NEWS RELEASE

1 FOR 3 RIGHTS ISSUE OF UP TO 235,787,596 NEW SHARES AT £12.65 PER NEW SHARE TO RAISE APPROXIMATELY £2.9 BILLION (APPROXIMATELY US$5.5 BILLION)

Zug, 3 October 2006

Xstrata announces a fully underwritten rights issue of up to 235,787,596 New Shares at a price of £12.65 pence per New Share on the basis of one New Share for every three Existing Shares held on the record date of Monday, 2 October 2006.

The total net proceeds of the Rights Issue, after estimated aggregate costs and expenses, are expected to be approximately £2.9 billion (approximately US$5.5 billion). The Rights Issue is being undertaken to refinance part of the US$7.0 billion Equity Bridge Facility arranged as part of the financing for the successful acquisition of Falconbridge in August 2006.

The Issue Price of £12.65 pence per New Share represents a 42.5% discount to the closing middle-market price of the Ordinary Shares of £21.98 on 2 October 2006 (a 35.6% discount to the theoretical ex-rights price (TERP) of £19.6475)[1].

Save in respect of New Shares which Glencore International takes up pursuant to the irrevocable undertakings it has given to the Company and pursuant to the separate underwriting commitment Glencore International has given to the Banks pursuant to the Glencore Underwriting Letter, the Rights Issue is fully underwritten by Deutsche Bank and, on behalf of its affiliate JPMorgan Cazenove, by J.P. Morgan Securities Ltd.

Glencore International and Credit Suisse Securities (Europe) Limited ("CSSEL") have the largest shareholdings in the Company, holding approximately 14% and 22% respectively of the Ordinary Shares. Glencore International has irrevocably undertaken to take up its full entitlements under the Rights Issue. In addition, CSSEL has agreed to transfer to Glencore International its entitlements in respect of 151,560,600 Ordinary Shares under the Rights Issue and Glencore International has also irrevocably undertaken to take up in full such entitlements. CSSEL (in respect of 151,560,600 Ordinary Shares) and Glencore International have agreed to lock-ups which, subject to certain exceptions, will expire six months after the latest time for acceptance and

---

1 See the section headed "The Theoretical Ex-Rights Price (TERP)" below for a description of the calculation of the discount to the TERP.

payment in full of entitlements to subscribe for the New Shares. A total of 84,200,333 New Shares are subject to Glencore International's irrevocable undertakings (approximately 35.71% of the maximum number of New Shares to be issued under the Rights Issue). Glencore International will be paid an underwriting commission by the Company of US$35.1 million in connection with its undertakings.

Dealings in New Shares, nil paid, are expected to commence on the London Stock Exchange and on the SWX Swiss Exchange ("SWX") on Thursday, 5 October 2006. The expected latest date for acceptance and payment in full under the Rights Issue is Friday, 27 October 2006.

The Rights Issue is conditional upon a number of matters that are typical for a transaction of this nature. If these conditions are not fulfilled, the Rights Issue will not proceed. Shareholder approval is not required in respect of the Rights Issue following the passing of the resolutions at the Extraordinary General Meeting of the Company held on 30 June 2006. Shareholders who choose not to take up their rights under the Rights Issue will be diluted by approximately 33.3% following the issue of the New Shares.

Commenting, Mick Davis, Xstrata Chief Executive, said:
"The buoyant cash flow generation of the Enlarged Xstrata Group and our confidence in the prospects for the business following the first six weeks of ownership of the Falconbridge assets have exceeded our expectations. This has enabled us to reduce the size of the Rights Issue, from the anticipated US$7.0 billion required to be refinanced under the Equity Bridge Facility, to approximately US$5.5 billion net of expenses and is in line with our commitment to maintain an investment grade credit rating and a prudent capital structure that provides the flexibility to fund the enormous organic growth potential within our portfolio. The remainder of the Equity Bridge Facility will be funded through cash flow and/or through alternative means, which may include accessing the debt markets.

"We have been very encouraged by the quality of personnel and assets within Falconbridge since taking control and beginning the integration process into Xstrata's devolved business structure. The initial 30-day stage of that process is now complete and we have confirmed offers of positions with the Enlarged Xstrata Group or redundancies for all former Falconbridge employees.

"We have successfully established two new commodity businesses, Xstrata Nickel and Xstrata Aluminum, integrated the copper and zinc operations to form new business units within Xstrata Copper and Xstrata Zinc and appointed the senior executives across these new structures. Our teams have made excellent progress in transforming the businesses, realigning resources and responsibility within Xstrata's devolved business structure and identifying a number of exciting opportunities for further value creation for the Enlarged Xstrata Group. As a consequence, we believe there is upside potential for additional synergy benefits from the acquisition. The execution stage of our integration process is now underway and we expect this to complete at the end of this year, at which point we will be in a position to provide greater detail on the potential that we believe the Falconbridge Acquisition has delivered to Xstrata. Key priorities for this next stage, therefore, will be the completion of our review of the aluminium business, the ongoing identification and delivery of synergies and the development of the organic growth potential of the Enlarged Xstrata Group."

Slide presentation and conference call

There will be an investment market conference call today at 09.30 a.m. (London time) hosted by Mick Davis, Chief Executive, and Trevor Reid, Chief Financial Officer.

The dial in telephone number is +44 20 7863 6101 and the call can also be accessed via the internet at www.xstrata.com.

A slide presentation explaining the key features of the Rights Issue will also be available from www.xstrata.com from 7.30 a.m. today.

A replay of the conference call / audiocast will be available from approximately 2 p.m. today from www.xstrata.com and by telephone as follows:
Telephone replay number +44 20 8196 1998
Access code: 814081#.

Due to regulatory restrictions, participation in the webcast and conference call, and access to certain information in connection with the Rights Issue on the Company's website, will be restricted for persons located or resident in United States, Australia, Canada, Japan or South Africa and other persons whose participation or access would be unlawful.

This announcement is not a prospectus but an advertisement and investors should not subscribe for or purchase any of the securities referred to in this advertisement except on the basis of the information in the Prospectus expected to be published later today. *The Prospectus will be available at the registered office of Xstrata plc at 4th Floor, Panton House, 25/27 Haymarket, London SW1Y 4EN, United Kingdom and will otherwise be made available to the public in accordance with the Prospectus Rules.*

Deutsche Bank and JPMorgan Cazenove are joint brokers to Xstrata and are acting as joint sponsors to the Rights Issue. Deutsche Bank and J.P. Morgan Securities Ltd. are acting as joint underwriters to the Rights Issue.

Deutsche Bank AG is authorised under German Banking Law (Competent authority: BaFin – Federal Financial Supervising Authority) and with respect to UK commodity derivatives business by the Financial Services Authority; regulated by the Financial Services Authority for the conduct of UK business. Deutsche Bank AG is acting for the Company and no one else in connection with the Rights Issue and will not be responsible to anyone other than the Company for providing the protections afforded to clients of Deutsche Bank nor for providing advice in connection with the Rights Issue.

JPMorgan Cazenove, which is authorised and regulated by the Financial Services Authority and is regulated by the Financial Services Authority for the conduct of UK business, is acting exclusively for the Company and no one else in connection with the Rights Issue, and will not be responsible to anyone other than the Company for providing the protections afforded to the clients of JPMorgan Cazenove nor for providing advice in connection with the Rights Issue.

The Banks or their affiliates provide various investment banking, commercial banking and financial advisory services from time to time to the Xstrata group. In addition, affiliates of the Banks are lenders under certain of the Xstrata group's debt facilities. In particular, Deutsche Bank and JPMorgan Chase are lenders under the Enlarged Xstrata Group's US$2.5 billion Debt Bridge Facility Agreement, its US$9.5 billion Acquisition Facilities Agreement and its US$7.0 billion Equity Bridge Facility Agreement.

The address of Deutsche Bank is Winchester House, 1 Great Winchester Street, London EC2N 2DB, United Kingdom. The address of JPMorgan Cazenove is 20 Moorgate, London EC2R 6DA, United Kingdom. The address of J.P. Morgan Securities Ltd. is 125 London Wall, London EC2Y 5AJ, United Kingdom.

This announcement does not constitute or form part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, New Shares, Nil Paid Rights and/or Fully Paid Rights to be issued in connection with the Rights Issue and/or to take up entitlements to Nil Paid Rights. The offer to acquire New Shares pursuant to the proposed Rights Issue will be made solely on the basis of information that will be contained in the Prospectus to be published in connection with the Rights Issue.

This announcement is not an offer of securities for sale or a solicitation of an offer to purchase securities in the United States. The New Shares, the Nil Paid Rights and the Fully Paid Rights have not been and will not be registered under the US Securities Act of 1933, as amended (the "Securities Act") or under any relevant securities laws of any state or other jurisdiction of the United States and, accordingly, may not be offered, sold, taken up, exercised, resold, renounced, transferred or delivered, directly or indirectly, within the United States absent registration or an applicable exemption from the registration requirements of the Securities Act and in compliance with state securities laws.

The distribution of this announcement in or into jurisdictions other than the United Kingdom may be restricted by law and therefore persons into whose possession this announcement comes should inform themselves about and observe any such restrictions. Any failure to comply with any such restrictions may constitute a violation of the securities laws or regulations of such jurisdictions. In particular, subject to certain exceptions, this announcement should not be distributed, forwarded to or transmitted in or into the United States, Australia, Canada, Japan or South Africa. Any purchase of, or application for, securities in the Rights Issue should only be made on the basis of information contained in the Prospectus expected to be published later today and any supplement thereto.

Prices and values of, and income from, securities may go down as well as up and an investor may not get back the amount invested. It should be noted that past performance is no guide to future performance. Persons needing advice should consult an independent financial adviser.

This announcement includes statements that are, or may be deemed to be, "forward-looking statements". By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future and may be beyond Xstrata's ability to control or predict. Forward-looking statements are not guarantees of future performance. The Enlarged Xstrata Group's actual results of operations, financial condition, liquidity, dividend policy and the development of the industries in which it operates may differ materially from the impression created by the forward-looking statements contained in this announcement. Further, actual developments in relation to the Acquisitions may differ materially from those contemplated by forward-looking statements depending on certain factors which include, but are not limited to, the risks that the Enlarged Xstrata Group may not realise the anticipated benefits, operational and other synergies and/or cost savings from the Falconbridge Acquisition and/or the Cerrejón Acquisition and/or the Tintaya Acquisition and the Enlarged Xstrata Group may incur and/or experience unanticipated costs and/or delays and/or difficulties relating to integration of the Falconbridge Group and/or the Cerrejón Business and/or Tintaya. In addition, even if the results of operations, financial condition, liquidity and dividend

policy of the Enlarged Xstrata Group, and the development of the industries in which it operates, are consistent with the forward-looking statements contained in this announcement, those results or developments may not be indicative of results or developments in subsequent periods. Important factors that could cause these differences include, but are not limited to, general economic and business conditions, commodity price volatility, industry trends, competition, changes in government and other regulation, including in relation to the environment, health and safety and taxation, labour relations and work stoppages, changes in political and economic stability, currency fluctuations (including the E/US$, £/US$, A$/US$, C$/US$, ZAR/US$, ARS/US$, CHF/US$, CLP/US$, the Colombian peso/US$, the Peruvian Sol/US$ and the Norwegian Kroner/US$ exchange rates), the Enlarged Xstrata Group's ability to integrate new businesses (including the Falconbridge Group, the Cerrejón Business and Tintaya) and recover its reserves or develop new reserves and changes in business strategy or development plans and other risks.

Other than in accordance with its legal or regulatory obligations (including under the Listing Rules, the Disclosure Rules and the Prospectus Rules), Xstrata does not undertake any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events or otherwise.

No statement in this announcement is intended as a profit forecast and no statement in this announcement should be interpreted to mean that earnings per Ordinary Share for the current or future financial years would necessarily match or exceed the historical published earnings per Ordinary Share.

Unless otherwise indicated in this announcement the financial information contained in this announcement has been presented in US dollars. In addition, solely for convenience, this announcement contains translations of relevant currencies to US dollars. These translations should not be construed as representations that the relevant currency could be converted into US dollars at the rate used or at any other rate, and translations into US dollar amounts that have been calculated at 2 October 2006, being the latest practicable date prior to the publication of this announcement, may not correspond to the US dollar amounts shown in the historic or future financial statements of the Company in respect of which different exchange rates may have been or may be used.

Neither the content of the Company's website (or any other website) nor the content of any website accessible from hyperlinks on the Company's website (or any other website) is incorporated into, or forms part of, this announcement.

Capitalised terms used in this announcement have the meanings ascribed to them in Appendix II – "Definitions".

References to times in this announcement are to London Time unless otherwise stated.

Current trading and prospects

Since 30 June 2006, Xstrata has continued to trade well, with demand for commodities remaining robust. In the wider market, this demand, together with market supply constraints and long lead times to add new market capacity, has supported prices for the Enlarged Xstrata Group's commodities significantly above long-term averages.

Base metals prices rose strongly in the first half of 2006, with copper, zinc and lead prices peaking in May before falling back in June. Nickel and aluminium prices also rose strongly in the first half of 2006. In the three months ended 30 September 2006, copper prices consolidated in a range between US$7,000 per tonne and US$8,000 per tonne, while prices for the other three metals showed a strong upward trend. For copper, the market was supported by supply disruption issues in the face of strong market demand. Strong global zinc demand growth coupled with low world zinc stocks and a supply deficit have combined to boost the zinc price in the second half of 2006. The nickel price increased further after 30 June 2006, reaching new highs in August 2006. By comparison the aluminium price has remained flat to date in the

second half of 2006, albeit at a relatively high level by historical standards. With the exception of nickel, where the London Metal Exchange (LME) price has continued to show upward momentum, base metals prices fell back from their recent highs in mid-September 2006 due to concerns over potential softer Chinese demand and the performance of the US economy. However, base metal prices remain significantly above their long-term averages and the assumptions that underpinned the Falconbridge Acquisition.

For thermal and coking coal, more than 90% of Xstrata's export sales from Australia and South Africa have been priced for the remainder of 2006. Thermal and coking coal prices have remained above historical averages in 2006, although average realised prices are expected to be lower than in 2005. A key driver of earnings for the Coal Business in 2007 will be the settlement of contract prices in Australian thermal and coking coals for the new contract year from 1 April 2007 as well as coal's competitive position in the European energy market. Term thermal coal prices relating to this period for contracts settled to date reflect the continued strong demand. Coking coal price negotiations for the new contract year will not typically commence until later in 2006. Stronger demand from stainless steel producers in 2006 has supported an increase of 4.75 cents per pound in the ferrochrome price in the third quarter of 2006. Vanadium prices have declined from the peaks seen in 2005, but remain strong and are anticipated to remain significantly above historical levels during 2006.

Significant changes since 30 June 2006

Falconbridge break fees
Following the expiry of the Inco Offer for Falconbridge on 28 July 2006, Falconbridge paid Inco a cash break fee of US$150 million on 1 August 2006 and, following the successful completion of the Xstrata Offer for Falconbridge, Falconbridge paid Inco a further cash break fee of US$300 million on 16 August 2006, in each case in accordance with the terms of the Inco Support Agreement.

Falconbridge Special Dividend
Falconbridge paid a special cash dividend of C$0.75 per Falconbridge Share on 10 August 2006 to Falconbridge Shareholders of record at the close of business on 26 July 2006, being cash payments of approximately C$278.1 million (approximately US$249.2 million) and approximately US$3.6 million in aggregate, of which approximately C$55.2 million (approximately US$49.5 million) was received by the Former Xstrata Group in respect of its Falconbridge Shares held on the record date.

Falconbridge Acquisition
On 28 July 2006, Xstrata Alberta purchased for cash 18,556,430 Falconbridge Shares through the TSX, representing approximately 5% of the then outstanding Falconbridge Shares, at an average price of C$62.25 per Falconbridge Share, or approximately C$1,155.1 million (approximately US$1,035.2 million) in aggregate.

On 15 August 2006, Xstrata Canada acquired for cash 257,700,100 Falconbridge Shares under the Xstrata Offer, representing approximately 67.8% of the then outstanding Falconbridge Shares, at the Xstrata Offer price of C$62.50 per Falconbridge Share, or approximately C$16,106.3 million (approximately US$14,434.8 million) in aggregate.

On 25 August 2006, Xstrata Canada acquired for cash 18,637,431 Falconbridge Shares under the Xstrata Offer, representing approximately 4.9% of the then outstanding Falconbridge Shares, at the Xstrata Offer price, or approximately C$1,164.8 million (approximately US$1,043.9 million) in aggregate.

As a result of these transactions and acquisitions in August and September 2005 by Xstrata Alberta of approximately 19.9% of the then outstanding Falconbridge Shares, Xstrata now beneficially owns approximately 97.1% of the outstanding Falconbridge Shares on a fully-diluted basis. Since the Xstrata Offer was accepted by holders of more than 90% of Falconbridge Shares, Xstrata has begun a compulsory acquisition process to acquire all outstanding Falconbridge

Shares not already owned by Xstrata at the Xstrata Offer price of C$62.50 per Falconbridge Share. Xstrata expects the compulsory acquisition process to conclude in early November 2006.

The market purchases of Falconbridge Shares and the Xstrata Offer were, and the compulsory acquisition procedure will be, financed by the Former Xstrata Group's existing cash resources and its debt facilities, which are to be refinanced in part using the net proceeds of the Rights Issue.

ARM Coal
On 24 August 2006, the transaction announced by the Company in February 2006 between the Former Xstrata Group and African Rainbow Minerals, to establish a new black controlled South African coal mining company called ARM Coal, completed. The transaction was valued in aggregate at approximately ZAR2.4 billion (approximately US$310.3 million). The Former Xstrata Group paid ZAR384 million (approximately US$49.6 million) to subscribe for 49% of the issued share capital of ARM Coal, which holds a 20% interest in the coal operations of Xstrata South Africa excluding the Goedgevonden project, and a direct 51% interest in the Goedgevonden project. In August 2006, ARM exercised an option to increase its direct interests in the coal operations of Xstrata South Africa (excluding the Goedgevonden project) for a cash investment of ZAR400 million (approximately US$51.7 million). As a result, historically disadvantaged South Africans now control approximately 36%of the Enlarged Xstrata Group's South African coal business. The Former Xstrata Group also provided debt funding of ZAR765 million (approximately US$98.9 million) to ARM Coal to acquire the 51% interest in the Goedgevonden project.

Redemption of Falconbridge preference shares
Falconbridge announced on 15 September 2006 its intention to redeem its outstanding Cumulative Redeemable Preferred Shares, Series F and Series G, and Cumulative Preferred Shares, Series 1 on 1 November 2006. The Enlarged Xstrata Group intends to utilise its internal cash resources to fund the aggregate redemption price of approximately C$306 million (approximately US$274.2 million).

Information on the Enlarged Xstrata Group
The Enlarged Xstrata Group is the fifth largest diversified mining group in the world with top five industry positions in copper, thermal and coking coal, ferrochrome, zinc, nickel and vanadium, a smaller but profitable aluminium business, recycling facilities, additional exposures to gold, lead, silver and platinum group metals, and a suite of global technologies, many of which are leading technologies in the industry. The Enlarged Xstrata Group's operations and projects span five continents and 18 countries: Argentina, Australia, Brazil, Canada, Chile, Colombia, the Dominican Republic, Germany, Jamaica, New Caledonia, Norway, Papua New Guinea, Peru, South Africa, Spain, Tanzania, the UK and the USA.

Following completion of the Falconbridge Acquisition in August 2006, the Enlarged Xstrata Group comprises the Former Xstrata Group and the Falconbridge Group.

Use of proceeds of the Rights Issue
The Company has launched the Rights Issue to refinance part of the debt raised to finance the cash consideration paid in respect of the Falconbridge Acquisition.

The total net proceeds of the Rights Issue, after estimated aggregate costs and expenses of approximately £54 million (approximately US$102 million), are expected to be approximately £2.9 billion (approximately US$5.5 billion).

The total net proceeds will be applied towards repayment of the principal and interest that is currently outstanding under the fully drawn US$7.0 billion Equity Bridge Facility.

The Company is also considering alternatives for refinancing the outstanding debt under the Equity Bridge Facility not refinanced with the net proceeds of the Rights Issue and under the Debt Bridge Facility. It intends to refinance this outstanding debt and, depending on market conditions and other factors, it may do so in whole or in part by issuing debt securities. The

Company may pursue one or more of such alternatives at any time that it judges market conditions and other factors to be favourable.

Terms and conditions of the Rights Issue

The Rights Issue will be made on the terms and subject to the conditions set out in the Prospectus expected to be published later today (and, in the case of Qualifying non-CREST Shareholders, the Provisional Allotment Letter). Up to an aggregate of 235,787,596 New Shares are intended to be offered by way of Nil Paid Rights payable in full on acceptance by Qualifying Shareholders on the basis of:

1 New Share at 1,265 pence per New Share for every 3 Existing Shares

held on the Record Date and so in proportion for any other number of Existing Shares then held and otherwise as set out in the Prospectus. Holdings of Existing Shares in certificated and uncertificated form will be treated as separate holdings for the purpose of calculating entitlements under the Rights Issue. Fractions of New Shares will not be allotted and fractional entitlements will be rounded down to the nearest whole numbers of New Shares.

The Issue Price of 1,265 pence per New Share represents a 42.5% discount to the closing middle-market price on the London Stock Exchange's main market for listed securities of 2,198 pence per Ordinary Share on 2 October 2006, the last business day prior to this announcement. The New Shares will, when issued and fully paid, rank equally in all respects with the Existing Shares, including the right to receive all dividends or distributions declared after the date of the Prospectus. For the avoidance of doubt, the New Shares shall not be entitled to participate in the dividend of US$0.13 per share declared on 2 August 2006 and payable on 13 October 2006 in the respect of Existing Shares held on the record date of 22 September 2006. There will be no restrictions on the free transferability of the New Shares save as provided in the Articles of Association. The rights attaching to the New Shares will be governed by the Articles.

The Rights Issue will be made in the United Kingdom by way of the Prospectus and the Provisional Allotment Letters. The Rights Issue will not be made by way of the Prospectus or the Provisional Allotment Letters in any jurisdiction other than the United Kingdom, but will be made to Qualifying Shareholders with registered addresses in other jurisdictions as will be described in the Prospectus. Shareholders taking up their rights by completing a Provisional Allotment Letter or sending a Many-to-Many instruction ("MTM instruction") to CRESTCo will be deemed to have made the warranties to be set out in the Prospectus, unless such requirement is waived by the Company.

Subject to certain exceptions, Qualifying Shareholders with registered addresses in the United States, Australia, Canada, Japan or South Africa will not be sent the Prospectus or Provisional Allotment Letters and will not have their accounts credited with Nil Paid Rights.

Application will be made to the Financial Services Authority for the New Shares (nil and fully paid) to be admitted to the Official List and to the London Stock Exchange for the New Shares (nil and fully paid) to be admitted to trading on the London Stock Exchange's main market for listed securities. Application will also be made to the Admission Board of the SWX for the New Shares (nil and fully paid) to be admitted to listing on the SWX. It is expected that Admission to the Official List will become effective and that dealings in the New Shares will commence on the London Stock Exchange and on the SWX at 8.00 a.m. (London time) on Thursday, 5 October 2006.

None of the New Shares has been marketed or is being made available in whole or in part to the public other than in connection with the Rights Issue.

The Existing Shares are already admitted to CREST. Applications will be made for the Nil Paid Rights, the Fully Paid Rights and the New Shares to be admitted to CREST. CRESTCo requires the Company to confirm to it that certain conditions imposed by the CREST Regulations are satisfied before CRESTCo will admit any security to CREST. It is expected that these conditions will be

satisfied in respect of the Nil Paid Rights, the Fully Paid Rights and the New Shares on admission of the New Shares to the Official List, nil paid. As soon as practicable after satisfaction of the conditions, the Company will confirm this to CRESTCo.

Save for those New Shares which Glencore International takes up pursuant to the irrevocable undertakings it has given to the Company or pursuant to the Glencore Underwriting Letter, the Rights Issue has been fully underwritten by the Underwriters on the terms of the Underwriting Agreement and the Rights Issue is conditional upon, amongst other things, fulfilment of the following conditions:

(a) the Prospectus being approved by, and filed with, the FSA in accordance with the Prospectus Rules and the FSMA and filed with the SWX in accordance with the Swiss Listing Rules and being made available to the public by not later than 5.00 p.m. on Tuesday, 3 October 2006 (or such later time or date as the Banks may agree);

(b) none of the representations, warranties or undertakings given by Xstrata in the Underwriting Agreement being breached, untrue, inaccurate or misleading in any respect when made;

(c) Admission and Swiss Admission occurring at or before 8.00 a.m. on Thursday, 5 October 2006 (or such later time or date as the Company and the Banks may agree); and

(d) the Underwriting Agreement otherwise having become unconditional in all respects and not having terminated in accordance with its terms prior to Admission.

If these conditions are not fulfilled, the Rights Issue will not proceed.

The Underwriting Agreement may terminate upon the occurrence of certain events, in which case the Rights Issue will not proceed. A summary of the terms of the Underwriting Agreement will be set out in the Prospectus.

The Underwriters may engage in trading activity for the sole purpose of hedging their commitments under the Underwriting Agreement. Such activity may include purchases and sales of securities of the Company and related or other securities and instruments (including Ordinary Shares, Nil Paid Rights and Fully Paid Rights).

Deutsche Bank and JPMorgan Cazenove may arrange sub-underwriting for some, all or none of the New Shares which the Underwriters have underwritten.

The Banks or their affiliates provide various investment banking, commercial banking and financial advisory services from time to time to the Enlarged Xstrata Group. In addition, affiliates of the Banks are lenders under certain of the Enlarged Xstrata Group's debt facilities. In particular, Deutsche Bank and JPMorgan Chase are lenders under the Debt Bridge Facility Agreement, the Acquisition Facilities Agreement and the Equity Bridge Facility Agreement.

Xstrata has committed to undertake one or more equity capital raisings to refinance the Equity Bridge Facility, under which the Former Xstrata Group drew US$7.0 billion in connection with the Falconbridge Acquisition. Deutsche Bank and JPMSL committed to underwrite, each as to 50% and subject to the terms of the Standby Equity Underwriting Letter, one or more equity offerings to raise such amount as is required to repay the amounts outstanding under the Equity Bridge Facility Agreement together with costs and expenses.

As a result the Company has launched the Rights Issue, and the Company and the Banks have entered into the Underwriting Agreement, to refinance part of the US$7.0 billion drawn under the Equity Bridge Facility in respect of the Falconbridge Acquisition.

The Company has received from Glencore International an irrevocable undertaking to take up its full entitlement under the Rights Issue. In addition, CSSEL has agreed to transfer to Glencore

International its entitlements in respect of 151,560,600 Ordinary Shares under the Rights Issue and Glencore International has also irrevocably undertaken to take up in full such entitlements. CSSEL (in respect of 151,560,600 Ordinary Shares) and Glencore International have agreed to lock-ups which, subject to certain exceptions, will expire six months after the latest time for acceptance and payment in full of entitlements to subscribe for the New Shares. A total of 84,200,333 New Shares are subject to Glencore International's irrevocable undertakings, equivalent to approximately 35.71% of the maximum number of New Shares to be issued under the Rights Issue. The actual number of New Shares taken up by Glencore International pursuant to the Irrevocable Undertaking Agreement may be less than 84,200,333 if Glencore International disposes of any of its existing holding of Ordinary Shares prior to the ex-rights date as a result of the exercise of any exchange rights pursuant to the Glencore Exchangeable Bonds. However, Deutsche Bank and JPMC have agreed, as agent for the Company, to endeavour to procure subscribers for such number of New Shares as Glencore International is unable to take up prior to the latest time and date for acceptance and payment in full under the Rights Issue as a consequence of having to dispose of Ordinary Shares in these circumstances (such New Shares being referred to herein as "Exchanged New Shares"), except if in the opinion of the Banks subscribers are unlikely to be procured for such Exchanged New Shares. Pursuant to the Glencore Underwriting Letter, Glencore International has agreed to subscribe for New Shares equivalent in number to the Exchanged New Shares for which Deutsche Bank and JPMC have not procured subscribers. . The Takeover Panel has granted a dispensation from any obligation on either Glencore International or CSSEL to make a mandatory offer for Xstrata pursuant to Rule 9 of the City Code, as a result of Glencore International and CSSEL's interest being diluted by exchange rights under the Glencore Exchangeable Bonds being exercised or conversion rights under the 2010 Convertible Bonds, 2017 Convertible Debenture or other bonds convertible (directly or indirectly) into Ordinary Shares being exercised, between Monday, 2 October 2006 (being the latest practicable date prior to the publication of this document) and completion of the Rights Issue and subsequently being increased again as a result of Glencore International subscribing for New Shares pursuant to the irrevocable undertakings it has given to the Company or pursuant to the Glencore Underwriting Letter. Glencore International's right to acquire shares pursuant to Note 11 on Rule 9.1 of the City Code is not affected by this dispensation nor by these arrangements generally. Glencore International will be paid an underwriting commission by the Company of US$35.1 million in connection with its undertakings. Further details of Glencore International's Irrevocable Undertaking Agreement and the lock-up arrangements will be set out in the Prospectus.

Subject, amongst other things, to the conditions referred to in sub-paragraphs (a) to (d) above being satisfied, it is intended that:

(i) Provisional Allotment Letters in respect of Nil Paid Rights will be dispatched to Qualifying non-CREST Shareholders (other than certain Overseas Shareholders) at their own risk on Wednesday, 4 October 2006;

(ii) Computershare Investor Services PLC will instruct CRESTCo to credit the appropriate stock accounts of Qualifying CREST Shareholders (other than certain Overseas Shareholders) with such Shareholders' entitlements to Nil Paid Rights, with effect from 8.00 a.m. on Thursday, 5 October 2006;

(iii) the Nil Paid Rights and Fully Paid Rights will be enabled for settlement by CRESTCo by 8.00 a.m. on Thursday, 5 October 2006, or if later, as soon as practicable after the Company has confirmed to CRESTCo that all the conditions for admission of such rights to CREST have been satisfied; and

(iv) definitive share certificates in respect of New Shares to be held in certificated form are expected to be dispatched by post by Friday, 3 November 2006 to accepting Qualifying non-CREST shareholders or their renouncees at their registered address (unless lodging agent details are completed in the Provisional Allotment Letter).

The offer of New Shares to Qualifying CREST Shareholders will be made, on the terms and conditions set out in the Prospectus, at the time when (such Shareholders' stock accounts having been credited as described in paragraph (ii) above) the Nil Paid Rights and Fully Paid Rights are enabled for settlement as described in paragraph (iii) above.

Xstrata Share Schemes

In accordance with the rules of the Xstrata Share Schemes, the Directors propose to make adjustments to the terms of outstanding options and awards to take account of the issue of New Shares. Such adjustments will be made subject to the rules of the Xstrata Share Schemes. The Company will notify participants of any such adjustments in due course.

Convertible securities

As at 2 October 2006, being the latest practicable date prior to this announcement, US$214,419,000 million of the 2010 Convertible Bonds remain outstanding and US$375,000,000 million of the 2017 Convertible Debenture remain outstanding.

The exchange price of the 2010 Convertible Bonds (the "2010 Convertible Bonds Exchange Price") and of the 2017 Convertible Debenture (the "2017 Convertible Debenture Exchange Price") will be adjusted to take account of the Rights Issue in the manner provided for in the terms of the Series 1 preference shares of Xstrata Capital and the terms of the Series 2 preference shares of Xstrata Capital.

In addition:

- the 2010 Convertible Bonds Exchange Price will also be adjusted to take account of the Placing and the payment of the dividend of US$0.09 per Ordinary Share on 23 September 2005 and US$0.25 per Ordinary Share on 19 May 2006 of which US$0.052 per Ordinary Share constituted a Capital Distribution (as defined in the terms of the Series 1 preference shares of Xstrata Capital); and

- the 2017 Convertible Debenture Exchange Price will also be adjusted to take account of the Placing.

In accordance with the terms and conditions of the 2010 Convertible Bonds and the 2017 Convertible Debenture, the above noted adjustments were carried forward and are now being taken into account in the adjustment being made as a consequence of the Rights Issue as the respective adjustments to the 2010 Convertible Bonds Exchange Price and the 2017 Convertible Debenture Exchange Price required as a consequence of the payment of the Capital Distribution and/or the Placing in aggregate would have resulted in an aggregate adjustment of less than 1% of the relevant Exchange Price.

Holders of 2010 Convertible Bonds will be notified of the amount of the adjustment to the 2010 Convertible Bonds Exchange Price in due course.

Holders of 2010 Convertible Bonds and the holder of the 2017 Convertible Debenture who convert a 2010 Bond or the 2017 Convertible Debenture, as the case may be, on Monday, 2 October 2006 or Tuesday, 3 October 2006 may receive new Ordinary Shares prior to the ex-rights date but those new Ordinary Shares will not carry the right to receive rights in the Rights Issue as they will be allotted and issued after the Record Date for the Rights Issue. Accordingly, any sales of such new Ordinary Shares before the ex-rights date, Thursday, 5 October 2006, will be trading cum the rights in the market but will not themselves carry the entitlement to the rights. Holders of 2010 Convertible Bonds and the holder of the 2017 Convertible Debenture should be aware of this and consider the implications of this with any purchaser prior to selling any such new Ordinary Shares.

***The* Theoretical Ex-Rights Price (TERP)**

The discount to the TERP is calculated as follows:

$$\frac{(A-B) \times 100}{A}$$

where:

A = the TERP (in pence); and
B = the Issue Price of 1,265 pence per New Share.

The TERP is calculated as follows:

$$\frac{(C \times D) + (E \times F)}{D + F}$$

where:

C = the Issue Price of 1,265 pence per New Share;
D = 1, being the number of New Shares being offered for every 3 Existing Shares held on the Record Date;
E = 2,198 pence, being the closing middle-market price of an Ordinary Share on the London Stock Exchange on 2 October 2006; and
F = 3, being the number of Existing Shares held on the Record Date for which every 1 New Share is being offered.

APPENDIX I
Expected Timetable of Principal Events

Record Date for entitlements under the Rights Issue	5.00 p.m. London Time (6.00p.m. Central European Time) on Monday, 2 October 2006
Commencement of Rights Issue	Tuesday, 3 October 2006
Publication of Prospectus	Tuesday, 3 October 2006
Expected date of dispatch of Provisional Allotment Letters (to Qualifying non-CREST Shareholders only*)	Wednesday, 4 October 2006
Expected date that dealings in New Shares, nil paid, will commence on the London Stock Exchange and on the SWX	**8.00 a.m. London Time (9.00 a.m. Central European Time) on Thursday, 5 October 2006**
Expected date that Existing Shares will be marked "ex-rights" by the London Stock Exchange	8.00 a.m. London Time (9.00 a.m. Central European Time) on Thursday, 5 October 2006
Expected date that Nil Paid Rights will be credited to stock accounts in CREST (Qualifying CREST Shareholders only*) and SIS	as soon as practicable after 8.00 a.m. London Time (9.00 a.m. Central European Time) on Thursday, 5 October 2006
Expected date that Nil Paid Rights and Fully Paid Rights will be enabled in CREST	as soon as practicable after 8.00 a.m. London Time (9.00 a.m. Central European Time) on Thursday, 5 October 2006
Recommended latest time and date for requesting withdrawal of Nil Paid Rights or Fully Paid Rights from CREST (i.e. if your Nil Paid Rights or Fully Paid Rights are in CREST and you wish to convert them into certificated form)	4.30 p.m. London Time (5.30 p.m. Central European Time) on Friday, 20 October 2006
Expected latest time and date for depositing renounced Provisional Allotment Letters, nil paid or fully paid, into CREST or for dematerialising Nil Paid Rights or Fully Paid Rights into a CREST stock account	3.00 p.m. London Time (4.00 p.m. Central European Time) on Tuesday, 24 October 2006
Expected latest time and date for acceptance and payment in full with value date 27 October 2006 in respect of Nil Paid Rights attributable to Ordinary Shares held in the SIS System	**11.00 a.m. London Time (12.00 noon Central European Time) on Wednesday, 25 October 2006**
Expected latest time and date for splitting Provisional Allotment Letters, nil paid or fully paid	3.00 p.m. London Time (4.00 p.m. Central European Time) on Wednesday, 25 October 2006
Expected latest time and date for acceptance and payment in full and registration of renounced Provisional Allotment Letters	**11.00 a.m. London Time (12.00 noon Central European Time) on Friday, 27 October 2006**
Expected date of announcement of the results of Rights Issue through a Regulatory Information Service	Monday, 30 October 2006
Expected date of commencement of dealings in New Shares, fully paid, on the London Stock Exchange and on the SWX and New Shares credited to CREST stock accounts (uncertificated holders only*)	8.00 a.m. London Time (9.00 a.m. Central European Time) on Monday, 30 October 2006
Expected date of dispatch of definitive share certificates for New Shares (to Qualifying non-CREST Shareholders only*)	by Friday, 3 November2006

* Subject to certain restrictions relating to Overseas Shareholders.

The dates set out in the expected timetable of principal events above and mentioned throughout this announcement may be adjusted by Xstrata in which event details of the new dates will be notified to the Financial Services Authority, the London Stock Exchange and the SWX and, where appropriate, to Shareholders. In particular, pursuant to the Underwriting Agreement, the Company and the Banks have agreed that if a supplementary prospectus is issued by the Company two or fewer Business Days prior to the date specified in the expected timetable of principal events above as the expected latest time and date for acceptance and payment in full (or such later date as may be agreed by the Company and the Banks), such date shall be deemed to be the date which is three Business Days after the date of issue of the supplementary

prospectus (and the dates and times of principal events due to take place following such date will be adjusted accordingly).

References to times in this document are to London Time unless otherwise stated.

APPENDIX II
Definitions

"2006 Xstrata Interim Report"	the unaudited interim report of Xstrata for the six-month period ended 30 June 2006
"2010 Convertible Bonds"	the 3.95% Guaranteed Convertible Bonds due 2010 issued by Xstrata Capital
"2017 Convertible Debenture"	the 4.00% Guaranteed Convertible Debenture due 2017 issued by Xstrata Capital
"Acquisition Facilities Agreement"	the US$9,500,000,000 acquisition facilities agreement dated 8 August 2006, as amended from time to time, between, amongst others, Xstrata plc, Xstrata (Schweiz) AG, Barclays Capital, Deutsche Bank, J.P. Morgan PLC and The Royal Bank of Scotland plc
"Acquisitions"	the Cerrejón Acquisition, the Falconbridge Acquisition and the Tintaya Acquisition
"Admission"	admission of the New Shares, nil paid, to (i) the Official List, and (ii) trading on the London Stock Exchange's markets for listed securities

NEWS RELEASE

COMPLETION OF 1ST STAGE OF THE MOUNT ISA ZINC CONCENTRATOR UPGRADE AND EXPANSION

Madrid, 5 October 2006

Xstrata Zinc today announces that it has successfully completed the first stage of the project to upgrade and expand the Mount Isa zinc concentrator.

This first stage of the project comprised increasing the operating reliability of the old plant through the installation of a new crushing circuit and ore feed system, an enhanced maintenance program with special emphasis on the Heavy Medium plant and the recent commissioning of a new zinc filter plant. This project also included a low cost expansion of throughput capacity by an additional 1.5 million tonnes of ore per annum through the installation of a parallel second hand milling and flotation circuit acquired at a nominal cost.

The combined effect of the increased operating reliability of the old plant plus the new parallel circuit will increase the nominal feeding capacity of the concentrator to 6.5 million tonnes of ore per annum, which represents an improvement of more than 40% over the feed rate achieved in the first nine months of 2006.

Santiago Zaldumbide, Xstrata Zinc CEO said: "The completion of the first stage of the Mount Isa zinc concentrator upgrade and expansion is an important step in improving significantly the vertical integration of Xstrata Zinc. This important milestone together with the second stage of the project –to be completed during 2008- will increase total throughput capacity of the concentrator to 8 million tonnes per year of ore, representing a key transformational step for Xstrata Zinc."

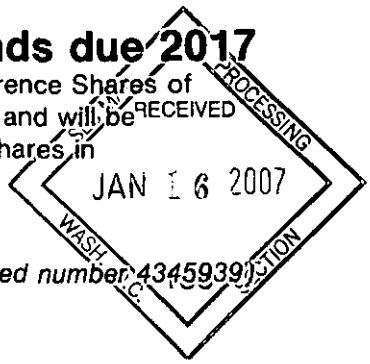
About Xstrata Zinc

Xstrata Zinc is one of the world's largest producers of zinc. Around half of all zinc currently consumed is used for galvanizing steel, which is an environmentally friendly method of protecting steel against corrosion. Zinc also finds application in the manufacture of die-cast alloys, brass and the production of zinc oxides and chemicals.

Xstrata's zinc and lead operations are located in Australia, Canada, Germany, Spain and the UK. They comprise: the San Juan de Nieva zinc smelter and the Arnao zinc semis plant in Asturias, Spain; the Hinojedo roasting plant in Cantabria, Spain; the Nordenham zinc smelter in northern Germany; the Mount Isa, George Fisher-Hilton and Black Star zinc-lead mines and lead smelter in Queensland, Australia; McArthur River zinc-lead mine in the Northern Territory, Australia; the Northfleet lead refinery located in the UK; the Brunswick zinc-lead mine and lead smelter in New Brunswick, Canada, 25% of the CEZ zinc smelter near Montreal, Canada; 50% of Lennard Shelf zinc lead mine in Western Australia; 75% of Lady Loretta zinc lead deposit in Queensland, Australia; 33.75% of Antamina mine in Peru and the Perseverance zinc deposit in Quebec.



Xstrata Capital Corporation A.V.V.

(incorporated in Aruba with limited liability under registered number 13174.0)

US$375,000,000

Issue Price: 100 per cent.

The US$375,000,000 4.00 per cent. Guaranteed Convertible Bonds due 2017 (the "Bonds") of Xstrata Capital Corporation A.V.V. (the "Issuer") are proposed to be issued on 13 October 2006 (the "Issue Date") and are, subject as provided herein, convertible into 4.00 per cent. exchangeable redeemable preference shares of the Issuer having on the Issue Date a nominal value of *US$0.50 each* ("Preference Shares") which are guaranteed by Xstrata plc ("Xstrata" or the "Guarantor") and will be exchangeable immediately upon *issuance* for fully paid ordinary shares in the capital of the Guarantor having on the Issue Date a nominal value of US$0.50 each (the "Ordinary Shares").

Interest on the Bonds is payable semi-annually in arrears in equal instalments (other than the first instalment) on 6 March and 6 September in each year, commencing on 6 March 2007. Interest payments will be made without withholding of, or deduction for, taxation unless the withholding or deduction is required by law, in which case the relevant payment will be made subject to such withholding or deduction.

Application has been made to the Financial Services Authority in its capacity as competent authority for the purposes of Part VI of the United Kingdom Financial Services and Markets Act 2000 (the "FSMA") for the Bonds to be admitted to the Official List of the Financial Services Authority (the "Official List") and to London Stock Exchange plc (the "London Stock Exchange") for such Bonds to be admitted to trading on the Professional Securities Market of the London Stock Exchange. This document comprises Listing Particulars and is issued in compliance with the listing rules made under section 74 of the FSMA and by the Financial Services Authority.

The Ordinary Shares are listed on the Official List and trade on the London Stock Exchange's market for listed securities under the symbol "XTA". The Ordinary Shares are also listed on SWX Swiss Exchange ("SWX") *under* the symbol "XTAN". The Preference Shares will not be listed on any stock exchange.

Unless previously redeemed, converted or purchased and cancelled, the Bonds will be redeemed at their principal amount on 14 August 2017.

See Part IV — "Risk Factors" of these Listing Particulars for a discussion of certain factors that should be considered in connection with an investment in the Bonds.

The Bonds, the guarantee provided by the Guarantor in respect of the Bonds (the "Bond Guarantee"), the guarantee provided by the Guarantor in respect of the Preference Shares (the "Deed Poll" and, together with the Bond Guarantee, the "Guarantees"), the Preference Shares and the Ordinary Shares have not been and will not be registered under the United States Securities Act of 1933, as amended (the "Securities Act"), or with any securities regulatory authority of any jurisdiction. Subject to certain exceptions, the Bonds, the Guarantees, the Preference Shares and the Ordinary Shares may not be offered or sold in the United States or to, or for the account or benefit of, US persons (as defined in Regulation S).

The Bonds will be offered and sold only in offshore transactions in accordance with Regulation S under the Securities Act.

The Bonds will be represented on issue by a global Bond in registered form (the "Global Bond") without coupons attached. The Global Bond is expected to be deposited on or about the Issue Date with, or on behalf of, a common depositary, and registered in the name of a common nominee, for Euroclear Bank S.A./N.V., as operator of the Euroclear system ("Euroclear") and Clearstream Banking, société anonyme ("Clearstream, Luxembourg"). The Global Bond will be exchangeable in whole but not in part for individual definitive Bonds in registered form, serially numbered in the denomination of US$100,000 and higher integral multiples of US$1,000 thereof, in certain limited circumstances only as described therein and herein.

These Listing Particulars have been prepared in connection with the listing of the Bonds following their issue. Notwithstanding any other disclosure contained herein, no offer of Bonds is being made in connection with the publication of these Listing Particulars.

These Listing Particulars do not constitute an offer of, or an invitation by or on behalf of the Issuer or the Guarantor to subscribe for or purchase any of, the Bonds, the Preference Shares or the Ordinary Shares. The distribution of these Listing Particulars and/or the offering of the Bonds, the Preference Shares and/or the Ordinary Shares in certain jurisdictions may be restricted by law. Persons into whose possession these Listing Particulars come are required by the Issuer and the Guarantor to inform themselves about and to observe any such restrictions. For a description of certain further restrictions on offers and sales of the Bonds, the Preference Shares and/or the Ordinary Shares and distribution of these Listing Particulars, see paragraph 18 of Part XVI — "Additional information — Securities law considerations" of these Listing Particulars.

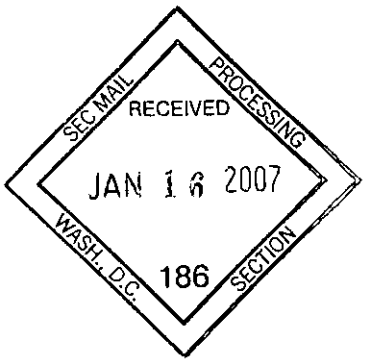
No invitation has been or will be made, whether directly or indirectly, to or for the account of any person in or outside Aruba, to subscribe for, purchase or accept any fractional interest in the Bonds or to, or for the account of any other person in or outside Aruba, to re-offer or resell, directly or indirectly, any fractional interest in the Bonds unless by virtue of an exemption granted by the Central Bank of Aruba.

No person is authorised in connection with the listing or any issue, offering or sale of the Bonds to give any information or to make any representation not contained in these Listing Particulars and any information or representation not so contained must not be relied upon as having been authorised by or on behalf of the Issuer or the Guarantor. The delivery of these Listing Particulars at any time does not imply that there has been no change in the affairs of the Issuer, the Guarantor or the Enlarged Xstrata Group since the date hereof or that the information contained herein is correct as at anytime subsequent to its date.

In making an investment decision, potential investors must rely on their own examination of the Issuer, the Guarantor and the Enlarged Xstrata Group, including the merits and risks involved. Potential investors should not construe anything in these Listing Particulars as legal, business or tax advice. Each potential investor should consult its own advisers as needed to make its investment decision and to determine whether it is legally permitted to purchase the Bonds under applicable laws and regulations.

If any prospective purchaser is in any doubt about the contents of these Listing Particulars, such prospective purchaser should consult a stockbroker, bank manager, solicitor, accountant or other financial adviser.

None of the Issuer or the Guarantor is providing any advice or recommendation in these Listing Particulars on the merits of the purchase of, subscription for, or investment in, the Bonds, the Preference Shares and/or the Ordinary Shares or the exercise of any rights conferred by the Bonds, the Preference Shares and/or the Ordinary Shares.



The Guarantor was incorporated in accordance with the Companies Act. Therefore, the Ordinary Shares to be issued on exchange of the Preference Shares issued on conversion of the Bonds will be created under the Companies Act.

Ordinary Shares to be issued on exchange of the Preference Shares issued on conversion of the Bonds will be issued in registered uncertificated form by the Guarantor through the dematerialised securities trading system operated by CRESTCo Limited, known as CREST, unless the holder of

such Bonds elects to hold the Ordinary Shares in certificated registered form or, at the time of issuance, the Ordinary Shares are not a participating security in CREST.

The Guarantor's registrars are Computershare Investor Services PLC, PO Box 1075, The Pavilions, Bridgwater Road, Bristol BS99 3FA, UK.

In these Listing Particulars, capitalised terms which are not otherwise defined shall have the respective meanings given in Part XIX — "Definitions and glossary of technical terms" of these Listing Particulars.

PART I — DESCRIPTION OF THE ENLARGED XSTRATA GROUP

Overview of the Enlarged Xstrata Group's business

The Enlarged Xstrata Group is the fifth largest diversified mining group in the world with top five industry positions in copper, thermal and coking coal, ferrochrome, zinc, nickel and vanadium, a smaller but profitable aluminium business, recycling facilities, additional exposures to gold, lead, silver and platinum group metals and a suite of global technologies, many of which are leading technologies in the industry. The Enlarged Xstrata Group's operations and projects span five continents and 18 countries: Argentina, Australia, Brazil, Canada, Chile, Colombia, the Dominican Republic, Germany, Jamaica, New Caledonia, Norway, Papua New Guinea, Peru, South Africa, Spain, Tanzania, the UK and the USA.

The Enlarged Xstrata Group's business is organised in the following six principal business units:

Copper. The Enlarged Xstrata Group is the world's fourth largest producer of mined copper. The Copper Business incorporates the Former Xstrata Group Copper Business, which has interests in two operating mines, a smelter and a refinery in Australia, one mine in Argentina and one mining and processing operation in the high Andes region of southern Peru, and the Falconbridge Copper Business, which has interests in the Antamina copper and zinc mine in Peru, the Altonorte copper smelter, the Collahuasi copper mine and the Lomas Bayas copper mine and solvent extraction-electrowinning (SX-EW) refinery in Chile, the Kidd copper and zinc mine in Canada as well as smelting, refining and recycling facilities in Canada and in the United States.

Coal. On a managed basis, the Enlarged Xstrata Group is one of the world's largest producers of export thermal coal, one of the largest producers of export semi-soft/PCI coal and the fifth largest producer of export coking coal. It has interests in 33 operating coal mines, 19 of which are located in Australia, 13 in South Africa and one in Colombia.

Nickel. The Enlarged Xstrata Group is the fourth largest producer of refined nickel in the world, and one of the largest recyclers and processors of nickel and cobalt-bearing materials. Its operations include mines and processing facilities in Canada, Norway and the Dominican Republic.

Zinc. The Enlarged Xstrata Group is one of the world's largest producers of zinc. The Zinc Business incorporates the Former Xstrata Group Zinc Business with zinc smelting operations in Spain and Germany, interests in three operating mines and a lead smelter in Australia and a lead refining plant in the United Kingdom, and the Falconbridge Zinc Business with interests in the Antamina copper and zinc mine in Peru, the Brunswick zinc mine and a lead smelter and refinery in New Brunswick and a minority interest in a zinc smelter in Valleyfield, Quebec, Canada.

Aluminum. The Enlarged Xstrata Group's aluminium operations include six plants in the United States that produce alumina, primary aluminium and aluminium foil, as well as a mining operation in St. Ann, Jamaica.

Alloys. The Enlarged Xstrata Group is the world's largest producer of ferrochrome and one of the world's leading producers of primary vanadium, with integrated production facilities in South Africa. It also has a platinum group metal ("PGM") joint venture with Rustenburg Platinum Mines and Kagiso in South Africa.

In addition to its six principal businesses, the Enlarged Xstrata Group also operates Xstrata Technology, a mining and processing technology business with operations in Australia, South Africa, Chile and Canada.

Xstrata previously had a forestry business in Chile, which was sold in January 2005, and a magnesium recycling business in North America, which was sold in April 2003. Falconbridge previously had aftermarket automotive wheel manufacturing and distribution operations, American Racing Equipment, which it sold in July 2005.

The Enlarged Xstrata Group comprises, following completion of the Falconbridge Acquisition in August 2006, the Former Xstrata Group and the Falconbridge Group. The Former Xstrata Group's principal businesses comprise the Coal Business, the Former Xstrata Group Copper Business, the Former Xstrata Group Zinc Business and the Alloys Business. The Falconbridge Group's principal businesses comprise the Nickel Business, the Falconbridge Group Copper Business, the Falcon-

bridge Group Zinc Business and the Aluminum Business. For information in relation to the Former Xstrata Group, see Part XII — "Description of the Former Xstrata Group's business" and, for information in relation to the Falconbridge Group, see Part XIII — "Description of the Falconbridge Group's business".

Strategy

Xstrata's strategy since the Xstrata IPO in 2002 has been to grow and manage a distinct, value-focused, global diversified resources group positioned to compete for and create value, with the single aim of delivering industry-leading returns for Shareholders. Xstrata recognises that this aim can only be achieved through genuine partnerships with employees, customers, Shareholders, local communities and other stakeholders which are based on integrity, co-operation, transparency and mutual value creation.

The strategy leverages the Enlarged Xstrata Group's size and momentum and focuses on:

- commitment, capacity and headroom to grow in moves that are themselves creators of value; and
- constant improvement in the quality of Xstrata's businesses through ongoing efficiency gains, margin improvements, net present value enhancements and cost reductions.

Xstrata's strategy is based on its assessment of key success factors in global mining, being:

- scale and critical mass;
- diversification of commodity, currency and country exposure;
- a wide range of growth options, including via acquisitions and brown-field and green-field expansions; and
- operating excellence.

Certain third parties have indicated to the Guarantor their interest in acquiring parts of the Falconbridge Group. The Guarantor is continuing to evaluate its strategic options, which may or may not include disposals.

History and development of the Guarantor

The Guarantor is the holding company of the Enlarged Xstrata Group.

Xstrata AG, which was the predecessor of Xstrata plc, was established in Switzerland in 1926 to invest in infrastructure and power projects in Latin America. In 1990, Glencore International became a substantial shareholder of Xstrata AG, following which Xstrata AG built a portfolio of businesses operating in the natural resources sector.

On 25 March 2002, Xstrata plc merged with Xstrata AG to become the holding company of the Former Xstrata Group. At the same time, the Former Xstrata Group acquired Enex and Duiker from Glencore International and the shares of Xstrata plc were admitted to the Official List, to trading on the London Stock Exchange's market for listed securities and to listing on the SWX.

In December 2002, the Former Xstrata Group acquired the Nordenham zinc smelter from Metaleurop SA, a company in which Glencore International has a 33% shareholding.

In June 2003, Xstrata acquired, through a wholly-owned subsidiary, MIM Holdings Limited, now known as Xstrata Queensland Limited.

In August and September 2005, the Former Xstrata Group acquired approximately 19.9% of the then outstanding Falconbridge Shares. Following completion of the Falconbridge Acquisition, Xstrata begun a compulsory acquisition process to acquire all outstanding Falconbridge Shares not already owned by Xstrata at the Xstrata Offer price of C$62.50 per Falconbridge Share. Xstrata now beneficially owns approximately 99.9% of the outstanding Falconbridge Shares. Xstrata expects the compulsory acquisition process to conclude in early November 2006, after which Falconbridge will be a wholly-owned indirect subsidiary of Xstrata.

Anticipated annualised cash cost savings from the Falconbridge Acquisition of around US$120 million comprise reductions in certain duplicated head office and administrative functions

and non-Canadian exploration activity, together with a proportional share of the synergies identified by Inco and Falconbridge from the Sudbury nickel businesses. In addition, Xstrata expects to benefit from the incorporation of Falconbridge into the Enlarged Xstrata Group's financial structure and from synergies arising from the optimisation of material flows across Xstrata's enlarged copper and zinc businesses.

In connection with securing approval for the Falconbridge Acquisition under the Investment Canada Act, Xstrata provided the Canadian Minister of Industry with several important commitments in respect of Falconbridge's operations and employees in Canada. These commitments included:

- establishing Xstrata Nickel as a new standalone global nickel business, with its head office in Toronto and with responsibility for all of the Enlarged Xstrata Group's worldwide nickel operations;
- establishing in Toronto a Canadian Division of Xstrata Technology, which is responsible not only for marketing the Falconbridge Group's existing commercial technologies worldwide but also for marketing Xstrata's existing proprietary technologies throughout the Americas. In addition, Xstrata made significant commitments with respect to increased research and development expenditures in Canada over the next three years;
- making substantial commitments with respect to improved capital expenditures in Canada over the next three years, including significant commitments in respect of increased expenditures on exploration, including greenfield exploration, in Canada over the same period;
- committing to a process to identify for consideration by the Nominations Committee an appropriate Canadian candidate to be put forward to Shareholders as a non-executive director of the Guarantor; and
- consistent with Xstrata's established practice of setting aside 1% of its annual pre-tax profits to support communities in which it operates, committing that a set portion of the Enlarged Xstrata Group's social involvement funding will be spent on community and social initiatives in Canada, with a particular focus on supporting Native American communities.

For further information on the impact of the Falconbridge Acquisition on the assets, liabilities and earnings of the Enlarged Xstrata Group, see Part IV of the Circular (pages 389 to 400 inclusive) and Part IV of the Second Circular (pages 59 to 62 inclusive), each of which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars.

In May 2006, the Former Xstrata Group acquired 33⅓% of the Cerrejón thermal coal operation in Colombia. In June 2006, the Former Xstrata Group acquired the Tintaya mine and associated satellite deposits in Peru.

For further information in relation to significant acquisitions and disposals of the Former Xstrata Group since 1 January 2003, see Part XII — "Description of the Former Xstrata Group's business — Acquisitions, disposals and discontinued operations" of these Listing Particulars.

For recent significant developments in respect of the Former Xstrata Group, see Part XII — "Description of the Former Xstrata Group's business — Recent significant developments". For recent significant developments in respect of the Falconbridge Group, see Part XIII — "Description of the Former Falconbridge Group's business — Recent significant developments".

Relationship with Glencore

Overview

Glencore International is a private, 100% employee-owned, diversified natural resources company with worldwide activities in the smelting, refining, mining, processing, purchasing, selling and marketing of metals and minerals, energy products and agricultural products. Glencore operates on a global scale, marketing physical commodities which it produces at its own industrial assets or purchases from third parties to industrial consumers, such as those in the automotive, steel, power generation, oil and food processing industries. Glencore also provides financing, logistics and other services to producers and consumers of commodities. These activities are supported by investments in industrial assets relating to its core commodities. Glencore's headquarters are located in Baar, Switzerland and it has a network of 60 field offices in over 50 countries throughout the world.

In 1990, Glencore International became a substantial shareholder in Xstrata AG (which merged with the Guarantor in 2002 as Xstrata plc became the ultimate holding company of the Former Xstrata Group), following which Xstrata AG built a portfolio of businesses operating in the natural resources sector.

As a result of their participation in a capital management programme entered into by Glencore International, CSFB Equities and CSSEL in connection with the Former Xstrata Group's acquisition of MIM and the MIM Rights Issue (the "Arrangement"), Glencore International, CSFB Equities and CSSEL are, so far as the Guarantor is aware, jointly interested in 254,750,351 Ordinary Shares, representing approximately 36.01% of the current issued ordinary share capital of the Guarantor. Of these 254,750,351 Ordinary Shares, 252,601,000 Ordinary Shares are subject to the Arrangement and of these 252,601,000 Ordinary Shares: (a) Glencore International is entitled to exercise the voting rights attaching to 101,040,400 of them, representing approximately 14.28% of the issued outstanding Ordinary Shares of Xstrata; and (b) CSSEL is entitled to exercise the voting rights attaching to 151,560,600 of them, representing approximately 21.43% of the issued outstanding Ordinary Shares. Glencore International and CSSEL are the largest shareholders of the Guarantor. Under its terms, the Arrangement will terminate on 2 December 2006.

Glencore International has irrevocably undertaken to take up its full entitlements under the Rights Issue. In addition, CSSEL has agreed to transfer to Glencore International its entitlements in respect of 151,560,600 Ordinary Shares under the Rights Issue and Glencore International has also irrevocably undertaken to take up in full such entitlements. CSSEL (in respect of 151,560,600 Ordinary Shares) and Glencore International have agreed to lock-ups which, subject to certain exceptions, will expire six months after the latest time for acceptance and payment in full of entitlements to subscribe for the New Shares. A total of 84,200,333 New Shares are subject to Glencore International's irrevocable undertakings (approximately 35.71% of the maximum number of New Shares to be issued under the Rights Issue). The Takeover Panel has granted a dispensation from any obligation on either Glencore International or CSSEL to make a mandatory offer for Xstrata pursuant to Rule 9 of the City Code, as a result of Glencore International and CSSEL's interest being diluted by exchange rights under the Glencore Exchangeable Bonds being exercised or conversion rights under the 2010 Convertible Bonds, 2017 Convertible Debenture or 2017 Convertible Bonds into Ordinary Shares being exercised, between 2 October 2006 (being the latest practicable date prior to the publication of the Prospectus) and completion of the Rights Issue and subsequently being increased again as a result of Glencore International subscribing for New Shares pursuant to the irrevocable undertakings it has given to Xstrata or pursuant to the Glencore Underwriting Letter. Glencore International's right to acquire shares pursuant to Note 11 on Rule 9.1 of the City Code is not affected by this dispensation nor by these arrangements generally.

Glencore International will be paid an underwriting commission by the Company of US$35.1 million in connection with its undertakings. For further information in relation to Glencore International's Irrevocable Undertaking Agreement and the lock-up arrangements, see paragraph 12(f) of Part XVI — "Additional Information — Material contracts" of these Listing Particulars.

Commercial relationship

General

The Enlarged Xstrata Group believes that it benefits from the various arm's length advisory and marketing arrangements in place with Glencore. The Enlarged Xstrata Group further believes that Glencore benefits from these arrangements with the Enlarged Xstrata Group.

A number of the Enlarged Xstrata Group's operating subsidiaries have entered into long-term agency agreements with Glencore under which Glencore provides marketing services in exchange for agency fees. These fees are negotiated on arm's length terms and range from 3.5% to 5% of the FOB sales revenue. In a number of instances, Glencore acts as collecting agent and also assumes 60% of the non-payment risk of the Chrome Business's ferrochrome trade receivables and 100% of the non-payment risk of the Chrome Business's vanadium trade receivables.

The Former Xstrata Group also acquired a one-third interest in Cerrejón from Glencore in May 2006.

Copper Business

The Former Xstrata Group has entered into sales agreements with Glencore International in respect of the total available export allocation of copper cathode and surplus North Queensland copper concentrate not processed through its Mount Isa copper smelter for an initial three-year period from 1 June 2004 and "evergreen" thereafter unless the agreement is terminated by either party with a minimum 12-month notice period. The sales terms for the copper cathode are the LME price plus a premium that is based on Codelco North Asian CIF Liner Terms less freight discounts by destination. The sales terms for the copper concentrate are based on market prices less agreed metal content deductions, treatment and refining charges. The treatment and refining charges for the benchmark portion (25%) are fixed annually in line with annual benchmark terms. The treatment and refining charges for the spot portion (75%) are negotiated quarterly based on the prevailing spot market terms.

Minera Alumbrera Limited has entered into a contract with Glencore in respect of 20,000 to 40,000 dmt copper concentrate per annum expiring on 31 December 2004, thereafter "evergreen" with a 12-month termination period. The sales terms for the copper concentrate are negotiated annually. Minera Alumbrera Limited also has a fixed term contract for the sale of copper concentrate to Glencore for 40,000 dmt per annum in 2004, 2006 and 2007 as well as 60,000 dmt in 2005, expiring 31 December 2007. The treatment and refining charges are fixed for the term of the contract. Minera Alumbrera Limited on occasions sells concentrate to Glencore at spot terms. Spot sales are at prevailing spot market prices.

All terms for the North Queensland operations and Minera Alumbrera Limited are set at generally accepted international terms.

Approximately 60,000 dmt of Tintaya copper concentrate and 4,000 tonnes of copper cathode has been sold on a spot basis to Glencore during the second half of 2006, at prevailing market prices. No long-term contracts have been entered into between Tintaya and Glencore.

The Falconbridge Copper Business has entered into a long-term deal for the supply of 50,000 dmt copper concentrate per annum from Glencore to the Altonorte smelter. This contract is "evergreen" in nature, with terms renewed annually. Altonorte has also entered into an annual contract with Glencore for the sale of 9,000 tonnes of copper blister.

The Falconbridge Copper Business's smelters in Canada purchased approximately 80,000 dmt of copper concentrate from Glencore in 2006, under various spot contracts. Falconbridge had also entered into a contract for the sale of 4,000 tonnes of copper cathode to Glencore in 2006, with terms reviewed quarterly. It is expected that this contract will be renewed in 2007.

The following table sets out in more detail the contracts between Glencore and the Falconbridge Copper Business during 2004, 2005 and 2006:

Copper Business Entity	Commodity	Quality	Quantity (dmt)	Spot/Annual	Start Date	Headline Terms (TC/RC)
Kidd Smelter	Copper concentrate	Butte	15,000	Spot	First half 2005	US$100/10¢
	Copper concentrate	Butte	5,000	Spot	End 2005/Beginning 2006	US$150/15¢
	Copper concentrate	Gibraltar	8,200	Spot	End 2005/Beginning 2006	US$150/15¢
	Copper concentrate	Gibraltar	13,900	Spot	First quarter 2006	US$142/4.2¢
	Cathodes	Kidd	690	Spot	August 2005	Premium 5.50
Horne Smelter	Copper concentrate	Butte	6,000	Spot	First quarter 2006	US$150/15¢
	Copper concentrate	Gibraltar	9,000	Spot	First quarter 2006	US$150/15¢
	Copper concentrate	Gibraltar	3,800	Spot	First quarter 2006	US$150/15¢
	Copper concentrate	Gibraltar	1,100	Spot	First quarter 2006	US$142/4.2¢
	Copper concentrate	Peak	9,000	Spot	First quarter 2006	US$153/15.3¢
	Copper reverts	Salvador	10,000	Spot	First quarter 2006	US$165/16.5¢
CCR	Cathodes	CCR	1,895	Spot	May/June 2005	Premium 5.00
CCR	Cathodes	CCR	4,135	Annual	January to December 2004	Noranda Quarterly Premium

Coal Business

Xstrata Coal Marketing AG and Xstrata (Schweiz) AG entered into a Market Advisory Agreement with Glencore International on 2 March 2002. Pursuant to this agreement, Glencore International, for a fee of US$0.50 per attributable tonne of coal exported by the Former Xstrata Group from Australia or South Africa, acts as the Enlarged Xstrata Group's market adviser with respect to its export production of coal (other than for Cumnock No. 1 Colliery Pty Limited ("Cumnock") while it is not a wholly-owned subsidiary). Glencore International advises the Enlarged Xstrata Group regarding the placement of its Australian and South African export coal in the world market, the future planning for that placement and market opportunities available for the future sale of export coal. Glencore International also provides the Enlarged Xstrata Group's marketing department with real time market intelligence and access to Glencore International's network of global offices. In providing such services Glencore International has agreed not to act for the greater benefit of itself to the disadvantage of the Enlarged Xstrata Group. For further information, see Part I — "Description of the Enlarged Xstrata Group — Relationship with Glencore — Relationship with controlling shareholder" of these Listing Particulars.

The Market Advisory Agreement remains in full force and effect for a period of 20 years from the date of the agreement, with a review of the fee at the end of each fifth year of its term. The Market Advisory Agreement may be terminated by Xstrata Coal Marketing AG after giving 45 days' notice if any person (together with its affiliates) holds, directly or indirectly, 50% or more of the issued share capital of Glencore International. The Market Advisory Agreement may also be terminated by either party with immediate effect if:

(a) the other party commits a material breach of the agreement and fails to remedy the breach, if capable of remedy, within 30 days of receiving written notice from the other party identifying such breach; or

(b) the other party enters into liquidation or is declared insolvent.

Xstrata (Schweiz) AG has agreed to guarantee the performance by Xstrata Coal Marketing AG of its obligations under the Market Advisory Agreement.

On 5 January 1995, Cumnock entered into a sales and marketing agreement with Glencore International. Pursuant to this agreement Glencore International provides sales and marketing services to Cumnock and Cumnock appoints Glencore International as its agent to market coal. Glencore International is entitled to a commission of US$0.75 per tonne for all coal sold by Cumnock.

The Enlarged Xstrata Group enters into forward commodity price contracts with Glencore International as counter-party. During the six month period ended 30 June 2006, 505,000 tonnes were delivered at an average FOB price of US$55.75 per tonne, compared with 945,000 tonnes at an average FOB price of US$57.80 per tonne during the year ended 31 December 2005 and 930,000 tonnes at an average FOB price of US$43.10 per tonne during the year ended 31 December 2004. At 30 June 2006, 560,000 tonnes were contracted at an average FOB price of US$56.80 per tonne for delivery in 2006, compared with 765,000 tonnes contracted at an average FOB price of US$52.63 per tonne for delivery in 2006 at 31 December 2005 and 720,000 tonnes contracted at an average FOB price of US$59.75 per tonne for delivery in 2005 at 31 December 2004.

During the six months ended 30 June 2006, 236,952 tonnes were borrowed from Glencore and 319,418 tonnes were transferred back to Glencore with 58,104 tonnes owed to Glencore at 30 June 2006 (compared with 140,570 tonnes at 31 December 2005).

In 2006 the Former Xstrata Group entered into a three-year fuel supply agreement with Glencore to supply diesel fuels to coal mines in New South Wales and Queensland. The supply agreement commenced in April 2006 and 16.1 million litres (US$15.0 million) were delivered to June 2006. The supply agreement is on arm's length terms and prices change monthly according to the world market price per barrel (USD/BBL).

The Former Xstrata Group acquired a one-third interest in Cerrejón from Glencore in May 2006. In 2005, Cerrejón entered into a four-year fuel supply agreement with Glencore to supply diesel fuels. Since Xstrata acquired its interest in Cerrejón, Xstrata's share of the fuel purchases totalled 19.3 million litres (US$10.2 million) to June 2006. The supply agreement is on arm's length terms and prices change for each shipment according to the world market price per barrel.

All other coal purchases and sales with Glencore International are on commercial terms.

Nickel Business

The Nickel Business currently has a 60 tonnes per month contract with Glencore under which Glencore markets nickel product out of the Nikkelverk refinery in Norway. There is also an additional contract with Glencore for the treatment of a "white alloy" product that Glencore sources from the Democratic Republic of Congo.

Zinc Business

Asturiana has a service agreement with Glencore (the "Asturiana Service Agreement"), under the terms of which Glencore provides advice and assistance with respect to the acquisition of mining and/or metallurgical interests and advice in connection with Asturiana's hedging policy and improvement of its position in the zinc market. The fees paid by Asturiana under the Asturiana Service Agreement are approximately US$2.0 million per annum.

Asturiana has an "evergreen" agreement with Glencore to purchase 380,000 dmt per annum of zinc concentrate. Treatment charges are negotiated annually.

Asturiana (through its San Juan de Nieva and Nordenham operations) agreed to supply Glencore with 219,500 tonnes of SHG zinc slabs or CGG ingots during 2006 based on market FOB/CPT prices plus the respective premium.

McArthur River has an agreement with Glencore to supply 262,400 wmt per annum of zinc concentrates in 2006 until the end of 2009 after which it becomes "evergreen". Treatment charges are negotiated annually.

Mount Isa has two agreements with Glencore for the supply of zinc concentrate. The first agreement is to supply 90,000 wmt. The second agreement is to supply 80,000 wmt to 100,000 wmt for the

purpose of swapping Mount Isa concentrate in exchange for the same volume to be delivered to the Guarantor's European smelters at equivalent terms. Treatment charges are negotiated annually. The Guarantor and Glencore have agreed to extend these agreements to the end of 2008 after which they will become "evergreen" in nature.

The Falconbridge Zinc Business has a current contract to sell to Glencore in 2006 12,000 tonnes of zinc metal (shipped at 1,000 tonnes per month) from Kidd Creek and Canadian Electrolytic Zinc ("CEZ") operations in Canada. In April 2006, the Falconbridge Zinc Business purchased 25,000 tonnes of zinc concentrate at CEZ from Glencore. In addition, Glencore purchased under contracts shipped in April and June of 2006 a total of 43,000 tonnes of zinc concentrate from Brunswick Zinc. Two 2006 annual contracts are also in place with Glencore to purchase 6,000 tonnes and 5,000 tonnes of zinc metal.

Aluminum Business

The Aluminum Business currently has two purchase agreements for the supply of primary aluminium for remelt at its Huntingdon and Salisbury rolling mills and expects to purchase approximately 130 million pounds of primary aluminium for the year ending 31 December 2006 at the market price prevailing during the month of shipment. In the year ended 31 December 2005, the Aluminum Business purchased from Glencore approximately 112 million pounds of aluminium with a total spend of approximately US$110 million and approximately 7,500 tonnes of alumina with a total spend of approximately US$3 million and it sold to Glencore approximately 15 million pounds of aluminium with a total sales value of approximately US$14 million.

Alloys Business

Chrome operations

Xstrata South Africa entered into a ferrochrome marketing agreement with Glencore International on 21 April 1995, appointing Glencore International as its exclusive world-wide marketing agent for the sale of Xstrata South Africa's entire production of ferrochrome other than ferrochrome sold into the US, Canada and certain Asian countries. The agreement continues for as long as Xstrata South Africa produces ferrochrome. Glencore International is obliged to use its best endeavours to arrange sales at prevailing market rates subject to initial agreement and approval by Xstrata South Africa prior to effecting the sale. Glencore International assists Xstrata in negotiating sales contracts with third parties. Glencore International is entitled to receive an agency fee of 3.5% on FOB sales revenues and an additional fee of 0.75% on FOB sales revenues for assuming the risk of non-payment by customers on this material. Glencore International assumes 60% of the risk of non-payment by customers in relation to ferrochrome sales.

This ferrochrome marketing agreement was updated in 2005 with effect from 1 July 2004, to provide that, in addition, Glencore International is appointed and is responsible for the marketing of all ferrochrome produced by Merafe as a result of Merafe's participation in the Pooling and Sharing Venture (PSV) between Merafe and Xstrata South Africa, on terms and conditions that are no less favourable than those terms and conditions in the ferrochrome marketing agreement between Xstrata South Africa and Glencore International.

If, at any time, Xstrata South Africa notifies Glencore International that it is able to find purchasers for its production at prices higher than those generally obtainable by Glencore International, Xstrata South Africa may, unless Glencore International is able to obtain similar prices, sell its products in the market. Glencore International is nevertheless entitled to an agency fee of 3.5% of FOB sales revenue in respect of such sales. Glencore International is also entitled to receive a US$50,000 monthly fee in connection with market analysis and administration tasks it performs.

Ferrochrome sold into the US and Canada is distributed by Glencore Limited and Glencore Canada Inc., respectively, under two distribution agreements. These agreements continue indefinitely, with both parties having the right to terminate the agreement at 12 months' notice. The percentage of distribution fees payable by the Enlarged Xstrata Group in respect of ferrochrome sold under the distribution agreement is substantially the same as the commission paid in respect of ferrochrome sold under the marketing agreement.

Mitsui & Co. Limited ("Mitsui & Co.") is the appointed distribution agent for ferrochrome sales into territories of China, Japan and South Korea up to a maximum of 105,000 tonnes per annum. A

change in distributing agent for sales into these countries must be done with the consent of Glencore International. Mitsui & Co. is entitled to receive 2.5% sales commission on sales revenue FOB value for tonnages above 30,000 and up to 75,000 and 3.5% of the sales revenue FOB value for tonnages exceeding 75,000 but not exceeding 105,000 per annum. The continuation of the distribution agreement with Mitsui & Co. is subject to the operating agreement between Xstrata South Africa and Mitsui Minerals Development South Africa ("MMDSA") in relation to the Xstrata Lydenburg plant. MMDSA owns a 12.5% undivided share in the fixed assets of Xstrata Lydenburg plant of which Xstrata South Africa is appointed as independent contractor. This ownership entitles MMDSA to 12.5% of the rated capacity (capped at 240,000 tonnes) ferrochrome produced at an amount equal to FOB cost per tonne plus 3.5% of the FOB export price for the products taken. Upon termination of the operating agreement, the distribution agreement will also terminate and Xstrata South Africa will be obliged to purchase the 12.5% undivided share from MMDSA at the prevailing market price.

Vanadium operations

The Enlarged Xstrata Group's wholly-owned marketing agent, Xstrata Marketing Corporation A.V.V. entered into a marketing agreement with Glencore International expiring on 31 December 2017, in respect of the Enlarged Xstrata Group's entire production of vanadium other than vanadium sold into the US or Canada. In January 2005, the previous 20-year marketing agreement was superseded and replaced by a substantially similar marketing agreement consolidating the marketing arrangements between Glencore and the Former Xstrata Group's contracting entities at prevailing market rates subject to initial agreement and approval by Xstrata South Africa prior to effecting the sale.

Under the agreement, Glencore International is obliged to use its best endeavours to arrange sales for the Enlarged Xstrata Group of vanadium pentoxide and ferrovanadium to customers. Xstrata South Africa is obliged to pay to Glencore International an agency fee of 3.5% on FOB sales revenues and an additional fee of 1.5% on FOB sales revenues for assuming the risk of non-payment by customers in relation to vanadium sales.

If, at any time, Xstrata South Africa notifies Glencore International that it is able to find purchasers for its production at prices higher than those generally obtainable by Glencore International, Xstrata South Africa may, unless Glencore International is able to obtain similar prices, sell its products in the market. Glencore International is nevertheless entitled to the 3.5% agency fees described above in respect of such sales.

Vanadium pentoxide and ferrovanadium sold into the United States or Canada is distributed by Glencore Limited and Glencore Canada Inc., respectively, under two distribution agreements. The distribution agreements have the same term as the marketing agreement. The percentage of distribution fees payable by the Enlarged Xstrata Group in respect of vanadium pentoxide and ferrovanadium is substantially the same as the commission paid in respect of vanadium pentoxide and ferrovanadium sold under the marketing agreement.

Relationship with controlling shareholder

On 20 March 2002, Glencore International and the Guarantor entered into an agreement (the "Relationship Agreement") which regulates the ongoing relationship between them. The principal purpose of the Relationship Agreement is to ensure that Xstrata is capable of carrying on the Enlarged Xstrata Group's Business independently of Glencore and that transactions and relationships between Glencore and the Enlarged Xstrata Group are at arm's length and on normal commercial terms. The Relationship Agreement will continue for so long as the Ordinary Shares are listed on the Official List and traded on the London Stock Exchange and Glencore International is the Guarantor's controlling shareholder (as such term is defined in the Relationship Agreement). Currently, a controlling shareholder is a person who holds either 30% or more of the votes exercisable at general meetings of the Guarantor or has the right to control the appointment of the majority of the Directors. As is noted above, as a result of entering into the Arrangement, Glencore International currently holds only 14% of the votes exercisable at general meetings of the Guarantor and it does not have the right to control the appointment of the majority of the Directors. Notwithstanding that it is no longer a controlling shareholder of the Guarantor under the terms of the Relationship Agreement, Glencore International has agreed that the Relationship Agreement will, nevertheless, continue in full force and effect.

Under the Relationship Agreement:

- the Guarantor and Glencore International agree that transactions and relationships between the Enlarged Xstrata Group and Glencore will be conducted at arm's length and on a normal commercial basis;
- the Guarantor and Glencore International agree to ensure that the Guarantor is capable, at all times, of carrying on its business independently of any member of Glencore;
- Glencore International is only permitted to nominate a maximum of three directors of the Guarantor or (if lower or higher) such number of directors of the Guarantor nominated by Glencore International as is equal to one less than the number of independent directors. Glencore International previously nominated three directors to the board of directors of the Guarantor. However, following Mr. David Issroff's resignation from the Board with effect from 10 May 2006, Glencore International currently only has two nominees on the Board, being Messrs. Strothotte and Glasenberg;
- directors of the Guarantor nominated by Glencore International shall not be permitted, unless the independent directors agree otherwise, to vote on any resolutions of the Guarantor's board of directors to approve any aspect of the Enlarged Xstrata Group's involvement in or enforcement of any arrangements, agreements or transactions with any member of Glencore; and
- Glencore International undertakes to procure that Glencore shall not exercise its voting rights to procure amendment to the constitutional documents of the Guarantor which would be inconsistent with, or undermine, the Relationship Agreement.

The Enlarged Xstrata Group believes that the terms of the Relationship Agreement as described above enable the Enlarged Xstrata Group to carry on its business independently from Glencore.

Technology

Xstrata Technology is a minerals and processing technology business with operations in Australia, South Africa, Chile and Canada.

The Enlarged Xstrata Group participates in a number of focused explorations research projects designed to reduce the cost of mineral exploration and increase the likelihood of success. Projects include the areas of geophysics, geology, geochemistry and remote sensing. The Enlarged Xstrata Group is also involved in the development, acquisition and application of technologies to improve the performance of its mining and metallurgical businesses and create opportunities for business growth.

Xstrata Technology develops and sells technology to third parties through licensing agreements. The following table sets out a description of the current technologies of the Former Xstrata Group:

Technology	Description
ISASMELT	ISASMELT is a smelting process that has applications for primary and secondary copper and lead smelting, converting, copper/nickel smelting, and treatment of scraps and residues. The technology is installed at smelting facilities in Australia, the US, Belgium, Germany, the United Kingdom, India, Malaysia, China and Peru.
ISAPROCESS	ISAPROCESS is a permanent cathode technology for the copper refining industry. This technology utilises re-usable stainless steel cathode plates with precise cathode alignment, automation in electrode handling, and associated cathode stripping equipment. Benefits of the ISAPROCESS include copper cathode purity, operating intensity, increased labour productivity, improved safety and lower operating costs. The ISAPROCESS is installed at over 50 plants worldwide accounting for over 30% of global refined copper production.
IsaMill	IsaMill is a revolutionary grinding technology initially developed for ultra-fine grinding of ore bodies at Mount Isa and McArthur River. It has since been adopted for conventional coarser grinding where it can significantly increase processing efficiency. It is rapidly being adopted with over 40MW of installed capacity anticipated by the end of the first quarter of 2007 in Australia, South Africa and the US.
Jameson Cell	The Jameson Cell is a flotation cell that generates an intense flotation recovery process. Over 250 Jameson Cells have been installed at a number of copper, lead, zinc, coal and solvent extraction/electrowinning (SX-EW) facilities.
Albion Process	The Albion Process is a patented process that includes a combination of ultra-fine grinding using IsaMill technology followed by atmospheric leaching for subsequent metal recovery, for example by electrowinning or precipitation. This technology is being considered for installation at two of the Former Xstrata Group's mine sites after pilot testing on copper and zinc concentrates has been completed, and has been licenced to an operation that will recover refractory gold from tailing dams.

In the Falconbridge Acquisition, Xstrata also acquired the rights to the Kidd Process, another leading stainless steel copper refining technology, which is used to produce approximately 3.7 Mt of refined copper worldwide. Xstrata Technology now markets the Kidd Process in addition to the ISAPROCESS, which has further strengthened its position as a supplier of copper refining technology.

The Enlarged Xstrata Group also has metallurgical technology facilities at the Falconbridge Technology Centre in Sudbury and the Nikkelverk refinery. Research is conducted at these facilities to provide mineral analyses, to develop new methods for treating ores and custom feeds, to improve nickel, copper and cobalt products and to develop environmentally sustainable production technologies.

The primary focus at the Technology Centre in Sudbury is on developing new technologies for the Enlarged Xstrata Group in hydrometallurgy and pyrometallurgy for nickel laterites and nickel and copper sulphides. The majority of the technical support is provided to the Nickel Business. Other Enlarged Xstrata Group businesses receive support on an as-needed basis.

Pilot plant facilities for metallurgical testing are located at Sudbury, the Nikkelverk refinery, Brisbane Hydrometallurgical laboratories, Townsville Copper Refinery, Kidd Creek Metallurgical site and at Lomas Bayas. In 2005 several industrial scale metallurgical tests were also conducted including testing at the Sudbury smelter, at Kidd Creek in Timmins and at CCR in Montreal.

Expenditures by the Falconbridge Group on research and process development for the two years ended 31 December 2004 and 2005 were US$22 million and US$29 million, respectively.

Operational hazards and insurance

The Enlarged Xstrata Group's operations are subject to numerous operating risks which include geological conditions such as unexpected geological features, unexpected seismic activity, climatic conditions such as flooding or drought, interruptions to power supplies, environmental hazards, technical failures, fires, explosions and other accidents at a mine, processing plant, cargo terminal or related facilities. These risks and hazards could also result in damage to, or destruction of, properties or production facilities, personal injury, environmental damage, business interruption and possible legal liability.

The Enlarged Xstrata Group maintains insurance through a number of international insurers prepared to provide cost effective insurance cover to the metals and mining industry. The insurances are arranged via international brokers who provide an assurance that the types of insurance are customary for the mining and metal industry and limits and coverages are appropriate for the Enlarged Xstrata Group. The Falconbridge Group placed part of its property and business interruption insurance directly with an international insurer.

For substantially all of the Enlarged Xstrata Group's operations, the Enlarged Xstrata Group maintains:

- property and business interruption insurance, which protects against losses relating to the Enlarged Xstrata Group's assets;
- public and products liability insurance, which protects against claims by third parties for bodily injury or damage to property; and
- freight insurance which protects against losses relating to the transport of the Enlarged Xstrata Group's equipment, product inventory and concentrates.

The Enlarged Xstrata Group's insurance does not cover every potential risk associated with its operations. In particular, meaningful coverage at reasonable rates is not obtainable by the Enlarged Xstrata Group or other companies within the industry for certain types of environmental hazards, such as gradual pollution or other hazards as a result of the disposal of waste products. The occurrence of a significant adverse event, the risks of which are not fully covered by insurance, could have a material adverse effect on the Enlarged Xstrata Group's financial condition or results of operations. Moreover, no assurance can be given that the Enlarged Xstrata Group will be able to maintain adequate insurance in the future at rates it considers reasonable.

Regulatory and environmental matters

The mining, mineral processing and other operations of the Enlarged Xstrata Group are subject to extensive government regulations relating to the protection of the environment, including those relating to air and water quality, solid and hazardous waste handling and disposal, mine reclamation and closure and occupational health and safety. In addition to mandated environmental safeguards, the Enlarged Xstrata Group has many initiatives to improve both the internal and external environment, such as health research, auditing and risk management programmes. These aspects are aligned with and support the Enlarged Xstrata Group's commitments to sustainable development, where economic prosperity, environmental quality and social equity drive business activities. The Enlarged Xstrata Group believes that sustainable development is the implementation of practices and policies that contribute to the well-being of the environment, economy and society to address the needs of customers, suppliers, shareholders, employees, government, the general public, the communities in which it operates and other stakeholders without compromising the ability of future generations to meet their own needs.

The Enlarged Xstrata Group has in place a comprehensive environmental management system consisting of a sustainable development policy, guidelines, standards, procedures, audit frameworks, job descriptions and procedures, roles and responsibilities, employee and contractor training, public and employee reporting, emergency prevention and response, risk management and community awareness.

In common with other diversified natural resources and mineral processing companies, the Enlarged Xstrata Group's operations generate hazardous and non-hazardous waste, effluent and emissions into the atmosphere. There are many national (including certain provisions of the South African Constitution), regional and local environmental laws, regulations and policies which apply to the

Enlarged Xstrata Group's operations, the scope of which varies according to the jurisdiction concerned. Examples include those relating to waste and waste water treatment, disposal of waste, air emissions or discharges. If any of the Enlarged Xstrata Group's operations fail to comply with the relevant laws and regulations, the relevant authorities could require additional equipment to be installed at substantial cost or that the whole or part of the operation be closed down or scaled back. In addition, if a member of the Enlarged Xstrata Group is found to have committed a breach of the relevant law or regulation, it may be liable to pay a fine to the relevant authority or, in some cases, compensation to individuals affected by the breach; alternatively, directors of Enlarged Xstrata Group members may be held liable for any breach.

In some jurisdictions, members of the public can initiate proceedings to enforce compliance with permits and applicable environmental, health and safety laws and regulations. Proceedings commenced by members of the public have not to date had a material adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group, although no assurance can be given that these types of actions will not occur in the future and have a material adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group.

The Mount Isa operations in Queensland are subject to specific legislation of the Queensland State Parliament, the Mount Isa Mines Limited Agreement Act 1985. The Mount Isa Mines Limited Agreement Act 1985 exempts the Mount Isa operations from strict compliance with the otherwise applicable Environmental Protection Act 1994 with respect to air emissions. The State environmental regulator has informed Xstrata of its desire to assume the regulation of special state legislation, including the Mount Isa Mines Limited Agreement Act 1985. In the event that happens and a subsequent amendment is sought and made to bring air emissions permitted under the Mount Isa Mines Limited Agreement Act 1985 into line with the Environmental Protection Act 1994, or alternatively the Mines Limited Agreement Act 1985 is repealed, then significant cost consequences, relating to investing in new environmental technologies and practices, could be required to maintain current production levels.

Each of the Enlarged Xstrata Group's businesses are subject to various laws and regulations relating to their ability to carry out operations, as well as environmental and health and safety issues. The requirements of these laws vary from operation to operation, and are also dependent on the jurisdiction in which they operate. The Enlarged Xstrata Group's objective is to meet or surpass environmental standards set by relevant legislation, through the application of innovative and technically-proven economic measures in advance of prescribed deadlines. In addition, the Enlarged Xstrata Group incurs substantial waste removal and site restoration costs on an ongoing basis, which it believes will minimise future liabilities for site closure. The board of directors of the Guarantor, as a matter of policy, requires each of the Enlarged Xstrata Group's businesses and operations, as a minimum, to comply with all relevant laws and regulations in the jurisdiction in which it operates. Compliance with relevant environmental laws is the responsibility of respective managers at the operating companies who are directly responsible to the Enlarged Xstrata Group's senior management. All Falconbridge Group operations are guided by a Sustainable Development Policy and Management System Environment, Health and Safety (EHS) Operating Manual that assists corporate, site, project managers and EHS professionals to implement the elements of the Falconbridge Limited Sustainable Development Policy. All Falconbridge Group operations are also guided by the Falconbridge Code of Ethics which sets a high standard of ethical behaviour throughout the Falconbridge Group. The code requires that decision-making include due consideration for human rights, the provision of a living wage to all workers worldwide, a diverse workforce that encourages upward mobility, respect for indigenous rights, environmental improvement, transparency in the Falconbridge Group's conduct and a commitment to sustainable communities. A procedure exists for employees to confidentially report issues of non-compliance to designated individuals or through the Falconbridge Group's Ethics Hotline. The Guarantor believes that each of the Enlarged Xstrata Group's businesses and operations are substantially in compliance with all material applicable environmental laws and regulations.

In most jurisdictions, businesses are required to rehabilitate site operations which have been closed down. In South Africa, for example, section 43 of the MPRDA imposes liability on the mining operator for some time after the relevant mining operations have ceased. Accordingly, the Enlarged Xstrata Group, to the extent it has not already done so, will have to make provision for the costs involved in closure and other rehabilitation of any of its site operations in the future. This may involve substantial costs. In the event that pollution of the environment surrounding or adjacent to any of the

Enlarged Xstrata Group's operations occurs, or has already occurred, the Enlarged Xstrata Group may be required to remediate pollution and incur substantial costs. In particular, the Enlarged Xstrata Group's operations are generally required either to lodge security bonds or make ongoing cash contributions for the purpose of rehabilitation at the end of a mine's life. The Enlarged Xstrata Group has an established environmental audit programme at each of its mines and will continue to review its compliance with environmental requirements, including its rehabilitation requirements. The Enlarged Xstrata Group will comply with the provisions of the South African MPRDA to ensure that it will continue to be able to operate within the legislative regime introduced by the MPRDA and the Enlarged Xstrata Group complies with similar obligations in other jurisdictions in which it has operations.

In the UK, any cessation of operations requires the decommissioning of plants and rehabilitation of the environment in order to surrender various environmental permits. The standard and extent of remediation required will vary according to the approach of the regulator and it is not possible to accurately estimate such closure and rehabilitation costs in advance. As environmental regulation becomes more stringent, there can be no assurances that future costs of closure and rehabilitation will not be materially higher than currently anticipated.

The Enlarged Xstrata Group's operations are members of various forums which aim to develop, through the use of best available technologies, water management practices to ensure that the water used by the Enlarged Xstrata Group's operation will, when re-introduced into the water system, meet end user requirements and legal requirements.

The Enlarged Xstrata Group's operations require various environmental permits covering, amongst other things, water use and discharges, stream diversions and solid waste disposal. The Enlarged Xstrata Group has applied for the necessary permits and in doing so has complied with all the requisite statutory obligations required to make application for the permits. Not all permits have, however, been issued due to administrative delay. The Guarantor does not anticipate that any environmental issues or liabilities in connection with environmental permits will be material to the Enlarged Xstrata Group's operations. Further information on the licensing and permits of the Enlarged Xstrata Group's businesses can be found in this Part XII — "Description of the Enlarged Xstrata Group's business — Statutory authorisations, licences and concessions" below.

New legislation or regulations may come into force in the future that may materially adversely affect the Enlarged Xstrata Group's mining operations, its cost structure or its customers' ability to use the Enlarged Xstrata Group's products, particularly coal. New legislation or regulations, or different or more stringent interpretation or enforcement of existing laws and regulations, may also require the Enlarged Xstrata Group or its customers to change operations significantly or incur increased costs. It is possible that environmental laws and regulations in certain countries in which the Former Xstrata Group operates will, in the future, become more stringent with the result that the amount and timing of future expenditure required to enable the Enlarged Xstrata Group to remain in compliance with such laws and regulations could increase substantially from their current levels. In particular, there is a clear and continuing trend in Europe for increasingly stringent environmental measures to be enacted at European Union level which require stringent environmental measures to be enacted at EU member state level and which may have a significant operating and financial impact on the Enlarged Xstrata Group.

In December 1997, in Kyoto, Japan, the signatories to the United Nations Convention on Climate Change established individual, legally binding targets to limit or reduce greenhouse gas emissions by developed nations. This international agreement, known as the Kyoto Protocol, came into force on 16 February 2005. As of 30 August 2006, 164 states and regional economic integration organisations (such as the EU) had deposited instruments of ratifications, accessions, approvals or acceptances in respect of the Protocol.

Those jurisdictions in which the Enlarged Xstrata Group has operations can be split, with regard to the laws, regulations and policies aimed at limiting or reducing greenhouse gas emissions, into four categories. The first is those jurisdictions within the EU (such as Belgium, Germany, Spain and the UK) that are subject to the EU emissions trading scheme (the "EU ETS"). The EU ETS currently focuses on carbon dioxide emissions from certain energy intensive industries (such as power generation and the production and processing of ferrous metals) until 2007 when the scheme will be expanded to cover other greenhouse gases, such as methane, and other industries, such as the chemical and aluminium production industries. The second category comprises non-EU jurisdictions

that have ratified the Kyoto Protocol and that have in place, or will shortly have in place, a formalised system of greenhouse gas emission allowances trading and emission levels regulation (such as Canada and Norway). The third category consists of those jurisdictions that have not ratified the Kyoto Protocol and that presently have no jurisdiction-wide system for emission allowances trading (such as Australia). The final category is those jurisdictions that have ratified the Kyoto Protocol but have no obligations under it to reduce greenhouse gas emissions (the so called non-Annex 1 countries such as South Africa, Chile, Argentina, Peru, Colombia and the Dominican Republic).

Both Canada and Norway have ratified the Kyoto Protocol and are committed to meeting their obligations thereunder in respect of greenhouse gas emission levels. Canada, which is the jurisdiction of incorporation of Falconbridge, ratified the Kyoto Protocol in late 2002. Various levels of government in Canada are developing a number of policy measures in order to meet Canada's emission reduction obligations under the Kyoto Protocol. The federal Canadian government has undertaken extensive industry consultations with a view to structuring a domestic emissions trading system and has proposed a regulatory framework for greenhouse gas emissions regulation and trading. From 1 January 2005, an emissions trading system has been introduced in Norway for the period 2005 to 2007 (and covering in the region of 10% to 15% of Norway's greenhouse gas emissions). The Norwegian system is very similar in structure and in form to the EU ETS.

The Enlarged Xstrata Group has operations in various developing world jurisdictions, such as South Africa, Chile, Argentina, Peru, Colombia and the Dominican Republic, that are non-Annex 1 countries. Despite having no obligations under the Kyoto Protocol in respect of their levels of greenhouse gas emissions, these countries may host Clean Development Mechanism ("CDM") projects that allow Annex 1 country companies, whether operators of an emissions constrained installation or not, to procure additional emission rights.

In July 2005, Australia, China, India, Japan, South Korea and the US formed the Asia-Pacific Partnership on Clean Development and Climate. Members of the partnership intend to cooperate on the development and transfer of technology that enables the reduction of greenhouse gas emissions. It is uncertain what, if any, impact this partnership will have on the Enlarged Xstrata Group as its implementation plans are being developed.

See the risk factor in Part IV — "Risk Factors — Industry risks relating to the Enlarged Xstrata Group — Risks related to climate change legislation" of these Listing Particulars for a discussion of certain potential impacts on the Enlarged Xstrata Group relating to the Kyoto Protocol.

The Enlarged Xstrata Group has a number of mining tenements, licences and concessions with various terms (including durations) under which the Enlarged Xstrata Group carries out mining and natural resources activities. Except to the extent described in respect of the Rhovan vanadium operations in Part XII — "Description of the Former Xstrata Group's business — Alloys Business summary — Vanadium operations — Description of vanadium operations — Mineral right applications and conversions" of these Listing Particulars, licences are in place in respect of all reserves which the Enlarged Xstrata Group is currently exploiting.

Members of the Enlarged Xstrata Group may from time to time breach the terms of their mining tenements, licences and concessions. The Guarantor does not however believe that any such breaches of which it is aware would have a material adverse effect on the Enlarged Xstrata Group.

South African Mineral and Petroleum Resources Development Act and Empowerment Charter and Royalty Bill

On 3 October 2002, the President of South Africa assented to and signed into law the MPRDA, which came into operation on 1 May 2004. On 13 August 2004, the Empowerment Charter was promulgated, together with the "scorecard" for measuring black empowerment in the mining industry, which is intended to monitor and assess compliance with the Empowerment Charter. In addition to this the government of South Africa, in conjunction with the industry, is developing further legislation and guidelines, including the Mineral and Petroleum Royalty Bill (the "Royalty Bill") pertaining to royalties. A draft of the Royalty Bill, dated 10 March 2003, was released for public comment on 20 March 2003. This version of the Royalty Bill has been withdrawn for revision and a new draft is expected in the near future.

A key outcome of the MPRDA is that the South African state becomes the custodian of all the rights to minerals and that prospecting and mining require prospecting and mining rights respectively

which can only be granted by the state once certain criteria are met, including black empowerment criteria for HDSAs. Existing prospecting and mining authorisations and the underlying mineral rights need to be converted to new order rights and, to do so, the above criteria need to be satisfied or undertakings given.

A key objective of the above legislation is to ensure that 26% of the mining industry is controlled by HDSAs within ten years from 1 May 2004. In addition, mining companies need to achieve certain goals aimed at the advancement of HDSAs both in the workplace and the communities in which they operate.

The transitional provisions of the MPRDA facilitate the conversion of prospecting and mining rights currently held at common law and under the Minerals Act (termed, "old order rights" in the MPRDA) to the new forms of prospecting and mining rights contemplated by the MPRDA ("new order rights").

The conversion applicants will have a maximum of two years in the case of prospecting and five years in the case of mining to lodge their rights for conversion. For successful conversion, applicants will be required to be in possession of a valid prospecting permit or mining authorisation and to have been physically prospecting or mining (as the case may be) on the area to which their application relates as at the promulgation date.

This legislation impacts the Enlarged Xstrata Group's resource holdings and consequently its development programmes.

The Enlarged Xstrata Group has developed and is implementing a strategy to address the tenure risks associated with the legislation and believes that the transformation of the business to align itself with the intent of the MPRDA and associated legislation will be done on a commercial basis in accordance with the legislation.

Native title and land claims

Land in Australia, South Africa and Canada owned or used by the Enlarged Xstrata Group may be the subject of land claims.

In Australia, the Native Title Act recognises native title and established processes relating to mining and exploration rights. Native title represents the traditional rights and interests that the Aboriginal people have in relation to land. Once extinguished it cannot be revived although compensation is payable, generally by the Commonwealth government. Claims are decided on a factual basis and determined ultimately by the Federal Court of Australia. Where existing mining leases are held, those rights are not affected if a native title claim is lodged. If native title has been extinguished, future mining leases can be granted without reference to native title. If it has not been extinguished, the Native Title Act provides procedural rights for registered native title claimants, including the 'right to negotiate' with respect to the grant of mining rights, which includes exploration titles and the compulsory acquisition of land. While the right to negotiate does not include a veto on the grant of a title, it may require financial payments to be made. Native title claims have been made over areas where the Enlarged Xstrata Group has mining operations. The Guarantor believes, however, that such claims will not have a material impact on the Enlarged Xstrata Group's existing operations.

In South Africa, the government's Restitution of Land Rights Act 1994 provides remedies for persons who have been dispossessed of rights in land as a result of past racially discriminatory laws or practices. Claims under the Restitution of Land Rights Act had to be lodged by 31 December 1998. The Land Claims Court is empowered to make orders concerning the restoration of a right in land or any portion of land, compelling the payment of compensation, compelling the State to include a claimant as a beneficiary in the State support programme for housing or granting the claimant an appropriate right in alternatively designated State land or with any alternative and appropriate relief. The Enlarged Xstrata Group has received unofficial reports that approximately 350 land claims have been lodged in relation to the surface rights of the Enlarged Xstrata Group's various South African properties. The Guarantor has very limited information about these land claims and can give no assurance that they, or any other land claims of which it is not aware, will not have an adverse effect on the Enlarged Xstrata Group's rights to the properties that are subject to the land claims.

The emphasis of the restitution of land rights process in South Africa is to provide an appropriate remedy to claimants in terms of a statutory process. The landowner is not required to provide the land seeker with a remedy. Existing legislation regulating the land restitution process in South Africa places this burden on the State. It is therefore unlikely that the Enlarged Xstrata Group members will be the party that will be required to address the remedies sought by land seekers unless the state expropriates a landowner's land, in terms of the appropriate expropriation legislation, in order to comply with a decision by a competent authority or court to restore land to a claimant.

In Canada, the Enlarged Xstrata Group's properties may, in the future, be the subject of Native Americans' land claims which are generally addressed by the courts in Canada. The legal basis of such a land claim is a matter of considerable legal complexity and the impact of the assertion of a land claim, or the possible effect of a settlement of such claim upon the property interest in question, cannot be predicted with any degree of certainty at this time. In addition, no assurance can be given that any recognition of Native American rights whether by way of a negotiated settlement or by judicial pronouncement (or through the grant of an injunction prohibiting mining activity pending resolution of any such claim) would not delay or even prevent the Enlarged Xstrata Group's resource development or mining activities in Canada.

Health and safety

The Enlarged Xstrata Group's health and safety standards are reviewed by the Enlarged Xstrata Group on an ongoing basis. In addition, the Enlarged Xstrata Group's operations are subject to government authority inspections throughout the year, as well as health and safety audits at most operations. These inspections and audits have not resulted in any requirement for any significant capital expenditures by the Enlarged Xstrata Group. However, certain of the Enlarged Xstrata Group's activities are inherently dangerous and the authorities responsible for administering health and safety standards have considerable inspection, injunction and penalty powers that, if exercised against the Enlarged Xstrata Group, could have an adverse impact on the Enlarged Xstrata Group's financial condition or results of operations.

The Guarantor recognises that the health and safety of the Enlarged Xstrata Group's employees, contractors and other key stakeholders and the maintenance of high environmental performance standards are significant responsibilities involved in the conduct of its operations. The Enlarged Xstrata Group's aim is to be recognised as a leader in health, safety and environmental management.

There is a serious problem with HIV/AIDS infections in South Africa generally. Certain of the Enlarged Xstrata Group's operations are addressing HIV/AIDS in the workforce at their operations in South Africa through awareness and employee wellness training programmes both for new employees and on an ongoing basis for all employees. The World Health Organisation has estimated that approximately 20% of the South African population is living with HIV/AIDS.

The Enlarged Xstrata Group participates in a regional initiative known as the Power Belt AIDS Project, a mining community-based programme which targets AIDS awareness and safe sex practices through the provision of information to schools and clinics and the use of peer trainers in the community. The project is managed by the Council for Scientific and Industrial Research and is funded by affiliated businesses, government and international organisations.

The Guarantor believes that these intervention and health programmes, the Enlarged Xstrata Group's contingency plans (which involve teaching multiple skills to the workforce and improving training and recruiting capacities) and the large number of unemployed skilled persons available in the region could mitigate the financial impact on the Enlarged Xstrata Group's South African operations of the HIV/AIDS crisis in South Africa.

Labour and employee relations

For the year ended 31 December 2005, the average monthly number of Former Xstrata Group employees and contractors of the Former Xstrata Group was approximately 24,000 in aggregate. The majority of the Former Xstrata Group's employees are unionised.

At 31 December 2005, the Falconbridge Group had approximately 14,500 employees in 18 countries. The majority of the Falconbridge Group's employees are unionised and engaged pursuant to collective employment agreements.

Despite certain operations within the Enlarged Xstrata Group experiencing work stoppages and other forms of industrial action in recent years, such work stoppages and industrial action have not had any material effect on the operating results of the Enlarged Xstrata Group. Xstrata believes that all of the Enlarged Xstrata Group's operations have, in general, good relations with their employees and unions.

The Enlarged Xstrata Group is a party to various defined contribution and defined benefit retirement plans covering a majority of employees worldwide.

Metals marketing

The Enlarged Xstrata Group's marketing and sales strategy is to sell its production at prices that are equal to or greater than the average cash price reported on the LME or other relevant terminal markets. Premiums above the LME settlement price are negotiated based on product form and quality, packaging, delivery terms, supply commitments, delivery location and availability of product. For any intermediate zinc and lead products or by-products sold by the Zinc Business (such as copper cake and copper matte) discounts are negotiated periodically from LME prices which largely reflect inherent third party processing charges. For products for which there is no terminal market, the Enlarged Xstrata Group's objective is to obtain prices that equal or exceed benchmarks that reflect the average price realised in the marketplace.

The Enlarged Xstrata Group procures custom feed materials for processing in the metallurgical facilities. In order to minimise metal price risk exposure on purchased metals and fluctuations in inventory levels, and to obtain the average COMEX/LME prices or better, the Enlarged Xstrata Group employs the use of derivatives in the form of forward or options contracts to hedge these risks. Generally, the Enlarged Xstrata Group does not hedge the price it realises on the sale of the Enlarged Xstrata Group's own production, and accepts prices based on the market price prevailing around the time of delivery of these metals. From time to time, however, the Enlarged Xstrata Group may fix the metal price associated with its own future production to lock in certain profits or cash flows.

Competition

The markets in which the Enlarged Xstrata Group operates are competitive. Competition is largely on the basis of price. The Enlarged Xstrata Group competes with numerous suppliers in the same product areas, some of which have substantially greater reserve bases and manufacturing and financial resources. In addition, increased production capacity from competitors in other countries may increase competition in the markets in which the Enlarged Xstrata Group operates.

The Enlarged Xstrata Group's principal competitors in its main operations are set out below:

Copper

The Enlarged Xstrata Group is the world's fourth largest producer of mined copper. Significant copper-producing competitors include Codelco, Phelps Dodge, BHP Billiton, Rio Tinto, Grupo Mexico, Freeport McMoran and Kazakhmys.

Coal — thermal

The Enlarged Xstrata Group is one of the world's largest producers of export thermal coal. Significant export thermal coal competitors are Anglo American, BHP Billiton, Rio Tinto and coal producers operating in China and Indonesia.

Coal — coking (including semi-soft coking coal)

The Enlarged Xstrata Group is the world's fifth largest producer of managed export coking coal. Significant competitors in this sector include BHP Billiton Mitsubishi Alliance (BMA), Fording Canadian Coal Trust, Anglo American and Rio Tinto.

Nickel

The Enlarged Xstrata Group is the fourth largest producer of refined nickel in the world. Significant competitors include RAO Norilsk Nickel, Inco Limited, BHP Billiton, Ste Eranet — SLN, Jinchuan Group Limited and Sumitomo Metal — Mining Co. Limited.

Zinc

The Enlarged Xstrata Group is one of the largest zinc producers in the western world in terms of capacity accounting for approximately 11% of western world production and approximately 32% of western European production. The Asturiana smelter is one of the lowest-cost producers in the world. Significant zinc smelting competitors are Korea Zinc Company, Zinifex Limited, Umicore SA, Teck Cominco, Outokumpu and zinc smelting operations in China.

Lead

The Enlarged Xstrata Group is one of the world's largest lead producers. Substantial lead-producing competitors include Zinifex Limited, Teck Cominco and Korea Zinc Company and lead mining operations in China.

Aluminium

Significant competitors of the Aluminum Business include Alcoa, BHP Billiton, Rusal, Norsk Hydro and, in relation to rolled products, Aleris, Novelis and JW Aluminum.

Chrome

The Enlarged Xstrata Group is the world's largest, in terms of both attributable production and attributable sales, and among the lowest-cost producers of ferrochrome. Significant chrome competitors are the Kermas Group, Hernic (Pty) Limited, Ore & Metal and ferrochrome producers operating in Kazakhstan.

Vanadium

The Enlarged Xstrata Group is one of the world's leading producers of primary vanadium. Significant vanadium competitors are Highveld Steel and Vanadium Corporation Ltd and steel companies operating in China and Russia.

Litigation

Details of legal and arbitration proceedings which may have, or have had in the recent past (covering the 12 months preceding the date of these Listing Particulars), a significant effect on the Guarantor and/or the Enlarged Xstrata Group's financial position or profitability in which members of the Enlarged Xstrata Group are engaged, or, so far as Xstrata is aware, which members of the Enlarged Xstrata Group have pending or threatened, are set out in paragraph 14 of Part XVI — "Additional Information — Litigation" of these Listing Particulars.

Rights Issue and Prospectus

On 3 October 2006, Xstrata announced the Rights Issue and published the Prospectus in relation to it. Xstrata launched the Rights Issue to refinance part of the debt raised to finance the cash consideration paid in respect of the Falconbridge Acquisition. The total net proceeds of the Rights Issue, after estimated aggregate costs and expenses of approximately £54 million (approximately US$101 million), are expected to be approximately £2.9 billion (approximately US$5.5 billion).

The Rights Issue, which is being made on the basis of one New Share for every three Existing Shares held at 5.00 p.m. (London Time) on 2 October 2006 (the "Record Date"), at a price of 1,265 pence per New Share, is conditional upon a number of matters that are typical for a transaction of its nature. If these conditions are not fulfilled, the Rights Issue will not proceed.

Save in respect of New Shares which Glencore International takes up pursuant to the irrevocable undertakings it has given to Xstrata and pursuant to the separate underwriting commitment Glencore International has given to the Banks pursuant to the Glencore Underwriting Letter, the Rights Issue is fully underwritten by Deutsche Bank and, on behalf of its affiliate JPMorgan

Cazenove, by JPMSL. For information in relation to the relevant Underwriting Agreement, see paragraph 12(f) of Part XVI — "Additional information — Material contracts" of these Listing Particulars.

Dealings in New Shares, nil paid, have commenced on the London Stock Exchange and on the SWX on 5 October 2006. The expected latest date for acceptance and payment in full under the Rights Issue is 27 October 2006.

Shareholders who choose not to take up their rights under the Rights Issue will be diluted by 25% following the issue of the New Shares.

For further information in relation to the Rights Issue, see paragraph 1 of Part VII — "Use of proceeds and Terms and Conditions of the Rights Issue — Use of proceeds and terms and conditions of the Rights Issue" of the Prospectus, which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars.

PART II — PRESENTATION OF INFORMATION

Market and industry information

Market data and certain industry forecasts used in these Listing Particulars were obtained from internal surveys, reports and studies, where appropriate, as well as market research, publicly available information and industry publications. Industry publications generally state that the information they contain has been obtained from sources believed to be reliable but that the accuracy or completeness of such information is not guaranteed. Similarly, internal surveys, reports and studies and market research, while believed by each of the Guarantor and the Issuer to be reliable and accurately extracted by the Guarantor and the Issuer for the purposes of these Listing Particulars, have not been independently verified and neither the Guarantor or the Issuer make any representation as to the accuracy of such information. The industry forecasts are forward-looking statements. See below in this Part II — "Presentation of information — Cautionary note regarding forward-looking statements".

Analysis of the coking coal markets in these Listing Particulars does not include coals known as pulverised coal injection ("PCI") coals which are used for injection directly into blast furnaces and refers only to coal used for coke-making.

Competitive statements

The table set out below describes the basis of the competitive statements in respect of the Enlarged Xstrata Group included in these Listing Particulars. The market data supporting the competitive statements was obtained from internal surveys, reports and studies, where appropriate, as well as market research, publicly available information and industry publications. The Guarantor has not relied on single sources but has instead sought to ensure that each competitive statement is balanced and reasonable, based on various available sources and the Guarantor's knowledge of the markets in which the Enlarged Xstrata Group operates. See above in this section headed "Market and industry information".

Statement	Basis
Enlarged Xstrata Group	
The Enlarged Xstrata Group is the fifth largest diversified mining group in the world	Enterprise value calculated as market capitalisation (sourced from Bloomberg and Datastream) plus interest bearing net debt plus minorities sourced from publicly available financial information, in each case as at 30 September 2006
The Enlarged Xstrata Group's top five industry positions in copper, thermal and coking coal, zinc and nickel	Production for the year ended 31 December 2005
Copper Business	
The Enlarged Xstrata Group is the world's fourth largest producer of mined copper	Production for the year ended 31 December 2005
Coal Business	
On a managed basis, the Enlarged Xstrata Group is one of the world's largest producers of export thermal coal, one of the largest producers of export semi-soft/PCI coal and the fifth largest producer of export coking coal	Production for the year ended 31 December 2005
The Enlarged Xstrata Group is South Africa's third largest exporter of thermal coal	South African thermal coal export sales in the year ended 31 December 2005
Nickel Business	
The Enlarged Xstrata Group is the fourth largest producer of refined nickel in the world	Production for the year ended 31 December 2005
The Enlarged Xstrata Group is one of the largest recyclers and processors of nickel and cobalt-bearing materials	Production for the year ended 31 December 2005
Zinc Business	
The Enlarged Xstrata Group is one of the world's largest producers of zinc	Production for the year ended 31 December 2005
The Enlarged Xstrata Group is one of the world's largest lead producers	Production for the year ended 31 December 2005

Statement	Basis
The Enlarged Xstrata Group is one of the largest zinc producers in the western world in terms of capacity	Production capacity for the three months ended 31 March 2006
The Former Xstrata Group Zinc Business ranks among the world's leading producers of lead by volume of production	Production for the year ended 31 December 2005
The Former Xstrata Group Zinc Business, together with the Falconbridge Group, is one of the five largest producers of silver by volume of production	Production for the year ended 31 December 2005
The Former Xstrata Group Zinc Business is one of the five largest producers of zinc, by volume of production	Production for the year ended 31 December 2005
Alloys Business	
The Enlarged Xstrata Group's top five industry position in ferrochrome	Market share of sales for the year ended 31 December 2005
The Enlarged Xstrata Group is the world's largest producer of ferrochrome	Market share of attributable production for the year ended 31 December 2005
The Enlarged Xstrata Group is the world's largest, in terms of both attributable production and attributable sales, producer of ferrochrome	Market share of attributable production and attributable sales for the year ended 31 December 2005
The Enlarged Xstrata Group's top five industry position in vanadium	Forecast compound annual growth rate for the year ended 31 December 2005 to the year ending 31 December 2010
The Enlarged Xstrata Group is one of the world's leading producers of primary vanadium	Forecast compound annual growth rate for the year ended 31 December 2005 to the year ending 31 December 2010

Cautionary note regarding forward-looking statements

These Listing Particulars and the information incorporated by reference into these Listing Particulars include statements that are, or may be deemed to be, "forward-looking statements". These forward-looking statements can be identified by the use of forward-looking terminology, including the terms "believes", "estimates", "anticipates", "expects", "intends", "plans", "goal", "target", "aim", "may", "will", "would", "could" or "should" or, in each case, their negative or other variations or comparable terminology. These forward-looking statements include all matters that are not historical facts. They appear in a number of places throughout these Listing Particulars and the information incorporated by reference into these Listing Particulars and include statements regarding the intentions, beliefs or current expectations of the Guarantor or the Enlarged Xstrata Group concerning, amongst other things, the results of operations, financial condition, liquidity, prospects, growth, strategies and dividend policy of the Enlarged Xstrata Group and the industries in which it operates.

These Listing Particulars and the information incorporated by reference into these Listing Particulars also contain forward-looking statements regarding the Falconbridge Acquisition, including statements regarding and relating to potential and/or expected synergies and cost savings available to the Enlarged Xstrata Group in connection with the Falconbridge Acquisition.

By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future and may be beyond the Guarantor's ability to control or predict. Forward-looking statements are not guarantees of future performance. The Enlarged Xstrata Group's actual results of operations, financial condition, liquidity, dividend policy and the development of the industries in which it operates may differ materially from the impression created by the forward-looking statements contained in these Listing Particulars and/or the information incorporated by reference into these Listing Particulars. Further, actual developments in relation to the Acquisitions may differ materially from those contemplated by forward-looking statements depending on certain factors which include, but are not limited to, the risks that the Enlarged Xstrata Group may not realise the anticipated benefits, operational and other synergies and/or cost savings from the Falconbridge Acquisition and/or the Cerrejón Acquisition and/or the Tintaya Acquisition and the Enlarged Xstrata Group may incur and/or experience unanticipated costs and/or delays and/or difficulties relating to integration of the Falconbridge Group and/or the Cerrejón Business and/or Tintaya into the Enlarged Xstrata Group. In addition, even if the results of operations, financial condition, liquidity and dividend policy of the Enlarged Xstrata Group, and the development of the industries in which they operate, are consistent with the forward-looking statements contained in these Listing Particulars, those results or developments

may not be indicative of results or developments in subsequent periods. Important factors that could cause these differences include, but are not limited to, general economic and business conditions, commodity price volatility, industry trends, competition, changes in government and other regulation, including in relation to the environment, health and safety and taxation, labour relations and work stoppages, changes in political and economic stability, currency fluctuations (including the €/US$, £/US$, A$/US$, C$/US$, ZAR/US$, ARS/US$, CHF/US$, CLP/US$, the Colombian peso/US$, the Peruvian Sol/US$ and the Kroner/US$ exchange rates), the Enlarged Xstrata Group's ability to integrate new businesses (including the Falconbridge Group, the Cerrejón Business and Tintaya) and recover its reserves or develop new reserves and changes in business strategy or development plans and other risks, including those described in Part IV — "Risk Factors" of these Listing Particulars.

You are advised to read these Listing Particulars and the information incorporated by reference into these Listing Particulars in their entirety for a further discussion of the factors that could affect the Enlarged Xstrata Group's future performance and the industries in which they operate. In light of these risks, uncertainties and assumptions, the events described in the forward-looking statements in these Listing Particulars and/or the information incorporated by reference into these Listing Particulars may not occur.

Other than in accordance with their legal or regulatory obligations (including under the Listing Rules, the Prospectus Rules and the Disclosure Rules), neither the Issuer nor the Guarantor undertakes any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events or otherwise.

Presentation of financial information

Historical financial information

Unless otherwise indicated, financial information for the Former Xstrata Group in these Listing Particulars and the information incorporated by reference into these Listing Particulars is presented in US dollars and has been prepared in accordance with UK GAAP for the financial years up to and including the financial year ended 31 December 2004 and in accordance with International Financial Reporting Standards, or IFRS, for the financial year ended 31 December 2005 (and, for comparative purposes, the year ended 31 December 2004) and for the six months ended 30 June 2006 and for the six months ended 30 June 2005. **Historical financial information for the Issuer is presented in US dollars, has been prepared in accordance with UK GAAP and has not been prepared in accordance with IFRS. There may be material differences in the historical financial information of the Issuer had that financial information been prepared in accordance with IFRS. A narrative description of the material changes that would have been made to the accounting policies of the Issuer to conform with IFRS is set out in Part XVII — "Financial Information of the Issuer — Summary of the principal differences between UK GAAP and IFRS" of these Listing Particulars.**

Unless otherwise indicated, financial information for the Falconbridge Group in these Listing Particulars and the information incorporated by reference into these Listing Particulars is presented in US dollars and has been prepared in accordance with Canadian GAAP. A discussion of certain significant differences between UK GAAP and Canadian GAAP and IFRS and Canadian GAAP is set out in paragraph 2.3 of Part IV — "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group — Principal differences in the application of Xstrata's accounting policies and those applied by Falconbridge" of the Circular (which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars). Unless otherwise indicated, financial information for the Cerrejón Business in these Listing Particulars is presented in US dollars and has been prepared in accordance with IFRS.

Unless otherwise indicated, financial information for Tintaya in these Listing Particulars is presented in US dollars and has been prepared in accordance with Peruvian GAAP.

EBITDA and EBIT are not defined under IFRS, UK GAAP, Canadian GAAP or Peruvian GAAP

Although none of IFRS, UK GAAP, Canadian GAAP or Peruvian GAAP defines the measures EBITDA and EBIT, they are measures which are widely used in the natural resources sector to evaluate a company's operating performance. Nevertheless, EBITDA and EBIT should not be

considered in isolation or as a substitute for operating profit, cash flows from operating activities or any other measure for determining Xstrata's operating performance or liquidity that is calculated in accordance with IFRS or UK GAAP, the Falconbridge Group's operating performance or liquidity that is calculated in accordance with Canadian GAAP, Cerrejón's operating performance or liquidity that is calculated in accordance with IFRS or Tintaya's operating performance or liquidity that is calculated in accordance with Peruvian GAAP. As EBITDA and EBIT are not measures of performance defined by IFRS, UK GAAP, Canadian GAAP or Peruvian GAAP, these measures may not be comparable to similarly titled measures employed by other companies.

EBITDA and EBIT in relation to the Enlarged Xstrata Group and the Former Xstrata Group

Unless otherwise indicated, EBITDA represents, when used in these Listing Particulars and the information incorporated by reference into these Listing Particulars in relation to the Enlarged Xstrata Group and the Former Xstrata Group, net profit or loss from continuing operations before interest, taxation, depreciation and amortisation. EBIT represents earnings before interest and taxation.

"EBITDA (before exceptional items)" and "EBIT (before exceptional items)" presented under UK GAAP are EBITDA or EBIT, respectively, before material items which derive from events or transactions that fall within the ordinary activities of the Former Xstrata Group and which individually or, if of a similar type, in aggregate, need to be disclosed by virtue of their size or incidence if Xstrata's financial statements are to give a true and fair view.

"EBITDA (before non-trading items)" and "EBIT (before non-trading items)" presented under IFRS are EBITDA or EBIT, respectively, before material items of income and expense, presented separately due to their nature or expected infrequency of the events giving rise to them.

EBITDA and EBIT in relation to the Falconbridge Group

Unless otherwise indicated, EBITDA represents, when used in these Listing Particulars and the information incorporated by reference into these Listing Particulars in relation to the Falconbridge Group, net income from continuing operations before interest, taxation, depreciation, amortisation, and accretion, net restructuring costs and minority interest earnings of subsidiaries. Unless otherwise indicated, EBIT represents earnings before interest and taxation.

"Income generated from operating assets" represents, when used in these Listing Particulars and the information incorporated by reference into these Listing Particulars in relation to the Falconbridge Group, net income before interest expense, net; corporate and general administration; research, development and exploration; minority interest in earnings of subsidiaries; gain, net of restructuring costs and other; and tax expense. Since this measure captures the Falconbridge Group's key revenues and operating expenses of assets currently in operation, income generated from operating assets is a key performance measurement that management uses to evaluate the performance of both individual assets and business units of the Falconbridge Group.

Unaudited financial information

The following financial information in these Listing Particulars and the information incorporated by reference into these Listing Particulars is unaudited:

- selected summary financial information on Xstrata relating to the six months ended 30 June 2006, which is set out in Part XII — "Description of the Former Xstrata Group's business" of these Listing Particulars;
- financial information on Xstrata relating to the six months ended 30 June 2006 and the comparative information relating to the six months ended 30 June 2005, which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars and included in the announcement accompanying the publication of the 2006 Xstrata Interim Report, which announcement is set out in full in Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — 2006 Xstrata Interim Report" of these Listing Particulars;
- financial information on Falconbridge relating to the six months ended 30 June 2006 and the comparative information relating to the six months ended 30 June 2005, which is set out in

Part XIII — "Description of the Falconbridge Group's business — Recent significant developments" of these Listing Particulars; and

- the other financial information in these Listing Particulars and the information incorporated by reference into these Listing Particulars which is specifically identified as being unaudited.

Currencies

In these Listing Particulars and the information incorporated by reference into these Listing Particulars, references to "Argentine pesos" or "ARS" are to the lawful currency of Argentina, references to "Australian dollars", "AUD" or "A$" are to the lawful currency of Australia, references to "Canadian dollars", "C$", or "Cdn$" are to the lawful currency of Canada, references to "Chilean peso" or "CLP" are to the lawful currency of Chile, references to "Colombian pesos" are to the lawful currency of Colombia, references to "Euro", "EUR" or "€" are to the currency introduced at the start of the third stage of European economic and monetary union pursuant to the Treaty establishing the European Community, as amended, references to "yen" or "JPY" are to the lawful currency of Japan, references to "Kroner" are to the lawful currency of Norway, references to "Peruvian Sol" are to the lawful currency of Peru, references to "CHF" are to the lawful currency of Switzerland, references to "Rand" or "ZAR" are to the lawful currency of South Africa, references to "£", "Sterling" or "GBP" are to the lawful currency of the United Kingdom and references to "US dollars", "US$", "$US", "US¢" or "cents" are to the lawful currency of the United States.

Unless otherwise indicated in these Listing Particulars and the information incorporated by reference into these Listing Particulars, the financial information contained in these Listing Particulars and the information incorporated by reference into these Listing Particulars has been presented in US dollars. In addition, solely for convenience, these Listing Particulars and the information incorporated by reference into these Listing Particulars contain translations of relevant currencies to US dollars. These translations should not be construed as representations that the relevant currency could be converted into US dollars at the rate used indicated or at any other rate, and translations into US dollar amounts that have been calculated at 6 October 2006, being the latest practicable date prior to the publication of these Listing Particulars, may not correspond to the US dollar amounts shown in the historic or future financial statements of Xstrata in respect of which different exchange rates may have been or may be used.

Ore reserve and mineral resource reporting — basis of preparation

Former Xstrata Group

Unless otherwise indicated in these Listing Particulars and/or the information incorporated by reference into these Listing Particulars, ore reserves and mineral resources information reported in these Listing Particulars and the information incorporated by reference into these Listing Particulars in respect of the Former Xstrata Group has been compiled in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the "JORC Code"), December 2004 edition. South African mineral reserves and mineral resources information reported in these Listing Particulars and/or the information incorporated by reference into these Listing Particulars in respect of the Former Xstrata Group has been compiled in accordance with the South African Code for Reporting of Mineral Resources and Mineral Reserves (the "SAMREC Code"), this being materially similar to the JORC Code with only minor variations. The terms "ore reserves" and "mineral reserves" are equivalent and, where relevant, the terms "ore reserves" and "mineral reserves" can be read as including coal reserves and the term "mineral resources" can be read as including coal resources.

The relevant definitions from the December 2004 edition of the JORC Code and certain other definitions can be found in Part XIX — "Definitions and glossary of technical terms" of these Listing Particulars.

The JORC Code recognises a fundamental distinction between mineral resources and ore reserves. Mineral resources are based on mineral occurrences quantified on the basis of geological data and an assumed cut-off grade, and are divided into "measured", "indicated" and "inferred" categories reflecting decreasing confidence in geological and grade continuity. Generally, explicit allowances for dilution or for losses during mining are not included in the estimates, but the reporting of mineral resources carries the implication that there are reasonable prospects for eventual economic extraction. Mineral resources may therefore be viewed as the estimation stage prior to the

application of more stringent economic criteria for ore reserve definition, such as a rigorously defined cut-off grade and mine design outlines, along with allowances for dilution and losses during mining. Under this system of reporting, it is common practice for companies to include in the mineral resource category material with a reasonable expectation of conversion to ore reserves, but for which the required detailed engineering, economic and other studies have not yet been undertaken.

Ore reserves as defined by the JORC Code are designated as "proved" and "probable" and are derived from the corresponding measured and indicated resource estimates by including allowances for dilution and losses during mining. It is an explicitly stated further requirement that other modifying economic, mining, metallurgical, marketing, legal, environmental, social and governmental factors also be taken into account. Reporting conventions that may be adopted are to report mineral resource estimates inclusively, including those measured and indicated resources modified to produce the ore reserves, or to report as additional mineral resources only those portions which have not contributed to conversion to ore reserves.

Unless otherwise indicated in these Listing Particulars, measured and indicated resource estimates reported in these Listing Particulars in respect of the Former Xstrata Group are reported inclusively, including those mineral resources modified to produce the ore reserves.

Unless otherwise indicated in these Listing Particulars, ore reserve and mineral resources information reported in these Listing Particulars in respect of the Former Xstrata Group has been extracted without material adjustment from, or, in the case of attributable resource and reserve information, is based upon, the Former Xstrata Group Ore Reserves and Mineral Resources Report published by the Guarantor on 1 March 2006 and set out in paragraph 1 of Part XVIII — "Ore reserves and mineral resources information — Former Xstrata Group Ore Reserves and Mineral Resources Report" of these Listing Particulars and such information is reported as at 30 June 2005.

Ore reserves and mineral resources information reported in these Listing Particulars in respect of the Bajo de la Alumbrera operation in Argentina (in which the Enlarged Xstrata Group has a 50% interest) has been compiled in accordance with the JORC Code, October 2001 edition and is reported as at 30 June 2006. This information is not sourced from the Former Xstrata Group Ore Reserves and Mineral Resources Report but has been extracted without material adjustment from, or, in the case of attributable resource and reserve information, is based upon, the Alumbrera Ore Reserves and Mineral Resources Report published by Xstrata on 30 June 2006 and set out in paragraph 2 of Part XVIII — "Ore reserves and mineral resources information — Alumbrera Ore Reserves and Mineral Resources Report" of these Listing Particulars.

Ore reserves and mineral resources information reported in these Listing Particulars in respect of the Cerrejón Business and Tintaya has been compiled in accordance with the JORC Code, December 2004 edition and is reported as at 30 June 2005. This information is not sourced from the Former Xstrata Group Ore Reserves and Mineral Resources Report but is sourced instead from reserves and resources summaries approved by Competent Persons (as defined in the JORC Code).

In these Listing Particulars, ore reserve and mineral resource information in relation to the Former Xstrata Group is based on information compiled by Competent Persons (as defined in and required by both the JORC Code and the SAMREC Code). This ore reserve and mineral resource information is included in the reserve and resource estimates in Part XII — "Description of the Former Xstrata Group's business" of these Listing Particulars.

Falconbridge Group

Unless otherwise indicated in these Listing Particulars, estimates of mineral reserves and mineral resources information reproduced in these Listing Particulars in respect of the Falconbridge Group:

- have been estimated by or on behalf of the Falconbridge Group in accordance with the CIM Definition Standards on Mineral Resources and Reserves, adopted by the CIM Council on 14 November 2004, and the CIM Estimation of Mineral Resources and Mineral Reserves Best Practice Guidelines, adopted by the CIM Council on 23 November 2003 using geostatistical or classical methods, plus economic and mining parameters appropriate to each operation. The Canadian resources and reserves reporting regime is materially similar to the JORC Code with only minor variations;

- were compiled, indirectly supervised and verified on behalf of the Falconbridge Group by Chester Moore, Falconbridge's Director, Mineral Reserve Estimation and Reporting at the relevant time, a member of the Professional Geoscientists of Ontario with over 30 years of experience as a geologist and a qualified person as defined in NI 43-101;
- are shown on a 100% basis; and
- used the following long-term metal prices for estimates: nickel US$3.25/lb, copper US$0.90/lb, zinc US$0.50/lb with a nickel premium added at Sudbury operations. (Exchange rate of C$1.50 to US$1.00).

Unless otherwise indicated in these Listing Particulars, estimates of mineral reserves and mineral resources information reproduced in these Listing Particulars in relation to the Falconbridge Group is reported as at 31 December 2005.

Inferred resources

The reserves and resources information in these Listing Particulars and the information incorporated by reference into these Listing Particulars includes references to "inferred resources". An inferred resource is that part of a mineral resource for which tonnage, grade and mineral content can be estimated with a low level of confidence. This categorisation is inferred from geological evidence and assumed but not verified geological and/or grade continuity. It is based on information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes which may be limited or of uncertain quality and reliability.

Resources and reserves, production and sales

In these Listing Particulars and the information incorporated by reference into these Listing Particulars, certain references to resources and reserves are to attributable resources and attributable reserves. Attributable resources means that part of the resources from a mine in which the Enlarged Xstrata Group has an economic interest. Attributable reserves means that part of the reserves from a mine in which the Enlarged Xstrata Group has an economic interest. Attributable resources and attributable reserves therefore exclude resources and reserves attributable to minority interests in controlled subsidiaries and the interests of joint venture partners. Unless otherwise indicated in these Listing Particulars, reserves are a subset of resources and are included in resource estimates.

In these Listing Particulars and the information incorporated by reference into these Listing Particulars, production has been measured in two ways:

- **Mine production or total production or total mine production.** Mine production or total production or total mine production is equal to the total production from a particular mine or operation for the whole year regardless of ownership of that mine or that operation.
- **Attributable production.** Attributable production is that part of mine, total or total mine production in which the Enlarged Xstrata Group had an economic interest at the relevant time. It therefore excludes production attributable to minority interests in controlled subsidiaries and the interests of joint venture partners.

In these Listing Particulars and the information incorporated by reference into these Listing Particulars, sales by volume have been measured in two ways:

- **Total sales or total mine sales.** Total sales or total mine sales is equal to the total sales from a particular mine or operation for the whole year regardless of ownership of that mine or that operation.
- **Attributable sales.** Attributable sales is that part of sales from a particular mine or operation in which the Enlarged Xstrata Group had an economic interest at the relevant time. It therefore excludes sales attributable to minority interests in controlled subsidiaries and the interests of joint venture partners.

Rounding

Certain figures included in these Listing Particulars and the information incorporated by reference into these Listing Particulars have been subject to rounding adjustments. Accordingly, discrepancies in tables between the totals and the sums of the relevant amounts are due to rounding.

PART III — INFORMATION INCORPORATED BY REFERENCE

Where documents incorporated by reference themselves incorporate information by reference, such information does not form part of these Listing Particulars.

Information incorporated by reference into these Listing Particulars	Destination of incorporation	Page number in these Listing Particulars
Xstrata Annual Report and Accounts 2004 (pages 97 to 161 inclusive, which includes the Independent Auditors' Report in its entirety) — Consolidated financial statements of Xstrata for the financial year ended 31 December 2004, including Consolidated Profit and Loss, Consolidated Balance Sheet and Consolidated Cash Flow Statement and notes thereto and Auditors' Report	Part XII — "Description of the Former Xstrata Group's business — Former Xstrata Group financial information" of these Listing Particulars	99
Xstrata Annual Report and Accounts 2005 (Financial Statements pages 2 to 120 inclusive which includes the Independent Auditors' Report in its entirety) — Consolidated financial statements of the Guarantor for the financial year ended 31 December 2005 with comparative information for the year ended 31 December 2004, adjusted to conform with IFRS, including Consolidated Income Statement, Consolidated Balance Sheet and Consolidated Cash Flow Statement and notes thereto and Auditors' Report	Part XII — "Description of the Former Xstrata Group's business — Former Xstrata Group financial Information" of these Listing Particulars	99
2006 Xstrata Interim Report (pages 45 to 67 inclusive) — Unaudited consolidated financial statements of Xstrata for the six months ended 30 June 2006, including Unaudited Interim Condensed Consolidated Balance Sheet and the related Unaudited Interim Condensed Consolidated Income Statement, Unaudited Cash Flow Statement and the Unaudited Statement of Recognised and Expenses, and notes thereto and Independent Review Report	Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — 2006 Xstrata Interim Report" of these Listing Particulars	154
Circular (pages 335 to 387 inclusive) — Part III — Financial information on the Falconbridge Group — three years ended 31 December 2005, 31 December 2004 and 31 December 2003	Part XIII — "Description of the Falconbridge Group's business — Falconbridge Group financial information" of these Listing Particulars	159

Copies of the documents of which part or all are incorporated herein are available:

(a) on the Guarantor's website (www.xstrata.com). Except to the extent expressly set out above in this Part III — "Information incorporated by reference", neither the content of the Guarantor's website (or any other website) nor the content of any website accessible from hyperlinks on the Guarantor's website (or any other website) is incorporated into, or forms part of, these Listing Particulars; and

(b) as provided in paragraph 19 of Part XVI — "Additional information — Documents available for Inspection" of these Listing Particulars.

PART IV — RISK FACTORS

Investors and prospective investors should consider carefully all of the information set out in these Listing Particulars and all of the information incorporated by reference into these Listing Particulars, including, in particular, the risks described below, prior to making any decisions on whether or not to invest in the Bonds. Additional risks and uncertainties not presently known to the Issuer or the Guarantor, or that the Issuer or the Guarantor currently considers to be immaterial, may also have an adverse effect on the Enlarged Xstrata Group.

The Enlarged Xstrata Group's business, financial condition or results of operations could be materially and adversely affected by any of the risks described below. In such case, the market price of the Bonds may decline and investors may lose all or part of their investment.

Industry risks relating to the Enlarged Xstrata Group

Commodity price volatility and cost efficiency

The Enlarged Xstrata Group's turnover and earnings are dependent upon prevailing prices for the commodities it produces. Historically, such prices have been volatile and are subject to wide fluctuations in response to relatively minor changes in the supply of, and demand for, such commodities, market uncertainty, the overall performance of world or regional economies and the related cyclicality in industries directly served by the Enlarged Xstrata Group and a variety of other factors beyond its control. In particular, demand for commodities has recently been, and is expected to be in the future, influenced by demand from specific regions, such as the Asia-Pacific region and specific countries, such as China and India, and there can be no assurance that factors beyond the Enlarged Xstrata Group's control, such as political, regulatory and economic factors, will not adversely affect such demand. Prices may also be affected by governmental actions intended to reduce greenhouse gas emission. See the risk factor below in this Part IV — "Risk factors — Industry risks relating to the Enlarged Xstrata Group — Risks related to climate change legislation". In addition, speculative trades in certain commodities on the world markets may cause short-term price fluctuations for such commodities, including commodities produced by the Enlarged Xstrata Group. These external factors and the volatile nature of the commodity markets make it difficult to estimate future prices. The prices for commodities produced by the Enlarged Xstrata Group may decline significantly from current levels. Any substantial or extended decline in commodity prices would adversely affect the results of operations or financial condition of the Enlarged Xstrata Group.

As the Enlarged Xstrata Group, in common with its competitors, is unable to influence commodity prices directly, its competitiveness and long-term profitability are, to a significant degree, dependent upon its ability to reduce costs and maintain low-cost, efficient operations. Important cost inputs in the Enlarged Xstrata Group's operations generally include the extraction and processing costs of raw materials and consumables such as reductants, power, fuels, labour, transport and equipment, many of which have been, and continue to be, particularly susceptible to inflationary and supply and demand pressures. The Enlarged Xstrata Group's production costs are also significantly affected by production volumes and, therefore, the Enlarged Xstrata Group's ability to maintain production levels and maximise capacity utilisation will be a key factor in determining its overall cost competitiveness. The Enlarged Xstrata Group's ability to maintain earnings and undertake capital expenditure would be adversely affected in the event of a sustained material fall in world commodity prices, an appreciable rise in its production costs or a decline in its production volumes. There can be no assurance that the Enlarged Xstrata Group will be able to maintain or reduce production costs or maintain or increase its production volumes in the future.

Any increase in the price of a commodity may encourage other producers to increase their production of that commodity. Any over-production in a particular commodity, which is in excess of demand, could reduce the price of that commodity and adversely affect the Enlarged Xstrata Group's results of operations or financial condition.

Environmental, health and safety

Various environmental, health and safety permits are required for many of the operations of the Enlarged Xstrata Group and these permits are subject, in certain situations or on the occurrence of certain events, to modification, renewal or revocation by issuing authorities. Governmental authorities and the courts have the power to enforce compliance with these permits and applicable

environmental, health and safety laws and regulations and violations may result in civil or criminal penalties, the curtailment or cessation of operations, orders to pay compensation, orders to remedy the effects of violations and/or orders to take preventative steps against possible future violations.

In some jurisdictions, members of the public can initiate private proceedings to enforce compliance with permits and applicable environmental, health and safety laws and regulations. Proceedings commenced by members of the public have not to date had a material adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group, although actions of this type have occurred in relation to other corporations. No assurance can be given that these types of private actions will not occur in the future and have a material adverse effect on the results of operations of financial condition of the Enlarged Xstrata Group.

Compliance with these laws, regulations and permits has not to date had a material adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group although such permits, laws and regulations are subject to change (including the imposition of more onerous requirements and obligations) and the Guarantor is unable to predict the ultimate cost of compliance with such amended environmental, health and safety permits, laws and regulations. The cost of maintaining compliance could be substantial. There can be no assurance that the cost of complying with present or future laws or regulations will not adversely affect the results of operations or financial condition of the Enlarged Xstrata Group.

The operations of the Enlarged Xstrata Group are extensively regulated. National, state and local authorities in the countries in which the Enlarged Xstrata Group has operations regulate the industries in which the Enlarged Xstrata Group operates with respect to matters including, but not limited to, employee health and safety, royalties, permitting and licensing requirements, planning and development and environmental compliance (including, for example, compliance with waste and waste water treatment and disposal, emissions and discharge requirements, plant and wildlife protection, reclamation and restoration of mining properties before, during and after mining is complete, surface subsidence from underground mining and the effects that mining has on surface and/or groundwater quality and availability). Numerous governmental permissions, approvals, licences and leases are required for the Enlarged Xstrata Group's operations. The Enlarged Xstrata Group is required to prepare and present to national, state or local authorities data pertaining to the anticipated effect or impact that any proposed exploration, mining or production activities may have upon the environment. The costs, liabilities and other obligations associated with complying with such requirements or arising from the manner in which the obligations are met, or, as may be necessary, the cost of rehabilitation of sites used for operations which have been closed down, may be substantial and time-consuming and may delay the commencement or continuation of exploration, mining or production activities. There can be no assurance that compliance costs, including the costs of rehabilitation of site operations which have been closed down, and dealing with environmental, and health and safety issues associated with legacy closed sites will not adversely affect the results of operations or financial condition of the Enlarged Xstrata Group.

The Enlarged Xstrata Group's copper and lead smelters at Mount Isa in Australia are exempted, through special state legislation, from compliance with state environmental laws regulating air emissions. The Mount Isa operations in Queensland are subject to specific legislation of the Queensland State Parliament, the Mount Isa Mines Limited Agreement Act 1985. The Mount Isa Mines Limited Agreement Act 1985 exempts the Mount Isa operations from strict compliance with the otherwise applicable Environmental Protection Act 1994 with respect to air emissions. The state environmental regulator has informed the Guarantor of its desire to assume responsibility for the regulation of special state legislation, including the Mount Isa Mines Limited Agreement Act 1985. In the event that happens and a subsequent amendment is sought and made to bring air emissions permitted under the Mount Isa Mines Limited Agreement Act 1985 into line with the Environmental Protection Act 1994, or alternatively the Mount Isa Mines Limited Agreement Act 1985 is repealed, then significant cost consequences, relating to investing in new environmental technologies and practices, could be required to maintain current production levels, which would have an adverse effect on the results or operations or financial condition of the Enlarged Xstrata Group. See Part I — "Description of the Enlarged Xstrata Group — Regulatory and environment matters" in these Listing Particulars.

In addition, a violation of environmental or health and safety laws relating to a mine or production facility or a failure to comply with the instructions of the relevant environmental or health and safety

authorities could lead to, amongst other things, a temporary shutdown of all or a portion of the mine or production facility, a loss of the right to mine or to continue with production, or the imposition of costly compliance procedures, fines and penalties, liability for clean-up costs or damages. If environmental, health and safety authorities require the Enlarged Xstrata Group to shut down all or a portion of a mine or production facility or to implement costly compliance measures, or impose fines and penalties, liability for clean-up costs or damages on the Enlarged Xstrata Group, whether pursuant to existing or new environmental, health and safety laws and regulations, such measures could have a material adverse effect on the Enlarged Xstrata Group's results of operations and financial condition.

The possibility exists that new environmental and/or health and/or safety legislation or regulations may come into force and/or new information may emerge on existing environmental and/or health and/or safety conditions and/or other events (including legal proceedings brought based upon such conditions or an inability to obtain necessary permits), that may materially adversely affect the Enlarged Xstrata Group's operations, its cost structure, its customers' ability to use the commodities produced by the Enlarged Xstrata Group, demand for its products, the quality of its products and/or its methods of production and distribution. The Enlarged Xstrata Group expects that further environmental laws and/or regulations will likely be implemented to protect the environment and quality of life, given issues of sustainable development and other similar requirements which governmental and supragovernmental organisations and other bodies have been pursuing. Some of the issues which are relevant to the Enlarged Xstrata Group that are currently under review by environmental regulatory agencies include reducing or stabilising various emissions, including sulphur dioxide and greenhouse gas emissions, geochemical and geotechnical stability of mine works, mine reclamation and restoration, and water, air and soil quality and absolute liability for spills and exceeding prescribed limits. Such matters may, amongst other things, require the Enlarged Xstrata Group, or its customers, to change operations significantly or incur increased costs (including compliance expenditures) or could require the Enlarged Xstrata Group to increase financial reserves, which could have an adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group.

In view of the uncertainties concerning future removal, stabilisation, reclamation and site restoration costs on certain of the Enlarged Xstrata Group's properties, the ultimate costs for future removal, stabilisation, reclamation and site restoration to the Enlarged Xstrata Group could differ from the amounts estimated. Estimates for such future costs are subject to change based on amendments to applicable laws and regulation, the nature of ongoing operations and technological innovations. Future changes, if any, due to their nature and unpredictability, could have a significant impact and, in such case, would be reflected prospectively as a change in an accounting estimate. In addition, regulatory authorities in various jurisdictions around the world may require the Enlarged Xstrata Group to provide financial security to secure, in whole or in part, future removal, stabilisation, reclamation and site restoration obligations in such jurisdictions. In some instances, the Enlarged Xstrata Group has already provided such security. In other instances, such security may be required to be provided upon the occurrence of certain events, including in certain cases if the Guarantor or the relevant member of the Enlarged Xstrata Group ceases to maintain a minimum investment grade credit rating, if the regulatory authority ceases to accept alternative forms of comfort to secure the obligation or as the relevant property nears the end of its operation. Although the provision of such security does not increase the future removal, stabilisation, reclamation and site restoration costs (other than costs associated with the provision of such security), a portion of the Enlarged Xstrata Group's financial resources may be required to support these commitments, which could adversely affect the financial resources available to the Enlarged Xstrata Group.

Risks related to climate change legislation

In December 1997, in Kyoto, Japan, the signatories to the United Nations Convention on Climate Change established individual, legally binding targets to limit or reduce greenhouse gas emissions by developed nations. This international agreement, known as the Kyoto Protocol, came into force on 16 February 2005. As of 30 August 2006, 164 states and regional economic integration organisations (such as the EU) had deposited instruments of ratifications, accessions, approvals or acceptances in respect of the Kyoto Protocol.

The Enlarged Xstrata Group has operations in various jurisdictions that may be subject to national, regional or local laws, regulations and policies aimed at limiting or reducing greenhouse gas

emissions. While the impact of the Kyoto Protocol and related legislation and regulation cannot be quantified at this time, the likely effect will be to increase costs for fossil fuels, electricity and transportation, restrict industrial emission levels, impose added costs for emissions in excess of permitted levels and increase costs for monitoring, reporting and financial accounting. As the operation of the Enlarged Xstrata Group's business involves incurring certain of these costs, increases in such costs could have a material adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group. Further, the Enlarged Xstrata Group may be required to change operations, reduce production capacity or make additional investments to adapt to new or amended environmental laws and regulations, which could have a material adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group.

The coal industry, governments and other organisations are actively investing in research projects to reduce greenhouse gas emissions from the use of coal in power generation. Demand for coal is expected to be supported by forecast increases in global demand for energy. Nonetheless, there can be no assurance that the introduction of laws, regulations and practices to limit greenhouse gas emissions will not in the future adversely affect the price of, and demand for, coal. A significant decrease in the demand for coal, with current users turning increasingly to alternative forms of energy, may adversely affect the results of operations or financial condition of the Enlarged Xstrata Group.

A significant part of the Enlarged Xstrata Group's export thermal coal sales are to Japanese customers. The Japanese government's current policy on greenhouse gas emissions is that it intends to meet its Kyoto obligations by 2012. In February 2003, the Japanese cabinet approved a tax on coal imports of 700 yen per tonne (approximately US$5.90 per tonne) to be phased in three stages. The first stage commenced on 1 October 2003 with a 230 yen per tonne levy (approximately US$1.94 per tonne) and the second phase became effective on 1 April 2005 at 460 yen per tonne (approximately US$3.90 per tonne). The third phase is scheduled to be implemented on 1 April 2007. The tax applies to all thermal coal imports, including thermal coal produced by the Enlarged Xstrata Group. There can be no assurance that these taxes or other taxes which may be introduced in the future in Japan and/or other countries will not adversely affect the results of operations or financial condition of the Enlarged Xstrata Group.

Given the uncertainty surrounding the impact of climate change, the manner of implementation of the Kyoto Protocol in those jurisdictions where it has yet to be implemented, the various mechanisms available for countries to achieve their emission reduction targets (whether under the Kyoto Protocol or otherwise) and difficulties in identifying and assessing the financial implications of such impacts and measures, it is not possible to determine with certainty at this time what the ultimate effects of climate change and the Kyoto Protocol or other similar initiatives to limit or control greenhouse gas emissions may be for the Enlarged Xstrata Group.

Australian native title and South African and Canadian land claims

In Australia, the Native Title Act 1993 (Cth) (the "Native Title Act") recognises native title and establishes processes relating to mining and exploration rights. Native title represents the traditional rights and interests that the Aboriginal people have in relation to land. If native title has not been extinguished, the Native Title Act provides procedural rights for registered native title claimants, including the right to negotiate with respect to the grant of mining rights, which include exploration titles and the compulsory acquisition of land. Native title claims have been made over some areas where the Enlarged Xstrata Group has mining operations and there can be no assurance that such claims or any future claims will not have a material adverse effect on the Enlarged Xstrata Group's results of operations or financial condition or that additional claims will not be lodged in the future.

In South Africa, the government's Restitution of Land Rights Act 1994 provides remedies for persons who have been dispossessed of rights in land as a result of past racially discriminatory laws or practices. The Land Claims Court is empowered to make orders concerning the restoration of a right in land or any portion of land, compelling the payment of compensation, compelling the South African government to include a claimant as a beneficiary in a state support programme for housing or granting the claimant an appropriate right in alternatively designated state land or with any alternative and appropriate relief. The Guarantor is aware that a number of land claims have been lodged in relation to the surface rights of the Enlarged Xstrata Group's various South African properties, but has limited information about these claims, and due to the lengthy administrative

process under the Restitution of Land Rights Act 1994, there is uncertainty as to their status and prospects of success.

In Canada, the Enlarged Xstrata Group's properties may, in the future, be the subject of Native Americans' land claims which are generally addressed by the courts in Canada. The legal basis of such a land claim is a matter of considerable legal complexity and the impact of the assertion of a land claim, or the possible effect of a settlement of such claim upon the property interest in question, cannot be predicted with any degree of certainty at this time. In addition, no assurance can be given that any recognition of Native American rights whether by way of a negotiated settlement or by judicial pronouncement (or through the grant of an injunction prohibiting mining activity pending resolution of any such claim) would not delay or even prevent the Enlarged Xstrata Group's resource development or mining activities in Canada.

Accordingly, the Guarantor can give no assurance that these land claims, or any other land claims of which it is not aware, will not have an adverse effect on the Enlarged Xstrata Group's rights to the properties that are subject to the land claims.

Nothing in this paragraph headed "Australian native title and South African and Canadian land claims" is intended to qualify the statement in paragraph 14 of Part XVI — "Additional Information — Litigation" of these Listing Particulars that, except as set out in that paragraph, neither the Guarantor nor any other member of the Enlarged Xstrata Group is engaged in or, so far as the Guarantor is aware, has pending or threatened, any governmental, legal or arbitration proceedings which may have, or have had in the recent past (covering the 12 months preceding the date of these Listing Particulars), a significant effect on the Guarantor and/or the Enlarged Xstrata Group's financial position or profitability.

South African MPRDA and Empowerment Charter

On 3 October 2002, the President of South Africa assented to and signed into law the Mineral and Petroleum Resources Development Act 28 of 2002 (the "MPRDA"), which came into operation on 1 May 2004. On 13 August 2004, the Empowerment Charter was promulgated, together with the "scorecard" for measuring black empowerment in the mining industry, which is intended to monitor and assess compliance with the Empowerment Charter. In addition to this the government of South Africa, in conjunction with the industry, is developing further legislation and guidelines including the Royalty Bill pertaining to royalties (which is discussed further in Part I — "Description of the Enlarged Xstrata Group — Regulatory and environmental matters" of these Listing Particulars). Regulations pertaining to the MPRDA were promulgated on 23 April 2004 and on 29 October 2004.

A key outcome is that the government of South Africa becomes the custodian of all the rights to minerals and that prospecting and mining will require prospecting and mining rights respectively which can only be granted once certain criteria are met, including empowerment criteria for historically disadvantaged South Africans ("HDSAs"). Existing prospecting and mining rights, termed "old order rights", need to be converted to new order rights and, to do so, the above criteria need to be satisfied or undertakings given.

A key objective of the above legislation is to ensure that 26% of the South African mining industry is controlled by HDSAs within ten years from 1 May 2004. In addition, mining companies need to achieve certain goals aimed at the upliftment of HDSAs both in the workplace and the communities in which they operate.

In this regard, see the information in Part XII — "Description of the Former Xstrata Group's business — Alloy Business summary" of these Listing Particulars on the combined Pooling and Sharing Venture (the "PSV") with Merafe Resources Limited ("Merafe"), which is Xstrata Alloys' black empowerment partner in the ferrochrome business, the partnership agreement entered into by Xstrata Alloys with Kagiso to give effect to black economic empowerment obligations in respect of the Mototolo Joint Venture and the agreement entered into by XCSA with ARM to establish a new black controlled coal mining company, ARM Coal.

The Guarantor can give no assurance that, despite the initiatives taken so far by the Enlarged Xstrata Group, these legislative developments in South Africa will not have a material adverse effect on the Enlarged Xstrata Group's mining rights in South Africa and/or the results of operations or financial condition of the Enlarged Xstrata Group.

Risks relating to the business of the Enlarged Xstrata Group

Operational considerations

The success of the Enlarged Xstrata Group's Business is affected by a number of factors which are, to a large extent, outside its control. Such factors include the availability of raw materials, water and power. In addition, the Enlarged Xstrata Group's business is subject to numerous other operating risks which include: unusual or unexpected geological features, ground conditions or seismic activity; climatic conditions such as flooding or drought; interruptions to power supplies; congestion at commodities transport terminals; industrial action or disputes; environmental hazards; and technical failures, fires, explosions and other accidents at a mine, processing plant, cargo terminal or related facilities. These and other risks and hazards could result in damage to, or destruction of, properties or processing or production facilities, may reduce or cause production to cease at those properties or production facilities, may result in personal injury or death, environmental damage, business interruption, monetary losses and possible legal liability and may result in actual production differing from estimates of production, including those contained whether expressly or by implication, in these Listing Particulars or in information incorporated by reference into these Listing Particulars. While the Enlarged Xstrata Group has insurance covering various types of business interruptions in respect of its operations, such insurance may not fully cover the consequences of such business interruptions and, in particular, may not cover interruptions arising from all types of equipment failure, labour disputes or *"force majeure"* events. No assurance can be given that such insurance will continue to be available, or that it will be available at economically feasible premiums. Equally, there can be no assurance that operating risks and the costs associated with them will not adversely affect the results of operations or financial condition of the Enlarged Xstrata Group.

Metal processing plants are especially vulnerable to interruptions, particularly where events cause a stoppage which necessitates a shutdown in operations. Stoppages in smelting, even if lasting only a few hours, can cause the contents of furnaces to solidify, resulting in a plant closure for a significant period and necessitating expensive repairs, any of which could adversely affect the results of operations or financial condition of the Enlarged Xstrata Group.

The Enlarged Xstrata Group depends upon seaborne freight, rail, trucking, overland conveyor and other systems to deliver its commodities to market. Disruption of these transportation services because of weather-related problems, key equipment or infrastructure failures, strikes, lock-outs or other events could temporarily impair the Enlarged Xstrata Group's ability to supply its commodities to its customers and thus could adversely affect the Enlarged Xstrata Group's results of operations or financial condition. Consistent with practice in the industries in which the Enlarged Xstrata Group operates, members of the Enlarged Xstrata Group may enter into long term contracts related to, for example, infrastructure and supply of services. Any early termination of such contracts may require the payment of amounts which might have a material adverse effect on the Enlarged Xstrata Group's results of operations. In addition, the Enlarged Xstrata Group's ability to increase its export sales may be restricted by available rail infrastructure and port capacity which may adversely affect the Enlarged Xstrata Group's ability to increase turnover.

Although the Enlarged Xstrata Group maintains liability insurance, the insurance does not cover every potential risk associated with its operations and meaningful coverage at reasonable rates is not obtainable for certain types of environmental hazards. The occurrence of a significant adverse event, the risks of which are not fully covered by insurance, could have a material adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group.

Energy supply and prices

Certain of the Enlarged Xstrata Group's operations and facilities are intensive users of natural gas, electricity, oil and other fuels. The procurement dynamics of these energy types are becoming increasingly connected as supply and demand conditions become more inter-dependent on a global basis. Factors beyond the control of the Enlarged Xstrata Group, such as strong demand from the Asia-Pacific region, political, regulatory and economic uncertainties and the costs associated with emissions from fossil fuels, as well as problems related to local production and delivery conditions, continue to put upward pressure on prices. Certain of the Enlarged Xstrata Group's supply contracts are governed by standard energy risk management principles, which are designed to ensure that supply, price and credit risks are managed effectively.

The Enlarged Xstrata Group has entered into fixed-term diesel supply agreements with Glencore as described in Part I — "Description of the Enlarged Xstrata Group — Relationship with Glencore — Commercial Relationship — Coal Business of these Listing Particulars. On termination of those agreements, the Enlarged Xstrata Group will need to source its diesel requirements from Glencore or third parties. There can be no assurance that the Enlarged Xstrata Group will be able to renew its diesel supply agreements with Glencore or to source its diesel requirements on better or equivalent terms compared with its current agreements, which may have an adverse affect on the results of operations or financial condition of the Enlarged Xstrata Group. The security of energy supply is of primary importance to the Enlarged Xstrata Group. The Enlarged Xstrata Group's business operations could be adversely affected, including loss of production and damage to its plants and equipment, if, even temporarily, the supply of energy to one or more of its facilities were interrupted. Additionally, prolonged loss of supply could materially adversely affect its results of operations or financial condition. There is an increased focus within the Enlarged Xstrata Group's operations on the management of energy use and the impact of rises in energy costs on financial performance. As a significant portion of the Enlarged Xstrata Group's costs relate to energy consumption, the Enlarged Xstrata Group's earnings are directly related to fluctuations in the cost of natural gas, electricity, oil and other fuels.

Taxation

Although the Guarantor is incorporated in England and Wales, the Guarantor is regarded as resident in Switzerland, and not in the United Kingdom, for Swiss and UK tax purposes and for the purposes of the United Kingdom-Switzerland double tax treaty. This means, broadly, that the Guarantor's profits, income and gains are subject to the Swiss tax regime and not, save in the case of UK source income, to the UK tax regime. Any dividends paid by the Guarantor will be regarded as Swiss dividends rather than UK dividends.

It is possible that in the future, whether as a result of a change of law or the practice of any relevant tax authority or the renegotiation of the United Kingdom-Switzerland double tax treaty, or as a result of any change in the management or the conduct of the Guarantor's affairs, the Guarantor could become, or be regarded as having been, resident in the United Kingdom, therefore becoming subject to the UK tax regime, which could adversely affect the results of operations or financial condition of the Enlarged Xstrata Group.

Under the UK Finance Act 2006 (the "UK Finance Act"), it is possible that any future acquisitions by the Enlarged Xstrata Group could bring it within the UK controlled foreign company rules in certain circumstances, with the consequence that the Guarantor may become subject to UK tax on the income profits of certain non-UK resident subsidiaries. Future acquisitions could therefore adversely affect the results of operations or financial condition of the Enlarged Xstrata Group. However, HM Revenue & Customs ("HMRC") have provided a non-statutory letter of comfort to the Guarantor that the legislation is not intended to apply to a company such as the Guarantor and that HMRC will not regard the legislation as applying, provided that the Guarantor continues to act as the parent company of its existing group, where the Guarantor acts in the ordinary course of its business in making acquisitions of other groups or companies in the same general business sector as its existing group or carrying out significant post-acquisition refinancing or restructuring (including disposals). This legislation should not, therefore, apply in practice to the Falconbridge Acquisition, as more fully explained in the risk factor below in this Part IV — "Risk factors — Risks connected with the Falconbridge Acquisition — Taxation". In addition, none of the Cerrejón Acquisition, any post-acquisition restructuring of the Cerrejón Business, the Tintaya Acquisition or any post-acquisition restructuring of Tintaya will bring the Enlarged Group within the UK controlled foreign company rules, because neither the Cerrejón Acquisition nor the Tintaya Acquisition involved the acquisition of any UK resident company (which is a requirement for the new legislation to apply).

A number of arrangements entered into by companies in the Enlarged Xstrata Group have been structured in a tax efficient manner. Although it is anticipated that these arrangements are likely to achieve their desired effect, if any of them is successfully challenged by the relevant tax authorities, Enlarged Xstrata Group companies may incur additional tax liabilities which could adversely affect the results of operations or financial condition of the Enlarged Xstrata Group.

Reserves

The Enlarged Xstrata Group's recoverable reserves decline as the commodities are extracted. Further, the Enlarged Xstrata Group may not be able to mine all of its reserves as profitably as it does at its current operations. The Enlarged Xstrata Group's future success depends upon conducting successful exploration and development activities or acquiring properties containing economically recoverable reserves. The Enlarged Xstrata Group's current strategy includes increasing its reserve base through acquisitions of commodity-producing properties and continuing to develop the Enlarged Xstrata Group's existing properties.

The Enlarged Xstrata Group's planned development and exploration projects and acquisition activities may not result in significant additional reserves and it may not be successful in developing additional mines. In addition, in order to develop its reserves, it must receive various governmental permits. The Enlarged Xstrata Group cannot predict whether it will continue to receive the permits necessary for it to operate profitably in the future. The Enlarged Xstrata Group may not be able to negotiate economically viable mining contracts for properties containing additional reserves.

The Enlarged Xstrata Group bases its reserve information on engineering, economic and geological data assembled and analysed by its staff, which includes various engineers and geologists, and which in certain cases is periodically reviewed by third parties. The reserves estimates as to both quantity and quality are periodically updated to reflect production of commodities from the reserves and new drilling or other data received. There are numerous uncertainties inherent in estimating quantities and qualities of and costs to mine reserves, including many factors beyond the Enlarged Xstrata Group's control. Estimates of reserves necessarily depend upon a number of variable factors and assumptions, all of which may vary considerably from actual results such as:

- geological and mining conditions which may not be fully identified by available exploration data or which may differ from experience in current operations;
- historical production from the area compared with production from other similar producing areas; and
- the assumed effects of regulation and taxes by governmental agencies and assumptions concerning commodity prices, operating costs, mining technology improvements, severance and excise tax, development costs and reclamation costs.

The Enlarged Xstrata Group's reported mineral reserves are estimated quantities of proven and probable reserves and other minerals that under present and anticipated conditions can be legally and economically mined and processed, including where relevant by the extraction of their mineral content.

Whilst Falconbridge has determined and will, whilst it is listed on the TSX, continue to determine, the amount of the Falconbridge Group's mineral reserves in accordance with the requirements of the applicable Canadian securities regulatory authorities and established mining standards (which are materially similar to the standards used by the Former Xstrata Group with only minor variations), the Falconbridge Group has not to date used outside sources to verify its reserves.

The volume and grade of reserves actually recovered and rates of production from the Enlarged Xstrata Group's present mineral reserves may be less than geological measurements of the reserves. Market price fluctuations in commodities and exchange rates, and changes in operating and capital costs, may in the future render certain mineral reserves uneconomic to mine. In addition, short-term operating factors relating to the mineral reserves, such as the need for orderly development of ore bodies and other mineral resources or the processing of new or different ore grades, may cause mineral reserves to be modified or the Enlarged Xstrata Group's operations to be unprofitable in any particular fiscal period.

No assurance can be given that the indicated amount of ore or other minerals will be recovered or that it will be recovered at the prices assumed in determining reserves. Mineral reserve estimates are based on limited sampling and, consequently, are uncertain because the samples may not be representative of the entire orebody and mineral resource. As more knowledge and understanding of the orebody or mineral resource are obtained, the reserve estimates may change significantly, either positively or negatively.

For these reasons, estimates and classifications of reserves prepared by different engineers or by the same engineers at different times may vary substantially. Actual commodity tonnage recovered from identified reserves and revenue and expenditures with respect to the Enlarged Xstrata Group's reserves may vary materially from estimates. Accordingly, these reserve estimates may not accurately reflect the Enlarged Xstrata Group's actual reserves. Any inaccuracy in the estimates related to the Enlarged Xstrata Group's reserves could result in lower than expected revenue, higher than expected costs and/or decreased profitability.

Currency fluctuations

The Enlarged Xstrata Group produces and sells commodities that are typically priced in US dollars, while a large portion of the operating costs of the Enlarged Xstrata Group's business are incurred in local currencies, including the Canadian dollar, the Chilean peso, the Norwegian Kroner, the Australian dollar, the Euro, the South African Rand, the Argentine peso, the Colombian peso and the Peruvian Sol. Accordingly, the strengthening of those currencies and other local currencies in which the Enlarged Xstrata Group incurs expenditure against the US dollar has a detrimental effect on the Enlarged Xstrata Group's results of operations and financial condition.

The Enlarged Xstrata Group's operations are conducted in many countries and the results of operations and the financial condition of individual Enlarged Xstrata Group companies are reported in the relevant functional currency which, in some cases, is not the US dollar. The results for Enlarged Xstrata Group companies whose functional currency is not the US dollar have been translated into US dollars at the applicable foreign currency exchange rates for inclusion in the Former Xstrata Group's historical consolidated financial statements and the Falconbridge Group's historical consolidated financial statements and will be translated into US dollars at the applicable foreign currency exchange rates for inclusion in the Enlarged Xstrata Group's future consolidated financial statements. The exchange rates between relevant currencies other than the US dollar and the US dollar have historically fluctuated (including over the last five years), and the translation effect of such fluctuations may have a material adverse effect on the Enlarged Xstrata Group's consolidated results of operations or financial condition.

The Enlarged Xstrata Group may, from time to time, hedge a portion of its currency exposures and requirements to try to limit any adverse effect of exchange rate fluctuations on the Enlarged Xstrata Group's results of operations and financial condition, but there can be no assurance that such hedges will eliminate the potential material adverse effect of such fluctuations.

Borrowings

The Enlarged Xstrata Group has a significant amount of indebtedness, which may impair the operating and financial flexibility of the Enlarged Xstrata Group and could adversely affect the business and financial position of the Enlarged Xstrata Group and the Guarantor's ability to pay dividends and amounts due under the Guarantees.

The Enlarged Xstrata Group has a substantial amount of debt and significant debt service obligations. As at 31 August 2006, the Former Xstrata Group had unaudited gross outstanding indebtedness of US$22,997.7 million, including US$18,875.6 million of indebtedness incurred in connection with the Falconbridge Acquisition. For further information on the Former Xstrata Group's gross outstanding indebtedness as at 30 June 2006, see the 2006 Xstrata Interim Report (which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars).

For details of the debt financing arrangements in respect of the Falconbridge Acquisition, which replace the Former Xstrata Group's previous financing arrangements, see paragraph 12(i) of Part XVI — "Additional information — Material contracts" of these Listing Particulars.

For details of the Standby Equity Underwriting Letter, see paragraph 12(j) of Part XVI — "Additional information — Material contracts" of these Listing Particulars.

Whilst the proceeds of the Rights Issue will be used to reduce the Enlarged Xstrata Group's existing indebtedness and the Guarantor is committed to maintaining an investment grade credit rating, the Guarantor anticipates that the Enlarged Xstrata Group's substantial leverage will continue for the foreseeable future.

The Enlarged Xstrata Group's substantial indebtedness has important consequences for Bondholders and Shareholders. For example, it could potentially:

- cause the Enlarged Xstrata Group to dedicate a substantial portion of cash flow from operations to payments to service debt, depending on the level of borrowings, prevailing interest rates and, to a lesser extent, exchange rate fluctuations, which reduces the funds available for working capital, capital expenditure, acquisitions and other general corporate purposes;
- curtail the Guarantor's ability to pay dividends;
- curtail the Guarantor's ability to pay, pursuant to the Guarantees, principal or interest under the Bonds or the Preference Shares;
- limit the Enlarged Xstrata Group's ability to borrow additional funds for working capital, capital expenditure, acquisitions and other general corporate purposes;
- limit the Enlarged Xstrata Group's flexibility in planning for, or reacting to, changes in technology, customer demand, competitive pressures and the industries in which it operates;
- place the Enlarged Xstrata Group at a competitive disadvantage compared to its competitors that are less leveraged than it is; and
- increase the Enlarged Xstrata Group's vulnerability to both general and industry specific adverse economic conditions.

In addition, any lowering of the Guarantor's credit rating may have important consequences for Bondholders. For example, it could potentially:

- increase the margin payable under the Debt Bridge Facility, Facility A, Facility B, Facility C, Facility D and the Equity Bridge Facility;
- result in the acceleration of the repayment of a substantial portion of the Enlarged Xstrata Group's debt; and
- make it harder for the Enlarged Xstrata Group to raise funds through the capital markets.

The Guarantor's existing debt facilities contain a number of financial, operating and other obligations that limit the Enlarged Xstrata Group's operating and financial flexibility. The Enlarged Xstrata Group's ability to comply with these obligations depends on the future performance of its business.

Interest rate and counterparty risk

The Enlarged Xstrata Group's exposure to changes in interest rates results from investing and borrowing activities undertaken to manage its liquidity and capital requirements. The Enlarged Xstrata has entered into interest rate swap agreements to manage the interest rate risk associated with a portion of its fixed-rate debt. The interest rate swap changes the Enlarged Xstrata Group's exposure to interest risk by effectively converting a portion of the Enlarged Xstrata Group's fixed-rate debt to a floating rate. The Enlarged Xstrata Group may elect in the future to enter into interest rate swaps to effectively convert floating-rate debt to fixed-rate debt or to enter into additional fixed-rate to floating-rate swaps. There can be no assurance that the Enlarged Xstrata Group will not be materially adversely affected by interest rate changes in the future, notwithstanding the Enlarged Xstrata Group's use of interest rate swaps.

In addition, the Enlarged Xstrata Group's interest rate swaps, metals hedging and foreign currency and energy risk management activities expose the Enlarged Xstrata Group to the risk of default by the counterparties to such arrangements. Any such default could have a material adverse effect on the Enlarged Xstrata Group's business, financial condition and results of operations.

Integration of acquisitions

A substantial portion of the Enlarged Xstrata Group's growth in turnover and earnings has historically been generated from and, for the Enlarged Xstrata Group, will be generated from, acquisitions and investments and subsequent improvements in the performance of the businesses acquired or invested in, including in the case of the Former Xstrata Group, MIM, the Cerrejón Business, Tintaya and Falconbridge. The Guarantor expects to continue a strategy of identifying,

acquiring and investing in businesses with a view to expanding its operating businesses or diversifying into other natural resources. The Guarantor believes that acquisitions and investments will continue to be an important part of its business strategy.

There can be no assurance that the Guarantor will continue to identify suitable acquisition opportunities, obtain the financing necessary to complete and support such acquisitions or its investment or acquire businesses on satisfactory terms, or that any business acquired will prove to be profitable. In addition, acquisitions and investments involve a number of risks, including possible adverse effects on the Enlarged Xstrata Group's operating results, diversion of management's attention, failure to retain key personnel, risks associated with unanticipated events or liabilities, difficulties in the assimilation of the operations, technologies, systems, services and products of the acquired companies or investments and risks arising from change of control provisions in contracts of any acquired company. Further, the Enlarged Xstrata Group's integration strategy may also be influenced by local factors in the markets in which it has made and makes acquisitions, such as black empowerment in South Africa. Any failure to achieve successful integration of such acquisitions or joint ventures could have a material adverse effect upon the results of operations or financial condition of the Enlarged Xstrata Group.

Labour

The majority of the workforce of the Enlarged Xstrata Group is unionised. Xstrata believes that all of the Enlarged Xstrata Group's operations have, in general, good relations with their employees and unions, but the Enlarged Xstrata Group's operations in South America, South Africa, Australia, Canada and Chile have from time to time experienced limited work stoppages and other forms of industrial action in recent years. There can be no assurance that the Enlarged Xstrata Group's operations will not be affected by such problems in the future. In addition, the Enlarged Xstrata Group has been subject to union demands for pay rises and increased benefits. Furthermore, the Enlarged Xstrata Group contains operations in South America where recent strike action associated with demands for pay rises and increased benefits at operations of other industry participants has received widespread media attention. Strike action at other industry participants' operations in South America may encourage work stoppages in connection with any labour-related demands of employees or unions at the Enlarged Xstrata Group's operations in South America and/or elsewhere. There can be no assurance that work stoppages or other labour-related developments (including the introduction of new labour regulations in countries where the Enlarged Xstrata Group operates) will not adversely affect the results of operations or financial condition of the Enlarged Xstrata Group.

The majority of the workforce of the Enlarged Xstrata Group is engaged pursuant to collective employment agreements. These collective agreements are negotiated with unions and other employee representative organisations from time to time. The collective agreements establish and set the terms and conditions of employment of the employees covered by the collective agreements. The Enlarged Xstrata Group's collective agreements have differing terms of operation and expiry dates. Prior to the expiry of a collective agreement, negotiation of conditions for renewal occurs between the relevant employing entities within the Enlarged Xstrata Group and the relevant unions or other employee representative organisations. There can be no assurance that collective agreements when due to be renewed will be so renewed without work stoppages or other forms of industrial action or without additional or unforeseen costs being incurred by the Enlarged Xstrata Group.

There is a serious problem with HIV/AIDS infection of the Enlarged Xstrata Group's South African workforce, as there is in South Africa generally. The HIV/AIDS infection rate of the Enlarged Xstrata Group's South African workforce is expected to continue to increase significantly during this decade. The costs and lost workers' time associated with HIV/AIDS may continue to adversely affect the Enlarged Xstrata Group's South African results of operations or financial condition although through aggressive Antiretroviral intervention programmes underway in the Enlarged Xstrata Group's South African operations it is expected that this risk may be mitigated to a certain extent.

Key employees

The management of the Enlarged Xstrata Group's operations depends on a relatively small number of key employees. The loss of the services of certain key employees, particularly to competitors, could have a material adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group. In addition, as the Enlarged Xstrata Group's business develops and expands, the Guarantor believes that the Enlarged Xstrata Group's future success will depend on its ability to attract and retain highly skilled and qualified personnel, which is not guaranteed.

Joint ventures

Members of the Enlarged Xstrata Group hold, and expect to hold in the future, undivided interests in joint ventures.

Special risks associated with joint ventures include the possibility that the joint venture partners, which in certain cases include competitors of the Guarantor, may: (i) have economic or business interests or goals that are inconsistent with those of the Enlarged Xstrata Group; (ii) take action contrary to the Enlarged Xstrata Group's policies or objectives with respect to its investments, for instance by vetoing proposals in respect of the joint venture operations; (iii) be unable or unwilling to fulfil their obligations under the joint venture or other agreements; or (iv) experience financial or other difficulties. Any of the foregoing may have a material adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group. In addition, the termination of certain of these joint venture agreements, if not replaced on similar terms, could have a material adverse effect on the results of operations or financial condition of the Enlarged Xstrata Group.

Holding company structure, restrictions on dividends and dependence on subsidiaries

The Guarantor's results of operations and financial condition are entirely dependent on the trading performance of members of the Enlarged Xstrata Group. The Guarantor's ability to pay dividends and amounts due under guarantees (including the Bond Guarantee) will depend upon the level of distributions, if any, received from the Guarantor's operating subsidiaries and interests, any amounts received on capital raisings and asset disposals and the level of cash balances. Certain of the Guarantor's operating subsidiaries and interests may, from time to time, be subject to restrictions on their ability to make distributions to the Guarantor including as a result of restrictive covenants contained in loan agreements, foreign exchange limitations and other regulatory restrictions and agreements with the other shareholders of such subsidiaries or associated companies. There can be no assurance that such restrictions will not have a material adverse effect on the Enlarged Xstrata Group's results of operations or financial condition.

Political risk

Certain of the Enlarged Xstrata Group's activities and related assets are located in countries which may be considered to be, or may become, politically or economically unstable. Exploration or development activities in such countries may require protracted negotiations with host governments, international organisations and other third parties, including non-governmental organisations, and are frequently subject to economic and political considerations, such as taxation, nationalisation, inflation, currency fluctuations and governmental regulation and approval requirements, which could adversely affect the economics of projects. These projects and investments could be adversely affected by war, civil disturbances and activities of governments which limit or disrupt markets, restrict the movement of funds or supplies or result in the restriction of contractual rights or the taking of property without fair compensation.

The Enlarged Xstrata Group performs a thorough risk assessment on a country-by-country basis when considering its activities and attempts to conduct its business and financial affairs so as to protect against political, legal, regulatory and economic risks applicable to operations in the various countries where the Enlarged Xstrata Group operates, but there can be no assurance that the Enlarged Xstrata Group will be successful in so protecting itself. These projects and investments could also be adversely affected by changes in laws and regulations relating to foreign trade, investment and taxation.

The Enlarged Xstrata Group has significant operations in South Africa. As a result, there are important political, economic and other risks relating to South Africa which could affect an

investment in the Guarantor. Large parts of the population of South Africa do not have access to adequate education, healthcare, housing and other services, including water and electricity. South Africa has also experienced high levels of crime and unemployment in comparison with more developed countries. These problems have been among the factors that have impeded inward investment into South Africa, prompted the emigration of skilled workers and affected South Africa's growth rate negatively. While the South African government committed itself to creating a stable free market economy, it is difficult to predict the future political, social and economic direction of South Africa or how the government will try to address South Africa's challenges. It is also difficult to predict the effect on the Enlarged Xstrata Group's business of these problems or of the government's efforts to solve them.

Further, there has been political and economic instability in South Africa's neighbouring countries. If this instability were to extend into or cause similar instability in South Africa, it could have a negative impact on the Enlarged Xstrata Group's ability to manage and operate its South African operations and therefore on its results of operations or financial condition.

There are political and economic risks relating to the Enlarged Xstrata Group's operations at Alumbrera, Argentina. Argentina suffered a period of deep social and economic deterioration and political and economic instability during 2001 and a devaluation of its currency in 2002. The Enlarged Xstrata Group's operations in Argentina may be adversely affected by changes in the nature of the Argentinean government, its policies, including taxation, or the political, economic or social dynamics affecting Argentina, any or all of which may not be within the control of the Enlarged Xstrata Group.

Cerrejón operates in Colombia. As a result, there are political and other risks relating to Colombia which could affect an investment in the Enlarged Xstrata Group. Colombia has experienced several periods of criminal violence over the past four decades, primarily due to the activities of guerrilla groups and drug cartels. In response, the Colombian government has implemented various security measures and has strengthened its military and police forces by creating specialised units. Despite these efforts, drug-related crime and guerrilla activity continue to exist in Colombia. If this violence affected the operations of the Cerrejón Business, it could have an adverse affect on the Enlarged Xstrata Group's results of operations. Historically, Colombia has also experienced other political and economic instability. The Cerrejón Business may be adversely affected by any deterioration in the political, economic or security situation in Colombia, including where such factors have a direct impact on the operations of Cerrejón's mines and Cerrejón's rights to carry on its operations. There can be no assurance that such deterioration will not have a material adverse effect on the results of operations or financial condition of any or both of the Cerrejón Business and the Enlarged Xstrata Group.

The Enlarged Xstrata Group has operations in Peru. These operations may be adversely affected by changes in government policies, including taxation, changes in the ruling government or the political, economic or social matrix of factors affecting Peru, any or all of which may not be within the control of the Enlarged Xstrata Group.

The Enlarged Xstrata Group has operations in Peru and Chile. These operations may be adversely affected by changes in government policies, including taxation, changes in the ruling government or the political, economic or social matrix of factors affecting Peru and/or Chile, any or all of which may not be within the control of the Enlarged Xstrata Group.

Exchange controls

South African exchange control regulations provide for a common monetary area consisting of South Africa, Lesotho, Namibia and Swaziland (the "CMA"). Transactions between CMA residents and non-CMA residents are subject to South African exchange control regulations. The present exchange control system in South Africa is used principally to control capital movements. South African residents, including companies, are generally not permitted (other than subject to certain monetary limits and within certain parameters), without the approval of the exchange control authorities, to export capital from South Africa or to hold foreign currency or foreign investments, as restrictions are imposed on foreign investments by South African residents. It is impossible to know whether any further modifications may be made by the South African government. There can be no assurance that the expansion of existing, or imposition of new, exchange controls would not adversely affect the Enlarged Xstrata Group's results of operations or financial condition.

In 2002, Argentina imposed exchange control restrictions which required revenues from exports to be repatriated to Argentina and exchanged for Argentine pesos. However, pursuant to a decree issued on 27 February 2003, all mining companies which enjoyed "exchange control stability" between March 1991 and December 2001, which includes Minera Alumbrera Limited, a member of the Enlarged Xstrata Group, are exempt from compliance with the exchange control restrictions. There can be no assurance that Argentinean government policy in relation to this issue will not change again in the future and any change could have a material adverse effect on the Enlarged Xstrata Group's results of operations or financial condition.

Market access

Global and regional demand for metals is influenced by regulatory and voluntary initiatives to restrict or eliminate the use of certain metals in particular products or applications. Impacts of such measures can be global, creating non-tariff barriers to international trade and affecting product design and specifications on a global basis. Such measures could affect the balance between supply and demand and depress metal prices and treatment/refining charges. Metals with a limited number of major applications are most susceptible to changes in demand and price in response to such measures. Such changes in demand and price could have a material adverse effect on the Enlarged Xstrata Group's results of operations or financial condition.

Production technology

The Guarantor believes that the technology it uses to produce and process metals is significantly advanced and, in part due to high investment costs, subject only to slow technological change. However, there can be no assurance that more economical production or processing technology will not be developed or that the economic conditions in which current technology is applied will not change.

Sulphuric acid

Sulphur dioxide is a by-product from the smelting of copper, zinc, nickel and lead sulphide concentrates. The Enlarged Xstrata Group captures sulphur dioxide to limit acid rain emissions and produces sulphuric acid as a marketable by-product. Due to increasingly strict environmental standards worldwide for sulphur dioxide emissions, involuntary production of sulphuric acid by smelters is growing. The balance of world acid production is largely based on elemental sulphur, whose supply is now a by-product of oil and gas production, and growing more rapidly than demand. Long term, these factors may make it more difficult for the Enlarged Xstrata Group to obtain satisfactory prices for its sulphuric acid. However, the Enlarged Xstrata Group's production of sulphuric acid cannot be reduced in response to low prices, or dropping sales volumes, without a corresponding reduction in the Enlarged Xstrata Group's production of metals.

Raw material procurement risks

Procurement of raw materials involves the risks typically connected with commercial transactions, which can include trade barriers, political instability and problems due to local production conditions. In addition, the Enlarged Xstrata Group's supply contracts provide that suppliers of concentrate may be released from their delivery obligations to the Enlarged Xstrata Group if certain *"force majeure"* events occur. The Enlarged Xstrata Group's business operations could be adversely affected, at least temporarily, if supplies of raw materials are interrupted as a result of the imposition of trade barriers or other events and if the Enlarged Xstrata Group is unable, on short notice, to shift to alternative sources of supply.

Legal proceedings

The nature of the Enlarged Xstrata Group business subjects the Enlarged Xstrata Group to numerous regulatory investigations, claims, lawsuits and other proceedings in the ordinary course of its business. The results of these legal proceedings cannot be predicted with certainty. There can be no assurance that these matters will not have a material adverse effect on the Enlarged Xstrata Group's results of operations in any future period, and a substantial judgement could have a material adverse impact on the Enlarged Xstrata Group's business, financial condition, liquidity and results of operations.

Nothing in this paragraph headed "Legal proceedings" is intended to qualify the statement in paragraph 14 of Part XVI — "Additional Information — Litigation" of these Listing Particulars that, except as set out in that paragraph, neither the Guarantor nor any other member of the Enlarged Xstrata Group is engaged in or, so far as the Guarantor is aware, has pending or threatened, any governmental, legal or arbitration proceedings which may have, or have had in the recent past (covering the 12 months preceding the date of these Listing Particulars), a significant effect on the Guarantor and/or the Enlarged Xstrata Group's financial position or profitability.

Risks connected with the Falconbridge Acquisition

Integration of the Falconbridge Group

The integration of the Falconbridge Group's business in the Enlarged Xstrata Group involves a number of risks, including:

- the attention of the Enlarged Xstrata Group's management may be diverted away from other business concerns;
- the Enlarged Xstrata Group's management may be unable to integrate the Falconbridge Group's business in a cost-effective manner, including as a result of its commitments given in connection with securing approval for the Falconbridge Acquisition under the Investment Canada Act, as described in Part I — "Description of the Enlarged Xstrata Group — History and development of the Guarantor" of these Listing Particulars, which could result in duplication of management information and financial control systems, customer service teams and product offerings;
- there may be outstanding or unforeseen legal, regulatory, contractual, labour or other issues arising from the acquisition of the Falconbridge Group;
- the Enlarged Xstrata Group may find it difficult to effectively assimilate the business and management cultures of the Former Xstrata Group and the Falconbridge Group; and
- the Enlarged Xstrata Group may not be able to achieve the post-tax cash cost savings and other potential synergies identified prior to the Falconbridge Acquisition.

If the Former Xstrata Group fails to integrate the Falconbridge Group on a timely and cost-effective basis, the higher than expected costs and other difficulties could have a material adverse effect upon the results of operations or financial condition of the Enlarged Xstrata Group.

Taxation

Under the UK Finance Act 2006, it is possible that the Falconbridge Acquisition or any post-acquisition restructuring of the Falconbridge Group's business could bring the Enlarged Xstrata Group within the UK controlled foreign company rules in certain circumstances. This could cause the Guarantor to become subject to UK tax on the income profits of certain non-UK resident subsidiaries, which could adversely affect the results of operations or financial condition of the Enlarged Xstrata Group. However, HMRC have provided a non-statutory letter of comfort that the UK Finance Act 2006 would not apply specifically to either the Falconbridge Acquisition or post-acquisition restructuring on the basis of the information provided. HMRC have also provided a more general non-statutory letter of comfort to the Guarantor on the application of the UK Finance Act 2006, as more fully explained in the risk factor above in this Part IV — "Risk factors — Risks relating to the business of the Enlarged Xstrata Group — Taxation".

The Enlarged Xstrata Group may face risk associated with labour relations

The Guarantor is undertaking a detailed review of Falconbridge's activities to evaluate long-term performance, profitability and potential synergies for the Enlarged Xstrata Group. The Guarantor expects that benefits will accrue to the Enlarged Xstrata Group from access to pooled managerial and technical expertise, with increased opportunities for employees across the Enlarged Xstrata Group. There can be no assurance, however, that relationships with former Falconbridge Group employees at the Enlarged Xstrata Group's operations in Canada and/or elsewhere will be positive or that new collective agreements will be entered into without work interruptions. The Enlarged Xstrata Group could also be adversely affected by labour disruptions involving third parties who may provide the Enlarged Xstrata Group with goods or services at its operations in Canada and

elsewhere. Strikes and other labour disruptions at any of the Enlarged Xstrata Group's operations, or lengthy work interruptions at its existing and future development projects, could materially adversely affect the timing, completion and cost of any such project, as well as the Enlarged Xstrata Group's results of operations or financial condition.

Falconbridge may not perform in line with expectations

If the results and cash flows generated by the Falconbridge Group are not in line with the Former Xstrata Group's expectations, a write-down may be required against the carrying value of its investment in the Falconbridge Group. Such a write-down may affect the Enlarged Xstrata Group's business and may also reduce the Guarantor's ability to generate distributable reserves by the extent of the write-down, and consequently affect the Guarantor's ability to pay dividends and amounts due under the Guarantees.

Exchange rate fluctuations may increase the financing costs for the Falconbridge Acquisition and increase the consideration paid for Falconbridge as reported in Xstrata's consolidated accounts.

Exchange rate fluctuations may increase the Enlarged Xstrata Group's financing costs and increase the total consideration paid by Xstrata Canada as reported in the Enlarged Xstrata Group's accounts.

Risks relating to the Bonds and market considerations

Possible volatility of the price of Ordinary Shares

The market price for the Bonds is expected to be affected by fluctuations in the market price of the Ordinary Shares and it is impossible to predict whether the price of the Ordinary Shares will rise or fall.

The market price of Ordinary Shares could be subject to significant fluctuations due to a change in sentiment in the market regarding the Ordinary Shares (or securities similar to them), including, in particular, in response to various facts and events, including any regulatory changes affecting the Enlarged Xstrata Group's operations, variations in the Enlarged Xstrata Group's operating results and/or business developments of the Enlarged Xstrata Group and/or its competitors. Stock markets have from time to time experienced significant price and volume fluctuations that have affected the market prices for securities and which may be unrelated to the Enlarged Xstrata Group's operating performance or prospects. Furthermore, the Enlarged Xstrata Group's operating results and prospects from time to time may be below the expectations of market analysts and investors. Any of these events could result in a decline in the market price of Ordinary Shares, which may have any adverse effect on the market price of the Bonds.

Major Shareholders

As at the date of these Listing Particulars as far as the Guarantor is aware, CSSEL and Glencore International hold approximately 21.7% and 14.3%, respectively, of the issued ordinary share capital of the Guarantor. Xstrata has received an irrevocable undertaking from Glencore International to take up its full entitlement under the Rights Issue. In addition, CSSEL has agreed to transfer to Glencore International its entitlements in respect of 151,560,600 Ordinary Shares under the Rights Issue and Glencore International has irrevocably undertaken to take up in full such entitlements. As a result of these undertakings, assuming the Rights Issue completes, assuming that Glencore International takes up in full all of the entitlements that are the subject of its irrevocable undertakings, assuming that CSSEL takes up in full those of its entitlements under the Rights Issue that are not transferred to Glencore International and hence subject to Glencore International's undertaking and assuming that no exchange rights under the Glencore Exchangeable Bonds are exercised or conversion rights under the 2010 Convertible Bonds or 2017 Convertible Bonds are exercised, between 11 October 2006 (being the latest practicable date prior to the publication of these Listing Particulars) and completion of the Rights Issue, immediately following the New Shares Issue, Glencore International and CSSEL companies are expected to hold approximately 19.6% and 16.3%, respectively, of the enlarged issued ordinary share capital of Xstrata. Each of Glencore International and Credit Suisse companies are currently able to exercise a significant degree of influence over matters requiring Shareholder approval, including the approval of significant corporate transactions,

and this may have the effect of delaying, preventing or deterring a change in control of the Enlarged Xstrata Group, could deprive Shareholders of an opportunity to receive a premium for their Ordinary Shares as part of a sale of the Enlarged Xstrata Group and might affect the market price of the Ordinary Shares and/or other securities of the Enlarged Xstrata Group. In addition, any decision by any of Glencore International or the Credit Suisse companies to sell all or a portion of the Ordinary Shares held by it could adversely affect the market price of the Ordinary Shares, the Bonds and/or other securities of the Enlarged Xstrata Group.

No prior market; currency translation

Following publication of these Listing Particulars, it is intended that each Bond will be issued to Trilon International Inc., which is a subsidiary of Brookfield Asset Management Inc. There can be no assurance regarding the future development of a market for the Bonds, or the ability of holders of the Bonds to sell their Bonds, or the price at which such holders may be able to sell their Bonds. If a market for the Bonds were to develop, the Bonds could trade at prices that may be higher or lower than the initial offering price depending on many factors, including prevailing interest rates, the Guarantor's operating results and the market for similar securities. Therefore, there can be no assurance as to the liquidity of any trading market for the Bonds or that an active market for the Bonds will develop.

In addition, the Bonds, the Preference Shares and the Ordinary Shares for which the Preference Shares issued on conversion of the Bonds are exchangeable are denominated in US dollars while the Exchange Price is quoted in pounds sterling. The number of Ordinary Shares for which a Preference Share will be exchangeable will be determined by dividing the Paid-up Value of the Preference Share (translated into pounds sterling at a fixed rate of US$1.809 = £1.00) by the Exchange Price in effect on the Conversion Date and rounding down to the nearest whole number of Ordinary Shares. Accordingly, any devaluation of the pound sterling against the US dollar could have an adverse impact on the market price, in US dollar terms, of the Bonds.

Because the Global Bond is held by or on behalf of Euroclear and Clearstream, Luxembourg, investors will have to rely on their procedures for transfer, payment and communication with the Issuer and/or the Guarantor

The Bonds will be represented by the Global Bond. The Global Bond is expected to be deposited with a common depositary for Euroclear and Clearstream, Luxembourg. Except in certain limited circumstances described in the Global Bond, investors will not be entitled to receive Bonds in definitive form. Euroclear and Clearstream, Luxembourg will maintain records of the beneficial interests in the Global Bond. While the Bonds are represented by the Global Bond, investors will be able to trade their beneficial interests only through Euroclear and Clearstream, Luxembourg.

The Issuer and the Guarantor will discharge their payment obligations under the Bonds by making payments to the common depositary for Euroclear and Clearstream, Luxembourg for distribution to their account holders. A holder of a beneficial interest in a Global Bond must rely on the procedures of Euroclear and Clearstream, Luxembourg to receive payments under the Bonds. The Issuer and the Guarantor have no responsibility or liability for the records relating to, or payments made in respect of, beneficial interests in the Global Bonds.

The Bonds have a minimum denomination, and a Bondholder holding less than this minimum denomination will not receive Definitive Registered Bonds

The Bonds will be issued in principal amounts of US$100,000 and higher integral multiples of US$1,000 thereof. Definitive Bonds in registered form (the "Definitive Registered Bonds") will only be issued in certain limited circumstances. See Part VII — "Summary of the provisions relating to the Bonds in global form" of these Listing Particulars. If Definitive Registered Bonds are issued, such Bonds will be issued only in respect of principal amounts equal to or greater than US$100,000. However, Bondholders should be aware the Definitive Registered Bonds in a principal amount that is not US$100,000 may be illiquid and difficult to trade. Definitive Registered Bonds will in no circumstances be issued to any person holding Bonds in an amount lower than the minimum denomination and holders will have no rights against the Issuer or the Guarantor (including rights to receive principal or interest or to vote) in respect of such Bonds.

No tax gross-up

Neither the Issuer nor the Guarantor is obliged to make any additional payments to Bondholders in the event that any payment in respect of the Bonds or the Guarantees is required by applicable law to be withheld or deducted for taxation. None of the Issuer, the Guarantor or the Bondholders has any right to require redemption of the Bonds in the event of such a withholding or deduction. See Condition 11 in Part VI — "Terms and Conditions of the Bonds — Taxation" of these Listing Particulars.

It may not be possible to effect service of process upon the Guarantor or the Directors or enforce court judgements against the Guarantor or the Directors

Xstrata is a company incorporated in England and Wales and regarded as resident in Switzerland, and not in the United Kingdom, for Swiss and UK tax purposes and for the purposes of the United Kingdom-Switzerland double tax treaty. The Enlarged Xstrata Group's assets are located in various jurisdictions and the majority of the Enlarged Xstrata Group's assets are located in jurisdictions outside the United States. The Directors are citizens of various countries and most of the Directors are not citizens of the United States. It may not be possible to effect service of process outside England, Wales or Switzerland against the Guarantor or the Directors or to enforce the judgement of a court outside England, Wales or Switzerland against the Guarantor or the Directors. There is doubt as to the enforceability in England, Wales and Switzerland, in original actions or in actions for enforcement, of judgements of US courts or civil liabilities predicated upon US federal securities laws. There is also doubt as to the enforceability of judgements of this nature in many of the other jurisdictions in which the Enlarged Xstrata Group operates and in which its assets are situated and in the countries of which most of the Directors are citizens.

PART V — SUMMARY OF THE PRINCIPAL FEATURES OF THE BONDS

The following is a summary of the principal features of the Bonds and is qualified in its entirety by the detailed information appearing elsewhere in these Listing Particulars and, in particular, Part VI — "Terms and Conditions of the Bonds". Potential purchasers of the Bonds are urged to read these Listing Particulars in their entirety. Terms used in this summary and not otherwise defined shall have the meanings given to them in "Terms and Conditions of the Bonds".

Issuer	Xstrata Capital Corporation A.V.V., a subsidiary of the Guarantor
Guarantor	Xstrata plc.
Bonds	US$375,000,000 4.00 per cent. Guaranteed Convertible Bonds due 2017 convertible into fully paid Preference Shares of the Issuer which are guaranteed by the Guarantor and which will be exchangeable immediately upon issuance for fully paid Ordinary Shares of the Guarantor.
Issue Date	13 October 2006.
Keep-Well Agreement	The Issuer will have the benefit of a keep-well agreement (the "Keep-Well Agreement") to be entered into with the Guarantor on or around the Issue Date. The Keep-Well Agreement does not constitute a guarantee. See paragraph 12(e) of Part XVI — "Additional information — Material contracts" of these Listing Particulars.
Issue price	100 per cent. of the principal amount of the Bonds.
Interest	The Bonds will bear interest from (and including) 13 October 2006 (the "Issue Date") at a rate of 4.00 per cent. per annum payable semi-annually in arrears on 6 March and 6 September in each year. The first such payment of interest will be made on 6 March 2007 in respect of the period from (and including) the Issue Date to (but excluding) 6 March 2007.
Form and denomination	The Bonds will be represented by the Global Bond without coupons attached. The Global Bond will be exchangeable in whole but not in part for individual definitive Bonds in registered form, serially numbered in the denomination of US$100,000 and higher integral multiples of US$1,000, in certain limited circumstances only as described therein and herein. The Global Bond is expected to be deposited on or about the Issue Date with, or on behalf of, a common depositary, and registered in the name of a common nominee, for Euroclear and Clearstream, Luxembourg. Beneficial interests in the Global Bond will be shown on, and transfers thereof will be effected through, records maintained in book-entry form by Euroclear or Clearstream, Luxembourg and their respective accountholders. Ownership of beneficial interests in the Global Bond will be limited to persons that have accounts with Euroclear or Clearstream, Luxembourg or persons who hold interests through such accountholders. Ordinary Shares to be issued on exchange of the Preference Shares issued on conversion of the Bonds will be issued in uncertificated form by the Guarantor through the dematerialised securities trading system operated by CRESTCo Lim-

ited, known as CREST, unless the holder of such Bonds elects to hold the Ordinary Shares in certificated registered form or, at the time of issuance, the Ordinary Shares are not a participating security in CREST.

Final redemption

Unless previously redeemed or converted or purchased and in each case cancelled, the Bonds will be redeemed on 14 August 2017 (the "Final Maturity Date") at their principal amount together with unpaid accrued interest (if any).

Ranking of the Bonds and the Guarantees

The Bonds will constitute direct, unconditional, unsubordinated and (subject as provided in Condition 3 in Part VI — "Terms and Conditions of the Bonds — Negative Pledge" of these Listing Particulars) unsecured obligations of the Issuer and will rank *pari passu* without any preference among themselves and (subject as aforesaid and save for certain obligations required to be preferred by law) with all other unsecured and unsubordinated obligations of the Issuer from time to time outstanding.

The payment obligations of the Issuer under the Bonds and the Preference Shares will be guaranteed on a direct, unconditional, unsubordinated and (subject, in the case of the Bonds, as provided in Condition 3 in Part VI — "Terms and Conditions of the Bonds — Negative Pledge" of these Listing Particulars) unsecured basis under the Bond Guarantee and the Deed Poll, respectively and (subject as aforesaid and save for certain obligations required to be preferred by law) will rank *pari passu* with all other unsecured and unsubordinated obligations of the Guarantor from time to time outstanding.

Conversion and exchange

Each Bond will entitle the holder to convert such Bond (the "Conversion Right") into Preference Shares of the Issuer at a price equal to the Paid-up Value (as defined below) of the Preference Share at any time on or after 13 October 2006 to the close of business (at the place where the relevant Bond is deposited for conversion) on the fourteenth calendar day prior to the Final Maturity Date (both days inclusive), unless such Bond is called for redemption prior to the Final Maturity Date then up to the close of business (at the place aforesaid) on the fourteenth calendar day prior to the date fixed for redemption. See Condition 7 in Part VI — "Terms and Conditions of the Bonds — Conversion" of these Listing Particulars.

The Preference Shares will then, in turn, be exchanged immediately for Ordinary Shares in the Guarantor as described in Condition 7 in Part VI — "Terms and Conditions of the Bonds — Conversion" of these Listing Particulars.

The initial Exchange Price will be 1713.15 pence per Ordinary Share. The Exchange Price will be adjusted in accordance with the Terms and Conditions of the Bonds immediately upon the issue of the Bonds to 1527 pence per Ordinary Share as a result of events occurring after 6 September 2005 (the date of issue of the 2017 Convertible Debenture) but prior to the Issue Date. The number of Ordinary Shares for which a Preference Share will be exchangeable will be determined by dividing the Paid-up Value of the Preference Share (translated into pounds sterling at the fixed rate of

US$1.809 =£1.00) by the Exchange Price in effect on the Conversion Date (as defined below) rounding down to the nearest whole number of Ordinary Shares.

The Exchange Price will be subject to adjustment in certain circumstances, as described in Condition 7 in Part VI — "Terms and Conditions of the Bonds — Conversion" of these Listing Particulars, including upon the Guarantor making a Capital Distribution and upon a change of control of the Guarantor. See Condition 7 in Part VI — "Terms and Conditions of the Bonds — Conversion" of these Listing Particulars.

Ordinary Shares

Ordinary Shares allotted on exchange of the Preference Shares will be issued credited as fully paid having, on the Issue Date, a nominal value of US$0.50 each and will rank *pari passu* in all respects with all fully paid Ordinary Shares in issue on the relevant Conversion Date, save as provided in Condition 7.5 in Part VI — "Terms and Conditions of the Bonds — Conversion — Ordinary Shares" of these Listing Particulars.

Preference Shares

Series 4 Preference Shares of the Issuer having, on the Issue Date, a nominal value of US$0.50 each, will be issued upon conversion of the Bonds at a premium of US$999.50 credited as fully paid at US$1,000 per Preference Share.

Redemption at the option of the Issuer

On giving not less than 30 nor more than 90 calendar days' notice to the Trustee and the Bondholders, the Issuer:

(i) may at any time on or after 14 August 2010, redeem all, but not some only, of the Bonds for the time being outstanding at their principal amount together with interest accrued to the date fixed for redemption; or

(ii) may, at any time, redeem all, but not some only, of the Bonds for the time being outstanding at their principal amount together with interest accrued to the date fixed for redemption if, prior to the date of such notice, Conversion Rights shall have been exercised and/or purchases (and corresponding cancellations) have been effected in respect of 85 per cent. or more in principal amount of the Bonds originally issued.

See Condition 8.2 in Part VI — "Terms and Conditions of the Bonds — Redemption and Purchase, Redemption at the Option of the Issuer" of these Listing Particulars.

Withholding taxes / No tax gross up

Payments in respect of the Bonds will be made subject to such withholding or deduction for or on account of taxes as required by law. Neither the Issuer nor the Guarantor will be required to pay any additional or further amounts to Bondholders in respect of any such withholding or deduction. See Condition 11 in Part VI — "Terms and Conditions of the Bonds — Taxation" of these Listing Particulars.

Events of Default

For a description of certain events that will permit acceleration of the Bonds, see Condition 10 in Part VI — "Terms and Conditions of the Bonds — Events of Default" of these Listing Particulars. Upon acceleration for any such event, the Bonds will become immediately due and repayable at their

	principal amount together with unpaid accrued interest (if any).
Negative pledge	The Bonds will have the benefit of a negative pledge. See Condition 3 in Part VI — "Terms and Conditions of the Bonds — Negative Pledge" of these Listing Particulars.
Cross default	The Bonds will have the benefit of a cross default. See Condition 10 in Part VI — "Terms and Conditions of the Bonds — Events of Default" of these Listing Particulars.
Certain covenants	The Issuer will issue the Bonds pursuant to the terms of a Trust Deed to be entered into by the Issuer, the Guarantor and Law Debenture Trustees Limited, as Trustee. The Trust Deed will prohibit the Guarantor from amending the terms of the Deed Poll without the consent of the Trustee or the approval of an Extraordinary Resolution (as defined in the Trust Deed) of Bondholders and will contain certain other covenants.
Governing law	The Trust Deed, the Bonds, the Deed Poll and the Keep-Well Agreement will be governed by, and construed in accordance with, the laws of England.
Trustee	Law Debenture Trustees Limited
Principal Paying, Transfer, Conversion and Exchange Agent	Citibank, N.A.
Registrar	Citigroup Global Markets Deutschland AG & Co. KGaA
Sales restrictions	There are restrictions on offers and sales of the Bonds, the Preference Shares and the Ordinary Shares, *inter alia*, in the United States, the United Kingdom and Aruba. See paragraph 18 of Part XVI — "Additional information — Securities law considerations" of these Listing Particulars.
Listing and trading	Application has been made to the Financial Services Authority for the Bonds to be admitted to the Official List and to the London Stock Exchange for the Bonds to be admitted to trading on the Professional Securities Market of the London Stock Exchange. The Ordinary Shares are listed on the Official List and trade on the London Stock Exchange's market for listed securities under the symbol "XTA". The Ordinary Shares are also listed on SWX Swiss Exchange under the symbol "XTAN". The Preference Shares will not be listed on any stock exchange.
ISIN	XS0267908324
Common code	026790832
Use of proceeds	Following the publication of these Listing Particulars, it is intended that each Bond will be issued to Trilon International Inc., (a subsidiary of Brookfield) in consideration for the cancellation of the US$375,000,000 4.00%, Guaranteed Convertible Debenture due 2017 issued by the Issuer on 6 September 2005, the waiver of all rights Trilon International Inc. has under such Debenture and the Debenture Deed Poll, and the release of the Issuer and the Guarantor from each of their respective obligations under such Debenture and the Debenture Deed Poll.

PART VI — TERMS AND CONDITIONS OF THE BONDS

The following, subject to completion and amendment and save for the paragraphs in italics, are the terms and conditions of the Bonds which will be incorporated by reference into the Global Bond and will be endorsed on each Bond in definitive form (if issued):

The Bonds are constituted by a trust deed expected to be dated 13 October 2006 (the "Trust Deed") between the Issuer, the Guarantor and Law Debenture Trustees Limited (the "Trustee", which expression shall include all persons for the time being the trustee or trustees under the Trust Deed) as trustee for the holders of the Bonds. The issue of the Bonds was authorised pursuant to a resolution of the Managing Director of the Issuer passed on 6 October 2006 (the "Issuer Board Resolution") and the giving of the Bond Guarantee was authorised by a resolution of the Board of Directors of the Guarantor passed on 27 July 2006 and a resolution of a committee of the Board of Directors of the Guarantor passed on 26 September 2006. The statements in these terms and conditions (the "Conditions") include summaries of, and are subject to, the detailed provisions of the Trust Deed, which includes the form of the Bonds. Copies of the Trust Deed, the paying, transfer, conversion and exchange agency agreement expected to be dated 13 October 2006 (the "Agency Agreement") relating to the Bonds between the Issuer, the Guarantor, the Trustee and Citibank, N.A. (the "Principal Paying, Transfer, Conversion and Exchange Agent", which expression shall include any successor as principal paying, transfer, conversion and exchange agent under the Agency Agreement) and the paying, transfer, conversion and exchange agents for the time being (such parties, together with the Principal Paying, Transfer, Conversion and Exchange Agent, being referred to as the "Paying, Transfer, Conversion and Exchange Agents", which expression shall include their successors as paying, transfer, conversion and exchange agents under the Agency Agreement) and Citigroup Global Markets Deutschland AG & Co. KGaA in its capacity as registrar (the "Registrar", which expression shall include any successor as registrar under the Agency Agreement), an English language translation of the Articles of Association of the Issuer (the "Articles of the Issuer"), the Issuer Board Resolution and the deed poll (the "Deed Poll") expected to be executed and delivered by the Guarantor on 13 October 2006 are available for inspection during normal business hours by Bondholders at the registered office of the Trustee, being at the date hereof at Fifth Floor, 100 Wood Street, London, EC2V 7EX. Bondholders are entitled to the benefit of, are bound by and are deemed to have notice of, all the provisions of the Trust Deed and are deemed to have notice of all the provisions of the Agency Agreement, the Articles of the Issuer and the Issuer Board Resolution that are applicable to them. Only holders of Preference Shares (as defined below) will have the benefit of the Deed Poll.

The Bonds are convertible into fully paid Series 4 4.00 per cent. exchangeable redeemable preference shares in the Issuer (the "Preference Shares") having a paid-up value (the "Paid-up Value") of US$1,000 each comprising a nominal value of US$0.50 and a premium of US$999.50. Payments in respect of the Preference Shares are guaranteed by the Guarantor pursuant to the Deed Poll. The Preference Shares will be issued subject to, and in accordance with, these Conditions, the Articles of the Issuer and the Issuer Board Resolution.

The Preference Shares will, following their issue, immediately be exchanged for fully paid ordinary shares in the Guarantor (the "Ordinary Shares") having at the date hereof a nominal value of US$0.50 each, in accordance with these Conditions, the provisions of the Articles of the Issuer, the Issuer Board Resolution and the Deed Poll. The price at which any such exchange will be made (the "Exchange Price") will, subject to adjustment in certain circumstances as set out in the Issuer Board Resolution, be 1713.15 pence per Ordinary Share. The number of Ordinary Shares for which a Preference Share will be exchangeable will be determined by dividing the Paid-up Value (translated into pounds sterling at the fixed rate of US$1.809 = £1.00) by the Exchange Price in effect on the Conversion Date (as defined in Condition 7.2).

Words and expressions not otherwise defined in the Conditions shall have the meaning given to them in Condition 22 or in the Trust Deed, unless the context otherwise requires.

1. Form, Denomination and Title

1.1 Form and Denomination

The Bonds will be issued in registered form only in the Authorised Denominations without coupons attached and represented by a global Bond in registered form (the "Global Bond"). The Global Bond will be exchangeable in limited circumstances into definitive Bonds in registered form only in Authorised Denominations, serially numbered.

1.2 Bonds in definitive form

Bonds in definitive form will be issued only upon exchange of interests in the Global Bond as described in the Global Bond.

The Bonds are not issuable in bearer form.

1.3 Title

Title to the Bonds will pass by transfer and registration as described in Conditions 4 and 5. The Holder (as defined below) of any Bond will (except as otherwise required by law or as ordered by a court of competent jurisdiction) be treated as its absolute owner for all purposes (whether or not it is overdue and regardless of any notice of ownership, trust or any interest in it or its theft or loss (or that of the related certificate, as appropriate) or anything written on it or on the certificate representing it (other than a duly executed transfer thereof)) and no person will be liable for so treating the Holder. In these Conditions, "Bondholder" and "Holder" means the person in whose name a Bond is registered in the Register.

The Global Bond is expected to be deposited on or about the Issue Date with, or on behalf of, a common depositary for, and registered in the name of a common nominee for, Euroclear Bank S.A./N.V., as operator of the Euroclear system ("Euroclear") and Clearstream Banking, société anonyme ("Clearstream, Luxembourg"). Beneficial interests in the Global Bond will be shown on, and transfers thereof will be effected only through, records maintained in a book-entry form by Euroclear and Clearstream, Luxembourg in accordance with the applicable procedures of Euroclear and Clearstream, Luxembourg. Ownership of beneficial interests in the Global Bond will be limited to persons who maintain accounts with Euroclear and Clearstream, Luxembourg or persons who hold interests through such persons.

Interests in the Global Bond will be exchangeable in whole but not in part (free of charge to the holder) for individual definitive Bonds (which will be in registered form) in certain limited circumstances only that are described therein. Interests in the Global Bond are exchangeable in whole but not in part for individual definitive Bonds if and only if (i) Euroclear or Clearstream, Luxembourg (or any alternative clearing system on behalf of which the Global Bond may be held) is closed for business for a continuous period of 14 calendar days or more (other than by reason of legal holidays) or announces an intention permanently to cease business or does in fact do so, or (ii) the Trustee gives written notice to the Issuer and the Guarantor pursuant to Condition 10 that the Bonds are due and repayable. Any Bonds issued in exchange for beneficial interests in the Global Bond will be issued to and delivered to such persons or registered in such name or names, as the case may be, as the holder of the Global Bond shall instruct the Principal Paying, Transfer, Conversion and Exchange Agent and/or the Registrar. It is expected that such instructions will be based upon directions received by Euroclear and Clearstream, Luxembourg from accountholders with respect to ownership of beneficial interests in the Global Bond. Notice of the issue of definitive Bonds in the circumstances set out in (i) or (ii) above will be given promptly by the Guarantor to the Bondholders in accordance with Condition 17.

2. Status

2.1 The Bonds

The Bonds constitute direct, unconditional, unsubordinated and (subject to the provisions of Condition 3) unsecured obligations of the Issuer and rank *pari passu* without any preference among themselves and (subject as aforesaid and save for certain obligations required to be preferred by law) with all other unsecured and unsubordinated obligations of the Issuer from time to time outstanding.

2.2 The Bond Guarantee

The payment of all amounts payable in respect of the Bonds and all other moneys payable under or pursuant to the Trust Deed has been unconditionally and irrevocably guaranteed by the Guarantor in the Trust Deed (the "Bond Guarantee"). The obligations of the Guarantor under the Bond Guarantee are direct, unconditional, unsubordinated and (subject to the provisions of Condition 3) unsecured obligations of the Guarantor and (subject as aforesaid and save for certain obligations required to be preferred by law) rank *pari passu* with all other unsecured and unsubordinated obligations of the Guarantor from time to time outstanding.

3. Negative Pledge

So long as any of the Bonds remain outstanding (as defined in the Trust Deed) each of the Issuer and the Guarantor will ensure that no Relevant Indebtedness of the Issuer or the Guarantor will be secured by any Security Interest upon, or with respect to, the whole or any part of the present or future business, undertaking, assets or revenues (including any uncalled capital) of the Issuer or the Guarantor unless the Issuer or, as the case may be, the Guarantor shall, in the case of the creation of a Security Interest, before or at the same time and, in any other case, promptly take any and all action necessary to ensure that:

(a) all amounts payable by the Issuer under the Bonds and the Trust Deed or, as the case may be, by the Guarantor under the Bond Guarantee are secured by the Security Interest equally and rateably with the Relevant Indebtedness to the satisfaction of the Trustee; or

(b) such other Security Interest or other arrangement (whether or not it includes the giving of a Security Interest) is provided in favour of the Bondholders in respect of all amounts payable by the Issuer under the Bonds and the Trust Deed or, as the case may be, by the Guarantor under the Bond Guarantee, either (i) as the Trustee shall in its absolute discretion deem not materially less beneficial to the interests of the Bondholders, or (ii) as shall be approved by an Extraordinary Resolution (as defined in the Trust Deed) of the Bondholders.

4. Registration

The Issuer will cause a register (the "Register") to be kept at the specified office of the Registrar on which will be entered the names and addresses of the holders of the Bonds and the particulars of the Bonds held by them and of all transfers, redemptions and conversions of Bonds. Holders of Bonds will be entitled to receive only one Bond in respect of their entire holding.

5. Transfer of Bonds

5.1 Transfer

Bonds may, subject to the terms of the Agency Agreement and to Conditions 5.2 and 5.3, be transferred in whole or in part in an Authorised Denomination by lodging the relevant Bond (with the form of application for transfer in respect thereof duly executed and duly stamped where applicable) at the specified office of the Registrar or any Paying, Transfer, Conversion and Exchange Agent.

No transfer of a Bond will be valid unless and until entered on the Register. A Bond may be registered only in the name of, and transferred only to, a named person (or persons, not exceeding four in number).

The Registrar will, within seven Business Days (as defined below) of the date of lodging of any duly made application for the transfer of a Bond in the place of the specified office of the Registrar or any Paying, Transfer, Conversion and Exchange Agent, deliver a new Bond to the transferee (and, in the case of a transfer of part only of a Bond, deliver a Bond for the untransferred balance to the transferor) at the specified office of the Registrar, or (at the risk and, if mailed at the request of the transferee or, as the case may be, the transferor otherwise than by ordinary mail, at the expense of the transferee or, as the case may be, the transferor) mail the Bond by uninsured mail to such address as the transferee or, as the case may be, the transferor may request.

5.2 Formalities Free of Charge

Any such transfer as aforesaid will be effected without charge subject to (i) the person making such application for transfer paying or procuring the payment of any taxes, duties and other governmental charges in connection therewith, *(ii)* the Registrar being satisfied with the documents of title and/or identity of the person making the application, and *(iii)* such other reasonable requirements as the Issuer may from time to time agree with the Registrar and the Trustee. The exchange of interests in the Global Bond for definitive Bonds will be subject to the provisions of all applicable fiscal or other laws and regulations in effect at the time of such exchange.

5.3 Closed Periods

Neither the Issuer nor the Registrar will be required to register the transfer of any Bond (or part thereof) (i) during the period of 15 calendar days immediately prior to the Final Maturity Date or any earlier date fixed for redemption of the Bonds pursuant to Condition 8.2, or (ii) during the period of 15 calendar days ending on (and including) any Record Date (as defined in Condition 9.3) in respect of any payment of interest on the Bonds, or (iii) in respect of which a Conversion Notice (as defined in Condition 7.2) has been delivered in accordance with Condition 7.2.

5.4 Business Days

In these Conditions, "Business Day" means a day (other than a Saturday or Sunday) on which commercial banks are open for business in the relevant place.

6. Interest Payments

6.1 Interest Rate

The Bonds bear interest from (and including) the Issue Date at the rate of 4.00 per cent. per annum calculated by reference to the principal amount thereof (subject to the withholding or deduction of any taxation required by law to be withheld or deducted at source) payable semi-annually in arrears in equal instalments (other than the first instalment) on 6 March and 6 September in each year (each an "Interest Payment Date"). The first such payment of interest will be made on 6 March 2007 in respect of the period from (and including) the Issue Date to (but excluding) 6 March 2007 (the "First Interest Payment Date"). The amount of interest payable in respect of each Bond for any period which is not an Interest Period (which, for the avoidance of doubt, shall include the period from (and including) 6 March 2017 to (but excluding) 14 August 2017) shall be calculated on the basis of a 360 day year consisting of 12 months of 30 days each and, in the case of an incomplete month, the number of days elapsed, where "Interest Period" means the period beginning on (and including) the First Interest Payment Date and ending on (but excluding) the next succeeding Interest Payment Date and each successive period beginning on (and including) an Interest Payment Date and ending on (but excluding) the next succeeding Interest Payment Date.

6.2 Accrual of Interest

Each Bond will cease to bear interest (i) where the Conversion Right attached to it shall have been exercised, or the Trustee shall have exercised its rights of conversion with respect to it pursuant to Condition 7.3, from (and including) the Interest Payment Date immediately preceding the relevant Conversion Date or, if none, the Issue Date, (subject in any such case as specified in Condition 7.4 and as provided in the Articles of the Issuer and the Issuer Board Resolution) or (ii) where such Bond is redeemed or repaid pursuant to Condition 8 or Condition 10, from (and including) the due date for redemption unless, upon due presentation, payment of the full amount due is improperly withheld or refused, in which event such Bond shall continue to bear interest at the applicable rate (both before and after judgment) as provided in the Trust Deed, until (but excluding) whichever is the earlier of (1) the day on which all sums and/or Ordinary Shares due in respect of such Bonds up to that day are received by or on behalf of the relevant holder, and (2) the day which is seven calendar days after that on which the Trustee or the Principal Paying, Transfer, Conversion and Exchange Agent has notified the Bondholders of receipt of all sums and/or Ordinary Shares due in respect of all the Bonds up to such seventh calendar day.

7. Conversion

7.1 Conversion Right

The holder of each Bond shall have the right (the "Conversion Right") to convert ("conversion") each US$1,000 principal amount of a Bond into one fully-paid Preference Share allotted at a price equal to the Paid-up Value and to require the Issuer forthwith to procure that such Preference Share be exchanged immediately, pursuant to the Articles of the Issuer, the Issuer Board Resolution and the terms and conditions of the Deed Poll and as provided in these Conditions, for Ordinary Shares of the Guarantor, having at the Issue Date a nominal value of US$0.50 each, issued and credited as fully paid, at any time on or after 13 October 2006 to the close of business (at the place where the relevant Bond is deposited for conversion) on the fourteenth calendar day prior to the Final Maturity Date (both days inclusive) or, if such Bond shall have been called for redemption pursuant to Condition 8.2 prior to the Final Maturity Date, then up to the close of business (at the place aforesaid) on the fourteenth calendar day prior to the date fixed for redemption thereof unless, in any such case, there shall be default in making payment in respect of such Bond on any such date fixed for redemption, in which event the Conversion Right shall extend (unless the Trustee shall have already exercised the relevant rights of conversion pursuant to Condition 7.3) up to the close of business (at the place aforesaid) on the date on which the full amount of such payment becomes available for payment and notice of such availability has been duly given in accordance with Condition 17 or, if earlier, the Final Maturity Date; provided that in each case if the final such date for the exercise of Conversion Rights is not a Business Day in such place, then the right to exercise Conversion Rights shall end on the immediately preceding Business Day in such place.

Conversion Rights may not be exercised following the giving of notice by the Trustee pursuant to Condition 10.

A Conversion Right may only be exercised in respect of an Authorised Denomination. Where a Conversion Right is exercised in respect of part only of a Bond, the old Bond shall be cancelled and a new Bond for the balance thereof shall be issued in lieu thereof without charge but upon payment by the holder of any taxes, duties and other governmental charges payable in connection therewith and the Registrar will within seven Business Days following the relevant Conversion Date deliver such new Bond to the Bondholder at the specified office of the Registrar, or (at the risk and, if mailed at the request of the Bondholder otherwise than by ordinary mail, at the expense of the Bondholder) mail the new Bond by uninsured mail to such address as the Bondholder may request.

Without prejudice to Condition 7.3, a Conversion Right may not be exercised by a Bondholder in circumstances where the relevant Conversion Date would fall during the period commencing on the Record Date in respect of any payment of interest on the Bonds and ending on the relevant Interest Payment Date (both days inclusive).

By exercising a Conversion Right, a Bondholder (or, in the case of the exercise of Conversion Rights by the Trustee pursuant to Condition 7.3, the Trustee) will be deemed, subject to and in accordance with the Articles of the Issuer and the Issuer Board Resolution, to have made a Share Exchange Call applicable to the Preference Shares arising on the exercise of such Conversion Right, and the Issuer will procure that such Preference Shares are immediately, following issue of such Preference Shares to the Bondholder or his nominee (or to the Trustee or as the Trustee directs, as the case may be), exchanged, in accordance with the Articles of the Issuer and the Issuer Board Resolution, for Ordinary Shares as at the relevant Conversion Date (without any further action being required to be taken by any Bondholder or the Trustee). Each of the Issuer and the Guarantor is entitled (at its own expense) to do all such things and make all such entries in the Issuer's and the Guarantor's respective register of members and execute all such documents, whether on behalf of the relevant Bondholders or otherwise, (including the execution of such instruments to transfer on behalf of the relevant Bondholders) as may be necessary to effect such exchange of Preference Shares for Ordinary Shares.

Provisions as to Share Exchange

The following is a summary of the provisions of the Preference Shares relating to Share Exchange Calls as contained in the Articles of the Issuer and the Issuer Board Resolution. The Articles of the Issuer and the Issuer Board Resolution are separate from and, for the avoidance of doubt, do not form part of, these Listing Particulars.

(A) *The number of Ordinary Shares which the Issuer is required to procure are issued on the making of a Share Exchange Call shall be determined by dividing the Paid-up Value of the relevant Preference Shares (which shall be US$1,000 per Preference Share translated into pounds sterling at the fixed rate of US$1.809=£1.00) by the exchange price (the "Exchange Price") in effect on the relevant Conversion Date. The initial Exchange Price is 1713.15 pence per Ordinary Share and the Exchange Price shall thereafter be subject to adjustment in the circumstances described in the Issuer Board Resolution as summarised in paragraph (B) below. Fractions of Ordinary Shares will not be issued on exchange and no cash adjustment will be made. However, if a Share Exchange Call in respect of more than one Preference Share is exercised at any one time, the number of such Ordinary Shares to be issued in respect thereof shall be calculated on the basis of the aggregate Paid-up Value of such Preference Shares being so exchanged (rounded down to the nearest whole number). Where the Trustee shall have exercised its rights pursuant to Condition 7.3 of the Bonds, all relevant Bonds and Preference Shares shall, for the purpose of the immediately preceding sentence, be deemed to be held by one person. Ordinary Shares to be issued on exchange will be deemed to be registered as of the relevant Conversion Date in the name of the holder of the relevant Preference Shares or his nominee or, where they are to be issued to the Trustee pursuant to Condition 7.3 of the Bonds, the Trustee or its nominee on behalf of the relevant Bondholders.*

(B) ***Adjustments to the Exchange Price***

If on or after 6 September 2005 any of the events described below has occurred or does occur, the Exchange Price will be adjusted in relation to subsequent exchanges of Preference Shares as follows:

(i) *Consolidation, Reclassification or Subdivision: If and whenever there shall be an alteration to the nominal value of the Ordinary Shares as a result of consolidation, reclassification or subdivision, the Exchange Price shall be adjusted by multiplying the Exchange Price in force immediately prior to such alteration by the following fraction:*

$$\frac{A}{B}$$

where:

A is the nominal amount of one Ordinary Share immediately after such alteration; and

B is the nominal amount of one Ordinary Share immediately before such alteration.

Such adjustment shall become effective on the date the alteration takes effect.

(ii) *Capitalisation of Profits or Reserves: If and whenever the Guarantor shall issue any Ordinary Shares credited as fully paid to the holders of Ordinary Shares ("Shareholders") by way of capitalisation of profits or reserves (including any share premium account or capital redemption reserve) other than Ordinary Shares issued instead of the whole or any part of a cash dividend which the Shareholders would or could otherwise have received, the Exchange Price shall be adjusted by multiplying the Exchange Price in force immediately prior to such issue by the following fraction:*

$$\frac{A}{B}$$

where:

A is the aggregate nominal amount of the issued Ordinary Shares immediately before such issue; and B is the aggregate nominal amount of the issued Ordinary Shares immediately after such issue.

Such adjustment shall become effective on the date of issue of such Ordinary Shares.

(iii) *Capital Distribution: If and whenever the Guarantor shall pay or make any Capital Distribution (as defined below) to Shareholders, the Exchange Price shall be adjusted*

by multiplying the Exchange Price in force immediately prior to such Capital Distribution by the following fraction:

$$\frac{A - B}{A}$$

where:

A is the Current Market Price (as defined below) of one Ordinary Share on the dealing day immediately preceding the date on which the Ordinary Shares are traded on the Relevant Stock Exchange (as defined below) ex- the relevant Capital Distribution; and

B is the portion of the Fair Market Value (as defined below) (as determined as at the date of announcement of the relevant Dividend) of the Capital Distribution attributable to one Ordinary Share, with such portion being determined by dividing the Fair Market Value of the aggregate Capital Distribution by the number of Ordinary Shares entitled to receive the relevant Dividend (or, in the case of a purchase of Ordinary Shares by or on behalf of the Issuer, by the number of Ordinary Shares issued and outstanding immediately prior to such purchase).

Such adjustment shall become effective on the date on which such Capital Distribution is made.

As used herein:

"Capital Distribution" means any Dividend which is, or to the extent determined to be, a capital distribution in accordance with the following formula:

$$E = A + B - C$$

where:

A is the Fair Market Value of the relevant Dividend ("Dividend A") (such Fair Market Value being determined as at the date of announcement of Dividend A);

B is the Fair Market Value of all other Dividends (other than any Dividend or portion thereof which was or was previously determined to be a Capital Distribution) made in respect of the same fiscal year as Dividend A ("Fiscal Year A") (such Fair Market Value being determined in each case as at the date of announcement of the relevant Dividend);

C is equal to 120 per cent. of the highest Fair Market Value of all Dividends (other than any Dividend or portion thereof which was or was previously determined to be a Capital Distribution) made in respect of a fiscal year (such Fair Market Value being determined, in each case, as at the date of announcement of the relevant Dividend), provided that C shall never be less than US$171,000,000 converted into pounds sterling at the weighted average rate of exchange used to determine Dividend A and each of the other Dividends made in Fiscal Year A, if any such determination was required to be made; and

E is the Capital Distribution (provided that, if E is zero or a negative number, the Capital Distribution shall be deemed to be zero).

"Dividend" means any dividend or distribution, whether of cash, assets or other property, and whenever paid or made and however described (and for these purposes a distribution of assets includes without limitation an issue of shares or other securities credited as fully or partly paid up), provided that:

(a) where a cash Dividend is announced which is to be, or may at the election of a holder or holders of Ordinary Shares be, satisfied by the issue or delivery of Ordinary Shares or other property or assets, then the Dividend in question shall be treated as a Dividend of (i) the cash Dividend so announced, or (ii) the Fair Market Value, on the date of announcement of such Dividend, of the Ordinary Shares or other property or assets to be issued or delivered in satisfaction of such Dividend (or which would be issued if all holders of Ordinary Shares elected therefor, regardless of whether any such election is made) if the Fair Market Value of such Ordinary Shares or other property or assets is greater than the cash Dividend so announced;

(b) for the purposes of the definition of Capital Distribution, any issue of Ordinary Shares falling within paragraph (B)(ii) shall be disregarded;

(c) a purchase or redemption of share capital by the Guarantor shall not constitute a Dividend unless, in the case of purchases of Ordinary Shares, the weighted average price (before expenses) on any one day in respect of such purchases exceeds by more than 5 per cent. the closing price of the Ordinary Shares on the Relevant Stock Exchange as derived from, or published by, the Relevant Stock Exchange at the opening of business either (1) on that date, or (2) where an announcement (excluding for the avoidance of doubt for these purposes any general authority for such purchases or redemptions approved by a general meeting of Shareholders or any meeting convening such a meeting of Shareholders) has been made of the intention to purchase Ordinary Shares at some future date at a specified price, on the dealing day immediately preceding the date of such announcement and, if in the case of either (1) or (2), the relevant day is not a dealing day, the immediately preceding dealing day, in which case such purchase shall be deemed to constitute a Dividend to the extent that the aggregate price paid (before expenses) in respect of such Ordinary Shares purchased by the Guarantor exceeds the product of (aa) 105 per cent. of the closing price of the Ordinary Shares determined as aforesaid, and (bb) the number of Ordinary Shares purchased by the Guarantor; and

(d) in making any such calculation, such adjustments (if any) shall be made as are determined by an Independent Financial Adviser to be appropriate to reflect any division or subdivision of the Ordinary Shares or any issue of Ordinary Shares by way of capitalisation of profits or reserves.

"Fair Market Value" means, with respect to any property on any date, the fair market value of that property as determined by an Independent Financial Adviser, provided that (1) the fair market value of a cash Dividend paid or to be paid shall be the amount of such cash Dividend; (2) where options, warrants or other rights are publicly traded in a market of adequate liquidity as determined by an Independent Financial Adviser, the fair market value of such options, warrants or other rights shall equal the arithmetic mean of the daily closing prices of such options, warrants or other rights during the period of five dealing days on the relevant market commencing on the first such trading day such options, warrants or other rights are publicly traded, or such shorter period as such options, warrants or other rights are publicly traded; (3) where options, warrants or other rights are not publicly traded (as aforesaid), the fair market value of such options, warrants or other rights will be as determined by an Independent Financial Adviser on the basis of a commonly accepted market valuation method and taking account of such factors as it considers appropriate, including the market price per Ordinary Share, the dividend yield of an Ordinary Share, the volatility of such market price, prevailing interest rates and the terms of such options, warrants or other rights, including as to the expiry date and exercise price (if any) thereof, and (4) in the case of (1) converted into pounds sterling (if declared or paid in a currency other than pounds sterling) at the rate of exchange used to determine the amount payable to Shareholders who were paid or are to be paid the cash Dividend in pounds sterling; and in the absence of such a stated rate of exchange and in the case of (2) and (3) converted into pounds sterling (if expressed in a currency other than pounds sterling) at such rate of exchange as determined by an Independent Financial Adviser to be the spot rate at the close of business on that date (or if no such rate is available on that date the equivalent rate on the immediately preceding date on which such a rate is available); provided that for the purposes of determining Fair Market Value under paragraph (B)(v), references in this definition to options, warrants or other rights shall be deemed to be to the entitlement to such options, warrants or other rights as the case may be;

"Independent Financial Adviser" means an investment bank, bank or financial adviser of international repute appointed by the Guarantor for the relevant purpose and approved in writing by the Trustee (such approval not to be unreasonably withheld or delayed having regard to the interests of Bondholders) and acting as an expert or, if the Guarantor shall not have appointed such an adviser within 21 calendar days after becoming aware of the

need for such appointment hereunder and the Trustee is indemnified to its satisfaction against the costs, fees and expenses of such adviser, appointed by the Trustee following notification to the Guarantor; and

"Relevant Stock Exchange" means at any time, in respect of the Ordinary Shares, the Official List of the United Kingdom Financial Services Authority in its capacity as competent authority under the Financial Services and Markets Act 2000 and/or, as the context requires, the market for listed securities of London Stock Exchange plc (or any successor thereto) or, if the Ordinary Shares are not at that time so listed, the principal stock exchange or securities market on which the Ordinary Shares are then listed or quoted or dealt in.

(iv) *Rights Issues of Ordinary Shares or Options over Ordinary Shares: If and whenever the Guarantor shall issue Ordinary Shares to Shareholders as a class by way of rights, or issue or grant to Shareholders as a class by way of rights, options, warrants or other rights to subscribe for or purchase or otherwise acquire any Ordinary Shares, in each case at a price per Ordinary Share which is less than 95 per cent. of the Current Market Price (as defined below) per Ordinary Share on the dealing day immediately preceding the date of the announcement of the terms of the issue or grant of such Ordinary Shares, options, warrants or other rights, the Exchange Price shall be adjusted by multiplying the Exchange Price in force immediately prior to such issue or grant by the following fraction:*

$$\frac{A + B}{A + C}$$

where:

A is the number of Ordinary Shares in issue immediately before such announcement;

B is the number of Ordinary Shares which the aggregate amount (if any) payable for the Ordinary Shares issued by way of rights, or for the options or warrants or other rights issued by way of rights and for the total number of Ordinary Shares deliverable on the exercise thereof would purchase at such Current Market Price per Ordinary Share; and

C is the number of Ordinary Shares issued or, as the case may be, deliverable on the exercise of such options, warrants or other rights.

Such adjustment shall become effective on the first date on which the Ordinary Shares are traded ex-rights, ex-options or ex-warrants on the Relevant Stock Exchange.

(v) *Rights Issues of other Securities: If and whenever the Guarantor shall issue any securities (other than Ordinary Shares or options, warrants or other rights to subscribe for or purchase or otherwise acquire any Ordinary Shares) to Shareholders as a class by way of rights, or grant to Shareholders as a class by way of rights, any options, warrants or other rights to subscribe for or purchase or otherwise acquire any securities (other than Ordinary Shares or options, warrants or other rights to subscribe for or purchase or otherwise acquire any Ordinary Shares), the Exchange Price shall be adjusted by multiplying the Exchange Price in force immediately prior to such issue or grant by the following fraction:*

$$\frac{A - B}{A}$$

where:

A is the Current Market Price of one Ordinary Share on the dealing day immediately preceding the date on which the terms of such issue or grant are publicly announced; and

B is the Fair Market Value on the date of such announcement, of the portion of the rights attributable to one Ordinary Share, provided that B shall be zero if an Independent Financial Adviser shall determine that it is not possible to accurately determine the Fair Market Value on the date of such announcement of the portion of the rights attributable to one Ordinary Share. In such circumstances, paragraph B(xi) shall apply and the Guarantor shall, pursuant to and in accordance with that paragraph instruct the Indepen-

dent Financial Adviser to determine as soon as practicable what adjustment (if any, and provided that it shall result in a reduction to the Exchange Price) to the Exchange Price is fair and reasonable to take account of the relevant issue or grant and the date on which such adjustment should take effect.

Such adjustment shall become effective on the first date on which the Ordinary Shares are traded ex-rights, ex-options or ex-warrants on the Relevant Stock Exchange.

(vi) *Issues at less than Current Market Price: If and whenever the Guarantor shall issue (otherwise than as mentioned in sub-paragraph (B)(iv)) wholly for cash any Ordinary Shares (other than Ordinary Shares issued on the making of a Share Exchange Call or on the exercise of any other rights of conversion into, or exchange or subscription for or purchase of, Ordinary Shares), or grant (otherwise than as mentioned in sub-paragraph (B)(iv)) wholly for cash or for no consideration any options, warrants or other rights to subscribe for or purchase or otherwise acquire any Ordinary Shares, in each case at a price per Ordinary Share which is less than 95 per cent. of the Current Market Price per Ordinary Share on the dealing day immediately preceding the date of announcement of the terms of such issue or grant, the Exchange Price shall be adjusted by multiplying the Exchange Price in force immediately prior to such issue by the following fraction:*

$$\frac{A + B}{A + C}$$

where:

A is the number of Ordinary Shares in issue immediately before the issue of such Ordinary Shares or the grant of such options, warrants or rights;

B is the number of Ordinary Shares which the aggregate consideration (if any) receivable for the issue of such Ordinary Shares or, as the case may be, for the issue of such options, warrants or rights and the Ordinary Shares to be issued or otherwise made available upon the exercise of any such options, warrants or rights would purchase at such Current Market Price per Ordinary Share; and

C is the maximum number of Ordinary Shares to be issued pursuant to such issue of such additional Ordinary Shares or upon exercise of such options, warrants or rights.

Such adjustment shall become effective on the date of issue of such additional Ordinary Shares or, as the case may be, the grant of such options, warrants or rights.

(vii) *Other Issues at less than Current Market Price: If and whenever the Guarantor or any Subsidiary of the Guarantor or (at the direction or request of or pursuant to any arrangements with the Guarantor or any Subsidiary of the Guarantor), any other company, person or entity (otherwise than as mentioned in paragraphs (B)(iv), (B)(v) or (B)(vi)) shall issue wholly for cash or for no consideration any securities (other than the Bonds (excluding for this purpose any further bonds issued pursuant to Condition 18 of the Bonds and other than the Preference Shares)) which by their terms of issue carry (directly or indirectly) rights of conversion into, or exchange or subscription for, or purchase of, or otherwise to acquire, Ordinary Shares issued or to be issued by the Guarantor (or shall grant any such rights in respect of existing securities so issued) or securities which by their terms might be redesignated as Ordinary Shares, and the consideration per Ordinary Share receivable upon conversion, exchange, subscription, purchase, acquisition or redesignation is less than 95 per cent. of the Current Market Price per Ordinary Share on the dealing day immediately preceding the date of announcement of the terms of issue of such securities (or the terms of such grant), the Exchange Price shall be adjusted by multiplying the Exchange Price in force immediately prior to such issue (or grant) by the following fraction:*

$$\frac{A + B}{A + C}$$

where:

A is the number of Ordinary Shares in issue immediately before such issue or grant (but where the relevant securities carry rights of conversion into, or rights of exchange or

subscription for, or purchase or acquisition of, Ordinary Shares which have been issued by the Guarantor for the purposes of, or in connection with, such issue, less the number of such Ordinary Shares so issued);

B is the number of Ordinary Shares which the aggregate consideration (if any) receivable for the Ordinary Shares to be issued or otherwise made available upon conversion or exchange or upon exercise of the right of subscription or purchase or acquisition attached to such securities or, as the case may be, for the Ordinary Shares to be issued or to arise from any such redesignation would purchase at such Current Market Price per Ordinary Share; and

C is the maximum number of Ordinary Shares to be issued or otherwise made available upon conversion or exchange of such securities or upon the exercise of such rights of subscription or purchase or acquisition attached thereto at the initial conversion, exchange or subscription price or rate or, as the case may be, the maximum number of Ordinary Shares to be issued or to arise or be made available from any such redesignation.

Such adjustment shall become effective on the date of issue or grant of such securities.

(viii) *Modification of Rights of Conversion, etc: If and whenever there shall be any modification of the rights of conversion, exchange, subscription, purchase or acquisition attaching to any such securities as are mentioned in paragraph (B)(vii) (other than in accordance with the terms (including terms as to adjustment) applicable to such securities) so that following such modification the consideration per Ordinary Share receivable is less than 95 per cent. of the Current Market Price per Ordinary Share on the dealing day immediately preceding the date of announcement of the proposals for such modification, the Exchange Price shall be adjusted by multiplying the Exchange Price in force immediately prior to such modification by the following fraction:*

$$\frac{A + B}{A + C}$$

where:

A is the number of Ordinary Shares in issue immediately before such modification (but where the relevant securities carry rights of conversion into, or rights of exchange or subscription for, or purchase or acquisition of, Ordinary Shares which have been issued by the Guarantor for the purposes of, or in connection with, such issue, less the number of such Ordinary Shares so issued);

B is the number of Ordinary Shares which the aggregate consideration (if any) receivable for the Ordinary Shares to be issued or otherwise made available upon conversion or exchange or upon exercise of the right of subscription or purchase or acquisition attached to the securities so modified would purchase at such Current Market Price per Ordinary Share or, if lower, the existing conversion, exchange, subscription or purchase price of such securities; and

C is the maximum number of Ordinary Shares to be issued or otherwise made available upon conversion or exchange of such securities or upon the exercise of such rights of subscription, purchase or acquisition attached thereto at the modified conversion, exchange, subscription or purchase price or rate but giving credit in such manner as determined by an Independent Financial Adviser to be appropriate for any previous adjustment under this paragraph (B)(viii) or paragraph (B)(vii) above.

Such adjustment shall become effective on the date of modification of the rights of conversion, exchange, subscription, purchase or acquisition attaching to such securities.

(ix) *Other Offers to Shareholders: If and whenever the Guarantor or any of its Subsidiaries or (at the direction or request of or pursuant to any arrangements with the Guarantor or any of its Subsidiaries) any other company, person or entity shall offer any securities in connection with which offer Shareholders as a class are entitled to participate in arrangements whereby such securities may be acquired by them (except where the Exchange Price falls to be adjusted under paragraph (B)(iv) (or would fall to be so*

adjusted if the relevant issue or grant was at less than 95 per cent. of the Current Market Price per Ordinary Share on the relevant dealing day) or under paragraph (B)(v)) the Exchange Price shall be adjusted by multiplying the Exchange Price in force immediately before the making of such offer by the following fraction:

$$\frac{A - B}{A}$$

where:

A is the Current Market Price of one Ordinary Share on the dealing day immediately preceding the date on which the terms of such offer are publicly announced; and

B is the Fair Market Value on the date of such announcement of the portion of the relevant offer attributable to one Ordinary Share.

Such adjustment shall become effective on the first date on which the Ordinary Shares are traded ex-rights on the Relevant Stock Exchange.

(x) *Exchange Price adjustment upon Change of Control: If an offer is made to all (or as nearly as may be practicable all) Shareholders (or all (or as nearly as may be practicable all) such Shareholders other than the offeror and/or any associate of the offeror (as defined in Section 430E(4) of the Companies Act 1985 of Great Britain, or any modification or re-enactment thereof), to acquire the whole or any part of the issued ordinary share capital of the Guarantor or if any person proposes a scheme with regard to such acquisition and (such offer or scheme having become or been declared unconditional in all respects) the Guarantor becomes aware that, other than in circumstances constituting an Excluded Relevant Event, the right to cast more than 50 per cent. of the votes which may ordinarily be cast on a poll at a general meeting of the Guarantor has or will become unconditionally vested in the offeror and/or such associate(s) as aforesaid (a "Relevant Event"), the Guarantor and/or the Issuer shall give written notice thereof to Bondholders (which shall include notice of the Exchange Price applicable as a consequence of the occurrence of the Relevant Event as set out below) within 14 calendar days of the first day on which it becomes so aware, which notice shall contain a statement informing the Bondholders of their entitlement to exercise their Conversion Rights as provided in the Conditions. Upon any exercise of Conversion Rights within 60 calendar days following a Relevant Event or, if later, 60 calendar days following the date on which notice thereof is given, the Exchange Price shall be adjusted by dividing the Exchange Price in force immediately prior to such Relevant Event by a figure calculated in accordance with the formula and subsequent proviso set out below:*

$$A \times \frac{C}{B}$$

where:

A is the arithmetic average of the historic daily median of the bid and offer price quoted by each of three leading market makers in the Bonds selected by the Guarantor and approved by the Trustee and expressed as a percentage of the nominal amount thereof for each day during the Calculation Period;

B is the average of the daily highest and lowest quoted prices expressed in US dollars (translated from pounds sterling at the US$:£ exchange rate appearing on or derived from Reuters' Page FXBENCH as at or about 12 noon (London time) on such day) of an Ordinary Share during the Calculation Period as derived from the Relevant Stock Exchange; and

C is the average Exchange Price (as adjusted from time to time) expressed in US dollars (translated from pounds sterling at the fixed rate of US$1.809 = £1.00) during the Calculation Period,

provided that no increase of the Exchange Price shall be made pursuant to this paragraph (B)(x);

As used herein:

"Calculation Period" means a period of 30 consecutive days ending on, or if the Commencement Date occurs prior to the day that is 35 calendar days after the Issue Date, a period commencing on the Issue Date and ending on, the fifth dealing day prior to the Commencement Date;

"City Code" means the City Code on Takeovers and Mergers;

"Commencement Date" means commencement of an offer period (as determined in accordance with the City Code and being an offer period in respect of which or in relation to which a Relevant Event occurs or, as the case may be, the date of the announcement of a scheme in relation to which a Relevant Event occurs, provided that if the Commencement Date would otherwise have occurred less than 90 calendar days after the end of a previous offer period (as determined in accordance with the City Code, then the Commencement Date shall be the commencement of such previous offer period (determined as above); and

"Excluded Relevant Event" means a scheme or an offer as referred to in this paragraph (B)(x) which:

(a) *upon full implementation would result in the Guarantor being a wholly-owned Subsidiary of a body corporate more than 50 per cent. of the share capital having the right ordinarily to vote on a poll at a general meeting of which would be held by persons who received such share capital pursuant to the scheme or offer in their capacity as Shareholders; and*

(b) *incorporates or is accompanied by arrangements pursuant to which each Bondholder is given a reasonable opportunity to exchange the Bonds held by such Bondholder for bonds to be issued by such new holding company convertible into shares of such new holding company on terms determined by an independent investment bank of international repute in London selected by the Guarantor and approved in writing by the Trustee to be such that the Bondholders are not disadvantaged in comparison with the holders of the ordinary share capital of the Guarantor.*

(xi) *Other Events: If the Guarantor determines that an adjustment should be made to the Exchange Price as a result of one or more events or circumstances not referred to in paragraphs (B)(i) to (B)(x) (even if the relevant event or circumstance is specifically excluded from the operation of paragraphs (B)(i) to (B)(x)), the Guarantor shall, at its own expense and acting reasonably, request a firm of accountants or an independent investment bank in London of international repute (acting in either case as experts), in each case selected by the Guarantor and, in each case, approved in writing by the Trustee (such consent not to be unreasonably withheld or delayed), to determine as soon as practicable what adjustment (if any, and provided that it shall result in a reduction to the Exchange Price) to the Exchange Price is fair and reasonable to take account thereof and the date on which such adjustment should take effect and upon such determination such adjustment (if any) shall be made and shall take effect in accordance with such determination, provided that an adjustment shall only be made pursuant to this paragraph (B)(xi) if such firm of accountants or such independent investment bank are so requested to make such a determination not more than 21 calendar days after the date on which the relevant event or circumstance arises.*

For the purpose of any calculation of the consideration receivable referred to in paragraphs (B)(vi), (B)(vii) and (B)(viii), the following provisions shall apply:

(a) *the aggregate consideration receivable for Ordinary Shares issued for cash shall be the amount of such cash provided that in no case shall any deduction be made for any commission, fees or any expenses paid or incurred by the Guarantor for any underwriting of the issue or otherwise in connection therewith; and*

(b) *(1) the aggregate consideration receivable for Ordinary Shares to be issued or otherwise made available upon the conversion or exchange of any securities shall be deemed to be the consideration received or receivable for any such securities, and (2) the aggregate consideration receivable for Ordinary Shares to be issued or otherwise made available upon the exercise of rights of subscription attached*

to any securities or upon the exercise of any options, warrants or rights shall be deemed to be that part (which may be the whole) of the consideration received or receivable for such securities or, as the case may be, for such options, warrants or rights which is attributed by the Guarantor to such rights of subscription or, as the case may be, such options, warrants or rights or, if no part of such consideration is so attributed, the Fair Market Value of such rights of subscription or, as the case may be, such options, warrants or rights as at the date of the announcement of the terms of issue of such securities or, as the case may be, such options, warrants or rights, plus in the case of each of (1) and (2) above, the additional minimum consideration (if any) to be received upon the conversion or exchange of such securities, or upon the exercise of such rights of subscription attached thereto or, as the case may be, upon exercise of such options, warrants or rights, and (3) the consideration per Ordinary Share receivable upon the conversion or exchange of, or upon the exercise of such rights of subscription attached to, such securities or, as the case may be, upon exercise of such options, warrants or rights shall be the aggregate consideration referred to in (1) or (2) above (as the case may be), divided by the number of Ordinary Shares to be issued upon such conversion or exchange or exercise at the initial conversion, exchange or subscription price or rate.

On any adjustment, the resultant Exchange Price, if not an integral multiple of £0.01, shall be rounded down to the nearest whole £0.01. No adjustment shall be made to the Exchange Price where such adjustment (rounded down if applicable) would be less than one per cent. of the Exchange Price then in effect. Any adjustment not required to be made, and any amount by which the Exchange Price has been rounded down, (including as a result of any of the events specified in paragraph (B) occurring on or after 6 September 2005) shall be carried forward and taken into account in any subsequent adjustment but such subsequent adjustment shall be made on the basis that the adjustment not required to be made has been made at the relevant time.

No adjustment will be made to the Exchange Price where shares or other securities (including rights warrants or options) are issued, offered, exercised, allotted, appropriated, modified or granted to employees (including directors holding executive office) of the Guarantor or any Subsidiary or any associated company of the Guarantor pursuant to any employees' share scheme (as defined in Section 743 of the Companies Act 1985 of Great Britain or any modification or re-enactment thereof).

The Exchange Price may not be reduced so that, on the making of a Share Exchange Call, Ordinary Shares would fall to be issued at a discount to their nominal value.

Where more than one event which gives or may give rise to an adjustment to the Exchange Price occurs within such a short period of time that, in the opinion of a firm of accountants or of an independent investment bank of international repute in London in either case selected by the Guarantor and approved in writing by the Trustee, a modification to the operation of the adjustment provisions is required in order to give the intended result, such modification shall be made to the operation of the adjustment provisions as may be advised by such accountants or investment bank to be in their opinion appropriate to give such intended result.

Where the circumstances giving rise to any adjustment pursuant to this paragraph (B) have already resulted or will result in an adjustment to the Exchange Price or where the circumstances giving rise to any adjustment arise by virtue of any other circumstances which have already given or will give rise to an adjustment to the Exchange Price, such modification shall be made to the operation of the provisions of this paragraph (B) as may be advised by of a firm of accountants or of an independent investment bank of international repute in London in either case selected by the Guarantor and approved in writing by the Trustee to be in their opinion appropriate to give the intended result.

If any doubt shall arise as to the appropriate adjustment to the Exchange Price, a certificate of a firm of accountants or of an independent investment bank of international repute in London in either case selected by the Guarantor and approved in writing by the

Trustee shall be conclusive and binding on all concerned, save in the case of manifest or proven error.

As used above:

"Bonds" means the US$375,000,000 4.00 per cent. Guaranteed Convertible Bonds due 2017;

"Current Market Price" means, in respect of an Ordinary Share at a particular date, the simple average of the bid and offer quotations published by, or derived from, the Relevant Stock Exchange for one Ordinary Share for the five consecutive dealing days ending on the dealing day immediately preceding such date; provided that if at any time during the said five day period the Ordinary Shares shall have been quoted ex-dividend and during some other part of that period the Ordinary Shares shall have been quoted cum-dividend then:

(a) *if the Ordinary Shares to be issued do not rank for the dividend in question, the quotations on the dates on which the Ordinary Shares shall have been quoted cum-dividend shall for the purpose of this definition be deemed to be the amount thereof reduced by an amount equal to the amount of that dividend per Ordinary Share (excluding any associated tax credit and less the tax (if any) falling to be deducted on payment thereof to a resident of the United Kingdom); and*

(b) *if the Ordinary Shares to be issued do rank for the dividend in question, the quotations on the dates on which the Ordinary Shares shall have been quoted ex-dividend shall for the purpose of this definition be deemed to be the amount thereof increased by such similar amount,*

and provided further that if the Ordinary Shares on each of the said five dealing days have been quoted cum-dividend in respect of a dividend which has been declared or announced but the Ordinary Shares to be issued do not rank for that dividend the quotations on each of such dates shall for the purposes of this definition be deemed to be the amount thereof reduced by an amount equal to the amount of that dividend per Ordinary Share (excluding any associated tax credit and less the tax (if any) falling to be deducted on payment thereof to a resident of the United Kingdom).

"dealing day" means a day on which the Relevant Stock Exchange is open for business and Shares may be dealt in on the Relevant Stock Exchange;

"securities" includes, without limitation, shares in the share capital of the Guarantor; and

"Subsidiary" means any subsidiary undertaking (within the meaning of Section 258 of the Companies Act 1985 of Great Britain).

If the Conversion Date in relation to any Bond shall be after the record date for any such issue, distribution, grant or offer (as the case may be) as is mentioned in paragraphs (B)(ii) to (B)(v) and paragraph (B)(ix), or any such issue as is mentioned in paragraph (B)(vi) and (B)(vii) which is made to the Shareholders or any class of them, but before the relevant adjustment becomes effective under this paragraph (B) (including, for the avoidance of doubt, where the adjustment is made pursuant to and in accordance with paragraph (B)(xi) following the occurrence of one or more events or circumstances referred to in paragraphs (B)(ii) to (B)(vii) or (B)(ix), in which case the record date shall be the record date for the relevant issue, distribution, grant or offer (as the case may be)), the Guarantor shall (conditional upon the relevant adjustment becoming effective) procure that there shall be issued to the converting Bondholder, in accordance with the instructions contained in the Conversion Notice or, as the case may be, to the Trustee or as directed by the Trustee (subject, in each such case, to any applicable exchange control or other laws or other regulations), such additional number of Ordinary Shares (if any) as, together with the Ordinary Shares issued or to be issued on conversion of the relevant Bond and exchange of the related Preference Share, is equal to the number of Ordinary Shares which would have been required to be issued on conversion of such Bond and exchange of the related Preference Share if the relevant adjustment (more particularly referred to in the said provisions of this paragraph (B)) to the Exchange Price had in fact been made and

become effective immediately after the relevant record date. Such additional Ordinary Shares will be allotted within one month after the relevant Conversion Date or, if later, within one month after the date of issue of Ordinary Shares or other securities if the adjustment results from the issue of Ordinary Shares. Any such additional Ordinary Shares will be issued in uncertificated form through the dematerialised securities trading system operated by CRESTCo Limited, known as CREST, unless the holder of such beneficial interests elects to hold such additional Ordinary Shares in certificated registered form or, at the time of issuance, the Ordinary Shares are not a participating security in CREST.

References to any issue or offer to Shareholders "as a class" or "by way of rights" shall be taken to be references to an issue or offer to all or substantially all Shareholders other than Shareholders to whom, by reason of the laws of any territory or requirements of any recognised regulatory body or any other stock exchange in any territory or in connection with fractional entitlements, it is determined not to make such issue or offer.

In the case of adjustments to the Exchange Price required to be made as a result of any of the events specified in paragraph (B) occurring on or after 6 September 2005 but prior to the Issue Date, the Exchange Price shall be adjusted downwards by 186.15 pence, immediately upon the issue of the Bonds, from 1713.15 pence per Ordinary Share to 1527 pence per Ordinary Share).

7.2 Procedure for Conversion

The Conversion Right attaching to any Bond may be exercised by delivering the relevant Bond to the specified office of any Paying, Transfer, Conversion and Exchange Agent or the Registrar during its usual business hours, accompanied by a duly completed and signed notice of conversion (a "Conversion Notice") in the form (for the time being current) obtainable from any Paying, Transfer, Conversion and Exchange Agent or the Registrar. Delivery as aforesaid shall not be required in the case of the Trustee exercising rights of conversion pursuant to Condition 7.3. Conversion Rights shall be exercised subject in each case to any applicable fiscal or other laws or regulations applicable in the jurisdiction in which the specified office of the Paying, Transfer, Conversion and Exchange Agent or the Registrar to whom the relevant Conversion Notice is delivered is located.

The conversion date in respect of a Bond (the "Conversion Date") shall be the London business day immediately following the date of such delivery and, if applicable, the making of any payment to be made or indemnity given under these Conditions in connection with the exercise of such Conversion Right or, in the case of the Trustee exercising rights of conversion pursuant to Condition 7.3, the relevant redemption date, save that for the purposes of calculating the amount of interest payable in such circumstances pursuant to Condition 7.3, the Conversion Date shall mean the date which would have been the Conversion Date had Conversion Rights been exercised by holders of the relevant Unexercised Bonds (as defined in Condition 7.3) on the last day of the relevant period for exercise of Conversion Rights by such holders pursuant to Condition 7.1. A Conversion Notice once delivered shall be irrevocable.

A Bondholder exercising a Conversion Right or the Trustee exercising its rights of conversion under Condition 7.3 must pay (in the case of the Trustee by means of deduction from the net proceeds of sale referred to in Condition 7.3) any stamp, capital, transfer, issue, registration, documentary, transaction or other similar tax arising on the relevant conversion (other than any stamp, capital, transfer, issue, registration, documentary, transaction or other similar tax payable on the issue of the Preference Shares or the Ordinary Shares to be issued in exchange for Preference Shares on conversion of the Bonds in Aruba, the United Kingdom or Switzerland or any jurisdiction where the Issuer or the Guarantor is resident for tax purposes or where the Issuer or Guarantor has a permanent establishment, branch or agency, such taxes being payable by the Issuer, failing whom the Guarantor, apart from (a) any stamp duty or stamp duty reserve tax that arises under Sections 67, 70, 93 or 96 of the United Kingdom Finance Act 1986 to the extent that the stamp duty or stamp duty reserve tax exceeds that which would have been payable had the person to whom the Preference Shares or the Ordinary Shares been issued not been a person falling within Section 67(6), (7) or (8), Section 70(6), (7) or (8), Section 93(2) or (3) or Section 96(1) of such Act (as applicable) or (b) any Swiss Securities Transfer Tax arising solely in consequence of Bonds, Preference Shares or Ordinary Shares being converted, issued or exchanged by or through

a Swiss securities dealer (unless the use of a Swiss securities dealer as the person by or through whom the Bonds, Preference Shares or Ordinary Shares are converted, issued or exchanged occurs at the direction of the Issuer or Guarantor or is required by law) to the extent that the Swiss Securities Transfer Tax exceeds that which would have been payable had the Swiss securities dealer not been involved, such taxes (a) and (b) to be paid by the Bondholders or the Trustee (as the case may be)) and such Bondholder or the Trustee (as the case may be) must pay (in the case of the Trustee, by way of deduction from the net proceeds of sale as aforesaid) all, if any, taxes arising by reference to any disposal or deemed disposal of a Bond or a Preference Share in connection with such conversion.

Neither the Preference Shares nor the Ordinary Shares will be available for issue (i) to, or to a nominee for, Euroclear, Clearstream, Luxembourg or any other person providing a clearance service within the meaning of Section 96 of the Finance Act 1986 of the United Kingdom, or (ii) to a person, or nominee or agent for a person, whose business is or includes issuing depositary receipts within the meaning of Section 93 of the Finance Act 1986 of the United Kingdom, in each case at any time prior to the "abolition day" as defined in Section 111(1) of the Finance Act 1990 of the United Kingdom.

Ordinary Shares to be issued on exchange of the Preference Shares issued on conversion of the Bonds will be issued in uncertificated form by the Guarantor through the dematerialised securities trading system operated by CRESTCo Limited, known as CREST, unless the Bondholder elects to hold the Ordinary Shares in certificated registered form or, at the time of issuance, the Ordinary Shares are not a participating security in CREST. Certificates for Ordinary Shares issued on conversion (if Ordinary Shares are in certificated form) will be dispatched by mail free of charge (but uninsured and at the risk of the person entitled thereto) within one month following the Conversion Date.

7.3 Automatic Conversion on Redemption

The Trust Deed provides that the Trustee may, at its absolute discretion (and without any responsibility for any loss occasioned thereby), within the period commencing on the date thirteen calendar days immediately prior to, and ending at the close of business on the London business day immediately prior to, the date fixed for redemption from time to time of any of the Bonds (including any redemption under Condition 8.1 or 8.2), elect by notice in writing to the Issuer to convert the aggregate principal amount of Bonds due for redemption on such date and in respect of which Conversion Rights have not been exercised ("Unexercised Bonds") into Preference Shares on the applicable Conversion Date if all necessary consents (if any) have been obtained and the Trustee is satisfied or is advised by an independent investment bank of international repute in London appointed by the Trustee at the cost of the Guarantor that the net proceeds of an immediate sale of the Ordinary Shares arising on the exchange of such Preference Shares at the Exchange Price on the applicable Conversion Date (disregarding any liability (other than a liability of the Trustee) to taxation or the payment of any capital, stamp, issue or registration duties consequent thereon) would be likely to exceed by 5 per cent. or more the aggregate amount of principal and interest which would otherwise be payable on the date fixed for redemption in respect of such Unexercised Bonds.

Save as provided in Condition 7.4, no interest shall accrue from (and including) the Interest Payment Date immediately preceding the Conversion Date (or, if such date falls before the First Interest Payment Date, from (and including) the Issue Date) in respect of such Unexercised Bonds in respect of which the Trustee's conversion election as aforesaid shall have been made.

All of the Ordinary Shares issued on such conversion and exchange shall be sold by, or on behalf of, the Trustee as soon as practicable, and (subject to any necessary consents being obtained and to the deduction by the Trustee of any amount which it determines to be payable in respect of its liability to taxation and the payment of any capital, stamp, issue or registration duties (if any) and any costs incurred by the Trustee in connection with the allotment and sale thereof and the exercise of its election under this Condition 7.3) the net proceeds of sale together with accrued interest (if any) in respect of such Unexercised Bonds shall, if not in US dollars, be converted into US dollars in such manner and at such time and at such rates as the Trustee shall consider appropriate and shall be held by the Trustee and distributed rateably to the holders of such Unexercised Bonds in accordance with Condition 9 and the Trust Deed. If the date fixed for redemption in respect of such

Unexercised Bonds falls during a period commencing on an Interest Payment Date and ending on the date falling seven calendar days after such Interest Payment Date (both dates inclusive) a sum equal to the interest payable on that Interest Payment Date in respect of such Unexercised Bonds and which has been paid to the holders thereof will be deducted from the net proceeds of sale payable to the relevant holder and shall be paid to the Issuer. The amount of such net proceeds of sale payable to a holder of Unexercised Bonds pursuant to this Condition 7.3 shall be treated for all purposes as the full amount due from the Issuer in respect of the Unexercised Bonds.

The Trustee shall have no liability in respect of the exercise or non-exercise of its discretion pursuant to this Condition 7.3 or the timing of such exercise or, where relevant, in respect of any sale of Ordinary Shares or conversion of any amounts into US dollars, whether for the timing of any such sale or conversion or the price at which any such Ordinary Shares are sold or the rate at which any such amounts are converted into US dollars, or the inability to sell any such Ordinary Shares or make such conversion or otherwise.

7.4 Interest on Conversion

If any notice requiring the redemption of any Bonds is given pursuant to Condition 8.2 on or after the fifteenth London business day prior to a record date which has occurred since the last Interest Payment Date (or, in the case of the first Interest Period, since the Issue Date) (whether such notice is given before, on or after such record date) in respect of any dividend or distribution payable in respect of the Ordinary Shares where such notice specifies a date for redemption falling on or prior to the date which is 14 calendar days after the Interest Payment Date next following such record date, interest shall accrue on Bonds in respect of which Conversion Rights shall have been exercised or in respect of which the Trustee shall have exercised its rights of conversion pursuant to Condition 7.3 and in any such case in respect of which the Conversion Date falls after such record date and on or prior to the Interest Payment Date next following such record date, in each case from (and including) the preceding Interest Payment Date (or, if such Conversion Date falls before the First Interest Payment Date, from (and including) the Issue Date) to (but excluding) such Conversion Date.

Any such interest shall be paid by the Issuer not later than 14 calendar days after the relevant Conversion Date by US dollar cheque drawn on, or by transfer to, a US dollar account maintained with a branch of a bank in New York City in accordance with instructions given by the relevant Bondholder or, in the case of the exercise of such rights by the Trustee, the Trustee.

7.5 Ordinary Shares

(i) The Guarantor undertakes that it will procure that Ordinary Shares allotted on exchange for the Preference Shares will be fully paid and will rank *pari passu* in all respects with the fully paid Ordinary Shares in issue on the Conversion Date, except that the Ordinary Shares so allotted will not rank for any dividend or other distribution declared, paid or made by reference to a record date prior to such Conversion Date.

(ii) Save as provided in Condition 7.4, no payment or adjustment shall be made on conversion for any interest which otherwise would have accrued on the relevant Bonds from (and including) the Interest Payment Date immediately preceding the Conversion Date relating to such Bonds (or, if such Conversion Date falls before the First Interest Payment Date, from (and including) the Issue Date).

7.6 Preference Shares

(i) Preference Shares allotted pursuant to these Conditions will be fully paid and will rank *pari passu* with all (if any) fully paid Preference Shares in issue on the Conversion Date.

(ii) Preference Shares will be allotted prior to the allotment of the Ordinary Shares for which they are exchangeable and will be allotted as of the relevant Conversion Date and will be allotted (1) to the holder of the Bond completing the relevant Conversion Notice, or (2) to the Trustee or as the Trustee may direct (in the case of an exercise by the Trustee of its rights pursuant to Condition 7.3).

8. Redemption and Purchase

8.1 Final Redemption

Unless previously purchased and cancelled, redeemed or converted as herein provided, the Bonds will be redeemed at their principal amount on the Final Maturity Date. The Bonds may only be redeemed at the option of the Issuer prior to the Final Maturity Date in accordance with this Condition 8.

8.2 Redemption at the Option of the Issuer

On giving not less than 30 nor more than 90 calendar days' notice to the Trustee and the Bondholders in accordance with Condition 17, the Issuer:

(i) may, at any time on or after 14 August 2010, redeem all, but not some only, of the Bonds for the time being outstanding at their principal amount together with interest accrued to the date fixed for redemption; or

(ii) may, at any time, redeem all, but not some only, of the Bonds for the time being outstanding at their principal amount together with interest accrued to the date fixed for redemption, if, prior to the date of such notice, Conversion Rights shall have been exercised and/or purchases (and corresponding cancellations) have been effected in respect of 85 per cent. or more in principal amount of the Bonds originally issued.

For the purposes of the above, if on any dealing day in such 30 day period as mentioned above the Ordinary Shares shall have been quoted cum dividend then the middle market quotation on each dealing day on which the Ordinary Shares shall have been quoted "cum dividend" shall be deemed to be the amount thereof reduced by an amount equal to the amount of that dividend per Ordinary Share (excluding any associated tax credit and less the tax (if any) falling to be deducted on payment thereof to a resident of the United Kingdom).

A notice given by the Issuer under Condition 8.2 (a "Redemption Notice") shall specify (1) the date (the "Redemption Date") when the relevant redemption will take place, (2) the Exchange Price, (3) the closing price quoted for the Ordinary Shares as derived from the Daily Official List of the London Stock Exchange at the close of business and the aggregate principal amount of the Bonds outstanding, in each case as at the latest practicable date prior to the publication of the Redemption Notice, and (4) the last day on which Conversion Rights may be exercised by Bondholders.

8.3 Purchase

Subject to the requirements (if any) of the London Stock Exchange and the UK Listing Authority and any other stock exchange on which the Bonds may be listed at the relevant time, the Issuer or the Guarantor or any Subsidiary of the Issuer or the Guarantor or any holding company of the Issuer or the Guarantor (within the meaning of Section 736 of the Companies Act 1985 of Great Britain) may at any time purchase Bonds in the open market or otherwise at any price and such Bonds may be retained for the account of the relevant purchaser or resold or otherwise dealt with at its discretion. Any purchase by tender shall be made available to all Bondholders alike. The Bonds so purchased, while held by or on behalf of the Issuer, the Guarantor or any such Subsidiary or holding company, shall not entitle the holder to vote at any meetings of the Bondholders and shall not be deemed to be outstanding for the purposes of calculating quorums at meetings of the Bondholders or for the purposes of Conditions 10, 14 and 19.

8.4 Cancellation

All Bonds redeemed or converted will be cancelled forthwith and will not be reissued or resold. All Bonds purchased by or on behalf of the Issuer or the Guarantor or any Subsidiary of the Issuer or the Guarantor or any holding company of the Issuer or the Guarantor (as aforesaid) may be surrendered for cancellation, by surrendering each such Bond to the Principal Paying, Transfer, Conversion and Exchange Agent and, if so surrendered, shall be cancelled forthwith (and may not be reissued or resold) and the obligations of the Issuer and the Guarantor in respect of any such Bonds shall be discharged.

8.5 Multiple Notices

If more than one notice of redemption is given pursuant to this Condition 8, the first of such notices to be given shall prevail.

9. Payments

9.1 Principal

Payments of principal or the net proceeds of any sale of Ordinary Shares pursuant to Condition 7.3 or accrued interest payable on a redemption of the Bonds pursuant to Condition 8.2 or on a repayment of the Bonds pursuant to Condition 10 other than on an Interest Payment Date will be made to the persons shown on the Register at close of business London time on the Record Date and subject to surrender of the Bonds at the specified office of the Registrar or any of the Paying, Transfer, Conversion and Exchange Agents.

9.2 Interest and other Amounts

(i) Payments of interest due on an Interest Payment Date will be made to the persons shown in the Register at close of business London time on the Record Date.

(ii) Payments of all amounts other than as provided in Condition 9.1 and 9.2 will be made as provided in these Conditions.

9.3 Record Date

"Record Date" means the seventh London business day before the due date for the relevant payment.

9.4 Payments

Each payment in respect of the Bonds pursuant to Condition 9.1 and 9.2 will be made by United States dollar cheque drawn on a branch of a bank in New York City mailed to the holder of the relevant Bond at his address appearing in the Register. However, upon application by the holder to the specified office of the Registrar or any Paying, Transfer, Conversion and Exchange Agent not less than 15 calendar days before the due date for any payment in respect of a Bond, such payment may be made by transfer to a United States dollar account maintained by the payee with a bank in New York City.

Where payment is to be made by cheque, the cheque will be mailed, on the Payment business day (as defined below) preceding the due date for payment or, in the case of payments referred to in Condition 9.1, if later, on the Payment business day (as defined below) on which the relevant Bond is surrendered as specified in Condition 9.1 (at the risk and, if mailed at the request of the holder otherwise than by ordinary mail, expense of the holder).

9.5 Payments subject to fiscal laws

All payments are subject in all cases to any applicable fiscal or other laws and regulations. No commissions or expenses shall be charged to the Bondholders in respect of such payments.

9.6 Paying, Transfer, Conversion and Exchange Agents

The initial Paying, Transfer, Conversion and Exchange Agents and the Registrar and their initial specified offices are listed below. The Issuer and the Guarantor reserve the right at any time with the approval of the Trustee to vary or terminate the appointment of any Paying, Transfer, Conversion and Exchange Agent or the Registrar and appoint additional or other Paying, Transfer, Conversion and Exchange Agents or another Registrar, provided that they will maintain (i) a Principal Paying, Transfer, Conversion and Exchange Agent, (ii) Paying, Transfer, Conversion and Exchange Agents having a specified office in London (so long as the Bonds are admitted to the Official List of the Financing Services Authority and admitted to trading on the Professional Securities Market of the London Stock Exchange), and (iii) maintain a Registrar with a specified office outside the United Kingdom. Notice of any change in the Paying, Transfer, Conversion and Exchange Agents or Registrar or their specified offices will promptly be given to the Bondholders.

9.7 Delay in payment

Bondholders will not be entitled to any interest or other payment for any delay after the due date in receiving the amounts due (i) as a result of the due date not being a Payment business day (as defined below), (ii) if the Bondholder is late in surrendering the relevant Bond, or (iii) if a cheque mailed in accordance with this Condition arrives after the due date for payment.

9.8 Payment Business Days

In this Condition, "Payment business day" means any day (other than a Saturday or Sunday) on which commercial banks and foreign exchange markets are open for business in New York City and London and, in the case of surrender of a Bond, in the place of the specified office of the Registrar or relevant Paying, Transfer, Conversion and Exchange Agent, to whom the relevant Bond is surrendered.

10. Events of Default

The Trustee at its discretion may, and if so requested in writing by the holders of at least one-quarter in principal amount of the Bonds then outstanding or if so directed by an Extraordinary Resolution of the Bondholders shall, subject in each case to being indemnified and/or secured to its satisfaction, (but, in the case of the happening of any of the events mentioned in subparagraphs (b) to (h) (other than (d)) and (j) inclusive, only if the Trustee shall have certified in writing to the Issuer and the Guarantor that such event is, in its opinion, materially prejudicial to the interests of the Bondholders), give notice in writing to the Issuer and the Guarantor that the Bonds are, and they shall accordingly thereby forthwith become, immediately due and repayable at their principal amount together with accrued interest, if applicable (as provided in the Trust Deed) if any of the following events (each an "Event of Default") shall have occurred and be continuing:

(a) if default is made for a period of 14 calendar days or more in the payment of any interest due in respect of the Bonds or any of them; or

(b) if the Issuer or the Guarantor fails to perform or observe any of its other obligations expressed to be binding upon it, notwithstanding that the same shall not be so binding by virtue of any rule of law or otherwise, under the Bonds or the Trust Deed and (except where the Trustee shall have certified to the Issuer and the Guarantor in writing that it considers such failure to be incapable of remedy in which case no such notice or continuation as is hereinafter mentioned will be required) such failure continues for the period of 30 calendar days (or such longer period as the Trustee may in its absolute discretion permit) next following the service by the Trustee of notice on the Issuer or, as the case may be, the Guarantor requiring the same to be remedied; or

(c) if (i) any indebtedness for borrowed money of the Issuer, the Guarantor or any Material Subsidiary becomes due and repayable prior to its stated maturity by reason of an event of default except where the Issuer, the Guarantor or any Material Subsidiary, as the case may be, is contesting such event of default in good faith and by appropriate action, or (ii) any such indebtedness for borrowed money is not paid when due or, as the case may be, within any originally applicable grace period except where the Issuer, the Guarantor or any Material Subsidiary, as the case may be, is contesting its liability in good faith by appropriate action, or (iii) the Issuer, the Guarantor or any Material Subsidiary fails to pay when due (or, as the case may be, within any originally applicable grace period) any amount payable by it under any present or future guarantee for, or indemnity in respect of, any indebtedness for borrowed money except where the Issuer, the Guarantor or any Material Subsidiary, as the case may be, is contesting its liability under such guarantee or indemnity in good faith and by appropriate action, or (iv) any Security Interest given by the Issuer, the Guarantor or any Material Subsidiary for any indebtedness for borrowed money of any other person becomes enforceable by reason of a default, event of default or other similar event in relation thereto and the holder thereof shall have commenced proceedings or appointed a receiver, manager or similar officer to take steps to enforce the same except where the Issuer, the Guarantor or such Material Subsidiary, as the case may be, is contesting such default, event of default or other similar event, as the case may be, in good faith and by appropriate action, provided that no event described in this Condition 10(c) shall constitute an Event of Default unless the aggregate amount of the relevant indebtedness for borrowed money or any such guarantee

or indemnity as aforesaid in respect of which any one or more of the events mentioned above in this Condition 10(c) has or have occurred equals or exceeds US$50,000,000 or its equivalent in other currencies (as determined by the Trustee); or

(d) if any order shall be made by any competent court or any resolution shall be passed for the winding up or dissolution of the Issuer or the Guarantor, save for the purpose of amalgamation, merger, consolidation, reorganisation, reconstruction or other similar arrangement on terms previously approved in writing by the Trustee (such approval not to be unreasonably withheld or delayed having regard to the interests of the Bondholders) or by an Extraordinary Resolution of the Bondholders; or

(e) if any order shall be made by any competent court or any resolution shall be passed for the winding up or dissolution of a Material Subsidiary, save for the purposes of amalgamation, merger, consolidation, reorganisation, reconstruction or other similar arrangement either (i) not involving or arising out of the insolvency of such Material Subsidiary and under which all the surplus assets of such Material Subsidiary are transferred to the Issuer, the Guarantor or any of the Guarantor's other Subsidiaries, or (ii) on terms previously approved in writing by the Trustee (such approval not to be unreasonably withheld or delayed having regard to the interests of Bondholders) or by an Extraordinary Resolution of the Bondholders; or

(f) if the Guarantor or any Material Subsidiary shall cease to carry on the whole or substantially the whole of its business, except (i) in each case for the purpose of amalgamation, merger, consolidation, reorganisation, reconstruction or other similar arrangement either (A) on terms previously approved in writing by the Trustee (such approval not to be unreasonably withheld or delayed having regard to the interests of Bondholders) or by an Extraordinary Resolution of the Bondholders, or (B) in the case of a Material Subsidiary not involving or arising out of the insolvency of such Material Subsidiary and under which all or substantially all of its assets are transferred to another member or members of the Group or to a transferee or transferees which immediately upon such transfer become(s), a member or members of the Group, or (ii) as a result of any disposal of assets by a Material Subsidiary either (1) to any other Subsidiary of the Guarantor or the Guarantor, or (2) to any other person on arm's length terms; or

(g) if the Issuer, the Guarantor or any Material Subsidiary shall suspend or announce its intention to suspend payment of its debts generally or shall be declared or adjudicated by a competent court to be unable, or shall admit in writing its inability, to pay its debts generally (within the meaning of Section 123(1) or (2) of the Insolvency Act 1986 other than Section 123(1)(a)) as they fall due, or shall be adjudicated or found insolvent by a competent court or shall enter into any composition or other similar arrangement with its creditors generally under Section 1 of the Insolvency Act 1986; or

(h) if a receiver, administrative receiver, administrator or other similar official shall be appointed in relation to the Issuer, the Guarantor or any Material Subsidiary or, as the case may be, in relation to the whole or substantially the whole of the undertaking or assets of any of them or a distress, execution or other process shall be levied or enforced upon or sued out against, or any encumbrancer shall take possession of, the whole or substantially the whole of the assets of any of them and in any of the foregoing cases (other than the appointment of an administrator) it or he shall not be paid out or discharged within 60 calendar days (or such longer period as the Trustee may in its absolute discretion permit) or, following such 60 calendar day period, the appointment is not being contested in good faith and by appropriate action; or

(i) the Bond Guarantee is not (or is claimed by the Guarantor not to be) in full force and effect; or

(j) any event occurs (i) under the laws of Aruba, in the case of the Issuer, or (ii) under the laws of England, in the case of the Guarantor, or (iii) under the laws of its country of incorporation, in the case of a Material Subsidiary, which has an analogous effect to any of the events referred to in sub-paragraphs (d), (e), (g) or (h) in this Condition 10.

11. Taxation

All payments in respect of the Bonds and the Bond Guarantee will be made without withholding of or deduction for taxation unless such withholding or deduction is required by law, in which case the relevant payment will be made subject to such withholding or deduction. Neither the Issuer nor the Guarantor will be required to pay any additional or further amounts in respect of any such withholding or deduction.

12. Undertakings

12.1 Deed Poll

Whilst any Bond remains outstanding, the Guarantor will, save with the approval of an Extraordinary Resolution of the Bondholders or the prior written approval of the Trustee where, in the Trustee's opinion, it is not materially prejudicial to the interests of the Bondholders to give such approval or, in the case of an amendment to the Deed Poll, unless the amendment is agreed by the Trustee as provided in Condition 14, perform all of its obligations under, and not make any amendment to, the Deed Poll.

12.2 Undertakings of the Guarantor

Whilst any Bond remains outstanding, the Guarantor will and the Deed Poll provides that while any Share Exchange Call remains to be satisfied the Guarantor will, save with the approval of the Bondholders by an Extraordinary Resolution or with the prior written approval of the Trustee where, in its opinion, it is not materially prejudicial to the interests of the Bondholders to give such approval:

(i) at all times keep available for issue free from pre-emptive rights out of its authorised but unissued capital such number of Ordinary Shares as would enable the obligation of the Issuer to procure that Preference Shares be exchanged for Ordinary Shares pursuant to the making of a Share Exchange Call and all rights of subscription and exchange for and conversion into Ordinary Shares to be satisfied in full and to take all actions necessary to effect the issue and allotment of Ordinary Shares at the times and in the manner set out in the Articles of the Issuer and the Issuer Board Resolution;

(ii) not, other than in circumstances constituting an Excluded Relevant Event, issue or pay up any securities, in either case by way of capitalisation of profits or reserves, other than (1) by the issue of fully paid Ordinary Shares to the Shareholders and other holders of shares in the capital of the Guarantor, if any, which by their terms entitle the holders thereof to receive Ordinary Shares on a capitalisation of profits or reserves, or (2) by the issue of Ordinary Shares paid up in full out of profits or reserves (in accordance with applicable law) and issued wholly, ignoring fractional entitlements, in lieu of the whole or part of a cash dividend, or (3) by the issue of fully paid equity share capital (other than Ordinary Shares) to the holders of equity share capital of the same class and other holders of shares in the capital of the Guarantor, if any, which by their terms entitle the holders thereof to receive equity share capital (other than Ordinary Shares) on a capitalisation of profits or reserves, unless in any such case, the same gives rise (or would, but for the fact that the adjustment would be less than one per cent. of the Exchange Price then in effect, give rise) to an adjustment of the Exchange Price in accordance with the terms of the Issuer Board Resolution;

(iii) not in any way modify the rights attaching to the Ordinary Shares with respect to voting, dividends or liquidation nor issue any other class of equity share capital carrying any rights which are more favourable than such rights, provided that nothing in this Condition 12.2(iii) shall prevent (1) the issue of any equity share capital to employees (including directors holding executive office) whether of the Guarantor or any of its Subsidiaries or any of the Guarantor's associated companies by virtue of their office or employment pursuant to any scheme or plan approved by the Guarantor in general meeting or which is established pursuant to such a scheme or plan which is or has been so approved, or (2) any consolidation or subdivision of the Ordinary Shares or the conversion of any Ordinary Shares into stock or vice versa, or (3) any modification of such rights which is determined by an Independent Financial Adviser not to be, materially prejudicial to the interests of the holders of the Bonds, or

(4) without prejudice to any rule of law or legislation (including regulations made under Section 207 of the Companies Act 1989 of Great Britain or any other provision of that or any other legislation), the conversion of Ordinary Shares into, or the issue of any Ordinary Shares in, uncertificated form (or the conversion of Ordinary Shares in uncertificated form into certificated form) or the amendment of the Articles of Association of the Guarantor to enable title to securities of the Guarantor (including Ordinary Shares) to be evidenced and transferred without a written instrument or any other alteration to the Articles of Association of the Guarantor made in connection with the matters described in this Condition 12 or which is supplemental or incidental to any of the foregoing (including any amendment made to enable or facilitate procedures relating to such matters and any amendment dealing with the rights and obligations of holders of securities, including Ordinary Shares, dealt with under such procedures), or (5) any issue of equity share capital where the issue of such equity share capital results or would, but for the fact that the adjustment would be less than one per cent. of the Exchange Price then in effect or that the consideration per Ordinary Share receivable therefor (as described in the Articles of the Issuer and/or the Issuer Board Resolution) is at least 95 per cent. of the Current Market Price per Ordinary Share, otherwise result in an adjustment of the Exchange Price, or (6) any issue of equity share capital or modification of rights attaching to the Ordinary Shares where prior thereto the Guarantor shall at its own expense and acting reasonably have requested a firm of accountants or an independent investment bank in London of international repute (acting in either case as experts) in each case selected by it and approved in writing by the Trustee (such approval not to be unreasonably withheld or delayed) to determine what (if any) adjustments should be made to the Exchange Price as being fair and reasonable to take account thereof and such firm of accountants or investment bank shall have determined in accordance with the Articles of the Issuer and the Issuer Board Resolution either that no adjustment is required or that an adjustment resulting in a reduction of the Exchange Price is required and, if so, the new Exchange Price as a result thereof and the basis upon which such adjustment is to be made and, in any such case, the date on which the adjustment shall take effect (and so that the adjustment shall be made and shall take effect accordingly);

(iv) procure that no securities (whether issued by the Guarantor or any of its Subsidiaries or procured by the Guarantor or any of its Subsidiaries to be issued) issued without rights to convert into, or exchange or subscribe for, Ordinary Shares shall subsequently be granted such rights exercisable at a consideration per Ordinary Share which is less than 95 per cent. of the Current Market Price per Ordinary Share at close of business on the last dealing day preceding the date of the announcement of the proposed inclusion of such rights unless the same gives rise (or would, but for the fact that the adjustment would be less than one per cent. of the Exchange Price then in effect, give rise) to an adjustment of the Exchange Price and that at no time shall there be in issue Ordinary Shares of differing nominal values, save where such Ordinary Shares have the same economic rights;

(v) not make any issue, grant or distribution or take any other action if the effect thereof would be that, on the conversion of Bonds, Ordinary Shares would (but for the provisions of the Articles of the Issuer and the Issuer Board Resolution) have to be issued at a discount to their nominal value or otherwise could not, under any applicable law then in effect, be legally issued as fully paid;

(vi) not reduce its issued share capital, share premium account or capital redemption reserve or any uncalled liability in respect thereof except (1) pursuant to the terms of issue of the relevant share capital, or (2) by means of a purchase or redemption of share capital of the Guarantor to the extent permitted by applicable law or which would not constitute a capital distribution as permitted by Section 130(2) of the Companies Act 1985 of Great Britain, or (3) a reduction of the share premium account to facilitate the writing off of goodwill arising on consolidation which requires the confirmation of the High Court of Justice in England and Wales (the "High Court") and which does not involve the return, either directly or indirectly, of an amount standing to the credit of the share premium account of the Guarantor and in respect of which the Guarantor shall

have tendered to the High Court such undertaking as it may require prohibiting, so long as any of the Bonds remains outstanding, the distribution (except by way of capitalisation issue) of any reserve which may arise in the books of the Guarantor as a result of such reduction, or (4) where the reduction does not involve any distribution of assets and is effected by way of cancellation for the purposes of a scheme of arrangement pursuant to Section 425 of the Companies Act 1985 of Great Britain, or (5) solely in relation to a change in the currency in which the nominal value of the Ordinary Shares is expressed, or (6) by way of transfer of reserves as permitted under applicable laws and/or (7) where the reduction results in (or would, but for the fact that the adjustment would be less than one per cent. of the Exchange Price then in effect, result in) an adjustment to the Exchange Price;

(vii) if any offer is made to all (or as nearly as may be practicable all) Shareholders (or all (or as nearly as may be practicable all) such Shareholders other than the offeror and/or any associate of the offeror (as defined in Section 430E(4) of the Companies Act 1985 of Great Britain, or any modification or re-enactment thereof)), to acquire all or a majority of the issued ordinary share capital of the Guarantor, or if any person proposes a scheme with regard to such acquisition, give notice of such offer or scheme to the Bondholders at the same time as any notice thereof is sent to its Shareholders (or as soon as practicable thereafter) that details concerning such offer or scheme may be obtained from the specified offices of the Paying, Transfer, Conversion and Exchange Agents and the Registrar and, where such an offer or scheme has been recommended by the Board of Directors of the Guarantor, or where such an offer has become or been declared unconditional in all respects, other than in circumstances constituting an Excluded Relevant Event, use its reasonable endeavours to procure that a like offer or scheme is extended to the holders of any Ordinary Shares issued during the period of the offer or scheme arising out of the exercise of the Conversion Rights and/or to the holders of the Bonds;

(viii) use all reasonable endeavours to ensure that the Ordinary Shares issued upon exchange of any Preference Shares will be admitted to the Relevant Stock Exchange and SWX Swiss Exchange and will be listed, quoted or dealt in on any other stock exchange or securities market on which the Ordinary Shares may then be listed or quoted or dealt in; and

(ix) directly or indirectly, be the beneficial owner of all of the ordinary share capital of the Issuer.

For the above purposes in relation to the Guarantor "ordinary share capital" has the meaning ascribed to it in Section 832 of the Income and Corporation Taxes Act 1988 and "equity share capital" has the meaning ascribed to it in Section 744 of the Companies Act 1985 of Great Britain.

12.3 Undertakings of the Issuer and the Guarantor

Whilst any Bond remains outstanding, the Issuer will, and the Guarantor will procure that the Issuer will, save with the approval of an Extraordinary Resolution of the Bondholders or with the prior written approval of the Trustee where, in the Trustee's opinion, it is not materially prejudicial to the interests of the Bondholders to give such approval:

(i) comply with its obligations under the Articles of the Issuer and the Issuer Board Resolution and not make any amendment to the Articles of the Issuer or the Issuer Board Resolution which would vary, abrogate or modify the rights appertaining to the Preference Shares;

(ii) keep available for issue free from pre-emptive rights out of its authorised but unissued capital such number of Preference Shares as would enable all the unexercised Conversion Rights and any other rights of conversion into, subscription for and exchange into Preference Shares to be satisfied in full;

(iii) not issue any other share capital with rights which are more favourable than the rights attaching to the Preference Shares as respects dividends or payment of the Paid-up Value thereof or on a return of capital or otherwise; and

(iv) not alter the nominal value of the Preference Shares (whether by consolidation, subdivision or otherwise),

provided that the creation or issue of any class of share capital ranking junior to or pari passu with the Preference Shares as respects rights to dividends and to payment of the Paid-up Value thereof on a return of capital or otherwise shall be deemed not to be a variation, abrogation or modification of the rights appertaining to the Preference Shares.

13. Prescription

Claims for the payment of principal, interest and other sums payable in respect of Bonds will become void unless made within ten years (in the case of principal) and five years (in the case of interest), from the Relevant Date (as defined in Condition 22).

14. Meetings of Bondholders, Modification, Waiver and Substitution

14.1 Meetings

The Trust Deed contains provisions for convening meetings of Bondholders to consider any matter affecting their interests including the modification by Extraordinary Resolution of the Bondholders of these Conditions or other provisions of the Trust Deed, the Deed Poll, the Articles of the Issuer or the Issuer Board Resolution (in the case of the Articles of the Issuer and the Issuer Board Resolution which would vary, abrogate or modify the rights appertaining to the Preference Shares). The quorum at any such meeting for passing an Extraordinary Resolution will be one or more persons holding or representing a clear majority in principal amount of the Bonds for the time being outstanding, or at any adjourned such meeting one or more persons being or representing Bondholders whatever the principal amount of the Bonds so held or represented, except that at any meeting the business of which includes the modification of certain of these Conditions, or certain provisions of the Trust Deed, the Deed Poll, the Articles of the Issuer or the Issuer Board Resolution (including, inter alia, those relating to status, conversion and exchange terms and the currency, amount (but not to increase such amount) and the due date of payment of redemption moneys and interest or other amount in respect of the Bonds), the quorum will be one or more persons holding or representing not less than two-thirds, or at any adjourned such meeting not less than one-third, in principal amount of the Bonds for the time being outstanding. An Extraordinary Resolution passed at any meeting of Bondholders will be binding on all Bondholders, whether or not they are present at the meeting.

14.2 Modification and Waiver

The Trustee may agree, without the consent of the Bondholders, to (i) any modification to these Conditions or to the provisions of the Trust Deed, the Articles of the Issuer or the Issuer Board Resolution (in the case of the Articles of the Issuer and the Issuer Board Resolution which would vary, abrogate or modify the rights appertaining to the Preference Shares) or the Deed Poll which in its opinion is of a formal, minor or technical nature or to correct a manifest error or an error which is, in the opinion of the Trustee, proven, or (ii) any other modification which in its opinion is not materially prejudicial to the interests of the Bondholders. The Trustee may also agree without the consent of the Bondholders to the waiver or authorisation of any breach or proposed breach of any of the provisions of the Trust Deed, the Deed Poll, the Articles of the Issuer or the Issuer Board Resolution or of the Conditions of the Bonds which in its opinion is not materially prejudicial to the interests of the Bondholders. The Trustee may also agree without the consent of the Bondholders that an Event of Default which in its opinion is not materially prejudicial to the interests of Bondholders should be treated as such. For the avoidance of doubt, the consent of the Trustee or the Bondholders is not required for an alteration or modification of the Articles of the Issuer or the Issuer Board Resolution in respect of the rights appertaining to the Class A or Class B shares, provided that any such alteration or modification does not, or does not have the effect of, varying, abrogating or modifying the rights appertaining to the Preference Shares. As used above, "Class A shares" or "Class B shares" has the meaning provided for in the Articles of the Issuer.

14.3 Substitution of the Issuer

The Trust Deed contains provisions permitting the Trustee (if it is satisfied that to do so would not be materially prejudicial to the interests of Bondholders) to agree, if requested by the Issuer and subject to such amendment of the Trust Deed and the Deed Poll and such other conditions as the Trustee may require, but without the consent of the Bondholders, to the substitution of any other

company in place of the Issuer, or of any previous substituted company, as principal debtor under the Trust Deed and the Bonds and as party to the Agency Agreement, subject to the Bonds remaining unconditionally and irrevocably guaranteed by the Guarantor as provided in these Conditions and the Trust Deed and being convertible mutatis mutandis as provided in these Conditions into preference shares in the substituted company with like rights mutatis mutandis to the preference shares and to such preference shares being immediately exchangeable for Ordinary Shares mutatis mutandis as provided in the Articles of the Issuer and the Issuer Board Resolution and to the obligations of the Guarantor under the Deed Poll applying mutatis mutandis to such preference shares.

14.4 Notice to Bondholders

Any such modification, waiver, authorisation or substitution shall be binding on all Bondholders and, unless the Trustee agrees otherwise, any such modification or substitution shall be notified to the Bondholders in accordance with Condition 17 as soon as practicable thereafter.

14.5 Exercise of Powers etc.

In connection with the exercise of its powers, trusts, authorities or discretions (including but not limited to those in relation to any proposed modification, waiver, authorisation or substitution as aforesaid) the Trustee shall have regard to the interests of the Bondholders as a class and shall not have regard to the consequences of such exercise for individual Bondholders resulting from their being for any purpose domiciled or resident in, or otherwise connected with, or subject to the jurisdiction of, any particular territory and the Trustee shall not be entitled to require, nor shall any Bondholder be entitled to claim from the Issuer, the Guarantor or the Trustee, any indemnification or payment in respect of any tax consequence of any such exercise upon individual Bondholders.

15. Replacement of the Bonds

If any Bond, is lost, stolen, mutilated, defaced or destroyed it may be replaced at the specified office of the Principal Paying, Transfer, Conversion and Exchange Agent or the Registrar (or any other place of which notice shall have been given in accordance with Condition 17) upon payment by the claimant of the expenses incurred in connection therewith and on such terms as to evidence and indemnity as the Issuer may reasonably require. Mutilated or defaced Bonds, must be surrendered before any replacements will be issued.

16. Indemnification of the Trustee

The Trust Deed contains provisions for the indemnification of the Trustee and for its relief from responsibility, including provisions relieving it from taking any action unless indemnified and/or secured to its satisfaction. The Trustee is entitled to enter into business transactions with the Guarantor, the Issuer or any of their respective Subsidiaries without accounting for any profit resulting therefrom. The Trustee is trustee for the Bonds only and not for the holders of the Preference Shares or Ordinary Shares and as such shall not at any time be responsible for the value, sufficiency or validity of any of the Preference Shares or Ordinary Shares, delivery of the same by the Issuer or the Guarantor, or the Exchange Price. The Trustee shall not be obliged to exercise any voting rights or any other related rights in respect of the Preference Shares or the Ordinary Shares issued pursuant to these Conditions.

The Trustee may rely without liability to Bondholders on a report, confirmation or certificate of any accountants, financial advisers or investment bank, whether or not addressed to it and whether their liability in relation thereto is limited (by its terms or by any engagement letter relating thereto entered into by the Trustee or in any other manner) by reference to a monetary cap, methodology or otherwise. The Trustee shall be obliged to accept and entitled to rely on any such report, confirmation or certificate where the Issuer or the Guarantor procures delivery of the same pursuant to its obligation to do so under a condition hereof and such report, confirmation or certificate shall be binding on the Issuer, the Guarantor, the Trustee and the Bondholders in the absence of manifest error or error which is, in the opinion of the Trustee, proven.

17. Notices

Notices to Bondholders will be valid if published in a leading newspaper having general circulation in the United Kingdom (expected to be the *Financial Times* or such other publication as the Trustee shall approve). Any such notice shall be deemed to have been given on the date of such publication or, if published more than once or on different dates, on the first date on which publication is made.

Where the Bonds are represented by the Global Bond and the Global Bond is held on behalf of a clearing system, notices to Bondholders shall be given by delivery of the relevant notice to that clearing system for communication by it to entitled Accountholders in substitution for publication in a leading newspaper.

Accountholder means a person who is for the time being shown in the records of Euroclear or Clearstream, Luxembourg (other than Clearstream, Luxembourg, if Clearstream, Luxembourg shall be an accountholder of Euroclear, and Euroclear, if Euroclear shall be an accountholder of Clearstream, Luxembourg) as the holder of a particular principal amount of Bonds and in which regard any certificate or other document issued by Euroclear or Clearstream, Luxembourg as to the principal amount of Bonds standing to the account of any person shall be conclusive and binding for all purposes.

18. Further Issues

The Issuer shall be at liberty from time to time without the consent of the Bondholders to create and issue further notes, bonds or debentures either having the same terms and conditions in all respects as the Bonds (or in all respects except for the first payment of interest on them) and so that such further issue shall be consolidated and form a single series with the outstanding notes, bonds or debentures of any series (including the Bonds) or upon such terms as to interest, conversion, premium, redemption and otherwise as the Issuer may determine at the time of their issue. Any further notes, bonds or debentures forming a single series with the outstanding notes, bonds or debentures of any series (including the Bonds) constituted by the Trust Deed or any deed supplemental to it shall, and any other notes, bonds or debentures may, with the consent of the Trustee, be constituted by a deed supplemental to the Trust Deed. The Trust Deed contains provisions for convening a single meeting of the Bondholders and the holders of notes, bonds or debentures of other series in certain circumstances where the Trustee so decides.

19. Enforcement

At any time after the Bonds become due and payable, the Trustee may, at its discretion and without further notice, institute such proceedings against the Issuer and/or the Guarantor as it may think fit to enforce the terms of the Trust Deed and the Bonds, but it need not take any such proceedings unless (a) it shall have been so directed by an Extraordinary Resolution or so requested in writing by Bondholders holding at least one-quarter in principal amount of the Bonds outstanding, and (b) it shall have been indemnified and/or secured to its satisfaction. No Bondholder may proceed directly against the Issuer or the Guarantor unless the Trustee, having become bound so to proceed, fails to do so within a reasonable time and such failure is continuing.

20. Governing Law and Jurisdiction

20.1 Governing Law

The Trust Deed, the Bonds and the Deed Poll are governed by, and shall be construed in accordance with, the laws of England.

20.2 Jurisdiction

The courts of England are to have jurisdiction to settle any disputes that may arise out of, or in connection with, the Bonds and accordingly any legal action or proceedings arising out of, or in connection with, any Bonds ("Proceedings") may be brought in such courts. The Issuer and the Guarantor have in the Trust Deed irrevocably submitted to the jurisdiction of such courts.

20.3 Service of Process

The Issuer, in accordance with the Trust Deed, will appoint the Guarantor's London office, whose address is 4th Floor Panton House, 25/27 Haymarket, London SW1Y 4EN to act as its agent in England to receive, for it and on its behalf, service of process in any Proceedings in England.

21. Contracts (Rights of Third Parties) Act 1999

No person shall have any right to enforce any term or condition of the Bonds under the Contracts (Rights of Third Parties) Act 1999.

22. Definitions

In these Conditions:

"Authorised Denominations" means US$100,000 and higher integral multiples of US$1,000 thereof;

"Bondholder" and "holder" mean the holder of any Bond;

"Bond Guarantee" has the meaning ascribed to it in Condition 2.2;

"Bonds" means the US$375,000,000 4.00 per cent. Guaranteed Convertible Bonds due 2017, and such expression shall include, unless the context otherwise requires, any further bonds issued pursuant to Condition 18 and forming a single series with the Bonds;

"Clearstream, Luxembourg" means Clearstream Banking, société anonyme;

"Current Market Price" means, in respect of an Ordinary Share at a particular date, the simple average of the bid and offer quotations published by or derived from, the Relevant Stock Exchange for one Ordinary Share for the five consecutive dealing days ending on the dealing day immediately preceding such date; provided that if at any time during the said five day period the Ordinary Shares shall have been quoted ex-dividend and during some other part of that period the Ordinary Shares shall have been quoted cum-dividend then:

(a) if the Ordinary Shares to be issued do not rank for the dividend in question, the quotations on the dates on which the Ordinary Shares shall have been quoted cum-dividend shall for the purpose of this definition be deemed to be the amount thereof reduced by an amount equal to the amount of that dividend per Ordinary Share (excluding any associated tax credit and less the tax (if any) falling to be deducted on payment thereof to a resident of the United Kingdom);

(b) if the Ordinary Shares to be issued do rank for the dividend in question, the quotations on the dates on which the Ordinary Shares shall have been quoted ex-dividend shall for the purpose of this definition be deemed to be the amount thereof increased by such similar amount,

and provided further that if the Ordinary Shares on each of the said five dealing days have been quoted cum-dividend in respect of a dividend which has been declared or announced but the Ordinary Shares to be issued do not rank for that dividend the quotations on each of such dates shall for the purposes of this definition be deemed to be the amount thereof reduced by an amount equal to the amount of that dividend per Ordinary Share (excluding any associated tax credit and less the tax (if any) falling to be deducted on payment thereof to a resident of the United Kingdom);

"dealing day" means a day on which the Relevant Stock Exchange is open for business and shares may be dealt in on the Relevant Stock Exchange;

"Euroclear" means Euroclear Bank S.A./N.A.;

"Excluded Relevant Event" means an offer made to all (or as nearly as may be practicable all) Shareholders or all (or as nearly as may be practicable all) such Shareholders other than the offeror and/or any associate of the offeror (as defined in Section 430E(4) of the Companies Act 1985 of Great Britain, or any modification or re-enactment thereof), to acquire the whole or any part of the issued ordinary share capital of the Guarantor or a scheme with regard to such acquisition which:

(a) upon full implementation would result in the Guarantor being a wholly-owned Subsidiary of a body corporate more than 50 per cent. of the share capital having the right ordinarily to vote on a poll at a general meeting of which would be held by persons who received such share capital pursuant to the scheme or offer in their capacity as Shareholders; and

(b) incorporates or is accompanied by arrangements pursuant to which each Bondholder is given a reasonable opportunity to exchange the Bonds held by such Bondholder for bonds to be issued by such new holding company convertible into shares of such new holding company on terms determined by an independent investment bank of international repute in London selected by the Guarantor and approved in writing by the Trustee to be such that the Bondholders are not disadvantaged in comparison with the holders of the ordinary share capital of the Guarantor;

"Final Maturity Date" means 14 August 2017;

"Group" means the Guarantor and its Subsidiary Undertakings and "member of the Group" shall be construed accordingly;

"Guarantor" means Xstrata plc;

"indebtedness for borrowed money" means any present or future indebtedness (whether being principal, premium, interest or other amounts) for or in respect of money borrowed or any notes, bonds, debentures, debenture stock, loan stock or other securities excluding Project Finance Indebtedness;

"Independent Financial Adviser" means an investment bank, bank or financial adviser of international repute appointed by the Guarantor for the relevant purpose and approved in writing by the Trustee (such approval not to be unreasonably withheld or delayed having regard to the interests of the Bondholders) and acting as an expert or, if the Guarantor shall not have appointed such an adviser within 21 calendar days after becoming aware of the need for such appointment hereunder and the Trustee is indemnified and/or secured to its satisfaction against the costs, fees and expenses of such adviser, appointed by the Trustee following notification to the Guarantor;

"Interest Payment Date" has the meaning ascribed to it in Condition 6.1;

"Interest Period" has the meaning ascribed to it in Condition 6.1;

"Issue Date" means the date of initial issue of the Bonds;

"Issuer" means Xstrata Capital Corporation A.V.V.;

"Issuer Board Resolution" means the resolution of the Managing Director of the Issuer containing the terms of, and rights attaching to, the Preference Shares passed on 6 October 2006;

"London business day" means a day (other than a Saturday or Sunday) on which commercial banks and foreign exchange banks are open for business in London;

"London Stock Exchange" means London Stock Exchange plc;

"Material Subsidiary" at any time shall mean any Subsidiary of the Guarantor:

(a) whose turnover (consolidated in the case of a Subsidiary which itself has Subsidiaries but excluding intra-Group items) or whose total assets (consolidated in the case of a Subsidiary which itself has Subsidiaries) at any time equals or exceeds 10 per cent. of the consolidated turnover or, as the case may be, consolidated total assets, of the Guarantor, all as calculated respectively by reference to the then most recent audited consolidated financial statements of the Guarantor and the then most recent annual financial statements (consolidated or, as the case may be, unconsolidated) of the relevant Subsidiary; or

(b) to which is transferred all or substantially all of the business, undertaking and assets of a Subsidiary of the Guarantor which immediately prior to such transfer is a Material Subsidiary, whereupon the transferor Subsidiary shall immediately cease to be a Material Subsidiary and the transferee shall become a Material Subsidiary, provided that the transferee Subsidiary shall cease to be a Material Subsidiary under the provisions of this sub-paragraph (ii) (but without prejudice to the provisions of sub-paragraph (i) above), upon publication of its next audited financial statements,

provided that any Subsidiary whose only or principal business is that of a holding company (within the meaning of Section 736 of the Companies Act 1985 of Great Britain) shall not be a Material Subsidiary for the purposes of this definition.

A report by two Directors of the Guarantor that, in their opinion, a Subsidiary of the Guarantor is or is not or was or was not at any particular time or throughout any specified period a Material Subsidiary shall, in the absence of manifest error, be conclusive and binding on the Trustee and the Bondholders;

"Ordinary Shares" means ordinary shares of the Guarantor, having on the Issue Date a nominal value of US$0.50 each;

"Non-Material Subsidiary" means any Subsidiary of the Guarantor other than a Material Subsidiary;

"Project Finance Indebtedness" means any present or future indebtedness (whether being principal, premium, interest or other amounts) for or in respect of money borrowed or any notes, bonds, debentures, debenture stock or other securities (for the purposes of this definition "Indebtedness") to finance the ownership, acquisition, development and/or operation of projects, assets or installations (including, without limitation, (1) the discovery, mining, extraction, transportation or development (in each case whether directly or indirectly) of metals or minerals, or (2) the development or operation of processing facilities (in each case whether directly or indirectly) related to natural resources including, without limitation, metals smelting, processing and refining) in respect of which the person or persons to whom any such Indebtedness is or may be owed by (in this definition the "Lender") the relevant borrower (whether or not a member of the Group) has or have no recourse whatsoever to any member of the Group (other than a Non-Material Subsidiary) for the repayment thereof other than:

(a) recourse to such borrower for amounts limited to the present and future cash flow or net cash flow from such projects, assets or installations; and/or

(b) recourse to the proceeds of enforcement of any mortgage, charge, lien, pledge or other security interest (for the purposes of this definition an "Encumbrance") given by such borrower over such projects, assets or installations or the income, cash flow or other proceeds deriving therefrom (or given by any shareholder or the like in the borrower over its shares or the like in the capital of the borrower) to secure such Indebtedness, provided that (A) the extent of such recourse to such borrower is limited solely to the amount of any recoveries made on any such enforcement, and (B) such Lender is not entitled, by virtue of any right or claim arising out of or in connection with such Indebtedness, to commence proceedings for the winding-up or dissolution of such borrower or to appoint or procure the appointment of any receiver, trustee or similar person or officer in respect of such borrower or any of its projects, assets or installations (save for the projects, assets or installations the subject of such Encumbrance); and/or

(c) recourse to such borrower generally, or directly or indirectly to a member of the Group, under any form of assurance, undertaking or support, which recourse is limited to a claim for damages (other than liquidated damages and damages required to be calculated in a specified way) for breach of an obligation (not being a payment obligation or an obligation to procure payment by another person or an indemnity in respect thereof or an obligation to comply or to procure compliance by another person with any financial ratios or other tests of financial condition) by the person against whom such recourse is available;

"Relevant Date" means whichever is the later of (i) the date on which such payment first becomes due, and (ii) if the full amount payable has not been received in New York City by the Principal Paying, Transfer, Conversion and Exchange Agent or the Trustee on or prior to such due date, the date on which, the full amount having been so received, notice to that effect shall have been given to the Bondholders;

"Relevant Indebtedness" means (i) any present or future indebtedness (whether being principal, premium, interest or other amounts) in the form of, or represented or evidenced by, notes, bonds, debentures, debenture stock, loan stock or other securities with an original maturity of more than one year which are, with the consent of the Issuer or, as the case may be, the Guarantor, for the time being quoted, listed or ordinarily traded on any stock exchange or recognised over-the-counter or other securities market, and (ii) any guarantee or indemnity in respect of any such indebtedness, excluding Project Finance Indebtedness;

"Relevant Stock Exchange" means at any time, in respect of the Ordinary Shares, the Official List of the UK Listing Authority and/or, as the context requires, the market for listed securities of the

London Stock Exchange or, if the Ordinary Shares are not at that time so listed, the principal stock exchange or securities market on which the Ordinary Shares are then listed or quoted or dealt in;

"Security Interest" means any mortgage, charge, lien (other than a lien arising by operation of law), pledge or other security interest excluding any mortgage, charge, lien, pledge, or other security interest given or assumed in relation to Project Finance Indebtedness;

"Share Exchange Call" shall have the meaning given to it in the Issuer Board Resolution;

"Shareholders" means the holders at any given time of Ordinary Shares;

"Subsidiary" has the meaning ascribed to it under Section 736 of the Companies Act 1985 of Great Britain;

"Subsidiary Undertaking" shall have the meaning given to it by Section 258 of the Companies Act 1985 of Great Britain (but, in relation to the Guarantor, shall exclude any undertaking (as defined in the Companies Act 1985 of Great Britain) whose accounts are not included in the then latest published audited consolidated accounts of the Guarantor, or (in the case of an undertaking which has first become a Subsidiary Undertaking of a member of the Group since the date as at which any such audited accounts were prepared) would not have been so included or consolidated if it had become so on or before that date);

"UK Listing Authority" means the Financial Services Authority in its capacity as competent authority under the United Kingdom Financial Services and Markets Act 2000; and

For the purposes of Conditions 7 and 12 only, (a) references to the "issue" of Ordinary Shares shall include the transfer and/or delivery of Ordinary Shares by the Guarantor or any of its Subsidiaries, whether newly issued and allotted or previously existing, and (b) Ordinary Shares held by the Guarantor or any of its Subsidiaries shall not be considered as or treated as "in issue".

PART VII — SUMMARY OF PROVISIONS RELATING TO THE BONDS IN GLOBAL FORM

The Global Bond contains provisions which apply to the Bonds while they are in global form, some of which will modify the effect of the terms and conditions of the Bonds. The following is a summary of certain of those provisions.

Exchange

The Global Bond is exchangeable in whole but not in part (free of charge to the holder) for definitive registered Bonds (1) if the Global Bond is held on behalf of Euroclear or Clearstream, Luxembourg or any Alternative Clearing System (each as defined under "Notices" below) and any such clearing system is closed for business for a continuous period of 14 days of more (other than by reason of legal holidays) or announces an intention permanently to cease business or does in fact do so by such holder giving notice to the Principal Paying, Transfer, Conversion and Exchange Agent, or (2) the Trustee gives written notice to the Issuer and the Guarantor pursuant to Condition 10 that the Bonds are due and payable.

Definitive bonds issued in exchange for beneficial interests in the Global Bond will by not later than the Global Exchange Date be issued to and delivered to such persons or registered in such name or names as the case may be, as the holder of the Global Bond shall instruct the Registrar and/or Principal Paying Transfer Conversion and Exchange Agent.

"Global Exchange Date" means a day falling not less than 30 days after that on which the notice requiring exchange is given (as specified in such notice) and on which banks are open for business in the city in which the specified office of the Registrar is located and except in the case of exchange pursuant to (1) above, in the cities in which Euroclear and Clearstream, Luxembourg or, if relevant, the Alternative Clearing System are located.

Except as otherwise described herein, each Global Bond is subject to the Conditions and the Trust Deed and, until it is exchanged for definitive registered Bonds, its holder shall be entitled to the same benefits as if it were the holder of the definitive registered Bonds for which it may be exchanged and as if such definitive registered Bonds had been issued on the date of the Global Bond.

Payments

Payments of amounts falling due in respect of a Global Bond will be made against presentation for endorsement and, if no further payment falls to be made on it, surrender of the Global Bond to or to the order of the Principal Paying, Transfer, Conversion and Exchange Agent or such other Paying, Transfer, Conversion and Exchange Agent as shall have been notified to the Bondholders for such purpose. A record of each payment so made will be endorsed in the appropriate schedule to the Global Bond, which endorsement will be prima facie evidence that such payment has been made.

Notices

So long as the Global Bond is held on behalf of Euroclear Bank S.A./N.V., as operator of the Euroclear system ("Euroclear") or Clearstream Banking, société anonyme ("Clearstream, Luxembourg") or such other clearing system as shall have been approved by the Trustee (the "Alternative Clearing System"), notices required to be given to Bondholders may be given by their being delivered to Euroclear and Clearstream, Luxembourg or, as the case may be, the Alternative Clearing System, rather than by notification as required by the Conditions in which case such notices shall be deemed to have been given to Bondholders on the date of delivery to Euroclear and Clearstream Luxembourg or, as the case may be, the Alternative Clearing System.

Prescription

Claims in respect of principal, interest and other amounts payable in respect of the Global Bond will become void unless it is presented for payment within a period of 10 years (in the case of principal) and five years (in the case of interest or any other amounts) from the appropriate Relevant Date (as defined in Condition 22).

Meetings

The holder of the Global Bond shall be treated as one person for the purposes of any quorum requirements of a meeting of Bondholders and, at any such meeting, as having one vote in respect of each US$1,000 principal amount of Bonds for which the Global Bond may be exchanged.

Purchase and cancellation

Cancellation of any Bond represented by the Global Bond which is required by the Conditions to be cancelled will be effected by reduction in the principal amount of the Global Bond on its presentation to or to the order of the Principal Paying, Transfer, Conversion and Exchange Agent.

Conversion

For so long as the Global Bond is held on behalf of any one or more of Euroclear, Clearstream, Luxembourg or the Alternative Clearing System, Conversion Rights (as defined in the Conditions) may be exercised at any time during the Conversion Period by the presentation to or to the order of the Principal Paying, Transfer, Conversion and Exchange Agent of a Global Bond for appropriate notation, together with one or more Conversion Notices duly completed by or on behalf of a holder of a book-entry interest.

PART VIII — USE OF PROCEEDS

Following the publication of these Listing Particulars, it is intended that each Bond will be issued to Trilon International Inc., (a subsidiary of Brookfield) in consideration for the cancellation of the US$375,000,000 4.00%, Guaranteed Convertible Debenture due 2017 issued by the Issuer on 6 September 2005, the waiver of all rights Trilon International Inc. has under such Debenture and the Debenture Deed Poll, and the release of the Issuer and the Guarantor from each of their respective obligations under such Debenture and the Debenture Deed Poll.

PART IX — XSTRATA CAPITAL CORPORATION A.V.V.

History and business

Xstrata Capital Corporation A.V.V., the Issuer, was incorporated as a private company of unlimited duration and with limited liability in Aruba under the Commercial Code of Aruba, as amended, with registered number 13174.0, on 3 April 1992.

The Issuer has no subsidiaries. The Issuer's powers include the lending of monies, the issue of shares, the borrowing of monies and the issue of debt securities. These powers are defined by the articles of the Issuer, which state that the Issuer shall not operate, either inside or outside Aruba, as a credit institution or credit union within the meaning set out in the State Ordinance Supervision Credit System.

The Issuer was incorporated, among other things, to facilitate the financing activities of the Enlarged Xstrata Group. The objects of the Issuer as set out in the articles of the Issuer are, *inter alia*, to invest its assets in all forms of securities and to act as a finance company and to finance, directly or indirectly, or to act as intermediary in respect of, or otherwise to facilitate, the financing activities of the companies belonging to the Enlarged Xstrata Group.

As at the date of these Listing Particulars, the issued capital of the Issuer consists of:

(a) 15,020 Class A shares;

(b) 51 Class B shares

(c) 385,581 Series 1 Preference Shares issued in connection with the 2010 Convertible Bonds; and

(d) 1,327,346 Series 3 Preference Shares issued in connection with the Former Xstrata Group's purchase in August and September 2005 of 73,665,996 Falconbridge Shares.

By an Issuer board resolution, the Issuer also resolved to allot Series 2 Preference Shares in connection with the 2017 Convertible Debenture. No Series 2 Preference Shares have been issued as at the date of these Listing Particulars.

The Issuer is a subsidiary of the Guarantor. Xstrata (Schweiz) AG, a wholly-owned subsidiary of the Guarantor, is the holder of 9,020 Class A shares. Of the 9,020 Class A shares held by Xstrata (Schweiz) AG, only 49 Class A shares carry voting rights. The Guarantor is the holder of 6,000 Class A shares. Of the 6,000 Class A shares held by the Guarantor, none carry voting rights. The Guarantor is the holder of 51 Class B shares. All 51 Class B shares carry voting rights and enable the Guarantor to exercise voting control over the Issuer at all times. The Guarantor is the holder of 385,581 Series 1 Preference Shares. Xstrata (Schweiz) AG is the holder of 796,408 (60 per cent.) of the issued Series 3 Preference Shares and the Guarantor is the holder of 530,938 (40 per cent.) of the issued Series 3 Preference Shares.

It is envisaged that shortly after the date of these Listing Particulars all of the 385,581 Series 1 Preference Shares and all of the 1,327,346 Series 3 Preference Shares in issue will be redeemed by the Issuer. The proceeds of the redemption will be applied on behalf of Xstrata (Schweiz) AG and the Guarantor, in the case of the Series 3 Preference Shares, and on behalf of the Guarantor, in the case of the Series 1 Preference Shares, in subscription for new Class A shares (none carrying voting rights) to be issued by the Issuer. It is envisaged that shortly after the date of these Listing Particulars, the authorised Class A share capital of the Issuer will be increased by means of an amendment of the articles of association of the Issuer to provide for these further issues of Class A shares.

The Issuer's registered office is located at 62 Lloyd G. Smith Boulevard Oranjestad, Aruba telephone +297 588 5888.

The registered agent of the Issuer is IMC International Management & Trust Company N.V.

Director and proxy holder

The director and proxy holder of the Issuer and their respective business addresses are as follows:

Name	Business Address	Function
Marc C. Ingwersen	62 Lloyd G. Smith Boulevard Oranjestad, Aruba	Managing Director
Cecilia J. Lieuw	62 Lloyd G. Smith Boulevard Oranjestad, Aruba	Proxy Holder

The Managing Director is an employee of the Issuer and is remunerated by the Issuer for his services. The Managing Director is the sole member of the board of directors of the Issuer. The Proxy Holder is also an employee of the Issuer and is also remunerated by the Issuer for her services. The Proxy Holder is not a member of the board of directors of the Issuer. The Managing Director and the Proxy Holder do not hold any direct, indirect, beneficial or economic interest in any of the shares of the Issuer.

The Managing Director has no conflict of interest or potential conflict of interest between any of his duties to the Issuer and his private interests and/or duties. As a matter of Aruba law, each director and proxy holder is under a duty to act honestly and in good faith with a view to the best interests of the Issuer, regardless of any other directorships or management positions he or she may hold.

Directors' interests

The Managing Director has no interest in the promotion of, or any property acquired or proposed to be acquired by, the Issuer.

Management

The day-to-day management of the Issuer is undertaken by the Managing Director, who is based in Aruba.

Accounting reference date

The accounting reference date of the Issuer is 31 December.

Auditors

The Issuer has appointed Ernst & Young of Vondellaan 4, Oranjestad, Aruba as its auditor.

PART X — DESCRIPTION OF THE ISSUER'S SHARE CAPITAL AND THE PREFERENCE SHARES

The terms of the Series 4 preference shares (the "Preference Shares") are contained in the articles of the Issuer and the Issuer Board Resolution. The Preference Shares will also have the benefit of the Deed Poll. The holders of the Preference Shares (the "Preference Shareholders") will be entitled to the benefit of, will be bound by, and will be deemed to have notice of, all the provisions of the articles of the Issuer, the Issuer Board Resolution and the Deed Poll.

The Preference Shares, which will be issued in registered form, will be issued upon conversion of the Bonds as described in Condition 7 in Part VI — "Terms and Conditions of the Bonds — Conversion" of these Listing Particulars.

Words and expressions defined in Part VI — "Terms and conditions of the Bonds" of these Listing Particulars have the same meanings in this Part X — "Description of the Issuer's share capital and the Preference Shares", unless the context otherwise requires. References to particular Conditions of the Bonds shall be to the relevant Condition set out in Part VI — "Terms and conditions of the Bonds" of these Listing Particulars.

The articles of the Issuer and the Issuer Board Resolution contain provisions to the following effect:

1. Share capital

(a) The share capital of the Issuer is divided into class A shares (the "Class A shares"), class B shares (the "Class B shares") and non-voting preferred shares.

(b) The directors may, subject as provided in the articles of the Issuer, issue any of the Class A shares, Class B shares or Preference Shares or, as the case may be, shares of any other series of preferred shares on such terms as the directors may determine.

2. Preference Shares

Preference Shares shall only be issued on conversion of Bonds pursuant to the Conditions of the Bonds and the terms of the Trust Deed and shall be issued out of the authorised non-voting preferred share capital at a price, credited as fully paid, of US$1,000 per Preference Share (the "Paid-up Value"), comprising a nominal amount of US$0.50 and a premium of US$999.50.

3. Dividends

(a) Each Preference Share shall, on allotment, and subject to the availability of distributable profits, confer on the holder thereof a right to receive a (net) fixed cumulative dividend at the rate of 4.00 per cent. per annum of the Paid-up Value of each such Preference Share, subject to paragraph 9(b) below, payable semi-annually in arrears in equal instalments (other than the first instalment) on 6 March and 6 September in each year, (each a "Dividend Payment Date") starting on 6 March 2007 in respect of the period from (and including) the Issue Date to (but excluding) 6 March 2007. The dividend payable in respect of each Preference Share for any Dividend Period shall be calculated by applying the fixed cumulative dividend at the rate of 4.00 per cent. to the Paid-up Value of such Preference Share, divided by two and rounding the resulting figure to the nearest cent (0.5 of a cent being rounded upwards). The dividend payable in respect of each Preference Share for any period which is not a Dividend Period shall be calculated on the basis of a 360 day year consisting of 12 months of 30 days each and, in the case of an incomplete month, the number of days elapsed, by reference to the same rate, where "Dividend Period" means each period beginning on (and including) a Dividend Payment Date and ending on (but excluding) the next succeeding Dividend Payment Date.

(b) All dividends payable on the Preference Shares shall accrue from day-to-day. Each Preference Share will cease to accrue dividends from (and including) the date upon which such Preference Share is transferred to any member of the Enlarged Xstrata Group, or its due date for redemption, whichever is earlier. No account will be taken of accrued dividends on an exchange pursuant to a Share Exchange Call.

(c) The fixed cumulative dividends payable in respect of the Preference Shares shall be paid in priority to any dividend in respect of any other class of shares in the capital of the Issuer other than any such class that ranks *pari passu* with the Preference Shares as respects rights to dividends.

(d) The Preference Shares shall not confer any further right of participation in the profits of the Issuer.

(e) The Class B shares shall confer on the holders thereof the right to receive a non-cumulative dividend equal to 2 per cent. per annum on the amount paid up on the Class B shares (subject to a maximum of the nominal value of the Class B shares). The Class B shares shall not confer any further right of participation in the profits of the Issuer.

(f) The Class A shares shall confer on the holders thereof the right to receive any profits of the Issuer available for distribution, after the payment of dividend to the holders of all series of preferred shares (including but not limited to the Preference Shares) and payment to the holders of the Class B shares of their fixed non-cumulative dividend.

(g) The obligations of the Issuer to pay dividends are subject to applicable law in Aruba.

4. Capital

On a winding-up of the Issuer, the assets of the Issuer available for distribution shall be applied in the following priority:

(a) firstly, the Preference Shares together with any other series of non-voting preferred shares ranking *pari passu* with the Preference Shares (including the Series 1 Preference Shares and the Series 3 Preference Shares and which may also include future series of non-voting preferred shares) shall carry the right, to payment of the paid-up value thereof, together with a sum equal to any accrued but unpaid preferential dividend due in respect of such Preference Shares and any other series of non-voting preferred shares ranking *pari passu* with the Preference Shares to be calculated to the date when payment of the return of capital is made and to be payable irrespective of whether or not such dividend has been declared or earned;

(b) secondly, any subordinated non-voting preferred shares in the Issuer shall carry the right to payment of the amount paid up on such shares, together with a sum equal to any accrued but unpaid preferential dividend due in respect of such shares to be calculated to the date when payment of the return of capital is made and to be payable irrespective of whether or not such dividend has been declared or not;

(c) thirdly, the Class B shares shall carry the right to payment of the nominal amount paid up thereon; and

(d) fourthly, any surplus assets then remaining shall be distributed *pari passu* among the holders of the Class A shares, in proportion to their holdings of such shares.

5. Redemption

(a) The Issuer shall redeem all the Preference Shares for cash at their Paid-up Value forthwith upon their respective allotment and issue, save that, where paragraphs 6 and 8(a) below apply, any Preference Shares in respect of which the Share Exchange Call has been made or is deemed to have been made shall not be redeemed forthwith pursuant to the foregoing but shall be redeemed for cash at their Paid-up Value at any time after the first transfer of the same into the name of the Guarantor or its nominee on any date specified by the holder for the time being in any notice (which may be a standing notice) given by the holder to the Issuer requiring such redemption either forthwith or on any subsequent date.

(b) On redemption of a Preference Share, the Issuer will cancel the Preference Share and any certificate relating thereto and such Preference Share may not be re-issued or sold as a Preference Share but shall be available for issue in accordance with the articles of the Issuer.

(c) The obligations of the Issuer to redeem shares are subject to applicable law in Aruba.

6. Share exchange call

If Conversion Rights and Share Exchange Calls are exercised in respect of the Bonds, the Issuer will procure that the Preference Shares issued in respect thereof will be exchanged immediately for Ordinary Shares on the Conversion Date.

A summary of the provisions of the terms of the Preference Shares in this respect is set out in Part VI — "Terms and conditions of the Bonds" of these Listing Particulars.

7. Voting and general meetings

(a) Class A shares and Class B shares shall entitle the holders thereof to receive notice of and to attend at every general meeting of the Issuer and to address such meetings; in addition, Class A shares numbered A1 up to and including A49 and Class B shares numbered B1 up to and including B51 shall entitle the holders thereof to vote at every general meeting of the Issuer. Preference Shares shall entitle the holders thereof to receive notice of general meetings of the Issuer and to attend and to address such meetings, but not to vote thereat.

(b) Whenever the holders of shares are entitled to vote at a general meeting of the Issuer, every holder of Class A shares numbered A1 up to and including A49 who (being an individual) is present in person or by proxy or (being a corporation) is present by representative or by proxy shall have one vote in respect of each such share registered in the name of such holder. The holders of any other Class A shares shall not be entitled to cast any votes in respect of such shares. Every holder of Class B shares numbered B1 up to and including B51 who (being an individual) is present in person or by proxy or (being a corporation) is present by representative or by proxy shall have one vote in respect of each such share registered in the name of such holder. The holders of any other Class B shares shall not be entitled to cast any votes in respect of such shares.

8. Transfers

(a) The Issuer shall procure that any Preference Share in respect of which the Share Exchange Call has been or is deemed to have been made shall forthwith upon allotment and issue of the same be transferred to the Guarantor or its nominee in exchange for the issue to the holder thereof of that number of fully paid Ordinary Shares to which he is entitled upon the making (or deemed making) of the Share Exchange Call. Any such transfer shall be effected by the Issuer (or a person appointed for this purpose by the Issuer) as agent for the holder thereof and the Issuer (or a person appointed for this purpose by the Issuer) is authorised by such holder to execute all such documents and do all such things as may be necessary properly to effect the same, without any cost or liability to, or any further action required by, the holder (save as provided in Condition 7.2).

(b) Transfers of Preference Shares shall be effected by any instrument of transfer in common or usual form or such other form as may be approved by the board of directors of the Issuer. The transferor shall be deemed to remain the holder of a Preference Share until the name of the transferee is entered in the register in respect of it. All instruments of transfer may be retained by the Issuer.

9. Payments

(a) Payments in respect of a Preference Share shall be made by a United States dollar cheque drawn on a bank in New York City and mailed to the holder (or to the first-named of joint holders) of such Preference Shares at his address appearing in the register of shareholders and at his risk.

(b) All payments in respect of the Preference Shares shall be made subject to the deduction of any taxation required by law to be withheld or deducted at source.

(c) In determining amounts to be paid to Preference Shareholders, fractions of one cent will be rounded down to the nearest whole cent.

(d) Any unclaimed dividend may be invested or otherwise made use of by the director of the Issuer for the benefit of the Issuer until claimed and any dividend or other sum payable on any Preference Shares unclaimed after a period of ten years from the date when it became due for payment shall be forfeited and shall revert to the Issuer and the payment by the director of the Issuer of any unclaimed dividend or other sum payable on or in respect of a Preference Share into a separate account shall not constitute the Issuer a trustee in respect of it.

10. Variation of rights

Subject to the provisions of the articles of the Issuer and the Issuer Board Resolution, all or any of the rights for the time being attached to the Preference Shares for the time being issued may from time to time (whether or not the Issuer is being wound up) be varied either (i) by a general meeting of the holders of the Class A shares and the Class B shares after the prior approval of such variation by a special class meeting of the holders of the Preference Shares pursuant to a resolution adopted by at least two-thirds of the votes that can be cast on all issued Preference Shares; or (ii) in accordance with the terms of the Issuer Board Resolution.

PART XI — DESCRIPTION OF THE DEED POLL

Words and expressions defined in Part VI — "Terms and conditions of the Bonds" and Part X — "Description of the Issuer's share capital and the Preference Shares" have the same meanings in this Part XI — "Description of the Deed Poll", unless the context otherwise requires. References to particular Conditions of the Bonds shall be to the relevant Condition set out in Part VI — "Terms and conditions of the Bonds" of these Listing Particulars.

The Deed Poll will contain provisions to the following effect.

1. Guarantee

The Guarantor will unconditionally and irrevocably undertake to each of the Preference Shareholders to make due and punctual payment of all redemption monies, dividends and other amounts expressed to be payable in respect of the Preference Shares or, if Preference Shares shall not have been issued as so required by the Conditions of the Bonds, which would have been payable on such Preference Shares had the same been so issued when so required, on the due date for payment, or if Preference Shares shall not have been so issued as aforesaid, on what would have been the due date for payment had such Preference Shares been so issued, to the extent that the same shall not be paid by the Issuer, regardless of: (i) whether the profits of the Issuer justify the relevant payment of any dividend; (ii) whether the relevant amounts shall be available for distribution or payment by the Issuer; (iii) whether payment thereof shall have been declared or approved by or on behalf of the Issuer or by the Issuer in a general meeting; (iv) whether the payment thereof by the Issuer shall be prohibited by law; or (v) where Preference Shares shall not have been issued as aforesaid, the fact that for whatever reason such Preference Shares shall not have been so issued. Such obligations will constitute direct, unconditional, unsecured and unsubordinated obligations of the Guarantor and will rank *pari passu* with all other unsecured and unsubordinated obligations of the Guarantor from time to time outstanding.

2. Payments

(a) Any payment made or to be made pursuant to the provisions of the Deed Poll shall be made to the persons shown in the register of Preference Shareholders or, in the case of Preference Shares which should have been issued as required by the Conditions of the Bonds and which were are not so issued, the register of Bondholders, in each case maintained by the Issuer at close of business on the seventh London Business Day before the due date for the relevant payment.

(b) All payments made by the Guarantor pursuant to the Deed Poll will be made subject to the withholding or deduction of any taxation required by applicable law to be withheld or deducted at source. The Guarantor will not be required to pay any additional or further amounts in respect of such withholding or deduction.

(c) When making any payments to Preference Shareholders, fractions of one cent will be rounded to the nearest cent (with 0.5 of a cent being rounded upwards).

3. Undertakings

Whilst any Conversion Right remains exercisable, or any Share Exchange Call remains to be satisfied, the Guarantor will, save with the approval of the Bondholders by an Extraordinary Resolution or with the prior written approval of the Trustee where, in the Trustee's opinion, it is not materially prejudicial to the interests of the Bondholders to give such approval, comply with the covenants given by it in the Trust Deed and the Deed Poll. The Guarantor will, in the event of failure of the Issuer so to perform or enforce when due, procure the performance by the Issuer of all the obligations to be performed by the Issuer and the enforcement of the rights of the Issuer in respect of the exercise of Conversion Rights and the making of Share Exchange Calls, the issue of Preference Shares on any such exercise and the exchange of the Preference Shares for Ordinary Shares pursuant to the making of Share Exchange Calls, as referred to in the Conditions of the Bonds and as set out in the articles of the Issuer.

4. Amendments

The Deed Poll may be amended only by deed poll, executed by the Guarantor and expressed to be supplemental, and, for so long as any Bonds are outstanding, only with the approval of an Extraordinary Resolution of Bondholders and, for so long as any Share Exchange Call remains to be satisfied, the approval of an Extraordinary Resolution of Preference Shareholders (for the purposes of which any Preference Shares held by or on behalf of the Guarantor or any of its subsidiaries shall be disregarded and treated as not outstanding) or, with the prior written approval of the Trustee and without the consent of the Bondholders or Preference Shareholders where, in the Trustee's opinion, such amendment is not materially prejudicial to the interests of the Bondholders, or is, in the Trustee's opinion, of a formal, minor or technical nature or is made to correct a manifest or proven error. In forming such opinion, the Trustee shall not be bound to have regard to the consequences (including, without limitation, tax consequences) of such exercise for individual Bondholders, individual Preference Shareholders or any other person resulting from their being for any purpose domiciled or resident in or otherwise connected with or subject to the jurisdiction of any particular territory. Any such amendment shall, unless the Trustee agrees otherwise, be notified to the Bondholders by the Guarantor in accordance with Condition 17.

The Trust Deed contains provisions for convening meetings of Bondholders and Preference Shareholders to consider the modification by Extraordinary Resolution of the provisions of the Deed Poll.

5. Governing law

The Deed Poll will be governed by, and construed in accordance with, English law.

PART XII — DESCRIPTION OF THE FORMER XSTRATA GROUP'S BUSINESS

Overview of the Former Xstrata Group's business

The Former Xstrata Group's business comprises the following four principal businesses:

Coal. The Coal Business has interests in 33 operating coal mines, 19 of which are located in Australia, 13 in South Africa and one in Colombia.

Copper. The Former Xstrata Group incorporates two operating mines, a smelter and a refinery in Australia, one mine in Argentina and one mining and processing operation in the high Andes region of southern Peru.

Zinc. The Former Xstrata Group Zinc Business has zinc smelting operations in Spain and Germany, interests in three operating mines and a lead smelter in Australia and a lead refinery plant in the United Kingdom.

Alloys. The Alloy Business has integrated ferrochrome and vanadium production facilities in South Africa and a platinum group metal ("PGM") Joint Venture with Rustenburg Platinum Mines in South Africa.

In addition to its four principal businesses, the Former Xstrata Group also operates Xstrata Technology, a mining and processing technology business with operations in Australia, South Africa and Chile (and, following the Falconbridge Acquisition, Canada). For further information on Xstrata Technology, see Part I — "Description of the Enlarged Xstrata Group — Xstrata Technology" in these Listing Particulars.

The Guarantor previously had a forestry business in Chile, which was sold in January 2005, and a magnesium recycling business in North America, which was sold in April 2003.

Former Xstrata Group financial information

For financial information in relation to the Former Xstrata Group, see the Xstrata Annual Report and Accounts 2004 (pages 97 to 161 inclusive) and the Xstrata Annual Report and Accounts 2005 (Financial Statements pages 2 to 120 inclusive), each of which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars.

Coal Business summary

Introduction

On a managed basis, the Former Xstrata Group is one of the world's largest producers of export thermal coal, one of the largest producers of export semi-soft/PCI coal and the fifth largest producer of export coking coal. The Coal Business produces a significant amount of coal for sale in the Australian and South African domestic markets. The Cerrejón operation, in which the Enlarged Xstrata Group acquired a one-third interest from Glencore in 2006, exports high-grade thermal coal from Colombia to markets principally in Europe and the Americas.

This portfolio comprises interests in 19 operating coal mines in Australia, 13 operating coal mines in South Africa and the Cerrejón coal mine in Colombia. The Enlarged Xstrata Group focuses on the cost effective production of thermal and coking coal for export and domestic use in coke making/steel production, electricity generation and industrial application.

On 24 August 2006, the Former Xstrata Group and African Rainbow Minerals Limited ("ARM") established a new black controlled coal mining company called ARM Coal (Proprietary) Limited ("ARM Coal"), with operating assets and growth projects in South Africa and participation in the export and domestic thermal coal markets. ARM owns 51% and the Enlarged Xstrata Group owns 49% of the issued share capital of ARM Coal, which holds a 20% interest in the coal operations of Xstrata South Africa, excluding the Goedgevonden project, and a direct 51% interest in the Goedgevonden project. In August 2006, ARM exercised an option to increase its direct interests in the coal operations of Xstrata South Africa (excluding the Goedgevonden project) for a cash investment of ZAR400 million (approximately US$51 million). As a result, historically disadvantaged South Africans will now control approximately 36% of the Coal Business's South African operations.

For further information, see below in this Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — Agreement to establish ARM Coal".

The Guarantor estimates that, on a managed tonnage basis, in 2005, the Former Xstrata Group's Australian operations supplied approximately 32% of Australia's thermal coal exports and approximately 20% of South Africa's thermal coal exports. The Coal Business's Australian operations export primarily into Asia, particularly Japan. Semi-soft coking coal production, on a managed tonnage basis, in 2005 represented approximately 15% of the New South Wales operations' output and coking coal represented approximately 40% of the Queensland operations' output which is exported worldwide. Approximately 19% of the Former Xstrata Group's attributable tonnes in the year ended 31 December 2005 were sold into the Australian and South African domestic markets. In 2005, Cerrejón produced approximately 26 Mt of export thermal coal predominately for the European and United States power generation markets.

The Coal Business exports its coal from seven major coal port facilities, five in Australia (the Port Waratah Coal Terminal and the Port Kembla Coal Terminal in New South Wales and Abbott Point, Dalrymple Bay Coal Terminal and R.G. Tanna/Barney Point Coal Terminals in Queensland), one in South Africa (the Richards Bay Coal Terminal) and one in Colombia (Puerto Bolívar).

The purchasing power of the Australian and South African operations has enabled them to negotiate a number of longer term agreements for the purchase of goods and services required by the Coal Business in those jurisdictions, which include mining equipment and replacement parts, explosives, fuel, tyres and lubricants, as well as freight, rail and port handling services, which to date has enabled the operations access to scarce resources (such as tyres). The supplier base continues to be stable and Xstrata believes the Coal Business has strong relationships with key suppliers in both Australia and South Africa.

The Enlarged Xstrata Group holds most of its Coal Business interests in mines through joint ventures, in which it generally holds a majority interest. Given the relationships between its joint venture partners and its customers, the Guarantor believes that these joint ventures provide the Coal Business with a valuable link to its customer base.

In Australia, the Enlarged Xstrata Group has, either on its own account or through its interests in joint ventures, all underlying mining tenements and it has access (whether under freehold, leasehold or otherwise) to all land that is required for the Coal Business's current mining operations.

The Coal Business's portfolio of operating assets allows management to reduce the impact of variations that can be experienced within a single mining operation and the volatility of a single market. This combination of complementary factors includes:

- access to diverse markets — the Coal Business's product distribution, on a managed tonnage basis in Australia and South Africa, to export coking coal (including semi-soft coal), export thermal coal and domestic thermal coal is approximately 18%, 64% and 18% respectively and the acquisition of the Cerrejón Business has provided increased access to markets in Europe and the Americas;

- a geographical distribution of production between Australia, South Africa and Colombia (in Australia and South Africa production is split approximately as to 51%, 19% and 30% respectively between New South Wales, Queensland and South Africa); and

- a unique combination of open cut and underground production sources and a mixture of own operated mines and mines where production is managed under contract. From this combination, the Guarantor believes the Coal Business has a balanced risk profile from a diverse portfolio of assets with the ability to meet customer coal quality requirements.

The Enlarged Xstrata Group continues to place a priority on cost competitiveness and growth and has been actively involved in the consolidation of the coal industry in Australia and South Africa. Xstrata believes that there is scope for further consolidation of the Australian coal sector and will continue to consider acquisition opportunities as they arise. The Coal Business regularly reviews its coal holdings and from time to time will dispose of assets which are considered non-core or non-strategic.

The Coal Business's attributable proved and probable reserves as at 30 June 2005 were approximately two billion tonnes of coal. In addition, Cerrejón had a saleable reserve base in excess of 900 Mt as at 30 June 2005.

The Coal Business's marketing strategy takes advantage of its substantial production volume of prime quality coals from a diversified asset base. Xstrata believes that the Coal Business's established relationships with coal buyers and a proven track record for stable supply will enable the Coal Business to continue expanding sales to match future production levels. The ability to secure spot sales when required, including for lesser quality thermal coals and into diversified markets, is supported through the Coal Business's relationship with Glencore, a leading coal trader.

See below in this Part XII — "Description of the Former Xstrata Group's business — Coal Business summary — Australian operations — New South Wales operations — Sales and marketing of the New South Wales operations' coal", "Description of the Former Xstrata Group's business — Coal Business summary — Queensland operations — Sales and marketing of the Queensland operations' coal" and "Description of the Former Xstrata Group's business — Coal Business summary — South African operations — Sales and marketing of the South African operations' coal".

The primary focus of the Coal Business's marketing strategy is to maximise the value of its sales of coal products into the export market. The Coal Business will continue to seek to maximise sales into the premium end of the export market, which for its Australian operations is principally the large integrated steel producers and Asian power companies. Xstrata considers that these sectors of the market will continue to be the major growth areas for its Australian thermal and coking coals. The Asian power market has traditionally paid a premium over other coal buyers for Australian thermal coals to ensure secure reliable sources of supply although the price difference to more distant markets is also due to the landed cost competitiveness of other exporting countries.

Located in La Guajira state, in the North-Eastern part of Colombia adjacent to the Venezuelan border, Cerrejón is positioned to supply the import markets of Europe and the Eastern and Gulf Coasts of the United States.

The export marketing activities of the Coal Business, other than for Cerrejón coal, are managed from head office in Sydney for Australian coals and from its Johannesburg office for South African coals. The export coal from Australia and South Africa (other than from the Cumnock mine, which is subject to a separate agreement with Glencore) is subject to the Market Advisory Agreement between Xstrata Coal Marketing AG, Xstrata AG and Glencore International. Cerrejón coal is marketed through CMC Coal Marketing Company Ltd, which is owned by the three Cerrejón joint venture partners.

Coal produced at Cerrejón benefits from relatively low ash content (approximately 8.2%), a low sulphur dioxide emissions profile and high calorific value, making it ideal for power generation. The typical quality of thermal coals mined by the Coal Business in Australia for the export market vary in ash content from 8% to 17% on an air-dried basis and the Coal Business's Australian domestic coal varies in ash content from 22% to 39% on an air-dried basis. The typical gross calorific value of the Enlarged Xstrata Group's Australian washed coals is in the range of 6,300 to 7,300 kilocalories per kilogramme on an air-dried basis. These qualities provide a range of coals to meet customers' needs and also provide an opportunity to blend coals to meet the specifications of particular customers.

Sales to the Australian domestic market are pursued when attractive, both through the renewal of existing contracts and the identification of opportunities. The New South Wales operations are significant suppliers to domestic power stations and the Coal Business is continuing to seek additional sales in this market.

Due to differing margins as well as a wide range of qualities, sales to the domestic market in South Africa will continue to be pursued when attractive, both through the renewal of existing contracts and the identification of new selling opportunities. Coal produced at Cerrejón is exported to markets principally in Europe and the Americas.

The Coal Business's coking coal production is exported predominantly to the major steelmakers in Asia, Europe and South America.

In December 2005, the Former Xstrata Group and its joint venture participants were awarded the exclusive right to apply for a licence to develop the Donkin coal resource block in Cape Breton, Nova

Scotia, Canada. The Enlarged Xstrata Group holds a 66% participating interest in the joint venture. The joint venture participants are Erdene Gold Inc of Canada, with a 20% interest, Atlantic Transbridge Technologies LLC, of the USA with a 9.33%, and Paul Coughlan, with a 4.67% interest. The award of a special licence, in May 2006, allows the Coal Business and its partners to pursue evaluating the feasibility of mining the estimated 200 Mt Donkin thermal and metallurgical coal resource located off Cape Breton Island in the Sydney coal field. Work on the project has commenced, with the evaluation of the resource and the development of feasibility studies expected to take about two years to complete. The budget estimate for the feasibility study until the first quarter of 2008 is C$17.5 million (approximately US$15.5 million). The Enlarged Xstrata Group intends to finance its share of the investment from its general corporate facilities.

In February 2006, the Guarantor, through its wholly-owned subsidiary Xstrata Coal Canada Limited ("Xstrata Coal Canada"), entered into an alliance agreement with Erdene Gold Inc. ("Erdene") of Halifax, Nova Scotia, Canada, pursuant to which Xstrata Coal Canada subscribed for 3,000,000 common shares of Erdene at C$1.00 per share. This currently represents 6.6% of Erdene. Erdene is a Toronto-listed mineral exploration company with a significant profile and a large number of exploration projects in Mongolia, including coal and base metals. Xstrata Coal Canada has a first option to enter into a joint venture and earn a 75% interest in any coal opportunity in Mongolia identified by Erdene by funding all work through completion of a feasibility study. Xstrata Coal Canada will also have the right to participate in other mineral development opportunities with Erdene and has the right to name a nominee to the board of directors of Erdene.

Reserve and resource base

The table below sets out the Former Xstrata Group's attributable coal reserve and resource base broken down between the Australian and South African operations as at 30 June 2005:

	Coal reserves[1]				Coal resources		
			Marketable				
Region	Proved (Mt)	Probable (Mt)	Proved (Mt)	Probable (Mt)	Measured (Mt)	Indicated (Mt)	Inferred[2] (Mt)
New South Wales, Australia	431	291	324	229	1,346	1,504	936
Queensland, Australia	254	159	222	102	547	994	1,747
South Africa	727	131	429	80	1,997	1,029	1,831
Total Coal Business[2]	1,412	580	974	411	3,870	3,526	4,513

The above table does not include reserve or resource information for the Enlarged Xstrata Group's one-third interest in Cerrejón, which was acquired in May 2006. The above table sets out the Former Xstrata Group's attributable coal reserve and resource base, based on the total mine basis figures in the Former Xstrata Group Ore Reserves and Mineral Resources Report. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of the reserve and resource estimates.

(1) Reserves are a subset of resources and are included in the resource estimate. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of reserve amounts.

(2) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Inferred resources" of these Listing Particulars for an explanation of the basis of preparation of inferred resource estimates.

The table below sets out Cerrejón's total mine reserves and resource summary as at 30 June 2005 (the Enlarged Xstrata Group has a one-third interest in the Cerrejón operation, following completion of the Cerrejón Acquisition on 12 May 2006):

Cerrejón reserves and resources (total mine basis), June 2005[1]

	ROM reserves[2]		Saleable reserves[2][3]		Resources[4]		
	Proved	Probable	Proved	Probable	Measured	Indicated	Inferred[5]
Mt	668	222	677	224	692	230	15

Notes:

(1) Additional resources outside the 32 Mtpa pit shell are not included. Resources in the 32 Mtpa mine plan exclude coal resources underlying the Rancheria River. The above information was compiled from version 7 of the Cerrejón geological model which was created in 2004 using MINEX software. See Part II — "Presentation of information — Ore reserve and

mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of the reserve and resource estimates.

(2) Reserves are a subset of resources and are included in the resource estimate. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of reserve amounts.

(3) Saleable Reserves: As sold basis are reserves adjusted for yield losses in the preparation plant (if applicable) and converted to a saleable moisture basis.

(4) Resources are Total Tons in Situ Resources (TTIS). The resources within a defined optimised pit shell which conform to specific quality and thickness criteria and which have been discounted for geological losses.

(5) See Part II — "*Presentation of information* — Ore reserve and mineral resource reporting — basis of preparation — Inferred resources" of these Listing Particulars for an explanation of the basis of preparation of *inferred resource* estimates.

Competent Persons:

Reserves: Ian Douglas, Xstrata Coal (AusIMM)
Resources: Kerry Whitby, Managing Director, McElroy Bryan Geological Services Pty Ltd, Consulting Geologists (AusIMM)

Production

The tables below set out the total mine production and attributable production of the Coal Business broken down between the Australian and South African operations for the years ended 31 December 2004 and 31 December 2005:

	Year ended 31 December	
Total mine production(1)	**2004 Mt**	**2005 Mt**
New South Wales, Australia	33.3	36.1
Queensland, Australia	21.5	20.9
South Africa	19.2	18.6
Total Coal Business	73.9	75.6

The above table does not include production information for The Enlarged Xstrata Group's one-third interest in Cerrejón, which was acquired in May 2006.

(1) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

	Year ended 31 December	
Attributable production(1)	**2004 Mt**	**2005 Mt**
New South Wales, Australia	26.6	28.7
Queensland, Australia	11.8	11.8
South Africa	19.2	18.6
Total Coal Business	57.5	59.0

(1) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

The table below sets out consolidated and attributable production and sales data and average received export free on board coal prices, broken down between Former Xstrata Group's Australian and South African operations and commodity types, for the years ended 31 December 2004 and 31 December 2005:

	Year ended 31 December	
	2004	2005
	Mt (except as otherwise stated)	
Consolidated production[1],[2]		
Queensland coking	5.2	4.8
New South Wales semi-soft coking	6.7	4.8
Australian thermal	28.9	33.6
South African thermal	19.2	18.6
Total consolidated production	**60.0**	**61.8**
Consolidated Australian sales[2],[3]		
Queensland coking export	4.9	4.8
New South Wales semi-soft coking export	6.7	4.8
Thermal export	25.6	28.1
Domestic	4.3	5.0
Total consolidated Australian sales	**41.5**	**42.7**
Consolidated South African sales[2],[3]		
Thermal export	12.9	13.5
Thermal domestic	4.6	6.9
Total consolidated South African sales	**17.5**	**20.4**
Attributable Australian sales[3]		
Queensland coking export	4.9	4.8
New South Wales semi-soft coking export	6.3	4.4
Thermal export	23.8	26.1
Domestic	4.1	4.8
Total attributable Australian sales	**39.1**	**40.1**
Attributable South African sales[3]		
Thermal export	12.9	13.5
Thermal domestic	4.6	6.9
Total attributable South African sales	**17.5**	**20.4**
Average received export FOB coal price		
Queensland coking (US$/t)	65.3	111.5
New South Wales semi-soft coking (US$/t)	47.2	70.3
Australian thermal (US$/t)	40.9	51.2
South African thermal (US$/t)	39.0	48.5

(1) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of production amounts. Production figures have been extracted without material amendment from the Guarantor's management records.

(2) Consolidated production and sales are production and sales as reported in the Former Xstrata Group's consolidated financial statements, before the elimination of minority interests. This excludes production and sales attributable to joint ventures in accordance with their proportionate interests in the relevant mine, but includes 100% of production from subsidiaries that the Former Xstrata Group controls, irrespective of the Former Xstrata Group's shareholding in that subsidiary.

(3) All sales data is ex-mine and therefore does not include sales of third-party purchased coal. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of sales amounts. Sales figures have been extracted without material amendment from the Guarantor's management records.

In 2005, Cerrejón (on a total mine basis) produced approximately 26 Mt of export thermal coal. The Enlarged Xstrata Group has a one-third interest in the Cerrejón operation, following completion of the Cerrejón Acquisition on 12 May 2006.

Financial information

The table below provides selected summary financial information in relation to the Coal Business for the year ended 31 December 2004 and for the year ended 31 December 2005 (which has, in each case, been extracted without material amendment from the Xstrata Annual Reports and Accounts) and for the six months ended 30 June 2006 (which has been extracted without material amendment from the 2006 Xstrata Interim Report):

	Unaudited IFRS Year ended 31 December 2004		Audited IFRS Year ended 31 December 2005		Unaudited IFRS Six months ended 30 June 2006[4]	
Coal Business	US$m	As a percentage of the Former Xstrata Group (%)[3]	US$m	As a percentage of the Former Xstrata Group (%)[3]	US$m	As a percentage of the Former Xstrata Group (%)[3]
Revenue[1]	2,693.4	41.7	3,400.4	42.2	1,692.5	32.7
EBITDA (before non-trading items)[1],[2]	916.0	44.3	1,346.5	43.4	582.7	25.7
EBIT (before non-trading items)[1],[2]	667.8	44.6	1,079.3	42.8	426.4	21.9

The above table does not incorporate financial information for Cerrejón for the year ended 31 December 2004 or for the year ended 31 December 2005. Following the completion of the Cerrejón Acquisition in May 2006, accounting for the Former Xstrata Group's one-third interest in Cerrejón is included in the interim unaudited IFRS financial statements for the six months ended 30 June 2006. See below for financial information for Cerrejón for the years ended 31 December 2004 and 31 December 2005.

(1) Includes minority interests.

(2) IFRS does not define the measures EBITDA (before non-trading items) (being earnings before interest, tax, depreciation and amortisation and before non-trading items) or EBIT (before non-trading items) (being earnings before interest and tax and before non-trading items). For a description of how these amounts are derived, see Part II — "Presentation of information — Presentation of financial information" of these Listing Particulars.

(3) As a percentage of the Guarantor's consolidated EBITDA (before non-trading items) and EBIT (before non-trading items) from continuing operations before common costs and income.

(4) For further information on the financial results of the Former Xstrata Group for the six months ended 30 June 2006, see the 2006 Xstrata Interim Report (which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars) and the press release accompanying the 2006 Xstrata Interim Report (which has been set out in full below in this Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — 2006 Xstrata Interim Report).

In the 12 months ended 31 December 2004, the entire Cerrejón operation recorded combined consolidated EBITDA (before non-operating income/expense) of US$628.8 million and, in the 12 months ended 31 December 2005, the entire Cerrejón operation recorded combined consolidated EBITDA of US$729.6 million (giving figures attributable to Glencore's 33⅓% stake in Cerrejón acquired by the Former Xstrata Group on 12 May 2006 of approximately US$209.6 million and US$243.2 million, respectively). The Cerrejón financial information presented above has been extracted without material adjustment from, or is based upon, "pro-forma" combined financial statements prepared under IFRS as at and for the 12 months ended 31 December 2005, with comparatives for the 12 months ended 31 December 2004.

Australian operations

Overview

In the year ended 31 December 2005, the Coal Business's production, on a managed tonnage basis, in Australia was 57.0 Mt of coal, of which attributable production was 40.4 Mt. Managed export sales during this period amounted to 49.6 Mt (35.3 Mt attributable) and Xstrata believes that this represented approximately 21% of all coal exported from Australia (15% on an attributable export sales basis). Approximately 72% of the Coal Business's 2005 export sales from Australia were thermal coal (74% on an attributable tonnage basis).

New South Wales operations

Overview

The Enlarged Xstrata Group owns interests in 13 operating coal mines and a number of development projects, most of which are located in or close to the Hunter Valley of New South Wales. Longwall mining from South Bulga moved to Beltana in 2003 after which only pillar extraction was in operation at South Bulga. During 2004, the Ravensworth East mine was consolidated with the Mount Owen Complex and production at the South Bulga underground mine ceased as all economically viable reserves had been extracted. The Enlarged Xstrata Group has an attributable interest of 15% in the operator of the Port Waratah Coal Terminal, located at the port of Newcastle, New South Wales. The Enlarged Xstrata Group also has a consolidated interest of 20% in the Port Kembla Coal Terminal, located at the port of Wollongong, New South Wales.

Description of the New South Wales operations' assets

The following table sets out certain information about each of the Enlarged Xstrata Group's principal operating coal mines in New South Wales:

	Coal product type	Type of mine[1]	Life of mine (years)[2]	The Enlarged Xstrata Group's attributable interest (%)	Year ended 31 December 2005		
					Mine production[3] Mt	Attributable production[3] Mt	Attributable sales[4] Mt
Oakbridge Group	**Thermal**						
Bulga Open cut	Thermal	OC	13	68.3	5.1	3.5	3.2
Beltana	Thermal	UG	27	68.3	4.9	3.4	3.4
Baal Bone	Thermal	UG/OC	2	74.1	2.7	2.0	1.8
Macquarie Coal Joint Venture	**Thermal**						
West Wallsend	Thermal	UG	15	80.0	2.3	1.9	1.6
Westside	Thermal	OC	7	80.0	0.7	0.5	0.5
Liddell Group	**Thermal**						
Liddell Open cut	Thermal	OC	18	67.5	2.7	1.9	1.9
Cumnock	**Thermal**	OC	3	84.0	1.1	0.9	0.8
Mount Owen Complex	**Thermal**	OC	14	100.0	6.0	6.0	6.2
United	**Thermal**	UG	5	95.0	2.7	2.5	2.7
Ulan	**Thermal**						
Ulan Underground	Thermal	UG	17	90.0	3.0	2.7	2.6
Ulan OC	Thermal	OC	2	90.0	2.5	2.3	2.3
Ravensworth Group	**Thermal**						
Narama	Thermal	OC	6	50.0	2.5	1.2	1.2
Ravensworth West	Thermal	OC	6	100.0	—	—	—
Total					36.1	28.7	28.3

(1) OC = Open cut. UG = Underground.

(2) Life of mines figures are estimates based on planned and scheduled extraction of reserves.

(3) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of production amounts. Production figures have been extracted without material amendment from the Guarantor's management records.

(4) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis preparation of sales amounts. Sales figures have been extracted without material amendment from the Guarantor's management records.

Mines, projects and developments

Oakbridge Group

The Oakbridge Group includes the Bulga open cut mine, the Baal Bone underground long wall mine, the Baal Bone open cut mine and the Beltana long wall punch mine development, collectively producing both export and domestic thermal coal.

Beltana (Bulga Undergrounds) development began in 2002 and longwall operations commenced following South Bulga's completion of longwall mining in the second quarter of 2003. An upgrade of coal processing metallurgical efficiency was completed in 2005 increasing capacity and improving the marketable coal yield from historic levels.

Macquarie Coal Joint Venture

The Macquarie Coal Joint Venture includes the West Wallsend underground mine, the smaller Westside open cut mine and the Teralba and Cardiff Borehole resources.

The West Wallsend mine plan and mining schedule were updated in 2005 to improve overall performance.

Liddell Group

Mining operations at Liddell are conducted under contract. The Former Xstrata Group entered into a new contract (with the incumbent contractor) in 2004.

Cumnock

Open cut mining operations at Cumnock are conducted under contract. The Former Xstrata Group continues to progress its investigation to determine whether viable mining options exist on the current lease area beyond the completion of mining of existing economically viable reserves which are expected (based on current extraction rates) to be exhausted in late 2008 or early 2009.

Mount Owen

The Mount Owen mine complex was expanded over 2004 and 2005 by combining with an adjacent mining area, Ravensworth East. This mining complex now operates as a single production facility by sharing coal preparation, stockpiling and rail loading infrastructure.

In 2003, the outstanding 34% share of the Glendell project was acquired allowing this area to be included in the adjacent Mount Owen Mining Complex. The development of the complex continues to provide significant synergy benefits to the operating and development areas.

The mining operations at Mount Owen and Ravensworth East are conducted under separate mining contracts by the same independent contractor.

United

The United underground mine operates using continuous miners for development and longwall for extraction. Additional reserves have been acquired from an adjacent lease holder to extend the mine life.

Ulan

The Ulan facilities comprise an underground mine and an open cut mine. The Ulan underground mine is scheduled for upgrade from a 250 metre wide longwall face to a 400 metre "fat face" longwall face during 2006. New equipment has been purchased and is ready for installation.

Ravensworth Group

The Ravensworth Group includes the Narama open cut mine and the new Ravensworth West development.

The Narama resource is fully contracted to supply the local power generator. This contract was upgraded during 2005 by accelerating the annual sales tonnage for the life of the resource.

A new mine at Ravensworth West was approved for development during 2005 and commenced production in 2006 to supply a 1 Mtpa contract to the local power generator.

Sales and marketing of the New South Wales operations' coal

In 2005, approximately 86% of the New South Wales operations' attributable sales were to the export market. The New South Wales operations coal sales are diversified among most of the major

power companies and steel mills in Japan, Korea, Mexico and Taiwan with sales also to Brazil, China, India and Europe when demand and prices support such sales. The Coal Business is one of Australia's largest suppliers of semi-soft coking coal and thermal coal to Japan, on a managed basis. Of all the New South Wales operations' coal sales in 2005, both domestic and export, on a managed tonnage basis, approximately 76% was sold for use in electric power generation, approximately 13% for use in steel mill applications and approximately 11% to general industry (which includes third parties that on-sell to various users).

In 2005, the New South Wales operations' six largest thermal coal customers represented, on a managed tonnage basis, approximately 60% of the New South Wales operations' total exported thermal coal sales while its six largest semi-soft coal customers purchased, on a managed tonnage basis, approximately 83% of the New South Wales operations' total exported semi-soft coal. Domestic coal sales are predominantly to electricity generators in New South Wales.

The following table sets out the geographical breakdown of sales of operating coal mines in New South Wales for the year ended 31 December 2005 on a managed tonnage basis:

	Percentage of sales (%)
Japan	46
Australia	21
Mexico	14
Taiwan	11
Other	8
Total	100

In 2005, the New South Wales operations sold, on a managed tonnage basis, approximately 60% of their total sales volume under coal supply agreements with terms extending beyond one year with either fixed prices or annually renewable terms.

The Coal Business expects to continue to sell a significant portion of its Australian coal under annually renewable and long-term supply agreements, particularly in Asia. However, a proportion of the global thermal coal trade will continue to be conducted in the short-term or spot market. Owing to the New South Wales operations' current product and market sales mix, and its planned increase in production over the medium-term, the Guarantor believes that the Coal Business is well positioned to secure sales opportunities as they emerge.

Transportation of the New South Wales operations' coal

All coal exported by the New South Wales operations is transported to port by rail. Pacific National Limited (previously called Freightcorp) and QR National provide the New South Wales mines with all freight services. Rail freight contracts are negotiated with Pacific National Limited and QR National by producers individually, rather than on an industry basis.

Coal from the Mount Owen complex, Bulga complex, West Wallsend, Liddell, Ulan, Cumnock and United is exported through the Port Waratah Coal Terminal. The terminal facility is owned and operated by Port Waratah Coal Services Limited, in which the Enlarged Xstrata Group has an attributable interest of 15%. It is located in the port of Newcastle, approximately 125 kilometres north of Sydney. The shiploading capacity is approximately 89 Mtpa and the terminal is a common user facility. Coal from Baal Bone is exported through the Port Kembla Coal Terminal, located in the port of Wollongong, New South Wales. It is operated by Port Kembla Coal Terminal Ltd, in which the Enlarged Xstrata Group has a 20% interest. The terminal has a shiploading capacity of approximately 15 Mtpa and is a common user facility.

Queensland operations

Overview

The Queensland operations in Australia were acquired by the Former Xstrata Group in June 2003 as part of its acquisition of MIM.

Xstrata Coal manages both the Oaky Creek and Newlands-Collinsville-Abbot Point ("NCA") joint ventures and the Rolleston and Cook operations. The Enlarged Xstrata Group has conditionally

agreed to the partial sale of its Cook Colliery and surrounding Southern Resource. All of the operating coal mines and projects of material value are located in the Bowen Basin, Queensland.

In the year ended 31 December 2005, the Coal Business's production, on a managed tonnage basis, in Queensland was approximately 20.9 Mt of coal, approximately 94% of which was exported. Approximately 41% of the Queensland operations' production was coking coal, approximately 53% was thermal coal and the remaining 6% was supplied to the domestic market.

Description of the Queensland operations' assets

The following table sets out certain information about each of the Enlarged Xstrata Group's principal operating coal mines in Queensland:

					Year ended 31 December 2005		
Coal mine	Coal product type	Type of mine[1]	Life of mine (years)[2]	The Enlarged Xstrata Group's attributable interest (%)	Mine production[3] Mt	Attributable production[3] Mt	Attributable sales[4] Mt
Oaky Creek NCA	Coking	OC/UG	24	55	6.8	3.7	3.9
Newlands	Thermal	OC/UG	18	55	8.0	4.4	4.5
	Coking	OC	13	55	0.4	0.2	0.2
Collinsville	Thermal	OC	10	55	3.1	1.7	1.9
	Coking	OC	10	55	1.4	0.8	0.6
Cook	Coking	UG	—	95	0.1	0.1	0.1
Rolleston	Thermal	OC	22	75	1.0	0.8	0.5
Total	Thermal				12.2	6.9	7.0
	Coking				8.7	4.8	4.8

(1) OC = Open Cut. UG = Underground.
(2) Life of mine figures are estimates based on planned and scheduled extraction of reserves.
(3) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of production amounts. Production figures have been extracted without material amendment from the Guarantor's management records.
(4) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis preparation of sales amounts. Sales figures have been extracted without material amendment from the Guarantor's management records.

Mines, projects and developments

Oaky Creek Joint Venture ("OCJV")

The OCJV assets comprise two underground longwall-based operations, namely Oaky North and Oaky No. 1 and an open cut mining operation. During 2005, Oaky No. 1 had a second longwall installed. The Oaky Coal Preparation plant was recently upgraded to improve metallurgical efficiency and therefore yield.

Newlands-Collinsville-Abbot Point ("NCA")

NCA includes the Newlands and Collinsville mining operations and the Abbot Point port and coal handling facilities (which are owned by Ports Corporation of Queensland and managed by the Enlarged Xstrata Group).

Newlands

Newlands operations include both open cut dragline and truck and shovel operations and underground continuous miner development and longwall extraction.

Open cut production continues at Newlands from a number of pits deposits. This includes a new hard coking and thermal coal pit (called Wollombi) adjacent to the existing Sutton Creek open cut mine, which commenced prime coking coal production in June 2006 and has a production target of 2 Mt for 2007.

The underground longwall commenced operations in the Newlands North underground in early 2006. Construction of a dense media, spiral and flotation plant is in progress which will increase the metallurgical efficiency and throughput capacity.

Collinsville

Collinsville Coal is an open cut truck, shovel and excavator coal mine, which also has a dragline, operated under a mining contract by an independent operator. The operations produce several brands of coal, including a hard coking coal for export, a domestic hard coking coal for the local Bowen Coke works, a low volatile thermal coal for the local Collinsville power station and export markets and an ultra low volatile coal for export.

Cook

Cook Colliery is an underground bord and pillar operation located 30km south of the township of Blackwater, in Central Queensland's Bowen Basin. The mine operated on a small scale during 2004 and the underground operations are being relocated from the Castor seam to the Argo seam during 2005 and 2006 where a higher proportion of coking coal will be produced. On 20 June 2006, the Guarantor announced that heads of agreement had been signed with Caledon Resources plc for the partial sale of the Enlarged Xstrata Group's Cook Colliery and the surrounding Southern Resource. The Enlarged Xstrata Group will retain the large Northern Resource. A conditional sale and purchase agreement was entered into in respect of the sale on 22 August 2006. The consideration is A$45 million (approximately US$33 million), payable in cash.

Rolleston

Rolleston is located in the southwest of the Bowen Basin, approximately 16 kilometres west of the town of Rolleston and approximately 275 kilometres due west of the coal port of Gladstone.

The open cut dragline mining operations commenced in 2005 following the completion of a 110km rail link to provide domestic thermal coal under a long-term contract and large tonnages of thermal coal to the export market through the port at Gladstone, Queensland. The first coal was railed from Rolleston on time and within budget in October 2005. Further development of the mine will include the construction of a second dragline intended to commence operations in the second quarter of 2007. Rolleston is expected to reach full production of 8 Mtpa in 2008.

Rolleston coal is a low rank, high volatile bituminous coal (an ASTM International classification).

Exploration and project assessment

A significant programme of exploration and project assessments continues to be a priority. The following projects and developments are being funded from the Enlarged Xstrata Group's existing resources.

Wandoan Coal Project

The Wandoan Coal Project is the largest known coal resource in the northern part of the Surat Basin, located in Central Queensland. The Surat Basin contains extensive resources of thermal coal. Development of the basin's coal assets to supply export markets is contingent on construction of suitable infrastructure such as mine-to-port rail links. Pre-feasibility work continues in 2006.

Other exploration

The Enlarged Xstrata Group is currently analysing development options and opportunities at Togara North (which is located midway between the newly developed Rolleston mine and Blackwater), large areas adjacent to the Enlarged Xstrata Group's existing NCA operations, the Redrock area to the south of Oaky Creek and Pentland (a thermal coal tenement located west of Townsville).

Sales and marketing of the Queensland operations' coal

Thermal coal is supplied to various customers in Europe and Asia whilst North Queensland customers use Collinsville's thermal coal mainly for the generation of electricity. Domestic quality

coking coal is supplied to the Bowen Coke works, which is owned and operated by a subsidiary of the Guarantor.

The Bowen Coke works supply coke to the Mount Isa lead smelter as a feed material in the smelting process. It also sells a small amount as coke products to the local market. The plant has a nameplate capacity of 45 ktpa.

The OCJV produces premium quality coking coals for supply to major steel makers in other parts of Japan, Asia, Europe, North Africa, South Africa and South America. These markets are predominantly serviced under term contract arrangements.

The following table sets out the geographical breakdown of sales of the Queensland operations' mines in the year ended 31 December 2005 based on attributable sales:

	Percentage of sales (%)
Japan	38
Korea	23
Europe	18
India	7
Australia	3
Other Asia	4
Other	7
Total	100

In 2005, the Queensland operations sold approximately 96% of their total coking coal sales volume under coal supply agreements with terms extending beyond one year with either fixed prices or annually renewable terms.

Transportation of the Queensland operations' coal

OCJV production is washed at the Oaky Creek coal handling and preparation plant, where coking coal is prepared for export. Treated coal is then transported by rail to the ports of Dalrymple Bay and Gladstone.

The OCJV exports most of its product through the multi-user coal facility at Dalrymple Bay, located just south of Mackay approximately 300 kilometres to the north of the mine.

OCJV production can also be shipped through Gladstone, approximately 390 kilometres to the south-east which has similar loading capabilities to the Dalrymple Bay facility.

Coal from the Newlands and Collinsville Coal Projects is transported by rail to various domestic customers and to the port of Abbot Point for export. Abbot Point is Australia's most northerly coal-shipping port located approximately 20 kilometres north of Bowen. Abbot Point Bulkcoal Pty Ltd, a wholly-owned indirect subsidiary of the Guarantor, operates the port of Abbot Point.

South African operations

Overview

The Enlarged Xstrata Group is South Africa's third largest exporter of thermal coal. In the year ended 31 December 2005, the Former Xstrata Group's attributable production of coal from its South African mines was 18.6 Mt and attributable sales were 20.4 Mt of which approximately 66% was exported. The Guarantor believes that during 2005 the Coal Business produced approximately 20% of all thermal coal exported from South Africa and supplied approximately 4% of all coal supplied to the South African market. The Enlarged Xstrata Group has an interest in 13 operating coal mines, 11 of which are operated by the Enlarged Xstrata Group.

The Enlarged Xstrata Group also has a 20.91% interest in the Richards Bay Coal Terminal. Xstrata believes the Enlarged Xstrata Group's economic interest in the Richards Bay Coal Terminal provides the South African operations with a strategic advantage due to the associated rights it has to use the coal loading facility. Richards Bay Coal Terminal recently announced an expansion programme to increase throughput capacity from 72 Mtpa to 91 Mtpa at a total project cost of approximately

ZAR1 billion, underwritten by the existing Richards Bay Coal Terminal shareholders. If demand exceeds 91 Mtpa, then the shareholders have agreed that the port will be expanded to meet such demand. The incremental 19 Mtpa will have 4 Mtpa allocated to small emerging black empowerment coal producers, 6 Mtpa to the black controlled South Dunes Coal terminal consortium and 9 Mtpa for subscription. If oversubscribed, the subscription capacity will be allocated preferentially to black empowerment coal producers, with existing shareholders (including the Enlarged Xstrata Group) waiving their pre-emptive rights over the incremental capacity. The Guarantor is confident that the Enlarged Xstrata Group will be able to access the export capacity it requires, particularly after the positive endorsements by key stakeholders of its recently concluded black empowerment deal with ARM.

The 11 mines managed by the Enlarged Xstrata Group in South Africa fall into five operating divisions:

- the Tweefontein Division, consisting of the Waterpan, Boschmans and Witcons;
- the iMpunzi Division, consisting of the Phoenix mine, plus the ATC and ATCOM mines. (Total Coal South Africa had a 50% interest in these mines prior to the termination of the joint venture. An arbitration process currently underway will determine the future of these mines. Xstrata is confident it will secure a favourable outcome from this process. For further information, see paragraph 15 of Part XVI — "Additional information — Litigation — Total Coal Arbitration and Court Proceedings" of these Listing Particulars);
- the Southstock Division consisting of the Tavistock and South Witbank mines;
- the Mpumalanga Division, consisting of the Tselentis and Spitzkop mines; and
- the Goedgeronden Division, consisting of the Goedgeronden mini-pit.

The two mines not operated by the Coal Business form part of the Douglas Tavistock joint venture with Ingwe, and include the Douglas and Middelburg mines.

The Enlarged Xstrata Group's major holdings are located within two of the major coalfields of South Africa — the Witbank and Ermelo Coalfields. All of the mines that the Coal Business operates as well as the Enlarged Xstrata Group's non-managed joint venture mines fall within the Witbank Coalfield with the exception of Tselentis and Spitzkop, which are in the Ermelo Coalfield. Production and planning across all the Coal Business's mines are co-ordinated so as to manage the capacity constraints in exporting coal from South Africa.

The South African operations use more labour-intensive mining techniques and less capital-intensive technology in multi-section mechanised underground operations than the Australian operations because there are less complex mining conditions and the South African operations have access to a more cost effective work force. The Coal Business's South African operations have demonstrated significant productivity improvements at a number of the mines over the last three years through the introduction of additional modern mining equipment technology, improving mine operating procedures and training of its employees.

The Enlarged Xstrata Group owns surface rights in freehold in respect of most of the mines falling within the Tweefontein, iMpunzi and Mpumalanga Divisions (see below in this Part XII — "Description of the Former Xstrata Group's business — Statutory authorisations, licences and concessions").

In February 2006, the Guarantor announced the agreement of the Former Xstrata Group and ARM to establish a new black controlled coal mining company, ARM Coal, with operating assets and growth projects in South Africa and participation in the export and domestic thermal coal markets. The transaction completed on 24 August 2006. ARM owns 51% and the Enlarged Xstrata Group owns 49% of the issued share capital of ARM Coal, which holds a 20% interest in the existing coal operations of Xstrata South Africa excluding the Goedgeronden project, and a direct 51% interest in the Goedgevonden project. In August 2006, ARM exercised an option to increase its direct interests in the coal operations of Xstrata South Africa (excluding the Goedgevonden project) for a cash investment of ZAR400 million (approximately US$51 million). As a result, historically disadvantaged South Africans will now control approximately 36% of the Coal Business's South African operations. For further information, see below in this Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — Agreement to establish ARM Coal".

Description of the South African operations' coal assets

The following table sets out certain information about each of the Enlarged Xstrata Group's operating South African coal mines:

Coal mine	Coal product type	Type of mine[1]	Life of mine (years)[2]	The Enlarged Xstrata Group's attributable interest (%)	Year ended 31 December 2005 Mine production[3] Mt	Attributable production[3] Mt	Attributable sales[4] Mt
Tweefontein Division	**Thermal**						
Waterpan	Thermal	OC/UG	26	100	0.5	0.5	0.5
Boschmans	Thermal	UG	26	100	2.1	2.1	2.1
Witcons	Thermal	UG	26	100	1.8	1.8	1.9
Impunzi Division	**Thermal**						
Phoenix	Thermal	UG	8	100	1.0	1.0	2.7

Total					39.7	18.6	20.2

(1) OC = Open cut. UG = Underground.
(2) Life of mine figures are estimates based on planned and scheduled extraction of reserves.
(3) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of mine production amounts. Production figures have been extracted without material amendment from the Guarantor's management records.
(4) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of attributable sales. Sales figures have been extracted without material amendment from the Guarantor's management records.
(5) DTJV comprises the Douglas and Middelburg mines.

Mines, projects and developments

Tweefontein Division

The Tweefontein Division consists of three wholly-owned mines: Waterpan, Boschmans and Witcons.

Two main mining methods are utilised in this division to extract the reserves: contractor truck-shovel open cut methods at Waterpan, Witcons and the Goedgevonden mini-pit; and underground continuous miner bord and pillar extraction at Boschmans and Witcons. The last cut-drill-blast underground section was phased out in early 2006. The productivity of the continuous miner operations has been significantly improved over the last three years through the application of improved planning, measurement and training systems.

iMpunzi Division

The iMpunzi Division consists of the Phoenix mine, plus the ATC and ATCOM mines.

Phoenix and ATC are underground operations principally using highly productive continuous miner methods. Phoenix is still using two cut-drill-blast systems alongside a recently commissioned continuous miner. ATCOM is a dragline open-pit operation utilising a BE1570W walking dragline as its principal earthmover and truck shovel methods for pre-strip and coal recovery.

Southstock Division

The Southstock Division consists of the Tavistock and South Witbank mines which are both underground operations using highly productive continuous miner methods.

Mpumalanga Division

The Mpumalanga Division consists of two wholly-owned operating mines: Tselentis and Spitzkop. Mining is taking place in the B and C Seams of the Ermelo coal field both in underground continuous miner sections and also using contractor truck-shovel methods in generally shallow outcrop areas.

Goedgevondon Division

The Goedgevondon Division consists of the Goedgevondon mini-pit. The Enlarged Xstrata Group is completing a feasibility study to scale-up the Goedgevonden operation.

Joint venture mines managed by Ingwe

The Douglas and Middelburg mines are operated by the Enlarged Xstrata Group's joint venture partner Ingwe under the Douglas/Tavistock joint venture ("DTJV"). Douglas consists of both underground and open pit operations and Middelburg is an open cut mine. In 2005, a pre-feasibility study was carried out in respect of the Douglas Middelburg Optimisation Project (managed by BHP Billiton) designed to extend the economic life of the complex to 2033.

Projects and developments

In South Africa, the Enlarged Xstrata Group is completing a feasibility study to scale up the Goedgevonden operation; the work is well advanced and it is anticipated that approval will be sought from the Board in late 2006 to proceed with the development of an open pit mine which will annually produce 12 Mt of raw coal washing to 3 Mt of export quality coal and between 3 Mt and 4 Mt of coal suitable for supply to Eskom. The timing of the project is contingent upon rail infrastructure and the Richards Bay Coal Terminal expansion discussed below in this Part XII — "Description of the Former Xstrata Group's business — Transportation of the South African operations' coal — Richards Bay Coal Terminal Phase V expansion project".

As of 24 August 2006, ARM Coal, which is 51% owned by ARM and 49% owned by the Enlarged Xstrata Group holds a direct 51% interest in the Goedgevonden project. For further information, see below in this Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — Agreement to establish ARM Coal".

The commencement of the mining of the "5 Seam" resources in the Tavistock and South Witbank areas is planned for early 2007. Planning work aimed at maximising the utilisation of resources around all of the operations is well advanced. Furthermore, conceptual studies to modernise coal beneficiation and handling infrastructure in both the Tweefontein and iMpunzi areas is being progressed; the objective of the work is to identify opportunities to improve yields and reduce coal processing and handling costs. The Coal Business also conducted further studies in 2005, following the pre-feasibility work, for a new processing plant and export load out system located at Boschmans. This new plant is planned to process coal from Boschmans, Waterpan and Witcons to provide improvements in yield and operating cost.

These projects and developments are being funded from the Enlarged Xstrata Group's existing resources.

Sales and marketing of the South African operations' coal

The marketing of the South African operations' coal is managed through Xstrata Coal Marketing AG with the exception of domestic sales and sales with certain African countries which are managed directly by the South African operations (other than domestic sales from the DTJV, which are managed by Ingwe). Xstrata Coal Marketing AG and Xstrata AG have entered into a Market Advisory Agreement with Glencore International in respect of the South African coal exports that it manages. For further information, see Part I — "Description of the Enlarged Xstrata Group — Relationship with Glencore — Commercial relationship — Coal Business" of these Listing Particulars.

On an air-dried basis, the export coals produced by the South African operations have a relatively low sulphur content and low moisture levels. The ash content of the South African operations' high grade export coals is approximately 14% (on an air-dried basis) and have a gross calorific value ranging from 6,400 to 6,700 kilocalories per kilogramme, whereas its low grade export coals have an ash content of approximately 20% (on an air-dried basis) and have a gross calorific value ranging from 5,600 to 6,100 kilocalories per kilogramme. The South African operations' coal produced for domestic customers generally has a higher sulphur and ash content and a comparatively lower calorific value than the South African operations' typical export product.

All sales figures in these Listing Particulars in relation to the South African operations refer to attributable sales. The South African operations' principal marketing strategy is to maximise sales of high margin export coal, using all of its Richards Bay Coal Terminal entitlement. The South African operations sell their incremental tonnage into the domestic market.

Of the South African operations' attributable sales of 20.4 Mt in 2005, approximately 66% was exported. The major market for exports was Europe, with the United Kingdom, Spain, Germany and France being the South African operations' largest European purchasers. Outside of Europe, Israel was the largest importer of the South African operations' export coal production. Of the thermal coal exported by the South African operations in 2005, approximately 95% was sold for use in the power industry and the remainder mainly for use in either metallurgical or industrial applications such as the cement industry. The South African operations' eight largest export thermal coal customers represented approximately 64% of its total South African exports in 2005. The Guarantor does not believe the South African operations are overly dependent upon any one customer.

The following table sets out the geographical breakdown of attributable sales of the Coal Business's South African mines for the year ended 31 December 2005:

	Percentage of sales (%)
European and Mediterranean	59
South Africa	34
Other export	7
Total	100

Of the Coal Business's South African domestic sales of 6.9 Mtpa, approximately 66% was sold to Eskom, the South-African state-owned electricity utility. The major domestic industrial consumers are the paper, sugar, chemical and metallurgical industries and municipal power stations. The South African operations supplied approximately 8.48% of the domestic industrial market in 2005 (which excludes lower margin sales to Eskom for electricity generation and Sasol for the production of synthetic fuels and chemicals, and in which the Coal Business only has an approximately 4.4% market share).

In 2005, approximately 57% of the Coal Business's South African export sales were under spot contracts, with the remaining sales being under term coal supply agreements of one year or longer. In 2005, approximately 87% of the Coal Business's domestic sales were under term contracts, the most significant being with Eskom for the Duvha Power Station, which runs until 2014 with an option to renew for two further 10-year periods.

Transportation of the South African operations' coal

In 2005, all of the coal exported by the Coal Business's South African operations was loaded through the Richards Bay Coal Terminal. The terminal is capable of loading vessels of various sizes and is the only port facility in South Africa with capacity for substantial coal export volumes. The Richards Bay Coal Terminal loaded approximately 69 Mt onto vessels during 2005. All coal that the Coal Business's South African operations export through the Richards Bay Coal Terminal is transported by Spoornet, the State-owned railway operator. In 1995, the shareholders of the Richards Bay Coal Terminal entered into a 10-year agreement under which Spoornet agreed to provide transport of coal exports up to 69.0 Mtpa to the Richards Bay Coal Terminal. These agreements expired in March 2005 and the shareholders entered into a new agreement in 2006, after a transitional period during which they operated under a temporary extension in order to provide the time to fully investigate an expansion of the terminal. It is envisaged that new long-term rail agreements will be agreed to commence from 1 April 2008 onwards. Spoornet transported a

total of approximately 68.6 Mt of coal (as measured at port) during 2005. Xstrata believes that Spoornet is one of the largest rail transporters of coal in the world.

The Enlarged Xstrata Group has a 20.9% interest in the Richards Bay Coal Terminal, which is owned by seven coal producing companies in South Africa including Ingwe (a subsidiary of BHP Billiton) and Anglo Operations Limited (a subsidiary of Anglo American). The terminal is in the deepwater port of Richards Bay, on the north-eastern coastline of South Africa. It has a nominal annual capacity of 72 Mtpa; the actual throughput for 2005 was approximately 69 Mt. The Coal Business's South African operations are entitled to approximately 13.4 Mtpa, after deducting capacity allocated to non-shareholders who are primarily black empowered junior miners, and net entitlement transferred to and from the South African operations' two joint ventures.

Richards Bay Coal Terminal Phase V expansion project

A new shareholders' agreement has been signed by the Richards Bay Coal Terminal Company shareholder, providing for the Phase V expansion project, which is planned to increase total throughput capacity to 91 Mtpa. If demand exceeds 91 Mtpa, then the shareholders have agreed that the port will be expanded to meet such demand. The incremental 19 Mtpa will have 4 Mtpa allocated to small emerging black empowerment coal producers, 6 Mtpa to the black controlled South Dunes Coal terminal consortium and 9 Mtpa for subscription. If oversubscribed, the subscription capacity will be allocated preferentially to black empowerment coal producers. The Guarantor is confident that it will be able to access the export capacity it requires, particularly after the positive endorsements by key stakeholders of its recently concluded black empowerment deal with ARM.

While the capacity of the Richards Bay Coal Terminal has been a constraint on the amount of coal that the Coal Business's South African operations can export and will continue to be a constraint whilst the Phase V expansion is implemented, production and planning across all of the Coal Business's South African operations' mines are co-ordinated to optimise their entitlement to use this facility.

Mineral right applications and conversions

Xstrata Coal South Africa ("XCSA"), the coal division of Xstrata South Africa, has to date received notification that it has been granted 16 new order prospecting rights and has had a number of further prospecting right applications accepted by the Department of Minerals and Energy (the "DME"). XCSA initially applied for 53 prospecting rights (including the 16 new order prospecting rights that it has been granted) of which 20 (in addition to those 16 new order prospecting rights) are currently considered to have reasonable prospectivity. Of these 20 rights, 10 have been granted and, following discussions with the DME, XCSA expects that the other 10 will be granted in due course. XCSA has regular meetings with the DME in this regard.

With regard to the conversion of existing mining authorisations into new order mining rights, XCSA has implemented processes to address, and is making real progress in, the transformational issues required by the legislation and associated black empowerment charter for the mining industry including human resource development and employment equity issues, housing and nutrition, migrant labour and procurement from HDSAs. With regard to the requirement that 15% of the industry be owned by HDSAs by 2009 and 26% of the industry be owned by HDSAs by 2014, XCSA entered into an agreement with ARM in February 2006, which completed on 24 August 2006, to satisfy these conditions. For further information, see below in this Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — Agreement to establish ARM Coal". See also the risk factors in Part IV — "Risk factors — Industry risks relating to the Enlarged Xstrata Group — Australian native title and South African land claims" and "Risk Factors — Industry risks relating to the Enlarged Xstrata Group — South African MPRDA and Empowerment Charter" of these Listing Particulars.

Colombian operations

Overview

The Cerrejón mining operation is a privately-owned, independently-managed joint venture, in which, through wholly-owned subsidiaries, each of BHP Billiton, Anglo American and Xstrata has a one-third indirect interest.

Cerrejón is one of the largest and lowest-cost export open pit coal mining operations in the world, with a saleable reserve base in excess of 900 Mt as at 30 June 2005. The business is involved in the exploration, production, transportation and shipment of high-grade thermal coal, mined at Cerrejón's deposits, to markets principally in Europe and the Americas.

Located in La Guajira state, in the North-Eastern part of Colombia adjacent to the Venezuelan border, Cerrejón is positioned to supply the import markets of Europe and the Eastern and Gulf Coasts of the United States. Total current infrastructure capacity is estimated to be approximately 29 Mtpa and, in the year ended 31 December 2005, Cerrejón produced approximately 26 Mt of export thermal coal predominately for the European and United States power generation markets.

Cerrejón's coal mining operations are carried on across approximately 69,000 hectares, in which four separate areas are contracted: the North, Central and South Zones, and the Patilla Area. Cerrejón owns an export facility 150 kilometres north-east of the mine on the Caribbean coast at Puerto Bolívar which is connected to the mine by means of a dedicated single-track railway line.

In July 2005, as a result of growing demand in Europe and the Americas, the former joint venture partners (BHP Billiton, Anglo American and Glencore International) approved the progressive expansion of Cerrejón's coal capacity to 32 Mtpa by 2008. The high quality export energy coal is produced from open cut mines utilising traditional truck and shovel methods. Production to meet the approved expansion is intended to be sourced from a number of lease areas, which expire in 2034 with the exception of the Oreganal lease that expires in 2022. The cost of this expansion is currently forecast to be approximately US$129.6 million in aggregate (or approximately US$43.2 million for each of the joint venture members).

Mine, projects and developments

The mine, support facilities and services

Cerrejón is one of the largest and lowest-cost export open pit coal mining operations in the world.

Cerrejón's mining operations start with the removal of surface and top soil layers, which are stored for use in rehabilitation.

The overburden is drilled, blasted and loaded out utilising mining shovels and a truck fleet. Coal seams are exposed and prepared for mining, loaded and transported in trucks to stockpiles and crushers. Crushed coal is conveyed into two silos for loading onto trains for transport to Puerto Bolívar.

There are facilities on site at the Cerrejón mine for carrying out maintenance of trucks, tractors and scrapers. Other facilities include reconstruction depots, administrative offices and telecommunications systems between mine, railroad, port and Cerrejón's administrative headquarters and support offices.

There are also administrative headquarters and support offices in the city of Bogota.

Projects and developments

In May 2005, a feasibility study was completed for an expansion of the mine's infrastructure capacity from 29 Mtpa to 32 Mtpa at a current estimated capital cost of approximately US$129.6 million. The expansion was approved in July 2005 by the former shareholders of Cerrejón and is underway, with completion scheduled for 2008. Work has commenced on feasibility studies to expand the coal production and export capacity beyond 32 Mtpa. Such expansion would aim to exploit the existing reserve base to take advantage of growing demand for import coal in Europe and the United States and require further capital expenditure for mining equipment, transport and other infrastructure.

Sales and marketing of Cerrejón's coal

Coal produced at Cerrejón benefits from relatively low ash content (approximately 8.2%), a low sulphur dioxide emissions profile and high calorific value, making it ideal for power generation.

The markets in which Cerrejón sells its product are competitive. Competition is largely on the basis of price. Cerrejón competes with numerous suppliers of thermal coal. In addition, increased production capacity from competitors in other countries may increase competition in the markets in which Cerrejón operates.

Cerrejón is one of the largest export thermal coal mines in the world. Significant Atlantic and global export thermal coal competitors, beside its joint venture partners Anglo American and BHP Billiton, are currently Rio Tinto, Drummond (a privately-owned coal producer with operations in Colombia) and coal producers operating in China, Indonesia and Russia.

CMC Coal Marketing Company Limited markets coal from Cerrejón.

Transportation of Cerrejón's coal

The rail system of 150 kilometres links the mine with the export ocean terminal at Puerto Bolívar on the Caribbean coast. The coal is transported in trains loaded at the silos, through a continuous miner process system. The complete cycle of loading, transportation, unloading at the port and the return of trains to the mine typically takes approximately 12 hours. Additionally, there is a service train that transports supplies, materials and spare parts. The railroad system is electronically controlled from a central traffic station located at the mine.

Puerto Bolívar is one of the largest export coal ocean terminals in Latin America. It receives vessels of up to 175,000 dead weight tonnes, overall length of 300 metres and beam widths of 45 metres. Its navigable channel is 19 metres in depth, 265 metres in width and four kilometres in length.

The main coal facilities at the port are a train unloading station, three stacker-reclaimers, and a lineal shiploader to put the coal into the vessels, at a rate of 4,800 tons per hour.

The port also has a supply pier to receive ships of up to 30,000 tons that arrive with machinery, spare parts, fuel and other materials required for the mining operation.

Cerrejón also uses two airports, one at the mine and a second in Bolívar.

Litigation and indemnities

Cerrejón is engaged in the following litigation which may have a significant effect on Cerrejón and/or on Cerrejón's financial position or profitability:

- *Unpaid royalties.* There are three separate class actions alleging that two of the Cerrejón Operating Companies have not paid due and proper royalties on the coal they have produced. The combined amount of damages sought is approximately US$107 million;
- *Unpaid 2002 income tax.* The Colombian national tax authority is alleging that one of the Cerrejón Operating Companies owes it an additional US$13.7 million in respect of its 2002 income tax assessment; and
- *Privatisation of Cerrejón Zona Norte.* A number of claims have been made and threatened against Cerrejón Zona Norte and others relating to the sale of the Colombian State's interest in Cerrejón Zona Norte. In three of the claims, the amount of damages sought is estimated to be US$67.7 million; however, the claimant has also requested an alternative declaration of damages of US$1.3 billion and a declaration that the privatisation is null and void. In another claim, which is yet to be served on the Cerrejón Operating Companies, the amount of damages sought is approximately US$3.4 billion and one of the claimants in that claim is seeking an alternative declaration that the privatisation is null and void. In another claim, the amount of damages sought from Cerrejón Zona Norte is approximately US$11 million.

Based on its external legal advice, Cerrejón considers that it is not likely that any liability will result from the above claims and the above claims are being and will be vigorously defended by Cerrejón.

Under the Cerrejón Acquisition Agreement, the Cerrejón Vendors have agreed to indemnify the Cerrejón Purchasers in respect of losses arising out of the claims referred to above. The Cerrejón Vendors have no liability under the indemnity for unpaid 2002 income tax unless the amount claimed by the Cerrejón Purchasers exceeds US$3.5 million. The Cerrejón Vendors have no liability in respect of the claims described above for unpaid mining royalties and the claims relating to the privatisation of Cerrejón Zona Norte and its successors, or certain environmental and health claims by the inhabitants of certain areas where Cerrejón operates, unless the amount of the liability of the Cerrejón Vendors exceeds US$2 million.

The Colombian national tax authority has alleged that Carbones del Cerrejón LLC owes it an aggregate amount of US$42 million in respect of Carbones del Cerrejón LLC's 1996 and 1997

income tax assessments. Carbones del Cerrejón LLC and its shareholders are indemnified in respect of this claim by Exxon Mobil Corporation. The 1996 claim was recently resolved in favour of the Colombian national tax authority, with the amount paid to the authority having been successfully claimed and paid under the indemnity.

Former Xstrata Group Copper Business summary

Introduction

The Former Xstrata Group Copper Business, which was acquired by the Former Xstrata Group in June 2003 as part of the acquisition of MIM and expanded in June 2006 with the acquisition of the Tintaya mine and associated satellite deposits in Peru, incorporates two operating mines, a smelter and a refinery in Australia, one mine in Argentina and one mining and processing operation in the high Andes region of southern Peru. Concentrate from the Ernest Henry mine is transported to the Mount Isa smelter where it is processed along with concentrate from the Mount Isa mine into anode copper. Surplus concentrate production is sold to third parties. The anode is refined at the Enlarged Xstrata Group's refinery in Townsville. The Alumbrera mine in Argentina produces a copper-gold concentrate and doré and the Tintaya operation produces copper concentrate and copper cathode, in each case for sale to third parties.

Exploration activity in north-west Queensland is continuing to focus on leveraging value from the Former Xstrata Group Copper Business's strong regional asset and infrastructure base in north Queensland, targeting mineralisation in the Mount Isa/Cloncurry district. The Antapaccay and Coroccohuayco satellite deposits near the Tintaya mine may also provide significant future development potential.

Reserve and resource base

The table below sets out the Former Xstrata Group Copper Business's attributable copper reserves and resources base as at 30 June 2005, with the exception of Alumbrera for which the figures are as at 30 June 2006:

Name of operation	% Ownership	Mining method	Commodity	Ore reserves[1]		Mineral resources[2]		
				Proved	Probable	Measured	Indicated	Inferred

The above table does not include reserve or resource information for Tintaya, which was acquired in June 2006. See below for reserve and resource information for Tintaya.

The above table sets out the Former Xstrata Group Copper Business's attributable copper reserve and resource base, based on (with the exception of Alumbrera) the total mine basis figures in the Former Xstrata Group Ore Reserves and Mineral Resources Report. The figures set out in the table above for Alumbrera are extracted from the Alumbrera Ore Reserves and Mineral Resources Report. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of the reserve and resource estimates.

(1) Reserves are a subset of resources and are included in the resource estimate. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of reserve amounts.

(2) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Inferred resources" of these Listing Particulars for an explanation of the basis of preparation of inferred resource estimates.

Tintaya has Proved and Probable Ore Reserves of 91 Mt, comprising copper oxide ore at an average 1.63% copper grade and copper sulphide ore at an average 1.31% copper, as at 30 June 2005. At that date, Tintaya had a further 24 Mt of Inferred Resources at 1.25% copper grade.

Production

The tables below set out the total and attributable mine production and attributable smelter and refinery production of the Former Xstrata Group Copper Business (broken down between the Former Xstrata Group Copper Business's three copper mines) for the years ended 31 December 2004 and 31 December 2005.

Copper production(1)	Type of mine(2)	Life of mine (years)(3)	The Enlarged Xstrata Group's attributable interest (%)	Year ended 31 December 2004 Mine production(5)	2004 Attributable production(5)	2005 Mine production(5)	2005 Attributable production(5)
				Tonnes			
Mount Isa	UG	13	100	170,197	170,197	177,482	177,482
Ernest Henry Mine	OC	7	100	114,007	114,007	129,010	129,010
Bajo de la Alumbrera(4)	OC	10	50	176,439	88,220	187,317	93,659
Total Former Xstrata Group Copper Business				460,643	372,424	493,809	400,151

The above table does not include production information for Tintaya, which was acquired in June 2006. Tintaya produces around 120,000 tpa of high quality copper cathode and concentrate per annum.

(1) See Part II — "Presentation of information — Ore reserve and mineral resources reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

(2) UG=Underground. OC=Opencut.

(3) Life of mine figures are estimates based on planned and scheduled extraction of reserves.

(4) The Enlarged Xstrata Group has a 50% interest in the mines' operating company, Minera Alumbrera Limited.

(5) These production figures refer to contained copper, produced from ore (excluding reprocessed slag).

Attributable smelter and refinery production(1)	Year ended 31 December 2004	2005
	Mt	
Mount Isa Copper Smelter (anode)	236,252	220,263
Townsville Refinery (refined)	237,621	219,198

(1) These production figures refer to contained copper.

Financial information

The table below provides selected summary financial information in relation to the Former Xstrata Group Copper Business for the year ended 31 December 2004 and for the year ended 31 December 2005 (which has, in each case, been extracted without material amendment from the Xstrata Annual

Reports and Accounts) and for the six months ended 30 June 2006 (which has been extracted without material amendment from the 2006 Xstrata Interim Report):

Former Xstrata Group Copper Business	Unaudited IFRS Year ended 31 December 2004		Audited IFRS Year ended 31 December 2005		Unaudited IFRS Six months ended 30 June 2006[4]	
	US$m	As a percentage of the Former Xstrata Group (%)[3]	US$m	As a percentage of the Former Xstrata Group (%)[3]	US$m	As a percentage of the Former Xstrata Group (%)[3]
Revenue[1]	1,598.3	24.7	2,007.8	24.9	1,718.2	33.2
EBITDA (before non-trading items)[1],[2]	856.7	41.5	1,131.1	36.5	1,184.0	52.3
EBIT (before non-trading items)[1],[2]	644.3	43.0	919.5	36.5	1,076.8	55.3

The above table does not incorporate financial information for Tintaya for the year ended 31 December 2004 or for the year ended 31 December 2005. Following the acquisition of Tintaya in June 2006, accounting for Tintaya within the Former Xstrata Group is included from the date of its acquisition in the interim unaudited IFRS financial statements for the six months ended 30 June 2006. See below for financial information for Tintaya for the year ended 31 December 2005.

(1) Includes minority interests, but excludes share of results from associates.

(2) IFRS does not define the measures EBITDA (before non-trading items) (being earnings before interest, tax, depreciation and amortisation and before non-trading items) or EBIT (before non-trading items) (being earnings before interest and tax and before non-trading items). For a description of how these amounts are derived, see Part II — "Presentation of information — Presentation of financial information" of these Listing Particulars.

(3) As a percentage of the Guarantor's consolidated EBITDA (before non-trading items) and EBIT (before non-trading items) from continuing operations before common costs and income.

(4) For further information on the financial results of the Former Xstrata Group for the six months ended 30 June 2006, see the 2006 Xstrata Interim Report (which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars) and the press release accompanying the 2006 Xstrata Interim Report (which has been set out below in full in this Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — 2006 Xstrata Interim Report).

For the year ending 31 December 2005, Tintaya's revenue was US$389 million, EBITDA was US$250 million and it generated profit before tax (before workers' profit share) of US$196 million. The Tintaya financial information presented above has been extracted without material adjustment from, or is based upon, financial statements prepared under Peruvian GAAP as at and for the year ended 31 December 2005.

Mining operations

Mount Isa

Total Mount Isa mine production amounted to approximately 177 kt of copper in concentrate from ore in the year ended 31 December 2005.

Copper operations at Mount Isa, located in North West Queensland, include three underground mines (X-41, Enterprise and 1900 Orebody), with a flotation concentrator, copper smelter and associated infrastructure. The Mount Isa operations are 100% owned by the Enlarged Xstrata Group.

Ore is processed in a conventional copper concentrator with a throughput capacity of 7 Mtpa. Concentrates are smelted in the Mount Isa smelter to produce copper anodes.

During 2004, the development of the Northern 3500 underground copper orebody at Mount Isa's Enterprise copper mine was approved. The project will provide an additional high-grade mining zone in Enterprise, enabling the mine to maintain its rated capacity of 3.5 Mtpa and improve the utilisation of the existing hoisting and concentrator capacity. Initial production is scheduled to commence in 2007.

The Former Xstrata Group Copper Business has established a dedicated project team at Mount Isa to evaluate the potential for exploiting known resources contained within the 500 orebody and "halo" mineralisation surrounding the 1100 orebody. Pre-feasibility work is scheduled to commence on both of these projects during 2006, with initial resource estimates expected by early 2007.

Ernest Henry

The Ernest Henry copper-gold mine, located approximately 38 kilometres northeast of Cloncurry in northwest Queensland, commenced operation in 1997. Ernest Henry operations are 100% owned by the Enlarged Xstrata Group.

The copper-gold mine produced approximately 129 kt of copper in concentrate and 167,000 ounces of gold in concentrate in the year ended 31 December 2005.

The Ernest Henry Mine is an open pit operation. Mining of ore is scheduled to cease in 2009, although ore from the long-term ore stockpiles will be processed until 2012. The resource is open at depth and the potential to extend the mine life through underground mining is under investigation.

The plant is a conventional concentrator with the capacity to process up to 11 Mtpa of ore to produce flotation concentrate. The copper-gold ore is crushed in a gyratory crusher, ground in a SAG-ball mill, and floated for the production of a copper-gold concentrate which is predominately trucked to Mount Isa for smelting with the excess shipped to Townsville for transport to third-party smelters.

Alumbrera

The Alumbrera copper-gold mine in Argentina produced 187 kt of copper in concentrate and 577,000 ounces of gold in concentrate and doré in the year ended 31 December 2005.

The Enlarged Xstrata Group holds a 50% interest and management rights in Minera Alumbrera Limited ("MAA"), the operating company of the Alumbrera mine, with Goldcorp Inc. (following its merger with Wheaton River Minerals Ltd. in 2005) and Northern Orion Resources Inc. holding 37.5% and 12.5% respectively. MAA has an interest in the proceeds of the Alumbrera mine under an agreement with a state owned corporation in Argentina (referred to by its Spanish acronym "YMAD") which owns the deposit. Under the terms of the agreement, MAA has the right to a 100% working interest in the mine. The Alumbrera project began commercial production in 1998. Under the project documentation, following recovery of the initial capital costs by the joint venture parties, YMAD is entitled to a 20% net proceeds royalty payment payable on a quarterly basis for the balance of the mine life, which is currently estimated at 10 years. The first such royalty payment of US$33 million was paid to YMAD in August 2006, after taking into account previous advance payments totalling US$16 million which in 1997 were agreed to be made to YMAD over subsequent periods to assist the local community.

The Alumbrera project began commercial production in 1998. The mine is located in the Province of Catamarca in North West Argentina. Alumbrera comprises the following principal facilities: an open pit mine and concentrator; a 316 kilometre long concentrate slurry pipeline; a 202 kilometre power line; a filter plant; and port and handling facilities near Rosario on the Paraná River. Copper ore is mined from an open pit mine and processed in a concentrator. The processing plant is a conventional flotation concentrator using semi-autogenous grinding mills, followed by ball mills, flotation circuits, and concentrate thickeners. The processing produces a copper concentrate containing gold and a separate gold-silver doré is produced from the gravity circuit. The final copper concentrate is thickened and then is pumped via a slurry pipeline to a filter plant located near Tucuman. The filter plant produces a low-moisture cake, which is loaded onto rail cars for transport to the MAA port facilities at Puerto General San Martin for shipment to third party smelters.

A further expansion to the grinding circuit of the Alumbrera concentrator, which is expected to increase mill throughputs by approximately 8%, from 37 Mtpa to 40 Mtpa, was approved in June 2005. The project is scheduled for commissioning in December 2006. The expansion is aimed at further improving mill productivities, maintaining a more consistent production profile and fully utilising the downstream capacity of the pipeline and filter plant.

Following the addition of 120 million tonnes of reserves to the ore reserve base at Alumbrera in 2004 and 2005, Alumbrera management continued with the in-pit resource definition programme in 2006, with the objective of further extending the ore reserve base at the mine during 2006. In addition, the Former Xstrata Group Copper Business has continued its Alumbrera district exploration programme independently of the Alumbrera joint venture work. Exploration drilling at the Filo Colorado prospect in Catamarca is expected to commence in the second half of 2006, on completion of access road construction.

Tintaya

Tintaya is located in the Espinar province, southern Peru, and consists of an open pit mine and processing operations, comprising both a copper concentrator for sulphide ore and a solution extraction/electrowinning ("SX/EW") processing plant for oxide ore. SX/EW is a two-stage process that first dissolves oxide copper into solution and upgrades copper ions from low-grade leach solutions into a concentrated electrolyte, and then deposits pure copper onto cathodes using an electrolytic procedural. Both copper concentrates from the sulphide ore and cathodes from the SX-EW plant are trucked to the port of Matarani.

The nearby Antapaccay and Coroccohuayco satellite deposits may also provide significant future development potential.

Tintaya produces around 120,000 tones of high quality copper cathode and concentrate per annum, and has significant growth potential. Tintaya has Proved and Probable Ore Reserves of 91 million tonnes, comprising copper oxide ore at an average 1.63% copper and copper sulphide ore at an average 1.31% copper, as at 30 June 2005. In addition, at that date Tintaya had a further 24 million tones of Inferred Resources at 1.25% copper.

Smelting and refining operations

Isa copper smelter

The Isa copper smelter, which utilises ISASMELT furnace technology, is part of the Mount Isa operations with a current nameplate capacity of 240 ktpa of anode copper. The concentrate feed sources are from the adjacent Mount Isa copper concentrator and the Ernest Henry mine. Anode copper is the primary product from the smelter, which is sent by rail to the Enlarged Xstrata Group's Townsville copper refinery.

A project was completed in the first half of 2006 to construct a leaching plant to recover around 2,500 tpa of additional copper from the electrostatic precipitator dust in the Mount Isa copper smelter.

In November 2004, capital expenditure was approved to expand the capacity of the Mount Isa copper smelter and improve its efficiency. The project comprises the installation of a second rotary holding furnace, a copper slag cleaning furnace and associated plant and equipment. These are all designed to increase the smelter's nameplate capacity from 240,000 tpa of anode copper to 280,000 tpa of anode copper and to obviate the current need for slag re-treatment through the smelter. This project is being progressively commissioned in the second half of 2006. Further enhancements, including two additional oxygen plants to achieve a production capacity of 300,000 tpa, are planned by mid-2007.

The smelter is connected to a third party acid plant which treats sulphur dioxide gases from the primary and secondary smelting stages. Approximately 80-85% capture is currently achieved and following additional incremental capital investment, capture levels are expected to reach 90-95% in the next few years.

Townsville

The Townsville operations encompass a copper refinery, port operations, marketing, customer services and logistics.

Copper refinery

The copper refinery in Townsville produces 99.997% pure LME Grade A copper cathode, using ISAPROCESS technology (which was developed by Xstrata Technology). The plant currently has a nameplate capacity of 280,000 tpa of cathode copper, although capacity is constrained by the throughput of anode copper from the Mount Isa copper smelter. Capacity is expected to increase to 300,000 tpa as the anode production increases. A facility for producing stainless steel cathodes for use in the ISAPROCESS technology adjoins the refinery. Copper produced using ISAPROCESS technology accounts for over 30% of global refined copper production.

Townsville port operations

The facility is at the Port of Townsville in North Queensland. Bulk copper and zinc concentrates are received by rail and transferred to covered storage before ship loading. The site also handles copper cathode and lead bullion.

The bulk handling operation includes a rail car dumper, conveyors, covered storage, conveyors to ship loading, and cranes with "clam shell" buckets for ship unloading. Ships of 45,000 tonnes capacity can be received at the berths.

Sales and marketing

Concentrates from the Mount Isa and Ernest Henry operations which are not processed in the Mount Isa copper smelter are sold to Glencore International under the terms of a concentrate off-take agreement. Copper cathode from the Townsville refinery is sold to third parties in both the Australian market as well as the export market. Copper cathode destined for the export market is sold to Glencore under terms of an off-take agreement. For further information, see Part I — "Description of the Enlarged Xstrata Group — Relationship with Glencore — Commercial relationship — Copper Business" of these Listing Particulars.

The Alumbrera concentrate is of high quality and consistency with high gold value. Approximately 90% is sold under smelter or trader frame contracts and the remainder is sold into the spot market.

Projects and developments

Las Bambas

In August 2004, the Former Xstrata Group acquired rights to explore and develop the Las Bambas copper-gold-molybdenum project in southern Peru for US$120 million. Exploration is underway, with a workforce of 600 employees and contractors at the site.

In 2005, 56,000 metres of diamond drilling for exploration and resource definition were completed in the Ferrobamba, Chalcobamba and Sulfabamba deposits. First year drilling results indicated three high potential skarn and porphyry resource areas, which could form the base of a major 200-250 ktpa copper, gold and molybdenum operation, with further upside from other satellite deposits. The 2006 drilling programme, comprising an additional 100,000 metres to improve definition of the lateral and depth continuity of these three deposits, and to test two of the satellite deposits, is nearing completion. Another major drilling programme is planned for 2007 to bring the main deposits to "Indicated Mineral Resource" and "Measured Mineral Resource" status.

Roseby

In March 2005, the Former Xstrata Group Copper Business agreed to invest in a listed exploration company, Universal Resources Limited. The investment provides the Former Xstrata Group Copper Business with the right to explore and options to acquire 51% of the Roseby copper deposits in the Mount Isa Inlier in north west Queensland. The investment in Universal is being used to part-fund an exploration project undertaken by the Former Xstrata Group Copper Business for additional copper sulphide mineralisation within the Roseby tenement area during 2005 and 2006. Known as the Sulphide Extension Exploration Project ("SEEP"), principal exploration targets are expected to be beneath and adjacent to the native copper deposits within the Roseby Feasibility Project. Drilling in the SEEP commenced in the second half of 2005, following delineation of the more prospective areas.

Tampakan

The Enlarged Xstrata Group holds an option to acquire 62.5% of the Tampakan copper-gold deposit in the Philippines. Agreement was reached with the current project owner Indophil Resources on the detailed scope and resourcing required to complete a project pre-feasibility study and progress is well advanced on that study. The mineral resource estimate was updated in the first quarter of 2006 using drilling results for the period to February 2006 and increased metal prices. The new estimate represents a significant increase in resource size and confidence. Using a cut-off grade of 0.3% copper grade, the measured, indicated and inferred resource estimate increased to 1.9 billion tonnes of ore at 0.6% copper and 0.2 grams per tonne of gold.

Former Xstrata Group Zinc Business summary

Introduction

Around half of all zinc currently consumed is used for galvanizing steel, which is an environmentally friendly method of protecting steel against corrosion. Zinc also finds application in the manufacture of die-cast alloys, brass and the production of zinc oxides and chemicals.

The Former Xstrata Group Zinc Business's zinc and lead operations are located in northern Spain, northern Germany, Australia and the UK. They comprise: the San Juan de Nieva zinc smelter and the Arnao zinc semis plant in Asturias, Spain; the Hinojedo roasting plant in Cantabria, Spain; the Nordenham zinc smelter near Bremerhaven in northern Germany; the Mount Isa, George Fisher-Hilton and Black Star zinc-lead mines in Queensland, Australia; the McArthur River zinc-lead mine in the Northern Territory, Australia; and the Northfleet lead refinery located in UK.

The Former Xstrata Group Zinc Business's main activities are the production of zinc concentrates and zinc and lead metal.

Ore from the Mount Isa underground (which closed at the end of 2005) and Black Star open cut zinc-lead-silver mines and the George Fisher-Hilton mine is concentrated at Mount Isa producing separate zinc and lead concentrates. The zinc concentrate is used by the Former Xstrata Group Zinc Business's zinc smelters and sold to third parties, while the lead concentrate is smelted on the site at the Mount Isa lead smelter, and the lead bullion shipped to the Northfleet lead refinery in the UK for processing. The McArthur River mine produces a bulk zinc-lead-silver concentrate, which is sold to third parties.

Reserve and resource base

The table below sets out the Former Xstrata Group Zinc Business's attributable zinc, lead and silver reserves and resource base as at 30 June 2005:

Name of operation	% Ownership	Mining method	Commodity	Ore reserves[1] Proved	Ore reserves[1] Probable	Mineral resources Measured	Mineral resources Indicated	Mineral resources Inferred[2]

Definitions

OC = open-cut; UG = underground

The above table sets out the Former Xstrata Group Zinc Business's attributable zinc, lead and silver reserve and resource base, based on the total mine basis figures in the Former Xstrata Group Ore Reserves and Mineral Resources Report. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of the reserve and resource estimates.

(1) Reserves are a subset of resources and are included in the resource estimate. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of reserve amounts.

(2) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Inferred resources" of these Listing Particulars for an explanation of the basis of preparation of inferred resource estimates.

(3) On 2 August 2006, the Former Xstrata Group Zinc Business announced that reserves increased at Black Star and George Fisher from 48 million tonnes in 2004 to 66 million tonnes in 2005, with current total reserves of 81 million confirmed, as follows:

George Fisher	48.8Mt@8.6% zinc, 4.9% lead and 100g/t silver
Black Star	32.3Mt@5.1% zinc, 3.2% lead and 61g/t silver
Total	81.1Mt@7.2% zinc, 4.2% lead and 84g/t silver

(4) Since acquiring from ANT Minerals Pty Ltd the 25% interest it did not already own in December 2005, the Former Xstrata Group has had a 100% interest in the McArthur River mine.

Production

For the year ended 31 December 2005, the Former Xstrata Group Zinc Business's total zinc metal production was approximately 649 kt.

The tables below set out the mine, smelter and refinery production of the Former Xstrata Group Zinc Business broken down between the Former Xstrata Group Zinc Business's mines, smelters and refineries for the years ended 31 December 2004 and 31 December 2005:

				Year ended 31 December				
				2004	2005			
Zinc, lead and silver production[1]	Commodity	Type of mine[2]	Life of mine (years)[3]	The Enlarged Xstrata Group's attributable interest (%)	Mine production	Attributable production	Mine production	Attributable production

[1] Production figures in tonnes for lead and zinc and kozs for silver. Production figures refer to contained metal. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" for an explanation of the basis of preparation of the production amount. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

[2] UG = Underground.

[3] Life of mine figures are estimates based on planned and scheduled extraction of reserves.

[4] Since acquiring from ANT Minerals Pty Ltd the 25% interest it did not already own in December 2005, the Former Xstrata Group has had a 100% interest in the McArthur River mine. Attributable production figures for the year ended 31 December 2005 are nevertheless calculated as 75% of total mine production for the whole of 2005.

Financial information

The table below provides selected summary financial information in relation to the Former Xstrata Group Zinc Business for the year ended 31 December 2004 and for the year ended 31 December 2005 (which has, in each case, been extracted without material amendment from the Xstrata Annual

Reports and Accounts) and for the six months ended 30 June 2006 (which has been extracted without material amendment from the 2006 Xstrata Interim Report):

Former Xstrata Group Zinc Business	Unaudited IFRS Year ended 31 December 2004		Audited IFRS Year ended 31 December 2005		Unaudited IFRS Six months ended 30 June 2006[4]	
	US$m	As a percentage of the Former Xstrata Group (%)[3]	US$m	As a percentage of the Former Xstrata Group (%)[3]	US$m	As a percentage of the Former Xstrata Group (%)[3]
Revenue[1]	1,165.3	18.0	1,448.9	18.0	1,283.9	24.8
EBITDA (before non-trading items)[1],[2]	145.5	7.0	303.1	9.8	433.1	19.1
EBIT (before non-trading items)[1],[2]	79.1	5.3	238.7	9.5	400.2	20.6

[1] Includes minority interests.

[2] IFRS does not define the measures EBITDA (before non-trading items) (*being earnings* before interest, tax, depreciation and amortisation and before non-trading items) or EBIT (before non-trading items) (being earnings before interest *and* tax and before non-trading items). For a description of how these amounts are derived, see Part II — "Presentation of information — Presentation of financial information" of these Listing Particulars.

[3] As a percentage of the Guarantor's consolidated EBITDA (before non-trading items) and EBIT (before non-trading items) from continuing operations before common costs and income.

[4] For further information on the financial results of the Former Xstrata Group for the six months ended 30 June 2006, see the 2006 Xstrata Interim Report (which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars) and the press release accompanying the 2006 Xstrata Interim Report (which has been set out below in full in this Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — 2006 Xstrata Interim Report)".

Description of operations

The zinc-lead operations comprise:

Australia

- the Mount Isa underground (which closed at the end of 2005) and Black Star open cut zinc-lead-silver mines and the lead smelter;
- the George Fisher-Hilton zinc-lead-silver mine;
- the McArthur River zinc-lead-silver mine;

Spain

- the Hinojedo roasting plant;
- the San Juan de Nieva electrolytic zinc plant;
- the Arnao manufacturing facility;

Germany

- the Nordenham electrolytic zinc plant; and

United Kingdom

- the Northfleet lead refinery.

Mining operations

Zinc, lead and silver from the Mount Isa orebodies are produced from the Black Star open cut mine (commissioned in early 2005) and from the George Fisher-Hilton zinc-lead-silver mine located approximately 20 kilometres to the north of Mount Isa. The Former Xstrata Group Zinc Business is one of the five largest producers of zinc, ranks among the world's leading producers of lead and, together with the Falconbridge Group, is one of the five largest producers of silver, in each case by volume of production.

Mount Isa lead mines

The Mount Isa zinc-lead-silver mines produced 2.19 Mt of ore in the year ended 31 December 2005. The new Black Star open cut mine was commissioned in early 2005 and its production will replace production from the Mount Isa lead mine (which closed at the end of 2005).

The zinc-lead-silver and copper orebodies at Mount Isa occur adjacent to each other. The zinc-lead-silver orebodies extend from the surface to about one kilometre below the surface. Individual orebodies range in widths up to 35 metres and may persist for hundreds of metres in length.

Crushed ore is conveyed to the heavy medium plant at Mount Isa and separated on the basis of ore density. Around 30-35% of the ore is rejected as gangue, waste material, containing very little valuable mineral. Around 95-97% of the zinc, lead and silver metal is recovered and fed to the zinc-lead concentrator. The pre-concentrated ore is held in bins, which feed the concentrator. Zinc concentrates are transported by rail to Townsville for distribution to third party smelters located in Townsville and around the globe to Former Xstrata Group Zinc Business zinc smelters and third parties. Lead concentrate is converted into lead bullion at the Mount Isa lead smelter, then transported to Northfleet for refining. The ore is processed in the Mount Isa concentrator.

George Fisher-Hilton mine

The Hilton mine commenced production in 1990. The George Fisher operation, situated 2 kilometres north of the original Hilton mine, commenced production in 2000. George Fisher is on the same zinc-lead bearing structures as those found at Mount Isa and Hilton, but mining at George Fisher is complicated by cross faulting and softer ground. Hilton and George Fisher ores are trucked to the Mount Isa lead concentrator for processing. The George Fisher-Hilton mine produced 2.58 Mt of ore in the year ended 31 December 2005.

McArthur River mine

The McArthur River zinc-lead-silver mine lies approximately 900 kilometres south-east of Darwin, in the north-eastern part of the Northern Territory. It is one of the world's largest zinc deposits. Until December 2005 it was operated as a joint venture between the Former Xstrata Group (75%) and ANT Minerals Pty Ltd (25%), a consortium of Japanese companies. Since that time, it has been 100% owned by the Former Xstrata Group.

The mine was operated as a fully mechanised underground operation and underground mining operations were scaled down significantly at the beginning of October 2005 as open pit mining commenced at the test pit. Underground production ceased in the last quarter of 2005. In August 2005, Xstrata announced its intention to convert the mine from an underground to an open pit operation to enable production to continue, as underground mining is no longer viable. After 10 years of operation, the most accessible underground ore has been extracted and the underground mining operations, which comprise over 100 kilometres of underground tunnels, have become uneconomical. The development of an open-cut operation is the only way to access the significant ore reserves and secure the future of the operation.

Such development requires Northern Territory government approval. For further information on the approval process, see below under the heading "Projects and developments".

Production from the mine increased by 20% in 2005 compared to 2004, although the head grade declined from 12.7% zinc in 2004 to 11.9% zinc in 2005, due to the depletion of the number 2 orebody, and the mining of bulk stopes and open pit tonnes with lower head grades during the last quarter. As a result, in 2005 zinc in bulk concentrate production decreased by 4% compared to 2004, to 153,644 tonnes.

The concentrator processes ore from the underground mine and utilises conventional crushing, SAG-ball grinding, ultra-fine grinding with IsaMills, and four-stage flotation techniques to produce a bulk zinc-lead concentrate. The McArthur River Mine produced 1.68 Mt of treated ore (1.26 Mt attributable tonnes to the Former Xstrata Group at 75% on a full-year basis, ignoring the Former Xstrata Group's acquisition of ANT Minerals Pty Ltd's 25% interest in December 2005) in the year ended 31 December 2005.

Smelting and refining operations

The Hinojedo Roasting Plant

The Hinojedo roasting plant is located in the Spanish region of Cantabria, near the Port of Santander. The major plant facilities at Hinojedo are a flash roaster and a liquid sulphur dioxide plant. Following cessation of mining activity at the Former Xstrata Group's former Reocín mine in Cantabria, which closed in 2003, concentrates purchased from third parties are being treated at the Hinojedo facility to produce calcine which is then transported to the San Juan de Nieva electrolytic zinc plant.

The San Juan de Nieva electrolytic zinc plant

The San Juan de Nieva electrolytic zinc plant is located in the Asturias region of Spain near the port of Avilés and is one of the leading plants of its kind in the world in terms of production capacity, costs and efficiencies. Following the completion of a further 7,000 tonne expansion in December 2004, the total production capacity of the plant is now 500 ktpa. Xstrata estimates that the plant accounts for approximately 5% of world production.

The plant comprises five major operating areas: concentrate receiving and storage; roasting and sulphuric acid plant; leaching and purification, electrowinning; and casting. The plant utilises conventional technologies for the production of zinc ingots: zinc alloys, zinc for plating and zinc dust and by-products of sulphuric acid, mercury and germanium oxide.

An oleum plant, with an annual capacity of 52 kt, which was commissioned at San Juan in 2003, provides a cost efficient solution to the disposal of sulphuric acid.

The Arnao manufacturing facility

The Arnao manufacturing facility is located approximately four kilometres from the San Juan de Nieva electrolytic zinc plant and produces zinc oxide, zinc dust and rolled lead-silver anodes.

The Nordenham electrolytic zinc plant

The Nordenham smelter is located in Germany at Nordenham on the Weser estuary, opposite Bremerhaven in Northern Germany. The plant was commissioned in 1972. Since then the plant has been expanded and modernised to the current capacity of 145 ktpa of zinc metal.

The plant comprises five major operating areas: concentrate receiving and storage; roasting and sulphuric acid plant; leaching and purification; electrowinning, and melting and casting. The Nordenham smelter produces zinc ingots, zinc alloys, sulphuric acid, cadmium metal, copper cement and lead-silver concentrate. The iron residue, jarosite, is ponded approximately 10 kilometres from the smelter.

Mount Isa lead smelter

The Mount Isa lead smelter treats lead concentrates from the Mount Isa, Black Star and George Fisher-Hilton mines as well as the BHP Billiton-owned Cannington mine, located approximately 150 km from Mount Isa.

The annual production capacity of the smelter is 170 kt of crude lead bullion. In the year ended 31 December 2005 it produced 160 kt.

The crude lead is transported to the Townsville port, where it is shipped to Northfleet for refining.

Northfleet lead refinery

The Northfleet lead refinery has a lead refining capacity of 180 ktpa and in the year ended 31 December 2005 it produced 161 kt.

The facility is located approximately 60 kilometres outside London and has a refining line for processing Mount Isa's crude lead bullion. A second refining line and a recycling facility were closed during 2003.

Projects and developments

Construction of a new zinc concentrates filter plant at Mount Isa was started at the end of July 2006 and is currently being commissioned. The filter plant allows increased zinc concentrate production and reduces the moisture of the concentrates and, therefore, transport costs.

A zinc-lead concentrator revamp project at Mount Isa was approved during the first half of 2006. This project involves upgrading the concentrator capacity to 6.5 Mtpa throughput with the installation of a new reliable milling and flotation circuit by the first half of 2008 at a capital cost of US$120 million. Further developments have identified that a short-term expansion is possible using second-hand equipment that will deliver an improvement in plant capacity. The expected increase in ore throughput is an incremental 1.5 Mtpa with the equipment secured at a cost of less than US$5 million.

The Black Star open pit at Mount Isa was commissioned in early 2005. The mine is expected to produce an average of 2.3 Mtpa during its 11-year life of mine. Potential exists to expand both production and the life of mine with expansion studies currently in progress.

In August 2005, Xstrata announced its intention to convert the McArthur River mine from an underground to an open-cut operation to enable production to continue at the mine. Without such conversion, the mine would face the prospect of closure. For further information on the McArthur River mine, see above under the heading "McArthur River mine". The change of mining method requires Northern Territory government approval. In August 2005, a draft Environmental Impact Statement ("EIS") was lodged with the Northern Territory Government for the open cut conversion. In December 2005, an EIS Supplement was submitted responding to around 150 matters raised through a public review process. At the conclusion of the EIS process on 23 February 2006, the Northern Territory Minister for Environment and Heritage, recommended against the mine proposal. This recommendation was passed to the Minister for Mines and Energy who on 20 March 2006, referred the matter back to the Environmental Protection Agency for further assessment on nine issues. On 4 July 2006, a Public Environmental Report was lodged in the next stage of the Northern Territory Government's assessment of the proposed conversion. On 28 August 2006 the Northern Territory Environment Minister announced a conditional recommendation in favour of the open pit development subject to the final decision of the Northern Territory Minister of Mines and Energy as well as Commonwealth approval. Both decisions are still pending. McArthur River Mine Pty Limited is currently assessing and negotiating the conditions contained in the recommendation. The switch of mining methods entails an investment initially estimated at A$66 million (approximately US$49 million) which, provided the necessary regulatory approval is obtained, is expected to be made over the next two years and funded from the Enlarged Xstrata Group's free cash flow. The regulatory approval may be subject to stringent compliance requirements which, added to further delays in the approval process, will result in increased project capital and operating cost.

Meanwhile, a mine management plan approved by the Northern Territory Government's Department of Business, Industry and Resource Development includes approval for a test pit on site to contribute ore for sampling and for processing. A further extension of the test pit was approved by the Northern Territory Government, which will allow production to continue until the first quarter of 2007 while final permits for the open pit are obtained.

The McArthur River ore body remains one of the largest known deposits of zinc and lead in the world. A change to an open pit mine would extend the life of mine by at least 25 years and allow the Enlarged Xstrata Group to retain the option to develop McArthur River as a source of zinc feed for a potential future zinc refinery using the Enlarged Xstrata Group's Albion process technology.

A US$14 million new facility has been built at San Juan de Nieva to produce silver concentrates from the leach residue. This facility, which is now operative, was successfully commissioned in July and allows San Juan to treat high silver concentrates.

The Northfleet lead refinery in the UK continues efforts to reduce lead production cycle times through improved process control and standardisation of the operation. Cycle times decreased by 45% between 2004 and 2005.

Sales and marketing

Zinc metal sales represent more than 60% of the Former Xstrata Group Zinc Business's turnover, while zinc concentrate sales represent approximately 16% and refined lead and silver approximately 18%. The remainder of sales are derived from the sales of by-products such as germanium, cadmium, sulphuric acid and sulphur dioxide.

Practically all the zinc metal produced by the Former Xstrata Group Zinc Business is sold in EU countries. Sales are largely in the form of SHG ingots (approximately 48%) with the remainder being sold in the form of zinc alloys. European markets by order of importance are Spain, Germany, Portugal, Austria, France and the UK. In the European markets, the Former Xstrata Group Zinc Business smelters principally supply the galvanising sector. Glencore was the Former Xstrata Group Zinc Business's largest customer in 2005, accounting for approximately 38% of total zinc metal sales.

Zinc concentrates are sold mainly to Japan, Korea, China, Australia and Europe. Glencore was the Former Xstrata Group Zinc Business's largest customer in 2005, accounting for approximately 53% of total zinc concentrate sales. Sales into Europe, including Spain and Germany, command a premium over LME prices. Premiums have increased to substantial levels since 2000 as a result of Atlantic/Pacific freight costs and reduced imports of metal especially from the Pacific Rim, due to increasing Asian consumption, in particular in China. In 2005, approximately 75% of the Former Xstrata Group Zinc Business's zinc metal sales were made under term contracts while approximately 25% of the Former Xstrata Group Zinc Business's sales were on a spot basis.

Concentrate suppliers

Following the expansion of the San Juan de Nieva plant's design production capacity, and the acquisition of Nordenham smelter, approximately 1.3 Mtpa of zinc concentrate is required as feedstock to the electrolytic zinc plants for them to operate at current capacity.

San Juan de Nieva and Nordenham typically purchase zinc concentrates from more than ten third party sources, of which five accounted for approximately 65% of their total concentrate requirements in 2005. San Juan de Nieva and Nordenham have contracted for about 100% of their total zinc concentrate requirements for 2006. Approximately 300,000 tonnes of zinc in concentrate are expected to be sourced from Mount Isa.

In 2005, Glencore supplied approximately 50% of zinc concentrates sourced by the Former Xstrata Group Zinc Business from third parties and is the principal supplier of the Former Xstrata Group Zinc Business in addition to being its largest customer. These purchases and sales were all made under contracts on arm's length terms. In addition, in 2005, Teck Cominco's Red Dog mine in Alaska accounted for approximately 22% of the Former Xstrata Group Zinc Business's total zinc concentrate requirements.

Alloys Business summary

The Former Xstrata Group produces chrome and vanadium alloys for a widely spread customer base in the steel industry.

Chrome operations

Introduction

The Enlarged Xstrata Group is the world's largest producer of ferrochrome in terms of both attributable production and attributable sales, with current capacity attributable to the Chrome Business of approximately 1.29 Mtpa, representing approximately 20% of global capacity. The Enlarged Xstrata Group's chrome assets are situated in South Africa.

The Enlarged Xstrata Group's assets consist of five operating chromite mines and 18 ferrochrome furnaces, all of which are managed through a combined Pooling and Sharing Venture (the "PSV") with Merafe Resources Limited ("Merafe"). Two of the ferrochrome furnaces were until 16 November 2005 owned in a 50/50 production joint venture, known as the Gemini Joint Venture, with Samancor Limited ("Samancor"), a major South African ferrochrome producer. Merafe concluded a transaction with Samancor which resulted in Merafe replacing Samancor in the Gemini Joint Venture and all associated mining activities with effect from 16 November 2005. The assets and

business of the Gemini Joint Venture and certain strategic chrome reserves which were also acquired as part of the transaction have been incorporated within the PSV. The assets are now managed along with all of the other PSV assets and fall under the control and management of the Joint Board of the PSV. The assets under the control of the PSV include resources associated with the Kroondal and Marikana mining areas situated close to the Wonderkop ferrochrome operations and adjacent to the Waterval East and Waterval West mines.

The Enlarged Xstrata Group's attributable interest in the PSV is staggered over time, with its current participation being 79.5% as from 1 July 2006. Immediately following the formation of the PSV on 1 July 2004, Merafe's participation was 11%. Under the terms of the pooling arrangements, Merafe's participation interest increased to 14% on 1 July 2005, to 17% on 16 November 2005 following the contribution of its share of the Gemini Joint Venture assets and to 20.5% from 1 July 2006. Merafe has the option to extend its participation interest in the PSV to 26% through disproportionate funding on future expansion projects.

Capacity attributable to the PSV is approximately 1.6 Mtpa of ferrochrome, which increased to approximately 1.96 Mtpa with the commissioning of Project Lion. In addition to operational synergies, the PSV facilitates the Enlarged Xstrata Group's compliance with the Black Economic Empowerment provisions of the MPRDA in relation to the ferrochrome business.

Reserve and resource base

The table below sets out the Chrome Business's attributable chrome reserve and resource base as at 30 June 2005.

				Ore reserves				Mineral resources		
				Run-of-mine		Saleable				
Operating mines	% Attributable	Mining method	Commodity	Proved (Mt)	Probable (Mt)	Proved (Mt)	Probable (Mt)	Measured (Mt)	Indicated (Mt)	Inferred (Mt)

See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of reserve and resource amounts.

(2) *See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Inferred resources" of these Listing Particulars for an explanation of the basis of preparation of inferred resource estimates.*

(3) The Enlarged Xstrata Group's interest in the Mototolo Joint Venture, following the transaction with Kagiso, has decreased from 50% to 37%, effective retrospectively from the inception of the Mototolo Joint Venture.

Production

The table below sets out the total mine and attributable ferrochrome production of the Chrome Business for the years ended 31 December 2004 and 31 December 2005:

Ferrochrome production(1)	Year ended 31 December			
	2004		2005	
	Mine production	Attributable production	Mine production	Attributable production
	(Tonnes)			
South Africa	1,299,463	1,225,408	1,287,836	1,121,685

(1) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts. Production figures have been extracted without material amendment from the Guarantor's management records.

Financial information

The table below provides selected summary financial information in relation to the Chrome Business for the year ended 31 December 2004 and for the year ended 31 December 2005 (which has, in each case, been extracted without material amendment from the Xstrata Annual Reports and Accounts) and for the six months ended 30 June 2006 (which has been extracted without material amendment from the 2006 Xstrata Interim Report):

	Unaudited IFRS Year ended 31 December 2004		Audited IFRS Year ended 31 December 2005		Unaudited IFRS Six Months ended 30 June 2006[4]	
Chrome Business	US$m	As a percentage of the Former Xstrata Group (%)[3]	US$m	As a percentage of the Former Xstrata Group (%)[3]	US$m	As a percentage of the Former Xstrata Group (%)[3]
Revenue[1]	819.3	12.7	797.5	9.9	331.4	6.4
EBITDA (before non-trading items)[1],[2]	168.9	8.2	168.8	5.4	36.3	1.6
EBIT (before non-trading items)[1],[2]	148.9	9.9	141.5	5.6	23.9	1.2

[1] Includes minority interests.

[2] IFRS does not define the measures EBITDA (before non-trading items) (being earnings before interest, tax, depreciation and amortisation and before non-trading items) or EBIT (before non-trading items) (being earnings before interest and tax and before non-trading items). For a description of how these amounts are derived, see Part II — "Presentation of information — Presentation of financial information" of these Listing Particulars.

[3] As a percentage of the Guarantor's consolidated EBITDA (before non-trading items) and EBIT (before non-trading items) from continuing operations before common costs and income.

[4] For further information on the financial results of the Former Xstrata Group for the six months ended 30 June 2006, see the 2006 Xstrata Interim Report (which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars) and the press release accompanying the 2006 Xstrata Interim Report (which has been set out below in full in this Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — 2006 Xstrata Interim Report").

Description of chrome operations

The Enlarged Xstrata Group controls and operates through the PSV with Merafe a combined capacity of approximately 1.6 Mtpa of ferrochrome. The Chrome Business is currently the world's largest (in terms of both attributable production and attributable sales) and among the lowest-cost producers of ferrochrome. The Guarantor believes it is well placed to maintain and continue to grow its ability to offer a wide range of products and to produce large volumes at low cost. The Chrome Business will pursue continued growth in its chrome operations whilst at the same time seeking to maintain its position as one of the lowest-cost producers of ferrochrome in the world.

Following the acquisition of a controlling interest in the African Carbon Group, which enhanced the Chrome Business's focus on key primary raw materials in the ferrochrome production process, and the Former Xstrata Group's entry into a platinum joint venture with Rustenburg Platinum Mines Limited ("RPM") and Kagiso Trust Investments (Proprietary) Limited ("Kagiso"), the Enlarged Xstrata Group intends to continue to evaluate appropriate potential acquisition opportunities and the possibilities for diversifying the Chrome Business's operations' ferrochrome product range.

All of the Chrome Business's operating chrome mines are shallow underground mines accessed by decline shafts. Mining is carried out using a mechanised bord and pillar method and is currently conducted at depths ranging from 50 to 300 metres below the surface. All development is on reef, thereby reducing waste dilution. In addition to sourcing ore from its own mines, the Chrome Business purchases and processes chrome-rich tailings from nearby platinum producers where chrome-rich fines (usually referred to as UG2) are generated as a waste-product. The Chrome Business sells approximately 6% of its chrome ore as foundry grade chromite and converts the rest into ferrochrome. The Chrome Business's metallurgical plants are all situated close to the Chrome Business's chrome mines, thereby reducing rail and road transport costs.

Production is derived from 18 furnaces at four metallurgical facilities. The eight most recently constructed furnaces were designed, constructed and commissioned by the Chrome Business which has helped to reduce capital costs. By designing and constructing its own furnaces the

Chrome Business has been able to further increase the efficiency and reliability of its furnaces, with annual furnace operating availability figures in excess of 98.0% being maintained for these eight furnaces. Thirteen of the Chrome Business's furnaces have a semi-closed configuration and large off-gas handling facilities which allow these furnaces to utilise lower quality ore and reductants. Over the 17 years to the end of 2005, the Chrome Business increased its annual attributable production of ferrochrome from approximately 120 kt to a peak in the year ended 31 December 2004 of 1.2 Mt and 1.1 Mt in the year ended 31 December 2005. 14 of the Chrome Business's 18 ferrochrome producing furnaces are currently operational, with the remaining four currently out of operation due to prevailing market conditions.

The Mitsui alliance inherited from the purchase of CMI in 1998 attributes 30 ktpa alloy from the Lydenburg furnaces to Mitsui & Co. Ltd.

The Chrome Business's agglomeration technology makes chrome-bearing tailings from platinum mines a competitive source of chrome units in the ferrochrome production process when compared to traditional ore feed costs. Approximately 35% of the current ore feed balance of the furnaces is sourced from chrome-bearing tailings from platinum mines under long-term and "life-of-mine" off-take agreements. The remainder is currently sourced from the Chrome Business's chromite mines, however, this ore feed balance can be varied. This flexibility gives the chrome operations the ability, where it is cost-effective to do so, to change the proportions of chrome ore sourced from the Chrome Business's chromite mines and chrome bearing tailings sourced from platinum mines.

In 2005, the Chrome Business's attributable sales of ferrochrome were approximately 1.2 Mt, of which approximately 47% were sold into Europe, approximately 15% into North America, approximately 9% into Japan, and approximately 21% into other Asian countries with approximately 8% sold locally in South Africa.

Completion in November 2005 of development of the infrastructure at the Kroondal mine increased the mine's production capacity from 70 kt per month to 160 kt per month.

In 2005, higher underground production volumes from the Kroondal mine, especially after the acquisition of the Marikana reserves in July 2005, enabled the lower quality open cast operations at Kroondal and Boshoek to be scaled down by 200,000 tonnes of run-of-mine production.

Operations at the Horizon mine were temporarily suspended from 1 July 2005 to December 2005 to refurbish the mine, with the objective of improving yields and production costs from January 2006. The mine re-started operations in January 2006.

The Thorncliffe mining complex is currently being expanded with the development of the Helena mine to supply ore to the new Project Lion ferrochrome smelter.

The marketing of the Former Xstrata Group's ferrochrome production (other than certain tonnage sold into Asia) is supported by Glencore under marketing agency and distribution agreements. For further information, see Part I — "Description of the Enlarged Xstrata Group — Relationship with Glencore — Commercial relationship — Alloys Business — Chrome operations" of these Listing Particulars.

Projects

Project Lion

Project Lion is a new ferrochrome facility in the Mpumalanga Province in South Africa, close to the Chrome Business's chrome reserves at the Thorncliffe mining complex. The project is being carried out under the PSV with Merafe. It is divided into three phases comprising six furnaces, with phase one comprising two furnaces. The project has encountered some external difficulties, in particular the quality of the kiln riding rings and roller support castings, difficult ground conditions and unusually high rainfall during the construction phase. Despite these challenges, the project officially started production in September 2006. Completed at a cost of ZAR1.67 billion (approximately US$213 million), the smelter and mine have a design capacity of 360 ktpa, increasing the PSV's total annual capacity by over 22% to 1.96 Mtpa and reducing the average unit operating costs of the business. Phase one is intended to result in production of an additional 360 ktpa of ferrochrome for the PSV. The Project Lion smelter enhances the Chrome Business's ability to compete through its low production cost, access and proximity to transport infrastructure and ability to produce a very

low silicon product as a superior chemical specification. Metal produced from the furnaces can either be cast into ingots or granulated depending on customer requirements.

The smelter uses the Enlarged Xstrata Group's patented "Premus" technology involving the pre-reduction of chromite ore with anthracite fines. The use of this technology is expected to ensure that the Project Lion smelter will be in the first quartile in terms of costs due to the low energy consumption and higher chrome recoveries. Energy consumption is approximately 40% lower than that of the conventional process ensuring that the production costs are much less sensitive to electricity pricing. Ore will be obtained from the Enlarged Xstrata Group's Helena mine which is currently being developed and is in close proximity to the Project Lion smelter, ensuring cost efficiency in terms of ore transport costs. The Helena mine development also remains within the project timing schedule and budget, with chrome ore already being brought to surface. The smelting process also has the capacity to use low-cost UG2 ore that will be sourced from the Mototolo project and other neighbouring platinum mines and uses low quantities of high cost metallurgical coke.

Mototolo

The Former Xstrata Group and Rustenburg Platinum Mines Limited ("RPM"), a subsidiary of Anglo Platinum Limited, entered into an unincorporated joint venture in July 2005 called the "Mototolo Joint Venture". In February 2006, the Guarantor announced its agreement to form a black economic empowerment partnership with Kagiso Trust Investments (Proprietary) Limited ("Kagiso") in respect of the Former Xstrata Group's 50% interest in the Mototolo Joint Venture. As of 11 May 2006, Kagiso, through a special purpose vehicle, Kagiso Platinum Venture (Pty) Limited ("KPV"), acquired 26% of the Former Xstrata Group's 50% interest in the joint venture, resulting in KPV owning a fully participative 13% interest in the earnings from the Mototolo Joint Venture, in return for funding its proportionate share of the total capital expenditure required for the project. The Enlarged Xstrata Group retains an effective 37% interest. KPV's participation is effective retrospectively from the inception of the Mototolo Joint Venture.

The purpose of the joint venture is to produce platinum group metals through the development and exploitation of a platinum group metals mine and concentrator.

The Enlarged Xstrata Group is responsible for developing and running the mine and RPM is responsible for construction and running of the concentrator plant. The Enlarged Xstrata Group and RPM will each contribute a similar amount of in-situ platinum group metal reserves and resources from the Chrome Business's Thorncliffe farm (adjacent to its Thorncliffe Chrome mine) and RPM's Richmond farm, part of its Der Brochen project area, to the venture. The total capital expenditure until commissioning is estimated at ZAR1,350 million (approximately US$172 million), of which the Enlarged Xstrata Group's share is 37%.

Construction of the mine and concentrator began in August 2005 with the initial production of platinum group metals ounces anticipated in the last quarter of 2006 and full production by the end of 2007. The project benefits from a life of mine of approximately 19 years at a planned milling rate of 200,000 tonnes per month and head grade of 3.74 platinum group metal grammes per tonne and it is expected to produce 132,000 ounces of platinum per annum and 82,000 ounces of palladium per annum.

The platinum industry is an attractive industry and is seen to have synergies with the Alloys Business. The Enlarged Xstrata Group has used the Mototolo project as an entry point into the platinum industry, capitalising on the experience of partner and industry leader Anglo Platinum. The Enlarged Xstrata Group's experience and expertise in mechanised room and pillar mining will be leveraged as the Enlarged Xstrata Group is responsible for the development and operation of the underground mine. In addition to ensuring the economic exploitation of the Enlarged Xstrata Group's Thorncliffe platinum group metals reserve, the Mototolo Joint Venture also produces a long-term supply for the Chrome Business of UG2 chrome ore that will be used at the nearby Project Lion smelter to produce ferrochrome.

Bokamoso

On 28 November 2005, the Guarantor announced the planned construction by its chrome venture with Merafe of a chrome ore agglomeration facility at the Wonderkop site, named Project Bokamoso.

The agglomeration facility will use the Outokumpu technology currently employed at the Chrome Business's Boshoek operation. The anticipated total project cost of US$125 million comprises the construction of the agglomeration facility and related infrastructure development. The project consists of the erection and commissioning of a pelletising and sintering plant with an expected combined production capacity of approximately 1.2 Mtpa.

The additional agglomeration capacity is intended to restore the ore balance between the mines and smelters in the Chrome Business's Western operations, reduce operating costs for the smelting operations and enhance mining and operational efficiencies. The project is also intended to improve environmental performance and operational flexibility. Construction commenced in the second quarter of 2006, with the plant commissioning expected to start towards the end of the second quarter of 2007. The plant is scheduled to reach full capacity in the first half of 2008.

Mineral right applications and conversions

Xstrata Alloys, the Alloys division of Xstrata South Africa (Pty) Ltd, has to date submitted one old order prospecting right conversion application and four applications for new order prospecting rights under the MPRDA. The old order prospecting right conversion application and all four new order prospecting right applications have been accepted by the Department of Minerals and Energy (the "DME"), with the DME having recently indicated that three of the applications for new order prospecting rights have been granted by the Minister. Xstrata Alloys is currently awaiting a date from the DME in respect of the Notarial Execution of such rights, and a final decision is awaited in respect of the balance of the applications which are currently in an advanced stage of processing.

With regard to new order mining right applications, five out of six planned applications have been submitted to the DME to date, all of which have been accepted by the DME and are currently being processed. In addition, ten out of twelve planned applications have been submitted to the DME in respect of converting existing old order mining rights. Once applications are accepted by the DME, an administrative process follows whilst the DME considers the applications. The Minister must grant the rights if the Former Xstrata Group has complied in full with all the application requirements.

With regard to the requirement that 15% of the industry be owned by HDSAs by 2009 and 26% of the industry be owned by HDSAs by 2014, Merafe is Xstrata Alloys' black empowerment partner in the business with a current share of 20.5% which is expected to increase to the required 26% well within the stipulated regulatory timeframe. Similarly, Xstrata Alloys has entered into a partnership agreement with Kagiso to give effect to the black economic empowerment obligations on the Mototolo Joint Venture. All the charter requirements of the MPRDA such as employment equity and procurement requirements are on schedule and Xstrata expects full compliance to be achieved well in advance of the May 2009 deadline. The other requirements of the MPRDA, such as the social and labour plans and human resources development plans that were submitted with applications, were accepted by the DME and no problems are envisaged with the remaining applications. See the risk factors in Part IV — "Risk Factors — Industry risks relating to the Enlarged Xstrata Group — Australian native title and South African land claims" and "Risk Factors — Industry risks relating to the Enlarged Xstrata Group — South African MPRDA and Empowerment Charter" of these Listing Particulars.

Vanadium operations

Introduction

The Enlarged Xstrata Group's vanadium operations are carried on at its Rhovan plant situated in the North West Province, South Africa. Rhovan, an integrated mining and vanadium processing plant, produces and converts vanadium pentoxide (V_2O_5) into ferrovanadium (FeV). In 2003, the production process of the chemical plant was adapted to enable it to produce vanadium trioxide (V_2O_3) and a new electric furnace was commissioned, which allows for ferrovanadium to be produced by an alternative process consuming less expensive aluminium. The Vanadium Business's ferrovanadium conversion facility in Swaziland is currently non-operational.

Capacity for the Vanadium Business's vanadium operations is approximately 22 million pounds of vanadium pentoxide equivalent per annum, which the Guarantor believes represents approximately 10% of estimated global production.

Reserve and resource base

The table below outlines the Vanadium Business's vanadium reserve and resource base as at 30 June 2005:

Vanadium	% Attributable	Mining method	Commodity	Ore reserves[1] Proved	Ore reserves[1] Probable	Mineral resources Measured	Mineral resources Indicated	Mineral resources Inferred[2]
				Mt (except as otherwise stated)				
Rhovan	100	OC	Ore	44.0	6.0	77.5	—	139.8
			V_2O_5	0.5%	0.7%	0.5%	—	0.5%

The above table sets out the Vanadium Business's attributable vanadium reserve base, based on the total mine basis figures in the Former Xstrata Group Ore Reserves and Mineral Resources Report. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of presentation of the reserve estimates.

(1) Reserves are a subset of resources and are included in the resource estimate. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of reserve amounts.

(2) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Inferred resources" of these Listing Particulars for an explanation of the basis of preparation of inferred resource estimates.

Production

The table below provided information on the Vanadium Business's vanadium pentoxide production for the years ended 31 December 2004 and 31 December 2005:

Vanadium[1]	Year ended 31 December 2004	Year ended 31 December 2005
	(In lbs in V_2O_5 equivalent)	
South Africa	21,067,000	20,166,000

(1) See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of production amounts. Production figures have been extracted without material amendment from the Guarantor's management records.

Financial information

The table below provides selected summary financial information in relation to the Vanadium Business for the year ended 31 December 2004 and for the year ended 31 December 2005 (which has, in each case, been extracted without material amendment from the Xstrata Annual Reports and Accounts) and for the six months ended 30 June 2006 (which has been extracted without material amendment from the 2006 Xstrata Interim Report):

Vanadium Business	Unaudited IFRS Year ended 31 December 2004 US$m	Unaudited IFRS Year ended 31 December 2004 As a percentage of the Former Xstrata Group (%)[3]	Audited IFRS Year ended 31 December 2005 US$m	Audited IFRS Year ended 31 December 2005 As a percentage of the Former Xstrata Group (%)[3]	Unaudited IFRS Six months ended 30 June 2006[4] US$m	Unaudited IFRS Six months ended 30 June 2006[4] As a percentage of the Former Xstrata Group (%)[3]
Revenue[1]	133.7	2.1	318.0	4.0	100.6	1.9
EBITDA (before non-trading items)[1],[2]	34.1	1.7	181.1	5.8	62.4	2.8
EBIT (before non-trading items)[1],[2]	22.3	1.5	175.6	7.0	59.3	3.0

(1) Includes minority interests. The Enlarged Xstrata Group's interest in the Mototolo Joint Venture, following the transaction with Kagiso, has decreased from 50% to 37%, effective retrospectively from the inception of the Mototolo Joint Venture.

(2) IFRS does not define the measures EBITDA (before non-trading items) (being earnings before interest, tax, depreciation and amortisation and before non-trading items) or EBIT (before non-trading items) (being earnings before interest and

tax and before non-trading items). For a description of how these amounts are derived, see Part II — "Presentation of information — Presentation of financial information" of these Listing Particulars.

(3) As a percentage of the Guarantor's consolidated EBITDA (before non-trading items) and EBIT (before non-trading items) from continuing operations before common costs and income.

(4) For further information on the financial results of the Former Xstrata Group for the six months ended 30 June 2006, see the 2006 Xstrata Interim Report (which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars) and the press release accompanying the 2006 Xstrata Interim Report (which has been set out below in full in this Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — 2006 Xstrata Interim Report)".

Description of vanadium operations

The Vanadium Business's operations comprise the mining of vanadium ore, the production of vanadium pentoxide and the conversion of vanadium pentoxide to ferrovanadium.

The Guarantor believes that, in 2005, the Vanadium Business achieved a world market share of approximately 10% with approximately 21.5 million pounds of vanadium pentoxide production, the vast majority of which was converted into ferrovanadium. In 2005, the Vanadium Business produced approximately 20 million pounds (expressed as V_2O_5 equivalent) of ferrovanadium.

The Vanadium Business's operations are carried on at its Rhovan plant situated in the North West Province, South Africa. Previously, the Former Xstrata Group had an additional vanadium operation at Vantech in South Africa as well as interests in the Windimurra vanadium project in Australia. The Vantech operation closed in 2004 due to its ore body being mined out. The oversupply of vanadium pentoxide in 2000 and 2001 and the consequent depression in vanadium pentoxide prices, contributed largely towards the closure of the Windimurra operation on 10 February 2003, following steps to reduce costs and production that proved insufficient to ensure the sustainable financial viability of this asset. Since then settlement has been reached with Precious Metals Australia to take over all responsibilities, obligations and costs related to the rehabilitation of the Windimurra project. Rehabilitation of the Vantech site is also progressing well, with full closure expected to take approximately four to five years in order to allow for groundwater remediation.

The Vanadium Business's Rhovan operation is an integrated vanadium producer. The processing plant at Rhovan is located adjacent to the mine, resulting in low ore handling costs. Titaniferous magnetite ore is mined using open cast methods in an open pit at Rhovan by means of the drill, blast, and haul technique. The ore is fed into an in-pit crusher where it is crushed and then transported by overland conveyor to the beneficiation plant. At current production levels the Vanadium Business's reserve and resource base in South Africa should support the operations for at least another 30 years.

All of the vanadium pentoxide and ferrovanadium produced by the Vanadium Business is marketed or distributed by Glencore under marketing, agency and distribution agreements. For further information, see Part I — "Description of the Enlarged Xstrata Group — Relationship with Glencore — Commercial relationship — Alloys Business — Vanadium operations" of these Listing Particulars.

In 2005, approximately 84% of the Vanadium Business's sales were represented by sales of ferrovanadium and approximately 16% were represented by sales of vanadium pentoxide.

In 2005, approximately 35% of the Vanadium Business's sales of ferrovanadium were into Europe and approximately 10%, 21%, 20% and 10% were into Asia, North America (USA, Canada and Mexico), South America and Japan, respectively.

The Enlarged Xstrata Group will continue to assess the feasibility of a number of potential projects aimed at enhancing the cost effectiveness of the Vanadium Business to ensure that they are well positioned if and when market conditions deteriorate. In addition, the Enlarged Xstrata Group will continue to evaluate both the feasibility of producing vanadium from sources other than vanadium bearing ores and the potential for diversifying the vanadium operations product range.

Mineral right applications and conversions

In the 18-month period leading up to the promulgation of the MPRDA on 1 May 2004, the Department of Minerals and Energy (the "DME") did not formally issue the Former Xstrata Group with a mining authorisation for the ongoing Rhovan vanadium operations. The result of this was that the Former Xstrata Group was required to make application for a new order mining right (as

opposed to a conversion to such a new order mining right) for the Rhovan operations. Such an application was duly submitted. The DME has acknowledged the situation and the Enlarged Xstrata Group is working with the DME in order to ensure all outstanding issues are satisfied and that the application can be approved expeditiously.

The Enlarged Xstrata Group is in discussions with a potential black economic empowerment partner with a view to its becoming the Former Xstrata Group's partner in the Rhovan operations. See the risk factors in Part IV — "Risk Factors — Industry risks relating to the Enlarged Xstrata Group, Australian native title and South African land claims" and "Risk Factors — Industry risks relating to the Enlarged Xstrata Group — South African MPRDA and Empowerment Charter" of these Listing Particulars.

Reductant operations

The Enlarged Xstrata Group currently supplies its chrome operations with its total Söderberg electrode paste requirements as well as approximately 280,000 tpa of char, which is used as a reductant on its ferrochrome furnace. The Enlarged Xstrata Group also acquired a controlling interest in the African Carbon Group with effect from 1 July 2004 which produces 600,000 tpa of char in addition to the 70,000 tpa of char produced at the Enlarged Xstrata Group's other facilities. The Former Xstrata Group is currently self-sufficient in terms of its char reductant requirements and 40% self-sufficient in terms of its total reductant requirements.

Statutory authorisations, licences and concessions

New South Wales operations' coal assets

The Enlarged Xstrata Group currently holds all necessary leases and licences to cover exploration and mining activities in respect of the Coal Business. A summary of the status of the mining leases and licences for New South Wales operations' coal assets is set out in the table below.

Summary of the Enlarged Xstrata Group's mining leases and authorisations

CCL — Consolidated Coal Lease
CL — Coal Lease
EL — Exploration Licence
ML — Mining Lease
LA — Mining Lease Application
PL — Mining Purposes Lease
L — Private Lands Lease

Australian mining companies are required by law to submit Mining Operations Plans ("MOPs") and Annual Environmental Management Reports ("AMERs") to the Department of Mineral Resources ("DMR"). The MOPs outline plans for mining and rehabilitation over a period of between three and seven years and identify the costs associated with the rehabilitation of the site. The AMERs report the annual progress in relation to the MOPs.

The Enlarged Xstrata Group has submitted all the required MOPs and AMERs and has lodged the necessary securities with the relevant DMR. Additional securities are in the process of being negotiated as part of the regular review of the rehabilitation costs undertaken during the MOP process.

Individual mines establish provision for rehabilitation liabilities by accruing a rehabilitation provision per tonne, by obtaining bank guarantees or by a combination of these methods. Rehabilitation provisions are referred to as securities and are specified in the mining leases or during the MOP process.

Queensland operations' coal assets

The Enlarged Xstrata Group currently holds all necessary leases and licences to cover exploration and mining activities in respect of the Coal Business. A summary of the status of these mining leases and licences for Queensland operations' coal assets is set out in the table below. These leases and licences relate to coal mines, projects and longer term prospects. The Enlarged Xstrata Group has several Mineral Development Licences with renewals pending approval. This status has no effect on the operation of the mines or security of title.

Terms:
ML — Mining Lease
MLA — Mining Lease Application
MDL — Mineral Development Licence
EPCA — Exploration Permit Coal
EPCA PL — Petroleum Lease Coal

Principal terms and conditions for mining concessions relevant to the Queensland mining operations include the requirement to have an Environmental Authority issued by the Environmental Protection Agency ("EPA") and a Plan of Operations ("POO") lodged with the EPA.

The POO specifies proposed mining and rehabilitation activities for a term of up to five years. The POO also includes an estimate of the maximum mine rehabilitation liability for the term of the POO and calculation of the corresponding financial assurance required to be lodged with the Department of Natural Resources and Mines ("DNRM"). The level of financial assurance required to be lodged with government is a percentage of the total rehabilitation liability. The percentage required is dependent on the environmental performance category of the mine, which is determined in accordance with EPA guidelines.

The miner calculates the total rehabilitation liability and the EPA may require this figure to be increased (resulting in an increase in the financial assurance). The EPA is not bound by previous

estimates and has, in the case of third parties outside the Enlarged Xstrata Group, significantly altered and increased agreed calculations for total rehabilitation cost. There is no indication that the EPA will alter the calculation for the total rehabilitation cost of sites operated by the Enlarged Xstrata Group, but no assurance can be given that this will not occur in the future.

An annual return is required to be lodged with the EPA for each Environmental Authority. The annual return reports on compliance with Environmental Authority conditions. The Enlarged Xstrata Group has submitted all required POOs and annual returns for Environmental Authorities and has lodged the necessary financial assurances with the DNRM.

Douglas	11/99	2022	Approved

In terms of the MPRDA, which came into operation on 1 May 2004, the mineral resources are the common heritage of all people of South Africa and the state is custodian thereof for the benefit of all South Africans. Xstrata South Africa, either directly or through subsidiaries or through co-arrangements with Ingwe, holds mining authorisations and consequently old order mining rights, as defined in the MPRDA, over all of the areas covered in its current life of business plan with the exception of a portion of the Goedgevonden project area and a property at Tselentis, over which properties it has acquired new order prospecting rights. These new order prospecting rights provide Xstrata South Africa with the exclusive right to apply for new order mining rights over the economically exploitable mining areas.

Xstrata South Africa has a number of initiatives in place to ensure that it complies with the requirements of the MPRDA hence allowing it to convert its old order mining rights into new order rights within the maximum five year transitional period as provided within the legislation. These old order mining rights continue to remain in force for a period not exceeding five years and cease to

exist upon conversion and registration of the new mining right or if the holder fails to lodge the old order mining right for conversion before 30 April 2009, being the date upon which the maximum period of five years expires.

Xstrata South Africa has an ongoing freehold acquisition programme to secure surface rights ahead of mining where required. For undeveloped resources, only limited surface freehold is owned. In most instances, however, title to the mineral rights confers the right to utilise or acquire the surface freehold as may be necessary for mining purposes. Xstrata South Africa manages the necessary old order rights and freehold properties relative to their current and projected mining operations.

Copper and gold assets

Mineral rights at the Former Xstrata Group Copper Business's various operations are held through mining tenements. No separate surface rights exist for the properties. A summary of the mining tenements directly involved in actual operations is shown in the table below.

Principal terms and conditions for mining concessions relevant to the Queensland mining operations include the requirement to have an Environmental Authority issued by the Environmental Protection Agency ("EPA") and a Plan of Operations ("POO") lodged with the EPA. The POO specifies proposed mining and rehabilitation activities for a term of up to five years. The POO also includes an estimate of the maximum mine rehabilitation liability for the term of the POO and calculation of the corresponding financial assurance required to be lodged with the Department of Natural Resources and Mines ("DNRM"). The level of financial assurance required to be lodged with the government is a percentage of the total rehabilitation liability. The percentage required is dependent on the

environmental performance category of the mine, which is determined in accordance with EPA guidelines.

The miner calculates the total rehabilitation liability and the EPA may require this figure to be increased (resulting in an increase in the financial assurance). The EPA is not bound by previous estimates and has, in the case of third parties outside the Enlarged Xstrata Group, significantly altered and increased agreed calculations for total rehabilitation cost. There is no indication that the EPA will alter the calculation for the total rehabilitation cost of sites operated by the Enlarged Xstrata Group, but no assurance can be given that this will not occur in the future.

An annual return is required to be lodged with the EPA for each Environmental Authority. The annual return reports on compliance with Environmental Authority conditions. The Enlarged Xstrata Group has submitted all required POOs and annual returns for Environmental Authorities and has lodged the necessary financial assurances with the DNRM.

Alumbrera is required to submit environmental management reports every two years to the Provinces of Catamarca and Tucuman. The reports present results of the environmental monitoring conducted and any changes or issues in specific areas of the operation to the portions of the project that occur in each province. The report to Catamarca addresses the mine and mineral processing operations and the concentrator pipeline operation within the Catamarca Province. The report to the Province of Tucuman addresses pipeline and filter plant operations. The Enlarged Xstrata Group has submitted all required reports. No financial assurance is required by the Argentine authorities for Alumbrera.

Summary of Former Xstrata Group Zinc Business zinc and lead operations' mineral leases

Mineral rights at the various operations are held through mining licences. No separate surface rights exist for the properties.

Principal terms and conditions for mining concessions relevant to the Queensland mining operations include the requirement to have an Environmental Authority issued by the Environmental Protection Agency ("EPA") and a Plan of Operations ("POO") lodged with the EPA.

The POO specifies proposed mining and rehabilitation activities for a term of up to five years. The POO also includes an estimate of the maximum mine rehabilitation liability for the term of the POO and calculation of the corresponding financial assurance required to be lodged with the Department of Natural Resources and Mines ("DNRM"). The level of financial assurance required to be lodged with the government is a percentage of the total rehabilitation liability. The percentage required is dependent on the environmental performance category of the mine, which is determined in accordance with EPA guidelines.

The miner calculates the total rehabilitation liability and the EPA may require this figure to be increased (resulting in an increase in the financial assurance). The EPA is not bound by previous estimates and has, in the case of third parties outside the Enlarged Xstrata Group, significantly

altered and increased agreed calculations for total rehabilitation cost. There is no indication that the EPA will alter the calculation for the total rehabilitation cost of sites operated by the Enlarged Xstrata Group, but no assurance can be given that this will not occur in the future.

An annual return is required to be lodged with the EPA for each Environmental Authority. The annual return reports on compliance with Environmental Authority conditions. The Enlarged Xstrata Group has submitted all required POOs and annual returns for Environmental Authorities and has lodged the necessary financial assurances with the DNRM.

For McArthur River, the terms and conditions for mining concessions relevant to Northern Territory mining operations include the requirement to have a Mine Management Plan ("MMP") submitted and accepted by the Department of Business, Industry and Resource Development. The MMP specifies the proposed mining and rehabilitation activities for the McArthur River mine. The Enlarged Xstrata Group has submitted the required MMP and has lodged the necessary financial assurance.

Spanish zinc assets

The various Spanish Exploitation Concessions through which Asturiana controls the mineral rights and the right to mine at the Reocín mine expired on 25 July 2003. Currently neither mining concessions nor relevant investigation claims are owned by Asturiana in Spain.

Summary of the Alloys Business operations' mineral leases

An approved mining licence was required for all mining operations in terms of Section 9 of the Minerals Act (Act 50 of 1991), which was repealed by the MPRDA. These licences are valid for certain defined periods in terms of the transitional arrangements of the MPRDA.

Mine	Location(s)	Mining licence	Expiry date
Kroondal	Mineral area 2 (Portion of MA no 1 of the farm Kroondal)	ML 2/2002	None

Other licences

Maloma anthracite mine

Xstrata South Africa (Pty) Ltd holds a mining lease granted in 1992 by His Majesty, Ngwenyama of Swaziland in respect of the Maloma anthracite mine in Swaziland.

Acquisitions, disposals and discontinued operations

Acquisitions and disposals

During the periods covered by the financial information on the Former Xstrata Group included in, or incorporated by reference into these Listing Particulars, the Former Xstrata Group undertook the following principal acquisitions and disposals:

- On 24 June 2003, the Former Xstrata Group acquired 100% of the issued share capital of MIM Holdings Limited (now known as Xstrata Queensland Limited) for US$2.1 billion. In addition to its thermal coal and zinc lead assets, the acquisition of MIM provided the Former Xstrata Group with significant new products in copper and coking coal as well as a number of proprietary technologies, which are the main products of Xstrata Technology. The size and timing of the MIM acquisition substantially affects the comparability of the results of operations of the Former Xstrata Group for the financial years ended 31 December 2003 and subsequent periods under review.
- In November 2003, the Former Xstrata Group sold interests in the following JANEs: a 20% interest in the Newlands, Collinsville, Abbot Point Joint Venture, a 20% interest in the Oaky Creek Coal Joint Venture and a 25% interest in four Xstrata Coal Queensland projects in equal proportions to joint venture partners, Itochu Corporation and Sumitomo Corporation, for net consideration of US$388.4 million. JANEs are joint arrangements not creating an entity. They are characterised by the sharing of output (for example, the physical commodity or transport facility) rather than the sharing of profit for operations of the joint venture.
- On 1 July 2004, the Former Xstrata Group established a combined Pooling and Sharing Venture ("PSV") with Merafe Resources Limited ("Merafe"). The PSV was the first black economic empowerment transaction for the Former Xstrata Group and represented a considerable step forward in achieving compliance with the New Minerals and Petroleum Resources Development Act in South Africa.
- In August 2005, Anglo Platinum and the Former Xstrata Group formed the Mototolo Joint Venture to develop a platinum group metals ("PGM") mine and concentrator on the Eastern Limb of the Bushveld Complex in Mpumalanqa, South Africa. Anglo Platinum and the Former Xstrata Group each agreed to contribute a similar amount of in-situ PGM reserves and resources. Anglo Platinum agreed to purchase the Former Xstrata Group's 50% share of PGM concentrate for further smelting, refining and marketing of finished product. The Former Xstrata Group agreed to construct a beneficiation plant at its own cost to process the UG2 chrome tailings arising from the PGM concentrator and to purchase Anglo Platinum's 50% share of chrome concentrate. In February 2006, the Former Xstrata Group announced its agreement to form a black economic empowerment partnership with Kagiso Trust Investments (Proprietary) Limited ("Kagiso") in respect of the Former Xstrata Group's 50% interest in the Mototolo Joint Venture. As of 11 May 2006, Kagiso, through a special purpose vehicle, Kagiso Platinum Venture (Pty) Limited ("KPV"), acquired 26% of the Former Xstrata Group's 50% interest in the joint venture, resulting in KPV owning a fully participative 13%

interest in the earnings from the Mototolo Joint Venture, in return for funding its proportionate share of the total capital expenditure required for the project. The Former Xstrata Group retains an effective 37% interest. KPV's participation is effective retrospectively from the inception of the Mototolo Joint Venture. In order to facilitate Kagiso's fundraising, Xstrata South Africa provided a ZAR100 million (approximately US$13 million) completion guarantee to Kagiso's financiers, Investec Bank Limited. The total capital expenditure for the project is estimated at ZAR1,350 million (approximately US$172 million) to commissioning, of which the Former Xstrata Group's share is 37%. The Former Xstrata Group's investment is expected to be made by the end of 2007 and funded from the Enlarged Xstrata Group's free cash flow. Initial production of PGM is anticipated in the last quarter of 2006 and full production by the end of 2007.

- In August and September 2005, the Former Xstrata Group acquired Falconbridge Shares for US$1.7 billion in aggregate, such Falconbridge Shares at the time representing approximately 19.9% of the then outstanding Falconbridge Shares. These acquisitions were financed by the issue of the 2017 Convertible Debenture and borrowings under the Second Facility Agreement.

- In March 2006, the Former Xstrata Group announced the proposed acquisition of 33⅓% of the Cerrejón thermal coal operation in Colombia, from the Cerrejón Vendors, for a total consideration of US$1,712 million, which included an agreed amount of US$12 million in respect of the value of the excess net assets of the Cerrejón Business as at 1 January 2006 over the Cerrejón Purchasers' target net asset value of the Cerrejón Business. The consideration was satisfied in cash on completion of the Cerrejón Acquisition on 12 May 2006 and was financed through the Cerrejón Bridge Facility Agreement described in paragraph 12(l) of Part XVI — "Additional information — Material contracts" of these Listing Particulars.

- On 16 May 2006, the Former Xstrata Group announced the proposed acquisition of the Tintaya copper mine and associated satellite deposits in Peru, South America, from BHP Billiton for US$750 million. The acquisition price comprised an initial cash consideration paid on completion on 21 June 2006 of US$634 million and the assumption of US$116 million of debt. An agreed price participation arrangement based on prevailing copper prices upon completion of the transaction resulted in further deferred cash payments to BHP Billiton totalling US$25 million having to be paid during the 18 months from January 2007 to June 2008. Two further conditional deferred payments of US$25 million each in cash may also be payable to BHP Billiton. The first such amount will be payable in July 2009 if the LME copper price exceeds certain levels from July 2008 to June 2009. The second amount will be payable if either of the Antapaccay or Coroccohuayco satellite deposits are developed prior to 2020. The consideration for the Tintaya Acquisition was funded from debt facilities of the Former Xstrata Group. For further information on the Tintaya Acquisition, see paragraph 12(k) of Part XVI — "Additional information — Material contracts" of these Listing Particulars.

Discontinued operations

The Former Xstrata Group's discontinued operations include its forestry operation in Chile, which was sold in January 2005, and its magnesium scrap recycling plant in the United States, which was sold in April 2003.

Recent significant developments

Conversion of McArthur River mine

In August 2005, Xstrata announced the Former Xstrata Group's intention to convert the McArthur River zinc-lead mine in the Northern Territory, Australia from an underground to an open cut operation to enable production to continue at the mine. The switch of mining methods entails an investment initially estimated at A$66 million (approximately US$49 million) which, provided the necessary regulatory approval is obtained, is expected to be made over the next two years and funded from the Enlarged Xstrata Group's free cash flow. The regulatory approval may be subject to stringent compliance requirements which, added to further delays in the approval process, will result in increased project capital and operating cost.

Placing

On 17 May 2006, the Guarantor announced the placing to institutional investors of 61,994,320 Ordinary Shares at a price of 2100 pence per Ordinary Share to raise gross proceeds of approximately £1,302 million. The Placing, which closed on 22 May 2006, comprised 32,543,344 new Ordinary Shares issued by the Guarantor and 29,450,976 Ordinary Shares held at the time of the Placing by Batiss pursuant to the ECMP. The Placing was carried out to raise proceeds for the Former Xstrata Group to pay back a portion of the debt incurred in relation to the acquisitions of the initial stake of approximately 19.9% in Falconbridge and the Cerrejón Acquisition.

Partial sale of Cook Colliery

On 20 June 2006, Xstrata announced that heads of agreement had been signed with Caledon Resources plc for the partial sale of the Enlarged Xstrata Group's Cook Colliery and the surrounding Southern Resource. The Enlarged Xstrata Group will retain the large Northern Resource. A conditional sale and purchase agreement was entered into in respect of the sale on 22 August 2006. The consideration is A$45.6 million (approximately US$33.9 million), payable in cash.

Falconbridge Acquisition

On 28 July 2006, Xstrata Alberta purchased for cash 18,556,430 Falconbridge Shares through the TSX, representing approximately 5% of the then outstanding Falconbridge Shares, at an average price of C$62.25 per Falconbridge Share, or approximately C$1,155.1 million (approximately US$1,024.8 million) in aggregate. On 15 August 2006, Xstrata Canada acquired for cash 257,700,100 Falconbridge Shares under the Xstrata Offer, representing approximately 67.8% of the then outstanding Falconbridge Shares, at the Xstrata Offer price of C$62.50 per Falconbridge Share, or approximately C$16,106.3 million (approximately US$14,290.0 million) in aggregate. On 25 August 2006, Xstrata Canada acquired for cash 18,637,431 Falconbridge Shares under the Xstrata Offer, representing approximately 4.9% of the then outstanding Falconbridge Shares, at the Xstrata Offer price, or approximately C$1,164.8 million (approximately US$1,033.4 million) in aggregate. Since the Xstrata Offer was accepted by holders of more than 90% of Falconbridge Shares, Xstrata has begun the process of exercising its right under the compulsory acquisition provisions of section 188 of the Business Corporations Act (Ontario), as amended, to acquire all outstanding Falconbridge Shares not already owned by Xstrata at the Xstrata Offer price of C$62.50 per Falconbridge Share. Xstrata now beneficially owns approximately 99.9% of the issued and outstanding Falconbridge Shares on a fully-diluted basis. Xstrata expects the compulsory acquisition process to conclude in early November 2006. The aggregate cash consideration paid by the Former Xstrata Group for Falconbridge Shares since 30 June 2006 (and therefore excluding the consideration of approximately US$1.7 billion in aggregate for the stake acquired in August and September 2005 and excluding the consideration to be paid in respect of the Falconbridge Shares to be acquired under the compulsory acquisition procedure, which is estimated at approximately C$659.0 million (approximately US$585 million) in aggregate) was approximately C$18.3 billion (approximately US$16.2 billion). The market purchases of Falconbridge Shares and the Xstrata Offer were, and the compulsory acquisition procedure will be, financed by the Former Xstrata Group's existing cash resources and debt financing under the Equity Bridge Facility, the Debt Bridge Facility and the Acquisition Facilities described in paragraph 12(i) of Part XVII — "Additional information — Material contracts" of these Listing Particulars.

Falconbridge break fees

Following the expiry of the Inco Offer for Falconbridge on 28 July 2006, Falconbridge paid Inco a cash break fee of US$150 million on 1 August 2006 and, following the successful completion of the Xstrata Offer for Falconbridge, Falconbridge paid Inco a further cash break fee of US$300 million on 16 August 2006, in each case in accordance with the terms of the Inco Support Agreement.

Falconbridge Special Dividend

Falconbridge paid a special cash dividend of C$0.75 per Falconbridge Share on 10 August 2006 to Falconbridge Shareholders of record at the close of business on 26 July 2006, being cash payments

of approximately C$278.1 million (approximately US$246.7 million) and approximately US$3.6 million in aggregate, of which approximately C$55.2 million (approximately US$49.0 million) was received by the Former Xstrata Group in respect of its Falconbridge Shares held on the record date.

2006 Xstrata Interim Report

On 2 August 2006, the Guarantor published the 2006 Xstrata Interim Report (which is incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars). The full text of the announcement accompanying that publication is set out below.

News release

XSTRATA INTERIM RESULTS
FOR THE 6 MONTHS ENDED 30 JUNE 2006

Zug, 2 August 2006

Key Financial Results

$m	Six Months to 30.06.06*	Six Months to 30.06.05*	% Change
Revenue	**5,178.3**	3,765.7	37.5
EBITDA	**2,263.4**	1,347.7	67.9
EBIT	**1,947.4**	1,063.9	83.0
Attributable profit	**1,132.8**	797.1	42.1
Earnings per share (basic)	**$ 1.79**	$ 1.28	39.8
Cash generated from operations	**1,957.9**	1,136.6	72.3
Net debt to equity	**12.7%**	18.6%	(31.7)
Net assets	**13,084.0**	7,239.7	80.7
Net assets per share	**$ 18.69**	$ 11.84	57.9
Dividends declared and paid per share	**25.0¢**	16.0¢	56.3
Dividends proposed	**13.0¢**	9.0¢	44.4

* Excludes discontinued operations

Highlights

- Very strong earnings performance, with EBIT up by 83% to $1.9 billion
- Exceptional free cash generation of $1.3 billion after sustaining capital expenditure of $183 million
- Efficiency gains achieved and internal growth projects on budget in face of disproportionately high inflation in mining
- Acquisition of one-third of Cerrejón coal mine and Tintaya copper mine completed in first half
- Net debt to equity reduced to 12.7% despite acquisitions of $2.4 billion
- Cash offer for remaining 80% of Falconbridge Limited due to close on 14 August 2006

Mick Davis, Xstrata Chief Executive said:

"Xstrata's businesses delivered another very strong earnings performance in the first half of 2006. Earnings before interest, tax, depreciation and amortisation (EBITDA) increased to $2.26 billion and attributable profit rose to $1.13 billion, 68% and 42% higher than in the first half of the previous year respectively.

"Overall, higher sales prices contributed $958 million to EBIT of $1.95 billion, 83% higher than in the comparable period. The strengthening US dollar against local producer currencies also positively impacted results, together with higher volumes of Australian thermal coal, coking coal, copper, gold and zinc. The full benefit of increased volumes, sales prices and favourable currency movements was tempered by the impact of significantly higher than consumer price inflation increases in the

cost of mining inputs across the business. In common with the rest of the mining industry, Xstrata experienced steep increases in the cost of labour, fuel, explosives, tyres, construction materials and transport and freight charges, as demand from the mining sector continued to rise, with high levels of activity causing supply shortages and increased prices from suppliers. Stripping out the full impact of both CPI and mining specific inflation, Xstrata achieved real cost savings of $11 million.

"The outlook for Xstrata is very encouraging. Strong commodity prices, productivity improvements, further progress on a number of growth projects, the significant potential associated with the acquisition of Falconbridge and potential further participation in industry consolidation ensure that Xstrata is well positioned to continue to create significant value in the second half of 2006 and in the years ahead."

Agreement to establish ARM Coal

In February 2006, Xstrata announced the agreement of the Former Xstrata Group and African Rainbow Minerals Limited ("ARM") to establish a new black controlled coal mining company called ARM Coal (Proprietary) Limited ("ARM Coal"), with operating assets and growth projects in South Africa and participation in the export and domestic thermal coal markets. The transaction completed on 24 August 2006. The principal features of the transaction were as follows:

- As of completion, ARM paid ZAR400 million (approximately US$51 million) to subscribe for 51% and the Former Xstrata Group paid ZAR384 million (approximately US$49 million) to subscribe for 49% of the issued share capital of ARM Coal, which holds a 20% interest by way of participating preference shares in the existing coal operations of Xstrata South Africa, excluding the Goedgevonden project, and a direct 51% interest in the Goedgevonden project. The Former Xstrata Group agreed to provide vendor financing to ARM Coal and, to advance ARM's participation in the South African coal industry, also agreed to grant ARM an option (the "ARM Option") to increase its direct participation in participating preference shares of 1 Xstrata South Africa by up to a further 10%. ARM exercised the ARM Option in August 2006, which will result in historically disadvantaged South Africans controlling approximately 36% of Xstrata's South African coal business.
- Under this transaction, which was valued in aggregate at approximately ZAR2.4 billion (approximately US$306 million), ARM Coal initially subscribed for participating preference shares ("Initial Preference Shares") in the capital of Xstrata South Africa for cash consideration of ZAR784 million (approximately US$100 million), by applying the subscription proceeds received from the Former Xstrata Group and ARM for its ordinary shares. The Initial Preference Shares entitle ARM Coal to participate in 20% of the free cash flow of Xstrata South Africa's existing coal operations, excluding the Goedgevonden project. All dividends received from the Initial Preference Shares flow to ARM via ARM Coal.
- Under the terms of the ARM Option, ARM subscribed for new participating preference shares ("Further Preference Shares") in the capital of Xstrata South Africa for cash consideration of ZAR400 million (approximately US$51 million). The Further Preference Shares carry the same rights and obligations as the Initial Preference Shares save that no vendor facilitation (relating to interest and capital standstill arrangements and the application of the cash upstream principle as more fully described below) was provided by Xstrata South Africa. Accordingly, the Further Preference Shares will entitle ARM to participate in 10% of the free cash flow of Xstrata South Africa's existing coal operations, excluding the Goedgevonden project, and dividends received from the Further Preference Shares will flow directly to ARM.
- For the purposes of this transaction, ZAR4 billion (approximately US$510 million) of debt was attributed to Xstrata South Africa's existing coal operations, excluding the Goedgevonden project. This debt bears interest at the prime overdraft rate of interest quoted publicly by the Standard Bank of South Africa (the "prime rate") and is to be repaid over a ten-year period following a five-year vendor facilitation period during which no interest will accrue and no principal will be required to be repaid. Xstrata South Africa provided debt funding of ZAR765 million (approximately US$98 million) to ARM Coal in order to fund its acquisition of the 51% interest in the Goedgevonden project. This debt bears interest at the prime rate and the repayment period is linked to the underlying cash flows of ARM Coal.
- Furthermore, Xstrata South Africa is obliged to provide the project funding required to bring the Goedgevonden project into commission. The project funding is expected to peak at approximately ZAR2.9 billion (approximately US$370 million) and will be repayable over ten

years following an eight-year vendor facilitation period. During this eight-year period, no interest will accrue and no principal will be required to be repaid in respect of Xstrata South Africa's portion of the project funding and ARM Coal will be entitled to share in this benefit. The project funding will bear interest at the prime rate.

- In order for ARM to gain immediate access to cash flows, a cash upstream principle is applicable for the first five years following completion of the transaction, whereby 20% of Goedgevonden's operating cash flow will be distributed to the joint venture parties according to their respective interests. The remaining 80% of the operating cash flow will be utilised towards the servicing of the project funding debt. Furthermore, 80% of the operating cash flow received from the Goedgevonden project by ARM Coal will be used to service ARM Coal's debt of ZAR765 million and the remaining 20% will be distributed to the shareholders of ARM Coal.

Redemption of Falconbridge preference shares

Falconbridge announced on 15 September 2006 its intention to redeem its outstanding Cumulative Redeemable Preferred Shares, Series F and Series G, and Cumulative Preferred Shares, Series 1 on 1 November 2006. Falconbridge intends to utilise its internal cash resources to fund the aggregate redemption price of approximately C$306 million (approximately US$271 million).

Rights Issue and Prospectus

On 3 October 2006, Xstrata announced the Rights Issue and published the Prospectus in relation to it. Xstrata launched the Rights Issue to refinance part of the debt raised to finance the cash consideration paid in respect of the Falconbridge Acquisition. The total net proceeds of the Rights Issue, after estimated aggregate costs and expenses of approximately £54 million (approximately US$101 million), are expected to be approximately £2.9 billion (approximately US$5.4 billion).

The Rights Issue, which is being made on the basis of one New Share for every three Existing Shares held at 5.00 p.m. (London Time) on 2 October (the "Record Date"), at a price of 1,265 pence per New Share, is conditional upon a number of matters that are typical for a transaction of its nature. If these conditions are not fulfilled, the Rights Issue will not proceed.

Save in respect of New Shares which Glencore International takes up pursuant to the irrevocable undertakings it has given to Xstrata and pursuant to the separate underwriting commitment Glencore International has given to the Banks pursuant to the Glencore Underwriting Letter, the Rights Issue is fully underwritten by Deutsche Bank and, on behalf of its affiliate JPMorgan Cazenove, by JPMSL. For information in relation to the relevant Underwriting Agreement, see paragraph 12(f) of Part XVI — "Additional information — Material contracts" of these Listing Particulars.

Glencore International and CSSEL have the largest shareholdings in Xstrata, holding approximately 14.3% and 21.7% respectively of the Ordinary Shares at the date of these Listing Particulars. Glencore International has irrevocably undertaken to take up its full entitlements under the Rights Issue. In addition, CSSEL has agreed to transfer to Glencore International its entitlements in respect of 151,560,600 Ordinary Shares under the Rights Issue and Glencore International has also irrevocably undertaken to take up in full such entitlements. CSSEL (in respect of 151,560,600 Ordinary Shares) and Glencore International have agreed to lock-ups which, subject to certain exceptions, will expire six months after the latest time for acceptance and payment in full of entitlements to subscribe for the New Shares. A total of 84,200,333 New Shares are subject to Glencore International's irrevocable undertakings (approximately 35.71% of the maximum number of New Shares to be issued under the Rights Issue). The Takeover Panel has granted a dispensation from any obligation on either Glencore International or CSSEL to make a mandatory offer for Xstrata pursuant to Rule 9 of the City Code, as a result of Glencore International and CSSEL's interest being diluted by exchange rights under the Glencore Exchangeable Bonds being exercised or conversion rights under the 2010 Convertible Bonds, 2017 Convertible Debenture or 2017 Convertible Bonds into Ordinary Shares being exercised, between 2 October 2006 (being the latest practicable date prior to the publication of the Prospectus) and completion of the Rights Issue and subsequently being increased again as a result of Glencore International subscribing for New Shares pursuant to the irrevocable undertakings it has given to Xstrata or pursuant to the Glencore Underwriting Letter. Glencore International's right to acquire shares pursuant to Note 11 on Rule 9.1

of the City Code is not affected by this dispensation nor by these arrangements generally. For further information on these irrevocable undertakings, see paragraph 12(g) of Part XVI — "Additional information — Material contracts" of these Listing Particulars.

Glencore International will be paid an underwriting commission by Xstrata of US$35.1 million in connection with its undertakings.

Dealings in New Shares, nil paid, have commenced on the London Stock Exchange and on the SWX on 5 October 2006. The expected latest date for acceptance and payment in full under the Rights Issue is 27 October 2006.

Shareholders who choose not to take up their rights under the Rights Issue will be diluted by 25% following the issue of the New Shares.

For further information in relation to the Rights Issue, see paragraph 1 of Part VII — "Use of proceeds and Terms and Conditions of the Rights Issue — Use of proceeds and terms and conditions of the Rights Issue" of the Prospectus, which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars.

Current trading and prospects

Since 30 June 2006, Xstrata has continued to trade well, with demand for commodities remaining robust. In the wider market, this demand, together with market supply constraints and long lead times to add new market capacity, has supported prices for the Enlarged Xstrata Group's commodities significantly above long-term averages.

Base metals prices rose strongly in the first half of 2006, with copper, zinc and lead prices peaking in May before falling back in June. In mid-September 2006, the prices of these three metals fell back from their recent highs due to concerns over potential softer Chinese demand and the performance of the US economy. However, base metal prices remain significantly above their long-term averages and the assumptions that underpinned the Falconbridge Acquisition.

For copper, supply uncertainty and a strong physical market supported prices. The market was sensitive to supply issues such as industrial unrest in Escondida, a significant copper mine in Chile (which is owned by third parties outside the Enlarged Xstrata Group, including BHP Billiton and Rio Tinto), further boosting the copper price. This dispute has now ended, but the prevailing copper price remains supported by a tight market. In the three months ended 30 September 2006, copper prices consolidated in a range between US$7,000 per tonne and US$8,000 per tonne. Expansionary projects to increase smelter capacity at the Enlarged Xstrata Group's Australian Mount Isa operation are expected to improve refined metal output in the second half of 2006.

Strong global zinc demand growth (approaching 7% in 2006), low zinc stocks on the London Metal Exchange (LME) and a supply deficit have combined to boost the zinc price in the second half of 2006, in addition to the increase in the first half of 2006. This mitigated lower metal production in the Enlarged Xstrata Group's Australian operations in the first half of 2006, and improved concentrator capacity coming on stream in the second half 2006 is expected to improve zinc and lead volumes significantly.

Low LME stocks and surging demand from stainless steel producers have boosted nickel prices to date in 2006. Despite significant gains in the first half of 2006, prices have increased further in the third quarter of 2006 and stocks currently remain low. This has facilitated a strong performance by the Nickel Business despite the impact of high fuel costs.

Following an increase of approximately 12% in the aluminium price in the first six months of 2006, the aluminium price has remained flat to date in the second half of 2006, albeit at a relatively high level by historical standards.

For thermal and coking coal, more than 90% of Xstrata's export sales from Australia and South Africa have been priced for the remainder of 2006. Thermal and coking coal prices have remained above historical averages in 2006, although average realised prices are expected to be lower than in 2005. A key driver of earnings for the Coal Business in 2007 will be the settlement of contract prices

in Australian thermal and coking coals for the new contract year from 1 April 2007 as well as coal's competitive position in the European energy market. Thermal coal prices relating to this period for contracts settled to date have reflected the continued strong demand, while hard coking coal price negotiations for the new contract year typically will not commence until later in 2006. In Europe, the forward coal prices are currently higher than spot pricing, reflecting a stronger forward electricity and gas market. Production volumes are higher in 2006 due to commencement of projects such as the Rolleston thermal coal project in Queensland, Australia and a second longwall in the Oaky No 1 coking coal operation, although Xstrata does not expect the Enlarged Xstrata Group's South African operations to increase exports for 2006.

Stronger demand from stainless steel producers in 2006 has supported an increase of 4.75 cents per pound in the ferrochrome price in the third quarter of 2006. Phase one of the Project Lion ferrochrome smelter complex is expected to be commissioned on schedule in the fourth quarter of 2006, adding additional, lower cost capacity to the Enlarged Xstrata Group's South African ferrochrome business. Vanadium prices have declined from the peaks seen in 2005, but remain strong and are anticipated to remain significantly above historical levels during 2006.

PART XIII — INFORMATION ON THE FALCONBRIDGE GROUP

Overview of the Falconbridge Group's business

The Falconbridge Group's principal products are nickel, copper, zinc and aluminium, with the balance of the Falconbridge Group's products coming from by-products and co-products that include silver, gold, platinum group metals, lead, selenium, tellurium, cadmium, indium, cobalt, nickel sulphate and sulphuric acid.

The principal markets for the Falconbridge Group's products include the steel, refinery and foundry, construction, telecommunications, automotive, agricultural and chemical industries. The United States was the principal market for the Falconbridge Group's products in 2005, accounting for 36% of consolidated sales (2004 — 36%), with Canada accounting for 16% of consolidated sales (2004 — 17%), Europe 23% of consolidated sales (2004 — 26%) and other countries 25% of consolidated sales (2004 — 21%).

In July 2005, Falconbridge's subsidiary Noranda Aluminum Inc. sold its aftermarket automotive wheel manufacturing and distribution operations, American Racing Equipment ("ARE") to Platinum Equity, a global mergers and acquisition firm based in Los Angeles, California, for US$40.5 million. The transaction resulted in a gain for Falconbridge of approximately US$1 million. Under the transaction, an affiliate of Platinum Equity acquired all outstanding shares of ARE.

History and development of the Falconbridge Group

Falconbridge Limited is the continuing corporation resulting from the amalgamation under the Business Corporations Act (Ontario) on 30 June 2005 of Noranda and Former Falconbridge. Predecessors of Falconbridge have carried on business under the Falconbridge Limited name since 1928 and under the Noranda Inc. name since 1922.

Falconbridge Group financial information

For the principal differences in the application of the Guarantor's accounting policies and those applied by Falconbridge, see pages 393 to 400 of the Circular, and, for financial information on the Falconbridge Group for the three years ended 31 December 2005, 31 December 2004 and 31 December 2003, see pages 335 to 387 of the Circular (all of which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars).

Nickel Business summary

Introduction

The Nickel Business's operations include mines and processing facilities in Canada, Norway and the Dominican Republic.

The Nickel Business markets and sells nickel and ferronickel to customers in 31 countries. The largest markets are Western Europe, the United States and Asia/Pacific, which in the six months ended 30 June 2006 accounted for approximately 50%, 23% and 27%, respectively, of total nickel sales.

Reserve and resource base

The tables below set out the Nickel Business's attributable nickel and copper reserve and resource base as at 31 December 2005:

Mineral reserves[1]

	% ownership		31 December 2005 (000's tonnes)	Copper (%)	Zinc (%)	Nickel (%)	Lead (%)	Silver (g/mt)	Molybdenum (%)	Aluminum (%)

Notes:

The above table sets out the Falconbridge Group's attributable nickel resource base (in addition to reserves), based on the total mine basis figures in the Falconbridge Group Mineral Reserves and Mineral Resources Information. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of the reserve and resource estimates.

[1] Mineral resources do not include allowances for dilution or mining recovery.

[2] Mineral resource total does not contain limonite inferred resource of 100 million tonnes grading 1.6% nickel and 0.2% cobalt.

Production

The tables below set out the total mine production and attributable production of the Nickel Business for the years ended 31 December 2004 and 31 December 2005 and for the six months ended 30 June 2005 and 30 June 2006:

Total mine production[1]	Year ended 31 December		Six months ended 30 June	
	2004	2005	2005	2006
	Tonnes			
Mined nickel	80,800	79,600	41,200	40,000
Refined nickel	100,900	113,600	56,800	55,500
Mined copper	32,700	34,200	18,100	17,000

[1] See Part II — "Presentation of information — Ore reserve and mineral resources reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

Attributable production[1]	Year ended 31 December		Six months ended 30 June	
	2004	2005	2005	2006
	Tonnes			
Mined nickel	76,400	75,400	39,100	37,900
Refined nickel	96,500	109,300	54,900	53,400
Mined copper	6,900	5,800	18,100	17,000

[1] See Part II — "Presentation of information — Ore reserve and mineral resources reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

Financial information

The table below provides selected summary financial information in relation to the Nickel Business for the year ended 31 December 2004 and the year ended 31 December 2005 (which has been extracted without material amendment from page 378 of Part III — "Information on the Falconbridge Group" of the Circular (which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars)) and for the six months ended 30 June 2006 (which has been extracted without material amendment from the 2006 Falconbridge MD&A):

Nickel Business	Audited restated Canadian GAAP Year ended 31 December 2004		Audited Canadian GAAP Year ended 31 December 2005		Unaudited Canadian GAAP Six months ended 30 June 2006[2]	
		As a percentage of the Falconbridge Group		As a percentage of the Falconbridge Group		As a percentage of the Falconbridge Group
	US$m	(%)	US$m	(%)	US$m	(%)
Revenues	1,824	27.0	2,146	26.3	1,314	19.3
Income generated from operating assets[1]	637	45.8	597	32.8	383	19.3

[1] See the detailed definition of income generated from operating assets under the heading "Supplemental Performance Measures" in the 2006 Falconbridge MD&A (which has been set out below in full in this Part XIII — "Description of the Falconbridge Group's business — Recent significant developments — 2006 Falconbridge MD&A").

[2] For further information on the financial results of the Falconbridge Group for the six months ended 30 June 2006, see the Consolidated Statements of Income, the Consolidated Statements of Cash flows and the Consolidated Balance Sheets that accompanied Falconbridge's announcement of its second quarter 2006 financial results (each of which has been set out below in full in this Part XIII — "Description of the Falconbridge Group's business — Recent significant developments — Falconbridge second quarter 2006 financial results" of these Listing Particulars).

The Falconbridge Nickel Business's mining and milling operations

Falcondo

The Enlarged Xstrata Group owns 85.26% of the outstanding shares of Falconbridge Dominica C. por A. ("Falcondo"). Of the balance, the Government of the Dominican Republic owns approximately 10%, Redstone Resources Inc. owns approximately 4.1% and various individuals own the

remainder. Falcondo holds a mining concession and owns mining and mineral processing facilities for the production of ferronickel located near the town of Bonao, approximately 80 kilometres northwest of Santo Domingo, Dominican Republic.

Falcondo has been mining and processing nickel laterite ore in the Dominican Republic since 1971. Falcondo's mining concession covers approximately 21,830 hectares. Falcondo owns 4,831 hectares, 4,802 of which are inside the mining concession and include the mining areas and the mineral processing facilities, and 29 of which are outside the mining concession and include the townsite at Bonao. The term of the mining concession is for an unlimited period.

Mining at Falcondo is carried out from the surface using bulldozers, hydraulic shovels and trucks. Falcondo's total mine production for the six months ended 30 June 2006, as obtained through a metallurgical balance calculation, was 1,944,293 dmt (full year 2005 — 3,920,220 dmt) of ore at an average nickel grade of 1.16%.

Raglan

The Raglan property is located 105 kilometres south of the northern tip of the Ungava (Nunavik) Peninsula in the Province of Quebec, approximately 1,800 kilometres north of Montreal. The property comprises 1,226 map-designated claims covering 48,149 hectares and ten 20-year mining leases covering 963 hectares. The first of the leases expires in June 2016. All are renewable for three 10-year terms, provided that mining has taken place for at least two of the preceding ten years. One mining lease application covering 32 hectares remains outstanding from 2005.

Commercial production at Raglan began on 1 April 1998. Raglan's annual production capacity is one million tonnes of ore milled per year. Net production for the six months ended 30 June 2006 totalled 11,396 tonnes of nickel (full year 2005 — 22,224 tonnes), 2,837 tonnes of copper (full year 2005 — 5,842 tonnes), and 189 tonnes of cobalt (full year 2005 — 354 tonnes).

The ore from the Raglan mines is crushed, ground and treated at the Raglan mill to produce nickel/copper concentrate. Raglan concentrate is trucked to Deception Bay for marine shipment to Quebec City and then transported by rail to the Sudbury smelter for treatment. There were six shipments from Deception Bay during 2005.

The current mill throughput is 3,000 tonnes of ore per day. Total ore milled in the six months ended 30 June 2006 was 524,954 tonnes (full year 2005 — 933,912 tonnes). Nickel capacity at the concentrator now stands at 26,000 tonnes of nickel concentrate per year.

With its 500 employees and 250 sub-contractors, the mine is a major contributor to the region's economic vitality with expenses of approximately C$250 million (approximately US$222 million) annually, 11% of which remains in Northern Quebec and 32% in the Abitibi region, with 86% of annual expenses remaining in the province of Quebec.

Sudbury

The Nickel Business has been mining nickel/copper ores in the Sudbury area of northern Ontario since 1929. The Sudbury Mines/Mill principal nickel/copper producing properties in the Sudbury area are located in the Townships of Falconbridge, Levack, Garson, Dowling and Blezard. The properties comprise 2,345 hectares owned by the Nickel Business and 14 hectares held under two licences of occupation of mining rights from the Province of Ontario. The licences of occupation are held in perpetuity.

Sudbury Mines/Mill operates three underground nickel/copper mines in the Sudbury area: the Craig, Fraser and Lindsley mines. In the six months ended 30 June 2006, the Craig mine provided 42% of Sudbury Mines/Mill's ore production.

Metal in concentrates produced during the six months ended 30 June 2006 amounted to 8,817 tonnes of nickel (full year 2005 — 19,708 tonnes), 11,397 tonnes of copper (full year 2005 — 23,367 tonnes) and 212 tonnes of cobalt (full year 2005 — 525 tonnes).

The ore from Sudbury Mines/Mill is crushed and ground and the nickel/copper bearing sulphide materials contained in the ore are separated from waste materials at the Strathcona mill to produce nickel/copper concentrate and copper concentrate. The Sudbury Mines/Mill total ore milled for the six months ended 30 June 2006 was 1,006,228 tonnes (full year 2005 — 2,174,998 tonnes). The

Strathcona mill has a capacity of approximately 8,500 tonnes of ore per day. The copper concentrate from the Strathcona Mill is delivered to Kidd Creek Metallurgical's mineral processing facilities for smelting and refining. The nickel/copper concentrate from the Strathcona mill is delivered to the Sudbury smelter for smelting.

Montcalm

The Montcalm nickel mine was brought into production in 2004. It is located 100 kilometres east of the Kidd Metallurgical Site in Montcalm Township in the Province of Ontario and comprises four 21 year leases covering mining and surface rights over 831 hectares.

The Montcalm project reached its designed production capacity of 750,000 tpa during the fourth quarter of 2004. This included conversion of a redundant mill line at the Kidd concentrator to handle the Montcalm ores. Two concentrates are produced, a copper concentrate which is treated at the Kidd Metallurgical Complex and a nickel concentrate which is transported to the Enlarged Xstrata Group's smelter in Sudbury.

During the six months ended 30 June 2006, Montcalm mined and milled 435,204 tonnes (full year 2005 — 750,073 tonnes) grading 1.57% nickel and 0.79% copper. The mine and mill's ability to consistently run at the planned 875,000 tpa rate has been confirmed.

The Nickel Business's smelting and refining operations

Falcondo

The ore mined at Falcondo is milled, smelted and refined at Falcondo's mineral processing facilities, which have a capacity of approximately 29,000 tpa of nickel contained in ferronickel. The facilities include a metallurgical treatment plant, a crude oil processor and a 200-megawatt thermal power plant. In the six months ended 30 June 2006, Falcondo purchased back-up power energy from the national grid during the period of maintenance of the three owned units. Falcondo has dock facilities and a crude oil tank farm at the port of Haina (near Santo Domingo) and a 70-kilometre crude oil pipeline from the port to its mineral processing facilities. Falcondo's production of nickel in ferronickel for the six months ended 30 June 2006 was 14,367 tonnes (full year 2005 — 28,668 tonnes).

Falcondo is presently studying a 2,000 tpa expansion via the upgrading of one of its two electric arc furnaces from 60 to 75 MW while enhancing transformer reliability and furnace integrity. Falcondo is studying the implementation of continuous tapping in its two electric furnaces. This project is intended to improve safety performance and furnace operability and result in the production of an additional 250 tpa of nickel.

Falcondo has also initiated a project to convert from liquid hydrocarbons to coal in the process plant. This project entails the replacement of the shaft furnaces with two kilns. This project is intended to significantly decrease the operating cost at Falcondo.

Sudbury

The nickel/copper concentrate from the Strathcona mill is treated at the Sudbury smelter along with Raglan and Montcalm concentrates and custom feed from other sources. The smelter produces a matte containing nickel, copper and cobalt, as well as silver, gold and platinum group metals. The Sudbury smelter has the capacity to produce approximately 130,000 tpa of matte. The matte produced is shipped by rail to Quebec City and by sea to the Nikkelverk refinery in Norway for further processing.

The Sudbury smelter's output for the six months ended 30 June 2006 from all sources was 29,318 tonnes of nickel (full year 2005 — 63,093 tonnes), 10,026 tonnes of copper (full year 2005 — 20,798 tonnes) and 1,099 tonnes of cobalt (full year 2005 — 2,423 tonnes). Copper concentrate sent to the Kidd Creek and Horne smelters contained 8,572 tonnes of copper (full year 2005 — 18,126 tonnes). Sulphuric acid produced as a result of smelting activity in Sudbury was 144,597 tonnes for the six months ended 30 June 2006 (full year 2005 — 310,618 tonnes).

The Guarantor estimates that meeting regulatory emission reductions targets in respect of fugitive and stack, particulate and sulphur dioxide at the Sudbury smelter could involve expenditure of approximately US$40 million to US$60 million by 2008.

Nikkelverk

Falconbridge Nikkelverk, AS ("Nikkelverk"), which is wholly-owned by the Enlarged Xstrata Group, operates a refinery and a sulphuric acid plant at Kristiansand, Norway. The refinery processes the matte produced by the Sudbury smelter as well as custom feed from other sources, which includes the treatment of the silver, gold and platinum group metals contained in the matte and custom feed. The refinery has an annual capacity of approximately 86,000 tonnes of nickel, 40,000 tonnes of copper and 5,200 tonnes of cobalt. The sulphuric acid plant has a capacity of approximately 115,000 tpa of sulphuric acid. In the six months ended 30 June 2006, the refinery produced 41,126 tonnes of nickel (full year 2005 — 84,886 tonnes), 20,329 tonnes of copper (full year 2005 — 38,681 tonnes), 2,531 tonnes of cobalt (full year 2005 — 5,021 tonnes) and 53,704 tonnes of sulphuric acid (full year 2005 — 108,828 tonnes).

Mattes from the Sudbury smelter and from BCL Limited ("BCL") in Botswana were the main sources of nickel/copper feed materials for the Nikkelverk refinery during the six months ended 30 June 2006.

In the six months ended 30 June 2006, the refinery produced 195,774 ounces of PGMs (full year 2005 — 405,000 ounces).

Significant expansion of the nickel and cobalt capacity, based on matte or laterite intermediates, is possible if market conditions warrant such expansion.

FIL

Falconbridge International Limited ("FIL"), through its offices in Bridgetown, Barbados and Brussels, Belgium, is responsible for managing the Integrated Nickel Operations' ("INO") custom feed business outside Canada. Custom feed, or third-party primary smelter mine production (concentrate), primary smelter production (matte) and secondary raw materials, provides a significant source of feed to the Sudbury smelter and the Nikkelverk refinery. The availability of and profit margins associated with the custom feed processed at the Sudbury smelter and the Nikkelverk refinery are largely a function of metal grade and the level and relationship of nickel, copper, cobalt, silver, gold and platinum group metals prices and competition for such materials.

The custom feed processed at the Sudbury smelter consists largely of nickel/copper/cobalt secondary raw materials and nickel concentrates. Most secondary raw materials are sourced on a spot basis or under contracts of one to three years' duration. Concentrates are sourced on a spot basis and through multi-year contracts. In the six months ended 30 June 2006, the Sudbury smelter's output from all third-party feeds included 7,538 tonnes of nickel, 4,040 tonnes of copper and 630 tonnes of cobalt.

In 1985, FIL entered into a long-term agreement with BCL to treat complex nickel/copper matte from BCL's smelter in Botswana. BCL matte represented approximately 52% of all nickel treated at the Nikkelverk refinery in direct refinery custom feeds in 2005. Under the agreement, which was extended in 2002 to the end of 2015, BCL has agreed to deliver approximately 10,000 tonnes of nickel in matte per year.

In 2006, custom feed represented approximately 41.6% of the nickel (2005 — 37%), 69.6% of the copper (2005 — 64%) and 81.2% of the cobalt (2005 — 80%) output at the Nikkelverk refinery.

Sales and marketing of the Nickel Business's nickel

Marketing and sales of ferronickel produced at Falcondo are conducted through Falconbridge U.S. Inc., Falconbridge Europe S.A. and Falconbridge (Japan) Limited.

Projects and developments

Sudbury Operations, Ontario

The Sudbury area is one of the world's largest sources of nickel and contains significant copper, cobalt, silver, gold and platinum group metals. In addition to its operating mines, the Enlarged Xstrata Group has large property holdings covering favourable geology of the Sudbury Igneous Complex.

Exploration has defined a mineral resource at Nickel Rim South located 2.7 kilometres north of the airport at a depth of approximately 1100-1600 metres. The inferred resource consists of 13.4 million tonnes grading 1.8% nickel, 3.3% copper, 1.8 grams per tonne platinum, 2.0 grams per tonne palladium and 0.8 grams per tonne gold. A decision to proceed with a five-year underground definition programme costing US$368 million was announced on 11 March 2004 and underground drilling on the resource commenced in the second quarter of 2006. Drilling on the Fraser Morgan zones resulted in measured plus indicated resources totalling 4.9 million tonnes grading 1.80% nickel and 0.56% copper in Zones 8 and 9. Zone 11 at Fraser Morgan also contains 2.4 million tonnes of inferred resources grading 1.8% nickel and 0.5% copper, which is presently being drilled from underground to upgrade the confidence in the resource to be included in an updated feasibility study.

The Falconbridge Group spent US$9.156 million on exploration in support of the Sudbury operations in 2005 and the Enlarged Xstrata Group plans to spend US$15.6 million in 2006. This includes diamond drilling and other exploration that was carried out on certain of the Falconbridge Group's properties by option and joint venture partners, who also have exploration programmes planned for 2006.

Xstrata announced on 19 September 2006 that the Nickel Business had begun construction of a new cobalt and nickel recycling plant at the Sudbury smelter that is expected to more than double the capacity of the smelter's existing recycling business, with anticipated investment of C$21.4 million (approximately US$19 million). The Nickel Business has received all necessary environmental permits following a detailed engineering and pilot-testing phase completed mid-June 2006. Commissioning of the new plant, which will be operated and maintained by the Nickel Business's current Sudbury employees, is scheduled for July 2007.

Raglan, Quebec

An annual exploration programme in 2005 resulted in the discovery of approximately 2.5 Mt of mineral resources at Zones 3, 5-8, West Boundary, Donaldson and East Lake. This is more than double the annual production rate at Raglan which milled 934,000 tonnes of ore in 2005. The most significant result was the expansion of lens 8H which now is estimated to contain 2.3 Mt grading 2.8% nickel. This is the largest single lens ever discovered in Raglan. Zones 5-8 which includes lenses in Zones 7 and 8 will be placed in the Mining Stage Gate Process and may become the next major mining centre at Raglan. Preliminary results from the 2006 programme have continued to expand the resource at Zones 5-8, and actual resource estimation and verification is intended to be updated on completion of the current drill program, which will coincide with the Arctic winter. Preliminary results for 2006 have also identified new open pittable resources and the programme continues with nine drills.

The Nickel Business spent US$10.8 million (US$6.2 million after Quebec tax credits) in 2005 in support of the Raglan operation. The Enlarged Xstrata Group initially planned to spend US$20.7 million (US$11.6 million after Quebec tax credits) in 2006. However, due to unusually severe winter weather which extended well into June, the program will likely be curtailed by 10-15% depending on how long the field season can be extended into the fourth quarter of 2006.

In April 2006, the Falconbridge Group shared C$9.3 million with the local Inuit communities, representing the share of the profits generated by the operations of the Raglan nickel mine located in the Nunavik Territory of Northern Quebec. This yearly profit-sharing is part of the Raglan Agreement, a comprehensive agreement signed on 28 February 1995 with the Makivik Corporation and local Inuit communities. The agreement is designed to harmonise relations and foster opportunities between the Falconbridge Group (and, going forward, the Enlarged Xstrata Group) and local populations and their representatives in areas such as training, hiring of local businesses and environmental management.

With the first phase of the Raglan mine optimisation complete, focus has shifted to developing the phase II scope. The second phase of Raglan's optimisation will focus on utilising increased mill capacity by expanding site infrastructure and ore production to allow for the mining, milling and processing of 1.3 Mtpa of ore, resulting in approximately 30,500 tonnes of annual contained nickel production. Scoping study work has been initiated. This phase is targeted to be completed in early 2008.

A major investment programme is planned for the Nickel Business's nickel installations at the Raglan mine involving the launch of two important studies for the Raglan mine expansion. The first will focus on developing new ore reserves to replace those depleted since the mines opening in 1997. This investment is expected to reach nearly C$240 million over six years.

The second study is to support the expansion of nickel ore production from 1 Mtpa to 1.3 Mtpa as early as 2009. This 30% increase, requiring an additional investment of roughly C$250 million, would create 50 additional jobs and increase the value of annual royalties the Enlarged Xstrata Group pays to local Inuit communities.

This amount is in addition to the nearly C$200 million in equipment and upgrades the Falconbridge Group has invested at the Raglan Mine since 2004. The initial investment in the construction of Raglan was in excess of US$600 million.

Major renovations are to commence at the Nickel Business's Deception Bay loading dock. The C$50 million investment will extend the dock's service life and support the production increases.

Nickel Rim, Ontario, Canada

In 2001, Falconbridge discovered Nickel Rim South — a high grade 13.4 Mt resource grading 1.8% nickel, 3.3% copper and significant platinum, palladium and gold. A five-year underground definition and development programme was initiated in 2004 at this deposit, located nine kilometres from the Enlarged Xstrata Group's Sudbury smelter.

The estimated capital cost of this project is US$524 million, reflecting an increase of US$100 million in foreign exchange and escalation variations.

Vent shaft sinking, which began in February 2005, is now at 1,440 metres (as at the end of July) and is ahead of schedule. Main shaft sinking began in April 2005 and is now at 1046 metres (as at the end of July). This project is expected to be completed in 2009, with production starting in 2009.

Koniambo Project, New Caledonia

Koniambo is a pyrometallurgical complex for the production of ferronickel in the Northern Province of New Caledonia. Production is targeted to begin in 2009/2010 and is expected to reach 60,000 tpa of nickel. In 2005, final agreements were put in place by and among Falconbridge, Société Minière du Sud Pacifique S.A. ("SMSP"), and other relevant parties to provide for the transfer of the Koniambo ore body in New Caledonia to Koniambo Nickel SAS, a company owned 49% by the Enlarged Xstrata Group and 51% by SMSP. In late December 2005, the Falconbridge Group met the relevant conditions of the Bercy Accord for this transfer to take place, including having placed firm orders for at least US$100 million in total for equipment and services relating to the project.

The Koniambo Project continues to advance the Detailed Engineering, the Execution Plan and the Procurement Programme with a 2006 budget of US$240 million, in addition to the US$96 million invested in 2005. More than US$388 million has already been committed to the project to date.

The Koniambo Project team is currently concentrating its efforts to address the challenges typical for such projects in the areas of controlling costs, execution planning and sustainable development. As is the case with other major industrial projects, Koniambo is faced with very significant growth in the costs associated with raw materials, transportation and the shortage of specialised resources for all projects because of the extension of the Goro Nickel construction schedule.

Xstrata Nickel remains committed to developing the Koniambo complex, one of its anchor projects, along with its controlling shareholder partner, SMSP.

Prior to completion of the Falconbridge Acquisition, Falconbridge had already begun a review of the costs and its execution strategy so as to measure the impact of the new economic reality on the project. Xstrata Nickel is designing a new project execution strategy in the context of increases in the costs of energy, raw materials and goods and services and a shortage of skilled labour.

The capital cost of the project was estimated to be US$2.2 billion (in 2004 US dollars based on an issued feasibility study) excluding interest to be incurred during construction, price escalation and initial working capital requirements. The project includes the construction of a US$600 million power station with an installed generating capacity of 390 MW and a metallurgical plant, mine development and other infrastructure such as the port and road facilities.

The Koniambo Project will continue to be actively developed during this period of strategy renewal, particularly in the Voh-Koné-Pouembout region. This includes in particular the current environmental, archaeological and geotechnical studies.

The close-communication approach used since the start of the project with the local stakeholders will remain unchanged, and the local team will maintain its strong presence in the community.

The Nickel Business has, subject to certain terms and conditions including fiscal and legislative stability, agreed to arrange for or provide up to 100% of the financing required for the project. Given these financing arrangements, the project's free cash flow would first be used to service and repay debt incurred to finance the construction of the project before any distributions would be available to the equity owners in the project. In March 2006, Falconbridge put in place a US$360 million bridge finance facility to provide interim financing for the project pending completion of the permanent project financing.

At a 2.0% nickel cut-off grade, the Koniambo deposit contains measured plus indicated resources of 75.6 Mt at 2.47% nickel plus inferred resources of 82.7 Mt grading 2.5% nickel. The measured and indicated resources were converted to proven and probable reserves totalling 62.5 Mt grading 2.40% nickel. In addition, the project has an inferred limonite resource estimated at 100 Mt at 1.6% nickel and 0.2% cobalt that could be developed at a later date.

Kabanga, Tanzania

In April 2005, the Falconbridge Group entered into a joint venture agreement with Barrick Gold Corporation ("Barrick") on the Kabanga nickel deposit, located in northwestern Tanzania. At the time of the acquisition, Barrick estimated the inferred resource to be 26.4 Mt grading 2.6% nickel. Under the terms of the agreement, the Falconbridge Group acquired a 50% indirect joint venture interest in respect of the Kabanga Project for US$15 million and will be the operator of the joint venture. The Enlarged Xstrata Group will fund an initial US$50 million work plan and will have the option to direct an additional US$95 million towards completing a feasibility study to vest in the project over the next several years.

Current work, including exploration and infill diamond drilling, metallurgical testing and engineering study work led to the completion of a scoping study. The scoping study documentation was delivered at the end of the first quarter of 2006. The companies continued to upgrade the resource to measured and indicated categories to support the work plan and diamond drilling is ongoing with seven drills in the ground to define and expand the resource. In addition, systematic exploration of the under-explored Kabanga licence have been initiated and select regional targets are being evaluated.

Araguaia, Brazil

In 2005 the Nickel Business discovered two new significant nickel laterite deposits on its Araguaia properties in the Para State of northern Brazil. These are new grassroots discoveries in an area where the first recorded drilling for base metals was completed by the Nickel Business's exploration team in October 2004.

The Araguaia Belt includes a number of ophiolitic complexes that were obducted along the border of the Araguaia mobile belt. It comprises a variety of sedimentary rocks and several large ultramafic bodies that extends in excess of 400 kilometres in the north-south direction. Development of significant laterite profiles with nickel grades above 1% and thicknesses ranging from 10m to 110m have been identified overlying some of these ophiolite bodies.

Approximately 40% of the entire belt has been subjected to an airborne geophysical survey, including radiometric and magnetic data covering covered some 32,700 line-km at 500 meter line spacing. The Nickel Business has drilled 786 holes in the Araguaia Belt.

Serra do Tapa is the top priority target identified to date based on significant nickel intercepts particularly in the north part of the area. The deposit is at least 4.5 km long in a north-south direction and ranges from approximately 500m to 1000m wide based on 320m by 80m drilling carried out to date. The southern extension is also being tested with scout drill holes. Vale dos Sonhos is located approximately 15 km southeast of the Serra do Tapa deposit. The target area extends 2.5 km in a north-south direction, is open to the north and south and averages approximately 800m wide based

on current drilling. Drilling to date in 2006 appears to have extended the Vale dos Sonhos deposit an additional 1.5 km to the south, and the ongoing drill programme is designed to delineate the extension of the deposit in this area.

The 2006 drill campaign is in progress and will include at least 14,000m of drilling at Serra do Tapa and Vale do Sonhos to close the drill grid to a spacing of 80m by 160m, followed by resource estimation when assay results are obtained. The drill programme continues with the objective of achieving a drill spacing of 80m by 80m to improve the level of confidence in the resource estimate. Other drilling is planned to test the southern extensions of these zones as well as continue regional scout drilling along the Araguaia Belt.

The project area is well positioned with respect to infrastructure. Ample hydro power is available and the distance to main transmission lines is 20km to 100km. Rail service is available within 100km to 200 km, while roads and rail lines are being upgraded and extended to the South Network at 100km per year. Barge access to a sea port is possible from Maraba (200km from Cinzeiro) on the completion of the lock system at Tucurui which is planned for the end of 2007.

The deposits occur on properties owned by the Enlarged Xstrata Group or where the Enlarged Xstrata Group has the right to earn a 100% interest by completing a series of cash payments totalling US$2.4 million staged over eight years. On the basis of airborne surveys covering approximately 22,000 square kilometres in the region, the Nickel Business has consolidated its ground position over the key targets such that it now controls mineral rights (Exploration Licenses) to almost 5,400 square kilometres (539,000 hectares).

Falconbridge Copper Business summary

Introduction

The Falconbridge Copper Business markets copper cathodes directly to producers of industrial products from the Falconbridge Copper Business's CCR refinery in Montreal-East, Quebec, the Kidd Creek refinery in Timmins, Ontario, and the Lomas Bayas operation in Chile. The Falconbridge Copper Business's Chilean operations also market cathodes made available via toll refining agreements with Altonorte anodes. Altogether, sales of copper metal cathodes in the six months ended 30 June 2006 were made to more than 26 customers in 11 countries. Approximately 80% of the Falconbridge Copper Business's sales of copper metal in the six months ended 30 June 2006 were made in North America with the balance sold in Europe and Asia. The Falconbridge Copper Business's Chilean operations produce approximately 290,000 tonnes of copper anodes per year that are sold in Canada, Chile, Europe and Asia.

Copper production is dependent on mine supply from integrated and third party sources as well as secondary recycled materials sourced globally from third parties. In the six months ended 30 June 2006, 70% (including Alumbrera) of Horne, 65% (59% with Glencore) of Altonorte, and 47% (41% with Glencore) of Kidd Creek's primary feed stocks came from non-related third parties. In addition, approximately 10% of the Falconbridge Copper Business's Horne smelter's feed tonnage came from recycled electronics and other copper and precious metal bearing secondary materials, which were sourced from third parties. Antamina copper concentrates are sold to customers globally. See Part II — "Information on the Enlarged Xstrata Group — Relationship with Glencore — Commercial relationship — Copper Business" of these Listing Particulars for further information.

The Falconbridge Copper Business is a fully-integrated producer of copper metal and concentrate. The Falconbridge Copper Business includes the operation of the Enlarged Xstrata Group's 33.75%-owned Antamina copper and zinc mine in Peru and the 100% owned Altonorte copper smelter located near Antofagasta, Chile, the Enlarged Xstrata Group's 44% stake in the Collahuasi copper mine in Chile and 100% interest in the Lomas Bayas operations, as well as refining, smelting and recycling facilities in Canada and in the United States, which are referred to as Canadian Copper and Recycling ("CC&R").

Reserve and resource base

The tables below set out the Falconbridge Copper Business's attributable copper reserve and resource base as at 31 December 2005:

Mineral reserves[1]

	Falconbridge's beneficial interest (%)	Category	31 December 2005 (000's tonnes)	Copper (%)	Zinc (%)	Nickel (%)	Lead (%)	Silver (g/mt)	Molybdenum (%)	Aluminum (%)
Copper Deposits										
Kidd Creek	100.0	Proven	17,836	1.82	5.61	—	0.18	54	—	—

Notes:

The above table sets out the Falconbridge Group's attributable copper reserve base, based on the total mine basis figures in the Falconbridge Group Mineral Reserves and Mineral Resources Information. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of the reserve and resource estimates.

(1) No adjustments have been made for metal losses during processing.

(2) The Collahuasi mineral reserves have been estimated and provided by the operator of the joint venture based on a copper price of $0.95. The mineral reserves are estimated and classified using the Australasian code for Reporting of Mineral Resources and Ore Reserves (the "JORC" code). The estimates are inspected annually by Chester Moore. Proven plus probable molybdenum reserves at the Rosario deposit total 1,055,694 tonnes at 0.025% molybdenum and are part of the total reserves as stated.

(3) The Antamina mineral reserves have been estimated and provided by the operator of the joint venture. The estimates are inspected annually by Chester Moore. Estimates used the following metal prices: copper $0.95/lb, zinc $0.50/lb, molybdenum $5.00/lb, and silver $5.00/oz.

Notes:

The above table sets out the Falconbridge Group's attributable copper resource base (in addition to reserves), based on the total mine basis figures in the Falconbridge Group Mineral Reserves and Mineral Resources Information. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of the reserve and resource estimates.

(1) Mineral resources do not include allowances for dilution or mining recovery.

(2) The mineral resources have been estimated and provided by the operator of the joint venture based on a copper price of $1.15. The mineral resources are estimated and classified using the Australasian code for Reporting of Mineral Resources and Ore Reserves (the "JORC" code). The estimates are inspected annually by Chester Moore. The inferred resource total does not include the inferred resource estimate of 248 million tonnes grading 1.5% copper at Rosario Oeste.

(3) The Antamina mineral resources have been estimated and provided by the operator of the joint venture. The estimates are inspected annually by Chester Moore. Estimates used the following metal prices: copper $0.95/lb, zinc $0.50/lb, molybdenum $5.00/lb, and silver $5.00/oz.

Production

The tables below set out the total mine production and attributable production of the Falconbridge Copper Business for the years ended 31 December 2004 and 31 December 2005 and for the six months ended 30 June 2005 and 30 June 2006:

Total mine production[1]	Year ended 31 December		Six months ended 30 June	
	2004	2005	2005	2006
	Tonnes			
Mined copper	931,300	894,700	448,700	454,400
Refined copper	524,200	539,200	263,200	304,200
Mined zinc	277,900	304,300	178,200	126,500
Refined zinc	121,600	113,700	73,500	77,400

[1] See Part II — "Presentation of information — Ore reserve and mineral resources reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

Attributable production[1]	Year ended 31 December		Six months ended 30 June	
	2004	2005	2005	2006
	Tonnes			
Mined copper	430,400	414,600	208,600	212,400
Refined copper	491,600	505,300	246,300	287,500
Mined zinc	152,000	182,200	102,700	79,900
Refined zinc	121,600	113,700	73,500	77,400

[1] See Part II — "Presentation of information — Ore reserve and mineral resources reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

Financial information

The table below provides selected summary financial information in relation to the Falconbridge Copper Business for the year ended 31 December 2004 and the year ended 31 December 2005 (which has been extracted without material amendment from page 378 of Part III — "Information on the Falconbridge Group" of the Circular (which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars)) and for the six months ended 30 June 2006 (which has been extracted without material amendment from the 2006 Falconbridge MD&A):

Falconbridge Copper Business	Audited restated Canadian GAAP Year ended 31 December 2004		Audited Canadian GAAP Year ended 31 December 2005		Unaudited Canadian GAAP Six months ended 30 June 2006[2]	
		As a percentage of the Falconbridge Group		As a percentage of the Falconbridge Group		As a percentage of the Falconbridge Group
	US$m	(%)	US$m	(%)	US$m	(%)
Revenues	3,592	53.1	4,421	54.3	4,247	62.4
Income generated from operating assets[1]	673	48.4	1,086	59.7	1,346	68.0

[1] See the detailed definition of income generated from operating assets under the heading "Supplemental Performance Measures" in the 2006 Falconbridge MD&A (which has been set out below in full in this Part XIII — "Description of the Falconbridge Group's business — Recent significant developments — 2006 Falconbridge MD&A").

[2] For further information on the financial results of the Falconbridge Group for the six months ended 30 June 2006, see the Consolidated Statements of Income, the Consolidated Statements of Cash flows and the Consolidated Balance Sheets that accompanied Falconbridge's announcement of its second quarter 2006 financial results (each of which has been set out below in full in this Part XIII — "Description of the Falconbridge Group's business — Recent significant developments — Falconbridge second quarter 2006 financial results" of these Listing Particulars).

The Falconbridge Copper Business's mining operations

Antamina

Located in the Andes mountains in Peru, approximately 270 kilometres north-east of Lima and at an elevation of 4,300 metres, the Antamina deposit is one of the largest copper/zinc ore bodies in the world, with a milling rate of 85,000 tonnes per day.

A capital investment of US$2,148 million was made to bring Antamina into production. Of this amount, US$1,320 million was financed using senior project debt.

The Enlarged Xstrata Group's beneficial interest in Compañía Minera Antamina S.A. ("Antamina") is 33.75%, with the beneficial owners comprising BHP Billiton at 33.75%, Teck Cominco at 22.5% and Mitsubishi Corporation with a 10% interest.

Antamina began commercial production in October 2001. In 2005, Antamina produced 1,287,257 tonnes of copper concentrate grading 29.10% copper, 343,559 tonnes of zinc concentrate grading 53.66% zinc and 12,875 tonnes of molybdenite concentrate containing 52.20% molybdenum. In 2005, payable copper contained on the concentrates sales was 815,703 pounds of copper, 355,711 pounds of zinc, 16,124 pounds of molybdenum and 8,797 metric ounces of silver.

Collahuasi

The Enlarged Xstrata Group owns a 44% interest in Compañía Minera Doña Ines de Collahuasi S.C.M. ("Collahuasi"), an independent company which owns the mining and water rights and other assets comprising the Collahuasi operation, together with Anglo American which also holds a 44% interest, and a Japanese consortium holding the remaining 12% interest.

A capital investment of US$1,792 million was required to bring Collahuasi into commercial production. The financing requirement, including working capital, was approximately US$1,870 million.

The Collahuasi property covers 446 exploitation concessions over 133,803 hectares and 185 exploration concessions over 66,500 hectares. The property is located in northern Chile, about 180 kilometres southeast of the port of Iquique, at an elevation of 4,300 metres. It contains two separate porphyry copper deposits, known as Ujina and Rosario: the Ujina high grade secondary enrichment has been mined already but an important reserve of primary copper ore remains; Rosario has large tonnages of high grade primary ore and important secondary enrichment zones. The Huinquintipa oxide copper deposit is located downstream from the Rosario deposit. In addition, the property hosts high-grade copper mineralisation at the adjacent Rosario West deposit.

Production is expected to average 397,400 tpa of copper in concentrates and 59,400 tpa of copper cathode from 1999 to 2008. The mine site is serviced under a 20-year power supply contract with Empresa Nacional de Electricidad S.A., a Chilean electric utility company.

During the year ended 31 December 2005, 161.3 million tonnes of material was mined, 40.1 million tonnes of ore was milled at the concentrator and 6.5 million tonnes of ore was processed at the copper oxide leaching plant. The Falconbridge Group's share of copper produced by Collahuasi during the year ended 31 December 2005 was 26,698 tonnes of cathode copper and 155,550 payable tonnes (161,192 contained tonnes) of copper in concentrate.

The Ujina pit was practically depleted during the year 2004 and ore extraction ramped-up in the Rosario Pit during the year 2004. In the last months of 2004, production at the Rosario Pit had achieved its full capacity.

During 2004, Collahuasi's board of directors approved the construction of a Molybdenum separation plant. The project was commissioned during October 2005 and the capital investment reached US$35.6 million. The plant is currently in full operation, and its production is approximately 640 dry metric tonnes of concentrates per month grading 48.3% molybdenum.

Canadian Copper and Recycling

CC&R mines and procures copper and precious metal concentrates and secondary materials for processing at the Enlarged Xstrata Group's copper smelters and refineries and markets copper and related by-products.

The Enlarged Xstrata Group and its predecessors in title have been mining the Kidd Creek copper/zinc deposits since 1966. The Kidd Creek mining operation's principal copper/zinc properties in the Timmins area are located in Kidd Township, Porcupine mining division, Ontario. The property in the Timmins area of northern Ontario comprises six half lots, or 960 acres, in the Porcupine Mining Division, District of Cochrane, Ontario. The properties are 100% held by the Enlarged Xstrata Group. The Kidd Creek deposits are currently mined through one surface shaft, which accesses the upper mine, and two winzes which access progressively deeper levels, known as the lower mine and Mine D. In 2005, the upper mine (formerly No. 1 and No. 2 mines) accounted for 23% of production, the lower mine (formerly No. 3 mine) accounted for 56% and Mine D 21% of the Kidd Creek Mining Division's mine ore production.

Ore production at the Kidd Creek Mining Division ("Kidd Creek Mining") for the six months ended 30 June 2006 was approximately 1.25 Mt (full year 2005 — 2.38 Mt). The milled grades as at the end of June 2006 were: copper 2.00%; and zinc 5.13% (full year 2005 — copper 1.99%; and zinc 6.21%). Metals in concentrate produced as at the end of June 2006 totalled: 24,769 tonnes of copper (full year 2005 — 42,737 tonnes); and 55,019 tonnes of zinc (full year 2005 — 120,000).

The development of Mine D was approved in 2000, to extend the depth of the Kidd Creek ore body beyond the limits of the No. 3 mine at 6,800 feet (2,070 metres) to a depth of 8,800 feet (2,682 metres) for Stage 1. Stage 2, going down to 10,200 feet (3,109 meters), is still under feasibility study. Production from Mine D began in the second half of 2004 and production reached 480,000 tonnes in 2005 with ramp-up continuing into 2006. Mine D, Stage 1 of the project is scheduled to be completed in 2006.

Lomas Bayas

The Lomas Bayas mine comprises seven exploitation concessions covering approximately 2,022 hectares. The Fortuna de Cobre deposit comprises 11 exploitation concessions covering approximately 1,216 hectares. The Enlarged Xstrata Group also holds 25 exploitation concessions and two exploitation concession applications covering approximately 4,669 hectares between the Lomas Bayas mine and the Fortuna de Cobre deposit as well as 61 exploration concessions and two exploitation concession applications covering an area around the Fortuna de Cobre deposit.

The Lomas Bayas mine is located in the Second Region of Chile, approximately 110 kilometres north-east of the port city of Antofagasta. The mine is situated at an altitude of 1,500 metres in the Atacama Desert. The Fortuna de Cobre deposit is situated 3 kilometres to the south of the Lomas Bayas mine.

In July 2001, the Falconbridge Group acquired 100% of the Lomas Bayas copper mine and adjacent Fortuna de Cobre copper deposit from Boliden Limited ("Boliden") for a cash payment of US$66 million. In July 2006, Falconbridge exercised its right to retain the Fortuna de Cobre deposit by paying a further US$15 million to Boliden. The Fortuna de Cobre copper deposit could expand production or extend the mine life by nine years, to 2023.

Lomas Bayas currently operates one open pit mine. High-grade ore is crushed and placed on leach pads by a series of portable conveyors and a stacking system. Lower-grade ore that does not economically justify the cost of crushing and additional handling is placed directly on separate leach pads by mine haulage trucks. Solutions containing sulphuric acid are then applied to leach the ores and copper recovery occurs by a solvent extraction-electrowinning process. The copper cathode is transported by truck and rail to the port at Antofagasta and shipped to customers overseas. Lomas Bayas is serviced by the electrical grid of northern Chile under a contract that expires in the second half of 2008 with a local electricity supplier.

In 2005, Lomas Bayas mined 40.6 Mt of ore and rehandling material from which 63,147 tonnes of cathode copper were produced.

The Falconbridge Copper Business's smelting and refining operations

Altonorte Smelter

The Enlarged Xstrata Group owns 100% of the Altonorte copper smelter located in northern Chile. The smelter recently completed a major modernisation and US$170 million Phase 3 expansion project, which more than doubled its capacity to a nominal 850,000 tpa of copper concentrate

throughput, copper anode output capacity to approximately 290,000 tpa and sulphuric acid capacity to 790,000 tpa.

The Altonorte custom smelter processes copper concentrate from third-party mines located mainly in Chile. Approximately 35% of the Altonorte smelter's production is sold to Codelco and is refined at Codelco's Chuquicamata refinery near Calama, Chile, a portion of which is returned to the Enlarged Xstrata Group in the form of cathodes. The balance of the smelter's blister anode production is exported. The smelter's sulphuric acid production is sold to customers located in the northern region of Chile. In 2005, Altonorte processed 894,694 tonnes of feed material, produced 297,542 tonnes of copper anodes and produced 808,230 tonnes of sulphuric acid.

CC&R

CC&R operates the Horne copper smelter located in Rouyn-North, Quebec, the Canadian Copper and Recycling refinery ("CCR refinery") in Montreal-East, Quebec, the Kidd Creek Metallurgical Division, a copper-zinc complex located in Timmins, Ontario and five recycling facilities located in the United States and Canada.

CC&R has the capacity to process approximately 1,300,000 tpa of copper and precious metal-bearing feed materials at the Horne and Kidd Creek smelters. In the six months ended 30 June 2006, Falconbridge Group processed 640,000 tonnes of feed at the Horne and Kidd Creek smelters (2005 full year — 1,102,100 tonnes). In the six months ended 30 June 2006, approximately 70% of the CC&R feed was procured from North America with the balance from South America and other sources (2005 full year — North America 75%).

The ore from Kidd Creek Mining Division is transported by a group-owned railway to the Kidd Creek Metallurgical Division's mineral processing facilities, located 27 kilometres southeast of the mine. The mill produces copper and zinc concentrates, and treats all ores from the Kidd Creek Mining Division in two of four circuits. The remaining two circuits are available to process custom feed. In 2004, one of these circuits was rehabilitated and converted to treat 750,000 tpa of nickel ore from the Enlarged Xstrata Group's new Montcalm mine, located approximately 100 kilometres west of the metallurgical site. Nickel concentrate from the circuit is shipped to Sudbury for processing. The Kidd copper concentrate produced as well as the by-product Montcalm copper concentrate, are processed at the Kidd Creek Metallurgical Division's copper smelter. In addition to these feeds, the smelter also treats copper concentrate from the Nickel Business's Sudbury Strathcona mill as well as other copper custom feeds. The smelter has the capacity to produce 150,000 tpa of blister copper. The 57,027 tonnes of blister produced at the Kidd Creek smelter in the six months ended 30 June 2006 (full year 2005 — 119,000 tonnes) were either sent as anode for refining at its refinery, or shipped to the Falconbridge Copper Business's CCR refinery. For the six months ended 30 June 2006, the Kidd Creek copper refinery produced 61,813 tonnes of copper cathode (full year 2005 — 111,200 tonnes).

The Kidd Creek zinc plant has the capacity to produce 147,000 tpa of zinc. In October 2004 a new precious metal recovery circuit was commissioned in the zinc plant. The new circuit allows the plant to process Agnico-Eaglés Laronde Mine precious metal bearing zinc concentrates, and to recover the gold and silver as precious metals/lead residue that is further refined at the Falconbridge Copper Business's Horne smelter. Approximately 100,000 tonnes of Laronde zinc concentrate are received on an annual basis. The balance of the zinc plant's feed is Kidd zinc concentrate, and any surplus Kidd zinc concentrate is available for processing at facilities such as the Noranda Income Fund's CEZ refinery located in Valleyfield Quebec. In the six months ended 30 June 2006, the Kidd Creek zinc plant produced 74,379 tonnes of saleable zinc (full year 2005 — 113,700 tonnes).

In addition to the mineral processing facilities, the copper smelter, the copper refinery and the zinc plant, the Kidd Creek Metallurgical Division also operates a cadmium plant, an indium plant, two sulphuric acid plants, and a liquid sulphur dioxide plant. In the six months ended 30 June 2006, the Kidd Creek Metallurgical Division produced 241,644 tonnes of sulphuric acid.

In October 2005, the copper, zinc, and milling operations of the Kidd Creek Metallurgical Division were impacted to varying degrees by a 4 week strike by the sites unionised workforce, Canadian Auto Workers — Local 599. The Falconbridge Group subsequently agreed a new three-year collective agreement with Canadian Auto Workers — Local 599 in respect of the Kidd Creek Metallurgical Division.

The Horne smelter utilises two technologies that work together to optimise its production: concentrate injection and continuous smelting and continuous converting. Through its smelting process, the Horne smelter is able to treat concentrates containing impurities such as arsenic, antimony, bismuth and other materials in addition to conventional copper concentrates. In 2005, of the total volumes treated by the Horne smelter, approximately 22% of this feed was obtained from the Louvicourt, Antamina and Collahuasi mines and the balance was sourced from third parties under contracts having durations of one to three years or purchased on a spot basis. In September 2005, the NCV (Noranda Converter) at the Horne smelter was brought back on line. The operating rate increased from 600,000 tpa to 800,000 tpa of concentrate. Anode production capacity increased to 180,000 tpa from 140,000 tpa. This increase in operations was based on the availability of concentrates at economical treatment terms. Anode output from the Horne smelter totalled 94,523 tonnes for the six months ended 30 June 2006 (full year 2005 — 147,000 tonnes). All anodes produced at the Horne copper smelter were refined at the Falconbridge Copper Business's CCR refinery. The smelter also produced 320,070 tonnes of sulphuric acid in the six months ended 30 June 2006.

Xstrata announced on 21 September 2006 a major project at the Horne smelter aimed at significantly reducing the presence of metal-bearing particulates, and in particular arsenic, in the Notre Dame neighbourhood adjacent to the smelter, at an anticipated project cost of approximately C$20 million (approximately US$18 million). The various elements of the project are intended to be completed between 2006 and 2009. Once completed, a subsequent study will be undertaken to identify new opportunities to further reduce the impact of smelter operations in the Notre Dame neighbourhood. Since 1998, emissions of gases and dusts (lead, arsenic and total dust) have been reduced by more than 80% following the successful implementation of a series of environmental and process optimisation projects. The Horne smelter has committed to continually reduce the environmental impact of its activities with particular attention to the Notre Dame neighbourhood adjacent to the smelting operations.

The CCR refinery processes copper anodes from the Horne, Altonorte and Inco smelters as well as other unrefined copper and precious metals from the Enlarged Xstrata Group and third-party sources. For the six months ended 30 June 2006, the refinery produced 181,252 tonnes (full year 2005 — 304,200 tonnes) of copper cathode, approximately 469.3 thousand ounces of gold (full year 2005 — 908,350), 16.9 million ounces of silver (full year 2005 — 33.2 million) and other by-products including selenium, tellurium, nickel sulphate, and a concentrate of platinum group metals. A contract was signed in early 2005 for the refining of Inco anodes at the CCR refinery with shipments commencing in August 2005. In September 2005, the CCR refinery moved to a seven-day operation in preparation to increase 2006 production to 372,000 tonnes.

The Copper Business is a leader in the recovery of copper, gold, silver and platinum group metals from the recycling of electronics and other copper and precious metal-bearing secondary materials. In addition to materials delivered directly to the Enlarged Xstrata Group's smelters and refineries, the Copper Business operates two sampling facilities in California and Rhode Island for the sampling and preparation of recycle feeds for plants in Roseville, California, Lavergne, Tennessee and Brampton, Ontario that provide asset management and recycling services to original equipment manufacturers for end-of-life electronic hardware. During 2005, a new commercial office and warehouse was opened in Penang, Malaysia to assist Asian based customers with the collection and shipment of electronic scrap from production facilities to the sampling plants in San Jose or Rhode Island. This new company is called Noranda Recycling Malaysia.

The Copper Business's processing plants and technology enable the treatment of large tonnages of recycled materials. For the six months ended 30 June 2006, recycled materials comprised 9% (full year 2005 — 12%) of the feed for the copper smelters and approximately 10% of the copper (full year 2005 — 17%), 20% of the gold (full year 2005 — 20%), 10% of the silver (full year 2005 — 10%) and 85% of the platinum group metals (full year 2005 — 95%) produced by the CCR refinery.

Sales and marketing of the Falconbridge Copper Business's copper

The Falconbridge Copper Business's sales and marketing activities are based in Toronto, Canada; Santiago, Chile; Zug, Switzerland; San Jose, California; and Cleveland, Ohio. Primary functions include the purchase of custom concentrates and recycled materials, and the sale of concentrates, blister, copper cathodes, precious and platinum group metals and sulphuric acid, as well as refinery by-products.

Projects and developments

Kidd Creek Operations, Ontario

Exploration support of the Kidd Creek operations in 2005 were conducted in three areas within 200 kilometres of the Enlarged Xstrata Group's core infrastructure in Timmins. Exploration was undertaken in conjunction with junior mining company partners as part of a plan to test all prospective airborne EM targets on properties in the Detour-Normetal, Halliday Dome and FedNor areas by the end of 2007. No significant results were returned in 2005.

Significantly, the exploration expenditures in 2006 are starting to shift back to the Focused Exploration Zone — a region underlain by 150 square kilometres of highly prospective base metal stratigraphy immediately north of Kidd Mine. Previously, the Falconbridge Group conducted exploration in this same area but aimed above a depth of 200m below surface.

Ongoing exploration at the Kidd Creek mine is focused in Mine D between the 98 and 102 levels to upgrade the mineralisation to the inferred resource category.

Work on the shaft bottom and lateral development was completed in the first quarter of 2006. Production from block 2 began in the fourth quarter of 2005 and production from block 3 began in the third quarter of 2006.

The capital expenditures associated with this project are expected to total C$684 million (approximately US$607 million) having increased following the approval of a new target schedule and budget that became the project baseline in April 2005, as well as escalation associated with delineation drilling during 2006.

El Pachón, Argentina

The acquisition of the El Pachón project was completed in September 2001. The property is located in the province of San Juan, Argentina at an elevation of 3,600 to 4,100 metres about three kilometres from the Chilean border and seven kilometres from the Los Pelambres mine. Diamond drilling, geological mapping and reinterpretation of the resource model were completed in 2003 with the objective to identify higher grade resources within the known resource and test exploration targets.

Work in 2004 included an external review of the resource estimate and work to update the Feasibility Study prepared by Cambior in 1997. A proposal to place the project in the Prefeasibility Stage of the Mining Stage Gate Process was presented to senior management in 2005. Work on the Prefeasibility Study began in 2006 using SNC Lavalin as the main engineering contractor company.

In 2006, work has progressed in road re-opening, environmental baseline data collection and progression of the project towards the feasibility gate. The project is currently in the pre-feasibility stage. Additional metallurgical studies will be completed after the in-fill drill programme, which is planned to start in the fourth quarter of 2006.

El Morro, Chile

The El Morro property is located in Region III, 140 kilometres east of the port of Huasco at an elevation of 4,000 to 4,300 metres. The La Fortuna zone on the El Morro property contains an inferred mineral resource estimated at 466 Mt grading 0.61% copper and 0.50 grams per tonne gold at a copper cut-off of 0.4% copper. The El Morro resource, located five kilometres west-northwest of La Fortuna, contains an inferred mineral resource estimated at 45 Mt grading 0.5% copper and 0.2 gram per tonne gold at a cut-off grade of 0.4% copper.

The Falconbridge Group has a 70% interest in the El Morro property from Metallica Resources Inc. having paid US$10 million in cash to Metallica Resources Inc. and it is now preparing a prefeasibility study. If either party dilutes its interest in the property to 10% or less, their interest will convert to 2% net smelter royalty. Other agreement obligations have been met, including an initial cash payment of US$300,000, subscribing for US$1 million in shares of Metallica Resources Inc. and completing aggregate expenditures on the property of more than US$10 million. The Enlarged Xstrata Group intends to maintain the property and satisfy its outstanding legal and environmental obligations. In 2006 pre-feasibility level work has been carried out. Key elements of this work have

included metallurgical studies as well as an infill diamond drill programme designed to upgrade the La Fortuna resource to the measured and indicated categories.

Rosario West, Chile

The first stage of the Inferred Resource estimate on Collahuasi's Rosario West zone was completed in 2005. Exploration results indicate the Rosario West zone contains an inferred mineral resource estimated at 248 million tonnes grading 1.54% copper at a 0.4% copper cut-off. The joint venture partners (Anglo American, Falconbridge Limited and a Japanese consortium led by Mitsui & Co., Ltd.) believe that these exploration results further demonstrate the potential of developing resources at Collahuasi.

The mineral resource is located in the central part of the Rosario West zone, and only 300 metres from the projected edge of the Rosario open pit. The mineralised zone, as currently defined, remains open to the north, south and at depth, and is thought to occupy approximately 50% of the total prospective area.

Copper mineralisation is principally contained in a structurally controlled chalcocite supergene blanket that formed over a swarm of high sulfidation veins. These results indicate potential to extend the life of the current operation, and add leachable resources to the existing reserve base. Portions of the resource contain elevated arsenic content that will be subject to further study.

Collahuasi has extended the drill programme into 2006. Although Rosario West is the main focus of the current diamond-drill campaign, exploration drilling is also in progress on the Poderosa zone, located immediately southeast of the Rosario operation, where geophysical surveys have yielded strong anomalies.

Since start-up the operating experience has demonstrated the potential to increase the throughput of Collahuasi from the nameplate design capacity of 110,000 tonnes per day to 130,000 tonnes per day in July 2006 using the same equipment. However, there is potential to increase capacity to 150,000 tonnes per day, and this increased capacity is currently in the process of being implemented depending on water availability. The focus of the management team is on the continued optimisation of the current facilities through a series of debottlenecking initiatives which will allow for increased production.

Further expansion is also being assessed due to the existing large and growing resource base. Although the current resource base could support further expansion on its own, exploration efforts have also identified a new high grade zone (named "Rosario West"), which is approximately 250 metres south of the Rosario pit. In addition, other geological anomalies have also been identified that could further increase the size of the Rosario West resource, currently estimated to be in excess of 250 Mt of 1.5% copper. The strategy is to further define the potential of this new resource which, given its size and high copper grades, could provide the most profitable ore to support a further expansion in copper production.

Antamina, Peru

Adding additional grinding capacity is being assessed with the potential installation of a pebble crushing circuit which would assist SAG milling of hard ores (M4/M4A) and, therefore, increasing the overall throughput and production of metal in concentrate. Engineering is currently being completed with a decision to implement expected in 2006.

West Wall, Chile

The West Wall property is located in Region V, about 100 kilometres north of Santiago, Chile at an elevation of 3,000 – 3,700 metres. The Falconbridge Group satisfied all outstanding earn-in obligations in 2005 under a joint venture with Minera Anglo American Chile, and is currently vested at 50%. A low grade porphyry resource was identified on the property in the 1980s by Minera Anglo-American Chile and Noranda discovered a new porphyry system, referred to as the Lagunillas zone, located three kilometres to the southwest. Diamond drilling in 2002 and 2005 outlined a secondary enriched blanket of copper mineralisation underlain by significant primary mineralisation. The zone extends over an area of 1,200 metres north-south and ranges from 350 to 450 metres in width. Economic evaluation of the mineralisation revealed the zone to be uneconomic due to moderate grade and significant thickness of barren leach cap.

Discussions between the partners are ongoing in respect of continuing exploration.

Frieda River, Papua New Guinea

The Falconbridge Group optioned the Frieda River property in Papua New Guinea from Highlands Pacific Ltd. ("Highlands Pacific") in January 2002. The property is located in northern Papua New Guinea and contains mineral resources in three separate copper deposits (Horse-Ivaal-Trukai, Koki and Nena). The agreement with Highlands Pacific allows for the Enlarged Xstrata Group to earn a 72% interest in any or all of the properties by spending an aggregate US$5 million over five years and completing a feasibility study on an elected property or properties. The 72% interest is subject to reduction if the Papua New Guinean government exercises its right to acquire up to a 30% interest in the project. During the option period, the Enlarged Xstrata Group may acquire 72% of the Nena copper-gold deposit, which is located within the Frieda River Property by paying US$10.8 million and completing a feasibility study.

As part of a 1996 prefeasibility study, Highlands Pacific estimated an inferred resource of 270 Mt of 0.4% copper and 0.3 grams per tonne gold, at a 0.2% copper cut-off grade for the Koki system and the Nena deposit was estimated to contain measured and indicated resources totalling 49.8 Mt at 2.2% copper and 0.6 grams of gold per tonne at a 0.5% copper cut-off grade. Incorporation of more recent drilling into a revised block model in 2003, followed by an optimisation study in 2004, estimated the Horse-Ivaal-Trukai deposit to contain indicated mineral resources totalling 74.6 Mt at a grade of 0.63% copper and 0.37 grams per tonne of gold plus inferred mineral resources totalling 360 Mt grading 0.6% copper and 0.38 grams per tonne gold in a potential open pit.

The 2005 work programme on the Frieda River project closed off the northern and southern extensions of the Nena deposit and focused on identifying high grade Nena-style copper-gold mineralisation at North Debom, Hiro Ridge and Ekwai Debom. The best intersections came from Ekwai Debom where hole 053NOR05 cored 204 metres of 0.81% copper and 0.22 grams per tonne gold, including 48 metres of 1.85% copper and 0.22 grams per tonne of gold (18m to 66m). A follow-up hole (076NOR05) located 50 metres to the north intersected 24 metres of 3.20% copper, 0.36 grams per tonne of gold starting at a hole depth of 42 metres. Drilling in 2004-2005 increased the Nena mineral resource in-situ copper tonnes by 20%. The new optimised resource stands at 42.7 Mt at 3.09% copper and 0.59 grams per tonne of in a potential open pit. A metallurgical drilling programme in 2005 has been successful in collecting geological end members for evaluation at the Falconbridge Technology Centre. The overall objective is aimed at enhancing potential recoveries and concentrate grades within the Nena high sulfidation system.

The exploration work programme for 2006 is concentrating on increasing the porphyry hypogene mineral resource in order to facilitate a large tonnage mining and processing operation. Areas such as Kokomo, Koki, Horse East and Guria are considered to have the highest potential for discovering additional tonnes. Higher grade, near surface secondary enriched zones associated with the porphyries will also be targeted. Pending a favourable outcome of the phase 1 metallurgical tests, phase 2 will be implemented involving laboratory flotation tests in order to arrive at a statement of expected grades and recoveries. Hydrometallurgical test work will be undertaken to further explore the leaching process alternatives.

Lomas Bayas Expansion, Chile

As part of the Falconbridge Group's review of the Fortuna de Cobre deposit, the development of the exploration tunnel began in March 2005 and is now complete. Construction of the pilot plant was completed in August 2005 and pilot testing (the first stage of two) is expected to be completed in November 2006. The results of conceptual studies to optimise the development of Fortuna and integration with Lomas are being assessed. A decision on which alternative to pursue will be made later in 2006.

Aluminum Business summary

Introduction

Alumina (aluminium oxide) is produced from bauxite, the basic aluminium-bearing ore, by a chemical process. Aluminium is, in turn, produced from alumina by an electrolytic process which uses large quantities of electrical energy to separate the aluminium from the oxygen in alumina. The smelting of one tonne of aluminium requires between 14 and 18.5 megawatthours of electric energy.

Depending upon quality, between four and five tonnes of bauxite are required to produce approximately two tonnes of alumina, which yield approximately one tonne of aluminium.

The Aluminum Business's aluminium products include primary aluminium in the form of 1,500 lb standard ingots (sows), billet, electrical conductor rod and foundry alloy. The Aluminum Business's aluminium fabricated products include fin stock for the air conditioning, refrigeration and automotive industries; container stock used for semi-rigid food packaging and disposable cookware; converter foil used in flexible packaging for the food, juice and pharmaceutical industries; conductor strip for transformers.

In each of the year ended 31 December 2005 and the six months ended 30 June 2006, 99.9% of the Aluminum Business's consolidated aluminium sales were made in North America.

The Aluminum Business operates six plants in the United States that produce alumina, primary aluminium and aluminium foil, as well as a mining operation in St. Ann, Jamaica. The alumina plant and the bauxite mining operations are operated under a 50% joint interest with Century Aluminum Company. In the year ended 31 December 2005, approximately 93.6% of consolidated aluminium sales were to United States customers, compared with 93.8% for the six months ended 30 June 2006.

The Aluminum Business's fabricated products operations purchase the majority of the Aluminum Business's primary metal requirements from third parties. This allows the primary reduction plant to optimise product mix by selling value-added products to third parties. St. Ann Bauxite produces all of the bauxite used at the Gramercy alumina refinery, and sells excess bauxite to third parties. The Gramercy alumina refinery, which currently has the capacity to produce just over one million tonnes of smelter grade alumina, plus an additional 200,000 tonnes of chemical grade alumina, supplies all of the alumina used at the Aluminum Business's New Madrid smelter, and sells the balance of its alumina to Century Aluminum Company or third parties.

Reserve and resource base

The table below sets out the Aluminum Business's attributable aluminium reserve base as at 31 December 2005 (the Aluminum Business has no reportable resource base):

Mineral reserves[1]

	Falconbridge's beneficial interest (%)		31 December 2005 (000's tonnes)	Copper (%)	Zinc (%)	Nickel (%)	Lead (%)	Silver (g/mt)	Molybdenum (%)	Aluminum (%)
Aluminum Deposits										
St. Ann Bauxite[2]	50.0	Proven	9,708	—	—	—	—	—	—	25.37
	50.0	Probable	19,593	—	—	—	—	—	—	24.91
		Total	29,301	—	—	—	—	—	—	25.06

Notes:

The above table sets out the Falconbridge Group's attributable aluminium reserve base, based on the total mine basis figures in the Falconbridge Group Mineral Reserves and Mineral Resources Information. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of the reserve and resource estimates.

(1) No adjustments have been made for metal losses during processing.

(2) The St. Ann Bauxite mineral reserves have been estimated and provided by the operator of the joint venture. The estimates are inspected annually by Chester Moore.

Production

The tables below set out the total mine production and attributable primary aluminium and bauxite of the Aluminum Business for the years ended 31 December 2004 and 31 December 2005 and for the six months ended 30 June 2005 and 30 June 2006:

	Year ended 31 December		Six months ended 30 June	
Total mine production[1]	2004	2005	2005	2006
	Tonnes			
Primary aluminium	247,472	245,581	123,078	125,698
Bauxite	660,858	3,744,788	1,882,417	2,512,158

(1) See Part II — "Presentation of information — Ore reserve and mineral resources reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

Attributable production(1)	Year ended 31 December		Six months ended 30 June	
	2004	2005	2005	2006
	Tonnes			
Primary aluminium	247,472	245,581	123,078	125,698
Bauxite	330,429	1,872,394	941,209	1,256,079

Note:

(1) See Part II — "Presentation of Information — Ore reserve and mineral resource reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

Financial information

The table below provides selected summary financial information in relation to the Aluminum Business for the year ended 31 December 2004 and the year ended 31 December 2005 (which has been extracted without material amendment from page 378 of Part III — "Information on the Falconbridge Group" of the Circular (which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars)) and for the six months ended 30 June 2006 (which has been extracted without material amendment from the 2006 Falconbridge MD&A):

Aluminum Business	Audited restated Canadian GAAP Year ended 31 December 2004		Audited Canadian GAAP Year ended 31 December 2005		Unaudited Canadian GAAP Six months ended 30 June 2006(2)	
		As a percentage of the Falconbridge Group		As a percentage of the Falconbridge Group		As a percentage of the Falconbridge Group
	US$m	(%)	US$m	(%)	US$m	(%)
Revenues	935	13.8	1,077	13.2	676	9.9
Income generated from operating assets(1)	89	6.4	106	5.8	120	6.1

(1) See the detailed definition of income generated from operating assets under the heading "Supplemental Performance Measures" in the 2006 Falconbridge MD&A (which has been set out below in full in this Part XIII — "Description of the Falconbridge Group's business — Recent significant developments — 2006 Falconbridge MD&A").

(2) For further information on the financial results of the Falconbridge Group for the six months ended 30 June 2006, see the Consolidated Statements of Income, the Consolidated Statements of Cash flows and the Consolidated Balance Sheets that accompanied Falconbridge's announcement of its second quarter 2006 financial results (each of which has been set out below in full in this Part XIII — "Description of the Falconbridge Group's business — Recent significant developments — Falconbridge second quarter 2006 financial results" of these Listing Particulars).

Description of the Aluminum Business's operations

Primary products

Alumina requirements are supplied by Gramercy Alumina LLC ("Gramercy") in Louisiana. On 1 October 2004, Noranda Aluminum, Inc. and Century Aluminum Company each purchased, from Kaiser Aluminum Inc., a 50% ownership interest in Gramercy and a 50% economic interest in the St. Ann Bauxite mine in Jamaica.

The Aluminum Business operates a primary aluminium reduction plant located adjacent to the Mississippi River, near New Madrid, Missouri. The plant has three potlines that produced 245,600 tonnes of molten aluminium in the year ended 31 December 2005 and 125,700 tonnes in the six months ended 30 June 2006. The smelter is in the process of increasing the metal production output to 265,000 tpa by 2011. The site also contains a carbon plant that produces anodes for the reduction cells, and a cast house capable of producing 1,500 lb. standard ingots and value-added products such as billet, electrical conductor rod and foundry alloy.

The smelter requires a constant demand of approximately 480 megawatts of power, which it receives through a 15-year contract with AmerenUE. The contract has an effective date of 1 June

2005 and includes one-year extensions with a five-year notice period. The contract provides for a power rate of approximately US$35/MWh, with any future rate changes subject to approval by the regulatory authorities of the State of Missouri.

Fabricated products

The Aluminum Business operates four plants in the South-eastern United States that combine to serve a broad range of customer needs. The Enlarged Xstrata Group is the second largest producer of aluminium foil products in North America. In 2005, third-party shipments totalled 178,000 tonnes and, in the six months ended 30 June 2006, totalled 95,000 tonnes.

The original Huntingdon, Tennessee plant, which the Aluminum Business has operated since 1979, has an approximate annual production capacity of 60,000 tonnes. It produces heavy-gauge foil from continuous cast metal, serving the electrical, semi-rigid container and air conditioning fin stock markets. The Salisbury, North Carolina plant also operates continuous casters and has an approximate annual production capacity of 45,000 tonnes of light and heavy-gauge foil. The Newport, Arkansas facility processes re-roll material into lighter gauge coated and uncoated foil. It can produce approximately 15,000 tonnes annually. The major products produced at the Salisbury and Newport plants are flexible packaging materials, air-conditioning fin stock and converter foil used in food containers.

The Falconbridge Group recently completed construction of a modern aluminium foil plant at a cost of US$226 million (excluding financing) to reinforce the Aluminum Business's position as a leading, low-cost supplier of heavy-gauge foil products. The foil plant is located adjacent to the existing Huntingdon plant and has an annual production capacity of approximately 107,000 tonnes of heavy-gauge foil, bringing the Aluminum Business's total annual foil production capacity to 227,000 tonnes. The plant utilises state-of-the-art technology in casting, rolling and material handling. The new foil plant includes four new continuous casting machines, a high-speed, wide-width rolling mill with associated finishing equipment and an automated product storage and retrieval system. The automated storage and retrieval system is designed to reduce cooling time and lower handling costs. The high speed, low-gauge casters and wide-width rolling mill are designed to improve product quality, lower scrap rates and increase productivity.

Sales and marketing of the Aluminum Business's aluminium

Primary products (billet, foundry and rod) are marketed to customers using three Regional Sales Managers, three foundry alloy distributors and one rod distributor. 97% of those products are sold direct to the end user with the balance being sold through the distribution network. Customers are based throughout North America with the greatest concentration in the central United States. Also, an agreement is in place with a German company for the marketing and manufacturing of high strength primary die-casting alloys (which are patent protected) in North America.

New US federal efficiency standards for central air conditioning units have boosted demand for finstock, which is the Aluminum Business's most important end-use market. Growth has also remained strong in the semi-rigid container market largely because of rising demand for prepared foods.

Projects and developments

Currently, the aluminium smelter has four projects in progress intended to achieve world-class performance when compared to similar technology. These projects are scheduled to increase metal production by 12,000 tonnes per year by 2011 and are intended to result in improved energy efficiency.

Norandal is considering a brown-field expansion of its Salisbury rolling plant which contemplates adding a used breakdown mill along with either two or three new continuous casters to support the finishing capabilities of the existing plant. Depending on the number of casters, capital costs are estimated to be between US$50-75 million. The project is currently in the early stages of development and, if approved, is intended to come on stream some time between 2008 and 2010.

Falconbridge Zinc Business summary

Introduction

The Falconbridge Zinc Business markets zinc metal directly from its Kidd Creek division and acts as a marketing agent for the Noranda Income Fund's Canadian Electrolytic Zinc refinery (CEZ). Most of the production from these facilities is sold directly to the steel industry and other major consumers of zinc. CEZ and Kidd Creek are jointly a major supplier of zinc metal and zinc powders, accounting for approximately 4% of world refined production. In each of the year ended 31 December 2005 and the six months ended 30 June 2006, over 95% of the Falconbridge Zinc Business's consolidated sales of zinc on behalf of Kidd Creek and CEZ were in North America, with the balance sold to customers in Europe and Asia. The galvanising sector represented approximately 55% of the Falconbridge Zinc Business's consolidated zinc sales in each of the year ended 31 December 2005 and the six months ended 30 June 2006.

Zinc production is dependent on concentrates from mines. The raw material feed stream for the CEZ and Kidd Creek zinc refineries is managed through a combination of third-party purchases and the integrated mine production of the Enlarged Xstrata Group. This allows the Falconbridge Zinc Business to take advantage of transportation, cost differentials and the treatment capabilities of its refineries. Concentrate purchases originate with both local mines and, subject to market conditions, offshore mines. The Falconbridge Zinc Business also markets Antamina zinc concentrates to European customers.

The Falconbridge Zinc Business produces zinc concentrate and copper concentrates at its mines and procures and processes zinc concentrate at the Canadian Electrolytic Zinc Limited ("CEZ") refinery owned by the Noranda Income Fund. The zinc business unit also produces lead concentrates at the Brunswick mine and procures and processes lead/silver concentrates, residues and recycle materials at the Brunswick smelter. Marketing of the CEZ refinery and the Falconbridge Zinc Business's zinc metal and related alloys, as well as the Falconbridge Zinc Business's lead metal and related alloys, is carried out through its head office in Toronto, Ontario and affiliated marketing offices in Zug, Switzerland and Cleveland, Ohio. The marketing office in Zug also purchases and sells base metals within the European market. In addition, the Falconbridge Zinc Business operates the General Smelting of Canada foundry in Lachine, Quebec, which produces various lead and zinc alloys and anodes. The Falconbridge Zinc Business also operates NorFalco LLC, which markets, transports and distributes the sulphuric acid produced by all Falconbridge copper, zinc and nickel operations located in Canada to customers in North America.

Reserve and resource base

The tables below set out the Falconbridge Zinc Business's attributable zinc reserve and resource base as at 31 December 2005 (the Falconbridge Zinc Business has no reportable Inferred Resources):

Mineral reserves[1]

	Falconbridge's beneficial interest (%)		31 December 2005 (000's tonnes)	Copper (%)	Zinc (%)	Nickel (%)	Lead (%)	Silver (g/mt)	Molybdenum (%)	Aluminum (%)
Zinc Deposits										
Brunswick Mine[2]	100.0	Proven	13,230	0.38	8.83	—	3.52	104	—	—
	100.0	Probable	1,462	0.21	8.26	—	3.63	106	—	—
		Total	14,692	0.36	8.77	—	3.53	104	—	—

Notes:

The above table sets out the Falconbridge Group's attributable zinc resource base, based on the total mine basis figures in the Falconbridge Group Mineral Reserves and Mineral Resources Information. See Part II — "Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing Particulars for an explanation of the basis of preparation of the reserve and resource estimates.

(1) No adjustments have been made for metal losses during processing.

(2) Estimates used the following metal prices and exchange rate: zinc $0.65/lb, copper $1.50/lb, lead $0.35/lb, silver $6.50/oz and Cdn$1.50 for US$1.00.

Mineral resources[1] (in addition to mineral reserves)

	Falconbridge's beneficial interest (%)	Category	31 December 2005 (000's tonnes)	Copper (%)	Zinc (%)	Nickel (%)	Lead (%)	Silver (g/mt)	Molybdenum (%)
Zinc Deposits									
Brunswick Mine	100.0	Measured	1,542	0.34	9.07	—	3.53	94	—
		Indicated	1,942	0.30	9.60	—	4.07	101	—
		Total	3,484	0.32	9.36	—	3.83	98	—

Notes:

The above table sets out the Falconbridge Group's attributable zinc resource base (in addition to reserves), based on the total mine basis figures in the Falconbridge Group Mineral Reserves and Mineral Resources Information. See Part II — *"Presentation of information — Ore reserve and mineral resource reporting — basis of preparation" of these Listing* Particulars for an explanation of the basis of preparation of the reserve and resource estimates.

[1] Mineral resources do not include allowances for dilution or mining recovery.

Production

The table below sets out the total mine production of the Falconbridge Zinc Business for the years ended 31 December 2004 and 31 December 2005 and for the six months ended 30 June 2005 and 30 June 2006:

	Year ended 31 December		*Six months ended 30 June*	
Total mine production[1]	**2004**	**2005**	**2005**	**2006**
			Tonnes	
Mined zinc	367,000	265,600	139,100	133,900
Refined zinc	398,857	386,112	211,039	205,179
Mined lead	73,700	75,400	39,300	38,300
Refined lead	83,800	76,100	44,500	42,400

[1] See Part II — "Presentation of information — Ore reserve and mineral resources reporting — basis of preparation — Resources and reserves, production and sales" of these Listing Particulars for an explanation of the basis of preparation of the production amounts.

(1) See the detailed definition of income generated from operating assets under the heading "Supplemental Performance Measures" in the 2006 Falconbridge MD&A (which has been set out below in full in this Part XIII — "Description of the Falconbridge Group's business — Recent significant developments — 2006 Falconbridge MD&A").

(2) For further information on the financial results of the Falconbridge Group for the six months ended 30 June 2006, see the Consolidated Statements of Income, the Consolidated Statements of Cash flows and the Consolidated Balance Sheets that accompanied Falconbridge's announcement of its second quarter 2006 financial results (each of which has been set out below in full in this Part XIII — "Description of the Falconbridge Group's business — Recent significant developments — Falconbridge second quarter 2006 financial results" of these Listing Particulars).

The Falconbridge Zinc Business's mining operations

Brunswick mine, New Brunswick

The Brunswick mine was developed and commenced operations in the early 1960s. Falconbridge acquired a controlling interest in the mine in 1971 and a 100% interest in 1996. The mine is located approximately 27 kilometres southwest of Bathurst, New Brunswick. The Enlarged Xstrata Group has surface rights and 100% ownership of the mineral rights on 1,030 hectares comprising the No. 12 Crown Grant (Nos. 35097 and 34300). The Brunswick mine is scheduled for closure in 2010.

Production occurs on five main levels to a depth of 1,125 metres. Two shafts provide access. The No. 3 shaft is 1,337 metres deep and is used to hoist personnel, ore and equipment. The No. 2 shaft is 963 metres deep and is used to hoist personnel and supplies. This shaft carries all compressed air and water services for the mine. The remaining cage hoist is used intermittently as a backup to the No. 3 shaft facilities and a second means of egress from the mine.

Mining methods are open stope with delayed backfill including pillar-less, pyramid-shaped open stope sequences and end-slicing. The ore body consists of a series of sub-parallel ore lenses with an average dip of 70 degrees, a composite width of up to 200 metres, a maximum strike length of 1,300 metres and a maximum depth of 1,150 metres.

Ore is processed in the concentrator using grinding, differential flotation, concentrate filtering and drying technologies to produce four products, including zinc, lead, bulk and copper concentrate. Flotation tailings are sent to a paste plant for recovery and production of paste backfill. Residual tailings are sent to the tailings impoundment facility. Process water is recycled back to the concentrator, while the excess runs through an effluent treatment facility prior to being discharged.

Processed mine ore increased to an average of 9,700 tonnes per day in 2005 and produced 265,600 tonnes of zinc in concentrate. Zinc recoveries in the mill were 88% in the year ended 31 December 2005. Processed mine ore increased to an average of 9,950 tonnes per day in the six months ended 30 June 2006 and produced 133,850 tonnes of zinc in concentrate. Zinc recoveries in the mill were 87% in the six months ended 30 June 2006.

Matagami division, Quebec

The Bell Allard zinc/copper mine commenced commercial production in January 2000 with an anticipated life of approximately five years. As planned, mineral reserves at the Bell Allard mine were depleted in 2004. As a result, mine operations at Bell Allard ceased during the fourth quarter of 2004.

The Matagami/Bell Allard concentrator and other surface facilities were placed on care and maintenance to support other potential mining projects in this favourable geologic area, such as

Perseverance. The facilities are located 10 kilometres southwest of the town of Matagami in northwestern Quebec.

The Falconbridge Zinc Business's smelting and refining operations

Brunswick smelter, New Brunswick

The Brunswick smelter, located in Belledune, New Brunswick, is a lead smelter that processes lead concentrates from the Brunswick mine as well as a wide range of offshore lead and lead/silver concentrates and residues. Consistent with the Falconbridge Group's strategy of increasing its flexibility to treat complex feed materials, construction of a new silver refinery was completed in the first quarter of 2001.

The Brunswick smelter also operates a lead-acid battery recycling facility in Belledune, New Brunswick with a processing capacity of 15,000 tonnes of batteries per year. Most of the used batteries are sourced from the Atlantic Provinces, with Quebec and the New England states providing the balance.

In December 2002, the Falconbridge Group announced that the Brunswick smelter would change to a seasonal operation effective 1 July 2003 due to the shortage of economic feed material. Under a seasonal operation the plant will run for eight months a year on Brunswick mine concentrates, third-party sulphates and other third-party material, and will be shut down for the remaining four months each year. However, in 2004 and 2005, the plant ran for over nine months due to the improved availability of concentrate and other materials.

CEZ refinery

The CEZ refinery (in which the Enlarged Xstrata Group has a 25% interest via its 25% stake in the Noranda Income Fund) is located in Salaberry de-Valleyfield, Quebec. The refinery processes zinc concentrate for the production of zinc metal and powders. It is located near the St. Lawrence Seaway and has access to road, rail and sea transportation links. In 2003, 2004 and 2005, over 80% of the zinc concentrate processed at the CEZ refinery was sourced from mines owned or partly owned by the Enlarged Xstrata Group, including the Brunswick mine, Bell Allard mine and Antamina. The refinery's products are marketed in the United States, Canada, Europe and Asia.

In the year ended 31 December 2005, the plant achieved near record production of 272,400 tonnes despite the fact that production was negatively impacted by the higher iron levels in the feed mix.

In the six months ended 30 June 2006, production at the plant totalled 130,782 tonnes, compared with 135,542 tonnes in the six months ended 30 June 2005. During the first quarter of 2006, production was negatively affected by the breakdown of one of the electrolyte circulation pipes in the refinery. This breakdown has not, however, affected the target production for the year ending 31 December 2006.

In May 2002, Noranda sold the CEZ processing facility to the Noranda Income Fund for a combination of cash and ordinary and priority units of the Fund. These priority units were then sold by Noranda pursuant to two separate public offerings. The Enlarged Xstrata Group continues to own a 25% interest in the Noranda Income Fund in the form of ordinary units. The ordinary units are subordinated in respect of cash distributions to the priority units until 2017.

The Enlarged Xstrata Group is party to a processing agreement to sell to the refinery up to 550,000 tonnes of zinc concentrate annually until 2017, an amount expected to support 100% of its annual production at planned rates for that period. The refinery pays the Enlarged Xstrata Group for the concentrate based on the LME price for "payable zinc metal" contained in the concentrate less a treatment charge or processing fee, initially set at C$0.352 per pound of payable zinc metal. The processing fee is adjusted annually to reflect changes in certain costs and was C$0.361 per pound in 2005.

Pursuant to various management agreements, the Enlarged Xstrata Group will continue to operate and manage the refinery and also provide management, marketing and other administrative services to the Noranda Income Fund.

NorFalco, USA

In April 1998, Noranda, Former Falconbridge and DuPont agreed to form Noranda DuPont LLC, a joint venture to market, transport and distribute sulphuric acid in North America. On 29 June 2001, Noranda DuPont LLC redeemed DuPont's 50% voting interest in Noranda DuPont LLC and its name was changed to NorFalco LLC ("NorFalco"). NorFalco purchases and resells to consumers all of the Enlarged Xstrata Group's Canadian sulphuric acid production.

NorFalco has developed an extensive distribution infrastructure of tank cars, trucks, marine tankers and terminals in order to supply approximately 1.9 million tonnes of sulphuric acid to consumers in North America. Its staff is based at its head office near Cleveland, Ohio and at the office of its wholly-owned Canadian subsidiary, NorFalco Sales Inc., near Toronto, Ontario. NorFalco was owned by Noranda (65%) and Former Falconbridge (35%) prior to the amalgamation of Noranda and Former Falconbridge, and is now 100% owned by the Enlarged Xstrata Group.

Sales and marketing of the Falconbridge Zinc Business's zinc

Marketing of the CEZ refinery and the Falconbridge Zinc Business's zinc metal and related alloys, as well as the Falconbridge Zinc Business's lead metal and related alloys, is carried out through its head office in Toronto, Ontario and affiliated marketing offices in Zug, Switzerland and Cleveland, Ohio. The marketing office in Zug also purchases and sells base metals within the European market.

The Falconbridge Zinc Business sells approximately 275,000 tpa of zinc metal produced on behalf of the CEZ refinery, and 140,000 tpa on behalf of the Kidd Creek zinc refinery. Sales are made primarily in Canada and the United States.

The Falconbridge Zinc Business sells to the CEZ processing facility up to 550,000 tpa of zinc concentrate from its own mines and from third party suppliers, under a supply and processing agreement to support 100% of planned production rates to 2017. The Falconbridge Zinc Business markets zinc and bulk concentrates to third party smelters and traders into the global market. In addition, the Falconbridge Zinc Business acts as sales agent in Europe on behalf of Antamina's frame sales agreements.

The Falconbridge Zinc Business procures third party lead concentrate and secondary feeds for the Belledune Lead Smelter and manages the sale of approximately 75,000 tpa of refined lead.

Projects and developments

Perseverance deposits, Quebec

The Perseverance deposits are located close to the Enlarged Xstrata Group's existing mill infrastructure in Matagami, Quebec. A feasibility study on the Perseverance and Equinox deposits has been completed under the Falconbridge Zinc Business's internal review process.

In anticipation of a positive decision on this project a four-year collective agreement was negotiated in 2004 with the local union to cover the closure of the Bell Allard mine and to facilitate the standby period and the possible opening of Perseverance during the four-year term.

During the second quarter of 2006, the Falconbridge Group acquired the 10% interest in the Perseverance property held previously by Société de Developpement de la Baie James ("SDBJ") for C$6.5 million and now has a 100% interest in the property.

A feasibility update is currently underway on the Perseverance project to assess the benefits of an increase in the mining rate to 2,600 tonnes per day. In anticipation of a positive decision on this project a four-year collective agreement was negotiated in 2004 with the local union to cover the closure of the Bell Allard mine, facilitate the standby period and the possible opening of Perseverance during the four-year term.

On 11 August 2006, Falconbridge announced that it expected to invest approximately US$130 million in the development of the Perseverance zinc mine. Construction is expected to last about two years, with the mines life expectancy estimated at roughly five years. The mine is expected to employ approximately 250 people during the construction's peak period and about 225 thereafter.

The zinc produced at the Perseverance mine will be processed at the Enlarged Xstrata Group's former Matagami mine facilities where, in anticipation of the Perseverance project start-up, Falconbridge retained the administrative offices and concentrator after the Bell-Allard mines closure in 2004. The annual production of 228,000 tonnes of zinc concentrate will be shipped and processed at the CEZ Refinery in Valleyfield, Quebec. The annual production of 35,000 tonnes of copper concentrate will be shipped and processed at the Horne Smelter in Rouyn-Noranda, Quebec.

Perseverance has measured and indicated resources of 5.1 Mt grading 15.8% zinc, 1.24% copper, 29 grams of silver per tonne and 0.38 gram of gold per tonne. The Falconbridge exploration team won the 2001 Bill Dennis Prospector of the Year Award from the Prospectors and Developers Association of Canada for its discovery of this deposit.

Lady Loretta, Australia

The Lady Loretta project is located north of Mount Isa, in Queensland, Australia. After completing a preliminary feasibility on the project, the Falconbridge Group exercised its option to acquire a 75% interest in the Lady Loretta project in December, 2000 from its partner, BUKA Minerals Limited. Permitting is complete. Queensland government approval has been granted for the transfer to BUKA Minerals Limited of the adjacent Lady Annie part of the property (above 150 metres), defined as the Lady Annie sublease. The Enlarged Xstrata Group has not yet taken a decision on the timing of any production.

Lennard Shelf, Australia

In April 2004, Falconbridge entered into an agreement with Teck Cominco Limited ("Teck") to earn a 50% interest in the Lennard Shelf mineral properties, plant and equipment and infrastructure in Western Australia. In order to earn its 50% interest, the Enlarged Xstrata Group will be required to effectively invest approximately A$26 million in exploration, operating, capital expenditures or other advances in Lennard Shelf. The property was acquired by Teck Cominco from Western Metals Limited ("Western Metals") in October 2003 for A$26 million (approximately US$19 million).

Lennard Shelf, located in the Kimberly region of Western Australia, 2,500 kilometres north-east of Perth, consists of a number of Mississippi Valley type lead/zinc deposits and a mill with an annual capacity of 3.1 Mt of ore. In the year ended 30 June 2003, Lennard Shelf produced 176,000 tonnes of zinc and 70,000 tonnes of lead. Work was suspended by Western Metals in late November 2003.

The Enlarged Xstrata Group and Teck Cominco are endeavouring to produce a redevelopment plan for the assets. Work includes a detailed review of resources, as well as mine planning and other optimisation work and an exploration programme to expand the current resources. A revised block model was completed in 2004 and used as a basis for a preliminary mine planning exercise. A mineral resource was estimated to contain measured and indicated resources of 2.8 Mt grading 8.47% zinc and 1.96% lead. Inferred resources totalling 300,000 tonnes grading 8.2% zinc and 1.7% lead were also estimated. These resources contain factors for mining recovery and dilution because they were derived from the mining study.

In 2005, a total of 18,066m in 33 holes were drilled to test targets at Pilijippa (9,431m in 14 holes), Limestone Billy Hills (3,473m in 8 holes), Road Gossan (1,556m in 5 holes) and Pillara Range North (3,603m in 7 holes). The best grades and intersections came from the Pilijippa area, however, a detailed review of results is required to determine whether follow-up drilling is warranted. The 2005 programme was aided with 52.2 km of Gradient IP, 22 km of MIMDAS, 2,690 station gravity survey, along with 2 soil surveys. An integration of these data sets will help in selecting the 2006 drill targets.

Teck Cominco has provided a 2006 work plan that has been reviewed and approved by the Joint Venture Operating Committee. The objective of the programme is to identify additional resources. An aggressive drill programme comprised of 32,000m in 52 holes is planned to evaluate the Emanuel Range and Pillara areas with the assistance of additional IP and gravity geophysics. IP surveying is planned for the Mt. Talbot area.

In April 2006, Falconbridge and Teck Cominco agreed to restart the Pillara mine at a rate of 1 Mtpa. Work is progressing to achieve full commercial production during the first quarter of 2007.

The Lennard Shelf mine is expected to produce 70,000 to 80,000 tpa of zinc, on a 100%-basis, for four to five years. The estimated capital cost of the restart is A$23 million (approximately US$17 million) on a 100% basis, with an additional A$5 million (approximately US$4 million) in pre-production costs. First concentrate production is planned for early 2007.

Other products and activities of the Falconbridge Group

Lead metal

The Enlarged Xstrata Group is engaged in the mining of lead and the refining and recycling of lead metal at the Enlarged Xstrata Group's wholly-owned Brunswick Mine and Brunswick Smelter. The marketing of lead metal and its alloys is carried out from offices in Toronto, Canada, Cleveland, Ohio, USA, and Zug, Switzerland. In 2005, over 90% of the Falconbridge Group's consolidated lead metal sales were made in Canada and the United States.

As is the case for copper and zinc production, lead production is dependent upon the availability of mine concentrates. In 2005, approximately 65% of the Brunswick lead smelter feed was supplied by the Brunswick Mine, with the balance sourced from lead/silver concentrates and metal-bearing residues.

Sulphuric acid

Sulphur dioxide gas is a by-product of smelting and refining operations. Most of the sulphur dioxide gas produced at the Enlarged Xstrata Group's Canadian and Chilean smelters is captured before stack emission and converted into sulphuric acid or liquid sulphur dioxide in order to comply with sulphur dioxide emission limits. The Canadian sulphuric acid production is sold to NorFalco, which markets, transports and distributes sulphuric acid in North America. In 2005, NorFalco and its wholly-owned Canadian subsidiary marketed approximately 1.9 Mt of sulphuric acid from the Falconbridge Group and third-party suppliers. Sulphuric acid produced at the Enlarged Xstrata Group's Chilean smelter is sold by Falconbridge Chile Limitada locally to mining companies using this product for their copper leaching operations.

Magnesium

The Enlarged Xstrata Group's Danville Quebec magnesium plant has a design capacity of 58,000 tonnes of pure and alloy magnesium products and is owned 80% by the Enlarged Xstrata Group and 20% by Sociétégénérale de financement du Quebec.

Magnesium is classified as a light metal. By volume, it is approximately two-thirds the weight of aluminium and one quarter the weight of steel. Magnesium is used in several applications, including the production of aluminium alloys typically containing between 0.5% and 3.5% magnesium (can stock for aluminium beverage containers is the largest application) and die-casting of component parts for the automotive, electronics and manufacturing industries. Magnesium die-cast alloys have excellent strength-to-weight ratios and are attractive for many applications.

Other subsidiaries

Novicourt

Novicourt, a publicly traded Quebec company, is a Canadian exploration and development company focused on the discovery of new mineral deposits mainly in Canada and Brazil. Novicourt's primary asset until the depletion of ore in July 2005 was a 45% direct interest in the Louvicourt copper/zinc mine located near Val-d'Or, Quebec. Novicourt also owns a 45% interest in the Louvaur/Alexis Joint Venture, which carries out exploration on land surrounding the Louvicourt deposit. Novicourt also participates in exploration joint ventures with others, including Falconbridge.

On 12 July 2005, the Louvicourt mill completed the processing of the final ore produced from the Louvicourt Mine as the ore reserves were depleted.

Copper production from the Louvicourt mine in 2005 was 17,000 tonnes (2004 — 33,000 tonnes) reflecting the reduced ore production and lower copper ore grades averaging 2.2% (2004 — 2.8%). Zinc production was 13,000 tonnes of contained zinc (2004 — 21,000 tonnes). Due to the mines closure in July 2005, Novicourt's total net revenue in 2005 was C$36.6 million, 40% lower than the total net revenue of C$59.8 million in 2004.

On 22 June 2006 Falconbridge announced that it would offer to acquire by way of takeover bid all of the outstanding common shares of Novicourt that it does not already own (7,620,207 shares) at a cash offer price of C$2.30 per Novicourt share. Falconbridge then held approximately 62.1% of the outstanding common shares of Novicourt. Falconbridge offered an aggregate of approximately C$17.5 million (approximately US$15.5 million) in cash under the offer. The offer, as extended, expired on 22 August 2006 resulting in Falconbridge now holding approximately 93.6% of the common shares of Novicourt. The balance of the Novicourt shares will be acquired by Falconbridge under a second step compulsory acquisition transaction, expected to be completed in October 2006, after which Novicourt will be a wholly-owned subsidiary of Falconbridge.

Magnola

In January 2003, Falconbridge announced plans for a temporary shutdown of the Falconbridge Group's magnesium business, which is held by Magnola Metallurgy Inc. ("Magnola"), a company owned 80% by the Enlarged Xstrata Group, in response to major structural changes which had taken place in the global magnesium industry. A pre-tax charge of US$520 million was recorded in Falconbridge's 2002 year-end financial results to reduce the carrying value of the magnesium project, as a result of the market conditions.

In 1997 when the decision to proceed with the Magnola project was made, magnesium offered very attractive growth opportunities, on the premise of its inherent strength-to-weight characteristics and the potential demand in the automobile industry. Since that time, exports of low-cost Chinese production have continued to grow and have depressed prices.

At the time of the announcement of the shutdown, there were approximately 380 employees located at the magnesium operations in Danville, Quebec.

In 2003, a further US$33 million pre-tax charge related to costs incurred to shut down the plant was recorded in the first quarter. As of 31 December 2005 the book value of the Falconbridge Group's magnesium business was approximately US$280 million (31 December 2004 — US$272 million).

Statutory authorisations, licences and concessions

Nickel

Falcondo

Falcondo holds a mining concession and owns mining and mineral processing facilities for the production of ferronickel located near the town of Bonao, approximately 80 kilometres northwest of Santo Domingo, Dominican Republic.

Properties and mines

Falcondo has been mining and processing nickel laterite ore in the Dominican Republic since 1971. Falcondo's mining concession covers approximately 21,830 hectares. Falcondo owns 4,831 hectares, 4,802 of which are inside the mining concession and include the mining areas and the mineral processing facilities, and 29 of which are outside the mining concession and include the townsite at Bonao. The term of the mining concession is for an unlimited period.

Summary of property holdings

Block number	Mineral area	Concession name
BLOCK A		QUISQUEYA NO. 1 CONCESSION
BLOCK C1 W		QUISQUEYA NO. 1 CONCESSION
BLOCK D2		QUISQUEYA NO. 1 CONCESSION
BLOCK B		QUISQUEYA NO. 1 CONCESSION
BLOCK C1 E		QUISQUEYA NO. 1 CONCESSION
BLOCK E		QUISQUEYA NO. 1 CONCESSION (PROJECT AREA)
Total area	21,830 hectares	

The Quisqueya No. 1 Concession is located principally within the District of Monsenor Nouel, Province of La Vega, Dominican Republic.

The term of the mining concession is for an unlimited period.

Raglan

The Raglan property is located 105 kilometres south of the northern tip of the Ungava (Nunavik) Peninsula in the Province of Quebec, approximately 1,800 kilometres north of Montreal. The property comprises 1,226 map-designated claims covering 48,149 hectares and ten 20-year mining leases covering 963 hectares. The first of the leases expires in June 2016. All are renewable for three 10-year terms, provided that mining has taken place for at least two of the preceding ten years. One mining lease application covering 32 hectares remains outstanding from 2005.

Summary of property holdings

Lease number	MNR file number	Mineral area (ha)	Surface area	Expiry date	Area

In addition to the above noted operating assets, there are 1226 map designated claims that make up the surrounding Raglan property.

Sudbury

Falconbridge has been mining nickel/copper ores in the Sudbury area of northern Ontario since 1929. The Sudbury Mines/Mill principal nickel/copper producing properties in the Sudbury area are located in the Townships of Falconbridge, Levack, Garson, Dowling and Blezard. The properties comprise of patented land and licences of occupation.

Summary of property holdings

Lindsley Mine

The property comprises six patents covering 919.50 acres of Mineral Rights and 553.79 acres of Surface Rights located in Blezard Township in the Sudbury Mining Division.

Falconbridge and East Mine Area

The property comprises 53 patented mining claims covering 2115.09 acres of Mineral and Surface Rights located in Falconbridge and Garson Townships in the Sudbury Mining Division. A portion of this property covers the area where the smelter and related infrastructure are located.

Fecunis, North, Strathcona, Longvack South and Fraser Mines

The property comprises 38 patented mining claims covering 1614.91 acres of Mineral and Surface Rights as well as three Licence of Occupation covering 31.10 acres all of which are located in Levack Township in the Sudbury Mining Division. A portion of this property covers the area where the Fraser Mine is located.

Hardy, Onaping and Craig Mines

The property comprises 18 patented mining claims covering 746.77 acres of Mineral and Surface Rights as well as one Licence of Occupation covering 3.75 acres all of which are located in Levack and Dowling Townships in the Sudbury Mining Division. A portion of this property covers the area where the Onaping Mine is located.

Nickel Rim South Deposit

The property comprises two patented mining claims covering 89.68 acres of Mineral and Surface Rights located in MacLenan Township in the Sudbury Mining Division.

In addition to the above noted operating assets, there is a much larger land package that makes up the Sudbury Property.

All cover Mining and Surface Rights, except for LO 10551, which is for Mining Rights only.

Certain Parcels in Falconbridge and Garson Township are subject to a Joint Venture Agreement. The Enlarged Xstrata Group holds a 40% interest in the Mining Rights and a 100% interest in the Surface Rights.

In addition to the above noted operating assets, there is a much larger land package that makes up the Sudbury Property.

Montcalm

The Montcalm nickel mine was brought into production in 2004. It is located 100 kilometres east of the Kidd Metallurgical Site in Montcalm Township in the Province of Ontario and comprises four 21 year leases covering mining and surface rights over 831 hectares.

Koniambo

In 1998, Falconbridge entered into a joint venture agreement with SMSP and its controlling shareholder, Société de Financement et d'Investissement de la Province Nord, for the evaluation and development of the 60,000 tpa nickel in ferronickel mining and smelting complex.

Araguaia, Brazil

In 2005, the Nickel Business discovered two new significant nickel laterite deposits on its Araguaia properties in the Para State of northern Brazil. These are new grassroots discoveries in an area where the first recorded drilling for base metals was completed by Falconbridge's exploration team in October 2004.

The deposits occur on properties owned by the Enlarged Xstrata Group or where the Enlarged Xstrata Group has the right to earn a 100% interest by completing a series of cash payments totaling US$2.4 million staged over eight years. Falconbridge has consolidated its ground position over the key targets such that it now controls mineral rights (Exploration Licenses) to almost 5,400 square kilometres (539,000 hectares).

Copper

Altonorte Smelter

The Altonorte copper smelter is located in northern Chile.

Summary of property holdings

The following table sets forth the mining development concessions for the Falconbridge Group's installations at the Altonorte site. All of the concessions have been granted and are maintained by the payment of annual taxes.

Mining development concession	Record number	Area (ha)	Date of filing of mining development claim	Registration date

The Antamina operation is located in the Andes mountains in Peru, approximately 270 kilometres north of Lima at an elevation of 4,300 metres.

Summary of property holdings

Antamina

The property consists of 70 concessions covering 7,725.25 hectares located in the San Marcos District in the Province of Huari.

Antamina No 1

The property consists of five concessions covering 4,014.00 hectares located in the San Marcos District in the Province of Huari.

Antamina — Huarmey

The property consists of six concessions covering 3,500.00 hectares located in the Huarmey and Paypay Districts in the Province of Huarmey.

Collahuasi

The Collahuasi property covers 435 exploitation concessions over 128,621 hectares and 184 exploration concessions over 61,800 hectares. The property is located in northern Chile, about 180 kilometres southeast of the port of Iquique, at an elevation of 4,300 metres. It contains two separate porphyry copper deposits, known as Ujina and Rosario: the Ujina high grade secondary enrichment has been mined already but an important reserve of primary copper ore remains; Rosario has large tonnages of high grade primary ore and important secondary enrichment zones. The Huinquintipa oxide copper deposit is located downstream from the Rosario deposit. In addition, the property contains high-grade copper mineralisation at the adjacent Rosario West deposit.

Summary of property holdings

The following table sets out the exploitation concessions covered by the Collahuasi property:

Property	Number of exploitation concessions	Area (ha)
Sector Yacimiento	184	35,399

Lomas Bayas, Chile

The Lomas Bayas mine comprises seven exploitation concessions covering approximately 2,022 hectares. The Fortuna de Cobre deposit comprises 11 exploitation concessions covering approximately 1,216 hectares. Falconbridge also holds 25 exploitation concessions and two exploitation concession application covering approximately 4,669 hectares between the Lomas Bayas mine and

the Fortuna de Cobre deposit as well as 61 exploration concessions and two exploitation concession applications covering an area around the Fortuna de Cobre deposit.

The Lomas Bayas mine is located in the Second Region of Chile, approximately 110 kilometres north-east of the port city of Antofagasta. The mine is situated at an altitude of 1,500 metres in the Atacama Desert. The Fortuna de Cobre deposit is situated 3 kilometres to the south of the Lomas Bayas mine.

Summary of property holdings

The following table sets forth the mining development concessions for the Falconbridge Group's Lomas Byas operations. All of the concessions have been granted.

El Pachón, Argentina

The El Pachón property is located in the province of San Juan, Argentina at an elevation of 3,600 to 4,100 metres about three kilometres from the Chilean border and seven kilometres from the Los Pelambres mine.

Summary of property holdings

The property consists of 48 concessions covering 1882.26 hectares.

El Morro, Chile

The El Morro property is located in Region III, 140 kilometres east of the port of Huasco at an elevation of 4,000 to 4,300 metres.

Summary of property holdings

The property consists of 163 exploitation concessions covering 41,225.98 hectares.

West Wall, Chile

The West Wall property is located in Region V, about 100 kilometres north of Santiago, Chile at an elevation of 3,000 – 3,700 metres. A low grade porphyry resource was identified on the property in the 1980s by Minera Anglo American Chile and Noranda discovered a new porphyry system, referred to as the Lagunillas zone, located three kilometres to the southwest. Diamond drilling in 2002 and 2005 outlined a secondary enriched blanket of copper mineralisation underlain by significant primary mineralisation. The zone extends over an area of 1,200 metres north-south and ranges from 350 to 450 metres in width. Economic evaluation of the mineralization revealed the zone to be uneconomic due to moderate grade and significant thickness of barren leach cap.

The plan for 2006 is to maintain the property. Anglo American has agreed to conduct their technical due diligence by 30 September 2006 to determine their level of interest and future participation.

Summary of property holdings

The following table sets forth the mining development concessions for the Falconbridge Group's West Wall operations.

Aluminum

The Enlarged Xstrata Group operates six plants in the United States that produce alumina, primary aluminum and aluminum foil, as well as a mining operation in St. Ann, Jamaica.

St. Ann Bauxite

Summary of property holdings

Special Mining Lease 165 has been granted to St. Ann by the Government of Jamaica, which provides for a minimum of 4.5 Mt per year through the year 2030.

Zinc

Brunswick Mine

History and location

The Brunswick mine is located approximately 27 kilometres southwest of Bathurst, New Brunswick. The Enlarged Xstrata Group has surface rights and 100% ownership of the mineral rights on 1,030 hectares comprising the No. 12 Crown Grant (Nos. 35097 and 34300).

Summary of property holdings

The mineral rights to Brunswick Mine No. 12 have been granted fee simple under Orders-in-Council No's 62-422 and 70-693.

Matagami Division

History and location

The Bell Allard zinc/copper mine commenced commercial production in January 2000 with an anticipated life of approximately five years. As planned, mineral reserves at the Bell Allard mine

were depleted in 2004. As a result, Falconbridge ceased operations at the mine during the fourth quarter of 2004.

The Matagami concentrator and other support facilities were placed on care and maintenance to support other potential mining projects such as Perseverance in this favorable geologic area. The facilities are located 10 kilometres southwest of the town of Matagami in northwestern Quebec.

Summary of property holdings

Mining concession	Area (ha)	Renewal date
458	378.47	31 January 2007
504	81.49	31 January 2007

Brunswick Smelter

The Brunswick smelter is located on a year round Atlantic port near the village of Belledune in New Brunswick.

Summary of property holdings

The Brunswick smelter property is held fee simple.

CEZ Refinery

The CEZ refinery (in which Falconbridge has a 25% interest through its interest in the Noranda Income Fund) is located in Salaberry-de-Valleyfield, Quebec.

Frieda River, Papua New Guinea

The property Frieda River is located in northern Papua New Guinea and contains mineral resources in three separate copper deposits (Horse-Ivaal-Trukai, Koki and Nena).

Summary of property holdings

EL 1024	April River Property
EL 1312	Nong River Property
EL 58	Frieda River Property
ELA 1224	Frieda River Property

Perseverance deposits, Quebec

The Perseverance deposits made up of Perseverance, Equinox and are located close to Falconbridges' existing mill infrastructure in Matagami, Quebec.

Summary of property holdings

A mining lease covering the Perseverance deposits has not yet been applied for. The deposit is covered by unpatented mining claims.

Claim number	Recorded date	Expiry date

Lennard Shelf, Australia

Lennard Shelf, located in the Kimberly region of Western Australia, 2,500 kilometres north-east of Perth.

The Lennard Shelf mines are currently on care and maintenance.

Lady Loretta, Australia

The Lady Loretta project is located north of Mount Isa, in Queensland, Australia. Permitting is complete. Queensland government approval has been granted for the transfer to BUKA Minerals Limited of the adjacent Lady Annie part of the property, defined as the Lady Annie sublease.

Summary of property holdings

Special Lease — SL.08/46006
Mining Lease — ML.5568

Public takeovers

During the last and current financial year, Falconbridge has been subject to the Inco Offer, which terminated on 28 July 2006 without any Falconbridge Shares being acquired by Inco under the Inco Offer, and the Xstrata Offer pursuant to which Xstrata acquired Falconbridge.

Falconbridge was created on 30 June 2005 pursuant to the Falconbridge Amalgamation, under which the assets, liabilities and operations of Noranda and Former Falconbridge were combined and managed and operated as an integrated business by Falconbridge.

Falconbridge is a defendant, along with Brookfield, in a claim initiated in November 2005 in Wisconsin, USA by the Stark Claimants. The Stark Claimants allege violations of US federal law, including market manipulation and misrepresentation, by Noranda and Brookfield as Noranda's controlling shareholder in connection with Noranda's issuer bid in March 2005, the Noranda takeover bid for Former Falconbridge in March 2005 and the amalgamation of Noranda and Former Falconbridge in June 2005. The Stark Claimants demand a jury trial and seek compensatory damages of US$74.1 million, punitive damages and costs. On 17 January 2006, Brookfield submitted to the Wisconsin court a memorandum of law in support of its motion to dismiss with prejudice the claim filed by the Stark Claimants and on 23 January 2006, Falconbridge submitted to the Wisconsin court a revised memorandum of law in support of its motion to dismiss the claim by the Stark Claimants. The Stark Claimants submitted briefs in opposition to the motions to dismiss on 17 March 2006. Brookfield and Falconbridge submitted their reply briefs to the Stark Claimants' opposition on 18 April 2006. The court has not yet ruled on the motions.

Recent significant developments

Falconbridge second quarter 2006 financial results

On 24 July 2006, Falconbridge announced its second quarter 2006 financial results. The Consolidated Statements of Income, the Consolidated Statements of Cash flows and the Consolidated Balance Sheets set out below have been extracted from that announcement.

On 25 July 2006, Falconbridge published the 2006 Falconbridge Management's Discussion and Analysis (the "2006 Falconbridge MD&A"). The full text of the 2006 Falconbridge MD&A is set below.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Information contained in this discussion is given as of July 25, 2006, unless otherwise indicated.

Unless otherwise noted, all amounts in this discussion are expressed in U.S. dollars.

Note: The financial results prior to June 30, 2005, as presented in this discussion, represent the consolidated results of Noranda Inc., which was renamed Falconbridge Limited after the amalgamation of Noranda Inc. and former Falconbridge Limited on June 30, 2005. Additional information on Falconbridge, including Falconbridge's Annual Information Form, is available on SEDAR at www.sedar.com

CORPORATE OVERVIEW

Falconbridge Limited is a global integrated copper and nickel producer with investments in integrated zinc and aluminum assets. The Company employs approximately 14,500 people at its operations and offices in 18 countries and is listed on the Toronto Stock Exchange (FAL) and the New York Stock Exchange (FAL).

Falconbridge's goal is to deliver superior returns to shareholders by owning, developing and efficiently managing integrated copper and nickel operations and opportunistically investing in zinc, aluminum and other mining and metals processing activities. Falconbridge is focused on aggressively managing assets to maximize production, while minimizing invested capital.

REFERENCES AND FORWARD-LOOKING STATEMENTS

The following discussion and analysis should be read in conjunction with the interim consolidated financial statements of Falconbridge Limited ("Falconbridge" or the "Company") for the six months ended June 30, 2006 and the related financial statements and notes of Falconbridge Limited for the year ended December 31, 2005. This discussion contains forward-looking statements that involve risks, uncertainties and assumptions. Falconbridge's actual financial condition and results of operations could differ materially from those that may be contemplated by these forward-looking statements as a result of those risks, uncertainties and assumptions. For a detailed description of risks associated with forward-looking statements, please see "Forward Looking Information" on page 28 of this report.

FINANCIAL SUMMARY

Falconbridge's consolidated net income totaled $728 million (basic earnings per share of $1.94; diluted of $1.91) for the second quarter of 2006. This compares with net income of $202 million (basic earnings per share of $0.62; and of $0.61) for the second quarter of 2005. Net income increased 260% and earnings per basic share increased 213% versus the same period last year.

For the first six months, Falconbridge's consolidated net income totaled $1,190 million (basic earnings per share of $3.17; diluted of $3.12). This compares with net income of $378 million (basic earnings per share of $1.20 and diluted earnings per share of $1.19) for the first six months of 2005.

Financial Impact of Merger of Noranda and the former Falconbridge

Prior to the merger of Noranda and Falconbridge, Noranda had consolidated the results of operations and the financial position of former Falconbridge in its financial statements reflecting its ownership of 58.5% of the common shares. On May 5, 2005, Noranda increased its ownership in Falconbridge to 90.8%, and to 100% on June 30, 2005 through the issuance of approximately $2.5 billion in common shares. Upon completion of the merger, the combined entity was renamed Falconbridge Limited.

Purchase accounting rules required an allocation of the purchase costs to assets and liabilities acquired under the transaction. During the quarter, the allocation to the assets and liabilities was finalized. The impact of the finalization of the purchase price allocation on June 30, 2006 from the preliminary purchase price allocation is to decrease operating capital assets by $789 million, decrease development projects by $266 million, increase investment and other assets by $116 million, increase goodwill by $529 million and decrease future income taxes by $410 million.

(1) Please see the detailed definition provided under Supplemental Performance Measures below.

Supplemental Performance Measures

The Management Discussion and Analysis contains a number of measures that are not defined by generally accepted accounting principles ("GAAP"). The measures, as calculated by the Company, may not be comparable to similar measures presented by other issuers.

Income generated from operating assets is defined as follows: net income before interest expense, net; corporate and general administration; research, development and exploration; minority interest in earnings of subsidiaries; gain, net of restructuring costs and other; and tax expense. Since this measure captures the Company's key revenues and operating expenses of assets currently in operation, income generated from operating assets is a key performance measurement that management uses to evaluate the performance of both individual assets and business units.

Net-debt-to-capitalization ratio is calculated as follows:

		June 30, 2006	Dec. 31, 2005
		(US$ Millions)	
Long-term debt		**2,516**	2,598
Preferred share liabilities		**132**	876
Debt due within one year		**351**	353
Cash and cash equivalents		**(661)**	(886)
Net debt	(1)	**2,338**	2,941
Interests of other shareholders		**243**	54
Shareholders' equity		**6,173**	5,031
Stockholders' interests (equity)	(2)	**6,416**	5,085
Net debt plus capitalization	(3)=(1)+(2)	**8,754**	8,026
Net-debt-to-capitalization ratio	(1)/(3)	**26.7%**	36.6%

Management believes the presentation of this measure is relevant and useful for investors when assessing the Company's liquidity and its ability for growth and investment. This measure should not be considered an alternative to liquidity as determined under generally accepted accounting principles.

Integrated cash cost or operating cash costs include all cash costs of operations and selling costs, net of processing credits and by-product credits, and are calculated below. Continuing costs

incurred during shutdowns or strikes are excluded. Integrated cash costs are furnished to provide additional information about the cash generating capabilities of the Company's business units and operations. Since this measure captures the key costs of operations and the impact of our processing credits and the prices of our by-products, it is a key performance measurement that management uses to evaluate our costs and operations. Integrated cash cost is not intended to be considered as an alternative to determining "mining, processing and refining costs" as determined under GAAP.

	Copper (Integrated)		Nickel (Mined)		Zinc (Mining)		Aluminum[1] (Integrated)

[1] Represents Primary operations only: Aluminum segment cost of operations reported for Q2-06 totals $161 million (Q2-05 $137 million), which includes foil processing and other costs of $77 million (Q2-05 — $66 million).

[2] Volumes as shown are based on production, except for Aluminum business which represents shipments of primary aluminum.

Integrated Operations

As an integrated producer of metals, Falconbridge's operations include mines and metallurgical facilities which provide the Company with maximum flexibility in both minimizing costs and maximizing operating performance in processing its minerals. This integration also reduces the Company's exposure to treatment charge fluctuations and shipping rate volatility.

When milling, smelting or refining capacity exceeds the Company's own mine production, Falconbridge acquires mineral bearing material and concentrates from third parties to utilize this capacity and realize incremental treatment revenues. These treatment revenues provide incremental income to the Company and absorb fixed costs at metallurgical sites, with custom milling, smelting and refining operations being conducted throughout the Company as capacity allows. Operations conducting custom feed processing of copper and nickel feeds are located in North and South America, and Norway. The flexibility of the processing facilities also enables the company to treat complex ores, concentrates and secondary feeds.

The price paid to suppliers of the custom feed materials varies with the prevailing price of the metals being treated and as such, Falconbridge's exposure to increasing metals prices is primarily based upon its own mine production. The Company's continued focus on the identification and development of long-life, high-quality copper and nickel mining assets will continue to increase its leverage to copper and nickel while current metallurgical site infrastructure will minimize the investment required to bring new deposits into commercial production.

FINANCIAL RESULTS

Realized prices for the second quarter and six months year to date were as follows:

Realized Metal Prices (US$/lb.)	Three Months Ended June 30 2006	2005	Y-O-Y Change	Six Months Ended June 30 2006	2005	Y-O-Y Change
Copper	**3.39**	1.57	116%	**2.82**	**1.55**	82%
Nickel	**9.00**	7.64	18%	**7.89**	**7.34**	7%
Zinc	**1.55**	0.63	146%	**1.32**	**0.63**	110%
Aluminum	**1.25**	0.90	39%	**1.20**	**0.91**	32%
Lead	**0.57**	0.50	14%	**0.61**	**0.50**	22%

Second Quarter 2006

Revenues for the second quarter of 2006 were $3.95 billion, 93% higher than revenues of $2.05 billion in the same period of 2005. The increase was mainly due to higher realized metal prices and higher copper and zinc sales volumes and increased revenue contribution from by-product molybdenum. Business unit revenues were 137% higher for copper, 20% higher for nickel, 192% higher for zinc and 35% higher for aluminum.

Operating expenses totaled $2.71 billion in the second quarter, compared to $1.59 billion in the same period last year, primarily due to the higher value of raw material feeds. Mining, processing and refining costs increased to $825 million from $643 million in the second quarter of 2005 due to increased mined and refined copper production, higher refined zinc production, increased primary and rolled aluminum production, higher energy and supplies/consumables costs, and the impact of a weaker U.S. dollar on operating costs at all Canadian and South American operations. The average value of the Canadian dollar increased 11% to US$0.89 from US$0.80 during the second quarter of 2005.

The value of raw material feed purchases was $1,723 million, 116% higher than $799 million in 2005 due mostly to higher metal prices and increased custom feed processing at the Horne copper smelter and CCR copper refinery. Higher purchased raw materials values are recovered at the time of sale of the metals contained in the materials treated and are generally hedged at the time of purchase.

Depreciation, amortization and accretion expense increased to $159 million from $147 million a year ago. Net interest expense increased to $45 million from $37 million in the second quarter of last year due to the redemption premium of $8 million paid to holders at the time of the early redemption of $750 million of junior preference shares in the second quarter of 2006. Minority interest in earnings of subsidiaries decreased to $3 million from $55 million largely as a result of the elimination of the former Falconbridge minority share ownership. Tax expenses recorded increased to $406 million from $133 million during the second quarter of 2005, due to the overall increase in profitability.

Income generated by operating assets for the second quarter was $1,241 million, 168% higher than $463 million in the second quarter of 2005. Income generated by operating assets increased 324% to $857 million in the copper business, increased 18% to $235 million in the nickel business, increased $126 million to $151 million in the zinc business and increased 109% to $73 million in the aluminum business.

Net income totaled $728 million, (basic earnings per share of $1.94; diluted of $1.91) for the second quarter 2006, 260% higher than net income of $202 million (basic earnings per share of $0.62; diluted of $0.61) in the same period of 2005. Higher net income reflects higher realized metal prices, increased copper, zinc and molybdenum sales and higher treatment and refining charges received at copper smelters and refineries.

Consolidated assets totaled $13.2 billion as at June 30, 2006, compared with $12.4 billion at the end of 2005. The increase is primarily due to the investment of additional capital in advancing brownfield and greenfield expansion development projects and higher working capital levels due to increased metals prices.

Minority interest increased from $54 million at the end of 2005 to $243 million as at June 30, 2006. The increase is attributable to consolidating the Koniambo Nickel joint venture that was formed

during the second quarter of 2006. Falconbridge owns 49% of the net assets of the joint venture and the minority interest represents the 51% of the net assets that are owned by our partner, SMSP.

First Half 2006

Revenues for the first six months of 2006 were $6.81 billion, 72% higher than revenues of $3.95 billion in the same period of 2005. The increase was mainly due to higher realized metal prices, increased copper, nickel and aluminum sales volumes and increased revenue contribution from by-product molybdenum credits. Business unit revenues were 111% higher for copper, 15% higher for nickel, 132% higher for zinc and 24% higher for aluminum.

Operating expenses totaled $4.83 billion in the first six months of 2006, compared to $3.02 billion in the same period last year, primarily due to the higher value of raw material feeds. Mining, processing and refining costs increased to $1.57 billion from $1.24 billion in the first six months of 2005 due to increased mined and refined copper production, higher refined zinc production, increased primary and rolled aluminum production, higher energy and supplies/consumables costs, and the impact of a weaker U.S. dollar on operating costs at all Canadian and South American operations. The average value of the Canadian dollar increased 9% to US$0.88 from US$0.81 during the first six months of 2005.

The value of raw material feed purchases was $2.93 billion, or almost double the $1.52 billion recorded in the first half of 2005 due to higher metal prices and increased custom feed processing at the Horne smelter and CCR refinery. Higher purchased raw materials values are recovered at the time of sale of the metals contained in the materials treated and are hedged at the time of purchase.

Depreciation, amortization and accretion expense increased to $328 million from $265 million a year ago, with the increase being primarily attributable to the amortization of the fair value increment related to the purchase of the former Falconbridge minority shareholders' interest. Net interest expense increased to $77 million from $65 million in the first half of last year due to the early redemption premium of $8 million paid to holders at the time of the redemption of $750 million of junior preference shares in the second quarter of 2006. Minority interest in earnings of subsidiaries decreased to $5 million from $149 million largely as a result of the elimination of the former Falconbridge minority share ownership. Tax expenses recorded increased to $628 million from $257 million during the first half of 2005, due to the overall increase in profitability.

Income generated by operating assets for the first six months of 2006 was $1.98 billion, 115% higher than $922 million in the first half of 2005. Income generated by operating assets increased 211% to $1,346 million in the copper business, decreased 3% to $383 million in the nickel business, increased from $31 million to $215 million in the zinc business and increased 71% to $120 million in the aluminum business.

Net income totaled $1.190 billion, (basic earnings per share of $3.17; diluted of $3.12) for the first six months 2006, 215% higher than net income of $378 million (basic earnings per share of $1.20; diluted of $1.19) in the same period of 2005. Higher net income reflects higher realized metal and by-product prices, and higher treatment and refining charges received at copper smelters and refineries.

SUMMARY OF QUARTERLY RESULTS

	Three Months Ended							
	June 30,		March 31,		December 31,		September 30,	
	2006	2005	2006	2005	2005	2004	2005	2004
	(US$ Millions, Except per Share Data)							
Revenues	3,948	2,052	2,858	1,894	2,165	1,867	2,006	1,662

CORPORATE DEVELOPMENTS

Inco Offer for Falconbridge

On October 11, 2005, Inco Limited announced an offer to acquire all outstanding common shares of Falconbridge. The offer was comprised of part cash and part Inco common shares, which when pro-rated subject to the maximum amounts offered would provide Cdn$7.50 and 0.524 Inco shares for each Falconbridge common share. On May 13, 2006, Inco announced an improved offer that when subject to proration would provide Falconbridge shareholders with Cdn$12.50 in cash and 0.524 of an Inco share.

Following the Phelps Dodge Corporation offer to acquire Inco Limited that was announced on June 26, 2006 (see details below) Inco subsequently revised its offer on June 26, 2006 to Cdn$17.50 and 0.55676 Inco shares on the pro-rated basis and again on July 16 to Cdn$18.50 and 0.55676 Inco shares on the pro-rated basis. The Inco offer remains open for acceptance to July 27, 2006. In accordance with the revised support agreement, the Company will be required to provide for a payment of up to $450 million to Inco in the event that the acquisition is not completed for certain reasons.

Inco has obtained regulatory clearances from the Canadian Competition Bureau and U.S. Department of Justice and subsequent to the end of the quarter, Inco received regulatory clearance from the E.U. competition authorities. There are no further regulatory clearances required by the Inco offer. The regulatory clearance agreements reached with the U.S. Department of Justice and the European Commission determined that the proposed remedy was acceptable to allow the proposed Inco and Falconbridge transaction to proceed. The remedy consists of the sale of the Nikkelverk refinery in Norway and the Falconbridge marketing and custom feed organizations that procure third-party feed materials and market and sell the refined products to LionOre Mining International Ltd. The sale would include an agreement to supply up to 60,000 tonnes of nickel in matte annually, approximately equivalent to the current volume of feed provided by Falconbridge's operations to this refinery, for up to ten years. The sale of the Nikkelverk refinery and the Falconbridge marketing and custom feed organizations is conditional upon the completion of the Inco and Falconbridge combination.

Statements regarding the combination of Falconbridge and Inco are subject to various risks and assumptions. See "Forward-looking Information" on page 28.

Phelps Dodge Offer for Inco

On June 26, 2006, Phelps Dodge Corporation ("Phelps Dodge") announced in conjunction with Inco and Falconbridge that the three companies have agreed to combine in a transaction that would create one of the world's largest mining companies. The new company would be named Phelps Dodge Inco Corporation and would be headquartered in Phoenix, Arizona, with the nickel, zinc and aluminum division to be headquartered in Toronto. The Phelps Dodge transaction offers to acquire all of the outstanding common shares of Inco for a combination of cash and shares. Each Inco shareholder would receive 0.672 Phelps Dodge shares and Cdn$17.50 in cash for each Inco common share on a pro-rated basis. Phelps Dodge subsequently revised its offer on July 16 to Cdn$20.25 and 0.672 Phelps Dodge shares on a prorated basis.

The Phelps Dodge offer to Inco shareholders would also be available to all Falconbridge common shareholders, upon the successful take up of Falconbridge shares by Inco under the terms of the separate Inco offer to Falconbridge common shareholders, for any Inco common shares received pursuant to the offer. Phelps Dodge supports Inco's offer for Falconbridge, but the Phelps Dodge transaction with Inco is not conditioned upon the completion of the Inco and Falconbridge combination.

Statements regarding the combination of Falconbridge and Inco and Inco and Phelps Dodge are subject to various risks and assumptions. See "Forward-looking Information" on page 28.

Xstrata Offer

On May 18, 2006, Xstrata plc made its offer to purchase for cash all of the outstanding common shares of Falconbridge at an offered price of Cdn$52.50 per share. On July 11, 2006, Xstrata announced its intention to increase its all cash offer price to Cdn$59.00 per share. On July 21, 2006,

Xstrata increased its offer for Falconbridge to C$62.50 per common share in cash and waived the minimum tender condition. The revised Xstrata offer will expire on August 14, 2006 and is subject to approval from Xstrata shareholders.

Statements regarding the combination of Falconbridge and Xstrata are subject to various risks and assumptions. See "Forward-looking Information" on page 28.

Declaration of Special Dividend

On July 16, 2006, Falconbridge declared a special dividend of Cdn$0.75 per common share payable on August 10, 2006 to shareholders on record at the close of business on July 26, 2006. The special dividend will be paid regardless of the outcome of the offers to acquire the common shares of the Company.

Redemption of Junior Preference Shares

On April 26, 2006, Falconbridge redeemed a total of 20 million shares, or $500 million, of its outstanding Junior Preference Shares, based upon shareholders of record on March 22, 2006. Falconbridge utilized existing cash balances to fund the redemption.

On June 28, 2006, Falconbridge redeemed the remaining balance of its 9,999,701 outstanding Junior Preference Shares for a total of approximately $250 million utilizing internal cash resources. Upon redemption, Falconbridge had no Junior Preference Shares outstanding.

Falconbridge Offer to Acquire Outstanding Novicourt Inc. Shares

On June 22, 2006, Falconbridge announced that it would offer to acquire by way of a takeover bid all of the outstanding common shares of its subsidiary Novicourt Inc. that it did not already own. Falconbridge presently holds approximately 62.1% of the outstanding common shares of Novicourt. The offer is a cash offer of Cdn$2.30 per Novicourt common share. The offer circular was issued on June 26, 2006 and the offer is expected to close on August 9, 2006.

Statements regarding the purchase of Novicourt by Falconbridge are subject to various risks and assumptions. See "Forward-looking Information" on page 28.

REVIEW OF OPERATIONS

Copper Business Unit

		Q2 2006	Q2 2005	Y-O-Y Change (%)	H1 2006	H1 2005	Y-O-Y Change (%)
Production:	mined copper (MT)	107,500	101,700	6%	212,400	208,600	18%
	refined copper (MT)	144,500	124,700	16%	287,500	246,300	17%
	mined zinc (MT)	42,300	55,100	(23)%	79,900	102,700	(22)%
	refined zinc (MT)	40,000	35,600	12%	77,400	73,500	5%
Sales:	contained copper (MT)	247,000	205,900	20%	527,800	416,700	27%
	contained zinc (MT)	45,500	43,000	6%	86,900	99,100	(12)%

Income from operating assets ($ millions)		857	202	324%	1,346	433	211%

Revenues

For the second quarter of 2006, copper business revenues increased 137% to $2.48 billion from $1.04 billion in the second quarter of 2005, reflecting higher realized copper and zinc prices and higher copper sales volumes. Copper sales volumes totaled 247,000 tonnes, up 20% from 205,900 tonnes reported in the same quarter in 2005. Mine concentrate sales were 23% higher at

53,300 tonnes, anode sales were 15% higher at 47,900 and cathode sales were 27% higher at 145,800 tonnes. Sales of by-product zinc volumes totaled 45,500 tonnes versus 43,000 tonnes during the second quarter of 2005. Higher zinc sales from the Kidd Creek refinery accounted for the increase. Antamina concentrate stocks at the end of the quarter were significantly higher than normal due to vessel shipping delays that deferred some June shipments into July.

During the quarter, copper revenues were higher as the realized copper price of $3.39/lb. increased 116% compared to $1.57/lb. realized in the same period in 2005. Also contributing to copper business revenues was significantly higher zinc prices, as well as increased sales of by-product molybdenum concentrate from the Antamina and Collahuasi mines. Combined molybdenum concentrate sales were 77% higher at 1000 tonnes.

Costs

Total operating expenses for the copper business increased to $1,622 million from $842 million in the second quarter of 2005. Mining, processing and refining costs increased to $310 million from $264 million in the same period last year as a result of the impact of a weaker U.S. dollar, higher energy and supply costs, and increased smelter and refinery output. The value of purchased raw material feeds increased to $1,247 million from $510 million in the second quarter of 2005 due to the significant rise in copper prices and the increased custom materials throughput at the Horne smelter and CCR refinery. Depreciation decreased to $65 million from $68 million in the year earlier quarter. The operating cash cost of producing a pound of copper in the second quarter of 2006 decreased to $0.03/lb. from $0.21/lb. in the second quarter of 2005 due to higher credits from by-product sales and improved smelting and refining charge revenues.

Income generated from operating assets

Operating income for the copper business in the second quarter of 2006 more than quadrupled to $857 million from $202 million a year ago as a result of significantly higher revenues that were partially offset by higher costs. Operating income benefited from higher sales volumes and metals prices, higher treatment and refining charges and increased throughput at the Horne smelter and CCR refinery. Partially offsetting the stronger revenues were increased costs resulting from the impact of a weaker U.S. dollar on operating costs and higher energy and supply costs.

Production

During the second quarter of 2006, copper mine production from Canadian and South American operations totaled 107,500 tonnes, an increase of 6% compared to 101,700 tonnes a year ago. While Antamina mined copper output was 800 tonnes lower, Collahuasi, Lomas Bayas and Kidd Creek mined copper production were all higher than the second quarter 2005. Collahuasi copper-in-concentrate production was 13% higher at 43,100 tonnes. Kidd Creek mined copper production was 14% higher at 11,300 tonnes.

By-product zinc-in-concentrate production was 23% lower at 42,300 tonnes versus 55,100 tonnes in the second quarter of 2005. Lower by-product zinc mine production was recorded at both Antamina and Kidd Creek due to lower zinc grades.

Offsetting 56% higher anode production at the Horne smelter was lower production at the Altonorte smelter and Kidd Creek smelters. Altonorte anode production was 14,000 tonnes lower than the second quarter of 2005 due mostly to lower concentrate grades. Total anode production was 146,300 tonnes versus 149,000 tonnes in the same quarter last year.

Refined copper production was 144,500 tonnes in the second quarter of 2006 versus 124,700 tonnes in the second quarter of 2005 due primarily to increased production at the CCR refinery. The CCR refinery cathode production increased to 94,100 tonnes during the second quarter from 67,200 tonnes in the same quarter a year ago, as a result of higher anode production at the Horne smelter and increased processing of Inco sourced copper anodes at CCR. Kidd Creek refined cathode production was 21% lower due to a scheduled six-week maintenance outage that occurred during the quarter.

Nickel Business Unit

	Q2 2006	Q2 2005	Y-O-Y Change (%)	H1 2006	H1 2005	Y-O-Y Change (%)
Production: mined nickel (MT)	**20,500**	20,700	(1)%	**40,000**	41,200	(3)%
refined nickel (MT)	**27,100**	28,900	(6)%	**55,500**	56,800	(2)%
mined copper (MT)	**8,100**	9,500	(15)%	**17,000**	18,100	(6)%
Sales: contained nickel (MT)	**27,900**	28,700	(3)%	**57,500**	56,500	2%
refined copper (MT)	**10,300**	10,000	3%	**21,000**	18,800	12%
Revenues ($ millions)	**733**	610	20%	**1,314**	1,145	15%
Realized nickel price ($/lb.)	**9.00**	7.64	18%	**7.89**	7.34	7%
Realized ferronickel price ($/lb.)	**8.19**	7.55	8%	**7.39**	7.13	4%
Mining, processing and refining costs ($ millions)	**246**	221	11%	**460**	391	18%
Cash costs ($/lb. of nickel) — INO	**2.83**	3.07	(8)%	**2.71**	2.83	(4)%
Cash costs ($/lb. of nickel) — Falcondo	**5.30**	4.19	26%	**5.07**	4.05	25%
Cash costs ($/lb. of nickel) — NBU	**3.73**	3.49	7%	**3.56**	3.25	10%
Income from operating assets ($ millions)	**235**	200	18%	**383**	394	(3)%

Revenues

For the second quarter of 2006, nickel business revenues of $733 million increased from $610 million in the second quarter of 2005. Nickel sales volumes decreased 3% to 27,900 tonnes from 28,700 tonnes in the second quarter of 2005. Total Nikkelverk refined copper sales were 3% higher from the second quarter of last year.

INO refined nickel sales of 20,100 tonnes decreased by 9% from 22,000 tonnes in the same quarter last year due to decreased production at the Nikkelverk refinery. At Falcondo, ferronickel sales volumes increased by 18% to 7,900 tonnes from 6,700 tonnes in the second quarter of 2005, which reflects a depletion of the inventory build-up that resulted from stainless steel market destocking which occurred in the second half of 2005. Cobalt sales of 931 tonnes in the quarter decreased 20% from the same quarter in 2005. Precious metals revenues increased by $9 million in the second quarter of 2006 compared to the same period in 2005. Realized nickel prices of $9.00/lb. increased by 18% in the quarter compared with $7.64/lb. in the corresponding period in 2005.

Realized ferronickel prices of $8.19/lb. increased by 8% from $7.55/lb. in the second quarter of 2005. Realized cobalt prices of $14.21/lb. decreased by 8% in the quarter, compared with $15.48/lb. in the same period in 2005.

Costs

Total operating expenses increased to $498 million from $410 million in the second quarter of 2005. Mining, processing and refining costs increased to $246 million from $221 million in the same period last year largely due to the exchange rate impact on operating costs at Canadian operations and increases in energy prices. The value of purchased raw material feeds increased to $209 million from $145 million in the second quarter of 2005 due to increased purchased material volumes and higher payable nickel and copper prices.

The operating cash cost per pound of mined nickel for all of Falconbridge (including INO and Falcondo) was $3.73 in the second quarter of 2006 compared with $3.49 for the same period in 2005. The operating cash cost of producing a pound of nickel from INO mines during the second quarter was $2.83, a decrease of $0.24 or 8% from the same quarter in 2005. The decrease in unit costs was the result of higher by-product credits due to increases in by-product metal prices which offset the impact of the stronger Canadian dollar on operating costs at Canadian operations, higher energy costs, and lower ore grades. At Falcondo, the operating cash cost per pound of ferronickel during the quarter was $5.30 in 2006 compared with $4.19 in 2005. The increase in Falcondo costs was largely due to the increase in the oil price, as average oil costs rose from $46.98 per barrel in

2005 to $60.62 per barrel during the second quarter of 2006. Oil is the source of fuel for the electricity plant operated on site at Falcondo and represented 74% of total operating costs during the second quarter of 2006.

Income generated by operating assets

Second quarter operating income for the nickel business totaled $235 million, compared to $200 million in the second quarter of 2005. The $35 million increase was mainly due to the impact of higher metal prices which offset increases in the costs of operations, including higher energy costs, the higher value of purchased raw materials and the impact of lower nickel and cobalt sales volumes. Depreciation charges decreased 2% to $43 million from second quarter last year.

Production

Total refined nickel production decreased 6% to 27,100 tonnes during the quarter versus 28,900 tonnes during the same period in 2005. Total mined nickel production was 1% lower at 20,500 tonnes.

Sudbury mines production was 4,300 tonnes of nickel and 5,200 tonnes of copper during the second quarter of 2006, compared with 5,600 tonnes of nickel and 7,000 tonnes of copper in the second quarter of 2005. Sudbury mined nickel production was lower due to challenging ground conditions at the Thayer Lindsley mine and lower ore grades. At Raglan, nickel-in-concentrate production in the quarter was 6,100 tonnes and copper-in-concentrate production was 1,500 tonnes, compared with 5,200 tonnes of nickel and 1,400 tonnes of copper in the same period of 2005. The increase in Raglan production was due to higher mill throughput, which was partially offset by the impact of lower ore grades. The Montcalm mine produced 2,600 tonnes of nickel-in-concentrate and 1,300 tonnes of copper-in-concentrate compared to 2,200 tonnes and 1,100 tonnes of nickel and copper respectively in 2005. The increases in production at Montcalm were due to increases in tonnes mined and improved ore grades.

At the Sudbury smelter, nickel-in-matte production in the second quarter of 2006 decreased to 13,600 tonnes from 15,500 tonnes in the same period of 2005, as a result of the treatment of lower mine concentrate tonnages and lower feed grades. The Sudbury smelter completed a three week vacation shutdown in the first part of July 2006.

At the Nikkelverk refinery, refined nickel production was 19,600 tonnes in the second quarter of 2006, compared with 21,200 tonnes in the same period in 2005. Refined copper production at Nikkelverk totaled 10,300 tonnes compared to 9,700 tonnes in the same period in 2005. The Falcondo ferronickel refinery produced 7,500 tonnes of nickel in ferronickel, compared with 7,700 tonnes in the second quarter of 2005.

Zinc Business Unit

[1] 25% of the Noranda Income Fund CEZ refinery zinc production

[2] Brunswick mine concentrate contained zinc and third party purchased concentrate sales to Noranda Income Fund

Revenues

Zinc business revenues increased to $371 million, an increase of 192% compared to the $127 million recorded during the second quarter of 2005. The increased revenue was due to higher zinc concentrate sales volumes and higher prices realized for zinc and other by-products. The average realized price per pound of zinc during the second quarter was $1.55/lb., an increase of 146% compared to $0.63/lb. in the same period last year. The average realized price per pound of refined lead during the second quarter was $0.57/lb., versus $0.50/lb. in the same period last year. Silver LME prices increased to $12.29 per ounce from $7.15 per ounce in the same quarter a year ago.

In the second quarter of 2006, sales volumes of zinc-in-concentrates increased 22% to 110,500 tonnes from 90,700 tonnes in the second quarter of 2005. Higher zinc sales volumes reflect the draw-down of inventory that was built up during the first quarter for shipment to the Noranda Income Fund. Second quarter 2006 lead metal and concentrate sales was unchanged from the second quarter of 2005 at 26,000 tonnes.

Costs

Mining, processing and refining costs increased to $60 million from $37 million in the same period last year, while the value of purchased raw materials increased to $147 million from $57 million in the second quarter of 2005. The value of raw material feeds increased along with the rise in zinc and lead prices. The operating cash cost per pound of mined zinc increased to $0.55 in the second quarter of 2006 from $0.39 for the same period in 2005 due to a stronger Canadian dollar, higher smelting charges due to higher price participation and lower production at the Brunswick Mine, partially offset by the benefits from higher by-product copper and silver prices.

Income generated by operating assets

The second quarter 2006 operating income of the zinc business was $151 million, compared with $25 million for the second quarter of 2005. The $126 million improvement resulted from the higher metal prices and increased sales of zinc concentrates.

Production

Contained zinc production was 69,000 tonnes in the second quarter of 2006, compared to 72,000 tonnes in the same period in 2005. The decrease in production is primarily attributable to lower ore head grades. By-product copper-in-concentrate production at the Brunswick mine increased to 2,200 tonnes from 1,600 tonnes during the second quarter of 2005, primarily due to a higher copper grade and improved recoveries in 2006.

Lead metal production at the Brunswick smelter was 20,000 tonnes in the second quarter of 2006 compared to 22,900 tonnes in the same period in 2005 primarily due to lower lead grades at the Brunswick mine.

Falconbridge's share of refined zinc production at the Noranda Income Fund CEZ Refinery totaled 17,300 tonnes, versus 17,200 tonnes during the second quarter of 2005.

Aluminum Business Unit

	Q2 2006	Q2 2005	Y-O-Y Change (%)	H1 2006	H1 2005	Y-O-Y Change (%)
Production: primary (MT)	**63,400**	61,700	3%	**125,700**	123,100	2%
Sales: primary (MT)	**57,600**	57,300	1%	**114,000**	113,900	—
Shipments: fabricated (MT)	**48,700**	43,500	12%	**95,100**	89,200	7%
Revenues ($ millions)	**366**	272	35%	**676**	543	24%
Realized aluminum price ($/lb.)	**1.25**	0.90	39%	**1.20**	0.91	32%
Mining, processing and refining costs ($ millions)	**161**	137	18%	**317**	276	15%
Cash costs ($/lb. of aluminum)	**0.66**	0.61	8%	**0.67**	0.61	10%
Income from operating assets ($ millions)	**73**	35	109%	**120**	70	71%

Revenues

Aluminum business revenues increased to $366 million, 35% higher than the $272 million recorded during the second quarter of 2005. Third-party sales of primary aluminum were essentially the same at 57,600 tonnes, compared to 57,300 tonnes during the second quarter of 2005. Second quarter rolled products sales volumes increased by 12% to 48,700 tonnes compared to 43,500 tonnes the same period a year ago. The realized primary aluminum price for the quarter increased 39% to $1.25/lb. versus $0.90/lb. in the same period in 2005.

Third-party sales of St. Ann bauxite was 3% higher at 250,200 tonnes and third-party sales of Gramercy alumina was 3% lower at 87,300 tonnes during the second quarter.

Costs

Total aluminum business operating expenses increased 24% to $293 million compared to $237 million during the second quarter of 2005. Mining, processing and refining costs increased to $161 million from $137 million in the same period last year. Operating costs were impacted by significantly higher natural gas costs at the Gramercy alumina refinery and at the rolling mills, along with increased electrical energy costs at the New Madrid smelter. The increased electrical energy costs came into effect under the new fifteen-year electricity supply contract effective June 1, 2005. These rates compare very favourably with electricity costs incurred by other U.S. aluminium producers. The value of purchased raw materials increased to $120 million in the second quarter 2006 compared to $89 million the same period last year, due to increased aluminum prices.

The net operating cash cost per pound of primary aluminum metal production was $0.66/lb. in the second quarter of 2006, an increase from $0.61/lb. for the same period in 2005. Higher electrical energy and natural gas costs were the major contributors to the higher unit costs. The cost per pound at the rolled products division was 10% higher in the second quarter of 2006, compared with the same period in 2005, resulting primarily from higher natural gas and purchased aluminum metal costs.

Income generated by operating assets

Second quarter 2006 operating income for the aluminum business was $73 million compared with $35 million for the second quarter of 2005. The $38 million increase was mainly due to the higher realized aluminum price, partly offset by higher power and natural gas costs.

Production

In the second quarter of 2006, primary aluminum production was 3% higher at 63,400 tonnes, compared to 61,700 tonnes in the same period in 2005. For the rolled products operations, shipments were 12% higher at 48,700 tonnes compared with 43,500 tonnes for the second quarter of 2005. Falconbridge's share of St. Ann bauxite production was 628,500 tonnes during the quarter versus 478,300 tonnes in the same quarter last year. The Company's share of Gramercy alumina production was 151,900 tonnes versus 148,700 tonnes during second quarter 2005.

PRODUCTION FORECAST

Production		2006 Current Forecast (tonnes)	2006 Previous Forecast (tonnes)	2005 Actual (tonnes)
Copper:	Mined	**460,000**	475,000	462,000
	Refined	**640,000**	635,000	544,000
Nickel:	Mined	**80,000**	82,000	80,000
	Refined	**110,000**	115,000	114,000
Zinc:	Mined	**460,000**	460,000	454,000
	Refined[(1)]	**210,000**	210,000	182,000
Aluminum	Primary	**250,000**	250,000	246,000
	Fabricated	**195,000**	195,000	178,000

[(1)] Includes 100% of Kidd Creek refinery production and 25% of the Noranda Income Fund CEZ Refinery production

Forecast mined copper production for 2006 has been revised downwards by 15,000 tonnes in order to take account of lost production at Collahuasi that resulted from repairs required to one of the mill motors and the primary conveyor. The refined copper production forecast has been revised upwards by 5,000 tonnes as increased materials throughput at the Horne smelter and CCR refinery are exceeding expectations.

Forecast mined nickel production has been revised downward as a result of lower head grades at the Sudbury mines. Refined nickel production has been revised downwards due to the forecast lower production from the Sudbury mines as well as due to reduced custom feed throughput at the Nikkelverk refinery.

LABOUR AGREEMENTS

During the quarter, labour agreements were renewed at the Brunswick Mine, Brunswick Smelter, Raglan Mine and Lomas Bayas. Negotiations at the Bulk Handling Operations in New Brunswick, General Smelting in Quebec, and Nikkelverk in Norway are ongoing.

In the third quarter of 2006, the Antamina collective agreement is up for renewal and negotiations began in the second quarter. In the fourth quarter of 2006, the Norandal (Salisbury) and Altonorte agreements are due for renewal on November 20 and December 12, respectively.

DEVELOPMENT PROJECTS UPDATE

Copper Projects

Collahuasi, Chile

Following the start-up of the mill expansion, the focus of management has been on the continued optimization of the current facilities with the objective of expanding the sulphide concentrator throughput (150,000 to 180,000 tonnes per day). Several areas where bottlenecks exist have been identified and various initiatives are being implemented to eliminate the bottlenecks.

Work is also continuing on evaluation of the Rosario West resource and optimum development plan for exploitation of the resource.

Antamina, Peru

Engineering studies for the addition of a pebble crushing circuit continued. The addition of the circuit would increase the overall grinding capacity and concentrate production.

Studies are also underway on extension of the mine life by exploitation of additional ore bodies.

Lomas Bayas Expansion, Chile

Plans for optimizing output from the existing Lomas Bayas mine have been completed and work is progressing on the preparation of the feasibility study to increase output from the existing orebody.

Subsequent to the end of the quarter, Falconbridge made the final US$15 million payment required under the original purchase agreement to secure the adjacent Fortuna de Cobre property. Work is progressing on the study of expanding operations at Lomas Bayas into the adjacent Fortuna de Cobre deposit. A prefeasibility study for the expansion into the Fortuna de Cobre deposit is expected to be completed later this year.

El Pachón, Argentina

During the second quarter, an engineering contractor was selected to prepare the pre-feasibility study for the project. Work commenced on the study during May and is expected to be completed at the end of 2007. Preparations were underway for a geological and geotechnical drilling program to commence later this year during the fourth quarter. Development of relations with communities in the areas of the project were advanced during the quarter.

El Morro, Chile

The summer drilling program was completed during May and work is in progress on analysis of the core sample results. Work has started on driving an exploration tunnel to obtain bulk samples for future test programs. The development of the pre-feasibility study for the project is continuing.

Kidd Mine D Project, Canada

Work on the shaft bottom and lateral development was completed in the second quarter of 2006. Production from block three is expected to begin in the third quarter of 2006, with project completion expected by the end of 2006.

Nickel Projects

Raglan Mine Optimization, Canada

The second phase of Raglan's optimization will focus on utilizing increased mill capacity by expanding site infrastructure and ore production to allow for the mining, milling and processing of 1.3 million tonnes of ore annually, resulting in approximately 30,500 tonnes of annual contained nickel production. Scoping study work has been initiated on mining aspects. To facilitate this program, the accommodation complex requires expansion. The phased program is expected to be completed late in 2008.

Nickel Rim, Canada

Vent shaft sinking, which began in February 2005, is now at 1,332 metres, and is ahead of schedule. Main shaft sinking began in April 2005 and is now at 965 metres. Underground horizontal development on the 1280 level continues ahead of schedule. The definition phase of the project is on schedule for completion in 2008 with production ramp up in 2009.

Koniambo, New Caledonia

Falconbridge continued to advance the Koniambo ferronickel project in New Caledonia, a joint venture between Falconbridge and SMSP (the development arm of the North Province of New Caledonia). The current focus is on the advancement of detailed engineering and on early construction activities with a focus on site preparation. Discussions continue with government authorities to refine the necessary operating and construction permits. Koniambo Nickel will produce 60,000 tonnes of nickel with start-up expected in 2009/2010.

Kabanga, Tanzania

The Kabanga deposit is a joint venture between Falconbridge and Barrick Gold in Tanzania. By mutual agreement of the joint venture partners, the companies continued to upgrade the resource to measured and indicated categories to support the work plan. Systematic exploration of the under-explored Kabanga licence continues and select regional targets are being evaluated. Engineering

studies are limited in this phase and concentrate primarily on a geotechnical and hydrology program, metallurgical testing and baseline environmental, health and safety studies.

Upon completion of the initial US$49.5 million in expenditures on this project, Falconbridge has an opportunity to determine if it wishes to continue to the next phase of this project.

Zinc Projects

Perseverance, Canada

The feasibility study has been completed on this zinc and copper project located in northern Quebec. A decision to proceed is currently under consideration with a decision expected later this year.

EXPLORATION UPDATE

Raglan

The 2006 exploration program is in progress, employing six diamond drills. To date, two new lenses have been discovered at Zone 5-8, located approximately 4 kilometres east of the concentrator. Hole 714-3, one of the better holes, intersected 25.1 metres of 4.77% nickel and 1.27% copper at a depth of 620 metres.

Brazil

Exploration of the Araguaia nickel laterite properties continues with the objective of having the Serra do Tapa and Vale dos Sonhos mineral deposits enter the Corporation's project development Stage Gate process if merited during the fourth quarter of this year.

MARKET REVIEW

Copper

The LME cash copper price ranged from a low of $2.52/lb. to a high of $3.98/lb. to average $3.27/lb. during the second quarter of 2006. This compares favorably against an average of $2.24/lb. during the first quarter of 2006. LME stocks decreased 27,175 tonnes during the second quarter, ending at 93,500 tonnes. June's decrease of approximately 17,500 tonnes represents the largest monthly withdrawal from the LME warehouses since November 2004. Decreased stocks in LME warehouses however were offset by a 28,612 tonnes increase in Shanghai exchange stocks.

North American cathode demand remained strong during the quarter. Delays in copper vessel arrivals from Chile, combined with supply disruptions in Mexico and at Asarco, provided support to North American premiums. U.S. spot metal premiums increased to US$0.065-$0.075/lb. In Europe, cathode availability eased in the second quarter with premiums moving to US$135-145/mt. Cathode availability in Asia remains well supplied.

The global supply of copper concentrate continued to be adversely affected in the second quarter. Year to date, approximately 272,000 tonnes of copper in concentrate has been lost as a result of operational, political and labor problems and issues. The potential for further declines in mine supply persist as several large mines are subject to labor contract renewals during the third quarter. Constrained mine supply compared to a growing demand for concentrates at Asian smelters should lead to a deficit in the mine balance by the end of 2006 and throughout 2007.

Chinese year-over-year apparent cathode consumption growth remains low at less than 5%, but is somewhat distorted by ongoing Chinese SRB internal sales and exports thus reducing net import figures. Chinese net imports of copper cathodes and scrap are substantially below comparable 2005 levels in the first five months of the year due to high prices, increased supply of domestic cathodes and general destocking.

A global copper market deficit of 102,000 tonnes is forecast for 2006. Above trend copper prices are expected to persist as positive fundamentals and fund involvement support a favorable market environment.

Nickel

After trading just below the $7.00/lb. in the first quarter, the LME cash nickel price climbed to a high of $10.48/lb. by the end of May. A correction of the base metals complex mid-May saw the nickel price move lower to $8.62/lb. Underlying fundamentals were not a factor in the correction, and strong demand for base metals lead to a resumption of nickel price increases. Nickel prices recently reached a record high of over $13.00/lb. in mid-July. The LME average nickel cash price for the second quarter of 2006 was $9.04/lb. compared to $7.44 in the second quarter of 2005

The nickel market can be characterized by significant tightness of nickel availability with a number of the major producers sold out at a time of strong demand. This can be seen from the steady decline in LME nickel inventories, which have been in a trend of steady drawdown. During the second quarter, LME inventories dropped 22,000 tonnes to end at the critically low level of 9,990 tonnes. Similarly, rising premia (melting grade) in the U.S. (up 30%), Europe (up 31%) and Japan (up 100+%) reflect the tightness of material availability.

Strong stainless steel demand continued into the second quarter in all market areas. Indications are that this strong demand will carry into the third quarter. Order books at stainless steel mills are strong, currently booked past the third quarter. Mills are planning to either operate through the summer, or hold shorter shutdowns. Stainless steel inventories are at low levels globally. As a result of the sustained strong demand for stainless steel and the low level of inventories at service centres, the forecast of stainless steel production has been raised to 26,535,000 tonnes, an increase of 8.5% over last year.

The non-stainless steel sectors such as foundry and nickel alloys continue to report very good business, especially from the aerospace, oil and gas, and power generation industries. In addition to the strong demand from the stainless steel, nickel alloy and foundry sectors, a shortage of stainless steel scrap has lead to greater demand for primary nickel, which is now expected to show consumption growth of 8.4% for 2006.

On the supply side, a number of disruptions were announced in the second quarter. In Indonesia, both Aneka Tambang and PT Inco have announced lower production due to difficulties at their operations. Similarly, Minara's Murrin Murrin operation in Australia is forecast to fall short of their original 2006 target of 36,000 tonnes. This has now been lowered by 2,000 tonnes. Total year to date nickel production losses have been around 14,000 -20,000 tonnes. The current outlook for the nickel market in 2006 is for a deficit of 22,000 tonnes.

Zinc

LME prices were highly volatile in the second quarter, as the outlook for a substantial 2006 zinc supply deficit was offset by concerns for global economic growth. Zinc LME cash prices peaked at an all-time high of $1.81/lb in May, and fell to $1.33/lb by late-June. LME prices in July have recovered to the $1.55 level. The average for the quarter was $1.49/lb, compared to $0.58/lb in the second quarter of 2005. LME stocks dropped 65,675 tonnes during the quarter to 214,925 tonnes. LME stocks have dropped a total of 178,625 tonnes year-to-date.

Global zinc mine production is forecast to increase by over 6% in 2006 as miners in China respond to high price levels while the Western World maintains existing production levels. Global mine supply will continue to fall short of zinc metal consumption needs, resulting in ongoing drawdowns in available stocks.

Metal consumption is forecast to grow by 5.5% this year, on strong industrial growth in China, assisted by a recovery in steel demand in the USA, Europe and Japan. Order books at galvanized steel mills are strong, currently booked to the end of the third quarter. The non-galvanized steel sectors such as brass, alloys and battery powders continued to report good business volumes.

On balance, a metal deficit of almost 400,000 tonnes is expected for 2006, providing underlying support to zinc prices and premiums. North American spot zinc metal premiums strengthened from $0.08/lb. to $0.10/lb. at the end of the quarter. European premiums experienced a similar increase.

Aluminum

The LME aluminum cash price reached an 18-year high of $1.49/lb during the second quarter, but retreated to $1.16/lb by the end of June. The LME aluminum average cash price during the quarter

was $1.19/lb, an increase of $0.12/lb over the first quarter of 2006 and $0.38/lb increase from the second quarter of 2005. Regional delivery premiums also strengthened during the second quarter of 2006 to stand at $0.06/lb by the end of June for delivery to the U.S. Midwest.

LME and COMEX aluminum warehouse stocks fell during the second quarter by a combined 39,500 tonnes to stand at 797,900 tonnes at the close of the quarter. However IAI stocks climbed 60,000 tonnes through May's report to stand at 1,650,000 tonnes. Combined reported stocks are up 20,400 tonnes during the quarter, but are down 57,000 tonnes for the year.

Aluminum demand has been strong from major consuming regions as evidenced by rising delivery premiums for shipments to Japan, Europe, and the U.S. According to the U.S. Aluminum Association, combined aluminum ingot and mill product shipments for January through May of 2006 are up approximately 90,000 tonnes over the same period in 2005. Additionally, China's rapid consumption growth continues to reduce its internal supply/demand imbalance with an 11% year-over-year decrease in net exports of aluminum ingot, semi-fabricated aluminum products, and finished aluminum products for the period January through May of 2006.

Aluminum foil shipments through May 2006 are up 6.2% over the prior year, according to the U.S. Aluminum Association. High U.S. mill operating rates and protective import duties are expected to maintain tightness in the foil markets. Additionally, new federal air conditioner efficiency standards are expected to increase annual demand for aluminum finstock by approximately 45,000 tonnes during the coming years.

SELECTED FINANCIAL INFORMATION

Liquidity and Capital Initiatives

Falconbridge maintains long-term credit arrangements and relationships with a variety of financial institutions and investors in order to facilitate its ongoing access to domestic and international financial markets to meet its funding needs. Falconbridge's future financial requirements related to debt maturities, operating costs, the projects currently under development and other capital investments will be funded primarily from a combination of existing cash balances, committed bank lines, operating cash flows, project financing and new long- and short-term borrowings.

The Company's committed bank facilities currently total $780 million and expire in 2010, or 90 days following a change of control. At June 30, 2006, these lines were essentially undrawn.

Cash generated from operations, before the net change in accounts receivables, payables and inventories, was $1,002 million during the second quarter of 2006. Non-cash working capital increased by $308 million during the quarter due to higher accounts receivable and inventory values resulting from higher metal prices. Total liquidity remains strong, with approximately $1.4 billion of cash and undrawn lines at June 30, 2006. Long-term debt was $2.5 billion at quarter end excluding preferred share liabilities. Falconbridge's net-debt-to-capitalization ratio stood at 26.7% at the end of the quarter, a reduction from 36.6% at the end of 2005.

On April 26, 2006, Falconbridge redeemed a total of 20 million shares, or $500 million, of its outstanding Junior Preference Shares, from shareholders of record on March 22, 2006. On June 28, 2006, Falconbridge redeemed the remaining balance of its 9,999,701 outstanding Junior Preference Shares for a total of approximately $250 million. The Junior Preference Shares were redeemed utilizing internal cash resources. Upon redemption, Falconbridge had no Junior Preference Shares outstanding.

Investments in new production capacity such as the Nickel Rim South and Koniambo nickel projects totaled $234 million during the second quarter. For 2006, the Company's projected capital investments are approximately $315 million for sustaining capital expenditures and other smaller projects

and approximately $435 million in new copper and nickel investments. The major components of the capital investment program are shown in the following table:

Metal	Growth Project	2006 F	2005
Copper	Copper development projects (El Morro, El Pachon, Lomas Bayas)	**$ 60**	$ 4
	Kidd Creek Mine extension	**$ 80**	$114
Nickel	Koniambo	**$180**	$ 96
	Nickel Rim South	**$ 75**	$ 74
	Nickel development projects (Kabanga, Raglan)	**$ 40**	$ 61
Sustaining capital and other		**$315**	$388
Total capital investments		**$750**	$737

(F=Forecast)

Significant Future Obligations

Significant future obligations of Falconbridge and its partially-owned subsidiaries, excluding employee future benefit obligations, are summarized as follows:

	Total Q2, 2006	July-Dec. 2006	2007	2008	2009	2010	Thereafter
				(US$ Millions)			
Convertible Debentures and Other Loans	140	8	109	23	—	—	—
Senior Debentures	2,351	250	—	157	—	—	1,944
Preferred Share Liabilities[1]	132	—	—	132	—	—	—
	2,623	258	109	312	—	—	1,944
Debt of Partially-Owned	360	43	85	70	59	51	52
Capital Leases	16	1	5	1	1	1	7
Operating Leases and Purchase Commitment	142	73	18	13	9	8	21
Total	**3,141**	375	217	396	69	60	2,024

[1] May be redeemed for common shares

Off-Balance-Sheet Arrangements

Falconbridge does not have any unconsolidated affiliates. The Company does not enter into material off-balance-sheet arrangements with special purpose entities in the normal course of business. Its only significant off-balance-sheet arrangements are the Canadian dollar expenditure hedges discussed under the "Financial Instruments and other Instruments" section of this document.

Revenue Recognition

Revenues from the sale of base metals, aluminum and fabricated products and from by-product materials are recorded at the time of sale, when the rights and obligations of ownership pass to the buyer.

Under the terms of concentrate sales contracts with third parties, final prices for metals in the concentrate are set based on the prevailing spot metal prices on a specified future date based on the date that the concentrate is delivered. The Company records revenues under these contracts based on the forward prices at the time of the sale and the revenues are adjusted at each subsequent balance sheet date to the then current forward prices. Price changes for shipments which at year end are awaiting final pricing could have a material effect on future revenues. As at June 30, 2006, there was $692 million in revenues that was awaiting final pricing, primarily related to 87,000 tonnes of payable copper in concentrate.

Transactions with Related Parties

Related party transactions for the second quarter of 2006 and 2005 are summarized as follows:

Three months ended June 30, 2006 (US$ millions):

Collahuasi	Trading activity	—	—	20	—	18	

Financial Instruments and Other Instruments

Falconbridge uses financial and other instruments in the following instances:

Foreign Currency Exposure

Falconbridge uses forward foreign exchange and option contracts to hedge the effect of exchange rate changes on identifiable foreign currency exposures. Falconbridge may hedge up to 50% of its current year Canadian dollar operating cost for the next two years and 25% of the subsequent three years. As at June 30, 2006, there were no significant outstanding foreign exchange contracts to hedge Canadian denominated costs.

Falconbridge may enter into options, futures and forward contracts for the purchase or sale of currencies not designated as hedges. These contracts are carried at estimated fair values and gains or losses arising from the changes in the market values of these contracts are recognized in the earnings of the period in which the changes occur.

Commodity Price Exposure

Generally, Falconbridge does not hedge the price it realizes on the sale of its own production and accepts realizations based on market prices prevailing around the time of delivery of metals to customers. Under certain circumstances, Falconbridge enters into futures and option contracts to hedge the effect of price changes on a portion of the raw materials it purchases on a custom processing or resale basis. Gains and losses on these contracts are reported as a component of the related transactions. Designated contracts meeting the definition for hedge accounting under GAAP are not recorded. Falconbridge may also enter into futures and forward contracts for the purchase or sale of commodities not designated as hedges. These contracts are carried at estimated fair

values and gains or losses arising from the changes in the market values of these contracts are recognized in the earnings of the period in which the changes occur.

Interest Rate Management

Falconbridge may enter into interest-rate swap agreements, including foreign exchange cross currency swaps, to modify the interest characteristics of its outstanding debt. The differential to be paid or received, for interest rate swaps for which we receive hedge accounting, is accrued and recognized as an adjustment to interest expense related to the debt. A summary of these positions as at June 30, 2006 is tabled below.

Interest Rate Swaps (Notional Principal Amount in $ Millions)	Total
Maturity (2006)	325
Maturity (2008)[1]	136
Maturity (2011)	300
Maturity (2012)	350
Maturity (2015)	500
Fair value[2]	12

[1] Includes a cross-currency interest rate swap designated as a hedge of a Canadian dollar debenture. The total fair value of this instrument at June 30, 2006 was $51 million of which $46 million related to the currency component of the swap and $5 million related to the interest component.

[2] Includes the fair value of $46 million related to the currency component of the cross currency interest rate swap discussed in Note 1 above.

Counterparty Risk

Foreign currency and interest rate swap contracts are maintained with counterparties with at least an "A" rating or better by a recognized national credit rating agency. As a result, Falconbridge does not anticipate that any counterparties will fail to meet its obligation. If any outstanding foreign exchange or interest rate swap is terminated prior to maturity, then the contract would be settled at the fair value at the time.

OTHER

Suspension of Dividend Re-Investment Plan

The Corporation has suspended its Dividend Re-Investment Plan as under the terms of the Support Agreement between Inco and Falconbridge the Corporation is not permitted to issue any additional shares (other than in respect of existing options and other convertible securities). Common shareholders will continue to receive their dividends in cash.

Shareholder Rights Plan

On March 21, 2006, the Company enacted a new shareholder rights plan, designed to prevent a creeping takeover of the Company and preserve its ability to obtain the best value for all shareholders. The rights plan will not prevent an offer made to all shareholders for all of their shares. Under an order issued by Ontario Securities Commission on June 30, 2006, the shareholder rights plan shall cease to have effect on the earlier of (i) the date Xstrata plc takes up under its outstanding offer over fifty per cent of the outstanding Falconbridge common shares that it does not already own, and (ii) July 28, 2006.

SHARES OUTSTANDING AND DECLARED DIVIDENDS

Shares Outstanding (as at July 21, 2006)

Name of Falconbridge Security	Trading Symbol	Shares Outstanding
Common Shares[1]	FAL	376,150,148
Common Share Options Outstanding[2] (vested and unvested)		5,644,391
Convertible Debentures[3] — converted into common shares		867,912
Preferred Shares, Series 1	N/A	89,835
Preferred Shares, Series 2	FAL.PR.A	4,787,283
Preferred Shares, Series 3	FAL.PR.B	3,122,822
Preferred Shares, Series F	FAL.PR.F	3,246,057
Preferred Shares, Series G	FAL.PR.G	8,753,943
Preferred Shares, Series H	FAL.PR.H	6,000,000

[1] Falconbridge common shares trade on the Toronto and New York Stock Exchanges under the symbol FAL. Falconbridge common shares also trade in U.S. dollars on the Toronto Stock Exchange under the symbol FAL.U.

[2] Falconbridge common share options are convertible into common shares of the Company at the rate of one common share for each common share option outstanding.

[3] Convertible debentures are convertible at the holder's option into common shares of the Company at a conversion price of Cdn$27.55 per common share. The company has the option of redeeming the debentures, and upon maturity they are redeemable, at the Company's option, for common shares of the Company. Currently the Company has Cdn$23,911,000 of convertible debentures outstanding. This amount converted into common shares at the specified conversion rate would be the equivalent of 867,912 common shares.

Declared Dividends

The following dividends have been declared:

Name of Falconbridge Security	Trading Symbol	Dividend Amount Per Share	Record Date	Payable Date
Common Shares — regular dividend	FAL	Cdn$0.12	August 31, 2006	September 15, 2006
Common Shares — special dividend	FAL	Cdn$0.75	July 26, 2006	August 10, 2006

Preferred Shares, Series H	FAL.PR.H	Cdn$0.40625	September 15, 2006	September 29, 2006

Additional information relating to Falconbridge, including Falconbridge's Annual Information Form, is on the System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com.

Note: *All dollar amounts are expressed in U.S. dollars unless otherwise noted. Condensed consolidated financial statements are attached.*

FORWARD-LOOKING INFORMATION

Certain statements contained in this Management Discussion and Analysis are forward-looking statements (as defined in applicable securities legislation). Examples of such statements include, but are not limited to, statements concerning (i) our assessment of the outlook for metal markets in 2006, (ii) Inco's offer to acquire all of the common shares of Falconbridge Limited and the benefits of such combination, (iii) the arrangement transaction agreed to between Phelps Dodge and Inco pursuant to which Phelps Dodge will acquire Inco and the benefits of such a combination, (iv) Xstrata's offer to acquire all of the common shares of Falconbridge Limited (v) our future financial requirements and funding of those requirements, (vi) our expectations with respect to our development projects, (vii) our production forecast for 2006 and (viii) our dividend schedule. Inherent in forward-looking statements are risks and uncertainties well beyond our ability to predict or control. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this Management Discussion and Analysis. Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions about the timing, steps to be taken and completion of Inco's offer to acquire all of Falconbridge's common shares and the Phelps Dodge and Inco transaction, the ability to successfully compete against global metals and mining and exploration companies by creating through such a combination an enterprise of increased scale; strong demand for nickel, copper and other metals in emerging markets such as China; the quantum and availability of pre-tax operating and other synergies and cost savings, and other benefits being realized based on the achievement of operational efficiencies from restructuring, integration and other initiatives relating to the combination of Falconbridge and Inco and the combination of Falconbridge, Inco and Phelps Dodge; divestitures required by regulatory agencies completed in a timely manner; there being limited costs, difficulties or delays related to the integration of the Falconbridge's operations with those of Inco and with those of Phelps Dodge; the timely completion of the steps required to be taken for the eventual combination of Falconbridge and Inco and the combination of Falconbridge, Inco and Phelps Dodge; business and economic conditions generally; exchange rates, energy and other anticipated and unanticipated costs and pension contributions and expenses; the supply and demand for, deliveries of, and the level and volatility of prices of, nickel, copper, aluminum, zinc and other primary metals products and other metal products Inco and Falconbridge produce; the timing of the receipt of remaining regulatory and governmental approvals for the development projects and other operations; the continued availability of financing on appropriate terms for development projects; Falconbridge's costs of production and production and productivity levels, as well as those of its competitors; market competition; mining, processing, exploration and research and development activities; the accuracy of ore/mineral reserve estimates; premiums realized over LME cash and other benchmark prices; tax benefits/charges; the resolution of environmental and other proceedings and the impact on the combined company of various environmental regulations and initiatives; assumptions concerning political and economic stability in countries or locations in which Falconbridge operates or otherwise and the ability to continue to pay quarterly cash dividends in such amounts as Falconbridge's Board of Directors may determine in light of other uses for such funds and other factors.

Inherent in those statements are known and unknown risks, uncertainties and other factors well beyond the Company's ability to control or predict. Some of these known risks and uncertainties are outlined in filings by Falconbridge with applicable securities regulatory authorities, including in Falconbridge's annual information form. Readers are encouraged to consult such filings. While Falconbridge anticipates that subsequent events and developments may cause Falconbridge's views to change, the Company specifically disclaims any obligation to update these forward-looking statements. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this Management Discussion and Analysis. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. These factors are not intended to represent a complete list of the factors that could affect Falconbridge, the combination of Inco and Falconbridge or the combination of Inco, Falconbridge and Phelps Dodge, or the Xstrata offer for Falconbridge.

Falconbridge Limited is a leading copper and nickel company with investments in fully-integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel mining deposits. It employs 14,500 people at its operations and offices in 18 countries. Falconbridge's common shares are listed on the New York Stock Exchange (FAL) and the Toronto Stock Exchange (FAL.LV). Falconbridge's website can be found at www.falconbridge.com.

PART XIV — DIRECTORS OF THE GUARANTOR

A list of the members of the Board is set forth in the table below.

Directors:

Name	Age	Position
Willy Strothotte†	62	Chairman
Mick Davis	48	Chief Executive
Trevor Reid	45	Chief Financial Officer
Santiago Zaldumbide	64	Executive Director, Chief Executive of Xstrata Zinc and Executive Chairman of Asturiana de Zinc
Ivan Glasenberg†	49	Non-executive Director
Paul Hazen	64	Non-executive Director
Robert MacDonnell	69	Non-executive Director
Sir Steve Robson CB	63	Non-executive Director
David Rough	55	Non-executive Director
Dr. Frederik Roux	59	Non-executive Director
Ian Strachan	63	Non-executive Director

Secretary:

Richard Elliston

(†) Glencore International Nominee: see Part I — "Description of the Enlarged Xstrata Group — Relationship with Glencore" of these Listing Particulars

The business address for the Directors is c/o Bahnhofstrasse 2, P.O. Box 102, 6301 Zug, Switzerland.

Willy Strothotte, aged 62, is Chairman of Glencore International. From 1961 to 1978 Mr. Strothotte held various positions with responsibility for international trading in metals and minerals in Germany, Belgium and the USA. In 1978, Mr. Strothotte joined Glencore International, taking up the position of Head of Metals and Minerals in 1984. Mr. Strothotte was appointed Chief Executive Officer of Glencore International in 1993 and held the combined positions of Chairman and Chief Executive Officer from 1994 until 2001, when the roles of Chairman and Chief Executive were split. Mr. Strothotte has been Chairman of Xstrata AG since 1994, and Chairman of the Guarantor since February 2002, and is currently a director of Century Aluminum Corporation and Minara Resources Limited.

Mick Davis, aged 48, is the Chief Executive of the Guarantor. Mr. Davis was appointed as Chief Executive of Xstrata AG in October 2001, and was appointed to the Board of the Guarantor in February 2002. Previously, Mr. Davis was Chief Financial Officer and an executive director of Billiton Plc, appointed in July 1997, and served as Executive Chairman of Ingwe Coal Corporation Limited from 1995. He joined Gencor Limited in early 1994 from Eskom, the South African state-owned electricity utility, where he was an executive director.

Trevor Reid, aged 45, is the Chief Financial Officer of the Guarantor. Mr. Reid joined Xstrata AG in January 2002, and was appointed to the Board of the Guarantor in February 2002. Prior to joining the Guarantor, he was Global Head of Resource Banking at the Standard Bank Group. He joined the Standard Bank Group in 1997 from Warrior International Limited, a corporate finance boutique specialising in the minerals sector.

Santiago Zaldumbide, aged 64, is an Executive Director of the Guarantor, Chief Executive of Xstrata Zinc and Executive Chairman of Asturiana de Zinc. Mr. Zaldumbide was appointed to the Board of the Guarantor in February 2002. He is a previous Chief Executive Officer and Director of Union Explosivos Rio Tinto and of Petroleos del Norte. In 1990, Petroleos del Norte became part of the Repsol Oil Group where Mr. Zaldumbide was responsible for establishing the international structure of the enlarged Repsol Oil Group. In 1994 he was appointed Chief Executive Officer of the Corporación Industrial de Banesto and, in December 1997, Chairman and Chief Executive Officer of Asturiana de Zinc. Mr. Zaldumbide is also a member of the Supervisory Board of Air Products and Chemicals, Inc. and a director of ThyssenKrupp SA.

Ivan Glasenberg, aged 49, is Chief Executive Officer of Glencore International, which he joined in 1984. Mr. Glasenberg was appointed to the Board of the Guarantor in February 2002. He worked in the coal department of Glencore in South Africa for three years and in Australia for two years. From 1989 to 1990, he managed Glencore International's Hong Kong and Beijing offices. In 1991 he became Head of the Glencore Coal Department and in 2002 Chief Executive Officer of Glencore International. He is also currently a Director of Minara Resources Limited.

Paul Hazen, aged 64, joined the Board of Xstrata AG in May 2000, and was appointed a Director of the Guarantor in February 2002. Mr. Hazen is a former Chairman and CEO of Wells Fargo and Company and he was a director of Phelps Dodge Corporation until February 2003 and Deputy Chairman and Lead Independent Director of Vodafone Group Plc until July 2006. Mr. Hazen retired in April 2001 as Chairman after a 30-year career with Wells Fargo and Company. Mr. Hazen is currently Chairman of Accel-KKR and of KKR Financial Corporation. He also serves as Lead Independent Director of Safeway, Inc. and a Director of Willis Group Holdings Ltd.

Robert MacDonnell, aged 69, joined the Board of Xstrata AG in May 1997, and was appointed to the Board of the Guarantor in February 2002. Prior to joining Kohlberg Kravis Roberts & Co. in 1976, Mr. MacDonnell was a management consultant at Arthur Andersen & Co. He subsequently formed his own firm, which specialised in small management buyouts. Mr. MacDonnell became the first non-founding partner of KKR in 1982 and participated in virtually all investment decisions until the firm expanded in the late 1980s. Mr. MacDonnell is also currently a director of Safeway, Inc.

Sir Steve Robson CB, aged 63, retired as Second Permanent Secretary at HM Treasury in January 2001. He had joined HM Treasury after leaving university. His early career included a period as Private Secretary to the Chancellor of the Exchequer and a two-year secondment to Investors in Industry plc (3i). From 1997 until his retirement, his responsibilities included the legal framework for regulation of the UK financial services industry, public private partnerships, procurement policy including the private finance initiative and the Treasury's enterprises and growth unit. Sir Steve is a director of JPMorgan Cazenove Holdings, Partnerships UK plc and The Royal Bank of Scotland Group plc. Sir Steve was appointed to the Board of the Guarantor in February 2002 and is Chairman of the Audit Committee.

David Rough, aged 55, was a Director of Legal & General Group Plc before retiring from Legal & General in June 2002. As Group Director (Investments), Mr. Rough headed all aspects of fund management within Legal & General Investments. Mr. Rough is currently a director of BBA Group plc, Emap plc, Land Securities plc, Brown, Shipley & Co Ltd and Mithras Investment Trust plc. Mr. Rough was appointed to the Board of the Guarantor in April 2002, is Deputy Chairman, the Senior Independent Director and Chairman of the Nominations Committee.

Dr. Frederik Roux, aged 59, joined Johannesburg Consolidated Investment Company Limited in 1976, where he held positions in the Finance, Base Metals, Gold and Platinum divisions. In 1990, he joined Gencor Limited where he became Chairman of Alusaf and Executive Director responsible for Gencor Base Metals and Heavy Minerals. Since 1997, he has pursued private business interests in game ranching and safaris in South Africa. Dr. Roux is also Chairman of Impala Platinum Holdings Limited. Dr. Roux was appointed to the Board of the Guarantor in February 2002.

Ian Strachan, aged 63, is a director of Reuters Group plc, Johnson Matthey plc, Rolls Royce plc and Transocean Inc. Mr. Strachan was Chairman of Instinet Group Inc from 2003 to 2005 and Chief Executive of BTR plc from 1996 to 1999. Mr. Strachan joined Rio Tinto plc (formerly RTZ plc) as CFO in 1987, and was Deputy Chief Executive from 1991 to 1995. Mr. Strachan was appointed to the Board of the Guarantor at the Annual General Meeting held in May 2003 and is the Chairman of the Health, Safety, Environment and Community Committee.

United Kingdom

The comments below are of a general nature based on current United Kingdom law and H.M. Revenue & Customs practice. They are not intended to be, nor should they be construed to be, legal or tax advice and are included herein solely for information purposes. They relate only to the position of persons who are the absolute beneficial owners of their Bonds and coupons. They do not necessarily apply where the income is deemed for tax purposes to be the income of any other person and may not apply to certain classes of persons such as dealers or certain professional investors or persons who are connected with the Issuer. Any Bondholders should consult their own professional advisers as to the United Kingdom tax consequences of holding and disposing of Bonds and receiving payments of interest or principal under the Bonds, as well as if they are in any doubt as to their own technical position.

The Guarantor's place of effective management is in Switzerland, and it is accordingly treated as resident in Switzerland, and not in the UK, for the purposes of Swiss and UK taxation and for the purposes of the UK-Switzerland double tax treaty. This position will, however, be reviewed from time to time and it is possible that the Guarantor could in the future become resident for the purposes of taxation in the UK or elsewhere.

This section is written on the basis that the Guarantor is and remains resident in Switzerland and will therefore be subject to the Swiss tax regime and not (save in respect of United Kingdom source income) the United Kingdom tax regime.

The Issuer is also a non-UK resident company.

(a) **Interest-withholding and information reporting requirements**

(i) Payments of interest on the Bonds may be made without any withholding or deduction on account of United Kingdom tax.

(ii) Persons in the United Kingdom paying interest to or receiving interest on behalf of an individual may be required to provide certain information to H.M. Revenue & Customs regarding the identity of the payee or person entitled to the interest and, in certain circumstances, such information may be exchanged with tax authorities in other countries.

(iii) Under Council Directive 2003/48/EC on the taxation of savings income, Member States are required from 1 July 2005 to provide to the tax authorities of another Member State details of payments of interest and other similar income paid by a person within their jurisdiction to or for an individual resident in that other Member State. However, for a transitional period only (which will end after agreement on exchange of information is reached between the European Union and certain non-European Union States) Belgium, Luxembourg and Austria are instead required (unless during such period they elect otherwise) to operate a withholding tax in relation to such payments unless the Bondholder authorises the person making the payment to report the payment or presents a certificate from the relevant tax authority establishing exemption therefrom. Switzerland has also concluded an agreement with the European Community providing for measures equivalent to those laid down in Council Directive 2003/48/EC.

(b) **Corporate Bondholders within the charge to UK Corporation Tax**

The tax treatment of Bondholders within the charge to United Kingdom corporation tax will in most cases depend on their statutory accounting treatment, including whether or not the Bonds will be regarded as containing an "embedded derivative" as an accounting matter. The accounting treatment will affect the tax treatment of holding, disposing of or converting the Bonds, and possibly any subsequent exchange of Preference Shares for Ordinary Shares.

Bondholders within the charge to United Kingdom corporation tax should therefore consult their own accounting and tax advisers concerning their tax liabilities that may arise in respect of the Bonds and any subsequent exchange.

(c) **Other Bondholders**

(i) **Interest**

Interest paid on a Bond held by a Bondholder who is not within the charge to corporation tax but who is resident or ordinarily resident for tax purposes in the United Kingdom or who carries on a trade, profession or vocation in the United Kingdom through a branch or agency to which the Bond is attributable will be taxed as income in the hands of the relevant Bondholder.

It should be noted that special rules, which are not covered, apply to Bondholders who are resident, but not domiciled, in the United Kingdom.

(ii) **Disposal**

A disposal of a Bond by a Bondholder resident or ordinarily resident for tax purposes in the United Kingdom or who carries on a trade, profession or vocation in the United Kingdom through a branch or agency to which the Bond is attributable may give rise to a chargeable gain or allowable loss for the purposes of taxation of capital gains. In calculating any gain or loss on disposal of a Bond, pound sterling values are compared at acquisition and disposal. Accordingly, a taxable profit can arise even where the United States dollar amount received on a disposal is less than or the same as the amount paid for the Bond.

A transfer of a Bond by a holder resident or ordinarily resident in the United Kingdom, or by a holder who carries on a trade in the United Kingdom through a branch or agency to which the Bond is attributable, may give rise to a charge to tax on income in respect of interest on the Bond which has accrued since the preceding interest payment date.

A disposal of Bonds by a holder who is only temporarily not resident in the United Kingdom may, under anti avoidance legislation, still be subject to United Kingdom tax on chargeable gains realised, subject to any available exemption or relief.

(iii) **Conversion**

Conversion of the Bonds into Preference Shares should not be treated as a disposal of the Bonds (except for the purposes of the adjustment for accrued interest described above) and should not of itself give rise to a charge to United Kingdom taxation on chargeable gains.

On a conversion, interest that is deemed to have accrued since the last interest payment date may be chargeable to United Kingdom tax as income under the accrued income scheme even though on conversion accrued interest may not be payable.

(iv) **Exchange**

The exchange of the Preference Shares in the Issuer for the Ordinary Shares in the Guarantor should not be treated as occasioning a disposal of the Preference Shares and accordingly it should not give rise to a chargeable gain for those holders of the Preference Shares who, either alone or together with persons connected with them, do not hold more than 5 per cent. of any class of shares in or debentures of the Issuer. Any chargeable gain or allowable loss which would otherwise have arisen on a disposal of the Preference Shares will be "rolled over" into the Ordinary Shares and the Ordinary Shares will be treated as the same asset as the Preference Shares, acquired at the same time and for the same consideration as the Preference Shares were acquired or treated as acquired.

A holder of Preference Shares who, either alone or together with persons connected with him, holds more than 5 per cent. of any class of shares in or debentures of the Issuer will be treated in the manner described in the preceding paragraph with respect to the exchange provided that the exchange is effected for bona fide commercial reasons and does not form part of a scheme or arrangement of which the main purpose, or one of the main purposes, is avoidance of liability to capital gains tax or corporation tax. Such holders of Preference Shares should note that an application for

clearance has not been made in this regard to H.M. Revenue & Customs under Section 138 of Taxation of Chargeable Gains Act 1992.

(d) **Dividends on the Ordinary Shares**

Shareholders who (i) are resident in the United Kingdom for tax purposes, (ii) are non corporate shareholders not resident in the United Kingdom but carrying on a trade, profession or vocation in the United Kingdom through a branch or agency in connection with which the Ordinary Shares are held, or (iii) are corporate shareholders not resident in the United Kingdom but carrying on a trade, profession or vocation in the United Kingdom through a United Kingdom permanent establishment in connection with which the Ordinary Shares are held, will generally, depending upon their particular circumstances, be subject to United Kingdom income tax or corporation tax (as the case may be) on the gross amount of any dividends paid by the Guarantor on the Ordinary Shares, before deduction of any Swiss withholding tax. A credit for Swiss withholding tax would generally be given against any United Kingdom tax liability in respect of the dividends. For a United Kingdom individual who is liable to United Kingdom income tax, the dividends will (depending on the amount of the Shareholder's overall taxable income) be taxable at the dividend ordinary rate (10 per cent. in 2006 2007) and/or the dividend upper rate (32.5 per cent. in 2006 2007).

(e) **Disposals of Ordinary Shares**

(i) United Kingdom resident holders of the Ordinary Shares may, depending on their circumstances, be liable to United Kingdom taxation on chargeable gains in respect of gains arising from a disposal of the Ordinary Shares.

(ii) Bondholders who are not resident in the United Kingdom will not be liable to United Kingdom taxation on chargeable gains in respect of gains arising from the disposal of the Ordinary Shares, except where such persons carry on a trade, profession or vocation in the United Kingdom through a United Kingdom branch or agency in connection with which the disposal proceeds are received or to which the Ordinary Shares are attributable, in which case tax may be levied on the UK branch or agency, or are corporate shareholders not resident in the United Kingdom but carrying on a trade, profession or vocation in the United Kingdom through a United Kingdom permanent establishment in connection with which the Ordinary Shares are held.

(iii) A disposal of Ordinary Shares by a holder who is only temporarily not resident in the United Kingdom may, under anti-avoidance legislation, still be subject to United Kingdom tax on chargeable gains realised, subject to any available exemption or relief.

(f) **Stamp duty and stamp duty reserve tax**

(i) As the Issuer is not incorporated in the United Kingdom and the Bonds are not held on a register which is kept by or on behalf of the Issuer in the United Kingdom, it is considered that no UK stamp duty reserve tax ("SDRT") should be payable on any issue, transfer or conversion of a Bond. No UK stamp duty will be payable on the issue of the Bonds, or on the transfer of the Bonds where any transfer documents are executed outside the United Kingdom.

(ii) No UK stamp duty or SDRT will be payable on the issue of the Preference Shares, provided (as is the intention) that the register of the Preference Shares is kept outside the United Kingdom.

(iii) No UK SDRT will be payable in respect of the transfer of such Preference Shares in exchange for Ordinary Shares, and it should not be necessary to pay any possible charge to UK stamp duty in respect of such transfer provided (as is the intention) that the register of the Preference Shares is kept outside the United Kingdom.

(iv) No UK stamp duty or SDRT will be payable on the issue of Ordinary Shares in exchange for Preference Shares, save where the Ordinary Shares are issued to issuers of depositary receipts or providers of clearance services (or their nominees or agents) in which event SDRT at 1.5 per cent. of the value of the relevant shares will arise unless (in the case of an issue to a clearance service) the clearance service has

made an election under Section 97A of the Finance Act 1986 which applies to the relevant shares. Under Section 97A of the Finance Act 1986, clearance services may, provided they meet certain conditions, elect for the 0.5 per cent. rate of stamp duty or SDRT to apply to transfers of securities within such services instead of the 1.5 per cent. rate applying to an issue or transfer of such securities into the clearance service.

(v) The transfer on sale of an Ordinary Share will be liable to ad valorem stamp duty generally at the rate of 0.5 per cent. of the amount or value of the consideration for the transfer, rounded up to the nearest 5 pounds sterling. The purchaser normally pays the stamp duty.

(vi) An unconditional agreement to sell an Ordinary Share will generally give rise to a liability on the purchaser to SDRT, at the rate of 0.5 per cent. of the amount or value of the consideration for the sale. If a duly stamped transfer in respect of the agreement is produced within six years of the date that the agreement is entered into or (if later) the date that it becomes unconditional, any SDRT paid is repayable generally with interest, and any unpaid SDRT charge is cancelled.

(vii) A transfer of Ordinary Shares (i) to a person (or a nominee or agent for such a person) whose business is or includes issuing depositary receipts within Section 67 or Section 93 Finance Act 1986 or (ii) to a person (or a nominee or agent for such a person) providing a clearance service within Section 70 or Section 96 of the Finance Act 1986, will generally be subject to stamp duty or SDRT at 1.5 per cent. of the amount or value, of the consideration or, in certain circumstances, the value of the Ordinary Shares transferred unless (in the case of a transfer to a clearance service) the clearance service has made an election under Section 97A of the Finance Act 1986 which applies to the Ordinary Shares. Under Section 97A of the Finance Act 1986, clearance services may, provided they meet certain conditions, elect for the 0.5 per cent. rate of stamp duty or SDRT to apply to transfers of securities within such services instead of the 1.5 per cent. rate applying to an issue or transfer of such securities into the clearance service.

(viii) A transfer of depositary receipts will not be subject to UK stamp duty provided that the depositary receipts are not held on a register in the United Kingdom or issued by a company incorporated in the United Kingdom and that any transfer documents are executed outside the United Kingdom.

(ix) Under the CREST system for paperless share transfers, no stamp duty or SDRT will arise on a transfer of Ordinary Shares into the system unless such transfer is made for a consideration in money or money's worth, in which case a liability to SDRT (usually at a rate of 0.5 per cent.) will arise. Paperless transfers of ordinary shares within CREST will be liable to SDRT rather than stamp duty.

Switzerland

(a) Investors resident outside Switzerland

Under current Swiss law, Bondholders resident outside Switzerland and holders of Ordinary Shares (in either case provided they have not engaged in trade or business in Switzerland through a permanent establishment or fixed place of business and are not subject to taxation in Switzerland for any other reason) should not be liable to any Swiss federal, cantonal or municipal income taxes on gains realised on the sale (or foreign exchange gain on redemption) of a Bond on the due exercise of the conversion rights in respect of such Bond or on dividends paid in respect of Ordinary Shares, but it should be noted that the dividends are subject to Swiss withholding tax as outlined in Section (d) below.

(b) Investors resident in Switzerland

(i) **Income tax on Bonds**

Based on current practice, for Swiss federal income tax purposes Bonds held by private Swiss resident investors should be regarded as "non classical intransparent convertible bonds". For individuals resident in Switzerland and holding Bonds as a

private asset, all income derived from the bond (including interest, capital gains and foreign currency gains) will be subject to Swiss federal, cantonal and municipal taxes.

For Swiss resident corporations and individuals holding the Bonds as a business asset all gains or losses (the difference between the fair market value of the Bond at the date of sale and the book value of the bond reflected in the balance sheet) realised upon sale (or foreign exchange gain on redemption) of the Bonds would flow through the profit and loss account, and should therefore be taxable or tax deductible. Any interest payments on the Bonds would be subject to corporate income tax.

(ii) **Income tax on dividend distributions**

For individuals resident in Switzerland and holding Ordinary Shares as a private or business asset, dividends on Ordinary Shares and similar distributions of the Guarantor will be subject to Swiss federal, cantonal and municipal taxes. A Swiss corporate entity that owns at least 20 per cent. of the capital of the Guarantor or Ordinary Shares with a market value of at least CHF2 million may qualify for the participation exemption. Dividends and similar distributions received which qualify for the participation exemption, after certain expense allocations as defined by the applicable legislation, should be tax exempt, but it should be noted that the dividends will be subject to Swiss withholding tax as outlined in Section (d) below.

(iii) **Capital gains on disposal of Ordinary Shares**

An individual resident in Switzerland and holding Ordinary Shares as part of his private property will generally not be subject to any Swiss federal, cantonal or municipal income taxation on gains realised upon the sale or other disposal of Ordinary Shares. Private gains realised upon a repurchase of Ordinary Shares by the Guarantor or an entity held directly or indirectly by the Guarantor may, however, be re-characterised as taxable income if certain conditions are met. Gains realised on Ordinary Shares held as a business asset of a Swiss resident are included in the taxable income of such person.

Capital gains realised by a Swiss corporation owning at least 20 per cent. of the capital of the Guarantor may be exempt under the participation exemption subject to conditions. Any such corporation should seek its own professional advice on its tax position in respect of its holding of Ordinary Shares.

(c) Securities issue or transfer tax

According to the current practice of the Swiss Federal Tax Administration, there should be no one-time capital, securities transfer or similar taxes imposed by Switzerland in connection with the issue or redemption of the Bonds. Any sale of the Bonds or conversion of the Bonds into Preference Shares will be subject to Swiss Securities Transfer Tax *("Umsatzabgabe")* at the rate of 0.3 per cent., half payable for each party involved that does not identify itself as a Swiss securities dealer (being a registered securities dealer within the meaning of the Swiss Stamp Duty Law *("Stempelabgabengesetz")*, if such sale or conversion is made by or through a Swiss securities dealer and no exception applies. Furthermore, any exchange of Preference Shares for Ordinary Shares will be subject to Swiss Securities Transfer Tax at a current rate of 0.30 per cent., if that exchange is made by or through a Swiss securities dealer and no exception applies. Any subsequent sale of Ordinary Shares will be subject to Swiss Transfer Tax of 0.30 per cent. if the sale is made by or through a Swiss security dealer. In addition to the Swiss Securities Transfer Tax a transaction being performed by or through a member of the SWX may be subject to a stock exchange duty.

(d) Withholding tax

According to the current practice of the Swiss Federal Tax Administration, payments in respect of the Bonds by the Issuer should not be subject to Swiss withholding tax.

Dividends paid in respect of the Preference Shares should not be subject to Swiss withholding tax. Dividends paid by the Guarantor to holders of Ordinary Shares will be subject to Swiss withholding tax at the rate of 35 per cent. The withholding tax must be withheld by the Guarantor from the gross dividend distribution and must be paid to the Swiss Federal Tax Administration. The withholding tax

on dividends will be fully refundable for a Swiss resident recipient if he is the beneficial owner of the Ordinary Shares at the time of the payment and if he duly reports the gross dividend in his tax return. A recipient of a distribution of a dividend who is not a resident of Switzerland for tax purposes may be entitled to a full or partial refund of withholding tax under the provision of an applicable double tax treaty.

Holders of Ordinary Shares should consult their advisers concerning the reduction or refund of the Swiss withholding tax under an applicable tax treaty.

A recipient of a distribution by the Guarantor who is not a resident of Switzerland for tax purposes and does not hold the Ordinary Shares in connection with the conduct of a trade or business in Switzerland but qualifies as a resident of a country which maintains a bilateral treaty for the avoidance of double taxation with Switzerland may be entitled to a full or partial refund of withholding tax under the provisions of the applicable treaty, as described below in relation to UK resident shareholders. However, such non-resident shareholders should be aware that the rate of recoverable Swiss withholding tax and procedures for claiming treaty refunds (and the time required for obtaining a refund) may differ from country to country and may therefore differ from those described below. Such non-resident holders should consult their own tax advisers regarding the procedures for claiming any refund of the Swiss withholding tax under an applicable tax treaty.

(e) Reclaim procedures for UK resident shareholders

Three copies of Swiss tax form 86, duly completed, with covering vouchers, and signed, must be sent to the Inspector of Taxes in the United Kingdom to whom the claimant makes his income tax return (or the Inspector of Taxes for the district in which the claimant resides, if he has not made such a return) no later than 31 December of the third year following the calendar year in which the dividend became due. Rights to repayment in one calendar year must be claimed in a single claim. Two copies of the form will be sent by the Inspector of Taxes to the Federal Tax Administration of Switzerland, CH-3003 Berne.

The claim must be accompanied by evidence of deduction of Swiss withholding tax. In general, a certificate of deduction, signed bank voucher or credit slip will satisfy this requirement. However, the Swiss administration reserves the right to request further evidence and information.

The claim form may be filed by a representative on behalf of the beneficial owner, provided that the representative is formally authorised by a power of attorney (which must be attached to the form).

UK resident shareholders (other than corporations who control at least 25 per cent. of the voting power of a Swiss corporation) that are eligible for double taxation treaty benefits may reclaim four sevenths of the 35 per cent. withholding tax on dividends, leaving a net Swiss tax cost of 15 per cent.

HM Revenue and Customs announced on their website on 31 January 2006 and the Swiss Federal Tax Administration has published on their website on 27 January 2006 that agreement has been reached at official level on a proposed protocol to the UK-Switzerland double taxation treaty, under which pension funds of one state would be exempt from taxation in the other state on dividends paid by a resident of that other state. However, as that agreement is a non-binding understanding at official level only, it is not possible to determine whether or not the necessary legal steps will in fact be taken to create any such protocol and bring it into effect, or, if so, what further terms or qualifications it may contain.

Aruba

(a) Investors resident outside Aruba

Under current Aruba law, Bondholders residing outside Aruba and holders of the Preference Shares or Ordinary Shares (in either case provided they have not engaged in trade or business in Aruba through a permanent establishment or fixed place of business and are not subject to taxation in Aruba for any other reason) should not be liable to any Aruba income taxes on gains realised on the sale (or foreign exchange gain on redemption) of a Bond, a Preference Share or an Ordinary Share or on the due exercise of the conversion rights in respect of such Bond. Subscribing for Bonds should have no Aruba income tax consequences, whilst Aruba has no withholding tax on interest.

No stamp duties are payable in Aruba on the acquisition, ownership, redemption, sale, exchange or other disposal of Bonds or Preference Shares or Ordinary Shares.

(b) Investors resident of Aruba

Aruba resident holders of Bonds and/or Ordinary Shares and/or Preference Shares should consult their advisers concerning the taxation, reduction or refund of the Aruba (withholding) tax under local legislation.

(c) Tax treatment in Aruba of Issuer

The Issuer is performing so-called "exempt activities" under the revised legislation for Aruba Exempt Corporations. As a consequence, the Issuer is not subject to profit tax nor dividend withholding tax in Aruba on its activities as an Issuer or any activity related to that.

PART XVI — ADDITIONAL INFORMATION

1. Responsibility

Each of the Issuer and the Guarantor accepts responsibility for the information contained in these Listing Particulars. Having taken all reasonable care to ensure that such is the case, the information contained in these Listing Particulars is, to the best of the knowledge of each of the Issuer and the Guarantor, in accordance with the facts and contains no omission likely to affect its import.

2. Incorporation and registered office

Xstrata plc was incorporated and registered in England and Wales under the name Glassdesk Limited on 31 December 2001 with registered number 4345939 under the Companies Act as a private company with limited liability under the Companies Act. By a written resolution passed on 9 February 2002, the Guarantor resolved to change its name to Xstrata Limited. The change of name became effective on 18 February 2002. On 20 February 2002, the Guarantor re-registered as a public limited company under the Companies Act. The principal legislation under which the Guarantor operates is the Companies Act and the regulations made thereunder.

The Guarantor's registered office is at 4th Floor, Panton House, 25/27 Haymarket, London SW1Y 4EN, United Kingdom, telephone +44 20 7968 2800.

The Guarantor's head office is at Bahnhofstrasse 2, CH-6301 Zug, Switzerland, telephone +41 41 726 6070, which is also the business address of the Directors.

3. Listing

Application has been made to the Financial Services Authority for the Bonds to be admitted to the Official List. Application has been made to the London Stock Exchange for the Bonds to be admitted to trading on the Professional Securities Market of the London Stock Exchange. It is expected that admission of the Bonds to the Official List of the Financial Services Authority and admission to trading of the Bonds on the Professional Securities Market of the London Stock Exchange will be granted on or around 17 October 2006, subject to the issue of the Bonds. It is expected that dealings in the Bonds will commence on 17 October 2006.

The Guarantor has undertaken to use all reasonable endeavours to ensure that the Ordinary Shares issuable on conversion of the Bonds will be admitted to the Official List of the Financial Services Authority and the London Stock Exchange's main market for listed securities and to the SWX Swiss Exchange.

The listing of the Bonds on the Professional Securities Market of the London Stock Exchange will be expressed in US dollars as a percentage of their principal amount (exclusive of accrued interest). Transactions will normally be effected for settlement in US dollars for delivery on the third business day in London after the date of the transaction.

4. Authorisation

The Issuer and the Guarantor have each obtained all necessary consents, approvals and authorisations in connection with the issue and performance of the Bonds. The creation and issue of the Bonds has been authorised by a resolution of the Board of Directors of the Issuer dated 6 October 2006. The giving of the Bond Guarantee has been authorised by a resolution of the Board of the Guarantor dated 27 July 2006 and a resolution of a committee of the Board of the Guarantor dated 26 September 2006.

5. Clearing

The Bonds have been accepted for clearance through Euroclear and Clearstream, Luxembourg systems. The Common Code for the Bonds is 026790832. The International Securities Identification Number for the Bonds is XS0267908324. The address for Euroclear is 1 Boulevard du Roi Albert I, B-1210 Brussels, Belgium, and the address for Clearstream, Luxembourg is 42 Avenue JF Kennedy, L-1855, Luxembourg.

7. Changes in prospects, or financial and trading position

7.1 No material adverse change

There has been no material adverse change in the prospects of the Enlarged Xstrata Group since 31 December 2005 (being the date of the Guarantor's last published audited financial statements).

There has been no material adverse change in the prospects of the Issuer since 31 December 2005 (being the date of the Issuer's last published audited financial statements).

7.2 Significant change in Issuer

Other than as outlined in this paragraph 7.2 below, there has been no significant change in the financial or trading position of the Issuer since 31 December 2005 (being the end of the last financial period for which audited financial information had been published).

Subsequent to 31 December 2005, US$385,581,000 of the 2010 Convertible Bonds were converted at the option of the holders of those bonds into 385,581 Series 1 Preference Shares in the Issuer. These Series 1 Preference Shares were, in turn, immediately exchanged for 39,304,893 Ordinary Shares under the conversion mechanisms in place.

All available for sale assets (which primarily relate to the Ordinary Shares held by the Issuer through Batiss, purchased as part of the ECMP), recorded at 31 December 2005 have been sold for proceeds of US$1,337.7 million. All amounts recorded, at 31 December 2005, in other reserves for these assets will be released to the profit and loss account in 2006.

7.3 Significant change in Enlarged Xstrata Group

Other than as outlined in this paragraph 7.3 below, there has been no significant change in the financial or trading position of the Enlarged Xstrata Group since 30 June 2006 (being the end of the last financial period for which interim financial information had been published).

Falconbridge break fees

Following the expiry of the Inco Offer for Falconbridge on 28 July 2006, Falconbridge paid Inco a cash break fee of US$150 million on 1 August 2006 and, following the successful completion of the Xstrata Offer for Falconbridge, Falconbridge paid Inco a further cash break fee of US$300 million on 16 August 2006, in each case in accordance with the terms of the Inco Support Agreement.

Falconbridge Special Dividend

Falconbridge paid a special cash dividend of C$0.75 per Falconbridge Share on 10 August 2006 to Falconbridge Shareholders of record at the close of business on 26 July 2006, being cash payments of approximately C$278.1 million (approximately US$246.7 million) and approximately US$3.6 million in aggregate, of which approximately C$55.2 million (approximately US$49.0 million) was received by the Former Xstrata Group in respect of its Falconbridge Shares held on the record date.

Falconbridge Acquisition

On 28 July 2006, Xstrata Alberta purchased for cash 18,556,430 Falconbridge Shares through the TSX, representing approximately 5% of the then outstanding Falconbridge Shares, at an average price of C$62.25 per Falconbridge Share, or approximately C$1,155.1 million (approximately US$1,021.3 million) in aggregate.

On 15 August 2006, Xstrata Canada acquired for cash 257,700,100 Falconbridge Shares under the Xstrata Offer, representing approximately 67.8% of the then outstanding Falconbridge Shares, at the Xstrata Offer price of C$62.50 per Falconbridge Share, or approximately C$16,106.3 million (approximately US$14,290.0 million) in aggregate.

On 25 August 2006, Xstrata Canada acquired for cash 18,637,431 Falconbridge Shares under the Xstrata Offer, representing approximately 4.9% of the then outstanding Falconbridge Shares, at the Xstrata Offer price, or approximately C$1,164.8 million (approximately US$1,033.4 million) in aggregate.

Since the Xstrata Offer was accepted by holders of more than 90% of Falconbridge Shares, Xstrata has begun a compulsory acquisition process to acquire all outstanding Falconbridge Shares not already owned by Xstrata at the Xstrata Offer price of C$62.50 per Falconbridge Share. Xstrata now beneficially owns approximately 99.9% of the issued and outstanding Falconbridge Shares on a fully-diluted basis. Xstrata expects the compulsory acquisition process to conclude in early November 2006, after which Falconbridge will be a wholly-owned indirect subsidiary of Xstrata.

The market purchases of Falconbridge Shares and the Xstrata Offer were, and the compulsory acquisition procedure will be, financed by the Former Xstrata Group's existing cash resources and its debt facilities. The Guarantor has committed under the Standby Equity Underwriting Letter to undertake one or more equity capital raisings to refinance part of its debt facilities.

For further information on the impact of the Falconbridge Acquisition on the assets, liabilities and earnings of the Enlarged Xstrata Group, see Part IV of the Circular (pages 389 to 400 inclusive) and Part IV of the Second Circular (pages 59 to 62 inclusive), each of which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars.

ARM Coal

On 24 August 2006, the transaction announced by the Guarantor in February 2006 between the Former Xstrata Group and African Rainbow Minerals, to establish a new black controlled South African coal mining company called ARM Coal, completed. The transaction was valued in aggregate at approximately ZAR2.4 billion (approximately US$306 million). The Former Xstrata Group paid ZAR384 million (approximately US$49 million) to subscribe for 49% of the issued share capital of ARM Coal, which holds a 20% interest in the direct coal operations of Xstrata South Africa excluding the Goedgevonden project, and a direct 51% interest in the Goedgevonden project. In August 2006, ARM exercised an option to increase its direct interests in the coal operations of Xstrata South Africa (excluding the Goedgevonden project) for a cash investment of ZAR400 million (approximately US$51 million). As a result, historically disadvantaged South Africans will now control approximately 36% of the Enlarged Xstrata Group's South African coal business. The Former Xstrata Group also provided debt funding of ZAR765 million (approximately US$98 million) to ARM Coal to acquire the 51% interest in the Goedgevonden project.

Redemption of Falconbridge preference shares

Falconbridge announced on 15 September 2006 its intention to redeem its outstanding Cumulative Redeemable Preferred Shares, Series F and Series G, and Cumulative Preferred Shares, Series 1 (together, the "Redeemed Shares"). Falconbridge will redeem all of the outstanding Redeemed Shares on 1 November 2006 as follows: each Series F share will be redeemed for C$25.50 in cash, each Series G share will be redeemed for C$25.00 in cash and each Series 1 share will be redeemed for C$10.00 in cash, plus accrued and unpaid dividends in respect of each share up to, but excluding, 1 November 2006. Falconbridge intends to utilise its internal cash resources to fund the aggregate redemption price of approximately C$306 million (approximately US$272 million).

Rights Issue

On 3 October 2006, Xstrata announced and commenced the Rights Issue. For further information in relation to the Rights Issue, see Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — Rights Issue and Prospectus" of these Listing Particulars.

8. Auditor

The consolidated financial statements of the Guarantor have been audited without qualification for the two financial years ended 31 December 2005 by Ernst & Young LLP, which is registered by the Institute of Chartered Accountants in England and Wales to carry out audit work.

9. Equity capital management programme

The Enlarged Xstrata Group has in place an equity capital management programme ("ECMP"). Under the ECMP, up to 10% of the issued share capital of the Guarantor can be purchased in the market by Batiss Investments Limited ("Batiss"), a Guernsey registered entity owned by a charitable trust, which is independent of the Enlarged Xstrata Group.

9.1. Purchasing activity

As part of the ECMP, Batiss has entered into an option agreement with the Issuer, a wholly-owned subsidiary within the Enlarged Xstrata Group, whereby Batiss grants to the Issuer a right to require Batiss to sell the Ordinary Shares purchased to a third party (other than a subsidiary of the Guarantor), as nominated by the Issuer, at an exercise price of 1p per share.

Under the option agreement, the Issuer pays Batiss a premium for this right, the premium being the equivalent of the market price paid by Batiss for the Ordinary Shares plus associated costs less the 1p exercise price. This premium payment, together with funds from a subscription by the Issuer for non-voting redeemable preference shares in Batiss, provides the funding for Batiss to acquire the Ordinary Shares in the market. These payments are sourced from the existing and future cash resources of the Issuer.

The Issuer is able to exercise its right under the option agreement for a period of six years from the date of each purchase. Batiss waives its right to receive dividends on Ordinary Shares which it holds from time to time.

During the financial year ended 31 December 2005, 26.1 million Ordinary Shares were purchased under the ECMP for US$522 million, bringing the total purchases under the ECMP to 31 December 2005, to 29 million Ordinary Shares (approximately 4.7% of the Guarantor's issued ordinary share capital) at an average cost of £10.72 per Ordinary Share. No Ordinary Shares were sold under the ECMP during that period. However, Batiss sold 29,450,976 Ordinary Shares in connection with the Placing announced on 17 May 2006. As at 11 October 2006 (being the latest practicable date prior to the publication of these Listing Particulars), Batiss held no Ordinary Shares.

9.2. Conduct and disclosure of purchases

Purchases of Ordinary Shares under the ECMP are made in the market at prices not exceeding 105% of the average middle-market closing price of the Ordinary Shares over the previous five days, as derived from the London Stock Exchange Daily Official List. The purchasing activity of Batiss is conducted and disclosed in keeping with existing regulation governing UK corporate share repurchases.

9.3. Future application of Ordinary Shares held by Batiss

The proceeds from the sale of the 29,450,976 Ordinary Shares sold by Batiss in connection with the Placing were used by the Former Xstrata Group to repay a portion of the debt incurred in relation to the acquisition of the initial stake of approximately 19.9% in Falconbridge and the Cerrejón Acquisition.

The Issuer intends that Ordinary Shares held by Batiss under the ECMP in the future will either be used by the Enlarged Xstrata Group as a source of financing for future acquisitions, in keeping with the Enlarged Xstrata Group's growth strategy, or placed in the market. Batiss waives its right to receive any dividends on, and does not exercise voting rights attaching to, Ordinary Shares held by it from time to time.

If the Ordinary Shares price rises, the Issuer would profit on a future placing to the extent that the price realised for the Ordinary Shares in the market exceeds the original market price paid plus associated funding costs.

The Issuer and the Guarantor will consider in the future whether any Ordinary Shares held by Batiss will be acquired by the Guarantor. Any repurchase of Ordinary Shares by the Guarantor would be subject to the approval of Shareholders and to appropriate clearance being obtained from the Swiss tax authorities.

The decision when to place the Ordinary Shares in the market, use the Ordinary Shares to assist the Enlarged Xstrata Group in facilitating future transactions or to repurchase Ordinary Shares for cancellation will be considered in light of the Enlarged Xstrata Group's funding requirements and capital structure at the time.

9.4. Accounting treatment

While Ordinary Shares are held by Batiss under the ECMP, they are disregarded for the purposes of calculating earnings per Ordinary Share. Batiss is consolidated by the Guarantor as a quasi-subsidiary, and Ordinary Shares held by it are accounted for as a deduction from shareholders' funds in the Guarantor's consolidated balance sheet.

Where Ordinary Shares held by Batiss are subsequently disposed of by way of a placing or as consideration for an acquisition by the Enlarged Xstrata Group, any gain or loss is taken directly to the Enlarged Xstrata Group's reserves to the extent that the market value of the Ordinary Shares so disposed is above or below the cost of those Ordinary Shares. No gain or loss is recognised in the Guarantor's consolidated profit and loss account.

If Ordinary Shares held by Batiss are repurchased and cancelled by the Guarantor, this would be accounted for in the Guarantor's consolidated financial statements as though it had occurred at the time of the purchase of the Ordinary Shares by Batiss.

10. Summary of the memorandum and articles of association of the Guarantor and mandatory takeover bids, squeeze-out and sell-out rules

10.1. Memorandum of association

The memorandum of association of the Guarantor provides that its principal object is to carry on the business of a holding company. The objects of the Guarantor are set out in full in clause 4 of its memorandum of association, which is available for inspection at the address as set out in paragraph 19 of this Part XVI.

10.2. Articles of association

(a) The Articles were adopted pursuant to a special resolution of the Guarantor passed on 19 March 2002 and amended by a special resolution of the Guarantor passed on 9 May 2005.

(b) The Articles have been drafted so that certain rights that are inalienable under Swiss law and that holders of Xstrata AG Shares enjoyed prior to the Xstrata IPO are preserved in the Guarantor subject to the following arrangements. Under English law, the Articles can always be amended by a special resolution (requiring a 75% majority of those present and voting, in person or by proxy). Consequently, a special voting share has been created which carries weighted voting rights sufficient to defeat any resolution which would amend certain of the Articles ("Entrenched Rights Actions"). The holder of the special voting share, The Law Debenture Trust Corporation p.l.c. (the "Trustee Company"), has agreed under a voting agreement with the Guarantor (the "Voting Agreement"), to exercise its votes to vote against (and so defeat) any resolution to amend or remove an Entrenched Rights Action except in limited circumstances as described in paragraph 10.14 of this Part XVI. This structure has the effect of entrenching certain rights into the Articles.

(c) These rights include the following:

(i) the right not to have changes made to the Articles which would cause a member to cease to be a member or take away a member's rights to speak and vote at general meetings, to be paid a dividend if one is declared and to receive liquidation proceeds on a winding up;

(ii) the right of shareholders to requisition a general meeting (if they hold Ordinary Shares whose nominal value is equivalent to CHF1 million or more);

(iii) the right to at least 20 clear days' notice of all shareholder meetings;

(iv) the right to have satellite general meetings in Switzerland if the general meeting is not held in Switzerland;

(v) the right of members to appoint directors and alternate directors;

(vi) the right not to have membership withdrawn by consolidation of share capital;

(vii) a provision in a proxy appointment includes the right to demand a poll and confers the right to speak at a meeting;

(viii) the right to inspect records;

(ix) the right to a special examination of the transactions and other matters affecting shareholder rights; and

(x) a provision requiring the publication of notices relating to the Guarantor in the Swiss Commercial Gazette and at least one leading Swiss newspaper.

10.3. Share rights

(a) Subject to the provisions of the Companies Acts (as defined in the Articles) and without prejudice to any rights attached to any existing shares or class of shares, any share may be issued with such rights or restrictions as the Guarantor may by ordinary resolution determine or, subject to and in default of such determination, as the Board may determine.

(b) Subject to the Articles and to the Companies Acts (as defined in the Articles), and without prejudice to any rights attaching to any existing shares or class of shares, the Board may issue any shares which are to be redeemed, or which at the option of the Guarantor or the holder are liable to be redeemed. The unissued shares of the Guarantor (whether forming part of the original or any increased capital) are at the disposal of the Board.

10.4. Voting rights

(a) Subject to the rights and restrictions attached to any class of shares:

(i) on a show of hands, every member present in person or by proxy has one vote (save that neither the holder of the special voting share nor any holder of deferred share(s) shall be entitled to vote) and a proxy appointed by a member on behalf of such member's shareholding shall also have one vote;

(ii) on a poll:

(A) every member present in person or by proxy (except the holder of the special voting share and any holder of the deferred shares) shall have:

(i) one vote for each fully paid share; and

(ii) for each partly-paid share, such proportion of the votes attached to a fully paid share as would mean that such proportion is the same as the proportion of the amount paid up on the total issue price of that share;

(B) the holder of the special voting share shall, on an Entrenched Rights Action, have enough votes to defeat the resolution but, on all other decisions, shall have no votes; and

(C) the holders of the deferred shares shall not be entitled to vote.

(iii) unless the Board determines otherwise, a member who has been served with a direction notice after failure (whether by such member or by another person) to provide the Guarantor with information concerning interests in those shares required to be provided under the Companies Act, shall (for so long as the information is not supplied and for up to 14 days thereafter) not be entitled to vote in respect of the shares in relation to which the information has not been supplied.

10.5. Dividends and other distributions

(a) Subject to the provisions of the Companies Acts (as defined in the Articles), the Guarantor may by ordinary resolution declare dividends in accordance with the respective rights of the members, but no dividend shall exceed the amount recommended by the Board. The dividend shall be paid according to the amounts paid on shares in respect of which the dividend is

paid, but no amount paid on a share in advance of calls shall be treated for these purposes as paid on the share. The special voting share and the deferred shares shall not carry the right to receive a dividend.

(b) Subject to the provisions of the Companies Acts (as defined in the Articles), the Board may pay interim dividends if it appears to the Board that they are justified by the profits of the Guarantor available for distribution.

(c) The Board may also pay at intervals determined by it any dividend at a fixed rate if it appears to the Board that the profits available for distribution justify the payment. If the Board acts in good faith it shall not incur any liability to the holders of shares conferring preferred rights for any loss they may suffer by the lawful payment of an interim dividend on any shares having deferred or non-preferred rights.

(d) No dividend or other moneys payable in respect of a share shall bear interest against the Guarantor unless otherwise provided by the rights attached to the share.

(e) The Board may withhold payment from a person of any dividend in respect of shares in the Guarantor if those shares represent at least a 0.25% interest in the Guarantor's shares or any class thereof and if, in respect of those shares, such person has been served with a direction notice after failure (whether by such person or by another) to provide the Guarantor with information concerning interests in those shares required to be provided under the Companies Act (as defined in the Articles).

(f) Except as otherwise provided by the rights attached to any class of shares, all dividends will be declared and paid according to the amounts paid-up on the shares during any portion of the period in respect of which the dividend is paid.

(g) The Board may, if authorised by an ordinary resolution of the Guarantor, offer any holder of shares the right to elect to receive shares by way of scrip dividend instead of cash in respect of the whole (or some part, to be determined by the Board) of any dividend.

(h) Any dividend which has remained unclaimed for 12 years from the date when it became due for payment shall, if the Board so resolves, be forfeited and cease to remain owing by the Guarantor.

(i) Except as provided by the rights and restrictions attached to any class of shares (as to which see paragraph 10.7 below), the holders of the Guarantor's shares will under general law be entitled to participate in any surplus assets in a winding up in proportion to their shareholdings. A liquidator may, with the sanction of an extraordinary resolution and any other sanction required by the Insolvency Act 1986, divide among the members in specie the whole or any part of the assets of the Guarantor and may, for that purpose, value any assets and determine how the division shall be carried out as between the members or different classes of members.

10.6. Variation of rights

Except as set out in paragraphs 10.2 and 10.14 in the case of an Entrenched Rights Action and subject to the provisions of the Companies Acts (as defined in the Articles), rights attached to any class of shares may be varied or abrogated in such manner (if any) as may be provided by those rights, or in the absence of any provision, either with the written consent of the holders of not less than three-fourths in nominal value of the issued shares of that class, or the sanction of an extraordinary resolution passed at a separate general meeting of the holders of those shares.

10.7. Rights of holders of deferred shares

The holders of deferred shares shall not have the right to receive notice of any general meeting of the Guarantor nor the right to attend, speak or vote at any such general meeting. The deferred shares have no rights to dividends and, on a winding-up or other return of capital entitle the holder only to the repayment of the amounts paid upon such shares after repayment of the nominal amount paid up on the Ordinary Shares, the nominal amount paid up on the special voting share plus the payment of £100,000 per Ordinary Share. The Guarantor has irrevocable authority at any time to appoint any person to execute on behalf of the holders of any deferred shares a transfer of and/or an agreement to transfer the deferred shares to such persons as the Guarantor may determine as

custodian of the shares and/or purchase or cancel the deferred shares (in accordance with the provisions of the Companies Act) in any such case for not more than £1 for each share being transferred, purchased or cancelled to be paid to the registered relevant holder of the shares without obtaining the sanction of the holder or holders of the deferred shares for such a transfer and/or acquisition and, pending such transfer and/or acquisition, to retain the certificate for such deferred shares. The Guarantor may, at its option, redeem all of the deferred shares in issue at any time (but subject to the minimum capital requirement of the Companies Act) at a price not exceeding £1 for each share redeemed to be paid to the relevant registered holdings of the shares. The Guarantor must provide the holders of the deferred shares with not less than 28 days' notice in writing of its intention to do so, fixing a time and place for the redemption.

10.8. Transfer of shares

(a) A member may transfer all or any of his certificated shares by an instrument of transfer in any usual form or in any other form, which the Board may approve. An instrument of transfer shall be signed by or on behalf of the transferor and, unless the share is fully paid, by or on behalf of the transferee. An instrument of transfer need not be under seal.

(b) The Board may, in its absolute discretion and without giving any reason, refuse to register the transfer of a certificated share which is not a fully paid share, provided that the refusal does not prevent dealings in shares of that class in the Guarantor from taking place on an open and proper basis. The Board may also refuse to register the transfer of a certificated share unless the instrument of transfer:

  (i) is lodged, duly stamped (if stampable), with the Guarantor and (except where the shares are registered in the name of a recognised person (as defined in the Articles) and no certificate shall have been issued therefor) is accompanied by the relevant share certificate and such other evidence of the right to transfer as the Board may require;

  (ii) is in respect of one class of share only; and

  (iii) is in favour of not more than four persons.

(c) The Board may refuse to register a transfer of shares in the Guarantor by a person if those shares represent at least a 0.25% interest in the Guarantor's shares or any class thereof and if, in respect of those shares, such person has been served with a direction notice after failure (whether by such person or by another) to provide the Guarantor with information concerning interests in those shares required to be provided under the Companies Act, unless (i) the transfer is an approved transfer (as defined in the Articles), (ii) the relevant member is not himself in default as regards supplying the information required and certifies that no person in default as regards supplying such information is interested in any of the shares the subject of the transfer, or the transfer of the shares is required to be registered by the CREST Regulations.

(d) Notice of refusal to register a transfer must be sent to the transferee within two months after the date on which the instrument of transfer was lodged with the Guarantor or the instruction to transfer shares was received by the Guarantor from the Operator of a Relevant System (in each case, as defined in the CREST Regulations), as the case may be.

(e) No fee shall be charged for the registration of any instrument of transfer or other document relating to or affecting the title to any share.

(f) Shares may be transferred by means of a Relevant System, including the Relevant System of which CRESTCo Limited is the Operator (in each case, as defined in the CREST Regulations).

(g) The Board shall decline to register any transfer of the special voting share except where permitted in accordance with the Voting Agreement in place between the Guarantor and the holder of the special voting share. The Voting Agreement is described in paragraph 10.14 below.

(h) Save as provided above or as required by the Companies Act or other applicable law, the Guarantor shall not impose restrictions on the transfer of shares.

10.9. Alteration of share capital

The Guarantor may from time to time by ordinary resolution increase, consolidate and divide or, subject to the Companies Acts (as defined in the Articles), subdivide its share capital. The Guarantor may by ordinary resolution also cancel any shares which have not, at the date of the resolution, been taken or agreed to be taken by any person and diminish the amount of its authorised share capital by the amount of the shares so cancelled. Subject to the provisions of the Companies Acts (as defined in the Articles), the Guarantor may by special resolution reduce its share capital, capital redemption reserve and share premium account in any way.

10.10. General meetings

All general meetings of the Guarantor other than annual general meetings shall be called extraordinary general meetings. The Board shall convene and the Guarantor shall hold general meetings as annual general meetings in accordance with the requirements of the Companies Act.

The Board may call general meetings whenever and at such times and places as it shall determine. On the requisition of members pursuant to the provisions of the Companies Act, the Board shall promptly convene an extraordinary general meeting in accordance with the requirements of the Companies Act.

In addition to the rights granted to members under Section 376 of the Companies Act (to have members' resolutions circulated), the Guarantor shall on the requisition in writing of a member or members holding a number of ordinary shares whose total nominal value (based on prevailing exchange rates at the time such a request is made) is not less than the equivalent of CHF 1 million and, at the expense of the requisitionists, give to members of the Guarantor entitled to receive notice of general meetings notice of any resolution which may properly be moved and is intended to be moved at an annual general meeting by such requisitionists. The Guarantor is not bound to give notice of a resolution unless a copy of the requisition signed by the requisitionists is deposited at the registered office of the Guarantor not less than six weeks before the relevant annual general meeting.

Subject to the provisions of the Companies Act and the Articles, each member of the Guarantor is entitled to attend a general meeting. The board may resolve to enable persons entitled to attend a general meeting to do so by simultaneous attendance and participation at a satellite meeting place anywhere in the world. If a general meeting is not held in Switzerland then arrangements will be made for a satellite meeting place in Switzerland.

10.11. Special voting share

The special voting share does not carry a right to receive dividends, has rights to vote in certain circumstances and carries a right to no more than the amount of capital paid up on such a share in the event of liquidation. As noted below, the special voting share carries enough votes to defeat any resolution deemed to be an Entrenched Rights Action. The special voting share will be redeemable by the Guarantor on termination of the Voting Agreement.

10.12. Entrenched rights action

If the Guarantor proposes to take an Entrenched Rights Action, such action shall require, approval by a special resolution passed at a general meeting. The holders of the Ordinary Shares and the holder of the special voting share are entitled to vote as a single class on a poll. On such a resolution, the holder of the special voting share shall have sufficient votes to defeat the resolution. Entrenched Rights Actions are described in paragraph 10.2 above.

10.13. Mandatory takeover bids, squeeze-out and sell-out rules

As of 20 May 2006, the City Code applies to the Guarantor and the provisions of the Articles designed to replicate certain provisions of the City Code whilst the City Code did not apply to the Guarantor no longer apply. (Such provisions in the Articles contained certain takeover protections which were designed to ensure that no person acquired 30% or more of the Guarantor's voting rights or, if they already held more than 30% (but less than 50%) of the Guarantor's voting rights, acquired any additional voting rights, without making a cash offer to all Shareholders.)

Other than as provided by the Takeovers Directive (Interim Implementation) Regulations 2006 and the City Code, there are no rules or provisions relating to mandatory bids and/or squeeze-out and/or sell-out rules in relation to the Ordinary Shares.

10.14. The Voting Agreement

The Voting Agreement provides that the Trustee Company will vote against any Entrenched Rights Actions unless:

(a) in the opinion of counsel such resolutions can be passed without derogating in any material respect from the rights which the former Xstrata AG shareholders would enjoy if the shares in the Guarantor were shares in a company incorporated in Switzerland; or

(b) in the opinion of counsel such resolutions would be permitted in relation to a merger between a Swiss corporation (Aktiengesellschaft) and an English plc under Swiss law and practice then in force and applicable, were the merger to take place at the time of the proposed resolutions; or

(c) the Guarantor has certified to the Trustee Company that after having invited all shareholders to object, no shareholder has objected to the adoption of the resolution or has voted against it.

The Voting Agreement is terminable and may be amended under certain limited circumstances including in circumstances broadly comparable to those mentioned in paragraphs 10.14(a) and (b) above.

10.15. Directors

(a) Appointment of directors

Unless otherwise determined by ordinary resolution, the number of directors (other than alternate directors) shall be not less than two. Directors may only be appointed by the Guarantor by ordinary resolution and not by the board of directors.

(b) Age of directors

The provisions of the Companies Act with regard to "Age limit for directors" shall not apply to the Guarantor but where the board of directors convenes any general meeting of the Guarantor at which (to the knowledge of the board of directors) a director will be proposed for appointment or re-appointment who at the date for which the meeting is convened will have attained the age of 70 or more, the board of directors shall give notice of his age in years in the notice convening the meeting.

(c) No share qualification

A director shall not be required to hold any shares in the capital of the Guarantor by way of qualification.

(d) Retirement of directors by rotation

At every annual general meeting of the Guarantor, one-third of the directors or if their number is not three or a multiple of three, the number nearest to one-third, but at least one, will retire by rotation. The directors to retire will be those who have been longest in office. Any director who has at the start of the annual general meeting been in office for more than three years since his last appointment or re-appointment shall retire at the annual general meeting. As between those who were appointed or re-appointed on the same day, those to retire will be (unless they otherwise agree) determined by lot. A retiring director shall be eligible for re-election.

(e) Remuneration of directors

(i) The emoluments of any director holding executive office for his services as such shall be determined by the board of directors, and may be of any description.

(ii) The ordinary remuneration of the directors who do not hold executive office for their services (excluding amounts payable under any other provision of the Articles) shall not exceed in aggregate £1 million per annum or such higher amount as the Guarantor

may from time to time by ordinary resolution determine. Subject thereto, each such director shall be paid a fee for their services (which shall be deemed to accrue from day to day) at such rate as may from time to time be determined by the board of directors. In addition, any director who does not hold executive office and who performs services, which in the opinion of the board of directors are outside the scope of the ordinary duties of a director, may be paid such extra remuneration as the board of directors may determine.

(iii) In addition to any remuneration to which the directors are entitled under the Articles, they may be paid all

(iv) travelling, hotel and other expenses properly incurred by them in connection with their attendance at meetings of the board of directors or committees of the board of directors, general meetings or separate meetings of the holders of any class of shares or of debentures of the Guarantor or otherwise in connection with the discharge of their duties.

(iv) The board of directors may provide benefits, whether by the payment of gratuities or pensions, insurance or otherwise, for any past or present director or employee of the Guarantor or any of its subsidiary undertakings or any body corporate associated with, or any business acquired by, any of them, and for any member of his family or any person who is or was dependent on him.

(f) Permitted interests of directors

Subject to the provisions of the Companies Act, and provided that he has disclosed to the board of directors the nature and extent of any material interest of his, a director notwithstanding his office:

(i) may be a party to, or otherwise interested in, any transaction or arrangement with the Guarantor or in which the Guarantor is otherwise interested;

(ii) may act by himself or his firm in a professional capacity for the Guarantor (otherwise than as auditor), and he or his firm shall be entitled to remuneration for professional services as if he were not a director;

(iii) may be a director or other officer of, or employed by, or a party to any transaction or arrangement with, or otherwise interested in, any body corporate promoted by the Guarantor or in which the Guarantor is otherwise interested; and

(iv) shall not, by reason of his office, be accountable to the Guarantor for any benefit which he derives from any such office or employment, or from any such transaction or arrangement, or from any interest in any such body corporate, and no such transaction or arrangement shall be liable to be avoided on the ground of any such interest or benefit.

The Guarantor is also subject to the additional requirements applicable to transactions with related parties imposed by the Listing Rules. This may result in a transaction or arrangement referred to in sub-paragraph (i) requiring, amongst other things, shareholder approval.

(g) Restrictions on voting

Except as otherwise provided in the Articles, a director shall not vote at a meeting of the board of directors or a committee of the board of directors on any resolution of the board of directors concerning a matter in which he has an interest which (together with any interest of any person connected with him) is to his knowledge material, unless his interest arises only because the resolution concerns one or more of the following matters:

(i) the giving of a guarantee, security or indemnity in respect of money lent or obligations incurred by him or any other person at the request of, or for the benefit of, the Guarantor or any of its subsidiary undertakings;

(ii) the giving of a guarantee, security or indemnity in respect of a debt or obligation of the Guarantor or any of its subsidiary undertakings for which the director has assumed responsibility (in whole or part and whether alone or jointly with others) under a guarantee or indemnity or by the giving of security;

(iii) a contract, arrangement, transaction or proposal concerning an offer of shares, debentures or other securities of the Guarantor or any of its subsidiary undertakings for subscription or purchase, in which offer he is or may be entitled to participate as a holder of securities or in the underwriting or sub-underwriting of which he is to participate;

(iv) a contract, arrangement, transaction or proposal concerning any other body corporate in which he or any person connected with him is interested, directly or indirectly, and whether as an officer, shareholder, creditor or otherwise, if he and any persons connected with him do not to his knowledge hold an interest (as that term is used in sections 198 to 211 of the Companies Act) representing 1% or more of either any class of the equity share capital (excluding any shares of that class held as treasury shares) of such body corporate (or any other body corporate through which his interest is derived) or of the voting rights available to members of the relevant body corporate (any such interest being deemed for such purpose to be a material interest in all circumstances);

(v) a contract, arrangement, transaction or proposal for the benefit of employees of the Guarantor or of any of its subsidiary undertakings which does not award him any privilege or benefit not generally accorded to the employees to whom the arrangement relates; and

(vi) a contract, arrangement, transaction or proposal concerning any insurance which the Guarantor is empowered to purchase or maintain for, or for the benefit of, any directors or for persons who include directors.

The Guarantor may by ordinary resolution suspend or relax to any extent, either generally or in respect of any particular matter, any provision of the Articles prohibiting a director from voting at a meeting of directors or of a committee of directors.

(h) Borrowing powers

The board of directors may exercise all the powers of the Guarantor to borrow money, to guarantee, to indemnify, to mortgage or charge its undertaking, property, assets (present and future) and uncalled capital, and to issue debentures and other securities whether outright or as collateral security for any debt, liability or obligation of the Guarantor or of any third party. There is no requirement on the directors to restrict the borrowings of the Guarantor or its subsidiaries.

(i) Indemnity of directors

Subject to the provisions of the Companies Acts, but without prejudice to any indemnity to which the person concerned may otherwise be entitled, every director or other officer of the Guarantor (other than any person (whether an officer or not) engaged by the Guarantor as auditor) shall be indemnified out of the assets of the Guarantor against any liability incurred by him for negligence, default, breach of duty or breach of trust in relation to the affairs of the Guarantor, provided that such person shall not be entitled to such indemnification to the extent that it would cause the relevant provision of the Articles providing for such indemnification, or any element of it, to be treated as void under the Act or otherwise under the Companies Acts.

(j) Xstrata dividends

The board of directors may declare dividends of a cumulative or non-cumulative nature.

11. Directors and major Shareholders

11.1 Directors' conflicts of interest

Mr. Strothotte and Mr. Glasenberg are Directors nominated by Glencore International. Therefore, potential conflicts of interest may arise between the duties owed by such Directors to the Guarantor and their duties to Glencore. The Relationship Agreement between the Guarantor and Glencore regulates the ongoing relationship between them, as described in Part I — "Description of the Enlarged Xstrata Group — Relationship with Glencore — Relationship with controlling shareholder" of these Listing Particulars.

In particular under the Relationship Agreement, directors of the Guarantor nominated by Glencore International are not permitted, unless the independent directors agree otherwise, to vote on any resolutions of the Guarantor's board of directors to approve any aspect of the Guarantor's involvement in or enforcement of any arrangements, agreements or transactions with any member of Glencore.

There are no other potential conflicts of interests between any duties to the Guarantor of the Guarantor's directors and their private interests and/or other duties.

11.2 Interests of major Shareholders

Interests of major Shareholders

Interests for the purposes of the Companies Act

Insofar as is known to the Guarantor, the name of each person who, directly or indirectly, has an interest in the Guarantor's ordinary share capital which is notifiable under Part VI of the Companies Act, and the amount of such person's interest, as at 11 October 2006 (being the latest practicable date prior to the publication of these Listing Particulars) are as follows:

	Ordinary Shares	
Name	No.	%
Credit Suisse Securities (Europe) Limited[1]	153,426,890	21.69
Glencore International AG[1]	101,040,400	14.28
AXA Investment Managers UK Limited[2]	1,518,658	0.21

[1] As a result of their participation in a capital management programme entered into by Glencore International, CSFB Equities and CSSEL in connection with the Former Xstrata Group's acquisition of MIM and the MIM Rights Issue (the "Arrangement"), Glencore International, CSFB Equities and CSSEL are jointly interested in 254,467,290 Ordinary Shares, representing approximately 35.97% of the current issued ordinary share capital of the Guarantor. The Guarantor was notified by Credit Suisse Group on 5 October 2006 that: (i) 1,854,480 of the Ordinary Shares held by CSSEL, representing approximately 0.26% of the current issued ordinary share capital of the Guarantor, were in the course of settlement at the relevant time in the notification; and (ii) Credit Suisse Group has additional interests in a further 12,306,069 Ordinary Shares, representing approximately 1.74% of the current issued ordinary share capital of the Guarantor. Under its terms, the Arrangement will terminate on 2 December 2006.

[2] AXA Investment Managers UK Limited ("AXA") notified the Guarantor on 20 September 2006 that AXA holds a beneficial interest in 1,518,658 Ordinary Shares or approximately 0.21% of the current issued ordinary share capital of the Guarantor and a non-beneficial interest in 75,073,778 Ordinary Shares or approximately 10.61% of the current issued ordinary share capital of the Guarantor. In total, AXA is therefore deemed to have an interest in 76,592,436 Ordinary Shares, representing approximately 10.83% of the current issued ordinary share capital of the Guarantor.

Insofar as is known to the Guarantor, the Guarantor is not directly or indirectly owned or controlled by another corporation, foreign government, or any other natural or legal person, severally or jointly.

Insofar as is known to the Guarantor, immediately following the New Shares Issue, the interests of those persons, set out above with an interest in the Guarantor's ordinary share capital which is notifiable under Part VI of the Companies Act, and the amount of such persons' interests, including as a percentage of the Enlarged Share Capital, (assuming full take up by such persons of their entitlements under the Rights Issue (and, in the case of CSSEL'S entitlements in respect of 151,560,600 Ordinary Shares, full take up by Glencore International of such entitlements) and no options granted under the Xstrata Share Schemes, no exchange rights under the Glencore Exchangeable Bonds and no conversion rights under the 2010 Convertible Bonds or the 2017 Convertible Bonds are exercised between 11 October 2006 (being the latest practicable date prior to the publication of these Listing Particulars) and the completion of New Shares Issue), will be as follows:

	Ordinary Shares	
Name	No.	%
Credit Suisse Securities (Europe) Limited[1]	154,048,986	16.33
Glencore International AG[1]	185,240,733	19.64
AXA Investment Managers UK Limited[2]	2,042,877	0.21

[1] See note 1 to the table above. As a consequence of the Arrangement, Glencore International, CSFB Equities and CSSEL will, following the New Shares Issue, be jointly interested in 339,289,719 Ordinary Shares, representing 35.97% of the Enlarged Share Capital.

[2] See note 2 to the table above.

None of the major Shareholders referred to above has different voting rights from other Shareholders.

11.3 Other directorships and partnerships

The Directors hold or have held in the past five years the following directorships, in addition to their directorships of Enlarged Xstrata Group companies, and are or were members of the following partnerships:

12. Material contracts

The following contracts are the only contracts (not being contracts entered into, or expected to be entered into, in the ordinary course of business) that have been entered into, or are expected to be entered into shortly after the date of these Listing Particulars, by the Guarantor or any member of the Enlarged Xstrata Group be entered into which could result in any member of the Enlarged Xstrata Group being under an obligation or entitlement that is material to the Enlarged Xstrata Group as at the date of these Listing Particulars:

(a) The Trust Deed expected to be dated 13 October 2006 between the Issuer, the Guarantor and Law Debenture Trustees Limited as Trustee, *inter alia*, constituting the Bonds and appointing the Trustee to act in that capacity and under which such commission in respect of the services of the Trustee as shall be agreed between the Issuer, the Guarantor and the Trustee are to be paid.

(b) The Paying, Transfer, Conversion and Exchange Agency Agreement expected to be dated 13 October 2006 between the Issuer, the Guarantor, Citibank, N.A., Citigroup Global Markets Deutschland AG & Co. KGaA, Frankfurt and the Trustee setting out, *inter alia*, the terms of appointment and duties of Citibank, N.A. in its capacity as Principal Paying, Transfer, Conversion and Exchange Agent and under which such commissions in respect of the services of the agents as shall be agreed between them and the Issuer and the Guarantor are to be paid.

(c) The Subscription Agreement expected to be dated 12 October 2006 between the Issuer, the Guarantor and Trilon International Inc. (the "Purchaser"). Relying on certain representations and warranties, and subject to certain conditions (including the admission of the Bonds to the Official List and the admission of the Bonds to trading on the Professional Securities Market of the London Stock Exchange), the Issuer has agreed to issue, and the Purchaser has agreed to subscribe for, the Bonds in consideration for the cancellation of the 2017 Convertible Debenture, the waiver of all rights Trilon International Inc. has under the 2017 Convertible Debenture and the Debenture Deed Poll, and the release of the Issuer and the Guarantor from each of their respective obligations under the 2017 Convertible Debenture and the Debenture Deed Poll. The Issuer has also agreed to pay accrued interest on the 2017 Convertible Debenture.

(d) The Deed Poll (which is expected to be dated 13 October 2006)

(e) The Keep-Well Agreement expected to be dated 13 October 2006 between the Issuer and the Guarantor pursuant to which the Guarantor undertakes that if the Issuer at any time has insufficient liquid assets or other resources to meet any payment obligation in respect of the Bonds or otherwise as at the date at which any or all such obligations become payable, then the Issuer will promptly notify the Guarantor in writing of the shortfall and the Guarantor shall make sufficient funds available (or procure that the same are made available) to the Issuer,

within 14 days of such payment obligation becoming due, to enable the Issuer to fulfil such payment obligation in full. The Keep-Well Agreement is not a guarantee by the Guarantor of the payment of any indebtedness, liability or obligation of the Issuer. The only parties to the Keep-Well Agreement are the Issuer and the Guarantor and holders of the Bonds are not parties to it. Consequently, the Keep-Well Agreement does to confer to any holders of Bonds any rights or claims against the Guarantor. The Keep-Well Agreement will not be enforceable against the Guarantor by anyone other than the Issuer (and/or its trustee, receiver, liquidator or administrator in the event of a bankruptcy or, as the case may be, moratorium).

(f) The Underwriting Agreement dated 3 October 2006 between Xstrata and the Banks for the underwriting of the Rights Issue.

Pursuant to the Underwriting Agreement, Deutsche Bank and JPMorgan Cazenove have agreed, save in respect of rights which are taken up pursuant to the irrevocable undertakings received from Glencore International and pursuant to the separate underwriting commitment Glencore International has given to the Banks pursuant to the Glencore Underwriting Letter, as agent for Xstrata to procure subscribers for New Shares not taken up under the Rights Issue at a price not less than the total of the Issue Price (plus expenses), failing which, Deutsche Bank and JPMSL (the "Underwriters") have agreed to subscribe themselves for any such New Shares.

Xstrata has agreed to pay Deutsche Bank and JPMorgan Cazenove (a) a commission of 1.75% of the aggregate value at the Issue Price of the maximum number of New Shares (excluding those taken up by Glencore International pursuant to the irrevocable undertakings it has given to Xstrata and pursuant to the separate underwriting commitment Glencore International has given to the Banks pursuant to the Glencore Underwriting Letter); and (b) a further commission of 0.125% of the aggregate value at the Issue Price of the maximum number of New Shares (excluding those taken up by Glencore International pursuant to the irrevocable undertakings it has given to Xstrata and pursuant to the separate underwriting commitment Glencore International has given to the Banks pursuant to the Glencore Underwriting Letter) with respect to each additional period of seven full days or part thereof following the initial period of 30 days from and including the date of the Underwriting Agreement up to and including the second Business Day after the Closing Date (or such later date as determined pursuant to the terms of the Underwriting Agreement), or, if earlier, the date on which the obligations of the Banks under the Underwriting Agreement are terminated or lapse or the Underwriting Agreement ceases to be capable of becoming unconditional, provided that any commission so payable shall be reduced on a pro rata basis in respect of any period of less than seven full days.

Xstrata will generally pay all other costs, charges and expenses of, or incidental to, the Rights Issue including the Banks' reasonable legal and other out-of-pocket expenses and all related value added tax, if applicable.

The Underwriting Agreement is conditional, amongst other things, on the Prospectus being approved by and filed with the FSA in accordance with the Prospectus Rules and the FSMA and filed with the SWX in accordance with the Swiss Listing Rules and being made available to the public by not later than 5.00 p.m. on 3 October 2006 (or such later time or date as the Banks may agree); none of the representations, warranties or undertakings given by Xstrata in the Underwriting Agreement being breached, untrue, inaccurate or misleading in any respect when made; Admission and Swiss Admission occurring at or before 8.00 a.m. on 5 October 2006 (or such later time or date as Xstrata and the Banks may agree; and the Underwriting Agreement otherwise having become unconditional in all respects and not having terminated in accordance with its terms prior to Admission).

The Underwriting Agreement confers on the Banks the right to terminate their obligations, prior to Admission for amongst other things any material inaccuracy or omission from documents relating to the Rights Issue, including the Prospectus; material breach of any of the representations, warranties or undertakings provided by Xstrata pursuant to the Underwriting Agreement or of any other provision of the Underwriting Agreement; a change in national or international financial, economic or political conditions, as would be likely to materially prejudice the success of the Rights Issue and the distribution of the New Shares or dealings in the New Shares in the secondary market.

Pursuant to the Underwriting Agreement, Xstrata and the Banks have agreed that if a supplementary prospectus is issued by Xstrata two or fewer Business Days prior to the latest time and date for acceptance and payment in full under the Rights Issue (or such later date as may be agreed by Xstrata and the Banks), such date shall be deemed to be the date which is three Business Days after the date of issue of the supplementary prospectus (and the dates and times of principal events due to take place following such date shall be extended accordingly).

The Underwriting Agreement also contains: (i) certain customary warranties by Xstrata as to the accuracy of the information contained in the Prospectus and in relation to other matters relating to the Enlarged Xstrata Group and its businesses; (ii) indemnities from Xstrata in favour of each of the Banks; and (iii) certain undertakings from Xstrata relating, amongst other things, to consultation with, and the provision of information to, the Banks.

Glencore International has irrevocably undertaken in the Irrevocable Undertaking Agreement described below in paragraph (g) of this Part XVI to take up in full its entitlements under the Rights Issue and to take up in full CSSEL's entitlements in respect of 151,560,600 Ordinary Shares under the Rights Issue. The actual number of New Shares taken up by Glencore International pursuant to the Irrevocable Undertaking Agreement was 84,200,333 (being the total number of New Shares subject to Glencore International's irrevocable undertakings).

(g) The irrevocable undertaking agreement dated 3 October 2006 (the "Irrevocable Undertaking Agreement") between Xstrata and Glencore International, pursuant to which Glencore International irrevocably undertakes to take up in full its entitlements under the Rights Issue and to take up in full CSSEL's entitlements in respect of 151,560,600 Ordinary Shares under the Rights Issue. The actual number of New Shares taken up by Glencore International pursuant to the Irrevocable Undertaking Agreement was 84,200,333 (being the total number of New Shares subject to Glencore International's irrevocable undertakings).

Pursuant to the Irrevocable Undertaking Agreement, Xstrata has agreed to pay Glencore International an underwriting commission of US$35.1 million.

The Irrevocable Undertaking Agreement also contains a lock-up in relation to Glencore International's interests in Xstrata that will expire six months after the latest time for acceptance and payment in full of entitlements to subscribe for the New Shares offered under the Rights Issue. The lock-up arrangements do not prevent a disposal by Glencore International of an interest in Xstrata: (i) pursuant to certain merger or take over transactions in respect of Xstrata and its Ordinary Shares; (ii) which is the subject of a distribution or dividend; (iii) in connection with the exercise of exchange rights pursuant to any existing exchangeable bonds; (iv) necessary for Glencore International to be in compliance with or not in breach of any applicable law or regulation or any ruling or pronouncement of any court, tribunal or regulatory authority; (v) to any other member of Glencore which enters into a similar lock-up arrangement with Xstrata; (vi) after the ex-rights date, to any financial institution in connection with any financing arrangement if such financial institution enters into a similar lock-up arrangement with Xstrata, or to any financial institution to hold as custodian, nominee or agent; (vii) in connection with the acceptance of a general offer made to all holders of issued and allotted Ordinary Shares for the time being (other than Ordinary Shares held or contracted to be acquired by the offeror or its associates within the meaning of section 430E of the Companies Act) made in accordance with the City Code on terms which treat all such holders alike; and (viii) in connection with the execution and delivery by Glencore International of an irrevocable commitment or undertaking to accept a general offer (without any further agreement to transfer or dispose of any Ordinary Shares or any interest therein) as is referred to in paragraph (vii) above.

Under a separate agreement dated 3 October 2006 between Xstrata and CSSEL, CSSEL has agreed to a lock-up in relation to the 151,560,600 Ordinary Shares it holds pursuant to the Arrangement with Glencore that will expire six months after the latest time for acceptance and payment in full of entitlements to subscribe for the New Shares offered under the Rights Issue. CSSEL's lock-up arrangements do not prevent a disposal by CSSEL of an interest in any or all of such 151,560,600 Ordinary Shares: (i) to Glencore International or any other member of Glencore provided that Glencore International or such member has entered into an undertaking in substantially similar terms in respect of those Ordinary Shares; (ii) after the

ex-rights date, to any associated company of CSSEL or any other person provided such associated company or person has entered into an undertaking in substantially similar terms in respect of those Ordinary Shares; (iii) made with Xstrata's prior written consent; (iv) in connection with the acceptance of a general offer made to all holders of issued and allotted Ordinary Shares for the time being (other than Ordinary Shares held or contracted to be acquired by the offeror or its associates within the meaning of section 430E of the Companies Act) made in accordance with the City Code on terms which treat all such holders alike; and (v) in connection with the execution and delivery by CSSEL of an irrevocable commitment or undertaking to accept a general offer (without any further agreement to transfer or dispose of any Ordinary Shares or any interest therein) as is referred to in paragraph (iv) above.

The Irrevocable Undertaking Agreement and CSSEL's lock-up arrangements shall cease to have effect if the following conditions are not fulfilled by 31 December 2006: (i) the issue of the Prospectus; and (ii) Admission. Glencore International's undertaking to take up CSSEL's entitlements is further conditional on Glencore International acquiring such entitlements.

(h) A shareholders' agreement (the "RBCT Shareholders' Agreement") dated 21 August 2006 between Xstrata South Africa, RBCTCL, Ingwe Collieries Limited, Anglo Operations Limited, Total Coal South Africa (Proprietary) Limited, Sasol Mining (Proprietary) Limited, Kangra Coal (Proprietary) Limited, Eyesizwe Coal (Proprietary) Limited and South Dunes Coal Terminal Agency (Proprietary) Limited regulating the relationship of the parties in relation to the Richards Bay Coal Terminal and providing for the admission of South Dunes Coal Terminal Agency (Proprietary) Limited as a shareholder of Richards Bay Coal Terminal Company Limited. The RBCT Shareholders' Agreement replaced the RBCT Memorandum of Agreement described below in paragraph 12(p) of this Part XVI. Provision is made in the RBCT Shareholders' Agreement for the shareholders to provide guarantees with respect to any new or changed arrangements in relation to the financing of Phase III of the Richards Bay Coal Terminal in the event that all shareholders have agreed such expansion. The RBCT Shareholders' Agreement records in regard to each share in RBCTCL that, although the entitlement to throughput coal through the Richards Bay Coal Terminal may be granted to commercial users who do not own shares in RBCTCL, the correlation between shares in RBCTCL and the corresponding entitlement (defined as the right of RBCTCL shareholders to load tonnage of export coal through the Richards Bay Coal Terminal) shall be continued. The RBCT Shareholders' Agreement makes provision in respect of throughput, entitlement and committed actual tonnage usage, liability for wharfage fees, operating charges, interest charges, capital charges, shortfall in committed actual tonnage usage, temporary transfer of the right to utilise the entitlement to export coal through the Richards Bay Coal Terminal and the transfer of shares and such entitlement. Various events of default are specified and, in the event of default, each of the non-defaulting shareholders of RBCTCL acquires an option to acquire a portion of the defaulter's shares. The RBCT Shareholders' Agreement also makes provision for the "Quatro Development" and Phase V expansion of the Richards Bay Coal Terminal. The Quatro Development is the development designed to increase the throughput capacity of the Richards Bay Coal Terminal from 72 Mtpa of export grade coal with the right to utilise 34 grades to 76 Mtpa of export grade coal with the right to utilise 34 grades. For further information, see Part XII — "Description of the Former Xstrata Group's business — Coal Business summary — South African operations — Mines, projects and developments — Richards Bay Coal Terminal Phase V expansion project" of these Listing Particulars.

(i) The following agreements entered into in connection with the debt financing of the Xstrata Offer:

Acquisition Facilities and Debt Bridge Facility

(A) On 17 May 2006, Xstrata (Schweiz) AG entered into an underwriting letter (the "First Debt Underwriting Letter") with Barclays, Deutsche Bank, JPMorgan Chase and RBS (Barclays, Deutsche Bank, JPMorgan Chase and RBS together the "Debt Underwriters"). Pursuant to the First Debt Underwriting Letter, the Debt Underwriters agreed to underwrite a US$8.5 billion acquisition facilities agreement (the "First Underwritten Acquisition Facilities Agreement") and a US$3.5 billion debt bridge facility (the "First Underwritten Debt Bridge Facility Agreement"). Each of the First Underwritten Acqui-

sition Facilities Agreement and the First Underwritten Debt Bridge Facility Agreement contained the same material terms as the Acquisition Facilities Agreement and the Debt Bridge Facility Agreement (details of which are given below). On the same date, Xstrata and Xstrata (Schweiz) AG entered into the Equity Bridge Facility Agreement (details of which are given below).

(B) Following the successful completion of the Placing, the amount of the facility underwritten pursuant to the First Underwritten Debt Bridge Facility Agreement was reduced to US$2.5 billion, and Xstrata (Schweiz) AG entered into a supplemental underwriting letter on 12 June 2006 with the Debt Underwriters, inter alia, to document this facility reduction.

(C) On 30 June 2006, as part of the syndication of the First Underwritten Acquisition Facilities Agreement, Xstrata (Schweiz) AG entered into a sub underwriting letter with the Debt Underwriters and certain other banks and financial institutions (the "Debt Sub Underwriters") pursuant to which the Debt Underwriters transferred certain participations in the First Underwritten Acquisition Facilities Agreement to the Debt Sub Underwriters.

(D) On 19 July 2006, in connection with the Second Increased Xstrata Offer, Xstrata (Schweiz) AG entered into an underwriting letter (the "Second Debt Underwriting Letter") with the Debt Underwriters. Pursuant to the Second Debt Underwriting Letter, the Debt Underwriters agreed to underwrite a US$9.5 billion acquisition facilities agreement and a US$2.5 billion debt bridge facility. The facility agreements underwritten pursuant to the Second Debt Underwriting Letter contained the same material terms as the Acquisition Facilities Agreement and the Debt Bridge Facility Agreement (details of which are given below). Pursuant to the Second Debt Underwriting Letter, Xstrata (Schweiz) AG and the Debt Underwriters also agreed that the First Debt Underwriting Letter would be suspended as between Xstrata (Schweiz) AG and the Debt Underwriters until such time as the Debt Sub Underwriters consented to the Second Increased Xstrata Offer and agreed to increase the size of the facility underwritten pursuant to the First Underwritten Acquisition Facilities Agreement to US$9.5 billion.

(E) On 3 August 2006, Xstrata (Schweiz) AG entered a supplemental sub underwriting agreement with the Debt Underwriters and the Debt Sub Underwriters pursuant to which (x) the Debt Sub Underwriters and the Debt Underwriters consented to the Second Increased Xstrata Offer and agreed to increase the size of the facility underwritten pursuant to the First Underwritten Acquisition Facilities Agreement to US$9.5 billion, and (y) Xstrata (Schweiz) AG and the Debt Underwriters agreed to terminate the Second Debt Underwriting Letter.

(F) On 3 August 2006, Xstrata, Xstrata (Schweiz) AG and certain other subsidiaries of Xstrata entered into the Debt Bridge Facility Agreement with the Debt Underwriters and affiliates of certain of the Debt Underwriters.

The Debt Bridge Facility Agreement provides Xstrata (Schweiz) AG with a facility (the "Debt Bridge Facility") which consists of a six-month term loan facility for US$2,500,000,000 with the ability to extend (at Xstrata (Schweiz) AG's option) by 364 days.

The Debt Bridge Facility has been fully drawn for the purposes of satisfying the consideration payable by Xstrata Canada for the entire issued share capital of Falconbridge pursuant to the Xstrata Offer.

Interest is payable on the loans at the rate which is aggregate of: (i) LIBOR; (ii) mandatory costs (being regulatory costs of the lenders which are passed on to borrowers); and (iii) the relevant margin, which is initially 0.40% per annum. Following the date falling six months after the date of the Debt Bridge Facility Agreement, the margin will be adjusted from time to time in accordance with a ratchet grid based on the credit rating of the Guarantor.

The Debt Bridge Facility Agreement contains certain mandatory prepayment events, including: (i) illegality; and (ii) a change of control of the Guarantor.

The Debt Bridge Facility Agreement contains representations, warranties and undertakings (including financial condition covenants and undertakings) and contains a guarantee from the Guarantor and certain other members of the Former Xstrata Group in favour of the lenders of the Debt Bridge Facility, which are typical for this type of credit agreement. It also contains customary events of default upon occurrence of which the lenders may terminate and demand repayment of the Debt Bridge Facility.

(G) On 8 August 2006, Xstrata, Xstrata (Schweiz) AG and certain other subsidiaries of Xstrata entered into the Acquisition Facilities Agreement with the Debt Underwriters and the Debt Sub Underwriters and affiliates of certain of the Debt Underwriters and the Debt Sub Underwriters.

The Acquisition Facilities Agreement provides Xstrata (Schweiz) AG with facilities (the "Acquisition Facilities") which consist of: (i) a 36-month term loan facility for US$3,353,000,000 ("Facility A"); (ii) a 60-month-and-one-day term loan facility for US$1,117,000,000 ("Facility B"); (iii) a 60-month revolving loan facility for US$3,353,000,000 ("Facility C"); and (iv) a 364-day term loan facility for US$1,677,000,000 with the ability to extend (at Xstrata (Schweiz) AG's option) by 364 days ("Facility D").

The Acquisition Facilities have been drawn in part for the purposes of (x) satisfying the consideration payable by Xstrata Canada for the entire issued share capital of Falconbridge pursuant to the Xstrata Offer, and (y) the refinancing of the First Facility and the Cerrejón Bridge Facility (details of which are given below).

The remainder of the Acquisition Facilities are available for (i) financing or refinancing the consideration payable to holders of options to acquire shares in Falconbridge, (ii) paying all costs, fees and expenses (and taxes on them) and all stamp duty, registration and other similar taxes incurred by or on behalf of the Guarantor in connection with the Xstrata Offer, the Acquisition Facilities and the Debt Bridge Facility, (iii) the refinancing of certain existing financial indebtedness of and preferred shares in the Falconbridge Group, and (iv) general corporate purposes of the Enlarged Xstrata Group.

Interest is payable on the loans at the rate which is the aggregate of: (i) LIBOR; (ii) mandatory costs (being regulatory costs of the lenders which are passed on to borrowers); and (iii) the relevant margin, which in respect of Facility A is initially 0.60% per annum, in respect of Facility B is initially 0.70% per annum, in respect of Facility C is initially 0.70% per annum and in respect of Facility D is initially 0.50% per annum. Following the date falling 6 months after the date of the Acquisition Facilities Agreement, the margin in respect of each facility will be adjusted from time to time in accordance with a ratchet grid based on the credit rating of the Guarantor.

Commitment fees are also payable from (and including) the date of the Acquisition Facilities Agreement to (and including): (i) in the case of Facility A, Facility B and Facility D, the date which is six months after the date of the Acquisition Facilities Agreement; and (ii) in the case of Facility C, the date which is 59 months after the date of the Acquisition Facilities Agreement. They are a percentage rate per annum on the day to day basis equal to: (i) 35% of the applicable margin on the undrawn amount of each of Facility A, Facility B, and Facility C; and (ii) 30% of the applicable margin on the undrawn amount of Facility D.

The Acquisition Facilities Agreement contains certain mandatory prepayment events, including: (i) illegality; and (ii) a change of control of the Guarantor.

The Acquisition Facilities Agreement contains representations, warranties and undertakings (including financial condition covenants and undertakings) and contains a guarantee from the Guarantor and certain other members of the Former Xstrata Group in favour of the lenders of the Acquisition Facilities, which are typical for this type of

credit agreement. It also contains: customary events of default upon occurrence of which the lenders may terminate and demand repayment of the Acquisition Facilities.

Equity Bridge Facility

(H) The Equity Bridge Facility Agreement dated 17 May 2006 between, amongst others, Xstrata (Schweiz) AG, Deutsche Bank and JPMorgan Chase (Deutsche Bank and JPMorgan Chase together the "Equity Bridge Facility Lenders") (as amended by an amendment letter dated 3 August 2006 between Xstrata (Schweiz) AG and Deutsche Bank as facility agent under the Equity Bridge Facility Agreement).

The Equity Bridge Facility Agreement provides Xstrata (Schweiz) AG with a term loan facility for US$7.0 billion due on the earlier of: (i) six months after initial utilisation; and (ii) 15 May 2007 (the "Equity Bridge Facility").

The Equity Bridge Facility has been fully drawn for the purposes of satisfying the consideration payable by Xstrata Canada for the entire issued share capital of Falconbridge pursuant to the Xstrata Offer.

Interest is payable on the loans at the rate which is the aggregate of: (i) LIBOR; (ii) mandatory costs (being regulatory costs of the lenders which are passed on to borrowers); and (iii) the relevant margin, which will initially be 0.40% per annum. Following the date falling six months after the date on which the Equity Bridge Facility Agreement was signed, the margin will be adjusted from time to time in accordance with a ratchet grid based on the credit rating of the Guarantor.

The Equity Bridge Facility Agreement contains certain mandatory prepayment events, including: (i) illegality; (ii) fundraising; and (iii) a change of control of the Guarantor.

The Equity Bridge Facility Agreement contains representations, warranties and undertakings and contains a guarantee from the Guarantor and certain other members of the Former Xstrata Group in favour of the lenders of the Equity Bridge Facility, which are typical for this type of credit agreement. It also contains customary events of default upon occurrence of which the lenders may terminate and demand repayment of the Equity Bridge Facility.

The Equity Bridge Facility is fully subordinated to the Acquisition Facilities and the Debt Bridge Facility such that the Equity Bridge Facility Lenders cannot enforce their rights to repayment or prepayment while either of the Acquisition Facilities or the Debt Bridge Facility remain outstanding. The only circumstance in which the Equity Bridge Facility may be repaid ahead of the Acquisition Facilities and the Debt Bridge Facility without the consent of the Acquisition Facilities Lenders and the Debt Bridge Facility Lenders is where the Guarantor uses the Equity Refinancing Amount.

Xstrata intends to use the net proceeds of the Rights Issue to repay in part the Equity Bridge Facility in accordance with its obligations under the Standby Equity Underwriting Letter.

(j) Pursuant to an agreement entered into between the Guarantor, Deutsche Bank, JPMorgan Cazenove and JPMSL on 17 May 2006 (the "Standby Equity Underwriting Letter"), Deutsche Bank and JPMSL have irrevocably undertaken, severally, and not jointly or jointly and severally, to underwrite, each as to 50%, one or more equity offerings by the Guarantor (and/or, subject to the approval of Deutsche Bank and JPMorgan Cazenove, such approval not to be unreasonably withheld or delayed, by one or more directly or indirectly owned subsidiaries of the Guarantor) to raise, in aggregate, such amount as is required to pay or repay any amounts then outstanding under the Equity Bridge Facility Agreement, together with costs and expenses (the "Equity Refinancing Amount"). The net proceeds raised by way of such equity offering(s) will be used first to pay or repay amounts outstanding under the Equity Bridge Facility Agreement.

Under the Standby Equity Underwriting Letter, the Guarantor undertakes to effect one or more equity offerings, by itself or by one or more directly or indirectly owned subsidiaries as aforesaid, to pay or repay the Equity Refinancing Amount by the termination date of the Equity Bridge Facility Agreement (being the earlier of: (i) six months after initial utilisation of the

Equity Bridge Facility; and (ii) 15 May 2007) (the "Termination Date") at such price as is determined by the Guarantor, Deutsche Bank and JPMorgan Cazenove as described in paragraph (ii) below. The Guarantor has agreed to undertake a rights issue underwritten by Deutsche Bank and JPMSL of such number of Ordinary Shares as is necessary to pay or repay the Equity Refinancing Amount by the Termination Date to the extent that the Equity Refinancing Amount has not already been paid or repaid.

Xstrata intends to use the net proceeds of the Rights Issue to repay in part the Equity Bridge Facility in accordance with its obligations under the Standby Equity Underwriting Letter.

The Standby Equity Underwriting Letter also contains, amongst others, the following provisions:

(i) unless the Guarantor, with the prior approval of Deutsche Bank and JPMorgan Cazenove (such approval not to be unreasonably withheld or delayed), determines otherwise, the Equity Refinancing Amount will be raised by way of an underwritten rights issue of Ordinary Shares to existing Shareholders. The Guarantor may, however, with the prior approval of Deutsche Bank and JPMorgan Cazenove (such approval not to be unreasonably withheld or delayed), elect to raise the Equity Refinancing Amount through any one or more of the following:

  (A) an underwritten rights issue of Ordinary Shares or convertible unsecured loan stock ("Stock Units") or other securities to existing Shareholders ("Rights Issue");

  (B) an underwritten non-pre-emptive cash placing of Ordinary Shares ("Cash Placing");

  (C) an underwritten non-pre-emptive cash placing of Ordinary Shares owned by Batiss ("Batiss Placing"); and/or

  (D) such other method as the Guarantor, Deutsche Bank and JPMorgan Cazenove may agree;

(ii) Deutsche Bank, JPMorgan Cazenove, JPMSL and the Guarantor have agreed that the issue price of any Ordinary Shares, Stock Units or other securities, as the case may be, proposed to be issued in connection with any Rights Issue, Cash Placing and/or Batiss Placing will be determined by the Guarantor, Deutsche Bank and JPMorgan Cazenove at the time the relevant equity offering is launched acting reasonably and in good faith in the light of the then prevailing market conditions, any relevant Listing Rules requirements and/or Investor Protection Committee Guidelines, the market price of an Ordinary Share immediately prior to launch and, in the case of a Rights Issue, customary discounts to market price, but in any event the issue price will not be: (A) less than the pounds sterling equivalent of US$0.50 per new Ordinary Share; or (B) in the case of Stock Units, a price which would, upon conversion of any Stock Units, result in Ordinary Shares being issued at a discount to their nominal value;

(iii) the Guarantor, Deutsche Bank, JPMorgan Cazenove and JPMSL have undertaken to negotiate reasonably and in good faith the terms and conditions of any underwriting agreement to be entered into in connection with any equity offering by the Guarantor (and/or by one or more directly or indirectly owned subsidiaries of the Guarantor) to raise some or all of the Equity Refinancing Amount (each an "Underwriting Agreement"). In addition, the Guarantor, Deutsche Bank, JPMorgan Cazenove and JPMSL have agreed that the terms and conditions of any Underwriting Agreement will be customary for the type of equity offering it relates to, including, for example, the inclusion of an obligation for the Guarantor to prepare a prospectus (if necessary), the provision of standard warranties by the Guarantor and comfort letters in respect of any prospectus, customary indemnities in favour of Deutsche Bank, JPMorgan Cazenove and JPMSL, the obtaining of irrevocable undertakings (if any), customary conditions and termination provisions and customary *force majeure* provisions, if any;

(iv) the Guarantor has undertaken that until any amounts drawn down under the Equity Bridge Facility Agreement are repaid neither the Guarantor nor any subsidiary of the Guarantor will undertake any rights issue, placing or other form of capital markets fund

raising which is not managed by Deutsche Bank and JPMorgan Cazenove or underwritten by Deutsche Bank and JPMSL without Deutsche Bank and JPMorgan Cazenove's prior written consent (the "Undertaking"). Notwithstanding the above, if the board of directors of the Guarantor (the "Xstrata Board") believes that Deutsche Bank, JPMorgan Cazenove and/or JPMSL:

(A) are not acting reasonably and in good faith or in accordance with the provisions described in paragraph (ii) above in relation to the setting of the issue price of any Ordinary Shares or Stock Units, as the case may be, proposed to be issued in connection with any Rights Issue; and/or

(B) are not negotiating reasonably and in good faith the terms and conditions of any Underwriting Agreement in accordance with the provisions described in paragraph (iii) above,

the Guarantor will notify Deutsche Bank, JPMSL and JPMorgan Cazenove in writing of the Xstrata Board's belief and may then seek to agree a higher issue price (the "Third Party Issue Price") and/or terms and conditions more favourable than those being offered by Deutsche Bank and JPMSL (the "Third Party Terms"), with a third party or third parties. If the Guarantor is successful it will notify Deutsche Bank, JPMSL and JPMorgan Cazenove of that Third Party Issue Price and/or those Third Party Terms. If within 48 hours from receipt of such notice Deutsche Bank, JPMSL and JPMorgan Cazenove have not confirmed their irrevocable agreement to manage and underwrite the Rights Issue, Cash Placing and/or Batiss Placing, as the case may be, at that Third Party Issue Price and/or to enter into an Underwriting Agreement on terms no less favourable to the Guarantor (or the relevant subsidiary of the Guarantor) than the Third Party Terms, then the undertaking described in this paragraph (iv) shall cease to apply provided that the third party or third parties who has or have offered the Third Party Issue Price or the Third Party Terms has or have first offered to take a transfer of all of the rights and obligations of the lending banks and other relevant finance parties at par under the Equity Bridge Facility Agreement;

(v) in consideration of Deutsche Bank, JPMorgan Cazenove and JPMSL entering into the Standby Equity Underwriting Letter, the Guarantor has agreed to pay (or procure that the same are paid) in aggregate to Deutsche Bank and JPMorgan Cazenove a standby equity underwriting fee of up to 1.00% of US$7.0 billion (including VAT, if applicable) and an equity structuring fee of up to US$15,000,000 (including VAT, if applicable);

(vi) in addition to the fees payable as described in paragraph (v) above, if some or all of the Equity Refinancing Amount is raised through a Rights Issue, the Guarantor has agreed to pay (or procure that the same are paid) in aggregate to Deustche Bank JPMorgan Cazenove:

(A) aggregate commissions of between 0.75% and 2.00% of the aggregate value of the price at which Deutsche Bank and JPMSL underwrite the rights issue ("Underwritten Price") of the maximum number of underwritten securities; and

(B) an additional 0.125% of the aggregate value at the Underwritten Price of the maximum number of underwritten securities for each additional seven full days or part thereof following the initial period of 30 days from the date the final terms of the Rights Issue are publicly announced up to and including the second business day after the closing date of the Rights Issue, or, if earlier, the date when the obligations of Deutsche Bank, JPMorgan Cazenove and JPMSL in respect of the Rights Issue are terminated, lapse or cease to be capable of becoming unconditional; and

(vii) if the Xstrata Offer expires, or if Xstrata Canada announces that the Xstrata Offer has been terminated, in each case without Xstrata Canada taking up any Falconbridge Shares under the Xstrata Offer, or if all of the conditions to the Xstrata Offer are not satisfied or waived and/or Xstrata Canada has not announced that Xstrata Canada has taken up Falconbridge Shares under the Xstrata Offer by 15 May 2007, the Standby Equity Underwriting Letter and the undertakings in it automatically terminate.

If a third party or third parties has or have acquired the lending banks' rights and obligations under the Equity Bridge Facility Agreement in accordance with the provisions described in paragraph (iv) above, Deutsche Bank, JPMSL and JPMorgan Cazenove will cease to have any obligations under the Standby Equity Underwriting Letter upon giving written notice to the Guarantor.

(k) A sale and purchase agreement dated 15 May 2006 between Xstrata Peru S.A. ("Xstrata Peru") and BHP Peru Holdings Inc. and Global BHP Copper Ltd (the "Tintaya Vendors"), pursuant to which Xstrata Peru conditionally agreed to purchase and the Tintaya Vendors conditionally agreed to sell all of the Tintaya Vendors' shares in Tintaya, representing 99.981% of Tintaya's issued and outstanding shares. Under the agreement, Xstrata Peru or another Former Xstrata Group entity agreed to purchase the rights and obligations of BHP Finance (International) Inc. as lender under a loan to Tintaya. The total payment for the shares and loan is US$750 million, subject to adjustment for pre-closing changes in Tintaya's net working capital. The acquisition price comprised an initial cash consideration of US$634 million in respect of the shares being acquired and the assumption of US$116 million of debt.

An agreed price participation arrangement based on prevailing copper prices upon completion of the transaction resulted in further deferred cash payments to the Tintaya Vendors totalling US$25 million having to be paid during the 18 months from January 2007 to June 2008.

Two further conditional deferred payments of US$25 million each in cash may also be payable to the Tintaya Vendors. The first such amount will be payable in July 2009 if the LME copper price exceeds certain levels from July 2008 to June 2009. The second amount will be payable if either of the Antapaccay or Coroccohuayco satellite deposits reach certain production levels prior to 2020.

The deferred payments are guaranteed by Xstrata Holdings.

Under the agreement, Xstrata Peru made customary representations and warranties, about its authority to enter into the transaction, its ability to pay and certain related matters, and customary covenants covering the period after closing, including that within 60 days after closing Xstrata Peru will offer to purchase minority shareholders' shares in Tintaya on substantially the same terms on a price per share basis as those given to the Tintaya Vendors.

Xstrata Peru has agreed to indemnify the Tintaya Vendors for any direct losses arising out of a breach of any of Xstrata Peru's representations and warranties or covenants or for fraud by Xstrata Peru in connection with the agreement or Xstrata Peru's ancillary documents.

The Tintaya Acquisition completed on 21 June 2006.

(l) The Cerrejón Bridge Facility Agreement dated 8 May 2006 between, amongst others, Xstrata (Schweiz) AG, Barclays, Deutsche Bank, JPMorgan Chase and RBS (Barclays, Deutsche Bank, JPMorgan Chase and RBS together the "Cerrejón Bridge Facility Lenders").

The Cerrejón Bridge Facility Agreement provided Xstrata (Schweiz) AG with a 364-day revolving credit facility for US$2,500,000,000 with a term out extension option for an additional 364 days (the "Cerrejón Bridge Facility").

The Cerrejón Bridge Facility was utlised by the Former Xstrata Group for general corporate purposes and to fund the Cerrejón Acquisition.

Interest was payable on the loans at the rate which was the aggregate of: (i) LIBOR; (ii) mandatory costs (being regulatory costs of the lenders which are passed on to borrowers); and (iii) the relevant margin, which was 0.40% per annum.

A commitment fee was also payable at a percentage rate per annum on the day-to-day basis equal to 0.10% per annum on the undrawn amount of the Cerrejón Bridge Facility.

The Cerrejón Bridge Facility Agreement included certain mandatory prepayment events, including: (i) illegality; (ii) fundraising; and (iii) a change of control of the Guarantor.

The Cerrejón Bridge Facility Agreement contained representations, warranties and undertakings (including financial condition covenants and undertakings requiring the provision of a guarantee from the Guarantor and certain other members of the Former Xstrata Group) in favour of the lenders of the Cerrejón Bridge Facility which were typical for this type of credit agreement. It also contained customary events of default upon occurrence of which the lenders were entitled to and demand repayment of the Cerrejón Bridge Facility.

The Guarantor prepaid and cancelled the Cerrejón Bridge Facility using funds made available to it pursuant to the Acquisition Facilities Agreement. Members of the Enlarged Xstrata Group no longer have the right to borrow, nor the lenders any obligation to lend, funds pursuant to the Cerrejón Bridge Facility Agreement.

(m) The Cerrejón Acquisition Agreement, being a sale and purchase agreement dated 1 March 2006 (as amended on 15 March 2006) between Glencore International and Xstrata (Schweiz) AG, which became effective on 15 March 2006, in relation to the Cerrejón Acquisition, pursuant to which the Cerrejón Purchasers purchased, and the Cerrejón Vendors sold, and procured the transfer of the entire issued share capital of the Cerrejón Xstrata Group Companies and the share held by a Glencore nominee in one of the Cerrejón Operating Companies. The Cerrejón Xstrata Group Companies collectively hold a 331/3% interest in each of the Cerrejón Operating Companies.

The aggregate consideration payable by the Cerrejón Purchasers to the Cerrejón Vendors under the Cerrejón Acquisition Agreement was US$1,712 million, which included an agreed amount of US$12 million in respect of the value of the excess net assets of the Cerrejón Business as at 1 January 2006 (the "Effective Date") over the Cerrejón Purchasers' target net asset value of the Cerrejón Business. The Cerrejón Purchasers also paid to the Cerrejón Vendors interest on the purchase price from the Effective Date to closing on 12 May 2006 ("Closing") at LIBOR plus 0.75%. The purchase price was not subject to further adjustments for the working capital debt or cash position of the Cerrejón Business at Closing. The Cerrejón Vendors' share of profits and losses of the Cerrejón Business from the Effective Date to Closing was for the account of the Cerrejón Purchasers.

The Cerrejón Acquisition Agreement contained further provisions, customary for a transaction of that nature, to ensure that the economic effect of the transaction was a sale and purchase of the Cerrejón Business as of the Effective Date. Under these provisions, any leakage of value from the Cerrejón Target Companies or the Cerrejón Operating Companies to the Cerrejón Vendors (for example, any dividend paid by a Cerrejón Target Company to the Cerrejón Vendors) between the Effective Date and Closing was for the account of the Cerrejón Vendors on a US dollar for US dollar basis. To the extent that any such leakage occurred and the amount was agreed between the Cerrejón Purchaser and the Cerrejón Vendors prior to Closing, the relevant amount would be deducted from the purchase price. Conversely, any capital injection by the Cerrejón Vendors into the Cerrejón Target Companies or the Cerrejón Operating Companies (for example, any capital expenditure by the Cerrejón Vendors or the Cerrejón Operating Companies) between the Effective Date and Closing was for the account of the Cerrejón Purchasers on a US dollar for US dollar basis. To the extent that any such capital injection occurred and the amount was agreed between the Cerrejón Purchasers and the Cerrejón Vendors prior to Closing, the relevant amount would be added to the purchase price.

Under the Cerrejón Acquisition Agreement the Cerrejón Vendors gave certain warranties to the Cerrejón Purchasers concerning constitutional details, accounts, financial matters, mining interests and contracts of the Cerrejón Target Companies and the Cerrejón Operating Companies.

The Cerrejón Vendors have no liability for a breach of any warranty or any claim under the tax covenant (as described below and except in relation to a claim for unpaid 2002 income tax) unless any individual claim exceeds US$100,000 and unless all claims, in aggregate, exceed US$2 million. The maximum liability of the Cerrejón Vendors for all breaches of the warranties and for all claims under the tax covenant (as described below) is the purchase price. These limitations do not apply to any claims under the non-tax indemnities described below.

As is customary for a transaction of this nature, the Cerrejón Vendors agreed in a tax covenant to indemnify the Cerrejón Purchasers in respect of certain taxation liabilities of the

Cerrejón Target Companies and one third of certain taxation liabilities of the Cerrejón Operating Companies, which in each case are attributable to the period up to the Effective Date, including in relation to a claim for unpaid 2002 income tax and certain claims relating to stamp tax and VAT. The Cerrejón Vendors shall have no liability under the indemnity for unpaid 2002 income tax unless the amount claimed by the Cerrejón Purchasers exceeds US$3.5 million.

The Cerrejón Vendors have also agreed to indemnify the Cerrejón Purchasers against: (i) certain claims for unpaid mining royalties; (ii) claims relating to the privatisation of Cerrejón Zona Norte and its successors; and (iii) certain environmental and health claims by the inhabitants of certain areas where Cerrejón operates. The Cerrejón Vendors have no liability in respect of these claims unless the amount of the liability of the Cerrejón Vendors exceeds US$2 million.

(n) The following agreements, each dated 27 February 2006 except for the preference share subscription agreement described in paragraph (vi) below which is currently being finalised following the exercise of the option referred to in paragraph (iii) below (the "Second Preference Share Subscription Agreement"), in connection with the agreement of the Former Xstrata Group and ARM to establish a new black controlled coal mining company called ARM Coal, with operating assets and growth projects in South Africa and participation in the export and domestic thermal coal markets, as described in Part XII — "Description of the Former Xstrata Group's business — Recent significant developments — Agreement to establish ARM Coal" in these Listing Particulars.

(i) an ordinary share subscription and shareholders' agreement (the "Ordinary Share Subscription and Shareholders' Agreement") between ARM, Xstrata (Schweiz) AG and Lexshell 676 Investments (Proprietary) Limited (the latter renamed ARM Coal, under which ARM and Xstrata (Schweiz) AG agreed to subscribe for ordinary shares in ARM Coal;

(ii) a preference share subscription and shareholders' agreement between ARM, Xstrata (Schweiz) AG, Xstrata South Africa and ARM Coal, under which ARM Coal agreed to subscribe for preference shares in Xstrata South Africa using the proceeds received from ARM and Xstrata (Schweiz) AG for ordinary shares in ARM Coal under the Ordinary Share Subscription and Shareholders' Agreement;

(iii) an option agreement between Xstrata South Africa, ARM, ARM Coal and Xstrata (Schweiz) AG under which Xstrata South Africa agreed to grant ARM an option to subscribe for further preference shares in Xstrata South Africa to increase its participation by up to a further 10%. ARM exercised this option in full in August 2006 and accordingly will enter into the Second Preference Share Subscription Agreement;

(iv) a notarial joint venture agreement between Xstrata South Africa and ARM Coal in relation to the establishment of an unincorporated mining joint venture at Goedgevonden between Xstrata South Africa and ARM Coal (the "Goedgevonden Project"); and

(v) a facility agreement between Xstrata South Africa and ARM Coal under which Xstrata South Africa agreed to provide debt funding to ARM Coal of ZAR765 million (approximately US$98 million) in order for ARM Coal to acquire a 51% interest in the Goedgevonden Project and up to ZAR1,200 million (approximately US$153 million) in order for ARM Coal to make its contributions to the Goedgevonden Project during the feasibility phase and development phase of the Goedgevonden Project; and

(vi) the Second Preference Share Subscription Agreement between ARM, Xstrata (Schweiz) AG, Xstrata South Africa and ARM Coal, under which ARM Coal will agree to subscribe for preference shares in Xstrata South Africa for a cash consideration of ZAR400 million (approximately US$51 million).

(o) A notarial sale and partnership agreement dated 22 February 2006 (the "Sale and Partnership Agreement") between Xstrata South Africa, Kagiso Platinum Venture (Proprietary) Limited ("KPV"), Rustenburg Platinum Mines Limited ("RPM") and Kagiso Trust Investments (Proprietary) Limited ("Kagiso"), in relation to the formation of a black economic

empowerment partnership with Kagiso, through the special purpose vehicle KPV, (the "XK Platinum Partnership") in respect of the Former Xstrata Group's former 50% interest in the Mototolo Joint Venture as described in Part XII — "Description of the Former Xstrata Group's business — Acquisitions, disposals and discontinued operations — Acquisitions and disposals" of these Listing Particulars and paragraph 12(t) below of this Part XVI.

Pursuant to the terms of the Sale and Partnership Agreement:

(i) the parties to the Sale and Partnership Agreement together with Mototolo Holdings (Proprietary) Limited ("MH") entered into a third addendum dated 22 February 2006 to the Mototolo Joint Venture Agreement dated 12 July 2005 between RPM, Xstrata South Africa and MH (as previously amended by a first addendum dated 30 August 2005 and a second addendum dated 22 September 2005) (the "Mototolo Joint Venture Agreement") in terms of which the XK Platinum Partnership has become a party to the Mototolo Joint Venture Agreement and assumed most of the rights and obligations of Xstrata South Africa; and

(ii) Xstrata South Africa, KPV, RPM and MH entered into an addendum dated 22 February 2006 to the shareholders' agreement dated 12 July 2005 between Xstrata South Africa and RPM as co-shareholders in MH, recognising the admission of KPV as a shareholder in MH.

In order to facilitate Kagiso's fundraising in relation to the Mototolo Joint Venture, Xstrata South Africa and Investec Bank Limited ("Investec") entered into a guarantee agreement dated 23 March 2006 (the "Guarantee Agreement"). Under the Guarantee Agreement, as security for certain of the obligations and responsibilities of KPV towards Investec in terms of a project loan facility agreement between KPV and Investec (the "PLF Agreement"), Xstrata South Africa has provided an on demand guarantee of the performance by KPV of the obligations of KPV to Investec under the PLF Agreement, limited to an amount of ZAR100 million (approximately US$13 million), until the technical completion date of the Mototolo Joint Venture project.

Xstrata South Africa, Investec and KPV also entered into a subordination agreement dated 23 March 2006, pursuant to which Xstrata South Africa agreed to subordinate certain of its claims against KPV in connection with Mototolo Joint Venture agreements in favour of and for the benefit of Investec's claims against KPV under the PLF Agreement.

Xstrata South Africa, RPM, MH, Investec, KPV and Kagiso also entered into a lender-sponsor agreement dated 29 March 2006 primarily to regulate the manner in which Investec will realise security, including ahead of any claims of Xstrata South Africa subject to the terms of the agreement, upon a default of the terms of the PLF Agreement and where KPV is in breach of certain of the provisions of the Sale and Partnership Agreement.

(p) A memorandum (the "RBCT Memorandum of Agreement") of agreement dated 7 October 2005, between Xstrata South Africa, Richards Bay Coal Terminal Company Limited, Ingwe Collieries Limited, Anglo Operations Limited, Total Coal South Africa (Proprietary "RBCTCL") Limited, Sasol Mining (Proprietary) Limited, Kangra Coal (Proprietary) Limited, Eyesizwe Coal (Proprietary) Limited and South Dunes Coal Company (Proprietary) Limited in relation to Phase V of the Richards Bay Coal Terminal in South Africa, which replaced a previous memorandum of agreement entered into in respect of Phase V, pursuant to which the parties agreed the terms of investment to increase the terminal capacity and grant access to common users. The RBCT Memorandum of Agreement was replaced by the RBCT Shareholders' Agreement described above in paragraph 12(h) of this Part XVI.

(q) On 6 September 2005, the Issuer issued the 2017 Convertible Debenture to Brascade which is convertible, at any time after 14 August 2006, into 4.00% exchangeable redeemable preference shares of the Issuer which are exchangeable immediately upon issuance for fully paid new Ordinary Shares. The 2017 Convertible Debenture is guaranteed by the Guarantor and was issued at par, with a coupon of 4.00% per annum. Interest on the 2017 Convertible Debenture is payable semi-annually in arrear in equal instalments on 6 March and 6 September each year. The initial Exchange Price was 1713.15 pence per Ordinary Share. The Exchange Price was adjusted to 1527 pence per Ordinary Share as a result of the Rights Issue on 5 October 2006 in accordance with the terms of the 2017 Convertible Debenture.

Unless previously redeemed, converted or cancelled, the 2017 Convertible Debenture is redeemable on 14 August 2017 at its principal amount plus unpaid accrued interest (if any). At any time after 14 August 2010, the Issuer is entitled, on giving notice, to redeem the 2017 Convertible Debenture at its principal amount plus unpaid accrued interest (if any). It is intended that the proceeds of the issue of the Bonds will be used to redeem the 2017 Convertible Debenture following the publication of these Listing Particulars. See Part VIII — "Use of proceeds" of these Listing Particulars.

(r) A facility agreement dated 18 August 2005 (the "Second Facility Agreement") pursuant to which Deutsche Bank and JPMorgan Chase, National Association provided a 364-day term facility for US$600,000,000 (the "Second Facility") which was made available to, and was utilised by, Xstrata (Schweiz) AG to fund the purchase of Falconbridge Shares by Xstrata Alberta pursuant to the Brookfield Purchase Agreement referred to below in paragraph 12(s) of this Part XVI.

Interest was payable on loans pursuant to the Second Facility at the rate which was the aggregate of: (i) LIBOR; (ii) mandatory costs (being regulatory costs of the lenders which are passed on to the borrowers); and (iii) the margin, which was 0.40% per annum.

The Second Facility included certain mandatory prepayment events, including: (i) illegality; (ii) a change of control of the Guarantor; (iii) disposal of assets (subject to certain thresholds); and (iv) incurring indebtedness for borrowed money and equity issues.

The Second Facility contained representations, warranties and undertakings (including financial condition covenants and undertakings) and contained a guarantee from the Guarantor and certain other members of the Former Xstrata Group in favour of the lenders of the Second Facility which were typical for this type of credit agreement. It also contained customary events of default upon the occurrence of which the lenders were entitled to and demand repayment of the Second Facility.

The Guarantor used part of the proceeds of the Placing to prepay and cancel the Second Facility. Members of the Enlarged Xstrata Group no longer have the right to borrow, nor the lenders any obligations to lend, funds pursuant to the Second Facility Agreement.

(s) A sale and purchase agreement (the "Brookfield Purchase Agreement") dated 14 August 2005 between the Guarantor, Xstrata Alberta, Brookfield (which was then known as Brascan Corporation), Brascade and 6287042 Canada Limited (the "Vendor"), pursuant to which the Former Xstrata Group acquired 73,115,756 Falconbridge Shares (the "Purchased Shares") for C$28.00 per share, for an aggregate purchase price of C$2,047,241,168 (the "Purchase Price").

The Purchase Price was paid by means of the delivery to the Vendor of two promissory notes made by Xstrata Alberta. One note, for US$1,327,345,890, was due and paid in cash on 22 August 2005. The second note, for US$375,000,000, was paid on 6 September 2005 through the issue to Brascade of the 2017 Convertible Debenture. The two promissory notes were secured with a pledge given by Xstrata Alberta in favour of the Vendor of the Purchased Shares on a basis proportionate to the principal amounts of the two promissory notes, which pledge has since been released. The 2017 Convertible Debenture was issued at par, has a 12-year term and bears interest at 4% per annum. Subject to its terms, it is convertible at any time at the option of the holder into approximately 12.1 million new Ordinary Shares based on a conversion price of £17.1315 per new Ordinary Share, representing a 35% premium to the closing price of the Ordinary Shares on 11 August 2005. The 2017 Convertible Debenture is redeemable by the Issuer at par plus accrued interest at any time after 14 August 2010.

Immediately following the publication of these Listing Particulars it is intended that the proceeds of the issue of the Bonds will be used to redeem the 2017 Convertible Debenture.

The Guarantor and Xstrata Alberta agreed in the Brookfield Purchase Agreement that if on or prior to 14 May 2006, the Guarantor, directly or through an affiliate, or any person acting jointly or in concert with the Guarantor, publicly announced an intention to merge with Falconbridge whereby the Guarantor, or any person acting jointly or in concert with the Guarantor, would acquire a majority portion of Falconbridge's business, or announced an intention to make an offer to the shareholders of Falconbridge to acquire sufficient Falcon-

bridge Shares to own a majority of the outstanding Falconbridge Shares, in either case for a price per Falconbridge Share in excess (the "Excess Amount") of C$28.00, then within five days of the completion of either such transaction, the Guarantor and Xstrata Alberta would pay to the Vendor in cash the product of the Excess Amount and the number of Falconbridge Shares acquired pursuant to the Brookfield Purchase Agreement.

The Brookfield Purchase Agreement also provided that until such time as a nominee of the Guarantor was elected or appointed to the board of directors of Falconbridge, Brookfield, Brascade and the Vendor would: (i) exercise the voting rights appertaining to any junior preference shares of Falconbridge beneficially owned by them from time to time to nominate and vote for one individual whom the Guarantor had, acting reasonably, approved as a nominee to serve as a director of Falconbridge; and (ii) if requested to do so by the Guarantor, would cause one of their two nominees serving as a director of Falconbridge and representing the holders of the junior preference shares of Falconbridge to resign as a director, unless prior to such request one of these nominees had already resigned, upon prior notice to the Guarantor and without being requested by the Guarantor to do so. The holders of the junior preference shares are entitled to vote as a class to elect two directors to the board of directors of Falconbridge, but otherwise do not generally have the right to vote at meetings of the shareholders of Falconbridge. On 20 October 2005, the Guarantor waived its right to require the exercise of the rights appertaining to the junior preference shares in Falconbridge to nominate and vote for the Guarantor nominee to the board of Falconbridge.

Each of Brookfield, Brascade and the Vendor agreed in the Brookfield Purchase Agreement not to sell any junior preference shares of Falconbridge until 13 October 2005, other than to affiliates of Brookfield. After 13 October 2005, if any of Brookfield, Brascade or the Vendor (the "Brookfield Offeror") desires to sell any of the Falconbridge junior preference shares beneficially owned by it (the "Offered Shares"), the Brookfield Offeror must provide Xstrata Alberta with the right of first offer in respect of those shares, by providing Xstrata Alberta with a notice that indicates the number of Offered Shares and the price at which the Brookfield Offeror wishes to sell the Offered Shares. In order to purchase the Offered Shares, Xstrata Alberta must, within 48 hours of receipt of the notice, provide a written response indicating that it will purchase all of the Offered Shares at the offer price. If Xstrata Alberta fails to provide a response within 48 hours of receipt-of the notice, then Xstrata Alberta will be deemed to have waived its rights to purchase any of the Offered Shares. If the response does not provide for the purchase of all of the Offered Shares at the offer price, then the Brookfield Offeror may, within 60 days following the expiration of the notice period, enter into an agreement for the sale to any other person(s) of all the Offered Shares at a price not less than the offer price (and otherwise on the same terms as provided in the notice).

(t) The Mototolo Joint Venture Agreement, being a notarial pooling and sharing agreement between Xstrata South Africa, RPM (a member of the Anglo Platinum group) and MH, dated 12 July 2005 (as amended by a first addendum dated 30 August 2005, a second addendum dated 22 September 2005 and a third addendum dated 22 February 2006), pursuant to which Xstrata South Africa and RPM entered into an unincorporated joint venture (the "Mototolo Joint Venture") in respect of platinum group metal ("PGM") resources in Mpumalanga Province in South Africa. Xstrata South Africa and RPM initially had an equal 50% participation interest in the Mototolo Joint Venture, although Xstrata South Africa's participation reduced to 37% as of 11 May 2006 in connection with the arrangements described above in paragraph 12(o) of this Part XVI.

Under the Mototolo Joint Venture Agreement, Xstrata South Africa agreed to develop and operate the underground mine, contributing its expertise in mechanised room and pillar mining, while RPM agreed to construct and manage a 200,000 tonnes per month PGM concentrator.

In terms of a concentrate sale agreement between RPM and Xstrata South Africa, dated 12 July 2005, RPM also agreed to purchase Xstrata South Africa's share of PGM concentrate for further smelting refining and marketing of finished product and Xstrata South Africa agreed to construct a beneficiation plant at its own cost to process the UG2 chrome tailings arising from the PGM concentrator and to purchase RPM's share of chrome concentrate.

(u) An agreement between Xstrata Queensland Limited ("Xstrata Queensland") and Universal Resources Limited ("Universal") dated 11 March 2005, providing Xstrata Queensland with the right to explore and options to acquire 51% of the Roseby copper deposits in the Mount Isa area in north west Queensland, Australia. Under the agreement, Xstrata Queensland agreed to invest A$6.6 million (approximately US$5.0 million) in Universal, a listed Australian exploration company, by way of a placement of 30 million shares of Universal at an issue price of A$0.22 per share. This represented 13.2% of Universal's issued capital.

Of Xstrata Queensland's investment in Universal, A$4.4 million was agreed to be used to part-fund the planned Roseby Feasibility Project. Xstrata Queensland was also granted an option to acquire a direct 51% interest in this project at its then market value.

The remaining A$2.2 million was agreed to be used to fund an exploration project undertaken by Xstrata Queensland for additional copper sulphide mineralisation within the Roseby tenement area during 2005 and 2006. Known as the Sulphide Extension Exploration Project (SEEP), principal exploration targets were expected to be beneath and adjacent to the native copper deposits within the Roseby Feasibility Project. It was agreed that an option would be granted to Xstrata Queensland to earn 51% equity in SEEP either by expending a minimum of A$10 million plus delivering a bankable feasibility study or by A$15 million expenditure on exploration.

In addition, Xstrata Queensland secured the option to purchase future copper concentrate production from Roseby that is not subject to prior off-take agreements.

(v) An option contract dated 1 October 2004 between Empresa Minera del Centro del Peru S.A. ("Centromin") and Xstrata Peru S.A. ("Xstrata Peru") relating to the grant of an option for a term of four years, with the potential to extend for a further two years.

The agreement was entered into following the Former Xstrata Group winning the right, in August 2004, to explore and the option to develop the Las Bambas copper-gold-molybdenum project in Southern Peru following an international bid process conducted by ProInversion (Peru's Private Investment Promotion Agency).

The consideration for the initial option was US$91m of which US$45.5m was paid to a trust fund established for the benefit of the local community. In addition US$500,000 and US$750,000 for each six months in year 5 and year 6 of the option respectively. On the exercise of the option, Centromin agreed to execute a transfer agreement relating to the transfer of mining tenements covering approximately 35,000 hectares and including the Chalcobamba, Ferrobamba, Sulfobamba and Charcas deposits and other assets to the Guarantor.

The Las Bambas copper project is within the Southern Peru copper belt, which hosts a series of major copper operations including Toquepala and Cuajone (SPCC), the Tintaya operation and Cerro Verde (Phelps Dodge). It is located in the district of Apurimac, 260 kilometres from Cuzco. Exploration work indicated a resource in excess of 500 million tonnes and copper grades of over 1%.

Xstrata Peru continues to progress work and liaise with ProInversion, Centromin and the Government of Peru to complete exploration and feasibility work in accordance with the option contract. During or at the end of this period, Xstrata Peru has the right to exercise its option to develop the copper operation.

(w) A US$1,400,000,000 multi-currency revolving facilities and subscription agreement dated 28 May 2004 ("the First Facility Agreement") pursuant to which Barclays Bank PLC, BNP Paribas SA, London Branch, Deutsche Bank AG London, Dresdner Bank Luxembourg SA, HSBC Bank PLC, J.P. Morgan Europe Limited, RBS and other lenders provided general purpose working capital facilities (the "First Facilities") to Xstrata (Schweiz) AG and certain other members of the Former Xstrata Group. The First Facility Agreement was entered into in the ordinary course of business and is on customary terms.

The First Facilities consisted of: (i) a 60-month term loan facility for US$1,000,000,000 ("Facility A"); and (ii) a 364-day revolving loan facility with an extension option for US$400,000,000 ("Facility B").

Interest was payable on loans pursuant to the First Facilities at the rate which was the aggregate of: (i) LIBOR; (ii) mandatory costs (being regulatory costs of the lenders which are passed on to the borrowers); and (iii) the margin, which in respect of Facility A was 0.50% per annum and in respect of Facility B was 0.40% per annum.

The First Facilities included certain mandatory prepayment events, including: (i) illegality; (ii) a change of control of the Guarantor; (iii) disposal of assets (subject to certain thresholds); and (iv) incurring indebtedness for borrowed money and equity issues.

The First Facility Agreement contained representations, warranties and undertakings (including financial condition covenants and undertakings) and contained a guarantee from the Guarantor and certain other members of the Former Xstrata Group in favour of the lenders of the First Facilities, which were typical for this type of credit agreement. The First Facility Agreement also contained customary events of default upon the occurrence of which the lenders were entitled to and demand repayment of the First Facilities.

The Guarantor prepaid the First Facilities using funds made available to it pursuant to the Acquisition Facilities Agreement. Members of the Enlarged Xstrata Group no longer have the right to borrow, nor the lenders any obligation to lend, funds pursuant to the First Facility Agreement.

(x) A notarial pooling and sharing agreement between Xstrata South Africa and Merafe Resources Limited ("Merafe") dated 23 February 2004 (the "Pooling and Sharing Agreement") establishing the Xstrata Merafe Chrome Venture, pursuant to which the parties pool their respective South African chrome and ferrochrome assets in the Pooling and Sharing Venture ("PSV") and share in the earnings from such assets.

The Enlarged Xstrata Group's Chrome Business assets consist of five operating chromite mines and 18 ferrochrome furnaces, all of which are managed through the PSV. Two of the ferrochrome furnaces were until 16 November 2005 owned in a 50/50 production joint venture, known as the Gemini Joint Venture, with Samancor Limited ("Samancor"), a major South African ferrochrome producer. Merafe concluded a transaction with Samancor which resulted in Merafe replacing Samancor in the Gemini Joint Venture and all associated mining activities with effect from 16 November 2005. The assets and business of the Gemini Joint Venture and certain strategic chrome reserves which were also acquired as part of the transaction have been incorporated within the PSV. The assets are now managed along with all of the other PSV assets and fall under the control and management of the Joint Board of the PSV.

Xstrata South Africa's attributable interest in the PSV is staggered over time, with its current participation of 83% scheduled to decrease to 79.5% from 1 July 2006. Immediately following the formation of the PSV on 1 July 2004, Merafe's participation was 11%. Under the terms of the pooling arrangements, Merafe's interest increased to 14% on 1 July 2005, to 17% on 16 November 2005 and following the contribution of its share of the Gemini Joint Venture assets, again increased to 20.5% from 1 July 2006.

The following addenda and adjustment agreements have been entered into in relation to the above arrangements:

(i) an addendum dated 8 April 2004 between Xstrata South Africa and Merafe, pursuant to which the parties agreed to extend the date of fulfilment of a suspensive condition in the Pooling and Sharing Agreement;

(ii) a second addendum dated 30 April 2004 between Xstrata South Africa and Merafe, pursuant to which the parties agreed to extend the date of fulfilment of a suspensive condition in the Pooling and Sharing Agreement;

(iii) a third addendum dated 25 June 2004 between Xstrata South Africa and Merafe, pursuant to which the parties agreed to reinstate the Pooling and Sharing Agreement with effect from 31 May 2004, extend the date of fulfilment of the suspensive conditions contained in the Pooling and Sharing Agreement and amend the provisions of the Pooling and Sharing Agreement relating to EBITDA and capital expenditure;

(iv) a fourth addendum dated 8 December 2004 between Xstrata South Africa and Merafe, pursuant to which the parties amended various provisions in the Pooling and Sharing Agreement pertaining to EBITDA, net working capital, environmental obligations, maintenance capital, the inclusion by Xstrata South Africa of a further asset in the PSV and various other miscellaneous issues;

(v) an agreement dated 3 May 2005 between Xstrata South Africa, Merafe and Merafe Ferrochrome and Mining (Proprietary) Limited ("Merafe Ferrochrome") in relation to the adjustment of the parties' respective participation interests in the PSV, pursuant to which the parties agreed to amend the Pooling and Sharing Agreement so that Merafe's share in the PSV would increase to 17%; and

(vi) a fifth addendum dated 15 November 2005 between Xstrata South Africa, Merafe and Merafe Ferrochrome, pursuant to which the parties conditionally agreed to amend the Pooling and Sharing Agreement to make provision for the inclusion of the Project Lion ferrochrome expansion project as part of the PSV and the consequent adjustment of Merafe's share in the PSV so that, with effect from 1 July 2006, Merafe's share in the PSV increased to 20.5%.

Xstrata South Africa, Merafe and Merafe Ferrochrome are currently discussing a sixth addendum agreement pursuant to which it is expected Xstrata South Africa will agree to loan to the PSV US$100 million. It is expected that the sixth addendum agreement will provide that until Merafe has repaid the loan together with interest at the prime rate, EBITDA cash distributions to Merafe in terms of the Pooling and Sharing Agreement will be subject to certain restrictive provisions and until otherwise agreed by the parties, Xstrata South Africa will be entitled to a pro rata portion of the EBITDA cash distributions made to Merafe.

(y) On 15 August 2003, the Issuer issued the 2010 Convertible Bonds, which are convertible at the option of the holder, at any time after 26 September 2003, into 3.95% exchangeable redeemable preference shares of the Issuer which are exchangeable immediately upon issuance for fully paid new Ordinary Shares. The 2010 Convertible Bonds are guaranteed by the Guarantor and were issued at par and bear a coupon of 3.95% per annum. Interest on the 2010 Convertible Bonds is payable semi-annually in arrear in equal instalments on 15 February and 15 August each year. The initial exchange price is £6.10. Unless previously redeemed or converted or purchased and in each case cancelled, the 2010 Convertible Bonds will be redeemed on 15 August 2010 (the "2010 Convertible Bonds Final Maturity Date") at their principal amount plus unpaid accrued interest (if any). Prior to the 2010 Convertible Bonds Final Maturity Date, the Issuer may, in certain circumstances, on giving notice, redeem all but not some only of the 2010 Convertible Bonds then outstanding at their principal amount plus unpaid accrued interest (if any).

(z) The Relationship Agreement dated 20 March 2002 between the Guarantor and Glencore International regulating the continuing relationship between the parties and ensuring the Guarantor is capable of carrying on its business independently of Glencore and of Glencore International as controlling shareholder, a description of which is set out in Part I — "Description of the Enlarged Xstrata Group — Relationship with Glencore — Relationship with controlling shareholder" of these Listing Particulars.

13. Public takeovers

There have been no public takeover offers by third parties in respect of the Guarantor's shares during the last and current financial year.

14. Litigation

Enlarged Xstrata Group

Except as set out below, neither the Guarantor nor any other member of the Enlarged Xstrata Group is engaged in or, so far as the Guarantor is aware, has pending or threatened, any governmental, legal or arbitration proceedings which may have, or have had in the recent past (covering the 12 months preceding the date of these Listing Particulars), a significant effect on the Guarantor and/or the Enlarged Xstrata Group's financial position or profitability.

Total Coal arbitration and court proceedings

There are arbitration proceedings pending between Tavistock Collieries (Proprietary) Limited ("Tavistock"), a member of the Former Xstrata Group, and Total Coal South Africa (Proprietary) Limited ("Total Coal"). The aforesaid arbitration proceedings relate to a joint venture agreement between Tavistock and Total Coal. The joint venture agreement has been cancelled. The arbitration proceedings are concerned with, amongst other things:

(a) the dissolution of the joint venture and the manner in which the assets contributed to the joint venture by the parties are to be distributed;

(b) a determination as to which party breached the joint venture agreement;

(c) a claim for damages by Tavistock from Total Coal of an amount of ZAR835,963,019.19 (approximately US$107 million); and

(d) a claim for damages by Total Coal from Tavistock of an amount of ZAR1,734,082,000.00 (approximately US$221 million).

The aforesaid claims for damages are amounts referred to in the pleadings exchanged between the parties and remain subject to determination in terms of the arbitration proceedings. The Guarantor is of the view that Tavistock is entitled to dissolve the joint venture as a result of a breach by Total Coal.

On 2 May 2006, summonses were served on Tavistock, Xstrata South Africa, Duiker Mining (Pty) Ltd ("Duiker"), Phoenix Collieries (Pty) Ltd ("Phoenix") and other parties outside of the Enlarged Xstrata Group in respect of a South African High Court action instituted by Total Coal. The relief claimed by Total Coal in the action is concerned with following:

(a) various declaratory orders relating to, amongst other things, Total Coal's alleged undivided interest in the ATCOM mining area and the alleged obligations of Tavistock, Xstrata South Africa and Duiker in terms of a letter agreement dated 15 August 2002 between Total Coal, Tavistock, Xstrata South Africa (Proprietary) Limited and Duiker Mining (Pty) Ltd concerning the mining authorisation and subsequent mining right in respect of the ATC and ATCOM mining areas (the "Letter Agreement");

(b) alternatively, an order that Tavistock, Xstrata South Africa and Duiker pay damages to Total Coal amounting to ZAR1,494,854,000.00 (approximately US$191 million); and

(c) that the arbitration agreement between Tavistock and Total Coal be ordered in terms of section 3(2) of the South African Arbitration Act 42 of 1965 to cease to have effect in relation to all issues arising from this action.

Prior to Total Coal amending the relief sought by it in the arbitration, Total Coal sought, amongst other things, an order that Tavistock take all reasonable steps to ensure that the mining authorisation was reflected as vesting in Tavistock and Total Coal jointly in the relevant permits and/or records and/or registry of the relevant authorities.

Total Coal also sought a declaration that in the event that either of the parties subsequently seeks partition of the property rights co-owned by the parties to the joint venture, that such partition is to be effected by dividing the joint operating assets equally between them.

Total Coal relied upon, amongst other things, the provisions of the Letter Agreement, which provides that Tavistock, Duiker and Xstrata undertake to deal with the mining authorisation as if Total Coal is the registered co-holder thereof.

After the amendment effected by Total Coal to its relief sought in the arbitration, it now seeks substantially the same relief in the High Court proceedings.

Arbitration proceedings were conducted between the parties during the period from 22 May 2006 to 15 June 2006. At the conclusion of the arbitration session (on 15 June 2006) the arbitration tribunal issued an award which has substantially disposed of the issue relating to the manner in which the assets contributed by the parties to the joint venture are to be distributed. Further arbitration proceedings were conducted in September 2006. The purpose of such arbitration proceedings is to deal, amongst other things, with the effect of the Letter Agreement. Currently, various interlocutory applications pertaining to the Letter Agreement remain pending before the arbitration panel and the

merits concerning the effect of Letter Agreement have not been fully dealt with. The arbitration proceedings have now been adjourned until February 2007.

It is not possible to state with any certainty when all of the disputes between Tavistock and Total Coal will be finalised.

Based on legal advice obtained, the Guarantor is of the view that the Enlarged Xstrata Group's prospects of success in the arbitration and in the High Court proceedings are good.

Hualfin proceedings

The Argentinean Municipality of Hualfin and its directors notified Minera Alumbrera Limited ("MAA"), in which the Enlarged Xstrata Group has a 50% interest, of proceedings against MAA in April 2005. The claim, for an amount of ARS474 million (approximately US$153 million) (relating to principal, interest and penalties) which was notified to MAA in May 2006, is in respect of alleged unpaid tax and royalties for the period from 1999 to 2004. MAA's position is that the claim is unjustified and/or unconstitutional and the existing Fiscal Stability Regime and Argentinean Constitution provide MAA with the requisite protection. MAA has filed a remedy with the Municipality for it to revoke the resolution specifying the amount of the claim. The remedy has not yet been resolved by the Municipality and negotiations with the Municipality continue. Based on legal advice obtained, the Guarantor is of the view that the prospects of MAA being liable for the claim are low.

Sulphuric acid class action lawsuits

Class action lawsuits have been filed in various jurisdictions in the United States with respect to alleged sulphuric acid marketing and sales anti-trust violations by the Falconbridge Group. These lawsuits have been consolidated into the District Court in Chicago, with those filed in state court in California having been consolidated into the San Francisco state court. Falconbridge is vigorously defending these actions and has asserted that they are without merit. The plaintiffs claim actual damages in the amount of approximately US$160 million, before trebling, plus attorney fees and costs. Under the relevant US antitrust law, if the plaintiffs were to be successful then the actual damages assessed by the jury would be automatically trebled. Based on the strength of the available defences, the weakness of the plaintiffs' claims, the amount of previously negotiated settlements by third parties and legal advice obtained, the Guarantor believes that it is unlikely that the plaintiffs will recover the damages sought.

Issuer

The Issuer is not engaged in nor, so far as the Issuer is aware, has pending or threatened, any governmental, legal or arbitration proceedings which may have, or have had in the recent past (covering the 12 months preceding the date of these Listing Particulars), a significant effect on the Issuer's financial position or profitability.

15. Bases and sources

General

The Enlarged Xstrata Group operates in industries in which it is difficult in certain cases to obtain precise industry and market information. Unless the source is otherwise stated and except as described below in relation to third party information:

- the industry and market data in these Listing Particulars have been extracted without material amendment from the Enlarged Xstrata Group's management records;
- the non-financial operating data included in these Listing Particulars have been extracted without material amendment from the Enlarged Xstrata Group's management records;
- the financial information included in these Listing Particulars in respect of the Former Xstrata Group has been extracted without material amendment from the financial statements and the financial information which has been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars, namely the 2006 Xstrata Interim Report, the Xstrata Annual Reports and Accounts and the Guarantor's accounting records.

- the financial information included in these Listing Particulars in respect of the Falconbridge Group has been extracted without material amendment from the financial statements and financial information which have been incorporated by reference into these Listing Particulars as described in Part III — "Information incorporated by reference" of these Listing Particulars, and the Falconbridge Group's accounting records;
- the financial information included in these Listing Particulars in respect of Cerrejón and the Cerrejón Business has been extracted without material amendment from the audited financial statements in respect of Cerrejón and Cerrejón's accounting records; and
- the financial information included in these Listing Particulars in respect of Tintaya has been extracted without material amendment form the audited financial statements of Tintaya and Tintaya's accounting records.

Information from third party sources

The information contained in these Listing Particulars that has been extracted from a third party source comprises the market capitalisation information referred to in Part II — "Presentation of information — Market and industry information — Competitive statements" of these Listing Particulars which is sourced from Bloomberg and Datastream. This information has been accurately reproduced and, so far as the Issuer is aware, and so far as it is able to ascertain from information published by that third party, no facts have been omitted which would render the reproduced information inaccurate or misleading.

16. Effect of issue of the Bonds

As at the date of these Listing Particulars, assuming that all the Bonds are converted into Preference Shares, those Preference Shares are exchanged into Ordinary Shares at the Exchange Price of 1527 pence per Ordinary Share (being the initial Exchange Price of 1713.15 pence less the downwards adjustment to the Exchange Price of 186.15 pence expected to take effect on 13 October 2006) and all New Shares have been issued, 13,575,432 new Ordinary Shares will be issued on exchange of those Preference Shares and existing Shareholders (including the holders of the New Shares) will be diluted by 1.4 per cent.

17. Expenses of the admission to trading

The Guarantor estimates that the total expenses of the admission to trading of the Bonds will be approximately £430,000 (approximately US$804,000).

18. Securities law considerations

18.1 The Bonds, the Guarantees, the Preference Shares and the Ordinary Shares have not been and will not be registered under the Securities Act and, subject to certain exceptions, may not be offered or sold within the United States or to, or for the account or benefit of, US persons. Terms used in this paragraph have the meanings given to them by Regulation S. In addition, until 40 days after the issue of the Bonds, an offer or sale of the Bonds, the Guarantees, the Preference Shares or the Ordinary Shares within the United States by any dealers may violate the registration requirements of the Securities Act.

18.2 No action has been taken in any jurisdiction by the Issuer or the Guarantor that would or is intended to permit a public offering of the Bonds in any jurisdiction where action for that purpose is required.

18.3 Persons into whose possession these Listing Particulars come are advised to inform themselves about and to observe any restrictions relating to the offering, sale, purchase or delivery of the Bonds or the possession or the distribution of these Listing Particulars or any other material relating to the Bonds, in all cases at their own expense. These Listing Particulars do not constitute an offer to purchase or a solicitation of any offer to sell any of the Bonds in any jurisdiction.

19. Documents available for inspection

Copies of the following documents are available for inspection during usual business hours on any weekday (Saturdays, Sundays and public holidays excepted) for a period of 12 months following

the date of publication of these Listing Particulars at the office of the Principal Paying, Transfer, Conversion and Exchange Agent:

(a) the memorandum of association and Articles of the Guarantor;

(b) the memorandum and articles of association of the Issuer;

(c) the Xstrata Annual Reports and Accounts, including the audited consolidated accounts and the independent auditors' reports for each of the years ended 31 December 2004 and 2005;

(d) the audited accounts and the independent auditors' reports of the Issuer for each of the years ended 31 December 2004 and 2005;

(e) the 2006 Xstrata Interim Report;

(f) the Trust Deed, the Paying, Transfer, Conversion and Exchange Agency Agreement and the Deed Poll;

(g) the information incorporated by reference into these Listing Particulars as described in the section of these Listing Particulars headed "Part III — Information incorporated by reference"; and

(h) these Listing Particulars.

PART XVII — FINANCIAL INFORMATION OF THE ISSUER

Introduction

The financial statements for the years ended 31 December 2004 and 31 December 2005, which were approved by the board of directors of the Issuer on 1 September 2006, and reported on by the auditors, Ernst & Young, Vondellaan 4, Oranjestad, Aruba, are set out below.

The financial statements for the years ended 31 December 2004 and 31 December 2005 of the Issuer have been prepared in accordance with UK GAAP. Effective for the year ended 31 December 2005, the Issuer continued to prepare its accounts in accordance with UK GAAP. However, UK GAAP changed to comply with IFRS and accordingly the Issuer changed its UK GAAP accounting policies where relevant. When required by UK GAAP, the 2004 comparative amounts disclosed have been restated to be consistent with the 2005 amounts. Note 2 of the financial statements for the year ended 31 December 2005 provides details of the new standards adopted and sets out the changes made to the comparatives.

ERNST & YOUNG

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF XSTRATA CAPITAL CORPORATION AVV

We have audited the Company's financial statements for the year ended 31 December 2004, which comprise the Profit and Loss Account, Balance Sheet, Statement of Cash Flows and the related notes 1 to 15. These financial statements have been prepared on the basis of the accounting policies set out therein.

Respective responsibilities of directors and auditors

As described in the Statement of Directors' Responsibilities the directors are responsible for the preparation of the financial statements in accordance with applicable United Kingdom accounting standards.

Our responsibility is to audit the financial statements in accordance with United Kingdom Auditing Standards and to report to you our opinion as to whether the financial statements give a true and fair view.

Basis of audit opinion

We conducted our audit in accordance with United Kingdom Auditing Standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed or audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

Opinion

In our opinion the financial statements give a true and fair view of the state of affairs of the Company as at 31 December 2004, and of its profit for the year then ended in accordance with accounting principles generally accepted in the United Kingdom.

Aruba, September 1, 2006

Xstrata Capital Corporation AVV

NOTES TO THE ACCOUNTS
at 31 December 2004

1. ACCOUNTING POLICIES

Basis of preparation

The accounts are prepared under the historical cost convention and in accordance with applicable United Kingdom accounting standards.

Investments

Investments are carried at cost less impairment.

Tangible fixed assets

Tangible fixed assets are recorded at cost.

Depreciation

Depreciation is provided on all tangible fixed assets at rates calculated to write off the cost of each asset evenly over its expected useful life, as follows:

Property, plant and equipment - over 4 years

Convertible Bond Finance Cost

Instruments are classified as liabilities if they contain an obligation to transfer economic benefits and if not they are included in shareholders' funds. Convertible financial instruments are recognised at inception at the fair value of the proceeds received net of issue costs in liabilities. The carrying amount of the convertible borrowing is increased by finance cost in respect of each period less any payments made. On redemption, any difference between the carrying amount of the liability and the payment made is recognised in the profit and loss account. On conversion, the carrying amount is allocated to equity, with no gain or loss recognised.

Revenue

Interest income is recognised as earned on an accruals basis using the effective interest method. Income on other services is recognised when the service has been rendered, when the amount of revenue (and associated costs) can be reliably measured and it is probable that economic benefits will flow to the company.

Foreign currencies

Assets, liabilities, revenues and costs denominated in foreign currencies are recorded at the rate of exchange ruling at the date of transaction. Monetary assets and liabilities at the balance sheet date are translated at year end rates of exchange. Exchange differences arising are reported as part of the result for the year. Exchange gains and losses on long term loan investments are recorded in equity when specific criteria are met.

2. OPERATING LOSS

	Year Ended 31 December 2004 US$000	Year Ended 31 December 2003 US$000
This is stated after charging:		
Depreciation of owned fixed assets	9	10
Auditors remuneration	18	2

3. DIVIDEND

	Year Ended 31 December 2004 US$000	Year Ended 31 December 2003 US$000
Interim dividend paid on ordinary shares	7,000	98,900
Final Dividend	500,000	500,000

	590,407	588,701

On 15 August 2003, the company issued US$600 million of Convertible Bonds due 15 August 2010 convertible at the option of the holder into fully paid Xstrata plc ordinary shares. As consideration for the Xstrata plc issuing shares to the holders of the bonds the Company will issue 600,000 preference shares to Xstrata plc. The Convertible Bonds are guaranteed by the Xstrata plc and were issued at par and bear a coupon of 3.95% per annum. They will be convertible at any time after 26 September 2003 at the option of the holder into 61,180,977 ordinary shares in Xstrata plc based on a conversion price of GBP6.10 (US$9.81 converted into GBP at a fixed exchange rate) per ordinary share, a 39.6% premium to the closing price of Xstrata plc's ordinary shares on August 1, 2003. On the giving of not less than 30 days notice, the Convertible Bond may be called by the company at par

plus accrued interest if the share price is 30% higher than the conversion price for 20 dealing days within a 30-day period, at any time on or after 6 September 2007. If 85% or more of the bonds originally issued have been converted and/or redeemed, then the remainder of the bonds can be redeemed by the company. If not converted or previously redeemed, the Convertible Bonds will be redeemed at par on 15 August 2010.

9. CALLED UP SHARE CAPITAL

	Authorised		Allotted Called Up and Fully Paid

Cash at bank	142	66	208
	142	66	208

13. ULTIMATE CONTROLLING PARTY

The company's ultimate controlling party is Xstrata plc.

14. POST BALANCE SHEET EVENTS

During 2006 US$368,891,000 of the US$600 million Guaranteed Convertible Bonds due in 2010 was converted at the option of the holders into 37,615,177 Xstrata plc shares. These shares were issued in exchange for 368,891 preference shares in Xstrata Capital Corporation AVV issued under the conversion mechanisms in place.

During 2006 US$50.9 million due from third parties at 31 December 2004 was settled for proceeds of approximately US$128 million.

During 2006 US$53.7 million due from third parties at 31 December 2004 was converted via agreements between the parties into additional investments in subsidiaries.

None of the above transactions have been reflected in the 31 December 2004 financial statements.

15. FINANCIAL INSTRUMENTS

The company is exposed to foreign exchange risk and interest rate risk in the normal course of business.

Foreign Currency Risk

The company is exposed to foreign currency risk, primarily in respect of its receivables.

Interest Rate Risk

The interest rate profile of the company as at 31 December 2004 is:

	US$000	Weighted Average Interest Rate Per Annum
Fixed Rate		
Loans to Group Undertakings	4,832,553	4.91
Loans to third parties	120,508	13.99
Convertible bond	600,000	3.95
Floating Rate		
Cash at bank	208	

The interest rate profile of the Company at 31 December 2003 was:

	US$000	Weighted Average Interest Rate Per Annum
Fixed Rate		
Loans to Group Undertakings	4,803,139	4.95
Loans to third parties	59,014	13.99
Convertible bond	600,000	3.95
Floating Rate		
Cash at bank	142	

All other financial instruments are non-interest bearing.

Credit Risk

The company is generally exposed to credit risk in respect of its receivable. Where concentrations of risk exist management closely monitors this. Credit risk is minimal as the majority of receivables are from other Xstrata Group companies.

Fair Value

The fair value of the convertible borrowings at 31 December 2004 is US$1,140.8 million (2003: US$792.5 million.)

ERNST & YOUNG

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF XSTRATA CAPITAL CORPORATION AVV

We have audited the Company's financial statements for the year ended 31 December 2005, which comprise the Profit and Loss Account, Balance Sheet, Statement of Cash Flows and the related notes 1 to 16. These financial statements have been prepared on the basis of the accounting policies set out therein.

Respective responsibilities of directors and auditors

As described in the Statement of Directors' responsibilities the directors are responsible for the preparation of the financial statements in accordance with applicable United Kingdom accounting standards.

Our responsibility is to audit the financial statements in accordance with United Kingdom Auditing Standards and to report to you our opinion as to whether the financial statements give a true and fair view.

Basis of audit opinion

We conducted our audit in accordance with United Kingdom Auditing Standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

Opinion

In our opinion the financial statements give a true and fair view of the state of affairs of the company as at 31 December 2005, and of its profit for the year then ended in accordance with accounting principles generally accepted in the United Kingdom.

Aruba, September 1, 2006

NOTES TO THE ACCOUNTS
at 31 December 2005

1. ACCOUNTING POLICIES

Basis of preparation

These financial statements have been prepared in accordance with applicable UK accounting standards (refer to note 2 for changes in these standards). Xstrata Capital Corporation AVV (the Company) has adopted the following principal accounting policies:

The functional currency of the Company is US$ dollars.

Property, plant and equipment

Property, plant and equipment is recorded at cost.

Depreciation

Depreciation is provided on all items of property, plant and equipment at rates calculated to write off the cost of each asset evenly over its expected useful life, as follows:

Property, plant and equipment - over 4 years

Impairment

The carrying amounts of property, plant and equipment are reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable. If there are indicators of impairment, an exercise is undertaken to determine whether the carrying values are in excess of their recoverable amounts. Such review is undertaken on income generating units.

If the carrying amount of an asset exceeds its recoverable amount, a provision is recorded to reflect the asset at the lower amount. In assessing recoverable amount for property, plant and equipment, the relevant future cash flows expected to arise from the continuing use of such assets and from their disposal have been discounted to their present value using a market-determined discount rate.

Financial Assets

As outlined in Note 2 financial instruments have been accounted for in accordance with historic UK GAAP prior to 1 January 2005 when FRS 25 and 26 were adopted.

FRS 25 & 26 policy

Financial assets are classified as either financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments or available-for-sale financial assets, as appropriate. The Company determines the classification of its financial assets at initial recognition. When financial assets are recognised initially, they are measured at fair value on the trade date, plus, in the case of investments not at fair value through profit or loss directly attributable transaction costs.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, do not qualify as trading assets and have not been designated as either fair value through profit and loss or available for sale. Such assets are carried at amortised cost using the effective interest method. This cost is computed as the amount initially recognised minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initially recognised amount and the maturity amount.

Gains and losses are recognised in the profit and loss account when the loans and receivables are derecognised or impaired, as well as through the amortisation process. Loans and receivables are derecognised when the Company no longer has a right to receive cash flows from the asset.

Available-for-sale financial assets

Available-for-sale financial assets are those non-derivative financial assets that are designated as available-for-sale or are not classified in any other category. After initial recognition available-for-sale financial assets are measured at fair value with gains or losses being recognised as a separate component of equity until the investment is derecognised or until the investment is determined to be impaired at which time the cumulative gain or loss previously reported in equity is included in the profit and loss account.

Listed share investments are carried at fair value based on stock exchange quoted prices at the balance sheet date. Unlisted shares in subsidiaries are carried at fair value where it can be reliably obtained, otherwise they are stated at cost less any impairment.

Fair values

The fair value of quoted financial assets is determined by reference to bid prices at the close of business on the balance sheet date. Where there is no active market, fair value is determined using valuation techniques. These include recent arm's length market transitions; reference to current market value of another instrument which is substantially the same; discounted cash flow analysis and pricing models.

Derivative financial instruments are valued using applicable valuation techniques such as those outlined above.

Impairment of financial assets

Loans and receivables

If there is objective evidence that an impairment loss on loans and receivables has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced and the amount of the loss is recognised in profit or loss account. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. Any subsequent reversal of an impairment loss is recognised in the profit and loss account, to the extent that the carrying value of the asset does not exceed its amortised cost (that would have been measured if there had been an impairment) at the reversal date.

Investments carried at cost

If there is objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value (because its fair value cannot be reliably measured), the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

Available-for-sale financial assets

If an available-for-sale financial asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortisation) and its current fair value, less any impairment loss previously recognised in profit or loss, is transferred from equity to the profit and loss account. Reversals in respect of equity instruments classified as available-for-sale are not recognised in profit.

Derivative financial instruments and hedging

The Company uses swap contracts to hedge its risks associated with interest rate risk. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative

contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

Any gains or losses arising from changes in fair value on derivatives that do not qualify for hedge accounting are taken directly to profit or loss for the year.

The fair value of interest rate swap contracts is determined by reference to market values for similar instruments.

For the purpose of hedge accounting, interest rate swaps are classified as fair value hedges. At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges which meet the strict criteria for hedge accounting are accounted for as follows:

Fair value hedges

Fair value hedges are hedges of the Company's exposure to changes in the fair value of a recognised asset or liability that could affect profit or loss. The carrying amount of the hedged item is adjusted for gains and losses attributable to the risk being hedged, the derivative is re-measured at fair value and gains and losses from both are taken to profit or loss.

For fair value hedges relating to items carried at amortised cost, the adjustment to carrying value is amortised through profit or loss over the remaining term to maturity. Any adjustment to the carrying amount of a hedged financial instrument for which the effective interest method is used is amortised to profit or loss.

Amortisation begins when the hedged item ceases to be adjusted for changes in its fair value attributable to the risk being hedged.

The Company discontinues fair value hedge accounting if the hedging instrument expires or is sold, terminated or exercised, the hedge no longer meets the criteria for hedge accounting or the Company revokes the designation.

Historic UK GAAP policy

Investments are carried at cost less any provision for impairments which are recognised when it is assessed that the carrying amount of the asset is no longer recoverable.

The Company is exposed to interest rate risks. The Company may use swap contracts to reduce its exposure to such risks. Hedge accounting is applied whereby gains and losses on these contracts are recognised in the period to which the gains and losses of the underlying transactions relate. Where the underlying transaction can no longer be identified, gains or losses on the hedge contract are recognised in the profit and loss account. Where the hedge contracts are terminated early and the underlying transaction can no longer be identified, the gain or loss on the terminated hedge contract is recognised in the profit and loss account. Where the hedged transaction is still expected to occur, the gain or loss on the terminated hedge transaction is deferred until the underlying transaction occurs.

Convertible Bond

As outlined in Note 2 financial instruments have been accounted for in accordance with historic UK GAAP prior to 1 January 2005 when FRS 25 and 26 were adopted.

FRS 25 & 26 policy

On issue of the convertible instrument, the fair value of the liability component is determined using a market rate for a non-convertible instrument. This value is carried as a long term liability on the amortised cost basis until extinguished on conversion or redemption. The remainder of the proceeds is allocated to a separate component of equity, net of issue costs, which remains constant in subsequent periods. Issue costs are apportioned between the liability and equity components based on their respective carrying amounts when the instrument was issued.

On conversion, the liability is reclassified to equity and no gain or loss is recognised in the profit or loss. Where the convertible borrowing is redeemed early or repurchased in a way that does not alter the original conversion privileges, the consideration paid is allocated to the liability and equity components. The consideration relating to the equity component is recognised in equity and the amount of gain or loss relating to the liability element in profit or loss.

The finance costs recognised in respect of the convertible borrowings will include the accretion of the liability component to the amount that will be payable on redemption.

Historic UK GAAP Policy

Instruments are classified as liabilities if they contain an obligation to transfer economic benefits and if not they are included in the shareholders' funds. Convertible finance instruments are recognised at inception at the fair value of the proceeds received net of issue costs in liabilities. The carrying amount of the convertible borrowing is increased by finance cost in respect of each period less any payments made. On redemption, any difference between the carrying amount of the liability and the payment made is recognised in the profit and loss account. On conversion, the carrying amount is allocated to equity, with no gain or loss recognized.

Foreign currencies

Assets, liabilities, revenues and costs denominated in foreign currencies are recorded in $US at the rate of exchange ruling at the date of transaction. Foreign currency monetary assets and liabilities at the balance sheet date are translated at year end rates of exchange. Exchange differences are recorded in the profit and loss account.

Effective 1 January 2005, Xstrata Finance agreed to assume the risk and rewards of foreign exchange gains and losses on receivables held by the Company relating to other Xstrata Group companies in currencies other than the United States dollar, as shown on the balance sheet of Xstrata Capital on 31 December 2004 ("the Receivables") and any additional such receivables which may arise thereafter.

At each calendar month end, commencing 31 January 2005, Xstrata Capital will calculate the foreign currency gains or losses arising on the revaluation of the receivables, based on the month end currency exchange rates, and compensation will be due to or from Xstrata Finance for an amount equal to the calculated gain or loss respectively.

Xstrata Shares held by Batiss

The shares held by Batiss will either be used by the Group as a source of financing for future acquisitions, in keeping with the Group's growth strategy, or placed in the market.

The total balance of the shares is reported as an available for sale financial asset in the balance sheet of the company.

Revenue

Interest income is recognised as earned on an accruals basis using the effective interest method.

Income on other services is recognised when the service has been rendered, when the amount of revenue (and associated costs) can be reliably measured and it is probable that economic benefits will flow to the company.

Comparatives

Where necessary, comparatives have been adjusted to disclose them on the same basis as the current period.

Use of estimates

The presentation of these financial statements in conformity with generally accepted accounting practice requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statement and reported amounts of revenue and expenses during the reporting period. Actual outcomes could differ from these estimates.

2. CHANGE OF ACCOUNTING POLICIES

As outlined in Note 1 these financial statement have been prepared in accordance with applicable UK accounting standards. In preparing the financial statements for the current year, the Company has adopted the following Financial Reporting Standards (FRS) for the first time.

- FRS 21 Events after the Balance Sheet Date;
- FRS 23 The effects of changes in foreign exchange rates;
- FRS 25 Financial instruments: Disclosure and presentation;
- FRS 26 Financial instruments: Measurement; and
- FRS 28 Corresponding Amounts

All standards have been retrospectively applied except for FRS 25 and FRS 26 which have only been applied from 1 January 2005.

The adoption of FRS 21 has resulted in changes in the accounting for dividends, whilst the adoption of FRS 23 has resulted in changes in the accounting for foreign currency gains. The adoption the of FRS 25 and 26 has resulted in changes in the accounting for investments, hedging and convertible financial instruments (refer below).

The adoption of FRS 25 and FRS 26 has decreased the profit of the company by US$7.5 million in the year to 31 December 2005. There has been no material impact on the profit and loss account in 2005 from the adoption any other standards.

The adoption of FRS 23 increased the profit of the prior year by US$345,365. There was no material impact from the adoption of other standards.

FRS 21

The company now accrues for a dividend if the dividend has been appropriately approved and is no longer at the discretion of the entity whereas previously it recorded an accrual for dividends payable when the dividend was proposed to shareholders.

FRS 23

The company previously recorded foreign currency exchange gains and losses on long term investments and borrowings directly in equity. The company now includes such amounts in its profit and loss account.

FRS 25 and 26

FRS 25 and FRS 26 were adopted with effect from 1 January 2005 and as permitted, the 2004 comparatives have not been restated. The main impacts of these standards for the Company are:

- Derivative financial instruments are initially recorded at fair value and then for reporting purposes remeasured to fair value at subsequent balance sheet dates.

  Changes in the fair value of derivative financial instruments that are designated as and are effective as fair value hedges of assets or liabilities are taken to the profit and loss account. The carrying value of the hedged item is adjusted for the gains or losses attributed to the risk being hedged with the gain or loss being recorded in the profit and loss account.

  Changes in the fair value of derivative financial instruments that do not qualify for hedge accounting are recognised in the profit and loss account as they arise.

- Financial assets are classified and measure din accordance with FRS 26. The impact of this on the Company is that available-for-sale financial assets are initially reported at fair value plus transaction costs when entered into and then for reporting purposes are re-measured to fair value at subsequent balance sheet dates with the movements in the fair value being deferred in a separate component of equity until the investment is impaired or disposed of, when the cumulative gain or loss deferred in equity is reclassified in the profit and loss account.

- The liability component of convertible financial instruments is measured using a market rate for an equivalent non-convertible instrument with the difference between the proceeds received on issuing the instrument and the liability component being allocated to a separate component of equity. The liability component is re-measured on an amortised cost basis until extinguished on conversion or redemption. On conversion, the carrying amount of the liability component is allocated to equity, with no gain or loss being recognised. On redemption, any difference between the amount of the liability component and payments made is recognised in the profit and loss account.

Prior to the adoption of FRS 25 and 26:

- Investments are carried at cost less any provision for impairments which are recognised when it is assessed that the carrying amount of the asset is no longer recoverable.

- Hedge accounting is applied whereby gains and losses on the swap contracts are recognised in the period to which the gains and losses of the underlying transactions related. Where the underlying transaction can no longer be identified, gains or losses on the hedge contract are recognised in the profit and loss account. Where the hedge contracts are terminated early and the underlying transaction can no longer be identified, the gain or loss on the terminated hedge contract is recognised in the profit and loss account. Where the hedged transaction is still expected to occur, the gain or loss on the terminated hedge transaction is deferred until the underlying transaction occurs.

- Convertible financial instruments are recognised at inception as liabilities at the fair value of the proceeds received net of issue costs. The carrying amount of the instrument is increased by the finance cost for each period less payments made. On redemption, any difference between the carrying amount of the liability and the payments made is recognised in the profit and loss account. On conversion, the carrying amount is allocated to equity, with no gain or loss recognised on conversion.

The main differences that arise as a result of the changes in policy are outlined in the reconciliation below and relate to:

- All derivatives being brought onto the balance sheet at fair value.

- Instruments classified as available-for-sale being separately classified and measured at fair value.

- The liability component of convertible financial instruments being re-measured with an adjustment to equity.

Total Shareholders funds	4,888,228		66,128	4,954,356

Notes to the reconciliation

- The fair value of the liability component of the convertible borrowings on issue date was determined using a market rate for a non-convertible instrument. The remaining balance of US$63.4 million was allocated to a separate component of equity, net of issue costs. The amortised cost adjustment on the liability component of US$10.0 million was adjusted to Retained earnings. The interest payable on the bond was swapped from a fixed to floating interest rate and the fair value of this interest rate swap of US$11.1 million has been recorded in non-current Derivative financial assets, US$9.9 million adjusted against the carrying value of the Convertible borrowings and US$1.2 million adjusted to Retained earnings.
- An interest rate swap from floating to fixed rates with a fair value of US$2.3 million has been recorded in current Derivative financial assets and Other reserves.

- Available for sale financial assets were reclassified and revalued to fair value based on the stock exchange quoted price at balance sheet date. This resulted in an increase of the value to the investment by US$9.3 million.

3. OPERATING LOSS

	Year Ended 31 December 2005 US$000	Year Ended 31 December 2004 $000
This is stated after charging:		
Depreciation of owned fixed assets	10	9
Auditors remuneration	10	18

4. DIVIDEND

	Year Ended 31 December 2005 US$000	Year Ended 31 December 2004 $000
Declared and paid during this year:		
Final dividend for 2003	—	500,000
Final dividend for 2004	500,000	—
Interim dividend paid on ordinary shares	—	7,000
Final Dividend 2005 (approved but unpaid)	500,000	—

5. TANGIBLE FIXED ASSETS

	Property Plant & Equipment US$000
Cost:	
At 1 January 2005	39
Additions	—
At 31 December 2005	39
Depreciation:	
At 1 January 2005	23
Charge for year	10
At 31 December 2005	33
Net book value:	
31 December 2005	6

6. INVESTMENTS AND PARTICIPATIONS

	At 31 December 2005 US$000	At 31 December 2004 US$000
Investment in subsidiary undertakings	121,479	121,479
Available for sale financial assets	818,107	
Investment third parties	—	108
	939,586	121,587

Available for sale financial assets primarily relate to the shares in Xstrata plc held by the Company through Batiss, purchased as part of Xstrata's Equity Capital Management Program.

7. INVESTMENTS-LOANS TO GROUP UNDERTAKINGS

	At 31 December 2005 US$000	At 31 December 2004 US$000
At 1 January	4,832,553	4,803,139
Additions / (Disposals)	1,503,181	(315,951)
Translation adjustments	—	345,365
At 31 December	6,335,734	4,832,553

8. CURRENT ASSETS

Loans and other receivables:	At 31 December 2005 US$000	At 31 December 2004 US$000
Amounts falling due within one year:		
Amounts due from fellow subsidiary undertakings	908	1,007
Amounts due — accrued income — fellow subsidiary undertakings	638,381	432,216
Amounts due from third parties	62,364	3
Amounts due — accrued income third parties	59,799	5,151
	761,452	438,377
Amounts falling due after more than one year.		
Amounts due from third parties	—	120,508
Amounts due — accrued income third parties	—	43,287
	—	163,795

9. CREDITORS:

Trade and other payables	At 31 December 2005 US$000	At 31 December 2004 US$000
Accruals and deferred income	13,661	8,896
Amounts due to fellow subsidiary undertakings	137,751	—
Accrued dividend payable	555,462	69,005[3]
	706,874	77,901

Convertible Bond	At 31 December 2005 US$000	At 31 December 2004 US$000
Convertible bonds	554,395	600,000
Bond issue costs	(7,690)	(9,593)
Convertible Bond Fair Value Adjustment (Interest rate swap)	(8,664)	
Convertible debenture	320,207	—
	858,248	590,407

[3] The 2004 dividend accrual is restated by US$500,000.

Convertible Bonds

On 15 August 2003, the company issued US$600 million of Convertible Bonds due 15 August 2010 convertible at the option of the holder into fully paid Xstrata plc ordinary shares. As consideration for the Xstrata plc issuing shares to the holders of the bonds the company will issue 600,000 preference shares to Xstrata plc. The Convertible Bonds are guaranteed by the Xstrata plc and were issued at par and bear a coupon of 3.95% per annum. They will be convertible at any time after 26 September 2003 at the option of the holder into 61,180,977 ordinary shares in Xstrata plc based on a conversion price of GBP6.10 (US$9.81 converted into GBP at a fixed exchange rate) per ordinary share, a 39.6% premium to the closing price of Xstrata plc's ordinary shares on August 1, 2003. On the giving of not less than 30 days notice, the Convertible Bond may be called by the company at par plus accrued interest if the share price is 30% higher than the conversion price for 20 dealing days within a 30-day period, at any time on or after 6 September 2007. If 85% or more of the bonds originally issued have been converted and/or redeemed, then the remainder of the bonds can be redeemed by the company. If not converted or previously redeemed, the Convertible Bonds will be redeemed at par on 15 August 2010. The liability component of the Convertible Bonds is carried at amortised cost based on an effective interest rate of 5.85% per annum.

The fixed interest rate on the bonds has been swapped to a floating rate. The swap has been accounted for as a fair value hedge.

Convertible Debenture

On 6 September 2005, the company issued a US$375 million Convertible Debenture to Brascan, due 14 August 2017, convertible at the option of the holder into fully paid Xstrata plc ordinary shares. As consideration for the Xstrata plc issuing shares to the holder of the debenture the company will issue 375,000 preference shares to Xstrata plc. The Convertible Debenture is guaranteed by the Xstrata plc and was issued at par, with a coupon of 4.0% per annum. It will be convertible at any time on or after 14 August 2006 at the option of the holder into 12,100,332 ordinary shares in Xstrata plc based on a conversion price of GBP17.13 (US$30.99 converted into GBP at a fixed exchange rate) per ordinary share, representing a 35% premium to the closing price of Xstrata plc's ordinary shares on 11 August 2005. On the giving of not less than 30 days' notice, the Convertible Debenture may be called by the company at par plus accrued interest, at any time after 14 August 2010. If not converted or previously redeemed, the Guaranteed Convertible Debenture will be redeemed at par on 14 August 2017. The liability component of the Convertible Bonds is carried at amortised cost based on an effective interest rate of 5.74% per annum.

	At 31 December 2005 US$000	At 31 December 2004 US$000
Derivative financial liabilities	(9,680)	—
	(9,680)	—

10. CALLED UP SHARE CAPITAL

	Authorised		Allotted (Called) Up and Fully Paid	
	2005 No.	2004 No.	2005 No.	2004 No.
Ordinary (Class A) shares of US$1 each	20,000	20,000	15,020	15,020
Class B Shares	20,000	20,000	51	51
Non-voting preferred shares	5,000,000	1,000,000	1,327,346	—
	5,040,000	1,040,000	1,342,417	15,071

On 14 November 2005 an amendment to company's articles of incorporation has been adopted to increase the authorised share capital of the company to increase the non-voting preferred shares to 5,000,000 shares with a nominal value of US$0.50 per share.

11. RECONCILIATION OF SHAREHOLDERS' FUNDS AND MOVEMENT ON RESERVES

[4] After reclassification of US$500,000 dividend accrual

[5] After reclassification of US$345,365 foreign exchange gains

On 28 June 2005, the board approved as share premium on the total shares A with value fully paid for cash of US$154,986.

On 29 July 2005 the board approved as share premium on the total shares A with value fully paid for cash of US$230,217.

On 24 November 2005 the board approved as share premium on the total shares A with value fully paid for cash of US$125,660.

On December 2005 1,327,346 Non voting preferred shares, with a nominal value of US$664 were issued fully paid for US$1,327,346.

12. RELATED PARTY TRANSACTIONS

No disclosure has been made of transactions with the fellow subsidiary undertakings in accordance with paragraph 3(c) of FRS8 'Related Party Disclosures', as the company is a wholly owned subsidiary of Xstrata plc. There were no transactions with any other related parties in 2004 and 2005.

13. NOTES TO THE STATEMENT OF CASH FLOWS

(a) Reconciliation of operating loss to net cash (outflow) /inflow from operating activities:

	Year Ended 31 December 2005 US$000	Year Ended 31 December 2004 US$000
Operating loss	(516)	(490)
Depreciation	10	9
Increase/(decrease) in creditors	15,437	(935)
(Increase) in debtors	(581,051)	(32,763)
	(566,120)	(34,179)

(b) Analysis of net debt:

	At 1 January 2004 US$000	Cash Flows US$000	At 31 December 2004 US$000
Cash at bank	142	66	208
	142	66	208

	At 1 January 2005 US$000	Cash Flows US$000	At 31 December 2005 US$000
Cash at bank	208	(78)	130
	208	(78)	130

During the year the Company issued a convertible debenture with a face value of US$375 million. The issuance of this debenture is not included in the Statement of Cash Flows (refer to note 9). Certain other transactions that occurred during the year were not settled in cash prior to year end.

14. ULTIMATE CONTROLLING PARTY

The company's ultimate controlling party is Xstrata plc

15. POST BALANCE SHEET EVENTS

Subsequent to year end US$368,891,000 of the US$600 million Guaranteed Convertible Bonds due in 2010 was converted at the option of the holders into 37,615,177 Xstrata plc shares. These shares were issued in exchange for 368,891 preference shares in Xstrata Capital Corporation AVV issued under the conversion mechanisms in place.

All available for sale assets, recorded at 31 December 2005 have been sold for proceeds of US$1,337.7 million. All amounts recorded, at 31 December 2005, in other reserves for these assets will be released to the profit and loss account in 2006.

In 2006 US$54.5 million due from third parties at 31 December 2005 was converted via agreements between the parties into additional investments in subsidiaries.

None of the above transactions have been reflected in the 31 December 2005 financial statements.

16. FINANCIAL INSTRUMENTS

The company is exposed to changes in currency exchange rates and interest rates. Derivative transactions are generally entered into solely to hedge these risks, with hedge accounting being applied when certain criteria have been met. Market fluctuations in derivative financial instruments designated as hedges are used to offset the fluctuation in underlying exposures. The company does not hold derivatives for trading purposes.

Interest Rate Risk

In order to borrow at a floating interest rate, the 2010 convertible bond, which bears fixed interest at 3.95%, was swapped to a floating rate of interest based on LIBOR.

The interest rate swap contract as at 31 December 2005 is as follows:

Fair value hedge

	Principal Amount	Average Rate	Fair Value
Maturing between 4 to 5 years	US$600 million	4.5%	(9,680)

There were no material derivatives in place at 31 December 2004.

The interest rate profile of the company as at 31 December 2005 is as follows:

	US$'000s	
Fixed rate		
Loan to Group Undertakings	6,335,734	No fixed repayment term
Amounts due from third parties	62,364	due within 1 year
Amount due to fellow subsidiaries	(137,751)	due within 1 year
Convertible Bond	(554,395)	due between 4 to 5 years
	(320,207)	due after 5 years
Floating rate		
Cash at bank	130	

The interest rate profile of the company as at 31 December 2004 was as follows:

	US$'000s	
Fixed rate		
Loan to Group Undertakings	4,832,553	No fixed repayment term
Amounts due from third parties	120,508	due within 1 to 2 years
Convertible Bond	(600,000)	due after 5 years
Floating rate		
Cash at bank	208	

All other financial instruments are non interest bearing and mature within one year.

Foreign Currency Risk

The company is exposed to foreign currency risk, primarily in respect of its receivables. As outlined in note 1, effective 1 January 2005, Xstrata Finance has agreed to assume the risk and rewards of foreign exchange gains and losses on receivables the company has with other Xstrata Group companies.

The net amount of financial instrument not denominated in US$ at 31 December 2005 is US$ 5,318,845,000 (2004: US$ 3,512,568,000). These instruments are denominated primarily in Euro, ZAR and AUD.

Credit Risk

The company is generally exposed to credit risk in respect of its receivable. Where concentrations of risk exists management closely monitors this. Credit risk is minimal as the majority of receivables are from other Xstrata Group companies.

Fair Value

The fair value of the convertible borrowings at 31 December 2005 is US$872.5 million compared to a carrying value of US$874.6 million. (2004: fair value of US$1,140.8 million and book value of US$600 million.) The fair values are calculating after considering appropriate market rates and values.

Summary of the principal differences between UK GAAP and IFRS

The financial statements of the Issuer for the years ended 31 December 2004 and 2005 have been prepared in accordance with UK GAAP. UK GAAP differs to IFRS, and accordingly the accounting policies adopted by the Issuer would have been different had IFRS been adopted. The following is a narrative description of the material changes that would have been made to accounting policies adopted to ensure conformity with IFRS. No attempt has been made to quantify the impact these changes would have had on the financial statements.

31 December 2004 financial statements of the Issuer

- Under IFRS, dividends are only accrued if they have been appropriately approved and are no longer at the discretion of the company. Under UK GAAP, dividends are accrued when they are proposed to shareholders.

- IFRS require that the liability component of convertible financial instruments be measured using a market rate for an equivalent non-convertible instrument, with the difference between the proceeds received on issuing the instrument and the liability component being allocated to a separate component of equity. The liability component is re-measured on an amortised cost basis until extinguished on conversion or redemption.

Under UK GAAP, convertible financial instruments are recognised at inception as liabilities at the fair value of the proceeds received net of issue costs. The carrying amount of the instrument is increased by the finance cost for each period less payments made.

- Under IFRS, financial assets classified as available for sale assets are initially reported at fair value plus transaction costs. At subsequent reporting dates the assets are re-measured to fair value with the movements in the fair value being deferred in a separate component of equity until the investment is impaired, or disposed of, when the cumulative gain or loss deferred in equity is reclassified to the profit and loss account.

- Under UK GAAP, investments are carried at cost less any provisions for impairments, which are recognised when the carrying amount of the asset is no longer recoverable.

- Under UK GAAP, foreign exchange differences arising on foreign investments were recorded in equity and offset by foreign exchange differences on borrowings used to finance such investments. Under IFRS, such differences can not be recorded in equity, but must be recorded in the profit and loss account. Subject to certain conditions, fair value hedging may be undertaken.

31 December 2005 financial statements of the Issuer

Following the changes to UK GAAP effective in 2005, there are no significant changes that would have to be made to the UK accounting policies adopted to ensure compliance with IFRS.

PART XVIII — ORE RESERVES AND MINERAL RESOURCES INFORMATION

1. Former Xstrata Group Ore Reserves and Mineral Resources Report

ORE RESERVES & MINERAL RESOURCES

1 March 2006

Ore Reserves and Mineral Resources in this report are reported in accordance with the 2004 Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves (the JORC Code), December 2004 unless otherwise stated. South African Coal Ore Reserves and Mineral Resources have been calculated according to the SAMREC Code (South African Code for Reporting of Mineral Resources and Mineral Reserves) this being similar to the JORC Code with only minor variations.

Ore Reserve and Mineral Resource information in the tables below is based on information compiled by Competent Persons (as defined by the JORC Code).

Each of the Competent Persons has the appropriate professional membership and the relevant experience in relation to the Mineral Resources and/or Ore Reserves being reported by them to qualify as a Competent Person as defined in the JORC Code. The Competent Persons have consented to the inclusion in the report of the matters based on their information in the form and context in which it appears.

The Ore Reserves and Mineral Resources figures in the following tables are as at 30 June 2005 unless otherwise stated.

Metric units are used throughout. All data is presented on a 100% basis. All tonnes and grade information has been rounded to reflect the relative uncertainty in the estimates; there may therefore be small differences in the totals. Mineral Resources are reported inclusive of those Mineral Resources modified to produce Ore Reserves.

Commodity prices and exchange rates used to estimate the economic viability of Ore Reserves are based on Xstrata long term forecasts at the time the estimate was calculated.

Definitions

The following definitions (as per the JORC Code 2004), or similar, have been applied in estimating the Ore Reserves and Mineral Resources position of the Xstrata Group disclosed within this document.

Mineral Resource: a concentration or occurrence of material of intrinsic economic interest in or on the Earth's crust in such form, quality and quantity that there are reasonable prospects for eventual economic extraction. The location, quantity, grade, geological characteristics and continuity of a Mineral Resource are known, estimated or interpreted from specific geological evidence and knowledge. Mineral Resources are sub-divided, in order of increasing geological confidence, into Inferred, Indicated and Measured categories.

Inferred Mineral Resource: that part of a Mineral Resource for which tonnage, grade and mineral content can be estimated with a low level of confidence. It is inferred from geological evidence and assumed but not verified geological and/or grade continuity. It is based on information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes which may be limited or of uncertain quality and reliability.

Indicated Mineral Resource: that part of a Mineral Resource for which tonnage, densities, shape, physical characteristics, grade and mineral content can be estimated with a reasonable level of confidence. It is based on exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes. The locations are too widely or inappropriately spaced to confirm geological and/or grade continuity but are spaced closely enough for continuity to be assumed.

Measured Mineral Resource: that part of a Mineral Resource for which tonnage, densities, shape, physical characteristics, grade and mineral content can be estimated with a high level of confidence. It is based on detailed and reliable exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes. The locations are spaced closely enough to confirm geological and grade continuity.

Ore Reserve: the economically mineable part of a Measured and/or Indicated Mineral Resource. It includes diluting materials and allowances for losses, which may occur when the material is mined. Appropriate assessments and studies have been carried out, and include consideration of and modification by realistically assumed mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors. These assessments demonstrate at the time of reporting that extraction could reasonably be justified. Ore Reserves are sub-divided in order of increasing confidence into Probable Ore Reserves and Proved Ore Reserves.

Probable Ore Reserve: the economically mineable part of an Indicated, and in some circumstances, a Measured Mineral Resource. It includes diluting materials and allowances for losses which may occur when the material is mined. Appropriate assessments and studies have been carried out, and include consideration of and modification by realistically assumed mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors. These assessments demonstrate at the time of reporting that extraction could reasonably be justified.

Proved Ore Reserve: the economically mineable part of a Measured Mineral Resource. It includes diluting materials and allowances for losses which may occur when the material is mined. Appropriate assessments and studies have been carried out, and include consideration of and modification by realistically assumed mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors. These assessments demonstrate at the time of reporting that extraction could reasonably be justified.

Notes

- Xstrata Alloy's chrome mining operations are all mining the chromitite deposits developed within the world renowned Bushveld Complex of South Africa. The Bushveld Complex is the largest known deposit of chrome ore in the world. The chrome ore are mined from shallow dipping (10°-14°) tabular ore bodies referred to as the LG6/LG6A Chromitite Layers and the MG1 Chromitite Layer. The chromitite layers are mined mainly underground using trackless mechanized mining methods on a board-and-pillar mine lay-out design.
- Changes in the year on year tonnage and grade estimates are mainly due to mining depletion, and re-categorisation of resources and reserves due to additional geological information gained through exploration.
- The Ore Reserves have been estimated as ROM Ore Reserves and Saleable Ore Reserves to reflect the mining dilution and beneficiation process.

[a] Under the Pooling and Sharing Venture with Merafe Mineral Resources established in July 2004, Xstrata maintains 100% ownership but participates in pooled EBITDA as follows — Year 1: 89.0%, Year 2: 86.0%, Year 3: 82.5%. Vanadium assets are 100% owned and 100% attributable to Xstrata

[b] Marikana East is reported as a Resource subject to the conditions contained in the purchase agreement with SamancorCr.

[c] Klipfontein/Waterval Reserve is reported as a Resource subject to the conditions contained in the purchase agreement with Anglo Platinum.

[d] Marikana West is reported as a Resource subject to the conditions contained in the purchase agreement with SamancorCr.

Competent person

Pieter-Jan Grabe, Xstrata Alloys (SACNASP); Competent Person for both Mineral Resources and Ore Reserves

Alloys — PGMs and Vanadium

Notes

- The Mineral Resources and Ore Reserve estimates are tabulated on a total mine basis as at 30 June 2005.
- The Measured and Indicated Mineral Resources are inclusive of those Mineral Resources modified to produce Ore Reserves.
- PGM grades are quoted as 3PGE + Au in g/t
- Xstrata Alloys' platinum mining operation is mining the platinum bearing UG2 Chromitite Layer of the Bushveld Complex of South Africa. The Bushveld Complex is the largest known deposit of PGMs in the world. The PGM ore is mined a shallow dipping (10o-14o) tabular ore-body refered to as the UG2 Chromitite Layer. The chromitite layer will be mined underground using a trackless mechanized mining method on a board-and-pillar mine lay-out design.
- Vanadium grades are quoted as %V2O5
- Xstrata Alloys' vanadium mining operation ismining the metalifferous magnetite deposits developed within the Bushveld Complex of South Africa. The Bushveld Complex is one of the largest known deposit of magnetite ore in the world. The magnetite ore are mined from shallow dipping (60-25o) tabular ore bodies. The magnetite ore are mined in opencast pits.
- Changes in the year on year vanadium tonnage and grade estimates are solely due to mining depletion

[a] Tonnage Estimates taken from CBE Report — Anglo Platinum-Xstrata JV, Mototolo Project Geological Report, dated 17 February 2005, Dave Gray/Trevor Richardson

[b] Tonnage Estimates taken from geological report — A Merensky and UG2 Resource Estimate, Thorncliffe, dated 12 November 2002, Dave Gray/P-J Grabe

[c] Competent Person for Ore Resources/Competent Person for Mineral Reserves.

Competent persons

DG = Dave Gray, Anglo Platinum (SACMASP).
TR = Trevor Richardson, Caracle Creek International Inc (SACNASP)
PJG = Pieter-Jan Grabe, Xstrata Alloys (SACNASP)

Definitions
OC = open-cut; UG = underground

Notes

- With the exception of Rolleston ML, Teralba, Cardiff Borehole and Mitchells Flat, which were estimated in accordance with the September 1999 JORC Code, the estimates of Coal Resources and Coal Reserves presented in this table have been carried out in accordance with the "2004 Australasian Code for Reporting Exploration Results, Coal Resources and Coal Reserves (The JORC Code)" prepared by the Joint Ore Reserves Committee of the Australasian Institute of Mining and Metallurgy, Australian Institute of Geoscientists and Minerals Council of Australia.
- Coal Resources and Coal Reserves stated on a total mine basis include interests in Coal Resources and Coal Reserves attributable to minority interests in controlled entities and the interests of joint venture partners.
- Coal Resource and Coal Reserve estimates are subject to rounding and therefore totals may not add up.
- Unless otherwise stated, the product yields used to estimate Marketable Coal Reserves were derived from the "Resource Mastor" software developed by A&B Mylec. Inputs to this model are coal ply thickness and dilution. The model includes adjustments for plant efficiencies to calculate practical yields. The model is calibrated to historical plant performance and includes the closest large diameter borehole data to each mining block.
- Coal Resources are contained within the Sydney Basin (New South Wales), the Bowen Basin (Queensland) and the Surat Basin (Wandoan, Queensland).
- Coal Resources have been estimated for potentially mineable seams within mining or exploration leases and are limited by major cadastral, geological and economic boundaries. They are also constrained by the occurrence and quality of geological information.
- Coal Resources exclude areas where the seam has been affected by igneous bodies, extracted by mining and areas where coal has been sterilized by mining to 30 June 2005.
- Coal Resources are reported for the full coal seam thickness to a minimum thickness of typically 0.3m to 0.5m for opencut Coal Resources, and 1.5m to 2m for underground Coal Resources.
- Coal Resources do not include out-of-seam dilution. Underground Coal Resources are typically reported on a full seam or working section basis, and may contain a small amount of interseam dilution.
- Coal Resource tonnes have been reported using an appropriate in situ moisture basis for each deposit, ranging from 3% to 10% moisture. United Coal Resources are reported on an air dried basis.
- Coal Resources have been re-estimated for inclusion in this summary table (with the exception of Rolleston where the previous estimate has been adjusted for lease changes and Cook where the previous estimate has been adjusted for production). Revision of the totals includes changes to classifications of Coal Resource status due to exploration, geological reinterpretation and remodelling and changes to lease holdings.
- Adherence to the 2003 Australian Guidelines for Estimating and Reporting of Inventory Coal, Coal Resources and Coal Reserves has resulted in some Measured Coal Resources being reclassified as Indicated and some Indicated Coal Resources being reclassified as Inferred when compared to the previous year.
- Other changes and notes relevant to the estimation of Coal Resources and Coal Reserves are listed below for specific projects.

(a) Bulga Opencut: Planned final highwall has been straightened increasing Coal Reserves by approximately 1.4Mt ROM.

(b) Beltana Underground: Changes in cutting height for Blakefield Seam increases Coal Reserves by approximately 14.1Mt ROM.

(c) Baal Bone Underground: Longwall block (LW) 25 shortened by 221m reducing Coal Reserves by 0.2Mt ROM.

(d) West Wallsend Mine plan has been significantly redesigned resulting in less overall longwall length and a decrease in Coal Reserves of 9.0Mt ROM. Yield has been re-correlated to washplant performance resulting in an overall decrease in Marketable Coal Reserves of 0.8Mt.

(e) Westside: Coal Resources reported for the Great Northern Seam include areas where this seam has been previously extracted by bord and pillar methods. Details of this extraction have been obtained from historical mine record tracings. The Coal Reserves are then further modified to account for additional losses incurred in the mining process.

(f) Cumnock — Opencut Other: In an area where leases overlap, Coal Resources have been classified as having potential for opencut extraction, assuming Ravensworth West will first mine several overlying seams.

(g) Mount Owen: Coal Resources in an area of high geological complexity have been classified as Indicated, although it may appear that sufficient information exists for classification as Measured status.

(h) United — Planned mains development moved away from the river/fault system; LWs 6, 7 & 8 shortened outbye; LWs 7 & 8 lengthened inbye through agreement with overlying Wanbo Mine; LWs 10 & 11 added in North East. These changes have resulted in an overall increase in Coal Reserves of 2.4Mt ROM.

(i) Ulan #3 Underground: Recent exploration has resulted in a change in the interpreted position of a major bounding fault, the Spring Gully Fault, which has reduced the overall Coal Resources by approximately 9Mt. The Ulan underground mine currently extracts the basal 3m of the 6-7m thick Ulan Seam. Coal plies above the underground mining section have been reported and included in the total Coal Resource. Coal Reserves for Ulan #3 UG are based on continuing to mine the basal 3m.

(j) Ulan West Underground: Coal Reserves for Ulan West Underground are based on mining the basal 3m as in Ulan #3 Underground, although investigations are underway for mining the upper plies by Longwall Top Coal Caving technique.

(k) Oaky Creek No. 1: Changes to the layout of the No. 1 Underground Mine to allow for the introduction of a second longwall unit has resulted in an increase in Coal Reserves of 15.3Mt ROM.

(l) Oaky Creek North: Provision has been made for more dilution for the Northern Underground Mine which has increased the Coal Reserves by 6.7Mt ROM.

(m) Newlands Opencut: Investigation of the extent of intrusives and LOX allow increase of Coal Resources (+85Mt) and Opencut Coal Reserves at Wollombi (+52.8Mt ROM).

(n) Newlands Southern Underground: Areas available for remnant pillar mining in the Southern Underground have been incorporated into the mine plan (+0.8Mt ROM).

(o) Cook: 2004 Coal Resources adjusted for mining in period 1 January 2005 to 30 June 2005 (not re-estimated).

(p) Rolleston: ML Coal Resource estimate of 2002 adjusted for exclusion of MDL/EPC areas which were re-estimated in June 2005.

Notes

- The estimates of Coal Resources and Coal Reserves presented in this table have been calculated according to the SAMREC Code (South African Code for Reporting of Coal Resources and Coal Reserves) and are also JORC (Australasian Code for reporting of Exploration Results, Mineral Resources and Ore Reserves) compliant.
- Coal Resources and Coal Reserves stated on a total mine basis include interests in Coal Resources and Coal Reserves attributable to minority interests in controlled entities and the interests of joint venture partners. Figures are subject to rounding and therefore totals may not add up.
- Coal Resources and Recoverable Coal Reserves are quoted on an air dried moisture basis.
- Marketable Coal Reserves are quoted on an as-received moisture basis, with the exception of Ingwe managed mines which are quoted on air dried basis.
- Marketable Coal Reserves for managed operations are based on theoretical yields for a 27.5MJ/kg export quality product, adjusted by practical plant factors based on current operational performance.
- Marketable Coal Reserves for Tavistock are based on a 27.5MJ/kg primary wash, plus a 25MJ/kg wash of the primary rejects.
- Marketable Coal Reserves for Waterpan, Boschmans, Witcons and Goedgevonden are based on a 27.5MJ/kg primary wash for the select seams and a 22MJ/kg (domestic power generation product) primary wash for the Upper Seams
- Marketable Coal Reserves for Ingwe managed mines are as received from Ingwe, based on a mix of export and domestic products.
- Coal Resources and Coal Reserves for operations are contained within fully permitted areas, with the exception of those stated under individual operations.
- The undeveloped Coal Resources are not fully permitted.

[a] Waterpan: ROM Reserve — 0.4 Mt mined from Jan 05 to June 05, 14.5 Mt of low quality upper seam (domestic power generation) included as opencast reserves, 9.1 Mt of 2 Seam stooping included, 3.8 Mt additional 4 seam opencast from sub outcrop drilling and re-modelling, 3.0 Mt increase due to higher extraction factor after reclassification of 4 seam underground to opencast, 1.2 Mt increase in 5 seam due to higher extraction factor used to calculate reserves. Resource — 0.6 Mt mined from Jan 05 to June 05, 19.9 Mt of low quality upper seam (domestic power generation) included as opencast reserves, 16.1 Mt of 2 Seam stooping included, 5.3 Mt additional 4 seam opencast from sub outcrop drilling and re-modelling.

[b] Boschmans: ROM Reserve — 1.7 Mt mined from Jan 05 to June 05, 4.2 Mt of low quality upper seam (domestic power generation) included as opencast reserves, 1.9 Mt additional 4 seam opencast from sub outcrop drilling and re-modelling, 1.7 Mt increase in 1 seam from re-modelling and re-classification, 5.5 Mt additional 2 seam reserves planned as opencast reserves after re-classification, 2.6 Mt additional 4 seam reserves planned as underground reserves after re-classification. Resource — 3.6 Mt mined from Jan 05 to June 05, 5.1 Mt of low quality upper seam (domestic power generation) included as opencast reserves, 2.7 Mt additional 4 seam opencast from sub outcrop drilling and re-

modelling, 2.2 Mt increase in 1 seam from re-modelling and re-classification, 20.7 Mt 2 seam resources excluded due to poor quality and sub-outcrop changes from re-modelling and re-classification after infill drilling, 8.4 Mt decrease from exclusion of 4 seam pillar resources.

(c) Witcons: ROM Reserve — 1.0 Mt mined from Jan 05 to June 05, 4.4 Mt of low quality upper seam (domestic power generation) included as opencast reserves, 1.2 Mt additional 4 seam opencast from sub outcrop drilling and re-modelling, 1.7 Mt increase in 4 seam from ATC re-allocation, 2.1 Mt increase in 2 seam from increase in select mining horizon thickness after re-interpretation and re-modelling. Resource — 1.2 Mt mined from Jan 05 to June 05, 6.1 Mt of low quality upper seam (domestic power generation) included as opencast reserves, 1.7 Mt additional 4 seam opencast from sub outcrop drilling and re-modelling, 3.0 Mt increase in 4 seam from ATC re-allocation, 3.0 Mt increase in 2 seam from increase in select mining horizon thickness after re-interpretation and re-modelling.

(d) South Witbank: ROM Reserve — 1.9 Mt mined from Jan 05 to June 05, 3.1 Mt increase in 2 seam from additional drilling and re-modelling, 5.7 Mt decrease from 4 seam allocated to Tavistock, 7.1 Mt increase in 4 seam from increase in select mining horizon thickness after re-interpretation and re-modelling, 10.0 Mt decrease in 4 seam from exclusion of stooping reserves due to geotechnical considerations. 4.6 Mt increase in 4 seam pillars from re-calculation of primary extraction. Resource — 3.4 Mt mined from Jan 05 to June 05, 3.7 Mt increase in 2 seam from additional drilling and re-modelling, 9.7 Mt decrease from 4 seam allocated to Tavistock, 9.5 Mt increase in 4 seam from increase in select mining horizon thickness after re-interpretation and re-modelling, 17.9 Mt decrease in 4 seam from exclusion of stooping reserves due to geotechnical considerations, 7.4 decrease in 4 seam from re-classification and re-modelling. 8.1 Mt increase in 4 seam pillars from re-calculation of primary extraction.

(e) Goedgevonden: ROM Reserve — 0.5 Mt mined from Jan 05 to June 05, 91.7 Mt increase from re-classification and inclusion of additional opencast in mine plan, 170.5 Mt of low quality upper seam (domestic power generation) included in opencast. Includes 81.8 Mt in Zaaiwater block which is not fully permitted. Resources — 0.6 Mt mined from Jan 05 to June 05, 288.5 Mt increase from reporting full seam, 3 Mt decrease in 5 seam from sub outcrop drilling and re-modelling.

(f) Phoenix: ROM Reserve — 0.8 Mt mined from Jan 05 to June 05, 1.4 Mt decrease in 4 seam from suboutcrop drilling and re-modelling, 1.0 Mt 2 seam excluded due to low CV and Vols from infill drilling and re-modelling. Resources — 1.4 Mt mined from Jan 05 to June 05, 4.5 Mt increase in 4 seam resources from re-classification and re-modelling, 7 Mt 2 seam excluded due to low CV and Vols from infill drilling and re-modelling.

(g) Tavistock: ROM Reserve — 1.9 Mt mined from Jan 05 to June 05, 5.7 Mt increase from 4 seam re-allocated from South Witbank, 4.0 Mt increase in 4 Seam from re-classification and re-modelling. Resources — 3.4 Mt mined from Jan 05 to June 05, 9.7 Mt increase from 4 seam re-allocated from South Witbank.

(h) ATC: ROM Reserve — 1.2 Mt mined from Jan 05 to June 05, 1.7 Mt decrease from 4 seam opencast re-allocated to Witcons, 3.5 Mt decrease in 2 Seam stooping due to geotechnical considerations. Resources — 2.1 Mt mined from Jan 05 to June 05, 3.0 Mt decrease from 4 seam opencast re-allocated to Witcons, 4.5 Mt decrease in 2 Seam stooping due to geotechnical considerations, 4.4 Mt decrease in 2 and 4 seam allocated back to Rietspruit.

(i) ATCOM: ROM Reserve — 2.0 Mt mined from Jan 05 to June 05, 7 Mt increase in 4 seam from additional opencast included, 9 Mt decrease from 2 seam excluded along sub outcrop due to quality constraints. Resources — 2.3 Mt mined from Jan 05 to June 05, 2.0 Mt increase in 1 seam from re-classification and re-modelling.

(j) Tslentis: ROM Reserve — 1.8 Mt mined from Jan 05 to June 05. Resources — 3.0 Mt mined from Jan 05 to June 05.

(k) Spitzkopf: ROM Reserve — 0.7 Mt mined from Jan 05 to June 05, 14.0 increase in B and C seam from re-classification and re-modelling. Resources — 1.2 Mt mined from Jan 05 to June 05, 45.7 Mt increase in B and C seam from re-classification and re-modelling.

(l) ROM Reserve — 31.2 Mt mined from June 04 to June 05, 5.9 Mt increase from revised mining lay-out for Kleinkopje/Steenkoolspruit, 9.81 Mt decrease from re-modelling. Resources — increase from pillars included.

(m) Due to the promulgation of the new Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) no new drilling programs were conducted on any of the Undeveloped Resource areas as at 30 June 2005. With the implementation of the new Act all valid prospecting permits reverted back to Un-used Old Order Rights. Xstrata Coal South Africa has applied for New Order Prospecting rights over all the undeveloped Resource areas. New Order Prospecting rights were issued over Zaaiwater, Mooifontein, and Sara-Buffels and work has commenced on these projects. The resources reported as at 30 June 2005 are identical to those reported as at 31 December 2004.

Notes

- All Ore Reserve and Mineral Resource estimates in the table represent the position at 30 June 2005, with the exception of Bajo de la Alumbrera for which the Ore Reserve and Mineral Resource estimates presented are current as of 31 December 2005
- The term "Ore Reserve", as used in this public statement in accordance with Australian practice, has the same meaning as "Mineral Reserve" as defined in The Code for Reporting of Mineral Exploration Results, Mineral Resources and Ore Reserves (The Reporting Code), October 2001 edition
- Rounding to two significant figures has been applied generally to tonnage and grade estimates with rounding to one significant figure applied in most cases to Inferred Mineral Resources,

(a) Mount Isa X41 Copper Mine 1100 and 1900 Orebodies: Mineral Resource categorisation is based on assessment of orebody continuity, structural complexity and adequacy of data coverage. Additions to Ore Reserves of 13 million tonnes at 2.0% copper have resulted from the engineering reviews carried out during the year. Further work is continuing to evaluate the Measured and Indicated Mineral Resources for conversion to Ore Reserves using different mining methods and economic parameters. Mine production of 2.5 million tonnes at 2.4% copper since end June 2004 depleted the Ore Reserve and Mineral Resource. Additional depletion of the Mineral Resource and Ore Reserve has occurred due to sterilisation of ground adjacent to stopes mined out during the year. Mineralisation occurs generally as breccia hosted massive to disseminated chalcopyrite in "silica dolomite" altered pyritic dolomitic siltstone.

(b) Enterprise Mine 3000 and 3500 Orebodies: Mineral Resource categorisation is based on assessment of orebody continuity, structural complexity and adequacy of data coverage. Additions to the Ore Reserve of 2.0 million tonnes at 3.2% copper have resulted from the engineering reviews carried out during the year. Further work is continuing to evaluate the Measured and Indicated Mineral Resources for conversion to Ore Reserves using different mining methods and economic parameters. Mine production of 3 million tonnes at 3.97% copper since end June 2004 depleted the Ore Reserve and Mineral Resource. Additional depletion of the Mineral Resource and Ore Reserve has occurred due to sterilisation of ground adjacent to stopes mined out during the year. Mineralisation occurs generally as breccia hosted massive to disseminated chalcopyrite in "silica dolomite" altered pyritic dolomitic siltstone.

(c) Mount Isa Open pit: Mineral Resource categorisation is based on assessment of orebody continuity, structural complexity and adequacy of data coverage. The Mineral Resource estimate is based on a block model built with grade interpolation by ordinary kriging. The Mineral Resource has been reported inside an optimised pit shell using a cut off grade of 0.5% Cu. The Mineral Resource has been re-modelling and recategorised on the basis of the drilling performed for pre-feasibility study of the Mount Isa Open Pit during the previous two years. Copper mineralisation occurs generally as breccia hosted massive to disseminated copper minerals in "silica dolomite" altered pyritic dolomitic siltstone. Approximately 60% of the copper resource is in primary chalcopyrite, the remainder being oxidised or partially oxidised, with a minor amount of supergene chalcocite mineralisation.

(d) Underground-Open Pit Overlap: In estimating the open pit Mineral Resource, some overlap exists between the X41 Mine underground copper Mineral Resource and the open pit. The extent of double counting in copper Mineral Resources between open pit and underground is indicated by the following tonnages of X41 underground copper Mineral Resource as reported above which are included also in the above open pit copper Mineral Resource (Measured: 1.2 Mt @ 1.6% Cu, Indicated: 4.4 Mt @ 1.6% Cu, 13.3 Mt @ 2.2% Cu)

(e) Ernest Henry: Ore processing of 11.3 million tonnes at 1.22% Cu, 0.62 g/t Au since end June 2004 depleted the Ore Reserve and Mineral Resource. Ore Reserve and Mineral Resource estimates are based on the current block model built with grade interpolation by ordinary kriging reporting to blocks with dimensions of 20m × 20m × 16m. The block model is developed from approximately 118,143 metres of resource drilling, predominantly diamond core and lesser reverse circulation percussion of which approximately 84,593 metres has been sampled and assayed. First pass classification of resource blocks to Measured, Indicated and Inferred categories for the open pit Mineral Resource estimate is based on a three-stage search strategy. Blocks estimated using a smaller search volume are categorised as Measured with blocks estimated using a larger search volume categorised as Indicated. Inferred blocks are categorised using the Indicated search volume but with relaxation of sample selection criteria. Individual blocks categorised as Inferred on first pass were upgraded to Indicated where the block was completely surrounded by Measured and/or Indicated blocks. The categorisation is over-ridden manually in areas of sparse drilling and geological uncertainty. Quantified copper grade errors for Measured, Indicated and Inferred are ±5%, ±10% and ±30% respectively at 90% confidence limits over a quarterly (3 month) production period. These errors are based on a forward-looking conditional simulation study and are supported by historical mill reconciliation data. For the underground Mineral Resource estimate, blocks which would be categorised as Indicated and Inferred according to the above categorisation strategy are assigned to the Inferred category while blocks which would be categorised as Measured are assigned to the Indicated category, reflecting lower confidence in the estimate at the higher underground cut-off grade. Open pit Mineral Resources occur inside the Stage 7 life-of-mine pit design utilising Measured, Indicated and Inferred resource blocks and are reported above a cut-off grade of 0.27% Cu. Proved and Probable Ore Reserves are defined as all mineralisation of the appropriate confidence category above cut-off grade within the designed life-of-mine ultimate pit. Underground Mineral Resource includes all material below (down dip from) the current life of mine plan pit above a 1.5% copper equivalent cut off, where the copper equivalent credits both copper and gold values on the basis of CuEq = Cu % + 0.73 × Au g/t. The underground Mineral Resource remains open at depth. Copper and gold mineralisation occurs in a breccia comprised of strongly altered and replaced intermediate volcanic fragments in a matrix assemblage of predominantly magnetite, chalcopyrite and carbonate. Copper occurs as chalcopyrite and gold is strongly associated with chalcopyrite.

(f) Bajo de la Alumbrera: As at 31 December 2005. The Proven Reserves include 100 million tonnes @ 0.35 % Cu, 0.40 g/t Au of Medium and Low-Grade material stockpiled for future treatment. This Statement is calculated based on a Resource Block Model (ALUJ) which was constructed using Ordinary Kriging interpolation within geological constraints from an assay database comprising some 79,000 metres of diamond drilling and 14,000 metres of reverse circulation drilling. Ore Reserves are based on a pit optimisation (Pit 637) performed on the ALUJ Resource Block Model, and are reported using an economic cut-off grade of 0.27% copper equivalent. The economic cut-off is based on appropriate dilution factors and metallurgical recoveries, and uses commodity prices of US$350 per ounce of gold and US$0.90 per pound of copper. The Stripping Ratio (S.R.) for Pit 637 is 1.9; S.R. is defined as the in-pit tonnes of waste divided by the in-pit tonnes of ore. No stockpiled ore is considered in this figure. Identified Mineral Resources are generated from pit optimisation studies using possible future technical and economic scenarios (Pit 636), to define mineralisation which might in whole or in part become economically extractable. Identified Mineral Resources are reported on the basis of a payable copper equivalent grade of 0.27%. 18.0 million tonnes of Proven and Probable Reserves have been mined and processed during the six months to December 31st 2005 from the June 30th, 2005 Ore Reserve. The ultimate pit slopes design was based on Call & Nicholas Inc. recommendations (CNI, Tucson AZ, USA). Primary sulphide mineralisation

comprises disseminated, vein and fracture controlled chalcopyrite in altered Dacite and Andesite host rocks, with chalcocite and covellite in the Enriched zone.

(g) Las Bambas:

- The Las Bambas district is located in the central part of the Andahuaylas-Yauri copper (Mo, Au) skarn-porphyry belt in south-central Peru 75 kms south-southwest of Cuzco. Access to Las Bambas is by 224 kms of unimproved road from Cuzco.

- The Las Bambas district consists of a thick sequence of tightly folded Cretaceous sedimentary rocks that have been intruded by irregularly shaped plutons, stocks, sills and dikes of the Oligocene to Miocene Andahuaylas-Yauri batholith. Skarn-related alteration and mineralization is associated with the younger quartz monzodiorite to granodiorite suite of intrusive rocks that are in contact with carbonate rocks of the Ferrobamba Formation. The porphyry-style alteration and mineralization occurs in the quartz monzodiorite to granodiorite intrusive rocks. The main copper-bearing minerals are sulphides (bornite, chalcopyrite, and chalcocite) with oxides and carbonates near surface.

- Exploratory and resource delineation drilling during 2005 was concentrated on three potential open-pit deposits within the Las Bambas district, Ferrobamba, Chalcobamba and Sulfobamba. Drilling at Ferrobamba has defined a Resource with a horizontal dimension of 1,200 m east to west and north to south and to an average depth of 205 m below the surface. At Chalcobamba, drilling has defined a Resource with an east-west and north-south dimension of 1,000 m and to an average depth below surface of 180 m. Drilling at Sulfobamba has defined a Resource with a horizontal dimension of 1,200 m east to west, 1,000 m north to south and to an average depth of 215 m below surface.

- Mineral Resource estimates are based on diamond drilling completed in 2005: 109 drill holes with a total length of 26,840 m at Ferrobamba, 66 drill holes with a total length of 14,764 m at Chalcobamba and 62 drill holes with a total length of 14,406 m at Sulfobamba. In addition, 40 pre-2005 drill holes from past explorers, with a total length of 5,156 m, were included in the Mineral Resource estimation.

- AMEC (Peru) S.A. was retained by Xstrata Copper (Peru) S.A. to monitor and report quality assurance/quality control (QA/QC) results for Xstrata's 2005 Las Bambas drill program. The drill program submitted a total of 30,045 core samples to the primary Lab, BS Inspectorate laboratory, including 3,562 QAQC samples. The Cu assays of the 2005 drilling exploration campaign at Las Bambas are considered to be sufficiently precise and accurate for resource estimation.

- QA/QC coverage of the pre-2005 drill holes was reviewed and found to be deficient. As a result, those parts of the Mineral Resources which would have been categorised as Indicated but which were majority dependant on pre-2005 drilling were reclassified to Inferred.

- Grade interpolation for Cu, Mo, and Au was completed within lithological domains using inverse distance weight techniques with composites of 15 m length interpolating to blocks 20X20X15 m. Mineral Resources were categorised as Indicated based on a minimum of 3 composites, a maximum of 6 composites, with a maximum of 2 composite per drill hole and within 50 m to the nearest composite. Drill hole spacing for Indicated Resource would broadly correspond to a 70 m grid. AMEC (Peru) S.A. has calculated the confidence limits for determining appropriate drill grid spacing for Indicated Resource. The statistical criterion used for Indicated Resource is that a yearly ore production should be known to at least +/−15 percent with 90 percent confidence. A drill grid spacing of 70 m gives a 90 percent confidence interval of +/−8 percent on an annual basis. The drill spacing of 70 m is well within the suggested limits of +/−15 percent. The drill spacing of 70 m was selected to ensure that the continuity of grade, along with the extent and shape of the mineralization, is sufficiently delineated to give a reliable estimate of tonnes and grade.

- Inferred Resource was based on a minimum of one composite, to a maximum of 6 composite, with a 1 drill hole minimum, and a distance of 75 m to nearest composite. Drill hole spacing for Inferred would correspond to a 100 m grid.

- A comprehensive coverage of density measurements from the various rock types was generated during the 2005 drilling program. Model blocks were tagged with the corresponding rock type and subsequently assigned the average density for that rock type.

- No metallurgical assumptions have been made in the resource estimation. No differentiation between oxide, transitional and sulphide zones has been attempted in this initial estimate.

- Mineral Resource estimates in the table are reported to a cut-off grade of 0.5% total copper. While no specific economic studies were undertaken to justify this cut-off grade, it is considered to be a reasonable first approximation to an economic cut-off for the type and scale of operation anticipated for the Las Bambas deposits.

- All deposits remain open at depth with no indication that mineralization is decreasing in quality or quantity; therefore, there is good potential that additional Mineral Resources will be added with continued deeper drilling. In addition, near-surface Mineral Resources have not been completely closed off so that potential exists for incremental increases in tonnage with further drilling.

- A drilling program of 100,000 m is planned for 2006. The program will focus on further resource delineation at the three deposits drilled in 2005, including the search for resource extensions to depth. Initial drill tests of two other deposits, Charcas and Azuljaja, will also be completed.

(h) Competent Person for Mineral Resource/Competent Person for Ore Reserve; where only one set of initials are listed, the same Competent Person is responsible for both Mineral Resources and Ore Reserves

Competent persons

Notes

- Rounding to two significant figures has been applied generally to tonnage and grade estimates with rounding to one significant figure applied in most cases to Inferred Mineral Resources.
- The term "Ore Reserve", as used in this public statement in accordance with Australian practice, has the same meaning as "Mineral Reserve" as defined in The Code for Reporting of Mineral Exploration Results, Mineral Resources and Ore Reserves (The Reporting Code), October 2001 edition.

[a] Mount Isa Lead Mine: Lead-zinc-silver mineralisation occurs in galena and sphalerite-rich bedding parallel horizons in dolomitic and variably carbonaceous pyritic shales and siltstones. Mine production totalling 0.8 million tonnes at 4.4 % Pb, 5.1 % Zn and 122 g/t Ag depleted the Ore Reserves and Mineral Resources. Resource categorisation is based upon consideration of orebody continuity, structural complexity, metallurgical knowledge and data coverage. The reduction in the resource reflects the elimination of the Isa Pit/Lead mine overlap. The reserve tonnage reflects the production schedule for the last six months of the mine's life.

[b] Black Star Open Cut: Lead-zinc-silver mineralisation occurs in galena and sphalerite-rich bedding parallel horizons in dolomitic and variably carbonaceous pyritic shales and siltstone. Approximately 85% of the lead-zinc-silver resource is primary sulphide, the remainder being considered as transitional (mixed primary sulphide and secondary oxide/carbonate) mineralization. Mine production totalling 0.3 million tonnes at 4.6 % Zn, 3.2 % Pb and 45 g/t Ag depleted the Ore Reserves and Mineral Resources. Mineral Resource categorisation is based on assessment of orebody continuity, structural complexity and adequacy of data coverage. The resource mineralisation occurs inside a designed Stage 4 pit utilising Measured, Indicated and Inferred resource blocks. It is reported above a 16.55 NSR (Net Smelter Return). The Mineral Resource estimate is based on a block model built with grade interpolation by ordinary kriging reporting to blocks with dimensions of 6mE × 15mN × 8mRl. The resource model is developed from approximately 1,020,350m of diamond drilling, 18,400m of RC drilling and 168,200m of underground sampling. Potential revenue from the oxidised portion of the silver, lead, zinc mineralisation has not been used in the optimisation nor has this mineralisation been reported as Mineral Resource. The Black Star proven and probable reserves does not include the Lead Mine proven and probable reserves within the Black Star pit.

(c) Mount Isa Open Pit: Lead-zinc-silver mineralisation occurs in galena and sphalerite-rich bedding parallel horizons in dolomitic and variably carbonaceous pyritic shales and siltstone. Approximately 85% of the lead-zinc-silver resource is primary sulphide, the remainder being considered as transitional (mixed primary sulphide and secondary oxide/carbonate) mineralization. The Identified Mineral Resources has been re-modelling and reclassification on the basis of the Pre-Feasibility drilling performed for the Isa Open Pit as well as the Feasibility drilling for the Black Star Open Cut during the previous two years. The Black Star Open Cut Resource has been removed from the Isa Open Pit and is reported separately. Mineral Resource categorisation is based on assessment of orebody continuity, structural complexity and adequacy of data coverage. Pit optimisation was applied to the new resource block model, using Measured, Indicated and Inferred Mineral Resources, and a pit shell was generated. Mineral Resources have been reported inside this pit shell using a cut off 16.55 NSR (Net Smelter Return). The NSR is calculated on a recoverable payable basis, taking lead, zinc and silver grades, metallurgical recoveries, prices and realisation costs into account. Depending on lead and silver credits. Potential revenue from the oxidised portion of the silver, lead, zinc mineralisation has not been used in the optimisation nor has this mineralisation been reported as Mineral Resource.

(d) George Fisher North & South Orebodies: Lead-zinc-silver mineralisation occurs in galena- and sphalerite-rich bedding parallel horizons in dolomitic and variably carbonaceous pyritic shales and siltstones. Mine production totalling 2.6 million tonnes at 5.1% Pb, 8.7% Zn and 114 g/t Ag depleted the Ore Reserves and Mineral Resources. Orebody re-interpretation, re-modelling and reclassification of the Identified Mineral Resources were completed on the basis of additional geological information and operating experience during the year. Classification is based on assessment of orebody continuity, structural complexity and adequacy of data coverage. Total ore reserve tonnage increased by 15.7 million tonnes due to additional drilling, improved resource to reserve conversion, favourable metal prices and orebody re-interpretation. 2005 reserve Silver, Lead and Zinc grades were lower than 2004 grades mainly due to change in the dilution estimation process and favourable metal prices. Stope geotechnical performance in C and D ore bodies was continually monitored in 2004/05. Modified Dilution Graph, RQD Plots & Stable Beam Theory based stope designs were used in C and D ore bodies. Historical dilution values were used where limited geotechnical data was available.

(e) McArthur River: Underground Mine production of 1.52 million tonnes at 12.1% Zn, 5.3 % Pb and 52 g/t Ag depleted the Ore Reserves and Mineral Resource during 2004-2005. As of 1 July 2005, all identified mineral resources and reserves tabulated here, except for Woyzbun South, are reported within designed pit shells and there is a reasonable prospect that these resources will be mined at some stage in the future by open pit methods. Resources that fall outside the ultimate pit shell (other than Woyzbun South) are not reported. The reported open pit resources include the depletion of 10 years of reconciled underground mining production, totalling 10MT of measured resource. Measured Resources are classified by successful underground mining, milling and reconciliation of areas of number 2, 2/3, 3, 4 and 5 ore bodies where there is greatest structural and grade continuity. Indicated Resources are classified based on areas of increased structural uncertainty due to faulting and folding and increased grade variation due to the proximity of the ore bodyfringe. By default, Number 6, 7 and 8 ore bodies and all transitional ore are classed as Indicated due to the uncertainty of their metallurgical characteristics. Conversion of Measured Resources into the highest confidence category of Proven Reserve has not been undertaken due to a lower certainty of geotechnical, environmental and hydrological factors. All resources have been converted into Probable reserve on the basis of an estimated 15% dilution of waste breccia interbeds and 10% mining losses within Pit Shell Stage 6. This pit design is based on the optimal pit when mining 1.8Mtpa of ore to produce a bulk concentrate. Woyzbun South resources are classified as indicated and it assumed they will be mined at the end of the ultimate pit shell mine life by underground extraction. Zinc-lead-silver mineralisation occurs predominantly as bedding parallel sphalerite and galena rich bands hosted by dolomitic and carbonaceous pyritic siltstones, graded beds and chaotic debris flow breccias.

(f) Competent Person for Mineral Resource/Competent Person for Ore Reserve

Competent persons

MH = M Haydon, Xstrata Zinc, (AIG)		

2. Alumbrera Ore Reserves and Mineral Resources Report

The following is extracted without material amendment from the reserves and mineral resources report published by Xstrata on 30 June 2006 in respect of the Bajo de la Alumbrera operation in Argentina in which the Enlarged Xstrata Group has a 50% interest:

COPPER — Bajo de la Alumbrera

30 June 2006

As a consequence of the announced increase in the Bajo de la Alumbrera Ore Reserves, the new statement is:

Ore Reserves*

Proved	380 Mt	@	0.45% Cu & 0.49 gpt Au
Probable	24 Mt	@	0.42% Cu & 0.43 gpt Au
Total	400 Mt	@	0.45% Cu & 0.49 gpt Au

Mineral Resources*

(Inclusive of those Mineral Resources modified to produce the Ore Reserves)

Measured	400 Mt	@	0.45% Cu & 0.48 gpt Au
Indicated	24 Mt	@	0.42% Cu & 0.43 gpt Au
Total	420 Mt	@	0.45% Cu & 0.48 gpt Au

The Competent Person for this Ore Reserve and Mineral Resource estimate is Mr. Luis Rivera who is a member of the Australian Institute of Mining and Metallurgy. Mr. Rivera is a full-time employee of Minera Alumbrera Limited. Mr. Rivera has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and the activity which he is undertaking to qualify as a Competent Person as defined in the 'Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Rivera consents to the inclusion in this website posting of the matters based on his information in the form and context in which it appears.

These Ore Reserves and Mineral Resource estimates represent the position at 30 June 2006.

The term 'Ore Reserve', as used in this public statement in accordance with Australian practice, has the same meaning as 'Mineral Reserve' as defined in The Code for Reporting of Mineral Exploration Results, Mineral Resources and Ore Reserves (The Reporting Code), October 2001 edition.

Rounding to two significant figures has been generally to tonnage and grade estimates.

The Proved Reserves include 100 million tonnes @ 0.35% Cu, 0.40 g/t Au of medium and low grade material stockpiled for future treatment. This estimate is based on a resource block model (ALUK) which was constructed using Ordinary Kriging interpolation within geological constraints from an assay database comprising some 90,000 metres of diamond drilling and 15,000 metres of reverse circulation drilling.

Ore Reserves are based on a pit optimisation (Pit 729) performed on the ALUK resource block model, and are reported using an economic cut-off grade of 0.27% copper equivalent. The economic cut-off based on appropriate dilution factors and metallurgical recoveries, and uses commodity prices of US$400 per ounce of gold and US$1.00 per round of copper. The stripping ratio (S.R.) for Pit 729 is 2.0; S.R. is defined as the in-pit tonnes of waste divided by the in-pit tonnes of ore. No stockpiled ore is considered in this figure.

18.0 million tonnes of Proved and Probable Reserves have been mined and processed during the six months to June 30th 2006 from the December 31st, 2005 Ore Reserve and additional 40 million tonnes of ore defined under and surrounding the previous pit bottom ring have been included in the Reserves. Identified Mineral Resources are generated from pit optimisation studies using possible future technical and economic scenarios (Pit 730), to define mineralization which might in whole or in part become economically extractable.

Identified Mineral Resources are reported on the basis of a payable copper equivalent grade of 0.27%. The ultimate pit slopes design was based on Call & Nicholas Inc. recommendations (CNI, Tucson, AZ, USA). Primary sulphide mineralization comprises disseminated, vein and fracture controlled chalcopyrite in altered Dacite and Andesite host rocks, with chalcocite and covellite in the enriched zone.

3. Falconbridge Group Mineral Reserves and Mineral Resources Information

The following is extracted without material amendment from Falconbridge's Annual Information Form dated 22 March 2006:

Mineral Reserves[1]

Notes:

(1) No adjustments have been made for metal losses during processing.

(2) The Collahuasi mineral reserves have been estimated and provided by the operator of the joint venture based on a copper price of $0.95. The mineral reserves are estimated and classified using the Australasian code for Reporting of Mineral Resources and Ore Reserves (the "JORC" code). The estimates are inspected annually by Chester Moore. Proven plus probable molybdenum reserves at the Rosario deposit total 1,055,694 tonnes at 0.025% molybdenum and are part of the total reserves as stated.

(3) The Antamina mineral reserves have been estimated and provided by the operator of the joint venture. The estimates are inspected annually by Chester Moore. Estimates used the following metal prices: copper $0.95/lb, zinc $0.50/lb, molybdenum $5.00/lb, and silver $5.00/oz.

(4) Estimates used the following metal prices and exchange rate: zinc $0.65/lb, copper $1.50/lb, lead $0.35/lb, silver $6.50/oz and Cdn$1.50 for US$1.00.

(5) The St. Ann Bauxite mineral reserves have been estimated and provided by the operator of the joint venture. The estimates are inspected annually by Chester Moore.

Notes:

[1] Mineral resources do not include allowances for dilution or mining recovery.

[2] The mineral resources have been estimated and provided by the operator of the joint venture based on a copper price of $1.15. The mineral resources are estimated and classified using the Australasian code for Reporting of Mineral Resources and Ore Reserves (the "JORC" code). The estimates are inspected annually by Chester Moore. The inferred resource total does not include the inferred resource estimate of 248 million tonnes grading 1.5% copper at Rosario West.

[3] The Antamina mineral resources have been estimated and provided by the operator of the joint venture. The estimates are inspected annually by Chester Moore. Estimates used the following metal prices: copper $0.95/lb, zinc $0.50/lb, molybdenum $5.00/lb, and silver $5.00/oz.

[4] Mineral resource total does not contain limonite inferred resource of 100 million tonnes grading 1.6% nickel and 0.2% cobalt.

The reconciliation of mineral reserves at each of the mines as at December 31, 2004 to December 31, 2005 are as follows:

		Falconbridge's beneficial interest (%)	December 31, 2004 (000 mt)	Ore treated in 2005 (000 mt)	Additions/ revisions (000 mt)	December 31, 2005 (000 mt)

Notes:

[1] The mineral resources/reserves are shown on a 100% basis.

[2] Subject to fulfillment of certain conditions.

[3] The mineral resources are supplied by the operator of the Collahuasi joint venture.

(4) Mineral reserves and resources estimated by Highlands Pacific Limited, the optionor of the property.

(5) Also included as part of the Kidd Creek mineral resources on the Mineral Reserves and Mineral Resources table in this Item 3.9.4.

(6) Option to purchase.

(7) Also included as part of the Sudbury mineral resources on the Mineral Reserves and Mineral Resources table in this Item 3.9.4.

(8) The mineral resources were estimated and classified using the Australasian Code for Reporting of Mineral Resources and Ore Reserves (the "JORC" code) which are comparable to the NI 43-101 definitions. These estimates would not have been materially different if made using the CIM definitions.

(9) Resource estimate supplied by Teck Cominco Limited. Estimate developed as part of economic evaluation study with dilution and mining recovery included.

"Xstrata South Africa"	Xstrata South Africa (Proprietary) Limited, a company incorporated in South Africa with limited liability
"Xstrata Zinc"	the Zinc Business
"Zinc Business"	the business of the Enlarged Xstrata Group comprising the Former Xstrata Group Zinc Business and the Falconbridge Zinc Business

GLOSSARY OF TECHNICAL TERMS

"agglomeration"	binding fine particles together to create coarse particles as part of a mineral processing activity
"anode"	a rectangular plate of metal cast in a shape suitable for refining by the electrolytic process. An anode is the finished product of the copper smelting process
"anthracite"	a hard coal containing a high percentage of fixed carbon and a low percentage of volatile material
"attributable production"	that part of mine or operation production in which the relevant person has an economic interest. It therefore excludes production attributable to minority interests in controlled subsidiaries and the interests of joint venture partners
"attributable reserves"	that part of reserves from a mine in which the relevant person has an economic interest. It therefore excludes reserves attributable to minority interests in controlled subsidiaries and the interests of joint venture partners
"attributable resources"	that part of resources from a mine in which the relevant person has an economic interest. It therefore excludes resources attributable to minority interests in the controlled subsidiaries and the interests of joint venture partners
"attributable sales"	that part of sales from a mine or operation in which the relevant person has an economic interest. It therefore excludes sales attributable to minority interests in controlled subsidiaries and the interests of joint venture partners
"bankable feasibility study"	a comprehensive study of a deposit in which all geological, engineering, operating, economic and other relevant factors are considered in sufficient detail that it could reasonably serve as a basis for a financial decision by a financial institution to finance the development of the deposit for mineral production
"bituminous"	a measure of coal rank. It is a measure of the degree of metamorphosis or change from the original plant or vegetative state
"blister copper"	a crude form of copper (assaying about 99%) produced in a smelter, which requires further refining before being used for industrial purposes
"brownfield"	brownfield development projects are expansions to existing operations with proximity to existing infrastructure and known geological composition
"calcine"	zinc oxide produced from the roasting of zinc concentrates
"calorific value"	the heat of combustion of a unit quantity of coal. It is expressed in British Thermal Units per pound (Btu/Lbi) kilocalories per kilogramme (kcal/kg) or mega joules per kilogramme (MJ/kg). The gross calorific value includes all heat of vaporisation of water. Net calorific value assumes that all water is in the vapour phase
"capacity"	the design number of units that can be produced in a given time period based on operations with a normal number of shifts and maintenance interruptions
"cathode"	a rectangular plate of metal, produced by electrolytic refining, which is melted into commercial shapes such as billets, ingots, etc. A cathode is typically the finished product of the copper refining process
"chromite"	$FeCr_2O_4$, the principal chromium ore
"chromitite"	a rock composed chiefly of chromite

"CIM Definition Standards on Mineral Resources and Reserves"	standards for the classification of MRMR estimates into various categories. The category to which a resource or reserve estimate is assigned depends on the level of confidence in the geological information available on the mineral deposit; the quality and quantity of data available on the deposit; the level of detail of the technical and economic information which has been generated about the deposit, and the interpretation of the data. The CIM Definition Standards on Mineral Resources and Reserves were approved by the Canadian Institute of Mining, Metallurgy and Petroleum on 20 August 2000, and updated on 14 November 2004, for the reporting of exploration information, mineral resources and mineral reserves in Canada and are incorporated by reference into NI 43-101
"CIM Estimation of Mineral Resources and Mineral Reserves Best Practice Guidelines"	guidelines intended to assist a Qualified Person in the planning, supervision, preparation and reporting of MRMR estimates. All MRMR estimation work from which public reporting will ensue must be designed and carried out under the direction of a Qualified Person in accordance with NI 43-101. Disclosure of MRMR estimates is to be made in accordance with industry standard definitions approved by the Canadian Institute of Mining, Metallurgy and Petroleum which have been incorporated by reference into NI 43-101
"coal mine"	an operating mine producing coal
"coke"	bituminous coal from which the volatile components have been removed
"coking coal"	coal used to create coke — which is consumed in the steel reduction process
"COMEX"	The New York Commodity Exchange
"concentrate"	material that has been processed to increase the content of contained material or mineral relative to the contained waste
"continuous miner"	mining machine designed to remove coal from the face with the use of cutting machines and to load that coal into shuttle cars or onto conveyors
"dilution"	the contamination of ore with barren wall rock. The assay of the ore after mining is frequently lower than when sampled in place
"dmt"	dry metric tonnes
"doré"	a gold-silver alloy, an intermediate product from certain gold mines
"ferrochrome"	an alloy of iron and chromium primarily used as an input to stainless steel making
"ferronickel"	an alloy containing nickel and iron (approximately 38% nickel and 62% iron in the case of ferronickel produced by Falcondo). The volumes produced are expressed in terms of the nickel contained
"ferrovanadium"	an alloy of iron and vanadium
"FeV"	Ferrovanadium
"FOB"	free on board
"grade"	the quality of an ore, alloy or metal, usually expressed as a percentage of the primary element
"greenfield"	greenfield development projects are expansions to areas where the Enlarged Xstrata Group does not currently operate

"indicated mineral resource"[1]	part of a mineral resource for which quantity, grade or quality, densities, shape and physical characteristics, can be estimated with a level of confidence sufficient to allow the appropriate application of technical and economic parameters, to support mine planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough for geological and grade continuity to be reasonably assumed
"inferred mineral resource"[1]	part of a mineral resource for which quantity and grade or quality can be estimated on the basis of geological evidence and limited sampling and reasonably assumed, but not verified, geological and grade continuity. The estimate is based on limited information and sampling gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes
"inferred resources"	a mineral resource inferred from geoscientific evidence, drill holes, underground openings or other sampling procedures where the lack of data is such that continuity cannot be predicted with confidence and where geoscientific data may not be known with a reasonable level of reliability
"IsaMills"	a high intensity stirred grinding mill developed by Xstrata Technology that significantly increases the efficiency of mineral grinding
"ISASMELT"	a smelting process developed by Xstrata Technogy that has applications for primary and secondary copper and lead smelting, converting, copper/nickel smelting, and treatment of scraps and residues
"ISAPROCESS"	a permanent cathode technology developed by Xstrata Technology for the copper refining industry
"JORC Code"	the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves
"kg"	kilogramme
"Kidd Process"	a permanent cathode technology developed by the Falconbridge Group for the copper refining industry
"kt"	thousand tonnes
"ktpa"	thousand tonnes per annum
"lb"	English pound equivalent to 0.4536 kilogrammes
"LME"	London Metal Exchange
"longwall"	mining method in which a coal face is mined using a shearer mounted on an armoured chain conveyor that runs along the full length of the coal face. Hydraulic jacks support the roof over the worked-out area. As the longwall face advances, the roof behind the jacks is allowed to cave
"managed", "managed basis" or "managed tonnage basis"	in respect of the Coal Business's operations, the commodities managed by the Coal Business on a total mine basis in respect of those mines that the Enlarged Xstrata Group operates and manages regardless of the Enlarged Xstrata Group's attributable interest in them, except for the Douglas/Tavistock joint venture managed by Ingwe in respect of which only the Enlarged Xstrata Group's attributable interest of 16% is included
"matte"	a mixture of metal sulphides enriched with nickel, cobalt, copper, silver, gold and platinum group metals

"measured mineral resource"[1]	part of a mineral resource for which quantity, grade or quality, densities, shape, physical characteristics are so well established that they can be estimated with confidence sufficient to allow the appropriate application of technical and economic parameters, to support production planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough to confirm both geological and grade continuity
"mill"	a plant where ore is ground and undergoes physical or chemical treatment to extract and produce a concentrate of the valuable minerals
"mineral reserve"[1]	economical mineable part of a measured or indicated mineral resource demonstrated by at least a preliminary feasibility study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified. A mineral reserve includes diluting materials and allowances for losses that may occur when the material is mined
"mineral resource"[1]	a concentration or occurrence of natural, solid, inorganic or fossilized organic material in or on the Earth's crust in such form and quantity and of such a grade of quality that it has reasonable prospects for economic extraction. The location, quantity, grade, geological characteristics and continuity of a mineral resource are known, estimated or interpreted from specific geological evidence and knowledge
"mineral rights"	the ownership of the minerals on or under a given surface with the right to remove the said minerals
"MRMR"	mineral resource and mineral reserve
"Mt"	million tonnes
"Mtpa"	million tonnes per annum
"MW"	mega watt
"MWh"	mega watt hour
"NI 43-101"	Canadian National Instrument 43-101 — "Standards of Disclosure for Mineral Projects" of the Canadian Securities Administrators
"NYMEX"	New York Mercantile Exchange
"open cut" or "open pit"	method of mining where overlying strata overburden is removed, and ore is extracted directly, without the use of underground workings as the primary means of extraction
"ore"	a mineral or mineral aggregate containing precious or useful minerals in such quantities, grade and chemical combination to make extraction commercially profitable
"oz"	troy ounces
"PCI coals"	pulverised coal injection coals
"PGM or platinum group metals"	platinum, palladium, rhodium and related metals present in some nickel/copper ores
"pillar"	a portion of a metal or coal deposit left in place in an underground mine to provide support for the roof
"plant"	fixed or moveable equipment required in the process of winning or processing the ore

"pound"	Imperial pound, equivalent to 0.4536 kilogrammes
"probable mineral reserve"[1]	economical mineable part of an indicated, and in some circumstances a measured mineral resource demonstrated by at least a preliminary feasibility study. This study must include adequate information on mining, processing, metallurgical, economic, and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified
"probable reserves"	measured and/or indicated resources which are not yet proven but of which detailed technical and economic studies have demonstrated that extraction can be justified at the time of determination and under specific economic conditions
"project"	a coal deposit which is in the pre-operating phase of development and, subject to capital investment, feasibility investigations, statutory and management approvals and business considerations, may be commissioned as a coal mine
"prospecting permit"	permission to prospect for minerals from a mineral rights area
"proven mineral reserve"[1]	economical mineable part of a measured mineral resource demonstrated by at least a preliminary feasibility study. This study must include adequate information on mining, processing, metallurgical, economic, and other relevant factors that demonstrate, at the time of reporting, that economic extraction is justified
"Qualified Person"	defined in NI 43-101 as "an individual who is an engineer or geoscientist with at least five (5) years of experience in mineral exploration, mine development, mine operation, project assessment or any combination of these; has experience relevant to the subject matter of the mineral project and technical report; and is a member in good standing of a professional association"
"recoverable reserves" or "recovery"	where relating to coal, the tonnages of in-situ reserves that are expected to be recovered. i.e. that portion of the seam which will be extracted
"reductant"	an additive used specifically to drive off oxygen in a metallurgical conversion process
"reef(s)"	a layer, vein or lode containing economic mineralisation
"refinery"	a plant where concentrates or matte are processed into one or more refined metals
"reserves"	those parts of mineral resources for which sufficient information is available to enable detailed or conceptual mine planning and for which such planning has been undertaken. Reserves are classified as either proved or probable
"resources"	all of the potential minerals in a defined area based on points of observation and extrapolations from those points. Potential minerals are defined as minerals which have been or could be beneficiated to give a quality acceptable for commercial usage in the foreseeable future and excludes minor mineral occurrences
"rights" or "surface rights"	the ownership of the surface land under which minerals occur
"roaster"	a furnace which, by applying super-heated air to an ore or concentrate, causes oxidation to take place, allowing the ore or concentrate to be successfully treated
"ROM" or "ROM Reserves" or "run-of-mine"	as mined reserves, taking into account geological losses, mining losses, contamination and as mined moisture adjustments
"royalty"	a share of the product or profit reserved by the owner for permitting another to exploit the property

"SAG-ball grinding"	semi-autogenous grinding and ball milling, a process to reduce rock-sized ore to a suitable size to liberate individual minerals before separation
"SAMREC Code"	South African Code for Reporting of Mineral Resources and Mineral Reserves
"shaft"	a vertical or inclined excavation, commonly from the surface, of limited cross-sectional area compared to its depth. It is used for mining, draining water, ventilation, lowering and hoisting men, product and waste and lowering materials
"SHG" or "special high grade"	zinc ingot of 99% purity
"skarn"	a mineral deposit at or near a contract between an intrusive body and its host rock
"smelter"	a plant in which concentrates are processed into an upgraded product
"smelting"	thermal processing whereby molten metal is liberated from beneficiated ore or concentrate with impurities speared as lighter slag
"Söderberg"	a type of electrode used for smelting in electric furnaces
"solvent extraction-electrowinning"	is a metallurgical technique, so far applied only to copper ores, in which metal is dissolved from the rock by organic solvents and recovered from solution by electrolysis
"spot price"	the current price of a metal for immediate delivery
"subsidence"	the sinking or settling of material, especially over an underground mining operation
"SX/EW"	solvent extraction-electrowinning is a metallurgical technique, so far applied only to copper ores, in which metal is dissolved from the rock by organic solvents and recovered from solution by electrolysis
"tailings"	finely ground rock from which valuable minerals have been extracted by milling
"thermal coal"	coal used in generating steam for electricity production
"t" or "tonne"	1,000 kilogrammes, equivalent to 2,204.62 pounds
"tonnage"	number of tonnes
"tpa"	tonnes per annum
"TC/RC"	treatment and refining charge
"UG2"	a chromitite layer in the Bushveld Complex in Mpumalanga, South Africa, which contains economically viable concentrations of PGM
"V_2O_5	vanadium pentoxide
"waste"	rock lacking sufficient grade and/or other characteristics or ore to be economic
"wmt"	wet metric tonnes
"zinc concentrate"	product of flotation process typically ranging in zinc content between 45% and 60%

NEWS RELEASE

99.4 PER CENT ACCEPTANCE OF XSTRATA'S RIGHTS ISSUE

Zug, 30 October 2006

Xstrata announces that the 1 for 3 Rights Issue of up to 235,787,596 New Shares at £12.65 per New Share closed for acceptances at 11.00 a.m. London time on 27 October 2006.

The Company received valid acceptances in respect of 234,461,198 New Shares, representing approximately 99.4 % of the total number of New Shares offered to Shareholders pursuant to the fully underwritten Rights Issue.

It is expected that the New Shares in uncertificated form will be credited to CREST accounts on 30 October 2006 and that definitive share certificates in respect of New Shares in certificated form will be dispatched to shareholders by 3 November 2006.

It is expected that the New Shares will commence trading fully paid on the London Stock Exchange's main market for listed securities and on the SWX Swiss Exchange on 30 October 2006.

In accordance with their underwriting obligations in respect of the Rights Issue, Deutsche Bank and JPMorgan Cazenove will be seeking subscribers for the remaining 1,326,397 New Shares.

Deutsche Bank and JPMorgan Cazenove are joint brokers to Xstrata and are acting as joint sponsors to the Rights Issue. Deutsche Bank and J.P. Morgan Securities Ltd. are acting as joint underwriters to the Rights Issue.

Deutsche Bank AG is authorised under German Banking Law (Competent authority: BaFin - Federal Financial Supervising Authority) and with respect to UK commodity derivatives business by the Financial Services Authority; regulated by the Financial Services Authority for the conduct of UK business. Deutsche Bank AG is acting for the Company and no one else in connection with the Rights Issue and will not be responsible to anyone other than the Company for providing the protections afforded to clients of Deutsche Bank nor for providing advice in connection with the Rights Issue.

JPMorgan Cazenove, which is authorised and regulated by the Financial Services Authority and is regulated by the Financial Services Authority for the conduct of UK business, is acting exclusively for the Company and no one else in connection with the Rights Issue, and will not be responsible to anyone other than the Company for providing the protections afforded to the clients of JPMorgan Cazenove nor for providing advice in connection with the Rights Issue.

Deutsche Bank, JPMorgan Cazenove and J.P. Morgan Securities Ltd. (the "Banks") or their affiliates provide various investment banking, commercial banking and financial advisory services from time to time to the Enlarged Xstrata Group. In addition, affiliates of the Banks are lenders under certain of the Enlarged Xstrata Group's debt facilities. In particular, Deutsche Bank and JPMorgan Chase are lenders under the Enlarged Xstrata Group's US$2.5 billion Debt Bridge Facility Agreement, its US$9.5 billion Acquisition Facilities Agreement and its US$7.0 billion Equity Bridge Facility Agreement.
The address of Deutsche Bank is Winchester House, 1 Great Winchester Street, London EC2N 2DB, United Kingdom. The address of JPMorgan Cazenove is 20 Moorgate, London EC2R 6DA, United Kingdom. The address of J.P. Morgan Securities Ltd. is 125 London Wall, London EC2Y 5AJ, United Kingdom.

This announcement does not constitute or form part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, New Shares or any other securities.

This announcement is not an offer of securities for sale or a solicitation of an offer to purchase securities in the United States. The New Shares, have not been and will not be registered under the US Securities Act of 1933, as amended (the "Securities Act") or under any relevant securities laws of any state or other jurisdiction of the United States and, accordingly, may not be offered, sold, taken up, exercised, resold, renounced, transferred or delivered, directly or indirectly, within the United States absent registration or an applicable exemption from the registration requirements of the Securities Act and in compliance with state securities laws.

The distribution of this announcement in or into jurisdictions other than the United Kingdom may be restricted by law and therefore persons into whose possession this announcement comes should inform themselves about and observe any such restrictions. Any failure to comply with any such restrictions may constitute a violation of the securities laws or regulations of such jurisdictions. In particular, subject to certain exceptions, this announcement should not be distributed, forwarded to or transmitted in or into the United States, Australia, Canada, Japan or South Africa.

COMPANY ANNOUNCEMENT

DISCLOSABLE INTERESTS

Zug, 31 October 2006

Xstrata plc ("Xstrata") announces that it was notified on 30 October 2006 by Credit Suisse Group ("CSG") but as of 25 October 2006 of a change in the interests of CSG, Credit Suisse First Boston Equities Limited ("CSFB Equities") and Credit Suisse Securities (Europe) Limited ("CSSEL") in Xstrata's ordinary shares (the "Shares"). The notification stated that CSFB Equities and CSSEL are party to agreements (together the "Agreement") with Glencore International AG ("Glencore") relating to the acquisition of interests in the Shares. The notification also stated that CSG had an interest in 268,553,081 Shares (37.96%) of which CSFB Equities, CSSEL and Glencore in aggregate were jointly interested in 254,989,949 Shares (36.05%). The notification stated that CSFB Equities held 0 Shares and was interested in 254,989,949 Shares (36.05%) by virtue of the Agreement and that CSSEL held 153,949,549 Shares (21.76%) (2,360,819) of which were in the course of settlement) and was interested in 101,040,400 Shares (14.28%) by virtue of the Agreement. The notification stated further that CSSEL's interests in 28,130 Shares were interests of the type as is mentioned in section 208(5) of the Companies Act 1985, as amended ("Section 208(5)") by virtue of the right to redelivery of equivalent securities under stock lending arrangements. According to the notification, CSG's interests in an additional 11,507,480 Shares were interests of the type as is mentioned in Section 208(5) by virtue of the right to redelivery of equivalent securities under stock lending arrangements.

A notification received from Glencore on 30 October 2006 stated that Glencore is a party to the Agreement with CSFB Equities and CSSEL and that Glencore, CSFB Equities and CSSEL in aggregate were jointly interested in a total of 254,989,949 Shares (36.05%). The notification stated that Glencore was interested in 153,949,549 Shares (21.76%) by virtue of the Agreement. The notification stated further that, so far as was known to Glencore at the date of its notification, Glencore's interests in 28,130 Shares were interests as are mentioned in Section 208(5).

As of 25 October 2006, 707,362,787 Shares were in issue.

XSTRATA'S SUBSIDIARY FALCONBRIDGE ANNOUNCES FURTHER CAPITAL MANAGEMENT INITIATIVES

Zug & Toronto, 1 November 2006

Xstrata plc will continue to pursue capital management initiatives to reduce further the level of subsidiary indebtedness within the Xstrata Group.

To this end Xstrata's subsidiary Falconbridge Limited ("Falconbridge") gave an early redemption notice on the adjustable rate convertible subordinated debentures due April 30, 2007, and all such debentures were either converted into Falconbridge common shares or redeemed in full on 2 October 2006.

On 15 September 2006, Falconbridge also issued a notice of redemption for all Series F (TSX: FAL.PR.F) and Series G (TSX: FAL.PR.G) outstanding Cumulative Redeemable Preferred Shares and Cumulative Preferred Shares, Series 1. These series will be redeemed today.

As part of this ongoing initiative, Xstrata and Falconbridge may implement various debt restructuring options, including the provision of Xstrata guarantees for the Falconbridge bonds and may from time to time purchase Falconbridge bonds in the market.

NEWS RELEASE

XSTRATA COPPER ANNOUNCES DECISION TO SOLE FUND FURTHER WORK ON TAMPAKAN PROJECT IN THE PHILIPPINES

Brisbane, 1 November 2006

Xstrata Copper announces its decision to sole fund further work that it considers necessary to determine whether or not to exercise its option to acquire 62.5% of the Tampakan copper-gold exploration project in the Philippines. The decision on whether to exercise or terminate the option needs to be made by Xstrata Copper upon completion of this work, but in any event no later than 31 December 2007.

A pre-feasibility study funded and managed by ASX-listed company Indophil Resources NL and its Philippines affiliate Sagittarius Mines Inc. was completed in September 2006 and a report was subsequently delivered to Xstrata Copper.

Xstrata Copper Executive General Manager - Project Development Peter Forrestal said a decision by Xstrata Copper was necessary following receipt of the Indophil report on the pre-feasibility work program and the completion of the required expenditure of AUD27 million by Indophil.

"Xstrata Copper is in the process of reviewing the results of the Indophil pre-feasibility study, which confirms Tampakan as a major undeveloped copper-gold deposit. In the time since Indophil's study began, the Tampakan Mineral Resource has grown substantially, which has increased the scale, complexity and potential viability of the project.

"Xstrata's decision to sole fund further work is a clear indication of our continuing interest in the Tampakan project," Mr Forrestal said.

Notes to editors

The Tampakan project is located on the southern Philippines island of Mindanao, approximately 65 kilometres north of General Santos City. The current project is situated on the tri-boundary of three Provinces – South Catabato, Sultan Kudarat and Davao Del Sur. The Tampakan copper-gold deposit is located in the Province of South Cotabato, Municipality of Tampakan. Most of the project area covers generally accentuated topography with the Tampakan deposit located on a NNE trending ridge at an elevation varying from 1000-1300 metres a.s.l.

NEWS RELEASE

XSTRATA COMPLETES ACQUISITION OF FALCONBRIDGE; FALCONBRIDGE COMPLETES REDEMPTION OF PREFERRED SHARES

Zug and Toronto, 2 November 2006

Xstrata is pleased to announce that at midnight (Toronto time) on 1 November 2006 Xstrata acquired all of the remaining outstanding common shares (the "Common Shares") of Falconbridge Limited ("Falconbridge"), pursuant to the statutory compulsory acquisition procedures (the "Compulsory Acquisition"). Xstrata now beneficially owns 100% of the Common Shares.

Each shareholder of Falconbridge whose Common Shares were deemed to have been acquired under the Compulsory Acquisition will receive the equivalent of Xstrata's offer price of C$62.50 in cash for each Common Share once the shareholder delivers the certificate(s) representing those Common Shares, together with a transmittal and election form, to CIBC Mellon Trust Company in accordance with the instructions on the transmittal and election form. The aggregate cash consideration for the Common Shares acquired under this step of the Compulsory Acquisition is approximately C$19.6 million (approximately US$17.3 million).

Furthermore, on 1 November 2006, Xstrata's subsidiary, Falconbridge, completed the redemption (the "Preferred Share Redemption") of all of the outstanding Cumulative Redeemable Preferred Shares, Series F (TSX: FAL.PR.F) and Series G (TSX: FAL.PR.G), and Cumulative Preferred Shares, Series 1 for an aggregate cash consideration of approximately C$306 million (approximately US$270.4 million).

Following the completion of the Compulsory Acquisition and Preferred Share Redemption, the Toronto Stock Exchange (the "TSX") halted trading in and delisted the Common Shares, the Series F shares and the Series G shares from the TSX as of the close of the market on 1 November 2006.

Falconbridge shareholders with questions or requests for copies of the documents, please call CIBC Mellon Trust Company at +1-416-643-5500 or 1-800-387-0825. Further information is available from www.xstrata.com/falconbridge.

NEWS RELEASE

XSTRATA PLC ANNOUNCES DEBUT NOTES OFFERING

Zug, 6 November 2006

Xstrata plc ("Xstrata") announces the launch of its debut global bond offering to raise approximately US$1.5 billion. The offering comprises the sale of dollar denominated floating rate notes through Xstrata's subsidiary Xstrata Finance (Dubai) Limited and five-year and ten-year tranches of dollar denominated fixed rate notes through Xstrata's subsidiary Xstrata Finance (Canada) Limited. Xstrata expects to complete the offering in the near future. Proceeds from the transaction will be used to repay part of the amounts outstanding under the group's bridge loan facilities which were drawn down for the purpose of financing the acquisition of Falconbridge Ltd.

The Xstrata Finance (Dubai) Limited issue will be guaranteed by Xstrata, Xstrata (Schweiz) AG and Xstrata Finance (Canada) Limited and the Xstrata Finance (Canada) Limited issues will be guaranteed by Xstrata, Xstrata (Schweiz) AG and Xstrata Finance (Dubai) Limited.

The securities offered have not been and will not be registered under the US Securities Act of 1933 (the "Securities Act") or any relevant securities laws of any state or other jurisdiction and may not be offered or sold in the United States absent registration or an exemption from the registration requirements of the Securities Act. Accordingly, the securities will be offered and sold only (1) inside the United States to Qualified Institutional Buyers (QIBs as defined in Rule 144A under the Securities Act and (2) outside the US to persons other than US persons in reliance on Regulation S under the Securities Act.

This press release does not constitute an offer to sell or the solicitation of an offer to buy debt securities in the US or any other jurisdiction.

MEDIA RELEASE

XSTRATA CONFIRMS POWER STATION PROPOSAL

Mount Isa, 6 November 2006 - Xstrata is proposing to develop a 30 mega watt power station to secure reliable energy supply to its expanding Mount Isa operations.

The power station, which will be located on the mining lease at X41, is being built to supplement Xstrata's short to medium-term energy needs.

The power station does not, however, address the long-term energy requirements for the North West Minerals Province.

Chief Operating Officer North Queensland Copper Barry Grant said: "Xstrata's copper and zinc operations at Mount Isa are due to undergo significant expansions over the next 18 months, and it is critical that energy infrastructure is in place to meet these immediate needs.

"While this power station will complement longer-term energy strategies, stakeholders must continue to work together to develop real solutions to the long-term energy shortfall which could prevent the region from achieving its full potential," Mr Grant said.

The energy generated by the Xstrata Power Station (XPS) will provide a reliable and cost-effective source of power to supplement the Mica Creek power station run by CS Energy.

"Xstrata plans to be in Mount Isa for the long term, and the XPS will help to ensure a sustainable future," Mr Grant said.

Xstrata is currently seeking relevant approvals for the XPS from the Queensland Department of Mines and Energy and the Environmental Protection Agency.

Subject to State Government approvals, construction is expected to start in January 2007, with the power station fully operational by October.

Once operational, the XPS will be one of the most energy-efficient power stations operating in Australia.

Xstrata invites interested residents to attend a community briefing on the project on Tuesday, 21 November 2006 at the Red Earth Hotel, between 5:30pm and 7:00pm.

"Members of the community are invited to come along, hear about the project from Xstrata representatives and have any questions they may have about the project answered," Mr Grant said.

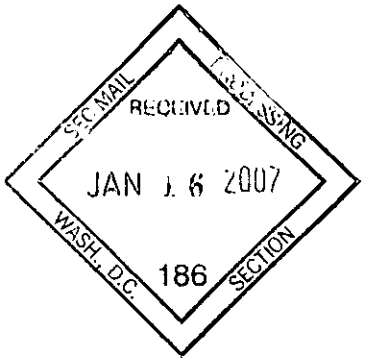
Notes to Editors

About Xstrata

Xstrata is a major global diversified mining group, listed on the London and Swiss stock exchanges. Headquartered in Zug, Switzerland, Xstrata maintains a meaningful position in seven major international commodity markets: copper, coking coal, thermal coal, ferrochrome, nickel, vanadium and zinc, with a smaller but profitable aluminium business, recycling facilities, additional exposures to gold, lead and silver and a suite of global technologies, many of which are industry leaders. The Group's operations and projects span 18 countries: Argentina, Australia, Brazil, Canada, Chile, Colombia, the Dominican Republic, Germany, Jamaica, New Caledonia, Norway, Papua New Guinea, Peru, South Africa, Spain, Tanzania, the USA and the UK.

Xstrata Copper is headquartered in Brisbane, Australia, with regional offices in Santiago, Chile; Lima, Peru; Buenos Aires, Argentina; and Toronto, Canada, and is one of the commodity business units within the major global diversified mining group Xstrata plc.



Xstrata Copper's mining operations span five countries and comprise mines, mineral processing plants and port facilities in North Queensland, Australia; mining and processing operations and port facilities in Chile, Peru and Argentina in South America; and mining and processing plants in Canada. It also has a recycling business (Noranda Recycling) with plants in Canada, the United States and Asia.

Xstrata Copper is the third largest global copper producer, with annual managed production of over one million tonnes.

Xstrata Zinc is one of the world's largest producers of zinc. Around half of all zinc currently consumed is used for galvanizing steel, which is an environmentally friendly method of protecting steel against corrosion. Zinc also finds application in the manufacture of die-cast alloys, brass and the production of zinc oxides and chemicals.

Xstrata's zinc and lead operations are located in Australia, Canada, Germany, Spain and the UK.

NEWS RELEASE

MRM RECEIVES FEDERAL CONSENT FOR AUD110 MILLION OPEN PIT MINE

Darwin, 20 October 2006

After McArthur River Mining (MRM) last week received Northern Territory Government approval for its AUD110 million open pit development, Federal Minister for the Environment and Heritage, Senator Ian Campbell, has today given his consent under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act).

MRM General Manager Mr Brian Hearne said this is the third and final decision required for the development after previously receiving a favourable recommendation from the Northern Territory Minister for Natural Resources, Environment and the Arts, Marion Scrymgour, and the approval of NT Mines and Energy Minister, Chris Natt.

"Senator Campbell's consent was the final step in the environmental assessment process and we thank him for this decision," Mr Hearne said.

"The comprehensive assessment of the project has given clarity to the facts that the mine has not polluted the McArthur River or the Gulf environments, the river diversions will be safe, and our plans for the open pit development are sustainable."

The assessment process has also resulted in an increase in the total cost of the development from an initial estimate of AUD66 million to AUD110 million. Of this, AUD10 million was due to modifications required to the river diversion design to incorporate the recommendations of the Northern Territory Government's independent expert, Professor Wayne Erskine.

The Northern Territory Minister for Mines and Energy, Chris Natt, approved the open pit development on 13 October 2006 after being satisfied that six conditions had been met. These were in relation to a AUD55.5 million security bond, a vegetation management plan, river diversion demonstration, contaminant management, a mine-funded independent environmental monitoring program and a Heads of Agreement for a AUD32 million Community Benefits Package.

The conditions requested by Senator Campbell will be met through the work of the independent environmental monitoring program to be implemented in conjunction with the NT Government.

Mr Hearne said a contract team is already in place on site which can now be mobilised on the preliminary civil works for the open pit development. This team had previously been employed on other approved site works.

xstrata
zinc

The first stage involves the expansion of the existing test pit operations in order to maintain current production levels while work on the full open pit development proceeds under a two year program.

The open pit development was considered a "controlled action" under the EPBC Act due to the presence of one fauna species rated as vulnerable – the freshwater sawfish. The Department of Environment and Heritage was also interested to examine the potential affect of the development on migratory birds.

The MRM Public Environmental Report (PER) lodged in July 2006, contained the results of a survey of freshwater fishes, particularly targeting the freshwater sawfish, undertaken this year by leading national authority, Dr Dean Thorburn.

This study found that from a regional perspective, the upper reaches of the McArthur River are marginal habitats for the freshwater sawfish in comparison to other Gulf rivers. The section of the river to be diverted is used as a route to upstream habitats such as Eight Mile Waterhole but is unlikely to represent a significant refuge habitat for the sawfish.

Dr Thorburn was satisfied that based on the proposed rehabilitation design for the new river channel, adequate passage for fish species would be maintained.

A comprehensive monitoring program will be conducted to monitor fish populations in seasonal and refuge pools and tidal reaches, and fish passage through the diversion.

The NT Environment Protection Agency (EPA) Environmental Assessment Report 54 accepted the conclusion that the development will not have a significant adverse impact on the national status of the freshwater sawfish and supported further studies.

The PER also reported there would be no significant impact on migratory birds around the McArthur River. A survey of migratory birds at and around the Bing Bong loading facility is planned.

About MRM

McArthur River Mine (MRM) is a zinc-lead mine wholly owned by Xstrata Zinc and located 900 kilometres south-east of Darwin near the Gulf of Carpentaria. It opened in 1995 to mine an ore body which is one of the largest known deposits of zinc and lead in the world. Since then, it has contributed both directly and indirectly around AUD350 million annually to the Northern Territory economy and employed a workforce of 350.

In August 2005, MRM announced its intention to convert the mine from an underground to an open pit operation to enable production to continue. This development would extend the life of mine by at least 25 years. MRM has a measured and indicated ore resource of greater than 120 million tonnes, equating to over 85 years of production at current levels.

The mine faces the prospect of closure however, as underground mining is no longer viable. After 10 years of operation, the most accessible underground ore has been extracted and the underground mining operations, which comprise over 100 kilometres of underground tunnels, have become uneconomical. The development of an open-pit operation is the only way to access MRM's significant ore reserves and secure the future of the operation.

Growing world demand for zinc, particularly in Asia, and improved refining methods, coupled with reduced operating costs and improved quality of MRM's bulk concentrate product have supported the decision to inject further investment in the mine.

In August 2005, MRM lodged a draft Environmental Impact Statement (EIS) with the Northern Territory Government for the open pit conversion. In December 2005, an EIS Supplement was submitted responding to around 150 matters raised through a public review process. At the conclusion of the EIS process in February 2006, the NT Minister for Natural Resources, Environment and The Arts, Marion Scrymgour, recommended against the mine proposal. This recommendation was passed to the Minister for Mines and Energy, the Hon Kon Vatskalis, MLA, who in March 2006, referred the matter back to the NT Environment Protection Agency (EPA) for further assessment on nine issues via a Public Environmental Report (PER) process. The PER was lodged in July 2006.

On Monday 28 August, Minister Scrymgour announced her conditional recommendation in favour of the mine development following the EPA's assessment of the PER.

Since April 2006, MRM's production has been generated by an approved test pit as underground operations have now ceased.

About Xstrata Zinc

Xstrata Zinc is one of the world's largest producers of zinc. Around half of all zinc currently consumed is used for galvanizing steel, which is an environmentally friendly method of protecting steel against corrosion. Zinc also finds application in the manufacture of die-cast alloys, brass and the production of zinc oxides and chemicals.

Xstrata's zinc and lead operations are located in Australia, Canada, Germany, Spain and the UK. They comprise: the San Juan de Nieva zinc smelter and the Arnao zinc semis plant in Asturias, Spain; the Hinojedo roasting plant in Cantabria, Spain; the Nordenham zinc smelter in northern Germany; the Mount Isa, George Fisher-Hilton and Black Star zinc-lead mines and lead smelter in Queensland, Australia; McArthur River zinc-lead mine in the Northern Territory, Australia; the Northfleet lead refinery located in the UK; the Brunswick zinc-lead mine and lead smelter in New Brunswick, Canada, 25% of the CEZ zinc smelter near Montreal, Canada; 50% of Lennard Shelf zinc lead mine in Western Australia; 75% of Lady Loretta zinc lead deposit in Queensland, Australia; 33.75% of Antamina mine in Peru and the Perseverance zinc deposit in Quebec.

NEWS RELEASE

PRODUCTION AT OAKY CREEK OPEN-CUT TO CEASE IN DECEMBER

Sydney, Thursday 26 October 2006

Xstrata Coal announces plans to curtail production at its open cut operation at Oaky Creek from December to bring on lower-cost production at Newlands. The Oaky Creek Open Cut, which has been successfully operated by mining contractor Thiess, has a high cost structure principally because of strip ratios which are now in excess of 20bcm per tonne.

Chief Executive Peter Coates said: "We are restructuring the profile of our coking coal production to minimise costs and optimise the product specification we offer to customers. As part of this move, production from the Oaky Open Cut will be replaced from December by increased production of our lower cost, prime hard coking coal product from the Newlands Wollombi deposit. Overall production of coking coal will continue to grow in 2007, as we position our business to respond to market conditions, while lowering the cost structure of our Queensland coking operations."

No full-time Xstrata employees will be affected by this decision.

NEWS RELEASE

SALE OF RIGHTS ISSUE RUMP

Zug, 30 October 2006

Xstrata announced previously that it had received valid acceptances in respect of 234,461,198 New Shares, representing approximately 99.4 % of the total number of New Shares offered to Shareholders pursuant to the fully underwritten Rights Issue announced by the Company on 3 October 2006.

Xstrata confirms that Deutsche Bank and JPMorgan Cazenove have procured purchasers for the remaining 1,326,398 New Shares for which valid acceptances were not received at an average price of £22.341 per New Share.

The net proceeds, after deduction of the Issue Price of £12.65 per New Share and the expenses of procuring purchasers (including applicable brokerage fees and commissions and amounts in respect of value added tax), will, save for amounts less than £5.00, be paid to those persons whose rights have lapsed in accordance with the terms of the Rights Issue, pro rata to their lapsed provisional allotments.

NEWS RELEASE

XSTRATA ACQUIRES ADDITIONAL SHARES OF FALCONBRIDGE UNDER COMPULSORY ACQUISITION

Zug and Toronto, 13 October 2006

At midnight (Toronto time) 5 October 2006 Xstrata acquired all of the common shares (the "Common Shares") of Falconbridge Limited ("Falconbridge") that were outstanding at the close of business on 1 September 2006 and that Xstrata did not already beneficially own, pursuant to the statutory compulsory acquisition procedures (the "First Compulsory Acquisition"). Xstrata now beneficially owns approximately 99.9% of the issued and outstanding Common Shares.

Each shareholder of Falconbridge whose Common Shares were deemed to have been acquired under the First Compulsory Acquisition will receive the equivalent of Xstrata's offer price of C$62.50 in cash for each Common Share once the shareholder delivers the certificate(s) representing those Common Shares, together with a transmittal and election form, to CIBC Mellon Trust Company in accordance with the instructions on the transmittal and election form. The aggregate cash consideration for the Common Shares acquired under the First Compulsory Acquisition is approximately C$539 million (approximately US$478 million).

Furthermore, on 25 September 2006, pursuant to the provisions of section 189 of the *Business Corporations Act* (Ontario), Falconbridge acquired and cancelled an aggregate of 1,850,577 Common Shares for an aggregate cash consideration of approximately C$116 million (approximately US$103 million).

Xstrata mailed on 2 October 2006 a second notice of compulsory acquisition (the "Second Compulsory Acquisition") in respect of all of the Common Shares that were issued after the close of business on 1 September 2006 on conversion of the Falconbridge adjustable rate convertible subordinated debentures (the "Debentures"). All of the Debentures which were not converted into Common Shares by the close of business on 29 September 2006 were redeemed on 2 October 2006. Each shareholder of Falconbridge whose Common Shares are deemed to be acquired under the Second Compulsory Acquisition will also receive the equivalent of Xstrata's offer price of C$62.50 in cash for each Common Share. At the completion of the Second Compulsory Acquisition, Xstrata will beneficially own 100% of the outstanding Common Shares.

Falconbridge shareholders with questions or requests for copies of the documents, please call CIBC Mellon Trust Company at +1-416-643-5500 or 1-800-387-0825. Further information is available from www.xstrata.com/falconbridge.

The offer for Falconbridge referred to herein (the "Offer") was made by Xstrata Canada Inc. (the "Offeror"), a wholly-owned indirect subsidiary of Xstrata plc ("Xstrata" or the "Company").

This announcement does not constitute or form part of any offer or invitation to purchase, otherwise acquire, subscribe for, sell, otherwise dispose of or issue, or any solicitation of any offer to sell, otherwise dispose of, issue, purchase, otherwise acquire or subscribe for, any security. The Offer was made exclusively by means of, and subject to the terms and conditions set out in, the offer and offering circular filed on 18 May 2006, as amended, varied and supplemented by the notice of extension dated 7 July 2006, the notice of variation dated 11 July 2006, the notice of variation dated 21 July 2006 and the notice of extension dated 15 August 2006, all filed with Canadian provincial and United States federal securities regulators. The Offer expired on 25 August 2006.

The release, publication or distribution of this announcement in certain jurisdictions may be restricted by law and therefore persons in such jurisdictions into which this announcement is released, published or distributed should inform themselves about and observe such restrictions.

Unless the context otherwise requires, references in this announcement to the Falconbridge Acquisition mean the acquisition under the Offer of all outstanding Common Shares not previously owned by the Xstrata group.

Nothing in this announcement is an offer of securities for sale or a solicitation of an offer to purchase securities in the United States or in any other jurisdiction. The securities of Xstrata referred to herein have not been and will not be registered under the US Securities Act of 1933, as amended (the "Securities Act"), and such securities may not be offered or sold in the United States absent registration under the Securities Act or an applicable exemption from the registration requirements of the Securities Act.

This announcement includes statements that are, or may be deemed to be, "forward-looking statements". By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future and may be beyond Xstrata's ability to control or predict. Forward-looking statements are not guarantees of future performance. The Xstrata group's actual results of operations, financial condition, liquidity, dividend policy and the development of the industries in which it operates may differ materially from the impression created by the forward-looking statements contained in this announcement. Further, actual developments in relation to the Falconbridge Acquisition may differ materially from those contemplated by forward-looking statements depending on certain factors which include, but are not limited to, the risks that the Xstrata group may not realise the anticipated benefits, operational and other synergies and/or cost savings from the Falconbridge Acquisition and/or the acquisition by the Xstrata group of a one third interest in Cerrejón which completed on 12 May 2006, and/or the acquisition by the Xstrata group of Xstrata Tintaya S.A. ("Tintaya") which completed on 21 June 2006 and the Xstrata group may incur and/or experience unanticipated costs and/or delays or difficulties relating to integration of the enlarged Xstrata group. In addition, even if the results of operations, financial condition, liquidity and dividend policy of the Xstrata group, and the development of the industries in which it operates, are consistent with the forward-looking statements contained in this announcement, those results or developments may not be indicative of results or developments in subsequent periods. Important factors that could cause these differences include, but are not limited to, general economic and business conditions, commodity price volatility, industry trends, competition, changes in government and other regulation, including in relation to the environment, health and safety and taxation, labour relations and work stoppages, changes in political and economic stability, currency fluctuations (including the €/US$, £/US$, A$/US$, C$/US$, ZAR/US$, ARS/US$, CHF/US$, the Chilean peso/US$, the Colombian peso/US$, the Peruvian Sol/US$ and the Norwegian Kroner/US$ exchange rates), the Xstrata group's ability to integrate new businesses (including the Falconbridge group, the Xstrata

group's interest in Cerrejón and Tintaya) and recover its reserves or develop new reserves and changes in business strategy or development plans and other risks.

Other than in accordance with its legal or regulatory obligations (including under the Listing Rules, the Disclosure Rules and the Prospectus Rules of the UK Financial Services Authority), Xstrata does not undertake any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events or otherwise.

No statement in this announcement is intended as a profit forecast and no statement in this announcement should be interpreted to mean that earnings per Xstrata ordinary share for the current or future financial years would necessarily match or exceed the historical published earnings per Xstrata ordinary share.

Neither the content of the Company's website (or any other website) nor the content of any website accessible from hyperlinks on the Company's website (or any other website) is incorporated into, or forms part of, this announcement.

McArthur River Mining

NEWS RELEASE

MRM WELCOMES NT MINISTER'S APPROVAL OF $110 MILLION OPEN PIT MINE

Darwin, 13 October 2006

McArthur River Mining (MRM) today welcomed the approval of the Northern Territory Minister for Mines and Energy, the Hon Chris Natt for its AUD110 million development to convert from underground to open pit operations.

Related to this announcement, the Minister also endorsed MRM's 2007 Mining Management Plan (MMP), a Heads of Agreement for a AUD32 million package of economic and social benefits to the Borroloola region, and an agreement for independent environmental monitoring of the mine operations.

MRM General Manager Mr Brian Hearne said that subject to final approval by Australia's Federal Minister for Environment Senator Ian Campbell, the mine would progress immediately with the development program.

"We thank the Minister and the NT Government for approving this development," Mr Hearne said.

"This announcement provides much needed certainty for the mine's future and acknowledges our commitment to environmental management and the community.

"It is tremendous news for all our staff, suppliers and customers who have been waiting for a resolution on this development for more than three years. We appreciate their support and patience."

The decision provides job security for more than 430 staff and contractors currently employed by the mine as well as an estimated 1,400 people indirectly employed by MRM through more than 400 Territory-based suppliers.

The approved open pit development will enable MRM to continue to access one of the world's largest known deposits of zinc and lead. It will increase annual ore throughput from 1.6 to 1.8 million tonnes to maintain current levels of concentrate production of around 320,000dmt per year, and extend the life of mine by 25 years.

"We are pleased that as a result of intense scrutiny, the NT Environment Protection Agency is satisfied there is no evidence the mine has adversely impacted on the McArthur River or Gulf environments and that the river diversions will be safe in all weather conditions," Mr Hearne said.

He added the company has complied with all the conditions requested by the Government.

"The agreements entered have formalised our long standing commitment to minimising the mine's environmental footprint and maximising regional benefits."

In particular, the Heads of Agreement for economic and social benefits formalises MRM's long term commitment to local employment, training and community development initiatives which target health, education, arts and culture, environment, social issues, enterprise development and job creation.

Fax +61 88975 8170
www.xstrata.com

ABN 90 008 167 815

"These initiatives are particularly important in providing economic opportunities for isolated communities," Mr Hearne said.

"We are working to increase the level of indigenous employment to 20 percent of the mine workforce and will also continue to support the establishment of local business opportunities to supply the mine."

Under the approved MMP, the first stage of work involves the expansion of the existing test pit operations in order to maintain current production levels while work on the full open pit development proceeds under a two year program.

MRM produces 70 percent of the world's zinc-lead bulk concentrate making it a leading exporter of raw material to Imperial Smelters in Poland, Romania, Japan and China. By converting to open pit operations, the business is forecast to inject AUD329 million into the Territory economy and AUD523 million into the Australian economy each year. This equates to a total benefit of AUD13 billion over the 25 year mine life.

MRM has already indicated that 100 percent of the cost of the open pit development will be spent with Australian suppliers of which 31 percent (AUD34 million) will be invested directly in the Territory.

The final step in the approval process is for the Federal Minister for Environment, Senator Ian Campbell, to announce his decision regarding matters under the *Environmental Protection and Biodiversity Conservation Act 1999 (EPBC Act)*.

The NT Government's decision concludes a comprehensive environmental assessment of the proposed open pit development which commenced in March 2003 and has included a Draft Environmental Impact Study (August 2005), an EIS Supplement (December 2005) and a Public Environmental Report (July 2006).

About MRM

McArthur River Mine (MRM) is a zinc-lead mine wholly owned by Xstrata Zinc and located 900 kilometres south-east of Darwin near the Gulf of Carpentaria. It opened in 1995 to mine an ore body which is one of the largest known deposits of zinc and lead in the world. Since then, it has contributed both directly and indirectly around AUD350 million annually to the Northern Territory economy and employed a workforce of 350.

In August 2005, MRM announced its intention to convert the mine from an underground to an open pit operation to enable production to continue. This development would extend the life of mine by at least 25 years. MRM has a measured and indicated ore resource of greater than 120 million tonnes, equating to over 85 years of production at current levels.

The mine faces the prospect of closure however, as underground mining is no longer viable. After 10 years of operation, the most accessible underground ore has been extracted and the underground mining operations, which comprise over 100 kilometres of underground tunnels, have become uneconomical. The development of an open-pit operation is the only way to access MRM's significant ore reserves and secure the future of the operation.

Growing world demand for zinc, particularly in Asia, and improved refining methods, coupled with reduced operating costs and improved quality of MRM's bulk concentrate product have supported the decision to inject further investment in the mine.

In August 2005, MRM lodged a draft Environmental Impact Statement (EIS) with the Northern Territory Government for the open pit conversion. In December 2005, an EIS Supplement was submitted responding to around 150 matters raised through a public review process. At the conclusion of the EIS process in February 2006, the NT Minister for Natural Resources, Environment and The Arts, Marion Scrymgour, recommended against the mine proposal. This recommendation was passed to the Minister for Mines and Energy, the Hon Kon Vatskalis, MLA, who in March 2006, referred the matter back to the NT Environment Protection Agency (EPA) for further assessment on nine issues via a Public Environmental Report (PER) process. The PER was lodged in July 2006.

On Monday 28 August, Minister Scrymgour announced her conditional recommendation in favour of the mine development following the EPA's assessment of the PER.

Since April 2006, MRM's production has been generated by an approved test pit as underground operations have now ceased.

About Xstrata Zinc

Xstrata Zinc is one of the world's largest producers of zinc. Around half of all zinc currently consumed is used for galvanizing steel, which is an environmentally friendly method of protecting steel against corrosion. Zinc also finds application in the manufacture of die-cast alloys, brass and the production of zinc oxides and chemicals.

Xstrata's zinc and lead operations are located in Australia, Canada, Germany, Spain and the UK. They comprise: the San Juan de Nieva zinc smelter and the Arnao zinc semis plant in Asturias, Spain; the Hinojedo roasting plant in Cantabria, Spain; the Nordenham zinc smelter in northern Germany; the Mount Isa, George Fisher-Hilton and Black Star zinc-lead mines and lead smelter in Queensland, Australia; McArthur River zinc-lead mine in the Northern Territory, Australia; the Northfleet lead refinery located in the UK; the Brunswick zinc-lead mine and lead smelter in New Brunswick, Canada, 25% of the CEZ zinc smelter near Montreal, Canada; 50% of Lennard Shelf zinc lead mine in Western Australia; 75% of Lady Loretta zinc lead deposit in Queensland, Australia; 33.75% of Antamina mine in Peru and the Perseverance zinc deposit in Quebec.

XSTRATA'S SUBSIDIARY FALCONBRIDGE LTD ANNOUNCES COMPLETION OF ACQUISITION OF NOVICOURT

Toronto, 17 October 2006

Xstrata's subsidiary Falconbridge Limited ("Falconbridge") today announces that it has completed its acquisition by way of amalgamation of all remaining common shares of Novicourt Inc. ("Novicourt") which were not tendered to Falconbridge's offer dated June 26, 2006 to purchase all of the outstanding common shares of Novicourt that Falconbridge did not already own. The shareholders of Novicourt have approved the amalgamation at a special meeting of shareholders held earlier today.

A request has been made to the Toronto Stock Exchange to delist the common shares of Novicourt. The common shares of Novicourt will be delisted as at the close of trading on October 20, 2006. It is expected that Novicourt will cease to be a reporting issuer shortly thereafter.

NEWS RELEASE

XSTRATA COPPER ANNOUNCES CHANGE IN SENIOR MANAGEMENT OF NORTH QUEENSLAND COPPER DIVISION

Mount Isa, 18 October 2006

Xstrata Copper announces a change at the senior management level for its North Queensland operating division.

Steve de Kruijff, formerly Xstrata Copper's General Manager - Mount Isa Copper Operations, will be appointed as Chief Operating Officer North Queensland Copper, effective December 1. Mr de Kruijff will be replacing Barry Grant, who has held the position for the past two years.

Mr de Kruijff will continue to manage the North Queensland Copper Division from Mount Isa. The division comprises the Mount Isa Mines copper mining and processing operations, the Ernest Henry Mine and the Townsville copper refinery and port operations. He will report to Xstrata Copper's Chief Executive, Charlie Sartain, and will also be appointed as a member of the Xstrata Copper Executive Committee.

Charlie Sartain, Chief Executive Xstrata Copper, commented:
"I would like to thank Barry for his enormous contribution to the transformation of our north Queensland copper operations over the past two years, and previously for his contributions as General Manager of Minera Alumbrera in Argentina and Ernest Henry Mining. Barry will be leaving the company at the end of November and leaves with our very best wishes for the future.

"I am very pleased that Steve will move into this senior management role with Xstrata Copper. He has a wealth of experience and knowledge of the Mount Isa copper operations, has held a number of general manager positions with the group in recent years, and is well prepared to take on the role as Chief Operating Officer."

Notes to editors:

Xstrata is a major global diversified mining group, listed on the London and Swiss stock exchanges. Headquartered in Zug, Switzerland, Xstrata maintains a meaningful position in seven major international commodity markets: copper, coking coal, thermal coal, ferrochrome, nickel, vanadium and zinc, with a smaller but profitable aluminium business, recycling facilities, additional exposures to gold, lead and silver and a suite of global technologies, many of which are industry leaders. The Group's operations and projects span 18 countries: Argentina, Australia, Brazil, Canada, Chile, Colombia, the Dominican Republic, Germany, Jamaica, New Caledonia, Norway, Papua New Guinea, Peru, South Africa, Spain, Tanzania, the USA and the UK.

Xstrata Copper is headquartered in Brisbane, Australia, with regional offices in Santiago, Chile; Lima, Peru; Buenos Aires, Argentina; and Toronto, Canada, and is one of the commodity business units within the major global diversified mining group Xstrata plc.

Xstrata Copper's mining operations span five countries and comprise mines, mineral processing plants and port facilities in North Queensland, Australia; mining and processing operations and port facilities in Chile, Peru and Argentina in South America; and mining and processing plants in Canada. It also has a recycling business (Noranda Recycling) with plants in Canada, the United States and Asia.

Xstrata Copper is the third largest global copper producer, with annual managed production of over one million tonnes.

NEWS RELEASE

XSTRATA COAL WINS PREMIER'S NSW EXPORT AWARD

Sydney, 20 October 2006 - Xstrata Coal has won the Minerals and Energy category of the 2006 Premier's New South Wales Export Awards.

Announced last night, the prestigious State award was presented to Xstrata Coal in recognition of its continuing contribution to the NSW export industry, generating significant revenue for the State and providing employment opportunities for locally based employees.

Xstrata Coal's NSW operations will this year produce about 40% of Xstrata Coal's global production and more than a third of the State's coal production.

"Xstrata Coal is proud to be recognised as a significant contributor to the NSW economy and business environment. We are active in our communities and continue to be committed to our local NSW operations and the safety and health of our employees," said Chief Executive, Peter Coates.

"We contribute some AUD1.5 billion to the NSW economy each year through the payment of NSW Government royalties, wages and rail and port charges and through investment in mines, goods and services."

More than 2,000 people are employed in the Company's NSW underground and open cut mines, the majority of which are located in the Hunter Valley, with the remainder in the western coalfields.

Almost 90% of Xstrata Coal's NSW production is sold in Japan, South Korea and Taiwan, with exports of AUD2 billion in 2004-2005, with some tonnage also destined for Mexico and other smaller markets in the Asia-Pacific Region. While most customers are based in North Asia or Europe, the company supplies coal to every continent except Antarctica.

The export business is underpinned by about 6 million tonnes of domestic sales, mostly under long-term contract to local NSW end-users.

"As the only major global coal export company that retains its head office and all major corporate functions in NSW, Xstrata Coal has a clear commitment to the State," said Peter Coates.

Xstrata Coal has also committed significant financial support to the development and implementation of Clean Coal Technology (CCT) projects, including the development and testing of CO2 storage and methane power generation projects both in QLD and at its Teralba site in NSW.

The Company is a major contributor to the AUD300 million COAL 21 fund for the development of Australian clean coal technologies. A co-operative initiative involving State Governments, the Commonwealth Government, the scientific community, power generators and the coal industry, COAL 21 is recognised globally for its innovation and the collaboration of all parties towards establishing a low emissions future.

Xstrata Coal has recently invested in and developed a number of greenfield and brownfield sites in NSW focused on export production, including the Mt Owen/Glendell expansion (AUD100m investment), the Liddell expansion (AUD100m), the Bulga/Beltana underground mine (AUD350m) and the Ulan mine expansion (AUD140m).

The Xstrata Coal business is world scale, with net assets of some US$6.3 billion and total revenue of over US$3 billion per year.

NEWS RELEASE

APPLICATION FOR LISTING OF US$375M 4% CONVERTIBLE BONDS DUE 2017

Zug, 12 October 2006

Xstrata plc ("Xstrata") announces that it has applied for US$375,000,000 4.00 per cent. guaranteed convertible bonds due 2017 ("the Bonds") to be admitted to the Official List of the Financial Services Authority and admitted to trading on the Professional Securities Market of London Stock Exchange plc ("the Listing"). The Bonds will be issued by Xstrata Capital Corporation A.V.V. ("the Issuer") and guaranteed by Xstrata.

The Bonds are to be issued in substitution for the US$375,000,000 4.00 per cent. guaranteed convertible debenture due 2017 ("the Debenture") which, as announced on 15 August 2005, was issued to a subsidiary of Brookfield Asset Management Inc. ("Brookfield") in partial satisfaction of the consideration for the purchase from Brookfield on that date of 73,115,756 common shares representing approximately 19.9% of the common shares of Falconbridge Limited. The initial conversion price for the Bonds is the conversion price set at the time of the issue of the Debenture in August 2005 and is £17.1315 (a premium of 35% to the closing price of Xstrata's ordinary shares on 11 August 2005). The conversion price will be adjusted in accordance with the terms and conditions of the Bonds immediately upon the issue of the Bonds to £15.27 as a result of events occurring after 6 September 2005 (the date of issue of the Debenture) but prior to the issue date of the Bonds. The Bonds will be issued to Trilon International Inc., a wholly owned subsidiary of Brookfield and the current holder of the Debenture ("Trilon"). Xstrata is not making any offer of the Bonds in relation to the Listing.

Pursuant to the subscription agreement entered into in relation to the issue of the Debenture, Xstrata agreed to use all reasonable endeavours to obtain a listing of the Debenture (or substitution bonds or debentures identical to the Debenture in all material respects). In fulfilling this obligation, Xstrata and Trilon have now entered into a further subscription agreement in relation to the Bonds, pursuant to which the Bonds are being issued in consideration for the cancellation of the Debenture, the waiver of all Trilon's rights under it and the release of Xstrata and the Issuer from each of their respective obligations pursuant to it. Xstrata will therefore not receive any cash proceeds for the issue of the Bonds.

For the purpose of the Listing, Listing Particulars for the Bonds have been published today and are available at www.xstrata.com.

EMBARGO: 3pm, Monday 9 October 2006

XSTRATA LAUNCHES ELIZA THE ROBOT AT MOUNT ISA HOSPITAL

Mount Isa, Monday 9 October 2006

Xstrata today launched an innovative new telepaediatric service at Mount Isa Hospital – Eliza the Robot – that will save many Mount Isa families the inconvenience and costs of extensive travel away from home.

Through the Xstrata Community Partnership Program Queensland, Xstrata is providing $335,000 over three years to the Royal Children's Hospital Foundation to support the University of Queensland Centre for Online Health's development of telepaediatric robots for regional Queensland hospitals, including Mount Isa's Eliza.

Officially launching the new service at Mount Isa Hospital, Mr Barry Grant, Xstrata's Chief Operating Officer, North Queensland Copper Division, said the telepaediatric service was an initiative that will greatly improve regional families' access to specialist care.

"This is a wonderful service which Xstrata is proud to support. Eliza the Robot will provide support to clinicians, families and their children in Mount Isa and the broader region," Mr. Grant said.

"Specialist referrals often require considerable travel to the nearest major hospital, which for Mount Isa children would be either Townsville or Brisbane. One of the benefits of this new service is that many sick children will be spared the need to travel the long distance to another hospital as Eliza will be wheeled to their bedside to enable direct video-conference consultations with specialist staff thousands of kilometres away at the Royal Children's Hospital in Brisbane.

"Xstrata's partnership with the Royal Children's Hospital Foundation means four robots will be developed and installed in regional hospitals throughout Queensland this year and in 2007, ultimately benefiting thousands of children and families throughout the State.

"Xstrata is committed to supporting the communities in which we operate, and I believe this new service will make a long-lasting and positive contribution to regional Queensland," he said.

Royal Children's Hospital Foundation CEO, Ms Karenlee Spillane said Xstrata's commitment to funding telepaediatric services will allow the Centre for Online Health to expand on the success of its first robot, and to provide cost-effective specialist care for children in regional Queensland.

"Eliza is based on a prototype known as Roy the Robot, a unit installed and tested in Gladstone in 2004 which has since demonstrated great success in allowing children access to specialist

health care across great distances while minimising disruption and costs for patients and their families."

The initiative is part of the $2.48 million Xstrata Community Partnership Program in Queensland, which supports a range of State-wide initiatives in the areas of health, social and community development and education. Xstrata's partners in the program, launched earlier this year, are the Royal Children's Hospital Foundation, the Leukaemia Foundation, Centacare, The University of Queensland and The Wesley Research Institute. More details about the program, and the Xstrata Community Partnership Program North Queensland, are located at http://www.xstrata.com/sustainability/social/corporate

Xstrata, The Royal Children's Hospital Foundation and the University of Queensland's Centre for Online Health gratefully acknowledge the support of Qantas, who generously covered the costs of flights from Brisbane to Mount Isa for the project team for today's launch.

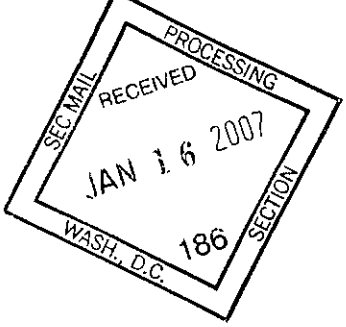
COMPANY ANNOUNCEMENT

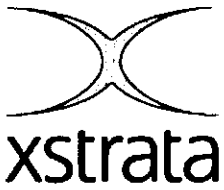
DISCLOSABLE INTERESTS

Zug, 6 October 2006

Xstrata plc ("Xstrata") announces that it was notified on 5 October 2006 by Credit Suisse Group ("CSG") of a change in the interests of CSG, Credit Suisse First Boston Equities Limited ("CSFB Equities") and Credit Suisse Securities (Europe) Limited ("CSSEL") in Xstrata's ordinary shares (the "Shares"). The notification stated that CSFB Equities and CSSEL are party to agreements (together the "Agreement") with Glencore International AG ("Glencore") relating to the acquisition of interests in the Shares. The notification also stated that CSG had an interest in 266,773,359 Shares (37.71%) of which CSFB Equities, CSSEL and Glencore in aggregate were jointly interested in 254,467,290 Shares (35.97%). The notification stated that CSFB Equities held 0 Shares and was interested in 254,467,290 Shares (35.97%) by virtue of the Agreement and that CSSEL held 153,426,890 Shares (21.69%) (1,854,480) of which were in the course of settlement) and was interested in 101,040,400 Shares (14.28%) by virtue of the Agreement. The notification stated further that CSSEL's interests in 11,810 Shares were interests of the type as is mentioned in section 208(5) of the Companies Act 1985, as amended ("Section 208(5)") by virtue of the right to redelivery of equivalent securities under stock lending arrangements. According to the notification, CSG's interests in an additional 10,300,000 Shares were interests of the type as is mentioned in Section 208(5) by virtue of the right to redelivery of equivalent securities under stock lending arrangements.



A notification received from Glencore on 5 October 2006 stated that Glencore is a party to the Agreement with CSFB Equities and CSSEL and that Glencore, CSFB Equities and CSSEL in aggregate were jointly interested in a total of 254,467,290 Shares (35.97%). The notification stated that Glencore was interested in 153,415,080 Shares (21.68%) by virtue of the Agreement. The notification stated further that, so far as was known to Glencore at the date of its notification, Glencore's interests in 11,810 Shares were interests as are mentioned in Section 208(5).



707,362,787 Shares are currently in issue.

GUARANTEED CONVERTIBLE BONDS
XSTRATA CAPITAL CORPORATION A.V.V.

US$600,000,000 3.95 PER CENT. GUARANTEED CONVERTIBLE BONDS DUE 2010 (THE "BONDS") (AND THE "BONDHOLDERS") GUARANTEED BY XSTRATA PLC AND CONVERTIBLE INTO 3.95 PER CENT. EXCHANGEABLE REDEEMABLE PREFERENCE SHARES OF XSTRATA CAPITAL CORPORATION A.V.V. WHICH ARE GUARANTEED BY, AND WILL BE EXCHANGEABLE IMMEDIATELY UPON ISSUANCE FOR, ORDINARY SHARES IN XSTRATA PLC

Notice Of Adjustment Of Exchange Price

6 October 2006

Adjustment Events

Pursuant to announcement on 3 October 2006, Xstrata plc now announces an adjusted Exchange Price for the Bonds.

In respect of its 2005 financial year, Xstrata plc paid dividends totalling US$0.34 per Ordinary Share of which US$0.052 per Ordinary Share constituted a Capital Distribution.

On 17 May 2006, Xstrata plc announced a placing of 61,994,320 Ordinary Shares (the "Placing Shares"). 32,543,344 of the Placing Shares were new Ordinary Shares (the "New Placing Shares") and 29,450,976 of the Placing Shares were Ordinary Shares being sold by Batiss Investments Limited (the "Batiss Placing Shares") pursuant to the Equity Capital Management Programme described in paragraph 14 of the General Information section of the Offering Circular published by Xstrata Capital Corporation A.V.V. on 11 August 2003 (the "Offering Circular"). The Placing Shares were issued at a price of 2100 pence per Placing Share, which was less than 95 per cent. of the Current Market Price per Ordinary Share.

On 3 October 2006, Xstrata plc announced a rights issue (the "Rights Issue") of up to 235,787,596 new Ordinary Shares ("New Shares"). The New Shares will be issued at a price of 1265 pence per New Share, which is less than 95 per cent. of the Current Market Price per Ordinary Share.

Adjustment of Conversion Terms

As described in Condition 7 of the Terms and Conditions of the Bonds (as constituted by a the trust deed dated 15 August 2003 between the Xstrata Capital Corporation A.V.V., Xstrata plc and Law Debenture Trustees Limited as trustee for the holders of the Bonds(the "Trust Deed")) each US$1,000 principal amount of a Bond is convertible into one Preference Share with a paid-up value of US$1,000. Preference Shares issued on

conversion of Bonds will be allotted to the relevant Bondholders and immediately transferred to Xstrata plc in consideration for Xstrata plc delivering to the relevant Bondholders such number of Ordinary Shares as is determined by dividing the paid-up value of each Preference Share (translated into pounds sterling at the fixed exchange rate of US$1.6077 = £1.00) by the Exchange Price in effect on the Conversion Date (rounded down to the nearest whole number of Ordinary Shares). The current Exchange Price is 610 pence per Ordinary Share converted into US dollars at the fixed exchange rate of US$1.6077 = £1.00.

The terms of the Preference Shares as set out in the Articles of the Issuer and the Issuer Board Resolution (which are summarised in Condition 7(B) of the Terms and Conditions of the Bonds as set out in the Offering Circular) require an adjustment to be made to the Exchange Price if:

- Xstrata plc pays or makes a Capital Distribution to Shareholders as further described in the Articles of the Issuer and the Issuer Board Resolution and summarised in Condition 7(B)(iii) of the Terms and Conditions of the Bonds as set out in the Offering Circular;

- Xstrata plc issues wholly for cash Ordinary Shares at a price per Ordinary Share that is less than 95 per cent. of the Current Market Price per Ordinary Share as further described in the Articles of the Issuer and the Issuer Board Resolution and summarised in Condition 7(B)(vi) of the Terms and Conditions of the Bonds as set out in the Offering Circular; and

- Xstrata plc issues Ordinary Shares to Shareholders as a class by way of rights at a price per Ordinary Share that is less than 95 per cent. of the Current Market Price per Ordinary Share as further described in the Articles of the Issuer and the Issuer Board Resolution and summarised in Condition 7(B)(iv) of the Terms and Conditions of the Bonds as set out in the Offering Circular.

As the adjustments to the Exchange Price required as a consequence of the payment of the Capital Distribution and the issue of the New Placing Shares in aggregate would have resulted in an adjustment of less than one per cent. of the Exchange Price, no adjustment was required to be made to the Exchange Price as permitted by the terms of the Preference Shares as set out in the Articles of the Issuer and the Issuer Board Resolution (which are summarised in Condition 7(B) of the Terms and Conditions of the Bonds as set out in the Offering Circular). These adjustments have been carried forward and are being taken into account in the adjustment being made as a consequence of the Rights Issue.

From and including 5 October 2006, the first date on which the Ordinary Shares traded "ex-rights" on the London Stock Exchange, the Exchange Price will be adjusted to 544 pence per Ordinary Share converted into US dollars at the fixed exchange rate of US$1.6077 = £1.00. All other Terms and Conditions of the Bonds remain unchanged.

The Exchange Price as adjusted applies to all Bonds for which the Conversion Date occurs on or after 5 October 2006.

Defined Terms

All words and terms that are capitalised herein shall have the same meaning as set out in the Terms and Conditions of the Bonds.

The notification stated that CSFB Equities and CSSEL are party to agreements (together the "Agreement") with Glencore International AG ("Glencore") relating to the acquisition of interests in the Shares. The notification also stated that CSG had an interest in 353,693,932 Shares (37.5%) of which CSFB Equities, CSSEL and Glencore in aggregate were jointly interested in 340,024,167 Shares (36.05%). The notification stated that CSFB Equities held 0 Shares and was interested in 340,024,167 Shares (36.05%) by virtue of the Agreement and that CSSEL held 154,783,434 Shares (16.4%) (3,194,704) of which were in the course of settlement) and was interested in 185,240,733 Shares (19.64%) by virtue of the Agreement. The notification stated further that CSSEL's interests in 28,130 Shares were interests of the type as is mentioned in section 208(5) of the Companies Act 1985, as amended ("Section 208(5)") by virtue of the right to redelivery of equivalent securities under stock lending arrangements. According to the notification, CSG's interests in an additional 12,627,961 Shares were interests of the type as is mentioned in Section 208(5) by virtue of the right to redelivery of equivalent securities under stock lending arrangements.

A notification received from Glencore on 3 November 2006 stated that Glencore is a party to the Agreement with CSFB Equities and CSSEL and that Glencore, CSFB Equities and CSSEL in aggregate were jointly interested in a total of 340,024,167 Shares (36.05%). The notification stated that Glencore was interested in 154,783,434 Shares (16.41%) by virtue of the Agreement. The notification stated further that, so far as was known to Glencore at the date of its notification, Glencore's interests in 28,130 Shares were interests as are mentioned in Section 208(5).

As of 6 November, 943,150,383 Shares were in issue.

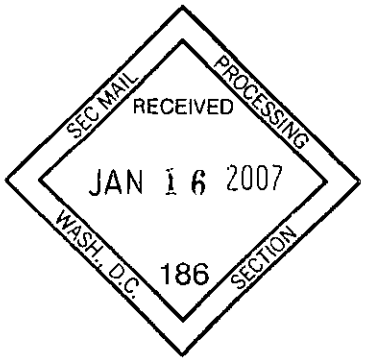
GLENCORE INTERNATIONAL AND CSFB JOINT INTEREST

Zug, 7 November 2006

Xstrata plc ("Xstrata") announces that it was notified on 6 November 2006 by Credit Suisse Group ("CSG") of a change in the interests of CSG, Credit Suisse First Boston Equities Limited ("CSFB Equities") and Credit Suisse Securities (Europe) Limited ("CSSEL") in Xstrata's ordinary shares (the "Shares"). The notification stated that CSFB Equities and CSSEL are party to agreements (together the "Agreement") with Glencore International AG ("Glencore") relating to the acquisition of interests in the Shares. The notification also stated that CSG had an interest in 351,981,410 Shares (37.32%) of which CSFB Equities, CSSEL and Glencore in aggregate were jointly interested in 338,317,474 Shares (35.87%). The notification stated that CSFB Equities held 0 Shares and was interested in 338,317,474 Shares (35.87%) by virtue of the Agreement and that CSSEL held 153,076,741 Shares (16.23%), (1,488,011 of which were in the course of settlement) and was interested in a further 185,240,733 Shares (19.64%) by virtue of the Agreement. The notification stated further that CSSEL's interests in 28,130 Shares were interests of the type as is mentioned in section 208(5) of the Companies Act 1985, as amended ("Section 208(5)") by virtue of the right to redelivery of equivalent securities under stock lending arrangements. According to the notification, CSG's interests in an additional 12,622,132 Shares were interests of the type as is mentioned in Section 208(5) by virtue of the right to redelivery of equivalent securities under stock lending arrangements.

A notification received from Glencore on 6 November 2006 stated that Glencore is a party to the Agreement with CSFB Equities and CSSEL and that Glencore, CSFB Equities and CSSEL in aggregate were jointly interested in a total of 338,317,474 Shares (35.87%). The notification stated that Glencore holds 185,240,733 Shares (19.64%) and is interested in a further 153,076,741 Shares (16.23%) by virtue of the Agreement. The notification stated further that, so far as was known to Glencore at the date of its notification, Glencore's interests in 28,130 Shares were interests as are mentioned in Section 208(5).



As of 7 November, 943,150,383 Shares were in issue.

NEWS RELEASE

XSTRATA PLC ANNOUNCES PRICING OF DEBUT NOTES OFFERING

Zug, 8 November 2006

Xstrata plc ("Xstrata") has completed the pricing of its US$2.25 billion debut global bond offering launched on 6 November 2006.

Xstrata's subsidiary Xstrata Finance (Dubai) Limited will issue US$500,000,000 of floating rate notes due 2009 which will bear interest at a floating rate equal to three-month LIBOR plus 0.35% per annum.

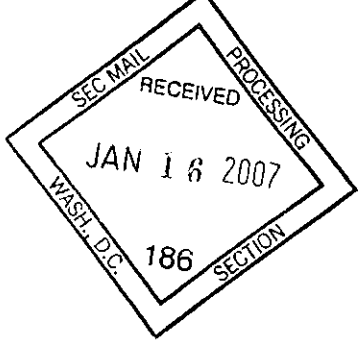
Xstrata's subsidiary Xstrata Finance (Canada) Limited will issue US$750,000,000 of 5.50% fixed rate notes due 2011 and US$1,000,000,000 of 5.80% fixed rate notes due 2016. Settlement is expected to occur on or about 15 November 2006.

Proceeds from these transactions will be used to repay a portion of the outstanding amount under the group's bridge loan facilities, which were drawn down for the purpose of financing the acquisition of Falconbridge Ltd.

The Xstrata Finance (Dubai) Limited issue will be guaranteed by Xstrata, Xstrata (Schweiz) AG and Xstrata Finance (Canada) Limited. The Xstrata Finance (Canada) Limited issues will be guaranteed by Xstrata, Xstrata (Schweiz) AG and Xstrata Finance (Dubai) Limited.

The securities offered have not been and will not be registered under the US Securities Act of 1933 (the "Securities Act") or any relevant securities laws of any state or other jurisdiction and may not be offered or sold in the United States absent registration or an exemption from the registration requirements of the Securities Act. Accordingly, the securities will be offered and sold only (1) inside the United States to Qualified Institutional Buyers (QIBs as defined in Rule 144A under the Securities Act) and (2) outside the US to persons other than US persons in reliance on Regulation S under the Securities Act.

Members of the general public are not eligible to take part in the offering. In the United Kingdom, the promotion of this offering is restricted by Section 21 of the Financial Services and Markets Act 2000 ("FSMA"). This announcement is directed exclusively at (a) persons who have professional experience in matters relating to investments who fall within Article 19(5) (Investment Professionals) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001 (as amended) ("the Order") or (b) are persons falling within Article 49(2)(a) to (d) (high net worth companies, unincorporated associations etc) of the Order or (c) other persons to whom it may be directed



without contravention of Section 21 of FSMA (all such persons together being referred to as "relevant persons"). This announcement must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this communication relations is available only to relevant persons and will be engaged in only with relevant persons.

This press release does not constitute an offer to sell or the solicitation of an offer to buy debt securities in the US or any other jurisdiction.

NEWS RELEASE

XSTRATA ZINC AND UNIVERSITY OF BALLARAT ANNOUNCE $2.1 MILLION ALLIANCE TO SUPPORT MINERALS INDUSTRY EDUCATION

Mount Isa, Wednesday 22 November 2006

The University of Ballarat and Xstrata Zinc have signed a Memorandum of Understanding and announced funding to establish the Xstrata Zinc Institute of Minerals Industry Education at the University's Mount Helen campus in Victoria.

The $2.1 million agreement, signed yesterday in Mount Isa by University of Ballarat Deputy Vice-Chancellor (Academic and Research) Professor Wayne Robinson and Chief Executive Xstrata Zinc and Executive Director Xstrata plc Santiago Zaldumbide, covers funding for five years from 2007 to assist the University with its range of minerals industry education programs, including allowing the University to re-establish a metallurgy degree at the campus.

The alliance aims to strengthen the link between industry and students studying earth sciences, enabling a total minerals industry education package to be offered. For example, currently the University's metallurgy program is run for the first two years at the Mount Helen campus, with the final year at Western Australia's Curtin University of Kalgoorlie. The alliance with Xstrata Zinc will once again allow Ballarat University to offer students a Bachelor's degree in metallurgy on campus with lecturers and other staff funded through Xstrata's support.

Professor Wayne Robinson said a number of the University's geology graduates had gone on to successful careers at Xstrata, so there was a firm bond and relationship between the two organisations.

"We now look forward to resuming our metallurgy degree and re-affirming the University's international reputation for geology and mining research and excellence," Professor Robinson said.

"I am also extremely confident the Xstrata Zinc Institute of Minerals Industry Education, which will be centred at the University, will quickly gain a prestigious and respected reputation as one of the nation's leading institutes in its field."

Chief Executive Xstrata Zinc and Executive Director Xstrata plc, Santiago Zaldumbide, said the agreement would help address the skills shortage facing the Australian resources industry.

"Xstrata Zinc's agreement with the University of Ballarat will help address this situation by increasing the number of graduates from the University's School of Science and Engineering through our investment in specialised minerals industry education.

"This partnership will allow the Xstrata Zinc Scholarship Program to be offered to 1st, 2nd and 3rd year undergraduates in the fields of metallurgy, mining, geology, civil engineering and

mechanical engineering, it will fund two metallurgy lecturer positions, fund the development of a post graduate minerals education in Honours, Masters and PhD programs, and will offer a metallurgical plant operator trainee program.

"Xstrata has a similar partnership with The University of Queensland where we have committed $1.5 million over 10 years to fund the Xstrata Chair of Metallurgical Engineering, which was established in October 2005. Since this time, student numbers in program classes have more than doubled.

"Xstrata's agreements with these two universities are an example of our partnership approach with schools, universities, training bodies and government to help address the skills shortage facing the resources industry in Australia, while at the same time is providing exciting career pathways for young people."

Professor Wayne Robinson said a range of training courses and student field visits will be run at Mount Isa. Student scholarships also will be offered and support provided for promotional and recruitment activities in Western Victorian schools.

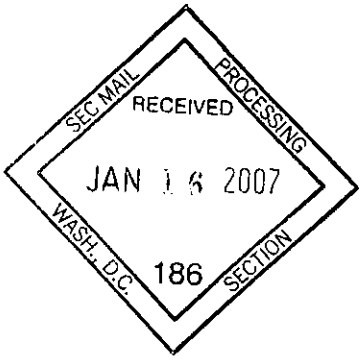
ends

Notes to editors:

About Xstrata:
Xstrata is a major global diversified mining group, listed on the London and Swiss stock exchanges. Headquartered in Zug, Switzerland, Xstrata maintains a meaningful position in seven major international commodity markets: copper, coking coal, thermal coal, ferrochrome, nickel, vanadium and zinc, with a smaller but profitable aluminium business, recycling facilities, additional exposures to gold, lead and silver and a suite of global technologies, many of which are industry leaders. The Group's operations and projects span 18 countries: Argentina, Australia, Brazil, Canada, Chile, Colombia, the Dominican Republic, Germany, Jamaica, New Caledonia, Norway, Papua New Guinea, Peru, South Africa, Spain, Tanzania, the USA and the UK.

About Xstrata Zinc:
Xstrata Zinc is one of the world's largest producers of zinc. Around half of all zinc currently consumed is used for galvanizing steel, which is an environmentally friendly method of protecting steel against corrosion. Zinc also finds application in the manufacture of die-cast alloys, brass and the production of zinc oxides and chemicals.

Xstrata's zinc and lead operations are located in Australia, Canada, Germany, Spain and the UK. They comprise: the San Juan de Nieva zinc smelter and the Arnao zinc semis plant in Asturias, Spain; the Hinojedo roasting plant in Cantabria, Spain; the Nordenham zinc smelter in northern Germany; the Mount Isa, George Fisher-Hilton and Black Star zinc-lead mines and lead smelter in Queensland, Australia; McArthur River zinc-lead mine in the Northern Territory, Australia; the Northfleet lead refinery located in the UK; the Brunswick zinc-lead mine and lead smelter in New Brunswick, Canada, 25% of the CEZ zinc smelter near Montreal, Canada; 50% of Lennard Shelf zinc lead mine in Western Australia; 75% of Lady Loretta zinc lead deposit in Queensland, Australia; 33.75% of Antamina mine in Peru and the Perseverance zinc deposit in Quebec.



About the University of Ballarat
The University of Ballarat (UB) is one of Australia's newest and most progressive universities, with a history of providing tertiary education and training reaching back more than 135 years.

It is pre-eminently a regional institution, with three major campuses in Ballarat and one in each of Horsham, Stawell and Ararat. It also has a national and international focus and is actively building extensive partnerships and strategic alliances beyond its immediate region.

As a regional, multi-sector University with approximately 25,000 students, UB aspires to achieve national and international standing for the high quality and relevance of its teaching, research, and engagement with industry, commerce, the professions and the regional communities it serves.

NEWS RELEASE

XSTRATA NICKEL AND SMSP PROVIDE UPDATE ON THE PROGRESS OF THE NORTHERN PLANT CONSTRUCTION

Noumea, New Caledonia, November 24, 2006

Xstrata Nickel and its partner SMSP announced the successful completion of the first stage of renewal for their Koniambo Project in New Caledonia's North Province. In September of this year, Xstrata Nickel had announced that due to resource and cost pressures in the global construction market, the Koniambo Project would enter a renewal phase with an emphasis on cost containment and execution planning.

Following a meeting held in Noumea today, the companies confirmed that key elements of the Project's regulatory and fiscal framework are being finalized. Meetings with representatives of the French Government have been set up for early December and will confirm the level of support from the French State for this project and project schedule. Renewal activities underway in New Caledonia and Canada are progressing according to plan.

"We continue to make headway in addressing the sound framework that is required for project implementation," said Ian Pearce, Xstrata Nickel Chief Executive Officer. "I am impressed by the commitment that all parties have shown to our renewal objectives. That collective commitment has been in the past and it will be a critical factor in the successful development of Koniambo."

The project continues to advance at a good pace. Work on intersection with the main North-South highway (RT1) as well as work on the support infrastructure (Pionneer camp and offices) are planned to start in early 2007. Ongoing development activities in the Voh-Koné-Pouembout region include environmental, archaeological and geotechnical studies.

"For a project of this magnitude it is imperative that the support infrastructure be in place well in advance of the major works. Our plans call for a disciplined ramp-up of construction activity beginning with the RT1 intersection which must be upgraded to provide a safe means of access to our construction site. This will also provide an immediate opportunity to expand the engagement of local contractors and our local workforce," said Pearce.

Koniambo Nickel SAS continues its efforts, in conjunction with the public institutions and authorities of New Caledonia, to ensure high level of preparedness. Ongoing activities include the development of local capability through the acceleration of local enterprise creation, consultation and engagement with communities, as well as the implementation of training programs.

Xstrata Nickel remains committed to developing Koniambo, one of its anchor growth projects. More than US$400 million has been committed to the Koniambo Project to date and an additional US$100 million of investment is planned during the current ongoing strategic renewal phase.

Backgrounder

Koniambo is a pyrometallurgical complex for the production of ferronickel, highly anticipated by stainless steel producers. Production is targeted to begin in 2009/2010 and is expected to reach 60,000 tonnes of nickel per year, which represents approximately 5% of current world consumption.

In December 2005, SMSP, a New Caledonian mining company partnering with Falconbridge Ltd. (now Xstrata), announced the construction of the Project based on the positive findings of the Bankable Feasibility Study and the Environmental and Social Impact Assessment.

On August 15, 2006, Xstrata plc became the new owner of Falconbridge. Xstrata is recognized for its strategy and its commitment to growing the Group's core commodity businesses, including nickel.

On August 21, Xstrata assumed full control of the newly acquired company. The same day, Ian Pearce, former Chief Operating Officer of Falconbridge, was appointed Chief Executive Xstrata Nickel, responsible for Xstrata's nickel operations and projects worldwide. Xstrata Nickel's headquarters are in Toronto, Canada, and the majority of its management are former Falconbridge employees. Mr. Pearce brings with him an extensive knowledge of the Koniambo Project, having been one of its key players as Senior Vice-President, Projects and Engineering, from 2003 to June 2006.

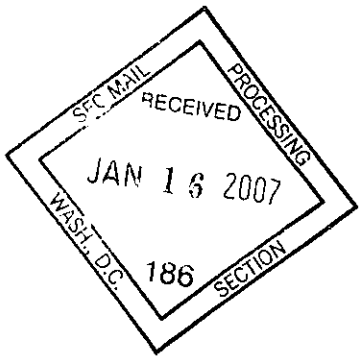
Today, the Koniambo Project continues to advance the Detailed Engineering, the Execution Plan and the Procurement Program with a 2006 budget of US$240 million (over 22 billion CFP francs), in addition to the US$71 million (over 7 billion CFP francs) invested in 2005.

The Koniambo Project team is currently concentrating its efforts to address the challenges typical of such projects in the areas of controlling costs, execution planning and sustainable development. As is the case with other major industrial projects, Koniambo is faced with very significant growth in

the costs associated with raw materials, transportation and the shortage of specialized resources for all projects because of the extension of the Goro Nickel construction schedule.

Xstrata is a major global diversified mining group, listed on the London and Swiss stock exchanges. Headquartered in Zug, Switzerland, Xstrata maintains a meaningful position in seven major international commodity markets: copper, coking coal, thermal coal, ferrochrome, nickel, vanadium and zinc, with a smaller but profitable aluminium business, recycling facilities, additional exposures to gold, lead and silver and a suite of global technologies, many of which are industry leaders. The Group's operations and projects span 18 countries: Argentina, Australia, Brazil, Canada, Chile, Colombia, the Dominican Republic, Germany, Jamaica, New Caledonia, Norway, Papua New Guinea, Peru, South Africa, Spain, Tanzania, the USA and the UK.

Xstrata Nickel is headquartered in Toronto, Canada, and is one of the commodity business units within the major global diversified mining group Xstrata plc.



Xstrata Nickel's mining operations include five mines and processing facilities in Ontario, Canada; Quebec, Canada; a ferronickel mine and processing facility in Bonao, Dominican Republic; and a refinery in Kristiansand, Norway. Xstrata Nickel has a promising portfolio of growth projects, including Nickel Rim South in Canada, Kabanga in Tanzania, and Koniambo in New Caledonia.

Xstrata Nickel is the fourth largest global nickel producer, with annual managed production of more than 110,000 tonnes of refined nickel.

ANALYST VISIT TO XSTRATA'S NORTH AND SOUTH AMERICAN OPERATIONS

Zug, 28 November 2006

Xstrata is currently hosting a visit by research analysts to the operations of Xstrata Copper, Xstrata Coal and Xstrata Nickel in North and South America. All presentations will be available for viewing or downloading from the Xstrata website from the day on which they are being made.

The programme for the visit is as follows:

Monday 27 November Xstrata Copper: Tintaya

Tuesday 28 November Xstrata Copper: Collahuasi

Wednesday 29 November Xstrata Coal: Cerrejon

Thursday 30 November Xstrata Nickel: Sudbury

coal

South Africa - 1 December 2006

TOTAL COAL and XSTRATA COAL SETTLE LONG-TERM ARRANGEMENTS FOR ATC AND ATCOM OPERATIONS

Total Coal South Africa (TCSA) and Xstrata Coal (XC) today confirmed the settlement of the long-term arrangements of TCSA's 50% interest in Arthur Taylor Colliery (ATC) and Arthur Taylor Colliery Open-cast Mine (ATCOM) operations.

The settlement follows the termination of a joint venture between XC and TCSA in 2004 and will enable XC to consolidate its long-term position in the South African coal industry, while providing greater certainty for TCSA's supply of coal to its customers.

Located in South Africa's Witbank region, the ATC and ATCOM operations produce a nominal 3.6 Million tonnes of export thermal coal per year.

"The purchase of Total Coal's half share of ATC and ATCOM mines will provide significant benefits for the Xstrata Coal South African operations and enable us to mine a single large complex in the Witbank coalfields. We will also benefit from synergies across various Xstrata Coal sites," said Peter Coates, Chief Executive, Xstrata Coal.

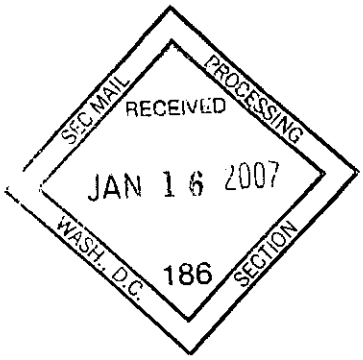
"We are pleased to have resolved the previously outstanding issues and to be able to provide greater certainty for customers of ATC and ATCOM product.

"Today's agreement is a positive step forward for all stakeholders and in the best interests of securing the continued production of quality coal reserves from the Witbank region."

Under the terms of the settlement agreement, XC will continue to supply TCSA with coal at a rate of 1.8 million metric tonnes per annum for 3 years with effect from 1st January 2007 on terms similar to the former joint venture.

Operations will continue as usual and customers who take the coal under current arrangements will not experience any changes during the handover period.

"TCSA hereby divests itself from an investment where it had no operational control. The settlement allows for fair and adequate compensation for our half share of the ATC JV," said Philippe Sauquet, Vice President Strategy, Total.



"TCSA remains positively committed to South Africa and its coal operations and will focus on growing and expanding its producing base through new developments like Forzando South mine."

COMMUNIQUÉ

XSTRATA NICKEL ENTREPRENDRA LA PREMIÈRE ÉTAPE DE DÉVELOPPEMENT DU PROJET FRASER MORGAN À SUDBURY

Toronto, le 1 décembre 2006

Xstrata Nickel annonce la première étape de développement du projet de nickel Fraser Morgan, situé à Sudbury, en Ontario.

La Société investira 18 millions de dollars CA d'ici mars 2007 en vue de réaliser une étude de pré-faisabilité, des travaux de forages de délimitation, l'achat de matériel et l'amélioration de l'infrastructure au niveau de 3 900 pieds de profondeur du puits Fraser, ce qui permettra le développement du projet et la manutention éventuelle du minerai.

Les prochaines étapes de développement devront être approuvées au cours des deuxième et troisième trimestres de 2007. La mine pourrait être mise en production au début de 2009.

Une fois en production, la mine Fraser Morgan contribuera quelque 7 200 tonnes de nickel affiné par année pendant une durée de vie de sept ans.

« Les exploitations de Sudbury demeurent un élément clé de la stratégie de croissance de Xstrata Nickel et la première étape de développement du projet Fraser Morgan témoigne de notre engagement continu envers cette région riche en ressources, » a déclaré Ian Pearce, chef de la direction de Xstrata Nickel.

« Fraser Morgan est un projet prometteur qui repose sur notre portefeuille d'actifs dans le Bassin de Sudbury, » a ajouté Mike Romaniuk, vice-président des exploitations de Sudbury.

Les travaux sur le terrain de la première étape seront réalisés principalement par les employés actuels de Xstrata Nickel. Il est prévu qu'au début de 2007, jusqu'à 30 employés effectueront des travaux sur le terrain reliés au projet Fraser Morgan.

Le gisement de nickel-cuivre Fraser Morgan, découvert en 1995, comprend cinq zones minéralisées distinctes situées à deux kilomètres à l'est de la mine Fraser de Xstrata Nickel. Le gisement, auquel donnera accès le puits existant de la mine Fraser, renferme 4,9 millions de tonnes de réserves mesurées et indiquées titrant 1,8 % de nickel et 0.65 % de cuivre, et

2,4 millions de tonnes de ressources titrant 1,8 % de nickel et 0,5 % de cuivre.

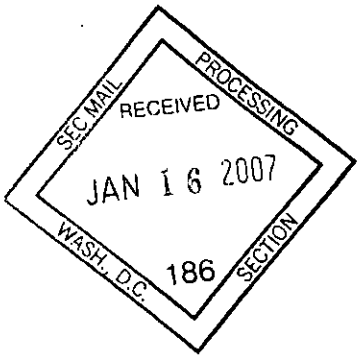
Historique

Xstrata est un important groupe minier diversifié d'envergure mondiale dont les actions sont inscrites à la Bourse de Londres et la Bourse de Zurich. Xstrata, qui a son siège social à Zug, en Suisse, occupe une position significative dans sept grands marchés de produits de base internationaux : le cuivre, le charbon cokéfiable, le charbon thermique, le ferrochrome, le nickel, le vanadium et le zinc. La Société détient une entreprise d'aluminium plus petite mais rentable et des installations de recyclage; elle est aussi présente dans les secteurs de l'or, du plomb et de l'argent, et possède une série de technologies mondiales dont bon nombre sont des chefs de file de l'industrie. Les exploitations et les projets du groupe sont répartis dans 18 pays : l'Argentine, l'Australie, le Brésil, le Canada, le Chili, la Colombie, la République dominicaine, l'Allemagne, la Jamaïque, la Nouvelle-Calédonie, la Norvège, la Papouasie- Nouvelle-Guinée, le Pérou, l'Afrique du Sud, l'Espagne, la Tanzanie, les États-Unis et le Royaume-Uni.



Xstrata Nickel a son siège social à Toronto, au Canada, et est l'une des unités commerciales de produits de base de l'important groupe minier diversifié Xstrata plc d'envergure mondiale.

Les exploitations minières de Xstrata Nickel comprennent cinq mines et installations de traitement en Ontario et au Québec, au Canada; une mine de ferronickel et des installations de traitement à Bonao, en République dominicaine; de même qu'une affinerie à Kristiansand, en Norvège. Xstrata Nickel détient un portefeuille prometteur de projets de croissance, y compris Nickel Rim South au Canada, Kabanga en Tanzanie, et Koniambo en Nouvelle-Calédonie.

Xstrata Nickel est le quatrième producteur de nickel en importance au monde, avec une production gérée annuelle de plus de 110 000 tonnes de nickel affiné.

NEWS RELEASE

XSTRATA NICKEL TO BEGIN FIRST PHASE DEVELOPMENT OF FRASER MORGAN PROJECT IN SUDBURY

Toronto, 1 December 2006

Xstrata Nickel announces the first phase of development of the Fraser Morgan nickel project located in Sudbury, Ontario.

Cdn$18 million will be invested by March 2007 to complete a pre-feasibility study, definition drilling, equipment procurement and infrastructure improvements at the 3900-foot level of the existing Fraser shaft to allow for project development and for potential future ore handling.

Subsequent development phases will be subject to approval in the second and third quarters of 2007. Mine production could begin in early 2009.

When brought into production, Fraser Morgan annual production will contribute an estimated 7,200 tonnes refined nickel per year over a seven-year mine life.

"The Sudbury operations remain a key component of Xstrata Nickel's growth strategy, and the first phase of development of the Fraser Morgan project demonstrates our ongoing commitment to this resource-rich area," said Ian Pearce, Chief Executive Officer of Xstrata Nickel.

"Fraser Morgan is a promising project that builds on our portfolio of assets in the Sudbury Basin," said Mike Romaniuk, Vice-President of Sudbury Operations.

Field work in Phase One will be undertaken primarily using existing Xstrata Nickel employees. It is anticipated that by early 2007, up to 30 employees will be working on field work related to the Fraser-Morgan project.

The Fraser Morgan nickel-copper orebody was discovered in 1995 and consists of five separate mineralized zones located two kilometres east of Xstrata Nickel's Fraser Mine. The orebody, which will be accessed by the existing Fraser Mine shaft, contains 4.9 million tonnes of measured and indicated reserves grading 1.8% nickel and 0.65% copper, and 2.4 million tonnes inferred resources grading 1.8% nickel and 0.5% copper.

COMPANY ANNOUNCEMENT

DISCLOSABLE INTERESTS: GLENCORE INTERNATIONAL AND CSFB JOINT INTEREST

Zug, 1 December 2006

Xstrata plc ("Xstrata") announces that it was notified on 30 November 2006 by Credit Suisse Group ("CSG") of a change in the interests of CSG, Credit Suisse First Boston Equities Limited ("CSFB Equities") and Credit Suisse Securities (Europe) Limited ("CSSEL") in Xstrata's ordinary shares (the "Shares"). The notification stated that CSFB Equities and CSSEL are party to agreements (together the "Agreement") with Glencore International AG ("Glencore") relating to the acquisition of interests in the Shares. The notification also stated that CSG had an interest in 358,609,573 Shares (38.02%) of which CSFB Equities, CSSEL and Glencore in aggregate were jointly interested in 344,817,043 Shares (36.56%). The notification stated that CSFB Equities held 0 Shares and was interested in 344,817,043 Shares (36.56%) by virtue of the Agreement and that CSSEL held 159,576,310 Shares (16.91%) (7,974,514) of which were in the course of settlement) and was interested in 185,240,733 Shares (19.64%) by virtue of the Agreement. The notification stated further that CSSEL's interests in 41,196 Shares were interests of the type as is mentioned in section 208(5) of the Companies Act 1985, as amended ("Section 208(5)") by virtue of the right to redelivery of equivalent securities under stock lending arrangements. According to the notification, CSG's interests in an additional 13,004,786 Shares were interests of the type as is mentioned in Section 208(5) by virtue of the right to redelivery of equivalent securities under stock lending arrangements.

A notification received from Glencore on 30 November 2006 stated that Glencore is a party to the Agreement with CSFB Equities and CSSEL and that Glencore, CSFB Equities and CSSEL in aggregate were jointly interested in a total of 344,817,043 Shares (36.56%). The notification stated that Glencore was interested in 344,817,043 Shares (36.56%) by virtue of the Agreement. The notification stated further that, so far as was known to Glencore at the date of its notification, Glencore's interests in 41,196 Shares were interests as are mentioned in Section 208(5).

As of 30 November, 943,150,383 Shares were in issue.

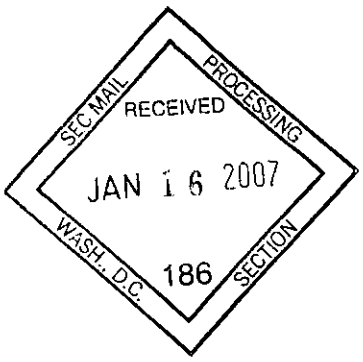
REGULATORY ANNOUNCEMENT

APPLICATION FOR LISTING

Zug, Monday, 4 December 2006

Application has been made to the Financial Services Authority in its capacity as UK Listing Authority and to the London Stock Exchange for a block listing of an additional two million six hundred and fifty two thousand and six hundred (2,652,600) ordinary shares of US$0.50 each in Xstrata plc ("the Shares") to be issued upon conversion of Xstrata Capital Corporation A.V.V. US$600,000,000 3.95 per cent Guaranteed Convertible Bonds due 2010 (the "Bonds"), to trade on the London Stock Exchange and to be admitted to the Official List upon issuance. The Shares will rank pari passu with the existing issued shares of the Company.



The application in respect of the additional Shares is the consequence of an adjustment made to the Exchange Price (as defined in the Terms and Conditions of the Bonds) of the Bonds on 5th October 2006 following Xstrata plc's Rights Issue dated 3rd October 2006. At the present date and following the adjustment, twenty four million five hundred and sixteen thousand, five hundred and fifty (24,516,550) Shares have yet to be issued and allotted upon conversion of the Bonds.

Xstrata plc ordinary shares are also listed on the Swiss Stock Exchange.

NEWS RELEASE

GLENCORE INTERNATIONAL HOLDING IN XSTRATA

Zug, 6 December 2006 - Xstrata plc ("Xstrata") announces that it has been advised by Glencore International AG ("Glencore") that the agreement between Glencore and the Credit Suisse Group (the "Capital Management Arrangement") has been extended. Glencore entered into the Capital Management Arrangement with the Credit Suisse Group in connection with the Xstrata Group's acquisition of MIM Holdings Limited and associated rights issue in 2003. The agreement was due to expire on 2 December 2006, unless extended.

Glencore, through its wholly-owned subsidiary Finges BV ("Finges"), currently owns 185,240,733 Xstrata ordinary shares (representing approximately 19.6% of Xstrata's total issued share capital) and has a full economic interest in a further 151,560,600 shares (representing approximately 16.1% of Xstrata's total issued share capital) through the Capital Management Arrangement.

Separately, Glencore has advised Xstrata that Finges has entered into swap transactions (the "Swap Package") with each of Barclays Capital, HSBC and Société Générale (the "Banks") in respect of an aggregate of 28,594,557 Xstrata ordinary shares (the "Glencore Relevant Shares") or 3.0% of Xstrata's current issued ordinary share capital. The Swap Package is structured as a combination of cash settled derivative transactions. Glencore (through its wholly-owned subsidiary, Finges) retains the voting rights and legal and beneficial title to the Glencore Relevant Shares.

In support of the Swap Package arrangement, Finges has granted a security interest to the Banks over 42,891,836 Xstrata ordinary shares owned by it. The number of Xstrata ordinary shares subject to the security interest will fluctuate over time. Subject to compliance with its obligations under the Swap Package, Finges will retain title to and voting rights over the Xstrata ordinary shares which are the subject of the security interest. The obligations of Finges under the Swap Package are guaranteed by Glencore.

In connection with the 1 for 3 rights issue of up to 235,787,596 new Xstrata ordinary shares announced by Xstrata on 3 October 2006 (the "2006 Rights Issue"), Glencore entered into a lock-up agreement (the "Lock-up Agreement") with Xstrata under which, amongst other things, Glencore undertook not to, subject to certain exceptions, dispose of any Xstrata ordinary shares held by it during the period commencing on 3 October 2006 and ending six months after the latest time and date for acceptance and payment in full under the 2006 Rights Issue (which occurred on 27 October 2006). Glencore has transferred to Finges 185,240,733 Xstrata ordinary shares, which is permitted under the Lock-up Agreement subject to Finges entering into a similar lock-up undertaking to the one given by Glencore. Accordingly, Finges has entered into a lock-up agreement with Xstrata in respect of any Xstrata ordinary shares it may hold in the period commencing on 4 December 2006 and ending on 27 April 2007 (the "Finges Agreement").

In addition, the granting of the security interest by Finges in connection with the Swap Package described above is permitted under the Finges Agreement subject to the Banks entering into similar lock-up undertakings to the one given by Finges. Accordingly, each of the Banks has entered into lock-up agreements with Xstrata in respect of any interest it may acquire in Xstrata ordinary shares under the Swap Package (subject to certain limited exceptions) for the period commencing on 4 December 2006 and ending on 27 April 2007.

Xstrata has also been advised by Glencore that the Executive of the UK Takeover Panel has confirmed that the entry into and performance by Glencore and Finges of their obligations under the new financing arrangements described above will not give rise to any breach by Glencore or Finges of Rule 5.1 of the Takeover Code nor will Glencore or Finges thereby incur any obligation under Rule 9.1 of the Takeover Code to make a mandatory cash offer for the ordinary shares in Xstrata.

MEDIA RELEASE

7 December 2006

XSTRATA COAL COMMITS $25 MILLION TO FUTUREGEN CLEAN COAL PROJECT

Xstrata Coal today announced it has become a member of the FutureGen Alliance, committing US$25 million to support the building of a first-of-a-kind integrated near-zero emission coal-fuelled power plant in the United States.

The FutureGen Alliance is a non-profit consortium of global electric utilities and coal companies working with the US Department of Energy to design, construct and operate a technically cutting-edge demonstration coal-fuelled power plant. The US$1 billion project will use advances in IGCC, carbon capture and sequestration and hydrogen production technologies to eliminate environmental concerns associated with coal utilisation.

"As the world's largest exporter of thermal coal, Xstrata Coal is demonstrating its commitment to the international collaborative effort to significantly reduce greenhouse gas emissions resulting from the use of coal in power generation," said Peter Coates, Chief Executive, Xstrata Coal.

"FutureGen is the most advanced coal-fuelled electricity generation technology development project in the world and we are pleased to be involved with other forward-thinking global companies in the development and deployment of this technology solution to climate change concerns.

"Global energy demand will increase by 60% over the next 25 years and investment from industry and government to develop and demonstrate new technologies such as those to be employed at FutureGen to achieve near-zero emission coal-fuelled power plants is essential," he said.

The 275MW prototype FutureGen plant will establish the technical and economic feasibility of producing electricity and hydrogen from coal, while capturing and sequestering one million tonnes of carbon dioxide generated in the process each year.

Mike Mudd, Chief Executive of the FutureGen Alliance, said today, "The involvement of the world's leading coal producing companies such as Xstrata Coal is essential to the success of FutureGen. Adding Xstrata Coal as a member of the Alliance further demonstrates the commitment of the energy industry on a global basis to develop innovative ways to combat climate change concerns."

Xstrata plc guarantees Falconbridge Notes and Preferred Shares

Toronto, December 11, 2006

Falconbridge Limited ("Falconbridge") today announces that its parent company, Xstrata plc ("Xstrata"), has fully and unconditionally guaranteed Falconbridge's Notes (defined below) and its cumulative redeemable preferred shares, Series 2, Series 3 and Series H (the "Preferred Shares"). Falconbridge will not file interim financial statements for the nine months ended September 30, 2006, as it has obtained an order from Canadian securities regulators permitting Falconbridge to satisfy its continuous disclosure obligations as a reporting issuer by filing Xstrata's UK disclosure documents in place of disclosure documents relating solely to Falconbridge.

Description of Xstrata Guarantee of the Falconbridge Notes
The following senior debt of Falconbridge has been guaranteed by Xstrata (collectively, the "Notes"): (i) US $250 million principal amount of 6.2% notes due June 15, 2035; (ii) US$250 million principal amount of 5.5% notes due June 15, 2017; (iii) US$350 million principal amount of 6% notes due October 15, 2015; (iv) US$250 million principal amount of 5.375% notes due June 1, 2015; (v) US$250 million principal amount of 7.35% notes due June 5, 2012; (vi) US$300 million principal amount of 7.25% notes due July 15, 2012; (vii) US$300 million principal amount of 8.375% notes due February 15, 2011; and (viii) C$175 million principal amount of 8.5% debentures due December 8, 2008.

The guarantee of Falconbridge's Notes was implemented by amending the trust indentures pursuant to which the Notes were issued (the "Notes Indentures"). Pursuant to the terms of the Note Indentures, as amended by supplemental indentures to implement the guarantees, Xstrata has fully and unconditionally guaranteed the payment, within 15 days of when due, of the principal and interest owing by Falconbridge to the holders of the Notes. Computershare Trust Company of Canada (the "Note Trustee") is the trustee for the holders of the Notes under the terms of the Note Indentures.
Description of Xstrata Guarantee of the Falconbridge Preferred Shares

The guarantee of the Preferred Shares is governed by the terms of a guarantee indenture (the "Guarantee Indenture") entered into by Xstrata, Falconbridge and Computershare Trust Company of Canada, as guarantee trustee. Pursuant to the terms of the Guarantee Indenture, Xstrata has fully and unconditionally guaranteed in favour of the holders of the Preferred Shares the payment, within 15 days of when due, of all financial liabilities and obligations of Falconbridge to such holders under the terms of the Preferred Shares, whether in respect of:

- any accrued and unpaid dividends on the Preferred Shares, regardless of the ability of Falconbridge to satisfy any financial or legal condition to the declaration or payment of dividends;
- the redemption price and all accrued and unpaid dividends to the date of redemption with respect to the Preferred Shares called for redemption; or

- the liquidation amount payable on the Preferred Shares upon a voluntary or involuntary dissolution, liquidation or winding up of Falconbridge, without regard to the amount of assets of Falconbridge available for distribution.

Xstrata's obligation to make a guarantee payment may be satisfied by direct payment of the required amounts by Xstrata to the holders of Preferred Shares entitled to those payments or by causing Falconbridge to pay those amounts to the holders.

Structural Subordination
Xstrata's guarantees of the Notes and the Preferred Shares constitute unsecured obligations of Xstrata.

The terms of the guarantees do not limit the ability of Xstrata to incur additional indebtedness, nor do they limit the ability of Xstrata's subsidiaries or joint ventures to incur additional secured or unsecured indebtedness. Xstrata's obligations under the guarantees will be effectively subordinate to all indebtedness and other liabilities of Xstrata's subsidiaries and joint ventures, except to the extent Xstrata is a creditor of such subsidiaries or joint ventures ranking at least pari passu with such other creditors.

Credit Rating
The Notes and the Preferred Shares, as guaranteed by Xstrata, have been rated by the following rating agencies (collectively, the "Rating Agencies") as follows:

	Notes	Preferred Shares
Rating Agency	Rating	Rating
Moody's Investors Service	Baa2	not rated
Standard & Poor's	BBB+	BBB-
Dominion Bond Rating Service Limited	BBB(high)	Pfd-3(high)

Holders of the Notes and the Preferred Shares should consult the Rating Agencies with respect to the interpretation of the foregoing ratings and their implications.
The credit ratings accorded to the Notes and the Preferred Shares by the Rating Agencies are not recommendations to purchase, hold or sell the Notes or the Preferred Shares inasmuch as such ratings do not comment as to market price or suitability for a particular investor. There is no assurance that the ratings will remain in effect for any period of time or that the ratings will not be revised or withdrawn entirely by one or more of the Rating Agencies at any time in the future if, in the judgment of one or more of the Rating Agencies, circumstances so warrant.

Tax Consequences of Guarantee of Preferred Shares
The guarantee of the Preferred Shares constitutes a "guarantee agreement" for purposes of subsection 112(2.2) of the Income Tax Act (Canada) (the "Tax Act"). Accordingly, a dividend received on a Preferred Share of a particular series by a holder of Preferred Shares that is a corporation resident in Canada for purposes of the Tax Act generally will not be deductible in computing the taxable income of the corporation unless the Preferred Share is of a class or series of shares of the capital stock of Falconbridge that is listed on a prescribed stock exchange (which includes the Toronto Stock Exchange) and the corporation, and persons with which the corporation does not deal at arm's length, or any partnership or, in certain circumstances, trust of which the corporation or any such person is a member or beneficiary, do not, at the time the dividend is received, receive dividends in respect of more than 10 per cent of the issued and outstanding shares to which the guarantee agreement applies. Holders of Falconbridge Preferred Shares to which these provisions may be relevant are urged to consult their own tax advisors.

Guarantee of Payment
Each guarantee constitutes a guarantee of payment and not of collection. This means that legal proceedings

may be brought directly against Xstrata to enforce its obligations under each guarantee without first instituting a legal proceeding against Falconbridge. The guarantees of the Notes will not be discharged except by payment in full of Falconbridge's obligations to the holders of the Notes. The guarantee of the Preferred Shares will not be discharged except by payment of the related guaranteed payments in full to the extent not paid by Falconbridge or upon the cancellation of the Preferred Shares.

Amendments and Assignment
The guarantees of the Notes may not be amended without the prior approval of the holders of the Notes in accordance with the terms of the Note Indentures, provided that no approval of the holders of the Notes is required for certain changes that do not adversely affect the rights of holders of the Notes.
The guarantee of the Preferred Shares may not be amended without the prior approval of the holders representing not less than a majority of the aggregate liquidation amount of the outstanding Preferred Shares, or, in the event that a meeting is held to obtain the consent of the holders of the Preferred Shares, representing not less than a majority of the aggregate liquidation amount of the outstanding Preferred Shares held by holders of the Preferred Shares present at the meeting, provided that no approval of the holders of the Preferred Shares is required for certain changes that do not adversely affect the rights of holders of the Preferred Shares. For purposes of the guarantee, a meeting of the holders of the Preferred Shares requires a quorum consisting of holders of the Preferred Shares holding at least 25% of the aggregate liquidation amount of the outstanding Preferred Shares.

The guarantees of the Notes and the Preferred Shares will be binding on the successors and assigns of Xstrata and will enure to the benefit of the holders of the Notes and Preferred Shares then outstanding.

Termination
The guarantee of the Notes will terminate upon the repayment in full and discharge of all Notes. The guarantee of the Preferred Shares will terminate and be of no further force and effect upon full payment of the applicable redemption price of all Preferred Shares, including any accrued and unpaid dividends at the time of redemption.

Governing Law
The guarantees of the Notes (other than the C$175 million 8.5% debentures due 2008) are governed by and construed in accordance with the laws of the State of New York except with respect to the rights, powers, duties and responsibilities of the Note Trustee under the Note Indentures, which are governed by the laws of the Province of Ontario.

The guarantees of the C$175 million 8.5% debentures due 2008 and the Preferred Shares are governed by and construed in accordance with the laws of the Province of Ontario.

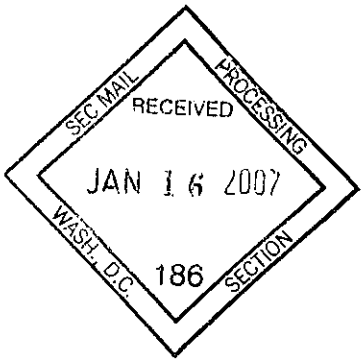
Consent to Jurisdiction and Service
Xstrata has appointed CT Corporation System, 111 Eighth Avenue, New York, New York, as its agent for service of process in any suit, action or proceeding arising out of or relating to its guarantee of the Notes (other than the C$175 million 8.5% debentures due 2008) and for actions brought under United States federal or state securities laws brought in any federal or state court located in the City of New York and submits to such jurisdiction.

Xstrata has appointed Falconbridge as its agent for service of process in any suit, action or proceeding arising out of or relating to its guarantee of the Preferred Shares or the C$175 million 8.5% debentures due 2008 and for actions brought under provincial securities laws brought in any court located in the City of Toronto and submits to such jurisdiction.

Information Concerning the Trustee
Computershare Trust Company of Canada is the Note Trustee under the terms of the Note Indentures and is the guarantee trustee for the holders of the Preferred Shares. The terms of the Guarantee Indenture and the

terms of the Note Indentures provide that, except in certain circumstances, no action may be brought against Xstrata to enforce the guarantees except by the Trustee.

Changes to Falconbridge Continuous Disclosure Reporting
In connection with Xstrata's guarantees of the Notes and the Preferred Shares, the securities commissions of each Canadian province (other than Prince Edward Island) and territory have granted Falconbridge an exemption from certain requirements of the securities legislation that will permit Falconbridge to satisfy its continuous disclosure obligations as a reporting issuer by filing Xstrata's UK disclosure documents, including Xstrata's annual and interim financial statements, in place of disclosure documents relating solely to Falconbridge. As a result of this relief, in lieu of the quarterly interim financial statements that Falconbridge has historically filed, Falconbridge will file on SEDAR Xstrata's annual and half-yearly financial statements, prepared in accordance with International Financial Reporting Standards. As a result, Falconbridge will not be filing interim financial statements for the nine months ended September 30, 2006. The terms of the exemption require that Falconbridge file on SEDAR copies of all documents filed by Xstrata pursuant to the continuous disclosure requirements of the United Kingdom.



Falconbridge will file Xstrata's financial statements on SEDAR at the same time they are filed in the United Kingdom. The continuous disclosure requirements of the United Kingdom require that Xstrata file its financial statements as soon as possible after they have been approved, with annual financial statements filed no later than six months after its December 31 year end and half yearly financial statements filed no later than 90 days after the end of the six month period ending June 30. Xstrata generally publishes its annual financial statements in March and its half yearly financial statements in August.

The availability of the exemption is subject to Falconbridge and Xstrata satisfying a number of other conditions that are set forth in the decision of the securities commissions. A copy of the decision is available on the website of the Ontario Securities Commission at www.osc.gov.on.ca.

More Information
To obtain copies of the supplemental indentures to the Note Indentures or the Guarantee Indenture, Holders of Notes and Preferred Shares may contact Computershare Trust Company of Canada whose offices are located at 100 University Avenue, 9th Floor, North Tower, Toronto, Ontario, M5J 2Y1, telephone 416.505.4600. Copies of the supplemental indentures and the Guarantee Indenture have also been publicly filed by Falconbridge and are available at www.sedar.com.

Company announcement: Credit Suisse Holding in Xstrata

Zug, 12 December 2006

Xstrata plc ("Xstrata") announces that it has been advised by Credit Suisse Securities (Europe) Limited ("CSSEL") that on 6 December 2006 CSSEL transferred an aggregate of 151,560,600 Xstrata ordinary shares ("Relevant Shares") (representing approximately 16.07% of Xstrata's total issued share capital) to its wholly-owned subsidiary Hanmer B.V. in connection with a reorganisation of CSSEL's holding of the Relevant Shares (the "CSSEL Reorganisation").
In connection with the 1 for 3 rights issue of up to 235,787,596 new Xstrata ordinary shares announced by Xstrata on 3 October 2006, CSSEL entered into a lock-up agreement (the "CSSEL Agreement") with Xstrata under which CSSEL undertook not to, subject to certain exceptions, dispose of the Relevant Shares during the period commencing on 3 October 2006 and ending six months after the latest time and date for acceptance and payment in full under the rights issue (which occurred on 27 October 2006). The transfer by CSSEL to Hanmer B.V. of the Relevant Shares pursuant to the CSSEL Reorganisation is permitted under the CSSEL Agreement subject to Hanmer B.V. entering into a similar lock up undertaking to the one given by CSSEL. Accordingly, Hanmer B.V. has entered into a lock-up agreement with Xstrata in respect of the Relevant Shares for the period commencing on 6 December 2006 and ending on 27 April 2007.

Company announcement: Credit Suisse Securities (Europe) Limited disclosable interest in Xstrata

Zug, 12 December 2006

Xstrata plc ("Xstrata") announces that it was notified by Credit Suisse Group:

1) On 11th December 2006, that as of 8 December 2006, all of Credit Suisse Securities (Europe) Limited's ("CSSEL") rights and obligations under the agreement between it and Glencore International AG ("Glencore") (the "Capital Management Arrangement") were novated to Duchy Investments Sàrl ("Duchy"), another company within the Credit Suisse Group. The Capital Management Arrangement otherwise remains unchanged. Glencore entered into the Capital Management Arrangement with the Credit Suisse Group in connection with the Xstrata Group's acquisition of MIM Holdings Limited and associated rights issue in 2003. The Capital Management Agreement is an arrangement to which section 204 of the Companies Act 1985 ("the Act") applies in respect of Xstrata's ordinary shares (the "Shares").

2) On 8th December 2006 that as of close of business on 6 December 2006, Duchy was interested in 336,801,333 Shares (35.71%) in aggregate of which it was interested in 185,240,733 (19.64%) by virtue of the Capital Management Arrangement. Hanmer BV (a wholly-owned subsidiary of Duchy) is the holder of 151,560,600 Shares (16.07%). HSBC Plc is the registered holder of 185,240,733 Shares. It is understood these Shares, are held on behalf of Finges B.V., a wholly owned subsidiary of Glencore International AG.

3) Credit Suisse International was interested in 12,522,076 Shares in the normal course of business of which 11,626,626 Shares are interests of the type as is mentioned in Section 208(5) of the Act by virtue of the right to call for delivery of securities.

4) CSSEL was interested in 8,296,599 Shares in the normal course of business of which 41,396 Shares are interests of the type as is mentioned in section 208(5) of the Act by virtue of the right to redelivery of equivalent securities under stock lending arrangements.

5) Credit Suisse Life (Bermuda) Ltd was interested in 6,500 Shares in the normal course of business.

6) The Credit Suisse Group had an interest in 781,244 Shares held under discretionary fund management arrangements.

7) In total, the Credit Suisse Group has an interest in 358,407,752 Shares.

As of 11 December 2006, 943,150,383 Shares were in issue.

UniversitéLaurentienne
LaurentianUniversity

COMMUNIQUÉ

Pour diffusion immédiate **Le 14 décembre 2006**

Xstrata Nickel investit dans une série de conférences à l'Université Laurentienne : Mme Roberta Bondar prononcera une conférence le 22 mars 2007

Sudbury (Ontario) – Xstrata Nickel a annoncé aujourd'hui une contribution financière de 100 000 $ à l'Université Laurentienne dans le but de doter de fonds permanents les Conférences commémoratives Xstrata Nickel. De son côté, l'Université Laurentienne versera un montant égal à celui de la société minière grâce aux fonds qui sont actuellement placés dans le compte en fidéicommis des Conférences Falconbridge.

« Avec l'annonce d'aujourd'hui, Xstrata Nickel souhaite réaffirmer son engagement envers la communauté du Grand Sudbury, dit Mike Romaniuk, Vice-président des exploitations à Sudbury pour Xstrata Nickel. Cette série de conférences amène à Sudbury des personnalités remarquables qui excellent a tout point de vue dans leur discipline. Leur passage permet aux résidents de Sudbury et aux étudiants de la Laurentienne d'écouter, d'apprendre et de profiter du savoir et du partage d'expériences de conférencières et conférenciers notables. »

Les Conférences Falconbridge ont été inaugurées en 1978 grâce aux dons versés par Falconbridge ltée, ses employés, des familles et des amis, en mémoire de cinq employés qui ont perdu la vie dans un accident aérien, près de Barrie, en Ontario, le 7 septembre 1977.

Ces conférences ont pour but d'amener à Sudbury des personnalités éminentes du milieu universitaire, du monde des affaires, de la vie publique, des professions et des arts. Soixante-huit conférenciers, incluant des invités de marque tels John Kenneth Galbraith, Margaret Atwood, Benjamin Spock, Jessie Jackson, Jane Goodall, Boutros Boutros-Ghali, et plus récemment Beverley McLachlin et Roméo Dallaire, se sont adressés au public au fil des années. Ces conférences sont gratuites, permettant ainsi aux membres des communautés de la Laurentienne et du Grand Sudbury d'y assister en grand nombre. De plus, les étudiants des disciplines reliées aux champs d'expertise des invités ont la chance de rencontrer le conférencier dans une ambiance plus intime, favorisant ainsi l'échange du savoir.

« Nous sommes très reconnaissant envers Xstrata Nickel et leur généreuse contribution, affirme Mme Judith Woodsworth, rectrice de l'Université Laurentienne. En créant formellement une dotation, nous nous assurons que non seulement la Laurentienne mais, de façon plus importante, la communauté du Grand Sudbury, continueront de bénéficier à perpétuité de ces conférences à entrée libre. »

La conférence commémorative inaugurale Xstrata Nickel aura lieu à l'Université Laurentienne le jeudi 22 mars 2007. Dr. Roberta Bondar, première femme canadienne dans l'espace et neurologiste de renommée internationale, sera la conférencière invitée. De plus amples renseignements sur cet événement seront communiqués dans la nouvelle année.

Xstrata

Xstrata est un important groupe minier diversifié d'envergure mondiale dont les actions sont inscrites à la Bourse de Londres et la Bourse de Zurich. Xstrata, qui a son siège social à Zug, en Suisse, occupe une position significative dans sept grands marchés de produits de base internationaux : le cuivre, le charbon cokéfiable, le charbon thermique, le ferrochrome, le nickel, le vanadium et le zinc. La Société détient une entreprise d'aluminium plus petite mais rentable et des installations de recyclage; elle est aussi présente dans les secteurs de l'or, du plomb et de l'argent, et possède une série de technologies mondiales dont bon nombre sont des chefs de file de l'industrie. Les exploitations et les projets du groupe sont répartis dans 18 pays : l'Argentine, l'Australie, le Brésil, le Canada, le Chili, la Colombie, la République dominicaine, l'Allemagne, la Jamaïque, la Nouvelle-Calédonie, la Norvège, la Papouasie- Nouvelle-Guinée, le Pérou, l'Afrique du Sud, l'Espagne, la Tanzanie, les États-Unis et le Royaume-Uni.

Xstrata Nickel a son siège social à Toronto, au Canada, et est l'une des unités commerciales de produits de base de l'important groupe minier diversifié Xstrata plc d'envergure mondiale.

Les exploitations minières de Xstrata Nickel comprennent cinq mines et installations de traitement en Ontario et au Québec, au Canada; une mine de ferronickel et des installations de traitement à Bonao, en République dominicaine; de même qu'une affinerie à Kristiansand, en Norvège. Xstrata Nickel détient un portefeuille prometteur de projets de croissance, y compris Nickel Rim South au Canada, Kabanga en Tanzanie, et Koniambo en Nouvelle-Calédonie.

Xstrata Nickel est le quatrième producteur de nickel en importance au monde, avec une production gérée annuelle de plus de 110 000 tonnes de nickel affiné.

Université Laurentienne

Avec plus de 9 000 étudiants à plein temps et à temps partiel, l'Université Laurentienne est le véritable reflet du Canada. L'une des deux seules universités bilingues du pays, elle accueille aussi une importante population étudiante autochtone et un nombre croissant d'étudiants étrangers. L'École de médecine du Nord de l'Ontario, première nouvelle faculté de médecine à ouvrir ses portes au Canada depuis 30 ans, et lancée en collaboration avec l'Université Lakehead, a souhaité la bienvenue à sa première cohorte en 2005.

La Laurentienne grandit et n'est plus l'institution de premier cycle qu'elle a déjà été. Lors des trois dernières années, elle a mis sur pied six nouveaux programmes de doctorat. De plus, les capacités de recherches de l'Université augmentent d'année en année, moyennant depuis deux ans 15 millions de dollars par année. Récemment, la Laurentienne a lancé le Centre d'excellence en innovation minière (CEIM), en collaboration avec des partenaires gouvernementaux et du monde industriel. L'Université a aussi annoncé la création du Centre d'études sur les lacs, qui sera le premier édifice institutionnel au Canada à recevoir la certification LEED (Leadership *in Energy and Environmental Design*), classement Platine.

Trois universités fédérées sont affiliées à la Laurentienne: l'Université Huntington, l'Université Thorneloe et l'Université de Sudbury. De plus, L'Université compte deux collèges parmi ses institutions affiliées : le Collège universitaire de Hearst et le Collège universitaire Algoma. Un partenariat unique avec le Collège Georgian permet aux étudiants de compléter un programme de trois ans sur les campus de Barrie ou d'Orillia, avec possibilité d'entreprendre une 4^{e} année d'études à la Laurentienne, à Sudbury.

Aujourd'hui, l'Université compte 35 000 anciens. Avec sa forte tradition bilingue et triculturelle et son enracinement profond dans le Nord ontarien, l'Université Laurentienne continue d'accroître son offre de programmes, ses activités de recherche et ses partenariats au Canada et au-delà.

COMMUNIQUÉ

For immediate release **December 14, 2006**

Xstrata Nickel invests in Lecture Series at Laurentian University: Dr. Roberta Bondar to speak March 22, 2007

Sudbury (Ontario) – Xstrata Nickel today announced the contribution of $100,000 to Laurentian University in order to permanently endow the *Xstrata Nickel Memorial Lecture Series*. In turn, the University will match this amount with funds currently in the Falconbridge Lecture trust account.

"With today's announcement, Xstrata Nickel wishes to re-affirm its commitment to the Greater Sudbury community," said Mike Romaniuk, Vice-President of Operations in Sudbury for Xstrata Nickel. "This lecture series brings to Sudbury remarkable speakers who have excelled in their fields, and allows residents of Sudbury and Laurentian students to listen, learn and benefit from the knowledge and experiences shared by these noteworthy speakers."

The Falconbridge Lectures were established in 1978 with donations made by Falconbridge Ltd., employees, families and friends in memory of five employees who died in an aircraft accident, near Barrie, Ontario, on 7 September 1977.

The purpose of the lectures is to bring eminent figures from academic circles, the business community, public life, the professions and the arts to Sudbury. Sixty-eight speakers, including notables such as John Kenneth Galbraith, Margaret Atwood, Benjamin Spock, Jessie Jackson, Jane Goodall, Boutros Boutros-Ghali, and more recently Beverley McLachlin and Roméo Dallaire, have lectured over the years. Admission to the lectures is free, ensuring that members of both the Laurentian and the Greater Sudbury community have the opportunity to attend. In addition, students studying in a discipline related to the speaker's area of expertise have a chance to meet and hear from the speaker in a format that is conducive to a more in-depth sharing of knowledge.

"We are very grateful to Xstrata Nickel for this generous contribution," said Dr. Judith Woodsworth, President of Laurentian University. "By formally creating an endowment, we are also ensuring that not only Laurentian, but more importantly the Greater Sudbury community, will continue to benefit from these free lectures in perpetuity."

The inaugural *Xstrata Nickel Memorial Lecture* will be held at Laurentian University Thursday, March 22, 2007. The featured speaker will be Dr. Roberta Bondar, Canada's first woman in space and internationally renowned neurologist. Additional information about this event will be communicated early in the new year.

Xstrata

Xstrata is a major global diversified mining group, listed on the London and Swiss stock exchanges. Headquartered in Zug, Switzerland, Xstrata maintains a meaningful position in seven major international commodity markets: copper, coking coal, thermal coal, ferrochrome, nickel, vanadium and zinc, with a smaller but profitable aluminum business, recycling facilities, additional exposures to gold, lead and silver and a suite of global technologies, many of which are industry leaders. The Group's operations and projects span 18 countries: Argentina, Australia, Brazil, Canada, Chile, Colombia, the Dominican Republic, Germany, Jamaica, New Caledonia, Norway, Papua New Guinea, Peru, South Africa, Spain, Tanzania, the USA and the UK.

Xstrata Nickel is headquartered in Toronto, Canada, and is one of the commodity business units within the major global diversified mining group Xstrata plc.

Xstrata Nickel's mining operations include five mines and processing facilities in Ontario, Canada; Quebec, Canada; a ferronickel mine and processing facility in Bonao, Dominican Republic; and a refinery in Kristiansand, Norway. Xstrata Nickel has a promising portfolio of growth projects, including Nickel Rim South in Canada, Kabanga in Tanzania, and Koniambo in New Caledonia.

Xstrata Nickel is the fourth largest global nickel producer, with annual managed production of more than 110,000 tonnes of refined nickel.

Laurentian University

With more than 9,000 full-time and part-time students, Laurentian University is a mirror of Canada itself. One of only two bilingual universities in the country, we have a significant Native Student population and a growing number of international students. The Northern Ontario School of Medicine, Canada's first new medical school in more than 30 years, launched in collaboration with Lakehead University in Thunder Bay, welcomed its charter class in 2005.

Laurentian is growing beyond the primarily undergraduate institution it once was, having added six new doctoral programs over the past three years. Additionally, the University's research capacity continues to grow annually, averaging $15 million a year over the past few years. Recently, Laurentian launched the Centre for Excellence in Mining Innovation (CEMI) in collaboration with government and industry. The University also announced plans for a Living with Lakes Centre, which will be the first institutional building in Canada to achieve the Platinum Leadership in Energy and Environmental Design (LEED) certification, the highest in the country.

Laurentian includes three federated universities: Huntington University, Thorneloe University and University of Sudbury. We also have two affiliated colleges: *Collège universitaire de Hearst* and Algoma University College. A unique partnership with Georgian College enables students to complete a three-year degree at the Barrie or Orillia campuses, with the option of a fourth year at Laurentian in Sudbury.

Today, the University counts 35,000 alumni. Strong in its bilingual and tricultural traditions and with deep roots in northern Ontario, Laurentian University continues to expand its program offerings, research activities and partnerships in Canada and abroad

COMMUNIQUÉ

Sudbury, le 18 décembre 2006

Xstrata Nickel investit 5 millions $ au Centre d'excellence en innovation minière de l'Université Laurentienne

Xstrata Nickel a annoncé aujourd'hui qu'elle investissait 5 millions $ au Centre d'excellence en innovation minière (CEIM) de l'Université Laurentienne. Mis sur pied en partenariat avec les gouvernements et l'industrie, le CEIM sera un centre international de première classe pour la recherche et l'innovation dans le secteur minier.

« Xstrata Nickel est une compagnie axée sur la croissance par la création de valeur à Sudbury et à l'échelle mondiale, dit Mike Romaniuk, vice-président des exploitations à Sudbury pour Xstrata Nickel. La recherche de haut calibre au CEIM et les innovations qui en découleront augmenteront notre compétitivité à Sudbury, ainsi que dans nos projets et nos exploitations ailleurs sur la planète. Nous croyons que cette institution unique sera très avantageuse pour notre compagnie et pour la communauté de Sudbury. Nous sommes fiers d'appuyer le CEIM et nous avons très hâte de travailler en collaboration avec tous les partenaires impliqués dans cette importante initiative. »

Judith Woodsworth, rectrice de l'Université Laurentienne et présidente du Conseil consultatif fondateur du CEIM, est reconnaissante de la généreuse contribution de Xstrata Nickel. « En 2004, dans sa vision, la Laurentienne a clairement et publiquement exprimé son intention de devenir un leader de calibre national dans le domaine de l'exploitation minière et de la recherche en exploration, affirme-t-elle. Grâce à son appui généreux, Xstrata Nickel se positionne clairement comme donateur de premier plan au chapitre de l'éducation et de la recherche dans les domaines de l'exploitation minière et de l'exploration, dans notre ville et sur la scène internationale. »

Le Conseil d'orientation pour la grappe industrielle minière de l'Ontario (COGIMO), sous la direction de l'honorable Rick Bartolucci, ministre du Développement du Nord et des Mines, a choisi Sudbury et l'Université Laurentienne à titre d'endroits de choix pour le CEIM. Les connaissances et l'expertise considérables en matière d'exploitation minière dans la région, et le leadership reconnu de l'Université Laurentienne en recherche et sur le plan des programmes d'études supérieures liés à l'exploitation minière, ont joué un rôle clé dans la désignation de Sudbury à titre d'endroit évident où mettre sur pied le CEIM. Le Centre, dont les priorités de recherche ont été déterminées en collaboration avec l'industrie, mettra l'accent sur l'exploration minière, la recherche sur l'exploitation souterraine en profondeur, le génie des procédés opérationnels miniers intégrés, la télérobotique et l'automatisation, ainsi que sur l'environnement et la remise en état.

« Dès le début, le gouvernement McGuinty a appuyé cette initiative emballante et essentielle, et il s'est engagé à y verser 10 millions de dollars qu'elle devienne réalité, dit Rick Bartolucci, ministre du Développement du Nord et des Mines. Le bassin de Sudbury fournit du nickel sur le marché mondial depuis plus d'un siècle. La ville a toujours été une pionnière, et elle continuera à s'efforcer, en collaboration avec le CEIM, afin d'être à l'avant-plan de l'industrie minière et de constituer un centre d'exploitation minière et de recherche en exploration de calibre mondial. »

Pour plus de renseignements sur le CEIM, veuillez consulter le document d'information ci-joint.

Centre d'excellence en innovation minière (CEIM)

Le Centre d'excellence en innovation minière (CEIM) est une nouvelle entité de recherche du secteur minéral du Nord de l'Ontario, que dirigent conjointement l'industrie et l'Université Laurentienne, en collaboration avec des partenaires en recherche et développement à l'échelle régionale, nationale et internationale. Le CEIM va de l'avant en vue de devenir une société sans but lucratif, ancrée sur le campus de l'Université Laurentienne, à Sudbury. (www.cemi.laurentian.ca)

Conseil d'orientation pour la grappe industrielle minière de l'Ontario (COGIMO)
Le CEIM a été conçu par le Conseil d'orientation pour la grappe industrielle minière de l'Ontario (COGIMO), qui mise sur les actifs de l'industrie minérale afin de créer une grappe d'organismes industriels du secteur des minéraux et des domaines connexes, grande et plus concurrentielle à l'échelle mondiale. Le Conseil rassemble des parties intéressées clés ayant divers intérêts, y compris l'industrie de l'exploration et de l'exploitation minière de l'Ontario, des fournisseurs de fournitures et services miniers, les gouvernements, le secteur de la main-d'œuvre, des organismes sectoriels, les groupes autochtones, les groupes environnementaux et les collectivités minières.

Vision
Selon la vision du COGIMO, le CEIM deviendra un centre international de recherche et d'innovation de calibre mondial, mené par l'industrie minière, qui présente des notions, des processus et des méthodes de pointe pour appuyer l'exploration et les industries minières régionales, nationales et internationales, de même que les fournisseurs de fournitures et de services miniers.

Mission
Pour concrétiser sa vision, le CEIM créera de nouvelles capacités de recherche, d'éducation, de la formation et de transferts de technologie, ce qui :

- entraînera des activités d'exploitation minière à valeur ajoutée dans le Nord de l'Ontario et ailleurs;
- renforcera la capacité de Sudbury au chapitre de la recherche de calibre mondial, coopérative et menée par l'industrie;
- entraînera l'ajout de nouvelles compétences en recherche aux réseaux d'expertise locaux, nationaux et internationaux; et
- permettra de compter sur des gens hautement qualifiés au sein du secteur minéral, dans de nouveaux domaines de recherche.

Les cinq priorités clés du CEIM au chapitre de la recherche :

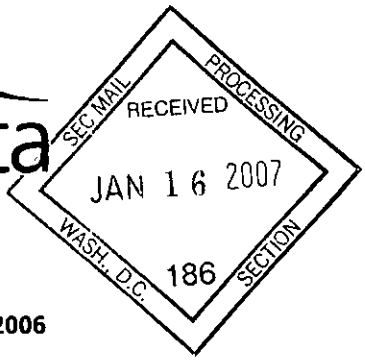
- l'exploration;
- l'exploitation souterraine à grande profondeur;
- le génie des procédés opérationnels miniers intégrés;
- la télérobotique et l'automatisation;
- l'environnement et la remise en état.

Le Centre d'excellence en innovation minière à l'Université Laurentienne

L'Université Laurentienne est un leader de l'éducation et de la recherche dans le domaine minier, partout au Canada. Elle compte présentement huit centres de recherche minière et sept programmes de maîtrise et de doctorat, liés à l'exploitation minière, de même que six chaires de recherche du Canada, dont trois sont reliées à l'exploration et à la recherche minière.

Mises à jour sur le financement

Dans son budget 2006-2007, le gouvernement de l'Ontario s'est engagé à verser 10 millions de dollars au CEIM. En mars 2006, Inco Limitée a annoncé qu'elle investissait cinq millions de dollars en argent et en nature dans le projet. En décembre 2006, Xstrata a annoncé qu'elle y investissait cinq millions de dollars. La Ville du Grand Sudbury, quant à elle, s'est engagée à verser 50 000 $ sur trois ans au CEIM.



Membres du Conseil consultatif intérimaire du CEIM

Dale	Andres	Directeur général des opérations souterraines, Teck Cominco Limitée
Sylvia	Barnard	Présidente du Collège Cambrian
Ron	Chrysler	Vice-recteur aux finances et à l'administration (à la retraite), Université Laurentienne
Mark	Cutifani	Chef de l'exploitation, CVRD / Inco
Harley	d'Entremont	Vice recteur à l'enseignement et à la recherche, Université Laurentienne (Affaires francophones)
Jonathan	Fowler	Vice-président, Affaires autochtones et environnementales, DeBeers Canada
John	Gammon	Ancien directeur des Initiatives minières, Université Laurentienne
Leo	Gerard	Président international, Métallurgistes unis d'Amérique
Suzanne	Herbert	Sous-ministre du Développement du Nord et des Mines
Chris	Hodgson	Président, Ontario Mining Association
Irwin J.	Itzkovitch	Sous-ministre adjoint, Secteur des sciences de la Terre, Ressources naturelles Canada (à la retraite)
Christine	Kaszycki	Sous-ministre adjointe, Division des mines et des minéraux, ministère du Développement du Nord et des Mines
Terry	MacGibbon	Président et chef des opérations, FNX Mining Company Inc.
Doug	Morrison	Conseiller principal chez Golder Associates Limited et membre du Conseil de MIRARCO
Allan	Moss	Membre du Comité de gestion de CAMIRO et directeur principal des consultants de Rio Tinto

Gary	Nash	Sous-ministre adjoint, Secteur des minéraux et des métaux, Ressources naturelles Canada
Louise	Paquette	Directrice générale, FedNor, Industrie Canada
John	Rodriguez	Maire de la Ville du Grand Sudbury
Mike	Romaniuk	Vice-président des exploitations à Sudbury, Xstrata Nickel
Nick	Sheard	Vice-président, exploration, CVRD / Inco
Jean-Marc	Valade	Président, SAMSSA
Liette	Vasseur	Vice-rectrice associée à la recherche, Université Laurentienne
Deming	Whitman	Président-directeur général, AMIRA International
Judith	Woodsworth	Rectrice, Université Laurentienne, Présidente, Conseil consultatif intérimaire du CEIM

COMMUNIQUÉ

December 18, 2006

Xstrata Nickel Invests $5 million in Centre for Excellence in Mining Innovation (CEMI) at Laurentian University

Sudbury (Ontario) – Xstrata Nickel announced today that it has invested $5 million in the Centre for Excellence in Mining Innovation (CEMI) at Laurentian University. Established in partnership with government and industry, CEMI will become an international centre for world-class, industry-driven research and innovation for the mining sector.

"Xstrata Nickel is a company focused on value-creating growth in Sudbury and around the world," said Mike Romaniuk, Vice-President, Sudbury Operations for Xstrata Nickel. "Advanced research and innovation at CEMI will enhance our competitiveness in Sudbury and at our projects and operations globally. We believe this unique institution will become a competitive advantage to our company and to the Sudbury community. We are proud to support CEMI and look forward to working with all the partners involved in this important initiative."

Dr. Judith Woodsworth, President of Laurentian University and Chair of CEMI's founding advisory board, was grateful to Xstrata Nickel for its generous contribution. "In 2004, Laurentian clearly and publicly expressed, through its vision, its intention to become a national leader in mining and exploration research," she said. "Through its generous contribution, Xstrata Nickel is clearly establishing itself as a premier contributor to mining and exploration education and research, in our city and internationally."

Sudbury and Laurentian University were chosen as the preferred location for CEMI by the Ontario Mineral Industry Cluster Council (OMICC), under the leadership of the Honourable Rick Bartolucci, Minister of Northern Development and Mines. The region's considerable mining knowledge and expertise, as well as Laurentian University's acknowledged leadership in mining-related graduate programs and research were key factors in designating Sudbury as the obvious location for CEMI. The Centre, whose research priorities were developed in collaboration with industry, will focus on mining exploration, deep mining research, integrated mine process engineering, telerobotics and automation, and environment and reclamation.

"From the beginning, the McGuinty Government has not only supported this exciting and essential initiative, but has also committed $10 million to make it a reality," said Rick Bartolucci, Minister of Northern Development and Mines. "The Sudbury basin has been supplying nickel to the world for more than a century. This city has always been a pioneer and will continuously strive, with CEMI, to be a mining industry front-runner and a world-class mining and exploration research centre."

For more information on CEMI, please consult the attached backgrounder.

Backgrounder

Centre for Excellence in Mining Innovation (CEMI)

CEMI is a new mineral sector research entity in Northern Ontario, led jointly by industry and Laurentian University in collaboration with regional, national and international R&D partners. CEMI is moving forward to becoming a not-for-profit corporation, anchored on the Laurentian University campus in Sudbury. (www.cemi.laurentian.ca)

Ontario Mineral Industry Cluster Council (OMICC)
CEMI was conceived by the Ontario Mineral Industry Cluster Council (OMICC), which leverages mineral industry assets to create a large and more globally competitive cluster of mineral and related industrial organizations. The council brings together key stakeholders from a wide variety of interests, including Ontario's exploration and mining industry, mine supply and service providers, government, labour; sector organizations, Aboriginal groups, environmental groups and mining communities.

Vision
OMICC's vision for CEMI is to become an international centre for world-class, industry-driven research and innovation, advancing state-of-the-art concepts, processes and methodologies in support of the regional, national and international exploration and mining industries, and providers of mining services and supplies.

Mission
In pursuit of this vision, CEMI will develop new research, education, training and technology transfer capacity, which will:

- add value to mining operations in Northern Ontario and beyond;
- strengthen Sudbury's capability to undertake world class, collaborative and industry-driven research;
- add new research skills to networks of expertise that exist locally, nationally and internationally; and
- develop highly qualified persons for the mineral sector in emerging fields of study.

xstrata nickel

LaurentianUniversity
UniversitéLaurentienne

CEMI's five key research priorities:

- exploration
- deep mining
- integrated mine process engineering
- telerobotics and automation
- environment and reclamation

CEMI at Laurentian University

Laurentian University is a leader in mining education and research across Canada. The University is already home to eight mining research centres, and seven mining-related graduate programs at the Master's and PhD levels, as well as six Canada Research Chairs, three of which have links to exploration and mining research.

Funding Updates

The Ontario government committed $10 million to CEMI in its 2006-2007 budget. In March 2006, Inco Limited announced an investment of $5 million in-cash and in-kind contributions to CEMI. In December 2006, Xstrata announced a $5 million in-cash investment. The City of Greater Sudbury has committed $50,000 over three years to CEMI.

CEMI Interim Advisory Board – Membership

Dale	Andres	General Manager, Underground Operations, Teck Cominco Ltd
Sylvia	Barnard	President, Cambrian College
Ron	Chrysler	Vice President Finance and Administration (retired) Laurentian University
Mark	Cutifani	Chief Operating Officer, CVRD Inco
Harley	d'Entremont	Vice-President Academic, Laurentian University (Francophone Affairs)
Jonathan	Fowler	Vice-President, Aboriginal & Environmental Affairs DeBeers Canada

REGULATORY ANNOUNCEMENT

TOTAL VOTING RIGHTS

Zug, 20th December 2006

In conformity with the Transparency Directive's transitional provision 6, Xstrata plc ("Xstrata") hereby announces that on 19th December 2006, Xstrata had 943,150,383 issued ordinary shares of US$0.50 each admitted to trading. Each ordinary share carries the right to one vote in relation to all circumstances at general meetings of Xstrata. Xstrata does not hold any ordinary shares in treasury.

This figure (943,150,383) may be used by shareholders (and others with notification obligations) as the denominator for the calculations by which they will determine whether they are required to notify their interest in, or a change to their interest in, Xstrata under the FSA's Disclosure and Transparency Rules.

NEWS RELEASE

XSTRATA COPPER EXERCISES OPTION TO ACQUIRE 62.5% OF TAMPAKAN PROJECT IN THE PHILIPPINES

Brisbane, 21 December 2006

Xstrata Copper announces its decision to exercise its option to acquire 62.5% of the Tampakan copper-gold deposit in the Philippines from the project's current owner, ASX-listed Indophil Resources NL (Indophil).

Indophil and Xstrata Copper will now work through a period of transition with completion of the exercise and management handover of the project to occur on 30 March 2007.

Xstrata Copper's decision to exercise its options follows its 1 November 2006 announcement to sole fund further work that it considered necessary to determine whether or not to exercise its option. The decision to sole fund additional work was a result of the project's increase in scale, complexity and potential viability. This decision followed Xstrata Copper's receipt of the Indophil pre-feasibility study (PFS) report. The PFS was funded and managed by Indophil and its Philippines affiliate Sagittarius Mines Inc. and was completed in September 2006 following the completion of the required expenditure of AUD27 million by Indophil.

The Tampakan deposit represents one of the largest undeveloped copper-gold deposits in the South East Asia-western Pacific Region. The PFS confirmed that the Tampakan project is a two billion tonne resource containing 11.6 million tonnes of copper and 14.6 million ounces of gold at a 0.3% copper cut-off grade.

Xstrata Copper Chief Executive Charlie Sartain said the acquisition of 62.5% of the Tampakan deposit was an important step in the execution of the business unit's growth strategy.

"Following the acquisition of Falconbridge in August this year, Xstrata Copper is now a major player in the global copper industry. The decision to exercise our option to acquire a 62.5% controlling interest in the Tampakan Project will further expand our position globally. Promising mineral resource estimates at the deposit indicate the project should become a new long life copper asset for Xstrata," he said.

Notes to editors

The Tampakan project is located on the southern Philippines island of Mindanao, approximately 65 kilometres north of General Santos City. The current project is situated on the tri-boundary of three Provinces – South Catabato, Sultan Kudarat and Davao Del Sur. The Tampakan copper-gold deposit is located in the Province of South Cotabato, Municipality of Tampakan. Most of the project area covers generally accentuated topography with the Tampakan deposit located on a NNE trending ridge at an elevation varying from 1000-1300 metres a.s.l.

OWNERSHIP BREAKDOWN

The final beneficial ownership interest in the project is A class shareholders; Xstrata 62.5% and Indophil Resources NL 32.5% and Alson's Corporation 5% and B class shareholders with limited voting and capped dividend rights Tampakan Mining Corporation and Southcot Mining Corporation (The Tampakan Group of Companies).

REGULATORY ANNOUNCEMENT

DISCLOSABLE INTERESTS

Zug, 22 December 2006

This notification relates to issued ordinary shares of US$0.50 each (the "Shares") in the capital of Xstrata plc ("Xstrata") and to the termination of a capital management arrangement (the "Capital Management Arrangement") between Duchy Investments Sàrl (a company within the Credit Suisse Group) ("Duchy") and Glencore International AG ("Glencore"). Glencore entered into the Capital Management Arrangement with Credit Suisse Group in connection with the Xstrata Group's acquisition of MIM Holdings Limited and associated rights issue in 2003. The Capital Management Arrangement was an arrangement to which Section 204 of the Companies Act 1985 (the "Act") applied in respect of the Shares.

Xstrata announces that it was notified by both Credit Suisse Group and Glencore on 21 December 2006 that the Capital Management Arrangement was terminated on 20 December 2006.

Xstrata was also notified by Credit Suisse Group on 21 December 2006 that, following termination of the Capital Management Arrangement, Credit Suisse Group no longer has a notifiable interest in the Shares.

Xstrata was also notified by Glencore on 21 December 2006 that:

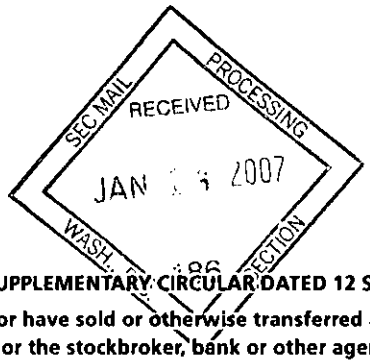
1) Immediately before termination of the Capital Management Arrangement, Glencore was interested in 336,801,333 Shares by virtue of Sections 204 and 205 of the Act (the "Section 204 Shares"). Following termination of the Capital Management Arrangement on 20 December 2006, Glencore is no longer interested in the Section 204 Shares by virtue of that section.

2) Finges Investment B.V. ("Finges"), a wholly owned subsidiary of Glencore, has acquired an interest in a further 151,560,600 Shares (through the purchase from Duchy of the entire issued share capital of Hanmer B.V. ("Hanmer") which owns 151,560,600 Shares ("Relevant Shares")).

3) The number of Shares which each of Glencore and Finges know they were interested in (for the purposes of Sections 203, 208 and 209 of the Act) immediately after the time when its obligation to make this notification arose is 336,801,333. Of these Shares, HSBC Bank plc is the registered holder of 185,240,733 Shares and Credit Suisse is the registered holder of 151,560,600 Shares.

4) So far as was known to Glencore at the time of its notification on 21 December 2006, its interests in the Shares to which the notification related are not such interests as are mentioned in Section 208(5) of the Act.

As a consequence of the termination of the Capital Management Arrangement and the sale of Hanmer to Finges, the Glencore Goup now owns 35.71% of the issued ordinary share capital of Xstrata.



The sale of Hanmer to Finges does not affect the lock-up agreement entered into by Hanmer with Xstrata in respect of the Relevant Shares for the period commencing on 6 December 2006 and ending on 27 April 2007, announced on 12 December 2006, which remains in force with Hanmer.

As of 21 December 2006, 943,150,383 Shares were in issue.

12 September 2006

To Shareholders and, for information only, to participants in the Xstrata Share Schemes

Dear Shareholder,

Acquisition of Falconbridge Limited and working capital

1. Introduction

I am pleased to report that, since I last wrote to you, we have successfully completed the acquisition of Falconbridge Limited ("Falconbridge"), creating a new major mining group with top five industry positions in copper, thermal and coking coal, ferrochrome, zinc, nickel and vanadium, a smaller but profitable aluminium business, recycling facilities, additional exposures to gold, lead and silver and a suite of global technologies, many of which are industry leaders.

The Enlarged Group's operations and projects span 18 countries: Argentina, Australia, Brazil, Canada, Chile, Colombia, the Dominican Republic, Germany, Jamaica, New Caledonia, Norway, Papua New Guinea, Peru, South Africa, Spain, Tanzania, the USA and the UK.

Xstrata now beneficially owns approximately 97.1% of the issued and outstanding Falconbridge Shares on a fully-diluted basis. Since the Xstrata Offer was accepted by holders of more than 90% of Falconbridge Shares, Xstrata has begun the process of exercising its right under the compulsory acquisition provisions of section 188 of the Business Corporations Act (Ontario), as amended, to acquire all outstanding Falconbridge Shares not already owned by Xstrata at the Xstrata Offer price of C$62.50 per Falconbridge Share. Xstrata expects the compulsory acquisition process to conclude in early November 2006.

The purpose of this letter is to provide you with Xstrata's opinion on the sufficiency of working capital of the Enlarged Group, in accordance with the Listing Rules. **You do not need to take any action in respect of this letter.**

2. Working capital

In the circular issued by the Company on 30 May 2006 (the "Circular") and in the supplementary circular issued by the Company on 20 July 2006 (the "First Supplementary Circular"), Xstrata stated that its opinion on the sufficiency of working capital of the Xstrata Group including the Falconbridge Group following completion of the Falconbridge acquisition (the "Falconbridge Acquisition") was intended to be available and to be published as soon as Xstrata was granted access sufficient for the purpose to the information allowing Xstrata to undertake appropriate procedures to support a statement in respect of the sufficiency of working capital of the Enlarged Group and in any event within 28 days of the date of satisfaction or waiver of all of the conditions of the Xstrata Offer and the announcement by Xstrata Canada Inc. (the "Offeror") that the Offeror had taken up Falconbridge Shares under the Xstrata Offer.

The Offeror first took up Falconbridge Shares under the Xstrata Offer on 15 August 2006, when Xstrata announced that it beneficially owned approximately 92.1% of the issued and outstanding Falconbridge Shares on a fully-diluted basis.

Xstrata is of the opinion that, taking into account the bank and other facilities available to the Enlarged Group, the Enlarged Group has sufficient working capital for its present requirements, that is for at least 12 months from the date of publication of this document.

3. Responsibility

The Directors, whose names are set out in the header of this letter, accept responsibility for the information contained in this letter. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case), the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of such information.

4. General

This letter is supplemental to, and should be read in conjunction with, the Circular and the First Supplementary Circular.

Unless otherwise defined in this letter, capitalised terms have the meanings ascribed to them in the sections of the Circular and/or the First Supplementary Circular headed "Definitions and Glossary of Technical Terms".

Copies of the Circular, the First Supplementary Circular, this letter and all announcements in connection with the Falconbridge Acquisition released by Xstrata via a Regulatory Information Service approved by the UK Financial Services Authority are available on Xstrata's website (www.xstrata.com).

Neither the content of Xstrata's website (or any other website) nor the content of any website accessible from hyperlinks on Xstrata's website (or any other website) is incorporated into, or forms part of, this letter.

5. Conclusion

Xstrata emerges from the acquisition of Falconbridge as a new global mining "supermajor", the fifth largest diversified mining company in the world, with an outstanding portfolio of cash generative operations, promising growth projects and the financial flexibility to realise the Enlarged Group's potential to create further value for all stakeholders, both existing and new.

Yours sincerely

Willy Strothotte
Chairman

RECEIVED
JAN 16 2007

SUPPLEMENTARY CIRCULAR DATED 20 JULY 2006

THIS DOCUMENT AND ITS ENCLOSURES ARE IMPORTANT AND REQUIRE YOUR IMMEDIATE ATTENTION. If you are in any doubt as to what action you should take, you are recommended to seek your own personal financial advice immediately from your stockbroker, bank manager, solicitor, accountant, fund manager or other appropriate independent financial adviser, who is authorised under the Financial Services and Markets Act 2000 if you are in the United Kingdom, or from another appropriately authorised independent financial adviser if you are in a territory outside the United Kingdom.

If you sell or have sold or otherwise transferred all of your Ordinary Shares, please forward this document and the accompanying documents to the purchaser or transferee or the stockbroker, bank or other agent through whom the sale or transfer is/was effected for onward transmission to the purchaser or transferee. If you sell or have sold or otherwise transferred only part of your holding of Ordinary Shares, you should retain this document and the accompanying documents.

This document should be read in conjunction with the Circular dated 30 May 2006. Certain information from the Circular and other information in relation to the Xstrata Group has been incorporated by reference into this document. You should refer to the section of this document headed "Relevant Documentation".

Each of Deutsche Bank and JPMorgan Cazenove is acting exclusively for the Company and no one else in connection with the Proposed Acquisition and will not be responsible to anyone other than the Company for providing the protections afforded to its clients or for providing advice in relation to the Proposed Acquisition and/or any other matter referred to in this document.

For a discussion of certain risk factors which should be taken into account when considering whether to vote in favour of the Resolution to be proposed at the Extraordinary General Meeting referred to below, see Part II – "Risk Factors" of the Circular and Part II – "Risk Factors" of this document.

Capitalised terms have the meanings ascribed to them in the section of this document headed "Definitions and Glossary of Technical Terms". References to times in this document are to British Summer Time unless otherwise stated.

Xstrata plc

(incorporated in England and Wales under the Companies Act 1985, with registered number 4345939)

Proposed Acquisition of Falconbridge Limited

Supplementary Circular and Notice of Extraordinary General Meeting

---

As a result of the Increased Xstrata Offer, the Proposed Acquisition is conditional, amongst other things, upon the approval of Shareholders at the Extraordinary General Meeting referred to below. Your attention is drawn to the letter from the Chairman of Xstrata plc on pages 13 to 22 of this document, which contains a recommendation by the Board of Directors that you vote in favour of the Resolution to be proposed at the Extraordinary General Meeting. You should read this document, the Circular and the other information incorporated by reference into this document in their entirety, not rely solely on summarised information and consider whether to vote in favour of the Resolution in light of the information contained in, and incorporated by reference into, this document.

Notice of the Extraordinary General Meeting, to be held at Congress Center Metalli, Parkhotel Zug, 6300 Zug, Switzerland at 11.30 a.m. (Central European Summer Time) on Monday, 14 August 2006, is set out at the end of this document. You may also attend the Extraordinary General Meeting at the registered office of the Company, 4th Floor, Panton House, 25/27 Haymarket, London SW1Y 4EN, UK, where a satellite meeting linked by video conference to the Zug meeting will be held concurrently at 10.30 a.m. (British Summer Time).

Shareholders will find enclosed a Form of Proxy for use in connection with the Extraordinary General Meeting. Shareholders are requested to complete and return the Form of Proxy, in accordance with the instructions printed thereon, whether or not they intend to be present at the meeting, so as to be received by the Company's registrars, Computershare Investor Services PLC, PO Box 1075, The Pavilions, Bridgwater Road, Bristol BS99 3FA, UK, as soon as possible but in any event by no later than 10.30 a.m. (British Summer Time) on Saturday, 12 August 2006. CREST members may also choose to utilise the CREST electronic proxy appointment service in accordance with the procedures set out in the notice convening the Extraordinary General Meeting at the end of this document. The lodging of the Form of Proxy (or the electronic appointment of a proxy) will not preclude Shareholders from attending and voting at the Extraordinary General Meeting, should they so wish.

If you hold Ordinary Shares through the SIS System you will be contacted separately by the Swiss Bank through which you hold Ordinary Shares as to how to participate at the Extraordinary General Meeting.

This document does not constitute or form part of any offer or invitation to purchase, otherwise acquire, subscribe for, sell, otherwise dispose of or issue, or any solicitation of any offer to sell, otherwise dispose of, issue, purchase, otherwise acquire or subscribe for, any security. The Xstrata Offer is being made exclusively by means of, and subject to the terms and conditions set out in, the Offer Document as amended and varied by the Variation Documents.

Nothing in this document is an offer of securities for sale or a solicitation of an offer to purchase securities in the United States or in any other jurisdiction. The securities of Xstrata referred to herein have not been and will not be registered under the US Securities Act of 1933, as amended (the "Securities Act"), and such securities may not be offered or sold in the United States absent registration under the Securities Act or an applicable exemption from the registration requirements of the Securities Act.

No statement in this document or incorporated by reference into this document is intended as a profit forecast and no statement in this document or incorporated by reference into this document should be interpreted to mean that earnings per Ordinary Share for the current or future financial years would necessarily match or exceed the historical published earnings per Ordinary Share.

Presentation of information on the Falconbridge Group

This document and the information incorporated by reference into this document contain certain information relating to Falconbridge and the Falconbridge Group, including the information contained in Part I – "Letter from the Chairman", Part II – "Risk Factors", Part III – "Information on the Falconbridge Group", Part IV – "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group" and Part VI – "Additional Information" of this document and the information contained in Part I – "Letter from the Chairman", Part II – "Risk Factors", Part III – "Information on the Falconbridge Group", Part IV – "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group" and Part VI – "Additional Information" of the Circular (which have been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

Whilst Xstrata carried out a limited due diligence exercise in respect of Noranda and Former Falconbridge assets in the first half of 2004, it has not had any due diligence access to Noranda or Former Falconbridge since then nor has it had any due diligence access to Falconbridge since its creation through the amalgamation of Noranda and Former Falconbridge on 30 June 2005, including at the time of the Xstrata Group's acquisitions of Falconbridge Shares in August and September 2005. Xstrata believes it does not currently have access to any material non-public financial or other information in respect of the Falconbridge Group. Consequently, the information in this document and the information incorporated by reference into this document relating to Falconbridge and the Falconbridge Group (other than in relation to the trading prices of Falconbridge Shares on the TSX and NYSE which is sourced from Bloomberg) has been compiled from information included in public documents filed by the Falconbridge Group only and has not, for the purposes of this document or the Circular, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Xstrata and the Xstrata Directors have sought to ensure that such information has been accurately reproduced from such sources and, so far as Xstrata is aware and is able to ascertain from information included in public documents filed by the Falconbridge Group, no facts have been omitted which would render the reproduced information inaccurate or misleading. See the risk factor "Lack of due diligence access to Falconbridge" in Part II – "Risk Factors" in the Circular which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation".

Nothing in this paragraph headed "Presentation of information on the Falconbridge Group" is intended to qualify the statements in paragraph 1 of Part VI – "Additional Information – Responsibility".

Presentation of information on the Enlarged Group

Unless the context otherwise requires, references in this document to the "Enlarged Group" are to Xstrata and its subsidiaries (including Tintaya, following completion of the Tintaya Acquisition on 21 June 2006) and subsidiary undertakings and, where the context requires, its associated undertakings as constituted immediately following completion of the Proposed Acquisition and therefore such references include the Xstrata Group as enlarged by the Falconbridge Group. Completion of the Proposed Acquisition remains subject to a number of conditions which are described in detail in Part I – "Letter from the Chairman" and Part V – "Principal Terms of the Proposed Acquisition" of this document and Part I – "Letter from the Chairman" and Part V – "Principal Terms of the Proposed Acquisition" of the Circular (which have been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

Cautionary note regarding forward-looking statements

This document and the information incorporated by reference into this document include statements that are, or may be deemed to be, "forward-looking statements". These forward-looking statements can be identified by the use of forward-looking terminology, including the terms "believes", "estimates", "anticipates", "expects", "intends", "plans", "goal", "target", "aim", "may", "will", "would", "could" or "should" or, in each case, their negative or other variations or comparable terminology. These forward-looking statements include all matters that are not historical facts. They appear in a number of places throughout this document and the information incorporated by reference into this document and include statements regarding the intentions, beliefs or current expectations of the Directors, Xstrata or the Xstrata Group concerning, amongst other things, the results of operations, financial condition, liquidity, prospects, growth, strategies and dividend policy of the Xstrata Group and the Enlarged Group and the industries in which they operate.

This document also contains forward-looking statements regarding the Proposed Acquisition, including statements regarding and relating to the expected completion, and the expected timing of completion, of the Proposed Acquisition

(which is conditional, amongst other things, upon Shareholder approval and receipt of approval under the Investment Canada Act) and potential and/or expected synergies and cost savings available to the Enlarged Group.

By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future and may be beyond Xstrata's ability to control or predict. Forward-looking statements are not guarantees of future performance. The Xstrata Group's and the Enlarged Group's actual results of operations, financial condition, liquidity, dividend policy and the development of the industries in which they operate may differ materially from the impression created by the forward-looking statements contained in this document. Further, actual developments in relation to the Proposed Acquisition and the expected completion, and timing of completion of, the Proposed Acquisition may differ materially from those contemplated by forward-looking statements depending on certain factors which include, but are not limited to, the risk that Shareholders may not vote in favour of the Resolution, the risks that the Xstrata Group will not be able to obtain the required approval under the Investment Canada Act on a timely basis or at all, the other conditions of the Proposed Acquisition may not be satisfied on a timely basis or at all, the risks that (and the risks associated with the fact that) the Xstrata Group may not acquire under the Xstrata Offer all of the Falconbridge Shares not already owned by the Xstrata Group, the Xstrata Group may not realise the anticipated benefits, operational and other synergies and/or cost savings from the Proposed Acquisition and/or the Cerrejón Acquisition and/or the Tintaya Acquisition and the Xstrata Group may incur and/or experience unanticipated costs and/or delays and/or difficulties relating to integration of the Falconbridge Group and/or the Cerrejón Business and/or Tintaya into the Enlarged Group. In addition, even if the results of operations, financial condition, liquidity and dividend policy of the Xstrata Group and the Enlarged Group (as the case may be), and the development of the industries in which they operate, are consistent with the forward-looking statements contained in this document, those results or developments may not be indicative of results or developments in subsequent periods. Important factors that could cause these differences include, but are not limited to, general economic and business conditions, commodity price volatility, industry trends, competition, changes in government and other regulation, including in relation to the environment, health and safety and taxation, labour relations and work stoppages, changes in political and economic stability, currency fluctuations (including the €/US$, £/US$, A$/US$, C$/US$, ZAR/US$, ARS/US$, CHF/US$, the Colombian peso/US$ and the Peruvian Sol/US$ exchange rates), the Xstrata Group's and the Enlarged Group's ability to integrate new businesses (including the Falconbridge Group, the Cerrejón Business and Tintaya) and recover their reserves or develop new reserves and changes in business strategy or development plans and other risks, including those described in Part II – "Risk Factors" of this document and Part II – "Risk Factors" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

You are advised to read this document and the information incorporated by reference into this document in their entirety, and in particular Part I – "Letter from the Chairman" and Part II – "Risk Factors" of this document and Part II – "Risk Factors" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation"), for a further discussion of the factors that could affect the Xstrata Group's and the Enlarged Group's future performance and the industries in which they operate. In light of these risks, uncertainties and assumptions, the events described in the forward-looking statements in this document may not occur.

Other than in accordance with its legal or regulatory obligations (including under the Listing Rules, the Disclosure Rules and the Prospectus Rules), Xstrata does not undertake any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events or otherwise.

Presentation of financial information

Unless otherwise indicated, financial information for the Xstrata Group in this document and the information incorporated by reference into this document is presented in US dollars and has been prepared in accordance with International Financial Reporting Standards, or IFRS. Unless otherwise indicated, financial information for the Falconbridge Group in this document and the information incorporated by reference into this document has been extracted without material amendment from published information, is presented in US dollars and has been prepared in accordance with Canadian GAAP. Financial information for the Falconbridge Group in this document and the information incorporated by reference into this document relating to the month ended 30 April 2006 and the three months ended 31 March 2006, pro forma financial information on the amalgamation of Noranda and Former Falconbridge for the three months ended 31 March 2005 and as otherwise indicated in this document and the information incorporated by reference into this document, is unaudited. See also "Presentation of information on the Falconbridge Group" above and the risk factor "Lack of due diligence access to

Falconbridge" in Part II – "Risk Factors" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

UK GAAP (in accordance with which Xstrata previously prepared its financial information) and IFRS differ in certain relevant respects from Canadian GAAP. For a discussion of certain significant differences between UK GAAP and Canadian GAAP and IFRS and Canadian GAAP, see paragraph 2.3 of Part IV – "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group – Principal differences in the application of Xstrata's accounting policies and those applied by Falconbridge" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

Unless otherwise indicated, EBITDA represents, when used in this document and the information incorporated by reference into this document in relation to the Xstrata Group, operating profit or loss from continuing operations before interest, taxation, depreciation and amortisation and, when used in this document and the information incorporated by reference into this document in relation to the Falconbridge Group, income generated from operating assets adding back depreciation, amortisation and accretion, less corporate and general administration costs and research, development and exploration costs. Although none of IFRS, UK GAAP or Canadian GAAP defines the measure EBITDA, it is a measure which is widely used in the natural resources sector to evaluate a company's operating performance. Nevertheless, EBITDA should not be considered in isolation or as a substitute for operating profit, cash flows from operating activities or any other measure for determining Xstrata's operating performance or liquidity that is calculated in accordance with IFRS or UK GAAP or the Falconbridge Group's operating performance or liquidity that is calculated in accordance with Canadian GAAP. As EBITDA is not a measure of performance defined by IFRS, UK GAAP or Canadian GAAP, it may not be comparable to similarly titled measures employed by other companies.

Currencies

In this document and the information incorporated by reference into this document, references to "Argentine pesos" or "ARS" are to the lawful currency of Argentina, references to "Australian dollars" or "A$" are to the lawful currency of Australia, references to "Canadian dollars", "C$" or "Cdn$" are to the lawful currency of Canada, references to "Colombian pesos" are to the lawful currency of Colombia, references to "Euro" or "€" are to the currency introduced at the start of the third stage of European economic and monetary union pursuant to the Treaty establishing the European Community, as amended, references to the "Peruvian Sol" are to the lawful currency of Peru, references to "Rand" or "ZAR" are to the lawful currency of South Africa, references to "CHF" are to the lawful currency of Switzerland, references to "£" are to the lawful currency of the United Kingdom and references to "US dollars", "US Dollars", "US$", "$US" or "cents" are to the lawful currency of the United States.

Unless otherwise indicated in this document and/or the information incorporated by reference into this document, the financial information contained in this document and the information incorporated by reference into this document has been presented in US dollars. In addition, solely for convenience, this document and the information incorporated by reference into this document contain translations of relevant currencies to US dollars. These translations should not be construed as representations that the relevant currency could be converted into US dollars at the rate used or at any other rate.

Ore reserve and mineral resource reporting – basis of preparation

Unless otherwise indicated in this document and/or the information incorporated by reference into this document, all mineral reserves and mineral resources information reproduced in this document and the information incorporated by reference into this document in respect of the Falconbridge Group has been prepared for the Falconbridge Group, has been extracted without material amendment from information included in public documents filed by the Falconbridge Group only and has not, for the purposes of this document or the information incorporated by reference into this document, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. See – "Presentation of information on the Falconbridge Group" above and the risk factor "Lack of due diligence access to Falconbridge" in Part II – "Risk Factors" in the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

According to information included in public documents filed by the Falconbridge Group, unless otherwise indicated in this document and/or the information incorporated by reference into this document, all estimates of mineral reserves and

mineral resources reproduced in this document and the information incorporated by reference into this document in respect of the Falconbridge Group:

- have been estimated by or on behalf of the Falconbridge Group in accordance with the CIM Definition Standards on Mineral Resources and Reserves, adopted by the CIM Council on 14 November 2004, and the CIM Estimation of Mineral Resources and Mineral Reserves Best Practice Guidelines, adopted by the CIM Council on 23 November 2003 using geostatistical or classical methods, plus economic and mining parameters appropriate to each operation;

- were compiled, indirectly supervised and verified on behalf of the Falconbridge Group by Chester Moore who was, at 22 March 2006 (being the date of Falconbridge's 2005 Annual Information Form), Falconbridge's Director, Mineral Reserve Estimation and Reporting, a member of the Professional Geoscientists of Ontario with over 30 years of experience as a geologist and a qualified person as defined in NI 43-101;

- are shown on a 100% basis; and

- used the following long-term metal prices for estimates: nickel US$3.25/lb, copper US$0.90/lb, zinc US$0.50/lb with a nickel premium added at Sudbury operations. (Exchange rate of C$1.50 to US$1.00).

According to information included in public documents filed by the Falconbridge Group, there were, at 22 March 2006 (being the date of Falconbridge's 2005 Annual Information Form), no environmental, permitting, legal, taxation, political or other relevant issues known to the Falconbridge Group that would materially affect the estimates of mineral reserves and mineral resources reproduced in this document and the information incorporated by reference into this document in respect of the Falconbridge Group.

Unless otherwise indicated, in this document and the information incorporated by reference into this document, mineral reserves and mineral resources information in relation to the Falconbridge Group is reported as at 31 December 2005.

Nothing in this paragraph headed "Ore reserve and mineral resource reporting – basis of preparation" is intended to qualify the statements in paragraph 1 of Part VI – "Additional Information – Responsibility".

Rounding

Certain figures included in this document and the information incorporated by reference into this document have been subject to rounding adjustments. Accordingly, discrepancies in tables between the totals and the sums of the relevant amounts are due to rounding.

Expected Timetable of Principal Events

The following is the expected timetable of principal events in relation to the Proposed Acquisition:

Commencement of the Xstrata Offer	**18 May 2006**
Previous Extraordinary General Meeting in relation to the Proposed Acquisition	**30 June 2006**
Announcement of extension of Expiry Time to 21 July 2006	**7 July 2006**
Announcement of increase in the offer price under the Xstrata Offer from C$52.50 to C$59.00 in cash per Falconbridge Share	**11 July 2006**
Announcement of increase in the offer price under the Xstrata Offer from C$59.00 to C$62.50 in cash per Falconbridge Share and provision that the consideration under the Xstrata Offer will not be reduced by the C$0.75 Falconbridge Special Dividend	**19 July 2006**
Expected latest time and date for receipt of Forms of Proxy and receipt of electronic proxy appointments via the CREST system in relation to the Extraordinary General Meeting	**10.30 a.m. (11.30 a.m. Central European Summer Time) on Saturday, 12 August 2006**
Extraordinary General Meeting in relation to the Proposed Acquisition	**10.30 a.m. (11.30 a.m. Central European Summer Time) on Monday, 14 August 2006**
Earliest expected completion date of the Proposed Acquisition	**14 August 2006[1]**

Note:

(1) The period during which the Xstrata Offer is open for acceptance may be extended by the Offeror in certain circumstances.

References to times in this document are to British Summer Time unless otherwise stated.

The following documentation, which was sent to Shareholders at the relevant time and/or is available as described below, contains information which is relevant to the Proposed Acquisition:

1. The Circular

   The Circular dated 30 June 2006 issued by the Company in connection with the Proposed Acquisition. This contains, amongst other things:

   (a) a letter from the Chairman of Xstrata, including, amongst other things, details of, background to and reasons for, the Proposed Acquisition;

   (b) a section containing a discussion of certain risk factors to be taken into account when considering whether to vote in favour of the resolutions passed at the Previous Extraordinary General Meeting;

   (c) a section containing information on the Falconbridge Group;

   (d) a section containing information on the expected impact of the Proposed Acquisition on the assets, liabilities and earnings of the Enlarged Group; and

   (e) a section containing the principal terms of the Proposed Acquisition at the date of the Circular.

2. Annual Reports and Accounts for the three financial years ended 31 December 2003, 31 December 2004 and 31 December 2005.

   These contain the audited consolidated financial statements of Xstrata for the financial years ended 31 December 2003 and 31 December 2004 prepared in accordance with UK GAAP and the audited consolidated financial statements of Xstrata for the financial year ended 31 December 2005 prepared in accordance with IFRS, together with audit reports in respect of each such year.

3. The Cerrejón Circular

   The Cerrejón Circular dated 23 March 2006 issued by the Company in connection with the Cerrejón Acquisition. This contains, amongst other things:

   (a) a letter from the Senior Independent Director of Xstrata, including, amongst other things, details of, background to and reasons for, the Cerrejón Acquisition;

   (b) a section containing information on Cerrejón;

   (c) a section containing the principal terms of the Cerrejón Acquisition; and

   (d) a section containing a description of the Xstrata Group's relationship with Glencore.

Documentation incorporated by reference into this document

The following sections of the Circular, the Annual Reports and Accounts and the Cerrejón Circular are incorporated by reference into this document so as to provide information in respect of the Proposed Acquisition, to provide information required by the Listing Rules, to provide historical financial information on Xstrata as background to the sections of this document and the Circular entitled "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group" and to provide information in respect of the Cerrejón Acquisition and the Relationship Agreement.

Note

* Page 52 of the Cerrejón Circular refers to Messrs. Strothotte, Glasenberg and Issroff being the Glencore International Nominees. Mr. Issroff resigned as a director of the Company with effect from 10 May 2006. Messrs. Strothotte and Glasenberg are currently the only Glencore International Nominees on the board of directors of the Company.

Copies of the above documents are available:

(a) on the Company's website (www.xstrata.com). Except to the extent expressly set out above in this section "Relevant Documentation", neither the content of the Company's website (or any other website) nor the content of any website accessible from hyperlinks on the Company's website (or any other website) is incorporated into, or forms part of, this document; and

(b) as provided in paragraph 13 of Part VI – "Additional Information – Documents available for inspection" of this document.

Offer Document and Variation Documents

Copies of the Offer Document and the Variation Documents do not accompany this document and the information in the Offer Document and the Variation Documents is not incorporated by reference into this document. Nevertheless copies of the Offer Document and each of the Variation Documents can be obtained from Xstrata's registered office in London at 4th Floor, Panton House, 25/27 Haymarket, London SW1Y 4EN, from Xstrata's head office in Switzerland at Bahnhofstrasse 2, 6301 Zug, Switzerland, from Xstrata's website at www.xstrata.com or as provided in paragraph 13 of Part VI – "Additional Information – Documents available for inspection" of this document.

The Offer Document (as amended and varied by the Variation Documents) contains the terms and conditions of the Xstrata Offer. A summary of the principal terms of the Xstrata Offer is set out in this document in Part V – "Principal Terms of the Proposed Acquisition" which supplements and amends Part V – "Principal Terms of the Proposed Acquisition" of the Circular (which has been incorporated by reference into this document as described above).

20 July 2006

To Shareholders and, for information only, to participants in the Xstrata Share Schemes

Dear Shareholder,

Proposed Acquisition of Falconbridge Limited

1. *Introduction and overview*

Xstrata announced on 17 May 2006 its offer to acquire (through an indirect wholly-owned subsidiary) all of the issued and outstanding common shares of Falconbridge Limited ("Falconbridge") not already owned by the Xstrata Group for C$52.50 in cash per Falconbridge Share, or approximately C$16.1 billion in total (approximately US$14.6 billion). Xstrata announced on 11 July 2006 that its offer would be increased to C$59.00 in cash per Falconbridge Share, or approximately C$18.1 billion in total (approximately US$16.2 billion). On 19 July 2006, Xstrata announced that its offer would be further increased to C$62.50 in cash per Falconbridge Share, or approximately C$19.2 billion in total (approximately US$16.9 billion). At the same time Xstrata announced that the Offeror will amend the Xstrata Offer to provide that the consideration under the Xstrata Offer will not be reduced by the amount of the special cash dividend of C$0.75 per Falconbridge Share declared by the board of directors of Falconbridge on 16 July 2006 and payable by Falconbridge on 10 August 2006 to Falconbridge Shareholders of record at the close of business on 26 July 2006.

The Increased Xstrata Offer, together with the Falconbridge Special Dividend, values the total common share capital of Falconbridge at approximately C$24.1 billion (approximately US$21.2 billion). The Xstrata Group will also assume Falconbridge's net debt on completion of the Proposed Acquisition, which was US$2,814 million as at 30 April 2006, as disclosed in Falconbridge's unaudited results announcement for the month ended 30 April 2006.

The Xstrata Group currently beneficially owns 73,665,996 Falconbridge Shares, representing approximately 19.8% of the outstanding Falconbridge Shares, which were acquired at a price of C$28 per share in August and September 2005. If the Increased Xstrata Offer is successful, this will bring the weighted average price paid per Falconbridge Share (including the payment by Falconbridge of the Falconbridge Special Dividend) to approximately C$56.44 or a total of approximately C$21.5 billion (approximately US$18.8 billion). To the extent that the Falconbridge Special Dividend is paid by Falconbridge,

Falconbridge's cash will decrease and the amount of Falconbridge net debt assumed by Xstrata on completion of the Proposed Acquisition will increase by a corresponding amount of any such payment. Xstrata estimates, based on publicly available information, that the amount to be paid in respect of the Falconbridge Special Dividend is up to approximately C$285 million (approximately US$251 million) using the weighted average number of Falconbridge Shares of approximately 379,774,000 on a fully-diluted basis for the month ended 30 April 2006. Falconbridge is likely to be required to pay a break fee of up to US$450 million to Inco, and, in the event that this is payable by Falconbridge to Inco, the amount of Falconbridge net debt assumed by Xstrata on completion of the Proposed Acquisition will also increase by an amount equivalent to the break fee. The Directors believe that the Proposed Acquisition by means of the Increased Xstrata Offer (after taking account of the Falconbridge Special Dividend) will be substantially earnings per share and cash flow per share accretive in the first full year of consolidation.

Amongst other things, the Proposed Acquisition is conditional upon the passing of the Resolution to be proposed at the Extraordinary General Meeting and approval under the Investment Canada Act.

The Proposed Acquisition will be financed through committed bank debt facilities which have been supplemented in connection with the Increased Xstrata Offer. Xstrata remains committed, if the Proposed Acquisition completes, to undertake one or more equity capital raisings to refinance part of the debt facilities. Deutsche Bank and JPMSL remain committed to underwrite, each as to 50% and subject to the terms of the Standby Equity Underwriting Letter, one or more equity offerings to raise such amount as is required to pay or repay any amounts then outstanding under the Equity Bridge Facility Agreement, under which up to US$7.0 billion is available to the Xstrata Group, together with costs and expenses. The timing and terms of any such equity offering or offerings will be based on an assessment of the Enlarged Group's capital structure following the successful acquisition of Falconbridge. Critical to the Company's assessment will be the maintenance of an investment grade credit rating. The Directors remain confident that any rights issue will be fully supported by Glencore International AG ("Glencore International") and Credit Suisse Securities (Europe) Limited ("CSSEL"), Xstrata's two largest shareholders.

Xstrata has received irrevocable undertakings from Glencore International and CSSEL to vote in favour of the Resolution to be proposed at the Extraordinary General Meeting. In aggregate, these undertakings are given in respect of 252,601,000 Ordinary Shares representing approximately 35.84% of Xstrata's current issued ordinary share capital.

The purpose of this document is to provide you with details of, the background to and the reasons for, the Increased Xstrata Offer, to explain why the Board of Directors believes that the Proposed Acquisition and the Increased Xstrata Offer are in the best interests of the Company and its Shareholders as a whole and, following the making of the Increased Xstrata Offer, to seek your further approval for the Proposed Acquisition. A notice convening the Extraordinary General Meeting of the Company is set out at the end of this document.

2. Information on Xstrata

Details of the development and delivery of Xstrata's strategy and a current trading update as at the date of the Circular are set out in paragraph 2 of Part I – "Letter from the Chairman" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

Since publication of the Circular, Xstrata has continued to trade very satisfactorily. The Tintaya Acquisition completed on 21 June 2006 expanding Xstrata Copper's current production portfolio with an additional 120,000 tonnes of copper in cathode and concentrate per annum and strengthening the Xstrata Group's strategic position in southern Peru. Further acquisition opportunities remain under active review. On 6 July 2006, Xstrata and African Rainbow Minerals Limited ("ARM") jointly announced that all regulatory conditions precedent had been met relating to the transaction between the Xstrata Group and ARM to establish a new black controlled coal mining company, ARM Coal (Proprietary) Limited, with operating assets and growth projects in South Africa and participation in the export and domestic thermal coal markets.

3. The Proposed Acquisition

Background to, and details of, the Proposed Acquisition are set out in paragraph 3 of Part I – "Letter from the Chairman – The Proposed Acquisition" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

The principal developments in relation to the Proposed Acquisition since the publication of the Circular on 30 May 2006 are as follows:

Regulatory and Shareholder approvals for the Proposed Acquisition

On 14 June 2006, Xstrata announced that the US Department of Justice had confirmed that there are no US competition issues with respect to the Proposed Acquisition. On 15 June 2006, Xstrata announced that it had received Canadian competition clearance for the Proposed Acquisition following receipt of an advance ruling certificate from the Canadian Competition Bureau. On 13 July 2006, Xstrata announced that the Proposed Acquisition had been cleared unconditionally by the European Commission. The Offeror is therefore free to proceed with the Proposed Acquisition without further anti-trust reviews.

On 30 June 2006, Shareholders approved each of the resolutions proposed at the Previous Extraordinary General Meeting, being the resolutions set out in the Previous EGM Notice to:

(a) approve the Proposed Acquisition;

(b) increase the authorised share capital of the Company;

(c) renew the authority of the directors of the Company to allot relevant securities of the Company for the purposes of section 80 of the Companies Act; and

(d) authorise the directors of the Company to allot equity securities for cash pursuant to the authority referred to in paragraph (c) above as if section 89(1) of the Companies Act did not apply to such allotment.

The resolutions referred to in paragraphs (a) to (c) above, the passing of each of which was a condition of the original Xstrata Offer, were passed unanimously on a show of hands following the receipt of proxies under which over 99% of all votes were in favour of each of the resolutions.

On 3 July 2006, Xstrata advised that it had been informed by the Investment Review Division of Industry Canada that the Minister responsible for the Investment Canada Act (the "Minister") was unable to complete the consideration of Xstrata's investment in connection with the Proposed Acquisition within the initial 45-day period. As prescribed by the Investment Canada Act, the Minister therefore extended the review period for up to a further 30 days (or such other period as may be agreed) from 3 July 2006.

Other recent developments concerning the Proposed Acquisition

In a directors' circular dated 31 May 2006 relating to the original Xstrata Offer, the Falconbridge board of directors determined that the original Xstrata Offer was not a "superior proposal" under the terms of the Inco Support Agreement. The Falconbridge board of directors also stated in the directors' circular that it continued to recommend that Falconbridge Shareholders accept the Inco Offer. The Falconbridge board of directors elected to make no recommendation with respect to the original Xstrata Offer.

On 27 June 2006, a three-member panel of the Ontario Securities Commission (the "OSC") conducted a hearing relating to the application by Xstrata to terminate Falconbridge's Shareholder Rights Plan. The panel issued its decision on 30 June 2006 to the effect that the Shareholder Rights Plan be cease traded on the earlier of the date that: (a) the Offeror takes up sufficient Falconbridge Shares pursuant to the Xstrata Offer to satisfy the condition of the Xstrata Offer (prior to its deletion under the Second Xstrata Notice of Variation) that at least a majority of the Falconbridge Shares then outstanding (calculated on a fully diluted basis), the votes attached to which would be included in the minority approval of a second step business combination or going private transaction pursuant to Rule 61-501 and Regulation Q-27, have been validly deposited to the Xstrata Offer and not withdrawn (the "Majority of the Minority Condition"); and (b) 28 July 2006. The panel also ordered that the Offeror be precluded from exercising its right as stated in the original Xstrata Offer to acquire

up to 5% of the Falconbridge Shares through normal course purchases on the Toronto Stock Exchange in accordance with applicable securities laws, until the earlier of the date on which the Offeror takes up sufficient Falconbridge Shares to satisfy the Majority of the Minority Condition and 28 July 2006.

Xstrata filed an application against Falconbridge on 28 June 2006 with the Superior Court of Justice (Ontario), alleging that Falconbridge violated the OBCA (as defined in the section of this document headed "Definitions and Glossary of Technical Terms – Definitions") when it postponed its annual meeting of shareholders until October 2006. The application was dismissed on 30 June 2006.

The Offeror issued the Xstrata Notice of Extension, dated 7 July 2006, relating to the extension of the Xstrata Offer to 8:00 p.m. (Toronto time) on 21 July 2006.

The Offeror issued the First Xstrata Notice of Variation on 11 July 2006, which increased the cash consideration payable under the Xstrata Offer from C$52.50 to C$59.00 per Falconbridge Share, removed the condition that 66⅔% of the Falconbridge Shares outstanding (on a fully diluted basis) be deposited and not withdrawn at the Expiry Time of the Xstrata Offer and further extended the Expiry Time to midnight (Vancouver time) on 21 July 2006.

On 16 July 2006, Falconbridge announced the declaration by its board of directors of the Falconbridge Special Dividend.

In a notice of change dated 17 July 2006 to its directors' circulars relating to the Inco Offer and the Xstrata Offer as at the date of the notice of change, the board of directors of Falconbridge unanimously recommended that Falconbridge Shareholders accept the amended Inco Offer and that Falconbridge Shareholders not accept the Xstrata Offer as at the date of the notice of change. In the notice of change, Falconbridge indicated that under the Inco Support Agreement, the Falconbridge board of directors remains able to respond, in accordance with its fiduciary duties, to unsolicited proposals that are more favourable from a financial point of view than the amended Inco Offer.

On 19 July 2006, Xstrata announced that, under the Second Xstrata Notice of Variation, the consideration under the Xstrata Offer would be further increased from C$59.00 to C$62.50 per Falconbridge Share, the Minimum Tender Condition would be deleted (so that the Offeror may take up any or all Falconbridge Shares under the Xstrata Offer), the consideration under the Xstrata Offer would not be reduced by the amount of the Falconbridge Special Dividend, the Xstrata Offer would be made conditional on further Shareholder approval of the Proposed Acquisition at the EGM and the Expiry Time would be further extended to 8:00 p.m. (Toronto time) on 14 August 2006.

The Directors remain confident that the acquisition of Falconbridge by the Xstrata Group will deliver significant benefits to the operations, employees and stakeholders of Falconbridge. Given the Xstrata Group's stated growth strategy, the Directors continue to believe the Xstrata Group's position as a major and long-term direct investor in its Canadian businesses will deliver significant net benefits to Canada. The Directors therefore expect to receive the necessary approval under the Investment Canada Act prior to the Expiry Time of the Xstrata Offer.

The Directors believe that Xstrata's all cash offer is a superior offer for Falconbridge Shareholders to the revised offer that Inco has proposed, offering them a compelling opportunity to realise a guaranteed cash value, with no market risk.

Recent developments concerning the Inco Offer for Falconbridge

On 7 June 2006, Falconbridge and Inco announced that they had reached a definitive agreement with LionOre Mining International Ltd. ("LionOre") covering the sale to LionOre of certain assets and related operations of Falconbridge, including Falconbridge's Nikkelverk refinery in Norway and the Falconbridge marketing and custom feed organisations that market and sell the finished nickel and other products produced at Nikkelverk and obtain third party feeds for this facility (the "Falconbridge Divested Assets"). In addition, the sale would include an agreement to supply up to 60,000 tonnes of nickel-in-matte annually, approximately equivalent to the current volume of feed provided by Falconbridge's operations to this refinery, for up to ten years. The closing of the sale of the Falconbridge Divested Assets is conditional on, amongst other things, the clearance by the US Department of Justice and the European Commission of the Inco Offer and Inco having acquired more than 50% (on a fully diluted basis) of the Falconbridge Shares pursuant to the Inco Offer or otherwise. Xstrata understands, therefore, that Falconbridge will not be obliged to sell the Falconbridge Divested Assets to LionOre if the Xstrata Group acquires Falconbridge under the Proposed Acquisition. The purchase price agreed to be paid by LionOre for the assets and related operations agreed to be sold is US$650 million (subject to certain adjustments).

On 9 June 2006, Xstrata advised Inco that it had determined that it did not intend to tender the Falconbridge Shares the Xstrata Group owns to the Inco Offer and that Xstrata had also determined that if Inco does ultimately take up and pay for Falconbridge Shares deposited under the Inco Offer and proceeds to complete a subsequent acquisition transaction to acquire the Falconbridge Shares that are not deposited under the Inco Offer, the Offeror intends to exercise the statutory right to dissent and demand payment in cash of the fair value of the Falconbridge Shares held by the Xstrata Group.

On 23 June 2006, Inco announced that it received formal clearance from the US Department of Justice for Inco's proposed acquisition of Falconbridge through "early termination" of the applicable waiting period under the HSR Act (as defined in the section of this document headed "Definitions and Glossary of Technical Terms – Definitions") in view of the commitment by Inco and Falconbridge to sell the Falconbridge Divested Assets.

Inco disclosed in filings with the SEC that, in response to Teck Cominco's unsolicited offer to acquire all of the outstanding Inco shares, the board of directors of Inco authorised the entering into of discussions and negotiations with third parties for the purpose of exploring strategic alternatives. Subsequently, Inco held discussions with a number of third parties, including Phelps Dodge Corporation ("Phelps Dodge"), with respect to possible strategic alternatives in connection with the Inco Offer and the Teck Offer. As a result of its discussions and eventual negotiations with Phelps Dodge, on 26 June 2006, Inco and Phelps Dodge announced that they had entered into a combination agreement, pursuant to which Phelps Dodge agreed to acquire all of the outstanding Inco shares by way of a statutory plan of arrangement for C$17.50 in cash and 0.672 common shares of Phelps Dodge for each Inco share, assuming full pro-ration (amended on 16 July 2006 to C$20.25 in cash and 0.672 common shares of Phelps Dodge for each Inco share, as described below). The Phelps Dodge Inco Combination is subject to, amongst other things, the approval of Inco shareholders, Phelps Dodge shareholders and the Superior Court of Justice (Ontario).

Also on 26 June 2006, in connection with the Phelps Dodge Inco Combination, Inco announced that it would increase its offer for each Falconbridge Share to C$17.50 in cash and 0.55676 common shares of Inco, assuming full pro-ration. Phelps Dodge agreed to purchase up to US$3.0 billion aggregate principal amount of Inco convertible subordinated notes only to the extent that Inco requires the proceeds of the notes for the acquisition of the Falconbridge Shares under the Inco Offer and/or satisfaction of the obligations of Inco and Falconbridge to any Falconbridge Shareholders who properly exercise dissent rights in respect of a compulsory acquisition or subsequent acquisition transaction conducted following the Inco Offer and demand that fair value be paid in cash.

Inco issued a notice of variation and extension, dated 29 June 2006, relating to the increase in the consideration under the Inco Offer in connection with the Phelps Dodge Inco Combination and the extension of the Inco Offer to 8:00 p.m. (Toronto time) on 13 July 2006. Falconbridge issued a notice of change to directors' circular, also dated 29 June 2006, in which the Falconbridge board of directors unanimously recommended that Falconbridge Shareholders accept the Inco Offer, as amended.

On 4 July 2006, Inco announced that the Inco Offer had been cleared by the European Commission and that it had therefore satisfied the final outstanding regulatory condition to the Inco Offer. The European Commission clearance is conditioned on the same remedy agreed upon with the US Department of Justice, which consists of the sale of the Falconbridge Divested Assets.

On 7 July 2006, following the extension of the Xstrata Offer on the same date, Falconbridge reiterated its recommendation of the Inco Offer and urged Falconbridge Shareholders to tender their shares to the Inco Offer.

On 12 July 2006, Phelps Dodge announced it had received notification that the US Department of Justice and the US Federal Trade Commission had granted early termination of the waiting period under the HSR Act relating to Phelps Dodge's proposed acquisition of Inco.

On 13 July 2006, Inco announced that it would extend the expiry time of the Inco Offer until midnight (Vancouver time) on 24 July 2006. Inco stated in its announcement that it did not expect the minimum tender condition under the Inco Offer to be satisfied prior to the previous expiry time of the Inco Offer of 8:00 p.m. (Toronto time) on 13 July 2006 and that, accordingly, Inco had not yet taken up any of the Falconbridge Shares deposited under the Inco Offer. Inco mailed a formal notice of extension dated 13 July 2006 to Falconbridge Shareholders.

On 16 July 2006, Phelps Dodge, Inco and Falconbridge announced that Phelps Dodge had increased the cash portion of the consideration to be paid to the shareholders of Inco in the Phelps Dodge Inco Combination by C$2.75 per Inco share, that Inco had increased the cash portion of the Inco Offer for Falconbridge by C$1.00 per Falconbridge Share and that the Falconbridge board of directors had declared the Falconbridge Special Dividend. Under the further revised Inco Offer, Inco is offering C$18.50 plus 0.55676 shares of Inco for each Falconbridge Share, assuming full pro-ration of the consideration. The announcement also stated that the board of directors of Falconbridge had unanimously determined that the further revised Inco Offer was superior to the Xstrata Offer at the time of the announcement and unanimously recommended that Falconbridge Shareholders accept the Inco Offer.

In addition, the announcement stated that Inco had reduced the minimum condition in the Inco Offer from two thirds of the outstanding shares of Falconbridge to 50.01% of such outstanding shares on a fully-diluted basis and that Phelps Dodge and Inco had also amended the Phelps Dodge Inco Combination Agreement so that the combination of Phelps Dodge and Inco may be consummated before the acquisition by Inco of 100% of Falconbridge. The waiver and amendment agreement dated 16 July 2006 between Phelps Dodge and Inco in respect of the Phelps Dodge Inco Combination Agreement added a new condition precedent to the Phelps Dodge Inco Combination in favour of Phelps Dodge that provided that Inco shall have acquired at least 50.01% of the Falconbridge Shares under the Inco Offer and, if Inco shall have acquired at least two-thirds of the Falconbridge Shares, Inco shall have completed a subsequent acquisition transaction in order to acquire any remaining Falconbridge Shares, or that the Inco Support Agreement shall have been terminated in accordance with its terms without Inco having acquired any Falconbridge Shares under the Inco Offer. On 16 July 2006, Inco also extended the expiry time of the Inco Offer to midnight (Vancouver time) on 27 July 2006 and amended the Inco Offer to provide that the consideration under the Inco Offer would not be reduced by the amount of the Falconbridge Special Dividend.

In a notice of change dated 17 July 2006 to its directors' circulars relating to the Inco Offer and the Xstrata Offer as at the date of the notice of change, the board of directors of Falconbridge unanimously recommended that Falconbridge Shareholders accept the amended Inco Offer and that Falconbridge Shareholders not accept the Xstrata Offer as at the date of the notice of change.

Recent developments concerning the Teck Offer for Inco
In a directors' circular dated 29 May 2006, Inco's board of directors unanimously recommended that Inco shareholders reject the Teck Offer.

On 14 June 2006, Teck Cominco announced that it had received Canadian and United States anti-trust clearance for the Teck Offer to proceed. On 14 June 2006, Teck also announced that its Class B subordinate voting shares had begun trading on the New York Stock Exchange.

On 7 July 2006, Teck Cominco announced that it had received notice of non-opposition from the European Commission with respect to the Teck Offer and that Teck Cominco had therefore received all necessary anti-trust clearances for the Teck Offer to proceed.

On 14 July 2006, the Ontario Securities Commission issued a notice of hearing to consider an application by Teck Cominco for a permanent order that trading cease in respect of any securities issued or to be issued in connection with Inco's shareholder rights plan and that prospectus exemptions in connection with the distribution and exercise of rights issued under the Inco shareholder rights plan be removed, with the hearing scheduled to take place on 21 July 2006.

4. Information on Falconbridge

Information on Falconbridge and the Falconbridge Group is set out in paragraph 4 of Part I – "Letter from the Chairman – Information on Falconbridge" and Part III – "Information on the Falconbridge Group" of the Circular (which have been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and in paragraph 3 of this Part I above and Part III – "Information on the Falconbridge Group" of this document.

See "Presentation of Information – Presentation of information on the Falconbridge Group" in this document and the risk factor "Lack of due diligence access to Falconbridge" in Part II – "Risk Factors" in the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

5. Benefits and financial impact of the Proposed Acquisition

Information on the benefits and financial impact of the Proposed Acquisition is set out in paragraph 5 of Part I – "Letter from the Chairman – Benefits and financial impact of the Proposed Acquisition" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

Benefits of the Proposed Acquisition

The Directors remain confident that a combination of Xstrata and Falconbridge has a strong strategic rationale. The Board continues to believe that there are substantial benefits to be gained from a combination of the two businesses and that the transaction would be in the best interests of both Xstrata and Falconbridge and of their respective shareholders, customers and employees.

Xstrata's increased offers for Falconbridge underline the Directors' belief that the combination of Xstrata and Falconbridge represents an excellent opportunity to create an outstanding global mining company, ideally positioned to create further value for all stakeholders through active involvement in the ongoing consolidation of the industry.

The Directors believe that the Proposed Acquisition by means of the Increased Xstrata Offer (after taking account of the Falconbridge Special Dividend) will be substantially earnings per share and cash flow per share accretive in the first full year of consolidation and that the Enlarged Group will benefit from enhanced critical mass, leading market positions in major commodities, a range of growth opportunities, best in class diversification of earnings and a robust financial position from which to pursue further organic and acquisition-led growth.

Xstrata has an excellent track record of support for, and co-operation with, local communities, sound labour relations, programmes to improve safety, environmental performance and efficiency at operations, long-term investment in operations and devolved responsibility to locally-based management teams. Accordingly, Xstrata believes that a combination of Falconbridge and Xstrata is the best outcome for all stakeholders of both companies.

The Enlarged Group following successful completion of the Proposed Acquisition

The Increased Xstrata Offer, together with the Falconbridge Special Dividend, values the total common share capital of Falconbridge at approximately C$24.1 billion (approximately US$21.2 billion). The Xstrata Group will assume Falconbridge's net debt on completion of the Proposed Acquisition, which was US$2,814 million as at 30 April 2006 (being Falconbridge's gross indebtedness of US$3,279 million (US$353 million current debt and US$2,926 million non-current debt) offset by cash or cash equivalents of US$465 million), as disclosed in Falconbridge's unaudited results announcement for the month ended 30 April 2006 and assuming the acquisition of all outstanding Falconbridge Shares not already owned by the Xstrata Group. To the extent that the Falconbridge Special Dividend is paid by Falconbridge, Falconbridge's cash will decrease and the amount of Falconbridge net debt assumed by Xstrata on completion of the Proposed Acquisition will increase by a corresponding amount of any such payment. Xstrata estimates, based on publicly available information, that the amount to be paid in respect of the Falconbridge Special Dividend is up to approximately C$285 million (approximately US$251 million) using the weighted average number of Falconbridge Shares of approximately 379,774,000 on a fully-diluted basis for the month ended 30 April 2006. Falconbridge is likely to be required to pay a break fee of up to US$450 million to Inco following termination of the Inco Support Agreement entered into in respect of the Inco Offer, including in the event that the Xstrata Offer is successful. Any such payment would also reduce Falconbridge's cash and increase Falconbridge's net debt by a corresponding amount. For further details in relation to this break fee, see paragraph 8.2(b) of Part VI – "Additional Information – Material contracts" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

See paragraph 7 of this Part I below in relation to the financing structure for the Proposed Acquisition and paragraphs 8.1(c) and 8.1(d) of Part VI – "Additional Information – Material contracts" of the Circular (which have been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and paragraph 8.1(b) of Part VI – "Additional Information – Material Contracts" of this document for details of the Xstrata Group's debt facilities available to the Xstrata Group in connection with the Proposed Acquisition.

On 31 May 2006, Falconbridge and Inco indicated that their operations personnel had jointly identified the potential to realise estimated average annual pre-tax operating and corporate synergies of approximately US$550 million, an increase of US$200 million from the estimated synergies at the time of the announcement of the original Inco Offer. Falconbridge

indicated that this increase in the synergies estimate was attributable to developed improvements in the Inco-Falconbridge integration plan and to changes in commodity price assumptions as a result of the improved commodity market outlook since October 2005 and that the net present value of the estimated annual average pre-tax run-rate operating and corporate synergies of US$550 million, using a 7% discount rate, was approximately US$3.5 billion on an after-tax basis.

Xstrata continues fully to support the Inco and Falconbridge synergy plan for the Sudbury basin nickel operations and continues to believe that a merger of Inco and Falconbridge is not a necessary requirement for achieving the Sudbury synergy plan. Xstrata remains fully committed to working with Inco and other key stakeholders to optimise the Sudbury operations in order to secure these synergies that Xstrata believes are critical to securing the long-term robustness and future viability of the Sudbury operations through more normalised nickel pricing environments.

The Board of Directors has taken into account, amongst other things, Falconbridge paying the Falconbridge Special Dividend and the likelihood of Falconbridge having to pay the break fee of up to US$450 million to Inco in reaching its decision to recommend that Shareholders vote in favour of the Proposed Acquisition. See paragraph 14 of this Part I.

6. Dividend policy

The Directors have hitherto adopted a progressive dividend policy which takes into account the underlying growth in earnings of the Xstrata Group, as well as its capital requirements and cash flows, whilst maintaining an appropriate level of dividend cover. Following completion of the Proposed Acquisition, Xstrata intends to maintain this dividend policy, increasing dividends broadly in line with underlying earnings growth.

7. Financing structure

Assuming the acquisition of all outstanding Falconbridge Shares not already owned by the Xstrata Group, the aggregate consideration payable by the Xstrata Group for the Proposed Acquisition is expected to be approximately C$19.2 billion (approximately US$16.9 billion) and will be financed through committed bank debt facilities.

Details of the financing structure of the Proposed Acquisition are set out in paragraph 7 of Part I – "Letter from the Chairman" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

In connection with the Increased Xstrata Offer, the syndicated loan arrangements have been supplemented.

Summaries of the principal terms of the syndicated loan arrangements and the Standby Equity Underwriting Letter are set out in paragraphs 8.1(c) to 8.1(e) of Part VI – "Additional Information – Material contracts" of the Circular (which have been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and a summary of the New Debt Underwriting Letter is set out in paragraph 8.1(b) of Part VI – "Additional Information – Material Contracts" of this document.

8. Irrevocable undertakings

Glencore International and CSSEL have irrevocably undertaken to vote in favour of the Resolution to be proposed at the EGM. In aggregate, these undertakings are given in respect of 252,601,000 Ordinary Shares representing approximately 35.84% of Xstrata's current issued ordinary share capital.

9. Principal terms of the Proposed Acquisition

The Xstrata Offer is being effected by means of a tender offer to Falconbridge Shareholders. The Offeror, a wholly-owned indirect subsidiary of Xstrata, is offering, upon and subject to the terms and conditions of the Xstrata Offer, to purchase all of the issued and outstanding Falconbridge Shares, at a price of C$62.50 in cash per Falconbridge Share, other than the Falconbridge Shares already owned by the Xstrata Group. Under the Second Xstrata Notice of Variation, the Offeror will amend the Xstrata Offer to provide that the consideration under the Xstrata Offer will not be reduced by the amount of the Falconbridge Special Dividend.

The Xstrata Offer (as amended and varied under the Variation Documents) will remain conditional upon, amongst other things:

- approval under the Investment Canada Act;

- following the making of the Increased Xstrata Offer, Xstrata Shareholders having approved the Proposed Acquisition at the Extraordinary General Meeting; and
- the Offeror having determined in its sole judgment that, amongst other things, Falconbridge's Shareholder Rights Plan does not provide rights to Falconbridge Shareholders to purchase any securities of Falconbridge as a result of the Xstrata Offer and does not and will not adversely affect the Xstrata Offer, the Offeror or Xstrata, either before or on consummation of the Xstrata Offer.

Under the Second Xstrata Notice of Variation, the Minimum Tender Condition of the original Xstrata Offer will be deleted so that under the Increased Xstrata Offer the Offeror may take up any or all Falconbridge Shares.

A summary of the principal terms of the Proposed Acquisition and the Xstrata Offer, and details of the purpose of the Xstrata Offer and plans for Falconbridge, are set out in Part V – "Principal Terms of the Proposed Acquisition" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and Part V – "Principal Terms of the Proposed Acquisition" of this document.

10. Risk factors

For a discussion of certain risk factors which should be taken into account when considering whether to vote in favour of the Resolution, see Part II – "Risk Factors" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and Part II – "Risk Factors" of this document.

11. Extraordinary General Meeting

Xstrata is required under the Listing Rules to obtain further Shareholder approval of the Proposed Acquisition as the increase in the price offered per Falconbridge Share under the Increased Xstrata Offer constitutes a material change to the terms of the Class 1 acquisition previously approved by Shareholders. **A notice convening an extraordinary general meeting of the Company to be held at Congress Center Metalli, Parkhotel Zug, 6300 Zug, Switzerland at 11.30 a.m. (Central European Summer Time) on Monday, 14 August 2006 is set out at the end of this document.** You may also attend the Extraordinary General Meeting at the registered office of the Company, 4th Floor, Panton House, 25/27 Haymarket, London SW1Y 4EN, UK, where a satellite meeting linked by video conference to the Zug meeting will be held concurrently at 10.30 a.m. (British Summer Time). A Form of Proxy to be used in connection with the Extraordinary General Meeting is enclosed with this document. The purpose of the Extraordinary General Meeting is to seek Shareholders' approval of the Resolution set out in the EGM Notice.

The Resolution will propose to approve the Proposed Acquisition. Following the making of the Increased Xstrata Offer, the Proposed Acquisition is conditional, amongst other things, upon the passing of the Resolution.

The Resolution will be proposed as an ordinary resolution and, being an ordinary resolution, will be decided on a show of hands unless a poll is demanded in a manner permitted by the Company's Articles of Association. On a show of hands, each member present in person or by proxy has one vote. The passing of the Resolution requires a majority of the votes cast.

Only holders of Ordinary Shares may vote at the Extraordinary General Meeting.

12. Action to be taken

You will find enclosed a Form of Proxy for use in connection with the Extraordinary General Meeting. Whether or not you intend to be present at the meeting you are requested to complete the Form of Proxy (in accordance with the instructions printed thereon) and return it to the Company's registrars, Computershare Investor Services PLC, PO Box 1075, The Pavilions, Bridgwater Road, Bristol BS99 3FA, UK as soon as possible but in any event so as to arrive by no later than 10.30 a.m. (British Summer Time) (11.30 a.m. Central European Summer Time) on Saturday, 12 August 2006.

CREST members may also choose to utilise the CREST electronic proxy appointment service in accordance with the procedures set out in the EGM Notice.

The lodging of the Form of Proxy (or the electronic appointment of a proxy) will not preclude you from attending the meeting and voting in person if you so wish.

13. Further information

Your attention is drawn to the further information contained in Parts II to VI of this document and to the information incorporated by reference into this document as described in the section of this document headed "Relevant Documentation".

You are advised to read the whole of this document and the information incorporated by reference into this document as described in the section of this document headed "Relevant Documentation", and not to rely solely on the information in this letter.

14. Recommendation

The Directors have received financial advice from Deutsche Bank and JPMorgan Cazenove in relation to the Proposed Acquisition and the Increased Xstrata Offer. In providing advice to the Directors, Deutsche Bank and JPMorgan Cazenove have taken into account the Directors' assessments of the commercial merits of the Proposed Acquisition and the Increased Xstrata Offer.

The Board of Directors considers the Proposed Acquisition, the Increased Xstrata Offer and the Resolution to be in the best interests of the Company and the Shareholders of Xstrata as a whole and, accordingly, recommends Shareholders to vote in favour of the Resolution, as the Directors intend to do in respect of their own beneficial shareholdings held at the time of the EGM, amounting to 642,036 Ordinary Shares in aggregate at the date of this document, representing approximately 0.09% of Xstrata's current issued ordinary share capital.

15. Conclusion

The Directors continue to believe that the successful acquisition of Falconbridge will have a profound and positive impact on Xstrata's future performance. It will establish Xstrata with the critical mass, quality diversified portfolio and significant internal growth profile that will secure considerable additional value for all stakeholders in the future.

Yours sincerely

Willy Strothotte
Chairman

Part II

Risk Factors

[This page is intentionally left blank]

The Proposed Acquisition is subject to a number of risks. Accordingly, Shareholders should consider carefully all of the information set out in this document and the information incorporated by reference into this document, including, in particular, the risks described in Part II – "Risk Factors" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and below, prior to making any decisions on whether or not to vote in favour of the Resolution. Additional risks and uncertainties not presently known to the Directors, or that the Directors currently consider to be immaterial, may also have an adverse effect on the Xstrata Group, the Falconbridge Group and/or the Enlarged Group.

For risks and uncertainties relating to the business of the Falconbridge Group, Shareholders should carefully consider the information set out in Part II – "Risk Factors – Risks relating to the business of the Falconbridge Group" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation"), which is extracted from information published by the Falconbridge Group as part of its ongoing periodic reporting requirements under the securities laws of Canada and the United States and is extracted without material amendment from the Falconbridge Annual Information Form dated 22 March 2006. That information has not, for the purposes of the Circular or this document, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Nothing in the previous sentence is intended to qualify the statements in paragraph 1 of Part VI – "Additional Information – Responsibility" of this document. Xstrata and the Xstrata Directors have sought to ensure that such information has been accurately reproduced from such source and, so far as Xstrata is aware and is able to ascertain from information included in public documents filed by the Falconbridge Group, no facts have been omitted which would render the reproduced information inaccurate or misleading.

The Xstrata Group's and/or the Enlarged Group's business, financial condition or results of operations could be materially and adversely affected by any of the risks described in Part II – "Risk Factors" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and below. In such case, the market price of the Ordinary Shares may decline due to any of these risks and investors may lose all or part of their investment.

Borrowings

The Xstrata Group has, and, if the Proposed Acquisition completes, the Enlarged Group will have, a significant amount of indebtedness, which may impair the operating and financial flexibility of the Xstrata Group and/or the Enlarged Group and could adversely affect the business and financial position of the Xstrata Group and/or the Enlarged Group and the Company's ability to pay dividends.

The Xstrata Group has a substantial amount of debt and significant debt service obligations. As at 31 December 2005, the Xstrata Group had gross outstanding indebtedness of US$3,135.2 million. In connection with the Proposed Acquisition, US$19.0 billion will be available to the Xstrata Group under the New Acquisition Facilities Agreement, the New Debt Bridge Facility Agreement and the Equity Bridge Facility Agreement. The Xstrata Group's financing arrangements have been used to finance the Tintaya Acquisition and will be used to finance the Proposed Acquisition, to refinance the Cerrejón Bridge Facility Agreement and the First Existing Facility Agreement, to refinance certain existing indebtedness of Falconbridge and to provide working capital facilities for the Enlarged Group. Xstrata expects to assume the Falconbridge Group's existing net debt (which was US$2,814 million as at 30 April 2006, as disclosed in Falconbridge's unaudited results announcement for the month ended 30 April 2006) if the Proposed Acquisition completes. To the extent that the Falconbridge Special Dividend is paid by Falconbridge, Falconbridge's cash will decrease and the amount of Falconbridge net debt assumed by Xstrata on completion of the Proposed Acquisition will increase by a corresponding amount of any such payment. Xstrata estimates, based on publicly available information, that the amount to be paid in respect of the Falconbridge Special Dividend is up to approximately C$285 million (approximately US$251 million) using the weighted average number of Falconbridge Shares of approximately 379,774,000 on a fully-diluted basis for the month ended 30 April 2006. Falconbridge is likely to be required to pay a break fee of up to US$450 million to Inco following termination of the Inco Support Agreement entered into in respect of the Inco Offer, including in the event that the Xstrata Offer is successful. Any such payment would also reduce Falconbridge's cash and increase Falconbridge's net debt by a corresponding amount. Xstrata anticipates that its substantial leverage (including for the Enlarged Group) will continue for the foreseeable future.

For details of the debt financing arrangements in respect of the Proposed Acquisition, the Cerrejón Acquisition and the Tintaya Acquisition, see paragraphs 8.1(c), 8.1(d) and 8.1(g) of Part VI – "Additional Information – Material contracts" of the Circular (which have been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and, for details of the New Debt Underwriting Letter entered into in connection with

the Increased Xstrata Offer, see paragraph 8.1(b) of Part VI – "Additional Information – Material contracts" of this document.

For details of the Standby Equity Underwriting Letter, see paragraph 8.1(e) of Part VI – "Additional Information – Material contracts" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

For details of the break fee, see paragraph 8.2(b) of Part VI – "Additional Information – Material contracts" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

The Xstrata Group's and the Enlarged Group's substantial indebtedness has important consequences for Shareholders. For example, it could potentially:

- cause the Xstrata Group or the Enlarged Group to dedicate a substantial portion of cash flow from operations to payments to service debt, depending on the level of borrowings, prevailing interest rates and, to a lesser extent, exchange rate fluctuations, which reduces the funds available for working capital, capital expenditure, acquisitions and other general corporate purposes;
- curtail the Company's ability to pay dividends;
- limit the Xstrata Group's or the Enlarged Group's ability to borrow additional funds for working capital, capital expenditure, acquisitions and other general corporate purposes;
- limit the Xstrata Group's or the Enlarged Group's flexibility in planning for, or reacting to, changes in technology, customer demand, competitive pressures and the industries in which it operates;
- place the Xstrata Group or the Enlarged Group at a competitive disadvantage compared to its competitors that are less leveraged than it is; and
- increase the Xstrata Group's or the Enlarged Group's vulnerability to both general and industry specific adverse economic conditions.

Xstrata's existing debt facilities and the underwritten debt facilities available in connection with the Proposed Acquisition (as such facilities have been supplemented in connection with the Increased Xstrata Offer) contain a number of financial, operating and other obligations that limit the Xstrata Group's and the Enlarged Group's operating and financial flexibility. The Xstrata Group's and the Enlarged Group's ability to comply with these obligations depends on the future performance of their business.

Nothing in this paragraph headed "Borrowings" is intended to qualify the statement in paragraph 9 of Part VI – "Additional Information – Working capital" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

The Proposed Acquisition remains conditional and the conditions may not be satisfied

The Proposed Acquisition remains conditional, amongst other things, upon the passing of the Resolution to be proposed at the EGM, approval under the Investment Canada Act and a sufficient number of acceptances by Falconbridge Shareholders. There can be no assurance that these conditions will be satisfied and completion of the Proposed Acquisition will be achieved. In addition, the approval process under the Investment Canada Act may take a lengthy period to complete, which would delay the completion of the Proposed Acquisition.

In relation to approval under the Investment Canada Act, the Canadian Minister responsible for the Investment Canada Act may choose to prevent the Proposed Acquisition from taking place. Alternatively, the relevant Minister may permit the Proposed Acquisition but subject it to conditions, including the giving of certain undertakings by the Company. Although the Board is confident that the required approval will be obtained by the Expiry Time of the Xstrata Offer, there can be no assurance as to the timing or outcome of the approval processes, including the undertakings that may be required for approval.

See also "Market considerations – Possible volatility of the price of Ordinary Shares" in Part II – "Risk Factors" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

Deletion of the Minimum Tender Condition

If the Offeror and its affiliates hold 66⅔% or more of the Falconbridge Shares following the Xstrata Offer, Xstrata would have the ability to control the outcome of Falconbridge Shareholder votes relating to fundamental changes of Falconbridge, including with respect to a Subsequent Acquisition Transaction (as defined in the section of this document headed "Definitions and Glossary of Technical Terms – Definitions"). By amending and subsequently deleting the Minimum Tender Condition under the original Xstrata Offer under the First Xstrata Notice of Variation and the Second Xstrata Notice of Variation, however, the Offeror may acquire any number of Falconbridge Shares tendered to the Xstrata Offer. If the Offeror acquires Falconbridge Shares under the Xstrata Offer but holds, together with its affiliates, less than 66⅔% of the Falconbridge Shares outstanding (on a fully-diluted basis) there can be no assurance that the Offeror would ultimately be able to acquire 66⅔% or more of the Falconbridge Shares. In these circumstances, there can be no assurance that the Offeror would be able to effect a Subsequent Acquisition Transaction, whether through purchasing additional Falconbridge Shares, obtaining the support of other Falconbridge Shareholders or otherwise.

If the Offeror and its affiliates hold less than 66⅔% of the Falconbridge Shares following the Xstrata Offer, Falconbridge would continue as a separate public company following the completion of the Xstrata Offer and prior to the completion of a Subsequent Acquisition Transaction. If Xstrata is considered to be a "control block holder", certain potential transactions between the Offeror and Falconbridge may be considered "related party transactions" under applicable law (specifically, Rule 61-501 and Regulation Q-27) which would, unless an exemption is available, require a formal valuation for the transaction and, in addition to any other required securityholder approval, the approval of a majority of the votes cast by "minority" holders of the affected securities, which would include holders other than the Offeror and any other person who is a "related party" of the Offeror, including an affiliate or an insider of the Offeror and/or Xstrata and any person acting jointly or in concert therewith. The ability to effect such "related party transactions" would also be subject to future negotiations between the respective boards of directors of the Offeror and Falconbridge, and in such negotiations, any representatives of the Xstrata appointed to the Falconbridge board of directors would be precluded from voting on such transactions.

If the Offeror were unable to complete a Subsequent Acquisition Transaction in a timely manner or at all, then it would be unable to fully integrate the operations of the Xstrata Group and Falconbridge and, consequently, unless the Offeror were successful in completing one or more "related party transactions" with Falconbridge, as described above, the Offeror would be limited in its ability to avail itself of Falconbridge's cash flows (other than through pro rata distributions to the Falconbridge Shareholders) and in its ability to effect potential transactions with Falconbridge for the purposes of integrating the business and operations of the Xstrata Group and Falconbridge and, consequently, realising a significant portion of the synergies otherwise expected to be realised through a combination of the Xstrata Group and Falconbridge.

Furthermore, if the Offeror and its affiliates continue to hold less than a majority of the outstanding Falconbridge Shares following the Xstrata Offer, Xstrata will not be able to exercise a controlling influence over the Falconbridge business and affairs and will not have the power to determine any matters submitted to a vote of the Falconbridge Shareholders, including the election of directors and the approval of significant corporate transactions such as amendments to the Falconbridge constitutional documents, mergers, amalgamations and the sale of all or substantially all of Falconbridge's assets.

Part III

Information on the Falconbridge Group

[This page is intentionally left blank]

Part III – "Information on the Falconbridge Group" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and this Part III have been written solely on the basis of publicly available information and have not, for the purposes of this document or the Circular, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Nothing in the previous sentence is intended to qualify the statements in paragraph 1 of Part VI – "Additional Information – Responsibility" of this document. See "Presentation of information – presentation of information on the Falconbridge Group" in this document and the risk factor "Lack of due diligence access to Falconbridge" in Part II – "Risk Factors" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

Description of the business of the Falconbridge Group

The description of the businesses of Falconbridge, Noranda and Former Falconbridge contained in Part III of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") has been extracted without material amendment from the following sources:

1) *the Falconbridge Annual Information Form dated 22 March 2006;*

2) *Noranda's F80 SEC filing dated 8 June 2005;*

3) *Falconbridge's material public announcements issued and filed with the Canadian Securities Administrators between 31 December 2005 and 29 May 2006 (being the latest practicable date prior to the publication of the Circular);*

4) *Noranda's Management's Discussion and Analysis as disclosed in Noranda's 2003 Annual Report;*

5) *Noranda's Management's Discussion and Analysis as of 3 February 2005 as disclosed in Noranda's 2004 Annual Report;*

6) *Falconbridge's Management's Discussion and Analysis as of 22 February 2006 as disclosed in Falconbridge's 2005 Annual Report;*

7) *Falconbridge's Management's Discussion and Analysis as of 25 April 2006, as filed with the Canadian Securities Administrators on 1 May 2006; and*

8) *the audited financial statements of Falconbridge for the year ended 31 December 2005 as disclosed in Falconbridge's annual accounts for that period and the audited financial statements of Noranda for the years ended 31 December 2004 and 31 December 2003 as disclosed in Noranda's annual accounts for those periods,*

and has not, for the purposes of this document or the Circular, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors.

The following information on the Falconbridge Group has been extracted without material amendment from Falconbridge's material public announcements issued and filed with the Canadian Securities Administrators between 29 May 2006 (being the latest practicable date prior to the publication of the Circular) and 19 July 2006 (being the latest practicable date prior to the publication of this document) and updates the information on the Falconbridge Group included in Part III – "Information on the Falconbridge Group" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation"). It has not, for the purposes of this document, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Nothing in the previous sentence is intended to qualify the statements in paragraph 1 of Part VI – "Additional Information – Responsibility" of this document.

On 31 May 2006, Falconbridge made the following public announcement:
"INCO AND FALCONBRIDGE IDENTIFY US$550 MILLION IN SYNERGIES

TORONTO, ONTARIO, May 31, 2006 – Falconbridge Limited announced today that Inco Limited today has indicated that Inco and Falconbridge operations personnel have now jointly identified the potential to realize estimated average annual pre-tax operating and corporate synergies of approximately US$550 million, an increase of US$200 million from the estimated synergies at the time of the announcement of the Falconbridge transaction.

This increase in the synergies estimate is attributable to developed improvements in the Inco-Falconbridge integration plan and to changes in commodity price assumptions as a result of the improved commodity market outlook since October 2005. The net present value of the estimated annual average pre-tax run-rate operating and corporate synergies of US$550 million, using a 7% discount rate, is approximately US$3.5 billion on an after-tax basis.

For more information, visit www.inco.com/newscentre/newsreleases/ to view Inco's press release.

FORWARD-LOOKING INFORMATION

Certain statements contained in this News Release are forward-looking statements (as defined in applicable securities legislation). Examples of such statements include, but are not limited to, statements concerning (i) Falconbridge's assessment of the outlook for metal markets in 2006, (ii) Inco's offer to acquire all of the common shares of Falconbridge Limited and the benefits of such combination, (iii) Xstrata's offer to acquire all of the common shares of Falconbridge Limited and the effects of such combination (iv) Falconbridge's future financial requirements, including to redeem the junior preference shares, and funding of those requirements, (v) Falconbridge's expectations with respect to Falconbridge's development projects, and (vi) Falconbridge's production forecast for 2006. Inherent in forward-looking statements are risks and uncertainties well beyond Falconbridge's ability to predict or control. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this News Release.

Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions about the timing, steps to be taken and completion of Inco's offer to acquire all of Falconbridge's common shares, the ability to successfully compete against global metals and mining and exploration companies by creating through such a combination an enterprise of increased scale; strong demand for nickel, copper and other metals in emerging markets such as China; approximately $550 million per annum in pre-tax operating and other synergies and cost savings, and other benefits being realized based on the achievement of operational efficiencies from restructuring, integration and other initiatives relating to the combination of Falconbridge and Inco; the approvals or clearances required to be obtained by Inco and Falconbridge from regulatory and other agencies and bodies being obtained in a timely manner; divestitures required by regulatory agencies being acceptable and completed in a timely manner; there being limited costs, difficulties or delays related to the integration of the Falconbridge's operations with those of Inco; the timely completion of the steps required to be taken for the eventual combination of the two companies; business and economic conditions generally; exchange rates, energy and other anticipated and unanticipated costs and pension contributions and expenses; the supply and demand for, deliveries of, and the level and volatility of prices of, nickel, copper, aluminum, zinc and other primary metals products and other metal products Inco and Falconbridge produce; the timing of the receipt of remaining regulatory and governmental approvals for the development projects and other operations; the continued availability of financing on appropriate terms for development projects; Falconbridge's costs of production and production and productivity levels, as well as those of its competitors; market competition; mining, processing, exploration and research and development activities; the accuracy of ore/mineral reserve estimates; premiums realized over LME cash and other benchmark prices; tax benefits/charges; the resolution of environmental and other proceedings and the impact on the combined company of various environmental regulations and initiatives; assumptions concerning political and economic stability in countries or locations in which Falconbridge operates or otherwise and the ability to continue to pay quarterly cash dividends in such amounts as Falconbridge's Board of Directors may determine in light of other uses for such funds and other factors.

Inherent in those statements are known and unknown risks, uncertainties and other factors well beyond Falconbridge's ability to control or predict. Some of these known risks and uncertainties are outlined in filings by Falconbridge with applicable securities regulatory authorities, including in Falconbridge's annual information form. Readers are encouraged to consult such filings. While Falconbridge anticipates that subsequent events and developments may cause Falconbridge's views to change, Falconbridge specifically disclaims any obligation to update these forward-looking statements. These forward-looking statements should not be relied upon as representing Falconbridge's views as of any date subsequent to

the date of this news release. Although Falconbridge has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. These factors are not intended to represent a complete list of the factors that could affect Falconbridge and the combination of Inco and Falconbridge.

Falconbridge Limited is a leading copper and nickel company with investments in fully-integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel orebodies. It employs 14,500 people at its operations and offices in 18 countries. Falconbridge's common shares are listed on the New York Stock Exchange (FAL) and the Toronto Stock Exchange (FAL.LV). Falconbridge's website can be found at www.falconbridge.com.

Note: All dollar amounts are expressed in U.S. dollars unless otherwise noted.

Important Legal Information
This communication is being made in respect of Inco Limited's proposed combination with Falconbridge Limited. Inco has filed with the U.S. Securities and Exchange Commission ("SEC") a registration statement on Form F-8 (containing an offer to purchase and a share exchange take-over bid circular) and amendments thereto, and, if required, will file other documents with the SEC *in connection with* the proposed combination. Falconbridge has filed a Schedule 14D-9F with the SEC in connection with Inco's offer and has filed and, if required, will file other documents regarding the proposed combination with the SEC.

INVESTORS AND SECURITYHOLDERS ARE URGED TO READ THE REGISTRATION STATEMENT AND ANY OTHER RELEVANT DOCUMENTS FILED OR TO BE FILED WITH THE SEC WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION.

Investors and security holders may obtain copies of the registration statement and Inco's and Falconbridge's SEC filings free of charge at the SEC's website (www.sec.gov). In addition, documents filed with the SEC by Inco may be obtained free of charge by contacting Inco's media or investor relations departments. Documents filed with the SEC by Falconbridge may be obtained free of charge by contacting Falconbridge's investor relations department.

Filings made by Inco and Falconbridge with Canadian securities regulatory authorities, including filings made in connection with the offer, are available at www.sedar.com."

On 31 May 2006, Falconbridge made the following public announcement:
"FALCONBRIDGE BOARD OF DIRECTORS REAFFIRMS SUPPORT FOR INCO OFFER

Toronto, Ontario, May 31, 2006 – Falconbridge Limited today announced that its Board of Directors has conducted its assessment of the offer by Xstrata plc ("Xstrata") to acquire the outstanding common shares of Falconbridge.

The assessment was completed with the assistance of external legal and financial advisors and focused on both the financial and non-financial aspects of the offer from Xstrata. Falconbridge's Board has decided to continue to endorse the Inco offer and recommends that Falconbridge shareholders tender their shares to the Inco offer.

Given the conditional nature of Xstrata's offer, including both the requirement for Xstrata to receive the approval of its own shareholders, which will not be obtained until the end of June at the earliest, and Investment Canada approval, significant conditions have yet to be satisfied that would permit the offer to proceed.

In addition, though Xstrata's bid is expressed to be for all Falconbridge shares, Xstrata has reserved the right to take up any number of shares tendered to it. When combined with its current holding of 20% of Falconbridge, the acquisition of a further small number of shares may well result in Xstrata acquiring effective control of Falconbridge without acquiring all of the shares.

The Falconbridge Board of Directors determined that Xstrata's offer is not a "superior proposal" under the terms of the Support Agreement entered into with Inco and will reaffirm its recommendation of the Inco bid in a Directors Circular responding to the Xstrata offer. The Directors Circular will be sent to shareholders in the near future.

"Clearly, one of the strengths of the Inco offer is that it gives Falconbridge shareholders almost 50% participation in the growth of the New Inco, a company that would have one the best portfolios of development projects in the base metals industry at a time when the fundamental outlook is so positive," said Derek Pannell, Falconbridge's Chief Executive Officer.

The Falconbridge Board remains committed to pursue the combination proposed by Inco and will be seeking the outstanding regulatory approvals from the U.S. Department of Justice and the European Commission.

FORWARD-LOOKING INFORMATION

Certain statements contained in this News Release are forward-looking statements (as defined in applicable securities legislation). Examples of such statements include, but are not limited to, statements concerning (i) Falconbridge's assessment of the outlook for metal markets in 2006, (ii) Inco's offer to acquire all of the common shares of Falconbridge Limited and the benefits of such combination, (iii) Xstrata's offer to acquire all of the common shares of Falconbridge Limited and the effects of such combination (iv) Falconbridge's future financial requirements, including to redeem the junior preference shares, and funding of those requirements, (v) Falconbridge's expectations with respect to Falconbridge's development projects, and (vi) Falconbridge's production forecast for 2006. Filings made by Inco and Falconbridge with Canadian securities regulatory authorities, including filings made in connection with the offer, are available at www.sedar.com."

On 6 June 2006, Falconbridge made the following public announcement:
"ONTARIO SECURITIES COMMISSION HEARING TO BE HELD ON FALCONBRIDGE LIMITED'S SHAREHOLDER RIGHTS PLAN

Toronto, Ontario, June 6, 2006 – Falconbridge Limited today announced that the Ontario Securities Commission will conduct a hearing on June 27, 2006, relating to the application by Xstrata plc to terminate Falconbridge's shareholder rights plan.

"Xstrata is asking securities regulators to permit it to acquire up to an additional 5% of Falconbridge shares in the market in an attempt to obtain a blocking position and end the current competitive bidding process," said Derek Pannell, Chief Executive Officer of Falconbridge. "We expect to demonstrate to the Ontario Securities Commission that this would not be in the best interests of Falconbridge shareholders."

Falconbridge implemented its rights plan on March 21, 2006. The plan is designed to ensure that any acquisition of control of Falconbridge occurs through a transaction whereby all Falconbridge shareholders are able to participate in any premium paid for control. The rights plan does not prevent an offer made to all shareholders for all their shares, and specifically allows a "permitted bid", which is a bid for all shares that contains an unwaivable condition that it will only proceed if a majority of shares not owned by the bidder are tendered to it.

On May 17, 2006, Xstrata announced an offer to acquire the outstanding common shares of Falconbridge. Xstrata chose not to make a permitted bid. Specifically the Xstrata offer includes a provision allowing it to waive the minimum level of acceptance by shareholders, giving Xstrata the option to acquire a small percentage of shares and gain effective control of Falconbridge without acquiring a majority of the shares.

The termination of the rights plan would immediately permit Xstrata to purchase an additional 5% of Falconbridge shares in the market and/or take up a small number of shares that might be tendered to it in its bid. In either case, this may well give Xstrata enough shares, together with their current 20% holding, to block a competing bid including the current offer from Inco.

On June 1, 2006, a senior executive of Xstrata was quoted in the Financial Times of London as saying that Falconbridge's shareholder rights plan "was irrelevant now" and that the "shareholders of Falconbridge will tender their shares to the

company that offers them the most value". Mr. Pannell commented: "This is in fact the way we see the process unfolding, but Xstrata's attempt to gain strategic advantage by knocking out our rights plan suggests a different agenda on their part. Their actions are not aligned with their words".

FORWARD-LOOKING INFORMATION

Certain statements contained in this News Release are forward-looking statements (as defined in applicable securities legislation). Examples of such statements include, but are not limited to, statements concerning (i) Falconbridge's assessment of the outlook for metal markets in 2006, (ii) Inco's offer to acquire all of the common shares of Falconbridge Limited and the benefits of such combination, (iii) Xstrata's offer to acquire all of the common shares of Falconbridge Limited and the effects of such combination (iv) Falconbridge's future financial requirements, including to redeem the junior preference shares, and funding of those requirements, (v) Falconbridge's expectations with respect to Falconbridge's development projects, and (vi) Falconbridge's production forecast for 2006. Inherent in forward-looking statements are risks and uncertainties well beyond Falconbridge's ability to predict or control. On 7 June 2006, Falconbridge made the following public announcement:
"INCO AND FALCONBRIDGE PROVIDE UPDATE ON STATUS OF REGULATORY CLEARANCES OF INCO'S OFFER FOR FALCONBRIDGE LIMITED
AGREEMENT REACHED ON SALE OF FALCONBRIDGE ASSETS AND RELATED OPERATIONS TO BE DIVESTED

TORONTO, June 7, 2006 – Falconbridge Limited and Inco Limited announced today that they have reached a definitive agreement with LionOre Mining International Ltd. covering the sale to LionOre of certain assets and related operations of Falconbridge. Inco and Falconbridge have been discussing with the U.S. Department of Justice (DOJ) and European Commission (the Commission) the assets and related operations that would be divested and the associated arrangements that would be necessary as the proposed remedy to address potential competition issues that the DOJ and the Commission have identified relating to Inco's pending acquisition of Falconbridge. The sale of these assets and related operations to LionOre will include Falconbridge's Nikkelverk refinery in Norway and the Falconbridge marketing and custom feed organizations that market and sell the finished nickel and other products produced at Nikkelverk and obtain third-party feeds for this facility. In addition, the sale will include an agreement to supply up to 60,000 tonnes of nickel in matte annually, approximately equivalent to the current volume of feed provided by Falconbridge's operations to this refinery, for up to ten years. The closing of this sale is conditioned on, and expected to be completed upon receipt of, the clearance by both the DOJ and the Commission of the pending acquisition of Falconbridge by Inco, as well as Inco taking up and paying for Falconbridge shares pursuant to its offer and certain other standard terms and conditions to closing.

The purchase price to be paid by LionOre for the assets and related operations to be sold is US$650 million, of which US$400 million will be in cash and US$250 million of LionOre common shares. This purchase price is subject to certain adjustments tied to changes in the final working capital levels of the operations to be sold to LionOre and certain other adjustments.

"We are pleased in having reached this agreement with LionOre," said Scott Hand, Chairman and CEO of Inco. "This is an important milestone in the regulatory clearance process and we look forward to completing this process so that the acquisition can be cleared by the U.S. Department of Justice and the European Commission."

Inco and Falconbridge understand that the DOJ and the Commission are currently and will be reviewing the final terms of the proposed remedy that they have been discussing with these regulatory agencies, including the terms of this sale to LionOre. Inco and Falconbridge currently expect that the DOJ and the Commission will advise them whether the acquisition

will be cleared based upon this sale to LionOre prior to the end of June 2006. Both companies believe that the competition issues that have been identified by the DOJ and the Commission are addressed by the agreements entered into covering this sale to LionOre. The parties will continue to cooperate with the DOJ and the Commission in connection with their respective final reviews of the terms of the remedy.

Cautionary Statement Regarding Forward-Looking Statements
This news release contains forward-looking statements regarding Inco's offer to purchase all of the common shares of Falconbridge Limited and the sale of certain assets and related businesses of Falconbridge Limited as part of the regulatory clearance process of such offer, including statements regarding the anticipated timing of achievement of milestones in the regulatory clearance process, reaching an agreement on any required remedy and the terms of the sale of certain assets and related operations to be divested as part of such clearance. Actual results and developments may differ materially from those contemplated by these statements depending on, among others, the risks that Inco will not be able to obtain the required approvals or clearances from regulatory agencies and bodies on a timely basis, or divestitures or other remedies required by regulatory agencies may not be acceptable or may not be completed in a timely manner, that changes in the terms and conditions of sale of any assets and related operations to be divested may not be acceptable, and other risk factors listed from time to time in Inco's and Falconbridge's reports filed with the U.S. Securities and Exchange Commission. The forward-looking statements included in this release represent Inco's views as of the date of this release. While Inco anticipates that subsequent events and developments may cause its views to change, it specifically disclaims any obligation to update these forward-looking statements. These forward-looking statements should not be relied upon as representing its views as of any date subsequent to the date of this release.

Important Legal Information
This release may be deemed to be solicitation material in respect of Inco's pending acquisition of Falconbridge. Inco has filed a registration statement on Form F-8 and amendments thereto containing a share exchange take-over bid circular and notice of extension of offer delivered to the shareholders of Falconbridge and other documents with the SEC.

INVESTORS AND SECURITYHOLDERS ARE URGED TO READ THE REGISTRATION STATEMENT AND ALL AMENDMENTS AND ANY OTHER RELEVANT DOCUMENTS FILED OR THAT WILL BE FILED WITH THE SEC WHEN THEY BECOME AVAILABLE BECAUSE THEY CONTAIN OR WILL CONTAIN IMPORTANT INFORMATION."

On 9 June 2006, Falconbridge made the following public announcement:
"FALCONBRIDGE'S COMMON SHARE STOCK SYMBOL TO CHANGE ON THE TORONTO STOCK EXCHANGE "FAL.LV" TO BECOME "FAL" ON MONDAY JUNE 12th

TORONTO, JUNE 9, 2006 – Falconbridge Limited today announced that as of Monday June 12, 2006 Falconbridge's stock symbol for its common shares listed on the Toronto Stock Exchange (TSX) will be amended to "FAL". The new stock symbol, which drops the ".LV" suffix, was assigned by the Toronto Stock Exchange in light of its symbol extension program having been discontinued.

Falconbridge Limited is a leading copper and nickel company with investments in fully-integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel orebodies. It employs 14,500 people at its operations and offices in 18 countries. Falconbridge's common shares are listed on the New York Stock Exchange (FAL) and the Toronto Stock Exchange (FAL). Falconbridge's website can be found at www.falconbridge.com."

On 21 June 2006, Falconbridge made the following public announcement:
"FALCONBRIDGE LIMITED'S BRUNSWICK SMELTER EMPLOYEES RATIFY COLLECTIVE AGREEMENT

Belledune, New Brunswick, June 21, 2006 — Falconbridge Limited announced today that employees at Brunswick Smelter, members of United Steelworkers of America, Local 7085, have voted in favour of a new collective agreement. The previous agreement expired on February 28, 2006.

The new contract is a five-year agreement. Highlights of the agreement include:

- A definition of how seniority will apply and how pensions and severances will be provided to workers.
- Wage increases of 25 cents per hour for each year of the agreement.

- An increase in the basic pension from $47 per month per year of service to $52 in 2010.

"We are very pleased to have reached agreement with our employees," said Peter Hancock, General Manager Brunswick Smelter.

The Brunswick smelter, located approximately 30 kilometres north of Bathurst, New Brunswick, employs over 400 people, with approximately 300 being members of the USWA-Local 7085.

Falconbridge Limited is a leading copper and nickel company with investments in fully-integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel mineral deposits. It employs 14,500 people at its operations and offices in 18 countries. Falconbridge's common shares are listed on the New York Stock Exchange (FAL) and the Toronto Stock Exchange (FAL). Falconbridge's website can be found at www.falconbridge.com."

On 22 June 2006, Falconbridge made the following public announcement:
"FALCONBRIDGE TO OFFER TO ACQUIRE THE SHARES OF ITS SUBSIDIARY NOVICOURT INC. NOT ALREADY OWNED BY FALCONBRIDGE

TORONTO, June 22, 2006 – Falconbridge Limited announced today that it will offer to acquire by way of takeover bid all of the outstanding common shares of its subsidiary Novicourt Inc. ("Novicourt") that it does not already own (7,620,207 shares) at a cash offer price of Cdn$2.30 per Novicourt share. Falconbridge presently holds approximately 62.1% of the outstanding common shares of Novicourt. The offer is subject to customary conditions, including the condition, which may not be waived by Falconbridge, that not less than 50% of the Novicourt shares that are the subject of the offer be tendered to the bid.

The offer is an insider bid under applicable securities laws. After Falconbridge advised the Novicourt Board of Directors on March 15, 2006 of its intention to make such an offer, a special committee comprised of independent directors of Novicourt (the "Special Committee") was formed to evaluate the Falconbridge proposal and supervise the preparation of a formal valuation of Novicourt. Upon receipt today of the Special Committee's recommendation and the formal valuation and fairness opinion of Orion Securities Inc., which states that in its opinion the Falconbridge offer is fair, from a financial point of view, to the Novicourt minority shareholders, the members of the Board of Directors of Novicourt (who are not related to Falconbridge) voted unanimously to recommend that Novicourt shareholders tender their shares to the Falconbridge offer.

The take-over bid circular is expected to be mailed to Novicourt's shareholders on or about June 30, 2006.

On successful completion of the bid, Falconbridge, if necessary, intends to initiate a second-step acquisition transaction for the remaining shares of Novicourt in order that Novicourt continue as a wholly-owned private company subsidiary of Falconbridge.

Falconbridge Limited is a leading copper and nickel company with investments in fully-integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel mineral deposits. It employs 14,500 people at its operations and offices in 18 countries. Falconbridge's common shares are listed on the New York Stock Exchange (FAL) and the Toronto Stock Exchange (FAL). Falconbridge's website can be found at www.falconbridge.com.

FORWARD-LOOKING INFORMATION

Certain statements contained in this News Release are forward-looking statements (as defined in applicable securities legislation). Examples of such statements include, but are not limited to, statements concerning Falconbridge's intention to undertake a second step transaction if shares of Novicourt are taken-up and paid under this offer. Inherent in forward-looking statements are risks and uncertainties well beyond Falconbridge's ability to predict or control. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this News Release. Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions about the timing, steps to be taken with respect to the offer to acquire all of Novicourt's common shares; the approvals or clearances required to be obtained by Falconbridge from regulatory and other agencies and bodies being obtained in a timely manner. Inherent in those statements are known and unknown risks, uncertainties and other factors well beyond Falconbridge's ability to control or predict. Some of these known risks and uncertainties are outlined in filings by Falconbridge with applicable securities regulatory authorities, including in Falconbridge's annual information form. Readers are encouraged to consult such filings. While Falconbridge

anticipates that subsequent events and developments may cause Falconbridge's views to change, Falconbridge specifically disclaims any obligation to update these forward-looking statements. These forward-looking statements should not be relied upon as representing Falconbridge's views as of any date subsequent to the date of this news release. Although Falconbridge has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements."

On 23 June 2006, Falconbridge made the following public announcement:
"INCO OBTAINS U.S. REGULATORY CLEARANCE OF OFFER FOR FALCONBRIDGE LIMITED
Update on European Commission Clearance

TORONTO, ONTARIO, June 23, 2006 — Falconbridge Limited announced today that it and Inco Limited have reached a definitive agreement with the U.S. Department of Justice (DOJ) on a remedy to address potential competition issues related to Inco's pending acquisition of Falconbridge and provide for the DOJ's clearance of this transaction.

The remedy consists of the sale to LionOre Mining International Ltd. of Falconbridge's Nikkelverk refinery in Norway and the Falconbridge marketing and custom feed organizations that market and sell the finished nickel and other products produced at Nikkelverk and obtain third-party feeds for this facility. In addition, the sale will include an agreement to supply up to 60,000 tonnes of nickel in matte annually, approximately equivalent to the current volume of feed provided by Falconbridge's operations to this refinery, for up to ten years.

Inco and Falconbridge have continued their discussions with the European Commission on the final terms of this same remedy. Inco and Falconbridge currently expect that the Commission will issue their decision on whether the acquisition will be cleared based upon this remedy by July 12, 2006 and believe that the transaction will be cleared by the Commission on the basis of this remedy.

For more information, visit www.inco.com/newscentre/newsreleases/ to view Inco's press release.

FORWARD-LOOKING INFORMATION

Certain statements contained in this News Release are forward-looking statements (as defined in applicable securities legislation). Examples of such statements include, but are not limited to, statements concerning Inco's offer to acquire all of the common shares of Falconbridge and the sale of certain assets and related business of Falconbridge as part of the regulatory clearance process of such offer including statements regarding the anticipated timing of achievement of certain milestones in the regulatory clearance process, reaching an agreement on any required remedy and the terms of the sale of certain assets and related operations to be divested as part of such clearances. Inherent in forward-looking statements are risks and uncertainties well beyond Falconbridge's ability to predict or control. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this News Release.

Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions about all of the conditions to the transaction with LionOre Mining International Ltd. being met and the transaction being completed in accordance with its terms.

Inherent in those statements are known and unknown risks, uncertainties and other factors well beyond Falconbridge's ability to control or predict. Some of these known risks and uncertainties are outlined in filings by Falconbridge with applicable securities regulatory authorities, including in Falconbridge's annual information form. Readers are encouraged to consult such filings. While Falconbridge anticipates that subsequent events and developments may cause Falconbridge's views to change, Falconbridge specifically disclaims any obligation to update these forward-looking statements. These forward-looking statements should not be relied upon as representing Falconbridge's views as of any date subsequent to the date of this news release. Although Falconbridge has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. These

factors are not intended to represent a complete list of the factors that could affect Falconbridge and the combination of Inco and Falconbridge.

Falconbridge Limited is a leading copper and nickel company with investments in fully-integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel mineral deposits. It employs 14,500 people at its operations and offices in 18 countries. Important Legal Information

This communication is being made in respect of Inco Limited's proposed combination with Falconbridge Limited. Inco has filed with the U.S. Securities and Exchange Commission ("SEC") a registration statement on Form F-8 (containing an offer to purchase and a share exchange take-over bid circular) and amendments thereto, and, if required, will file other documents with the SEC in connection with the proposed combination. Falconbridge has filed a Schedule 14D-9F and an amendment thereto with the SEC in connection with Inco's offer and has filed and, if required, will file other documents regarding the proposed combination with the SEC.

INVESTORS AND SECURITYHOLDERS ARE URGED TO READ THE REGISTRATION STATEMENT AND ANY OTHER RELEVANT DOCUMENTS FILED OR TO BE FILED WITH THE SEC WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION.

Investors and security holders may obtain copies of the registration statement and Inco's and Falconbridge's SEC filings free of charge at the SEC's website (www.sec.gov). In addition, documents filed with the SEC by Inco may be obtained free of charge by contacting Inco's media or investor relations departments. Documents filed with the SEC by Falconbridge may be obtained free of charge by contacting Falconbridge's investor relations department.

Filings made by Inco and Falconbridge with Canadian securities regulatory authorities, including filings made in connection with the offer, are available at www.sedar.com."

On 26 June 2006, Falconbridge, jointly with Phelps Dodge Corporation and Inco, made the following public announcement:

"PHELPS DODGE, INCO AND FALCONBRIDGE AGREE TO US$56 BILLION THREE-WAY COMBINATION, CREATING ONE OF WORLD'S LARGEST MINING COMPANIES

Transaction Creates World's Largest Nickel Producer and Largest Publicly Traded Copper Producer

Combines High-Quality, Long-Lived Assets in Regions with Low Geopolitical Risk and Strong Development Pipelines; Enhances Ability to Invest in Long-Term Growth

US$900 Million of Estimated Annual Synergies Expected by 2008; Combination Expected to Be Immediately Accretive to Cash Flow and Accretive to Earnings Per Share in 2008

Phelps Dodge Offer for Combined Inco/Falconbridge is Valued at C$80.13 Per Share; Agreement Enables Inco to Enhance Offer for Falconbridge to C$62.11 Per Share

Phelps Dodge Also Announces Up to US$5 Billion Share Repurchase Program

PHOENIX AND TORONTO, June 26, 2006 – Phelps Dodge Corporation, Inco Limited and Falconbridge Limited announced today they have agreed to combine in a US$56[1] billion transaction to create a North American-based mining company that is one of the world's largest. The new company will be named Phelps Dodge Inco Corporation.

Phelps Dodge Inco will be the world's leading nickel producer, the world's largest publicly traded copper producer and a leading producer of molybdenum and cobalt, and it will have a world-class portfolio of growth projects and exciting exploration opportunities. For the quarter ended March 31, 2006, the three companies had combined revenues of US$6.3 billion and EBITDA (earnings before interest, taxes, depreciation and amortization) of US$1.9 billion.

[1] Enterprise Value defined as equity value plus debt, preferred stock and minority interest less cash and investments in unconsolidated affiliates.

The corporate office and the new company's copper division will be headquartered in Phoenix. Inco Nickel, the new company's nickel division, will be headquartered in Toronto.

The Phelps Dodge board of directors also announced, as part of the transaction, a share repurchase program of up to US$5.0 billion to be commenced after closing.

Phelps Dodge Inco will have operations in more than 40 countries and will employ approximately 40,000 people globally. Phelps Dodge Inco will be listed on the New York Stock Exchange and will apply for a listing on the Toronto Stock Exchange. As a result of the three-way combination, Phelps Dodge Inco will have a significantly increased weighting in the S&P 500 Index. A Web site with detailed information on the transaction is available at www.phelpsdodgeinco.com.

J. Steven Whisler, chairman and chief executive officer of Phelps Dodge Corporation, said: "This transaction represents a unique opportunity in a rapidly consolidating industry to create a global leader based in North America – home of the world's deepest and most liquid capital markets. The combined company has one of the industry's most exciting portfolios of development projects, and the scale and management expertise to pursue their development successfully. The creation of this new company gives us the scale and diversification to manage cyclicality, stabilize earnings and increase shareholder returns. At the same time, we are committed to maintaining an investment-grade credit rating throughout the business cycle."

Scott M. Hand, chairman and chief executive officer of Inco, said: "This combination allows Inco's shareholders, in addition to receiving a substantial premium for their stock, to share in the significant synergies both from our agreed merger with Falconbridge and from the combination with Phelps Dodge, and it creates an opportunity for all three groups of shareholders to participate in an exciting, new, diversified industry leader. We believe the Phelps Dodge transaction delivers an excellent value proposition for our shareholders. The new Phelps Dodge Inco also will maintain a very strong commitment to and presence in Canada."

Derek Pannell, chief executive officer of Falconbridge, said: "This is an industry-redefining transaction. Phelps Dodge Inco will have the scale, diversification, market leadership, reserve position, growth profile and balance sheet necessary to create tremendous value for shareholders. It represents a significant premium to Falconbridge shareholders, with ongoing participation in the upside of the three-way combination. We believe this transaction represents a most compelling opportunity for all Falconbridge shareholders."

Terms of the Transaction

Under the terms of the transaction, Phelps Dodge will acquire all of the outstanding common shares of Inco for a combination of cash and common shares of Phelps Dodge having a value of C$80.13 per Inco share, based upon the closing price of Phelps Dodge stock and the closing US/Canadian dollar exchange rate on Friday, June 23, 2006. Each shareholder of Inco would receive 0.672 shares of Phelps Dodge stock plus C$17.50 per share in cash for each share of Inco stock. This represents a premium of 23 percent to Inco's market price as of close of trading on June 23 and a 19 percent premium to the value of the existing Teck Cominco Limited unsolicited offer for Inco.

Simultaneous with its entry into the combination agreement with Phelps Dodge, Inco has entered into an agreement with Falconbridge to increase its previously recommended offer for Falconbridge. Under the terms of this enhanced offer, Inco has increased the cash component of the offer from C$12.50 to C$17.50 and the exchange ratio from 0.524 shares of Inco for each share of Falconbridge to 0.55676 shares of Inco for each share of Falconbridge. The board of Falconbridge has unanimously agreed to recommend this revised offer and also approved an amendment of the Support Agreement with Inco to reflect the revised price.

Based upon the value of the consideration offered by Phelps Dodge for Inco of C$80.13 per share, the implied value of the revised agreed offer for Falconbridge including the increased cash component is C$62.11 per share, representing a 12 percent premium to Falconbridge's closing price on June 23, and an 18 percent premium to the existing Xstrata plc unsolicited offer for Falconbridge.

At Phelps Dodge's June 23 closing price of US$82.95, the total enterprise value of the acquisition by Phelps Dodge of the combined Inco and Falconbridge is approximately US$40 billion.

The acquisition of Falconbridge by Inco is subject to regulatory approvals and other customary closing conditions, and Inco's tender offer is expected to close in July. Inco anticipates conducting a second-stage transaction to acquire the remaining Falconbridge shares, which is expected to close in August. Upon the closing of the Phelps Dodge-Inco combination, shareholders of Falconbridge who have been issued Inco common shares in the Inco-Falconbridge transaction will be entitled to receive for those shares the same package of cash and Phelps Dodge shares as will other Inco shareholders.

Phelps Dodge strongly supports Inco's agreed offer for Falconbridge and has entered into a definitive agreement under which it will purchase up to US$3.0 billion of convertible subordinated notes issued by Inco to provide Inco with substantial additional liquidity at the time of its purchase of Falconbridge common shares and to satisfy related dissent rights, as needed. The convertible subordinated notes will only be funded in the event the Inco/Falconbridge combination is consummated. The instrument will be redeemable for cash at any time by Inco after the merger with Falconbridge and may be converted at any time beginning six months after issuance by Phelps Dodge at a conversion rate equal to 95 percent of the market value of Inco's common shares plus accrued interest of the security at the time of conversion. The instrument will bear an 8 percent PIK coupon. The issuance of the convertible subordinated notes will be subject to regulatory approval.

Phelps Dodge intends to complete its share repurchase program within the 12 months after closing of the Inco transaction in an amount equal to US$5 billion, less the amount of any convertible subordinated notes purchased by Phelps Dodge.

The transaction between Phelps Dodge and Inco is not conditioned upon the completion of the Inco and Falconbridge combination. Thus, in the event the Inco-Falconbridge merger is not completed, Inco shareholders will receive the same 0.672 shares of Phelps Dodge and C$17.50 per share in cash that they would have received in the proposed three-way combination. Should Inco not complete the Falconbridge transaction, the Phelps Dodge board of directors intends to execute the full US$5.0 billion share repurchase program within 12 months of closing a transaction with Inco.

Inco has agreed to pay a break-up fee to Phelps Dodge under certain circumstances of US$475 million on a stand-alone basis and US$925 million in conjunction with its combination with Falconbridge. Inco has also given Phelps Dodge certain other customary rights, including a right to match competing offers. Phelps Dodge has agreed to pay Inco a US$500 million break-up fee under certain circumstances.

Phelps Dodge has received financing commitments from Citigroup and HSBC that may be drawn upon to fund the contemplated transactions and the up to US$5.0 billion share repurchase program.

Inco has received additional financing commitments from Morgan Stanley, Goldman, Sachs & Co., Royal Bank of Canada, and Bank of Nova Scotia in support of the increased cash component of its revised agreed offer for Falconbridge.

After completion of the transaction, current Phelps Dodge shareholders would own approximately 40 percent of Phelps Dodge Inco, current Inco shareholders would own approximately 31 percent, and current Falconbridge holders would own approximately 29 percent. The transaction, which is subject to Phelps Dodge and Inco shareholder approval, regulatory approvals and customary closing conditions, is expected to close in September 2006.

Delivering Significant Value to Shareholders Through Synergies and Growth

The combination of Phelps Dodge, Inco and Falconbridge is expected to result in total annual synergies of approximately US$900 million by 2008. This includes US$550 million in total expected annual synergies from the combination of Inco and Falconbridge.

The net present value of total synergies, at a 7.0 percent discount rate, is approximately US$5.8 billion after-tax.

The combination brings together three companies with unique, complementary skill sets. The synergies previously identified by Inco and Falconbridge will be generated in part by joint operation of facilities in the Sudbury Basin, where there are contiguous, interwoven mines and processing facilities. Consolidation of the district allows feed flow changes that result in production increases and cost reductions. Also, consolidation of management allows for the sharing of best practices.

The inclusion of Phelps Dodge enhances these synergies. Its three-year-old North American One Mine processes are an excellent blueprint for the consolidation of the Sudbury district. In addition, Phelps Dodge brings a focus on technology that can be applied to improve process recoveries and throughput in Sudbury and elsewhere. Also, the larger company will realize savings in procurement and supply-chain management because of its much larger size.

Based on these synergies, the combination is expected to be immediately accretive to cash flow and accretive to earnings per share in 2008, excluding integration and transaction costs.

The new, larger company will benefit from a strengthened financial position to take advantage of future growth opportunities. This increased financial strength, coupled with its combined assets and expertise, will enable it to pursue current and future development projects more effectively.

The combined company will have an impressive list of greenfield and brownfield projects and expansions. Those now in commissioning or in the late stages of construction include Voisey's Bay (nickel), Cerro Verde (copper/molybdenum) and Henderson (molybdenum). Other projects include Safford (copper), Tenke Fungurume (copper/cobalt), Climax

(molybdenum), Lomas Bayas (copper), Collahuasi (copper/molybdenum), El Morro (copper), El Pachon (copper), El Abra (copper), Goro (nickel), Koniambo (nickel), and Nickel Rim (nickel).

Management Team and Board of Directors

J. Steven Whisler, 51, chairman and chief executive officer of Phelps Dodge, will be chairman and chief executive officer of the new company. Scott M. Hand, 64, chairman and chief executive officer of Inco, will become vice chairman of Phelps Dodge Inco. Derek Pannell, 60, chief executive officer of Falconbridge, will become president: Inco Nickel and will head the new company's nickel, zinc and aluminum operations. Timothy R. Snider, 56, president and chief operating officer of Phelps Dodge, will hold the same position in the new company. Ramiro G. Peru, 50, executive vice president and chief financial officer of Phelps Dodge, will be the chief financial officer of the new company. Whisler, Snider and Peru will be based in Phoenix. Hand and Pannell will be based in Toronto.

The board of directors of the new company will be composed of 15 members, 11 from the board of Phelps Dodge and four from the boards of Inco and Falconbridge.

Benefits to Canada

Canada will derive benefits not only from the new Phelps Dodge Inco's scale and global reach, but its continuing strong commitment to Canada overall and the local communities in which it operates. As the largest mining company based in North America, Phelps Dodge Inco will have ready access to global capital markets and be well positioned to draw upon its leading market position, combined management teams, technical depth and the expertise of its collective workforce. In Canada, Phelps Dodge Inco will continue to pursue all major capital expenditure projects that Inco and Falconbridge have initiated.

Regarding Canadian employment, Phelps Dodge Inco will not lay off any employees at any of its Canadian operating companies for at least three years after the completion of the transaction, unless those employees are part of an already announced shutdown or reduction in workforce. Canadians will occupy a majority of management positions of the Canadian businesses at Phelps Dodge Inco. While there will be some head-office workforce reduction, as is natural in any such combination, Phelps Dodge Inco will provide severance and make available appropriate outplacement and/or counseling services. Phelps Dodge Inco has committed to establish the head office of the global nickel business in Toronto. The company will maintain a major nickel research and development facility in Canada, and continue all existing Canadian exploration activities for a period of at least three years. Additionally, Phelps Dodge Inco will abide by any practices or agreements engaged in by Inco or Falconbridge with provincial Canadian governments concerning the export or processing of intermediate ore products.

In local communities, Phelps Dodge Inco will maintain all community and educational programs currently in place. In Ontario, Manitoba, Newfoundland and Labrador, Quebec, and New Brunswick, Phelps Dodge Inco has committed to direct resources toward training, education and other initiatives with the specific goal of training potential new employees, as well as enhancing the resources and quality of training available to existing employees. The new company will also maintain and carry forward the practice of environmental protection established over many years by each company, as well as keeping an unwavering focus on worker health and safety.

A World Leader in Metals and Mining

The combined entity will have large-scale production capabilities, significant proven and probable reserves in all of its core commodities and a diversified asset base.

Copper

Pro-forma 2005 copper production for the combined entity was 3.4 billion pounds. Pro-forma 2005 copper revenues were US$11.13 billion. Phelps Dodge Inco will be the world's largest publicly traded copper corporation after the closing.

Nickel

Pro-forma 2005 nickel production for the combined entity was 738 million pounds. Pro-forma 2005 nickel revenues were US$5.8 billion. Upon closing of the transaction, Phelps Dodge Inco will be the world's largest nickel producer.

Molybdenum

Pro-forma 2005 molybdenum production for the combined entity was 68 million pounds. Proforma 2005 molybdenum revenues were US$1.89 billion. Phelps Dodge Inco will be the world's second largest producer of molybdenum.

Cobalt

Pro-forma 2005 cobalt production for the combined entity was 14 million pounds. Pro-forma 2005 cobalt revenues were US$210 million. Phelps Dodge Inco will be the world's third-largest producer of cobalt.

Webcast

Management of Phelps Dodge, Inco and Falconbridge will host a webcast for investors today at 9:00 a.m. eastern time, to discuss the details of the transaction. The webcast can be accessed at www.phelpsdodgeinco.com.

Phelps Dodge is one of the world's leading producers of copper and molybdenum and is the largest producer of molybdenum-based chemicals and continuous-cast copper rod. The company employs 13,500 people worldwide.

Inco is a primary metals company. In business for 100 years, it is one of Canada's best-known companies and largest exporters. It employs 12,000 people around the world at mining operations, production facilities, a research center and through its marketing and sales network.

Falconbridge is a leading copper and nickel company with investments in fully integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel ore bodies. It employs 14,500 people at its operations and offices in 18 countries.

Advisors and Counsel

Phelps Dodge is being advised by Citigroup Corporate and Investment Banking and by HSBC Securities. Phelps Dodge's counsel are Debevoise & Plimpton LLP and Heenan Blaikie LLP. Inco is being advised by Morgan Stanley, RBC Capital Markets and Goldman Sachs. Inco's counsel are Sullivan & Cromwell and Osler Hoskin & Hartcourt LLP. Falconbridge is being advised by CIBC World Markets. Falconbridge's counsel are McCarthy Tetrault LLP and Fried Frank Harris Shriver & Jacobson LLP.

Forward-Looking Information

Certain statements contained in this News Release are forward-looking statements (as defined in applicable securities legislation). Examples of such statements include, but are not limited to, statements concerning Inco's offer to acquire all of the common shares of Falconbridge and the anticipated timing for completion of such offer and ancillary transactions upon the requisite regulatory approvals having been obtained. Inherent in forward-looking statements are risks and uncertainties well beyond our ability to predict or control. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this News Release.

Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions about all of the conditions to the Inco offer being met and the successful completion of a second step business combination transaction.

Inherent in those statements are known and unknown risks, uncertainties and other factors well beyond the company's ability to control or predict. Some of these known risks and uncertainties are outlined in filings by Falconbridge with applicable securities regulatory authorities, including in Falconbridge's annual information form. Readers are encouraged to consult such filings. While Falconbridge anticipates that subsequent events and developments may cause Falconbridge's views to change, the company specifically disclaims any obligation to update these forward-looking statements. These forward-looking statements should not be relied upon as representing the company's views as of any date subsequent to the date of this News Release. Although the company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. These factors are not intended to represent a complete list of the factors that could affect Falconbridge and the combination of Inco and Falconbridge.

Falconbridge Limited is a leading copper and nickel company with investments in fully-integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel mineral deposits. It employs 14,500 people at its operations and offices in 18 countries. Falconbridge's common shares are listed on the New York Stock Exchange (FAL) and the Toronto Stock Exchange (FAL). Falconbridge's website can be found at www.falconbridge.com.

Note: All dollar amounts are expressed in U.S. dollars unless otherwise noted.

Important Legal Information

This communication is being made in respect of Inco Limited's proposed combination with Falconbridge Limited. Inco has filed with the U.S. Securities and Exchange Commission ("SEC") a registration statement on Form F-8 (containing an offer to purchase and a share exchange take-over bid circular) and amendments thereto, and, if required, will file other documents with the SEC in connection with the proposed combination. Falconbridge has filed a Schedule 14D-9F and an amendment thereto with the SEC in connection with Inco's offer and has filed and, if required, will file other documents regarding the proposed combination with the SEC.

INVESTORS AND SECURITYHOLDERS ARE URGED TO READ THE REGISTRATION STATEMENT AND ANY OTHER RELEVANT DOCUMENTS FILED OR TO BE FILED WITH THE SEC WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION.

Investors and security holders may obtain copies of the registration statement and Inco's and Falconbridge's SEC filings free of charge at the SEC's website (www.sec.gov). In addition, documents filed with the SEC by Inco may be obtained free of charge by contacting Inco's media or investor relations departments. Documents filed with the SEC by Falconbridge may be obtained free of charge by contacting Falconbridge's investor relations department.

Filings made by Inco and Falconbridge with Canadian securities regulatory authorities, including filings made in connection with the offer, are available at www.sedar.com.

Forward-Looking Statements

These materials include "forward-looking statements" (as defined in Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934) including statements regarding, among other things, the benefits of the combination with Inco and the combined company's plans, objectives, expectations and intentions. All statements other than historical information are forward-looking statements. These forward-looking statements are based on management's current beliefs and expectations, speak only as of the date made, and are subject to a number of significant risks and uncertainties that cannot be predicted or quantified and are beyond our control. Future developments and actual results could differ materially from those set forth in, contemplated by, or underlying the forward-looking statements. The following factors, among others, could cause actual results to differ from those described in the forward-looking statements in this documents: (i) the ability to obtain governmental approvals of the combination on the proposed terms and schedule; (ii) the failure of Inco's shareholders to approve the plan of arrangement; (iii) the failure of Phelps Dodge's shareholders to authorize the issuance of Phelps Dodge common shares, the change of Phelps Dodge's name to Phelps Dodge Inco and an increase in the size of Phelps Dodge's board of directors as required under the combination agreement; (iv) the risks that the businesses of Phelps Dodge and Inco and/or Falconbridge will not be integrated successfully; (v) the risks that the cost savings, growth prospects and any other synergies from the combination may not be fully realized or may take longer to realize than expected; (vi) the combined company's inability to refinance indebtedness incurred in connection with the combination on favorable terms or at all; (vii) the possibility that Phelps Dodge will combine with Inco only; (viii) the possible impairment of goodwill and other long-lived assets resulting from the combination and the resulting impact on the combined company's assets and earnings; and (ix) additional factors that may affect future results of the combined company set forth in Phelps Dodge's, Inco's and Falconbridge's filings with the Securities and Exchange Commission, which filings are available at the SEC's Web Site at (www.sec.gov). Except as required by law, we are under no obligation, and expressly disclaim any obligation, to update, alter or otherwise revise any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise.

Supplemental Data

These materials also include terms used to describe supplemental data. Any such data or terms are not a substitute for any U.S. generally accepted accounting principle measure and should be evaluated within the context of our U.S. GAAP results. Any such references may not be comparable to similarly titled measures reported by other companies. As required by Regulation G, we have posted on our Web Site – www.phelpsdodgeinco.com – a full reconciliation of non-GAAP financial measures to U.S. GAAP financial measures. Unless otherwise indicated, all information in this news release relating to Phelps Dodge is on a post-FIN-46 basis (i.e., Candelaria and El Abra are fully consolidated with minority interests shown separately rather than a pro rata consolidation).

NOTE: In connection with the proposed combination, Phelps Dodge Corporation ("Phelps Dodge") intends to file a preliminary proxy statement on Schedule 14A with the SEC. Investors are urged to read the proxy statement (including all amendments and supplements to it) when it is filed because it contains important

information. Investors may obtain free copies of the proxy statement, as well as other filings containing information about Phelps Dodge, Inco and Falconbridge, without charge, at the SEC's Web site (www.sec.gov). Copies of Phelps Dodge's filings may also be obtained without charge from Phelps Dodge at Phelps Dodge's Web site (www.phelpsdodge.com) or by directing a request to Phelps Dodge, One North Central Avenue, Phoenix, Arizona 85004-4415, Attention: Assistant General Counsel and Corporate Secretary (602) 366-8100."

On 29 June 2006, Falconbridge made the following public announcement:
"FALCONBRIDGE OPPOSES XSTRATA APPLICATION TO SUPERIOR COURT

Toronto, Ontario – June 29, 2006 – Falconbridge Limited announced today that it intends to aggressively oppose an Application to the Superior Court of Justice that was filed by Xstrata against Falconbridge. The Application was filed on June 28, just one day after Xstrata had argued before the Ontario Securities Commission to have Falconbridge's shareholder rights protection plan terminated.

Xstrata's Application to the Court demands that Falconbridge be forced to call an early Annual General Meeting of Shareholders on the basis of alleged violations of the Ontario Business Corporations Act ("OBCA") by Falconbridge. Falconbridge had previously received approval from the TSX to hold its Annual General Meeting on October 9, 2006 in accordance with the provisions of the rules of the TSX.

"In our view this is yet another attempt by Xstrata to avoid the fair and open auction process currently underway for Falconbridge. We remain committed to acting in the best interests of all Falconbridge shareholders," said Derek Pannell, Chief Executive Officer of Falconbridge Limited.

Falconbridge Limited is a leading copper and nickel company with investments in fully-integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel orebodies. It employs 14,500 people at its operations and offices in 18 countries. Falconbridge's common shares are listed on the New York Stock Exchange (FAL) and the Toronto Stock Exchange (FAL). Falconbridge's website can be found at *www.falconbridge.com*.

Forward-Looking Information
Certain statements contained in this News Release are forward-looking statements (as defined in applicable securities legislation). Examples of such statements include, but are not limited to, statements concerning Inco's offer to acquire all of the common shares of Falconbridge and the anticipated timing for completion of such offer and ancillary transactions upon the requisite regulatory approvals having been obtained. Inherent in forward-looking statements are risks and uncertainties well beyond Falconbridge's ability to predict or control. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this News Release.

Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions about all of the conditions to the Inco offer being met and the successful completion of a second step business combination transaction.

Inherent in those statements are known and unknown risks, uncertainties and other factors well beyond Falconbridge's ability to control or predict. Some of these known risks and uncertainties are outlined in filings by Falconbridge with applicable securities regulatory authorities, including in Falconbridge's annual information form. Readers are encouraged to consult such filings. While Falconbridge anticipates that subsequent events and developments may cause Falconbridge's views to change, Falconbridge specifically disclaims any obligation to update these forward-looking statements. These forward-looking statements should not be relied upon as representing Falconbridge's views as of any date subsequent to the date of this News Release. Although Falconbridge has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. These factors are not intended to represent a complete list of the factors that could affect Falconbridge and the combination of Inco and Falconbridge.

Falconbridge Limited is a leading copper and nickel company with investments in fully-integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel mineral deposits. It employs 14,500 people at its operations and offices in 18 countries. On 30 June 2006, Falconbridge made the following public announcement:
"SUPERIOR COURT DISMISSES XSTRATA APPLICATION

Toronto, Ontario, June 30, 2006 – Falconbridge Limited announced today that the Ontario Superior Court of Justice has dismissed an Application filed by Xstrata alleging violations to the Ontario Business Corporations Act ("OBCA") by Falconbridge.

In its ruling, the Superior Court confirmed that Falconbridge had acted in accordance with the OBCA. As a result, the court upheld Falconbridge's decision to hold its Annual General Meeting no later than October 9, 2006, in accordance with the provisions of the rules of the TSX.

Falconbridge Limited is a leading copper and nickel company with investments in fully-integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel orebodies. It employs 14,500 people at its operations and offices in 18 countries. On 4 July 2006, Falconbridge made the following public announcement:
"CLEARANCE BY EUROPEAN COMMISSION REMOVES FINAL REGULATORY CONDITION TO INCO'S ACQUISITION OF FALCONBRIDGE

Toronto, July 4, 2006 – Falconbridge Limited today announced that the proposed acquisition by Inco Limited of Falconbridge has been cleared by the European Commission ("Commission"). In a news release, Inco indicated that it has therefore satisfied the final outstanding regulatory condition to the acquisition, and Falconbridge shareholders may tender their shares to Inco's enhanced offer announced on June 26, 2006, and which expires on July 13, 2006. The Inco offer has been recommended to Falconbridge shareholders by the Board of Directors of Falconbridge.

The regulatory clearance, set forth in a decision issued by the Commission, is structured on the same remedy agreed upon with the U.S. Department of Justice. This remedy is outlined in a Falconbridge news release distributed June 7, 2006, and available at www.falconbridge.com/newsroom/press releases.

For more information, visit www.inco.com/newscentre/newsreleases/ to view Inco's press release.

Falconbridge's common shares are listed on the New York Stock Exchange (FAL) and the Toronto Stock Exchange (FAL). Falconbridge's website can be found at www.falconbridge.com."

On 7 July 2006, Falconbridge made the following public announcement:
"FALCONBRIDGE REITERATES RECOMMENDATION TO SHAREHOLDERS

- *XSTRATA FAILED TO IMPROVE ITS OFFER*
- *SHAREHOLDERS URGED TO TENDER TO SUPERIOR INCO OFFER*

Toronto, Ontario, July 7, 2006 – Falconbridge Limited today reiterated its recommendation of Inco Limited's superior offer to acquire Falconbridge and urged shareholders to tender their shares to the Inco offer. This is in response to Xstrata's announcement on July 7 that it has extended its current offer for Falconbridge without increasing its price.

"Falconbridge's Board of Directors continues to endorse the Inco offer, which has an implied value of Cdn$59.02 per share, compared to the Xstrata offer of Cdn$52.50," said Derek Pannell, Chief Executive Officer of Falconbridge. "We do not understand Xstrata's decision to extend its conditional offer without increasing its dollar value. Our only conclusion is that Xstrata intends to draw out the process beyond July 28, 2006 and ultimately attempt to acquire control of Falconbridge

through a creeping takeover. We believe the best option for shareholders is to tender to the superior offer on the table from Inco, which has already obtained all necessary regulatory approvals."

INCO OFFER – Superior offer with implied value of $59.02

Inco Limited's offer for all outstanding Falconbridge shares will expire at 8:00 p.m., Toronto time on Thursday July 13, 2006. Assuming full pro-ration, the consideration payable under their offer is Cdn$17.50 plus 0.55676 Inco common shares for each Falconbridge common share.

The implied value of this offer is Cdn$59.02 per Falconbridge share, based on Inco's closing price on the Toronto Stock Exchange on Friday, July 7, 2006.

In its Directors' Circular dated June 26, 2006, the Board of Directors of Falconbridge has recommended that Falconbridge shareholders tender their shares to the *Inco offer*. This offer has received all necessary regulatory approvals and remains conditional on Falconbridge shareholders tendering a minimum of 66⅔% of Falconbridge *shares* to the offer (which condition can only be waived by extending the offer's expiry date).

"The combination of Falconbridge with Inco will deliver excellent value to shareholders and result in the creation of an outstanding base metals company with tremendous potential for further value creation. Falconbridge shareholders will own approximately 50% of the Inco/Falconbridge combined company and will have the opportunity to participate in this potential as shareholders of the new Inco," said Pannell. "The subsequent opportunity presented by the friendly Phelps Dodge offer will provide a further opportunity to participate as shareholders in Phelps Dodge Inco, a top tier mining company."

Shareholders are urged to contact their brokers or investment advisors immediately to begin the tender process to the Inco offer.

XSTRATA OFFER – Xstrata fails to improve offer

On July 7, Xstrata extended its offer for Falconbridge to July 21, 2006, but did not improve the Cdn$52.50 per share offer for Falconbridge. Although Xstrata's bid is expressed to be for all Falconbridge shares, Xstrata continues to reserve the right to take up any number of shares tendered to it. Therefore, under Falconbridge's shareholders rights plan, the Xstrata bid is not considered a permitted bid and any shares tendered to this bid could not be taken up without triggering the dilutive effects of the rights plan until July 28, 2006.

The bid remains conditional on the approval of Investment Canada and on the elimination of the Falconbridge shareholders rights plan, neither of which are expected to occur prior to July 21, 2006.

"Xstrata's reluctance to accept a negotiated standstill agreement in the fall of 2005, their attempt to have the Ontario Securities Commission strike down the shareholders rights plan on June 27, and their attempt to force an early Annual General Meeting of Falconbridge shareholders are all consistent with its intention to creep," said Pannell. "The two-week extension announced today without a price improvement is another attempt to push this process towards the date when the shareholders rights plan falls away and Xstrata can creep by executing small market purchases. Falconbridge believes this strategy is a deliberate attempt to frustrate the competitive auction process to the detriment of the present superior Inco offer."

SHAREHOLDERS RIGHTS PLAN

The expiry of Falconbridge shareholders rights plan occurs on July 28, 2006 in accordance with the ruling of the OSC. Falconbridge's rights plan ensures that any acquisition of control of Falconbridge occurs through a transaction where an offer is made to all shareholders for all their shares. Falconbridge's shareholder rights plan will terminate on the earlier of (a) Inco acquiring a majority of Falconbridge common shares, (b) Xstrata acquiring a majority of the outstanding Falconbridge *common* shares not currently owned by Xstrata or a related party or (c) July 28, 2006.

After July 28, 2006, Xstrata would be permitted to acquire in the market, at *any price*, up to 5% of the outstanding Falconbridge common shares and/or take up a small number of shares that might be tendered to it in its bid. In either case, this may well give Xstrata enough shares, together with its current 20% holding, to frustrate a competing bid including the current offer from Inco and to end the current competitive auction process underway for Falconbridge.

"We continue to support a process in which any acquisition of Falconbridge occurs through a transaction in which all Falconbridge shareholders are able to participate in any premium paid for control and we continue to believe that only the Inco offer currently provides this to shareholders," said Pannell.

FALCONBRIDGE BOARD RECOMMENDATION

"The recommendation of the Falconbridge board remains that the shareholders of Falconbridge tender their to the Inco offer which expires on July 13, 2006. If shareholders wish to speculate that the conditional offer of Xstrata will represent higher value for them that is their prerogative, but they should be aware of the implications of extending the process beyond July 28, 2006 when Xstrata will be able to acquire further Falconbridge shares through market purchases, without any obligation to further extend or enhance its offer to shareholders," said Pannell.

Falconbridge Limited is a leading copper and nickel company with investments in fully integrated zinc and aluminum assets. Inherent in forward-looking statements are risks and uncertainties well beyond Falconbridge's ability to predict or control. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this News Release.

Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions about all of the conditions to the Inco offer being met and the successful completion of a second step business combination transaction.

Inherent in those statements are known and unknown risks, uncertainties and other factors well beyond Falconbridge's ability to control or predict. Some of these known risks and uncertainties are outlined in filings by Falconbridge with applicable securities regulatory authorities, including in Falconbridge's annual information form. Readers are encouraged to consult such filings. While Falconbridge anticipates that subsequent events and developments may cause Falconbridge's views to change, Falconbridge specifically disclaims any obligation to update these forward-looking statements. These forward-looking statements should not be relied upon as representing Falconbridge's views as of any date subsequent to the date of this News Release. Although Falconbridge has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. These factors are not intended to represent a complete list of the factors that could affect Falconbridge and the combination of Inco and Falconbridge.

Important Legal Information

This communication is being made in respect of Inco Limited's proposed combination with Falconbridge Limited. Inco has filed with the U.S. Securities and Exchange Commission ("SEC") a registration statement on Form F-8 (containing an offer to purchase and a share exchange take-over bid circular) and amendments thereto, and, if required, will file other documents with the SEC in connection with the proposed combination. Falconbridge has filed a Schedule 14D-9F and amendments thereto with the SEC in connection with Inco's offer and has filed and, if required, will file other documents regarding the proposed combination with the SEC.

INVESTORS AND SECURITYHOLDERS ARE URGED TO READ THE REGISTRATION STATEMENT AND ANY OTHER RELEVANT DOCUMENTS FILED OR TO BE FILED WITH THE SEC WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION.

Investors and security holders may obtain copies of the registration statement and Inco's and Falconbridge's SEC filings free of charge at the SEC's website (www.sec.gov). In addition, documents filed with the SEC by Inco may be obtained free of charge by contacting Inco's media or investor relations departments. Documents filed with the SEC by Falconbridge may be obtained free of charge by contacting Falconbridge's investor relations department.

Filings made by Inco and Falconbridge with Canadian securities regulatory authorities, including filings made in connection with the offer, are available at www.sedar.com."

On 16 July 2006, Falconbridge made the following public announcement:

"FALCONBRIDGE LIMITED DECLARES SPECIAL DIVIDEND OF C$0.75 PER COMMON SHARE

Toronto, Ontario, July 16, 2006 – The Board of Directors of Falconbridge Limited today declared a special dividend of C$0.75 per common share payable on August 10, 2006 to shareholders of record at close of business on July 26, 2006. The special dividend will be paid regardless of the outcome of the offers to acquire the common shares of Falconbridge.

Falconbridge Limited is a leading copper and nickel company with investments in fully integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel orebodies. It employs 14,500 people at its operations and offices in 18 countries. Falconbridge's common shares are listed on the New York Stock Exchange (FAL) and the Toronto Stock Exchange (FAL). Falconbridge's website can be found at www.falconbridge.com."

On 16 July 2006, Falconbridge, jointly with Phelps Dodge and Inco, made the following public announcement:

"INCO ENHANCES OFFER FOR FALCONBRIDGE

Phoenix, Arizona and Toronto, Ontario, July 17, 2006 – Phelps Dodge Corp., Inco Ltd. and Falconbridge Ltd. announced today that all three companies have taken action to improve the terms of their three-way combination. Phelps Dodge has increased the cash portion of the consideration to be paid to the shareholders of Inco in the combination of Phelps Dodge and Inco by C$2.75 per Inco share. Inco has increased the cash portion of its offer to purchase all outstanding common shares of Falconbridge by C$1.00 per Falconbridge share, and the Falconbridge board of directors has declared a special cash dividend of C$0.75 per Falconbridge common share.

Improved Terms

Under the improved terms, Phelps Dodge will acquire all outstanding common shares of Inco for a combination of cash and common shares of Phelps Dodge having a value of C$80.70 per Inco share, based upon the closing price of Phelps Dodge stock and the closing U.S./Canadian dollar exchange rate on Friday, July 14, 2006. Shareholders of Inco will receive 0.672 shares of Phelps Dodge stock plus C$20.25 per share in cash for each share of Inco stock. This represents a premium of 7.8 percent to Inco's market price as of close of trading on July 14 and a premium of 23.7 percent to Inco's market price as of the close of trading on June 23, the last trading day before the announcement of the combination of Phelps Dodge, Inco and Falconbridge.

Under its enhanced bid for Falconbridge, Inco is now offering C$18.50 plus 0.55676 shares of Inco for each share of Falconbridge, assuming full proration of the consideration. With the completion of both transactions, Falconbridge shareholders would receive an implied total consideration on a "look-through" basis of C$63.43 per Falconbridge common share, consisting of: (a) C$29.77 in cash; and (b) 0.3741 of a Phelps Dodge Inco Corp. common share (based on the closing price of the Phelps Dodge common shares on the New York Stock Exchange and applicable U.S. Federal Reserve U.S.-Canadian dollar exchange rates on July 14, 2006).

Falconbridge Special Dividend

In order to further increase the value received by Falconbridge shareholders, the board of Falconbridge declared a special cash dividend of C$0.75 per Falconbridge share payable on Aug. 10, 2006, to common shareholders of record at the close of business on July 26, 2006. The Falconbridge board also has unanimously determined that Inco's amended offer for the shares of Falconbridge is superior to the unsolicited offer by Xstrata and unanimously recommends that Falconbridge shareholders accept the Inco offer.

Reduction in Minimum Tender Condition

In addition, Inco has reduced the minimum condition in its offer for Falconbridge from two thirds of the outstanding shares of Falconbridge to 50.01 percent of such outstanding shares on a fully diluted basis. Phelps Dodge and Inco also amended their Combination Agreement so that the combination of Phelps Dodge and Inco may be consummated before the acquisition by Inco of 100 percent of Falconbridge. Inco's amended offer for Falconbridge will expire on July 27, 2006.

The three-way combination of Phelps Dodge, Inco and Falconbridge will create one of the world's leading mining companies and the largest based in North America. Phelps Dodge Inco will be the world's leading nickel producer, the largest publicly traded copper producer and a leading producer of molybdenum and cobalt.

As part of the transaction, Phelps Dodge expects to repurchase up to US$5.0 billion of its shares in the 12 months after closing.

J. Steven Whisler, chairman and chief executive officer of Phelps Dodge, said: "We strongly believe the combination of Phelps Dodge, Inco and Falconbridge represents a unique value-creation opportunity for the shareholders of all three companies. There's no question that the value of the enhanced Inco offer for Falconbridge is superior to the unsolicited

offer by Xstrata. In addition to the value inherent in the offer, the Falconbridge shareholders will have the ability to participate in the upside resulting from the three-way combination through their ownership of almost 30 percent of the combined company, which includes a 30 percent share in the $900 million of expected annual synergies, which in total have a net present value of approximately $5.8 billion."

Scott Hand, chairman and chief executive officer of Inco, said: "Today's actions demonstrate our shared commitment to create the leading North American-based mining company and a global powerhouse in copper and nickel. That's great news for our shareholders, for our employees, for our communities and for Canada."

Derek Pannell, chief executive officer of Falconbridge, said: "We are pleased with the actions taken today by Phelps Dodge and Inco and by their affirmation of the value of Falconbridge. The special dividend declared by our board today further enhances the expected return to our shareholders. We are confident our shareholders will see the value in the combination of these three companies to create Phelps Dodge Inco."

All required regulatory approvals for Inco's acquisition of Falconbridge have been received. Phelps Dodge's offer to acquire Inco is expected to close in September, subject to Phelps Dodge and Inco shareholder approval, regulatory approvals and customary closing conditions.

Phelps Dodge is one of the world's leading producers of copper and molybdenum and is the largest producer of molybdenum-based chemicals and continuous-cast copper rod. The company employs 13,500 people worldwide.

Inco is a primary metals company and the world's second largest producer of nickel. It employs 12,000 people around the world at mining operations, production facilities, a research center and through its marketing and sales network.

Falconbridge is a leading copper and nickel company with investments in fully integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel ore bodies. It employs 14,500 people at its operations and offices in 18 countries.

Webcast

Management of Phelps Dodge, Inco and Falconbridge will host a webcast for investors at 9:00 a.m. eastern time Monday, July 17, to discuss the details of the transaction. The webcast can be accessed at www.phelpsdodgeinco.com.

Forward-Looking Statements

These materials include "forward-looking statements" (as defined in Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934) including statements regarding, among other things, the benefits of the combination with Inco and the combined company's plans, objectives, expectations and intentions. All statements other than historical information are forward-looking statements. These forward-looking statements are based on management's current beliefs and expectations, speak only as of the date made, and are subject to a number of significant risks and uncertainties that cannot be predicted or quantified and are beyond our control. Future developments and actual results could differ materially from those set forth in, contemplated by, or underlying the forward-looking statements. The following factors, among others, could cause actual results to differ from those described in the forward-looking statements in this documents: (i) the ability to obtain governmental approvals of the combination on the proposed terms and schedule; (ii) the failure of Inco's shareholders to approve the plan of arrangement; (iii) the failure of Phelps Dodge's shareholders to authorize the issuance of Phelps Dodge common shares, the change of Phelps Dodge's name to Phelps Dodge Inco and an increase in the size of Phelps Dodge's board of directors as required under the combination agreement; (iv) the risks that the businesses of Phelps Dodge and Inco and/or Falconbridge will not be integrated successfully; (v) the risks that the cost savings, growth prospects and any other synergies from the combination may not be fully realized or may take longer to realize than expected; (vi) the combined company's inability to refinance indebtedness incurred in connection with the combination on favorable terms or at all; (vii) the possibility that Phelps Dodge will combine with Inco only; (viii) the possible impairment of goodwill and other long-lived assets resulting from the combination and the resulting impact on the combined company's assets and earnings; and (ix) additional factors that may affect future results of the combined company set forth in Phelps Dodge's, Inco's and Falconbridge's filings with the Securities and Exchange Commission, which filings are available at the SEC's Web Site at (www.sec.gov). Except as required by law, we are under no obligation, and expressly disclaim any obligation, to update, alter or otherwise revise any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise.

Note: In connection with the proposed combination, Phelps Dodge Corporation ("Phelps Dodge") has filed a preliminary proxy statement on Schedule 14A with the SEC. Investors are urged to read the definitive proxy statement (including all

amendments and supplements to it) because it contains important information. Investors may obtain free copies of the definitive proxy statement when it is filed, as well as other filings containing information about Phelps Dodge, Inco and Falconbridge, without charge, at the SEC's Web site (www.sec.gov). Copies of Phelps Dodge's filings may also be obtained without charge from Phelps Dodge at Phelps Dodge's Web site (www.phelpsdodge.com) or by directing a request to Phelps Dodge, One North Central Avenue, Phoenix, Arizona 85004-4415, Attention: Assistant General Counsel and Corporate Secretary (602) 366-8100.

Important Legal Information

This communication may be deemed to be solicitation material in respect of Inco's proposed combination with Falconbridge. Inco filed with the U.S. Securities and Exchange Commission (the "SEC"), on October 24, 2005, and July 14, 2006, registration statements on Form F-8, which include Inco's offer and take-over bid circular, and has filed amendments thereto, which include notices of extension and variation, and will file further amendments thereto as required, in connection with the proposed combination with Falconbridge. The offer and take-over bid circular and the notices of variation and extension have been sent to shareholders of Falconbridge Limited. Inco has also filed, and will file (if required), other documents with the SEC in connection with the proposed combination. Falconbridge has filed a Schedule 14D-9F in connection with Inco's offer and has filed, and will file (if required), amendments thereto and other documents regarding the proposed combination, in each case with the SEC.

Investors and security holders are urged to read the registration statements and any other relevant documents filed or that will be filed with the SEC when they become available because they will contain important information.

Investors and security holders are urged to read Inco's solicitation/recommendation statement on schedule 14D-9 that Inco filed with the SEC on May 31, 2006, and any amendments Inco may file thereto, as it contains, and such amendments, if any, will contain, important information regarding Teck Cominco's proposed combination with Inco.

This communication is not a solicitation of a proxy from any security holder of Inco or Phelps Dodge in respect of Inco's proposed combination with Phelps Dodge. Inco intends to file a Management Information Circular regarding the proposed combination with the securities commissions or equivalent regulatory authorities in Canada and to provide the Management Information Circular to Inco shareholders and Phelps Dodge has filed a preliminary Proxy Statement on Schedule 14A regarding the proposed combination with the SEC. We urge investors to carefully read the management information circular, and any amendments Inco may file thereto, when it becomes available because it, and any such amendments, if any, will contain important information about Inco, Phelps Dodge and the proposed combination. We urge investors to carefully read the Proxy Statement, and any amendments Phelps Dodge may file thereto, because it and such amendments, if any, will contain important information about Inco, Phelps Dodge and Inco's proposed combination with Phelps Dodge.

Inco, Phelps Dodge and their executive officers and directors may be deemed to be participants in the solicitation of proxies from Inco and Phelps Dodge security holders in favor of Inco's proposed combination with Phelps Dodge. Information regarding the security ownership and other interests of Inco's and Phelps Dodge's executive officers and directors will be included in the Management Information Circular and Proxy Statement, respectively.

Investors and security holders may obtain copies of the offer and take-over bid circular, the notices of variation and extension, the registration statement, the Solicitation/Recommendation Statement and Inco's, Falconbridge's and Phelps Dodge's other public filings made from time to time by Inco, Falconbridge and Phelps Dodge with the Canadian Securities Regulators, at www.sedar.com, and with the SEC at the SEC's web site, www.sec.gov, free of charge. The proxy statement may also be obtained free of charge at www.sec.gov and the Management Information Circular (when it becomes available) may also be obtained free of charge at www.sedar.com. In addition, the offer and take-over circular and the other disclosure documents may be obtained free of charge by contacting Inco's media or investor relations departments and copies of Phelps Dodge's filings may be obtained without charge from Phelps Dodge at Phelps Dodge's Web site (www.phelpsdodge.com) or by directing a request to Phelps Dodge, One North Central Avenue, Phoenix, Arizona 85004-4415, Attention: Assistant General Counsel and Corporate Secretary (602) 366-8100."

On 19 July 2006, Falconbridge made the following public announcement:

"FALCONBRIDGE RESPONDS TO REVISED XSTRATA OFFER

TORONTO, ONTARIO, July 19, 2006 — Falconbridge Limited is reviewing the details of Xstrata plc's announcement indicating that it intends to increase its offer for Falconbridge to C$62.50 per common share in cash and waive the minimum tender condition. Under the terms of the offer, the Falconbridge shareholders will also receive the special cash dividend of C$0.75 per common share declared by Falconbridge on July 16, 2006, representing total proceeds of C$63.25

per Falconbridge common share. The revised Xstrata offer will expire on August 14, 2006 and is subject to approvals from Xstrata shareholders and Investment Canada.

The Falconbridge Board of Directors will evaluate the terms of the revised Xstrata offer and provide Falconbridge shareholders with a formal recommendation as soon as it has completed its analysis.

Falconbridge Limited is a leading copper and nickel company with investments in fully integrated zinc and aluminum assets. Its primary focus is the identification and development of world-class copper and nickel orebodies. It employs 14,500 people at its operations and offices in 18 countries. Falconbridge's common shares are listed on the New York Stock Exchange (FAL) and the Toronto Stock Exchange (FAL). Falconbridge's website can be found at www.falconbridge.com.

FORWARD LOOKING INFORMATION

Certain statements contained in this News Release are forward-looking statements (as defined in applicable securities legislation). Examples of such statements include, but are not limited to, statements concerning Inco's offer to acquire all of the common shares of Falconbridge and the anticipated timing for completion of such offer and ancillary transactions upon the requisite regulatory approvals having been obtained. Inherent in forward-looking statements are risks and uncertainties well beyond Falconbridge's ability to predict or control. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this News Release.

Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions about all of the conditions to the Inco offer being met and the successful completion of a second step business combination transaction.

Inherent in those statements are known and unknown risks, uncertainties and other factors well beyond Falconbridge's ability to control or predict. Some of these known risks and uncertainties are outlined in filings by Falconbridge with applicable securities regulatory authorities, including in Falconbridge's annual information form. Readers are encouraged to consult such filings. While Falconbridge anticipates that subsequent events and developments may cause Falconbridge's views to change, Falconbridge specifically disclaims any obligation to update these forward-looking statements. These forward-looking statements should not be relied upon as representing Falconbridge's views as of any date subsequent to the date of this News Release. Although Falconbridge has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. These factors are not intended to represent a complete list of the factors that could affect Falconbridge and the combination of Inco and Falconbridge.

Important Legal Information

This communication is being made in respect of Inco Limited's proposed combination with Falconbridge Limited. Inco has filed with the U.S. Securities and Exchange Commission ("SEC") a registration statement on Form F-8 (containing an offer to purchase and a share exchange take-over bid circular) and amendments thereto, and, if required, will file other documents with the SEC in connection with the proposed combination. Falconbridge has filed a Schedule 14D-9F and amendments thereto with the SEC in connection with Inco's offer and has filed and, if required, will file other documents regarding the proposed combination with the SEC.

INVESTORS AND SECURITYHOLDERS ARE URGED TO READ THE REGISTRATION STATEMENT AND ANY OTHER RELEVANT DOCUMENTS FILED OR TO BE FILED WITH THE SEC WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION.

Investors and security holders may obtain copies of the registration statement and Inco's and Falconbridge's SEC filings free of charge at the SEC's website (www.sec.gov). In addition, documents filed with the SEC by Inco may be obtained free of charge by contacting Inco's media or investor relations departments. Documents filed with the SEC by Falconbridge may be obtained free of charge by contacting Falconbridge's investor relations department.

Filings made by Inco and Falconbridge with Canadian securities regulatory authorities, including filings made in connection with the offer, are available at www.sedar.com."

This is the end of the section including Falconbridge's material public announcements issued and filed with the Canadian Securities Administrators between 29 May 2006 (being the latest practicable date prior to the publication of the Circular) and 19 July 2006 (being the latest practicable date prior to the publication of this document).

Part IV

Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group

[This page is intentionally left blank]

Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group

The information set out in Part IV – "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group" has been incorporated by reference into this Part IV as described in the section of this document headed "Relevant Documentation". Such information should be read as supplemented by the following information. Such information should also be read in conjunction with paragraph 8.1(b) of Part VI – "Additional Information – Material contracts" of this document, which sets out details of the New Debt Underwriting Letter entered into in connection with funding the increased cash consideration that will be payable by the Offeror under the Increased Xstrata Offer if it is successful.

To the extent that the Falconbridge Special Dividend is paid by Falconbridge, Falconbridge's cash will decrease and the amount of Falconbridge net debt assumed by Xstrata on completion of the Proposed Acquisition will increase by a corresponding amount of any such payment. Xstrata estimates, based on publicly available information, that the amount to be paid in respect of the Falconbridge Special Dividend is up to approximately C$285 million (approximately US$251 million) using the weighted average number of Falconbridge Shares of approximately 379,774,000 on a fully-diluted basis for the month ended 30 April 2006. To the extent that the Falconbridge Special Dividend is paid by Falconbridge, Xstrata's cash balance and dividend income would increase by an amount equal to the aggregate Falconbridge Special Dividend received by the Xstrata Group in respect of its holding of Falconbridge Shares at the record time.

Whilst it is Xstrata's intention to secure 100% of the Falconbridge Shares, by amending and subsequently deleting the Minimum Tender Condition under the original Xstrata Offer under the First Xstrata Notice of Variation and the Second Xstrata Notice of Variation, the Offeror may acquire any number of Falconbridge Shares tendered to the Xstrata Offer.

Paragraph 2.2 of Part IV - "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group - Impact of the Proposed Acquisition on the assets, liabilities and earnings of the Enlarged Group - Acquisition of Falconbridge" of the Circular (which has been incorporated by reference into this Part IV as described in the section of this document headed "Relevant Documentation") outlined the expected impact the Proposed Acquisition would have on the Xstrata Group assuming that the Xstrata Group acquired a controlling interest in Falconbridge. Following the deletion of the Minimum Tender Condition, there is a possibility that the Proposed Acquisition may result in the Xstrata Group acquiring a minority stake in excess of 19.8% (the Xstrata Group's existing interest in Falconbridge) but less than a controlling interest (greater than 50%). In such circumstances, Xstrata would equity account for its investment in Falconbridge as an associate, whereby the Xstrata Group's initial investment would be recorded at cost and then adjusted by the Xstrata Group's share of the profit or loss of Falconbridge for each period.

[This page is intentionally left blank]

Part V

Principal Terms of the Proposed Acquisition

[This page is intentionally left blank]

The summary of the principal terms of the Xstrata Offer in Part VI – "Principal Terms of the Proposed Acquisition" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and the following summary of the principal terms of the Increased Xstrata Offer, and the other information in the Circular and this document in respect of the original Xstrata Offer and the Increased Xstrata Offer, are subject in their entirety to the actual terms and conditions set out in the Offer Document as amended and varied by the Variation Documents.

The information set out in Part V – "Principal Terms of the Proposed Acquisition" has been incorporated by reference into this Part V as described in the section of this document headed "Relevant Documentation". Such information should be read as applying to the Increased Xstrata Offer as supplemented and amended by the following information:

The Increased Xstrata Offer

The Offeror is offering, upon and subject to the terms and conditions of the Xstrata Offer, to purchase at a price of C$62.50 in cash all of the issued and outstanding Falconbridge Shares, together with the associated SRP Rights, other than any Falconbridge Shares owned directly or indirectly by the Xstrata Group, and including Falconbridge Shares that may become issued and outstanding after the date of the Xstrata Offer, but before the Expiry Time, upon the conversion, exchange or exercise of any Falconbridge convertible securities (other than SRP Rights).

Under the Second Xstrata Notice of Variation, the Offeror will amend the Xstrata Offer to provide that the consideration under the Xstrata Offer will not be reduced by the amount of the Falconbridge Special Dividend. Prior to these amendments, any distributions (other than regular dividends) declared on and after the date of the original Xstrata Offer (18 May 2006) would be assigned by the tendering Falconbridge Shareholder to the Offeror. The C$62.50 per Falconbridge Share to be offered by the Offeror under the Increased Xstrata Offer, together with the Falconbridge Special Dividend, if and when paid by Falconbridge, would result in a combined amount of C$63.25 cash per Falconbridge Share being paid to holders of Falconbridge Shares that hold Falconbridge Shares on the record date for the Falconbridge Special Dividend and that validly tender and do not withdraw their Falconbridge Shares under the Xstrata Offer. Falconbridge Shareholders of record on 26 July 2006 will be entitled to receive the Falconbridge Special Dividend irrespective of whether they tender their Falconbridge Shares to the Xstrata Offer.

Duration of the Xstrata Offer

The Xstrata Offer is open for acceptance until 8.00 p.m. (Toronto time) on 14 August 2006, or such later or earlier time or times and date or dates as may be fixed by the Offeror from time to time pursuant to the Offer Document (as amended and varied by the Variation Documents), unless the Xstrata Offer is withdrawn in accordance with its terms by the Offeror.

Conditions of the Xstrata Offer

Notwithstanding any other provision of the Xstrata Offer and subject to applicable laws, under the terms of the Offer Document (as amended and varied by the Variation Documents), the Offeror will have the right to withdraw or terminate the Xstrata Offer (or amend the Xstrata Offer to postpone taking up and paying for any Falconbridge Shares deposited under the Xstrata Offer), and shall not be required to accept for payment, take up, purchase or pay for, or extend the period of time during which the Xstrata Offer is open and postpone taking up and paying for, any Falconbridge Shares deposited under the Xstrata Offer, unless all of the conditions set out in Part V – "Principal Terms of the Proposed Acquisition Conditions of the Xstrata Offer" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation"), subject to the following amendments, are satisfied or waived by the Offeror at or prior to the Expiry Time:

(a) the variation under the First Xstrata Notice of Variation of the Minimum Tender Condition to delete part (i) of that condition requiring there to have been validly deposited under the Xstrata Offer and not withdrawn at the Expiry Time such number of Falconbridge Shares that, together with Falconbridge Shares held by the Offeror and its affiliates (as defined in the OSA), constitutes at least 66⅔% of the Falconbridge Shares then outstanding (calculated on a fully-diluted basis), so that the Minimum Tender Condition as amended only requires there to have been validly deposited under the Xstrata Offer and not withdrawn at the Expiry Time at least a majority of the Falconbridge Shares then outstanding (calculated on a fully-diluted basis), the votes attached to which would be included in the minority approval of a second step business combination or going private transaction pursuant to Rule 61-501 and Regulation Q-27;

(b) the deletion under the Second Xstrata Notice of Variation of the Minimum Tender Condition (as previously amended under the First Xstrata Notice of Variation) to delete the condition described in paragraph (a) of Part V – "Principal Terms of the Proposed Acquisition – Conditions of the Xstrata Offer" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation" and as supplemented and amended by the information in this Part V), so that the Xstrata Offer is not conditional on any minimum number of Falconbridge Shares being deposited. Subject to applicable laws and the satisfaction or waiver of each condition of the Xstrata Offer, the Offeror may, in its discretion, at any time before the Expiry Time if the applicable rights to withdraw any deposited Falconbridge Shares have expired, take up and pay for all such Falconbridge Shares then deposited under the Xstrata Offer and the Offeror shall take up and pay for all additional Falconbridge Shares validly deposited under the Xstrata Offer thereafter not later than 10 days after such deposit; and

(c) the variation under the Second Xstrata Notice of Variation of the condition described in paragraph (l) of Part V – "Principal Terms of the Proposed Acquisition – Conditions of the Xstrata Offer" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation" and as supplemented and amended by the information in this Part V), so that such condition, as amended, requires that Xstrata Shareholders shall have approved the acquisition of Falconbridge Shares pursuant to the Increased Xstrata Offer.

Each of the conditions described in paragraphs (d)(i), (d)(ii) and (d)(iii) of Part V – "Principal Terms of the Proposed Acquisition – Conditions of the Xstrata Offer" of the Circular (which have been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation" and as supplemented and amended by the information in this Part V) has been satisfied following the issue of an ARC by the Canadian Commissioner of Competition in respect of the purchase of the Falconbridge Shares by the Offeror, expiry of the applicable waiting period under the HSR Act with respect to the Xstrata Offer and approval of the Xstrata Offer under the EC Merger Regulation.

The conditions of the Xstrata Offer are for the sole benefit of the Offeror and may be asserted by the Offeror at any time, regardless of the circumstances giving rise to any such assertion or may be waived by the Offeror in whole or in part at any time and from time to time in its sole discretion, without prejudice to any other right which the Offeror may have. The failure by the Offeror at any time to exercise any of the rights in respect of the Xstrata Offer shall not be deemed to be a waiver of any such right, the waiver of any such right with respect to particular facts and circumstances will not be deemed a waiver with respect to any other facts and circumstances, and each such right shall be deemed to be an ongoing right which may be asserted at any time and from time to time. Any determination by the Offeror concerning the events described in the conditions of the Xstrata Offer shall be final and binding on all parties.

Any waiver of a condition or the withdrawal of the Xstrata Offer will be effective upon written notice or other communication confirmed in writing by the Offeror to that effect to the depositary of the Xstrata Offer at its principal office in the City of Toronto. Forthwith after giving any such notice, the Offeror will make a public announcement of such waiver or withdrawal, will cause the depositary of the Xstrata Offer as soon as practicable thereafter to notify the Falconbridge Shareholders in the manner set forth in the Offer Document (as amended and varied by the Variation Documents and in accordance with applicable law) and will provide a copy of the aforementioned notice to the TSX and the NYSE. If the Xstrata Offer is withdrawn, the Offeror will not be obligated to take up or pay for any Falconbridge Shares deposited under the Xstrata Offer.

Part VI

Additional Information

1. Responsibility

The Directors, whose names are set out in the header of the letter in Part I – "Letter from the Chairman" of this document, accept responsibility for the information contained in this document. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case), the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of such information.

The Directors confirm that the information relating to the Falconbridge Group, which has been sourced from information included in public documents filed by the Falconbridge Group, has been accurately reproduced from those sources and, as far as the Company is aware and is able to ascertain from information included in public documents filed by the Falconbridge Group, no facts have been omitted which would render the reproduced information inaccurate or misleading.

2. Directors', Senior Executives' and others' interests

The information set out in paragraph 2 of Part VI – "Additional Information - Directors', Senior Executives' and others' interests" (excluding paragraph 2.4 – "Interests of major shareholders") has been incorporated by reference into this paragraph 2 as described in the section of this document headed "Relevant Documentation". Such information should be read as supplemented and, where relevant, amended by the following information:

Interests of major shareholders

Interests for the purposes of the Companies Act

Insofar as is known to Xstrata, the name of each person who, directly or indirectly, has an interest in Xstrata's ordinary share capital which is notifiable under Part VI of the Companies Act, and the amount of such person's interest, as at 19 July 2006 (being the latest practicable date prior to the publication of this document) are as follows:

	Ordinary Shares	
Name	**No.**	**%**
Credit Suisse Securities (Europe) Limited[1]	151,975,911	21.56
Glencore International AG[1]	101,040,400	14.34
AXA Investment Managers UK Limited[2]	2,168,783	0.31

[1] As a result of their participation in a capital management programme entered into by Glencore International, CSFB Equities and CSSEL in connection with the Xstrata Group's acquisition of MIM Holdings Limited (now known as Xstrata Queensland Limited) and the associated rights issue, Glencore International, CSFB Equities and CSSEL are jointly interested in 253,016,311 Ordinary Shares, representing approximately 35.90% of the current issued ordinary share capital of the Company. In addition to the interests of CSFB Equities and CSSEL, Xstrata has been informed by Credit Suisse that: (i) an additional 360,072 Ordinary Shares, representing approximately 0.05% of the current issued ordinary share capital of the Company, were in the course of settlement at the relevant time in the notification and the registered holder of such Ordinary Shares was not known; and (ii) Credit Suisse International has interests in a further 10,406,083 Ordinary Shares, representing approximately 1.48% of the current issued ordinary share capital of the Company.

[2] AXA Investment Managers UK Limited ("AXA") notified the Company on 7 June 2006 that AXA holds a beneficial interest in 2,168,783 Ordinary Shares or approximately 0.31% of the current issued ordinary share capital of the Company and a non-beneficial interest in 76,241,308 Ordinary Shares or approximately 10.82% of the current issued ordinary share capital of the Company. In total, AXA is therefore deemed to have an interest in 78,410,091 Ordinary Shares, representing approximately 11.12% of the current issued ordinary share capital of the Company.

3. Directors' service agreements and letters of appointment

3.1 Mr. Davis and Mr. Reid have employment agreements with Xstrata Services (UK) Limited but their services as Chief Executive and Chief Financial Officer respectively are provided to the Company under a secondment agreement entered into between the Company and Xstrata SL on 19 March 2002. Each of Mr. Davis and Mr. Reid are seconded to the Company for a fixed term of two years thereafter renewable by the Company for further periods of two years. The secondment agreements of Mr. Davis and Mr. Reid were renewed for the two year period commencing on 19 March 2004 and ending on 19 March 2006 and further renewed for the two year period commencing on 19 March 2006 and ending on 19 March 2008.

Under their employment agreements, Mr. Davis' salary is currently £1,000,000 per annum and Mr. Reid's salary is £470,693 per annum. In addition, each of Mr. Davis and Mr. Reid receives permanent health, life and private medical insurance, a housing allowance of US$183,000 per annum and US$141,660 per annum respectively (to enable each to maintain a residence in Switzerland so as to qualify under Swiss law for a work permit) and participates in money purchase retirement plans to which neither is required to make any contribution. In addition, Mr. Reid is eligible to participate in the Xstrata LTIP and each of Mr. Davis and Mr. Reid is eligible to participate in the annual bonus scheme operated by the Company.

The employment of Mr. Davis and Mr. Reid may be terminated by not less than 12 months' notice by Xstrata SL or the Director concerned. On a termination of the employment agreement by Xstrata SL in breach, or if Mr. Davis or Mr. Reid resigns in circumstances where he cannot in good faith be expected to continue in employment, he is entitled to be paid a sum equal to 150% of his annual salary, an amount equal to his previous year's bonus and to have all entitlements under any retirement benefit arrangements in which he participates paid up to the date of termination of employment in accordance with the relevant plan rules.

3.2 Mr. Zaldumbide has a professional services agreement with Asturiana de Zinc, S.A. dated 29 January 1998 as renewed on 29 January 2001 and 4 February 2004 to act as Chairman of Asturiana. The agreement is in force until 28 February 2007 (previously 29 January 2007) and continues thereafter indefinitely unless terminated by Asturiana giving six months' notice to that effect provided that such notice may not be given to result in his employment termination before 28 February 2007.

Up until 31 December 2002, Mr. Zaldumbide was entitled to a total fee for the term of his agreement of €3,005,060 payable at the rate of €601,012 per annum less any fees from external directorships. This contract predates the acquisition of Asturiana. With effect from 1 June 2003, the Remuneration Committee concluded an agreement with Mr. Zaldumbide that his annual fee should be reviewed in line with the other executive directors of the Company. His fee for the year ended 31 December 2006 is €829,450. Mr. Zaldumbide receives no pension benefits under the terms of his fixed cost remuneration arrangement. On termination of the agreement, other than on his voluntary termination or termination for gross negligence, Mr. Zaldumbide is entitled to receive a sum from the redemption of an insurance policy (acquired by Asturiana for a premium of €3,005,060), including any with profits bonus payable under the policy less the compensation received by him during the term of the agreement. This part of the agreement is not affected by the review.

On termination of the agreement by expiry of the fixed term, Mr. Zaldumbide is entitled to receive the capital redemption value of the policy, including the with profit bonus element, minus the aforementioned amount of €3,005,060 which he will already have received. Mr. Zaldumbide's entitlements under the insurance policy are in lieu of his receiving pension benefits. In addition, Mr. Zaldumbide is entitled to participate in the Xstrata LTIP and annual bonus scheme operated by the Company. Mr. Zaldumbide is engaged as a director of the Company on the terms of a letter of appointment dated 11 March 2002. The appointment, subject to re-election when appropriate by the Company in general meeting, is on an indefinite basis subject to the existence of the agreement between Mr. Zaldumbide and Asturiana. Mr. Zaldumbide receives no additional remuneration for his position as a director of the Company.

3.3 Mr. Strothotte is engaged by the Company as a non-executive director and Chairman on the terms of a letter of appointment. The appointment is for an initial fixed term of 36 months commencing on 25 February 2002 and is terminable thereafter by six months notice by Mr. Strothotte. The Company may terminate Mr. Strothotte's appointment at any time and on such termination Mr. Strothotte will not be entitled to any compensation for loss of office. The term may be renewed by the board of directors of the Company. Mr. Strothotte receives an annual fee of £200,000 as Chairman of the Company and for his membership and chairmanship of the Company's Remuneration Committee. His appointment is subject to confidentiality undertakings.

3.4 Mr. Rough is engaged by the company as a non-executive Director and Deputy Chairman on the terms of a letter of appointment. The appointment is for an initial fixed term of 36 months which commenced on 1 April 2002 and is terminable by six months' notice by Mr. Rough. The Company may terminate Mr. Rough's appointment at any time and on such termination Mr. Rough will not be entitled to any compensation for loss of office. The term may be renewed by the board of directors of the Company. Mr. Rough was also appointed Senior Independent Director by the Board. He receives an annual fee of £140,000 as Deputy Chairman and for his membership of the Company's Remuneration Committee, Audit Committee and HSEC Committee, and for his membership and chairmanship of the Nominations Committee. His appointment is subject to confidentiality undertakings.

3.5 Until his resignation as a director of the Company with effect from 10 May 2006, Mr. Issroff was engaged by the Company as a non-executive director on the terms of a letter of appointment. The appointment was for an initial fixed term of 36 months which commenced on 25 February 2002 and was terminable by six months' notice by Mr. Issroff. The Company was entitled to terminate Mr. Issroff's appointment at any time and on such termination Mr. Issroff would not have been entitled to any compensation for loss of office. The term was renewable by the board of directors of the Company. Mr. Issroff received an annual fee of £63,000 and is subject to confidentiality undertakings. Mr. Issroff has

confirmed to the Company that he has no outstanding claims against the Company or any of its subsidiaries in respect of remuneration, fees, costs, expenses or otherwise.

3.6 Mr. Glasenberg is engaged by the Company as a non-executive director on the terms of a letter of appointment. The appointment is for an initial fixed term of 36 months which commenced on 25 February 2002 and is terminable thereafter by six months' notice by Mr. Glasenberg. The Company may terminate Mr. Glasenberg's appointment at any time and on such termination Mr. Glasenberg will not be entitled to any compensation for loss of office. The term may be renewed by the board of directors of the Company. Mr. Glasenberg receives an annual fee of £63,000 and is subject to confidentiality undertakings. Mr. Glasenberg receives an additional annual fee of £10,000 for his membership of the Company's Nominations Committee.

3.7 Mr. Hazen is engaged by the Company as a non-executive director on the terms of a letter of appointment. The appointment is for an initial fixed term of 36 months commencing on 25 February 2002 and is terminable thereafter by six months' notice by Mr. Hazen. The Company may terminate Mr. Hazen's appointment at any time and on such termination Mr. Hazen will not be entitled to any compensation for loss of office. The term may be renewed by the board of directors of the Company. Mr. Hazen receives an annual fee of £63,000 and is subject to confidentiality undertakings. Mr. Hazen receives an additional annual fee of £10,000 for his membership of the Company's Remuneration Committee.

3.8 Mr. MacDonnell is engaged by the Company as a non-executive director on the terms of a letter of appointment. The appointment is for an initial fixed term of 36 months which commenced on 25 February 2002 and is terminable thereafter by six months' notice by Mr. MacDonnell. The Company may terminate Mr. MacDonnell's appointment at any time and on such termination Mr. MacDonnell will not be entitled to any compensation for loss of office. The term may be renewed by the board of directors of the Company. Mr. MacDonnell receives an annual fee of £63,000 and is subject to confidentiality undertakings. Mr. MacDonnell receives an additional annual fee of £10,000 for his membership of the Company's Nominations Committee.

3.9 Dr. Roux is engaged by the Company as a non-executive director on the terms of a letter of appointment. The appointment is for an initial fixed term of 36 months which commenced on 25 February 2002 and is terminable thereafter by six months' notice by Dr. Roux. The Company may terminate Dr. Roux's appointment at any time and on such termination Dr. Roux will not be entitled to any compensation for loss of office. The term may be renewed by the board of directors of the Company. Dr. Roux receives an annual fee of £63,000 and is subject to confidentiality undertakings. Dr. Roux receives additional annual fees of £10,000 each for his membership of the Company's Audit Committee and HSEC Committee.

3.10 Sir Steve Robson is engaged by the Company as a non-executive director on the terms of a letter of appointment. The appointment is for an initial fixed term of 36 months which commenced on 25 February 2002 and is terminable thereafter by six months' notice by Sir Steve. The Company may terminate Sir Steve's appointment at any time and on such termination he will not be entitled to any compensation for loss of office. The term may be renewed by the board of directors of the Company. Sir Steve receives an annual fee of £90,000 as a non-executive director and for his membership and chairmanship of the Company's Audit Committee. His appointment is subject to confidentiality undertakings.

3.11 Mr. Strachan is engaged by the Company as a non-executive director on the terms of a letter of appointment. The appointment is for an initial fixed term of 36 months which commenced on 8 May 2003 and is terminable thereafter by six months' notice by Mr. Strachan. The Company may terminate Mr. Strachan's appointment at any time and on such termination Mr. Strachan will not be entitled to any compensation for loss of office. The term may be renewed by the board of directors of the Company. Mr. Strachan receives an annual fee of £63,000 and is subject to confidentiality undertakings. Mr. Strachan receives additional annual fees of £10,000 each for his membership of the Company's Audit Committee and HSEC Committee and a further £7,000 fee as chairman of the HSEC Committee.

4. Details of key individuals important to Falconbridge's business

The information set out in paragraph 4 of Part VI – "Additional Information - Details of key individuals important to Falconbridge's business" has been incorporated by reference into this paragraph 4 as described in the section of this document headed "Relevant Documentation". Such information has been derived solely from information included in public documents filed by the Falconbridge Group and has not, for the purposes of this document or the Circular, been

commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Nothing in the previous sentence is intended to qualify the statements in paragraph 1 of this Part VI.

5. Related party transactions

The following are descriptions of the material provisions of agreements and other arrangements between Xstrata and various individuals and entities that may be deemed to be related parties:

(a) the Cerrejón Acquisition Agreement, a description of which is set out in Part III of the Cerrejón Circular – "Principal Terms of the Proposed Acquisition", which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation";

(b) the transactions and arrangements described in Part IV of the Cerrejón Circular – "The Xstrata Group's Relationship with Glencore", which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation"; and

(c) the related party transactions and arrangements described in the following parts of the following documents, which have been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation":

(i) pages 45 and 46 inclusive and pages 49 to 53 inclusive (excluding paragraph 4 on page 53) of the Cerrejón Circular;

(ii) pages 104 to 108 inclusive of the Financial Statements to the Annual Report and Accounts for the financial year ended 31 December 2005;

(iii) pages 145 to 148 (inclusive) of the Annual Report and Accounts for the financial year ended 31 December 2004; and

(iv) pages 149 to 151 (inclusive) of the Annual Report and Accounts for the financial year ended 31 December 2003.

6. Litigation

6.1 Xstrata Group

Except as set out in paragraph 6.1 of Part VI – "Additional Information – Litigation – Xstrata Group" of the Circular, which has been incorporated by reference into this paragaraph 6.1 as described in the section of this document headed "Relevant Documentation" and below, no member of the Xstrata Group is engaged in or, so far as Xstrata is aware, has pending or threatened, any governmental, legal or arbitration proceedings which may have, or have had in the recent past (covering the 12 months preceding the date of this document), a significant effect on the Company and/or the Xstrata Group's financial position or profitability.

Total Coal arbitration and court proceedings

As described in paragraph 6.1 of Part VI – "Additional Information – Litigation – Xstrata Group" of the Circular, there are arbitration proceedings between Tavistock Collieries (Proprietary) Limited ("Tavistock"), a member of the Xstrata Group, and Total Coal South Africa (Proprietary) Limited ("Total Coal"). The aforesaid arbitration proceedings relate to a joint venture agreement between Tavistock and Total Coal. The joint venture agreement has been cancelled. The arbitration proceedings are concerned with, amongst other things:

(a) the dissolution of the joint venture and the manner in which the assets contributed to the joint venture by the parties are to be distributed;

(b) a determination as to which party breached the joint venture agreement;

(c) a claim for damages by Tavistock from Total Coal of an amount of ZAR835,963,019.19 (approximately US$117 million); and

(d) a claim for damages by Total Coal from Tavistock of an amount of ZAR1,734,082,000.00 (approximately US$243 million).

The aforesaid claims for damages are amounts referred to in the pleadings exchanged between the parties and remain subject to determination in terms of the arbitration proceedings. The Company is of the view that Tavistock is entitled to dissolve the joint venture as a result of a breach by Total Coal.

Arbitration proceedings were conducted between the parties during the period from 22 May 2006 to 15 June 2006. At the conclusion of the arbitration cession (on 15 June 2006) the arbitration tribunal issued an award which has substantially disposed of the issue relating to the manner in which the assets contributed by the parties to the joint venture are to be distributed. Further arbitration proceedings have been scheduled for the entire month of September 2006. The purpose of such arbitration proceedings will be to deal, amongst other things, with the effect of the letter agreement (described in paragraph 6.1 of Part VI – "Additional Information – Litigation – Xstrata Group" of the Circular) dated 15 August 2002 between Total Coal, Tavistock, Xstrata South Africa (Proprietary) Limited and Duiker Mining (Pty) Ltd concerning the mining authorisation and subsequent mining right in respect of the ATC and ATCOM mining areas.

It is not possible to state with any certainty when all of the disputes between Tavistock and Total Coal will be finalised.

Based on legal advice obtained, the Company is of the view that the Xstrata Group's prospects of success in the arbitration and in the High Court proceedings described in paragraph 6.1 of Part VI – "Additional Information – Litigation – Xstrata Group" of the Circular are good.

6.2 Falconbridge Group

The information in paragraph 6.2 of Part VI – "Additional Information – Litigation – Falconbridge Group" of the Circular, which has been incorporated by reference into this paragraph 6.2 as described in the section of this document headed "Relevant Documentation" has been derived solely from information included in public documents filed by the Falconbridge Group and third parties and has not, for the purposes of this document or the Circular, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Nothing in the previous sentence is intended to qualify the statements in paragraph 1 of this Part VI. So far as Xstrata is aware, except as set out in paragraph 6.2 of Part VI – "Additional Information – Litigation – Falconbridge Group", no member of the Falconbridge Group is engaged in or has pending or threatened, any governmental, legal or arbitration proceedings which may have, or have had in the recent past (covering the 12 months preceding the date of this document), a significant effect on Falconbridge and/or the Falconbridge Group's financial position or profitability.

It is not possible for Xstrata to make an assessment of the merits of the claims set out in paragraph 6.2 of Part VI – "Additional Information – Litigation – Falconbridge Group" of the Circular against Falconbridge at this time as a result of the Xstrata Group's lack of due diligence access to Falconbridge. See the section of this document headed "Presentation of Information – Presentation of information on the Falconbridge Group".

7. Significant changes

7.1 Xstrata Group

The information set out in paragraph 7.1 of Part VI – "Additional Information – Significant changes – 7.2 Xstrata Group" of the Circular has been incorporated by reference into this paragraph 7.1 as described in the section of this document headed "Relevant Documentation". Such information should be read as supplemented and amended by the following information:

The Proposed Acquisition and related financing arrangements

In connection with the Increased Xstrata Offer, on 19 July 2006 the Xstrata Group entered into the New Debt Underwriting Letter under which an aggregate of US$9.5 billion is available to the Xstrata Group.

The principal terms of the Increased Xstrata Offer under which the Xstrata Group is offering approximately C$19.2 billion (approximately US$16.9 billion) in cash and providing that the consideration under the Xstrata Offer would not be reduced by the amount of the Falconbridge Special Dividend of C$0.75 per Falconbridge Share, are described in Part V – "Principal Terms of the Proposed Acquisition" of the Circular and Part V – "Principal Terms of the Proposed Acquisition" of this document.

The financing arrangements in relation to the Increased Xstrata Offer are described in paragraphs 8.1(c) to 8.1(e) of Part VI – "Additional Information – Material contracts" of the Circular and paragraph 8.1(b) of this Part VI.

Other than as outlined in paragraph 7.1 of Part VI – "Additional Information – Significant changes – Xstrata Group" of the Circular and this paragraph 7.1 above, there has been no significant change in the financial or trading position of the Xstrata Group since 31 December 2005, the date to which the latest published audited financial information of the Xstrata Group was prepared.

7.2 Falconbridge Group

The information in paragraph 7.2 of Part VI – "Additional Information – Significant changes – Falconbridge Group", which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation", and the following information has been derived solely from information included in public documents published by Falconbridge and has not, for the purposes of this document or the Circular, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Nothing in the previous sentence is intended to qualify the statements in paragraph 1 of this Part VI.

Takeover bid for Novicourt

On 22 June 2006, Falconbridge announced that it would offer to acquire by way of takeover bid all of the outstanding common shares of its subsidiary Novicourt Inc. ("Novicourt") that it did not already own (7,620,207 shares) at a cash offer price of C$2.30 per Novicourt share, or an aggregate of approximately C$17.5 million. Falconbridge stated that at the time of the announcement it held approximately 62.1% of the outstanding common shares of Novicourt. Falconbridge also stated that the offer was subject to customary conditions, including the condition, which may not be waived by Falconbridge, that not less than 50% of the Novicourt shares subject of the offer be tendered to the bid.

Falconbridge stated that, after Falconbridge advised the Novicourt board of directors on 15 March 2006 of its intention to make such an offer, a special committee comprised of independent directors of Novicourt (the "Special Committee") was formed to evaluate the Falconbridge proposal and supervise the preparation of a formal valuation of Novicourt. Falconbridge's announcement continued that, upon receipt on 22 June 2006 of the Special Committee's recommendation and the formal valuation and fairness opinion of Orion Securities Inc., which stated that in its opinion the Falconbridge offer was fair, from a financial point of view, to the Novicourt minority shareholders, the members of the board of directors of Novicourt (who are according to Falconbridge's announcement not related to Falconbridge) voted unanimously to recommend that Novicourt shareholders tender their shares to the Falconbridge offer for Novicourt.

Falconbridge stated the takeover bid circular was expected to be mailed to Novicourt's shareholders on or about 30 June 2006.

On successful completion of the bid, Falconbridge stated that, if necessary, it intended to initiate a second-step acquisition transaction for the remaining shares of Novicourt in order that Novicourt continue as a wholly-owned private company subsidiary of Falconbridge.

Falconbridge issued its takeover bid circular dated 26 June 2006. Novicourt's board of directors issued its recommendation to accept the Falconbridge bid in a directors' circular dated 26 June 2006. The Falconbridge bid for Novicourt expires at 6:00 p.m. (Toronto time) on 9 August 2006.

LionOre Agreement

On 7 June 2006, Falconbridge and Inco announced that they had reached a definitive agreement with LionOre Mining International Ltd. ("LionOre") covering the sale by Falconbridge to LionOre of the Falconbridge Divested Assets for US$650 million (subject to certain adjustments) as described in paragraph 3 of Part I – "Letter from the Chairman – Recent developments concerning the Inco Offer for Falconbridge" of this document and paragraph 8.2(d) of this Part VI. Xstrata understands that Falconbridge will not be obliged to sell the Falconbridge Divested Assets to LionOre if the Xstrata Group acquires Falconbridge under the Proposed Acquisition.

Inco Offer synergies

On 31 May 2006, Falconbridge and Inco indicated that their operations personnel had jointly identified the potential to realise estimated average annual pre-tax operating and corporate synergies of approximately US$550 million, an increase of

US$200 million from the estimated synergies at the time of the announcement of the original Inco Offer, as described in paragraph 5 of Part I – "Letter from the Chairman – Benefits and financial impact of the Proposed Acquisition – The Enlarged Group following successful completion of the Proposed Acquisition" of this document.

Falconbridge Special Dividend

On 16 July 2006, Falconbridge announced the declaration by its board of directors of the Falconbridge Special Dividend, being a special cash dividend of C$0.75 per Falconbridge Share payable by Falconbridge on 10 August 2006 to Falconbridge Shareholders of record at the close of business on 26 July 2006. Xstrata estimates, based on publicly available information using the weighted average number of Falconbridge Shares of approximately 379,774,000 on a fully-diluted basis for the month ended 30 April 2006, that Falconbridge will make a cash payment of up to approximately C$285 million (approximately US$251 million) in respect of the Falconbridge Special Dividend.

As far as Xstrata is aware, having regard to published information, other than as outlined in paragraph 7.2 of Part VI – "Additional Information – Significant changes – Falconbridge Group" of the Circular, which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation", and this paragraph 7.2 above, there has been no significant change in the financial or trading position of the Falconbridge Group since 31 December 2005, the date to which the latest published audited financial information of the Falconbridge Group was prepared.

8. Material contracts

8.1 Xstrata Group

The contracts described in paragraph 8.1 of Part VI – "Additional Information – Material contracts – Xstrata Group" of the Circular, which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation", and the following contracts are the only contracts (not being contracts entered into in the ordinary course of business) that have been entered into by Xstrata or any member of the Xstrata Group within the two years immediately preceding the date of this document which are or may be material to the Xstrata Group or which have been entered into by Xstrata or any member of the Xstrata Group at any other time and which contain provisions under which Xstrata or any member of the Xstrata Group has an obligation or entitlement that is material to the Xstrata Group as at the date of this document:

(a) The Increased Xstrata Offer pursuant to the Offer Document (as amended and varied by the Variation Documents), details of which are provided in Part V – "Principal Terms of the Proposed Acquisition" of the Circular and Part V – "Principal Terms of the Proposed Acquisition" of this document.

(b) An underwriting letter dated 19 July 2006 (the "New Debt Underwriting Letter"), between, amongst others, Xstrata (Schweiz) AG, Barclays, Deutsche Bank, JPMorgan Chase and RBS (Barclays, Deutsche Bank, JPMorgan Chase and RBS together the "Debt Underwriters") pursuant to which each of the Debt Underwriters has underwritten severally 25% of each of the following facilities:

(i) the New Acquisition Facilities Agreement; and

(ii) the New Debt Bridge Facility Agreement.

Each Debt Underwriter may terminate its underwriting commitment if (amongst other things) the New Acquisition Facilities Agreement and the New Debt Bridge Facility Agreement are not executed on or before the date falling three months after 17 May 2006. However, Xstrata (Schweiz) AG may execute the New Acquisition Facility Agreement and the New Debt Bridge Facility Agreement in advance of the Xstrata Offer being declared unconditional if it so chooses.

The agreed form of each of the New Acquisition Facilities Agreement and the New Debt Bridge Facility Agreement (each as described below) is attached to the New Debt Underwriting Letter.

Upon execution:

(i) the New Acquisition Facilities Agreement will provide Xstrata (Schweiz) AG with facilities (the "New Acquisition Facilities") which consist of: (i) a 36-month term loan facility for US$3,353,000,000 ("Facility A"); (ii) a 60-month-

and-one-day term loan facility for US$1,117,000,000 ("Facility B"); (iii) a 60-month revolving loan facility for US$3,353,000,000 ("Facility C"); and (iv) a 364-day term loan facility for US$1,677,000,000 with the ability to extend (at Xstrata (Schweiz) AG's option) by 364 days ("Facility D"); and

(ii) the New Debt Bridge Facility Agreement will provide Xstrata (Schweiz) AG with a facility (the "New Debt Bridge Facility") which consists of a six-month term loan facility for US$2,500,000,000 with the ability to extend (at Xstrata (Schweiz) AG's option) by 364 days.

The material terms of the New Acquisition Facilities and the New Debt Bridge Facility (other than principal amount) are the same as the material terms of the Original Acquisition Facilities and the Debt Bridge Facility, details of which are set out in paragraph 8.1(c) of Part VI – "Additional Information – Material contracts" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

Xstrata has used part of the proceeds of the Placing to prepay the Second Existing Facility (details of which were provided in paragraph 8.1(n) of Part VI – "Additional Information – Material contracts" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation")).

8.2 Falconbridge Group

The information in paragraph 8.2 of Part VI – "Additional Information – Material contracts – Falconbridge Group", which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation", and the following information has been derived solely from information included in public documents published by Falconbridge and has not, for the purposes of this document or the Circular, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Nothing in the previous sentence is intended to qualify the statements in paragraph 1 of this Part VI. So far as Xstrata is aware, the contracts described in paragraph 8.2 of Part VI – "Additional Information – Material contracts – Falconbridge Group" of the Circular, which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation", and the following contracts, not being contracts entered into in the ordinary course of business, have been entered into by a member of the Falconbridge Group within the two years immediately preceding the date of this document or are expected to be entered into prior to the date of this document and are, or may be, material or have been entered into at any time by a member of the Falconbridge Group and contain any provisions under which a member of the Falconbridge Group has an obligation or entitlement which is, or may be, material to the Falconbridge Group as at the date of this document:

(a) A sixth amending agreement dated 16 July 2006 (the "Sixth Amending Agreement") between Inco and Falconbridge amending the Inco Support Agreement.

Under the terms of the Sixth Amending Agreement, Inco agreed to increase the maximum cash consideration offered to holders of Falconbridge Shares pursuant to the Inco Offer to C$7,080,125,473. The maximum number of Inco common shares issuable under the Inco Offer was also reduced to 213,077,333 Inco shares from 213,171,558 Inco shares reflecting a reduction in the number of Falconbridge Shares outstanding on an adjusted fully-diluted basis since 25 June 2006. As a result, Falconbridge Shareholders would be entitled to elect to receive either: (a) C$60.20 in cash for each Falconbridge Share held; or (b) 0.80312 of an Inco common share plus C$0.05 in cash for each Falconbridge Share held, subject, in each case, to pro-ration based upon the maximum amount of cash available and the maximum number of Inco common shares issuable under the Inco Offer.

Under the terms of the Sixth Amending Agreement, Falconbridge acknowledged the reduction of the minimum tender condition of the Inco Offer from 66⅔% to 50.01%, with the result that the Inco Offer was made subject to the condition that there have been validly deposited under the Inco Offer and not withdrawn at the expiry time of the Inco Offer such number of Falconbridge Shares which, together with any Falconbridge Shares directly or indirectly owned by Inco, constitutes at least 50.01% of the Falconbridge Shares outstanding at the expiry time of the Inco Offer (calculated on a fully-diluted basis).

Inco consented to the declaration and payment of the Falconbridge Special Dividend under the Inco Support Agreement and agreed that Falconbridge would be permitted to reduce the exercise price of any option outstanding

on 16 July 2006 under its stock option plans that are exercised after 16 July 2006 by the amount of the Falconbridge Special Dividend in respect of each Falconbridge Share for which any such option is exercised.

Falconbridge also confirmed that the board of directors of Falconbridge, upon consultation with its financial and legal advisors, had unanimously determined that the increased price under the Inco Offer announced on 16 July 2006 was fair from a financial point of view to all Falconbridge Shareholders (other than Inco) and that it was in the best interests of Falconbridge for the Inco Offer to be made and for the board of directors of Falconbridge to support the transactions contemplated by the Inco Support Agreement, as amended. Accordingly, the board of directors of Falconbridge unanimously approved the making of a recommendation that Falconbridge Shareholders accept the Inco Offer and tender their Falconbridge Shares to the Inco Offer.

(b) A fifth amending agreement dated 25 June 2006 (the "Fifth Amending Agreement") between Inco and Falconbridge amending the Inco Support Agreement.

Under the terms of the Fifth Amending Agreement, Inco agreed to increase the cash consideration and the share consideration offered to holders of Falconbridge Shares pursuant to the Inco Offer to C$53.83 in cash and to 0.82419 of an Inco common share, respectively, per Falconbridge Share.

As a result, Falconbridge Shareholders were entitled to elect to receive either C$53.83 in cash for each Falconbridge Share held or 0.82419 of an Inco common share plus C$0.05 in cash for each Falconbridge Share held, subject in each case to pro-ration based upon the maximum amount of cash available and the maximum number of Inco common shares issuable under the Inco Offer.

The maximum amount of cash consideration available under the Offer was increased to C$6,700,377,653 and the maximum number of Inco common shares available for issuance under the Inco Offer was increased to 213,171,558 Inco common shares.

Assuming full pro-ration of these maximum amounts, Falconbridge Shareholders would be entitled to receive C$17.50 in cash and 0.55676 of an Inco common share for each Falconbridge Share tendered to the Inco Offer, subject to adjustment for fractional shares.

Falconbridge and Inco also agreed to a corresponding adjustment to the number of Inco common shares to be received by holders of Falconbridge options following successful completion of the Inco Offer.

The Fifth Amending Agreement also amended the Inco Support Agreement to provide that the Inco Support Agreement may be terminated by either Inco or Falconbridge in the event: (i) the other party has not complied in all material respects with its covenants or obligations under the Inco Support Agreement; or (ii) any representation or warranty of the other party under the Inco Support Agreement, as the case may be, shall have been untrue or incorrect as at 10 October 2005 (being the first date of the Inco Support Agreement) or shall have become untrue or incorrect at any time prior to the Expiry Time of the Inco Offer (as defined in the Inco Support Agreement, the "Inco Expiry Time") and such untrue or incorrect representation or warranty is not curable or, if curable, is not cured by the earlier of such date which is 30 days from the notice of such breach and the Inco Expiry Time except, in the case of a termination by Falconbridge, for any untrue representations or warranties of Inco which, individually or in the aggregate, would not reasonably be expected to have a Material Adverse Effect (as defined in the Inco Support Agreement) with respect to Inco and except, in the case of a termination by Inco, for any untrue representations or warranties of Falconbridge which, individually or in the aggregate, would not, or would not reasonably be expected to, have a Material Adverse Effect (as defined in the Inco Support Agreement) with respect to Falconbridge or would not, or would not reasonably be expected to, prevent or materially delay the completion of the Inco Offer or a subsequent acquisition transaction prior to the Inco Expiry Time.

In light of the proposed Phelps Dodge Inco Combination, under the terms and subject to the conditions of the Fifth Amending Agreement, Falconbridge agreed to use its reasonable best efforts to co-operate with Inco and to obtain all necessary consents and approvals with respect to the transactions contemplated by the Phelps Dodge Inco Combination Agreement. Falconbridge also agreed to furnish Inco with all information concerning it and Falconbridge Shareholders as may be required (and, in the case of Falconbridge Shareholders, available to it) for the preparation,

filing and mailing of the management information and proxy circular proposed to be delivered to Inco shareholders in connection with the proposed Phelps Dodge Inco Combination, as well as the making of regulatory filings, as required under the Phelps Dodge Inco Combination Agreement.

The Fifth Amending Agreement also provided for certain technical amendments to the Inco Support Agreement for the purpose of clarifying certain provisions.

(c) A co-operation agreement dated as of 25 June 2006 (the "Falconbridge Phelps Dodge Co-operation Agreement") between Phelps Dodge and Falconbridge in relation to the Phelps Dodge Inco Combination Agreement.

The Falconbridge Phelps Dodge Co-operation Agreement was entered into between Phelps Dodge and Falconbridge in order to facilitate the transactions contemplated by the Phelps Dodge Inco Combination Agreement and the Inco Support Agreement as amended in connection with the Phelps Dodge Inco Combination. The entry into the Falconbridge Phelps Dodge Co-operation Agreement was also a condition to: (i) Phelps Dodge's willingness to enter into a note purchase agreement pursuant to which Phelps Dodge conditionally agreed to purchase up to US$3.0 billion aggregate principal amount of Inco convertible subordinated notes in connection with the Inco Offer; and (ii) Inco's agreeing to make the revised Inco Offer announced on 26 June 2006.

Pursuant to the Falconbridge Phelps Dodge Co-operation Agreement Falconbridge agreed to take certain actions and refrain from taking certain actions in order to facilitate the Phelps Dodge Inco Combination. Amongst other things, each of Falconbridge and Phelps Dodge agreed to afford the other with reasonable access to information concerning the other, subject to the terms and conditions of the confidentiality agreement previously entered into by Falconbridge and Phelps Dodge. In addition, Falconbridge agreed to furnish Phelps Dodge with information concerning Falconbridge and (to the extent available to Falconbridge) Falconbridge Shareholders for the preparation, filing and mailing of the proxy statement of Phelps Dodge proposed to be delivered to its shareholders in connection with the shareholder approval required to be obtained by Phelps Dodge of the transactions contemplated by the Phelps Dodge Inco Combination Agreement and the regulatory filings required to consummate the transactions contemplated by the Phelps Dodge Inco Combination Agreement. Phelps Dodge and Falconbridge have made customary representations, warranties and covenants in the Falconbridge Phelps Dodge Co-operation Agreement.

The Falconbridge Phelps Dodge Co-operation Agreement shall terminate and, except in respect of provisions relating to the personal liability of directors and officers of Falconbridge and Phelps Dodge, be of no further force and effect, upon any termination of: (i) the Inco Support Agreement by either Falconbridge or Inco; or (ii) the Phelps Dodge Inco Combination Agreement by either Phelps Dodge or Inco.

Xstrata therefore understands that this agreement will terminate as described above if the Xstrata Group acquires Falconbridge under the Proposed Acquisition and the Inco Support Agreement is terminated.

(d) A conditional share purchase agreement dated 6 June 2006 (the "Falconbridge LionOre Agreement") between Falconbridge and LionOre relating to the sale to LionOre of the Falconbridge Divested Assets, as described in paragraph 3 of Part I – "Letter from the Chairman – Recent developments concerning the Inco Offer for Falconbridge" of this document.

The parties to the Falconbridge LionOre Agreement agreed that the proposed disposal by Falconbridge would be subject to certain conditions, including receipt of regulatory approvals from the US Department of Justice (the "DOJ") and the European Commission (the "Commission"), and to Inco acquiring 50% plus one share in Falconbridge (on a fully-diluted basis).

Pursuant to the Falconbridge LionOre Agreement, LionOre agreed to acquire all of the issued and outstanding shares in the capital of the following affiliates of Falconbridge from Falconbridge or its affiliates, as applicable: Falconbridge Nikkelverk A/S ("FNA"), Falconbridge International Limited ("FIL"), Falconbridge U.S. Inc. ("FUS"), Falconbridge Europe S.A. ("FESA"), Falconbridge (Japan) Limited ("FJKK"), Falconbridge International S.A. ("FISA"), (FNA, FIL, FUS, FESA, FJKK and FISA, collectively the "FNA Group") and further to acquire all inventories, work in process and finished goods in the possession of the FNA Group but owned by Falconbridge and the accounts receivable owing to Falconbridge either by

sale of goods by a member of the FNA Group on behalf of Falconbridge or sale of goods to a member of the FNA Group by Falconbridge.

The purchase price agreed to be paid by LionOre for the Falconbridge Divested Assets was US$650 million, of which US$400 million was agreed to be in cash and US$250 million of LionOre common shares. This purchase price was agreed to be subject to certain adjustments tied to changes in the final working capital levels of the Falconbridge Divested Assets and certain other adjustments.

Falconbridge agreed to sell, or cause to be sold, to one or more non-affiliated parties by not later than 150 days of the closing date, such number of the shares in the capital of LionOre obtained pursuant to the agreement that after giving effect to such sale, it and its affiliate shareholdings in LionOre would be in the aggregate less than 10% of the aggregate number of common shares of LionOre. This selldown is required to be carried out in a manner which, to Falconbridge's knowledge, does not result in any purchaser receiving more than 5% of the outstanding common shares of LionOre, and with Falconbridge using commercially reasonable efforts to not sell shares of LionOre to another mining company.

Falconbridge also agreed not to exercise or permit the exercise of any voting rights attached to any shares held by it or its affiliates in LionOre. Falconbridge is also restricted from acquiring any further securities of LionOre for a period of two years following the closing date.

Each of Falconbridge and LionOre agreed to provide customary indemnities to the other in connection with specified losses suffered or incurred by the other party.

Closing under the Falconbridge LionOre Agreement was agreed to be subject to the satisfaction of a number of conditions, including:

(i) the obtaining or attainment of all applicable approvals and consents necessary to permit the transactions contemplated by the Inco Offer and the change in ownership of the FNA Group;

(ii) it not being illegal, and no injunction being in place prohibiting the sale and purchase of the FNA Group as contemplated in the Falconbridge LionOre Agreement; and

(iii) the TSX having conditionally approved the issue and listing of LionOre shares being issued to Falconbridge as part of the acquisition price consideration.

LionOre's obligations pursuant to the Falconbridge LionOre Agreement were agreed to be subject to a number of conditions, including the following conditions for the exclusive benefit of LionOre:

(i) financing being available to LionOre on the closing date; and

(ii) LionOre being satisfied, acting reasonably, with the terms of all Regulatory Approvals (as defined in the Falconbridge LionOre Agreement) that affect it, the FNA Group or the business LionOre agreed to acquire.

Falconbridge's obligations pursuant to the Falconbridge LionOre Agreement were agreed to be subject to a number of conditions, including the following conditions for the exclusive benefit of Falconbridge:

(i) Inco must have acquired pursuant to the Inco Offer or otherwise more than 50% (on a fully-diluted basis as further defined in the Inco Support Agreement) of the common shares of Falconbridge; and

(ii) LionOre shall have paid to Falconbridge on closing the US$650 million acquisition price by the delivery of US$400 million in cash and 49,118,057 common shares of LionOre as provided for in the Falconbridge LionOre Agreement.

Falconbridge or LionOre may waive any condition in its favour by written instrument, without prejudice.

Under the Falconbridge LionOre Agreement, Falconbridge agreed to be prohibited from soliciting, initiating or entertaining inquiries or proposals, providing non-public information to, or participating in any negotiations with respect to the acquisition of all or any part of the FNA Group or the Nikkelverk Refinery until such time as Falconbridge has determined in good faith that Regulatory Approvals (as defined in the Falconbridge LionOre Agreement) are unlikely to be obtained on a timely basis or LionOre is unlikely to be able to satisfy the conditions of closing on a timely basis.

It was further agreed under the Falconbridge LionOre Agreement, that Falconbridge be able to terminate the foregoing exclusivity obligation and be free to entertain alternative transactions by paying a break fee, however only if it determines in good faith that Regulatory Approvals (as defined in the Falconbridge LionOre Agreement) are unlikely to be obtained or that LionOre is unlikely to be able to satisfy the conditions of closing, both on a timely basis.

Based on the above, if Falconbridge desires to terminate the exclusivity obligation prior to the date the DOJ and the Commission have provided Regulatory Approvals (as defined in the Falconbridge LionOre Agreement) satisfactory to Falconbridge (the "Regulatory Approval Date"), Falconbridge will notify LionOre and concurrently Inco will pay to LionOre US$10 million. If Falconbridge desires to terminate the exclusivity period from and after the Regulatory Approval Date, Falconbridge will notify LionOre and concurrently Inco will pay to LionOre US$32.5 million. Termination of the exclusivity period does not terminate the Falconbridge LionOre Agreement.

If following the payment of any of the exclusivity break fees the closing of the acquisition of the Nikkelverk Refinery occurs, LionOre is required to repay to Inco the amount received on delivery of such notice on the closing date.

The closing of the transaction was agreed to be on such date as Falconbridge determines on not less than five business days' notice to LionOre provided that the closing date will be: (i) not earlier than the day on which all of the conditions precedents in the Falconbridge LionOre Agreement are satisfied or waived; and (ii) not later than the latest date until which Inco has agreed to maintain the Inco Offer (the "Closing Date").

The Falconbridge LionOre Agreement provides for termination on the earlier of: (i) Falconbridge giving LionOre a notice of termination at any time and for any reason; and (ii) the earlier of (A) the latest date until which Inco has agreed to maintain the Inco Offer as specified in the Inco Support Agreement or such earlier date on which the Inco Offer expires, is withdrawn or otherwise terminates, or (B) 1 January 2007 if by that date any conditions in the Falconbridge LionOre Agreement have not been satisfied or waived.

If the Falconbridge LionOre Agreement terminates pursuant to any reason noted in the Termination provision, if such termination occurs before the Regulatory Approval Date, Inco shall concurrently with the giving by Falconbridge of the notice of termination or the termination date, as applicable, pay to LionOre the amount of US$10 million, provided that the failure to obtain Regulatory Approval (as defined in the Falconbridge LionOre Agreement) is not due to the failure by LionOre to act in a commercially reasonable manner in considering whether to accept any term or condition proposed by a Regulatory Authority (as defined in the Falconbridge LionOre Agreement) as a condition or requirement of such Regulatory Approval, or if such termination occurs after the Regulatory Approval Date, US$32.5 million.

Any exclusivity break fee that has been paid will be credited towards any termination break fee payable.

Xstrata understands that Falconbridge will not be obliged under the Falconbridge LionOre Agreement to sell the Falconbridge Divested Assets to LionOre if the Xstrata Group acquires Falconbridge under the Proposed Acquisition.

(e) The takeover bid by Falconbridge for all of the outstanding common shares of its subsidiary Novicourt pursuant to the takeover bid circular dated 26 June 2006, as described in paragraph 7.2 of this Part VI. Novicourt's board of directors issued its recommendation to accept the Falconbridge bid in a directors' circular dated 26 June 2006. The Falconbridge bid for Novicourt expires at 6:00 p.m. (Toronto time) on 9 August 2006.

In relation to the Shareholder Rights Plan described in paragraph 8.2(a) of Part VI – "Additional Information – Material contracts" of the Circular, see paragraph 6.2 of this Part VI.

9. Working capital

Xstrata is not currently able to undertake appropriate procedures to support a statement in respect of the sufficiency of working capital of the Xstrata Group which, in these circumstances, should ordinarily cover the Xstrata Group including the Falconbridge Group following completion of the Proposed Acquisition. This is because Xstrata does not currently have access to any material non-public financial or other information in respect of Falconbridge or the Falconbridge Group which would allow those procedures to be undertaken.

Xstrata is of the opinion that, taking into account the bank and other facilities available to the Xstrata Group, the Xstrata Group has sufficient working capital for its present requirements, that is for at least 12 months from the date of publication of this document.

Xstrata's opinion on the sufficiency of working capital of the Xstrata Group including the Falconbridge Group following completion of the Proposed Acquisition is intended to be available and to be published as soon as Xstrata is granted access sufficient for the purpose to the information referred to above and in any event within 28 days of the date of satisfaction or waiver of all of the conditions of the Xstrata Offer and the announcement by the Offeror that the Offeror has taken up Falconbridge Shares under the Xstrata Offer.

10. Consent

Deutsche Bank has given and not withdrawn its written consent to the inclusion herein of the references to its name in the form and context in which they appear.

JPMorgan Cazenove has given and not withdrawn its written consent to the inclusion herein of the references to its name in the form and context in which they appear.

JPMSL has given and not withdrawn its written consent to the inclusion herein of the references to its name in the form and context in which they appear.

11. Bases and sources

11.1 General

Xstrata and Falconbridge operate in industries in which it is difficult in certain cases to obtain precise industry and market information. Unless the source is otherwise stated and except as described below in relation to information on the Falconbridge Group and other third party information:

- the industry and market data in this document and in those parts of the Circular which have been incorporated by reference into this document have been extracted without material amendment from the Company's management records;
- the non-financial operating data included in this document and in those parts of the Circular which have been incorporated by reference into this document have been extracted without material amendment from the Company's management records; and
- the financial information included in this document and in those parts of the Circular which have been incorporated by reference into this document in respect of the Xstrata Group has been extracted without material amendment from the financial statements contained in the Annual Reports and Accounts and the Company's accounting records.

11.2 Presentation of information on the Falconbridge Group

This document and the Circular contain certain information relating to Falconbridge and the Falconbridge Group, including the information contained in Part I – "Letter from the Chairman", Part II – "Risk Factors" and Part III – "Information on the Falconbridge Group", Part IV – "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group" and Part VI – "Additional Information" of the Circular (which have been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") and Part I – "Letter from the Chairman", Part II – "Risk Factors" and Part III – "Information on the Falconbridge Group", Part IV – "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group" and Part VI – "Additional Information" of this document.

This information has been compiled from information included in public documents filed by Falconbridge only and has not, for the purposes of this document or the Circular, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Xstrata and the Xstrata Directors have sought to ensure that such information has been accurately reproduced from such sources and, so far as Xstrata is aware and is able to ascertain from information included in public documents filed by the Falconbridge Group, no facts have been omitted which would render

the reproduced information inaccurate or misleading. See the risk factor "Lack of due diligence access to Falconbridge" in Part II – "Risk Factors" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation").

Nothing in this paragraph 11.2 is intended to qualify the statements in paragraph 1 of this Part VI.

11.3 Other information from third party sources

The information contained in this document and in those parts of the Circular which have been incorporated by reference into this document that has been extracted from third party source comprises the trading prices of Falconbridge Shares on the TSX and NYSE and the trading price of Ordinary Shares on the London Stock Exchange, all of which are sourced from Bloomberg, and information in relation to the claim described in the risk factor "Falconbridge Litigation" in Part II – "Risk Factors" of the Circular and in paragraph 6.2 of Part VI – "Additional Information – Litigation – 6.2 Falconbridge Group" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") by the Stark Claimants and Brookfield, which is sourced from a publicly available submissions by the Stark Claimants *and Brookfield* to the United States District Court for the Eastern District of Wisconsin, Milwaukee Division. This information has been accurately reproduced and, so far as *the Company is* aware, and so far as it is able to ascertain from information published by those third parties, no facts have been omitted which would render the reproduced information inaccurate or misleading.

11.4 Basis of compilation of commodity and geographical splits

Paragraph 12.4 of Part VI – "Additional Information – Bases and sources – Basis of compilation of commodity and geographical splits" of the Circular (which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation") sets out the basis of preparation for the statements in the Circular in respect of the anticipated splits of the Enlarged Group's EBITDA on a commodity basis and of the Enlarged Group's revenue on a geographic basis. These statements are included in paragraph 5 of Part I – "Letter from the Chairman – Benefits and financial impact of the Proposed Acquisition – The Enlarged Group following successful completion of the Proposed Acquisition" of the Circular and the introductory paragraph to Part IV – "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group" of the Circular, which are incorporated by reference into this document as set out in the section of this document headed "Relevant Documentation".

12. No material change or new matter

For the purposes of, and in accordance with, the Listing Rules, Xstrata confirms that, except as disclosed in this document and, in relation the Falconbridge Group, so far as Xstrata is aware having regard to public information, there has been no material change affecting any matter contained in the Circular and no other material new matter has arisen which would have been required to be mentioned in the Circular if it had arisen at the time of the preparation of the Circular.

13. Documents available for inspection

Copies of the following documents are available for inspection during usual business hours on any weekday (Saturdays, Sundays and public holidays excepted), from the date of this document up to and including the date of conclusion of the Extraordinary General Meeting at the offices of Freshfields Bruckhaus Deringer, 65 Fleet Street, London EC4Y 1HS, UK:

(a) the memorandum and articles of association of Xstrata;

(b) the Annual Reports and Accounts of Xstrata, including the audited consolidated accounts and the independent auditors' *reports for* each of the years ended 31 December 2003, 31 December 2004 and 31 December 2005;

(c) the consent letters referred to in paragraph 10 of this Part VI;

(d) a copy of the Offer Document and a copy of each of the Variation Documents;

(e) a copy of the Circular and this document; and

(f) the documents incorporated by reference into this document as described in the section of this document headed "Relevant Documentation".

The above documents will also be available at Congress Center Metalli, Parkhotel Zug, 6300 Zug, Switzerland and the registered office of the Company, 4th Floor, Panton House, 25/27 Haymarket, London SW1Y 4EN, UK, from at least 15 minutes prior to the Extraordinary General Meeting until the conclusion of that meeting.

Dated: 20 July 2006

Definitions

The section headed "Definitions and Glossary of Technical Terms – Definitions" in the Circular has been incorporated by reference into this document as set out in the section of this document headed "Relevant Documentation". For the purposes of this document, such definitions should be read as supplemented and amended by the following definitions:

Note that certain terms used in Falconbridge information included in Part III – "Information on the Falconbridge Group" of the Circular and Part III – "Information on the Falconbridge Group" of this document are defined within the relevant section(s) of such Falconbridge information.

"Annual Reports and Accounts"	the annual reports and accounts prepared by Xstrata for the financial years ended 31 December 2003, 31 December 2004 and 31 December 2005
"ARC"	Advance Ruling Certificate under Section 102 of the Competition Act (Canada) in respect of the purchase of Falconbridge Shares by the Offeror
"Argentine pesos" or "ARS"	the lawful currency of Argentina
"associated undertaking"	has the meaning given in paragraph 20(1) of Schedule 4A to the Companies Act
"Asturiana"	Asturiana de Zinc, S.A., a company incorporated in Spain with limited liability
"Australia"	the Commonwealth of Australia
"Australian dollars" or "A$"	the lawful currency of Australia
"Barclays"	Barclays Bank PLC
"Batiss"	Batiss Investments Limited
"Bloomberg"	Bloomberg Financial Markets
"Board" or "Board of Directors" or "Directors" or "Xstrata Directors"	the *Executive Directors and* Non-Executive Directors of Xstrata as at the date of this document
"Brookfield"	Brookfield Asset Management Inc., a company formerly known as Brascan Corporation
"Canada"	Canada, its territories and its possessions
"Canadian dollars" or "C$" or "Cdn$"	the lawful currency of Canada
"Canadian GAAP"	accounting principles generally accepted in Canada
"Cerrejón"	the Cerrejón coal mining operation in Colombia carried on by the Cerrejón Operating Companies
"Cerrejón Acquisition"	the acquisition, which completed on 12 May 2006, by the Xstrata Group of the Cerrejón Business pursuant to the Cerrejón Acquisition Agreement
"Cerrejón Acquisition Agreement"	the sale and purchase agreement dated 1 March 2006 (as amended on 15 March 2006) between Glencore International and Xstrata (Schweiz) AG, which became effective on 15 March 2006, in relation to the Cerrejón Acquisition, pursuant to which the Cerrejón Purchasers purchased, and the Cerrejón Vendors sold, and procured the transfer of,

	the entire issued share capital of the Cerrejón Xstrata Group Companies and the share held by a Glencore nominee in one of the Cerrejón Operating Companies
"Cerrejón Bridge Facility Agreement"	the bridge facility agreement, details of which are provided in paragraph 8.1(g) of Part VI – "Additional Information – Material contracts" of the Circular
"Cerrejón Business"	the Xstrata Group's interests in Cerrejón held through the Cerrejón Xstrata Group Companies
"Cerrejón Circular"	the circular dated 23 March 2006 and issued by the Company in respect of the Cerrejón Acquisition
"Cerrejón Operating Companies"	CMC Coal Marketing Company Ltd, Cerrejón Zona Norte S.A., Carbones del Cerrejón LLC and Cerrejón Coal (Bermuda) Ltd
"Cerrejón Purchasers"	Xstrata Coal South America and Xstrata Coal Marketing
"Cerrejón Vendors"	Glencore International and Seez Trading
"Cerrejón Xstrata Group Companies"	Tironimus AG, Xstrata Cerrejón Ltd and Perly Ltd
"CHF"	the lawful currency of Switzerland
"Circular"	the circular dated 30 May 2006 and issued by the Company in respect of the Proposed Acquisition
"Colombian pesos"	the lawful currency of Colombia
"Companies Act"	the Companies Act 1985, as amended
"Company" or "Xstrata"	Xstrata plc, a public limited company incorporated in England and Wales
"Competition Act (Canada)"	the Competition Act (Canada), as amended
"CREST"	the relevant system (as defined in the CREST Regulations) for the paperless settlement of trades in listed securities in the United Kingdom, of which CRESTCo is the operator (as defined in the CREST Regulations)
"CRESTCo"	CRESTCo Limited
"CREST Manual"	the rules governing the operation of CREST, consisting of the CREST Reference Manual, CREST International Manual, CREST Central Counterparty Service Manual, CREST Rules, Registrars Service Standards, Settlement Discipline Rules, CCSS Operations Manual, Daily Timetable, CREST Application Procedure and CREST Glossary of Terms (all as defined in the CREST Glossary of Terms promulgated by CRESTCo on 15 July 1996 and as amended since)
"CREST member"	a person who has been admitted by CRESTCo as a system-member (as defined in the CREST Regulations)
"CREST Regulations"	the Uncertificated Securities Regulations 2001 (SI 2001/3755)
"CREST sponsor"	a CREST participant admitted to CREST as a CREST sponsor
"CREST sponsored member"	a CREST member admitted to CREST as a sponsored member

"CSFB Equities"	Credit Suisse First Boston Equities Limited
"CSSEL"	Credit Suisse Securities (Europe) Limited
"Debt Bridge Facility"	the bridge facility to be provided under the Debt Bridge Facility Agreement
"Debt Bridge Facility Agreement"	the debt bridge facility agreement, details of which are provided in paragraph 8.1(c) of Part VI – "Additional Information – Material contracts" of the Circular
"Deutsche Bank"	Deutsche Bank AG, London Branch
"Directors" or "Xstrata Directors" or "Board" or "Board of Directors"	the Executive Directors and Non-Executive Directors of Xstrata as at the date of this document
"Disclosure Rules"	the Disclosure Rules of the Financial Services Authority
"EBITDA"	unless otherwise indicated, when used in relation to the Xstrata Group, operating profit or loss from continuing operations before interest, tax, depreciation and amortisation and, when used in relation to the Falconbridge Group, income generated from operating assets adding back depreciation, amortisation and accretion, less corporate and general administration costs and research, development and exploration costs
"EC Merger Regulation"	Council Regulation 139/2004/EC
"ECMP"	Xstrata's independently managed equity capital management programme, under which up to 10% of the issued share capital of Xstrata can be purchased in the market by Batiss, a Guernsey-registered entity owned by a charitable trust, which is independent of the Xstrata Group
"EGM Notice"	the notice of the Extraordinary General Meeting set out at the end of this document
"Enlarged Group"	the Xstrata Group as enlarged, if all of the conditions to the Xstrata Offer are satisfied or waived and the Offeror announces that the Offeror has taken up Falconbridge Shares under the Xstrata Offer, by the Falconbridge Group
"Equity Bridge Facility Agreement"	the equity bridge facility agreement, details of which are provided in paragraph 8.1(d) of Part VI – "Additional Information – Material contracts" of the Circular
"Equity Refinancing Amount"	the amount to be raised in connection with the Standby Equity Underwriting Letter
"EU"	the European Union
"Euro" or "€"	the currency introduced at the start of the third stage of the European economic and monetary union pursuant to the Treaty establishing the European Community, as amended
"Executive Directors"	the executive Directors of Xstrata
"Expiry Time"	8.00 p.m. (Toronto time) on 14 August 2006, or such later or earlier time or times and date or dates as may be fixed by the Offeror from time to time pursuant to the Offer Document (as amended and varied by the Variation Documents and in accordance with applicable law)
"Extraordinary General Meeting" or "EGM"	the second extraordinary general meeting of the Company in relation to the Proposed Acquisition convened for 14 August 2006 (including any adjournment thereof), notice of which is set out at the end of this document

"Falconbridge"	Falconbridge Limited, a corporation amalgamated under the laws of the Province of Ontario, Canada with limited liability
"Falconbridge Directors"	the directors of Falconbridge
"Falconbridge Divested Assets"	certain assets and related operations of Falconbridge conditionally agreed to be sold by Falconbridge to LionOre, including Falconbridge's Nikkelverk refinery in Norway and the Falconbridge marketing and custom feed organisations that market and sell the finished nickel and other products produced at Nikkelverk and obtain third party feeds for this facility
"Falconbridge Group"	Falconbridge and its subsidiaries and subsidiary undertakings and, where the context requires, its associated undertakings
"Falconbridge Shareholders"	the holders of Falconbridge Shares
"Falconbridge Shares"	common shares in the capital of Falconbridge, together with the associated SRP Rights
"Falconbridge Special Dividend"	the special cash dividend of C$0.75 per Falconbridge Share declared by the board of directors of Falconbridge on 16 July 2006 and payable by Falconbridge on 10 August 2006 to Falconbridge Shareholders of record at the close of business on 26 July 2006
"Financial Services Authority"	the UK Financial Services Authority
"First Existing Facility Agreement"	the facility agreement, details of which are provided in paragraph 8.1(t) of Part VI – "Additional Information – Material contracts" of the Circular
"First Xstrata Notice of Variation"	the notice of variation of the Offeror, dated 11 July 2006, which increased the cash consideration under the Xstrata Offer from C$52.50 to C$59.00 per Falconbridge Share, removed the condition that 66⅔% of the Falconbridge Shares outstanding (on a fully diluted basis) be deposited and not withdrawn at the Expiry Time and further extended the Expiry Time to midnight (Vancouver time) on 21 July 2006
"Form of Proxy"	the form of proxy accompanying this document for use by the Shareholders in respect of the EGM
"Former Falconbridge"	Falconbridge Limited, a corporation incorporated under the laws of the Province of Ontario, Canada with limited liability and a predecessor corporation of Falconbridge that existed prior to the amalgamation of Noranda and Former Falconbridge to form Falconbridge on 30 June 2005
"FSMA"	the Financial Services and Markets Act 2000, as amended
"fully-diluted" or "fully-diluted basis"	with respect to Falconbridge Shares calculated pursuant to the Xstrata Offer, only that number of Falconbridge Shares which would be outstanding if all rights to acquire Falconbridge Shares were exercised, but excluding Falconbridge Shares issuable upon the exercise of the SRP Rights and, with respect to Falconbridge Shares calculated pursuant to the Inco Offer, only that number of Falconbridge Shares which would be outstanding if all rights to acquire Falconbridge Shares were exercised other than those which are not, and cannot in accordance with their terms become, exercisable within 120 days following 10 August 2006 and excluding Falconbridge Shares issuable upon exercise of the SRP Rights

"Glencore"	Glencore International and its subsidiaries and affiliates or, as the context requires, any subsidiary or affiliate thereof
"Glencore International"	Glencore International AG, a company incorporated in Switzerland with limited liability
"Glencore International Nominees"	the Xstrata Directors nominated by Glencore International, currently being Messrs. Strothotte and Glasenberg
"HSR Act"	Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and the rules and regulations promulgated thereunder
"IFRS"	International Financial Reporting Standards expected to be endorsed by the European Commission by 31 December 2005
"Inco"	Inco Limited, a corporation incorporated under the laws of Canada with limited liability
"Inco Offer"	the offer by Inco to purchase all of the outstanding Falconbridge Shares made under an offer document issued by Inco dated 24 October 2005, as amended and as extended by Inco's notices of extension dated 14 December 2005, 19 January 2006, 27 February 2006 and 13 July 2006, by Inco's notice of variation dated 29 May 2006 and by Inco's notices of variation and extension dated 29 June 2006 and 16 July 2006 and as the same may be further amended and varied in accordance with applicable law
"Inco Support Agreement"	the support agreement between Inco and Falconbridge in relation to the Inco Offer, as amended, as described in paragraph 8.2(b) of Part VI – "Additional Information – Material contracts" of the Circular and paragraphs 8.2(a) and 8.2(b) of Part VI "Additional Information – Material contracts" of this document
"Increased Xstrata Offer"	the offer by the Offeror to purchase all of the outstanding Falconbridge Shares not already owned by the Xstrata Group for C$62.50 in cash per Falconbridge Share made under the Offer Document as amended and varied by the Variation Documents
"Investment Canada Act"	the Investment Canada Act of 1985, as amended
"JPMorgan Cazenove"	JPMorgan Cazenove Limited
"JPMorgan Chase"	JPMorgan Chase Bank, National Association
"JPMSL"	J.P. Morgan Securities Ltd. acting as underwriter on behalf of its affiliate JPMorgan Cazenove
"£"	the lawful currency of the United Kingdom
"LionOre"	LionOre Mining International Ltd.
"Listing Rules"	the Listing Rules of the Financial Services Authority
"London Stock Exchange"	London Stock Exchange plc
"Material Adverse Effect"	in respect of the Xstrata Offer, when used in connection with a person, any effect that is, or could reasonably be expected to be, material and adverse to the condition (financial or otherwise), properties, assets, liabilities, obligations (whether absolute, accrued, conditional or

	otherwise), businesses, operations, including results of operations, assets, affairs or prospects of that person and its subsidiaries taken as a whole, *other than any effect* (i) relating to the Canadian and United States economies, political conditions or securities markets in general; (ii) affecting the mining industry in general; (iii) relating to a change in the market trading price of shares of that person related to such a change in the market trading price primarily resulting from an effect excluded from the definition of Material Adverse Effect under (i), (ii), (iv) or (v) of this definition; (iv) relating to any of the principal markets served by that *person's business generally or shortages or price changes* with respect to raw materials, metals or products (including, but not limited to, nickel, copper, cobalt, any platinum group metals, sulphur, sulphuric acid, electricity, zinc or aluminium) used or sold by that party; or (v) relating to any generally applicable change in applicable laws or regulations (other than orders, judgments or decrees against that person, any of its subsidiaries) or in Canadian generally accepted accounting principles; *provided, however, that such effect (other than in the case of clause (iii)* above) does not primarily relate only to (or have the effect of primarily relating to) that person and its subsidiaries, taken as a whole, or disproportionately adversely affect that person and its subsidiaries, taken as a whole, compared to other companies of similar size operating in the industry in which that person and its subsidiaries operate;
"Minimum Tender Condition"	the condition of the original Xstrata Offer (amended by the First Xstrata Notice of Variation and to be deleted by the Second Xstrata Notice of Variation) that there shall have been validly deposited under the Xstrata Offer and not withdrawn at the Expiry Time (i) such number of Falconbridge Shares that, together with Falconbridge Shares held by the Offeror and its affiliates (as defined in the OSA), constitutes at least 66⅔% of the Falconbridge Shares then outstanding (calculated on a fully-diluted *basis) and* (ii) at least a majority of the Falconbridge Shares then outstanding (calculated on a fully-diluted basis), the votes attached to which would be included in the minority approval of a second step business combination or going private transaction pursuant to Rule 61-501 and Regulation Q-27
"New Acquisition Facilities"	the acquisition facilities to be provided under the New Acquisition Facilities Agreement
"New Acquisition Facilities Agreement"	the acquisition facilities agreement, details of which are provided in paragraph 8.1(b) of Part VI – "Additional Information – Material contracts" of this document
"New Debt Bridge Facility"	the bridge facility to be provided under the New Debt Bridge Facility Agreement
"New Debt Bridge Facility Agreement"	the bridge facility agreement, details of which are provided in paragraph 8.1(b) of Part VI – "Additional Information – Material contracts" of this document
"New Debt Underwriting Letter"	the debt underwriting letter, details of which are provided in paragraph 8.1(b) of Part VI – "Additional Information – Material contracts" of this document
"Non-executive Directors"	the non-executive Directors of Xstrata

"Noranda"	Noranda Inc., a corporation incorporated under the laws of the Province of Ontario, Canada with limited liability
"Novicourt"	Novicourt Inc.
"NYSE"	New York Stock Exchange
"OBCA"	the Business Corporations Act (Ontario), as amended
"Offer Document"	the offer and circular delivered to Falconbridge, filed with Canadian provincial securities regulators and mailed to Falconbridge Shareholders by the Offeror and Xstrata (which has been amended and varied by the Variation Documents) pursuant to which the Offeror makes the Xstrata Offer to Falconbridge Shareholders
"Offeror"	Xstrata Canada Inc., a corporation incorporated under the laws of the Province of Ontario, Canada with limited liability
"Ordinary Shares"	ordinary shares of US$0.50 each in the capital of Xstrata
"Original Acquisition Facilities"	the acquisition facilities to be provided under the Original Acquisition Facilities Agreement
"Original Acquisition Facilities Agreement"	the acquisition facilities agreement, details of which are provided in paragraph 8.1(c) of Part VI – "Additional Information – Material contracts" of the Circular
"OSA"	the Securities Act (Ontario), as amended
"OSC"	Ontario Securities Commission
"Peruvian Sol"	the lawful currency of Peru
"Phelps Dodge"	Phelps Dodge Corporation
"Phelps Dodge Inco Combination"	the proposed combination by means of the Phelps Dodge Inco Combination Agreement, pursuant to which Phelps Dodge has conditionally agreed acquire all of the outstanding Inco shares by way of a statutory plan of arrangement for C$20.25 in cash and 0.672 common shares of Phelps Dodge for each Inco share, assuming full pro-ration
"Phelps Dodge Inco Combination Agreement"	the combination agreement dated as of 25 June 2006 between Phelps Dodge and Inco (as amended under a waiver and amendment agreement dated 16 July 2006 between Phelps Dodge and Inco), under which Phelps Dodge and Inco agreed to implement the Phelps Dodge Inco Combination
"Placing"	the placing to institutional investors of 61,994,320 Ordinary Shares announced by the Company on 17 May 2006 consisting of 32,543,344 new Ordinary Shares which were issued by the Company and 29,450,976 Ordinary Shares held by Batiss and sold pursuant to the terms of the ECMP
"Previous EGM Notice"	the notice of the Previous Extraordinary General Meeting set out at the end of the Circular
"Previous Extraordinary General Meeting"	the extraordinary general meeting of the Company held on Friday, 30 June 2006

"Proposed Acquisition"	the proposed acquisition by the Xstrata Group of issued and outstanding Falconbridge Shares in accordance with the terms of the Xstrata Offer
"Prospectus Rules"	the rules made for the purposes of Part VI of the FSMA in relation to offers of transferable securities to the public and admission of transferable securities to trading on a regulated market and brought into effect on 1 July 2005 pursuant to Commission Regulation (EC) No. 809/2004
"Rand" or "ZAR"	the lawful currency of South Africa
"RBS"	The Royal Bank of Scotland plc
"Regulation Q-27"	Regulation Q-27 – *Protection of Minority Securityholders in the Course of Certain Transactions* of the *Autorité des marchés financiers* (Québec), as amended
"Relationship Agreement"	the agreement dated 20 March 2002 between the Company and Glencore International, a description of which is set out in paragraph 3 of Part IV of the Cerrejón Circular – "The Xstrata Group's Relationship with Glencore – Relationship with controlling shareholder", which has been incorporated by reference into this document as described in the section of this document headed "Relevant Documentation"
"Remuneration Committee"	the committee established to consider and determine amongst other things the remuneration of the Executive Directors
"Resolution"	the resolution set out in the EGM Notice
"Rule 61-501"	OSC Rule 61-501 – *Insider Bids, Issuer Bids, Business Combinations and Related Party Transactions*, as amended
"SEC"	United States Securities and Exchange Commission
"Second Existing Facility"	the facility under the Second Existing Facility Agreement
"Second Existing Facility Agreement"	the facility agreement, details of which are provided in paragraph 8.1(n) of Part VI – "Additional Information – Material contracts" of the Circular
"Second Xstrata Notice of Variation"	the notice of variation of the Offeror, to be dated on or around 21 July 2006, increasing the consideration under the Xstrata Offer from C$59.00 to C$62.50, deleting the Minimum Tender Condition, providing that the consideration under the Xstrata Offer would not be reduced by the amount of the Falconbridge Special Dividend, making the Xstrata Offer conditional on further Shareholder approval at the EGM and further extending the Expiry Time to 8.00 p.m. (Toronto time) on 14 August 2006
"Securities Act"	the US Securities Act of 1933, as amended
"Seez Trading"	Seez Trading Corp. Limited, a company incorporated in Bermuda with limited liability
"Senior Executives"	the members of senior management of the Company set out in paragraph 2.2 of Part VI – "Additional Information – Directors', Senior Executives' and others' interests – The Senior Executives" of the Circular
"Shareholder Rights Plan"	the shareholder rights plan adopted pursuant to an agreement dated as of 21 March 2006 between Falconbridge and CIBC Mellon Trust Company, as rights agent, as described in paragraph 8.2(a) of Part VI – "Additional Information – Material contracts" of the Circular

"Shareholders"	holders of Ordinary Shares
"SIS"	SIS SegaInterSettle AG
"SIS System"	the system and/or facilities of SIS for the settlement of transactions in securities
"South Africa"	the Republic of South Africa
"SRP Rights"	rights issued pursuant to the Shareholder Rights Plan

"Xstrata Group"	Xstrata and its subsidiaries and subsidiary undertakings and, where the context requires, its associated undertakings
"Xstrata LTIP"	the Xstrata Long Term Incentive Plan
"Xstrata Merger"	the merger of Xstrata AG and the Company on 25 March 2002 pursuant to which the Company became the ultimate holding company of the Xstrata Group
"Xstrata Notice of Extension"	the notice of extension of the Offeror, dated 7 July 2006, relating to the extension of the expiry time of the Xstrata Offer to 8.00 p.m. (Toronto time) on 21 July 2006
"Xstrata Offer"	the offer by the Offeror to purchase all of the outstanding Falconbridge Shares not already owned by the Xstrata Group made under the Offer Document as amended and varied by the Variation Documents and as the same may be further amended and varied in accordance with applicable law
"Xstrata (Schweiz) AG"	Xstrata (Schweiz) AG, a company incorporated in Switzerland with limited liability
"Xstrata Share Schemes"	the Xstrata LTIP, the Xstrata AG Share Schemes, the option granted to Mr Davis in September 2001 and the option granted to Mr Reid in January 2002
"Xstrata SL"	Xstrata Services (UK) Limited, a company incorporated in England and Wales with limited liability

Glossary of technical terms

The section headed "Definitions and Glossary of Technical Terms – Glossary of technical terms" in the Circular has been incorporated by reference into this document as set out in the section of this document headed "Relevant Documentation". For the purposes of this document, such glossary of technical terms should be read as supplemented and amended by the following technical terms:

Note that certain technical terms used in Falconbridge information included in Part III – "Information on the Falconbridge Group" of the Circular and Part III – "Information on the Falconbridge Group" of this document are defined within the relevant section(s) of such Falconbridge information.

"CIM Definition Standards on Mineral Resources and Reserves"	standards for the classification of MRMR estimates into various categories. The category to which a resource or reserve estimate is assigned depends on the level of confidence in the geological information available on the mineral deposit; the quality and quantity of data available on the deposit; the level of detail of the technical and economic information which has been generated about the deposit, and the interpretation of the data. The CIM Definition Standards on Mineral Resources and Reserves were approved by the Canadian Institute of Mining, Metallurgy and Petroleum on 20 August 2000, and updated on 14 November 2004, for the reporting of exploration information, mineral resources and mineral reserves in Canada and are incorporated by reference into NI 43-101
"CIM Estimation of Mineral Resources and Mineral Reserves Best Practice Guidelines"	guidelines intended to assist a Qualified Person in the planning, supervision, preparation and reporting of MRMR estimates. All MRMR estimation work from which public reporting will ensue must be designed and carried out under the direction of a Qualified Person in accordance with NI 43-101. Disclosure of MRMR estimates is to be made in accordance with industry standard definitions approved by the Canadian Institute of Mining, Metallurgy and Petroleum which have been incorporated by reference into NI 43-101
"concentrate"	material that has been processed to increase the content of contained material or mineral relative to the contained waste
"grade"	the quality of an ore, alloy or metal, usually expressed as a percentage of the primary element
"LME"	London Metal Exchange
"MRMR"	mineral resource and mineral reserve
"NI 43-101"	Canadian National Instrument 43-101 – "Standards of Disclosure for Mineral Projects" of the Canadian Securities Administrators
"ore"	a mineral or mineral aggregate containing precious or useful minerals in such quantities, grade and chemical combination to make extraction commercially profitable
"pound"	Imperial pound, equivalent to 0.4536 kilogrammes
"probable reserves"	measured and/or indicated resources which are not yet proven but of which detailed technical and economic studies have demonstrated that extraction can be justified at the time of determination and under specific economic conditions

"Qualified Person"	defined in NI 43-101 as "an individual who is an engineer or geoscientist with at least five (5) years of experience in mineral exploration, mine development, mine operation, project assessment or any combination of these; has experience relevant to the subject matter of the mineral project and technical report; and is a member in good standing of a professional association"
"reserves"	those parts of mineral resources for which sufficient information is available to enable detailed or conceptual mine planning and for which such planning has been undertaken. Reserves are classified as either proved or probable
"resources"	all of the potential minerals in a defined area based on points of observation and extrapolations from those points. Potential minerals are defined as minerals which have been or could be beneficiated to give a quality acceptable for commercial usage in the foreseeable future and excludes minor mineral occurrences
"thermal coal"	coal used in generating steam for electricity production
"t" or "tonne"	metric tonne, equivalent to 2,204.62 pounds
"waste"	rock lacking sufficient grade and/or other characteristics or ore to be economic

Xstrata plc

(incorporated in England and Wales under the Companies Act 1985, with registered number 4345939)

Notice of Extraordinary General Meeting

NOTICE is hereby given that an extraordinary general meeting of Xstrata plc (the "Company") will be held at Congress Center Metalli, Parkhotel Zug, 6300 Zug, Switzerland on Monday, 14 August 2006 at 11.30 a.m. (Central European Summer Time), with a satellite meeting held concurrently at the registered office of the Company, 4th Floor, Panton House, 25/27 Haymarket, London SW1Y 4EN, UK, at 10.30 a.m. (British Summer Time), on Monday, 14 August 2006 to consider and, if thought fit, pass the following resolution to be proposed as an ordinary resolution:

THAT the proposed acquisition by a wholly-owned indirect subsidiary of the Company, Xstrata Canada Inc. (the "Offeror"), of any and all of the issued, to be issued and outstanding Falconbridge Shares (as defined in the supplementary shareholders' circular of the Company dated 20 July 2006 (the "Circular")), other than any Falconbridge Shares owned directly or indirectly by the Offeror or its affiliates, on the terms and subject to the conditions of the Offer Document (as defined in the Circular) as amended and varied by the Variation Documents (as defined in the Circular), a copy of each of which is produced to the meeting and, for identification purposes, initialled by the chairman of the meeting, or on the terms and subject to the conditions of any amended, extended, revised, renewed, additional or other offer or offers for shares and/or associated rights in the capital of Falconbridge Limited ("Falconbridge") approved by the board of directors of the Company (the "Board") (or any duly constituted committee of the Board (a "Committee")) (the "Offer"), be and is hereby approved and that the Board (or a Committee) be and is hereby authorised to make waivers, extensions and amendments or variations to any of the terms and conditions of the Offer and to do all such things that it may consider necessary or desirable to implement and give effect to, or otherwise in connection with, the Offer and any matters incidental to the Offer, including in respect of options granted to employees of Falconbridge or its subsidiaries.

By order of the Board
Richard Elliston
Secretary
Registered Office:
4th Floor, Panton House,
25/27 Haymarket,
London SW1Y 4EN,
United Kingdom
20 July 2006

Note 1
A member entitled to attend and vote at the Extraordinary General Meeting (the "EGM") is entitled to appoint one or more proxies to attend and vote instead of them. The proxy need not also be a member of the Company. A proxy of a member's own choice may be appointed by inserting the proxy's name on the Form of Proxy in the space provided. If a Form of Proxy is returned without an indication as to how the proxy shall vote on the Resolution, the proxy will exercise his/her discretion as to whether, and if so how, he/she votes on the Resolution.

Note 2
To be valid, a Form of Proxy and, if applicable, any authority under which it is signed, or a copy of such authority certified in accordance with the Company's Articles of Association, must be lodged at the offices of Computershare Investor Services PLC, PO Box 1075, The Pavilions, Bristol, BS99 3FA UK, not later than (i) 10.30 a.m. (British Summer Time) on Saturday, 12 August 2006; or (ii) not less than 48 hours before the time of any adjourned meeting; or (iii) where a poll is taken more than 48 hours after it is demanded, after the poll has been demanded and not less than 24 hours before the time appointed for the taking of the poll. Where a poll is not taken forthwith but is taken not more than 48 hours after it was demanded, a Form of Proxy may be valid if it is delivered at the meeting at which the poll was demanded to the chairman or to the Company Secretary or to any director of the Company. CREST members may also choose to utilise the CREST electronic proxy appointment service in accordance with the procedures set out in Note 13. The lodging of the Form of Proxy (or the electronic appointment of a proxy) will not preclude Shareholders from attending and voting in person at the EGM, should they so wish.

Note 3
To be valid, a Form of Proxy must be signed by the holder or any person duly authorised by the holder or, if the holder is a corporation, executed by a duly authorised person or under its common seal or in any other manner authorised by its constitution.

Note 4
In the case of joint holders, the signature of any one holder is sufficient. If more than one holder lodges a Form of Proxy only that of the holder first named on the Company's Register of Members will be regarded as valid.

Note 5
Any alteration made to a Form of Proxy should be initialled.

Note 6
The Company, pursuant to Regulation 41 of the Uncertificated Securities Regulations 2001, specifies that only those Shareholders registered in the Register of Members of the Company as at 6.00 p.m. (British Summer Time) on Saturday, 12 August 2006 (or, in the event that the EGM is adjourned, in the Register of Members 48 hours before the time of any adjourned meeting(s)) shall be entitled to attend or vote at the EGM in respect of the number of Ordinary Shares registered in their name at that time. Changes to entries on the Register of Members after 6.00 p.m. (British Summer Time) on Saturday, 12 August 2006 (or, in the event that the EGM is adjourned, on the Register of Members 48 hours before the time of any adjourned meeting(s)) shall be disregarded in determining the rights of any person to attend or vote at the meeting.

Note 7
The Resolution, being an ordinary resolution, will be decided by a show of hands unless a poll is demanded in a manner permitted by the Company's Articles of Association.

Note 8
On a show of hands, each member present in person or by proxy has one vote. If a person holds more than one proxy to vote in different ways, then that person may vote For and Against on a show of hands, although this will only count as one vote in each sense, without regard to the number of shares in respect of which the proxy has been appointed.

Note 9
As permitted by the Company's Articles of Association, the chairman of the meeting (or at least five members present in person or by proxy having the right to vote at the EGM or any member or members present in person or by proxy representing not less than one-tenth of the total voting rights of all the members having the right to vote at the EGM) may

demand a poll. On a poll, each member present in person or by proxy has one vote for each fully paid Ordinary Share of which he is a holder.

Note 10
As permitted by the Company's Articles of Association, a proxy appointment will (a) include the right: (i) to demand, or join in demanding, a poll; (ii) to speak at a meeting; and (iii) to vote on any amendment of the Resolution as the proxy thinks fit; and (b) (unless it provides to the contrary) be valid for any adjournment of a meeting.

Note 11
As permitted by the Company's Articles of Association, members present in person or by proxy at the satellite meeting will be counted in the quorum for the meeting and entitled to vote.

Note 12
A proxy appointment which is not delivered or received in accordance with these notes and the Company's Articles of Association shall be invalid. When two or more valid proxy appointments are delivered or received in respect of the same share for use at the EGM, the one which was executed last shall be treated as replacing and revoking the others as regards that share; if the Company is unable to determine which was executed last, none of them shall be treated as valid in respect of that share.

Note 13
CREST members who wish to appoint a proxy or proxies through the CREST electronic proxy appointment service may do so for the EGM to be held on Monday, 14 August 2006 and any adjournment(s) thereof by using the procedures described in the CREST Manual. CREST personal members or other CREST sponsored members, and those CREST members who have appointed a voting service provider(s), should refer to their CREST sponsor or voting service provider(s), who will be able to take the appropriate action on their behalf.

In order for a proxy appointment or instruction made using the CREST service to be valid, the appropriate message (a "CREST Proxy Instruction") must be properly authenticated in accordance with CRESTCo's specifications and must contain the information required for such instructions, as described in the CREST Manual. The message, regardless of whether it constitutes the appointment of a proxy or an amendment to the instruction given to a previously appointed proxy must, in order to be valid, be transmitted so as to be received by Computershare Investor Services PLC (ID 3RA50) by (i) 10.30 a.m. (British Summer Time) on Saturday, 12 August 2006; or (ii) not less than 48 hours before the time of any adjourned meeting; or (iii) where a poll is taken more than 48 hours after it is demanded, after the poll has been demanded and not less than 24 hours before the time appointed for the taking of the poll. For this purpose, the time of receipt will be taken to be the time (as determined by the timestamp applied to the message by the CREST Applications Host) from which Computershare Investor Services PLC is able to retrieve the message by enquiry to CREST in the manner prescribed by CREST. After such time any change of instructions to proxies appointed through CREST should be communicated to the appointee through other means.

CREST members and, where applicable, their CREST sponsors or voting service providers should note that CRESTCo does not make available special procedures in CREST for any particular messages. Normal system timings and limitations will therefore apply in relation to the input of CREST Proxy Instructions. It is the responsibility of the CREST member concerned to take (or, if the CREST member is a CREST personal member or sponsored member or has appointed a voting service provider(s), to procure that his CREST sponsor or voting service provider(s) take(s)) such action as shall be necessary to ensure that a message is transmitted by means of the CREST system by any particular time. In this connection, CREST members and, where applicable, their CREST sponsors or voting service providers are referred, in particular, to those sections of the CREST Manual concerning practical limitations of the CREST system and timings.

The Company may treat as invalid a CREST Proxy Instruction in accordance with the provisions of the Uncertificated Securities Regulations 2001.

Note 14
Unless the context otherwise requires, terms used in this EGM Notice have the meanings ascribed to them in the section headed "Definitions and Glossary of Technical Terms" of the Circular issued by the Company on 20 July 2006.

Proposed Acquisition of Falconbridge Limited

Circular and Notice of Extraordinary General Meeting

RECEIVED
JAN 16 2007
186

CLASS 1 CIRCULAR DATED 30 MAY 2006

THIS DOCUMENT AND ITS ENCLOSURES ARE IMPORTANT AND REQUIRE YOUR IMMEDIATE ATTENTION. If you are in any doubt as to what action you should take, you are recommended to seek your own personal financial advice immediately from your stockbroker, bank manager, solicitor, accountant, fund manager or other appropriate independent financial adviser, who is authorised under the Financial Services and Markets Act 2000 if you are in the United Kingdom, or from another appropriately authorised independent financial adviser if you are in a territory outside the United Kingdom.

If you sell or have sold or otherwise transferred all of your Ordinary Shares, please forward this document and the accompanying documents to the purchaser or transferee or the stockbroker, bank or other agent through whom the sale or transfer is/was effected for onward transmission to the purchaser or transferee. If you sell or have sold or otherwise transferred only part of your holding of Ordinary Shares, you should retain this document and the accompanying documents.

Each of Deutsche Bank and JPMorgan Cazenove is acting exclusively for the Company and no one else in connection with the Proposed Acquisition and will not be responsible to anyone other than the Company for providing the protections afforded to its clients or for providing advice in relation to the Proposed Acquisition and/or any other matter referred to in this document.

For a discussion of certain risk factors which should be taken into account when considering whether to vote in favour of the Resolutions to be proposed at the Extraordinary General Meeting referred to below, see Part II – "Risk Factors".

Capitalised terms have the meanings ascribed to them in the section of this document headed "Definitions and Glossary of Technical Terms". References to times in this document are to British Summer Time unless otherwise stated.

Xstrata plc

(incorporated in England and Wales under the Companies Act 1985, with registered number 4345939)

Proposed Acquisition of Falconbridge Limited

Circular and Notice of Extraordinary General Meeting

The Proposed Acquisition is conditional, amongst other things, upon the approval of Shareholders at the Extraordinary General Meeting referred to below. Your attention is drawn to the letter from the Chairman of Xstrata plc on pages 11 to 23 of this document, which contains a recommendation by Xstrata's Board of Directors that you vote in favour of the Resolutions to be proposed at the Extraordinary General Meeting. You should read this document in its entirety, not rely solely on summarised information and consider whether to vote in favour of the Resolutions in light of the information contained in, and incorporated by reference into, this document.

Notice of an Extraordinary General Meeting of Xstrata, to be held at Congress Center Metalli, Parkhotel Zug, 6300 Zug, Switzerland at 11.30 a.m. (Central European Summer Time) on Friday, 30 June 2006 is set out at the end of this document. You may also attend the Extraordinary General Meeting at Deutsche Bank Auditorium, Winchester House, 1 Great Winchester Street, London EC2N 2DB, UK where a satellite meeting linked by video conference to the Zug meeting will be held concurrently at 10.30 a.m. (British Summer Time).

Shareholders will find enclosed a Form of Proxy for use in connection with the Extraordinary General Meeting. Shareholders are requested to complete and return the Form of Proxy, in accordance with the instructions printed thereon, whether or not they intend to be present at the meeting, so as to be received by the Company's registrars, Computershare Investor Services PLC, PO Box 1075, The Pavilions, Bridgwater Road, Bristol BS99 3FA, UK, as soon as possible but in any event by no later than 10.30 a.m. (British Summer Time) on Wednesday, 28 June 2006. CREST members may also choose to utilise the CREST electronic proxy appointment service in accordance with the procedures set out in the notice convening the Extraordinary General Meeting at the end of this document. The lodging of the Form of Proxy (or the electronic appointment of a proxy) will not preclude Shareholders from attending and voting at the Extraordinary General Meeting, should they so wish.

If you hold Ordinary Shares through the SIS System you will be contacted separately by the Swiss Bank through which you hold Ordinary Shares as to how to participate at the Extraordinary General Meeting.

This document does not constitute or form part of any offer or invitation to purchase, otherwise acquire, subscribe for, sell, otherwise dispose of or issue, or any solicitation of any offer to sell, otherwise dispose of, issue, purchase, otherwise acquire or subscribe for, any security. The Xstrata Offer is being made exclusively by means of, and subject to the terms and conditions set out in, the Offer Document.

Nothing in this document is an offer of securities for sale or a solicitation of an offer to purchase securities in the United States or in any other jurisdiction. The securities of Xstrata referred to herein have not been and will not be registered under the US Securities Act of 1933, as amended (the "Securities Act"), and such securities may not be offered or sold in the United States absent registration under the Securities Act or an applicable exemption from the registration requirements of the Securities Act.

Certain information in relation to the Xstrata Group has been incorporated by reference into this document. You should refer to the section of this document headed "Relevant Documentation".

No statement in this document is intended as a profit forecast and no statement in this document should be interpreted to mean that earnings per Ordinary Share for the current or future financial years would necessarily match or exceed the historical published earnings per Ordinary Share.

Presentation of information on the Falconbridge Group

This document contains certain information relating to Falconbridge and the Falconbridge Group, including the information contained in Part I – "Letter from the Chairman", Part II – "Risk Factors", Part III – "Information on the Falconbridge Group", Part IV – "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group" and Part VI – "Additional Information".

Whilst Xstrata carried out a limited due diligence exercise in respect of Noranda and Former Falconbridge assets in the first half of 2004, it has not had any due diligence access to Noranda or Former Falconbridge since then nor has it had any due diligence access to Falconbridge since its creation through the amalgamation of Noranda and Former Falconbridge on 30 June 2005, including at the time of the Xstrata Group's acquisitions of Falconbridge Shares in August and September 2005. Xstrata believes it does not currently have access to any material non-public financial or other information in respect of the Falconbridge Group. Consequently, the information in this document relating to Falconbridge and the Falconbridge Group (other than in relation to the trading prices of Falconbridge Shares on the TSX and NYSE which is sourced from Bloomberg) has been compiled from information included in public documents filed by the Falconbridge Group only and has not, for the purposes of this document, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Xstrata and the Xstrata Directors have sought to ensure that such information has been accurately reproduced from such sources and, so far as Xstrata is aware and is able to ascertain from information included in public documents filed by the Falconbridge Group, no facts have been omitted which would render the reproduced information inaccurate or misleading. See the risk factor "Lack of due diligence access to Falconbridge" in Part II – "Risk Factors".

Nothing in this paragraph headed "Presentation of information on the Falconbridge Group" is intended to qualify the statements in paragraph 1 of Part VI – "Additional Information – Responsibility".

Presentation of information on the Enlarged Group

Unless the context otherwise requires, references in this document to the "Enlarged Group" are to Xstrata and its subsidiaries and subsidiary undertakings and, where the context requires, its associated undertakings as constituted immediately following completion of each of the Proposed Acquisition and the Tintaya Acquisition and therefore such references include the Xstrata Group as enlarged by the Falconbridge Group and by Tintaya. Completion of the Proposed Acquisition is subject to a number of conditions which are described in detail in Part I – "Letter from the Chairman" and Part V – "Principal Terms of the Proposed Acquisition" and completion of the Tintaya Acquisition is subject to a number of conditions including the receipt of certain regulatory certificates.

Cautionary note regarding forward-looking statements

This document and the information incorporated by reference into this document include statements that are, or may be deemed to be, "forward-looking statements". These forward-looking statements can be identified by the use of forward-looking terminology, including the terms "believes", "estimates", "anticipates", "expects", "intends", "plans", "goal", "target", "aim", "may", "will", "would", "could" or "should" or, in each case, their negative or other variations or comparable terminology. These forward-looking statements include all matters that are not historical facts. They appear in a number of places throughout this document and the information incorporated by reference into this document and include statements regarding the intentions, beliefs or current expectations of the Directors, Xstrata or the Xstrata Group concerning, amongst other things, the results of operations, financial condition, liquidity, prospects, growth, strategies and dividend policy of the Xstrata Group and the Enlarged Group and the industries in which they operate.

This document also contains forward-looking statements regarding the Proposed Acquisition, including statements regarding and relating to the expected completion, and the expected timing of completion, of the Proposed Acquisition (which is conditional, amongst other things, upon Shareholder approval and receipt of certain regulatory clearances) and potential and/or expected synergies and cost savings available to the Enlarged Group.

By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future and may be beyond Xstrata's ability to control or predict. Forward-looking statements are not guarantees of future performance. The Xstrata Group's and the Enlarged Group's actual results of operations, financial condition, liquidity, dividend policy and the development of the industries in which they operate may differ materially from the impression created by the forward-looking statements contained in this document. Further, actual developments in relation to the Proposed Acquisition and/or the Tintaya Acquisition and the expected completion, and timing of completion of, the Proposed Acquisition and the Tintaya Acquisition may differ materially from those

contemplated by forward-looking statements depending on certain factors which include, but are not limited to, the risks that Shareholders may not vote in favour of the Transaction Resolutions, the risks that the Xstrata Group will not be able to obtain the required approvals or clearances from regulatory and other agencies and bodies on a timely basis or at all, the other conditions of the Proposed Acquisition may not be satisfied on a timely basis or at all, the Xstrata Group may not realise the anticipated benefits, operational and other synergies and/or cost savings from the Proposed Acquisition and/or the Cerrejón Acquisition and/or the Tintaya Acquisition and the Xstrata Group may incur and/or experience unanticipated costs and/or delays and/or difficulties relating to integration of the Falconbridge Group and/or the Cerrejón Business and/or Tintaya into the Enlarged Group. In addition, even if the results of operations, financial condition, liquidity and dividend policy of the Xstrata Group and the Enlarged Group (as the case may be), and the development of the industries in which they operate, are consistent with the forward-looking statements contained in this document, those results or developments may not be indicative of results or developments in subsequent periods. Important factors that could cause these differences include, but are not limited to, general economic and business conditions, commodity price volatility, industry trends, competition, changes in government and other regulation, including in relation to the environment, health and safety and taxation, labour relations and work stoppages, changes in political and economic stability, currency fluctuations (including the €/US$, £/US$, A$/US$, C$/US$, ZAR/US$, ARS/US$, CHF/US$, the Colombian peso/US$ and the Peruvian Sol/US$ exchange rates), the Xstrata Group's and the Enlarged Group's ability to integrate new businesses (including the Falconbridge Group, the Cerrejón Business and Tintaya) and recover their reserves or develop new reserves and changes in business strategy or development plans and other risks, including those described in Part II – "Risk Factors".

You are advised to read this document in its entirety, and in particular Part I – "Letter from the Chairman" and Part II – "Risk Factors", for a further discussion of the factors that could affect the Xstrata Group's and the Enlarged Group's future performance and the industries in which they operate. In light of these risks, uncertainties and assumptions, the events described in the forward-looking statements in this document may not occur.

Other than in accordance with its legal or regulatory obligations (including under the Listing Rules, the Disclosure Rules and the Prospectus Rules), Xstrata does not undertake any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events or otherwise.

Presentation of financial information

Unless otherwise indicated, financial information for the Xstrata Group in this document is presented in US dollars and has been prepared in accordance with International Financial Reporting Standards, or IFRS. Unless otherwise indicated, financial information for the Falconbridge Group in this document has been extracted without material amendment from published information, is presented in US dollars and has been prepared in accordance with Canadian GAAP. Financial information for the Falconbridge Group in this document relating to the month ended 30 April 2006 and the three months ended 31 March 2006, pro forma financial information on the amalgamation of Noranda and Former Falconbridge for the three months ended 31 March 2005 and as otherwise indicated, is unaudited. See also "Presentation of information on the Falconbridge Group" above and the risk factor "Lack of due diligence access to Falconbridge" in Part II – "Risk Factors".

UK GAAP (in accordance with which Xstrata previously prepared its financial information) and IFRS differ in certain relevant respects from Canadian GAAP. For a discussion of certain significant differences between UK GAAP and Canadian GAAP and IFRS and Canadian GAAP, see paragraph 2.3 of Part IV – "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group – Principal differences in the application of Xstrata's accounting policies and those applied by Falconbridge".

Unless otherwise indicated, EBITDA represents, when used in relation to the Xstrata Group, operating profit or loss from continuing operations before interest, taxation, depreciation and amortisation and, when used in relation to the Falconbridge Group, income generated from operating assets adding back depreciation, amortisation and accretion, less corporate and general administration costs and research, development and exploration costs. Although none of IFRS, UK GAAP or Canadian GAAP defines the measure EBITDA, it is a measure which is widely used in the natural resources sector to evaluate a company's operating performance. Nevertheless, EBITDA should not be considered in isolation or as a substitute for operating profit, cash flows from operating activities or any other measure for determining Xstrata's operating performance or liquidity that is calculated in accordance with IFRS or UK GAAP or the Falconbridge Group's operating performance or liquidity that is calculated in accordance with Canadian GAAP. As EBITDA is not a measure of performance defined by IFRS, UK GAAP or Canadian GAAP, it may not be comparable to similarly titled measures employed by other companies.

Currencies

In this document, references to "Argentine pesos" or "ARS" are to the lawful currency of Argentina, references to "Australian dollars" or "A$" are to the lawful currency of Australia, references to "Canadian dollars", "C$" or "Cdn$" are to the lawful currency of Canada, references to "Colombian pesos" are to the lawful currency of Colombia, references to "Euro" or "€" are to the currency introduced at the start of the third stage of European economic and monetary union pursuant to the Treaty establishing the European Community, as amended, references to the "Peruvian Sol" are to the lawful currency of Peru, references to "Rand" or "ZAR" are to the lawful currency of South Africa, references to "CHF" are to the lawful currency of Switzerland, references to "£" are to the lawful currency of the United Kingdom and references to "US dollars", "US Dollars", "US$", "$US" or "cents" are to the lawful currency of the United States.

Unless otherwise indicated, the financial information contained in this document has been presented in US dollars. In addition, solely for convenience, this document contains translations of relevant currencies to US dollars. These translations should not be construed as representations that the relevant currency could be converted into US dollars at the rate used or at any other rate.

Ore reserve and mineral resource reporting – basis of preparation

Unless otherwise indicated, all mineral reserves and mineral resources information reproduced in this document in respect of the Falconbridge Group has been prepared for the Falconbridge Group, has been extracted without material amendment from information included in public documents filed by the Falconbridge Group only and has not, for the purposes of this document, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. See – "Presentation of information on the Falconbridge Group" above and the risk factor "Lack of due diligence access to Falconbridge" in Part II – "Risk Factors".

According to information included in public documents filed by the Falconbridge Group, unless otherwise indicated, all estimates of mineral reserves and mineral resources reproduced in this document in respect of the Falconbridge Group:

- have been estimated by or on behalf of the Falconbridge Group in accordance with the CIM Definition Standards on Mineral Resources and Reserves, adopted by the CIM Council on 14 November 2004, and the CIM Estimation of Mineral Resources and Mineral Reserves Best Practice Guidelines, adopted by the CIM Council on 23 November 2003 using geostatistical or classical methods, plus economic and mining parameters appropriate to each operation;

- were compiled, indirectly supervised and verified on behalf of the Falconbridge Group by Chester Moore who was, at 22 March 2006 (being the date of Falconbridge's 2005 Annual Information Form), Falconbridge's Director, Mineral Reserve Estimation and Reporting, a member of the Professional Geoscientists of Ontario with over 30 years of experience as a geologist and a qualified person as defined in NI 43-101;

- are shown on a 100% basis; and

- used the following long-term metal prices for estimates: nickel US$3.25/lb, copper US$0.90/lb, zinc US$0.50/lb with a nickel premium added at Sudbury operations. (Exchange rate of C$1.50 to US$1.00).

According to information included in public documents filed by the Falconbridge Group, there were, at 22 March 2006 (being the date of Falconbridge's 2005 Annual Information Form), no environmental, permitting, legal, taxation, political or other relevant issues known to the Falconbridge Group that would materially affect the estimates of mineral reserves and mineral resources reproduced in this document in respect of the Falconbridge Group.

Unless otherwise indicated, in this document, mineral reserves and mineral resources information in relation to the Falconbridge Group is reported as at 31 December 2005.

Nothing in this paragraph headed "Ore reserve and mineral resource reporting – basis of preparation" is intended to qualify the statements in paragraph 1 of Part VI – "Additional Information – Responsibility".

Rounding

Certain figures included in this document have been subject to rounding adjustments. Accordingly, discrepancies in tables between the totals and the sums of the relevant amounts are due to rounding.

Expected Timetable of Principal Events

The following is the expected timetable of principal events in relation to the Proposed Acquisition:

Commencement of the Xstrata Offer	**18 May 2006**
Expected latest time and date for receipt of Forms of Proxy and receipt of electronic proxy appointments via the CREST system in relation to the Proposed Acquisition	**10.30 a.m. (11.30 a.m. Central European Summer Time) on Wednesday, 28 June 2006**
Extraordinary General Meeting in relation to the Proposed Acquisition	**10.30 a.m. (11.30 a.m. Central European Summer Time) on Friday, 30 June 2006**
Earliest expected completion date of the Proposed Acquisition	**7 July 2006[1]**

Note:

[1] The period during which the Xstrata Offer is open for acceptance may be extended by the Offeror in certain circumstances.

References to times in this document are to British Summer Time unless otherwise stated.

The Tintaya Acquisition is conditional upon, amongst other things, the receipt of certain regulatory certificates and it is expected that the Tintaya Acquisition will be completed by around the middle of June 2006.

The following documentation, which was sent to Shareholders at the relevant time and/or is available as described below, contains information which is relevant to the Proposed Acquisition:

1. Annual Reports and Accounts for the three financial years ended 31 December 2003, 31 December 2004 and 31 December 2005.

   These contain the audited consolidated financial statements of Xstrata for the financial years ended 31 December 2003 and 31 December 2004 prepared in accordance with UK GAAP and the audited consolidated financial statements of Xstrata for the financial year ended 31 December 2005 prepared in accordance with IFRS, together with audit reports in respect of each such year.

2. The Cerrejón Circular

   The Cerrejón Circular dated 23 March 2006 issued by the Company in connection with the Cerrejón Acquisition. This contains, amongst other things:

   (a) a letter from the Senior Independent Director of Xstrata, including, amongst other things, details of, background to and reasons for, the Cerrejón Acquisition;

   (b) a section containing information on Cerrejón;

   (c) a section containing the principal terms of the Cerrejón Acquisition; and

   (d) a section containing a description of the Xstrata Group's relationship with Glencore.

Documentation incorporated by reference into this Circular

The following sections of the Annual Reports and Accounts and the Cerrejón Circular are incorporated by reference into this Circular so as to provide the information required in respect of related party transactions pursuant to paragraph 19 of Annex I of the Prospectus Rules (as incorporated by Chapter 13 Annex 1R of the Listing Rules), to provide historical financial information on Xstrata as background to the section of this document entitled "Information on the Expected Impact of the Proposed Acquisition on the Assets, Liabilities and Earnings of the Enlarged Group" and to provide information in respect of the Cerrejón Acquisition and the Relationship Agreement.

30 May 2006

To Shareholders and, for information only, to participants in the Xstrata Share Schemes

Dear Shareholder,

Proposed Acquisition of Falconbridge Limited

1. Introduction and overview

Xstrata announced on 17 May 2006 its offer to acquire (through an indirect wholly-owned subsidiary) all of the issued and outstanding common shares of Falconbridge Limited ("Falconbridge") not already owned by the Xstrata Group for C$52.50 in cash per Falconbridge Share, or approximately C$16.1 billion in total (approximately US$14.6 billion). The Xstrata Offer values the total common share capital of Falconbridge at approximately C$20.0 billion (approximately US$18.1 billion). The Xstrata Group will also assume Falconbridge's net debt on completion of the Proposed Acquisition, which was US$2,814 million as at 30 April 2006, as disclosed in Falconbridge's unaudited results announcement for the month ended 30 April 2006.

The Xstrata Offer price represents a premium of:

- 12.3% over the value of the revised offer announced by Inco Limited ("Inco") in its competing offer for Falconbridge, based upon the 5 May 2006 closing price on the TSX of Inco shares, the last trading day prior to the announcement of the offer by Teck Cominco Limited ("Teck Cominco") to acquire Inco, and assuming full proration of the share and cash consideration in accordance with the terms of the Inco Offer; and

- 11.2% over the closing price of C$47.23 per Falconbridge Share on 5 May 2006, the last trading day prior to the announcement of Teck Cominco's offer for Inco.

The Xstrata Group currently beneficially owns 73,665,996 Falconbridge Shares representing approximately 19.8% of the outstanding Falconbridge Shares. At the Xstrata Offer price of C$52.50 per Falconbridge Share, the average consideration per share for acquiring all of the Falconbridge Shares, including those already owned, will be approximately C$47.76.

Falconbridge is likely to be required to pay a break fee of up to US$450 million to Inco, and, in the event that this is payable by Falconbridge to Inco, the amount of Falconbridge net debt assumed by Xstrata on completion of the Proposed Acquisition will increase by an amount equivalent to the break fee. The Directors believe that the Proposed Acquisition will be substantially earnings per share and cash flow per share accretive in the first full year of consolidation.

Amongst other things, the Proposed Acquisition is conditional upon the passing of each of the Transaction Resolutions to be proposed at the Extraordinary General Meeting (being the Resolutions numbered 1 to 3 in the EGM Notice), certain regulatory consents being obtained (including under the Investment Canada Act) and there being validly deposited under the Xstrata Offer and not withdrawn such number of Falconbridge Shares which, together with the Falconbridge Shares owned by the Xstrata Group, constitute at least 66⅔% of the Falconbridge Shares on a fully-diluted basis. The conditions of the Xstrata Offer may be waived by the Offeror in certain circumstances.

The Proposed Acquisition will be financed through new committed bank debt facilities. Drawdown under the new debt facilities is conditional, amongst other things, upon the passing of each of the Transaction Resolutions to be proposed at the Extraordinary General Meeting. In addition, if the Proposed Acquisition completes, Xstrata has committed under the Standby Equity Underwriting Letter to undertake one or more equity capital raisings to refinance part of the new debt facilities. Deutsche Bank and JPMSL have irrevocably undertaken (severally, and not jointly or jointly and severally) to underwrite each as to 50%, subject to the terms of the Standby Equity Underwriting Letter, one or more equity offerings to raise such amount as is required to pay or repay any amounts then outstanding under the Equity Bridge Facility Agreement, under which up to US$7.0 billion is available to the Xstrata Group, together with costs and expenses. Unless Xstrata, with the prior approval of Deutsche Bank and JPMorgan Cazenove (such approval not to be unreasonably withheld or delayed), determines otherwise, such amount will be raised by way of an underwritten rights issue of Ordinary Shares to existing Shareholders. The timing and terms of any such equity offering or offerings will be based on an assessment of the Enlarged Group's capital structure following the successful acquisition of Falconbridge. Critical to the Company's assessment will be the maintenance of an investment grade credit rating. Following discussions with Xstrata's major shareholder, Glencore International AG ("Glencore International"), the Directors are confident that any rights issue will be fully supported by Glencore International.

Xstrata has received irrevocable undertakings from Glencore International and Credit Suisse Securities (Europe) Limited ("CSSEL") to vote in favour of each of the Resolutions to be proposed at the Extraordinary General Meeting. In aggregate, these undertakings are given in respect of 252,601,000 Ordinary Shares representing approximately 35.84% of Xstrata's current issued ordinary share capital.

The purpose of this document is to provide you with details of, the background to and the reasons for, the Proposed Acquisition, to explain why the Board of Directors believes that the Proposed Acquisition is in the best interests of the Company and its Shareholders as a whole and to seek your approval for the Proposed Acquisition and the other Resolutions to be proposed at the Extraordinary General Meeting. A notice convening the Extraordinary General Meeting of the Company is set out at the end of this document.

2. Information on Xstrata

Development and delivery of Xstrata's strategy since 2002

Since its initial public offering on the London Stock Exchange in March 2002, Xstrata has grown into a major global diversified mining group, headquartered in Zug, Switzerland, with meaningful positions in six major international commodity markets: copper, coking coal, thermal coal, ferrochrome, vanadium and zinc, and additional exposures to gold, lead and silver. The Xstrata Group's operations and projects span five continents and nine countries: Australia, South Africa, Spain, Germany, Argentina, Peru, Colombia, Canada and the United Kingdom, employing approximately 24,000 people worldwide, including contractors.

Xstrata is listed on the Official List and admitted to trading on the London Stock Exchange's main market for listed securities and the SWX Swiss Exchange.

In March 2002, at the time of the Xstrata IPO, Xstrata's board of directors articulated its strategy to develop Xstrata as a distinct, value-focused, diversified mining company positioned to compete for and create value by leveraging the Company's size and momentum to deliver significant growth, while improving the capital and operating efficiency of its businesses. Over the four years since listing, Xstrata has delivered greater earnings growth and higher real cost savings, as a proportion of net operating costs, than those disclosed by its larger UK mining company peers. These financial and

operating results have contributed to the sustained share price out-performance of Xstrata versus its industry peers, which since listing has delivered a total shareholder return in excess of 300%.

As a consequence, Xstrata has firmly established itself over this relatively short period as a leading international metals and mining group with a diversified portfolio of cash generative businesses and a proven ability to generate value through the development and highly efficient operation of its assets. Since and including the Xstrata IPO, the financial markets have provided some US$6 billion in equity capital to support the Xstrata Group's development. This support has contributed to Xstrata's outperformance relative to both the larger UK diversified mining companies and the wider UK market. The growth in scale and quality of the Xstrata Group's portfolio of assets since 2002, combined with Xstrata's international shareholder base and access to capital markets, has significantly enhanced Xstrata's capacity to pursue and exploit superior value opportunities in the global metals and mining sector as and when they arise.

Xstrata's growth strategy, in particular, has been pursued across three fronts: growth from within the Xstrata Group, incremental growth from outside the Xstrata Group and significant transformational growth from major acquisitions.

Growth from within the Xstrata Group: One of the strongest elements in the improvement of the quality of the Xstrata Group's portfolio has been the active development of high-value growth opportunities within the Xstrata Group's commodity businesses. As a consequence, in three of the Xstrata Group's four businesses (Xstrata Alloys, Xstrata Coal and Xstrata Zinc), the Xstrata Group has a significant pipeline of potential projects that can be initiated in response to market demand. Many of these are relatively lower-risk "brownfield" projects (building on existing infrastructure and operations) and are therefore characterised by lower capital costs, shorter lead times and higher than average returns. In addition, the largest of these, the Lion ferrochrome project, the expansions between 2001 and 2005 at the San Juan de Nieva zinc smelter and the Black Star zinc open pit in Australia, and the Ulan "fat face" longwall and Rolleston open-cast mines in thermal coal, are expected to deliver significantly reduced operating costs and improved margins within their respective businesses.

Incremental growth: The Xstrata Group has also looked to secure growth from opportunities outside the portfolio, particularly in the case of the global copper business the Xstrata Group acquired with the purchase of MIM Holdings Limited (now known as Xstrata Queensland Limited) ("MIM") in 2003, the acquisition of one third of Cerrejón which completed on 12 May 2006 and the proposed acquisition of Tintaya announced on 16 May 2006. The Xstrata Group's successful purchase of the Las Bambas copper project in Peru in 2004 represents a particularly valuable growth option for the future. First year drilling results have indicated three high potential skarn and porphyry mineralised areas which could form the base of a major copper/gold/molybdenum operation, with further upside from other prospective areas that form part of the 2006 drilling programme. In addition, Xstrata Copper holds a 62.5% option over the Tampakan Project, a large scale copper gold porphyry in the Philippines, where resource estimates were updated in April 2006 to 2.0 billion tonnes at 0.59% copper and 0.23 g/t gold, using a 0.3% copper cut-off grade. Tampakan is now in pre-feasibility stage and a decision to take up the Xstrata Group's option and proceed with the development of this potential major copper/gold operation is expected to be made in the second half of 2006. The acquisition of Glencore's one-third stake in Cerrejón has provided the Xstrata Group with a meaningful interest in one of the world's largest export open pit coal mining operations and one of the lowest-cost producers of export thermal coal supplied to the important Atlantic market. The Tintaya Acquisition will expand Xstrata Copper's current production portfolio with an additional 120,000 tonnes of copper in cathode and concentrate per annum and also provide the Xstrata Group with a unique opportunity to strengthen its strategic position in southern Peru.

Transformational growth from major acquisitions: The successful acquisition and integration of the former Enex and Duiker coal assets in 2002 and of MIM in 2003 were key elements in the transformation of Xstrata. In addition to the positive impact and improved investment rating of greater scale and diversification, significant additional value has been secured for all stakeholders through the improvement of capital and operational efficiencies within the acquired operations. In 2004, the first full year of ownership of MIM, mining productivity rose 15% and 20% at the Mount Isa copper and Mount Isa zinc operations respectively, delivering an efficiency gain of US$52 million. As importantly, health, safety and environmental performance improved dramatically across the acquired businesses, with the total recordable injury frequency rate reducing by 49% and 32%, respectively, in the former MIM copper and coal businesses. Overall, the frequency of lost time injuries has been reduced by over 50% at the former MIM operations since the Xstrata Group's acquisition in 2003.

Since the acquisition and successful integration of MIM, the Xstrata Group's attention has been largely focused on maximising the value of the existing portfolio with an emphasis on optimising operating performance, and developing its pipeline of high return brownfield and greenfield growth projects. However, as indicated before, the Board remains alert to opportunities and, in addition to the Cerrejón Acquisition which completed on 12 May 2006 and the Tintaya Acquisition which is expected to complete around the middle of June 2006, a number of other substantial company transforming transactions were considered in 2004 and 2005, and further opportunities remain under active review.

Current trading update

At the close of business on 26 May 2006, Xstrata's market capitalisation was approximately £14.3 billion (approximately US$26.6 billion). For the year ended 31 December 2005, Xstrata's consolidated profit attributable to equity holders of the parent was US$1,706.4 million on consolidated revenue of US$8,049.8 million, compared with US$1,067.1 million and US$6,462.4 million respectively for the year ended 31 December 2004. As of 31 December 2005, Xstrata's consolidated net assets were US$8,137.2 million, compared with US$7,325.2 million at 31 December 2004. The above financial information is presented on an IFRS basis and extracted from Xstrata's audited consolidated financial statements for the year ended 31 December 2005.

Since 31 December 2005, Xstrata has continued to trade very satisfactorily. In the first five months of 2006, base metals prices, especially copper and zinc, have risen strongly above the average prices received in 2005 to reach new highs and thermal coal spot prices have improved in both the Atlantic and Pacific markets. As a consequence, Xstrata believes that the outlook for 2006 is now more positive than at the time the Company's 2005 Annual Report was issued in early April 2006.

The drivers of the ongoing strength in the prices of copper, zinc, thermal and coking coal, ferrochrome and vanadium rest on four major factors: continued robust demand, particularly from China; the lack of any meaningful near-term additional supply from new base metals projects; low stock levels in the base metals markets; and a series of supply-shocks from existing base metals and bulk commodity producers caused by a broad range of reasonably typical operational issues including inclement weather, labour disputes, lower grades and production breakdowns. Xstrata believes these factors will continue to support commodity prices above their long-run averages for several years.

Earnings in 2006 will also benefit from the acquisition of the Cerrejón Business and production growth in the Xstrata Group's zinc and coal businesses, the latter coming through both incremental growth in New South Wales and the additional 5 Mt expected from the new, low-cost Rolleston open cut mine in Queensland. The Tintaya Acquisition is also expected to expand Xstrata Copper's current production portfolio with an additional 120,000 tonnes of copper in cathode and concentrate per annum. Other major growth projects across the Xstrata Group continue to make excellent progress: the Lion ferrochrome project in South Africa is on track for first production in the second half of 2006; the expanded 100,000 metre drilling programme at the Las Bambas copper project in Peru is well underway; and a decision on the Xstrata Group's take-up of its option to acquire 62.5% of the Tampakan copper/gold project in the Philippines is expected to be made following completion of the pre-feasibility study in the second half of 2006.

3. The Proposed Acquisition

The suite of assets that now form part of Falconbridge attracted the Xstrata Group's interest from early in 2004, and Xstrata undertook a limited due diligence exercise in the first half of 2004. This confirmed Xstrata's belief in the fundamental quality of the businesses and the attraction of a combination with Xstrata. However, the related shareholdings of Brascan (now known as Brookfield), Noranda and Former Falconbridge meant it was not possible to construct a transaction that was acceptable to Brookfield at that time. This was primarily a consequence of Brookfield's pursuit of an unconditional sale of its holdings, and Xstrata's desire to make any such purchase conditional on a successful offer to the minorities in both Noranda and Former Falconbridge (in order to secure access to the cashflows of the two companies). Following the amalgamation of Noranda and Former Falconbridge in June 2005, the Xstrata Group moved quickly, in August and September 2005, to purchase what is now a 19.8% stake in Falconbridge at a cost of approximately US$1.7 billion or C$28 per Falconbridge Share from Brookfield, Falconbridge's then largest shareholder, and Lansdowne.

On 11 October 2005, without any prior discussion with Xstrata, Inco and Falconbridge announced an offer by Inco to purchase all of the issued and outstanding common shares of Falconbridge for a per share consideration of C$34.00 in cash or 0.6713 of an Inco share and C$0.05 in cash. On 13 May 2006, Inco and Falconbridge announced a revised offer by Inco for a per share consideration of C$51.17 in cash or 0.6927 of an Inco share and C$0.05 in cash, subject to a

maximum cash consideration available under Inco's offer of C$4,786,678,875 and subject to a maximum of 200,657,578 Inco common shares issuable under the Inco Offer, such that if all Falconbridge Shareholders tendered for cash, under the Inco Offer each Falconbridge Shareholder would be entitled to receive on a pro rata basis C$12.50 in cash and 0.524 of an Inco common share for each Falconbridge Share tendered.

The Falconbridge board approved the initial Inco Offer and its revision and entered into a support agreement with Inco and four amendments thereto, which Xstrata, as a major shareholder in Falconbridge, regards as structured unduly in favour of Inco and its offer. This agreement includes, amongst other things, restrictive non-solicitation covenants, an opportunity for Inco to match any third-party offer within a ten business day period and a break fee of up to US$450 million.

On 18 November 2005, Inco and Falconbridge announced they had received a request for additional information, commonly referred to as a second request, from the Antitrust Division of the US Department of Justice in connection with the Inco Offer. On 8 December 2005, Inco announced that it would be extending the expiry time of the Inco Offer from 23 December 2005 to 27 January 2006 to allow more time for the receipt of all necessary regulatory clearances. On 12 January 2006, Inco announced that it would be further extending the expiry of the Inco Offer from 27 January 2006 to 28 February 2006, again to allow more time for the receipt of all necessary regulatory clearances. Inco also announced a further amendment of the Inco Support Agreement to extend the expiry time of the Inco Offer by an additional 60 days from late February 2006 if all necessary regulatory clearances were not obtained by that date. On 21 February 2006, Inco announced that it would be further extending the expiry of the Inco Offer from 28 February 2006 to 30 June 2006, once again to allow more time for the receipt of all necessary regulatory clearances. Inco also announced that the Inco Support Agreement had again been amended to reflect Inco's agreement with Falconbridge that the Inco Offer could be extended through one or more additional extensions to early August 2006. Falconbridge also agreed with Inco that the Inco Offer can be accelerated in the event that the necessary regulatory clearances are obtained earlier. On 8 May 2006, Falconbridge announced that it and Inco understood that the European Commission would shortly be issuing a "Statement of Objections" in respect of the Inco Offer. To achieve regulatory clearance, Inco and Falconbridge may be required to offer further remedies or disposals to meet the requirements of the antitrust authorities. Inco and Falconbridge further amended the Inco Support Agreement on 13 May 2006 in connection with Inco's announced revised offer to increase the break fee payable thereunder from US$320 million to US$450 million.

Falconbridge has filed with the Canadian Securities Administrators a Notice of Change to its Directors' Circular dated 26 May 2006 relating to the announced revised Inco Offer, which states that the board of directors of Falconbridge continues to unanimously recommend that Falconbridge Shareholders accept the announced revised Inco Offer. The Notice of Change also states that on 23 May 2006 the board of directors of Falconbridge deferred the separation time under the Shareholder Rights Plan with respect to the announcement by Xstrata of the Xstrata Offer and that the board of directors of Falconbridge is currently evaluating the Xstrata Offer and expects to issue its directors' circular in respect thereof on or before 2 June 2006.

On 8 May 2006, Teck Cominco announced its intention to make an offer for Inco in cash and Class B shares and on 23 May 2006 Teck Cominco commenced its offer for Inco by mailing its offer documents to Inco shareholders. Assuming full proration of the cash and share consideration, the consideration under Teck Cominco's offer is C$28.00 in cash and 0.6293 of a Teck Cominco Class B share for each Inco share tendered. It is a condition of the Teck Cominco offer that the Inco Offer shall have been withdrawn or terminated without any Falconbridge Shares having been purchased by Inco pursuant to such offer, and that the Inco Support Agreement shall have been terminated in accordance with its terms.

In light of the Inco Offer and the restrictive nature of the Inco Support Agreement, the Board decided to put Xstrata's proposal directly to Falconbridge Shareholders. The announcement of the Xstrata Offer ensures that Falconbridge Shareholders will have full opportunity to consider and assess the merits of the Xstrata proposal directly, and that the board of directors of Falconbridge gives the proposal due and proper consideration.

The Directors are confident that the acquisition of Falconbridge by the Xstrata Group will deliver significant benefits to the operations, employees and stakeholders of Falconbridge. Given the Xstrata Group's stated growth strategy, the Directors believe the Xstrata Group's position as a major and long-term direct investor in its Canadian businesses will be of material overall benefit to Canada. The Directors therefore expect to receive the necessary clearance under the Investment Canada Act in due course. The Directors are also confident that the Xstrata Offer will not encounter substantive antitrust issues in Canada, the United States or Europe and will promptly receive the necessary competition authority clearances.

The Directors believe that Xstrata's all cash offer is a superior offer for Falconbridge Shareholders to the offer that Inco has proposed, offering them a compelling opportunity to realise a guaranteed cash value, with no market risk.

4. Information on Falconbridge

Falconbridge, which is incorporated in the Province of Ontario, Canada and listed on the Toronto and New York stock exchanges, is a leading international copper and nickel company with investments in fully integrated zinc and aluminium assets. Falconbridge is one of the world's largest producers of zinc and nickel and a significant producer of copper, primary

and fabricated aluminium, cobalt, lead, molybdenum, silver, gold and sulphuric acid. It is also one of the world's largest recyclers and processors of metal-bearing materials.

Falconbridge's principal products are copper, nickel, zinc and aluminium, with the balance of its products coming from by-products and co-products that include silver, gold, platinum group metals, lead, selenium, tellurium, cadmium, indium, cobalt, nickel sulphate and sulphuric acid.

The principal markets for Falconbridge's products include the steel, refinery and foundry, construction, telecommunications, automotive, agricultural and chemical industries.

For the year ended 31 December 2005, Falconbridge had audited consolidated revenues of US$8,148 million (2004: US$6,764 million), EBITDA of US$2,236 million (2004: US$1,771 million) and profit before taxation of US$1,391 million (2004: US$945 million). Falconbridge had audited gross assets as at 31 December 2005 of US$12,418 million (2004: US$9,628 million. The Falconbridge financial information presented above has been extracted without material amendment from published financial reports prepared under Canadian GAAP.

According to Falconbridge's Annual Information Form published on 22 March 2006, at 31 December 2005, the Falconbridge Group had approximately 14,500 employees in 18 countries.

Following the amalgamation of Noranda and Former Falconbridge on 30 June 2005, Falconbridge began trading on the Toronto and New York stock exchanges on 6 July 2005 at a price of C$21.55 and US$17.34 respectively. Since that time, the Falconbridge Shares have traded upwards, rising by C$3.77 to C$34.59 on the day Inco announced its recommended offer for Falconbridge and reaching a closing high of C$55.94 on the Toronto Stock Exchange on 29 May 2006, the latest practicable date prior to the publication of this document.

So far as Xstrata is aware, Aaron W. Regent, President, Derek G. Pannell, Chief Executive Officer, Steven J. Douglas, Executive Vice-President and Chief Financial Officer and Ian Pearce, Chief Operating Officer, are key individuals important to Falconbridge. Further biographical details of these individuals are set out in paragraph 4 of Part VI – "Additional Information – Details of key individuals important to Falconbridge's business".

See "Presentation of Information – Presentation of information on the Falconbridge Group" and the risk factor "Lack of due diligence access to Falconbridge" in Part II – "Risk Factors".

5. Benefits and financial impact of the Proposed Acquisition

Benefits of the Proposed Acquisition

The Proposed Acquisition will provide Xstrata with a significant addition to its global copper business and with a new world class global nickel business – an attractive new addition to Xstrata's commodity portfolio. Xstrata believes that Falconbridge's copper and nickel businesses have long-life, high quality reserve and resource bases and are located in geographies with well-established mining cultures. Given their size and cost position, Xstrata expects these businesses to generate substantial and robust cash flows through the economic cycle, with Xstrata enjoying additional benefit from the inclusion of Falconbridge's zinc and aluminium businesses.

The Directors are confident that a combination of Xstrata and Falconbridge has a strong strategic rationale. The Board believes that there are substantial benefits to be gained from a combination of the two businesses and that the transaction would be in the best interests of both Xstrata and Falconbridge and of their respective shareholders, customers and employees.

The Directors believe that the Proposed Acquisition will be substantially earnings per share and cash flow per share accretive in the first full year of consolidation.

Together with the Cerrejón Acquisition and the Tintaya Acquisition, the Enlarged Group will be the world's fifth largest global diversified mining and metals group, with the scale, diversification and quality of assets from which Xstrata can continue to create significant value for Shareholders through:

- greater critical mass, enhancing the Enlarged Group's ability to compete and grow within an increasingly consolidated global metals and mining industry;

- an excellent spread of operating assets across North and South America, Europe, Australia and South Africa, and operations in seven major international commodity markets: copper, nickel, metallurgical coal, thermal coal, ferrochrome, zinc and aluminium. The Enlarged Group is expected to be the world's fourth largest producer of copper and nickel, the world's largest producer of zinc and ferrochrome and a leading exporter of thermal coal;

- diversification of geographic, commodity and currency risk that Xstrata believes is on a par with the best in the mining industry;

- entry into a significant new global business, nickel, comprising long-life assets with excellent development opportunities;

- a world-class portfolio of assets, characterised by five commodity businesses that comprise large-scale, long-life, robust, cash generative operations that are competitively positioned within their respective industries;

- a significantly improved pipeline of brownfield and greenfield growth projects that extend the life of the existing operations and ensure long-term organic growth and optionality;

- an asset base that provides increased financial flexibility, with improved stability and security of cash flow and earnings; and

- the combined expertise of Xstrata's and Falconbridge's workforce and management at a time when there is elevated competition for skills in the mining sector.

Xstrata believes that the combination of the Las Bambas and Tampakan copper projects with Falconbride's El Pachón and El Morro projects, together with the brownfield potential that exists at Collahuasi, Lomas Bayas, Altonorte and Tintaya, would provide Xstrata with a suite of world-class, internal growth options in copper. In addition, Xstrata will have a strong pipeline of nickel growth opportunities, in particular at Sudbury with the late stage Nickel Rim project, brownfield expansions at both Raglan and Falcondo, together with the Koniambo and Kabanga resources. This would be complemented by the extensive, low-risk, brownfield expansion potential that already exists in Xstrata's coal, zinc and alloys businesses.

The Enlarged Group following successful completion of the Proposed Acquisition

The Xstrata Offer values the total common share capital of Falconbridge at approximately C$20.0 billion (approximately US$18.1 billion). The Xstrata Group will assume Falconbridge's net debt on completion of the Proposed Acquisition, which was US$2,814 million as at 30 April 2006 (being Falconbridge's gross indebtedness of US$3,279 million (US$353 million current debt and US$2,926 million non-current debt) offset by cash or cash equivalents of US$465 million), as disclosed in Falconbridge's unaudited results announcement for the month ended 30 April 2006 and assuming the acquisition of all outstanding Falconbridge Shares not already owned by the Xstrata Group. Falconbridge is likely to be required to pay a break fee of up to US$450 million to Inco following termination of the Inco Support Agreement entered into in respect of the Inco Offer, including in the event that the Xstrata Offer is successful. Any such payment would reduce Falconbridge's cash and increase Falconbridge's net debt by a corresponding amount. For further details in relation to this break fee, see paragraph 8.2(b) of Part VI – "Additional Information – Material contracts".

See paragraph 7 of this Part I below in relation to the financing structure for the Proposed Acquisition and paragraphs 8.1(c) and 8.1(d) of Part VI – "Additional Information – Material contracts" for details of the Xstrata Group's debt facilities available to the Xstrata Group in connection with the Proposed Acquisition.

Xstrata's management structure devolves responsibility to its four existing global commodity divisions run by management teams situated in proximity to their principal operations. Accordingly, Xstrata intends to establish Xstrata Nickel as an additional standalone commodity business, with its global head office in Toronto. Further regional offices for the Enlarged Group's copper and zinc operations would also be established in Canada, with management of Canadian operations maintained on a business-as-usual basis.

Anticipated annualised cash cost savings of around US$120 million comprise reductions in certain duplicated head office and administrative functions and non-Canadian exploration activity, together with a proportional share of the synergies identified by Inco and Falconbridge from the Sudbury nickel businesses. In addition, Xstrata expects to benefit from the incorporation of Falconbridge into the Xstrata Group's financial structure and from synergies arising from the optimisation of material flows across Xstrata's enlarged copper and zinc businesses.

Xstrata fully supports the synergy plan announced by Inco and Falconbridge for their Sudbury basin nickel operations as a logical and long-awaited next step for the Canadian nickel industry. According to Inco's offer document of 24 October 2005, Inco and Falconbridge jointly identified the potential to realise annual pre-tax operating and corporate synergies of approximately US$350 million and expect these savings to be fully realised by the end of 2007. Inco highlighted the contiguous nature of Inco's and Falconbridge's nickel mining operations within the Sudbury basin and, to a lesser extent, the proximity of Inco's and Falconbridge's headquarters in downtown Toronto in relation to such synergies. Falconbridge in its unaudited results announcement for April 2006, released on 18 May 2006, stated that the combined Falconbridge and Inco would benefit from estimated annual synergies of approximately US$390 million, a revised higher estimate than the original US$350 million synergies estimate which Falconbridge attributed to the impact of higher metals prices. Xstrata believes that a merger of Inco and Falconbridge is not a necessary requirement for achieving the Sudbury synergy plan. As the new owner of Falconbridge, Xstrata would be fully committed to working with Inco and other key stakeholders to optimise the Sudbury operations in order to secure these synergies that Xstrata believes are critical to securing the long-term robustness and future viability of the Sudbury operations through more normalised nickel pricing environments. However, Xstrata believes that the clear majority of these synergies relates to the optimisation of product flows and regional co-operation rather than any aggressive cutting of the Falconbridge workforce. Xstrata has therefore committed not to make any lay-offs at Sudbury for a three-year period, from the date of acquisition.

Given the value inherent in the combination of Xstrata's and Falconbridge's copper businesses in South America, the Directors believe that Xstrata is the natural partner for Falconbridge. Together with the Tintaya Acquisition, the Proposed Acquisition would increase annual attributable copper production capacity to around 1 Mtpa.

Xstrata estimates that, if each of the Proposed Acquisition, the Cerrejón Acquisition and the Tintaya Acquisition had become effective on 1 January 2005, approximately 45% of the Enlarged Group's EBITDA for the year ended 31 December 2005 would have been generated from the Enlarged Group's copper business, approximately 25% from the coal business, approximately 15% from the nickel business, and approximately 5% from each of the zinc, ferroalloys and aluminium businesses. See paragraph 12.4 of Part VI – "Additional Information – Basis of compilation of commodity and geographical splits".

On the same basis Xstrata estimates that approximately 30% of the Enlarged Group's revenue for the year ended 31 December 2005 would have been generated from North America, approximately 25% from each of Australia and South America and approximately 10% from each of Europe and South Africa.

See paragraph 12.4 of Part VI - "Additional Information - Basis of compilation of commodity and geographical splits".

The Board of Directors has taken into account, amongst other things, the likelihood of Falconbridge having to pay the break fee of up to US$450 million to Inco in reaching its decision to recommend that Shareholders vote in favour of the Proposed Acquisition. See paragraph 14 of this Part I.

6. Dividend policy

The Directors have hitherto adopted a progressive dividend policy which takes into account the underlying growth in earnings of the Xstrata Group, as well as its capital requirements and cash flows, whilst maintaining an appropriate level of dividend cover. Following completion of the Proposed Acquisition and the Tintaya Acquisition, Xstrata intends to maintain this dividend policy, increasing dividends broadly in line with underlying earnings growth.

7. Financing structure

Assuming the acquisition of all outstanding Falconbridge Shares not already owned by the Xstrata Group, the aggregate consideration payable by the Xstrata Group for the Proposed Acquisition is expected to be approximately C$16.1 billion (approximately US$14.6 billion) and will be financed through new committed bank debt facilities.

Barclays, Deutsche Bank, JPMorgan Chase and RBS have arranged and underwritten the new senior bank debt. The new syndicated loan arrangements have been entered into expressly for the purpose of providing the necessary debt financing for the Proposed Acquisition, refinancing Xstrata's existing bank debt and certain existing indebtedness of Falconbridge and providing working capital facilities for the Enlarged Group.

In connection with the Equity Bridge Facility under which debt of up to US$7.0 billion will be available to the Xstrata Group for use in connection with the Proposed Acquisition, Xstrata, Deutsche Bank, JPMorgan Cazenove and JPMSL have entered into the Standby Equity Underwriting Letter pursuant to which the Company has committed to undertake and Deutsche Bank and JPMSL have irrevocably undertaken (severally, and not jointly or jointly and severally) to underwrite each as to 50%, in each case subject to the terms of the Standby Equity Underwriting Letter, one or more equity offerings by the Company to raise the Equity Refinancing Amount. The net proceeds raised by way of such equity offering(s) will be used first to pay or repay amounts outstanding under the Equity Bridge Facility Agreement. The size and terms of any such equity offering(s) will be predicated on ensuring that the Enlarged Group continues to have an investment grade credit rating. Unless Xstrata, with the prior approval of Deutsche Bank and JPMorgan Cazenove (such approval not to be unreasonably withheld or delayed), determines otherwise, the Equity Refinancing Amount will be raised by way of an underwritten rights issue of Ordinary Shares to existing Shareholders. Xstrata may, however, with such prior approval, instead elect to raise the Equity Refinancing Amount through any one or more of the following:

- an underwritten rights issue of Ordinary Shares or convertible unsecured loan stock or other securities to existing Shareholders;
- an underwritten non-pre-emptive cash placing of Ordinary Shares;
- an underwritten non-pre-emptive cash placing of Ordinary Shares owned by Batiss; and/or
- such other method as Xstrata, Deutsche Bank and JPMorgan Cazenove, may agree.

Deutsche Bank, JPMorgan Cazenove, JPMSL and Xstrata have agreed that the issue price of any Ordinary Shares, stock units or other securities, as the case may be, proposed to be issued in connection with any rights issue, cash placing and/or Batiss placing will be determined by Xstrata, Deutsche Bank and JPMorgan Cazenove at the time the relevant equity offering is launched acting reasonably and in good faith in the light of the then prevailing market conditions, any relevant Listing Rules requirements and/or Investor Protection Committee Guidelines, the market price of an Ordinary Share immediately prior to launch and, in the case of a rights issue, customary discounts to market price.

Summaries of the principal terms of the new syndicated loan arrangements and the Standby Equity Underwriting Letter are set out in paragraphs 8.1(c) to 8.1(e) of Part VI – "Additional Information – Material contracts".

8. Irrevocable undertakings

Glencore International and CSSEL have irrevocably undertaken to vote in favour of each of the Resolutions to be proposed at the EGM. In aggregate, these undertakings are given in respect of 252,601,000 Ordinary Shares representing approximately 35.84% of Xstrata's current issued ordinary share capital.

9. Principal terms of the Proposed Acquisition

The Xstrata Offer is being effected by means of a tender offer to Falconbridge Shareholders. The Offeror, a wholly-owned indirect subsidiary of Xstrata, is offering, upon and subject to the terms and conditions of the Xstrata Offer, to purchase all of the issued and outstanding Falconbridge Shares, at a price of C$52.50 in cash per Falconbridge Share, other than the Falconbridge Shares already owned by the Xstrata Group.

The Xstrata Offer is conditional upon, amongst other things:

- certain regulatory consents being obtained;
- there being validly deposited under the Xstrata Offer and not withdrawn:

(i) such number of Falconbridge Shares which, together with the Falconbridge Shares owned by the Offeror and its affiliates, constitutes at least 66⅔% of the Falconbridge Shares on a fully-diluted basis; and

(ii) at least a majority of the Falconbridge Shares, the votes attached to which would be included in the minority approval of a second step business combination or going private transaction (being such number of votes as would satisfy the shareholder approval requirements of certain Canadian provincial securities laws applicable to the acquisition by the Xstrata Group of the Falconbridge Shares it does not own following the successful completion of the Xstrata Offer);

- Xstrata Shareholders having approved the Proposed Acquisition at the Extraordinary General Meeting in accordance with the requirements of the Listing Rules and the passing of each of the other Transaction Resolutions to be proposed at the Extraordinary General Meeting; and

- the Offeror having determined in its sole judgment that, amongst other things, Falconbridge's Shareholder Rights Plan does not provide rights to Falconbridge Shareholders to purchase any securities of Falconbridge as a result of the Xstrata Offer and does not and will not adversely affect the Xstrata Offer, the Offeror or Xstrata, either before or on consummation of the Xstrata Offer.

A summary of the principal terms of the Proposed Acquisition and the Xstrata Offer, and details of the purpose of the Xstrata Offer and plans for Falconbridge, are set out in Part V – "Principal Terms of the Proposed Acquisition".

10. Risk factors

For a discussion of certain risk factors which should be taken into account when considering whether to vote in favour of the Resolutions, see Part II – "Risk Factors".

11. Extraordinary General Meeting

In view of the size of the Proposed Acquisition it is conditional upon, amongst other things, the approval of Shareholders in general meeting. **A notice convening an extraordinary general meeting of the Company to be held at Congress Center Metalli, Parkhotel Zug, 6300 Zug, Switzerland at 11.30 a.m. (Central European Summer Time) on Friday, 30 June 2006 is set out at the end of this document.** You may also attend the Extraordinary General Meeting at Deutsche Bank Auditorium, Winchester House, 1 Great Winchester Street, London EC2N 2DB, UK where a satellite meeting linked by video conference to the Zug meeting will be held concurrently at 10.30 a.m. (British Summer Time). A Form of Proxy to be used in connection with the Extraordinary General Meeting is enclosed with this document. The purpose of the Extraordinary General Meeting is to seek Shareholders' approval of the Resolutions set out in the EGM Notice.

In summary, the Transaction Resolutions will enable the Company to complete the Proposed Acquisition and will give the Company the maximum flexibility in relation to the proposed refinancing, through one or more equity offerings, of the new debt facilities entered into in respect of the Proposed Acquisition. Whilst the authority to be sought at the Extraordinary General Meeting will allow the Directors to allot new securities at their nominal value of US$0.50 (being the lowest price at which such securities are legally allowed to be issued) the Directors will take into account the interests of the Company and its Shareholders in respect of any such equity offerings and expect that any such offering would be at a significant premium to their nominal value.

The Resolutions will propose:

(a) subject to the Resolutions referred to in paragraphs (b) and (c) below being passed, to approve the Proposed Acquisition;

(b) to increase the authorised share capital of the Company from US$437,500,000.50 and £50,000 to US$7,554,974,199 and £50,000 by the creation of an additional 14,234,948,397 Ordinary Shares (representing an increase in the authorised ordinary share capital of the Company of approximately 1,627%);

(c) subject to the Resolution referred to in paragraph (b) above being passed, to authorise the directors of the Company, for the purposes of section 80 of the Companies Act, to exercise all the powers of the Company to allot relevant securities (as defined in that section) (i) in connection with one or more issues of relevant securities under one or more

transactions to refinance in whole or in part the Equity Bridge Facility, up to an aggregate nominal amount of US$7,000,000,000.00 (equivalent to 14,000,000,000 Ordinary Shares, representing approximately 1,986% of the Company's issued ordinary share capital at 29 May 2006, being the latest practicable date prior to the publication of this document); and (ii) otherwise than in connection with one or more issues of relevant securities under one or more transactions to refinance in whole or in part any amount outstanding under the Equity Bridge Facility, up to an aggregate nominal amount of US$117,474,198.50 (equivalent to 234,948,397 Ordinary Shares, representing approximately one third of the Company's issued ordinary share capital at 29 May 2006, being the latest practicable date prior to the publication of this document); and

(d) to authorise the directors of the Company to allot equity securities for cash pursuant to the authority referred to in paragraph (c) above as if section 89(1) of the Companies Act did not apply to such allotment. Other than in connection with a rights, scrip dividend or other similar issue, the authority contained in Resolution 4 set out in the EGM Notice will be limited to a maximum nominal amount of US$17,621,129.00 (equivalent to approximately 35,242,258 Ordinary Shares, representing approximately 5% of the Company's issued ordinary share capital at 29 May 2006, being the latest practicable date prior to the publication of this document).

The Proposed Acquisition is conditional, amongst other things, upon the passing of each of the Transaction Resolutions, being the Resolutions referred to in paragraphs (a), (b) and (c) above. The Proposed Acquisition is not conditional on the passing of the Resolution referred to in paragraph (d) above.

Each of the Transaction Resolutions will be proposed as an ordinary resolution and, being an ordinary resolution, will be decided on a show of hands unless a poll is demanded in a manner permitted by the Company's Articles of Association. On a show of hands, each member present in person or by proxy has one vote. The passing of each Transaction Resolution requires a majority of the votes cast in respect of that Transaction Resolution.

The Resolution referred to in paragraph (d) above will be proposed as a special resolution and, being a special resolution, must be taken on a poll as required by the Articles. The passing of this Resolution requires a majority of not less than 75% of the votes cast in respect of that Resolution.

The Equity Bridge Facility will be utilised only if all of the conditions of the Xstrata Offer are satisfied or waived and the Offeror announces that the Offeror has taken up Falconbridge Shares under the Xstrata Offer. The proposed increase in the authorised share capital of the Company referred to in paragraph (b) above will provide sufficient authorised but unissued share capital to enable Xstrata (i) to refinance the whole of the maximum amount permitted to be drawn under the Equity Bridge Facility Agreement through one or more issues of new Ordinary Shares at the lowest price at which such new Ordinary Shares are legally allowed to be issued, being their nominal value of US$0.50 per Ordinary Share and (ii) to utilise in full the authority referred to in paragraph (c)(ii) above. If the Resolution referred to in paragraph (b) above is passed, the authorised share capital of the Company will be increased as described in that paragraph irrespective of whether or not the Proposed Acquisition proceeds. However, the Directors are only permitted to allot authorised but unissued relevant securities in accordance with an authority granted by Shareholders in general meeting, the Articles of Association of the Company and the Companies Act. If the Proposed Acquisition does not proceed, the Directors' authority to allot relevant securities will be limited to the amount stated in paragraph (c)(ii) above. The Directors intend, at the first Annual General Meeting of the Company following either (i) the full refinancing of the Equity Bridge Facility or (ii) the expiry of the Xstrata Offer or an announcement by the Offeror that the Xstrata Offer has been terminated (in each case without the Offeror taking up any Falconbridge Shares under the Xstrata Offer), to seek Shareholder approval to reduce the authorised share capital of the Company by cancelling such number of authorised but unissued Ordinary Shares as the directors of the Company consider appropriate taking into account the capital structure of the Company at that time.

The authorities referred to in paragraph (c) above are authorities to allot authorised but unissued relevant securities. These authorities will (unless previously renewed, varied or revoked by Shareholders in general meeting) expire on the date which is the fifth anniversary of the date on which the Resolution is passed (expected to be 30 June 2011) and will be in substitution for any existing authority at the time the Resolution is passed. The Directors intend, at the first Annual General Meeting of the Company following either (i) the full refinancing of the Equity Bridge Facility or (ii) the expiry of the Xstrata Offer or an announcement by the Offeror that the Xstrata Offer has been terminated (in each case without the Offeror taking up any Falconbridge Shares under the Xstrata Offer), to seek Shareholder approval for a renewal of the authority to allot relevant securities (as defined in section 80 of the Companies Act) such that the new authority applies only in respect

of approximately one third of the Company's issued ordinary share capital as at the latest practicable date prior to the issue of the notice convening such Annual General Meeting of the Company.

The authority to allot relevant securities referred to in paragraph (c)(i) above (which if utilised in full would represent an increase of approximately 1,986% in the Company's issued ordinary share capital at 29 May 2006, being the latest practicable date prior to the publication of this document) will not be used for any purpose except to the extent required by the Directors to allot relevant securities in connection with one or more issues of relevant securities under one or more transactions to refinance in whole or in part any amount outstanding under the Equity Bridge Facility. The authority to allot relevant securities referred to in paragraph (c)(i) above will authorise the Directors to allot relevant securities to enable Xstrata to refinance the whole of the maximum amount permitted to be drawn under the Equity Bridge Facility through one or more issues of new Ordinary Shares at the lowest price at which such new Ordinary Shares are legally allowed to be issued, being their nominal value of US$0.50 per Ordinary Share. Given that the closing price of the Company's Ordinary Shares on 26 May 2006 (being the latest practicable date prior to the publication of this document) was £20.26 the Directors expect that any issue or issues of new Ordinary Shares in connection with the refinancing of the Equity Bridge Facility would be at a significant premium to their nominal value.

The Directors consider the renewal of the authority to allot relevant securities referred to in paragraph (c)(ii) above appropriate in order to retain maximum flexibility to take advantage of business opportunities as they arise.

The authority conferred on the directors of the Company at the Annual General Meeting held on 9 May 2006 to issue equity securities of the Company for cash without the application of pre-emption rights pursuant to section 89 of the Companies Act 1985 was used in full in connection with the Placing announced on 17 May 2006. The Resolution referred to in paragraph (d) above seeks to renew the directors' authority to issue equity securities of the Company for cash without the application of such pre-emption rights. This authority will (unless previously renewed, varied or revoked by Shareholders in general meeting) expire at the end of the next Annual General Meeting of the Company. The Directors have no present intention of exercising this authority. The Directors consider the renewal of this authority appropriate in order to retain maximum flexibility to take advantage of business opportunities as they arise. There are no treasury shares held by the Company at the date of this document. Any sale of treasury shares would be treated as an issue of shares for the purposes of the Resolution referred to in paragraph (d) above.

The Xstrata Employee Share Ownership Trust and Xstrata Employee and Directors Share Ownership Trust currently hold in aggregate 4,419,987 Ordinary Shares to satisfy the exercise or vesting of awards granted pursuant to the Xstrata Share Schemes. The Directors would be required to issue a further 12,689,413 Ordinary Shares to satisfy the exercise and vesting of all such outstanding awards.

Following the passing of the Resolutions referred to in paragraphs (b) and (c) above, Xstrata will have in aggregate 14,234,948,397 authorised but unissued Ordinary Shares which the Directors will be authorised to allot (representing an increase in the authorised ordinary share capital of the Company of approximately 1,627%). Save as mentioned in this paragraph 11 above, the Directors have no present intention of issuing any authorised but unissued Ordinary Shares.

Details of Xstrata's issued and authorised share capital, at present and as it would be immediately following the maximum issue of new Ordinary Shares pursuant to the authority referred to in paragraph (c) above, are set out in paragraph 10 of Part VI – "Additional Information – Share capital".

In accordance with the ECMP, Batiss will not exercise the voting rights attaching to any Ordinary Shares held by it at the EGM. As at 26 May 2006 (being the latest practicable date prior to the publication of this document), Batiss held no Ordinary Shares.

Only holders of Ordinary Shares may vote at the Extraordinary General Meeting.

12. Action to be taken

You will find enclosed a Form of Proxy for use in connection with the Extraordinary General Meeting. Whether or not you intend to be present at the meeting you are requested to complete the Form of Proxy (in accordance with the instructions printed thereon) and return it to the Company's registrars, Computershare Investor Services PLC, PO Box 1075, The

Pavilions, Bridgwater Road, Bristol BS99 3FA, UK as soon as possible but in any event so as to arrive by no later than 10.30 a.m. (British Summer Time) (11.30 a.m. Central European Summer Time) on Wednesday, 28 June 2006.

CREST members may also choose to utilise the CREST electronic proxy appointment service in accordance with the procedures set out in the EGM Notice.

The lodging of the Form of Proxy (or the electronic appointment of a proxy) will not preclude you from attending the meeting and voting in person if you so wish.

13. Further information

Your attention is drawn to the further information contained in Parts II to VI of this document.

You are advised to read the whole of this document and not to rely solely on the information in this letter.

14. Recommendation

The Directors have received financial advice from Deutsche Bank and JPMorgan Cazenove in relation to the Proposed Acquisition. In providing advice to the Directors, Deutsche Bank and JPMorgan Cazenove have taken into account the Directors' assessments of the commercial merits of the Proposed Acquisition.

The Board of Directors considers the Proposed Acquisition and each of the Resolutions to be in the best interests of the Company and the Shareholders of Xstrata as a whole and, accordingly, recommends Shareholders to vote in favour of each of the Resolutions, as the Directors intend to do in respect of their own beneficial shareholdings held at the time of the EGM, amounting to 642,036 Ordinary Shares in aggregate at the date of this document, representing approximately 0.09% of Xstrata's current issued ordinary share capital.

15. Conclusion

The successful acquisition of Falconbridge will have a profound and positive impact on Xstrata's future performance. It will establish Xstrata with the critical mass, quality diversified portfolio and significant internal growth profile that will secure considerable additional value for all stakeholders in the future.

Yours sincerely

Willy Strothotte
Chairman

Part II
Risk Factors

[This page is intentionally left blank]

The Proposed Acquisition is subject to a number of risks. Accordingly, Shareholders should consider carefully all of the information set out in this document, including, in particular, the risks described below, prior to making any decisions on whether or not to vote in favour of the Resolutions. Additional risks and uncertainties not presently known to the Directors, or that the Directors currently consider to be immaterial, may also have an adverse effect on the Xstrata Group, the Falconbridge Group and/or the Enlarged Group.

For risks and uncertainties relating to the business of the Falconbridge Group, Shareholders should carefully consider the information set out below under "Risks relating to the business of the Falconbridge Group", which is extracted from information published by the Falconbridge Group as part of its ongoing periodic reporting requirements under the securities laws of Canada and the United States and is extracted without material amendment from the Falconbridge Annual Information Form dated 22 March 2006. This information has not, for the purposes of this document, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Nothing in the previous sentence is intended to qualify the statements in paragraph 1 of Part VI – "Additional Information – Responsibility". Xstrata and the Xstrata Directors have sought to ensure that such information has been accurately reproduced from such source and, so far as Xstrata is aware and is able to ascertain from information included in public documents filed by the Falconbridge Group, no facts have been omitted which would render the reproduced information inaccurate or misleading.

The Xstrata Group's and/or the Enlarged Group's business, financial condition or results of operations could be materially and adversely affected by any of the risks described below. In such case, the market price of the Ordinary Shares may decline due to any of these risks and investors may lose all or part of their investment.

Industry risks relating to the Xstrata Group

Commodity price volatility and cost efficiency

The Xstrata Group's turnover and earnings are dependent upon prevailing prices for the commodities it produces. Historically, such prices have been volatile and are subject to wide fluctuations in response to relatively minor changes in the supply of, and demand for, such commodities, market uncertainty, the overall performance of world or regional economies and the related cyclicality in industries directly served by the Xstrata Group and a variety of other factors beyond its control. Prices may also be affected by governmental actions intended to reduce greenhouse gas emission. See "Risks related to climate change legislation" in this Part II below. In addition, speculative trades in certain commodities (including coal) on the world markets may cause short-term price fluctuations for such commodities. These external factors and the volatile nature of the commodity markets make it difficult to estimate future prices. Any substantial or extended decline in commodity prices would adversely affect the results of operations or financial condition of the Enlarged Group.

As the Xstrata Group, in common with its competitors, is unable to influence commodity prices directly, its competitiveness and long-term profitability are, to a significant degree, dependent upon its ability to reduce costs and maintain low-cost, efficient operations. Important cost inputs in the Xstrata Group's operations generally include the extraction and processing costs of raw materials and consumables such as reductants, power, labour and transport. The Xstrata Group's production costs are also significantly affected by production volumes and, therefore, the Enlarged Group's ability to maintain production levels and maximise capacity utilisation will be a key factor in determining its overall cost competitiveness. The Enlarged Group's ability to maintain earnings and undertake capital expenditure would be adversely affected in the event of a sustained material fall in world commodity prices, an appreciable rise in its production costs or a decline in its production volumes. There can be no assurance that the Enlarged Group will be able to maintain or reduce production costs or maintain or increase its production volumes in the future.

Any increase in the price of a commodity may encourage other producers to increase their production of that commodity. Any over-production in a particular commodity, which is in excess of demand, could reduce the price of that commodity and adversely affect the Enlarged Group's results of operations or financial condition.

Environmental, health and safety

Various environmental, health and safety permits are required for many of the operations of the Xstrata Group and these permits are subject, in certain situations or on the occurrence of certain events, to modification, renewal or revocation by issuing authorities. Governmental authorities and the courts have the power to enforce compliance with these permits and applicable environmental, health and safety laws and regulations and violations may result in civil or criminal penalties, the curtailment or cessation of operations or both. Compliance with these laws, regulations and permits has not to date had a

material adverse effect on the results of operations or financial condition of the Xstrata Group although such permits, laws and regulations are subject to change (including the imposition of more onerous requirements and obligations) and the Company is unable to predict the ultimate cost of compliance with such amended environmental, health and safety permits, laws and regulations. The cost of maintaining compliance could be substantial. There can be no assurance that the cost of complying with present or future laws or regulations will not adversely affect the results of operations or financial condition of the Enlarged Group.

The operations of the Xstrata Group are extensively regulated. National, state and local authorities in the countries in which the Xstrata Group has operations regulate the industries in which the Xstrata Group operates with respect to matters including, but not limited to, employee health and safety, royalties, permitting and licensing requirements, planning and development and environmental compliance (including, for example, compliance with waste and waste water treatment and disposal, emissions and discharge requirements, plant and wildlife protection, reclamation and restoration of mining properties after mining is complete, surface subsidence from underground mining and the effects that mining has on surface and/or groundwater quality and availability). Numerous governmental permissions, approvals and leases are required for the Xstrata Group's operations. The Xstrata Group is required to prepare and present to national, state or local authorities data pertaining to the anticipated effect or impact that any proposed exploration, mining or production activities may have upon the environment. The costs, liabilities and other obligations associated with complying with such requirements or arising from the manner in which the obligations are met or, as may be necessary, the cost of rehabilitation of sites used for operations which have been closed down may be substantial and time-consuming and may delay the commencement or continuation of exploration, mining or production activities. There can be no assurance that compliance costs, including the costs of rehabilitation of site operations which have been closed down, and dealing with environmental issues associated with legacy closed sites will not adversely affect the results of operations or financial condition of the Enlarged Group.

The Xstrata Group's copper and lead smelters at Mount Isa in Australia are exempted, through special state legislation, from compliance with state environmental laws regulating air emissions. This exemption permits the operations to release sulphur dioxide emissions significantly above those otherwise permitted. The Queensland State environmental regulator has informed Xstrata of its desire to seek amendments to the special state legislation to bring the applicable air emission limits into line with limits under the state environmental laws. Any amendment or termination of the exemption may require the Xstrata Group to change operations significantly at Mount Isa, reduce production capacity, make additional investments or incur increased costs, which could have a material effect on the results of operations or financial condition of the Enlarged Group.

In addition, a violation of environmental, health and safety laws relating to a mine or production facility or a failure to comply with the instructions of the relevant environmental, health and safety authorities could lead to, amongst other things, a temporary shutdown of all or a portion of the mine or production facility, a loss of the right to mine or to continue with production or the imposition of costly compliance procedures. If environmental, health and safety authorities require the Enlarged Group to shut down all or a portion of a mine or production facility or to implement costly compliance measures, whether pursuant to existing or new environmental, health and safety laws and regulations, such measures could have a material adverse effect on the Enlarged Group's results of operations and financial condition.

The possibility exists that new environmental and/or health and/or safety legislation or regulations may come into force that may materially adversely affect the Enlarged Group's operations, its cost structure or its customers' ability to use the commodities produced by the Enlarged Group. New environmental and/or health and/or safety legislation or regulations may also require the Enlarged Group or its customers to change operations significantly or incur increased costs, which could have an adverse effect on the results of operations or financial condition of the Enlarged Group.

Risks related to climate change legislation

In December 1997, in Kyoto, Japan, the signatories to the United Nations Convention on Climate Change established individual, legally binding targets to limit or reduce greenhouse gas emissions by developed nations. This international agreement, known as the Kyoto Protocol, came into force on 16 February 2005. As of 18 April 2006, 163 states and regional economic integration organisations (such as the EU) had deposited instruments of ratifications, accessions, approvals or acceptances in respect of the Protocol.

The Xstrata Group has operations in various jurisdictions that may be subject to national, regional or local laws, regulations and policies aimed at limiting or reducing greenhouse gas emissions. While the impact of the Kyoto Protocol and related legislation and regulation cannot be quantified at this time, the likely effect will be to increase costs for fossil fuels, electricity and transportation, restrict industrial emission levels, impose added costs for emissions in excess of permitted levels and increase costs for monitoring, reporting and financial accounting. As the operation of the Xstrata Group's business involves incurring certain of these costs, increases in such costs could have a material adverse effect on the results of operations or financial condition of the Enlarged Group. Further, the Xstrata Group may be required to change operations, reduce production capacity or make additional investments to adapt to new or amended environmental laws and regulations, which could have a material adverse effect on the results of operations or financial condition of the Enlarged Group.

The coal industry, governments and other organisations are actively investing in research projects to reduce greenhouse gas emissions from the use of coal in power generation. Demand for coal is expected to be supported by forecast increases in global demand for energy. Nonetheless, there can be no assurance that the introduction of laws, regulations and practices to limit greenhouse gas emissions will not in the future adversely affect the price of, and demand for, coal. A significant decrease in the demand for coal, with current users turning increasingly to alternative forms of energy, may adversely affect the results of operations or financial condition of the Enlarged Group.

A significant part of the Xstrata Group's export thermal coal sales are to Japanese customers. The Japanese government's current policy on greenhouse gas emissions is that it intends to meet its Kyoto obligations by 2012. In February 2003, the Japanese cabinet approved a tax on coal imports of 700 yen per tonne (approximately US$5.90 per tonne) to be phased in in three stages. The first stage commenced on 1 October 2003 with a 230 yen per tonne levy (approximately US$1.94 per tonne) and the second phase became effective on 1 April 2005 at 460 yen per tonne (approximately US$3.90 per tonne). The third phase is scheduled to be implemented on 1 April 2007. The tax applies to all thermal coal imports, including Australian coal. There can be no assurance that the imposition of this tax or of any other taxes which may be introduced in the future in Japan and/or other countries will not adversely affect the results of operations or financial condition of the Enlarged Group.

Given the uncertainty surrounding the impact of climate change, the manner of implementation of the Kyoto Protocol in those jurisdictions where it has yet to be implemented, the various mechanisms available for countries to achieve their emission reduction targets (whether under the Kyoto Protocol or otherwise) and difficulties in identifying and assessing the financial implications of such impacts and measures, it is not possible to determine with certainty at this time what the ultimate effects of climate change and the Kyoto Protocol or other similar initiatives to limit or control greenhouse gas emissions may be for the Enlarged Group.

Australian native title and South African land claims

In Australia, the Native Title Act 1993 (Cth) (the "Native Title Act") recognises native title and establishes processes relating to mining and exploration rights. Native title represents the traditional rights and interests that the Aboriginal people have in relation to land. If native title has not been extinguished, the Native Title Act provides procedural rights for registered native title claimants, including the right to negotiate with respect to the grant of mining rights, which include exploration titles and the compulsory acquisition of land. Native title claims have been made over some areas where the Xstrata Group has mining operations and there can be no assurance that such claims or any future claims will not have a material adverse effect on the Enlarged Group's results of operations or financial condition or that additional claims will not be lodged in the future.

In South Africa, the government's Restitution of Land Rights Act 1994 provides remedies for persons who have been dispossessed of rights in land as a result of past racially discriminatory laws or practices. The Land Claims Court is empowered to make orders concerning the restoration of a right in land or any portion of land, compelling the payment of compensation, compelling the South African government to include a claimant as a beneficiary in a state support programme for housing or granting the claimant an appropriate right in alternatively designated state land or with any alternative and appropriate relief. The Company is aware that a number of land claims have been lodged in relation to the surface rights of the Xstrata Group's various South African properties, but has limited information about these claims. Accordingly, the Company can give no assurance that these land claims, or any other land claims of which it is not aware, will not have an adverse effect on the Enlarged Group's rights to the properties that are subject to the land claims.

South African MPRDA and Empowerment Charter

On 3 October 2002, the President of South Africa assented to and signed into law the Mineral and Petroleum Resources Development Act 28 of 2002 (the "MPRDA"), which came into operation on 1 May 2004. On 13 August 2004, the Empowerment Charter was promulgated, together with the "scorecard" for measuring black empowerment in the mining industry, which is intended to monitor and assess compliance with the Empowerment Charter. In addition to this the government of South Africa, in conjunction with the industry, is developing further legislation and guidelines including the Royalty Bill pertaining to royalties. Regulations pertaining to the MPRDA were promulgated on 23 April 2004 and on 29 October 2004.

A key outcome is that the government of South Africa becomes the custodian of all the rights to minerals and that prospecting and mining will require prospecting and mining rights respectively which can only be granted once certain criteria are met, including empowerment criteria for historically disadvantaged South Africans ("HDSAs"). Existing prospecting and mining rights, termed "old order rights", need to be converted to new order rights and, to do so, the above criteria need to be satisfied or undertakings given.

A key objective of the above legislation is to ensure that 26% of the mining industry is controlled by HDSAs within ten years from 1 May 2004. In addition, mining companies need to achieve certain goals aimed at the upliftment of HDSAs both in the workplace and the communities in which they operate.

The Company can give no assurance that these legislative developments in South Africa will not have a material adverse effect on the results of operations or financial condition of the Enlarged Group.

Risks relating to the business of the Xstrata Group

Operational considerations

The success of the business of the Xstrata Group is affected by a number of factors which are, to a large extent, outside its control. Such factors include the availability of raw materials, water and power. In addition, the Xstrata Group's business is subject to numerous other operating risks which include: unexpected geological features or unexpected seismic activity; climatic conditions such as flooding or drought; interruptions to power supplies; severe congestion at commodities transport terminals; industrial action or disputes; environmental hazards; and technical failures, fires, explosions and other accidents at a mine, processing plant, cargo terminal or related facilities. These risks and hazards could result in damage to, or destruction of, properties or production facilities, may reduce or cause production to cease at those properties or production facilities, may result in personal injury, environmental damage, business interruption and possible legal liability and may result in actual production differing from estimates of production, including those contained in this document whether expressly or by implication. While the Xstrata Group has insurance covering various types of business interruptions in respect of their respective operations, such insurance may not fully cover the consequences of such business interruptions and, in particular, may not cover interruptions arising from all types of equipment failure or labour disputes. There can be no assurance that operating risks and the costs associated with them will not adversely affect the results of operations or financial condition of the Enlarged Group.

Metal processing plants are especially vulnerable to interruptions, particularly where events cause a stoppage which necessitates a shutdown in operations. Stoppages in smelting, even if lasting only a few hours, can cause the contents of furnaces to solidify, resulting in a plant closure for a significant period and necessitating expensive repairs, any of which could adversely affect the results of operations or financial condition of the Enlarged Group.

The Xstrata Group depends upon seaborne freight, rail, trucking, overland conveyor and other systems to deliver their commodities to market. Disruption of these transportation services because of weather-related problems, key equipment or infrastructure failures, strikes, lock-outs or other events could temporarily impair the Xstrata Group's ability to supply its commodities to its customers and thus could adversely affect the Enlarged Group's results of operations or financial condition. Consistent with practice in the industry, members of the Xstrata Group may enter into long term contracts related to, for example, infrastructure and supply of services. Any early termination of such contracts may require the payment of amounts which might have a material adverse effect on the Enlarged Group's results of operations. In addition, the Xstrata Group's ability to increase its export sales may be restricted by available rail infrastructure and port capacity which may adversely affect the Enlarged Group's ability to increase turnover.

Although the Xstrata Group maintains liability insurance, the insurance does not cover every potential risk associated with its operations and meaningful coverage at reasonable rates is not obtainable for certain types of environmental hazards. The occurrence of a significant adverse event, the risks of which are not fully covered by insurance, could have a material adverse effect on the results of operations or financial condition of the Enlarged Group.

Tax

Although the Company is incorporated in England and Wales, the Company is regarded as resident in Switzerland, and not in the United Kingdom, for Swiss and UK tax purposes and for the purposes of the United Kingdom-Switzerland double tax treaty. This means, broadly, that the Company's profits, income and gains are subject to the Swiss tax regime and not, save in the case of UK source income, to the UK tax regime. Any dividends paid by the Company will be regarded as Swiss dividends rather than UK dividends.

It is possible that in the future, whether as a result of a change of law or the practice of any relevant tax authority or the renegotiation of the United Kingdom-Switzerland double tax treaty, or as a result of any change in the management or the conduct of the Company's affairs, the Company could become, or be regarded as having been, resident in the United Kingdom, therefore becoming subject to the UK tax regime, which could adversely affect the results of operations or financial condition of the Xstrata Group.

Under the UK Finance (No.2) Bill 2006 (in its current form), it is possible that any future acquisitions by the Xstrata Group could bring that group within the UK controlled foreign company rules in certain circumstances, with the consequence that Xstrata may become subject to UK tax on the income profits of certain non-UK resident subsidiaries. Future acquisitions could therefore adversely affect the results of operations or financial condition of the Xstrata Group. However, the proposed legislation is not intended to catch *bona fide* acquisitions. It should not, therefore, apply in practice to the Proposed Acquisition, as more fully explained in the risk factor "Risks connected with the Proposed Acquisition – Tax". In addition, under the UK Finance (No.2) Bill 2006 (in its current form), none of the Cerrejón Acquisition, any post-acquisition restructuring of the Cerrejón Business, the Tintaya Acquisition or any post-acquisition restructuring of Tintaya will bring the Enlarged Group within the UK controlled foreign company rules, because neither the Cerrejón Acquisition nor the Tintaya Acquisition involves the acquisition of any UK resident company. The UK HM Revenue & Customs ("HMRC") have indicated that, if the Bill were to be amended in a way that may catch either of those events, they would be prepared to provide a non-statutory clearance that the legislation (as finalised) would not apply to any of those events so long as the relevant information is fully disclosed.

A number of arrangements entered into by companies in the Xstrata Group have been structured in a tax efficient manner. Although it is anticipated that these arrangements are likely to achieve their desired effect, if any of them are successfully challenged by the relevant tax authorities, Xstrata Group companies may incur additional tax liabilities which could adversely affect the results of operations or financial condition of the Xstrata Group and/or the Enlarged Group.

Reserves

The Xstrata Group's recoverable reserves decline as the commodities are extracted. Further, the Xstrata Group may not be able to mine all of its reserves as profitably as it does at its current operations. The Enlarged Group's future success depends upon conducting successful exploration and development activities or acquiring properties containing economically recoverable reserves. The Xstrata Group's current strategy includes increasing its reserve base through acquisitions of commodity-producing properties and continuing to develop the Xstrata Group's existing properties.

The Xstrata Group's planned development and exploration projects and acquisition activities may not result in significant additional reserves and it may not be successful in developing additional mines. In addition, in order to develop its reserves, it must receive various governmental permits. The Xstrata Group cannot predict whether it will continue to receive the permits necessary for it to operate profitably in the future. The Xstrata Group may not be able to negotiate mining contracts for properties containing additional reserves.

The Xstrata Group bases its reserve information on engineering, economic and geological data assembled and analysed by its staff, which includes various engineers and geologists, and which is periodically reviewed by third parties. The reserves estimates as to both quantity and quality are periodically updated to reflect production of commodities from the reserves and new drilling or other data received. There are numerous uncertainties inherent in estimating quantities and qualities of

and costs to mine reserves, including many factors beyond the Xstrata Group's control. Estimates of reserves necessarily depend upon a number of variable factors and assumptions, all of which may vary considerably from actual results such as:

- geological and mining conditions which may not be fully identified by available exploration data or which may differ from experience in current operations;
- historical production from the area compared with production from other similar producing areas; and
- the assumed effects of regulation and taxes by governmental agencies and assumptions concerning commodity prices, operating costs, mining technology improvements, severance and excise tax, development costs and reclamation costs.

For these reasons, estimates and classifications of reserves prepared by different engineers or by the same engineers at different times may vary substantially. Actual commodity tonnage recovered from identified reserves and revenue and expenditures with respect to the Xstrata Group's reserves may vary materially from estimates. Accordingly, these reserve estimates may not accurately reflect the Xstrata Group's actual reserves. Any inaccuracy in the estimates related to the Xstrata Group's reserves could result in lower than expected revenue, higher than expected costs or decreased profitability.

Currency fluctuations

The Xstrata Group produces and sells commodities that are typically priced in US dollars, while a large portion of the costs of the Xstrata Group's coal, copper, zinc (including lead and silver) and alloys businesses are incurred in local currencies, including the Australian dollar, the South African Rand, the Colombian peso and the Peruvian Sol. Accordingly, if the Australian dollar, the South African Rand, the Colombian peso, the Peruvian Sol or such other local currencies were to strengthen against the US dollar, this could have a detrimental effect on the Enlarged Group's results of operations and financial condition.

The Xstrata Group's operations are conducted by members of the Xstrata Group in many countries and the results of operations and the financial condition of individual Xstrata Group companies are reported in the relevant local currency which, in most cases, is not the US dollar. These results are translated into US dollars at the applicable foreign currency exchange rates for inclusion in the Xstrata Group's consolidated financial statements. The Xstrata Group's results are, and the Enlarged Group's results will be, translated into US dollars at the applicable foreign currency exchange rates for inclusion in the consolidated financial statements. The exchange rates between relevant local currencies and the US dollar have historically fluctuated, and the translation effect of such fluctuations may have a material adverse effect on the Enlarged Group's consolidated results of operations or financial condition.

Borrowings

The Xstrata Group has, and, if the Proposed Acquisition completes, the Enlarged Group will have, a significant amount of indebtedness, which may impair the operating and financial flexibility of the Xstrata Group and/or the Enlarged Group and could adversely affect the business and financial position of the Xstrata Group and/or the Enlarged Group and the Company's ability to pay dividends.

The Xstrata Group has a substantial amount of debt and significant debt service obligations. As at 31 December 2005, the Xstrata Group had gross outstanding indebtedness of US$3,135.2 million. In connection with the Proposed Acquisition, US$19.0 billion will be available to the Xstrata Group under the Acquisition Facilities Agreement, the Debt Bridge Facility Agreement and the Equity Bridge Facility Agreement. The Xstrata Group's financing arrangements will be used to finance the Proposed Acquisition and the Tintaya Acquisition, to refinance the Cerrejón Bridge Facility Agreement, the First Existing Facility Agreement and the Second Existing Facility Agreement, to refinance certain existing indebtedness of Falconbridge and to provide working capital facilities for the Enlarged Group. Xstrata expects to assume the Falconbridge Group's existing net debt (which was US$2,814 million as at 30 April 2006, as disclosed in Falconbridge's unaudited results announcement for the month ended 30 April 2006) if the Proposed Acquisition completes. Falconbridge is likely to be required to pay a break fee of up to US$450 million to Inco following termination of the Inco Support Agreement entered into in respect of the Inco Offer, including in the event that the Xstrata Offer is successful. Any such payment would reduce Falconbridge's cash and increase Falconbridge's net debt by a corresponding amount. Xstrata anticipates that its substantial leverage (including for the Enlarged Group) will continue for the foreseeable future.

For details of the debt financing arrangements in respect of the Proposed Acquisition, the Cerrejón Acquisition and the Tintaya Acquisition, see paragraphs 8.1(c), 8.1(d) and 8.1(g) of Part VI – "Additional Information – Material contracts", for details of the Standby Equity Underwriting Letter, see paragraph 8.1(e) of Part VI – "Additional Information – Material contracts" and for details of the break fee, see paragraph 8.2(b) of Part VI – "Additional Information – Material contracts".

The Xstrata Group's and the Enlarged Group's substantial indebtedness has important consequences for Shareholders. For example, it could potentially:

- cause the Xstrata Group or the Enlarged Group to dedicate a substantial portion of cash flow from operations to payments to service debt, depending on the level of borrowings, prevailing interest rates and, to a lesser extent, exchange rate fluctuations, which reduces the funds available for working capital, capital expenditure, acquisitions and other general corporate purposes;
- curtail the Company's ability to pay dividends;
- limit the Xstrata Group's or the Enlarged Group's ability to borrow additional funds for working capital, capital expenditure, acquisitions and other general corporate purposes;
- limit the Xstrata Group's or the Enlarged Group's flexibility in planning for, or reacting to, changes in technology, customer demand, competitive pressures and the industries in which it operates;
- place the Xstrata Group or the Enlarged Group at a competitive disadvantage compared to its competitors that are less leveraged than it is; and
- increase the Xstrata Group's or the Enlarged Group's vulnerability to both general and industry specific adverse economic conditions.

Xstrata's existing debt facilities and the underwritten debt facilities available in connection with the Proposed Acquisition contain a number of financial, operating and other obligations that limit the Xstrata Group's and the Enlarged Group's operating and financial flexibility. The Xstrata Group's and the Enlarged Group's ability to comply with these obligations depends on the future performance of their business.

Nothing in this paragraph headed "Borrowings" is intended to qualify the statement in paragraph 9 of Part VI – "Additional Information – Working capital".

Integration of acquisitions

A substantial portion of the Xstrata Group's growth in turnover and earnings has historically been generated from and, whether or not the Proposed Acquisition and the Tintaya Acquisition complete, will be generated from, acquisitions and investments in joint ventures and subsequent improvements in the performance of the businesses acquired or invested in, including, if the Proposed Acquisition and the Tintaya Acquisition complete, improvements in the performance of the Falconbridge Group and the Tintaya operation. Xstrata expects to continue a strategy of identifying, acquiring and investing in businesses with a view to expanding its operating businesses or diversifying into other natural resources. Xstrata believes that acquisitions and investments in joint ventures will continue to be an important part of its business strategy.

There can be no assurance that Xstrata will continue to identify suitable acquisition opportunities, obtain the financing necessary to complete and support such acquisitions or its investment in such joint ventures or acquire businesses on satisfactory terms, or that any business acquired will prove to be profitable. In addition, acquisitions and investments in joint ventures involve a number of risks, including possible adverse effects on the Enlarged Group's operating results, diversion of management's attention, failure to retain key personnel, risks associated with unanticipated events or liabilities, difficulties in the assimilation of the operations, technologies, systems, services and products of the acquired companies or the joint ventures and risks arising from change of control provisions in contracts of any acquired company. Further, the Enlarged Group's integration strategy may also be influenced by local factors in the markets in which it has made and makes acquisitions, such as black empowerment in South Africa. Any failure to achieve successful integration of such acquisitions or joint ventures could have a material adverse effect upon the results of operations or financial condition of the Enlarged Group.

Labour

The majority of the workforce of the Xstrata Group is unionised. Xstrata believes that all of the Xstrata Group's operations have, in general, good relations with their employees and unions, but the Xstrata Group's operations in South Africa and Australia have from time to time experienced limited work stoppages and other forms of industrial action in recent years. There can be no assurance that the Enlarged Group's operations will not be affected by such problems in the future. In addition, the Xstrata Group has been subject to union demands for pay rises and increased benefits. There can be no assurance that work stoppages or other labour-related developments (including the introduction of new labour regulations in countries where the Enlarged Group operates) will not adversely affect the results of operations or financial condition of the Enlarged Group.

There is a serious problem with HIV/AIDS infection of the Xstrata Group's South African workforce, as there is in South Africa generally. The HIV/AIDS infection rate of the Xstrata Group's South African workforce is expected to increase significantly over the next decade. The costs and lost workers' time associated with HIV/AIDS may continue to adversely affect the Xstrata Group's South African results of operations or financial condition.

Key employees

The management of the Xstrata Group's operations depends on a relatively small number of key employees. The loss of the services of certain key employees, particularly to competitors, could have a material adverse effect on the results of operations or financial condition of the Enlarged Group. In addition, as the Enlarged Group's business develops and expands, Xstrata believes that the Enlarged Group's future success will depend on its ability to attract and retain highly skilled and qualified personnel, which is not guaranteed.

Joint ventures

Members of the Xstrata Group hold, and expect to hold in the future, undivided interests in joint ventures.

Special risks associated with joint ventures include the possibility that the joint venture partners may: (i) have economic or business interests or goals that are inconsistent with those of the Enlarged Group; (ii) take action contrary to the Enlarged Group's policies or objectives with respect to its investments, for instance by veto of proposals in respect of the joint venture operations; (iii) be unable or unwilling to fulfil their obligations under the joint venture or other agreements; or (iv) experience financial or other difficulties. Any of the foregoing may have a material adverse effect on the results of operations or financial condition of the Enlarged Group. In addition, the termination of certain of these joint venture agreements, if not replaced on similar terms, could have a material adverse effect on the results of operations or financial condition of the Enlarged Group.

Holding company structure; restrictions on dividends; dependence on subsidiaries

The Company's results of operations and financial condition are entirely dependent on the trading performance of members of the Xstrata Group. The Company's ability to pay dividends will depend upon the level of distributions, if any, received from the Company's operating subsidiaries and interests, any amounts received on asset disposals and the level of cash balances. Certain of the Company's operating subsidiaries and interests may, from time to time, be subject to restrictions on their ability to make distributions to the Company including as a result of restrictive covenants contained in loan agreements, foreign exchange limitations and other regulatory restrictions and agreements with the other shareholders of such subsidiaries or associated companies. There can be no assurance that such restrictions will not have a material adverse effect on the Enlarged Group's results of operations or financial condition.

Political risk

The Xstrata Group has significant operations in South Africa. As a result, there are important political, economic and other risks relating to South Africa which could affect an investment in the Company. Large parts of the population do not have access to adequate education, healthcare, housing and other services, including water and electricity. South Africa has also experienced high levels of crime and unemployment in comparison with more developed countries. These problems have been among the factors that have impeded inward investment into South Africa, prompted the emigration of skilled workers and affected South Africa's growth rate negatively. While the South African government committed itself to creating a stable free market economy, it is difficult to predict the future political, social and economic direction of South Africa or how the government will try to address South Africa's challenges. It is also difficult to predict the effect on the Xstrata Group's business of these problems or of the government's efforts to solve them.

Further, there has been political and economic instability in South Africa's neighbouring countries. If this instability were to extend into or cause similar instability in South Africa, it could have a negative impact on the Xstrata Group's ability to manage and operate its South African operations and therefore on its results of operations or financial condition.

There are political and economic risks relating to Xstrata's operations at Alumbrera, Argentina. Argentina suffered a period of deep social and economic deterioration and political and economic instability during 2001 and a devaluation of its currency in 2002. Xstrata's operations in Argentina may be adversely affected by changes in the nature of the Argentinean government, its policies, including taxation, or the political, economic or social dynamics affecting Argentina, any or all of which may not be within the control of the Enlarged Group.

Cerrejón operates in Colombia. As a result, there are political and other risks relating to Colombia which could affect an investment in the Enlarged Group. Colombia has experienced several periods of criminal violence over the past four decades, primarily due to the activities of guerrilla groups and drug cartels. In response, the Colombian government has implemented various security measures and has strengthened its military and police forces by creating specialised units. Despite these efforts, drug-related crime and guerrilla activity continue to exist in Colombia. If this violence affected the operations of the Cerrejón Business, it could have an adverse affect on the Xstrata Group's and the Enlarged Group's results of operations. Historically, Colombia has also experienced other political and economic instability. The Cerrejón Business may be adversely affected by any deterioration in the political, economic or security situation in Colombia, including where such factors have a direct impact on the operations of Cerrejón's mines and Cerrejón's rights to carry on its operations. There can be no assurance that such deterioration will not have a material adverse effect on the Cerrejón Business's, the Xstrata Group's and the Enlarged Group's results of operations or financial condition.

Exchange controls

South African exchange control regulations provide for a common monetary area consisting of South Africa, Lesotho, Namibia and Swaziland (the "CMA"). Transactions between CMA residents and non-CMA residents are subject to South African exchange control regulations. The present exchange control system in South Africa is used principally to control capital movements. South African residents, including companies, are generally not permitted (other than subject to certain monetary limits and within certain parameters), without the approval of the exchange control authorities, to export capital from South Africa or to hold foreign currency or foreign investments, as restrictions are imposed on foreign investments by South African residents. It is impossible to know whether any further modifications may be made by the South African government. There can be no assurance that the expansion of existing, or imposition of new, exchange controls would not adversely affect the Enlarged Group's results of operations or financial condition.

In 2002 Argentina imposed exchange control restrictions which required revenues from exports to be repatriated to Argentina and exchanged for Argentine pesos. However, pursuant to a decree issued on 27 February 2003, all mining companies which enjoyed "exchange control stability" between March 1991 and December 2001, which includes Minera Alumbrera Limited, a member of the Xstrata Group, are exempt from compliance with the exchange control restrictions. There can be no assurance that Argentinean government policy in relation to this issue will not change again in the future and any change could have a material adverse effect on the Enlarged Group's results of operations or financial condition.

Market access

Global and regional demand for metals is influenced by regulatory and voluntary initiatives to restrict or eliminate the use of certain metals in particular products or applications. Impacts of such measures can be global, creating non-tariff barriers to international trade and affecting product design and specifications on a global basis. Such measures could affect the balance between supply and demand and depress metal prices and treatment/refining charges. Metals with a limited number of major applications are most susceptible to changes in demand and price in response to such measures. Such changes in demand and price could have a material adverse effect on the Enlarged Group's results of operations or financial condition.

Production technology

Xstrata believes that the technology it uses to produce and process metals is significantly advanced and, in part due to high investment costs, subject only to slow technological change. However, there can be no assurance that more economical production or processing technology will not be developed or that the economic conditions in which current technology is applied will not change.

Sulphuric acid
Sulphur dioxide is a by-product from the smelting of copper, zinc and lead sulphide concentrates and the Xstrata Group processes sulphur dioxide to convert it into sulphuric acid. Due to increasingly strict environmental standards worldwide for sulphur dioxide emissions, involuntary production of sulphuric acid by smelters is growing. The balance of world acid production is largely based on elemental sulphur, the supply of which is now a by-product of oil and gas production, and growing more rapidly than demand. Long term, these factors may make it more difficult for the Xstrata Group to obtain satisfactory prices for its sulphuric acid. However, the Xstrata Group's production of sulphuric acid cannot be reduced in response to low prices, or dropping sales volumes, without a corresponding reduction in the Xstrata Group's production of metals. Reductions in the price of sulphuric acid could have an adverse effect on the Enlarged Group's results of operations or financial condition.

Raw material procurement risks
Procurement of raw materials involves the risks typically connected with commercial transactions, which can include trade barriers, political instability and problems due to local production conditions. In addition, the Xstrata Group's supply contracts provide that suppliers of concentrate may be released from their delivery obligations to the Xstrata Group if certain "*force majeure*" events occur. The Xstrata Group's business operations could be adversely affected, at least temporarily, if supplies of raw materials are interrupted as a result of the imposition of trade barriers or other events and if the Xstrata Group is unable, on short notice, to shift to alternative sources of supply.

Risks relating to the business of the Falconbridge Group

The information in this section "Risks relating to business of the Falconbridge Group" has been extracted from information published by the Falconbridge Group as part of its ongoing periodic reporting requirements under the securities laws of Canada and the United States and is extracted without material amendment from the Falconbridge Annual Information Form dated 22 March 2006. This information has not, for the purposes of this document, been commented on or verified by Falconbridge or the Falconbridge Directors or verified by Xstrata or the Xstrata Directors. Nothing in the previous sentence is intended to qualify the statements in paragraph 1 of Part VI – "Additional Information – Responsibility". Xstrata and the Xstrata Directors have sought to ensure that such information has been accurately reproduced from such source and, so far as Xstrata is aware and is able to ascertain from information included in public documents filed by the Falconbridge Group, no facts have been omitted which would render the reproduced information inaccurate or misleading.

Fluctuating metal prices
Falconbridge's earnings are affected by fluctuations in the prices of the metals it produces. Their prices are subject to volatile price movements over short periods of time. Falconbridge generally does not hedge prices of the metals it produces. Market prices can be affected by numerous factors beyond Falconbridge's control, including expectations for inflation, speculative activities, relative exchange rates to the U.S. dollar, production activities of Falconbridge's competitors, global and regional demand and supply, political and economic conditions including availability of subsidies and tax incentives to Falconbridge's competitors and production costs in major producing regions. The prices for copper, nickel, zinc, aluminium or other metals produced by Falconbridge may decline significantly from current levels. A reduction in the prices of one or more of these metals could materially adversely affect the value and amount of Falconbridge's reserves and Falconbridge's business, financial condition, liquidity and operating results.

Mining and processing risks
The business of mining and processing of metals is generally subject to a number of risks and hazards, including unusual or unexpected geological conditions, ground conditions, phenomena such as inclement weather conditions, floods and earthquakes and the handling of hazardous substances, the emissions of contaminants and other liability exposures. Such risks and hazards could result in personal injury or death, damage to, or destruction of, mineral properties, processing or production facilities or the environment, monetary losses and possible legal liability. Falconbridge's business, financial condition, liquidity and operating results could be materially adversely affected if any of these developments were to occur.

Although Falconbridge maintains insurance which it believes is consistent with mining industry practice to the extent available to cover some of these risks and hazards, no assurance can be given that such insurance will continue to be available, or that it will be available at economically feasible premiums. Falconbridge's property, business interruption and liability and other insurance may not provide sufficient coverage for losses related to these or other risks or hazards. In such event, Falconbridge's business, financial condition, liquidity and results of operations could be materially adversely affected.

Environmental risks

Environmental legislation affects nearly all aspects of Falconbridge's operations worldwide. This type of legislation requires Falconbridge to obtain operating licences and imposes standards and controls on activities relating to mining, exploration, development, production, closure and the refining, distribution and marketing of copper, nickel, zinc and other metals products. Environmental assessments are required before initiating most new products or undertaking significant changes to existing operations. Compliance with environmental legislation can require significant expenditures, including expenditures for clean-up costs and damages arising out of contaminated properties. In addition to current requirements, Falconbridge expects that additional environmental regulations will likely be implemented to protect the environment and quality of life, given issues of sustainable development and other similar requirements which governmental and supragovernmental organizations and other bodies have been pursuing. Some of the issues currently under review by environmental regulatory agencies include reducing or stabilizing various emissions, including sulphur dioxide and greenhouse gas emissions, mine reclamation and restoration, and water, air and soil quality and absolute liability for spills and exceedences.

Canada ratified the Kyoto Protocol to the United Nations Framework Convention on Climate Change in late 2002. The protocol entered into force in February 2005. Various levels of government in Canada are developing a number of policy measures in order to meet Canada's emission reduction obligations under the protocol. While the impact of the protocol and measures cannot be quantified at this time, the likely effect will be to increase costs for fossil fuels, electricity and transportation, restrict industrial emission levels, impose added costs for emissions in excess of permitted levels and increase costs for monitoring, reporting and financial accounting. Compliance with these initiatives could have a material adverse effect on Falconbridge's business, financial condition, liquidity and operating results.

Further changes in environmental laws, new information on existing environmental conditions or other events, including legal proceedings brought based upon such conditions or an inability to obtain necessary permits, could have a material adverse effect on product demand, product quality and methods of production and distribution or could require increased financial reserves or compliance expenditures or otherwise have a material adverse effect on Falconbridge's business, financial condition, liquidity and operating results.

Failure to comply with environmental legislation may result in the imposition of fines and penalties, liability for clean-up costs, damages and the loss of important permits. There can be no assurance that Falconbridge will at all times be in compliance with all environmental regulations or that steps required to bring Falconbridge into compliance would not materially adversely affect Falconbridge's business, financial condition, liquidity or operating results.

In view of the uncertainties concerning future removal and site restoration costs on Falconbridge's properties, the ultimate costs for future removal and site restoration to Falconbridge could differ from the amounts estimated. The estimate for this future liability is subject to change based on amendments to applicable laws and legislation, the nature of ongoing operations and technological innovations. Future changes, if any, due to their nature and unpredictability, could have a significant impact and would be reflected prospectively as a change in an accounting estimate. In addition, regulatory authorities in various jurisdictions around the world may require Falconbridge to post financial security to secure in whole or in part future reclamation and restoration obligations in such jurisdictions. In some instances, Falconbridge has already provided this security. In other instances, such security may be required to be posted upon the occurrence of certain events including if Falconbridge ceases to maintain a minimum investment grade credit rating, if the regulatory authority ceases to accept alternative forms of comfort to secure the obligation or as a property nears the end of its operation. Although the posting of this security does not increase the future reclamation and restoration costs (other than costs associated with posting such security), a portion of Falconbridge's credit may be required to back up these commitments, which could adversely affect Falconbridge's liquidity.

Labour relations

Collective agreements covering Falconbridge's unionized employees at Norandal-Newport, St. Ann (production & maintenance employees), and Gramercy were all renewed in 2005. At the Timmins Metallurgical site, a collective agreement was signed with the CAW after a one month strike in October, 2005. Bargaining has just been completed for the renewal of the collective agreements at Falcondo and St. Ann (staff employees only).

Eleven collective agreements have expired or will expire in 2006:

- General Smelting (Montreal) – January 31
- Brunswick Mine (Bathurst) – February 28
- Brunswick Smelter (Bathurst) – February 28
- Horne Smelter (Rouyn) – March 1
- Bulk Handling Operation (Bathurst) – March 31
- Raglan Mine (Rouyn) – April 30
- Lomas Bayas (Chile) – April 30
- Nikkelverk (Norway) – April 1
- Antamina (Peru) – July 24
- Norandal – Salisbury (Salisbury) – November 20
- Altonorte (Chile) – December 12

Collective agreements covering Falconbridge's unionized hourly employees at CEZ, CEZ (Effluent Treatment Operators), CCR, CCR (Security), Noranda Recycling – Roseville (two agreements), Noranda Recycling – San Jose, Sudbury Operations (Production & Maintenance), Sudbury Operations (Office, Clerical & Technical), Collahuasi, New Madrid, Norandal-Newport, Gramercy, St. Ann (Production & Maintenance) and Kidd Metallurgical division are currently in place and will expire between 2007 and 2008.

Uncertainty of reserve estimates and production estimates

Falconbridge's reported mineral reserves as of December 31, 2005 are estimated quantities of proven and probable ore that under present and anticipated conditions can be legally and economically mined and processed by the extraction of their mineral content. Falconbridge determines the amount of its mineral reserves in accordance with the requirements of the applicable Canadian securities regulatory authorities and established mining standards. Falconbridge does not use outside sources to verify its reserves. The volume and grade of reserves actually recovered and rates of production from Falconbridge's present mineral reserves may be less than geological measurements of the reserves. Market price fluctuations in nickel, copper, other metals and exchange rates, and changes in operating and capital costs, may in the future render certain mineral reserves uneconomic to mine. In addition, short-term operating factors relating to the mineral reserves, such as the need for orderly development of ore bodies or the processing of new or different ore grades, may cause mineral reserves to be modified or Falconbridge's operations to be unprofitable in any particular fiscal period.

No assurance can be given that the indicated amount of ore will be recovered or that it will be recovered at the prices assumed by Falconbridge in determining reserves. Mineral reserve estimates are based on limited sampling and, consequently, are uncertain because the samples may not be representative of the entire orebody. As more knowledge and understanding of the orebody are obtained, the reserve estimates may change significantly, either positively or negatively.

Falconbridge prepares estimates of future production for particular operations. These production estimates are based on, among other things, reserve estimates; assumptions regarding ground conditions and physical characteristics of ores, such as hardness and presence or absence of particular metallurgical characteristics; and estimated rates and costs of mining and processing. Falconbridge's actual production may vary from estimates for a variety of reasons, including actual ore mined varying from estimates of grade, tonnage, dilution and metallurgical and other characteristics; short-term operating factors relating to the mineral reserves, such as the need for sequential development of ore bodies and the processing of new or different ore grades; risks and hazards associated with mining; natural phenomena, such as inclement weather conditions, floods, and earthquakes; and unexpected labour shortages or strikes. No assurance can be given that production estimates will be achieved. Failure to achieve production estimates could have a material adverse impact on Falconbridge's future cash flows, earnings, results of operations and financial condition.

Exchange rate fluctuations

Fluctuations in currency exchange rates, principally the Canadian/U.S. dollar exchange rate and, to a lesser extent, Chilean Peso, Peruvian Sol, Norwegian Kroner and Euro exchange rates against the U.S. dollar, can significantly impact Falconbridge's earnings and cash flows. These exchange rates have fluctuated substantially over time, including over the last five years. Most of Falconbridge's revenues and debt are denominated in U.S. dollars, whereas a significant portion of operating costs at Falconbridge's Canadian sites are incurred in Canadian dollars. Furthermore, a portion of Chilean operating costs are Peso denominated and Nikkelverk's costs are incurred in Norwegian kroner. Falconbridge has been

reporting its financial results in U.S. dollars since July 1, 2003. Fluctuations in exchange rates between the U.S. dollar and the Canadian dollar and between the U.S. dollar and other currencies may give rise to foreign currency exposure and gains and losses, either favourable or unfavourable, which may in the future materially impact Falconbridge's financial results. Falconbridge, from time to time, may hedge a portion of its currency exposures and requirements to try to limit any adverse effect of exchange rate fluctuations with respect to its Canadian dollar and other costs, but there can be no assurance that such hedges will eliminate the potential material adverse effect of such fluctuations.

Interest rate and counterparty risk

Falconbridge's exposure to changes in interest rates results from investing and borrowing activities undertaken to manage its liquidity and capital requirements. Falconbridge has entered into interest rate swap agreements to manage the interest rate risk associated with a portion of its fixed-rate debt. The interest rate swap changes Falconbridge's exposure to interest risk by effectively converting a portion of Falconbridge's fixed-rate debt to a floating rate. Falconbridge may elect in the future to enter into interest rate swaps to effectively convert floating-rate debt to fixed-rate debt or to enter into additional fixed-rate to floating-rate swaps. There can be no assurance that Falconbridge will not be materially adversely affected by interest rate changes in the future, notwithstanding Falconbridge's use of interest rate swaps.

In addition, Falconbridge's interest rate swaps, metals hedging and foreign currency and energy risk management activities expose Falconbridge to the risk of default by the counterparties to such arrangements. Any such default could have a material adverse effect on Falconbridge's business, financial condition and results of operations.

Energy supply and prices

Falconbridge's operations and facilities are intensive users of natural gas, electricity and oil. The procurement dynamics of these energy types are becoming more connected as supply and demand conditions become more interdependent on a global basis. Uncontrollable factors such as strong demand from the Asia-Pacific region, political, regulatory and economic uncertainties, and the cost of emissions from fossil fuels, as well as problems related to local production and delivery conditions, continue to put upward pressure on prices. Falconbridge's supply contracts are governed by standard energy risk management principles, which ensure that supply, price and credit risks are managed effectively.

The security of energy supply is of primary importance. Falconbridge's business operations could be adversely affected, including loss of production and damage to its plants and equipment, if, even temporarily, the supply of energy to one or more of its facilities was interrupted. Additionally, prolonged loss of supply could materially adversely affect its business, financial condition, liquidity and results of operations. As a significant portion of Falconbridge's costs relate to energy consumption, Falconbridge's earnings are directly related to fluctuations in the cost of natural gas, electricity and oil. The current trend of increasing energy prices is expected to continue and as a result there is an increased focus within the operations on the management of energy use and the impact of rising energy costs on financial performance.

Foreign operations

Some of Falconbridge's activities and related assets are located in countries outside North America, some of which may be considered to be, or may become, politically or economically unstable. Exploration or development activities in such countries may require protracted negotiations with host governments, international organizations and other third parties, including non-governmental organizations, and are frequently subject to economic and political considerations, such as taxation, nationalization, inflation, currency fluctuations and governmental regulation and approval requirements, which could adversely affect the economics of projects. These projects and investments could be adversely affected by war, civil disturbances and activities of foreign governments which limit or disrupt markets, restrict the movement of funds or supplies or result in the restriction of contractual rights or the taking of property without fair compensation.

Falconbridge performs a thorough risk assessment on a country-by-country basis when considering foreign activities and attempts to conduct its business and financial affairs so as to protect against political, legal, regulatory and economic risks applicable to operations in the various countries where Falconbridge operates, but there can be no assurance that Falconbridge will be successful in so protecting itself. These projects and investments could also be adversely affected by changes in Canadian laws and regulations relating to foreign trade, investment and taxation.

Market access

Global and regional demand for metals is influenced by regulatory and voluntary initiatives to restrict or eliminate the use of certain metals in particular products or applications. Impacts of such measures can be global, creating non-tariff barriers

to international trade and affecting product design and specifications on a global basis. Such measures could affect the balance between supply and demand and depress metal prices and treatment/refining charges. Metals with a limited number of major applications are most susceptible to changes in demand and price in response to such measures.

Production technology
Falconbridge believes that the technology it uses to produce and process metals is significantly advanced and, in part due to high investment costs, subject only to slow technological change. However, there can be no assurance that more economical production or processing technology will not be developed or that the economic conditions in which current technology is applied will not change.

Legal proceedings
The nature of Falconbridge's business subjects Falconbridge to numerous regulatory investigations, claims, lawsuits and other proceedings in the ordinary course of its business. The results of these legal proceedings cannot be predicted with certainty. There can be no assurance that these matters will not have a material adverse effect on Falconbridge's results of operations in any future period, and a substantial judgement could have a material adverse impact on Falconbridge's business, financial condition, liquidity and results of operations.

Sulphuric acid
Sulphur dioxide is a by-product from the smelting of copper, zinc, nickel and lead sulphide concentrates. Falconbridge captures sulphur dioxide to minimize acid rain emissions, and converts it into sulphuric acid. Due to increasingly strict environmental standards worldwide for sulphur dioxide emissions, involuntary production of sulphuric acid by smelters is growing. The balance of world acid production is largely based on elemental sulphur, whose supply is now a by-product of oil and gas production, and growing more rapidly than demand. Long term, these factors may make it more difficult for Falconbridge to obtain satisfactory prices for its sulphuric acid. However, Falconbridge's production of sulphuric acid cannot be reduced in response to low prices, or dropping sales volumes, without a corresponding reduction in Falconbridge's production of metals.

Raw material procurement risks
Procurement of raw materials involves the risks typically connected with commercial transactions, which can include trade barriers, political instability and problems due to local production conditions. In addition, Falconbridge's supply contracts provide that suppliers of concentrate may be released from their delivery obligations to Falconbridge if certain "force majeure" events occur. Falconbridge's business operations could be adversely affected, at least temporarily, if supplies of raw materials are interrupted as a result of the imposition of trade barriers or other events and if Falconbridge is unable, on short notice, to shift to alternative sources of supply. Falconbridge also processes copper scrap, the availability of which in past years has been subject to significant fluctuations. The availability of scrap, blister copper and other material Falconbridge processes can be significantly affected by competing demand from industrializing nations along with unforeseen production and logistical disruptions.

Risks connected with the Proposed Acquisition

Lack of due diligence access to Falconbridge
Whilst Xstrata carried out a limited due diligence exercise in respect of Noranda and Former Falconbridge assets in the first half of 2004, it has not had any due diligence access to Noranda or Former Falconbridge since then nor has it had any due diligence access to Falconbridge since its creation through the amalgamation of Noranda and Former Falconbridge on 30 June 2005, including at the time of the Xstrata Group's acquisitions of Falconbridge Shares in August and September 2005. Xstrata believes it does not currently have access to any material non-public financial or other information in respect of the Falconbridge Group.

The nature of the proposed acquisition of the Falconbridge Group by the Xstrata Group and the existence of the Inco Support Agreement (discussed in paragraph 8.2(b) of Part VI – "Additional Information – Material contracts") have prohibited the Xstrata Group and its advisers from performing any due diligence on the Falconbridge Group in the context of the Proposed Acquisition. Whilst Falconbridge is registered with the SEC and the Falconbridge Shares are listed and posted for trading on the Toronto Stock Exchange and, as a consequence, Falconbridge is subject to periodic reporting obligations, there can be no assurance that information publicly disclosed by Falconbridge includes all information necessary to make an informed assessment of the Falconbridge Group's prospects, results of operations and financial condition. There is a risk, therefore, that the Company will fail to discover certain liabilities of the Falconbridge Group, or operating or other

problems of the Falconbridge Group prior to completing the Proposed Acquisition. Further, there is a risk that the consideration paid by the Xstrata Group to the shareholders of Falconbridge will be in excess of the actual value of the business of the Falconbridge Group.

Nothing in this paragraph headed "Lack of due diligence access to Falconbridge" is intended to qualify the statements in paragraph 1 of Part VI – "Additional Information – Responsibility".

Integration of the Falconbridge Group
If the Proposed Acquisition proceeds, the integration of the Falconbridge Group's business will involve a number of risks, including:

- the attention of the Enlarged Group's management may be diverted away from other business concerns;
- the Enlarged Group's management may be unable to integrate the Falconbridge Group business in a cost-effective manner, which could result in duplication of management information and financial control systems, customer service teams and product offerings;
- there may be outstanding or unforeseen legal, regulatory, contractual, labour or other issues arising from the acquisition of the Falconbridge Group;
- the Enlarged Group may find it difficult to effectively assimilate the business and management cultures of the Xstrata Group and the Falconbridge Group; and
- the Enlarged Group may not be able to achieve the post-tax cash cost savings and other potential synergies identified at the date of this document.

If the Enlarged Group fails to integrate the Falconbridge Group on a timely and cost-effective basis, the higher than expected costs and other difficulties could have a material adverse effect upon the results of operations or financial condition of the Enlarged Group.

Tax
Under the UK Finance (No.2) Bill 2006 (in its current form), it is possible that the Proposed Acquisition or any post-acquisition restructuring of the Falconbridge Group's business could bring the Enlarged Group within the UK controlled foreign company rules in certain circumstances. This could cause Xstrata to become subject to UK tax on the income profits of certain non-UK resident subsidiaries, which could adversely affect the results of operations or financial condition of the Enlarged Group. However, the proposed legislation is not intended to catch *bona fide* acquisitions. It should not, therefore, apply in practice to the Proposed Acquisition or post-acquisition restructuring and HMRC have provided a non-statutory letter of comfort that the Bill in its current form would not apply to either of those events on the basis of the information provided. HMRC have also indicated that they would be prepared to provide a non-statutory clearance on this matter once the legislation has been finalised.

The Enlarged Group may face risk associated with labour relations
If the Proposed Acquisition proceeds, Xstrata will undertake a detailed review of Falconbridge's activities to evaluate long term performance, profitability and potential synergies for the Enlarged Group. Xstrata expects that benefits will accrue to the Enlarged Group from access to pooled managerial and technical expertise, with increased opportunities for employees across the Enlarged Group. There can be no assurance, however, that, following the Proposed Acquisition, the Enlarged Group will have positive relationships with the Falconbridge Group's employees at operations in Canada and/or elsewhere or that new collective agreements will be entered into without work interruptions. The Enlarged Group could also be adversely affected by labour disruptions involving third parties who may provide the Enlarged Group with goods or services at its operations in Canada and elsewhere. Strikes and other labour disruptions at any of the Enlarged Group's operations, or lengthy work interruptions at its existing and future development projects, could materially adversely affect the timing, completion and cost of any such project, as well as the Enlarged Group's business, results of operations, financial condition and liquidity.

Falconbridge litigation

Based on information filed publicly by Stark Trading and Shepherd Investment International Ltd (the "Stark Claimants"), Brookfield and Falconbridge, Xstrata understands that Falconbridge is a defendant, along with Brookfield, in a claim initiated in November 2005 in Wisconsin, USA by the Stark Claimants. The Stark Claimants allege violations of US federal law, including market manipulation and misrepresentation, by Noranda and Brookfield as Noranda's controlling shareholder in connection with Noranda's issuer bid in March 2005, the Noranda takeover bid for Former Falconbridge in March 2005 and the amalgamation of Noranda and Former Falconbridge in June 2005. The Stark Claimants demand a jury trial and seek compensatory damages of US$74.1 million, punitive damages and costs. On 17 January 2006, Brookfield submitted to the Wisconsin court a memorandum of law in support of its motion to dismiss with prejudice the claim filed by the Stark Claimants and on 23 January 2006, Falconbridge submitted to the Wisconsin court a revised memorandum of law in support of its motion to dismiss the claim by the Stark Claimants. The Stark Claimants submitted briefs in opposition to the motions to dismiss on 17 March 2006. Brookfield and Falconbridge submitted their reply briefs to the Stark Claimants' opposition on 18 April 2006. The court has not yet ruled on the motions. It is not possible for Xstrata to make an assessment of the merits of the claims against Falconbridge at this time as a result of the Xstrata Group's lack of due diligence access to Falconbridge. If, however, the Proposed Acquisition proceeds and the Stark Claimants are successful in claiming significant damages from Falconbridge, such claims could have a material adverse effect upon the results of operations or financial condition of the Enlarged Group.

The Proposed Acquisition is conditional and the conditions may not be satisfied

The Proposed Acquisition is conditional, amongst other things, upon the passing of each of the Transaction Resolutions to be proposed at the EGM, regulatory clearance, approval under the Investment Canada Act and a sufficient number of acceptances by Falconbridge Shareholders. There can be no assurance that these conditions will be satisfied and completion of the Proposed Acquisition will be achieved. In addition, the regulatory clearance process and/or the approval process under the Investment Canada Act may take a lengthy period to complete, which would delay the completion of the Proposed Acquisition.

In relation to regulatory approval, the relevant competition authorities may choose to prevent the Proposed Acquisition from taking place. Alternatively, the competition authorities may permit the Proposed Acquisition but require that Xstrata implement behavioural and/or structural remedies as a condition to granting clearance. Although the Board is confident that the required regulatory approvals will be obtained, there can be no assurance as to the timing or outcome of the approvals processes or that such approvals will not be subject to conditions, including the giving of certain undertakings by the Company.

In relation to approval under the Investment Canada Act, the Canadian Minister responsible for the Investment Canada Act may choose to prevent the Proposed Acquisition from taking place. Alternatively, the relevant Minister may permit the Proposed Acquisition but subject it to conditions, including the giving of certain undertakings by the Company. Although the Board is confident that the required approval will be obtained, there can be no assurance as to the timing or outcome of the approval processes, including the undertakings that may be required for approval.

See also "Market considerations – Possible volatility of the price of Ordinary Shares" in this section headed "Risk Factors" below.

Falconbridge may not perform in line with expectations

If the results and cash flows generated by the Falconbridge Group are not in line with the Xstrata Group's expectations, a write-down may be required against the carrying value of its investment in the Falconbridge Group. Such a write-down may affect the Enlarged Group's business and may also reduce the Company's ability to generate distributable reserves by the extent of the write-down, and consequently affect the Enlarged Group's ability to pay dividends.

Exchange rate fluctuations may increase the Xstrata Group's financing costs and increase the total consideration paid by the Offeror as reported in the Xstrata Group's accounts

In recent months the Canadian dollar has appreciated against the US dollar. All payments under the Xstrata Offer will be made in Canadian dollars, except where Falconbridge Shareholders deposit Falconbridge Shares with the depositary and elect to receive payment in US dollars. The amount payable in US dollars will be determined based upon the Bank of Canada noon rate of exchange for Canadian dollars to US dollars on the business day immediately preceding the date of delivery of such payment by the depositary. The Proposed Acquisition will be financed through new committed

multicurrency bank debt facilities which may be drawn in various currencies including Canadian dollars but which are denominated in US dollars. Accordingly, if the Proposed Acquisition proceeds and the Canadian dollar has continued to appreciate against the US dollar this will increase the amount of US dollars that the Xstrata Group will need to borrow in order to satisfy the consideration payable by the Offeror pursuant to the Xstrata Offer and the Xstrata Group's financing costs will increase as a result. In addition, as the Xstrata Group reports in US dollars, if the Proposed Acquisition proceeds such appreciation will increase the total consideration paid by the Offeror as reported in the Xstrata Group's accounts.
