additions to the Charter of the Company, or approval of the revised Charter of the Company;
- 2) Reorganization of the Company;
- 3) Liquidation of the Company, appointment of the liquidation commission and approval of interim and final liquidation balance sheets;
- 4) Determination of the number of the Company's Board of Directors, election of its members and early termination of their powers;
- 5) Regulation of the number, par value, categories (classes) of additional shares authorized for issuance and rights represented by such shares;
- 6) Increase of the Company's Charter Capital through an increase of the par value of shares; increase of the Company's Charter Capital by placing additional shares by means of open subscription if the number of shares additionally placed exceeds 25% of common shares already placed by the Company; increase of the Company's Charter Capital by placing shares by means of closed subscription;
- 7) Reduction of the Company's Charter Capital by reducing the par value of shares, by redemption of shares repurchased by the Company and not sold within a year since their repurchase, by redemption of shares purchased by the Company and by redemption of shares to which the Company became entitled on the grounds of them not being paid for; reduction of the Charter Capital of the Company by repurchase of a part of shares by the Company in order to reduce their total number;
- 8) Election of the General Director and early termination of his powers;
- 9) Election of members of the Audit Commission of the Company and early termination of their powers;
- 10) Approval of the Auditor of the Company;
- 10.1) payment (announcement) of dividends on the basis of the first quarter, six months, nine months of a financial year;
- 11) Approval of annual reports, annual accounting records, including profit and loss statements (profit and loss accounts) of the Company and distribution of profit (including payment (announcement) of dividends, except the profit distributed as dividends upon the results of the first quarter, six months, nine months of a financial year) and losses of the Company upon the results of a financial year;
- 12) Determination of the rules for the conduct of the General Meeting of Shareholders;
- 13) Election of members of the Counting Commission and early termination of their powers in case the powers of the Counting Commission are not exercised by the Registrar of the Company in accordance with the requirements of the Federal law "On joint-stock companies";
- 14) Split and consolidation of shares;
- 15) Approval of transactions in cases stipulated in Article 83 of the Federal law "On joint-stock companies";
- 16) Approval of major transactions in cases stipulated in Article 79 of the Federal law "On joint-stock companies";
- 17) Acquisition of outstanding shares by the Company in cases stipulated in the Federal law "On joint-stock companies";
- 18) Decisions on participation in holding companies, financial and industrial groups, associations and other union of commercial organizations;
- 19) Approval of internal documents regulating activities of the Company's bodies;
- 20) Decisions on other issues provided for by the Federal law "On joint-stock companies" and/or this Charter.

16.2. The issues within the competence of the General Meeting of Shareholders may not be transferred to the competence of the executive body of the Company.

The issues within the competence of the General Meeting of Shareholders may not be transferred to the competence of the Board of Directors of the Company, except the issues stipulated in the Federal law "On joint-stock companies".

Section 17. Resolution of the General Meeting of Shareholders

17.1. Shareholders – owners of common shares of the Company – have the right to vote at the General Meeting of Shareholders upon issues put to vote.

17.2. Resolution of the General Meeting of Shareholders upon an issue put to vote shall take effect if passed by the majority of the holders of the Company's voting shares participating in the Meeting, unless otherwise stipulated in the Federal law "On joint-stock companies" and the Charter of the Company.

17.3. Resolutions upon the issues set forward in sub-clauses 2, 6, 14-19 clause 16.1 section 16 chapter 4 of this Charter may be put on the agenda of the General Meeting of Shareholders only upon a corresponding proposal of the Board of Directors.

17.4. The procedure of the General Meeting of Shareholders shall be determined by the Charter and the Regulations of the General Meeting approved by the resolution of the General Meeting of Shareholders.

17.5. The General Meeting of Shareholders may not decide on the issues not included in the agenda or change the agenda.

17.6. Resolutions passed by the General Meeting of Shareholders and the results of voting shall be announced at the General Meeting of Shareholders where the voting took place, or to the shareholders not later than 25 days from the date of the appropriate resolution by publishing them in the newspapers "Gazeta" and "Gazeta MG", and by placing the information on the website of the Open Joint-Stock Company "NLMK".

Section 18. Resolution of the General Meeting of Shareholders adopted by absentee voting

18.1. Resolution of the General Meeting of Shareholders may be adopted without meeting (joint presence of shareholders) by absentee voting (by pole).

Resolution of the General Meeting of Shareholders on such issues as election of the Board of Directors, Audit Commission, approval of the Auditor of the Company and upon the issues stipulated in the sub-clause 11 clause 16.1 section 16 chapter 4 of this Charter may not be adopted by absentee voting (by pole).

18.2. Resolution of the General Meeting of Shareholders adopted by absentee voting is deemed to be valid if the shareholders who participated in such voting together possess more than a half of voting shares of the Company.

18.3. Absentee voting shall be held by means of voting ballots issued in compliance with the requirements of the Charter and the applicable legislation of the Russian Federation. The voting ballot shall, not later than 20 days before the appropriate General Meeting of Shareholders, be mailed or hand-delivered against signature to each person specified in the list of persons entitled to participation in the General Meeting of Shareholders of the Company.

Section 19. Convening of the General Meeting of Shareholders

19.1. Regular Annual General Meetings of Shareholders shall be convoked not earlier than two months and not later than six months after the end of a financial year. Apart from regular annual meetings, Extraordinary General Meetings of Shareholders of the Company may be summoned (hereinafter "Extraordinary Meetings").

19.2. Date, time and place of a general meeting, the arrangement procedure and agenda of a General

Meeting of Shareholders shall be determined by the Board of Directors in accordance with the provisions of the Charter of the Company and the Regulations of General Meeting of Shareholders.

Section 20. Notice of the General Meeting of Shareholders

20.1. The notice of the General Meeting of Shareholders shall be announced to shareholders in accordance with the resolution of the Board of Directors of the Company by publishing such notice in the newspapers "Gazeta" and "Gazeta MG", and by placing the information on the website of the Open Joint-Stock Company "NLMK". The notice of the General Meeting of Shareholders shall be published not later than 30 days before the date of such meeting, unless a longer term is stipulated in the applicable legislation.

Shareholders possessing one or more percent of shares, as well as nominal shareholders shall be notified of the meeting in writing. This notice shall be sent by registered mail within the period specified in this clause.

20.2. Notification of the General Meeting of Shareholders shall contain the following information:

- full corporate name of the Company and its location;
- form of the General Meeting of Shareholders (meeting or absentee voting);
- date, place and time of the General Meeting of Shareholders, or the deadline for accepting voting ballots if the General Meeting of Shareholders is held in the form of absentee voting, mailing address to which the completed ballots shall be mailed;
- the date of compiling a list of persons entitled to participate in the General Meeting of Shareholders;
- the agenda of the General Meeting of Shareholders;
- the procedure of submitting information (materials) for consideration during the arrangement period, and the address (addresses) at which such information is available.

Section 21. Agenda of the General Meeting of Shareholders

21.1. The Board of Directors of the Company shall determine the agenda of the General Meeting of Shareholders during the arrangement period.

Shareholders (shareholder) holding together not less than 2 percent of voting shares of the Company may introduce issues to the agenda of the Annual General Meeting of Shareholders and nominate candidates to the Company's Board of Directors, Audit Commission and Counting Commission of the Company, provided that the number of such candidates does not exceed the number of members in the appropriate body, and the candidate to the position of the General Director. Such nomination proposals shall be received by the Company not later than 30 days after the end of a financial year.

21.2. If the proposed agenda of the Extraordinary General Meeting of Shareholders includes election of members of the Company's Board of Directors, shareholders (shareholder) of the Company possessing in total not less than 2 percent of voting shares of the Company may nominate candidates for election to the Board of Directors of the Company, provided that the number of such candidates does not exceed the number of members in the Board of Directors. Such nomination proposals shall be received by the Company not later than 30 days after the end of a financial year.

21.3. Proposals on including issues into the agenda of the General Meeting of Shareholders and nomination proposals shall be submitted in writing and contain the name(s) of shareholder(s) submitting such proposal, number and category (class) of shares held by them and shall be signed by the shareholder(s).

21.4. Proposals on including issues into the agenda of the General Meeting of Shareholders shall include the text of each of the issues proposed; nomination proposals shall include the name of each of the candidates proposed, name of the authority to which they are nominated, other information concerning such candidates provided for by the internal documents of the Company, and the nominee's written consent to taking the corresponding office. Proposal regarding new issues to the agenda of the General Meeting of Shareholders may include the text of resolution on each of the

issues proposed.

21.5. The Board of Directors of the Company shall consider the received proposals and decide on including them in the specified agenda of the General Meeting of Shareholders within five days from the expiration of terms stipulated in clauses 21.1 and 21.2 of this Section of the Charter. The issue proposed by shareholder(s) shall be added to the agenda of the General Meeting of Shareholders and the nominees shall be put on the list of candidates for election to the appropriate authority of the Company, unless

- shareholder(s) fail to comply with the terms stipulated in clauses 21.1 and 21.2 of this Section;
- shareholder(s) do not hold the voting shares of the Company in an amount stipulated in clauses 21.1 and 21.2 of this Section;
- the proposal does not comply with the requirements stipulated in clauses 21.3 and 21.4 of this Section;
- the issue proposed for the agenda of the General Meeting of the Company's shareholders is beyond its competence and/or does not comply with the requirements of the Federal law "On joint-stock companies" and other legislation of the Russian Federation.

21.6. The motivated resolution of the Board of Directors of the Company rejecting the motion to include the issue in the agenda of the General Meeting of Shareholders or to put a candidate on the list of nominees to the corresponding authority of the Company shall be sent to shareholders (shareholder) who have submitted the issue or nominated the candidate within three days from the date of its passing.

21.7. The Board of Directors may not amend the texts of issues proposed for the agenda of the General Meeting of Shareholders or texts of resolutions thereon.

The Board of Directors may include issues in the agenda of the General Meeting of Shareholders or put candidates on the nominee list at its own discretion in addition to the issues proposed for the agenda of the General Meeting of Shareholders as well as in case there are no such proposals or there are no or not enough candidates nominated by shareholders to appropriate authorities.

Section 22. List of persons entitled to participate in the General Meeting of Shareholders

22.1. The list of persons entitled to participate in the General Meeting of Shareholders shall be compiled on the basis of details in the Shareholders' Register of the Company as of the date specified by the Board of Directors. The date of compiling the list of persons entitled to participate in the General Meeting of Shareholders may not be set before the date of making a decision on holding a General Meeting of Shareholders, less than 45 days or more than 50 days prior to the date of the General Meeting of Shareholders, and if the agenda of the Extraordinary Meeting of Shareholders contains the issue on election of members of the Company's Board of Directors, more than 65 days prior to the date of the General Meeting of Shareholders.

In case of transfer of shares after the date of compiling the list but prior to the date of the General Meeting the person included in the list of persons entitled to participate in the General Meeting shall issue to the purchaser the power of attorney for voting or vote at the General Meeting in accordance with the instructions of the purchaser. This rule shall also apply to each further case of share transfer.

22.2. For the purposes of compiling a list of persons entitled to participate in the General Meeting of Shareholders a nominee shareholder shall submit the information on his beneficiaries as of the date of the list compiling.

22.3. The list of persons entitled to participate in the General Meeting of Shareholders shall contain the name of each of such persons, information necessary for their identification, information on the number and category (class) of shares providing him the right to vote, mailing address in the Russian Federation for sending notifications of the General Meeting of Shareholders, voting ballots

and the report on the results of voting.

The list of persons entitled to participate in the General Meeting of Shareholders shall be submitted by the Company for consideration upon requests of the persons included in that list and holding not less than one percent of the votes. In this case the details of documents and mailing addresses of individuals included in that list may be submitted only with the consent of such individuals.

The Company shall, upon request of any interested person, submit to such person an extract from the list of persons entitled to participate in the General Meeting of Shareholders containing the information on such person or a note that such person is not included in the list of persons entitled to participate in the General Meeting of Shareholders.

22.4. The list of persons entitled to participate in the General Meeting of Shareholders may be amended only to recover infringed rights of the persons not included in the list of persons entitled to participate in the General Meeting of Shareholders as of the date of its compiling or to correct the mistakes made during its compiling.

Section 23. Information to be submitted to shareholders

23.1. Information (materials) subject to submission to the persons entitled to participate in the General Meeting of Shareholders in the course of preparation for the General Meeting of Shareholders shall include: financial statements, including the Auditor's opinion and the Audit Commission's opinion upon the results of audit of the annual financial statements, information on the candidate (candidates) for election to the executive bodies of the Company, the Board of Directors of the Company, the Audit Commission of the Company, the Counting Commission of the Company, draft amendments and additions to the Charter of the Company or the revised draft Charter of the Company, draft versions of internal documents of the Company, draft versions of resolutions of the General Meeting of Shareholders and information (materials) provided for by the Charter of the Company.

The persons entitled to participate in the General Meeting of Shareholders may obtain the said information (materials) for consideration in the premises of the executive bodies of the Company and other places at the addresses specified in the notification of the general meeting of shareholders within 20 days or, if the agenda of the General Meeting of Shareholders contains the issue of reorganization of the Company, within 30 days prior to the General Meeting of Shareholders.

The persons entitled to participate in the General Meeting of Shareholders may obtain the copies of the said documents upon the written request filed with the executive authority of the Company.

Section 24. Voting ballot

24.1. Voting ballot shall be sent or handed over against signature to each of the persons entitled to participate in the General Meeting of Shareholders not later than 20 days prior to the respective General Meeting of Shareholders.

Voting ballot shall be sent by registered mail at the addresses specified in the list of persons entitled to participate in the General Meeting of Shareholders.

24.2. The voting ballot shall contain the following information:

- * full corporate name of the Company and its location;
- * form of the General Meeting of Shareholders (meeting or absentee voting);
- * date, place and time of the General Meeting of Shareholders or deadline for acceptance of voting ballots in case the General Meeting of Shareholders is held in the form of absentee voting, mailing address at which completed ballots may be sent;
- * texts of resolutions on each issue (name of each nominee) voted by this ballot;
- * variants of voting on each issue of the agenda expressed as "yes", "no" or "abstained";
- * note that the voting ballot shall be signed by the shareholder or his proxy.

In case of cumulative voting the voting ballot shall contain the appropriate information and the explanation of the nature of cumulative voting.

Section 25. Quorum of the General Meeting of Shareholders

25.1. The General Meeting of Shareholders is considered valid (has a quorum) in case the shareholders present possess more than a half of votes provided by outstanding voting shares of the Company.

The shareholders are considered present at the General Meeting of Shareholders if they register for participation in that meeting or the ballots of such shareholders are received not later than two days before the date of the General Meeting of Shareholders. In case of absentee voting the shareholders are considered present at the General Meeting of Shareholders if the ballots of such shareholders are received before the deadline for receipt of ballots.

In case the agenda of the General Meeting of Shareholders includes the issues, which shall be voted by different composition of voters, the quorum shall be determined separately in respect of such issues.

25.2. In case there is no quorum for the Annual General Meeting of Shareholders, the second General Meeting of Shareholders with the same agenda shall be held. In case there is no quorum for the Extraordinary General Meeting of Shareholders, the second General Meeting of Shareholders with the same agenda may be held.

The second General Meeting of Shareholders is considered valid (has a quorum) in case the shareholders present possess not less than 30% of votes provided by outstanding voting shares of the Company.

The notification on the General Meeting of Shareholders shall be provided in accordance with the requirements of the Federal law "On joint-stock companies".

25.3. In case the second General Meeting of Shareholders is held less than 40 days after the invalid General Meeting of Shareholders, the list persons entitled to participate in the General Meeting of Shareholders shall be determined in accordance with the list of persons who were entitled to participate in the invalid General Meeting of Shareholders.

Section 26. Voting at the General Meeting of Shareholders

26.1. Voting at the General Meeting of Shareholders shall be held in compliance with the principle "one voting share of the Company – one vote", unless the voting is cumulative.

26.2. In case of voting held by the ballots the votes shall only counted if one of possible voting variants is left. Voting ballots filled in breach of this requirement are considered invalid and the appropriate votes shall not be considered.

In case the voting ballot contains several issues put to a vote, failure to comply with the said requirements in respect of one or several issues does not cause invalidity of the whole voting ballot.

26.3. The results of the voting shall be calculated by the Counting Commission of the Company. The number of members and personal membership of the Counting Commission shall be approved by the General Meeting of Shareholders and remain in force until the election of the new membership of the Counting Commission by the General Meeting of Shareholders. Members of the Board of Directors of the Company, members of the Audit Commission of the Company, members of the Company Management, the General Director and the persons nominated to these offices may not be members of the Counting Commission;

26.3.1. In case the number of shareholders possessing the voting shares exceeds 500 (five hundred), the functions of the Counting Commission of the Company shall be performed by the Registrar.

26.3.2. The Counting Commission shall check the powers of and register persons participating in the General Meeting of Shareholders, determine the quorum of the General Meeting of Shareholders, clarify the issues arising in connection with exercising the voting rights by the shareholders (their proxies) at the General Meeting, clarify the voting procedure upon the issues put to a vote, provide the compliance with the prescribed voting procedure and the observance of

shareholders' voting rights, count the votes and calculate the results of the voting, compile the protocol of the voting, which shall be signed by the members of the Counting Commission, and after that shall transfer the voting ballots to the Company archive.

26.4. The protocol of the voting shall be attached to the minutes of the General Meeting of Shareholders.

26.5. The results of the voting shall be announced at the General Meeting of Shareholders or to shareholders after closing the General Meeting of Shareholders by means of publishing the report on the results of the voting in the newspapers "Gazeta" and "Gazeta MG", and placing the information on the website of Open Joint-Stock Company "NLMK" within 25 days from the date of the respective resolution.

Section 27. Minutes of the General Meeting of Shareholders

27.1. The minutes of the General Meeting of Shareholders shall be compiled within 15 days from the date of closing the General Meeting of Shareholders and in no less than two copies. All copies of the minutes shall be signed by the Chairman of the General Meeting of Shareholders and the Secretary of the General Meeting of Shareholders.

27.2. The minutes of the General Meeting of Shareholders shall contain the following information:

- place and date of the General Meeting of Shareholders;
 - the total number of votes possessed by holders of voting shares of the Company;
 - the number of votes possessed by the shareholders present at the meeting;
 - the Chairman (presidium) and the Secretary (secretariat) of the meeting, the agenda of the meeting.
- The minutes of the General Meeting of Shareholders of the Company shall reflect the executive summaries of speeches, issues put to vote and the results of voting upon such issues, resolutions adopted by the Meeting.

Section 28. Extraordinary General Meeting of Shareholders

28.1. Extraordinary General Meeting of Shareholders shall be held according to the resolution of the Board of Directors of the Company adopted at its own discretion, upon the request of the Audit Commission of the Company, the Auditor of the Company or shareholders (shareholder) possessing not less than 10 percent of voting shares of the Company as of the date of the request. Extraordinary General Meeting of the Company shall be summoned by the Board of Directors of the Company and conducted within 40 days from the date of the request to conduct an Extraordinary General Meeting of Shareholders submitted by the Audit Commission, the Auditor, or shareholders. In case the proposed agenda of the Extraordinary General Meeting of Shareholders contains the issue on election of members of the Board of Directors of the Company, or the Board of Directors of the Company is bound to decide on holding an Extraordinary General Meeting of Shareholders in order to elect members of the Board of Directors of the Company in accordance with the Federal law "On joint-stock companies", such General Meeting of Shareholders shall be held within 70 days from the date of the appropriate request or the resolution of the Board of Directors of the Company on summoning the meeting.

28.2. The request on Extraordinary General Meeting of shareholders shall contain the issues to be included in the agenda of the meeting. The request to hold an Extraordinary General Meeting of shareholders may contain draft texts of resolutions on each of the said issues and proposals on the form of the General Meeting of Shareholders.

The Board of Directors of the Company may not make amendments or additions to texts of issues included in the agenda, draft texts of resolutions on the said issues or change the proposed form of the Extraordinary General Meeting of Shareholders called upon request of the Audit Commission of the Company, the Auditor of the Company or shareholders (shareholder) possessing not less than 10 percent of voting shares of the Company.

28.3. In case the request on the Extraordinary General Meeting of Shareholders is submitted by

shareholder(s), it shall contain the names of shareholder(s) submitting such a request and specify the number and category (class) of shares held by them.

The request on summoning an Extraordinary General Meeting of shareholders shall be signed by the person(s) submitting the request on summoning the Extraordinary General Meeting of shareholders.

28.4. Resolution on the summoning of the Extraordinary General Meeting of shareholders or on the refusal to summon such a meeting shall be passed by the Board of Directors of the Company within five days from the date of the request on summoning an Extraordinary General Meeting of shareholders submitted by the Audit Commission of the Company, the Auditor of the Company or shareholder(s) possessing not less than 10 percent of voting shares of the Company.

Resolution on refusal to summon the Extraordinary General Meeting of Shareholders upon the request of the Audit Commission of the Company, the Auditor of the Company or shareholder(s) possessing not less than 10 percent of voting shares of the Company may be passed in case:

- the procedure of submitting the request on summoning an Extraordinary General Meeting of Shareholders is not complied with;
- shareholder(s) demanding to summon the Extraordinary General Meeting of shareholders do not possess the necessary number of voting shares of the Company;
- none of the issues proposed to be included in the agenda of an Extraordinary General Meeting of Shareholders is referred to its competence and (or) complies with the requirements of the Federal law “On joint-stock companies” and other legal acts of the Russian Federation.

28.5. Resolution of the Board of Directors of the Company on summoning an Extraordinary General Meeting of Shareholders or motivated resolution on refusal to summon such meeting shall be sent to the persons demanding its summons by registered mail within three days from the date of such resolution.

28.6. In case the Board of Directors of the Company has not decided to summon an Extraordinary General Meeting of Shareholders within the prescribed term or has refused to summon such meeting, the Extraordinary General Meeting of Shareholders may be summoned by the bodies and persons demanding its summons.

CHAPTER 5. The Board of Directors

Section 29. General provisions

29.1. The Board of Directors of the Company shall exercise general management of the Company’s activities with the exception of the issues referred by this Charter to the competence of the General Meeting of Shareholders.

29.2. The Board of Directors shall consist of 9 persons.

29.3. The Board of Directors is entitled to form the Committees comprised from the members of the Board of Directors. The establishment and activities’ procedures of the Committees, their functions and powers shall be determined by the appropriate provisions approved by the Board of Directors of the Company.

29.4. In the performance of their duties, members of the Board of Directors may receive remuneration and compensation for all costs arising in connection with exercising the powers of members of the Board of Directors. Amounts of such remunerations and compensation shall be determined by the Regulation on remuneration of members of the Board of Directors approved by the resolution of the General Meeting of Shareholders of the Company.

Section 30. Competence of the Board of Directors

30.1. The Board of Directors of the Company exercise its activities in accordance with the Federal law “On joint-stock companies”, this Charter, Regulation on the Board of Directors approved by the General Meeting of Shareholders of the Company.

30.2. The competence of the Board of Directors of the Company includes the general management of the Company with the exception of the issues referred by this Charter and the Federal law "On joint-stock companies to the competence of the General Meeting of Shareholders.

The following issues shall be within the jurisdiction of the Board of Directors of the Company:

- 1) Definition of the priorities of the Company;
- 2) Convocation of the Annual and Extraordinary General Meeting of Shareholders, unless the Extraordinary General Meeting of Shareholders may be convoked by the bodies and persons demanding its convocation in accordance with the Federal law "On joint-stock companies";
- 3) Approval of the agenda of the General Meeting of Shareholders;
- 4) Setting the date on which the list of persons entitled to participate in the General Meeting of Shareholders shall be compiled and other issues referred to the competence of the Board of Directors of the Company in accordance with the Federal law "On joint-stock companies" and related to preparation and conduct of the General Meeting of Shareholders;
- 5) Preliminary approval of annual reports of the Company and annual accounting reports, including profit and loss statements, upon the results of a financial year;
- 6) Increase of the Charter Capital of the Company through offering additional shares by the Company at the expense of the Company's property within the scope of authorized for issuance shares;
- 7) Increase of the Charter Capital of the Company through offering of additional shares by the Company by means of open subscription if the number of shares additionally placed does not exceed 25 percent of outstanding common shares of the Company;
- 8) Acquisition of shares placed by the Company in accordance with cl.2 art.72 of the Federal law "On joint-stock companies";
- 9) Approval of resolutions on issue of securities, securities issue prospectus, report on the results of issue, making amendments and additions to the said documents;
- 10) Placing bonds and other issued securities by the Company in cases provided for by the Federal law "On joint-stock companies";
- 11) Determining the price (monetary estimation) of property, the price of distribution and redemption of issued securities in cases provided for by the Federal law "On joint-stock companies";
- 12) Acquisition of bonds and other securities placed by the Company in cases provided for by the Federal law "On joint-stock companies";
- 13) Forming the Company Management Board and early termination of its powers, establishing the amount of remunerations and compensation paid to members of the Management Board, conclusion of agreements (contracts) on behalf of the Company with the General Director and members of the Management Board;
- 14) Determining the terms and conditions of contracts with members of the Management Board and the General Director of the Company;
- 15) Issuing recommendations to the General Meeting of Shareholders concerning the amount of remunerations and compensations paid to members of the Audit Commission of the Company and determining the amount of the Auditor's remuneration;
- 16) Issuing recommendations to the General Meeting of Shareholders concerning the amount of dividends on shares and procedure for their payment;
- 17) Issuing recommendations to the General Meeting of Shareholders concerning the procedure for distribution of profit and loss of the Company upon the results of a financial year;
- 18) Application of the Reserve Fund resources and the resources of other funds of the Company;
- 19) Approval of internal documents of the Company, with the exception of internal documents which are subject to approval by the General Meeting of Shareholders in

accordance with this Charter and the Federal law “On joint-stock companies” and other internal documents of the Company which are subject to approval by the General Director and the Management Board in accordance with this Charter;

- 20) Establishing and liquidation of branches and establishing and liquidation of representative offices of the Company, approval of regulations on branches and representative offices, making amendments and additions to such regulations;
- 21) Approval of major transactions in cases provided for by chapter X of the Federal law “On joint-stock companies”;
- 22) Approval of transactions provided for by chapter XI of the Federal law “On joint-stock companies”;
- 23) Approval of the Registrar of the Company and terms and conditions of the contract therewith, termination of contract with the Registrar of the Company;
- 24) Suspension of activities of the General Director;
- 25) Appointment of the interim General Director;
- 26) Deciding on the Company’s participation in other organizations, except participation in holding companies, financial and industrial groups, associations and other unions of commercial companies;
- 27) Formation of Committees by the Board of Directors, approval of internal documents regulating activity of such Committees;
- 28) Other issues in compliance with the Federal law “On joint-stock companies” and this Charter;

30.3. The issues referred to the competence of the Board of Directors may not be delegated to the executive body of the Company.

Section 31. Election of members of the Board of Directors

31.1. Members of the Board of Directors are elected by cumulative voting until the next annual meeting. The candidates who have polled the majority of votes are considered elected to the Board of Directors of the Company.

31.2. In case the annual General Meeting of Shareholders was not held within the periods stipulated in this Charter or the Federal law “On joint-stock companies”, the powers of the Board of Directors of the Company shall terminate, except the powers on arrangement, convocation and conduct of the Annual General Meeting of Shareholders.

31.3. Powers of the Board of Directors may be early terminated in respect of all members of the Board by resolution of the General Meeting of Shareholders.

Section 32. Chairman of the Board of Directors

32.1. The Chairman of the Board of Directors of the Company shall be elected by members of the Board of Directors of the Company from among them by the majority of total number of votes in the Board of Directors.

Members of the Company Management Board may not comprise more than one fourth of the membership in the Board of Directors of the Company. The General Director may not simultaneously be the Chairman of the Board of Directors of the Company.

The Board of Directors may at any time re-elect its Chairman by the majority of votes of members in the Board of Directors if the issue on re-election is included in the agenda of a meeting of the Board of Directors.

32.2. The Chairman of the Board of Directors arranges its work, summons meetings of the Board of Directors and presides at such meetings, arranges for keeping minutes at the meetings, presides at the General Meeting of Shareholders or delegates the powers of presiding at the General Meeting of Shareholders to another member of the Board of Directors.

32.3. In the absence of the Chairman of the Board of Directors, his duties shall be performed by the

Deputy Chairman or by a member of the Board of Directors in accordance with the resolution of the Board of Directors.

Transfer of a vote from one member of the Board of Directors to another member of the Board of Directors is not allowed.

Section 33. Meeting of the Board of Directors

33.1. The Board of Directors operates in the form of meetings held in accordance with the Schedule approved by the Chairman of the Board of Directors. Meetings of the Board of Directors shall be held on a regular basis not less than 6 times per year.

33.2. Meetings of the Board of Directors may be held by absentee voting (by pole) at the discretion of the Chairman of the Board of Directors. The resolution of the Chairman of the Board of Directors on holding a meeting by pole shall contain the text of issues included in the agenda, the form of voting ballot, the list of information (materials) provided to members of the Board of Directors, the date of sending ballots and information materials to members of the Board of Directors, the date and address to which ballots shall be sent. Resolution of the Board of Directors on termination of the powers of the Chairman of the Board of Directors, the Company Management and on other issues provided by subclauses 1-7, 10-15, 21-26 clause 30.2 section 30 chapter 5 of this Charter may not be passed by way of absentee voting.

In case of holding the meeting of the Board of Directors of the Company in the form of absentee vote (by pole) resolution of the Board of Directors is considered passed if it polled a majority of votes given by the elected members of the Board of Directors.

Information on the results of voting shall be provided to the members of the Board of Directors in writing within five days.

33.3. Extraordinary meetings of the Board of Directors may be summoned by the Chairman of the Board of Directors at his own discretion, upon request of a member of the Board of Directors, Audit Commission, Auditor, General Director and shareholders (shareholder) possessing not less than 5 percent of voting shares of the Company. The form of meeting shall be determined by the person demanding the summons of the Board of Directors. The procedure of convocation and conduct of meetings shall be determined by the Board of Directors.

33.4. A member of the Board of Director not present at the meeting of the Board of Directors shall notify the Chairman of the Board of Directors of his absence in good time.

33.5. A member of the Board of Directors not present at the meeting of the Board of Directors may submit to the Chairman of the Board of Directors in good time a resolution in writing on the issues included in the agenda of the meeting of the Board of Directors.

33.6. The quorum for the meeting of the Board of Directors shall not be less than five elected members of the Board of Directors. In case the number of the members of the Board of Directors becomes less than five, the Company shall summon the Extraordinary General Meeting of Shareholders in order to elect new members in the Board of Directors. Remaining members of the Board of Directors may adopt only resolutions on the summons of such Extraordinary General Meeting of shareholders.

33.7. Resolutions at meetings of the Board of Directors shall be adopted by open voting by simple majority of members of the Board of Directors present at the meeting, unless otherwise provided for by this Charter and the Federal law "On joint-stock companies". Each member of the Board of Directors shall have one vote at meetings of the Board of Directors.

33.8. The minutes shall be kept at the meetings of the Board of Directors. The minutes of a meeting of the Board of Directors shall be issued within three days from the date of the respective meeting.

The minutes of the meeting of the Board of Directors shall specify place and date of the meeting, persons present at the meeting, the agenda of the meeting, issues put to a vote, the results of voting upon such issues and the resolutions adopted.

The minutes of the meeting of the Board of Directors shall be signed by the person presiding at the meeting responsible for the completeness of the minutes and by the Secretary of the Board of

Directors and shall have the seal of the Board of Directors of the Company. Opinions of members of the Board present at the meeting shall be submitted in writing, signed by the appropriate members and filed to the minutes.

33.9. The agenda of the meeting of the Board of Directors shall be drafted by the Chairman of the Board of Directors in accordance with proposals of persons entitled to demand the summons of a meeting of the Board of Directors.

33.10. Notifications of meetings of the Board of Directors shall be sent to each member of the Board of Directors personally in writing by registered mail or by wire with return receipt not later than 7 consecutive days prior to the date of the meeting. The notification shall include the information on the date and place of the meeting and the list of issues included into the agenda, which may not be changed afterwards. Information (materials) concerning the issues included in the agenda of the meeting shall be sent to members of the Board of Directors simultaneously with the notification of the meeting of the Board of Directors. In case the meeting of the Board of Directors is summoned in order to consider the issue on the summons of the Extraordinary Meeting of Shareholders, notifications of the meeting of the Board of Directors shall be sent by facsimile not later than 2 days prior to the date of the meeting.

Section 34. Corporate secretary of the Company

34.1. The Board of Directors of the Company shall appoint the Corporate Secretary of the Company (the secretary of the Board of Directors of the Company) as advised by the Chairman of the Board of Directors.

34.2. The Corporate Secretary assists the Chairman of the Board of Directors in convocation and conduct of meetings of the Board of Directors and provides arrangement and holding of the General Meeting of Shareholders in accordance with the requirements of the applicable legislation, the Charter and internal documents of the Company on the basis of the resolution on the General Meeting of Shareholders.

34.3. Activities of the Corporate Secretary of the Company shall be governed by the provisions of the Regulation on the Board of Directors of the Company approved by the General Meeting of Shareholders.

CHAPTER 6. Executive bodies

Section 35. Structure of executive bodies

35.1. Management of the day-today operations of the Company shall be carried out by the single-person executive body of the Company – the General Director and the collegial executive body of the Company – the Management Board.

35.2. The competence of the General Director and the Management Board shall include all issues arising in connection with the management of the day-today operations of the Company, unless such issues are referred to the competence of the General Meeting of Shareholders and the Board of Directors.

The Director General and the Management Board arrange for the execution of resolutions adopted by the General Meeting of Shareholders and the Board of Directors.

35.3. The General Director also performs the duties of the Chairman of the Company Management Board.

Section 36. The General Director

36.1. The General Director shall manage the day-today operations of the Company, arrange for the execution of resolutions adopted by the General Meeting of Shareholders and the Board of Directors.

36.2. Rights and duties of the Director General shall be determined by the applicable legislation of the Russian Federation and the contract concluded with the Company in accordance with this Charter. The contract shall be signed by the Chairman of the Board of Directors on behalf of the Company and may be terminated at any time by resolution of the General Meeting of Shareholders in accordance with the applicable legislation.

The relationships between the Company, the single-person executive body and members of the collegial executive body of the Company shall be governed by the labour legislation of the Russian Federation to the extent it complies with the provisions of the Federal law "On joint-stock companies".

36.3. The Director General shall be elected by the General Meeting of Shareholders for a one-year term, unless otherwise stipulated in resolution of the General Meeting of Shareholders.

36.4. The Board of Directors of the Company may by its resolution suspend the powers of the General Director. The Board of Directors of the Company shall simultaneously with the said resolution pass a resolution on appointment of the Interim General Director and on summoning the Extraordinary General Meeting of Shareholders in order to decide on early termination of powers of the General Director and election of the new General Director or transfer of powers of the General Director to a managing organization or an executive manager.

The said resolutions shall be passed by the majority of three fourth of members of the Board of Directors, provided that the votes of the present members of the Board of Directors are disregarded.

The Interim Director General of the Company exercises the management of the day-to-day operations of the Company within the competence of the Director General provided for by this Charter and bears the responsibility stipulated in this Charter for the Director General.

Section 37. Competence of the General Director

37.1. The competence of the Director General includes all issues arising in connection with the management of day-to-day operations of the Company, unless such issues are referred to the exclusive competence of the General Meeting of Shareholders, the Board of Directors or the Management Board.

37.2. The General Director may act on behalf of the Company without the power of attorney and is entitled to:

- provide operative management of the Company;
- put the first signature on financial documents;
- represent the Company's interests both in the Russian Federation and abroad;
- approve the personnel list, conclude labour agreements with employees of the Company, dismiss, award and fine such employees;
- control the work of the Management Board and preside at its meetings;
- submit the composition of the Management Board for approval to the Board of Directors;
- make transactions on behalf of the Company, unless otherwise stipulated in the Federal law "On joint-stock companies" and this Charter;
- issue powers of attorney on behalf of the Company;
- open bank accounts of the Company;
- arrange keeping of books and records of the Company;
- issue orders and instructions which are binding for all employees of the Company;
- determine the scope of information which constitutes the trade secret of the Company and remedies for such information in accordance with the applicable legislation;
- approve the internal documents of the Company governing current activity of the Company, unless the approval of such documents is referred to the competence of the Management Board of the Company.

37.3. The General Director may appoint the Deputy General Director with the prior consent of the Chairman of the Board of Directors for the period of his absence.

Section 38. Management Board

38.1. The Management Board is the collegial executive body of the Company and acts in accordance with the Federal law "On joint-stock companies", the Charter of the Company and the Regulation on the Management Board of the Company approved by the General Meeting of Shareholders.

38.2. The structure and membership of the Management Board are as advised by the Director General. The contract with each member of the Management Board shall be concluded by the Chairman of the Board of Directors in accordance with the applicable legislation and may be terminated at any time by resolution of the Board of Directors.

38.3. The exclusive competence of the Management Board of the Company includes:

- elaboration of the development strategy of the Company and submitting it for consideration of the Board of Directors;
- approval of transactions with the assets of the Company provided that the payment under such transaction or value of property, which is the subject of the transaction exceeds 10 percent of book value of the Company's assets, except the transactions made in the normal course of business;
- approval of internal labour regulations and other internal acts according to the list determined by the Director General;
- conclusion of the collective agreement with the staff of the Company (its authorized body);
- other issues referred to the competence of the Management Board of the Company by the applicable legislation of the Russian Federation.

38.4. The quorum for meetings of the Management Board shall be determined by the Regulation on the Management Board of the Company and may not be less than a half of members. In case the number of members of the Management Board becomes less than the said quorum, the Board of Directors of the Company shall pass a resolution on forming the new Management Board.

The minutes shall be kept at meetings of the Management Board. The minutes of the meeting of the Management Board shall be made available to members of the Board of Directors of the Company, the Audit Commission of the Company or the Auditor of the Company upon request.

Meetings of the Management Board shall be arranged by the Chairman of the Management Board – the General Director or other person performing his duties.

Transfer of vote by a member of the Management Board to another person, including a member of the Management Board, is not allowed.

38.5. Members of the Management Board of the Company shall be governed by the special labour regulation provisions stipulated in the Chapter 43 of the Labour Code of the Russian Federation for a head of an organization.

CHAPTER 7. Responsibility of members of executive bodies of the Company

Section 39. Responsibility of members of the Board of Directors, members of the Management Board and the General Director of the Company

39.1. Members of the Board of Directors, members of the Management Board, the General Director of the Company shall exercise their rights and perform their duties fairly, reasonably, for the benefit of the Company and in accordance with the applicable legislation of the Russian Federation and the Charter of the Company.

39.2. Members of the Board of Directors, members of the Management Board and the General Director of the Company are responsible to the Company for damages incurred by the Company through their fault (failure to perform or improper performance of their duties, breach of the legislation, the Charter of the Company and resolutions of general meetings) or omissions in accordance with the applicable legislation, unless other grounds and measure of responsibility are provided for by Federal laws.

However, members of the Board of Directors and members of the Management Board, who voted

against the resolution which had caused such damages to the Company or did not participate in that voting shall not be held responsible to the Company.

39.3. In case several members of the Board of Directors or the Management Board of the Company are responsible to the Company, they shall bear joint responsibility.

39.4. The person performing duties of the General Director or a member of the Management Board may only participate in management bodies of other organizations (overlap offices) with the consent of the Board of Directors.

CHAPTER 8. Major transactions. Interest in a transaction conducted by the Company

Section 40. Major transaction

40.1. The transaction (including loan, credit, pledge, suretyship) or several related transactions connected with Company's acquisition, disposal or possibility to dispose, either directly or indirectly, of the property with the value equal to 25 or more percent of the book value of the Company's assets, provided that such book value shall be determined with respect to the data of its records at the last reporting date, except the transactions made in normal course of business of the Company, transactions connected with distribution of common shares of the Company by means of subscription (sale) and the transactions connected with distribution of issued securities convertible to common shares of the Company, is considered a major transaction.

In case of disposal or possibility of disposal of property the value of such property compared to the book value of the Company's assets shall be the value of the said property determined with respect to the data of accounting records; in case of acquisition of property such price shall be the acquisition price of the said property.

40.2. For the purposes of passing a resolution by the Board of Directors of the Company and the General Meeting of Shareholders on approval of a major transaction the price of the disposed or acquired property (services) shall be determined by the Board of Directors in accordance with the article 77 of the Federal law "On joint-stock companies".

Section 41. Procedure of approval of a major transaction

41.1. A major transaction shall be approved by the Board of Directors of the Company or the General Meeting of Shareholders.

41.2. Resolution on approval of a major transaction made in respect of the property with the value of 25 to 50 percent of the book value of the Company's assets shall be adopted by the unanimous resolution of the Board of Directors of the Company, provided that the votes of retired members of the Board of Directors are disregarded.

In case there is no unanimous opinion in the Board of Directors of the Company, the issue on approval of a major transaction shall be transferred to the General Meeting of Shareholders by resolution of the Board of Directors of the Company. In this case a resolution on approval of a major transaction shall be passed by the General Meeting of Shareholders of the Company by a majority of votes of shareholders possessing voting shares and present at the General Meeting of Shareholders.

41.3. Resolution on approval of a major transaction in respect of the property with the value of more than 50 percent of the book value of the Company's assets shall be passed by the General Meeting of Shareholders by a majority of three fourths of votes given by shareholders possessing voting shares and present at the General Meeting of Shareholders.

41.4. The resolution on approval of a major transaction shall specify its party (parties), beneficiary (beneficiaries), price, subject of a transaction and other essential conditions.

Section 42. Interest in a transaction made by the Company

42.1. In case a member of the Board of Directors, the General Director, the Interim General Director or the Deputy General Director, managing organization or the executive manager, a member of the Management Board of the Company or a shareholder of the Company possessing together with his affiliated persons 20 or more percent of voting shares of the Company and persons entitled to give binding instructions to the Company are considered interested in a transaction (including loan, credit, pledge, shuretyship), such transaction is subject to prior approval by the Board of Directors of the Company or the general General Meeting of Shareholders.

42.2. Resolution on approval of an interested-party transaction shall be passed by the Board of Directors of the Company, unless otherwise stipulated in the Federal law "On joint-stock companies". Such resolution shall be passed by the Board of Directors of the Company by a majority of votes of directors not interested in that transaction.

The independent director is deemed to be a member of the Board of Directors of the Company who is not, and has not been within a year prior to passing the appropriate resolution -

- the General Director, the Interim General Director or the Deputy General Director, the executive manager of the Company, a member of the Management Board, a person holding offices in management bodies of the managing organization;
- a person whose spouse, parents, children, full-blood and half-blood brothers and sisters, adoptive parents and adoptees are persons holding offices in the said management bodies of the Company, managing organization of the Company or holding the office of the executive manager of the Company;
- an affiliated person of the Company other than a member of the Board of Directors of the Company.

42.3. Resolution on approval of an interested-party transaction shall be passed by the General Meeting of Shareholders by a majority of votes of all shareholders not interested in a transaction and possessing voting shares in case a transaction or several related transactions are made in respect of the property with the book value (quotation price of the acquired property) of 2 or more per cent of the book value of the Company's assets according to the data of its records at the last reporting date, except the transactions provided for by the Federal law "On joint-stock companies".

42.4. An interested-party transaction does not require approval of the General Meeting of Shareholders in case the terms and conditions of such transaction have no substantial differences as compared to the terms and conditions of similar transactions between the Company and the interested party in the normal course of business of the Company prior to recognizing the said person as an interested party. This exception applies only to the interested-party transactions made within the period from the moment of recognizing the person as an interested party to the date of the next Annual General Meeting of Shareholders.

42.5. Resolution on approval of an interested-party transaction shall specify its party (parties), beneficiary (beneficiaries), price, subject of a transaction and other essential conditions.

The General Meeting of Shareholders may by its resolution approve a transaction (transactions) between the Company and an interested party, which may be made in future in the normal course of business of the Company. In this case resolution of the General Meeting of Shareholders shall also specify the maximum amount of such transaction (transactions). This resolution remains in force until the next Annual General Meeting of Shareholders.

42.6. For the purpose of passing a resolution by the Board of Directors of the Company and the General Meeting of Shareholders on approval of an interested-party transaction the price of the disposed or acquired property (services) shall be determined by the Board of Directors in accordance with the article 77 of the Federal law "On joint-stock companies".

CHAPTER 9. Audit Commission of the Company

Section 43. Formation and competence of the Audit Commission

43.1. The Audit Commission provides control over financial and economic activities of the Company.

Members of the Audit Commission of the Company may receive remunerations and remunerations for the expenditures arising from the performance of their duties according to resolution of the General Meeting of Shareholders. Amounts of such remunerations and compensations shall be determined by resolution of the General Meeting of Shareholders.

43.2. The Audit Commission of the Company consists of five persons, is elected for one year term and operates in accordance with the Regulation on the Audit Commission approved by the General Meeting of Shareholders as advised by the Board of Directors.

In case the number of members of the Audit Commission becomes less than three persons, the Board of Directors shall call the Extraordinary General Meeting of Shareholders in order to elect the new membership of the Audit Commission, which remains in force until the ordinary General Meeting of Shareholders of the Company.

43.3. The Regulation on the Audit Commission stipulates the procedures of the Audit Commission's operation, powers of its members, composition, amount and payment procedure of remuneration and compensation to members of the Audit Commission.

43.4. Members of the Audit Commission may not at the same time be members of the Board of Directors of the Company and hold other offices in management bodies of the Company.

Shares held by members of the Board of Directors of the Company or by persons holding offices in management bodies of the Company may not participate in the voting for election of members of the Audit Commission.

Section 44. Inspection (revision) of financial and economic activities of the Company

44.1. Inspection (revision) of financial and economic activities of the Company is performed upon the results of activity for a year or at any time at the discretion of the Audit Commission of the Company and according to resolution of the General Meeting of Shareholders, the Board of Directors or upon the request of shareholder(s) possessing not less than 10 percent of voting shares of the Company.

44.2. Persons holding executive positions of the Company shall submit the documents and/or provide reports on financial and economic activities of the Company upon request of the Audit Commission of the Company.

CHAPTER 10. Accounting and records. Auditor of the Company

Section 45. Accounting and financial statements of the Company

45.1. The Company shall keep its books and records and submit the financial statements within the procedure provided for by the applicable legislation of the Russian Federation and this Charter.

45.2. The Director General is responsible for arrangement, condition and reliability of the Company's accounting.

45.3. Reliability of information contained in the annual report of the Company and annual financial statements shall be confirmed by the Audit Commission of the Company.

45.4. Annual report is subject to prior approval by the Board of Directors of the Company not less than 30 days prior to the date of the Annual General Meeting.

Section 46. Documents keeping

46.1. The Company shall keep documents provided for by the Federal law "On joint-stock companies" at the location of its management body within the procedure and terms determined by the federal authority for the securities market.

Section 47. Information on activity of the Company

47.1. The Company shall disclose:

- annual report of the Company and annual financial statements;
- issue prospectus in respect of the Company's shares in cases provided for by the legislation of the Russian Federation;
- notification of the General Meeting of Shareholders within the procedure provided for by the Federal law "On joint-stock companies";
- other information determined by the federal authority for the securities market.

47.2. The Company shall upon request of shareholders provide them paid access to copies of documents specified in clause 1 article 89 of the Federal law "On joint-stock companies", except the accounting documents and minutes of meetings of the Company's collegial executive body.

The procedure of providing shareholders with the copies of the said documents is governed by the appropriate Regulation approved by the Board of Directors of the Company.

Section 48. Auditor of the Company

48.1. The General Meeting shall approve the Auditor of the Company as advised by the Board of Directors to perform inspection of financial and economic activities of the Company in accordance with the contract between the Auditor and the Company.

48.2. The amount of the Auditor's remuneration and other essential conditions of the contract shall be determined by the Board of Directors of the Company.

CHAPTER 11. Branches and representative offices

Section 49. Legal status of branches and representative offices

49.1. The Company may establish branches and representative offices by resolution of the Board of Directors in the territory of the Russian Federation and abroad in compliance with the requirements of the Russian and foreign laws.

49.2. Branches and representative offices have no status of legal entities, act in accordance with the Regulation approved by the Board of Directors, perform the functions of the Company and protect its interests.

Section 50. List of branches and representative offices.

50.1. At the moment of registration of this Charter the Company has the following branches and representative offices:

1. Far East branch "NLMK – DV" located at: Russia, Vladivostok, ul. Uborevicha, 15.
2. Representative office of the Open Joint-Stock Company "NLMK" in Moscow located at: Moscow, Kotelnicheskaya naberezhnaya, 1/15, bld. B.
3. Representative office of the Open Joint-Stock Company "NLMK" in Novokuznetsk located at: Novokuznetsk, ul. Kirova, 133.

(in the wording of amendments approved by the decision of NLMK Board of Directors, Minutes No. 128 of June 14, 2005)

CHAPTER 12. Liquidation and reorganization of the Company

Section 51. Liquidation of the Company

51.1. The Company may be liquidated in the following cases:

* by resolution of the General Meeting of Shareholders;

* by court decision in accordance with the applicable legislation of the Russian Federation.

51.2. In case of liquidation of the Company the General Meeting of Shareholders of the Company shall pass a resolution on liquidation of the Company and appoint the liquidation commission as advised by the Board of Directors.

51.3. The liquidation commission exercises all powers on management of the Company's activities from the moment of its appointment. The liquidation commission appears before the court on behalf of the Company.

51.4. The liquidation commission performs the following:

- publication of notification of the Company's liquidation and procedure and terms for claims filing by creditors in the official media at the location of the Company. The commission shall provide for the first publication in media not later than a week after its forming and repeat this publication in not less than forty days.

- arrangement of work on recovery of the Company's receivables and exposure of the creditors' claims.

51.5. Upon expiration of the term for creditors' claims the liquidation commission shall draft the interim liquidation balance sheet containing information on composition of the Company's property, claims of creditors and results of their consideration. The interim liquidation balance sheet shall be approved by the General Meeting of Shareholders.

51.6. In case the Company's monetary funds are not enough to satisfy the creditors, the liquidation commission shall arrange for the public sale of other property of the Company within the procedure established for execution of court decisions.

Sale of encryption equipment and strategic facilities may be effected only with the consent of the Federal Agency for Government Communications and Information under the President of the Russian Federation and the authorized federal bodies.

51.7. Upon completion of settlements with the creditors the liquidation commission shall draft the liquidation balance sheet subject to approval by the General Meeting of Shareholders.

51.8. The remaining assets shall be distributed between shareholders within the procedure stipulated in this Charter.

51.9. The Company is considered liquidated from the moment of making the appropriate entry in the Uniform State Register of Legal Entities by the state registration authority.

51.10. The Company shall transfer the documents to the State Archive of the Lipetsk Region simultaneously with making the entry on liquidation in the Uniform State Register of Legal Entities. The list of such documents shall be drafted in compliance with the applicable legislation of the Russian Federation.

Section 52. Reorganization of the Company

52.1. The Company may be reorganized by merger, split-off and transformation in compliance with the procedure stipulated in the applicable legislation of the Russian Federation.

Section 53. Other provisions

53.1. Any other activities of the Company not covered by this Charter shall be governed by the applicable legislation of the Russian Federation.

APPROVED

by the Annual General Shareholders Meeting
of the Open Joint Stock Company
"Novolipetsk Iron and Steel Corporation"

1.3. Information on auditor (auditors) of the Issuer.

1. An Auditor who renders services on independent auditing of accounting and financial statements having been prepared under the legal requirements of the Russian Federation:

Full name: *Closed joint-stock firm "Auditing Firm "FinEscort"*

Abbreviated name: *ZAO "AF "FinEscort"*

Domicile: *Bldg 1, 13/14, ul. Sadovaya Samotechnaya 103473 Moscow, Russia*

Tel. *(095)-956-16-14*

Fax: *(095)-234-49-29*

E-mail: finescort@fbk.ru

Auditor's license data:

License No: *E000004*

Issue date: *10.04.2002*

Validity: *within 5 years*

Licenser: *the Finance Ministry of the RF*

The Financial Statements for the following financial years have been audited by the auditor: *1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004.*

Factors that could affect Auditor's independence from the Issuer and measures taken by the Issuer and Auditor to reduce influence of the stated factors:

There are no factors that could affect Auditor independence from the Issuer.

Procedure of Auditor appointment:

An Auditor is appointed by the General Shareholders' Meeting upon presentation of the Board of Directors. Preparation of recommendations on the Company's Auditor for the Board of Directors is effected by the Commission on Auditing. Tender related to Auditor selection can be provided for. The main tender rules on the Company's Auditor appointment, in case such is held, are determined by the Commission on Auditing.

Information on projects executed by Auditor within special auditorial tasks:

Auditor did not execute any projects apart of his direct functions on auditing accounting statements.

Information on any material interests which bind Auditor (Auditor's officers) with the Issuer (the Issuer's officers):

There are no interests which bind Auditor (Auditor's officers) with the Issuer (the Issuer's officers), in particular:

- *Auditor (Auditor's officers) does not have any share in the Issuer's stockholder capital;*
- *the Issuer did not grant any loans to Auditor (Auditor's officers);*
- *there is no close partnership (promotion of the Issuer's products (services), joint ventures, etc.), as well as kinship;*
- *there are no the Issuer's officers being simultaneously the Auditor's officers.*

Procedure of Auditor's fee definition:

The Company's Board of Directors shall define fee for Auditor's services and any other essential conditions of agreement.

Information on deferred and late payments for services rendered by Auditor:

There are no deferred and late payments for services rendered by Auditor.

2. Auditor who renders services on auditing of Consolidated Financial Statements under US GAAP:

Full name: *Closed joint-stock firm «PricewaterhouseCoopersAudit»*

Abbreviated name: *ZAO PricewaterhouseCoopersAudit*

Domicile: *Bldg 5, 52, Kosmodamianskaya naberezhnaya 115054 Moscow Russia*

Tel: *(095)-967-60-00*

Fax: *(095)-967-60-01*

E-mail: webmaster@pwc.com

Auditor's license data:

License No: *E000376*

Issue date: *20.05.2002*

Validity: *within 5 years*

Licenser: *the Finance Ministry of the RF*

The Financial Statements have been audited under US GAAP by the auditor for the following financial years: *2003, 2004.*

Factors that could affect Auditor's independence from the Issuer and measures taken by the Issuer and Auditor to reduce influence of the stated factors:

There are no factors that could affect Auditor independence from the Issuer.

Procedure of Auditor appointment:

An Auditor is appointed by the General Shareholders' Meeting upon presentation of the Board of Directors. Preparation of recommendations on the Company's Auditor for the Board of Directors is effected by the Commission on Auditing. Tender related to Auditor selection can be provided for. The main tender rules on the Company's Auditor appointment, in case such is held, are determined by the Commission on Auditing.

Information on projects executed by Auditor within special auditorial tasks:

Auditor did not execute any projects apart of his direct functions.

Information on any material interests which bind Auditor (Auditor's officers) with the Issuer (the Issuer's officers):

There are no interests which bind Auditor (Auditor's officers) with the Issuer (the Issuer's officers), in particular:

- *Auditor (Auditor's officers) does not have any share in the Issuer's stockholder capital;*
- *the Issuer did not grant any loans to Auditor (Auditor's officers);*
- *there are no close partnership (promotion of the Issuer's products (services), joint ventures, etc.), as well as kinship;*
- *there are no Issuer's officers being simultaneously Auditor's officers.*

Procedure of Auditor fee definition:

The Company's Board of Directors shall define fee for Auditor's services and any other essential conditions of agreement.

Information on deferred and late payments for services rendered by Auditor:

There are no deferred and late payments for services rendered by Auditor.

1.4. Information on appraiser.

The Issuer did not enlist services of an Appraiser (Appraisers) regarding securities issue, information on which is presented in this Quarterly Report.

Information on appraiser being involved by NLMK for fixed assets revaluation as of 01.01.2000:

Full name: *Closed joint-stock company «Center of professional appraisals»*

Abbreviated name: *ZAO «Center of professional appraisals»*

Domicile *49, Leningradsky prospekt 125468 Moscow Russia*

Tel: *(095)-943-95-40*

Fax: *(095)-943-93-28*

E-mail: *no data*

Data on appraiser's license:

License No.: *series ИЦСС Registration No. 000004 code ОИ*

Issue date: *June 30, 1999.*

Validity: *June 30, 2000.*

Licenser: *Licensing Chamber with Moscow Government*

Information on services rendered by the appraiser: *appraisal of fixed assets full replacement cost has been performed as of 01.01.2000*

1.5. Information on the Issuer's advisers.

Financial adviser who renders consulting services in securities market:

Full name: *Closed joint-stock company "Renaissance Capital"*

Abbreviated name: *ZAO "Renaissance Capital"*

Domicile: *4th floor, Usadba Centr 22, Voznesensky pereulok Moscow 125009, Russia*

Tel: *(095)-258-77-77*

Fax: *(095)-258-77-78*

Web-site in Internet where the financial adviser discloses information on the Issuer: www.rencap.com

Data on licenses of professional activity in securities market:

License of securities market participant for brokerage

License No.: *177-05370-100000*

Issue date: *July 12, 2001*

Validity: *unlimited*

Licenser: *Federal Committee on securities market*

License of securities market participant for dealer activity

License No.: *177-05386-010000*

Issue date: *July 12, 2001*

Validity: *unlimited*

Licenser: *Federal Committee on securities market*

Services rendered (having been rendered) by the Adviser:

- *assistance to the Issuer in preparation of securities offering circular;*
- *verification of authenticity and completeness of all information from Securities Offering Circular, with exception of audited one;*
- *attestation of Securities Offering Circular as well as documentation that might deem necessary for the Issuer in order to arrange circulation of shares with traders;*
- *consultations on issues related to preparation of Securities Offering Circular, any other documentation pertained to arrangement of shares circulation and the Issuer going through listing procedure;*
- *consultations on issues related to disclosure by the Issuer of information in securities market and monitoring over discharge by the Issuer of his liabilities pertaining to disclosure of information in securities market according to requirements of Federal authority on securities market.*

1.6. Information on other persons who signed this Quarterly Report.

There are no such persons.

II. Main information on the Issuer's financial performance.

2.1. Financial and economic indices of the Issuer's activity.

* in 2003-2004 and in the I quarter of 2005 NLMK had no loans and credits

For calculation of the a/m indices methods recommended by the Provision on information disclosure by Issuers of securities approved by Resolution Nr. 03-32/nc. dd. July 2, 2003 of Federal Committee of Central Bank.

Analysis of the a/m indices movement attests the stable financial state and solvency of the Issuer in view of stable net assets growth, increase of own capital and its share in sources of finance as well as quite high level of indices of the Issuer's performance.

Increase in the Issuer's net assets amounted to:

23% – as of 31.12.2001 regarding the level of 31.12.2000, which is related to cash and short-term financial investments increase and long-term financial investments growth;

51% – as of 31.12.2002 regarding the level of 31.12.2001, which is caused by:

- growth of construction in progress, long-term financial investments as well as cash and short-term financial investments increase;*
- reduction of the Company's long-term investments amount (note loan repayment);*
- 45% – as of 31.12.2003 regarding the level of 31.12.2002, which is related to short-term financial investments increase, growth of short-term accounts receivable and funds amount;*
- 62% – as of 31.12.2004 regarding the level of 31.12.2003, which is primarily caused by long-term financial investments increase (investments in subsidiaries), growth of short-term financial investments (short-term currency deposits) and fixed assets.*

Net assets amount as of 31.03.2005 increased by 10.5% as compared to the respective indice as of 31.12.2004, which is primarily caused by the increase in accounts receivable, long-term and short-term financial investments and construction in progress.

Indice “relation of debt funds to capital and reserves” for the period of 2000-2002 was steadily decreasing. This positive fact is primarily accounted for by own capital increase at the expense of accumulated profit. Apart from it the amount of loan capital (note loan repayment) decreased within the period of 2000 – 2002.

Insignificant increase of the indice as of 31.12.2003 (up to 9.8%) is related to the Issuer's accounts payable increase and long-term liabilities growth (which is caused by deferred tax liabilities reflection in the Issuer's statement in accordance with new Accounting Rules of the RF).

The indice “relation of debt funds to capital and reserves” decreased by 8.3 % as of 31.12.2004, which is accounted for by significant increase of own capital.

In the I quarter the indice “relation of debt funds to capital and reserves” decreased regarding its level as of 31.12.2004 and amounted to 7.2%. It is primarily accounted for by own capital increase at the expense of accumulated profit and by certain decrease of short-term liabilities.

The current indices attest to an insignificant amount of loan funds in the Company's capital, and consequently, to a low degree of NLMK dependence on loan funds.

The loan funds structure is mainly made up of NLMK's short-term liabilities.

As of 31.12.2001 the correlation of short-term liabilities and own capital increased from 14.7% to 19.0% due to the growth of short-term loan capital (by 1.6 fold) as a result of note loan reflection repaid in 2002 as part of short-term liabilities.

Within 2002–2004 the indice of correlation of short-term liabilities and own capital decreased as a result of significant own capital increase. Apart from it, in 2002 upon the note loan repayment the Issuer's short-term liabilities amount decreased (-28% by 2001).

Net assets turnover

Net assets turnover in 2001 decreased as compared to 2000 (to 1.38 fold per year) as a result of growth of net assets average amount by 41% upon sales proceeds reduction by 4%.

In 2002–2003 net assets turnover ration didn't see any significant changes, which is related to comparable growth rates of net assets and sales proceeds.

In 2004 there was certain increase in NLMK's usage of the available resources, net assets turnover ratio reached 1.48.

The I quarter 2005, however, saw a slow-down of net assets turnover which amounted to 1.2 (upon conversion to annual values) and 0.3 as compared to 0.36 of the 4 quarter 2004.

Accounts payable turnover

Accounts payable turnover increased in 2001 (to 10.42 fold per year) regarding the 2000 indice, which is related to sales cost value increase by 17% upon the growth of average amount of accounts payable by 10%.

In 2002 accounts payable turnover ratio decreased (to 9.80) as compared to 2001 as a result of growth of the average amount of accounts payable (+26) which outruns sales cost value (+18%).

The insignificant decrease of accounts payable turnover in 2003 (to 9.03 fold per year) regarding the 2002 indice is caused by the growth of amount of accounts payable by 38% upon the sales cost increase by 28%.

In 2004 accounts payable turnover ratio increased (to 9.61) as compared to 2003 as a result of advanced growth of sales cost value (+46) as compared to the growth of the average amount of accounts payable (+37).

Accounts payable turnover in the I quarter of 2005 accelerated to 2.49 overturns per quarter as compared to 2.38 overturns of the IV quarter of 2004.

Accounts receivable turnover

Accounts receivable turnover in 2001 decreased (to 5.76 fold per year) regarding the 2000 indice, which is caused by growth of the average amount of short-term accounts receivable by 6% and decrease of sales proceeds by 4%.

Accounts receivable turnover in 2002 increased (to 8.22 fold per year) regarding the 2001 indice as a result of significant sales increase (+43%).

In 2003 the indice of accounts receivable turnover increased as compared to 2002 and amounted to 9.58. Accounts payable turnover ratio increase was facilitated by sales proceeds growth (+41%) outrunning the growth of the average amount of accounts receivable (+21).

The indice of accounts receivable turnover in 2004 increased significantly (to 11.46 fold per year) regarding the 2003 indice as a result of significant sales proceeds growth (+68%) upon accounts receivable growth by 38%.

In the I quarter of 2005 accounts receivable turnover ratio decreased slightly regarding the IV quarter of 2004 and amounted to 2.15 (the IV quarter of 2004 – 2.35.)

2.2. The Issuer's market capitalization.

The Issuer's total shares outstanding – 5 993 227 240.

Starting from November 23, 2004 common stock of NLMK listed on "OAO RTS Exchange Market"(ticker symbol - NLMKG).

The value of NLMK capitalization calculated on the basis of the Exchange data as of 31.03.2005 amounted to 218 178 703 023 rubles (determined on the basis of RTS data on market prices of shares traded at the Exchange and calculated according to Russian Central Bank Financial Committee (FKZB) Decree Nr. 03-52/nc dd. 24.12.2003 "On approving the order of calculation of issued securities market price and investment shares of investment funds accepted for circulation through trading organizers and on establishing limits of market price fluctuations").

Starting from January 14, 2005 NLMK's common stock (ticker symbol – NLMK) was included into quotation list "B" of Securities List ("Classical shares market") admitted to trading at NP "RTS Stock Exchange".

The value of NLMK capitalization calculated on the basis of the Partnership data as of 31.03.2005 amounted to 7 856 102 063 USD (determined solely for information purposes upon RTS data on the price of shares traded at the Partnership and may not coincide with the appraisal of the Issuer's property complex).

It should be noted that information on indicative quoting of the Issuer's common stock starting from November 5, 2003 is reflected in «RTS Board» (ticker symbol – nlmk), as these data are not official quotations of securities, they cannot be used for calculation of market capitalization of the Company.

2.3. The Issuer's liabilities.

2.3.1. Accounts payable.

<i>thousand rubles</i>						
	<i>As of 31.12.2000 z.</i>	<i>As of 31.12.2001 z.</i>	<i>As of 31.12.2002 z.</i>	<i>As of 31.12.2003 z.</i>	<i>As of 31.12.2004 z.</i>	<i>As of 31.03.2005 z.</i>

*- other accounts payable are made up of other liabilities

NLMK's accounts payable for the last complete five financial years and as of 31.03.2005 do not incorporate creditors whose share amounts to not less than 10 per cent of the total accounts payable.

There are no obligations unfulfilled by the Issuer as of the date of complete reporting period end and making up 5 % or more of the Issuer's assets book value as of the end of the complete reporting quarter preceding the last reporting quarter end.

2.3.2. The Issuer's credit history.

In the 2000-2004 and in the I quarter of 2005 credit facilities agreements and contracts of debt with amount of principal debt of 10 per cent and over of net assets value were not entered. Borrowings were not taken.

2.3.3. The Issuer's commitments on security to third parties.

	<i>thousand rubles</i>					
	<i>For 2000</i>	<i>For 2001</i>	<i>For 2002</i>	<i>For 2003</i>	<i>For 2004</i>	<i>For quarter I, 2005</i>
<i>Commitments on security to third parties, total</i>	<i>95 840</i>	<i>2 720 114</i>	<i>526 941</i>	<i>1 782 194</i>	<i>1 011 632</i>	<i>52</i>

There were no liabilities for security to third parties in the reporting quarter inclusive of guarantee or pawn being not less than 5 percent of the Company's assets book value.

2.3.4. Other commitments of the Issuer.

There were no other commitments of the Issuer as of the date of reporting quarter end.

2.4. Purposes of issue and use of funds gathered from securities distribution.

The Company did not issue any securities distributed by subscription since the date of its registration. So the Company did not attract funds by distribution of securities.

2.5. Risks related to acquisition of distributed (being distributed) issuing securities.

Acquisition of NLMK's securities entails certain risks which could result in losses for shareholders. Negative impact on the Issuer's main activity and financial performance can be produced by the following risks:

- *industry risk;*
- *country and regional risks;*
- *financial risks;*
- *legal risks; and*
- *risks related to the Issuer's activity.*

2.5.1. Industry risks

NLMK actively operates in domestic and international markets as a producer and seller of the diversified metal products mix. The situation in the industry can worsen due to worsening of situation both in raw materials purchasing markets and steel products sales markets.

Worsening of situation in raw materials purchasing markets is possible due to the following:

- *breach of obligations on the part of raw materials suppliers*
 - *raw materials price increase (including transportation rates increase)*
- Implementation of an efficient raw materials supply strategy enables to minimize risk of financial losses due to slow deliveries by means of extra raw materials inventories formation. Contracts for raw materials supply are concluded with trusted permanent partners. Trusted suppliers shall guarantee both delivery schedule observation and raw material quality.*

In order to eliminate risks of unforeseeable growth of raw materials prices or transportation tariffs, monitoring of domestic and foreign raw material, material and equipment markets is being conducted; collaboration with natural monopolies is being maintained.

Basic reasons for worsening of situation at steel products steel markets can be the following:

- *decrease of prices for metal products;*
- *restriction of international markets*

NLMK's activity is directly dependent on steel products world prices. World prices are historically subject to fluctuations which depend on a number of factors, crucial ones being the following:

- *steel products world demand and supply as well as appraisal of steel products future demand and supply;*
- *world economy climate, as well as economic and political conditions in each specific region of the world;*
- *alteration of the Russian Federation legislation, including that in the sphere of currency control and steel products export, directed upon imposing additional export tariffs, or otherwise reducing economic attractiveness of steel products export to world markets.*

Restriction of sales markets can occur due to:

- *adoption by an importing region of statutory acts limiting or prohibiting sales of the Issuer's metal products in a particular region;*
- *alteration of the Russian Federation legislation, including that in the sphere of currency control and steel products export, directed upon imposing additional export tariffs, or otherwise reducing economic attractiveness of steel products export to world markets.*

Broad geography of NLMK's sales and industry diversification of NLMK's sales make it possible to minimize risk of losses from sudden change in situation in one of the sales markets or in case of market closure due to anti-dumping investigations. Market analysis, market dynamics studies, search for new markets as well as product mix expansion allow NLMK to implement a balanced sales policy.

Purchaser's failure to fulfill obligations (metal products shipment on after-payment conditions is effected, primarily, for export) represents an additional industry risk.

While concluding sales or purchase contracts NLMK pays special attention to quality of transactions legal support, making it possible to reduce the risk in default of monetary funds refund in case of contract cancellation.

2.5.2. Country and regional risks

NLMK is an export-oriented Company. It is exporting its products to over 70 countries. Main export regions which bring 10% and more of sales proceeds are as follows: South-East Asia, Europe (inclusive of Turkey), South America, Russia.

In case of negative situation in some regions NLMK possesses vast possibilities of re-orienting its products to more attractive markets and minimization of possible financial damages.

The main industrial activity of the Issuer is pursued within the Russian Federation. The activity of metal products manufacturing and exporting in Russia entails a number of risks.

Political risks

The political system of Russia is in the stage of formation and constant restructuring, that is why it is not stable yet, which causes the following risks for NLMK:

- possibility of foreign and domestic policy change can fundamentally affect the investment attractiveness of the country as a whole and NLMK in particular;*
- possibility of negative legislation alteration, inclusive of tax legislation, aimed at budget receipts maximization from export-oriented industries.*

Economic risks

NLMK's activity in Russia is subject to the following economic risks:

- backwardness of Russian banking system can impede NLMK's access to the Russian investment resources;*
- Russian economy is poorly diversified and essentially dependent upon world prices on raw materials, oil and gas in the first place. Continuous and significant landslide of world prices for raw materials can lead to proceeds decrease of raw materials companies. It, in its turn, can further entail economic recession of the Russian economy, which will undoubtedly affect the Issuer's activity.*

In order to minimize the economic and financial risks NLMK tries to diversify its funding sources, expands its sales geography and product mix.

2.5.3. Financial risks

Being an export-oriented company, NLMK confronts currency risks, as well as interest escalation risks which can fundamentally affect its financial performance and considerably increase risk of assets liquidity deterioration.

Currency risks

Taking into account the situation at the world financial markets in the previous years, NLMK's export program is framed with regard to possible (forecast) dynamics of the main currencies. Actions are taken to diversify export proceeds currency structure.

Provisions are made for proportional distribution of payments on long-term import contracts and use of letters of credit for settlements with receipt of interest income from placing these operations cover in deposits.

Since the major part of NLMK's expenses are in rubles, there is risk of business profitability reduction due to considerable ruble exchange rate fluctuations with respect to foreign currency. In order to minimize these risks, the Company takes the following measures:

- concluding agreements with banks for conducting sales of large foreign currency amounts for rubles at a fixed rate of exchange with minimal commission;*

allocation of temporarily surplus foreign currency and ruble funds which allows to reduce dependency on exchange rate fluctuations and maintain profitability.

In the reporting period the currency risks hedging with forward contract application, options were not effected due to the following reasons:

- absence of legislation which regulates this kind of transactions;*

divergence of world's leading experts' forecasts concerning perspectives of foreign currency rates with respect to US dollar.

Interest escalation risk

NLMK may act as borrower both in the international and domestic capital markets. The Company may use borrowed funds for current activity financing and for investment projects.

On the other hand, NLMK's growing solvency, as well as Russia's increasing trustworthiness appear as important factors of borrowings value decrease for the Company in the future.

Risk of liquidity deterioration

At NLMK liquidity risk is closely associated with cash inflow under settlements for products. In order to minimize this risk, the schedule of incoming and outgoing cashflows is carefully planned to identify any possible deficit in financial resources. The ratio of the Company's highly liquid assets to liabilities attests to high solvency and a correspondingly low liquidity risk.

2.5.4. Legal risks

Risks related to currency regulation changes

The new law "On currency regulation and control" dd. 10.12.2003 Nr. 173-F3 (took effect 17.06.2004 with the exception of separate provisions for which another effective term is established) (hereinafter – "New law on currency regulation") provides for reservation necessity by residents of the RF currency monetary funds on a separate account in an authorized bank prior to effecting a number of currency transactions defined by the present law, which will induce outflow of monetary funds for reservation purposes and their temporary exclusion from the Company's current settlements. It can hinder fulfillment of the Company's obligations upon agreements with contractors.

Risks related to tax legislation alteration

The risk of entering changes which can produce a negative impact on the Issuer's financial performance into the effective legislation within the current year is estimated as indefinite by the Company.

Risks related to changes in the rules of customs control and duties

In accordance with the RF Tax Code the responsibility of settlement and customs duties payment lies with a declarant or a customs broker. Nevertheless there is risk for the Company to be called to account for non-payment or incomplete payment of customs duties through the a/m persons' fault including customs payments recovery at the expense of the Company's property. Federal law "On the foundations of foreign trade governmental regulation" dd. 08.12.2003 Nr. 164-F3 determines the possibility of the a/m activity regulation through customs and tariffs regulation, nontariff regulation, foreign trade prohibition and restrictions by services and intellectual property, imposing of economic and administrative measures. The a/m methods application can bring about the risk of establishing high customs fees and duties on import/export, special anti-dumping and compensation duties, exceptional application of temporary restrictions both of goods export and import, imposing quantitative restrictions on goods export and/or import, which will hinder the Company's activity.

Risks related to changes in demands on licensing the Issuer's main activity

Risks related to changes in demands on licensing the Issuer's main activity which can produce a negative impact on his financial performance are estimated as indefinite by the Company.

Risks related to alteration of judicial practice on the issues related to the Issuer's activity

Risks of possible alteration of judicial practice on the issues related to the Issuer's activity which can produce a negative impact on his financial performance are estimated as indefinite by the Company.

In the foreseeable perspective risks related to alteration of currency, tax, customs and licensing regulation and those that can entail deterioration of the Issuer's financial performance are low.

2.5.5. Risks related to the Issuer's activity

For the last three years and now NLMK has not been participating in any legal procedures in which plaintiffs' claims are significant (more than 5% of the Issuer's assets book value).

The main part of the Issuer's licenses on activities important for the Issuer is valid till 2006 and further on. Risk related to failure to prolong these licenses is extremely low.

Subsidiaries and affiliated companies of NLMK are liable for their financial performance and risk management.

III. Detail information on the Issuer.

3.1. History of the Issuer's Company.

3.1.1. Information on the Issuer's name.

Full name of the Issuer.

*Открытое акционерное общество "Новолипецкий металлургический комбинат"
Novolipetsk Iron & Steel Corporation*

Abbreviated name.

OAO "HJMK"

NLMK

The Company has the right for trade mark "STINOL" registered as stated by the Russian Law (information on trade mark registration is given in clause 4.4.).

Information on changes in the Issuer's name.

1. The Yu.V. Andropov Novolipetsk Iron & Steel Works honored with the Lenin Order and the October Revolution Order

NLMK

Introduced on: **14.03.1984**

Basis for changes: *Decree of the Central Commission of the KPSS, Presidium of the Supreme Soviet of the USSR and Council of Ministers of the USSR «On perpetuation the memory of Yury V. Andropov».*

2. Novolipetsk Iron & Steel Corporation

NLMK

Introduced on: **28.01.1993**

Basis for changes: *Decision of the Lipetsk Region State Property Management Commission No. 823 dd. December 31, 1992 «On reorganization of the Yu. V. Andropov Novolipetsk Iron & Steel Works into Novolipetsk Iron & Steel Corporation».*

3. Current name was introduced on 12.08.1998

Basis for changes: *Decision made at Annual Shareholders' Meeting dd. August 1, 1998 (Minutes No. 9) on approval of the Company's Statute in a new edition.*

3.1.2. Information on state registration of the Issuer.

Number of state registration: **5-Г**

Date of state registration: **28.01.1993**

Registrar: *Administration of Levoberezhny district of the city of Lipetsk*

State registration number of a legal person: **1024800823123**

Date of registration: **09.07.2002**

Registrar: *Inspection of MNS of Russia in Central district of the city of Lipetsk*

3.1.3. Information on foundation and development of the Issuer.

According to the RF Presidential Decree No. 721 dd. 01.07.1992 «On measures aimed at conversion of state enterprises, voluntary associations of state enterprises into joint stock companies» state enterprise The Yu. V. Andropov Novolipetsk Iron & Steel Works honored with the Lenin Order and the October Revolution Order was reorganized into Novolipetsk Iron & Steel Corporation by decision of Lipetsk region state property management Commission No. 823 dd. 31.12.1992. The Company was registered by Decree of Head of Levoberezhny district of the city of

Lipetsk No. 50 dd. 28.01.1993.

The Company was registered for uncertain period of time.

The purpose of enterprise privatization is to increase efficiency of national economics by transfer from planned economy to market economy. In transition to a market economy the following decisions have been made by the Company:

- *on optimization of organizational structure and management system of production and auxiliary divisions;*
- *on improvement of system of raw material, fuel procurement, product sales and marketing services;*
- *on development and approval of Technical Upgrading Program.*

Today NLMK is a large advanced company with highly developed and coordinated production, the products of which are exported to dozens countries of the world.

Plans of NLMK cover steady increase of high-end production, solution of various environmental problems at all production stages, production of high value added products which meet constantly raising demands from customers.

3.1.4. Contact information.

3.2. The Issuer's core activity.

3.2.1. The Issuer's industry.

Codes of the Issuer's activity within the industry according to All-Russian code of foreign – economic activity:

<i>Code</i>	<i>Description</i>
<i>27.17</i>	<i>Production of cold rolled steel flats without and with protective coatings</i>
<i>27.15</i>	<i>Production of semi-finished (slabs) products for further rolling</i>
<i>27.16.2</i>	<i>Production of hot rolled steel flats</i>
<i>27.11</i>	<i>Production of pig iron and blast furnace ferroalloys</i>
<i>24.14.2</i>	<i>Production of other organic chemical products which are not entered into any other group of products</i>
<i>27.33</i>	<i>Production of roll-formed steel sections</i>
<i>45.21.1</i>	<i>Civil works on buildings construction</i>
<i>23.10</i>	<i>Production of coke</i>
<i>29.51</i>	<i>Manufacture of machinery and equipment for steel industry</i>
<i>85.11</i>	<i>Activity of patient care institutions</i>
<i>27.22</i>	<i>Production of steel pipes and fittings</i>
<i>27.14</i>	<i>Production of steel</i>
<i>34.30</i>	<i>Production of parts and components of cars and motors to them</i>
<i>40.30</i>	<i>Production, supply and distribution of steam and hot water (heat energy)</i>
<i>24.15</i>	<i>Production of fertilizers and nitrogen compounds</i>
<i>28.71</i>	<i>Production of metal drums and similar reservoirs</i>
<i>55.51</i>	<i>Activity of canteens located at the territory of plants and institutions</i>
<i>70.32.1</i>	<i>Management of housing stock</i>
<i>55.12</i>	<i>Activity of hotels having no restaurants</i>
<i>60.23</i>	<i>Activity of other inland passenger transportation</i>
<i>60.10.2</i>	<i>Activity of industrial railroad transport</i>
<i>74.60</i>	<i>Investigations and accidents prevention</i>
<i>63.21.1</i>	<i>Other auxiliary activity of railway transport</i>

63.11	<i>Transport processing of cargoes</i>
63.12	<i>Storage and warehousing</i>
31.62.9	<i>Services rendered for erection, repair and maintenance of other electric equipment which is not entered into any other group of products</i>
60.24	<i>Activity of motor transport</i>
45.31	<i>Wiring operations</i>
52.31	<i>Retail trade of pharmaceutical products</i>
40.10.5	<i>Activity on assurance of electric mains serviceability</i>
74.20.1	<i>Architectural activity, engineering in industry and construction</i>
74.20.3	<i>Land measuring and mapping</i>
85.20	<i>Veterinary activity</i>
37.10.1	<i>Waste and ferrous scrap processing</i>
92.13	<i>Movies demonstration</i>
64.20.1	<i>Activity in the area of phone and document communications</i>
85.13	<i>Dental practice</i>
51.70	<i>Other wholesale trade</i>
52.11	<i>Retail trade in non-specialized stores principally by foodstuffs, including beverage food and tobacco goods</i>
52.12	<i>Other retail trade in non-specialized stores</i>
28.63	<i>Manufacture of locks and hinges</i>
80.22.22	<i>Training in advance training (extension) schools for specialists having secondary vocational education</i>
80.30.3	<i>Training in advance training (extension) schools for specialists having higher vocational education</i>

3.2.2. The Issuer's main activity.

The Issuer carries out its activity in the territory of the Russian Federation.

NLMK's main industrial activity is ferrous metals production and selling. The Company is oriented at producing high-quality hot-rolled and cold-rolled flats.

Profit share from such activity constitutes almost 100% of the total profit from sales of products, goods, works.

Profit share from sales of ferrous metals in the Company's total profit amounted to:

in 2000 – 98.9%

in 2001 – 96.8%

in 2002 – 97.1%

in 2003 – 97.2%

in 2004 – 96.5%

in quarter I, 2005 – 96.9%.

Proceeds from sales of ferrous metals:

in 2000 – 38 196 845 thousand rubles, growth to 1999 – 53%,

in 2001 – 36 021 119 thousand rubles, decrease to 2000 – by 6%,

in 2002 – 51 755 539 thousand rubles, growth to 2001 – 44%,

in 2003 – 72 955 744 thousand rubles, growth to 2002 – 41%,

*in 2004 – 121 721 093 thousand rubles, growth to 2003 – 67%,
in quarter I, 2005 – 32 379 173 thousand rubles*

Proceeds from sales of metal products in quarter I, 2005 decreased regarding quarter 4, 2004 by 7.2%. Profit decrease was mainly caused by decrease of physical sales volumes in quarter I, 2005 regarding quarter 4, 2004 by 7.3%.

The Issuer's sales proceeds are affected by the following factors: physical sales volumes, current prices at sales markets, the national currency exchange rate.

The impact of these factors is described in clause 4.1.2. of the present quarterly report.

The Issuer's activity has slight seasonal nature related to decrease of metal products consumption in winter. However the influence of this seasonal nature upon the Issuer's financial performance is not significant.

3.2.3. Main types of products (works, services).

Product types providing not less than 10% of NLMK's profit:

<i>Products</i>	<i>Output, thousand tons</i>	<i>Price, rubles</i>	<i>Amount, million rubles</i>	<i>Share, %</i>
2000				
<i>Slabs</i>	2 785,7	3 297,6	9 186,2	24,0%
<i>Hot-rolled stock</i>	2 539,4	4 365,8	11 086,6	29,0%
<i>Cold-rolled stock</i>	1 457,2	6 547,3	9 540,7	24,9%
total for 2000	8 024,0	4 771,1	38 283,6	100%
2001				
<i>Slabs</i>	2 700,5	3 046,1	8 226,1	22,9%
<i>Hot-rolled stock</i>	2 493,5	4 024,5	10 035,1	27,9%
<i>Cold-rolled stock</i>	1 460,7	6 197,7	9 053,0	25,2%
total for 2001	7 841,4	4 589,0	35 988,1	100%
2002				
<i>Slabs</i>	3 242,4	4 332,3	14 047,2	27,7%
<i>Hot-rolled stock</i>	2 115,0	5 413,5	11 449,7	22,6%
<i>Cold-rolled stock</i>	1 788,6	7 135,3	12 762,3	25,1%
total for 2002	8 620,5	5 887,4	50 751,9	100%
2003				
<i>Slabs</i>	3 338,1	5 447,0	18 182,9	25,5%
<i>Hot-rolled stock</i>	2 021,7	7 737,9	15 643,8	21,9%
<i>Cold-rolled stock</i>	1 840,2	10 345,7	19 038,0	26,7%
total for 2003	9 026,7	7 897,8	71 291,0	100%
2004				

<i>Slabs</i>	3 763,2	11 041,3	41 550,3	34,4%
<i>Hot-rolled stock</i>	1 894,1	12 907,1	24 446,8	20,2%
<i>Cold-rolled stock</i>	1 790,1	14 973,3	26 803,7	22,2%
total for 2004	9 517,5	12 693,0	120 805,7	100%
quarter I, 2005				
<i>Slabs</i>	898,2	11 924,3	10 711,0	32,9%
<i>Hot-rolled stock</i>	491,6	14 457,6	7 106,8	21,8%
<i>Cold-rolled stock</i>	434,0	17 228,6	7 478,0	23,0%
total for quarter I, 2005	2 204,1	14 770,4	32 555,1	100%

Note: cold-rolled stock do not include electrical steel and coated flats.

The average annual prices growth over the period 2000-2004 is accounted for by significant world market prices increase. Apart from it prices for the main raw materials and freight rates for goods transportation increased significantly. The Company's metal products prices were subject to growth up to November, 2004. November marked their decrease in several regions, December was characterized by decrease of quotations for almost all product mix.

The Company's average actual prices in quarter I, 2005 remained almost at the level of quarter IV, 2004, which is accounted for by the following reasons:

- The period considered saw world market conditions worsening. Because of it prices for all metal products (with the exception of electrical flats) were decreasing.*
- Traditional seasonal decrease of demand for certain metal products is characteristic for the year beginning.*

Information on new significant types of products (works, services) as well as on their development is not available to the public for the purpose of maintaining the Issuer's competitive advantages.

Accounting of receipts and expenditures on the common activities is effected in accordance with Accounting Rule 1/98 "The Company's accounting policy", Accounting Rule 9/99 "The Companies' profit" and Accounting Rule 10/99 "The Companies' expenses".

The Company's accounting statements are prepared in accordance with the Accounting Rule 4/99 "The company's accounting statements" and the RF Ministry of Finance Order Nr. 67h dd. 22.07.2003 (edition dd. 31.12.2004) "On the forms of companies' accounting statements".

3.2.4. The Issuer's suppliers with shipments of 10 and more percent of all inventory holdings with indication of their share in the total supplies.

<i>Description of Supplier</i>	<i>Share within total inventory supplies (%)</i>
	<i>quarter I, 2005</i>
<i>Limited-liability company "Trading House NLMK"</i>	<i>42.2</i>

Share of import within the Company's shipments for quarter I, 2005 accounts for 1.41%.

The Issuer plans to keep on future cooperation with reliable suppliers ensuring schedule implementation and supplies quality. It is also possible to attract alternative suppliers of raw materials (regarding import also) without significant increase in prices and following established quality of raw materials.

3.2.5. The Issuer's sales (works, services) markets.

Sales markets: 2000

World metal products market

2000 incorporates three periods of world market development: upturn, peak and recession. The world market upturn in the first half-year was characterized by the growth of prices for all kinds of metal products which reached their peak in April-May depending on the region, and then they went on to decrease.

In the first half of 2000 the actual signs of general improvement of the world steel market conditions which appeared at the end of 1999. It was facilitated by such factors as high rates of the USA economy development, cyclical exhilaration in Western Europe, gradual stabilization of economy in Central and Eastern Europe countries, overcoming of the financial crisis consequences by the countries of South-Eastern Asia and of economic recession by the majority of Latin America countries.

The period from January to May saw an increase in prices for slabs by 5-20% depending on the region, for hot-rolled stock by 2-20%, for cold-rolled stock by 5-19% on average, for galvanized rolled stock by 7-14%.

The favourable conditions at the ferrous metals market facilitated production increase. In the first half of 2000 the world steel output increased by 11.1% as compared to the respective 1999 period. There was a significant production increase in the USA, Russia, Germany, Ukraine, Korea, China and India.

In the first half of 2000 the world steel plant capacities were utilized at 97% on average, which is the highest indice over the period of market monitoring.

In spite of the growing world consumption market conditions deteriorated in the second half year. Prices decreased significantly in summer, which is related to summer holidays and current equipment repairs at many enterprises.

At the end of the year the major world manufacturers started to reduce production output, this reduction failed to produce an appreciable effect, however, prices went on dropping. As a result of the year the price level at all world markets turned out to the lowest over the past 10 years.

The drop of prices for the main types of metal products in the second half of 2000 attests to the shortening of the cyclical fluctuations period at the ferrous metals market: 2000 saw both an upturn period and recession period unlike the previous years when market recession that lasted for the whole year was replaced by an upturn during the following year.

The annual steel output in the world amounted to 828.5 tons. There were five leaders: China (125.8 mln. tons), Japan (106.4 mln. tons), the USA (101 mln. tons), Russia (57.6 mln. tons) and Germany (46.4 mln. tons).

The annual consumption of metal products in 2000 accounted for 730 mln. tons. The Chinese market was rapidly developing with the annual consumption increase of 129 mln. tons.

Domestic metal products market

The year 2000 saw a significant production increase in the metal consuming industries of the Russian economy, which was a factor of the increase by 15.6% of metal products output at the Russian ironworks. In 2000 the Russian iron industry produced 44.6 mln. tons of pig iron, 57.6 mln. tons of steel and 46.7 mln. tons of finished rolled stock.

Pig iron production increased by 11%, steel and finished rolled stock production increased by 15%. Flats production in Russia increased by 36%.

The first half year of 2000 was featured by an increase of prices for flats by the major Russian manufacturers. In the second half year the world metal products market conditions deterioration

was followed by stabilization tendency at the Russian market and then by a certain decrease in prices.

At that unlike the year beginning when prices for flats of the major producers differed appreciably, the prices difference reduced significantly at the end of the year.

The year 2000 was featured by an increase in Russian export of hot-rolled stock by 12% with simultaneous decrease in slabs export by 7% and in coated flats export by 5%. Cold-rolled stock export also decreased though insignificantly – by 1%.

High domestic market prices determined a significant increase in flats import to the Russian market. The imports of cold-rolled steel and coated flats increased most significantly – by 1.8 and 2 fold respectively, which is mainly related to the increased shipment from the Ukraine, Kazakhstan and Finland. Hot-rolled stock import decreased by 43% as compared to 1999.

In 2000 the major importing regions were Moscow city, Belgorod region, Rostov region and Kursk region. Their share in flats import accounted for 63% against 60% in 1999.

The year 2000 was generally very favourable for Russian steel companies. The first half year was marked by a positive dynamics of production output, flats annual consumption and increase in prices for metal products. In the second half year supply of the main flats types exceeded demand and despite production output decrease it was followed by prices decrease which not so significant as that at the world markets.

The world market conditions deterioration caused a significant decrease in exports profitability. The Russian steel companies partially reoriented to domestic consumers, and boosted the products shipment to domestic market as compared to 1999.

Sales markets: 2001

World metal products market

During 2001 the market conditions at the world pig iron and steel market were still unfavourable. The main factors that produced a negative impact on the market development in 2001 are the following:

- *surplus of supply of metal products at the market over demand with a high stock level;*
- *the USA's investigation under article 201 of the "Law on trade" dd. 1974 regarding all import of metal products to the country;*
- *competitive intensification at the European and Asian markets;*
- *the events of September 11 in New-York and aggravation of the situation in unstable world regions.*

Within the year the world prices for metal products decreased, in December they reached the record low level over the past few years. Prices for hot-rolled stock dropped by 2-11 \$/m depending on the region and in Latin America countries the price level decreased by 55 \$/m. Slab prices at the world market decreased by 8-25 \$/m within the year.

The markets of cold-rolled and galvanized rolled stock are even more prone to prices drop. Over 2001 prices for these products decreased by 30-60 \$/m depending on the region.

However in spite of the worsening market conditions at the world market of pig iron and steel the 2001 indice of the world pig iron production remained at the 2000 level and crude steel production indice decreased by 0.1% only (to 847 mln. tons).

The greatest decrease of crude steel production occurred in North America countries (15.5 mln. tons regarding the 2000 level or 11.4%) and European Union countries (4.5 mln. tons or 2.8%).

Japan reduced production output by 3.5 mln. tons or 3.3%. In other Asian countries, on the contrary production indices increased, in China, in particular, production output increased by 21.7 mln. tons or 17.1% regarding the 2000 level.

As of the year end the world crude steel production exceeded the consumption level by 13 mln. tons.

The leading steel producers were, as before, the following countries: China (148.9 mln. tons), Japan (102.9 mln. tons), the USA (90.1 mln. tons), Russia (59 mln. tons) and Germany (44.8 mln. tons).

The steel plants capacities were utilized at 91.8% in 2001 and at 92.1% in 2000.

Domestic metal products market

In 2001 Russian steel plants produced 44.9 mln. tons of pig iron and 59 mln. tons of steel, which almost corresponds to the 2000 indices. Finished rolled stock output in 2001 accounted for 47.1 mln. tons including 19.3 mln. tons of strips.

An insignificant increase in finished rolled stock production, within 1%, was made possible as a result of an increase in production of bars by 5% with simultaneous decrease in flats output by 4%.

In the Russian iron industry three major companies can be distinguished: Severstal, MMK and NLMK. They produce nearly half of the overall domestic pig iron, steel, finished rolled stock and about 90% of strips. The domestic flats market is mainly determined by these companies.

The year 2001 was less favourable for the Russian iron and steel companies. Despite the growth of industrial production outputs and annual consumption of rolled stock in Russian in 2001, the rates were much lower than those of the last year. The annual consumption of rolled stock in Russia increased by 15% as compared to 2000 and accounted for 12 mln. tons.

Deterioration of the world market conditions was the main cause of increase in metal products shipment to domestic market. The share of flats shipped by Russian plants to the domestic market increased from 47% in 2000 to 55% in 2001.

Because of unfavourable world market conditions in 2001 Russian exports of strips accounted for 8.7 mln. tons, which is 18% as little as in 2000. Slabs export increased by 5% in 2001 and accounted for 12.4 mln. tons.

Flats import in 2001 accounted for 1.4 mln. tons, which is 44% more than the respective indice of the previous year. The major importers of rolled stock to Russia are the Ukraine and Kazakhstan. 88% of the overall Russian imports is contributed by these countries.

The major importing regions were Moscow region, Belgorod region and Rostov region. Their share in imported rolled stock is 62%. Russian iron and steel companies interested in increasing shipment of their products to the domestic market take measures on the governmental level for limiting the volume of imported rolled stock. Thus, in 2001 Russia started investigations regarding importing galvanized rolled stock from the Ukraine and Kazakhstan.

As a result of increasing shipments to the domestic market against the background of continuing recession at the world markets, prices for metal products were gradually decreasing: over 2001 the level of prices for hot-rolled and cold-rolled stock decreased by 3-10% depending on the region, for galvanized rolled stock – by 7-15%.

World metal products market

The main factor which predetermined the development of the world steel market in 2002 was introduction of protective measures against imported metal products by the USA first and then by the European Union, China and a number of other countries.

Such measures entailed speculative demand for pig iron, slabs and rolled stock over the world and artificial increase in prices for metal products during the greatest part of the reporting year.

Improvement of market conditions at the world metal products market facilitated growth of pig iron and steel production: the indice of the world pig iron production increased from 578.5 mln. tons to 609.6 mln. tons (or by 5.4%) regarding the 2001 level, crude steel production – from 850.3 mln. tons to 902.8 mln. tons (or by 6.2%).

Increase in crude steel production was registered almost in all world regions: South Eastern Asia countries increased their output from 353.7 mln. tons in 2001 to 393.5 mln. tons in 2002, North America countries – from 119.9 mln. tons to 123.7 mln. tons, African countries – from 15.0 mln. tons to 15.8 mln. tons, Latin America countries – from 37.4 mln. tons to 40.8 mln. tons, European countries not being the EU members – from 46.1 mln. tons to 48.2 mln. tons.

The countries of the Commonwealth of Independent States increased crude steel production to 101.2 mln. tons against 99.6 mln. tons last year. The EU maintained its output at the level of the last year (158.6 mln. tons). As of the year end crude steel production exceeded the consumption by 18 mln. tons.

In 2002 the leading steel producers' list changed slightly. The first four places are still held by China (181.6 mln. tons), Japan (107.7 mln. tons), the USA (92.2 mln. tons) and Russia (59.8 mln. tons). In the reporting year the fifth place is held by South Korea (45.4 mln. tons of crude steel) thus moving Germany with production output of 45.0 mln. tons to the sixth place.

The world steel plants' capacities were utilized at 95% in 2002 while in 2001 they were utilized at 92%. Apart from protective measures a significant influence on the world trade and market conditions in the reporting year was exerted by rapid growth of metal products in CPR.

At the moment this country is the major metal products importer in the world. In the reporting period world trade volume remained at a high level due to the growing Chinese consumption: in spite of closure of a number of markets significant trade flows in CPR were re-oriented.

Over 2002 Chinese import prices for slabs increased by 88 \$/m, for hot-rolled stock – by 123 \$/m, for cold-rolled stock – by 168 \$/m. Import prices for galvanized rolled stock grew from 313 \$/m in January to 440 \$/m in December, 2002.

The year 2002 was advantageous for Russian exporters of metal products. Over the reporting period the CIS producers export prices for slabs increased by 80 \$/m, for hot-rolled stock – by 125 \$/m, for cold-rolled flats – by 150 \$/m.

Slab prices of Latin American producers increased over 2002 from 153 \$/m FOB in January to 245 \$/m FOB at the end of the year. Export prices for hot-rolled stock increased from 170 \$/m FOB to 288 \$/m FOB, for cold-rolled stock – from 250 \$/m FOB to 368 \$/m FOB, for galvanized rolled stock – from 350 \$/m FOB to 443 \$/m FOB respectively.

Being the country which is not subject to the protective measures of the USA and the EU, Turkey increased production and prices for metal products. Thus, over the reporting period the prices of Turkish exporters of hot-rolled stock increased by 82 \$/m, of cold-rolled stock – by 92 \$/m, of galvanized rolled stock – by 30 \$/m.

Due to successful policy of European producers on controlling strips output, prices for hot-rolled stock exported from the EU grew from 195 \$/m FOB at the beginning of 2002 to 305 \$/m FOB in December, 2002, for cold-rolled stock – from 265 \$/m FOB to 380 \$/m FOB, for galvanized rolled stock – from 355 \$/m FOB to 458 \$/m FOB.

The USA was the only region experiencing a negative tendency at the second half of 2002. Decrease in rolled stock prices was accounted for not only by the general economic deterioration in the country but also by accumulation of a large metal products volume at consumers' storehouses.

2002 was marked by a number of positive factors in solving foreign trade issues in Russia:

- on June 9, 2002 the RF and the EU signed a new Agreement on trading certain steel items for a three-year term . Due to this agreement Russia will remain at the EU market in the near future.*
- The RF was acknowledged to be a market economy country first by the USA and then by the EU, which will further enable Russia to assert its rights in the course of anti-dumping investigations on equal terms with the USA, the EU and other countries.*
- on October 16, 2002 in the absence of damage anti-dumping investigation on cold-rolled stock initiated in 2001 by the USA against 20 countries including Russia was terminated.*
- on January 9, 2003 European producers association Eurofer for the first time withdrew its complaint regarding dumping import of GO steel from Russia to Europe. Eurofer complaint withdrawal automatically nullified anti-dumping investigation initiated by the European party on May 8, 2002.*

Domestic metal products market

The year 2002 was more favourable for Russian iron and steel companies as compared to 2001. Production output of all main kinds of metal products increase was registered.

In 2002 Russian iron and steel plants produced 46.3 mln. tons of pig iron and 59.8 tons of steel; increase of pig iron output accounted for 2.8%, steel output increased by 1.3%. Finished rolled stock output in 2002 amounted to 48.7 mln. tons (output increase by 3.9%) including strips output of 20.9 mln. tons (output increase by 8.2%).

The world market conditions improvement which revealed itself in the first half of the year was the basic cause of increase in metal products export and decrease in domestic market supplies. Prices at the Russian secondary market after stabilization at the year beginning tended to increase.

Starting from the end of the first half year up to the 2002 end strips prices increased by 25-45% depending on the region.

Due to advantageous world market conditions in 2002 Russian strips exports accounted for 10.9 mln. tons, which is 25% as much as in 2001. The share of imported rolled stock sales at the Russian market decreased in 2002. 1.0 of strips was imported during the year, which is 28% as much as the respective last year indice.

The major importing regions in 2002 were the same regions as in 2001: Moscow region, Belgorod region and Rostov region. Their share in the imported rolled stock accounted for 46%. The main rolled stock exporters to Russia are the Ukraine, Kazakhstan, Finland and Germany. Their share in the Russian imports amounts to more than 90%.

While strips export by the Russian producers increased, domestic supplies of Russian enterprises decreased by 6% as a result of 2002. They amounted to 10.0 mln. tons totally. Certain production growth of the main metal-consuming industries was generally registered in 2002.

Production growth in mechanical engineering accounted to 2%, in construction – to 3% with tube production decrease by 5%. Consequently strips annual consumption in Russia decreased by 8% as compared to 2001 to 11.0 mln. tons. It is accounted for by domestic unbalance between supply and demand in 2002 which was induced by metal products deficit caused by exports increase, which lead to a significant increase in domestic prices.

Sales markets: 2003

World metal products market

The year 2003 can be referred to as unstable, yet however favourable period for the world iron industry. Uneven development of the world steel market during the year was mainly related to the events in CPR. Due to a steady demand increase on the part of Chinese automotive industry, electronic industry and construction sector steel consumption increased significantly, which lead to the increase in world steel production and prices during the greatest part of 2003.

Market conditions deterioration at the world market of metal products in April-May, 2003 was related to the completion of quotas on rolled stock import to China. Though the recession was short-term, the slump of world prices for metal products was so significant over these two months that in some regions their level didn't recover till the end of 2003.

As a result of 2003 crude steel production in the world reached its peak and amounted to 964 mln. tons, which exceeds the respective 2002 indice by 6.8%. Crude steel production increase occurred in every world region except North America where steel production hardly experienced any changes:

- *in South-East Asia – by 46.4 mln.tons (by 11.8% regarding the 2002 level);*
- *Middle East – by 1.0 mln. tons (by 7.6%);*
- *the CIS countries – by 6.4 mln. tons (by 6.3%);*
- *European countries not being EU members – by 3.7 mln. tons (by 7.6%);*
- *South America – by 2.2 mln. tons (by 5.4%);*
- *the EU – by 1.0 mln. tons (by 0.7%).*

In 2003 the major production growth (+21.2%) occurred in China which was the first country whose annual crude steel output exceeded the level of 200 mln. tons, which accounted for 22.8% of the world output. The five leading steel producers are the following:

- *China – 220.1 mln. tons;*
- *Japan – 110.5 mln. tons;*
- *the USA – 90.4 mln. tons;*
- *Russia – 62.7 mln. tons;*
- *South Korea – 46.3 mln. tons.*

As was mentioned before fluctuations of world prices for metal products in 2003 were mostly related to the changing sizes of orders for rolled stock on the part of Chinese consumers.

Apart from it a strong influence on price dynamics was exerted by the growing costs for steel and rolled stock production. The most critical deficit of raw materials and metal products in the reporting period was registered at the Chinese market.

In January-April, 2003 the maximum level of CPR import prices accounted for:

- *365 \$/m C&F for hot-rolled stock;*
- *505 \$/m C&F for cold-rolled stock;*
- *615 \$/m C&F for galvanized rolled stock.*

The drop of demand related to completion of quotas on import of metal products to China lead to decrease of import prices for it in quarter II, 2003. In May transactions on hot-rolled stock were concluded at the rate of 240-290 \$/m C&F, on cold-rolled stock – at the rate of 345-400 \$/m C&F, on hot-dip galvanized stock – at the rate of 480-520 \$/m C&F.

However due to high economic development rates in China prices recovery at the local steel market started straight after introduction of new restrictions on tariffs and quotas on rolled stock import. At the end of December the a/m products were already imported to CPR at the rate of 390 \$/m C&F, 470 \$/m C&F and 570 \$/m C&F respectively.

The previous year was favourable for the CIS rolled stock exporters which supplied significant volumes of products to South-East Asia in spite of April-May decrease of prices for hot-rolled stock from 300-325 \$/m FOB the Black/ Baltic Seas to 220-260 \$/m FOB and for cold-rolled stock from 400-460 \$/m FOB to 320-360 \$/m.

In December, 2003 prices for export of cold-rolled stock to foreign market were registered at the March level, prices for hot-rolled stock export accounted for 300-360 \$/m FOB.

Prices in other regions had similar dynamics, the only difference being the following: not all regional producers which decreased their prices in quarter II managed to restore them by the end of 2003.

European producers didn't manage to raise their export prices for rolled stock to the level of quarter I after prices decrease in April-May. In December hot-rolled coils produced in the EU were supplied to the foreign market at the rate of 295-315 \$/m FOB against 295-325 \$/m FOB in February, cold-rolled coils were supplied at the rate of 385-415 \$/m FOB against 385-430 \$/m FOB in March. Prices for galvanized rolled stock dropped more significantly: 445-485 \$/m FOB in March to 410-445 \$/m FOB in December.

As a result of the year prices for hot-rolled and galvanized stock exported by Latin-American countries deteriorated. At the beginning of the year hot-rolled stock of Latin-American origin was exported at the rate of 295-305 \$/m FOB.

After the May decrease to 280-290 \$/m FOB at the end of the year prices level could reach only 280-300 \$/m FOB. In April galvanized coils cost 445-465 \$/m FOB, in May after decrease their price reached only 440-460 \$/m FOB.

Export prices for cold-rolled coils produced in Latin America represented an exception: they showed a positive dynamics during the whole reporting period. By the end of the year their level increased to 390-400 \$/m FOB or, on average, by 25 \$/m regarding the January level.

Short-term deterioration of market conditions in the USA in April-May influenced appreciably the level of import prices in the country. In December cold-rolled and galvanized coils exported by the USA cost, on average, 88 \$/m as cheap as in January:

386 \$/m C&F against 474 \$/m C&F and 430 \$/m C&F against 518 \$/m C&F respectively.

Price increase by 11 \$/m refers only to hot-rolled stock (from 342 \$/m C&F at the beginning of the year to 353 \$/m C&F at the end of the reporting year). Because of the stock-jobbing at the market of metal products in 2003 related to rolled stock deficit anti-dumping and compensation investigations in the world steel sector were hardly initiated in the reporting period. Moreover, the growing demand for metal products lead to cancellation of tariffs and quotas on import of these products first by the USA and then by the EU and China at the end of the reporting year.

Domestic metal products market

In 2003 Russian metal products market was characterized by two main trends: first, pig iron, steel and rolled stock production, second, growth of annual consumption of finished rolled stock due to the increase in supplies by foreign and domestic enterprises.

In 2003 Russia produced:

- pig iron – 48.4 mln. tons (+3.6 regarding the 2002 level);
- steel – 62.7 mln. tons (+4.7%);
- finished rolled stock – 51.1 mln. tons (+5.2%).

The structure of steel production experienced favourable changes: the share of BOF steel increased from 61% to 62%, the share of electrical steel increased from 15% to 16%, the share of open-hearth melting decreased from 24% to 22%. In 2003 the structure of finished rolled stock experienced the following changes: the share of bars decreased from 57% to 55%, the share of strips increased from 43% to 45%. Strips production growth accounted for 8.6%, the overall production in 2003 amounted to 22.5 mln. tons including:

- hot-rolled stock – 15.0 mln. tons (+5.5%);
- cold-rolled stock – 5.5 mln. tons (+5.7%);
- coated rolled stock – 2.0 mln. tons (+21.0%).

The increase in pig iron, steel and rolled stock production was registered at almost all enterprises making up eight major Russian plants. The companies actively increased production of rolled stock with coatings (metallic and organic) which is in high demand at the domestic market.

At present domestic market is able to consume only about a half of metal products produced by domestic companies. Thus, only 117 mln. tons of the overall strips output produced in Russia were supplied to the domestic market. Economic recovery, however, entails an increase in steel consumption, which determines sales accretion in Russia.

Increase in demand in the main metal-consuming industries: in construction, tube-rolling and mechanical engineering was the main cause of increase in strips supplies to the domestic market (+14% to the 2002 level) by Russian steelmakers in 2003.

Regarding domestic sales of Russian strips in 2003 it can be noted that hot-rolled stock supplies increased most of all: by 19%, the annual increase accounts for 7.3 mln. tons.

A significant increase (+14%) of coated rolled stock was also recorded whose shipment reached 1.4 mln. tons. The sales of domestic cold-rolled stock increased the least, by 4%, and accounted for 3.0 mln. tons. The world market conditions in 2003 were liable to variations: a significant increase in prices for metal products was being registered from January to March, from April to June prices were decreasing. In the second half-year prices were increasing again. These price differences resulted in maintaining strips exports

at the 2002 level – 10.8 mln. tons by domestic plants.

In spite of the increase in sales of the Russian metal at the domestic market, a certain strips deficit which entailed increase in prices for steel and in imports developed in Russia against the background of demand increase. In 2003 strips import to the Russian market increased by 54%. The total annual imports accounted for 1.6 mln. tons, including :

- hot-rolled stock – 971 thousand tons;
- cold-rolled stock -- 136 thousand tons;
- coated rolled stock – 480 thousand tons.

The major domestic importing regions were Rostov region, Belgorod region, Moscow region and Volgograd region. They imported 60% of the overall imported rolled stock. The main importers of rolled stock to the Russian market were the Ukraine and Kazakhstan which supplied to Russia mostly hot-rolled steel and coated rolled stock.

Under the conditions of domestic supplies and imports growth annual strips consumption at the Russian market increased as compared to 2002 by 18% from 11.3 mln. tons to 13.3 mln. tons, including:

- hot-rolled stock – by 24%;
- cold-rolled stock – by 5%;
- coated rolled stock – by 18%.

The shortage of the main strips types found reflection in prices dynamics. Thus, the prices of the major Russian producers: NLMK, MMK and Severstal for hot-rolled stock increased by 26-33%, for cold-rolled stock – by 18-29%, for galvanized rolled stock – by 9-26%. Consequently, during the year prices of the Russian secondary market were on an increase.

Price dynamics of the Russian domestic market traditionally differs from price dynamics of the world market. Should price changes at the world market have a pronounced cyclical character with quite a wide range of variations depending on the changes of market conditions, domestic prices have a steady increasing trend, recession periods depending on their intensity are characterized either by prices decrease or by increase slowdown or cessation.

Sales markets: 2004

World metal products market

The year 2004 is a special period in the development of the world iron and steel industry. In spite of a significant increase in prices for the main raw materials and freight rates for cargo transportation in 2004, industrial and financial indices of the majority of the world iron and steel companies improved as compared to 2003.

As a result of 2004 the world crude steel output accounted for 1 056.7 mln. tons, which is 9.0% as high as the 2003 level. There was an increase in industrial indices in all regions:

- in Asia: by 57.1 mln. tons or 12.9%;
- in the EU-25: by 9.2 mln. tons or 5.0%;
- in North America – by 7.1 mln. tons or 5.6%;
- in the CIS – by 6.9 mln. tons or 6.5%;
- in South Africa – by 2.8 mln. tons or 6.6%;

- *in European countries not being the EU members – by 3.1 mln. tons or 10.6%;*
- *in the Middle East – by 0.8 mln. tons or 6.0%;*
- *in Africa – by 0.4 mln. tons or 2.5%.*

The major output increase occurred, as in the previous year, in China: +22.5% to the 2003 indice. As a result of the reporting period China produced 272.5 mln. tons of crude steel, which is more than a quarter of the world output (25.8%).

As before the leading steel producers are the following five countries:

- *the second place – Japan (112.7 mln. tons);*
- *the third place – the USA (98.9 mln. tons);*
- *the fourth place – Russia (65.6 mln. tons);*
- *the fifth place – South Korea (47.5 mln. tons).*

In 2004 demand for metal products exceeded its output.

In 2004 the world market conditions were influenced by the two main factors:

- *increased costs of steel and rolled stock production;*
- *advantageous market conditions.*

As compared to 2003 in 2004 the “Chinese factor” played a determining role only at the beginning of 2004. In the second and third quarters the determining influence on the development of the world iron and steel industry was exerted by economic upturn in the USA and Western Europe, in the fourth quarter the majority of regions were changing under the influence of seasonal factor – Christmas and New Year holidays.

China. Because of a significant increase in demand for metal products on the part of all major industries in January-May, 2004 China saw an increase in prices for flats:

- *for hot-rolled flats – from 418 to 485 \$/m C&F;*
- *for cold-rolled flats – from 460 to 590 \$/m C&F;*
- *for galvanized flats – from 585 to 665 \$/m C&F.*

In quarters II-III a certain reduction of business activity and a certain decrease in prices for metal products was registered at the Chinese market as a result of a “control” policy pursued by the Chinese government. As a result of August (no trade operations were conducted in September) the level of prices for imported hot-rolled stock decreased to 450 dollars/m C&F, in April-May prices for cold-rolled stock accounted for 520-540 dollars/m C&F. No transactions with imported galvanized rolled stock were not registered in China in May-September.

In quarter IV in spite of an increase in orders volume on the part of Chinese consumers and prices increase, the Chinese market was still one of the least attractive for foreign suppliers. In October-December hot-rolled stock was imported to China at the rate of 615 dollars/m C&F, cold-rolled stock – at the rate of 675-685 dollars/m C&F, galvanized rolled stock – at the rate of 705 dollars/m C&F.

United States of America. The USA market saw a significant growth of prices for metal products in 2004.

In quarter I against the background of the general increase in prices for metal products at the world steel market, import prices for hot-rolled stock in the USA increased from 430 to 639 dollars/m C&F, for cold-rolled coils – from 678 to 728 dollars/m C&F, for galvanized rolled stock – by 77 dollars/m to 810 dollars/m C&F.

In April-May in spite of deterioration of market conditions at the Chinese market the

prices for hot-rolled strips decreased insignificantly – by 16 dollars/m to 623 dollars/m C&F, for cold-rolled coils – by only 11 dollars/m to 717 dollars/m C&F.

As a result of economic growth in China and rolled stock deficit prices for the a/m products reached the level of 664 and 739 dollars/m respectively by the end of quarter II. Prices were also increasing in quarter III: the USA market became the most expensive of all importers of metal products. In August-May prices for rolled stock imported to the USA reached their peak:

- hot-rolled stock was imported at the rate of 766 dollars/m C&F,
- cold-rolled stock – at the rate of 805 dollars/m C&F,
- dynamics of prices for galvanized rolled stock imported to the USA had an ascending tendency during 9 months, in autumn prices level reached 926 dollars/m C&F.

The increased imports as well as a seasonal decrease of orders for rolled stock in the USA lead to a certain prices decrease at the Chinese market in quarter IV. In spite of it, however, products prices remained high as compared to other markets.

Western Europe. Western European market was the second major after the USA market during the greatest part of the previous year.

Because of the growth of Euro exchange rate to dollar, dollar prices for the rolled stock imported to this region were growing.

Over the first ten months of 2004 Euro prices for hot-rolled stock increased, on average, from 320 to 535 euro/m C&F, for cold-rolled stock – from 383 to 608 euro/m C&F, for galvanized coils – from 415 to 670 euro/m C&F.

A slight decrease in import prices for hot-rolled and galvanized rolled stock in the EU was registered only in June and November-December.

CIS. The previous year was favourable for the CIS rolled stock exporters. A high competitive edge of products enabled Russian and the Ukrainian plants to timely re-orient their exports from one market to another and thus to avoid fluctuations of average prices for metal products on sale.

Over January-September prices for hot-rolled stock exported from this region increased from 390 to 585 dollars/m FOB, for cold-rolled stock – from 460 dollars/m FOB in January to 640 dollars/m in November. A certain decrease in prices for these products was recorded in May-July. At the end of the year due to the seasonal decrease in demand price for strips decreased to 540 dollars/m FOB, for cold-rolled stock – from 630 dollars/m FOB.

Prices for galvanized rolled stock of the CIS producers were growing in the reporting period: from 615 dollars/m FOB at the beginning of the year to 725 dollars/m FOB in December.

Latin America. In view of the fact that the main sales market of Latin-American producers of metal products are the USA, in 2004 prices for rolled stock exported from this region remained at a high level.

Prices for galvanized rolled stock were increasing through the year: from 465 to 765 dollars/m FOB, at the end of December hot-rolled stock was exported at the rate of 585 dollars/m FOB against 305 dollars/m FOB in January, at the beginning of the year cold-rolled stock was offered at the rate of 410 dollar/m FOB, at the end of the year – at the rate of 675-685 dollars/m FOB.

Domestic metal products market

Domestic market is dynamically developing during the whole post-crisis period with the

exception of the period of market conditions deterioration at the end of 2001- the beginning of 2002. 2004 was the most favourable year for iron and steel companies. As in 2003 production output increase was registered for the main kinds of metal products. Pig iron production in Russia increased by 4.0% as compared to the previous year, steel production – by 4.6%, finished rolled stock production – by 6%.

Seasonal demand is a characteristic feature of the domestic market. The market is most active during the construction season (quarters II-III).

Annual strips consumption in Russia in 2004 increased by 2.3% as compared to 2003. Cold-rolled stock consumption increased by 12.9% and coated rolled stock consumption – by 17.4%. Nevertheless, it should be noted that in spite of an unprecedented prices increase at the world markets and the overall increase in finished rolled stock exports by 8.3%, strips export increase accounted only to 2.1%, but domestic supplies of these products remained almost unchanged. Thus, annual strips consumption increase was caused by imports increase by 17%. Despite the fact that NLMK and MMK significantly increased their domestic supplies of coated rolled stock as compared to 2003 by 48%, there is still deficit of coated rolled stock at the market.

The situation at the domestic market enabled Russian producers to increase their prices for hot-rolled stock by 47-53%, cold-rolled stock – by 40-42%, for galvanized rolled stock – by 31-35%. prices increase among the producers was surpassing prices increase at the secondary market.

Production growth in mechanical engineering accounted for 13%. The most rapidly developing industries were iron and steel and railway mechanical engineering (23% and 21% respectively.) production growth in motor-car construction accounted for 10%, but strips consumption by motor-car plants increased only by 3%. It is accounted for by the fact that the main increase in motor-car production in the country occurred due to the output increase at assembly enterprises. In 2004 the sales cost of foreign cars in Russia exceeded that of Russian cars.

Note :

- *from 01.01.2005 shipment to Belarus refers to export, so the data for the previous periods are brought to the comparable form;*
- *the a/m share reflects the customer's share in products supplies to the domestic or foreign markets.*

Factors that could affect sales by the Issuer of his steel products and possible actions of the Issuer aimed at decrease of such influence are listed in claim 2.5.1. «Industry risks» and 2.5.2. «Country and regional risks» of the present Report.

3.2.6. Practices regarding working capital and inventories.

Inventories

The Issuer controls inventories within current assets management. There is a standard «Control of the Company's current assets and control over their status», which stipulates the procedure for calculation, agreement, approval of the Company's current assets for production

divisions of NLMK, control over the status of current assets for the purpose of their optimum management.

Norms for current assets are established by order of NLMK as necessary. In case of certain factors changes (changes in production schedule, changes in prices for raw materials, diversification of product mix, etc.) the existing norms are occasionally reviewed.

NLMK does not generate inventories of finished products on its warehouses. All products are produced "to order". Pending of products on NLMK's warehouses mainly is due to railway operations balance.

Inventory turnover is calculated upon the following formula: (costs of sales of the goods, products, works, services sold over the period inclusive trade and administrative expenses for the period) / (average residual inventory for the period).

Accounts receivable

There is a standard «Prevention and control over accounts payable and receivable» in the Company, aimed at prevention of inaccurate generation of and control over accounts payable and receivable dynamics.

According to this standard divisions of NLMK (persons in charge of divisions) control over dates of liabilities performance regarding settlements and works aimed at collection of accounts receivable and repayment of accounts payable.

Information on failure to observe settlement time under contracts on products supply and on services of NLMK is reflected in the information system of the Company. On the basis of data from this system and information from persons in charge of divisions, Legal Issues Division will send claims to product consumers and suppliers of inventory holdings.

There is an accounts payable and receivable commission at NLMK, aimed at accounts payable and receivable curtailment. The commission investigates the results of accounts payable and receivable analysis and assessment, which are conducted at every stage of NLMK management, and develops suggestions for ameliorating the situation regarding accounts payable and receivable.

Cash and its equivalents

On the basis of bank financial performance analysis the safest and most trustworthy banks are selected. NLMK establishes a limit of monetary funds required for its day-to-day activity and temporarily surplus funds be placed in each of them. A part of temporarily surplus funds placed by NLMK in banks is subject to assets management which brings an extra income to the Company.

3.2.7. Raw materials.

For its production (to support production technologies) the Company purchases the following raw materials: coal concentrate, coke, iron ore, scrap, fluxes, ferroalloys, non-ferrous metals.

Sources of coal concentrate are: Kuznetsk coal field, Pechersk coal field and South Yakutsk coal field.

80% of the Company's demand for coke is satisfied by own coke & by-products division, while the deficit is covered for account of coke purchasing from Russian producers.

The main sources of iron ore are fields of ferruginous quartzite in Kursk Magnetic Anomaly.

Scrap is supplied mainly by enterprises of secondary metals of the Central Region of the Russian Federation.

The main suppliers of fluxes are local producers, i.e. Stagdok (Lipetsk) and Dolomit (the city of Dankov, Lipetsk region).

The Company's demand for main type of ferroalloys is covered mainly for account of Zaporozhsky plant of ferroalloys (the Ukraine), Kosogorsk Metallurgical Works (Russia).

The dominant non-ferrous metals used in steel-making process are aluminum and zinc. The

demand for aluminum is satisfied by Bratsky aluminium plant (Irkutsk region), as well as enterprises of secondary metals of the Central Region of the Russian Federation. Zinc being supplied is produced by Chelyabinsk zinc plant, OJSC "Electrozinc" and KazZinc (Kazakhstan).

For the 1th quarter of the current year the prices for the following raw materials grew (averaged data): iron ore concentrate (8.0%), zinc (33.3%), scrap (14.2%). At the same time prices for the following raw materials went down: coal concentrate (2.1%), coke (11.7%), ferroalloys (9.1%), aluminum (0,1%) (averaged data).

3.2.8. Main competitors.

Main competitive advantages of NLMK in sales are as follows:

- *diversified production with big share of high value-added products;*
- *advantageous geographic location in the center of European part of Russia (main metal-consuming area of the country) and relative proximity to main Russian and Ukrainian ports which significantly facilitates products export.*

3.2.9. Information on the Issuer's licenses.

Licenses:

Number: *ЛПЦ №04995.БЭ*

Issue date: *22.04.1998*

Validity: *till 1.03.2008*

Licenser: *Territorial Administration of Geology and Subsoil use in the Lipetsk region*

Activity: *Draft of fresh underground water for the production and drinking water supply of an enterprise.*

Possibility of license prolongation: *The license will not be prolonged (the activity is not performed)*

Number: *A 000590 Registration No. 4084*

3.2.10. Joint activity of the Issuer.

At present there is no joint activity of NLMK with any other companies.

As of 31.12.2005 Agreement No. 208 dd. 09.02.1994 with Scientific-technical enterprise "New machines and technologies" (P.O. Box 29/39 Dnepropetrovsk 320059) for joint activity was in force. Investments of NLMK accounted for 1,487,250.0 rubles. The purpose of investments is consortium establishment for construction and commissioning of a sector which will specialize in production of high-quality centrifugal rolls on the basis of Lutugin association on rolls production.

There is no information on financial performance of joint activity for 2004 and 2005 due to failure of a partner to a joint activity to present statements.

3.2.11. Additional requirements to Issuers being stock investment funds or insurance companies.

The information is not presented as the Issuer is not a stock investment fund or insurance company.

3.2.12. Additional requirements to Issuers specialized on mining operations.

The information on NLMK's subsidiaries and affiliated companies specialized on mining operations is provided.

I. Studenovskaya Open Joint-stock Mining Company (OAO «Stagdok»)

a) Mineral reserves:

According to the license received Stagdok has the right for subsoil of Sitov area of Sokol-Sitov field of fluxed limestone located at the territory of the Lipetsk region (3 km to the north from the city of Lipetsk and 0.5 km to the west from village Voskresenovka of the Lipetsk region).

The license for subsoil use: series JIIIЦ No. 54036 ТЭ

Issue date: May 30, 2002.

Expiry date: 31.12.2028.

The basis for licensing:

- supplementary exploration and revaluation of reserves in the period of 1995-2000;*
- change of field contour.*

Subsoil area given for use has the status of mining lease. The maximum depth of the area is +106 meters subject to mandatory preservation of protective pillar of 2 meters capacity above groundwater level.

Sitov area of Sokol-Sitov field with limestone reserves of 200901 thousand tons as of 01.01.2000, inclusive of 34095 thousand tons of quality A, 166806 thousand tons of quality C1, approved by (taking into account supplementary exploration and revaluation of the field) Territorial Commission on mineral reserves (Minutes No. 51 dd. June 29, 2000).

In I Q of 2005 limestone extraction volume amounted to 920 thousand tons.

As of 01.01.2005 the reserve residue of Sitov area of Sokol-Sitov field constitutes 180 755 thou t, inclusive of 13 949 thousand tons of quality A and 166 806 thousand tons of quality C1.

Within the given mining lease the company has the right for geological survey on translation of limestone reserves from low industrial qualities to high qualities.

The main liabilities of the Company.

1. To extract limestone with observation of the following conditions:

- to define annual extraction volume of limestone on the basis of mining operations plan (the volume of limestone extraction in 2005 was planned as 4359 thousand tons);*

- to agree the plan of mining operations, norms for losses and impoverishment with State engineering supervision bodies on the annual basis.

2. To effect payments for use of subsoil according to norms being in force:

- 6% of the product selling price for the right to extract fluxed limestone;

- 5.5% of the product selling price for the right to extract construction quality limestone.

To effect double payments for mineral loss infringement. To effect tax and other mandatory payments to the budget in time and in full.

3. To present statistical reports under form 5-2p to the Federal Geological Administration "FGA" and to Federal Geological Administration "Geological Fund of the Central regions of Russia" and to Lipetsk branch of FGA "Centergeolfund" by January 15 every year.

4. To present statistical reports under form 70-TII, 71-TII to bodies stated in these forms by January 25 every year.

5. In the course of the field use Stagdok is liable to constantly monitor groundwater through the existing observation network.

The liabilities described in the license are being fulfilled by the company in the established order.

b). Extraction and processing of minerals:

Main facilities and equipment used for extraction and processing of fluxed limestone at Sokol-Sitov field are:

- crushers and mills, excavators, BELAZ cars, drilling rigs, bulldozers, diesel locomotives.

c). Sales:

Limestone from Sitov area is suitable as a raw material for production of the products which are in conformity with the following requirements:

- TU 0750-005-00186855-97 "Limestone of industrial quality. Specifications";

- TU 0750-004-00186855-95 "Limestone of industrial quality extracted by Studenovskaya joint-stock company. Specifications".

Limestone crushed rock for construction purposes, limestone of industrial quality are not covered by "Product mix and services (works) to be mandatorily certified according to the Russian Law" approved by Decree No. 5 dd. 23.02.1998 and Decree No. 53 dd. 19.09.1999 "On changes and amendments to "Product mix ..." and are not subject to mandatory certification.

II. Open Joint-stock Company «Dolomit» (OAO «Dolomit»)

a) Mineral reserves:

Dolomit has the right to use subsoil for dolomite extraction at Dankov field within Bigildin and Prikarjerny areas under the license received.

Mineral resources are metallurgical dolomite, construction quality crushed rock and limestone (dolomite) flour.

As of 01.04.2005 the areas for which licenses were granted had 402231 thousand tons of balance sheet reserves of dolomite, inclusive of 246637 thousand ton in Bigildin area and 155594 thousand tons in Prikarjerny area. Dankov field covers (all areas) 670708 thousand tons of dolomite balance sheet reserves in total.

Reserve evaluation method was approved by Protocol No. 873 dd. September 26, 2003 of the State Committee on Mineral Reserves (GKZ).

Dolomit has the license No. JIIIИ 54112 ТЭ for subsoil use for the purpose of dolomite extraction at Bigildin and Prikarjerny areas of Dankov field in order to manufacture raw materials for steel-making process and construction materials. Subsoil areas have the status of mining lease.

The license was granted on: October 1, 2003.

Expiry date: 01.01.2029.

The basis for licensing was redrawing up of the valid license due to change of legal person name - subsoil user.

Validity of the licenses can be prolonged upon initiative of subsoil user.

Allocated subsoil areas are located 3-7 km to the north-east from the city of Dankov and railway station with the same name – Dankov UVJD, 95 km to the north-west of the city of Lipetsk. The relief is relatively plain with ravine beam type network. The area of Bigildin area is 528 hectares, of Prikarjerny one – 316 hectares, total area is 844 hectares. The areas are located on cropland that can be used for agricultural purposes. Minerals in the field are overlapped by argillaceous sand and off-grade carbonate deposits. The average capacity of stripping is 17.5 meters and one of productive strata– 23.0 meters. Dolomites are flooded down to 1 – 3 meters in the bottom part of the cut. The depth of exploitation is up to 40 meters from daylight.

Liabilities of the company:

- 1. To pay tax on dolomite extraction for construction materials manufacture in the amount of 5,5% of extracted mineral value;*
- 2. To pay tax on dolomite extraction as metallurgical raw materials in the amount of 6,0% of mineral value.*
- 3. To effect double payments for mineral loss infringement.*
- 4. To present a report under forms 5-ГР, 70-ТII, 71-ТII to controlling bodies on the annual basis.*
- 5. To redraw up papers for mining leases in areas under mining in the State Engineering Supervision of the Russian Federation in Verkhne - Donskoy county before 01.05.2005.*
- 6. To write off dolomite reserves accounted by the State in the field areas within the mining lease at the time of operations completion and perform complete reclamation of dislocated soils.*
- 7. To prepare an annual plan of mining works development for forthcoming year and to agree it with State engineering supervision of the Russian Federation in Verkhne-Donskoy county before December 15.*
- 8. Two years prior to license expiry date a project of mining opening final liquidation and dislocated soil reclamation shall be developed and approved.*

The stated liabilities: all liabilities stated above are fulfilled within established time. Liabilities under clause 5 (redrawing up of papers for mining lease) are being fulfilled about which a notification letter was sent to the corresponding controlling authorities.

b) Mineral processing:

Electric full-rotary excavators manufactured by UZTM of ЭКГ –5a and ЭКГ –4,6Б type with 5 m³ and 4.6 m³ bucket capacity respectively and max. digging height of 10.3 m which corresponds to height of common quarry face and stripping capacity are used for dolomite extraction in open-cut mine. Drill works are done by drilling rig of roller-bit drilling of СБШ – 250MH type. Borehole diameter is 250 mm at drilling depth of 10-12 meters. Ore is crushed by jaw crushers with simple movement of jaw of grade ШДП 3x12 and ШДП 15x21 with receiving hole of 900 mm x 1200 mm and 1500 mm x 2100 mm respectively and capacity of 180 m³/h and 550 m³/h respectively. The material is additionally crushed in cone secondary crushers of КСД –1750 g and КСД –2200 g of 200 m³/h and 500 m³/h capacity respectively. Material is classified by fractions by vibrating screens of ГvI, ГvC, ГvT types.

Screened material is transported by belt conveyors of horizontal and inclined type with belt width of B 800 mm, B 1000 mm and B 1200 mm, of capacity which is correspondent to capacities of main production lines, i.e. jaw and cone crushers.

b) Product sales:

Permissions for dolomite products sales and export quotas allocated by the Federal Law are not provided for.

III. Open Joint-stock Company «Kombinat KMAruda» (OAO «Kombinat KMAruda»)

a) Mineral reserves:

1). Kombinat KMAruda is granted the right to use the subsoil for deep-mined extraction of Korobkov field of ferruginous quartzite (inclusive of Stretensky area).

Type of minerals - ferruginous quartzite.

Reserves of the field were approved by Minutes (on reserves approval):

No. 6640 dd. September 22, 1972 of the State Commission on mineral reserves with USSR Council of Ministers;

No. 9770 dd. July 19, 1985 of the State Commission on mineral reserves with USSR Council of Ministers;

No. 12 dd. February 10, 2000 of the Territorial Commission on mineral reserves with Department of natural resources for Central Region of Mineral Ministry of the Russian Federation.

Extraction volume from the beginning of operations in the field as of 01.04.2005 is 154356 thousand tons (149715 thousand tons of air dried weight).

Rated annual capacity of the plant regarding processing of dry ore amounts to 3395 thousand tons.

Kombinat KMAruda was granted a license of series БЕЛ No. 08586 for the right to use subsoil for extraction of ferruginous quartzites at Korobkov field for further processing into iron-ore concentrate. The license was registered by Central region Department of natural resources of the RF Ministry of Natural Resources in the register No. 8586/БЕЛ 08586ТЭ.

Issue date of the license: 19.02.2001.

Expiry date of the license: 01.01.2026 г. (Validity of the license can be prolonged upon initiative of the subsoil user as well as in other cases stipulated in the Russian Law "On subsoil").

The license was granted on the basis of application and license documents submitted by Kombinat KMAruda.

The Korobkov field of ferruginous quartzites is located in proximity to the city of Gubkin, Belgorod region, and belongs to the central part of north-east part of the Kursk Magnetic Anomaly.

The field geological structure consists of Precambrian complex dislocated metamorphized rock broken in some places through by intrusions and dykes as well as water-bearing sedimentary deposits of Devonian and Mesocainozoic age, which unconformably and almost horizontally overlap crystal thickness. The capacity of sedimentary rock in average amounts to 116 meters. Iron-ore assise is considered as productive where ferruginous quartzites form two sub-assises of different capacity - 100-200 and 180-320 meters.

Ferruginous quartzites are covered everywhere by residual soil with average capacity of 18,3 meters, represented by oxidized and semi-oxidized quartzites and small deposits of high grade ore.

Under terms and conditions of the license Kombinat KMAruda shall within its validity:

*- effect payments for extraction of ferruginous quartzites and for use of land lots;
- observe the rules of safe operations, environment protection, mineral resources conservation, subsoil protection.*

Under special conditions of the license Kombinat KMAruda is liable to:

*- additionally agree upon payment terms or procedures for subsoil use in case of acting legislation change with the bodies which have issued the license;
- should any unknown mineral types and accompanying valuable components be found at the moment of license granting, the bodies which have granted the license have the right to call for state appraisal of geological materials and review the conditions of subsoil use;*

- prepare reports on fulfillment of subsoil use under the license for the previous year not later than on January 15 of the year following the reporting one;
- redrawing up of the valid license due to change of legal person name or status of the plant.

The liabilities stated in the license are being fulfilled by the company in full.

2). *Kombinat KMAruda has the right to use subsoil for groundwater operations of aquiferous stratum of Alb-senoman and Archaean Proterozoic aquiferous stratum on site of Korobkov field of ferruginous quartzites.*

Kombinat KMAruda was granted a license of series БЕЛ No. 07479 for subsoil use for the purpose of fresh groundwater extraction in amount of 625 m³/day for potable water and industrial water supply of the plant and outside consumers; extraction of groundwater for protection of mine opening from watering in case of Korobkov field development.

Issue date of the license: 15.05.2000.

Due to the changes dd. 30.03.2005 entered by the authorized bodies the license validity was prolonged till 01.04.2015.

The license was granted on the basis of application and licensing documents submitted by Kombinat KMAruda.

Groundwater reserves were not approved. (In accordance with the changes to the license dd. 30.03.2005 (inclusive of the clause concerning subsoil usage conditions) groundwater reserves estimation of Korobkov field of ferruginous quartzites development should be conducted till 01.11.2007 with their approval in the established order).

Aquiferous stratum of Alb-senoman lies in depth intervals of 70-100 m and consists of different granular sands which are overlapped by thickness of chalk, sand and loams. It is separated from ore-crystalline massif by thickness of Jurassic clays. Groundwater is under pressure, depth of occurrence of groundwater level is 46-55 m. Aquiferous stratum is used by two water wells located within mining lease of the plant.

Archaean Proterozoic aquiferous stratum of 150-200 m capacity is referred to cracked area of crystalline rock, confining bed of which lies at depth of 120-150 m.

Archaean Proterozoic groundwater is draught by draining of mine opening with the following pumping out by mine drainage.

According to terms and conditions of the license Kombinat KMAruda effects payments within the license validity for use of water bodies in accordance with the existing legislation of the Russian Federation.

The liabilities stated in the license are being fulfilled by the company in full.

3) *Kombinat "KMAruda" has the right to use subsoil for groundwater operations of quaternary Alb-senoman aquiferous stratum in the vicinity of Kaplino village, Stariy Oskol region.*

Kombinat "KMAruda" was issued a license for subsoil right: extraction of fresh groundwaters for economic and potable needs of recreation centre "Gorniyak". License BЭ series БЕЛ number 50108. The license was registered by the Mineral Committee of Belgorod region 07.06.2002 Nr. 108/БЕЛ 5010837 in the register.

License issue date – 07.06.2002.

License expiry date – 01.03.2012 (License validity can be prolonged in the established order).

The license was granted on the basis of application and licensing documents submitted by Kombinat KMAruda.

Groundwater reserves were not approved.

Groundwater is intaken by the water well located in Stariy Oskol region, north of Kaplino village on the left bank of the Oskol river in the area of Stariy Oskol water storage basin at the recreation centre of Kombinat "KMAruda".

The groundwater body is located in the northern part of Voronezh crystalline massif. The geological structure is made up of Pre-Cambrian metamorphic rocks and sedimentary rocks consisting of Devonian, Jura, chalk.

For water supply purposes quaternary Alb-senoman aquiferous stratum is used as the most water-abundant and the first thick stratum from the surface. The water well 38 m deep was drilled in

1987. The bearing strata of the aquiferous stratum under operation are made up of various granular sands up to 31 m thick. The aquiferous stratum is overlapped by small-granular sands 6 m thick. The stratum toe is made up of water-proof Jurassic clays.

In accordance with the license conditions "Kombinat KMAruda":

- effects regular payments for groundwater extraction, for the subsoil area located in the Don river basin in accordance with the effective legislation;
- grants payments for the land lot in accordance with the effective legislation;
- in case of the respective legislation changes groundwater extraction conditions, payments for their usage and the order of information submission specified in the license are subject to additional agreement with the issuing bodies.

In accordance with special conditions "Kombinat KMAruda" is liable:

- to submit information on subsoil usage conditions observation to Mineral Committee of Belgorod region annually till January, 10; information on groundwater monitoring to "Belgorodgeomonitoring" quarterly not later than the 10th day of the month following the reporting quarter;
- in case of significant deviations of well production values, level lowering, water chemical composition indexes from the typical values as of the license issuance period, Mineral Committee of Belgorod region and "Belgorodgeomonitoring" should be informed;
- in case of reorganizing or changing of the legal person's name or loss of the license application for reissuance of the license. License is reissued in the order established for its issuance.
- to ensure observation of all environmental and nature-conservation measures in the course of activities related to subsoil usage envisaged by provisions of the authorized environmental bodies.

Obligations specified in the license are fulfilled by the plant in the established order.

b) Mineral processing:

The main mining equipment used in mining roadheading:

drilling machines ЛКР-ТЗ, ЛКРУ, punchers ПП-63, ПП-80НВ, ССПБ-1К, ПТ-48, loading machines 1 ППН-5, loading – hauling machines ПТ-4, scraper winches 55АС-2СМ.

Rocks are transported from funnel and breakage mining faces by electric locomotives 10 КР and 14 КР in bogies of УВБ-4 and ВГ-4,5.

Blast holes are drilled by machine НКР-100 М. Blast holes are loaded by machines МЗКС-160.

Extracted ore is preliminary crushed in crushers СМД-118 1Б and ДСД –1017 in underground crushing complexes. Crushed ore is transported to processing plant along shaft equipped with 2 skips of 4 tons capacity each and hoist engine 2 Ц-4×1,8 and along shaft equipped with 2 skips of 13 tons each with hoist engine 2 Ц5-2,3. Ventilation of mine opening is done by fans ВЦД-47 У and ВЦД –31,5.

All ore extracted is processed into concentrate in processing plant which is technologically connected with skip shafts.

The main crushing – milling and mineral processing equipment of the plant:

- Cone crusher – КСД-1750, КМД-1750, КСД-2200, КМД-2200;

- Unbalanced-throw screen – ГИТ-52 Э, ГИТ-31;

- Ball mill – МШР 32-31;

- Sizing screen – К-СН-24;

- Hydrocyclone – ГЦ-500;

- Magnetic separators - ПБМ-90/250, ПБМ-120/300;

- Vacuum pumps -- ВВН2-50;

- Vacuum filters – ДОО 150;

- Gravel pump – 6 НП.

- Stationary belt conveyor of different types.

c) Product sales:

Finished products (iron ore concentrate) are sold on the basis of agreements with consumers.

Permissions by the State authorities for sales of the above mentioned products are not required.

IV. Open Joint-stock Company «Stoilensk Mining Company» (OAO «Stoilensky GOK»)

a) Mineral reserves:

1) According to the license received Stoilensk Mining Company has the right for digging of Stoilensk iron ore and nonmetallics field.

The field was explored by Belgorod geological surveillance expedition.

State Commission on minerals reserves with Ministry of Ecology and Natural Resources of the Russian Federation for quarry operations (500 meters to daylight) approved reserves of the following minerals (Protocols No. 1, No. 2 dd. January 24, 1992):

- high grade iron ore;*
- magnetite quartzites;*
- oxidized quartzites;*
- clay and loam;*
- chalk;*
- marl;*
- sand;*
- decayed slate;*
- crystalline slate;*
- quartzitic sandstone;*
- granite gneiss.*

The balance sheet reserves remainder as of 01.01.2005:

- high grade iron ore of category B+C1 – 58054 thousand tons; of category C2 - 11991 thousand tons;

- magnetite quartzites of category B+C1 – 4951642 thousand tons; of category C2 – 1563565 thousand tons;

Extraction volume starting from the field excavation beginning on 01.01.2005 accounted for:

- high grade iron ore - 103941,8 thousand tons;*
- magnetite quartzites – 303572 thousand tons;*

Annual design capacity of the Company on high grade iron ore excavation is 1200 thousand tons and 25440 thousand tons on magnetite quartzites.

Stoilensk GOK was granted a license of series BEJI №13030 TЭ registered by Russian Mineral Ministry No. 3955 dd. 24.03.2005 for subsoil right– excavation of iron ore, ferruginous quartzites of Stoilensk field, as well as co-nonmetallics located in stripping and special dumps. Marketable products produced from processing of iron ore are sintering ore and iron ore concentrate. Co-excavated nonmetallics, finished products from their processing are used in-house or in other companies.

Issue date of the license: March 24, 2005.

License expiry date: January 1, 2016. (Validity of the license can be prolonged upon initiative of a subsoil user as well as in other cases set forth in the Russian Law “On subsoils”).

The license was granted on the basis of application and licensing documents submitted by Stoilensk GOK.

Under terms and conditions of the license Stoilensk Mining Company shall within its validity:

- effect payments for extraction of minerals and for use of land lots;*
- observe the rules of safe operations, environmental protection, mineral resources conservation, subsoil protection.*

Under special conditions of the license Stoilensk Mining Company is liable to:

- additionally agree upon payment terms or procedures for subsoil use in case of existing legislation change with the bodies which have issued the license;*
- should any unknown mineral types and accompanying valuable components be found at the moment of license granting, the bodies which have granted the license have the right to call for state appraisal of geological materials and review the conditions of subsoil use;*
- prepare reports on fulfillment of subsoil use under the license for the previous year not later than on January 15 of the year following the reporting one;*
- reissuance of the license due to change of legal person's name or status of the plant.*

The obligations stated in the license are being fulfilled by the Company in full.

2) Stoilensk GOK has a right under license of series BEJI No. 50162 BЭ to extract drainage groundwater in order to dewater quarry of Stoilensk ferruginous quartzites field.

Issue date of the license: 13.01. 2003.

License expiry date: 01.11.2012.

The license was granted on the basis of application and licensing documents submitted by Stoilensk GOK.

Drainage groundwater reserves of Stoilensk field were approved upon Turonian Maastricht, Alb-senoman aquiferous stratum and Archean Proterozoic aquiferous complex of 79 thousand meter³/day for category B (Protocol No. 3 GKZ dd. January 24, 1992z.)

Turonian Maastricht aquiferous stratum refers to top interstitial weathering zone of marl-chalk stratum with 60-90 meters capacity of the same age. The stratum is free-flow, static level is at 25-50 meters depth. The stratum around the quarry is fully drained.

Alb-senoman aquiferous stratum refers to medium sands of the same age located at 90-110 meters depth overlapped by sand-clay deposits of quaternary age and chalk – marl rocks. The stratum is free-flow, depth is 63-94 meters. Decrease of groundwater level in area of drained contour is 40-45 meters.

Archean Proterozoic aquiferous stratum of 150 m capacity refers to cracked area of crystalline rock, confining bed of which lies at depth of 120-140 meters. Aquiferous stratum is under pressure, piezometric level is at 75-100 meters depth, quarry is drained.

Stoilensk GOK drains groundwater by 106 draining rise wells drilled from ring system of horizontal quarry of 35 km total length. Underground water intake covers 29 rise drain holes and mine drainage from shaft No. 3.

Mine drainage in 2004 accounted for 44 423 904 m³ in total inclusive of chemically treated water 5 640 600 m³ per annum.

Area of water intake refers to Don river basin.

“Subsoil user” is permitted to continuously intake groundwater in order to drain quarry with decrease of groundwater level till depth of drainage working laying and in quantity providing for safe mining operations.

On the territory of “subsoil user” there is a network of observation wells by which subsoil user monitors groundwater and studies hydrodynamic and hydrochemical conditions of groundwater in the zone of a mining company influence.

In 2005 – 2006 Stoilensk GOK plans to reevaluate groundwater reserves under category B with their approval by GKZ.

According to license conditions Stoilensk GOK shall effect payments for use of water bodies in accordance with the existing legislation of the Russian Federation.

The liabilities stated in the license are being fulfilled by the Company in full.

b) Minerals processing:

1. Main technologies used:

The field is being quarried: opened by a networks of trenches. Opening system is with outside refuse disposal. Quarry depth is 300 meters. Loose deposits are being opened by rotor complex and cyclic excavators. Rock stripping, high grade ore and ferruginous quartzites are extracted by cyclic excavators with preliminary opening by drilling-and-blasting operations. Ore is removed from the quarry by trucks, railway and conveyor belts.

Technological scheme of high grade ore processing covers three stages of crushing and screening with separation of sintering ore. Processing of ferruginous quartzites (magnetite) takes three stages of crushing with closed final stage, three stages of milling, magnetic separation, deslimation, dehydration of concentrate in vacuum filters. Hydrotransport of processing tailings is pressure - self floating. Water recycling is used.

2. The following equipment is used:

2.1. Mining operations:

- drillings rigs СБШ –250 МН;
- charge machine “Акватол”, МЗ-4;
- cyclic excavators ЭКГ-10, ЭКГ-8И, ЭКГ-4,6(4У, 5У, 5А), ЭШ10/70;
- rotor complex КУ-800.

2.2 Transportation of mining mass:

- dump trucks BelAZ 7513, 7548, 7555;
- electric locomotives ОПС-1, diesel locomotive ЧМЭ-3, ТЭМ-2, М-62;
- boxcars 2ВС-105;
- conveyor belts in rotor complex КУ-800.

2.3 Crushing and beneficiation equipment:

- crushers – ШКД 2100/1500, ДМРуЭ14,5/13, ККД 1500/180, КСД 3000Т, КМД 3000Т2-ДП;
- screens ГИСТ-72, ГИТ-52Н;
- classifiers 2КСН 3,0x17,2;
- mills МШЦУ55x65, МШЦ 55x65;
- separators ПБМ-П-120/300, ПБМ-ПП-150/200, ПБМ-ПП-120/300;
- deslimers МД-12;
- vacuum filters ДШ 100/2,5;
- pumps ГРК, ГРТ 1250/71, ГРК 1600/56,
- stationary, reverse conveyor belts.

c) Sales

Finished products (sintering ore and iron ore concentrate) are sold on the basis of agreements concluded with customers.

Federal Law does not provide for any permissions from state bodies for sale of the above mentioned products.

3.2.13. Additional requirements to the Issuers the core activity of whom is communication services rendering.

The information is not being submitted due to the fact that the Issuer does not render

communication services.

3.4. Plans for future activity.

In 2005 NLMK will finish the first stage of Technical Upgrading Program which covers years 2000-2005, which is basically aimed at renewal of production facilities, increase in high value-added products output, improving quality and diversification of product mix, improving of production environmental purity).

In 2005 NLMK plans to conduct major overhauls and revamping of a number of main metallurgical lines. NLMK's 2005 production schedule is drawn taking account of upcoming overhauls and revamping of the major metallurgical lines, which will lead to reduction of upstream products regarding the 2004 level. Strips production, however, is planned to be maintained at the 2004 level. It will change favourably: galvanized and pre-painted strips output will increase, increase in production of NGO and GO rolled stock output is going to be increased.

In 2005 domestic sales of steel products will reach 29% in physical terms and 36% – in value. The Company continues taking measures aimed at management structure improvement and labour productivity increase. In 2005 NLMK expects to maintain a high profitability level and invested capital return.

3.5. The Issuer's equity holding in industrial, bank and financial groups, holdings, concerns and associations.

The Issuer does not hold any equity in industrial, bank and financial groups, holdings, concerns and associations.

3.6. Subsidiaries and affiliated companies of the Issuer.

1. Full name: *Limited-liability company «Lipetsk insurance company «Shans»*

Abbreviated name: *OOO LSO Shans*

Domicile: *30, ul. Nedelina, Lipetsk 398059 Russia*

The basis for recognition of subsidiary status with respect to the Issuer: *the Issuer holds over 50 % of the equity*

The Issuer's share in subsidiary's equity: *88.62 %*
The Issuer's share of common stock of the subsidiary: *88.62 %*
The subsidiary's share in the Issuer's equity: *no*
Core activity of the subsidiary: *production of flux limestone for steel-making process, production of industrial limestone for sugar industry, production of lime-bearing materials and crushed rock for construction and road works.*
Importance for the Issuer: *significant influence, production process servicing.*

12. Full name: *Limited-liability company «Vtormetsnab NLMK»*
Abbreviated name: *OOO Vtormetsnab NLMK*
Domicile: *2, pl. Metallurgov, Lipetsk 398040 Russia*
The basis for recognition of subsidiary status with respect to the Issuer: *the Issuer holds over 50 % of the subsidiary's voting shares*
The Issuer's share in subsidiary's equity: *70.00 %*
The subsidiary's share in the Issuer's equity: *no*
Core activity of the subsidiary: *storage, processing and sale of iron-an-steel scrap*
Importance for the Issuer: *production process servicing.*

13. Full name: *Limited-liability company «Independent Transport Company »*
Abbreviated name: *OOO NTK*
Domicile: *32, Leninsky prospect, Moscow 119991 Russia*
The basis for recognition of subsidiary status with respect to the Issuer: *the Issuer holds over 50 % of the subsidiary's voting shares*

The Issuer's share in subsidiary's equity: **70.00 %**
The subsidiary's share in the Issuer's equity: **no**
Core activity of the subsidiary: **freight and other forwarding services**
Importance for the Issuer: **production process servicing.**

14 Full name: **Open joint stock company «Tuapse trading sea port»**
Abbreviated name: **ОАО ТМТП**
Domicile: **2, ul. Maxim Gorky, Tuapse, Krasnodarsky krai 352800 Russia**
The basis for recognition of subsidiary status with respect to the Issuer: **the Issuer holds over 50% of voting shares**
The Issuer's share in subsidiary's equity: **69.41 %**
The Issuer's share of common stock of the subsidiary: **69.41 %**
The subsidiary's share in the Issuer's equity: **no**
Core activity of the subsidiary: **handling, servicing of domestic and foreign vessels.**
Importance for the Issuer: **production process servicing.**

15. Full name: **Open joint-stock company "Northern Oil and Gas Company"**
Abbreviated name: **ОАО Severneftegas**
Domicile: **bldg. 1, 14, pl. Spartakovskaya, Moscow 105082 Russia**
The basis for recognition of subsidiary status with respect to the Issuer: **the Issuer holds over 50% of voting shares**
The Issuer's share in subsidiary's equity: **62.0 %**
The Issuer's share of common stock of the subsidiary: **62.0 %**
The subsidiary's share in the Issuer's equity: **no**
Core activity of the subsidiary: **exploration of oil and gas fields.**
Importance for the Issuer: **insignificant influence.**

16. Full name: **Limited-liability company «Lipetsk City Energy Company»**
Abbreviated name: **ООО ЛГЕК**
Domicile: **4-а, Pyotr Velikiy square, Lipetsk 398001 Russia**
The basis for recognition of subsidiary status with respect to the Issuer: **the Issuer holds over 50 % of the equity**
The Issuer's share in subsidiary's equity: **51.00 %**
The subsidiary's share in the Issuer's equity: **no**
Core activity of the subsidiary: **purchasing, generation, sale, transmission of electrical and heat energy.**
Importance for the Issuer: **production process servicing.**

17. Full name: **Private bank of social development and construction «Lipetskcombank»**
Abbreviated name: **Lipetskcombank**
Domicile: **8, ul. Internatsionalnaya, Lipetsk, 398600 Russia**
The basis for recognition of subsidiary status with respect to the Issuer: **the Issuer holds over 50 % of the subsidiary's voting shares**
The Issuer's share in subsidiary's equity: **50.07 %**
The Issuer's share of common stock of the subsidiary: **50.14 %**
The subsidiary's share in the Issuer's equity: **no**
Core activity of the subsidiary: **banking**
Importance for the Issuer: **production process servicing.**

18. Full name: **Open joint-stock company «Lipetsky Gipromez»**
Abbreviated name: **ОАО Lipetsky Gipromez**
Domicile: **1, ul. Kalinina, Lipetsk 398600 Russia**
The basis for recognition of affiliated company status with respect to the Issuer: **the Issuer holds over 20% of the subsidiary's voting shares**
The Issuer's share in affiliated company's equity: **43.44 %**

The Issuer's share of common stock of the affiliated: **43.44 %**
 The affiliated company's share in the Issuer's equity: **no**
 Core activity of the affiliated company: **development of design documentation.**
 Importance for the Issuer: **production process servicing.**

19. Full name: **Open joint-stock company «Kombinat KMaruda»**
 Abbreviated name: **OAO Kombinat KMaruda**
 Domicile: **2, ul. Artema, Gubkin, Belgorod region 309182 Russia**
 The basis for recognition of affiliated company status with respect to the Issuer: **the Issuer holds over 20% of the subsidiary's voting shares**
 The Issuer's share in affiliated company's equity: **32.89 %**
 The Issuer's share of common stock of the affiliated: **32.89 %**
 The affiliated company's share in the Issuer's equity: **no**
 Core activity of the affiliated company: **ore extraction and dressing**
 Importance for the Issuer: **significant influence, production process servicing.**

20. Full name: **Limited-liability company «Neptune»**
 Abbreviated name: **OOO Neptune**
 Domicile: **office No. 35, 1 «v», ul. Adm. Makarov, Lipetsk 398005 Russia**
 The basis for recognition of subsidiary status with respect to the Issuer: **the Issuer holds over 20 % of the equity**
 The Issuer's share in subsidiary's equity: **25 %**
 The subsidiary's share in the Issuer's equity: **no**
 Core activity of the subsidiary: **sport facilities, medical activity, organization of festivals, concerts and other entertainment.**
 Importance for the Issuer: **insignificant influence.**

3.7. Composition, structure and value of the Issuer's fixed assets, information on plans of acquisition, change, retirement of fixed assets as well as on all events of the Issuer's fixed assets charge.

3.7.1. Fixed assets.

Information on initial (replacement) value of fixed assets and value of accrued amortization and depreciation as of 31.03.2005.

Method of fixed assets revaluation:

The Issuer revalued the property on the basis of expert report.

Separate groups of fixed assets of NLMK were revaluated for the stated period by Closed joint-stock company "Center of professional appraisal" (Moscow).

According to the submitted report on the Company's fixed assets revaluation all calculations have been done by appraisers in full conformity with the Russian Law, standards, letters, explanations and other guides on fixed assets revaluation, published by the RF Government, the State Statistics Committee of the Russian Federation, the RF Ministry of Economics, the RF Ministry of Finance.

Method of revaluation:

Fixed assets of the Company were revaluated by direct translation of their book values as applies to prices for corresponding types of fixed assets on the date of revaluation (01.01.2000), confirmed by expert judgments of appraisers on market value of the stated assets.

Depending on fixed assets group and nature of object under assessment different evaluation techniques of fixed assets replacement value definition were applied based on the following methods of fixed assets revaluation – comparative and cost estimation approaches. These approaches are

based on the principle of replacement according to which costs related to formation, acquisition and commissioning of object under assessment (for cost method) are necessary to be calculated to define the value of observed depreciation or substitution value being the basis for calculation and find an object having similar functional and design parameters.

Observed depreciation of fixed assets object stands for either value of reproduction of its complete replica in current prices as of the date of assessment, or acquisition value of new object completely identical to the evaluated one upon functional, design and other parameters in current prices.

Substitution value of fixed assets object stands for minimum acquisition value of similar new object, very close to the evaluated one on the basis of all functional, design and operational parameters in current prices.

Full replacement cost of buildings, structures and transfer mechanisms was calculated on the basis of cost-is-no-object approach to property revaluation on the assumption of actual components – negotiated prices, estimations for civil works and erection, wholesale prices for construction materials, fuel, energy, machinery, equipment, tools, freight tariffs, etc. At that component division method and resource method were applied.

Full replacement value of equipment and machinery was revaluated by index method.

Replacement value of vehicles was defined according to the following methods:

- *similar object price method;*
- *cost component method;*
- *index method;*
- *direct comparison method.*

Plans on acquisition, replacement, retirement of fixed assets the amount of which accounts for 10 percent and more of their total value:

In the 2nd quarter of 2005 NLMK does not plan to acquire, purchase, replace or retire fixed assets the amount of which accounted for 10 percent and more of their total value.

Information on fixed assets charge as of the date of the reporting period end:

Charged assets (preliminary information): *fixed assets of NLMK (real assets, transport means, machinery and equipment, agricultural machinery, furniture, office equipment, commercial equipment, sport tools), original (replacement) cost of which amounts to 145 949 thousand rubles.*

Nature of charging: *granted on lease and transferred to free temporary use*

Date of charging: *starting from the date of transfer*

Validity of charging: *up to one year under agreements*

Other terms of charging: *none*

3.7.2. The value of the Issuer's property.

As of the date of the reporting quarter end:

- *total initial (replacement) value of buildings, structures, land lots as well as property being registered by the state but being accounted on NLMK's balance equals to 17 368 326 126 rubles;*
- *accrued amortization 8 836 229 910 rubles.*

Within 12 months from the date of reporting quarter end NLMK revalued separate fixed assets to be sold without reflection of revaluation results in accounting balance.

There were no significant changes in property of the Issuer after revaluation.

IV. Information on financial performance of the Issuer.

4.1. Results of the Issuer's financial performance.

4.1.1. Income and losses.

Indices dynamics characterizing the Issuer's profitability/ unprofitability:

<i>Indice</i>	<i>2000</i>	<i>2001</i>	<i>2002</i>	<i>2003</i>	<i>2004</i>	<i>I quarter 2005</i>

The stated indices have been calculated according to the methods recommended in the Provision on information disclosure by securities issuers approved by the Decree No. 03-32/nc. of the Central Bank Federal Committee d.d. July 2.

Over the period of 2000-2004 the major financial and economic indices of the Issuer improved: sales proceeds and net profit increased.

In 2000 sales proceeds increased by 1.5 fold regarding the 1999 level. The most significant factors pertaining to the growth of this index were: growth of prices for the main kinds of metal products in the 1st half-year, 2000, US Dollar exchange rate growth, increase in downstream products share in production pattern and structure of sales of downstream products.

A significant increase in prices for the main kinds of raw materials, materials and fuel in 2000 led to increase in cost value of products sold (+53% regarding 1999).

In 2000 net profit growth amounted to 76% and exceeded gross profit increase (+46%). It is accounted for by selling of refrigerator plant "Stinol" and transition of the plant's fixed assets, which brought additional profit to the Issuer.

In 2001 sales proceeds decreased by 4% regarding the 2000 level. It was mainly caused by the continuing recession at the world metal products market (which started in the 2nd half-year of 2000). A low level of prices for metal products at the foreign markets, reduction of sales volumes on the one hand, and increase in sales cost value (+17%) because of growth of prices for the main kinds of raw materials, fuel and railway tariffs on the other hand, caused net profit decrease by 42%.

In 2002-2004 the main positive factors which facilitated improvement of the Company's financial performance were the following: sales volume increase and significant increase in prices for the main kinds of metal products due to favourable market conditions at the domestic and foreign markets. Consequently sales proceeds growth amounted to 43% in 2002 regarding 2001, to 41% in 2003 regarding 2002, to 68% in 2004 regarding 2003.

Growth of prices for the main kinds of raw materials, fuel and railway tariffs at the rates lower than the rates of finished products increase made it possible to increase the Company's net profit by 2.5 fold in 2002 regarding 2001, by 49% in 2003 regarding 2002, by 2.2 fold in 2004 regarding 2003.

In the 1st quarter of 2005 proceeds decrease by 7% regarding the 4th quarter of 2004 with the cost value at the level of the 4th quarter (+1%) led to net profit decrease by 30%.

Over the period 2000 – 2004 labour productivity index was growing with the exception of 2001, which is mainly accounted for by sales proceeds increase. Apart from it the average listed staff of the Company was decreasing since 2002.

Thus, in 2000 labour productivity increased by 43%;
in 2002 labour productivity increased by 52%;
in 2003 labour productivity increased by 59%;
in 2004 labour productivity increased by 74%.

In 2001 labour productivity index decreased by 8% as a result of sales proceeds amount decrease (+4%) and staff number increase (+5%).

In the 1st quarter of 2005 labour productivity decreased as compared to the 4th quarter of 2004, which is accounted for by sales proceeds decrease.

Yield of capital investments ratio

Over the period of 2000 – 2004 the level of the main production funds efficiency increased significantly which is attested to by the increase in yield of capital investments ratio. The growth of this index was mainly caused by sales proceeds increase at the rates exceeding the growth rate of fixed assets average.

In 2001 there was a certain decrease in yield of capital investments index (to 4.0) regarding the 2000 level as a result of sales proceeds decrease (-4%).

The 1st quarter of 2005 saw the decrease in yield of capital investments value regarding the 4th quarter of 2004.

In 2000-2004 the efficiency of the Company's assets was on the increase (with the exception of 2001), which is attested to by ROE and assets profitability indices. Increase in the Issuer's net profit was the main factor of the growth of assets profitability and ROE.

In 2001 assets profitability decreased to 18.5% and ROE decreased to 22.2% as a result of a significant decrease in the Issuer's net profit.

In the 1st quarter of 2005 there was a decrease in assets profitability and ROE regarding the 4th quarter of 2004 as a result of net profit decrease.

2001 saw a significant decrease in the Company's sales profitability. It was mainly caused by decrease in prices for metal products starting from the 2 half of 2000 with the simultaneous increase in products cost value because of increase in prices for the purchased raw materials. In 2001 sales proceeds reduction (-4%), sales cost value growth (+17%) caused a significant decrease in profit from sales (-41%) and, consequently, in sales profitability up to 22.2%.

In 2002-2004 the Company's profitability grew up as a result of sales proceeds growth exceeding sales cost value; sales profitability indices accounted for 35.7% in 2002, for 41.8% in 2003, for 49.5% in 2004.

In the 1st quarter of 2005 regarding the 4th quarter of 2004 sales proceeds decrease with a certain cost value growth lead to sales proceeds decrease and, consequently, to sales profitability decrease.

4.1.2. Factors which influenced sales proceeds of the Issuer and income (losses) from the Issuer's operations.

<i>Indice</i>	<i>2000 to 1999</i>	<i>2001 to 2000</i>	<i>2002 to 2001</i>	<i>2003 to 2002</i>	<i>2004 to 2003</i>	<i>I quarter, 2005 to IV quarter, 2004</i>
<i>Changes of sales proceeds (decrease -, increase +)</i>	51%	-4%	43%	41%	68%	-7%
<i>Changes of cost value of products sold (decrease -, increase +)</i>	53%	17%	18%	28%	47%	1%
<i>Sales profit change (decrease -, increase +)</i>	46%	-41%	130%	65%	62 p.	-16%

In 2000 sales proceeds increased by 51% as compared to 1999.

Sales proceeds increase was driven by the following factors:

- *the growth of the average prices level per metal products sold (52%);*
- *growth of US dollar exchange rate (19%);*
- *sales structure changes (18%);*
- *increase in sales of metal products (11%).*

In 2000 cost value of the products sold increased by 53% regarding the 1999 level, which occurred under the influence of the following factors:

- *growth of prices for raw materials and energy supply (69%);*

- increase in absolute costs (salaries and wages, repair costs, taxes and sales expenses) (16%),
- production volume growth and changes of metal products structure (12%);
- flow rate increase and changes of structure of the used raw materials (3%).

In 2001 proceeds from sales of products, works, services decreased by 4% regarding 2000. Dollar exchange rate increase (56%) and changes in structure of products sold (44%) caused a certain increase in sales proceeds. Decrease in the average level of prices for metal products (76%) and reduction of sales volumes (24%) influenced significantly the proceeds amount, which reduced the total sales proceeds amount.

In 2001 sales cost increased by 17% regarding the costs level of 2000. Sales cost increase was caused by: growth of prices for raw materials and energy supply (50%) and absolute costs increase (change of production in progress, salaries and wages and sales expenses) (50%). At that a slight economy achieved by production volume decrease and changes of metal products shipping structure (38%) as well as of structure of the used raw materials (62%).

In 2002 sales proceeds increased by 43% as compared to the 2001 indice.

Sales proceeds increase was caused by the following factors:

- growth of the average level of prices for the products sold (56%);
- sales volumes increase (24%);
- US dollar exchange rate (14%);
- sales structure change (6%).

In 2002 cost value of the products sold increased by 18% regarding the actual costs of 2001. Sales cost value increase was caused by the following factors:

- production volume increase and changes in the structure of metal products shipment (32%);
- increase in absolute costs (change of construction in progress, salaries and wages, taxes and sales expenses) (32%);
- growth of prices for raw materials and energy supply (31%);
- change of structure of the used raw materials (5%).

In 2003 proceeds from sales of products, works, services increased by 41% regarding the 2002 level.

Sales proceeds increase was caused by the following factors:

- growth of the average level of prices for the products sold (85%);
- sales volumes increase (11%);
- US dollar exchange rate (4%).

Proceeds volume decreased insignificantly under the influence of changes in structure of the products sold.

In 2003 cost value of the products sold increased by 28% regarding 2002, which was caused by the following factors:

- growth of prices for raw materials and energy supply (81%),
- production volumes increase and change in metal products structure (12%),
- absolute costs increase (salaries and wages, insurance, taxes, sales costs) and changes in structure of the used raw materials (7%).

In 2004 proceeds from sales of products, works, services increased by 68% regarding the 2003

level.

Sales proceeds increase was caused by the following factors:

- *growth of the average level of prices for the products sold (93%);*
- *sales volumes increase (7%).*

Dollar exchange rate trend and change in the structure of products shipped facilitated proceeds decrease.

In 2004 cost value of the products sold increased by 47% regarding 2003, which occurred under the influence of the following factors:

- *growth of prices for raw materials and energy supply (78%),*
- *increase in absolute costs (taxes, change in production in progress, amortization) (11%),*
- *production volumes increase (6%),*
- *change in structure of the used raw materials (5%).*

In the 1st quarter of 2005 proceeds from sales of products, works, services decreased by 7% regarding the 4th quarter of 2004.

Sales proceeds decrease was caused by the following factors:

- *sales volumes decrease (75%),*
- *dollar exchange rate trend (15%),*
- *decrease in the average level of prices for the products sold (9%).*

Change in the structure of products shipped facilitated sales proceeds increase. This factor, however, didn't compensate for the negative influence of the three a/m factors.

Cost value of the products sold in the 1st quarter of 2005 remained almost at the level of the 4th quarter. It is accounted for by the various influence of the following factors: growth of prices for raw materials and energy supply as well as of absolute costs (amortization, sales expenses) facilitated cost value increase whereas production value and application rate decrease facilitated its reduction.

**) degree of the factor's influence (the factor's share in the increase or decrease of proceeds and cost value indices) is specified in brackets.*

<i>Quick liquidity factor</i>	3,39	2,27	5,06	6,99	6,21	7,77

The stated indices have been calculated according to the methods recommended in the Provision on information disclosure by securities issuers approved by the Decree No. 03-32/nc. of the Central Bank Federal Committee d.d. July 2.

Own current assets

Over the period of 2000 – 2004 own current assets value increased by 3.7 fold.

In 2000 due to current assets increase by 1.8 fold (at the expense of short-term financial investments and inventories amount) and short-term liabilities decrease (-4%) regarding 1999 the Issuer's own current assets increased by 2.3 fold.

In 2002 current assets increase by 36% (at the expense of monetary funds and short-term financial investments) as well as short-term liabilities decrease by 28% regarding 2001 provided for the increase in own current assets by 1.6 fold.

In 2003 in spite of increase in the Company's short-term liabilities by 1.4 fold as compared to the 2002 level the Issuer's own current assets increased by 1.8 fold. Own funds increase was brought about by current assets increase by 1.8 fold (at the expense of short-term financial investments, short-term accounts receivable and inventories amount).

Own current assets increase in 2004 is accounted for by a significant own capital increase at the expense of retained profit, which made it possible to finance both non-current assets increase and partially increased working capital necessity.

In the 1st quarter of 2005 non-current assets increased insignificantly, thus the whole own capital increase was directed at current assets financing, which lead to own current assets increase.

Financial dependence factor

Financial dependence factor was on the decrease over the period of 2000 – 2004. This factor stands for a degree at which the Issuer's assets are being financed at the expense of borrowed funds, consequently, the factor reduction can be considered a positive tendency.

The most significant decrease of financial dependence factor occurred in 2002 regarding the 2001 level (from 0.19 to 0.09). It is mainly accounted for by the Issuer's own capital increase (at the expense of accumulated profit), which made it possible to finance the Company's activity without loans and credits attraction. A certain growth of this factor in 2003 is accounted for by balance form change: separation of deferred tax liabilities and their inclusion in long-term liabilities.

In 2004 and in the 1st quarter of 2005 the factor didn't change significantly.

A low level of financial dependence factor attests to a high degree of financial independence

and stability of NLMK.

Own funds autonomy factor.

Own funds autonomy factor increased significantly over the period of 2000 – 2004. This factor stands for own capital share in the assets and characterizes the degree of the issuer's financial independence of creditors. Consequently, growth of this factor can be considered a positive tendency.

In 2002 own funds autonomy factor increased regarding 2001 (from 0.84 to 0.92). Growth of this factor was provided for by a significant increase in the issuer's own capital as compared to the 2001 level.

During 2003 – 2004 and the 1st quarter of 2005 stable profit, the main source of own capital increase, facilitated a low degree of the issuer's dependence on creditors, which is attested to by dynamics of the ratio of own capital to the overall assets amount.

Inventories self-sufficiency by own current assets

The indice of inventories self-sufficiency by own current assets stand for the degree of inventories' coverage by own current assets.

A positive trend is being observed in the factors' dynamics within the period of 2000 – 2003: growth of factors pertaining to inventories self-sufficiency by own current assets (with the exception of 2001).

In 2000 in spite of inventories increase (by 2.1 fold) inventories self-sufficiency by own current assets increased as compared to 1999 as a result of own current assets increase (by 2.3 fold).

In 2001 the decrease of the indice was mainly caused by increase in short-term liabilities by 1.6 fold with current assets increase by only 13%. Apart from it inventories amount increased by 10%.

In 2002 inventories self-sufficiency by own funds improved significantly as compared to 2001. It is accounted for by a significant increase in own current assets by 1.6 fold and inventories amount decrease by 3%.

In 2003 the issuer's own current assets increased by 1.9 fold regarding 2002, which determined the increase in inventories self-sufficiency by own current assets in spite of inventories amount increase by 34%.

In 2004 a significant inventories increase as well as non-current assets increase lead to the factor decrease in spite of a significant increase in own capital. In the 1st quarter of 2005 the indice increased due to a significant increase in own current assets against the background of a slight needs growth.

The effective factors of NLMK's inventories self-sufficiency by own current assets attest to the complete inventories financing at the expense of own sources.

Permanent asset index

Permanent asset indexes in dynamics for 2000-2004 and the 1st quarter of 2005 satisfy the recommended value of Kip's permanent asset index ≤ 0.9 .

In 2003 a significant increase in the issuer's own funds (by 1.5 fold) was also one the main factors of the permanent asset index reduction regarding 2002.

In 2004 the factor value increased primarily due to long-term financial investments growth which is accounted for by formation of a vertically integrated group. In the 1st quarter of 2005 the factor didn't change significantly.

Current ratio factor and quick liquidity factor

Current ratio and quick liquidity factors increased significantly within 2000-2004. It was caused by a steady growth of the issuer's current assets as well as short-term liabilities decrease in 2000, 2002.

Current ratio factor decreased from 5.45 to 3.60 in 2001 regarding 2000, quick liquidity factor

decreased from 3.39 to 2.27. The factors' decrease was caused by a significant increase in short-term liabilities (by 1.7 fold) with current assets increase by only 13%.

Current ratio factors dynamics over the period of 2000-2004 attests to the complete short-term debts self-sufficiency by current assets for economic activity pursuance and to a high degree of the Company's solvency.

Apart from it quick liquidity factors formed in 2000-2004 attest to the Company's ability to completely repay short-term liabilities without sales of inventories.

In the 1st quarter of 2005 the situation remained unchanged.

- addenda dd. September 11, 1999 (Minutes No. 10) approved by the General Shareholders' Meeting of NLMK registered by Registering Chamber with administration of the city of Lipetsk on December 6, 1999, and
- changes dd. January 17, 2002 (Minutes No. 83) approved by the Board of NLMK registered by Registering Chamber with administration of the city of Lipetsk on February 28, 2002;

² - Being in line with NLMK's Statute approved by the General Shareholders' Meeting on June 28, 2002 (Minutes No. 16) registered by Registering Chamber with administration of the city of Lipetsk on June 28, 2002;

³ - Being in line with NLMK's Statute approved by the General Shareholders' Meeting on June 27, 2003. (Minutes No. 17), registered by Inspection with Taxation Ministry of the RF in Levoberezhny district of the city of Lipetsk on July 16, 2003;

⁴ - Being in line with NLMK's Statute approved by the Extraordinary Shareholders' Meeting on December 3, 2004. (Minutes No. 20), registered by Inspection with Taxation Ministry of the RF in Levoberezhny district of the city of Lipetsk on December 9, 2004.

A constant increase in capital and reserves is being observed during the whole period. Over the period of 01.01.2000 – 31.12. 2004 capital and reserves increased by more than 7 fold, average annual increase rate accounted for 50%, which is related to reserve increase upon the Board decision.

Own capital increase rate were the following: 63% in 2000, 23% in 2001, 51% in 2002, 45% in 2003, 62% in 2004. The Issuer's capital and reserves were increasing mainly at the expense of the Company's retained profit. Paid-in capital share was decreasing with accumulated retained profit increase.

In the 1st quarter of 2005 own capital was still on the increase, capital amount increased by 10% regarding the end of 2004.

4.3.2. Adequacy of the Issuer's capital and current assets.

*Increase in NLMK's assets is secured by steady growth of the equity.
Share of Company's equity in total assets as of 31.03.2005 accounted for 93.3%.*

Own capital and current assets adequacy indices

Indices	2004	1 quarter, 2005
<i>Ratio of attracted funds amount to capital and reserves, %</i>	<i>8,3%</i>	<i>7,2%</i>

<i>Ratio of short-term liabilities amount to capital and reserves, %</i>	7,4%	6,3%
<i>Own capital (F.1 page 490), thousand rubles</i>	105 370 142	116 423 644
<i>Current assets (F.1 page 290), thousand rubles</i>	61 217 361	70 326 866
<i>Short-term liabilities (F.1 page 690), thousand rubles</i>	7 833 474	7 295 823
<i>Average daily operating expenses, thousand rubles</i>	231 205,6	172 586,5

As of 31.03.2005 attracted funds to own capital ratio decreased regarding 31.12.2004 and accounted for 7.2%, which is caused by own capital increase.

The major share in attracted funds is held by short-term liabilities (accounts payable). As of 31.03.2005 the ratio of short-term liabilities to own capital amount accounted for 6.3% against 7.4% as of 31.12.2004.

These indices attest to the reduction of the Company's dependence on borrowings and satisfy the conditions of the Company's current operation.

Amount of the Issuer's own capital is sufficient for reimbursement of current operating expenses and of short-term liabilities fulfillment (as of 31.03.2005 own capital exceeded short-term liabilities amount by almost 16 fold).

The Issuer doesn't have any expenses associated with interest payment (F.2 page 070). Average daily operating expenses (F.2 page 100) accounted for 172.6 mln. rubles (15 532.8 mln. rubles per quarter) in the 1st quarter of 2005. Operating expenses (F.2 page 100) are almost completely reimbursed by operating profit (F.2 page 090) which accounted for 15 458.2 mln. rubles in the 1st quarter of 2005. Apart from it, current assets amount (F.1 page 290) accounted for 70 326.9 mln. rubles as of 31.03. 2005. All this attests to adequacy of the Issuer's current assets for reimbursement of current operating expenses in the 1st quarter of 2005.

4.3.3. Cash and its equivalents.

High efficiency of NLMK allows to generate cash flows which are sufficient to finance current and investment activity without attraction of loans and credits. In the 2^d-4th quarters 2005 income from core activity is supposed to be used as a source for financing the Company's activity.

In case of market conditions worsening and changes of the Company's investment plans, balance of cash and its equivalent could be used. As of 31.03.2005 this balance accounted for 35 billion rubles.

Moreover, taking stable performance of the Company for long time into account as well as high portion of equity within the Company's capital, NLMK has a possibility to attract significant financial resources on favorable terms both as bank credits and by bond placement.

As of 31.12.2005 there were neither distrained bank accounts nor bank accounts payable collected in bank data file.

4.3.4. The Issuer's financial investments.

NLMK's financial investments which are 10% and more of all its financial investments as of the date of the reporting period closure.

1. Financial investments into issuing securities:

Type of securities: *common stock*
 Full name of Issuer: *Open joint-stock company «Stoilensk GOK»*
 Abbreviated name of Issuer: *ОАО «Stoilensky GOK»*
 Domicile: *Stary Oskol, Belgorod region 309530 Russia*
 State registration number for securities issue: *1-01-00154-A*
 Date of state registration of securities issue: *28.11.2003*
 State registrar of securities issue: *Russian Federal Committee of Securities*
 Quantity of securities belonged to NLMK (pieces): *3 020 337*
 Total par value of securities belonged to NLMK (thousand rubles): *3 020,337*
 Total book value of securities belonged to NLMK (thousand rubles): *18 896 155*
 Dividends on common stock in 2005 (per 1 share) (rubles): *122*
 Repayment period: *July 22, 2005*

2. Other financial investments:

Type of financial investment: *deposits*
 Full name of lending agency: *Bank of Foreign Trade (open joint-stock company)*
 Abbreviated name of lending agency: *ОАО Vneshtorgbank*
 Место нахождения: *16, ul. Kuznetsky Most, Moscow 103031*
 Main deposit debt (thousand rubles): *12 775 700* (Deposits placed in OAO Vneshtorgbank, in aggregate amount to more than 10% of all NLMK's financial investments as of March 31, 2005.)
 Interest charged on main debt balance (thousand rubles): *66 919*

There are no other financial investments inclusive of the same to any other non-issuing securities as well as to chartered capital of limited liability companies amounting to 10 and more percent of all financial investments of NLMK as of 31.03.2005.

Financial investments are accounted at NLMK according to Provision on accounting "Accounting of financial investment" PBU 19/02, approved by Order of the RF Ministry of Finance No. 126n dd. 10.12.2002 as well as by Provision on accounting policy of NLMK for accounting approved by Order of the Company No. 838 dd. 31.12.2004.

4.3.5. Intangible assets of the Issuer.

Provisional information on composition of intangible assets, initial (replacement) value of intangible assets and value of accumulated depreciation over the last 5 complete financial years and the first quarter of the current year.

There were neither intangible assets entered to chartered capital nor received free of charge.

Information on intangible assets of the Company is generated and reflected in the financial statements in conformity with Provisions of accounting «Accounting of intangible assets» PBU 14/2000, approved by Order of the RF Ministry of Finance No. 91n. dd. 16.10.2000, as well as provision on NLMK's accounting policy, approved by the Company's Order No. 838 dd. 31.12.2004.

4.4. Information on policy and expenses of the Issuer in the area of technological progress, as regards to licenses and patents, new developments and investigations.

The Issuer's policy in the area of technological progress for the period 2001 – 1st quarter of 2005 is defined by Technical Program for Upgrading and Development accepted and implemented by NLMK and the quality management policy.

One of approaches of the policy in the area of technological development is acquisition of rights for intellectual property by patent protection of new technical solutions developed at NLMK.

For the period 2001 – 1st quarter of 2005 the following patents for inventions, certificates and patents for utility models were received:

List of patents for inventions and utility models received for the period 2000 – 1st quarter of 2005.

No.	Description of an invention, utility model	Issue date	Validity of patent
1.	Method of electrical equipment insulation control	10.02.2000	20 years

2.	<i>Metal stream protection device</i>	<i>27.02.2000</i>	<i>20 years</i>
3.	<i>High-basic sinter</i>	<i>10.03.2000</i>	<i>20 years</i>
4.	<i>Charge for high-basic sinter production</i>	<i>10.03.2000</i>	<i>20 years</i>
5.	<i>Rolls assembly for a rolling stand of a rolling mill</i>	<i>27.03.2000</i>	<i>20 years</i>
6.	<i>Work roll backup assembly of a rolling stand</i>	<i>20.04.2000</i>	<i>20 years</i>
7.	<i>Device for slag ladle crust breaking</i>	<i>20.04.2000</i>	<i>20 years</i>
8.	<i>Method of blast furnace tuyere preparation</i>	<i>20.04.2000</i>	<i>20 years</i>
9.	<i>Slag mix for steel treatment in a ladle</i>	<i>20.04.2000</i>	<i>20 years</i>
10.	<i>Method of isotropic electrical steel production</i>	<i>20.04.2000</i>	<i>20 years</i>
11.	<i>Forming roll operating procedure</i>	<i>27.04.2000</i>	<i>20 years</i>
12.	<i>Four-high mill stand rolls preparation procedure</i>	<i>27.04.2000</i>	<i>20 years</i>
13.	<i>Forming rolls operating procedure</i>	<i>27.04.2000</i>	<i>20 years</i>
14.	<i>Control method for high-speed operation of wide-strip rolling mill deflecting roller table</i>	<i>27.04.2000</i>	<i>20 years</i>
15.	<i>Device for slag ladle crust breaking</i>	<i>27.04.2000</i>	<i>20 years</i>
16.	<i>Method of sintering mix caking</i>	<i>27.04.2000</i>	<i>20 years</i>
17.	<i>Method of hot rolling in nonreversible universal stand</i>	<i>10.05.2000</i>	<i>20 years</i>
18.	<i>Method of light-gage angle section bending</i>	<i>10.05.2000</i>	<i>20 years</i>
19.	<i>Cover for steel teeming ladle</i>	<i>10.05.2000</i>	<i>20 years</i>
20.	<i>Steel teeming ladle</i>	<i>10.05.2000</i>	<i>20 years</i>
21.	<i>Method of metal granules production for shot blasting</i>	<i>10.05.2000</i>	<i>20 years</i>
22.	<i>Method of blast furnace process</i>	<i>10.05.2000</i>	<i>20 years</i>
23.	<i>Method of slag cutoff in a converter</i>	<i>10.05.2000</i>	<i>20 years</i>
24.	<i>Method of isotropic electrical steel production</i>	<i>20.05.2000</i>	<i>20 years</i>
25.	<i>Method of galvanized strip steel production for high-quality paint coating application</i>	<i>27.05.2000</i>	<i>20 years</i>
26.	<i>Device for secondary cooling of cast ingots</i>	<i>10.06.2000</i>	<i>20 years</i>
27.	<i>Device for secondary cooling of cast ingots</i>	<i>10.06.2000</i>	<i>20 years</i>
28.	<i>Method of anisotropic electrical steel production</i>	<i>10.06.2000</i>	<i>20 years</i>
29.	<i>Sinter machine</i>	<i>20.06.2000</i>	<i>20 years</i>
30.	<i>Stack cooler for metallurgical furnaces and stack cooler cooling coil</i>	<i>20.06.2000</i>	<i>20 years</i>
31.	<i>Vibrating rammer for blast furnace trough ramming</i>	<i>20.06.2000</i>	<i>20 years</i>
32.	<i>Method of anisotropic electrical steel slabs heating for hot rolling</i>	<i>20.06.2000</i>	<i>20 years</i>
33.	<i>Device for metal balls quenching</i>	<i>20.06.2000</i>	<i>20 years</i>
34.	<i>Pipe electrical welding mill</i>	<i>27.06.2000</i>	<i>20 years</i>
35.	<i>Quenching plant for grinding balls</i>	<i>27.06.2000</i>	<i>20 years</i>
36.	<i>Method of electrical anisotropic steel hot rolling</i>	<i>10.07.2000</i>	<i>20 years</i>
37.	<i>Method of carbonaceous billet burning</i>	<i>10.07.2000</i>	<i>20 years</i>
38.	<i>Method of compact material electroslag refining</i>	<i>10.07.2000</i>	<i>20 years</i>
39.	<i>Electrical insulating coating composition</i>	<i>10.07.2000</i>	<i>20 years</i>
40.	<i>Cover for ladle drying installation</i>	<i>20.07.2000</i>	<i>20 years</i>
41.	<i>Method of blast furnace operation</i>	<i>20.07.2000</i>	<i>20 years</i>
42.	<i>Blast furnace air tuyere</i>	<i>20.07.2000</i>	<i>20 years</i>
43.	<i>Method of forming rolls preparation</i>	<i>10.08.2000</i>	<i>20 years</i>
44.	<i>Method of forming rolls service properties restoration</i>	<i>10.08.2000</i>	<i>20 years</i>
45.	<i>Steel</i>	<i>10.08.2000</i>	<i>20 years</i>

46.	<i>Method of electrical steel continuous casting</i>	<i>20.08.2000</i>	<i>20 years</i>
47.	<i>Cowper stove</i>	<i>20.08.2000</i>	<i>20 years</i>
48.	<i>Method of steel ladle treatment</i>	<i>20.08.2000</i>	<i>20 years</i>
49.	<i>Method of steel ladle treatment</i>	<i>20.08.2000</i>	<i>20 years</i>
50.	<i>Method of electrical steel converter smelting</i>	<i>20.08.2000</i>	<i>20 years</i>
51.	<i>Sinter machine</i>	<i>20.08.2000</i>	<i>20 years</i>
52.	<i>Forming roll operating procedure</i>	<i>27.08.2000</i>	<i>20 years</i>
53.	<i>Method of cold-rolled electrical isotropic steel production</i>	<i>27.08.2000</i>	<i>20 years</i>
54.	<i>Method of isotropic electrical steel production</i>	<i>27.08.2000</i>	<i>20 years</i>
55.	<i>Method of blast furnace process</i>	<i>20.09.2000</i>	<i>20 years</i>
56.	<i>Method of ladle / out-of-the furnace electrical steel treatment</i>	<i>20.09.2000</i>	<i>20 years</i>
57.	<i>Method of steel ladle treatment</i>	<i>20.09.2000</i>	<i>20 years</i>
58.	<i>Method of steel ladle treatment</i>	<i>20.09.2000</i>	<i>20 years</i>
59.	<i>Burner for vacuum chamber lining heating</i>	<i>27.09.2000</i>	<i>20 years</i>
60.	<i>Method of high-basic sinter production</i>	<i>20.10.2000</i>	<i>20 years</i>
61.	<i>Electrical insulation composition</i>	<i>20.10.2000</i>	<i>20 years</i>
62.	<i>Method of rinse sinter production</i>	<i>27.10.2000</i>	<i>20 years</i>
63.	<i>Device for thin-gage angle section bending</i>	<i>10.11.2000</i>	<i>20 years</i>
64.	<i>Method of molten metal stream protection during casting</i>	<i>10.11.2000</i>	<i>20 years</i>
65.	<i>Blast furnace bin trestle</i>	<i>10.11.2000</i>	<i>20 years</i>
66.	<i>Method of work roll preparation for steel strip cold rolling</i>	<i>20.11.2000</i>	<i>20 years</i>
67.	<i>Method of steel smelting in converter</i>	<i>20.11.2000</i>	<i>20 years</i>
68.	<i>Method of steel ladle treatment</i>	<i>20.11.2000</i>	<i>20 years</i>
69.	<i>Belt conveyor</i>	<i>10.12.2000</i>	<i>20 years</i>
70.	<i>Spur gear</i>	<i>10.12.2000</i>	<i>20 years</i>
71.	<i>Method of conveyor operating element tensioning</i>	<i>20.12.2000</i>	<i>20 years</i>
72.	<i>Involute gear</i>	<i>20.12.2000</i>	<i>20 years</i>
73.	<i>Furnace plant</i>	<i>20.12.2000</i>	<i>20 years</i>
74.	<i>Assessment method for lubricants thermal-oxidative stability</i>	<i>27.12.2000</i>	<i>20 years</i>
75.	<i>Forming roll operation procedure</i>	<i>20.03.2001</i>	<i>20 years</i>
76.	<i>Screwdown structure of a rolling stand</i>	<i>20.03.2001</i>	<i>20 years</i>
77.	<i>Method of strip coiling</i>	<i>20.03.2001</i>	<i>20 years</i>
78.	<i>Ladle drying installation</i>	<i>20.03.2001</i>	<i>20 years</i>
79.	<i>Method of blast furnace blowing-in</i>	<i>20.03.2001</i>	<i>20 years</i>
80.	<i>Bell-type furnace for thermal treatment of metal products</i>	<i>20.03.2001</i>	<i>20 years</i>
81.	<i>Method of low-basic sinter caking</i>	<i>20.03.2001</i>	<i>20 years</i>
82.	<i>Method of high-basic sinter caking</i>	<i>20.03.2001</i>	<i>20 years</i>
83.	<i>Method of strip cold rolling</i>	<i>27.03.2001</i>	<i>20 years</i>
84.	<i>Sinter machine ignition furnace</i>	<i>27.03.2001</i>	<i>20 years</i>
85.	<i>Method of implementation and structure of ladle cover thermal insulation, made of fibrous material</i>	<i>10.04.2001</i>	<i>20 years</i>
86.	<i>Device for blast furnace tuyere distribution of fuel additions</i>	<i>10.04.2001</i>	<i>20 years</i>
87.	<i>Blast furnace air furnace</i>	<i>10.04.2001</i>	<i>20 years</i>
88.	<i>Conveyor type sinter machine</i>	<i>10.04.2001</i>	<i>20 years</i>

89.	<i>Operation procedure for four-plate mold for continuous casting</i>	20.04.2001	20 years
90.	<i>Forming roll bearing billow block</i>	27.04.2001	20 years
91.	<i>Foundry ladle hinged gate</i>	27.04.2001	20 years
92.	<i>Method of electrical anisotropic steel hot rolling</i>	10.05.2001	20 years
93.	<i>Method of seamless hot-rolled pipes production</i>	10.05.2001	20 years
94.	<i>Device for molten metal overflow</i>	10.05.2001	20 years
95.	<i>Tundish ladle</i>	20.05.2001	20 years
96.	<i>Method of blast furnace process</i>	20.05.2001	20 years
97.	<i>Blast furnace air tuyere</i>	20.05.2001	20 years
98.	<i>Method of sintering mix caking and sinter machine for doing this</i>	20.05.2001	20 years
99.	<i>Method and device for cooling of steel teeming ladle gate</i>	10.06.2001	20 years
100.	<i>Ladle gate</i>	20.07.2001	20 years
101.	<i>Transformer with blowing</i>	20.07.2001	20 years
102.	<i>Method of renewal of blast furnace stack cooling system</i>	20.07.2001	20 years
103.	<i>Method of blast furnace process</i>	10.08.2001	20 years
104.	<i>Method of blast furnace process</i>	10.08.2001	20 years
105.	<i>Method of blast furnace process</i>	10.08.2001	20 years
106.	<i>Method of blast furnace process</i>	10.08.2001	20 years
107.	<i>Method of ingot making</i>	10.08.2001	20 years
108.	<i>Transformer</i>	20.08.2001	20 years
109.	<i>Bulk materials feeding device for molten metal treatment during continuous casting</i>	27.08.2001	20 years
110.	<i>Method of ladle/out-of-furnace steel treatment</i>	27.08.2001	20 years
111.	<i>Method of strip rolling</i>	10.09.2001	20 years
112.	<i>Method of strip cold rolling</i>	10.09.2001	20 years
113.	<i>Method of forming rolls electrosag hard-facing</i>	27.09.2001	20 years
114.	<i>Mold for electrosag hard-facing</i>	27.09.2001	20 years
115.	<i>Method of cold rolling mill work rolls preparation</i>	10.11.2001	20 years
116.	<i>Device for wire insertion in molten metal</i>	10.11.2001	20 years
117.	<i>Slag mix for slag treatment in ladle</i>	27.11.2001	20 years
118.	<i>Thin-layer sedimentation tank</i>	10.12.2001	20 years
119.	<i>Twin-engine electric drive</i>	10.12.2001	20 years
120.	<i>Method of forming rolls repair</i>	20.12.2001	20 years
121.	<i>Cowper stove</i>	20.12.2001	20 years
122.	<i>Method of hot-rolled strips production of low-carbon steel</i>	20.12.2001	20 years
123.	<i>Method of strips production</i>	20.12.2001	20 years
124.	<i>Method of rolls cooling of continuous four-high mill</i>	10.01.2002	20 years
125.	<i>Method of anisotropic electrical steel thermal treatment in bell-type furnace</i>	10.01.2002	20 years
126.	<i>Method of cold-rolled semi-finished electrical steel production</i>	10.01.2002	20 years
127.	<i>Device for slag cutoff in converter</i>	10.02.2002	20 years
128.	<i>Method of blast furnace operation</i>	27.02.2002	20 years
129.	<i>Method of cold-rolled semi-finished electrical steel production</i>	27.03.2002	20 years
130.	<i>Gas meter</i>	10.05.2002	20 years

131.	<i>Method of work roll cooling for hot-rolling stand</i>	10.06.2002	20 years
132.	<i>Method of work rolls preparation for cold-rolling mill</i>	10.06.2002	20 years
133.	<i>Method of blast furnace hearth rinsing</i>	10.06.2002	20 years
134.	<i>Hot blast air duct equalizer</i>	10.06.2002	20 years
135.	<i>Method of blast furnace process</i>	27.06.2002	20 years
136.	<i>Blast furnace technology</i>	27.06.2002	20 years
137.	<i>Method of anisotropic electrical steel coiled stock formation before annealing in bell-type furnace</i>	27.06.2000	20 years
138.	<i>Mold for electroslag hard-facing with relative mold displacement</i>	27.06.2000	20 years
139.	<i>Method of metric characterizations measurement in the dental implantation zone</i>	20.07.2002	20 years
140.	<i>Method of converter steelmaking</i>	20.07.2002	20 years
141.	<i>Method of converter steelmaking</i>	20.07.2002	20 years
142.	<i>Method of steel treatment in ladle</i>	20.07.2002	20 years
143.	<i>Blast furnace technology</i>	27.07.2002	20 years
144.	<i>Method of open-hearth pig iron making</i>	27.07.2002	20 years
145.	<i>Method of steel ingots heating in continuous furnace</i>	27.07.2002	20 years
146.	<i>Method of steel ingots heating in continuous furnace</i>	27.07.2002	20 years
147.	<i>Method of furnace heating</i>	27.07.2002	20 years
148.	<i>Method of mold walls restoration</i>	10.08.2002	20 years
149.	<i>Blast furnace technology</i>	10.08.2002	20 years
150.	<i>Method of open-hearth pig iron making</i>	10.08.2001	20 years
151.	<i>Method of isotropic electrical steel production</i>	10.08.2002	20 years
152.	<i>Method of zinc making out of zinc recrement</i>	27.08.2002	20 years
153.	<i>Method of strip transportation along the deflecting roller table of wide-strip hot-rolling mill</i>	20.09.2002	20 years
154.	<i>Method of zinc making out of zinc waste products and line for it</i>	20.09.2002	20 years
155.	<i>Device for automatic strip flatness control</i>	27.09.2002	20 years
156.	<i>Method of high-temperature annealing of anisotropic electrical steel with thickness 0.25 – 0.5 mm</i>	27.09.2002	20 years
157.	<i>Chamber regenerative furnace</i>	27.09.2002	20 years
158.	<i>Method of strip cold-rolling in continuous multi-stand mill</i>	10.10.2002	20 years
159.	<i>Method of strip cold-rolling in continuous multi-stand mill</i>	10.10.2002	20 years
160.	<i>Method of blast furnace process</i>	10.10.2001	20 years
161.	<i>Method of ferromanganese silicon making</i>	10.10.2002	20 years
162.	<i>Cold-rolled steel for complex parts forming</i>	10.10.2002	20 years
163.	<i>Steel for flats production</i>	10.10.2002	20 years
164.	<i>Receiving apparatus for hot slabs</i>	27.10.2002	20 years
165.	<i>Receiving apparatus for hot slabs</i>	27.10.2002	20 years
166.	<i>Rolling mill exit section</i>	10.12.2002	20 years
167.	<i>Method of parts hardening</i>	20.12.2002	20 years
168.	<i>Method of parts hardening</i>	20.12.2002	20 years
169.	<i>Method of thyristor control current formation</i>	10.01.2003	20 years
170.	<i>Method of steel control</i>	10.01.2003	20 years

171.	<i>Method of hydrocarbon gases recovery</i>	20.01.2003	20 years
172.	<i>Method of polyaromatic hydrocarbons containing wastes neutralization</i>	20.01.2003	20 years
173.	<i>Device for charge drawing and loading it in blast cupola</i>	20.01.2003	20 years
174.	<i>Method of forming roll operation</i>	27.01.2003	20 years
175.	<i>Method of forming roll operation</i>	27.01.2003	20 years
176.	<i>Method of hot-rolled strip descaling</i>	27.01.2003	20 years
177.	<i>Alloy for electroslag hard-facing of iron forming roll</i>	27.01.2003	20 years
178.	<i>Direct-flow deduster</i>	20.02.2003	20 years
179.	<i>Composition for carbonate, sulphate, ferrate deposits prevention</i>	20.02.2003	20 years
180.	<i>Method of blast furnace process</i>	20.02.2003	20 years
181.	<i>Method of blast furnace technology control</i>	27.02.2003	20 years
182.	<i>Method of anisotropic electrical steel production</i>	27.02.2003	20 years
183.	<i>Method of cold-rolled electrical anisotropic steel production</i>	27.02.2003	20 years
184.	<i>Mixer blade</i>	10.03.2003	20 years
185.	<i>Continuous caster</i>	20.03.2003	20 years
186.	<i>Method of parts hardening</i>	10.04.2003	20 years
187.	<i>Method of disc knife manufacturing</i>	20.04.2003	20 years
188.	<i>Method of blast furnace process</i>	20.04.2003	20 years
189.	<i>Method of steel deoxidation and alloying</i>	20.04.2003	20 years
190.	<i>Operating procedure for four-high mill backup roll</i>	27.04.2003	20 years
191.	<i>Method of isotropic electrical steel production</i>	27.04.2003	20 years
192.	<i>Method of anisotropic electrical steel production</i>	10.05.2003	20 years

	<i>production</i>		
259.	<i>Method of anisotropic electrical steel sheets production</i>	20.02.2004	20 years
260.	<i>Method of strip cold rolling in multi-stand rolling mill</i>	10.03.2004	20 years
261.	<i>Method of four-stand mill rolls preparation</i>	27.03.2004	20 years
262.	<i>Method of sintering mix caking</i>	10.05.2004	20 years
263.	<i>Method of cold-rolled isotropic electrical steel production</i>	10.05.2004	20 years
264.	<i>Blast furnace tuyere cooler</i>	27.05.2004	20 years
265.	<i>Ladle cover</i>	27.05.2004	20 years
266.	<i>Anisotropic electrical steel</i>	10.05.2004	20 years
267.	<i>Method of current doubling in six-phase rectification circuit</i>	10.06.2004	20 years
268.	<i>Device for molten metal stream protection during continuous casting cmanu</i>	10.06.2004	20 years
269.	<i>Pusher-type continuous annealing furnace</i>	10.06.2004	20 years
270.	<i>Operating procedure for rolls of four-high skinpassing stand</i>	27.06.2004	20 years
271.	<i>Method and device of measuring roll consumption</i>	27.06.2004	20 years
272.	<i>Convector ring for bell-type furnace annealing of cold-rolled steel strip</i>	20.06.2004	20 years
273.	<i>Pressure equalization device in blast furnace top charging gear</i>	20.06.2004	20 years
274.	<i>Fireclay castable</i>	20.06.2004	20 years
275.	<i>Method of isotropic electrical steel production</i>	20.06.2004	20 years
276.	<i>Anisotropic electrical steel</i>	20.06.2004	20 years
277.	<i>Method of cold rolled strip annealing</i>	20.06.2004	20 years
278.	<i>Method and device for brake electric motor control of sintering grate electric drive</i>	10.07.2004	20 years
279.	<i>Method of blast furnace gas treatment in case of increased gas pressure at furnace mouth</i>	20.07.2004	20 years
280.	<i>Oil machine</i>	10.08.2004	20 years
281.	<i>Method of thin-sheet anisotropic electrical steel production</i>	10.08.2004	20 years
282.	<i>Metallurgical furnaces stack cooler</i>	27.08.2004	20 years
283.	<i>Method of blast furnace blowing-in</i>	10.09.2004	20 years
284.	<i>Method of coiled strip production</i>	27.09.2004	20 years
285.	<i>Method of slabs charging and heating in preheating furnaces of hot-rolling mills</i>	27.09.2004	20 years
286.	<i>Method of cleaning carbonate deposit off the water-cooled roll internal face</i>	10.10.2004	20 years
287.	<i>Method of cold-rolled annealed strip uncoiling at cutting lines</i>	10.10.2004	20 years
288.	<i>Briquettes as a component of BF burden</i>	10.10.2004	20 years
289.	<i>Method of blast furnace process</i>	10.10.2004	20 years
290.	<i>Method of blast furnace charge</i>	10.10.2004	20 years
291.	<i>Method of temperature control along concast slab cross-section during heating</i>	10.10.2004	20 years
292.	<i>Method of blast furnace hearth rinsing</i>	20.10.2004	20 years
293.	<i>Method of blast furnace process</i>	20.11.2004	20 years

294.	<i>Method of waste motor oil utilization</i>	20.11.2004	20 years
295.	<i>Method of zinc removal and recovery (metallization) of ferrate waste</i>	20.11.2004	20 years
296.	<i>Cutting Line</i>	27.11.2004	20 years
297.	<i>Lump raw material preheater</i>	27.12.2004	20 years
298.	<i>Briquettes for blast furnace rinsing</i>	10.12.2004	20 years
299.	<i>Briquettes as a component of BF burden</i>	10.12.2004	20 years
300.	<i>Method of oiled scale utilization</i>	10.12.2004	20 years
301.	<i>Method of fine oiled scale utilization</i>	10.12.2004	20 years
302.	<i>Briquette for pig iron smelting</i>	10.12.2004	20 years
303.	<i>Method of work roll preparation</i>	20.12.2004	20 years
304.	<i>Cutting Line</i>	10.01.2000	5 years
305.	<i>Concrete mix production line</i>	10.01.2000	5 years
306.	<i>Die for punching segments in angles made of elastic material</i>	10.01.2000	5 years
307.	<i>Blast furnace hot blast duct</i>	10.01.2000	5 years
308.	<i>Blast furnace bin trestle</i>	20.03.2000	5 years
309.	<i>Furnace for zinc making out of zinc waste</i>	20.03.2000	5 years
310.	<i>Arc steelmaking furnace</i>	10.05.2000	5 years
311.	<i>Device for automatic strip coiling</i>	27.05.2000	5 years
312.	<i>Device for strip edge reduction</i>	20.06.2000	5 years
313.	<i>Bulk solids sizing screen</i>	10.07.2000	5 years
314.	<i>Stand main line</i>	10.07.2000	5 years
315.	<i>Conveyor-type sinter machine</i>	10.07.2000	5 years
316.	<i>Conveyor-type sinter machine</i>	10.09.2000	5 years
317.	<i>Metallurgic shaft furnace cooler</i>	10.10.2000	5 years
318.	<i>Device for ceiling panels dismounting</i>	10.10.2000	5 years
319.	<i>Device for installation of cyclone element body of cyclone cell system</i>	10.10.2000	5 years
320.	<i>Gas collecting duct of sinter machine</i>	10.10.2000	5 years
321.	<i>Bell-type furnace for high-temperature annealing of anisotropic electrical steel</i>	20.10.2000	5 years
322.	<i>Stand for coil heat treatment</i>	20.10.2000	5 years
323.	<i>Sinter machine ignition furnace</i>	27.12.2000	5 years
324.	<i>Hot-rolled strip winding system</i>	10.01.2001	5 years
325.	<i>Aluminum flux granulation plant</i>	10.01.2001	5 years
326.	<i>Device for strip edge reduction</i>	10.02.2001	5 years
327.	<i>Device for radial brick pile formation</i>	10.02.2001	5 years
328.	<i>Front-end tool</i>	10.02.2001	5 years
329.	<i>Screen</i>	20.03.2001	5 years
330.	<i>Blast furnace bin trestle</i>	20.03.2001	5 years
331.	<i>Blast furnace top charging gear</i>	20.03.2000	5 years
332.	<i>Mold for electroslag smelting of copper ingots</i>	20.03.2001	5 years
333.	<i>Sinter machine</i>	20.03.2001	5 years
334.	<i>Screen</i>	27.03.2001	5 years
335.	<i>Quenching device</i>	27.03.2001	5 years
336.	<i>Sinter machine</i>	27.03.2001	5 years
337.	<i>Slab transportation platform</i>	10.04.2001	5 years
338.	<i>Transportation platform for coiled strip steel</i>	27.05.2001	5 years
339.	<i>Device for hot-rolled strip coils cooling</i>	29.07.2001	5 years
340.	<i>Device for zinc coating application thickness control</i>	20.07.2001	5 years

Constant control over prompt payment of all patent fees on inventions and utility models, over prolongation of trade mark registration validity, over submission of applications on registration of trade mark in case of the Company's product mix diversification are the main actions aimed at prevention of NLMK's forfeiture of rights for intellectual property.

NLMK's expenses for R&D for the period 2000 – 1st quarter of 2005 are the following:

Главной мерой по предотвращению утраты ОАО "НЛМК" прав на объекты интеллектуальной собственности является постоянный контроль за своевременной уплатой всех видов патентных пошлин по изобретениям и полезным моделям, за продлением срока действия регистрации товарных знаков, за подачей заявок на регистрацию товарного знака в случае расширения ассортимента выпускаемых товаров в ОАО "НЛМК".

Затраты на осуществление научно-исследовательских и опытно-конструкторских работ за счет собственных средств ОАО "НЛМК" за период с 2000 г. – I квартал 2005 г.:

	<i>rubles</i>
	Amount
2000	18 901 075
2001	19 278 482
2002	26 361 463
2003	25 313 881
2004	17 652 227
1 st quarter of 2005	4 568 367

4.5. Analysis of trends in the Issuer's core activity.

The tendency to improve ferrous metallurgy enterprises economic condition has formed in Russia for the past five years. During this period the largest Russian steelmaking companies have been building up the basic production. Year 2001 has become an exception - there was a slight decrease of production volume due to cyclic economic downturn in the world metal products markets.

High capacity utilization, strong industrial and economic connections, stable demand for products of the industry in Russia and abroad have enabled the Russian metallurgical complex to enhance the basic economic and production indices. The indices for year 2004 are evidence of the best production and economic results for the recent years.

Total production of pig iron by the Russian steel industry for 2004 accounted for 50,3 million tons, steel – 65,6 million rubles, flats – 53,8 million tons, in the 1st quarter of 2005 the pig iron output amounted to 12,4 million tons, steel – 16,3 million tons, flats – 13,8 million tons.

As compared to year 2000 pig iron production in 2004 increased by 5,7 million tons (by 13%), steel production - by 6,3 million tons (by 11%), flats production – by 6,8 million tons (by 14%).

As compared to the 4th quarter of 2004, in the 1st quarter of 2005 the industry output of pig iron decreased by 3,9%, steel output – decreased by 1,6%, flats output – decreased by 0,1%.

NLMK's production dynamics followed the industry trends in many ways. The Company's indices relative to basic products production in 2004 have exceeded those for the recent years. In 2004 NLMK produced 9,0 million tons of pig iron, 9,1 million tons of steel, 8,6 million tons of flats. In the 1st quarter of 2005 NLMK produced 2,1 million tons of pig iron, 2,2 million tons of steel, 2,1 million tons.

As compared to year 2000, in 2004 NLMK's pig iron production increased up to 1,3 million tons (+17%); steel – up to 0,9 million tons (+11%), flats – up to 1,1 million tons (+14%).

As compared to the 4th quarter of 2004, in the 1st quarter of 2005 NLMK's pig iron output decreased by 6,7%, steel output – decreased by 1%, flats – decreased by 0,4%.

Novolipetsk Iron & Steel Corporation is one of the three largest Russian steelmaking companies. In 2004 NLMK's share within the total production volume of the industry constituted: pig iron production – 18% , steel production – 14%, flats production – 16%. In the 1st quarter of 2005 the respective indices were 17%, 13%, 15%.

Economic condition improvement in ferrous industry for the last 5 years has been facilitated by metal products price increase.

Products price escalation trends resulted in higher sales proceeds and, accordingly, sales income increase. Price increase in the world steel market created favourable conditions for Russian exporters.

Economic condition improvement in ferrous industry for the last 5 years has been facilitated by metal products price increase.

Products price escalation trends resulted in higher sales proceeds and, accordingly, sales income increase. Price increase in the world steel market created favourable conditions for Russian exporters.

Economic condition improvement in ferrous industry for the last 5 years has been facilitated by metal products price increase.

Products price escalation trends resulted in higher sales proceeds and, accordingly, sales income increase. Price increase in the world steel market created favourable conditions for Russian exporters.

The total commodity output of the industry in 2004 amounted to 1 117,7 billion rubles, which exceeds the level of 2003 by 1,6 times. The commodity output volume increased by 3,1 times as compared to 2000.

The balanced financial performance in ferrous metallurgy for 2004 amounted to 249,8 billion rubles, which exceeds the level of 2003 by 2,5 times.

Favourable conditions in domestic and foreign markets of metal produce facilitated NLMK's economic position improvement. The growing demand and continuing price increase for NLMK's products had a positive influence upon the Company's financial performance. As a result, NLMK's financial performance was the highest in the industry. Moreover, the exiting prices for metal products in the world market promoted a significant export proceeds increase.

Thus, in 2004 NLMK's commodity output aggregated to 125,5 billion rubles, which exceeds the index of 2003 by 1,7 times. The commodity output volume increased by 3,3 times as compared to 2000.

Earnings before taxes in 2004 amounted to 65,6 billion rubles (increase by 2,2 times as compared to 2003). The amount of earnings before taxes grew by 4,3 times as compared to 2000. In the 1st quarter of 2005 NLMK's earnings before taxes amounted to 14,6 billion rubles, which is by 29% less than in the 4th quarter of 2004.

The Company's earnings before taxes for 2004 aggregated to 26,3% of the balanced financial performance of Russian ferrous metallurgy.

V. Detail information on members of the Issuer's authorities, financial performance control bodies, brief data on employees of the Issuer.

5.1. Information on structure and competence of the Issuer's authorities.

The Supreme governing body of the Company is the General Shareholders' Meeting. The Board of Directors carries out the general management of the Company activity excluding those issues, which fall under the exclusive competence of the Shareholders' Meeting.

The Board of Directors consists of 9 persons.

The management of the routine business of the Company is exercised by the Company's single executive body – Director General and by the Company's corporate executive body – the Management Board.

The competence of Director General and Management Board covers all the issues related to the management of the Company's routine business except the matters of exclusive competence of the General Shareholders' Meeting and the Board of Directors.

The Director General and the Management Board make arrangements for implementation of the decisions of the Company's General Shareholders' Meeting and the Board of Directors.

The Director General also fulfils the functions of the Company's Management Board Chairman.

The Management Board is a corporate executive body of the Company, which acts with the authority of the Federal Act "On the joint-stock companies", the Company Statute and Regulations on the Management Board of the Company approved by the General Shareholders' Meeting.

The organization and membership of the Management Board are approved by the Board of Directors upon presentation by the Director General.

The competence of the general meeting of the issuer's stockholders (participants) in accordance with its statute (constituent documents):

The following matters fall within the Meeting's competence (Chapter 4, Article 16 of the Company Statute):

- 1) changes and additions to the Statute or approval of the Statute in new revisions;*
- 2) reorganization of the Company;*
- 3) liquidation of the Company, appointment of the Liquidation Committee and approval of the interim and final liquidation balances;*
- 4) establishment of the quantitative staff of the Board of Directors, election of its members and premature termination of their authority;*
- 5) determination of number, par value, category (type) of shares and rights given by these shares;*
- 6) increase of the Company's chartered capital through share par value increase; increase of the chartered capital of the Company through placement of additional shares by public subscription in case the number of additionally placed shares constitutes more than 25% of the common shares earlier placed by the Company; increase of the Company's chartered capital through placement of shares by closed subscription;*
- 7) decrease of the chartered capital through share par value decrease, through paying off the shares acquired by the Company and not realized within a year and of the shares redeemed by the Company, as well as through paying off the shares that have passed to the Company in relation to their non-payment; decrease of the chartered capital through partial acquisition of shares for the purpose of decreasing their total number;*
- 8) election of Director General and premature termination of his authority;*
- 9) election of the Auditing Committee and premature termination of its authority;*
- 10) approval of the Company's Auditor;*
- 10.1) payment (announcement) of dividends upon results of the first quarter, six months, nine months of a financial year;*

11) approval of annual reports, annual financial statements, including income statements of the Company, as well as distribution of Company's profits (including payments (declaration) of dividends, with exclusion of profits distributed as dividends upon performance of the first quarter, six months, nine months of a financial year) and losses of the Company upon results of a financial year;

12) establishment of procedure of the General Meeting;

13) appointment of the Accounts Committee and premature termination of its authority in case the Accounts Committee's functions are not exercised by the Company's Registrar in accordance with the Federal Act "On the joint-stock Companies";

14) split-up and consolidation of the shares;

15) deals conclusion approval in cases stipulated in Article 83 of the Federal Act «On the joint-stock Companies»;

16) major transactions conclusion approval in cases stipulated in Article 79 of the Federal Act "On the joint-stock Companies";

17) acquisition of the subscribed shares by the Company in cases, stipulated in the Federal Act "On the joint-stock Companies";

18) involvement in holdings, financial and industrial groups, associations and other commercial organizations;

19) approval of internal documents governing the operation of the Company's bodies;

20) decision-making on other matters stipulated by the Federal Act "On the joint-stock Companies" and / or the present Statute.

The matters falling under the competence of the General Meeting of Shareholders cannot be transferred to the competence of executive bodies of the Company.

The matters falling under the competence of the General Meeting of Shareholders cannot be transferred to competence of the Board of Directors of the Company except in cases stipulated in the Federal Act "On the joint-stock Companies".

The competence of the Issuer's Board of Directors (Supervisory Board) in accordance with its Statute (constituent documents):

The following matters fall within the competence of the Board of Directors (Chapter 5, Article 30 of the Company Statute):

1) definition of priority activities of the Company;

2) convocation of the Annual and Extraordinary Shareholders' Meetings excluding cases, when in accordance with the Federal Act "On the joint-stock Companies" an Extraordinary Shareholders' Meeting can be convoked by authorities and persons demanding its convocation;

3) approval of the Shareholders' Meeting agenda;

4) definition of the date of list of the shareholders who are entitled to participate in the Shareholders' Meeting and other issues attributed to the competence of the Board of Directors in accordance with the Statute and the Federal Act "On the joint stock companies" and related to preparation and holding of the Shareholders' Meeting;

5) preliminary approval of annual reports, annual financial statements, including income statements of the Company for a financial year;

6) increase of the Company's chartered capital by placement of additional shares by the Company out of its property within the quantity of declared shares.

7) increase of the Company's chartered capital by placement of additional shares by the Company by public subscription within the quantity of declared shares, if the number of additionally placed shares constitutes 25% or less from the common shares earlier placed by the Company;

8) acquisition of shares placed by the Company in accordance with Item 2, Article 72 of the Federal Act "On the joint-stock Companies";

9) approval of decisions on emission of securities, prospectus, report on securities emission results, amending and revising of them.

10) placement of bonds and other securities issued by the Company in cases provided for by the

Federal Act "On the joint-stock companies";

11) determination of price (pecuniary valuation) of the property, price of placement and redemption of the securities issued in cases provided for by the Federal Act "On the joint-stock Companies";

12) acquisition of bonds and other securities placed by the Company in cases provided for by the Federal Act "On the joint-stock companies";

13) constitution of the Management Board and early termination of its authorities; determination of rewards and compensations paid to its members; conclusion of contracts with the Director General and members of the Management Board on behalf of the Company;

14) determination of terms and conditions of contracts with the Director General and members of the management board;

15) recommendations to the General Shareholders' Meeting on amount of reward and compensation paid to members of the Auditing Committee and determination of payment amount for Auditor's services;

16) recommendations to the General Shareholders' Meeting on dividend amount payable to the shareholders and procedure of its payment;

17) recommendations to the General Shareholders' Meeting on the procedure of profits and losses distribution upon results of a financial year;

18) use of reserve and other funds of the Company;

19) approval of internal papers of the Company excluding internal papers which fall within the competence of the General Shareholders' Meeting according to this Statute and Federal Act "On the joint-stock Companies", or other internal documents of the Company which fall within the competence of the Director General and Management Board in accordance with the present Statute;

20) establishment and liquidation of the Company's branches and representative offices, approval of provisions on branches and representative offices, revision and expanding of these provisions;

21) approval of major transactions in cases provided for by Chapter X of the Federal Act "On the joint-stock Companies";

22) approval of transactions provided for by Chapter XI of the Federal Act "On the joint-stock companies";

23) approval of the Company Registrar and terms of agreement with him/her, as well as cancellation of agreement;

24) suspension of the Director General's activity;

25) appointment of temporary acting Director General;

26) decision on Company's participation in other organizations, excluding participation in holding companies, financial and industrial groups, associations and other unions of commercial organizations;

27) establishment of Committees under the Board of Directors, approval of internal documents, which regulate activities of these Committees;

28) other matters provided for by the Federal Act "On the joint-stock companies" and the present Statute.

The matters that fall within the competence of the Company's Board of Directors cannot be transferred

to the executive body of the Company for decision.

Competence of the individual and corporate executive bodies of the issuer in accordance with its Statute (constituent documents):

The Competence of the Director General (Chapter 6, Article 37 of the Company Statute).

The competence of the Director General includes all issues of routine Company activities management excluding those in the exclusive authority of the General Shareholders' Meeting, the Board of Directors and the Management Board.

The Director General acts without any Power of Attorney on behalf of the Company, in particular:

- performs operative management of the Company activities;
 - has the right of the first signature in financial documents;
 - represents the Company both in the RF and outside it;
 - approves staff list, concludes employment agreements with employees of the Company, fires, applies incentive measures to employees and imposes penalties on them;
 - governs the activities of the Management Board and presides at its meetings;
 - presents for the Board of Directors' approval an individual list of the members of the Management Board;
 - conducts transactions on behalf of the Company with the exception of cases stipulated by the Federal Act "On the Joint-Stock Companies" and this Statute;
 - issues power of attorney on behalf of the Company;
 - opens the Company's accounts with banks;
 - makes provisions for the Company's accounting and book-keeping conduction;
 - issues orders and gives instructions which are binding for all employees of the Company;
 - defines a list of data representing commercial secret of the Company, and means of such data protection in accordance with the effective legislation;
 - approves internal documents of the Company, which regulate the Company's routine activities, excluding those in the exclusive authority of the Management Board.
- The Director General is entitled to appoint acting Director General for the period of his absence to be approved by the Board of Directors' Chairman.*

The Competence of the Management Board (Chapter 6, Article 38 of the Company Statute).

The exclusive competence of the Company's Management Board includes:

- development and submission to discussion by the Board of Directors of the Company's development concept;
- securing of contracts concluding by Company assets when the amount due or the subject goods value exceeds 10 per cent of the balance value of the Company's assets, excluding transactions performed in the normal course of business;
- approval of internal routine Rules and other local regulations according to the list specified by the Director General;
- signing the Collective Agreement with the Company staff (authorized body);
- other issues regarded as those in the competence of the Company Management Board under the effective legislation of the RF.

Availability of Corporate Behaviour Code or any other similar document:

The Extraordinary General Shareholders' Meeting, which took place on December 3, 2004, (Minutes No. 20) approved the Corporate Management Code of Novolipetsk Iron & Steel Corporation.

5.3. Information on fees, privileges and / or refund of charges to each Management body of the Issuer.

Fees paid to members of Board of Directors and Management Board for 2004

(rubles)			
No.	Remuneration type	Board of Directors	Management Board
1.	<i>Fees</i>	10 847 639	-
2.	<i>Salary</i>	-	18 516 805
3.	<i>Premium, welfare</i>	-	12 299 460
4.	<i>Presents</i>	4 800	18 000
5.	<i>Dividends</i>	-	262 247
6.	<i>Author's royalty</i>	3 196 129	3 554 006
	Total	14 048 568	34 650 518

Fees can be paid and charges related to performance of Management Board members' functions can be refunded to Management Board members within the period of their duties execution. The rate, conditions and procedure of bonuses payment and charges refund to members of the Board of Directors are established by the Regulations on remuneration of the Company's Board of Directors members' labour approved by General Shareholders' Meeting.

Fees can be paid and charges can be refunded to Members of the Board of Directors within the period of their duties execution. Conditions and procedure of fees payment and charges refund are established by a contract concluded with members of the Management Board, in accordance with the Regulations on remuneration of the Company's Management Board members' labor, approved by the Company's Board of Directors upon presentation by the Personnel and

Remuneration Committee.

5.4. Information on structure and competence of controlling authorities over financial performance of the Issuer.

The Auditing Committee and Internal Audit Service exercise control over the financial and economic activities of the Company.

Auditing Committee

The Auditing Committee consists of five persons, is elected for a period of one year by the General Shareholders' Meeting and carries out its activities in accordance with the Regulations on the Auditing Committee approved by the General Shareholders' Meeting upon presentation by the Board of Directors.

The Regulations on the Auditing Committee regulate the Auditing Committee procedures, the authority of its members, the rate and procedure of fees payment and expenses reimbursement to members of the Auditing Committee

The Company's Auditing Committee Members cannot simultaneously be members of the Company's Board of Directors or take up any other posts in management bodies of the Company.

Audit of financial and economic activities of the Company is based on the yearly-based business results and is conducted at any time on initiative of the Auditing Committee of the Company and by the decision of the General Shareholders' Meeting, the Board of Directors or upon request of a shareholder (-s) owning in the aggregate at least ten per cent of the Company's voting shares.

The Auditing Committee audits financial and economic activity of the Company in order to verify conformity of the financial statements information to norms and requirements of the existing legislation, internal regulatory documents, performs selective investigation of proofs attesting figures accounting and notes to financial statements.

Upon results of Company's financial and economic activity auditing the Committee makes a report on authenticity of data contained in the Company's annual report, balance sheet, income statement.

Internal Audit Department

The Internal Audit Service – Audit Division, established sine die under Director General's Order dd. 17.04.1997, is administratively subordinated to the Director General.

Key staff: Valery S. Kulikov; Igor A. Matsak.

The competence of the Internal Audit Department covers:

- *auditing of financial and economic, commercial and production activity of the Company's divisions;*
- *evaluation of process related to acquisition, storage, protection and conservation of the Company's resources;*
- *detection of possible delinquencies, frauds and abuses on part of the Company's officials and reporting to the Company's managers on results;*
- *evaluation of internal control system as regards to efficiency of operations in the normal course of business.*

Management Board Members are informed on the results of the auditing upon their competency. The Board of Directors is informed in case of any material breach.

In process of its activity the Internal Audit Division cooperates with auditing firms working for the Company on contract basis.

Information on any inside document with the Issuer establishing rules aimed at prevention of inside information deployment:

There is no document establishing rules aimed at prevention of inside information deployment.

Within the reporting quarter the reserve fund was not used.

There were no other funds to be generated at NLMK out of its net profit.

8.1.4. Information on procedure of convocation and conduction of the Issuer's supreme management body meeting:

The Issuer's management body:

The Supreme governing body of the Company is the General Shareholders' Meeting.

Procedure of shareholders (participants) notification on convocation of General Shareholders' Meeting:

The notification on convocation of General Shareholders' Meeting is brought to notice of the shareholders under decision of the Board of Directors by publication of the

information in newspaper «Gazeta», newspaper «Metallurg» and in NLMK's web-site in the Internet. The notification on General Shareholders' Meeting convocation shall be published not later than 30 days prior to the date of the Meeting, if a longer term is not envisaged by law.

The shareholders owning one and more per cent of the Company's shares as well as nominal shareholders are informed of the meeting in written. The written notifications are sent by the registered mail not later the date stated in this clause.

Persons (bodies) having the right to summon (demand) the Extraordinary Shareholders' Meeting as well as the procedure of raising a demand:

The Extraordinary Shareholders' Meeting is held upon decision of the Board of Directors on the basis of its own initiative, demand of the Auditing Committee, Auditor as well as shareholders (shareholder) owning not less than 10 per cent of the Company's voting shares as of the date of the demand. The Extraordinary Shareholders' Meeting is summoned by the Board of Directors and must be held within 40 days from the date of a/m demand made by Auditing Committee, Auditor or shareholders in respect of the Extraordinary Shareholders' Meeting holding. In case of the Company's Board of Directors members election on the agenda to the Extraordinary Shareholders' Meeting as well as in case the Board of Directors liable to make a decision on holding of the Extraordinary Shareholders' Meeting under the Federal Law "On joint-stock companies" to elect the Board members this Shareholders' Meeting should be held within 70 days from the date of corresponding demand or decision of the Board to hold the Meeting.

A request for holding of Extraordinary Meeting shall contain worded issues to be included into the Meeting agenda. The request for holding of Extraordinary Meeting can contain worded decisions on each of these issues as well as suggestions on the Shareholders' Meeting conduction form.

The Board of Directors is not entitled to change wording of agenda issues, wording of decisions on such issues and change offered form of Extraordinary Shareholders' Meeting being convened upon the request of the Auditing Committee, Auditor or shareholders (shareholder) being owner of not less than 10 per cent of the Company's voting shares.

Should request for the Extraordinary Meeting be submitted by shareholders (shareholder) it shall include the name of shareholders (shareholder), requiring the convocation, the quantity and type (category) of the shares belonging to them (him/her).

Request for the Extraordinary Meeting shall be signed by persons (person) who require Extraordinary Meeting convocation.

The Board of Directors shall make a decision on the Extraordinary Meeting convocation or on refusal to call it within five days from the date of the request submission by the Auditing Committee, Auditor or shareholders (shareholder) being owners of not less than 10 per cent of the Company's voting shares.

Decision on refusal to convene the Extraordinary Shareholders' Meeting upon the request of the Auditing Committee, Auditor or shareholders (shareholder) being owners of not less than 10 per cent of the Company's voting shares can be made in case:

- the procedure of the request submission on convocation of the General Shareholders' Meeting has been violated;*
- shareholders (shareholder) demanding the Extraordinary Shareholders' Meeting summoning do not possess the required quantity of the Company's voting shares;*
- none of the issues put forward to be included into the Extraordinary Meeting agenda refers to its competence and (or) corresponds to requirements of the Federal Law*

«On joint-stock companies» and other legal acts of the Russian Federation.

Decision of the Board of Directors on the Extraordinary Meeting summoning or justified decision to refuse to call it is sent to persons who have required its convocation by registered mail with notice of receipt not later than 3 days from the date of the decision – making.

Should the decision on the Extraordinary meeting convocation be not made or should the decision to refuse to call the Extraordinary Meeting be made within the stated period by the Board of Directors, the Extraordinary Meeting can be summoned by persons or bodies demanding its convocation.

The procedure of the Meeting date determination:

Regular Annual Shareholders' Meeting is convened not earlier than in two months and not later than in six months after the end of a financial year. Extraordinary Shareholders' Meeting can be summoned along with a regular annual meeting.

Date, time and place of the General Shareholders' Meeting, the procedure of its preparation and conduction shall be determined by the Board of Directors under provisions of the Company Statute and Rules of Shareholders' Meeting conduction.

Persons entitled to make proposals to agenda of the Issuer's management body meeting as well as the procedure of these offers submission:

Shareholders (a shareholder), owing not less than 2 per cent of the Company's voting shares in aggregate are entitled to make proposals to agenda of Annual General Shareholders' Meeting and put forward candidate members to the Company's Board of Directors, Auditing Committee and Returning board, the number of which cannot exceed the number of respective body members as well as candidate Director General. Such proposals must be received by the Company not later than in 30 days after the date of a financial year end.

In case of the Company's Board of Directors election being on the agenda of the Extraordinary Shareholders' Meeting, shareholders (a shareholder) owing not less than 2 per cent of the Company's voting shares in aggregate are entitled to propose candidate members to the Board of Directors the number of which cannot exceed the number of the Company's Board. Such proposals must be received by the Company not later than 30 days prior to the date of the Extraordinary Shareholders' Meeting.

A proposal on issues inclusion into the agenda of the General Shareholders' Meeting and a proposal on candidates shall be made in written, shall indicate the name of shareholders (shareholder), demanding it, the quantity and type (category) of the shares belonging to them (him/her) and shall be signed.

A proposal to enter issues into the agenda of the General Shareholders' Meeting shall contain wording of each proposed issue, while a proposal on candidates shall contain name of each proposed candidate, name of body to which that candidate is stated, other data on him/her provided for by internal documents of the Company as well as written consent of a candidate to take the title. A proposal on entering of issues into agenda of the General Shareholders' Meeting can include wording of decision on each proposed issue.

The Company's Board of Directors is liable to consider received proposals and make a decision on inclusion of them into the agenda of the General Shareholders' Meeting or refusal to include into the agenda not later than 5 days after deadlines stated in the Company's Statute for inclusion of proposals into the agenda of the Annual General Shareholders' Meeting and Extraordinary General Shareholders' Meeting. An issue

proposed by shareholders (a shareholder) is subject to entering the agenda of the General Shareholders' Meeting as well as proposed candidates are subject to entering a slate for voting on election to respective bodies of the Company except if:

- *shareholders (a shareholder) have violated terms established by the Company's Statute;*
- *shareholders (a shareholder) do not own the relevant number of the Company's voting shares as stated in the Company's Statute;*
- *a proposal is not in conformity with the requirements of the Company's Statute;*
- *an issue proposed for agenda of the General Shareholders' Meeting is not within its competence and (or) is not in conformity with the requirements of the Federal Act «On the joint-stock companies» and other legal acts of the Russian Federation.*

Justified decision of the Company's Board of Directors on refusal to include the proposed issue into the agenda of the General Shareholders' Meeting or a candidate shall be sent to shareholders (shareholder) who put forward the issue or candidate not later than three days from the date of its receipt.

The Board of Directors is not entitled to change wording of the agenda issues, wording of decisions on such issues of the General Shareholders' Meeting.

Besides issues proposed to be included into agenda of the General Shareholders' Meeting as well as in case of absence of such issues, absence or insufficient quantity of candidates proposed by shareholders to form corresponding body, the Board of Directors has the right to include issues into the agenda or candidates into the slate of the General Shareholders' Meeting at its discretion.

Persons which have the right to get acquainted with information (materials) presented for Supreme Management Body Meeting preparation and conduction as well as procedure of getting acquainted with such information (materials):

Persons having the right to participate in the General Shareholders' Meeting can receive information (material) subject to presentation during preparation of General Shareholders' Meeting for getting acquainted in the room of the Company's executive body and at places the addresses of which are stated in announcement on General Shareholders' Meeting holding within 20 days and in case of General Shareholders' Meeting the agenda of which includes an issue on the Company's reorganization, within 30 days prior to the General Shareholders' Meeting as well as during the Meeting itself at place of its holding.

Persons having the right to participate in the Company's General Shareholders' Meeting can receive copies of the stated documents upon request sent in written to the Company's executive body subject to payment.

Additional issues of NLMK's securities were combined by Regulation of Federal Committee on Securities of Russia No. 04-1026/p dd. April 9, 2004, which resulted in cancellation of state registration number 46-III-0190 dd. 02.04.1993 assigned to the first issue of the Company's common stock. State registration number 1-01-00102-A dd. April 9, 2004 was assigned to the stated above issue of NLMK's securities.

Rights given by shares to their shareholders:

Each common stock of the Company gives a stockholder, its owner, equal measure of property and non-property rights, particularly, the right to:

- a) take part in the Company management, including participation in the General stockholders' meeting with the right to vote on all the issues within its competence both personally and through a representative;*
- b) to receive dividends and to get part of its property in case the Company is liquidated;*
- c) to sell or alienate in other way all the stocks or part thereof to other persons according to the procedure established by the current legislation;*
- d) to be informed about the Company's financial and economic performance according to the procedure established by the current legislation of the Russian Federation and the Company Statute.*

In case the Company places voting stocks and securities convertible into voting stocks by open subscription with payment in cash, the stockholders – owners of the Company voting stocks – have a priority right to purchase these securities in the quantity proportional to the quantity of the Company's voting stocks belonging to them.

Additionally placed shares give the right to vote only after their full payment and approval of the stock placement results by the Board of Directors.

8.7. Information on legislative acts regulating import and export of capital, which could affect payment of dividends, interest and other payments to non-residents.

International agreements and contracts on double taxation prevention, Tax Code of the Russian Federation (part one) No. 146-FZ dd. 31.07.1998 (revision dd. 02.11.2004), Tax Code of the Russian Federation (part two) No. 117-FZ dd. 05.08.2000 (revision dd. 30.12.2004), Federal Law No. 173-FZ dd. 10.12.2003 "On currency control" (revision dd. 29.06.2004), Federal Law No. 39-FZ dd. 22.04.1996 (revision dd. 07.03.2004) "On securities market", Federal Law No. 208-FZ dd. 26.12.1995 (revision dd. 29.12.2004) "On joint-stock companies" are considered as legislative acts which regulate import and export

of capital and which could affect payments of dividends, interest and other payments by the Issuer to non-residents who have the Issuer's securities in possession.

8.8. Description of income taxation procedures regarding placed and being placed Issuer's securities.

Owners of the Company's stocks can receive income as dividends and income from stocks sale. Organization's income is taxed under Chapter 25 «Profit tax of organizations» of Tax Code of the Russian Federation, natural persons are taxed under Chapter 23 «Natural persons' income tax».

Dividends.

In case of dividend payment to natural persons and organizations the Company acts as Fiscal agents, i.e. it makes calculations, deduction from dividends and transfer of natural persons' income tax and profit tax of organizations to the budget.

Legal persons.

Organization's profit from dividends is taxed under Chapter 25 «Profit tax of organizations» of Tax Code of the Russian Federation.

Dividends paid to organizations which are Russian tax payers, are taxed at 9% tax rate (subclause 1 clause 3 Article 284 Tax Code of the Russian Federation), foreign organizations – at 15% tax rate (subclause 2 clause 3 Article 284 Tax Code of the Russian Federation).

Natural persons.

Tax rate of natural persons' (RF nationals) income tax is 9% and 30 % for non-RF nationals.

Income from stocks sales.

Legal persons.

A feature for tax base for RF nationals in case of securities operations is defined by Articles 280 and 283 of Tax Code of the Russian Federation. Profit tax shall be paid at 24% tax rate (clause 1 Article. 284 of Tax Code of the Russian Federation).

Procedure of taxation of non-RF nationals is controlled by Articles 306-307, 309-312 of Tax Code of the Russian Federation. Foreign organizations which do not perform profit-oriented business in the Russian Federation, pay profit taxes upon stocks sale of Russian companies, where more than 50% of assets consist of real estate at the territory of the Russian Federation as well as financial instruments being derivatives of these shares. At that income from trade of securities on foreign stock exchanges or financial instrument being in circulation on these exchanges is not recognized as income received from RF sources of revenues (subclause 5 clause. 1 Article 309). Fiscal Agent makes calculations and deduction of profit tax at 20% or 24% tax rate. 20% tax rate can be applied only in case tax base is a full amount of profit from stocks sales (subclause 1 clause 2 Article 284). 24% tax rate shall be applied if the tax base is defined under the procedure similar to that applied to organizations – RF tax payers (clause 4 Article 309 and clause 1 Article 284).

Natural persons.

Procedure of taxation of natural persons' income from securities operations is established by Articles 214-1, 220, 224 Chapter 23 of Tax Code of the Russian Federation.

Income (loss) on sales of securities is defined as difference between income from securities sales and documented securities sales proceeds and documented expenses of

acquisition, sale and storage of securities actually incurred by a tax payer or assessed tax deduction taken to decrease securities sales income. Assessed tax deduction is not provided for natural persons being non-RF residents.

Assessed tax deduction is granted to a tax payer as regards to full amount received by him during tax period (duration of tax period is one year) from sales of securities being in his possession for three or more years, and in case securities were in possession of a tax payer less than 3 years, then amount of assessed tax deduction in case of their sale cannot exceed 125 000 rubles.

Tax rate for stated income of natural persons being RF residents is 13 percent.

Tax rate for stated income of natural persons being non-RF residents is 30 percent.

Tax is calculated and paid by a fiscal agent upon completion of tax period or in case of payment to tax payer before expiration of successive tax period.

Should it be impossible to withhold calculated amount of tax from a tax payer, a Fiscal agent shall inform tax authorities in written within one month from the date of this event occurrence on impossibility to withhold and on amount of tax debt.

Application of International Agreements.

If provisions of international agreements concluded by the Russian Federation (or USSR, if the RF declared these agreements valid) with other states residents (natural persons or organizations) of which obtain income of the Company's shares, laid down other taxation rules and standards as compared to the same of the Russian Law, rules and standards provided for by international agreements shall apply subject to meeting conditions established by the Law.

5. Preparation and submission of draft decisions on the a/m issues.

6. Control of implementation of decisions taken by the Board of Directors in relation to personnel and remuneration to the management bodies members and the Company’s Auditing Committee as well as social policy.

Chapter 3. Competence of the Personnel, Remuneration and Social Policy Committee

For the purpose of objective and independent recommendations preparation for NLMK’s Board of Directors, the Personnel, Remuneration and Social Policy Committee is vested with the following authorities:

1. To submit to the Company’s Board of Directors the recommendations and proposals on the main Company guidelines in respect to personnel and remuneration to management bodies members and the Company’s Auditing Committee, social policy (programs) development of NLMK, financed out of the Company’s profits.

2. To conduct preliminary assessment of candidates for the relevant management bodies of the Company and make appropriate recommendations to the Company’s Board of Directors.

3. To work out and submit to the Company’s Board of Directors the additional criteria for determination of status of a Board of Directors member as an independent director.

4. To make recommendations to the Company’s Board of Directors on material terms and conditions of labour contracts concluded with executive bodies’ members.

5. To analyze the performance of the management bodies members and the Company’s Auditing Committee, including the issue of possible remuneration rate increase and provision of other forms of incentives.

6. To make recommendation to the Company’s Board of Directors on the rate of remuneration paid out to the Auditing Committee.

7. To prepare proposals on expediency of repeated appointment of the relevant management bodies members of the Company.

8. To analyze the information submitted by the Company's Board of Directors members on personal data alteration, which they are obliged to disclose in accordance with the existing legislation, NLMK's Statute and the Corporate Conduct Code regarding presence/absence of interest in the Company's transactions, when the Board of Directors takes relevant decisions; appearance / cessation of affiliation towards the Company, occurrence of circumstances impeding efficient discharge of the Board of Directors member obligations, loss of independent status by an independent director.

9. To give an opinion on compliance of the proposed candidates for election to the Board of Directors at the General Shareholders' Meeting to the independent director status.

10. To conduct comparative analysis and inform the Company's Board of Directors of policy and programs of management bodies members remuneration in other companies.

11. To participate in control and checks of the Board of Directors decisions execution within its field of activity.

12. To request and obtain, in accordance with the procedure established in the Company, any information necessary for acting as members of executive bodies, heads of organization departments.

13. To prepare and submit to the Board of Directors the Company's draft internal documents related to personnel and remuneration of the management bodies members and the Company's Auditing Committee, as well as social policy.

14. To control execution of decisions taken by the Board of Directors related to personnel and remuneration of the management bodies members and the Company's Auditing Committee, as well as social policy.

15. To analyze and inform the Company's Board of Directors of the main social policy trends executed by Federal state authorities, local authorities and other companies.

16. To submit to the Board of Directors proposals on the Company participation in non-commercial organizations aimed at social programs implementation.

Chapter 4. Staff of the Personnel, Remuneration and Social Policy Committee

4.1. The Personnel, Remuneration and Social Policy Committee consists of three or more members, one of them is a mandatory Board of Directors member.

4.2. The Chairman of the Personnel, Remuneration and Social Policy Committee is elected out of NLMK's Board of Directors members for the period of discharge of their authorities by the Board of Directors during one of the first meetings of the Company's Board of Directors.

4.3. The Committee members who are not members of the Board of Directors are appointed by the Board of Directors upon presentation of the Committee Chairman.

4.4. Upon decision of the Board of Directors the authorities of all Committee members or some of them can be terminated ahead of time.

4.5. Candidates to the Personnel, Remuneration and Social Policy Committee shall have excellent reputation, higher education, experience in the corporate management, jurisprudence, economy.

4.6. The Committee Chairman is responsible for the Committee activity organization.

4.7. The Committee Chairman:

- convenes the Committee meetings and presides over them;
- develops the plan of regular Committee meetings for the current year;
- makes up the Committee meeting agenda;
- makes provisions for keeping minutes of the Committee meetings;
- signs the draft documents (programs, memorandums, etc.) on behalf of the Committee and submits them to the Company's Board of Directors;
- maintains contact with the Company's executive bodies and heads of organization departments;
- appoints the Committee Secretary.

Chapter 5. The procedure of convening and conduction of the Personnel, Remuneration and Social Policy Committee meetings

5.1. The first meeting of the Committee new staff is conducted within 30 work days from the date of meeting of the Board of Directors new staff, at which the Committee Chairman was elected and the Committee members were appointed.

5.2. The Committee meeting is conducted in accordance with the annual plan developed by the Committee Chairman.

5.3. Decisions upon convening of the regular Committee meeting, date, time and place of its holding, as well as upon the agenda and list of persons invited to participate in the meeting, are taken by the Committee Chairman.

5.4. The Committee meeting is deemed authorized (there is quorum) if at least half of the Committee members have taken part in it. The quorum availability is determined by the Chairman at the meeting opening.

5.5. The Committee meetings can be conducted as joint presence of the Committee members or as absentee voting.

5.6. Each Committee member has one vote to take decisions on the agenda. Voting rights transfer by a Committee member to other persons, including another Committee member, is not allowed.

5.7. The Committee decisions are taken by majority vote of Committee members, participating in the meeting.

5.8. Within 3 (three) work days after the Committee meeting conduction (held as joint presence of members or absentee voting) the Committee Chairman prepares the minutes of the conducted meeting and signs it.

5.9. In the minutes of the Committee meeting the following is indicated:

- date, time and place of the meeting conduction;
- the list of Committee members who have taken part in consideration of the meeting agenda, the form of the meeting conduction, the list of persons who were present at the Committee members;
- agenda;
- decisions taken.

5.10. Materials and documents, approved by the Committee, are enclosed to the minutes.

Chapter 6. Provision of the Personnel, Remuneration and Social Policy Committee activities

6.1. To provide the Personnel, Remuneration and Social Policy Committee activities, the expenses for the Committee activity financing are envisaged in the Company budget (budget of NLMK's Board of Directors).

6.2. The proposals on the Committee budget amount are put forward and submitted to the Board of Director for approval.

Chapter 7. Accountability and liabilities of the Personnel, Remuneration and Social Policy Committee members.

7.1. The Personnel, Remuneration and Social Policy Committee submits to the Company's Board of Directors the annual report on its performance not later than 45 days before the Annual Shareholders' Meeting conduction date.

7.2. The Committee members are held liable in accordance with norms of the Federal Act "On joint-stock companies", Statute and other internal documents of the Company.

Chapter 8. The procedure of approval and amending of this Provision

8.1. This Provision as well as all its addenda and amendments are to be approved by the Company's Board of Directors by majority vote.

8.2. All issues not covered by this Provision are covered by NLMK's Statute, Provision on Board of Directors, other internal documents of NLMK.

8.3. If as a result of changes in legal and statutory acts of the Russian Federation certain chapters of this Provision come into conflict with them, these chapters become invalid, and, till this Provision are amended, the Committee members follow the existing legislation of the Russian legislation.

recommendations on annual independent external auditing of the Company's Financial Statements, quality of services rendered by the Company's Auditor and its compliance with requirements to auditor's independency, evaluation by independent appraiser of property in cases stipulated by the Russian Law to the Board.

The objectives of the Audit Committee are as follows:

1. Advisory assistance to the Board to work out strategy on the following issues:

- preparation of recommendations on independent auditing firm: its auditors' qualification, quality of services rendered by the firm and compliance of the firm with requirements to auditor's independency;

- *continued supervision over preparation by the Company's executive bodies of Financial Statements, over objectivity of the Financial Statements, their volume and transparency;*

- preparation of recommendations on evaluation by independent appraiser of property in cases stipulated by the Russian Law;

- continued supervision over functioning of the Company's internal control systems;

- coordination between executive bodies of the Company and others.

2. Preparation and submission of draft resolutions on the above issues.

3. Control over decisions made by the Board as regards to preparation and audit of the Financial Statements and development of internal control systems.

Chapter 3. Competency

The Audit Committee Комитет according to its responsibilities:

1. Prepared recommendations to the Board on the Company's Auditor candidates to be elected out of recognized independent Auditors with high professional reputation to be further approved by the Meeting of the Shareholders;
2. Defines main requirements to arrangement and tender of the Company's Auditor in case of tender;
3. Analyzes and discusses together with the Company's Auditor of significant issues arisen in the course of independent external audit;
4. Gives recommendations on limit of the Company's Auditor's fee, form and volume of its services, inclusive of associated services. Develops policy as regards to preliminary approval of auditing services list rendered by the external Auditor to the Company;
5. Get acquainted with the Auditor's Report before its presentation to the shareholders at the General Meeting of the Shareholders;
6. Considers a list of the most significant amendments to the Company's Financial Statements upon audit results;
7. Analyzes Annual Report before its consideration by the Board and Quarterly Report before its disclosure inclusive of evaluation of its completeness and degree of compliance to information known to the Committee members;
8. Has the right to request and receive any information required for due discharge of its duties from members of executive bodies, managers of divisions according to the procedure established by the Company.

Chapter 4. Structure

4.1. The Audit Committee consists of at least three members, one of them should be the Board member without fail.

4.2. The chairman of the Committee shall be elected from the non-executive Board members for time of duties discharge by the Board at one of the first meetings of the Board.

4.3. The members of the Committee who are not the Board members are appointed by the Board upon recommendations of the Committee chairman.

4.4. Upon decision of the Board, responsibilities of all or a part of the Committee's members can be terminated before the appointed time.

4.5. Candidates to the Audit Committee should have a fair reputation, higher education, qualification and experience in preparation (audit) of Financial Statements, development (analysis) of internal control systems, jurisprudence, economics.

4.6. The Committee chairman is responsible for the Committee arrangements.

4.7. The Committee chairman shall:

- convene the Committee's meetings and preside at them;
- set a schedule for regular meetings for current year;
 - set agenda of the Committee's meetings;
 - arrange taking of minutes;
 - sign and submit draft documents (programmes, memos, etc.) to the Board on behalf of the Committee;
- maintain communications with executive bodies of the Company and managers of divisions;
- appoint the Committee's secretary

Chapter 5. Procedure of convocation and holding of the Committee meetings

5.1. The first meeting of the Committee shall be held not later than 30 working days after first meeting of the Board, where chairman of the Committee is elected and the Committee members are appointed.

5.2. The Committee meeting is held according to annual plan established by the chairman.

5.3. The chairman makes decision on convocation of regular meeting, date, time and place, agenda, list of individuals invited to attend the meeting.

5.4. The Committee meeting is considered as eligible authorized (there is a quorum) in case of not less than a half members of the Committee attended the meeting. Issue of quorum is determined by the chairman at time of the meeting opening.

5.5. The Committee meetings can take place as a joint attendance of the Committee members or as an absentee ballot.

5.6. To make a decision on agenda each member of the Committee has one vote. Transfer of votes by a member of the Committee to other individuals as well as to another member of the Committee is not allowed.

5.7. A decision is taken by the Committee by majority of members' votes.

5.8. The Committee's secretary shall prepare Minutes of the meeting held (as joint attendance of the members or absentee ballot) to be signed by the chairman not later than 3 (three) business days since the meeting.

5.9. Minutes of the Committee meeting state:

- date, time, place of the meeting;
- *list of members attended the meeting, form of the meeting, list of individuals invited to attend the meeting;*
- agenda;
- decisions made.

5.10. Materials and documents approved by the Committee shall be filed to Minutes.

Chapter 6. Assurance of the Committee's performance

6.1. To ensure performance of the Audit Committee within the Company's budget (within the Board budget) expenses allocation to the Committee's performance is provided for.

6.2. Proposals on the Committee's budget are made on the first meeting of the Committee and addressed to the Board for further approval.

Chapter 7. Subordination and responsibilities of the Committee's members

7.1. The Audit Committee shall submit an annual report on its performance to the Board not later than 45 days prior to GSM.

7.2. The members of the Committee bear responsibility under the Federal Law «On joint-stock companies», the Statute and other internal documents of the Company.

Chapter 8. Procedure of approval and changing of the present Provision

8.1. The present Provision as well as all its addenda and changes to it is to be approved by majority of the Board.

8.2. All issues which cannot be resolved by the present Provision are subject to regulation by the NLMK's Statute, the Provision on the Board of Directors and other internal documents of NLMK.

8.3. Where there is a conflict of some chapters of this Provision with the Russian Law and standard acts of the Russian Federation due to some changes in them, these chapters come invalid and the Committee's performance is governed by the current Russian Law before corresponding changes are made to the Provision.

**Decrease in efficiency indices of the Company in 2001 was caused by low prices for metal products in external markets and simultaneous growth of costs due to increase of prices for purchased raw materials and energy.*

1. 6 RISKS

The Company recognizes the presence of risks in the course of economic and financial activity, evaluates and works out mechanisms of their management. The purpose of risk management is to mitigate negative influence of external factors on financial performance.

Industrial and property risks

Industrial risks are defined as the danger of a reduction in income and damage to the company or third parties as a result of a disruption of the normal production process. Every year the Company adjusts and improves the technologies used to increase the reliability of production facilities. This allows the Company to reduce the output of low-quality products, the expenditure of material resources and to increase production efficiency. The number of industrial accidents is reduced through timely maintenance and overhaul of equipment. In order to ensure the continuity of the production process, a reasonable amount of inventory and auxiliary materials are maintained at each stage of production in case of accidents upstream.

Property risks are defined as the likelihood of the loss or damage of part of the Company's property and lost profits during production and financial operations. A number of preventive maintenance procedures are performed in order to preclude the damage and destruction of property, including the training of personnel, provision of occupational safety and fire fighting equipment and installation of alarm systems and devices.

Environmental risks

Environmental risks are defined as the likelihood of the appearance of civil liability for environmental damage which may occur during the construction or operation of production facilities. Constant monitoring of the chemical composition of emissions and discharge of effluents, reduction of environmental impact through the introduction and use of new environmentally friendly technological equipment and withdrawal of obsolete and environmentally hazardous equipment out of operation are performed at NLMK to reduce environmental risks.

Commercial risks

Commercial risks are associated with the possible loss of profits or appearance of losses during the performance of trading operations. The Company monitors both domestic and world markets of metal products in search for new strategic partners and sale channels. This decreases the possible losses from a potential reduction in volumes of product consumption on one particular market. When concluding contracts with new partners, the potential counterparty is always reviewed for reliability and solvency.

Financial risks

The Company exports its products. Settlements with foreign partners are made mainly in US Dollars and Euro. The Company is able to reduce the risk of impairment of assets by placing available funds in deposits and other highly reliable financial instruments. In order to minimize foreign currency risks, deposits are made in both foreign currencies and the Russian rouble.

Liquidity risk is closely related to the receipt of funds under settlements for products. In order to minimize this risk, the schedule of incoming and outgoing cashflows is carefully planned in order to identify any possible deficit in financial resources.

2. SIGNIFICANT ASPECTS OF ACCOUNTING POLICY AND BASIS OF FINANCIAL

STATEMENTS PREPARATION

3.

2. 1 BASIS OF PREPARATION

These financial statements were prepared under current legislative requirements of the Russian Federation for accounting and preparation of financial statements on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business.

Financial statements of NLMK were formed on the basis of the following current RF rules for accounting and reporting without departures:

- RF Federal Law "On Accounting" No. 129-ФЗ dd. 21.11.96 (with changes and amends);
- Order of RF Ministry of Finance No. 67н dd. 22.07.03 "On forms of financial statements";
- Order of RF Ministry of Finance No. 34н dd. 29.07.98 "On approval of Provision on accounting and financial statements in the Russian Federation" (with changes and amends);
- Provision on accounting "Accounting policy of a company" (PBU 1/98), approved by Order of RF Ministry of Finance of 09.12.98 № 60н (with changes and amends);
- Provision on accounting "Accounting of agreements (contracts) on capital construction" (PBU 2/94), approved by Order of RF Ministry of Finance No. 167 dd. 20.12.1994;
- Provision on accounting "Accounting of assets and liabilities values of which are expressed in foreign currencies" (PBU 3/00), approved by Order of RF Ministry of Finance No. 2н dd. 10.01.2000;
- Provision on accounting "Accounting of a company" (PBU 4/99), approved by Order of RF Ministry of Finance No. 43н dd. 06.07.99;
- Provision on accounting "Accounting of inventories" (PBU 5/01), approved by Order of RF Ministry of Finance No. 44н dd. 09.06.01;
- Provision on accounting "Accounting of fixed assets" (PBU 6/01), approved by Order of RF Ministry of Finance No. 26н dd. 30.03.01 (with changes and amends);
- Provision on accounting "Events after reporting date" (PBU 7/98), approved by Order of RF Ministry of Finance No. 56н dd. 25.11.98;
- Provision on accounting "Conditional facts and economic activity" (PBU 8/01), approved by Order of RF Ministry of Finance No. 96н dd. 28.11.01;
- Provision on accounting "Revenues" (PBU 9/99), approved by Order of RF Ministry of Finance No. 32н dd. 06.05.99 (with changes and amends);
- Provision on accounting "Expenses" (PBU 10/99), approved by Order of RF Ministry of Finance No. 33н dd. 06.05.99 (with changes and amends);
- Provision on accounting "Information on affiliated persons" (PBU 11/2000), approved by Order of RF Ministry of Finance No. 5н dd. 13.01.2000 (with changes and amends);
- Provision on accounting "Information on segments" (PBU 12/2000), approved by Order of RF Ministry of Finance No. 11н dd. 27.01.2000;
- Provision on accounting "Accounting of public relief" (PBU 13/2000), approved by Order of RF Ministry of Finance No. 92н dd. 16.10.2000;
- Provision on accounting "Accounting of intangible assets" (PBU 14/2000), approved by Order of RF Ministry of Finance No. 91н dd. 16.10.2000;
- Provision on accounting "Information on discontinued activity" (PBU 16/02), approved by Order of RF Ministry of Finance No. 66н dd. 02.07.02;
- Provision on accounting "Accounting of R&D expenses" (PBU 17/02), approved by Order of RF Ministry of Finance No. 115н dd. 19.11.02;
- Provision on accounting "Accounting of profit tax estimations" (PBU 18/02), approved by Order of RF Ministry of Finance No. 114н dd. 19.11.02;
- Provision on accounting "Accounting of financial investments" (PBU 19/02), approved by Order of RF Ministry of Finance No. 126н dd. 10.12.02;
- Provision on accounting «Information on Joint Ventures» (PBU 20/03), approved by Order of RF Ministry of Finance No. 105н dd. 24.11.03;

- Order of RF Ministry of Finance No. 29H dd. 21.03.2000 “Approval of methodological recommendation on disclosures of profit per a share”;
- Order of NLMK No. 842 dd. 31.12.2002 “On approval of accounting policy of NLMK ”.

Accounting policy of the Company is a code of accounting methods, i.e. primary observation, value calculation, current grouping and total generalization of economic facts used for accounting arrangement and preparation of these financial statements.

2. 2 INTANGIBLE ASSETS

Evaluation

Intangible assets are reflected in balance sheets upon actual acquisition costs, expenses on manufacture and additional expenses in order to bring assets to a state in which they could be used for purposes, less of depreciation charged.

Depreciation

Depreciation is charged on a straight-line basis over their estimated useful lives. Useful lives of intangible assets are calculated on the basis of intangible assets validity and other restrictions on time of intellectual property use according to the legislative requirements of the Russian Federation or on the basis of expected useful life within which the Company can gain revenues or on the basis of quantity of products of any other natural exponents of works expected as a result of that asset use. Should it be impossible to define useful lives for intangible assets, standard amortization charges are established as for 20 years.

R&D results

According to Provision on accounting “Accounting of R&D” PBU 17/02 data on R&D shall be reflected in balance sheets as investments to off-current assets.

Company’s expenses on R&D results of which are used for production or administrative purposes are accounted on account 04 “Intangible assets ” apart, reflected in Group financial statements “Other off-current assets” and written-off to expenses on common activity on a straight-line basis within three years starting from the first day of a month following the month in which their actual use starts.

2. 3 FIXED ASSETS

Structure

As soon as assets are put on accounting as fixed assets the Company is governed by PBU 6/01 “Accounting of fixed assets”.

Property with value below 10 000 roubles per a unit and useful life over 12 months, shall be accounted on account 10 “Materials” and shall be written off to production costs according to its putting into operations. Information on residuals of such property in stock shall be reflected in balance sheet in line “Fixed assets”.

Real estate taken into operation and actually used starting for time of documentary proof of filing of documents for real estate registration are accounted within structure of fixed assets.

Evaluation basis

Historical costs of fixed assets acquired by the Company subject to payment are formed upon actual costs and include expenses on construction and acquisition of fixed assets less taxes payable. Historical costs of fixed assets received under agreements which provide for fulfillment of liabilities (payments) by non-monetary funds shall be recognized as a price of valuables handed over or subject to be handed

over on the basis of price upon which the Company usually define value of similar valuables in comparable circumstances. Value of fixed assets received free of charge is accounted as deferred income upon market value with subsequent attribution to financials. Expenses related to completion and additional supply of equipment increase historical costs of fixed assets.

According to Regulations of RF Government the Company annually revaluated its fixed assets from 1992 to 1997. In succeeding years fixed assets were not revaluated.

Depreciation

Depreciation of fixed assets is charged on a straight-line basis from book value and norms for depreciation calculated for estimated useful lives of individual objects. Useful lives for new objects going to be commissioned shall be defined by the Company on its own taking into consideration requirements of Governmental Provisions No. 1 dd. 01.01.2002 «About classification of fixed assets to be included into depreciated groups».

For acquired fixed assets already being in operation depreciation shall be charged on a straight-line basis by book value and supposed their useful lives. Useful lives are defined by deduction of actual operation time documentary proven by previous owner of fixed assets from useful lives for new objects. For fixed assets acquired in 2001 related to groups of fixed assets "Agricultural tractors" and "Agricultural machinery and equipment", depreciation shall be charged on a basis of their value writing off upon full years of useful lives. For objects under preservation for over three months as well as within renewal period over 12 months depreciation is not charged.

<i>Fixed assets</i>	<i>Estimated useful lives</i>
Buildings	8-80 years
Facilities	3-20 years
Machinery and equipment	5-13 years
Vehicles	run
Others	4-20 years

Retirement, writing-off and disposal

Objects of fixed assets which retired or disposed shall be written off balance sheet together with accrued depreciation (if any). Any profits or losses of disposal or writing-off shall be reflected in Income Statement. As soon as fixed asset retirement, its amount of additional evaluation shall be carried from paid-in capital to retained profit of the Company maintaining within equity.

2. 4 INVENTORIES

Inventories are reflected in balance sheet on the basis of actual acquisition (production) costs with statement of their average costs in balance sheets. Warehouse value of inventories is different from that accounted on account "Materials" by a deviation value, as well as by a value of total differences, which accounted on account 16 "Deviation in inventory values". Deviation values are written-off on a monthly basis to production of products (works, services) pro rata value of inventories used.

Inventories received with no documents from suppliers shall be entered as non-invoiced deliveries according to prices in agreements.

In case inventories are released to production or any other retirement they are evaluated upon average value. The calculation of this value includes quantity and value of materials at the beginning of the reporting period and all deliveries for the period.

Overalls independent of its life shall be accounted within current assets.

2. 5 FINANCIAL INVESTMENTS

Financial investments are accounted according to Provision on accounting PBU 19/02 .

Financial investments are accounted upon their historical costs on the basis of actual expenses on their acquisition. Only those financial investments are revaluated as of the reporting period end for which market values are defined in the set order.

In case of financial investments impairment marks for which market value cannot be defined, the Company makes a provision as of December 31 of the reporting year.

Debt securities and loans granted were not evaluated upon their discounted value.

In case of retirement securities (shares, bonds) for which current market value is not defined are evaluated upon their historical costs of the first acquired (FIFO method).

2. 6 REVENUES AND COSTS

Revenues and costs of the Company are classified as income and expenses on common activity, operating, npn-operating and extra.

Income received from chargeable temporary use and possession of assets, rights, arising out of patents for invention, industrial models and other types of intellectual property, from stake in charter capital of other enterprises, interests receivable for lending cash and other income on securities not related to the Company's core activity shall be attributed to operating income.

In case of income groups separation, each accounts for 5 % and more of total income for the reporting period, a corresponding expense group shall be also separated.

Sales proceeds are defined upon transfer date of title for products, goods, results of works, services rendered (free of charge) on the basis of documents presented to buyers (customers).

Production costs of products (works, services) sold domestically or exported are defined by straight-line calculation on the basis of types of products and their actual costs.

Expenses related to products (services, works) sales are recognized in full in costs of products (services, works) sold in the reporting period as expenses on common activity.

Earlier general expenses were included into costs of goods produced and were distributed between costs of goods finished, semi-finished products, construction-in-progress pro rata their volumes. New procedure of their recognition was established by Provision on accounting policy for the purposes of accounting in 2004.

Income and expenses of social subdivisions being on separate balances are recognized as income and expenses on common activity.

Deferred income irrespective of its group are subject to be attributable to corresponding accounts of expenses accounting on the monthly basis by equal shares stipulated by agreements or settlements of the Company within the period to which they attribute.

Expenses on voluntary property and personal insurance are included into costs of products manufactured (services rendered) within the reporting period in which the payment was effected under the agreement terms and conditions. If payment of lumpsum insurance fees is provided for by insurance agreement concluded for not more than one reporting period, expenses are recognized evenly within the agreement validity.

Expenses on repair and maintenance of fixed assets are recognized as expenses on common activity at time it is completed. The Company creates provisions for decrease of inventories value, financial investments impairment, for doubtful debts and other provisions chargeable according to standard documents of bodies performing regulation of accounting. Evaluation provisions are charged from operating expenses.

A provision on fixed assets repair and a provision on advance payment of holidays to employees are not created.

2. 7 CONDITIONAL EVENTS OF ECONOMIC ACTIVITY AND EVENTS AFTER REPORTING DATE

A conditional event of economic activity means an event of economic activity taken place as of the reporting date in respect of which there is uncertainty as regards consequences of the event or probability of their appearance in the future, i.e. consequences formation depends on whether one or

several uncertain events take place in the future.

An event after the reporting date is identified as such of it made or could make a significant influence on financial performance, cash flows or results of the Company's activity and which took place between the reporting date and the date of financial statements signing for the reporting year.

2. 8 OPERATIONS IN FOREIGN CURRENCY

Operations in foreign currency were initially reflected in Russian roubles according to exchange rate of the RF Central Bank published on date of the operation. Monetary items (cash and its equivalent, short-term securities), expressed in foreign currency as of the date of the balance are reflected upon the exchange rate published on the date of the reporting period end. Non-monetary items reflected upon their historical costs in foreign currency are accounted upon exchange rate published on the date of the operation. Exchange rate differences arisen from repayment of debt or from reflection of it upon exchange rate different from that upon which it was initially accounted in that period are attributed to profit and losses within other extra-sales income and expenses for the period when they occur. Exchange rate differences are reflected separately from other income and losses inclusive of financial results on operations with foreign currency. For the purpose of accounting stated recalculation into roubles is made upon exchange rate of the RF Central Bank on the date of the operation.

Exchange rate differences are calculated on:

- last day of each month;
- date of operation completion when there is a gap in time between beginning and end of the operation;
- in case of cash flow;
- upon exchange rate changes in case of balance in foreign currency petty-cash..

Exchange rates established by the RF Central Bank since 31.12.2004:

<i>Foreign currency</i>	<i>Exchange rate (roubles)</i>
1 USD	27,7487
1 EUR	37,8104
100 JPY	26,7509

2. 9 PRINCIPLES OF FINANCIAL STATEMENTS UPON SEGMENTS

The Company does not prepare consolidated financial statements but it believes it is important to submit information on activity segments to all concerned users of financial statements.

According to analysis of organizational and management structure as well as system of internal reporting of the Company, **information on operating segments** which are identified on the basis of differences between types of products, production and technological processes are taken as source information on segments.

Besides, according to principles of completeness and materiality the Company shows its activity aimed at transfer of its property to assets management as a separate operational segment. Risks different from risks of common activity are inherent to these operation. Financial results upon them are shown within operational income and expenses.

The following information is disclosed on operational segments: revenues, financial results, balance value of assets, depreciation charges for fixed assets and intangible assets and capex.

Information on geographical segments is disclosed by the Company on a secondary basis and only sales revenue is disclosed.

The Company has some assets which are located beyond its core business however they are insignificant and cannot be recognized as material for disclosure in the financial statements as regards to geographical segments separated upon assets location marks.

Nature of NLMK's core business and internal reporting system allow separating geographical segments upon location of sales markets.

These segments were allocated as a reporting segment on the basis of similarity in economic and political conditions in regions, proximity of operations, availability of specific risks relating to sales in particular regions.

2. 10 TAXES

Profit tax

Balance profit and taxable profit are defined according to current legislative requirements of the Russian Federation by use of different methods of assessment and accounting of income and expenses. According to PBU 18/02 "Accounting of profit tax computation" the Company takes into account constant and temporary differences which are generated on the basis of analytical data by comparison of balances on accounts and tax accounts. Comparison is made by groups of similar objects accounted on corresponding accounts.

Value added tax

Moment for determination of tax basis is established upon value date, i.e. the day of payment for goods shipped, services rendered.

Taxes charged for products shipped but not yet paid (services rendered) are accounted within the account payable. As soon as buyers and customers effect payments, taxes are subject to payment to the budget.

Property tax

Objects of fixed assets for which tax benefits are provided are accounted separately.

* Amount of adjustment for long-term depositary certificates in case of their transfer to a short-term ones at time of 365 days or less remained before their repayment accounted for 234,969 thousand roubles.

** Besides, securities of Russian and foreign issuers for 5,045,194 thousand roubles acquired within asset management agreements are belonged to the Company. (see **Explanation 3.20.2**)

Non-interest bearing notes of third parties were acquired by the Company for acceleration of settlements with buyers rather than for income deriving.

According to rules of income recognition interests on long-term certificates of deposit with maturity dates in 2005-2011 are not identified by the Company in the financial statements. Interest income as of 31.12.2004 accounts for 144,926 thousand roubles (average interest rate –13,51%).

Interests on long-term currency deposits are charged on monthly basis according to terms and conditions of agreements.

The Company has received the following revenue on deposits:

Description	Amounts, thousand roubles		Average interest rate, %	
	2003	2004	2003	2004
	Short-term deposits	35 197	73 390	4,58

Efficiency of production inventories use

Index	2000	2001	2002	2003	2004
Financial costs, тыс. руб.	20 505 069	22 943 097	26 225 281	35 287 656	54 077 664
Average remains of production inventories, thousand roubles	3 289 737	4 624 672	4 409 391	5 232 333	7 760 632
Turnover ratio (line1/line2)	6,23	4,96	5,95	6,74	6,97
Duration of production inventories, days (365/ line3)	58	73	61	54	52

Against a background of absolute size of production inventories caused by growth of purchasing prices and increase of production yield, an acceleration of their turnover rate is witnessed. The Company monitors overstandard, old inventories and other illiquid funds on a on-going basis. To reflect realistic assessment of inventories in the statements the Company has made a provision for their value depreciation which accounts for as of 31.12.2004:

Description	<i>thousand roubles</i> Amount
A provision for decrease in inventories value	696
A provision for decrease in construction-in-progress value	31 351
Total	32 047

Information on cash flows is disclosed in Cash Flows Statements (Form 4).

Data of Cash Flows Statements characterizes changes in financial position of the Company in the context of current, investment and financial activity.

Operations related to income and expenses from common activities stipulated in the Statute are attributed to current activity.

Acquisition and sales of property, intangible assets and other non-current assets by the Company, its own construction, R&D expenses are attributed to investment activity. Besides operations with financial investments: acquisition of long-term and short-term securities and their sales; contributions to charter capitals of other companies; granting of loans are included here.

In Section «Cashflows in financial activity» the Company has reflected payments of financial rent (leasing) according to Order of the RF Ministry of Finance No. 67н dd. July 22, 2003.

All indices of currency cashflows are recalculated under exchange rate of the Central Bank as of December 31, 2004.

Index «Degree of exchange rate impact as related to the Russian rouble» is a difference between incoming cash balance in reporting currency and outgoing balance of the previous year calculated according to exchange rates of the Russian Central Bank as of 31.12.2004 and 31.12.2003 respectively.

3.8 CAPITAL

Description	thousand roubles.	
	as of 31.12.2003	as of 31.12.2004
Charter capital	5 987	5 993 227

Profit used for liabilities repayment	4 014 705
Total	51 043 429

3.9 DIVIDENDS

Dividends are paid to the shareholders of the Company out of net profit determined on the basis of the Financial Statements prepared under RF law. Dividends are paid out in cash in declared amount within 90 days from date of the respective decision of the General Shareholders' Meeting.

According to the Dividend policy the General Shareholders' Meeting is eligible to make a decision to pay intermediate dividends in case financial performance of the Company permits their payment without any injury to the current activity and implementation of its further development programs.

In the reporting years the following dividends were declared for common stock taking into account additional issue:

- upon results of 2003 - 0,6045 roubles per share;
- upon results of 9 months of 2004 - 1 rouble per share.

Amount of dividends charged by shareholders types

Shareholders	upon results of 2002	upon results of 2003	<i>thousand roubles</i> upon results of 9 months of 2004
Legal persons	1 810 677	3 535 411	5 851 549
Natural persons – employees of NLMK	29 684	40 272	64 583
Other natural persons	30 651	47 223	77 095
Total dividends	1 871 012	3 622 906	5 993 227

As of 31.12.2004 99% of dividends were paid upon results of 2002 and 2003 and 97% upon results of 9 months of 2004.

3. 10 OTHER LONG-TERM LIABILITIES

Description	Value as of 31.12.2003	<i>thousand roubles</i> Value as of 31.12.2004
Notes due	90 000	90 000
VAT due upon long-term accounts receivable	3 876	5 628
Total	93 876	95 628

Interest-free notes issued by the Company were used as security for payment of shares acquisition in an associate.

3. 11 INCOME STATEMENTS

For the purposes of comparability of Income Statements of the Company indices on common activity for 2003 were recalculated according price index of industrial manufacturers for 2004:

Name of index	For 2004	For 2003	<i>thousand roubles</i> Change
---------------	----------	----------	-----------------------------------

		Upon financial statements	With price index (1,283)	(2-4)
1	2	3	4	5
Sales revenues	126 180 664	75 026 216	96 258 635	29 922 029
Cost of sales	(60 619 761)	(41 148 432)	(52 793 438)	7 826 323
Gross margin	65 560 903	33 877 784	43 465 197	22 095 706
Commercial expenses	(1 270 564)	(1 135 613)	(1 456 991)	-186 427
Administrative expenses	(1 809 543)	(1 407 591)	(1 805 939)	3 604
Sales profit	62 480 796	31 334 580	40 202 267	22 278 529

Amount of general expenses in residuals of construction-in-progress, finished products, semi-finished products as of 31.12.2003 accounted for 42 452 thousand roubles.

According to changes in accounting policy from 01.01.2004 cost of goods sold include all general expenses and residuals stated above. If the stated procedures were applied since 01.01.2003, sales profit fro 2003 would have decreased by 42 452 thousand roubles, and profit for 2004 would have increased by the corresponding amount.

3. 12 SALES REVENUES

Description	<i>thousand roubles</i>

Other	20,12	17,15	10,96	4,72	1,15

Income tax

In accordance with Accounting rule 18/02 "Accounting of expenses under income tax" the Company accounts permanent and temporary differences.

Permanent differences making up fixed tax liabilities are related to the presence of fact or appraisal of profit and losses acknowledgement in the accounting or tax accounting of only one reporting period

and does not affect the formation of taxable profit of other reporting periods.

Temporary differences are determined by profit and losses making up accounting profit in one reporting period and taxable profit in another reporting period. Temporary differences form a deferred tax asset and deferred tax liability. Deferred tax asset and deferred tax liability reflect part of income tax by which the tax subject to payment to the budget in the following reporting periods is reduced or increased.

Income tax calculation in accordance with the requirements of Rule of accounting 18/02.

Name	<i>thousand rubles</i>	
	For 2003	For 2004
Income tax under accounting date	7 175 366	15 743 749
Fixed tax liabilities	153 052	6 133
Deferred tax assets	13 623	5 834
Deferred tax liabilities	(164 760)	(203 522)
Income tax upon tax computations	7 177 281	15 552 194

VAT

Being a conventional exporter, the Company sells the major portion of its products at 0% tax rate.

Tax amounts paid to suppliers and contractors for buying goods (works, services) exceed the tax amount computed from the sale of goods. The difference is submitted for reimbursement from the budget.

Since the change in the tax legislation in 1.01.05, 0% tax rate is set for selling products to the Republic of Belarus, which will lead to the increase in tax amounts reimbursed from the budget.

Name	<i>thousand rubles</i>				
	2000	2001	2002	2003	2004
VAT reimbursed from budget	1 833 240	751 665	1 144 742	1 752 942	2 684 937

Single social tax

The Company computes single social tax under regressive scale pursuant to Tax Code of the RF.

Share of the employees whose taxable base corresponded to regressive scale, that is income amount exceeded 100 thd. rubles, accounted for 35% in 2003, and for 52% in 2004. Application of tax concessions to Single social tax reduced the amount of tax charged for 2004 by 6 046 thousand rubles against 5 253 thousand rubles for 2003.

Since 1.01.05 the rate of single social tax amounts to 26% (35,6 in 2004), regressive tax rates are applicable in case an employee's tax base exceeds 280 thousand rubles (100 thousand rubles in 2004).

Name	2000	2001	2002	2003	2004
Tax rate (%)	38,5	37,0	35,6	35,6	35,6
Effective rate of single social tax	38,16	34,89	32,84	30,80	28,35

3. 18 PROFIT PER SHARE

Base profit per share is defined as the ratio of the base profit of the reporting period to the average weighted amount of common shares being in circulation during the reporting period.

Item	For 2003	For 2004
Net (base) profit of the reporting period, thousand rubles	22 568 939	49 849 071
Average weighted amount of common stock deing in circulation, pcs	5 987 240 000*	5 993 227 240
Base profit per share, rubles	3,77	8,32

* Due to additional common stock issue the data for 2003 are brought to conformity pursuant ro Methodical recommendations.

3. 19. 1 TRANSACTIONS WITH AFFILIATED PERSONS

Sales to affiliated persons and purchase from affiliated persons

The order of fixing prices for goods, works and services provided to NLMK's subsidiaries and associates as well as to other affiliated persons is established by “Provision on the order of fixing prices for metal products and other NLMK's products sold within the RF and the CIS countries” (single market prices for outside companies and subsidiaries).

The order is established taking into account the requirements of article 40 of the RF Tax Code. Prices for inventories and services acquired from affiliated persons correspond to market ones.

Sales

Because of the fact that the majority of transactions with affiliated persons percentage wise to the result of transactions taken separately is immaterial for appraisal of changes in the Company's financial performance, we consider it appropriate to present information grouped under transaction types without indication of specific affiliated persons.

Accounts receivable for 2004

Affiliated persons' liabilities to the Company and the Company's liabilities to affiliated persons in 2003 accounted for 1,35% and 14,69% of the total amount of accounts receivable and accounts payable respectively.

3. 19. 3 Rewarding of NLMK Board and Management members

The amount of rewards to the Board members for proper fulfillment of their duties is established by the "Provision on rewarding of the Board members of NLMK" approved by the Shareholders' Meeting. Conditions and order of paying-off the rewards to the Management members are determined by the agreement concluded with the Management members in accordance with the Provision on remuneration of Company's Management members approved by the Company's Board upon the presentation of the Committee on personnel and remuneration.

3. 20 STATEMENT ON SEGMENTS

3. 20. 1 Information on activity segments.

The Company's main activity is ferrous metals production. Proceeds from the core activity amount to more than 96.5% of the total sales volume.

Operating segments – pig iron, slabs, hot-rolled stock, cold-rolled stock, galvanized rolled stock and coated rolled stock. The share of other products and services in Company's overall output is insignificant.

Proceeds from sales of operating segments represents income from sales of segments products. Proceeds from other transactions include information on sales of products (works, services) which are not included in reporting segments structure. In view of the fact that transference of products between

reporting segments are not referred to sales but to the consequence of stage-by-stage production technology, information on them is not disclosed.

Financial performance is the difference between sales proceeds and production cost value of products sold. Because of accounting policy changes information on it for 2003 has been adjusted through increasing it by the amount of administrative expenses which are not included in production cost value at present.

The indice "The Company's aggregate assets" comprises the article "Segment assets book amount" and the article "The Company's retained assets".

The indice "The Company's aggregate retained liabilities" comprises data on the Company's long-term and short-term liabilities.

Annual capital investments	323 111	581 016	106 606	2 633 376	4 574 171	8 223 2
The Company's retained assets				75 882 662		
The Company's aggregate assets				114 124 877		
The Company's aggregate retained liabilities				8 754 735		

A significant increase in retained assets amount in 2004 is related to increase in financial investments and accounts.

A large share of retained assets in "Other operations" is accounted for by the fact the Company incorporates over 100 divisions which are not segregated as operating segments because they are not involved in foreign trade or it is insignificant but their products are used domestically. Information about them is tabulated additionally.

Groups	Assets		Depreciation allocations to fixed assets and intangible assets		Capital investments

Total	12 598 312	17 058 133	433 454	538 959	1 674 359	4 574 171

Geographical segments – domestic market, South-East Asia, Turkey and Middle East, the EU countries and North America.

The Company supplies its products to over 50 countries. The segregated segments are geographical segments of sales markets, information on which the Company submits on a secondary basis.

The segments have been identified on the basis of the fact that proceeds from foreign sales amounted to not less than 10% of the total proceeds amount, financial performance of the segment amounted to not less than 10% of the financial performance of all segments.

3. 20. 2 Assets management

Within the period from June, 2003 to December, 2004 the agreement of assets management with OJSC Bank of social construction and development "Lipetskcombank" was valid, under which NLMK, being the founder and beneficiary, transferred cash assets for the amount of 170 mln. US dollars to the bank. As of 01.01.2004 the amount of cash funds transferred for assets management accounted for 7% of the balance currency, thus this operating segment has been acknowledged as a reporting one.

The main aim of assets management was to increase their market value at the expense of medium-term investments to financial markets instruments with minimization of risks to lose the principal investment amount.

Over the validity period of the a/m agreement the Company's financial performance was the following:

Indice	thousand rubles	
	2003	2004
Profit, total	2 420 756	15 574 265
including :		
interest on bonds	46 283	77 085
profit from transactions with securities	2 105 282	14 355 557
dividends	-	89 715
others	269 191	1 051 908
Expenses, total	2 217 579	10 954 528
including:		
expenses on transactions with securities	2 109 184	9 843 250
others	108 395	1 111 278
Profit tax	6 071	1 134 860
Performance	197 106	3 484 877

The agreement validity has been terminated. All assets have been returned before signing this agreement and there are no liabilities to the Company under this agreement.

3. 21 PROVISIONAL FACTS OF THE COMPANY'S ECONOMIC ACTIVITY

The Company's management deems it necessary to disclose possible losses arising from events acknowledged to be provisional facts:

	<i>thousand rubles</i>	
Provisional facts of economic activity	Possible losses	
Facilities construction of which has been suspended	216 815	
Transfer of ownership for Matyra water storage basin		38 236
Fixed assets not in use	109 077	
Cases of deficiency and loss from valuables damage under investigation	17 303	
Trials and claims		58 559
Total		439 990

Apart from it, the Company has calculated evaluation reserves for financial investments devaluation, for decrease in inventories cost and for doubtful debts (see **Explanation 3.4, 3.5, 3.6** respectively).

Novolipetsk Steel (hereinafter referred to as "NLMK")

Address: (Levoberezhny District) 2, pl. Metallurgov Lipetsk 398040..

State registration:

Certificate on state registration with Registrating Chamber of Lipetsk Administration No. 4399-и, series 07 was registered with Uniform state register on 28.01.93:

Entered with Uniform Register of legal persons under No. 1024800823123 on 09.07.2002.

We have audited the accompanying financial statements of NLMK for the period between January 1 and December 31, 2004.

The financial statements of NLMK include:

- Balance sheets;
- Statements of income;
- Appendices to Balance Sheets and Statements of income;
- Notes to the Financial Statements.

NLMK Management bears responsibility for the preparation of the financial statements. Our responsibility is to express an opinion on these financial statements authenticity in all material aspects and on their conformance to the Russian Law requirements based on our audits.

We conducted our audits in accordance with:

1. Federal Law "On auditing";
2. Federal standards on auditing;
3. Auditing standards approved by Committee on Auditing with RF President in a part which is not in conflict with the Federal standards;
4. internal standards, methods and instructions on audit.

An audit was planned and performed to obtain reasonable assurance about whether the financial statements were free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also included accessing the accounting principles used, rules for financial statements preparation; and significant estimates made by management, as well as evaluating the overall financial statements presentation.

In our opinion the financial statements of Novolipetsk Iron & Steel Corporation present fairly in all material aspects the financial position as of December 31, 2004 and the results of its operations for the period between January 1 and December 31, 2004 according to the requirements of the Russian Law in a part of preparation of Financial Statements and accepted accounting policy.

- b) The Board of Directors;*
- c) Collective executive body – the Management;*
- e) Single executive body – Director General.*

Members of the Issuer's Board of Directors are:

Oleg V. Bagrin

Year of birth: 1974

Nikolay A. Gagarin

Year of birth: 1950

Dmitry A. Gindin

Year of birth: 1946

Oleg V. Kiselev

Year of birth: 1953

Vladimir S. Lisin

Year of birth: 1956

Nikolay P. Lyakishev

Year of birth: 1929

Randolf Reynolds

Year of birth: 1941

Vladimir N. Skorokhodov

Year of birth: 1951

Igor P. Fyodorov

Year of birth: 1966

Members of the Management are:

Galina A. Aglyamova

Year of birth: 1961

Igor N. Anisimov

Year of birth: 1965

Vyacheslav I. Vorotnikov

Year of birth: 1954

Pavel V. Gorodilov

Year of birth: 1957

Anatoly N. Koryshev

Year of birth: 1944

Alexander I. Kravchenko

Year of birth: 1955

Sergey P. Melnik

Year of birth: 1961

Vladimir P. Nastich

Year of birth: 1953

Sergey V. Perekatov

Year of birth: 1959

Sergey A. Rakitin

Year of birth: 1954

Vladislav A. Smirnov

Year of birth: 1949

Alexander A. Sokolov

Year of birth: 1961

Vladimir A. Tretyakov

Year of birth: 1960

Viktor V. Hripunkov

Year of birth: 1960

Stanislav E. Tsyrlin

Year of birth: 1968

The Issuer's Director General is:

Vladimir P. Nastich

Year of birth: 1953

1.3. Information on auditor (auditors) of the Issuer.

An Auditor who renders services on independent auditing of accounting and financial statements having been prepared under the legal requirements of the Russian Federation as well as of consolidated financial statements prepared under US GAAP:

Full name: *Closed joint-stock company «PricewaterhouseCoopersAudit»*
Abbreviated name: *OJSC «PricewaterhouseCoopersAudit»*
Domicile: *Bldg 5, 52, Kosmodamianskaya naberezhnaya 115054 Moscow Russia*
Tel: *(095)-967-60-00*
Fax: *(095)-967-60-01*
E-mail: webmaster@pwc.com

Auditor's license data:

License No: *E000376*
Issue date: *20.05.2002*
Validity: *within 5 years*
Licensor: *the RF Finance Ministry*

The Financial Statements for the following financial years have been audited by the auditor:

- Auditing of the Issuer's consolidated financial statements prepared under US GAAP: 2003, 2004, 2005.*
- Auditing of individual financial statements compiled under the requirements of the RF legislation: 2005.*

Factors that could affect Auditor's independence from the Issuer and information on any material interests which bind Auditor (Auditor's officers) with the Issuer (the Issuer's

officers):

There are no factors that could affect Auditor's independence from the Issuer or interests which bind Auditor (Auditor's officers) with the Issuer (the Issuer's officers), in particular:

- *Auditor (Auditor's officers) does not have any share in the Issuer's stockholder capital;*
- *the Issuer did not grant any loans to Auditor (Auditor's officers);*
- *there are no close partnership (promotion of the Issuer's products (services), joint ventures, etc.), as well as kinship;*
- *there are no Issuer's officers being simultaneously Auditor's officers.*

Procedure of Auditor appointment:

An Auditor is appointed by the General Shareholders' Meeting upon presentation of the Board of Directors. Preparation of recommendations on the Company's Auditor for the Board of Directors is effected by the Commission on Auditing. Tender related to Auditor selection can be provided for. The main tender rules on the Company's Auditor appointment, in case such is held, are determined by the Commission on Auditing.

Information on projects executed by Auditor within special auditorial tasks:

Auditor did not execute any projects apart of his direct functions.

Procedure of Auditor fee definition:

The Company's Board of Directors shall define fee for Auditor's services and any other essential conditions of agreement.

Information on deferred and late payments for services rendered by Auditor:

There are no deferred and late payments for services rendered by Auditor.

1.4. Information on appraiser.

The Issuer did not enlist services of an Appraiser (Appraisers) regarding securities issue, information on which is presented in this Quarterly Report.

Information on appraiser being involved by NLMK for fixed assets revaluation as of 01.01.2000:

Full name: *Closed joint-stock company «Center of professional appraisals»*

Abbreviated name: *CJSC «Center of professional appraisals»*

Domicile *49, Leningradsky prospekt 125468 Moscow Russia*

Tel: *(095)-943-95-40*

Fax: *(095)-943-93-28*

E-mail: *no data*

Data on appraiser's license:

License No.: *series IJIC Registration No. 000004 code OI*

Issue date: *June 30, 1999.*

Validity: *June 30, 2000.*

Licenser: *Licensing Chamber with Moscow Government*

Information on services rendered by the appraiser: *appraisal of fixed assets full replacement cost has been performed as of 01.01.2000*

1.5. Information on the Issuer's advisers.

Financial adviser who renders consulting services in securities market:

Full name: *Closed joint-stock company "Renaissance Capital"*

Abbreviated name: *CJSC "Renaissance Capital"*

Domicile: *4th floor, Usadba Centr 22, Voznesensky pereulok Moscow 125009, Russia*

Tel: *(095)-258-77-77*

Fax: *(095)-258-77-78*

Web-site in Internet where the financial adviser discloses information on the Issuer:
www.rencap.com

Data on licenses of professional activity in securities market:

License of securities market participant for brokerage

License No.: *177-05370-100000*

Issue date: *July 12, 2001*

Validity: *unlimited*

Licenser: *Federal Committee on securities market*

License of securities market participant for dealer activity

License No.: *177-05386-010000*

Issue date: *July 12, 2001*

Validity: *unlimited*

Licenser: *Federal Committee on securities market*

Services rendered (having been rendered) by the Adviser:

- *assistance to the Issuer in preparation of securities offering circular;*
- *verification of authenticity and completeness of all information from Securities Offering Circular, with exception of the audited one;*
- *attestation of Securities Offering Circular as well as documentation that might deem necessary for the Issuer in order to arrange circulation of shares with traders;*
- *consultations on issues related to preparation of Securities Offering Circular, any other documentation pertaining to arrangement of shares circulation and the Issuer going through listing procedure;*
- *consultations on issues related to disclosure by the Issuer of information in securities market and monitoring over discharge by the Issuer of his liabilities pertaining to disclosure of information in securities market according to requirements of Federal authority on securities market.*

1.6. Information on other persons who signed this Quarterly Report.

There are no such persons.

II. Main information on the Issuer's financial performance.

2.1. Financial and economic indices of the Issuer's activity.

<i>Indice name</i>	<i>As of 31.03.2005.</i>	<i>As of 30.06.2005.</i>
<i>Net assets value, thousand rubles</i>	<i>116 444 310</i>	<i>121 569 853</i>
<i>Relation of debt capital to capital and reserves, %</i>	<i>7.2%</i>	<i>11.2%</i>
<i>Relation of short-term liabilities to capital and reserves, %</i>	<i>6.3%</i>	<i>10.2%</i>
<i>Late debts level, %</i>	<i>1.5%</i>	<i>0.3%</i>
	<i>I q. 2005</i>	<i>II q. 2005</i>
<i>Cover of payments of debt service (coefficient)</i>	<i>_*</i>	<i>_*</i>
<i>Turnover of accounts payable (times per year)</i>	<i>2.15</i>	<i>1.64</i>
<i>Dividend share in the profit, %</i>	<i>_**</i>	<i>_**</i>
<i>Productivity of labour, thousand rubles per person</i>	<i>858.6</i>	<i>760.2</i>
<i>Depreciation to proceeds volume, %</i>	<i>1.4%</i>	<i>1.7%</i>

* in q. I and q. II, 2005 NLMK had no loans and credits

** in q. I and q. II, 2005 as of the report publication NLM had no declared dividends

For calculation of the a/m indices methods recommended by the Provision on information disclosure by Issuers of securities approved by Resolution Nr. 05-5/n3-n dd. March 16, 2005 of Federal Committee of Central Bank.

Analysis of the a/m indices movement attests to the stable financial state and solvency of the Issuer in view of stable net assets growth, large share of own capital in sources of financing and respectively low level of the Issuer's dependence on loan funds.

Net assets amount as of 30.06.2005 increased by 4.4% as compared to the respective indice as of 31.03.2005, which is primarily accounted for by the increase in short-term financial investments, inventories and construction in progress.

The largest share in the Issuer's debt funds is represented by short-term liabilities. Short-term liabilities to own capital ratio increased slightly and accounted for 10.2% as of 30.06.2005, which was caused by the increase in the Issuer's short-term liabilities in the part of debts to participants of income payment (utilization of the net profit of former years for payment of dividends over q. IV, 2004).

Similarly the indice "relation of debt funds to capital and reserves" as of 30.06.2005 increased regarding its level and accounted for 11.2%.

In spite of the indices increase their level attests to NLMK's low dependence on loan funds.

Accounts receivable turnover

In Q II, 2005 accounts receivable turnover decreased regarding Q I level and accounted for 1.64 (in Q I, 2005 – 2.15). It was caused by the increase in short-term account receivable by 15.5% and sales proceeds decrease by 12%.

Decrease in sales proceeds in Q II, 2005 regarding Q I, 2005 (- 12%) caused a decrease in labour productivity by 11.5%.

Depreciation to proceeds ratio

The indice of depreciation to proceeds ratio increased slightly: from 1.4% in Q I, 2005 to 1.7% in Q II, 2005), which is mainly accounted for by sales proceeds decrease by 12% together with depreciation charges increase by 3.2% only.

2.2. The Issuer's market capitalization.

The Issuer's total shares outstanding – 5 993 227 240.

Starting from November 23, 2004 common stock of NLMK has been listed on "OAO RTS Exchange Market"(ticker symbol - NLMKG).

The value of NLMK capitalization calculated on the basis of the Exchange data as of 30.06.2005 amounted to 210 516 122 267.

Starting from January 14, 2005 NLMK's common stock (ticker symbol – NLMK) was included into quotation list "B" of Securities List ("Classical shares market") admitted to trading at NP "RTS Stock Exchange".

The value of NLMK capitalization calculated on the basis of the Partnership data as of 30.06.2005 amounted to 7 506 636 983 USD (determined upon RTS data on the price of shares traded at the Exchange and calculated according to Russian Central Bank Financial Committee (FKZB) Decree Nr. 05-5/n3-n dd. March 16, 2003 "On approval of the provision on information disclosure by securities issuers").

It should be noted that starting from November 5, 2003 to January 28, 2005 information on indicative quoting of the Issuer's common stock is reflected in «RTS Board» (ticker symbol – nlmk), as these data are not official quotations of securities, they cannot be used for calculation of market capitalization of the Company.

2.3. The Issuer's liabilities.

2.3.1. Accounts payable.

The structure of NLMK's accounts payable as of 30.06.2005

<i>Liabilities</i>	<i>Maturity date</i>	
	<i>To one year</i>	<i>Over one year</i>
<i>Accounts payable to suppliers and contractors</i>	2 260 514 017	-
<i>inclusive: overdue</i>	40 999 540	-
<i>Salaries and wages</i>	318 115 673	-
<i>inclusive: overdue</i>	-	-
<i>Arrears to the budget and extra-budget funds</i>	1 046 150 118	-
<i>inclusive: overdue</i>	-	-
<i>Credits</i>	-	-
<i>inclusive: overdue</i>	-	-
<i>Loans, total</i>	-	-
<i>inclusive: overdue</i>	-	-
<i>inclusive: bonded loans</i>	-	-
<i>inclusive: overdue bonded loans</i>	-	-
<i>Other accounts payable</i>	8 694 935 236	5 430
<i>inclusive: overdue</i>	461 912	-
<i>Total</i>	12 319 715 044	5 430
<i>inclusive: total overdue</i>	41 461 452	-

NLMK's accounts payable as of 30.06.2005 do not incorporate creditors whose share amounts to not less than 10 per cent of the total accounts payable.

Overdue accounts payable as of the reporting period end represents accounts payable to certain contractors which arose in the course of commercial relations and was being repaid within the terms agreed by the parties.

The risk of imposing of fines and sanctions as well as interest on default obligations is estimated as low by the Issuer.

2.3.2. The Issuer's credit history.

Over the last 5 complete financial years and as of the reporting quarter end credit facilities agreements were not entered. Borrowings were not taken.

2.3.3. The Issuer's commitments on security to third parties.

	<i>Q II, 2005</i>
<i>The total amount of guarantees securing fulfillment of liabilities and payments</i>	363

There were no liabilities for security to third parties in the reporting quarter inclusive of guarantee or pawn accounting to not less than 5% of the Company's assets book value. .

2.3.4. Other commitments of the Issuer.

There were no other commitments of the Issuer as of the date of reporting quarter end.

2.4. Purposes of issue and use of funds gathered from securities distribution.

The Company did not issue any securities distributed by subscription since the date of its registration. So the Company did not attract funds by distribution of securities.

2.5. Risks related to acquisition of distributed (being distributed) issuing securities.

Acquisition of NLMK's securities entails certain risks which could result in losses for shareholders. Negative impact on the Issuer's main activity and financial performance can be produced by the following risks:

- *industry risk;*
- *country and regional risks;*
- *financial risks;*
- *legal risks; and*
- *risks related to the Issuer's activity.*

2.5.1. Industry risks

NLMK actively operates in domestic and international markets as a producer and seller of metal products. The situation in the industry can worsen due to worsening of situation both in raw materials purchasing markets and steel products sales markets.

Industry risks at raw materials markets

NLMK is one of the major consumers of the main steelmaking raw materials at the domestic raw materials market. Raw materials supplies are subject to risks formed depending on the peculiarities and specific features formed in every segment of the raw materials market.

The main risks pertaining to the supplies of the main steelmaking raw materials incorporate:

- *The risk of increase of the prices for the raw materials being purchased caused by deterioration of the market conditions of this market segment, increase in the raw materials deficit in the domestic market as well as a result of increase in the delivery tariffs of natural monopolies.*
- *The risk of breach of obligations on the composition and quality of the raw materials being purchased on the part of raw materials suppliers.*
- *The risk of breach of obligations on delivery timeliness including the complete disruption of delivery on the part of raw materials suppliers.*

To minimize the risks of drastic prices fluctuations at the domestic raw materials market the Issuer is conducting operational monitoring of the major operators of this market segment, is concluding contracts with the prices and volumes agreed for a certain period, fixed payment schedules, is attracting alternative suppliers.

To minimize the risks of increase in the tariffs of natural monopolies on the raw materials transportation the Issuer attracts alternative transport and forwarding firms.

To minimize the risks of obligations breach on the part of suppliers regarding the composition and quality of the raw materials being purchased the Issuer concludes contracts for delivery with long-time partners and suppliers who have gone through the procedure of appraisal and approval in accordance with the current NLMK's Quality Management System certified under ISO 9001. Contracts with suppliers provide for penalties for breach of quality of the raw materials to be delivered.

To minimize the impact of the risks of partial or complete disruption of deliveries the Issuer makes up a sound insurance stock of the main kinds of raw materials which enables to ensure the production cycle continuity. The delivery of the main material resources is effected as per the agreed schedules ensuring smooth delivery for a continuous finished products production process. The Company has entered into agreements with several suppliers for the delivery of one kind of material resources. Contracts with suppliers provide for penalties for the breach of delivery terms and qualitative features of raw materials.

Risks at the coal concentrate and coke markets.

Together with the a/m risks the Company is greatly influenced by the risk of prices increase caused by deterioration of coal concentrate and coke market conditions and coking coals deficit. To ensure raw materials security of the Company in coking coals market along with the a/m measures different projects on development of the Company's coal base are considered.

Risks at iron ore markets

The risks pertaining to iron ore markets are the same as the risks of coal concentrate and coke market. However the influence of the risks is slightly reduced due to supply of this material from the Company's subsidiaries providing about 90% of the Company's need in iron ore.

Risks at scrap markets

The main risk of the domestic scrap market which influenced the Company along with prices increase is the risk of fluctuation of smoothness and the quantity of supplied scrap caused by the seasonal factor. To minimize this risk the Company establishes a sound autumn-winter scrap stock ensuring the continuity of production cycle in case of deliveries hold-up.

Industry risks at sales markets

The risks in foreign markets related to the possible changes of prices for the Issuer's products and their influence on the Issuer's activity and fulfillment of its securities obligations.

Macroeconomic risks

The forecast rates of economic growth for 2005 indicate not quite favourable outlook for metal-consuming industries in the main ferrous metals consuming regions: the world real GDP growth is anticipated to be at the level of 4.2% against 5.0% in 2004, industrial production growth will account for 4.7% against 6.6% in 2004.

After the record growth of the world consumption of finished products produced from ferrous metals by 9.2% in 2004 regarding the level of 2003 and the respective increase in steel production at the beginning of 2005 at several major world markets the conditions for reduction of finished steel products consumption have been created: economic growth rates in the EU countries and Japan turned out to be slower than expected. The central government of the Chinese People's Republic is continuing to take measures of macroeconomic regulation aimed at containing investments in steelmaking and construction industries.

As a result the estimated increase in finished steel products consumption in 2005 in the world except the Chinese People's Republic will account for 1.1%. Besides, the third quarter is associated with the seasonal recession of finished steel products consumption during the period of mass leaves (in July-August) in industrial production.

The a/m factors can produce a descending influence on the prices of the Issuer's products.

Change of supply and demand ratio at the world market of ferrous metals

Consumption decrease resulted in accumulation of excess stock at the key distribution chain stages: from trade companies to ultimate consumers. Thus, depending on the country and region the volume of steel products stock in the first quarter of 2005 exceeded the last year indice by 17-25%. In the second quarter of 2005 a significant order volume decrease (and prices respectively) was noticed in all major world ferrous metals markets.

Trying to restore the balance of supply and demand to the level of the second half of 2004 a number of European companies (Arcelor, ThyssenKrupp Stahl, Corus, Salzgitter, Riva, Rautarukki) primarily reduced the output of finished flats. A number of American steelmaking companies (Mittal Steel divisions, U.S. Steel) selectively stopped their production facilities for prescheduled repairs. As a result steel production in the second half of 2005 will decrease by 3.5% regarding the same period of 2004 (against the growth by 7.6% in the first half year).

By the end of July prices recession slowed down, at a number of markets (Europe, the Chinese People's Republic, USA) prices stabilized.

Stock liquidation, economic reactivation after the leaves period and production reduction can facilitate supply restriction in the world market and formation of assumptions for start of prices increase in the fourth quarter of 2005. It can produce an ascending influence on the Issuer's prices in the short-term outlook.

Industry structure changes

As a result of consolidation in the world ferrous metallurgy in 1999-2004 the degree of production concentration increased: while 20 major enterprises produced 33.7% of the world steel output in 2000, in 2004 they produced 38.7%.

Consolidation processes will continue in 2005 and 2006. China can be especially active here: the government intends to make two companies of annual capacity of not less than 30 mln. tpy each leaders of the industry.

Industry mergers and takeovers reinforced steelmakers' position by narrowing the competition and have a positive influence on prices for the Issuer's products.

Growth of investments in the fixed assets

Favourable market conditions of the world ferrous metals market in 2002-2004 and increase in profit of steelmaking companies stimulated investments in new steelmaking facilities. China is the leader in the growth rate of new steelmaking capacities: in 2003 it increased its capacities regarding 2002 by 20.1% while the rest of the world – by 2.7%. In 2005 China will increase its steelmaking capacities by 16.3% regarding 2004 while other

countries – by 5.1%. In the first half of 2005 alone China put in operation 40 new CCM, total capacity of 28 mln. tpy.

This factor facilitates the increase in steel supply at the global market. It can produce a depressive influence on the price for the Issuer's products at foreign markets especially in the long-term outlook.

Aggravating competition of steelmakers from developing countries

Increase in production capacities in case of limited domestic demand creates conditions for the growth of steel products export by such countries as China, India, Brazil. In the first half of 2005 Chinese export amounted to 11.6 mln. tons of steel products, which is 154% higher than the level of the same period of 2004.

Taking into account low costs and a vast raw materials base (in Brazil and India) products originating from these countries can immediately compete with the Issuer's products at the global markets, which can restrict its possibilities of increasing the products prices in the medium-term and long-term outlook.

Transportation risks

Shipping rates for international sea shipping decrease in April 2005 under the influence of decreasing iron ore shipping volumes in China and a large number of new ships. By the beginning of the fourth quarter of 2005 a slight increase in seasonal shipping cost can be brought about by activation of utilities shipping before the beginning of winter and by the start of new harvest grain-crops transportation in Northern hemisphere.

Shipping rates increase causes the price for ultimate consumption goods to increase as well and under certain conditions (high level of stock, industrial production recession) can negatively influence the prices for steel products.

Risks at the domestic market related to the possible change of prices for the Issuer's products and their influence on the Issuer's activity and fulfillment of obligations on securities.

Russian iron and steel industry is an export-oriented industry: the RF steelmaking capacities significantly exceed the needs of the domestic market. As a rule, the growth of domestic market prices facilitates the increase in exports of Russian plants, which leads to a decrease in flats supply at the domestic market and growth of domestic prices for it. On the contrary, if foreign market conditions worsen steel products shipment to the domestic market increases and in a number of cases and prices for it decrease.

Thus, prices dynamics at the domestic market will be primarily determined by the change of global prices. It should be noted, however, that under the conditions of relatively high development rates of Russian economy demand for steel products will remain stable. Domestic market share in steel products consumption is likely to increase thus slowing down the landslide of prices at the foreign market in the near future. It is indirectly confirmed by the fact that the current domestic prices for steel products often exceed export ones. In the medium-term outlook (5-7 years), however, this situation may change: the level and dynamics of domestic market prices will be closer to the changes being underway in the world. The forecast growth of import shipments share in the RF consumption will increase the price pressure of the global market conditions on the domestic market. As a result we can forecast to a high degree of probability that by 2010 the dependence of domestic market prices on the global prices will increase. Russia's joining the World Trade Organization will also speed up adjustment of domestic and foreign market prices.

2.5.2. Country and regional risks

NLMK is an export-oriented Company. In the first half of 2005 the main export regions which bring 10% and more of sales proceeds are as follows: Russia, South-East Asia, the EU countries, other European countries and Turkey.

In case of negative situation in some regions NLMK possesses vast possibilities of re-orienting its products to more attractive markets and minimizing possible financial damages.

The main industrial activity of the Issuer is pursued within the Russian Federation. The activity of metal products manufacturing and export in Russia entails a number of risks.

Political risks

The political system of Russia is in the stage of formation and constant restructuring, that is why it is not stable yet, which causes the following risks for NLMK:

- possibility of foreign and domestic policy change can fundamentally affect the investment attractiveness of the country as a whole and NLMK in particular;*
- possibility of legislation alteration which may have negative consequences, inclusive of tax legislation, aimed at budget receipts maximization from export-oriented industries.*

Economic risks

Russian economy is poorly diversified and essentially dependent upon world prices on raw materials, oil and gas in the first place. Continuous and significant landslide of world prices for raw materials can lead to decrease in proceeds of raw materials companies. It, in its turn, can further entail economic recession of the Russian economy in general, which can affect the Issuer's activity.

In order to minimize the economic and financial risks NLMK tries to diversify its funding sources, expands its sales geography and product mix.

2.5.3. Financial risks

Being an export-oriented company, NLMK confronts currency risks, as well as interest escalation risks which can fundamentally affect its financial performance.

Currency risks

Taking into account the situation in the world financial markets in the previous years, NLMK's export program is framed with regard to possible (forecast) exchange rate fluctuations of the main currencies. Actions are taken to diversify export proceeds currency structure.

Provisions are made for proportional distribution of payments on long-term import contracts and use of letters of credit for settlements with receipt of interest income from depositing the cover of these operations.

Since the major part of NLMK's expenses are in rubles, there is risk of business profitability reduction due to considerable ruble exchange rate fluctuations with respect to foreign currency. In order to minimize these risks, the Company takes the following measures:

- *concluding agreements with banks for conducting sales of large foreign currency amounts for rubles at a fixed rate of exchange with minimal commission;*
- *allocation of temporarily surplus foreign currency and ruble funds which allows to reduce dependency on exchange rate fluctuations and maintain profitability.*

In the reporting period currency risks hedging with forward contracts and options application transactions were not effected due to the following reasons:

- *absence of legislation which regulates this kind of transactions;*
- *contradictory forecasts of the world's leading experts' concerning perspectives of foreign currency rates with respect to US dollar.*

Interest escalation risk

NLMK may act as borrower both in the international and domestic capital markets. The Company may use borrowed funds for current activity financing and for investment projects.

On the other hand, NLMK's high solvency appears to be an important factor of borrowings value decrease for the Company in the future.

Risk of liquidity deterioration

For NLMK liquidity risk is closely associated with cash inflow under settlements for products. In order to minimize this risk, the schedule of incoming and outgoing cashflows is carefully planned to identify any possible deficit in financial resources. The ratio of the Company's highly liquid assets to liabilities attests to high solvency and a correspondingly low liquidity risk.

2.5.4. Legal risks

Risks related to currency regulation changes

The new law "On currency regulation and control" dd. 10.12.2003 Nr. 173-F3 (took effect 17.06.2004 with the exception of separate provisions for which another effective term is established) (hereinafter – "New law on currency regulation") provides for necessity of reservation by residents of the RF currency monetary funds on a separate account in an authorized bank prior to effecting a number of currency transactions defined by the present law, which will induce outflow of monetary funds for reservation purposes and their temporary exclusion from the Company's current settlements. It can hinder fulfillment of the Company's obligations upon agreements with contractors.

Risks related to tax legislation alteration

Income tax

As per federal law No. 204-Φ3 "On entering changes to the second part of the RF Tax Code" dd. 29.12.2004 significant changes concerning possibility of attribution of payments to Private Pension Fund (NPF) to salaries and wages were introduced and article 213.1 of the RF Tax Code was implemented. This article provides for the list of circumstances to be observed by taxpayers being natural persons in order to avoid the mandatory payment of natural persons income tax.

As per item 16 of article 255 of the RF Tax Code expenses on labour remuneration incorporate payments (fees) from employees under contracts of private provision of pensions concluded in favour of employees having NPF with licenses provided that pensions scheme envisaging accounting of pension fees on individual accounts of NPF participants when the participant has legal reasons for getting pensions which allow to establish either state pension or labour pension for the period of the reasons validity is applied. At that contracts for private provision of pensions shall envisage payment of pensions till depletion of funds on individual account but not less than for five years.

As per Federal law No. 95-FZ dd. 29.07.2004 income tax rate applied to shareholding in other organizations established by item 3 of article 284 of the RF Tax Code was changed. Starting from 01.01.2005 the rate reached 9% of the total tax base for this kind of income (tax rate used to be 6%).

VAT

On 01.01.2005 Agreement on payment of indirect taxes between Russia and Belarus took effect. The article however does not cover sales of products through agents and the chances are that zero rate is inapplicable in this situation. Besides, if goods of non-Russian origin are sold from the RF to Belarus zero rate is invalid.

If NLMK fails to confirm the actual exports within 90 days it will have to pay VAT to the budget and deduction will be made only after submission of all the necessary documents.

Federal law No. 202-FZ "On obligatory social insurance fund for 2005" provides for the following: in 2005 benefit for the first 2 days of temporary disability caused by disease or trauma is payable to the insured by the employee, later on – by the Fund.

Risks related to changes in the rules of customs control and duties

Federal law "On the foundations of foreign trade governmental regulation" dd. Nr. 164-F3 08.12.2003 determines the possibility of the a/m activity regulation through customs and tariffs regulation, nontariff regulation, foreign trade prohibition and restrictions by services and intellectual property, imposing of economic and administrative measures. Application of the a/m methods can bring about the risk of establishing customs fees and duties on import/export, special anti-dumping and compensation duties, exceptional application of temporary restrictions both of goods export and import, imposing quantitative restrictions on goods export and/or import, which will hinder the Company's activity.

No changes were introduced to customs control rules and duties during the period of 01.01.2005 to 30.06.2005.

Risks related to changes in demands on licensing the Issuer's main activity

Risks related to changes in demands on licensing the Issuer's main activity which can produce a negative impact on his financial performance are estimated as indefinite by the Company.

Risks related to alteration of judicial practice on the issues related to the Issuer's activity

The RF VAS Presidium decree No. 924/05 dd. 07.06.2005. Upon audit results in case of non-receipt of the respective funds tax authorities are entitled to raise arbitrage claims on declaring transactions null and void and applying consequences of their invalidity in order to establish the balance of state and private interests. Previously tax authorities didn't have such a right.

Over the reporting period there were no changes in legislation, judicial practice regulating

legal relationship in licensing, in particular, in licensing the Issuer's core activity or rights of use of facilities whose number in circulation is limited, i.e. there were no changes that could significantly influence the Company's activity.

The Company hasn't been involved in legal procedures which could produce a negative impact on the Company's licensing performance.

There are no risks related to prolongation of the Issuer's license for a particular kind of activity or for use of facilities whose number in circulation is limited.

2.5.5. Risks related to the Issuer's activity

Over the last years and now NLMK has not been involved in any legal procedures in which plaintiffs' claims are significant (more than 5% of the Issuer's assets book value).

The main part of the Issuer's licenses on activities important for the Issuer is valid till 2006 and further on. Risk related to failure to prolong these licenses is extremely low.

Subsidiaries and affiliated companies of NLMK are responsible for their financial performance and risk management.

III. Detail information on the Issuer.

3.1. History of the Issuer's Company.

3.1.1. Information on the Issuer's name.

Full name of the Issuer.

Open Joint-stock Company "Novolipetsk Steel"

Abbreviated name.

NLMK

The Company has the right for trade mark "STINOL" registered as stated by the Russian Law (information on trade mark registration is given in clause 4.4. of the present report).

Information on changes in the Issuer's name.

1. The Yu.V. Andropov Novolipetsk Iron & Steel Works honored with the Lenin Order and the October Revolution Order

NLMK

Introduced on: *14.03.1984*

Basis for changes: *Decree of the Central Commission of the KPSS, Presidium of the Supreme Soviet of the USSR and Council of Ministers of the USSR «On perpetuation the memory of Yury V. Andropov».*

2. Novolipetsk Iron & Steel Corporation

NLMK

Introduced on: *28.01.1993*

Basis for changes: *Decision of the Lipetsk Region State Property Management Commission No. 823 dd. December 31, 1992 «On reorganization of the Yu. V. Andropov Novolipetsk Iron & Steel Works into Novolipetsk Iron & Steel Corporation».*

3. Current name was introduced on 12.08.1998

Basis for changes: *Decision made at Annual Shareholders' Meeting dd. August 1, 1998 (Minutes No. 9) on approval of the Company's Statute in a new edition.*

3.1.2. Information on state registration of the Issuer.

Number of state registration: *5-F*

Date of state registration: *28.01.1993*

Registrar: *Administration of Levoberezhny district of the city of Lipetsk*

State registration number of a legal person: *1024800823123*

Date of registration: *09.07.2002*

Registrar: *Inspection of MNS of Russia in Central district of the city of Lipetsk*

3.1.3. Information on foundation and development of the Issuer.

According to the RF Presidential Decree No. 721 dd. 01.07.1992 «On measures aimed at conversion of state enterprises, voluntary associations of state enterprises into joint stock companies» state enterprise The Yu. V. Andropov Novolipetsk Iron & Steel Works honored with the Lenin Order and the October Revolution Order was reorganized into Novolipetsk Iron & Steel Corporation by decision of Lipetsk region state property management Commission No. 823 dd. 31.12.1992. The Company was registered by Decree of Head of Levoberezhny district of the city of Lipetsk No. 50 dd. 28.01.1993.

The Company was registered for uncertain period of time.

The purpose of enterprise privatization is to increase efficiency of national economy by transfer from planned economy to market economy. In transition to a market economy the following decisions have been made by the Company:

- on optimization of organizational structure and management system of production and auxiliary divisions;*
- on improvement of system of raw material, fuel procurement, products sales and marketing services;*
- on development and approval of Technical Reconstruction and Development Program.*

Today NLMK is a large advanced company with highly developed and coordinated production, the products of which are exported to dozens countries of the world.

Plans of NLMK cover steady increase of high-end production, finding solutions to various environmental problems at all production stages, production of high value added products which meet constantly raising demands from customers.

3.1.4. Contact information.

The Issuer's domicile: *Russian Federation*

Domicile of the Issuer's executive body:

2, pl. Metallurgov, Lipetsk 398040 Russia

The Issuer's phone, fax numbers, E-mail, web-site:

Tel: *(0742)-445-010*

Fax: *(0742)-441-111*

E-mail: *info@nlmk.ru*

Web-site with information on the Issuer and his securities issued and/or being issued:

Domicile of key division of dealing with shareholders and investors - *Division on property and securities management: 2, pl. Metallurgov, Lipetsk 398040 Russia*

Tel: (0742)-444-989

Fax: (0742)-442-255

E-mail: *loskutov_va@nlmk.ru*

Web-site: *none*

3.1.5. Taxpayer Identification Number

4823006703

3.1.6. The Issuer's branches and representative offices.

In the Issuer's quarterly report for the first quarter of the current year the list of NLMK's branches and representative offices as per the Company's Statute is included.

In the reporting quarter NLMK's Board of Directors approved changes to the Statute (Article 50 "List of branches and representative offices") related to the change of location of NLMK's far east branch "NLMK-DV" (decision dd. June 14, 2005 (Minutes No. 128)).

In accordance with the changes entered in NLMK's Statute the domicile of its Far East branch "NLMK-DV" is the following: 111 ul. Svetlanskaya, Vladivostok, Russia.

3.2. The Issuer's core activity.

3.2.1. The Issuer's industry.

Codes of the Issuer's activity within the industry according to All-Russian code of foreign – economic activity:

<i>Code</i>	<i>Description</i>
27.17	<i>Production of cold rolled steel flats without and with protective coatings</i>
23.10	<i>Coke production</i>
24.14.2	<i>Production of other organic chemical products which are not entered into any other group of products</i>
24.15	<i>Production of fertilizers and nitrogen compounds</i>
27.11	<i>Production of pig iron and blast furnace ferroalloys</i>
27.14	<i>Production of steel</i>
27.15	<i>Production of semi-finished (slabs) products for further rolling</i>
27.16.2	<i>Production of hot rolled steel flats</i>
27.22	<i>Production of steel pipes and fittings</i>
27.33	<i>Production of roll-formed steel sections</i>
28.63	<i>Production of locks and hinges</i>
28.71	<i>Production of metal drums and similar reservoirs</i>
29.51	<i>Manufacture of machinery and equipment for steel industry</i>

31.62.9	<i>Services rendered for erection, repair and maintenance of other electric equipment which is not entered into any other group of products</i>
34.30	<i>Production of parts and components of cars and motors to them</i>
36.22.1	<i>Production of parts for technical application from precious metals</i>
37.10.1	<i>Waste and ferrous scrap processing</i>
40.10	<i>Production, supply and distribution of electrical power</i>
40.10.5	<i>Activity on assurance of electric mains serviceability</i>
40.20.2	<i>Distribution of gas fuel</i>
40.30	<i>Production, supply and distribution of steam and hot water (heat energy)</i>
45.21.1	<i>Civil works on buildings construction</i>
45.31	<i>Wiring operations</i>
51.70	<i>Other wholesale trade</i>
52.11	<i>Retail trade in non-specialized stores principally by foodstuffs, including beverage food and tobacco goods</i>
52.12	<i>Other retail trade in non-specialized stores</i>
52.31	<i>Retail trade of pharmaceutical products</i>
55.12	<i>Activity of hotels having no restaurants</i>
55.51	<i>Activity of canteens located at the territory of plants and institutions</i>
60.10.2	<i>Activity of industrial railroad transport</i>
60.23	<i>Activity of other inland passenger transportation</i>
60.24	<i>Activity of motor transport</i>
63.11	<i>Transport processing of cargoes</i>
63.12	<i>Storage and warehousing</i>
63.21.1	<i>Other auxiliary activity of railway transport</i>
64.20.1	<i>Activity in the area of phone and document communications</i>
70.32.1	<i>Management of housing stock</i>
74.20.1	<i>Architectural activity, engineering in industry and construction</i>
74.20.3	<i>Land measuring and mapping</i>
74.60	<i>Investigations and accidents prevention</i>
80.22.22	<i>Training in advance training (extension) schools for specialists having secondary vocational education</i>
80.30.3	<i>Training in advance training (extension) schools for specialists having higher vocational education</i>
85.11	<i>Activity of patient care institutions</i>
85.13	<i>Dental practice</i>
85.20	<i>Veterinary activity</i>
92.13	<i>Movies demonstration</i>

3.2.2. The Issuer's main activity.

The Issuer carries out its activity in the territory of the Russian Federation. NLMK's main industrial activity is ferrous metals production and selling. The Company is oriented at producing high-quality hot-rolled and cold-rolled flats. Besides the Company produces semi-finished products (slabs).

Profit share from such activity constitutes almost 100% of the total profit from sales of products, goods, works.

*In quarter II, 2005 profit share from sales of ferrous metals in the Company's**

total profit amounted to 95.4% (quarter II, 2004 – 99.0%).

Proceeds from sales of ferrous metals:

in quarter II, 2005 – 28 040 945 thousand rubles,

in quarter II, 2004 – 31 009 792 thousand rubles, decrease by 9.6%.

The Issuer's activity has slight seasonal nature related to decrease of metal products consumption in winter. However the influence of this seasonal nature upon the Issuer's financial performance is not significant.

3.2.3. Main types of products (works, services).

Products bringing not less than 10% of sales (proceeds) volume of NLMK in Q. II, 2005:

<i>Products</i>	<i>Amount, million rubles</i>	<i>Share, %</i>
<i>Slabs</i>	<i>6 784.2</i>	<i>23.5</i>
<i>Hot-rolled flats</i>	<i>7 822.4</i>	<i>27.1</i>
<i>Cold-rolled flats</i>	<i>6 403.1</i>	<i>22.2</i>
<i>Others</i>	<i>7 803.0</i>	<i>27.1</i>
Total sales (proceeds) volume	28 812.7	100%

NLMK's cost value general structure

<i>Cost items designation</i>	<i>Reporting period</i>
<i>Raw materials and materials, %</i>	<i>70.747</i>
<i>Acquired component parts, semi-finished products, %</i>	<i>0.001</i>
<i>Works and services of production nature rendered by outside organizations, %</i>	<i>3.561</i>
<i>Fuel, %</i>	<i>3.600</i>
<i>Power, %</i>	<i>4.720</i>
<i>Salaries and wages, %</i>	<i>6.602</i>
<i>Interests on credits, %</i>	<i>–</i>
<i>Rent, %</i>	<i>0,013</i>
<i>Single social tax, %</i>	<i>1.679</i>
<i>Fixed assets depreciation, %</i>	<i>2.634</i>
<i>Taxes included into the products cost value, %</i>	<i>2.641</i>

<i>Other costs, %</i>	<i>3.802</i>
<i> depreciation on intangible assets, %</i>	<i>0.001</i>
<i> rewards for rationalization proposals, %</i>	<i>0.131</i>
<i> mandatory insurance payments, %</i>	<i>0.140</i>
<i> representative expenses, %</i>	<i>0.004</i>
<i> other, %</i>	<i>3.526</i>
<i>Total: costs for products manufacturing and sales (works, services), %</i>	<i>100</i>
<i>Products (works, services) cost value, thousand rubles</i>	<i>17 566 448</i>
<i>For reference: profit from sales of products (works, services), % to the cost value</i>	<i>223</i>

Information on new significant types of products (works, services) as well as on their development is not available to the public for the purpose of maintaining the Issuer's competitive advantages.

The Issuer's cost value structure is determined in accordance with Accounting Rule 10/99 "The Company's expenses" (Decree No. 33н dd. May 6, 1999 of the RF Ministry of Finance), methodical recommendations on planning, formation and accounting of expenses on production and sales of products (works, services) of iron and steel companies, and NLMK's accounting policy.

3.2.4. The Issuer's raw materials and suppliers.

For its production (to support production technologies) NLMK purchases the following raw materials: coal concentrate (coking grades), iron ore, coke, scrap, ferroalloys, non-ferrous metals and fluxes.

NLMK is a vertically integrated holding which incorporates mining enterprises to a significant degree providing for the Company's needs of iron and steel raw materials.

NLMK is the major shareholder of the mining company OJSC "Stoilensky GOK" which is the third largest iron ore producer in Russia by extraction volumes and explored reserves. NLMK's advantageous geographical location regarding the main Russian iron ore deposit (Kursk Magnetic Anomaly) allows to minimize the costs of iron ore transportation.

To eliminate the risks related to coking coals and coal concentrate supply in 2005 NLMK won the auction for the right to use the subsoil area Zhernovsky-1 of Kuznetsk coal basin. The preparation stage of the deposit development is underway, which will significantly boost the Company's raw materials security.

NLMK's need in fluxes is fully satisfied by its subsidiaries – OJSC "Stagdok" (Lipetsk) and OJSC "Dolomite" (Lipetsk region, Dankov).

The main price tendencies in quarter II, 2005

Price tendency for the main kinds of steelmaking raw materials in Q II, 2005 was determined by deterioration of the situation in pig iron and flats market and surplus supply in the market of raw materials, which led to stabilization and certain decrease in prices.

Iron ore. The bulk of iron ore needs is provided for by OJSC "Stoilensky GOK", OJSC "Lebedinsky GOK" and OJSC "Kombinat KMaruda". Purchase prices increased by 100.8% in Q. II, 2005 regarding Q. II, 2004.

Coal concentrate. In Q. II, 2005 the main sources of coal concentrate for NLMK were Kuznetsk coal basin (78% of the total supply volume in Q. II, 2005), Pechersk coal basin (10%) and Yuzhno-Yakutsky coal basin (5%). In Q. II, 2005 import accounted for not more 4% of the total quarterly supply volume. The main Russian suppliers of coal concentrate (whose share exceeds 10%) are CJSC "Sibuglemet", LLC "Trading house "Evroresurs"", OJSC "Belon", LLC "Argo", LLC "Joint coal concern" and LLC "Northern coal concern".

In quarter III, 2005 purchase price for coking coal and coal concentrate exceeded the respective price of quarter II, 2004 by 39.8%.

Increase in domestic purchase prices was determined by the situation in the world coal market. A sharp demand increase in the world market of coking coals which began in 2004 and was related to the favourable market conditions in the world market of ferrous metals caused a significant coal deficit and increase in prices for it. In January of 2005 purchase price increased sharply by 45% regarding the level of price in December of 2004. However decrease in domestic coal prices which began in March of 2005 stabilized by June coal purchase price for NLMK by 4% in the descending direction regarding January of 2005.

Coke. Due to the revamping of NLMK's Coke Plant 90% of its coke needs are satisfied by its own Coke Plant, 10% is purchased mainly from Russian producers.

The major domestic coke suppliers to NLMK in q. II, 2005 were CJSC "Sibuglemet" (the coke is produced by OJSC "Moskoks") and LLC "Trading house Kemerovo-Koks" (27% of the total supply volume of q. II, 2005) as well as LLC "Koksohimporg" (the coke is produced by OJSC "Altai-koks") (23%). In Q. II, 2005 import also accounted for about 23% (the coke is produced by OJSC "Yasinovsky KHZ").

Average purchase prices for coke for NLMK in Q. II, 2005 decreased by 28.7% regarding the price level of Q. II, 2004. In 2004 world prices for coke increased at even higher rates than for coking coal, which was caused by restrictions imposed in China, the major coke exporter. Settlement of the licensing issue in China at the end of 2004 brought about decrease in prices at the beginning of 2005. Domestic coke prices also started to decrease due to the decrease in demand. Consequently, by the April of 2005 purchase coke price for NLMK decreased by 26% regarding the price level of December, 2004. In June, 2005 no coke was purchased from outside.

Scrap. NLMK's scrap needs are mainly provided for by Secondary Non-ferrous Metals of the RF Central region. Scrap is delivered to NLMK both by railway (92%) and by motor transport (8%).

The average NLMK's purchase prices for scrap in quarter II, 2005 exceeded the respective prices level of quarter II, 2004 by 19.6%. The tendency of domestic purchase prices for scrap is in many respects determined by the situation dictated by the two competing consumers of this kind of raw materials – exporters and domestic iron and steel companies. The annual scrap formation in Russia is estimated at 35

mln. tpy, while the annual demand of the Russian domestic market doesn't exceed 13 mln. tpy at the moment, and scrap collectors collect about 17-20 mln. tons of scrap per year. Apart from it, as Russia has a significant scrap stock it is a scarp exporter in the world market. Besides, according to Coordination Council of Russian Scrap Processing during the nearest 5-8 years scrap collecting in Russia is estimated to reach 40 mln. tpy (while potential demand from steelmakers does not exceed 17-18 mln. tpy), which attests to perspective high stability of domestic scrap market.

Favourable situation in the world steel market was facilitated by increase in consumption volumes and prices in the world scrap market in 2004. In Q. II, 2005 prices were slightly adjusted in the descending direction due to demand decrease, thought scrap prices as such remains higher than in Q. II, 2004.

Ferroalloys and non-ferrous metals. The main suppliers of manganese ferroalloys to NLMK are OJSC "Zaporozhskiy Ferroalloy Plant"(Ukraine) whose share in the total supply volume accounts for 85-90%, and OJSC "Nikopol Ferroalloy Plant" (Ukraine).

A significant part of small tonnages bulk ferroalloys is imported from foreign countries: ferrovanadium – from China, ferroniobium – from Brazil. Ferrotitanium and ferrochrome demand is fully covered by Russian producers: OJSC "Sredneuralskiy Metallurgical Plant", OJSC "Serov ferroalloys plant", OJSC "CHEMK".

Average purchase prices for ferroalloys decreased by 35.4% in Q. II, 2005 regarding Q. II, 2004.

Non-ferrous metals which are most frequently used in production are aluminum and zinc. NLMK's demand for aluminum is provided for by OJSC "Bratsk Aluminum Plant" (Irkutsk region), demand for secondary aluminum is covered by Secondary Non-ferrous Metals of the RF Central region. Zinc is supplied by OJSC "Chelyabinsk Zinc Plant", OJSC "Electrozinc" (Vladikavkaz), OJSC "KazZinc" (Kazakhstan).

The average purchase prices for zinc in Q. II, 2005 increased by about 5.4%.

3.2.5. The Issuer's sales (works, services) markets

As a result of the first half of 2005 NLMK's volume of supply to motor-car plants decreased by 22.2% as compared with the respective period of 2004, which was caused mainly by the decrease in shipment volume of cold-rolled stock. It is related to the decrease in supply of this product to "AvtoVAZ" by 53.0%. Cold-rolled steel sales to "Polisteel" decreased by 12.5%, thus its share in the total shipment volume accounted for 43.1% against 28.6% in 2004 It was caused by the increase in cast iron supply to "AvtoVAZ" by 12.8%, and to "AMO ZIL" by 26.4%. Thus, taking into account that the ultimate consumer of steel shipped to "Polisteel" (Lysvensk Iron and Steel Works) is "AvtoVAZ", one can say that over two-thirds of the rolled stock shipped to motor-car plants is supplied to "AvtoVAZ".

In the first half of 2005 there were no significant changes in the regional supply of hot-rolled stock as compared to the previous year. The main consumer of hot-rolled stock is the Central region whose consumption share amounts to 36.9%. Hot-rolled stock was still supplied to the historical zones under NLMK's influence – Povolzhsky region (14.4% in the total supply to the domestic market), North-Caucasus region (15.7%) and Central-Chernozemny region (11.0%). The main

consumers of hot-rolled stock are trade organizations whose share in NLMK's domestic supplies accounted for 63.9%. Shipment to tube producers increased by 2.6 times, as a result of which their share in NLMK's sales increased from 3.9% to 10.7%.

The main consumers of NLMK's cold-rolled stock remain the Central region, Povolzhsky region and the Urals region. As a result of the period January-June, 2004 Povolzhsky region was the major consumer (its share in the total supplies accounted for 28.6%), the Central region share accounted for 26.0%. In 2005 volumes of supply to the Central region surpassed the volume of supply to Povolzhsky region, their shares being 28.3% and 20.0 respectively. It was caused by the decrease in supplies to "AxtoVAZ". The Urals region still holds the third place, its share being 21.0%.

The share of motor-car industry in consumption of NLMK's cold-rolled stock decreased from 29.5% in 2004 to 21.1% in 2005. Sales volumes to machine-building enterprises remained at the level of the previous year and accounted for 11%, supplies to tube rolling plants accounted for 1.9%. The share of agricultural machine-building didn't change in 2005 and accounted for 1.7%. The share of supply to trade companies increased by 1.5% as compared with 2004 and accounted for 32.3%.

During the period of January – September, 2004 over half of the total cast iron supplies was shipped to Volgo-Vyatsky region (37.1) and the Central region (24.5%). In the same period of 2005 supplies to these regions accounted for 20.3% and 43.9% respectively. The share of Povolzhsky region in 2005 amounted to 26.9% of the total volume of supplies.

In the first half of the current year the structure of regional consumption of galvanized rolled stock remained almost unchanged. The share of supply to the Central region slightly decreased: from 64.5% in January – June 2004 to 63.4% in 2005. The share of supply to the Cental-Chernozemny region increased from 11.1% to 13.3%, to the North-Caucasus region – from 7.8% to 11.4%, to Povolzhsky region – from 3.9% to 4.6%. As a result of the period January- June, 2005 there were no significant changes in the structure of industrial consumption of galvanized rolled-stock. The highest demand for galvanized rolled stock came from trading enterprises (44.9%) and steel structures producers (38.8%). The share of supply to the machine-building industry decreased from 8.2% in 2004 to 7.7% in 2005.

Regarding the domestic geography of prepainted rolled stock sales NLMK's priority economic regions are Central (41.5%), North Caucasus (22.9%) and the Urals (14.8%). The bulk of the prepainted rolled stock to be supplied is still represented by galvanized substrate, the share of this kind of products in 2005 accounted for 90.5% of the total sales of prepainted rolled stock. The most popular gauge of prepainted flats is 0.5 mm (69.9% of the total sales).

In the reporting period the volume of orders for NLMK's anisotropic rolled stock from the main consuming regions increased, in particular:

- Povolzhsky region increased its consumption from 6.0% to 15.9%;
- Central-Chernozem region slightly increased its consumption from 8.5% to 8.8%;
- Central region: increase to 40.3%.

The share of anisotropic rolled stock supplies to the Urals region decreased from

8.8% to 6.3%, of West Siberia region – by 2.1% to 22.2%.

The priority grades of anisotropic rolled stock sold in January-June were grades 3407 and 3408 (27.3% and 27.8% of the total supplies to the domestic market respectively). The share of wide GO electrical steel accounted for 77.8%.

Among the major consumers of isotropic rolled stock there were the Central region (43.2% of the total supplies of NGO electrical steel shipped during the first six months of 2005), East Siberia (8.1%), Volgo-Vyatsky region (8.6%) and the Urals region (11.9%).

Foreign market

In January – June 2005 the main buyers of NLMK's products were the following:

- “Steelco Mediterranean Trading Ltd.”,
- “Tuscany Intertrade (UK)”,
- “Moorfield Commodities Company”,
- “Stinol AG”.

As in the last year NLMK's main export directions were South-east Asia and the EU countries whose share in the total supplies amounted to 31.2% and 30.1% respectively.

In January-September 2005 the Company's trade with the EC countries was effected in accordance with autonomous quotas.

During the first six months of the current year the largest volume of products was sold to Denmark (10.6% of the total exports, its share in NLMK's supplies to the EU being 35.1%) and Italy (7.0% and 23.2% respectively). Slabs for “Dansteel” accounted for 97.8% of products shipped to Denmark.

NLMK's major Asian markets in January, 2005 were the following:

- China: 9.0% of NLMK's total exports;
- Taiwan: 8.8%.
- Thailand: 5.6%.

In the first half of 2005 there was a significant increase in sales to India and Indonesia compared to 2004 – by 2.5 and 2.1 fold respectively. The share of these sales markets in the Company's total exports as a result of January – June of the current year accounted for 4.3% and 3.0% respectively.

Almost all supplies to Taiwan are represented by slabs.

As a result of January – June, 2005 exports to European countries which are not the EU members decreased by 18.6% regarding the respective indice of 2004 and accounted for 16.8% of NLMK's total exports. Export to Turkey which is the major consumer of this region accounts for 98.7% of the total exports.

In the first half of 2005 the Company's export to North America decreased by 7.4% regarding the period of January-June, 2004. It was caused mainly by the reduction of slabs export.

In the reporting period the Company's trade with the USA was effected as per the quotas fixed in accordance with “Agreement on suspension of antidumping investigation regarding certain kinds of the RF hot-rolled carbon steel flat products”.

There were no restrictions on supply of semi-finished products to the USA.

Over six months of the current year NLMK's supplies to the CIS decreased by 37.7% compared to the respective period of 2004. As a result of the reporting period sales volume to this region accounted for 3.2% of NLMK's total export.

In January-June of the current year NLMK's supplies to the Middle East decreased by 56.4% compared to the respective indice of 2004. Sales to Iran (the main sales market in that region) decreased by 89.1%.

Sales of NLMK's products to Africa and Latin America are insignificant. In the reporting period the share of sales in each of these directions accounted for less than 1.0% of NLMK's total exports.

3.2.6. Information on the Issuer's licenses.

Licenses:

Number: *ЛПЦ №04995 БЭ*

Issue date: *22.04.1998*

Validity: *till 1.03.2008*

Licenser: *Territorial Administration of Geology and Subsoil use in the Lipetsk region*

Activity: *Draft of fresh underground water for the production and drinking water supply of an enterprise.*

Possibility of license prolongation: *The license will not be prolonged (the activity is not performed)*

Number: *A 000590 Registration No. 4084*

Issue date: *12.04.1996*

Validity: *till 12.04.2006*

Licenser: *RF Ministry of Communications*

Activity: *Rendering of local telecommunications services.*

Possibility of license prolongation: *The license will be prolonged*

Number: *ЛПЦ 07811 БЭ*

Issue date: *1.06.2000*

Validity: *till 1.06.2010*

Licenser: *Lipetsk region natural resources committee*

Activity: *Draft of fresh underground water for the production and drinking water supply of an enterprise (Health center "Parus")*

Possibility of license prolongation: *The license will be prolonged*

Number: *ЛПЦ 08883 БЭ*

Issue date: *18.05.2001*

Validity: *till 1.01.2011*

Licenser: *Lipetsk region Natural Resources Committee.*

Activity: *Draft of fresh underground water for the production and drinking water supply of an enterprise (Health Center «Prometheus»)*

Possibility of license prolongation: *The license will be prolonged*

Number: *006101 ИО-03-209-1152*

Issue date: *9.10.2001*

Validity: *till 1.11.2006*

Licenser: *Central interregional territorial district of State nuclear supervision of Russia.*

Activity: *Operation of radiation sources (products containing radioactive substances).*

Possibility of license prolongation: *The license will be prolonged*

Number: *ЛИИ 07349 БЭ*

Issue date: *24.04.2000*

Validity: *till 1.12.2009*

Licenser: *Lipetsk region Natural Resources Committee*

Activity: *Draft of fresh underground waters for state farm "Novolipetsky" water supply.*

Possibility of license prolongation: *The license will not be prolonged (Activity is not performed)*

Number: *A 051789 34ТО №004164*

Issue date: *8.02.2002*

Validity: *till 1.02.2007*

Licenser: *State engineering supervision of Russia, Verkhne-Donskoy county*

Activity: *Unloading, loading and transportation of hazardous cargoes by railway transport*

Possibility of license prolongation *The license will not be prolonged (received as a part of license Register No. 00-ЭВ-002192, 00-ЭХ-002233)*

Number: *ГС-1-48-02-22-0-4823006703-000107-1*

Issue date: *7.03.2002*

Validity: *till 7.03.2007*

Licenser: *Lipetsk branch of the Federal Licensing Center of the Gosstroy of Russia.*

Activity: *Construction of buildings and structures of Responsibility levels I and II in accordance with the State standard (functioning as a builder-customer)*

Possibility of license prolongation: *The license will not be prolonged (activity is not subject to licensing)*

Number: *Г 603433 Registration No. 119*

Issue date: *7.03.2002*

Validity: *till 7.03.2007*

Licenser: *Licensing Department of the Lipetsk region Administration*

Activity: *Veterinary preventive and diagnostic activity.*

Possibility of license prolongation: *The license will not be prolonged (Activity is not performed)*

Number: *ГС-1-48-02-22-0-4823006703-000182-1*

Issue date: *8.05.2002*

Validity: *till 8.05.2007*

Licenser: *Lipetsk branch of the Federal Licensing Center of the Gosstroy of Russia.*

Activity: *Construction of buildings and structures of Responsibility levels I and II in accordance with the State standard*

Possibility of license prolongation: *The license will not be prolonged (Activity is not*

subject to licensing)

Number: *10109/910038*

Issue date: *28.07.2002*

Validity: *till 27.07.2005*

Licenser: *The RF State Customs Committee. Lipetsk customs*

Activity: *Foundation of temporary storage warehouse*

Possibility of license prolongation: *The license will not be prolonged (As per the RF Tax Code No. 61-FZ dd. 28.05.03 license was substituted by registration)*

Number: *10109/0005*

Issue date: *28.07.2002*

Validity: *till 27.07.2005*

Licenser: *The RF State Customs Committee. Lipetsk customs*

Activity: *Foundation of customs warehouse*

Possibility of license prolongation: *The license will not be prolonged (As per the RF Tax Code No. 61-FZ dd. 28.05.03 license was substituted by registration)*

Number: *Г603985 Registration No. 246*

Issue date: *30.07.2002*

Validity: *till 30.07.2005*

Licenser: *Licensing division with Lipetsk region administration*

Activity: *Usage of ionizing radiation sources (generating) at the location of territorially isolated facilities*

Possibility of license prolongation: *The license will be prolonged*

Number: *ГC-1-48-02-21-0-4823006703-000308-4*

Issue date: *29.08.2002*

Activity: *Conveyance of passengers by motor cars equipped for conveyance of more than 8 people*

Possibility of license prolongation: *The license will be prolonged*

Number: *A №025805 IIB-13-000003(B)*

Issue date: *24.02.2005*

Validity: *till 23.02.2010*

Licenser: *Federal service on environmental, technological and atomic supervision (Rostekhnadzor)*

Activity: *Operations with industrial explosives*

Possibility of license prolongation: *The license will be prolonged*

3.2.7. Joint activity of the Issuer.

At present there is no joint activity of NLMK with any other companies.

As of 30.06.2005 Agreement No. 208 dd. 09.02.1994 with Scientific-technical enterprise "New machines and technologies" (P.O. Box 29/39 Dnepropetrovsk 320059) for joint activity was in force. Investments of NLMK accounted for 1,487,250.0 rubles. The purpose of investments is consortium establishment for construction and commissioning of a sector which will specialize in production of high-quality centrifugal rolls on the basis of Lutugin association of rolls production.

There is no information on financial performance of joint activity for 2004 and the first half of 2005 due to failure of a partner to a joint activity to present its financial statements.

3.2.8. Additional requirements to Issuers being stock investment funds or insurance companies.

The information is not presented as the Issuer is not a stock investment fund or insurance company.

3.2.9. Additional requirements to Issuers specialized on mining operations.

The information on NLMK's subsidiaries and affiliated companies specializing on

mining operations is provided.

I. Studenovskaya Open Joint-stock Mining Company (OJSC «Stagdok»)

a) Mineral reserves:

According to the license received Stagdok has the right for subsoil of Sitov area of Sokol-Sitov field of fluxed limestone located at the territory of the Lipetsk region (3 km to the north from the city of Lipetsk and 0.5 km to the west from village Voskresenovka of Lipetsk region).

The license for subsoil use: series JIIIЦ No. 54036 TЭ

Issue date: May 30, 2002.

Expiry date: 31.12.2028.

The basis for licensing:

- supplementary exploration and revaluation of reserves in the period of 1995-2000;*
- change of field contour.*

Subsoil area given for use has the status of mining lease. The maximum depth of the area is +106 meters subject to mandatory preservation of protective pillar of 2 meters capacity above groundwater level.

Sitov area of Sokol-Sitov field with limestone reserves of 200901 thousand tons as of 01.01.2000, inclusive of 34095 thousand tons of quality A, 166806 thousand tons of quality C1, approved by (taking into account supplementary exploration and revaluation of the field) Territorial Commission on mineral reserves (Minutes No. 51 dd. June 29, 2000).

In Q II of 2005 limestone extraction volume amounted to 891 thousand tons.

As of 01.07.2005 the reserve residue of Sitov area of Sokol-Sitov field constitutes 178 892 thousand tons, inclusive of 12 086 thousand tons of quality A and 166 806 thousand tons of quality C1.

Within the given mining lease the company has the right for geological survey on translation of limestone reserves from low industrial qualities to high qualities.

The main liabilities of the Company.

1. To extract limestone with observation of the following conditions:

- to define annual extraction volume of limestone on the basis of mining operations plan (the volume of limestone extraction in 2005 was planned as 4359 thousand tons);*
- to agree the plan of mining operations, norms for losses and impoverishment with State engineering supervision bodies on the annual basis.*

2. To effect payments for use of subsoil according to norms being in force:

- 6% of the product selling price for the right to extract fluxed limestone;*
- 5.5% of the product selling price for the right to extract construction quality limestone.*

To effect double payments for mineral loss infringement. To effect tax and other mandatory payments to the budget in time and in full.

3. To present statistical reports under form 5-2p to the Federal Geological Administration "FGA" and to Federal Geological Administration "Geological Fund of the Central regions of Russia" and to Lipetsk branch of FGA "Centergeolgofond" by January 15 every year.

4. To present statistical reports under form 70-TII, 71-TII to bodies stated in these forms by January 25 every year.

5. In the course of the field use Stagdok is liable to constantly monitor groundwater through the existing observation network.

The liabilities described in the license are being fulfilled by the company in the established order.

b). Extraction and processing of minerals:

Main facilities and equipment used for extraction and processing of fluxed limestone at Sokol-Sitov field are:

- crushers and mills, excavators, BELAZ cars, drilling rigs, bulldozers, diesel locomotives.

c). Sales:

Limestone from Sitov area is suitable as a raw material for production of the products which are in conformity with the following requirements:

- TU 0750-005-00186855-97 "Limestone of industrial quality. Specifications";

- TU 0750-004-00186855-95 "Limestone of industrial quality extracted by Studenovskaya joint-stock company. Specifications".

Limestone crushed rock for construction purposes, limestone of industrial quality are not covered by "Product mix and services (works) to be mandatorily certified according to the Russian Law" approved by Decree No. 5 dd. 23.02.1998 and Decree No. 53 dd. 19.09.1999 "On entering changes and additions to "Product mix..." and is not subject to mandatory certification.

II. Open Joint-stock Company «Dolomite» (OJSC «Dolomite»)

a) Mineral reserves:

OJSC "Dolomite" has the right to use subsoil for dolomite extraction at Dankov field within Bigildin and Prikarjerny areas under the license received.

Mineral resources are metallurgical dolomite, construction quality crushed rock and limestone (dolomite) flour.

As of 01.07.2005 the areas for which licenses were granted had 401586 thousand tons of balance sheet reserves of dolomite, inclusive of 246393 thousand ton in Bigildin area and 155193 thousand tons in Prikarjerny area. Dankov field covers (all areas) 670063 thousand tons of dolomite balance sheet reserves in total.

Reserve evaluation method was approved by Protocol No. 873 dd. September 26, 2003 of the State Committee on Mineral Reserves (GKZ).

Dolomite has the license No. ЛПЦ 54112 ТЭ for subsoil use for the purpose of dolomite extraction at Bigildin and Prikarjerny areas of Dankov field in order to manufacture raw materials for steel-making process and construction materials. Subsoil areas have the status of mining lease.

The license was granted on: October 1, 2003.

Expiry date: 01.01.2029.

The basis for licensing was redrawing up of the valid license due to change of legal person name - subsoil user.

Validity of the licenses can be prolonged upon initiative of subsoil user.

Allocated subsoil areas are located 3-7 km to the north-east from the city of Dankov and railway station with the same name – Dankov UVJD, 95 km to the north-west of the city of Lipetsk. The relief is relatively plain with ravine beam type network. The area of Bigildin area is 528 hectares, of Prikarjerny one – 316 hectares, total area is 844 hectares. The areas are located on cropland that can be used for agricultural purposes. Minerals in the field are overlapped by argillaceous sand and off-grade carbonate deposits. The average capacity of stripping is 17.5 meters and one of productive strata– 23.0 meters. Dolomites are flooded down to 1 – 3 meters in the bottom part of the cut. The depth of exploitation is up to 40 meters from daylight.

Liabilities of the company:

1. To pay tax on dolomite extraction for construction materials manufacture in the amount of 5.5% of extracted mineral value;
2. To pay tax on dolomite extraction as metallurgical raw materials in the amount of 6,0% of mineral value.
3. To effect double payments for mineral loss infringement.
4. To present a report under forms 5-ГР, 70-ТII, 71-ТII to controlling bodies on the annual basis.
5. To redraw up papers for mining leases in areas under mining in the State Engineering Supervision of the Russian Federation in Verkhne - Donskoy county before 01.05.2005.
6. To write off dolomite reserves accounted by the State in the field areas within the mining lease at the time of operations completion and perform complete reclamation of dislocated soils.
7. To prepare an annual plan of mining works development for forthcoming year and to agree it with State engineering supervision of the Russian Federation in Verkhne-Donskoy county before December 15.
8. Two years prior to license expiry date a project of mining opening final liquidation and dislocated soil reclamation shall be developed and approved.

Fulfillment of the stated liabilities: all liabilities stated above are fulfilled within established time. Liabilities under clause 5 (redrawing up of papers for mining lease) are being fulfilled about which a notification letter was sent to the corresponding controlling authorities.

b) Mineral processing:

Electric full-rotary excavators manufactured by UZTM of ЭКГ –5а and ЭКГ –4,6Б type with 5 m³ and 4.6 m³ bucket capacity respectively and max. digging height of 10.3 m which corresponds to height of common quarry face and stripping capacity are used for dolomite extraction in open-cut mine. Drill works are done by drilling rig of roller-bit drilling of СБШ – 250МН type. Borehole diameter is 250 mm at drilling depth of 10-12 meters. Ore is crushed by jaw crushers with simple movement of jaw of grade ШДП 3x12 and ШДП 15x21 with receiving hole of 900 mm x 1200 mm and 1500 mm x 2100 mm respectively and capacity of 180 m³/h and 550 m³/h respectively. The material is additionally crushed in cone secondary crushers of КСД –1750ГР and КСД –2200ГР of 200 m³/h and 500 m³/h capacity respectively. Material is classified by fractions by vibrating screens of ГvЛ, ГvС, ГvТ types.

Screened material is transported by belt conveyors of horizontal and inclined type with belt width of B 800 mm, B 1000 mm and B 1200 mm, of capacity which is correspondent to capacities of main production lines, i.e. jaw and cone crushers.

b) Product sales:

Permissions for dolomite products sales and export quotas are not provided for by the Federal Law.

III. Open Joint-stock Company «Kombinat KMAruda» (OJSC «Kombinat KMAruda»)

a) Mineral reserves:

1). *Kombinat KMAruda is granted the right to use the subsoil for deep-mined extraction of Korobkov field of ferruginous quartzite (inclusive of Stretensky area).*

Type of minerals - ferruginous quartzite.

Reserves of the field were approved by Minutes (on reserves approval):

No. 6640 dd. September 22, 1972 of the State Commission on mineral reserves with USSR Council of Ministers;

No. 9770 dd. July 19, 1985 of the State Commission on mineral reserves with USSR Council of Ministers;

No. 12 dd. February 10, 2000 of the Territorial Commission on mineral reserves with Department of natural resources for Central Region of Mineral Ministry of the Russian Federation.

Extraction volume from the beginning of operations in the field as of 01.07.2005 is 155321 thousand tons (150649 thousand tons of air dried weight).

Rated annual capacity of the plant regarding processing of dry ore amounts to 3395 thousand tons.

Kombinat KMAruda was granted a license of series БЕЛ No. 08586 for the right to use subsoil for extraction of ferruginous quartzites at Korobkov field for further processing into iron-ore concentrate. The license was registered by Central region Department of natural resources of the RF Ministry of Natural Resources in the register No. 8586/БЕЛ 08586ТЭ.

Issue date of the license: 19.02.2001.

Expiry date of the license: 01.01.2026 z. (Validity of the license can be prolonged upon initiative of the subsoil user as well as in other cases stipulated in the Russian Law "On subsoil").

The license was granted on the basis of application and license documents submitted by Kombinat KMAruda. The right to use the subsoils area was granted on the basis of Decree No. 110/461 dd. 12.01.2001 of Belgorod Region Administration Government and Department of Mineral Resources in Central region of the RF Ministry of Mineral Resources.

The Korobkov field of ferruginous quartzites is located in proximity to the city of Gubkin, Belgorod region, and belongs to the central part of north-east part of the Kursk Magnetic Anomaly.

The field geological structure consists of Precambrian complex dislocated metamorphized rock broken in some places through by intrusions and dykes as well as water-bearing sedimentary deposits of Devonian and Mesocainozoic age, which unconformably and almost horizontally overlap crystal thickness. The capacity of sedimentary rock in average amounts to 116 meters. Iron-ore assise is considered as productive where ferruginous quartzites form two sub-assises of different capacity - 100-200 and 180-320 meters.

Ferruginous quartzites are covered everywhere by residual soil with average capacity of 18,3 meters, represented by oxidized and semi-oxidized quartzites and small deposits of high grade ore.

Under terms and conditions of the license Kombinat KMAruda shall within its validity:

- effect payments for extraction of ferruginous quartzites and for use of land lots;*
- observe the rules of safe operations, environment protection, mineral resources conservation, subsoil protection.*

Under special conditions of the license Kombinat KMAruda is liable to:

- additionally agree upon payment terms or procedures for subsoil use in case of acting legislation change with the bodies which have issued the license;*
- should any unknown mineral types and accompanying valuable components be found at the moment of license granting, the bodies which have granted the license have*

the right to call for state appraisal of geological materials and review the conditions of subsoil use;

- prepare reports on fulfillment of subsoil use under the license for the previous year not later than on January 15 of the year following the reporting one;*
- redrawing up of the valid license due to change of legal person name or status of the company.*

The liabilities stated in the license are being fulfilled by the company in full.

2). Kombinat KMAruda has the right to use subsoil for groundwater operations of aquiferous stratum of Alb-senoman and Archaean Proterozoic aquiferous stratum on site of Korobkov field of ferruginous quartzites.

Kombinat KMAruda was granted a license of series БЕЛ No. 07479 for subsoil use for the purpose of fresh groundwater extraction in amount of 625 m³/day for potable water and industrial water supply of the plant and outside consumers; extraction of groundwater for protection of mine opening from watering in case of Korobkov field development.

Issue date of the license: 15.05.2000.

Due to the changes dd. 30.03.2005 entered by the authorized bodies the license validity was prolonged till 01.04.2015.

The license was granted on the basis of application and licensing documents submitted by Kombinat KMAruda. The right to use the subsoils area was granted on the basis of Decree No. 49/399 dd. 14.03.2000 of Belgorod Region Administration Government and Committee of Mineral Resources in Belgorod region of the RF Ministry of Mineral Resources.

Groundwater reserves were not approved. (In accordance with the changes to the license dd. 30.03.2005 (inclusive of the clause concerning subsoil usage conditions) groundwater reserves estimation of Korobkov field of ferruginous quartzites development should be conducted till 01.11.2007 with their approval in the established order).

Aquiferous stratum of Alb-senoman lies in depth intervals of 70-100 m and consists of different granular sands which are overlapped by thickness of chalk, sand and loams. It is separated from ore-crystalline massif by thickness of Jurassic clays. Groundwater is under pressure, depth of occurrence of groundwater level is 46-55 m. Aquiferous stratum is used by two water wells located within mining lease of the plant.

Archaean Proterozoic aquiferous stratum of 150-200 m capacity is referred to cracked area of crystalline rock, confining bed of which lies at depth of 120-150 m.

Archaean Proterozoic groundwater is draught by draining of mine opening with the following pumping out by mine drainage.

According to terms and conditions of the license Kombinat KMAruda effects payments within the license validity for use of water bodies and land lot in accordance with the existing legislation of the Russian Federation.

The liabilities stated in the license are being fulfilled by the company in the established order.

3) Kombinat "KMAruda" has the right to use subsoil for groundwater operations of quaternary Alb-senoman aquiferous stratum in the vicinity of Kaplino village, Stary Oskol region.

Kombinat "KMAruda" was issued a license for subsoil right: extraction of fresh groundwaters for economic and potable needs of recreation centre "Gornyak". License BЭ series БЕЛ number 50108. The license registration No. 108/БЕЛ 5010837 in the register by the Mineral Committee of Belgorod region 07.06.2002.

License issue date – 07.06.2002.

License expiry date – 01.03.2012 (License validity can be prolonged in the established order).

The license was granted on the basis of application and licensing documents submitted by Kombinat KMAruda. The right to use the subsoils area was granted on the basis of Decree No. 279/630 dd. 07.06.2002 of Belgorod Region Administration

Government and Committee of Mineral Resources in Belgorod region of the RF Ministry of Mineral Resources.

Groundwater reserves were not approved.

Groundwater is intaken by the water well located in Stariy Oskol region, north of Kaplino village on the left bank of the Oskol river in the area of Stariy Oskol water storage basin at the recreation centre of Kombinat "KMAruda".

The groundwater body is located in the northern part of Voronezh crystalline massif. The geological structure is made up of Pre-Cambrian metamorphic rocks and sedimentary rocks consisting of Devonian, Jura, chalk.

For water supply purposes quaternary Alb-senoman aquiferuos stratum is used as the most water-abundant and the first thick stratum from the surface. The water well 38 m deep was drilled in 1987. The bearing strata of the aquiferous stratum under operation are made up of various granular sands up to 31 m thick. The aquiferous stratum is overlapped by small-granular sands 6 m thick. The stratum toe is made up of waterproof Jurassic clays.

In accordance with the license conditions "Kombinat KMAruda":

- effects regular payments for groundwater extraction, for the subsoil area located in the Don river basin in accordance with the effective legislation;*
- effects payments for the land lot in the order and within the terms established by the effective land legislation;*
- in case of the respective legislation changes groundwater extraction conditions, payments for their usage and the order of information submission specified in the license are subject to additional agreement with the issuing bodies.*

In accordance with special conditions "Kombinat KMAruda" is liable:

- to submit information on subsoil usage conditions observation to Mineral Committee of Belgorod region annually till January, 10; information on groundwater monitoring to "Belgorodgeomonitoring" quarterly not later than the 10th day of the month following the reporting quarter;*
- in case of significant deviations of well production values, lowering of water level and chemical composition indexes from the typical values as of the license issuance period, Mineral Committee of Belgorod region and "Belgorodgeomonitoring" should be quickly informed;*
- in case of reorganizing or changing of the legal person's name or loss of the license application for reissuance of the license should be submitted. License is reissued in the order established for its issuance.*
- to ensure observation of all environmental and nature-conservation measures in the course of activities related to subsoil usage envisaged by provisions of the authorized environmental bodies.*

Obligations specified in the license are fulfilled by the company in the established order.

b) Mineral processing:

The main mining equipment used in mining roadheading: drilling machines ЛКР-Т3, ЛКРУ, punchers ПП-63, ПП-80НВ, ПТ-48, loading machines 1 ППП-5, loading – hauling machines ПТ-4, scraper winches 55АС-2СМ.

Rocks are transported from funnel and breakage mining faces by electric locomotives 10 КР and 14 КР in bogies of УБ-4 and ВГ-4,5.

Blast holes are drilled by machine НКР-100 М. Blast holes are loaded by machines М3КС-160.

Extracted ore is preliminary crushed in crushers СМД-118 1Б and ДСД –1017 in underground crushing complexes. Crushed ore is transported to processing plant along shaft equipped with 2 skips of 4 tons capacity each and hoist engine 2 Ц-4×1,8 and along

shaft equipped with 2 skips of 13 tons each with hoist engine 2 Ц5-2,3. Ventilation of mine opening is done by fans ВЦД-47 У and ВЦД –31,5.

All ore extracted is processed into concentrate in processing plant which is technologically connected with skip shafts.

The main crushing – milling and mineral processing equipment of the plant:

- Cone crusher – КСД-1750, КМД-1750, КСД-2200, КМД-2200;*
- Unbalanced-throw screen – ГИТ-52 Э, ГИТ-31;*
- Ball mill – МШР 32-31;*
- Sizing screen – К-СН-24;*
- Hydrocyclone – ГЦ-500;*
- Magnetic separators - ПБМ-90/250, ПБМ-120/300;*
- Vacuum pumps – ВВН2-50;*
- Vacuum filters – ДОО 150;*
- Gravel pump – 6 НП.*
- Stationary belt conveyor of different types.*

c) Product sales:

Finished products (iron ore concentrate) are sold on the basis of agreements with consumers.

Permissions by the State authorities for sales of the above mentioned products are not required.

IV. Open Joint-stock Company «Stoilensky Mining Company» (OJSC «Stoilensky GOK»)

a) Mineral reserves:

1) According to the license received Stoilensk Mining Company has the right for digging of Stoilensk iron ore and nonmetallics field.

The field was explored by Belgorod geological surveillance expedition.

State Commission on minerals reserves with Ministry of Ecology and Natural Resources of the Russian Federation for quarry operations (500 meters to daylight) approved reserves of the following minerals (Minutes No. 1, No. 2 dd. January 24, 1992):

- high grade iron ore;*
- magnetite quartzites;*
- oxidized quartzites;*
- clay and loam;*
- chalk;*
- marl;*
- sand;*
- decayed slate;*
- crystalline slate;*
- quartzitic sandstone;*
- granite gneiss.*

The balance sheet reserves remainder as of 01.10.2005:

- high grade iron ore of category B+Cl – 57 795 thousand tons; of category C2 – 11 991 thousand tons;*
- magnetite quartzites of category B+Cl – 4 945 992 thousand tons; of category C2 – 1563565 thousand tons;*

Extraction volume starting from the field excavation beginning on 01.07.2005

accounted for:

- high grade iron ore – 104227,8 thousand tons;
- magnetite quartzites – 309 302 thousand tons;

Annual design capacity of the Company on high grade iron ore excavation is 1200 thousand tons and 25440 thousand tons on magnetite quartzites.

Stoilensky GOK was granted a license of series БЕЛ №13030 ТЭ registered by Russian Mineral Ministry No. 3955 dd. 24.03.2005 for subsoil right– excavation of iron ore, ferruginous quartzites of Stoilensky field, as well as co-nonmetallics located in stripping and special dumps. Marketable products produced from processing of iron ore are sintering ore and iron ore concentrate. Co-excavated nonmetallics, finished products from their processing are used in-house or by other companies.

Issue date of the license: March 24, 2005.

License expiry date: January 1, 2016. (Validity of the license can be prolonged upon initiative of a subsoil user as well as in other cases set forth in the Russian Law “On subsoils”).

The license was granted on the basis of application and licensing documents submitted by OJSC “Stoilensky GOK”.

Under terms and conditions of the license OJSC “Stoilensky GOK” shall within its validity:

- effect payments for extraction of minerals and for use of land lots;
- observe the rules of safe operations, environmental protection, mineral resources conservation, subsoil protection.

Under special conditions of the license OJSC “Stoilensky GOK” is liable to:

- additionally agree upon payment terms or procedures for subsoil use in case of existing legislation change with the bodies which have issued the license;
- should any unknown mineral types and accompanying valuable components be found at the moment of license granting, the bodies which have granted the license have the right to call for state appraisal of geological materials and review the conditions of subsoil use;
- prepare reports on fulfillment of subsoil use under the license for the previous year not later than on January 15 of the year following the reporting one;
- reissue the license due to change of legal person’s name or status of the plant.

The obligations stated in the license are being fulfilled by the Company in the established order.

2) Stoilensky GOK has a right under license of series БЕЛ No. 50162 БЭ to extract drainage groundwater in order to dewater quarry of Stoilensk ferruginous quartzites field.

Issue date of the license: 13.01. 2003.

License expiry date: 01.11.2012.

The license was granted on the basis of application and licensing documents submitted by Stoilensky GOK.

Drainage groundwater reserves of Stoilensky field were approved upon Turonian Maastricht, Alb-senoman aquiferous stratum and Archean Proterozoic aquiferous complex of 79 thousand m³/day for category B (Minutes No. 3 GKZ dd. January 24, 1992z.)

Turonian Maastricht aquiferous stratum refers to top interstitial weathering zone of marl-chalk stratum with 60-90 meters capacity of the same age. The stratum is free-flow, static level is at 25-50 meters depth. The stratum around the quarry is fully drained.

Alb-senoman aquiferous stratum refers to medium sands of the same age located at 90-110 meters depth overlapped by sand-clay deposits of quaternary age and chalk – marl rocks. The stratum is free-flow, depth is 63-94 meters. Decrease of groundwater level in area of drained contour is 40-45 meters.

Archaean Proterozoic aquiferous stratum of 150 m capacity refers to cracked area of crystalline rock, confining bed of which lies at depth of 120-140 meters. Aquiferous stratum is under pressure, piezometric level is at 75-100 meters depth, quarry is drained.

Stoilensky GOK drains groundwater by 106 draining rise wells drilled from ring system of horizontal quarry of 35 km total length. Underground water intake covers 29 rise drain holes and mine drainage from shaft No. 3.

Mine drainage in Q II, 2005 accounted for 11 346.5 m³ in total inclusive of chemically treated water 1 443.8 m³.

Area of water intake refers to Don river basin.

“Subsoil user” is permitted to continuously intake groundwater in order to drain quarry with decrease of groundwater level till depth of drainage working laying and in quantity providing for safe mining operations.

On the territory of “subsoil user” there is a network of observation wells by which subsoil user monitors groundwater and studies hydrodynamic and hydrochemical conditions of groundwater in the zone of a mining company influence.

In 2005 – 2006 OJSC “Stoilensky GOK” plans to reevaluate groundwater reserves under category B with their approval by GKZ.

According to license conditions OJSC “Stoilensk GOK” shall effect payments for use of water bodies in accordance with the existing legislation of the Russian Federation.

The liabilities stated in the license are being fulfilled by the Company in the established order.

b) Minerals processing:

1. Main technologies used:

The field is being quarried: opened by a networks of trenches. Opening system is with outside refuse disposal. Quarry depth is 300 meters. Loose deposits are being opened by rotor complex and cyclic excavators. Rock stripping, high grade ore and ferruginous quartzites are extracted by cyclic excavators with preliminary opening by drilling-and-blasting operations. Ore is removed from the quarry by trucks, railway and conveyor belts.

Technological scheme of high grade ore processing covers three stages of crushing and screening with separation of sintering ore. Processing of ferruginous quartzites (magnetite) takes three stages of crushing with closed final stage, three stages of milling, magnetic separation, deslimation, dehydration of concentrate in vacuum filters. Hydrotransport of processing tailings is pressure - self floating. Water recycling is used.

2. The following equipment is used:

2.1. Mining operations:

- drillings rigs СБШ –250 МН;*
- charge machine “Akvatol”, МЗ-4;*
- cyclic excavators ЭКГ-10, ЭКГ-8И, ЭКГ-4,6(4У, 5У, 5А), ЭШ10/70;*
- rotor complex КУ-800.*

2.2 Transportation of mining mass:

- dump trucks BelAZ 7513, 7548, 7555;*
- electric locomotives ОПЭ-1, diesel locomotive ЧМЭ-3, ТЭМ-2, М-62;*
- boxcars 2BC-105;*
- conveyor belts in rotor complex КУ-800.*

2.3 Crushing and beneficiation equipment:

- crushers – ШКД 2100/1500, ДМРуЭ14,5/13, ККД 1500/180, КСД 3000Т, КМД 3000Т2-ДП;*

- screens ГИСТ-72, ГИТ-52Н;
- classifiers 2КСН 3,0x17,2;
- mills МШЦУ5,5x6,5, МШЦ 5,5x6,5;
- separators ПБМ-П-120/300, ПБМ-ПП-150/200, ПБМ-ПП-120/300;
- deslimers МД-12;
- vacuum filters ДШ 100/2,5;
- pumps ГРК, ГРТ 1250/71, ГРК 1600/56,
- stationary, reverse conveyor belts.

c) Sales

Finished products (sintering ore and iron ore concentrate) are sold on the basis of agreements concluded with customers.

Federal Law does not provide for any permissions from state bodies for sale of the above mentioned products.

3.2.10. Additional requirements to the Issuers the core activity of whom is communication services rendering.

The information is not submitted due to the fact that the Issuer does not render communication services.

3.3. Plans for future activity.

In 2005 NLMK will finish the first stage of Technical Reconstruction and Development Program which covers years 2000-2005, which is basically aimed at renewal of production facilities, increase in high value-added products output, improving of quality and diversification of the product mix, improving of production environmental purity and safety.

The Company's production schedule for 2005 was drawn taking into account the planned overhauls and reconstructions of the main metallurgical lines, which will lead to a decrease in the output of downstream products regarding the output of 2004. Flats production, however, is planned to maintain at the level of 2004. The product mix structure is supposed to experience favourable changes: the output of zinc-coated and pre-painted flats will increase significantly, isotropic and anisotropic steel output is also planned to increase.

In 2005 the share of products sales to the domestic market is supposed to increase both in natural and physical terms.

The Company continues taking measures aimed at improvement of management structure and labour productivity.

3.4. The Issuer's equity holding in industrial, bank and financial groups, holdings, concerns and associations.

The Issuer does not hold any equity in industrial, bank and financial groups, holdings, concerns and associations.

3.5. Subsidiaries and affiliated companies of the Issuer.

1. Full name: *Limited-liability company «Lipetsk insurance company «Shans»*
Abbreviated name: *LLC LIC “Shans”*

<i>Total</i>		38 171 970 491	18 090 868 765

Fixed assets depreciation is effected by accrual of amortized deductions in a linear way on the assumption of the assets book value and depreciation rates calculated on the basis of the term of the assets beneficial use. The term of beneficial use is determined taking account of the Classification approved by Decree No. 1 dd. 01.01.2002 of the RF Government by the commissions appointed by the decrees issued by heads of divisions.

On the fixed assets acquired in 2001 referred to the group of capital assets "Agricultural tractors" and "Agricultural machines and equipment" accrual of amortized deductions are effected by value writing off based on the sum of numbers of the years making up beneficial use term.

Accrual of amortized deductions is suspended if the fixed assets are put to conservation for a 3-month term or longer upon the decision of the Company's Director General a well as during the period of the assets reconstruction lasting for over 12 months.

Results of fixed assets revaluation for 5 complete financial years preceding the reporting quarter.

Method of fixed assets revaluation:

The Issuer revalued the property on the basis of expert report.

Separate groups of fixed assets of NLMK were revaluated for the stated period by Closed joint-stock company "Center of professional appraisal" (Moscow).

According to the submitted report on the Company's fixed assets revaluation all calculations have been done by appraisers in full conformity with the Russian Law, standards, letters, explanations and other guides on fixed assets revaluation, published by the RF Government, the State Statistics Committee of the Russian Federation, the RF Ministry of Economics, the RF Ministry of Finance.

Method of revaluation:

Fixed assets of the Company were revaluated by direct translation of their book values as applies to prices for corresponding types of fixed assets on the date of revaluation (01.01.2000), confirmed by expert judgments of appraisers on market value of the stated assets.

Depending on fixed assets group and nature of object under assessment different evaluation techniques of fixed assets replacement value definition were applied based on the following methods of fixed assets revaluation – comparative and cost estimation approaches. These approaches are based on the principle of replacement according to which costs related to formation, acquisition and commissioning of object under assessment (for cost method) are necessary to be calculated to define the value of observed depreciation or substitution value being the basis for calculation and find an object having similar functional and design parameters.

Observed depreciation of fixed assets object stands for either value of reproduction of its complete replica in current prices as of the date of assessment, or acquisition value of new object completely identical to the evaluated one upon functional, design and other parameters in current prices.

Substitution value of fixed assets object stands for minimum acquisition value of similar new object, very close to the evaluated one on the basis of all functional, design and operational parameters in current prices.

Full replacement cost of buildings, structures and transfer mechanisms was calculated on the basis of cost-is-no-object approach to property revaluation on the assumption of actual components – negotiated prices, estimations for civil works and erection, wholesale prices for construction materials, fuel, energy, machinery, equipment, tools, freight tariffs, etc. At that component division method and resource method were applied.

Full replacement value of equipment and machinery was revaluated by index method.

Replacement value of vehicles was defined according to the following methods:

- *similar object price method;*
- *cost component method;*
- *index method;*
- *direct comparison method.*

Plans on acquisition, replacement, retirement of fixed assets the amount of which accounts for 10 percent and more of their total value:

In the 3^d quarter of 2005 NLMK does not plan to acquire, purchase, replace or retire fixed assets the amount of which accounted for 10 percent and more of their total value.

Information on fixed assets charge as of the date of the reporting period end:

Charged assets: *fixed assets of NLMK (real assets, transport means, machinery and equipment, agricultural machinery, furniture, office equipment, commercial equipment, sport tools), original (replacement) cost of which amounts to 155 197 thousand rubles.*

Nature of charging: *granted on lease and transferred to free temporary use*

Date of charging: *starting from the date of transfer*

Validity of charging: *up to one year under agreements*

Other terms of charging: *none*

IV. Information on financial performance of the Issuer.

4.1. Results of the Issuer's financial performance.

4.1.1. Income and losses.

Indices dynamics characterizing the Issuer's profitability/ unprofitability:

<i>Indice</i>	<i>1Q05</i>	<i>2Q05</i>	<i>Changes</i>	
			<i>+/-</i>	<i>%</i>
<i>Proceeds, thousand rubles</i>	<i>33 400 802</i>	<i>29 377 934</i>	<i>-4 022 868</i>	<i>-12.0%</i>
<i>Gross profit, thousand rubles</i>	<i>15 873 430</i>	<i>13 525 452</i>	<i>-2 347 978</i>	<i>-14.8%</i>
<i>Net profit (retained profit), thousand rubles</i>	<i>11 053 503</i>	<i>9 920 098</i>	<i>-1 133 405</i>	<i>-10.3%</i>

<i>ROE*</i> , %	39.8%	32.7%	-7.1%	
<i>ROA*</i> , %	37.0%	30.5%	-6.5%	
<i>Net profitability ratio</i> , %	33.1%	33.8%	+0.7%	
<i>Products (sales) profitability</i> , %	44.9%	41.3%	-3.6%	
<i>Capital (net assets)turnover ratio</i> , times per quarter	0.30	0.24	-0.06	
<i>Amount of retained loss as of the reporting date, thousand rubles</i>	-	-	x	x
<i>Ratio of retained loss as of the reporting date to the balance currency</i>	-	-	x	x

The stated indices have been calculated according to the methods recommended in the Provision on information disclosure by securities issuers approved by the Decree No. 05-5/нз-н of the FSFR dd. March 16, 2005.

Notes *: $ROE = (\text{Net profits}) / (\text{Capital and provisions} - \text{target financing and earnings} + \text{deferred income} - \text{own stocks bought out from shareholders} + \text{debt to participants (founders) on income payment})$.

ROE and ROA are given on the basis of additional calculation up to annual values.

In 2Q05 a significant decrease in production volumes (caused by the planned repairs and revamping) and, accordingly, in sales volumes had a negative impact on the Company's financial performance. Amount of sales proceeds decreased by 12% as compared to 1Q2005.

Decrease in production volumes and consumption rate of raw materials, materials and fuel brought about a decrease in sales cost value (-9.6%) as compared to the first quarter of the previous year.

A significant sales proceeds decrease regarding cost reduction rate conditioned gross profit decrease by 14.8% as compared to 1Q05.

Amount of net profit (retained profit) in 2Q05 shrank by 10.3% as compared to 1Q05. The main cause of net profit reduction in 2Q05 was decrease in sales proceeds as a result of production volumes decrease and market conditions deterioration.

ROE and ROA

In the reporting period of the current year the Company's ROE and ROA went down, which was attested by ROE and ROA indices. Decrease in the Issuer's net profit (by -10.3%) was the main factor of ROE and ROA deterioration:

- ROE indice decreased from 39.8% to 32.7%,
- ROA indice decreased from 37.0% to 30.5%.

In 2Q05 sales profit decrease by 12% together with products sales cost value reduction by 9.6% caused sales profitability decrease: sales profit in each ruble of sales proceeds accounted for 41.3 kopecks against 44.9 kopecks in 1Q05.

Capital turnover in 2Q05 slightly went down as compared to respective indice in 1Q05 due to decrease in sales proceeds.

4.1.2. Factors which influenced sales proceeds of the Issuer and income (losses) from the Issuer's operations.

<i>Indice</i>	<i>2Q05 to 1Q05</i>
<i>Changes of sales proceeds (decrease -, increase +)</i>	<i>-12.0%</i>
<i>Change of cost value of products sold* (decrease -, increase +)</i>	<i>-9.6%</i>
<i>Sales profit change (decrease -, increase +)</i>	<i>-19.1%</i>

** without commercial and administrative expenses*

In 2Q05 proceeds from sales of products, works, services decreased by 12% as compared to 1Q05.

The main factor which had an impact on decrease of proceeds was planned decrease in production volumes against the background of worsening situation in sales markets. Production volumes reduction mostly covered downstream products.

Reduction of production and, accordingly, of sales of metal products in 2Q05 was also the main factor of sales cost decrease by 9.6% regarding the first quarter.

As a result in the reporting quarter of 2005 the Company's sales profit turned out to be 19.1% as much as the profit of the previous quarter.

4.2. The Issuer's liquidity.

<i>Indice</i>	<i>as of 31.03.2005</i>	<i>as of 30.06.2005</i>
<i>Own current assets*, thousand rubles</i>	<i>63 075 426</i>	<i>70 958 566</i>
<i>Permanent assets index**</i>	<i>0.47</i>	<i>0.45</i>
<i>Current ratio factor***</i>	<i>9.81</i>	<i>10.40</i>
<i>Quick liquidity factor****</i>	<i>7.77</i>	<i>8.19</i>
<i>Own funds autonomy factor</i>	<i>0.93</i>	<i>0.90</i>

*Notes: * - own current assets = current assets – other current assets – own stocks bought out from shareholders – long-term accounts receivable – short-term liabilities + debt to participants (founders) on income payment + deferred income + other short-terms liabilities.*

** - **fixed asset index** = (current assets + long-term accounts receivable) / (Capital and provisions – target financing and earnings + deferred income – own stocks bought out from shareholders + debt to participants (founders) on income payment).

*** - **current ratio factor** = (Current assets – long-term accounts receivable - own stocks bought out from shareholders – other current assets) / (short-term liabilities – deferred income - debt to participants (founders) on income payment).

**** - **quick liquidity factor** = (Current assets – long-term accounts receivable - own stocks bought out from shareholders – other current assets – inventories) / (short-term liabilities – deferred income - debt to participants (founders) on income payment).

Own current assets

As of 30.06.05 own current assets value increased by 12.5% regarding 31.03.05 level. This was caused by the increase in own capital due to retained profit.

During the period of April- June, 2005 non-current assets increased insignificantly (+3.8%), that is why own capital increase was directed at financing of current assets, which led to the increase in current assets value.

Permanent assets factor

Permanent assets factor did not change significantly in 2Q05. It met recommended fixed assets factor of ≤ 0.9 .

Current ratio factor and quick liquidity factor

In the reporting period current ratio and quick liquidity factors increased as compared to the preceding period of the current year, which was influenced by the increase in the Issuer's current assets value by 11.8% (due to placement of free monetary funds in currency deposits).

Current ratio factors dynamics attests to the complete short-term debts self-sufficiency by current assets for economic activity pursuance and to a high degree of the Company's solvency.

Apart from it quick liquidity factors attest to the Company's ability to completely repay short-term liabilities without sales of inventories.

Own funds autonomy factor.

This factor indicates own capital share in the assets and characterizes the degree of the issuer's financial independence of creditors. Own funds autonomy factor as of 30.06.05 accounts for 0.9. This factor allows to assume low degree of the Issuer's financial dependence on creditors.

Adequacy of the Issuer's capital and current assets

Increase in NLMK's assets is facilitated by a steady own capital increase. Own capital share in the total value of the Company's assets as of 30.06.2005 accounted for 90.0%.

Own capital and current assets adequacy factors

<i>Indice</i>	<i>1Q05</i>	<i>2Q05</i>
<i>Relation of debt funds to capital and reserves, %</i>	<i>7.2%</i>	<i>11.2%</i>
<i>Relation of short-term liabilities to capital and reserves, %</i>	<i>6.3%</i>	<i>10.2%</i>

<i>Own capital (Form 1, p. 490), thousand rubles</i>	<i>116 423 644</i>	<i>121 549 161</i>
<i>Current assets (Form 1, p. 290), thousand rubles</i>	<i>70 326 866</i>	<i>78 613 296</i>
<i>Short-term liabilities (Form 1, p. 690), thousand rubles</i>	<i>7 295 823</i>	<i>12 340 407</i>
<i>Average daily operating expenses, thousand rubles</i>	<i>171 586.5</i>	<i>155 363.3</i>

As of 30.06.2005 relation of debt funds to own capital accounted for 11.2%, relation of short-term liabilities to own capital accounted for 10.2%. These indices attest to the Company's low dependence on debt funds.

Amount of the Issuer's own capital is adequate to cover the current operating expenses and fulfillment of short-term liabilities (as of 30.06.2005 own capital exceeds the amount of short-term liabilities by almost 10 times).

The Issuer doesn't have any operating expenses related to interest payment (Form 2, p. 070). Average daily operating expenses in 2Q05 accounted for 155.4 mln. rubles (13 982.7 mln. rubles per quarter (Form 2, p. 100)). Operating expenses are almost completely covered by operating income (Form 2, p. 090) which accounted for 13 914.1 mln. rubles in 2Q05. Apart from it, the amount of current assets (Form 1, p. 290) as of 30.06.2005 accounted for 78 613.3 mln. rubles. All this attests to the adequacy of the Issuer's current assets for covering the current operating expenses in 2Q05.

4.3. Amount, structure of capital and current assets of the Issuer.

4.3.1. Amount and structure of the Issuer's capital and current assets.

The Issuer's policy in financing of current assets

On the basis of analysis made to financial status only stable banks are selected. For each of the banks NLMK defines limit of funds placement required for current activity as well as spare cash.

In case of market conditions worsening and changes of the Company's investment plans residual cash and its equivalents which accounted for 42.7 bln. roubles as of 30.06.2005 could be used.

Taking into account stable performance of the Company during a long period of time as well as high share of own funds in the Company's capital, NLMK has a possibility to attract significant funds on favorable terms both in the form of bank credits and bond offering.

4.3.2. The Issuer's financial investments.

NLMK's financial investments which are 10% and more of all its financial investments as of the date of the reporting period closure.

There are no other financial investments inclusive of the same to any other non-issuing securities as well as to chartered capital of limited liability companies amounting to 10 and more percent of all financial investments of NLMK as of 30.06.2005.

Financial investments are accounted at NLMK according to Provision on accounting "Accounting of financial investment" PBU 19/02, approved by Order of the RF Ministry of Finance No. 126n dd. 10.12.2002 as well as by Provision on accounting policy of NLMK for accounting approved by Order of the Company No. 838 dd. 31.12.2004.

4.3.3. Intangible assets of the Issuer.

Information on composition of intangible assets, initial (replacement) value of intangible assets and value of accumulated depreciation.

(rubles)			
No	Description of intangible assets group	Initial (replacement) value	Accumulated depreciation
As of 30.06.2005			
1	Sole rights for PC applications and databases	14 244 713	13 789 290
2	Sole rights for inventions	3 904 765	500 086
3	Sole rights for production prototypes	200 000	200 000
4	Sole rights for utility models	633 804	421 047
5	Sole rights for trade marks and service marks	143 021	43 962
6	Sole rights for artwork, science work, literature publications	39 167	11 308
7	Other rights	309 032	309 032
Total		19 474 502	15 274 725

There were neither intangible assets entered to chartered capital nor received free of charge.

Information on intangible assets of the Company is generated and reflected in the financial statements in conformity with Provisions of accounting «Accounting of intangible assets» PBU 14/2000, approved by Order of the RF Ministry of Finance No. 91n. dd. 16.10.2000, as well as provision on NLMK's accounting policy, approved by the Company's Order No. 838 dd. 31.12.2004.

4.4. Information on policy and expenses of the Issuer in the area of technological progress, as regards to licenses and patents, new developments and investigations.

The Issuer's policy in the area of technological progress in the reporting period was defined by NLMK's quality policy.

One of approaches of the policy in the area of technological development is acquisition of rights for intellectual property by patent protection of new technical solutions developed at NLMK.

In 2Q05 2 patents for inventions were received. They are enlisted below.

List of patents for inventions received in 2Q05.

No.	Description of an invention, utility model	Issue date	Validity of patent
1.	Filter	10.05.2005	20 years
2.	Method of briquettes formation from iron-bearing waste	10.06.2005	20 years

List of Certificates for trade marks of NLMK valid as of 30.06.2005

No.	Description	Issue date	Validity

16	Trademark "NOVOLIP"	02.10.2002	till 30.10.2010
17	Trademark "НОВОЛИП"	02.10.2002	till 30.10.2010
18	Trademark "LIPMET"	22.11.2002	till 24.10.2010
19	Trademark "НОВОМЕТ"	05.07.2004	till 30.10.2010
20	Trademark "NOVOMET"	05.07.2004	till 30.10.2010

Constant control over prompt payment of all patent fees on inventions and utility models, over prolongation of trade mark registration validity, over submission of applications on registration of trade mark in case of the Company's product mix

diversification are the main actions aimed at prevention of NLMK's forfeiture of rights for intellectual property.

NLMK's expenses for R&D under agreements in force for 2Q05 accounted for 6 831 683 rubles, of them 83 905 rubles related to patents and licenses obtaining.

4.5. Analysis of trends in the Issuer's core activity.

After headlong growth of the world steel production in 2004 world steel market conditions changed in 2005. In spite of the continuing increase in steel production in the world in the first half of the current year world steel prices for products of iron and steel industry saw a descending tendency.

Deterioration of the world steel market conditions which started at the beginning of 2005 was reflected in the development of Russian iron and steel industry. In quarter II Russian steelmaking companies, export-oriented first of all, slowed down their rates of production growth or reoriented their supplies to the domestic market.

Thus, in 2Q05 industry-wise output of pig iron decreased by 6.1% as compared to the first quarter, steel output – by 3.9%, flats output – by 5.3% (according to the information of "Chermet" Corporation).

NLMK's production dynamics coincided in many respects with the industry development in this period. NLMK's production indices like the industry indices decreased in Q. 2 of the current year as compared to the previous quarter: pig iron output decreased by 19.7%, steel output - by 13.6%, finished flats output – by 14.1%. The decrease was caused by implementation of production policy which allows to get through the recession period with minimal losses and to prepare the Company for an ascending trend in sales markets. From the beginning of the year NLMK conducts major overhauls and takes measures aimed at technical reconstruction causing partial shutdown of production facilities.

In 2Q05 NLMK, like many Russian iron and steel companies, reduced products for sale output by 9.6% in cost expression as compared to 1Q05.

It should be noted that higher prices for the Company's steel products in the domestic markets compared to export prices allowed NLMK to increase cost of sales in the domestic market.

Today the Company has the lowest costs per 1 rouble of products for sale and the highest profit before taxation in the industry. Vertically-integrated business model created at NLMK as well as policy of strict costs control in the conditions of worsening market conditions of the world steel market allows the Company to maintain its position in the market and a high level of profitability.

Main competitors of the Issuer

The main competitors of NLMK in the domestic market are OJSC "MMK" and OJSC "Severstal".

The Company is characterized by the following strong competitive advantages:

- diversification of production process. NLMK is an integrated steel company with production along the whole chain starting from pig iron to coated flats;*
- geographical location. The Company is located in close proximity to main steel-consuming regions of Russia as compared to its competitors.*
- priority in development of high value-added products. NLMK was the first in Russia to master production of prepainted steel and is the only producer of electrical steel of high grades and cold rolled structural quality flats.*

- *high stable quality remains the main requirement to products in any market. Starting from 2000 a program of technical reconstruction and development has been implemented to improve quality of products.*
- *demand for products in the world market. NLMK ships its products to actually all industrially developed countries, is a leading slab exporter from Russia.*
- *fast reaction to market tendencies.*

As compared to competitors the Company's position remains unchanged both in near-term and remote outlook because their technology and equipment are comparable to that of NLMK by the highest standards. All the three companies invest much into reconstruction and upgrading of equipment. Against a general background of capacity increase and quality improvement any qualitative overtaking is hardly possible.

Following world tendencies NLMK is commissioning Hot Dip Galvanizing Line. Production of this type of products will allow NLMK to hold and expand its position in world market of coated flats.

NLMK exports its products to several dozens countries of the world. There are producers of the same products practically in each country – importer. Besides NLMK steel companies from other countries supply their products to these markets. So, NLMK experiences multiple competitions in the foreign market and it seems impracticable to single out specific competitors in the world market.

V. Detail information on members of the Issuer's authorities, financial performance control bodies, brief data on employees of the Issuer.

5.1. Information on structure and competence of the Issuer's authorities.

The Supreme governing body of the Company is the General Shareholders' Meeting.

The Board of Directors carries out the general management of the Company activity excluding those issues, which fall under the exclusive competence of the Shareholders' Meeting.

The Board of Directors consists of 9 persons.

The management of the routine business of the Company is exercised by the Company's single executive body – Director General and by the Company's corporate executive body – the Management Board.

The competence of Director General and Management Board covers all the issues related to the management of the Company's routine business except the matters of exclusive competence of the General Shareholders' Meeting and the Board of Directors.

The Director General and the Management Board make arrangements for implementation of the decisions of the Company's General Shareholders' Meeting and the Board of Directors.

The Director General also fulfils the functions of the Company's Management Board Chairman.

The Management Board is a corporate executive body of the Company, which acts with the authority of the Federal Act "On the joint-stock companies", the Company Statute and Regulations on the Management Board of the Company approved by the General Shareholders' Meeting.

The organization and membership of the Management Board are approved by the Board of Directors upon presentation by the Director General.

The competence of the general meeting of the issuer's stockholders (participants) in accordance with its statute (constituent documents):

The following matters fall within the Meeting's competence (Chapter 4, Article 16 of the Company Statute):

- 1) changes and additions to the Statute or approval of the Statute in new revisions;*
- 2) reorganization of the Company;*
- 3) liquidation of the Company, appointment of the Liquidation Committee and approval of the interim and final liquidation balances;*
- 4) establishment of the quantitative staff of the Board of Directors, election of its members and premature termination of their authority;*
- 5) determination of number, par value, category (type) of declared shares and rights given by these shares;*
- 6) increase in the Company's chartered capital through share par value increase; increase of the chartered capital of the Company through placement of additional shares by public subscription in case the number of additionally placed shares constitutes more than 25% of the common shares earlier placed by the Company; increase of the Company's chartered capital through placement of shares by closed subscription;*
- 7) decrease of the chartered capital through share par value decrease, through paying off the shares acquired by the Company and not realized within a year and of the shares redeemed by the Company, as well as through paying off the shares that have passed to the Company in relation to their non-payment; decrease of the chartered capital through partial acquisition of shares for the purpose of decreasing their total number;*
- 8) election of Director General and premature termination of its authority;*
- 9) election of the Auditing Committee members and premature termination of their authority;*
- 10) approval of the Company's Auditor;*
- 10.1) payment (announcement) of dividends upon results of 1Q, six months, nine months of a financial year;*
- 11) approval of annual reports, annual financial statements, including income statements of the Company, as well as distribution of Company's profits (including payments (declaration) of dividends with exclusions of profits distributed as dividends upon results of 1Q, six months, nine months of a financial year) and losses of the Company upon results of a financial year;*
- 12) establishment of procedure of the General Meeting;*
- 13) appointment of the Accounts Committee members and premature termination of their authority in case of the Company's Registrar functions as the Accounts Committee according to requirements to Federal Law "On joint-stock companies";*
- 14) split-up and consolidation of the shares;*
- 15) making decisions on approval of transactions in cases stipulated in Article 83 of the Federal Law «On Joint-stock Companies»;*
- 16) making decisions on approval of major transactions in cases stipulated in Article 79 of the Federal Law "On Joint-stock Companies";*
- 17) acquisition of the subscribed shares by the Company in cases, stipulated in the Federal Law "On Joint-stock Companies";*
- 18) making decisions on involvement in holdings, financial and industrial groups, associations and other commercial organizations;*
- 19) approval of internal documents governing the operation of the Company's bodies;*
- 20) decision-making on other matters stipulated by the Federal Law "On Joint-stock Companies" and / or the present Statute.*

The matters falling under the competence of the General Meeting of Shareholders cannot be transferred to the competence of executive bodies of the Company.

The matters falling under the competence of the General Meeting of Shareholders cannot be transferred to competence of the Board of Directors of the Company except in cases stipulated in the Federal Act "On the joint-stock Companies".

The competence of the Issuer's Board of Directors (Supervisory Board) in accordance with its Statute (constituent documents):

The following matters fall within the competence of the Board of Directors (Chapter 5, Article 30 of the Company's Statute):

- 1) definition of priority activities of the Company;*
- 2) convocation of the Annual and Extraordinary Shareholders' Meetings excluding cases, when in accordance with the Federal Law "On Joint-stock Companies" an Extraordinary Shareholders' Meeting can be convoked by authorities and persons demanding its convocation;*
- 3) approval of the General Shareholders' Meeting agenda;*
- 4) definition of the date of list of the shareholders who are entitled to participate in the Shareholders' Meeting and other issues attributed to the competence of the Board of Directors in accordance with the Statute and the Federal Law "On Joint stock companies" and related to preparation and holding of the Shareholders' Meeting;*
- 5) preliminary approval of annual reports, annual financial statements, including income statements of the Company for a financial year;*
- 6) increase of the Company's chartered capital by placement of additional shares by the Company out of its property within the quantity of declared shares.*
- 7) increase of the Company's chartered capital by placement of additional shares by the Company by public subscription within the quantity of declared shares, if the number of additionally placed shares constitutes 25% or less from the common shares earlier placed by the Company;*
- 8) acquisition of shares placed by the Company in accordance with Item 2, Article 72 of the Federal Act "On the joint-stock Companies";*
- 9) approval of decisions on offering, prospectus, report on offering results, their amending and revising.*
- 10) placement of bonds and other securities issued by the Company in cases provided for by the Federal Law "On Joint-stock companies";*
- 11) determination of price (pecuniary valuation) of the property, price of offering and redemption of the securities issued in cases provided for by the Federal Law "On Joint-stock Companies";*
- 12) acquisition of bonds and other securities placed by the Company in cases provided for by the Federal Act "On the joint-stock companies";*
- 13) constitution of the Management Board and early termination of its authorities; determination of rewards and compensations paid to its members; conclusion of contracts with the Director General and members of the Management Board on behalf of the Company;*
- 14) determination of terms and conditions of contracts with the Director General and members of the management board;*
- 15) recommendations to the General Shareholders' Meeting on amount of reward and compensation paid to members of the Auditing Committee and determination of payment amount for Auditor's services;*
- 16) recommendations to the General Shareholders' Meeting on dividend amount payable to the shareholders and procedure of its payment;*

17) *recommendations to the General Shareholders' Meeting on the procedure of profits and losses distribution upon results of a financial year;*

18) *use of reserve and other funds of the Company;*

19) *approval of internal papers of the Company excluding internal papers which fall within the competence of the General Shareholders' Meeting according to this Statute and Federal Law "On Joint-stock Companies", or other internal documents of the Company which fall within the competence of the Director General and Management Board in accordance with the present Statute;*

20) *establishment and liquidation of the Company's branches and representative offices, approval of provisions on branches and representative offices, revision and expanding of these provisions;*

21) *approval of major transactions in cases provided for by Chapter X of the Federal Law "On Joint-stock Companies";*

22) *approval of transactions provided for by Chapter XI of the Federal Law "On Joint-stock companies";*

23) *approval of the Company Registrar and terms of agreement with him/her, as well as cancellation of agreement;*

24) *suspension of the Director General's activity;*

25) *appointment of temporary acting Director General;*

26) *decision on Company's participation in other organizations, excluding participation in holding companies, financial and industrial groups, associations and other unions of commercial organizations;*

27) *establishment of Committees under the Board of Directors, approval of internal documents, which regulate activities of these Committees;*

28) *other matters provided for by the Federal Law "On Joint-stock Companies" and the present Statute.*

The matters that fall within the competence of the Company's Board of Directors cannot be transferred to the executive body of the Company for decision.

Competence of the individual and corporate executive bodies of the issuer in accordance with its Statute (constituent documents):

The Competence of the Director General (Chapter 6, Article 37 of the Company Statute).

The competence of the Director General includes all issues of routine Company activities management excluding those in the exclusive authority of the General Shareholders' Meeting and the Board of Directors.

The Director General acts without any Power of Attorney on behalf of the Company, in particular:

- performs operative management of the Company's activities;*
- has the right of the first signature in financial documents;*
- represents the Company both in the RF and outside it;*
- approves staff list, concludes employment agreements with employees of the Company, fires, applies incentive measures to employees and imposes penalties on them;*
- governs the activities of the Management Board and presides at its meetings;*
- presents for the Board of Directors' approval an individual list of the members of the Management Board;*
- conducts transactions on behalf of the Company with the exception of cases stipulated by the Federal Act "On the Joint-Stock Companies" and this Statute;*
- issues power of attorney on behalf of the Company;*
- opens the Company's accounts with banks;*

- makes provisions for the Company's accounting and book-keeping conduction;
 - issues orders and gives instructions which are binding for all employees of the Company;
 - defines a list of data representing commercial secret of the Company, and means of such data protection in accordance with the effective legislation;
 - approves internal documents of the Company, which regulate the Company's routine activities, excluding those in the exclusive authority of the Management Board.
- The Director General is entitled to appoint acting Director General for the period of his absence to be approved by the Board of Directors' Chairman.*

The Competence of the Management Board (Chapter 6, Article 38 of the Company Statute).

- The exclusive competence of the Company's Management Board includes:*
- development and submission to discussion by the Board of Directors of the Company's development concept;
 - securing of contracts with the Company's assets when the amount due or the subject goods value exceeds 10 per cent of the balance value of the Company's assets, excluding transactions performed in the normal course of business;
 - approval of internal routine Rules and other local regulations according to the list specified by the Director General;
 - conclusion of the Collective Agreement with the Company staff (authorized body);
 - other issues referred to the competence of the Company's Management Board under the effective legislation of the RF.

6.	<i>Author's royalty</i>	3 196 129	3 554 006
	Total	16 048 568	34 650 518

Remuneration can be paid and charges related to performance of Management Board members' functions can be refunded to Management Board members within the period of their duties execution. Amount, conditions and procedure of remuneration payment and charges refund to members of the Board of Directors are established by the Provision on remuneration of the Company's Board of Directors approved by the General Shareholders' Meeting.

Remuneration can be paid and charges can be refunded to Members of the Management within the period of their duties execution. Conditions and procedure of remuneration payment and charges refund are established by a contract concluded with members of the Management Board, in accordance with the Provision on remuneration of the Company's Management Board members' labor, approved by the Company's Board of Directors upon presentation by the Personnel and Remuneration Committee.

5.4. Information on structure and competence of controlling authorities over financial performance of the Issuer.

The Auditing Committee and Internal Audit Service exercise control over the financial and economic activities of the Company.

Auditing Committee

The Auditing Committee consists of five persons, is elected for a period of one year by the General Shareholders' Meeting and carries out its activities in accordance with the Provision on the Auditing Committee approved by the General Shareholders' Meeting upon presentation by the Board of Directors.

The Provision on the Auditing Committee regulates the Auditing Committee procedures, the authority of its members, the rate and procedure of remuneration payment and expenses reimbursement to members of the Auditing Committee.

The Company's Auditing Committee Members cannot simultaneously be members of the Company's Board of Directors or take up any other posts in management bodies of the Company.

Audit of financial and economic activities of the Company is based on the yearly-based business results and is conducted at any time on initiative of the Auditing Committee of the Company and by the decision of the General Shareholders' Meeting, the Board of Directors or upon request of a shareholder (-s) owning in the aggregate at least ten per cent of the Company's voting shares.

The Auditing Committee audits financial and economic activity of the Company in order to verify conformity of the financial statements information to norms and requirements of the existing legislation, internal regulatory documents, performs selective investigation of proofs attesting figures accounting and notes to financial statements.

Upon results of Company's financial and economic activity auditing the Committee makes a report on authenticity of data contained in the Company's annual report, balance sheets, income statement.

Internal Audit Department

The Internal Audit Service – Audit Division, established sine die under Director General's Order dd. 17.04.1997, is administratively subordinated to the Director General.

Key staff: Valery S. Kulikov; Igor A. Matsak.

The competence of the Internal Audit Department covers:

- *auditing of financial and economic, commercial and production activity of the Company's divisions;*
- *evaluation of process related to acquisition, storage, protection and conservation of the Company's resources;*
- *detection of possible delinquencies, frauds and abuses on part of the Company's officials and reporting to the Company's managers on results;*
- *evaluation of internal control system as regards to efficiency of operations in the normal course of business.*

Management Board Members are informed on the results of the auditing upon their competency. The Board of Directors is informed in case of any material breach.

In process of its activity the Internal Audit Division cooperates with auditing firms working for the Company on contract basis.

Information on any inside document with the Issuer establishing rules aimed at prevention of inside information deployment:

The Issuer doesn't have any document establishing rules aimed at prevention of inside information deployment.

As of the date of the reporting quarter end the size of NLMK's reserve fund amounted to 299 661 362 rubles or 5% of its chartered capital.

Within the reporting quarter the reserve fund was not used.

There were no other funds to be generated at NLMK out of its net profit.

8.1.4. Information on procedure of convocation and conduction of the Issuer's supreme management body meeting:

The Issuer's management body:

The Supreme governing body of the Company is the General Shareholders' Meeting.

Procedure of shareholders (participants) notification on convocation of General Shareholders' Meeting:

The notification on convocation of General Shareholders' Meeting is brought to notice of the shareholders under decision of the Board of Directors by publication of the information in newspaper «Gazeta», newspaper «MG» and in NLMK's web-site in the Internet. The notification on General Shareholders' Meeting convocation shall be published not later than 30 days prior to the date of the Meeting, if a longer term is not envisaged by law.

The shareholders owning one and more per cent of the Company's shares as well as nominal shareholders are informed of the meeting in written. The written notifications are sent by the registered mail not later the date stated in this clause.

Persons (bodies) having the right to summon (demand) the Extraordinary Shareholders' Meeting as well as the procedure of raising a demand:

The Extraordinary Shareholders' Meeting is held upon decision of the Board of Directors on the basis of its own initiative, demand of the Auditing Committee, Auditor as well as shareholders (shareholder) owning not less than 10 per cent of the Company's voting shares as of the date of the demand. The Extraordinary Shareholders' Meeting is summoned by the Board of Directors and must be held within 40 days from the date of a/m demand made by Auditing Committee, Auditor or shareholders in respect of the Extraordinary Shareholders' Meeting holding. In case of the Company's Board of Directors members election on the agenda to the Extraordinary Shareholders' Meeting as well as in case the Board of Directors are liable to make a decision on holding of the Extraordinary Shareholders' Meeting under the Federal Law "On joint-stock companies" to elect the Board members this Shareholders' Meeting should be held within 70 days from the date of corresponding demand or decision of the Board to hold the Meeting.

A request for holding of Extraordinary Meeting shall contain worded issues to be included into the Meeting agenda. The request for holding of Extraordinary Meeting can contain worded decisions on each of these issues as well as suggestions on the Shareholders' Meeting conduction form.

The Board of Directors is not entitled to change wording of agenda issues, wording of decisions on such issues and to change offered form of Extraordinary Shareholders' Meeting being convened upon the request of the Auditing Committee, Auditor or shareholders (shareholder) being owners of not less than 10 per cent of the Company's voting shares.

Should request for the Extraordinary Meeting be submitted by shareholders (shareholder) it shall include the name of shareholders (shareholder), requiring the convocation, the quantity and type (category) of the shares belonging to them (him/her).

Request for the Extraordinary Meeting shall be signed by persons (person) who demand Extraordinary Meeting convocation.

The Board of Directors shall make a decision on the Extraordinary Meeting convocation or on refusal to call it within five days from the date of the request submission by the Auditing Committee, Auditor or shareholders (shareholder) being owners of not less than 10 per cent of the Company's voting shares.

Decision on refusal to convene the Extraordinary Shareholders' Meeting upon the request of the Auditing Committee, Auditor or shareholders (shareholder) being owners of not less than 10 per cent of the Company's voting shares can be made in case:

- *the procedure of the demand submission on convocation of the General Shareholders' Meeting has been violated;*
- *shareholders (shareholder) demanding the Extraordinary Shareholders' Meeting summoning do not possess the required quantity of the Company's voting shares;*
- *none of the issues put forward to be included into the Extraordinary Meeting agenda refers to its competence and (or) corresponds to requirements of the Federal Law «On joint-stock companies» and other legal acts of the Russian Federation.*

Decision of the Board of Directors on the Extraordinary Meeting summoning or justified decision to refuse to call it is sent to persons who have required its convocation by registered mail with notice of receipt not later than 3 days from the date of the decision – making.

Should the decision on the Extraordinary meeting convocation be not made or should the decision to refuse to call the Extraordinary Meeting be made within the stated period by the Board of Directors, the Extraordinary Meeting can be summoned by persons or bodies demanding its convocation.

The procedure of the Meeting date determination:

Regular Annual Shareholders' Meeting is convened not earlier than in two months and not later than in six months after the end of a financial year. Extraordinary Shareholders' Meeting can be summoned along with a regular annual meeting.

Date, time and place of the General Shareholders' Meeting, the procedure of its preparation and conduction shall be determined by the Board of Directors under provisions of the Company's Statute and Regulations of Shareholders' Meeting conduction.

Persons entitled to make proposals to agenda of the Issuer's management body meeting as well as the procedure of submission of these proposals:

Shareholders (a shareholder), owing not less than 2 per cent of the Company's voting shares in aggregate are entitled to make proposals to agenda of Annual General Shareholders' Meeting and put forward candidate members to the Company's Board of Directors, Auditing Committee and Returning board, the number of which cannot exceed the number of respective body members as well as candidate Director General. Such proposals must be received by the Company not later than in 30 days after the date of a financial year end.

In case of the Company's Board of Directors election being on the agenda of the Extraordinary Shareholders' Meeting, shareholders (a shareholder) owing not less than 2 per cent of the Company's voting shares in aggregate are entitled to propose candidate members to the Board of Directors the number of which cannot exceed the number of the Company's Board. Such proposals must be received by the Company not later than 30 days prior to the date of the Extraordinary Shareholders' Meeting.

A proposal on issues inclusion into the agenda of the General Shareholders' Meeting and a proposal on candidates shall be made in written, shall indicate the name of shareholders (shareholder), demanding it, the quantity and type (category) of the shares belonging to them (him/her) and shall be signed by shareholders (shareholder).

A proposal to enter issues into the agenda of the General Shareholders' Meeting shall contain wording of each proposed issue, while a proposal on candidates shall contain name of each proposed candidate, name of body to which that candidate is stated, other data on him/her provided for by internal documents of the Company as well as written consent of a candidate to take the title. A proposal on entering of issues into agenda of the General Shareholders' Meeting can include wording of decision on each proposed issue.

The Company's Board of Directors is liable to consider received proposals and make a decision on inclusion of them into the agenda of the General Shareholders' Meeting or refusal to include into the agenda not later than 5 days after deadlines stated in the Company's Statute for inclusion of proposals into the agenda of the Annual General Shareholders' Meeting and Extraordinary Shareholders' Meeting. An issue proposed by shareholders (a shareholder) is subject to entering into the agenda of the General Shareholders' Meeting as well as proposed candidates are subject to entering into a slate for voting on election to respective bodies of the Company except if:

- *shareholders (a shareholder) have violated terms established by the Company's Statute;*
- *shareholders (a shareholder) do not own the relevant number of the Company's voting shares as stated in the Company's Statute;*
- *a proposal is not in conformity with the requirements of the Company's Statute;*
- *an issue proposed for agenda of the General Shareholders' Meeting is not within its competence and (or) is not in conformity with the requirements of the Federal Law «On joint-stock companies» and other legal acts of the Russian Federation.*

Justified decision of the Company's Board of Directors on refusal to include the proposed issue into the agenda of the General Shareholders' Meeting or a candidate shall be sent to shareholders (shareholder) who put forward the issue or candidate not later than three days from the date of its receipt.

The Board of Directors is not entitled to change wording of the agenda issues, wording of decisions on such issues made by the General Shareholders' Meeting.

Besides issues proposed to be included into agenda of the General Shareholders' Meeting as well as in case of absence of such issues, absence or insufficient quantity of candidates proposed by shareholders to form corresponding body, the Board of Directors has the right to include issues into the agenda or candidates into the slate of the General Shareholders' Meeting at its discretion.

Persons which have the right to get familiarized with information (materials) presented for Supreme Management Body Meeting preparation and conduction as well as procedure of familiarization with such information (materials):

Persons having the right to participate in the General Shareholders' Meeting can receive information (materials) subject to presentation during preparation to the General Shareholders' Meeting for familiarization in the room of the Company's executive body and at places the addresses of which are stated in announcement on General Shareholders' Meeting holding within 20 days and in case of the General Shareholders' Meeting whose agenda includes an issue on the Company's reorganization, within 30 days prior to the General Shareholders' Meeting as well as during the Meeting itself at place of its holding.

Persons having the right to participate in the Company's General Shareholders' Meeting can receive copies of the stated documents upon request sent in written to the Company's executive body subject to payment.

The date on which the register of shareholders started to be kept by the stated registrar:
04.03.2004

8.7. Information on legislative acts regulating import and export of capital, which could affect payment of dividends, interest and other payments to non-residents.

International agreements and contracts on double taxation prevention, Tax Code of the Russian Federation (part one) No. 146-FZ dd. 31.07.1998 (revision dd. 02.11.2004), Tax Code of the Russian Federation (part two) No. 117-FZ dd. 05.08.2000 (revision dd. 29.07.2004 with changes dd. 29.12.2004), Federal Law No. 173-FZ dd. 10.12.2003 "On currency control" (revision dd. 29.06.2004), Federal Law No. 39-FZ dd. 22.04.1996 (revision dd. 07.03.2004) "On securities market", Federal Law No. 208-FZ dd. 26.12.1995 (revision dd. 29.12.2004) "On joint-stock companies" are considered as legislative acts which regulate import and export of capital and which could affect payments of dividends, interest and other payments by the Issuer to non-residents who have the Issuer's securities in possession.

8.8. Description of income taxation procedures regarding placed and being placed Issuer's securities.

Owners of the Company's stocks can receive income as dividends and income from stocks sale. Organization's income is taxed under Chapter 25 «Profit tax of organizations» of Tax Code of the Russian Federation, natural persons are taxed under Chapter 23 «Natural persons' income tax».

Dividends.

In case of dividend payment to natural persons and organizations the Company acts as Fiscal agents, i.e. it makes calculations, deduction from dividends and transfer of natural persons' income tax and profit tax of organizations to the budget.

Legal persons.

Organizations' profit from dividends is taxed under Chapter 25 «Profit tax of organizations» of Tax Code of the Russian Federation.

Dividends paid to organizations which are Russian tax payers, are taxed at 9% tax rate (subclause 1 clause 3 Article 284 Tax Code of the Russian Federation), foreign organizations – at 15% tax rate (subclause 2 clause 3 Article 284 of Tax Code of the Russian Federation).

Natural persons.

Tax rate of natural persons' (RF residents) income tax is 9% and 30 % for non-RF residents.

Income from stocks sales.

Legal persons.

A feature for tax base for RF nationals in case of securities operations is defined by Articles 280 and 283 of Tax Code of the Russian Federation. Profit tax shall be paid at 24% tax rate (clause 1 Article. 284 of Tax Code of the Russian Federation).

Procedure of taxation of non-RF residents is controlled by Articles 306-307, 309-312 of Tax Code of the Russian Federation. Foreign organizations which do not perform profit-oriented business in the Russian Federation, pay profit taxes upon stocks sale of Russian companies, where more than 50% of assets consist of real estate at the territory of the Russian Federation as well as financial instruments being derivatives of these shares. At that income from trade of securities on foreign stock exchanges or financial instrument being in circulation on these exchanges is not recognized as income received from RF sources of revenues (subclause 5 clause. 1 Article 309). Fiscal Agent makes calculations and deduction of profit tax at 20% or 24% tax rate. 20% tax rate can be applied only in case tax base is a full amount of profit from stocks sales (subclause 1 clause 2 Article 284). 24% tax rate shall be applied if the tax base is defined under the procedure similar to that applied to organizations – RF tax payers (clause 4 Article 309 and clause 1 Article 284).

Natural persons.

Procedure of taxation of natural persons' income from securities operations is established by Articles 214-1, 220, 224 Chapter 23 of Tax Code of the Russian Federation.

Income (loss) on sales of securities is defined as difference between income from securities sales and documented securities sales proceeds and documented expenses of acquisition, sale and storage of securities actually incurred by a tax payer or assessed tax deduction taken to reduce securities sales income. Assessed tax deduction is not provided for natural persons being non-RF residents.

Assessed tax deduction is granted to a tax payer as regards to full amount received by him during tax period (duration of tax period is one year) from sales of securities being in his possession for three or more years, and in case securities were in possession of a tax payer for less than 3 years, then amount of assessed tax deduction in case of their sale cannot exceed 125 000 rubles.

Tax rate for stated income of natural persons being RF residents is 13 percent.

Tax rate for stated income of natural persons being non-RF residents is 30 percent.

Tax is calculated and paid by a fiscal agent upon completion of tax period or in case of payment to tax payer before expiration of successive tax period.

Should it be impossible to withhold calculated amount of tax from a tax payer, a Fiscal agent shall inform tax authorities in written within one month from the date of this event occurrence on impossibility to withhold and on amount of tax debt.

Application of International Agreements.

If provisions of international agreements concluded by the Russian Federation (or USSR, if the RF declared these agreements valid) with other states residents (natural persons or organizations) of which obtain income from the Company's shares, other taxation rules and standards as compared to those of the Russian Law laid down, rules and standards provided for by international agreements shall apply subject to meeting conditions established by the Law.

 - 1.3. Accounting of the Company is maintained by Accounting Department arranged as a self-dependent subdivision headed by Director of Accounting – Chief Accountant.
 - 1.4. Amount is recognized as significant for reflection of values in balance sheets and income statement of the Company if the ratio of it to total of corresponding values for the reporting year is not less than 5 percent.
 - 1.5. Automated form of accounting is used in the Company.
 - 1.6. Taking in account complex company's structure of organization and production, NLMK shall introduce additional subaccounts on its own by Order of Director for Accounting with adherence to basic methodological principles of accounting maintenance established by Chart of accounts in case of financial and economic operations, correspondence upon which is not provided for by typical Chart of Accounts.

2. Provision on accounting policy for accounting

2.1. Accounting of fixed assets

2.1.1. A part of real estate and property of value under RUR 10000 per unit with useful life of more than 12 months is accounted according to the order set forth in 2.5.9.

of the present Provision, at that the data on balance of the stated real estate and property shall be shown in financial and statistics statements, Form No. 1 in line 120, Form No. 5 in line 370, Form No. 11 in line 01.

2.1.2. Special tools, devices and equipment shall be accounted in the order established for fixed assets accounting according to Provision on accounting "Fixed assets accounting" PBU 6/01.

2.1.3. Real estate and property taken into operation and actually used and being in process of state registration shall be included into non-current assets and depreciable groups starting from the moment of documented fact of documents filing for registration of the stated rights.

2.1.4. Historical cost of fixed assets is accounted in integral rubles. Differences resulting from rounding of actual costs on acquisition, installation or manufacture of non-current assets to integral rubles shall be accounted as operating income (expenses).

2.1.5. Travelling expenses over norms related to acquisition and manufacture of non-current assets are reflected in extra-sales expenses.

2.1.6. Historical cost of fixed assets, received upon contracts and agreements stipulating fulfilment of obligations (payment) by non-monetary means, is recognized as the price of valuables handed over or subject to be handed over established on the basis of the price which is taken by NLMK as the basic one for determination of a price for similar valuables in comparable circumstances.

Should it be impossible to define value of valuables handed over or subject to be handed over by the company, value of above mentioned fixed assets is defined on the assumptions of value of acquisition of similar fixed assets in comparable circumstances.

2.1.7. Value of fixed assets received gratis, inclusive of upon agreement of gift, shall be accounted as deferred income upon the market value with further attribution to financial performance as extra-sales income during useful life at the rate of charged depreciation.

2.1.8. Fixed assets are amortized and depreciated by charging of depreciation by linear method on the assumptions of their book value and norms of depreciation, calculated on the basis of their useful life. Useful life of fixed assets is defined by Committees assigned by Orders of Managers of shops and subdivision according to Classification No. 1 approved by Provision of the RF Government dd. 01.01.2002.

2.1.9. For fixed assets acquired in 2001 relevant to group of fixed assets "Agricultural tractors" and "Agricultural Machinery and equipment" depreciation is charged by writing-off of value upon sum of years of useful life.

2.1.10. Charging of depreciation and amortization is suspended in case of preservation of fixed assets for over three months upon the decision made by Director General of the Company as well as during the period of recovery the duration of which exceeds 12 months.

2.1.11. To take into account operation on sales and other retirement of fixed assets a separate subaccount "Retirement of fixed assets" to account 01 "Fixed assets" is opened. Value of retired assets is reflected in debit of this subaccount, while amount of accumulated depreciation is shown in credit. The residual value of the object, revealed in this subaccount, shall be written-off to account 91 "Other income and expenses".

2.1.12. Income and expenses related to retirement of fixed assets shall be reflected in accounting for the reporting period to which they relate and are accounted in income statement as operating income and expenses.

2.2. Accounting of intangible assets

2.2.1. Within intangible assets exclusive rights for results of intellectual activity being in compliance with Provision on accounting "Accounting of intangible assets" PBU 14/2000 are accounted.

2.2.2. Amortization and depreciation of intangible assets are charged by linear method of depreciation pro rata (on monthly basis) by carrying of historical cost to costs of production upon norms defined by NLMK itself on the assumption of their useful life.

2.2.3. Useful life of intangible fixed assets is calculated either on the assumption of term of patent, certificate or other limitation of intellectual property use according to the Russian Law or on the assumption of expected life of this object during which NLMK could gain profit (income), or on the assumption of products quantity or any other natural exponent of volume of work resulted from use of this object.

2.2.4. Norms of depreciation charges for intangibles fixed assets upon which it is impossible to define useful life are established in anticipation of twenty years (but not more than the period of company's activity).

2.2.5. Amortization and depreciation of intangible assets are reflected in accounting by accumulation of corresponding sums on account 05 "Amortization and depreciation of intangible assets" in that reporting Period, during which they took place.

2.2.6. In case of payment of acquired intangible assets by non-monetary means their value is taken for accounting on the assumption of price of products (works, services), handed over or subject to handing over by the company.

In case it is impossible to define the value of valuables handed over or subject to be handed over by the company, the value of the above mentioned intangible assets shall be calculated on the assumption of the value upon which similar intangible assets are acquired in comparable circumstances.

2.3. Accounting of financial investments

2.3.1. Accounting of financial investments is to be performed according to Provisions on accounting "Financial investments accounting" PBU 19/02.

2.3.2. A unit of financial investments accounting is:

a share – in shares accounting;

a bond – in bond accounting;

a share – in shares to stockholders' equity;

series, number – in certificates of deposits accounting;

an agreement – in accounting of loans, deposits, cession contracts and society in participation.

2.3.3. Debenture securities, upon which the current market value is not defined, are not revaluated within the period of circulation in case of difference between the sum of actual expenses and par value.

2.3.4. Financial investments, upon which the current market value is defined in the set order, shall be reflected at the reporting year end upon their current market value. In case of listing availability at several stocks, quotation of Stock Exchange RTS is to be considered as priority.

2.3.5. Estimation of debenture securities and loans granted assessment upon their discounted value shall not be performed.

2.3.6. Formation of provisions for devaluation of financial investments upon which no market value is defined shall be performed as of December 31 of the reporting year involving signs of devaluation.

2.3.7. Securities (shares, bonds), upon which no current market value is defined, shall be evaluated during retirement upon average historical costs.

2.3.8. Securities (with exception of shares, bonds), investments to stockholders' capitals of others organizations, deposits under agreement of society in participation, loans granted to other organizations, deposits in credit institutions, accounts receivable formed on the basis of assignments, shall be evaluated upon acquisitions costs of each unit of accounting upon its retirement.

2.3.9. In case of assets transfer to charter capital of the Company by non-monetary funds, difference between money evaluation of assets being transferred defined by an

independent appraiser or agreed by the parties and their residual value shall be reflected within other operating income (expenses).

2.3.10. In analytical accounting of state securities and securities of other organizations the following information shall be generated: Issuer's name, security name, number, series, par value, acquisition price, expenses related to securities acquisition, total number, acquisition date, selling date or any other retirement date, storage place.

2.3.11. Expenses related to acquisition of securities being less than five per cent of amount to be paid according to agreement to the Seller shall be recognized as other operating expenses.

2.3.12. Actual expenses on acquisition of financial investments shall be defined (increased or decreased) taking into account sum differences appearing before putting assets as financial investments on accounting.

2.3.13. Financial investments with maturity over a year and not being long-term investments at time of acquisition shall be accounted as short-term ones.

2.3.14. Interest income upon securities (bonds, deposit certificates, bills) is recognized at time of interest payment.

2.4. Accounting of investments into non-current assets

2.4.1. Accounting of non-current assets shall be performed according to Provisions on accounting "Accounting of agreements (contracts) on capital construction" PBU 2/94 and "Provision on accounting of long-term investments" approved by RF Ministry of Finance No. 160 dd. 30.12.1993 as well as by Provision on accounting "R&D expenses accounting" PBU 17/02.

2.4.2. Settlements between NLMK (Builder) and Contractor are performed on monthly basis according to agreement on construction and Certificate on value of works done (Form No. KC-3) prepared on the basis of Report on works done (Form KC-2) after step-by-step acceptance by the Builder of works done. Information on value of works done contained in Forms KC-2 and KC-3 is considered as basis for reflection of expenses related to construction of non-current assets on account 08 "Investments into non-current assets".

2.4.3. Expenses related to R&D the results of which will be used in production process or for management needs of the Company shall be accounted on account 08 "Investments into non-current assets" and shall be written-off in amount of actual expenses to account 04 "Intangible assets" in the month in which the R&D works implementation report is approved.

2.4.4. The Company's expenses on R&D the results of which are used in production process or for management needs shall be accounted in account 04 "Intangible assets" separately and shall be written-off to expenses on common activity by linear method within three years starting from the first day of a month following the month in which the R&D results start to be used.

2.5. Accounting of inventories

2.5.1. Accounting of inventories acquired subject to payment is performed upon supplier's invoice price with adding of a part of actual costs related to inventory purchasing generated during the period of formation of their value till the moment of posting to a specific nomenclature number.

A unit of inventory accounting shall be a nomenclature number.

2.5.2. A part of actual expenses on acquisition of materials generated after formation

of materials on the specific nomenclature number as well as sum differences shall be reflected (accounted) on account 16 "Deviations in inventory value".

2.5.3. Deviations accounted on account 16 "Deviations in inventory value" the specific weight of which does not exceed five per cent to invoice value shall be written-off in full on monthly basis to debit of accounts on which materials consumption is reflected pro rata value of purchased materials spent.

2.5.4. Value of inventories received gratis, inclusive of upon agreement of gift, shall be accounted as deferred income upon the market value with further attribution to financial performance as extra-sales income at the rate of costs attributed to production.

2.5.5. Actual value of inventories acquired under agreements which provide for payment by non-monetary means is calculated on the assumption of goods (valuables) value handed over or subject to be handed over by the company. The value of goods (valuables) handed over or subject to be handed over is defined on the assumption of the value upon which the company usually defined value of similar goods (valuables) in comparable circumstances.

2.5.6. Inventories arrived with no commercial invoices received yet from suppliers shall be debited from non-invoiced deliveries upon prices taken from contracts.

2.5.7. Inventories belonged to the company but being en route or handed over to a buyer in pledge shall be accounted upon evaluation, provided for in contract, with further adjustments of actual value.

2.5.8. While putting inventories into production or taking any other retirement, their evaluation shall be done upon an average price, which includes amount and value of inventories as of the reporting month beginning and all takings for the reporting month.

2.5.9. Property with value of not more than RUR 10000 for a unit with useful life of over 12 months as well as acquired books, brochures and other publications is accounted on account 10 "Materials" and written-off to costs of production as they are put into operations.

Analytical accounting of their movements is performed on off-balance account. To reflect real estate and property that transferred from category of low value assets uniformed forms No. МБ-2, МБ-4, МБ-7, МБ-8 are applied.

2.5.10. Evaluation of in-house waste products and co-products is performed upon prices approved by Division of Economics and Finance.

2.5.11. Evaluation of coke breeze and coke nuts produced while screening of metallurgical grade coke in blast furnaces shall be done upon their actual production costs of the previous month.

2.5.12. Parts, nodes and other materials collected during disassembling (dismounting) of repaired non-current assets, and suitable for further use as well as other materials are debited upon current market value in correspondence with account 91 "Other income".

2.5.13. Expenses on repair of parts, nodes, spares and other materials being in use shall be included into their value.

2.5.14. Travelling expenses over norms related to acquisition of materials are reflected in extra-sales expenses.

2.5.15. Value of containers received from suppliers and included into price of valuables shall be debited in correspondence with account 91 "Other income" upon price of possible use or sales in case of containers use or sales.

2.6. Accounting of goods

2.6.1. Goods for retail trade shall be evaluated upon selling (retailing) prices on account 42 "Mark up".

2.6.2. Accounting of expenses on provisions and transportation of goods from company's retailing warehouses to retail traders is performed within distribution costs on account 44 "Trade expenses".

Expenses on transportation shall be distributed between goods sold and goods balance as of the month end and shall be debited on account 90 "Sales".

2.6.3. A part of expenses for sale in OPC related to free of charge serving of milk and prophylactic nutrition to employees employed in positions with hazardous working conditions shall be included into production costs.

Sum of expenses shall be defined upon ratio which is calculated as quotient of dividing of total distribution costs by sum of retail and wholesale trade turnover (free of VAT and trade mark up) to be multiplied by value of milk and prophylactic nutrition served.

2.7. Accounting of costs of production and sales of products, works, services

2.7.1. Account 20 "Core production" is applied to account costs on production, where expenses of core and non-core production are accounted.

For calculation of costs of products (works, services) methods of calculation by production stand and by orders are applied.

2.7.2. The following expense items are established for accounting:

- raw materials and main materials;**
- purchased items, semi-finished products;**
- wastes (including carbon monoxide);**
- rejected products;**
- additional products;**
- auxiliary materials;**
- auxiliary materials for technology;**
- process fuel;**
- energy cost for technology;**
- remuneration of labour;**
- repair of fixed assets;**
- maintenance of fixed assets;**
- amortization and depreciation of fixed assets;**
- expenses of intracompany transportation of cargoes;**
- other expenses in a shop;**
- expenses on preparation and mastering of processes;**
- losses due to rejected products;**
- co-products;**
- construction in progress.**

2.7.3. General expenses shall be recognized in full in costs of sales for the reporting period as expenses on common activity.

2.7.4. Deferred expenses irrespective of their type are subject to attribution to corresponding accounts on monthly basis by equal portions in amounts based on contracts or the Company's calculations within the time to which they refer.

2.7.5. Expenses on voluntary property and personal insurance shall be included into cost of goods sold in that reporting period in which payment was effected according to the contract. If insurance fee was paid as nonrecurring amount according to the insurance contract, expenses are recognized equally within the insurance contract validity time when they are concluded for over one reporting period.

2.7.6. Expenses related to transportation of material resources (inclusive of handling) in the territory of the Company by vehicles and personnel of the Company are subject to inclusion into production stage expenses of corresponding subdivision.

2.7.7. Actual expenses related to all repairs of production fixed assets (current,

midterm, overhauls) are directly included into costs of products (works, services) upon their completion.

2.7.8. While calculating losses due to rejected products in case of negative yield in rolling, BOF shops, actual costs of products for the previous month are applied.

2.7.9. Losses due to rejected products revealed in rolling shops due to faults of BOF shops shall be attributed to BOF shops. Should rejected products be revealed on the first production stage, losses on rejection are calculated on the assumption of actual expenses on production stage for the previous month. Should rejected products be revealed at later production stages, losses on rejection are calculated upon actual production costs of the previous month less value of rejected products upon established prices. Calculation of losses due to rejected products shall be performed for each product mix of rejected products. For calculation of losses from rejected products in rolling shops packing value should be excluded.

2.7.10. Indirect expenses of main production shops are distributed according to specific character defined in industry-wise methodical recommendations on planning, accounting and calculation of production costs at steel-making companies.

2.7.11. Item "Labor remuneration in a shop" reflects labor remuneration of production personnel as well as expenses on labor remuneration of employees of servicing shops (shop repair personnel, etc.) and managers of a shop.

2.7.12. Expenses of labor remuneration of employees which couldn't be attributed to direct purpose should be distributed pro rata direct expenses on labor remuneration.

2.7.13. Amortization and depreciation of fixed assets of general application in rolling shops shall be distributed pro rata replacement value of main facilities at reporting period (year) beginning.

2.7.14. Items "Maintenance of non-current assets", "Other expenses in a shop", "Repair of non-current assets" for rolling shops, which cannot be attributed upon their direct assignment, shall be distributed pro rata wages and salaries attributed to a specific production facility.

2.7.15. Consumption of materials for manufacture of specific products in Cold Rolling Shop No. 5 shall be included into a separate item "Auxiliary materials".

2.7.16. Packing expenses in rolling shops shall be included into a separate line in item "Auxiliary materials".

As regards to product types packing expenses shall be distributed pro rata quantity of packed material.

2.7.17. Consumption of conservative oil in Cold Rolling Shop No. 4 shall be included into a separate item "Auxiliary materials for technology" and shall be attributed to a specific type of uncoated rolled products pro rata volumes of yield steel.

2.7.18. Consumption of lubricants for production of pickled steel in Hot Rolling Shop shall be distributed pro rata yield volume at corresponding center of calculation.

2.7.19. Iron vitriol and iron oxide formed during pickling in rolling shops shall be debited out of expenses decrease under item "Auxiliary materials".

2.7.20. General shop expenses shall be distributed pro rata salaries attributed to direct assignment besides coke division, shop of autospars, pipes and steel items, shop of repair preparation, shop of protective coatings, power division, shop of metallurgical slag processing whose expenses shall be distributed pro rata salaries and amortization.

2.7.21. Expenses on production stage shall be distributed between types of products pro rata output transferred to weight or any other units taking into account labor intensiveness ratio.

2.7.22. Construction in progress as of the end of reporting period on each production stage shall be evaluated by average value, summed up from construction in progress value as of the reporting period beginning and production costs for the

reporting period.

2.7.23. Construction in progress in case of order-wise method of calculation shall be evaluated upon actually incurred expenses.

2.7.24. Cost of structural products is formed on the assumption of actual expenses, inclusive of expenses related to registration of proprietary rights on real estate.

Expenses related to apartment sales shall be attributed to account 44 "Expenses on sales".

2.7.25. In construction expenses related to content of object being constructed shall be distributed upon construction sites pro rata estimates of works done at those sites.

2.7.26. Travelling expenses over norms related to production and sales of products, fulfillment of works and rendering of services shall be reflected within extra-sales expenses.

2.7.27. Expenses related to sales are recognized in full in costs of goods sold within the reporting period as expenses on common activity. Analytical accounting of trading expenses shall be maintained separately of products shipped to the domestic market, foreign countries, CIS countries.

2.8. Accounting of finished products (works, services)

2.8.1. Finished products are accounted upon actual production costs of each type of products. Finished export products are reflected separately in accounting.

2.8.2. Finished products shipped to customers and subdivisions of the company are accounted upon actual production costs which are defined for each type of products by multiplying quantity of products shipped by average costs of one ton (piece, etc.). Average costs are computed while dividing costs for specific type of product by quantity resulted correspondingly from production costs and residual quantity at the month beginning and output of products in the reporting month.

2.8.3. Production costs of products (works, services) the title for which transferred to buyers and the title for which did not transferred to buyers as of the end of reporting period shall be defined by direct calculation on the assumption of types of products and their actual costs separately for products shipped to the domestic market and export.

2.9. Accounting of sales proceeds

2.9.1. Sales proceeds shall be defined upon date of title transfer for the products, results of works done, services rendered (on onerous basis) on the basis of submitted shipping documents to buyers (customers).

2.9.2. Income from giving assets, rights from patents for innovations, industrial models and other types of intellectual property into temporary use, from stake in charter capitals of other organizations, interest received for granting loans and other income on securities not related to activity of the organization are related to operating income.

2.9.3. Translation of income expressed in foreign currency forming financial results from activity beyond the territory of the Russian Federation into rubles shall be done upon exchange rate of the RF Central Bank quoted on the corresponding date of operation in foreign currency.

2.10. Loans and Credit Facilities accounting

2.10.1. Amount of debt under loans or credit facilities received shall be accounted

according to the terms and conditions of contract of debt or of credit in sum of actually received cash or in value terms of other funds provided for by agreement.

2.10.2. Transfer of long-term arrears of loans and credit facilities received into short-term is done in the moment when 365 days or less are left before repayment of loans and credit facilities principal under contract of debt or of credit.

2.10.3. Expenses on loans and credit facilities received shall be recognized as income of the period in which they took place amounting to payments due under concluded contracts.

2.10.4. Additional expenses related to making loans and credit facilities, issuing and placement of borrowings include expenses referred to:

- rendering of legal and consulting services to borrower;*
- copying;*
- payment of taxes and duties (in cases provided for the acting legislation);*
- performance of technical appraisals;*
- use of communications;*
- other costs directly related to loans and credit facilities, placement of borrowings.*

Extra expenses related to loans and credit facilities receipt, placement of borrowings, shall be included in reporting period in which they incurred.

2.10.5. Discount on drawn bills and placed bonds is reflected within operating expenses without preliminary accounting on account "Deferred expenses".

2.10.6. Interest on loans granted is charged according to the procedure established in contract of debt.

2.11. Provisions for doubtful debt

2.11.1. Provisions on doubtful debts upon settlements with other organizations are charged every year on the basis of results of account receivable inventory with attribution of provisions onto operating expenses. Amount of provision shall be calculated separately upon each doubtful debt depending on financial position of debtor and evaluation of probability of debt repayment fully or partially.

2.11.2. During repayment of doubtful debt by debtor the provision formed shall be attributed to operating income.

2.11.3. Non-used amount of the provision shall be reconsidered annually and in case of necessity be carried forward.

CONTENTS

Introduction.....	5
I. Brief information on members of the Issuer's Management bodies, data on bank accounts, auditor, appraiser and financial adviser of the Issuer as well as on other persons who signed this quarterly report.	7
1.1. Members of the Issuer's Management Bodies.....	7
1.2. Information on the Issuer's bank accounts.	9
1.3. Information on auditor (auditors) of the Issuer.....	10
1.4. Information on appraiser.....	11
1.5. Information on the Issuer's advisers.....	12
1.6. Information on other persons who signed this Quarterly Report.	12
II. Main information on the Issuer's financial performance.....	13
2.1. Financial and economic indices of the Issuer's activity.....	13
2.2. The Issuer's market capitalization.	14
2.3. The Issuer's liabilities.	14
2.3.1. Accounts payable.	14
2.3.2. The Issuer's credit history.....	15
2.3.3. The Issuer's commitments on security to third parties.	15
2.3.4. Other commitments of the Issuer.	15
2.4. Purposes of issue and use of funds gathered from securities distribution.	15
2.5. Risks related to acquisition of distributed (being distributed) issuing securities..	16
2.5.1. Industry risks	16
2.5.2. Country and regional risks	20
2.5.3. Financial risks	20
2.5.4. Legal risks.....	21
2.5.5. Risks related to the Issuer's activity.....	23
III. Detail information on the Issuer.	23
3.1. History of the Issuer's Company.	23
3.1.1. Information on the Issuer's name.....	23
3.1.2. Information on state registration of the Issuer.	24
3.1.3. Information on foundation and development of the Issuer.....	24
3.1.4. Contact information.....	24
3.1.5. Taxpayer Identification Number	25
3.1.6. The Issuer's branches and representative offices.	25
3.2. The Issuer's core activity.....	25
3.2.1. The Issuer's industry.	25
3.2.2. The Issuer's main activity.	26
3.2.3. Main types of products (works, services).....	27
3.2.4. The Issuer's raw materials and suppliers.	28
3.2.5. The Issuer's sales (works, services) markets.....	32
3.2.6. Information on the Issuer's licenses.....	34
3.2.7. Joint activity of the Issuer.	44
3.2.8. Additional requirements to Issuers being stock investment funds or insurance companies.	44
3.2.9. Additional requirements to Issuers specialized on mining operations.....	44
3.2.10. Additional requirements to the Issuers the core activity of whom is communication services rendering.....	54
3.3. Plans for future activity	54
3.4. The Issuer's equity holding in industrial, bank and financial groups, holdings, concerns and associations.....	54
3.5. Subsidiaries and affiliated companies of the Issuer.....	54
3.6. Composition, structure and value of the Issuer's fixed assets, information on plans of acquisition, change, retirement of fixed assets as well as on all events of the Issuer's fixed assets charge.....	65
3.6.1. Fixed assets.	65

IV. Information on financial performance of the Issuer.....	68
4.1. Results of the Issuer's financial performance.	68
4.1.1. Income and losses.	68
4.1.2. Factors which influenced sales proceeds of the Issuer and income (losses) from the Issuer's operations.	69
4.2. The Issuer's liquidity.	70
4.3. Amount, structure of capital and current assets of the Issuer.	71
4.3.1. Amount and structure of the Issuer's capital and current assets.	71
4.3.2. The Issuer's financial investments	73
4.3.3. Intangible assets of the Issuer.	74
4.4. Information on policy and expenses of the Issuer in the area of technological progress, as regards to licenses and patents, new developments and investigations. ..	75
4.5. Analysis of trends in the Issuer's core activity.	76
V. Detail information on members of the Issuer's authorities, financial performance control bodies, brief data on employees of the Issuer.....	78
5.1. Information on structure and competence of the Issuer's authorities.	78
5.2. Information on members of the Issuer's authorities.	82
5.3. Information on remuneration, privileges and / or refund of charges to each Management body of the Issuer.	95
5.4. Information on structure and competence of controlling authorities over financial performance of the Issuer.	96
5.5. Information on members of controlling authorities over financial performance of the Issuer.	97
5.6. Information on bonuses, privileges and / or expenses reimbursement to each controlling body over financial performance of the Issuer.	100
5.7. Information on staff and generalized data on education and personnel (employees) of the Issuer, as well as on changes in personnel (employees) of the Issuer.	101
5.8. Information on any commitments of the Issuer to personnel (employees) related to possibility of their share interest in stockholders' capital (unit fund) of the Issuer. .	101
VI. Information on shareholders of the Issuer and interested party transaction made.	101
6.1. Information on total number of shareholders of the Issuer.	101
6.2. Information on shareholders of the Issuer having not less than 5 per cent of its stockholders' capital (unit fund) and not less than 5 per cent of its common stock as well as information on shareholders having not less than 20 per cent of its stockholders' capital (unit fund) or not less than 20 per cent of its common stock. ..	102
6.3. Information on the state stake or municipal share in stockholders' capital of the Issuer (unit fund) and availability of a special right ("golden share").	104
6.4. Information on limitations imposed on stake in chartered capital (unit fund) of the Issuer.	104
6.5. Information on changes in structure and shares of shareholders of the Issuer having not less than 5 per cent of its chartered capital (unit fund) or not less than 5 per cent of its common stock.	104
6.6. Information on interested party transactions made by the Issuer.	108
6.7. Information on amount of accounts receivable.	108
VII. Financial Statements of the Issuer and other financial information.....	109
7.1. Annual financial statements of the Issuer.	109
7.2. Quarterly financial statements of the Issuer for the last completed reporting quarter.	110
7.3. Consolidated Financial Statements of the Issuer for the last completed financial year.	110
7.4. Information on the Accounting policy of the Issuer	110
7.5. Information on total export as well as on share of export in total sales.	110
7.6. Information on material changes in the Issuer's property after the date of the complete financial year end.	111

7.7. Information on the Issuer participation in any legal procedures if this participation could have significantly affected his financial performance.....	111
VIII. Additional information on the Issuer and on issued securities placed by him.....	111
8.1. Additional information on the Issuer.....	111
8.1.1. Information on amount, structure of stockholders' capital (unit fund) of the Issuer.....	111
8.1.2. Information on changes in stockholders' capital amount (unit fund) of the Issuer.....	112
8.1.3. Information on generation and use of reserve fund as well as other Issuer's funds.....	112
8.1.4. Information on procedure of convocation and conduction of the Issuer's supreme management body meeting:.....	113
8.1.5. Information on profit-making organizations with the Issuer's holding of not less than 5 per cent of stockholders' equity (unit fund) or not less than 5 per cent of common stock.....	116
8.1.6. Information on material transactions of the Issuer.	119
8.2. Information on each category (type) of the Issuer's shares.	119
8.3. Information on previous issues of the Issuer's securities except the Issuer's shares.	120
8.3.1. Information on issues the securities of which are repaid (cancelled).....	120
8.3.2. Information on issues the securities of which are still in circulation.....	120
8.3.3. Information on default issues.....	120
8.4. Information on a person (persons), presenting (having presented) security for bond issue.....	121
8.5. Conditions of security of the Issuer's obligations in respect of bond issue.....	121
8.6. Information on organizations which register securities of the Issuer.	121
8.7. Information on legislative acts regulating import and export of capital, which could affect payment of dividends, interest and other payments to non-residents....	121
8.8. Description of income taxation procedures regarding placed and being placed Issuer's securities.	121
8.9. Information on announced (accrued) and paid dividends as well as return on the Issuer's bonds.....	123
8.10. Other information.....	125
APPENDIX to clause 5.4 "Information on structure and competence of the Issuer's management bodies".....	127
APPENDIX to clause 7.2. "Quarterly financial statements of the Issuer for the last complete reporting quarter".....	135

E-mail: *info@nlmk.ru*

d) Web-site where this Quarterly Report is published:

www.nlmk.ru/rus/index/quarterindex.php3

e) Information on the Issuer's securities distributed:

Type: *shares (registered)*
Category: *common stock*
Form of securities: *undocumentary*
Number of securities distributed: *5 993 227 240*
Par value (ruble): *1*

f) Other information:

There is no other information.

The present quarterly report contains appraisal and forecasts made by the Issuer's authorized management bodies related to future events and / or actions, outlook of steel industry development and results of the Issuer's performance inclusive of the Issuer's plans, probability of certain events and doings occurrence. Investors shall not fully rely on appraisals and forecasts made by the Issuer's management bodies as actual performance data in the future can differ from forecast ones due to many reasons. Acquisition of the Issuer's securities depends on risks described in the present Quarterly Report.

Financial information included in the present quarterly report is based on the Issuer's accounting statements compiled in accordance with Russian rules, and therefore, some discrepancy with the statements compiled as per international standards is possible.

In compiling the present quarterly report the Issuer followed solely the rules and regulation applied in the Russian Federation.

I. Brief information on members of the Issuer's Management bodies, data on bank accounts, auditor, appraiser and financial adviser of the Issuer as well as on other persons who signed this quarterly report.

1.1. Members of the Issuer's Management Bodies.

The Issuer's Management bodies:

- a) The General Shareholders' Meeting;*
- b) The Board of Directors;*
- e) Collective executive body – the Management;*
- e) Single executive body – General Director.*

Members of the Issuer's Board of Directors are:

Oleg V. Bagrin

Year of birth: 1974

Nikolay A. Gagarin

Year of birth: 1950

Dmitry A. Gindin

Year of birth: 1946

Oleg V. Kiselev

Year of birth: 1953

Vladimir S. Lisin

Year of birth: 1956

Nikolay P. Lyakishev

Year of birth: 1929

Randolf Reynolds

Year of birth: 1941

Vladimir N. Skorokhodov

Year of birth: 1951

Igor P. Fyodorov

Year of birth: 1966

Members of Management are:

Galina A. Aglyamova

Year of birth: 1961

Igor N. Anisimov

Year of birth: 1965

Vyacheslav I. Vorotnikov

Year of birth: 1954

Pavel P. Gorodilov

Year of birth: 1957

Anatoly N. Koryshev

Year of birth: 1944

Alexander I. Kravchenko

Year of birth: 1955

Sergey P. Melnik

Year of birth: 1961

Vladimir P. Nastich

Year of birth: 1953

Sergey V. Perekatov

Year of birth: 1959

Sergey A. Rakitin

Year of birth: 1954

Vladislav A. Smirnov

Year of birth: 1949

Alexander A. Sokolov

Year of birth: 1961

Vladimir A. Tretyakov

Year of birth: 1960

Viktor V. Hripunkov

Year of birth: 1960

Stanislav E. Tsyrlin

Year of birth: 1968

The Issuer's Director General is:

Vladimir P. Nastich

Year of birth: 1953

1.2. Information on the Issuer's bank accounts.

Information on NLMK's main bank accounts as of 30.09.2005

1.3. Information on auditor (auditors) of the Issuer.

An Auditor who renders services on independent auditing of accounting and financial statements having been prepared under the legal requirements of the Russian Federation as well as of consolidated financial statements prepared under US GAAP:

Full name: *Closed joint-stock company «PricewaterhouseCoopersAudit»*

Abbreviated name: *OJSC «PricewaterhouseCoopersAudit»*

Domicile: *Bldg 5, 52, Kosmodamianskaya naberezhnaya 115054 Moscow Russia*

Tel: *(095)-967-60-00*

Fax: *(095)-967-60-01*

E-mail: [*webmaster@pwc.com*](mailto:webmaster@pwc.com)

Auditor's license data:

License No: *E000376*

Issue date: *20.05.2002*

Validity: *within 5 years*

Licenser: *the Finance Ministry of the RF*

The Financial Statements for the following financial years have been audited by the auditor:

- Auditing of the Issuer's consolidated financial statements prepared under US GAAP: 2003, 2004, 2005.*
- Auditing of individual financial statements compiled under the requirements of the RF legislation: 2005.*

Factors that could affect Auditor's independence from the Issuer and information on any material interests which bind Auditor (Auditor's officers) with the Issuer (the Issuer's

officers):

There are no factors that could affect Auditor's independence from the Issuer or interests which bind Auditor (Auditor's officers) with the Issuer (the Issuer's officers), in particular:

- *Auditor (Auditor's officers) does not have any share in the Issuer's stockholder capital;*
- *the Issuer did not grant any loans to Auditor (Auditor's officers);*
- *there are no close partnership (promotion of the Issuer's products (services), joint ventures, etc.), as well as kinship;*
- *there are no Issuer's officers being simultaneously Auditor's officers.*

Procedure of Auditor appointment:

An Auditor is appointed by the General Shareholders' Meeting upon presentation of the Board of Directors. Preparation of recommendations on the Company's Auditor for the Board of Directors is effected by the Commission on Auditing. Tender related to Auditor selection can be provided for. The main tender rules on the Company's Auditor appointment, in case such is held, are determined by the Commission on Auditing.

Information on projects executed by Auditor within special auditorial tasks:

Auditor did not execute any projects apart of his direct functions.

Procedure of Auditor fee definition:

The Company's Board of Directors shall define fee for Auditor's services and any other essential conditions of agreement.

Information on deferred and late payments for services rendered by Auditor:

There are no deferred and late payments for services rendered by Auditor.

1.4. Information on appraiser.

The Issuer did not enlist services of an Appraiser (Appraisers) regarding securities issue, information on which is presented in this Quarterly Report.

Information on appraiser being involved by NLMK for fixed assets revaluation as of 01.01.2000:

Full name: *Closed joint-stock company «Center of professional appraisals»*

Abbreviated name: *CJSC «Center of professional appraisals»*

Domicile *49, Leningradsky prospekt 125468 Moscow Russia*

Tel: *(095)-943-95-40*

Fax: *(095)-943-93-28*

E-mail: *no data*

Data on appraiser's license:

License No.: *series IJICC Registration No. 000004 code OI*

Issue date: *June 30, 1999.*

Validity: *June 30, 2000.*

Licenser: *Licensing Chamber with Moscow Government*

Information on services rendered by the appraiser: *appraisal of fixed assets full replacement cost has been performed as of 01.01.2000*

1.5. Information on the Issuer's advisers.

Financial adviser who renders consulting services in securities market:

Full name: *Closed joint-stock company "Renaissance Capital"*

Abbreviated name: *CJSC "Renaissance Capital"*

Domicile: *4th floor, Usadba Centr 22, Voznesensky pereulok Moscow 125009, Russia*

Tel: *(095)-258-77-77*

Fax: *(095)-258-77-78*

Web-site in Internet where the financial adviser discloses information on the Issuer:
www.rencap.com

Data on licenses of professional activity in securities market:

License of securities market participant for brokerage

License No.: *177-05370-100000*

Issue date: *July 12, 2001*

Validity: *unlimited*

Licenser: *Federal Committee on securities market*

License of securities market participant for dealer activity

License No.: *177-05386-010000*

Issue date: *July 12, 2001*

Validity: *unlimited*

Licenser: *Federal Committee on securities market*

Services rendered (having been rendered) by the Adviser:

- *assistance to the Issuer in preparation of securities offering circular;*
- *verification of authenticity and completeness of all information from Securities Offering Circular, with exception of the audited one;*
- *attestation of Securities Offering Circular as well as documentation that might deem necessary for the Issuer in order to arrange circulation of shares with traders;*
- *consultations on issues related to preparation of Securities Offering Circular, any other documentation pertained to arrangement of shares circulation and the Issuer going through listing procedure;*
- *consultations on issues related to disclosure by the Issuer of information in securities market and monitoring over discharge by the Issuer of his liabilities pertaining to disclosure of information in securities market according to requirements of Federal authority on securities market.*

1.6. Information on other persons who signed this Quarterly Report.

There are no such persons.

II. Main information on the Issuer's financial performance.

2.1. Financial and economic indices of the Issuer's activity.

<i>Indice name</i>	<i>As of 30.06.2005 .</i>	<i>As of 30.09.2005.</i>
<i>Net assets value, thousand rubles</i>	<i>121 569 853</i>	<i>128 040 242</i>
<i>Relation of debt capital to capital and reserves, %</i>	<i>11,2%</i>	<i>6,6%</i>
<i>Relation of short-term liabilities to capital and reserves, %</i>	<i>10,2%</i>	<i>5,8%</i>
<i>Cover of payments of debt service (coefficient)</i>	<i>-*</i>	<i>-*</i>
<i>Late debts level, %</i>	<i>0,3%</i>	<i>0,7%</i>
<i>Dividend share in the profit, %</i>	<i>21,6%**</i>	<i>-</i>
	<i>II q. 2005</i>	<i>III q. 2005</i>
<i>Turnover of accounts payable (times per year)</i>	<i>1,63</i>	<i>1,70</i>
<i>Productivity of labour, thousand rubles per person</i>	<i>760,2</i>	<i>697,3</i>
<i>Depreciation to proceeds volume, %</i>	<i>1,7%</i>	<i>1,9%</i>

* as of 30.09.2005 NLMK had no loans and credits

** The indices have been calculated as a result of the complete 2004 after approval of the annual dividend amount (taking into account the interim dividend for 9 months of 2004) by NLMK's General Shareholders' Meeting.

For calculation of the a/m indices methods recommended by the Provision on information disclosure by Issuers of securities approved by Resolution Nr. 05-5/nз-н dd. March 16, 2005 of Federal Committee of Central Bank.

Analysis of the a/m indices movement attests the stable financial state and solvency of the Issuer in view of stable net assets growth, low level of the Issuer's dependence on loan funds.

Net assets amount as of 30.09.2005 increased by 5.3% as compared to the respective indice as of 30.06.2005, which is primarily accounted for by the decrease

in the Issuer's liabilities (payment of dividends for 2004). Monetary funds and short-term financial investments as well as construction in progress and advance payments issued for non-current assets increase occurred simultaneously.

Net assets value exceeds the amount of the Company's equity (by 21.4 fold), which is an important indice of the Issuer's stable financial status.

As of 30.09.2005 the indice "relation of debt funds to capital and reserves" decreased by 4.6 % regarding the level of 30.06.2005 and accounted for 6.6%. In the structure of the Issuer's debt funds the largest share is taken by short-term liabilities. Thus, the indice "relation of debt funds to capital and reserves" changed in the same way as the previous one (decrease by 4.4%).

The level of these indices attests to NLMK's low dependence on loan funds.

Accounts receivable turnover

In Q III, 2005 accounts receivable turnover ratio (including long-term accounts receivable) increased slightly regarding Q II and accounted for 1.70. It was caused by the decrease in the average amount of accounts receivable (-11.9%) at a higher rate than sales proceeds decrease (-8%).

Decrease in sales proceeds in Q III, 2005 (-8%) regarding Q II, 2005 caused a decrease in labour productivity by 8.3%.

Depreciation to proceeds ratio

In Q III the indice of depreciation to proceeds ratio increased slightly regarding Q III (from 1.7% to 1.9%), which is accounted for by sales proceeds decrease by 8%.

2.2. The Issuer's market capitalization.

The Issuer's total shares outstanding – 5 993 227 240.

Starting from November 23, 2004 common stock of NLMK listed on "OAO RTS Exchange Market"(ticker symbol - NLMKG).

The value of NLMK capitalization calculated on the basis of the Exchange data as of 30.09.2005 amounted to 197 954 258 040.

Starting from January 14, 2005 NLMK's common stock (ticker symbol – NLMK) was included into quotation list "B" of Securities List ("Classical shares market") admitted to trading at NP "RTS Stock Exchange".

The value of NLMK capitalization calculated on the basis of the Partnership data as of 30.09.2005 amounted to 7 028 137 720 USD (determined upon RTS data on the price of shares traded at the Exchange and calculated according to Russian Central Bank Financial Committee (FKZB) Decree Nr. 05-5/n3-n dd. March 16, 2003 "On approval of the provision on information disclosure by securities issuers").

It should be noted that information on indicative quoting of the Issuer's common stock starting from November 5, 2004 to January 28, 2005 is reflected in «RTS Board» (ticker symbol – nlmk), as these data are not official quotations of securities, they cannot be used for calculation of market capitalization of the Company.

2.3. The Issuer's liabilities.

2.3.1. Accounts payable.

The total of NLMK's accounts payable as of 30.09.2005 amounts to 7 347 301 thousand rubles, including overdue – 62 027 thousand rubles.

The structure of NLMK's accounts payable as of 30.09.2005

<i>Liabilities</i>	<i>Maturity date</i>		<i>rubles</i>
	<i>To one year</i>	<i>Over one year</i>	
<i>Accounts payable to suppliers and contractors</i>	2 239 733 752	–	
<i>inclusive: overdue</i>	61 369 219	–	
<i>Salaries and wages</i>	268 828 573	–	
<i>inclusive: overdue</i>	–	–	
<i>Arrears to the budget and extra-budget funds</i>	866 744 501	–	
<i>inclusive: overdue</i>	–	–	
<i>Credits</i>	–	–	
<i>inclusive: overdue</i>	–	–	
<i>Loans, total</i>	–	–	
<i>inclusive: overdue</i>	–	–	
<i>inclusive: bonded loans</i>	–	–	
<i>inclusive: overdue bonded loans</i>	–	–	
<i>Other accounts payable</i>	3 966 779 682	–	5 214
<i>inclusive: overdue</i>	657 986	–	
<i>Total</i>	7 342 086 508	–	5 214
<i>inclusive: total overdue</i>	62 027 205	–	

NLMK's accounts payable for the last complete five financial years and as of 30.09.2005 do not incorporate creditors whose share amounts to not less than 10 per cent of the total accounts payable.

Overdue accounts payable as of the reporting year end represents accounts payable to certain contractors which arose in the course of commercial relations and was being repaid within the terms agreed by the parties.

The risk of imposing of fines and sanctions as well as interest on default obligations is estimated as low by the Issuer.

2.3.2. The Issuer's credit history.

Over the last 5 complete financial years and as of the reporting quarter end credit facilities agreements were not entered. Borrowings were not taken.

2.3.3. The Issuer's commitments on security to third parties.

There were no liabilities for security to third parties in the reporting quarter inclusive of guarantee or pawn.

2.3.4. Other commitments of the Issuer.

There were no other commitments of the Issuer as of the date of reporting quarter end.

2.4. Purposes of issue and use of funds gathered from securities distribution.

The Company did not issue any securities distributed by subscription since the date of its registration. So the Company did not attract funds by distribution of securities.

2.5. Risks related to acquisition of distributed (being distributed) issuing securities.

Acquisition of NLMK's securities entails certain risks which could result in losses for shareholders. Negative impact on the Issuer's main activity and financial performance can be produced by the following risks:

- *industry risk;*
- *country and regional risks;*
- *financial risks;*
- *legal risks; and*
- *risks related to the Issuer's activity.*

2.5.1. Industry risks

NLMK actively operates in domestic and international markets as a producer and seller of the diversified metal products mix. The situation in the industry can worsen due to worsening of situation both in raw materials purchasing markets and steel products sales markets.

Industry risks at raw materials markets

NLMK is one of the major consumers of the main steelmaking raw materials at the domestic raw materials market. Raw materials supplies are subject to risks formed depending on the peculiarities and specific features formed in every segment of the raw materials market.

The main risks pertaining to the supplies of the main steelmaking raw materials incorporate:

- *The risk of increase of the prices for the raw materials being purchased caused by deterioration of the market conditions of this market segment, increase in the raw materials deficit in the domestic market as well as a result of increase in the delivery tariffs of natural monopolies.*
- *The risk of breach of obligations on the composition and quality of the raw materials being purchased on the part of raw materials suppliers.*
- *The risk of breach of obligations on delivery timeliness including the complete disruption of delivery on the part of raw materials suppliers.*

To minimize the risks of drastic prices fluctuations at the domestic raw materials market the Issuer is conducting operational monitoring of the major operators of this market segment, is concluding contracts with the prices and volumes agreed for a certain period, fixed payment schedules, is attracting alternative suppliers including importers.

To minimize the risks of increase in the tariffs of natural monopolies on the raw materials transportation the Issuer attracts alternative transport and forwarding firms.

To minimize the risks of breach of obligations on the part of suppliers regarding the composition and quality of the raw materials being purchased the Issuer concludes contracts for delivery with the suppliers being long-time partners who have gone through the procedure of appraisal and approval in accordance with the current NLMK's Quality Management Systems certified under ISO 9001. Penalties for breach of quality of the raw materials to be delivered are included in contracts with suppliers.

To minimize the impact of the risks of partial or complete disruption of deliveries the Issuer makes up the sound insurance stock of the main kinds of raw materials which enables to ensure the production cycle continuity. The delivery of the main material resources is effected as per the agreed schedules ensuring smooth delivery for a continuous finished products production process. The Company has entered into agreements with several suppliers for the delivery of one kind of material resources. Penalties for the breach of delivery terms and qualitative features of the raw materials are included in agreements with suppliers.

Risks at the coal concentrate and coke markets.

Over the reporting period the coal concentrate and coke market has been characterized by the excess of supply due to the recession at the world steel market. This fact has decreased the impact of the risk of prices change caused by adverse market conditions and coking coals deficit.

Risks at iron ore markets

The risks pertaining to iron ore markets over the reporting period are the same as the risks of coal concentrate and coke market. However the influence of the risks of prices increase, deficit, fluctuations of composition and quality as well as breach of obligations regarding iron ore supply on iron ore raw materials is slightly reduced due to supply of this material from the Company's subsidiaries providing about 90% of the Company's need in iron ore.

Risks at scrap markets

The main risk of the domestic scrap market which has influenced the Company over the reporting period apart from prices increase under the influence of export price is the risk of fluctuation of smoothness and the amount of supplied scrap caused by the seasonal factor. To minimize this risk the Company establishes a sound autumn-winter stock of this material ensuring the continuity of production cycle in case of deliveries hold-up.

Risks at ferroalloys markets

Over the reporting period besides the main risks of the ferroalloys market the Company has been influenced by the risk of unstable political situation in the Ukraine where the main producers of ferroalloys being purchased are located. To minimize the influence of this risk the Company is expanding the sources of ferroalloys supplies within the RF territory. In particular, in September 2005 ferroalloys produced by LLC "Alapaevsky Iron and Steel Works" were supplied.

Industry risks at sales markets

The risks at the foreign markets related to the possible changes of prices for the Issuer's products and their influence on the Issuer's activity and fulfillment of its securities obligations.

Macroeconomic risks

The forecast rates of economic growth for 2005 indicate not quite favourable outlook of metal-consuming industries in the main ferrous metals consuming regions: the world real GDP growth is anticipated to be at the level of 4.4% against 5.0% in 2004, industrial production growth will account to 5.0% against 6.6% in 2004.

After the record growth of the world consumption of finished products produced from ferrous metals by 9.2% in 2004 regarding the level of 2003 and the respective increase in steel production at the beginning of 2005 at several major world markets the conditions for

reduction of finished steel products consumption have been created: economic growth rates in the EC countries and Japan turned out to be slower than expected. The central government of the Chinese People's Republic is continuing to take measures of macroeconomic regulation aimed at containing investments in steelmaking and construction industries.

As a result finished steel products consumption in 2005 in the world except the Chinese People's Republic can decrease by 0.2%. Besides, the third quarter is associated with the seasonal recession of finished steel products consumption during the period of mass leaves (in July- August) in industrial production.

The a/m factors produced a descending influence on the prices of the Issuer's products.

Change of supply and demand ratio at the world market of ferrous metals

Consumption decrease resulted in accumulation of excess stock at the key distribution chain stages: from trade companies to ultimate consumers. Thus, depending on the country and region the volume of steel products stock in the first quarter of 2005 exceeded the last year indice by 17-25%. In the second and third quarters of 2005 a significant order volume decrease (and prices respectively) was marked at all major world ferrous metals markets. Trying to restore the balance of supply and demand to the level of the second half of 2004 a number of European companies (Arcelor, ThyssenKrupp Stahl, Corus, Salzgitter, Riva, Rautarukki) primarily reduced the output of finished flats. A number of American steelmaking companies (Mittal Steel divisions, U.S. Steel) selectively stopped their production facilities for prescheduled repairs. As a result steel production in the second half of 2005 will decrease by 3.5% regarding the same period of 2004 (against the growth by 7.6% in the first half year).

Steel production in the EC countries in January-September 2005 decreased by 4.2% regarding the same period of 2004, in the USA – by 6.2%.

By the end of July prices recession slowed down, at a number of markets (Europe, the Chinese People's Republic, USA) stabilization of prices was marked. In the third quarter of the current year at the US markets stabilization gave place to moderate growth. In October a number of European companies announced prices increase starting from November. market stagnation at the Chinese People's Republic influenced the whole Asian region where the recession continued in the third quarter.

Stock liquidation, economic reactivation after the leaves period and production reduction can facilitate supply restriction at the world market and formation of assumptions for starting the increase in prices in the fourth quarter of 2005 and in the first quarter of 2006. It can produce an ascending influence on the Issuer's prices in the short-term outlook.

Industry structure changes

As a result of consolidation processes conducted in the world ferrous metallurgy in 1999-2004 the degree of production concentration increased: while in 2000 20 major enterprises produced 33.7% of the world steel output, in 2004 they produced 38.7%.

Consolidation processes will continue in 2005 and 2006. China can be especially active here: the government intends to make two companies of annual capacity of not less than 30 mln. tpy each leaders of the industry.

Industry mergers and takeovers reinforced steelmakers' position by narrowing the competition and have a positive influence on prices for the Issuer's products.

Growth of investments in the fixed assets

Favourable market conditions of the world ferrous metals market in 2002-2004 and increase in profit of steelmaking companies stimulated investments in new steelmaking facilities. China is the leader in the growth rate of new steelmaking capacities: in 2003 it increased its capacities regarding 2002 by 20.1% while the rest of the world – by 2.7%. In 2005 China will increase its steelmaking capacities by 16.3% regarding 2004 while other

countries – by 5.1%. In the first half of 2005 alone China put in operation 40 new CCM, total capacity of 28 mln. tpy.

This factor facilitates the increase in steel supply at the global market. It can produce a depressive influence on the price for the Issuer's products at foreign markets especially in the long-term outlook.

Aggravating competition of steelmakers from developing countries

Increase in production capacities in case of limited domestic demand creates conditions for the growth of steel products export by such countries as China, India, Brazil. In the first half of 2005 Chinese export amounted to 11.6 mln. tons of steel products, which is 154% higher than the level of the same period of 2004. In the current year the aggregate volume of export from China is estimated to be 24 mln. tons against 10 mln. tons in 2004 and 6 mln. tons in 2003.

Taking into account low costs and a vast raw materials base (in Brazil and India) products originating from these countries can immediately compete with the Issuer's products at the global markets, which can restrict its possibilities of increasing the products prices in the medium-term and long-term outlook.

Transportation risks

Shipping rates for international sea shipping decrease in April 2005 under the influence of decreasing iron ore shipping volumes in China and a large number of new ships. By the beginning of the fourth quarter of 2005 a slight seasonal shipping cost increase can be brought about by activation of utilities shipping before the beginning of winter and by the start of new harvest grain-crops transportation in Northern hemisphere.

Shipping rates increase causes the price for ultimate consumption goods to increase as well and under certain conditions (high level of stock, industrial production recession) can negatively influence the prices for steel products.

Risks at the domestic market related to the possible change of prices for the Issuer's products and their influence on the Issuer's activity and fulfillment of obligations on securities.

Russian iron and steel industry is an export-oriented industry: the RF steelmaking capacities significantly exceed the needs of the domestic market. As a rule, the growth of domestic market prices facilitates the increase in exports of Russian plants, which leads to a decrease in flats supply at the domestic market and growth of domestic prices for it. On the contrary, if foreign market conditions worsen steel products shipment to the domestic market increases and in a number of cases and prices for it decrease.

Thus, prices dynamics at the domestic market will be primarily determined by the change of global prices. It should be noted, however, that under the conditions of relatively high development rates of Russian economy demand for steel products will remain stable. Domestic market share in steel products consumption is likely to increase thus slowing down the landslide of prices at the foreign market in the near future. It is indirectly confirmed by the fact that the current domestic prices for steel products often exceed export ones. In the medium-term outlook (5-7 years), however, this situation may change: the level and dynamics of domestic market prices will be closer to the changes being underway in the world. The forecast growth of import shipments share in the RF consumption will increase the price pressure of the global market conditions on the domestic market. As a result we can forecast to a high degree of probability that by 2010 the dependence of domestic market prices on the global prices will increase. Russia's joining the World Trade Organization will also speed up adjustment of domestic and foreign market prices.

2.5.2. Country and regional risks

NLMK is an export-oriented Company. In the first half of 2005 the main export regions which bring 10% and more of sales proceeds are as follows: Russia, South-East Asia, the EC countries, other European countries and Turkey.

In case of negative situation in some regions NLMK possesses vast possibilities of re-orienting its products to more attractive markets and minimization of possible financial damages.

The main industrial activity of the Issuer is pursued within the Russian Federation. The activity of metal products manufacturing and exporting in Russia entails a number of risks.

Political risks

The political system of Russia is in the stage of formation and constant restructuring, that is why it is not stable yet, which causes the following risks for NLMK:

- possibility of foreign and domestic policy change can fundamentally affect the investment attractiveness of the country as a whole and NLMK in particular;*
- possibility of negative legislation alteration, inclusive of tax legislation, aimed at budget receipts maximization from export-oriented industries.*

Economic risks

Russian economy is poorly diversified and essentially dependent upon world prices on raw materials, oil and gas in the first place. Continuous and significant landslide of world prices for raw materials can lead to proceeds decrease of raw materials companies. It, in its turn, can further entail economic recession of the Russian economy, which will undoubtedly affect the Issuer's activity.

In order to minimize the economic and financial risks NLMK tries to diversify its funding sources, expands its sales geography and product mix.

2.5.3. Financial risks

Being an export-oriented company, NLMK confronts currency risks, as well as interest escalation risks which can fundamentally affect its financial performance.

Currency risks

Taking into account the situation at the world financial markets in the previous years, NLMK's export program is framed with regard to possible (forecast) dynamics of the main currencies. Actions are taken to diversify export proceeds currency structure.

Provisions are made for proportional distribution of payments on long-term import contracts and use of letters of credit for settlements with receipt of interest income from placing these operations cover in deposits.

Since the major part of NLMK's expenses are in rubles, there is risk of business profitability reduction due to considerable ruble exchange rate fluctuations with respect to

foreign currency. In order to minimize these risks, the Company takes the following measures:

- *concluding agreements with banks for conducting sales of large foreign currency amounts for rubles at a fixed rate of exchange with minimal commission;*
- *allocation of temporarily surplus foreign currency and ruble funds which allows to reduce dependency on exchange rate fluctuations and maintain profitability.*

In the reporting period the currency risks hedging with forward contract application, options were not effected due to the following reasons:

- *absence of legislation which regulates this kind of transactions;*
- *divergence of the world's leading experts' forecasts concerning perspectives of foreign currency rates with respect to US dollar.*

Interest escalation risk

NLMK may act as borrower both in the international and domestic capital markets. The Company may use borrowed funds for current activity financing and for investment projects.

On the other hand, NLMK's high solvency appear to be important factors of borrowings value decrease for the Company in the future.

Risk of liquidity deterioration

At NLMK liquidity risk is closely associated with cash inflow under settlements for products. In order to minimize this risk, the schedule of incoming and outgoing cashflows is carefully planned to identify any possible deficit in financial resources. The ratio of the Company's highly liquid assets to liabilities attests to high solvency and a correspondingly low liquidity risk.

2.5.4. Legal risks

Risks related to currency regulation changes

The new law "On currency regulation and control" dd. 10.12.2003 Nr. 173-F3 (took effect 17.06.2004 with the exception of separate provisions for which another effective term is established) (hereinafter – "New law on currency regulation") provides for reservation necessity by residents of the RF currency monetary funds on a separate account in an authorized bank prior to effecting a number of currency transactions defined by the present law, which will induce outflow of monetary funds for reservation purposes and their temporary exclusion from the Company's current settlements. It can hinder fulfillment of the Company's obligations upon agreements with contractors.

Risks related to tax legislation alteration

Income tax

As per federal law No. 58-Φ3 "On entering changes to the second part of the RF Tax Code and some other legislative acts of the RF on taxes and fees" dd. 06.06.2005 a number of changes have been introduced in chapter 25 of "Income tax" which can produce an impact on the amount of NLMK's tax liabilities.

Changes that have produced a negative impact on NLMK's performance:

Starting from 01.01.2006 a new cost type is introduced in Article 254 of the RF Tax Code: inventories value represented by surpluses revealed during stock-taking and/or by the property left after fixed assets dismantling or putting out of operation. It is defined as the tax amount calculated on the basis of income envisaged by clauses 13 and 20, Article 250 of the RF Tax Code (clause 2, Article 254 of the RF Tax Code in the revision of Law No. 58-Φ3).

The estimated annual tax increase can amount to 150 mln. rubles.

VAT

As per federal laws No. 117-Φ3, 118-Φ3, 119-Φ3 dd. 22.07.2005 starting from 01.01.2006 a number of changes were introduced in Chapter 21 of the RF Tax Code "VAT" which can influence the amount of NLMK's tax liabilities.

Changes that have produced a negative impact on NLMK's performance:

- 1) NLMK loses the right to choose its tax base determination as determination method "by payment size" has been cancelled. Now shipping date is taken as the moment of tax base determination. (Article 167 of Tax Code)*
- 2) VAT amounts for deduction are subject to restitution in case of transference of property as an investment in charter capital as well as in case of usage in operations which envisage reference of tax amounts to production costs (Article 170 of the RF Tax Code).*

Risks related to changes in demands on licensing the Issuer's main activity

As per federal law No. 80-Φ3 "On entering changes into the Federal Law "On licensing separate kinds of activity", Federal Law "On protection of the rights of legal persons and individual entrepreneurs during conduction of state control (supervision)" and the RF Code of administrative offenses" dd. 02.07.2005 a number of changes has been introduced in the legislative acts regulating licensing issues. The list of activities subject to licensing has been reduced significantly.

The a/m legislation changes will not produce a negative impact on NLMK's performance and will not incur any legal risks related to NLMK's activity.

Risks related to alteration of judicial practice on the issues related to the Issuer's activity

As per Article 113 of the RF Tax Code limitation period of penalties for tax offenses is three years. Upon the request of the Federal Tax Service it has been inspected if this regulation complies with the Constitution as well as if any exceptions from this rule for individual taxpayers declared careless are possible. On 14.07.2005 the Constitutional Court confirmed the lawfulness of the disputed Article of the Code by Decree No. 9-II. At that the Constitutional Court has decided that in case a taxpayer counteracts the inspection activity of tax authorities the court may ignore the prohibition of impleading the Company after expiration of the three-year period of limitation.

In the Russian legislation, however, there is no term "counteraction", therefore this definition can be applied to any situation.

In judicial practice regulating legal relationship in licensing there were no changes, which could produce a negative impact on the Company's performance.

The Company hasn't been involved in legal procedures which could produce a negative impact on the Company's licensing performance.

There are no risks related to prolongation of the Issuer's license for a particular kind of activity or for use of facilities whose number in circulation is limited.

2.5.5. Risks related to the Issuer's activity

For the last three years and now NLMK has not been participating in any legal procedures in which plaintiffs' claims are significant (more than 5% of the Issuer's assets book value).

The main part of the Issuer's licenses on activities important for the Issuer is valid till 2006 and further on. Risk related to failure to prolong these licenses is extremely low.

Subsidiaries and affiliated companies of NLMK are liable for their financial performance and risk management.

III. Detail information on the Issuer.

3.1. History of the Issuer's Company.

3.1.1. Information on the Issuer's name.

Full name of the Issuer.

*Открытое акционерное общество "Новолипецкий металлургический комбинат"
Open Joint-stock Company "Novolipetsk Steel"*

Abbreviated name.

*ОАО "НЛМК"
NLMK*

The Company has the right for trade mark "STINOL" registered as stated by the Russian Law (information on trade mark registration is given in clause 4.4. of the present report).

Information on changes in the Issuer's name.

1. The Yu.V. Andropov Novolipetsk Iron & Steel Works honored with the Lenin Order and the October Revolution Order

NLMK

Introduced on: *14.03.1984*

Basis for changes: *Decree of the Central Commission of the KPSS, Presidium of the Supreme Soviet of the USSR and Council of Ministers of the USSR «On perpetuation the memory of Yury V. Andropov».*

2. Novolipetsk Iron & Steel Corporation

NLMK

Introduced on: *28.01.1993*

Basis for changes: *Decision of the Lipetsk Region State Property Management Commission No. 823 dd. December 31, 1992 «On reorganization of the Yu. V. Andropov Novolipetsk Iron & Steel Works into Novolipetsk Iron & Steel Corporation».*

3. Current name was introduced on 12.08.1998

Basis for changes: *Decision made at Annual Shareholders' Meeting dd. August 1, 1998*

(Minutes No. 9) on approval of the Company's Statute in a new edition.

3.1.2. Information on state registration of the Issuer.

Number of state registration: *5-Г*

Date of state registration: *28.01.1993*

Registrar: *Administration of Levoberezhny district of the city of Lipetsk*

State registration number of a legal person: *1024800823123*

Date of registration: *09.07.2002*

Registrar: *Inspection of MNS of Russia in Central district of the city of Lipetsk*

3.1.3. Information on foundation and development of the Issuer.

According to the RF Presidential Decree No. 721 dd. 01.07.1992 «On measures aimed at conversion of state enterprises, voluntary associations of state enterprises into joint stock companies» state enterprise The Yu. V. Andropov Novolipetsk Iron & Steel Works honored with the Lenin Order and the October Revolution Order was reorganized into Novolipetsk Iron & Steel Corporation by decision of Lipetsk region state property management Commission No. 823 dd. 31.12.1992. The Company was registered by Decree of Head of Levoberezhny district of the city of Lipetsk No. 50 dd. 28.01.1993.

The Company was registered for uncertain period of time.

The purpose of enterprise privatization is to increase efficiency of national economics by transfer from planned economy to market economy. In transition to a market economy the following decisions have been made by the Company:

- on optimization of organizational structure and management system of production and auxiliary divisions;*
- on improvement of system of raw material, fuel procurement, product sales and marketing services;*
- on development and approval of Technical Reconstruction and Development Program.*

Today NLMK is a large advanced company with highly developed and coordinated production, the products of which are exported to dozens countries of the world.

Plans of NLMK cover steady increase of high-end production, solution of various environmental problems at all production stages, production of high value added products which meet constantly raising demands from customers.

3.1.4. Contact information.

The Issuer's domicile: *Russian Federation*

Domicile of the Issuer's executive body:

2, pl. Metallurgov, Lipetsk 398040 Russia

The Issuer's phone, fax numbers, E-mail, web-site:

Tel: *(0742)-445-010*

Fax: *(0742)-441-111*

E-mail: *info@nlmk.ru*

Web-site with information on the Issuer and his securities issued and/or being issued:

3.1.5. Taxpayer Identification Number

4823006703

3.1.6. The Issuer's branches and representative offices.

In the reporting quarter of the current year there were no changes in the list of NLMK's branches and representative offices.

3.2. The Issuer's core activity.

3.2.1. The Issuer's industry.

Codes of the Issuer's activity within the industry according to All-Russian code of foreign – economic activity:

<i>Code</i>	<i>Description</i>
<i>27.17</i>	<i>Production of cold rolled steel flats without and with protective coatings</i>
<i>23.10</i>	<i>Coke production</i>
<i>24.14.2</i>	<i>Production of other organic chemical products which are not entered into any other group of products</i>
<i>24.15</i>	<i>Production of fertilizers and nitrogen compounds</i>
<i>27.11</i>	<i>Production of pig iron and blast furnace ferroalloys</i>
<i>27.14</i>	<i>Production of steel</i>
<i>27.15</i>	<i>Production of semi-finished (slabs) products for further rolling</i>
<i>27.16.2</i>	<i>Production of hot rolled steel flats</i>
<i>27.22</i>	<i>Production of steel pipes and fittings</i>
<i>27.33</i>	<i>Production of roll-formed steel sections</i>
<i>28.63</i>	<i>Production of locks and hinges</i>
<i>28.71</i>	<i>Production of metal drums and similar reservoirs</i>
<i>29.51</i>	<i>Manufacture of machinery and equipment for steel industry</i>
<i>31.62.9</i>	<i>Services rendered for erection, repair and maintenance of other electric equipment which is not entered into any other group of products</i>
<i>34.30</i>	<i>Production of parts and components of cars and motors to them</i>
<i>36.22.1</i>	<i>Production of parts for technical application from precious metals</i>
<i>37.10.1</i>	<i>Waste and ferrous scrap processing</i>
<i>40.10</i>	<i>Production, supply and distribution of electrical power</i>
<i>40.10.5</i>	<i>Activity on assurance of electric mains serviceability</i>

40.20.2	<i>Distribution of gas fuel</i>
40.30	<i>Production, supply and distribution of steam and hot water (heat energy)</i>
45.21.1	<i>Civil works on buildings construction</i>
45.31	<i>Wiring operations</i>
51.70	<i>Other wholesale trade</i>
52.11	<i>Retail trade in non-specialized stores principally by foodstuffs, including beverage food and tobacco goods</i>
52.12	<i>Other retail trade in non-specialized stores</i>
52.31	<i>Retail trade of pharmaceutical products</i>
55.12	<i>Activity of hotels having no restaurants</i>
55.51	<i>Activity of canteens located at the territory of plants and institutions</i>
60.10.2	<i>Activity of industrial railroad transport</i>
60.23	<i>Activity of other inland passenger transportation</i>
60.24	<i>Activity of motor transport</i>
63.11	<i>Transport processing of cargoes</i>
63.12	<i>Storage and warehousing</i>
63.21.1	<i>Other auxiliary activity of railway transport</i>
64.20.1	<i>Activity in the area of phone and document communications</i>
70.32.1	<i>Management of housing stock</i>
74.20.1	<i>Architectural activity, engineering in industry and construction</i>
74.20.3	<i>Land measuring and mapping</i>
74.60	<i>Investigations and accidents prevention</i>
80.22.22	<i>Training in advance training (extension) schools for specialists having secondary vocational education</i>
80.30.3	<i>Training in advance training (extension) schools for specialists having higher vocational education</i>
85.11	<i>Activity of patient care institutions</i>
85.13	<i>Dental practice</i>
85.20	<i>Veterinary activity</i>
92.13	<i>Movies demonstration</i>

3.2.2. The Issuer's main activity.

The Issuer carries out its activity in the territory of the Russian Federation. NLMK's main industrial activity is ferrous metals production and selling. The Company is oriented at producing high-quality hot-rolled and cold-rolled flats. Besides the Company produces semi-finished products (slabs).

Profit share from such activity constitutes almost 100% of the total profit from sales of products, goods, works.

In quarter III, 2005 profit share from sales of ferrous metals in the Company's total profit amounted to 95.7% (quarter II, 2005 – 95.4%).*

Proceeds from sales of ferrous metals:

in quarter II, 2005 – 28 040 945 thousand rubles,

in quarter III, 2005 – 25 859 385 thousand rubles, decrease by 7.8%.

The Issuer's activity has slight seasonal nature related to decrease of metal products consumption in winter. However the influence of this seasonal nature upon the Issuer's financial performance is not significant.

Note: The share of the Issuer's profit from its main activity in the total sales proceeds is calculated by the formula: page 011, f. 2/ page 010, f.2 over the quarter (non-progressive total).

3.2.3. Main types of products (works, services).

<i>Products</i>	<i>Amount, million rubles</i>	<i>Share, %</i>
<i>Slabs</i>	<i>5 161.1</i>	<i>19.4</i>
<i>Hot-rolled stock</i>	<i>6 645.7</i>	<i>25.0</i>
<i>Cold-rolled stock</i>	<i>6 102.3</i>	<i>23.0</i>
<i>Others</i>	<i>8 663.7</i>	<i>32.6</i>
Total sales (profit) volume	26 572.7	100%

<i>Cost items designation</i>	<i>Reporting period</i>
<i>Raw materials and materials, %</i>	<i>67.803</i>
<i>Acquired component parts, semi-finished products, %</i>	<i>–</i>
<i>Works and services of production nature rendered by outside organizations, %</i>	<i>3.125</i>
<i>Fuel, %</i>	<i>6.960</i>
<i>Power, %</i>	<i>4,453</i>
<i>Salaries and wages, %</i>	<i>7.678</i>
<i>Interests on credits, %</i>	<i>–</i>
<i>Rent, %</i>	<i>0,011</i>
<i>Single social tax, %</i>	<i>1.933</i>
<i>Fixed assets depreciation, %</i>	<i>2.838</i>
<i>Taxes included into the products cost value, %</i>	<i>0,255</i>
<i>Other costs, %</i>	<i>4.944</i>
<i>depreciation on intangible assets, %</i>	<i>0.001</i>
<i>rewards for rationalization proposals, %</i>	<i>0.073</i>
<i>mandatory insurance payments, %</i>	<i>0.175</i>
<i>representative expenses, %</i>	<i>0.003</i>
<i>other, %</i>	<i>4.692</i>
Total: costs for products manufacturing and sales (works, services), %	100

<i>Products (works, services) cost value, thousand rubles</i>	<i>17 888 799</i>
<i>For reference: profit from sales of products (works, services), % to the cost value</i>	<i>150</i>

Information on new significant types of products (works, services) as well as on their development is not available to the public for the purpose of maintaining the Issuer's competitive advantages.

The Issuer's cost value structure is determined in accordance with Accounting Rule 10/99 "The Company's expenses" (Decree No. 33H dd. May 6, 1999 of the RF Ministry of Finance), methodical recommendations on planning, formation and accounting of expenses on production and sales of products (works, services) of iron and steel companies, and NLMK's accounting policy.

3.2.4. The Issuer's raw materials and suppliers.

For its production (to support production technologies) NLMK purchases the following raw materials: iron ore, coal concentrate (coking grades), coke, scrap, ferroalloys, non-ferrous metals and fluxes.

The Company's own raw materials base

NLMK is a vertically integrated holding which incorporates mining enterprises to a significant degree providing for the Company's needs of iron and steel raw materials.

NLMK is the major shareholder of the mining company OJSC "Stoilensky GOK" which is the third largest iron ore raw materials producer in Russia by extraction volumes and explored reserves. NLMK's advantageous geographical location regarding the main Russian iron ore deposit (Kursk Magnetic Anomaly) allows to minimize the costs of transportation of iron ore raw materials to the Company.

To eliminate the risks related to coking coals and coal concentrate supply in 2005 NLMK won the auction for the right to use the subsoil area Zhernovsky-1 of Kuznetsk coal basin. The preparation stage of the deposit development is underway, which will allow to provide about 50% of the Company's needs in coal concentrate.

NLMK's needs in coke is satisfied by its own Coke Plant by 80-90%.

NLMK's need in fluxes is fully satisfied by its subsidiaries – OJSC "Stagdok" (Lipetsk) and OJSC "Dolomite" (Lipetsk region, Dankov).

Other raw materials sources and suppliers

The sources of coal concentrate for the Company are Kuznetsky, Pechersky and Yuzhno-Yakutsky coal basins.

The remaining 10-20% of the coke demand is satisfied by the Company's purchase of raw materials from such producers as Altaisky KHZ, Kemerovsky KHZ, Moskovsky KGZ and Yasinovsky KHZ (Ukraine).

The main iron ore source is ferruginous quartzites deposit of Kursk Magnetic Anomaly. Sinter ore and iron ore concentrate is supplied by OJSC "Stoilensky GOK" and OJSC "Kombinat KMaruda". OJSC "Stoilensky GOK" supplies about 80-90% of all concentrate supplies. Pellets are purchased at the Russian free domestic market, in

particular from OJSC "Lebedinsky GOK".

The Company's scrap demand is satisfied mainly by Secondary Non-ferrous Metals of the RF central region.

The Company's demand for main type of ferroalloys is covered mainly for account of OJSC "Zaporozhsky plant of ferroalloys" (the Ukraine), OJSC "Nikolsky plant of ferroalloys" as well as OJSC "Alapaevsky Iron and Steel Works" (Russia).

The dominant non-ferrous metals used in steel-making process are aluminum and zinc. The demand for aluminum is satisfied by OJSC "Bratsky aluminium plant" (Russia, Irkutsk region), demand for secondary aluminum is satisfied by enterprises of secondary metals of the Central Region of the Russian Federation. Zinc being supplied is produced by OJSC "Chelyabinsk zinc plant", OJSC "Electrozinc" (Russia, Vladikavkaz).

The main price tendencies in quarter III, 2005

***Iron ore.** Quarterly increase in iron ore purchase prices in quarter III, 2005 regarding the level of quarter III, 2004 accounted for about 5% on average. In spite of the decrease in domestic prices for iron ore in quarter III, 2005 (compared with the level of prices in the first half of 2005) caused by iron ore excess at the domestic market and aggravation of the market conditions of the world steel market the prices level didn't go down to reach the level of the respective period of 2004. Iron ore prices at the domestic market were increasing during the whole 2004 under the influence of high prices of the global iron ore market caused by the growing global, especially Chinese, demand for iron ore. Prices for iron ore were constantly growing from the beginning of 2005, and they reached their peak in April 2005 due to a 71.5 % increase in prices under long-term contracts at the global iron ore market. Decrease in steel output in Russia on the whole and, as a consequence, decrease in demand for iron ore since May 2005 resulted in monthly decrease in purchase prices, which in September reached their minimum over the first nine months of 2005.*

***Coal concentrate.** In quarter III, 2005 purchase price for coking coal and coal concentrate slightly (by 2%) exceeded the respective price of quarter III, 2004. At that while 2004 saw an ascending trend of prices for this kind of raw materials through the whole period, in quarter III, 2005 the price was going down consistently after its drastic increase at the beginning of 2005 and quite high level during the first half of 2005. The situation at the domestic coal market is in many respects determined by the global market tendencies. Thus, as the price fixed for financial year 2005 by the world community exceeded the respective price of 2004 by 2.2 fold, a drastic increase in domestic prices regarding the beginning of 2005 occurred. Decrease in prices for coal in quarter III, 2005 was caused by the aggravation of the situation at the global and domestic markets of finished products, increase in coal supply (against the background of demand for it of ultimate consumers) as well as excess coke demand.*

***Coke.** In quarter III, 2005 the average NLMK's purchase price for coke decreased by 46% regarding the price of quarter III, 2004. As in 2004 the growth rate of global prices for coke was higher than that of coking coal prices, which was caused by export restrictions introduced in China, price for coke in 2004 grew extremely high. However, from the beginning of 2005 Chinese coke solution advantageous for global steel producers caused the prices including domestic*

ones to decrease during the whole a/m period. Besides, coke price is traditionally determined by the coking coal market situation and price tendencies which were characterized by a significant decrease in domestic prices in quarters II and III, 2005, which caused a descending coke price tendency. The global market of that period was characterized by excessive demand for coke against the background of a decreased need for this kind of raw materials.

Scrap. The average NLMK's purchase price for scrap in quarter III, 2005 was slightly lower (by 3%) than the respective price of quarter III, 2004. The tendency of domestic purchase prices for scrap is in many respects determined by the situation dictated by the two competing consumers of this kind of raw materials – exporters and domestic iron and steel companies. In spite of certain adjustment of prices for scrap in the descending direction caused by demand decrease against the background of the excessive scrap supply in quarter II, 2005, quarter III saw another increase in prices. It was caused by a significant decrease in domestic demand for scrap at the beginning of 2005 because of a low activity of consumers in the respective period of the previous year, and increase in foreign demand for scrap (as a consequence of activation of domestic exporters) as well as by the necessity to replenish both the existing scrap stock and scrap stored for winter by domestic enterprises. Thus, as a result of quarter III the level of prices for scrap remain high as registered in the last two years.

Ferrous alloys. In quarter III NLMK's average purchase prices for ferroalloys significantly exceeded (by 27%) the level of purchase prices for ferroalloys of quarter III, 2004. At the beginning of 2005 a consistent decrease in prices for ferroalloys was driven by the situation at the Russian and Ukrainian markets of manganese ferroalloys in which there was a significant supply with a simultaneous decrease of demand for this type of ferroalloys in the conditions of overproduction. In quarter III, 2005 the situation changed and prices increase was caused the increase in prices for manganese alloys at the Russian market. Besides, due to process needs the share of expensive light ferroalloy (ferromolybdenum) increased in NLMK's structure of ferroalloy purchase.

Non-ferrous metals. Russian producers of non-ferrous metals are mainly oriented at the global market as Russian non-ferrous metallurgy is an export-oriented industry. As in 2004 there was a consistent growth of prices for non-ferrous metals at the global market (due to a high level of demand for them and a favourable situation in iron and steel production), quotation of prices for non-ferrous metals during the a/m period were maintained at the maximum level at least over the last 5 years. Starting from quarter II, 2005 global prices for aluminum were slightly adjusted in the descending direction, and in quarter III they were almost stable, in the reporting period NLMK's average purchase price for aluminum turned to be a bit lower than the price of the respective period of 2004 (about 7%).

During 2005 a high level of prices for zinc was registered at London Metals Exchange (LME). High prices at LME are mainly maintained by the deficit at the global zinc market. Besides, at the end of quarter III zinc price at LME was influenced by the absence of information on the condition of zinc stock in New Orleans, USA, which were not damaged as was discovered later.

In quarter III, 2005 NLMK's average purchase prices for zinc increased by 8% on average regarding quarter III, 2004.

Change of prices for the main raw materials purchased by NLMK in quarter III, 2005 regarding quarter III, 2004*

Raw materials	Average prices, rubles per ton, over quarter III, 2004	Average prices, rubles per ton, over quarter III, 2005	Change, %
<i>Coal concentrate</i>	2 673	2 728	2.0
<i>Coke</i>	8 494	4 599	-45.9
<i>Iron ore concentrate</i>	1 241	1 302	4.9
<i>Scrap</i>	4 965	4 840	-2.5
<i>Ferroalloys</i>	37 435	47 392	26.6
<i>Aluminum</i>	55 427	51 669	-6.8
<i>Zinc</i>	44 691	48 209	7.9

** VAT and delivery included*

3.2.5. The Issuer's sales (works, services) markets

As a result of nine months of 2005 NLMK's supply to motor-car plants decreased by 12.4% as compared with the respective period of 2004. It was caused mainly by the decrease of supply volume of cold-rolled stock by 13.2%. It is related to the decrease in supply of this product to "AvtoVAZ" by 28.0%. Cold-rolled steel sales to "Polisteel" decreased by 8.3%, thus its share in the total supplies accounted for 30.7 against 29.3 in 2004. In the reporting period cast iron supply to motor-car plants increased by 13.7% as compared with 2004. It is related to the increase in cast iron supply to "AvtoVAZ" by 7.0%, and to "AMO ZIL" by 29.8%. Thus, taking into account that the ultimate consumer of steel shipped to "Polisteel" (Lysvensky Iron and Steel Works) is "AvtoVAZ", we can say over two-thirds of the rolled stock shipped to motor-car plants is supplied to "AvtoVAZ". Over the nine months of 2005 hot-rolled stock supplies decreased by 4.4% regarding the level of 2004.

Hot-rolled stock sales to the domestic market within the period between January and September 2005 increased by 5.1% as compared to the previous year. There were no changes in the regional supply as compared to the previous year. The main consumer of hot-rolled stock is the Central region whose consumption share amounts to 35.1%. Hot-rolled stock was still supplied to the historical zones of NLMK's influence – Povolzhsky region (15.3% in the total supply to the domestic market), North-Caucasus region (15.8%) and Central-Chernozemny region (9.6%). The main consumers of hot-rolled stock are trade organizations supplies to which decreased by 7.5% as compared to the respective period of the last year; as a result their share in the shipment accounted for 60.2%. Shipment to tube producers increased almost by 3 times, as a result of which their sales share increased from 5.2% to 15.3%.

As a result of January-September the total cold-rolled stock volume supplied to the domestic market decreased by 12.8% as compared to the respective period of 2004. The share of motor-car industry decreased from 27.1% in 2004 to 26.0 in 2005. Sales volumes to machine-building enterprises decreased as a result of which its share in 2005 decreased and accounted for 1.2%. The share of supply to trade

companies increased to 30.2%. The main consumers of NLMK's cold-rolled stock remain the Central region, Povolzhsky region and the Urals region. As a result of January-September, 2004 Povolzhsky region was the major consumer (its share in the total supplies accounted for 28.0%), the Central region share accounted for 25.4% of the cold-rolled stock shipped to the domestic market. The Urals region still holds the third place, its share being 17.9%.

Over nine months of 2005 cast iron supply to the domestic market decreased by 47.3% in the reporting period of 2005 against the respective period of 2004. From January to September 2004 over half of the total cast iron supply volume was supplied to Volgo-Vyatsky region (36.4) and The Central region (24.5%). In the same period of 2005 supplies to these regions accounted for 15.8% and 47.4% respectively. The share of Povolzhsky region in 2005 amounted to 26.3% of the total volume of supplies.

Over nine months of 2005 galvanized rolled stock supplies to the domestic market decreased by 20.9% compared to 2004. As a result of January- September 2005 there were no significant changes in the structure of industrial consumption of galvanized rolled-stock. galvanized rolled stock was in the highest demand with commercial enterprises (43.7%) and steel structures producers (40.0%). The share of supply to the machine-building industry decreased from 8.6% in 2004 to 7.9% in 2005.

In the reporting period the structure of regional consumption of galvanized rolled stock remained almost unchanged. The share of supply to the Central region slightly decreased: from 65.3 in January – September 2004 to 63.8% in 2005. The share of supply to the Cental-Chernozem region increased from 11.9% to 13.8%, to the North-Caucasus region – from 8.2% to 11.0%, to Povolzhsky region – from 3.6% to 4.4%.

Sales of prepainted rolled stock to the domestic market in January – September 2005 increased by 18.2% compared to the respective period of the last year. Regarding the domestic geography of prepainted rolled stock sales NLMK's priority economic regions are Central (42.8%), North Caucasus (21.8%) and the Urals (13.2%). The bulk of the prepainted rolled stock to be supplied is still represented by galvanized substrate, the share of this kind of products in 2005 accounted for 91.4% of the total sales of prepainted rolled stock. The most popular gauge of prepainted flats is 0.5 mm (70.9% of the total sales).

In the reporting period the volume of orders for NLMK's anisotropic rolled stock from the main consuming regions increased, in particular:

- Povolzhsky region: increase in supplies by 4.1 fold;
- Central-Chernozem region: increase by 28.2%;
- Central region: increase by 15.9%.

The share of anisotropic rolled stock supplies to West Siberia region and the Urals region decreased (-7.5% and -13.5% to the level of nine months of 2004 respectively).

The priority grades of anisotropic rolled stock sold in January-September were grades 3407 and 3408 (26.4% and 28.8% of the total suppliers to the domestic market respectively). The share of wide GO electrical steel accounted for 72.8%.

Over nine months of 2005 isotropic rolled stick supplies to the domestic market in natural terms decreased by 10.6% regarding the respective level of 2004. Among the major consumers of this product there were Central region (45.3% of the total

supplies of NGO electrical steel over nine months of 2005), East Siberia (8.1%), Volgo-Vyatsky (7.4%) and the Urals region (12.2%).

Foreign market

In January – September 2005 the main buyers of NLMK's products were the following:

- “Steelco Mediterranean Trading Ltd.”,
- “Tuscany Intertrade (UK)”,
- “Moorfield Commodities Company”,
- “Stinol AG”.

As in the last year NLMK's main export direction were South-east Asia and the EC countries whose share in total supplies amounted to 33.1% and 26.4% respectively.

NLMK's major Asian markets in January-September in 2005 were the following:

- *Cbina: 10.4% of NLMK's total exports;*
- *Thailand: 7.9%;*
- *Taiwan: 7.8%.*

Almost all supplies to Taiwan are represented by slabs (93.9%).

In the reporting period there was a significant increase in sales to India and Indonesia compared to 2004 – by 3.2 and 2.1 fold respectively. The share of these sales markets in the Company's total exports as a result of January – September of the current year accounted for 4.0% and 2.1% respectively.

In January-September 2005 the Company's trade with the EC countries was effected in accordance with autonomous quotas.

Over nine months of the current year the largest volume of products was sold to Denmark (8.8% of the total exports, the share in the supplies to the EC – 33.4%) and Italy (5.8% and 22.1% respectively). Slabs for “Dansteel” account for 96.7% of products shipped to Denmark.

As a result of January –September 2005 exports to European countries which are not the EC members decreased by 9.7% regarding the respective indice of 2004 and accounted for 18.0% of NLMK's total exports. Export to Turkey which is the major consumer of this region accounts for 98.9% of the total exports.

Over nine months of 2005 the Company's export to North America decreased by 53.5% regarding January-September 2004. It was caused mainly by the reduction of slabs export.

In the reporting period the Company's hot-rolled stock trade with the USA was effected as per the quotas fixed in accordance with “Agreement on suspension of antidumping investigation regarding certain kinds of hot-rolled carbon steel flat products from the RF”.

There were no restrictions on supply of semi-finished products to the USA.

In January-September of the current year NLMK's supplies to the Middle East decreased by 18.4% compared to the respective indice of 2004. Sales to Iran (the main sales market in that region) decreased by 40.7%.

Over nine months of the current year NLMK's supplies to the CIS decreased by 18.4% compared to the respective period of 2004. As a result of the reporting period sales to this region accounted for 4.1% of NLMK's total export.

Sales of NLMK's products to Africa and Latin America are insignificant. In the reporting period the share of sales in each of these directions accounted for less than 1.2% of NLMK's total exports.

3.2.6. Information on the Issuer's licenses.

Licenses:

Number: *ЛПЦ №04995 БЭ*

Issue date: *22.04.1998*

Validity: *till 1.03.2008*

Licenser: *Territorial Administration of Geology and Subsoil use in the Lipetsk region*

Activity: *Draft of fresh underground water for the production and drinking water supply of an enterprise.*

Licenser: *Ministry of Internal Affairs of the RF, Administration of Internal Affairs of Lipetsk region*

Activity: *Acquisition of weapons (cartridges) at the RF territory.*

Possibility of license prolongation: *The license will be prolonged*

Number: *PXH Reg. No. 0048683*

Issue date: *23.08.2004*

Validity: *till 14.07.2008*

Licenser: *Ministry of Internal Affairs of the RF, Administration of Internal Affairs of Lipetsk region*

Activity: *Storage and usage of weapons and cartridges for them*

Possibility of license prolongation: *The license will be prolonged*

Number: *ТС 4801312 ДА 000802*

Issue date: *08.02.2005*

Validity: *till 08.02.2010*

Licenser: *Federal service on control in the field of transport, the RF Ministry of Transport*

Activity: *Maintenance and repair of technical means used in railway transport*

Possibility of license prolongation: *The license will not be prolonged (Activity is not subject to licensing)*

Number: *ПЦ 4801305 ДА 000801*

Issue date: *08.02.2005*

Validity: *till 08.02.2010*

Licenser: *Federal service on control in the field of transport, the RF Ministry of Transport*

Activity: *Maintenance and repair of railway transport rolling stock*

Possibility of license prolongation: *The license will not be prolonged (Activity is not subject to licensing)*

Number: *ИГ 4801314 ДА 000071*

Issue date: *08.02.2005*

Validity: *till 08.02.2010*

Licenser: *Federal service on control in the field of transport, the RF Ministry of Transport*

Activity: *Carriage of cargoes by railway transport*

Possibility of license prolongation: *The license will be prolonged*

3.2.7. Joint activity of the Issuer.

At present there is no joint activity of NLMK with any other companies.

As of 30.09.2005 Agreement No. 208 dd. 09.02.1994 with Scientific-technical enterprise "New machines and technologies" (P.O. Box 29/39 Dnepropetrovsk 320059) for joint activity was in force. Investments of NLMK accounted for 1,487,250.0 rubles. The purpose of investments is consortium establishment for construction and commissioning of a sector which will specialize in production of high-quality centrifugal rolls on the basis of Lutugin association on rolls production.

There is no information on financial performance of joint activity for 2004 and 9 months of 2005 due to failure of a partner to a joint activity to present statements.

3.2.8. Additional requirements to Issuers being stock investment funds or insurance companies.

The information is not presented as the Issuer is not a stock investment fund or insurance company.

3.2.9. Additional requirements to Issuers specialized on mining operations.

The information on NLMK's subsidiaries and affiliated companies specialized on mining operations is provided.

I. Studenovskaya Open Joint-stock Mining Company (OJSC «Stagdok»)

a) Mineral reserves:

According to the license received Stagdok has the right for subsoil of Sitov area of Sokol-Sitov field of fluxed limestone located at the territory of the Lipetsk region (3 km to the north from the city of Lipetsk and 0.5 km to the west from village Voskresenovka of the Lipetsk region).

*The license for subsoil use: series *ЖИЦ* No. 54036 ТЭ*

Issue date: May 30, 2002.

Expiry date: 31.12.2028.

The basis for licensing:

- supplementary exploration and revaluation of reserves in the period of 1995-2000;*
- change of field contour.*

Subsoil area given for use has the status of mining lease. The maximum depth of the area is +106 meters subject to mandatory preservation of protective pillar of 2 meters capacity above groundwater level.

Sitov area of Sokol-Sitov field with limestone reserves of 200901 thousand tons as of 01.01.2000, inclusive of 34095 thousand tons of quality A, 166806 thousand tons of quality C1, approved by (taking into account supplementary exploration and revaluation of the field) Territorial Commission on mineral reserves (Minutes No. 51 dd. June 29, 2000).

In Q III of 2005 limestone extraction volume amounted to 996 thousand tons.

As of 01.01.2005 the reserve residue of Sitov area of Sokol-Sitov field constitutes 177 896 thousand tons, inclusive of 11 090 thousand tons of quality A and 166 806 thousand tons of quality C1.

Within the given mining lease the company has the right for geological survey on translation of limestone reserves from low industrial qualities to high qualities.

The main liabilities of the Company.

1. To extract limestone with observation of the following conditions:

- to define annual extraction volume of limestone on the basis of mining operations plan (the volume of limestone extraction in 2005 was planned as 4359 thousand tons);
- to agree the plan of mining operations, norms for losses and impoverishment with State engineering supervision bodies on the annual basis.

2. To effect payments for use of subsoil according to norms being in force:

- 6% of the product selling price for the right to extract fluxed limestone;
- 5.5% of the product selling price for the right to extract construction quality limestone.

To effect double payments for mineral loss infringement. To effect tax and other mandatory payments to the budget in time and in full.

3. To present statistical reports under form 5-zp to the Federal Geological Administration "FGA" and to Federal Geological Administration "Geological Fund of the Central regions of Russia" and to Lipetsk branch of FGA "Centergeolfund" by January 15 every year.

4. To present statistical reports under form 70-TII, 71-TII to bodies stated in these forms by January 25 every year.

5. In the course of the field use Stagdok is liable to constantly monitor groundwater through the existing observation network.

The liabilities described in the license are being fulfilled by the company in the established order.

b). Extraction and processing of minerals:

Main facilities and equipment used for extraction and processing of fluxed limestone at Sokol-Sitov field are:

- crushers and mills, excavators, BELAZ cars, drilling rigs, bulldozers, diesel locomotives.

c). Sales:

Limestone from Sitov area is suitable as a raw material for production of the products which are in conformity with the following requirements:

- TU 0750-005-00186855-97 "Limestone of industrial quality. Specifications";
- TU 0750-004-00186855-95 "Limestone of industrial quality extracted by Studenovskaya joint-stock company. Specifications".

Limestone crushed rock for construction purposes, limestone of industrial quality are not covered by "Product mix and services (works) to be mandatorily certified according to the Russian Law" approved by Decree No. 64 dd. 30.07.2002 of the RF State Standard.

II. Open Joint-stock Company «Dolomite» (OJSC «Dolomite»)

a) Mineral reserves:

Dolomite has the right to use subsoil for dolomite extraction at Dankov field within Bigildin and Prikarjerny areas under the license received.

Mineral resources are metallurgical dolomite, construction quality crushed rock and limestone (dolomite) flour.

As of 01.10.2005 the areas for which licenses were granted had 400706 thousand tons of balance sheet reserves of dolomite, inclusive of 245964 thousand ton in Bigildin area and 154742 thousand tons in Prikarjerny area. Dankov field covers (all areas) 669183 thousand tons of dolomite balance sheet reserves in total.

In 2004 extraction volume amounted to 3339 thousand tons.

Reserve evaluation method was approved by Protocol No. 873 dd. September 26, 2003 of the State Committee on Mineral Reserves (GKZ).

Dolomite has the license No. ЛПД 54112 ТЭ for subsoil use for the purpose of dolomite extraction at Bigildin and Prikarjerny areas of Dankov field in order to manufacture raw materials for steel-making process and construction materials. Subsoil areas have the status of mining lease.

The license was granted on: October 1, 2003.

Expiry date: 01.01.2029.

The basis for licensing was redrawing up of the valid license due to change of legal person name - subsoil user.

Validity of the licenses can be prolonged upon initiative of subsoil user.

Allocated subsoil areas are located 3-7 km to the north-east from the city of Dankov and railway station with the same name – Dankov UVJD, 95 km to the north-west of the city of Lipetsk. The relief is relatively plain with ravine beam type network. The area of Bigildin area is 528 hectares, of Prikarjerny one – 316 hectares, total area is 844 hectares. The areas are located on cropland that can be used for agricultural purposes. Minerals in the field are overlapped by argillaceous sand and off-grade carbonate deposits. The average capacity of stripping is 17.5 meters and one of productive strata– 23.0 meters. Dolomites are flooded down to 1 – 3 meters in the bottom part of the cut. The depth of exploitation is up to 40 meters from daylight.

Liabilities of the company:

1. To pay tax on dolomite extraction for construction materials manufacture in the amount of 5.5% of extracted mineral value;

2. To pay tax on dolomite extraction as metallurgical raw materials in the amount of 6,0% of mineral value.

3. To effect double payments for mineral loss infringement.

4. To present a report under forms 5-ГР, 70-ТII, 71-ТII to controlling bodies on the annual basis.

5. To redraw up papers for mining leases in areas under mining in the State Engineering Supervision of the Russian Federation in Verkhne - Donskoy county before 01.05.2005.

6. To write off dolomite reserves accounted by the State in the field areas within the mining lease at the time of operations completion and perform complete reclamation of dislocated soils.

7. To prepare an annual plan of mining works development for forthcoming year and to agree it with State engineering supervision of the Russian Federation in Verkhne-Donskoy county before December 15.

8. Two years prior to license expiry date a project of mining opening final liquidation and dislocated soil reclamation shall be developed and approved.

The stated liabilities: all liabilities stated above are fulfilled within established time. Liabilities under clause 5 (redrawing up of papers for mining lease) are being fulfilled about which a notification letter was sent to the corresponding controlling authorities.

b) Mineral processing:

Electric full-rotary excavators manufactured by UZTM of ЭКГ-5a and ЭКГ-4,6Б type with 5 m³ and 4.6 m³ bucket capacity respectively and max. digging height of 10.3 m which corresponds to height of common quarry face and stripping capacity are used for dolomite extraction in open-cut mine. Drill works are done by drilling rig of roller-bit drilling of СБШ - 250МН type. Borehole diameter is 250 mm at drilling depth of 10-12 meters. Ore is crushed by jaw crushers with simple movement of jaw of grade ШДП 3x12 and ШДП 15x21 with receiving hole of 900 mm x 1200 mm and 1500 mm x 2100 mm respectively and capacity of 180 m³/h and 550 m³/h respectively. The material is additionally crushed in cone secondary crushers of КСД-1750ГР and КСД-2200ГР of 200 m³/h and 500 m³/h capacity respectively. Material is classified by fractions by vibrating screens of ГvI, ГvC, ГvT types.

Screened material is transported by belt conveyors of horizontal and inclined type with belt width of B 800 mm, B 1000 mm and B 1200 mm, of capacity which is correspondent to capacities of main production lines, i.e. jaw and cone crushers.

b) Product sales:

Permissions for dolomite products sales and export quotas allocated by the Federal Law are not provided for.

III. Open Joint-stock Company «Kombinat KMAruda» (OJSC «Kombinat KMAruda»)

a) Mineral reserves:

1). Kombinat KMAruda is granted the right to use the subsoil for deep-mined extraction of Korobkov field of ferruginous quartzite (inclusive of Stretensky area).

Type of minerals - ferruginous quartzite.

Reserves of the field were approved by Minutes (on reserves approval):

No. 6640 dd. September 22, 1972 of the State Commission on mineral reserves with USSR Council of Ministers;

No. 9770 dd. July 19, 1985 of the State Commission on mineral reserves with USSR Council of Ministers;

No. 12 dd. February 10, 2000 of the Territorial Commission on mineral reserves with Department of natural resources for Central Region of Mineral Ministry of the Russian Federation.

Extraction volume from the beginning of operations in the field as of 01.10.2005 is 156373 thousand tons (151682 thousand tons of air dried weight).

Rated annual capacity of the plant regarding processing of dry ore amounts to 3395 thousand tons.

Kombinat KMAruda was granted a license of ТЭ type series БЕЛ No. 08586 for the right to use subsoil for extraction of ferruginous quartzites at Korobkov field for further processing into iron-ore concentrate. The license was registered by Central region Department of natural resources of the RF Ministry of Natural Resources in the register No. 8586/БЕЛ 08586ТЭ.

Issue date of the license: 19.02.2001.

Expiry date of the license: 01.01.2026 z. (Validity of the license can be prolonged upon initiative of the subsoil user as well as in other cases stipulated in the Russian Law "On subsoil").

The license was granted on the basis of application and license documents submitted by Kombinat KMAruda. The right to use the subsoils area was granted on the basis of Decree No. 110/461 dd. 12.01.2001 of Belgorod Region Administration Government and Department of Mineral Resources in Central region of the RF Ministry of Mineral Resources.

The Korobkov field of ferruginous quartzites is located in proximity to the city of Gubkin, Belgorod region, and belongs to the central part of north-east part of the Kursk Magnetic Anomaly.

The field geological structure consists of Precambrian complex dislocated metamorphized rock broken in some places through by intrusions and dykes as well as water-bearing sedimentary deposits of Devonian and Mesocainozoic age, which unconformably and almost horizontally overlap crystal thickness. The capacity of sedimentary rock in average amounts to 116 meters. Iron-ore assise is considered as productive where ferruginous quartzites form two sub-assises of different capacity - 100-200 and 180-320 meters.

Ferruginous quartzites are covered everywhere by residual soil with average capacity of 18,3 meters, represented by oxidized and semi-oxidized quartzites and small deposits of high grade ore.

Under terms and conditions of the license Kombinat KMAruda shall within its validity:

- effect payments for extraction of ferruginous quartzites and for use of land lots;*
- observe the rules of safe operations, environment protection, mineral resources conservation , subsoil protection.*

Under special conditions of the license Kombinat KMAruda is liable to:

- additionally agree upon payment terms or procedures for subsoil use in case of acting legislation change with the bodies which have issued the license;*
- should any unknown mineral types and accompanying valuable components be found at the moment of license granting, the bodies which have granted the license have the right to call for state appraisal of geological materials and review the conditions of subsoil use;*
- prepare reports on fulfillment of subsoil use under the license for the previous year not later than on January 15 of the year following the reporting one;*
- redrawing up of the valid license due to change of legal person name or status of the plant.*

The liabilities stated in the license are being fulfilled by the company in full.

2). Kombinat KMAruda has the right to use subsoil for groundwater operations of aquiferous stratum of Alb-senoman and Archaean Proterozoic aquiferous stratum on site of Korobkov field of ferruginous quartzites.

Kombinat KMAruda was granted a license of series БЕЛ No. 07479 for subsoil use for the purpose of fresh groundwater extraction in amount of 625 m³/day for potable water and industrial water supply of the plant and outside consumers; extraction of groundwater for protection of mine opening from watering in case of Korobkov field development.

Issue date of the license: 15.05.2000.

Due to the changes dd. 30.03.2005 entered by the authorized bodies the license validity was prolonged till 01.04.2015.

The license was granted on the basis of application and licensing documents submitted by Kombinat KMAruda. The right to use the subsoils area was granted on the basis of Decree No. 49/399 dd. 14.03.2000 of Belgorod Region Administration Government

and Committee of Mineral Resources in Belgorod region of the RF Ministry of Mineral Resources.

Groundwater reserves were not approved. (In accordance with the changes to the license dd. 30.03.2005 (inclusive of the clause concerning subsoil usage conditions) groundwater reserves estimation of Korobkov field of ferruginous quartzites development should be conducted till 01.11.2007 with their approval in the established order).

Aquiferous stratum of Alb-senoman lies in depth intervals of 70-100 m and consists of different granular sands which are overlapped by thickness of chalk, sand and loams. It is separated from ore-crystalline massif by thickness of Jurassic clays. Groundwater is under pressure, depth of occurrence of groundwater level is 46-55 m. Aquiferous stratum is used by two water wells located within mining lease of the plant.

Archaean Proterozoic aquiferous stratum of 150-200 m capacity is referred to cracked area of crystalline rock, confining bed of which lies at depth of 120-150 m.

Archaean Proterozoic groundwater is draught by draining of mine opening with the following pumping out by mine drainage.

According to terms and conditions of the license Kombinat KMAruda effects payments within the license validity for use of water bodies and land lot in accordance with the existing legislation of the Russian Federation.

The liabilities stated in the license are being fulfilled by the company in the established order.

3) Kombinat "KMAruda" has the right to use subsoil for groundwater operations of quaternary Alb-senoman aquiferous stratum in the vicinity of Kaplino village, Stary Oskol region.

Kombinat "KMAruda" was issued a license for subsoil right: extraction of fresh groundwaters for economic and potable needs of recreation centre "Gornyak". License BЭ series БЕИ number 50108. The license was registered No. 108/БЕИ 5010837 in the register by the Mineral Committee of Belgorod region 07.06.2002.

License issue date – 07.06.2002.

License expiry date – 01.03.2012 (License validity can be prolonged in the established order).

The license was granted on the basis of application and licensing documents submitted by Kombinat KMAruda. The right to use the subsoils area was granted on the basis of Decree No. 279/630 dd. 07.06.2002 of Belgorod Region Administration Government and Committee of Mineral Resources in Belgorod region of the RF Ministry of Mineral Resources.

Groundwater reserves were not approved.

Groundwater is intaken by the water well located in Stary Oskol region, north of Kaplino village on the left bank of the Oskol river in the area of Stary Oskol water storage basin at the recreation centre of Kombinat "KMAruda".

The groundwater body is located in the northern part of Voronezh crystalline massif. The geological structure is made up of Pre-Cambrian metamorphic rocks and sedimentary rocks consisting of Devonian, Jura, chalk.

For water supply purposes quaternary Alb-senoman aquiferous stratum is used as the most water-abundant and the first thick stratum from the surface. The water well 38 m deep was drilled in 1987. The bearing strata of the aquiferous stratum under operation are made up of various granular sands up to 31 m thick. The aquiferous stratum is overlapped by small-granular sands 6 m thick. The stratum toe is made up of water-proof Jurassic clays.

In accordance with the license conditions "Kombinat KMAruda":

- effects regular payments for groundwater extraction, for the subsoil area located in the Don river basin in accordance with the effective legislation;
- effects payments for the land lot granted for usage by Stary Oskol Administration in the order and within the terms established by the effective land legislation;

- in case of the respective legislation changes groundwater extraction conditions, payments for their usage and the order of information submission specified in the license are subject to additional agreement with the issuing bodies.

In accordance with special conditions "Kombinat KMAruda" is liable:

- to submit information on subsoil usage conditions observation to Mineral Committee of Belgorod region annually till January, 10; information on groundwater monitoring to "Belgorodgeomonitoring" quarterly not later than the 10th day of the month following the reporting quarter;
- in case of significant deviations of well production values, lowering of water level and chemical composition indexes from the typical values as of the license issuance period, Mineral Committee of Belgorod region and "Belgorodgeomonitoring" should be quickly informed;
- in case of reorganizing or changing of the legal person's name or loss of the license application for reissuance of the license should be submitted. License is reissued in the order established for its issuance.
- to ensure observation of all environmental and nature-conservation measures in the course of activities related to subsoil usage envisaged by provisions of the authorized environmental bodies.

Obligations specified in the license are fulfilled by the plant in the established order.

b) Mineral processing:

The main mining equipment used in mining roadheading:

drilling machines ЛКР-ТЗ, ЛКРУ, punchers ПП-63, ПП-80НВ, ПТ-48, loading machines 1 ППН-5, loading – hauling machines ПТ-4, scraper winches 55АС-2СМ.

Rocks are transported from funnel and breakage mining faces by electric locomotives 10 КР and 14 КР in bogies of УВБ-4 and ВГ-4,5.

Blast holes are drilled by machine НКР-100 М. Blast holes are loaded by machines МЗКС-160.

Extracted ore is preliminary crushed in crushers СМД-118 1Б and ДСД –1017 in underground crushing complexes. Crushed ore is transported to processing plant along shaft equipped with 2 skips of 4 tons capacity each and hoist engine 2 Ц-4х1,8 and along shaft equipped with 2 skips of 13 tons each with hoist engine 2 Ц5-2,3. Ventilation of mine opening is done by fans ВЦД-47 У and ВЦД –31,5.

All ore extracted is processed into concentrate in processing plant which is technologically connected with skip shafts.

The main crushing – milling and mineral processing equipment of the plant:

- Cone crusher – КСД-1750, КМД-1750, КСД-2200, КМД-2200;

- Unbalanced-throw screen – ГИТ-52 Э, ГИТ-31;

- Ball mill – МШР 32-31;

- Sizing screen – К-СН-24;

- Hydrocyclone – ГЦ-500;

- Magnetic separators - ПБМ-90/250, ПБМ-120/300;

- Vacuum pumps – ВВН2-50;

- Vacuum filters – ДОО 150;

- Gravel pump – 6 НП.

- Stationary belt conveyor of different types.

c) Product sales:

Finished products (iron ore concentrate) are sold on the basis of agreements with consumers.

Permissions by the State authorities for sales of the above mentioned products are not required.

IV. Open Joint-stock Company «Stoilensky Mining Company» (OJSC «Stoilensky GOK»)

a) Mineral reserves:

1) According to the license received Stoilensk Mining Company has the right for digging of Sloilensk iron ore and nonmetallics field.

The field was explored by Belgorod geological surveillance expedition.

State Commission on minerals reserves with Ministry of Ecology and Natural Resources of the Russian Federation for quarry operations (500 meters to daylight) approved reserves of the following minerals (Minutes No. 1, No. 2 dd. January 24, 1992):

- high grade iron ore;*
- magnetite quartzites;*
- oxidized quartzites;*
- clay and loam;*
- chalk;*
- marl;*
- sand;*
- decayed slate;*
- crystalline slate;*
- quartzitic sandstone;*
- granite gneiss.*

The balance sheet reserves remainder as of 01.10.2005:

- high grade iron ore of category B+C1 – 57 613 thousand tons; of category C2 - 11991 thousand tons;*
- magnetite quartzites of category B+C1 – 4 940 209 thousand tons; of category C2 – 1563565 thousand tons;*

Extraction volume starting from the field excavation beginning on 01.10.2005 accounted for:

- high grade iron ore – 104430,8 thousand tons;*
- magnetite quartzites – 315 176 thousand tons;*

Annual design capacity of the Company on high grade iron ore excavation is 1200 thousand tons and 25440 thousand tons on magnetite quartzites.

Stoilensky GOK was granted a license of series БЕЛ №13030 ТЭ registered by Russian Mineral Ministry No. 3955 dd. 24.03.2005 for subsoil right– excavation of iron ore, ferruginous quartzites of Stoilensky field, as well as co-nonmetallics located in stripping and special dumps. Marketable products produced from processing of iron ore are sintering ore and iron ore concentrate. Co-excavated nonmetallics, finished products from their processing are used in-house or in other companies.

Issue date of the license: March 24, 2005.

License expiry date: January 1, 2016. (Validity of the license can be prolonged upon initiative of a subsoil user as well as in other cases set forth in the Russian Law “On subsoils”).

The license was granted on the basis of application and licensing documents submitted by OJSC “Stoilensky GOK”.

Under terms and conditions of the license OJSC “Stoilensky GOK” shall within its validity:

- effect payments for extraction of minerals and for use of land lots;
- observe the rules of safe operations, environmental protection, mineral resources conservation, subsoil protection.

Under special conditions of the license OJSC "Stoilensky GOK" is liable to:

- additionally agree upon payment terms or procedures for subsoil use in case of existing legislation change with the bodies which have issued the license;
- should any unknown mineral types and accompanying valuable components be found at the moment of license granting, the bodies which have granted the license have the right to call for state appraisal of geological materials and review the conditions of subsoil use;
- prepare reports on fulfillment of subsoil use under the license for the previous year not later than on January 15 of the year following the reporting one;
- reissuance of the license due to change of legal person's name or status of the plant.

The obligations stated in the license are being fulfilled by the Company in the established order.

2) Stoilensky GOK has a right under license of series BEJI No. 50162 BЭ to extract drainage groundwater in order to dewater quarry of Stoilensk ferruginous quartzites field.

Issue date of the license: 13.01. 2003.

License expiry date: 01.11.2012.

The license was granted on the basis of application and licensing documents submitted by Stoilensky GOK.

Drainage groundwater reserves of Stoilensky field were approved upon Turonian Maastricht, Alb-senoman aquiferous stratum and Archean Proterozoic aquiferous complex of 79 thousand m³/day for category B (Minutes No. 3 GKZ dd. January 24, 1992z.)

Turonian Maastricht aquiferous stratum refers to top interstitial weathering zone of marl-chalk stratum with 60-90 meters capacity of the same age. The stratum is free-flow, static level is at 25-50 meters depth. The stratum around the quarry is fully drained.

Alb-senoman aquiferous stratum refers to medium sands of the same age located at 90-110 meters depth overlapped by sand-clay deposits of quaternary age and chalk – marl rocks. The stratum is free-flow, depth is 63-94 meters. Decrease of groundwater level in area of drained contour is 40-45 meters.

Archean Proterozoic aquiferous stratum of 150 m capacity refers to cracked area of crystalline rock, confining bed of which lies at depth of 120-140 meters. Aquiferous stratum is under pressure, piezometric level is at 75-100 meters depth, quarry is drained.

Stoilensky GOK drains groundwater by 111 draining rise wells drilled from ring system of horizontal quarry of 35 km total length. Underground water intake covers 24 rise drain holes and mine drainage from shaft No. 3.

Mine drainage in Q III, 2005 accounted for 10 488 065 m³ in total inclusive of chemically treated water 1 450 990 m³ per annum.

Area of water intake refers to Don river basin.

"Subsoil user" is permitted to continuously intake groundwater in order to drain quarry with decrease of groundwater level till depth of drainage working laying and in quantity providing for safe mining operations.

On the territory of "subsoil user" there is a network of observation wells by which subsoil user monitors groundwater and studies hydrodynamic and hydrochemical conditions of groundwater in the zone of a mining company influence.

In 2005 – 2006 OJSC "Stoilensky GOK" plans to reevaluate groundwater reserves under category B with their approval by GKZ.

According to license conditions OJSC "Stoilensk GOK" shall effect payments for use of water bodies in accordance with the existing legislation of the Russian Federation.

The liabilities stated in the license are being fulfilled by the Company in the established order.

b) Minerals processing:

1. Main technologies used:

The field is being quarried: opened by a networks of trenches. Opening system is with outside refuse disposal. Quarry depth is 300 meters. Loose deposits are being opened by rotor complex and cyclic excavators. Rock stripping, high grade ore and ferruginous quartzites are extracted by cyclic excavators with preliminary opening by drilling-and-blasting operations. Ore is removed from the quarry by trucks, railway and conveyor belts.

Technological scheme of high grade ore processing covers three stages of crushing and screening with separation of sintering ore. Processing of ferruginous quartzites (magnetite) takes three stages of crushing with closed final stage, three stages of milling, magnetic separation, deslimation, dehydration of concentrate in vacuum filters. Hydrotransport of processing tailings is pressure - self floating. Water recycling is used.

2. The following equipment is used:

2.1. Mining operations:

- drillings rigs СБШ –250 МН;
- charge machine “Akvatol”, МЗ-4;
- cyclic excavators ЭКГ-10, ЭКГ-8И, ЭКГ-4,6(4У, 5У, 5А), ЭШ10/70;
- rotor complex КУ-800.

2.2 Transportation of mining mass:

- dump trucks BelAZ 7513, 7548, 7555;
- electric locomotives ОПЭ-1, diesel locomotive ЧМЭ-3, ТЭМ-2, М-62;
- boxcars 2ВС-105;
- conveyor belts in rotor complex КУ-800.

2.3 Crushing and beneficiation equipment:

- crushers – ШКД 2100/1500, ДМРуЭ14,5/13, ККД 1500/180, КСД 3000Т, КМД 3000Т2-ДП;
- screens ГИСТ-72, ГИТ-52Н;
- classifiers 2КСН 3,0x17,2;
- mills МШЦУ5,5x65, МШЦ 5,5x6,5;
- separators ПБМ-П-120/300, ПБМ-ПП-150/200, ПБМ-ПП-120/300;
- deslimers МД-12;
- vacuum filters ДШ 100/2,5;
- pumps ГРК, ГРТ 1250/71, ГРК 1600/56,
- stationary, reverse conveyor belts.

c) Sales

Finished products (sintering ore and iron ore concentrate) are sold on the basis of agreements concluded with customers.

Federal Law does not provide for any permissions from state bodies for sale of the above mentioned products.

3.2.10. Additional requirements to the Issuers the core activity of whom is communication services rendering.

The information is not submitted due to the fact that the Issuer does not render communication services.

3.3. Plans for future activity.

In 2005 NLMK will finish the first stage of Technical Reconstruction and Development Program which covers years 2000-2005, which is basically aimed at renewal of production facilities, increase in high value-added products output, improving of quality and diversification of the product mix, improving of production environmental purity and safety).

In 2005 NLMK plans to conduct major overhauls and revamping of a number of main metallurgical lines within Technical Reconstruction and Development Program, which will lead to a certain decrease in the Company's production indices regarding the 2004 level. Upstream products output will be reduced. In strips production, however, it is planned to increase the output of high value-added products – prepainted rolled stock and anisotropic steel.

In 2005 domestic sales of steel products both in physical terms and value will increase regarding the 2004 level.

The Company continues taking measures aimed at improvement of management structure and labour productivity.

3.4. The Issuer's equity holding in industrial, bank and financial groups, holdings, concerns and associations.

The Issuer does not hold any equity in industrial, bank and financial groups, holdings, concerns and associations.

3.5. Subsidiaries and affiliated companies of the Issuer.

Total		39 401 514 516	18 519 828 653

Fixed assets depreciation is effected by accrual of amortized deductions in a linear way on the assumption of the assets book value and depreciation rates calculated on the basis of the term of the assets beneficial use. The term of beneficial use is determined taking account of the Classification approved by Decree No. 1 dd. 01.01.2002 of the RF Government by the commissions appointed by the decrees issued by heads of divisions.

On the fixed assets acquired in 2001 referred to the group of capital assets "Agricultural tractors" and "Agricultural machines and equipment" accrual of amortized deductions is effected by value writing off the based on the sum of numbers of the years making up beneficial use term.

Accrual of amortized deductions is suspended if the fixed assets are put to conservation for a 3-month term or longer upon the decision of the Company's Director General a well as during the period of the assets reconstruction lasting for over 12 months.

Results of fixed assets revaluation for 5 complete financial years proceeding the reporting quarter.

Method of fixed assets revaluation:

The Issuer revalued the property on the basis of expert report.

Separate groups of fixed assets of NLMK were revaluated for the stated period by Closed joint-stock company "Center of professional appraisal" (Moscow).

According to the submitted report on the Company's fixed assets revaluation all calculations have been done by appraisers in full conformity with the Russian Law, standards, letters, explanations and other guides on fixed assets revaluation, published by the RF Government, the State Statistics Committee of the Russian Federation, the RF Ministry of Economics, the RF Ministry of Finance.

Method of revaluation:

Fixed assets of the Company were revaluated by direct translation of their book values as applies to prices for corresponding types of fixed assets on the date of revaluation (01.01.2000), confirmed by expert judgments of appraisers on market value of the stated assets.

Depending on fixed assets group and nature of object under assessment different evaluation techniques of fixed assets replacement value definition were applied based on the following methods of fixed assets revaluation – comparative and cost estimation approaches. These approaches are based on the principle of replacement according to which costs related to formation, acquisition and commissioning of object under assessment (for cost method) are necessary to be calculated to define the value of observed depreciation or substitution value being the basis for calculation and find an object having similar functional and design parameters.

Observed depreciation of fixed assets object stands for either value of reproduction of its complete replica in current prices as of the date of assessment, or acquisition value of new object completely identical to the evaluated one upon functional, design and other parameters in current prices.

Substitution value of fixed assets object stands for minimum acquisition value of similar new object, very close to the evaluated one on the basis of all functional, design and operational parameters in current prices.

Full replacement cost of buildings, structures and transfer mechanisms was calculated on the basis of cost-is-no-object approach to property revaluation on the assumption of actual components – negotiated prices, estimations for civil works and erection, wholesale prices for construction materials, fuel, energy, machinery, equipment, tools, freight tariffs, etc. At that component division method and resource method were applied.

Full replacement value of equipment and machinery was revaluated by index method.

Replacement value of vehicles was defined according to the following methods:

- *similar object price method;*
- *cost component method;*
- *index method;*
- *direct comparison method.*

Plans on acquisition, replacement, retirement of fixed assets the amount of which accounts for 10 percent and more of their total value:

In the 2nd quarter of 2005 NLMK does not plan to acquire, purchase, replace or retire fixed assets the amount of which accounted for 10 percent and more of their total value.

Information on fixed assets charge as of the date of the reporting period end:

Charged assets: *fixed assets of NLMK (real assets, transport means, machinery and equipment, agricultural machinery, furniture, office equipment, commercial equipment, sport tools), original (replacement) cost of which amounts to 161 709 thousand rubles.*

Nature of charging: *granted on lease and transferred to free temporary use*

Date of charging: *starting from the date of transfer*

Validity of charging: *up to one year under agreements*

Other terms of charging: *none*

IV. Information on financial performance of the Issuer.

4.1. Results of the Issuer's financial performance.

4.1.1. Income and losses.

Indices dynamics characterizing the Issuer's profitability/ unprofitability:

Indice	2Q05	3Q05	Changes	
			+/-	%
<i>Proceeds, thousand rubles</i>	29 377 934	27 035 067	-2 342 867	-8%
<i>Gross profit, thousand rubles</i>	13 525 452	9 832 831	-3 692 621	-27%
<i>Net profit (retained profit), thousand rubles</i>	9 920 098	6 467 805	-3 452 293	-35%
<i>ROE*, %</i>	32.7%	20.3%	-12.4%	
<i>ROA*, %</i>	30.5%	19.0%	-11.5%	
<i>Net profitability ratio, %</i>	33.8%	23.9%	-9.9%	
<i>Products (sales) profitability, %</i>	41.3%	32.0%	-9.3%	
<i>Capital (net assets)turnover ratio, once per quarter</i>	0.25	0.22	-0.03	
<i>Amount of retained loss as of the reporting date, thousand rubles</i>	-	-	x	x
<i>Ratio of retained loss as of the reporting date to the balance currency</i>	-	-	x	x

The stated indices have been calculated according to the methods recommended in the Provision on information disclosure by securities issuers approved by the Decree No. 05-5/n3-n of the FSFR dd. March 16, 2005.

Notes *: $ROE = (\text{Net profits}) / (\text{Capital and provisions} - \text{purpose-oriented financing and earnings} + \text{deferred income} - \text{own stocks bought out from shareholders} + \text{debt to participators (founders) on income payment})$.

ROE and ROA are given on the basis of additional calculation up to annual values.

In 3Q05 unfavorable situation on steel sales markets had a negative impact on the Company's financial performance. A value of sales proceeds decreased by 8% as compares to 2Q05.

Sales proceeds going down (-8%) with simultaneous cost of sales growth (+8.5%) in 3Q05 as compared 2Q05 conditioned decrease of gross profit by 27%.

A value of net profit (retained profit) in 3Q05 shinkaged by 35% as compared to 2Q05. The main cause of net profit going down was decrease of sales proceeds mainly due to market conditions worsening.

ROE and ROA

In 3Q05 ROE and ROA of the Company went down as compared to 2Q05 which was attested by dynamics of ROE and ROA. Decrease in net profit of the Issuer (by -35% as to 2Q level) was the main factor for worsening of the stated above values:

- net profit per each rouble of own funds decreased from 32.7 kopecks to 20.3 kopecks;
- net profit pereach rouble of assets decreased from 30.5 kopecks to 19 kopecks.

Net profitability ratio

In 3Q05 significant decrease in the Issuer's net profits (-35%) as compared to 1Q05 encouraged net profit ratio decrease from 33.8% to 23.9%.

Cost of sales

In 3Q05 decrease in sales proceeds (-8%) and cost of sales (+8.5%) caused decrease cost of sales, i.e. cost of sales in each rouble of sales proceeds accounted to 32 kopecks v.41.3 kopecks in 2Q05.

Capital turnover in 3Q05 slightly went down as compared to respective indice in 2Q05 due to decrease of sales proceees with net assets growth.

4.1.2. Factors which influenced sales proceeds of the Issuer and income (losses) from the Issuer's operations.

Indice	3Q05 to 2Q05
Changes of sales proceeds (decrease -, increase +)	-8.0%
Sales profit change (decrease -, increase +)	-28.7%

In 3Q05 sales proceeds decreased by 8% as compared to 2Q05.

The main factor (higher upon influence degree) which had an impact on decrease of proceeds was decrease in priced for steel products shipped from NLMK due to unfavourable situation in sales markets. Mainly exported products were affecte whereas

their share was the largest in total shipments.

Besides, worsening of sales structure (low influence degree) also influenced decrease of proceeds.

A slight increase in sales (average influence degree) and growth of US Dollar exchange rate (low influence degree) did not compensate for negative impact of all stated above factors.

Sales profit in 3Q05 shranked by 28/7% as compared to 2Q05 which was caused by both decrease in sales proceeds and growth of cost of sales (free of trade and administrative expenses) by 8.5%. Increase in cost of sales took place mainly due to growth of absolute costs (materials and spares, services of third parties, changes in construction – in – progress).

4.2. The Issuer's liquidity.

<i>Indice</i>	<i>as of 30.06.2005</i>	<i>as of 30.09.2005</i>
<i>Own current assets*, thousand rubles</i>	<i>70 958 566</i>	<i>69 494 776</i>
<i>Permanent assets index**</i>	<i>0.45</i>	<i>0.47</i>
<i>Current ratio factor***</i>	<i>10.40</i>	<i>40.54</i>
<i>Quick liquidity factor****</i>	<i>8.19</i>	<i>8.53</i>
<i>Own funds autonomy factor</i>	<i>0.90</i>	<i>0.94</i>

Notes: * - *own current assets* = current assets – other current assets – own stocks bought out from shareholders – long-term accounts receivable – short-term liabilities + debt to participators (founders) on income payment + deferred income + other short-terms liabilities.

** - *fixed asset index* = (current assets + long-term accounts receivable) / (Capital and provisions – purpose-oriented financing and earnings + deferred income – own stocks bought out from shareholders + debt to participators (founders) on income payment).

*** - *current ratio factor* = (Current assets – long-term accounts receivable - own stocks bought out from shareholders – other current assets) / (short-term liabilities – deferred income - debt to participators (founders) on income payment).

**** - *quick liquidity factor* = (Current assets – long-term accounts receivable - own stocks bought out from shareholders – other current assets – inventories) / (short-term liabilities – deferred income - debt to participators (founders) on income payment).

Own current assets

As of 30.09.05 own current assets value decreased (by 1,464 miln. roubles or 2%) as compared to 30.06.05 level. This was caused, first of all, by short-term liabilities decrease (2004 dividend payments). Besides, current assets went down (due to decrease of short-term accounts receivable and inventories).

Permanent assets factor

Permanent assets factor did not change significantly in 3Q05. It met recommended fixed assets factor of ≤ 0.9 .

Current ratio factor and quick liquidity factor

Current ratio and quick liquidity factors as of 30.09.05 were sufficiently high (10.54 and 8.53 respectively).

Current ratio factors dynamics attests to the complete short-term debts self-sufficiency by current assets for economic activity pursuance and to a high degree of the Company's solvency.

Apart from it quick liquidity factors attest to the Company's ability to completely repay short-term liabilities without sales of inventories.

Own funds autonomy factor.

This factor indicates own capital share in the assets and characterizes the degree of the issuer's financial independence of creditors. Own funds autonomy factor as of 30.09.05 accountee for 0.94. This factor allows to assume low degree of financial dependence of the issuer on creditor.

4.3. Amount, structure of capital and current assets of the Issuer.

4.3.1. Amount and structure of the Issuer's capital and current assets.

The Issuer's policy in financing of current assets

On the basis of analysis made to financial status only stable banks are selected. For each of the banks NLMK defines limit of funds placement required for current activity as well as spare cash.

In case of market conditions worsening and the Company's investment plans changes residual cash and its equivalent which accounted for 46.0 bln. roubles as of 30.09.2005 could be used.

Taking into account stable performance of the Company during a long period of time as well as high share of equity in the Company's capital (94%), NLMK has a possibility to attract significant funds on favorable terms by bank credits and bond offering.

4.3.2. The Issuer's financial investments.

NLMK's financial investments which are 10% and more of all its financial investments as of the date of the reporting period closure.

1. Financial investments into issuing securities:

Type of securities: *common stock*

Full name of Issuer: *Open joint-stock company «Stoilensk GOK»*

Abbreviated name of Issuer: *OAO «Stoilensky GOK»*

Domicile: *Russian Federation*

State registration number for securities issue: *1-01-00154-A*

Date of state registration of securities issue: *28.11.2003*

State registrar of securities issue: *Russian Federal Committee of Securities*

Quantity of securities belonged to NLMK (pieces): *3 020 337*

Total par value of securities belonged to NLMK (thousand roubles): *3 020.337*

Total book value of securities belonged to NLMK (thousand roubles): *18 896 155*

Dividends on common stock in 2005 upon results of 2004 performance (per 1 share) (rubles): *122*

Repayment period: *July 22, 2005*

2. Other financial investments:

Type of financial investment: *deposits*

2.1. Full name of lending agency: **Bank of Foreign Trade (open joint-stock company), Additional Office No. 6**

Abbreviated name of lending agency: **OAO Vneshtorgbank, Additional Office No. 6**

Domicile: **43, ul. Vorontsovskaya, Moscow 109044**

Main deposit debt (thousand rubles): **10 034 173** (Deposits placed with OAO Vneshtorgbank, Additional Office No. 6, in aggregate amounts to more than 10% of all NLMK's financial investments as of September 30, 2005 and have different time of repayment)

Interest charged on main debt balance (thousand rubles): **31 054**

2.2. Full name of lending agency: **Closed joint-stock company "International Moscow Bank"**

Abbreviated name of lending agency: **ZAO International Moscow Bank**

Domicile: **9, Prechistenskaya naberezhnaya, Moscow 119034 Russia**

Main deposit debt (thousand rubles): **7 153 088** (Deposits placed with ZAO International Moscow Bank, in aggregate amounts to more than 10% of all NLMK's financial investments as of September 30, 2005 and have different time of repayment)

Interest charged on main debt balance (thousand rubles): **13 548**

2.3. Full name of lending agency: **Deutsche Bank Ltd.**

Abbreviated name of lending agency: **OOO Deutsche Bank**

Domicile: **4, ul. Schepkina, Moscow 129090**

Main deposit debt (thousand rubles): **9 964 613** (Deposits placed with OOO Deutsche Bank, in aggregate amounts to more than 10% of all NLMK's financial investments as of September 30, 2005 and have different time of repayment)

Interest charged on main debt balance (thousand rubles): **1 593**

2.4. Full name of lending agency: **Closed joint-stock company "ABN AMRO Bank A.O."**

Abbreviated name of lending agency: **«ABN AMRO Bank A.O»**

Domicile: **17-1, ul. Bolshaya Nikitskaya, Moscow 125009 Russia**

Main deposit debt (thousand rubles): **7 338 098** (Deposits placed with ABN AMRO Bank A.O., in aggregate amounts to more than 10% of all NLMK's financial investments as of September 30, 2005 and have different time of repayment)

Interest charged on main debt balance (thousand rubles): **650**

There are no other financial investments inclusive of the same to any other non-issuing securities as well as to chartered capital of limited liability companies amounting to 10 and more percent of all financial investments of NLMK as of 31.09.2005.

Financial investments are accounted at NLMK according to Provision on accounting "Accounting of financial investment" PBU 19/02, approved by Order of the RF Ministry of Finance No. 126n dd. 10.12.2002 as well as by Provision on accounting policy of NLMK for accounting approved by Order of the Company No. 838 dd. 31.12.2004.

4.3.3. Intangible assets of the Issuer.

Provisional information on composition of intangible assets, initial (replacement) value of intangible assets and value of accumulated depreciation.

<i>(rubles)</i>			
No	Description of intangible assets group	Initial (replacement) value	Accumulated depreciation
As of 30.09.2005			
1	Sole rights for PC applications and databases	12 474 713	12 193 827
2	Sole rights for inventions	3 982 578	555 647
3	Sole rights for production prototypes	200 000	200 000
4	Sole rights for utility models	650 666	453 010
5	Sole rights for trade marks and service marks	209 521	49 429
6	Sole rights for artwork, science work, literature publications	39 167	12 226
7	Other rights	309 032	309 032
Total		17 865 677	13 773 171

There were neither intangible assets entered to chartered capital nor received free of charge.

Information on intangible assets of the Company is generated and reflected in the financial statements in conformity with Provisions of accounting «Accounting of intangible assets» PBU 14/2000, approved by Order of the RF Ministry of Finance No. 91n. dd. 16.10.2000, as well as provision on NLMK's accounting policy, approved by the Company's Order No. 838 dd. 31.12.2004.

4.4. Information on policy and expenses of the Issuer in the area of technological progress, as regards to licenses and patents, new developments and investigations.

The Issuer's policy in the area of technological progress in the reporting period was defined by NLMK's quality management policy.

One of approaches of the policy in the area of technological development is acquisition of rights for intellectual property by patent protection of new technical solutions developed at NLMK.

In 3Q05 4 patents for inventions and 1 patent for utility models were received. They are enlisted below.

List of patents for inventions and utility models received in 3Q05.

No.	Description of an invention, utility model	Issue date	Validity of patent
1.	Electrostatic device for dielectric fluid application onto stell strip	27.06.2005	20 years
2.	Method of fine oiled roll scale disposal	27.06.2005	20 years
3.	Dustduster	27.06.2005	20 years
4.	Method of in-line determination of rolling stand springing parameters	20.08.2005	20 years
5.	Unit for conveyor belt catching	27.07.2005	5 years

Constant control over prompt payment of all patent fees on inventions and utility models, over prolongation of trade mark registration validity, over submission of applications on registration of trade mark in case of the Company's product mix diversification are the main actions aimed at prevention of NLMK's forfeiture of rights for intellectual property.

NLMK's expenses for R&D according to agreements in force for 3Q05 accounted for 4,219 thousand roubles, of them 181 thousand roubles related to patents and licenses obtaining.

4.5. Analysis of trends in the Issuer's core activity.

After headlong growth of world steel production in 2004 world steel market conditions changed in 2005. 3Q05 showed all components of world steel market crisis more distinctly. Achived overproduction of steel in the world caused significant decrease in prices. In order to keep the prices steel companies in many regions of the world were forced to shrink steel output.

These tendencies reflected on development of Russian steel sector. Production results of majority steel companies and in the industry as a whole practically fell to the level of the last year. However in 3Q05 HM, steel, flats production grew at three leading steel companies (Severstal, MMK, NLMK) as compared to 2Q05. That allowed to maintain the same level of main production production in 3Q05 as compared to the previous quarter in the industry as a whole. So, in July – September 2005 industry-wise output of HM and steel

did not change and accounted for 11.7 mln. tons and 16.3 tons, respectively. Flats output accounted for 13.3 mln. tons which was a little higher (by 1.1%) than in 2Q05 (source: "Chermet" Corporation).

Contrary to industry results main steel product production at NLMK kept ascending tendency : in 3Q05 HM production increased by 12.3%, steel – by 10.5%, flats – by 9.2% as compared to 2Q05.

In the reporting period general world market conditions worsened – overproduction of steel products in China caused decrease in demand and prices. Many Russian steel companies reoriented their deliveries to domestic market. Domestic Russian prices for flats starting from August even made an (unsuccessful) attempt to grow but failed to compensate export price falling down. Financial performance of Russian steel holdings upon 3Q05 results decreased.

NLMK is an export oriented company and a corresponding negative situation in the external market influence financial performance of the Company. In 3Q05 situation in the domestic market turned to be more favorable for NLMK as higher prices for the Company's steel products in the domestic market as compared to export prices allowed NLMK to increase cost of sales in the domestic market as compared to 2Q05. However, on the whole NLMK as many other Russian steel companies reduced output of products for sale in value terms by 14% as compared to 2Q05.

In 4Q05 NLMK anticipates price conditions on sales markets to improve as compared to 3Q05.

Despite existing situation upon 8 months of 2005 results the Company had the lowest costs per 1 rouble of products for sale and the highest profit before taxation in the industry.

Main competitors of the Issuer

The main competitors of NLMK in the domestic market are OJSC "MMK" and OJSC "Severstal".

These companies are characterized by the following strong competitive advantages:

- diversification of production process. NLMK is an integrated steel company with production along the whole chain starting from hot metal to coated steel;
- geographical location. The Company is located in close proximity to main steel-consuming regions of Russia as compared to its competitors.
- priority in development of high value-added products. NLMK was the first in Russia to master production of prepainted steel and is the only producer of electrical steel of high grades and cold rolled structural quality flats.
- high stable quality remains the main requirement to products in any market. Starting from 2000 a program of technical upgrade has been implementing to improve quality of products.
- demand for products in the world market. NLMK ships its products to actually all industrially developed countries, is a leading slab exporter from Russia.
- fast reaction to market tendencies.

As compared to competitors the Company's position remains unchanged both in near-term and remote outlook because their technology and equipment are comparable to that of NLMK by the highest standards. All the three company invest much into reconstruction and upgrading of equipment. Against a general background of capacity increase and quality improvement any qualitative overtaking is hardly possible.

Following world tendencies NLMK is commissioning Hot Dip Galvanizing Line. Output of this type of products will allow NLMK to hold and expand its position in world market of coated steel.

NLMK exports its products to several dozens countries of the world. There are producers of the same products practically in each country – importer. Besides NLMK steel companies from other countries supply their product to these markets. So, NLMK

experiences multiple competitions and it seems impracticable to single out specific competitors in the world market.

V. Detail information on members of the Issuer's authorities, financial performance control bodies, brief data on employees of the Issuer.

5.1. Information on structure and competence of the Issuer's authorities.

The Supreme governing body of the Company is the General Shareholders' Meeting.

The Board of Directors carries out the general management of the Company activity excluding those issues, which fall under the exclusive competence of the Shareholders' Meeting.

The Board of Directors consists of 9 persons.

The management of the routine business of the Company is exercised by the Company's single executive body – Director General and by the Company's corporate executive body – the Management Board.

The competence of Director General and Management Board covers all the issues related to the management of the Company's routine business except the matters of exclusive competence of the General Shareholders' Meeting and the Board of Directors.

The Director General and the Management Board make arrangements for implementation of the decisions of the Company's General Shareholders' Meeting and the Board of Directors.

The Director General also fulfils the functions of the Company's Management Board Chairman.

The Management Board is a corporate executive body of the Company, which acts with the authority of the Federal Act "On the joint-stock companies", the Company Statute and Regulations on the Management Board of the Company approved by the General Shareholders' Meeting.

The organization and membership of the Management Board are approved by the Board of Directors upon presentation by the Director General.

The competence of the general meeting of the issuer's stockholders (participants) in accordance with its statute (constituent documents):

The following matters fall within the Meeting's competence (Chapter 4, Article 16 of the Company Statute):

- 1) changes and additions to the Statute or approval of the Statute in new revisions;*
- 2) reorganization of the Company;*
- 3) liquidation of the Company, appointment of the Liquidation Committee and approval of the interim and final liquidation balances;*
- 4) establishment of the quantitative staff of the Board of Directors, election of its members and premature termination of their authority;*
- 5) determination of number, par value, category (type) of declared shares and rights given by these shares;*
- 6) increase in the Company's chartered capital through share par value increase; increase of the chartered capital of the Company through placement of additional shares by public subscription in case the number of additionally placed shares constitutes*

more than 25% of the common shares earlier placed by the Company; increase of the Company's chartered capital through placement of shares by closed subscription;

7) decrease of the chartered capital through share par value decrease, through paying off the shares acquired by the Company and not realized within a year and of the shares redeemed by the Company, as well as through paying off the shares that have passed to the Company in relation to their non-payment; decrease of the chartered capital through partial acquisition of shares for the purpose of decreasing their total number;

8) election of Director General and premature termination of its authority;

9) election of the Auditing Committee members and premature termination of their authority;

10) approval of the Company's Auditor;

10.1) payment (announcement) of dividends upon results of 1Q, six months, nine months of a financial year;

11) approval of annual reports, annual financial statements, including income statements of the Company, as well as distribution of Company's profits (including payments (declaration) of dividends with exclusions of profits distributed as dividends upon results of 1Q, six months, nine months of a financial year) and losses of the Company upon results of a financial year;

12) establishment of procedure of the General Meeting;

13) appointment of the Accounts Committee members and premature termination of their authority in case of the Company's Registrar functions as the Accounts Committee according to requirements to Federal Law "On joint-stock companies";

14) split-up and consolidation of the shares;

15) making decisions on approval of transactions in cases stipulated in Article 83 of the Federal Law «On Joint-stock Companies»;

16) making decisions on approval of major transactions in cases stipulated in Article 79 of the Federal Law "On Joint-stock Companies";

17) acquisition of the subscribed shares by the Company in cases, stipulated in the Federal Law "On Joint-stock Companies";

18) involvement in holdings, financial and industrial groups, associations and other commercial organizations;

19) approval of internal documents governing the operation of the Company's bodies;

21) decision-making on other matters stipulated by the Federal Law "On Joint-stock Companies" and / or the present Statute.

The matters falling under the competence of the General Meeting of Shareholders cannot be transferred to the competence of executive bodies of the Company.

The matters falling under the competence of the General Meeting of Shareholders cannot be transferred to competence of the Board of Directors of the Company except in cases stipulated in the Federal Act "On the joint-stock Companies".

The competence of the Issuer's Board of Directors (Supervisory Board) in accordance with its Statute (constituent documents):

The following matters fall within the competence of the Board of Directors (Chapter 5, Article 30 of the Company Statute):

1) definition of priority activities of the Company;

2) convocation of the Annual and Extraordinary Shareholders' Meetings excluding cases, when in accordance with the Federal Law "On Joint-stock Companies" an Extraordinary Shareholders' Meeting can be convoked by authorities and persons demanding its convocation;

- 3) approval of the General Shareholders' Meeting agenda;
- 4) definition of the date of list of the shareholders who are entitled to participate in the Shareholders' Meeting and other issues attributed to the competence of the Board of Directors in accordance with the Statute and the Federal Law "On Joint stock companies" and related to preparation and holding of the Shareholders' Meeting;
- 5) preliminary approval of annual reports, annual financial statements, including income statements of the Company for a financial year;
- 6) increase of the Company's chartered capital by placement of additional shares by the Company out of its property within the quantity of declared shares.
- 7) increase of the Company's chartered capital by placement of additional shares by the Company by public subscription within the quantity of declared shares, if the number of additionally placed shares constitutes 25% or less from the common shares earlier placed by the Company;
- 8) acquisition of shares placed by the Company in accordance with Item 2, Article 72 of the Federal Act "On the joint-stock Companies";
- 9) approval of decisions on offering, prospectus, report on offering results, their amending and revising.
- 10) placement of bonds and other securities issued by the Company in cases provided for by the Federal Law "On Joint-stock companies";
- 11) determination of price (pecuniary valuation) of the property, price of offering and redemption of the securities issued in cases provided for by the Federal Law "On Joint-stock Companies";
- 12) acquisition of bonds and other securities placed by the Company in cases provided for by the Federal Act "On the joint-stock companies";
- 13) constitution of the Management Board and early termination of its authorities; determination of rewards and compensations paid to its members; conclusion of contracts with the Director General and members of the Management Board on behalf of the Company;
- 14) determination of terms and conditions of contracts with the Director General and members of the management board;
- 15) recommendations to the General Shareholders' Meeting on amount of reward and compensation paid to members of the Auditing Committee and determination of payment amount for Auditor's services;
- 16) recommendations to the General Shareholders' Meeting on dividend amount payable to the shareholders and procedure of its payment;
- 17) recommendations to the General Shareholders' Meeting on the procedure of profits and losses distribution upon results of a financial year;
- 18) use of reserve and other funds of the Company;
- 19) approval of internal papers of the Company excluding internal papers which fall within the competence of the General Shareholders' Meeting according to this Statute and Federal Law "On Joint-stock Companies", or other internal documents of the Company which fall within the competence of the Director General and Management Board in accordance with the present Statute;
- 20) establishment and liquidation of the Company's branches and representative offices, approval of provisions on branches and representative offices, revision and expanding of these provisions;
- 21) approval of major transactions in cases provided for by Chapter X of the Federal Law "On Joint-stock Companies";
- 22) approval of transactions provided for by Chapter XI of the Federal Law "On Joint-stock companies";
- 23) approval of the Company Registrar and terms of agreement with him/her, as

well as cancellation of agreement;

24) suspension of the Director General's activity;

25) appointment of temporary acting Director General;

26) decision on Company's participation in other organizations, excluding participation in holding companies, financial and industrial groups, associations and other unions of commercial organizations;

27) establishment of Committees under the Board of Directors, approval of internal documents, which regulate activities of these Committees;

28) other matters provided for by the Federal Law "On Joint-stock Companies" and the present Statute.

The matters that fall within the competence of the Company's Board of Directors cannot be transferred to the executive body of the Company for decision.

Competence of the individual and corporate executive bodies of the issuer in accordance with its Statute (constituent documents):

The Competence of the Director General (Chapter 6, Article 37 of the Company Statute).

The competence of the Director General includes all issues of routine Company activities management excluding those in the exclusive authority of the General Shareholders' Meeting and the Board of Directors.

The Director General acts without any Power of Attorney on behalf of the Company, in particular:

- performs operative management of the Company's activities;
- has the right of the first signature in financial documents;
- represents the Company both in the RF and outside it;
- approves staff list, concludes employment agreements with employees of the Company, fires, applies incentive measures to employees and imposes penalties on them;
- governs the activities of the Management Board and presides at its meetings;
- presents for the Board of Directors' approval an individual list of the members of the Management Board;
- conducts transactions on behalf of the Company with the exception of cases stipulated by the Federal Act "On the Joint-Stock Companies" and this Statute;
- issues power of attorney on behalf of the Company;
- opens the Company's accounts with banks;
- makes provisions for the Company's accounting and book-keeping conduction;
- issues orders and gives instructions which are binding for all employees of the Company;
- defines a list of data representing commercial secret of the Company, and means of such data protection in accordance with the effective legislation;
- approves internal documents of the Company, which regulate the Company's routine activities, excluding those in the exclusive authority of the Management Board.

The Director General is entitled to appoint acting Director General for the period of his absence to be approved by the Board of Directors' Chairman.

The Competence of the Management Board (Chapter 6, Article 38 of the Company Statute).

The exclusive competence of the Company's Management Board includes:

- development and submission to discussion by the Board of Directors of the Company's

development concept;

- *securing of contracts concluding by Company assets when the amount due or the subject goods value exceeds 10 per cent of the balance value of the Company's assets, excluding transactions performed in the normal course of business;*
- *approval of internal routine Rules and other local regulations according to the list specified by the Director General;*
- *signing the Collective Agreement with the Company staff (authorized body);*
- *other issues regarded as those in the competence of the Company Management Board under the effective legislation of the RF.*

Availability of Corporate Behaviour Code or any other similar document:

The Extraordinary General Shareholders' Meeting, which took place on December 3, 2004, (Minutes No. 20) approved the Corporate Governance Code of OJSC "Novolipetsk Steel".

	Total	16 444 452	39 308 966

Remuneration can be paid and charges related to performance of Management Board members’ functions can be refunded to Management Board members within the period of their duties execution. The rate, conditions and procedure of remuneration payment and charges refund to members of the Board of Directors are established by the Regulations on remuneration of the Company’s Board of Directors members approved by General Shareholders’ Meeting.

Remuneration can be paid and charges can be refunded to Members of the Board of

Directors within the period of their duties execution. Conditions and procedure of remuneration payment and charges refund are established by a contract concluded with members of the Management Board, in accordance with the Regulations on remuneration of the Company's Management Board members' labor, approved by the Company's Board of Directors upon presentation by the Personnel and Remuneration Committee.

5.4. Information on structure and competence of controlling authorities over financial performance of the Issuer.

The Auditing Committee and Internal Audit Service exercise control over the financial and economic activities of the Company.

Auditing Committee

The Auditing Committee consists of five persons, is elected for a period of one year by the General Shareholders' Meeting and carries out its activities in accordance with the Regulations on the Auditing Committee approved by the General Shareholders' Meeting upon presentation by the Board of Directors.

The Regulations on the Auditing Committee regulate the Auditing Committee procedures, the authority of its members, the rate and procedure of remuneration payment and expenses reimbursement to members of the Auditing Committee

The Company's Auditing Committee Members cannot simultaneously be members of the Company's Board of Directors or take up any other posts in management bodies of the Company.

Audit of financial and economic activities of the Company is based on the yearly-based business results and is conducted at any time on initiative of the Auditing Committee of the Company and by the decision of the General Shareholders' Meeting, the Board of Directors or upon request of a shareholder (-s) owning in the aggregate at least ten per cent of the Company's voting shares.

The Auditing Committee audits financial and economic activity of the Company in order to verify conformity of the financial statements information to norms and requirements of the existing legislation, internal regulatory documents, performs selective investigation of proofs attesting figures accounting and notes to financial statements.

Upon results of Company's financial and economic activity auditing the Committee makes a report on authenticity of data contained in the Company's annual report, balance sheets, income statement.

Internal Audit Department

The Internal Audit Service – Audit Division, established sine die under Director General's Order dd. 17.04.1997, is administratively subordinated to the Director General.

Key staff: Valery S. Kulikov; Igor A. Matsak.

The competence of the Internal Audit Department covers:

- *auditing of financial and economic, commercial and production activity of the Company's divisions;*
- *evaluation of process related to acquisition, storage, protection and conservation of the Company's resources;*
- *detection of possible delinquencies, frauds and abuses on part of the Company's officials and reporting to the Company's managers on results;*
- *evaluation of internal control system as regards to efficiency of operations in the normal course of business.*

Management Board Members are informed on the results of the auditing upon their competency. The Board of Directors is informed in case of any material breach.

In process of its activity the Internal Audit Division cooperates with auditing firms working for the Company on contract basis.

Information on any inside document with the Issuer establishing rules aimed at prevention of inside information deployment:

A Provision on information policy of NLMK which establishes also rules aimed at prevention of inside information deployment was approved by the Board of Directors on September 12, 2005 (Minutes # 133) (see Appendix).

Procedure of shareholders (participants) notification on convocation of General Shareholders' Meeting:

The notification on convocation of General Shareholders' Meeting is brought to notice of the shareholders under decision of the Board of Directors by publication of the information in newspaper «Gazeta», newspaper «Metallurg» and in NLMK's web-site in the Internet. The notification on General Shareholders' Meeting convocation shall be published not later than 30 days prior to the date of the Meeting, if a longer term is not envisaged by law.

The shareholders owning one and more per cent of the Company's shares as well as nominal shareholders are informed of the meeting in written. The written notifications are sent by the registered mail not later the date stated in this clause.

Persons (bodies) having the right to summon (demand) the Extraordinary Shareholders' Meeting as well as the procedure of raising a demand:

The Extraordinary Shareholders' Meeting is held upon decision of the Board of Directors on the basis of its own initiative, demand of the Auditing Committee, Auditor as well as shareholders (shareholder) owning not less than 10 per cent of the Company's voting shares as of the date of the demand. The Extraordinary Shareholders' Meeting is summoned by the Board of Directors and must be held within 40 days from the date of a/m demand made by Auditing Committee, Auditor or shareholders in respect of the Extraordinary Shareholders' Meeting holding. In case of the Company's Board of Directors members election on the agenda to the Extraordinary Shareholders' Meeting as well as in case the Board of Directors liable to make a decision on holding of the Extraordinary Shareholders' Meeting under the Federal Law "On joint-stock companies" to elect the Board members this Shareholders' Meeting should be held within 70 days from the date of corresponding demand or decision of the Board to hold the Meeting.

A request for holding of Extraordinary Meeting shall contain worded issues to be included into the Meeting agenda. The request for holding of Extraordinary Meeting can contain worded decisions on each of these issues as well as suggestions on the Shareholders' Meeting conduction form.

The Board of Directors is not entitled to change wording of agenda issues, wording of decisions on such issues and to change offered form of Extraordinary Shareholders' Meeting being convened upon the request of the Auditing Committee, Auditor or shareholders (shareholder) being owner of not less than 10 per cent of the Company's voting shares.

Should request for the Extraordinary Meeting be submitted by shareholders (shareholder) it shall include the name of shareholders (shareholder), requiring the convocation, the quantity and type (category) of the shares belonging to them (him/her).

Request for the Extraordinary Meeting shall be signed by persons (person) who require Extraordinary Meeting convocation.

The Board of Directors shall make a decision on the Extraordinary Meeting convocation or on refusal to call it within five days from the date of the request submission by the Auditing Committee, Auditor or shareholders (shareholder) being owners of not less than 10 per cent of the Company's voting shares.

Decision on refusal to convene the Extraordinary Shareholders' Meeting upon the request of the Auditing Committee, Auditor or shareholders (shareholder) being owners of not less than 10 per cent of the Company's voting shares can be made in case:

- the procedure of the request submission on convocation of the General Shareholders' Meeting has been violated;*
- shareholders (shareholder) demanding the Extraordinary Shareholders' Meeting summoning do not possess the required quantity of the Company's voting shares;*
- none of the issues put forward to be included into the Extraordinary Meeting agenda refers to its competence and (or) corresponds to requirements of the Federal Law «On joint-stock companies» and other legal acts of the Russian Federation.*

Decision of the Board of Directors on the Extraordinary Meeting summoning or justified decision to refuse to call it is sent to persons who have required its convocation by registered mail with notice of receipt not later than 3 days from the date of the decision – making.

Should the decision on the Extraordinary meeting convocation be not made or should the decision to refuse to call the Extraordinary Meeting be made within the stated period by the Board of Directors, the Extraordinary Meeting can be summoned by persons or bodies demanding its convocation.

The procedure of the Meeting date determination:

Regular Annual Shareholders' Meeting is convened not earlier than in two months and not later than in six months after the end of a financial year. Extraordinary Shareholders' Meeting can be summoned along with a regular annual meeting.

Date, time and place of the General Shareholders' Meeting, the procedure of its preparation and conduction shall be determined by the Board of Directors under provisions of the Company Statute and Rules of Shareholders' Meeting conduction.

Persons entitled to make proposals to agenda of the Issuer's management body meeting as well as the procedure of these offers submission:

Shareholders (a shareholder), owing not less than 2 per cent of the Company's voting shares in aggregate are entitled to make proposals to agenda of Annual General Shareholders' Meeting and put forward candidate members to the Company's Board of Directors, Auditing Committee and Returning board, the number of which cannot exceed the number of respective body members as well as candidate Director General. Such proposals must be received by the Company not later than in 30 days after the date of a financial year end.

In case of the Company's Board of Directors election being on the agenda of the Extraordinary Shareholders' Meeting, shareholders (a shareholder) owing not less than 2 per cent of the Company's voting shares in aggregate are entitled to propose candidate members to the Board of Directors the number of which cannot exceed the number of the Company's Board. Such proposals must be received by the Company not later than 30 days prior to the date of the Extraordinary Shareholders' Meeting.

A proposal on issues inclusion into the agenda of the General Shareholders' Meeting

and a proposal on candidates shall be made in written, shall indicate the name of shareholders (shareholder), demanding it, the quantity and type (category) of the shares belonging to them (him/her) and shall be signed.

A proposal to enter issues into the agenda of the General Shareholders' Meeting shall contain wording of each proposed issue, while a proposal on candidates shall contain name of each proposed candidate, name of body to which that candidate is stated, other data on him/her provided for by internal documents of the Company as well as written consent of a candidate to take the title. A proposal on entering of issues into agenda of the General Shareholders' Meeting can include wording of decision on each proposed issue.

The Company's Board of Directors is liable to consider received proposals and make a decision on inclusion of them into the agenda of the General Shareholders' Meeting or refusal to include into the agenda not later than 5 days after deadlines stated in the Company's Statute for inclusion of proposals into the agenda of the Annual General Shareholders' Meeting and Extraordinary General Shareholders' Meeting. An issue proposed by shareholders (a shareholder) is subject to entering the agenda of the General Shareholders' Meeting as well as proposed candidates are subject to entering a slate for voting on election to respective bodies of the Company except if:

- shareholders (a shareholder) have violated terms established by the Company's Statute;*
- shareholders (a shareholder) do not own the relevant number of the Company's voting shares as stated in the Company's Statute;*
- a proposal is not in conformity with the requirements of the Company's Statute;*
- an issue proposed for agenda of the General Shareholders' Meeting is not within its competence and (or) is not in conformity with the requirements of the Federal Act «On the joint-stock companies» and other legal acts of the Russian Federation.*

Justified decision of the Company's Board of Directors on refusal to include the proposed issue into the agenda of the General Shareholders' Meeting or a candidate shall be sent to shareholders (shareholder) who put forward the issue or candidate not later than three days from the date of its receipt.

The Board of Directors is not entitled to change wording of the agenda issues, wording of decisions on such issues of the General Shareholders' Meeting.

Besides issues proposed to be included into agenda of the General Shareholders' Meeting as well as in case of absence of such issues, absence or insufficient quantity of candidates proposed by shareholders to form corresponding body, the Board of Directors has the right to include issues into the agenda or candidates into the slate of the General Shareholders' Meeting at its discretion.

Persons which have the right to get acquainted with information (materials) presented for Supreme Management Body Meeting preparation and conduction as well as procedure of getting acquainted with such information (materials):

Persons having the right to participate in the General Shareholders' Meeting can receive information (material) subject to presentation during preparation of General Shareholders' Meeting for getting acquainted in the room of the Company's executive body and at places the addresses of which are stated in announcement on General Shareholders' Meeting holding within 20 days and in case of General Shareholders' Meeting the agenda of which includes an issue on the Company's reorganization, within 30 days prior to the General Shareholders' Meeting as well as during the Meeting itself at place of its holding.

Persons having the right to participate in the Company's General Shareholders' Meeting can receive copies of the stated documents upon request sent in written to the Company's executive body subject to payment.

8.1.5. Information on profit-making organizations with the Issuer's holding of not less than 5 per cent of stockholders' equity (unit fund) or not less than 5 per cent of common stock.

1. Full name: *Limited liability company «Lipetsk insurance company «Shans»*

04.03.2004

8.7. Information on legislative acts regulating import and export of capital, which could affect payment of dividends, interest and other payments to non-residents.

International agreements and contracts on double taxation prevention, Tax Code of the Russian Federation (part one) No. 146-FZ dd. 31.07.1998 (revision dd. 02.11.2004), Tax Code of the Russian Federation (part two) No. 117-FZ dd. 05.08.2000 (revision dd. 30.12.2004), Federal Law No. 173-FZ dd. 10.12.2003 "On currency control" (revision dd. 29.06.2004), Federal Law No. 39-FZ dd. 22.04.1996 (revision dd. 07.03.2004) "On securities market", Federal Law No. 208-FZ dd. 26.12.1995 (revision dd. 29.12.2004) "On joint-stock companies" are considered as legislative acts which regulate import and export of capital and which could affect payments of dividends, interest and other payments by the Issuer to non-residents who have the Issuer's securities in possession.

8.8. Description of income taxation procedures regarding placed and being placed Issuer's securities.

Owners of the Company's stocks can receive income as dividends and income from stocks sale. Organization's income is taxed under Chapter 25 «Profit tax of organizations» of Tax Code of the Russian Federation, natural persons are taxed under Chapter 23 «Natural persons' income tax».

Dividends.

In case of dividend payment to natural persons and organizations the Company acts as Fiscal agents, i.e. it makes calculations, deduction from dividends and transfer of natural persons' income tax and profit tax of organizations to the budget.

Legal persons.

Organization's profit from dividends is taxed under Chapter 25 «Profit tax of organizations» of Tax Code of the Russian Federation.

Dividends paid to organizations which are Russian tax payers, are taxed at 9% tax rate (subclause 1 clause 3 Article 284 Tax Code of the Russian Federation), foreign organizations – at 15% tax rate (subclause 2 clause 3 Article 284 Tax Code of the Russian Federation).

Natural persons.

Tax rate of natural persons' (RF nationals) income tax is 9% and 30 % for non-RF nationals.

Income from stocks sales.

Legal persons.

A feature for tax base for RF nationals in case of securities operations is defined by Articles 280 and 283 of Tax Code of the Russian Federation. Profit tax shall be paid at 24% tax rate (clause 1 Article. 284 of Tax Code of the Russian Federation).

Procedure of taxation of non-RF nationals is controlled by Articles 306-307, 309-312 of Tax Code of the Russian Federation. Foreign organizations which do not perform profit-oriented business in the Russian Federation, pay profit taxes upon stocks sale of Russian companies, where more than 50% of assets consist of real estate at the territory of the Russian Federation as well as financial instruments being derivatives of these shares. At that income from trade of securities on foreign stock exchanges or financial instrument being in circulation on these exchanges is not recognized as income received from RF sources of revenues (subclause 5 clause. 1 Article 309). Fiscal Agent makes calculations and deduction of profit tax at 20% or 24% tax rate. 20% tax rate can be applied only in case tax base is a full amount of profit from stocks sales (subclause 1 clause 2 Article 284). 24% tax rate shall be applied if the tax base is defined under the procedure similar to that applied to organizations – RF tax payers (clause 4 Article 309 and clause 1 Article 284).

Natural persons.

Procedure of taxation of natural persons' income from securities operations is established by Articles 214-1, 220, 224 Chapter 23 of Tax Code of the Russian Federation.

Income (loss) on sales of securities is defined as difference between income from securities sales and documented securities sales proceeds and documented expenses of acquisition, sale and storage of securities actually incurred by a tax payer or assessed tax deduction taken to decrease securities sales income. Assessed tax deduction is not provided for natural persons being non-RF residents.

Assessed tax deduction is granted to a tax payer as regards to full amount received by him during tax period (duration of tax period is one year) from sales of securities being in his possession for three or more years, and in case securities were in possession of a tax payer less than 3 years, then amount of assessed tax deduction in case of their sale cannot exceed 125 000 rubles.

Tax rate for stated income of natural persons being RF residents is 13 percent.

Tax rate for stated income of natural persons being non-RF residents is 30 percent.

Tax is calculated and paid by a fiscal agent upon completion of tax period or in case of payment to tax payer before expiration of successive tax period.

Should it be impossible to withhold calculated amount of tax from a tax payer, a Fiscal agent shall inform tax authorities in written within one month from the date of this event occurrence on impossibility to withhold and on amount of tax debt.

Application of International Agreements.

If provisions of international agreements concluded by the Russian Federation (or USSR, if the RF declared these agreements valid) with other states residents (natural persons or organizations) of which obtain income of the Company's shares, laid down other taxation rules and standards as compared to the same of the Russian Law, rules and standards provided for by international agreements shall apply subject to meeting conditions established by the Law.

APPENDIX to clause 5.4 “Information on structure and competence of the Issuer’s management bodies”

Approved:
by the Board of Directors
Open Joint-Stock Company
«Novolipetsk Steel»
September 12, 2005
Minutes No. 133

The Provision
on INFORMATION POLICY OF NLMK

Lipetsk

1. GENERAL PROVISIONS

1.1. Regulations on Information Policy (hereinafter referred to as "Regulations") of Open Joint-Stock Company "Novolipetsk Steel" (hereinafter referred to as "the Company") have been drawn in accordance with the existing legislation of the Russian Federation, listing rules of Russian and foreign stock exchanges, Corporate Management Code of the Company, as well as other internal documents of the Company.

1.2. The objective of the Company's information policy is the provision of complete and reliable information on the Company and its activities to shareholders, potential investors, security dealers (hereinafter referred to as "Interested parties")

1.3. The Company's information policy is aimed at full execution of shareholders' rights to receive information essential for making investment and managing decisions, as well as the Company's confidential information protection, the divulgence of which may cause damage to the Company and its shareholders.

1.4. The procedure of the obligatory disclosure (gaining) of information, representing the State secret, is established and maintained in accordance with legislation of the Russian Federation.

2. BASIC PRINCIPLES OF THE COMPANY'S INFORMATION POLICY

2.1. The basic principles of the Company's information policy are the following: regularity, efficiency, availability, reliability, completeness, balanced nature, equality, information resources security.

2.2. The principle of regularity means that the Company intends to provide regularly the information on the Company to the Interested parties by means of available communication media.

2.3. The principle of efficiency means that the Company intends to inform the Interested parties as promptly as possible of the most significant events and facts related to their interests and the Company's activities.

2.4. The principle of availability means that the ways to provide the significant information on the Company to the Interested parties will ensure free and easy access to this information.

2.5. The principle of reliability means that the Company intends to provide to the Interested parties the information which represents the facts, and to see to it that the submitted information is not distorted and is not wrong.

2.6. The principle of completeness means that the Company intends to provide the sufficient information on itself to the Interested parties, for them to get the clearest idea of the issue they are interested in.

2.7. The principle of balanced nature means that the Company is guided by the reasonable balance of openness and transparency on the one hand, and confidentiality – on the other hand. The reasonable balance is achieved due to intention to execute fully the shareholders' rights related to gaining information, subject to rigorous protection of the shareholders' interests related to restriction of access to commercially valuable and other significant information.

2.8. The principle of equality means that the Company maintains equal rights of all shareholders related to obtaining information, taking into consideration the requirements of existing legislation of the Russian Federation.

2.9. The principle of security means that the Company will apply the ways and means of information protection, permitted by Russian law, to secure the information representing State secret, as well as official and commercial secret of the Company.

3. PUBLIC DISCLOSURE OF INFORMATION

3.1. The content of information, which is publicly disclosed by the Company in accordance with requirements of the existing legislation of the Russian Federation, as well as resulting from the Company's liabilities, related to circulation of its securities in stock exchanges.

In accordance with norms and requirements of the existing legislation the Company publicly discloses the following information:

- Quarterly Reports of the Issuer;
- Annual Reports of the Company;
- Annual Financial Statements of the Company;
- Announcements of significant facts (events, actions) related to the Company's financial and economic activity (including but not limited by: on the Company restructuring, on its associated and controlled companies, on facts which entailed a non-recurrent increase or decrease in the Company's net assets value) that exceeded 10%, on facts which entailed a non-recurrent increase (decrease) in the Company's net profit (loss) that exceeded 10%, on individual transactions of the Company the value of which or property value of which amounts to 10% or more of the Company's asset value as of transaction date; on securities issue by the Company; on accrued and/or paid out proceeds on the Company's securities, on decisions taken at General Meetings, on decision taken by the Company's authorized body regarding securities issue;
- Information which can significantly affect the value of the Company's securities (including, but not limited by: expiration of authorities of single executive and/or members of corporate executive bodies of the Company; on initiation of bankruptcy proceedings or one of the bankruptcy procedures against the Company and/or its associated and controlled companies, on the contract concluded by the Company with a Stock Exchange for listing of the Company's securities; on inclusion of the Company's securities in the list of securities, admitted to the securities market; on exclusion of the Company's shares from the above mentioned list; on the Company's receipt of the permit for circulation/distribution of a public company's securities outside of the Russian Federation, issued by the federal executive body);
- List of the Company's affiliated persons;
- The Company's issue prospectus (additional securities issue);
- Notifications of the securities issue (additional issue) state registration;
- The Statute, amendments and addendums to it, as well as provisions and regulations, which govern the activities of the Company's management bodies, the Company's General Shareholders' Meeting, the Board of Directors, the Company's Management Board, with all the amendments and additions to them.

3.2. The Company's liabilities related to additional disclosure of information on its activities

The Company prepares and discloses the following information on its activities (apart from the information required by the Russian legislation, as well as resulting from the Company's liabilities related to circulation of its securities in stock exchanges):

- On the principles of the Company's corporate management;
- On the Company's strategies and development projects;

- Members of the Company's Board of Directors, including information on changes within the reporting year, as well as short biography of the Company's Board of Directors;
- Information on the Company's General Director and members of the Management Board, as well as their short biography;
- Periodical information on the Company's production, financial, economic and intracorporate activities;
- On important events and results of the Company;
- On the Company's social policy;
- On the Company's ecological activities;
- On mass-media statements of the General Director, the Company's Board of Directors Chairman, the Company's press-releases.

3.3. Information disclosure procedure, forms and methods

3.3.1 The Company discloses information according to the extent, procedure and forms established by the existing legislation of the Russian Federation (including disclosure of information in the news coverage of authorized agencies; publication in mass media, publication of information on the Company's web-site (www.nlmk.ru) in the Internet, etc.)

3.3.2 The Company, in the effort to guarantee the shareholders' information rights and to ensure efficiency and availability of significant information, uses the following media:

- Sending (forwarding) of documentary data (hard copy).
- Submission of information on a magnetic medium (in cases established by law).
- Disclosure of information by way of mass media.
- Publication on the Company's web-site in the Internet.
- In the course of public statements, as well as group and personal meetings with the Company's Interested parties.

3.3.3 The information subject to obligatory disclosure is periodically submitted in accordance with the existing legislation of the Russian Federation and the Company's liabilities, related to circulation of its securities in stock exchanges, within the time-limits established by law and the relevant liabilities.

3.3.4 The Company conducts planned meetings with Interested parties, in order to discuss significant events of the Company, find out what they think about important issues related to the Company's development and activity (including the period of securities issue preparation).

3.3.5 The Company organizes briefings (press-conferences) in connection with publication of periodic financial statements, conducting of Shareholders' Meetings and other significant corporate events.

3.3.6 The Company publishes all the most significant announcement and materials on its web-site, if necessary it publishes brochures and booklets for distribution.

3.3.7 When the Company issues securities, it discloses information on motives of securities issue, on persons intending to purchase the issued shares, including blocks of shares (if this information is available).

4. THE PROCEDURE OF INFORMATION PROVISION TO SHAREHOLDERS

4.1. Information is furnished to shareholders by the Company's Corporate Secretary, who is responsible for contacts with the Company's shareholders.

4.2. Documents are provided to shareholders upon submission of a written request to the Company's General Director. In the request it is necessary to mention the person's name (for legal entities – name and domicile), number of shares belonging to this person and the title of the requested document.

4.3. Before the requested documents or their copies are provided, it is checked if the person who has submitted the request owns shares as stated.

4.4. Documents are provided by the Company within seven days from the date of the relevant request submission on the premises of the Company's executive body (address: 2 pl. Metallurgov, Lipetsk, Russia). Upon request of persons who have the right of access to documents, the Company provides copies of the mentioned documents (including by mail, by registered letter with notification). The fee the Company collects for these copies shall not exceed costs of their making.

4.5. The list of documents and materials provided to shareholders for them to make decisions on the issues on the agenda of the Annual General Shareholders' Meeting, is annually approved by the Company's Board of Directors. It includes:

- the Company's Annual Report;
- Annual Financial Statements, including Profit and Loss Statement;
- recommendations of the Company's Board of Directors on distribution of the Company's profits, including distribution of dividends, and grounds for these recommendations;
- report of the Company's Auditing Commission;
- report of the Company's auditing organization based on the results of annual control of the Company's financial and economic activity;
- information on candidates to the Company's Board of Directors and Auditing Committee;
- information on candidates to the Company's Auditor.

4.6. If the agenda of the Annual Shareholders' Meeting includes an issue related to the Company restructuring, the following documents are provided to shareholders (apart from those required by law):

- grounds of the Company restructuring,
- report of a security dealer,
- annual reports and annual financial statements of all organizations, which take part in the restructuring, for the last 3 financial years,
- quarterly reports drawn at least 6 months prior to the meeting, at which restructuring is discussed, in case more than 6 months have passed from the end of the last financial year.

4.7. If the agenda of the Annual General Shareholders' Meeting includes a matter of additional securities issue and the draft decision on this point envisages shares paying up by nonmonetary funds, shareholders are furnished with the list of property that can be used for such payments, and the property assessment report.

4.8. The content of the Annual Report provided to shareholders prior to the Annual General Shareholders' Meeting shall correspond to the requirements of the existing legislation of the Russian Federation, that governs the procedure of preparation, calling and conducting of Shareholders' Meetings.

4.9. The Annual Report is signed by the Company's General Director and Chief Accountant after the preliminary approval by the Board of Directors. If one member of the Board of Directors expresses disagreement with information contained in the Annual Report, he shall present his disagreement in written form (present individual opinion). The individual opinion is submitted to the Company's shareholders along with the Annual Report.

5. INFORMATION REPRESENTING COMMERCIAL OR OFFICIAL SECRET

5.1. Information representing the Company's commercial secret includes scientific and technical, process, production, financial and economic and other information, which has actual or potential value due to being unknown to third parties, to which there is no legal access and which the Company (its owner) regards as a commercial secret.

5.2. The Company, represented by the General Director and information security services, takes measures to secure confidentiality of information, establishes access procedures and lists the materials which represent the Company's commercial secret, maintaining the reasonable balance of the Company's transparency and determination not to infringe on its interests.

5.3. The list of materials representing the Company's commercial or official secret and operational procedure for such materials are specified in the Company's internal documents.

5.4. The data confidentiality conditions are obligatorily included in the labour contract with the Company's officials and employees.

6. INSIDER INFORMATION

6.1. Insider information is the significant information on the Company's activities, shares, other securities and transactions with them, which is not open to public, and the disclosure of which can fundamentally affect the market price of shares and other securities of the Company.

Unauthorized use of such information can do substantial damage to the Company's shareholders and result in significant adverse consequences for the Company's financial condition and its business reputation.

Characteristics of this information are the following:

- its direct relation to the Company and/or the Company's associated companies, as well as the Company's business perspectives and/or associate companies;
- specific and precise nature;
- it is not open to the public;
- in case of publication it is likely to affect sufficiently the price of shares or other securities of the Company and/or the Company's associated companies.

6.2. Insider information also includes information subject to disclosure in accordance with the existing legislation of the Russian Federation and the Company's internal documents until the moment of its disclosure, in case such disclosure can significantly affect the market price of shares and other securities of the Company.

6.3. Significant information includes materials, facts and data on activities or securities of the Company or any of its associated companies, in relation to which there is a substantial possibility that a reasonable investor could consider this information important for making a decision on purchasing, selling or saving a security, in case the mentioned materials, facts and data can significantly affect the security market price.

6.4. The insider information carriers (Insiders) are shareholders, members of the Board of Directors, members of Committees under Board of Directors, General Director and members of the Company's Management Board, members of Auditing Committee, managers and employees of the Company's departments, whose positions enable them to have documents, materials and actual data which have not been disclosed and are likely, if so, to affect significantly the Company's securities value.

6.5. The insider information carriers are also other natural persons and legal entities, which were granted access to the insider information on the basis of civil contracts (auditors, specialized depositories, security dealers)

6.6. Other natural persons and/or legal entities can also be acknowledged to be carriers of insider information, if they got access to it legally or illegally.

7. USE OF INSIDER INFORMATION

7.1 Insiders are forbidden to divulge insider information available to them or information based on it.

7.2 Persons who have the right of access to insider information are not entitled to use insider information to their own advantage or the advantage of the third parties, as well as perform any actions with insider information for purposes contrary to objectives and interests of the

Company and its associate and controlled companies, which may cause harm/losses to the above companies, inclusive of (but not limited by):

- effect transaction with any securities of the Company on the basis of insider information;
- submit illegally insider information or information based on it to third parties or make it available to third parties;
- give recommendations to third parties on transactions with securities based on insider information;
- publish or distribute insider information by other means.

7.3 Persons mentioned in items 6.4. - 6.6. of these Regulations, who have divulged insider information, are held liable in accordance with the existing legislation of the Russian Federation.

7.4 The Company's officials and employees assume responsibility not to divulge insider information in their labour contracts.

8. PROCEDURE OF INFORMATION DISCLOSURE BY THE COMPANY'S REPRESENTATIVES

8.1. The Chairman of Board of Directors, taking into consideration the opinion of Board of Directors, officially comments and interprets decisions taken by the Board of Directors, as well as expresses its opinion on issues discussed at its meetings.

8.2. The Chairman of Board of Directors is entitled to delegate its powers, mentioned in item 8.1 of these Regulations, to members of Board of Directors.

8.3. Chairmen of Committees under Board of Directors are entitled to inform the Interested parties on decisions taken at the Committees meetings and comment this information.

9. CONTROL OF REGULATIONS OBSERVATION

9.1. The observation of norms of the existing legislation of the Russian Federation and special requirements envisaged by the Company's internal documents, in order to avoid the conflict of interests and misuse of insider information by employees and departments of the Company, is controlled by:

- regarding the members of Board of Directors and General Director – by the Chairman of Board of Directors;
- regarding the members of Management Board – by the Chairman of Board of Directors;
- regarding other officials and the Company's employees – by the General Director.

10. FINAL PROVISIONS

10.1. These regulations are approved by the Company's Board of Directors.

10.2. If as a result of changes in the Russian legislation some articles of these Regulations are in conflict with it, these articles become void, and, until the Regulations are amended, the Company is governed by the existing legislation of the Russian Federation.

- Methodical recommendations on procedure of financial statements values preparation approved by RF Ministry of Finance Order No. 60 н dd. 28.06.2000.

- Methodical instructions on planning, accounting and calculating of production costs at steel-making companies approved by RF Committee on steel industry on 08.10.2004.

- Other normative documents applied in the field of accounting regulation.

1.2. According to Articles 6 and 7 of Law No. 129-Φ3 persons in charge are:

1.2.1. Director General of a Company – for organization of accounting and observance of legislation for financial and economic operations.

1.2.2. Chief Accountant of a Company – for development of accounting policy, maintaining of accounting, in-time presentation of complete and authentic financial statements.

1.2.3. Managers of a corresponding subdivision is in charge for organization of accounting in their subdivisions transferred to a separate balance, observance of legislation for financial and economic operations, in-time presentation of complete and authentic financial statements.

1.3. Accounting of the Company is maintained by Accounting Department arranged as a self-dependent subdivision headed by Director of Accountin – Chief Accountant.

1.4. Amount is recognized as significant for reflection of values in balance sheets and income statement of the Company if the ratio of it to total of corresponding values for the reporting year is not less than 5 percent.

1.5. Automated form of accounting is used in the Company.

1.6. Taking in account complex company's structure of organization and production, NLMK shall introduce additional subaccounts on its own by Order of Director for Accounting with adherence to basic methodological principles of accounting maintenance established by Chart of accounts in case of financial and economic operations, correspondence upon which is not provided for by typical Chart of Accounts.

2. Provisions on accounting policy for accounting

2.1. Accounting of non-current assets

2.1.1. A part of real estate and property of value under RUR 10000 per a unit with useful life more than 12 months are accounted according to the order set forth in 2.5.9. of these Provisions, at that the data on balance of the stated real estate and property shall be shown in financial and statistics statements, Form No. 1 in line 120, Form No. 5 in line 370, Form No. 11 in line 01.

2.1.2. Special tools, advices and equipment shall be accounted in the order established for non-current assets accounting according to Provision on accounting "Non-current assets accounting" PBU 6/01.

2.1.3. Real estate and property taken into operation and actually used and being in process of state registration shall be included into non-current assets and depreciable groups starting from the moment of documented fact of documents filing for registration of the stated rights.

2.1.4. Historical cost of non-current assets is accounted in integral roubles. Differences resulted from rounding of actual costs on acquisition, installation or manufacture of non-current assets to integral roubles shall be accounted as operating income (expenses).

2.1.5. Travelling expenses over norms related to acquisition and manufacture of non-current assets are reflected in extra-sales expenses.

2.1.6. Historical cost of non-current assets, received upon contracts and agreements stipulating fulfilment of obligations (payment) by non-monetary means, is recognized as the price of valuables handed over or subject to be handed over established on the basis of the price which is taken by NLMK as the basic one for determination of a price for similar valuables in comparable circumstances.

Should it be impossible to define value of valuables handed over or subject to be handed over by the company, value of above mentioned non-current assets is defined on the assumptions of value of acquisition of similar non-current assets in comparable circumstances.

2.1.7. Value of non-current assets received gratis, inclusive of upon agreement of gift, shall be accounted as deferred income upon the market value with further attribution to financial performance as extra-sales income during useful life at the rate of charged depreciation.

2.1.8. Non-current assets are amortized and depreciated by charging of depreciation by linear method on the assumptions of their book value and norms of depreciation, calculated on the basis of their useful life. Useful life for non-current assets is defined by Committees assigned by Orders of Managers of shops and subdivision according to Classification No. 1 approved by Provisions of the RF Government dd. 01.01.2002.

2.1.9. For non-current assets acquired in 2001 relevant to group of fixed assets "Agricultural tractors" and "Agricultural Machinery and equipment" depreciation is charged by writing-off of value upon sum of years of useful life.

2.1.10. Charging of depreciation and amortization is suspended in case of preservation of non-current assets for over three months upon the decision taken by director General of the Company as well as during the period of recovery the duration of which exceeds 12 months.

2.1.11. To take into account operation on sales and other retirement of non-current assets a separate subaccount "Retirement of non-current assets" to account 01 "Fixed assets" is opened. Value of retired assets is reflected in debit of this subaccount, while amount of accumulated depreciation is shown in credit. The residual value of the object, revealed in this subaccount, shall be written-off to account 91 "Other income and expenses".

2.1.12. Income and expenses related to retirement of non-current assets shall be reflected in accounting for the reporting period to which they relate and are accounted in income statement as operating income and expenses.

2.2. Accounting of intangible assets

2.2.1. Within intangible assets exclusive rights for results of intellectual activity being in compliance with Provisions on accounting "Accounting of intangible assets" PBU 14/2000 are accounted.

2.2.2. Amortization and depreciation of intangible assets are charged by linear method of depreciation pro rata (on monthly basis) by carrying of historical cost to costs of production upon norms defined by NLMK itself on the assumption of their useful life.

2.2.3. Useful life of intangible fixed assets is calculated either on the assumption of term of patent, certificate or other limitation of intellectual property use according to the Russian Law or on the assumption of expected life of this object during which NLMK could gain profit (income), or on the assumption of products quantity or any other natural exponent of volume of work resulted from this object use.

2.2.4. Norms of depreciation charges for intangibles fixed assets upon which it is impossible to define useful life are established in anticipation of twenty years (but not more than the period of company's activity).

2.2.5. Amortization and depreciation of intangible assets are reflected in accounting by accumulation of corresponding sums on account 05 "Amortization and depreciation of intangible assets" in that reporting Period, during which they took place.

2.2.6. In case of payment of acquired intangible assets by non-monetary means their value is taken for accounting on the assumption of price of products (works, services), handed over or subject to handing over by the company.

In case of necessity to define the value of valuables handed over or subject to handing over by the company, the value of the abovementioned intangible assets shall be calculated on the assumption of the value upon which similar intangible assets are acquired in comparable circumstances.

2.3. Accounting of financial investments

2.3.1. Accounting of financial investments is to be performed according to Provisions on accounting "Financial investments accounting" PBU 19/02.

2.3.2. A unit of financial investments accounting is:

a share – in shares accounting;

a bond – in bond accounting;

a share – in shares to stockholders' equity;

series, number – in certificates of deposits accounting;

an agreement – in accounting of loans, deposits, cession contracts and society in participation.

2.3.3. Debenture securities, upon which the current market value is not defined, are not revaluated within the period of circulation in case of difference between the sum of actual expenses and par value.

2.3.4. Financial investments, upon which the current market value is defined in the set order, shall be reflected at the reporting year end upon their current market value. In case of listing availability at several stocks, quotation of Stock Exchange RTS is to be considered as priority.

2.3.5. Estimation of debenture securities and loans granted assessment upon their discounted value shall not be performed.

2.3.6. Formation of provisions for devaluation of financial investments upon which no market value is defined shall be performed as of December 31 of the reporting year involving signs of devaluation.

2.3.7. Securities (shares, bonds), upon which no current market value is defined, shall be evaluated during retirement upon average historical costs.

2.3.8. Securities (with exception of shares, bonds), investments to stockholders' capitals of others organizations, deposits under agreement of society in participation,

loans granted to other organizations, deposits in credit institutions, accounts receivable formed on the basis of assignments, shall be evaluated upon acquisitions costs of each unit of accounting upon its retirement''.

2.3.9. In case of assets transfer to charter capital of the Company by non-monetary funds, difference between money evaluation of assets being transferred defined by an independent appraiser or agreed by the parties and their residual value shall be reflected within other operating income (expenses).

2.3.10. In analytical accounting of state securities and securities of other organizations the following information shall be generated: Issuer's name, security name, number, series, par value, acquisition price, expenses related to securities acquisition, total number, acquisition date, selling date or any other retirement date, storage place.

2.3.11. Expenses related to acquisition of securities being less than five per cent of amount to be paid according to agreement to the Seller shall be recognized as other operating expenses.

2.3.12. Actual expenses on acquisition of financial investments shall be defined (increased or decreased) taking into account sum differences appeared before putting assets as financial investments on accounting.

2.3.13. Financial investments with maturity over a year and not being long-term investments at time of acquisition shall be accounted as short-term ones.

2.3.14. Interest income upon securities (bonds, deposit certificates, bills) is recognized at time of interest payment.

2.4. Accounting of investments into non-current assets

2.4.1. Accounting of non-current assets shall be performed according to Provisions on accounting "Accounting of agreements (contracts) on capital construction" PBU 2/94 and "Provisions on accounting of long-term investments" approved by RF Ministry of Finance No. 160 dd. 30.12.1993 as well as by Provisions on accounting "R&D expenses accounting" PBU 17/02.

2.4.2. Settlements between NLMK (Builder) and Contractor are performed on monthly basis according to agreement on construction and Certificate on value of works done (Form No. KC-3) prepared on the basis of Report on works done (Form KC-2) after step-by-step acceptance by the Builder of works done. Information on value of works done contained in Forms KC-2 and KC-3 is considered as basis for reflection of expenses related to construction of non-current assets on account 08 "investments into non-current assets".

2.4.3. Expenses related to R&D the results of which will be used in production process or for management needs of the Company shall be accounted on account 08 "Investments into non-current assets" and shall be written-off in amount of actual expenses to account 04 "Intangible assets" in the month in which the R&D works implementation report is approved.

2.4.4. The Company's expenses on R&D the results of which are used in production process or for management needs shall be accounted in account 04 "Intangible assets" separately and shall be written-off to expenses on common activity by linear method within three years starting from the first day of a month following the month in which the R&D results start to be used.

2.5. Accounting of inventories

2.5.1. Accounting of inventories acquired subject to payment is performed upon

supplier's invoice price with adding of a part of actual costs related to inventory purchasing generated during the period of formation of their value till the moment of posting to a specific nomenclature number.

A unit of inventory accounting shall be a nomenclature number.

2.5.2. A part of actual expenses on acquisition of materials generated after formation of materials on the specific nomenclature number as well as sum differences shall be reflected (accounted) on account 16 "Deviations in inventory value".

2.5.3. Deviations accounted on account 16 "Deviations in inventory value" the specific weight of which does not exceed five perent to invoice value shall be written-off in full on monthly basis to debet of accounts on which materials consumption is reflected pro rata value of purchased materials spent.

2.5.4. Value of inventories received gratis, inclusive of upon agreement of gift, shall be accounted as deferred income upon the market value with further attribution to financial performance as extra-sales income at the rate of costs attributed to production

2.5.5. Actual value of inventories acquired under agreements which provide for payment by non-monetary means is calculated on the assumption of goods (valuables) value handed over or subject to be handed over by the company. The value of goods (valuables) handed over or subject to be handed over is defined on the assumption of the value upon which the company usually defined value of similar goods (valuables) in comparable circumstances.

2.5.6. Inventories arrived with no commercial invoices received yet from suppliers shall be debited from non-invoiced deliveries upon prices taken from contracts.

2.5.7. Inventories belonged to the company but being en route or handed over to a buyer in pledge shall be accounted upon evaluation, provided for in contract, with further adjustments of actual value.

2.5.8. While putting inventories into production or taking any other retirement, their evaluation shall be done upon an average price, which includes amount and value of inventories as of the reporting month beginning and all takings for the reporting month.

2.5.9. Property with value of not more than RUR 10000 for a unit with useful life of over 12 months as well as acquired books, brochures and other publications is accounted on account 10 "Materials" and written-off to costs of production as they are put into operations.

Analytical accounting of their movements is performed on off-balance account. To reflect real estate and property that transferred from category of low value assets uniformed forms No. МБ-2, МБ-4, МБ-7, МБ-8 are applied.

2.5.10. Evaluation of in-house waste products and co-products is performed upon prices approved by Division of Economics and Finance.

2.5.11. Evaluation of coke breeze and coke nuts produced while screening of metallurgical grade coke in blast furnaces shall be done upon their actual production costs of the previous month.

2.5.12. Parts, nodes and other materials collected during disassembling (dismounting) of repaired non-current assets, and suitable for further use as well as other materials are debited upon current market value in correspondence with account 91 "Other income".

2.5.13. Expenses on repair of parts, nodes, spares and other materials being in use shall be included into their value.

2.5.14. Travelling expenses over norms related to acquisition of materials are reflected in extra-sales expenses.

2.5.15. Value of containers received from suppliers and included into price of valuables shall be debited in correspondence with account 91 "Other income" upon price of possible use or sales in case of containers use or sales.

2.6. Accounting of goods

2.6.1. Goods for retail trade shall be evaluated upon selling (retailing) prices on account 42 "Mark up".

2.6.2. Accounting of expenses on provisions and transportation of goods from company's retailing warehouses to retail traders is performed within distribution costs on account 44 "Trade expenses".

Expenses on transportation shall be distributed between goods sold and goods balance as of the month end and shall be debited on account 90 "Sales".

2.6.3. A part of expenses for sale in OPC related to free of charge serving of milk and prophylactic nutrition to employees employed in positions with hazardous working conditions shall be included into production costs.

Sum of expenses shall be defined upon ratio which is calculated as quotient of dividing of total distribution costs by sum of retail and wholesale trade turnover (free of VAT and trade mark up) to be multiplied by value of milk and prophylactic nutrition served.

2.7. Accounting of costs of production and sales of products, works, services

2.7.1. Account 20 "Core production" is applied to account costs on production, where expenses of core and non-core production are accounted.

For calculation of costs of products (works, services) methods of calculation by production stand and by orders are applied.

2.7.2. The following expense items are established for accounting:

- raw materials and main materials;
- purchased items, semi-finished products;
- wastes (including carbon monoxide);
- rejected products;
- additional products;
- auxiliary materials;
- auxiliary materials for technology;
- process fuel;
- energy cost for technology;
- remuneration of labour;
- repair of fixed assets;
- maintenance of fixed assets;
- amortization and depreciation of fixed assets;
- expenses of intracompany transportation of cargos;
- other expenses in a shop;
- expenses on preparation and mastering of processes;
- losses due to rejected products;
- co-products;
- construction in progress.

2.7.3. General expenses shall be recognized in full in costs of sales for the reporting period as expenses on common activity.

2.7.4. Deferred expenses irrespective of their type are subject to attribution to corresponding accounts on monthly basis by equal portions in amounts based on contracts or the Company's calculations within the time to which they refer.

2.7.5. Expenses on voluntary property and personal insurance shall be included into cost of goods sold in that reporting period in which payment was effected according to the contract. If insurance fee was paid as nonrecurring amount according to the insurance contract, expenses are recognized equally within the insurance contract validity time when they are concluded for over one reporting

period.

2.7.6. Expenses related to transportation of material resources (inclusive of handling) in the territory of the Company by vehicles and personnel of the Company are subject to inclusion into production stage expenses of corresponding subdivision.

2.7.7. Actual expenses related to all repairs of production fixed assets (current, midterm, overhauls) are directly included into costs of products (works, services) upon their completion.

2.7.8. While calculating losses due to rejected products in case of negative yield in rolling, BOF shops, actual costs of products for the previous month are applied.

2.7.9. Losses due to rejected products revealed in rolling shops due to faults of BOF shops shall be attributed to BOF shops. Should rejected products be revealed on the first production stage, losses on rejection are calculated on the assumption of actual expenses on production stage for the previous month. Should rejected products be revealed at later production stages, losses on rejection are calculated upon actual production costs of the previous month less value of rejected products upon established prices. Calculation of losses due to rejected products shall be performed for each product mix of rejected products. For calculation of losses from rejected products in rolling shops packing value should be excluded.

2.7.10. Indirect expenses of main production shops are distributed according to specific character defined in industry-wise methodical recommendations on planning, accounting and calculation of production costs at steel-making companies.

2.7.11. Item "Labor remuneration in a shop" reflects labor remuneration of production personnel as well as expenses on labor remuneration of employees of servicing shops (shop repair personnel, etc.) and managers of a shop.

2.7.12. Expenses of labor remuneration of employees which couldn't be attributed to direct purpose should be distributed pro rata direct expenses on labor remuneration.

2.7.13. Amortization and depreciation of fixed assets of general application in rolling shops shall be distributed pro rata replacement value of main facilities at reporting period (year) beginning.

2.7.14. Items "Maintenance of non-current assets", "Other expenses in a shop", "Repair of non-current assets" for rolling shops, which cannot be attributed upon their direct assignment, shall be distributed pro rata wages and salaries attributed to a specific production facility.

2.7.15. Consumption of materials for manufacture of specific products in Cold Rolling Shop 5 shall be included into a separate item "Auxilliary materials".

2.7.16. Packing expenses in rolling shop shall be included into a separate line in item "Auxilliary materials".

As regards to product types packing expenses shall be distributed pro rata a quantity of packed material.

2.7.17. Consumption of conservative oil in Cold Rolling Shop 4 shall be included into a separate item "Auxilliary materials for technology" and shall be attributed to a specific type of rolled products without coating pro rata volumes of yield steel.

2.7.18. Consumption of lubricants for production of pickled steel in Hot Rolling Shop shall be distributed pro rata yield volume at corresponding center of calculation.

2.7.19. Iron vitriol and iron oxide formed during pickling in rolling shops shall be debited out of expenses decrease under item "Auxilliary materials".

2.7.20. General shop expenses shall be distributed pro rata salaries attributed to direct assignment besides coke division, shop of autospars, pipes and steel items, shop of repair preparation, shop of protective coatings, power division, shop of metallurgical slag processing which expenses shall be distributed pro rata salaries and amortization.

2.7.21. Expenses on production stage shall be distributed between types of products

pro rata output transferred to weight or any other units taking into account labor intensiveness ratio.

2.7.22. Construction in progress as of the end of reporting period on each production stage shall be evaluated by average value, summed up from construction in progress value as of the reporting period beginning and production costs for the reporting period

2.7.23. Construction in progress in case of order-wise method of calculation shall be evaluated upon actually incurred expenses.

2.7.24. Cost of structural products is formed on the assumption of actual expenses, inclusive of expenses related to registration of proprietary rights on real estate.

Expenses related to apartment sales shall be attributed to account 44 "Expenses on sales".

2.7.25. In construction expenses related to content of object being constructed shall be distributed upon construction sites pro rata estimates of works done at those sites.

2.7.26. Travelling expenses over norms related to production and sales of products, fulfillment of works and rendering of services shall be reflected within extra-sales expenses.

2.7.27. Expenses related to sales are recognized in full in costs of goods sold within the reporting period as expenses on common activity. Analytical accounting of trading expenses shall be maintained separately of products shipped to the domestic market, foreign countries, CIS countries.

2.8. Accounting of finished products (works, services)

2.8.1. Finished products are accounted upon actual production costs of each type of products. Finished export products are reflected separately in accounting.

2.8.2. Finished products shipped to customers and subdivisions of the company are accounted upon actual production costs which are defined for each type of products by multiplying quantity of products shipped by average costs of one ton (piece, etc.). Average costs are computed while dividing costs for specific type of product by quantity resulted correspondingly from production costs and residual quantity at the month beginning and output of products in the reporting month.

2.8.3. Production costs of products (works, services) the title for which transferred to buyers and the title for which did not transferred to buyers as of the end of reporting period shall be defined by direct calculation on the assumption of types of product and their actual costs separately for products shipped to the domestic market and export.

2.9. Accounting of sales proceeds

2.9.1. Sales proceeds shall be defined upon date of title transfer for the products, results of works done, services rendered (on onerous basis) on the basis of submitted shipping documents to buyers (customers).

2.9.2. Income from giving assets, rights from patents for innovations, industrial models and other types of intellectual property into temporary use, from stake in charter capitals of other organizations, interest received for granting loans and other income on securities not related to activity of the organization are related to operating income.

2.9.3. Translation of income expressed in foreign currency forming financial results from activity beyond the territory of the Russian Federation into roubles shall be done upon exchange rate of the RF Central Bank quoted on the corresponding date of operation in foreign currency.

2.10. Loans and Credit Facilities accounting

2.10.1. Amount of debt under loans or credit facilities received shall be accounted according to the terms and conditions of contract of debt or of credit in sum of actually received cash or in value terms of other funds provided for by agreement.

2.10.2. Transfer of long-term arrears of loans and credit facilities received into short-term is done in the moment when 365 days or less are left before repayment of loans and credit facilities principal under contract of debt or of credit.

2.10.3. Expenses on loans and credit facilities received shall be recognized as income of the period in which they took place amounting to payments due under concluded contracts.

2.10.4. Additional expenses related to making loans and credit facilities, issuing and placement of borrowings include expenses referred to:

- rendering of legal and consulting services to borrower;*
- copying;*
- payment of taxes and duties (in cases provided for the acting legislation);*
- performance of technical appraisals;*
- use of communications;*
- other costs directly related to loans and credit facilities, placement of borrowings.*

Extra expenses related to loans and credit facilities receipt, placement of borrowings, shall be included in reporting period in which they incurred.

2.10.5. Discount on drawn bills and placed bonds is reflected within operating expenses without preliminary accounting on account "Deferred expenses".

2.10.6. Interest on loans granted is charged according to the procedure established in contract of debt.

2.11. Provisions for doubtful debt

2.11.1. Provisions on doubtful debts upon settlements with other organizations are charged every year on the basis of results of account receivable inventory with attribution of provisions onto operating expenses. Amount of provision shall be calculated separately upon each doubtful debt depending on financial position of debtor and evaluation of probability of debt repayment fully or partially.

2.11.2. During repayment of doubtful debt by debtor the provision formed shall be attributed to operating income.

2.11.3. Non-used amount of the provision shall be reconsidered annually and in case of necessity be carried forward.

Services rendered (having been rendered) by the Adviser:

- *assistance to the Issuer in preparation of Offering Prospectus;*
- *verification of authenticity and completeness of all information from Offering Prospectus, with exception of the audited one;*
- *attestation of Offering Prospectus as well as documentation that might deem necessary for the Issuer in order to arrange circulation of shares with traders;*
- *consultations on issues related to preparation of Offering Prospectus, any other documentation pertained to arrangement of shares circulation and the Issuer going through listing procedure;*

Services rendered by a consultant:

- *consultations on issues related to disclosure by the Issuer of information in securities market and monitoring over discharge by the Issuer of his liabilities pertaining to disclosure of information in securities market according to requirements of Federal authority on securities market.*

1.6. Information on other persons who signed this Quarterly Report.

There are no such persons.

II. Main information on the Issuer's financial performance.

2.1. Financial and economic indices of the Issuer's activity.

This information is not submitted in this Quarterly Report.

2.2. The Issuer's market capitalization.

Total NLMK's shares outstanding – 5 993 227 240.

Starting from 23.11.2004 NLMK's common stock listed on включены в систему "Stock Market OJSC "Exchange Market RTS" (ticker symbol – NLMKG).

The value of NLMK's capitalization as of 30.12.2005 calculated on the basis of the Stock data as multiplication of common stock by average weighted price of one common share taken from 10 largest transactions held in December 2005 amounted to RR 254 524 449 823.

The value of NLMK's capitalization as of 30.12.2005 calculated on the basis of the Stock data as multiplication of common stock by market price of one common share defined according to the Market price calculation procedure of securities and investment shares of unit investment trusts admitted to circulation through trading organizers approved by Provision of the Russian Federal Committee on Securities 03-52/nc dd. 24.12.2003 amounted to RR 245 446 388 657.

Starting from 14 January 2005 common stock of Novolipetsk Steel (ticker symbol – NLMK) was included to Quote List "B" of Securities List ("Classic Share Market"), admitted to trading in Non-Profit Partnership "Stock Exchange "Russian Trading System".

Value of NLMK's capitalization as of 30.12.2005 calculated on the basis of the Partnership's information as multiplication of common stock by average weighted price of one common share taken from 10 largest transactions held in December 2005 amounted to USD 8 676 694 737.

The value of NLMK's capitalization as of 30.12.2005 calculated on the basis of the Partnership's data as multiplication of common stock by market price of one common share defined according to the Market price calculation procedure of securities and investment shares of unit investment trusts admitted to circulation through trading organizers approved by Provision of the Russian Federal Committee on Securities 03-52/nc dd. 24.12.2003 amounted to RR 256 375 577 920.

Between 5 November 2003 and 28 January 2005 "RTS Board" reflected information on indicative quotes of NLMK's common stock (ticker symbol – nlmk), but as these data are unofficial quotes of securities they cannot be used for calculation of the Company's market capitalization.

In December 2005 NLMK's common stock was admitted to trading in the London Exchange Stock as Global Depositary Shares (GDS).

2.3. The Issuer's liabilities.

2.3.1. Accounts payable.

This information is not presented for the disclosed period.

2.3.2. The Issuer's credit history.

Over the last 5 complete financial years and as of the reporting quarter end credit facilities agreements were not entered. Borrowings were not taken.

2.3.3. The Issuer's commitments on security to third parties.

There were no liabilities for security to third parties in the reporting quarter inclusive of guarantee or pawn.

2.3.4. Other commitments of the Issuer.

There were no other commitments of the Issuer as of the date of reporting quarter end.

2.4. Purposes of issue and use of funds gathered from securities distribution.

The Company did not issue any securities distributed by subscription since the date of its registration. So the Company did not attract funds by distribution of securities.

2.5. Risks related to acquisition of distributed (being distributed) issuing securities.

Acquisition of NLMK's securities entails certain risks which could result in losses for shareholders. Negative impact on the Issuer's main activity and financial performance can be produced by the following risks:

- *industry risk;*
- *country and regional risks;*
- *financial risks;*
- *legal risks; and*
- *risks related to the Issuer's activity.*

2.5.1. Industry risks

NLMK actively operates in domestic and international markets as a producer and seller of the diversified metal products mix. The following refers to industry risks:

Industry risks in raw materials markets:

- *Volatility of prices for purchased materials which could entail rise in prices of metal products;*
- *Risk of breach of obligations by suppliers as regards to composition and quality of raw materials purchased;*

Industry risks in sales markets:

- *Cyclic nature of demand for products of ferrous industry;*
- *Price risks characterized by high volatility of prices for products of ferrous industry in global and domestic markets;*
- *Intra-sector competition conditioned by high concentration of steel-making companies;*
- *Macroeconomic risks in foreign markets and CIS domestic market inclusive of economic growth rate, inflation expectations and price in utilities market;*
- *Introduction of higher tariffs, quotes and other trading restrains in main export markets;*
- *Intensification of competition on the part of producers in markets of developing countries inclusive of steel-making companies of PRC, Brazil, and India;*
- *Risks related to changes in industry structure due to tendential industry consolidation;*

In case of listed risks occurrence the Company will be forced to adjust its activity in line with changes taken place.

2.5.2. Country and regional risks

Industrial activity of the Issuer is pursued within the Russian Federation. Country risks for Novolipetsk Steel taking into account the current economic and political situation in Russia are insignificant.

Novolipetsk Steel and its subsidiaries have outlined clear system of interaction between all participants from mining, steel and transport segments. Main production facilities are located within 1500 km from key customers of NLMK's products in Russia, in close vicinity from key transport lines.

There are practically no risks related to possible military conflicts, introduction of the state of emergency, and strikes as the Issuer carries out its activity in economically and socially stable regions.

There are no geographical risks for Novolipetsk Steel.

2.5.3. Financial risks

Currency risks

Being an export-oriented company, NLMK confronts currency risks which can affect its financial performance.

Taking into account the situation at the world financial markets in the previous years, NLMK's export program is framed with regard to possible (forecast) dynamics of the main currencies. Actions are taken to diversify export proceeds currency structure.

Interest escalation risk

A share of borrowings in NLMK's structure at present is insignificant. So, risks related to interest escalation are insignificant. Should Novolipetsk Steel make a decision to attract borrowings for current activity and investment projects financing, its high solvency will allow decreasing borrowings value for the Company in the future.

Risk of liquidity deterioration

In order to minimize this risk, the schedule of incoming and outgoing cashflows is carefully planned to identify any possible deficit in financial resources. The highest credit rating of Novolipetsk among Russian steel-making companies has positive influence on level of risks related to the Issuer's liquidity.

2.5.4. Legal risks

Risks related to currency control and tax legislation alteration and changes in customs control and duty rules which could significantly impact the Issuer's activity,

Within the reported period there were no changes in legislation, judiciary laws, which regulate legal relationships in area of licensing, in particular, licensing of core activity of the Issuer or licensing of usufruct of objects with limited circulation and which could significantly impact the Issuer's activity.

There are no actions, which could negatively impact the Company's activity in the area of licensing.

There are no risks related to prolongation of Issuer's licenses validity on specific activity or on usufruct of objects with limited circulation.

2.5.5. Risks related to the Issuer's activity

The main part of the Issuer's licenses on activities important for the Issuer is valid till 2006 and further on. Risk related to failure to prolong these licenses is extremely low.

Subsidiaries and affiliated companies of NLMK are liable for their financial performance and risk management.

III. Detail information on the Issuer.

3.1. History of the Issuer's Company.

3.1.1. Information on the Issuer's name.

Full name of the Issuer.

*Открытое акционерное общество "Новолипецкий металлургический комбинат"
Open Joint-stock Company "Novolipetsk Steel"*

Abbreviated name.

*ОАО "НЛМК"
NLMK*

The Company has the right for trade mark "STINOL" registered as stated by the Russian Law (information on trade mark registration is given in clause 4.4. of the present report).

Information on changes in the Issuer's name.

*1. The Yu.V. Andropov Novolipetsk Iron & Steel Works honored with the Lenin Order and the October Revolution Order
NLMK*

Introduced on: *14.03.1984*

Basis for changes: *Decree of the Central Commission of the KPSS, Presidium of the Supreme Soviet of the USSR and Council of Ministers of the USSR «On perpetuation the memory of Yury V. Andropov».*

*2. Novolipetsk Iron & Steel Corporation
NLMK*

Introduced on: *28.01.1993*

Basis for changes: *Decision of the Lipetsk Region State Property Management Commission No. 823 dd. December 31, 1992 «On reorganization of the Yu. V. Andropov Novolipetsk Iron & Steel Works into Novolipetsk Iron & Steel Corporation».*

3. Current name was introduced on 12.08.1998

Basis for changes: *Decision made at Annual Shareholders' Meeting dd. August 1, 1998 (Minutes No. 9) on approval of the Company's Statute in a new edition.*

3.1.2. Information on state registration of the Issuer.

Number of state registration: *5-F*

Date of state registration: *28.01.1993*

Registrar: *Administration of Levoberezhny district of the city of Lipetsk*

State registration number of a legal person: *1024800823123*

Date of registration: *09.07.2002*

Registrar: *Inspection of MNS of Russia in Central district of the city of Lipetsk*

3.1.3. Information on foundation and development of the Issuer.

According to the RF Presidential Decree No. 721 dd. 01.07.1992 «On measures aimed at conversion of state enterprises, voluntary associations of state enterprises into joint stock companies» state enterprise The Yu. V. Andropov Novolipetsk Iron & Steel Works honored with the Lenin Order and the October Revolution Order was reorganized into Novolipetsk Iron & Steel Corporation by decision of Lipetsk region state property management Commission No. 823 dd. 31.12.1992. The Company was registered by Decree of Head of Levoberezhny district of the city of Lipetsk No. 50 dd. 28.01.1993.

The Company was registered for uncertain period of time.

The purpose of enterprise privatization is to increase efficiency of national economics by transfer from planned economy to market economy. In transition to a market economy the following decisions have been made by the Company:

- on optimization of organizational structure and management system of production and auxiliary divisions;*
- on improvement of system of raw material, fuel procurement, product sales and marketing services;*
- on development and approval of Technical Reconstruction and Development Program.*

Today NLMK is a large advanced company with highly developed and coordinated production, the products of which are exported to dozens countries of the world.

Plans of NLMK cover steady increase of high-end production, solution of various environmental problems at all production stages, production of high value added products which meet constantly raising demands from customers.

3.1.4. Contact information.

The Issuer's domicile: *Russian Federation*

Domicile of the Issuer's executive body:

2, pl. Metallurgov, Lipetsk 398040 Russia

The Issuer's phone, fax numbers, E-mail, web-site:

Tel: *(0742)-445-010*

Fax: *(0742)-441-111*

3.1.5. Taxpayer Identification Number

4823006703

3.1.6. The Issuer's branches and representative offices.

A list of NLMK's branches and representative offices was given in Quarterly Report for the 1st quarter 2005 according to the Company's Statute.

In the reporting quarter the following changes in NLMK's branches and representative offices took place:

- Igor N. Kostyukov was appointed Director of Fast East branch NLMK-DV since 05.11.2005 by Order of NLMK # 397 лс dd. 10.11.2005 .*
- a power of attorney with validity till 31.12.2006 was issued for Igor N. Kostyukov.*

3.2. The Issuer's core activity.

3.2.1. The Issuer's industry.

Codes of the Issuer's activity within the industry according to All-Russian code of foreign – economic activity:

<i>Code</i>	<i>Description</i>
<i>27.17</i>	<i>Production of cold rolled steel flats without and with protective coatings</i>
<i>23.10</i>	<i>Coke production</i>
<i>24.14.2</i>	<i>Production of other organic chemical products which are not entered into any other group of products</i>
<i>24.15</i>	<i>Production of fertilizers and nitrogen compounds</i>
<i>27.11</i>	<i>Production of pig iron and blast furnace ferroalloys</i>
<i>27.14</i>	<i>Production of steel</i>
<i>27.15</i>	<i>Production of semi-finished (slabs) products for further rolling</i>
<i>27.16.2</i>	<i>Production of hot rolled steel flats</i>
<i>27.22</i>	<i>Production of steel pipes and fittings</i>
<i>27.33</i>	<i>Production of roll-formed steel sections</i>
<i>28.63</i>	<i>Production of locks and hinges</i>
<i>28.71</i>	<i>Production of metal drums and similar reservoirs</i>
<i>29.51</i>	<i>Manufacture of machinery and equipment for steel industry</i>
<i>31.62.9</i>	<i>Services rendered for erection, repair and maintenance of other electric equipment which is not entered into any other group of products</i>
<i>34.30</i>	<i>Production of parts and components of cars and motors to them</i>
<i>36.22.1.</i>	<i>Production of parts for technical application from precious metals</i>
<i>37.10.1</i>	<i>Waste and ferrous scrap processing</i>
<i>40.10</i>	<i>Production, supply and distribution of electrical power</i>
<i>40.10.5</i>	<i>Activity on assurance of electric mains serviceability</i>

40.20.2	<i>Distribution of gas fuel</i>
40.30	<i>Production, supply and distribution of steam and hot water (heat energy)</i>
45.21.1	<i>Civil works on buildings construction</i>
45.31	<i>Wiring operations</i>
51.70	<i>Other wholesale trade</i>
52.11	<i>Retail trade in non-specialized stores principally by foodstuffs, including beverage food and tobacco goods</i>
52.12	<i>Other retail trade in non-specialized stores</i>
52.31	<i>Retail trade of pharmaceutical products</i>
55.12	<i>Activity of hotels having no restaurants</i>
55.51	<i>Activity of canteens located at the territory of plants and institutions</i>
60.10.2	<i>Activity of industrial railroad transport</i>
60.23	<i>Activity of other inland passenger transportation</i>
60.24	<i>Activity of motor transport</i>
63.11	<i>Transport processing of cargoes</i>
63.12	<i>Storage and warehousing</i>
63.21.1	<i>Other auxiliary activity of railway transport</i>
64.20.1	<i>Activity in the area of phone and document communications</i>
70.32.1	<i>Management of housing stock</i>
74.20.1	<i>Architectural activity, engineering in industry and construction</i>
74.20.3	<i>Land measuring and mapping</i>
74.60	<i>Investigations and accidents prevention</i>
80.22.22	<i>Training in advance training (extension) schools for specialists having secondary vocational education</i>
80.30.3	<i>Training in advance training (extension) schools for specialists having higher vocational education</i>
85.11	<i>Activity of patient care institutions</i>
85.13	<i>Dental practice</i>
85.20	<i>Veterinary activity</i>
92.13	<i>Movies demonstration</i>

3.2.2. The Issuer's main activity.

This information is not submitted for this reporting period.

3.2.3. Main types of products (works, services).

This information is not submitted for this reporting period.

3.2.4. The Issuer's raw materials and suppliers.

This information is not submitted for this reporting period.

3.2.5. The Issuer's sales (works, services) markets.

Domestic market

Main domestic metal consumers in 2005 were:

- car manufacturers;
- trading companies;
- civil engineering companies;
- steel sector.

Upon results of 2005 supplies of NLMK to car manufacturers decreased by 7% as compared to 2004. It was caused mainly by shrinkage in demand of AvtoVAZ for cold-rolled stock by 8%. As compared to 2004 supplies of cast iron to car manufacturers in 2005 increased (by 16.4%), while supplies of hot-rolled flats went down (by 1.6%). From total metal supplies to car manufacturers shipments to AvtoVAZ accounted for 70% (75% in 2004).

There were no changes in the regional supply as compared to the previous year. The main consumer of hot-rolled stock was the Central region with consumption share of 34%. Hot-rolled stock was still supplied to the historical zones of NLMK's influence – Povolzhsky region (15.6% in total domestic supplies), North-Caucasus region (16.1%), and Central-Chernozemny region (9.1%).

The main consumers of hot-rolled stock are trade companies supplies to which decreased by 9.1% as compared to the last year; as a result their share in the shipment accounted for 56.7%. Shipment to tube producers increased almost 3.5 times, as a result their sales share increased from 5.6% to 18.1%.

In 2005 a share of shipments to pipe plant went up from 1.6% to 3.9% in total domestic supplies of cold-rolled flats. A share of car manufacturers remained almost the same and accounted for 27.6%. Shipments to civil-engineering companies decreased and share of cold-rolled flats consumption by this sector in 2005 went down and accounted for 11%. A share of agricultural companies increased and accounted to 2.9%. A share of shipments to trading companies went up as compared to 2004 and accounted for 27.4%. The main consumers of NLMK's cold-rolled stock remained the Central region, Povolzhsky region, and the Urals region. As a result of 2005 Povolzhsky region was the major consumer (its share in the total supplies accounted for 26.5%) and the Central region (26.4%). The Urals region still holds the third place with 16.6% share.

From January to December 2004 over half of the total cast iron volume was supplied to Volgo-Vyatsky region (51%) and the Central region (18,1%). In 2005 shipments to these regions were 13.5% and 43.9%, respectively. The share of Povolzhsky region in 2005 amounted to 28.5% of total supplies.

As a result of January - December 2005 there were no significant changes in the structure of industrial consumption of galvanized rolled-stock. Galvanized rolled stock was in the highest demand with commercial enterprises (44%) and steel structures producers (39%). The share of supply to the civil-engineering industry decreased from 8.6% in 2004 to 7.0% in 2005.

In the reporting period the structure of regional consumption of galvanized rolled stock remained almost unchanged. The share of supply to the Central region slightly decreased: from 65.4% to 62.3%. The share of supply to the Central-Chernozem region increased from 12.6% to 14.,9%, to the North-Caucasus region from 8.3% to 11.3%, to Povolzhsky region – from 3.8% to 4.3%.

Regarding the domestic geography of prepainted rolled stock sales NLMK's priority economic regions were Central (42.6%), North Caucasus (22.4%) and the Urals (12.8%). The bulk of the prepainted rolled stock to be supplied is still represented by galvanized substrate, the share of this kind of products in 2005 accounted for 91.9% of total sales of prepainted rolled stock. The most popular gauge of prepainted flats was 0.5 mm (70.9% of total sales).

In the reporting period the volume of orders for NLMK's GO flats from the main consuming regions increased, in particular:

- Povolzhsky region: 2 fold increase in supplies;
- West-Siberian region: increase by 7.9%;
- Central-Chernozem region: increase by 24.8%;
- Central region: increase by 8.3%.

GO flats shipments to the Urals region went down (-16.1%).

3407 and 3408 grades of GO flats prevailed in product mix sold in 2005 (31.6% and 26.6% respectively of total domestic supplies). A share of wide GO electrical steel stock accounted for 70.5%.

In 2005 Central region (45.5% of total shipments of NGO electrical steel flats during 12 months of 2005), East-Siberian (7.5%), Volgo-Vyatsky (7.8%), and the Urals region (11.9%) were the largest consumers of NGO steel flats.

Foreign market

In 2005 the main buyers of NLMK's products were the following:

- “Steelco Mediterranean Trading Ltd.”,*
- “Tuscany Invertrade (UK)”,*
- “Moorfield Commodities Company”,*
- “Stinol AG”.*

Due to unfavorable conditions of global steel market in major part of 2005 total shipments of NLMK upon results of the year shrank 13.6%.

Main export directions of NLMK's supplies were Asian countries, EC and non-EC countries. Their share in total supplies accounted for 29.9%, 25.2% and 17.9% respectively.

Major Asian markets for NLMK's sales in 2005 included:

- Taiwan: 9.5% of total NLMK's export,*
- PRC: 8.7%,*
- Thailand: 6.5%.*

In the reporting period there was a significant increase in sales to India as compared to 2004 – 2.1 fold. A share of this market in the Company's total exports upon results of 2005 accounted for 3.0%.

Almost all supplies to Thailand and Taiwan were represented by slabs (99.7% and 96.4% respectively).

In 2005 the Company's trade with the EC countries was effected in accordance with autonomous quotas.

The largest volumes were sold by the Company within the reporting period to Denmark (8.6% of total exports, a share of shipments to EC – 33.9%) and Italy (5.3% and 21.2% respectively). Slabs for Dansteel represented 96.1% of shipments to Denmark.

Upon results of 2005 export of non-EC countries decreased 10.2% as compared to 2004 and accounted for 17.9% of all NLMK's exports. Export to Turkey which is the major consumer of this region accounts for 98.8% of the total exports.

Upon results of the reporting quarter the Company shipped to North America 43.0% of steel products less than the last year.

In 2005 the Company's hot-rolled stock trade with the USA was effected as per the quotas fixed in accordance with “Agreement on suspension of antidumping investigation regarding certain kinds of hot-rolled carbon steel flat products from the RF”.

There were no restrictions on supply of semi-finished products to the USA.

In 2005 NLMK's supplies to the Middle East increased 7.7% as compared the last year. At the same time sales to Iran (the main sales market of that region) increased 52.8%.

Within the reporting period shipments of NLMK to CIS countries increased 4.6% as compared with 2004. Upon results of 2005 sales to this region accounted for 4.7% of total exports of the Company.

Sales of NLMK's products to Africa and Latin America are insignificant. In 2005 the share of sales in each of these directions accounted for less than 1.0% of NLMK's total exports.

Possibility of license prolongation: *The license will be prolonged*

Number: *Д 314049 Registration No. 14*

Issue date: *19.12.2002*

Validity: *till 19.12.2007*

Licensor: *Pharmacy and medical equipment committee of the Lipetsk region Administration.*

Activity: *Activity related to the circulation of drugs and psychotropic substances included in List II in*

accordance with the Federal Act "On drugs and psychotropic substances".

Possibility of license prolongation: *The license will be prolonged*

Number: *Д 314014 Registration No. 20*

Issue date: *30.12.2002*

Validity: *till 30.12.2007*

Licenser: *Medical Activity Licensing Commission of the Health Department of the Lipetsk region Administration.*

Activity: *Medical activity in accordance with Appendix No. 1 and license copies issued at the location of territorially distant plants (Appendices No. 2-34).*

Possibility of license prolongation: *The license will be prolonged*

Number: *A 051382 Registration No. 392*

Issue date: *18.06.2003*

Validity: *till 18.06.2006*

Licenser: *Education and science department of the Lipetsk region Administration*

Activity: *Educational activity according to curriculum specified in appendices to the license.*

Possibility of license prolongation: *The license will be prolonged*

Number: *004918 HBIГ №00526-K*

Issue date: *18.04.2003*

Validity: *till 18.04.2008*

Licenser: *Federal Service of geodesy and cartography of Russia. Nizhnevolzhsk territorial inspection of geodesic supervision*

Activity: *Cartographical activity*

Possibility of license prolongation: *The license will be prolonged in case Technical regulations will not take effect*

Number: *004917 HBIГ №00525-Г*

Issue date: *18.04.2003*

Validity: *till 18.04.2008*

Licenser: *Federal Service of geodesy and cartography of Russia. Nizhnevolzhsk territorial inspection of geodesic supervision*

Activity: *Geodesic activity*

Possibility of license prolongation: *The license will be prolonged in case Technical regulations will not take effect*

Number: *Д 293036 Registration No. 37*

Issue date: *23.05.2003*

Validity: *till 23.05.2008*

Licenser: *Health Department of the Lipetsk region Administration*

Activity: *Medical activity in the Health Center "Prometheus". Address: Lipetsk, camp "Prometheus".*

Possibility of license prolongation: *The license will be prolonged*

Number: *ЛПЦ Registration No.54085 ВЭ*

Issue date: *20.05.2003*

Validity: *till 1.03.2012*

Licenser: *Natural Resources Committee of the Lipetsk Region*

Activity: *Draft of fresh underground water for industrial purposes and drinking water supply (the city of Lipetsk and village Borinskoye of the Lipetsk district, Lipetsk region, the RF)*

Possibility of license prolongation: *The license will be prolonged*

Number: *007085 ЖИЛЦ 00122 БРЭЗХ*

Issue date: *3.07.2003*

Validity: *till 3.07.2006*

Licenser: *The RF Ministry of natural resources. Donskoy water basin bureau*

Activity: *Draft, discharge of sewage, aqueduct, use of water area (river of Voronezh, Matyra water storage basin, Silikatny lakes)*

Possibility of license prolongation: *The license will be changed (except the use of waters of Matyra water storage basin)*

Number: *MK №0021.25 Registration No. 585*

Issue date: *11.06.2003*

Validity: *till 11.06.2008*

Licenser: *Ministry of culture. The state department on protection of cultural heritage in the Lipetsk region.*

Activity: *Activity aimed at restoration of cultural heritage objects (historical and cultural monuments)*

Possibility of license prolongation: *The license will be prolonged*

Number: *Б 318290 Registration No. 178*

Issue date: *9.07.2003*

Validity: *till 9.07.2008*

Licenser: *Department of Federal security in the Lipetsk region*

Activity: *Operations with use of information being an official secret*

Possibility of license prolongation: *The license will be prolonged*

Number: *Д 293062 Registration No. 75*

Issue date: *25.08.2003*

Validity: *till 25.08.2008*

Licenser: *Health Department of the Lipetsk region Administration*

Activity: *Medical activity under Appendix No. 1 (health center "Parus")*

Possibility of license prolongation: *The license will be prolonged*

Number: *Д 382503 Registration No. 50012615*

Issue date: *3.09.2003*

Validity: *till 2.09.2008*

Licenser: *Ministry of energy of the Russian Federation.*

Activity: *Electric network operation (excluding the cases when the stated activity is performed to satisfy own demands of a legal person or demands of an individual person)*

Possibility of license prolongation: *The license will not be prolonged (Activity is not subject to licensing)*

Number: *Д 382502 Registration No. 60012614*

Issue date: *3.09.2003*

Validity: *till 2.09.2008*

Licenser: *Ministry of energy of the Russian Federation.*

Activity: *Heat network operation (excluding the cases when the stated activity is performed to satisfy own demands of a legal person or demands of an individual person)*

3.2.7. Joint activity of the Issuer.

At present there is no joint activity of NLMK with any other companies.

As of 31.12.2005 Agreement # 208 dd. 09.02.1994 with Scientific-technical enterprise "New machines and technologies" (P.O. Box 29/39 Dnepropetrovsk 320059) for joint activity was in force. Investments of NLMK accounted for RR 1,487,250.0. The purpose of investments is consortium establishment for construction and commissioning of a sector, which will specialize in production of high-quality centrifugal rolls on the basis of Lutugin association on rolls production.

There is no information on financial performance of joint activity for 2005 due to failure of a partner to a joint activity to present statements.

3.2.8. Additional requirements to Issuers being stock investment funds, insurance or credit company, real security agent.

The information is not presented as the Issuer is not a stock investment fund, insurance or credit company, real security agent.

3.2.9. Additional requirements to Issuers specialized on mining operations.

The information on NLMK's subsidiaries and affiliated companies specialized on mining operations is provided.

I. Studenovskaya Open Joint-stock Mining Company (OJSC «Stagdok»)

a) Mineral reserves:

According to the license received Stagdok has the right for subsoil of Sitov area of Sokol-Sitov field of fluxed limestone located at the territory of the Lipetsk region (3 km to the north from the city of Lipetsk and 0.5 km to the west from village Voskresenovka of the Lipetsk region).

The license for subsoil use: series ЛПЦ No. 54036 ТЭ

Issue date: May 30, 2002.

Expiry date: 31.12.2028.

The basis for licensing:

- supplementary exploration and revaluation of reserves in the period of 1995-2000;*
- change of field contour.*

Subsoil area given for use has the status of mining lease. The maximum depth of the area is +106 meters subject to mandatory preservation of protective pillar of 2 meters capacity above groundwater level.

Sitov area of Sokol-Sitov field with limestone reserves of 200901 thousand tons as of 01.01.2000, inclusive of 34095 thousand tons of quality A, 166806 thousand tons of quality C1,

approved by (taking into account supplementary exploration and revaluation of the field) Territorial Commission on mineral reserves (Minutes No. 51 dd. June 29, 2000).

In Q IV of 2005 limestone extraction volume amounted to 1056 thousand tons.

As of 01.01.2006 the reserve residue of Sitov area of Sokol-Sitov field constitutes 176,779.8 thousand tons, inclusive of 9,973.8 thousand tons of quality A and 166,806 thousand tons of quality C1.

Within the given mining lease the company has the right for geological survey on translation of limestone reserves from low industrial qualities to high qualities.

The main liabilities of the Company:

1. To extract limestone with observation of the following conditions:

- to define annual extraction volume of limestone on the basis of mining operations plan;

- to agree the plan of mining operations, norms for losses and impoverishment with State engineering supervision bodies on the annual basis.

2. To effect payments for use of subsoil according to norms being in force:

- 6% of the product selling price for the right to extract fluxed limestone;

- 5.5% of the product selling price for the right to extract construction quality limestone.

To effect double payments for mineral loss infringement. To effect tax and other mandatory payments to the budget in time and in full.

3. To present statistical reports under form 5-zp to the Federal Geological Administration "Geological Fund of the Central regions of Russia" by January 15 every year.

4. To present statistical reports under form 70-TII, 71-TII to bodies stated in these forms by January 25 every year.

5. In the course of the field use Stagdok is liable to constantly monitor groundwater through the existing observation network.

The liabilities described in the license are being fulfilled by the company in the established order.

b). Extraction and processing of minerals:

Main facilities and equipment used for extraction and processing of fluxed limestone at Sokol-Sitov field are:

- crushers and mills, excavators, BELAZ cars, drilling rigs, bulldozers, diesel locomotives.

b). Sales:

Limestone from Sitov area is suitable as a raw material for production of the products which are in conformity with the following requirements:

- TU 0750-005-00186855-97 "Limestone of industrial quality. Specifications";

- TU 0750-004-00186855-95 "Limestone of industrial quality extracted by Studenovskaya joint-stock company. Specifications".

Limestone crushed rock for construction purposes, limestone of industrial quality are not covered by "Product mix and services (works) to be mandatorily certified according to the Russian Law" approved by Decree No. 64 dd. 30.07.2002 of the RF State Standard.

II. Open Joint-stock Company «Dolomite» (OJSC «Dolomite»)

a) Mineral reserves:

Dolomite has the right to use subsoil for dolomite extraction at Dankov field within Bigildin and Prikarjorny areas under the license received.

Mineral resources are metallurgical dolomite, construction quality crushed rock and limestone (dolomite) flour.

As of 01.01.2005 the areas for which licenses were granted had 399,771 thousand tons of balance sheet reserves of dolomite, inclusive of 245,487 thousand ton in Bigildin area and 154,284 thousand tons in Prikarjorny area. Dankov field covers (all areas) 668,248 thousand tons of dolomite balance sheet reserves in total.

In 2005 extraction volume amounted to 3198 thousand tons.

Reserve evaluation method was approved by Protocol No. 873 dd. September 26, 2003 of the State Committee on Mineral Reserves (GKZ).

Dolomite has the license No. ЛПД 54112 ТЭ for subsoil use for the purpose of dolomite extraction at Bigildin and Prikarjerny areas of Dankov field in order to manufacture raw materials for steel-making process and construction materials. Subsoil areas have the status of mining lease.

The license was granted on: October 1, 2003.

Expiry date: 01.01.2029.

The basis for licensing was redrawing up of the valid license due to change of legal person name - subsoil user.

Validity of the licenses can be prolonged upon initiative of subsoil user.

Allocated subsoil areas are located 3-7 km to the north-east from the city of Dankov and railway station with the same name – Dankov UVJD, 95 km to the north-west of the city of Lipetsk. The relief is relatively plain with ravine beam type network. The area of Bigildin area is 528 hectares, of Prikarjerny one – 316 hectares, total area is 844 hectares. The areas are located on cropland that can be used for agricultural purposes. Minerals in the field are overlapped by argillaceous sand and off-grade carbonate deposits. The average capacity of stripping is 17.5 meters and one of productive strata– 23.0 meters. Dolomites are flooded down to 1 – 3 meters in the bottom part of the cut. The depth of exploitation is up to 40 meters from daylight.

Liabilities of the company:

- 1. To pay tax on dolomite extraction for construction materials manufacture in the amount of 5.5% of extracted mineral value;*
- 2. To pay tax on dolomite extraction as metallurgical raw materials in the amount of 6,0% of mineral value.*
- 3. To effect double payments for mineral loss infringement.*
- 4. To present a report under forms 5-ГР, 70-ТII, 71-ТII to controlling bodies on the annual basis.*
- 5. To redraw up papers for mining leases in areas under mining in the State Engineering Supervision of the Russian Federation in Verkhne - Donskoy county before 01.05.2005.*
- 6. To write off dolomite reserves accounted by the State in the field areas within the mining lease at the time of operations completion and perform complete reclamation of dislocated soils.*
- 7. To prepare an annual plan of mining works development for forthcoming year and to agree it with State engineering supervision of the Russian Federation in Verkhne-Donskoy county before December 15.*
- 8. Two years prior to license expiry date a project of mining opening final liquidation and dislocated soil reclamation shall be developed and approved.*

The stated liabilities: all liabilities stated above are fulfilled within established time. Liabilities under clause 5 (redrawing up of papers for mining lease) are being fulfilled about which a notification letter was sent to the corresponding controlling authorities.

b) Mineral processing:

Electric full-rotary shovels manufactured by UZTM of ЭКГ –5а and ЭКГ –4,6Б type with 5 m³ and 4.6 m³ bucket capacity respectively and max. digging height of 10.3 m which corresponds to height of common quarry face and stripping capacity are used for dolomite extraction in open-cut mine. Drill works are done by drilling rig of roller-bit drilling of СБШ – 250MH type. Borehole diameter is 250 mm at drilling depth of 10-12 meters. Ore is crushed by jaw crushers with simple movement of jaw of grade ШДП 3x12 and ШДП 15x21 with receiving hole of 900 mm x 1200 mm and 1500 mm x 2100 mm respectively and capacity of 180 m³/h and 550 m³/h respectively. The material is additionally crushed in cone secondary crushers of КСД –1750ГР and КСД –2200ГР of 200 m³/h and 500 m³/h capacity respectively. Material is classified by fractions by vibrating screens of ГvI, ГvC, ГvT types.

Screened material is transported by belt conveyors of horizontal and inclined type with belt width of B 800 mm, B 1000 mm and B 1200 mm, of capacity which is correspondent to capacities of main production lines, i.e. jaw and cone crushers.

b) Product sales:

Permissions for dolomite products sales and export quotas allocated by the Federal Law are not provided for.

III. Open Joint-stock Company «Kombinat KMAruda» (OJSC «Kombinat KMAruda»)

a) Mineral reserves:

1). *Kombinat KMAruda is granted the right to use the subsoil for deep-mined extraction of Korobkov field of ferruginous quartzite (inclusive of Stretensky area).*

Type of minerals - ferruginous quartzite.

Reserves of the field were approved by Minutes (on reserves approval):

No. 6640 dd. September 22, 1972 of the State Commission on mineral reserves with USSR Council of Ministers;

No. 9770 dd. July 19, 1985 of the State Commission on mineral reserves with USSR Council of Ministers;

No. 12 dd. February 10, 2000 of the Territorial Commission on mineral reserves with Department of natural resources for Central Region of Mineral Ministry of the Russian Federation.

Extraction volume from the beginning of operations in the field as of 31.12.2005 was 157,389.7 thousand tons (152,668 thousand tons of air dried weight).

Rated annual capacity of the plant regarding processing of dry ore amounts to 3395 thousand tons.

Kombinat KMAruda was granted a license of TЭ type series БЕЛ No. 08586 for the right to use subsoil for extraction of ferruginous quartzites at Korobkov field for further processing into iron-ore concentrate. The license was registered by Central region Department of natural resources of the RF Ministry of Natural Resources in the register No. 8586/БЕЛ 08586ТЭ.

Issue date of the license: 19.02.2001.

Expiry date of the license: 01.01.2026 г. (Validity of the license can be prolonged upon initiative of the subsoil user as well as in other cases stipulated in the Russian Law "On subsoil").

The license was granted on the basis of application and license documents submitted by Kombinat KMAruda. The right to use the subsoils area was granted on the basis of Decree No. 110/461 dd. 12.01.2001 of Belgorod Region Administration Government and Department of Mineral Resources in Central region of the RF Ministry of Mineral Resources.

The Korobkov field of ferruginous quartzites is located in proximity to the city of Gubkin, Belgorod region, and belongs to the central part of north-east part of the Kursk Magnetic Anomaly.

The field geological structure consists of Precambrian complex dislocated metamorphized rock broken in some places through by intrusions and dykes as well as water-bearing sedimentary deposits of Devonian and Mesocainozoic age, which unconformably and almost horizontally overlap crystal thickness. The capacity of sedimentary rock in average amounts to 116 meters. Iron-ore assise is considered as productive where ferruginous quartzites form two sub-assises of different capacity - 100-200 and 180-320 meters.

Ferruginous quartzites are covered everywhere by residual soil with average capacity of 18,3 meters, represented by oxidized and semi-oxidized quartzites and small deposits of high grade ore.

Under terms and conditions of the license Kombinat KMAruda shall within its validity:

- effect payments for extraction of ferruginous quartzite and for use of land lots;

- observe the rules of safe operations, environment protection, mineral resources conservation, subsoil protection.

Under special conditions of the license Kombinat KMAruda is liable to:

- additionally agree upon payment terms or procedures for subsoil use in case of acting legislation change with the bodies which have issued the license;
- should any unknown mineral types and accompanying valuable components be found at the moment of license granting, the bodies which have granted the license have the right to call for state appraisal of geological materials and review the conditions of subsoil use;
- prepare reports on fulfillment of subsoil use under the license for the previous year not later than on January 15 of the year following the reporting one;
- redrawing up of the valid license due to change of legal person name or status of the plant.

The liabilities stated in the license are being fulfilled by the company in full.

2). *Kombinat KMAruda has the right to use subsoil for groundwater operations of aquiferous stratum of Alb-senoman and Archaean Proterozoic aquiferous stratum on site of Korobkov field of ferruginous quartzites.*

Kombinat KMAruda was granted a license of series БЕЛ No. 07479 for subsoil use for the purpose of fresh groundwater extraction in amount of 625 m³/day for potable water and industrial water supply of the plant and outside consumers; extraction of groundwater for protection of mine opening from watering in case of Korobkov field development.

Issue date of the license: 15.05.2000.

Due to the changes dd. 30.03.2005 entered by the authorized bodies the license validity was prolonged till 01.04.2015.

The license was granted on the basis of application and licensing documents submitted by Kombinat KMAruda. The right to use the subsoils area was granted on the basis of Decree No. 49/399 dd. 14.03.2000 of Belgorod Region Administration Government and Committee of Mineral Resources in Belgorod region of the RF Ministry of Mineral Resources.

Groundwater reserves were not approved. (In accordance with the changes to the license dd. 30.03.2005 (inclusive of the clause concerning subsoil usage conditions) groundwater reserves estimation of Korobkov field of ferruginous quartzites development should be conducted till 01.11.2007 with their approval in the established order).

Aquiferous stratum of Alb-senoman lies in depth intervals of 70-100 m and consists of different granular sands which are overlapped by thickness of chalk, sand and loams. It is separated from ore-crystalline massif by thickness of Jurassic clays. Groundwater is under pressure, depth of occurrence of groundwater level is 46-55 m. Aquiferous stratum is used by two water wells located within mining lease of the plant.

Archaean Proterozoic aquiferous stratum of 150-200 m capacity is referred to cracked area of crystalline rock, confining bed of which lies at depth of 120-150 m.

Archaean Proterozoic groundwater is draught by draining of mine opening with the following pumping out by mine drainage.

According to terms and conditions of the license Kombinat KMAruda effects payments within the license validity for use of water bodies and land lot in accordance with the existing legislation of the Russian Federation.

The liabilities stated in the license are being fulfilled by the company in the established order.

3) *Kombinat "KMAruda" has the right to use subsoil for groundwater operations of quaternary Alb-senoman aquiferous stratum in the vicinity of Kaplino village, Stary Oskol region.*

Kombinat "KMAruda" was issued a license for subsoil right: extraction of fresh groundwaters for economic and potable needs of recreation center "Gornyak". License BЭ series БЕЛ number 50108. The license was registered No. 108/БЕЛ 5010837 in the register by the Mineral Committee of Belgorod region 07.06.2002.

License issue date – 07.06.2002.

License expiry date – 01.03.2012 (License validity can be prolonged in the established order should the conditions of the Agreement be met).

The license was granted on the basis of application and licensing documents submitted by Kombinat KMAruda. The right to use the subsoils area was granted on the basis of Decree No. 279/630 dd. 07.06.2002 of Belgorod Region Administration Government and Committee of Mineral Resources in Belgorod region of the RF Ministry of Mineral Resources.

Groundwater reserves were not approved.

Groundwater is intaken by the water well located in Stariy Oskol region, north of Kaplino village on the left bank of the Oskol river in the area of Stariy Oskol water storage basin at the recreation centre of Kombinat "KMAruda".

The groundwater body is located in the northern part of Voronezh crystalline massif. The geological structure is made up of Pre-Cambrian metamorphic rocks and sedimentary rocks consisting of Devonian, Jura, chalk.

For water supply purposes quaternary Alb-senoman aquiferuos stratum is used as the most water-abundant and the first thick stratum from the surface. The water well 38 m deep was drilled in 1987. The bearing strata of the aquiferous stratum under operation are made up of various granular sands up to 31 m thick. The aquiferous stratum is overlapped by small-granular sands 6 m thick. The stratum toe is made up of water-proof Jurassic clays.

In accordance with the license conditions "Kombinat KMAruda":

- effects regular payments for groundwater extraction, for the subsoil area located in the Don river basin in accordance with the effective legislation;

- effects payments for the land lot granted for usage by Stary Oskol Administration in the order and within the terms established by the effective land legislation;

- in case of the respective legislation changes groundwater extraction conditions, payments for their usage and the order of information submission specified in the license are subject to additional agreement with the issuing bodies.

In accordance with special conditions "Kombinat KMAruda" is liable:

- to submit information on suboil usage conditions observation to Mineral Committee of Belgorod region annually till January, 10; information on groundwater monitoring to "Belgorodgeomonitoring" quarterly not later than the 10th day of the month following the reporting quarter;

- in case of significant deviations of well production values, lowering of water level and chemical composition indexes from the typical values as of the license issuance period, Mineral Committee of Belgorod region and "Belgorodgeomonitoring" should be quickly informed;

- in case of reorganizing or changing of the legal person's name or loss of the license application for reissuance of the license should be submitted. License is reissued in the order established for its issuance.

- to ensure observation of all environmental and nature-conservation measures in the course of activities related to subsoil usage envisaged by provisions of the authorized environmental bodies.

Obligations specified in the license are fulfilled by the plant in the established order.

b) Mineral processing:

The main mining equipment used in mining roadheading: drilling machines ЛКР-ТЗ, ЛКРУ, punchers ПП-63, ПП-80НВ, ПТ-48, loading machines 1 ППН-5, loading – hauling machines ПТ-4, scraper winches 55AC-2CM, drilling unit BOOMER-104, rock removing machine – EST-2D.

Rocks are transported from funnel and breakage mining faces by electric locomotives 10 КР and 14 КР in bogies of УББ-4 and ВГ-4,5.

Blast holes are drilled by machine НКР-100 М. Blast holes are loaded by machines МЗКС-160.

Extracted ore is preliminary crushed in crushers СМД-118 1Б and ДСД -1017 in underground crushing complexes. Crushed ore is transported to processing plant along shaft equipped with 2 skips of 4 tons capacity each and hoist engine 2 Ц-4×1,8 and along shaft equipped with 2 skips of 13 tons each with hoist engine 2 Ц5-2,3. Ventilation of mine opening is done by fans ВЦД-47 У and ВЦД -31,5.

All ore extracted is processed into concentrate in processing plant which is technologically connected with skip shafts.

The main crushing – milling and mineral processing equipment of the plant:

- Cone crusher – КСД-1750, КМД-1750, КСД-2200, КМД-2200;

- Unbalanced-throw screen – ГИТ-52 Э, ГИТ-31;

- Ball mill – МШР 32-31;

- Sizing screen – К-СН-24;

- Hydrocyclone – ГЦ-500;

- Magnetic separators - ПЕМ-90/250, ПЕМ-120/300;

- Vacuum pumps – BBH2-50;
- Vacuum filters – ДОО 150;
- Gravel pump – 6 HII.
- Stationary belt conveyor of different types.

c) Product sales:

Finished products (iron ore concentrate) are sold on the basis of agreements with consumers. Permissions by the State authorities for sales of the above-mentioned products are not required.

IV. Open Joint-stock Company «Stoilensky Mining Company» (OJSC «Stoilensky GOK»)

a) Mineral reserves:

1) According to the license received Stoilensk Mining Company has the right for digging of Stoilensk iron ore and nonmetallics field.

The field was explored by Belgorod geological surveillance expedition.

State Commission on minerals reserves with Ministry of Ecology and Natural Resources of the Russian Federation for quarry operations (500 meters to daylight) approved reserves of the following minerals (Minutes No. 1, No. 2 dd. January 24, 1992):

- high grade iron ore;
- magnetite quartzite;
- oxidized quartzite;
- clay and loam;
- chalk;
- marl;
- sand;
- decayed slate;
- crystalline slate;
- quartzitic sandstone;
- granite gneiss.

The balance sheet reserves remainder as of 01.01.2006:

- high grade iron ore of category B+C1 – 57,318 thousand tons; of category C2 – 11,991 thousand tons;
- magnetite quartzites of category B+C1 – 4,934,264 thousand tons; of category C2 – 1,563,565 thousand tons.

Extraction volume starting from the field excavation beginning as of 01.01.2006 accounted for:

- high grade iron ore – 104,758 thousand tons;
- magnetite quartzite – 321,216 thousand tons.

Annual design capacity of the Company on high grade iron ore excavation is 1,200 thousand tons and 25,440 thousand tons on magnetite quartzite.

Stoilensky GOK was granted a license of series БЕЛ №13030 ТЭ registered by Russian Mineral Ministry No. 3955 dd. 24.03.2005 for subsoil right– excavation of iron ore, ferruginous quartzites of Stoilensky field, as well as co-nonmetallics located in stripping and special dumps. Marketable products produced from processing of iron ore are sintering ore and iron ore concentrate. Co-excavated nonmetallics, finished products from their processing are used in-house or in other companies.

Issue date of the license: March 24, 2005.

License expiry date: January 1, 2016. (Validity of the license can be prolonged upon initiative of a subsoil user as well as in other cases set forth in the Russian Law “On subsoils”).

The license was granted on the basis of application and licensing documents submitted by OJSC “Stoilensky GOK”.

Under terms and conditions of the license OJSC "Stoilensky GOK" shall within its validity:

- effect payments for extraction of minerals and for use of land lots;
- observe the rules of safe operations, environmental protection, mineral resources conservation, subsoil protection.

Under special conditions of the license OJSC "Stoilensky GOK" is liable to:

- additionally agree upon payment terms or procedures for subsoil use in case of existing legislation change with the bodies which have issued the license;
- should any unknown mineral types and accompanying valuable components be found at the moment of license granting, the bodies which have granted the license have the right to call for state appraisal of geological materials and review the conditions of subsoil use;
- prepare reports on fulfillment of subsoil use under the license for the previous year not later than on January 15 of the year following the reporting one;
- reissuance of the license due to change of legal person's name or status of the plant.

The obligations stated in the license are being fulfilled by the Company in the established order.

2) Stoilensky GOK has a right under license of series БЕЛ No. 50162 БЭ to extract drainage groundwater in order to dewater quarry of Stoilensk ferruginous quartzites field.

Issue date of the license: 13.01. 2003.

License expiry date: 01.11.2012.

The license was granted on the basis of application and licensing documents submitted by Stoilensky GOK.

Drainage groundwater reserves of Stoilensky field were approved upon Turonian Maastricht, Alb-senoman aquiferous stratum and Archean Proterozoic aquiferous complex of 79 thousand m³/day for category B (Minutes No. 3 GKZ dd. January 24, 1992z.)

Turonian Maastricht aquiferous stratum refers to top interstitial weathering zone of marl-chalk stratum with 60-90 meters capacity of the same age. The stratum is free-flow, static level is at 25-50 meters depth. The stratum around the quarry is fully drained.

Alb-senoman aquiferous stratum refers to medium sands of the same age located at 90-110 meters depth overlapped by sand-clay deposits of quaternary age and chalk – marl rocks. The stratum is free-flow, depth is 63-94 meters. Decrease of groundwater level in area of drained contour is 40-45 meters.

Archean Proterozoic aquiferous stratum of 150 m capacity refers to cracked area of crystalline rock, confining bed of which lies at depth of 120-140 meters. Aquiferous stratum is under pressure, piezometric level is at 75-100 meters depth, quarry is drained.

Stoilensky GOK drains groundwater by 132 draining rise wells and 12 through filters drilled from ring system of horizontal quarry of 28 km total length. Underground water intake covers 23 rise drain holes and mine drainage from shaft No. 3.

Mine drainage in Q IV in total in 2005 accounted for 4,3774,553 m³, inclusive of chemically treated water 5,701,760 m³ per annum.

Area of water intake refers to Don river basin.

"Subsoil user" is permitted to continuously intake groundwater in order to drain quarry with decrease of groundwater level till depth of drainage working laying and in quantity providing for safe mining operations.

On the territory of "subsoil user" there is a network of observation wells by which subsoil user monitors groundwater and studies hydrodynamic and hydrochemical conditions of groundwater in the zone of a mining company influence.

In 2005 – 2006 OJSC "Stoilensky GOK" plans to reevaluate groundwater reserves under category B with their approval by GKZ.

According to license conditions OJSC "Stoilensk GOK" shall effect payments for use of water bodies in accordance with the existing legislation of the Russian Federation.

The liabilities stated in the license are being fulfilled by the Company in the established order.

b) Minerals processing:

1. Main technologies used:

The field is being quarried: opened by a networks of trenches. Opening system is with outside refuse disposal. Quarry depth is 300 meters. Loose deposits are being opened by rotor complex and cyclic excavators. Rock stripping, high grade ore and ferruginous quartzites are extracted by cyclic excavators with preliminary opening by drilling-and-blasting operations. Ore is removed from the quarry by trucks, railway and conveyor belts.

Technological scheme of high grade ore processing covers three stages of crushing and screening with separation of sintering ore. Processing of ferruginous quartzites (magnetite) takes three stages of crushing with closed final stage, three stages of milling, magnetic separation, deslimation, dehydration of concentrate in vacuum filters. Hydrotransport of processing tailings is pressure - self floating. Water recycling is used.

2. The following equipment is used:

2.1. Mining operations:

- drillings rigs СБШ –250 МН;
- charge machine “Акватол”, МЗ-4;
- cyclic excavators ЭКГ-10, ЭКГ-8И, ЭКГ-4,6(4У, 5У, 5А), ЭШ10/70;
- rotor complex КУ-800.

2.2. Transportation of mining mass:

- dump trucks BelAZ 7513, 7548, 7555;
- electric locomotives ОПЭ-1, diesel locomotive ЧМЭ-3, ТЭМ-2, М-62;
- boxcars 2ВС-105;
- conveyor belts in rotor complex КУ-800.

2.3 Crushing and beneficiation equipment:

- crushers – ЦКД 2100/1500, ДМРиЭ14,5/13, ККД 1500/180, КСД 3000Т, КМД 3000Т2-ДП;
- screens ГИСТ-72, ГИТ-52Н;
- classifiers 2КСН 3,0x17,2;
- mills МШЦУ5,5x65, МШЦ 5,5x6,5;
- separators ПБМ-П-120/300, ПБМ-ПП-150/200, ПБМ-ПП-120/300;
- deslimers МД-12;
- vacuum filters ДШ 100/2,5;
- pumps ГРК, ГРТ 1250/71, ГРК 1600/56,
- stationary, reverse conveyor belts.

c) Sales

Finished products (sintering ore and iron ore concentrate) are sold on the basis of agreements concluded with customers.

Federal Law does not provide for any permissions from state bodies for sale of the above mentioned products.

3.2.10. Additional requirements to the Issuers the core activity of whom is communication services rendering.

The information is not submitted due to the fact that the Issuer does not render communication services.

3.3. Plans for future activity.

In 2006 NLMK is going to continue implementation of measures aimed at fulfillment of the Technical Upgrade Program which covers years 2000-2010. In 2006 the second stage starts with an objective to further increase efficiency and improvement of product quality.

The second stage of the Program provides for measures aimed at:

- *completeness of existing facilities reconstruction and construction of new ones to facilitate the Company to keep and further strengthen its competitive positions;*
- *increase of high value added product share;*
- *improvement of quality and diversification of product mix;*
- *increase of ecological purity and safety of the processes.*

Production Program of NLMK for 2006 has been compiled taking into account the maximum degree of capacity utilization of main facilities and market conditions.

3.4. The Issuer's equity holding in industrial, bank and financial groups, holdings, concerns and associations.

The Issuer does not hold any equity in industrial, bank and financial groups, holdings, concerns and associations.

3.5. Subsidiaries and affiliated companies of the Issuer.

1. Full name: *Limited-liability company «Lipetsk insurance company «Shans»*

Abbreviated name: *LLC LIC "Shans"*

The Issuer's policy in financing of current assets.

On the basis of analysis made to financial status only stable banks are selected. For each of the banks NLMK defines limit of funds placement required for current activity as well as spare cash.

In case of market conditions worsening and the Company's investment plans changes residual cash and its equivalent which accounted for 44.0 bln. roubles as of 30.11.2005 could be used.

Taking into account stable performance of the Company during a long period of time as well as high share of equity in the Company's capital (94%), NLMK has a possibility to attract significant funds on favorable terms by bank credits and bond offering.

4.3.2. The Issuer's financial investments.

This information is not submitted for this reporting period.

4.3.3. Intangible assets of the Issuer.

This information is not submitted for this reporting period.

4.4. Information on policy and expenses of the Issuer in the area of technological progress, as regards to licenses and patents, new developments and investigations.

The Issuer's policy in the area of technological progress in the reporting period was defined by NLMK's quality management policy.

One of approaches of the policy in the area of technological development is acquisition of rights for intellectual property by patent protection of new technical solutions developed at NLMK.

In 4Q05 3 patents for inventions and 1 patent for utility models were received. They are enlisted below.

*A list
of patents for inventions and utility models received in 4Q05*

<i>No.</i>	<i>Description of an invention, utility model</i>	<i>Issue date</i>	<i>Validity of patent</i>
<i>1</i>	<i>Liquid self-hardening mixture for manufacture of casting form and rods</i>	<i>20.10.2005</i>	<i>20 years</i>
<i>2</i>	<i>Method of production of NGO electrical steel grade with higher induction</i>	<i>20.12.2005</i>	<i>20 years</i>
<i>3</i>	<i>Method of thermal treatment (improvement) of compound roller bandage</i>	<i>20.12.2005</i>	<i>20 years</i>
<i>4</i>	<i>Conveyor for hot cargoes</i>	<i>27.10.2005</i>	<i>5 years</i>

List of Certificates for trade marks of NLMK valid as of 31.12.2005

<i>No.</i>	<i>Description</i>	<i>Issue date</i>	<i>Validity</i>

<i>21</i>	<i>Trademark "НЛМК"</i>	<i>19.07.2005</i>	<i>10 years</i>

Constant control over prompt payment of all patent fees on inventions and utility models, over prolongation of trade mark registration validity, over submission of applications on registration of trade mark in case of the Company's product mix diversification are the main actions aimed at prevention of NLMK's forfeiture of rights for intellectual property.

NLMK's expenses for R&D according to agreements in force for 4Q05 accounted for 4,825.8 thousand rubles, of them 83.9 thousand rubles related to patents and licenses obtaining.

4.5. Analysis of trends in the Issuer's core activity.

After headlong growth of world steel production in 2004 world steel market conditions changed in 2005. 3Q05 showed all components of world steel market crisis more distinctly. Achieved overproduction of steel in the world caused significant decrease in prices. In order to keep the prices steel companies in many regions of the world were forced to shrink steel output.

These tendencies reflected on development of Russian steel sector. In 3Q05 production results of majority steel companies went down. Due to output growth at three leading steel companies (Severstal, MMK, NLMK) industry-wise output maintained on the level of the previous quarter. In 4Q05 the situation slightly changed. The majority of Russian steel-making companies increased their output in natural terms. Production in the industry as a whole resulted in increase as compared with 3Q: pig iron – 9.7%, steel – 5.7%, finished flats – 8.5% (source: "Chermet" Corporation).

In the reporting quarter 2005 similar to industry-wise performance Novolipetsk Steel increased its production of the main products as compared with the previous quarter: pig iron – 12.8%, steel – 9.1%, finished flats – 12%.

2005 became a turning-point for the steel industry: after over two-year growth global prices for steel significantly dropped. General worsening of price conditions in global market was caused, first of all, by overproduction of steel products in China. Decrease of prices, on the one part, and growth of costs, on the other resulted in decrease of steel-making process profitability which entailed price competition.

Many Russian steel-making companies reoriented their shipments to the domestic market. Russian prices for steel flats even (unsuccessfully) attempted to grow in August but couldn't compensate export prices fall. Financial performance of the largest Russian steel-making holdings decreased upon results of 3Q.

At the end of 3Q and beginning of the 4Q05 flats market demonstrated balanced demand and supply and relative stabilization of prices was noted.

In 4Q05 in steel industry output in money terms grew 8.1% compared to level of 3Q05 and accounted over RR 314 bln. (source: "Chermet" Corporation). Of 9 largest Russian steel-making companies only two companies decreased output (NTMK and the Urals Steel), the remainder demonstrated growth of output as compared with the previous quarter.

NLMK is an export oriented company and a corresponding negative situation in the external market influence financial performance of the Company. In 3Q05 NLMK like many steel-making companies of Russia decreased output in money terms (-14% to 2Q05). Stabilization of prices in 4Q05 allowed Novolipetsk Steel increasing production as compared to 3Q by 12%.

Despite difficult situation of 2005 NLMK remains the most effective and profitable steel-making company in the background of other Russian steel-making companies.

Main competitors of the Issuer

The main competitors of NLMK in the domestic market are OJSC "MMK" and OJSC "Severstal".

- These companies are characterized by the following strong competitive advantages:*
- *diversification of production process. NLMK is an integrated steel company with production along the whole chain starting from hot metal to coated steel;*
 - *geographical location. The Company is located in close proximity to main steel-consuming regions of Russia as compared to its competitors.*

- *priority in development of high value-added products. NLMK was the first in Russia to master production of prepainted steel and is the only producer of electrical steel of high grades and cold rolled structural quality flats.*
- *high stable quality remains the main requirement to products in any market. Start in from 2000 a program of technical upgrade has been implementing to improve quality of products.*
- *demand for products in the world market. NLMK ships its products to actually all industrially developed countries, is a leading slab exporter from Russia.*
- *fast reaction to market tendencies.*

As compared to competitors the Company's position remains unchanged both in near-term and remote outlook because their technology and equipment are comparable to that of NLMK by the highest standards. All the three company invest much into reconstruction and upgrading of equipment. Against a general background of capacity increase and quality improvement any qualitative overtaking is hardly possible.

Following world tendencies NLMK is commissioning Hot Dip Galvanizing Line. Output of this type of products will allow NLMK to hold and expand its position in world market of coated steel.

NLMK exports its products to several dozens countries of the world. There are producers of the same products practically in each country – importer. Besides NLMK steel companies from other countries supply their product to these markets. So, NLMK experiences multiple competitions and it seems impracticable to single out specific competitors in the world market.

V. Detail information on members of the Issuer's authorities, financial performance control bodies, brief data on employees of the Issuer.

5.1. Information on structure and competence of the Issuer's authorities.

The Supreme governing body of the Company is the General Shareholders' Meeting. The Board of Directors carries out the general management of the Company activity excluding those issues, which fall under the exclusive competence of the Shareholders' Meeting.

The Board of Directors consists of 9 persons.

The management of the routine business of the Company is exercised by the Company's single executive body – Director General and by the Company's corporate executive body – the Management Board.

The competence of Director General and Management Board covers all the issues related to the management of the Company's routine business except the matters of exclusive competence of the General Shareholders' Meeting and the Board of Directors.

The Director General and the Management Board make arrangements for implementation of the decisions of the Company's General Shareholders' Meeting and the Board of Directors.

The Director General also fulfils the functions of the Company's Management Board Chairman.

The Management Board is a corporate executive body of the Company, which acts with the authority of the Federal Act "On the joint-stock companies", the Company Statute and Regulations on the Management Board of the Company approved by the General Shareholders' Meeting.

The organization and membership of the Management Board are approved by the Board of Directors upon presentation by the Director General.

The competence of the general meeting of the issuer's stockholders (participants) in accordance with its statute (constituent documents):

The following matters fall within the Meeting's competence (Chapter 4, Article 16 of the Company Statute):

- 1) changes and additions to the Statute or approval of the Statute in new revisions;*
- 2) reorganization of the Company;*
- 3) liquidation of the Company, appointment of the Liquidation Committee and approval of the*

interim and final liquidation balances;

4) establishment of the quantitative staff of the Board of Directors, election of its members and premature termination of their authority;

5) determination of number, par value, category (type) of declared shares and rights given by these shares;

6) increase in the Company's chartered capital through share par value increase; increase of the chartered capital of the Company through placement of additional shares by public subscription in case the number of additionally placed shares constitutes more than 25% of the common shares earlier placed by the Company; increase of the Company's chartered capital through placement of shares by closed subscription;

7) decrease of the chartered capital through share par value decrease, through paying off the shares acquired by the Company and not realized within a year and of the shares redeemed by the Company, as well as through paying off the shares that have passed to the Company in relation to their non-payment; decrease of the chartered capital through partial acquisition of shares for the purpose of decreasing their total number;

8) election of Director General and premature termination of its authority;

9) election of the Auditing Committee members and premature termination of their authority;

10) approval of the Company's Auditor;

10.1) payment (announcement) of dividends upon results of 1Q, six months, nine months of a financial year;

11) approval of annual reports, annual financial statements, including income statements of the Company, as well as distribution of Company's profits (including payments (declaration) of dividends with exclusions of profits distributed as dividends upon results of 1Q, six months, nine months of a financial year) and losses of the Company upon results of a financial year;

12) establishment of procedure of the General Meeting;

13) appointment of the Accounts Committee members and premature termination of their authority in case of the Company's Registrar functions as the Accounts Committee according to requirements to Federal Law "On joint-stock companies";

14) split-up and consolidation of the shares;

15) making decisions on approval of transactions in cases stipulated in Article 83 of the Federal Law «On Joint-stock Companies»;

16) making decisions on approval of major transactions in cases stipulated in Article 79 of the Federal Law "On Joint-stock Companies";

17) acquisition of the subscribed shares by the Company in cases, stipulated in the Federal Law "On Joint-stock Companies";

18) involvement in holdings, financial and industrial groups, associations and other commercial organizations;

19) approval of internal documents governing the operation of the Company's bodies;

21) decision-making on other matters stipulated by the Federal Law "On Joint-stock Companies" and / or the present Statute.

The matters falling under the competence of the General Meeting of Shareholders cannot be transferred to the competence of executive bodies of the Company.

The matters falling under the competence of the General Meeting of Shareholders cannot be transferred to competence of the Board of Directors of the Company except in cases stipulated in the Federal Act "On the joint-stock Companies".

The competence of the Issuer's Board of Directors (Supervisory Board) in accordance with its Statute (constituent documents):

The following matters fall within the competence of the Board of Directors (Chapter 5, Article 30 of the Company Statute):

1) definition of priority activities of the Company;

2) convocation of the Annual and Extraordinary Shareholders' Meetings excluding cases,

when in accordance with the Federal Law "On Joint-stock Companies" an Extraordinary Shareholders' Meeting can be convoked by authorities and persons demanding its convocation;

- 3) approval of the General Shareholders' Meeting agenda;*
- 4) definition of the date of list of the shareholders who are entitled to participate in the Shareholders' Meeting and other issues attributed to the competence of the Board of Directors in accordance with the Statute and the Federal Law "On Joint stock companies" and related to preparation and holding of the Shareholders' Meeting;*
- 5) preliminary approval of annual reports, annual financial statements, including income statements of the Company for a financial year;*
- 6) increase of the Company's chartered capital by placement of additional shares by the Company out of its property within the quantity of declared shares.*
- 7) increase of the Company's chartered capital by placement of additional shares by the Company by public subscription within the quantity of declared shares, if the number of additionally placed shares constitutes 25% or less from the common shares earlier placed by the Company;*
- 8) acquisition of shares placed by the Company in accordance with Item 2, Article 72 of the Federal Act "On the joint-stock Companies";*
- 9) approval of decisions on offering, prospectus, report on offering results, their amending and revising.*
- 10) placement of bonds and other securities issued by the Company in cases provided for by the Federal Law "On Joint-stock companies";*
- 11) determination of price (pecuniary valuation) of the property, price of offering and redemption of the securities issued in cases provided for by the Federal Law "On Joint-stock Companies";*
- 12) acquisition of bonds and other securities placed by the Company in cases provided for by the Federal Act "On the joint-stock companies";*
- 13) constitution of the Management Board and early termination of its authorities; determination of rewards and compensations paid to its members; conclusion of contracts with the Director General and members of the Management Board on behalf of the Company;*
- 14) determination of terms and conditions of contracts with the Director General and members of the management board;*
- 15) recommendations to the General Shareholders' Meeting on amount of reward and compensation paid to members of the Auditing Committee and determination of payment amount for Auditor's services;*
- 16) recommendations to the General Shareholders' Meeting on dividend amount payable to the shareholders and procedure of its payment;*
- 17) recommendations to the General Shareholders' Meeting on the procedure of profits and losses distribution upon results of a financial year;*
- 18) use of reserve and other funds of the Company;*
- 19) approval of internal papers of the Company excluding internal papers which fall within the competence of the General Shareholders' Meeting according to this Statute and Federal Law "On Joint-stock Companies", or other internal documents of the Company which fall within the competence of the Director General and Management Board in accordance with the present Statute;*
- 20) establishment and liquidation of the Company's branches and representative offices, approval of provisions on branches and representative offices, revision and expanding of these provisions;*
- 21) approval of major transactions in cases provided for by Chapter X of the Federal Law "On Joint-stock Companies";*
- 22) approval of transactions provided for by Chapter XI of the Federal Law "On Joint-stock companies";*
- 23) approval of the Company Registrar and terms of agreement with him/her, as well as cancellation of agreement;*
- 24) suspension of the Director General's activity;*
- 25) appointment of temporary acting Director General;*
- 26) decision on Company's participation in other organizations, excluding participation in*

holding companies, financial and industrial groups, associations and other unions of commercial organizations;

27) establishment of Committees under the Board of Directors, approval of internal documents, which regulate activities of these Committees;

28) other matters provided for by the Federal Law "On Joint-stock Companies" and the present Statute.

The matters that fall within the competence of the Company's Board of Directors переданы на решение исполнительному органу Общества.

Competence of the individual and corporate executive bodies of the issuer in accordance with its Statute (constituent documents):

The Competence of the Director General (Chapter 6, Article 37 of the Company Statute).

The competence of the Director General includes all issues of routine Company activities management excluding those in the exclusive authority of the General Shareholders' Meeting and the Board of Directors.

The Director General acts without any Power of Attorney on behalf of the Company, in particular:

- performs operative management of the Company's activities;*
- has the right of the first signature in financial documents;*
- represents the Company both in the RF and outside it;*
- approves staff list, concludes employment agreements with employees of the Company, fires, applies incentive measures to employees and imposes penalties on them;*
- governs the activities of the Management Board and presides at its meetings;*
- presents for the Board of Directors' approval an individual list of the members of the Management Board;*
- conducts transactions on behalf of the Company with the exception of cases stipulated by the Federal Act "On the Joint-Stock Companies" and this Statute;*
- issues power of attorney on behalf of the Company;*
- opens the Company's accounts with banks;*
- makes provisions for the Company's accounting and book-keeping conduction;*
- issues orders and gives instructions which are binding for all employees of the Company;*
- defines a list of data representing commercial secret of the Company, and means of such data protection in accordance with the effective legislation;*
- approves internal documents of the Company, which regulate the Company's routine activities, excluding those in the exclusive authority of the Management Board.*

The Director General is entitled to appoint acting Director General for the period of his absence to be approved by the Board of Directors' Chairman.

The Competence of the Management Board (Chapter 6, Article 38 of the Company Statute).

The exclusive competence of the Company's Management Board includes:

- development and submission to discussion by the Board of Directors of the Company's development concept;*
- securing of contracts concluding by Company assets when the amount due or the subject goods value exceeds 10 per cent of the balance value of the Company's assets, excluding transactions performed in the normal course of business;*
- approval of internal routine Rules and other local regulations according to the list specified by the Director General;*
- signing the Collective Agreement with the Company staff (authorized body);*
- other issues regarded as those in the competence of the Company Management Board*

Availability of Corporate Behaviour Code or any other similar document:

The Extraordinary General Shareholders' Meeting, which took place on December 3, 2004, (Minutes No. 20) approved the Corporate Governance Code of OJSC "Novolipetsk Steel".

5.3. Information on remuneration, privileges and / or refund of charges to each Management body of the Issuer.

Remuneration paid to members of Board of Directors and Management Board for 2004

rubles			
No.	Remuneration type	Board of Directors	Management Board
1.	<i>Remuneration</i>	13 243 523	-
2.	<i>Salary</i>	-	19 314 844
3.	<i>Premium, welfare</i>	-	12 995 618
4.	<i>Presents</i>	4 800	20 400
5.	<i>Dividends</i>	-	3 419 851
6.	<i>Author's royalty</i>	3 196 129	3 558 253
	<i>Total</i>	16 444 452	39 308 966

Remuneration can be paid and charges related to performance of Management Board members' functions can be refunded to Management Board members within the period of their duties execution. The rate, conditions and procedure of remuneration payment and charges refund to members of the Board of Directors are established by the Regulations on remuneration of the Company's Board of Directors members approved by General Shareholders' Meeting.

Remuneration can be paid and charges can be refunded to Members of the Board of Directors within the period of their duties execution. Conditions and procedure of remuneration payment and charges refund are established by a contract concluded with members of the Management Board, in accordance with the Regulations on remuneration of the Company's Management Board members' labor, approved by the Company's Board of Directors upon presentation by the Personnel and Remuneration Committee.

5.4. Information on structure and competence of controlling authorities over financial performance of the Issuer.

The Auditing Committee and Internal Audit Service exercise control over the financial and economic activities of the Company.

Auditing Committee

The Auditing Committee consists of five persons, is elected for a period of one year by the General Shareholders' Meeting and carries out its activities in accordance with the Regulations on the Auditing Committee approved by the General Shareholders' Meeting upon presentation by the Board of Directors.

The Regulations on the Auditing Committee regulate the Auditing Committee procedures, the authority of its members, the rate and procedure of remuneration payment and expenses reimbursement to members of the Auditing Committee

The Company's Auditing Committee Members cannot simultaneously be members of the Company's Board of Directors or take up any other posts in management bodies of the Company.

Audit of financial and economic activities of the Company is based on the yearly-based business results and is conducted at any time on initiative of the Auditing Committee of the Company and by the decision of the General Shareholders' Meeting, the Board of Directors or upon request of a shareholder (-s) owning in the aggregate at least ten per cent of the Company's voting shares.

The Auditing Committee audits financial and economic activity of the Company in order to verify conformity of the financial statements information to norms and requirements of the existing legislation, internal regulatory documents, performs selective investigation of proofs attesting figures accounting and notes to financial statements.

Upon results of Company's financial and economic activity auditing the Committee makes a report on authenticity of data contained in the Company's annual report, balance sheets, income statement.

Internal Audit Department

The Internal Audit Service – Audit Division, established sine die under Director General's Order dd. 17.04.1997, is administratively subordinated to the Director General.

Key staff: Valery S. Kulikov; Igor A. Matsak.

The competence of the Internal Audit Department covers:

- *auditing of financial and economic, commercial and production activity of the Company's divisions;*
- *evaluation of process related to acquisition, storage, protection and conservation of the Company's resources;*
- *detection of possible delinquencies, frauds and abuses on part of the Company's officials and reporting to the Company's managers on results;*
- *evaluation of internal control system as regards to efficiency of operations in the normal course of business.*

Management Board Members are informed on the results of the auditing upon their competency. The Board of Directors is informed in case of any material breach.

In process of its activity the Internal Audit Division cooperates with auditing firms working for the Company on contract basis.

Information on any inside document with the Issuer establishing rules aimed at prevention of inside information deployment:

A Provision on information policy of NLMK which establishes also rules aimed at prevention of inside information deployment was approved by the Board of Directors on September 12, 2005 (Minutes # 133).

Internet address where full text of internal document of the Issuer which establishes the right to prevent inside information deployment is published:

www.nlmk.ru/rus/company/docs.php3

As of the date of the reporting quarter end the size of NLMK's reserve fund accounted for 299 661 362 rubles or 5% of its chartered capital.

Within the reporting quarter the reserve fund was not used.

There were no other funds to be generated at NLMK out of its net profit.

8.1.4. Information on procedure of convocation and conduction of the Issuer's supreme management body meeting:

The Issuer's management body:

The Supreme governing body of the Company is the General Shareholders' Meeting.

Procedure of shareholders (participants) notification on convocation of General Shareholders' Meeting:

The notification on convocation of General Shareholders' Meeting is brought to notice of the shareholders under decision of the Board of Directors by publication of the information in newspaper «Gazeta», newspaper «Metallurg» and in NLMK's web-site in the Internet. The notification on General Shareholders' Meeting convocation shall be published not later than 30 days prior to the date of the Meeting, if a longer term is not envisaged by law.

The shareholders owning one and more per cent of the Company's shares as well as nominal shareholders are informed of the meeting in written. The written notifications are sent by the registered mail not later the date stated in this clause.

Persons (bodies) having the right to summon (demand) the Extraordinary Shareholders' Meeting as well as the procedure of raising a demand:

The Extraordinary Shareholders' Meeting is held upon decision of the Board of Directors on the basis of its own initiative, demand of the Auditing Committee, Auditor as well as shareholders (shareholder) owning not less than 10 per cent of the Company's voting shares as of the date of the demand. The Extraordinary Shareholders' Meeting is summoned by the Board of Directors and must be held within 40 days from the date of a/m demand made by Auditing Committee, Auditor or shareholders in respect of the Extraordinary Shareholders' Meeting holding. In case of the Company's Board of Directors members election on the agenda to the Extraordinary Shareholders' Meeting as well as in case the Board of Directors liable to make a decision on holding of the Extraordinary Shareholders' Meeting under the Federal Law "On joint-stock companies" to elect the Board members this Shareholders' Meeting should be held within 70 days from

A request for holding of Extraordinary Meeting shall contain worded issues to be included into the Meeting agenda. The request for holding of Extraordinary Meeting can contain worded decisions on each of these issues as well as suggestions on the Shareholders' Meeting conduction form.

The Board of Directors is not entitled to change wording of agenda issues, wording of decisions on such issues and to change offered form of Extraordinary Shareholders' Meeting being convened upon the request of the Auditing Committee, Auditor or shareholders (shareholder) being owner of not less than 10 per cent of the Company's voting shares.

Should request for the Extraordinary Meeting be submitted by shareholders (shareholder) it shall include the name of shareholders (shareholder), requiring the convocation, the quantity and type (category) of the shares belonging to them (him/her).

Request for the Extraordinary Meeting shall be signed by persons (person) who require Extraordinary Meeting convocation.

The Board of Directors shall make a decision on the Extraordinary Meeting convocation or on refusal to call it within five days from the date of the request submission by the Auditing Committee, Auditor or shareholders (shareholder) being owners of not less than 10 per cent of the Company's voting shares.

Decision on refusal to convene the Extraordinary Shareholders' Meeting upon the request of the Auditing Committee, Auditor or shareholders (shareholder) being owners of not less than 10 per cent of the Company's voting shares can be made in case:

- the procedure of the request submission on convocation of the General Shareholders' Meeting has been violated;*
- shareholders (shareholder) demanding the Extraordinary Shareholders' Meeting summoning do not possess the required quantity of the Company's voting shares;*
- none of the issues put forward to be included into the Extraordinary Meeting agenda refers to its competence and (or) corresponds to requirements of the Federal Law «On joint-stock companies» and other legal acts of the Russian Federation.*

Decision of the Board of Directors on the Extraordinary Meeting summoning or justified decision to refuse to call it is sent to persons who have required its convocation by registered mail with notice of receipt not later than 3 days from the date of the decision – making.

Should the decision on the Extraordinary meeting convocation be not made or should the decision to refuse to call the Extraordinary Meeting be made within the stated period by the Board of Directors, the Extraordinary Meeting can be summoned by persons or bodies demanding its convocation.

The procedure of the Meeting date determination:

Regular Annual Shareholders' Meeting is convened not earlier than in two months and not later than in six months after the end of a financial year. Extraordinary Shareholders' Date, time and place of the General Shareholders' Meeting, the procedure of its preparation and conduction shall be determined by the Board of Directors under provisions of the Company Statute and Rules of Shareholders' Meeting conduction.

Persons entitled to make proposals to agenda of the Issuer's management body meeting as well as the procedure of these offers submission:

Shareholders (a shareholder), owing not less than 2 per cent of the Company's voting shares in aggregate are entitled to make proposals to agenda of Annual General Shareholders' Meeting and put forward candidate members to the Company's Board of Directors, Auditing Committee and Returning board, the number of which cannot exceed the number of respective body members as well as candidate Director General. Such proposals must be received by the Company not later than in 30 days after the date of a financial year-end.

In case of the Company's Board of Directors election being on the agenda of the Extraordinary Shareholders' Meeting, shareholders (a shareholder) owing not less than 2 per cent of the Company's voting shares in aggregate are entitled to propose candidate members to the Board of Directors the number of which cannot exceed the number of the Company's Board. The Company must receive such proposals not later than 30 days prior to the date of the Extraordinary Shareholders' Meeting.

A proposal on issues inclusion into the agenda of the General Shareholders' Meeting and a proposal on candidates shall be made in written, shall indicate the name of shareholders (shareholder), demanding it, the quantity and type (category) of the shares belonging to them (him/her) and shall be signed.

A proposal to enter issues into the agenda of the General Shareholders' Meeting shall contain wording of each proposed issue, while a proposal on candidates shall contain name of each proposed candidate, name of body to which that candidate is stated, other data on him/her provided for by internal documents of the Company as well as written consent of a candidate to take the title. A proposal on entering of issues into agenda of the General Shareholders' Meeting can include wording of decision on each proposed issue.

The Company's Board of Directors is liable to consider received proposals and make a decision on inclusion of them into the agenda of the General Shareholders' Meeting or refusal to include into the agenda not later than 5 days after deadlines stated in the Company's Statute for inclusion of proposals into the agenda of the Annual General Shareholders' Meeting and Extraordinary General Shareholders' Meeting. An issue proposed by shareholders (a shareholder) is subject to entering the agenda of the General Shareholders' Meeting as well as proposed candidates are subject to entering a slate for voting on election to respective bodies of the Company except if:

- shareholders (a shareholder) have violated terms established by the Company's Statute;*
- shareholders (a shareholder) do not own the relevant number of the Company's voting shares as stated in the Company's Statute;*
- a proposal is not in conformity with the requirements of the Company's Statute;*
- an issue proposed for agenda of the General Shareholders' Meeting is not within its competence and (or) is not in conformity with the requirements of the Federal Act «On the joint-stock companies» and other legal acts of the Russian Federation.*

Justified decision of the Company's Board of Directors on refusal to include the proposed issue into the agenda of the General Shareholders' Meeting or a candidate shall be sent to shareholders (shareholder) who put forward the issue or candidate not later than three days from the date of its receipt.

The Board of Directors is not entitled to change wording of the agenda issues, wording of decisions on such issues of the General Shareholders' Meeting.

Besides issues proposed to be included into agenda of the General Shareholders' Meeting as well as in case of absence of such issues, absence or insufficient quantity of candidates proposed by shareholders to form corresponding body, the Board of Directors has the right to include issues into the agenda or candidates into the slate of the General Shareholders' Meeting at its discretion.

Persons which have the right to get acquainted with information (materials) presented for Supreme Management Body Meeting preparation and conduction as well as procedure of getting acquainted with such information (materials):

Persons having the right to participate in the General Shareholders' Meeting can receive information (material) subject to presentation during preparation of General Shareholders' Meeting for getting acquainted in the room of the Company's executive body and at places the addresses of which are stated in announcement on General Shareholders' Meeting holding within 20 days and in case of General Shareholders' Meeting the agenda of which includes an issue on the Company's reorganization, within 30 days prior to the General Shareholders' Meeting as well as during the Meeting itself at place of its holding.

Persons having the right to participate in the Company's General Shareholders' Meeting can receive copies of the stated documents upon request sent in written to the Company's executive body subject to payment.

The date on which the register of shareholders started to be kept by the stated registrar: *04.03.2004*

8.7. Information on legislative acts regulating import and export of capital, which could affect payment of dividends, interest and other payments to non-residents.

International agreements and contracts on double taxation prevention, Tax Code of the Russian Federation (part one) No. 146-FZ dd. 31.07.1998 (revision dd. 02.11.2004), Tax Code of the Russian Federation (part two) No. 117-FZ dd. 05.08.2000 (revision dd. 30.12.2004), Federal Law No. 173-FZ dd. 10.12.2003 "On currency control" (revision dd. 29.06.2004), Federal Law No. 39-FZ dd. 22.04.1996 (revision dd. 07.03.2004) "On securities market", Federal Law No. 208-FZ dd. 26.12.1995 (revision dd. 29.12.2004) "On joint-stock companies" are considered as legislative acts which regulate import and export of capital and which could affect payments of dividends, interest and other payments by the Issuer to non-residents who have the Issuer's securities in possession.

8.8. Description of income taxation procedures regarding placed and being placed Issuer's securities.

Owners of the Company's stocks can receive income as dividends and income from stocks sale. Organization's income is taxed under Chapter 25 «Profit tax of organizations» of Tax Code of the Russian Federation, natural persons are taxed under Chapter 23 «Natural persons' income tax».

Dividends.

In case of dividend payment to natural persons and organizations the Company acts as Fiscal agents, i.e. it makes calculations, deduction from dividends and transfer of natural persons' income tax and profit tax of organizations to the budget.

Legal persons.

Organization's profit from dividends is taxed under Chapter 25 «Profit tax of organizations» of Tax Code of the Russian Federation.

Dividends paid to organizations which are Russian tax payers, are taxed at 9% tax rate (subclause 1 clause 3 Article 284 Tax Code of the Russian Federation), foreign organizations – at 15% tax rate (subclause 2 clause 3 Article 284 Tax Code of the Russian Federation).

Natural persons.

Tax rate of natural persons' (RF nationals) income tax is 9% and 30 % for non-RF nationals.

Income from stocks sales.

Legal persons.

A feature for tax base for RF nationals in case of securities operations is defined by Articles 280 and 283 of Tax Code of the Russian Federation. Profit tax shall be paid at 24% tax rate (clause 1 Article 284 of Tax Code of the Russian Federation).

Procedure of taxation of non-RF nationals is controlled by Articles 306-307, 309-312 of Tax Code of the Russian Federation. Foreign organizations which do not perform profit-oriented business in the Russian Federation, pay profit taxes upon stocks sale of Russian companies, where more than 50% of assets consist of real estate at the territory of the Russian Federation as well as financial instruments being derivatives of these shares. At that income from trade of securities on foreign stock exchanges or financial instrument being in circulation on these exchanges is not recognized as income received from RF sources of revenues (subclause 5 clause 1 Article 309). Fiscal Agent makes calculations and deduction of profit tax at 20% or 24% tax rate. 20% tax rate can be applied only in case tax base is a full amount of profit from stocks sales (subclause 1 clause 2 Article 284). 24% tax rate shall be applied if the tax base is defined under the procedure similar to that applied to organizations – RF tax payers (clause 4 Article 309 and clause 1 Article 284).

Natural persons.

Procedure of taxation of natural persons' income from securities operations is established by Articles 214-1, 220, 224 Chapter 23 of Tax Code of the Russian Federation.

Income (loss) on sales of securities is defined as difference between income from securities sales and documented securities sales proceeds and documented expenses of acquisition, sale and storage of

securities actually incurred by a tax payer or assessed tax deduction taken to decrease securities sales income. Assessed tax deduction is not provided for natural persons being non-RF residents.

Assessed tax deduction is granted to a tax payer as regards to full amount received by him during tax period (duration of tax period is one year) from sales of securities being in his possession for three or more years, and in case securities were in possession of a tax payer less than 3 years, then amount of assessed tax deduction in case of their sale cannot exceed 125 000 rubles.

Tax rate for stated income of natural persons being RF residents is 13 percent.

Tax rate for stated income of natural persons being non-RF residents is 30 percent.

Tax is calculated and paid by a fiscal agent upon completion of tax period or in case of payment to tax payer before expiration of successive tax period.

Should it be impossible to withhold calculated amount of tax from a tax payer, a Fiscal agent shall inform tax authorities in written within one month from the date of this event occurrence on impossibility to withhold and on amount of tax debt.

Application of International Agreements.

If provisions of international agreements concluded by the Russian Federation (or USSR, if the RF declared these agreements valid) with other states residents (natural persons or organizations) of which obtain income of the Company's shares, laid down other taxation rules and standards as compared to the same of the Russian Law, rules and standards provided for by international agreements shall apply subject to meeting conditions established by the Law.

1.3. Information on Auditor (Auditors) of the Issuer.

The Auditor who renders services related to independent auditing of accounting and financial statements, prepared under legal requirements of the Russian Federation as well as of consolidated financial statements prepared under US GAAP:

Full name: *Closed joint-stock company «PricewaterhouseCoopers Audit»*
 Abbreviated name: *CJSC "PwC Audit"*
 Domicile: *Bldg 5, 52, Kosmodamianskaya naberezhnaya 115054 Moscow Russia*
 Tel: *(495)-967-60-00*
 Fax: *(495)-967-60-01*
 E-mail: [*webmaster@pwc.com*](mailto:webmaster@pwc.com)

Auditor's license data:

License No: *E000376*
 Issue date: *20.05.2002*
 Validity: *5 years*
 Licenser: *RF Ministry of Finance*

Financial Statements for the following financial years have been audited by the auditor:

- Auditing of the Issuer's consolidated financial statements prepared under US GAAP: 2003, 2004, 2005.*
- Auditing of individual financial statements compiled under the requirements of RF legislation: 2005.*

Factors that could affect the Auditor's independence from the Issuer, including information on any material interests binding the Auditor (the Auditor's officers) with the Issuer (the Issuer's officers):

There are no factors that could affect the Auditor's independence from the Issuer or interests binding the Auditor (Auditor's officers) with the Issuer (the Issuer's officers), namely:

- the Auditor (the Auditor's officers) does (do) not have any share in the Issuer's chartered capital;*
- the Issuer did not grant any loans to the Auditor (the Auditor's officers);*

- *there is no close partnership (promotion of the Issuer's products (services), joint ventures, etc.), as well as kinship;*
- *there are no Issuer's officers being simultaneously the Auditor's officers.*

Procedure of Auditor appointment:

An Auditor is appointed by the General Shareholders' Meeting upon presentation of the Board of Directors. Recommendations on the Company's Auditor for the Board of Directors are prepared by the Audit Committee. Tender related to Auditor selection can be provided for. The main tender rules on the Company's Auditor appointment, in case such is held, are determined by the Audit Committee.

Information on projects executed by the Auditor in the framework of the special auditing tasks:

The Auditor did not execute any projects apart from his direct functions.

Procedure of Auditor fee definition:

The Company's Board of Directors shall define fee for Auditor's services and any other essential conditions of agreement.

Information on deferred and late payments for the Auditor's services:

There are no deferred and late payments for the Auditor's services.

1.4. Information on Appraiser.

The Issuer did not enlist services of an Appraiser (Appraisers) regarding securities issue, information on which is presented in this Quarterly Report.

1.5. Information on the Issuer's advisers.

The Financial Adviser who renders consulting services on securities market:

Full name: *Closed joint-stock company "Renaissance Capital"*

Abbreviated name: *CJSC "Renaissance Capital"*

Domicile: *4th floor, Usadba Centr 22, Voznesensky pereulok Moscow 125009, Russia*

Tel: *(495)-258-77-77*

Fax: *(495)-258-77-78*

Web-site in the Internet used by the financial adviser to disclose information on the Issuer:
www.rencap.com

Data on licenses, permitting professional activity in the securities market:

License of the securities market participant for brokerage

License No.: *177-05370-100000*

Issue date: *July 12, 2001*

Validity: *unlimited*

Licenser: *Federal Committee on Securities Market*

License of the securities market participant for dealing

License No.: *177-05386-010000*

Issue date: *July 12, 2001*

Validity: *unlimited*

Licenser: *Federal Committee on Securities Market*

Services rendered by the Advisor:

- *assistance to the Issuer in preparation of the prospectus;*
- *verification of authenticity and completeness of all information in the Prospectus, with the exception of information, confirmed by the Auditor;*
- *attestation of the Prospectus as well as documentation that might be deemed necessary for the Issuer in order to arrange circulation of shares with traders;*
- *consultations on issues related to preparation of the Prospectus, any other documentation pertained to arrangement of shares circulation and the Issuer going through listing procedure;*

Services being rendered by the Advisor

- *consultations on issues related to the Issuer's information disclosure in the securities market and monitoring over discharge of the Issuer's liabilities pertaining to information disclosure in the securities market according to the requirements of the Federal Authority on Securities Market.*

1.6. Information on other persons who signed this Quarterly Report.

There are no such persons.

II. Main information on the Issuer's financial performance.

2.1. Financial and economic indices of the Issuer's activity.

Indice	as of 31.12.2001	as of 31.12.2002	as of 31.12.2003	as of 31.12.2004	as of 31.12.2005	as of 31.03.2006

Notes: * in 2003-2005 and Q1 2006 NLMK did not have any loans or credits

** These indices have been calculated as a result of each complete financial year upon annual dividend amount approval by NLMK's General Shareholders' Meeting.

For calculation of the a/m indices methods recommended by the Provision on Information Disclosure by Securities Issuers approved by RF FSFR Resolution Nr. 05-5/n3-n dd. March 16, 2005.

Analysis of the a/m indices dynamics attests the stable financial performance and solvency of the Issuer in view of stable net assets growth, growth of its equity capital and its share in funding.

Net assets amount as of 30.09.2005 increased by 5.3% as compared to the respective indice as of 30.06.2005, which is primarily accounted for by the decrease in the Issuer's liabilities (payment of dividends for 2004). Monetary funds and short-term financial investments as well as construction in progress and advance payments issued for non-current assets increase occurred simultaneously.

- 51% – as of 31.12.2002 related to the level of 31.12.2001, which is caused by:
- reduction of the Company's short-term liabilities (note loan repayment);

- growth of construction in progress, long-term financial investments as well as cash increase due to equity capital growth;
45% – as of 31.12.2003 related to the level of 31.12.2002, which is related to short-term financial investments increase, growth of short-term accounts receivable and resources due to equity capital increase;

62% – as of 31.12.2004 related to the level of 31.12.2003, which is primarily caused by long-term financial investments increase (investments in subsidiaries), growth of short-term financial investments (short-term currency deposits) and fixed assets growth due to equity capital growth.

23% – as of 31.12.2005 related to the level of 31.12.2004, which is caused by the growth of equity capital, which is assigned to financing of fixed and current assets.

Net assets amount as of 31.03.2006 increased by 11.6% as compared to the respective index as of 31.12.2005, which is primarily caused by the increase in cash and long-term financial investments at the expense of the Company's surplus earnings of the Company.

The Company's net assets value exceeds its chartered capital value (by 24 times) with is evidence of the Company's stable financial performance.

Dynamics of the index "short-term liabilities to capital and reserves ratio" basically coincides with the dynamics of "debt capital to capital and reserves ratio", because short-term liabilities account for main debt capital amount. These indices were slowly decreasing within 2001-2005. This positive tendency results from the Company's stable equity capital increase at the expense of its surplus earnings. Moreover, the amount of loan capital (note loan repayment) decreased in 2002.

Insignificant increase of the index "debt capital to capital and reserves ratio" as of 31.12.2003 (up to 9.8%) is related to the Issuer's accounts payable increase and long-term liabilities growth. Long-term liabilities increase is caused by deferred tax liabilities reflection in the Issuer's statement in accordance with new RF Accounting Rules).

In QI 2006 the trend for decrease of the indices "debt capital to capital and reserves ratio" and "short-term liabilities to capital and reserves ratio" continued: as of 31.03.2006 they amounted to 5,5% and 4,6%, respectively. It is primarily accounted for by equity capital increase at the expense of surplus earnings and by certain decrease of short-term liabilities.

The current indices attest to low dependence of NLMK on loan funds.

NLMK's outstanding debt level is quite insignificant. As of 31.03.2006 the share of outstanding debt in the Company's total debt was only 0,9%, which is evidence of the Company's stable financial performance and debt repayments without delays.

Short-term accounts receivable turnover

Short-term accounts receivable turnover accelerated within 2001 – 2004.

Accounts receivable turnover in 2002 increased (to 8.22 fold per year) regarding the 2001 index as a result of significant sales increase (+43%).

In 2003 the index of accounts receivable turnover increased as compared to 2002 and amounted to 9.58. Accounts payable turnover ratio increase was facilitated by sales proceeds growth (+41%) outrunning the growth of the average amount of accounts receivable (+21).

The index of accounts receivable turnover in 2004 increased significantly (up to 11.46 fold per year) regarding the 2003 index as a result of significant sales proceeds growth (+68%) upon accounts receivable growth by 38%.

In 2005 accounts receivable turnover ratio decreased regarding the 2004 index (down to 8,32), which resulted from the average amount of accounts receivable growth (+30) against the background of sales proceeds decrease (-5%).

In QI 2006 accounts receivable turnover ratio amounted to 1,80, which is a lower index as compared to QIV 2005 (2,15). The turnover deceleration was caused by sales proceeds decrease (-16% as compared to QI 2005).

Labor productivity index for the period 2001-2004 was increasing. The main factor for labor productivity increase was sales proceeds growth. Moreover, the Company cut back its staff.

That is , in 2002 labor productivity increased by 52%;

in 2003 labor productivity increased by 59%;

in 2004 labor productivity increased by 75%.

In 2005 the labor productivity index dwindled by 4% as a result of sales proceeds decrease (-5%) as compared to 2004.

In QI 2006 the Company's personnel labor productivity amounted to 719,2 thousand ruble /person, which is lower than the level of QI 2005 by 16%. It has resulted from sales proceeds decrease (-16% as compared to QI 2005).

Depreciation to proceeds ratio

Over the period 2001 – 2005 the depreciation to proceeds ratio didn't fluctuate much and didn't exceed 1,7%.

In 2005 depreciation increased as compared to 2004 (from 1,0% to 1,7%). It is accounted for by increased amortized deductions in 2005 as a result of upgraded facilities commissioning on the one hand, and proceeds decrease (-5%) as compared to 2004, on the other part.

In QI 2006 the depreciation to proceeds ratio amounted to 2,1% (in QI 2005 – 1,4%), which is accounted for by increased amortized deductions (+22%) as compared to QI 2005 and proceeds decrease (-16% as compared to QI 2005).

NLMK's accounts payable as of 31.03.2006 do not incorporate creditors accounting for not less than 10 percent of the total accounts payable.

There are no obligations unfulfilled by the Issuer as of the date of complete reporting period end and making up 5 % or more of the Issuer's assets book value as of the end of the complete reporting quarter preceding the last reporting quarter end.

Overdue accounts payable as of 31.12.2005 and 31.03.2006 represent accounts payable to certain contractors which arose in the course of commercial relations and was being repaid within the terms agreed by the parties.

The risk of imposing of fines and sanctions as well as interest on default obligations is estimated as low by the Issuer.

2.3.2. The Issuer's credit history.

Over the latest five completed financial years and as of the reporting quarter closure, no loans were taken under the credit agreements in force. No loan agreements have been concluded, therefore no loans have been taken.

2.3.3. The Issuer's commitments on security to third parties.

	<i>thousand rubles</i>					
	<i>For 2001</i>	<i>For 2002</i>	<i>For 2003</i>	<i>For 2004</i>	<i>For 2005</i>	<i>For Q 1 2006</i>
<i>Commitments on security to third parties, total</i>	<i>2 720 114</i>	<i>526 941</i>	<i>1 782 194</i>	<i>1 011 632</i>	<i>415</i>	<i>-</i>

There were no liabilities for security to third parties in the reporting quarter inclusive of guarantee or pawn being not less than 5 percent of the Company's assets book value.

2.3.4. Other commitments of the Issuer.

There were no other commitments of the Issuer as of the reporting quarter closure.

2.4. Purposes of issue and use of funds gathered from securities distribution.

The Company did not issue any securities distributed by subscription since the date of its registration. So the Company did not raise funds by distribution of securities.

2.5. Risks related to acquisition of distributed (being distributed) issuing securities.

Acquisition of NLMK's securities entails certain risks which could result in losses for shareholders. Negative impact on the Issuer's main activity and financial performance can be produced by the following risks:

- *industry risk;*
- *country and regional risks;*
- *financial risks;*
- *legal risks; and*
- *risks related to the Issuer's activity.*

2.5.1. Industry risks

NLMK actively operates in domestic and international markets as metal products manufacturer and seller. Industry risk factors in this field include:

- *volatility of prices for purchased materials, which can cause rise in the prices of produced goods;*
- *breach of obligations on the part of materials suppliers – regarding the composition and quality of raw materials;*
- *intra-sector competition, caused by high concentration of steel producers;*
- *macroeconomic risks in foreign and domestic markets, including economic growth rates, investment expectations and prices in energy supply markets;*
- *higher tariffs, quotas and other trade restrictions in major export markets;*
- *aggravation of competition on the part of producers in the markets of developing countries, in including steelmaking companies of China, Brazil and India;*
- *risks associated with restructuring of the sector, caused by consolidation trends;*

In case the above listed risks appear, the Company will have to adjust its activity accordingly.

2.5.2. Country and regional risks

The Issuer operates in the Russian Federation. Taking into account the current economic and political situation in Russia, country risks are quite insignificant for NLMK.

NLMK and its subsidiaries have established an efficient system of cooperation between mining, steelmaking and transport sectors, main production facilities are located within 1,500 km from NLMK's key Russian consumers, in close vicinity from all major roads.

*Risks associated with possible wars, emergencies and strikes are practically nonexistent, as the Issuer operates in economically and socially stable regions.
There are no geographical risks for NLMK as well.*

2.5.3. Financial risks

Currency risks

Being an export-oriented enterprise, the Issuer faces currency risks, which can affect its performance.

Taking into account the situation at the world financial markets in the previous years, NLMK's export program is framed with regard to possible (forecast) dynamics of the main currencies. Actions are taken to diversify export proceeds currency structure.

Interest escalation risk

The share of borrowed funds in NLMK's structure is quite insignificant at the moment. Therefore, the risks associated with interest escalation are negligible. If NLMK decides to use borrowed funds to finance its day-to-day operation and investment projects, its high solvency will decrease borrowings value for the Company in future.

Risk of liquidity deterioration

In order to minimize this risk, the schedule of incoming and outgoing cashflows is carefully planned to identify any possible deficit in financial resources. NLMK's credit rating, the highest among Russian steelmakers, has positive effect on the level of risks associated with the Issuer's liquidity.

2.5.4. Legal risks

Risks, associated with changes in currency and tax legislation and changes in customs clearance rules and duties, would significantly affect the Issuer's performance.

For the reporting period there haven't been any material changes in legislation or court practice, governing legal relationship in the field of licensing, in particular, licensing of the Issuer's principal activity or licensing of user rights for objects, the use of which is limited.

At the moment there are no legal actions, which could affect the Company's performance in the field of licensing.

There are no risks associated with prolongation of the Issuer's license for certain activities or use of objects, the use of which is limited.

2.5.5. Risks associated with the Issuer's activity

The main part of the Issuer's licenses for major activities is valid till 2006 and further on. The risk related to failure to prolong these or other licenses is extremely low.

Subsidiaries and affiliated companies of NLMK are liable for their financial performance and risk management.

III. Detail information on the Issuer.
