NOTES TO STATEMENT OF FINANCIAL CONDITION
DECEMBER 31, 2006

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(A) Description of Operations

The financial statements are prepared on the accrual basis of accounting and include the accounts of Conifer Securities, LLC, a limited liability company, (the Firm). The fiscal year of the Firm is the calendar year and operations commenced on March 16, 1989.

The Firm is a broker/dealer in securities who provides exceptional corporate services, quality execution, investment selection, brokerage processing and full back office support to a select group of investment managers, independent research analysts and private clients. The Firm's primary office is in San Francisco and maintains secondary offices in New York City and Boston. An affiliate of the Firm is in the process of establishing a company to provide similar services in the British Virgin Islands (See Note 4).

The Firm introduces all of its trades, on a fully-disclosed basis, to other broker/dealers and is therefore exempt from SEC Rule 15c3-3 under provisions provided for in subparagraph (k)(2)(ii).

The Firm recognizes all income and expenses relating to security transactions on a trade date basis and the net realized gain or loss on sales of securities is determined on a first-in, first-out (FIFO) cost basis.

(B) Cash and cash equivalents

For purposes of the statements of financial condition and cash flows, cash and cash equivalents are defined as all checking, and money market accounts deposited with commercial banks. Deposits held by commercial banks are in excess of federally insured limits.

(C) Valuation of Marketable Securities

Marketable securities are valued at quoted market prices. These securities consist principally of corporate stocks traded on U.S. exchanges.

(D) Receivables from Broker/Dealers

The Firm's receivable from broker/dealers consists primarily of amounts due from other broker/dealers for trades executed and cleared by these other broker/dealers. These amounts due from other broker/dealers are typically received shortly after the accounting period in which they are recorded and the Firm has not experienced any significant uncollectible accounts receivable.

(E) Other Receivables

Other receivables consist primarily of receivable from the Firm's clients for services. All receivables are current and the Firm has never experienced a significant amount of uncollectible amounts.

(F) Furniture, Equipment and Leasehold Improvements

Assets classified as furniture, equipment, and leasehold improvements are shown at historical cost and are being depreciated over their estimated useful lives of five to twelve years using straight-line methods.

(G) Income Taxes

The financial statements do not reflect a provision or liability for federal or state income taxes since under the Internal Revenue Code, a Limited Liability Company is a reporting entity only. The individual Members report their distributive share of the Firm's income and credits on each member's individual tax return. However, certain states and New York City in which the Firm operates impose fees and taxes at the partnership level.

(H) Non-marketable Securities

Periodically, the Firm purchases securities, which are not traded on an open exchange. These securities are valued at fair value.

NOTE 2 - USE OF ACCOUNTING ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the financial statements. Actual results could differ from those estimates.

NOTE 7 - CONCENTRATIONS AND OFF-BALANCE-SHEET RISK

(A) Concentrations

Substantially all of the amounts receivable from brokers and dealers are due from Jefferies & Company Incorporated. Cash and securities deposited with clearing brokers and dealers are held primarily by Jefferies & Company, Incorporated. The amounts shown as cash and cash equivalents are held by two banks and are in excess of the FDIC insured limits.

The Firm's customers consist principally of select individuals and investment advisor companies. Commissions earned from entities related to two of these investment advisor companies represented approximately 20% and 13% of the Firm's gross revenue for the year. Commission and floor brokerage expenses relating to these companies amounted to approximately 19% and 22%, respectively of the Firm's total commissions and floor brokerage expenses and the Firm incurred approximately \$2,600,000 of operating costs directly in relation to the first company.

(B) Credit Risk

As a securities broker/dealer, the Firm is engaged in various trading and brokerage activities. These services are provided to a small group of investors. A portion of the Firm's securities transactions are collateralized and executed with and on behalf of other institutional investors, including other brokers and dealers. In the event counterparties do not fulfill their obligations, the Firm may be exposed to risk. The risk of default depends on the creditworthiness of the counterparty or issuer of the financial instrument.

Securities sold short by the Firm may give rise to off-balance sheet risk. These transactions involve an obligation to purchase such securities at a future date. The Firm records these obligations at the market value of these securities. Should the securities rise in value, it may be necessary to purchase these securities at a cost in excess of the obligation reflected in the financial statements.

NOTE 7 - CONCENTRATIONS AND OFF-BALANCE-SHEET RISK (Continued)

Periodically, the Firm is a party to option contracts. Option contracts are contractual agreements that give the purchaser the right, but not the obligation, to purchase or sell a financial instrument at a predetermined exercise price. In return for this right, the purchaser pays a premium to the seller of the option. Premiums received on option contracts sold and premiums paid on option contracts purchased are adjusted to the carrying amount of those instruments in the financial statements. The Firm is exposed to off-balance sheet market risk related to written option contracts due to the possibility of unfavorable price changes.
