- (j) the Corporation's audit committee charter.

Any document of the type required by National Instrument 44-101- *Short Form Prospectus Distributions* to be incorporated by reference in a short form prospectus including any material change reports (excluding confidential reports) and any business acquisition reports and any other disclosure documents filed by the Corporation with securities commissions or similar authorities in the provinces of Canada subsequent to the date of this prospectus and prior to the completion or withdrawal of this offering will be deemed to be incorporated by reference in and form an integral part of this prospectus.

Any statement contained in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for the purposes of this short form prospectus, to the extent that a statement contained herein or in any other subsequently filed document that also is, or is deemed to be, incorporated by reference herein modifies or supersedes such statement. The modifying or superseding statement need not state that it has modified or superseded a prior statement or include any other information set forth in the document or statement that it modifies or supersedes. The making of a modifying or superseding statement shall not be deemed an admission for any purposes that the modified or superseded statement, when made, constituted a misrepresentation, an untrue statement of a material fact or an omission to state a material fact that is required to be stated or that is necessary to make a statement not misleading in light of the circumstances in which it was made. Any statements so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part of this short form prospectus.

INFORMATION CONCERNING THE ACQUIRED BUSINESS

As the Corporation does not currently own or operate the Acquired Business, the information in this prospectus relating to the Acquired Business has been summarized from publicly available information and information obtained from third parties. The Corporation and the Underwriters have performed certain procedures to satisfy themselves that this short form prospectus constitutes full, true and plain disclosure with respect to the Acquired Business and they are not aware of any reason to believe that the information with respect to the Acquired Business is incorrect.

The issued and outstanding Class A Shares and Class B Shares of Pan-Ocean Energy are listed on the TSX under the respective symbols "POC.A" and "POC.B". Further information on Pan-Ocean Energy and a copy of the permanent information record of Pan-Ocean Energy may be obtained electronically at www.sedar.com. Addax Petroleum and the Underwriters make no assurances as to the completeness or accuracy of any such information and such information is not and will not be deemed to be incorporated into this prospectus.

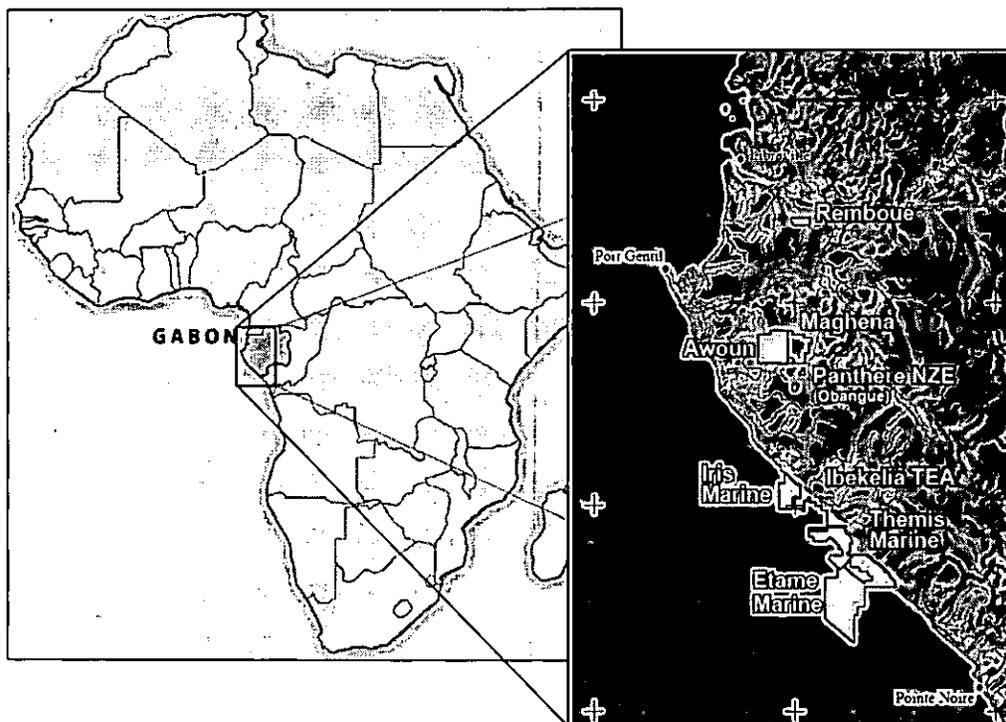

PROPOSED ACQUISITION OF THE BUSINESS OF PAN-OCEAN ENERGY

Acquisition Overview

On July 20, 2006, Addax Petroleum entered into the Arrangement Agreement with Pan-Ocean Energy for the acquisition of all of the issued and outstanding shares of PanAfrican and Pan-Ocean UK and certain other assets of Pan-Ocean Energy for cash consideration of CDN\$1.605 billion plus the assumption of net debt estimated to be CDN\$30 million. PanAfrican is an energy company focused on the exploration, development, production and marketing of conventional medium to light gravity crude oil production in Gabon, West Africa. Pan-Ocean UK provides management services to PanAfrican. These two companies together represent substantially all of the operations of Pan-Ocean Energy.

PanAfrican has developed a balanced portfolio of producing properties, development opportunities and exploration potential in eight licences in Gabon. Four of PanAfrican's licences are onshore and four are offshore, of which seven are pursuant to Production Sharing Contracts and one, Ibekelia, is pursuant to a technical evaluation agreement. Four of the licences (Maghena, Panthere NZE, Etame and Remboué) are producing and Addax Petroleum expects a fifth licence (Awoun) to commence production in 2007.

Gabonese Properties of PanAfrican

PanAfrican currently produces approximately 10,000 bbls/d of medium to light gravity crude oil (29° to 36° API) in Gabon, West Africa. Based on the MACL Reserve Report, as of December 31, 2005, PanAfrican had proved plus probable reserves of 67.5 mmbbls and proved plus probable plus possible reserves of 121.3 mmbbls. PanAfrican also has several exploration opportunities on its 716,487 net acres of land (55 per cent of the total acreage is offshore).

Benefits of the Acquisition

Addax Petroleum believes that the principal benefits of the acquisition of PanAfrican are as follows:

- ***Creates one of the Largest Independent Exploration and Production Companies in West Africa***

Combining the operations of Addax Petroleum and PanAfrican will create one of the largest independent exploration and production companies in West Africa. With the addition of PanAfrican's operations in Gabon, on a consolidated basis Addax Petroleum will have well in excess of 100,000 bbls/d of production by 2006 year end, and as of December 31, 2005 would have had proved plus probable reserves of 264 mmbbls and proved plus probable plus possible reserves of 400 mmbbls. Addax Petroleum's proved plus probable reserve life index will increase and Addax Petroleum will have almost two million net acres of land in four jurisdictions in West Africa. The Corporation intends to develop these reserves as part of a capital expenditure program in excess of \$1 billion in 2007.

Upon completion of the Acquisition, Addax Petroleum's principal properties in West Africa will be as follows.

West Africa Portfolio of Pro Forma Addax Petroleum⁽¹⁾

Jurisdiction	Area ⁽²⁾ <i>(Net Acres)</i>	Average Estimated Oil Production		Gross Oil Reserves ⁽³⁾		
		6 Months Ended December 31, 2006E	Year Ended December 31, 2007E	1P	2P	3P
		<i>(mmbbls/d)</i>	<i>(mmbbls/d)</i>	<i>(mmbbls)</i>	<i>(mmbbls)</i>	<i>(mmbbls)</i>
Nigeria	501,000	91	101	108.6	196.7	278.7
Joint Development Zone	130,300	-	-	-	-	-
Cameroon	70,300	-	-	-	-	-
Gabon – Addax Petroleum	571,600	-	-	-	-	-
Addax Petroleum - Sub-Total	1,273,200	91	101	108.6	196.7	278.7
Gabon – PanAfrican	716,487	13	32	35.9	67.5	121.3
Total	1,989,687	104	133	144.5	264.2	400.0

Notes:

- (1) This table excludes Addax Petroleum's interest in Kurdistan.
- (2) The table sets forth the area of the Corporation's interest after giving effect to the relinquishment proposals for OPL90 and OPL225 made by the Corporation to NNPC. Area presented excludes the area in the Disputed Area in OML123. See "Addax Petroleum — Properties and New Ventures Description — Nigeria — Property Boundaries."
- (3) Reserves estimates for Addax Petroleum as at December 31, 2005, as reported in the NSAI Reserve Report under "Forecast Prices and Costs Case". Reserves presented exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.2 mmbbls. Reserves for PanAfrican are as at December 31, 2005, as reported in the MACL Reserve Report under "Forecast Prices and Costs Case" and are after giving effect to the Government of Gabon's back-in rights.

• **Expansion and Diversification in West Africa**

Addax Petroleum believes that an investment in Gabon is a natural geographic extension of its strategically focused West African operations. The establishment of a new and immediate production hub in Gabon complements Addax Petroleum's existing production base in Nigeria. Gabon represents an attractive investment opportunity for Addax Petroleum, as the Corporation believes the country has an established history of oil exploration and production, a favourable fiscal regime and a stable political climate. See "Proposed Acquisition of the Business of Pan-Ocean Energy — Gabon, West Africa".

• **Enhanced Production Growth Profile**

The near and longer term production growth from PanAfrican's assets enhances Addax Petroleum's existing growth profile and on closing of the Acquisition will add over 10,000 bbls/d to the Corporation. Upon the completion of a transportation pipeline in Gabon anticipated in the second half of 2006, production constraints will be removed and PanAfrican's production is expected to increase to approximately 18,000 bbls/d by year-end. With the current drilling programs, Addax Petroleum expects PanAfrican's 2007 production to be in excess of 30,000 bbls/d and expects significant further production growth in 2008 through the development of existing discoveries.

- **Substantial Reserves Base with Development and Exploration Upside**

Addax Petroleum believes that PanAfrican has significant development and exploration potential within the properties that could lead to meaningful future reserve additions. Addax Petroleum has identified the potential to grow its proved plus probable reserve base in the near term through the development of PanAfrican's 53.9 mmbbls of possible reserves. Additionally, Addax Petroleum has identified exploration potential on PanAfrican's properties that currently have relatively sparse seismic coverage but a strong historical success rate.

- **Complementary Technical and Operational Expertise**

Addax Petroleum expects to retain key Pan-Ocean Energy personnel whose substantial technical and operational expertise in Gabon will be supplemented with Addax Petroleum's demonstrated West Africa capabilities. Additionally, given the similarities between Addax Petroleum's and PanAfrican's producing assets (both produce medium to light crude oil from onshore and offshore fields with similar geological subsurface characteristics), Addax Petroleum expects to be able to quickly assess and develop further potential opportunities in Gabon.

- **Attractive Financial and Operational Accretion for Addax Petroleum's Shareholders**

Addax Petroleum expects the Acquisition to increase 2007 production by approximately 32 per cent, proved plus probable reserves by approximately 34 per cent and proved plus probable plus possible reserves by approximately 44 per cent. Addax Petroleum also estimates that the Acquisition will be accretive to production, reserves and 2007 CFFO per share metrics.

Gabon, West Africa

Overview

Gabon is one of sub-Saharan Africa's wealthier countries due to a relatively small population and significant oil and mineral reserves. The following table highlights some important statistics regarding Gabon, its people and its economy.

Total Area	267,667 km ²
Population	1.4 million
Major Cities	Libreville (capital) and Port-Gentil
Language	French (official), Fang, Myene, Nzebi, Bapounou/Eschira, Bandjabi
Literacy	63 per cent of population over 15 years of age can read and write
Government	Republic with a multiparty presidential regime
Legal System	Based on French civil law system and customary law
GDP	\$9.5 billion
GDP per capita	\$6,800
Oil Production	269 mbbbls/d
Reserves	2.499 billion bbls (proven)
Inflation	-0.1 per cent

Sources: The U.S. Central Intelligence Agency — The Worldfact Book 2006, the Energy Information Administration, U.S. Department of Energy and Bloomberg.

Government

Gabon is a republic that gained independence from France in 1960. A multiparty political system and a new constitution were introduced in the early 1990s. President Omar Bongo has been in power since 1967 and is

currently Africa's longest serving head of state. The President is elected by popular vote for a seven-year term and there are no limits on the number of terms. The Parliament is comprised of the Senate, with 91 elected seats, and the National Assembly, with 120 elected seats.

Presidential elections were held in November 2005 and the next election is scheduled for 2012. The next elections for the National Assembly are scheduled for December 2006, and elections for the Senate are scheduled for January 2009.

International Relations

Since 1973 the number of countries establishing diplomatic relations with Gabon has doubled. The country also maintains close political and economic ties to France which accounted for approximately 45% of Gabon's 2004 imports. Gabon is a member of the United Nations, the World Bank, the Organization of African Unity and many other international organizations. As a proponent of regional economic integration, Gabon and five other countries agreed to form the Central Africa Economic and Monetary Community to converge their macroeconomic policies, stabilize their common currency, create a common market and harmonize their sectoral policies. The movement culminated in the creation of the Gulf of Guinea Commission, established to encourage settlement of conflicts threatening natural resource development.

Petroleum Industry

Oil was first discovered in Gabon in the 1950s and since then there has been significant development and exploration activity both onshore and offshore. Gabon's two biggest fields are located onshore. The Gamba field was discovered in 1963 with estimated reserves of 250 mmbbls and the Rabi field was discovered in 1985 with estimated reserves of 1,000 mmbbls.

Gabonese oil production initially peaked in 1975 at approximately 220 mbbls/d. After several years of decline, production again increased, reaching a new high of approximately 370 mbbls/d in 1997. Current oil production is approximately 269 mbbls/d, the majority of which is produced by Shell and TOTAL. More than 90% of Gabon's current daily oil production is exported with approximately half of total production exported to the United States. Gabon is not a member of the Organization of Petroleum Exporting Countries.

Based on publicly available information, oil exports account for approximately 40% of Gabon's GDP and approximately 60% of the government's budget. Heavy reliance on the petroleum industry has led the government to increase efforts for foreign investment by granting of exploration licenses for frontier drilling. Exports from the petroleum industry are largely responsible for Gabon having a per capita GDP that is more than four times the average of sub-Saharan Africa.

The Acquired Business

Overview

Pan-Ocean Energy is an energy company focused on the exploration, development, production and marketing of conventional medium to light gravity crude oil production in Gabon, West Africa and operates through its wholly owned subsidiaries PanAfrican and Pan-Ocean UK. PanAfrican has developed a balanced portfolio of producing properties, development opportunities and exploration potential in its eight licenses in Gabon, of which seven are pursuant to Production Sharing Contracts and one is pursuant to a technical evaluation agreement, as summarized in the table below.

License	Field / Discoveries	Area ⁽¹⁾ (net acres)	Operator	Working Interest ⁽¹⁾ (per cent)	Gross Oil Reserves as at December 31, 2005 ⁽¹⁾	
					Proved Plus Probable (mmbbls)	Proved Plus Probable Plus Possible (mmbbls)
Maghena	Tsiengui	151,324	PanAfrican	92.50	26.9	45.7
Panthere NZE	Obangue	27,671	PanAfrican	92.50	8.0	20.2
Etame Marin ⁽²⁾	Etame, Avouma, Ebouri	240,006	VAALCO	31.36	17.7	27.1
Awoun	Koula, Damier	110,770	Shell	40.00	13.8	26.0
Remboué	Remboué	30,411	PanAfrican	92.00	1.1	2.3
Iris Marin ⁽²⁾	-	35,887	Sterling	23.78	-	-
Themis Marin ⁽²⁾	-	53,424	Sterling	23.78	-	-
Ibekelia ⁽³⁾	-	66,994	Sterling	40.00	-	-
Total		716,487			67.5	121.3

Notes:

- (1) Reserves as reported in the MACL Reserve Report as at December 31, 2005 under "Forecast Prices and Costs Case" and after giving effect to the back-in rights held by the Government of Gabon and third parties.
- (2) Offshore licences.
- (3) Technical evaluation agreement, offshore Gabon.

Principal Properties

Four of PanAfrican's licences are onshore and four are offshore, of which seven are pursuant to Production Sharing Contracts and one, Ibekelia, is pursuant to a technical evaluation agreement. Four of the licences (Maghena, Panthere NZE, Etame and Remboué) are producing and Addax Petroleum expects a fifth licence (Awoun) to commence production in 2007.

Tsiengui (Maghena PSC), onshore Gabon

Tsiengui is PanAfrican's principal development property and is located southeast of the coastal city of Port Gentil. PanAfrican holds a 92.5 per cent working interest in the Tsiengui Permit onshore Gabon, immediately offsetting PanAfrican's Obangue producing field, with the Government of Gabon owning the remaining 7.5 per cent carried working interest. PanAfrican began exploration on the permit in 2002 and by September 2004, PanAfrican confirmed a significant new light oil discovery on the Tsiengui prospect with its second exploration commitment well, TST-2. The TST-2 exploration well was successfully drilled to a total depth of 1,816 m and logged. PanAfrican's petrophysical analysis of well logs indicated net oil pay of approximately 14 m in the Gamba sandstone. A gas column approximately 38.6 m thick was also encountered in the same formation. The total Gamba sandstone reservoir thickness encountered was approximately 46 m. Given the success of TST-2, PanAfrican drilled and completed a horizontal leg from the well, which tested up to 2,450 bbls/d.

In the second quarter of 2005, PanAfrican drilled two additional development wells, TST-3 and TST-4, and an early production facility was mobilised and installed on the Tsiengui site. An eight-inch diameter 6.2 km export pipeline connecting Tsiengui with the Obangue facility, was completed in May 2005. With three additional development wells completed in first quarter of 2006, the company ended the quarter with a total of six wells capable of producing approximately 6,600 bbls/d of production (net PanAfrican) from the Tsiengui field. Combined Tsiengui and Obangue volumes are currently exported through the existing six-inch export pipeline to the Avocette terminal, which constrains PanAfrican's current production levels. PanAfrican is currently constructing an export pipeline to address the capacity concerns.

Based on the MACL Reserve Report, as of December 31, 2005, PanAfrican's estimated reserves of crude oil in the Tsiengui field were 11.5 mmbbls proved and 26.9 mmbbls proved plus probable, accounting for 32 per cent and 40 per cent of PanAfrican's proved and proved plus probable oil reserves respectively.

Obangue (Panthere Nze Permit), onshore Gabon

Obangue is PanAfrican's principal onshore Gabon producing property. PanAfrican has a 92.5 per cent interest in an exploitation Production Sharing Contract, with the Government of Gabon holding the remaining 7.5 per cent on a

carried working interest basis. The Obangue field has been on-stream since 1998 and is located approximately 100 km southeast of the coastal city of Port Gentil.

Obangue has an integrated gathering, processing, storage and transportation infrastructure along with a self-contained camp for operations personnel. The property can be accessed by private aircraft and by boat. The PanAfrican processing facility has a capacity of approximately 5,000 bbls/d and the storage facility has capacity of 32,000 bbls, allowing approximately two weeks' inventory of production. PanAfrican currently transports oil through a 5,000 bbls/d export pipeline that connects the Obangue production facility to the TOTAL Gabon operated Avocette terminal 12 km to the south.

Based on the MACL Reserve Report, as of December 31, 2005, PanAfrican's estimated reserves of crude oil in the Obangue field were 4.5 mmbbls proved and 8.0 mmbbls proved plus probable, which represented 12.5 per cent and 12.0 per cent of PanAfrican's proved and proved plus probable reserves of crude oil at that time.

Awoun Permit, onshore Gabon

In February 2004, under the Shell Farm-in, PanAfrican acquired 50 per cent of Shell's 100 per cent interest (subject to a 20 per cent government back-in) in a Production Sharing Contract covering Awoun in exchange for drilling commitments PanAfrican has since satisfied.

The Koula discovery was made in September 2004. Three horizontal sidetrack wells were drilled off the initial discovery well, the last of which tested at rates up to 4,000 bbls/d. The appraisal of the Damier discovery made in November 2004 was completed during the second quarter of 2005 and its results along with the nearby Koula discovery were incorporated into a revised subsurface model. In September and October 2005, the Awoun co-venture partners drilled two exploration wells testing the Chevalier and Merle prospects, both of which were found to be dry.

Based on the MACL Reserve Report, as of December 31, 2005, PanAfrican's estimated reserves of crude oil in the Awoun Permit were 8.3 mmbbls proved and 13.8 mmbbls proved plus probable, accounting for 23 per cent and 20 per cent of PanAfrican's proved and proved plus probable oil reserves respectively.

Etame Marin Permit, offshore Gabon

PanAfrican holds a 31.36 per cent working interest in the Etame Marin Permit, which covers approximately 3,000 km² in the Gabon Basin, offshore southern Gabon. Water depths range from zero m to more than 500 m from the north to south in the permit area. The Etame structure is located in water depths of approximately 75 m. The operator of the Etame Permit is VAALCO (28.1 per cent), a Houston-based independent oil and gas company. Sasol Limited (27.8 per cent), a South African integrated oil & gas and chemicals company, and three other companies also hold working interests in the concession.

The Etame Marin Permit was awarded to VAALCO in July 1995. Pan-Ocean acquired its interest in the Etame Marin Permit in 2001. The Etame field is developed based on subsea completed development wells tied back to an FPSO. A contract was entered into for the supply of the 1.1 mmbbls storage capacity FPSO *Petróleo Nautipa* with the owners of the vessel, a consortium made up of *Fréd Olsen Production A.S.* and *Prosafe Production Ltd.* (the parent company of *Nortrans Offshore, Singapore*).

In December 2003, PanAfrican announced the first exploration well, Ebouri No. 1 and its associated sidetrack had made a new field discovery, 11 miles northwest of PanAfrican's producing Etame field. Wireline logs indicated 14 m of net oil pay in the Gamba reservoir. The exploratory well, *Avouma-1*, was drilled as the second Etame Marin Production Sharing Contract commitment well in July 2004. The well encountered net oil pay of approximately 11 m in the Gamba sandstone, and was subsequently flow tested at a rate of 6,600 bbls/d.

Based on the MACL Reserve Report, as of December 31, 2005, PanAfrican's estimated reserves of crude oil in the Etame Marin Permit were 10.9 mmbbls proved and 17.7 mmbbls proved plus probable, which represented approximately 30 per cent and 26 per cent of PanAfrican's proved and proved plus probable reserves of crude oil at that time.

Remboué, onshore Gabon

In February 2001, PanAfrican acquired the *Remboué* Permit from the Government of Gabon. PanAfrican's interest in the permit is 92 per cent, with the Government of Gabon holding the remaining 8 per cent on a carried basis. Production from the *Remboué* field was successfully recommenced in October 2001. There is a single train of processing facilities in the field and 25,000 bbls of tank storage. The *Remboué* export system is entirely marine. During 2005, export loads were shipped by barge from the field to an offshore storage vessel, and subsequently shipped to refineries in the United States.

Based on the MACL Reserve Report, as of December 31, 2005, PanAfrican's estimated reserves of crude oil in the Remboué field were 0.8 mmbbls proved and 1.1 mmbbls of proved plus probable, which represented approximately 2.2 per cent and 1.6 per cent of PanAfrican's proved and proved plus probable reserves of crude oil at that time.

Iris Marin / Themis Marin, offshore Gabon

In April 2005, PanAfrican acquired a 25.71 per cent participating interest in two offshore Gabon exploration permits operated by Sterling Energy plc, namely Iris Marin Exploration Production Sharing Contract and Themis Marin Exploration Production Sharing Contract. The Government of Gabon has an option to back-in for 7.5 per cent in both permits. The Themis Marin and Iris Main Exploration Production Sharing Contracts cover two shallow water exploration permits offshore Gabon of 902 km² and 607 km² respectively. The first exploration well in the Iris Marin Permit, Iris Iboga Marin-1, was drilled during August 2005. The well was drilled to a depth of 2,035 m, reaching a sub-salt Gamba sandstone target where it penetrated over 30 m of reservoir-quality sandstones which, however, were water bearing. The well was plugged and abandoned as a dry hole. The Themis Marin Permit has a commitment well required to be drilled by the fourth quarter of 2007 and is planned for early 2007.

Fiscal Terms

Seven of PanAfrican's eight licences are pursuant to Production Sharing Contracts with the Government of Gabon and one, Ibekelia, is pursuant to a technical evaluation agreement. Under each of its Production Sharing Contracts, PanAfrican bears the development and exploration risk for the properties concerned and funds all of the necessary capital expenditures. In return, each Production Sharing Contract establishes specific terms for PanAfrican to recover costs in accordance with a formula based on monthly production volumes ("**Cost Oil**") and to receive a share of production in excess of the Cost Oil ("**Profit Oil**"). Capital and operating costs incurred in a particular year and any previous amounts carried forward from previous years can be fully recovered each year up to a maximum level defined as a percentage of total production. The maximum limit is set according to the terms in each Production Sharing Contract. The Government of Gabon is entitled to collect a royalty as a fixed percentage of production ("**Royalty Oil**") set according to the terms in each Production Sharing Contract. The proportion of production that is designated for each of Royalty Oil, Cost Oil and Profit Oil in a particular time period is influenced by oil prices, production levels, operating costs, capital expenditures and costs and allowances carried forward from previous periods in accordance with the terms of the Production Sharing Contracts.

Each of PanAfrican's Production Sharing Contracts imposes minimum work obligations. Taxation of each Production Sharing Contract is calculated independently of PanAfrican's other Production Sharing Contracts and as a result, capital expenditure recovery is available to the extent of the profitability of the particular Production Sharing Contract on which the capital expenditures were incurred.

The principal terms of PanAfrican's Production Sharing Contracts are as follows.

PanAfrican's Properties						
Permit	Obangue (Panthere NZE)	Remboué	Maghena (Tsiengui)	Awoun ⁽¹⁾	Etame ⁽²⁾	Iris/Themis ⁽³⁾
Status	Production	Production	Production (Tsiengui)	Exploration	Production (Etame, Avouma)	Exploration
PanAfrican's interest	92.5%	92%	92.5%	50% ⁽⁷⁾	31.36%	25.7% ⁽⁷⁾
Operator	PanAfrican	PanAfrican	PanAfrican	Shell	VAALCO (28%)	Sterling (18%)
Government carry ⁽⁴⁾	7.5%	8.0%	7.5%	Sinopec 20%	Tullow 7.5%	7.5%
Principal Partners	-	-	-	Shell	VAALCO, Sasol, Tullow, Sojitz	Sterling, Premier, PetroSA, Ascent
Cost recovery	80%	80%	75%	65%	70%	80%
Contractor profit share	50% to 20%	50% to 35%	47.5% to 20%	50% to 30%	50% to 40%	50% to 20%
Royalty Oil	3% to 5%	3% to 5%	4.5% to 11%	5% to 10%	3% to 17.5%	6% to 12%
Term ⁽⁵⁾	10+5+5 years	10+5+5 years	10+5+5 years ⁽⁶⁾	10+5+5 years	10+5+5 years	10+5+5 years
Grant Date	December 6, 1996	February 17, 2001	September 26, 1997	December 27, 1999	July 7, 1995	November 2, 1999

Notes:

- (1) The Awoun Production Sharing Contract provides that, once commercial production has commenced, the contractor shall contribute annually to a hydrocarbon support fund for petroleum research in Gabon calculated on the basis of the \$250,000 during the exploration phase and \$0.05 per barrel of total oil produced during the production phase.
- (2) The Etame Production Sharing Contract provides that the contractor shall contribute annually to a hydrocarbon support fund for petroleum research in Gabon calculated on the basis of the total oil production of \$0.05 per barrel produced.
- (3) The Iris/Themis Production Sharing Contract provides that, once commercial production has commenced, the contractor shall contribute annually to a hydrocarbon support fund for petroleum research in Gabon calculated on the basis of the total oil production of \$0.05 per barrel produced.
- (4) The Government of Gabon sold its carried interest to Sinopec and Tullow for the Awoun and Etame Marin PSCs respectively. Under the Production Sharing Contracts, should the government wish to acquire an additional interest it shall inform the contractor in writing and the parties shall mutually agree to such acquisition. Under certain of the Production Sharing Contracts, Gabonese investors have the option of acquiring a 2.5% participating interest within a certain period of time following commercial production failing which the government shall retain the right to acquire such interest.
- (5) Production terms of Production Sharing Contracts are initially for ten years and may be renewed for two subsequent five-year terms.
- (6) The Maghena permit recently was extended for an additional term of five years.
- (7) Before government back-in

All of PanAfrican's Production Sharing Contracts grant the Government of Gabon the right to terminate the Production Sharing Contracts by operation of law by serving a 15-day notice upon certain violations of the Production Sharing Contract, including the failure by the contractors to provide the Government of Gabon within the prescribed time the information specified in the Production Sharing Contract, the failure by the contractors to make all monetary payments under the Production Sharing Contract when due and the failure by the contractors to comply, in a material manner, with the terms of the Production Sharing Contract or any license or lease issued thereunder. The Production Sharing Contracts further provide that, according to petroleum legislation in Gabon and within five years from the effective production date, an agreement shall be entered into with the State in order to establish an abandonment cost reserve fund.

Petroleum Reserves and Operational Matters

In accordance with NI 51-101, MACL, independent petroleum engineering consultants, prepared the MACL Reserve Report dated January 30, 2006. The MACL Reserve Report evaluated, as at December 31, 2005, PanAfrican's crude oil reserves. The tables below are a summary of the crude oil reserves of PanAfrican and the net present value of future net revenue attributable to such reserves as evaluated in the MACL Reserve Report based on constant and forecast price and cost assumptions. The tables summarize the data contained in the MACL Reserve Report and as a result may contain slightly different numbers than such report due to rounding. Also due to rounding, certain columns may not add exactly. The net present value of future net revenue attributable to PanAfrican's reserves is stated without provision for interest costs and general and administrative costs, but after providing for estimated royalties, production costs, development costs, other income, future capital expenditures, and well abandonment costs for only those wells assigned reserves by MACL. It should not be assumed that the undiscounted or discounted net present value of future net revenue attributable to PanAfrican's reserves estimated by MACL represent the fair market value of those reserves. Other assumptions and qualifications relating to costs, prices for future production and other matters are summarized herein. The recovery and reserve estimates of PanAfrican's oil, natural gas liquids and natural gas reserves provided herein are estimates only and there is no guarantee that the estimated reserves will be recovered. Actual reserves may be greater than or less than the estimates provided herein.

The MACL Reserve Report is based on certain factual data supplied by PanAfrican and MACL's opinion of reasonable practice in the industry. In preparing its report, MACL relied upon certain factual information including ownership, well data, production data, prices, revenues, operating costs, capital costs, contracts, and other relevant data supplied by PanAfrican. The supplied information was only relied upon where in MACL's opinion it appeared reasonable and consistent with its knowledge of the properties however no independent verification of the information was made. MACL also relied upon representations made by PanAfrican as to the completeness and accuracy of the data provided. MACL conducted a field inspection in the course of preparing its report.

Notes:

- (1) The crude oil and natural gas reserves estimates presented in the MACL Reserve Report have been based on the definitions and guidelines prepared by the Standing Committee on Reserves Definitions of the CIM (Petroleum society) as presented in the COGE Handbook. A summary of those definitions is presented below.
- (2) Reserves are estimated remaining quantities of oil and natural gas and related substances anticipated to be recoverable from known accumulations, from a given date forward, based on: (i) analysis of drilling, geological, geophysical and engineering data; (ii) the use of established technology; and (iii) specified economic conditions, which are generally accepted as being reasonable, and shall be disclosed.
- (3) Reserves are classified according to the degree of certainty associated with the estimates:
 - (a) Proved reserves are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves.

- (b) Probable reserves are those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated proved plus probable reserves.
- (c) Possible reserves are those additional reserves that are less certain to be recovered than probable reserves. It is unlikely that the actual remaining quantities recovered will exceed the sum of the estimated proved plus probable plus possible reserves.
- (d) Other criteria that must also be met for the categorization of reserves are provided in Section 5.5 of the COGE Handbook.
- (4) Each of the reserves categories (proved, probable and possible) may be divided into developed and undeveloped categories:
- (a) Developed reserves are those reserves that are expected to be recovered from existing wells and installed facilities or, if facilities have not been installed, that would involve a low expenditure (for example, when compared to the cost of drilling a well) to put the reserves on production. The developed category may be subdivided into producing and non-producing.
- (b) Developed producing reserves are those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut-in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.
- (c) Developed non-producing reserves are those reserves that either have not been on production, or have previously been on production, but are shut-in, and the date of resumption of production is unknown.
- (d) Undeveloped reserves are those reserves expected to be recovered from known accumulations where a significant expenditure (for example, when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves classification (proved, probable, possible) to which they are assigned.
- (5) The qualitative certainty levels referred to in the definitions above are applicable to individual reserves entities (which refers to the lowest level at which reserves calculations are performed) and to reported reserves (which refers to the highest level sum of individual entity estimates for which reserves estimates are presented). Reported reserves should target the following levels of certainty under a specific set of economic conditions:
- (a) at least a 90 percent probability that the quantities actually recovered will equal or exceed the estimated proved reserves;
- (b) at least a 50 percent probability that the quantities actually recovered will equal or exceed the sum of the estimated proved plus probable reserves; and
- (c) at least a 10 percent probability that the quantities actually recovered will equal or exceed the sum of the estimated proved plus probable plus possible reserves.
- (d) Additional clarification of certainty levels associated with reserves estimates and the effect of aggregation is provided in Section 5.5.3 of the COGE Handbook.
- (6) "Gross Reserves" are the total of PanAfrican's working and/or royalty interest share before deduction of royalties owned by others, and represent PanAfrican's percentage working interest in the property gross reserves.
- (7) "Net Reserves" are the total of PanAfrican's working and/or royalty interest share after deducting the amounts attributable to royalties owned by others, and represent PanAfrican's share of total Cost Oil and Profit Oil.
- (8) Under the terms of its various Production Sharing Contracts, PanAfrican is liable for taxes in Gabon. These taxes are satisfied entirely out of a portion of the Government of Gabon's share of Profit Oil. As Profit Oil, and the embedded taxation, is integral to the Production Sharing Contract, there is no notion of "Before Tax" that would be directly comparable to a tax and royalty regime, such as Canada. PanAfrican does, however report taxation as pre-tax income taxed at the Gabonese statutory rate of 35 per cent.
- (9) State Royalty is based on a percentage of daily production volume as set out below.

Based on daily production (bbls/d)	Onshore Gabon (per cent)				Offshore Gabon (per cent)
	Obangue	Remboué	Maghena	Awoun	Etame
0 to 3,000	3	3	4.5	5	5

Thereafter	+2 per cent/yr	63.26	61.07	61.07	53.19	0.0

Notes:

- (1) WTI and Brent forecast based on the MACL January 1, 2006 price forecast.
- (2) The Etame field price is based on Brent minus \$1.37 /bbl Etame/Brent differential.
- (3) The Obangue, Tsiengui and Awoun field prices are based on Brent less \$1.37/bbl quality and transportation differential.
- (4) The Remboué field price is based on Brent minus \$6.30/bbl Remboué/Brent differential.

The weighted average realized sales prices for PanAfrican for the year ended December 31, 2005 was \$52.48/bbl for crude oil.

Production History

The following table discloses, on a quarterly basis for the years ended December 31, 2005 and 2004, PanAfrican's share of average daily crude oil production volume, prior to royalties, and the prices received, royalties paid, production costs incurred and netbacks on a per barrel basis.

Average Daily Production Volume

	Three Months Ended				
	31 March 2005	30 June 2005	30 Sept 2005	31 December, 2005	2005 Total
Light and Medium Crude Oil (bbls/d)	9,081	9,034	10,018	9,341	9,369
NGL (bbls/d)	-	-	-	-	-
Natural gas (mcf/d)	-	-	-	-	-
Total Company (bbls/d)	9,081	9,034	10,018	9,341	9,369

	Three Months Ended				
	31 March 2004	30 June 2004	30 Sept 2004	31 December 2004	2004 Total
Light and Medium Crude Oil (bbls/d)	8,209	7,472	8,777	9,437	8,474
NGL (bbls/d)	-	-	-	-	-
Natural gas (mcf/d)	-	-	-	-	-
Total Company (bbls/d)	8,209	7,472	8,777	9,437	8,474

Production Volume by Field

The following table discloses for each important field, and in total, PanAfrican's production volumes for the financial year ended December 31, 2005 for each product type.

	Light and Medium Crude Oil (bbls/d)	Natural Gas (mcf/d)	per cent
Etame	5,936	-	63.3
Obangue	1,536	-	16.3
Tsiengui	954	-	10.2
Remboué	943	-	10.1
Total Production	9,369	-	100.0

Future Development Costs

The table below sets out as at December 31, 2005 the development costs deducted in the estimation of future net revenue attributable to proved reserves (using both constant prices and costs and forecast prices and costs) and proved plus probable reserves (using forecast prices and costs only).

(\$000s)	Constant Prices and Costs	Forecast Prices and Costs	
	Proved Reserves	Proved Reserves	Proved Plus Probable Reserves
2006	98,750	98,750	118,741
2007	70,109	71,862	123,505
2008	7,879	8,277	29,592
2009	1,639	1,765	8,172
2010	1,176	1,298	3,271
Remaining Years	21,824	26,878	43,649
Total Undiscounted	201,375	208,829	326,930
Total Discounted at 10 per cent per year	164,597	168,500	254,253

Crude Oil Differentials

PanAfrican has historically produced Brent quality, light sweet crude oil. Gabon crude oil prices are based upon a number of postings including Mandji Blend, Rabi Blend, Rabi Light, Lucinda Blend, Oguendjo Blend and Tchataba Blend, all of which trade relative to Brent adjusted for transportation and quality differentials. The discounts are determined by the overall differentials between Brent and the relevant Gabon marker crudes, the mix of production from PanAfrican's properties, as well as the actual timing of export, liftings and payment for crude oil produced during the year. Subsequent to year-end, PanAfrican, along with its Etame Marin partners, entered into a new off take agreement with Trafigura Beheer B.V. Amsterdam. The Trafigura contract price is based on a discount to Rabi Light, which in turn trades relative to Brent.

PanAfrican crude oil differential to Brent Crude⁽¹⁾

	3 months ended March 31, 2006	Year ended December 31, 2005
Sales and Marketing Volumes (mmbbls)	0.98	3.38
Average Realized PanAfrican Prices (\$/bbl)	60.94	52.48
Dated Brent Price (\$/bbl)	61.78	54.38
Premium/(Discount) to Brent Crude (\$/bbl) ⁽¹⁾	(0.84)	(1.90)

Note:

⁽¹⁾ Based on the net realized average oil price for PanAfrican for the periods indicated.

Overview of the Arrangement

Description of Arrangement Agreement

On July 20, 2006, the Corporation and Pan-Ocean Energy entered into the Arrangement Agreement which provides for the acquisition by the Corporation of all of the issued and outstanding shares of PanAfrican and Pan-Ocean UK and certain other assets of Pan-Ocean Energy, to be effected as a scheme of arrangement pursuant to the Companies (Jersey) Law 1991. A copy of the version of the Arrangement Agreement filed with the Canadian securities regulatory authorities is available at www.sedar.com.

Pursuant to the Arrangement Agreement, the Corporation will acquire from Pan-Ocean Energy all of the issued and outstanding shares of PanAfrican and Pan-Ocean UK, as well as certain head office assets of Pan-Ocean Energy used in the operation of the business and the assignment of certain employment contracts, in exchange for aggregate consideration of CDN\$1.605 billion and the assumption of net debt estimated to be CDN\$30 million. The Arrangement requires the approval of Pan-Ocean Energy shareholders. The meetings of Pan-Ocean Energy's shareholders to approve the Arrangement are scheduled to be held on or about August 30, 2006, with closing of the Arrangement expected to occur on or about September 7, 2006. Completion of the Acquisition is subject to the satisfaction or waiver of certain conditions set forth in the Arrangement Agreement. There is no assurance that the Acquisition will be consummated. See "Risk Factors — Risks Relating to the Acquisition".

Meetings will be held in respect of each of (i) the holders of Class A Shares, and (ii) the holders of Class B Shares, all pursuant to an interim order of the Royal Court of Jersey (collectively, the "Court Meetings" and individually, a "Court Meeting"). In addition, immediately following such meetings, an extraordinary general meeting (the "Extraordinary General Meeting") of Pan-Ocean Energy will be convened at which the holders of Class A Shares and Class B Shares will vote on certain resolutions. Finally, immediately following the Extraordinary General Meeting a (i) meeting of the holders of Class A Shares (the "Class A Shareholder Meeting"), and (ii) meeting of the holders of Class B Shares (the "Class B Shareholder Meeting"), will be held to vote on certain additional resolutions.

At the Court Meetings each class will vote separately to approve the proposed Arrangement and Arrangement Agreement. At the Extraordinary General Meeting, holders of Class A Shares and Class B Shares will vote to, among other things, approve special resolutions to create and issue a new class of common shares of Pan-Ocean Energy, convert Pan-Ocean Energy to a no par value company, authorize the repurchase of the Class A Shares and Class B Shares pursuant to the Arrangement and authorize Pan-Ocean Energy's board of directors to make arrangements for the termination or settlement of existing options. At the Class A Shareholder Meeting, holders of Class A Shares will vote to approve a special resolution authorizing the conversion of Pan-Ocean Energy into a no par value company. At the Class B Shareholder Meeting, holders of Class B Shares will also vote to approve a special resolution authorizing the conversion of Pan-Ocean Energy into a no par value company.

For the Arrangement to proceed, at each Court Meeting it must be approved by a resolution of a majority in number representing three-fourths in nominal value of each class of shareholders of Pan-Ocean Energy, voting separately as a class, present and voting either in person or by proxy at the relevant Court Meeting, as well as by a

majority of the minority shareholder approval of each class. At the Extraordinary General Meeting, resolutions must be approved by not less than two-thirds of the votes cast in favour of the resolutions. At each of the Class A Shareholder Meeting and Class B Shareholder Meeting, shareholders of the relevant class must approve the applicable resolutions by not less than two-thirds of the votes cast in favour of the resolutions.

The obligations of Pan-Ocean Energy and Addax Petroleum to complete the Arrangement are subject to the fulfillment of certain conditions precedent including, among others, (i) the final order of the Royal Court of Jersey having been obtained on reasonably satisfactory terms and not being set aside or modified, (ii) there not being any law and there not having been any action taken under any law or by any governmental entity or regulatory authority that makes it illegal or otherwise prohibits the consummation of the Arrangement, and (iii) the Arrangement Agreement not having been terminated in accordance with its terms.

The obligations of Addax Petroleum to complete the Arrangement are also subject to the fulfillment of certain conditions precedent including, among others, (i) Pan-Ocean Energy having complied with its covenants under the Arrangement Agreement in all material respects, (ii) no material adverse effect having occurred in respect of Pan-Ocean Energy, (iii) holders of less than 5% of the issued and outstanding Class B Shares having exercised dissent rights, (iv) Pan-Ocean Energy having received consents from its commercial bankers to complete the Arrangement, (v) Pan-Ocean Energy providing to Addax Petroleum satisfactory evidence of the extension of the Maghena permit, and (vi) there being no laws proposed or applied, or claims made or threatened in writing by any governmental authority, not in either case of general application and in any case which would if effective or successful result in the termination or withdrawal of, or fundamental change to (including to the nature or extent of the fiscal treatment thereof) certain Production Sharing Contracts of Pan-Ocean Energy and/or their respective underlying exploration licences.

The obligations of Pan-Ocean Energy to complete the Arrangement are also subject to the fulfillment of certain conditions precedent including, among others, (i) Addax Petroleum having complied with its covenants under the Arrangement Agreement, and (ii) Addax Petroleum having deposited with Pan-Ocean Energy's transfer agent the purchase price for the Acquisition as close as reasonably possible to the anticipated effective time of the Arrangement.

If Pan-Ocean Energy shareholder approvals are obtained, an order of the Royal Court of Jersey will be sought following such meetings confirming the Arrangement when the conditions precedent to the Arrangement have been satisfied or waived. If shareholder approvals are not obtained, or if the order of the Royal Court of Jersey is not obtained or if the conditions precedent to the Arrangement have not been satisfied or waived, then, either the Corporation or Pan-Ocean Energy may be able to terminate the Arrangement Agreement and not proceed with the completion of the Arrangement.

Termination of the Arrangement Agreement

The Arrangement Agreement may be terminated any time prior to the filing of the final order of the Royal Court of Jersey with the registrar in Jersey or by mutual written agreement of Pan-Ocean Energy and Addax Petroleum.

Addax Petroleum may terminate the Arrangement Agreement at any time prior to date the final order of the Royal Court of Jersey is filed with the registrar in Jersey if: (a) the interim order of the Royal Court of Jersey has been set aside or modified in a manner unacceptable to Addax Petroleum, acting reasonably, on appeal or otherwise; (b) the Arrangement is not approved by the Pan-Ocean Energy shareholders in accordance with the terms of the interim order of the Royal Court of Jersey on or before the October 31, 2006, or such later date as may be agreed to in writing by Pan-Ocean Energy and Addax Petroleum (the "Outside Date"); (c) the final order of the Royal Court of Jersey has not been granted in form and substance satisfactory to Addax Petroleum, acting reasonably, on or prior to the Outside Date or, if issued, has been set aside or modified in a manner unacceptable to Addax Petroleum, acting reasonably, on appeal or otherwise; (d) the Arrangement has not become effective on or before the Outside Date; (e) the Non-Completion Fee (as defined below) is payable by Pan-Ocean Energy; (f) the Board of Directors of Pan-Ocean Energy changes, withdraws, modifies or supersedes its recommendation to Pan-Ocean Energy shareholders to vote in favour of the Arrangement and related resolutions; (g) a material adverse effect has occurred with respect to Pan-Ocean Energy; (h) a condition precedent in favour or for the benefit of Addax Petroleum is not satisfied in accordance with the Arrangement Agreement by the time specified for satisfaction thereof or the Outside Date (as the case may be); (i) Pan-Ocean Energy is in breach of any of its covenants, agreements or representations contained in the Arrangement Agreement that would have a material adverse effect on Pan-Ocean Energy or on the ability of Pan-Ocean Energy and Addax Petroleum to consummate the transactions contemplated by the Arrangement Agreement and Pan-Ocean Energy fails to cure such breach within seven days after receipt of written notice thereof from Addax Petroleum (except that no cure period shall be provided for a breach which by its nature cannot be cured); or (j) upon any other circumstances that gives rise to a right of termination of the Arrangement Agreement by Addax.

Pan-Ocean Energy may terminate the Arrangement Agreement upon written notice to Addax Petroleum if: (a) the interim order of the Royal Court of Jersey has been set aside or modified in a manner unacceptable to Pan-Ocean Energy, acting reasonably, on appeal or otherwise; (b) the Arrangement is not approved by the shareholders of Pan-Ocean Energy in accordance with the terms of the interim order of the Royal Court of Jersey on or before the Outside

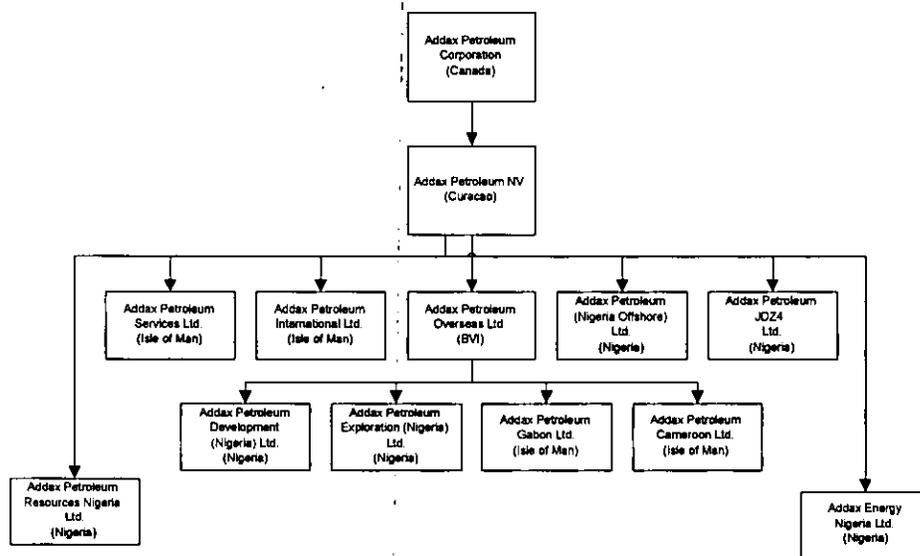

Date; (c) the Final Order is not granted in form and substance satisfactory to Pan-Ocean Energy, acting reasonably, on or prior to the Outside Date or, if granted, has been set aside or modified in a manner unacceptable to Pan-Ocean Energy, acting reasonably, on appeal or otherwise; (d) the Arrangement does not become effective on or before the Outside Date; (e) the Non-Completion Fee is paid by Pan-Ocean Energy; (f) Addax Petroleum is in breach of any of its covenants, agreements or representations contained in the Arrangement Agreement that materially adversely affects the ability of Addax Petroleum and Pan-Ocean Energy to consummate the transactions contemplated by the Arrangement Agreement and Addax Petroleum fails to cure such breach within seven days after receipt of written notice thereof; or (g) upon any other circumstances under the Arrangement Agreement that give rise to a termination of the Arrangement Agreement by Pan-Ocean Energy.

The terms and conditions of the Arrangement Agreement do not prevent an unsolicited third party from proposing or making an offer to Pan-Ocean Energy that is superior to the terms of the Arrangement or, provided Pan-Ocean Energy complies with the terms of the Arrangement Agreement, preclude the Pan-Ocean Energy board of directors from considering and acting on such superior offer. In such circumstances, and in certain other circumstances, Pan-Ocean Energy is required to pay to Addax Petroleum a one time fee of CDN\$45 million (the "Non-Completion Fee") and potentially an expense reimbursement up to CDN\$5 million. In the event that Pan-Ocean Energy receives a superior offer, Addax Petroleum has the right, but not the obligation, to offer to amend the terms of the Arrangement Agreement in order to match the superior offer.

ADDAX PETROLEUM

Addax Petroleum was incorporated under the *Canada Business Corporations Act* on September 6, 2005. On December 5, 2005, the articles of Addax Petroleum were amended to authorize the issue of an unlimited number of Preferred Shares, issuable in series. Pursuant to a share transfer agreement among the Corporation, AOG and Addax Mining Holdings B.V. dated February 10, 2006, the Corporation acquired all of the issued and outstanding shares of Addax Petroleum N.V., a corporation incorporated under the laws of the Netherlands Antilles. The Corporation now carries on the business previously carried on by APNV, of evaluating and pursuing oil and gas exploration in Africa and the Middle East.

The head office of the Corporation is located at 16, avenue Eugène-Pittard, 1206, Geneva, Switzerland. The registered office of the Corporation is located at 3400, 350th Avenue S.W. Calgary, Alberta T2P 5N9. The chart below shows the inter-corporate relationships among Addax Petroleum and its material subsidiaries.

Upon completion of the Acquisition, PanAfrican and Pan-Ocean UK will be direct wholly owned subsidiaries of Addax Petroleum Overseas Ltd.

Addax Petroleum is an international oil and gas exploration and production company with a strategic focus on Africa and the Middle East. The Corporation is the largest independent oil producer in Nigeria, and has increased its crude oil production from an average of 8,800 barrels per day in 1998 to an average of approximately 80,000 barrels per day in the first quarter of 2006, representing a compounded annual growth rate of approximately 34 per cent. The Corporation has grown by acquiring under-developed properties in established basins and has increased its production by utilizing advanced and proven technologies. Addax Petroleum believes that its demonstrated technical expertise,

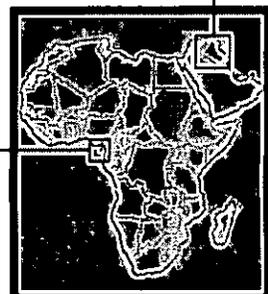

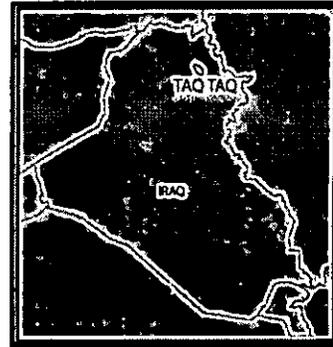

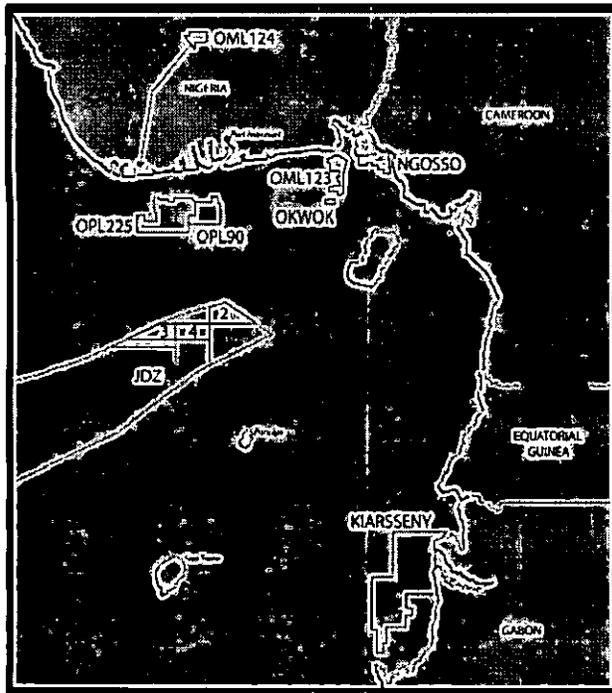

combined with its excellent operational reputation and strong community relationships throughout Africa and the Middle East, make it well positioned to continue to grow its reserves and production.

For the twelve months ended December 31, 2005, Addax Petroleum produced an average of 65,280 bbls/d and generated \$468.2 million of CFFO. For the three months ended March 31, 2006, Addax Petroleum produced an average of 80,380 bbls/d and generated \$174.3 million of CFFO. The Corporation expects average production to be 85,000 bbls/d in 2006 and in excess of 100,000 bbls/d in 2007 (excluding any potential production from Taq Taq, Okwok or PanAfrican assets.) As of December 31, 2005, Addax Petroleum had estimated proved reserves of 108.6 mmbbls and estimated proved and probable reserves of 196.7 mmbbls. The reserves of the Corporation were evaluated as at December 31, 2005 by NSAI.

Properties Summary

Addax Petroleum's principal properties in West Africa and the Middle East are as follows:

- In Nigeria, the Corporation has a 100 per cent interest in two Production Sharing Contracts and a 40 per cent interest in a Joint Venture Agreement covering the following five Addax Petroleum operated properties:
 - OML123, which accounts for the majority of the Corporation's oil production, is located offshore in shallow water and produces medium to light quality crude oil (29° API);
 - OML124 is located onshore and produces light quality crude oil (36° API);
 - OPL90 is located offshore in medium depth water and produces light quality crude oil (37° API);
 - OPL225 is an offshore exploration property located in medium depth water, adjacent to OPL90; and
 - Okwok is an offshore development property located in shallow water in OML67, adjacent to OML123.
- In Cameroon, Addax Petroleum has a 60 per cent interest in the Ngosso Property, an offshore exploration property operated by the Corporation.
- In Gabon, Addax Petroleum has a 42.5 per cent interest in the Kiarsseny Property, an offshore exploration property operated by Tullow Oil.
- In the Joint Development Zone, Addax Petroleum has recently established a prominent equity position which includes: (i) a 38.3% participating interest in Block 4; (ii) a 15% participating interest in Block 3; and (iii) a 14.33% participating interest in Block 2. Addax Petroleum is the operator of Block 4 while Anadarko is the operator of Block 3 and Sinopec is the operator of Block 2.
- In the Kurdistan Region of Iraq, Addax Petroleum has entered into a farm-in agreement with Genel Enerji for an interest in a Production Sharing Contract in respect of the Taq Taq field. In May 2006, the Corporation announced that it commenced drilling activities with Genel Enerji in their first jointly operated well in the Taq Taq license area.

The following table summarizes the production, development, exploration and new ventures properties of the Corporation.

Properties and New Ventures Summary Table

Country/Region	License	Area ⁽¹⁾⁽²⁾ (acres)	Addax Petroleum's Interest (%)	Average Oil Production		Gross Oil Reserves ⁽²⁾⁽³⁾		
				3 Months Ended March 31, 2006 (bbls/d)	2005 (bbls/d)	Proved (mmbbls)	Proved Plus Probable (mmbbls)	Proved Plus Probable Plus Possible (mmbbls)
Nigeria	OML123	90,700	100	50,350	47,120	74.9	143.9	194.3
	OML124 ⁽⁴⁾	74,100	100	3,370	3,490	9.7	12.8	28.1
	OPL90	85,300	100	26,660	14,670	24.0	40.0	56.3
	OPL225	241,900	100	—	—	—	—	—
	Okwok	9,000	40	—	—	—	—	—
JDZ	Block 4	81,100	38.3	—	—	—	—	—
	Block 3	24,700	15.0	—	—	—	—	—
	Block 2	24,500	14.3	—	—	—	—	—
Cameroon	Ngosso	70,300	60	—	—	—	—	—
Gabon	Kiarsseny	571,600	42.5	—	—	—	—	—
Kurdistan	Taq Taq ⁽⁴⁾	50,700	30	—	—	—	—	—
Total		1,323,900		80,380	65,280	108.6	196.7	278.7

Notes:

- (1) The table sets forth the area of the Corporation's interest after giving effect to the relinquishment proposals for OPL90 and OPL225 made by the Corporation to NNPC. See "Addax Petroleum — Properties and New Ventures Description — Nigeria — Property Boundaries".
- (2) Area presented excludes the area in the Disputed Area in OML123. Reserves presented exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.2 mmbbls.
- (3) Proved and probable reserves as at December 31, 2005 as reported in the NSAI Reserve Report under "Forecast Prices and Costs Case".
- (4) Onshore properties.

Recent Developments

The following is a summary of the significant recent developments in the business and operations of Addax Petroleum, in addition to the proposed acquisition of the Acquired Business. Additional details regarding these recent developments can be found within the description of each property.

In March 2006, Addax Petroleum entered into three Production Sharing Contracts with the Joint Development Authority for three blocks in the Joint Development Zone. The three blocks awarded were JDZ Block 4 (Addax Petroleum's participating interest of 38.3 per cent and operator), JDZ Block 3 (15.0 per cent participating interest with Anadarko as operator) and JDZ Block 2 (14.3 per cent participating interest with Sinopec as operator).

In May 2006, Addax Petroleum and Genel Enerji commenced drilling activities in the first jointly operated well in the Taq Taq License Area in the Kurdistan Region of Iraq. The commencement of drilling activities followed a 2-D seismic data acquisition campaign between December 2005 and April 2006 to define the extent of the Taq Taq structure. The well now being spudded is scheduled to reach a targeted depth of approximately 2,250 m in the oil bearing Cretaceous Shiranish, Kometan and Qamchuga formations.

In June 2006, Addax Petroleum completed the acquisition of a 40 per cent participating interest in the Okwok Property in license area OML67 following the receipt of necessary government approvals. Under the Joint Venture Agreement between Oriental Energy and the Corporation, Oriental retains a 60 per cent interest. Addax Petroleum will conduct operations at the Okwok Property in its capacity as technical advisor. Addax Petroleum and Oriental Energy plan to drill up to three appraisal wells commencing in July 2006 to confirm the commercial potential of the field. A successful appraisal program by Oriental Energy and Addax Petroleum will be followed by field development operations. First commercial oil production from the Okwok Property could commence as early as 2008.

Development and exploration activities on the Corporation's Nigeria properties is continuing at a rapid pace in 2006. For the three months ended March 31, 2006, Addax Petroleum produced an average of 80,380 bbls/d and generated \$174.3 million of CFFO. The capital expenditure program for the first three months of 2006 totalled \$245.5 million and was comprised of development expenditure of \$148.3 million, license acquisition expenditures of \$66.0 million and exploration expenditures of \$31.2 million. The Corporation expects average production to be 85,000 bbls/d in 2006 and in excess of 100,000 bbls/d in 2007 (excluding any potential production from Taq Taq, Okwok or the PanAfrican assets).

Properties And New Ventures Description

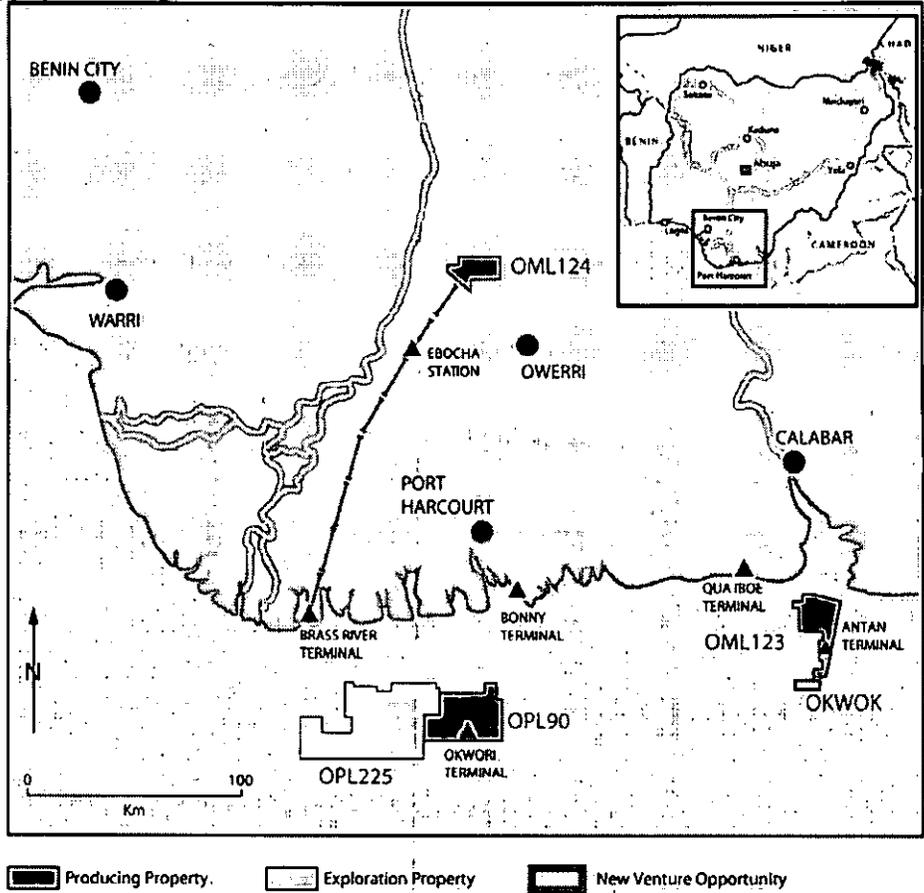

Addax Petroleum's principal oil and gas properties and new venture opportunities are in the West African countries of Nigeria, Cameroon and Gabon, as well as in the Joint Development Zone and the Kurdistan Region of Iraq.

Nigeria

Within Nigeria, Addax Petroleum has a 100 per cent interest in a Production Sharing Contract covering OML123 and OML124, a 100 per cent interest in a Production Sharing Contract covering OPL90 and OPL225 and a 40 per cent interest in the Okwok Property in OML67 (immediately adjacent to OML123). OML123, OML124 and OPL90 are operated by the Corporation and contain producing oil fields as well as a number of development and exploration opportunities. OPL225 is operated by the Corporation and contains a discovery and a number of exploration opportunities. The Okwok Property contains the Okwok discovery where Addax Petroleum is conducting operations in its capacity as technical advisor. The Corporation has budgeted capital expenditures in Nigeria of \$894 million in 2006, including \$35 million of acquisition costs for the Okwok Property.

The development of the natural gas industry, including the cessation of associated natural gas flaring by 2008, is a high priority for the Nigerian government. Currently the Corporation's Production Sharing Contracts covering

OML123, OML124, OPL90 and OPL225 relate solely to commercial oil development but include the right to negotiate commercial terms with NNPC for gas development in the properties. Addax Petroleum's natural gas strategy is intended to ensure that the Corporation complies with the requirement to cease associated natural gas flaring and also to position the Corporation to assist with, and participate in, the monetization of existing and future associated and non-associated natural gas reserves. The Corporation is currently in discussions to supply natural gas from all of its producing properties in Nigeria.

OML123

Overview

OML123 is the Corporation's largest property as measured by reserves and production. In the first three months of 2006, OML123 produced an average of 50,350 bbls/d of oil. Oil gravity ranges between 19° and 38° API. As at December 31, 2005, NSAI estimates gross proved reserves for OML123 to be 74.9 mmbbls and gross proved plus probable reserves to be 143.9 mmbbls. The Corporation expects production from OML123 to average approximately 53 mmbbls/d in 2006 and 55 mmbbls/d in 2007.

OML123 is located offshore approximately 70 km south of the town of Calabar and covers an area of 90,700 acres (367 km²) in water depths ranging from 3 to 40 m on the eastern edge of the Niger Delta. OML123 contains nine producing oil fields (Adanga, Ebughu and extensions, Oron West, North Oron, Akam, Bogi, Mimbo, Ukpam and Adanga North) and one undeveloped oil field (Kita North). There are also five unappraised oil discoveries (Kita Marine, Inagha, Adanga East, Adanga West and Ebughu NE-A), one large 8,600 acre (35 km²) undeveloped gas discovery (Oron) and several exploration prospects. Total capital expenditures for OML123 are budgeted to be \$443 million in 2006.

Production and Reserves

The following table summarizes the production and reserves in OML123.

Field	Average Oil Production		Gross Oil Reserves ⁽¹⁾⁽²⁾		
	3 Months Ended March 31, 2006	2005	Proved	Probable	Possible
	bbls/d	bbls/d	(mmbbls)	(mmbbls)	(mmbbls)
Adanga	20,810	22,350	23.6	25.2	13.8
Ebughu (and extensions)	13,810	15,590	17.4	4.3	9.2
Oron West and North Oron	13,570	7,420	24.6	23.2	0.2
Adanga North	560	-	-	11.0	12.0
Other Producing Fields	1,600	1,760	2.3	3.2	11.7
Kita North	-	-	7.0	2.2	3.5
Total.....	50,350	47,120	74.9	69.0	50.4

Notes:

- (1) Proved and probable reserves as at December 31, 2005, as reported in the NSAI Reserve Report under "Forecast Prices and Costs Case".
- (2) Reserves presented exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.2 mmbbls.

Production Facilities

The producing fields in OML123 are operated as a common development area. The key production facility is a FPSO which gathers produced crude oil from production or wellhead platforms on each field. At the OML123 FPSO, crude oil is processed to export specifications, stored and offloaded directly to ocean going tankers.

The current OML123 FPSO is the Knock Taggart which has a nameplate processing capacity of up to 60 mmbbls/d of crude oil, a total liquids (oil and water) processing capacity of 100 mmbbls/d and a storage capacity of approximately one mmbbls of crude oil. The Corporation is in the process of replacing the Knock Taggart with the Knock Adoon FPSO in order to maximize production capacity and improve cost efficiency. The Knock Adoon has a processing capacity of 60 mmbbls/d of crude oil, a total liquids (oil and water) processing capacity of 140 mmbbls/d and a storage capacity of 1.7 mmbbls of crude oil and incorporates an off-loading buoy terminal to better facilitate offloading during periods with strong currents and to accommodate larger tankers. The Knock Adoon is under a time charter with a subsidiary of Fred Olsen Production AS, the term of which is anticipated to expire in June 2014 with extension periods of up to a further eight years at the Corporation's option.

In order to maximize the use of the OML123 production facilities, Addax Petroleum has an agreement with the OML114 Parties who operate the adjacent OML114, to store and export all of the crude oil produced from their license area. In return, the OML114 Parties pay the Corporation for their share of the expenses for the operation of the OML123 FPSO.

Associated gas produced on OML123 is currently used for gas lift and fuel gas to aid oil production while the excess is flared by Addax Petroleum. NNPC, the owner of all natural gas in Nigeria, has informed the Corporation that it has targeted to use OML123 to supply 130 mmcf/d of natural gas to a new power generation plant at Calabar, starting in 2008. This project will aid the Corporation in achieving its objective of complying with the "Flares Down by 2008" policy announced by the Nigerian government. The Corporation believes its participation in this gas supply project will position it to participate in the supply of non-associated gas under separate supply arrangements in the future.

The initial gas supply project from OML123 contemplates the construction of gas gathering pipelines to bring both associated gas from existing oil facilities as well as non-associated gas to an LPG FPSO, a floating central gas processing liquids storage unit comprised of LPG and condensates extraction and compression facilities and a gas delivery pipeline to the town of Calabar. The LPG FPSO is expected to produce initially approximately 150 t/d of propane, 100 t/d of butane and 1 mmbbls/d of condensate. The floating central gas processing unit should be located adjacent to existing oil production facilities in the Adanga field and will be leased. The capital expenditures for the gas supply project are expected to be funded by Addax Petroleum and NNPC except for the gas delivery pipeline which will

be built and financed by the Nigerian government. See "Addax Petroleum — Properties and New Ventures Description — Nigeria — OML123 — Budgeted Capital Expenditures".

Fields

Adanga

The Adanga field, discovered in 1980 and producing since 1986, is Addax Petroleum's principal producing field in OML123. For the first three months of 2006, Adanga produced an average of 20,810 bbls/d of oil with an average watercut of 15 per cent. Oil gravity averaged 33° API. As at December 31, 2005, NSAI estimates gross proved reserves for the Adanga field to be 23.6 mmbbls and gross proved plus probable reserves to be 48.8 mmbbls.

The Adanga field is located in water depths ranging from 10 to 20 m and covers an area of approximately 2,800 acres (11.3 km²) in the central part of OML123. First production started in 1986 from the Adanga main block through one vertical and eight deviated wells drilled from the Adanga Platform. Following a detailed 3D seismic interpretation, Addax Petroleum modelled the field in 1999-2000 and undertook an extensive appraisal and development drilling program in the southern blocks, beginning in 2001. Since then, the Corporation has drilled a total of 29 wells resulting in 15 horizontal production wells, 12 appraisal wells and two water injection wells. The Corporation continues to evaluate infill and step-out drilling locations at Adanga and, in 2006, plans to drill five appraisal wells followed by up to five horizontal production wells and one water injection well and to work-over and recomplete two water injection wells. Water injection pumping facilities will be provided on the OML 123 FPSO. Most of the field's well completions are equipped with gas lift capability.

Wells from the Adanga field produce through the Adanga Platform, installed in 1986, and three satellite wellhead platforms, installed in 2003. In the second quarter of 2004, a new riser platform tied-in to a leased TPU was commissioned at Adanga, at which time all production was handled by the TPU. The TPU now handles all initial processing in the Adanga area prior to being pumped to the FPSO. In addition, the TPU allows production from the wells in the nearby Ebughu field extensions which could not otherwise be accommodated on the Adanga Platform or on the Ebughu Platform. The capital expenditure budget for 2006 includes the purchase of the TPU and refurbishing both the TPU and the Adanga platform. The refurbishment project is planned to be substantially complete by the end of 2006.

Ebughu (and extensions)

The Ebughu field, discovered in 1980 and producing since 1988, along with the extensions is Addax Petroleum's second largest producing field in OML123. For the first three months of 2006, Ebughu produced an average of 13,810 bbls/d of oil with an average watercut of 45 per cent. Oil gravity ranges between 20° API in the Ebughu field and 28° API in its northeast extension. As at December 31, 2005, NSAI estimates gross proved reserves for the Ebughu field and extensions to be 17.4 mmbbls and gross proved plus probable reserves to be 21.7 mmbbls.

The Ebughu field is located in water depth of approximately 30 m and covers an area of approximately 2,600 acres (10.6 km²) in the southern part of OML123. Following a successful three-well appraisal program in 1984, Ashland installed the Ebughu Platform in 1988 and completed two wells which began producing in 1988. In 1996, a pilot horizontal production well was drilled between the existing two wells. Since 1999, Addax Petroleum has embarked on an extensive appraisal and development drilling program resulting in the discovery of five field extensions. In the second half of 2006, Addax Petroleum plans to drill three horizontal production wells on the eastern and north eastern extensions.

Oron West and North Oron

Oron West was discovered by Addax Petroleum in 2002 and North Oron was successfully appraised in the same year. Oil production from Oron West and North Oron commenced in 2004. For the first three months of 2006, Oron West and North Oron produced an average of 13,570 bbls/d with an average watercut of 2 per cent. Oil gravity averages 38° API in Oron West and 27° API in North Oron. As at December 31, 2005, NSAI estimates gross proved reserves for the Oron West and North Oron fields to be 15.4 and 9.2 mmbbls, respectively, and gross proved plus probable reserves to be 29.1 and 18.7 mmbbls, respectively.

The fields are located in water depth of approximately 8 m and cover an area of approximately 1,200 acres (4.9 km²) in the northwest sector of OML123. In 2005, Addax Petroleum drilled nine appraisal wells on Oron West and five appraisal wells on North Oron in the first development phase of both fields.

In 2005, the Corporation designed and constructed a wellhead platform from which six horizontal production wells were drilled. Currently production is constrained as it flows to the Akam platform where it is degassed prior to being pumped to the Knock Taggart. In the second half of 2006, a second wellhead platform has been installed near the

existing platform from which a further four wells were planned for the second half of 2006 comprising two horizontal production wells drilled in North Oron and one appraisal and one horizontal production well to be drilled in Oron West. In addition, an isolated appraisal well is planned in Oron West. A third wellhead is planned to be installed in the second half of 2006 on the southern extension of Oron West from which two water injection wells will be drilled followed by three horizontal production wells in 2007. In order to overcome the production constraint at Akam, a new pipeline from Oron to the Adanga Platform, bypassing Akam, is also planned for 2006.

Adanga North

The Adanga North field was discovered in 1986 and appraised in 1996, and further appraisal and development plans are in progress. For the first three months of 2006, Adanga North produced an average of 560 bbls/d from an extended well test. Oil gravity is 19° API. As at December 31, 2005, NSAI estimates gross proved plus probable reserves to be 11.0 mmbbls.

The Adanga North field is located in 10 m water depth and covers an area of approximately 1,100 acres (4.5 km²) in the central part of OML123. In the second half of 2006, the Corporation is carrying out an extended production test to establish the optimal development plan for the Adanga North field. As part of this process, Addax Petroleum built and installed a wellhead structure from which one appraisal well was drilled in the fourth quarter of 2005 and confirmed the eastern extension of the field. A horizontal well for an extended well test was drilled in the first quarter of 2006. The Corporation plans to develop the field as a satellite to the Adanga Platform with full production expected in 2007.

Other Producing Fields (Akam, Bogi, Mimbo and Ukpam)

The Akam, Bogi, Mimbo and Ukpam fields were discovered in and have been producing since the 1980s. For the first three months of 2006, combined producing from these fields averaged of 1,600 bbls/d of oil from eight deviated and horizontal wells. Oil gravity ranges between 20 and 45° API. As at December 31, 2005, NSAI estimates gross proved reserves for these fields to be 2.3 mmbbls and gross proved plus probable reserves to be 5.5 mmbbls.

The Akam, Bogi, Mimbo and Ukpam fields are located in 10 to 40 m water depth and cover a combined area of approximately 2,090 acres (8.6 km²). The Corporation plans to drill one appraisal and one horizontal development well at Akam in mid 2007, with further drilling plans contingent on the outcome of this well. No further drilling activity or significant capital expenditures are planned for the remaining three fields.

Kita North

The Kita North field was discovered in 2005 and further appraisal and development plans are in progress. Kita North may be a significant discovery as it encountered a total of 100 ft of oil in a reservoir at a depth of 4,750 fts which tested at 1.0 mmbbls/d of 28° API gravity oil. As at December 31, 2005, NSAI estimates gross proved reserves for Kita North to be 7.0 mmbbls and gross proved plus probable reserves to be 9.2 mmbbls.

Unappraised Discoveries and Exploration

In addition to the existing fields, there are five unappraised discoveries in OML123 which are the Oron gas discovery drilled in 1975, the Inagha, Adanga West and Ebughu NE-A oil discoveries drilled in 2002 and the Adanga East oil discovery drilled in 2005.

The Corporation has concluded an in-depth study of the remaining exploration potential of OML123 based upon full 3D seismic survey and existing well data. The study classed the remaining exploration potential into near field potential clusters, which can be drilled from or which are readily accessible to existing production facilities, and prospect clusters which may require additional platforms and pipelines to connect to existing facilities. Each cluster contains multiple prospects. Four near field potential clusters and five prospect clusters were identified.

Presently, two of the exploration clusters (Inagha and Kita North) have been drilled, both of which discovered oil. The most recent discovery, Kita North, was the most productive. In addition, one of the near field potential clusters has been successfully drilled (Adanga East) and the results are being evaluated. Following on from the recent exploration success on Kita North, the Corporation plans to expand its exploration and appraisal drilling activity, subject to rig availability, including the Kita North area appraisal of the Oron gas discovery in 2006 and exploration of the Adanga North Graben and Antan prospect clusters in 2006 and 2007.

Budgeted Capital Expenditures

Capital expenditures for OML123 are budgeted to be \$443 million in 2006. The budgeted capital expenditures will fund significant infrastructure investment to sustain future production, including the replacement of the Knock

Taggart (scheduled to be completed in 2006) and the installation of a centralized gas gathering and gas lift facility (scheduled to be completed in 2007), as well as a two-rig drilling program that includes:

- the ongoing development of the Oron West and North Oron fields;
- the completion of a water injection project in the Adanga field;
- infill and extension drilling in the Adanga and Ebughu fields; and
- appraisal drilling in the Adanga North field and the recently discovered Kita North area.

These expenditures are expected to increase production from approximately 46 mbbbls/d in 2005 to approximately 53 mbbbls/d in 2006. Addax Petroleum believes the prospective oil resources in OML123 provide the Corporation with the opportunity to sustain a sizeable capital expenditure program in OML123 for the near and medium term.

The Corporation estimates the total cost through 2007 of the proposed project to supply natural gas to the power plant at Calabar to be \$136 million. Of the total estimated capital expenditure for the proposed project, the Corporation estimates that \$68 million relates to the provision of gas gathering and gas lift infrastructure for associated gas. This \$68 million is included in budgeted capital expenditures and will be the direct responsibility of the Corporation to fund but will be recoverable under the terms of the OML123/124 PSC. The balance of the total initial investment of \$68 million is related to non associated gas production facilities. The Corporation is currently negotiating a gas sales price with NNPC.

OML124

Overview

OML124 is the Corporation's smallest producing property as measured by reserves and production. Oil gravity ranges between 29° and 48° API. With the exception of a one week long stoppage to production during September 1999, there has been no unplanned disruption to production from OML124. As at December 31, 2005, NSAI estimates gross proved reserves for OML124 to be 9.7 mmbbls and gross proved plus probable reserves to be 12.8 mmbbls. The Corporation expects production from OML124 to average approximately 4 mbbbls/d in 2006 and 5 mbbbls/d in 2007.

OML124 is located onshore in Imo State, approximately 100 km north of Port Harcourt, and covers an area of 74,100 acres (300 km²) on the northeast edge of the Niger Delta. OML124 contains two producing fields, Ossu and Izombe, the latter extending as the Jisike field to the southeast into the adjacent OML53 held by the Chevron/NNPC joint venture. OML124 also contains ten exploration prospects the most attractive of which is Okaka prospect in the southeast part of the property. Total capital expenditures for OML124 are budgeted to be \$24 million in 2006.

Production and Reserves

The following table summarizes the production and reserves in OML124.

<u>Field</u>	<u>Average Oil Production</u>		<u>Gross Oil Reserves⁽¹⁾</u>		
	<u>3 Months Ended</u>	<u>2005</u>	<u>Proved</u>	<u>Probable</u>	<u>Possible</u>
	<u>March 31, 2006</u>	<u>2005</u>	<u>(mmbbls)</u>	<u>(mmbbls)</u>	<u>(mmbbls)</u>
Izombe.....	<u>1,730</u>	<u>1,750</u>	<u>5.7</u>	<u>1.9</u>	<u>10.0</u>
Ossu.....	<u>1,640</u>	<u>1,740</u>	<u>4.0</u>	<u>1.2</u>	<u>5.3</u>
Total.....	<u>3,370</u>	<u>3,490</u>	<u>9.7</u>	<u>3.1</u>	<u>15.3</u>

Notes:

- (1) Proved and probable reserves as at December 31, 2005 as reported in the NSAI Reserve Report under "Forecast Prices and Costs Case".

Production Facilities

The Ossu and Izombe fields are operated as a common production area. Production facilities include the Izombe Flow Station, gas compressors, water injection pumps and three flow lines from Ossu to the Izombe Flow Station. The Corporation has an agreement with a Chevron/NNPC joint venture whereby crude oil produced from the Chevron/NNPC Jisike field is processed at the Izombe Flow Station in return for the payment of a tariff to Addax Petroleum. The Ossu, Izombe and Jisike crudes are all processed at the Izombe Flow Station and transported via an

export pipeline to Ebocha. From Ebocha, the oil is transported through the Agip/NNPC joint venture's pipeline to their Brass River Terminal.

At the present time some of the associated gas being produced with the oil from OML124 is re-injected to aid oil production and the remainder is flared. The Corporation together with a consortium of private Nigerian investors, is contemplating the construction of an LPG facility and an export terminal. The Corporation is completing detailed design studies relating to the supply of gas to and construction of this LPG facility which would be located adjacent to the existing Izombe Flow Station. This project requires a supply of a total of 40 mmcf/d of associated and non-associated gas from the Ossu and Izombe fields. The LPG plant is expected to produce approximately 75 t/d of propane, 75 t/d of butane and 1 mbbbls/d of condensate and approximately 35 mmcf/d of residue lean gas. The liquids products will be trucked and the residue lean gas will be sold to a local power generation plant. The Corporation expects that the condensate would be blended with oil at the Izombe Flow Station for export. Depending on prices butane and some blended propane would either be marketed locally or exported. The Corporation is negotiating a gas sales contract with NNPC.

Fields

Izombe

The Izombe field, discovered in 1974 and producing since 1975, is Addax Petroleum's principal producing field in OML124. In the first three months of 2006, Izombe produced an average of 1,730 bbls/d with an average watercut of 87 per cent. Oil gravity ranges between 35° and 40° API. As at December 31, 2005, NSAI estimates gross proved reserves for the Izombe field to be 5.7 mmbbls and gross proved plus probable reserves to be 7.6 mmbbls.

The Izombe field is located in a relatively densely populated dry land area covered by farmlands, shrubs and secondary rain forest, at an elevation of 45 to 60 m above mean sea level, and covers an area of approximately 1,600 acres (6.4 km²) in the southern part of OML124. In 2006, the Corporation plans to drill an oil production well in the Izombe field.

Ossu

The Ossu field was discovered in 1973 and has been producing since 1976. In the first three months of 2006, Ossu produced an average of 1,640 bbls/d with an average watercut of 85 per cent. Oil gravity ranges between 29° and 48° API. As at December 31, 2005, NSAI estimates gross proved reserves for the Ossu field to be 4.0 mmbbls and gross proved plus probable reserves to be 5.2 mmbbls.

The Ossu field is located approximately 4 km to the west of the Izombe field at an elevation of 25 m above mean sea level in a drowned river valley affected by seasonal flooding which limits the access to the field during the rainy season. The field covers an area of approximately 2,300 acres (9.3 km²) in the south western part of OML124. The Corporation plans to drill two production wells and work over two existing oil production wells in the Ossu field in 2006.

Unappraised Discoveries and Exploration

In 2002, the Corporation concluded a comprehensive acreage and prospect evaluation study based on 3D and 2D seismic surveys and existing well data. Several prospects with possible commercial potential were identified in the north eastern sector of OML124. The Corporation intends to drill the Okaka exploration prospect in 2007, which will be the first exploration well to be drilled by the Corporation in OML124.

Budgeted Capital Expenditures

Total capital expenditure budgeted for OML124 is \$24 million for 2006. In addition to its budgeted capital expenditures for 2006, the Corporation estimates the total investment to complete the contemplated LPG project would be \$110 million of which \$50 million would be incurred by Addax Petroleum to supply feed gas and \$60 million would be incurred by Addax Petroleum and by other private sector investors to fund the construction of the Izombe LPG plant and the export terminal. It is expected that private sector investors would hold a 60 per cent interest in the LPG plant and the export terminal and the Corporation would hold the remaining 40 per cent interest. The LPG plant would be constructed and initially operated by Addax Petroleum and the export terminal would be operated by a third party. The Corporation intends to make a final investment decision regarding the LPG project in the third quarter of 2006. If the Corporation decides to proceed, it expects the plant to be operational in 2008. The Corporation estimates its total share of the capital investment would be approximately \$74 million of which \$25 million is expected to be spent by the Corporation in 2006 with the balance of \$49 million to be spent in 2007. Of the Corporation's capital expenditure, the \$50 million incurred to supply feed gas would be recoverable over a five year period under the terms of OML123/124 PSC.

OPL90 and OPL225

Overview

OPL90 and OPL225 are two contiguous blocks which represent Addax Petroleum's largest Nigerian properties as measured by area and also account for the majority of the Corporation's recent production growth with production from OPL90 commencing in March 2005. In the first six months of 2005, OPL90 produced an average of 26,660 bbls/d of oil. Oil gravity ranges between 35° and 38° API. As at December 31, 2005, NSAI estimates gross proved reserves for OPL90 to be 24.0 mmbbls and gross proved plus probable reserves to be 40.0 mmbbls. The Corporation expects production from OPL90 and OPL225 to average approximately 28 mmbbls/d in 2006 and 41 mmbbls/d in 2007.

OPL90 and OPL225 are located 90 km offshore south of Port Harcourt, close to the edge of the continental shelf, in water depths ranging between 50 and 210 m and cover a combined area of 327,200 acres (1,324 km²). The southern half of OPL90 has been completely surveyed by 3D seismic and contains two producing oil fields (Okwori and Nda), three undeveloped oil discoveries and four exploration prospects. OPL225 was surveyed by 870 km² of 3D seismic in early 2006 and it contains one undeveloped oil discovery, several non-commercial gas discoveries and a number of shallow and deep leads. Total capital expenditures for OPL90 and OPL225 are budgeted to be \$304 million in 2006.

Production and Reserves

The following table summarizes the reserves and production in OPL90 and OPL225.

<u>Field</u>	<u>Average Oil Production</u>		<u>Gross Oil Reserves⁽¹⁾</u>		
	<u>3 Months Ended March 31, 2006</u>	<u>2005</u>	<u>Proved</u>	<u>Probable</u>	<u>Possible</u>
	(bbls/d)	(bbls/d)	(mmbbls)	(mmbbls)	(mmbbls)
Okwori.....	23,220	11,810	17.2	13.0	7.0
Nda.....	3,440	2,860	6.8	3.1	9.3
Total.....	26,660	14,670	24.0	16.0	16.3

Note:

- (1) Proved and probable reserves as at December 31, 2005 as reported in the NSAI Reserve Report under "Forecast Prices and Costs Case".

Production Facilities

The Okwori and Nda fields in OPL90 are operated as a common development area. Individual wells in each field are connected to the FPSO Sendje Berge by individual sub-sea flow lines. At the OPL90 FPSO, crude oil is processed to export specifications, stored and offloaded directly to ocean going tankers.

The OPL90 FPSO has a nameplate processing capacity of 38 mmbbls/d of crude oil, a total liquids (oil and water) processing capacity of 60 mmbbls/d and a storage capacity of approximately two mmbbls of crude oil. The OPL90 FPSO is under a time charter from Sendje Berge Ltd., a company within the Norwegian shipping group Bergesen now owned by Worldwide Shipping of Hong Kong. The term of the charter expires in February 2009, with extension periods of up to an additional four years at the Corporation's option.

The production facilities at OPL90 have been designed to accommodate additional production from future satellite developments, should planned exploration drilling result in commercial oil discoveries. The Corporation anticipates that throughout 2006 and into 2007 there will be continuous drilling and well hook-up activity on the property.

The Corporation believes that the known associated gas resource on OPL90 is insufficient to justify commercial development. To cease flaring on OPL90, Addax Petroleum has proposed to NNPC to construct a gas gathering pipeline from the OPL90 FPSO to a new gas trunk line to be built by an adjacent operator. The associated gas would be sold to this operator. Construction of the gas gathering pipeline is expected to take place in 2007 or 2008. The capital expenditures for the gas gathering pipeline will be funded by Addax Petroleum.

Fields

Okwori

The Okwori field, discovered in 1972 and appraised in 1973 by Occidental, was further appraised in the mid-1990s by Ashland and declared commercial in 1996. Addax Petroleum began development of the Okwori field in July 2004 and commenced production from the Okwori field in March 2005. For the first three months of 2006, the Okwori field produced an average of 23,220 bbls/d of oil with an average watercut of 4 per cent. Oil gravity ranges between 35° and 38° API. As at December 31, 2005, NSAI estimates gross proved reserves for the Okwori field to be 17.2 mmbbls and gross proved plus probable reserves to be 30.2 mmbbls.

The Okwori field is located in 110 to 150 m water depth and covers approximately 2,700 acres (11 km²) in the southern part of OPL90. As of the end of June 2006, eight production wells have been successfully drilled and tied in to the FPSO on the Okwori field. All wells have been fitted with downhole expandable sand screens designed to exclude the production of sand dislodged from reservoir rock that may occur.

When the OPL90/225 PSC was awarded to Addax Petroleum in 1998, Total, which held a 50 per cent farm-in interest in Ashland's Production Sharing Contract, was given an option to retain a 50 per cent interest in the area. This option was replaced by a reimbursement agreement between Total and Addax Petroleum dated October 24, 2000, whereby Total is entitled to an eight per cent net profit interest in only the Okwori field.

Nda

The Nda field was discovered by Addax Petroleum in July 2004. For the first three months of 2006, the Nda field produced an average of 3,440 bbls/d of oil with no watercut. As at December 31, 2005, based on the Nda-1 well results, NSAI estimates gross proved reserves for the Nda field to be 6.8 mmbbls and gross proved plus probable reserves to be 9.8 mmbbls.

In January 2006, Addax Petroleum finished drilling the second well in the Nda field ("Nda-2"), approximately 650 m from Nda-1 with the purpose of further delineating the Nda field reserves and finalizing the Nda field development plan. Nda-2 was drilled up-dip of Nda-1 and encountered oil in the same three stacked reservoirs. Addax Petroleum expects that the January 2006 drilling results for Nda-2 will result in the recategorization of proved, probable and possible reserves for the Nda field and in the addition of reserves in all three categories. The recent drilling results for Nda-2 were not available for review by NSAI in connection with the preparation of the NSAI Reserve Report and therefore are not reflected in the NSAI Reserve Report.

The Nda field is located adjacent to the Okwori field in a similar water depth and covers approximately 250 acres (1 km²) in the southern part of OPL90. The Nda field is presently producing from one well under an extended well test before additional development wells are expected to commence production in the second half of 2006.

Unappraised Discoveries and Exploration

In addition to the Okwori and Nda fields, there have been three further uneconomic oil discoveries by previous operators, of which the most significant well was drilled in 1972 in OPL225 and tested at 6.1 mbbls/d of oil. Natural gas was also encountered in two of the oil discoveries. Addax Petroleum commenced its exploration on OPL90 and OPL225 in 2004 by drilling one exploration commitment well in each lease. The exploration well drilled by the Corporation in OPL225 found two small accumulations of non-associated gas. The exploration well drilled by the Corporation in OPL90 discovered the Nda field as discussed above.

During 2006, Addax Petroleum intends to undertake a concerted exploration and appraisal campaign. On OPL90 three exploration and appraisal wells are budgeted in 2006 on the Okporo, Nda West and Nkelu Deep structures, all of which offer tie-back development opportunities to the OPL90 FPSO. On OPL225, the Corporation processed a 870 km² 3D seismic survey during early 2006 and will look to identify further exploration drilling opportunities.

Budgeted Capital Expenditures

Capital expenditures on OPL90 and OPL225 are budgeted to be \$304 million in 2006. These expenditures are expected to increase production from approximately 15 mbbls/d in 2005 to approximately 28 mbbls/d in 2006. The budgeted capital expenditures will fund a one-rig drilling program in OPL90 and OPL225 that includes:

- completion of development drilling in the Okwori field;
- development drilling in the Nda field and tie back to the OPL90 FPSO; and
- seismic data acquisition and drilling of three exploration wells.

Additionally, the Corporation estimates that the total cost to construct the proposed gas gathering pipeline will be \$35 million to be spent before mid 2008.

Okwok Property

Overview

The Okwok Property is located approximately 45 km off the Nigeria coast in 35 to 50 m water depth due south of the town of Calabar. The Okwok Property is within ExxonMobil's licence area OML67, immediately to the south of OML123.

In late 2000, the governments of Nigeria and Equatorial Guinea concluded a maritime boundary treaty that removed 62 km² from an Oil Mining Lease held by Oriental Energy that became part of Equatorial Guinea's Block B, the main beneficiary of which was ExxonMobil. Oriental Energy successfully petitioned the Nigerian government for compensation and in October 2001 the Nigerian government approved a compensation area for Oriental Energy in ExxonMobil's OML67 that included the Okwok Property.

In September 2005, Addax Petroleum entered into the Oriental Joint Venture Agreement pursuant to which the Corporation agreed to acquire a 40 per cent interest in the Okwok Property and will conduct operations in its capacity as technical advisor. The Oriental Joint Venture Agreement became effective once the farm-in agreement between Oriental Energy and ExxonMobil was signed by the two parties and government approval was received in July 2006. Pursuant to the Oriental Joint Venture Agreement, Addax Petroleum has made a cash payment of \$35 million to Oriental Energy and will initially fund all capital and operating costs. During the cost recovery period, the Corporation will be entitled to 80 per cent of production from the Okwok Property until all capital costs have been recovered by the Corporation after which Addax Petroleum and Oriental Energy will be entitled to their pro rata share of production. As broker of the Oriental Joint Venture Agreement, Sovereign Oil & Gas Company II LLC will receive an overriding royalty interest of one per cent of all production from the Okwok Property.

Production and Reserves

There has been no production to date and no reserves booked from the Okwok Property.

Production Facilities

Addax Petroleum believes that there are significant synergies for the Okwok Property and OML123 as the Okwok Property will be developed using production, storage and offloading facilities on the OML123 FPSO vessel approximately 12 km to the north. Facility sharing in this manner will allow the Corporation to develop the Okwok Property in a cost effective manner while also benefiting unit operating costs at OML123.

Field Description

The Okwok Property was discovered in 1967 by Mobil, with the first well encountering a gross oil bearing interval of approximately 70 ft in two main zones. The second well was drilled in 1968 to appraise a fault block to the east of the discovery well and encountered a gross oil bearing interval of approximately 150 ft. Two further wells have been drilled in the immediate area, the most recent of which was drilled by Oriental Energy and ConocoPhillips in 1993. Both of these wells were drilled on the edge of the main Okwok Property structure and while they only encountered minimal hydrocarbons they are useful in assisting to delineate the structure. None of the wells have been production tested. The Okwok Property has been surveyed by two 3D seismic surveys, the most recent of which was in 2004. Addax Petroleum and Oriental Energy plan to drill up to three appraisal wells with the GSF High Island IX drilling rig, commencing in July 2006, to confirm the commercial potential of the field. A successful appraisal program will be followed by field development operations.

Budgeted Capital Expenditures

The development of the Okwok Property commenced in 2006 and the Corporation's capital expenditures are budgeted to be \$81 million in 2006, including the farm in fee of \$35 million paid by Addax Petroleum to Oriental Energy. The remainder of the budgeted capital expenditures will fund the drilling of three appraisal wells and development planning studies. Subject to appraisal drilling results, the Corporation anticipates the Okwok Property to be developed using a central production processing platform and two satellite wellhead platforms connected by pipelines to the OML123 FPSO. The Corporation's development plan anticipates first oil from the Okwok Property as early as 2008.

Oil Sales Arrangements

ABV purchases the Corporation's entitlement of crude oil from OML123, OML124 and OPL90 pursuant to the Crude Oil Supply Agreements.

Crude oil produced from OML123 is exported from the Antan Terminal and sold as Antan Blend. The Antan Blend includes oil delivered by the OML114 Parties. The Antan Blend may, in the future, include oil production from the Okwok Property in the event that it is developed by Addax Petroleum.

Crude oil produced from OML124 is transported by pipeline to the Brass River Terminal and commingled with crude oil from several third party oil fields. The resulting blend, known as Brass River Blend, is exported and sold at international prices.

Crude oil produced from OPL90 is exported from the Okwori Terminal and sold as Okwori Blend.

Addax Petroleum Crude Oil Premium/(Discount) to Brent Crude (Volume Weighted)⁽¹⁾

	3 Months Ended March 31, 2006	Year Ended December 31,		
		2005	2004	2003
Sales and Marketing Volumes (mmbbls)				
Antan Blend ⁽²⁾	4.2	17.3	13.0	11.8
Brass River Blend	0.2	1.2	1.3	2.2
Okwori Blend	2.2	4.5	-	-
Dated Brent Crude Price (\$/bbl)	61.75	54.38	38.22	28.84
Addax Petroleum Average Realized Prices (\$/bbl)				
Antan Blend ⁽²⁾	57.14	50.71	36.56	27.49
Brass River Blend	62.81	54.82	39.37	29.10
Okwori Blend	63.56	60.23	-	-
Premium/(Discount) to Brent Crude (\$/bbl)⁽¹⁾				
Antan Blend ⁽²⁾	(4.90)	(3.84)	(1.88)	(1.27)
Brass River Blend	0.90	0.27	0.49	0.39
Okwori Blend	1.91	1.04	-	-

Notes:

- (1) Premium/(Discount) to Brent Crude are reported on a volume weighted basis for both the crude in question and Brent Crude, whereas Dated Brent Crude prices are reported as averages of monthly values for the period. Accordingly, the difference between the reported average realized petroleum prices and Dated Brent Crude prices may not correspond to the Premium/(Discount) to Brent Crude.
- (2) The API gravity of the Antan Blend is dependent on the proportional mix of crudes at any time. Where future individual oil field developments have lower API gravities than the current API gravity of the Antan Blend, then the API gravity of the Antan Blend may be reduced at that time.

Property Boundaries

Under the International Court of Justice ruling of October 2002, the Disputed Area includes a small part of OML123 (8,400 acres, 33.9 km²). The Joint Border Commission which was set up by the governments of Nigeria and Cameroon to study the implications of the ruling has not yet reached a decision about how the Corporation's operations will be treated. The Disputed Area has been excluded from the acreage and property descriptions in this prospectus. Reserves presented in this prospectus exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.2 mmbbls.

In 2003, in accordance with the terms of the OPL90/225 PSC, Addax Petroleum was required to relinquish 50 per cent of the area of OPL90 and OPL225, excluding areas in which petroleum had been discovered in commercial quantities. The Corporation held discussions in 2003 and 2004 with NNPC regarding the acreage to be relinquished but no formal agreement has been concluded. The area proposed for relinquishment for OPL90 and OPL225 has been excluded from the acreage, property descriptions and reserve and resource estimates in this prospectus except as otherwise stated.

Discussions were also held with NNPC in the same period with regard to the same provisions in the OML123/124 PSC. By certificates issued by NNPC in April 2003, the existing OPL98 and OPL118 were converted into OML123 and OML124 with effect from July 2002. The Corporation has received advice from Nigerian counsel that

the formal grant of OML123 and OML124 supersedes these discussions but that further relinquishment will be required on the tenth anniversary of their July 2002 effective date.

Joint Development Zone

Overview

In 2001, Nigeria and the Democratic Republic of Sao Tome and Principe signed a formal treaty for the joint development of petroleum and other resources in the overlapping area of their respective maritime boundary claims. The treaty established the Joint Development Zone and an administrative body, the Joint Development Authority, to oversee the implementation of the treaty and underlying development plan.

The first licensing round for the JDZ was announced in April 2003 from which the first Production Sharing Contract was signed in February 2005 for Block 1. The successful consortium to develop Block 1, which paid a signature bonus of \$123 million, included Chevron (51 per cent and operator), ExxonMobil (40 per cent) and Dangote Energy Equity Resources (nine per cent). Chevron completed their first well in Block 1 in March 2006. A second licensing round for the JDZ was announced in November 2004 which made an additional 5 blocks available to potential investors. The results of the second licensing round were announced in May 2005, with the successful bidders including such companies as Anadarko (awarded 51 per cent of Block 3), Noble Energy Inc. and ERHC Energy (jointly awarded 60 per cent of Block 4) and Devon Energy and Pioneer Natural Resources (jointly awarded 65 per cent of Block 2).

Description

The JDZ lies in the Gulf of Guinea which is one of the most prolific hydrocarbon regions in the world. Intensive exploration efforts over the last 35 years in and around the Niger Delta, in particular, have led to a succession of large discoveries, notably the Bonga, Agbami/Ekoli and Akpo discoveries in Nigeria and Zafiro and Alba in Equatorial Guinea. The JDZ covers an area of 34,548 km² with water depths ranging from approximately 1,500 m in the northern part of the JDZ to over 3,500 m at its south western sector.

Modern seismic data and improved models of sand distribution indicate that in places prospective acreage can extend up to 300 km from the coastline of Nigeria. Extensive regional 2D and 3D seismic data shot by a number of seismic contractors provide a high quality regional dataset that has provided insight into the region's geological character.

JDZ Properties

During 2005 and 2006, Addax Petroleum built a prominent equity position in the JDZ which includes: (i) a 38.3% participating interest in Block 4; (ii) a 15% participating interest in Block 3; and (iii) a 14.33% participating interest in Block 2. Production Sharing Contracts for all three blocks were signed with the JDA in March 2006. Addax Petroleum is the operator of Block 4 and while Anadarko is the operator of Block 3 and Sinopec is the operator on Block 2.

A summary of the Corporation's holdings in this highly prospective region together with various payments and obligations is provided in the following table.

Block	Net Acres (acres)	Addax Petroleum's Participating Interest (%)	Operator	Payments by Addax Petroleum		Partner's Interest Carried by Addax Petroleum (%)	Minimum Work Program to be Funded by Addax Petroleum (\$ million)
				Signature Bonuses (\$ million)	Acquisition Payments (\$ million)		
2	24,500	14.33	Sinopec	8.3	6.8	7.33	6.1
3	24,700	15.00	Anadarko	2.0	7.5	10.00	7.5
4	<u>81,100</u>	38.30	Addax Petroleum	<u>28.4</u>	<u>28.0</u>	17.70	<u>29.7</u>
Totals	<u>130,300</u>			<u>38.7</u>	<u>42.3</u>		<u>43.3</u>

In June 2005, the Joint Development Authority announced that Block 4 would be awarded to ERHC Energy/Noble Energy JDZ (60 per cent), Conoil p.l.c. (20 per cent), Hercules Oil Ltd./Centurion Energy (10 per cent), Godsonic Oil Co. (5 per cent) and Overt Ventures Ltd. (5 per cent). The winning bid provided for a signing bonus of \$90 million and a minimum work program of three exploration wells or a minimum expenditure of \$53 million. In October 2005, Noble Energy announced that they were withdrawing from the ERHC Energy/Noble Energy JDZ

consortium. Addax Petroleum entered into a participating agreement with ERHC Energy in November 2005 pursuant to which Addax Petroleum became entitled to a 33.3 per cent participating interest in Block 4 and replaced Noble Energy JDZ as operator for the consortium. The participation agreement with ERHC also required that Addax Petroleum pay \$18 million to ERHC, commit to carry the costs associated with an ERHC interest of 17.7 per cent in Block 4 and assume its own portion of the minimum work program. In March 2006, the Corporation announced that it, together with its co-venture partners, signed a PSC with the JDA. Further, in April 2006, Addax Petroleum increased its participating interest in Block 4 to 38.3 per cent by acquiring the 5 per cent participating interest held by Overt Ventures Ltd.

In March 2006, Addax Petroleum signed a PSC with the JDA and a participating agreement with ERHC relating to Block 3 of the JDZ where a subsidiary of Anadarko is the operator. Under the participation agreement with ERHC, Addax Petroleum, received a 15 per cent participating interest in Block 3 in return for the payment of \$7.5 million and a commitment to carry the costs associated with an ERHC interest of 10 per cent in the block. The PSC for Block 3 includes a minimum work program of one exploration well or a minimum expenditure of \$30 million.

Also in March 2006, the Corporation signed a PSC with the JDA and a participating agreement with ERHC relating to Block 2 of the JDZ where Sinopec is the operator. Under the participation agreement with ERHC, Addax Petroleum, received a 14.33 per cent participation interest in Block 2 in return for the payment of \$6.8 million and a commitment to carry the costs associated with an ERHC interest of 7.33 per cent in the block. The PSC for Block 2 includes a minimum work program of one exploration well or a minimum expenditure of \$28 million.

Cameroon

Ngosso Property

In December 2002, Addax Petroleum, together with Tullow Oil, signed the Ngosso Concession with the Government of Cameroon for the Ngosso Property. Addax Petroleum is the operator of the Ngosso Property, with a 60 per cent working interest. The Ngosso Concession has an initial term of three years with a minimum work commitment of 200 km² of 3D seismic and the drilling of two exploration wells. The Ngosso Concession can be renewed twice for an additional two years per renewal.

The Ngosso Property is located in the hydrocarbon prone Rio del Rey Basin, western offshore Cameroon and covers 117,100 gross acres (474 km²). To the east, north and west, the Ngosso Property has a common border with two concessions operated by Total and with four open acreage areas. To the south, the Ngosso Property is bordered by two concessions operated by Total and by Shell and by open acreage. The Ngosso Property lies adjacent to the shore in water depths of up to eight m. It has similar operational and subsurface geological conditions to the Corporation's OML123, located approximately 20 km to the west. The Ngosso Property contains several hydrocarbon discoveries but has not seen any exploration activity for more than 20 years.

The Ngosso Concession's initial three year exploration period officially started in April 2004 but the Cameroonian government has indicated that it is prepared to extend the initial permit by one year in compensation for the delays incurred and official confirmation is awaited. The Government of Cameroon has confirmed that the cost of work incurred prior to the Ngosso Concession's effective date will be recognized for tax and other purposes under the Cameroon Concession.

Until recently, Addax Petroleum has not been able to access part of the Ngosso Property, including the western prospective zone, due to the Nigeria — Cameroon border dispute. The Ngosso Property itself was not part of the disputed territory, but operations require access to the southern part of the Bakassi Peninsula. The Joint Border Commission between Cameroon and Nigeria had set April 2004 as the period for the transfer of power to a new Cameroonian civil administration for the Bakassi Peninsula, and this should have allowed the Corporation to commence operations in the western part of the Ngosso Property by that date. The power transfer process was essentially completed in early 2006 which then allowed the Corporation to conduct a seismic acquisition program. In March 2006, Addax Petroleum completed 213 km² of 3D seismic acquisition and will perform a detailed evaluation of the seismic data over the balance of this year. Addax Petroleum intends to drill two commitment wells in the first half of 2007, subject to rig availability, based on the six prospects and leads identified to date.

On June 12, 2006, the presidents of Nigeria and Cameroon signed an agreement which provides for the withdrawal of Nigerian troops within 60 days from the Bakassi Peninsula, with a possible 30 day extension.

The Corporation's capital expenditures for Ngosso are budgeted to be \$14 million in 2006, primarily for the 3D seismic acquisition program and related evaluation.

Gabon

Kiarsseny Property

In January 2004, Addax Petroleum signed the Kiarsseny Agreement with Tullow Oil for the acquisition of 42.5 per cent of the Kiarsseny Production Sharing Contract for the Kiarsseny Property. Tullow Oil originally entered into the Kiarsseny Production Sharing Contract with the Government of Gabon in March 2003. In March 2004, Tullow announced that it had reduced its interest to 47.5 per cent through the farm-out of 10 per cent to Sonangol E.P.

The Kiarsseny Property covers an area of 1,345,000 gross acres (5,443 km²) and is located adjacent to shore in the Port Gentil Basin in water depths up to 800 m. It contains three oil discoveries and additional exploration potential. There are 2,643 km² of 3D seismic data, 18,750 km² of 2D seismic data and 25 wells in the Kiarsseny Property. The Port Gentil Basin contains a prolific hydrocarbon system. The majority of the producing reservoirs are sandstones with good porosities and permeabilities. Oil gravities from major oil fields vary from 20° to 47° API.

The Kiarsseny Production Sharing Contract is currently in its first exploration phase of four years, ending March 2007, and has a two well commitment. The first commitment well was drilled by Tullow Oil and Addax Petroleum in February 2004 to appraise the Topaze South structure and subsequently a side-track was drilled into the central Topaze compartment. The well failed to prove up sufficient reservoir development in both instances and was therefore abandoned. The second commitment well was drilled by Tullow Oil in late 2005. The well was unsuccessful as the results indicated likely compartmentalization of the structure which would make the development sub-commercial. The well has been plugged and abandoned. Going forward, any costs incurred in relation to a possible third well shall be borne by the parties in proportion to their participating interests.

An inventory of the remaining exploration potential of the block is currently being prepared by the operator following which an exploration target may be selected by the partners for a discretionary well to be drilled in 2006. The Corporation's capital expenditures for Kiarsseny is budgeted to be \$1 million in 2006.

Kurdistan Region of Iraq

Taq Taq Property

Overview

In July 2005, Addax Petroleum entered into the Genel Farm-in with Genel Enerji, a majority owned subsidiary of the Cukurova Holdings Group of Turkey, for a 30 per cent share of Genel Enerji's interest in the Taq Taq Production Sharing Agreement. The Taq Taq PSA provides Genel Enerji with the exclusive right to conduct petroleum operations in Taq Taq as contractor for the property. The Taq Taq field is located 60 kilometres northeast of the giant Kirkuk oil field and the adjacent city of Kirkuk and 80 kilometres northwest of the city of Sulaimaniyah. The gross field area of Taq Taq is approximately 169,000 acres (680 km²).

Genel Farm-in

Genel Enerji entered into the Taq Taq PSA with the Kurdistan Regional Government in January 2004. Under the Genel Farm-in, Genel Enerji has agreed to assign to Addax Petroleum a 30 per cent share of Genel Enerji's interest in the Taq Taq PSA. Under the terms of the Genel Farm-in Addax Petroleum is required to fund 100 per cent of an initial work program to a maximum aggregate cost of \$74 million and will pay to Genel Enerji an overriding royalty of 2.5 per cent of the production net of applicable royalties payable under the Taq Taq PSA, and after deduction of a total of \$50 million pre-funded by way of work program contribution and loan. See "Risk Factors".

Taq Taq License Area

The Taq Taq License Area is in the Zagros basin where large, elongated anticlines dominate. The field was discovered in 1978 by the drilling of the first well, which was drilled to a depth of approximately 4,000 m. The well was drilled on the crest of the structure and is reported to have tested oil at rates of up to 5,000 bbls/d. Test results indicate the presence of a gross oil column in excess of 470 m. The Cretaceous reservoir contains a high quality, light crude oil with gravity in excess of 47° API. The second Taq Taq well, drilled in 1978 close to the first well, was a shallow well and tested oil at a reported rate of 1,000 bbls/d at a depth of approximately 600 metres, with oil of a medium gravity (24° API). A third well was drilled in 1980 two kilometres southwest of the original well to test the flank of the structure. Results from the third well were inconclusive as the well was suspended due to technical difficulties.

The active wells on the Taq Taq License Area are currently producing approximately 1,200 bbls/d of oil on an intermittent basis. Continuous production is not always possible because of the lack of oil transportation trucks. Current production treatment facilities consist of two vertical oil and gas separators in series for two-stage separation, feeding

into an atmospheric oil storage facility consisting of three horizontal tanks. The current method of delivery is via daily tanker truck to a local small-scale oil refinery and a cement factory. All current oil production is provided to the local government under the terms of the Taq Taq PSA.

The first phase of development of the Taq Taq License area commenced in late 2005 and in early 2006, Addax Petroleum and Genel Energy completed a 270 km 2D seismic acquisition campaign to define the extent of the Taq Taq structure. Addax Petroleum and Genel Enerji then commenced drilling activities in the first jointly operated well in the Taq Taq License Area in May 2006. This well is scheduled to reach a targeted depth of approximately 2,250 m in the oil bearing Cretaceous Shiranish, Kometan and Qamchuga formations. This well is the first of a three well drilling program which Addax Petroleum and Genel Enerji commenced as part of the first phase of development and is in response to the urgent local energy requirements of the Kurdistan Region of Iraq and in fulfillment of a request from the regional authorities to expeditiously satisfy those needs. The objectives of the first phase of development are to establish and secure productive capacity of approximately 20 mbbbls/d as well as collecting subsurface data to prepare for future full field development.

Based on initial mapping of the Taq Taq structure, Addax Petroleum's preliminary range estimate of oil in place is approximately 900 mmbbls to 3,500 mmbbls with an expected target of 2,100 mmbbls. The completion of the three well drilling program in the first development phase is anticipated to confirm the commercial potential of the Taq Taq License Area. In the event that development proceeds to full commercial development Addax Petroleum expects that the Taq Taq License Area would require the construction of a pipeline for the export of oil production. Addax Petroleum and Genel Enerji, together with the Kurdistan Regional Government, are currently studying a proposed 255 km pipeline through the Kurdistan Region of Iraq which would permit the export of oil to Silopi in Turkey, for delivery to Ceyhan on the Mediterranean coast of Turkey. The proposed export pipeline would be subject to negotiation between Addax Petroleum and Genel Enerji and the Kurdistan Regional Government.

Capital expenditures for the Taq Taq Property are budgeted to be \$51 million in 2006. Under the terms of the Genel Farm-in, Addax Petroleum will fund all initial phase expenditures up to a maximum of \$74 million.

2006 Budgeted Capital Expenditures

The following table summarizes the Corporation's budgeted capital expenditures for 2006.

Existing Reserves/Licenses (Oil)	2006 (\$ Millions)				Total
	Drilling	Development Facilities & Other	Total Development & Drilling	Exploration & Other	
OML 123	\$120	\$292	\$412	\$31	\$443
OPL 90	\$141	\$100	\$241	\$63	\$304
OML124	\$18	\$6	\$24	-	\$24
Total Existing Reserves/Licenses	\$279	\$398	\$677	\$94	\$771
Prospective Resources					
JDZ (\$81 million acquisition costs)	-	-	-	\$104	\$104
Cameroon	-	-	-	\$14	\$14
Gabon	-	-	-	\$1	\$1
Total Prospective Resources	-	-	-	\$119	\$119
Contingent Resources					
Nigeria Gas	-	-	-	\$42	\$42
Taq Taq	-	-	-	\$51	\$51
Okwok (\$35 million acquisition costs)	-	-	-	\$81	\$81
Total Contingent Resources	-	-	-	\$174	\$174
Addax Petroleum Total	\$279	\$398	\$677	\$387	\$1,064

Other New Venture Opportunities

Addax Petroleum has exploration properties in Cameroon and Gabon, and may also pursue other opportunities as they arise in West African countries such as Guinea, Angola, Congo, Chad and Cote d'Ivoire, North African countries such as Algeria, Libya and Middle East countries such as Egypt, Iraq and Iran.

Fiscal Terms - Nigeria

Addax Petroleum's interests in OML123 and OML124 and OPL90 and OPL225 are governed by Production Sharing Contracts with NNPC. The Corporation's interest in the Okwok Property is governed by a Production Sharing Contract and is subject to the terms of the Oriental Joint Venture Agreement and the Nigerian Marginal Field Terms. See "Addax Petroleum — Properties and New Ventures Description — Nigeria — Okwok Property".

Production Sharing Contracts

In May 1998, the Corporation and NNPC entered into a Production Sharing Contract covering OML123 and OML124 and a Production Sharing Contract covering OPL90 and OPL225. These contracts are supplemented by the provisions of the *Petroleum Act*, and the regulations thereunder, and the *PPT Act*. The fiscal terms of the Production Sharing Contracts were modified by the terms of the letter entitled "Fiscal Regimes for Onshore and Shallow Offshore PSC", issued on November 21, 2001 by the Office of the Presidential Adviser on Petroleum and Energy with retroactive effect to January 1, 2000. Both of the Corporation's Nigerian Production Sharing Contracts have a term of 20 years expiring in May 2018.

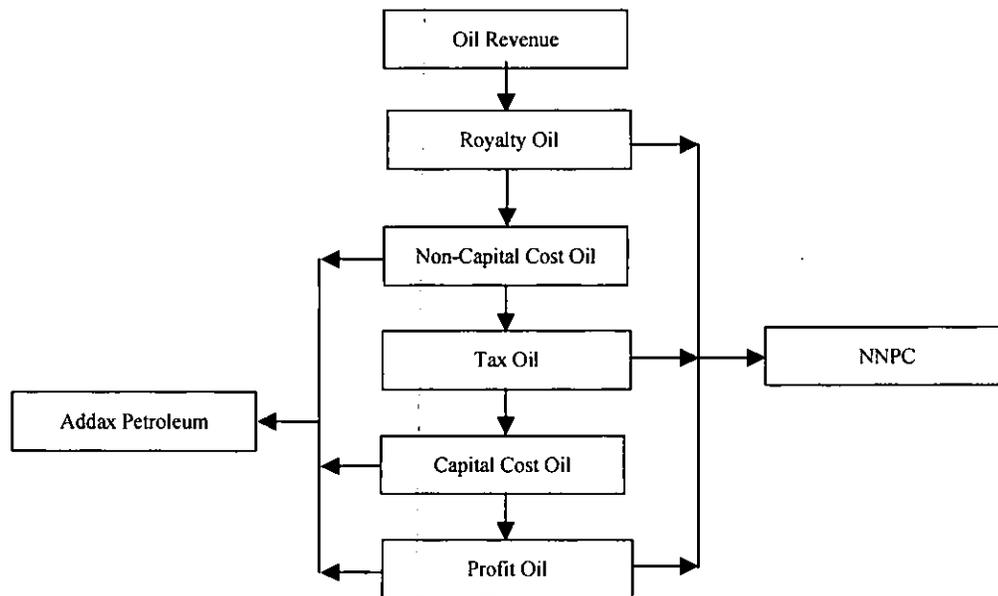

Under each of its Nigerian Production Sharing Contracts, Addax Petroleum bears the development and exploration risk for the properties concerned and funds all of the necessary capital expenditures. In return, the Corporation is entitled to sell sufficient oil to recover its capital expenditures and operating costs and to have a designated share of oil production remaining after the payment of royalties and taxes. Each of the Corporation's Nigerian Production Sharing Contracts impose minimum work obligations and Addax Petroleum has fulfilled the minimum work obligations. Taxation of each Production Sharing Contract is calculated independently of Addax Petroleum's other Production Sharing Contract and as a result, capital expenditure recovery is available to the extent of the profitability of the particular Production Sharing Contract on which the capital expenditures were incurred.

Oil produced under the Nigerian Production Sharing Contracts is notionally allocated to one of four categories in the following order.

1. Royalty Oil
2. Cost Oil
3. Tax Oil
4. Profit Oil

Royalty Oil and Tax Oil are allocated to NNPC while Cost Oil is allocated to Addax Petroleum. Profit Oil is shared between NNPC and Addax Petroleum. The Production Sharing Contracts provide for each party to lift and sell its oil entitlement, though NNPC can request that Addax Petroleum lift and sell on its behalf.

Allocation of Oil Production under the PSCs

The proportion of production that is designated for each of Royalty Oil, Cost Oil, Tax Oil and Profit Oil in a particular time period is influenced by oil prices, production levels, operating costs, capital expenditures and costs and allowances carried forward from previous periods in accordance with the terms of the Production Sharing Contracts. The fiscal terms have the effect of reducing the percentage of revenues paid as Tax Oil during periods of lower oil prices and increasing such percentage during periods of higher oil prices.

Royalty Oil is calculated on a field by field basis and varies with the field's production rate and the depth of water. For each level of the field's production a specific royalty rate is applied on an incremental sliding scale basis.

Water Depth	Royalty Oil Rates Field Range of Production (bbls/d)					
	<2,000	2,000-5,000	5,000-10,000	10,000-15,000	15,000-25,000	>25,000
	(%)	(%)	(%)	(%)	(%)	(%)
Onshore.....	5.0	7.5	15.0	20.0	20.0	20.0
<100.....	2.5	2.5	7.5	12.5	18.5	18.5
100-200.....	1.5	1.5	3.0	5.0	10.0	16.7

Royalty Oil is accounted for on a monthly basis.

Other levies include the payments to the NDDC levy, calculated as three per cent of budgeted operating costs and capital expenditures, and education tax, calculated as two per cent of assessable profit for Tax Oil (see below). These levies are paid in cash to the relevant Nigerian authority.

Cost Oil is allocated to Addax Petroleum in such an amount as to enable the recovery of all recoverable costs. The accounting procedure attached to the Production Sharing Contracts divides costs into two categories: non-capital costs and capital costs. Non-capital costs are expensed and include operating costs, a head office overhead allowance, interest on loans approved by NNPC, gas flaring charges, license fees, customs duties, intangible drilling costs, geological and geophysical surveys, exploration and appraisal drilling and funded abandonment provisions. Historically, under the Production Sharing Contracts, Addax Petroleum has recovered approximately 80 per cent of all drilling and seismic expenditures in the fiscal period in which they are incurred. Capital costs are depreciated over a five year period at 20 per cent straight-line starting in the year of first production, except for the fifth year which is depreciated at 19 per cent. All costs prior to the first lifting on a Production Sharing Contract are capitalized.

Maximum Cost Oil available is calculated as total production less Royalty Oil. Cost Oil is calculated on a monthly basis and any excess costs are carried forward to subsequent months or years.

Tax Oil is calculated after deducting Royalty Oil and Cost Oil. The calculation of Tax Oil is specified by the *PPT Act* and the applicable rate for the Corporation's Nigerian Production Sharing Contracts is 60 per cent. In the event that after the deduction of capital allowances and capital investment allowances the tax to be paid is zero, a 15 per cent tax charge is made on the taxable amount before the deduction of certain capital allowances and capital investment allowances. The accounting period for Tax Oil is a calendar year. Taxable profit is equal to revenue less royalties, non-capital costs, capital depreciation and an investment tax allowance. The investment tax allowance is calculated as an uplift of 40 per cent of offshore capital expenditures and 25 per cent of onshore capital expenditures.

The Corporation's Nigerian Production Sharing Contracts also contain a tax inversion penalty which is designed to encourage oil companies to contain operating costs. The tax inversion penalty for production rates less than 50 mbbbls/d is calculated at 25 per cent of operating costs in excess of \$7.50/bbl. For production rates more than 50 mbbbls/d, the tax inversion penalty is calculated at 25 per cent of operating costs above \$5.00/bbl.

Profit Oil is the oil remaining after deducting Royalty Oil, Cost Oil and Tax Oil. Profit Oil is shared between NNPC and Addax Petroleum on a sliding scale based on monthly production from the respective Nigerian Production Sharing Contracts. The varying allocations between NNPC and Addax Petroleum are applied on an incremental sliding scale basis.

Profit Oil Sliding Scale for the OML123/124 PSC

Monthly Average Production from OML123 and OML124 (mbbls/d)	NNPC Share (%)	Addax Petroleum Share (%)
<40.....	30	70
40 and <75.....	45	55
75 and <100.....	55	45
100.....	60	40

Profit Oil Sliding Scale for the OPL90/225 PSC

Monthly Average Production from OPL90 and OPL225 (mbbls/d)	NNPC Share (%)	Addax Petroleum Share (%)
<40.....	20	80
40 and <75.....	35	65
75 and <100.....	45	55
100.....	50	50

The following example illustrates how oil is allocated between the four categories under the Corporation's Nigerian Production Sharing Contracts. The example compares two scenarios each with annual revenues of \$200, annual operating costs of \$20 and no loss or allowances carried forward. For the purposes of the illustration, Royalty Oil is assumed to be levied at five per cent, NDDC levy at three per cent, education tax at two per cent, Tax Oil at 60 per cent and NNPC's share of Profit Oil at 30 per cent. The impact of capital expenditures of \$100 in Year 1 has an after tax and Profit Oil cash flow effect of only \$70 reduction in Year 1 and an increase of almost \$15 in the following four years such that the aggregate incremental cash flow reduction over the five year period is approximately \$10, assuming no revenue benefit arising from the investment. The following table has been included as an example only and actual results may vary materially.

	Without Capital Expenditure		With Capital Expenditure		
	Year 1	Years 2 to 5	Year 1	Years 2 to 5	
Tax Oil Computation:

Government Total	133.5	133.5	103.1	119.1

Between the commencement of its activities under the Nigerian Production Sharing Contracts until the end of 2003, Addax Petroleum lifted and sold all of NNPC's oil on their behalf but since the beginning of 2004, NNPC has lifted its entitlement. Under the Corporation's Nigerian Production Sharing Contracts, oil is valued based upon the appropriate "Realizable Price". The "Realizable Price" is equivalent to the Official Selling Price which is a price issued on a monthly basis by NNPC and is calculated by NNPC to equate to the prevailing international price in arms length transactions, taking into account the properties of each crude blend.

Nigerian Marginal Fields

The Okwok Property is subject to the provisions of the *Petroleum Act* and the regulations thereunder, and the *PPT Act*. The fiscal terms of Nigerian Marginal Fields are the subject of legislative proposals to encourage development. The Nigerian Marginal Fields comprise a number of ring-fenced fields located on concessions already awarded to joint ventures between international oil companies and NNPC and which have reserves booked to the Nigerian Department of Petroleum Resources and have remained un-produced for a period of over 10 years. The Nigerian Marginal Fields are assigned to indigenous Nigerian oil companies who conclude farm-in agreements with the joint ventures and can, in turn, farm-out to other operators.

The Nigerian Marginal Fields are subject to Royalty Oil and Tax Oil payable to government agencies.

The calculation of Royalty Oil and Tax Oil is discussed below.

Royalty Oil is calculated on a field by field basis and varies with the field's production rate and the depth of water. For each level of the field's production a specific royalty rate is applied on an incremental sliding scale basis.

Anticipated Royalty Oil Rates for the Okwok Property Field Range of Production (mbbls/d)

<u>≤2</u>	<u>2-5</u>	<u>5-10</u>	<u>10-15</u>	<u>15-25</u>	<u>25</u>
(%)	(%)	(%)	(%)	(%)	(%)
2.5	2.5	7.5	12.5	18.5	18.5

Royalty Oil is accounted for on a monthly basis and paid within 60 days of the end of the chargeable period.

Other levies include the payments to the NDDC levy, calculated as three per cent of budgeted operating costs and capital expenditures, and education tax, calculated as two per cent of assessable profit for Tax Oil (see below).

Tax Oil is calculated after deducting Royalty Oil and non-capital costs and capital costs. Non-capital costs are expensed and include operating costs, a head office overhead allowance, interest on loans approved by NNPC, gas flaring charges, license fees, customs duties, intangible drilling costs, geological and geophysical surveys, exploration and appraisal drilling and funded abandonment provisions. Capital costs are depreciated over a five year period at 20 per cent on straight-line basis starting in the first year of production. The calculation of Tax Oil is specified by the *PPT Act* and the applicable rate for the Nigerian Marginal Fields is anticipated to be 55 per cent. The accounting period for Tax Oil is a calendar year. Taxable profit is equal to revenue less royalties, non-capital costs, capital depreciation and an investment tax allowance. The investment tax allowance is calculated as an uplift of 10 per cent of capital expenditures for offshore fields where the water depth is less than 100 m.

In addition to the fiscal terms described above, Addax Petroleum's interest in the Okwok Property is subject to the terms and conditions of the Oriental Joint Venture Agreement. See "Addax Petroleum — Properties and New Ventures Description — Nigeria — Okwok Property".

Other Information Regarding Addax Petroleum Reserves

Generally, Addax Petroleum attributes proved undeveloped reserves in accordance with the CIM definitions. Undeveloped reserves are "those reserves expected to be recovered from known accumulations where a significant expenditure (e.g. when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves classification (proved, probable, possible) to which they are assigned". Proved undeveloped reserves specifically are based on the following items: test information obtained from various zones; well log response from behind pipe zones relative to the producing zones; and production and pressure performance information. Proved undeveloped reserves are assigned based on the field development plan as approved by NNPC and as programmed in the internal budget of Addax Petroleum over the next 2 years.

General capital expenditures are classified as proved undeveloped because by definition, significant investment implies the status of undeveloped. Since these investments are greater than the actual revenue generated by the proved undeveloped category, the proved undeveloped category results in a negative future net revenue, however, when coupled with the tax benefit calculated according to the production sharing contracts which affect all proved categories, the future net revenue for the proved undeveloped reserve category is positive.

FINANCING OF THE ACQUISITION

Addax Petroleum intends to finance the CDN\$1.605 billion cash purchase price of the Acquisition, the net debt of approximately CDN\$30 million to be assumed under the Acquisition and the fees and expenses related to the Acquisition, estimated to be CDN\$10 million, for a total of approximately CDN\$1.645 billion through a combination of all or some of (i) the net proceeds of this offering; (ii) cash from treasury (as at March 31, 2006, Addax Petroleum had cash on hand and short term investments totalling \$249 million); (iii) draw downs under the \$1.0 billion Revolving Credit Facility; and (iv) if required, a draw down under the \$450 million Term Credit Facility.

Acquisition Facility

For the purposes of financing the Acquisition, Addax Petroleum obtained commitments from certain Canadian chartered and non-Canadian chartered banks (collectively the "Lenders"), for a senior secured acquisition facility (the "Acquisition Facility") consisting of: (i) a committed revolving credit facility in the maximum principal amount of \$1.0 billion maturing 364 days from the closing of the Acquisition (the "Revolving Credit Facility"); and (ii) a committed term facility in the principal amount of \$450 million available to Addax Petroleum as a one-time draw on closing of the Acquisition to fund, if required, a portion of the purchase price payable by Addax Petroleum under the Acquisition and maturing six months from the closing of the Acquisition (the "Term Credit Facility").

The proceeds of the Acquisition Facility are to be used to fund in part the purchase price under the Acquisition, pre-pay in full all existing debt facilities of Addax Petroleum (on a consolidated basis after giving effect to the Acquisition) and for ongoing operating and working capital requirements and other general corporate purposes. Addax Petroleum intends to terminate the Credit Facility upon entering into definitive documentation with respect to the Acquisition Facility. In the event Addax Petroleum draws down on the Term Credit Facility it will be required to use its commercially reasonable efforts to issue debt and/or equity securities in order to generate sufficient proceeds to refinance (in whole) the amount outstanding under the Term Credit Facility and the Lenders will have the ability at any time from and after 135 days after the closing date of the Acquisition to cause Addax Petroleum to issue debt or equity securities on terms and conditions satisfactory to the Lenders in order to refinance (in whole) the amount outstanding under the Term Credit Facility.

The funding of the Acquisition Facility is subject to customary conditions and the execution of definitive documentation. Conditions to drawdown are expected to contain standard provisions, as well as a requirement that Addax Petroleum shall have a maximum ratio of total financial indebtedness to annualized consolidated earnings before interest, taxes, depreciation and amortization ("EBITDA"), a minimum ratio of EBITDA to total interest expense and a minimum current ratio.

Addax Petroleum anticipates that the definitive documentation for the Acquisition Facility will contain customary terms, conditions and covenants, including negative covenants with respect to incurring additional indebtedness and/or granting security or encumbrances over assets without the prior written consent of the Lenders. Addax Petroleum expects that the Acquisition Facility will contain restrictive covenants, which will limit the discretion of management with respect to certain business matters. These covenants are expected to place restrictions on, among other things, the ability of Addax Petroleum to incur financial indebtedness, to create liens or other encumbrances, to pay distributions or make certain other payments, investments, loans and guarantees and to sell or otherwise dispose of

assets and merge or consolidate with another entity. It is expected that the Acquisition Facility will be secured by a conventional security charging the material property and assets of Addax Petroleum. It is anticipated that APNV, Addax Petroleum Overseas Ltd., PanAfrican and, if Addax Petroleum uses a special purpose company to effect the Acquisition and to borrow funds under the Acquisition Facility, such special purpose company will be required to provide performance, payment and indemnity guarantees to the Lenders.

Addax Petroleum expects that it will be required to make certain mandatory repayments on any amounts drawn under the Acquisition Facility, including prepayment of any net proceeds from (a) any permitted asset disposals, (b) any insurance proceeds assigned to the Lenders in the event such proceeds are not committed for use to repair or replace assets, (c) any amount to be paid pursuant to a claim under the Arrangement Agreement or in respect of a due diligence report and (d) the Permanent Financing (defined below). It is the intention of Addax Petroleum and the Lenders that the Acquisition Facility will be refinanced by a permanent financing which may involve any combination of (i) senior secured bank financing, (ii) issuance(s) of straight or convertible bonds, notes or other debt and (iii) further issuances of equity (collectively a "Permanent Financing"). See "Risk Factors — Risks Related to the Acquisition".

CAPITALIZATION

The following table sets forth the consolidated capitalization of Addax Petroleum as at March 31, 2006, and as at March 31, 2006 after giving effect to the Offering and the Acquisition.

	<u>Authorized</u>	<u>Outstanding as at March 31, 2006</u>	<u>Outstanding as at March 31, 2006, After Giving Effect to the Offering and the Acquisition</u> ⁽³⁾⁽⁴⁾⁽⁵⁾⁽⁶⁾⁽⁷⁾
Debt⁽¹⁾			
Short term debt.....	—	\$0	\$0
Long term debt.....	—	\$0	\$900 million ⁽⁴⁾⁽⁵⁾
Total debt.....	—	\$0	\$900 million ⁽⁴⁾⁽⁵⁾
Share Capital⁽²⁾⁽⁵⁾			
Common Shares.....	Unlimited	\$391 million (140,100,100 shares)	\$691 million (153,100,100 shares)
Preferred Shares.....	Unlimited	\$0 (nil shares)	\$0 (nil shares)

Notes:

- (1) Pursuant to an Amended and Restated Senior Secured Reducing Revolving Credit Facility Agreement dated June 14, 2005 between Addax Petroleum N.V. and a syndicate of banks, Addax Petroleum N.V. has a \$300 million senior secured reducing revolving credit facility available until December 31, 2008. The borrowing base is determined semi-annually based upon an independent engineer's evaluation of the Corporation's oil and gas reserves, subject to the approval of the majority lenders. The facility borrowing base was set at \$300 million in October 2005. The loan bears interest at floating rates linked to LIBOR plus a margin determined in relation to the percentage of utilization on the first day of the interest period. The facility is secured by debentures given by Addax Petroleum N.V. and Addax Petroleum Overseas Ltd., assignment by way of security of the principal contracts including the offtake contracts, a pledge over the bank accounts and share pledges of Addax Petroleum N.V.'s principal subsidiaries. The loan is to be used for funding Nigerian capital expenditure.
- (2) Addax Petroleum's authorized capital consists of an unlimited number of Common Shares and an unlimited number of Preferred Shares, issuable in series. No series of Preferred Shares will be authorized at the closing of this offering.
- (3) The net proceeds to the Corporation from the offering of Subscription Receipts are estimated to be \$299,724,762 based on the issuance of 13,000,000 Subscription Receipts for aggregate gross proceeds of \$314,525,437 less the Underwriters' fee of \$12,581,017 and expenses of the offering estimated to be \$2,219,657. The net proceeds, gross proceeds, Underwriters' fee and expenses have been converted into U.S. dollars based on an exchange rate of CDN\$1 equals \$1.1263. Assumes no exercise of the Over-Allotment Option.
- (4) Assumes that the Acquisition has been completed and that the 13,000,000 Subscription Receipts have been converted into 13,000,000 Common Shares.
- (5) See "Financing of the Acquisition".
- (6) Assumes that \$873 million will be drawn under the Revolving Credit Facility, no amounts will be drawn down under the Term Credit Facility and CDN\$30 million (\$27 million) of net debt will be assumed by Addax Petroleum under the Acquisition and immediately repaid.
- (7) In June 2006, the Corporation's long term equity incentive plan was approved, pursuant to which an aggregate of 7,500,000 Common Shares may be issued and pursuant to which the Corporation currently has reserved for issuance an aggregate of 609,500 Common Shares. Does not assume the issuance of any Common Shares under the Corporation's long term equity incentive plan.

DIVIDENDS

Addax Petroleum intends to establish a policy of declaring quarterly cash dividends on the Common Shares. The payment and the amount of dividends declared in any fiscal quarter will depend on Addax Petroleum's earnings, financial requirements and other conditions existing which Addax Petroleum's Board of Directors may consider relevant at such future time, including applicable restrictions arising under the Credit Facility and under the Acquisition Facility on the ability of Addax Petroleum and/or APNV to pay dividends or other distributions. On August 1, 2006, Addax Petroleum declared an initial quarterly dividend for the quarter ending June 30, 2006 of CDN\$0.05 per Common Share. That dividend is payable on September 14, 2006 to shareholders of record on August 24, 2006. Holders of Subscription Receipts will be entitled to a Special Payment per Subscription Receipt equal to the amount per Common Share of any cash dividends of the Corporation for which record dates have occurred during the period from the closing date of the offering to the date immediately preceding the date the Common Shares became issuable pursuant to the terms of the Subscription Receipts. Any Subscription Receipts issued and sold under this short form prospectus will be eligible for a Special Payment of CDN\$0.05 per Common Share when the Acquisition is completed and the Subscription Receipts are converted into Common Shares. Holders of Subscription Receipts will not receive, nor will they have any claim or entitlement whatsoever to, any Special Payment if the Acquisition is not completed and the Subscription Receipts are not converted into Common Shares.

USE OF PROCEEDS

The net proceeds to the Corporation from the sale of the Subscription Receipts hereunder are estimated to be CDN\$337,580,000 (CDN\$388,592,000 if the Over-Allotment Option is exercised in full) after deducting the fee payable to the Underwriters and the estimated expenses of the offering. The net proceeds will be used to fund a portion of the purchase price of the Acquisition.

DETAILS OF THE OFFERING

The following is a summary of the material attributes and characteristics of the Subscription Receipts. This summary does not, however, include a description of all of the terms of the Subscription Receipts, and reference should be made to the Subscription Receipt Agreement for a complete description of the terms of the Subscription Receipts.

The Subscription Receipts will be issued at the closing of the offering pursuant to the Subscription Receipt Agreement. Subscription Receipts will be represented by a global certificate issued in registered form to The Canadian Depository for Securities Limited ("CDS") or its nominee under the book-entry only system and will be deposited with CDS on the date of the closing of the Offering. A holder of a Subscription Receipt will not be entitled to a certificate evidencing that person's interest in or ownership of a Subscription Receipt, and will receive only a customer confirmation from the registered dealer (a CDS participant through which the holder's Subscription Receipts are purchased) that the Subscription Receipts have been issued. The Escrowed Funds will be delivered to and held by the Escrow Agent and invested in short-term obligations of, or guaranteed by, the Government of Canada (and other approved investments) pending the closing of the Acquisition. Provided that the Acquisition closes on or before 5:00 p.m. (Calgary time) on November 30, 2006, the Escrowed Funds and any interest earned thereon, less any amount required to pay any Special Payment (as defined below), will be released to the Corporation concurrently with the closing of the Acquisition and holders of Subscription Receipts will receive, without payment of additional consideration or further action, one Common Share for each Subscription Receipt held on the Acquisition closing date, together with the Special Payment, if any. Common Shares issued upon exchange of the Subscription Receipts will be represented by a global certificate issued in registered form to CDS or its nominee under the book-entry only system and will be deposited with CDS. No holder of a Common Share will be entitled to a certificate evidencing that person's interest in or ownership of a Common Share, and a holder of Subscription Receipts will receive only a customer confirmation from the registered dealer (a CDS participant through which the holder's Subscription Receipts are purchased) that Common Shares have been issued.

Forthwith upon closing of the Acquisition, the Corporation will execute and deliver to the Escrow Agent a notice thereof, and will issue and deliver the Common Shares to the Escrow Agent. Contemporaneously with the delivery of such notice, the Corporation will issue a press release specifying that the Common Shares have been issued.

If (i) the completion of the Acquisition does not occur by 5:00 pm (Calgary time) on November 30, 2006, or (ii) the Arrangement Agreement is terminated before completion of the Acquisition, or (iii) if the Corporation publicly announces that it does not intend to proceed with the Acquisition (in any case, the "Termination Time"), holders of Subscription Receipts shall be entitled to receive from the Corporation, in the time and manner provided for in the Subscription Receipt Agreement, an amount equal to the full subscription price therefor and a pro rata portion of any interest earned on the Escrowed Funds (net of withholding tax, if any) and, as of the Termination Time, the Subscription Receipts will be void and of no further effect. The Escrowed Funds will be applied to the payment of such amount. The Subscription Receipts shall only be converted into Common Shares and Special Payment (if any) paid upon the completion of the Acquisition.

If the Acquisition closes on or before 5:00 p.m. (Calgary time) on November 30, 2006 and holders of Subscription Receipts become entitled to receive Common Shares pursuant to the Subscription Receipt Agreement, holders of Subscription Receipts on the Acquisition closing date will also be entitled to receive an amount (the "Special Payment") per Subscription Receipt equal to the amount per Common Share of any cash distributions of the Corporation for which record dates have occurred during the period from the closing date of the offering to the date immediately preceding the date Common Shares become issuable pursuant to the Subscription Receipts. Payments on account of the Special Payment shall first be satisfied out of the interest earned on the Escrowed Funds. If a Subscription Receipt holder's *pro rata* share of interest earned on the Escrowed Funds is less than the amount to which such holder is entitled in respect of the Special Payment, the amount (the "Adjustment Amount") of any such shortfall will be paid to the Subscription Receipt holder from the balance of the Escrowed Funds; provided, however, that in no event shall the aggregate amount paid to a Subscription Receipt holder in respect of a Subscription Receipt exceed the amount of the Special Payment. The Corporation will treat the Adjustment Amount as a purchase price adjustment. If holders of Subscription Receipts become entitled to receive Common Shares, the Escrow Agent and the Corporation will pay the Special Payment to holders on the later of the third business day after the Acquisition closing date and the date the corresponding distribution is paid to shareholders.

Holders of Subscription Receipts will not have any voting or pre-emptive rights or other rights as shareholders and will not be entitled to receive any Special Payment in respect of such Subscription Receipts prior to the conversion of the Subscription Receipts into Common Shares. Holders of Subscription Receipts will not receive, nor will they have any claim or entitlement whatsoever to, any Special Payment if the Acquisition is not completed and the Subscription Receipts are not converted into Common Shares. The Subscription Receipt Agreement contains certain customary anti-dilution provisions.

Under the Subscription Receipt Agreement, original purchasers of Subscription Receipts under this offering will have a contractual right of rescission against the Corporation following the issuance of Common Shares to such purchasers upon the conversion of the Subscription Receipts to receive the amount paid for the Subscription Receipts if this prospectus (including documents incorporated by reference herein) or any amendment contains a misrepresentation provided that the purchaser relied on such misrepresentation and that such remedy for rescission is exercised within 180 days of closing of this offering.

From time to time while the Subscription Receipts are outstanding, the Corporation, the Underwriters and the Escrow Agent, without the consent of the holders of the Subscription Receipts, may amend or supplement the Subscription Receipt Agreement for certain purposes, including making any change that, in the opinion of the Escrow Agent, does not prejudice the rights of the holders of the Subscription Receipts. The Subscription Receipt Agreement will provide for other modifications and alterations thereto and to the Subscription Receipts issued thereunder by way of a resolution approved by more than 66⅔% of the votes cast in person or by proxy by Subscription Receipt holders.

PLAN OF DISTRIBUTION

Pursuant to the Underwriting Agreement, the Corporation has agreed to issue and sell to the Underwriters 13,000,000 Subscription Receipts, and the Underwriters have severally agreed to purchase such Subscription Receipts at a price of CDN\$27.25 per Subscription Receipt, on August 16, 2006 or such other date on or prior to August 31, 2006 as may be agreed among the parties to the Underwriting Agreement. Delivery of the Subscription Receipts is conditional upon payment by the Underwriters to the Corporation on closing of CDN\$27.25 per Subscription Receipt. The Underwriting Agreement provides that the Corporation will pay the Underwriters' fee of CDN\$1.09 per Subscription Receipt for Subscription Receipts issued and sold by the Corporation, for an aggregate fee payable by the Corporation to the Underwriters of CDN\$14,170,000, in consideration for their services in connection with the offering. The Underwriters' fee with respect to the Subscription Receipts is payable as to 50% upon closing of the offering and 50% upon closing of the Acquisition. If the Acquisition is not completed by November 30, 2006, the Underwriters' fee with respect to the Subscription Receipts will be reduced to the amount payable upon closing of this offering. The terms of the offering were determined by negotiation between the Corporation and the Underwriters.

The Corporation has granted to the Underwriters the Over-Allotment Option to purchase additional Subscription Receipts (or, if the Subscription Receipts have been converted into Common Shares, then the Over-Allotment Option shall be exercisable for Common Shares) equal to up to 15% of the Subscription Receipts purchased at the closing of this offering, at the offering price of CDN\$27.25 per Subscription Receipt, exercisable, in whole or in part, at any time not later than 30 days after closing of this offering. This prospectus qualifies for distribution the issue of the Over-Allotment Option and any Subscription Receipts and Common Shares (as the case may be) that are issued pursuant to the exercise of the Over-Allotment Option. If the Over-Allotment Option is exercised in full, the total offering, the Underwriters' fee and the net proceeds to the Corporation (before deducting expenses of the offering) will be CDN\$407,387,500, CDN\$16,295,500 and CDN\$391,092,000, respectively. The fee payable to the Underwriters pursuant to the exercise of the Over-Allotment Option will be payable as to 50% on closing of the Over-Allotment Option and 50% upon closing of the Acquisition. If the Acquisition is not completed by November 30, 2006, the

Underwriters' fee with respect to the exercise of the Over-Allotment Option will be reduced to the amount payable upon closing of the Over-Allotment Option.

The obligations of the Underwriters under the Underwriting Agreement are several and may be terminated at their discretion upon the occurrence of certain stated events. If an Underwriter fails to purchase the Subscription Receipts which it has agreed to purchase, the other Underwriters may, but are not obligated to, purchase such Subscription Receipts. The Underwriters are, however, obligated to take up and pay for all Subscription Receipts if any are purchased under the Underwriting Agreement. The Underwriting Agreement also provides that the Corporation will indemnify the Underwriters and their directors, officers, agents, shareholders and employees against certain liabilities and expenses.

The Corporation has been advised by the Underwriters that, in connection with the offering, the Underwriters may effect transactions that stabilize or maintain the market price of the Subscription Receipts or Common Shares at levels other than those that might otherwise prevail in the open market. Such transactions, if commenced, may be discontinued at any time.

The directors and senior officers of Addax Petroleum have agreed they will not, without the prior consent of RBC Dominion Securities Inc., Merrill Lynch Canada Inc. and Scotia Capital Inc., which consent may not be unreasonably withheld, sell any Common Shares (or any securities giving the right to acquire Common Shares) for a period of 90 days following closing of this offering.

Addax Petroleum has agreed that it will not, without the prior consent of RBC Dominion Securities Inc., Merrill Lynch Canada Inc. and Scotia Capital Inc., which consent may not be unreasonably withheld, offer, sell or issue for sale any Common Shares (or any securities giving the right to acquire Common Shares), other than the issuance of Common Shares pursuant to the exercise of the Over-Allotment Option or conversion of Subscription Receipts, or agree to or announce the intention to do so at any time prior to the date which is 90 days following closing of this offering.

The TSX has conditionally approved the listing of the Subscription Receipts and the Common Shares issuable pursuant to the conversion of the Subscription Receipts. Listing is subject to the Corporation fulfilling all of the requirements of the TSX on or before October 27, 2006.

The Corporation has been granted relief by the Canadian securities regulatory authorities from the requirement to include historical financial statements of Pan-Ocean UK in this prospectus, as well as pro forma financial statements derived from the historical financial statements of Pan-Ocean UK. In addition, the Corporation has been granted relief by the Canadian securities regulatory authorities, subject to certain terms, from the requirement to include in this prospectus financial statements for PanAfrican for its quarter ended June 30, 2006 and to include pro forma financial statements as at and for the period ended June 30, 2006 derived from such financial statements.

The Subscription Receipts offered hereby and the Common Shares issuable pursuant to the Subscription Receipts have not been and will not be registered under the *United States Securities Act of 1933*, as amended and, subject to certain exceptions, may not be offered or sold within the United States. Each of the Underwriters has agreed that it will not, subject to certain exceptions, offer, sell or deliver Subscription Receipts within the United States.

RELATIONSHIP BETWEEN THE CORPORATION AND CERTAIN UNDERWRITERS

RBC Dominion Securities Inc. is an indirect wholly owned subsidiary of a Canadian chartered bank that is a lender to the Corporation under the Corporation's current credit facility. RBC Dominion Securities Inc. and Scotia Capital Inc. are direct or indirect wholly owned subsidiaries of Canadian chartered banks that will be lenders to the Corporation under the Term Credit Facility, which may be used to fund, in part, the Acquisition. BNP Paribas (Canada) Securities Inc. is an affiliate of a bank that is a lender to the Corporation under the Corporation's current credit facility and will be a lender to the Corporation under the Revolving Credit Facility, which will be used to fund, in part, the Acquisition. Consequently, Addax Petroleum may be considered to be a connected issuer of RBC Dominion Securities Inc., Scotia Capital Inc. and BNP Paribas (Canada) Securities Inc. under applicable securities legislation. In addition, Scotia Capital Inc. acted as financial advisor to the Corporation in connection with the Acquisition and will receive a fee from the Corporation on completion of the Acquisition. RBC Dominion Securities Inc. acted as financial advisor to Pan-Ocean Energy in connection with the Acquisition and will receive a fee from Pan-Ocean Energy on completion of the Acquisition.

As at July 31, 2006, no amounts were owing to the lenders under the Credit Facility. The Corporation is in material compliance with all material terms of the agreements governing the Credit Facility and none of the lenders has waived any material breach by the Corporation of those agreements since the Credit Facility was established. Neither the financial position of Addax Petroleum nor the value of the security under Credit Facility has changed substantially and adversely since the indebtedness under the Credit Facility was incurred.

The decision to distribute the Subscription Receipts and the determination of the terms of the distribution were made solely through negotiations among the Corporation and the Underwriters. None of the lenders under the Credit Facility or the Term Credit Facility had any involvement in such decision or determination, but have been advised of the issuance and the terms thereof. As a consequence of the offering, RBC Dominion Securities Inc., Scotia Capital Inc. and BNP Paribas (Canada) Securities Inc. will receive their respective share of the Underwriters' fee. See "Plan of Distribution" and "Use of Proceeds".

DESCRIPTION OF SHARE CAPITAL

Addax Petroleum is authorized to issue an unlimited number of Common Shares and an unlimited number of Preferred Shares, issuable in series.

Common Shares

The holders of Common Shares will be entitled to receive notice of, and to exercise one vote per share at, every meeting of shareholders of Addax Petroleum, to receive such dividends as the Board of Directors declares and to share equally in the assets of Addax Petroleum remaining upon the liquidation of Addax Petroleum after the creditors of Addax Petroleum have been satisfied, subject to the prior rights of the Preferred Shares.

Preferred Shares

The Preferred Shares will be issuable in series, with each series consisting of such number of shares and having such rights, privileges, restrictions and conditions as may be determined by the Board of Directors of Addax Petroleum prior to the issuance thereof. With respect to the payment of dividends and the distribution of assets in the event of liquidation, dissolution or winding-up of Addax Petroleum, whether voluntary or involuntary, the Preferred Shares are entitled to preferences over Common Shares and any other shares ranking junior to the Preferred Shares and may also be given such other preferences over the Common Shares and any other shares ranking junior to the Preferred Shares as may be determined at the time of creation of each series.

TRADING HISTORY

The outstanding Common Shares are traded on the TSX under the trading symbol "AXC". The following table sets forth the closing price range and trading volume for the periods indicated as reported by the TSX.

<u>Period</u>	<u>High (CDN\$)</u>	<u>Low (CDN\$)</u>	<u>Volume</u>
February 8 - February 28, 2006.....	23.00	19.50	11,555,730
March 1 - March 31, 2006	28.30	23.71	3,211,200
April 3 - April 28, 2006.....	31.00	28.23	3,829,423
May 1 - May 31, 2006	29.82	25.75	4,207,449
June 1 - June 30, 2006	28.85	24.19	2,042,417
July 1 - July 28, 2006	29.85	26.25	1,599,794
August 1 - August 10, 2006	29.75	27.50	255,053

On August 10, 2006, the date of this prospectus, the closing price of the Common Shares on the TSX was CDN\$27.50.

CANADIAN FEDERAL INCOME TAX CONSIDERATIONS

In the opinion of Fasken Martineau DuMoulin LLP, counsel for the Corporation, and Fraser Milner Casgrain LLP, counsel for the Underwriters, the following summary describes the principal Canadian federal income tax considerations generally applicable to a holder who acquires Subscription Receipts pursuant to this offering and Common Shares in exchange for Subscription Receipts and who, for purposes of the *Income Tax Act* (Canada) (the "Tax Act"), at all relevant times, holds such Subscription Receipts and Common Shares as capital property and deals at arm's length with, and is not affiliated with, each of the Corporation and the Underwriters (a "Holder").

This summary is based upon the current provisions of the Tax Act and the regulations thereunder in force as of the date hereof (the "Regulations"), and counsel's understanding, based on publicly available published materials, of the current administrative and assessing practices and policies of the Canada Revenue Agency. This summary takes into account all specific proposals to amend the Tax Act and the Regulations publicly announced by or on behalf of the Minister of Finance (Canada) prior to the date hereof (the "Proposed Amendments") and assumes that all Proposed Amendments will be enacted in the form proposed. However, there can be no assurance that the Proposed Amendments will be enacted in their current form or at all. This summary does not otherwise take into account or anticipate any

changes in the law or administrative or assessing practice or policy whether by legislative, regulatory, administrative, or judicial action, nor does it take into account tax legislation or considerations of any province, territory, or foreign jurisdiction, which may differ significantly from those discussed herein.

This summary is of a general nature only and is not, and is not intended to be, legal or tax advice to any particular Holder. This summary is not exhaustive of all federal income tax considerations. Accordingly, prospective purchasers should consult their own tax advisors having regard to their own particular circumstances.

Residents of Canada

The following portion of the summary applies to Holders who at all relevant times are resident or deemed to be resident in Canada for the purposes of the Tax Act (a "**Resident Holder**"). Certain Resident Holders whose Common Shares might not otherwise be capital property, may, in certain circumstances, be entitled to have the Common Shares and all other "Canadian securities," as defined in the Tax Act, treated as capital property by making the irrevocable election permitted by subsection 39(4) of the Tax Act. Such election is not available in respect of the Subscription Receipts. This summary is not applicable to a purchaser that is a "financial institution", as defined in the Tax Act, for purposes of certain rules applicable to securities held by financial institutions, "specified financial institutions," as defined in the Tax Act, or a holder an interest in which would be a "tax shelter investment" as defined in the Tax Act. Such purchasers should consult their own tax advisors.

Interest

If the Escrowed Funds are returned to Holders, a Resident Holder will be required to include in computing income such Resident Holder's entitlement to interest in respect thereof.

If a Special Payment is received by a Resident Holder in respect of a Subscription Receipt, the portion thereof that is interest from the Escrowed Funds will be required to be included in computing such Resident Holder's income.

Disposition of Subscription Receipts

Generally, on a disposition or deemed disposition of a Subscription Receipt (other than on an acquisition of Common Shares pursuant to the terms thereof), a Resident Holder will realize a capital gain (or capital loss) equal to the amount, if any, by which the proceeds of disposition, net of any reasonable costs of disposition, exceed (or are less than) the adjusted cost base to the Resident Holder of the Subscription Receipt immediately before the disposition or deemed disposition.

Generally, a Resident Holder is required to include in computing its income for a taxation year one-half of the amount of any capital gain (a "**taxable capital gain**"). Subject to and in accordance with the provisions of the Tax Act, a Resident Holder is required to deduct one-half of the amount of any capital loss (an "**allowable capital loss**") realized in a taxation year from taxable capital gains realized by the Resident Holder in the year. Allowable capital losses in excess of taxable capital gains may be carried back and deducted in any of the three preceding taxation years or carried forward and deducted in any subsequent taxation year against net taxable capital gains realized in such years subject to and in accordance with the provisions of the Tax Act.

Capital gains realized by an individual may give rise to a liability for alternative minimum tax.

Acquisition of Common Shares Pursuant to Subscription Receipts

A Resident Holder of a Subscription Receipt will not realize any gain or loss upon the acquisition of a Common Share pursuant to the provisions of such Subscription Receipt. The cost of a Common Share acquired by a Resident Holder pursuant to a Subscription Receipt will include the amount paid by the Resident Holder for the Subscription Receipt. Where a Special Payment is paid in respect of a Subscription Receipt, any portion thereof that is an Adjustment Amount will be treated as a reduction of the amount paid for the Subscription Receipt. The adjusted cost base to a Resident Holder of a Common Share acquired pursuant to a Subscription Receipt will generally be determined by averaging the cost of such Common Shares with the adjusted cost base of all other Common Shares owned by the Resident Holder as capital property at that time.

Taxation of Dividends

A Resident Holder will be required to include in computing its income for a taxation year any dividends received, or deemed to be received, by a Resident Holder on the Common Shares. In the case of a Resident Holder that is an individual (other than certain trusts), such dividends will be subject to the gross-up and dividend tax credit rules applicable to taxable dividends received from taxable Canadian corporations. If Proposed Amendments are enacted as proposed, such dividend should qualify as an "eligible dividend." Taxable dividends received by an individual will be

relevant in computing possible liability for alternative minimum tax. A dividend received or deemed to be received by a Resident Holder that is a corporation will generally be deductible in computing the corporation's taxable income.

A "private corporation" as defined in the Tax Act, or any other corporation controlled, whether because of a beneficial interest in one or more trusts or otherwise, by or for the benefit of an individual (other than a trust) or a related group of individuals (other than trusts) will generally be liable to pay under Part IV of the Tax Act a refundable tax of 33^{1/3}% on dividends received or deemed to be received on the Common Shares to the extent such dividends are deductible in computing taxable income for the year.

Disposition of Common Shares

Generally, on a disposition or deemed disposition of a Common Share, a Resident Holder will realize a capital gain (or capital loss) equal to the amount, if any, by which the proceeds of disposition, net of any reasonable costs of disposition, exceed (or are less than) the adjusted cost base to the Resident Holder of the Common Share immediately before the disposition or deemed disposition.

The taxation of capital gains and losses is described above under "Disposition of Subscription Receipts". The amount of any capital loss realized by a Resident Holder that is a corporation on the disposition of a Common Share may be reduced by the amount of any dividends received or deemed to be received by such Resident Holder on the Common Share subject to and in accordance with the provisions of the Tax Act. Similar rules may apply to a partnership or trust of which a corporation, trust or partnership is a member or beneficiary.

Additional Refundable Tax

A Resident Holder that is a Canadian-controlled private corporation as defined in the Tax Act may be liable to pay an additional 6^{2/3}% refundable tax on certain investment income, including taxable capital gains and interest.

Non-Residents of Canada

The following portion of the summary applies to a Holder who at all relevant times for purposes of the Tax Act and any applicable income tax convention, is not, and is not deemed to be resident in Canada and does not use or hold, and will not be deemed to use or hold, the Subscription Receipts or Common Shares in a business carried on in Canada (a "Non-resident Holder"). Special rules, which are not discussed in this summary, may apply to a holder that is an insurer that carries on an insurance business in Canada and elsewhere. Such holders should consult their own tax advisors.

Interest

If the Escrowed Funds are returned to Holders or if a Special Payment is made to the Holders, a Non-resident Holder may be subject to Canadian withholding tax under the Tax Act on amounts of interest paid or credited to the Non-resident Holder. The rate of withholding tax is 25%, although such rate may be reduced under the provisions of an applicable income tax convention between Canada and the Non-resident Holder's country of residence.

Acquisition of Common Shares Pursuant to Subscription Receipts

A Non-resident Holder of a Subscription Receipt will not realize any gain or loss upon the acquisition of a Common Share pursuant to the provisions of such Subscription Receipt.

Taxation of Dividends

Dividends received or deemed to be received by a Non-resident Holder on the Common Shares will be subject to Canadian withholding tax under the Tax Act. The rate of withholding tax is 25%, although such rate may be reduced under the provisions of an applicable income tax convention between Canada and the Non-resident Holder's country of residence.

Disposition of Subscription Receipts and Common Shares

A Non-resident Holder will generally not be subject to tax under the Tax Act in respect of any gain realized on the disposition or deemed disposition of a Subscription Receipt or Common Share, unless the Subscription Receipt or Common Share, as the case may be, constitutes "taxable Canadian property" of the Non-resident Holder. Provided the Common Shares are listed on a prescribed stock exchange (which includes the TSX) at the relevant time, the Subscription Receipts and Common Shares, as the case may be, will not constitute "taxable Canadian property" to a Non-resident Holder unless the Non-resident Holder, persons with whom the Non-resident Holder does not deal with at arm's length, or the Non-resident Holder together with such persons have owned 25% or more of any class or series of shares of the Corporation at any time within the sixty-month period that ends at the particular time. Non-resident

Holders for whom Subscription Receipts or Common Shares may constitute taxable Canadian property should consult their own tax advisors.

THE ADDAX AND ORYX GROUP LTD.

AOG carries on several different businesses worldwide with particular emphasis on Africa, including petroleum and refined products trading, oil storage, retail petroleum products and mining businesses. AOG was incorporated in 1987 and has established itself as one of the largest independent oil trading companies in Africa and the largest marine fuel supply company in West Africa.

To the best of the knowledge of the directors and officers of Addax Petroleum, as of the date of this prospectus, AOG beneficially owns, directly or indirectly, and exercises control or direction over 110,000,100 Common Shares representing approximately 78.5 per cent of the 140,100,100 issued and outstanding Common Shares.

In May 2006 AOG held an extraordinary meeting of its shareholders and proposed a reorganization of AOG (the "Reorganization") that provided AOG shareholders the ability to exchange their AOG shares for Common Shares held by AOG and other consideration. AOG shareholders agreed to exchange AOG shares for approximately 45 million Common Shares. Such Common Shares will be transferred in equal installments over a five month period commencing in August 2006. AOG shareholders entitled to approximately 70% of these shares (representing approximately 31.5 million Common Shares) have agreed to defer delivery of any Common Shares pursuant to the Reorganization for a period of 90 days after the closing of this offering.

Following the Reorganization (but not taking into account any Common Shares issued pursuant to the offering) the shareholding percentage of AOG in the Corporation will be reduced to approximately 45% (or to approximately 65 million Common Shares). AOG has agreed not to offer or sell any Common Shares (or issue, offer or sell any securities giving the right to acquire Common Shares) without the prior consent of RBC Dominion Securities Inc., Merrill Lynch Canada Inc. and Scotia Capital Inc., which consent may not be unreasonably withheld, or agree to or announce the intention to do so at any time prior to the date which is 90 days after the closing of this offering.

RISK FACTORS

An investment in the securities of the Corporation involves a high degree of risk. An investor should consider carefully the following discussion of risks, in addition to the other information included or incorporated by reference into this short form prospectus including the *pro forma* consolidated financial statements set forth in Appendix "A" before purchasing any of the Subscription Receipts hereunder. In addition to historical information, the information in this short form prospectus contains "forward looking" statements about the Corporation's future business and performance. See "Reader Advisory Regarding Forward Looking Statements." The Corporation's actual operating results and financial performance may be very different from what the Corporation expects as of the date of this short form prospectus. Risk factors relating to the Corporation's business assume the Arrangement is completed and include risks related to the Acquired Business. Accordingly, references to the "Corporation" under this "Risk Factors" section of the prospectus shall include and be deemed to include a reference to the Acquired Business, unless the context requires otherwise. The risks below address the material factors that management believes may affect, among other things, the Corporation's future operating results and financial performance.

Risks Relating to the Acquisition

The Arrangement may not be consummated or may not be consummated in accordance with its terms

The Arrangement is subject to a number of conditions including, among other things, the approval of the Arrangement by a requisite number of votes cast by holders of Class A Shares and Class B Shares of Pan-Ocean Energy, each voting as a separate class, the approval of the Royal Court of Jersey, and majority of the minority approval of each class. If the conditions to the Arrangement are not satisfied on or before October 31, 2006 or such later date as may be agreed by the Corporation and Pan-Ocean Energy, the Arrangement Agreement will be terminated, in which case the Arrangement will not be completed. Neither the Corporation nor Pan-Ocean Energy are obligated to extend the period for the satisfaction or waiver of the conditions to the Arrangement beyond October 31, 2006.

Should the Arrangement not be completed, the Corporation would not realize the anticipated benefits of the Arrangement including the additional growth opportunities provided by the Acquired Business. An investor should recognize that the conditions to the Arrangement may not be satisfied and the Arrangement may not be completed. In addition, the Corporation may be required to increase the consideration offered in the event it determines to exercise the right to match in accordance with the terms of the Arrangement Agreement, and this may increase the indebtedness of the Corporation and may also reduce its available cash flow.

The Corporation may not realize the anticipated benefits of the Acquisition.

The Corporation may not be able to realize the anticipated benefits of the Acquisition which could negatively impact, among other things, the growth opportunities by the Corporation and the market price of the Common Shares. The operations of the Corporation and PanAfrican may not be integrated in an efficient or effective manner and the integration of PanAfrican and the Corporation will present challenges to management, including the integration of systems and personnel of the two companies, and special risks, including possible unanticipated liabilities and costs.

There may be undisclosed liabilities associated with the Acquisition.

In connection with the Acquisition, there may be liabilities or deficiencies associated with PanAfrican, Pan-Ocean UK and/or their assets, including environmental or tax liabilities, that Addax Petroleum has not identified in its due diligence or was unable to quantify in its due diligence conducted in respect of the Acquisition. Under the Arrangement Agreement, Addax Petroleum is not indemnified for these liabilities or deficiencies. Any such material liabilities or deficiencies could have a material adverse affect on the Corporation's business, financial condition (financial or otherwise) or future prospects.

There is currently no market for Subscription Receipts.

There is currently no market through which the Subscription Receipts may be sold and purchasers may not be able to resell the Subscription Receipts purchased under this short form prospectus.

The Corporation's indebtedness could adversely affect its ability to operate its business.

Addax Petroleum will incur and assume additional debt obligations in connection with the Acquisition, with a significant portion of the purchase price being funded through the Acquisition Facility. As a result, the Corporation will have significant debt service obligations which may limit its flexibility to, and may impose significant restrictions on, the Corporation's operations and business. The Corporation's indebtedness and the terms of its existing or future credit agreements or other instruments governing its indebtedness also could make it more difficult for the Corporation to satisfy its other debt covenants and debt service, lease payment and contractual and other obligations. The Corporation's indebtedness also may increase its vulnerability to general adverse economic and industry conditions and limit its ability to obtain additional financing, to fund existing projects and additional exploration or development projects or opportunities, working capital, capital expenditures or other general corporate requirements. The Corporation's debt service obligations will reduce the availability of cash flow from operations that the Corporation can use for other purposes and may limit flexibility in planning for, or reacting to, changes in the Corporation's business, the oil and gas industry or oil prices. These restrictions and limitations may place the Corporation at a disadvantage compared to competitors with relatively lower amounts of debt and could have a material and adverse impact on the Corporation and its financial performance.

The Acquisition Facility could adversely affect the Corporation and dilute shareholders.

The Acquisition Facility will need to be repaid or refinanced in a relatively short period of time and the Corporation may be required to raise additional capital to do so. This capital raising may involve additional issuances of equity or other securities which may have a dilutive effect on the existing shareholders of the Corporation and may also substantially decrease the market price of the Common Shares. The Acquisition Facility may restrict the Corporation from taking certain actions, including the ability to declare dividends, or may limit the amount of such dividends, and may limit the ability of the Corporation to pursue certain opportunities which may be beneficial or necessary for the growth and/or sustainability of its business. If the Corporation is unable to repay or refinance the Acquisition Facility as required or is in default under the Acquisition Facility, this may have a material and adverse effect on the Corporation and its financial performance.

Risks Related to the Business of the Corporation

There are numerous risks relating to the nature of the Corporation's Business.

There are numerous factors which may affect the success of the Corporation's business which are beyond its control including local, national and international economic and political conditions. The Corporation's business involves a high degree of risk which a combination of experience, knowledge and careful evaluation may not overcome. The operations of the Corporation in certain countries have exposed it to risks which may not exist for operations in North America such as political and currency risks and the Corporation may be exposed to additional risks in the future.

This business of the Corporation is subject to operating hazards and uninsured risks.

The business of the Corporation is subject to all of the operating risks normally associated with the exploration for, and the production, storage, transportation and marketing of oil and gas. These risks include blowouts, explosions,

fire, gaseous leaks, migration of harmful substances and oil spills, any of which could cause personal injury, result in damage to, or destruction of, oil and gas wells or formations or production facilities and other property, equipment and the environment, as well as interrupt operations. In addition, the operations of the Corporation are subject to all of the risks normally incident to drilling of oil and natural gas wells and the operation and development of oil and gas properties, including encountering unexpected formations or pressures, premature declines of reservoirs, blowouts, equipment failures and other accidents, sour gas releases, uncontrollable flows of oil, natural gas or well fluids, adverse weather conditions, pollution and other environmental risks. The Corporation's production facilities are also subject to hazards inherent in marine operations, such as capsizing, sinking, grounding, collision and damage from severe weather conditions. The offshore drilling conducted by the Corporation over seas involves increased drilling risks of high pressures and mechanical difficulties, including stuck pipe, collapsed casing and separated cable. The Corporation and operators of properties in which it has an interest maintain insurance against some, but not all, potential risks; however, there can be no assurance that such insurance will be adequate to cover any losses or exposure for liability or that the Corporation will be able to obtain insurance to cover such risks. The occurrence of an unfavourable event not fully covered by insurance could have a material adverse effect on the Corporation's financial condition, results of operations and cash flows. Furthermore, insurance may not continue to be available at a reasonable cost or at all.

Oil and gas operations and production are subject to numerous risks.

Oil and gas production operations are also subject to all the risks typically associated with such operations, including premature decline of reservoirs and invasion of water into producing formations. Certain of the Corporation's oil and gas properties are operated by third parties or may be subject to operating committees controlled by national oil companies and, as a result, the Corporation has limited control over the nature and timing of exploration and development of such properties or the manner in which operations are conducted on such properties. The marketability and price of oil and natural gas which may be acquired or discovered by the Corporation will be affected by numerous factors beyond the control of the Corporation. The ability of the Corporation to market any natural gas discovered may depend upon its ability to acquire space on pipelines which deliver natural gas to commercial markets. The Corporation is also subject to market fluctuations in the prices of oil and natural gas, uncertainties related to the delivery and proximity of its reserves to pipelines and processing facilities and extensive government regulation relating to prices, taxes, royalties, land tenure, allowable production, the export of oil and gas and many other aspects of the oil and gas business. The Corporation is also subject to a variety of waste disposal, pollution control and similar environmental laws. The oil and natural gas industry is subject to varying environmental regulations in each of the jurisdictions in which the Corporation operates and which it may operate.

Environmental regulations place restrictions and prohibitions on emissions of various substances produced concurrently and oil and natural gas and can impact on the selection of drilling sites and facility locations, potentially resulting in increased capital expenditures. The Corporation may be responsible for abandonment and site restoration costs.

There is no guarantee that the Corporation has or will continue to have good title to its properties.

There is no guarantee that an unforeseen defect in title, changes in laws or change in their interpretation or political events will not arise to defeat or impair the claim of the Corporation to its properties which could result in a material adverse effect on the Corporation, including a reduction in revenue.

The Corporation's failure to replace its current reserves would have a material adverse effect on its business and financial condition.

The Corporation's oil reserves and production, and therefore its cash flows and earnings, are highly dependent upon the Corporation developing and increasing its current reserve base. Without the addition of reserves through exploration, acquisition or development activities, the Corporation's reserves and production will decline over time as reserves are depleted. The business of exploring for, developing or acquiring reserves is capital intensive. To the extent that cash flow from operations is insufficient and external sources of capital become limited or unavailable, the Corporation's ability to make the necessary capital investments to maintain and expand its oil reserves will be impaired. There can be no assurance that the Corporation will be able to find and develop or acquire additional reserves to replace production at commercially feasible costs.

Exploration and development activities are inherently risky and are subject to change.

Future oil and natural gas exploration may involve unprofitable efforts, not only from dry wells, but from wells that are productive but do not produce sufficient net revenues to return a profit after drilling, operating and other costs. Completion of a well does not assure a profit on the investment or recovery of drilling, completion and operating costs. In addition, drilling hazards or environmental damage could greatly increase the cost of operations and various field operating conditions may adversely affect the production from successful wells.

Whether the Corporation ultimately undertakes an exploration or development project depends upon a number of factors, including availability and cost of capital, current and projected oil and gas prices, receipt of government approvals, access to the property, the costs and availability of drilling rigs and other equipment, supplies and personnel necessary to conduct these operations, success or failure of activities in similar areas and changes in the estimates to complete the projects.

The Corporation will continue to gather data about its new venture opportunities and other projects. Additional information could cause the Corporation to alter its schedule or determine that a new venture opportunity or project should not be pursued, which could adversely affect the Corporation's prospects.

Under its Production Sharing Contracts, the Corporation finances exploration, development and operations and the related facilities and equipment and will only recover its costs if there is successful production in accordance with the terms of the Production Sharing Contracts.

Failure to obtain governmental approvals and fulfill contractual commitments may adversely affect the Corporation's business.

The Corporation's current operations are, and future operations will be, subject to approvals of governmental authorities and, as a result, the Corporation has limited control over the nature and timing of development and exploration of such properties or the manner in which operations are conducted on such properties.

The Corporation's Production Sharing Contracts and other contracts with governments and government bodies to explore and develop the properties are subject to specific requirements and obligations. If the Corporation fails to satisfy such requirements and obligations and there is a material breach of such contracts, such contracts could, under certain circumstances, be terminated. The termination of any of the Corporation's contracts granting rights in respect of the properties would have a material adverse effect on the Corporation, including the Corporation's financial condition.

The loss of any of the Corporation's executive officers and key employees could have an adverse impact on its business.

The Corporation is highly dependent upon its executive officers and key employees, and the success of the Corporation will be largely dependent upon the performance of such officers and key employees. In particular, the Corporation's Chief Executive Officer, Jean Claude Gandur, has a number of key relationships that are important to the Corporation's business. The unexpected loss of the services of Mr. Gandur or other executive officers or key personnel could have a material adverse effect on the Corporation. The Corporation does not maintain key man life insurance on any of its employees. In assessing the risk of an investment in the Common Shares, potential investors should recognize that they are relying on the ability and integrity of the management of the Corporation.

The Corporation is dependent on an affiliated company for the marketing of the oil the Corporation produces.

In conducting its business, the Corporation will continue to rely on ABV to purchase and sell the majority of the crude oil the Corporation produces under the Crude Oil Supply Agreements. If the Corporation's agreements with ABV terminate for any reason, the Corporation may be unable to enter into a relationship with another purchaser and seller of its crude oil on a timely basis or on acceptable terms, which could materially adversely affect the Corporation's business, results of operations or financial condition.

The Corporation shares a trademark and a tradename with a group of companies and any adverse development affecting the trademark, tradename or reputation of any of those companies, their shareholders, directors, officers or employees could materially adversely affect the business, goodwill or reputation of the Corporation.

The Corporation shares a trademark and a tradename with AOG and many of AOG's subsidiaries. AOG engages in petroleum trading and distribution, and mining activities throughout Africa and in Eastern Europe, and it has subsidiaries, local branches and commercial representation bureaus throughout Africa and in Europe and Asia. Many of the countries in which AOG operates have experienced high levels of governmental and business corruption and other illegal activity. AOG and its officers, directors and employees have been and may in the future be, the subject of press speculation, governmental investigations and other accusations of corrupt practices or other illegal activities, including improper payments to individuals of influence. For example, AFSARL, a subsidiary of AOG, was referred to in the UN Oil-for-Food Report, however, neither the Corporation nor AOG has ever participated in any payments that contravene the rules of the UN Oil-for-Food Programme. Issues arising from the UN Oil-for-Food Programme may be the subject of investigation by national authorities.

Pursuant to the Trademark Agreement, the Corporation intends to continue identifying itself using names and logos that indicate a relationship with AOG. Given the Corporation shares a trademark and tradename with AOG and

with many members of the AOG group, any adverse development affecting the trademark, tradename or reputation of any of those companies could have a material adverse effect on the business, goodwill or reputation of the Corporation.

The Corporation may not be able to secure financing for its future exploration, development, production and acquisition plans.

Depending on future exploration, development, production or acquisition plans, the Corporation may require additional financing. The ability of the Corporation to arrange such financing in the future will depend in part upon prevailing financing market conditions as well as the business performance of the Corporation. If the Corporation's revenues or reserves decline, it may not have the capital necessary to undertake or complete future drilling programs. There can be no assurance that debt or equity financing or cash generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to the Corporation. Transactions financed partially or wholly with debt may increase the Corporation's debt levels above industry standards. The inability of the Corporation to access sufficient capital for its operations could have a material adverse effect on the Corporation's business and financial condition. If additional financing is raised by the issuance of shares from treasury of the Corporation, control of the Corporation may change and shareholders may suffer dilution.

The Corporation could be subject to labour or other unplanned production disruptions.

The Corporation has a significant number of staff belonging to certain trade unions which have a record of occasional industrial action. The presence of trade unions may limit the Corporation's flexibility in dealing with its staff. If there is a material disagreement between the Corporation and its trade unions, the Corporation's operations could suffer an interruption or shutdown that could have a material adverse effect on the Corporation's business, results of operations or financial condition.

Future litigation could adversely affect the Corporation's business, results of operations or financial condition.

From time to time, the Corporation is subject to litigation arising out of its operations. Damages claimed under such litigation may be material or may be indeterminate, and the outcome of such litigation may materially impact the Corporation's business, results of operations or financial condition. While the Corporation assesses the merits of each lawsuit and defends itself accordingly, it may be required to incur significant expenses or devote significant resources to defending itself against such litigation. In addition, the adverse publicity surrounding such claims may have a material adverse effect on the Corporation's business.

The Corporation is subject to certain risks related to the nature of the Corporation's business and its present stage and speed of development.

There are numerous factors which may affect the success of the Corporation's business which are beyond the Corporation's control, including local, national and international economic, legal and political conditions. The Corporation's business involves a high degree of risk which a combination of experience, knowledge and careful evaluation may not overcome. The operations of the Corporation in developing countries expose the Corporation to, among other things, political and currency risks.

The Corporation has experienced significant growth and development in a relatively short period of time and expects to continue to grow as production increases from its oil reserves. Management of that growth requires, among other things, stringent control of financial system and operations, the continued development of management controls and the training of new personnel. Failure to successfully manage the Corporation's expected growth and development could have a material adverse effect on the Corporation's business, results of operations or financial condition.

PanAfrican is in the process of constructing an export pipeline to ease production constraints from its Tsiengui property. The failure to complete the pipeline on time, or at all, could have a significant effect on the Corporation's aggregate production.

There are risks inherent in the Corporation's strategy of geographic diversification and acquisition of new exploration and development properties.

The Corporation intends to acquire additional oil and gas properties. Although the Corporation performs a review of properties prior to acquiring them that it believes is consistent with industry practices, such reviews are inherently incomplete. It generally is not feasible to review in depth every individual property involved in each acquisition. Ordinarily, the Corporation will focus its due diligence efforts on higher valued properties and will sample the remainder. However, even an in-depth review of all properties and records may not necessarily reveal existing or potential problems, nor will it permit a buyer to become sufficiently familiar with the properties to assess fully their deficiencies and capabilities. Inspections may not be performed on every well, and structural or environmental

problems, such as ground water contamination, are not necessarily observable even when an inspection is undertaken. The Corporation may be required to assume pre-closing liabilities, including environmental liabilities, and may acquire interests in properties on an "as is" basis. In addition, competition for the acquisition of prospective oil properties is intense, which may increase the cost of any potential acquisition. To date the Corporation's exploration and development activities have principally been based in Nigeria, Gabon and nearby areas in West Africa, and the Corporation's limited presence in other regions may limit its ability to identify and complete acquisitions in other geographic areas. There can be no assurance that any acquisition by the Corporation will be successful.

The Corporation is exposed to the risks associated with commodity hedging activities.

The nature of the Corporation's operations will result in exposure to fluctuations in commodity prices. The Corporation may use financial instruments and physical delivery contracts to hedge its exposure to these risks. If the Corporation engages in hedging it will be exposed to credit related losses in the event of non-performance by counterparties to the financial instruments. Additionally, if product prices increase above those levels specified in any future hedging agreements, the Corporation could lose the cost of floors or ceilings or a fixed price could limit the Corporation from receiving the full benefit of commodity price increases. If the Corporation enters into hedging arrangements, it may suffer financial loss if it is unable to commence operations on schedule or is unable to produce sufficient quantities of oil to fulfill its obligations.

Joint ventures entered into by the Corporation could lead to additional costs.

The Corporation has, in respect of Cameroon and Gabon, and is likely, in respect of the JDZ, the Taq Taq property and the Okwok Property, to enter into joint ventures. The Corporation may suffer additional costs or other losses if a joint venture partner does not meet its obligations. It is also possible that the interests of the Corporation and those of its joint venture partners are not aligned resulting in project delays, additional costs or disagreements, which could adversely affect the Corporation's business.

Risks relating to the petroleum industry

Volatility of petroleum prices could have a material adverse effect on the Corporation's business, results of operations or financial condition.

The Corporation's business, results of operations or financial condition and future growth are substantially dependent on the prevailing prices for its petroleum production. Historically, the markets for petroleum have been volatile and such markets are likely to continue to be volatile in the future. Prices for oil are based on world supply and demand and are subject to large fluctuations in response to relatively minor changes to the demand for oil, whether the result of uncertainty or a variety of additional factors beyond the control of the Corporation, including actions taken by OPEC and its adherence to agreed production quotas, war, terrorism, government regulation, social and political conditions in oil producing countries generally and in Nigeria specifically, economic conditions, prevailing weather patterns and the availability of alternative sources of energy. Any substantial decline in the price of petroleum could have a material adverse effect on the Corporation's revenues, operating income, cash flows and borrowing capacity and may require a reduction in the carrying value of the Corporation's properties, its planned level of spending for exploration and development and the level of its reserves. No assurance can be given that prices will be sustained at levels which will enable the Corporation to operate profitably.

A substantial decline in oil prices may also require the Corporation to write down certain of its assets. Under Canadian GAAP, the net capitalized cost of oil and gas properties may not exceed a "ceiling limit", which is based, in part, upon estimated future net cash flows from reserves. If the net capitalized costs exceed this limit, the Corporation must charge the amount of the excess against earnings. As oil prices decline, the Corporation's net capitalized cost may approach or exceed this cost ceiling, resulting in a charge against earnings. While a write down would not directly affect cash flow, the charge to earnings could be viewed unfavourably in the market or could limit the Corporation's ability to borrow funds or comply with covenants contained in current or future credit agreements or other debt instruments.

The Corporation could face significant liabilities under environmental laws.

Extensive national, state, and local environmental laws and regulations in foreign jurisdictions affect nearly all of the operations of the Corporation. These laws and regulations set various standards regulating certain aspects of health and environmental quality, provide for civil and criminal penalties and other liabilities for the violation of such standards and establish in certain circumstances obligations to remediate current and former facilities and locations where operations are or were conducted. In addition, special provisions may be appropriate or required in environmentally sensitive areas of operation. There can be no assurance that the Corporation will not incur substantial financial obligations in connection with environmental compliance.

Significant liability could be imposed on the Corporation for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous owners of property purchased by the Corporation, acts of sabotage or non-compliance with environmental laws or regulations. Such liability could have a material adverse effect on the Corporation. Moreover, the Corporation cannot predict what environmental legislation or regulations will be enacted in the future or how existing or future laws or regulations will be administered or enforced. Compliance with more stringent laws or regulations, or more vigorous enforcement policies of any regulatory authority, could in the future require material expenditures by the Corporation for the installation and operation of systems and equipment for remedial measures, any or all of which may have a material adverse effect on the Corporation.

As a party to various Production Sharing Contracts and the Ngosso Concession, the Corporation may have an obligation to restore producing fields to a condition acceptable to the authorities at the end of their commercial lives. Each party to such contracts is typically liable for its share of the cost of decommissioning infrastructure installed under that contract. In respect of the Corporation's producing properties that are located offshore, the costs to decommission offshore wells may be substantial. These costs are payable at a time when assets are no longer generating cash flow. Although the Corporation makes an accounting provision for decommissioning and site restoration costs, there are no immediate plans to establish a reserve account for these potential costs in respect of any of the Corporation's current properties or facilities. Rather, the costs of decommissioning are expected to be paid from the proceeds of production in accordance with the practice generally employed in onshore and offshore oilfield operations. There can, however, be no assurance that the proceeds from production will be sufficient to meet the costs of decommissioning at the time when required to be incurred. The use of other funds to satisfy such decommissioning costs could have a material adverse effect on the Corporation's financial position.

The oil reserve and oil and gas resource data in this prospectus are only estimates, and the Corporation's actual production, revenue and expenditure with respect to its reserves may be materially different from such estimates.

There are numerous uncertainties inherent in estimating quantities of proved, probable and possible reserves and prospective and contingent resources and cash flows to be derived therefrom, including many factors beyond the control of the Corporation. The reserves, resources and cash flow information set forth in this prospectus represent estimates only. In general, estimates of economically recoverable oil reserves and the future net cash flow therefrom are based on a number of factors and assumptions made as of the date on which the reserves estimates were determined, such as geological and engineering estimates (which have inherent uncertainties), historical production from the properties, the assumed effects of regulation by governmental agencies and estimates of future commodity prices and operating costs, all of which may vary considerably from actual results. All such estimates are, to some degree, uncertain and classifications of reserves are only attempts to define the degree of uncertainty involved. For these reasons, estimates of the economically recoverable oil reserves attributable to any particular group of properties, the classification of such reserves based on risk recovery and estimates of future net revenues expected therefrom, prepared by different engineers or by the same engineers at different times, may vary substantially. The Corporation's actual production, revenues, taxes and development and operating expenditures with respect to the Corporation's reserves will likely vary from such estimates, and such variances could be material.

Estimates with respect to reserves that may be developed and produced in the future are often based upon volumetric calculations and upon analogy to similar types of reserves, rather than upon actual production history. Estimates based on these methods generally are less reliable than those based on actual production history. Subsequent evaluation of the same reserves based upon production history will result in variation, which may be material, in the estimated reserves.

The present value of estimated future net cash flows referred to herein should not be construed as the current market value of estimated proved oil reserves attributable to the Corporation's properties. The estimated discounted future cash flow from proved reserves are based upon price and cost estimates which may vary from actual prices and costs and such variance could be material. Actual future net cash flows will also be affected by factors such as the amount and timing of actual production, supply and demand for oil, curtailments or increases in consumption by purchasers and changes in governmental regulations or taxation.

The Corporation's exploration and development activities depend on its ability to procure appropriate drilling equipment.

Oil and natural gas development and exploration activities are dependent on the availability of drilling and related equipment in the particular areas where such activities will be conducted. Demand for limited equipment such as drilling rigs or access restrictions may affect the availability of such equipment to the Corporation and may delay its development and exploration activities. In the areas in which the Corporation operates there is significant demand for drilling rigs and other equipment. Failure by the Corporation to secure necessary equipment could adversely affect the Corporation's business, results of operations or financial condition.

The Corporation operates in a highly competitive industry.

The oil and gas industry is intensely competitive and the Corporation competes with other companies which possess greater technical and financial resources. Many of these competitors not only explore for and produce oil and natural gas, but also carry on refining operations and market petroleum and other products on an international basis. The Corporation also competes with other companies to attract and retain experienced skilled management and oil professionals. If the Corporation is unsuccessful in competing against other companies, its business, results of operations or financial condition would be materially adversely affected.

The Corporation faces foreign exchange, interest rate and inflation risks.

The Corporation's revenues are in United States dollars and most of the Corporation's working capital is in United States dollars. The Corporation converts funds to foreign currencies as its payment obligations become due. Part of the Corporation's costs are incurred in other currencies, including the Nigerian Naira and the Swiss franc and on completion of the Acquisition, the CFA Franc. The Corporation's accounts are prepared in United States dollars and dividends, if paid, will be paid in Canadian dollars. Accordingly, the Corporation is subject to inflation in the countries in which it operates and fluctuations in the rates of currency exchange between the United States dollar and these currencies, and such fluctuations may materially affect the Corporation's business, results of operations or financial condition. Consequently, construction, exploration, development, administration and other costs may be higher than the Corporation anticipates. Any increase in relevant interest rates will increase the amount the Corporation pays to service debt.

Risks relating to the countries in which the Corporation currently operates and may operate in the future

There are political, economic and other risks relating to the countries in which the Corporation currently operates or may operate in the future.

The Corporation's current oil production activities are located entirely in Nigeria and, upon completion of the Acquisition, Gabon. It is also currently pursuing exploration and development activities in Cameroon and the Kurdistan Region of Iraq. Exploration and development activities in such countries may require protracted negotiations with host governments, national oil companies and third parties and may be subject to economic and political considerations such as the risks of war, actions by terrorist or insurgent groups, community disturbances, expropriation, nationalization, renegotiation, forced change or nullification of existing contracts or royalty rates, unenforceability of contractual rights, changing taxation policies or interpretations, adverse changes to laws (whether of general application or otherwise) or the interpretation thereof, foreign exchange restrictions, inflation, changing political conditions, the death or incapacitation of political leaders, local currency devaluation, currency controls, and foreign governmental regulations that favour or require the awarding of contracts to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction. Any of these or similar factors could have a material adverse effect on the Corporation's business, results of operations or financial condition. If a dispute arises in connection with foreign operations, the Corporation may be subject to the exclusive jurisdiction of foreign courts or foreign arbitration tribunals or may not be successful in subjecting foreign persons, especially foreign oil ministries and national oil companies, to the jurisdiction of Canada.

Under the International Court of Justice ruling of October 2002, the border between Nigeria and Cameroon was fixed such that a part of OML123, including the Bogi Platform, is now located in Cameroon. On June 12, 2006, the presidents of Nigeria and Cameroon signed an agreement which provides for the withdrawal of Nigerian troops within 60 days from the Bakassi Peninsula, with a possible 30 day extension. However, previous agreements to finalize the International Court of Justice's decision have fallen through, including one which was to have seen the final transfer of authority from Nigeria to Cameroon take place between June 15 and September 15, 2004. Accordingly, the Corporation's business and financial affairs could be materially affected by any actions taken in contravention of the agreement reached on June 12, 2006.

Western oil and gas companies may be perceived to be targets of criminal or terrorist activities. Criminal or terrorist action against the Corporation, its properties or facilities could have a material adverse effect on the Corporation's business, results of operations or financial position. In addition, the fear of criminal or terrorist attacks against the Corporation could have an adverse effect on the ability of the Corporation to raise capital or to adequately staff its operations or could substantively increase the costs of doing so.

Relinquishment obligations under applicable legislation and the terms of Production Sharing Contracts may adversely affect the total amount of the Corporation's prospective resources.

Pursuant to the Nigeria Production Sharing Contracts, Addax Petroleum is required to relinquish 50 per cent of the area of OML123 and OML124 and OPL90 and OPL225, excluding the areas of the properties in which petroleum

had been discovered in commercial quantities. The Corporation has submitted a relinquishment proposal to NNPC in respect of OPL90 and OPL225, but there is no assurance that such proposal will be accepted.

In addition, the Production Sharing Contract in respect of OML123 and OML124 required that not later than five years from the effective date of the PSC (May 1998), 50 per cent of the contract area (excluding any areas in which petroleum had been discovered in commercial quantities) should be relinquished pursuant to mutual agreement between NNPC and the Corporation. Although discussions commenced between NNPC and the Corporation, no area was ever relinquished in accordance with this provision of the PSC. Subsequent to the date required for such relinquishment, the OPLs under which the Corporation held the areas were converted to OML123 and OML124. The Corporation has obtained legal advice to the effect that, as the conversion from the previous OPL's into the OML's required the consent of NNPC, the obligation under the PSC to relinquish the area is no longer effective. However, there is a risk that NNPC could in the future request such relinquishment.

In addition, in accordance with the *Petroleum Act*, 50 per cent of the area covered by an OML must be relinquished within 10 years of the date of grant of the OML. OML123 and OML124 were granted in July 2002 and contain such provisions. There can be no assurance that the area proposed by the Corporation will be accepted by the government, and there is a risk that such relinquishment may necessarily contain reserves already booked by the Corporation, leading to a restatement of its reserves.

The Ngosso Concession contains a change of control provision which provides that "if [the State], pursuant to Article 34 of the Petroleum Regulations shall have become aware of changes in the factors constituting control of the Contractor or of an entity comprising Contractor, [the State] may, within 90 days order the latter to take all necessary steps in order to terminate the operations which led to such changes". Accordingly, any change of control in the Corporation could have an adverse effect on the Corporation's operations in Cameroon.

In addition, certain Gabonese Production Sharing Contracts may contain mandatory relinquishment provisions upon entering into subsequent exploration phases.

Crime and governmental or business corruption could significantly disrupt the Corporation's ability to conduct its business and could materially adversely affect its financial condition and results of operations.

The Corporation operates and conducts business in Nigeria, Gabon and other countries which have experienced high levels of governmental and business corruption and other criminal activity. The Corporation and its officers, directors and employees have been, and may in the future be, the subject of press speculation, government investigations and other accusations of corrupt practices or illegal activities, including improper payments to individuals of influence. The Nigerian government is reported to be conducting corruption and other investigations into the oil industry in Nigeria. However, the Corporation is not aware of any current investigations specific only to the Corporation or any adverse findings against it, its directors, officers or employees or any member of the AOG group, other than as disclosed below.

Although the Corporation's policy mandates strict compliance with internal policies and applicable laws which prohibit corrupt payments to government officials or other businesses or persons, there is no assurance that such internal policies and procedures have been or will be adhered to by its employees. For example, two former employees of AOG, who were also directors of subsidiaries of the Corporation and had senior level responsibilities for AOG's operations in Nigeria, were convicted in Switzerland in 2000 and fined for money laundering of proceeds tied to the embezzlement of public funds related to the regime of former Nigerian President Abacha. Neither the Corporation nor AOG were charged in Switzerland, Nigeria or elsewhere in connection with the activities of these former employees.

Findings against the Corporation, its directors, officers or employees, or their involvement in corruption or other illegal activity could result in criminal or civil penalties, including substantial monetary fines, against the Corporation, its directors, officers or employees. Any government investigations or other allegations against the Corporation, its directors, officers or employees, or finding of involvement in corruption or other illegal activity by such persons, could significantly damage the Corporation's reputation and its ability to do business, including by affecting its rights under the Nigerian PSCs or by the loss of key personnel, and could materially adversely affect its financial condition and results of operations. Furthermore, alleged or actual involvement in corrupt practices or other illegal activities by AOG, the joint venture partners of the Corporation or others with whom the Corporation conducts business, could also significantly damage the Corporation's reputation and business and materially adversely affect the Corporation's financial condition and results of operations.

Interpretation and application of the laws and regulations of the countries in which the Corporation operates can be uncertain and could adversely affect the Corporation.

The jurisdictions in which the Corporation operates may have less developed legal systems than more established economies which may result in risks such as: (i) effective legal redress in the courts of such jurisdictions,

whether in respect of a breach of law or regulation, or, in an ownership dispute, being more difficult to obtain; (ii) a higher degree of discretion on the part of governmental authorities; (iii) the lack of judicial or administrative guidance on interpreting applicable rules and regulations; (iv) inconsistencies or conflicts between and within various laws, regulations, decrees, orders and resolutions; or (v) relative inexperience of the judiciary and courts in such matters. Enforcement of laws in some of the jurisdictions in which the Corporation operates may depend on and be subject to the interpretation placed upon such laws by the relevant local authority, and such authority may adopt an interpretation of an aspect of local law which differs from the advice that has been given to the Corporation. There can be no assurance that contracts, joint ventures, licences, licence applications or other legal arrangements will not be adversely affected by the actions of government authorities and the effectiveness of and enforcement of such arrangements in these jurisdictions. In certain jurisdictions, the commitment of local businesses, government officials and agencies and the judicial system to abide by legal requirements and negotiated agreements may be more uncertain and may be susceptible to revision or cancellation, and legal redress may be uncertain or delayed.

In the countries in which the Corporation does business, currently Nigeria, Cameroon, Gabon and the Kurdistan Region of Iraq, the state generally retains ownership of the minerals and consequently retains control of (and in many cases, participates in) the exploration and production of hydrocarbon reserves. Accordingly, these operations may be materially affected by host governments through royalty payments, export taxes and regulations, surcharges, value added taxes, production bonuses and other charges. In addition, transfers of interests typically require government approval, which may delay or otherwise impede transfers, and the government may impose obligations on the Corporation to complete minimum work within specified timeframes. In the future, the Corporation may extend its interests in operations to other countries where similar circumstances may apply.

The legislative framework of the oil and gas industry in Iraq is in the early stages of development and it is not certain how the provisions of the recently adopted Iraqi constitution will be interpreted and applied. Unfavourable interpretations or applications of the Iraqi constitution or the legislative framework with respect to the oil and gas industry could have a materially adverse effect on the Corporation's interests in the Kurdistan Region of Iraq.

The Corporation must comply with the regulatory regimes of the countries in which it operates, and such compliance may result in increased expenditure.

The Corporation is subject to extensive government laws and regulations governing prices, taxes, royalties, allowable production, waste disposal, pollution control and similar environmental laws, the export of oil and many other aspects of the oil business.

Although the Corporation believes it has good relations with the current governments of Nigeria, Gabon, Cameroon, Iraq and the Kurdistan Region of Iraq, there can be no assurance that the actions of present or future governments in these countries, or of governments of other countries in which the Corporation may operate in the future, will not materially adversely affect the business or financial condition of the Corporation.

While the Nigeria Production Sharing Contracts do not include the right to produce and sell natural gas, the Corporation does produce a significant amount of natural gas which is associated with the Corporation's oil production. The majority of the Corporation's produced associated natural gas is currently flared, as there is no established market in which to sell the natural gas, nor does the Corporation have the necessary facilities to capture or transport natural gas. The Nigerian government has announced what is commonly known as the "Flares Down by 2008" policy that that will require petroleum producers to reduce the amount of natural gas that is flared in petroleum production. The Nigerian government has not officially announced any details on how this policy will be implemented and has not enacted any legislation implementing the "Flares Down" policy. Consequently, no assurances can be given that the Corporation will be able to comply with such policy.

The Corporation's production may be constrained by production or export quotas.

Nigeria is a member of OPEC, and the Corporation may operate in other OPEC-member countries in the future. Production in OPEC-member countries can be constrained from time to time by OPEC production quotas. In Nigeria, NNPC allocates production quotas among oil producers in Nigeria based on the aggregate of the technical production limits per well for a producer as negotiated between the producer and the Nigerian government. If the aggregate of all the producers' technical production limits exceeds Nigeria's OPEC quota, the production allocations among the producers are reduced pro rata. The Corporation has historically exceeded its production allocation but has applied for and been granted additional quota from the Nigerian government for all of its excess oil production. There can be no assurance that if the Corporation exceeds its allocated quota in the future that it will continue to receive additional quota from the Nigerian government.

In addition to OPEC production quotas, oil producing countries can also implement export quotas. The Corporation may be constrained in exporting oil that it produces in the future due to the imposition of export quotas.

US holders of Common Shares and the Corporation may be subject to sanctions imposed by the US government if the Corporation decides to pursue operations in countries subject to US economic sanctions.

US economic sanctions may be imposed on US holders of Common Shares or the Corporation in connection with future operations in countries subject to US economic sanctions, such as Iran. To date, the Corporation has only had discussions with the Iranian national oil company regarding certain projects. Two US sanctions programs, the Iranian Transactions Regulations ("ITR") and the *Iran and Libya Sanctions Act* ("ILSA") may potentially apply to the Corporation's future activities in Iran if the Corporation decides to undertake substantive activities in that country.

The ITR, which are administered by the Office of Foreign Assets Control ("OFAC") of the US Treasury Department, apply only to US persons and thus would not apply to the Corporation. However, the ITR may apply to US holders of Common Shares. The Corporation has taken steps it feels are sufficient to mitigate the risk to US holders but there can be no assurance that such steps will be successful. If the OFAC takes a different view of these steps and pursues enforcement of the ITR, US holders may be subject to a range of civil and criminal penalties. The imposition of such penalties may have a material adverse effect on the price of the Common Shares.

The ILSA grants the US President authority to impose sanctions against persons or entities found by the President to have knowingly made investments in Iran's petroleum industry of \$20 million or more in any twelve month period. Sanctions could include restrictions on obtaining credit from US financial institutions and the US export import bank and on the ability of the Corporation to procure goods, services and technology from the US. To date, the Corporation has not invested the requisite amount in Iran to trigger ILSA sanctions. Additionally, the Corporation understands that the US government has not yet imposed any sanctions under ILSA, despite having a number of foreign investment projects in Iran under investigation.

The Corporation may in the future invest sufficient money in activities in Iran to trigger ILSA and cannot predict future interpretation of ILSA by the US government regarding any such future activities. It is possible that the US President may determine that these future activities constitute violations of ILSA and subject the Corporation to sanctions. The imposition of sanctions could have an adverse impact on the Corporation's business, results of operations or financial condition.

The controlling shareholder(s) of the Corporation will exercise significant control over the affairs of the Corporation.

As of the date of this prospectus, AOG owns 110,000,100 Common Shares and controls approximately 78.5 per cent of the aggregate voting shares of the Corporation prior to giving effect to this offering and prior to giving effect to the Reorganization which allows AOG to control substantially all the actions taken by the shareholders of the Corporation, including the election of directors. After giving effect to the Reorganization but prior to giving effect to the offering, it is likely that AOG will have sufficient voting power to, among other things, delay, deter or prevent a change in control of the Corporation that might otherwise be beneficial to its shareholders and may also discourage acquisition bids for the Corporation and limit the amount certain investors may be willing to pay for the Common Shares.

Certain directors and senior management of the Corporation hold positions with AOG and other companies, some of which operate in the petroleum industry. These other positions could create, or appear to create, potential conflicts of interest when these directors and senior management are faced with decisions that could have different implications for the Corporation and their other business interests. In the past, the Corporation has appointed committees of independent directors to evaluate opportunities where conflicts of interest exist or are perceived to exist, and the Corporation will continue to deal with conflicts in this fashion. Although the Corporation expects that such conflicts will be handled in accordance with the CBCA and its corporate governance policies, there is no assurance that all conflicts will be adequately addressed.

The Corporation has entered into an agreement with AOG in which AOG has agreed to conduct its upstream petroleum business entirely through the Corporation, to not compete with the Corporation in such business and to offer the Corporation any upstream petroleum business opportunities made available to AOG, in each case so long as AOG and Jean Claude Gandur together own not less than 25 per cent of the issued and outstanding Common Shares. It is nonetheless possible that other conflicts could arise that may ultimately be resolved in a manner unfavourable to the Corporation.

Sales of Common Shares by controlling shareholder(s) could have an adverse effect on the price of the Common Shares.

In connection with the Reorganization, AOG shareholders have agreed to defer delivery of any of the approximately 45 million Common Shares to be delivered pursuant to the Reorganization to them for a period of 90 days after the closing of this offering. In addition, AOG has agreed not to sell any Common Shares (or any securities giving the right to

acquire Common Shares) for a period of 90 days after the closing of the offering without the prior consent of RBC Dominion Securities Inc., Merrill Lynch Canada Inc. and Scotia Capital Inc., which consent may not be unreasonably withheld. The Corporation cannot predict whether substantial numbers of the Common Shares will be sold in the open market following the expiry of the restrictions above. In addition, AOG or the Underwriters may choose to waive enforcement of such lock-ups. Sales of a large number of the Common Shares in the public markets, or the potential for such sales, could decrease the trading price of the Common Shares and could impair the Corporation's ability to raise capital through future offerings of Common Shares.

Investors may face risks related to the Corporation's holding company structure.

The Corporation holds all of its assets in its wholly owned subsidiary, APNV. In the event of insolvency, liquidation or other reorganization of APNV, the holders of the Common Shares will have no right to proceed against the assets of APNV or to cause the liquidation or bankruptcy of the company under applicable bankruptcy laws. Creditors of APNV would be entitled to payment in full from such assets before the Corporation, as a shareholder, would be entitled to receive any distribution therefrom. Claims of creditors of APNV will have priority with respect to the assets and earnings of the company over the claims of the Corporation, except to the extent that the Corporation may itself be a creditor with recognized claims against APNV ranking at least *pari passu* with such other creditors, in which case the claims of the Corporation would still be effectively subordinate to any mortgage or other liens on the assets of APNV and would be subordinate to any indebtedness of APNV.

ELIGIBILITY FOR INVESTMENT

In the opinion of Fasken Martineau DuMoulin LLP, counsel to the Corporation, and Fraser Milner Casgrain LLP, counsel to the Underwriters, as of the date of this prospectus, the Subscription Receipts offered hereby and the Common Shares issued on the conversion of the Subscription Receipts, if issued on the date hereof, would be, at such date, qualified investments under the *Income Tax Act* (Canada) ("Tax Act") and the regulations thereunder for a trust governed by a registered retirement savings plan, registered retirement income fund, registered education savings plan or deferred profit sharing plan, in each case within the meaning of the Tax Act, provided that (i) in the case of the Subscription Receipts, the Corporation deals at arm's length with each person who is an annuitant, a beneficiary, an employer or subscriber under the governing plan of the plan trust for such plans; and (ii) the Common Shares are listed, or would become listed upon issue, on a prescribed stock exchange (which includes the TSX).

LEGAL PROCEEDINGS

Addax Petroleum is not a party to, nor are any its respective properties subject to, any material legal proceedings nor are any such proceedings known by Addax Petroleum to be contemplated.

LEGAL MATTERS

Certain legal matters relating to the securities offered hereby have been passed upon, on behalf of Addax Petroleum, by Fasken Martineau DuMoulin LLP and, on behalf of the Underwriters, by Fraser Milner Casgrain LLP.

AUDITORS, REGISTRAR AND TRANSFER AGENT

The auditors of Addax Petroleum are Deloitte & Touche LLP, Chartered Accountants, 3000 Scotia Centre, 700 2nd Street SW, Calgary, Alberta, T2P 0S7.

Computershare Investor Services Inc. at its principal office in Calgary, Alberta is the registrar and transfer agent for the Common Shares.

INTEREST OF EXPERTS

None of Fasken Martineau DuMoulin LLP; Fraser Milner Casgrain LLP counsel to Underwriters, Netherland, Sewell & Associates, Inc., McDaniel & Associates Consultants Ltd. or any director, officer, employee or partner thereof, has received or will receive a direct or indirect interest in the property of Addax Petroleum or any of its respective associates or affiliates. As at the date hereof, the aforementioned persons, and companies beneficially own, directly or indirectly, (both before and after giving effect to this offering assuming said persons do not subscribe for Subscription Receipts) less than one per cent of the securities of Addax Petroleum and its respective associates and affiliates. None of the aforementioned persons or companies, nor any director, officer, partner or employee of any of the aforementioned persons or companies is or is expected to be elected, appointed or employed as a director, officer or employee of Addax Petroleum or of any of its respective associates or affiliates.

Deloitte & Touche LLP are independent with respect to Addax Petroleum within the meaning of the Rules of Professional Conduct of the Institute of Chartered Accountants of Alberta.

ADDITIONAL INFORMATION

Additional information relating to the Corporation is available through the Internet on the Canadian System for Electronic Document Analysis and Retrieval (SEDAR) which can be accessed at www.sedar.com. Such additional information is not, and will not be deemed to be, incorporated by reference into this prospectus except as and only to the extent explicitly provided for under the heading "Documents Incorporated by Reference".

STATUTORY RIGHTS OF WITHDRAWAL AND RESCISSION

Securities legislation in certain of the provinces of Canada provides purchasers with the right to withdraw from an agreement to purchase securities. This right may be exercised within two business days after receipt or deemed receipt of a prospectus and any amendment. In several of the provinces, securities legislation further provides a purchaser with remedies for rescission or, in some jurisdictions, damages if the prospectus or any amendment contains a misrepresentation or is not delivered to the purchaser, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province for the particulars of these rights or consult with a legal advisor.

APPENDIX "A"
PRO FORMA FINANCIAL STATEMENTS

Compilation Report

To the Directors of Addax Petroleum Corporation:

We have read the accompanying unaudited pro forma consolidated balance sheet of Addax Petroleum Corporation (the "Corporation") as at March 31, 2006 and the unaudited pro forma consolidated statements of operations for the three months ended March 31, 2006 and the year ended December 31, 2005 and have performed the following procedures:

1. Compared the figures in the column captioned "APC" to the unaudited consolidated financial statements of the Corporation as at March 31, 2006 and for the three months then ended, and to the audited consolidated financial statements of Addax Petroleum N.V. as at December 31, 2005 and for the year then ended, respectively, and found them to be in agreement.
2. Compared the figures in the column captioned "PanAfrican" to the unaudited consolidated financial statements of PanAfrican Energy Corporation (Mauritius) Limited as at March 31, 2006 and for the three months then ended, and the audited consolidated financial statements of PanAfrican Energy Corporation (Mauritius) Limited as at December 31, 2005 and for the year then ended, respectively, and found them to be in agreement.
3. Made enquiries of certain officials of the Corporation who have responsibility for financial and accounting matters about:
 - (a) the basis for determination of the pro forma adjustments; and
 - (b) whether the unaudited pro forma financial statements comply as to form in all material respects with the regulatory requirements of the securities regulatory authorities in Canada.
4. The officials:
 - (a) described to us the basis for determination of the pro forma adjustments; and
 - (b) stated that the unaudited pro forma consolidated financial statements comply as to form in all material respects with the regulatory requirements of the securities regulatory authorities in Canada.
5. Read the notes to the unaudited pro forma consolidated financial statements, and found them to be consistent with the basis described to us for determination of the pro forma adjustments.
6. Recalculated the application of the pro forma adjustments to the aggregate of the amounts in the columns captioned "APC" and "PanAfrican" as at March 31, 2006 and for the three months ended March 31, 2006, and for the year ended December 31, 2005, and found the amounts in the column captioned "Pro forma" to be arithmetically correct.

A pro forma financial statement is based on management assumptions and adjustments which are inherently subjective. The foregoing procedures are substantially less than either an audit or a review, the objective of which is the expression of assurance with respect to management's assumptions, the pro forma adjustments, and the application of the adjustments to the historical financial information. Accordingly, we express no such assurance. The foregoing procedures would not necessarily reveal matters of significance to the unaudited pro forma financial statements, and we therefore make no representation about the sufficiency of the procedures for the purposes of a reader of such statements.

Addax Petroleum Corporation
Notes to Pro Forma Consolidated Financial Statements
December 31, 2005 and March 31, 2006
(unaudited)

1. Basis of presentation

The unaudited pro forma consolidated balance sheet as at March 31, 2006 and the unaudited pro forma consolidated statements of operations for the three months then ended and the year ended December 31, 2005 (collectively, the "pro forma financial statements") of Addax Petroleum Corporation ("the Corporation" or "APC") have been prepared by management in accordance with Canadian generally accepted accounting principles for inclusion in a prospectus relating to the offering of subscription receipts of the Corporation.

The pro forma financial statements have been prepared from and should be read in conjunction with the:

- Audited consolidated financial statements of Addax Petroleum N.V. as at December 31, 2005 and 2004 and for each of the years in the three year period ended December 31, 2005;
- Unaudited consolidated financial statements of the Corporation as at March 31, 2006 and 2005 and for the three month periods ended March 31, 2006 and 2005;
- Audited consolidated financial statements of PanAfrican Energy Corporation (Mauritius) Limited ("PanAfrican") as at December 31, 2005 and 2004 and for the years ended December 31, 2005 and 2004; and
- Unaudited consolidated financial statements of PanAfrican as at March 31, 2006 and for the three month periods ended March 31, 2006 and 2005.

Accounting policies used in the preparation of the pro forma financial statements are in accordance with those used in the preparation of Addax Petroleum N.V.'s audited consolidated financial statements as at and for the year ended December 31, 2005. As a result of the acquisition of Addax Petroleum N.V. by the Corporation on February 16, 2006, the historical financial statements of the Corporation are those of Addax Petroleum N.V.

Other information which was available at the time of preparation of the pro forma financial statements has also been considered. In the opinion of management, these pro forma financial statements include all material adjustments necessary for fair presentation.

The underlying assumptions for the pro forma adjustments provide a reasonable basis for presenting the significant financial effects directly attributable to the transactions discussed herein, however, the pro forma financial statements are not necessarily indicative of the results of operations expected in future periods.

2. Pro forma adjustments

The unaudited pro forma consolidated balance sheet gives effect to the following transactions as if they had occurred on March 31, 2006, while the unaudited pro forma consolidated statements of operations for the three months ended March 31, 2006 and the year ended December 31, 2005 give effect to the following transactions as if they had occurred on January 1, 2005:

- 2.1 Issuance of 13,000,000 common shares of the Corporation on conversion of 13,000,000 subscription receipts for net proceeds of \$299.7 million.
- 2.2 Assumption of \$900,000,000 in debt.
- 2.3 Acquisition of all the outstanding shares of PanAfrican for \$1.433 billion financed from the proceeds discussed in 2.1 and 2.2 above as well as available cash in the Corporation.
- 2.4 Depletion and future income taxes are adjusted for the fair value increase of property, plant and equipment in PanAfrican as a result of the acquisition described in 2.3 above. The preliminary purchase price allocation is as follows: current assets \$43,793; goodwill \$934,010; property plant and equipment \$707,700; current liabilities (\$39,135); asset retirement obligation (\$19,002); and future income taxes (\$194,366).

2.5 Interest expense is adjusted for the increase in debt described in 2.2 above.

3. Earnings per share

Pro forma earnings per share for the three months ended March 31, 2006 and year ended December 31, 2005 have been calculated using 153.1 million common shares outstanding.

APPENDIX "B"
AUDITED ANNUAL FINANCIAL STATEMENTS
OF
PANAFRICAN ENERGY CORPORATION (MAURITIUS) LIMITED

AUDITORS' REPORT TO THE DIRECTORS

We have audited the consolidated balance sheets of PanAfrican Energy Corporation (Mauritius) Limited as at December 31, 2005 and 2004 and the consolidated income statements, changes in shareholder's equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the company as at December 31, 2005 and 2004 and the results of its operations and cash flows for the years then ended in accordance with Canadian generally accepted accounting principles.

Notes to the Consolidated Financial Statements

(tabular amounts in US\$000, except where noted)

PanAfrican Energy Corporation (Mauritius) Limited ("PAEM" or the "Company") is an international energy company engaged in the exploration, production and marketing of oil and natural gas. The Company is incorporated and registered in Mauritius. On behalf of the Board, the Consolidated Financial Statements were approved on 28th July 2006.

On the 6th August 2004, the Company issued shares in exchange for the Gabonese operations of PanOcean Energy Corporation Limited. The financial statements present the historical financial position, results of operations and cash flows on a carve-out basis from PanOcean Energy Corporation Limited as if the Company had operated as a stand-alone entity subject to PanOcean Energy Corporation Limited control prior to August 6th, 2004.

1. BASIS OF PREPARATION

The Consolidated Financial Statements of the Company and its subsidiaries are measured and presented in US dollars on the basis that this reflects the currency in which the main operating cash flows arise. Management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the period. Actual results could differ from these estimates.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates.

a) Basis of consolidation

(i) The consolidated financial statements have been prepared by management in accordance with accounting principles generally accepted in Canada. The Consolidated Financial Statements are prepared on the historical cost basis and include the accounts of the Company and the following wholly owned subsidiaries:

Subsidiary	Registered in:
PANAFRICAN NZE Inc. S.A.	Gabon
PANAFRICAN REMBOUE Inc. S.A	Gabon
PANAFRICAN MAGHENA Inc. S.A.R.L	Gabon
PANAFRICAN ETAME INC.	British Virgin Islands
PANAFRICAN AWOUN INC.	British Virgin Islands
PANAFRICAN IRIS INC.	British Virgin Islands
PANAFRICAN THEMIS INC.	British Virgin Islands

(ii) Transactions eliminated upon consolidation

Inter-company balances and transactions, and any unrealised gains arising from inter-company transactions, are eliminated in preparing the Consolidated Financial Statements.

b) Foreign currency

Foreign currency transactions are recorded at the rate of exchange prevailing at the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at year-end rates. Non-monetary items are translated at historic rates, unless such items are carried at market value, in which case they are translated using the exchange rates that existed when the values were determined. Any resulting exchange rate differences are taken to the income statement.

c) Petroleum and natural gas properties

The Company follows the full cost method of accounting for petroleum and natural gas properties whereby all costs relating to the acquisition, exploration and development of petroleum and natural gas reserves are capitalized. Such costs are accumulated in the Company's one cost centre, Gabon Africa.

These capitalized costs together with production and related equipment are depleted and depreciated using the unit-of-production method based on estimated gross proved petroleum and gas reserves as determined by independent reservoir engineers. Petroleum and natural gas reserves and production are converted into equivalent units based upon relative energy content.

Costs of acquiring and evaluating unproved properties are initially excluded from depletion calculations. These unevaluated properties are assessed periodically to ascertain whether impairment has occurred. When proved reserves are assigned or the property is considered to be impaired, the cost of the property or the amount of the impairment is added to costs subject to depletion calculations.

In applying the full cost method, the Company calculates a ceiling test whereby the carrying value of petroleum and natural gas properties is compared quarterly to the sum of undiscounted future cash flows expected to result from proved reserves and the lower of cost and market of unproved properties. Cash flows are based on third party quoted forward prices, adjusted for transportation and quality differentials. Should the ceiling test result in an excess of carrying value, the Company would then measure the amount of impairment by comparing the carrying amounts of petroleum and natural gas properties to an amount equal to the estimated net present value of future cash flows from proved plus probable reserves and the lower of cost and market of unproved properties. A risk free interest rate is used to arrive at the net present value of future cash flows. The carrying value of petroleum and natural gas properties in excess of the future cash flows is recorded as a permanent impairment.

Proceeds from the sale of petroleum and natural gas properties are applied against capitalized costs, with no gain or loss recognized, unless such a sale would alter the rate of depletion and depreciation by more than 20 per cent.

Substantially all exploration and production activities are conducted jointly with others. Accordingly, the accounts reflect only the Company's proportionate interest in such activities.

d) Depreciation

Depreciation in respect of non-petroleum assets is charged to the income statement on a straight-line basis over the estimated useful economic lives of each class of asset. Land is not depreciated. The estimated useful lives are as follows:

Leasehold improvements	Over Remaining life of the lease
Plant and equipment	3 years
Computer equipment	3 years
Motor Vehicles	3 years
Office fixture and fittings	4 years

e) Inventories

The Company recognises oil inventory held in storage tanks at the fields, together with any oil in transit to the terminal or point of sale. They are valued at the lower of cost and net realisable value. The cost of inventory relates to the direct cost of production on an actual basis, together with the associated level of depletion and amortisation on a cost per barrel basis.

f) Trade and other receivables

Trade and other receivables are stated at cost less impairment losses.

g) Cash and cash equivalents

Cash and cash equivalents include cash on deposit and highly liquid investments with original maturities of three months or less.

h) Pension

The Company does not operate a pension plan, although it does make defined contributions to employee's personal plans. Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement as incurred.

i) Provision for abandonment

The Company uses the fair value method to provide for asset retirement obligations. The fair value of an asset retirement obligation is recognized in the period in which it is incurred when a reasonable estimate of fair value can be made. The fair value is based on estimated reserve life, inflation and discount rates. The provision is recorded as a long-term liability, with a corresponding increase in the carrying value of the associated asset. The capitalized amount is depleted on a unit-of-production basis. The liability amount is increased each reporting period due to the passage of time with this accretion charged to earnings in the period. Revisions to the estimated timing of cash flows or to the original estimated undiscounted cost would also result in an increase or decrease to the asset retirement obligation. Actual asset retirement expenditures are charged against the liability to the extent of the liability recorded. Any difference between the actual costs incurred and the amount of the liability recorded is recognized as a gain or loss in earnings in the period the costs are incurred.

j) Revenue, royalties and production sharing contracts

The Company recognises revenue from crude oil and natural gas sales with a transfer of title effected upon delivery of its working interest volumes to the buyer. In the case of revenue derived from a pilot project, the revenue received is offset against the project's non-depreciable asset base.

Substantially all the Company's revenue is shared under the terms of the various Production Sharing Contracts ("PSC") with the Republic of Gabon as represented by the Ministry of Mines, Energy and Petroleum. Under the PSCs, the Company and its other non-governmental partners, if any, pay all operating and capital costs. Each PSC establishes specific terms for the Company to recover these costs in accordance with a formula based on monthly production volumes ("Cost Recovery Oil") and to receive a share of production in excess of the Cost Recovery Oil ("Profit Oil"). The government's share of operating costs are recorded in operating expense when incurred and capital costs are recorded in Property, Plant & Equipment and are depleted using the unit-of-production method. Profit Oil attributable to the government includes an amount in respect of all deemed income taxes payable by the Company under the laws of Gabon. All other government interests, other than income taxes, are considered to be government royalties and burdens.

k) Taxation

Deferred taxation is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of asset and liabilities, using tax rates enacted or substantially enacted at the balance sheet date. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

m) Joint interest operations

It is standard industry practice to conduct petroleum and natural gas operations jointly with other exploration and production companies and, accordingly, the Company only reflects its proportionate interest in such activities.

n) Measurement uncertainty

The amounts recorded for depletion and depreciation of petroleum and natural gas properties, the provision for asset retirement obligations and the cost recovery ceiling test are based on estimates. These estimates include proved and probable reserves, production rates, petroleum and natural gas prices, future costs and other relevant assumptions. By their nature, these estimates are subject to measurement uncertainty and the effect of changes in such estimates on the financial statements of future periods could be significant.

3. ACQUISITION

On the 6th August 2004, the Company issued shares in exchange for the Gabonese operations of PanOcean Energy Corporation Limited. The financial statements present the historical financial position, results of operations and cash flows on a carve-out basis from PanOcean Energy Corporation Limited as if the Company had operated as a stand-alone entity subject to PanOcean Energy Corporation Limited control prior to August 6th, 2004.

	Book value at acquisition
Petroleum and natural gas properties	86,921
Inventories	2,263
Trade and other receivables	35,304
Cash	7,338
Current liabilities	(18,688)
Provision for abandonment	(4,988)
Deferred tax provision	(3,531)
Interest bearing loan	(1,663)
Equity in net assets acquired	<u>102,956</u>

4. SEGMENTAL REPORTING

The Company has only one operating segment, being the exploration, production and marketing of oil and natural gas in Gabon. All revenue is earned from this operating segment. Substantially all capital assets are located in Gabon.

Major customers

Substantially all of the Company's gross revenues are comprised of sales to two major crude oil buyers which accounted for 91% (2004: 86%) of crude oil sales. At December 31, 2005, \$11 million (2004: \$19.9 million) of the Company's trade receivables are receivable from these two companies.

5. TAXATION

All of the Company's tax relates to its operations in Gabon, where the corporate tax rate is 35%. The Company settles its obligations in Gabon through its PSC arrangements in that country.

	2005	2004
Profit before taxation	79,761	41,864
Provision for income taxes calculated at the statutory rate	27,916	14,652
Add (deduct) the tax effect of:		
Non-deductible royalties and revenue burdens	4,623	1,121
Other operating income	(73)	(34)
General and administrative	1,913	1,886
Foreign exchange	(134)	141
Recognition of previously unrecorded deferred tax assets	-	(782)
Tax provision	34,245	16,984

The deferred income tax liability includes the following temporary differences:

	2005	2004
Differences between tax bases and carrying value of petroleum properties	(10,128)	(5,034)

6. INVENTORIES

The inventory relates to physical oil inventories and consists of 248,000 barrels of oil at 31 December 2005 (2004: 232,000 barrels) being the Company's share of oil inventories held at the Obangue storage facility, on the Etame floating production storage offloading vessel and on the Remboué tanker.

7. PETROLEUM AND NATURAL GAS PROPERTIES

As at 31 December 2005 petroleum and natural gas property costs included an amount of \$28.0 million (2004: \$23.4 million), which has been excluded from the depletion calculations. The 2005 costs relate to the Iris/Themis and Awoun concessions, while the 2004 costs related to the Maghena and Awoun concessions. The ability of the Company to recover costs incurred on its pre-production stage activities on these properties is dependent on the future commercial production from these projects. General and administrative costs of \$0.9 million (2004: \$0.5 million) have been capitalised during the year.

It is estimated by the Company's independent petroleum engineers that in order to bring the total proved reserves to production, a total of \$182 million of future development costs will be incurred.

The table below shows the Company's petroleum and natural gas properties and related equipment.

	GABON	NON PETROLEUM ASSETS	TOTAL
COSTS			
As at 1 January 2005	169,547	435	169,982
Additions	91,748	599	92,347
Increase in abandonment	13,120	-	13,120
As at 31 December 2005	274,415	1,034	275,449
DEPRECIATION			
As at 1 January 2005	66,493	87	66,580
Charge in period - depletion	22,198	-	22,198
Charge in period - depreciation	-	289	289
As at 31 December 2005	88,691	376	89,067
NET BOOK VALUE			
As at 1 January 2005	103,054	348	103,402
As at 31 December 2005	185,724	658	186,382

	LEASEHOLD LAND AND BUILDINGS	FIXTURES AND FITTINGS	MOTOR VEHICLES	PLANT AND EQUIPMENT	COMPUTER EQUIPMENT	TOTAL
COSTS						
As at 1 January 2005	13	18	262	46	96	435
Additions	99	8	406	2	84	599
As at 31 December 2005	112	26	668	48	180	1,034
DEPRECIATION						
As at 1 January 2005	-	4	41	15	27	87
Charge in the period	-	10	183	33	63	289
As at 31 December 2005	-	14	224	48	90	376
NET BOOK VALUE						
As at 1 January 2005	13	14	221	31	69	348
As at 31 December 2005	112	12	444	-	90	658

8. PROVISION FOR ABANDONMENT

	2005	2004
Balance at beginning of year	5,146	4,766
Increase during the year	13,120	-
Accretion	418	380
Balance as at end of year	18,684	5,146

A provision of \$18.7 million has been recognised for future decommissioning costs. Increases in abandonment costs of \$13.1 million have been recognised for future decommissioning costs relating to Tsiengui, Obangue, Etame and Awoun. The costs are expected to be incurred in 2008 to 2019. The provision has been based on internal engineering estimates and regulations in effect at the period end, using current prices inflated at 3% per annum and discounted using a rate of 8%. The Company estimates the total undiscounted amount of cash flows required to settle its asset retirement obligations at 31 December 2005 is \$27.1 million (2004: \$14.1 million).

9. FINANCIAL INSTRUMENTS

The Company is exposed to market risks resulting from fluctuations in commodity prices, foreign exchange rates and interest rates in the normal course of operations. The Company monitors these risks and periodically may enter into financial instruments to manage its exposure to these risks.

As at 31 December 2005 and as at the date hereof, the Company held no derivative instruments, long-term sales contracts or other contracts for delivery and accordingly the carrying amounts and estimated fair values were nil.

Credit risk

Substantially all the accounts receivable are due from customers in the oil and gas industry and are subject to normal credit risks.

Foreign currency risk

The Company's exposure to foreign currency risk is limited to exchange rate fluctuations on foreign currency cash and outstanding payable balances.

Fair values

Financial instruments of the Company carried on the balance sheet consist mainly of current assets, current liabilities. There were no significant differences between the carrying value of these financial instruments and their estimated fair value due to their short term to maturity.

10. CAPITAL STOCK

	2005			2004		
	Authorised	Issued	Valuation at par value	Authorised	Issued	Valuation at par value
Number of shares						
Common Shares						
As at 1 January and 31 December	2	2	2	2	2	2

All of the common shares are owned by Pan-Ocean Energy Corporation Limited, the ultimate Parent Company. The common shares have been recorded at their par value of \$1. There were no changes in the capital stock of the Company in 2005.

11. COMMITMENTS.

The following is a summary of the Company's commitments detailing payments due for each of the next five years and thereafter.

	Total	Less than one year	1-3 years	4-5 years	after 5 years
Commitments	22,901	18,784	4,117	-	-

The Company has the following commitments:

- > 31.36% share of the Etame charter payments, which are \$6.2 million per annum (\$4.1 million in years 1-3).
- > 25.71% share of the Themis offshore exploration well, to be drilled in November 2006, of \$2.9 million.
- > Rig hire contract, to date of first extension at 31 October 2006, of \$7.4 million.
- > Contract for the construction of the Tsiengui to Coucal pipeline of \$2.3 million.

12. CONTINGENT LIABILITIES

Under the acquisition of the interest of the Iris and Themis permits from Surnburnt Downs Co. Pty Ltd in April 2005, there are further purchase considerations due in relation to each block of up to \$2 million Australian dollars respectively:

- (i) \$1 million Australian dollars in the event of a commercial discovery during the second or third exploration period or any subsequent exploration period; and
- (ii) \$1 million Australian dollars following the granting of an exploitation licence by the Republic of Gabon.

13. ULTIMATE PARENT UNDERTAKING

The ultimate parent undertaking of the Company is Pan-Ocean Energy Corporation Limited, a company registered in Jersey, Channel Islands. As at December 31, 2005 a total of \$10.4 million was due to Pan-Ocean Energy Corporation Limited (2004 : \$19.9 million was due from Pan-Ocean Energy Corporation Limited) The balance due to Pan-Ocean Energy Corporation Limited is non interest bearing and has no specific terms for repayment.

During 2005 PanOcean repaid the \$19.9 million. The \$10.4 million relates to charges for services from the Pan-Ocean entities of \$3.9 million (2004: \$3.2 million), together with the direct funding to Gabon of \$1.6 million (2004: \$nil), direct payment of the Energy package insurance premium of \$1.3 million (2004: \$nil) and the acquisition of the Iris and Themis permits for \$3.6 million (2004: \$nil). The balance of the 2004 \$19.9 million related to the prior periods funding of Pan-Ocean's operations by the Company. These transactions have been recorded at the exchange amounts which is the amount agreed to between the related parties.

14. SUBSEQUENT EVENT

On July 20, 2006 Pan-Ocean Energy Corporation Limited entered into an agreement with Addax Petroleum Corporation ("Addax Petroleum") whereby Addax Petroleum will acquire 100% of the shares of the PanAfrican Energy Corporation (Mauritius) Limited, for cash consideration of Cdn. \$1.605 billion.

Notes to the Consolidated Financial Statements

(tabular amounts in US\$000, except where noted)

Basis of preparation

PanAfrican Energy Corporation (Mauritius) Limited is a wholly owned subsidiary of Pan-Ocean Energy Corporation Limited. The consolidated financial statements of PanAfrican Energy Corporation (Mauritius) Limited (the "Company") have been prepared by management in accordance with accounting principles generally accepted in Canada. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates.

These interim consolidated financial statements have been prepared by management following the same accounting policies and methods that were used and disclosed in the audited consolidated financial statements for the year ended December 31, 2005 and should be read in conjunction with the audited financial statements. These audited consolidated interim financial statements include all adjustments necessary to present fairly the results for the interim period ended March 31, 2006. Certain information and footnote disclosure normally included in the financial statements has been condensed or omitted.

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries;

I. SEGMENTAL REPORTING

The Company has only one operating segment, being the exploration, production and marketing of oil and natural gas in Gabon. All revenue is earned from this operating segment. Substantially all capital assets are located in Gabon:

Major customers

Substantially all of the Company's gross revenue are comprised of sales to two major crude oil buyers which accounted for 93% (2005: 95%) of crude oil sales. At March 31, 2006, \$19.3 million (2005 : \$20.4 million) of the Company's trade receivables are receivable from these two companies.

2. TAXATION

All of the Company's tax relates to its operations in Gabon, where the corporate tax rate is 35%. The Company settles its obligations in Gabon through its PSC arrangements in that country.

	31st March 2006	31st March 2005
Profit before taxation	26,187	16,083
Provision for income taxes calculated at the statutory rate	9,166	5,629
Add (deduct) the tax effect of:		
Non-deductible royalties and revenue burdens	1,605	2,006
Other operating income	(46)	(18)
General and administrative	630	431
Foreign exchange	127	(1)
Tax provision	11,482	8,047

The deferred income tax liability includes the following temporary differences:

	31st March 2006	31st March 2005
Differences between tax bases and carrying value of petroleum properties	(10,603)	(5,821)

3. COMMITMENTS.

The following is a summary of the Company's commitments detailing payments due for each of the next five years and thereafter.

	Total	Less than one year	1-3 years	4-5 years	after 5 years
Commitments	19,002	16,433	2,569	-	-

The Company has the following commitments:

- > 31.36% share of the Elame charter payments, which are \$6.2 million per annum (\$2.6 million in years 1-3).
- > 25.71% share of the Themis offshore exploration well, to be drilled in November 2006, of \$2.9 million.
- > Rig hire contract, to date of first extension at 31 October 2006, of \$5.6 million.
- > Contract for the construction of the Tsiengui to Coucal pipeline of \$1.7 million.

4. CONTINGENT LIABILITIES

Under the acquisition of the interest of the Iris and Themis permits from Surnburnt Downs Co. Pty Ltd in April 2005, there are further purchase considerations due in relation to each block of up to \$2 million Australian dollars respectively:

- (i) \$1 million Australian dollars in the event of a commercial discovery during the second or third exploration period or any subsequent exploration period; and
- (ii) \$1 million Australian dollars following the granting of an exploitation licence by the Republic of Gabon

5. ULTIMATE PARENT UNDERTAKING

The ultimate parent undertaking of the Company is Pan-Ocean Energy Corporation Limited, a company registered in Jersey, Channel Islands. As at March 31, 2006 a total of \$17.3 million was due to Pan-Ocean Energy Corporation Limited (2005: a total of \$18.0 million was due from Pan-Ocean Energy Corporation Limited.) The \$18.0 million was repaid during 2005. The balance due to Pan-Ocean Energy Corporation Limited is non interest bearing and has no specific terms for repayment.

The \$17.3 million, relates to charges from the Pan-Ocean entities for finance and technical services of \$1.1 million (2005: \$0.9 million), recharge for the Energy package insurance premium of \$4.6 million (2005: \$1.3 million), direct payment of a joint venture billing statement of \$3.7 million (2005 :\$nil) and inter-company funding of \$6.1 million. The balance of \$17.3 million relates to services recharged from 2005 remaining unpaid as at March 31, 2006. The balance of the 2005 \$18 million related to the prior periods funding of Pan-Ocean's operations by the Company. These transactions have been recorded at the exchange amounts which is the amount agreed to between the related parties.

6. SUBSEQUENT EVENT

On July 20, 2006 Pan-Ocean Energy Corporation Limited entered into an agreement with Addax Petroleum Corporation ("Addax Petroleum") whereby Addax Petroleum will acquire 100% of the shares of the PanAfrican Energy Corporation (Mauritius) Limited, for cash consideration of Cdn. \$1.605 billion.

AUDITORS' CONSENT

Consent of Deloitte & Touche LLP

We have read the supplemented short form PREP prospectus of Addax Petroleum Corporation (the "Corporation") dated August 10, 2006 qualifying the distribution of subscription receipts of the Corporation (the "Prospectus"). We have complied with Canadian generally accepted standards for an auditor's involvement with offering documents.

We consent to the use through incorporation by reference in the Prospectus, of our report to the shareholder of the Corporation on the balance sheet of the Corporation as at December 31, 2005. Our report is dated March 20, 2006.

We also consent to the use through incorporation by reference in the Prospectus, of our report to the shareholder of Addax Petroleum N.V. on the consolidated balance sheets of Addax Petroleum N.V. as at December 31, 2005 and 2004 and the consolidated statements of operations, retained earnings and cash flows for each of the years in the three year period ended December 31, 2005. Our report is dated March 20, 2006.

We also consent to the use through incorporation by reference in the Prospectus, of our report to the directors of the Corporation on the balance sheet of the Corporation as at November 30, 2005. Our report is dated December 2, 2005 (except as to note 2 which is as of February 7, 2006).

We also consent to the use through incorporation by reference in the Prospectus, of our report to the directors of the Corporation and the directors of Addax Petroleum N.V. on the consolidated balance sheets of Addax Petroleum N.V. as at December 31, 2004 and 2003 and the consolidated statements of operations, retained earnings and cash flows for each of the years in the three-year period ended December 31, 2004. Our report is dated December 2, 2005 (except as to note 18 which is as of February 7, 2006).

**ADDAX
PETROLEUM CORPORATION**

CDN\$409,500,000

21,000,000 Common Shares

Price: CDN\$19.50 per Common Share

This prospectus qualifies the distribution of an aggregate of 21,000,000 common shares (the "Offered Shares") of Addax Petroleum Corporation. See "Plan of Distribution".

Addax Petroleum is an international oil and gas exploration and production company focused on Africa and the Middle East. The Corporation is the largest independent oil producer in Nigeria and has increased its crude oil production from an average of 8,800 barrels per day for 1998 to an average of approximately 74,450 barrels per day for October 2005. Addax Petroleum believes that its demonstrated technical expertise, combined with its excellent operational reputation and strong community relationships in Africa and the Middle East, make it well positioned to continue to grow its reserves and production.

The terms of this offering were established by negotiation among RBC Dominion Securities Inc., Merrill Lynch Canada Inc., Scotia Capital Inc., CIBC World Markets Inc., TD Securities Inc., National Bank Financial Inc., Canaccord Capital Corporation, FirstEnergy Capital Corp. and Peters & Co. Limited (collectively, the "Underwriters"), Addax Petroleum and The Addax and Oryx Group Ltd. ("AOG"). Presently, there is no market through which the common shares of the Corporation (the "Common Shares") may be sold and purchasers may not be able to resell the Offered Shares purchased under this prospectus. The Toronto Stock Exchange (the "TSX") has conditionally approved the listing of the Common Shares. Listing is subject to the Corporation fulfilling all of the requirements of the TSX on or before May 3, 2006. See "Risk Factors" for certain considerations relevant to an investment in the Offered Shares.

	Price to the Public	Underwriters' Fees	Net Proceeds to the Corporation ⁽¹⁾
	(CDN\$)	(CDN\$)	(CDN\$)
Per Common Share	19.5000	0.975	18.525
Total Offering ⁽²⁾	409,500,000	20,475,000	389,025,000

Notes:

- Before deducting the expenses of the offering payable by the Corporation, estimated to be CDN\$4.5 million, which will be paid by the Corporation out of the proceeds of the offering, CDN\$55,575,000 of the net proceeds of this offering will be used to fund the Pre-IPO Transactions. See "Use of Proceeds".
- Addax Petroleum Corporation has granted to the Underwriters an over-allotment option (the "Over-Allotment Option"), exercisable, in whole or in part, at any time until 30 days after closing of this offering, to purchase from the Corporation up to an additional 2,100,000 Common Shares, at the same price as set forth above, to cover over-allotments, if any, and for market stabilization purposes. If the Over-Allotment Option is exercised in full, the total "Price to the Public", "Underwriters' Fees" and "Net Proceeds to the Corporation" (before deducting expenses of the offering) will be CDN\$450,450,000, CDN\$22,522,500 and CDN\$427,927,500, respectively. This prospectus also qualifies the distribution of the Over-Allotment Option and the Common Shares issuable upon exercise of the Over-Allotment Option. See "Plan of Distribution".

The Underwriters, as principals, conditionally offer the Offered Shares, subject to prior sale, if, as and when issued and sold by the Corporation and accepted by the Underwriters in accordance with the conditions contained in the Underwriting Agreement referred to under "Plan of Distribution" and subject to the approval of certain legal matters on behalf of the Corporation by Fasken Martineau DuMoulin LLP and on behalf of the Underwriters by Fraser Milner Casgrain LLP.

RBC Dominion Securities Inc. is an indirect wholly owned subsidiary of a Canadian chartered bank that is a lender to Addax Petroleum N.V. under a revolving credit facility. Consequently, Addax Petroleum may be considered to be a connected issuer of RBC Dominion Securities Inc. under applicable securities legislation. See "Relationship Between the Corporation and RBC Dominion Securities Inc."

In the opinion of counsel, based on legislation in effect on the date of this prospectus, the Offered Shares are eligible investments as set forth under the heading "Eligibility for Investment".

Subscriptions will be received subject to rejection or allotment, in whole or in part, and the right is reserved to close the subscription books at any time without notice. On closing, a book entry certificate representing the Offered Shares will be issued in registered form to The Canadian Depository for Securities Limited ("CDS") or its nominee and will be deposited with CDS. Shareholders will not receive physical share certificates representing their ownership. A purchaser of the Offered Shares will receive only a customer confirmation from the registered dealer which is a CDS participant and from or through which the Offered Shares are purchased. See "Plan of Distribution". Closing of this offering is expected to occur on or about February 15, 2006, or such later date as the Corporation and the Underwriters may agree, but in any event not later than March 15, 2006.

Except as otherwise indicated in this prospectus, references to "\$" and to "dollar" refer to currency of the United States of America and references to oil reserves and production refer to reserves and production calculated on a gross basis.

SUMMARY

The following is a summary of the principal features of this offering and is qualified by, and should be read together with, the more detailed information and financial data and statements contained elsewhere in this prospectus. Please refer to the "Glossary", "Abbreviations" and "Conversions" for the meaning of certain terms used in this prospectus.

Addax Petroleum

Addax Petroleum is an international oil and gas exploration and production company focused on Africa and the Middle East. The Corporation is the largest independent oil producer in Nigeria and has increased its crude oil production from an average of 8,800 barrels per day for 1998 to an average of approximately 74,450 barrels per day for October 2005, representing a compounded annual growth rate of approximately 34 per cent. The Corporation has grown by acquiring under-developed properties in established basins and has increased its production by utilizing advanced and proven technologies. Addax Petroleum believes that its demonstrated technical expertise, combined with its excellent operational reputation and strong community relationships throughout Africa and the Middle East, make it well positioned to continue to grow its reserves and production.

Addax Petroleum's Average Oil Production 1998 - October 2005

In 2004, Addax Petroleum produced an average of 39,990 bbls/d and generated \$171.0 million of Cash Flow From Operations. For the nine months ended September 30, 2005, Addax Petroleum produced an average of 62,090 bbls/d and generated \$322.2 million of Cash Flow From Operations. As of September 30, 2005, Addax Petroleum had estimated proved reserves of 109.3 mmbbls and estimated proved and probable reserves of 201.3 mmbbls. The reserves of the Corporation were evaluated as at September 30, 2005 by Netherland, Sewell & Associates, Inc. ("NSAI"), independent oil and natural gas reservoir engineers.

Addax Petroleum's principal properties in West Africa are as follows:

- In Nigeria, the Corporation has a 100 per cent interest in two Production Sharing Contracts covering the following four Addax Petroleum operated properties:
 - OML123, which accounts for the majority of the Corporation's oil production, is located offshore in shallow water and produces medium to light quality crude oil (29° API);
 - OML124 is located onshore and produces light quality crude oil (36° API);

- OPL90 is located offshore in medium depth water and produces light quality crude oil (37° API); and
- OPL225 is an offshore exploration property located in medium depth water, adjacent to OPL90.
- In Cameroon, Addax Petroleum has a 60 per cent interest in the Ngosso Property, an offshore exploration property operated by the Corporation.
- In Gabon, Addax Petroleum has a 42.5 per cent interest in the Kiarsseny Property, an offshore exploration property operated by Tullow Oil.

The following table summarizes the production, development and exploration properties of the Corporation.

Properties Summary Table

Country	License	Area ⁽¹⁾⁽²⁾ (acres)	Water Depth (m)	Addax Petroleum's Interest (%)	Average Oil Production		Gross Oil Reserves ⁽²⁾⁽³⁾		
					October 2005 (bbls/d)	9 Months Ended September 30, 2005 (bbls/d)	Proved (mmbbls)	Proved Plus Probable (mmbbls)	Proved Plus Probable Plus Possible (mmbbls)
Nigeria	OML123	90,700	3-40	100	50,970	45,970	71.4	144.9	195.2
	OML124	74,100	onshore	100	3,530	3,510	10.0	12.6	28.0
	OPL90	85,300	100-160	100	19,950	12,610	27.9	43.7	60.9
	OPL225	241,900	50-210	100	-	-	-	-	-
Cameroon	Ngosso	70,300	0-8	60	-	-	-	-	-
Gabon	Kiarsseny	571,600	0-800	42.5	-	-	-	-	-
Total		<u>1,133,900</u>			<u>74,450</u>	<u>62,090</u>	<u>109.3</u>	<u>201.3</u>	<u>284.1</u>

Notes:

- (1) The table sets forth the area of the Corporation's interest after giving effect to the relinquishment proposals for OPL90 and OPL225 made by the Corporation to NNPC. See "Properties and New Ventures — Nigeria Properties — Property Boundaries".
- (2) Area presented excludes the area in the Disputed Area in OML123. Reserves presented exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.3 mmbbls. See "Properties and New Ventures — Nigeria Country Discussion — International Relations".
- (3) Proved and probable reserves as at September 30, 2005 as reported in the Reserve Report under "Forecast Prices and Costs Case".

Addax Petroleum is also pursuing the following major new venture opportunities.

- In Nigeria, the Okwok Property represents the first-farm-in for Addax Petroleum in the country. The Okwok Property is located within ExxonMobil's offshore license area, OML67, which is immediately south of Addax Petroleum's OML123. Addax Petroleum has entered into a joint venture agreement with Oriental Energy, a Nigerian company, pursuant to which the Corporation will receive a 40 per cent interest in the field and will conduct operations in its capacity as technical advisor. The joint venture agreement is conditional upon Oriental Energy concluding negotiations for a farm-in agreement with ExxonMobil and Nigerian government approval. If Addax Petroleum is successful in obtaining its interest in the Okwok Property, the gross contingent oil resources attributable to its interest as at September 30, 2005 are reported by NSAI to be 6.7 mmbbls.
- In the Joint Development Zone of Nigeria and the Democratic Republic of Sao Tome and Principe, the Block 4 Property is a large deep-water offshore exploration property. Addax Petroleum has entered into a participation agreement with ERHC Energy. Earlier in 2005, ERHC Energy, together with another company (which subsequently ended its participation), were conditionally awarded a 60 per cent interest in the Block 4 Property. On January 30, 2006, the Joint Development Authority conditionally approved the replacement of the Noble-ERHC consortium with the ERHC-Addax consortium and the designation of Addax Petroleum as operator for the Block 4 Property. Pursuant to the participation agreement the Corporation anticipates that it may acquire up to a 33.3 per cent interest in, and become operator of, the Block 4 Property.
- In the Kurdistan Region of Iraq, Addax Petroleum has entered into a farm-in agreement with Genel Enerji A.S. for a potential interest in a Production Sharing Contract to govern the Taq Taq field.

Competitive Strengths

Addax Petroleum has grown rapidly by combining the entrepreneurial spirit of its founders with the technical and operational expertise of staff recruited from international oil and gas companies. Management of the Corporation believes that the following competitive strengths should allow Addax Petroleum to continue to increase its production and reserves and maximize value for its shareholders.

Largest Independent Oil Producer in Nigeria with a Quality Asset Base

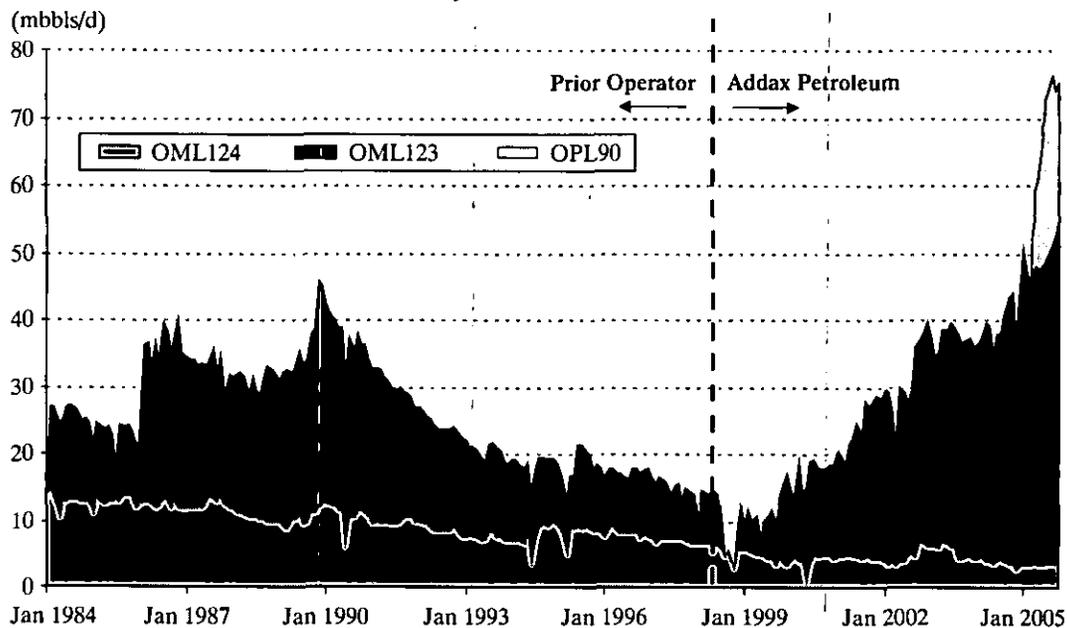

Nigeria is a prolific oil-producing nation with a competitive fiscal regime. Nigeria ranks among the top ten countries in the world in terms of oil reserves, with proved crude oil reserves reported by OPEC to be 35.2 billion barrels. Chevron, ENI, ExxonMobil, Shell and Total all have significant operations in Nigeria and produce, together with NNPC, approximately 2.2 mmbbls/d of oil, representing almost 90 per cent of the country's total oil production.

Addax Petroleum is the largest independent oil producer in Nigeria and operates all of its Nigerian producing properties. The Corporation produced an average of 74.5 mmbbls/d for October 2005 from 68 wells. The Corporation's crude oil sales are comprised of medium to light gravity sweet crude oil blends (29° to 37° API). Approximately 95 per cent of the Corporation's crude oil production is offshore and all of the Corporation's production is sold directly into international markets. The Corporation has a balanced portfolio of oil reserves, including 109 mmbbls of proved reserves, 92 mmbbls of probable reserves and 83 mmbbls of possible reserves.

Demonstrated Operational and Technical Expertise

Addax Petroleum has increased its production by employing advanced and proven technologies, such as 3D seismic data analysis and horizontal drilling, to optimize oil recoveries from producing but under-developed fields. In particular, the Corporation has developed specific expertise and a unique focus on producing oil from thin oil rims, commonly found in shallow water and onshore properties. Since inception, the Corporation has drilled 126 wells (124.8 net) and has achieved a commercial success rate of approximately 83 per cent. The following chart shows the average monthly oil production from the Corporation's Nigerian producing properties, including the period before the Corporation began operating the properties, and demonstrates Addax Petroleum's operational and technical expertise.

***Average Monthly Oil Production
January 1984 - October 2005***

Addax Petroleum has increased production while maintaining firm control of operating costs. Despite industry-wide increases in the costs of drilling and other third party operating services, Addax Petroleum has maintained operating costs between \$5.50 and \$6.50 per barrel over the past three years.

The OPL90 property development is Addax Petroleum's first major greenfield development and further demonstrates the Corporation's technical expertise. Development of the Okwori field in OPL90 began in July 2004 and the large and technically demanding project commenced production on schedule in March 2005. The Okwori field and adjacent Nda field in OPL90 are estimated by NSAI to contain 43.7 mmbbls of proved and probable oil reserves and are expected to produce at a combined average production rate of 33 mmbbls/d in 2006. In September 2005, Addax Petroleum received a technical excellence award at the 18th World Petroleum Congress in recognition of its successful development of the Okwori field.

Near and Medium Term Growth Opportunities in West Africa

Addax Petroleum's properties contain a number of development projects which the Corporation expects should increase its production in the near and medium term. The Corporation expects its drilling and development program in Nigeria to increase average daily production from 65 mmbbls/d in 2005 to 85 mmbbls/d in 2006. The Corporation's planned projects in Nigeria include ongoing development of the Okwori and Nda fields in OPL90 and an infill drilling program in OML123 and OML124. The Corporation has contracted three drilling rigs in Nigeria for 2006 and is actively pursuing a fourth drilling rig.

Addax Petroleum also has 20 unappraised discoveries, 23 significant exploration prospects and more than 25 leads on its properties in Nigeria, Cameroon and Gabon. As at September 30, 2005, NSAI reports Addax Petroleum's gross prospective oil resources to be 298 mmbbls (164 mmbbls risked). In addition, NSAI reports that the gross contingent gas resources on Addax Petroleum's Nigerian properties are 1.25 tcf. In 2006, Addax Petroleum intends to acquire 800 km² of 3D seismic data for OPL225 and 170 km² of 3D seismic data for the Ngosso Property and to drill 29 wells (28.4 net) on its West African properties.

Expansion Potential in New Ventures

Addax Petroleum's current new venture initiatives could have a significant impact on the Corporation. The Corporation expects to begin developing the Okwok Property together with Oriental Energy during 2006. The Corporation believes it is well-positioned to farm-in or otherwise acquire properties in West Africa including properties from major international oil companies that are shifting their focus from onshore and shallow water properties to deep-water exploration and development properties.

The Block 4 Property is a large deep-water offshore block in the Joint Development Zone of Nigeria and the Democratic Republic of Sao Tome and Principe. Pursuant to the participation agreement, the Corporation anticipates that it may acquire up to a 33.3 per cent interest in, and become operator of, the Block 4 Property.

In the Kurdistan Region of Iraq, Addax Petroleum entered into a farm-in agreement with Genel Enerji A.S. for a potential interest in a Production Sharing Contract to govern the Taq Taq field.

Excellent Operational Reputation and Strong Community Relationships

Addax Petroleum recognizes the importance of petroleum resources to its host countries. The Corporation has made it a priority to conduct itself in a socially responsible manner and to develop co-operative relationships with host country authorities, local communities and indigenous oil companies. Addax Petroleum believes that it has an excellent operational reputation and strong relationships which help facilitate timely approval for its projects, avoid unplanned disruptions in production and establish the Corporation as a desirable partner for indigenous oil companies that are becoming increasingly important in the African petroleum industry. Addax Petroleum has not experienced any major unplanned disruptions in production since it began producing oil in 1998.

The Corporation proactively addresses host government policy objectives. In Nigeria, these policy objectives include maximizing reserves and production, developing the local natural gas market and employing indigenous staff and contractors. More than 90 per cent of Addax Petroleum's employees in Nigeria are Nigerian citizens. In

addition, the Corporation's community relations policy promotes infrastructure development projects and education programs. The Corporation has funded the construction of schools, expanded clean water supplies, paved roads and provided scholarships to Nigerians for primary, secondary and post-secondary education.

Experienced Management Team with Significant Shareholdings

Members of Addax Petroleum's senior management team have demonstrated their ability to identify and successfully execute business plans in African countries. Addax Petroleum has successfully recruited experienced management who are attracted to the Corporation's entrepreneurial culture from major international oil companies.

The senior executives of Addax Petroleum have on average more than 20 years of experience in the international oil and gas industry and extensive operating experience in Africa. Jean Claude Gandur, the Chief Executive Officer and co-founder of Addax Petroleum, has approximately 30 years of petroleum industry experience and has more than 20 years of experience managing businesses in a variety of industry sectors in Africa. In recognition of his role developing businesses in Africa, Mr. Gandur has received awards and recognitions from countries throughout Africa including the Republic of Congo, Senegal and Benin. James Pearce, the Chief Operating Officer of Addax Petroleum and the Managing Director of the Corporation's Nigerian operations, has approximately 30 years of petroleum industry experience and held senior management positions with Chevron in West Africa for over 15 years prior to joining Addax Petroleum. Michael Ebsary, the Chief Financial Officer of Addax Petroleum, has held management positions with Elf and Occidental for over 10 years. Other members of Addax Petroleum's management team also have experience in West Africa and with international oil and gas companies such as BHP Petroleum, British Gas, Shell and Texaco.

At the closing of this offering, AOG will direct that up to 9.6 million Common Shares (representing up to eight per cent of AOG's current shareholdings) be transferred to or for the benefit of current and former directors, officers and employees of Addax Petroleum in recognition of their contribution to the development of the Corporation's business. Subsequent to the offering, the Corporation intends to adopt a performance based incentive plan to be implemented and administered by the Board.

Commitment to Strong Corporate Governance

Addax Petroleum believes that strong corporate governance is essential to creating shareholder value and maintaining the confidence of investors. Addax Petroleum Corporation has developed comprehensive corporate governance policies and procedures, and has adopted a "best practices" approach to corporate governance. Addax Petroleum Corporation has an experienced Board of Directors, the majority of whom are independent from Addax Petroleum and its controlling shareholder, AOG. In addition, Addax Petroleum Corporation has separated the offices of Chairman and CEO with the Chairman being independent from both Addax Petroleum and AOG. The Chairman of Addax Petroleum Corporation is Mr. Peter Dey, who previously chaired the Toronto Stock Exchange Committee on Corporate Governance in Canada.

The Board of Directors has also adopted all of the recommendations set out in Canadian Securities Administrators National Policy 58-201 — *Corporate Governance Guidelines*. These include, among other things, creating an Audit Committee and a Corporate Governance, Nominating and Compensation Committee, each comprised solely of independent directors, as well as a Technical and Reserves Committee, comprised of a majority of independent board members.

Strategy

Addax Petroleum has driven its growth in Nigeria by acquiring oil properties deemed by others to have limited remaining production potential and using its strong in-house technical and operational expertise to grow reserves and production in a cost effective manner. The Corporation has made it a priority to recruit and retain indigenous personnel and to actively participate in and contribute to community development projects. Addax Petroleum believes it has developed an excellent reputation among government authorities, communities and businessmen that has been critical in providing access to opportunities and obtaining the cooperation needed to successfully execute projects. Addax Petroleum is now extending its successful strategy to other regions in Africa and the Middle East where substantial growth opportunities exist.

The Corporation's strategy is to build on the significant growth and profit enhancement opportunities within its existing license areas while also pursuing new venture opportunities.

Existing Properties Addax Petroleum intends to continue its strategy in its existing properties by:

- investing in facilities and infrastructure to increase production throughput, improve operating efficiencies and position itself to monetize natural gas resources;
- completing identified development projects; and
- evaluating unappraised discoveries and pursuing identified exploration prospects.

New Venture Opportunities Addax Petroleum is currently pursuing a number of new venture opportunities in West Africa (Nigeria, Cameroon and Angola), North Africa (Algeria, Libya and Egypt) and the Middle East (Iraq, Iran, Yemen and Oman). The Corporation believes that it is well positioned to capitalize on numerous opportunities in its focus areas that arise as (i) national governments tender new acreage in future bid rounds; (ii) major international oil and gas companies reduce their involvement in onshore and shallow water offshore oil fields; and (iii) indigenous oil companies seek financially and technically strong partners to jointly develop their properties. In Algeria and Libya, Addax Petroleum has passed stringent pre-qualifying guidelines and can bid as an operator in licensing rounds in those countries. The Corporation is implementing its new venture strategy through the following initiatives:

- acquiring or farming-in to additional properties in its focus areas, as the Corporation has done with the Okwok Property;
- obtaining an interest in the Block 4 Property located in the Joint Development Zone of Nigeria and the Democratic Republic of Sao Tome and Principe; and
- acquiring an interest in a Production Sharing Contract governing the Taq Taq field in the Kurdistan Region of Iraq.

The Corporation also intends to continue investing in technologies to improve operating efficiency and establish itself as a leader in areas of corporate responsibility in Africa and the Middle East.

Capital Expenditure Program

Addax Petroleum has a substantial capital expenditure program for its current properties and major new venture opportunities, budgeted to be \$167 million in the fourth quarter of 2005 and \$815 million in 2006. The budgeted capital expenditures for 2006 represent a significant increase over historical levels, as shown in the table below.

Budgeted and Historical Capital Expenditures

Location	License/ Field	Budgeted						Historical		
		2006			3 Months Ended December 31, 2005			9 Months Ended September 30, 2005		
		Drilling & Seismic	Facilities & Other	Total	Drilling & Seismic	Facilities & Other	Total	Total	2004 Total	2003 Total
		(\$million)						(\$million)		
Nigeria	OML123	147	236	383	28	56	84	99	134	108
	OML124	22	5	27	4	5	9	-	1	30
	OPL90/225	197	93	290	39	29	68	173	166	8
Cameroon	Ngosso	16	-	16	2	-	2	1	1	4
Gabon	Kiarsseny	6	-	6	4	-	4	2	11	-
Subtotal		388	334	722	77	90	167	275	313	150
Nigeria	Okwok ⁽¹⁾	18	54	72	-	-	-	-	-	-
Kurdistan Region of Iraq	Taq Taq	13	8	21	-	-	-	-	-	-
Total		419	396	815	77	90	167	275	313	150

Note:

(1) Includes a \$35 million farm-in fee payable by Addax Petroleum prior to the commencement of the capital expenditure program for the Okwok Property.

Capital expenditures for OML123, OML124, OPL90 and OPL225 in Nigeria, in the fourth quarter of 2005 and in 2006 are budgeted to be \$861 million in aggregate, representing 88 per cent of the Corporation's total capital expenditure budget for those periods. Under the applicable Nigerian Production Sharing Contracts, the Corporation has historically recovered more than 80 per cent of the drilling and seismic expenditures in the year in which the expenditure is incurred. See "Fiscal Terms — Nigeria".

Capital expenditures for OML123 will fund significant infrastructure investment to sustain future production as well as a two-rig drilling program that includes development, infill, extension, appraisal and exploration drilling. These budgeted capital expenditures are expected to increase production from approximately 46 mbbls/d in 2005 to approximately 48 mbbls/d in 2006. Capital expenditures for OPL90 and OPL225 are expected to increase production from approximately 16 mbbls/d in 2005 to approximately 33 mbbls/d in 2006. These budgeted capital expenditures will fund seismic data acquisition as well as a one-rig drilling program that includes development and exploration drilling.

Capital expenditures for the Corporation's other properties and major new venture opportunities will be incurred to fund seismic data acquisition, technical studies and appraisal drilling necessary to prepare detailed field development plans.

Addax Petroleum expects its portfolio of development projects, unappraised discoveries, identified exploration prospects and new ventures to provide the Corporation with the opportunity to continue a sizeable capital expenditure program in 2007 and beyond.

Petroleum Reserves

The tables below summarize the petroleum reserves and the present value of future net revenue associated with Addax Petroleum's reserves evaluated in the Reserve Report prepared by NSAI, independent oil and natural gas reservoir engineers, based on forecast and constant price and cost assumptions presented in accordance with NI 51-101. The tables summarize the data contained in the Reserve Report and, as a result, may contain slightly different numbers than the Reserve Report due to rounding. Future net revenue values, whether calculated without discount or using a discount rate, are estimated values and do not represent fair market value. There is no assurance that such price and cost assumptions will be attained and variances could be material. The recovery and reserves estimates of Addax Petroleum's petroleum reserves provided herein are estimates only and there is no assurance that the estimated reserves will be recovered. Actual petroleum reserves may be greater than or less than the estimates provided herein. The estimates of reserves and future net revenue for individual properties included in this prospectus may not reflect the same confidence level as estimates of revenue for all properties, due to the effects of aggregation. See "Petroleum Reserves and Operational Matters".

The estimate of gross reserves means Addax Petroleum's total working interest prior to the deduction of NNPC's share of Profit Oil. The estimate of net reserves includes deductions under the Nigerian Production Sharing Contracts for Royalty Oil and NNPC's share of Profit Oil. Reserves presented exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.3 mmbbls. See "Properties and New Ventures — Nigeria Country Discussion — International Relations".

The "after taxes" figures are the future net revenue estimates after all deductions under the Nigerian Production Sharing Contracts including Royalty Oil, NNPC's share of Profit Oil, Tax Oil, Niger Delta Development Commission levy, education tax and tax inversion penalty. The "before taxes" figures only include deductions for Royalty Oil and NNPC's share of Profit Oil. NSAI is of the opinion that the "after taxes" case is representative of the fiscal regime under the Nigerian Production Sharing Contracts.

Selected Financial Information

The following table presents a summary of historical consolidated financial data for each of the nine months ended September 30, 2005 and September 30, 2004 and for each of the years ended December 31, 2004, 2003 and 2002 derived from the financial statements of the Corporation at each of these dates and for the periods then ended. The summary of historical consolidated financial data set forth below may not contain all of the information that is important to a prospective investor and should be read along with "Presentation of Financial Information", "Selected Financial Information", "Management's Discussion and Analysis of Financial Condition and Results of Operations", and the consolidated financial statements and related notes of the Corporation for each of the nine months ended September 30, 2005 and September 30, 2004 and for each of the years ended December 31, 2004, 2003 and 2002 included in this prospectus. The results for the nine months ended September 30, 2005 are not necessarily indicative of results for the full year. All financial information with respect to the Corporation has been presented in United States dollars in accordance with Canadian GAAP.

Notes:

- (1) All historic per share amounts are calculated on the basis of 60,030,000 outstanding Common Shares of Addax Petroleum N.V., before giving pro forma effect to the completion of the Pre-IPO Transactions.
- (2) All Pro Forma per share amounts are calculated on the basis of 120,000,000 outstanding Common Shares of Addax Petroleum Corporation, after giving pro forma effect to the completion of the Pre-IPO Transactions. See "Interest of AOG in Material Transactions — Share Transfer Agreement."
- (3) The Corporation does not have any outstanding securities that are convertible into, or exchangeable for, Common Shares.

The Offering

Offering Price	CDN\$19.50 per Common Share.
Offered Shares	21,000,000 Common Shares.
Over-Allotment Option	Addax Petroleum Corporation has granted the Over-Allotment Option to the Underwriters, exercisable in whole or in part, at any time until 30 days after closing, to purchase up to 2,100,000 additional Common Shares on the same terms as set forth in this prospectus to cover over-allotments, if any, and for market stabilization purposes.
Use of Proceeds	The net proceeds to the Corporation from the sale of the Offered Shares are estimated to be CDN\$384,525,000 million (CDN\$423,427,500 million if the Over-Allotment Option is exercised in full) after deducting the fees payable to the Underwriters and the estimated expenses of this offering. Of the net proceeds, CDN\$328,950,000 will be used to fund the Corporation's 2006 capital expenditure programs and for working capital purposes and CDN\$55,575,000 will be used to fund the purchase of the issued and outstanding shares of APNV. Pending application of funds for capital expenditures and working capital purposes, a portion of such net proceeds will be used to temporarily repay amounts outstanding under the Credit Facility. See "Addax Petroleum — Pre-IPO Transactions" and "Addax Petroleum — Capital Expenditure Program".
Dividend Policy	Addax Petroleum Corporation intends to declare quarterly cash dividends. The payment and the amount of dividends declared in any fiscal quarter will depend on Addax Petroleum Corporation's earnings, financial requirements and other conditions existing which the Board of Directors may consider relevant at such time including applicable restrictions arising under the Credit Facility on the ability of APNV to pay dividends or other distributions to the Corporation. Subject to the factors described above, Addax Petroleum Corporation intends to pay its first quarterly dividend for the quarter ending June 30, 2006. See "Dividends".
Incorporation	Addax Petroleum Corporation was incorporated under the <i>Canada Business Corporations Act</i> on September 6, 2005 to facilitate this offering by acquiring all of the shares of Addax Petroleum N.V., a corporation incorporated under the laws of the Netherlands Antilles. The registered office of Addax Petroleum Corporation is located at 3400, 350 - 7th Avenue S.W., Calgary, Alberta, Canada, T2P 3N9.
Pre-IPO Transactions	<p>Concurrently with the closing of this offering, Addax Petroleum Corporation will acquire all of the issued and outstanding shares of Addax Petroleum N.V. from AOG in exchange for 117,000,000 Common Shares and CDN\$55,575,000 million.</p> <p>Prior to the closing of this offering, Addax Petroleum N.V. will declare and pay additional dividends of up to an aggregate of \$120 million. The dividend amount will be equal to management's estimate of the Corporation's CFFO net of capital expenditures from October 1, 2005 to the closing of this offering, while maintaining long-term debt at the November 30, 2005 level of approximately \$80 million.</p>

Shareholdings Post-Closing

After giving effect to the Pre-IPO Transactions and the closing of this offering, the Corporation will have 138,000,100 Common Shares outstanding, of which 15.2 per cent of the Common Shares will be held by investors under this offering, 77.8 per cent of the Common Shares will be held by AOG and 7.0 per cent of the Common Shares will be held by or on behalf of current and former directors, officers and employees of the Corporation (16.5 per cent, 76.7 per cent and 6.9 per cent if the Over-Allotment Option is exercised in full).

Closing

The closing of this offering is anticipated to occur on or about February 15, 2006 and in any event not later than March 15, 2006.

Eligibility for Investment

Subject to certain assumptions, limitations and restrictions, in the opinion of Fasken Martineau DuMoulin LLP, counsel to the Corporation, and Fraser Milner Casgrain LLP, counsel to the Underwriters, the Offered Shares, if as and when listed on a prescribed stock exchange (including the TSX), will be qualified investments for a trust governed by a registered retirement savings plan, a registered retirement income fund, a registered education savings plan or a deferred profit sharing plan under the *Income Tax Act* (Canada) and the regulations thereunder.

Risk Factors

The securities offered hereby should be considered highly speculative due to the nature of the Corporation's business and the location of its primary assets and business operations. A prospective investor should consider carefully the risks and uncertainties set out below, in addition to the other information contained in this prospectus, before making an investment decision. Additional risks and uncertainties not presently known to the Corporation or that it currently deems to be immaterial may also impair its business and affect the price of its Common Shares. If any of the events described in this prospectus as a risk or uncertainty actually occurs, the Corporation's business, results of operations or financial condition could be materially adversely affected. See "Risk Factors".

Risks relating to the business of the Corporation

- The Corporation's failure to replace its current reserves would have a material adverse effect on its business and financial condition.
- Exploration and development activities are inherently risky and are subject to change.
- Failure to obtain governmental approvals and fulfill contractual commitments may adversely affect the Corporation's business.
- The loss of any of the Corporation's executive officers and key employees could have an adverse impact on its business.
- The Corporation's operations are subject to potential losses that may not be covered by insurance.
- The Corporation is dependent on an affiliated company for the marketing of the oil the Corporation produces.
- The Corporation shares a trademark and a tradename with a group of companies and any adverse development affecting the trademark or tradename of any of those companies could materially adversely affect the business, goodwill or reputation of the Corporation.
- The Corporation may not be able to secure financing for its future exploration, development, production and acquisition plans.
- The Corporation could be subject to labour or other unplanned production disruptions.
- Future litigation could adversely affect the Corporation's business, results of operations or financial condition.
- The Corporation is subject to certain risks related to the nature of the Corporation's business and its present stage and speed of development.
- There are risks inherent in the Corporation's strategy of geographic diversification and acquisition of new exploration and development properties.
- The Corporation is exposed to the risks associated with commodity hedging activities.
- Joint ventures entered into by the Corporation could lead to additional costs.

Risks relating to the petroleum industry

- Volatility of petroleum prices could have a material adverse effect on the Corporation's business, results of operations or financial condition.
- The Corporation could face significant liabilities under environmental laws.
- The oil reserve and oil and gas resource data in this prospectus are only estimates, and the Corporation's actual production, revenue and expenditure with respect to its reserves may be materially different from such estimates.

- The Corporation's exploration and development activities depend on its ability to procure appropriate drilling equipment.
- The Corporation operates in a highly competitive industry.
- The Corporation faces foreign exchange, interest rate and inflation risks.

Risks relating to the countries in which the Corporation currently operates and may operate in the future

- There are political, economic and other risks relating to the countries in which the Corporation currently operates or may operate in the future.
- Relinquishment obligations under applicable legislation and the terms of Production Sharing Contracts may adversely affect the total amount of the Corporation's prospective resources.
- Interpretation and application of the laws and regulations of the countries in which the Corporation operates can be uncertain and could adversely affect the Corporation.
- Crime and governmental or business corruption could significantly disrupt the Corporation's ability to conduct its business and could materially adversely affect its financial condition and results of operations.
- The Corporation must comply with the regulatory regimes of the countries in which it operates, and such compliance may result in increased expenditure.
- The Corporation's production may be constrained by production or export quotas.
- US holders of Common Shares and the Corporation may be subject to sanctions imposed by the US government if the Corporation decides to pursue operations in countries subject to US economic sanctions.

Risks relating to the Common Shares

- Uncertainties exist as to the market price and liquidity of the Common Shares as there has been no prior public market for such shares.
- The controlling shareholder(s) of the Corporation will exercise significant control over the affairs of the Corporation.
- Sales of Common Shares by controlling shareholder(s) could have an adverse effect on the price of the Common Shares.
- Investors may face risks related to the Corporation's holding company structure.

GLOSSARY

In this prospectus, unless the context otherwise requires, the following words and phrases have the meanings set forth below.

"ABV" means Addax B.V. Geneva Branch, a wholly owned subsidiary of AOG which specializes in crude oil and product trading in West Africa;

"Adanga Platform" means the production platform located in the Adanga field on OML123;

"Addax Petroleum Corporation" means Addax Petroleum Corporation, a corporation incorporated under the CBCA;

"Addax Petroleum N.V." or **"APNV"** means Addax Petroleum N.V., a corporation incorporated under the laws of the Netherlands Antilles;

"Agip" means ENI S.p.A together with all of its subsidiaries in its Agip division;

"Antan Blend" means the crude oil produced from OML123, together with the crude oil produced by the OML114 Parties, which is lifted from the Antan Terminal;

"Antan Crude Oil Supply Agreement" means the Antan Crude Oil Supply Agreement dated November 12, 2004 between Addax Petroleum N.V. and ABV, as amended by an agreement between the parties dated November 29, 2005;

"Antan Terminal" means the floating production storage and offloading vessel and the tanker mooring and manifold platform located in OML123 where oil from OML123 is loaded onto ocean-going tankers;

"AOG" means The Addax and Oryx Group Ltd., together with all of its subsidiaries other than Addax Petroleum;

"API" means the American Petroleum Institute;

"APS" means Addax Petroleum Services Ltd., a directly or indirectly wholly owned subsidiary of Addax Petroleum;

"Ashland" means Ashland Inc. together with all of its subsidiaries;

"best estimate" means, in relation to prospective and contingent resources, the best estimate of the quantity that will actually be recovered from the accumulation. If probabilistic methods are used, this term is a measure of central tendency of the uncertainty distribution (most likely/mode, P_{50} /median, or arithmetic average/mean);

"Block 4" or **"Block 4 Property"** means the property located in the north end of the Joint Development Zone;

"Board" or **"Board of Directors"** means the board of directors of Addax Petroleum Corporation;

"Bogi Platform" means the Bogi production platform located in the Disputed Area;

"BP" means BP p.l.c. together with all of its subsidiaries;

"Brass River Blend" means the crude oil produced from OML124 and commingled with crude oil produced by other parties, which is transported to the Brass River Terminal;

"Brass River Blend Crude Oil Supply Agreement" means the Brass River Blend Crude Oil Supply Agreement dated November 12, 2004 between Addax Petroleum N.V. and ABV, as amended by an agreement between the parties dated November 29, 2005;

"Brass River Terminal" means the oil production export terminal located on the Nigerian coast where oil from OML124 is loaded onto ocean-going tankers;

"Brent Crude" means crude oil produced from the Brent system in the North Sea, a price setting benchmark in the world energy market;

"Canadian GAAP" means the generally accepted accounting principles and practices in Canada, including without limiting the foregoing, the principles set forth in the Canadian Institute of Chartered Accountants ("**CICA**")

Handbook published by CICA or any successor institute and which are applicable on the effective date as at which a calculation is required to be made in accordance therewith;

“CBCA” means the *Canada Business Corporations Act*, as amended;

“CDS” means The Canadian Depository for Securities Limited;

“CFFO” or “Cash Flow From Operations” means cash from operating activities before changes in non-cash working capital. CFFO is not a standard measure under Canadian GAAP. Cash Flow From Operations measures presented in this prospectus may not be comparable to other similarly titled measures of other companies. See “Presentation of Financial Information”;

“Chevron” means Chevron Corp. together with all of its subsidiaries;

“CIP Policy” has the meaning given to it under the heading “Petroleum Reserves and Operational Matters — Insurance”;

“COGE Handbook” means the Canadian Oil and Gas Evaluators Handbook prepared jointly by The Society of Petroleum Evaluation Engineers (Calgary Chapter) and the Canadian Institute of Mining, Metallurgy and Petroleum (Petroleum Society), as amended from time to time;

“Common Share” means a common share in the share capital of Addax Petroleum Corporation;

“Common Share Incentive Plan” means the incentive share ownership plan that Addax Petroleum Corporation plans to adopt, the purpose of which is to develop the interests of the directors, officers, employees and other persons who provide on-going services to Addax Petroleum Corporation in the growth and development of Addax Petroleum Corporation by providing such individuals with the opportunity to acquire an increased proprietary interest in Addax Petroleum Corporation and to aid in attracting as well as retaining and encouraging the continued involvement of such persons with Addax Petroleum Corporation;

“ConocoPhillips” means ConocoPhillips Company together with all of its subsidiaries;

“contingent resources” means the best estimate quantities of oil or gas estimated at a given date to be potentially recoverable from known accumulations but that are not currently economic;

“Corporation” or “Addax Petroleum” means (i) before the closing of this offering, APNV, together with all of its subsidiaries and (ii) after the closing of this offering, Addax Petroleum Corporation, together with all of its subsidiaries;

“Cost Oil” has the meaning given to it under the heading “Fiscal Terms — Nigeria”;

“Credit Facility” means the Amended and Restated Senior Secured Reducing Revolving Credit Facility Agreement dated June 14, 2005 between Addax Petroleum N.V., Addax Petroleum Overseas Limited, Addax Petroleum Development (Nigeria) Limited, Addax Petroleum Exploration (Nigeria) Ltd. and Addax Petroleum Services Limited, BNP Paribas S.A. and other original lenders;

“Crude Oil Supply Agreements” means the Antan Crude Oil Supply Agreement, the Brass River Blend Crude Oil Supply Agreement and the Okwori Crude Oil Supply Agreement, each dated November 12, 2004 between Addax Petroleum N.V. and ABV, as amended by agreements between the respective parties dated November 29, 2005;

“developed non-producing reserves” means those reserves that either have not been on production, or have previously been on production, but are shut in, and the date of resumption of production is unknown;

“developed producing reserves” means those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty;

“developed reserves” means those reserves that are expected to be recovered from existing wells and installed facilities or, if facilities have not been installed, that would involve a low expenditure (e.g. when compared to the

cost of drilling a well) to put the reserves in production. The developed category may be subdivided into producing and non-producing;

“**Devon Energy**” means Devon Energy Corporation together with all of its subsidiaries;

“**Disputed Area**” means the area of OML123 awarded to Cameroon pursuant to the October 10, 2002 ruling of the International Court of Justice;

“**EBITDA**” is defined as earnings before other interest and finance charges, income taxes, depletion, depreciation and accretion, impairment of property, plant and equipment, foreign exchange gains or losses and non-controlling interest. EBITDA is not a standard measure under Canadian GAAP. EBITDA measures presented in this prospectus may not be comparable to other similarly titled measures of other companies. See “Presentation of Financial Information”;

“**Ebughu Platform**” means the production platform located in the Ebughu field in OML123;

“**ENI**” means ENI S.p.A;

“**ERHC Energy**” means ERHC Energy, Inc. together with all of its subsidiaries;

“**ExxonMobil**” means ExxonMobil Corporation together with all of its subsidiaries;

“**FOB**” means free on board;

“**FPSO**” means floating production storage and offloading vessel;

“**GDP**” means gross domestic product;

“**gross**” means (i) in respect of reserves and production, the total reserves and production attributable to Addax Petroleum’s working interest prior to the deduction of royalties and NNPC’s share of Profit Oil (which reserves are reported as “working interest” in the Reserve Report) and (ii) in respect of acreage, wells and seismic data, 100 per cent of same;

“**GTL**” means gas to liquids;

“**HSE**” means health, safety and environment;

“**Izombe Flow Station**” means the Izombe production and flow station located in OML124;

“**Joint Border Commission**” means the Nigeria Cameroon Mixed Commission established following the October 10, 2002 decision of the International Court of Justice to peacefully apply the decision;

“**Joint Development Zone**” or “**JDZ**” means the zone for joint development of petroleum and other resources established by treaty between Nigeria and the Democratic Republic of Sao Tome and Principe in the overlapping area of their respective maritime boundary claims;

“**Kiarsseny Agreement**” means the Corporation’s farm-in agreement with Tullow Oil for a 42.5 per cent interest in the Kiarsseny Production Sharing Contract;

“**Kiarsseny Production Sharing Contract**” means the Production Sharing Contract between the Government of Gabon and Tullow Oil for development and exploration activities to extract crude oil, natural gas liquids and natural gas from Kiarsseny;

“**Kiarsseny Property**” means the Kiarsseny license area, which is located offshore Gabon, where the Corporation is engaged in development and exploration activities to extract crude oil and natural gas liquids pursuant to the Kiarsseny Production Sharing Contract;

“**Knock Adoon**” means the floating production storage and offloading vessel described under the heading “Properties and New Ventures — Nigeria Properties — OML123 — Production Facilities”;

“**Knock Taggart**” means the floating production, storage and offloading vessel described under the heading “Properties and New Venture — Nigeria Properties — OML123 — Production Facilities”;

“**LNG**” means liquefied natural gas;

“LPG” means liquid petroleum gas;

“Management Services Agreement” means the Management Services Agreement, made effective January 1, 2006 between APS and AOG;

“NDDC” means the Niger Delta Development Commission;

“net” means (i) in respect of reserves and production, the total reserves and production attributable to Addax Petroleum’s working interest after deduction of Royalty Oil and NNPC’s share of Profit Oil and (ii) in respect of acreage, wells and seismic data, that share attributable to Addax Petroleum’s working interest;

“Net Offering Price” means the price per share at which the Offered Shares are sold in this offering less the Underwriters’ fees per Offered Share;

“net profit interest” means an interest in an oil and gas property consisting of a share of profits after the recovery of the costs of development and production;

“Ngosso Concession” means the concession contract between the Government of Cameroon, the Corporation and Tullow Oil for development and exploration activities to extract crude oil, natural gas liquids and natural gas from the Ngosso Property;

“Ngosso Property” means the Ngosso license area offshore Cameroon where the Corporation is engaged in development and exploration activities to extract crude oil, natural gas liquids and natural gas pursuant to the Ngosso Concession;

“NI 51-101” means National Instrument 51-101 *Standards of Disclosure for Oil and Gas Activities* of the Canadian Securities Administrators;

“Nigerian Marginal Fields” has the meaning given to it under the heading “Fiscal Terms — Nigeria — Nigerian Marginal Fields”;

“NNPC” means Nigerian National Petroleum Corporation together with all of its subsidiaries;

“Non-Competition Agreement” means the non-competition agreement between Addax Petroleum Corporation and AOG;

“NSAI” means Netherland, Sewell & Associates, Inc., independent oil and natural gas reservoir engineers;

“Occidental” means Occidental Petroleum Corporation together with all of its subsidiaries;

“OECD” means Organization for Economic Co-operation and Development;

“Offered Shares” means the securities offered by Addax Petroleum Corporation to the public hereunder, including any shares issued upon the exercise of the Over-Allotment Option unless the context otherwise requires, at a price of CDN\$19.50 per share;

“Official Selling Price” means the sales price published by NNPC for the sale of Nigerian government and NNPC crude oil entitlement to trade buyers for export. The Official Selling Price is issued by NNPC for each type of crude oil to be lifted by traders and published by the middle of each month prior to the month of lifting;

“Oil Mining Lease” or “OML” means a lease issued by the Nigerian government upon conversion of an Oil Prospecting License giving the lessee the exclusive right to produce petroleum from the geographical area covered by the Oil Mining Lease;

“Oil Prospecting License” or “OPL” means a license issued by the Nigerian government to one or more oil companies (including NNPC) giving the licensee the exclusive right to explore for petroleum in the geographical area covered by the Oil Prospecting License;

“Okwok Property” means the Okwok license area, located in OML67 offshore Nigeria;

“Okwori Blend” means the crude oil produced from OPL90;

"Okwori Crude Oil Supply Agreement" means the Okwori Crude Oil Supply Agreement dated November 12, 2004 between Addax Petroleum N.V. and ABV, as amended by an agreement between the parties dated November 29, 2005;

"Okwori Terminal" means the floating production storage and offloading vessel and the tanker mooring and manifold platform located in OPL90 where oil from OPL90 is loaded into ocean going tankers;

"OML114 Parties" means Moni Pulo Limited and Brass Exploration Unlimited;

"OML123" means the property subject to Oil Mining Lease 123 issued by the Nigerian government to NNPC, for which Addax Petroleum has the exclusive right to produce crude oil pursuant to a Production Sharing Contract;

"OML124" means the property subject to Oil Mining Lease 124 issued by the Nigerian government to NNPC, for which Addax Petroleum has the exclusive right to produce crude oil pursuant to a Production Sharing Contract;

"OPEC" means the Organization of the Petroleum Exporting Countries;

"OPL90" means the property subject to Oil Prospecting License 90 issued by the Nigerian government to NNPC, for which Addax Petroleum has the exclusive right to explore for, develop and produce crude oil pursuant to a Production Sharing Contract;

"OPL225" means the property subject to Oil Prospecting License 225 issued by the Nigerian government to NNPC, for which Addax Petroleum has the exclusive right to explore for, develop and produce crude oil pursuant to a Production Sharing Contract;

"Oriental Energy" means Oriental Energy Resources Limited together with all of its subsidiaries;

"Oriental Joint Venture Agreement" means the joint venture agreement effective September 14, 2005 between Addax Petroleum and Oriental Energy;

"Over-Allotment Option" means the over-allotment option granted by Addax Petroleum Corporation to the Underwriters which is exercisable, in whole or in part, at any time until 30 days after closing to purchase from the Corporation up to an additional 2,100,000 Common Shares, at the same price as the Common Shares offered hereunder, to cover over-allotments, if any, and for market stabilization purposes;

"Paris Club" means the informal group of official creditors whose role is to find co-ordinated and sustainable solutions to the payment difficulties experienced by debtor nations;

"Petrobras" means Petróleo Brasileiro S.A. together with all of its subsidiaries;

"Petroleum Act" means the *Petroleum Act* (Nigeria) of 1969, as amended;

"possible reserves" means those additional reserves that are less certain to be recovered than probable reserves. It is unlikely that the actual remaining quantities recovered will exceed the sum of the estimated proved plus probable plus possible reserves;

"PPT" means Petroleum Profits Tax;

"PPT Act" means the *Petroleum Profits Tax Act* (Nigeria) as amended;

"Pre-IPO Transactions" means the declaration and payment of dividends by APNV and the acquisition of all of the issued and outstanding shares of APNV by Addax Petroleum Corporation as described under the heading "Addax Petroleum — Pre-IPO Transactions";

"probable reserves" means those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated proved plus probable reserves;

"Production Sharing Contract" or "PSC" means a contract whereby a government or government corporation contracts with a petroleum company to explore for, develop and extract petroleum substances in an area that is

subject to a license held by the government corporation, at the risk and expense of the petroleum company, in exchange for a share of production;

“**Profit Oil**” has the meaning given to it under the heading “Fiscal Terms — Nigeria”;

“**prospective resources**” means the best estimate quantities of oil and gas estimated on a given date to be potentially recovered from undiscovered accumulations. They are technically viable and economic to recover;

“**proved reserves**” means those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves;

“**Realizable Price**” means “Realizable Price” as defined under the heading “Fiscal Terms — Nigeria”;

“**Reserve Report**” means the engineering report dated December 5, 2005 prepared by NSAI evaluating the crude oil reserves attributable to Addax Petroleum’s properties and certain resources effective as of September 30, 2005, in accordance with the standards contained in the COGE Handbook and the reserves and resources definitions set out by the Canadian Securities Administrators in NI 51-101 and the COGE Handbook;

“**reserves**” means those quantities of oil and gas anticipated to be economically recoverable from discovered resources;

“**Royalty Oil**” means “Royalty Oil” as defined under the heading “Fiscal Terms — Nigeria”;

“**Share Transfer Agreement**” means the share transfer agreement between a subsidiary of AOG and Addax Petroleum Corporation to be entered into prior to the closing of this offering;

“**Shell**” means Royal Dutch Shell p.l.c. together with all of its subsidiaries;

“**Statoil**” means Statoil ASA together with all of its subsidiaries;

“**Tax Oil**” has the meaning given to it under the heading “Fiscal Terms — Nigeria”;

“**Temporary Production Unit**” or “**TPU**” means a temporary production unit which is used to produce petroleum on a temporary basis;

“**Total**” means TOTAL S.A. together with all of its subsidiaries;

“**Trademark Agreement**” means the Trademark Agreement, made effective January 1, 2006, between Addax Petroleum N.V. and AOG;

“**TSX**” means the Toronto Stock Exchange;

“**Tullow Oil**” means Tullow Oil p.l.c. together with all of its subsidiaries;

“**Underwriters**” means, collectively, RBC Dominion Securities Inc., Merrill Lynch Canada Inc., Scotia Capital Inc., CIBC World Markets Inc., TD Securities Inc., National Bank Financial Inc., Canaccord Capital Corporation, FirstEnergy Capital Corp. and Peters & Co. Limited;

“**Underwriting Agreement**” means the underwriting agreement dated February 8, 2006 among the Corporation, AOG, and the Underwriters with respect to this offering; and

“**undeveloped reserves**” means those reserves expected to be recovered from known accumulations where a significant expenditure (e.g. when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves classification (proved, probable, possible) to which they are assigned.

Low	\$1.1439	\$1.1507	\$1.1657	\$1.1507	\$1.1774	\$1.2924	\$1.5110

On February 6, 2006 the Noon Buying Rate for \$1.00 United States was \$1.1457 Canadian.

FORWARD LOOKING STATEMENTS

Certain statements contained in this prospectus constitute forward looking statements under applicable securities legislation. In this prospectus, the words "may", "would", "could", "should", "will", "intend", "plan", "anticipate", "believe", "seek", "propose", "estimate", "expect" and similar expressions, as they relate to the Corporation, are often, but not always, used to identify forward looking statements. Such statements reflect the Corporation's current views with respect to future events and are subject to certain risks, uncertainties and assumptions, including, without limitation, those described in this prospectus. Many factors could cause the Corporation's actual results, performance or achievements to vary from those described in this prospectus. If one or more of these risks or uncertainties materialize, or if the assumptions underlying forward looking statements prove incorrect, actual results may vary materially from those described in this prospectus as intended, planned, anticipated, believed, estimated or expected.

In particular, this prospectus contains forward looking statements pertaining to the following:

- oil and gas reserve and resource quantities and the discounted present value of future net cash flows from these reserves;
- the ultimate recoverability of reserves;
- future production levels;
- the amount, nature, timing and effects of capital expenditures;
- plans for drilling wells;
- expectations regarding the negotiation of contractual rights;
- prices for oil and natural gas;
- timing and amount of future production, forecasts of capital expenditures and the sources of financing thereof;
- operating and other costs;
- business strategies and plans of management;
- anticipated benefits and enhanced shareholder value resulting from prospect development and acquisitions; and
- treatment under the fiscal terms of Production Sharing Contracts and governmental regulatory regimes.

The Corporation's actual results could differ materially from those anticipated in these forward looking statements if the assumptions underlying them prove incorrect, or if one or more of the uncertainties or risks described elsewhere in this prospectus materializes. See "Risk Factors". Therefore prospective investors are cautioned not to rely unduly on these forward looking statements. Except as required pursuant to applicable Canadian securities laws, the Corporation does not intend, and does not assume any obligation, to update any forward looking statements.

PRESENTATION OF FINANCIAL INFORMATION

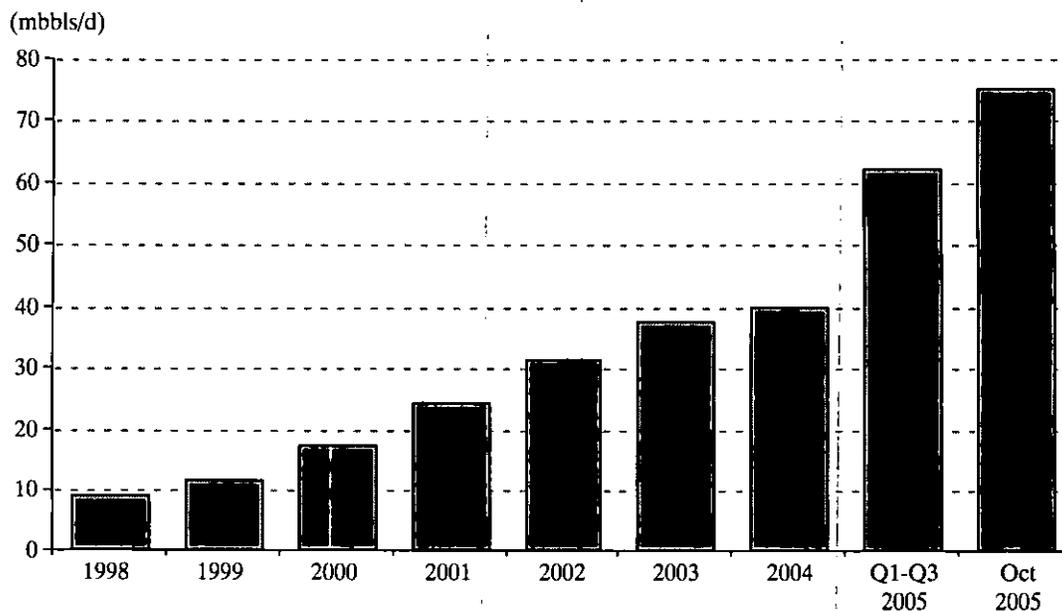

EBITDA, CFFO, average realized price per barrel sold, and operating cost per barrel sold are not recognized measures under Canadian GAAP. Management believes that EBITDA, CFFO, average realized price per barrel sold and operating cost per barrel sold are useful supplemental measures in evaluating the performance of the Corporation and in determining whether to invest in Common Shares. EBITDA or similar measures are used by many investors and financial analysts as a supplementary non-GAAP financial measure in order to evaluate operational performance and a company's ability to service its debt. In addition, Management believes that CFFO, average realized price per barrel sold and operating cost per barrel sold are also useful supplemental measures as they demonstrate the Corporation's ability to generate the cash necessary to fund future growth through capital investment or repay debt. Investors are cautioned, however, that these measures should not be construed as an alternative to net income determined in accordance with Canadian GAAP as an indication of the Corporation's performance. Addax Petroleum's method of calculating these measures may differ from other companies and accordingly, they may not be comparable to measures used by other companies. For these purposes, Addax Petroleum defines (i) EBITDA as earnings before other interest and finance charges, income taxes, depletion, depreciation and accretion, impairment of property, plant and equipment, foreign exchange gains or losses and non-controlling interest; (ii) CFFO as cash from operating activities before changes in non-cash working capital; (iii) average realized price per barrel sold as revenue from petroleum sales for the period divided by the quantity of oil sold in that period; and (iv) operating cost per barrel sold as the operating costs for the period divided by the quantity of oil sold in that period.

ADDAX PETROLEUM

Overview

Addax Petroleum is an international oil and gas exploration and production company focused on Africa and the Middle East. The Corporation is the largest independent oil producer in Nigeria, and has increased its crude oil production from an average of 8,800 barrels per day for 1998 to an average of approximately 74,450 barrels per day for October 2005, representing a compounded annual growth rate of approximately 34 per cent. The Corporation has grown by acquiring under-developed properties in established basins and has increased its production by utilizing advanced and proven technologies. Addax Petroleum believes that its demonstrated technical expertise, combined with its excellent operational reputation and strong community relationships throughout Africa and the Middle East, make it well positioned to continue to grow its reserves and production.

*Addax Petroleum's Average Oil Production
1998 - October 2005*

In 2004, Addax Petroleum produced an average of 39,990 bbls/d and generated \$171.0 million of CFFO. For the nine months ended September 30, 2005, Addax Petroleum produced an average of 62,090 bbls/d and generated \$322.2 million of CFFO. As of September 30, 2005, Addax Petroleum had estimated proved reserves of 109.3 mmbbls and estimated proved and probable reserves of 201.3 mmbbls. The reserves of the Corporation were evaluated as at September 30, 2005 by NSAI.

Corporate History

Addax Petroleum was founded in 1994 by AOG to evaluate and pursue oil and gas exploration and production opportunities in West Africa. Through its other subsidiaries, AOG carries on several different businesses worldwide with particular emphasis on Africa, including petroleum and refined products trading, oil storage, retail petroleum products and mining businesses. AOG was incorporated in 1987 and has established itself as one of the largest independent oil trading companies in Africa and the largest marine fuel supply company in West Africa.

Addax Petroleum is the only subsidiary of AOG involved in the exploration for, and production of, petroleum. AOG's strategy is to conduct its upstream petroleum business entirely through Addax Petroleum

and, therefore, pursuant to the Non-Competition Agreement, it has agreed not to compete with Addax Petroleum in such business, provided that AOG and Jean Claude Gandur together own not less than 25 per cent of the Common Shares. Subject to the same proviso, AOG has also agreed that any upstream petroleum business opportunities made available to it will first be offered to Addax Petroleum; if Addax Petroleum declines the opportunity, AOG may then pursue it.

In 1994, AOG decided to use its experience in Africa and in the oil industry to diversify its business to include oil and gas exploration and production. After the formation of Addax Petroleum in 1994, management began evaluating opportunities in West Africa. In 1995, Addax Petroleum acquired a 90 per cent interest in a Production Sharing Contract with the Government of Côte d'Ivoire relating to an offshore field known as the Espoir field. In 1997, Addax Petroleum sold 24 per cent interests in the Espoir field Production Sharing Contract to each of Ranger Oil Limited (now Canadian Natural Resources Limited) and Tullow Oil. Addax Petroleum sold a further 15 per cent interest in the Espoir field Production Sharing Contract to Canadian Natural Resources Limited in 2000 and the remainder of its interest in 2001.

In May 1998, the Corporation entered into Production Sharing Contracts with the Nigerian government for OML123, OML124, OPL90 and OPL225. Prior to this, Ashland had held their own Production Sharing Contracts relating to these properties, which were terminated by the Nigerian government when Ashland attempted to sell its interests under the Production Sharing Contracts without prior government approval. The Corporation acquired Ashland's remaining assets and rights relating to these properties pursuant to an acquisition agreement dated April 8, 1998 between Addax Petroleum and Ashland. See "Properties and New Ventures — Nigeria Properties".

In December 2002, Addax Petroleum expanded its operations in West Africa by acquiring a 60 per cent interest in the Ngosso Concession, offshore Cameroon. The Ngosso Property is operated by Addax Petroleum. See "Properties and New Ventures — Cameroon".

In January 2004, Addax Petroleum further expanded by acquiring a 42.5 per cent farm-in interest in the Kiarsseny Production Sharing Contract, offshore Gabon. The Kiarsseny Property is operated by Tullow Oil. See "Properties and New Ventures — Gabon".

In July 2005, Addax Petroleum entered into a farm-in agreement with Genel Enerji A.S. for a potential interest in a Production Sharing Contract to govern the Taq Taq field in the Kurdistan Region of Iraq. See "Properties and New Ventures — Middle East New Ventures".

In September 2005, Addax Petroleum entered into a joint venture agreement with Oriental Energy, a Nigerian company, pursuant to which it agreed to acquire a 40 per cent interest in the Okwok Property, located in OML67 offshore Nigeria, subject to the completion of a farm-in agreement and government approval. The Corporation expects to conduct operations for the property in its capacity as technical advisor. See "Properties and New Ventures — Nigeria Properties".

In November 2005, Addax Petroleum made its first strategic move into deep-water exploration when it signed a participation agreement with ERHC Energy pursuant to which the Corporation anticipates that it may acquire up to a 33.3 per cent interest in, and become operator of, the Block 4 Property. See "Properties and New Ventures — Joint Development Zone".

Pre-IPO Transactions

Addax Petroleum Corporation was incorporated under the *Canada Business Corporations Act* on September 6, 2005 to facilitate this offering by acquiring all of the shares of Addax Petroleum N.V., a corporation incorporated under the laws of the Netherlands Antilles. On December 5, 2005 the articles of Addax Petroleum Corporation were amended to authorize the issue of an unlimited number of Preferred Shares, issuable in series.

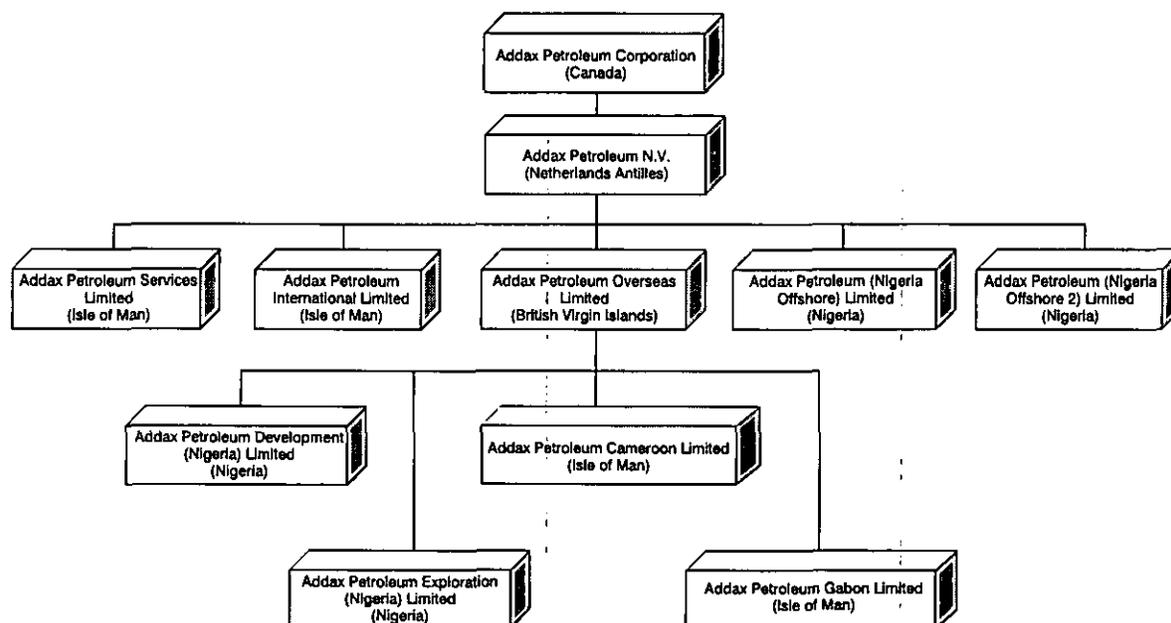

Prior to the closing of this offering, Addax Petroleum N.V. will declare and pay additional dividends of up to an aggregate of \$120 million. The dividend amount will be equal to management's estimate of the Corporation's

CFFO net of capital expenditures from October 1, 2005 to the closing of this offering, while maintaining long-term debt at the November 30, 2005 level of approximately \$80 million.

Concurrently with the closing of this offering, Addax Petroleum Corporation will acquire all of the issued and outstanding shares of Addax Petroleum N.V. from AOG in exchange for 117,000,000 Common Shares and CDN\$55,575,000 million.

Corporate Structure

At the closing of this offering, the Corporation will beneficially and wholly own, directly or indirectly, 10 material subsidiaries. The head office of the Corporation is located at 16, avenue Eugene-Pittard, 1206, Geneva, Switzerland. The chart below shows the intercorporate relationships among the Corporation and its material subsidiaries at the closing of this offering:

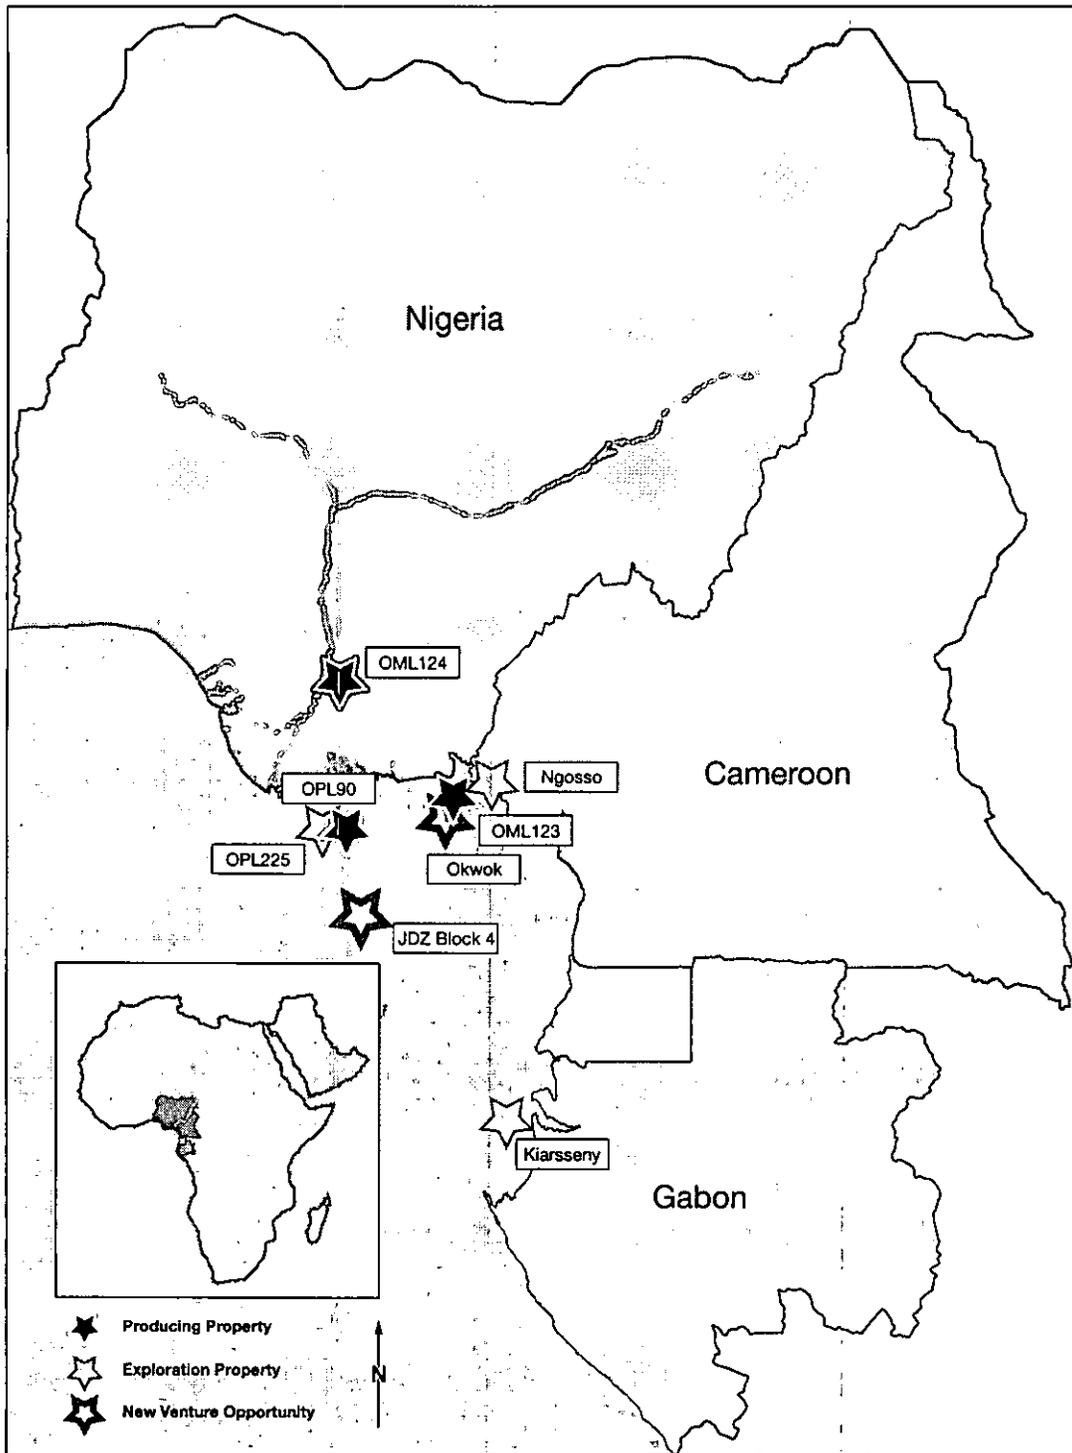

Properties Summary

Addax Petroleum's principal properties in West Africa are as follows:

- In Nigeria, the Corporation has a 100 per cent interest in two Production Sharing Contracts covering the following four Addax Petroleum operated properties:
 - OML123, which accounts for the majority of the Corporation's oil production, is located offshore in shallow water and produces medium to light quality crude oil (29° API);
 - OML124 is located onshore and produces light quality crude oil (36° API);
 - OPL90 is located offshore in medium depth water and produces light quality crude oil (37° API); and
 - OPL225 is an offshore exploration property located in medium depth water, adjacent to OPL90.
- In Cameroon, Addax Petroleum has a 60 per cent interest in the Ngosso Property, an offshore exploration property operated by the Corporation.
- In Gabon, Addax Petroleum has a 42.5 per cent interest in the Kiarsseny Property, an offshore exploration property operated by Tullow Oil.

*Addax Petroleum
Properties and New Venture Opportunities*

The following table summarizes the production, development and exploration properties of the Corporation.

Properties Summary Table

Country	License	Area ⁽¹⁾⁽²⁾ (acres)	Water Depth (m)	Addax Petroleum's Interest (%)	Average Oil Production		Gross Oil Reserves ⁽²⁾⁽³⁾		
					October 2005 (bbls/d)	9 Months Ended September 30, 2005 (bbls/d)	Proved (mmbbls)	Proved Plus Probable (mmbbls)	Proved Plus Probable Plus Possible (mmbbls)
Nigeria	OML123	90,700	3-40	100	50,970	45,970	71.4	144.9	195.2
	OML124	74,100	onshore	100	3,530	3,510	10.0	12.6	28.0
	OPL90	85,300	100-160	100	19,950	12,610	27.9	43.7	60.9
	OPL225	241,900	50-210	100	-	-	-	-	-
Cameroon	Ngosso	70,300	0-8	60	-	-	-	-	-
Gabon	Kiarsseny	571,600	0-800	42.5	-	-	-	-	-
Total		1,133,900			74,450	62,090	109.3	201.3	284.1

Notes:

- (1) The table sets forth the area of the Corporation's interest after giving effect to the relinquishment proposals for OPL90 and OPL225 made by the Corporation to NNPC. See "Properties and New Ventures — Nigeria Properties — Property Boundaries".
- (2) Area presented excludes the area in the Disputed Area in OML123. Reserves presented exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.3 mmbbls. See "Properties and New Ventures — Nigeria Country Discussion — International Relations".
- (3) Proved and probable reserves as at September 30, 2005 as reported in the Reserve Report under "Forecast Prices and Costs Case".

Major New Venture Opportunities Summary

Addax Petroleum is also pursuing the following major new venture opportunities.

- In Nigeria, the Okwok Property represents the first farm-in for Addax Petroleum in the country. The Okwok Property is located within ExxonMobil's offshore license area, OML67, which is immediately south of Addax Petroleum's OML123. Addax Petroleum has entered into a joint venture agreement with Oriental Energy, a Nigerian company, pursuant to which the Corporation will receive a 40 per cent interest in the field and will conduct operations in its capacity as technical advisor. The joint venture agreement is conditional upon Oriental Energy concluding negotiations for a farm-in agreement with ExxonMobil and Nigerian government approval. If Addax Petroleum is successful in obtaining its interest in the Okwok Property, the gross contingent oil resources attributable to its interest as at September 30, 2005 are reported by NSAI to be 6.7 mmbbls.
- In the Joint Development Zone of Nigeria and the Democratic Republic of Sao Tome and Principe, the Block 4 Property is a large deep-water offshore exploration property. Addax Petroleum has entered into a participation agreement with ERHC Energy. Earlier in 2005, ERHC Energy, together with another company (which subsequently ended its participation), were conditionally awarded a 60 per cent interest in the Block 4 Property. On January 30, 2006, the Joint Development Authority conditionally approved the replacement of the Noble-ERHC consortium with the ERHC-Addax consortium and the designation of Addax Petroleum as operator for the Block 4 Property. Pursuant to the participation agreement, the Corporation anticipates that it may acquire up to a 33.3 per cent interest in, and become operator of, the Block 4 Property.
- In the Kurdistan Region of Iraq, Addax Petroleum has entered into a farm-in agreement with Genel Enerji A.S. for a potential interest in a Production Sharing Contract to govern the Taq Taq field.

Competitive Strengths

Addax Petroleum has grown rapidly by combining the entrepreneurial spirit of its founders with the technical and operational expertise of staff recruited from international oil and gas companies. Management of the Corporation believes that the following competitive strengths should allow Addax Petroleum to continue to increase its production and reserves and maximize value for its shareholders.

Largest Independent Oil Producer in Nigeria with a Quality Asset Base

Nigeria is a prolific oil-producing nation with a competitive fiscal regime. Nigeria ranks among the top ten countries in the world in terms of oil reserves, with proved crude oil reserves reported by OPEC to be

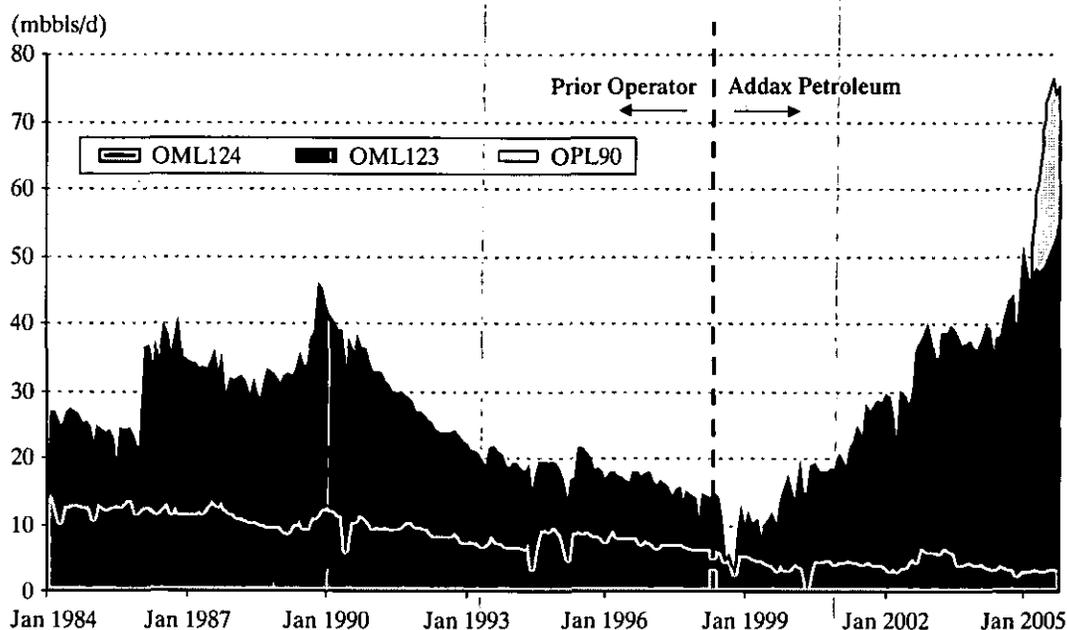

35.2 billion barrels. Chevron, ENI, ExxonMobil, Shell and Total all have significant operations in Nigeria and produce, together with NNPC, approximately 2.2 mmbbls/d of oil, representing almost 90 per cent of the country's total oil production.

Addax Petroleum is the largest independent oil producer in Nigeria and operates all of its Nigerian producing properties. The Corporation produced an average of 74.5 mbbbls/d for October 2005 from 68 wells. The Corporation's crude oil sales are comprised of medium to light gravity sweet crude oil blends (29° to 37° API). Approximately 95 per cent of the Corporation's crude oil production is offshore and all of the Corporation's production is sold directly into international markets. The Corporation has a balanced portfolio of oil reserves, including 109 mmbbls of proved reserves, 92 mmbbls of probable reserves and 83 mmbbls of possible reserves.

Demonstrated Operational and Technical Expertise

Addax Petroleum has increased its production by employing advanced and proven technologies, such as 3D seismic data analysis and horizontal drilling, to optimize oil recoveries from producing but under-developed fields. In particular, the Corporation has developed specific expertise and a unique focus on producing oil from thin oil rims, commonly found in shallow water and onshore properties. Since inception, the Corporation has drilled 126 wells (124.8 net) and has achieved a commercial success rate of approximately 83 per cent. The following chart shows the average monthly oil production from the Corporation's Nigerian producing properties, including the period before the Corporation began operating the properties, and demonstrates Addax Petroleum's operational and technical expertise.

*Average Monthly Oil Production
January 1984 - October 2005*

Addax Petroleum has increased production while maintaining firm control of operating costs. Despite industry-wide increases in the costs of drilling and other third party operating services, Addax Petroleum has maintained operating costs between \$5.50 and \$6.50 per barrel over the past three years.

The OPL90 property development is Addax Petroleum's first major greenfield development and further demonstrates the Corporation's technical expertise. Development of the Okwori field in OPL90 began in July 2004 and the large and technically demanding project commenced production on schedule in March 2005. The Okwori field and adjacent Nda field in OPL90 are estimated by NSAI to contain 43.7 mmbbls of proved and probable oil reserves and are expected to produce at a combined average production rate of 33 mbbbls/d in 2006. In September 2005, Addax Petroleum received a technical excellence award at the 18th World Petroleum Congress in recognition of its successful development of the Okwori field.

Near and Medium Term Growth Opportunities in West Africa

Addax Petroleum's properties contain a number of development projects which the Corporation expects should increase its production in the near and medium term. The Corporation expects its drilling and development program in Nigeria to increase average daily production from 65 mbbbls/d in 2005 to 85 mbbbls/d in 2006. The Corporation's planned projects in Nigeria include ongoing development of the Okwori and Nda fields in OPL90 and an infill drilling program in OML123 and OML124. The Corporation has contracted three drilling rigs in Nigeria for 2006 and is actively pursuing a fourth drilling rig.

Addax Petroleum also has 20 unappraised discoveries, 23 significant exploration prospects and more than 25 leads on its properties in Nigeria, Cameroon and Gabon. As at September 30, 2005, NSAI estimates Addax Petroleum's gross prospective oil resources to be 298 mmbbls (164 mmbbls risked). In addition, NSAI reports that the gross contingent gas resources on Addax Petroleum's Nigerian properties are 1.25 tcf. In 2006, Addax Petroleum intends to acquire 800 km² of 3D seismic data for OPL225 and 170 km² of 3D seismic data for the Ngosso Property and to drill 29 wells (28.4 net) on its West African properties.

Expansion Potential in New Ventures

Addax Petroleum's current new venture initiatives could have a significant impact on the Corporation. The Corporation expects to begin developing the Okwok Property together with Oriental Energy during 2006. The Corporation believes it is well-positioned to farm-in or otherwise acquire properties in West Africa including properties from major international oil companies that are shifting their focus from onshore and shallow water properties to deep-water exploration and development properties.

The Block 4 Property is a large deep-water offshore block in the Joint Development Zone of Nigeria and the Democratic Republic of Sao Tome and Principe. Pursuant to the participation agreement, the Corporation anticipates that it may acquire up to a 33.3 per cent interest in, and become operator of, the Block 4 Property.

In the Kurdistan Region of Iraq, Addax Petroleum entered into a farm-in agreement with Genel Enerji A.S. for a potential interest in a Production Sharing Contract to govern the Taq Taq field.

Excellent Operational Reputation and Strong Community Relationships

Addax Petroleum recognizes the importance of petroleum resources to its host countries. The Corporation has made it a priority to conduct itself in a socially responsible manner and to develop co-operative relationships with host country authorities, local communities and indigenous oil companies. Addax Petroleum believes that it has an excellent operational reputation and strong relationships which help facilitate timely approval for its projects, avoid unplanned disruptions in production and establish the Corporation as a desirable partner for indigenous oil companies that are becoming increasingly important in the African petroleum industry. Addax Petroleum has not experienced any major unplanned disruptions in production since it began producing oil in 1998.

The Corporation proactively addresses host government policy objectives. In Nigeria, these policy objectives include maximizing reserves and production, developing the local natural gas market and employing indigenous staff and contractors. More than 90 per cent of Addax Petroleum's employees in Nigeria are Nigerian citizens. In addition, the Corporation's community relations policy promotes infrastructure development projects and education programs. The Corporation has funded the construction of schools, expanded clean water supplies, paved roads and provided scholarships to Nigerians for primary, secondary and post-secondary education.

Experienced Management Team with Significant Shareholdings

Members of Addax Petroleum's senior management team have demonstrated their ability to identify and successfully execute business plans in African countries. Addax Petroleum has successfully recruited experienced management who are attracted to the Corporation's entrepreneurial culture, from major international oil companies.

The senior executives of Addax Petroleum have on average more than 20 years of experience in the international oil and gas industry and extensive operating experience in Africa. Jean Claude Gandur, the Chief Executive Officer and co-founder of Addax Petroleum, has approximately 30 years of petroleum industry experience and has more than 20 years of experience managing businesses in a variety of industry sectors in Africa. In recognition of his role developing businesses in Africa, Mr. Gandur has received awards and recognitions from countries throughout Africa including the Republic of Congo, Senegal and Benin. James Pearce, the Chief Operating Officer of Addax Petroleum and the Managing Director of the Corporation's Nigerian operations, has approximately 30 years of petroleum industry experience and held senior management positions with Chevron in West Africa for over 15 years prior to joining Addax Petroleum. Michael Ebsary, the Chief Financial Officer of Addax Petroleum, has held management positions with Elf and Occidental for over 10 years. Other members of Addax Petroleum's management team also have experience in West Africa and with international oil and gas companies such as BHP Petroleum, British Gas, Shell and Texaco.

At the closing of this offering, AOG will direct that up to 9.6 million Common Shares (representing up to eight per cent of AOG's current shareholdings) be transferred to or for the benefit of current and former directors, officers and employees of Addax Petroleum in recognition of their contribution to the development of the Corporation's business. Subsequent to the offering, the Corporation intends to adopt a performance based incentive plan to be implemented and administered by the Board.

Commitment to Strong Corporate Governance

Addax Petroleum believes that strong corporate governance is essential to creating shareholder value and maintaining the confidence of investors. Addax Petroleum Corporation has developed comprehensive corporate governance policies and procedures, and has adopted a "best practices" approach to corporate governance. Addax Petroleum Corporation has an experienced Board of Directors, the majority of whom are independent from Addax Petroleum and its controlling shareholder, AOG. In addition, Addax Petroleum Corporation has separated the offices of Chairman and CEO with the Chairman being independent from both Addax Petroleum and AOG. The Chairman of Addax Petroleum Corporation is Mr. Peter Dey, who previously chaired the Toronto Stock Exchange Committee on Corporate Governance in Canada.

The Board of Directors has also adopted all of the recommendations set out in Canadian Securities Administrators National Policy 58-201 — *Corporate Governance Guidelines*. These include, among other things, creating an Audit Committee and a Corporate Governance, Nominating and Compensation Committee, each comprised solely of independent directors, and Technical and Reserves Committees comprised of a majority of independent board members.

Strategy

Addax Petroleum has driven its growth in Nigeria by acquiring oil properties deemed by others to have limited remaining production potential and using its strong in-house technical and operational expertise to grow reserves and production in a cost effective manner. The Corporation has made it a priority to recruit and retain indigenous personnel and to actively participate in and contribute to community development projects. Addax Petroleum believes it has developed an excellent reputation among government authorities, communities and businessmen that has been critical in providing access to opportunities and obtaining the cooperation needed to successfully execute projects. Addax Petroleum is now extending its successful strategy to other regions in Africa and the Middle East where substantial growth opportunities exist.

The Corporation's strategy is to build on the significant growth and profit enhancement opportunities within its existing license areas while also pursuing new venture opportunities.

Existing Properties Addax Petroleum intends to continue its strategy in its existing properties by:

- investing in facilities and infrastructure to increase production throughput, improve operating efficiencies and position itself to monetize natural gas resources;
- completing identified development projects; and
- evaluating unappraised discoveries and pursuing identified exploration prospects.

New Venture Opportunities Addax Petroleum is currently pursuing a number of new venture opportunities in West Africa (Nigeria, Cameroon and Angola), North Africa (Algeria, Libya and Egypt) and the Middle East (Iraq, Iran, Yemen and Oman). The Corporation believes that it is well positioned to capitalize on numerous opportunities in its focus areas that arise as (i) national governments tender new acreage in future bid rounds; (ii) major international oil and gas companies reduce their involvement in onshore and shallow water offshore oil fields; and (iii) indigenous oil companies seek financially and technically strong partners to jointly develop their properties. In Algeria and Libya, Addax Petroleum has passed stringent pre-qualifying guidelines and can bid as an operator in licensing rounds in those countries. The Corporation is implementing its new venture strategy through the following initiatives:

- acquiring or farming-in to additional properties in its focus areas, as the Corporation has done with the Okwok Property;
- obtaining an interest in the Block 4 Property located in the Joint Development Zone of Nigeria and the Democratic Republic of Sao Tome and Principe; and
- acquiring an interest in a Production Sharing Contract governing the Taq Taq field in the Kurdistan Region of Iraq.

The Corporation also intends to continue investing in technologies to improve operating efficiency and establish itself as a leader in areas of corporate responsibility in Africa and the Middle East.

Capital Expenditure Program

Addax Petroleum has a substantial capital expenditure program for its current properties and major new venture opportunities, budgeted to be \$167 million in the fourth quarter of 2005 and \$815 million in 2006. The budgeted capital expenditures for 2006 represent a significant increase over historical levels, as shown in the table below.

Budgeted and Historical Capital Expenditures

Location	License/ Field	Budgeted						Historical		
		2006			3 Months Ended December 31, 2005			9 Months Ended September 30,		
		Drilling & Seismic	Facilities & Other	Total	Drilling & Seismic	Facilities & Other	Total	2005 Total	2004 Total	2003 Total
		(\$million)						(\$million)		
Nigeria	OML123	147	236	383	28	56	84	99	134	108
	OML124	22	5	27	4	5	9	-	1	30
	OPL90/225	197	93	290	39	29	68	173	166	8
Cameroon	Ngosso	16	-	16	2	-	2	1	1	4
Gabon	Kiarsseny	6	-	6	4	-	4	2	11	-
Subtotal		388	334	722	77	90	167	275	313	150
Nigeria	Okwok ⁽¹⁾	18	54	72	-	-	-	-	-	-
Kurdistan Region of Iraq	Taq Taq	13	8	21	-	-	-	-	-	-
Total		419	396	815	77	90	167	275	313	150

Note:

(1) Includes a \$35 million farm-in fee payable by Addax Petroleum prior to the commencement of the capital expenditure program for the Okwok Property.

Capital expenditures for OML123, OML124, OPL90 and OPL225 in Nigeria in the fourth quarter of 2005 and in 2006 are budgeted to be \$861 million in aggregate, representing 88 per cent of the Corporation's total capital expenditure budget for those periods. Under the applicable Nigerian Production Sharing Contracts, the Corporation has historically recovered more than 80 per cent of the drilling and seismic expenditures in the year in which the expenditure is incurred. See "Fiscal Terms — Nigeria".

Capital expenditures for OML123 are budgeted to be \$84 million in the fourth quarter of 2005 and \$383 million in 2006. The budgeted capital expenditures will fund significant infrastructure investment to sustain future production including the replacement of the Knock Taggart FPSO (scheduled to be completed in 2006) and the installation of a centralized gas gathering and gas lift facility (scheduled to be completed in 2007) as well as a two-rig drilling program in OML123 that includes:

- the ongoing development of the Oron West and North Oron fields;
- the completion of a water injection project in the Adanga field;
- infill and extension drilling in the Adanga and Ebughu fields; and
- appraisal drilling in the Adanga North field and the recently discovered Kita North area.

These expenditures are expected to increase production from approximately 46 mbbls/d in 2005 to approximately 48 mbbls/d in 2006.

Capital expenditures for OPL90 and OPL225 are budgeted to be \$68 million in the fourth quarter of 2005 and \$290 million in 2006. These capital expenditures are expected to increase production from approximately 16 mbbls/d in 2005 to approximately 33 mbbls/d in 2006. The budgeted capital expenditures will fund a one-rig drilling program in OPL90 and OPL225 that includes:

- the completion of development drilling in the Okwori field;
- development drilling in the Nda field and tie back to the OPL90 FPSO; and
- seismic data acquisition and drilling of three exploration wells.

Capital expenditures for the Corporation's other properties and major new venture opportunities are budgeted to be \$6 million in the fourth quarter of 2005 and \$115 million in 2006. These expenditures will be incurred to fund seismic data acquisition, technical studies and appraisal drilling necessary to prepare detailed field development plans.

Addax Petroleum expects its portfolio of development projects, unappraised discoveries, identified exploration prospects and new ventures to provide the Corporation with the opportunity to continue a sizeable capital expenditure program in 2007 and beyond.

PROPERTIES AND NEW VENTURES

Addax Petroleum's principal oil and gas properties are in the West African countries of Nigeria, Cameroon and Gabon.

Nigeria Country Discussion

Overview

Nigeria is Africa's most populous country and largest oil producer. The following table highlights some important statistics regarding Nigeria, its people and its economy.

Total Area	923,768 km ² (approximately 1.5 times the area of Alberta, Canada)
Population	128.8 million
Major Cities	Lagos, Kano, Ibadan, Kaduna, Port Harcourt, Abuja (capital)
Language	English (official), Hausa, Yoruba, Igbo (Ibo), Fulani
Literacy	68 per cent of population over 15 years of age can read and write
Government	Federal Republic
Legal System	Based on English common law (Islamic law in the north)
GDP	\$125.7 billion (2004 estimate)
GDP per capita	\$1,000 (2004 estimate)
Oil Production	2.5 mmbbls/d (2004 estimate)
Net Oil Exports	2.2 mmbbls/d (2004 estimate)
Currency	Naira
Inflation	16.5% in 2004

Recent History

Nigeria gained independence from the United Kingdom on October 1, 1960 and has subsequently experienced periods of military and democratic rule. The death of General Sani Abacha in 1998 marked the most recent transition to democratic government, which saw the election of President Olusegun Obasanjo in 1999.

The development of the oil industry in the Niger Delta in the south of the country has been a key factor shaping modern Nigeria. Oil was first discovered in the 1950s and exploration and production increased rapidly in the 1960s. The country's oil industry now accounts for approximately 20 per cent of GDP, 96 per cent of export earnings and 65 per cent of budgetary revenues.

Government and Legal System

In 1999, Nigeria adopted a new constitution and held democratic elections. The Nigerian government has a three-tier structure: the federal government, 36 state governments and many local government administrations. The structure of the federal government is similar to that of the United States. Under the Nigerian constitution, the President can serve a maximum of two terms of four years each. The Parliament comprises two houses: the House of Representatives, with 346 elected members, and the Senate, with 107 elected members. The most recent elections were held in April 2003 and saw the re-election of President Obasanjo of the People's Democratic Party for a second term.

Nigeria's legal system is based on English common law and much of the legislation covering the country's oil industry was originally based upon equivalent legislation in England. Islamic law is also used in some states in the north.

Economic Environment

Nigeria has significant agricultural, mineral, marine and forest resources, but the economy of Nigeria is strongly dependent upon the international oil price. The Obasanjo government is seeking to broaden the country's economy and has initiated structural reforms with new competition policies and a privatization program. The Bureau for Public Enterprise has the mandate to privatize state-owned enterprises in all sectors of the economy, including hotels, insurance, paper mills, fertilizer plants, oil refineries, ports and the electrical, telephone, rail and water utilities. To date, the Nigerian government has privatized its hotel, insurance and cement enterprises. Included in the enterprises scheduled to be privatized are four oil refineries owned by NNPC.

In recent years, Nigeria has attracted significant international support, both from individual governments and international agencies. The World Bank currently has a total commitment to Nigeria of approximately \$444 million in the areas of privatization, power transmission, healthcare, community development, education, water and economic capacity building. Further, representatives of the Paris Club creditor countries met in October 2005 and agreed with the representatives of the Nigerian government on a comprehensive treatment of its debt. In total, this agreement allows Nigeria to cancel approximately \$18 billion of debt (including moratorium interest) representing an overall cancellation of about 60 per cent of its debt to the Paris Club.

International Relations

Nigeria is a member of the United Nations, the Organization of African Unity, the Commonwealth of Nations and the Economic Community of West African States. Nigeria became a member of OPEC in 1971.

On October 10, 2002, the International Court of Justice ruled on the long disputed Cameroon-Nigeria land and maritime boundary and awarded the Bakassi Peninsula and adjacent offshore acreage, including part of the Corporation's acreage in OML123 (the "Disputed Area"), to Cameroon. Nigeria initially rejected the ruling but formed a Joint Border Commission to peacefully resolve the dispute. The dispute relating to the land boundary involving the Bakassi Peninsula is in the course of being resolved peacefully and the Joint Border Commission has initiated steps to resolve the maritime boundary dispute. The issue regarding the maritime boundary continues to have implications for Addax Petroleum. See "Properties and New Ventures — Nigeria Properties — Property Boundaries".

Petroleum Industry

Oil

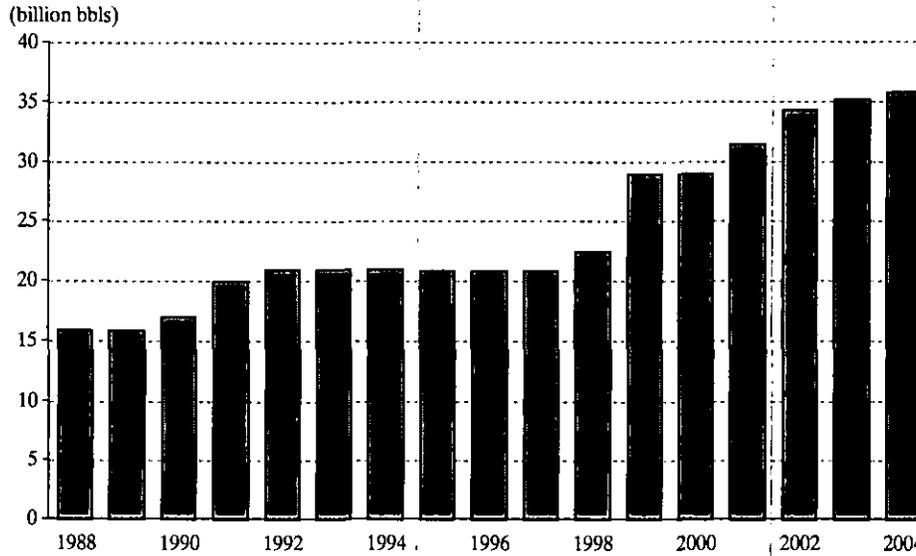

The crude oil supply market is truly global with approximately 31 per cent of 2004 production originating from the Middle East, 23 per cent from Europe and Eurasia, 14 per cent from Latin America, 12 per cent from Africa, 10 per cent from North America and 10 per cent from Asia Pacific.

The oil industry in Nigeria has a long history. Shell D'Arcy (a Shell/BP joint venture) started exploring for oil in the country in 1938. Other foreign oil companies entered Nigeria in the 1950s and 1960s, including Mobil (now ExxonMobil), Texaco (now Chevron), Gulf (now Chevron), Safrap (later Elf and now Total) and Agip. Apart from BP, all of these international oil and gas companies still maintain a significant presence in Nigeria.

Nigeria ranks among the top ten countries in the world in terms of oil reserves, with proved crude oil reserves reported by OPEC to be 35.2 billion barrels. The Nigerian government has expressed its desire to increase the country's proved oil reserves to 40 billion barrels by 2010 and is encouraging the continued development and exploration of the country's oil resources to do so.

The following chart shows the increase in Nigeria's proved crude oil reserves over the past 17 years, with the majority of the increase occurring in the last six years.

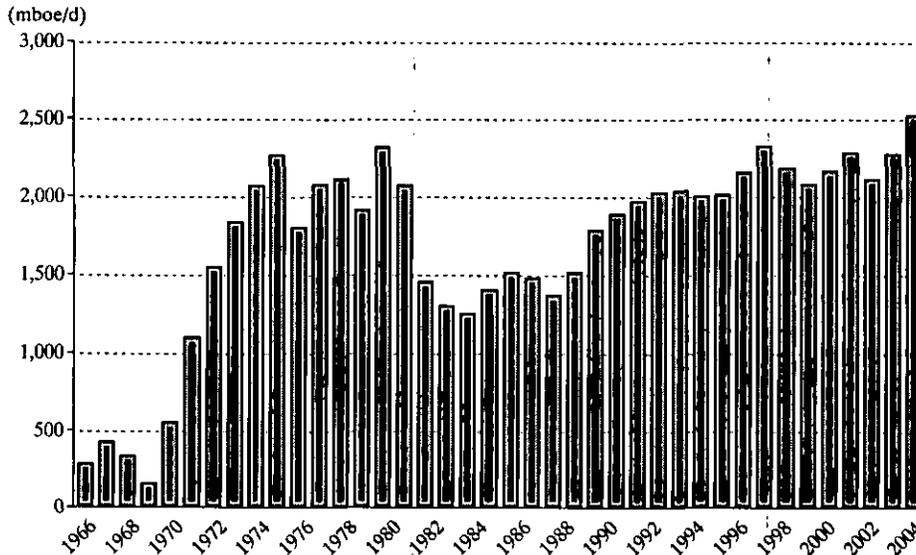

Nigerian Proved Crude Oil Reserves

Source: OPEC Annual Statistical Bulletin, 2004.

The first commercial oil discovery in Nigeria was made in 1956 by Shell D'Arcy and subsequent discoveries and development activity saw production steadily climb to reach in excess of two mmbbls/d in the mid-1970s. During the 1980s, oil production in Nigeria declined in part due to an unfavourable investment environment. However, development activity and production increased after the Nigerian government revised the fiscal terms governing oil production. The history of oil production in Nigeria is shown in the following chart.

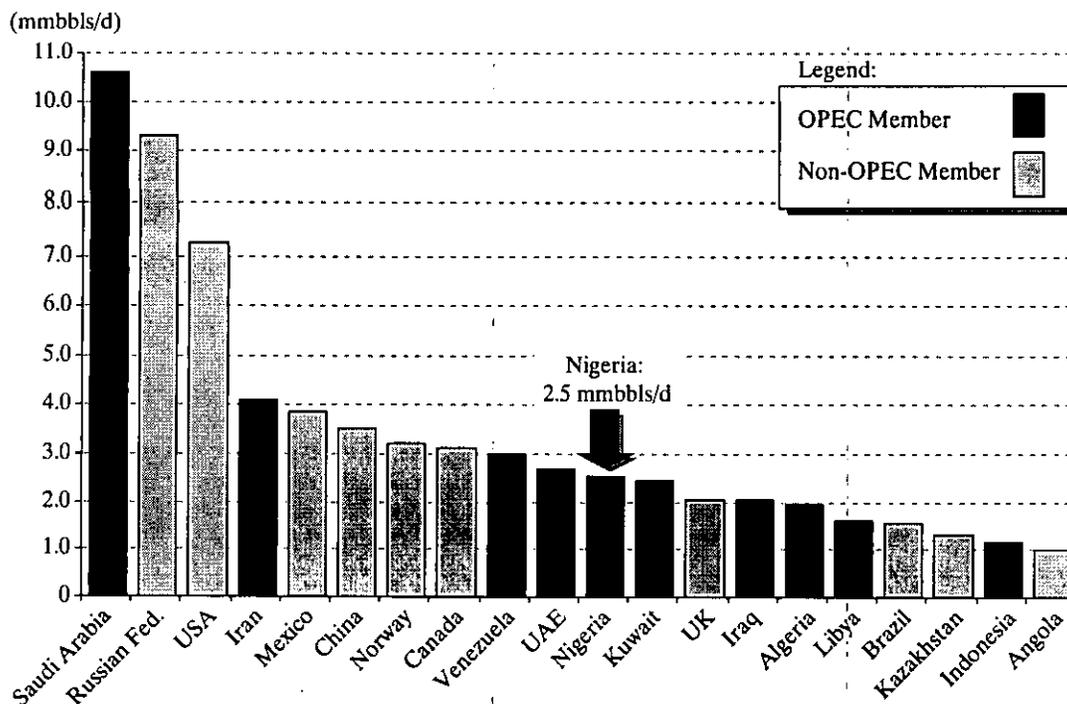

Nigerian Crude Oil Production

Source: BP Statistical Review of World Energy, June 2005.

Nigeria ranks as one of the world's major oil producers and the largest producer of oil in Africa. The country's 2004 oil production is estimated to have been approximately 2.5 mmbbls/d, representing 27 per cent of the continent's total oil production and 3.2 per cent of the world's production (compared to Canada at 3.8 per cent). The following chart, showing 2004 oil production for selected major oil producing countries, demonstrates Nigeria's importance as a global oil producer.

Oil Production by Selected Country, 2004

Source: BP Statistical Review of World Energy, June 2005.

The majority of oil in Nigeria is produced by joint ventures between NNPC and international oil and gas companies, which are the operators of the joint venture properties. There are joint ventures between NNPC and Shell (the largest joint venture), ExxonMobil, Chevron, Agip and Total. NNPC has a 55 per cent interest in the Shell joint venture and 60 per cent interest in each of the other joint ventures. In addition, ConocoPhillips, Devon Energy, Nexen Inc., Petrobras, Statoil and other foreign companies hold interests in Nigeria.

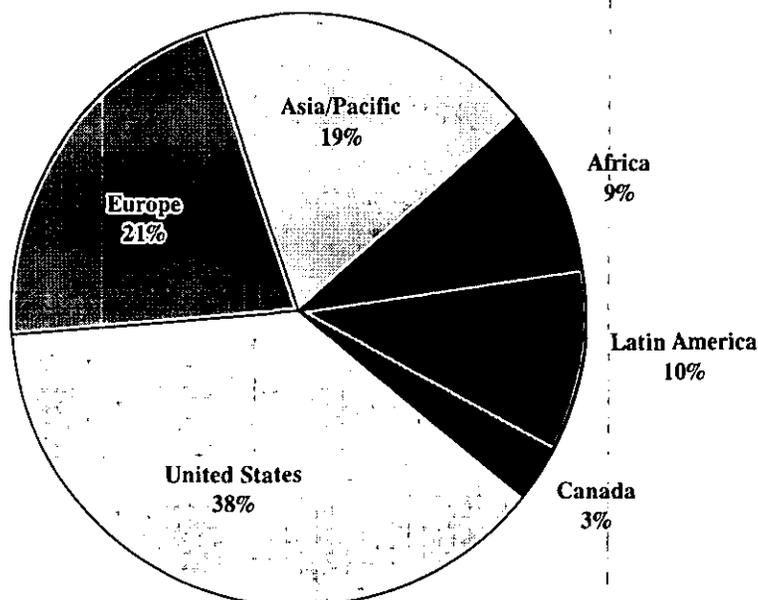

The following table shows the estimated 2004 daily production by principal operators in Nigeria.

	2004 Production (estimated) (mmbbls/d)
Shell	907
ExxonMobil	590
Chevron	352
Agip	185
Total	158
Addax Petroleum	40

Source: Estimates derived from Wood Mackenzie, except for Addax Petroleum.

In 2004, Nigeria exported approximately 2.2 mmbbls/d or 88 per cent of the country's total oil production, with the United States being the largest single export market. Nigeria is the fifth largest supplier of crude oil to the United States, behind Canada, Mexico, Saudi Arabia and Venezuela, supplying approximately 8.5 per cent of total United States crude oil imports. The following chart shows the principal export markets for Nigerian oil in 2004.

*Country/Market for Nigerian Oil
2004 Exports*

Source: OPEC Annual Statistical Bulletin 2004.

The Nigerian government has announced a production target of 4 mmbbls/d by 2010. Future oil production in Nigeria is expected to increase with the continued development of many significant deep-water discoveries. Some of the significant discoveries and development projects announced by international oil and gas companies are described below.

Shell — Shell recently developed the deep-water Bonga field with estimated reserves of 700 mmbbls and expected plateau production of 225 mmbbls/d. Shell has also announced plans to develop the Bonga South West field which has estimated reserves of 600 mmbbls and the EA field which has estimated reserves of 350 mmbbls and expected plateau production of 170 mmbbls/d.

ExxonMobil — ExxonMobil is currently developing the deep-water Erha field which has estimated reserves of 500 mmbbls and expected plateau production of 150 mmbbls/d. ExxonMobil is also developing the Yoho field with estimated reserves of 400 mmbbls and expected plateau production of 150 mmbbls/d.

Chevron — Chevron is currently developing the deep-water Agbami field which has estimated reserves of 1,000 mmbbls and expected plateau production of 250 mmbbls/d.

Total — Total developed the Amenam Kpono field that came on-stream in July 2003 and has expected plateau production of 125 mmbbls/d in its first phase. Total has discovered two further fields, Usan and Akpo, with estimated reserves exceeding 500 mmbbls each.

Agip — Agip developed the first deep-water field in Nigeria, the Abo field, that began production in early 2003. Reserves are estimated to be 700 mmbbls and the plateau production is expected to be 300 mmbbls/d.

OPEC and Oil Production Quotas in Nigeria

Nigeria has been a member of OPEC since 1971. OPEC has eleven members who collectively supply approximately 40 per cent of the world's oil consumption and account for approximately two-thirds of the world's proved oil reserves. OPEC's member countries are Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates and Venezuela. OPEC's stated objective is "to co-ordinate and unify petroleum policies among member countries, in order to secure fair and stable prices for petroleum producers; an efficient, economic and regular supply of petroleum to consuming nations; and a fair return on capital to those investing in the industry". At its March 2000 meeting, OPEC established a price band mechanism to respond to changes in world oil market conditions. Since its inception, the informal price band mechanism has been activated only once.

At its most recent meeting, OPEC established new production ceilings and quotas for individual members effective March 16, 2005. Nigeria's quota was set at approximately 2.3 mmbbls/d. NNPC allocates production quotas among oil producers in Nigeria. The allocations are based on the aggregate of the technical production limits per well for a producer as negotiated between the producer and the Nigerian government to reflect good oil field production practices. If the aggregate of all the producers' technical production limits exceeds Nigeria's OPEC quota, the production allocations among producers are reduced pro rata.

The Corporation applies for, on a monthly basis, and regularly receives an additional quota for the difference between its production quota and its expected production. At September 30, 2005, Addax Petroleum had a production quota of 65 mbbls/d and an additional production quota of 10 mbbls/d compared to its production of 73 mbbls/d for the same period. The Corporation anticipates increasing its production over the next two years to in excess of 80 mbbls/d. Given the current and anticipated growth of production in Nigeria, there is a risk that quota allocations may force Addax Petroleum to curtail its production in the future. However, except in one instance which was immaterial, the Corporation has not had to reduce its production due to the application of a monthly quota and has succeeded in obtaining an additional quota for the difference between its exportable production and its fixed monthly quota. In the current high oil price environment, Addax Petroleum does not expect that it will be required to reduce its production due to a quota constraint. See "Risk Factors."

Natural Gas

Nigeria's natural gas reserves were estimated by NNPC to be 181 tcf in 2004, making Nigeria the country with the eighth largest natural gas reserves in the world. To date, exploration and development activities in Nigeria have not focused on natural gas because of the lack of readily accessible markets. Approximately half of the Nigerian natural gas reserves represent associated gas, a co-product of oil production, and the other half non-associated gas. Currently, natural gas development legislation in Nigeria relates mainly to the development of associated gas. In late 2005 or 2006, the Nigerian government plans to pass new gas legislation that will address the development of non-associated gas.

Nigerian natural gas production is inferred from various industry sources to have been approximately five bcf/d in 2004, of which an aggregate of approximately 40 per cent was sold as LNG and natural gas liquids into international markets and as natural gas for use in power generation in Nigeria. Of the remaining gas production, the majority was flared and the rest was used in oil field operations.

The Nigerian government has announced its objective to increase natural gas revenue sales to match oil revenues by 2010. To achieve this objective, the government has announced its intention to facilitate gas export-oriented projects and increase domestic gas consumption. The Nigerian government has also announced what is commonly referred to as the "Flares Down by 2008" policy which is intended to encourage oil companies to develop natural gas projects in order to eliminate the flaring of associated natural gas by 2008. Although NNPC does not yet have a legislative mandate to eliminate natural gas flaring by 2008, it is strongly indicating to operators that this will be a requirement. The oil producers in Nigeria are making concerted efforts to eliminate flaring although full compliance may not be practically possible by 2008. By 2010, gas production is forecast to increase to 10 bcf/d of which 8 bcf/d (currently 1.3 bcf/d) will be exported as LNG and 2 bcf/d will be used to meet domestic demand, predominantly for power generation (currently 1 bcf/d).

The most significant natural gas project to date in Nigeria has been the construction of a liquefaction plant in 1999 at Bonny Island by Nigeria LNG Ltd. This company is owned by NNPC (49 per cent), Shell (25.6 per cent), Total (15 per cent) and Agip (10.4 per cent). Presently the plant has three LNG trains with capacity to export 8.7 million tonnes of liquefied natural gas per year consuming 1.3 bcf/d. Two additional trains are planned to be added to the plant to increase its capacity to 16.7 million tonnes per year by 2006 consuming 2.5 bcf/d and further LNG trains may be added thereafter. LNG from the plant is exported to customers in France, Italy, Portugal, Spain, Turkey and the United States.

To meet the projected increase in gas exports, a number of gas export projects are planned including GTL projects, other LNG projects and export pipelines. A GTL project proposed by Chevron is expected to produce 35 mbbbls/d of petroleum products and consume 0.35 bcf/d of gas. Other LNG projects have been proposed including conventional LNG projects at Brass River, led by ConocoPhillips and Agip, and at Escravos, led by Chevron, and two floating LNG facilities located on deep-water discoveries operated by ExxonMobil and Statoil. Export pipeline projects include the West Africa Gas Pipeline project with a consortium of international oil and gas companies (including Shell) led by Chevron, to export natural gas from Escravos to Ghana, Togo and Benin for power generation. Initially, this project will consume 0.14 bcf/d but consumption is expected to increase to 0.45 bcf/d. This project will also increase the capacity of the existing Escravos to Lagos pipeline from 0.3 bcf/d to 1.0 bcf/d. Of the planned projects, the Chevron GTL project at Escravos in western Nigeria is progressing and the other LNG projects are expected to be announced.

A major program is underway in Nigeria to expand gas-fired power generation capacity to meet the projected increase in domestic gas consumption. Major oil companies are anticipated to play an important role in constructing joint venture independent power plants. In connection with the expansion of the country's electrical power generation capacity, the Nigerian government has announced that it is restructuring the electricity sector in anticipation of privatizing the industry later in the decade. The Corporation is presently in discussions with NNPC to provide gas for power generation from OML123.

In addition to promoting gas consumption and domestic power generation, the Nigerian government is promoting the production and consumption of LPG. Compared to its West African neighbours, Nigeria consumes little LPG, most of which is imported. The Nigerian government is stimulating demand by removing import duties and has also begun a program to reactivate under-utilized LPG depots throughout the country to improve the distribution of LPG. The Corporation is presently considering investing in an LPG plant at its OML124 onshore property.

Legal Regime for the Petroleum Industry

The petroleum industry in Nigeria is governed by the *Petroleum Act*. Under the *Petroleum Act*, the ownership and control of oil and gas in Nigeria (including under its territorial waters and continental shelf) is vested in the Nigerian government. The Department of Petroleum Resources, in collaboration with other government agencies such as NNPC and the Ministry of the Environment, has the responsibility for enforcing the *Petroleum Act* and the related legislation and regulations governing the petroleum industry in Nigeria.

The Department of Petroleum Resources has wide regulatory powers which include issuing Oil Prospecting Licenses and Oil Mining Leases under the *Petroleum Act*, the approval of field development plans, the setting of production levels, the monitoring of industry work programs, the administration of fiscal incentives and the monitoring of oil production and exports. NNPC is the state owned petroleum company that holds the Nigerian government's equity shares in joint ventures and enters into Production Sharing Contracts with foreign oil companies on behalf of the Nigerian government.

An Oil Prospecting License gives the licensee the exclusive right to explore for petroleum in a specified area. An Oil Mining Lease gives the lessee the exclusive right to produce petroleum from a specified area. Under the *Petroleum Act*, an Oil Prospecting License may be converted into an Oil Mining Lease when the Nigerian government is satisfied that the license is capable of producing at least 10 mbbbls/d of crude oil. In practice, however, the Nigerian government generally allows production from areas covered by an Oil Prospecting License pending conversion to an Oil Mining Lease. The *Petroleum Act* provides for the relinquishment of certain areas within Oil Prospecting Licenses on their conversion to Oil Mining Leases, and within Oil Mining Leases ten years after the granting of such leases. Under the *Petroleum Act*, relinquishment is

subject to ministerial approval and may be subject to additional conditions as set forth in the applicable Production Sharing Contract. The Production Sharing Contract for OPL90 and OPL225 also requires Addax Petroleum to relinquish part of the license area to be agreed between Addax Petroleum and NNPC.

Oil Prospecting License licensees are required to conduct hazard and operability studies prior to implementing facilities design and construction or major modification projects. The licensee is also required to conduct an environmental impact assessment prior to commencing operations, in addition to the environmental impact assessment required for such specific activities as seismic survey, drilling campaign and installation of facilities and pipelines.

Contractual Framework

Most oil exploration and production activities in Nigeria are carried out under joint ventures or Production Sharing Contracts. All of Addax Petroleum's current production is under Production Sharing Contracts.

Under a joint venture, one or more oil companies enter into a joint operating agreement with NNPC whereby the oil companies and NNPC agree to jointly explore for, develop and produce petroleum pursuant to the terms of an Oil Prospecting License or Oil Mining Lease jointly held by them. Each partner in the joint venture contributes to the costs of exploration, development and production and shares the benefits or losses of the operations in accordance with its proportionate equity interest in the joint venture. Joint ventures currently account for the majority of Nigeria's total crude oil production.

The Nigerian government has more recently moved toward Production Sharing Contract arrangements, particularly with respect to oil exploration, development and production in Nigeria's deep offshore acreage. NNPC is the holder of the Oil Prospecting License or the Oil Mining Lease and one or more oil companies enter into a Production Sharing Contract with NNPC under which they agree to carry out oil exploration, development and production activities as a contractor on NNPC's behalf at the oil company's risk and expense in return for a share of production.

In 2003, the Nigerian government considered alternatives to increase the participation of indigenous or locally owned companies in oil exploration and production. The Marginal Field Development Program is a significant part of this initiative. Marginal fields are defined by guidelines issued by the Nigerian government in July 2001 as being any field that has reserves booked and reported annually to the Nigerian government and has remained unproduced for more than ten years. Marginal fields are subject to compulsory farmouts to indigenous companies under a competitive bid process. There have been a series of acreage awards under this program, the most recent being in April 2003, when 31 indigenous oil companies were awarded acreage covering marginal fields that the international oil and gas companies had chosen not to develop. These indigenous oil companies have been encouraged to enter into agreements with international oil and gas companies for assistance with financing and technical support; however, non-Nigerian companies are not permitted to hold more than a 40 per cent equity interest.

Geological Description

The Niger Delta Basin is Africa's largest and most prolific oil producing basin. It is also one of the world's largest delta systems of Tertiary age and covers an area greater than 75,000 km². Geologically, it is similar to the Mississippi Delta complex of the United States Gulf Coast, in that it has been fed by major river systems that have deposited a thick layer of sediment in a prograding delta system.

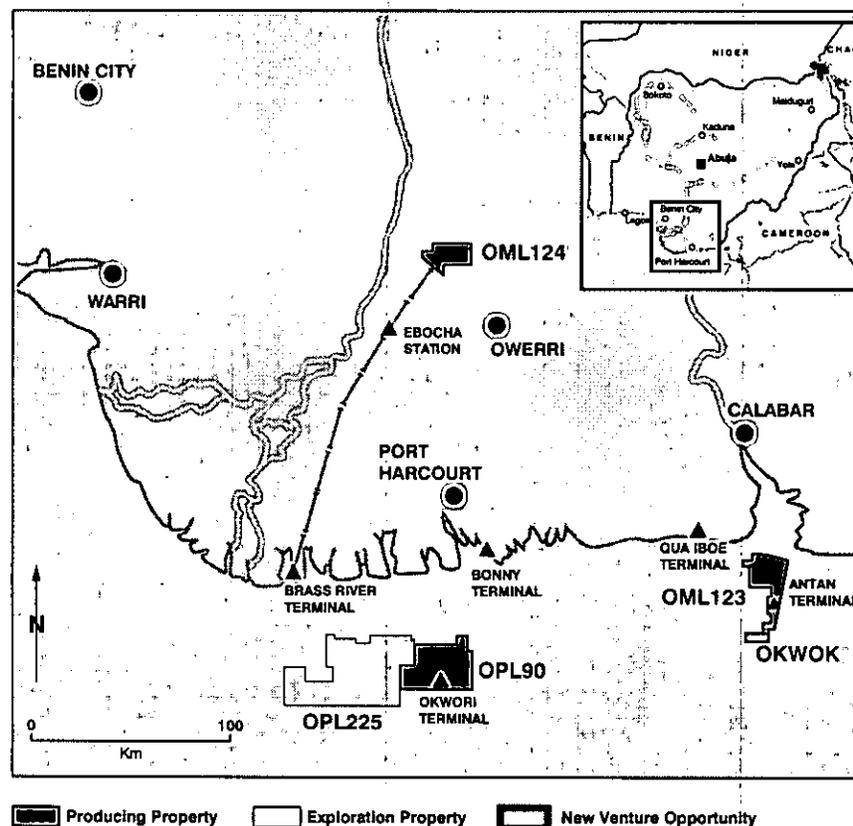

Three main lithologic formations are recognized in the basin: Benin, Agbada and Akata. These formations are usually further divided by each operator for each field. The reservoir sands in the Agbada formation are of good quality, often with Darcy permeabilities. The accumulations consist of primarily sweet, mainly light to medium oil (31° to 41° API) as oil rims with associated gas caps, and secondly, of heavy (less than 25° API) oil rims and unassociated gas. Producing oil rims are relatively thin (10 to 20 m, occasionally extending to 30 m). Most reservoirs are normally pressured with generally strong aquifer support.

Nigeria Properties

Within Nigeria, Addax Petroleum has a 100 per cent interest in a Production Sharing Contract covering OML123 and OML124, a 100 per cent interest in a Production Sharing Contract covering OPL90 and OPL225 and is pursuing a 40 per cent interest in the Okwok Property in OML67 (immediately adjacent to OML123) through the Oriental Joint Venture Agreement entered into in September 2005. OML123, OML124 and OPL90 are operated by the Corporation and contain producing oil fields as well as a number of development and exploration opportunities. OPL225 is operated by the Corporation and contains a discovery and a number of exploration opportunities. The Okwok Property contains the Okwok discovery where Addax Petroleum expects to conduct operations in its capacity as technical advisor. The Corporation has budgeted capital expenditures in Nigeria of \$161 million in the fourth quarter of 2005 and \$772 million in 2006, including budgeted capital expenditures on the Okwok Property but excluding expenditures in the JDZ.

The development of the natural gas industry, including the cessation of associated natural gas flaring by 2008, is a high priority for the Nigerian government. Currently the Corporation's Production Sharing Contracts covering OML123, OML124, OPL90 and OPL225 relate solely to commercial oil development but include the right to negotiate commercial terms with NNPC for gas development in the properties. As at September 30, 2005, NSAI reports gross contingent gas resources on Addax Petroleum's Nigeria properties to be 1.25 tcf. Addax Petroleum's natural gas strategy is intended to ensure that the Corporation complies with the requirement to cease associated natural gas flaring and also to position the Corporation to assist with, and participate in, the monetization of existing and future associated and non-associated natural gas reserves. The Corporation is currently in discussions to supply natural gas from all of its producing properties in Nigeria. See "Properties and New Ventures — Nigeria Country Discussion — Petroleum Industry — Natural Gas".

Nigeria Properties⁽¹⁾

Note:

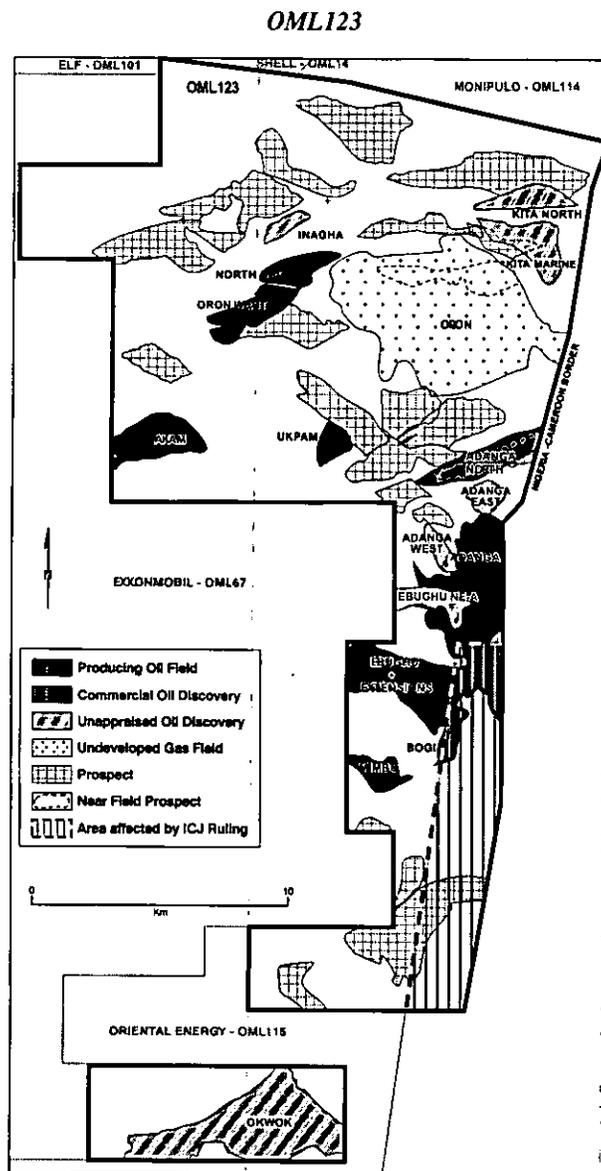

(1) This map does not reflect the Corporation's relinquishment proposals for OPL90 and OPL225. See "Properties and New Ventures — Nigeria Properties — Property Boundaries".

OML123

Overview

OML123 is the Corporation's largest property as measured by reserves and production. In the first nine months of 2005, OML123 produced an average of 46.0 mmbbls/d of oil from 52 wells with an average water cut of 35 per cent. Oil gravity ranges between 19° and 38° API. As at September 30, 2005, NSAI estimates gross proved reserves for OML123 to be 71.4 mmbbls and gross proved plus probable reserves to be 144.9 mmbbls. The Corporation expects production from OML123 to be approximately 48 mmbbls/d in 2006.

OML123 is located offshore approximately 70 km south of the town of Calabar and covers an area of 90,700 acres (367 km²) in water depths ranging from 3 to 40 m on the eastern edge of the Niger Delta. OML123 contains eight producing oil fields (Adanga, Ebughu and extensions, Oron West, North Oron, Akam, Bogi, Mimbo and Ukpam) and one undeveloped oil field (Adanga North). There are also six unappraised oil discoveries (Kita Marine, Inagha, Adanga East, Adanga West, Ebughu NE-A and Kita North), one large 8,600 acre (35 km²) undeveloped gas discovery (Oron) and several exploration prospects. Total capital expenditures for OML123 are budgeted to be \$84 million in the fourth quarter of 2005 and \$383 million in 2006.

Production and Reserves

The following table summarizes the production and reserves in OML123.

Field	Number of Wells ⁽¹⁾	Average Oil Production		Gross Oil Reserves ⁽²⁾⁽³⁾		
		9 months ended September 30, 2005	2004	Proved	Probable	Proved Plus Probable
		(bbls/d)	(bbls/d)	(mmbbls)	(mmbbls)	(mmbbls)
Adanga	19	22,720	18,730	23.2	26.6	49.8
Ebughu (and extensions)	22	15,960	12,210	13.6	4.7	18.3
Oron West and North Oron	8	5,420	3,390	25.2	25.4	50.6
Akam	9	960	700	1.4	1.0	2.4
Bogi	2	440	610	0.3	—	0.3
Mimbo	2	360	360	0.7	0.3	1.0
Ukpam	2	110	120	0.2	2.2	2.4
Adanga North	—	—	—	—	11.0	11.0
Kita North	—	—	—	6.9	2.3	9.2
Total	64	45,970	36,120	71.4	73.5	144.9

Notes:

- (1) Number of wells includes shut-in wells.
- (2) Proved and probable reserves as at September 30, 2005, as reported in the Reserve Report under "Forecast Prices and Costs Case".
- (3) Reserves presented exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.3 mmbbls. See "Properties and New Ventures — Nigeria Country Discussion — International Relations".

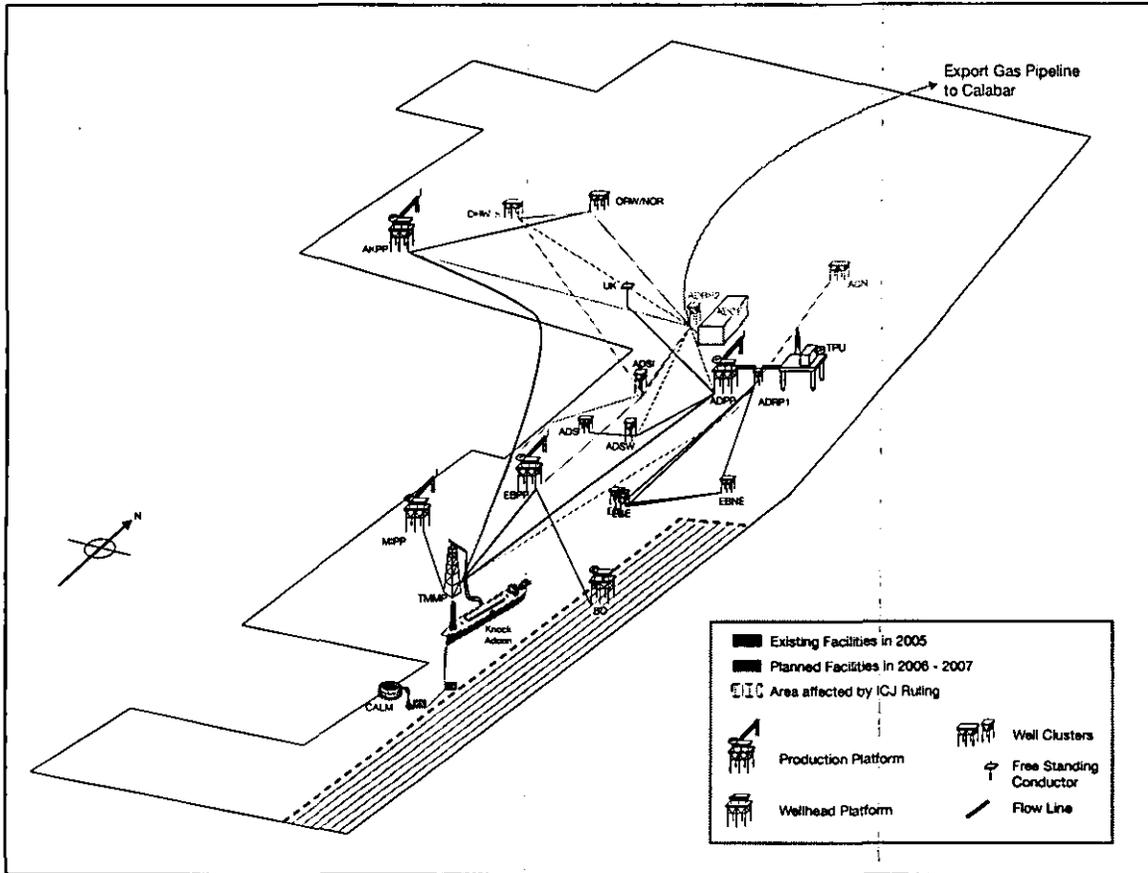

Production Facilities

The producing fields in OML123 are operated as a common development area. The key production facility is a FPSO which gathers produced crude oil from production or wellhead platforms on each field. At the OML123 FPSO, crude oil is processed to export specifications, stored and offloaded directly to ocean-going tankers.

The current OML123 FPSO is the Knock Taggart which has a nameplate processing capacity of up to 60 mbbbls/d of crude oil, a total liquids (oil and water) processing capacity of 100 mbbbls/d and a storage capacity of approximately one mmbbls of crude oil. In order to maximize production capacity and improve cost efficiency, the Corporation intends to replace the Knock Taggart with the Knock Adoon FPSO in 2006. The Knock Adoon will have a processing capacity of 60 mbbbls/d of crude oil, a total liquids (oil and water) processing capacity of 140 mbbbls/d and a storage capacity of 1.7 mmbbls of crude oil and will incorporate an off-loading buoy terminal to better facilitate offloading during periods with strong currents. The Knock Adoon will be under a time charter with a subsidiary of Fred Olsen Production AS, the term of which is anticipated to expire in June 2014 with extension periods of up to a further eight years at the Corporation's option.

In order to maximize the use of the OML123 production facilities, Addax Petroleum has entered into an agreement with the OML114 Parties who operate the adjacent OML114, to store and export all of the crude oil produced from their license area. In return, the OML114 Parties pay the Corporation for their share of the expenses for the operation of the OML123 FPSO. For the first nine months of 2005, crude oil liftings totaled 12.6 mmbbls for Addax Petroleum and NNPC and 4.3 mmbbls for the OML114 Parties.

OML123 Production Facilities

Associated gas produced on OML123 is currently used for gas lift and fuel gas to aid oil production while the excess is flared by Addax Petroleum. NNPC, the owner of all natural gas in Nigeria, has informed the Corporation that it has targeted to use OML123 to supply 140 mmcf/d of natural gas to a new power generation plant at Calabar, starting in 2007. This project will aid the Corporation in achieving its objective of complying with the "Flares Down by 2008" policy announced by the Nigerian government. The Corporation believes its participation in this gas supply project will position it to participate in the supply of non-associated gas under separate supply arrangements in the future.

The initial gas supply project from OML123 contemplates the construction of gas gathering pipelines to bring both associated gas from existing oil facilities as well as non-associated gas to a central gas processing unit comprised of gas processing and compression facilities and a gas delivery pipeline to the town of Calabar. The central gas processing unit should be located adjacent to existing oil production facilities in the Adanga field. The capital expenditures for the gas supply project are expected to be funded by Addax Petroleum and NNPC. See "Properties and New Ventures — Nigeria Properties — OML123 — Budgeted Capital Expenditures".

Fields

Adanga

The Adanga field, discovered in 1980 and producing since 1986, is Addax Petroleum's principal producing field in OML123. For the first nine months of 2005, Adanga produced an average of 22.7 mmbbls/d of oil from 15 wells with an average watercut of 15 per cent. Oil gravity averaged 33° API. As at September 30, 2005, NSAI estimates gross proved reserves for the Adanga field to be 23.2 mmbbls and gross proved plus probable reserves to be 49.8 mmbbls.

The Adanga field is located in water depths ranging from 10 to 20 m and covers an area of approximately 2,800 acres (11.3 km²) in the central part of OML123. The Corporation is producing from seven stacked "P" sand reservoirs of Miocene age at depths between 5,000 and 7,600 ftss, but most of the production comes from two reservoirs between 5,900 and 6,200 ftss which contain 90 per cent of the reserves in Adanga.

First production started in 1986 from the Adanga main block through one vertical and eight deviated wells drilled from the Adanga Platform. Following a detailed 3D seismic interpretation, Addax Petroleum modelled the field in 1999-2000 and undertook an extensive appraisal and development drilling program in the southern blocks, beginning in 2001. Since then, the Corporation has drilled a total of 29 wells resulting in 15 horizontal production wells, 12 appraisal wells and two water injection wells. The Corporation continues to evaluate infill and step-out drilling locations at Adanga and, in 2006, plans to drill five appraisal wells followed by up to five horizontal production wells and one water injection well and to work-over and recompleate two water injection wells. Water injection pumping facilities will be provided on the Knock Adoon. Most of the field's well completions are equipped with gas lift capability. The Corporation expects that 2005 production levels from the Adanga field will be maintained in 2006.

Wells from the Adanga field produce through the Adanga Platform, installed in 1986, and three satellite wellhead platforms, installed in 2003. In the second quarter of 2004, a new riser platform tied-in to a leased TPU was commissioned at Adanga, at which time all production was handled by the TPU. The TPU now handles all initial processing in the Adanga area prior to being pumped to the FPSO. In addition, the TPU allows production from the wells in the nearby Ebughu field extensions which could not otherwise be accommodated on the Adanga Platform or on the Ebughu Platform. In the fourth quarter of 2005 and 2006, the Corporation plans to purchase the TPU and refurbish both the TPU and the Adanga platform. The refurbishment project is planned to be substantially complete by the end of 2006.

Ebughu (and extensions)

The Ebughu field, discovered in 1980 and producing since 1988, along with the extensions is Addax Petroleum's second largest producing field in OML123. For the first nine months of 2005, Ebughu produced an average of 16.0 mmbbls/d of oil from 21 horizontal wells with an average watercut of 46 per cent. Oil gravity ranges between 20° API in the Ebughu field and 28° API in its northeast extension. As at September 30, 2005, NSAI estimates gross proved reserves for the Ebughu field and extensions to be 13.6 mmbbls and gross proved plus probable reserves to be 18.3 mmbbls.

The Ebughu field is located in water depth of approximately 30 m and covers an area of approximately 2,600 acres (10.6 km²) in the southern part of OML123. Production is from an 18 m thick oil rim in the "AA" horizon of Upper Miocene age at an average depth of 4,500 ftss. Most of the Ebughu field's oil completions are on gas lift.

Following a successful three-well appraisal program in 1984, Ashland installed the Ebughu Platform in 1988 and completed two wells which began producing in 1988. In 1996, a pilot horizontal production well was drilled between the existing two wells. Since 1999, Addax Petroleum has embarked on an extensive appraisal and development drilling program resulting in the discovery of five field extensions. In the second half of 2006, Addax Petroleum plans to drill three horizontal production wells on the eastern and north-eastern extensions subject to the availability of a second drilling rig for OML123 and authorization being granted to locate wells in the Disputed Area. As the drilling program is budgeted to take place in the second half of the year, the Corporation does not anticipate a material production impact from these new wells in 2006.

In 2004, the Corporation constructed and installed two wellhead platforms and two export pipelines to, and one gas lift pipeline from, the TPU in the Adanga field. No further production facilities are planned to be added at Ebughu.

Oron West and North Oron

Oron West was discovered by Addax Petroleum in 2002 and North Oron was successfully appraised in the same year. Oil production from Oron West and North Oron commenced in 2004. For the first nine months of 2005, Oron West and North Oron produced an average of 5.4 mmbbls/d from eight wells in both fields with an

average watercut of 2 per cent. Oil gravity averages 38° API in Oron West and 27° API in North Oron. As at September 30, 2005, NSAI estimates gross proved reserves for the Oron West and North Oron fields to be 15.8 and 9.4 mmbbls, respectively, and gross proved plus probable reserves to be 29.7 and 20.8 mmbbls, respectively.

The fields are located in water depth of approximately 8 m and cover an area of approximately 1,200 acres (4.9 km²) in the northwest sector of OML123. Production is from two "I" sands of Miocene age at depths between approximately 6,300 ftss in Oron West and at 5,100 ftss in North Oron. In 2005, Addax Petroleum drilled nine appraisal wells on Oron West and five appraisal wells on North Oron in the first development phase of both fields.

In 2005, the Corporation designed and constructed a wellhead platform from which six horizontal production wells have been drilled. Currently production is constrained as it flows to the Akam platform where it is degassed prior to being pumped to the Knock Taggart. In 2006, a second wellhead platform is planned to be installed near the existing platform from which a further four wells are planned in 2006 comprising two horizontal production wells in North Oron and one appraisal and one horizontal production well in Oron West. In addition, an isolated appraisal well is planned in Oron West. A third wellhead is planned to be installed in the second half of 2006 on the southern extension of Oron West from which two water injection wells will be drilled followed by three horizontal production wells in 2007. In order to overcome the production constraint at Akam, a new pipeline from Oron to the Adanga Platform, bypassing Akam, is also planned for 2006. The Corporation anticipates production from the Oron West and North Oron fields to increase to approximately 17 mbbbls/d during 2006.

Akam

The Akam field was discovered in 1980 and has been producing since 1984. In the first nine months of 2005, Akam produced an average of 1.0 mbbbls/d of oil from three deviated wells and one horizontal well with an average watercut of 87 per cent. Oil gravity is 36° API. As at September 30, 2005, NSAI estimates gross proved reserves for the Akam field to be 1.4 mmbbls and gross proved plus probable reserves to be 2.4 mmbbls.

The Akam field is located in 15 to 20 m water depth and covers an area of approximately 1,100 acres (4.6 km²) in the central part of OML123. Production is from four stacked "P" sand reservoirs of Miocene age at depths between 4,300 ftss and 6,200 ftss although most of the current production in the Akam field comes from two reservoirs between 4,800 ftss and 5,500 ftss. Some of the Akam accumulations may extend marginally into the adjacent license to the west held by the ExxonMobil/NNPC joint venture.

The Corporation plans to drill one appraisal and one horizontal development well at Akam in mid 2007. Further drilling plans will be contingent on the outcome of this well.

Bogi

The Bogi field was discovered in 1983 and has been producing since 1988. In the first nine months of 2005, Bogi produced an average of 0.4 mbbbls/d of oil from one horizontal well with an average watercut of 42 per cent. Oil gravity is 20° API. As at September 30, 2005, NSAI estimates gross proved reserves for the Bogi field to be 0.3 mmbbls.

The Bogi field is located in water depth of approximately 40 m and covers an area of approximately 150 acres (0.6 km²) in the southern part of OML123. Production is from a 20 m thick oil rim in the "C-3" reservoir sand of Miocene age at an average depth of 6,950 ftss. The eastern flank of the field straddles the international boundary with Cameroon as defined by the International Court of Justice in October 2002. See "Properties and New Ventures — Nigeria Country Discussion — International Relations". As a result, the Bogi Platform is now located in the Disputed Area. No further drilling activity or significant capital expenditures are planned for this field.

Mimbo

The Mimbo field was discovered in 1984 and has been producing since 1989. In the first nine months of 2005, Mimbo produced an average of 0.4 mbbbls/d of oil from one horizontal wells with an average watercut of

32 per cent. Oil gravity is 30° API. As at September 30, 2005, NSAI estimates gross proved reserves for the Mimbo field to be 0.7 mmbbls and gross proved plus probable reserves to be 1.0 mmbbls.

The Mimbo field is located in water depth of approximately 40 m and covers an area of approximately 420 acres (1.7 km²) in the southern part of OML123. Addax Petroleum is producing from a 30 m thick oil rim in the "C-3" reservoir sand of Miocene age at an average depth of 6,910 ftss. No further drilling activity or other capital expenditures are planned for this field.

Ukpam

The Ukpam field was discovered in 1986 and has been producing since 1989. In the first nine months of 2005, Ukpam produced an average of 0.1 mbbbls/d of oil from two wells with an average watercut of 89 per cent. Oil gravity ranges between 38° and 45° API. As at September 30, 2005, NSAI estimates gross proved reserves for the Ukpam field to be 0.2 mmbbls and gross proved plus probable reserves to be 2.4 mmbbls.

The Ukpam field is located in 10 m water depth and covers an area of approximately 420 acres (1.7 km²) in the central part of OML123. Addax Petroleum is producing from three stacked reservoirs in the "AC-1", "P-4" and "I" sands of Miocene age at depths between 5,000 ftss and 7,800 ftss. No further drilling activity or other capital expenditures are planned for this field.

Adanga North

The Adanga North field was discovered in 1986 and appraised in 1996, and further appraisal and development plans are in progress. Oil gravity is 19° API. As at September 30, 2005, NSAI estimates gross proved plus probable reserves to be 11.0 mmbbls.

The Adanga North field is located in 10 m water depth and covers an area of approximately 1,100 acres (4.5 km²) in the central part of OML123. Two stacked reservoirs each contain a 18 m thick oil rim with an associated gas cap in good quality sands of Upper Miocene age at depths between 3,300 ftss and 3,650 ftss.

In 2006, the Corporation plans to carry out an extended production test to establish the optimal development plan for the Adanga North field. As part of this process, Addax Petroleum built and installed a wellhead structure from which one appraisal well was drilled in the fourth quarter of 2005 and confirmed the eastern extension of the field. A horizontal well for an extended well test is currently being drilled. If the production test is successful, the field would be developed as a satellite to the Adanga Platform with production expected to start in 2007 at an estimated rate of approximately 12 mbbbls/d. The development plans for the field would include the construction of a four km long pipeline to the Adanga Platform.

Unappraised Discoveries and Exploration

In addition to the existing fields, there are seven unappraised discoveries in OML123 which are the Oron gas discovery drilled in 1975, the Inagha, Adanga West and Ebughu NE-A oil discoveries drilled in 2002 and the Adanga East and Kita North oil discoveries drilled in 2005. Kita North may be a significant discovery as it encountered a total of 100 ft of oil in a reservoir at a depth of 4,750 ftss which tested at 1.0 mbbbls/d of 28° API gravity oil. As at September 30, 2005, NSAI estimates gross proved reserves for Kita North to be 6.9 mmbbls and gross proved plus probable reserves to be 9.2 mmbbls.

The Corporation has concluded an in-depth study of the remaining exploration potential of OML123 based upon full 3D seismic survey and existing well data. The study classed the remaining exploration potential into near field potential clusters, which can be drilled from or which are readily accessible to existing production facilities, and prospect clusters which may require additional platforms and pipelines to connect to existing facilities. Each cluster contains multiple prospects. Four near field potential clusters and five prospect clusters were identified.

Presently, two of the exploration clusters (Inagha and Kita North) have been drilled, both of which discovered oil. The most recent discovery, Kita North, was the most productive. In addition, one of the near field potential clusters has been successfully drilled (Adanga East) and the results are being evaluated. Following on from the recent exploration success on Kita North, the Corporation plans to expand its exploration and appraisal

drilling activity, subject to rig availability, including the Kita North area appraisal of the Oron gas discovery in 2006 and exploration of the Adanga North Graben and Antan prospect clusters in 2006 and 2007.

NSAI reports Addax Petroleum's gross prospective oil resources in OML123 as of September 30, 2005 to be 220 mmbbls (116 mmbbls risked).

Budgeted Capital Expenditures

Capital expenditures for OML123 are budgeted to be \$84 million in the fourth quarter of 2005, comprised of \$28 million for drilling and \$56 million for facilities, and \$383 million in 2006, as discussed below. The budgeted capital expenditures will fund significant infrastructure investment to sustain future production, including the replacement of the Knock Taggart (scheduled to be completed in 2006) and the installation of a centralized gas gathering and gas lift facility (scheduled to be completed in 2007), as well as a two-rig drilling program that includes:

- the ongoing development of the Oron West and North Oron fields;
- the completion of a water injection project in the Adanga field;
- infill and extension drilling in the Adanga and Ebughu fields; and
- appraisal drilling in the Adanga North field and the recently discovered Kita North area.

These expenditures are expected to increase production from approximately 46 mbbls/d in 2005 to approximately 48 mbbls/d in 2006.

Field / Category	2006 Budgeted Capital Expenditures			Number of wells
	Drilling & Seismic (\$million)	Facilities & Other (\$million)	Total (\$million)	
Infrastructure				
FPSO replacement	-	80	80	-
Gas lift and gas gathering	-	55	55	-
TPU purchase and Adanga Platform and TPU refurbishment	-	17	17	-
General maintenance	-	31	31	-
Subtotal	-	183	183	-
Field Development				
Oron West and North Oron	52	53	105	6
Adanga	55	-	55	5
Ebughu (and extensions)	25	-	25	3
Subtotal	132	53	185	14
Exploration and appraisal	15	-	15	2
Total	147	236	383	16

The Corporation estimates the total cost through 2007 of the proposed project to supply natural gas to the power plant at Calabar to be \$427 million. Of the total estimated capital expenditure for the proposed project, the Corporation estimates that \$81 million relates to the provision of gas gathering and gas lift infrastructure for associated gas. This \$81 million is included in budgeted capital expenditures and will be the direct responsibility of the Corporation to fund but will be recoverable under the terms of the OML123/124 PSC. Approximately \$55 million of this amount is budgeted to be spent in 2006, with the remainder to be spent in 2007. The balance of the total initial investment of \$346 million is related to non-associated gas production facilities, gas processing and compression facilities and the delivery pipeline to Calabar and is the responsibility of NNPC. Approximately \$264 million of this amount is expected to be spent in the fourth quarter of 2005 and in 2006, with the remainder to be spent in 2007. The Corporation is in discussions with NNPC to clarify the apportionment of the funding responsibility, including a provision whereby the Corporation would carry NNPC's capital investment in exchange for modifications to the OML123/124 PSC, including a temporary increased share of Profit Oil.

Addax Petroleum believes the 220 mmbbls (116 mmbbls risked) of gross prospective oil resources in OML123, as reported by NSAI, provide the Corporation with the opportunity to sustain a sizeable capital expenditure program in OML123 for the near and medium term.

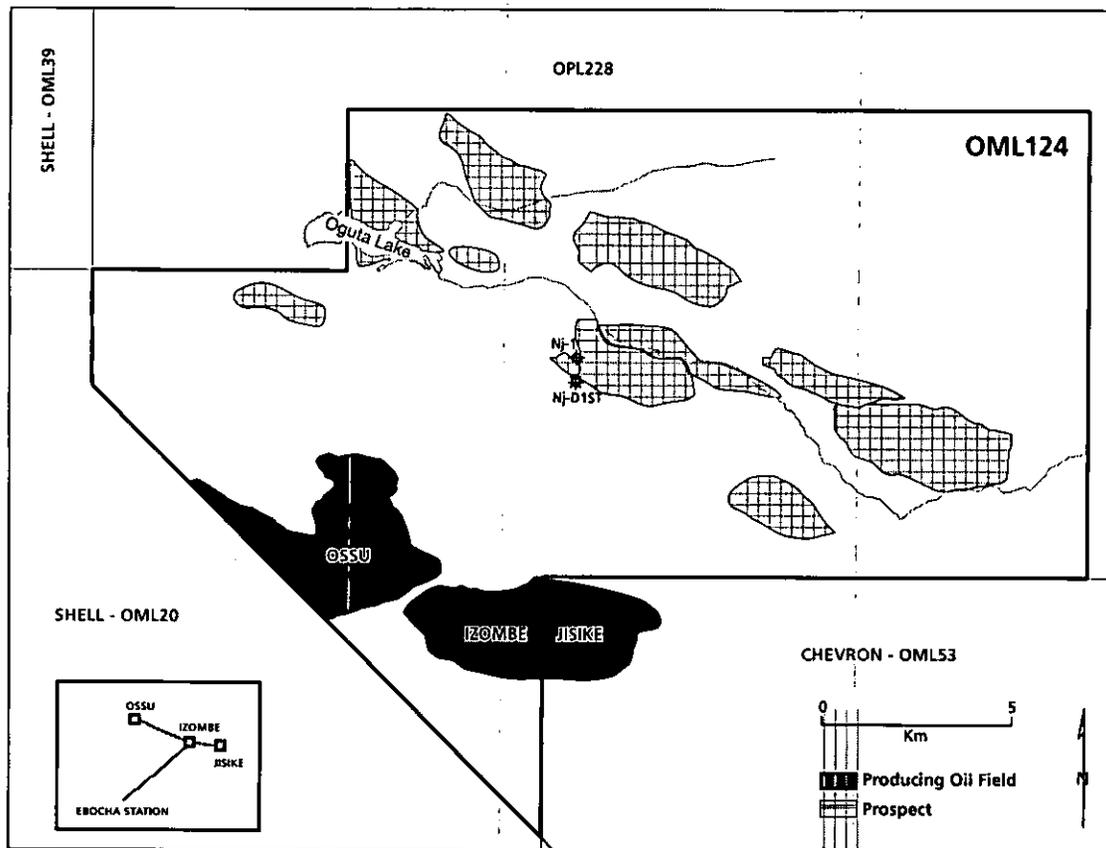

OML124

Overview

OML124 is the Corporation's smallest producing property as measured by reserves and production. For the first nine months of 2005, OML124 produced an average of 3.5 mmbbls/d of oil from ten wells with an average watercut of 84 per cent. Oil gravity ranges between 29° API and 48° API. With the exception of a one week long stoppage to production during September 1999, there has been no unplanned disruption to production from OML124. As at September 30, 2005, NSAI estimates gross proved reserves for OML124 to be 10.0 mmbbls and gross proved plus probable reserves to be 12.6 mmbbls. The Corporation expects production from OML124 to be approximately 4 mmbbls/d in 2006.

OML124 is located onshore in Imo State, approximately 100 km north of Port Harcourt, and covers an area of 74,100 acres (300 km²) on the northeast edge of the Niger Delta. OML124 contains two producing fields, Ossu and Izombe, the latter extending as the Jisike field to the southeast into the adjacent OML53 held by the Chevron/NNPC joint venture. OML124 also contains ten exploration prospects the most attractive of which is Okaka prospect in the southeast part of the property. Total capital expenditures for OML124 are budgeted to be \$9 million in the fourth quarter of 2005 and \$27 million in 2006.

OML124

Production and Reserves

The following table summarizes the production and reserves in OML124.

Field	Number of Wells ⁽¹⁾	Average Oil Production		Gross Oil Reserves ⁽²⁾		
		9 Months Ended September 30, 2005 (bbls/d)	2004 (bbls/d)	Proved (mmbbls)	Probable (mmbbls)	Proved Plus Probable (mmbbls)
Izombe	7	1,810	2,160	5.6	2.0	7.6
Ossu	6	1,700	1,650	4.4	0.6	5.0
Total	13	3,510	3,810	10.0	2.6	12.6

Notes:

- (1) Number of wells includes shut-in wells.
- (2) Proved and probable reserves as at September 30, 2005 as reported in the Reserve Report under "Forecast Prices and Costs Case".

Production Facilities

The Ossu and Izombe fields are operated as a common production area. Production facilities include the Izombe Flow Station, gas compressors, water injection pumps and three flow lines from Ossu to the Izombe Flow Station. The Corporation has an agreement with a Chevron/NNPC joint venture whereby crude oil produced from the Chevron/NNPC Jisike field is processed at the Izombe Flow Station in return for the payment of a tariff to Addax Petroleum. The Ossu, Izombe and Jisike crudes are all processed at the Izombe Flow Station and transported via an export pipeline to Ebocha. From Ebocha, the oil is transported through the Agip/NNPC joint venture's pipeline to their Brass River Terminal.

At the present time some of the associated gas being produced with the oil from OML124 is re-injected to aid oil production and the remainder is flared. The Corporation together with a consortium of private Nigerian investors, is contemplating the construction of an LPG facility. The Corporation has completed conceptual design studies relating to the supply of gas to and construction of this LPG facility which would be located adjacent to the existing Izombe Flow Station. This project requires a supply of a total of 40 mmcf/d of associated and non-associated gas from the Ossu and Izombe fields. The LPG plant is expected to produce approximately 75 t/d of propane, approximately 75 t/d of butane and approximately 1 mbbbls/d of natural gasoline and approximately 35 mmcf/d of residue lean gas. The Corporation expects that the natural gasoline would be blended with oil at the Izombe Flow Station for export. Butane and some blended propane would be marketed locally. Subject to access to appropriate export facilities, butane and propane may be exported and the residue lean gas would be used for local power generation, as LNG feed stock or re-injected into the Izombe and Ossu fields. See "Properties and New Ventures — Nigeria Properties — OML124 — Budgeted Capital Expenditures".

Fields

Izombe

The Izombe field, discovered in 1974 and producing since 1975, is Addax Petroleum's principal producing field in OML124. In the first nine months of 2005, Izombe produced an average of 1.8 mbbbls/d from six wells with an average watercut of 83 per cent. Oil gravity ranges between 35° and 40° API. As at September 30, 2005, NSAI estimates gross proved reserves for the Izombe field to be 5.6 mmbbls and gross proved plus probable reserves to be 7.6 mmbbls.

The Izombe field is located in a relatively densely populated dry land area covered by farmlands, shrubs and secondary rain forest, at an elevation of 45 to 60 m above mean sea level, and covers an area of approximately 1,600 acres (6.4 km²) in the southern part of OML124. Production is from four stacked reservoirs in the sands of Early Miocene age at depths between 5,300 and 7,400 ftss, but most of the production comes from one reservoir located at approximately 5,400 ftss. Most accumulations extend to the east into the Jisike field operated by Chevron.

In 2006, the Corporation plans to drill an oil production well, a water injection well and to work over an existing oil production well in the Izombe field.

Ossu

The Ossu field was discovered in 1973 and has been producing since 1976. In the first nine months of 2005, Ossu produced an average of 1.7 mbbbls/d from four wells with an average watercut of 85 per cent. Oil gravity ranges between 29° and 48° API. As at September 30, 2005, NSAI estimates gross proved reserves for the Ossu field to be 4.4 mmbbls and gross proved plus probable reserves to be 5.0 mmbbls.

The Ossu field is located approximately 4 km to the west of the Izombe field at an elevation of 25 m above mean sea level in a drowned river valley affected by seasonal flooding which limits the access to the field during the rainy season. The field covers an area of approximately 2,300 acres (9.3 km²) in the south western part of OML124. Production is from four stacked reservoirs in the sands of Early Miocene age at depths between 4,500 and 8,500 ftss, but most of the production comes from three reservoirs at depths between 4,500 ftss and 6,850 ftss. Some accumulations extend to the west into the adjacent OML20, which is operated by the Shell/NNPC joint venture.

In late 2005, the Corporation plans to start a drilling and well work over program, including drilling one appraisal and two oil production wells, and working over two existing oil production wells in 2006 in the Ossu field.

Unappraised Discoveries and Exploration

In 2002, the Corporation concluded a comprehensive acreage and prospect evaluation study based on 3D and 2D seismic surveys and existing well data. Several prospects with possible commercial potential were identified in the north eastern sector of OML124. The Corporation intends to drill the Okaka exploration prospect in 2006, which will be the first exploration well to be drilled by the Corporation in OML124.

NSAI reports Addax Petroleum's gross prospective oil resources in OML124 as of September 30, 2005 to be 32 mmbbls (14 mmbbls risked).

Budgeted Capital Expenditures

Total capital expenditure budgeted for OML124 is \$9 million for the fourth quarter of 2005 and \$27 million for 2006.

In addition to its budgeted capital expenditures for 2006, the Corporation estimates the total investment to complete the contemplated LPG project would be \$94 million of which \$60 million would be incurred by Addax Petroleum to supply feed gas and \$34 million would be incurred by Addax Petroleum and by other private sector investors to fund the construction of the LPG plant. It is expected that private sector investors would hold a 60 per cent interest in the LPG plant and the Corporation would hold the remaining 40 per cent interest. All of the facilities would be constructed and initially operated by Addax Petroleum. The Corporation intends to make a final investment decision regarding the LPG project by the end of the first quarter of 2006. If the Corporation decides to proceed, it expects the plant to be operational in 2007. The Corporation estimates its total share of the capital investment would be approximately \$74 million of which \$58 million is forecasted to be spent by the Corporation in 2006 with the balance of \$16 million to be spent in 2007 after the plant is operational. Of the Corporation's capital expenditure, the \$60 million incurred to supply feed gas would be recoverable over a five year period under the terms of OML123/124 PSC.

OPL90 and OPL225

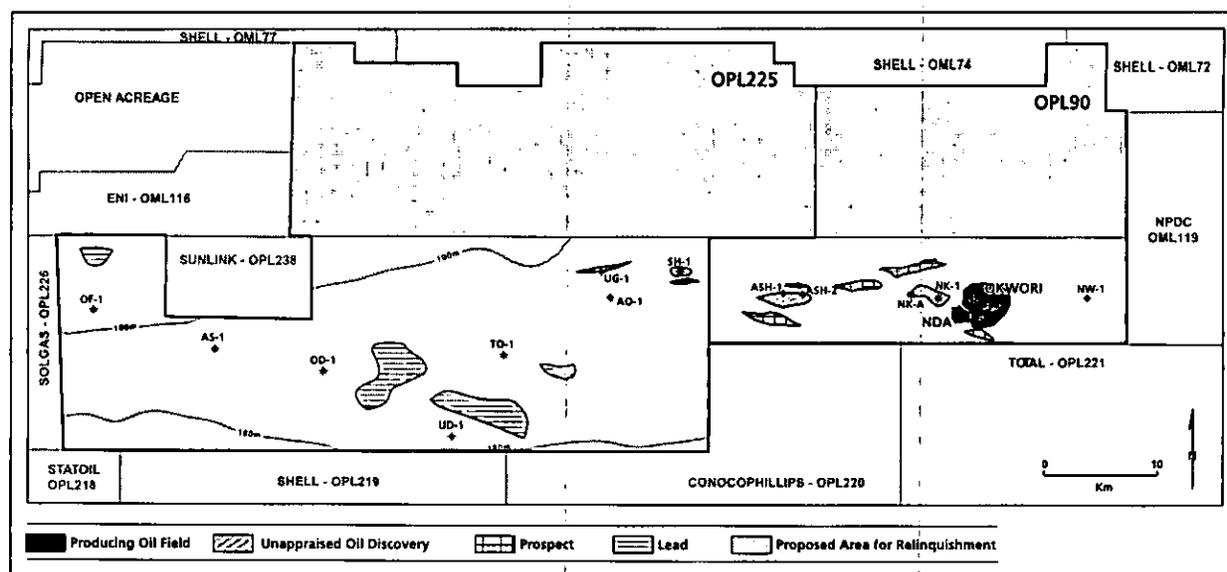

Overview

OPL90 and OPL225 are two contiguous blocks which represent Addax Petroleum's largest Nigerian properties as measured by area and also account for the majority of the Corporation's recent production growth. Production from OPL90 commenced in March 2005 and averaged 20 mbbbls/d for the month of October 2005. In the first nine months of 2005, OPL90 produced an average of 12.6 mbbbls/d of oil from six wells with no watercut. Oil gravity ranges between 35° and 38° API. As at September 30, 2005, NSAI estimates gross proved reserves for OPL90 to be 27.9 mmbbls and gross proved plus probable reserves to be 43.7 mmbbls. As at September 30, 2005,

OPL225 had no reserves or production. The Corporation expects production from OPL90 and OPL225 to be approximately 33 mmbbls/d in 2006.

OPL90 and OPL225 are located 90 km offshore south of Port Harcourt, close to the edge of the continental shelf, in water depths ranging between 50 and 210 m and cover a combined area of 327,200 acres (1,324 km²). The southern half of OPL90 has been completely surveyed by 3D seismic and contains one producing oil field (Okwori), four undeveloped oil discoveries, one of which (Nda) is currently producing from an extended well test and will be developed in 2006, and four exploration prospects. OPL225 has been surveyed principally by 2D seismic and it contains one undeveloped oil discovery, several non-commercial gas discoveries and a number of shallow and deep leads. Addax Petroleum plans to acquire a 800 km² 3D seismic survey across this southern area of OPL225 at the end of 2005. Total capital expenditures for OPL90 and OPL225 are budgeted to be \$68 million in the fourth quarter of 2005 and \$290 million in 2006.

OPL90 and OPL225 Properties

Production and Reserves

The following table summarizes the reserves and production in OPL90 and OPL225. Production from the Okwori field in OPL90 started in March 2005. Production from the Nda field in OPL90 is from an extended well test following which a full field development is planned to take place.

Field	Number of Wells	Average Oil Production		Gross Oil Reserves ⁽¹⁾		
		October 2005 (bbls/d)	9 Months Ended September 30, 2005 (bbls/d)	Proved (mmbbls)	Probable (mmbbls)	Proved Plus Probable (mmbbls)
Okwori	5	16,360	10,080	20.7	12.8	33.5
Nda	1	3,590	2,530	7.2	3.0	10.2
Total	6	19,950	12,610	27.9	15.8	43.7

Note:

(1) Proved and probable reserves as at September 30, 2005 as reported in the Reserve Report under "Forecast Prices and Costs Case".

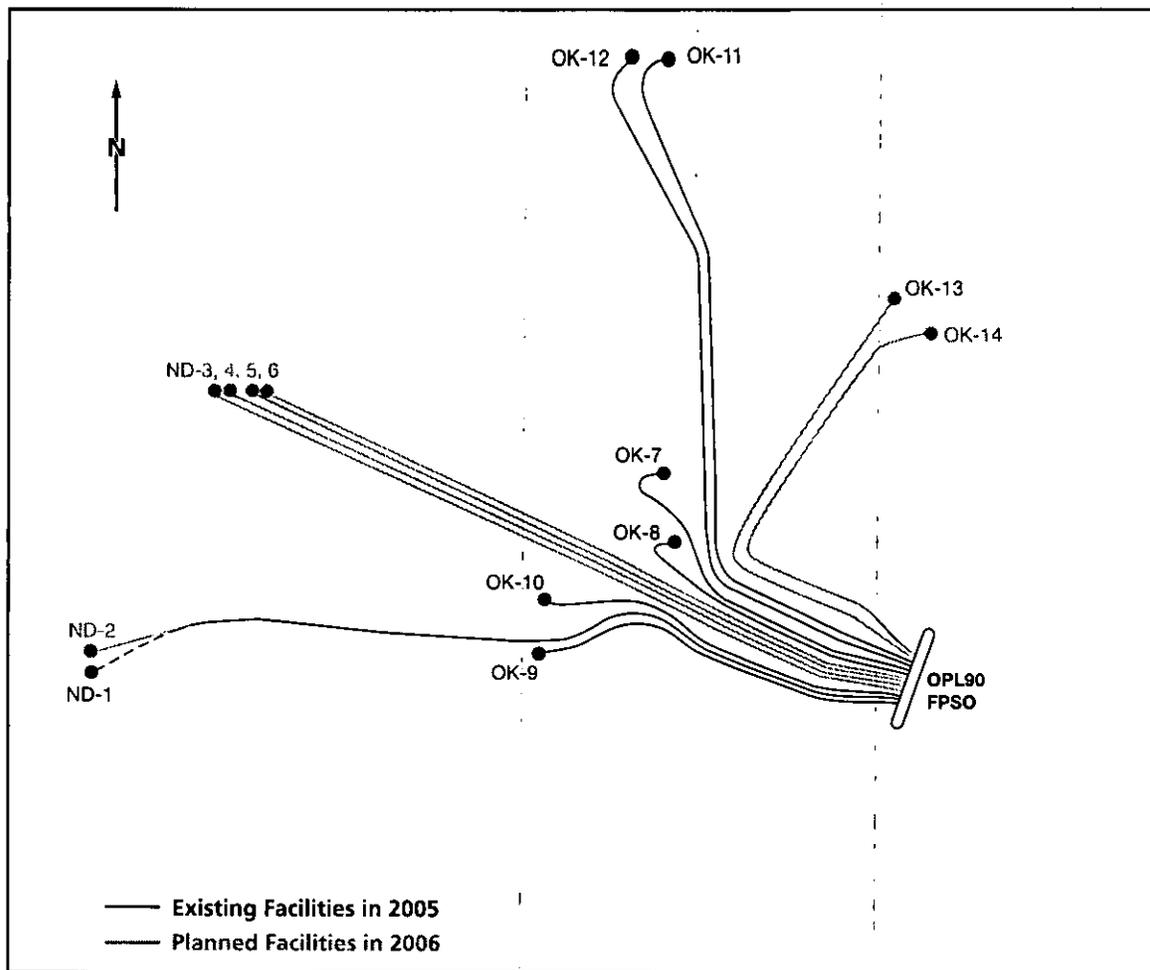

Production Facilities

The Okwori and Nda fields in OPL90 are operated as a common development area. Individual wells in each field are connected to the FPSO Sendje Berge by individual sub-sea flow lines. At the OPL90 FPSO, crude oil is processed to export specifications, stored and offloaded directly to ocean-going tankers.

The OPL90 FPSO has a nameplate processing capacity of 38 mbbbl/d of crude oil, a total liquids (oil and water) processing capacity of 60 mbbbl/d and a storage capacity of approximately two mmbbls of crude oil. The OPL90 FPSO is under a time charter from Sendje Berge Ltd., a company within the Norwegian shipping group Bergesen now owned by Worldwide Shipping of Hong Kong. The term of the charter expires in February 2009, with extension periods of up to an additional four years at the Corporation's option.

The production facilities at OPL90 have been designed to accommodate additional production from future satellite developments, should planned exploration drilling result in commercial oil discoveries. One such discovery, the Nda field, has been producing to the OPL90 production facilities under an extended well test since March 2005 and is awaiting full field development. The Corporation anticipates that throughout 2006 and into 2007 there will be continuous drilling and well hook-up activity on the property.

OPL90 Production Facilities

The Corporation believes that the known associated gas resource on OPL90 is insufficient to justify commercial development. To cease flaring on OPL90, Addax Petroleum has proposed to NNPC to construct a gas gathering pipeline from the OPL90 FPSO to a new gas trunk line to be built by an adjacent operator. Construction of the gas gathering pipeline is expected to take place in 2006 or 2007. The capital expenditures for the gas gathering pipeline will be funded by Addax Petroleum. See "Properties and New Ventures — Nigeria Properties — OPL90 and OPL225 — Budgeted Capital Expenditures".

Fields

Okwori

The Okwori field, discovered in 1972 and appraised in 1973 by Occidental, was further appraised in the mid-1990s by Ashland and declared commercial in 1996. Field development planning was commenced by Ashland at that time, but was suspended when Ashland's Production Sharing Contracts were terminated by a settlement agreement with the Nigerian government in 1998. See "Addax Petroleum — Corporate History".

Addax Petroleum began development of the Okwori field in July 2004 and commenced production from the Okwori field in March 2005. For the month of October 2005, the Okwori field produced an average of 16.4 mmbbls/d of oil from five wells with an average watercut of 3 per cent. Oil gravity ranges between 35° and 38° API. As at September 30, 2005, NSAI estimates gross proved reserves for the Okwori field to be 20.7 mmbbls and gross proved plus probable reserves to be 33.5 mmbbls.

The Okwori field is located in 110 to 150 m water depth and covers approximately 2,700 acres (11 km²) in the southern part of OPL90. The field development plan envisages production from seven stacked reservoirs in the sands of Plio-Miocene age at depths between 5,100 and 9,300 ftss, but the majority of the production is expected to come from two reservoirs (7,000 to 9,300 ftss). The stacked reservoir configuration of the field requires that production wells be selectively completed, choosing the optimum oil zones to be produced.

As of the end of October 2005, six production wells have been successfully drilled on the Okwori field of which five have been placed on production and the sixth is awaiting tie-in to the OPL90 FPSO. All wells have been fitted with downhole expandable sand screens designed to exclude the production of sand dislodged from reservoir rock that may occur. At the end of October 2005, the sand screen in one well had failed and is anticipated to fail shortly in a second well. Remedial treatment of these wells is planned in late 2005 and/or early 2006. The Corporation plans to drill two more development wells to complete the field development plan and is reviewing the methodology for control of sand production. The Corporation plans to complete the Okwori field development drilling program in 2006 and production is expected to average approximately 25 mmbbls/d in 2006.

When the OPL90/225 PSC was awarded to Addax Petroleum in 1998, Total, which held a 50 per cent farm-in interest in Ashland's Production Sharing Contract, was given an option to retain a 50 per cent interest in the area. This option was replaced by a reimbursement agreement between Total and Addax Petroleum dated October 24, 2000, whereby Total is entitled to an eight per cent net profit interest in only the Okwori field.

Nda

The Nda field was discovered by Addax Petroleum in July 2004. The Nda field is currently producing by means of an extended well test on the first Nda well ("Nda-1") which averaged 3,280 bbls/d in December 2005. The Nda-1 well encountered three oil bearing reservoirs, having gross oil intervals of 19, 31 and 8 m respectively bounded in each instance by individual oil-water contacts. The well is tied back to the OPL90 FPSO and had produced a total of 0.7 mmbbls at September 30, 2005. As at September 30, 2005, based on the Nda-1 well results, NSAI estimated gross proved reserves for the Nda field to be 7.2 mmbbls, gross proved plus probable reserves to be 10.2 mmbbls and gross proved plus probable plus possible reserves to be 19.6 mmbbls.

In December 2005, Addax Petroleum drilled the second well in the Nda field ("Nda-2"), approximately 650 m from Nda-1 with the purpose of further delineating the Nda field reserves and finalizing the Nda field development plan. Nda-2 was drilled up-dip of Nda-1 and encountered oil in the same three stacked reservoirs. The drilling results from the Nda-2 well now demonstrate gross oil column heights in these reservoirs of 62, 73 and 61 m respectively which are in excess of management's expectations prior to drilling the well. Addax Petroleum expects that the December 2005 drilling results for Nda-2 will result in the recategorization of proved, probable and possible reserves for the Nda field and in the addition of reserves in all three categories. The recent drilling results for Nda-2 were not available for review by NSAI in connection with the preparation of the Reserve Report and therefore are not reflected in the Reserve Report.

The Nda field is located adjacent to the Okwori field in a similar water depth and covers approximately 250 acres (1 km²) in the southern part of OPL90. The field will be producing from three stacked reservoirs in the sands of Plio-Miocene age at depths between 6,700 and 8,150 ftss.

The Corporation has finalized a development plan for the Nda field, which has been submitted to the Nigerian government. The field development plan comprises drilling four horizontal wells during 2006,

individually tied back to and controlled from the OPL90 FPSO. The Nda field is presently producing from one well under an extended well test before additional development wells are expected to commence production in the second half of 2006 and is expected to average approximately 20 mbbbls/d for the last six months of the year.

Unappraised Discoveries and Exploration

In addition to the Okwori and Nda fields, there have been three further uneconomic oil discoveries by previous operators, of which the most significant well was drilled in 1972 in OPL225 and tested at 6.1 mbbbls/d of oil. Natural gas was also encountered in two of the oil discoveries. Addax Petroleum commenced its exploration on OPL90 and OPL225 in 2004 by drilling one exploration commitment well in each lease. The exploration well drilled by the Corporation in OPL225 found two small accumulations of non-associated gas. The exploration well drilled by the Corporation in OPL90 discovered the Nda field as discussed above.

In late 2005 and during 2006, Addax Petroleum intends to undertake a concerted exploration and appraisal campaign. On OPL90 three exploration and appraisal wells are budgeted in 2006 on the Okporo, Nda West and Nkelu Deep structures, all of which offer tie-back development opportunities to the OPL90 FPSO. On OPL225, the Corporation intends to acquire a 800 km² 3D seismic survey at the end of 2005 which will be processed during 2006 to identify further exploration drilling opportunities.

NSAI reports Addax Petroleum's gross prospective oil resources in OPL90 and OPL225 as of September 30, 2005, to be 7 mmbbls (5 mmbbls risked).

Budgeted Capital Expenditures

Capital expenditures on OPL90 and OPL225 are budgeted to be \$68 million in the fourth quarter of 2005 comprised of \$29 million for facilities and \$39 million for drilling and \$290 million in 2006, as discussed below. These expenditures are expected to increase production from approximately 16 mbbbls/d in 2005 to approximately 33 mbbbls/d in 2006. The budgeted capital expenditures will fund a one-rig drilling program in OPL90 and OPL225 that includes:

- completion of development drilling in the Okwori field;
- development drilling in the Nda field and tie back to the OPL90 FPSO; and
- seismic data acquisition and drilling of three exploration wells.

<u>Field/Category</u>	<u>2006 Budgeted Capital Expenditures</u>			
	<u>Drilling & Seismic</u> (Smillion)	<u>Facilities & Other</u> (Smillion)	<u>Total</u> (Smillion)	<u>Number of Wells</u>
Nda	106	55	161	4
Okwori	32	19	51	2
Gas gathering pipeline	-	16	16	-
Subtotal	138	90	228	6
Exploration and appraisal	59	3	62	3
Total	197	93	290	9

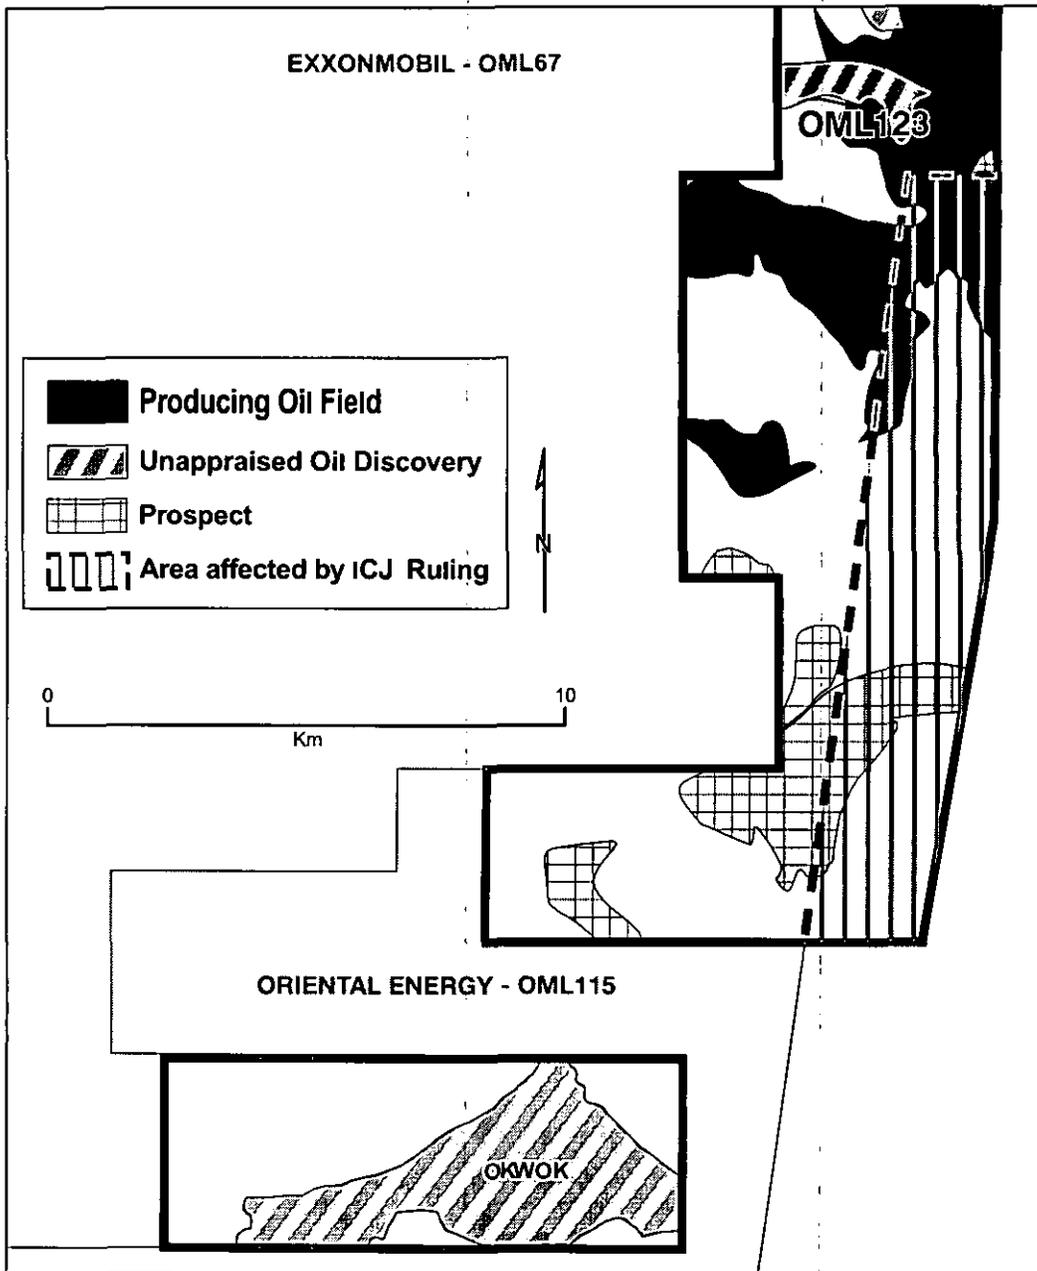

The Corporation estimates that the total cost to construct the proposed gas gathering pipeline will be \$35 million to be spent before the end of 2007. The budgeted capital expenditures for 2006 includes \$16 million and the balance of \$19 million is expected to be spent in 2007, all of which is expected to be recoverable under the OPL90/225 PSC.

Okwok Property

Overview

The Okwok Property is located approximately 45 km off the Nigeria coast in 35 to 50 m water depth due south of the town of Calabar. The Okwok Property is within ExxonMobil's licence area OML67, immediately to the south of OML123.

Okwok Property

In late 2000, the governments of Nigeria and Equatorial Guinea concluded a maritime boundary treaty that removed 62 km² from an Oil Mining Lease held by Oriental Energy that became part of Equatorial Guinea's Block B, the main beneficiary of which was ExxonMobil. Oriental Energy successfully petitioned the Nigerian government for compensation and in October 2001 the Nigerian government approved a compensation area for Oriental Energy in ExxonMobil's OML67 that included the Okwok Property. The farm-in agreement between Oriental Energy and ExxonMobil is yet to be concluded.

In September 2005, Addax Petroleum entered into the Oriental Joint Venture Agreement pursuant to which the Corporation has agreed to acquire a 40 per cent interest in the Okwok Property. The Oriental Joint Venture Agreement will become effective once the farm-in agreement between Oriental Energy and ExxonMobil is signed by the two parties and government approval is received. Pursuant to the Oriental Joint

Venture Agreement, Addax Petroleum will make a cash payment of \$35 million to Oriental Energy and will initially fund all capital and operating costs. During the cost recovery period, the Corporation will be entitled to 80 per cent of production from the Okwok Property until all capital costs have been recovered by the Corporation after which Addax Petroleum and Oriental Energy will be entitled to their pro rata share of production. As broker of the Oriental Joint Venture Agreement, Sovereign Oil & Gas Company II LLC will receive an overriding royalty interest of one per cent of all production from the Okwok Property.

Production and Reserves

There has been no production to date from the Okwok Property. If Addax Petroleum is successful in obtaining its interest in the Okwok Property, the gross contingent oil resources as at September 30, 2005 are reported by NSAI to be 6.7 mmbbls.

Production Facilities

Addax Petroleum believes that there will be significant synergies for the Okwok Property and OML123 as the Okwok Property will be developed using production, storage and offloading facilities on the OML123 FPSO vessel approximately 12 km to the north. Facility sharing in this manner will allow the Corporation to develop the Okwok Property in a cost effective manner while also benefiting unit operating costs at OML123.

Field Description

The Okwok Property was discovered in 1967 by Mobil, with the first well encountering a gross oil bearing interval of approximately 70 ft in two main zones. The second well was drilled in 1968 to appraise a fault block to the east of the discovery well and encountered a gross oil bearing interval of approximately 150 ft. Two further wells have been drilled in the immediate area, the most recent of which was drilled by Oriental Energy and ConocoPhillips in 1993. Both of these wells were drilled on the edge of the main Okwok Property structure and while they only encountered minimal hydrocarbons they are useful in assisting to delineate the structure. None of the wells have been production tested. The Okwok Property has been surveyed by two 3D seismic surveys, the most recent of which was in 2004.

The two main reservoirs are interpreted to be part of the Agbada formation and are of Pliocene age. Reservoir depths vary between 2,750 and 4,000 ftss. Due to the shallow nature of the reservoir, the oil is assumed to have a density of around 20° API. This is supported by a sample taken from an offset well, drilled 10 km to the east of the Okwok Property, which recovered 23° API oil from an interval which correlates with one of the two main zones in the Okwok Property.

Budgeted Capital Expenditures

The development of the Okwok Property is expected to commence in 2006 and the Corporation's capital expenditures are budgeted to be \$72 million in 2006, including the farm-in fee of \$35 million payable by Addax Petroleum to Oriental Energy contingent on the Oriental Joint Venture Agreement becoming effective. The remainder of the budgeted capital expenditures will fund the drilling of three appraisal wells and development planning studies. Subject to appraisal drilling results, the Corporation anticipates the Okwok Property to be developed using a central production processing platform and two satellite wellhead platforms connected by pipelines to the OML123 FPSO. The Corporation's development plan anticipates first oil from the Okwok Property in early 2008.

Oil Sales Arrangements

ABV purchases the Corporation's entitlement of crude oil from OML123, OML124 and OPL90 pursuant to the Crude Oil Supply Agreements. See "Interest of AOG in Material Transactions".

Crude oil produced from OML123 is exported from the Antan Terminal and sold as Antan Blend. The Antan Blend includes oil delivered by the OML114 Parties. The Antan Blend may, in the future, include oil production from the Okwok Property in the event that it is developed by Addax Petroleum.

Crude oil produced from OML124 is transported by pipeline to the Brass River Terminal and commingled with crude oil from several third party oil fields. The resulting blend, known as Brass River Blend, is exported and sold at international prices.

Crude oil produced from OPL90 is exported from the Okwori Terminal and sold as Okwori Blend. The first sale of Okwori Blend took place in June 2005 and to date there have been seven liftings in total. Marketing knowledge of the Okwori Blend is at an early stage. Going forward the Corporation anticipates that the Okwori Blend will sell at a premium relative to the Brent Crude price.

Addax Petroleum Crude Oil Premium/(Discount) to Brent Crude (Volume Weighted)⁽¹⁾

	9 Months Ended September 30, 2005	Year Ended December 31,		
		2004	2003	2002
Sales and Marketing Volumes (mmbbls)				
Antan Blend ⁽²⁾	12.6	13.0	11.8	10.0
Brass River Blend	0.8	1.3	2.2	1.8
Okwori Blend	2.6	-	-	-
Dated Brent Crude Price (\$/bbl)	53.54	38.22	28.84	24.98
Addax Petroleum Average Realized Prices (\$/bbl)				
Antan Blend ⁽²⁾	50.17	36.56	27.49	24.04
Brass River Blend	54.42	39.37	29.10	25.51
Okwori Blend	60.60	-	-	-
Premium/(Discount) to Brent Crude (\$/bbl)⁽¹⁾				
Antan Blend ⁽²⁾	(3.51)	(1.88)	(1.27)	(1.36)
Brass River Blend	0.79	0.49	0.39	0.19
Okwori Blend	0.38	-	-	-

Notes:

- (1) Premium/(Discount) to Brent Crude are reported on a volume weighted basis for both the crude in question and Brent Crude, whereas Dated Brent Crude prices are reported as averages of monthly values for the period. Accordingly, the difference between the reported average realized petroleum prices and Dated Brent Crude prices may not correspond to the Premium/(Discount) to Brent Crude.
- (2) The API gravity of the Antan Blend is dependent on the proportional mix of crudes at any time. Where future individual oil field developments have lower API gravities than the current API gravity of the Antan Blend, then the API gravity of the Antan Blend may be reduced at that time.

Property Boundaries

Under the International Court of Justice ruling of October 2002, the Disputed Area includes a small part of OML123 (8,400 acres, 33.9 km²), including the Bogi Platform. The Joint Border Commission which was set up by the governments of Nigeria and Cameroon to study the implications of the ruling has not yet reached a decision about how the Corporation's operations will be treated. The Disputed Area has been excluded from the acreage and property descriptions in this prospectus. Reserves presented in this prospectus exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.3 mmbbls. See "Properties and New Ventures — Nigeria Country Discussion — International Relations".

In 2003, in accordance with the terms of the OPL90/225 PSC, Addax Petroleum was required to relinquish 50 per cent of the area of OPL90 and OPL225, excluding areas in which petroleum had been discovered in commercial quantities. The Corporation held discussions in 2003 and 2004 with NNPC regarding the acreage to

be relinquished but no formal agreement has been concluded. The area proposed for relinquishment for OPL90 and OPL225 has been excluded from the acreage, property descriptions and reserve and resource estimates in this prospectus except as otherwise stated.

Discussions were also held with NNPC in the same period with regard to the same provisions in the OML123/124 PSC. By certificates issued by NNPC in April 2003, the existing OPL98 and OPL118 were converted into OML123 and OML124 with effect from July 2002. The Corporation has received advice from Nigerian counsel that the formal grant of OML123 and OML124 supercedes these discussions but that further relinquishment will be required on the tenth anniversary of their July 2002 effective date.

Nigeria New Ventures

Overview

Addax Petroleum established a dedicated new ventures team in Nigeria in 2004. This team has made a number of bids and approaches for assets in Nigeria and has recently been successful in organizing and negotiating the Okwok Property transaction and is leading the discussions on the JDZ Block 4 opportunity. The Corporation targets Nigeria new ventures opportunities from three principal sources: (i) new bid rounds, (ii) farm-ins with indigenous Nigerian oil companies and (iii) farm-ins with major international oil and gas companies.

New Bid Rounds

Addax Petroleum participated in the most recent Nigerian bid round that was held in mid 2005 and intends to participate in future bid rounds when they occur. In this most recent bid round, Addax Petroleum finished second in the bidding for two assets and third for another. If the winning bidders do not provide evidence of their financial capability to pay for the signing bonus, Addax Petroleum will likely be invited to take the original position for which it bid but finished second. These assets are OPL135 and OPL280, both of which are onshore blocks close to OML124.

Farm-in to Properties held by Indigenous Nigerian Oil Companies

Indigenous oil companies have gained rights to a number of blocks under the Nigerian government's Marginal Field Development Program, with the 2003 bid round providing rights to a number of new indigenous oil companies. Often such companies seek partners to provide capital and technology needed to develop the properties. Addax Petroleum's Nigeria new ventures team has discussed and continues to discuss a number of these farm-in opportunities with such indigenous oil companies. It is likely that additional blocks will be made available to indigenous oil companies through relinquishment by existing operators and this could provide additional opportunities for the Corporation in Nigeria.

Farm-in or Acquire Properties held by Major International Oil and Gas Companies

The major international oil and gas companies that operate in Nigeria such as Shell, ExxonMobil, Chevron, Total and Agip, through joint ventures with NNPC, hold rights to significant acreage in the country, much of which is unexplored or not fully developed. Opportunities to farm-in or acquire properties in onshore or in shallow water regions are becoming increasingly available as major international oil and gas companies shift their focus to deep-water areas. Addax Petroleum's Nigeria new ventures team has had discussions with most of these major international oil and gas companies and has expressed an interest in taking over their acreage if acceptable terms can be negotiated.

Joint Development Zone

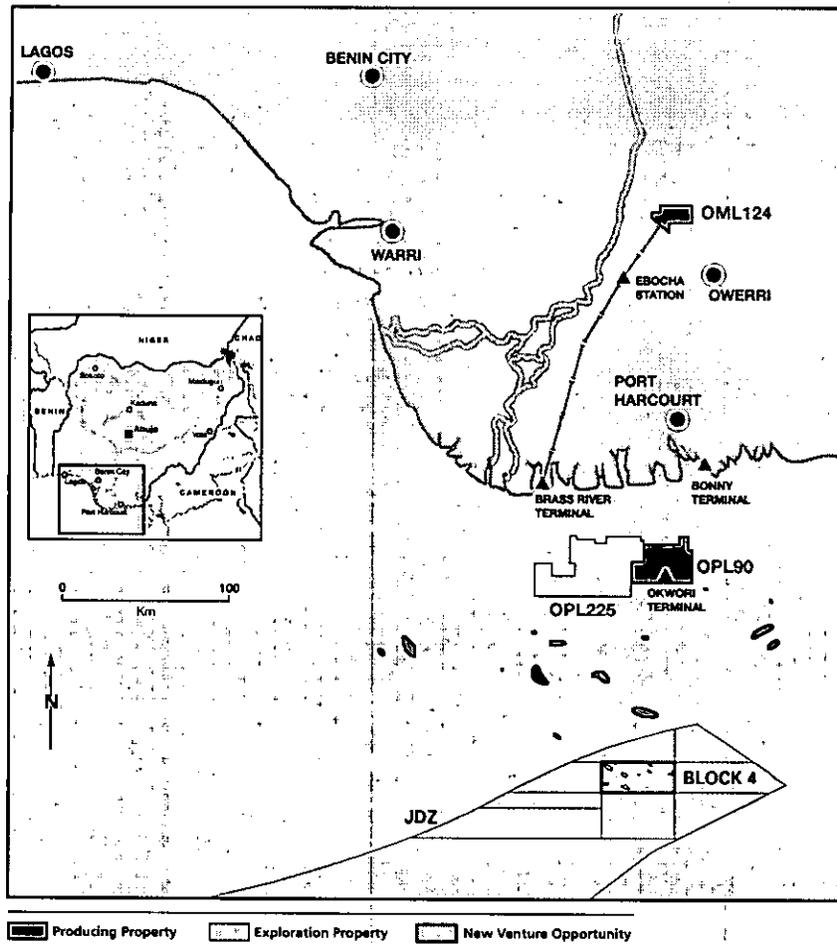

Overview

In 2001, Nigeria and the Democratic Republic of Sao Tome and Principe signed a formal treaty for the joint development of petroleum and other resources in the overlapping area of their respective maritime boundary claims. The treaty established the Joint Development Zone and an administrative body, the Joint Development Authority, to oversee the implementation of the treaty and underlying development plan.

The JDZ covers an area of 34,548 km² with water depths ranging from approximately 1,500 m in the northern part of the JDZ to over 3,500 m at its south western sector.

The first licensing round for the JDZ was announced in April 2003 from which the first Production Sharing Contract was signed in February 2005 for Block 1. The successful consortium to develop Block 1, which paid a signature bonus of \$123 million, included Chevron (51 per cent and operator), ExxonMobil (40 per cent) and Dangote-Energy Equity Resources (nine per cent). A second licensing round for the JDZ was announced in November 2004 which made an additional 5 blocks available to potential investors. The results of the second licensing round were announced in May 2005, with the successful bidders including such companies as Anadarko Petroleum (awarded 51 per cent of Block 3), Noble Energy Inc. and ERHC Energy (jointly awarded 60 per cent of Block 4) and Devon Energy and Pioneer Natural Resources (jointly awarded 65 per cent of Block 2). In addition to the Block 4 Property, the Corporation is in preliminary discussions with some of the successful bidders on other blocks with a view to farming-in to one or more of these blocks!

Joint Development Zone

Note:

(1) This map does not reflect the Corporation's relinquishment proposals for OPL90 and OPL225. See "Properties and New Ventures — Nigeria Properties — Property Boundaries".

Geological Description

The JDZ lies in the Gulf of Guinea which is one of the most prolific hydrocarbon regions in the world. Intensive exploration efforts over the last 35 years in and around the Niger Delta, in particular, have led to a

succession of large discoveries, notably the Bonga, Agbami/Ekoli and Akpo discoveries in Nigeria and Zafiro and Alba in Equatorial Guinea.

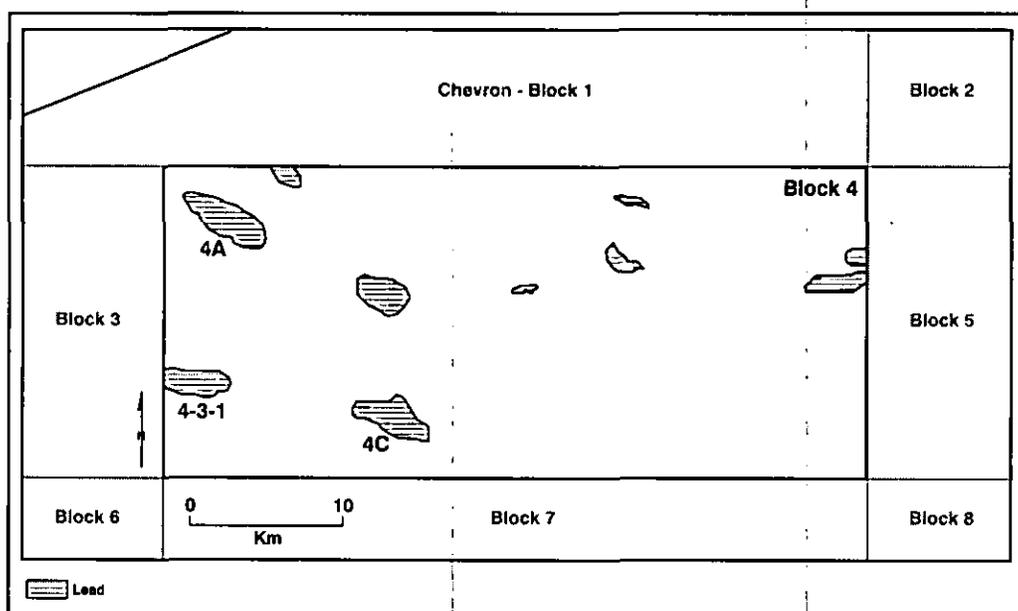

Modern seismic data and improved models of sand distribution indicate that in places prospective acreage can extend up to 300 km from the coastline of Nigeria. Extensive regional 2D and 3D seismic data shot by a number of seismic contractors provide a high quality regional dataset that has provided insight into the region's geological character.

Block 4 Property

Overview

The Block 4 Property is located in the northern end of the JDZ, approximately 170 km south of the Nigerian coastline and approximately 300 km north of the city of Sao Tomé. Block 4 covers an area of 211,700 acres (857 km²) in water depths ranging from approximately 1,800 m to 2,200 m.

Block 4 Property

JDZ Agreements

In June 2005, the Joint Development Authority announced that Block 4 would be awarded to ERHC Energy/Noble Energy JDZ (60 per cent), Conoil p.l.c. (20 per cent), Hercules Oil Ltd./Centurion Energy (10 per cent), Godsonic Oil Co. (5 per cent) and Overt Ventures Ltd. (5 per cent). The winning bid provided for a signing bonus of \$90 million and a minimum work program of three exploration wells or a minimum expenditure of \$53 million. In late October 2005, Noble Energy announced that they were withdrawing from the ERHC Energy/Noble Energy JDZ consortium. ERHC Energy entered into a memorandum of understanding with Addax Petroleum in October 2005 pursuant to which Addax Petroleum replaced Noble Energy JDZ as operator for the consortium. In November 2005, Addax Petroleum entered into a participation agreement with ERHC Energy under which it anticipates that it may acquire up to a 33.3 per cent interest in, and become operator of, the Block 4 Property in return for a payment of up to \$18 million and a full carry in respect of ERHC Energy's retained interest. Addax Petroleum would also be required to pay a signature bonus of up to \$23.4 million to the Joint Development Authority. On January 30, 2006, the Joint Development Authority conditionally approved the replacement of the Noble-ERHC consortium with the ERHC-Addax consortium and the designation of Addax Petroleum as operator for the Block 4 Property. A joint operating agreement and

Production Sharing Contract would also have to be negotiated with the other participating parties and, in the case of the Production Sharing Contract, the Joint Development Authority before Block 4 is awarded.

Cameroon

Overview

Cameroon covers a total area of 475,440 km² and is approximately half the size of its western neighbour Nigeria.

Government

Cameroon was formed from a French administered UN trusteeship. In 1961, part of British Cameroon merged with the recently formed independent Cameroon. Cameroon is a republic with a multiparty presidential regime. Opposition parties were legalized in 1990. The current President, Paul Biya, has been in office since 1982 and was last elected with 71 per cent of the vote during the elections held in October 2004. The President is elected by popular vote for a seven-year term. The next elections are due in October 2011. Cameroon has a National Assembly with 180 seats, whose members are elected by direct popular vote to serve five-year terms, though the President can either lengthen or shorten the term of the legislature. The most recent National Assembly elections were held in June 2002.

International Relations

Cameroon is a member of the United Nations, Organization of African Unity, the Commonwealth of Nations and the Monetary and Economic Community of Central Africa. In 2002, the International Court of Justice ruled in favour of Cameroon on the long disputed Cameroon — Nigeria land and maritime boundary. See “Properties and New Ventures — Nigeria Country Discussion — International Relations”.

Petroleum Industry

Petroleum exploration activity in Cameroon began in the 1950s and concentrated on the Douala Basin in the south of the country where several oil and gas discoveries were made. In the 1970s, activity switched to the Rio del Rey Basin in the west of the country which now accounts for most of Cameroon's current oil production. The Rio del Rey Basin is the eastern extension of the Niger Delta and all of its oil is produced from the Agbada formation.

Oil production in Cameroon began in 1977 and increased to approximately 170 mbbbls/d in 1986 before slowly declining to approximately 62 mbbbls/d in 2004. In comparison with its neighbours, oil exploration in Cameroon has been modest and is limited by its lack of access to deep-water offshore acreage given its geographical location. However, there has been renewed activity in recent years with the development of new fields. The major oil producers in Cameroon are Shell and Total.

Ngosso Property

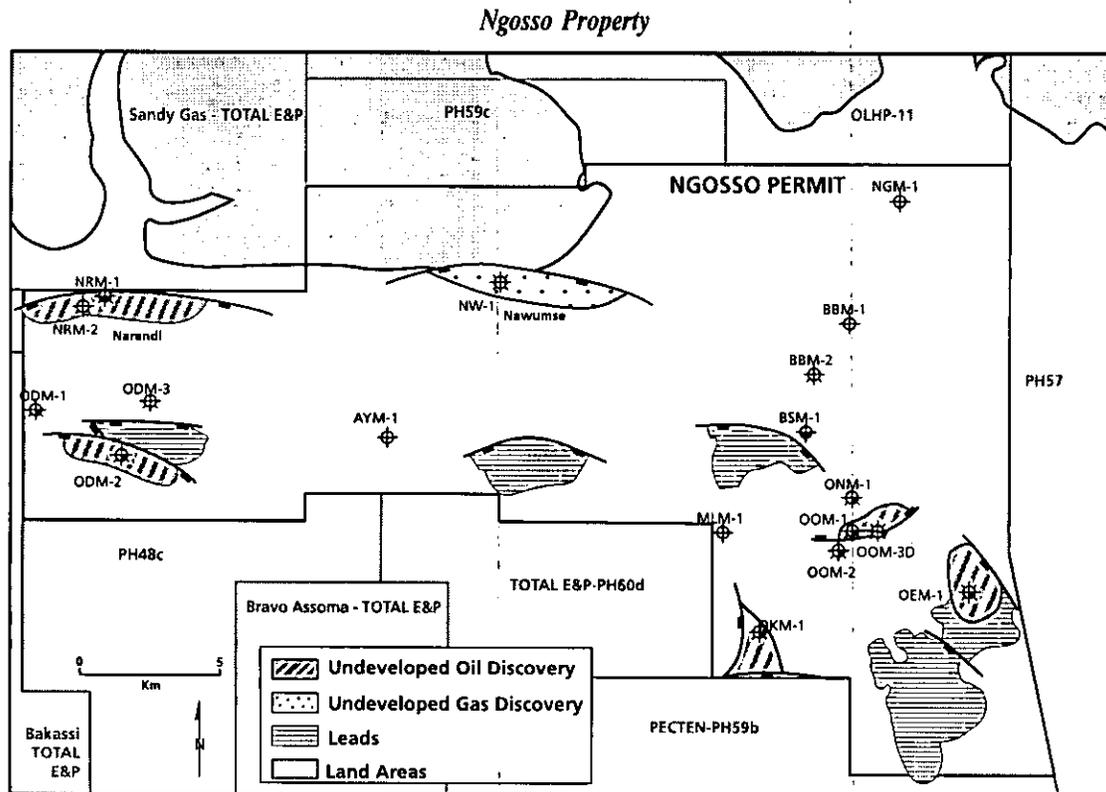

In December 2002, Addax Petroleum, together with Tullow Oil, signed the Ngosso Concession with the Government of Cameroon for the Ngosso Property. Addax Petroleum is the operator of the Ngosso Property, with a 60 per cent working interest. The Ngosso Concession has an initial term of three years with a minimum work commitment of 200 km² of 3D seismic and the drilling of two exploration wells. The Ngosso Concession can be renewed twice for an additional two years per renewal.

The Ngosso Concession's initial three year exploration period officially started in April 2004 but the Cameroonian government has indicated that it is prepared to extend the initial permit by one year in compensation for the delays incurred and official confirmation is awaited. The Cameroonian government has confirmed that the cost of work incurred prior to the Ngosso Concession's effective date will be recognized for tax and other purposes under the Cameroon Concession.

To date, Addax Petroleum has not been able to access part of the Ngosso Property, including the western prospective zone, due to the Nigeria — Cameroon border dispute. See “Properties and New Ventures — Nigeria

Country Discussion — International Relations”. The Ngosso Property itself is not part of the disputed territory, but operations require access to the southern part of the Bakassi Peninsula. The Joint Border Commission between Cameroon and Nigeria had set April 2004 as the period for the transfer of power to a new Cameroonian civil administration for the Bakassi Peninsula, and this should have allowed the Corporation to commence operations in the western part of the Ngosso Property. As the power transfer process is not complete, the Corporation intends to limit its seismic acquisition activities to the offshore with a minor impact on the coverage. The Corporation plans to acquire two 3D seismic surveys in the western and in the south eastern sectors of the Ngosso Property between December 2005 and April 2006.

The Ngosso Property is located in the hydrocarbon prone Rio del Rey Basin, western offshore Cameroon and covers 117,100 gross acres (474 km²). To the east, north and west, the Ngosso Property has a common border with two concessions operated by Total and with four open acreage areas. To the south, the Ngosso Property is bordered by two concessions operated by Total and by Shell and by open acreage.

The Ngosso Property lies adjacent to the shore in water depths of up to eight m. It has similar operational and subsurface geological conditions to the Corporation’s OML123, located approximately 20 km to the west. The Ngosso Property contains several hydrocarbon discoveries but has not seen any exploration activity for more than 20 years. The Corporation intends to evaluate discovered and potential oil and gas accumulations and, if commercial, develop them using proven technology including 3D seismic and horizontal drilling.

The Corporation has carried out a detailed prospectivity evaluation of the acreage based on existing 2D seismic and well data. Two petroleum plays have been penetrated by wells indicating the presence of good quality sand reservoirs. Both plays are characterized by gas and oil discoveries (oil API gravities ranging between 20° to 24° in the shallow play and 40° to 45° in the deep play) and contain a number of remaining leads.

NSAI reports Addax Petroleum’s gross prospective oil resources in the Ngosso Property, as at September 30, 2005, to be 28 mmbbls (19 mmbbls risked).

The Corporation's capital expenditures for Ngosso are budgeted to be \$2 million for the fourth quarter of 2005 for seismic surveys of 170 km² and \$16 million in 2006 which includes \$10 million for seismic surveys of 120 km² and \$6 million for drilling two exploration wells.

Gabon

Overview

Gabon is one of sub-Saharan Africa's wealthier countries due to a relatively small population and substantial oil and mineral reserves.

Government

Gabon is a republic which gained independence from France in 1960. A multiparty political system and a new constitution were introduced in the early 1990s, though President Omar Bongo has been in power since 1967. The President is elected by popular vote for a seven-year term. The Parliament is comprised of the Senate and the National Assembly. The next elections for the National Assembly are scheduled for 2006. The most recent presidential election was held in November 2005 and Senate elections were held in early 2004.

International Relations

Gabon is a member of the United Nations, the Organization of African Unity and many other international organizations. As a proponent of regional economic integration, Gabon and five other countries agreed to form the Monetary and Economic Community of Central Africa to converge their macroeconomic policies, stabilize their common currency, create a common market and harmonize their sectoral policies.

Petroleum Industry

Oil was first discovered in Gabon in the 1950s and since then there has been significant development and exploration activity both onshore and offshore. Gabon's two biggest fields are located onshore. The Gamba field was discovered in 1963 with estimated reserves of 250 mmbbls and the Rabi field was discovered in 1985 with estimated reserves of 1,000 mmbbls.

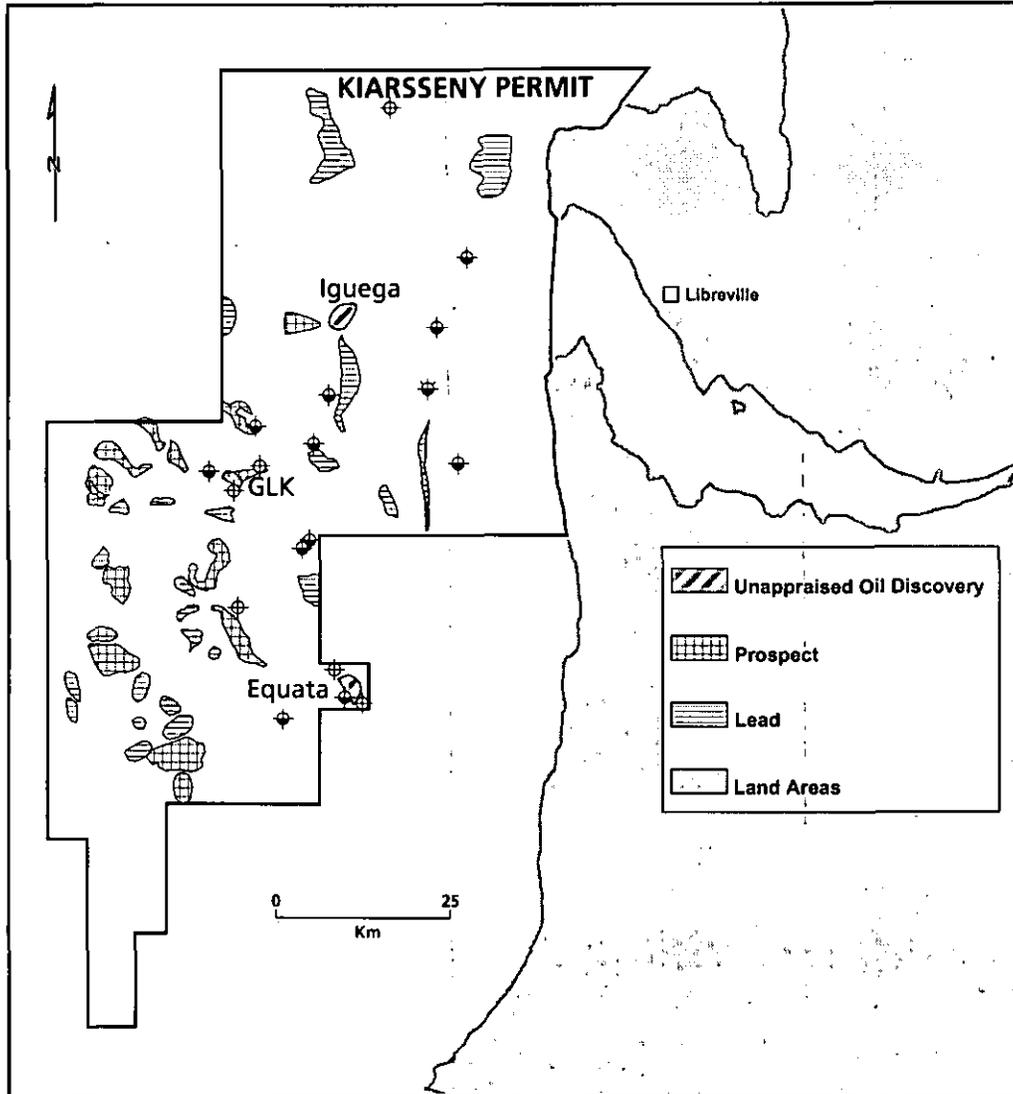

Gabonese oil production first peaked in 1975 at approximately 220 mbbls/d and then reached a new high of approximately 360 mbbls/d in 1996 after a period of decline. Current oil production is approximately 235 mbbls/d, the majority of which is produced by Shell and Total.

Kiarsseny Property

On January 27, 2004, Addax Petroleum signed the Kiarsseny Agreement with Tullow Oil for the acquisition of 42.5 per cent of the Kiarsseny Production Sharing Contract for the Kiarsseny Property. Tullow Oil originally entered into the Kiarsseny Production Sharing Contract with the Government of Gabon in March 2003. In March 2004, Tullow announced that it had reduced its interest to 47.5 per cent through the farm-out of 10 per cent to Sonangol E.P.

The Kiarsseny Property covers an area of 1,345,000 gross acres (5,443 km²) and is located adjacent to shore in the Port Gentil Basin in water depths up to 800 m. It contains three oil discoveries and additional exploration potential. There are 2,643 km² of 3D seismic data, 18,750 km of 2D seismic data and 25 wells in the Kiarsseny Property.

Kiarsseny Property

The Port Gentil Basin contains a prolific hydrocarbon system. The majority of the producing reservoirs are sandstones with good porosities and permeabilities. Oil gravities from major oil fields vary from 20° to 47° API. NSAI reports Addax Petroleum's gross prospective oil resources in the Kiarsseny Property as at September 30, 2005, to be 11.0 mmbbls (10.0 mmbbls risked).

The Kiarsseny Production Sharing Contract is currently in its first exploration phase of four years, ending March 2007, and has a two well commitment. The first commitment well was drilled by Tullow Oil and Addax Petroleum in February 2004 to appraise the Topaze South structure and subsequently a side-track was drilled into the central Topaze compartment. The well failed to prove up sufficient reservoir development in both instances and was therefore abandoned.

The second commitment well was drilled by Tullow Oil in late 2005. The well was unsuccessful as the results indicated likely compartmentalization of the structure which would make the development sub-commercial. The well has been plugged and abandoned. Going forward, any costs incurred in relation to a possible third well shall be borne by the parties in proportion to their participating interests.

An inventory of the remaining exploration potential of the block is currently being prepared following which an exploration target may be selected by the partners for a discretionary well to be drilled in 2006. The Corporation's capital expenditures for Kiarsseny are budgeted to be \$4 million for the fourth quarter of 2005 and \$6 million in 2006 for drilling one exploration well.

Other West Africa New Ventures

Along with the Corporation's properties in Cameroon and Gabon, Addax Pétroleum is looking to expand further its activities in the West African Gulf of Guinea region. Additional countries in this target zone include Angola, Equatorial Guinea, Congo and Côte d'Ivoire. Addax Pétroleum has made and is continuing to make efforts to gain a position in these countries for the following principal reasons:

- the Gulf of Guinea is a prolific basin with significant opportunities ranging from the onshore, through shallow offshore to deeper water;
- many geological plays are similar to those that the Corporation successfully operates and produces in Nigeria using horizontal drilling and other techniques that can be employed in these other regions; and
- AOG has been involved in trading activities throughout the region and has developed good contacts and a good reputation for its activities.

Addax Pétroleum has made efforts to enter into properties in this region in the past primarily through direct negotiations with international companies who hold properties and, to a lesser extent, through direct negotiations with governments. While there are no transactions currently at an advanced stage of negotiations in the region, the Corporation intends to increase its staffing in order to redouble its effort in this regard.

North Africa New Ventures

Addax Pétroleum is pursuing opportunities in North Africa, including the countries of Algeria, Libya and Egypt, as a core investment area for the following reasons:

- the presence of proven prolific hydrocarbon basins ranging from Tertiary/Mesozoic (Gulf of Suez, Western Desert, Sirte) to Palaeozoic (Ghadames, Murzuk and a number of basins in Algeria);
- the region's unique strategic position in respect to oil and gas export to major North American and European markets; and
- the relative stability of the political systems in these countries.

Consequently, Addax Pétroleum has made, and continues to make, considerable efforts to gain a position in these North African countries. Addax Pétroleum has passed the stringent pre-qualification processes and is recognized as a potential operator in Libya and Algeria. The Corporation is currently evaluating several farm-in opportunities and has participated in various bid rounds in several countries. Addax Pétroleum has not yet been successful in any of the bid rounds in which it has participated.

Middle East New Ventures

Kurdistan Region of Iraq

In July 2005, Addax Pétroleum entered into a farm-in agreement with Genel Enerji A.S. for a potential interest in a Production Sharing Contract to govern the Taq Taq field in the Kurdistan Region of Iraq. The Taq Taq field is located 60 kilometres northeast of the giant Kirkuk oil field and the adjacent city of Kirkuk and 80 kilometres northwest of the city of Sulaimaniyah. The field area of Taq Taq is approximately 680 km².

Under the farm-in agreement with Genel Enerji A.S., Addax Pétroleum is committed to expenditures in respect of the Taq Taq field initially of \$30 million and, conditionally, another \$50 million should it acquire any interest in any Production Sharing Contract in respect of the Taq Taq field.

Central and Southern Iraq

Apart from its activities in the Kurdistan Region, Addax Petroleum is currently positioning itself to obtain oil rights in the central and southern parts of Iraq, once the legal framework has been established and the security situation allows the Corporation to work efficiently and safely in the area. To this end, Addax Petroleum intends to enter into a collaboration agreement with the Ministry of Oil of the central Iraqi government to conduct field studies and train Iraqi oil and gas professionals.

Addax Petroleum believes that the future of the Iraqi oil industry will benefit from building-up a strong local, privately owned, industry and is therefore providing financial support to Nawras Oil Services Ltd., an Iraqi registered company that employs a number of former Iraqi Ministry of Oil executives. Nawras Oil Services Ltd. maintains relationships with the Ministry of Oil and is currently representing Addax Petroleum in Baghdad.

Iran

Addax Petroleum has entered into a study agreement with the National Iranian Oil Company. Under this agreement, Addax Petroleum, together with representatives of the National Iranian Oil Company, will study two undeveloped fields located offshore Iran. The study is expected to be completed within the next 12 months. Neither the activities under the study agreement nor any future activities based in Iran will be financed with the proceeds of this offering. All such Iranian activities will be financed with funds from other sources.

FISCAL TERMS

Nigeria

Addax Petroleum's interests in OML123 and OML124 and OPL90 and OPL225 are governed by Production Sharing Contracts with NNPC. The Corporation's proposed interest in the Okwok Property is governed by a Production Sharing Contract and will be subject to the terms of the Oriental Joint Venture Agreement and, once implemented, the Nigerian Marginal Field Terms. See "Properties and New Ventures — Nigeria Properties — Okwok Property".

Production Sharing Contracts

In May 1998, the Corporation and NNPC entered into a Production Sharing Contract covering OML123 and OML124 and a Production Sharing Contract covering OPL90 and OPL225. These contracts are supplemented by the provisions of the *Petroleum Act*, and the regulations thereunder, and the *PPT Act*. The fiscal terms of the Production Sharing Contracts were modified by the terms of the letter entitled "Fiscal Regimes for Onshore and Shallow Offshore PSC", issued on November 21, 2001 by the Office of the Presidential Adviser on Petroleum and Energy with retroactive effect to January 1, 2000. Both of the Corporation's Nigerian Production Sharing Contracts have a term of 20 years expiring in May 2018.

Under each of its Nigerian Production Sharing Contracts, Addax Petroleum bears the development and exploration risk for the properties concerned and funds all of the necessary capital expenditures. In return, the Corporation is entitled to sell sufficient oil to recover its capital expenditures and operating costs and to have a designated share of oil production remaining after the payment of royalties and taxes. Each of the Corporation's Nigerian Production Sharing Contracts impose minimum work obligations and Addax Petroleum has fulfilled the minimum work obligations. Taxation of each Production Sharing Contract is calculated independently of Addax Petroleum's other Production Sharing Contract and as a result, capital expenditure recovery is available to the extent of the profitability of the particular Production Sharing Contract on which the capital expenditures were incurred.

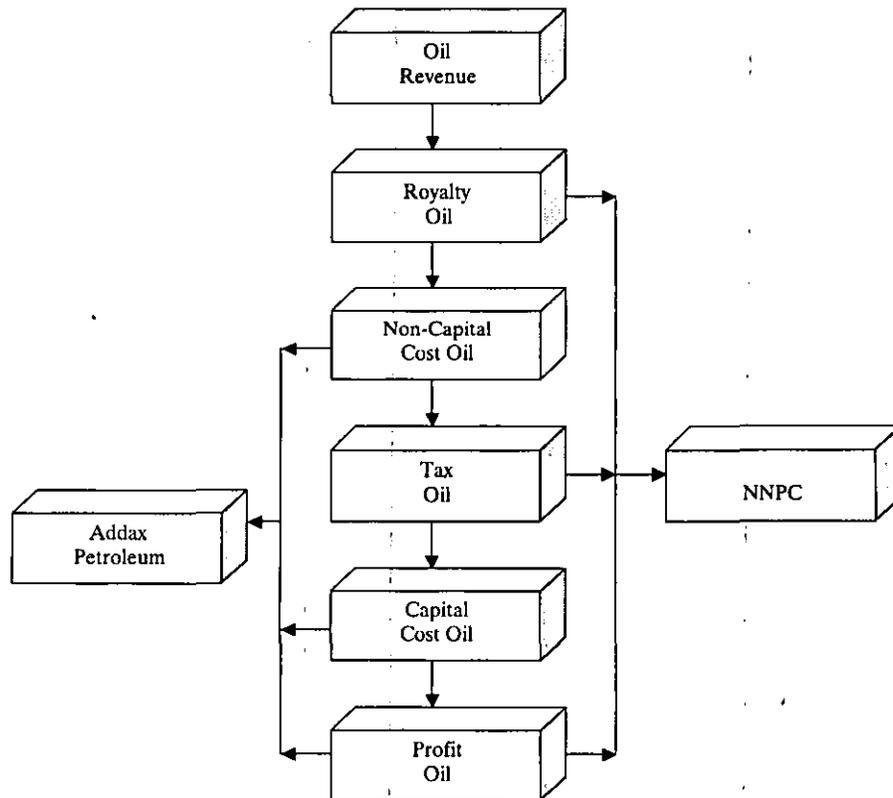

Oil produced under the Nigerian Production Sharing Contracts is notionally allocated to one of four categories in the following order.

1. Royalty Oil
2. Cost Oil

3. Tax Oil
4. Profit Oil

Royalty Oil and Tax Oil are allocated to NNPC while Cost Oil is allocated to Addax Petroleum. Profit Oil is shared between NNPC and Addax Petroleum. The Production Sharing Contracts provide for each party to lift and sell its oil entitlement, though NNPC can request that Addax Petroleum lift and sell on its behalf.

Allocation of Oil Production under the PSCs

The proportion of production that is designated for each of Royalty Oil, Cost Oil, Tax Oil and Profit Oil in a particular time period is influenced by oil prices, production levels, operating costs, capital expenditures and costs and allowances carried forward from previous periods in accordance with the terms of the Production Sharing Contracts. The fiscal terms have the effect of reducing the percentage of revenues paid as Tax Oil during periods of lower oil prices and increasing such percentage during periods of higher oil prices. For purposes of illustration, the tables below show the proportions of production designated as Royalty Oil, Cost Oil, Tax Oil and Profit Oil under the Production Sharing Contracts for OML123 and OML124 and OPL90 and OPL225 for the nine months ended September 30, 2005. Please refer to Note 9 to the Consolidated Financial Statements of Addax Petroleum N.V. for additional information.

**OML123/124 PSC — Allocation of Oil Production
for the 9 months ended September 30, 2005**

<u>Allocation</u>	<u>Total</u> (\$/bbl)	<u>Government Share⁽¹⁾</u> (\$/bbl)	<u>Addax Petroleum</u> (\$/bbl)	<u>Allocation Share</u> (%)
Average Realizable Price ⁽¹⁾	50.80	-	-	100
Royalty Oil and other levies ⁽²⁾	4.94	4.94	-	10
Cost Oil	14.33	-	14.33	28
Tax Oil	18.38	18.38	-	36
Profit Oil	13.15	4.23	8.92	26

**OPL90/225 PSC — Allocation of Oil Production
for the 9 months ended September 30, 2005⁽³⁾**

<u>Allocation</u>	<u>Total</u> (\$/bbl)	<u>Government Share⁽¹⁾</u> (\$/bbl)	<u>Addax Petroleum</u> (\$/bbl)	<u>Allocation Share</u> (%)
Average Realizable Price ⁽¹⁾	60.60	-	-	100
Royalty Oil and other levies ⁽²⁾	4.80	4.80	-	8
Cost Oil	53.31	-	53.31	88
Tax Oil	2.49	2.49	-	4
Profit Oil	-	-	-	-

Notes:

- (1) The tax accounts and the financial accounts use different revenue recognition methods.
- (2) Other levies include the NDDC levy and education tax.
- (3) Production from OPL90 began in March 2005. There was no production from OPL225 in 2005.

The calculation of the different categories of oil is discussed below.

Royalty Oil is calculated on a field by field basis and varies with the field's production rate and the depth of water. For each level of the field's production a specific royalty rate is applied on an incremental sliding scale basis.

<u>Water Depth</u>	<u>Royalty Oil Rates Field Range of Production (bbls/d)</u>					
	<u><2,000</u> (%)	<u>2,000-5,000</u> (%)	<u>5,000-10,000</u> (%)	<u>10,000-15,000</u> (%)	<u>15,000-25,000</u> (%)	<u>>25,000</u> (%)
Onshore	5.0	7.5	15.0	20.0	20.0	20.0
<100	2.5	2.5	7.5	12.5	18.5	18.5
100-200	1.5	1.5	3.0	5.0	10.0	16.7

Royalty Oil is accounted for on a monthly basis.

Other levies include the payments to the NDDC levy, calculated as three per cent of budgeted operating costs and capital expenditures, and education tax, calculated as two per cent of assessable profit for Tax Oil (see below). These levies are paid in cash to the relevant Nigerian authority.

Cost Oil is allocated to Addax Petroleum in such an amount as to enable the recovery of all recoverable costs. The accounting procedure attached to the Production Sharing Contracts divides costs into two categories: non-capital costs and capital costs. Non-capital costs are expensed and include operating costs, a head office overhead allowance, interest on loans approved by NNPC, gas flaring charges, license fees, customs duties, intangible drilling costs, geological and geophysical surveys, exploration and appraisal drilling and funded abandonment provisions. Historically, under the Production Sharing Contracts, Addax Petroleum has recovered approximately 80 per cent of all drilling and seismic expenditures in the fiscal period in which they are incurred. Capital costs are depreciated over a five year period at 20 per cent straight-line starting in the year of first production, except for the fifth year which is depreciated at 19 per cent. All costs prior to the first lifting on a Production Sharing Contract are capitalized.

Maximum Cost Oil available is calculated as total production less Royalty Oil. Cost Oil is calculated on a monthly basis and any excess costs are carried forward to subsequent months or years. As at September 30, 2005, the Cost Oil balances, including capital depreciation carried forward to future years, were as set out in the following table.

	Cost Oil Balances					
	2005	2006	2007	2008	2009	2010
	(\$million)					
OML123/124 PSC	40.5	37.8	29.0	16.4	5.2	-
OPL90/225 PSC ⁽¹⁾	67.4	67.4	67.4	67.4	64.0	-

Note:

(1) Includes \$10.2 million of expenditure by previous contractor.

Tax Oil is calculated after deducting Royalty Oil and Cost Oil. The calculation of Tax Oil is specified by the *PPT Act* and the applicable rate for the Corporation's Nigerian Production Sharing Contracts is 60 per cent. In the event that after the deduction of capital allowances and capital investment allowances the tax to be paid is zero, a 15 per cent tax charge is made on the taxable amount before the deduction of certain capital allowances and capital investment allowances. This currently applies to the OPL90/225 PSC. The accounting period for Tax Oil is a calendar year. Taxable profit is equal to revenue less royalties, non-capital costs, capital depreciation and an investment tax allowance. The investment tax allowance is calculated as an uplift of 40 per cent of offshore capital expenditures and 25 per cent of onshore capital expenditures.

Due to the capital expenditure on the OPL90/225 PSC, there are unutilized capital investment allowances of \$120.6 million as of September 30, 2005. There are no unutilized capital investment allowances for the OML123/124 PSC.

The Corporation's Nigerian Production Sharing Contracts also contain a tax inversion penalty which is designed to encourage oil companies to contain operating costs. The tax inversion penalty for production rates less than 50 mbbbls/d is calculated at 25 per cent of operating costs in excess of \$7.50/bbl. For production rates more than 50 mbbbls/d, the tax inversion penalty is calculated at 25 per cent of operating costs above \$5.00/bbl. Addax Petroleum's average production from the OML123/124 PSC exceeded 50 mbbbls/d for the year 2005. Addax Petroleum estimates that its maximum exposure to the tax inversion penalty is \$6.5 million for 2005.

Profit Oil is the oil remaining after deducting Royalty Oil, Cost Oil and Tax Oil. Profit Oil is shared between NNPC and Addax Petroleum on a sliding scale based on monthly production from the respective Nigerian Production Sharing Contracts. The varying allocations between NNPC and Addax Petroleum are applied on an incremental sliding scale basis.

Profit Oil Sliding Scale for the OML123/124 PSC

Monthly Average Production from OML123 and OML124 (mbbls/d)	NNPC Share	Addax Petroleum Share
	(%)	(%)
<40	30	70
≥40 and <75	45	55
≥75 and <100	55	45
≥100	60	40

Profit Oil Sliding Scale for the OPL90/225 PSC

Monthly Average Production from OPL90 and OPL225 (mbbls/d)	NNPC Share	Addax Petroleum Share
	(%)	(%)
<40	20	80
≥40 and <75	35	65
≥75 and <100	45	55
≥100	50	50

The following example illustrates how oil is allocated between the four categories under the Corporation's Nigerian Production Sharing Contracts. The example compares two scenarios each with annual revenues of \$200, annual operating costs of \$20 and no loss or allowances carried forward. For the purposes of the illustration, Royalty Oil is assumed to be levied at five per cent, NDDC levy at three per cent, education tax at two per cent, Tax Oil at 60 per cent and NNPC's share of Profit Oil at 30 per cent. The impact of capital expenditures of \$100 in Year 1 has an after tax and Profit Oil cash flow effect of only \$70 reduction in Year 1 and an increase of almost \$15 in the following four years such that the aggregate incremental cash flow reduction over the five year period is approximately \$10, assuming no revenue benefit arising from the investment. The following table has been included as an example only and actual results may vary materially.

	Without Capital Expenditure		With Capital Expenditure	
	Year 1	Years 2 to 5	Year 1	Years 2 to 5
Tax Oil Computation:				
Total PSC Revenue	200.0	200.0	200.0	200.0
<i>less</i> non-capital costs	20.0	20.0	20.0	20.0
<i>less</i> Royalty Oil	10.0	10.0	10.0	10.0
<i>less</i> NDDC levy	0.6	0.6	3.6	0.6
<i>yields</i> Assessable Profit	169.4	169.4	166.4	169.4
<i>less</i> education tax	3.4	3.4	3.3	3.4
<i>yields</i> Adjusted Assessable Profit / (Loss)	166.0	166.0	163.1	166.0
<i>less</i> capital allowances	0.0	0.0	20.0	20.0
<i>less</i> investment tax allowance	0.0	0.0	40.0	0.0
<i>times</i> Tax Oil rate	60%	60%	60%	60%
<i>yields</i> Tax Oil	99.6	99.6	61.8	87.6
Contractor Cash Flow Computation:

<i>less</i> operating expenditure	20.0	20.0	20.0	20.0
<i>less</i> NDDC	0.6	0.6	3.6	0.6
<i>less</i> education tax	3.4	3.4	3.3	3.4
<i>less</i> Tax Oil	99.6	99.6	61.8	87.6
<i>less</i> NNPC's share of Profit Oil	19.9	19.9	24.4	17.5
<i>yields</i> Post Tax Cash Flow	46.5	46.5	76.9	60.9
<i>less</i> capital expenditure	0.0	0.0	100.0	0.0
<i>yields</i> Contractor Cash Flow	46.5	46.5	(23.1)	60.9
Oil Allocation of Total PSC Revenue:				
Cost Oil	20.0	20.0	40.0	40.0
Profit Oil — Contractor Share	46.5	46.5	56.9	40.9
Contractor Total	66.5	66.5	96.9	80.9
Royalty Oil	10.0	10.0	10.0	10.0
Tax Oil	99.6	99.6	61.8	87.6
Profit Oil — NNPC's share	19.9	19.9	24.4	17.5
NDDC levy and education tax	4.0	4.0	6.9	4.0
Government Total	133.5	133.5	103.1	119.1

Between the commencement of its activities under the Nigerian Production Sharing Contracts until the end of 2003, Addax Petroleum lifted and sold all of NNPC's oil on their behalf but since the beginning of 2004, NNPC has lifted its entitlement. Under the Corporation's Nigerian Production Sharing Contracts, oil is valued

based upon the appropriate "Realizable Price". The "Realizable Price" is equivalent to the Official Selling Price which is a price issued on a monthly basis by NNPC and is calculated by NNPC to equate to the prevailing international price in arms length transactions, taking into account the properties of each crude blend. The Okwori Blend is being jointly marketed by Addax Petroleum and NNPC for the first six months or 10 liftings, whichever is longer, commencing June 2005. After this joint marketing period, NNPC will calculate and issue an Official Selling Price on a monthly basis for the Okwori Blend "Realizable Price".

Nigerian Marginal Fields

The Okwok Property is subject to the provisions of the *Petroleum Act* and the regulations thereunder, and the *PPT Act*. The fiscal terms of Nigerian Marginal Fields are the subject of legislative proposals to encourage development. The Nigerian Marginal Fields comprise a number of ring-fenced fields located on concessions already awarded to joint ventures between international oil companies and NNPC and which have reserves booked to the Nigerian Department of Petroleum Resources and have remained un-produced for a period of over 10 years. The Nigerian Marginal Fields are assigned to indigenous Nigerian oil companies who conclude farm-in agreements with the joint ventures and can, in turn, farm-out to other operators.

The Nigerian Marginal Fields are subject to Royalty Oil and Tax Oil payable to government agencies.

The calculation of Royalty Oil and Tax Oil is discussed below.

Royalty Oil is calculated on a field by field basis and varies with the field's production rate and the depth of water. For each level of the field's production a specific royalty rate is applied on an incremental sliding scale basis.

Anticipated Royalty Oil Rates for the Okwok Property Field Range of Production (mbbls/d)					
<2	2-5	5-10	10-15	15-25	25
(%)	(%)	(%)	(%)	(%)	(%)
2.5	2.5	7.5	12.5	18.5	18.5

Royalty Oil is accounted for on a monthly basis and paid within 60 days of the end of the chargeable period.

Other levies include the payments to the NDDC levy, calculated as three per cent of budgeted operating costs and capital expenditures, and education tax, calculated as two per cent of assessable profit for Tax Oil (see below).

Tax Oil is calculated after deducting Royalty Oil and non-capital costs and capital costs. Non-capital costs are expensed and include operating costs, a head office overhead allowance, interest on loans approved by NNPC, gas flaring charges, license fees, customs duties, intangible drilling costs, geological and geophysical surveys, exploration and appraisal drilling and funded abandonment provisions. Capital costs are depreciated over a five year period at 20 per cent on straight-line basis starting in the first year of production. The calculation of Tax Oil is specified by the *PPT Act* and the applicable rate for the Nigerian Marginal Fields is anticipated to be 55 per cent. The accounting period for Tax Oil is a calendar year. Taxable profit is equal to revenue less royalties, non-capital costs, capital depreciation and an investment tax allowance. The investment tax allowance is calculated as an uplift of 10 per cent of capital expenditures for offshore fields where the water depth is less than 100 m.

In addition to the fiscal terms described above, Addax Petroleum's interest in the Okwok Property is subject to the terms and conditions of the Oriental Joint Venture Agreement. See "Properties and New Ventures — Nigeria Properties — Okwok Property".

Cameroon

Addax Petroleum has a 60 per cent interest in, and operates, the Ngosso Concession. Tullow Oil holds the remaining 40 per cent interest. The Government of Cameroon has the right to participate as a joint venturer in any development in the Ngosso Property with a participating interest of up to 25 per cent. Should the Government of Cameroon choose to participate in development of the Ngosso Property, they will be responsible for their share of the operating costs and capital expenditures.

In the event of the development of oil or gas fields within the contract area, production will be subject to royalties and taxes. Royalties vary with annual average production and are calculated on an incremental sliding scale basis as follows.

<u>Annual Production Per Contract Area</u> (mboc/d)	<u>Rate</u> (%)
≤5	2.5
>5 and ≤10	5.0
>10 and ≤20	10.0
>20	12.5

A corporate income tax rate of 40 per cent applies to profits in excess of operating costs and capital expenditures.

There is an additional petroleum duty of 12.5 per cent payable in case the "R" Factor (ratio of cumulative net revenues/cumulative investments) reaches more than 1.5. The additional petroleum duty will be increased to 20 per cent in case "R" is greater than 2.5.

The Ngosso Concession also contains provisions for signature and production bonuses and training fees for Cameroonian nationals.

Gabon

Addax Petroleum has a 42.5 per cent interest in the Kiarsseny Production Sharing Contract. Tullow Oil holds a 47.5 per cent interest and Sonangol E.P. holds the remaining 10 per cent interest. The Government of Gabon has the right to participate as a partner in any development under the Kiarsseny Production Sharing Contract with a participating interest of five per cent. Should the Government of Gabon choose to participate in development of the Kiarsseny Property, they will be responsible for their share of the operating costs and capital expenditures.

In the event of the development of oil fields, the Kiarsseny Production Sharing Contract divides production into Royalty Oil, Cost Oil and Profit Oil. Addax Petroleum and the other Kiarsseny Production Sharing Contract parties will be entitled to lift the Cost Oil and a share of Profit Oil.

Royalty Oil will be calculated on a monthly basis per production area. The rates vary with water depth and production levels on an incremental sliding scale basis as follows.

Royalty Oil Rates

<u>Water Depth</u> (m)	<u>Monthly Average Production</u> (mboc/d)	<u>Rate</u> (%)
<100	≤10	2.0
	>10 and ≤15	3.0
	>15 and ≤20	5.0
	>20 and ≤30	7.5
	>30	10.0
≥100	≤15	2.0
	>15 and ≤25	3.0
	>25 and ≤35	5.0
	>35 and ≤55	7.5
	>55	10.0

After the deduction of Royalty Oil, up to 75 per cent of remaining production will be used to recover all costs for exploration, development and production activities under the Kiarsseny Production Sharing Contract.

Oil remaining after the deduction of Royalty Oil and Cost Oil is Profit Oil. Profit Oil will be shared between the Government of Gabon and the Kiarsseny Production Sharing Contract parties based upon monthly production and water depth according to an incremental sliding scale as follows:

Profit Oil Sharing

<u>Water Depth</u> (m)	<u>Monthly Average Production</u> (mboe/d)	<u>State Share</u> (%)	<u>Contractor Share</u> (%)
<100	≤15	50	50
	>15 and ≤30	52	48
	>30 and ≤40	54	46
	>40 and ≤50	56	44
	>50 and ≤75	60	40
	>75 and ≤100	65	35
	>100	70	30
≥100	≤25	50	50
	>25 and ≤40	52	48
	>40 and ≤55	54	46
	>55 and ≤70	56	44
	>70 and ≤85	58	42
	>85 and ≤100	60	40
	>100	70	30

The Kiarsseny Production Sharing Contract also contains provisions for signature and production bonuses and training fees for Gabonese nationals. There is also a domestic supply obligation.

PETROLEUM RESERVES AND OPERATIONAL MATTERS

Reserves

The tables below summarize the petroleum reserves and the present value of future net revenue associated with Addax Petroleum's reserves evaluated in the Reserve Report prepared by NSAI, independent oil and natural gas reservoir engineers, based on constant and forecast prices and costs assumptions presented in accordance with National Instrument 51-101 — *Standards of Disclosure for Oil and Gas Activities*. The tables summarize the data contained in the Reserve Report and, as a result, may contain slightly different numbers than the Reserve Report due to rounding. Future net revenue values, whether calculated without discount or using a discount rate, are estimated values and do not represent fair market value. There is no assurance that such price and cost assumptions will be attained and variances could be material. The recovery and reserves estimates of Addax Petroleum's petroleum reserves provided herein are estimates only and there is no assurance that the estimated reserves will be recovered. Actual petroleum reserves may be greater than or less than the estimates provided herein. The estimates of reserves and future net revenue for individual properties included in this prospectus may not reflect the same confidence level as estimates of revenue for all properties, due to the effects of aggregation.

The petroleum reserves of the Corporation are limited to crude oil reserves in Nigeria. The Corporation's Nigerian Production Sharing Contracts do not include the right to produce and sell natural gas and therefore the Corporation's reserve evaluations do not include any natural gas reserves. However, the Production Sharing Contracts in Nigeria contain natural gas utilization clauses which permit the Corporation to participate in commercial natural gas development if and when it occurs. The Ngosso Concession and the Kiarsseny Production Sharing Contract treat commercial natural gas in effectively the same manner as crude oil, except that lower royalty rates apply to gas production under the Ngosso Concession. However, Addax Petroleum did not have any booked proved, probable or possible reserves in Cameroon or Gabon as at September 30, 2005.

Notes:

- (1) Proved reserves are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves.
- (2) Developed producing reserves are those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.
- (3) Developed non-producing reserves are those reserves that either have not been on production, or have previously been on production, but are shut in, and the date of resumption of production is unknown.
- (4) Undeveloped reserves are those reserves expected to be recovered from known accumulations where a significant expenditure (e.g., when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves classification (proved, probable, possible) to which they are assigned.

- (5) Probable reserves are those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated proved plus probable reserves.
- (6) Possible reserves are those additional reserves that are less certain to be recovered than probable reserves. It is unlikely that the actual remaining quantities recovered will exceed the sum of the estimated proved plus probable reserves.
- (7) "Gross" means Addax Petroleum's total working interest before deduction of NNPC's share of Profit Oil and "Net" means Addax Petroleum's total working interest after deducting the amounts attributable to Royalty Oil and NNPC's share of Profit Oil. See "Fiscal Terms — Nigeria".
- (8) Columns may not add up due to rounding.
- (9) Reserves presented exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.3 mmbbls. See "Properties and New Ventures — Nigeria Country Discussion — International Relations".
- (10) The forecast prices and costs assumptions assume the continuance of current laws and regulations and increases in terminal selling prices, and take into account inflation with respect to future operating and capital costs. In the Reserve Report, operating costs are assumed to escalate at 1.8 per cent per annum. Crude oil prices as forecast by NSAI effective September 30, 2005, are as follows.

NSAI Crude Oil Forecast Prices

<u>Year</u>	<u>Brent Crude</u>	<u>Antan Blend</u>	<u>Brass River Blend</u>	<u>Okwori Blend</u>
	(\$/bbl)	(\$/bbl)	(\$/bbl)	(\$/bbl)
2005	62.87	59.55	63.75	63.26
2006	61.47	58.22	62.33	61.86
2007	55.19	52.28	55.96	55.54
2008	46.61	44.15	47.26	46.90
2009	43.45	41.16	44.06	43.72
2010	42.86	40.60	43.46	43.13
2011	42.85	40.58	43.45	43.12
2012	43.36	41.07	43.97	43.64
2013	44.22	41.89	44.84	44.50
2014	45.00	42.62	45.63	45.28
2015	45.89	43.47	46.53	46.18
2016	46.70	44.23	47.35	46.99
2017	47.58	45.07	48.25	47.88

- (11) The constant price and costs assumptions assume the continuance of current laws, regulations and operating costs in effect on the date of the Reserve Report. Crude oil prices were not forecast beyond September 30, 2005. In addition, operating and capital costs have not been increased on an inflationary basis. The prices were as follows.

	<u>September 30, 2005</u>
	(\$/bbl)
Brent Crude	62.56
Antan Blend	59.26
Brass River Blend	63.44
Okwori Blend	62.95

- (12) Included in the Reserve Report is a capital investment of \$126.4 million to be expended prior 2008 to eliminate gas flaring by constructing infrastructure to supply all produced gas for sale or re-injection.
- (13) Abandonment costs have been estimated for the end of the economic producing life of each property.
- (14) The estimated Net Present Values of Future Net Revenues After Taxes include the effect of all deductions under the Production Sharing Contracts including Royalty Oil, NNPC's share of Profit Oil, Tax Oil, NNDC levy, Education Tax and Tax Inversion Penalty. The estimated Net Present Values of Future Net Revenues Before Taxes only include the effect of deducting Royalty Oil and NNPC's share of Profit Oil.
- (15) Estimated Net Present Values of Future Net Revenue include the revenue effects of exploration expenditures of \$103.7 million under the Nigerian PSCs but the costs of exploration activities are not deducted from future net revenue because they do not relate to the reserves being evaluated.

The following two tables set forth the undiscounted elements of future net revenue based on forecast prices and costs and constant prices and costs used by NSAI to determine total future net revenue.

**Total Future Net Revenue (Undiscounted)
as at September 30, 2005 Based on Forecast Prices and Costs**

	Revenue	Royalties	Operating Costs	Development Costs	Abandonment Costs	Future Net Revenue Before Taxes	Taxes	Future Net Revenue After Taxes
	(\$million)							
Proved Reserves	5,552	629	1,012	697	35	3,163	1,807	1,372
Proved Plus Probable	9,718	1,266	1,716	1,017	45	5,635	3,567	2,107

2017	-	-	-	-	-	-
2018	-	29.6	34.4	2.3	23.7	27.6
Total	731.9	1,062.2	1,288.7	718.3	1,038.2	1,251.2

Oil Wells

The following table sets forth the number and status of wells as at September 30, 2005 which are producing or shut-in and which the Corporation considers to be capable of production.

Property	Producing		Shut-in	
	Gross	Net	Gross	Net
OML123				
Adanga	15	15	4	4
Ebughu (and extensions)	21	21	1	1
Oron West and North Oron	8	8	-	-
Akam	4	4	5	5
Bogi	1	1	1	1
Mimbo	1	1	1	1
Ukpam	2	2	-	-
OML124				
Izombe	6	6	1	1
Ossu	4	4	2	2
OPL90				
Okwori	5	5	-	-
Nda	1	1	-	-
Total	68	68	15	15

All of the Corporation's producing or shut-in wells are located in Nigeria, and with the exception of OML124, are offshore.

Drilling History

The total number of exploratory, appraisal and development wells (excluding placement wells and unplanned sidetracks) within the properties which the Corporation drilled in the periods indicated, are listed below.

	9 Months Ended		Year Ended December 31,

Reconciliation of Reserves

The Corporation has not previously reported its reserves in accordance with NI 51-101 and consequently a reconciliation has not been included.

Alternative Price Forecast Evaluation

The forecast prices used by NSAI in the Reserve Report as at September 30, 2005 differ from those currently in the public domain with respect to a number of the Corporation's industry peers. As a result, at the request of the Corporation, NSAI conducted a price sensitivity analysis of the reserves of the Corporation and the net present value of future net revenue associated with such reserves as at September 30, 2005 using an alternative price forecast supplied by the Corporation. The alternative price forecast correlates with the price forecast used in appraisals of some of the Corporation's industry peers in the public domain and, by comparison to the information set forth in the Reserve Report, provides some measure of guidance in respect of the sensitivity of the evaluation to price forecast changes, particularly having regard to the period over which reserves are, pursuant to the evaluation, estimated to be recovered. NSAI otherwise used the same assumptions and definitions as in the Reserve Report. The tables below summarize the alternative price forecast and the results of such analysis. The information set forth below is supplemental to the disclosure required by NI 51-101 and is not a substitute therefor.

**Oil Reserves and Future Net Revenues
Based on Alternative Forecast Prices and Costs
as at September 30, 2005⁽¹⁰⁾**

	Crude Oil Reserves ⁽⁷⁾⁽⁸⁾⁽⁹⁾		Estimated Net Present Values of Future Net Revenue Before Taxes ⁽⁸⁾⁽⁹⁾⁽¹⁰⁾⁽¹¹⁾⁽¹²⁾⁽¹³⁾⁽¹⁴⁾					Estimated Net Present Values of Future Net Revenue After Taxes ⁽⁸⁾⁽⁹⁾⁽¹⁰⁾⁽¹¹⁾⁽¹²⁾⁽¹³⁾⁽¹⁴⁾

Notes:

- (1) Proved reserves are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves.
- (2) Developed producing reserves are those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.
- (3) Developed non-producing reserves are those reserves that either have not been on production, or have previously been on production, but are shut in, and the date of resumption of production is unknown.
- (4) Undeveloped reserves are those reserves expected to be recovered from known accumulations where a significant expenditure (e.g., when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves classification (proved, probable, possible) to which they are assigned.
- (5) Probable reserves are those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated proved plus probable reserves.
- (6) Possible reserves are those additional reserves that are less certain to be recovered than probable reserves. It is unlikely that the actual remaining quantities recovered will exceed the sum of the estimated proved plus probable plus possible reserves.
- (7) "Gross" means Addax Petroleum's total working interest before deduction of NNPC's share of Profit Oil and "Net" means Addax Petroleum's total working interest after deducting the amounts attributable to Royalty Oil and NNPC's share of Profit Oil. See "Fiscal Terms — Nigeria".
- (8) Columns may not add up due to rounding.
- (9) Reserves presented exclude reserves in the Disputed Area except for certain reserves attributable to existing producing wells in the Disputed Area which amount to proved reserves of 0.3 mmbbls. See "Properties and New Ventures — Nigeria Country Discussion — International Relations".
- (10) The alternative prices and costs assumptions assume the continuance of current laws and regulations and increases in terminal selling prices, and take into account inflation with respect to future operating and capital costs. In the Reserve Report, operating costs are assumed to escalate at 1.5 per cent per annum. Crude oil prices used by NSAI for the Alternative Forecast Prices and Cost effective September 30, 2005, are as follows.

Alternative Crude Oil Forecast Prices

<u>Year</u>	<u>Brent Crude</u> (\$/bbl)	<u>Antan Blend</u> (\$/bbl)	<u>Brass River Blend</u> (\$/bbl)	<u>Okwori Blend</u> (\$/bbl)
2005	56.67	53.68	57.46	57.02
2006	57.44	54.41	58.25	57.81
2007	57.25	54.23	58.05	57.61
2008	55.59	52.65	56.37	55.94
2009	54.06	51.21	54.82	54.40
2010	52.99	50.19	53.73	53.32
Thereafter, escalated at 1.5%	52.30	49.54	53.03	52.63

- (11) Included in the Reserve Report is a capital investment of \$126.4 million to be expended prior 2008 to eliminate gas flaring by constructing infrastructure to supply all produced gas for sale or re-injection.
- (12) Abandonment costs have been estimated for the end of the economic producing life of each property.
- (13) The estimated Net Present Values of Future Net Revenues Income Taxes include the effect of all deductions under the Production Sharing Contracts including Royalty Oil, NNPC's share of Profit Oil, Tax Oil, NNDC levy, Education Tax and Tax Inversion Penalty. The estimated Net Present Values of Future Net Revenues Before Taxes only include the effect of deducting Royalty Oil and NNPC's share of Profit Oil.
- (14) Estimated Net Present Values of Future Net Revenue include the revenue effects of exploration expenditures of \$103.7 million under the Nigerian PSCs but the costs of exploration activities are not deducted from future net revenue because they do not relate to the reserves being evaluated.

**Total Future Net Revenue (Undiscounted)
as at September 30, 2005 Based on Alternative Forecast Prices and Costs**

	<u>Revenue</u>	<u>Royalties</u>	<u>Operating Costs</u>	<u>Development Costs</u>	<u>Abandonment Costs</u>	<u>Future Net Revenue Before Taxes</u>	<u>Taxes</u>	<u>Future Net Revenue After Taxes</u>
	(\$million)							
Proved Reserves	6,031	679	1,070	695	35	3,536	2,059	1,494
Proved Plus Probable	10,790	1,431	1,723	1,014	44	6,533	4,193	2,385
Proved Plus Probable Plus Possible	15,191	2,350	2,131	1,233	49	9,364	6,241	3,187

Significant Factors or Uncertainties

Other than various risks and uncertainties that participants in the oil and gas industry are exposed to generally, the Corporation is unable to identify any important economic factors or significant uncertainties that will affect any particular components of the reserves data disclosed herein. See "Risk Factors".

Sales and Marketing

Historically, the Corporation has utilized the crude marketing services of its affiliate, ABV, to sell all of its crude oil. See "Interest of AOG in Material Transactions". The Corporation currently sells three blends of crude oil. For these three blends of crude, the table below sets forth the sales and marketing volumes, average realized prices and realized differential to Brent Crude for each of the preceding three years ended December 31, 2004 and for the nine months ended September 30, 2005.

Addax Petroleum Crude Oil Differential Premium/(Discount) to Brent Crude (Volume Weighted)⁽¹⁾

	9 Months Ended September 30, 2005	Year Ended December 31,		
		2004	2003	2002
Sales and Marketing Volumes (mmbbls)				
Antan Blend ⁽²⁾	12.6	13.0	11.8	10.0
Brass River Blend	0.8	1.3	2.2	1.8
Okwori Blend	2.6	-	-	-
Dated Brent Crude Price (\$/bbl)	53.54	38.22	28.84	24.98
Addax Petroleum Average Realized Prices (\$/bbl)				
Antan Blend ⁽²⁾	50.17	36.56	27.49	24.04
Brass River Blend	54.42	39.37	29.10	25.51
Okwori Blend	60.60	-	-	-
Premium/(Discount) to Brent Crude (\$/bbl)⁽¹⁾				
Antan Blend ⁽²⁾	(3.51)	(1.88)	(1.27)	(1.36)
Brass River Blend	0.79	0.49	0.39	0.19
Okwori Blend	0.38	-	-	-

Notes:

- (1) Premium/(Discount) to Brent Crude are reported on a volume weighted basis for both the crude in question and Brent Crude, whereas Dated Brent Crude prices are reported as averages of monthly values for the period. Accordingly, the difference between the reported average realized petroleum prices and Dated Brent Crude prices may not correspond to the Premium/(Discount) to Brent Crude.
- (2) The API gravity of the Antan Blend is dependent on the proportional mix of crudes at any time. Where future individual oil field developments have lower API gravities than the current API gravity of the Antan Blend, then the API gravity of the Antan Blend may be reduced at that time.

Future Commitments

The Corporation uses non-physical oil price hedging arrangements to protect its cash flow against near-term low prices while retaining the opportunity to benefit from high oil prices. Typically, the Corporation achieves this objective by hedging a portion of its crude oil production through the purchase of put options.

Additional Information Concerning Abandonment and Reclamation Costs

The Corporation does not expect to incur any abandonment or reclamation costs within the next three years.

Employees

As at September 30, 2005, Addax Petroleum had 291 employees. Of these, 215 were located in Nigeria, 75 were located in Geneva, Switzerland and one was located in Cameroon. All the Nigerian employees, other than management employees, are unionized.

Environmental and Safety Matters

Addax Petroleum has direct responsibility for HSE in its Nigerian and Cameroonian properties. The Corporation has implemented HSE policies in respect of its operations. These HSE policies are an important part of the responsibilities of the Corporation's managers and significantly influence the operations of the Corporation.

The Corporation requires all employees and contractors to comply with HSE policies. The HSE policies are codified in the Corporation's HSE manual, which define individual HSE responsibilities and suggests ways to promote and support a safe and healthy environment. The Corporation circulates the manual to employees in all locations and managers regularly discuss the policies with staff at periodic safety meetings. In Nigeria, the Corporation has a dedicated HSE department that focuses on accident prevention, monitors operational

compliance with the HSE policies and advises management on statutory and industry requirements. The manager of this HSE department reports directly to the Managing Director of Nigerian Operations of the Corporation and is a member of the management committee, which meets weekly to discuss and direct the Corporation's activities.

The HSE policy of the Corporation emphasizes the following:

Leadership, Commitment and Training: Addax Petroleum requires its managers and supervisors to demonstrate a commitment to the HSE policies of the Corporation. This commitment includes not just responsibility for daily operation but also responsibility for reviewing the training requirements of the Corporation in order to ensure new employees and contractors receive appropriate introduction to the HSE policies. The Corporation then eliminates any identified gaps, to enable all employees and contractors to perform their duties responsibly and with due regard to the health and safety of others and the environment.

Risk Management: The Corporation manages risk by ensuring that all new projects or modifications to existing facilities undergo a hazardous operations and risk assessment. The Corporation also routinely assesses the risks of its activities and develops action plans to eliminate or minimize impact on personnel, the environment and facilities.

Health and Safety Operations: The Corporation believes that injury and incident-free operation is achievable and works to promote this mindset throughout the organization. Addax Petroleum conducts periodic in-house inspections and sponsors third-party health and safety audits to evaluate the Corporation's performance and compliance with applicable regulations, guidelines and best practices. Measures recommended through these exercises are diligently implemented to eliminate or mitigate exposure of employees, contractors and the public. The provision of the services of trained medical doctors and equipped facilities at all our field locations enhance the administration of first aid services to the Corporation's and contractors' employees.

Addax Petroleum encourages employees and contractors to report, and the Corporation will investigate, all incidents occurring in the course of operations. Knowledge gained from such investigation is communicated to all operational sites of the Corporation to prevent recurrence of similar incidents within the organization. To this end, Addax Petroleum publishes its HSE statistics and circulates them, with practice updates, throughout the organization.

Environmental Protection: Addax Petroleum conducts studies to assess the impact of planned projects or activities on the environment. Such environmental evaluation studies are conducted periodically to evaluate the impact of the Corporation's activities and opportunities for improvement. Addax Petroleum's waste management plan emphasizes waste minimization and waste reuse in compliance with the regulatory standards and guidelines set by the Nigerian Federal Ministry of Environment and the Department of Petroleum Resources.

Incident Response Plan: The Corporation has developed an integrated incident response plan to address foreseeable emergencies. This plan provides the framework on which a single or multiple emergency situation can be simultaneously managed, while maintaining a disciplined command and control of events. Emergencies such as fire, well control, medical evacuation, oil spill and civil disturbances have developed response annexes. Regular exercises are conducted at all locations to assess the awareness and preparedness of responders and to test the adequacy and state of readiness of emergency response equipment.

Insurance

The Corporation's producing oil and gas properties are all located in Nigeria. Pursuant to the terms of the Corporation's Nigerian Production Sharing Contracts, NNPC is the license holder while Addax Petroleum, as contractor, operates the fields. Addax Petroleum bears all of the risk and costs of exploration, development and operation. However, under the terms of the Nigerian Production Sharing Contracts the field equipment in Nigeria is owned by NNPC and is therefore insured by NNPC under a global policy (the "CIP Policy") which covers all of NNPC's assets and provides property damage and comprehensive general liability insurance coverage. The Corporation is co-insured under NNPC's CIP Policy as a contractor to NNPC. Addax Petroleum

believes that the coverage under the CIP Policy meets international oil industry practice and standards and the limits and deductibles are adequate for the operations in Nigeria.

Addax Petroleum has procured construction all risks insurance coverage in respect of its operations in OPL90. Coverage is for works executed anywhere in the world in performance of contracts relating to OPL90 including loss of, or damage to, the pipelines, risers, umbilicals, christmas trees and completions to be installed. Addax Petroleum has also recently procured construction all risks insurance coverage in respect of its operations in OML123 relating to the subsea works associated with the replacement of the FPSO.

Addax Petroleum's policy is to arrange such other insurance from time to time in respect of its other operations as required and in accordance with industry practice.

SELECTED FINANCIAL INFORMATION

The following table presents a summary of historical consolidated financial data for each of the nine months ended September 30, 2005 and September 30, 2004 and for each of the years ended December 31, 2004, 2003 and 2002 derived from the financial statements of the Corporation at each of these dates and for the periods then ended. The summary of historical consolidated financial data set forth below may not contain all of the information that is important to a prospective investor and should be read along with "Presentation of Financial Information", "Selected Financial Information", "Management's Discussion and Analysis of Financial Condition and Results of Operations", and the consolidated financial statements and related notes of the Corporation for each of the nine months ended September 30, 2005 and September 30, 2004 and for each of the years ended December 31, 2004, 2003 and 2002 included in this prospectus. The results for the nine months ended September 30, 2005 are not necessarily indicative of results for the full year. All financial information with respect to the Corporation has been presented in United States dollars in accordance with Canadian GAAP.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the Corporation's financial condition and results of operations should be read in conjunction with the rest of the prospectus, including the Corporation's consolidated financial statements and related notes thereto beginning on page F-7 of this prospectus and the "Selected Financial Information". The consolidated financial statements presented herein are those of Addax Petroleum N.V. and its subsidiaries. After giving effect to the Pre-IPO Transactions, the Corporation will own legally and beneficially 100 per cent of the common shares of Addax Petroleum N.V. See "Addax Petroleum — Pre-IPO Transactions".

This discussion and analysis contains forward-looking statements that are subject to known and unknown risks and uncertainties. The Corporation's actual results and the timing of events could differ materially from those expressed or implied by such forward-looking statements as a result of various factors, including those discussed below and elsewhere in this Prospectus, particularly under the headings "Forward Looking Statements" and "Risk Factors".

Addax Petroleum defines "cash flow from operations" or "CFFO" as net cash from operating activities before changes in non-cash working capital. CFFO is not a recognized measure under Canadian GAAP. Management believes that in addition to net income, CFFO is a useful measure as it demonstrates the Corporation's ability to generate the cash necessary to repay debt or fund future growth through capital investment. Investors are cautioned, however, that this measure should not be construed as an alternative to net income determined in accordance with Canadian GAAP or as an indication of Addax Petroleum's performance. Addax Petroleum's method of calculating this measure may differ from other companies and accordingly, it may not be comparable to measures used by other companies.

For the purpose of the following discussion and analysis, figures expressed on a per barrel basis are derived using sales volumes rather than production.

Overview

The Corporation is an international oil and gas exploration and production company focused on Africa and the Middle East. It has grown by acquiring under-developed properties in established basins and has increased its production by utilizing advanced and proven technologies. The Corporation currently has 11 producing fields, and has increased its crude oil production from an average of 8,800 bbls/d for 1998 to an average of approximately 74,450 bbls/d for October 2005. As at September 30, 2005, the Corporation had estimated proved reserves of 109.3 mmbbls and estimated proved and probable reserves of 201.3 mmbbls.

The Corporation is the largest independent oil producer in Nigeria and operates all four of its 100 per cent owned Nigerian properties, which account for all of its oil production. OML123 is located in shallow water and produces the majority of the Corporation's crude oil, a medium to light quality crude called the Antan Blend. OML124 is located onshore and produces light quality crude oil called the Brass River Blend. OPL90 is located offshore in medium depth water and produces light quality crude oil called the Okwori Blend, and OPL225 is an offshore exploration property located in medium depth water adjacent to OPL90.

The Corporation performs its oil activities in Nigeria through two Production Sharing Contracts with NNPC. Under each Nigerian Production Sharing Contract, the Corporation bears the development and exploration risk for the properties and funds all operating expenses and capital expenditures. In return, the Corporation is entitled to recover these costs and expenditures based on a production sharing formula after commercial discoveries are made and production begins and after the payment of royalties and production taxes. The Corporation shares with NNPC the oil remaining after the payment of royalties, costs and expenditures and production taxes on a sliding scale based on monthly production under each Nigerian Production Sharing Contract. All of the crude oil produced from the Corporation's operations is sold on an arm's length basis to ABV, a wholly-owned subsidiary of AOG, under the terms of the Crude Oil Supply Agreements.

In addition to Nigeria, the Corporation is active in Cameroon, where it has a 60.0 per cent interest in the Ngosso Property, an offshore exploration property operated by the Corporation, and Gabon, where it has a 42.5 per cent interest in the Kiarsseny Property, an offshore exploration property operated by Tullow Oil.

The Corporation is also pursuing a number of new venture opportunities in the Middle East and Africa, primarily relating to the Taq Taq Property, the Okwok Property and the Block 4 Property in the Joint Development Zone.

Material Factors Affecting the Corporation's Results of Operations and Financial Condition

Management believes that the following factors have had, and will continue to have, a material effect on the Corporation's results of operations and financial condition.

Oil Prices

The Corporation's results of operations are influenced significantly by crude oil prices. Crude oil prices have been volatile in the past and are likely to continue to be volatile in the future. Prices for oil are based on world supply and demand and a number of other factors, including government regulation, social and political conditions and the weather.

The prices for oil produced by the Corporation are related to the price of Brent crude oil in the world markets. Brent crude prices have increased from an average price of \$28.84 per barrel in 2003 to an average price of \$38.22 per barrel in 2004 and to an average price of \$53.54 per barrel for the first nine months of 2005. This increase reflects, among other things, an increase in world-wide demand, particularly in the United States and Asia, heightened geopolitical uncertainty in many areas of the world and supply concerns in the Middle East and other key producing regions. For the month of October, 2005, the average price per barrel rose to \$58.61, as supply concerns arose following hurricanes Katrina and Rita and their adverse effect on crude oil production in the US Gulf Coast region. For the nine months ended September 30, 2005, approximately 74 per cent of the Corporation's crude oil production was Antan Blend, which sold at an average discount to Brent crude of approximately seven per cent in the nine months ended September 30, 2005 and approximately six per cent in 2004. Prices for Antan Blend have increased to an average of \$50.02 per barrel for the nine months ended September 30, 2005 from \$34.94 per barrel for the same period in 2004.

The increase in oil prices has had a significant positive impact on the Corporation's net revenue, CFFO and net income, particularly in 2004 and the nine months ended September 30, 2005.

Production and Reserves

The Corporation's revenues and net income also depend on its production levels and its ability to replace its reserves. The Corporation has historically increased production by employing advanced and proven technologies to increase production in mature fields, drilling additional wells on its existing properties and acquiring and developing additional properties. The Corporation had 201.3 mmbbls of proved and probable reserves as at September 30, 2005. The Corporation increased production by 59 per cent to an average of 62.1 mbbls/d in the nine months ended September 30, 2005 from an average of 39.1 mbbls/d during the same period in 2004. The increased production was due mainly to the Okwori Property and the Nda field test well in OPL90 coming on-stream in March 2005 and 11 new wells coming on-stream in OML123.

Operating Expenses and Capital Costs

Operating expenses are the costs of producing oil and consist of items such as labour, FPSO leasing obligations, supplies, maintenance, repairs and utilities. The Corporation maintained an average operating expense of \$6.46 per barrel for the nine months ended September 30, 2005 from \$6.07 per barrel for the same period in 2004. Operating expenses increased in large part because of the costs associated with development at the Okwori Property. Operating expenses relating to the Okwori Property have averaged \$6.88 per barrel during its start up phase in 2005. Production from the Okwori Property is still increasing and operating costs are expected to decline on a per barrel basis as the field reaches full production.

Capital costs are capitalized and expensed to the income statement and include engineering studies, seismic acquisition, drilling of exploration, appraisal and development wells, the acquisition of leases and facilities costs. Facilities costs include the construction and installation of platforms and the purchase and installation of

pipelines. All costs prior to the first lifting are capitalized. The costs of drilling rig and supply boat day rates increased significantly during 2005.

Taxes

Taxes paid in Nigeria pursuant to the Production Sharing Contracts vary materially based upon, among other factors, world oil prices and capital expenditures of the Corporation. The percentage of revenues that the Corporation pays as Tax Oil decreases during periods of lower oil prices and increases during periods of higher oil prices. Tax Oil thus serves as a partial hedge against changes in the price of oil.

The Nigerian Production Sharing Contracts are also designed to stimulate capital investment in the Nigerian oil industry. Certain capital expenditures are recoverable as capital allowances prior to the calculation of Tax Oil and therefore, have the effect of reducing taxes otherwise payable under the Nigerian Production Sharing Contracts at a rate of 60 per cent. However, in the event that deductions for capital allowances and capital investment allowances reduce the taxes otherwise payable to zero, a 15 per cent tax charge is applied to the taxable amount prior to deduction of certain capital allowances and capital investment allowances.

In the nine months ended September 30, 2005, the Corporation was taxed at the 15 per cent tax rate in relation to the OPL90/225 PSC. As at September 30, 2005, the Corporation had \$120.6 million of unutilized capital investment allowance relating to OPL90 and OPL225. In addition, \$55.2 million of costs incurred by a prior operator were available for recovery as Cost Oil. \$44.2 million of these costs have been allocated to operating expenses and utilized, while the balance of \$11.0 million has been allocated to capital costs. The Corporation expects to become subject to the standard tax rate of 60 per cent under the OPL90/225 PSC, if and when it utilizes its capital allowances and capital investment allowances. The Corporation's 2006 budget assumes that the 60 per cent rate would apply to OPL90/225.

Economic Sensitivities

The following table shows the estimated after-tax effect that changes to crude oil prices, crude oil production, operating costs and taxes for the OPL90/225 PSC would have had on Addax Petroleum's net income for the nine months ended September 30, 2005, had these changes occurred on January 1, 2005. These calculations are based on business conditions, production and sales volumes existing in the nine months ended September 30, 2005. The 1,000 bbls/d increase has been allocated evenly to OML123, OML124 and OPL90 once initial production from OPL90 commenced in March 2005. Prior to March 2005, production is assumed to come entirely from OML123 and OML124.

<u>Factor</u>	<u>Change (+)</u>	<u>Net Income Impact</u> ((\$million)	<u>Net Income Impact</u> (\$/share)
Price received for crude oil	\$1.00/bbl	5.4	0.05
Crude oil production	1,000 bbls/d	4.3	0.04
Increase in operating costs	10%	(4.2)	(0.04)
Tax rate for OPL90/225 PSC	45% (15% to 60%)	(20.0)	(0.17)

The impact of the above changes may be compounded or offset by changes to other business conditions. In addition, the table does not consider the relationships between the above factors.

Nine months Ended September 30, 2005 Compared with Nine Months Ended September 30, 2004

Summary

The Corporation's production figures are reported gross of royalties and NNPC's share of Profit Oil and exclude any volumes held as inventory at the end of the period.

During the nine months ended September 30, 2005, the Corporation brought 11 new wells on-stream. The majority of these wells were in the Adanga, Oron West and North Oron fields in OML123. The Okwori Property and the Nda field test well in OPL90 came on-stream in March 2005. The addition of the new wells increased the Corporation's crude oil production by 58 per cent to 16.9 mmbbls for the nine months ended September 30, 2005

from 10.7 mmbbls in the same period in 2004. Average daily production for the nine months ended September 30, 2005 was 62.1 mbbbls/d, representing an increase from the average daily production of 39.1 mbbbls/d during the same period in 2004.

The Corporation's total crude oil production by property for the nine months ended September 30, 2005 was 12.5 mmbbls from OML123, 1.0 mmbbls from OML124, and 3.4 mmbbls from OPL90 (which commenced production in March 2005), as compared with 9.6 mmbbls from OML123 and 1.1 mmbbls from OML124 for the same period in 2004.

Net income increased to \$168.0 million for the nine months ended September 30, 2005 from \$41.3 million for the same period in 2004. The following table summarizes the Corporation's results of operations for the nine months ended September 30, 2005 as compared to the same period in 2004.

	9 Months Ended September 30, 2005	9 Months Ended September 30, 2004	Change	9 Months Ended September 30, 2005	9 Months Ended September 30, 2004
	(\$million)	(\$million)	(%)	(\$/bbl)	(\$/bbl)
Petroleum sales	840.6	367.8	129	52.21	35.37
Royalties	(139.8)	(67.0)	109	(8.68)	(6.44)
Net sales	700.8	300.8	133	43.53	28.92
Total net revenue	702.1	302.1	132	43.61	29.05
Operating expenses	(104.0)	(63.1)	65	(6.46)	(6.07)
General and administration expenses	(11.3)	(13.5)	(16)	(0.70)	(1.30)
Depletion, depreciation and accretion	(108.1)	(46.8)	131	(6.71)	(4.50)

Total net revenue less total expenses	475.5	176.8	169	29.53	17.00
Current taxes	(256.9)	(109.1)	135	(15.96)	(10.49)
Future taxes	(50.6)	(26.4)	92	(3.14)	(2.54)
Net Income	168.0	41.3	307	10.43	3.97

Notes:

- (1) Includes interest on long term debt, other interest and finance charges, foreign exchange loss (gain) and impairment of property, plant and equipment.
- (2) Figures expressed on a per barrel basis are derived using sales volumes rather than production.

Petroleum Sales

Petroleum sales are reported on the basis of production volumes sold gross of royalties and NNPC's share of Profit Oil and exclude any volumes held as inventory at the end of the period. Any overlifts are accounted for as deferred income on the balance sheet.

Due to favourable market conditions, the average realized price for the Corporation's crude oil increased by 48 per cent to \$52.21 per barrel for the nine months ended September 30, 2005 from \$35.37 per barrel for the same period in 2004.

Petroleum sales increased by 129 per cent to \$840.6 million for the nine months ended September 30, 2005 from \$367.8 million for the same period in 2004. The increase reflects both a 48 per cent increase in the average sales price and a 58 per cent increase in average daily production. Petroleum sales volumes for the nine months ended September 30, 2005 were 16.1 mmbbls compared with 10.4 mmbbls for the same period in 2004.

Royalties

The following table summarizes the component parts of Royalties for the nine month periods ended September 30, 2005 and 2004:

	9 Months Ended September 30,			9 Months Ended September 30,	
	2005 (\$million)	2004 (\$million)	Change (%)	2005 (\$/bbl)	2004 (\$/bbl)
Royalty Oil	(58.7)	(24.0)	144	(3.65)	(2.31)
NNPC Profit Oil	(58.4)	(25.5)	129	(3.63)	(2.45)
NDDC	(8.7)	(9.3)	(7)	(0.54)	(0.90)
Education Tax	(9.6)	(4.3)	122	(0.60)	(0.42)
Tax Inversion Penalty	(4.4)	(3.9)	13	(0.28)	(0.36)
Total Royalties	(139.8)	(67.0)	109	(8.68)	(6.44)

Royalties include Nigerian Royalty Oil, NNPC's share of Profit Oil, Niger Delta Development Commission ("NDDC") levy, education tax and tax inversion penalty.

- Royalty Oil is calculated in accordance with the Corporation's Nigerian Production Sharing Contracts on a field by field basis.
- Profit Oil is calculated in accordance with the Nigerian Production Sharing Contracts and is equal to the realized price for crude oil less Royalty Oil, Cost Oil and Tax Oil. Profit Oil is shared between NNPC and the Corporation depending on the licence and the monthly volumes produced.
- NDDC levy is calculated as 3 per cent of budgeted expenditures. For OPL90, this amount was calculated once first lifting occurred in June 2005. Before first lifting, there was no liability for the levy.
- Education tax is calculated as a 2 per cent charge on taxable profit before capital allowances are deducted.
- The tax inversion penalty is designed to encourage oil companies to contain operating costs. The tax inversion penalty for production rates of less than 50 mbbbls/d is calculated at 25 per cent of operating costs in excess of \$7.50/bbl. For production rates of more than 50 mbbbls/d, the tax inversion penalty is calculated at 25 per cent of operating costs above \$5.00/bbl. Addax Petroleum's production average exceeded 50 mbbbls/d for 2005. The Corporation estimates that its maximum exposure to the tax inversion penalty is \$6.5 million for 2005.

Royalties increased by 109 per cent to \$139.8 million for the nine months ended September 30, 2005 from \$67.0 million for the same period in 2004. This increase was due to the rise in petroleum sales which in turn resulted in Royalty Oil increasing by 144 per cent to \$58.7 million from \$24.0 million and includes \$5.3 million of Royalty Oil resulting from OPL90 crude oil production (2004 — nil), and NNPC's share of Profit Oil increasing 129 per cent to \$58.4 million from \$25.5 million, due to increased profitability from OML123 and OML124, primarily as a result of higher sales volumes and prices.

The NDDC levy decreased by \$0.6 million to \$8.7 million for the nine months ended September 30, 2005 from \$9.3 million for the same period in 2004. Education tax increased by 122 per cent to \$9.6 million for the nine months ended September 30, 2005 from \$4.3 million for the same period in 2004. The increase in education tax was a result of higher taxable income before allowances in OML123 and OML124 and the inclusion of OPL90 income for the first time. The tax inversion penalty increased by 13 per cent to \$4.4 million for the nine months ended September 30, 2005 from \$3.9 million for the same period in 2004 due primarily to management's expectation that OML123 and OML124 will produce in excess of 50.0 mbbbls/d for 2005.

Operating Expenses

Operating expenses increased by 65 per cent to \$104.0 million for the nine months ended September 30, 2005 from \$63.1 million during the same period in 2004. The increase was primarily due to (i) an increase in employee costs and benefits of \$4.5 million following the recruitment of 20 additional professionals in Nigeria to support ongoing operations and development in the Okwori field; (ii) an increase of \$5.0 million in Lagos office costs; (iii) an increase of \$4.3 million for production and maintenance work on OPL90; and (iv) an increase of \$7.5 million in FPSO charter costs following the lease of a TPU (temporary production unit) which was used to continue production from the Adanga platform while upgrades were being made. In addition, operating expenses for OPL90 for the nine months ended September 30, 2005 were \$23.2 million, as compared with no operating expenses for OPL90 in 2004.

Per barrel operating expenses increased to \$6.46 in the nine months ended September 30, 2005 from an average of \$6.07 for the same period in 2004.

General and Administrative Expenses

General and administrative charges relate to corporate costs and new venture activities. These costs are not tax deductible for Nigerian tax purposes.

General and administrative expenses decreased by 16 per cent to \$11.3 million for the nine months ended September 30, 2005 from \$13.5 million for the same period in 2004. This decrease was due primarily to the Corporation incurring \$2.2 million in legal and special audit costs in 2004 in preparation for its initial public offering.

Depletion, Depreciation and Accretion

Depletion, depreciation and accretion expenses increased by 131 per cent to \$108.1 million for the nine months ended September 30, 2005 from \$46.8 million for the same period in 2004. The 2005 figure includes \$30.2 million in depreciation on OPL90 assets which were not depreciated in 2004 as production from OPL90 did not commence until March 2005. Depreciation for OML123 and OML124 assets increased by \$31.0 million for the nine months ended September 30, 2005 compared to the same period in 2004, due primarily to increased production which led to an increase in the unit of production rate used to calculate depreciation. This higher unit of production rate was due primarily to the addition of the Okwori Property costs to the depletion, depreciation and accretion pool. The average development cost per barrel for projects in OML123/124 is approximately \$4.00 to \$6.00 per barrel compared with significantly higher development costs of approximately \$10.00 per barrel for the Okwori Property.

Current Income Taxes

The fiscal terms of the Corporation's main operations in Nigeria are set out in the Production Sharing Contracts as modified by the Nigerian government on November 21, 2001. Taxation is calculated at the statutory rate on income which is taxable in Nigeria as a result of activities under the Production Sharing Contract.

Current Income Taxes increased by 135 per cent to \$256.9 million for the nine months ended September 30, 2005 from \$109.1 million for the same period in 2004. This increase was due primarily to an increase in petroleum sales, which generated a higher taxable basis for the nine months ended September 30, 2005. There were \$6.6 million of current income taxes for OPL90 for the nine months ended September 30, 2005 and no income tax for the same period in 2004. Income from OPL90 for the nine months ended September 30, 2005 was taxed at 15 per cent.

Future Income Taxes

The Corporation earns capital investment allowances on capital expenditures in Nigeria. The future income tax benefits arising from capital investment allowances are recorded when the capital investment allowances are earned and reduce the carrying amount of property, plant and equipment. Capital investment allowances are charged to future income tax in the statement of operations as the tax benefits are realized.

Future income taxes increased by 92 per cent to \$50.6 million for the nine months ended September 30, 2005 from \$26.4 million for the same period in 2004. This increase is primarily due to a future tax liability of \$20.1 million for the OPL 90/225 PSC for the nine months ended September 30, 2005 (corresponding period in 2004 — nil).

Year Ended December 31, 2004 Compared with Year Ended December 31, 2003

Summary

During 2004, 15 new wells came on-stream; including two extended well tests. The Corporation also implemented initiatives to optimize production from existing wells. This resulted in an increase in production by 6 per cent to 14.6 mmbbls in 2004 from 13.8 mmbbls in 2003 and an increase in the average daily crude oil production rate to 40.0 mbbbls/d in 2004 from 37.7 mbbbls/d in 2003.

Total oil production for 2004 was 14.6 mmbbls, 91 per cent of which was from OML123 (13.2 mmbbls) with the remainder from OML124 (1.4 mmbbls).

In 2004, net income increased by 169 per cent to \$62.6 million from \$23.3 million in 2003. The following table summarizes the Corporation's results of operations for 2004 as compared to 2003.

	<u>2004</u>	<u>2003</u>	<u>Change</u>	<u>2004</u>	<u>2003</u>
	(\$million)	(\$million)	(%)	(\$/bbl)	(\$/bbl)

Future taxes	(30.1)	(25.7)	17	(2.10)	(1.85)
Non-controlling interest	—	(2.4)	n/a	—	(0.16)
Net Income	<u>62.6</u>	<u>23.3</u>	<u>169</u>	<u>4.38</u>	<u>1.68</u>

Notes:

- (1) Including interest on long term debt, other interest and finance charges, foreign exchange loss (gain) and impairment of property, plant and equipment.
- (2) Figures expressed on a per barrel basis are derived using sales volumes rather than production.

Petroleum Sales

Petroleum sales increased by 37 per cent to \$524.1 million in 2004 from \$381.8 million in 2003. The increase reflects both a 33 per cent increase in the average realized sales price and a 6 per cent increase in average daily production. The average realized price per barrel increased by 33 per cent to \$36.65 in 2004 from \$27.47 in 2003. The number of barrels lifted increased to 14.3 mmbbls in 2004 from 13.9 mmbbls in 2003.

Royalties

The following table summarizes the component parts of royalties for the years ended December 31, 2004 and 2003.

	Year Ended December 31,		Change (%)	Year Ended December 31,	
	2004 (\$million)	2003 (\$million)		2004 (\$/bbl)	2003 (\$/bbl)
Royalty Oil	(36.0)	(28.2)	27	(2.51)	(2.03)
NNPC Profit Oil	(45.5)	(28.7)	59	(3.18)	(2.06)
NDDC	(11.8)	(6.4)	84	(0.82)	(0.46)
Education Tax	(6.3)	(3.8)	64	(0.44)	(0.27)
Tax Inversion Penalty	(3.8)	—	—	(0.27)	—
Total Royalties	(103.4)	(67.1)	54	(7.22)	(4.82)

Royalties increased by 54 per cent to \$103.4 million in 2004 from \$67.1 million in 2003. This increase was due to the increase in petroleum sales outlined above which resulted in Royalty Oil increasing by 27 per cent to \$36.0 million in 2004 from \$28.2 million in 2003, and NNPC's share of Profit Oil increasing by 59 per cent to \$45.5 million in 2004 from \$28.7 million in 2003, due to increased profitability from OML123 and OML124, primarily due to higher sales volumes and prices.

The NDDC levy increased by 84 per cent to \$11.8 million in 2004 from \$6.4 million in 2003, due primarily to a \$5.0 million accrual relating to a change in the basis on which the NDDC levy was calculated. The NDDC levy was calculated based on actual expenditures in 2002 and 2003 and budgeted expenditures in 2004. The Corporation had been lobbying to change the basis of the NDDC levy calculation and it became apparent in 2004 that the method which the Nigerian authorities wished to use was budgeted expenditure. This calculation method is still being disputed by the Corporation. The additional increase is mainly due to higher expenditures in 2004 compared to 2003. Education tax increased by 64 per cent to \$6.3 million in 2004 from \$3.8 million in 2003, due to higher taxable income before allowances.

The tax inversion penalty in 2004 relates to a tax audit of the Corporation's 1998 to 2001 financials where NNPC and the Corporation agreed on final tax accounts. The method of calculating operating costs for the costs penalty arrangement is still to be agreed. However, following the audit, and applying the Corporation's method of calculating operating costs per barrel, the cost per barrel for 2000 was greater than \$7.50 per barrel. Thus, the tax inversion penalty was accrued in 2004.

Operating Expenses

Operating expenses increased by 14 per cent to \$87.5 million in 2004 from \$76.8 million in 2003. This increase was primarily due to an increase in employee costs and benefits of \$4.9 million following the recruitment of additional professionals in Nigeria to support ongoing operations and development on the Okwori Property and an increase of \$5.8 million in FPSO charter costs following the lease of a temporary production unit which was used to process crude oil while the Adanga Platform was closed for upgrades. This increase was partially offset by a decrease of \$0.8 million in onshore maintenance costs (pipeline and facilities) and \$0.8 million in custom duties on the importation of well material. The per barrel operating cost increased to \$6.12 in 2004 from \$5.53 in 2003.

General and Administrative Expenses

General and administrative expenses increased by 21 per cent to \$18.2 million in 2004 from \$15.0 million in 2003. This increase was due primarily to the Corporation incurring \$4.0 million in legal and special audit costs in 2004 in preparation for its initial public offering.

Depletion, Depreciation and Accretion

Depletion, depreciation and accretion expenses increased by 26 per cent to \$77.2 million in 2004, from \$61.3 million in 2003, largely as a result of increased production and a larger depreciable base. On a per barrel basis, depletion, depreciation and accretion expenses increased by \$0.99 per barrel to \$5.40 per barrel in 2004 from \$4.41 per barrel in 2003.

In 2004, the Corporation wrote off \$3.8 million, which represented its portion of the costs associated with the drilling of an unsuccessful exploratory well in Gabon in early 2004.

In 2003, production from two cost pools, OPL90 and OPL225 and the Ngosso Property, had not yet commenced. Accordingly, no depreciation charge for these costs was calculated and all costs were capitalized. The Corporation planned to acquire 3D seismic data in the Ngosso Property in 2003, but the project was postponed due to the Cameroon-Nigeria border dispute. In 2003, the Corporation wrote off capitalized intangible costs of \$4.5 million which were incurred for mobilization and demobilization of a seismic data acquisition team in the Ngosso Property.

Current Income Taxes

Current income taxes increased by \$38.7 million to \$140.4 million in 2004 from \$101.7 million in 2003. This increase is due primarily to a 37.0 per cent increase in petroleum sales which generated a higher taxable basis in 2004 compared to 2003, and an increase in PPT charges of \$9.6 million relating to whether certain capital costs regarding the acquisition of the Nigerian properties should be charged to Cost Oil.

Future Income Taxes

Future income tax expense increased by 17 per cent to \$30.1 million in 2004 from \$25.7 million in 2003. The increase is due primarily to additional capital expenditure of which intangible drilling costs are expensed in the tax accounts and capitalized in the financial statements, offset by greater depletion, depreciation and accretion compared to capital allowances.

Year Ended December 31, 2003 Compared with Year Ended December 31, 2002

Summary

In OML123, five new wells came on-stream in 2003 and initiatives were implemented to optimize production from existing wells. In OML124, the Corporation implemented a drilling program that resulted in two new producing wells being brought on-stream. Principally as a result, crude oil production increased by 20 per cent to 13.8 mmbbls in 2003 from 11.5 mmbbls in 2002. The average daily rate of production increased to 37.7 mbbls/d in 2003 from 31.5 mbbls/d in 2002.

Total crude oil production for 2003 was 13.8 mmbbls, 85.5 per cent of which was produced from OML123 (11.8 mmbbls), with the remainder produced from OML124 (2.0 mmbbls).

In 2003, net income decreased by 66 per cent to \$23.3 million as compared to \$68.2 million in 2002. The following table summarizes the Corporation's results of operations for 2003 as compared to 2002.

	<u>2003</u>	<u>2002</u>	<u>Change</u>	<u>2003</u>	<u>2002</u>
	(\$million)	(\$million)	(%)	(\$/bbl)	(\$/bbl)
Petroleum sales	381.8	284.1	34	27.47	24.28
Royalties	(67.1)	19.1	n/a	(4.83)	1.63
Net sales	314.7	303.2	4	22.64	25.91
Total net revenue	316.4	304.8	4	22.76	26.05

Notes:

- (1) Including interest on long term debt, other interest and finance charges, foreign exchange loss (gain) and impairment of property, plant and equipment.
- (2) Figures expressed on a per barrel basis are derived using sales volumes rather than production.

Petroleum Sales

Petroleum sales increased by 34 per cent to \$381.8 million in 2003 from \$284.1 million in 2002. The increase reflects both a 13 per cent increase in the average realized price of the Corporation's crude oil (\$27.47 in 2003 compared to \$24.28 in 2002) and a 20 per cent increase in average daily production. The number of barrels lifted increased to 13.9 mmbbls in 2003 from 11.7 mmbbls in 2002.

Royalties

The following table summarizes the component parts of royalties for the years ended December 31, 2003 and 2002.

	<u>Year Ended</u> <u>December 31,</u>		<u>Change</u>	<u>Year Ended</u> <u>December 31,</u>	
	<u>2003</u>	<u>2002</u>	<u>(%)</u>	<u>2003</u>	<u>2002</u>
	(\$million)	(\$million)	(%)	(\$/bbl)	(\$/bbl)
Royalty Oil	(28.2)	35.2	n/a	(2.03)	3.01
NNPC Profit Oil	(28.7)	(6.4)	344	(2.06)	(0.55)
NDDC	(6.4)	(8.1)	(21)	(0.46)	(0.69)
Education Tax	(3.8)	(1.6)	143	(0.28)	(0.14)
Total Royalties	<u>(67.1)</u>	<u>19.1</u>	<u>n/a</u>	<u>(4.83)</u>	<u>1.63</u>

Royalties increased to \$67.1 million in 2003 from a credit of \$19.1 million in 2002. Royalty Oil increased to \$28.2 million in 2003 from a credit of \$35.2 million in 2002. Royalty Oil in 2002 included a credit of \$53.7 million due to the implementation of new royalty terms during 2002, but made effective retroactively as of January 1, 2000. In addition, the increase in production between 2003 and 2002 resulted in higher royalties. NNPC's share of Profit Oil increased to \$28.7 million in 2003 from \$6.4 million in 2002, due to increased profitability from OML123 and OML124, primarily due to higher sales volumes and prices. Following an audit by NNPC in 2003, the Corporation agreed with NNPC that capital investment allowance was not deductible in calculating NNPC Profit Oil. This increased NNPC Profit Oil in 2003 by \$10.3 million. In 2002, NNPC Profit Oil had carried forward losses from prior years, which reduced the 2002 change.

NDDC levies decreased by 21 per cent to \$6.4 million in 2003 from \$8.1 million in 2002. The decrease in NDDC levies was due primarily to lower capital expenditures in 2003. Education tax increased by 143 per cent to \$3.8 million in 2003 from \$1.6 million in 2002. The increase was due to higher taxable income before allowances in 2003. In 2003 and 2002, the NDDC levy was calculated based on actual expenditures (as opposed to budgeted expenditures) incurred on OML123 and OML124. As no crude oil was produced and sold from OPL90 and OPL225 in 2003 or 2002, no petroleum levies were calculated for these properties.

Operating Expenses

Operating expenses increased by 19 per cent to \$76.8 million in 2003 from \$64.8 million in 2002. This increase was due primarily to a \$4.4 million increase in the OML123 FPSO costs following the leasing of a second production processing train for the FPSO, a \$2.2 million increase in employee costs, a \$1.7 million provision for Nigerian withholding tax in 2003, a \$1.2 million increase in supply vessel costs of the Corporation's offshore operations, a \$0.6 million restructuring charge incurred in 2003 and a \$0.6 million increase in third party maintenance staff costs. Per barrel operating costs decreased by \$0.01 to \$5.53 in 2003 from \$5.54 in 2002.

General and Administrative Expenses

General and administrative expenses increased by \$3.9 million to \$15.0 million in 2003 from \$11.1 million in 2002. This increase was primarily due to an increase in new ventures activities and office expansion activities in Geneva.

Depletion, Depreciation and Accretion

Depletion, depreciation and accretion expenses increased by 53 per cent to \$61.3 million in 2003 from \$40.1 million in 2002. This increase was primarily due to the increase of the unit of production rate used to calculate total depreciation. On a per barrel basis, depletion, depreciation and accretion expenses increased by \$0.98 to \$4.41.

Current Income Taxes

Current Income Taxes increased by 193 per cent to \$101.7 million in 2003 from \$34.7 million in 2002. This increase was due primarily to a 34.0 per cent increase in petroleum sales which generated a higher taxable basis in 2003. Tax loss and allowance carry forwards were used before 2003, which significantly reduced the 2002 tax charge. A tax accrual of \$8.0 million was taken in 2003 relating to a reserve addition bonus for reserve additions in 1999, which the Nigerian authorities disallowed in 2003 and which the Corporation successfully contested. Another tax accrual, also for \$8.0 million, was taken relating to studies which were capitalized by the Corporation.

Future Income Taxes

Future income taxes decreased by 64 per cent to \$25.7 million in 2003 from \$72.3 million in 2002. The decrease was a result of a \$16 million tax deferral for the Okwori Property, which was offset by an increase in the timing differences in OML123 and OML124 and the accumulation of capital investment allowance carry forwards in 2003.

Consolidated Results of Operations by Quarter

The following table sets forth a summary of the Corporation's results of operations for the periods indicated.

	2005			2004				2003			
	Q3	Q2	Q1	Q4	Q3	Q2	Q1	Q4	Q3	Q2	Q1
	(\$thousand)

Net income	85.6	53.5	28.9	21.3	15.8	13.7	11.8	(8.1)	13.8	1.4	16.2
Net income per share ⁽¹⁾											
— basic and diluted — pro forma	0.71	0.45	0.24	0.18	0.13	0.11	0.10	(0.07)	0.12	0.01	0.14

Note:

(1) All pro forma per share amounts are calculated on the basis of 120,000,000 outstanding Common Shares of Addax Petroleum Corporation, after giving pro forma effect to the completion of the Pre-IPO Transactions. See "Interest of AOG in Material Transactions—Share Transfer Agreement."

Petroleum Sales

The volume of crude oil sold by the Corporation per fiscal quarter for the first three fiscal quarters of 2005 was 4.4 mmbbls, 5.4 mmbbls and 6.4 mmbbls, respectively. Petroleum sales for the first three quarters of 2005 increased as production from OML123 and OML124 increased and as production from OPL90 was brought on-stream in March 2005. Petroleum sales from OPL90 and OPL225 per fiscal quarter for the first three quarters of 2005 were nil mmbbls, 0.9 mmbbls and 1.7 mmbbls, respectively. The average sales price per quarter for the first three fiscal quarters of 2005 was \$43.13 per barrel, \$49.67 per barrel and \$59.89 per barrel, respectively. The increasing volumes and prices throughout the quarters, including first sales from OPL90 and OPL225, accounted for the increasing petroleum sales per quarter.

In 2004, the volumes of crude oil sold by the Corporation per fiscal quarter were 3.3 mmbbls, 3.4 mmbbls, 3.7 mmbbls and 4.0 mmbbls, respectively. Petroleum sales in 2004 were affected by increasing production during the year. The average sales price per fiscal quarter generally increased throughout 2004 as follows: \$30.53 per barrel, \$33.52 per barrel, \$40.22 per barrel and \$40.14 per barrel. The increasing volumes and prices throughout the year accounted for the rising total petroleum sales per quarter.

For the four fiscal quarters in 2003, the volumes sold were 3.3 mmbbls, 3.6 mmbbls, 3.7 mmbbls and 3.3 mmbbls, respectively. The average sales price in the first quarter was \$30.46 per barrel, dropping to \$25.01 per barrel in the second quarter and then rising to \$27.51 and \$28.30 per barrel in the third and fourth quarters, respectively.

Net Income

Net income by fiscal quarter for the first three quarters of 2005 were \$28.9 million, \$53.5 million and \$85.6 million, respectively. The increase in net income in the second quarter compared to the first quarter of \$24.6 million was due primarily to an increase in petroleum sales from \$194.5 million in the first quarter to \$258.2 million in the second quarter. Second quarter petroleum sales included initial sales from the Okwori Property of \$53.6 million. The increase in petroleum sales in the second quarter was offset by costs from Okwori production of \$30.1 million. Taxes were flat in the second quarter due to production from the Okwori Property having a low tax rate and large tax allowances obtained from a previous operator of OPL90. Net income increased in the third quarter compared to the second quarter by \$32.1 million primarily due to an increase in petroleum sales from \$258.2 million in the second quarter to \$387.8 million in third quarter. Third quarter petroleum sales from the Okwori Property were \$106.3 million as compared to \$53.6 million in the second quarter. The increase in petroleum sales in the third quarter was offset by costs from Okwori production of \$59.3 million. Taxes increased in the third quarter compared to the second quarter by \$59.3 million due to the Okwori Property having utilised its tax allowances. Costs in OML123 and OML124 increased by \$31.2 million in the third quarter compared to the second quarter due to increasing royalties and depletion, depreciation and accretion.

Net income by quarter for 2004 was \$11.8 million, \$13.7 million, \$15.8 million and \$21.3 million, respectively. The increase in net income in the second quarter compared to the first quarter of \$1.9 million was due primarily to an increase in petroleum sales from \$104.0 million in the first quarter to \$117.1 million in the second quarter. Increasing petroleum sales were offset by a corresponding increase in taxes of \$6.1 million and increased administration costs, which were not tax deductible. Net income increased in the third quarter compared to the second quarter by \$2.1 million due primarily to an increase in petroleum sales from \$117.1 million in the second quarter to \$146.6 million in the third quarter. Increasing petroleum sales were offset by a corresponding increase in taxes of \$14.0 million. Net income increased in the fourth quarter compared to the third quarter by \$5.5 million due primarily to an increase in revenues from \$146.6 million in the third quarter to \$156.4 million in the fourth quarter, a decrease in taxes of \$21.0 million due mainly to a partial reversal of the reserve addition bonus tax accrual and a \$12.1 million increase in depletion costs.

Net income/(loss) by quarter for 2003 was \$16.2 million, \$1.4 million, \$13.8 million and \$(8.1) million. The decrease in net income in the second quarter compared to the first quarter of \$14.8 million was due largely to an increase in administration costs from \$5.1 million in the first quarter to \$16.7 million in the second quarter. Administration costs are not tax deductible as they are not incurred for Nigerian activities. Net income in the third quarter returned to levels comparable to first quarter net income. \$16 million of tax accruals and a \$10.3 million additional charge to NNPC Profit Oil were taken in the fourth quarter. These tax accruals were comprised of \$8.0 million for the possible loss of a tax offset for a reserve addition bonus earned in 1999 and \$8.0 million for reclassification of studies from capital cost to operating expense in the tax accounts. This reclassification produced a loss of capital investment allowances, thereby increasing the tax charge.

Liquidity and Capital Resources

Overview

The Corporation's principal source of liquidity has been cash generated from operating activities which has been supplemented as necessary by credit facilities to meet increased capital expenditures, primarily for the development of the Okwori Property in OPL90. The Corporation has not experienced seasonal impact on its cash flows. Currently, the Corporation generates all of its cash from operating activities of its Nigerian subsidiaries. Provided applicable solvency and corporate requirements are satisfied, there are no legal or practical restrictions in Nigeria on the ability of the Corporation's Nigerian subsidiaries to transfer funds to the Corporation in the form of cash dividends, loans or advances. In addition, there are no contractual restrictions on such transfers of funds to the Corporation by its Nigerian subsidiaries. After the closing of this offering, APNV will be a wholly owned subsidiary of the Corporation and transfers of funds by APNV to the Corporation in the form of cash dividends, loans or advances will be restricted by the provisions of the credit facility described below. See "Dividends".

The Corporation held total cash and cash equivalents of \$8.5 million as at September 30, 2005.

APNV has a senior secured revolving credit facility with BNP Paribas as Mandated Lead Arranger and Standard Bank as Lead Arranger with a borrowing base of \$300.0 million. This facility expires on December 31, 2008. The borrowing base was initially set at \$100.0 million, and is re-determined semi-annually based on NSAI's evaluation of the Corporation's oil and gas reserves, subject to the approval of the majority lenders. As at November 30, 2005, \$80.0 million was drawn down on the credit facility.

The credit facility bears interest at floating rates linked to LIBOR plus a margin determined in relation to the percentage of utilisation on the first day of the interest period. The credit facility is secured by debentures given by APNV and Addax Petroleum Overseas Ltd., assignment by way of security of the principal contracts including the Crude Oil Supply Agreements, a pledge over the bank accounts and share pledges of APNV's principal subsidiaries. The credit facility is for funding Nigerian capital expenditures.

Addax Petroleum N.V. will declare and pay additional dividends of up to an aggregate of \$120 million prior to the closing of the offering.

Management believes that the Corporation's cash flow generated from operating activities, its cash and cash equivalents, the existing credit facilities and the net proceeds it receives from the offering will be sufficient to fund its foreseeable working capital requirements.

The following table summarizes the principal components of Addax Petroleum's consolidated cash flows for the periods indicated:

	9 Months Ended September 30, 2005	Year Ended December 31,		
		2004	2003	2002
		(\$million)		
Net Cash Inflows (outflows) before movements in working capital				
Cash flow from operations	322.2	171.0	118.6	184.2
Net cash flow used in investing activities	(276.2)	(314.2)	(175.2)	(170.4)
Net cash from (used in) financing activities	(3.5)	35.3	(31.0)	8.0
Net increase in cash and cash equivalents	42.5	(107.9)	(87.6)	21.8
(Increase) decrease in working capital	(37.9)	55.8	100.8	(2.6)
Increase (decrease) in cash and cash equivalents	4.6	(52.1)	13.2	19.2
Cash and cash equivalents at end of year	8.5	3.9	56.0	42.8

Cash Flow from Operations

Cash flow from operations was \$322.2 million for the nine months ended September 30, 2005, compared to \$118.4 million for the same period in 2004, representing an increase of \$203.8 million. The increase was due primarily to the increase in income before income taxes of \$298.7 million, the Okwori Property coming on-stream in 2005, and higher production from OML123/124 in 2005. Additionally, there were increases in non-cash items with the operating activities, specifically an increase of \$86.0 million relating to depreciation and future taxes. This was offset by an increase in current taxes of \$147.8 million.

Cash flow from operations was \$171.0 million in 2004 compared to \$118.6 million in 2003, an increase of \$52.4 million. The increase was primarily due to the increase in income before income taxes and non-controlling interests of \$80.0 million, with a revenue increase of \$106.1 million offset by costs of \$26.1 million. Additionally, there were increases in non-cash items with the operating activities in 2004, specifically an increase of \$15.3 million in depreciation and write-offs. These increases to operating activities were mostly offset by an increase in income tax paid and liftings of Nigerian government entitlement to income tax of \$43.1 million.

Cash flow from operations was \$118.6 million in 2003 compared to \$184.2 million in 2002, a decrease of \$65.6 million. The decrease was due primarily to the increase in current income tax payable to the Nigerian government of \$67.0 million.

Net Cash Flow Used in Investing Activities

Net cash used in investing activities consists principally of the purchase of property, plant and equipment, and intangible assets. Net cash used in investing activities was \$276.2 million for the nine months ended September 30, 2005 compared to \$183.0 million for the same period in 2004, representing an increase of \$93.2 million. This increase is due largely to capital expenditures on the development of the Okwori Property and the Nda extended well test of \$170.2 million in the nine months ended September 30, 2005 and \$80.9 million in the same period in 2004. Property, plant and equipment expenditures on OML123 and OML124 increased in 2005 by \$22.8 million to \$99.2 million in 2005 from \$76.4 million in 2004. Expenditure on intangible assets decreased slightly in 2004 to \$11.4 million from \$14.3 million in 2003.

Net cash used in investing activities was \$314.2 million in 2004, compared to \$175.2 million in 2003, an increase of \$139.0 million. This increase is due to capital expenditures on the development of the Okwori Property and the Nda extended well test of \$165.4 million in 2004. Property, plant and equipment expenditures on OML123 and OML124 decreased to \$135.1 million in 2004 from \$138.2 million in 2003. Expenditures on intangible assets decreased slightly to \$11.4 million in 2004 from \$14.3 million in 2003. Additionally, in 2003 the Corporation purchased the non-controlling interest in the Nigeria Production Sharing Contracts for \$21.0 million (2004 — nil).

Net cash used in investing activities was \$175.2 million in 2003 compared to \$170.4 million in 2002. This increase is primarily due to the Corporation's purchase of the non-controlling interest in the Nigerian Production Sharing Contracts for \$21.0 million in 2003 (2002 — nil). This increase was offset in part by a

decrease in property, plant and equipment and intangible assets of \$16.3 million. This decrease is due to lower capital expenditures on OML123 and OML124 which decreased to \$138.2 million in 2003 from \$161.1 million in 2002.

Net Cash From (Used in) Financing Activities

Net cash used in financing activities was \$3.5 million for the nine months ended September 30, 2005 compared to a cash inflow of \$6.5 million for the corresponding period for 2004. Drawdowns of \$125.0 million were made in the nine months ended September 30, 2005 as compared to \$25.0 million in the same period in 2004. Dividends paid increased to \$35.0 million in the nine months ended September 30, 2005 from \$18.5 million in the same period in 2004. The Corporation repaid debt of \$90.0 million in the nine months ended September 30, 2005 (corresponding period in 2004 — nil) and paid borrowing fees of \$3.5 million in the nine months ended September 30, 2005 (corresponding period in 2004 — nil).

Net cash from financing activities was \$35.3 million in 2004 as compared to net cash used in financing activities of \$31.0 million in 2003. Drawdowns of \$65.0 million were made in 2004 (2003 — nil). Borrowing fees of \$2.7 million were paid in 2004 (2003 — nil). Repayment of debt of \$25.0 million was made in 2003 (2004 — nil).

Net cash used in financing activities was \$31.0 million in 2003 as compared to net cash from financing activities of \$8.0 million in 2002. Drawdowns of \$25.0 million were made in 2002 (2003 — nil). Repayment of debt of \$25.0 million was made in 2003 as compared with \$5.0 million in 2002. Dividends paid in 2003 decreased to \$6.0 million from \$12.0 million in 2002.

Off Balance Sheet Arrangements

The Corporation does not currently have any off balance sheet arrangements.

Contractual Obligations and Commercial Commitments

The table below sets forth information relating to the Corporation's contractual obligations and commercial commitments as at September 30, 2005.

<u>Contractual Obligations and Commercial Commitments</u>	<u>Within One Year</u>	<u>From 1 to 5 years</u>	<u>More than 5 years</u>	<u>Total</u>
		(\$million)		
Long Term Debt	-	100.0	-	100.0
Operating Leases ⁽¹⁾	59.8	231.6	128.6	420.0
Purchase Obligations ⁽²⁾	144.6	-	-	144.6
Other Long Term Obligations ⁽³⁾	69.1	-	-	69.1
Total	<u>273.5</u>	<u>331.6</u>	<u>128.6</u>	<u>733.7</u>

Notes:

- (1) Operating leases are the leases of FPSO's and the TPU.
- (2) Consists principally of the purchase of flowlines and pipelines and wellheads in OPL90 and OPL225, and pipelines related to the replacement FPSO in OML123 and OML124.
- (3) Consists principally of obligations related to two long term rig charters.

Capital Expenditures

The following table sets forth the Corporation's capital expenditures for the periods indicated.

<u>Capital Expenditures</u>	<u>9 Months Ended September 30, 2005</u>	<u>Year Ended December 31</u>		
		<u>2004</u>	<u>2003</u>	<u>2002</u>
		(\$million)

Total	276.1	314.2	154.1	170.4

Budgeted Capital Expenditures

The Corporation has a substantial capital expenditure program for its current properties and new venture opportunities, budgeted to be \$167 million in the fourth quarter of 2005 and \$815 million for 2006. These budgeted capital expenditures will fund a four rig drilling program (three of which are currently contracted), the Nda field development, replacement of the current OML123 FPSO, redevelopment of the Adanga field and TPU refurbishment, development of the Oron field, development and exploration on the Okwok Property, gas gathering and gas lift infrastructure for associated gas and appraisal activity in Iraq, Cameroon and Gabon. Management believes its cash flow generated from operating activities, its cash and cash equivalents and the net proceeds to the Corporation from the offering will be adequate to fund the Corporation's capital expenditure requirements. Under the applicable Nigerian Production Sharing Contracts, the Corporation has historically recovered more than 80 per cent of the drilling and seismic expenditures in the year in which the expenditure is incurred under the production sharing formula. The estimated development cost per barrel added for selected developments is as follows: Nda field development \$9.96 per barrel, Ebughu North East infill \$6.75 per barrel, Ebughu East in fill \$5.38 per barrel. Of the 2006 budget of \$815 million, \$152 million is for sustaining activities and \$663 million is for growth activities.

Capital Expenditures for the Nine Months Ended September 30, 2005

Total capital expenditures for the nine months ended September 30, 2005 were \$276.1 million. For the nine months ended September 30, 2005, total capital expenditures on OML123 and OML124 were \$99.2 million, including drilling costs of \$71.3 million comprised of \$2.8 million for one exploration well and \$68.5 million for 20 appraisal and development wells on OML123. Facilities costs on OML123 and OML124 were \$18.9 million, which included \$10.0 million for the OML123 FPSO replacement, \$4.8 million for redevelopment of the Adanga Platform and \$2.0 million for development of the Oron Platform. OML124 oil facilities expenditure was \$1.5 million. Other capital expenditures on OML123 and OML124 included capitalized studies of \$5.0 million and \$4.0 million of office capital expenditure.

For the nine months ended September 30, 2005, total capital expenditures on OPL90 and OPL225 were \$172.6 million. Capital expenditures on OPL90 included \$8.5 million for the completion of the Nda extended well test and \$71.3 million for development drilling costs on the Okwori Property. The other costs of \$9.0 million are primarily capitalized interest.

Total capital expenditures of \$2.4 million in Gabon for the nine months ended September 30, 2005 primarily related to geological and geophysical studies and the acquisition of seismic data. Total capital expenditures of \$0.6 million in Cameroon for the nine months ended September 30, 2005 related to geological and geophysical studies.

Capital Expenditures for the Year Ended December 31, 2004

Total capital expenditures for 2004 were \$314.2 million. Total capital expenditures on OML123 and OML124 in 2004 were \$135.1 million, including drilling costs of \$77.3 million, which related to the drilling of 19 appraisal and development wells on OML123. Facilities costs on OML123 and OML124 in 2004 were \$48.0 million, which included \$7.8 million for the Ebughu East structure, topsides and oil and gas lines, \$6.9 million for the Ebughu North East structure and topsides, \$5.6 million for the Oron West extended well test platform and flow line, \$9.0 million for the Adanga riser platform, bridge and piping, \$3.5 million for the Oron wellhead facility, \$2.9 million for the temporary production platform hook-up and \$3.7 million on OML124 oil facilities. Other capital expenditures on OML123 and OML124 in 2004 included \$6.2 million for capitalized studies and \$3.6 million for office capital expenditures.

Total capital expenditures for OPL90 and OPL225 in 2004 were \$165.4 million, including \$21.6 million for two exploration wells and \$133.3 million for Okwori development costs, which included the completion of two development wells and the fabrication of flow lines from such wells to the OPL90 FPSO.

Total capital expenditures in Gabon in 2004 were \$10.7 million, most of which relate to the Topaze exploration well drilled in early 2004, at a cost of \$7.0 million. Total capital expenditures of \$0.7 million in Cameroon in 2004 related to studies.

Capital Expenditures for the Year Ended December 31, 2003

Total capital expenditures for 2003 were \$154.1 million. Total capital expenditures on OML123 and OML124 in 2003 were \$138.2 million, including drilling costs of \$76.2 million comprised of \$23.2 million for the drilling of 3 water injection wells on OML123, \$32.6 million for the drilling of 4 development wells on OML123 and \$20.4 million for the drilling of 2 development wells on OML124. Facilities costs on OML123 and OML124 were \$47.4 million, which included \$12.4 million for the Ebughu East structure, topsides and oil and gas lines, \$10.1 million for the Ebughu North East structure and topsides, \$10.0 million for the Oron West extended well test platform and flow line and \$8.0 million for OML 124 oil facilities. Other capital expenditures on OML123 and OML124 included \$12.3 million for capitalized studies and \$1.9 million for office capital expenditures.

Total capital expenditures for OPL90 and OPL225 in 2003 were \$8.1 million relating to pre-development work and studies.

Total capital expenditures for Cameroon in 2003 were \$3.5 million relating to the mobilization and demobilization of a seismic team in Cameroon and studies.

Capital Expenditures for the Year Ended December 31, 2002

Total capital expenditure in 2002 were \$170.4 million. Total capital expenditures on OML123 and OML124 in 2002 were \$161.1 million, including drilling costs of \$118.7 million comprised \$16.7 million for the drilling of 2 exploration wells on OML123, \$66.3 million for the drilling of 16 appraisal and development wells on OML123 and \$34.9 million for the drilling of 7 development wells on OML124. Facilities costs on OML123 and OML124 were \$30.4 million, which included \$12.6 million for two Adanga South flow lines and caissons, \$3.8 million for the Ebughu to TMMP pipeline, \$3.1 million for the Ebughu to Bogi gas flow line and \$3.0 million for the

installation of topsides on Adanga South West. Other capital expenditures on OML123 and OML124 included \$9.1 million for capitalized studies, \$1.0 million for the conversion of OML123 and OML124 from OPLs to OMLs and \$1.9 million for office capital expenditures.

Total capital expenditures for OPL90 and OPL225 in 2002 were \$5.4 million relating to pre-development work and studies.

Total capital expenditures for Cameroon in 2002 were \$3.2 million relating to the mobilization and demobilization of a seismic team into Cameroon and studies.

Transactions with Related Parties

For the nine months ended September 30, 2005, the Corporation sold \$512.3 million of crude oil to ABV. The Corporation also paid \$3.5 million in charges to AOG relating to management services, trademark licence and IT support and \$11.4 million for bunkering oil. See "Interest of AOG in Material Transactions".

In 2004, the Corporation sold \$371.4 million of crude oil to ABV. The Corporation also paid \$5.0 million in charges to AOG relating to management services, trademark licence and IT support and \$10.4 million for bunkering oil. See "Interest of AOG in Material Transactions".

In 2003, the Corporation sold \$386.6 million of crude oil to ABV and paid \$5.8 million in charges to AOG relating to management services, trademark licence and IT support.

In 2002, the Corporation sold \$284.1 million of crude oil to ABV, incurred \$6.2 million in charges to AOG relating to management services, trademark licence and IT support and paid \$0.4 million in interest to AOG.

New Accounting Pronouncements

In an effort to harmonize Canadian GAAP with US GAAP, the Canadian Accounting Standards Board ("AcSB") has issued sections:

- 1530, *Comprehensive Income*;
- 3855, *Financial Instruments — Recognition and Measurement*; and
- 3865, *Hedges*.

Under these new standards, all financial assets should be measured at fair value with the exception of loans, receivables and investments that are intended to be held to maturity and certain equity investments, which should be measured at cost. Similarly, all financial liabilities should be measured at fair value when they are held for trading or they are derivatives.

Gains and losses on financial instruments measured at fair value will be recognized in the income statement in the periods they arise with the exception of gains and losses arising from:

- financial assets held for sale, for which unrealized gains and losses are deferred in other comprehensive income until sold or impaired; and
- certain financial instruments that qualify for hedge accounting.

Sections 3855 and 3865 make use of "other comprehensive income". Other comprehensive income comprises revenues, expenses, gains and losses that are recognized in comprehensive income, but are excluded from net income. Unrealized gains and losses on qualifying hedging instruments, translation of self-sustaining foreign operations, and unrealized gains or losses on financial instruments held for sale will be included in other comprehensive income and reclassified to net income when realized. Comprehensive income and its components will be a required disclosure under the new standard.

These new standards are effective for fiscal years beginning on or after October 1, 2006 and early adoption is permitted. Adoption of these standards as at September 30, 2005 would not have an impact on the Corporation's Consolidated Financial Statements.

The AcSB issued Section 3831, *Non-Monetary Transactions*, which replaces Section 3830 and requires all non-monetary transactions to be measured at fair value unless:

- the transaction lacks commercial substance;
- the transaction is an exchange of a product or property held for sale in the ordinary course of business for a product or property to be sold in the same line of business to facilitate sales to customers other than the parties to the exchange;
- neither the fair value of the assets or services received nor the fair value of the assets or services given up is reliably measurable; or
- the transaction is a non-monetary, non-reciprocal transfer to owners that represents a spin-off or other form of restructuring or liquidation.

The new requirements apply to non-monetary transactions initiated in periods beginning on or after January 1, 2006. Earlier adoption is permitted as of the beginning of a period beginning on or after July 1, 2005. We do not expect the adoption of this section will have any material impact on our results of operations or financial position.

Critical Accounting Estimates

In the preparation of the Corporation's financial statements, management is required to use judgements, assumptions and estimates in the application of generally accepted accounting policies which has an impact on the financial results of the Corporation. These estimates and assumptions are based on the best available information at the time, but may change due to new events and additional information giving rise to changes in the estimates over time. Note 1 of the Corporation's consolidated financial statements for the year ended December 31, 2004 explains the significant financial accounting policies used by the Corporation. The following is a discussion of the critical accounting policies which use significant assumptions, and estimates in determining the financial results of the Corporation.

Estimated Oil Reserves

Reserve estimates have a significant impact on earnings due to its impact on depreciation and depletion rates and asset impairment. The Corporation's reservoir engineers perform an internal evaluation on a bi-annual basis of all of its crude oil reserves. The estimation of reserves are based on engineering data, projected future prices, expected future rates of production and the timing of future capital expenditures, all of which are subject to numerous uncertainties and interpretations. The Corporation expects over time that its reserves will change, upwards or downwards, as a result of the results of future drilling, testing, production levels, changes in future price estimates, and economics of recovery based on cash flow forecasts. A change in the reserves estimate may result in a higher or lower depletion charge to the income statement and effect the future tax charge. A lower reserve estimate could result in a write-down of an oil property under the ceiling test.

Independent petroleum engineering consultants evaluate 100 per cent of the oil properties on a semi-annual basis, and a reconciliation is performed between the Corporation's reserves estimates and that of the independent consultants.

Asset Impairments

Annually, an impairment test is performed to ensure that unamortized capitalized costs do not exceed their fair value. An impairment loss will be recognized in the income statement when the carrying value of a cost centre exceeds the estimated undiscounted future cash flows. The future cash flows used in the impairment test include assumptions on oil prices, production, and operating costs. Changes to any of these assumptions such as

a decrease to future oil prices, a decrease in reserves, or an increase in operating costs could result in the impairment of an asset's carrying value.

Full Cost Accounting

The Corporation follows the full cost method for accounting for oil and gas properties as described by the Canadian Institute of Chartered Accountants. Accordingly, costs incurred in the exploration and development of oil and gas properties are capitalized on a country by country cost pool basis. Capitalized costs include land acquisition, geological and geophysical activities, exploration and development wells, both successful and unsuccessful, related plant and equipment, directly attributable interest costs, overhead charges directly related to exploration and development and the estimated discounted cost of the asset retirement obligations.

The capitalized costs are depreciated, depleted and amortized on a unit of production method based on proved reserves for each producing cost pool. See "Petroleum Reserves and Operational Matters". Costs relating to unproved properties and certain development projects are not subject to depreciation, depletion and amortization until production commences. The costs relating to unproved properties are reviewed periodically and any impairment is transferred to the costs being depleted, or if it is ascertained there are no reserves relating to the unproved properties, the impairment is charged directly to the income statement.

Asset Retirement Obligation

The Corporation currently records the asset retirement obligations of fixed assets at fair value when they are incurred, discounted to the Corporation's credit-adjusted risk free interest rate. Retirement costs equal to the fair value are capitalized as part of the related capital assets and are amortized to the income statement over the estimated life of the asset. Estimates of the fair value of the retirement obligations can change over time due to legislation, current costs, technology, interest rates and field life, which can effect the rate of amortization. Differences between the estimated and actual costs to settle the retirement obligation could result in gains or losses in the settlement of the obligation.

Income Taxes

The Corporation follows the liability method of accounting for income taxes under which the future tax consequences are recognized for temporary differences between the tax bases of assets and liabilities and their carrying value for financial reporting purposes. Future income tax assets and liabilities are measured using enacted or substantively enacted income tax rates expected to apply in the years in which those temporary differences are expected to reverse. The effect of a change in income tax rates on future income tax assets and liabilities is recognized in the period in which the change occurs.

The Corporation earns capital investment allowances on capital expenditures in Nigeria. The future income tax benefits arising from capital investment allowances are recorded when the capital investment allowances are earned and reduce the carrying amount of property, plant and equipment. Capital investment allowances are charged to future income tax in the statement of operations as the tax benefits are realized.

Financial Controls and Risk Management

The Corporation's activities expose it to a variety of market risks, including the effects of changes in commodity prices, foreign currency exchange rates and interest rates. The Corporation uses derivative financial instruments such as options on commodities, foreign exchange contracts and interest rate swaps to manage certain exposures.

The Board of Directors provides principles for overall risk management, as well as policies covering specific areas, such as commodity price risk, foreign exchange risk, interest rate risk and credit risk. These principles include guidelines on the use of derivative financial instruments.

(a) **Foreign exchange risk**

The Corporation operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to Swiss francs (or "CHF") and Naira (Nigerian currency) against the US dollar. The Corporation uses both local currency borrowing facilities and forward contracts to hedge their exposure to foreign currency risk. The forward currency contract must be in the same currency as the hedged item.

In December 2004 and January 2005, the Corporation entered into foreign exchange forward contracts to purchase CHF 18,000,000 for \$15,578,244 for the year ending December 31, 2005. As at September 30, 2005, the Corporation had bought CHF 13,500,000 for \$11,651,412. These forward contracts fix the exchange rate used to convert a portion of the Corporation's Swiss franc denominated general and administrative expenses to US dollars.

(b) **Commodity price risk**

It is the intention of the Corporation to cover commodity-pricing exposure in order to safeguard a minimum cash income. The option contracts run for 12 months or less and are consistent with the related production estimate. At September 30, 2005, the Corporation had the following crude oil derivative contract outstanding:

	<u>Put Option</u>
Maturity	March 2006
Volume	10 million barrels
Average price	\$21.00 per barrel

(c) **Interest rate risk**

The Corporation's exposure to market risk for changes in interest rates relates primarily to the Corporation's long-term debt obligations.

To manage this risk in a cost efficient manner, the Corporation enters into interest rate swaps, in which the Corporation agrees to exchange, at specified intervals, the difference between fixed and variable interest amounts calculated by reference to an agreed-upon notional principal amount. These swaps are designated to hedge the cash outflows related to interest obligations.

In 2002, in anticipation of receiving a \$50 million loan, APNV entered into two interest rate swap contracts to hedge against possible adverse interest rate fluctuations. These contracts resulted in interest expense at an average fixed rate of 4.4 per cent in exchange for a three-month variable LIBOR rate on two notional principal amounts of \$25 million expiring in August 2004 and August 2005, respectively. APNV drew down \$25 million on the \$50 million loan facility in February 2002 and repaid this amount in May 2003. One of these two swap contracts expired upon repayment of the \$25 million while the other one was determined to be a hedge from the date of the first drawdown on the \$300 million loan facility in November 2004 until its termination date in August 2005.

(d) **Credit risk**

Concentrations of credit risk with respect to trade receivables are limited due to the high portion of related party debtors. Historical experience has indicated no problem in collecting accounts receivable from related party companies. Due to these factors, management believes that there is no significant credit risk inherent in the Corporation's trade receivables, beyond amounts provided for specific collection losses.

The Corporation has not experienced any material credit losses on the collection of receivables. Of the Corporation's significant individual accounts receivable at September 30, 2005, approximately 80 per cent was due from one related party customer (December 2004 — 59 per cent; December 31, 2003 — 81 per cent).

(e) Liquidity risk

The following table represents the estimated fair values of purchased derivative financial instruments considered as non-effective hedges recognized in the consolidated balance sheet as at December 31:

	<u>September 30,</u> 2005	<u>December 31,</u> 2004 2003	
	(\$thousand)		
Currency forwards	519	-	-
Oil options	-	-	890
Interest rate swaps	-	(334)	(1,321)

The estimated fair values of purchased derivative financial instruments that are effective hedges as at December 31 are as follows:

	<u>September 30,</u> 2005	<u>December 31,</u> 2004 2003	
	(\$thousand)		
Currency forwards	-	(66)	955

The fair values of other financial instruments including cash and cash equivalents, accounts receivable, accounts payable and income tax payable approximate their carrying values.

CAPITALIZATION

The following table sets forth the consolidated capitalization of Addax Petroleum Corporation as at November 30, 2005, and as at November 30, 2005 after giving effect to the Pre-IPO Transactions and after giving effect to the Pre-IPO Transactions and the Offering.

	Authorized	Outstanding as at November 30, 2005	Outstanding as at November 30, 2005, After Giving Effect to the Pre-IPO Transactions ⁽³⁾	Outstanding as at November 30, 2005, After Giving Effect to the Pre-IPO Transactions and the Offering ^(3,4,5)
Debt⁽¹⁾				
Short term debt	-	-	\$ -	\$ -
Long term debt	-	-	<u>\$80 million</u>	<u>\$80 million</u>
Total debt	-	-	\$80 million	\$80 million
Share Capital⁽²⁾				
Common Shares	Unlimited	CDN\$100 (100 shares)	CDN\$300,206,100 (117,000,100 shares)	CDN\$684,731,100 (138,000,100 shares)
Preferred Shares	Unlimited	CDN\$ - (nil shares)	CDN\$ - (nil shares)	CDN\$ - (nil shares)

Notes:

- (1) Pursuant to an Amended and Restated Senior Secured Reducing Revolving Credit Facility Agreement dated June 14, 2005 between Addax Petroleum N.V. and a syndicate of banks lead by BNP Paribas S.A., Addax Petroleum N.V. has a \$300 million senior secured reducing revolving credit facility available until December 31, 2008. The borrowing base is determined semi-annually based upon an independent engineer's evaluation of the Corporation's oil and gas reserves, subject to the approval of the majority lenders. The facility borrowing base was set at \$300 million in October 2005. The loan bears interest at floating rates linked to LIBOR plus a margin determined in relation to the percentage of utilization on the first day of the interest period. The facility is secured by debentures given by Addax Petroleum N.V. and Addax Petroleum Overseas Ltd., assignment by way of security of the principal contracts including the offtake contracts, a pledge over the bank accounts and share pledges of Addax Petroleum N.V.'s principal subsidiaries. The loan is to be used for funding Nigerian capital expenditure.
- (2) Addax Petroleum Corporation's authorized capital consists of an unlimited number of Common Shares and an unlimited number of Preferred Shares, issuable in series. No series of Preferred Shares will be authorized at the closing of this offering.
- (3) Concurrently with the closing of the offering, Addax Petroleum Corporation will acquire all of the issued and outstanding shares in the capital of Addax Petroleum N.V. See "Addax Petroleum — Pre-IPO Transactions" and "Interest of AOG in Material Transactions — Share Transfer Agreement." Value of Common Shares has been translated into Canadian dollars from US dollars at an exchange rate of CDN\$1.1465/US\$.
- (4) Prior to the closing of this offering, Addax Petroleum N.V. will declare and pay additional dividends of up to an aggregate of \$120 million. The dividend amount will be equal to management's estimate of the Corporation's CFFO net of capital expenditures from October 1, 2005 to the closing of this offering, while maintaining long-term debt at the November 30, 2005 level of approximately \$80 million.
- (5) The net proceeds to the Corporation from the offering of Offered Shares are estimated to be CDN\$384,525,000 based on the issuance of 21,000,000 Offered Shares for aggregate gross proceeds of CDN\$409,500,000 less the Underwriters' fees of CDN\$20,475,000 and expenses of the offering estimated to be CDN\$4.5 million.

DIVIDENDS

Addax Petroleum Corporation intends to establish a policy of declaring quarterly cash dividends on the Common Shares. The payment and the amount of dividends declared in any fiscal quarter will depend on Addax Petroleum Corporation's earnings, financial requirements and other conditions existing which Addax Petroleum Corporation's Board of Directors may consider relevant at such future time, including applicable restrictions arising under the Credit Facility on the ability of APNV to pay dividends or other distributions to the Corporation. Subject to the factors described above, Addax Petroleum Corporation intends to pay its first quarterly dividend for the quarter ending June 30, 2006.

Under the agreement governing the Credit Facility, APNV is not permitted to pay a dividend or other distribution to the Corporation unless APNV is in compliance with a stipulated net worth test and no default exists under that agreement or would result from payment of the dividend or distribution. In addition, the agreement governing the Credit Facility limits the dividends or distributions that can be paid by APNV in any fiscal year to an amount which is equal to the lesser of (i) 33 per cent of APNV's net profit (as defined in that

agreement) for its preceding fiscal year plus amounts which APNV could have paid out in dividends in previous years after 2003 but which were instead added to APNV's retained earnings, and (ii) 66 per cent of APNV's net profit for its preceding fiscal year. However, the lenders under the Credit Facility have provided waivers permitting APNV to pay up to \$120 million in dividends prior to closing of this offering (see "Addax Petroleum — Pre-IPO Transactions") and permitting APNV to pay dividends or other distributions during fiscal 2006 equal to 50 per cent of APNV's net profit for the 2005 fiscal year. See "Management's Discussion and Analysis of Financial Condition and Results of Operations".

Since January 1, 2002, APNV has made cash dividend payments totalling \$82 million. These included a payment of an aggregate amount of \$18 million in 2002, none in 2003, \$29 million in 2004 and \$35 million in the first nine months of 2005. Prior to the closing of the offering, Addax Petroleum N.V. will declare and pay additional dividends of up to an aggregate of \$120 million. The dividend amount will be equal to management's estimate of the Corporation's CFFO net of capital expenditures from October 1, 2005 to the closing of this offering, while maintaining long term debt at the November 30, 2005 level of approximately \$80 million. Investors who purchase the Common Shares will not be entitled to receive any part of these dividends. APNV has not declared or paid any other dividends since January 1, 2002 and does not intend to declare any additional dividends in respect of the financial results for 2005. The amount of dividends paid historically by APNV as a private company is not indicative of the dividends that Addax Petroleum Corporation will pay in the future. Addax Petroleum Corporation can provide no assurances that it will declare and pay any dividends in the future.

USE OF PROCEEDS

The net proceeds to the Corporation from the sale of the Offered Shares are estimated to be CDN\$384,525,000 (CDN\$423,427,500 if the Over-Allotment Option is exercised in full) after deducting the fees payable to the Underwriters and the estimated expenses of the offering. Of the net proceeds, CDN\$328,950,000 will be used to fund the Corporation's 2006 capital expenditure programs and for working capital purposes and CDN\$55,575,000 will be used to fund the purchase of the issued and outstanding shares of APNV. Pending application of funds for capital expenditures and working capital purposes, a portion of such net proceeds will be used to temporarily repay amounts outstanding under the Credit Facility. See "Addax Petroleum — Pre-IPO Transactions", "Addax Petroleum — Capital Expenditure Program" and "Interest of AOG in Material Transactions — Share Transfer Agreement".

DIRECTORS AND OFFICERS

The following table sets out the names and municipalities of residence of each of the current directors and officers of Addax Petroleum Corporation and their current positions and offices with Addax Petroleum Corporation and their principal occupations and positions held during the last five years.

<u>Name and Municipality of Residence</u>	<u>Age</u>	<u>Position with the Corporation</u>	<u>Director or Officer Since</u>	<u>Principal Occupation and Principal Positions Held During the Last Five Years</u>
Peter Dey ⁽³⁾⁽⁵⁾ <i>Toronto, Ontario</i>	64	Director, Chairman of the Board of Directors and Chairman of the Corporate Governance, Nominating and Compensation Committee	2005	Chairman, Paradigm Capital Inc. Former Partner, Osler, Hoskin & Harcourt LLP. Director of Workbrain Corporation and former Chairman of Morgan Stanley Canada Limited.
Jean Claude Gandur <i>London, United Kingdom</i>	56	Chief Executive, Officer and Director	2002 ⁽¹⁾	Officer of APNV. Chief Executive Officer and Chairman of the Advisory Board of The Addax and Oryx Group Ltd. Non-Executive Chairman of AXMIN Inc.

<u>Name and Municipality of Residence</u>	<u>Age</u>	<u>Position with the Corporation</u>	<u>Director or Officer Since</u>	<u>Principal Occupation and Principal Positions Held During the Last Five Years</u>
Brian Anderson ⁽³⁾⁽⁴⁾ <i>Kowloon, Hong Kong</i>	62	Director and Chairman of the Technical and Reserves Committee	2005	Chairman and Managing Director of Anderson Energy (Hong Kong) Limited.
James Davie ⁽³⁾⁽⁵⁾ <i>Toronto, Ontario</i>	62	Director	2005	Director of Brompton Funds, Profico Energy Management Inc., Range Royalty Management Ltd., Navigo Energy Inc. and Taylor Gas Management Ltd. Prior to July 2002, Managing Director of RBC Dominion Securities Inc.
Stephen Paul de Heinrich ⁽³⁾⁽⁵⁾ <i>Dully, Switzerland</i>	62	Director	2005	Independent Consultant Associate with Beldi & Cie S.A. Vice Chairman of Advisory Board of The Addax and Oryx Group, Ltd.
Gerry Macey ⁽⁴⁾⁽⁵⁾ <i>Calgary, Alberta</i>	59	Director	2005	Director of Verenex Energy Inc. and PanOrient Energy Corp. Prior thereto, from 2002 to March 2004, Executive Vice President and President, International New Ventures Exploration, Division of EnCana Corporation and from 1999 to 2002, Executive Vice President, Exploration, of PanCanadian Petroleum Corporation.
Afolabi Oladele ⁽⁴⁾ <i>Mississauga, Ontario</i>	54	Director	2005	Vice President, Oil and Gas, Capital Alliance Nigeria. Chairman of Subsurface Assets Management Co. and Formwork Ltd. Director of Freezone Fabrication International Oil & Gas Facilities Fabrication Co., Dorman Long Engineering Co., Sudelletra Nigeria Ltd. and AOG.
Wesley Twiss ⁽³⁾⁽⁴⁾ <i>Calgary, Alberta</i>	60	Director and Chairman of the Audit Committee	2005	Director and Audit Committee Chair of the Canadian Oil Sands Trust, Hydrogenics Corporation, Enbridge Income Fund, Keyera Facilities Income Fund and EPCOR.
James Pearce <i>Lagos, Nigeria</i>	56	Chief Operating Officer, Managing Director of Nigerian Operations	2005	Officer of APNV. General Manager of Deep Water Operations for Chevron Nigeria Ltd., Managing Director of Chevron Oil Congo.

<u>Name and Municipality of Residence</u>	<u>Age</u>	<u>Position with the Corporation</u>	<u>Director or Officer Since</u>	<u>Principal Occupation and Principal Positions Held During the Last Five Years</u>
Michael Ebsary <i>Geneva, Switzerland</i>	44	Chief Financial Officer	1999	Officer of APNV. Director of AXMIN Inc. and Carpathian Gold Inc.
David Codd <i>Geneva, Switzerland</i>	52	Chief Legal Officer and Corporate Secretary	2005	Officer of APNV. Prior thereto, Chairman of Edco Oil & Gas Ltd. and Managing Director, Texaco Limited

Notes:

- (1) Mr. Gandur has been an officer of APNV since 2002 and became a director and officer of Addax Petroleum Corporation in 2005.
- (2) Mr. Ebsary has been an officer of APNV since 1999 and became an officer of Addax Petroleum Corporation in 2005.
- (3) Member of the Audit Committee.
- (4) Member of the Technical and Reserves Committee.
- (5) Member of the Corporate Governance, Nominating and Compensation Committee.

The term of office of the directors of Addax Petroleum Corporation will expire at the next annual meeting of the shareholders to be held in spring 2006.

The officers and directors of Addax Petroleum Corporation, as a group, do not beneficially own, directly or indirectly, any Common Shares. At the closing of this offering, AOG will direct that up to 9.6 million Common Shares (representing up to eight per cent of AOG's current shareholdings) be issued to current and former directors, officers and employees of Addax Petroleum in recognition of their contribution to the development of the Corporation's business.

The directors and officers of Addax Petroleum Corporation successfully combine entrepreneurial and management skills with extensive financial and international oil industry experience, particularly in the Corporation's strategic region of Africa. The following are the biographies of the directors and senior officers of Addax Petroleum Corporation.

Peter Dey, Chairman

Mr. Dey is the Chairman of Addax Petroleum Corporation. Mr. Dey is also the Chairman of Paradigm Capital Inc. and a former partner of Osler, Hoskin & Harcourt LLP, a law firm specializing in corporate and securities law. From 1994 to 2001, he was Chairman of Morgan Stanley Canada Limited where he was responsible for the overall strategic direction of Morgan Stanley in Canada. Mr. Dey previously chaired The Toronto Stock Exchange Committee on Corporate Governance in Canada which released a report entitled "Where Were the Directors?" in December 1994. From 1983 to 1985, Mr. Dey was the Chairman of the Ontario Securities Commission. Mr. Dey is the chairman of the Private Sector Advisory Group of the Global Corporate Governance Forum established by the World Bank and the OECD. Mr. Dey is the vice-chairman of the Boardroom Advisory Panel established by the OECD. Mr. Dey has a Bachelor of Science from Queen's University, a Bachelor of Laws degree from Dalhousie University and a Master of Laws degree from Harvard University. Mr. Dey is also a director of Workbrain Corporation.

Jean Claude Gandur, Chief Executive Officer and Director

Mr. Gandur is the Chief Executive Officer and a Director of Addax Petroleum Corporation. Mr. Gandur has worked with major commodity traders including Philipp Brothers from 1976 to 1983, where he was Manager of the African/Latin American division; Sigmoid Resources N.V. from 1984 to 1986, where he was the Managing Director; and Kaines SA from 1986 to 1988, where he was the Managing Director. For ten years Mr. Gandur was honorary consul for the Republic of Congo in Geneva. Mr. Gandur was also awarded a diplomatic passport by Senegal. In addition, he has received the decorations of Grand Officer of the Lion Order of Senegal and Commander of the National Order of Benin. Mr. Gandur is one of the founders of AOG, of which he is Chief Executive Officer and Chairman of the Advisory Board. Mr. Gandur is also the Non-Executive Chairman of AXMIN Inc. Mr. Gandur is a Swiss citizen and studied law at the University of Lausanne, Switzerland.

Brian Anderson, Director

Mr. Anderson is a Director of Addax Petroleum Corporation. Before retiring in 2000, Mr Anderson had a 34-year professional career, largely in the Royal Dutch/Shell Group of Companies. Mr. Anderson was appointed Managing Director of the Shell Petroleum Development Company and Chairman of Shell Nigeria in January 1994. His last assignment before retirement was three years based in Beijing as Chairman of the Shell Companies in North East Asia, principally involved in China and Hong Kong, but he also had overall responsibility for Shell's interests in Korea and Taiwan. Mr. Anderson is currently Chairman and Managing Director of Anderson Energy (Hong Kong) Limited, a consulting company which he set up in 2000 to specialize in assisting companies mostly in Africa and China in the energy sector. Mr. Anderson was born in Nigeria and is a citizen of the United Kingdom and studied Metaliferous Mining Engineering at Cambourne in the United Kingdom followed by an MSc in Petroleum Reservoir Engineering at London University.

Mr. Anderson, who was formerly Managing Director of Shell Petroleum Development Company of Nigeria, is a defendant, along with companies in the Royal Dutch Shell group of companies, named in various civil suits filed in the United States starting in the mid-1990s under the Alien Tort Claims Act in the United States District Court for the Southern District of New York. The actions relate to the alleged role of Shell and Mr. Anderson in human rights abuses and executions of Ken Saro-Wiwa and other Nigerian individuals by the Nigerian government during a period of civil unrest in Nigeria. Mr. Anderson believes these claims to be wholly without merit and is fully defending himself. This litigation does not involve or relate to the Corporation.

James Davie, Director

Mr. Davie is a Director of Addax Petroleum Corporation. Mr. Davie has over 29 years of investment banking experience with RBC Dominion Securities Inc. before retiring in 2002. Mr. Davie held a number of senior positions at RBC Dominion Securities Inc. including Managing Director of Investment Banking and Head of Equity Capital Markets from 1987 to 1999. Mr. Davie has a Bachelor of Commerce degree from the University of Toronto and a Master of Business Administration from Queen's University. Mr. Davie is also a director of Profico Energy Management Ltd., Range Royalty Management Ltd., Navigo Energy Inc., Taylor Gas Management Ltd. and the Brompton Group of Funds.

Stephen Paul de Heinrich, Director

Mr. de Heinrich is a Director of Addax Petroleum Corporation. He has more than 30 years experience in trading and investment in Africa. He has been instrumental in organizing counter trading export pre-financing and syndicated financial transactions in several African countries. Mr. de Heinrich is now an independent consultant as well as an associate in Beldi & Cie S.A., a Geneva based corporate finance house. He was a non-executive director of AOG from 1988 to 1991, and since then has been the Vice Chairman of its supervisory board. He has been chairman and a director of SAMAX Resources Limited and Carpathian Gold Limited, among other companies. Mr. de Heinrich is a citizen of both Canada and Hungary and has a degree in economics from McMaster University, Hamilton, Canada.

Gerry Macey, Director

Mr. Macey is a Director of Addax Petroleum Corporation. Mr. Macey has over 31 years of oil and gas industry experience. In particular, from 2002 to March 2004, he served as Executive Vice President and President, International New Ventures Exploration Division, of EnCana Corporation, and from 1999 to 2002, he served as Executive Vice President, Exploration, of PanCanadian Petroleum Corporation. Mr. Macey holds a Bachelor of Science degree in geotechnical science from Loyola College in Montreal and a Master of Science degree in geology from Ottawa Carleton University. Mr. Macey is also a director of Verenex Energy Inc. and PanOrient Energy Corp.

Afolabi Oladele, Director

Mr. Oladele is a Director of Addax Petroleum Corporation. Mr. Oladele has over 25 years experience in the oil and gas industry. He worked from 1977 to 1988 for NNPC in the marketing department and from 1988 to 1999 for National Petroleum Investment Management Services (NAPIMS) latterly as Group Executive Director, Refining and Petrochemical. Since 1999, he has been Vice President, Oil & Gas for Capital Alliance Nigeria. Mr. Oladele is also Chairman, Subsurface Assets Management Co, Chairman, Formwork Ltd, Director, Freezone Fabrication International Oil & Gas Facilities Fabrication Co, Director, Dorman Long Engineering Co, Director, Sudelletra Nigeria Ltd, and Director, AOG. Mr. Oladele is a citizen of Nigeria and studied

Chemical Engineering at the University of Ife followed by Petroleum Economics at the French Petroleum Institute (IFP) in Paris and a post Graduate Diploma in Energy Modelling and Large Scale Planning Systems at the University of Southern California. Mr. Oladele also has a Certificate in Applied International Management IFL from Sigtuna, Sweden.

Wesley Twiss, Director

Mr. Twiss is a Director of Addax Petroleum Corporation and Audit Committee Chair. Mr. Twiss is a corporate director with 35 years of energy industry experience, including 13 years as the senior financial officer of two major Canadian companies. He was Executive Vice President and Chief Financial Officer of PanCanadian Energy Corporation from October 2000 until April 2002 and was Executive Vice President and Chief Financial Officer of Petro-Canada from 1998 through 2000. In those roles, Mr. Twiss was responsible for directing all aspects of corporate financial affairs, as well as strategic management and corporate development. He is a director of Canadian Oil Sands Trust, Keyera Facilities Income Fund, Enbridge Income Fund, Hydrogenics Corporation and EPCOR. Mr. Twiss holds a Bachelor of Applied Science in Chemical Engineering from the University of Toronto and a Master of Business Administration from the University of Western Ontario.

James Pearce, Chief Operating Officer and Managing Director of Nigerian Operations

Mr. Pearce is the Chief Operating Officer of Addax Petroleum Corporation and Managing Director for Addax Petroleum Development (Nigeria) Limited. Mr. Pearce is responsible for all of Addax Petroleum's upstream activities in Nigeria including new ventures, exploration, new fields development and operations. Mr. Pearce joined Addax Petroleum in May, 2005 after 30 years with various Chevron subsidiaries. He has held many positions with Chevron including Chief Engineer in Sumatra Indonesia, Manager, Petroleum Engineering in Lagos, Nigeria, General Manager, Asset Development in Luanda, Angola, Managing Director in the Republic of Congo, and most recently General Manager, Deepwater in Lagos, Nigeria. In his most recent assignment with Chevron he was responsible for all deep-water operations in Nigeria including the multi-billion dollar development of the giant Agbami field.

Mr. Pearce holds a PhD in Mechanical Engineering from the California Institute of Technology and has received two US Patents for innovative drilling platform concepts for arctic operations. Mr. Pearce is a Member of the Society of Petroleum Engineers and was past Chairman of the Lagos Chapter. He has published in both international and American journals and has made numerous technical presentations at major conferences.

Michael Ebsary, Chief Financial Officer

Mr. Ebsary is the Chief Financial Officer of Addax Petroleum Corporation. Mr. Ebsary worked at the Bank of Nova Scotia from 1986 to 1987 and the Bank of Montreal from 1987 to 1989, prior to joining the international upstream oil business with Occidental in London in 1989. Following the acquisition of Occidental's U.K. assets by Elf, Mr. Ebsary was appointed Treasurer of Elf Petroleum UK in 1991. In 1994, Mr. Ebsary was transferred to Elf's head office in Paris to the role of Senior Manager, Project Finance, during which time his responsibilities included major project financings in emerging markets, particularly in Nigeria, Chad and Cameroon. Mr. Ebsary joined the Corporation in 1998 and became Chief Financial Officer in 1999. Mr. Ebsary is a citizen of both Canada and the United Kingdom and studied mathematics and statistics, followed by an MBA in finance and accounting, at Queen's University at Kingston, Canada.

David Codd, Chief Legal Officer and Corporate Secretary

Mr. Codd is the Chief Legal Officer and Corporate Secretary of Addax Petroleum Corporation. Mr. Codd has over 25 years experience in the international oil industry. After qualifying with a major UK law firm, Mr. Codd worked from 1980 to 1984 for Burmah Oil. In 1984 he joined Britoil Plc as Senior Legal Adviser. Following two years with ConocoPhillips in the UK, in 1990 he was appointed General Counsel to Texaco's integrated operations in the UK. From 1999 to 2001 Mr. Codd was Managing Director of Texaco in the UK, being Texaco's senior corporate representative in the UK with business responsibility for Texaco's regional upstream Business Development. Following Texaco's merger with Chevron, Mr. Codd was Chairman of a start up company engaged in project development work in the Middle East until he joined the Corporation in February 2005. Mr. Codd is a member of Council of the Energy Institute in the UK and a Trustee of the Energy, Petroleum, Mineral and Natural Resources Education Trust. Mr. Codd is a citizen of the United Kingdom and is a solicitor with an MA (Jurisprudence) and a BCL both from Oxford University.

MANAGEMENT

The following are the biographies of the senior management of Addax Petroleum:

Ian Leslie Blair

Mr. Blair is the Managing Director, Nigeria New Ventures at Addax Petroleum. Mr. Blair has 30 years experience in finance and has worked for such companies as Enterprise Oil and British Gas E&P in Vietnam and, immediately prior to joining Addax Petroleum in 1998, Hardy E&P in India. In 1974, Mr. Blair obtained an M.A. in accountancy and economics from Aberdeen University in Scotland and is a Fellow of the UK Association of Chartered Certified Accountants.

Jacobus Blommerde

Mr. Blommerde joined Addax Petroleum as a Senior Production Technologist in February 2000. In January 2001, Mr. Blommerde was promoted to Manager of Production Technologists. Mr. Blommerde has over 32 years of experience in the oil and gas industry, primarily with Shell. In 1972, Mr. Blommerde obtained an M.Sc. in petroleum engineering from Delft University of Technology in the Netherlands.

Robert Bulstra

Mr. Bulstra has worked with Addax Petroleum since April 2004 as the Manager, Corporate Gas. Mr. Bulstra has over 27 years of experience in exploration and production, of which 19 years was overseas. During that time, he has worked primarily for Shell. Mr. Bulstra holds an M.Sc. in petroleum engineering from Delft University of Technology in the Netherlands.

Joop Cornelissen

Mr. Cornelissen joined Addax Petroleum in October 2005. Mr. Cornelissen has over 30 years experience in the petroleum industry and has worked overseas for companies such as Shell, Wintershall Libya, Al Furat Petroleum Company and ABB - Lummus Global. Mr. Cornelissen obtained an M.Sc. in chemical engineering from the University of Amsterdam in the Netherlands.

Douglas Cowieson

Mr. Cowieson joined Addax Petroleum as Finance Manager in October 1999. Mr. Cowieson has over 23 years of finance experience in the oil and gas industry and has worked for such companies as BHP Petroleum, Sun Exploration & Production Company and Total Oil Marine. In 1975, Mr. Cowieson obtained a B.A. in accounting from Middlesex Polytechnic University in London, United Kingdom.

Pradeep Kabra

Mr. Kabra joined Addax Petroleum in May 2002 as a New Ventures Project Manager. Mr. Kabra has over 17 years of experience in the oil and gas industry, with companies such as Lundin Oil AB, IPC Ltd. and Dublin International Petroleum Limited. Mr. Kabra obtained a Bachelor of Law's degree from Delhi University in Delhi, India. He also has qualified as a chartered accountant with the Institute of Chartered Accountants of India.

Yannis Korakakis

Mr. Korakakis joined Addax Petroleum and is General Manager Assets of Nigerian Operations based in Lagos. Mr. Korakakis has over 17 years of experience in the petroleum industry, including 3 years of academic experience. Mr. Korakakis has worked in Nigeria, the United Kingdom and the Netherlands, primarily with Shell. Mr. Korakakis holds an M.Sc. in petroleum engineering from The Mining University Leoben in Austria.

Giel Krijger

Mr. Krijger is Corporate Head of Reservoir Engineering and joined Addax Petroleum in October 1999. Mr. Krijger has over 29 years experience in exploration and production, including 21 years of experience overseas primarily with Shell. Mr. Krijger holds an M.Sc. in aeronautical engineering from Delft University of Technology in the Netherlands.

George Maxwell

Mr. Maxwell joined Addax Petroleum in January 2005 as General Manager Banners Services for the Nigerian Operations. Mr. Maxwell has over 20 years of experience in the petroleum industry having held senior positions in Europe, the United States and the Far East with Texaco and ABB Vetco Gray. Mr. Maxwell is qualified in business studies and accounting.

Philippe Probst

Mr. Probst joined Addax Petroleum in 2000 as Manager, New Ventures. Mr. Probst has over 25 years of experience in the management, planning and economics of petroleum industry projects, primarily with Shell. Mr. Probst holds a Ph.D in geology from the Geologic Institute of the University of Bern in Switzerland.

Patrick Spollen

Mr. Spollen joined Addax Petroleum in November 2004 and is commercial manager. Mr. Spollen has 24 years of experience in the petroleum and finance industries and has worked for various organizations including ERC Energy Resource Consultants, CIBC World Markets and the Deutsche Bank in London. Mr. Spollen holds an M.Sc. in petroleum engineering from Imperial College London and an MBA from the London Business School.

Paul Van Maren

Mr. Van Maren is a senior production geologist with Addax Petroleum and was recently promoted to the position of Corporate Head of Geology and Geophysics. Mr. Van Maren has 24 years experience in the oil and gas industry, which includes 18 years experience with Shell. Mr. Van Maren obtained an M.Sc. in geology from the Rijksuniversiteit Leiden in the Netherlands.

EXECUTIVE COMPENSATION

Compensation of Executive Officers

The following table presents, for the most recently completed financial year of the Corporation, the remuneration of the executive officers in place during 2005.

2005 Summary Compensation Table

<u>Name and Principal Position</u>	Annual Compensation ⁽¹⁾⁽⁹⁾		
	Salary (CHF)	Bonus (CHF)	Other Annual Compensation (CHF)
Jean Claude Gandur ⁽²⁾⁽³⁾ <i>Chief Executive Officer</i>	148,752	150,000	22,313
Michael Ebsary ⁽²⁾⁽³⁾ <i>Chief Financial Officer</i>	436,000	585,000	65,400
Evert Jan Mulder ⁽²⁾⁽³⁾⁽⁵⁾⁽⁶⁾ <i>Chief Operating Officer</i>	470,005	805,000	94,500
James Pearce ⁽²⁾⁽³⁾⁽⁴⁾⁽⁷⁾ <i>Managing Director, Nigeria</i>	220,000	200,000	284,475
Leslie Blair ⁽²⁾⁽³⁾⁽⁸⁾ <i>Business Development Manager, Nigeria</i>	256,200	118,400	179,340

Notes:

- (1) Based on the noon buying rate in New York City for cable transfers in Swiss francs as certified for customs purposes by the Federal Reserve Bank of New York, the average exchange rate for one Swiss franc, expressed in United States dollars was \$1.245945 in 2005.
- (2) Bonus amounts include compensation for performance in 2005 payable in 2006.
- (3) Messrs. Gandur, Ebsary, Mulder, Pearce and Blair participated in the Corporation's non-contributory pension plan and the Corporation's Accident Insurance Plan which is included in "Other Annual Compensation".
- (4) Mr. Pearce was paid a hardship allowance and a sign-in bonus which are included in "Other Annual Compensation".
- (5) Mr. Mulder received an accommodation allowance which is included in other annual compensation.
- (6) Mr. Mulder's employment with the Corporation ended effective December 31, 2005.
- (7) Mr. Pearce's employment with the Corporation began May 1, 2005 (8 months in 2005).
- (8) Mr. Leslie Blair was paid a hardship allowance which is included in "Other Annual Compensation".
- (9) Mr. David Codd was hired as Chief Legal Officer on February 7, 2005.

Stock Options

The Corporation has not granted any options or Common Share allocations during the fiscal year ended December 31, 2005 or any time prior to that date and does not intend to grant any options in the future.

Employment Agreements

The Corporation has entered into employment agreements with each of Messrs. Pearce, Ebsary and Codd. The employment agreements are for an indefinite period subject to termination by either party on nine months notice. The employment agreements also provide for non-contributory participation in the Corporation's pension plan and accident insurance, as well as providing for annual bonuses that may be assessed individually at the sole discretion of the Corporation.

The annual base salaries under the employment agreements as of September 30, 2005 were: CHF 148,800 for Mr. Gandur; CHF 500,000 for Mr. Ebsary; CHF 330,000 for Mr. Pearce; CHF 255,000 for Mr. Codd; plus an accommodation allowance of CHF 18,000/year; and Mr. Pearce receives an expatriate allowance of CHF 115,000 plus free housing and cars in Nigeria and three home leave flights for himself and his family.

The Corporation has also entered into a services agreement with AOG, effective January 1, 2006, and terminable on nine months notice by either party, for the procurement of services to be rendered by Mr. Gandur as Chief Executive Officer and member of the Board of Directors of the Corporation. The total fees paid by the Corporation to AOG for such services is \$1.1 million per annum, subject to adjustment in certain circumstances.

Compensation of Directors

During the fiscal year ended December 31, 2005, the Corporation did not pay any directors fees. However, during the fiscal year ended December 31, 2005, management committee fees were paid by Addax Petroleum N.V. to certain of the individuals who were appointed directors of the Corporation on December 4, 2005 as follows: \$30,000 to each of Mr. Anderson and Mr. Macey; \$37,500 to Mr. Twiss; \$52,000 to Mr. Gandur; and \$60,000 to Mr. Dey.

During the fiscal year ended December 31, 2004, the Corporation did not pay any directors fees. However, the Corporation did pay \$36,593 to ABN Amro Trust Company Curaçao Ltd. with respect to the services as directors provided to the Corporation by Gerben Wardenier, Francisca Pinedo Sluis and Susanna Panneflek.

Directors of the Corporation are eligible to receive Common Share allocations. During 2004 and 2005, no options to purchase Common Shares or Common Share allocations were granted. Directors of the Corporation are also reimbursed for their reasonable out-of-pocket disbursements incurred for the business of the Corporation.

Based on the recommendations of the Corporate Governance, Nominating and Compensation Committee, of the Board, the Board of Directors has implemented remuneration and reimbursement arrangements for its directors that reflect current market practices and align the interests of directors with those of shareholders. The Board of Directors has approved remuneration for each director (other than Mr. Gandur) in the amount of \$100,000 per annum, with a further \$20,000 per annum for committee chairs and \$10,000 per annum for committee participation, plus reimbursement of expenses and compensation of \$200,000 per annum to the Chairman of the Board. At least \$40,000 of each director's annual base compensation will be paid in Common Shares and each director may elect to receive additional Common Shares in lieu of cash compensation. The additional fees paid to committee chairs or for participation on committees will be paid in cash, unless the director otherwise elects to receive Common Shares.

Addax Petroleum Corporation intends to adopt share ownership guidelines for directors requiring each director, within a certain period after becoming a director of Addax Petroleum Corporation, to hold a minimum number of Common Shares.

The Corporation plans to obtain directors' and officers' liability insurance to a maximum of \$50,000,000 per claim, subject to an aggregate annual limit of \$50,000,000 for all directors and officers. This policy will cover all directors and officers and various senior managers of the Corporation and its subsidiaries. The deductible applicable to the policy will be determined through negotiations with the proposed insurance provider. The premium payable by the Corporation is currently also under discussion by management with the proposed insurance provider. Neither directors nor officers nor managers will pay any portion of the premium.

COMMON SHARE INCENTIVE PLAN

Currently, all Common Shares of Addax Petroleum Corporation are owned by AOG. Addax Petroleum Corporation intends to adopt an incentive share ownership plan, the purpose of which is to develop the interests of the directors, officers, employees and other persons who provide on-going services to Addax Petroleum Corporation in the growth and development of Addax Petroleum Corporation by providing such individuals with the opportunity to acquire an increased proprietary interest in Addax Petroleum Corporation and to aid in attracting as well as retaining and encouraging the continued involvement of such persons with Addax Petroleum Corporation. The number of Common Shares issuable pursuant to this Common Share Incentive Plan will not exceed 10 per cent of the total number of outstanding Common Shares. Under the Common Share Incentive Plan, Common Shares may be issued to directors, officers, employees of, and other service providers to, the Corporation in such numbers and with vesting provisions as the Board may determine. After adoption of the Common Share Incentive Plan by the directors of the Corporation, implementation of the Plan will be subject to the approval of shareholders of the Corporation in accordance with the requirements of the TSX.

The Common Share Incentive Plan will provide that if a recipient ceases to be a director, officer, or employee of, or service provider to, the Corporation or any of its subsidiaries any Common Shares that have not vested will revert to the Corporation except in certain limited circumstances.

CORPORATE GOVERNANCE

Committees of the Board of Directors

Addax Petroleum Corporation recognizes the importance of adhering to excellent corporate governance standards. Addax Petroleum Corporation has developed comprehensive corporate governance policies and procedures, which will be assessed on a continuous basis, and has adopted a "best practices" approach to corporate governance. The Board of Directors has adopted all of the recommendations set out in National Policy 58-201 — *Corporate Governance Guidelines*. These include, among other things, creating an Audit Committee and a Corporate Governance, Nominating and Compensation Committee, each comprised solely of independent directors, and a Technical and Reserves Committee, comprised of a majority of independent board members, adopting board mandates and a code of business ethics and conduct as well as approving regular board performance assessments. The Board of Directors may, from time to time, establish additional committees.

The mandates of each of the three committees are set forth below.

Audit Committee

The purpose of the audit committee will be to assist the Board of Directors in fulfilling their responsibilities of oversight and supervision of, among other things:

- the audit of the consolidated financial statements of the Corporation, managing the relationship with the Corporation's auditors and meeting with the auditors as required in connection with the audit services provided by the Corporation's auditors;
- the Corporation's preparation and reporting of its annual and quarterly consolidated financial statements and management's discussion and analysis;
- the accounting and financial reporting practices and procedures of the Corporation and its subsidiaries;
- the adequacy of internal controls and accounting procedures of the Corporation and its subsidiaries; and
- the quality and integrity of consolidated financial statements of the Corporation.

Corporate Governance, Nominating and Compensation Committee

The purpose of the corporate governance committee will be to assist the Board of Directors in fulfilling their responsibilities in relation to, among other things:

- the monitoring and oversight of the quality and effectiveness of the corporate governance practices and policies of the Corporation and its subsidiaries;
- considering nominees for the independent directors; and
- determining the adequacy and appropriateness of the compensation of officers and employees of the Corporation as well as the directors.

Technical and Reserves Committee

The purpose of the reserves committee will be to assist the Board of Directors in fulfilling their responsibilities in relation to, among other things:

- the independent engineering evaluation of the petroleum reserves of the Corporation and its subsidiaries, managing the relationship with the independent engineer and meeting with the independent engineer as required;
- the public disclosure and filings relating to the Corporation's petroleum reserves and operations;
- the appointment of the independent engineer and, together with management, defining the scope and supervising the methodology of the independent engineer's evaluation; and
- the monitoring of the operational performance of the Corporation.

THE ADDAX AND ORYX GROUP LTD.

AOG may be considered to be a promoter of Addax Petroleum Corporation in that it took the initiative in founding the business of Addax Petroleum N.V. and incorporating and organizing Addax Petroleum Corporation. AOG carries on several different businesses worldwide with particular emphasis on Africa, including petroleum and refined products trading, oil storage, retail petroleum products and mining businesses. AOG was incorporated in 1987 and has established itself as one of the largest independent oil trading companies in Africa and the largest marine fuel supply company in West Africa.

To the best of the knowledge of the directors and officers of Addax Petroleum Corporation, as of the date of this prospectus, AOG beneficially owns, directly or indirectly, and exercises control or direction over 60,030,000 common shares of APNV, representing all of its issued and outstanding common shares and 100 Common Shares of Addax Petroleum Corporation, representing all of its issued and outstanding common shares. After giving effect to this offering and the Pre-IPO Transactions, AOG will beneficially own, directly or indirectly, and exercise control or direction over 107,400,100 Common Shares of Addax Petroleum Corporation representing approximately 77.8 per cent of the issued and outstanding Common Shares before giving effect to the exercise of the Over-Allotment Option (or approximately 76.7 per cent if the Over-Allotment Option is exercised in full).

After the closing of this offering, AOG will hold a majority of the shares in the Corporation. It is the intention of AOG, post-closing of this offering, to hold an extraordinary meeting of its shareholders and to propose a reorganization of AOG that will give shareholders the ability to exchange their AOG shares for Common Shares held by AOG and other consideration. Following this transaction (if the exchange right is exercised by some AOG shareholders), the shareholding percentage of AOG in the Corporation will be reduced. AOG expects to continue to hold, at a minimum, a large minority stake in the Corporation after this reorganization, if it occurs. See "Plan of Distribution".

AOG has three shareholders who each beneficially own, directly or indirectly, or exercise control or direction over, 10 per cent or more of AOG's outstanding shares. These shareholders are Hydromel Financial Corp., Leblesmouti Trust and Southwind Trust. The beneficial owner of Hydromel Financial Corp. is Jean Claude Gandur, the Chief Executive Officer and a director of Addax Petroleum Corporation. The named beneficiary of the Leblesmouti Trust, which is discretionary and irrevocable, is Frederique Lorenceau and her two children. The Southwind Trust is a discretionary trust whose beneficiaries are the family of Stephen de Heinrich, a director of the Corporation. None of Hydromel Financial Corp., Leblesmouti Trust or Southwind Trust individually holds 50 per cent or more of AOG's outstanding shares.

Addax France SARL ("AFSARL") was an approved lifter under the United Nations Oil-for-Food Programme. AFSARL is an affiliate of the Corporation, as they are both controlled by AOG, though the companies are otherwise separate and distinct. AFSARL had entered into several contracts with the Iraqi Government to lift oil throughout various stages of the Oil-for-Food Programme, lifting an aggregate of 11.8 mmbbls from 1997 to 2000. Under a contract numbered M/08/57, AFSARL had the right to lift 1.5 million barrels, 1.2 million barrels of which were lifted up to September 2000. When approximately 300,000 barrels of oil remained to be lifted under contract M/08/57, the Iraqi authorities informed AFSARL that it would be required to pay a surcharge of approximately \$60,000 (equivalent to a surcharge of \$0.20 per barrel) that was not permitted under the Programme. AFSARL refused to pay the surcharge and no further liftings were made by AFSARL under that contract or any other contract under the United Nations Oil-for-Food Programme. In the Report on the Manipulation of the Oil-for-Food Programme, AFSARL is listed as a contracting company on a contract for which a surcharge payment of \$60,262 was made. The payment was purportedly made under contract M/08/57 in October 2001 (more than one year after AFSARL had lifted any oil from Iraq) by a company named Petroline Fzc. AOG believes that, upon AFSARL's refusal to make an illicit payment, Iraqi officials assigned the benefit of the contract to Petroline Fzc., without removing AFSARL's name as contracting party. No company within the AOG group has ever had any relationship with Petroline Fzc. and this company and its directors and officers are unknown to the AOG group. No AOG group company has ever participated in any payments that would contravene the rules of the United Nations Oil-for-Food Programme. Issues arising from the United Nations Oil-for-Food Programme are also the subject of investigations by national authorities. The Corporation does not believe that AOG will be the subject of any governmental action in connection with the report or the programme.

INTEREST OF AOG IN MATERIAL TRANSACTIONS

AOG owns, directly or indirectly, all of the outstanding common shares of APNV prior to the closing of this offering and the Pre-IPO Transactions.

Addax Petroleum has entered into or will enter into, prior to the closing of this offering the following transactions with AOG:

- the Share Transfer Agreement between a subsidiary of AOG and Addax Petroleum Corporation;
- the Antan Crude Oil Supply Agreement, the Brass River Blend Crude Oil Supply Agreement and the Okwori Crude Oil Supply Agreement (collectively defined as the "Crude Oil Supply Agreements");
- the Management Services Agreement;
- the Agreement for Services of Jean Claude Gandur, effective January 1, 2006 between APS and AOG;
- the Trademark Agreement; and
- the Non-Competition Agreement.

Share Transfer Agreement

Prior to the closing of this offering, Addax Petroleum Corporation will have only 100 Common Shares outstanding, and will have no assets other than the \$100 paid on the issuance of such shares. Addax Petroleum Corporation and a subsidiary of AOG will enter into the Share Transfer Agreement under which Addax Petroleum Corporation will acquire full legal and beneficial ownership of all of the outstanding shares of Addax Petroleum N.V. at the time this offering closes. See "Addax Petroleum — Pre-IPO Transactions". In consideration for the transfer of ownership of Addax Petroleum N.V. to Addax Petroleum Corporation, the AOG subsidiary will receive the equivalent of 120,000,000 Common Shares, with such consideration to be satisfied by a combination of 117,000,000 Common Shares and cash in the amount of CDN\$55,575,000. The number of Common Shares to be received by the AOG subsidiary under the Share Transfer Agreement was determined by dividing the cash component to be received by the AOG subsidiary by the Net Offering Price and subtracting the resulting quotient from 120,000,000. The effect of this manner of determining such consideration is to ensure that the AOG subsidiary receives the same Net Offering Price per share as the Corporation and AOG have negotiated with the Underwriters for the purposes of this offering. The terms and conditions of the Share Transfer Agreement will be approved on behalf of Addax Petroleum Corporation solely by directors who are independent of AOG. The terms and conditions of the Common Shares to be received by the AOG subsidiary are the same as the terms and conditions of the Common Shares offered hereunder. See "Description of Share Capital".

The Crude Oil Supply Agreements

Historically, the Corporation has employed the crude oil marketing services of ABV and sold to ABV, on an arm's length basis, all of the crude oil produced from its operations including the entitlement of NNPC and, in the case of Antan Blend, from time to time the entitlement of the OML114 Parties. The Corporation will continue the relationship as it makes available to the Corporation the specialized expertise of ABV in marketing West African crude oils.

The existing Crude Oil Supply Agreements were executed at the same time as the Credit Facility arranged by BNP Paribas, of which assignment of the Crude Oil Supply Agreements and the proceeds from oil sales constitute a significant element of the loan security package. The Crude Oil Supply Agreements shall terminate on the later of the Maturity Date and the Final Discharge Date (as defined in the Credit Facility and anticipated to be December 31, 2008 at the latest).

The price of crude oil is determined for (i) Antan crude liftings, FOB Antan Terminal as the average of Platt's Crude Oil Marketwire quotations, midpoint of spot assessment for Brent Crude effective for the month of loading, plus/minus a premium on/discount off to be mutually agreed by both parties, (ii) Brass River Blend crude liftings, FOB Brass River Terminal as the average of Platt's Crude Oil Marketwire quotations, midpoint of spot assessment for Brent Crude effective for the month of loading, plus/minus the differential as quoted in the Official Selling Price for Brass River Blend Crude notified by NNPC to the Corporation for that month, and

(iii) Okwori crude liftings, FOB Okwori Terminal as the average of Platt's Crude Oil Marketwire quotations, midpoint of spot assessment for Brent Crude effective for the month of loading, plus/minus a premium on/discount off to be mutually agreed by both parties. In each instance payment terms are in US dollars, paid offshore and 30 days from bill of lading date. Under the agreements amending the Crude Oil Supply Agreements each dated November 2005, ABV will receive a marketing fee of \$0.08 per barrel. The Corporation has the right of audit of ABV's resale of Antan crude, Brass River Blend crude and Okwori crude. The payment obligations of ABV under the Crude Oil Supply Agreements are guaranteed by AOG.

The Crude Oil Supply Agreements offer a reliable and competitive means for the sale of crude oil produced from its operations. The Board intends to have a semi-annual review of the terms and conditions of this arrangement.

Management Services Agreement

AOG provides management services to the various subsidiaries of AOG, including the Corporation. The services include support in relation to financial control and reporting, legal, tax, risk and insurance, human resources, information technology, training and local expertise in-country.

Unless terminated for a breach of terms, the initial duration of the Management Services Agreement will expire on December 31, 2009 and will thereafter continue for further periods of one year unless and until terminated by six months prior notice given at any time by either party. The fee to be paid under the contract is \$2.5 million per year for the term.

Agreement for Services of Jean Claude Gandur

APS has entered into a services agreement with AOG for the procurement of services to be rendered by Mr. Jean Claude Gandur as Chief Executive Officer and member of the Board of Directors of the Corporation. At present, it is anticipated that approximately 90 per cent of Mr. Gandur's time will be dedicated to Addax Petroleum. The total fee to be paid by the Corporation for such services is \$1.1 million per annum, subject to adjustment in certain circumstances.

Unless terminated for a breach of terms, this agreement shall continue in force unless and until terminated by nine months prior notice given at any time by either party.

Trademark Agreement

The Corporation identifies itself using names and logos that indicate a relationship with AOG. The Corporation believes that association with the AOG trademark has been and will continue to be beneficial. The Corporation's regional strategic focus is the African continent, particularly West Africa where AOG has established itself in the petroleum trading, oil storage and retail petroleum products industries. The Trademark Agreement provides the Corporation with the right to use under a sub-license agreement all registered and unregistered AOG trademarks in any territory in which the Corporation has business activities.

Unless terminated for a breach of terms, the initial duration of the amended and restated Trademark Agreement will expire on December 31, 2009 and will thereafter continue for further periods of one year unless and until terminated by six months prior notice given at any time by either party. The Corporation will pay AOG a fixed annual fee of \$500,000 under this agreement.

Non-Competition Agreement

AOG has agreed with Addax Petroleum that, provided AOG and Jean Claude Gandur together own not less than 25 per cent of the issued and outstanding Common Shares, neither AOG nor any of its subsidiaries will:

- acquire any petroleum properties or facilities or participate in the exploration for or development and production of petroleum or participate in any upstream petroleum business opportunities, unless AOG has first offered such business opportunities to Addax Petroleum and Addax Petroleum has declined to acquire such business opportunities. Such offer must remain open for acceptance for a minimum of 30 business days. For purposes of certainty, petroleum trading, downstream activities or non-petroleum resource activities of AOG shall not be considered directly competing interests; or

- participate in any person, other than acquiring not more than five per cent of the equity of a publicly listed company, which engages in the above prescribed activities.

INTEREST OF MANAGEMENT AND OTHERS IN MATERIAL TRANSACTIONS

Other than as disclosed elsewhere in this prospectus, none of the directors, officers or principal shareholders of Addax Petroleum Corporation or APNV, and no associate or affiliate of Addax Petroleum Corporation or APNV, respectively, has or has had any material interest in any transaction which materially affects Addax Petroleum Corporation or APNV.

Afolabi Oladele has a consulting agreement with Addax Petroleum Development (Nigeria) Limited and Mr. Oladele is paid a fee of \$9,000 per month.

There are potential conflicts of interest to which the directors and officers of Addax Petroleum Corporation will be subject in connection with the operations of Addax Petroleum Corporation. In particular, certain of the directors of Addax Petroleum Corporation are involved in managerial and/or director positions with other oil and gas companies whose operations may, from time to time, be in direct competition with those of Addax Petroleum Corporation or with entities which may, from time to time, provide financing to, or make equity investments in, competitors of Addax Petroleum Corporation. See "Directors and Officers". The CBCA provides that in the event that a director has an interest in a contract or proposed contract or agreement, the director shall disclose his interest in such contract or agreement and shall refrain from voting on any matter in respect of such contract or agreement unless otherwise provided by the CBCA.

PLAN OF DISTRIBUTION

Subject to the terms and conditions of the Underwriting Agreement, Addax Petroleum Corporation has agreed to issue and sell 21,000,000 Offered Shares at a price of CDN\$19.50 per Offered Share to the Underwriters for a total consideration of CDN\$409,500,000, and the Underwriters have severally agreed to purchase such Offered Shares, as principals, on February 15, 2006 or such other date as may be agreed upon by the parties to the Underwriting Agreement, but not later than March 15, 2006. In consideration of the services provided in connection with this offering, Addax Petroleum Corporation will pay the Underwriters a fee of CDN\$0.975 per Offered Share.

Addax Petroleum Corporation has granted to the Underwriters the Over-Allotment Option, exercisable for a period ending 30 days after closing, to purchase up to an additional 2,100,000 Common Shares at a price of CDN\$19.50 per Common Share to cover over-allotments, if any, and for market stabilization purposes. If the Underwriters exercise the Over-Allotment Option in full, Addax Petroleum Corporation will be obligated to sell such Common Shares and will receive additional net proceeds of CDN\$38,902,500 after deducting fees to the Underwriters of CDN\$2,047,500. This prospectus also qualifies for distribution any Common Shares that are issued pursuant to the exercise of the Over-Allotment Option.

There is currently no market for the Common Shares. Accordingly, the terms of the offering were established by negotiation among the Underwriters, Addax Petroleum Corporation and AOG.

The obligations of the Underwriters under the Underwriting Agreement are conditional and may be terminated at their discretion on the basis of their assessment of the state of the financial markets and may also be terminated upon the occurrence of certain stated events. The Underwriters are, however, severally obligated to take up and pay for all Offered Shares agreed to be purchased under the Underwriting Agreement if any Offered Shares are purchased under the Underwriting Agreement. Addax Petroleum Corporation and AOG have agreed to indemnify the Underwriters, their directors, officers, employees and agents against certain liabilities including civil liabilities under applicable securities legislation or will contribute to payments the Underwriters may be required to make in respect thereof.

Subscriptions for Offered Shares will be received subject to rejection or allotment in whole or in part and the right is reserved to close the subscription books at any time without notice.

Pursuant to policy statements of the Ontario Securities Commission and the Autorité des marchés financiers, the Underwriters may not, throughout the period of distribution under this prospectus, bid for or purchase Common Shares. The foregoing restriction is subject to exceptions, including a bid or purchase

permitted under the Universal Market Integrity Rules of Market Regulation Services Inc. relating to market stabilization and passive market making activities and a bid or purchase made for and on behalf of a customer where the order was not solicited during the period of distribution, provided that the bid or purchase is not engaged in for the purpose of creating actual or apparent active trading in, or raising the price of, the Common Shares. In connection with this offering, and subject to the foregoing, the Underwriters may effect transactions which stabilize or maintain the market price for the Common Shares at levels other than those which might otherwise prevail in the open market. Such transactions, if commenced, may be discontinued at any time.

The Offered Shares have not been and will not be registered under the United States Securities Act of 1933, as amended (the "1933 Act") or any state securities laws. Accordingly, except to the extent permitted by the Underwriting Agreement, the Offered Shares may not be offered or sold within the United States. Each Underwriter has agreed that it will not offer or sell the Offered Shares within the United States except in accordance with Rule 144A or an exemption from, or in a transaction not subject to, the 1933 Act and in compliance with applicable state securities laws. This prospectus does not constitute an offer to sell or a solicitation of an offer to buy any of the Offered Shares in the United States. Moreover, the Underwriting Agreement provides that the Underwriters will offer and sell the Offered Shares outside the United States only in accordance with Regulation S under the 1933 Act. In addition, until 40 days after the commencement of the offering, an offer or sale of additional Common Shares within the United States by any dealer (whether or not participating in the Offering) may violate the registration requirements of the 1933 Act if such offer or sale is made otherwise than in accordance with Rule 144A.

Addax Petroleum Corporation and AOG have agreed that they will not, without the prior consent of RBC Dominion Securities Inc. and Merrill Lynch Canada Inc., which consent may not be unreasonably withheld, offer, sell or issue for sale or resale any Common Shares (or any securities giving the right to acquire Common Shares) other than the sale of the Common Shares pursuant to the exercise of the Over-Allotment Option or agree to or announce the intention to do so at any time prior to the date which is 180 days following closing of this offering. However, RBC Dominion Securities Inc. and Merrill Lynch Canada Inc. have consented to (i) the transfer of up to 9.6 million of the Common Shares owned by AOG after the Pre-IPO Transactions to current and former directors, officers and employees of the Corporation and (ii) the distribution of Common Shares by AOG pursuant to the potential reorganization of AOG described under "The Addax and Oryx Group Ltd.", provided that the recipients of such Common Shares enter into an agreement satisfactory to the Underwriters to be bound by equivalent restrictions as set forth above on the disposition of the Common Shares they have received.

The TSX has conditionally approved the listing of the Common Shares. Listing is subject to the Corporation fulfilling all requirements of the TSX, including distribution of Common Shares to a minimum number of public security holders.

RELATIONSHIP BETWEEN THE CORPORATION AND RBC DOMINION SECURITIES INC.

RBC Dominion Securities Inc. is an indirect wholly owned subsidiary of a Canadian chartered bank that is a lender to APNV under the Credit Facility. Accordingly, the Corporation may be considered to be a connected issuer of RBC Dominion Securities Inc. under applicable securities legislation.

As at November 30, 2005, \$80 million was owed to the lenders under the Credit Facility. The Corporation is in material compliance with all material terms of the agreements governing the Credit Facility and none of the lenders has waived any material breach by the Corporation of those agreements since the Credit Facility was established. Neither the financial position of Addax Petroleum nor the value of the security under Credit Facility has changed substantially and adversely since the indebtedness under the Credit Facility was incurred.

The decision to distribute the Offered Shares and the determination of the terms of the distribution were made solely through negotiations among the Corporation, AOG, RBC Dominion Securities Inc. and Merrill Lynch Canada Inc. The lenders under the Credit Facility did not have any involvement in such decision or determination, but have been advised of the issuance and the terms thereof. As a consequence of the issuance, RBC Dominion Securities Inc. will receive its share of the Underwriters' fee. See "Plan of Distribution" and "Use of Proceeds".

DESCRIPTION OF SHARE CAPITAL

Addax Petroleum Corporation is authorized to issue an unlimited number of Common Shares and an unlimited number of Preferred Shares, issuable in series.

Common Shares

The holders of Common Shares will be entitled to receive notice of, and to exercise one vote per share at, every meeting of shareholders of Addax Petroleum Corporation, to receive such dividends as the Board of Directors declares and to share equally in the assets of Addax Petroleum Corporation remaining upon the liquidation of Addax Petroleum Corporation after the creditors of Addax Petroleum Corporation have been satisfied, subject to the prior rights of the Preferred Shares.

Preferred Shares

The Preferred Shares will be issuable in series, with each series consisting of such number of shares and having such rights, privileges, restrictions and conditions as may be determined by the Board of Directors of Addax Petroleum Corporation prior to the issuance thereof. With respect to the payment of dividends and the distribution of assets in the event of liquidation, dissolution or winding-up of Addax Petroleum Corporation, whether voluntary or involuntary, the Preferred Shares are entitled to preferences over Addax Petroleum Common Shares and any other shares ranking junior to the Preferred Shares and may also be given such other preferences over the Common Shares and any other shares ranking junior to the Preferred Shares as may be determined at the time of creation of each series.

PRIOR SALES

Addax Petroleum Corporation has not issued any Common Shares in the 12 month period prior to the date of this prospectus, except 100 Common Shares issued to AOG on November 23, 2005 for cash consideration of CDN\$100 in connection with the incorporation and organization of Addax Petroleum Corporation. APNV has not issued any Common Shares in the 12 month period prior to the date of this prospectus.

MATERIAL CONTRACTS

A copy of the Underwriting Agreement, the Share Transfer Agreement, and the Non-Competition Agreement will be filed with the Alberta Securities Commission and the Ontario Securities Commission and will be available for inspection during normal business hours at Addax Petroleum Corporation's registered office in Calgary, Alberta and at the offices of Fasken Martineau DuMoulin LLP, in Toronto, Ontario during the period of distribution.

RISK FACTORS

The securities offered hereby should be considered highly speculative due to the nature of the Corporation's business and the location of its primary assets and business operations. A prospective investor should consider carefully the risks and uncertainties set out below in addition to the other information contained in this prospectus before making an investment decision. Additional risks and uncertainties not presently known to the Corporation or that it currently deems immaterial may also impair its business and affect the price of its Common Shares. If any of the events described in this prospectus as a risk or uncertainty actually occurs, the Corporation's business, results of operations or financial condition could be materially adversely affected.

Risks relating to the business of the Corporation

The Corporation's failure to replace its current reserves would have a material adverse effect on its business and financial condition.

The Corporation's oil reserves and production, and therefore its cash flows and earnings, are highly dependent upon the Corporation developing and increasing its current reserve base. Without the addition of reserves through exploration, acquisition or development activities, the Corporation's reserves and production will decline over time as reserves are depleted. The business of exploring for, developing or acquiring reserves is

capital intensive. To the extent that cash flow from operations is insufficient and external sources of capital become limited or unavailable, the Corporation's ability to make the necessary capital investments to maintain and expand its oil reserves will be impaired. There can be no assurance that the Corporation will be able to find and develop or acquire additional reserves to replace production at commercially feasible costs.

Exploration and development activities are inherently risky and are subject to change.

Future oil and natural gas exploration may involve unprofitable efforts, not only from dry wells, but from wells that are productive but do not produce sufficient net revenues to return a profit after drilling, operating and other costs. Completion of a well does not assure a profit on the investment or recovery of drilling, completion and operating costs. In addition, drilling hazards or environmental damage could greatly increase the cost of operations and various field operating conditions may adversely affect the production from successful wells.

Whether the Corporation ultimately undertakes an exploration or development project depends upon a number of factors, including availability and cost of capital, current and projected oil and gas prices, receipt of government approvals, access to the property, the costs and availability of drilling rigs and other equipment, supplies and personnel necessary to conduct these operations, success or failure of activities in similar areas and changes in the estimates to complete the projects.

The Corporation will continue to gather data about its new venture opportunities and other projects. Additional information could cause the Corporation to alter its schedule or determine that a new venture opportunity or project should not be pursued, which could adversely affect the Corporation's prospects.

Under its Production Sharing Contracts, the Corporation finances exploration, development and operations and the related facilities and equipment and will only recover its costs if there is successful production in accordance with the terms of the Production Sharing Contracts.

Failure to obtain governmental approvals and fulfill contractual commitments may adversely affect the Corporation's business.

The Corporation's current operations are, and future operations will be, subject to approvals of governmental authorities and, as a result, the Corporation has limited control over the nature and timing of development and exploration of such properties or the manner in which operations are conducted on such properties.

The Corporation's Production Sharing Contracts and other contracts with governments and government bodies to explore and develop the properties are subject to specific requirements and obligations. If the Corporation fails to satisfy such requirements and obligations and there is a material breach of such contracts, such contracts could, under certain circumstances, be terminated. The termination of any of the Corporation's contracts granting rights in respect of the properties would have a material adverse effect on the Corporation's financial condition.

The loss of any of the Corporation's executive officers and key employees could have an adverse impact on its business.

The Corporation is highly dependent upon its executive officers and key employees, and the success of the Corporation will be largely dependent upon the performance of such officers and key employees. In particular, the Corporation's Chief Executive Officer, Jean Claude Gandur, has a number of key relationships that are important to the Corporation's business. The unexpected loss of the services of Mr. Gandur or other executive officers or key personnel could have a material adverse effect on the Corporation. The Corporation does not maintain key man life insurance on any of its employees. In assessing the risk of an investment in the Common Shares, potential investors should recognize that they are relying on the ability and integrity of the management of the Corporation.

The Corporation's operations are subject to potential losses that may not be covered by insurance.

The exploration for, and the production, storage, transportation and marketing of oil involves many risks. These risks include encountering unexpected formations or pressures, premature declines of reservoirs, equipment failures and other accidents, uncontrollable flows of oil, natural gas well fluids or water, adverse weather conditions, blowouts, explosions, fire, gaseous leaks, migration of harmful substances and oil spills, any of which could cause personal injury, result in damage to, or destruction of, oil wells or formations or production facilities and other property, equipment and the environment, as well as interrupt operations. The Corporation's offshore production facilities are also subject to hazards inherent in marine operations, such as capsizing, sinking, grounding, collision and damage from severe weather or tidal conditions. These hazards can cause substantial damage to facilities and interrupt production. The impact that any of these risks may have upon the Corporation is increased because of the large contribution made to the Corporation's overall production by a few select properties.

The Corporation is insured against some, but not all, potential risks; however, there can be no assurance that such insurance will be adequate to cover any losses or exposure for liability. The occurrence of a significant unfavourable event not fully covered by insurance could have a material adverse effect on the Corporation's financial condition, results of operations or cash flows. Furthermore, the Corporation cannot predict whether insurance will continue to be available at a reasonable cost or at all.

The Corporation is dependent on an affiliated company for the marketing of the oil the Corporation produces.

In conducting its business, Addax Petroleum will continue to rely on ABV to purchase and sell all of the crude oil the Corporation produces under the Crude Oil Supply Agreements. If the Corporation's agreements with ABV terminate for any reason, the Corporation may be unable to enter into a relationship with another purchaser and seller of its crude oil on a timely basis or on acceptable terms, which could materially adversely affect the Corporation's business, results of operations or financial condition.

The Corporation shares a trademark and a tradename with a group of companies and any adverse development affecting the trademark, tradename or reputation of any of those companies, their shareholders, directors, officers or employees could materially adversely affect the business, goodwill or reputation of the Corporation.

The Corporation shares a trademark and a tradename with AOG and many of AOG's subsidiaries. AOG engages in petroleum trading and distribution, and mining activities throughout Africa and in Eastern Europe, and it has subsidiaries, local branches and commercial representation bureaus throughout Africa and in Europe and Asia. Many of the countries in which AOG operates have experienced high levels of governmental and business corruption and other illegal activity. AOG and its officers, directors and employees have been and may in the future be, the subject of press speculation, governmental investigations and other accusations of corrupt practices or other illegal activities, including improper payments to individuals of influence. For example, AFSARL, a subsidiary of AOG, was referred to in the UN Oil-for-Food Report, although, as discussed under "The Addax and Oryx Group Ltd.", neither the Corporation nor AOG has ever participated in any payments that contravene the rules of the UN Oil-for-Food Programme. Issues arising from the UN Oil-for-Food Programme may be the subject of investigation by national authorities.

Pursuant to the Trademark Agreement, the Corporation intends to continue identifying itself using names and logos that indicate a relationship with AOG. Given the Corporation shares a trademark and tradename with AOG and with many members of the AOG group, any adverse development affecting the trademark, tradename or reputation of any of those companies could have a material adverse effect on the business, goodwill or reputation of the Corporation. See "The Addax and Oryx Group Ltd." and "Interest of AOG in Material Transactions".

The Corporation may not be able to secure financing for its future exploration, development, production and acquisition plans.

Depending on future exploration, development, production or acquisition plans, the Corporation may require additional financing. The ability of the Corporation to arrange such financing in the future will depend in part upon prevailing financing market conditions as well as the business performance of the Corporation. If

Addax Petroleum's revenues or reserves decline, it may not have the capital necessary to undertake or complete future drilling programs. There can be no assurance that debt or equity financing or cash generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to Addax Petroleum. Transactions financed partially or wholly with debt may increase the Corporation's debt levels above industry standards. The inability of Addax Petroleum to access sufficient capital for its operations could have a material adverse effect on Addax Petroleum's business and financial condition. If additional financing is raised by the issuance of shares from treasury of the Corporation, control of the Corporation may change and shareholders may suffer dilution.

The Corporation could be subject to labour or other unplanned production disruptions.

The Corporation has a significant number of staff belonging to two Nigerian trade unions, Nupeng and Pengassan, which have a record of occasional industrial action. The presence of trade unions may limit the Corporation's flexibility in dealing with its staff in Nigeria. If there is a material disagreement between the Corporation and its trade unions, the Corporation's operations in Nigeria could suffer an interruption or shutdown that could have a material adverse effect on the Corporation's business, results of operations or financial condition.

Future litigation could adversely affect the Corporation's business, results of operations or financial condition.

From time to time, the Corporation is subject to litigation arising out of its operations. Damages claimed under such litigation may be material or may be indeterminate, and the outcome of such litigation may materially impact the Corporation's business, results of operations or financial condition. While the Corporation assesses the merits of each lawsuit and defends itself accordingly, it may be required to incur significant expenses or devote significant resources to defending itself against such litigation. In addition, the adverse publicity surrounding such claims may have a material adverse effect on the Corporation's business.

The Corporation is subject to certain risks related to the nature of the Corporation's business and its present stage and speed of development.

There are numerous factors which may affect the success of the Corporation's business which are beyond the Corporation's control, including local, national and international economic, legal and political conditions. The Corporation's business involves a high degree of risk which a combination of experience, knowledge and careful evaluation may not overcome. The operations of the Corporation in developing countries expose the Corporation to, among other things, political and currency risks.

The Corporation has experienced significant growth and development in a relatively short period of time and expects to continue to grow as production increases from its oil reserves. Management of that growth requires, among other things, stringent control of financial system and operations, the continued development of management controls and the training of new personnel. Failure to successfully manage the Corporation's expected growth and development could have a material adverse effect on the Corporation's business, results of operations or financial condition.

There are risks inherent in the Corporation's strategy of geographic diversification and acquisition of new exploration and development properties.

The Corporation intends to acquire additional oil and gas properties. Although the Corporation performs a review of properties prior to acquiring them that it believes is consistent with industry practices, such reviews are inherently incomplete. It generally is not feasible to review in depth every individual property involved in each acquisition. Ordinarily, the Corporation will focus its due diligence efforts on higher valued properties and will sample the remainder. However, even an in-depth review of all properties and records may not necessarily reveal existing or potential problems, nor will it permit a buyer to become sufficiently familiar with the properties to assess fully their deficiencies and capabilities. Inspections may not be performed on every well, and structural or environmental problems, such as ground water contamination, are not necessarily observable even when an inspection is undertaken. The Corporation may be required to assume pre-closing liabilities, including environmental liabilities, and may acquire interests in properties on an "as is" basis. In addition, competition for

the acquisition of prospective oil properties is intense, which may increase the cost of any potential acquisition. To date Addax Petroleum's exploration and development activities have principally been based in Nigeria and nearby areas in West Africa, and Addax Petroleum's limited presence in other regions may limit its ability to identify and complete acquisitions in other geographic areas. There can be no assurance that any acquisition by the Corporation will be successful.

The Corporation is exposed to the risks associated with commodity hedging activities.

The nature of the Corporation's operations will result in exposure to fluctuations in commodity prices. Addax Petroleum may use financial instruments and physical delivery contracts to hedge its exposure to these risks. If Addax Petroleum engages in hedging it will be exposed to credit related losses in the event of non-performance by counterparties to the financial instruments. Additionally, if product prices increase above those levels specified in any future hedging agreements, Addax Petroleum could lose the cost of floors or ceilings or a fixed price could limit Addax Petroleum from receiving the full benefit of commodity price increases. If Addax Petroleum enters into hedging arrangements, it may suffer financial loss if it is unable to commence operations on schedule or is unable to produce sufficient quantities of oil to fulfill its obligations.

Joint ventures entered into by the Corporation could lead to additional costs.

The Corporation has, in respect of Cameroon and Gabon, and is likely, in respect of the JDZ, the Taq Taq Property and the Okwok Property, to enter into joint ventures. The Corporation may suffer additional costs or other losses if a joint venture partner does not meet its obligations. It is also possible that the interests of the Corporation and those of its joint venture partners are not aligned resulting in project delays, additional costs or disagreements, which could adversely affect the Corporation's business.

Risks relating to the petroleum industry

Volatility of petroleum prices could have a material adverse effect on the Corporation's business, results of operations or financial condition.

The Corporation's business, results of operations or financial condition and future growth are substantially dependent on the prevailing prices for its petroleum production. Historically, the markets for petroleum have been volatile and such markets are likely to continue to be volatile in the future. Prices for oil are based on world supply and demand and are subject to large fluctuations in response to relatively minor changes to the demand for oil, whether the result of uncertainty or a variety of additional factors beyond the control of the Corporation, including actions taken by OPEC and its adherence to agreed production quotas, war, terrorism, government regulation, social and political conditions in oil producing countries generally and in Nigeria specifically, economic conditions, prevailing weather patterns and the availability of alternative sources of energy. Any substantial decline in the price of petroleum could have a material adverse effect on the Corporation's revenues, operating income, cash flows and borrowing capacity and may require a reduction in the carrying value of the Corporation's properties, its planned level of spending for exploration and development and the level of its reserves. No assurance can be given that prices will be sustained at levels which will enable the Corporation to operate profitably.

A substantial decline in oil prices may also require the Corporation to write down certain of its assets. Under Canadian GAAP, the net capitalized cost of oil and gas properties may not exceed a "ceiling limit", which is based, in part, upon estimated future net cash flows from reserves. If the net capitalized costs exceed this limit, the Corporation must charge the amount of the excess against earnings. As oil prices decline, the Corporation's net capitalized cost may approach or exceed this cost ceiling, resulting in a charge against earnings. While a write down would not directly affect cash flow, the charge to earnings could be viewed unfavourably in the market or could limit the Corporation's ability to borrow funds or comply with covenants contained in current or future credit agreements or other debt instruments.

The Corporation could face significant liabilities under environmental laws.

Extensive national, state, and local environmental laws and regulations in foreign jurisdictions affect nearly all of the operations of the Corporation. These laws and regulations set various standards regulating certain

aspects of health and environmental quality, provide for civil and criminal penalties and other liabilities for the violation of such standards and establish in certain circumstances obligations to remediate current and former facilities and locations where operations are or were conducted. In addition, special provisions may be appropriate or required in environmentally sensitive areas of operation. There can be no assurance that the Corporation will not incur substantial financial obligations in connection with environmental compliance.

Significant liability could be imposed on the Corporation for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous owners of property purchased by the Corporation, acts of sabotage or non-compliance with environmental laws or regulations. Such liability could have a material adverse effect on the Corporation. Moreover, the Corporation cannot predict what environmental legislation or regulations will be enacted in the future or how existing or future laws or regulations will be administered or enforced. Compliance with more stringent laws or regulations, or more vigorous enforcement policies of any regulatory authority, could in the future require material expenditures by the Corporation for the installation and operation of systems and equipment for remedial measures, any or all of which may have a material adverse effect on the Corporation.

As a party to various Production Sharing Contracts and the Ngosso Concession, the Corporation may have an obligation to restore producing fields to a condition acceptable to the authorities at the end of their commercial lives. Each party to such contracts is typically liable for its share of the cost of decommissioning infrastructure installed under that contract. In respect of the Corporation's producing properties that are located offshore, the costs to decommission offshore wells may be substantial. These costs are payable at a time when assets are no longer generating cash flow. Although the Corporation makes an accounting provision for decommissioning and site restoration costs, there are no immediate plans to establish a reserve account for these potential costs in respect of any of the Corporation's current properties or facilities. Rather, the costs of decommissioning are expected to be paid from the proceeds of production in accordance with the practice generally employed in onshore and offshore oilfield operations. There can, however, be no assurance that the proceeds from production will be sufficient to meet the costs of decommissioning at the time when required to be incurred. The use of other funds to satisfy such decommissioning costs could have a material adverse effect on the Corporation's financial position.

The oil reserve and oil and gas resource data in this prospectus are only estimates, and the Corporation's actual production, revenue and expenditure with respect to its reserves may be materially different from such estimates.

There are numerous uncertainties inherent in estimating quantities of proved, probable and possible reserves and prospective and contingent resources and cash flows to be derived therefrom, including many factors beyond the control of the Corporation. The reserves, resources and cash flow information set forth in this prospectus represent estimates only. In general, estimates of economically recoverable oil reserves and the future net cash flow therefrom are based on a number of factors and assumptions made as of the date on which the reserves estimates were determined, such as geological and engineering estimates (which have inherent uncertainties), historical production from the properties, the assumed effects of regulation by governmental agencies and estimates of future commodity prices and operating costs, all of which may vary considerably from actual results. All such estimates are, to some degree, uncertain and classifications of reserves are only attempts to define the degree of uncertainty involved. For these reasons, estimates of the economically recoverable oil reserves attributable to any particular group of properties, the classification of such reserves based on risk recovery and estimates of future net revenues expected therefrom, prepared by different engineers or by the same engineers at different times, may vary substantially. The Corporation's actual production, revenues, taxes and development and operating expenditures with respect to the Corporation's reserves will likely vary from such estimates, and such variances could be material.

Estimates with respect to reserves that may be developed and produced in the future are often based upon volumetric calculations and upon analogy to similar types of reserves, rather than upon actual production history. Estimates based on these methods generally are less reliable than those based on actual production history. Subsequent evaluation of the same reserves based upon production history will result in variation, which may be material, in the estimated reserves.

The present value of estimated future net cash flows referred to herein should not be construed as the current market value of estimated proved oil reserves attributable to the Corporation's properties. The estimated discounted future cash flow from proved reserves are based upon price and cost estimates which may vary from actual prices and costs and such variance could be material. Actual future net cash flows will also be affected by factors such as the amount and timing of actual production, supply and demand for oil, curtailments or increases in consumption by purchasers and changes in governmental regulations or taxation.

The Corporation's exploration and development activities depend on its ability to procure appropriate drilling equipment.

Oil and natural gas development and exploration activities are dependent on the availability of drilling and related equipment in the particular areas where such activities will be conducted. Demand for limited equipment such as drilling rigs or access restrictions may affect the availability of such equipment to the Corporation and may delay its development and exploration activities. In the areas in which the Corporation operates there is significant demand for drilling rigs and other equipment. Failure by the Corporation to secure necessary equipment could adversely affect the Corporation's business, results of operations or financial condition.

The Corporation operates in a highly competitive industry.

The oil and gas industry is intensely competitive and the Corporation competes with other companies which possess greater technical and financial resources. Many of these competitors not only explore for and produce oil and natural gas, but also carry on refining operations and market petroleum and other products on an international basis. The Corporation also competes with other companies to attract and retain experienced skilled management and oil professionals. If the Corporation is unsuccessful in competing against other companies, its business, results of operations or financial condition would be materially adversely affected. See "Properties and New Ventures — Nigeria Country Discussion".

The Corporation faces foreign exchange, interest rate and inflation risks.

The Corporation's revenues are in United States dollars and most of the Corporation's working capital is in United States dollars. The Corporation converts funds to foreign currencies as its payment obligations become due. Part of the Corporation's costs are incurred in other currencies, including the Nigerian Naira and the Swiss franc. The Corporation's accounts are prepared in United States dollars and dividends, if paid, will be paid in Canadian dollars. Accordingly, the Corporation is subject to inflation in the countries in which it operates and fluctuations in the rates of currency exchange between the United States dollar and these currencies, and such fluctuations may materially affect the Corporation's business, results of operations or financial condition. Consequently, construction, exploration, development, administration and other costs may be higher than the Corporation anticipates. Any increase in relevant interest rates will increase the amount the Corporation pays to service debt.

Risks relating to the countries in which the Corporation currently operates and may operate in the future

There are political, economic and other risks relating to the countries in which the Corporation currently operates or may operate in the future.

The Corporation's current oil production activities are located entirely in Nigeria. It is also currently pursuing exploration and development activities in Cameroon, Gabon and the Kurdistan Region of Iraq. Exploration and development activities in such countries may require protracted negotiations with host governments, national oil companies and third parties and may be subject to economic and political considerations such as the risks of war, actions by terrorist or insurgent groups, community disturbances, expropriation, nationalization, renegotiation, change or nullification of existing contracts or royalty rates, changing taxation policies or interpretations, foreign exchange restrictions, inflation, changing political conditions, local currency devaluation, currency controls, and foreign governmental regulations that favour or require the awarding of contracts to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction. Any of these or similar factors could have a material adverse effect on the Corporation's business, results of operations or financial condition. If a dispute arises in connection

with foreign operations, the Corporation may be subject to the exclusive jurisdiction of foreign courts or foreign arbitration tribunals or may not be successful in subjecting foreign persons, especially foreign oil ministries and national oil companies, to the jurisdiction of Canada.

Under the International Court of Justice ruling of October 2002, the border between Nigeria and Cameroon was fixed such that a part of OML123, including the Bogi Platform, is now located in Cameroon. The Joint Border Commission between the governments of Nigeria and Cameroon has not reached a decision about how the Corporation's operations will be treated. Accordingly, the Corporation may be materially adversely affected by a decision of the Joint Border Commission.

Western oil and gas companies may be perceived to be targets of criminal or terrorist activities. Criminal or terrorist action against the Corporation, its properties or facilities could have a material adverse effect on the Corporation's business, results of operations or financial position. In addition, the fear of criminal or terrorist attacks against the Corporation could have an adverse effect on the ability of the Corporation to raise capital or to adequately staff its operations or could substantively increase the costs of doing so.

Relinquishment obligations under applicable legislation and the terms of Production Sharing Contracts may adversely affect the total amount of the Corporation's prospective resources.

Pursuant to the Nigeria Production Sharing Contracts, Addax Petroleum is required to relinquish 50 per cent of the area of OML123 and OML124 and OPL90 and OPL225, excluding the areas of the properties in which petroleum had been discovered in commercial quantities. The Corporation has submitted a relinquishment proposal to NNPC in respect of OPL90 and OPL225, but there is no assurance that such proposal will be accepted.

In addition, the Production Sharing Contract in respect of OML123 and OML124 required that not later than five years from the effective date of the PSC (May 1998), 50 per cent of the contract area (excluding any areas in which petroleum had been discovered in commercial quantities) should be relinquished pursuant to mutual agreement between NNPC and the Corporation. Although discussions commenced between NNPC and the Corporation, no area was ever relinquished in accordance with this provision of the PSC. Subsequent to the date required for such relinquishment, the OPLs under which the Corporation held the areas were converted to OML123 and OML124. The Corporation has obtained legal advice to the effect that, as the conversion from the previous OPL's into the OML's required the consent of NNPC, the obligation under the PSC to relinquish the area is no longer effective. However, there is a risk that NNPC could in the future request such relinquishment.

In addition, in accordance with the *Petroleum Act*, 50 per cent of the area covered by an OML must be relinquished within 10 years of the date of grant of the OML. OML123 and OML124 were granted in July 2002 and contain such provisions. There can be no assurance that the area proposed by the Corporation will be accepted by the government, and there is a risk that such relinquishment may necessarily contain reserves already booked by the Corporation, leading to a restatement of its reserves.

The Ngoosso Concession contains a change of control provision which provides that "if [the State], pursuant to Article 34 of the Petroleum Regulations shall have become aware of changes in the factors constituting control of the Contractor or of an entity comprising Contractor, [the State] may, within 90 days order the latter to take all necessary steps in order to terminate the operations which led to such changes". Accordingly, any change of control in the Corporation could have an adverse effect on the Corporation's operations in Cameroon.

Crime and governmental or business corruption could significantly disrupt the Corporation's ability to conduct its business and could materially adversely affect its financial condition and results of operations.

The Corporation operates and conducts business in Nigeria and other countries which have experienced high levels of governmental and business corruption and other criminal activity. The Corporation and its officers, directors and employees have been, and may in the future be, the subject of press speculation, government investigations and other accusations of corrupt practices or illegal activities, including improper payments to individuals of influence. The Nigerian government is reported to be conducting corruption and other investigations into the oil industry in Nigeria. However, the Corporation is not aware of any current

investigations specific only to the Corporation or any adverse findings against it, its directors, officers or employees or any member of the AOG group, other than as disclosed below.

Although the Corporation's policy mandates strict compliance with internal policies and applicable laws which prohibit corrupt payments to government officials or other businesses or persons, there is no assurance that such internal policies and procedures have been or will be adhered to by its employees. For example, two former employees of AOG, who were also directors of subsidiaries of the Corporation and had senior level responsibilities for AOG's operations in Nigeria, were convicted in Switzerland in 2000 and fined for money laundering of proceeds tied to the embezzlement of public funds related to the regime of former Nigerian President Abacha. Neither the Corporation nor AOG were charged in Switzerland, Nigeria or elsewhere in connection with the activities of these former employees.

Findings against the Corporation, its directors, officers or employees, or their involvement in corruption or other illegal activity could result in criminal or civil penalties, including substantial monetary fines, against the Corporation, its directors, officers or employees. Any government investigations or other allegations against the Corporation, its directors, officers or employees, or finding of involvement in corruption or other illegal activity by such persons, could significantly damage the Corporation's reputation and its ability to do business, including by affecting its rights under the Nigerian PSCs or by the loss of key personnel, and could materially adversely affect its financial condition and results of operations. Furthermore, alleged or actual involvement in corrupt practices or other illegal activities by AOG, the joint venture partners of the Corporation or others with whom the Corporation conducts business, could also significantly damage the Corporation's reputation and business and materially adversely affect the Corporation's financial condition and results of operations.

Interpretation and application of the laws and regulations of the countries in which the Corporation operates can be uncertain and could adversely affect the Corporation.

The jurisdictions in which the Corporation operates may have less developed legal systems than more established economies which may result in risks such as (i) effective legal redress in the courts of such jurisdictions, whether in respect of a breach of law or regulation, or, in an ownership dispute, being more difficult to obtain; (ii) a higher degree of discretion on the part of governmental authorities; (iii) the lack of judicial or administrative guidance on interpreting applicable rules and regulations; (iv) inconsistencies or conflicts between and within various laws, regulations, decrees, orders and resolutions; or (v) relative inexperience of the judiciary and courts in such matters. Enforcement of laws in some of the jurisdictions in which the Corporation operates may depend on and be subject to the interpretation placed upon such laws by the relevant local authority, and such authority may adopt an interpretation of an aspect of local law which differs from the advice that has been given to the Corporation. There can be no assurance that contracts, joint ventures, licences, licence applications or other legal arrangements will not be adversely affected by the actions of government authorities and the effectiveness of and enforcement of such arrangements in these jurisdictions. In certain jurisdictions, the commitment of local businesses, government officials and agencies and the judicial system to abide by legal requirements and negotiated agreements may be more uncertain and may be susceptible to revision or cancellation, and legal redress may be uncertain or delayed.

In the countries in which the Corporation does business, currently Nigeria, Cameroon, Gabon and the Kurdistan Region of Iraq, the state generally retains ownership of the minerals and consequently retains control of (and in many cases, participates in) the exploration and production of hydrocarbon reserves. Accordingly, these operations may be materially affected by host governments through royalty payments, export taxes and regulations, surcharges, value added taxes, production bonuses and other charges. In addition, transfers of interests typically require government approval, which may delay or otherwise impede transfers, and the government may impose obligations on the Corporation to complete minimum work within specified timeframes. In the future, the Corporation may extend its interests in operations to other countries where similar circumstances may apply.

The Corporation must comply with the regulatory regimes of the countries in which it operates, and such compliance may result in increased expenditure.

The Corporation is subject to extensive government laws and regulations governing prices, taxes, royalties, allowable production, waste disposal, pollution control and similar environmental laws, the export of oil and many other aspects of the oil business.

Although the Corporation believes it has good relations with the current governments of Nigeria, Gabon, Cameroon, Iraq and the Kurdistan Region of Iraq, there can be no assurance that the actions of present or future governments in these countries, or of governments of other countries in which the Corporation may operate in the future, will not materially adversely affect the business or financial condition of the Corporation.

While the Nigeria Production Sharing Contracts do not include the right to produce and sell natural gas, the Corporation does produce a significant amount of natural gas which is associated with the Corporation's oil production. The majority of the Corporation's produced associated natural gas is currently flared, as there is no established market in which to sell the natural gas, nor does the Corporation have the necessary facilities to capture or transport natural gas. The Nigerian government has announced what is commonly known as the "Flares Down by 2008" policy that that will require petroleum producers to reduce the amount of natural gas that is flared in petroleum production. The Nigerian government has not officially announced any details on how this policy will be implemented and has not enacted any legislation implementing the "Flares Down" policy. Consequently, no assurances can be given that the Corporation will be able to comply with such policy.

The Corporation's production may be constrained by production or export quotas.

Nigeria is a member of OPEC, and the Corporation may operate in other OPEC-member countries in the future. Production in OPEC-member countries can be constrained from time to time by OPEC production quotas. In Nigeria, NNPC allocates production quotas among oil producers in Nigeria based on the aggregate of the technical production limits per well for a producer as negotiated between the producer and the Nigerian government. If the aggregate of all the producers' technical production limits exceeds Nigeria's OPEC quota, the production allocations among the producers are reduced pro rata. The Corporation has historically exceeded its production allocation but has applied for and been granted additional quota from the Nigerian government for all of its excess oil production. There can be no assurance that if the Corporation exceeds its allocated quota in the future that it will continue to receive additional quota from the Nigerian government.

In addition to OPEC production quotas, oil producing countries can also implement export quotas. The Corporation may be constrained in exporting oil that it produces in the future due to the imposition of export quotas.

US holders of Common Shares and the Corporation may be subject to sanctions imposed by the US government if the Corporation decides to pursue operations in countries subject to US economic sanctions.

US economic sanctions may be imposed on US holders of Common Shares or the Corporation in connection with future operations in countries subject to US economic sanctions, such as Iran. To date, the Corporation has only had discussions with the Iranian national oil company regarding certain projects. See "Middle East and North Africa — Middle East New Ventures — Iran". Two US sanctions programs, the Iranian Transactions Regulations ("ITR") and the Iran and Libya Sanctions Act ("ILSA") may potentially apply to the Corporation's future activities in Iran if the Corporation decides to undertake substantive activities in that country.

The ITR, which are administered by the Office of Foreign Assets Control ("OFAC") of the US Treasury Department, apply only to US persons and thus would not apply to the Corporation. However, the ITR may apply to US holders of Common Shares. The Corporation has taken steps it feels are sufficient to mitigate the risk to US holders but there can be no assurance that such steps will be successful. If the OFAC takes a different view of these steps and pursues enforcement of the ITR, US holders may be subject to a range of civil and criminal penalties. The imposition of such penalties may have a material adverse effect on the price of the Common Shares.

The ILSA grants the US President authority to impose sanctions against persons or entities found by the President to have knowingly made investments in Iran's petroleum industry of \$20 million or more in any twelve month period. Sanctions could include restrictions on obtaining credit from US financial institutions and the US export-import bank and on the ability of the Corporation to procure goods, services and technology from the US. To date, the Corporation has not invested the requisite amount in Iran to trigger ILSA sanctions. Additionally, the Corporation understands that the US government has not yet imposed any sanctions under ILSA, despite having a number of foreign investment projects in Iran under investigation.

The Corporation may in the future invest sufficient money in activities in Iran to trigger ILSA and cannot predict future interpretation of ILSA by the US government regarding any such future activities. It is possible that the US President may determine that these future activities constitute violations of ILSA and subject the Corporation to sanctions. The imposition of sanctions could have an adverse impact on the Corporation's business, results of operations or financial condition.

Risks relating to the Common Shares

Uncertainties exist as to the market price and liquidity of the Common Shares as there has been no prior public market for such shares.

Prior to this offering, there has been no public market for the Common Shares. The Corporation has applied to have its Common Shares listed on the TSX. The Corporation cannot predict the extent to which an active market for the Common Shares will develop or be sustained after the offering, or how the development of such a market might affect the market price for the Common Shares. An illiquid market for the Common Shares may result in lower trading prices and increased volatility, which could adversely affect the value of an investment.

The initial public offering price has been determined by negotiation among the Corporation, AOG and the Underwriters based on a number of factors, including market conditions in effect at the time of the offering, that may not be indicative of future performance. The market price of the Common Shares may fall below the offer price or could fluctuate substantially due to a number of factors.

The controlling shareholder(s) of the Corporation will exercise significant control over the affairs of the Corporation.

Upon completion of this offering, AOG will own 107,400,100 Common Shares and control approximately 77.8 per cent (76.7 per cent if the Over-Allotment Option is exercised in full) of the aggregate voting shares of the Corporation which will allow AOG to control substantially all the actions taken by the shareholders of the Corporation, including the election of directors. It is likely that AOG will have sufficient voting power to, among other things, amend the articles and by-laws of the Corporation, delay, deter or prevent a change in control of the Corporation that might otherwise be beneficial to its shareholders and may also discourage acquisition bids for the Corporation and limit the amount certain investors may be willing to pay for the Common Shares.

Certain directors and senior management of the Corporation hold positions with AOG and other companies, some of which operate in the petroleum industry. These other positions could create, or appear to create, potential conflicts of interest when these directors and senior management are faced with decisions that could have different implications for the Corporation and their other business interests. In the past, the Corporation has appointed committees of independent directors to evaluate opportunities where conflicts of interest exist or are perceived to exist, and the Corporation will continue to deal with conflicts in this fashion. Although the Corporation expects that such conflicts will be handled in accordance with the CBCA and its corporate governance policies, there is no assurance that all conflicts will be adequately addressed.

Although the Corporation has entered into an agreement with AOG in which AOG has agreed to conduct its upstream petroleum business entirely through the Corporation, to not compete with the Corporation in such business and to offer the Corporation any upstream petroleum business opportunities made available to AOG, in each case so long as AOG and Jean Claude Gandur together own not less than 25 per cent of the issued and outstanding Common Shares, it is nonetheless possible that other conflicts could arise that may ultimately be resolved in a manner unfavourable to the Corporation.

Sales of Common Shares by controlling shareholder(s) could have an adverse effect on the price of the Common Shares.

In connection with the offering, the Corporation and AOG have agreed to certain restrictions on the sale or other disposition of the Common Shares for a period of 180 days from the date of closing of this offering, subject to certain exceptions. See "Plan of Distribution". The Corporation cannot predict whether substantial numbers of the Common Shares will be sold in the open market following the expiry of the lock-up period. In particular, there can be no assurance that AOG will not reduce its holding of Common Shares or dividend or otherwise distribute the Common Shares it holds to the beneficial owners of AOG. Sales of a large number of the Common Shares in the public markets, or the potential for such sales, could decrease the trading price of the Common Shares and could impair the Corporation's ability to raise capital through future offerings of Common Shares.

Investors may face risks related to the Corporation's holding company structure.

Following the closing of the offering, the Corporation will hold all of its assets in its wholly owned subsidiary, APNV. In the event of insolvency, liquidation or other reorganization of APNV, the holders of the Common Shares will have no right to proceed against the assets of APNV or to cause the liquidation or bankruptcy of the company under applicable bankruptcy laws. Creditors of APNV would be entitled to payment in full from such assets before the Corporation, as a shareholder, would be entitled to receive any distribution therefrom. Claims of creditors of APNV will have priority with respect to the assets and earnings of the company over the claims of the Corporation, except to the extent that the Corporation may itself be a creditor with recognized claims against APNV ranking at least *pari passu* with such other creditors, in which case the claims of the Corporation would still be effectively subordinate to any mortgage or other liens on the assets of APNV and would be subordinate to any indebtedness of APNV.

ELIGIBILITY FOR INVESTMENT

Subject to certain assumptions, limitations and restrictions, in the opinion of Fasken Martineau DuMoulin LLP, counsel to Addax Petroleum Corporation and APNV, and Fraser Milner Casgrain LLP, counsel to the Underwriters, the Offered Shares, if as and when listed on a prescribed stock exchange (including the TSX), will be qualified investments for a trust governed by a registered retirement savings plan, a registered retirement income fund, a registered education savings plan or a deferred profit sharing plan under the *Income Tax Act* (Canada) and the regulations thereunder.

LEGAL PROCEEDINGS

Neither Addax Petroleum Corporation nor APNV is a party to, nor are any their respective properties subject to, any material legal proceedings nor are any such proceedings known by the Addax Petroleum Corporation to be contemplated.

LEGAL MATTERS

Certain legal matters relating to the securities offered hereby have been passed upon, on behalf of Addax Petroleum Corporation and APNV, by Fasken Martineau DuMoulin LLP and, on behalf of the Underwriters, by Fraser Milner Casgrain LLP.

AUDITORS, REGISTRAR AND TRANSFER AGENT

The auditors of Addax Petroleum Corporation and APNV are Deloitte & Touche LLP, Chartered Accountants, 3000 Scotia Centre, 700 - 2nd Street SW, Calgary, Alberta, T2P 0S7.

Computershare Investor Services Inc. at its principal office in Calgary, Alberta is the registrar and transfer agent for the Common Shares.

INTEREST OF EXPERTS

None of Fasken Martineau DuMoulin LLP, Fraser Milner Casgrain LLP, Netherland, Sewell & Associates, Inc. or any director, officer, employee or partner thereof, has received or will receive a direct or indirect interest in the property of Addax Petroleum Corporation or APNV or any of their respective associates or affiliates. As at the date hereof, the aforementioned persons, and companies beneficially own, directly or indirectly, (both before and after giving effect to this offering assuming said persons do not subscribe for Common Shares) less than one per cent of the securities of Addax Petroleum Corporation or APNV and their respective associates and affiliates. None of the aforementioned persons or companies, nor any director, officer, partner or employee of any of the aforementioned persons or companies is or is expected to be elected, appointed or employed as a director, officer or employee of Addax Petroleum Corporation or APNV or of any of their respective associates or affiliates.

ADDITIONAL INFORMATION

Additional information relating to the Corporation is available through the Internet on the Canadian System for Electronic Document Analysis and Retrieval (SEDAR) which can be accessed at www.sedar.com.

STATUTORY RIGHTS OF WITHDRAWAL AND RESCISSION

Securities legislation in certain of the provinces of Canada provides purchasers with the right to withdraw from an agreement to purchase securities. This right may be exercised within two business days after receipt or deemed receipt of a prospectus or any amendment. In several of the provinces, securities legislation further provides a purchaser with remedies for rescission or, in some jurisdictions, damages if the prospectus or any amendment contains a misrepresentation or is not delivered to the purchaser, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province for the particulars of these rights or consult with a legal advisor.

REPORT ON RESERVES DATA BY INDEPENDENT QUALIFIED RESERVES EVALUATOR

FORM 51-101F2

To the Board of Directors of Addax Petroleum Corporation:

1. We have evaluated Addax Petroleum N.V.'s (the "Corporation") reserves data as at September 30, 2005. The reserves data consists of the following:
 - (a) (i) proved and proved plus probable and proved plus probable plus possible oil reserves estimated using forecast prices and costs; and
 - (ii) the related estimated future net revenue; and
 - (b) (i) proved and proved plus probable and proved plus probable plus possible oil reserves estimated using constant prices and costs; and
 - (ii) the related estimated future net revenue.
2. The reserves data are the responsibility of the Corporation's management. Our responsibility is to express an opinion on the reserves data based on our evaluation.

We carried out our evaluation in accordance with standards set out in the Canadian Oil and Gas Evaluation Handbook (the "COGE Handbook") prepared jointly by the Society of Petroleum Evaluation Engineers (Calgary Chapter) and the Canadian Institute of Mining, Metallurgy & Petroleum (Petroleum Society).

3. Those standards require that we plan and perform an evaluation to obtain reasonable assurance as to whether the reserves data are free of material misstatement. An evaluation also includes assessing whether the reserves data are in accordance with principles and definitions presented in the COGE Handbook.
4. The following table sets forth the estimated forecast net revenue (before deduction of taxes) attributed to proved plus probable reserves, estimated using forecast prices and costs and calculated using a discount rate of 10 percent, included in the reserves data of the Company evaluated by us as at September 30, 2005 and identifies the respective portions thereof that we have evaluated and reported on to the Corporation's management/Board of Directors:

**Oil Reserves and Future Net Revenues
Based on Forecast Prices and Costs
as at September 30, 2005**

REPORT OF MANAGEMENT AND DIRECTORS ON RESERVES DATA AND OTHER INFORMATION

FORM 51-101F3

Management of Addax Petroleum Corporation (the "Corporation") are responsible for the preparation and disclosure of information with respect to the Corporation's oil and gas activities in accordance with securities regulatory requirements. This information includes reserves data, which consist of the following:

- (a) (i) proved, proved plus probable and proved plus probable plus possible oil and gas reserves estimated as at September 30, 2005 using forecast prices and costs; and
- (ii) the related estimated future net revenue; and
- (b) (i) proved, proved plus probable and proved plus probable plus possible oil and gas reserves estimated as at September 30, 2005 using constant prices and costs; and
- (ii) the related estimated future net revenue.

An independent qualified reserves evaluator has evaluated the Corporation's reserves data. The report of the independent qualified reserves evaluator is being filed with securities regulatory authorities concurrently with this report.

The Board of Directors of the Corporation has:

- (a) reviewed the Corporation's procedures for providing information to the independent qualified reserves evaluator;
- (b) met with the independent qualified reserves evaluator to determine whether any restrictions affected the ability of the independent qualified reserves evaluator to report without reservation; and
- (c) reviewed the reserves data with management and the independent qualified reserves evaluator.

The Board of Directors has reviewed the Corporation's procedures for assembling and reporting other information associated with oil and gas activities and has reviewed that information with management. The Board of Directors has approved:

- (a) the content and filing with securities regulatory authorities of the reserves data and other oil and gas information;
- (b) the filing of the report of the independent qualified reserves evaluator on the reserves data; and
- (c) the content and filing of this report.

Because the reserves data are based on judgments regarding future events, actual results will vary and the variations may be material.

AUDITORS' CONSENT

We have read the base PREP prospectus of Addax Petroleum Corporation (the "Corporation") dated February 7, 2006 relating to the sale and issue of 21,000,000 common shares of the Corporation (the "Prospectus"). We have complied with Canadian generally accepted standards for an auditor's involvement with offering documents.

We consent to the use in the Prospectus of our report to the directors of the Corporation on the balance sheet of the Corporation as at November 30, 2005. Our report is dated December 2, 2005 (except as to note 2 which is as of February 7, 2006).

We also consent to the use in the Prospectus of our report to the directors of the Corporation and the directors of Addax Petroleum N.V. on the consolidated balance sheets of Addax Petroleum N.V. as at December 31, 2004 and 2003 and the consolidated statements of operations, retained earnings and cash flows for each of the years in the three-year period ended December 31, 2004. Our report is dated December 2, 2005 (except as to note 18 which is as of February 7, 2006).

INDEX TO FINANCIAL STATEMENTS

PRO FORMA CONSOLIDATED FINANCIAL STATEMENTS OF ADDAX PETROLEUM CORPORATION	F-2
AUDITED CONSOLIDATED FINANCIAL STATEMENTS OF ADDAX PETROLEUM N.V.	F-7
AUDITED FINANCIAL STATEMENTS OF ADDAX PETROLEUM CORPORATION	F-27

COMPILATION REPORT

To the Directors of
Addax Petroleum Corporation:

We have read the accompanying unaudited pro forma consolidated balance sheet of Addax Petroleum Corporation (the "Corporation") as at September 30, 2005 and the unaudited pro forma consolidated statements of operations for the nine months ended September 30, 2005 and for the year ended December 31, 2004, and have performed the following procedures.

1. Compared the figures in the columns captioned "APC" to the audited balance sheet of the Corporation as at November 30, 2005 and found them to be in agreement. The Corporation has yet to commence operations and no statements of operations exist for any period.
2. Compared the figures in the columns captioned "APNV" to the unaudited consolidated financial statements of Addax Petroleum N.V. as at September 30, 2005 and for the nine months then ended, and the audited consolidated financial statements of Addax Petroleum N.V. as at December 31, 2004 and for the year then ended and found them to be in agreement.
3. Made enquiries of certain officials of the Corporation who have responsibility for financial and accounting matters about:
 - (a) the basis for determination of the pro forma adjustments; and
 - (b) whether the unaudited pro forma consolidated financial statements comply as to form in all material respects with the regulatory requirements of the various Securities Commissions and similiar regulatory authorities in Canada.

The officials of the Corporation:

- (a) described to us the basis for determination of the pro forma adjustments; and
 - (b) stated that the unaudited pro forma consolidated financial statements comply as to form in all material respects with the regulatory requirements of the various Securities Commissions and similiar regulatory authorities in Canada.
4. Read the notes to the unaudited pro forma consolidated financial statements and found them to be consistent with the basis described to us for determination of the pro forma adjustments.
 5. Recalculated the application of the pro forma adjustments to the aggregate of the amounts in the columns captioned "APC" and "APNV" as at September 30, 2005, and for the nine months then ended and for the year ended December 31, 2004, and found the amounts in the column captioned "APC Pro Forma" to be arithmetically correct.

A pro forma financial statement is based on management assumptions, and adjustments which are inherently subjective. The foregoing procedures are substantially less than either an audit or a review, the objective of which is the expression of assurance with respect to management's assumptions, the pro forma adjustments, and the application of the adjustments to the historical financial information. Accordingly, we express no such assurance. The foregoing procedures would not necessarily reveal matters of significance to the unaudited pro forma financial statements, and we therefore make no representation about the sufficiency of the procedures for the purposes of a reader of such statements.

ADDAX PETROLEUM CORPORATION
NOTES TO UNAUDITED PRO FORMA CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2004 and September 30, 2005
(unaudited)

1. BASIS OF PRESENTATION

The accompanying unaudited pro forma consolidated financial statements (the "Pro Forma Financial Statements") of Addax Petroleum Corporation (the "Corporation") have been prepared by management in accordance with Canadian generally accepted accounting principles for inclusion in a base PREP prospectus relating to the initial public offering of common shares of the Corporation.

The Pro Forma Financial Statements have been prepared from and should be read in conjunction with:

- The audited balance sheet of the Corporation as at November 30, 2005; and
- The audited consolidated financial statements of Addax Petroleum N.V. ("APNV") as at December 31, 2004 and 2003 and for each of the years in the three year period ended December 31, 2004 and the unaudited consolidated financial statements of APNV as at and for the nine month period ended September 30, 2005.

Accounting policies used in the preparation of the Pro Forma Financial Statements are in accordance with those used in the preparation of APNV's audited consolidated financial statements as at and for the year ended December 31, 2004.

Other information which was available at the time of preparation of the Pro Forma Financial Statements has also been considered. In the opinion of management, these Pro Forma Financial Statements include all material adjustments necessary for fair presentation.

The underlying assumptions for the pro forma adjustments provide a reasonable basis for presenting the significant financial effects directly attributable to the transactions discussed herein, however, the Pro Forma Financial Statements are not necessarily indicative of the results of operations expected in future years.

2. PRO FORMA ADJUSTMENTS

The unaudited pro forma consolidated balance sheet gives effect to the following transactions as if they had occurred on September 30, 2005 while the unaudited pro forma consolidated statements of operations for the nine month period ended September 30, 2005 and for the year ended December 31, 2004 give effect to the following transactions as if they had occurred on January 1, 2004.

- 2.1 The initial public offering of 21,000,000 common shares of the Corporation for net proceeds of \$291,457,000.
- 2.2 Concurrently with the closing of the initial public offering, the acquisition of all of the issued and outstanding common shares of APNV by the Corporation in exchange for 117,000,000 common shares and cash consideration of \$41,637,000.

3. EARNINGS PER SHARE

Pro forma earnings per share for the nine months ended September 30, 2005 and the year ended December 31, 2004 have been calculated using 138,000,100 outstanding common shares.

AUDITORS' REPORT

To the directors of
Addax Petroleum Corporation and Addax Petroleum N.V.:

We have audited the consolidated balance sheets of Addax Petroleum N.V. as at December 31, 2004 and 2003 and the consolidated statements of operations, retained earnings and cash flows for each of the years in the three year period ended December 31, 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2004 and 2003 and the results of its operations and its cash flows for each of the years in the three year period ended December 31, 2004, in accordance with Canadian generally accepted accounting principles.

Calgary, Canada
December 2, 2005
(except as to Note 18
which is as of February 7, 2006)

ADDAX PETROLEUM N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2004 and 2003 and September 30, 2005

(US\$, except as noted. Tabular amounts in US\$ 000s, except as noted)

**Amounts as at September 30, 2005 and for the nine month periods ended
September 30, 2005 and 2004 are unaudited**

1. GENERAL

Addax Petroleum N.V. ("Addax") was incorporated on August 27, 1999 and is a registered Netherlands Antilles corporation. Addax is a wholly-owned subsidiary of The Addax and Oryx Group Ltd. ("AOG"). Addax and its subsidiaries (collectively, the "Company") are involved in the exploration, appraisal, development and production of crude oil and natural gas.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The consolidated financial statements include the accounts of Addax and all of its subsidiaries and are prepared in accordance with Canadian generally accepted accounting principles. Subsidiaries are consolidated from the date on which control is transferred to the Company and ceases on the date on which control is transferred out of the Company.

Inter-company balances and transactions, including inter-company profits and unrealized profits and losses are eliminated.

Measurement uncertainty

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingencies at the date of the consolidated financial statements and the reported amounts of revenue and expenses arising during the reporting period. Actual results could differ from these estimates and the differences could be material.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively.

The amount recorded for depletion and depreciation of property, plant and equipment, the provision for asset retirement obligations and the test for impairment of property, plant and equipment are based on estimates of oil and natural gas reserves, production rates, commodity prices, future costs and other relevant assumptions. By their nature, these estimates are subject to measurement uncertainty and the effect on the consolidated financial statements of changes in such estimates in future years could be significant.

Property, plant and equipment

The Company follows the full cost method of accounting for oil and natural gas exploration and development activities whereby all costs associated with exploring for and developing oil and natural gas reserves are initially capitalized on a country by country cost centre basis. Capitalized costs include expenditures on acquiring exploration and development licences, land acquisition, geological and geophysical activities, drilling and testing both productive and non-productive wells, acquiring and developing oil and natural gas reserves in place, and financing and administrative costs directly attributable to specific new exploration and development projects until the necessary facilities are completed and ready for use.

ADDAX PETROLEUM N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2004 and 2003 and September 30, 2005

(US\$, except as noted. Tabular amounts in US\$ 000s, except as noted)

**Amounts as at September 30, 2005 and for the nine month periods ended
September 30, 2005 and 2004 are unaudited**

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Gains or losses are not recognized upon the disposition of oil and natural gas properties unless such a disposition would result in a change in the depletion rate by 20 per cent or more.

The costs related to each cost centre are depleted on a unit-of-production basis based on the Company's share of gross estimated proved reserves, before royalties, as estimated by independent reservoir engineers. Reserves and production are converted to equivalent units on the basis of six thousand cubic metres of natural gas to one barrel of oil, reflecting the approximate relative energy content. Costs of acquiring and evaluating unproved properties and certain costs associated with major development projects are not subject to depletion until proved reserves are assigned and production commences or the costs are impaired.

Property, plant and equipment other than oil and natural gas properties is stated at cost less accumulated depreciation. Depreciation is calculated on a straight-line basis over the estimated life of the assets, which ranges from 3 to 10 years.

The Company assesses the carrying amount of its oil and natural properties for impairment annually or as circumstances dictate. An impairment is deemed to exist when the carrying amount exceeds the estimated undiscounted future net cash flows associated with the Company's proved oil and natural gas reserves. In such situations, the impairment is measured as the excess of the carrying amount over the estimated discounted future net cash flows associated with the Company's proved and probable oil and natural gas reserves. The discount rate used is the Company's risk free interest rate. Any impairment loss is charged to earnings in the period in which the impairment occurs.

The carrying values of unproved properties and major development projects are limited to their net realizable value and are reviewed at least annually for impairment. Any impairment is included in costs subject to depletion in the period of the impairment.

Cost centres in the pre-production stage are assessed at each reporting date to determine whether it is likely that net costs, in the aggregate, may be recovered in the future. Costs considered unlikely to be recovered are expensed during the period.

Asset retirement obligations

The Company recognizes the fair value of a liability for an asset retirement obligation in the period in which it is incurred with a corresponding increase in the carrying value of the related asset. The fair value is determined on the basis of independent engineering and environmental studies for each well or facility. The liability is subsequently adjusted for the passage of time, which is recognized as accretion expense and included in depletion, depreciation and accretion in the consolidated statement of operations. The fair value of the liability and the carrying value of the related asset are also adjusted due to revisions in either the timing or the amount of the original estimated cash flows associated with the liability. Obligations settled during the period are charged against the liability recorded. Gains or losses on settlement are recognized in the period of settlement.

Interests in joint ventures

The consolidated financial statements include only the Company's proportionate share of assets, liabilities, revenues and expenses from its corporate and unincorporated joint ventures.

ADDAX PETROLEUM N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
December 31, 2004 and 2003 and September 30, 2005
(US\$, except as noted. Tabular amounts in US\$ 000s, except as noted)
Amounts as at September 30, 2005 and for the nine month periods ended
September 30, 2005 and 2004 are unaudited

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Cash and cash equivalents

Cash includes cash on hand and cash with banks. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less.

Inventories and underlift

Inventories, including parts and consumables and crude oil inventories, and crude oil underlifts are recorded at the lower of cost and net realizable value. Cost is determined on a first-in, first-out basis.

Foreign currency transactions

The Company's reporting currency is the United States ("US") dollar as the majority of its transactions are denominated in this currency.

Transactions in foreign currencies are recorded at rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to US dollars at the foreign exchange rate in effect at the balance sheet date.

Income taxes

The Company follows the liability method of accounting for income taxes under which the future tax consequences are recognized for temporary differences between the tax bases of assets and liabilities and their carrying value for financial reporting purposes. Future income tax assets and liabilities are measured using enacted or substantively enacted income tax rates expected to apply in the years in which those temporary differences are expected to reverse. The effect of a change in income tax rates on future income tax assets and liabilities is recognized in the period in which the change occurs.

The Company earns capital investment allowances ("CIAs") on capital expenditures in Nigeria. The future income tax benefits arising from CIAs are recorded when the CIAs are earned and reduce the carrying amount of property, plant and equipment. CIAs are charged to future income tax in the statement of operations as the tax benefits are realized.

Revenue recognition

Oil and natural gas sales are recognized in the consolidated statement of operations when the significant risks and rewards of ownership have been transferred to the buyer, which typically occurs at the lifting date. Revenue from services rendered is recognized in the consolidated statement of operations in proportion to the stage of completion of the transaction at the balance sheet date. Overlifts are accounted for as deferred income.

Substantially all of the Company's operations are conducted under production sharing contracts ("PSCs") with foreign governments. Under the PSCs, the Company and its other non-governmental partners, if any, pay all operating and capital costs. Each PSC establishes specific terms for the Company to recover these costs in accordance with a formula based on monthly production volumes ("Cost Recovery Oil") and to receive a share of production in excess of the Cost Recovery Oil ("Profit Oil"). Profit Oil attributable to the government includes an amount in respect of all deemed income taxes payable by the Company under the

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

laws of the respective country. All other government interests, other than income taxes, are considered to be royalty interests.

Derivative financial instruments and commodity contracts

The Company may use derivative financial instruments (forward exchange contracts, interest rate swaps and options) to manage its exposure to market risks resulting from fluctuations in foreign exchange rates, interest rates, and commodity prices. These derivative financial instruments are not used for trading or speculative purposes.

Gains and losses on derivative instruments that are designated as and determined to be effective hedges are deferred and recognized in the period of settlement as a component of the related transaction. If a derivative instrument ceases to be effective as a hedge or is terminated, hedge accounting is discontinued and future gains and losses are recognized in the consolidated statement of operations in the current period.

Derivative instruments that are not designated as hedges for accounting purposes are recorded in the consolidated balance sheet at fair value with any resulting gain or loss recognized in the consolidated statement of operations in the current period.

	<u>465,763</u>	<u>495,989</u>	<u>295,694</u>
Corporate assets	12,877	4,648	3,183
Accumulated depreciation	<u>(6,696)</u>	<u>(2,955)</u>	<u>(1,943)</u>
	<u>6,181</u>	<u>1,693</u>	<u>1,240</u>
Balance	<u><u>471,944</u></u>	<u><u>497,682</u></u>	<u><u>296,934</u></u>

During the period ended September 30, 2005, general and administrative expenses of \$15.0 million (September 30, 2004 — \$3.7 million; December 31, 2004 — \$24.0 million; December 31, 2003 — \$19.1 million; December 31, 2002 — \$9.0 million) were capitalized.

ADDAX PETROLEUM N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2004 and 2003 and September 30, 2005

(US\$, except as noted. Tabular amounts in US\$ 000s, except as noted)

Amounts as at September 30, 2005 and for the nine month periods ended
September 30, 2005 and 2004 are unaudited

3. PROPERTY, PLANT AND EQUIPMENT (Continued)

Property, plant and equipment by cost centre is as follows:

Cost Centre	September 30,	December 31,	
	2005	2004	2003
	(unaudited)		
Nigeria	452,527	485,802	293,091
Cameroon	3,960	3,321	2,603
Gabon	9,276	6,866	-
Other corporate assets	6,181	1,693	1,240
Balance, end of period	471,944	497,682	296,934

Included in property, plant and equipment are certain costs not subject to depletion and depreciation as follows:

	September 30,	December 31,	
	2005	2004	2003
	(unaudited)		
Unproved properties			
Nigeria	-	-	10,758
Cameroon	3,960	3,321	2,603
Gabon	9,276	6,866	-
Major development projects			
Nigeria	-	184,686	19,326
	13,236	194,873	32,687

In March 2003, the Company acquired the non-controlling interest in one of its subsidiaries for \$21 million. The excess of the recorded value of the non-controlling interest over the consideration paid has been recognized as a reduction in property, plant and equipment of the Nigerian cost centre.

4. ASSET RETIREMENT OBLIGATIONS

The asset retirement obligation movements are as follows:

	September 30,	December 31,	
	2005	2004	2003
	(unaudited)		
Balance, beginning of period	12,268	11,953	5,835
Asset retirement obligations incurred	10,912	-	5,593
Revisions of previous estimates	-	(698)	-
Accretion expense	1,565	1,013	525
Balance, end of period	24,745	12,268	11,953

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2004 and 2003 and September 30, 2005

(US\$, except as noted. Tabular amounts in US\$ 000s, except as noted)

**Amounts as at September 30, 2005 and for the nine month periods ended
September 30, 2005 and 2004 are unaudited**

5. LONG-TERM DEBT

Debt financing is provided through a syndicated \$300 million senior secured reducing revolving credit facility (the "Facility"). The Facility expires on December 31, 2008. The borrowing base is re-determined semi-annually based on an independent engineer's evaluation of the Company's oil and natural gas reserves, subject to the approval of the syndicate.

The amounts drawn under the Facility bear interest at floating rates linked to LIBOR plus a margin determined in relation to the percentage of utilization of the Facility on the first day of the interest period. The Facility is secured by debentures given by the Company, an assignment of the Company's principal contracts, a pledge over the bank accounts and share pledges of the Company's principal subsidiaries.

At September 30, 2005, the amount outstanding under the Facility was \$100 million (December 31, 2004 — \$65 million; December 31, 2003 — \$nil). The average interest for the period ended September 30, 2005 was 4.6 per cent (December 31, 2004 — 6.4 per cent; December 31, 2003 — 7.1 per cent).

6. SHARE CAPITAL

	<u>September 30,</u> <u>2005</u>	<u>December 31,</u> <u>2004</u>	<u>2003</u>
	(unaudited)		
Authorized: unlimited number of common shares			
Issued and outstanding			
60,030,000 common shares	20,010	20,010	20,010

During 2004, the issued and outstanding common shares were split on a three-for-one basis. Prior periods reflect this split.

7. EARNINGS PER SHARE

Per share information is calculated on the basis of the weighted average number of common shares outstanding during the fiscal period, being 60,030,000 for all periods presented. There are no potentially dilutive shares for all periods presented.

8. PENSION PLANS

The Company has two pension plans.

The employees of Addax Petroleum Development (Nigeria) Ltd. ("APDNL"), a wholly-owned subsidiary of Addax, have a defined benefit plan (the "Nigerian Plan") in which the assets are held in a separate trustee administered fund. The employees of the Geneva branch of Addax Petroleum Services Ltd., a wholly owned subsidiary of the Company, have a defined benefit plan (the "Swiss Plan") complying with the legal requirements of Switzerland in which the assets are held and administered in a separate insurance company. These pension plans are funded by payments by each relevant company, taking into account the respective legal requirements.

The pension costs are accounted for using the projected benefits method whereby the costs are amortized over the service life of the employees in accordance with the advice of qualified actuaries.

ADDAX PETROLEUM N.V.

(US\$, except as noted. Tabular amounts in US\$ 000s, except as noted)
Amounts as at September 30, 2005 and for the nine month periods ended
September 30, 2005 and 2004 are unaudited

8. PENSION PLANS (Continued)

For Nigerian staff, there is also a gratuity plan funded by APDNL. The plan provides employees who retire at age 60 and who have at least 10 years continuous service a lump sum payment of five per cent of pensionable pay for each year worked to a maximum of 24 months of monthly base salary. The projected benefits method has been used to calculate the liability.

Information relating to the Company's defined benefit pension plans is shown in the following tables:

9. INCOME TAXES

At the current time, the majority of the Company's taxable operations are located in Nigeria under PSCs with the Nigerian government. The deemed income tax rate in the Nigerian PSCs is 60 per cent. The provision for income taxes varies from the amounts that would be computed by applying the combined income tax rates set out in the PSCs to net income before provision for income taxes for the following reasons:

	Period ended September 30,		Year ended December 31,		
	2005 (unaudited)	2004 (unaudited)	2004	2003	2002
Income before provision for income taxes	475,486	176,797	233,107	153,068	184,908
Tax at 60%	285,292	106,078	139,864	91,841	110,945
Adjustments to income taxes:					
Non-deductible costs	47,397	24,465	47,115	33,020	21,086
Non-taxable revenues	(1,783)	4,504	(2,518)	(1,905)	2,185
Enhanced tax allowances	(19,844)	-	2,193	-	-
Adjustments in respect of prior years	-	-	4,643	4,067	2,846
Tax allowances not recoverable	(4,320)	-	(22,064)	-	(5,000)
Deduction for countries with lower tax rates	744	426	1,250	344	344
Change in tax terms	-	-	-	-	(25,400)
Provision for income taxes	307,486	135,473	170,483	127,367	107,006

Components of future income taxes

	September 30,	December 31,	
	2005 (unaudited)	2004	2003
The net future tax liability is as follows:			
Differences between tax bases and reported amounts of depreciable and depletable assets		115,459	107,414
Other		(28,234)	(18,865)
Future income tax liabilities		87,225	91,560

In 2002, the Company was notified by the Nigerian authorities that the fiscal terms (royalties, CIAs and income tax rates) under which it operated had been amended. These amendments were to be applied retroactively to January 1, 2000. The royalty rate on oil production was reduced from 20 per cent onshore and 18.5 per cent offshore to variable rates depending on production which averaged 6.5 per cent in 2002 and the income tax rate was reduced from 85 per cent to 60 per cent. As a result of the new fiscal terms, 2002 petroleum sales were reduced by \$5,500,000 for the impact of the changes on Cost Recovery Oil, royalties were reduced by \$53,700,000 and income taxes were increased by \$25,400,000 for amounts related to 2000 and 2001. The overpaid royalty amounts were recorded as prepaid expenses and applied to reduce

11. FINANCIAL INSTRUMENTS

Market risk

The Company's activities expose it to a variety of market risks, including the effects of changes in commodity prices, foreign currency exchange rates and interest rates. The Company uses derivative financial instruments such as options on commodities, foreign exchange contracts and interest rate swaps to manage certain exposures.

The Board of Directors provides principles for overall risk management, as well as policies covering specific areas, such as commodity price risk, foreign exchange risk, interest rate risk and credit risk. These principles include guidelines on the use of derivative financial instruments.

ADDAX PETROLEUM N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2004 and 2003 and September 30, 2005

(US\$, except as noted. Tabular amounts in US\$ 000s, except as noted)

Amounts as at September 30, 2005 and for the nine month periods ended
September 30, 2005 and 2004 are unaudited

11. FINANCIAL INSTRUMENTS (Continued)

(a) Commodity price risk

It is the intention of the Company to cover commodity-pricing exposure in order to safeguard a minimum cash income. The option contracts run for 12 months or less. At September 30, 2005, the Company had the following crude oil derivative contract outstanding:

	<u>Put option</u>
Maturity	March 31, 2006
Volume	27,400 barrels per day
Average price	\$21.00 per barrel

The estimated fair value is disclosed in section (e) below.

(b) Foreign exchange risk

The Company operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to Swiss francs (or "CHF") and the Nigerian Naira against the US dollar. The Company uses both local currency borrowing facilities and forward contracts to hedge their exposure to foreign currency risk. The forward currency contract must be in the same currency as the hedged item.

In December 2004 and January 2005, the Company entered into foreign exchange forward contracts to purchase CHF 18,000,000 for \$15,578,244 for the year ending December 31, 2005. As at September 30, 2005, the Company had purchased forward contracts for the purchase of CHF 13,500,000 for \$11,651,412. These forward contracts fix the exchange rate used to convert a portion of the Company's Swiss franc denominated general and administrative expenses to US dollars. These contracts have not been designated as hedges for accounting purposes. Estimated fair values on these contracts at period end are disclosed in section (e) below.

(c) Interest rate risk

The Company's exposure to market risk for changes in interest rates relates primarily to the Company's long-term debt obligations.

To manage this risk in a cost efficient manner, the Company enters into interest rate swaps, in which the Company agrees to exchange, at specified intervals, the difference between fixed and variable interest amounts calculated by reference to an agreed-upon notional principal amount. These swaps are designated to hedge cash outflows related to interest obligations.

In 2002, in anticipation of receiving a \$50 million loan, the Company entered into two interest rate swap contracts to hedge against possible adverse interest rate fluctuations. These contracts resulted in interest expense at an average fixed rate of 4.4 per cent in exchange for a three-month variable LIBOR rate on two notional principal amounts of \$25 million expiring in August 2004 and August 2005, respectively. The Company drew down \$25 million on the \$50 million loan facility in February 2002 and repaid this amount in May 2003. One of these two swap contracts expired upon repayment of the \$25 million while the other one was determined to be a hedge from the date of the first drawdown on the \$300 million loan facility in November 2004 until its termination date in August 2005.

ADDAX PETROLEUM N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2004 and 2003 and September 30, 2005

(US\$, except as noted. Tabular amounts in US\$ 000s, except as noted)

Amounts as at September 30, 2005 and for the nine month periods ended
September 30, 2005 and 2004 are unaudited

11. FINANCIAL INSTRUMENTS (Continued)

These contracts have not been designated as hedges for accounting purposes. Estimated fair values at period end are disclosed in section (e) below.

(d) Credit risk

Concentrations of credit risk with respect to accounts receivable are limited due to the high portion of amounts due from related parties. Of the Company's significant individual accounts receivable at September 30, 2005, approximately 80 per cent was due from one related party customer (December 2004 — 59 per cent; December 31, 2003 — 81 per cent). Historical experience has indicated no problem in collecting accounts receivable from related companies. Therefore, management believes there is no significant credit risk inherent in the Company's accounts receivable, beyond amount provided for doubtful accounts.

(e) Liquidity risk

The following table sets out the estimated fair values of purchased derivative financial instruments recognized in the consolidated balance sheet in accounts receivable and accounts payable with resulting gains and losses being recognized in other interest and finance charges in the statement of operations. These contracts have not been designated as hedges for accounting purposes.

	<u>September 30,</u> <u>2005</u>
Currency forwards	519
Crude oil put options	—
Interest rate swaps	—

The fair values of other financial instruments including cash and cash equivalents, accounts receivable and accounts payable approximate their carrying values due to the short term to maturity of these items. Other long-term liabilities approximate their carrying value due to minimal risk of change in value to maturity. The fair value of long-term debt approximates its carrying value as it is subject to a floating market rate of interest.

12. CASH FLOWS

(a) Items not affecting cash

 September 30, 2005 and 2004 are unaudited

14. OTHER LONG-TERM LIABILITIES

	September 30, 2005 (unaudited)	December 31, 2004	2003
Disputed tax payable	6,920	-	-
Royalties	8,134	-	-
Pension	2,095	3,778	1,562
Operational	5,533	-	-
Other	2,973	3,094	137
	<u>25,655</u>	<u>6,872</u>	<u>1,699</u>

The tax payable to the Nigerian government relates to the disputed deductibility of the original purchase price of certain Nigerian assets. This dispute was raised by NNPC in 2003 and is still unresolved.

Royalties due to the Nigerian government relate to tax inversion penalties for 2000 and 2005 where the operating cost per barrel exceeded the allowable threshold. There is a 25 per cent penalty charged on the excess. The method of calculating the operational cost per barrel has yet to be agreed between the Corporation and NNPC. Management believes these two matters will not be settled within a year.

Operational liabilities relate to the following:

- i) a dispute relating to the construction and installation of certain platforms and pipelines in 2003 and 2004, amounting to \$2,533,000. All other claims for this contract have been settled. The outstanding amount has been claimed against Addax's insurance. The insurer has offered a 10 per cent settlement. If the contractor does not receive settlement, the contractor is expected to claim against Addax; and
- ii) a dispute relating to the costs of conversion of an FPSO. The dispute has gone to arbitration, but the formal claim documentation has yet to be received from the contractor.

Management believes these two matters will not be settled within a year.

15. COMMITMENTS

Future total commitments relating to Floating Production, Storage and Offloading vessel ("FPSO") leases and exploration and development activities, after September 30, 2005 are as follows:

2005	77,090
2006	213,849
2007	70,194
2008	70,838
2009	46,667
2010	35,365
Thereafter	<u>119,757</u>
Total	<u><u>633,760</u></u>

ADDAX PETROLEUM N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2004 and 2003 and September 30, 2005

(US\$, except as noted. Tabular amounts in US\$ 000s, except as noted)

**Amounts as at September 30, 2005 and for the nine month periods ended
September 30, 2005 and 2004 are unaudited**

15. COMMITMENTS (Continued)

Included in the above table are commitments for the hire of three FPSO vessels ranging from one to eight years.

In addition to the above, the Company has the following work commitments:

Under the Cameroon concession contract there is a first phase work commitment of \$22 million over a three year period, commencing on April 19, 2004, being the date of issuance of the Exploration Authorization by the Cameroon government. The Company has the right to extend the exploration period by an additional two phases of two years each. These additional phases have additional work commitments.

Under the Exploration and Production Sharing Contract offshore Gabon, there is an initial exploration period of four years including a two well commitment that commenced in March 2003. The contract can be renewed twice for an additional three year period per renewal. These additional phases have additional work commitments. The first commitment well was drilled in early 2004, proved to be dry and was subsequently written off, the second remains to be drilled.

16. CONTINGENCIES

The Company is exposed to the possibility of environmental damage arising from its exploration, development and production activities. The Company is responsible for any liabilities arising from such events and has developed a series of strict operating procedures to protect the environment.

Various legal actions arising in the normal course of business have been commenced in Nigeria against the Company. It is the view of management that most of these actions are without any foundation and the Company has provided \$300,000 as its best estimate of losses under these actions.

The Company is liable to pay early termination penalties on its FPSO lease contracts. As at September 30, 2005, the maximum contingent liability arising from early termination of these contracts amounted to \$216.9 million. Management's intent is to carry the contracts to maturity.

The Company's income tax filings are subject to audit by taxation authorities. There are audits in progress and items under review, some that may increase our tax liability. In addition, we have filed notices of objection with respect to certain issues. While the results of these items cannot be ascertained at this time, we believe we have an adequate provision for income taxes based on available information.

17. RELATED PARTY TRANSACTIONS

The following transactions took place between the Company and AOG and its other subsidiary companies.

	Period ended September 30,		Year ended December 31,		
	2005 (unaudited)	2004 (unaudited)	2004	2003	2002
Sales to Addax B.V.	512,254	291,447	371,444	386,613	284,062
Charges:					
Addax Bunkering Services	(11,437)	(6,698)	(10,406)	-	
AOG	(375)	(375)	(2,809)	(3,860)	(5,219)
Addax B.V.	(1,236)	(499)	(1,067)	-	
Other items	(1,920)	(1,905)	(1,141)	(1,894)	(935)
Interest and related charges	-	-	-	(47)	(390)

The sales to Addax B.V., the sole marketer of the Company's crude oil (net of NNPC liftings), were made on the same terms and conditions as with Addax B.V.'s non-related customers. The charges from AOG include management services, trademark licence and information technology support. Charges from Addax Bunkering Services are for the purchase of fuel for the Company's bunkering operations. Other items include charges from Addax Limited for the refund of services paid on behalf of the Company. Addax BV and Addax Limited are subsidiaries of AOG. Outstanding balances with related companies are as follows:

Amounts due from (to) related parties as included in accounts receivable and accounts payable in the consolidated balance sheet are as follows:

	September 30,	December 31,	
	2005 (unaudited)	2004	2003
Addax BV	101,080	38,936	31,715
AOG	3,293	100	1,795
Other	2,376	9,736	141

A director of the Company has a consulting contract with a subsidiary pursuant to which the director is paid \$9,000 per month.

18. EVENTS SUBSEQUENT TO SEPTEMBER 30, 2005

Subsequent to September 30, 2005, APNV has paid dividends of \$72 million to AOG. Additionally, APNV has declared a dividend of \$25 million, payable to AOG on February 13, 2006.

AUDITORS' REPORT

To the Directors of
Addax Petroleum Corporation

We have audited the balance sheet of Addax Petroleum Corporation (the "Corporation") as at November 30, 2005. This financial statement is the responsibility of the Corporation's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the balance sheet is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, the balance sheet presents fairly, in all material respects, the financial position of the Corporation as at November 30, 2005, in accordance with Canadian generally accepted accounting principles.

ADDAX PETROLEUM CORPORATION

NOTES TO BALANCE SHEET

As at November 30, 2005

1. FORMATION OF THE CORPORATION

Addax Petroleum Corporation (the "Corporation") was incorporated under the *Canada Business Corporations Act* on September 6, 2005. The Corporation issued 100 initial Common Shares on November 23, 2005, for cash proceeds of CDN\$100.

2. EVENTS SUBSEQUENT TO SEPTEMBER 30, 2005

(a) Issuance of Common Shares

Pursuant to an underwriting agreement to be dated February 8, 2006, the Corporation agreed to sell 21,000,000 Common Shares, at a price ranging from \$15.00 to \$18.50 per Common Share. The final price per Common Share is to be determined on February 8, 2006. In addition, the Corporation has granted the underwriters an option, exercisable for a period of 30 days from the closing of the offering, to purchase up to 2,100,000 additional Common Shares at the offering price.

(b) Acquisition of Addax Petroleum N.V.

Pursuant to a purchase and sale agreement to be dated February 8, 2006, the Corporation will acquire, concurrently with the closing of the offering described in note 2(a) above, all of the issued and outstanding common shares of Addax Petroleum N.V. for cash consideration of between \$42,750,000 and \$52,725,000, depending on the final price of the offering, and 117,000,000 Common Shares of the Corporation.

Dear Sirs:

RBC Dominion Securities Inc. ("RBC") and Merrill Lynch Canada Inc. ("ML"), together the joint bookrunners and lead underwriters, and Scotia Capital Inc. (as co-lead manager), CIBC World Markets Inc., TD Securities Inc., National Bank Financial Inc., Canaccord Capital Corporation, FirstEnergy Capital Corp. and Peters & Co. Limited (collectively, the "Underwriters" and individually, an "Underwriter") understand that (i) Addax (as defined herein) has filed the Preliminary Prospectus and the PREP Prospectus (both as defined herein) with the Securities Commissions (as defined herein), under the PREP Procedures (as defined herein), (ii) Addax Petroleum Corporation ("Addax") proposes to issue and sell 21,000,000 Common Shares (as defined herein) (the "Firm Shares") and (iii) Addax Mining (as defined herein), an indirect wholly-owned subsidiary of The Addax and Oryx Group Ltd. ("AOG"), is currently the sole shareholder of Addax and AOG has agreed to transfer or to cause to be transferred to Addax all of AOG's direct or indirect interest (the "Addax Interest") in Addax Petroleum N.V. ("Addax NV") and, in consideration therefor, Addax has agreed to issue to Addax Mining 117,000,000 Common Shares (as defined herein) and to pay Addax Mining \$55,575,000 from the net proceeds received by Addax pursuant to the issuance of Firm Shares pursuant to the Share Transfer Agreement (as defined herein).

Subject to the terms and conditions contained herein and on the basis of the representations and warranties set forth below, the Underwriters hereby severally and not jointly, in the respective percentages set forth in section 20, offer to purchase from Addax at the Closing Time (as defined herein) and, by its acceptance of the offer made by this letter, Addax hereby agrees to sell to the Underwriters at the Closing Time, all but not less than all of the Firm Shares at a purchase price of \$19.50 per Firm Share, being an aggregate purchase price of \$409,500,000.

In consideration of the Underwriters' agreement to purchase the Firm Shares, by its acceptance of the offer made by this letter Addax hereby grants to the Underwriters an over-allotment option (the "**Over-Allotment Option**"), exercisable in whole or in part by notice given at any one time on or prior to the 30th day following the Closing Date, to purchase from Addax up to an additional 2,100,000 Common Shares (Common Shares in respect of which the Over-Allotment Option is exercised, the "**Over-Allotment Shares**") at the Over-Allotment Closing Time (as defined herein) at a purchase price of \$19.50 per Over-Allotment Share. The notice exercising the Over-Allotment Option shall be delivered to Addax and shall specify the number of Over-Allotment Shares to be purchased by the Underwriters. Upon the furnishing of such notice, the Underwriters shall be committed, severally and not jointly, to purchase the number of Over-Allotment Shares specified in such notice in the respective percentages set forth in section 20, and Addax shall be obligated to sell such Over-Allotment Shares, all in accordance with the provisions hereof.

Notwithstanding the foregoing, any Firm Shares and Over-Allotment Shares that are sold to "Accredited Management" in accordance with applicable Securities Laws as set forth in a list to be delivered by Addax to the Underwriters at least three (3) Business Days prior to the Closing Date will be sold to such persons as substituted purchasers, directly by Addax. The Underwriters' commitment to purchase the Firm Shares or Over-Allotment Shares pursuant to this Agreement will be reduced to the extent that Firm Shares or Over-Allotment Shares are sold to substituted purchasers.

In consideration of the agreement of the Underwriters to purchase the Firm Shares and any Over-Allotment Shares hereunder and to offer them to the public and of the services to be rendered by the Underwriters in connection herewith:

- (a) Addax agrees to pay the Underwriters at the Closing Time, a fee of \$0.975 for each Firm Share, being an aggregate fee of \$20,475,000; and
- (b) Addax agrees to pay the Underwriters at the Over-Allotment Closing Time, a fee of \$0.975 for each Over-Allotment Share, being an aggregate fee of \$2,047,500 if the Over-Allotment Option is exercised in full.

The terms and conditions among Addax, AOG, and Addax NV and the Underwriters are set forth below.

1. Definitions and Interpretation.

- (a) Where used in this agreement, the following terms shall have the following meanings:

"**10b-5 Disclosure Letters**" means, collectively, the Company Counsel 10b-5 Disclosure Letter, the Herbert Smith 10b-5 Disclosure Letter and the FMC 10b-5 Disclosure Letter;

"**Addax**" means Addax Petroleum Corporation, a corporation incorporated under the *Canada Business Corporations Act* and, unless the context otherwise requires, includes Addax NV and the other Addax Subsidiaries;

"**Addax Cameroon**" means Addax Petroleum Cameroon Limited, a corporation incorporated under the laws of Isle of Man;

"**Addax Development**" means Addax Petroleum Development (Nigeria) Limited, a corporation incorporated under the laws of Nigeria;

"**Addax Exploration**" means Addax Petroleum Exploration (Nigeria) Limited, a corporation incorporated under the laws of Nigeria;

"**Addax Financial Statements**" means (i) the consolidated financial statements of Addax NV, consisting of the audited balance sheets as at December 31, 2004 and 2003, the audited statements of income and cash flows for each of the years in the three-year period ended December 31, 2004 and the notes thereto, together with the report of Deloitte & Touche LLP thereon; (ii) the unaudited consolidated balance sheet as at September 30, 2005 and the unaudited consolidated statements of income and cash flows for the nine-month period ended September 30, 2005 and 2004 of Addax NV and the notes thereto; and (iii) and the consolidated balance sheet of Addax as at November 30, 2005 and the notes thereto, together with the report of Deloitte & Touche LLP thereon, all as contained in the Prospectus;

"**Addax Gabon**" means Addax Petroleum Gabon Limited, a corporation incorporated under the laws of Isle of Man;

"**Addax International**" means Addax Petroleum International Limited, a corporation incorporated under the laws of Isle of Man;

"**Addax Mining**" means Addax Mining Holdings BV, an indirect wholly-owned subsidiary of AOG incorporated under the laws of the Netherlands;

"**Addax NV**" means Addax Petroleum N.V., a corporation incorporated under the laws of the Netherland Antilles;

"**Addax Offshore**" means Addax Petroleum (Nigeria Offshore) Limited, a corporation incorporated under the laws of Nigeria;

"**Addax Offshore 2**" means Addax Petroleum (Nigeria Offshore 2) Limited, a corporation incorporated under the laws of Nigeria;

"**Addax Overseas**" means Addax Petroleum Overseas Limited, a corporation incorporated under the laws of the British Virgin Islands;

"**Addax Services**" means Addax Petroleum Services Limited, a corporation incorporated under the laws of the Isle of Man;

"**Addax Subsidiaries**" means Addax NV and all corporations, partnerships, trusts and other unincorporated entities beneficially owned, directly or indirectly, by Addax NV from time to time, and includes at all times Addax Overseas, Addax Services, Addax Development, Addax Exploration, Addax Cameroon, Addax Gabon, Addax International, Addax Offshore and Addax Offshore 2;

"**affiliate**" has the meaning ascribed to that term in the *Securities Act* (Alberta);

"**affiliated entity**" has the meaning ascribed to the term "**affiliate**" under Rule 501(b) of the *U.S. Securities Act*;

"**Agreement**" means the agreement resulting from the acceptance by Addax and AOG of the offer made by the Underwriters by this letter, as it may be amended from time to time;

"**AOG**" means The Addax and Oryx Group Ltd. and, unless the context otherwise requires, includes each of its subsidiaries other than Addax and the Addax Subsidiaries;

"**Beneficiaries**" has the meaning given to it in section 13(e);

"**Business Day**" means a day other than a Saturday, a Sunday or a day on which the principal chartered banks located in Calgary, Alberta are not open for business;

"**Canadian GAAP**" means Canadian generally accepted accounting principles including as from time to time set out in the Handbook of the Canadian Institute of Chartered Accountants, consistently applied;

"**Claims**" has the meaning given to it in section 13(a);

"**Closing Date**" means February 15, 2006 or such earlier or later date as may be agreed to in writing by Addax and the Underwriters, each acting reasonably, but in any event not later than March 15, 2006, subject to postponement in accordance with section 20;

"**Closing Time**" means 6:45 a.m. (Calgary time) on the Closing Date, or such other time on the Closing Date as may be agreed by Addax and the Underwriters;

"**Common Shares**" means the common shares of Addax having the material attributes described herein, in the Preliminary Prospectus and in the Prospectus;

"**Company Counsel 10b-5 Disclosure Letter**" means a letter to be given on the Closing Date by legal counsel to Addax substantially in customary form for letters of that kind;

"**Contract**" has the meaning given to it in section 6(a)(xv);

"**Credit Facility**" means the amended and restated senior secured revolving credit facility agreement dated June 14, 2005 between Addax NV, Addax Overseas, Addax Development, Addax Exploration and Addax Services and BNP Paribas S.A. and other original lenders;

"**Designated Subsidiaries**" has the meaning ascribed thereto in section 6(b)(vii) hereof;

"**distribution**" means "**distribution**" or "**distribution to the public**", as those terms are defined in the Securities Laws;

"**Distribution Period**" means the period commencing on the date of this Agreement and ending on the date on which all of the Firm Shares and any Over-Allotment Shares have been sold by the Underwriters to purchasers pursuant to the Prospectus;

"**Environmental Authorisation**" means all authorizations, permits, certificates, consents, approvals, resolutions, licences, orders, permissions, exemptions, filings, recordings or registrations required or advisable under Environmental Laws;

"**Environmental Contaminant**" means any substance, activity, condition or other phenomenon the existence of which gives rise or could reasonably be expected, if any action were taken by any governmental agency or third party, to give rise to any notification, control, restriction, consent or other regulation or liability, sanction, order, notice or any requirement or agreed course of action under or arising out of the purported exercise by such government agency of its powers, duties and functions under Environmental Law (but excluding any petroleum products and related sediment and water received, stored or produced on or transported from, and any other consumables brought on to, the site of any property in each case in the ordinary course of business and provided that they are stored, received, produced, transported, consumed and/or used in accordance with good oilfield practice and with applicable Environmental Laws);

"**Environmental Laws**" means all applicable laws, treaties, conventions, statutes, ordinances, by-laws, regulations, orders, directives and decisions rendered by any local, state or federal government, ministry, department or administrative or regulatory agency, including without limitation NNPC, the Nigerian Ministry of Petroleum Resources and the Nigerian Department of Petroleum Resources, relating to the protection of the environment, occupational health and safety or the processing, use, treatment, storage, disposal, discharge, transport or handling of

any pollutants, contaminants, chemicals or industrial, toxic or hazardous wastes or substances;

"Final International Offering Memorandum" means the final international offering memorandum of Addax used in connection with offers and sales of the Firm Shares and the Over-Allotment Shares outside of Canada, which will be of even date with, and accompanied by, the Prospectus;

"Financial Information" means, collectively, the Addax Financial Statements and the sections of the Prospectus entitled "Management's Discussion and Analysis of Financial Condition", "Capitalization" and "Selected Financial Information";

"FMC 10b-5 Disclosure Letter" means a letter to be given on the Closing Date by Fraser Milner Casgrain LLP substantially in customary form for letters of that kind;

"Herbert Smith 10b-5 Disclosure Letter" means a letter to be given on the Closing Date by Herbert Smith LLP substantially in customary form for letters of that kind;

"Income Tax Act" means the *Income Tax Act* (Canada) and the regulations thereunder, in each case as amended;

"Indemnified Parties" and **"Indemnified Party"** have the meanings given to them in section 13(a);

"Indemnifying Parties" and **"Indemnifying Party"** have the meanings given to them in section 13(a);

"Joint Bookrunners" means RBC Dominion Securities Inc. and Merrill Lynch Canada Inc.;

"material change" has the meaning ascribed thereto by the Securities Laws;

"material fact" the meaning ascribed thereto by the Securities Laws;

"misrepresentation" the meaning ascribed thereto by the Securities Laws;

"Mutual Reliance Procedures" means the mutual reliance review system procedures provided for under *National Policy 43-201, Mutual Reliance Review System for Prospectuses and Initial Annual Information Forms*;

"NNPC" means Nigerian National Petroleum Corporation;

"NSAI" means Netherland, Sewell & Associates, Inc., independent oil and natural gas reservoir engineers;

"**NSAI Report**" means the engineering report dated December 5, 2005 prepared by NSAI evaluating the crude oil and natural gas liquids reserves attributable to Addax's properties effective September 30, 2005, in accordance with the standards contained in the Canadian Oil and Gas Evaluators Handbook and the reserves definitions set out by the Canadian Securities Administrators in National Instrument 51-101;

"**Offering**" means the offering by Addax of the Firm Shares and any Over-Allotment Shares pursuant to this Agreement;

"**Offering Documents**" has the meaning given to it in section 5(a)(ii);

"**Over-Allotment Closing Date**" means the second Business Day after the notice of exercise of the Over-Allotment Option is delivered to Addax, but in any event not later than the day which is 30 days after the Closing Date, subject to postponement in accordance with section 20;

"**Over-Allotment Closing Time**" means 6:45 a.m. (Calgary time) on the Over-Allotment Closing Date, or such other time on the Over-Allotment Closing Date as agreed to by Addax and the Underwriters;

"**Preliminary International Offering Memorandum**" means the preliminary international offering memorandum of Addax dated January 16, 2006;

"**Preliminary Prospectus**" means the second amended and restated preliminary base prep prospectus of Addax in the English language dated January 16, 2006, and the French language version thereof, relating to the qualification for distribution of the Firm Shares and Over-Allotment Shares under the Securities Laws in all the Qualifying Jurisdictions;

"**PREP Information**" has the meaning given thereto in section 2(d);

"**PREP Procedures**" means the procedures for post-receipt pricing under National Instrument 44-103 - Post-Receipt Pricing, as currently in effect;

"**PREP Prospectus**" means the final prospectus (omitting the PREP Information in accordance with the PREP Procedures) of Addax in the English language dated February 7, 2006, and the French language version thereof, relating to the qualification for distribution of the Firm Shares and Over-Allotment Shares under the Securities Laws in all the Qualifying Jurisdictions;

"**Prospectus**" has the meaning given thereto in section 2(e);

"**Qualifying Jurisdictions**" means, collectively, each of the provinces of Canada;

"**Relevant Agreements**" means the Crude Oil Supply Agreements, the Management Services Agreement, the Trademark Agreement, the Non-Competition Agreement and the Share Transfer Agreement each as defined in the

Prospectus, and the agreement described in the Prospectus under the heading "Interest of AOG in Material Transactions - Agreement for Services of Jean Claude Gandur";

"**Securities Commission**" means the applicable securities commission or regulatory authority in each of the Qualifying Jurisdictions, and "**Securities Commissions**" means all of them;

"**Securities Laws**" means, collectively, all applicable securities laws of each of the Qualifying Jurisdictions and the United States and the respective regulations, rules, policies, instruments and orders made thereunder together with all applicable published orders, rulings and notices of the Securities Commissions in the Qualifying Jurisdictions and the SEC (as defined in Schedule A) in the United States and all applicable judicial interpretations of terms used in such laws, regulations, rules, policies, instruments and orders;

"**Selling Firm**" has the meaning given to it in section 3(a);

"**Share Transfer Agreement**" has the meaning given to it in the Prospectus;

"**subsidiary**" has the meaning ascribed thereto in the *Securities Act* (Alberta);

"**Supplementary Material**" means, collectively, any amendment to the Preliminary Prospectus, or the Prospectus, any supplemental prospectus or any ancillary materials that may be filed by or on behalf of Addax under the Securities Laws relating to the distribution of the Firm Shares or Over-Allotment Shares;

"**Supplemented PREP Prospectus**" has the meaning given in section 2(c);

"**TSX**" means the Toronto Stock Exchange;

"**Underwriters' Expenses**" has the meaning given to it in section 16(b);

"**Underwriters' Pricing Offer**" has the meaning given to it in section 16(c); and

"**U.S. Securities Act**" means the United States Securities Act of 1933, as amended.

- (b) Unless otherwise indicated, all reference to "\$" or "dollars" in this Agreement shall be references to Canadian dollars.
- (c) Capitalized terms used in this agreement without being defined herein shall have the meaning given to them in the Prospectus, unless the context otherwise requires.
- (d) Any reference in this agreement to a section, subsection, paragraph or subparagraph shall refer to a section, subsection, paragraph or subparagraph of this agreement.

- (e) Any reference to "hereto", "herein", "hereby", "hereunder", "thereof" or similar expressions means and refers to this Agreement and to any particular paragraph or other part of this Agreement.
- (f) Headings have been inserted for convenience of reference only and shall not affect the construction or interpretation of this agreement.
- (g) All words and personal pronouns relating thereto shall be read and construed as the number and gender of the party or parties referred to in each case required and the verb shall be construed as agreeing with the required word or pronoun.

2. Preparation and Filing of Prospectus.

- (a) Addax has prepared and filed with the Alberta Securities Commission (the "**Reviewing Authority**") and the other Securities Commissions the Preliminary Prospectus in accordance with the Securities Laws and received in respect thereof a decision document dated January 16, 2006 in accordance with the Mutual Reliance Procedures. The Reviewing Authority is the designated authority regulating the offering of the Firm Shares and Over-Allotment Shares under the Mutual Reliance Procedures. Addax and the Offering contemplated by this Agreement are eligible to use the PREP Procedures and Addax has filed the Preliminary Prospectus with the Reviewing Authority and each of the Qualifying Authorities in accordance with such procedures.
- (b) Addax has also prepared and filed with the Qualifying Authorities the PREP Prospectus and received in respect thereof a decision document dated February 8, 2006 in accordance with the Mutual Reliance Procedures.
- (c) Addax will prepare and file, promptly and (unless the parties otherwise agree in writing) in any event no later than the close of business on the first business day after the execution and delivery of this Agreement, with the Qualifying Authorities, in accordance with the Mutual Reliance Procedures and with the PREP Procedures, a supplemented prospectus setting forth the PREP Information in the English and French languages, as applicable (the "**Supplemented PREP Prospectus**") in a form approved by the Underwriters and will obtain a decision document under the Mutual Reliance Procedures from or on behalf of each of the Securities Commissions, evidencing that a receipt has been issued for the Prospectus by each of the Securities Commissions, and otherwise fulfil all legal requirements to enable the Firm Shares and Over-Allotment Shares to be offered and sold to the public in each of the Qualifying Jurisdictions through the Underwriters or any other investment dealer or broker registered to transact such business in the applicable Qualifying Jurisdiction.
- (d) The information included in the Supplemented PREP Prospectus that is omitted from the PREP Prospectus in accordance with the PREP Procedures but that is deemed under the PREP Procedures to be incorporated by reference into the

PREP Prospectus as of the date of the Supplemented PREP Prospectus is referred to herein as the "**PREP Information**."

- (e) The final PREP Prospectus for which a receipt has been obtained from the Qualifying Authorities (or a Mutual Reliance decision document has been issued in respect thereof) is herein referred to as the "**Prospectus**", except that, when a Supplemented PREP Prospectus is (1) furnished to the Underwriters for use in connection with offering of the Firm Shares and Over-Allotment Shares or (2) filed with the Qualifying Authorities, the term Prospectus shall refer to such Supplemented PREP Prospectus, including the documents incorporated by reference therein. In the event that Addax opts out of the PREP Procedures prior to filing a base PREP prospectus and instead files a prospectus, such prospectus filed shall constitute the Prospectus, the final PREP Prospectus and the Supplemented PREP Prospectus.
- (f) Prior to the filing of the Prospectus, Addax and AOG shall have allowed the Underwriters to participate fully in the preparation of such document and shall have allowed the Underwriters and their advisors and representatives to conduct all due diligence investigations which they may reasonably require in order to fulfil their obligations as underwriters and in order to enable them to responsibly execute the certificate required to be executed by them in the Preliminary Prospectus and the Prospectus. Each of Addax and AOG shall have furnished to the Underwriters all information relating to Addax and AOG and their business and affairs as required for the preparation of the Preliminary Prospectus and the Prospectus in order to satisfy disclosure requirements under the Securities Laws, and shall provide such additional information to the Underwriters up to the Closing Time (or, if applicable, the Over-Allotment Closing Time), and respond to such inquiries for information from the Underwriters as the Underwriters shall request up to the Closing Time (or, if applicable, the Over-Allotment Closing Time) as the Underwriters may deem necessary to carry out their duties as registrants in connection with the Offering.
- (g) Until the end of the Distribution Period, Addax shall promptly take or cause to be taken all additional steps and proceedings that from time to time may be required under the Securities Laws to continue to qualify the Firm Shares and Over-Allotment Shares for distribution in the Qualifying Jurisdictions or, in the event that the Firm Shares or Over-Allotment Shares have, for any reason, ceased to so qualify, to again qualify the Firm Shares and Over-Allotment Shares for distribution in the Qualifying Jurisdictions.

3. Distribution and Certain Obligations of Underwriters.

- (a) The Underwriters shall offer the Firm Shares and Over-Allotment Shares (as applicable) to the public directly and through other investment dealers or brokers (other than the Underwriters) (each, a "**Selling Firm**") upon the terms and conditions set out in the Prospectus and this agreement in the Qualifying Jurisdictions and shall comply with, and shall require any Selling Firm to agree to

comply with, in all material respects, the Securities Laws in connection with the distribution and sale of the Firm Shares and Over-Allotment Shares. The Underwriters shall promptly notify Addax when, in their opinion, the Underwriters and the Selling Firms have ceased distribution of each of the Firm Shares and Over-Allotment Shares (as applicable) and provide a breakdown of the number of Firm Shares and Over-Allotment Shares distributed in each of the Qualifying Jurisdictions where such breakdown is required for the purpose of calculating fees payable to the Securities Commissions.

- (b) For the purposes of this section 3, the Underwriters shall be entitled to assume that the Firm Shares and Over-Allotment Shares are qualified for distribution by duly registered investment dealers and brokers in any of the Qualifying Jurisdictions where a receipt or similar document for the Prospectus shall have been obtained from the applicable Securities Commission (including the decision document for the Prospectus issued under the Mutual Reliance Procedures) following the filing of the Prospectus unless otherwise notified in writing.
- (c) The Underwriters shall use all reasonable efforts to complete and to cause the Selling Firms to complete the distribution of the Firm Shares as soon as practicable after the Closing Time and, if applicable, to complete the distribution of the Over-Allotment Shares as soon as practicable after the Over-Allotment Closing Time. The Underwriters shall give prompt notice to Addax when, in the opinion of the Underwriters, the distribution of the Firm Shares and, if applicable, the Over-Allotment Shares has ceased. The Underwriters shall also use all reasonable efforts to cause a distribution of the Firm Shares and Over-Allotment Shares (as applicable) in such manner as to meet the minimum listing requirements of the TSX respecting distribution of the Common Shares.
- (d) Notwithstanding the foregoing provisions of this section 3, an Underwriter will not be liable to Addax under this section 3 with respect to a default under this section 3 by another Underwriter or Selling Firm, as the case may be.

4. Deliveries on Filing and Related Matters.

- (a) Delivery of Certain Materials. Addax shall deliver or cause to be delivered to each of the Underwriters and the Underwriters' counsel at the respective times indicated the documents set out below:
 - (i) on the date hereof, a copy of the Prospectus in each of the English and French languages signed and certified as required by the Securities Laws;
 - (ii) at the time of delivery of the French language version of the Prospectus pursuant to section 4(a)(i), an opinion dated the date of the Prospectus, in form and substance satisfactory to the Underwriters, acting reasonably, addressed to the Underwriters and Underwriters' counsel from Fasken Martineau DuMoulin LLP to the effect that the French language version of the Prospectus, except for the Financial Information as to which no

- opinion need be expressed by such counsel, is, in all material respects, a complete and accurate translation of the English language version thereof, and that the English and French language versions are not susceptible of any materially different interpretation with respect to any matter contained therein;
- (iii) at the time of delivery of the French language version of the Prospectus pursuant to section 4(a)(i), an opinion dated the date of the Prospectus, in form and substance satisfactory to the Underwriters, acting reasonably, addressed to the Underwriters and Underwriters' counsel from Deloitte & Touche LLP, which shall opine that the French language version of the Financial Information in the Prospectus is, in all material respects, a complete and proper translation of the English language version thereof;
 - (iv) concurrently with the filing of the Prospectus with the Securities Commissions, a "long-form" comfort letter dated the date of the Prospectus, in form and substance satisfactory to the Underwriters, acting reasonably, addressed to the Underwriters from Deloitte & Touche LLP, with respect to the financial and accounting information and data (audited and unaudited) contained in the Prospectus, each of which shall be based on a review by the auditors within a cut-off date of not more than two Business Days prior to the date of the letter, and which letters shall be in addition to the auditors' consent letters and comfort letters addressed to the Securities Commissions; and
 - (v) prior to the filing of the Prospectus with the Securities Commissions, copies of correspondence indicating that the application for the listing and posting for trading on the TSX of the Common Shares has been conditionally approved.
- (b) Supplementary Material. Addax shall also prepare and, as soon as available, deliver promptly to the Underwriters and Underwriters' counsel, English and (where applicable) French versions of all Supplementary Material signed and certified as required by the Securities Laws. Concurrently with the delivery of any Supplementary Material, Addax shall deliver to the Underwriters and Underwriters' counsel, with respect to such Supplementary Material, opinions and comfort letters substantially similar to those referred to in sections 4(a)(ii), 4(a)(iii) and 4(a)(iv) and dated the date of the Supplementary Material.
- (c) Representations by Addax as to Prospectus and Supplementary Material. Delivery of the Prospectus and any Supplementary Material by Addax shall constitute the representation and warranty of Addax to the Underwriters that:
- (i) all information and statements (except information and statements relating solely to and provided in writing by any of the Underwriters expressly for use in the Prospectus, the Final International Offering Memorandum or any Supplementary Material) contained in the Prospectus, the Final

International Offering Memorandum or any Supplementary Material, as the case may be, are true and correct and contain no misrepresentation, and the Prospectus, the Final International Offering Memorandum or any Supplementary Material, as the case may be, constitutes full, true and plain disclosure of all material facts relating to Addax, the Addax Subsidiaries, the Firm Shares and the Over-Allotment Shares;

- (ii) no material fact or information has been omitted therefrom (except facts or information relating solely to and provided in writing by any of the Underwriters expressly for use in the Prospectus, the Final International Offering Memorandum or any Supplementary Material) which is required under the Securities Laws to be stated in such disclosure or is necessary to make the statements or information contained in such disclosure not misleading in light of the circumstances under which they were made; and
- (iii) the Prospectus and any Supplementary Material comply with the requirements of the Securities Laws.

Such deliveries shall also constitute the consent of Addax to the Underwriters' use of the Prospectus, the Final International Offering Memorandum and any Supplementary Material, as the case may be, in connection with the distribution of the Firm Shares and Over-Allotment Shares in compliance with this agreement unless and until otherwise advised in writing.

- (d) Representations by AOG as to Prospectus and Supplementary Material. Delivery of the Prospectus and any Supplementary Material by Addax shall constitute the representation and warranty of AOG to the Underwriters that (A) all of the statements and information relating to AOG in the Prospectus and the Final International Offering Memorandum and any Supplementary Materials are true and correct and do not contain a misrepresentation or omit any information which is necessary to make the statements or information contained in such disclosure not misleading in light of the circumstances under which they were made, and (B) to the best of the knowledge of AOG:
 - (i) all information and statements (except information and statements relating solely to and provided in writing by any of the Underwriters expressly for use in the Prospectus, the Final International Offering Memorandum or any Supplementary Material) contained in the Prospectus, the Final International Offering Memorandum or any Supplementary Material, as the case may be, are true and correct and contain no misrepresentation, and the Prospectus, the Final International Offering Memorandum or any Supplementary Material, as the case may be, constitutes full, true and plain disclosure of all material facts relating to Addax, the Addax Subsidiaries, the Firm Shares and Over-Allotment Shares; and
 - (ii) no material fact or information has been omitted therefrom (except facts or information relating solely to and provided in writing by any of the

Underwriters expressly for use in the Prospectus, the Final International Offering Memorandum or any Supplementary Material) which is required under the Securities Laws to be stated in such disclosure or is necessary to make the statements or information contained in such disclosure not misleading in light of the circumstances under which they were made.

- (e) Commercial Copies. Addax shall deliver or cause to be delivered to the Underwriters, as soon as practicable and in any event not later than 12:00 p.m. (noon) (Toronto time) on February 10, 2006 for Toronto deliveries, such number of commercial copies of the Prospectus and the Final International Offering Memorandum and thereafter in such cities in the Qualifying Jurisdictions as the Underwriters may reasonably request by instructions to the commercial printer of the Prospectus and the Final International Offering Memorandum given forthwith after the Underwriters have been advised that the Prospectus has been filed and a receipt therefor has been obtained; provided that Addax will use all reasonable efforts to have 500 commercial copies of the English language version of the Prospectus delivered in Toronto by 3:00 p.m. on February 9, 2006. Addax shall, as soon as possible following a request from the Underwriters, deliver or cause to be delivered to the Underwriters such additional commercial copies of the Prospectus and the Final International Offering Memorandum in such numbers and at such locations as the Underwriters may reasonably request from time to time. Addax shall from time to time deliver or cause to be delivered to the Underwriters, as soon as practicable, commercial copies of any Supplementary Material in such numbers and at such locations as the Underwriters may reasonably request from time to time.
- (f) Press Releases. During the period commencing on the date hereof and until completion of the distribution of the Firm Shares and, if applicable, the Over-Allotment Shares, (i) Addax will promptly provide to the Underwriters drafts of any press releases of Addax, and AOG will promptly provide to the Underwriters drafts of any press releases of AOG, relating to Addax, the Offering or other transactions contemplated in the Prospectus, in either case for review and approval by the Underwriters and the Underwriters' counsel (including U.S. counsel) prior to issuance, provided that any such review will be completed in a timely manner; and (ii) Addax and AOG will conduct any of their activities that could reasonably be expected to relate to or result in publicity in accordance with the advice of their Canadian and U.S. legal counsel, so as to comply with Securities Laws and the U.S. Securities Act and other applicable securities laws with respect thereto in the context of the Offering.

5. Material Change.

- (a) During the period from the date hereof until the Underwriters notify Addax of the completion of the distribution of the Firm Shares and, if applicable, the Over-Allotment Shares hereunder, Addax and AOG shall promptly inform the Underwriters (and confirm such notification in writing) of the full particulars of:

- (i) any change (actual, anticipated, contemplated or threatened) in the assets, liabilities (contingent or otherwise), business, affairs, operations or capital of Addax or any of the Addax Subsidiaries or of AOG or any of the Designated Subsidiaries; or
- (ii) any change in, or material development with respect to, any matter (other than any matter relating solely to any of the Underwriters) referred to in the Prospectus, the Final International Offering Memorandum or any Supplementary Material (collectively, the "**Offering Documents**");

which is, or may be, of such a nature as to render any of the Offering Documents or any statement therein untrue or misleading in any material respect or which would result in any of the Offering Documents containing a misrepresentation or which would result in any of the Offering Documents not complying with any of the Securities Laws or which would reasonably be expected to have a significant effect on the market price or value of the Common Shares.

- (b) Addax shall in good faith discuss with the Joint Bookrunners any fact, change, event or circumstance (actual, anticipated, contemplated or threatened) which is of such a nature that there is or could be reasonable doubt as to whether notice should be given to the Underwriters under section 5(a) and, in any event, the Underwriters shall approve the form and content of any amendment or document proposed to be filed by Addax or AOG under section 5(c) prior to any such filing being made, such consent not to be unreasonably withheld or delayed.
- (c) Addax shall promptly comply with all applicable filing and other requirements under the Securities Laws arising as a result of any change, fact, event or circumstance referred to in section 5(a) and shall promptly prepare and file under the Securities Laws, within any time limit prescribed under the Securities Laws, any Supplementary Material as may be required under the Securities Laws; provided that Addax and AOG shall allow the Underwriters and their counsel to participate fully in the preparation of any Supplementary Material and to conduct all due diligence investigations which the Underwriters may reasonably require in order to fulfil their obligations as underwriters and in order to enable the Underwriters to execute responsibly the certificate required to be executed by them in any Supplementary Material and the Underwriters shall have approved the form of any Supplementary Material, such approval not to be unreasonably withheld and to be provided in a timely manner.
- (d) During the period from the date hereof until the Underwriters notify Addax of the completion of the distribution of the Firm Shares and, if applicable, the Over-Allotment Shares hereunder, Addax will promptly inform the Underwriters (and confirm such notification in writing) of the full particulars of:
 - (i) any request of any Securities Commission for any amendment to the Prospectus or any Supplementary Material or for any additional information;

- (ii) the issuance by any Securities Commission, the TSX or any other competent authority of any order to cease or suspend trading of any securities of Addax or of the institution or threat of institution of any proceedings for that purpose; and
- (iii) the receipt of any communications from any of the Securities Commissions, the TSX or any other competent authority relating to the Prospectus or any Supplementary Material or the distribution of the Firm Shares or Over-Allotment Shares.

6. Representations and Warranties of Addax and AOG.

(a) Each of Addax and Addax NV jointly and severally represents and warrants to the Underwriters as set forth below in this section 6(a).

(i) Status.

(A) Status of Addax. Addax is a corporation duly incorporated, organized and subsisting under the laws of Canada and has all requisite power, capacity and authority to own its properties and assets and to carry on its business as presently conducted and as proposed to be conducted as contemplated in the Prospectus, and to enter into and deliver this agreement and the Relevant Agreements to which it is or will be a party and to perform its obligations hereunder and thereunder.

(B) Status of Addax Subsidiaries. Each Addax Subsidiary is a corporation duly incorporated, organized and subsisting under the laws of its jurisdiction of incorporation and has all requisite power, capacity and authority to own its properties and assets and to carry on its business as presently conducted and as proposed to be conducted as contemplated in the Prospectus, and to enter into and deliver the Relevant Agreements to which it is or will be a party and to perform its obligations thereunder.

(ii) Authority.

(A) Authority of Addax. All necessary corporate action has been taken by Addax to authorize the execution and delivery by Addax of this agreement and the Relevant Agreements to which Addax is a party and the performance by Addax of its obligations hereunder and thereunder, and this agreement and each of the Relevant Agreements to which Addax is a party has been duly executed and delivered and constitutes a valid and legally binding obligation of Addax enforceable against it in accordance with its terms, and each of the Relevant Agreements which are not yet executed and delivered, but to which Addax is to be party at the Closing Time, will have been duly authorized, executed and delivered by it at the

Closing Time, and each such Relevant Agreement will constitute at the Closing Time a valid and legally binding obligation of Addax, enforceable against it in accordance with its terms.

- (B) Authority of Addax Subsidiaries. All necessary corporate action has been taken by each Addax Subsidiary to authorize the execution and delivery by it of the Relevant Agreements to which it is a party (if any) and the performance by it of its obligations thereunder, and each of the Relevant Agreements to which it is a party has been duly executed and delivered and constitutes a valid and legally binding obligation of it enforceable against it in accordance with its terms, and each of the Relevant Agreements which are not yet executed and delivered, but to which it is to be party at the Closing Time, will have been duly authorized, executed and delivered by it at the Closing Time, and each such Relevant Agreement will constitute at the Closing Time a valid and legally binding obligation of it, enforceable against it in accordance with its terms.
- (iii) Prospectus. Addax has all requisite power, capacity and authority to execute and deliver the Prospectus and to file such document with the Securities Commissions, and all necessary action has been taken by each of Addax and AOG to authorize the execution and delivery of the Prospectus and the filing of such document with the Securities Commissions.
- (iv) Data. Any statistical and market-related data included in the Preliminary Prospectus and the Prospectus are based on or derived from sources that Addax believes to be reliable true and accurate, and Addax has obtained all necessary consents to the use of such data in the Preliminary Prospectus and the Prospectus from such sources.
- (v) Addax Financial Statements. The Addax Financial Statements:
- (A) are in accordance with the books, records and accounts of Addax;
 - (B) are true and correct and present fairly the results of operations and the financial position of Addax for the periods ended on, and as at, the dates indicated;
 - (C) have been prepared in accordance with Canadian GAAP consistently applied; and
 - (D) present fairly all of the assets and liabilities of Addax as at the dates indicated including all contingent liabilities of Addax as at the dates indicated,

and neither Addax nor AOG is aware of any fact or circumstance presently existing which would render the Addax financial statements materially incorrect. All disclosures contained in the Preliminary Prospectus or Prospectus regarding "non-GAAP financial measures" (as such term is defined for purposes of applicable Securities Laws) are accurate in all material respects and comply with applicable Securities Laws.

- (vi) No Material Change in Addax or Addax Subsidiaries. There has not been any material change (financial or otherwise) in the business, affairs, assets or liabilities (absolute, accrued, contingent or otherwise), capital or prospects of Addax or any of the Addax Subsidiaries since December 31, 2004 other than as disclosed in the Prospectus.
- (vii) Addax Pro Forma Financial Statements. The Addax unaudited pro forma consolidated balance sheet as at September 30, 2005 and the unaudited pro forma consolidated statement of operations for the nine months ended September 30, 2005 and the year ended December 31, 2004 and the related notes thereto included in the Prospectus present fairly the information shown therein, comply as to form with the regulatory requirements of the various securities regulatory agencies in Canada and have been properly compiled on the basis described therein, and the assumptions used in the preparation thereof are reasonable and the adjustments used therein are appropriate to give effect to the transactions and circumstances referred to therein.
- (viii) Capital.
 - (A) Capital of Addax. Addax is authorized to issue an unlimited number of Common Shares and an unlimited number of preferred shares, of which, as at the date hereof, 100 Common Shares are issued and outstanding as fully paid and non-assessable, and Addax Mining is the registered and beneficial owner of all such Common Shares. No other securities of Addax are outstanding as at the date hereof.
 - (B) Capital of Addax NV. Addax NV is authorized to issue 80,000,000 shares with par value of U.S.\$0.33 each, of which, as at the date hereof, 60,030,000 shares are issued and outstanding as fully paid and non-assessable, and AOG is the registered and beneficial owner of all such shares. No other securities of Addax NV are outstanding as at the date hereof.
 - (C) Capital of Addax Cameroon. Addax Cameroon is authorized to issue 3,000 ordinary shares with par value of U.S.\$1.00 each, of which, as at the date hereof, 3,000 ordinary shares are issued and outstanding as fully paid and non-assessable, and Addax NV is the registered and beneficial owner of all such ordinary shares. No

other securities of Addax Cameroon are outstanding as at the date hereof.

- (D) Capital of Addax Development. Addax Development is authorized to issue 5,000,000 ordinary shares with par value of one Naira each, of which, as at the date hereof, 5,000,000 are issued and outstanding as fully paid and non-assessable, and Addax Overseas is the registered and beneficial owner of 4,950,000 of such ordinary shares and Addax NV holds 50,000 of such ordinary shares in trust for Addax Overseas. No other securities of Addax Development are outstanding as at the date hereof.
- (E) Capital of Addax Exploration. Addax Exploration is authorized to issue 5,000,000 ordinary shares with par value of one Naira each, of which, as at the date hereof, 5,000,000 are issued and outstanding as fully paid and non-assessable, and Addax Overseas is the registered and beneficial owner of 4,950,000 of such ordinary shares and Addax NV holds 50,000 of such ordinary shares in trust for Addax Overseas. No other securities of Addax Exploration are outstanding as at the date hereof.
- (F) Capital of Addax Overseas. Addax Overseas is authorized to issue 100,000,000 shares with par value of U.S.\$1.00 each, of which, as at the date hereof, 29,709,756 shares are issued and outstanding as fully paid and non-assessable, and Addax NV is the beneficial owner of all such shares. No other securities of Addax Overseas are outstanding as at the date hereof.
- (G) Capital of Addax Services. Addax Services is authorized to issue 10,000 ordinary shares with par value of U.S.\$1.00 each, of which, as at the date hereof, 10,000 ordinary shares are issued and outstanding as fully paid and non-assessable, and Addax NV is the beneficial owner of all such ordinary shares. No other securities of Addax Services are outstanding as at the date hereof.
- (H) Capital of Addax Gabon. Addax Gabon is authorized to issue 3,000 Ordinary shares with par value of U.S. \$1.00 each, of which, as at the date hereof, 3,000 ordinary shares are issued and outstanding as fully paid and non-assessable and Addax Overseas is the registered and beneficial owner of all such ordinary shares. No other securities of Addax Gabon are outstanding as at the date hereof.
- (I) Capital of Addax Offshore. Addax Offshore is authorized to issue 5,000,000 ordinary shares with par value of one Naira each, of which, as at the date hereof, 5,000,000 are issued and outstanding as fully paid and non-assessable, and Addax NV is the registered

and beneficial owner of 4,950,000 of such ordinary shares and Jean Claude Gandur holds 50,000 of such ordinary shares in trust for Addax NV. No other securities of Addax Offshore are outstanding as at the date hereof.

- (J) Capital of Addax Offshore 2. Addax Offshore 2 is authorized to issue 5,000,000 ordinary shares with par value of one Naira each, of which, as at the date hereof, 5,000,000 are issued and outstanding as fully paid and no-assessable, and Addax NV is the registered and beneficial owner of 4,950,000 of such ordinary shares and Jean Claude Gandur holds 50,000 of such ordinary shares in trust for Addax NV. No other securities of Addax Offshore 2 are outstanding as at the date hereof.
- (K) Capital of Addax International. Addax International is authorized to issue 3,000 ordinary shares with par value of U.S. \$1.00 each, of which, as at the date hereof, 3,000 ordinary shares are issued and outstanding as fully paid and non-assessable and Addax NV is the registered and beneficial owner of all such ordinary shares. No other securities of Addax International are outstanding as at the date hereof.
- (ix) Security Ownership. All securities of the Addax Subsidiaries other than Addax NV are beneficially owned, directly or indirectly, by Addax NV, free and clear of all mortgages, liens, charges, pledges, security interests, encumbrances, claims or demands whatsoever in law or in equity, other than mortgages, liens, charges, pledges, security interests, encumbrances, claims or demands arising pursuant to the Credit Facility other than those arising by operation of law (statutory or otherwise). Following the transfer of the Addax Interest to Addax, all securities of the Addax Subsidiaries will be beneficially owned, directly or indirectly, by Addax, free and clear of all mortgages, liens, charges, pledges, security interests, encumbrances, claims or demands whatsoever in law or in equity, other than mortgages, liens, charges, pledges, security interests, encumbrances, claims or demands arising pursuant to the Credit Facility other than those arising by operation of law (statutory or otherwise).
- (x) Transfer Agent. Computershare Investor Services Inc., at its principal offices in Calgary and Toronto, will, at or before the Closing Time, be duly appointed as the registrar and transfer agent in respect of the Common Shares.
- (xi) TSX Approval. The TSX has conditionally approved the listing of the Firm Shares and the Over-Allotment Shares, subject to the filing of customary documentation with the TSX and the payment of applicable listing fees.

- (xii) Issuance by Addax. All of the Common Shares to be issued by Addax to the Underwriters hereunder as described in the Prospectus, will at the Closing Time be duly and validly created and issued and will be fully paid and non-assessable and will conform to the descriptions thereof contained in the Prospectus, free and clear of all mortgages, liens, charges, pledges, security interests, encumbrances, claims or demands whatsoever in law or in equity.
- (xiii) No Options. Except as disclosed in or contemplated by the Prospectus or Addax's TSX listing application, no person now has, or will immediately following the Closing Time have, any agreement or option, or right or privilege (whether pre-emptive or contractual) capable of becoming an agreement or option (including convertible or exchangeable securities or warrants) for the purchase, subscription for or issuance of Common Shares, or of any unissued interest in or securities of any kind of Addax or any of the Addax Subsidiaries.
- (xiv) No Defaults – Common Share Issuance. The execution and delivery of this Agreement and the Relevant Agreements, the fulfilment of the terms hereof and thereof by each of Addax and the Addax Subsidiaries, as applicable, and the issuance, sale and delivery of the Firm Shares and Over-Allotment Shares as contemplated by this agreement do not and will not:
- (A) require the consent, approval, authorization, order, filing, registration or qualification of or with any governmental authority, stock exchange or market, Securities Commission or other regulatory commission or agency or third party; or
 - (B) result in a breach of or default under, and do not and will not create a state of facts which, after notice or lapse of time or both, will result in a breach of or default under, and do not and will not conflict with:
 - 1. any of the provisions of the constating documents or by-laws of Addax or any of the Addax Subsidiaries or any resolutions of any of their directors or shareholders or any committee of any of them;
 - 2. any statute, rule, regulation or law applicable to Addax or any of the Addax Subsidiaries including, without limitation, the Securities Laws, or any judgment, order, decree or decision of any governmental or regulatory body, agency, commission, tribunal, court or exchange having jurisdiction over Addax or any of the Addax Subsidiaries; or

3. any of the terms or provisions of, or constitute a default (or an event which, with notice or lapse of time or both, would constitute a default) by Addax or any of the Addax Subsidiaries under, or give rise to any right to accelerate the maturity or require the prepayment of any indebtedness under, or result in the creation or imposition of any lien, charge or encumbrance upon any property or assets of Addax or any of the Addax Subsidiaries under, any contract, indenture, mortgage, hypothec, deed of trust, loan agreement, note, lease, license, franchise agreement, authorization, permit, certificate or other agreement or document to which Addax or any of the Addax Subsidiaries is a party or by which any of them may be bound, or to which any of them or any of their respective assets or businesses is subject, including but not limited to any production sharing contract, oil mining lease, oil prospecting license or Relevant Agreement described in the Prospectus (each, a "**Contract**"),

which individually or in the aggregate would (1) have or result in a material adverse effect on the business, financial condition, properties, assets, liabilities (contingent or otherwise), results of operations or prospects of Addax or any of the Addax Subsidiaries or impair the sale of the Common Shares or the consummation of the transactions contemplated hereby or by the Prospectus or any Supplementary Material, (2) materially impair Addax's, or any of the Addax Subsidiaries', ability to perform the obligations contemplated in this agreement, the Prospectus or any Supplementary Material or (3) materially affect the consummation of the transactions contemplated in this agreement, the Prospectus or any Supplementary Material.

- (xv) No Restrictions on Distributions. Other than those restrictions imposed by the Credit Facility as disclosed in the Prospectus, neither Addax nor any Addax Subsidiary is currently prohibited, directly or indirectly, from paying any dividends, from making any other distribution on its capital stock, or other securities, or from paying any interest or repaying any loans, advances or other indebtedness of Addax or any Addax Subsidiary, except as otherwise described in the Prospectus.
- (xvi) Permits. Addax and each of the Addax Subsidiaries hold all material permits, by-laws, licences, waivers, exemptions, consents, certificates, registrations, authorizations, approvals, rights, rights of way and entitlements and the like which are required from any governmental or regulatory authority or any other person necessary to conduct its business and activities as currently conducted or as the Prospectus discloses they will be conducted, all of which are in full force and effect and in good standing in all material respects.

- (xvii) Compliance with Laws. Each of Addax and each of the Addax Subsidiaries has conducted and is conducting its activities or business in all material respects in compliance with all applicable laws, rules and regulations, including without limitation those of the country, province, state and municipality in which such entity carries on business or conducts its activities.

- (xviii) Title. Except as disclosed in the Prospectus and except in the case of assets the ownership of which vests in NNPC, each of Addax and the Addax Subsidiaries has good title to all of its material assets, free and clear of all charges, hypothecs, mortgages, encumbrances or other liens and each of Addax and the Addax Subsidiaries will have good title to all of its assets, free and clear of all charges, hypothecs, mortgages, encumbrances or other liens, other than liens existing pursuant to the Credit Facility, if any, and in the case of assets the ownership of which vests with NNPC, Addax and each of the Addax Subsidiaries (as applicable), has sufficient contractual rights in respect of such assets (including all intellectual property rights) necessary for it to conduct its business as presently conducted and as proposed to be conducted as contemplated in the Prospectus.

- (xix) Insurance. Addax and each Addax Subsidiary are insured by insurers of recognized financial responsibility against such losses and risks and in such amounts as are prudent and customary in the businesses in which they are engaged; neither Addax nor any Addax Subsidiary has been refused any insurance coverage sought or applied for; and neither Addax nor any Addax Subsidiary has any reason to believe that it will not be able to renew its existing insurance coverage as and when such coverage expires or to obtain similar coverage from similar insurers as may be necessary to continue its business, in either case, at reasonable cost.

- (xx) Future Acquisitions, Contingent Obligations. Neither Addax nor any Addax Subsidiary has entered into any agreement or understanding to acquire any securities in any other corporation or entity or to acquire or lease any other business operations or properties which are material to the business and operations of Addax and the Addax Subsidiaries, taken as a whole or which would require Addax to make expenditures or incur obligations in any material amount except as disclosed in the Prospectus.

- (xxi) No Claims. There is no claim, action, suit, proceeding or investigation (whether or not purportedly on behalf of Addax or any of the Addax Subsidiaries) pending or, to the best of the knowledge of Addax, threatened against or affecting Addax or any of the Addax Subsidiaries or any of their properties, or to which Addax or any of the Addax Subsidiaries is or may be a party or to which any property of Addax or any of the Addax Subsidiaries is or may be subject, at law or in equity, or before or by any federal, provincial, state, municipal or other

governmental or regulatory department, commission, board or agency, domestic or foreign, which is, or could reasonably be expected to, individually or in aggregate, result in a material adverse effect on, or which questions the validity of any action taken or to be taken by Addax or any of the Addax Subsidiaries pursuant to or in connection with, this agreement or any other transaction or agreement contemplated in the Prospectus.

- (xxii) Reserve Report. Addax has made available to NSAI, prior to the issuance of the NSAI Report, for the purpose of preparing such report, all information requested by NSAI, which information did not contain any material misrepresentation or omission at the time such information was so provided. Addax has no knowledge, after due inquiry, of a change in any reserve information provided to NSAI since the date that such information was so provided which would result in a material adverse change to the quantity or pre-tax present worth value of estimated future net revenue values of Addax as set out in the NSAI Report. Addax believes that the NSAI Report (i) reasonably presents the quantity and pre-tax present worth value of estimated future net revenue values of oil and natural gas reserves of Addax as at the effective date thereof in respect of the reserves information therein based upon information available in respect of such reserves at the time such report was prepared and the pricing assumptions contained therein, and (ii) complies in all material respects with National Instrument 51-101 - Standards of Disclosure for Oil and Gas Activities.
- (xxiii) Taxes. Addax and each of the Addax Subsidiaries has duly filed all tax returns required to be filed by them, have paid or made available for payment through liftings (other than those amounts in *bona fide* dispute) all taxes due and payable by them and have paid all assessments and reassessments and all other taxes, governmental charges, penalties, interest and other fines due and payable by them (other than as aforesaid) and which are claimed by any governmental authority to be due and owing, and adequate provision has been made for taxes payable in respect of amounts subject to any such *bona fide* dispute and for any completed fiscal period for which tax returns are not yet required, and there are no agreements, waivers or other arrangements providing for an extension of time with respect to the filing of any tax return or payment of any tax, governmental charge or deficiency by Addax or any Addax Subsidiary and, to the best of the knowledge of Addax, after due inquiry, there are no actions, suits, proceedings, investigations (other than ongoing tax audits which have been disclosed in writing to the Underwriters) or claims threatened or pending against Addax or any Addax Subsidiary in respect of taxes, governmental charges or assessments or any matters under discussion with any governmental authority relating to taxes, governmental charges or assessments asserted by any such authority.

- (xxiv) Auditor. Addax's auditor, Deloitte & Touche LLP meets applicable 'independence' requirements under all Securities Laws and there has not been any disagreement with the present or any former auditor of Addax except as disclosed to the Underwriters in writing;
- (xxv) Environmental Representations.
- (A) to the best of the knowledge of Addax, after due inquiry, all Environmental Authorisations necessary for Addax and the Addax Subsidiaries to carry on their business as presently conducted or as proposed to be conducted as contemplated in the Prospectus have been obtained and are in force and the business and operations of each of Addax and the Addax Subsidiaries have been carried out at all times within the terms of all such Environmental Authorisations;
 - (B) to the best of the knowledge of Addax, after due inquiry, all records, reports, registrations and information necessary for Addax and the Addax Subsidiaries to comply with any Environmental Authorization have been made or given;
 - (C) to the best of the knowledge of Addax, after due inquiry, no circumstances exist or have arisen out of the operations of Addax or any Addax Subsidiary which could confer a right of revocation, suspension, modification or setting aside of any Environmental Authorisation or could prevent any Environmental Authorisation from being renewed or extended or could result in the terms of any Environmental Authorization being modified in a manner which may have a material adverse effect on Addax or any of the Addax Subsidiaries;
 - (D) in respect of the properties in which Addax and the Addax Subsidiaries have an interest, where Addax or an Addax Subsidiary is the operator of such property, the operations in respect of such property have been carried out and operated at all times in compliance in all material respects with Environmental Laws; and where Addax or an Addax Subsidiary is not the operator of such properties, reasonable endeavours have been used to carry out the operations in respect of such properties at all times in compliance in all material respects with Environmental Laws;
 - (E) no Environmental Contaminant is in existence at the site of any properties in which Addax or the Addax Subsidiaries have an interest or has arisen out of the carrying out of operations on such property; and

(F) at no time has Addax or any Addax Subsidiary or, so far as it is aware after due and careful inquiry, any other person involved in the carrying out of operations on any of the properties in which Addax or any Addax Subsidiary has an interest, received any notice that:

1. such operations have not been carried out at all times within the terms of all Environmental Authorisations;
2. any Environmental Contaminant is in existence at the site of any such property or has arisen out of the carrying out of operations in respect of such property; or
3. any failure to comply with Environmental Laws has arisen at the site of any of such properties of Addax or any Addax Subsidiary or out of the carrying out of operations in respect of such properties.

(xxvi) No Existing Defaults under PSCs. No default exists under and no event has occurred which, after notice or lapse of time or both, or otherwise, would constitute a material default under or material breach, by Addax, any of the Addax Subsidiaries or, to the best of the knowledge of Addax, any other person of, any production sharing contract referred to in the Prospectus which, in any such case, would permit the production sharing contract to be terminated or amended without Addax's prior consent.

(xxvii) No Existing Default under Other Agreements. No default or defaults exist under, and no event or events have occurred which, after notice or lapse of time or both, or otherwise, would constitute a default under or breach by Addax, any of the Addax Subsidiaries or, to the best of the knowledge of Addax, any other person of, any material obligation, agreement, covenant or condition contained in any contract (including, without limitation, any Relevant Agreement) which defaults or breaches, individually or in the aggregate, might reasonably be expected to have or result in a material adverse effect on Addax.

(xxviii) No Cease Trade Orders. No order, ruling or determination having the effect of suspending the sale or ceasing the trading of the Firm Shares, Over-Allotment Shares or any other securities of Addax or the Addax Subsidiaries has been issued or made by any Securities Commission or exchange or any other regulatory authority and is continuing in effect and, to the best of the knowledge of Addax, no proceedings for that purpose have been instituted or are pending or are contemplated or threatened by any such authority or under any Securities Laws or other applicable securities legislation.

- (xxix) No Labour Disputes. No labour dispute with the employees of Addax or any of the Addax Subsidiaries exists or, to the best of the knowledge of Addax, is imminent, and Addax is not aware of any existing or imminent labour disturbance by the employees of any of its or any Addax Subsidiary's principal suppliers, manufacturers, customers or contractors, which, in either case, may reasonably be expected to have or result in a material adverse effect on the business, financial condition, properties, assets, liabilities (contingent or otherwise), results of operations or prospects of Addax or any of the Addax Subsidiaries or impair the sale of the Common Shares or the consummation of the transactions contemplated hereby.
- (xxx) Reporting Issuer. Upon filing of the Prospectus and at the Closing Time Addax will be a reporting issuer or the equivalent thereof in each Qualifying Jurisdiction where such concept exists and, to the best of the knowledge of Addax, will not be in default of any requirement under the Securities Laws.
- (xxxii) Voting Agreements. No agreement is currently in force or effect which in any manner affects the voting or control of any of the securities of Addax or any of the Addax Subsidiaries and, at the Closing Time, no such agreement will be in force or effect except in each case for trust agreements pursuant to which Jean Claude Gandur holds in trust for Addax NV the shares referred to in section 6(a)(viii)(I) and (J) copies of which have been provided to the Underwriters.
- (xxxiii) No Finder's Fee. Except as provided herein, there is no person, firm or corporation acting for Addax entitled to any brokerage or finder's fee payable by on or behalf of Addax in connection with this agreement or any of the transactions contemplated hereunder and in the event any person, firm or corporation acting or purporting to be acting for Addax establishes a claim for any commission or brokerage or finder's fee from the Underwriters, Addax covenants to indemnify and hold harmless the Underwriters with respect thereto and with respect to all costs reasonably incurred in the defence thereof.
- (xxxiiii) Minute Books. The minute books and corporate records of Addax and the Addax Subsidiaries made available to Underwriters' counsel in connection with their due diligence investigations of Addax and the Addax Subsidiaries for the periods from their respective dates of incorporation, to the date of examination thereof, are complete and are the original minute books and records or complete and true copies thereof of Addax and the Addax Subsidiaries.
- (xxxv) Accounting Controls. Addax and each of the Addax Subsidiaries have taken reasonable steps in accordance with practice for Canadian public companies, to ensure that, upon a receipt being issued for the Prospectus,

Addax will be, and will have all accounting systems (including internal accounting controls) in place to remain, in compliance with the continuous disclosure requirements of the Securities Laws and all rules and regulations promulgated thereunder and is actively taking steps to ensure that it will be in compliance with such continuous disclosure obligations not currently in effect, upon the effectiveness of such provisions, or which will become applicable to Addax at all times after a receipt is issued for the Prospectus.

(xxxv) Financial Dealings. To the best of the knowledge of Addax, after due inquiry, neither the Corporation nor any of the Addax Subsidiaries has, directly or indirectly, (a) made or authorized any contribution, payment or gift of funds or property to any official, employee or agent of any governmental agency, authority or instrumentality of any jurisdiction or (b) made any contribution to any candidate for public office, in either case, where either the payment or the purpose of such contribution, payment or gift was, is, or would be prohibited under the *Canada Corruption of Foreign Public Officials Act* (Canada) or the *Proceeds of Crime (Money Laundering) and Terrorist Financing Act* (Canada) or the rules and regulations promulgated thereunder or under any other legislation of any relevant jurisdiction covering a similar subject matter applicable to Addax or the Addax Subsidiaries and their respective operations and have instituted and maintained policies and procedures designed to ensure, and which are reasonably expected to continue to ensure, continued compliance with such legislation.

(xxxvi) Sanction Legislation. None of Addax and the Addax Subsidiaries nor, to the best knowledge of Addax, any director, officer, agent, employee, affiliate or person acting on behalf of Addax or any Addax Subsidiary has been or is currently subject to any U.S. sanctions administered by the Office of Foreign Assets Control of the U.S. Treasury Department ("OFAC"); and Addax will not directly or indirectly use any proceeds of the Offering, or lend, contribute or otherwise make available such proceeds to any Addax Subsidiary, affiliated entity, joint venture partner or other person or entity, to finance any investments in, or make any payments to, any country or person targeted by any of the sanctions of the United States administered by OFAC; and, in particular, none of the proceeds of the Offering will be used to finance any current or future activities of Addax, Addax Subsidiaries or any of its or their affiliated entities in Iran.

- (b) AOG represents and warrants to the Underwriters as set forth below in this section 6(b).
- (i) Status of AOG. AOG is a corporation duly incorporated, organized and subsisting under the laws of the British Virgin Islands and has all requisite

power, capacity and authority to own its properties and assets and to carry on its existing and proposed business.

- (ii) Authority of the Shareholder. All necessary corporate action has been taken by AOG and by each of its subsidiaries (other than Addax and the Addax Subsidiaries), as applicable, to authorize the execution and delivery by it of this Agreement and the Relevant Agreements to which it is a party and the performance by it of its obligations thereunder, and this Agreement and each of the Relevant Agreements to which AOG and each such subsidiary, as applicable, is a party has been duly executed and delivered and constitutes a valid and legally binding obligation of it enforceable against it in accordance with its terms.
- (iii) Ownership of Addax. Addax Mining is the registered and beneficial owner of 100 Common Shares, representing all of the issued and outstanding shares in the capital of Addax, free and clear of all mortgages, charges, pledges, security interests, encumbrances, claims or demands whatsoever, and, except as disclosed in or contemplated by the Prospectus, no person or other entity has or will have any agreement, option, right or privilege (whether pre-emptive or contractual) capable of becoming an agreement for or right to purchase all or any of such Common Shares.
- (iv) Ownership of Addax NV. AOG is the registered and beneficial owner of 60,030,000 common shares in the capital of Addax NV, representing all of the issued and outstanding shares in the capital of Addax NV, free and clear of all mortgages, charges, pledges, security interests, encumbrances, claims or demands whatsoever, and, except as disclosed in or contemplated by the Prospectus, and in section 11 of this agreement no person or other entity has or will have any agreement, option, right or privilege (whether pre-emptive or contractual) capable of becoming an agreement for or right to purchase all or any of such shares.
- (v) Ownership of Addax Mining. AOG is the beneficial owner of 60 ordinary shares in the capital of Addax Mining, representing all of the issued and outstanding shares in the capital of Addax Mining, free and clear of all mortgages, charges, pledges, security interests, encumbrances, claims or demands whatsoever and, except as disclosed in or contemplated by the Prospectus, no person or other entity has or will have any agreement, option, right or privilege (whether pre-emptive or contractual) capable of becoming an agreement for or right to purchase all or any of such shares.
- (vi) No Defaults arising from Offering. The execution and delivery of this Agreement and the Relevant Agreements, the fulfilment of the terms thereof by AOG and Addax, and the issuance, sale and delivery of the Firm Shares and Over-Allotment Shares as contemplated by this Agreement do not and will not:

- (A) require the consent, approval, authorization, order, filing, registration or qualification of or with any governmental authority, stock exchange, securities commission or other regulatory commission or agency having jurisdiction over AOG or, to the best of its knowledge, over any of its subsidiaries; or
- (B) result in a breach of or default under, and do not and will not create a state of facts which, after notice or lapse of time or both, will result in a breach of or default under, and do not and will not conflict with:
 - 1. any of the provisions of the constating documents or by-laws of AOG or any of its subsidiaries;
 - 2. any statute, rule, regulation or law applicable to AOG or any of its subsidiaries; or
 - 3. any of the terms or provisions of, or constitute a default (or an event which, with notice or lapse of time or both, would constitute a default) by AOG or any of its subsidiaries under, or result in the creation or imposition of any lien, charge or encumbrance upon any property or assets of AOG or any of its subsidiaries under, any Contract to which any of them is a party or by which any of them may be bound, or to which any of them or any of their respective assets or businesses is subject, including but not limited to any Relevant Agreement,

which individually or in the aggregate would (1) materially impair the ability of AOG and its subsidiaries to perform the obligations contemplated in this agreement and the Relevant Agreements, or (2) materially affect the consummation of the transactions contemplated in this agreement or the Prospectus.

- (vii) Compliance with Laws. Each of (i) AOG, (ii) Addax and each Addax Subsidiary, and (iii) each subsidiary of AOG which is a party to or performs services pursuant to a Relevant Agreement (the subsidiaries of AOG referred to in items (ii) and (iii) being referred to herein as the "**Designated Subsidiaries**") and, to the best of AOG's knowledge, each of its other subsidiaries, has conducted and is conducting its activities or business in all material respects in compliance with all applicable laws, rules and regulations, including without limitation those of the country, province, state and municipality in which such entity carries on business or conducts its activities.

- (viii) Relevant Agreements. Each of the representations and warranties of AOG and each of its Designated Subsidiaries under each of the Relevant Agreements to which each is respectively party are true and correct as if made on and as of the date hereof, and AOG and each of its Designated Subsidiaries has complied with, and will prior to the Closing Time, comply with each such Relevant Agreement in all material respects.
- (ix) No Claims. There is no claim, action, suit, proceeding or investigation (whether or not purportedly on behalf of AOG or any of its subsidiaries), to the best of the knowledge of AOG, pending or threatened against or affecting AOG or any of its subsidiaries or any of their properties, or to which AOG or any of its subsidiaries is or may be a party or to which any property of Addax or any of its subsidiaries is or may be subject or before or by any federal, provincial, state, municipal or other governmental or regulatory department, commission, board or agency, domestic or foreign, which is, or could reasonably be expected to, individually or in aggregate, result in a material adverse effect on, or which questions or could adversely affect the validity or effectiveness of any action taken or to be taken by AOG or any of its Designated Subsidiaries pursuant to or in connection with, this agreement or any other transaction or agreement contemplated in the Prospectus.
- (x) Taxes. AOG, each of the Designated Subsidiaries and, to the best of AOG's knowledge, each of its other subsidiaries, has duly filed all tax returns required to be filed by them, have paid all taxes due and payable by them and have paid all assessments and re-assessments and all other taxes, governmental charges, penalties, interest and other fines due and payable by them and which are claimed by any governmental authority to be due and owing, and adequate provision has been made for taxes payable for any completed fiscal period for which tax returns are not yet required, and there are no agreements, waivers or other arrangements providing for an extension of time with respect to the filing of any tax return or payment of any tax, governmental charge or deficiency by AOG, any Designated Subsidiary or, to the best of AOG's knowledge, any of AOG's other subsidiaries and, to the best of the knowledge of AOG, after due inquiry, there are no actions, suits, proceedings, investigations or claims threatened or pending against AOG or any of its subsidiaries in respect of taxes, governmental charges or assessments or any matters under discussion with any governmental authority relating to taxes, governmental charges or assessments asserted by any such authority, which is, or could reasonably be expected to, individually or in aggregate, result in a material adverse effect on, or which questions or could adversely affect the validity or effectiveness of any action taken or to be taken by AOG or any of its Designated Subsidiaries pursuant to or in connection with, this agreement or any other transaction or agreement contemplated in the Prospectus.

- (xi) No Existing Default. No default exists under and no event has occurred which, after notice or lapse of time or both, or otherwise, would constitute a default under or breach, by AOG, any Designated Subsidiary or, to the best of AOG's knowledge, any of AOG's other subsidiaries or any other person of any material obligation, agreement, covenant or condition contained in any contract (including, without limitation, any Relevant Agreement) and which may reasonably be expected to have or result in a material adverse effect on the ability of AOG or any of its Designated Subsidiaries, as applicable, to perform its obligations under the Relevant Agreements.
- (xii) Voting Agreements. No agreement is currently in force or effect which in any manner affects the voting or control of any of the securities of AOG, Addax or any of AOG's Designated Subsidiaries and, at the Closing Time, no such agreement will be in force or effect, except in each case for trust agreements pursuant to which Jean Claude Gandur holds in trust for Addax NV the shares referred to in section 6(a)(viii)(I) and (J) copies of which have been provided to the Underwriters.
- (xiii) No Finder's Fee. Except as provided in this Agreement, there is no person, firm or corporation acting for AOG entitled to any brokerage or finder's fee payable by on or behalf of AOG or any of its subsidiaries in connection with this agreement or any of the transactions contemplated hereunder and in the event any person, firm or corporation acting or purporting to be acting for AOG establishes a claim for any commission or brokerage or finder's fee from the Underwriters, AOG covenants to indemnify and hold harmless the Underwriters with respect thereto and with respect to all costs reasonably incurred in the defence thereof.
- (xiv) Financial Dealings. To the best of the knowledge of AOG, after reasonable inquiry, none of AOG or any of its subsidiaries has, directly or indirectly, (a) made or authorized any contribution, payment or gift of funds or property to any official, employee or agent of any governmental agency, authority or instrumentality of any jurisdiction or (b) made any contribution to any candidate for public office, in either case, where either the payment or the purpose of such contribution, payment or gift was, is, or would be prohibited under the *Canada Corruption of Foreign Public Officials Act (Canada)* or the *Proceeds of Crime (Money Laundering) and Terrorist Financing Act (Canada)* or the rules and regulations promulgated thereunder or under any other legislation of any relevant jurisdiction covering a similar subject matter applicable to AOG or any of its subsidiaries and their respective operations, and AOG and the Designated Subsidiaries have instituted and maintained policies and procedures designed to ensure, and which are reasonably expected to continue to ensure, continued compliance with such legislation.

- (xv) Sanction Legislation. Neither AOG nor, to the knowledge of AOG, any shareholder, director, officer, agent, employee, affiliate or person acting on behalf of AOG is currently subject to any U.S. sanctions administered by OFAC.

7. Covenants of Addax and AOG.

- (a) Addax covenants and agrees with the Underwriters that it will advise the Underwriters, promptly after receiving notice thereof, of the time when the Prospectus and any Supplementary Material has been filed and receipts therefor have been obtained and will provide evidence reasonably satisfactory to the Underwriters of each such filing and copies of such receipts;
- (b) Addax covenants and agrees with the Underwriters that it will advise the Underwriters, promptly after receiving notice or obtaining knowledge thereof, of:
 - (i) the issuance by any Securities Commission of any order suspending or preventing the use of the Prospectus or any Supplementary Material;
 - (ii) the suspension of the qualification of the Firm Shares or Over-Allotment Shares in any of the Qualifying Jurisdictions;
 - (iii) the institution, threatening or contemplation of any proceeding for any such purposes; or
 - (iv) any requests made by any Securities Commission for amending or supplementing the Prospectus or for additional information; and will use its commercially reasonable efforts to prevent the issuance of any order referred to in (i) above and, if any such order is issued, to obtain the withdrawal thereof as quickly as possible; and
- (c) AOG covenants and agrees with the Underwriters that it will use all reasonable efforts to enforce the lock-out provisions referred to in section 11(c) and will immediately notify the Underwriters if it becomes aware of any breach thereof.

8. Conditions of Closing of Firm Shares.

The obligation of the Underwriters to purchase the Firm Shares shall be subject to the following conditions, which are for the exclusive benefit of the Underwriters, any of which may be waived, in whole or in part, by the Underwriters, in their sole discretion, pursuant to section 17:

- (a) Addax shall have delivered to the Underwriters, at the Closing Time, certificates dated the Closing Date addressed to the Underwriters and signed by the Chief Executive Officer of Addax and the Chief Financial Officer of Addax, or such other senior officer(s) of Addax as may be acceptable to the Underwriters, certifying for and on behalf of Addax and without personal liability, after having made due enquiries, to the effect that:
 - (i) Addax has duly complied with all the covenants and satisfied all the terms and conditions of this agreement on its part to be complied with and satisfied at or prior to the Closing Time;

- (ii) the representations and warranties of Addax contained herein are true and correct as at the Closing Time, with the same force and effect as if made at the Closing Time after giving effect to the transactions contemplated hereby;
 - (iii) receipts have been issued by the Securities Commissions in the Qualifying Jurisdictions for the Prospectus and no order, ruling or determination having the effect of ceasing the trading or suspending the issuance or sale of the Common Shares to be issued and sold by Addax hereunder has been issued or made and no proceedings for such purpose have been instituted or are pending or, to the knowledge of such officers, contemplated or threatened; and
 - (iv) there has been no material change (actual, anticipated, contemplated or threatened, whether financial or otherwise) in the business, affairs, assets, liabilities (contingent or otherwise), capital, operations or prospects of Addax or any of the Addax Subsidiaries or with respect to any of the assets or liabilities or businesses of, or to be acquired or assumed by, Addax or any of Addax Subsidiaries (as contemplated in the Prospectus) from that disclosed in the Prospectus;
- (b) AOG shall have delivered to the Underwriters, at the Closing Time, a certificate dated the Closing Date addressed to the Underwriters and signed by the Chief Executive Officer of AOG and the Company Secretary of AOG, or such other senior officer(s) of AOG as may be acceptable to the Joint Bookrunners, certifying for and on behalf of AOG and without personal liability, after having made due enquiries, to the effect that:
- (i) AOG has duly complied with all the covenants and satisfied all the terms and conditions of this agreement on its part to be complied with and satisfied at or prior to the Closing Time;
 - (ii) the representations and warranties of AOG contained herein are true and correct as at the Closing Time, with the same force and effect as if made at the Closing Time after giving effect to the transactions contemplated hereby; and
 - (iii) there has been no material change in the statements and information relating to AOG from that disclosed in the Prospectus;
- (c) the Underwriters shall have received a certificate dated the Closing Date signed by the Corporate Secretary of Addax or any other senior officer of Addax as may be acceptable to the Joint Bookrunners, in form and content satisfactory to the Underwriters' counsel, acting reasonably, with respect to:
- (i) the articles of incorporation and by-laws of Addax and each of the Addax Subsidiaries;

- (ii) the resolutions of the board of directors of Addax, relevant to the approval of the Prospectus and the signing and filing thereof, the issue and sale of the Firm Shares to be issued and sold by Addax, copies of which are attached, and the authorization of this agreement and the other agreements and transactions contemplated herein and in the Prospectus; and
 - (iii) the incumbency and signatures of signing officers of Addax;
- (d) the Underwriters shall have received a certificate dated the Closing Date signed by the Company Secretary of AOG, or any other officer of AOG as may be acceptable to the Joint Bookrunners, in form and content satisfactory to the Underwriters' counsel, acting reasonably, with respect to:
 - (i) the resolutions or other actions by AOG relevant to the authorization of this agreement, the Relevant Agreements, the Prospectus and the other agreements and transactions contemplated herein and in the Prospectus having been duly completed and taken, as the case may be, and attaching copies of such resolutions or actions; and
 - (ii) the incumbency and signatures of the officer(s) of AOG who have signed this Agreement, the Relevant Agreements and the Prospectus;
- (e) the Underwriters, shall be satisfied that the transactions described in the Prospectus as being transactions that will occur or be completed on the Closing Date, including but not limited to the Pre-IPO Transactions as defined in the Prospectus, have been or will concurrently be completed, and shall have received such evidence thereof (including but not limited to documentation similar to that identified in clause (c) above as to each material party to such transactions) as the Joint Bookrunners may reasonably request;
- (f) the Underwriters shall have received a comfort letter, in form and substance satisfactory to the Underwriters, from Deloitte & Touche LLP, updating the letters referred to in section 4(a)(iv) to the Closing Time, provided that such letters may be based on a review by the respective auditors having a cut-off date not more than two Business Days prior to the Closing Date;
- (g) Addax shall have caused its counsel, Fasken Martineau DuMoulin LLP, to deliver to the Underwriters and their counsel a legal opinion dated and delivered the Closing Date, substantially to the effect attached hereto as Schedule "B"; provided, however that in connection with such opinion, counsel to Addax may rely on the opinions of local counsel acceptable to counsel to the Underwriters, acting reasonably, as to the qualification for distribution of the Firm Shares or opinions may be given directly by local counsel of Addax with respect to those items and as to other matters governed by the laws of jurisdictions other than the jurisdictions in which Fasken Martineau DuMoulin LLP is qualified to practise, and counsel to Addax and local counsel may rely, to the extent appropriate in the circumstances, as to matters of fact on certificates of officers of Addax and others;

- (h) Addax shall have caused its counsel, Fasken Martineau DuMoulin LLP, to deliver the Company Counsel 10b-5 Disclosure Letter, dated and delivered the Closing Date, to the Underwriters or to such of them as have requested such letter, in form and substance satisfactory to them, acting reasonably;
- (i) Addax, unless the Joint Bookrunners dispense with such requirement in writing, shall have caused its counsel, White & Case LLP, to deliver to the Underwriters and their counsel a legal opinion dated as at the Closing Date, in form and substance satisfactory to the Underwriters and their counsel, acting reasonably, which opinion may be subject to usual and customary qualifications for opinions of the type to be given, to the effect that no registration under the U.S. Securities Act is required for (i) the initial resale by the Underwriters of certain of the Firm Shares in the United States, or (ii) the offer and sale of the Firm Shares and the Over-Allotment Shares to qualified international buyers, in either case as contemplated herein and in accordance with the procedures, agreements and representations contained herein;
- (j) AOG shall have provided legal counsel to the Joint Bookrunners, as at the Closing Date, with such evidence as to the valid completion of the transactions contemplated by the Share Transfer Agreement or completed immediately prior thereto as the Underwriters may reasonably request; including appropriate opinions of legal counsel;
- (k) the Underwriters shall have received from their counsel, Fraser Milner Casgrain LLP, from Herbert Smith LLP and from local counsel to each of Addax and the Underwriters in Nigeria, such legal opinions as they may reasonably require as to the matters referred to in paragraphs (g) and (i) immediately above and to such other matters as they may reasonably request;
- (l) such of the Underwriters as shall have requested receipt of the Herbert Smith 10b-5 Disclosure Letter shall have received such letter and such of the Underwriters as shall have requested receipt of the FMC 10b-5 Disclosure Letter shall have received such letter, in each case in form and substance satisfactory to them, acting reasonably;
- (m) the Underwriters shall have received copies of correspondence indicating that Addax has obtained all necessary approvals for the Firm Shares to be listed for trading on the TSX on the Closing Date, subject only to standard listing conditions acceptable to the Underwriters; and
- (n) each of the existing and former directors, officers and employees of Addax or Addax NV who receive Common Shares pursuant to or in connection with the Share Transfer Agreement as contemplated by the Prospectus shall have entered into an agreement in form and substance satisfactory to, and in favour of, the Underwriters to the same effect as described in section 11(c) hereof.

9. Conditions of Closing of Over-Allotment Shares.

If the Over-Allotment Closing Time is the same as the Closing Time, references to the Firm Shares in section 8 (including in the form of opinion set out in Schedule B hereto) shall, unless the context otherwise requires, refer to the Firm Shares and Over-Allotment Shares, collectively. If the Over-Allotment Closing Time is after the Closing Time, the obligation of the Underwriters to purchase the Over-Allotment Shares shall be subject to the following conditions, which are for the exclusive benefit of the Underwriters, any of which may be waived, in whole or in part, by the Underwriters, in their sole discretion, pursuant to section 17:

- (a) the closing of the purchase and sale of the Firm Shares, as contemplated herein, shall have occurred;
- (b) Addax shall have delivered to the Underwriters, at the Over-Allotment Closing Time, certificates dated the Over-Allotment Closing Date addressed to the Underwriters and signed by the Chief Executive Officer of Addax and the Chief Financial Officer of Addax, or such other senior officer(s) of Addax as may be acceptable to the Underwriters, certifying for and on behalf of Addax and without personal liability, after having made due enquiries, to the effect that:
 - (i) Addax has duly complied in all material respects with all the covenants and satisfied all the terms and conditions of this agreement on its part to be complied with and satisfied at or prior to the Over-Allotment Closing Time;
 - (ii) the representations and warranties of Addax contained herein are true and correct in all material respects as at the Over-Allotment Closing Time, with the same force and effect as if made at the Over-Allotment Closing Time after giving effect to the transactions contemplated hereby;
 - (iii) receipts have been issued by the Securities Commissions in the Qualifying Jurisdictions for the Prospectus and no order, ruling or determination having the effect of ceasing the trading or suspending the issuance or sale of the Common Shares to be issued and sold by Addax hereunder has been issued or made and no proceedings for such purpose have been instituted or are pending or, to the knowledge of such officers, contemplated or threatened; and
 - (iv) there has been no material change (actual, anticipated, contemplated or threatened, whether financial or otherwise) in the business, affairs, assets, liabilities (contingent or otherwise), capital, operations or prospects of Addax or any of the Addax Subsidiaries or with respect to any of the assets or liabilities or businesses of, or to be acquired or assumed by, Addax or any of the Addax Subsidiaries (as contemplated in the Prospectus) from that disclosed in the Prospectus;

- (c) AOG shall have delivered to the Underwriters, at the Over-Allotment Closing Time, a certificate dated the Over-Allotment Closing Date addressed to the Underwriters and signed by the Chief Executive Officer of AOG and the Chief Financial Officer of AOG, or such other senior officer(s) of AOG as may be acceptable to the Joint Bookrunners, certifying for and on behalf of AOG and without personal liability, after having made due enquiries; to the effect that:
 - (i) AOG has duly complied in all material respects with all the covenants and satisfied all the terms and conditions of this agreement on its part to be complied with and satisfied at or prior to the Over-Allotment Closing Time;
 - (ii) the representations and warranties of AOG contained herein are true and correct in all material respects as at the Over-Allotment Closing Time, with the same force and effect as if made at the Over-Allotment Closing Time after giving effect to the transactions contemplated hereby; and
 - (iii) there has been no material change in the statements and information relating to AOG from that disclosed in the Prospectus;
- (d) the Underwriters shall have received a certificate dated the Over-Allotment Closing Date signed by the Corporate Secretary of Addax or any other senior officer of Addax, as may be acceptable to the Underwriters, in form and content satisfactory to the Underwriters' counsel, acting reasonably, with respect to:
 - (i) the articles of incorporation and by-laws of Addax and each of the Addax Subsidiaries;
 - (ii) the resolutions of the board of directors of Addax relevant to the issue and sale of the Over-Allotment Shares to be issued and sold by Addax; and
 - (iii) the incumbency and signatures of signing officers of Addax;
- (e) the Underwriters shall have received a comfort letter, in form and substance satisfactory to the Underwriters, acting reasonably, from Deloitte & Touche LLP, updating the letters referred to in section 8(f) to the Over-Allotment Closing Time, provided that such letters may be based on a review by the respective auditors having a cut-off date not more than two Business Days prior to the Over-Allotment Closing Date nor later than March 15, 2006;
- (f) Addax shall have caused its counsel, Fasken Martineau DuMoulin LLP, to deliver to the Underwriters and their counsel a legal opinion dated and delivered the Over-Allotment Closing Date, in form and substance satisfactory to the Underwriters and their counsel, acting reasonably, bringing the opinion referred to in section 8(g) forward to the Over-Allotment Closing Date and making such opinion applicable to the Over-Allotment Shares, *mutatis mutandis*;

- (g) Addax shall have caused its counsel, White & Case LLP, to deliver to the Underwriters and their counsel a legal opinion dated and delivered the Over-Allotment Closing Date, in form and substance satisfactory to the Underwriters and their counsel, acting reasonably, bringing the opinion referred to in section 8(i) forward to the Over-Allotment Closing Date and making such opinion applicable to the Over-Allotment Shares, *mutatis mutandis*;
- (h) the Underwriters shall have received from their counsel, Fraser Milner Casgrain LLP, from Herbert Smith LLP and from local counsel to the Underwriters in Nigeria, such legal opinions as they may reasonably require as to the matters referred to in paragraphs (f) and (g) immediately above and to such other matters as they may reasonably request; and
- (i) the Underwriters shall have received copies of correspondence indicating that Addax has obtained all necessary approvals for the Over-Allotment Shares to be listed for trading on the TSX on the Over-Allotment Closing Date, subject only to the standard listing conditions acceptable to the Underwriters, acting reasonably.

10. Closing.

The closing of the purchase and sale of the Firm Shares shall be completed at the Closing Time at the offices of Fasken Martineau DuMoulin LLP in Calgary, Alberta or at such other place as Addax and the Underwriters may agree in writing. Subject to section 10(c), at the Closing Time,

- (a) Addax shall deliver to the Joint Bookrunners, on behalf of the Underwriters, one definitive global share certificate representing in the aggregate the total number of Firm Shares, registered in the name of CDS & Co., against payment by the Joint Bookrunners, on behalf of the Underwriters, to or to the direction of Addax of the purchase price for the Firm Shares, less the amount of the fees payable to the Underwriters by Addax hereunder, by wire or electronic funds transfer.
- (b) The closing of the purchase and sale of the Over-Allotment Shares shall be completed at the Over-Allotment Closing Time at the offices of Fasken Martineau DuMoulin LLP in Calgary, Alberta or at such other place as Addax and the Underwriters may agree in writing. Subject to section 10(c), at the Over-Allotment Closing Time, Addax shall deliver to the Joint Bookrunners, on behalf of the Underwriters, one definitive global share certificate representing in the aggregate the total number of Over-Allotment Shares, registered in the name of CDS & Co., against payment by the Joint Bookrunners, on behalf of the Underwriters, to or to the direction of Addax of the purchase price for the Over-Allotment Shares, less the amount of the fees payable to the Underwriters by Addax hereunder, by wire or electronic funds transfer.
- (c) If the Closing Time is the same as the Over-Allotment Closing Time, Addax shall deliver one definitive global share certificate representing in the aggregate the total number of Firm Shares and Over-Allotment Shares, against payment by the

Joint Bookrunners, on behalf of the Underwriters, of the purchase price for the Firm Shares and the Over-Allotment Shares (net of the fees payable by Addax to the Underwriters) by wire or electronic funds transfer.

11. Restrictions on Further Issues, Sales or Transactions.

- (a) Without the prior written consent of the Joint Bookrunners, on behalf of the Underwriters, such consent not to be unreasonably withheld, during the period commencing on the date hereof and ending on the day which is 180 days following the Closing Date, none of Addax nor any of the Addax Subsidiaries shall, directly or indirectly, offer, sell or issue for sale or resale any Common Shares, or financial instruments or securities convertible into or exercisable or exchangeable for Common Shares, or agree to or announce any such offer, sale or issuance.
- (b) Without the prior written consent of the Joint Bookrunners, on behalf of the Underwriters, such consent not to be unreasonably withheld, during the period commencing on the date hereof and ending on the day which is 180 days following the Closing Date, AOG will not, directly or indirectly, (i) offer, sell, contract to sell, secure, pledge or grant any option, right or warrant to purchase, or otherwise lend, transfer or dispose of any Common Share or securities convertible into or exercisable or exchangeable for Common Shares, or (ii) make any short sale, engage in any hedging transaction, or enter into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences of ownership of Common Shares or securities convertible into or exercisable or exchangeable for Common Shares, whether any such transaction described in this section 11(b) is to be settled by delivery of Common Shares, other securities, cash or otherwise.
- (c) Notwithstanding section 11(b), no such consent shall be required for (i) the transfer of up to 9.6 million Common Shares to existing and former directors, officers and employees of Addax and the Addax Subsidiaries, or (ii) the distribution of Common Shares to the shareholders of AOG pursuant to a corporate reorganization of AOG as described in the Prospectus under the heading "The Addax And Oryx Group Ltd.", provided in all such cases that each recipient of such Common Shares enters into an agreement in form and substance satisfactory to the Underwriters at or prior to the time that such recipient receives or becomes entitled to any such Common Shares agreeing that such recipient will not, directly or indirectly, during the period ending on the day which is 180 days following the Closing Date (i) offer, sell, contract to sell, secure, pledge or grant any option, right or warrant to purchase, or otherwise lend, transfer or dispose of any Common Share or securities convertible into or exercisable or exchangeable for Common Shares, or (ii) make any short sale, engage in any hedging transaction, or enter into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences of ownership of Common Shares or securities convertible into or exercisable or exchangeable for Common

Shares, whether any such transaction described in this section 11(b) is to be settled by delivery of Common Shares, other securities, cash or otherwise.

12. Use of Proceeds.

The net proceeds from the Offering will be used by Addax on the Closing Date and Over-Allotment Closing Date (as applicable), directly or indirectly, for the purposes described in the Prospectus under the heading "Use of Proceeds".

13. Indemnification by Addax and AOG.

- (a) Each of Addax and Addax NV shall fully indemnify and save harmless each of the Underwriters, each of their respective affiliates and each of their respective directors, officers, employees and agents and each person who controls any Underwriter (collectively, the "**Indemnified Parties**" and individually an "**Indemnified Party**") from and against any and all losses (other than loss of profit), costs, expenses, claims, demands, actions, damages, fines, penalties, taxes, interest and liabilities, joint or several, including the aggregate amount paid in reasonable settlement of any actions, suits, proceedings, investigations or claims and the fees and expenses of the Indemnified Parties' counsel on a solicitor and his own client basis that may be incurred in advising with respect to or defending any action, suit, proceeding, investigation or claim that may be made or threatened against any Indemnified Party or in enforcing this indemnity (collectively, the "**Claims**") to which any Indemnified Party may become subject or otherwise involved, in any capacity insofar as Claims relate to, are caused by, result from, arise out of or are based upon, directly or indirectly, the engagement and activities of the Underwriters under this Agreement, including without limitation:
- (i) any breach, default or failure to perform by Addax of its representations, warranties, covenants or obligations hereunder or any other document to be delivered pursuant hereto;
 - (ii) any untrue statement or alleged untrue statement of a material fact (except any information or statement relating solely to and provided in writing by any of the Underwriters expressly for use in the Prospectus) contained in the Prospectus or the Final International Offering Memorandum, or in any amendment or supplement thereto, including the omission or alleged omission therefrom of a material fact required to be stated therein or necessary to make the statements therein not misleading or arising out of any untrue statement or alleged untrue statement of a material fact included in any preliminary prospectus, the Preliminary International Offering Memorandum or the Disclosure Package (as defined in Schedule A hereto), or any amendment or supplement thereto, or the omission or alleged omission therefrom of a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading;

- (iii) any omission or alleged omission to state in the Offering Documents, any other material filed in compliance or intended compliance with Securities Laws or any certificate of Addax delivered under this Agreement, any fact or information (whether material or not) (except facts relating solely to and provided in writing by any of the Underwriters expressly for use in the Offering Documents) required to be stated in such document or necessary to make any statement in such document not misleading in light of the circumstances under which it was made;
- (iv) any order made or enquiry, investigation or proceeding (formal or informal) commenced or threatened by any Securities Commission or other competent authority based upon any omission or alleged omission or any misrepresentation or alleged misrepresentation (except an omission or alleged omission or a misrepresentation or alleged misrepresentation relating solely to and provided in writing by any of the Underwriters expressly for use in the Offering Documents) in the Offering Documents or any other materials filed in compliance or intended compliance with Securities Laws, or based upon any failure of Addax to comply with Securities Laws preventing or restricting the trading in or the sale of the Common Shares or related activities in any of the Qualifying Jurisdictions; and
- (v) any non-compliance or alleged non-compliance by Addax with any Securities Laws in connection with the transactions contemplated hereby including non-compliance by Addax with any statutory requirement to make any document available for inspection

provided, however, that no party who has engaged in fraud, fraudulent misrepresentation or gross negligence in connection with a Claim shall be entitled to indemnity hereunder in connection with such Claim.

- (b) AOG shall fully indemnify and save harmless each Indemnified Party from and against any and all Claims to which any Indemnified Party may become subject or otherwise involved, in any capacity insofar as Claims relate to, are caused by, result from, arise out of or are based upon, directly or indirectly:
 - (i) any breach, default or failure to perform by AOG of its representations, warranties, covenants or obligations hereunder or any other document to be delivered pursuant hereto;
 - (ii) any untrue statement or alleged untrue statement of a material fact relating to AOG contained in the Prospectus or the Final International Offering Memorandum, or in any amendment or supplement thereto, including the omission or alleged omission therefrom of a material fact relating to AOG required to be stated therein or necessary to make the statements therein not misleading or arising out of any untrue statement or alleged untrue statement of a material fact relating to AOG included in any preliminary

prospectus, the Preliminary International Offering Memorandum or Disclosure Package (or any amendment or supplement thereto), or the omission or alleged omission therefrom of a material fact relating to AOG necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading;

- (iii) any omission or alleged omission to state in the Offering Documents, any other material filed in compliance or intended compliance with Securities Laws or any certificate of AOG delivered under this agreement, any fact or information (whether material or not) required to be stated in such document with respect to AOG or necessary to make any statement in such document relating to AOG not misleading in light of the circumstances under which it was made; and
- (iv) any non-compliance or alleged non-compliance by AOG with any Securities Laws in connection with the transactions contemplated hereby;

provided, however, that no party who has engaged in fraud, fraudulent misrepresentation or gross negligence in connection with a Claim shall be entitled to indemnity hereunder in connection with such Claim.

- (c) Promptly after receiving notice of a Claim or receipt of notice of the commencement of any investigation which is based, directly or indirectly, upon any matter in respect of which indemnification may be sought from Addax, Addax NV or AOG (the party (or each party) from whom indemnification may be sought being referred to herein as the "**Indemnifying Party**" and collectively as the "**Indemnifying Parties**"), an Indemnified Party will notify the Indemnifying Party in writing of the particulars thereof, provided that the omission to so notify the Indemnifying Party shall not relieve the Indemnifying Party of any liability which the Indemnifying Party may have to any Indemnified Party except and only to the extent that the Indemnifying Party demonstrates that any such delay in or failure to give notice in respect of an actual Claim as herein required materially prejudices the defence of such action, suit, proceeding, claim or investigation or results in any material increase in the liability which the Indemnifying Party has under this indemnity.
- (d) The Indemnifying Party shall, subject as hereinafter provided, be entitled (but not required) at its expense to assume the defence on behalf of the Indemnified Party of any suit brought to enforce a Claim; provided that the defence shall be through legal counsel selected by the Indemnifying Party and acceptable to the Indemnified Party, acting reasonably, and no admission of liability shall be made by the Indemnifying Party or the Indemnified Party without, in each case, the prior written consent of all the Indemnified Parties affected and the Indemnifying Party, in each case such consent not to be unreasonably withheld. An Indemnified Party shall have the right to employ separate counsel in any such suit and participate in the defence thereof but the fees and expenses of such counsel shall be at the expense of the Indemnified Party unless:

- (i) the Indemnifying Party fails to assume the defence of such suit on behalf of the Indemnified Party within ten Business Days of receiving notice of such suit;
- (ii) the Indemnifying Party and the Indemnified Party have mutually agreed to the retention of such counsel; or
- (iii) the named parties to any such suit (including any added or third parties) include the Indemnified Party and Addax, Addax NV or AOG, and the Indemnified Party shall have been advised in writing by counsel that there is an actual or potential conflict in the interests of Addax, Addax NV or AOG, on the one hand, and the interests of the Indemnified Party, on the other hand, or additional defences are available to the Indemnified Party, in either case which makes representation by the same counsel inappropriate.

In each of cases (i), (ii) or (iii), the Indemnifying Party shall not have the right to assume the defence of such suit on behalf of the Indemnified Party, but the Indemnifying Party shall only be liable to pay the reasonable fees and disbursements of one firm of separate counsel in connection with any one such action or separate but substantially similar or related actions in any one jurisdiction for all Indemnified Parties.

- (e) Each of Addax, Addax NV and AOG hereby acknowledges and agrees that, with respect to sections 13 and 14, the Underwriters are contracting on their own behalf and as agents for their affiliates and their respective directors, officers, employees, partners and agents and each person who controls any Underwriter (collectively, the "**Beneficiaries**"). In this regard, each of the Underwriters shall act as trustee for the Beneficiaries of the covenants of Addax, Addax NV and AOG under sections 13 and 14 with respect to the Beneficiaries and accepts these trusts and shall hold and enforce such covenants on behalf of the Beneficiaries.
- (f) The rights of indemnity contained in this section 13 shall not enure to the benefit of the Underwriters or any other Indemnified Party if Addax has complied with the provisions of sections 4 and 5 and where it is determined by a court of competent jurisdiction by final and nonappealable judgment that (i) prior to the Applicable Time (as defined in Schedule A) Addax shall have notified the Underwriters in writing that the Preliminary Prospectus contains an untrue statement of material fact or omits to state therein a material fact required to be stated therein in order to make the statements therein not misleading and which is required under the Securities Laws to be delivered to such person, (ii) such untrue statement or omission of a material fact was corrected in an amended or supplemented preliminary prospectus and such corrected preliminary prospectus was provided to such Underwriter at least two business days prior to the Applicable Time and in sufficient quantity so that such corrected preliminary prospectus could have been conveyed to such person prior to the Applicable Time

and (iii) such Claim would not have occurred had such corrected preliminary prospectus been conveyed to such person.

- (g) Each Indemnifying Party also agrees that no Indemnified Party shall have any liability (whether direct or indirect, in contract or tort or otherwise) to the Indemnifying Party or any person asserting claims on behalf of or in right of the Indemnifying Party for or in connection with the matters provided for herein except to the extent any losses, expenses, claims, actions, damages, fines, penalties or liabilities incurred by the Indemnifying Party are determined by a court of competent jurisdiction in a final judgment that has become non-appealable to have resulted from the gross negligence, wilful misconduct, fraud or fraudulent misrepresentation of such Indemnified Party. Neither Indemnifying Party nor any Underwriter will, without each of the other's prior express written consent, settle, compromise, consent to the entry of any judgement in or otherwise seek to terminate any action, suit, proceeding, investigation or claim in respect of which indemnification may be sought hereunder (whether or not any Indemnified Party is a party thereto) unless such settlement, compromise, consent or termination includes a release of each Indemnified Party from any liabilities arising out of such action, suit, proceeding, investigation or claim and does not include a statement as to or an admission of fault, culpability or a failure to act by or on behalf of any Indemnified Party.
- (h) If any legal proceedings shall be instituted against either Indemnifying Party or if any regulatory authority or stock exchange shall carry out an investigation of either Indemnifying Party and, in either case, any Indemnified Party is required to testify, or respond to procedures designed to discover information, in connection with or by reason of the services performed by the Underwriters hereunder, the Indemnified Parties may employ their own legal counsel and the applicable Indemnifying Party shall pay and reimburse the Indemnified Parties for the reasonable fees, charges and disbursements (on a full indemnity basis) of such legal counsel, the other expenses reasonably incurred by the Indemnified Parties in connection with such proceedings or investigation and a fee at the normal *per diem* rate for any director, officer or employee of the Underwriters involved in the preparation for or attendance at such proceedings or investigation.
- (i) The rights and remedies of the Underwriters set forth in sections 13, 14 and 18 are to the fullest extent possible in law cumulative and not alternative and the election by any Underwriter to exercise any such right or remedy shall not be, and shall not be deemed to be, a waiver of any other rights and remedies.

14. Contribution.

- (a) In order to provide for just and equitable contribution in circumstances in which the indemnity provided in section 13 would otherwise be available in accordance with its terms but is, for any reason, held to be unavailable to or unenforceable by, in whole or in part, the Indemnified Parties or enforceable otherwise than in accordance with its terms, or is insufficient to hold any Indemnified Party

harmless, the applicable Indemnifying Party (or each Indemnifying Party, as the case may be) shall contribute to the amount paid or payable by the Indemnified Parties as a result of such Claim in such proportion as is appropriate to reflect not only the relative benefits received by the Indemnifying Party or Indemnifying Parties, on the one hand, and the Indemnified Parties, on the other hand, but also the relative fault of the Indemnifying Parties and the Indemnified Parties as well as any relevant equitable considerations; provided that the Indemnified Parties shall not in any event be liable to pay or contribute to the amount paid or payable by the Indemnified Parties under the Claim any amounts in excess of the aggregate amount of the fees actually received by the Indemnified Parties under this Agreement. However, no party who has engaged in any fraud, fraudulent misrepresentation, wilful misconduct or gross negligence in connection with a Claim shall be entitled to claim contribution from any person who has not engaged in such fraud, fraudulent misrepresentation or gross negligence in connection with such Claim. The relative benefits received by the Indemnifying Parties, on the one hand, and the Indemnified Parties, on the other hand, shall be deemed to be in the same ratio as the total proceeds from the offering of the Firm Shares and, if applicable, the Over-Allotment Shares (net of the underwriters' fee payable to the Underwriters pursuant to this Agreement but before deducting expenses) received by Addax is to the underwriters' fee received by the Underwriters pursuant to this Agreement. The relative fault of an Indemnifying Party on one hand, and of the Indemnified Parties, on the other hand, shall be determined by reference to, among other things, whether the matters or things referred to in section 13 which resulted in such Claims relate to information supplied by or steps or actions taken or done or not taken or done by or on behalf of the Indemnifying Parties, or to information supplied by or steps or actions taken or done or not taken or done by or on behalf of the Underwriters and the relative intent, knowledge, access to information and opportunity to correct or prevent such statement, omission or misrepresentation, or other matter or thing referred to in section 13. The parties agree that it would not be just and equitable if contribution pursuant to this section 14 were determined by pro rata allocation (even if the Underwriters were treated as a single entity) or by any other method of allocation which does not take account of the equitable considerations referred to above in this section 14.

- (b) For greater certainty, in the event of unenforceability or unavailability of the indemnity provided in section 13, an Indemnifying Party shall not have any obligation to contribute pursuant to this section 14 in respect of any Claim except to the extent the indemnity given by it in section 13 would have been applicable to such Claim in accordance with its terms, had such indemnity been found to be enforceable and available to the Indemnified Parties.
- (c) Notwithstanding the provisions of this section, no Underwriter shall be required to contribute any amount in excess of the amount by which the total price at which the Common Shares purchased and sold by it hereunder exceeds the amount of any damages which such Underwriter has otherwise been required to pay by reason of such untrue or alleged untrue statement or omission or alleged omission.

- (d) The rights to contribution provided in this section 14 shall be in addition to and not in derogation of any other right to contribution which the Indemnified Parties may have by statute or otherwise at law (provided that paragraphs (a) and (b) of this section shall apply, *mutatis mutandis*, in respect of such other right) and the rights in this section 14 shall remain operative and in full force and effect regardless of:
 - (i) acceptance of any Firm Shares or Over-Allotment Shares and payment therefor; or
 - (ii) any termination of this agreement.

15. Sales Restrictions.

- (a) The Underwriters shall offer the Firm Shares and Over-Allotment Shares for sale to the public, directly and through Selling Firms, only as permitted by Securities Laws and upon the terms and conditions set forth in the Prospectus and in this Agreement, at an offering price not exceeding the offering price set forth on the cover page of the Prospectus.
- (b) The Underwriters will not solicit offers to purchase or sell the Firm Shares and Over-Allotment Shares so as to require registration of the Firm Shares and Over-Allotment Shares or filing of a prospectus with respect to the Firm Shares and Over-Allotment Shares under the laws of any jurisdiction other than the Qualifying Jurisdictions.
- (c) The Selling Firms shall be permitted to offer the Firm Shares and Over-Allotment Shares outside of Canada, including offers as principal to "qualified institutional buyers" in the United States as defined under U.S. Securities and Exchange Commission Rule 144A as such term is defined in Schedule A hereto, if such offers are made in compliance with all applicable laws, including the requirements set forth in Schedule A hereto. For the purposes of this paragraph, the Underwriters shall be entitled to assume that the Firm Shares and Over-Allotment Shares are qualified or registered for distribution by duly qualified investment dealers and brokers under the Securities Laws of those Qualifying Jurisdictions where a receipt or similar document for the Prospectus shall have been obtained from the applicable Regulatory Authority (including a decision document under the Mutual Reliance Procedures) following the filing of the Prospectus, unless otherwise notified in writing.
- (d) The Underwriters agree, on behalf of themselves and their United States affiliates, for the benefit of Addax, to comply with the United States selling restrictions imposed by the laws of the United States and set forth in Schedule A, which forms part of this Agreement. They also agree to obtain such an agreement from each Selling Firm.
- (e) Notwithstanding the foregoing provisions of this section 15, no Underwriter shall be liable to Addax under this section 15 or Schedule A hereto as a result of the

violation by another Underwriter or Selling Firm (other than Selling Firm affiliates of such Underwriter) under this section 15 or Schedule A.

16. Expenses.

- (a) Addax's Expenses – Regardless of whether the Offering closes, Addax will be responsible for all of its expenses related to the Offering, including all fees and disbursements of Addax's legal counsel, fees and disbursements of its accountants, auditors and any other third party advisers engaged by Addax and expenses related to road shows and marketing activities, printing costs and filing fees; provided, however, that the recipients of the Company Counsel 10b-5 Disclosure Letter shall be responsible for, or will reimburse Addax for, the incremental expenses directly attributable to Company's legal counsel providing the Company Counsel 10b-5 Disclosure Letter, to a maximum of \$200,000.
- (b) Underwriters' Expenses if the Offering Closes – If the Offering closes, the Underwriters will be responsible for the fees and disbursements of legal counsel and other third-party consultants for the Underwriters, all other out of pocket expenses (including Underwriters' travel expenses in connection with due diligence and marketing meetings) and all taxes thereon (collectively, the "Underwriters' Expenses"). Each 10b-5 Disclosure Letter will be addressed and provided solely to the Underwriters who have respectively requested such letter and expenses related to the provision of each 10b-5 Disclosure Letter will be for the account of the Underwriters who requested the same and not for the account of any other Underwriters.
- (c) Underwriters' Expenses if the Offering Does Not Close –

If the Offering does not close under any circumstances, Addax shall reimburse the Underwriters for the Underwriters' Expenses up to a maximum of \$400,000. For clarity, any expenses related to the provision of the 10b-5 Disclosure Letters will be for the account of the Underwriters who respectively requested them and not for the account of the other Underwriters.

17. All Terms to be Conditions.

All representations, warranties, terms and conditions of this agreement for the benefit of the Underwriters shall be construed as conditions, and any breach of or failure to comply in any material respect with any of such representations, warranties, terms or conditions which are for the benefit of the Underwriters shall entitle the Underwriters to terminate their obligations to purchase the Firm Shares by giving notice in writing to that effect to Addax or AOG at or prior to the Closing Time and to terminate their obligations to purchase the Over-Allotment Shares by giving notice in writing to that effect to Addax or AOG at or prior to the Over-Allotment Closing Time. It is understood that the Underwriters may waive, in whole or in part, or extend the time for compliance with, any of such terms and conditions without prejudice to the rights of the Underwriters in respect of any such terms and conditions or any other or subsequent breach or non-compliance,

provided that to be binding on the Underwriters any such waiver or extension must be in writing. No act of the Underwriters in offering the Firm Shares or the Over-Allotment Shares or in preparing or joining in the execution of the Offering Documents, the Preliminary Prospectus shall constitute a waiver of, or estoppel against, the Underwriters.

18. Termination by Underwriters in Certain Events.

- (a) Each Underwriter shall also be entitled to terminate its obligation to purchase the Firm Shares by written notice to that effect given to Addax at or prior to the Closing Time, and to terminate its obligation to purchase the Over-Allotment Shares by written notice to that effect given to Addax at or prior to the Over-Allotment Closing Time, if:
- (i) there shall be any material change in the condition, financial or otherwise, or in the earnings, business affairs or business prospects of Addax or any of the Addax Subsidiaries, whether or not arising in the ordinary course of business, or there should be discovered any previously undisclosed material fact required to be disclosed in the Prospectus or Supplementary Material or required to be disclosed therein to prevent any statement contained therein from being a misrepresentation (including any statement relating to AOG) or there should occur a change (other than a change related solely to and provided by any of the Underwriters) in a material fact contained in the Prospectus, in each case which has or may have a materially adverse effect on the market price or value of the Common Shares or could reasonably result in the purchasers of a material number of Firm Shares or Over-Allotment Shares exercising their right under Securities Laws to withdraw from or rescind their purchase or sue for damages in respect thereof;
 - (ii) any inquiry, action, suit, investigation or other proceeding (whether formal or informal) is commenced, announced or threatened or any order or ruling issued or made by, under or pursuant to any federal, provincial, state, municipal or other governmental or regulatory department, commission, board, bureau, agency or instrumentality of any jurisdiction or any third party which in the judgment of the Underwriter operates or could operate to prevent, suspend, hinder, delay, restrict or otherwise materially adversely affect the transactions contemplated by the Prospectus;
 - (iii) any inquiry, action, suit, investigation or other proceeding (whether formal or informal) is commenced, announced or threatened or any order is made by any federal, provincial, state, municipal or other governmental or regulatory department, commission, board, bureau, agency or instrumentality of any jurisdiction including, without limitation, the TSX or any securities regulatory authority, or any law or regulation (or the interpretation, pronouncement or administration thereof or in respect thereof) is enacted or changed which in the judgment of the Underwriter

- may prevent, suspend or restrict or operates to prevent, suspend or restrict the distribution, trading or marketability of the Common Shares or materially and adversely affects or will materially and adversely affect the market price or value of the Common Shares;
- (iv) there should develop, occur or come into effect or existence any event, action, state, condition or major financial occurrence of national or international consequence or any law or regulation, inquiry, or other occurrence of any nature whatsoever, including, without limiting the generality of the foregoing, any military conflict, civil insurrection or terrorist action or like event, including, without limitation, military insurrection (whether or not in connection with such conflict or insurrection), which in the judgment of the Underwriter materially adversely affects, or may materially adversely affect, the financial markets in Canada or the United States, or the business, financial condition, operations or affairs (actual or as contemplated in the Prospectus) of Addax or any of the Addax Subsidiaries or prevents or materially restricts the trading in or the distribution of the Common Shares in any of the Qualifying Jurisdictions or the United States;
 - (v) there is a suspension or material limitation in trading in securities generally on the Toronto Stock Exchange or the New York Stock Exchange;
 - (vi) there is a material disruption in the commercial banking or securities settlement or clearance services in Canada or the United States;
 - (vii) there is announced any change or proposed change in the tax laws of any jurisdiction applicable to Addax or any Addax Subsidiary and such change could, in the reasonable opinion of the Underwriter, be expected to have a significant adverse effect on the market price, value or marketability of the Common Shares; or,
 - (viii) the state of the energy or financial markets is such that in the judgment of the Underwriters the Firm Shares cannot be profitably marketed.
- (b) If an Underwriter terminates its obligation pursuant to section 18(a) with respect to the purchase of the Firm Shares or with respect to the purchase of the Firm Shares and the Over-Allotment Shares, there shall be no further liability on the part of such Underwriter or of Addax or AOG to such Underwriter, except in respect of any liability which may have arisen or may thereafter arise under sections 13, 14 and 18. If an Underwriter terminates its obligation pursuant to section 18(a) with respect to the purchase of the Over-Allotment Shares only, there shall be no further liability on the part of such Underwriter or of Addax or AOG to such Underwriter with respect to the Over-Allotment Shares, except in respect of any liability which may have arisen or may thereafter arise under sections 13, 14 and 18.

- (c) The right of the Underwriters or any of them to terminate their respective obligations under this agreement is in addition to such other remedies as they may have in respect of any default, act or failure to act of Addax or AOG in respect of any of the matters contemplated by this agreement. A notice of termination given by one Underwriter under this section 18 shall not be binding upon the other Underwriters.

19. Market Stabilization.

In connection with the distribution of the Firm Shares and Over-Allotment Shares, the Underwriters and the Selling Firms may over-allot or effect transactions which stabilize or maintain the market price of the Firm Shares and Over-Allotment Shares at levels above those which might otherwise prevail in the open market in compliance with Securities Laws. Such stabilizing transactions, if any, may be discontinued at any time.

20. Obligations of the Underwriters to be Several.

- (a) Subject to the terms and conditions hereof, the obligation of the Underwriters to purchase the Firm Shares and Over-Allotment Shares (as applicable) shall be several and not joint, nor joint and several. The percentage of the Firm Shares and Over-Allotment Shares (as applicable) to be severally purchased and paid for by each of the Underwriters shall be as follows:

<u>Dealer</u>	<u>Percentage</u>
RBC Dominion Securities Inc.	27.5%
Merrill Lynch Canada Inc.	22.5%
Scotia Capital Inc.	15.0%
CIBC World Markets Inc.	10.0%
TD Securities Inc.	10.0%
National Bank Financial Inc.	7.5%
Canaccord Capital Corporation	2.5%
FirstEnergy Capital Corp.	2.5%
Peters & Co. Limited	2.5%
Total	100%

- (b) If one or more of the Underwriters shall fail to purchase its applicable percentage of the total number of the Firm Shares at the Closing Time and such failure shall constitute a default in its obligation under this agreement, the remaining

Underwriters shall be obligated severally to purchase such Firm Shares which the defaulting Underwriters have failed to purchase, in the proportions that the percentage set forth opposite the name of each of the remaining Underwriters bears to the aggregate of such percentages (or in such other proportions as the remaining Underwriters may agree); provided that, if the total number of Firm Shares which one or more of the Underwriters has failed to purchase exceeds 10% of the total number of Firm Shares which the Underwriters have agreed to purchase pursuant to this agreement:

- (i) the remaining Underwriters shall have the right, but not the obligation, to purchase severally all but not less than all of the Firm Shares in such proportions as may be agreed upon by the non-defaulting Underwriters, and the non-defaulting Underwriters shall have the right, by notice in writing to Addax and AOG, to postpone the Closing Date for a period not exceeding five Business Days to effect such purchase; and
 - (ii) if the non-defaulting Underwriters elect not to exercise such right to assume the entire obligation of the defaulting Underwriters, such non-defaulting Underwriters shall be entitled, by notice to Addax and AOG, to terminate, without liability, their obligations to purchase their original percentage of the Firm Shares and Addax shall not be obligated to sell less than all of the Firm Shares and shall have the right to terminate their obligations hereunder without liability on their part, except under sections 13, 14 and 18, in respect of such non-defaulting Underwriters.
- (c) If one or more of the Underwriters shall fail to purchase its applicable percentage of the total number of the Over-Allotment Shares at the Over-Allotment Closing Time and such failure shall constitute a default in its obligation under this agreement, the remaining Underwriters shall be obligated severally to purchase such Over-Allotment Shares which the defaulting Underwriters have failed to purchase, in the proportions that the percentage set forth opposite the name of each of the remaining Underwriters bears to the aggregate of such percentages (or in such other proportions as the remaining Underwriters may agree); provided that, if the total number of Over-Allotment Shares which one or more of the Underwriters has failed to purchase exceeds 10% of the total number of Over-Allotment Shares which the Underwriters have agreed to purchase pursuant to this agreement:
- (i) the remaining Underwriters shall have the right, but not the obligation, to purchase severally all but not less than all of the Over-Allotment Shares in such proportions as may be agreed upon by the non-defaulting Underwriters, and the non-defaulting Underwriters shall have the right, by notice in writing to Addax and AOG, to postpone the Over-Allotment Closing Date for a period not exceeding five Business Days to effect such purchase; and

- (ii) if the non-defaulting Underwriters elect not to exercise such right to assume the entire obligation of the defaulting Underwriters, such non-defaulting Underwriters shall be entitled, by notice to Addax and AOG, to terminate, without liability, their obligations to purchase their original percentage of the Over-Allotment Shares and Addax and AOG shall not be obligated to sell less than all of the Over-Allotment Shares and shall have the right to terminate their obligations hereunder with respect to the Over-Allotment Shares without liability on their part, except under sections 13, 14 and 18, in respect of such non-defaulting Underwriters.
- (d) Nothing in this section 20 shall relieve any Underwriter in default from liability to Addax or to any non-defaulting Underwriter in respect of its default hereunder.

21. Notices.

Any notice or other communication required or permitted to be given hereunder shall be in writing and shall be delivered:

- (a) (i) in the case of Addax, to 16, avenue Eugene-Pittard, 1206, Geneva, Switzerland; (ii) in the case of AOG, to AOG Advisory Services, 66 Warwick Square, London, England, SW1V2AL; and
- (b) in the case of the Underwriters to their respective addresses for notice set out in Schedule D hereto.

Addax, AOG and the Underwriters may change their respective addresses for notices by notice given in the manner aforesaid. Any such notice or other communication shall be in writing and, unless delivered personally to the addressee or to a responsible officer of the addressee, as applicable, shall be given by facsimile transmission and shall be deemed to have been given (i) in the case of a notice delivered personally to a responsible officer of the addressee, when so delivered; and (ii) in the case of a notice delivered or given by facsimile transmission, on the first Business Day following the day on which it is sent.

22. Acknowledgement of Addax and AOG.

Each of Addax and AOG acknowledges and agrees that (i) the purchase and sale of the Common Shares pursuant to this Agreement, including the determination of the offering price of the Common Shares and any related discounts and commissions, is an arm's-length commercial transaction between Addax, on the one hand, and the several Underwriters, on the other hand, (ii) in connection with the Offering and the process leading to such transaction, each Underwriter is and has been acting solely as a principal and is not the agent or fiduciary of Addax, Addax NV, AOG, or any of their stockholders, creditors, employees or any other party, (iii) no Underwriter has assumed or will assume an advisory or fiduciary responsibility in favour of Addax, Addax NV or AOG with respect to the Offering or the process leading thereto (irrespective of whether such Underwriter has advised or is currently advising Addax, Addax NV or AOG on other matters) and no Underwriter has any obligation to Addax, Addax NV or AOG with respect to the Offering except the obligations expressly set forth in the Underwriting

Agreement, (iv) the Underwriters and their respective affiliates may be engaged in a broad range of transactions that involve interests that differ from those of Addax, Addax NV or AOG, and (v) the Underwriters have not provided any legal, accounting, regulatory or tax advice with respect to the Offering and Addax, Addax NV and AOG have consulted its own legal, accounting, regulatory and tax advisors to the extent it deemed appropriate

23. Miscellaneous.

- (a) Except with respect to sections 13, 14, 17 (only insofar as waiver of any material condition of closing is concerned), 18 and 20, all transactions and notices on behalf of the Underwriters hereunder or contemplated hereby may be carried out or given on behalf of the Underwriters by the Joint Bookrunners and the Joint Bookrunners shall use commercially reasonable efforts to discuss with the other Underwriters the nature of any such transactions and notices prior to giving effect thereto or the delivery thereof, as the case may be.
- (b) This agreement shall enure to the benefit of, and shall be binding upon, the Underwriters and Addax and AOG and their respective successors and legal representatives.
- (c) This agreement shall be governed by and interpreted in accordance with the laws of the Province of Alberta and the federal laws of Canada applicable therein without reference to its conflicts of laws provisions. Each of the parties hereto irrevocably attorns to the non-exclusive jurisdiction of the courts of the Province of Alberta.
- (d) If any provision of this agreement is determined to be invalid or unenforceable in whole or in part, such invalidity or unenforceability shall attach only to such provision or part thereof and the remaining part of such provision and all other provisions hereof shall continue in full force and effect. The invalidity or unenforceability of any provision in any particular jurisdiction shall not affect its validity or enforceability in any other jurisdiction where it is valid or enforceable.
- (e) Time shall be of the essence hereof and, following any waiver or indulgence by any party, time shall again be of the essence hereof.
- (f) The words, "hereunder", "hereof" and similar phrases mean and refer to this agreement.
- (g) All representations, warranties, covenants and agreements of Addax, Addax NV, AOG and the Underwriters herein contained or contained in documents submitted pursuant to this agreement and in connection with the transaction of purchase and sale herein contemplated shall survive the purchase and sale of the Firm Shares and the Over-Allotment Shares and the termination of this agreement and shall continue in full force and effect for the benefit of the Underwriters or Addax or AOG, as the case may be, regardless of any subsequent disposition of the Firm Shares or Over-Allotment Shares or any investigation by or on behalf of the

Underwriters with respect thereto, for a period expiring at such time as the right of a purchaser under the Offering to make a Claim under the Securities Laws expires. The Underwriters shall be entitled to rely on the representations and warranties of Addax, Addax NV and AOG contained herein or delivered pursuant hereto notwithstanding any investigation which the Underwriters may undertake or which may be undertaken on the Underwriters' behalf. Addax and AOG shall be entitled to rely on the representations and warranties of the Underwriters contained herein notwithstanding any investigation which Addax or AOG may undertake or which may be undertaken on their behalf.

- (h) Each of the parties hereto shall be entitled to rely on delivery of a facsimile copy of this agreement and acceptance by each such party of any such facsimile copy shall be legally effective to create a valid and binding agreement between the parties hereto in accordance with the terms hereof.
- (i) This agreement may be executed in any number of counterparts, each of which when so executed shall be deemed to be an original and all of which when taken together shall constitute one and the same agreement.
- (j) This agreement constitutes the entire agreement between the parties with respect to the subject matter hereof and the terms and conditions of this agreement supersede any previous verbal or written agreement between the Underwriters or any of them and Addax and AOG with respect to this offering including, without limitation, the engagement letter between Addax NV and the Joint Bookrunners dated September 27, 2005 (except that Paragraph 11(a) thereof shall survive and shall remain in full force and effect for all purposes in accordance with the respective terms thereof) and the letter between AOG and the Joint Bookrunners dated September 27, 2005.
- (k) Each of the parties hereto shall promptly do, make, execute or deliver, or cause to be done, made, executed or delivered, all such further acts, documents and things as the other party hereto may reasonably require from time to time for the purposes of giving effect to this agreement and shall use reasonable commercial efforts and take all such steps as may be reasonably within its power to implement to their full extent the provisions of this agreement.
- (l) Unless otherwise stated, all references to currency in this agreement are references to Canadian currency.
- (m) Schedules A, B, and C attached hereto are each incorporated into and form part of this Agreement.

- Schedule A - U.S. Selling Restrictions
- Schedule B - Company Counsel Opinion
- Schedule C - Addresses for Notices to Underwriters

Schedule A to an underwriting agreement dated
February 8, 2006 (the "Underwriting Agreement")

U.S. SELLING RESTRICTIONS

1. Capitalized terms used but not defined in this Schedule A shall have the meanings ascribed thereto in the Underwriting Agreement to which this Schedule A is attached. For the purpose of this Schedule A, the following terms shall have the meanings indicated:
 - (a) "**affiliate**" means "affiliate" as defined in Rule 405 under the U.S. Securities Act;
 - (b) "**Applicable Time**" means 9:30 a.m. (Eastern Standard Time) on February 9, 2006 or such other time as agreed by the Company and the Underwriters;
 - (c) "**Disclosure Package**" means the Preliminary Prospectus and the Preliminary International Offering Memorandum, each as amended or supplemented immediately prior to the Applicable Time, together with the Electronic Roadshow;
 - (d) "**Directed Selling Efforts**" means directed selling efforts as that term is defined in Regulation S; without limiting the foregoing, but for greater clarity in this Schedule A, it means, subject to the exclusions from the definition of directed selling efforts contained in Regulation S, any activity undertaken for the purpose of, or that could reasonably be expected to have the effect of, conditioning the market in the United States for any of the Firm Shares or Over-Allotment Shares and shall include, without limitation, the placement of any advertisement in a publication with a general circulation in the United States that refers to the offering of any of the Firm Shares or Over-Allotment Shares;
 - (e) "**Electronic Roadshow**" means the electronic roadshow materials relating to Addax posted on Netroadshow on January 19, 2006.
 - (f) "**Execution Time**" shall mean the date and time that the Underwriting Agreement is executed and delivered by the parties hereto;
 - (g) "**Investment Company Act**" means the United States Investment Company Act of 1940, as amended;
 - (h) "**Qualified Institutional Buyer**" means a "qualified institutional buyer" as defined in Rule 144A;
 - (i) "**Regulation D**" means Regulation D adopted by the SEC under the U.S. Securities Act;
 - (j) "**Regulation S**" means Regulation S adopted by the SEC under the U.S. Securities Act;

- (k) "Rule 144A" means Rule 144A adopted by the SEC under the U.S. Securities Act;
- (l) "SEC" means the United States Securities and Exchange Commission;
- (m) "Selling Dealer Group" means the dealers and brokers other than the Underwriters, if any, who participate in the offer and sale of the Firm Shares or Over-Allotment Shares pursuant to the Underwriting Agreement;
- (n) "Substantial U.S. Market Interest" means "substantial U.S. market interest" as defined in Regulation S;
- (o) "United States" means the United States of America, its territories and possessions, any state of the United States, and the District of Columbia;
- (p) "U.S. Exchange Act" means the United States Securities Exchange Act of 1934, as amended;
- (q) "U.S. Securities Act" means the United States Securities Act of 1933, as amended; and

2. The Underwriters severally but not jointly:

- (a) acknowledge that the Firm Shares and Over-Allotment Shares have not been and will not be registered with the SEC under the U.S. Securities Act and that the Firm Shares and Over-Allotment Shares are being offered and sold pursuant to a prospectus under Canadian securities laws and in reliance upon an exemption from registration provided by Regulation S (supplemented, in the case of offers and sales by the Underwriters or by members of the Selling Dealer Group through their respective United States affiliates to Qualified Institutional Buyers in the United States, by the exemption from registration provided by Rule 144A), and are being offered by the Underwriters or by members of the Selling Dealer Group through their respective United States affiliates; and
- (b) agree that neither they, nor any member of the Selling Dealer Group, nor any of their respective affiliates nor any person acting on behalf of any of the foregoing:
 - (i) have engaged or will engage in any Directed Selling Efforts with respect to the Firm Shares or Over-Allotment Shares,
 - (ii) except to the extent permitted by section 3 of this Schedule A, have made or will make (A) any offer to sell or solicitation of an offer to buy any of the Firm Shares or Over-Allotment Shares to any person in the United States, or (B) any sale of the Firm Shares or Over-Allotment Shares outside the United States unless such sales are made in offshore transactions within the meaning of Regulation S.

- (iii) have taken or will take, directly or indirectly, any action which would constitute a violation of Regulation M under the U.S. Exchange Act, or
 - (iv) have solicited or will solicit offers for, or offers to sell, the Firm Shares or Over-Allotment Shares by means of any form of general solicitation or general advertising (within the meaning of Rule 502(c) of Regulation D).
3. It is understood and agreed by the Underwriters that the Firm Shares and Over-Allotment Shares may be offered and sold by the Underwriters and members of the Selling Dealer Group in the United States only:
- (a) through their respective United States affiliates, each of which will be on the dates of such offers and sales duly registered as a broker-dealer pursuant to Section 15(b) of the U.S. Exchange Act and under the securities laws of each state in which such offers and sales were made (unless exempted from the respective state's broker-dealer registration requirements) and a member in good standing with the National Association of Securities Dealers, Inc.; and
 - (b) either (i) as principals, pursuant to the provisions of Rule 144A to persons who are or are reasonably believed by them to be Qualified Institutional Buyers in transactions meeting the requirements of Rule 144A
4. The Underwriters agree that they have caused or will promptly cause each member of the Selling Dealer Group to acknowledge in writing its awareness of and agreement to be bound by the provisions of this Schedule A in connection with all offers and sales of the Firm Shares and Over-Allotment Shares.
5. The Corporation hereby represents and warrants to the Underwriters that:
- (a) The Preliminary Prospectus and the Preliminary International Offering Memorandum, at the date thereof, did not contain any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein, in light of the circumstances under which they are made, not misleading. The Disclosure Package, at the Applicable Time, did not contain any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading. At the Execution Time and on the Closing Date, the Disclosure Package, the Prospectus and the Final International Offering Memorandum did not and will not (and any amendment or supplement thereto, at the date thereof and at the Closing Date will not) contain any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading; provided however, that the Company makes no representation or warranty as to the information contained in or omitted from the Disclosure Package, the Prospectus or the Final International Offering Memorandum, or any amendment or supplement thereto, in reliance on and in conformity with information furnished

in writing to the Company by or on behalf of Underwriters specifically for use therein.

- (b) neither Addax, nor any of its affiliates has, directly or indirectly, solicited any offer to buy, sold or offered to sell or otherwise negotiated in respect of, in the United States or to any United States citizen or resident, any security which is or would be integrated with the sale of the Firm Shares or the Over-Allotment Shares in a manner that would require the Firm Shares or the Over-Allotment Shares to be registered under the U.S. Securities Act;
- (c) neither Addax, nor any of its affiliates, nor any person acting on its or their behalf (other than an Underwriter, a member of the Selling Dealer Group, and their respective affiliates, in respect of which no representation is made) has engaged in any form of general solicitation or general advertising (within the meaning of Rule 502(c) of Regulation D) or otherwise made a public offering within the meaning of Section 4(2) of the U.S. Securities Act in connection with any offer or sale of the Firm Shares or Over-Allotment Shares in the United States;
- (d) the Firm Shares and Over-Allotment Shares are eligible for resale pursuant to Rule 144A and will not be, at the Closing Date, of the same class of securities listed on a national securities exchange registered under Section 6 of the U.S. Exchange Act, or quoted in a U.S. automated inter-dealer system in the United States and the Prospectus and the Final International Offering Memorandum, contain all the information that, if requested by a prospective purchaser of the Firm Shares or the Over-Allotment Shares, would be required to be provided to such prospective purchaser pursuant to Rule 144A(d)(4) under the U.S. Securities Act;
- (e) neither Addax, nor any of its affiliates, nor any person acting on its or their behalf (other than an Underwriter, a member of the Selling Dealer Group, and their respective affiliates, in respect of which no representation is made) has engaged in any Directed Selling Efforts with respect to the Firm Shares or Over-Allotment Shares, and Addax, its affiliates and any person acting on its or their behalf (other than an Underwriter, a member of the Selling Dealer Group, and their respective affiliates, in respect of which no representation is made) has complied with the requirements of Rule 903 of Regulation S;
- (f) Assuming the accuracy of the representations and warranties of the Underwriters contained in sections 2 and 3 of this Schedule A and the covenants and agreements set forth in section 8 of this Schedule A, it is not necessary in connection with the offer, sale and transfer of the Firm Shares or the Over-Allotment Shares by Addax to the Underwriters or the offer, resale and transfer of the Firm Shares or the Over-Allotment Shares by the Underwriters to the purchasers in the manner contemplated by the Underwriting Agreement, the Prospectus and U.S. Offering Memorandum, to register the Firm Shares or Over-Allotment Shares under the U.S. Securities Act;

- (g) Addax is a "foreign private issuer" (as such term is defined in the rules and regulations of the U.S. Securities Act) that reasonably believes that there is no Substantial U.S. Market Interest in any equity security of Addax;
- (h) Addax is not and does not own or control an open-end investment company, unit investment trust or face amount certificate company that is registered or required to be registered or a closed-end investment company required to be registered but not registered under Section 8 of the United States Investment Company Act;
- (i) Addax is not required, and upon the issuance and sale of Firm Shares and Over-Allotment Shares as herein contemplated and the application of the net proceeds therefrom as described in the Prospectus will not be required, to register as an "investment company" under the Investment Company Act; and
- (j) Neither Addax nor any of its subsidiaries has taken, directly or indirectly, any action which was designed to or which has constituted or which might reasonably be expected to cause or result in stabilization or manipulation of the price of any security of Addax to facilitate the sale or resale of the Firm Shares or the Over-Allotment Shares.

6. The Corporation covenants and agrees with the Underwriters that:

- (a) if at any time prior to the end of the Distribution Period, any event occurs as a result of which the Disclosure Package, the Final Prospectus or the Final International Offering Memorandum, as then amended or supplemented, would include any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading, or if it should be necessary to amend or supplement any or all of the Disclosure Package, the Prospectus or the Final International Offering Memorandum to comply with applicable law, Addax will promptly notify the Underwriters of the same and will promptly prepare and provide to the Underwriters a proposed amendment or supplement which will correct such statement or omission or effect such compliance and will not effect such amendment or supplement without the consent of the Joint Bookrunners. Neither the consent of the Joint Bookrunners, nor Addax's delivery of any such amendment or supplement, shall constitute a waiver of any of the conditions set forth in Sections 8 and 9 of the Underwriting Agreement;
- (b) neither Addax, nor any of its affiliates will solicit any offer to buy, sell or offer to sell or otherwise negotiate in respect of, in the United States or to any United States citizen or resident, any security which is or would be integrated with the sale of the Firm Shares or the Over-Allotment Shares in a manner that would require the Firm Shares or the Over-Allotment Shares to be registered under the U.S. Securities Act;
- (c) neither Addax, nor any of its affiliates, nor any person acting on its or their behalf (other than an Underwriter, a member of the Selling Dealer Group, and their

respective affiliates, in respect of which no covenant is given) will engage in any form of general solicitation or general advertising (within the meaning of Rule 502(c) of Regulation D) in connection with any offer or sale of the Firm Shares or Over-Allotment Shares in the United States;

- (d) during the period of two years after the Over-Allotment Closing date (or, if the Over-Allotment Option is not exercised, the Closing Date), not to, and not to permit any of its affiliates to, resell (other than outside the United States in accordance with Regulation S) any of the Firm Shares or Over-Allotment Shares which constitute "restricted securities" under Rule 144A that have been reacquired by any of them;
- (e) so long as any of the Firm Shares or Over-Allotment Shares are "restricted securities" within the meaning of Rule 144(a)(3) under the U.S. Securities Act, Addax will, during any period in which it is not subject to and in compliance with Section 13 or 15(d) of the U.S. Exchange Act and it is not exempt from such reporting requirements pursuant to and in compliance with Rule 12g3-2(b) under the U.S. Exchange Act, provide to each holder of such restricted securities and to each prospective purchaser (as designated by such holder) or such restricted securities, upon the request of such holder or prospective purchaser, any information required to be provided by Rule 144A(d)(4) under the U.S. Securities Act (and this covenant is intended to be for the benefit of the holders, and the prospective purchasers designated by such holders, from time to time of such restricted securities);
- (f) neither Addax, nor any of its affiliates, nor any person acting on its or their behalf (other than an Underwriter, a member of the Selling Dealer Group, and their respective affiliates, in respect of which no covenant is given) will engage in any Directed Selling Efforts with respect to the Firm Shares or Over-Allotment Shares, and Addax, its affiliates, and any person acting on its or their behalf (other than an Underwriter, a member of the Selling Dealer Group, and their respective affiliates, in respect of which no covenant is given) will comply with the requirements of Rule 903 of Regulation S;
- (g) for so long as the Firm Shares and Over-Allotment Shares are outstanding, Addax will not become and will not own or control an open-end investment company, unit investment trust or face amount certificate company which is registered or required to be registered or a closed-end investment company required to be registered but not registered under Section 8 of the Investment Company Act; and
- (h) not to (and to cause it subsidiaries not to) take, directly or indirectly, any action which is designed to or which constitutes or which might reasonably be expected to cause or result in stabilization or manipulation of the price of any security of Addax to facilitate the sale or resale of the Firm Shares or the Over-Allotment Shares.

7. AOG hereby represents, warrants, covenants and agrees with the Underwriters that:

- (a) The Preliminary Prospectus and the Preliminary International Offering Memorandum, at the date thereof, did not contain any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein, in light of the circumstances under which they are made, not misleading. The Disclosure Package, at the Applicable Time, did not contain any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading. At the Execution Time and on the Closing Date, the Disclosure Package, the Prospectus and the Final International Offering Memorandum did not and will not (and any amendment or supplement thereto, at the date thereof and at the Closing Date will not) contain any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading; provided however, that the Company makes no representation or warranty as to the information contained in or omitted from the Disclosure Package, the Prospectus or the Final International Offering Memorandum, or any amendment or supplement thereto, in reliance on and in conformity with information furnished in writing to the Company by or on behalf of Underwriters specifically for use therein.
- (b) AOG has not, directly or indirectly, solicited any offer to buy, sold or offered to sell or otherwise negotiated in respect of, or will solicit any offer to buy, sell or offer to sell or otherwise negotiate in respect of, in the United States or to any United States citizen or resident, any security which is or would be integrated with the sale of the Firm Shares or the Over-Allotment Shares in a manner that would require the Firm Shares or the Over-Allotment Shares to be registered under the U.S. Securities Act;
- (c) AOG has not engaged nor will engage in any form of general solicitation or general advertising (within the meaning of Rule 502(c) of Regulation D) or otherwise made or make a public offering within the meaning of Section 4(2) of the U.S. Securities Act in connection with any offer or sale of the Firm Shares or Over-Allotment Shares in the United States;
- (d) AOG has not engaged nor will engage in any Directed Selling Efforts with respect to the Firm Shares or Over-Allotment Shares, and AOG has complied and will comply with the requirements of Rule 903 of Regulation S;
- (e) AOG has not taken nor will take, directly or indirectly, any action which was designed or is designed to or which has constituted or constitutes or which might reasonably be expected to cause or result in stabilization or manipulation of the price of any security of Addax to facilitate the sale or resale of the Firm Shares or the Over-Allotment Shares;
8. The Corporation and the Underwriters agree that any Firm Shares or Over-allotment Shares issued to purchasers in the United States pursuant to this Schedule A will be represented by a single global certificate (the "U.S. Global Certificate"), which will be

initially registered in the name of The Canadian Depository for Securities Limited ("CDS"), and on the records of CDS, under a book entry account for RBC Dominion Securities Inc. and Merrill Lynch Canada Inc. ("the Joint Bookrunners"), acting on behalf of each purchaser of the Firm Shares or Over-Allotment Shares in the United States.

9. Each of the Joint Bookrunners covenants and agrees with Addax that:
- (a) it will not offer, sell or otherwise transfer any of the Firm Shares or Over-Allotment Shares represented by the U.S. Global Certificate except in compliance with the restrictions on transfer set forth in the U.S. Placement Memorandum; and
 - (b) it will not record on its records any transfer by any holder of Firm Shares or Over-Allotment Shares represented by the U.S. Global Certificate unless it reasonably believes that the transfer is made in compliance with the restrictions on transfer set forth in the U.S. Placement Memorandum.

Dear Sirs/Mesdames:

**Re: Addax Petroleum Corporation – Initial Public Offering of 21,000,000
Common Shares at a Price of \$ per Common Share**

We have acted as counsel to Addax Petroleum Corporation (the "Corporation") in connection with the issue and sale today by the Corporation of 21,000,000 common shares of the Corporation (the "Initial Shares") and up to 2,100,000 common shares of the Corporation (the "Additional Shares" and together with the Initial Shares, the "Shares") issuable upon exercise of the Over-Allotment Option as defined in the supplemented PREP prospectus of the Corporation dated February 7, 2006 (the "Supplemented Prospectus"), all pursuant to the terms of an agreement (the "Underwriting Agreement") among the Corporation, Addax Petroleum N.V. ("APNV") and The Addax and Oryx Group Ltd. ("AOG") and RBC Dominion Securities

Inc., Merrill Lynch Canada Inc., Scotia Capital Inc., CIBC World Markets Inc., TD Securities Inc., National Bank Financial Inc., Canaccord Capital Corporation, FirstEnergy Capital Corp. and Peters & Co. Limited (collectively, the "Underwriters") dated as of February 8, 2006 (the "Offering").

All capitalized terms not defined herein shall have the meaning ascribed thereto in the Underwriting Agreement.

We have examined:

- (a) an executed copy of the Underwriting Agreement;
- (b) the preliminary base PREP prospectus (the "**Preliminary Prospectus**") of the Corporation dated December 6, 2005 filed under National Policy 43-201 ("**NP 43-201**") and Multilateral Instrument 11-101 ("**MI 11-101**");
- (c) the preliminary Mutual Reliance Review System ("**MRRS**") decision document dated December 7, 2005 issued by the Alberta Securities Commission (the "**ASC**"), as principal regulator, evidencing that preliminary receipts of the securities regulatory authorities (the "**Securities Commissions**") of each of the provinces of Canada (the "**Qualifying Provinces**") have been issued for the Preliminary Prospectus;
- (d) the amended and restated preliminary base PREP prospectus (the "**Amended and Restated Prospectus**") of the Corporation dated December 15, 2005 filed under NP 43-201 and MI 11-101;
- (e) the MRRS decision document dated December 16, 2005 issued by the ASC, as principal regulator, evidencing that receipts of the Securities Commissions of each of the Qualifying Provinces have been issued for the Amended and Restated Prospectus;
- (f) amendment no. 1 ("**Amendment No. 1**") dated January 5, 2006 to the Amended and Restated Prospectus of the Corporation filed under NP 43-201 and MI 11-101;
- (g) the MRRS decision document dated January 5, 2006 issued by the ASC, as principal regulator, evidencing that receipts of the Securities Commissions of each of the Qualifying Provinces have been issued for Amendment No. 1;
- (h) the second amended and restated preliminary base PREP prospectus (the "**Second Amended and Restated Prospectus**") of the Corporation dated January 16, 2006 filed under NP 43-201 and MI 11-101;
- (i) the MRRS decision document dated January 16, 2006 issued by the ASC, as principal regulator, evidencing that receipts of the Securities Commissions of each of the Qualifying Provinces have been issued for the Second Amended and Restated Prospectus;

- (j) the final base PREP prospectus (the "**Final Prospectus**") of the Corporation dated February 7, 2006 filed under NP 43-201 and MI 11-101;
- (k) the MRRS decision document dated February [8], 2006 issued by the ASC, as principal regulator, evidencing that receipts of the Securities Commissions of each of the Qualifying Provinces have been issued for the Final Prospectus;
- (l) the Supplemented Prospectus filed under NP 43-201 and MI 11-101;
- (m) opinions (the "**Local Opinions**"), dated as of the date hereof, of:
 - (i) MacPherson Leslie & Tyerman LLP of Regina, Saskatchewan insofar as such opinions relate to the laws of Saskatchewan;
 - (ii) Aikins, MacAulay & Thorvaldson LLP of Winnipeg, Manitoba insofar as such opinions relate to the laws of Manitoba; and
 - (iii) Stewart McKelvey Stirling Scales of Halifax, Nova Scotia insofar as such opinions relate to the laws of Nova Scotia, New Brunswick, Prince Edward Island and Newfoundland and Labrador;
- (n) certificate of [Note to Draft: Confirm];
- (o) a letter from the Toronto Stock Exchange (the "**TSX**") dated February 6, 2006 (the "**TSX Letter**"), relating to the conditional listing of the common shares of the Corporation on the TSX;
- (p) a letter dated the date hereof from Computershare Investor Services Inc. (the "**Registrar and Transfer Agent**") relating to the issued and outstanding common shares of the Corporation;
- (q) a certificate of compliance dated February [redacted], 2006 issued pursuant to the *Canada Business Corporations Act* (the "**APC Certificate of Compliance**") and a certificate of Extra-Provincial Registration dated [redacted], 2006 issued pursuant to the *Business Corporations Act* (Alberta) (the "**APC Extra-Provincial Certificate**"), each in respect of the Corporation (the APC Certificate of Compliance and the APC Provincial Certificate are hereinafter collectively referred to as the "**APC Certificates**"); and
- (r) the share transfer agreement (the "**Share Transfer Agreement**") among the Corporation, APNV and AOG dated February [7], 2006 and the non-competition agreement between the Corporation and AOG dated February [7] (the "**Non-Competition Agreement**") and the other Relevant Agreements.

We have examined originals, photostatic, certified or facsimile copies of such corporate records, contracts and instruments of the Corporation or other corporations, of such commissions, boards and governmental bodies and authorities, of such certificates of officers or representatives of the Corporation or other corporations and of such other records, contracts and instruments as we

deem necessary and we have made such investigations and searches and considered such questions of law as we believe necessary and relevant to enable us to give the opinions set forth herein.

We are qualified to practice law in the Provinces of Alberta, British Columbia, Ontario and Quebec. Our opinions herein are restricted to the laws of the Province of Alberta and the federal laws of Canada applicable therein except for paragraph 12 which is restricted to the laws of the Qualifying Provinces and the federal laws of Canada applicable therein. In paragraph 12 relating to matters governed by the laws of jurisdictions other than the Provinces of Alberta, British Columbia, Ontario and Quebec, we have relied solely upon the Local Opinions, copies of which have been delivered to you today. The assumptions, conditions, qualifications and limitations contained in each of the Local Opinions are hereby incorporated herein and form part of this opinion. Except to the extent that this opinion is rendered in reliance on such Local Opinions of counsel in other jurisdictions, we express no opinion as to any laws, or matters governed by any laws, other than the laws of the Provinces of Alberta, British Columbia, Ontario and Quebec or the federal laws of Canada applicable therein as of the date hereof and we assume no obligation to update these opinions to take into account any changes in such laws or facts after the date hereof.

For the purposes of our opinion:

- (a) in paragraph 1, as to the status of the Corporation, we have relied solely and without independent investigation upon the APC Certificates;
- (b) in paragraph 2, as to the number of common shares of the Corporation issued and outstanding, we have relied solely and without independent investigation upon a letter dated the date hereof from the Registrar and Transfer Agent indicating the number of common shares of the Corporation that are issued and outstanding; and
- (c) in paragraph 11, we have relied solely and without independent investigation upon the TSX Letter.

As to the various questions of fact relevant to this opinion, information with respect to which is in the possession of the Corporation or other corporations, we have also relied upon representations in certificates of or by an officer or officers of the Corporation or such other corporations, as the case may be, copies of which have been provided to you today.

We have also assumed:

- (a) the genuineness of all signatures, the legal capacity at all relevant times of all natural persons signing any document, the authenticity and completeness of all documents submitted to us as originals, the conformity to authentic originals of all documents submitted to us as certified, notarized, or true copies, or as reproductions (including commercial reproductions, documents received by facsimile machine or obtained from the System for Electronic Document Analysis and Retrieval of the Securities Commissions);

- (b) all facts set forth in official public records and certificates and other documents supplied by public officials or otherwise conveyed to us are complete and accurate;
- (c) for the purpose of the opinion expressed in paragraph 5, the Underwriting Agreement has been duly executed and delivered by an officer of each of the Underwriters, duly authorized on their behalf, and the Underwriting Agreement is valid and legally binding upon, and enforceable against, the Underwriters;
- (d) APNV and AOG are corporations existing in Netherland-Antilles and the British Virgin Islands, respectively, and have taken all necessary corporate action to authorize, execute and deliver the Underwriting Agreement;
- (e) for the purposes of the opinion expressed in paragraph 16, the Relevant Documents have been duly authorized, executed and delivered by each of the parties thereto, other than the Corporation, and the Relevant Agreements constitute a legal, valid and binding obligation upon, and enforceable against, each of the parties thereto, other than the Corporation;
- (f) the Corporation is not a "related issuer" or a "connected issuer", each as defined under National Instrument 33-105, of any registrant involved in a trade of the Shares, except as disclosed in the Supplemented Prospectus;
- (g) each Underwriter, in discharging its duties pursuant to the Underwriting Agreement, is duly registered under applicable securities laws and each member of the selling group, if any, is duly registered under applicable securities laws, and each has complied with the relevant provisions of applicable securities laws;
- (h) (i) the Supplemented Prospectus provides full, true and plain disclosure of all material facts relating to the Shares for the purposes of securities laws of the Qualifying Provinces, (ii) no material adverse change within the meaning of securities laws of the Qualifying Provinces occurred between the date of the Preliminary Prospectus and the date of the Supplemented Prospectus, and (iii) no material change within the meaning of securities laws of the Qualifying Provinces has occurred since the date of the Supplemented Prospectus; and
- (i) at all relevant times no order, ruling or decision has been, or will be, issued or granted by a court or other regulatory or administrative authority that has the effect of prohibiting or restricting any distribution or trade of the common shares of the Corporation.

Based upon the foregoing, as of the date hereof, we are of the opinion that:

1. The Corporation is a corporation existing under the *Canada Business Corporations Act* and extra-provincially registered under the *Business Corporation Act* (Alberta) and has all requisite corporate power and authority to carry on its business as now conducted and to own, lease and operate its property and assets and to execute, deliver and perform its obligations under the Underwriting Agreement and the Relevant Agreements;

2. The authorized capital of the Corporation consists of an unlimited number of common shares, of which [140,100,100] common shares of the Corporation are issued and outstanding;
3. The Corporation has all necessary corporate power, authority and capacity: (i) to execute and deliver the Underwriting Agreement and the Relevant Agreements and perform its obligations thereunder; (ii) to create, issue and sell the Initial Shares; (iii) to issue the Over-Allotment Option; and (vi) to issue the Additional Shares upon the exercise of the Over-Allotment Option;
4. The Preliminary Prospectus, the Amended and Restated Prospectus, Amendment No. 1, the Second Amended and Restated Prospectus, the Final Prospectus and the Supplemented Prospectus have been duly authorized and approved for filing with the Securities Commissions in each of the Qualifying Provinces by all necessary corporate action on the part of the Corporation and have been duly executed by or on behalf of the Corporation;
5. All necessary corporate action has been taken by the Corporation to authorize the execution and delivery of the Underwriting Agreement, and the performance of its obligations thereunder and the Underwriting Agreement has been executed and delivered by the Corporation;
6. The Underwriting Agreement constitutes a legal, valid and binding obligation of each of the Corporation, [AOG and APNV,] enforceable against each of them in accordance with its terms, subject to bankruptcy, insolvency and other laws affecting the rights of creditors generally and the qualification that equitable remedies may be granted in the discretion of a court of competent jurisdiction and that enforcement of rights to indemnity, contribution and waiver of contribution set out in the Underwriting Agreement may be limited by applicable law and that enforceability is subject to the provisions of the *Limitations Act* (Alberta);
7. The execution and delivery of the Underwriting Agreement, the fulfilment of the terms thereof by each of the Corporation and the issuance, sale and delivery of the Initial Shares issued, delivered and sold by the Corporation in connection with the Offering, and the issuance of the Additional Shares to be issued, delivered and sold by the Corporation upon exercise of the Over-Allotment Option, do not:
 - (a) violate or conflict with any provision of the articles or bylaws of the Corporation, or any Canadian federal or Alberta provincial statute, rule or regulation or, to our knowledge, any judgment, decree or order of any court or any public, governmental or regulatory agency or body having jurisdiction in the Province of Alberta over the Corporation or the securities of the Corporation; or
 - (b) [to our knowledge, conflict with or result in a breach of any of the terms or provisions of, or constitute a default (or an event which with notice or lapse of time, or both, would constitute a default) or require consent under, any agreement, indenture, document or instrument to which the Corporation, [AOG or APNV,] is

a party or by which its properties or assets may be bound which might reasonably be expected to materially adversely affect the business, operations, capital or condition of the Corporation;]

8. The Initial Shares have been duly authorized and validly issued as fully paid and non-assessable common shares in the capital of the Corporation;
9. The Additional Shares issuable upon the exercise of the Over-Allotment Option have been validly reserved for issuance by the Corporation and, upon the payment of the purchase price for the Additional Shares and the issuance thereof, will be validly issued as fully paid and non-assessable common shares in the capital of the Corporation;
10. The authorized capital of the Corporation and the rights, privileges and conditions attaching to the Shares conform in all material respects to the description under the heading "Description of Share Capital" in the Supplemented Prospectus;
11. The form and terms of the definitive certificate representing the Shares have been approved by the directors of the Corporation and comply in all material respects with the *Canada Business Corporations Act* and the rules and by-laws of the TSX;
12. The Shares (including the Additional Shares when issued) have been approved for listing on the TSX, subject to the filing of the required documents and payment of the required fees as set forth in the TSX Letter within the time stipulated by the TSX;
13. The Corporation is a "reporting issuer" in each of the Qualifying Provinces where such a concept exists and is not included on a list of defaulting issuers maintained by such Securities Commissions;
14. We are not aware of any order, ruling or determination having the effect of causing or suspending the trading of any securities of the Corporation having been issued or made by a Securities Commission or the TSX;
15. All necessary documents have been filed, all requisite proceedings have been taken and all other legal requirements have been fulfilled under the securities laws of each of the Qualifying Provinces to qualify the distribution or the distribution to the public of the Initial Shares, the Over-Allotment Option and the Additional Shares issuable upon exercise of the Over-Allotment Option, in each of the Qualifying Provinces through persons who are duly and properly registered in the appropriate category under applicable legislation and who have complied with the relevant provisions of such applicable legislation;
16. Computershare Investor Services Inc. has been duly appointed the transfer agent and registrar for the Shares at its principal office in Calgary [and Toronto];
17. All necessary corporate action has been taken by the Corporation to authorize the execution and delivery of the Relevant Agreements, and the performance of its obligations thereunder, and the Relevant Agreements have been executed and delivered by the Corporation;

18. [The Non-Competition Agreement and the Share Transfer Agreement constitute legal, valid and binding obligations of the Corporation enforceable against it in accordance with their terms, subject to bankruptcy, insolvency and other laws affecting the rights of creditors generally and the qualification that equitable remedies may be granted in the discretion of a court of competent jurisdiction and that enforceability is subject to the provisions of the *Limitations Act* (Alberta) [additional qualifications re Non-Competition Agreement to be included]];
19. [The execution and delivery of the Relevant Agreements and the fulfilment of the terms thereof by the Corporation do not:
- (a) violate or conflict with any provision of the articles or bylaws of the Corporation or any Canadian federal or Alberta provincial statute, rule or regulation or, to our knowledge, any judgment, decree or order of any court or any public, governmental or regulatory agency or body having jurisdiction in the Province of Alberta over the Corporation or the securities of the Corporation; or
 - (b) to our knowledge, conflict with or result in a breach of any of the terms or provisions of, or constitute a default (or an event which with notice or lapse of time, or both, would constitute a default) or require consent under, any agreement, indenture, document or instrument to which the Corporation is a party or by which its properties or assets may be bound which might reasonably be expected to materially adversely affect the business, operations, capital or condition of the Corporation;]
20. The Shares, if as and when listed on the TSX will be qualified investments for a trust governed by a registered retirement savings plan, a registered retirement income fund, a registered education savings plan or a deferred profit sharing plan under the *Income Tax Act* (Canada) and the regulations thereunder.

This opinion is being furnished for the sole benefit of the addressees hereof, and only in connection with the transaction described above, and may not be used or relied upon by any other person or for any other purpose, nor quoted from or referred to in any other document without our prior written consent provided that Fraser Milner Casgrain LLP may rely on our opinion for the purposes of rendering its opinion to the Underwriters.

Yours truly,

v12 Underwriting Agreement - Addax

FORM: 11 | NOTICE OF PRIVATE PLACEMENT
(EFFECTIVE JANUARY 1, 2005.)

WHEN TO FILE: Every issuer shall immediately file a Notice of Private Placement with TSX once the issuer has determined the terms of any private placement for securities which are listed on TSX or are convertible into, or exchangeable for, securities listed on TSX.

HOW: Via TSX SecureFile or via email to listedissuers@tsx.com or via fax for issuers reporting to:
Toronto TSX Office: 416-947-4547
Montreal TSX Office: 514-788-2421
Calgary Office: 403-237-0450
Vancouver Office: 604-844-7502

QUESTIONS: Email to listedissuers@tsx.com or contact the Manager who is responsible for the Issuer or call, for issuers reporting to:
Toronto TSX Office: 416-947-4523
Montreal TSX Office: 514-788-2451
Calgary Office: 403-237-2800
Vancouver Office: 604-643-6599

NOTE: **Expedited Filing:**
For issuers submitting an Expedited Filing in accordance with section 607(c) of the TSX Company Manual, the notice will be accepted by TSX generally within three (3) business days.

Regular Filing:
For issuers submitting a Regular Filing in accordance with section 607(d) of the TSX Company Manual, TSX will advise the issuer in writing generally within seven (7) business days of receipt of the notice, of TSX's decision to accept or not accept the notice, indicating any conditions to acceptance or reasons for non-acceptance. Further information or documentation may be requested before TSX decides to accept or not accept notice of a transaction. In reviewing the transaction described in the notice, TSX will consider the applicable provisions of the TSX Company Manual.

Company Name: ADDAX PETROLEUM CORPORATION

Stock Symbol: AXC

EXPEDITED FILING (as provided for in Section 607(c)):

REGULAR FILING:

1. Date of notice: June 30, 2006

2. Number of currently issued and outstanding securities of each class of securities of the issuer, excluding non-voting preferred securities:

140,100,100 Common Shares

3. Description of securities to be placed:

a) class: Common Shares

b) number: 12,425 Common Shares = \$324,944.39 (U.S.) [converted into Canadian \$ (using the noon-buying rate quoted by the Bank of Canada on June 30, 2006 of 1.1150) = \$362,313.00] + \$29.16 (the "VWAP" price).

c) subscription price: \$29.16 (one-day VWAP price) per Common Share for a total of \$362,313.00 CDN. Per Kerry Krochak's email dated June 15, 2006, we used a one-day VWAP before issuance to price.

d) market price and if applicable, date from binding agreement used to calculate market price (as defined in Section 601) [Please attach one copy of binding agreement]:

See 3(c) above.

e) discount percentage to market price, if any: See 3(c) above.

f) voting rights: Yes. Holders of Common Shares are entitled to exercise one vote per share at every meeting of shareholders.

g) if the securities are not of a listed class, summarize the provisions:

N/A

h) if convertible into another class of securities, the maximum number of securities issuable upon conversion:

N/A

i) description of any attached warrants (or options), including: N/A

(i) number:

(ii) exercise price:

(ii) term to expiry:

(iv) other significant terms:

j) if the issuer is providing any financial assistance to any placee to facilitate the purchase, by way of loan, guaranty or otherwise, give particulars:

N/A

k) tax credits attached to the securities, if any:

N/A

4. Are there any issuances to insiders under the private placement? Yes

(For this purpose, "insider" has the same meaning as found in the *Securities Act* (Ontario) and also includes associates and affiliates of the insider; and "issuances to insiders" includes direct and indirect issuances to insiders, their associates and affiliated companies.)

5. If the answer to question 4 is yes:

- a) total percentage of placement being issued to insiders: 100%
- b) for each insider placee, state: SEE ATTACHED SCHEDULE "A" FOR DETAILS
 - (i) the placee's name: _____
 - (ii) current holdings of voting securities of the issuer (direct or indirect) in terms of number and percentage: _____
 - (iii) the number of securities to be purchased by the insider under the private placement in terms of number and percentage: _____
 - (iv) holdings of voting securities of the issuer (direct or indirect) after the placement in terms of number and percentage: _____

6. Has the issuer completed any other private placements within the past six months where securities were issued or made issuable to insiders (include private placements that have been conditionally approved and/or currently contemplated)?

As described in the Corporation's prospectus dated February 8, 2006, the Corporation acquired all of the issued and outstanding shares of Addax Petroleum N.V. from Addax Mining Holdings BV in exchange for 117,000,000 Common Shares of the Corporation and CDN \$55,575,000.

7. If the answer to 6 is yes, state:

- a) (i) dates on which each private placement closed: February 16, 2006
- (ii) number and class of listed securities issued or issuable under each placement: 117,000,000
Common Shares to Addax Mining Holdings BV
- (iii) number and class of securities issued or issuable to insiders under each private placement:
See 7(a)(ii).

b) whether securityholders approved any of the private placements (including a blanket advanced approval) and, if so, identify which private placements were so approved:

No; securityholder approval was not required.

8. Will the issuer obtain securityholder approval for this private placement? If the issuer is relying on an exemption from securityholder approval, please provide details.

Further to our recent discussions and, in particular, the email from Kerry Krochak dated June 15, 2006, we understand that security holder approval is not required for this issuance of Common Shares to Directors. However, the Corporation acknowledges and agrees that it will seek shareholder approval with respect to any subsequent issuances from treasury to the Directors (that goes beyond the allowance provided for in Ms. Krochak's email of June 15, 2006).

9. What will be the use of proceeds?

Common Shares are being issued from treasury to the Directors in lieu of cash compensation otherwise payable by the Corporation to the Directors. Accordingly, these share issuances will reduce the Corporation's obligation to pay cash to its Directors.

10. Could the placement potentially result in a material affect in control?

No.

11. Any significant information regarding the proposed private placement not disclosed above:

No.

12. Is this private placement related to any other private placement completed in the last six months?

No.

13. Was the subscription price (or formula within a binding agreement) determined at a time when material undisclosed information existed?

No.

SCHEDULE "A"

Placee's Name	Current Holdings of voting securities of the issuer (direct or indirect) in terms of number and percentage	The number of securities to be purchased by the insider under the private placement in terms of number and percentage	Holdings of voting securities of the issuer (direct or indirect) after the placement in terms of number and percentage
Peter Dey	27,100 / 0.019%	3,632 / 29.231%	30,732 / 0.022%
Brian Anderson	11,900 / 0.008%	764 / 6.149%	12,664 / 0.009%
James Davie	43,000 / 0.031%	1,147 / 9.231%	44,147 / 0.032%

RECEIVED

EXPEDITED FILING (as provided for in Section 607(c)):

2007 JAN 18 A 10:38

REGULAR FILING:

OFFICE OF INTERNATIONAL CORPORATE FINANCE

FORM: 11 | Company Name: ADDAX PETROLEUM CORPORATION Stock Symbol: AXC

1. Date of notice: December 29, 2006.
2. Number of currently issued and outstanding securities of each class of securities of the issuer, excluding non-voting preferred securities:
155,065,556 Common Shares.
3. Description of securities to be placed:
 - a) class: Common Shares.
 - b) number: 11,974 Common Shares = \$334,912.78 (U.S.). (\$27.97 (U.S.) per Common Share / CDN \$32.60 per Common Share. [With respect to the foregoing, we used the December 29, 2006 Bank of Canada noon exchange rate of 1.1653 [0.8581]]).
 - c) subscription price: CDN \$32.60 (December 29, 2006 one-day VWAP) per Common Share for a total of CDN \$390,352.40.
 - d) market price and if applicable, date from binding agreement used to calculate market price (as defined in Part I) [Please attach one copy of binding agreement]:
We used the December 29, 2006 one-day VWAP before issuance to price the securities (which we calculated as: CDN \$32.60).
 - e) discount percentage to market price, if any: See 3(c) and 3(d) above.
 - f) voting rights: Holders of Common Shares are entitled to exercise one vote per share at every meeting of shareholders.
 - g) if the securities are not of a listed class, summarize the provisions:
N/A
 - h) if convertible into another class of securities, the maximum number of securities issuable upon conversion:
N/A
 - i) description of any attached warrants (or options), including:
 - (i) number: N/A
 - (ii) exercise price: N/A
 - (ii) term to expiry: N/A
 - (iv) other significant terms: N/A
 - j) if the issuer is providing any financial assistance to any placee to facilitate the purchase, by way of loan, guaranty or otherwise, give particulars:
N/A

TORONTO STOCK EXCHANGE COMPANY MANUAL

k) tax credits attached to the securities, if any:

N/A

4. Are there any issuances to insiders under the private placement? Yes.

(For this purpose, "insider" has the same meaning as found in the *Securities Act* (Ontario) and also includes associates and affiliates of the insider; and "issuances to insiders" includes direct and indirect issuances to insiders, their associates and affiliated companies.)

5. If the answer to question 4 is yes:

a) total percentage of placement being issued to insiders: 100%

b) for each insider placee, state: SEE ATTACHED SCHEDULE "A" FOR DETAILS

(i) the placee's name:

(ii) current holdings of voting securities of the issuer (direct or indirect) in terms of number and percentage:

(iii) the number of securities to be purchased by the insider under the private placement in terms of number and percentage :

(iv) holdings of voting securities of the issuer (direct or indirect) after the placement in terms of number and percentage:

6. Has the issuer completed any other private placements within the past six months where securities were issued or made issuable to insiders (include private placements that have been conditionally approved and/or currently contemplated)?

Yes. 12,425 Common Shares of Addax Petroleum Corporation (the "Corporation") were issued to certain directors of the Corporation on August 1, 2006 (as more particularly described in the Form 11 of the Corporation dated June 30, 2006, a copy of which was provided to Ms. Anne Child on July 5, 2006 via email).

TORONTO STOCK EXCHANGE COMPANY MANUAL

7. If the answer to 6 is yes, state:

a) (i) dates on which each private placement closed: August 1, 2006

(ii) number and class of listed securities issued or issuable under each placement:

12,425 Common Shares

(iii) number and class of securities issued or issuable to insiders under each private placement:

See 7(a)(ii).

b) whether securityholders approved any of the private placements (including a blanket advanced approval) and, if so, identify which private placements were so approved:

No, securityholder approval was not required.

8. Will the issuer obtain securityholder approval for this private placement? If the issuer is relying on an exemption from securityholder approval, please provide details.

We understand that securityholder approval is not required for this issuance of Common Shares to Directors.

9. What will be the use of proceeds?

Common Shares are being issued from treasury to the Directors in lieu of cash compensation otherwise payable by the Corporation to the Directors. Accordingly, these share issuances will reduce the Corporation's obligation to pay cash to its Directors.

10. Could the placement potentially result in a material affect in control?

No.

11. Any significant information regarding the proposed private placement not disclosed above:

No.

TORONTO STOCK EXCHANGE COMPANY MANUAL

12. Is this private placement related to any other private placement completed in the last six months?

Yes. See 6 and 7 above.

13. Was the subscription price (or formula within a binding agreement) determined at a time when material undisclosed information existed?

No.

SCHEDULE "A"

Placee's Name	Current Holdings of voting securities of the issuer (direct or indirect) in terms of number and percentage	The number of securities to be purchased by the insider under the private placement in terms of number and percentage	Holdings of voting securities of the issuer (direct or indirect) after the placement in terms of number and percentage

**ADDAX PETROLEUM CORPORATION
LONG TERM EQUITY INCENTIVE PLAN 2006**

1. Definitions

- “Award” means an award of Shares made to a Participant in respect of performance for a Financial Year
- “Award Date” means the date on which an Award is made
- “Capital Reorganisation” means any variation, adjustment or alteration of the share capital or reserves of the Company (including, without limitation, by way of capitalisation issue from treasury, rights offering, sub-division, consolidation or reduction)
- “the Committee” means the Corporate Governance, Nominating and Compensation Committee established by the board of directors of the Company
- “Change of Control” shall be deemed to have occurred if any person other than The Addax & Oryx Group Ltd. or any related party (or a group of persons acting in concert):
- (A) obtains control of the Company as a result of making a general offer to acquire shares in the Corporation; or
 - (B) having obtained control of the Company makes such an offer and such offer becomes unconditional in all respects; or
 - (C) obtains control of the Company as a result of any other recognised arrangements; or
 - (D) the Company passes a resolution for a voluntary winding up of the Company or an order is made for the compulsory winding up of the Company
- and Control means in relation to the Company, the ability of a person, or persons acting in concert, to cast more than 50 per cent of the votes which the holders of Shares may cast at a general meeting of the members of the Company
- “Company” means Addax Petroleum Corporation

“Corporate Goals”	means those measures of Group or Group company performance as are determined by the Committee in accordance with rule 3
“Eligible Executive”	means directors, officers, employees of, and other service providers to the Corporation who have been invited by the Committee to participate in this Plan
“Financial Year”	means the accounting reference period of the Company
“Group”	means the Company and all companies which the Company directly or indirectly Controls and the expression Group company shall be construed accordingly
“Insider”	shall have the meaning ascribed to that term in the Alberta Securities’ Act
“Participant”	means an Eligible Executive who has accepted an invitation to participate in this Plan
“Personal Goals”	means in relation to each Participant, those measures of the individual’s performance as are determined by the Committee in accordance with rule 3
“this Plan”	means the plan known as The Addax Petroleum Corporation Long Term Equity Incentive Plan 2006, as amended from time to time
“Share”	means a common share in the share capital of the Company

2. Participation

- 2.1 This Plan will operate for the Financial Year which started on 1 January 2006 and will operate in respect of subsequent Financial Years at the discretion of the Committee.
- 2.2 Subject to rule 2.1, the Chief Executive Officer shall nominate Eligible Executives and the Committee, in its sole discretion, may invite such nominated Eligible Executives to participate in this Plan for the relevant Financial Year. The invitation shall be in such form as the Committee shall from time to time determine and shall specify in respect of each Eligible Executive:
 - 2.2.1 the performance conditions determined in accordance with rule 3, to which the making of an Award is subject,

- 2.2.2 the standards of performance to be achieved in relation to each performance condition and
 - 2.2.3 the date by which the invitation must be accepted.
- 2.3 No payment shall be required from an Eligible Executive to participate in this Plan.
- 2.4 Unless expressly so provided in his contract of employment, an Eligible Executive has no right to participate in this Plan pursuant to any such contract and this Plan shall not form part of nor affect any contract of employment between the Eligible Executive and any Group company.
- 2.5 By accepting an invitation to participate in this Plan, each Participant accepts and agrees that:
 - 2.5.1 the Participant has no rights to receive any Shares in respect of an Award until the relevant proportion of such Award vests and the Shares are transferred unconditionally to the Participant under this Plan,
 - 2.5.2 the Company, as permitted by applicable laws and regulations, may make such arrangements as it thinks fit for the collection, payment and reporting of any taxes, levies, withholdings and social security liabilities arising in respect of an Award made to the Participant, including but not limited to, arrangements providing for the sale of vested Shares, prior to their transfer to the Participant and retention of the net sales proceeds by the Company to enable the Company or any Group company to account to the relevant authorities for the Participant's tax and social security liabilities and
 - 2.5.3 the Company may hold and process personal data provided by the Participant for all purposes relating to the operation of this Plan. These include, but are not limited to:
 - 2.5.3.1 administering and maintaining Participant records,
 - 2.5.3.2 providing information to registrars, brokers, or other third party administrators of this Plan and the processing of such information by those parties and
 - 2.5.3.3 providing information to future purchasers of the Company or any Group company in which the Participant works.
- 2.6 If a Participant ceases to be employed by a Group company, he shall not be entitled to compensation for the loss of any right or benefit or prospective right or benefit under this Plan whether by way of damages for breach of contract or

otherwise. The benefit to a Participant of his participation in this Plan shall not form part of his compensation for pension purposes.

3. Performance Conditions

- 3.1 As soon as practicable after the date on which this Plan is adopted by the Company, in respect of any Awards to be made in 2006 and 2007 and as soon as practicable prior to (and, in any event, not later than 90 days after) the start of the relevant Financial Year, in respect of any Awards to be made in 2008 and subsequently, the Chief Executive Officer will specify and the Committee may, in its absolute discretion, endorse the overall performance conditions for that Financial Year, which conditions shall (unless the Committee determines otherwise) be classified into:
 - 3.1.1 Corporate Goals being a combination of (i) the Company's performance relative to the Company's Peer Group, and (ii) the Company's performance related directly to the Company's Key Performance Indicators and
 - 3.1.2 Personal Goals expressed as Individual Performance Factors.
- 3.2 For all Participants, the Corporate Goals for a Financial Year shall be determined by the Chief Executive Officer and endorsed by the Committee.
- 3.3 In respect of a Participant who is an executive officer of the Company, the Chief Executive Officer will determine his Personal Goals after consultation with the Committee. The Chief Executive Officer's own Personal Goals will be determined by the Committee and notified to the Chief Executive.
- 3.4 In respect of a Participant who is not an executive officer of the Company, the Chief Executive Officer will determine his Personal Goals.
- 3.5 As far as is practicable, Personal Goals will be capable of objective assessment but in the event that subjective assessment is required, the Chief Executive Officer and the Committee shall act reasonably.
- 3.6 Unless the Committee determines otherwise, Corporate Goals and Personal Goals shall carry equal weighting for the purposes of calculating the number of Shares (if any) subject to an Award.
- 3.7 The Committee shall have the discretion to change or modify the performance conditions for a Financial Year in the event that exceptional circumstances arise, provided that any changed or modified performance conditions are, in the opinion of the Committee, no less demanding than the performance conditions which they replace.

4. Share Awards

- 4.1 As soon as practicable after the end of the relevant Financial Year, the Chief Executive Officer shall assess performance in relation to each of the performance conditions for that Financial Year and shall notify the Committee of the Chief Executive Officer's assessment as to how the Company has performed against its Corporate Goals. The Committee will then endorse or modify as necessary the assessment. The Committee will also assess how the Chief Executive Officer has performed against his Personal Goals together with the resulting number of Shares which are to be awarded to him in respect of such performance. The Chief Executive Officer shall in consultation with the Committee and on the basis of the Company's performance against its Corporate Goals as endorsed by the Committee, but subject always to the determination of the Committee pursuant to rule 4.2, determine the number of Shares to be awarded to the other corporate officers and the total number of Shares to be awarded to other Participants.
- 4.2 The decision to make the Awards and the total number of Shares subject to the Awards shall be endorsed by the Committee. Ordinarily no Participant shall receive an Award the aggregate value of which exceeds 150 per cent of his base annual salary at the start of the relevant Financial Year. However, in return for exceptional standards of performance, the Committee may, in its absolute discretion, increase the aggregate value of the Awards to the executive officers of the Company.
- 4.3 For the purposes of calculating the number of Shares subject to an Award, the divisor shall be the average mid-market quotations for a Share as listed by the Toronto Stock Exchange for the five dealing days immediately preceding (but not including) the date of the award. Any fractions of a Share arising from the division shall be rounded down to the nearest whole Share.
- 4.4 No Award shall be made in relation to any performance condition if the level of performance achieved in relation to that condition falls below a minimum standard determined by the Committee and included in the invitation to participate in this Plan issued by the Committee in accordance with rule 2.
- 4.5 An Award shall be subject to the following vesting conditions:
 - 4.5.1 up to one third of the aggregate number of Shares subject to the Award vests immediately on the Award Date,
 - 4.5.2 up to two-thirds of the aggregate number of Shares subject to the Award, less the number of Shares vested under rule 4.5.1, vest on the first anniversary of the Award Date and

- 4.5.3 the balance (after taking into account the number of Shares vested under rules 4.5.1 and 4.5.2) of the aggregate number of Shares subject to the Award vests on the second anniversary of the Award Date.
- 4.6 Subject to rule 4.5, the Committee shall determine, in its absolute discretion, the proportion of an Award which shall vest on each of the vesting dates specified in rule 4.5 and shall inform the Participants accordingly in the Award notifications issued pursuant to rule 4.1.
- 4.7 In the event of a Capital Reorganisation, the number, nominal amount and class of securities to be awarded to Participants or subject to the unvested portions of Awards, may be adjusted in such manner as the Committee determines in its absolute discretion, to be appropriate.
- 4.8 Subject to the following provisions of this Plan, a Participant shall have no rights in respect of the Shares subject to the unvested portion of any Award, which may not be transferred, assigned, charged or otherwise pledged as security.
- 4.9 No Award shall be made in respect of a Financial Year starting later than 1 January 2010.

5. Effect of Termination of Employment

- 5.1
- 5.2 5.1 If a Participant's employment with a Group company terminates owing to his death the unvested portion of any Award shall vest immediately, PROVIDED THAT if the Participant's employment terminates owing to his death before an Award is made to him in respect of a Financial Year, the Committee shall determine in its absolute discretion the number of Shares (if any) to be transferred to that Participant's estate having regard to the standards of performance reached in respect of each of the performance conditions referred to in rule 3.1 from the start of the relevant Financial Year to the date of termination of employment or, if earlier, the end of the Financial Year.
- 5.2 If a Participant's employment with a Group company is terminated otherwise than owing to the Participant's death, the Committee shall determine, in its absolute discretion on the recommendation of the Chief Executive Officer, the number of Shares (if any) subject to the unvested portion of any Award which shall vest and be transferred to the Participant, together with the timing of any such transfer PROVIDED THAT if the Participant's employment terminates, , before an Award is made to him in respect of a Financial Year, the Committee shall determine in its absolute discretion on the recommendation of the Chief Executive Officer the number of Shares (if any) to be transferred to that Participant having regard to the standards of performance reached in respect of each of the performance

conditions referred to in rule 3.1 from the start of the relevant Financial Year to the date of termination of employment or, if earlier, the end of the Financial Year.

6. Effect of a Change of Control of the Company

- 6.1 In the event of a Change of Control of the Company before an Award Date, the Committee shall determine, in its absolute discretion, the number of Shares (if any) to be transferred to each Participant having regard to the standards of performance reached in respect of each of the performance conditions referred to in rule 3.1 from the start of the relevant Financial Year to the date of the change in Control.
- 6.2 In the event of a Change of Control of the Company on or after an Award Date any unvested portion of the relevant Award shall vest in full.

Shares

- 7.1 Unless the board of directors of the Company resolves otherwise, Shares transferred to Participants will be issued from treasury.
- 7.2 The maximum number of Shares which may be issued under this Plan shall not exceed 7,500,005 Shares, representing five per cent of the issued ordinary share capital of the Company as at the date this Plan is adopted by the Company in general meeting. The maximum number of Shares which may be issued under this Plan and any other share compensation plans of the Company to Insiders shall not exceed 5,250,003 Shares (representing approximately 70 per cent of the 7,500,005 Shares which may be issued under this Plan in aggregate).
- 7.3 The aggregate number of Shares which may be transferred to any Participant under this Plan shall not exceed 2,311,652 Shares, representing 1.65 per cent of the issued ordinary share capital of the Company as at the date this Plan is approved by the shareholders of the Company at a meeting of shareholders.
- 7.4 Shares which have been transferred to a Participant are his property. The Participant will receive a share certificate (if share certificates are then in issue) or other evidence of title and will be entitled to receive any dividends and to exercise voting rights at general meetings of the Company. A Participant to whom Shares have been transferred may deal in those Shares as he sees fit subject to any applicable laws and regulations, including any rules of the Toronto Stock Exchange or the Company relating to dealings in Shares by executive officers and employees of any Group company.
- 7.5 In the event that new Shares are issued to Participants, the Company will take all actions necessary to ensure that those Shares are admitted to listing on the Toronto Stock Exchange.

8. Administration, Interpretation and Termination of this Plan

- 8.1 The Committee may make such regulations (not being inconsistent with this Plan) for the operation and administration of this Plan and terms of reference as regards its functions in connection with this Plan as it shall in its absolute discretion determine.
- 8.2 In the event of a dispute about any matter arising in connection with the operation of this Plan, the decision of the Committee shall be final and binding.
- 8.3 Any notices given in connection with this Plan shall be in writing to:
 - 8.3.1 a Participant, at his last known address notified to the Company
 - 8.3.2 the Company, at its registered office from time to time
 - 8.3.3 the Committee, at the registered office of the Company from time to time,
and unless delivered by hand or by email shall be delivered by overland mail. Notices delivered by overland mail shall be deemed to be received on the fifth day after posting (Sundays excepted). The day of posting shall be ignored. Notices delivered by hand or by email shall be deemed to have been received on the date of delivery.
- 8.4 Words in the singular shall also include the plural and words describing the masculine gender shall also describe the feminine. References to legislation are references to that legislation as currently enacted and as amended or re-enacted from time to time.
- 8.5 The Committee may resolve to amend and/or terminate this Plan at any time PROVIDED THAT no amendments to the provisions relating to:
 - 8.5.1 the selection of Participants,
 - 8.5.2 levels of participation,
 - 8.5.3 the transfer or assignment of unvested Awards,
 - 8.5.4 the effects of a Capital Reorganisation,
 - 8.5.5 the effects of termination of employment and a change in Control of the Company,
 - 8.5.6 Shares in rule 7 and

8.5.7 the provisions of this rule 8.5

may be made without the prior authority of the holders of Shares in general meeting, save that amendments the purpose of which is to comply with any applicable exchange control regulations or rules of the Toronto Stock Exchange, or to obtain or maintain favourable tax treatment for the Company or Participants may be made without such authority. Any amendment to this Plan shall apply only to Awards made after the date of the amendment.

8.6 Notwithstanding any of the provisions contained in this Plan, the Company's obligation to issue Shares shall be subject to:

8.6.1 compliance with all applicable laws, regulations, rules, orders of governmental or regulatory authorities in Canada and the United States ("Securities Regulators"); and

8.6.2 compliance with the requirements of the Toronto Stock Exchange.

Notwithstanding any provisions contained in this Plan, if any amendment, modification or termination to the provisions hereof are required by any Securities Regulators, a stock exchange or a market as a condition of approval to a distribution to the public of any Shares or to obtain a listing or quotation of any Shares, the Committee is authorized to make such amendments and thereupon the terms of this Plan, shall be deemed to be amended accordingly without requiring the consent or agreement of any Participant or shareholder approval.

8.6 This Plan shall be governed by the laws of the Province of Alberta, Canada.

Mr. Jason B. Mudge
Fasken Martineau DuMoulin LLP
3400 First Canadian Centre
350 - 7th Avenue SW
Calgary, AB T2P 3N9

Dear Mr. Mudge:

Re: **Addax Petroleum Corporation (the "Company")**
Adoption of Long Term Equity Incentive Plan (the "Plan")

We acknowledge receipt of your letter dated June 30, 2006, together with enclosures.

This will confirm that Toronto Stock Exchange ("TSX") has listed and reserved an additional 609,500 common shares of the Company for issuance upon the exercise of options granted under the Plan.

Our records currently indicate that the Plan has a maximum of 7,500,005 common shares that can be issued, the Company has listed and reserved 609,500 common shares pursuant to the terms of the Plan.

We acknowledge receipt of your cheque and wire transfer payment totalling \$20,526.00, indicating full payment to TSX of the additional listing fee, for which we thank you.

As provided in Section 613 (g) of the *TSX Company Manual*, please be reminded that the Company must disclose on an annual basis in its information circular or other annual disclosure documents, the terms of its security-based compensation arrangements and any amendments to such arrangements adopted in the previous fiscal year.

In accordance with Sections 605 and 613 (i) of the *TSX Company Manual*, please continue to advise TSX monthly of options granted, cancelled or exercised pursuant to the terms of the Plan using TSX Reporting Form 1 "*Change in Outstanding and Reserved Securities*" so that our records are updated accordingly. This reporting form, as well as other reporting forms, must be filed through TSX SecureFile.

Finally, please note that our file in connection with the above-captioned matter is now complete and closed.

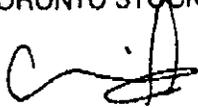

Mr. Jason B. Mudge
Re: Addax Petroleum Corporation

CEO'S MESSAGE

The year 2005 was one of great progress and great change: a year in which Addax Petroleum achieved record financial and operating results while initiating the process to transform itself from a private corporation into a publicly traded company.

In 2005, the company increased its annual average gross oil production to a record level of 65.3 mbbbls/day, an increase of 64 per cent over production levels in 2004. The company's successful development of the Okwori field in OPL 90 (offshore Nigeria) helped propel this increase in production. The company brought the Okwori field on stream in March 2005; a mere nine months after sub-sea field development work began on the project. As CEO, I am very proud that, at the 18th World Petroleum Congress in September 2005, Addax Petroleum received a technical excellence award for our work on Okwori. This award is further evidence of the company's technical expertise, commitment to operational excellence and to the skill and dedication of its employees.

Addax Petroleum also continued with its plans to position itself to fully comply with the Nigerian government's flares down policy which is scheduled to come into effect in 2008. In 2005, the company initiated processes at OPL 90/225, OML 123 and OML 124 to identify and assess potential commercial and sales opportunities that could emerge as a result of the policy.

The company was also very active and successful on the new ventures front in both West Africa and the Middle East in 2005. During the year the company entered into a participation agreement with ERHC Energy Inc. to acquire an interest in Block 4 of the Nigerian-Sao Tome & Principe Joint Development Zone (JDZ). Subsequently, after year end, Addax Petroleum was awarded interests in Blocks 2, 3, and 4 and operatorship of Block 4. All these are highly prospective blocks and I am excited about the potential these new assets hold for the company and its shareholders. Another exciting new venture in 2005 was the farm-in agreement Addax Petroleum signed with Genel Enerji for a 30 per cent interest in a Production Sharing Contract to cover the Taq Taq field in the Kurdistan region of Iraq. While the company's participation has to be formally approved by the relevant authorities, the Taq Taq opportunity could have the potential to be a source of future new growth.

The company's financial results in 2005 clearly demonstrate the positive bottom line impact of Addax Petroleum's technical and operational expertise. Because Addax Petroleum was able to increase existing and add new production the company and its shareholders were able to benefit from the rise in crude prices experienced in 2005. On a year on year basis the company's sales (before royalties) increased by 133 per cent to \$1.2 billion and net income increased by 229 per cent to \$206.1 million.

While strong operating and financial performance and results are critical, I have always believed that for a company to be successful in the long run it must also be a good employer and a good neighbour. You may recall that in my message last year I expressed concern that our safety record in 2004 had been worse than in 2003. I challenged everyone in and associated with the company to put safety first. I am gratified to report that in 2005 our staff, employees and contractors met that challenge and as result we experienced a drop in lost time incidents. Also in 2005 the company maintained an active community relations program in Nigeria and the Middle East. In Nigeria we invested \$1.6 million in infrastructure programs such as water plants that provide tangible and immediate benefits. We also financed the construction of a new school for children in the Taq Taq area.

The company successfully completed an IPO on the Toronto Stock Exchange in February 2006, an initiative launched in the second half of 2005, and realized net proceeds of \$323 million. The company took this step because it believes that public ownership provides the best structure for achieving its strategic objectives to grow its business in Africa and the Middle East.

As a publicly owned and traded company, Addax Petroleum will be subject to new disclosure requirements, rules and regulations. I can assure you that Addax Petroleum will be a transparent and accountable participant in the market. I can also assure that, while the company's status may have changed, there will be no change in the discipline and rigor with which the company's management and staff pursue value and growth in our target markets. We will continue on this course and I would like to express my gratitude to all Addax Petroleum staff for their commitment and performance both now and in the future.

Jean Claude Gandur, President & CEO.

CHAIRMAN'S MESSAGE

As Chairman of the Board, I am pleased to have this opportunity to communicate this message to our shareholders, employees and other stakeholders at this interesting and challenging time in the evolution and growth of Addax Petroleum Corporation (APC). The financial statements

that are included herein relate to the private company APNV which, through the IPO, was acquired by APC.

In 2005 Addax Petroleum launched a process which transformed it from a privately held corporation to a public company trading on the Toronto Stock Exchange.

I have been working with the company for the past two years and have always been impressed with the professionalism of the staff. I am particularly proud to have accompanied Addax Petroleum in this new stage of its development.

I believe that one of the most important responsibilities of the Board of Directors is to support and work with management to ensure that, as a public company, Addax Petroleum develops as an open, transparent and accountable corporation, as

a company whose Board is committed to, and which is known for, looking after the interests of its shareholders.

The Board and management are determined that Addax Petroleum will meet that standard. To that end, the corporation and the Board have implemented a "best practices" model of corporate governance and have adopted policies consistent with that commitment.

The corporation and its shareholders will also benefit from the depth of experience in the oil business and in corporate finance of Board members.

The Board and the corporation have strived to make their shared commitment to effective corporate governance part of the reality of Addax Petroleum as a public company.

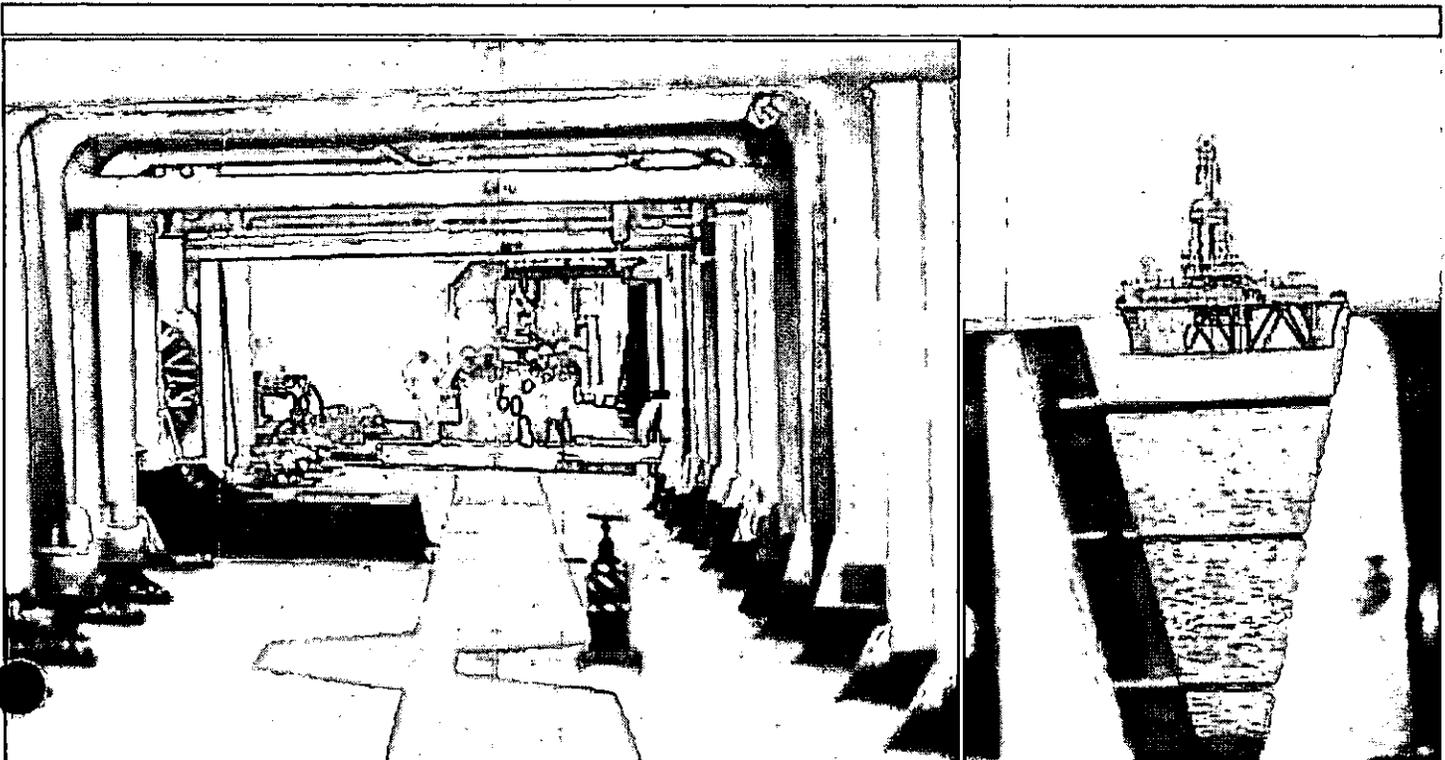

I also want to recognize the commitment of our management and employees, our customers and suppliers and the support of the communities in which Addax Petroleum operates. We are grateful for this commitment and support which are critical to the continued growth of Addax Petroleum.

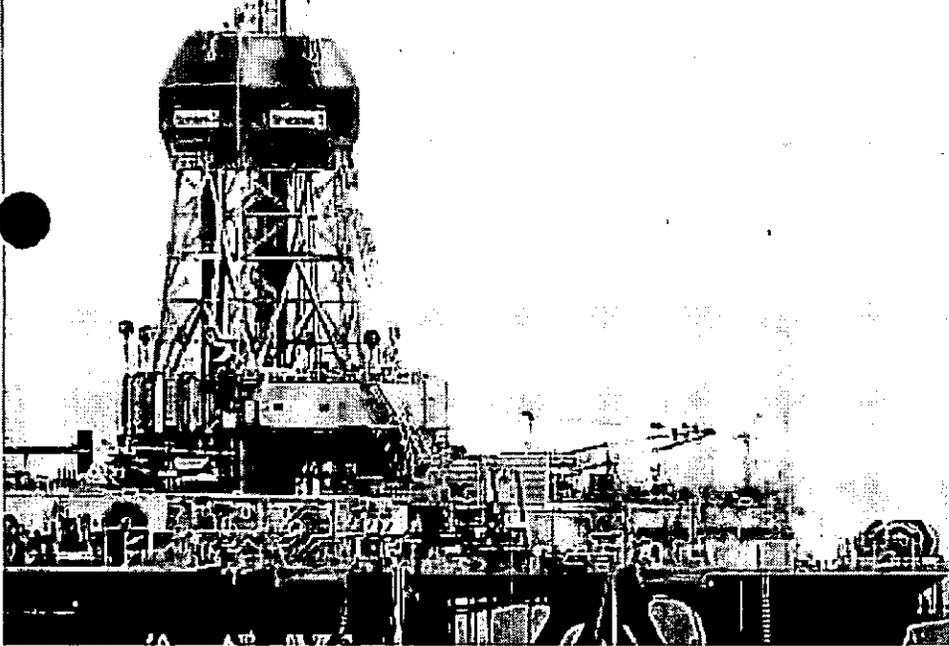

I look forward to working with all of our stakeholders to sustain and build on the momentum we have established to date.

Sincerely

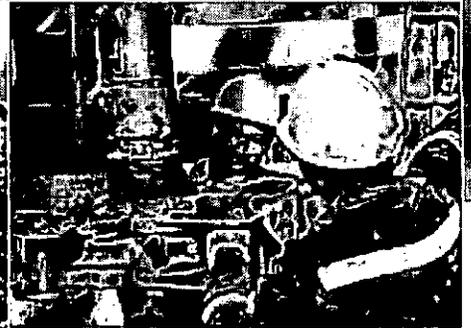

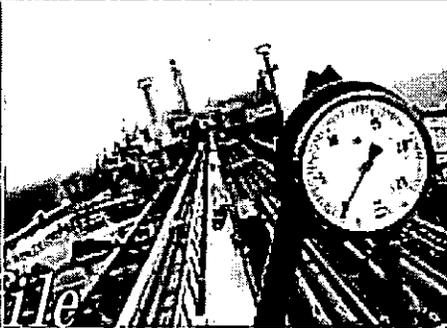

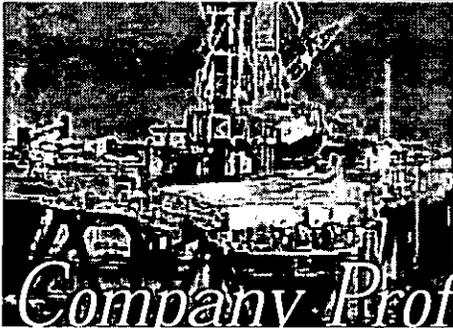

A handwritten signature in black ink that reads "Peter Dey". The signature is written in a cursive style.

Peter Dey, Chairman of the Board.

COMPANY PROFILE

Company Profile

Addax Petroleum is an international oil & gas exploration and production company focused on Africa and the Middle East. The company is the largest independent oil producer in Nigeria and has increased its crude oil production from an average of 8,800 bbls/day for 1998 to an average of just under 80,000 bbls/day as at December 2005. The company has grown production by acquiring under-developed properties in established basins and has increased its production by utilizing advanced and proven technologies.

Vision & Strategy

Addax Petroleum believes that its demonstrated technical expertise, combined with its excellent operational reputation and strong community relationships throughout Africa and the Middle East, make it well positioned to continue to grow its reserves and production.

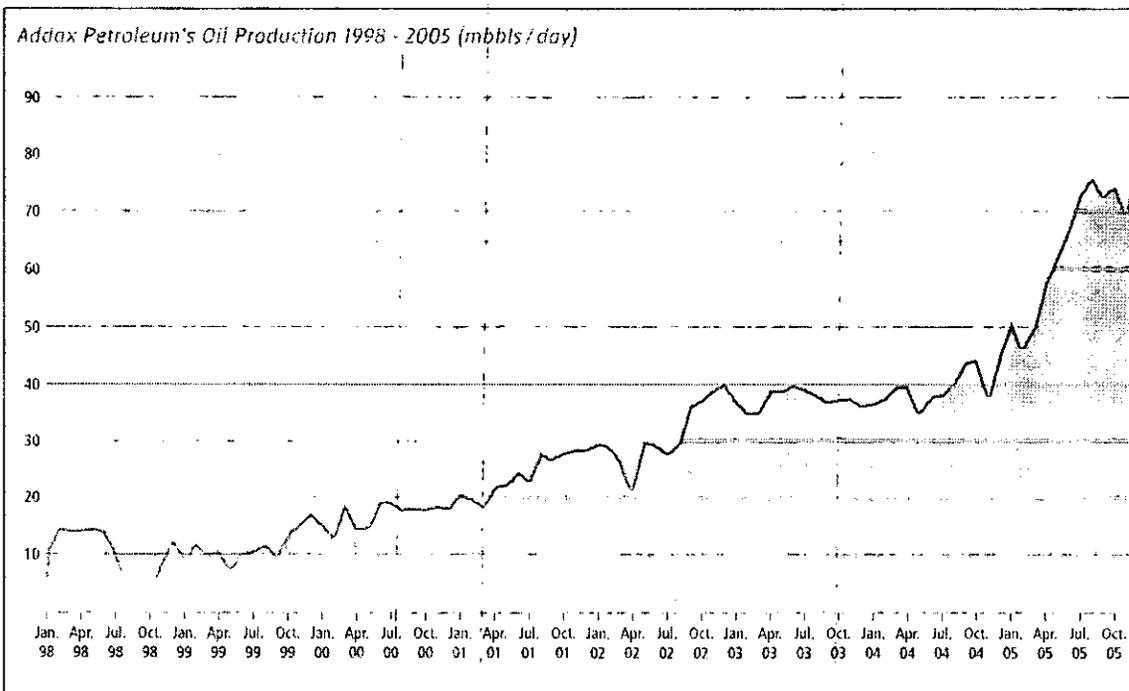

The company has continuously developed a strong in-house technical and operational expertise to grow reserves and production in a cost effective manner. We have made it a priority to recruit and retain indigenous personnel and to actively participate in and contribute to community development projects. Developing mutually beneficial relationships with government authorities, communities and businessmen has been critical in providing access to opportunities and obtaining the cooperation needed to successfully execute projects. Addax Petroleum is now extending its successful strategy to other regions in Africa and the Middle East where substantial growth opportunities exist.

Our strategy is to build on the significant growth and profit enhancement opportunities within our existing license areas while also pursuing new venture opportunities.

Strategy in existing properties consists of investing in facilities and infrastructure to increase production throughput, improve operating efficiencies and position ourself to monetize natural gas resources through

- completing identified development projects;
- evaluating unappraised discoveries and pursuing identified exploration prospects.

New Venture strategy includes pursuing a number of opportunities in West Africa, North Africa and the Middle East.

REVIEW OF OPERATIONS

2005 Highlights

Operations highlights

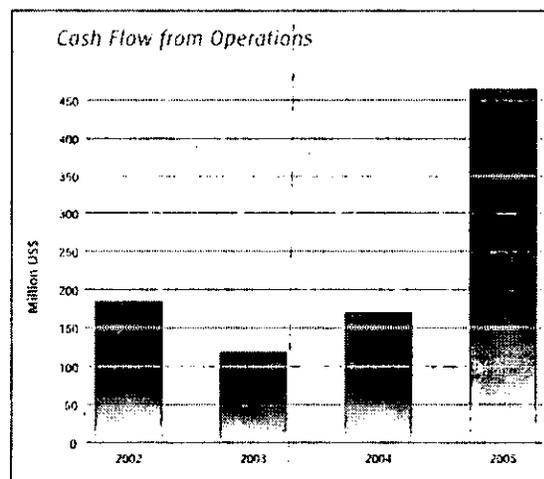

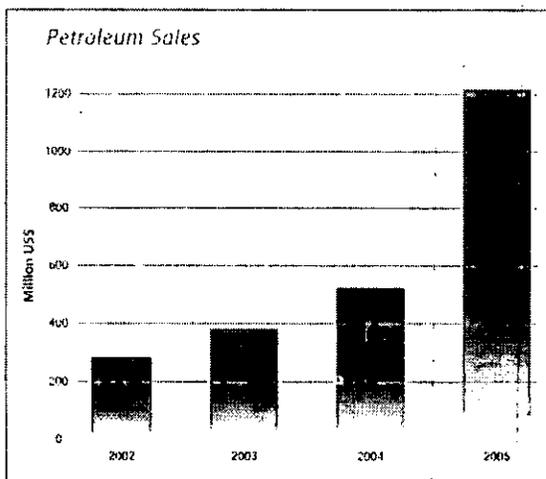

- **New record set of 65.3 mbbls/day** annual average gross oil production, a 64 per cent increase over 2004 levels.
- **First oil from the Okwori field in OPL90 in March.** Production from the field increased average annual gross oil production by 14.7 mbbls/day. Addax Petroleum received a technical excellence award for its work on the Okwori project from the 18th World Petroleum Congress in September.
- **Improved safety record** achieved with significant year-on-year decline in lost time incident frequency from the 2004 level of 1.24 incidents per million man-hours worked to 0.84 in 2005.

Financial highlights

- **New sales record set, petroleum sales before royalties up 133% to \$1,219.1 million** (2004: \$524.1 million)
- **Net income up 229% to \$206.1 million** (2004: \$62.6 million)
- **Cash Flow from Operations up 174% to \$468.2 million** (2004: \$171.0 million)

New Venture highlights

- **Addax Petroleum signed a farm-in agreement in July with Genel Enerji** for a 30% interest in a PSC for the Taq Taq field in the Kurdistan Region of Iraq.
- **Addax Petroleum signed a participation agreement in November with ERHC Energy Inc.** to acquire a 33.3% participating interest in JDZ Block 4. After year-end Addax Petroleum was awarded interests in JDZ Blocks 2, 3 and 4 and operatorship of Block 4.
- **Addax Petroleum signed a joint venture agreement with Oriental Energy** to acquire a 40% interest in the Okwok property.

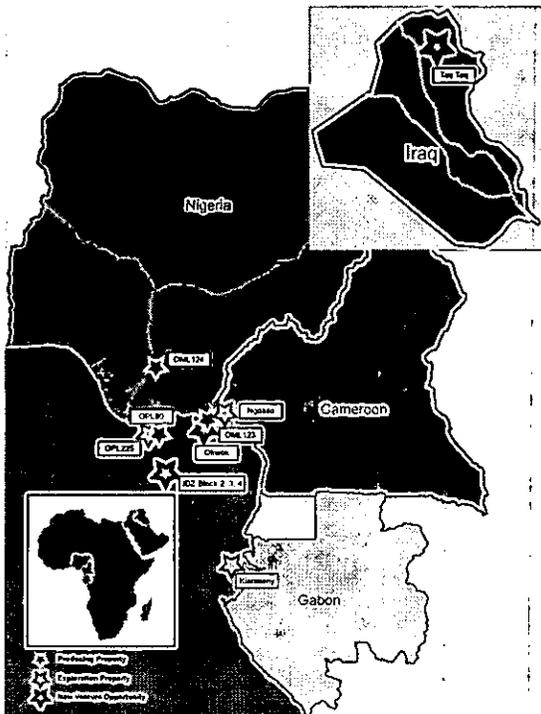

Review of Operations

Exploration & Production

The Niger Delta Basin is Africa's largest and most prolific oil producing basin. It is also one of the world's largest delta systems of Tertiary age and covers an area greater than 75,000 km². Addax Petroleum's principal oil and gas properties are in the West African countries of Nigeria, Cameroon and Gabon. In addition, Addax Petroleum has a potential interest in the Taq Taq field in the Kurdistan Region of Iraq.

Addax Petroleum Assets Map

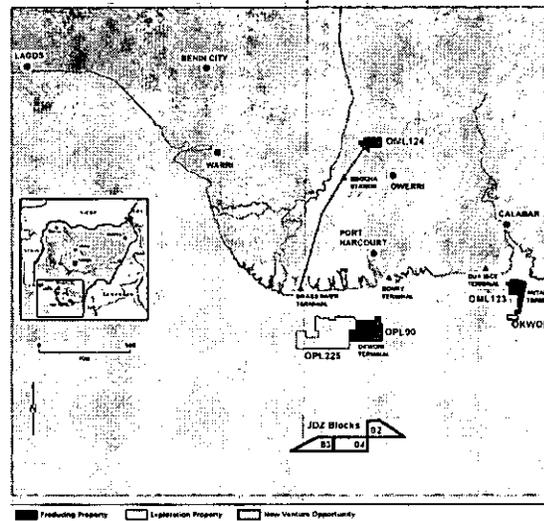

IN NIGERIA

Addax Petroleum has driven its growth in Nigeria by acquiring oil properties deemed by others to have limited remaining production potential and using its strong in-house technical and operational expertise to grow reserves and production in a cost effective manner.

Within Nigeria, Addax Petroleum has 100 per cent interests in two oil producing PSCs covering respectively OML 123/OML 124 and OPL 90/OPL 225.

Nigerian Assets Map

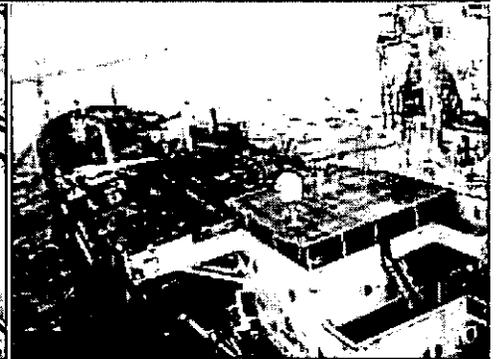

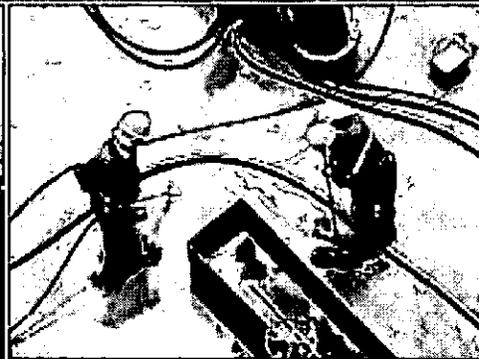

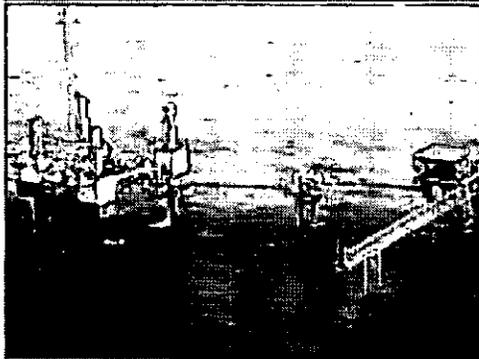

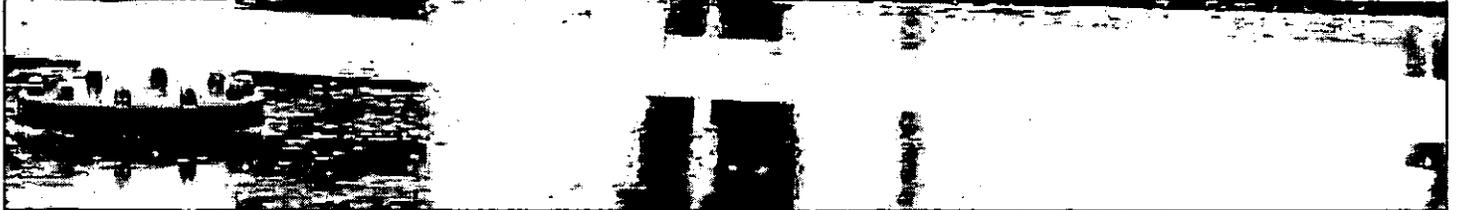

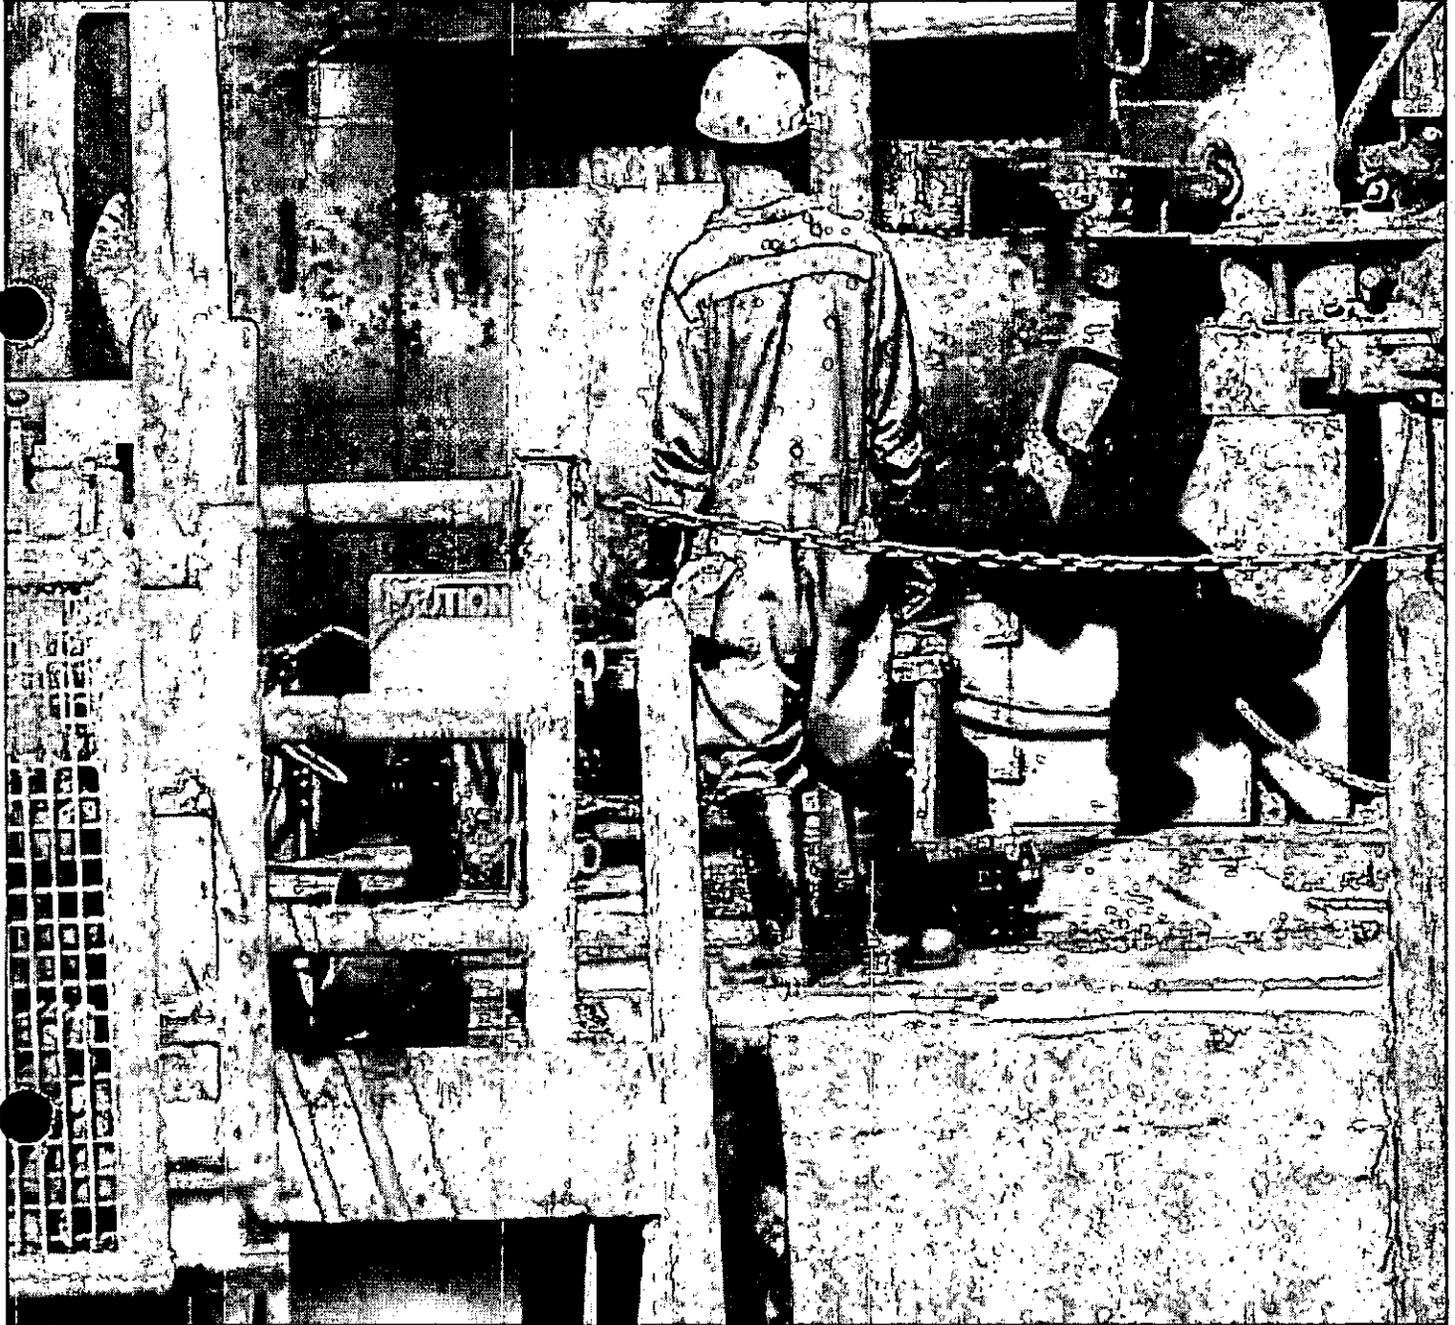

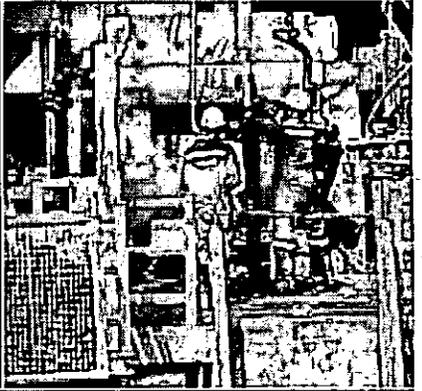

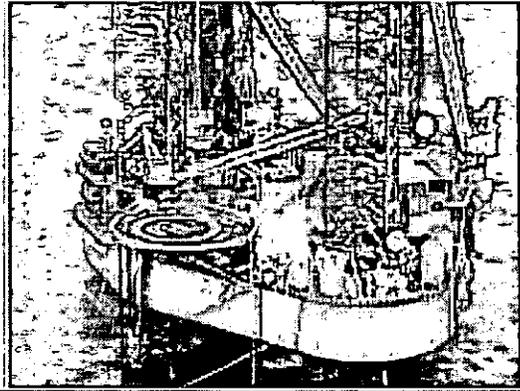

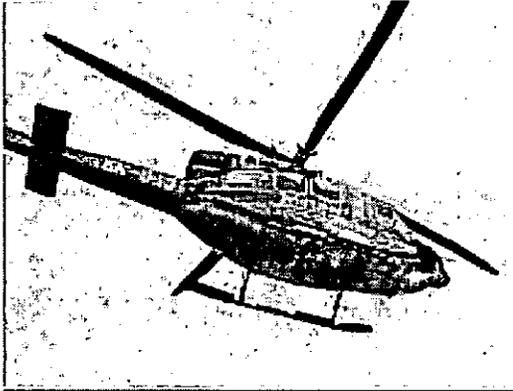

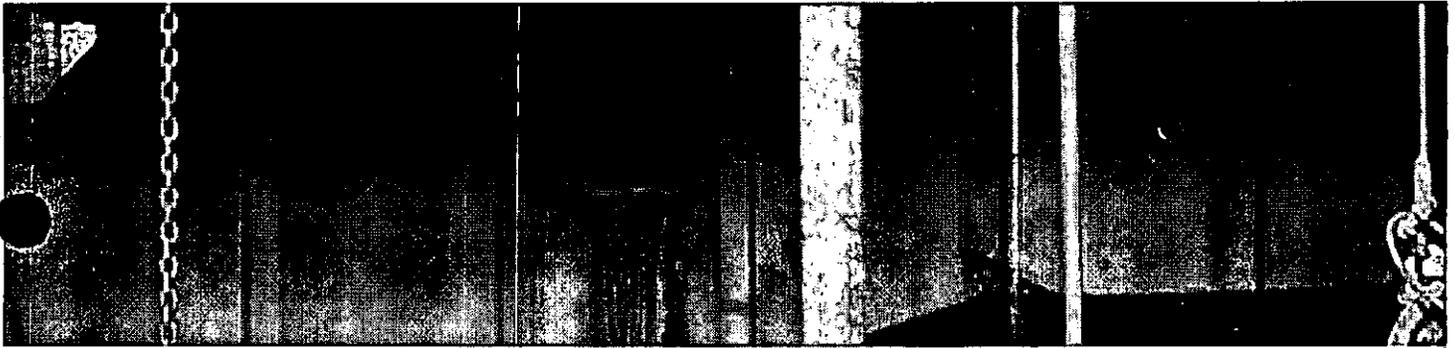

Properties Summary Table

Country	License	Area ⁽¹⁾ (acres)	Water Depth (m)	Addax Petroleum's Interest (%)	Average Oil Production		Gross Working Interest Oil Reserves		
					December 2005 (bbbls/d)	12 Months Ended December 31, 2005 (bbbls/d)	Proved ¹ (mmbbls)	Proved Plus Probable (mmbbls)	Proved Plus Probable Plus Possible (mmbbls)
Nigeria	OML123	90,700	3 - 40	100	50,690	47,120	74.9	143.9	194.3

Total		1,133,900			79,460	65,280	108.6	196.7	278.7

Note:

(1) The table sets forth the area of the Corporation's interest after giving effect to the relinquishment proposals for OPL90 and OPL225¹ made by the Corporation to NNPC.

OML 123

OML 123 is located some 70 km south of Calabar in water depths ranging from 3 meters in the north to 40 meters in the south of the block. It covers an area of 401 km² and contains six mature producing fields: Adanga, Akam, Ukpam, Ebughu, Bogi and Mimbo. The development drilling of the Oron West and North Oron fields during 2005 resulted in a significant reserves upgrade from the Oron West field and other near field potential discoveries. The development of the Adanga North field progressed with an agreed development strategy, including a further appraisal well and an extended well test. Both wells were drilled before the end of the year. A number of exploration prospects remain, of which one was drilled in 2005. This resulted in a discovery to the north east of the block at Kita North.

Production

During 2005, six new wells were brought on-stream whilst production optimisation initiatives were also implemented. As a result, average annual oil production for 2005 was 47 mmbbls/day, compared with 36 mmbbls/day in the previous year, an increase of 31%.

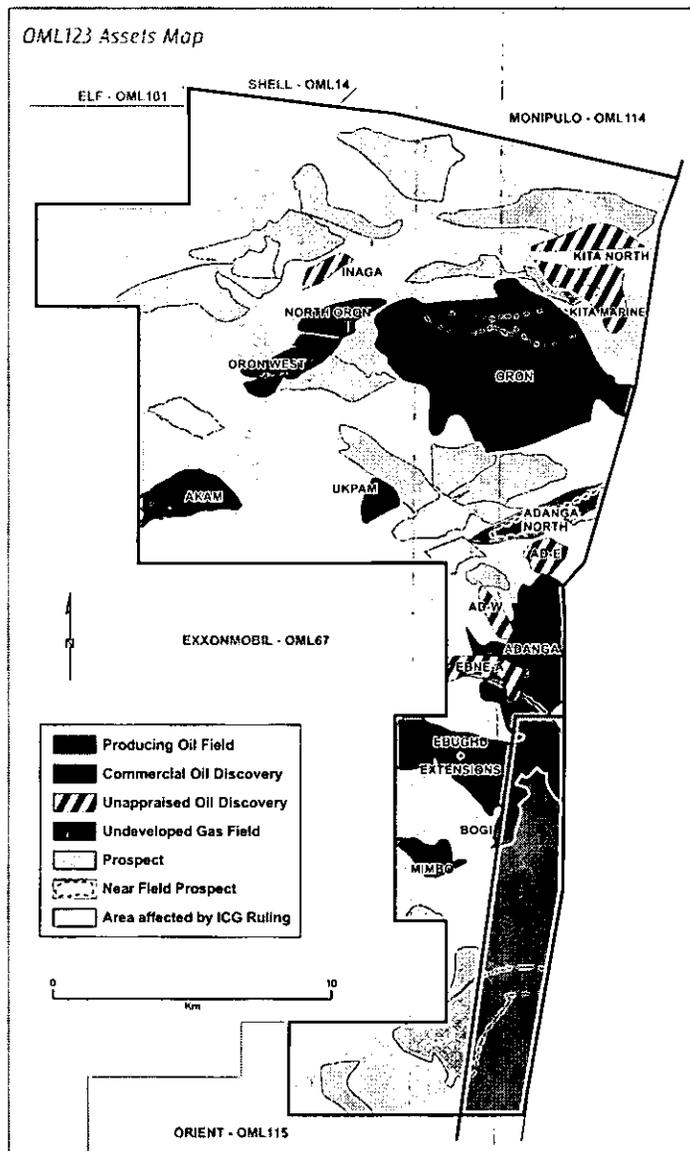

Antan Terminal

Production from all platforms is exported from the FPSO "Knock Taggart" (KT) at the Antan Terminal. During 2005, the KT handled 34 mmbbls of gross liquids of which 23 mmbbls was crude oil and 11 mmbbls was water. In addition, the KT stored and exported 6 mmbbls of oil from another operator in a block adjacent to OML 123.

A new contract has been signed for an FPSO to replace the Knock Taggart, which will have been on contract for over 7 years. The new vessel is expected on location in mid-2006, has much greater storage capacity, and a CALM buoy offloading system to allow bigger cargoes and larger vessels to be handled. It will also have a water injection plant onboard to improve recovery from a number of oil fields in OML123.

Drilling Performance

Drilling operations commenced in January 2005 with drilling of wells in Oron and Adanga fields using the "Tommy Craighead" drilling rig. In August 2005, a second jack-up rig the Noble Don Walker, was involved in the OML123 operation to drill 2 wells. Rig operations continued to the end of 2005. Twenty-one wells were drilled in the Oron Field, five wells in Adanga field and one exploration in the Kita Marine area. Of these, six horizontal wells were completed from the Oron wellhead jacket and one horizontal well completed from a stand alone caisson in the Adanga North Horst field. Overall drilling performance was improved in 2005 over 2004, with non-productive time reduced from 14.4% to about 3.6%. While average drilling cost per foot increased by only 2%, the average footage drilled per day increased by 14.4%.

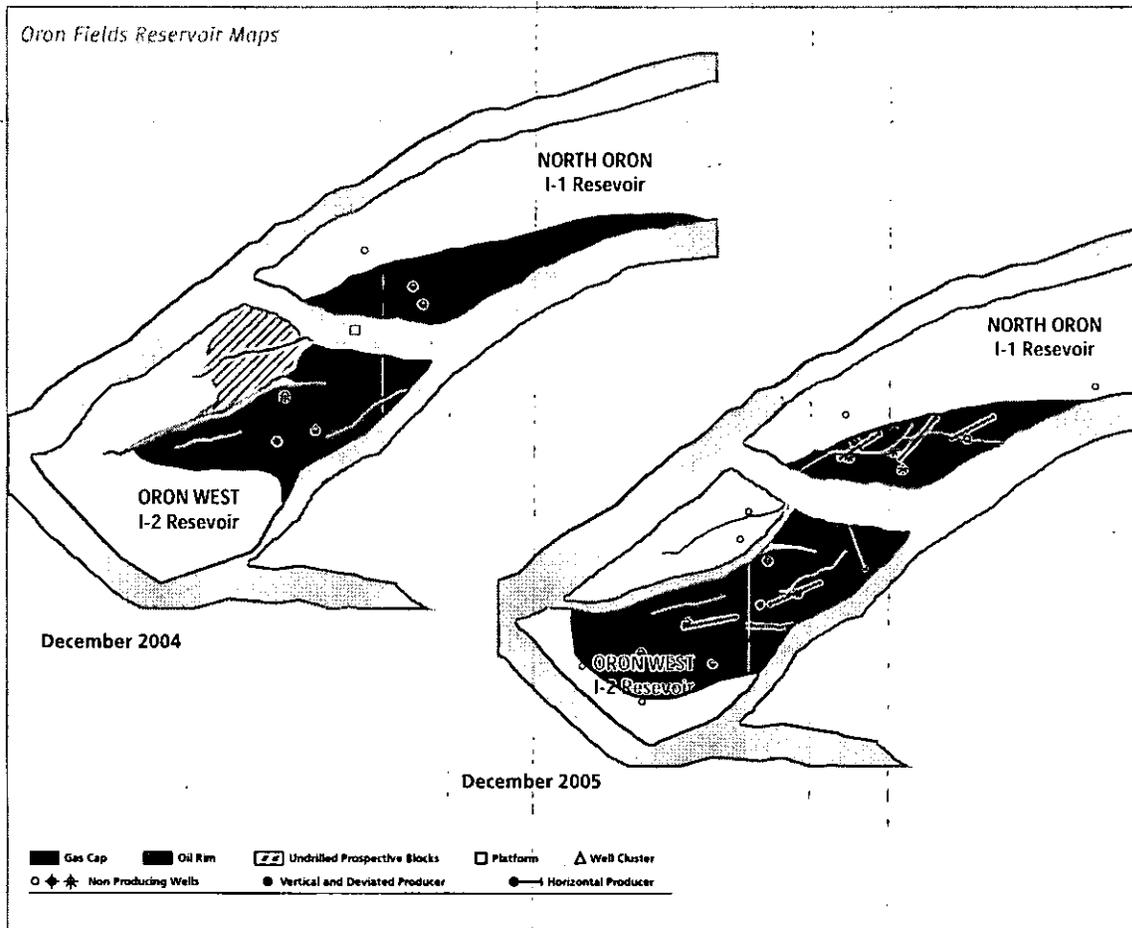

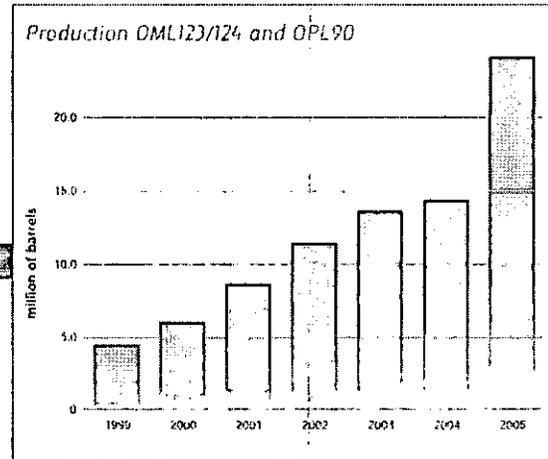

Oron West and North Oron Development Activities

The Oron West (ORW) and North Oron (NOR) joint Field Development Plan was approved just before the start of the year and development drilling commenced in January 2005. This drilling programme included a total of 13 appraisal and placement wells (mostly minor sidetracks of wells later completed for production) to delineate more completely the existing fields and look at the near field potential. A total of 6 production wells were added to the two existing extended well test ("EWT") wells in this first drilling phase, which are being produced three phase through the 10" EWT flowline to the Akam platform 7 km away.

In the course of drilling, the areal extent of the ORW field dramatically increased, as a result of changes in time-depth conversion across the field lifting the mapped structure above the oil

water contact. A number of additional near field accumulations were also delineated, resulting in additional development targets, some of which are planned to be drilled in 2006. Total oil initially in place for the Oron area increased as a result of the delineation drilling from 82 mmbbl at the time of the Field Development Plan to an estimated 166 mmbbl. At the end of 2005, around 14 mbbbl/day were being produced from the Oron West and North Oron wells.

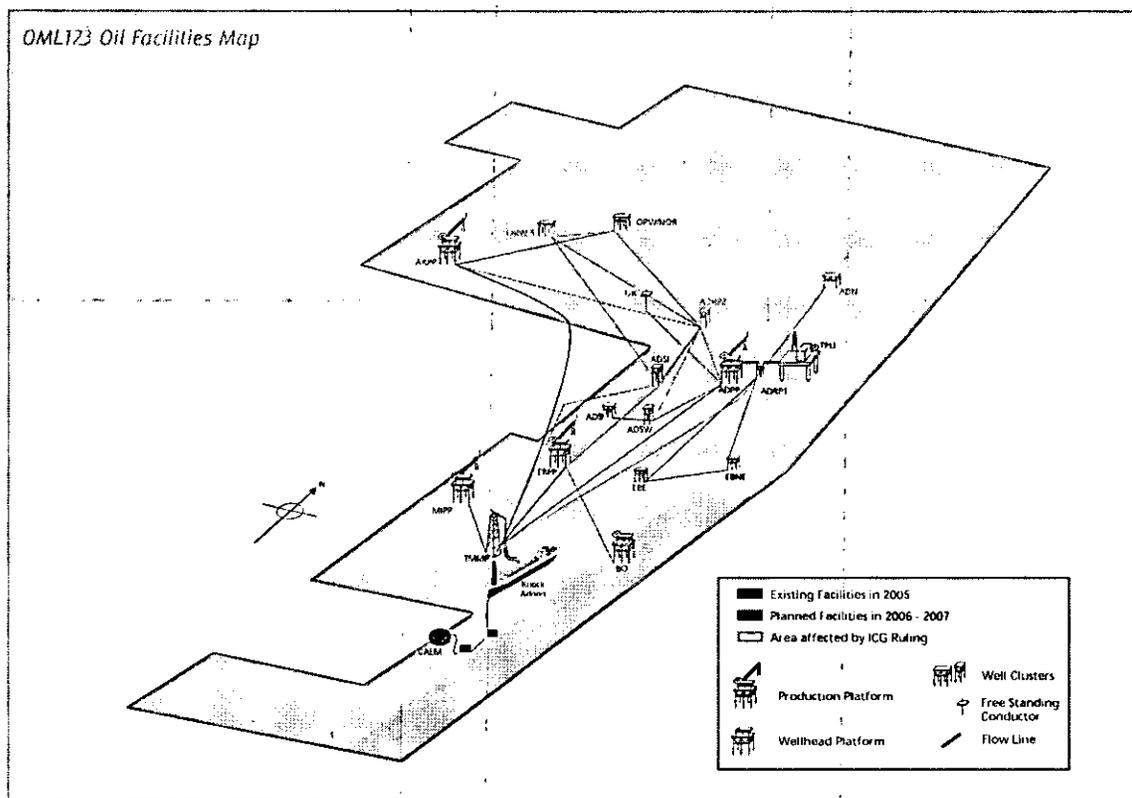

Ebughu and Adanga Infill Studies

The Greater Ebughu simulation study was concluded during 2005. Some five infill drilling locations were identified. Of these, two wells in Ebughu East are planned to be drilled in 2006.

Technical studies have also been completed on the Adanga and Adanga South reservoirs. A development of the Adanga P-4 reservoir, including the drilling of four appraisal wells and three production wells, is planned for early 2006. Proposals for an additional development well and a water injection program for the Adanga P-5&6 reservoirs remain to be completed. In Adanga South a number of infill locations have been identified, and will be further worked up in 2006.

Adanga North Development Studies

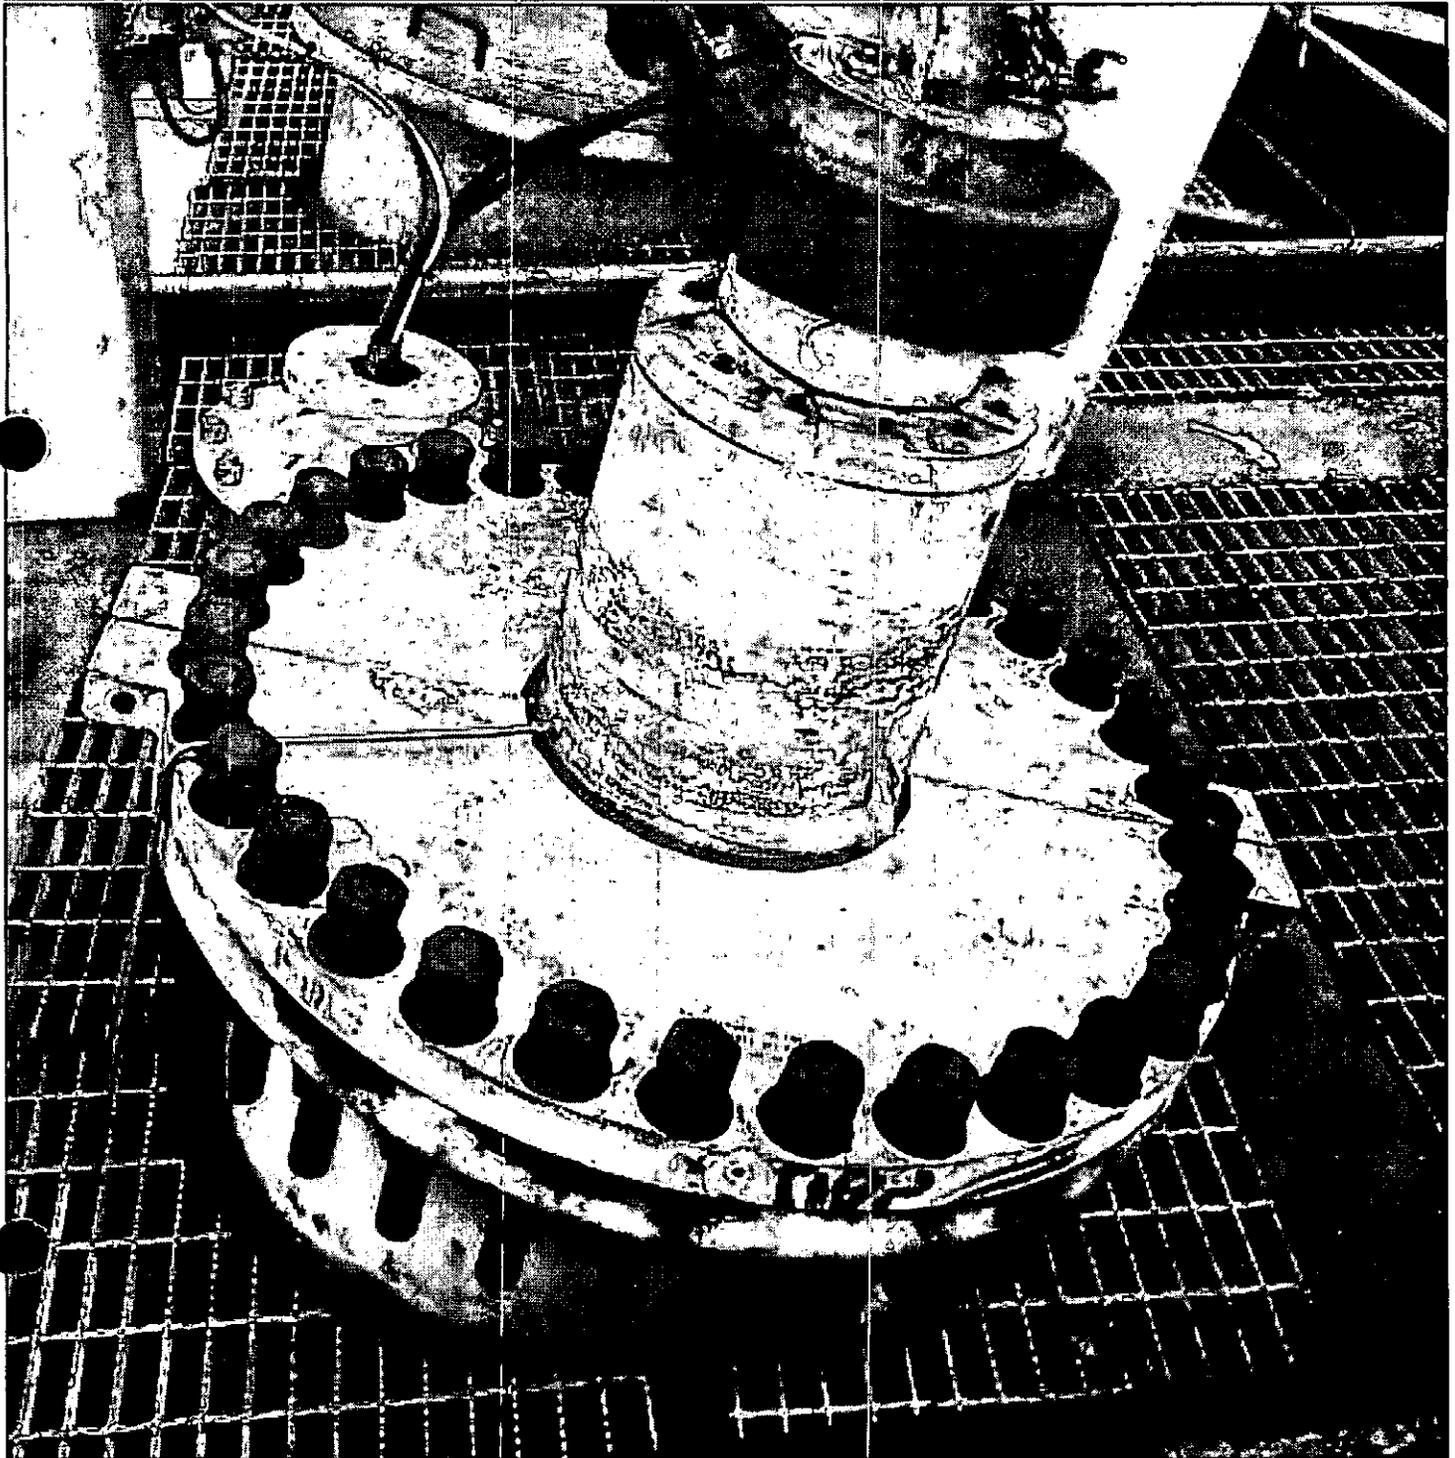

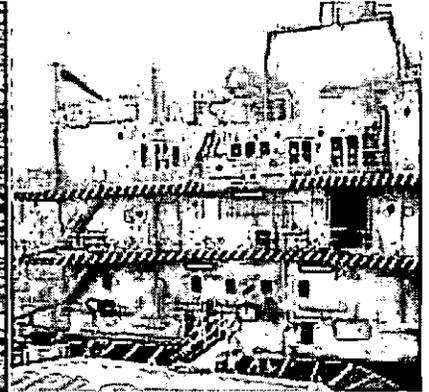

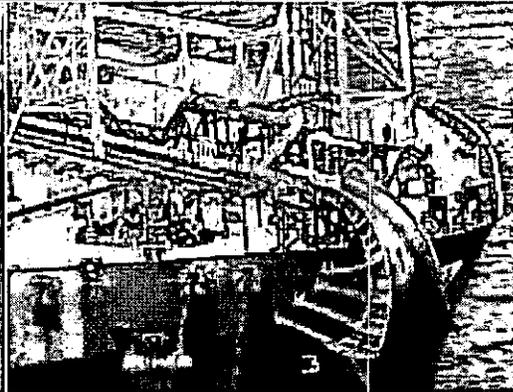

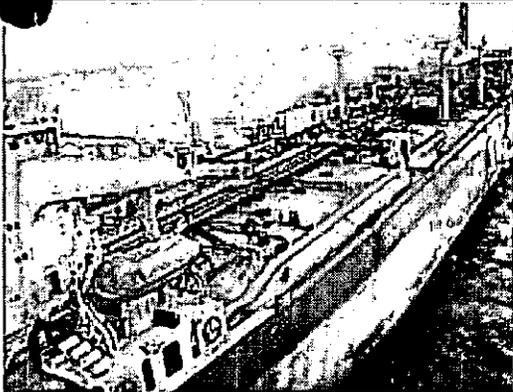

A strategy for the development of this 19° API field was approved internally. This oil is heavier than any produced previously in the area and successful development is of strategic importance for a number of undrilled prospects in the block. The initial part of the development strategy is to drill an appraisal well and an extended well test well to reduce remaining uncertainties and allow the reservoir model to be normalised to actual production before committing to the full development in 2008. These wells were drilled in Q4 and flowlines will be installed to allow the EWT to commence in February 2006.

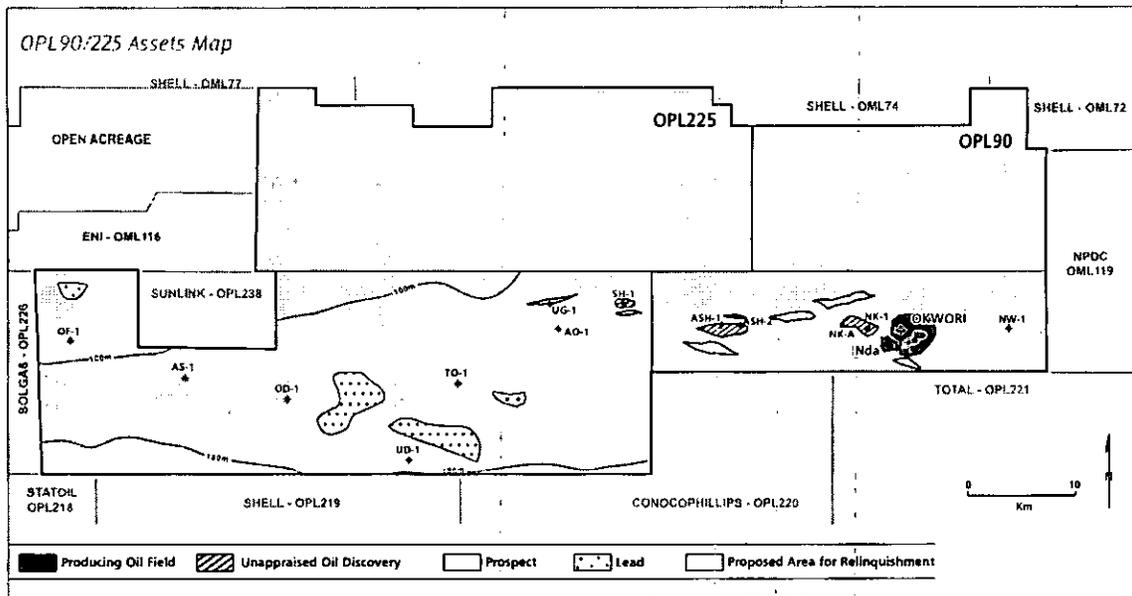

Exploration

An exploration well in the North Eastern area of the block discovered Kita North in October, which tested 28° API oil. Kita North has further downdip potential in several sands which contained gas at the level of the well penetrations. This area of the block has not previously been drilled by Addax Petroleum, but a number

of other prospects have been identified. This discovery creates a development hub for the area, and the development strategy is looking at an early tie-back of this discovery whilst the potential of the area is further appraised.

OPLS 90/225

OPLs 90 and 225 are located some 90km south of Port Harcourt in water depths ranging from 50 to 210 metres and covering an area of 2,418 km². OPL90 contains the Okwori and Nda oil fields. The blocks contain a number of undeveloped discoveries, prospects and leads.

Production

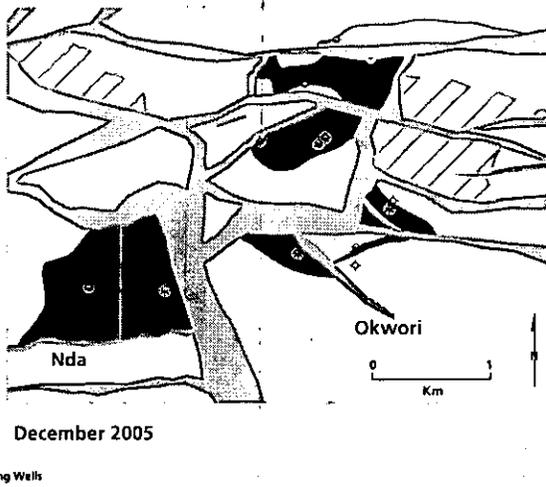

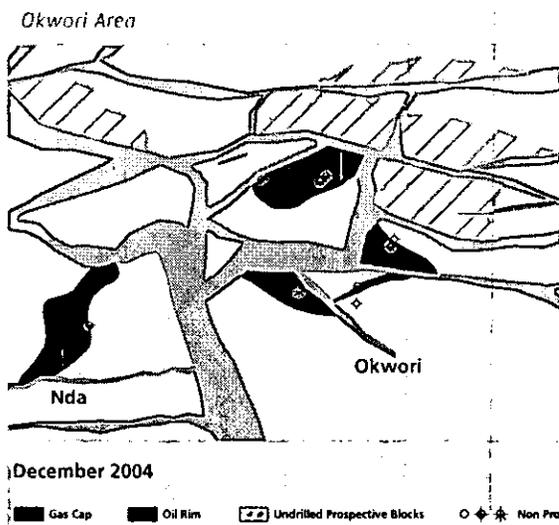

During 2005, seven new wells were brought on-stream including one sidetrack at OK-7, following failure of downhole sand control equipment, and one extended well test at ND-1, the Nda field discovery well. As a result, average annual oil production for 2005 was almost 15 mbbbls/day.

Okwori Terminal

The FPSO Sendje Berge (SB) arrived in OPL90 on 31st January 2005 and was commissioned during February before subsea flowlines and umbilicals from the individual production wells were installed and connected in March. In 2005, the SB handled over 5 mmbbls of crude oil and minimal amounts of water. In 2005, there were 7 cargoes lifted from the Okwori Terminal.

Okwori Field Development Activities

In 2005, wells OK-8, -9, -10, -11 and -12 were completed and put on stream with OK-7 and ND-1 that had been completed in 2004. In November, OK-7 well was sidetracked following failure of downhole sand exclusion equipment. OK-7ST was put on stream in early December. In November, OK-8 suffered a similar failure

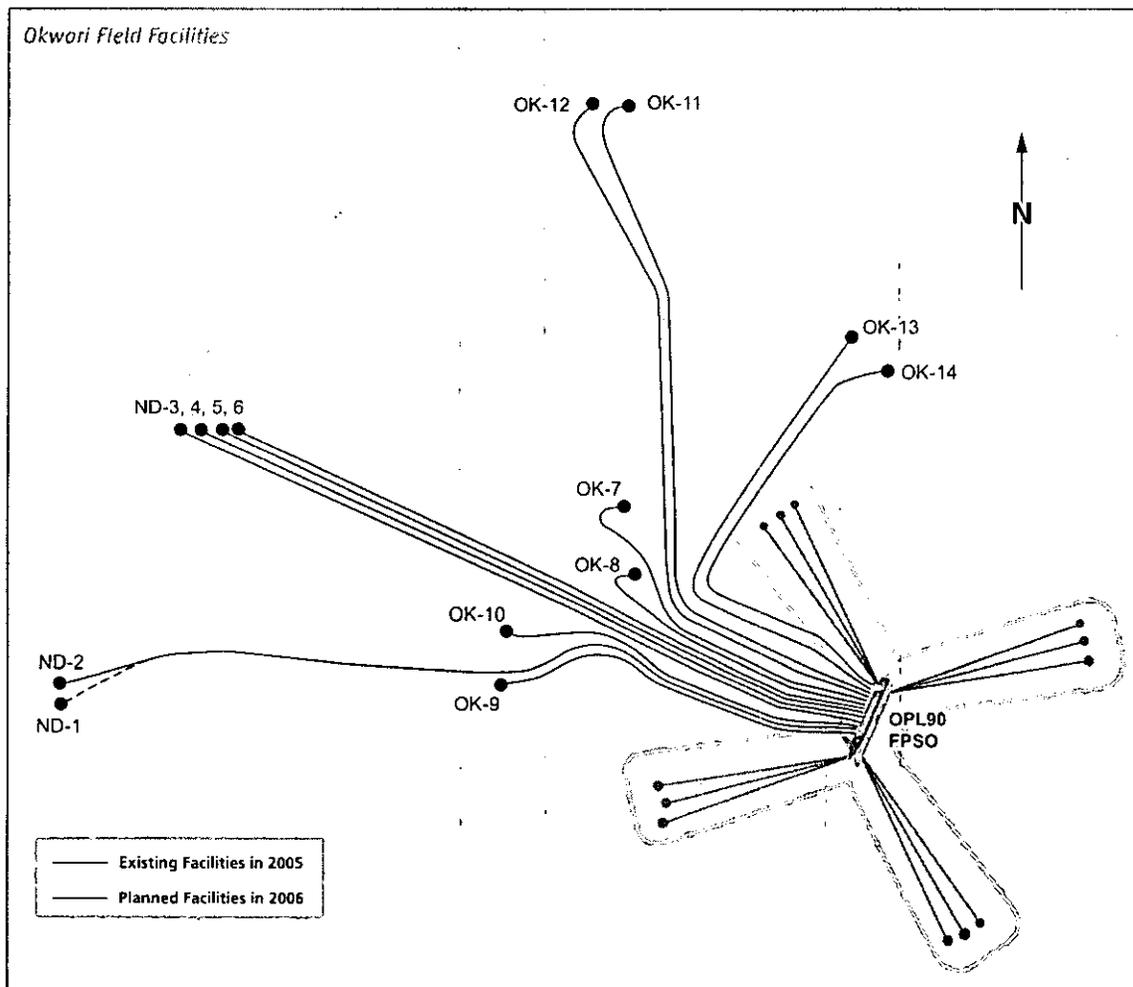

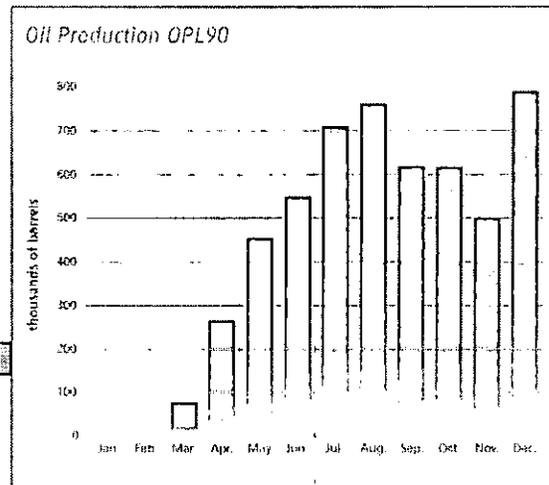

of downhole sand exclusion equipment and was shut-in, awaiting installation of a surface de-sander. The next two production wells OK-13 and OK-14 will be drilled and completed during the first quarter of 2006.

First oil production was in March 2005, nine months from the start of subsea field development, which is a world class achievement recognized with a technical excellence award received during the 18th World Petroleum Congress held in Johannesburg, South Africa in September 2005.

Nda Field Appraisal Activities

Nda production will be produced through the Okwori Terminal. ND-1 discovery well was completed on two reservoirs to evaluate

reservoir behaviour and help refine the Field Development Plan. ND-1 was put on extended well test in March with very stable production parameters since start-up. ND-2 updip placement well started drilling in December 2005, was completed in early 2006 and showed significant additional columns of oil. The Nda

Field Development Plan was officially submitted for approval in September 2005 with the intent of developing Nda field during the second and third quarters of 2006.

Exploration activities

A 3D seismic campaign was launched in early December 2005 to cover OPL 225. This campaign will allow delineation and the ranking of potentially hydrocarbon-bearing structures to define exploration targets during 2006.

Technical Studies

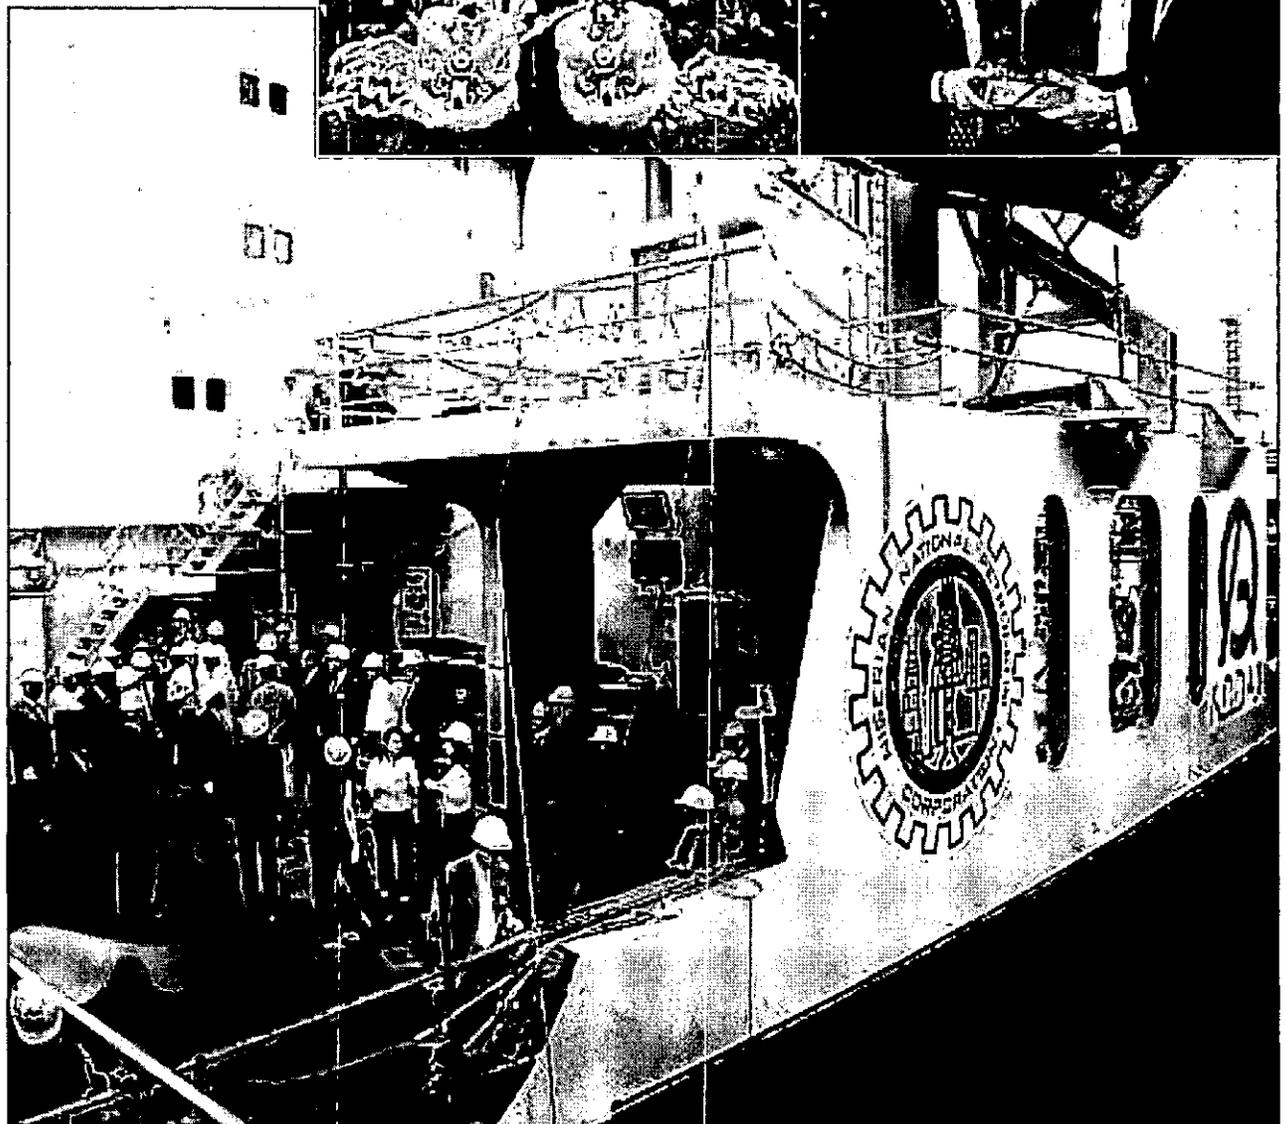

Following the drilling of Okwori development wells, the 3D seismic was re-interpreted during the second half of 2005 and will form the basis for a revision of the Okwori full field simulation model

to be history matched during 2006. In late 2005, Nda simulation models were updated to reflect the ND-2 appraisal results and help refine the Nda development well trajectories. Throughout 2005, a number of initiatives were launched to improve drilling, completion and production practices for Okwori producers in order to improve the reliability and longevity of downhole sand exclusion systems.

Technical Publications

In 2005, two technical papers on Okwori were accepted for presentation and publication by professional organizations (World Petroleum Council, Society of Petroleum Engineers). In addition, the Okwori project was highlighted as one of five major projects in the December 2005 edition of "Offshore" magazine.

Sendje Berge Blessing ceremony

OML 124

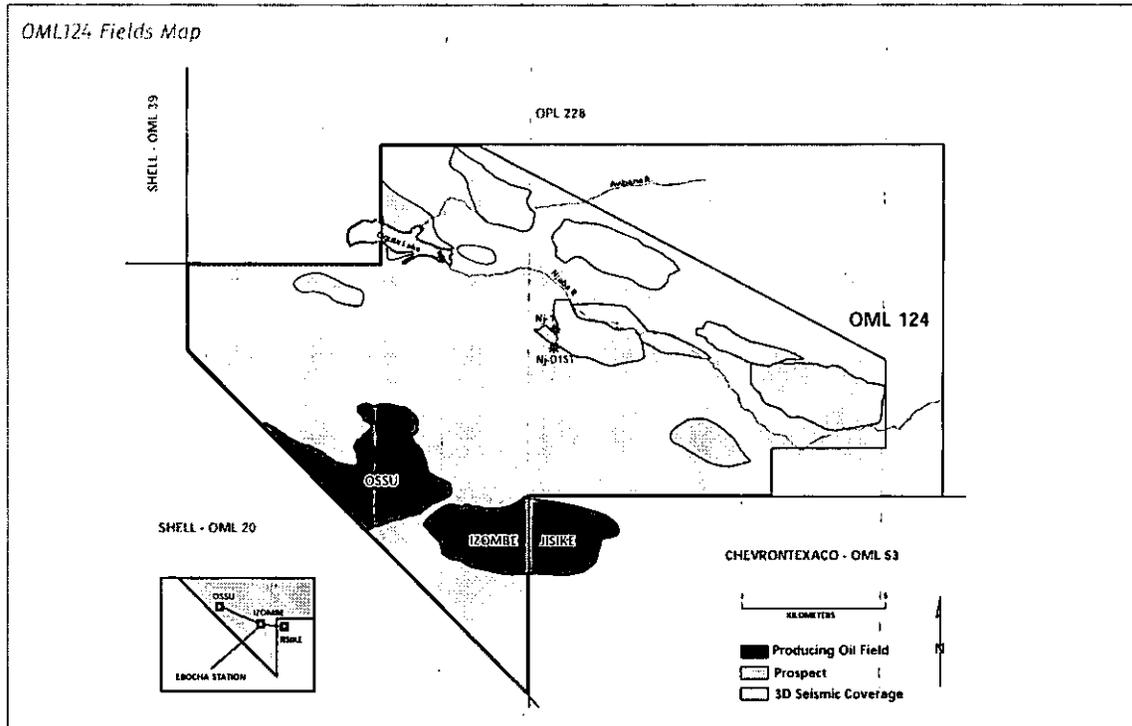

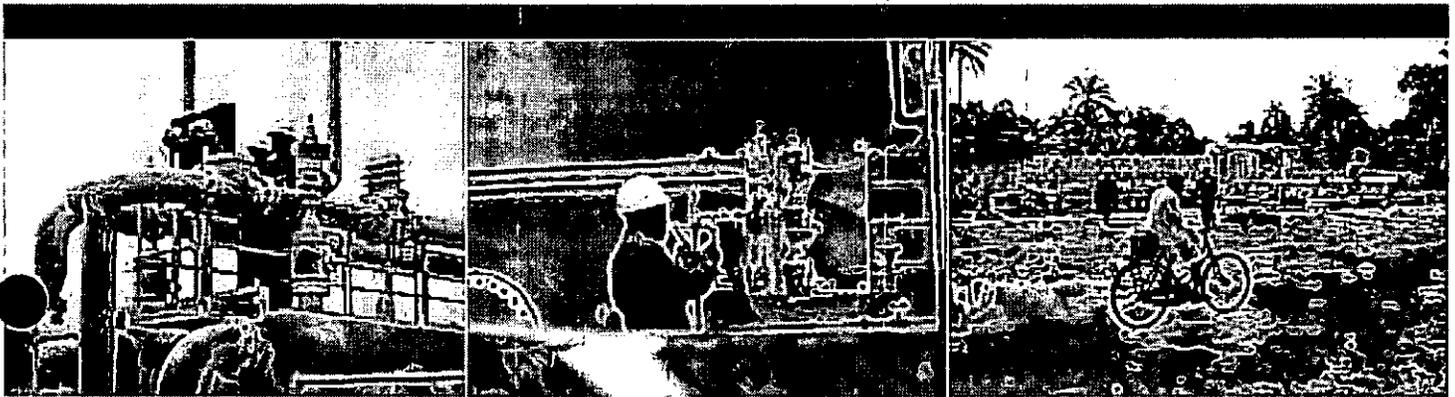

OML 124 is located some 100 km north of Port Harcourt. The block covers an area of 300 km² with two mature producing fields, Izombe and Ossu, and a number of exploration prospects. This acreage is characterized by mainly dry land with the western area seasonally flooded.

Production

During the year 2005, production from the Izombe and Ossu fields was held constant at an average of 3.5 mmbbls/day, arresting the decline seen in 2004. This was mainly due to water disposal facilities and de-bottlenecking. Further well optimization will take place in 2006 to sustain production from low-rate producers. Total onshore oil production in 2005 was 1.3 mmbbls.

Technical Studies

Three infill wells and three workovers, planned for 2005, have been delayed due to the high demand and unavailability of land rigs. As of end-2005, a rig has been mobilized to the Ossu field and work is expected to commence in early 2006. Further studies are being carried out to fully exploit the rig's availability by maturing promising workover candidates and step-out prospects. In addition, remaining exploration potential is being evaluated.

IN GABON

In January, 2004 Addax Petroleum signed a farm-in agreement for the acquisition of a 42.5% interest in a Production Sharing Contract (PSC) for Kiarsseny Marin. Tullow Oil operates the Kiarsseny Marin Property. The Kiarsseny Marin concession is located offshore in the Port Gentil Basin, in water depths up to 800m and covers an area of 5,443 km². It contains three oil discoveries and additional exploration potential. There are 2,643 km² of 3D seismic data, 18,750 km of 2D seismic data and 25 wells on the block. The PSC is currently in its first exploration phase of four years and has a minimum work commitment of US\$ 9.9 million, including the drilling of two exploration wells. The contract can be renewed twice, for additional three year periods.

Drilling Activities

The first commitment well, Topaze South -1, was drilled in early 2004 to test the southern extension to the Topaze oil accumulation, but this well and its subsequent up-dip sidetrack were unsuccessful. The second commitment well KME-1, appraising the Equata structure, was spudded on 10th December 2005 and was still being drilled by year end. The well was completed in early 2006 and was unsuccessful.

Future Work Programme

In 2006, the KME-1 well results will be reviewed in order to assess the remaining commercial potential of the Equata accumulation. A portfolio of ranked exploration prospects will also be presented by the operator to the JV partners and areas will be identified for possible future 3D seismic acquisition. A fully discretionary third well could be proposed and would most likely target a high-ranking exploration prospect.

Natural Gas – Assessing the potential

Nigeria's natural gas reserves are estimated by NNPC to be 181 tcf in 2004, making Nigeria the country with the eighth largest natural gas reserves in the world. To date this resource has been underdeveloped largely due to a lack of readily accessible markets. The Nigerian government has announced that it intends to change that situation and has set a goal of increasing natural gas revenue sales to match oil revenue sales by 2010.

To achieve that goal, the Nigerian government said that it will be introducing policies and programs to encourage natural gas exports and to increase domestic consumption. The government has also announced a ban on gas flaring scheduled to come into effect in 2008 (the "flares down" policy).

In 2005, in response to these developments, the company initiated programs at each of its production sites in Nigeria, OML 123, OML 124 and OPL 90 to: (1) determine if these policies presented the company with a viable new growth opportunity

and new revenue source at each site and (2) ensure that the company's operations at each site would be in a position to comply with the flares down policy.

At OML 124, as part of its flares down compliance strategy, the company created a project team to conduct a feasibility study on a possible investment in a LPG plant at Izombe.

At OML 123 and OPL 90, commercialization plans were developed as part of the flares down compliance strategy. Project teams at both sites have identified possible ways in which the company could, under certain conditions, successfully commercialize the resource. Discussions with authorities, potential partners and customers were on going at both sites at year-end.

As at December 31, 2005, no final decision had been made in respect of any potential natural gas project. Analysis and discussion of the options and negotiations with potential partners will continue in 2006.

New Ventures in 2005 – A Breakthrough Year

The company made significant progress in advancing the new ventures component of its business strategy in 2005. The company executed three major transactions each of which added highly prospective properties and development opportunities to the high quality asset base.

During 2005, in the Nigeria-Sao Tome & Principe Joint Development Zone ("JDZ"), Addax Petroleum entered into a participation agreement with ERHC Energy, Inc. ("ERHC") to acquire an interest in Block 4 of the JDZ. Since year end, Addax Petroleum has been awarded interests in JDZ Blocks 2, 3 and 4 and operatorship of Block 4. A summary of the Corporation's holdings in this highly prospective region as of 28 March, 2006 is as follows:

Block	Net Acres acres	Addax Petroleum's Participating Interest %	Payments by Addax Petroleum		ERHC interest carried by Addax Petroleum %	Minimum Work Program to be funded by Addax Petroleum ¹ \$ million
			as Signature Bonuses to JDZ \$ million	as acquisition payments to ERHC \$ million		
			2	24,504		
3	24,686	15.00%	2.0	7.5	10.00%	7.5
4	70,519	33.30%	23.4	16.0	17.70%	27.0
Total	119,709		33.7	32.3		40.6

1. Includes the carry of ERHC's interest

During 2005, Addax Petroleum entered into a joint venture agreement with Oriental Energy, a Nigerian company, pursuant to which it agreed to acquire a 40% interest in the Okwok property, located 12km southwest of OML123. Addax Petroleum's position in this opportunity remains subject to the completion of a farm-in agreement and government approval, anticipated during 2006.

Also during 2005, Addax Petroleum entered into a farm-in agreement with Genel Enerji A.S. for an interest of 30% in a production sharing contract to govern the Taq Taq field in the Kurdistan Region of Iraq. Addax Petroleum's formal position in the opportunity is subject to approval by the relevant authorities. In the meantime, Addax Petroleum has completed 2D seismic acquisition and is preparing an appraisal drilling work program in anticipation of the relevant approvals.

In addition to the three transactions highlighted above, the company has additional potential opportunities at various stages of investigation in its core areas of Africa and the Middle East which it will continue to pursue in 2006.

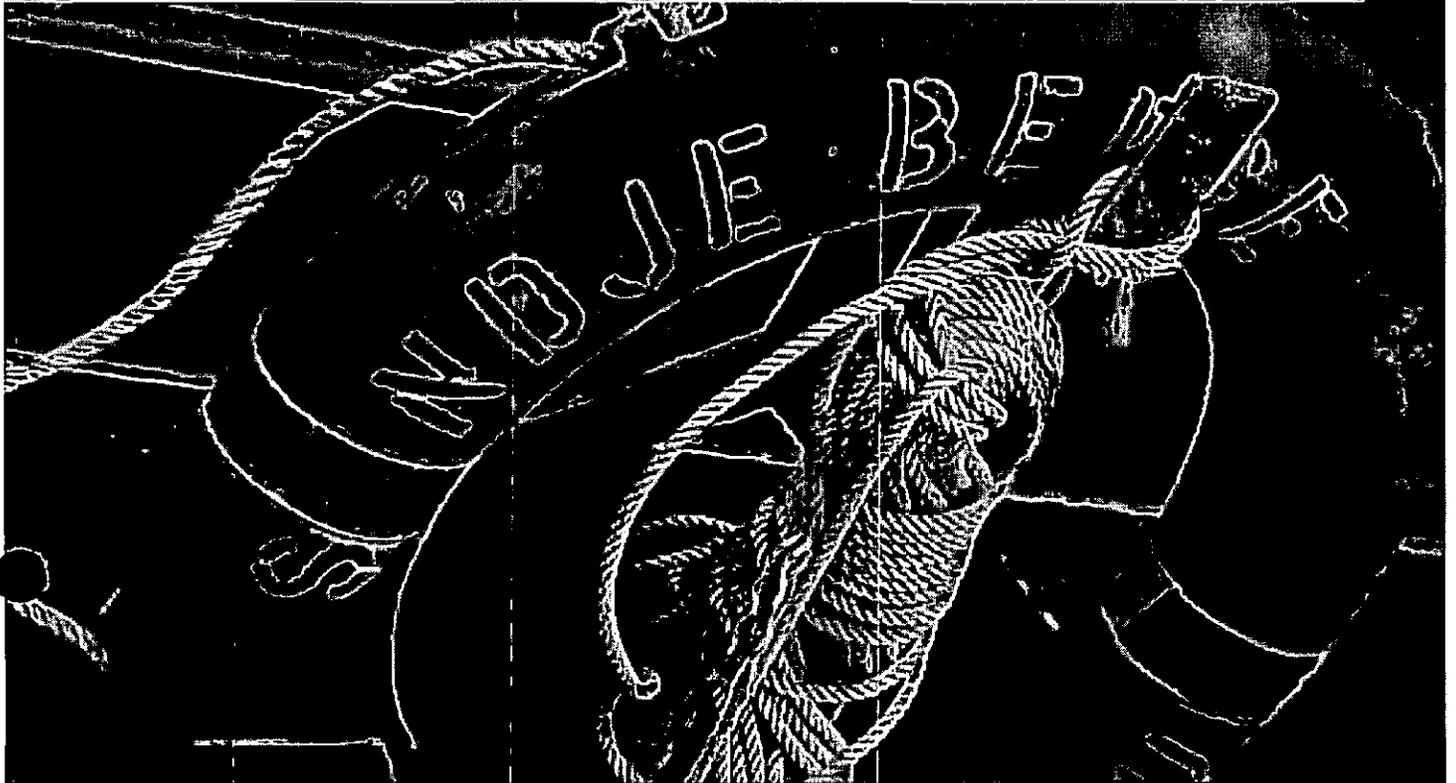

CORPORATE CITIZENSHIP

An ongoing commitment

At Addax Petroleum, being a good corporate citizen is a critical part of growing its business. Addax Petroleum makes it a priority to ensure that its operations meet all local and industry health, safety and environmental policy and regulations, in order to develop strong local relationships and to align priorities with those of the host government.

Health, Safety and Environment

Addax Petroleum upholds firm commitment to the safety of lives and protection of the environment through the continued implementation of comprehensive programs that promote awareness and engagement of the workforce towards improvement in HSE performance. Management regularly assess compliance with applicable statutory regulations and industry codes practice through endorsement of third-party reviews and audits of the operations. In 2005, improvement in safety records was reflected in lost time incident frequency of 0.84 lost time incidents per million man-hours worked (as opposed to 1.24 in 2004).

Corporate Citizenship

Social development projects

The company also has a well-developed community relations policy, which aims to give back to its host communities by providing financial support for a range of education, training and infrastructure programs that provide real and immediate benefits to people. In Nigeria, the company invested \$1.6 million in 2005 in infrastructure programs such as water plants that provide tangible and immediate benefits. Addax Petroleum also financed road construction and improvement programs such as the upgrading to asphalt of community access roads in Umuamaka, Ndioko and Ugbele villages or the implementation of electricity transformers in Ezi-Orsu. Our focus this year again was on education with 207 post primary and 195 post secondary scholarships as

well as the extension of our Technical Skills Acquisition Programme - both programmes benefited pupils belonging to the communities close to OML 123 and OML 124.

The company believes that its excellent reputation creates real business benefits. In a region where local governments are actively promoting a higher level of involvement by local firms, Addax Petroleum is perceived as the partner of choice for indigenous companies pursuing joint venture opportunities. Also, strong local relationships and community investments have made a positive contribution to the stability of Addax Petroleum's operations.

ADDAX PETROLEUM N.V.

CONSOLIDATED FINANCIAL STATEMENTS

FINANCIAL REVIEW

The discussion in this financial review of Addax Petroleum N.V. should be read in conjunction with the Company's consolidated financial statements and related notes thereto. The consolidated financial statements presented herein are those of Addax Petroleum N.V. and its subsidiaries. The financial statements have been prepared in accordance with Canadian GAAP.

Revenue

Total net revenue in 2005 was \$1,013.1 million from gross revenues of \$1,224.1 million less royalties of \$211.0 million related to petroleum sales. On a year over year basis net revenue of \$1,013.2 in 2005 was up 140 per cent compared to net revenue in 2004 of \$422.5 million.

Revenue from petroleum sales for the year (before royalties) amounted to \$1,219.1 million, up 133 per cent relative to 2004 sales revenue of \$524.1 million. Increased production - including first oil from OPL 90 and a 31 per cent increase in output from OML 123 - and sales prices that were on average 45 per cent higher in 2005 than in 2004 (\$52.81/bbl in 2005 as compared to \$36.30/bbl in 2004) - were major factors in revenue growth.

Expenses

The Corporation incurred \$364.1 million in expenses in 2005 a 92% increase over total expenses of \$189.4 million recorded in 2004.

Operating expenses in 2005 totalled \$152.7 million, a 74% increase over 2004 operating expenditures. Operating expenses on OML 123/124 rose 35 per cent to \$116.6 million or from \$5.98/bbl in 2004 to \$6.29/bbl in 2005. Lease rental of the FPSO accounted for 93% of the \$28.5 million cost of operating OPL 90 (nil in 2004).

Taxation

Current income taxes in 2005 amounted to \$349.1 million as compared to \$140.4 million in 2004. Taxes per barrel were \$15.12 in 2005 and \$9.73 in 2004.

The tax charge on OML 123/124 in 2005 was \$336.0 million or \$18.12 per barrel. In 2004 the corresponding charges were \$139.5 million or \$9.66 per barrel. The increase in tax was due to higher profitability primarily from the increase in production and increased oil price.

The tax cost of OPL 90/225 was \$10.2 million in 2005 when the company used \$133.8 million in petroleum investment allowances related to the development of the Okwori field to offset current tax liabilities.

Future income taxes in 2005 were \$93.9 million as compared to \$30.1 million in 2004.

Dividends

During 2005 the Board of Directors proposed dividends of \$85 million.

Capital Expenditures

The Corporation incurred capital expenditures of \$381.5 million in 2005 as compared to \$314.2 million in 2004.

Of the \$381.5 million, \$362.4 million was spent in Nigeria, \$2.1 million in Cameroon and \$5.9 million in Gabon.

Cash Flow From Operations

Cash Flow From Operations was \$468.2 million for 2005, compared to \$171.0 million in 2004, representing an increase of \$297.2 million. The increase resulted from the increase in income before income taxes of \$415.9 million, due to the Okwori Property in OPL90 coming on-stream in 2005 (at a low effective tax rate), and higher production from OML123/124 in 2005. Additionally, there were increases in non-cash items with the operating activities, specifically an increase of \$156.3 million relating to depreciation and future taxes. This was offset by an increase in current taxes of \$208.7 million.

Financial Condition

The company had cash or cash equivalents of \$6.7 million as at December 31, 2005 as compared to \$3.9 million a year earlier.

The company has a senior secured revolving credit facility of \$300 million. As at December 31, 2005 \$80 million was drawn on the credit facility.

DIRECTORS' REPORT

Results and Dividend

The consolidated results for APNV for 2005 are set out in the consolidated financial statements along with corresponding results for 2004. The consolidated financial statements presented herein are those of Addax Petroleum N.V and its subsidiaries.

Directors

The names of the current directors are listed below:

- Mr. G. de Vries, managing director, appointed 16th June 2005
- Mrs. F.F. Pinedo-Sluis, managing director, appointed 1st April 2001
- Ms. A. Steward, managing director, appointed 16th June 2005
- Mr. V. Semeleer, managing director, appointed 1st February 2002
- Mr. L.E. Hanst, managing director, appointed 27th August 1999

Directors' Interests

None of the directors or their families held beneficial interests in the ordinary shares of APNV on appointment or on December 31st, 2005.

Technical Services

Technical, financial, legal and administrative services were provided by the Geneva Branch of Addax Petroleum Services Ltd, (APS) a wholly owned subsidiary of APNV.

Substantial Shareholdings

As at 31st December 2005, APNV was wholly-owned by AOG. AOG was the ultimate parent company at this date.

Employees

As at 31st December 2005, APNV employed 331 (2004: 264) employees. Of these, 241 were located in Nigeria of which 19 are expatriates, 89 were located in Geneva, Switzerland, and 1 was located in Cameroon.

APNV is committed to equality of opportunity, employee training and development, and effective communication.

Auditors

In 2005 Deloitte & Touche were auditors of APNV. Deloitte & Touche have expressed their willingness to continue in office as auditors and a resolution proposing their re-appointment will be submitted at the Annual General Meeting.

Directors' Responsibilities for the Consolidated Financial Statements

The managing directors of APNV are responsible for preparing consolidated financial statements for each financial year. In preparing those consolidated financial statements, the managing directors are required to:

- select suitable accounting policies in respect of movable and immovable property and apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the consolidated financial statements; and
- prepare the consolidated financial statements on the going concern basis unless it is inappropriate to presume that APNV will continue in business.

The managing directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of APNV and to enable them to ensure that the consolidated financial statements comply with regulatory requirements. They are also responsible for safeguarding the assets of APNV and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. Confirmation of the accounts at the Annual General Meeting discharge the board of managing directors from all liability with regard to their management for the past fiscal year in so far as their administration is evidenced by the documents submitted.

Annual General Meeting

The Annual General Meeting of APNV will be held in Curaçao on June 6, 2006.

The Managing Directors

Curaçao

AUDITORS' REPORT

To the Shareholder of Addax Petroleum N.V.

We have audited the consolidated balance sheets of Addax Petroleum N.V. as at December 31, 2005 and 2004 and the consolidated statements of operations, retained earnings and cash flows for each of the years in the three year period ended December 31, 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2005 and 2004 and the results of its operations and its cash flows for each of the years in the three year period ended December 31, 2005, in accordance with Canadian generally accepted accounting principles.

ADDAX PETROLEUM N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2005 AND 2004

(US\$, except as noted. Tabular amounts in US\$ 000s, except as noted)

1. GENERAL

Addax Petroleum N.V. ("Addax") was incorporated on August 27, 1999 and is a registered Netherlands Antilles corporation. Addax is a wholly-owned subsidiary of The Addax and Oryx Group Ltd. ("AOG"). Addax and its subsidiaries (collectively, the "Company") are involved in the exploration, appraisal, development and production of crude oil and natural gas.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The consolidated financial statements include the accounts of Addax and all of its subsidiaries and are prepared in accordance with Canadian generally accepted accounting principles. Subsidiaries are consolidated from the date on which control is transferred to the Company and ceases on the date on which control is transferred out of the Company.

Inter-company balances and transactions, including inter-company profits and unrealized profits and losses are eliminated.

Measurement uncertainty

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingencies at the date of the consolidated financial statements and the reported amounts of revenue and expenses arising during the reporting period. Actual results could differ from these estimates and the differences could be material.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively.

The amount recorded for depletion and depreciation of property, plant and equipment, the provision for asset retirement obligations and the test for impairment of property, plant and equipment are based on estimates of oil and natural gas reserves, production rates, commodity prices, future costs and other relevant assumptions. By their nature, these estimates are subject to measurement uncertainty and the effect on the consolidated financial statements of changes in such estimates in future years could be significant.

Property, plant and equipment

The Company follows the full cost method of accounting for oil and natural gas exploration and development activities whereby all costs associated with exploring for and developing oil and natural gas reserves are initially capitalized on a country by country cost centre basis.

Capitalized costs include expenditures on acquiring exploration and development licences, land acquisition, geological and geophysical activities, drilling and testing both productive and non-productive wells, acquiring and developing oil and natural gas reserves in place, and financing and administrative costs directly attributable to specific new exploration and development projects until the necessary facilities are completed and ready for use.

Gains or losses are not recognized upon the disposition of oil and natural gas properties unless such a disposition would result in a change in the depletion rate by 20 percent or more.

The costs related to each cost centre are depleted on a unit-of-production basis based on the Company's share of gross estimated proven reserves, before royalties, as estimated by Company and compared to the results of the independent reservoir engineers. Costs of acquiring and evaluating unproved properties and certain costs associated with major development projects are not subject to depletion until proved reserves are assigned and production commences or the costs are impaired.

Property, plant and equipment other than oil and natural gas properties is stated at cost less accumulated depreciation. Depreciation is calculated on a straight-line basis over the estimated life of the assets, which ranges from 3 to 10 years.

The Company assesses the carrying amount of its oil and natural properties for impairment annually or as circumstances dictate. An impairment is deemed to exist when the carrying amount exceeds the estimated undiscounted future net cash flows associated with the Company's proved oil and natural gas reserves. In such situations, the impairment is measured as the excess of the carrying amount over the estimated discounted future net cash flows associated with the Company's proved and probable oil and natural gas reserves. The discount rate used is the Company's risk free interest rate. Any impairment loss is charged to earnings in the period in which the impairment occurs.

The carrying values of unproved properties and major development projects are limited to their net realizable value and

are reviewed at least annually for impairment. Any impairment is charged to earnings in the period in which the impairment occurs.

Cost centres in the pre-production stage are assessed at each reporting date to determine whether it is likely that net costs, in the aggregate, may be recovered in the future. Costs considered unlikely to be recovered are expensed during the period.

Asset retirement obligations

The Company recognizes the fair value of a liability for an asset retirement obligation in the period in which it is incurred with a corresponding increase in the carrying value of the related asset. The fair value is determined on the basis of independent engineering and environmental studies for each well or facility. The liability is subsequently adjusted for the passage of time, which is recognized as accretion expense and included in depletion, depreciation and accretion in the consolidated statement of operations. The fair value of the liability and the carrying value of the related asset are also adjusted due to revisions in either the timing or the amount of the original estimated cash flows associated with the liability. Obligations settled during the period are charged against the liability recorded. Gains or losses on settlement are recognized in the period of settlement.

Interests in joint ventures

The consolidated financial statements include only the Company's proportionate share of assets, liabilities, revenues and expenses from its corporate and unincorporated joint ventures.

Cash and cash equivalents

Cash includes cash on hand and cash with banks. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less.

Inventories and underlift

Inventories, including parts and consumables and crude oil inventories, and crude oil underlifts are recorded at the lower of cost and net realizable value. Cost is determined on a first-in, first-out basis.

Foreign currency transactions

The Company's reporting currency is the United States ("US") dollar as the majority of its transactions are denominated in this currency.

Transactions in foreign currencies are recorded at rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to US dollars at the foreign exchange rate in effect at the balance sheet date.

Income taxes

The Company follows the liability method of accounting for income taxes under which the future tax consequences are recognized for temporary differences between the tax bases of assets and liabilities and their carrying value for financial reporting purposes. Future income tax assets and liabilities are measured using enacted or substantively enacted income tax rates expected to apply in the years in which those temporary differences are expected to reverse. The effect of a change in income tax rates on future income tax assets and liabilities is recognized in the period in which the change occurs.

The Company earns Capital Investment Allowances ("CIAs") on capital expenditures in Nigeria. The future income tax benefits arising from CIAs are recorded when the CIAs are earned and reduce the carrying amount of property, plant and equipment. CIAs are charged to future income tax in the statement of operations as the tax benefits are realized.

Revenue recognition

Oil and natural gas sales are recognized in the consolidated statement of operations when the significant risks and rewards of ownership have been transferred to the buyer, which typically occurs at the lifting date. Revenue from services rendered is recognized in the consolidated statement of operations in proportion to the stage of completion of the transaction at the balance sheet date. Overlifts are accounted for as deferred income.

Substantially all of the Company's operations are conducted under production sharing contracts ("PSCs") with foreign governments. Under the PSCs, the Company and its other non governmental partners, if any, pay all operating and capital costs. Each PSC establishes specific terms for the Company to recover these costs in accordance with a formula based on monthly production volumes ("Cost Recovery Oil") and to receive a share of production in excess of the Cost Recovery Oil ("Profit Oil"). Profit Oil attributable to the government includes an amount in respect of all deemed income taxes payable by the Company under the laws of the respective country. All other government interests, other than income taxes, are considered to be royalty interests.

Derivative financial instruments and commodity contracts

The Company may use derivative financial instruments (forward exchange contracts, interest rate swaps and options) to manage its exposure to market risks resulting from fluctuations in foreign exchange rates, interest rates, and commodity prices. These derivative financial instruments are not used for trading or speculative purposes.

Gains and losses on derivative instruments that are designated as and determined to be effective hedges are deferred and recognized in the period of settlement as a component of the related transaction. If a derivative instrument ceases to be effective as a hedge or is terminated, hedge accounting is discontinued and future gains and losses are recognized in the consolidated statement of operations in the current period.

Derivative instruments that are not designated as hedges for accounting purposes are recorded in the consolidated balance sheet at fair value with any resulting gain or loss recognized in the consolidated statement of operations in the current period.

Comparative figures

Certain figures provided for prior years have been reclassified to confirm to the presentation adopted in 2005.

3 PROPERTY, PLANT AND EQUIPMENT

December 31	2005	2004
Oil and natural gas properties	890,914	730,691
Accumulated depletion	(407,644)	(234,702)
	483,270	495,989
Corporate assets	7,289	4,648
Accumulated depreciation	(3,536)	(2,955)
	3,753	1,693
Balance	487,023	497,682

Included in property, plant and equipment are capitalized loan costs of \$8.3 million (2004: \$0.6 million)

Property, plant and equipment by cost centre is as follows:

December 31	2005	2004
COST CENTRE		
Nigeria	468,289	485,802
Cameroon	5,401	3,321
Gabon	9,580	6,866
Other corporate assets	3,753	1,693
Balance, end of period	487,023	497,682

Included in property, plant and equipment are certain costs not subject to depletion and depreciation as follows:

December 31	2005	2004
UNPROVED PROPERTIES		
Cameroon	5,401	3,321
Gabon	9,580	6,866
MAJOR DEVELOPMENT PROJECTS		
Nigeria	-	184,686
	14,981	194,873

4 ASSET RETIREMENT OBLIGATIONS

The asset retirement obligation movements are as follows:

December 31	2005	2004
Balance, beginning of period	12,268	11,953
Asset retirement obligations incurred	10,912	-
Revisions of previous estimates	-	(698)
Accretion expense	2,086	1,013
Balance, end of period	25,266	12,268

5 LONG-TERM DEBT

Debt financing is provided through a syndicated \$300 million senior secured reducing revolving credit facility (the "Facility"). The Facility expires on December 31, 2008. The borrowing base is re-determined semi-annually based on an independent engineer's evaluation of the Company's oil and natural gas reserves, subject to the approval of the syndicate.

The amounts drawn under the Facility bear interest at floating rates linked to LIBOR plus a margin determined in relation to the percentage of utilization of the Facility on the first day of the interest period. The Facility is secured by debentures given by the Company, assignment of the Company's principal contracts, a pledge over the bank accounts and share pledges of the Company's principal subsidiaries.

At December 31, 2005, the amount outstanding under the Facility was \$80 million (December 31, 2004 - \$65 million).

6 SHARE CAPITAL

December 31	2005	2004
Authorized: unlimited number of common shares		
Issued and outstanding		
60,030,000 common shares	20,010	20,010

In 2004, the issued and outstanding common shares were converted on a three-for-one basis.

7 EARNINGS PER SHARE

Per share information is calculated on the basis of the weighted average number of common shares outstanding during the fiscal period, being 60,030,000 for all periods presented. There are no potentially dilutive shares for all periods presented.

8. PENSION PLANS

The Company has two pension plans.

The employees of Addax Petroleum Development (Nigeria) Ltd. ("APDNL"), a wholly-owned subsidiary of Addax, have a defined benefit plan (the "Nigerian Plan") in which the assets are held in a separate trustee administered fund. The employees of the Geneva branch of Addax Petroleum Services Ltd., a wholly owned subsidiary of the Company, have a defined benefit plan (the "Swiss Plan") complying with the legal requirements of Switzerland in which the assets are held and administered in a separate insurance company. These pension plans are funded by payments by each relevant company, taking into account the respective legal requirements.

The pension costs are accounted for using the projected benefits method whereby the costs are amortized over the service life of the employees in accordance with the advice of qualified actuaries.

For Nigerian staff, there is also a gratuity plan funded by APDNL. The plan provides employees who retire at age 60 and who

have at least 10 years continuous service with a lump sum payment of 5% of pensionable pay for each year worked to a maximum of 24 months of monthly base salary. The projected benefits method has been used to calculate the liability.

Information relating to the Company's defined benefit pension plans is shown in the following tables:

Benefit plan expense December 31	Swiss Plan		Nigerian Plan	
	2005	2004	2005	2004
Employer current service cost	(1,662)	(1,003)	(456)	(467)

9 INCOME TAXES

The majority of the Company's taxable operations are located in Nigeria under PSCs with the Nigerian government. The deemed income tax rate in the Nigerian PSCs is 60%. The provision for income taxes varies from the amounts that would be computed by applying the combined income tax rates set out in the PSCs to net income before provision for income taxes for the following reasons:

Year ended December 31	2005	2004	2003
Income before provision for income taxes	649,039	233,107	153,068
Tax at 60%	389,423	139,864	91,841
ADJUSTMENTS TO INCOME TAXES			
Non deductible costs	71,105	47,115	33,020
Non taxable revenues	(486)	(2,518)	(1,905)
Enhanced tax allowances	(29,507)	2,193	-
Adjustments in respect of prior years	-	4,643	4,067
Tax allowances not recoverable	9,600	(22,064)	-
Deduction for countries with lower tax rates	2,834	1,250	344
Provision for income taxes	442,969	170,483	127,367

Components of future income taxes

December 31	2005	2004
THE NET FUTURE TAX LIABILITY IS AS FOLLOWS		
Differences between tax base and reported amounts of depreciable and depletable assets	107,135	107,414
Other	(14,042)	(18,865)
Future income tax liabilities	93,093	88,549

December 31	2005	2004
FUTURE INCOME TAX ASSETS ARE AS FOLLOWS:		
Differences between tax base and reported amounts of depreciable and depletable assets	133,596	15,990
Other	22,288	-
Future income tax assets	155,884	15,990

10 INVENTORIES

December 31	2005	2004
Oil products	19,269	1,709
Materials and supplies	43,484	15,088
	62,753	16,797

11 FINANCIAL INSTRUMENTS

Market risk

The Company's activities expose it to a variety of market risks, including the effects of changes in commodity prices, foreign currency exchange rates and interest rates. The Company uses derivative financial instruments such as options on commodities, foreign exchange contracts and interest rate swaps to manage certain exposures.

The Board of Directors provides principles for overall risk management, as well as policies covering specific areas, such as commodity price risk, foreign exchange risk, interest rate risk and credit risk. These principles include guidelines on the use of derivative financial instruments.

a) Commodity price risk

It is the intention of the Company to cover commodity-pricing exposure in order to safeguard a minimum cash income. The option contracts run for 12 months or less. At December 31, 2005, the Company had the following crude oil derivative contract outstanding:

	Put option
Maturity	March 31, 2006
Volume	27.4 mbbls/d
Average price	\$21.00 per barrel

The estimated fair value is disclosed in section (e) below.

b) Foreign exchange risk

The Company operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the Swiss francs (or "CHF") and the Nigerian naira against the US dollar. The Company uses both local currency borrowing facilities and forward contracts to hedge their exposure to foreign currency risk. The forward currency contract must be in the same currency as the hedged item.

In December 2005, the Company entered into foreign exchange forward contracts to purchase CHF 18,000,000 for \$14,311,988 for the year ending December 31, 2006. These forward contracts fix the exchange rate used to convert a portion of the Company's Swiss franc denominated general and administrative expenses to US dollars. These contracts have not been designated as hedges for accounting purposes. Estimated fair values on these contracts at period end are disclosed in section (e) below.

c) Interest rate risk

The Company's exposure to market risk for changes in interest rates relates primarily to the Company's long-term debt obligations.

To manage this risk in a cost efficient manner, the Company enters into interest rate swaps, in which the Company agrees to exchange, at specified intervals, the difference between fixed and variable interest amounts calculated by reference to an agreed-upon notional principal amount. These swaps are designated to hedge cash outflows related to interest obligations.

These contracts have not been designated as hedges for accounting purposes and expired in August 2005.

d) Credit risk

Concentrations of credit risk with respect to accounts receivable are limited due to the high portion of amounts due from related parties. Of the Company's significant individual accounts receivable at December 31, 2005, approximately 82% was due from one related party customer (December 2004 – 59%). Historical experience has indicated no problem in collecting accounts receivable from related companies. Therefore, management believes there is no significant credit risk inherent in the Company's accounts receivable, beyond amounts provided for in doubtful accounts.

e) Liquidity risk

The following table sets out the estimated fair values of purchased derivative financial instruments recognized in the consolidated balance sheet in accounts receivable and accounts payable with resulting gains and losses being recognized in other interest and finance charges in the statement of operations. These contracts have not been designated as hedges for accounting purposes.

December 31	2005
Currency forwards	571
Oil options	–
Interest rate swaps	–

The fair values of other financial instruments including cash and cash equivalents, accounts receivable, accounts payable and other long-term liabilities approximate their carrying values due to the short term to maturity of these items. The fair value of long-term debt approximates its carrying value as it is subject to a floating market rate of interest.

12 CASH FLOWS*a) Items not affecting cash*

Year ended December 31	2005	2004	2003
Future income taxes	93,912	30,064	25,656
Non-controlling interest	–	–	2,361
Depletion and depreciation	173,460	81,043	64,975
Change in fair value of derivatives	(170)	(1,021)	(287)
Other items, including foreign exchange	(5,083)	(1,673)	2,539
Total items not affecting cash	262,119	108,413	95,244

b) Changes in non-cash working capital

Year ended December 31	2005	2004	2003
Accounts receivable	(68,275)	(26,507)	1,209
Prepaid expenses	(1,470)	(5,951)	13,451
Inventories	(38,750)	(1,150)	2,566
Other current assets	–	2,000	(2,000)
Accounts payable and accrued liabilities	16,806	96,379	45,654
Tax and royalties payable	82,570	(11,078)	39,898
Deferred revenue	(1,250)	(3,064)	–
Other long-term liabilities	0	5,173	–
Changes in non-cash working capital	(10,369)	55,802	100,778

c) Other cash flow information

Year ended December 31	2005	2004	2003
Interest paid	(9,991)	(756)	(508)
Income taxes paid	(8,305)	(36,889)	(61,813)

13 INVESTMENT IN JOINT VENTURE

The Company is the operator of an unincorporated 60% joint venture in Cameroon and has an unincorporated joint venture interest of 47.5% in Gabon. Included in the consolidated financial statements are the following items that represent the Company's interests in the jointly controlled assets, liabilities, revenues and expenses of the joint ventures.

December 31	2005	2004
Non-current assets	14,982	10,390
Current assets	6,749	2,832
Non-current liabilities	-	-
Current liabilities	(40,683)	(21,263)
Net liabilities	(18,952)	(4,222)
Income	-	-
Expenses	10,915	-

14 OTHER LONG-TERM LIABILITIES

December 31	2005	2004
Pension liabilities	937	3,778
Other liabilities	3,972	3,094
	4,909	6,872

15 COMMITMENTS

Future total commitments relating to Floating Production, Storage and Offloading vessel ("FPSO") leases and exploration and development activities, after December 31, 2005 are as follows:

2006	352,865
2007	78,929
2008	92,098
2009	45,858
2010	34,556
Thereafter	117,017
Total	721,323

Included in the above table are commitments for the hire of three FPSO vessels ranging from one to eight years.

In addition to the above, the Company has the following work commitments:

Under the Cameroon concession contract there is a first phase work commitment of \$22 million over a three year period, commencing on April 19, 2004, being the date of issuance of the Exploration Authorization by the Cameroon government. The Company has the right to extend the exploration period by an additional two phases of two years each. These additional phases have additional work commitments.

16 CONTINGENCIES

Given the nature of the business, the Company is exposed to the possibility of environmental damage arising from its exploration, development and production activities. The Company is responsible for any liabilities arising from such events and has developed a series of strict operating procedures to protect the environment.

Various legal actions arising in the normal course of business have been commenced in Nigeria against the Company. It is the view of management that most of these actions are without any foundation and the Company has provided \$300,000 as its best estimate of losses under these actions.

The Company is liable to pay early termination penalties on its FPSO lease contracts. As at December 31, 2005, the maximum contingent liability arising from early termination of these contracts amounted to \$188.6 million.

The Company's income tax filings are subject to audits by taxation authorities. There are audits in progress and items under review, some that may increase the tax liability. In addition, notices have been filed objecting certain issues. While the results of these items cannot be ascertained at this time, it is believed that there is an adequate accrual for income taxes based on available information.

17 RELATED PARTY TRANSACTIONS

The following transactions took place between the Company and AOG and its other subsidiary companies:

December 31	2005	2004	2003
Sales to Addax B.V.	693,856	371,444	386,613
CHARGES			
Addax Bunkering Services	(7,625)	(10,406)	-
AOG Advisory Services Ltd, London	(2,244)	(2,309)	-
AOG	(500)	(500)	(3,860)
Addax B.V.	(4,692)	(1,067)	-
Other items	(275)	(1,141)	(1,894)
Interest and related charges	-	-	(47)

The sales to Addax B.V., the sole marketer of the Company's crude oil (net of NNPC liftings), were made on the same terms and conditions as with Addax B.V.'s non-related customers. The charges from AOG include management services, trademark licence and information technology support. Charges from Addax Bunkering Services are for the purchase of fuel for the Company's bunkering operations. Other items include charges from Addax Limited for the refund of services paid on behalf of the Company. Addax BV and Addax Limited are subsidiaries of AOG.

Amounts due from (to) related parties as included in accounts receivable and accounts payable in the consolidated balance sheet are as follows:

December 31	2005	2004
Addax BV	109,694	38,936
AOG	281	100
Other	(2,943)	9,736

18 EVENTS SUBSEQUENT TO DECEMBER 31, 2005

Addax Petroleum Corporation ("APC"), a Canadian corporation, was established in 2005. In the first quarter of 2006, APC became the direct parent company of the Company.

On February 16, 2006, APC was listed on the Toronto Stock Exchange by way of an Initial Public Offering ("IPO"). Pursuant to the IPO, APC raised \$355.1 million (CDN\$409.5 million) of which:

- \$17.6 million (CDN\$20.5 million) was used to pay expenses related to the IPO; and
- \$48.2 million (CDN\$55.6 million) and 117,000,000 common shares of APC were given to acquire all of the issued and outstanding common shares of Addax Petroleum NV previously held by AOG.

On February 24, 2006, an over-allotment option held by the underwriters was exercised yielding net proceeds of \$33.7 million (CDN\$38.9 million) (gross proceeds totaled \$35.5 million (CDN\$41.0 million)).

Total net proceeds from the IPO, the over-allotment option and the share purchase amounted to \$322.9 million (CDN\$372.4 million).

In March of 2006, APC has entered into three PSC's with the Joint Development Authority (JDA). The JDA administers the Joint Development Zone (JDZ) between Nigeria and Sao Tome e Principe. The three blocks awarded were JDZ 4 (APC as operator with a share of 33%), JDZ 3 (APC non-operated share of 15%) and JDZ 2 (APC non-operated share of 14.33%). The initial commitments are for JDZ 4: \$23.4 million signature bonus, and a minimum work commitment including carry costs of \$45.0 million, for JDZ 3 a \$2.0 million signature bonus and a minimum work commitment including carry costs of \$15 million and for JDZ 2 a \$8.3 million signature bonus and a minimum work commitment including carry costs of \$12.9 million.

FOUR YEAR FINANCIAL SUMMARY

	2002	2003	2004	2005
Petroleum sales	284,062	381,848	524,093	1,219,128

Current assets less current liabilities	7,099	(63,665)	(166,420)	(146,019)
Long term loans	(25,000)	—	(65,000)	(80,000)
Other long term liabilities	(94,633)	(105,212)	(107,689)	(123,268)
Shareholders' equity	138,185	143,689	177,313	298,383

As part of the recent IPO, the historical accounts of APNV were re-audited and prepared under Canadian GAAP limited to the years ended December 31 2002, 2003 and 2004.

RESERVES SUMMARY

The oil reserves stated below have been estimated independently by Netherland, Sewell and Associates ("NSAI") and prepared in accordance with National Instrument 51-101 of the Canadian Securities Administrators. Addax Petroleum has not prepared reserves for prior years to this reporting format. Accordingly reconciliation to prior year reserves is not included.

1.07. Enforcement

- Personal Obligation to Report Violations
- Corrective Actions
- Discipline

APC Code of Conduct 09/05/06

Purpose

- Provide common standard for all APC employees and contractors to guide them in the performance of their duties and in their dealings with agents, customers, suppliers and others.
- Establish consistency and minimum requirements for additional standards. Which may be developed at Corporate or local affiliates level.

Applicability

- Make sure you understand the content and spirit of this Code
- Request explanations from your manager, if you do not understand this Code
- See section 1.07 for enforcement

Implementation responsibilities

- Executive Management is responsible for communicating and implementing this Code
- Department managers are responsible for the enforcement of this Code and must ensure that every employee understands and applies it
- Employees must acknowledge to Executive Management having received and understood this Code.

Dispute resolution

- Corporate Secretary will arbitrate disputes or misunderstanding arising from or in connection with interpretations and/or implementation with appeal to the Chairman of the Board if appropriate

Updates to this Code

- The Board of APC is responsible for reviewing and adapting this Code on a regular basis to reflect changes in circumstances.
- You are encouraged to submit any changes or corrections you consider appropriate to the Corporate Secretary by email.

Mission and Value Statement

- APC has the vocation of being a leading independent E&P company.
- We want our economic and commercial partners, our employees and shareholders to benefit from our activities.
- We want to reinforce our relations with our partners based on both our principles of integrity and professionalism and on our long-term investment policy.
- We want to face the challenge of profitability and associated risks through rigorous management and a physical presence in our principal markets.
- APC continues to develop thanks to its initiative and creativity.
- Our employees are the guarantors of our continued collective success.
- We want to promote a working environment based on good communication and mutual respect

Leadership Responsibility

Our managers must set the example, be in every respect a model for their employees, meeting their responsibilities, and behaving ethically in the pursuit of the APC's business objectives.

Fundamental Commitments to our stakeholders

Clients	We provide quality goods and services, delivered promptly and cost-effectively
Colleagues	We treat all colleagues with fairness, dignity and respect. We provide them with opportunities to develop professionally, and to work in a healthy team environment
Contractors	We provide clear objectives and assist them with professional support
Regulators	We comply with all rules and regulations and provide statutory filings on a timely and accurate basis
Joint venture partners	We respect our obligations in a manner that reflects the mission and values of each of our business units
Suppliers	We accept fair competition among prospective suppliers and the sense of responsibility required of a good customer. We encourage our suppliers to adopt their own set of comparable standards.
Shareholders	We are committed to the highest standards of professional management

Policy

- o Dealing correctly with customers, suppliers and government agencies is important. Therefore a strict ethical approach must be adopted by all our employees and contractors.
- o APC encourages transparent business relationships and mutual respect between employees and business partners
- o Any habits and practices, which differ from the procedures set out below must be formally notified to and approved by the Corporate Secretary prior to any contravention occurring
- o Guidance is always available from the Corporate Secretary

Procedures

Receiving Business Courtesies	You may receive gifts, accept invitations to attend social events in order to develop you business relationships, provided:- <ul style="list-style-type: none">o The cost associated with such a gift or event is reasonable and appropriate, which, as a general
-------------------------------	---

rule, can be used at your desk or consumed in one sitting

- o No excessive travel costs are incurred
- o Such events are infrequent, i.e. maximum 4 times p.a. with the same business partner
- o No acceptance of cash is ever tolerated

Giving Business Courtesies

You may organise social events to develop your business relationships, provided:-

- o These events do not include expenses paid for any travel costs
- o The cost must be reasonable and appropriate. Employees should refer to their direct Manager, who shall decide according to his/her budget
- o Such events are infrequent, which, as a general rule, means not more than 4 times a year with the same business partner
- o You may not organise business entertainment which might be considered lavish
- o You will comply with all rules and laws issued by government administrations regarding gifts, meals, and other business courtesies for government employees

Selecting Suppliers

- o You must treat suppliers with the same care and respect as our customers
- o You must select contractor, suppliers and vendors on the basis of objective criteria, including quality, technical excellence, price delivery, adherence to schedules and service.
- o You will make your purchasing decisions based on the supplier's ability to meet our needs, and not on personal relationships or friendships
- o You will always employ the highest ethical standards in business practices in the negotiation, awarding of contracts and the administration of all purchasing activities.
- o You shall never slander a supplier's performance

Suppliers' discounts or price improvements

- o Any discount or price improvement received from suppliers or any other contractor is for the benefit of the APC company contracting

Government Relations and Political Activities

1. Corporate
You must comply with every local law governing political activities.
 - o You shall not use the APC's funds or resources for political purposes without formal approval of the Corporate Secretary.
 - o You shall not engage in public discussions or debates, unless your expertise is in the interest of a larger public, and your participation has been approved by the Corporate Secretary

- You may support trade associations, which promote objectives similar to those defined by APC.
- In communications with government officials on behalf of APC, ensure you are familiar with local practices and observe them

2. Personal:-

- You may, of course, participate in the political process at a personal level under the following conditions:-
 - Participate on your own time and at your own expense
 - Don't use corporate resources, such as e-mail, telephone, photocopy services, etc.
 - Never give the impression you are speaking on behalf of APC.

Handling of confidential information from third parties

- You must take care to handle the confidential information of others responsibly, as it may be a trade secret or protected intellectual property
- Before using confidential information received from third parties, you must inform the Corporate Secretary in order to obtain guidance

Hiring relatives

APC discourages employment of any individuals known to be related, by blood, marriage or adoption to any person who is an employee, director, shareholder, client or contractor of APC. You may not hire related individuals unless you receive written approval from:-

- Corporate Secretary in case of directors and shareholders or
- Company local Manager in all other cases including contractors.

Hiring of former and/or current government officials

Employment of government officials and their families may contravene laws or regulations concerning conflicts of interest:-

- You may not recruit or employ any former or current government officials unless written approval from the Corporate Secretary is obtained.

Harassment and workplace violence

APC is committed to an environment free of harassment and disruptive behaviour:-

- You shall not make degrading or humiliating jokes, slur, intimidate, or engage in other forms of harassment.
- Workplace violence, fraud, theft, stalking, and hate crimes, relating to race/religion, are not tolerated
- You shall not possess firearms, other weapons, explosive devices, or other dangerous materials on the Company's premises
- You shall immediately report any form of

harassment or violence, you might experience, to your direct Manager or to CorpHR in case of conflict with direct Manager.

Mobbing

APC applies local anti-mobbing laws and does not tolerate any mobbing activity directed against any of its employees. The following preventive or corrective actions are encouraged:-

- o Direct and Executive Management should anticipate conflicts in Departments or between employees.
- o Employees who are victims of mobbing may report to their direct Manager or to CorpHR in case of conflict with direct Manager.
- o Direct Managers and CorpHR will treat each case as a matter of priority, and with as much tact and discretion as possible.

"Mobbing" is a workplace-related psychological problem also referred to as "ganging up on someone", "bullying", "harassment" or "psychological terror". Psychological terror or mobbing in working life involves hostile and unethical communication which is directed in a systematic manner by one or more individuals, mainly toward one individual.

Policy

- o APC's assets including time, materials, supplies, equipment and information may be used only for professional purposes and must be protected with care.
- o Private usage is tolerated in certain cases where no cost and risks are incurred, and the productivity of APC is not affected.
- o APC's assets shall not be misappropriated, loaned to others or donated, without appropriate authorisation.
- o Any assets owned or rented by APC, which have been made available to employees, must be returned, prior to leaving APC employment.
- o APC funds shall not be used, directly or indirectly, for illegal or otherwise inappropriate purposes of any kind.
- o No financial commitments shall be entered into with written authorisation and in accordance with the APC's Authority Table described in the "Finance" Policies and Procedures.

Procedures

Authorisation & Approval

Funds should be utilised for the maximum benefit of APC, in particular:-

- o You shall not approve payments, where you know or suspect that such payment is to be used for an illegal or inappropriate purpose.
- o You shall not approve any transactions which are outside your authority limit as detailed in the Authority Table included in the Finance Policies & Procedures

APC Code of Conduct 09/05/06

Accounting practices

Financial information must reflect actual transactions. No undisclosed or unrecorded funds or assets may be established:

- o You shall fully, properly and accurately record all transactions in APC's books and records
- o You shall not make any false or misleading entries in the books, records or accounts of APC.
- o You must record all funds, assets, payments or set-offs with appropriate supporting documents
- o You must process all transactions in a timely fashion

Computers, portables, software, company cars and other equipment

Any equipment, software or other facilities put at your disposal remain the portables, software, property of APC:

- o You have the obligation to care for APC equipment assigned to you and to use it in a responsible manner.
- o If you take your equipment home or travel with it, take sufficient precautions to protect it from theft or damage, just as if it were your own.
- o You may not copy APC owned software and information for your private use
- o You may not use APC cars for other purposes than in the strict exercise of your function. Private usage is tolerated if provided for in the employment contract or in your employee code of conduct

Use of e-mail

APC IT may check and filter electronic messages sent or received by using key-words without seeking at this stage to identify the employee. However, if Executive Management has serious indications that e-mails have been misused or used against its interest, any public prevailing interest or any applicable law, APC is entitled to investigate *further*, to identify the employee who is sending or receiving such e-mails and to take appropriate action.

- o You shall not make disparaging comments against others
- o Copy only those persons on e-mails who need to know in order to do their jobs
- o Do not forward or send e-mails containing confidential information outside the APC messaging system. If necessary, confirm with your Manager that the appropriate agreements are in place before sending confidential information over the internet
- o You shall not use APC e-mails for private business
- o You shall not use the APC e-mail system to send or forward illegal, obscene, or offensive messages or files
- o You shall not use the APC e-mail system to express personal or other people's opinions on subjects that are not strictly related to the business of APC

APC Code of Conduct 09/05/06

- Liability of APC shall be refused in case of misuse of electronic mail

Use of Internet

The use of such systems is exclusively for professional purposes. Use for personal or career development is tolerated, provided that

- It does not disrupt APC's normal business or reduce productivity
- You comply with this code, all applicable laws, your employment contract or
- Any other local codes or regulations.
- You shall not offend or hinder the development of other employees.
- You use such equipment outside normal working hours
- Liability of APC is excluded in case of misuse of Internet

APC may restrict access to any site at any time and without notice, if it considers a site to be illegal, offensive or inappropriate for commercial use of the community represented by APC.

Copyrights

You shall only use copyrighted materials as required by your duties and in accordance with APC's policy on such matters.

Sales Representatives Agents , and Consultants

We expect a very high ethical standard of behaviour from our representatives,

- You shall not use the funds and assets of APC, directly or indirectly, for payments, which are illegal or which are against APC's interests
- You shall not enter into any agreement on behalf of APC unless specific and formal authority has been granted by an authorized person.
- You shall not enter into any agreements with dealers, distributors, agents or consultants, which are not in compliance with the applicable laws of the Country concerned or which do not apply market rates.
- You shall spend only reasonable and necessary expenses on Business-related travel, entertainment, etc.

Protecting APC Confidential Information

Confidential information is a valuable asset. Although you may use confidential information to perform your job, it must not generally be shared with other employees.

- You are not entitled to disclose confidential information to third parties unless they have a legitimate need to know this information and have signed a confidentiality agreement
- You must protect confidential information, such as databases, commercial relationships, techniques used, studies performed, financial data, plans for mergers and acquisitions, marketing strategy, product launch dates, restructuring, etc.
- You shall not disclose confidential information to any

person other than in the proper discharge of your duties

- o You should only disclose confidential information after having carefully considered its potential benefits and risks. When in doubt, ask the Legal Department to confirm that all parties have signed a confidentiality agreement where appropriate.

You shall comply at all times with APC's Policy and Guidelines Regarding Confidential Information and Insider Trading

Accuracy,
Retention, and Disposal
of
Documents and
Records

You are responsible for the integrity, accuracy and filing of letters, memos, e-mails, contracts, invoices, accounting documents, files on electronic media, etc. order to:

- o Assure protection of records from unauthorised retrieval
- o Ensure proper storage of documents in compliance with regulatory and legal requirements
- o Ensure proper documentation is available to support business transactions
- o Avoid falsification of any record or document
- o Dispose of documents that are no longer useful and do not need to be retained in accordance with APC and legal requirements of each country.

Policy

APC will comply with all applicable laws and regulations

Procedures

Legal and
Regulatory
compliance

You will comply with all applicable laws and regulations:

- o Traders, operators, financial, administrative and accounting staff must be reasonably familiar and ensure compliance with laws and regulations relating to their particular field of activities
- o In case of doubt, the Legal Department has to be contacted for clarification
- o You must immediately report violations or suspected violations to your direct Manager
- o Under the authority of your direct manager, you will co-operate with and be courteous to all official regulators:
 1. Requests for information will be answered with complete, factual, and accurate information
 2. You must never conceal, destroy, or alter any document, lie, delay the communication of information or make misleading statements

Free and Fair
Competition

Antitrust laws are designed to create a level playing field in the marketplace and to promote fair competition. These laws could be violated by discussing the Company's business with a competitor, such as how our prices are set, disclosing the

terms of supplier relationships, creating cartel strategies i.e. allocating markets among competitors, or agreeing with a competitor to refuse to deal with a supplier

- You must be committed to obey both the letter and the spirit of any applicable law
- You should ensure that you have basic knowledge of applicable "antitrust", "competition", and "consumer protection" laws.
- At trade association meetings, be alert to potential situations where it may not be appropriate for you to participate in discussions regarding prohibited subjects with our competitors. Prohibited subjects may include any aspect of pricing, our services in the market, key costs such as labour costs, and marketing plans.
- In general, avoid discussing sensitive topics with competitors or suppliers, and do not provide any information in response to an oral or written inquiry concerning antitrust matters unless you are proceeding with the advice of the Corporate Secretary and or the Legal Department
- You should advise the Legal Department immediately when questionable or unclear situations arise.

Money laundering and anti-corruption

- You must obey both the letter and the spirit of any applicable money laundering or anti-corruption law.
- You should ensure that you have basic knowledge of applicable money laundering or anti-corruption laws
- You should advise the Legal Department immediately when questionable or unclear situations arise.

Marketing & advertising

APC may use marketing and advertising activities to educate the public, provide information to the community, increase awareness of our products and services and to recruit colleagues:

- You shall present only truthful, fully informative, and non-deceptive information in marketing materials and announcements

Insider Information and securities trading

You shall comply at all times with APC's Disclosure Policy and Policy and Guidelines Regarding Confidential Information and Insider Trading

Environmental Compliance

APC complies with all applicable environmental laws and regulations

- You shall preserve natural resources whenever possible

APC Code of Conduct 09/05/06

- You shall comply with all local applicable laws and operate each of our facilities with the necessary permits, approvals, and controls
- You will diligently employ the proper procedures with respect to handling and disposal of hazardous and bio-hazardous waste including but not limited to petroleum products waste
- You shall immediately alert managers to any situation regarding pollution risk such as the discharge of a hazardous substance, improper disposal of petroleum waste, etc.
- You shall immediately report incidents, which may be potentially damaging to the environment to your Manager, who shall consult the Legal Department in order to take appropriate actions

Policy

- Outside activities, personal interests or friendships must never influence our employees' ability to make objective decisions in the course of their professional responsibilities or mandates
- The demands of any outside activity shall never hinder or distract our employees from the performance of their job or instigate them to use APC resources for other than APC purposes
- It is our employees' responsibility to ensure they remain free of conflicts of interest in the performance of their duties. Any uncertainties about whether an outside activity might constitute a conflict of interest, must be approved by their manager before pursuing the activity.

Procedures

Secondary employment

Avoid even the appearance of impropriety. If your objectivity, or the timely or effective performance of your job is affected:

- Disclose formally to your manager all secondary employment or personal financial interests, which may conflict with the APC's interests. Any remuneration for secondary employment shall be communicated to the Corporate Secretary.
- Do not sign any contract on behalf of APC with a company or any organisation in which you may have a personal interest.
- Obtain prior formal approval from Corporate Secretary, if such situation is unavoidable or is in the interest of APC

Personal Financial Interest

Avoid even the appearance of impropriety. If your objectivity, or the timely or effective performance of your job is affected:

- You must not have any interest in any company, supplier or customer of the Company, where such interest could

APC Code of Conduct 09/05/06

- compromise your objectivity or loyalty to APC.
- You must not cause or influence APC to do business with any company in which you, a relative, or friends have an interest.
- If an instance occurs where it is in APC's advantage to enter into such a transaction, you should ensure that the terms of the transaction are determined by competitive bidding, clearly establishing an arm's length fairness of terms.
- You may not sit in a board of directors of non APC companies, unless Corporate Secretary gives you written authorisation to do so.

Policy

- Communicate promptly to your direct Manager, to the Human Resources Department or to the Legal Department any events or transactions that violate this Code of Conduct
- Adherence to the Code of Conduct is the responsibility of each employee/contractor and is a condition of continued employment
- The Corporate Secretary can always be contacted confidentially (+41 22 702 95 25) if for any reason you do not feel comfortable in discussing an issue with any other person.

Personal Obligation to Report Violations

- You have an individual responsibility for reporting any activity by any colleague, consultant, contractor, subcontractor or vendor that appears to violate laws, rules and regulations or this Code of Conduct
- Whenever possible, you shall first report or solve problems, including human resources-related issues, at a local level with your direct Manager or the local General Manager.
- More complex situations may be addressed to the Corporate Human Resources Manager or the Corporate Secretary.
- The Corporate Secretary will make every effort to keep confidential, within the limits of the law, the identity of any individual who reports possible misconduct. No retribution or disciplinary action will be taken against anyone who reports a possible violation in good faith.

Corrective Actions

- The Corporate Secretary will investigate all reported concerns promptly and confidentially to the extent possible and recommend the appropriate corrective action.

Discipline

Violations of this Code of Conduct will be subject to disciplinary actions, and will

- Depend on the nature, severity, and frequency of the violation and may result in any or all of the following disciplinary actions:
 1. Oral warning
 2. Written warning

APC Code of Conduct 09/05/06

3. Suspension
 4. Termination or
 5. Denunciation by APC to any regulatory body or public prosecutor if required by law
- o Automatically be included in the employee's file in writing
 - o Be dealt with by the following level of management depending on the employee's position

<i>Employee position</i>	<i>Investigating Authority</i>	<i>Arbitrator</i>	<i>Must be informed</i>
1. Below Grade 7	Direct Manager	Corporate Secretary	CEO
2. Grades 7,8 &9	Corporate Secretary	CEO	Board
3. Corporate Officers	CEO	Board of Directors	
4. CEO	Board of Directors	Board of Directors
