CSI Receives C\$7.3M on Sale of Telular Shares, Sells Asset Link Business

Calgary, Alberta – December 20, 2006 - (TSX:CSY): CSI Wireless Inc., a designer and manufacturer of advanced GPS products, today provided an update on the wind-down of its discontinued Wireless operations.

The Company announced that it has sold 1.9 million shares of Telular Corp. for net proceeds of approximately C\$7.3 million. Telular issued the shares to CSI Wireless in May 2006 as a component of the consideration for Telular's acquisition of CSI's fixed wireless business.

The Company also announced that it has completed the sale of the assets associated with its Asset-Link Telematics business to CHI-Agra Products Inc., of Vancouver, Canada. At closing, the Company received cash and a short-term promissory note totaling US\$100,000 and has the potential to earn US\$250,000 based on the volume of Asset-Link products sold by CHI-Agra. Under this agreement, CHI-Agra takes on the responsibilities for ongoing customer support.

"We are pleased to report significant progress in completing our wind-down activities as we had committed," stated Steven Koles, Chief Executive Officer of CSI Wireless. "We will move into 2007 with a strong balance sheet, clean and efficient operations and a dedicated focus on our market-leading Hemisphere GPS products and technologies."

About CSI Wireless

CSI Wireless designs and manufactures innovative, cost-effective GPS products for applications in agriculture, marine and other markets. CSI is a leader in several high-growth markets. The Company owns leading brand names, numerous patents and other intellectual property. The Company's head office is in Calgary, Alberta, and it has major product development and sales and marketing facilities in Arizona, Kansas and Texas. Hemisphere GPS, a Division of CSI Wireless, Introduces New SBX-4 DGPS Beacon Module

Calgary, Alberta – November 28, 2006 - (TSX:CSY): CSI's Hemisphere GPS division, a global manufacturer of GPS products, has announced the introduction of its new SBX-4 differential GPS (DGPS) beacon module. The SBX-4 is the newest DGPS beacon module in Hemisphere GPS' SBX series, the world's most popular DGPS beacon modules.

The SBX-4 is designed for use by Original Equipment Manufacturers (OEM) who need to integrate a versatile precision beacon receiver module into their product.

"The new SBX-4 adds to our company's history of leadership and success in beacon products," said Steven Koles, President and CEO of Hemisphere GPS. "The SBX-4 is one of the few OEM products on the market that is IEC 61108-4 compliant and fully compatible with the beacon radio navigation networks."

The SBX-4 DGPS Beacon Module features:

- Dual channel design allowing for strongest signal or new closest station (database) tracking
- Patented ceramic filter blocks out-of-band signals to optimize reception
- Reverse compatibility simplifies integration with products based on the existing SBX-2 and SBX-3 modules
- Boot loader ensures firmware upgrade reliability
- Dual serial ports to accommodate separate RTCM and NMEA communications
- Certified IEC 61108-4 and RoHS compliant

The SBX-4 is a seventh generation differential radio beacon receiver that is designed and manufactured by Hemisphere GPS. It is a compact module that receives GPS differential correction data broadcast through a worldwide network of beacons. It is fully backward compatible with previous SBX modules and complies with the new IEC 61108-4 beacon standard for improved performance and additional features.

Hemisphere GPS has integrated the SBX-4 into several products including the new Crescent R110 DGPS Receiver.
