This communication contains forward-looking information and statements about ScottishPower plc. and Iberdrola S.A. and their combined businesses after completion of the proposed Acquisition. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expects," "anticipates," "believes," "intends," "estimates" and similar expressions. Although the managements of ScottishPower plc. and Iberdrola S.A. believe that the expectations reflected in such forward-looking statements are reasonable, investors and holders of ScottishPower plc. and Iberdrola S.A. shares are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of ScottishPower plc. and Iberdrola S.A., that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include those discussed or identified in the public documents sent by ScottishPower plc. and Iberdrola S.A. to the Comisión Nacional el Mercado de Valores and under "Risk Factors" in the annual report on Form 20-F for the year ended March 31, 2006 filed by ScottishPower plc. with the SEC on June 30, 2006. Except as required by applicable law, neither ScottishPower plc. nor Iberdrola S.A. undertakes any obligation to update any forward-looking information or statements.

28 November 2006

PRESS
Release

 IBERDROLA

After the meetings of their respective Boards of Directors held yesterday afternoon

**IBERDROLA REACHES MERGER
AGREEMENT WITH SCOTTISHPOWER
FOR € 17.2 BILLION**

**THE TRANSACTION WILL CREATE A EUROPEAN LEADER WITH
AN ENTERPRISE VALUE OF €64 BILLION**

- Under the terms of the transaction, ScottishPower shareholders will receive 400 pence per share in cash and 365 pence per share in new IBERDROLA shares. In addition, they will receive an extraordinary dividend of 12 pence per share
- The new group will have installed capacity of 36,600 megawatts (MW), of which over 6,000 MW will be renewable, and its electrical supply points will total 21.4 million
- The Board of Directors of ScottishPower considers the terms of the takeover bid fair and reasonable and intends to recommend it unanimously to its shareholders

The Boards of Directors of **IBERDROLA** and **ScottishPower**, meeting yesterday in Madrid and Glasgow respectively, have reached agreement on the terms of an offer that ScottishPower's top corporate governing body will recommend unanimously to its shareholders for the sale of the company to the Spanish utility.

According to the terms of the agreement, the shareholders of **ScottishPower** will receive 400 pence in cash and 0.1646 new shares of **IBERDROLA** (valued at 365 pence based on yesterday's closing price) for each of their shares. (Holders of ScottishPower ADS's will receive 1,600 pence and 0.6584 new shares of IBERDROLA per ADS.)

In addition, before the transaction is completed, **ScottishPower** will approve an extraordinary dividend of 12 pence per share (48 pence for each ADS), which will be paid once it is consummated. At **IBERDROLA**'s yesterday's (Monday, november 27) closing share price of €32.75 and an exchange rate of €1.4755 per £1, the terms of the offer value each **ScottishPower** share at 777 pence and the entire issued share capital of **ScottishPower** at circa €17,200 million. As a result of the transaction, Scottish Power shareholders are expected to receive about 21.4% of the enlarged, IBERDROLA once the planned capital increase is carried out.

The Board of Directors of **ScottishPower**, which has been advised by Morgan Stanley and to date controls approximately 0.1% of the company's capital, considers the terms of the acquisition offer fair and reasonable and will recommend unanimously to the company's shareholders that they vote in favour of it at their Extraordinary General Shareholders Meeting, which is expected to be held in the first quarter of 2007.

The merger of ABN AMRO-advised **IBERDROLA** and **ScottishPower** is subject, among other things, to approval by the shareholders of both companies and by certain regulatory authorities, including the European Commission and the U.S. Federal Energy Regulatory Commission.

Ignacio Galán and Philip Bowman

Ignacio Galán, Chairman of **IBERDROLA**, commented that "the proposed integration of **ScottishPower** with Iberdrola, which is consistent with our respective strategic plans, will result in the third largest European utility, will create value for both our Companies and will be very positive for employees and customers both of whom will benefit from the competitive advantages of the new group.

“We will be able to achieve prompt synergies and access economies of scale in the medium and long term through common systems and processes. The new group will be well positioned for the future European energy market and will enjoy a strong growth platform in Spain, the United Kingdom, Continental Europe, USA and the global market, particularly in renewable energy, a sector in which it will be a world leader. All of this will be positive for all our stakeholders.”

Philip Bowman, Chief Executive of **ScottishPower**, explained that “while all of the business units of **ScottishPower** have shown their strength during the last 12 months, corporate movements have decisively transformed the landscape of the electric sector in Europe. **Scottish Power** needs to expand into other territories, diversify its operating risks, obtain greater economies of scale and have the financial strength necessary to invest in major infrastructure that will be necessary in the coming years.”

Bowman stated that “this transaction manages to reach all these objectives, avoiding the negative consequences that most potential mergers would entail for employees. The combination of both companies will allow **ScottishPower** to develop on a global scale in a progressively more competitive environment, and the terms offered by **IBERDROLA** provide an attractive price for our shareholders, at the same time allowing those who so wish, to continue to hold shares in the merged company.”

The merger of **IBERDROLA** and **ScottishPower** is strategically complementary and will create an european leader, with a pro-forma enterprisa value of circa €64 billion, a broad geographical presence and a firm foundation for continued growth in the future.

The operating synergies deriving from the transaction are expected to reach €130 million a year, coming, among other things, from operating and financial cost savings, improvements in generation and distribution units, and the management of renewable facilities.

On the basis of pro forma figures up to September 2006, the new merged Group will have installed capacity of 36,600 megawatts (MW) and 21.4 million power supply points. Furthermore, the merger of **IBERDROLA** and **ScottishPower** will consolidate the leadership in the renewable energy sector, with an installed capacity of 6,040 MW.

IBERDROLA values both the ability and the experience of the management team and employees of **ScottishPower**, who will be indispensable for bringing the transaction to its proper completion and whom it expects to continue to play a vital role in the company’s future development.

ScottishPower is an international energy company that transports and distributes electricity in the United Kingdom, markets electricity and gas to industrial and domestic customers in that country, and has generating plants and gas storage facilities in the United Kingdom and North America. The company had earnings of £5.446 billion and an operating profit of £870 million for the financial year ending 31 March 2006.

IBERDROLA, a hundred-year-old Spanish-based company, is among Europe’s major electrical companies and operates gas and electricity businesses in 28 countries. In addition, it is one of the world leaders in the production of wind-generated power. It achieved income of €11.738 billion in 2005, with an operating profit of €2.262 billion.

➤ Communications Department

IMPORTANT INFORMATION

This communication does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval with respect to the proposed acquisition by Iberdrola S.A. of ScottishPower plc (the "Acquisition"), nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

If and when Iberdrola S.A. commences the Acquisition for the ordinary shares of ScottishPower plc and the Acquisition is implemented by way of a scheme of arrangement under the U.K. Companies Act 1985, as amended (the "Scheme"), any securities of Iberdrola S.A. will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), but will be issued in reliance on the exemption provided by Section 3(a)(10) thereof, and ScottishPower plc will furnish the acquisition document to the SEC under cover of a Form 6-K. If and when Iberdrola S.A. determines to commence the Acquisition by way of a takeover offer under The City Code on Takeovers and Mergers of the United Kingdom (the "Offer") rather than the Scheme, Iberdrola S.A. will, to the extent that the shares issued in connection with the proposed Acquisition are required to be registered in the United States, file a registration statement on Form F-4, which will include a prospectus, with the United States Securities and Exchange Commission ("SEC"). **Investors are strongly advised to read the documents that will be made available to them, including the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information regarding Iberdrola S.A., ScottishPower plc, the Acquisition and any Offer. ScottishPower shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower relating to the Acquisition.** If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's web site at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.

The distribution of this communication may, in some countries, be restricted by law or regulation. Accordingly, persons who come into possession of this document should inform themselves of and observe these restrictions. To the fullest extent permitted by applicable law, the companies involved in the proposed Acquisition disclaim any responsibility or liability for the violation of such restrictions by any person. The shares to be issued in connection with the proposed Acquisition may not be offered or sold in the United States except pursuant to an effective registration statement under the Securities Act or pursuant to a valid exemption from registration.

FORWARD-LOOKING STATEMENTS

This communication contains forward-looking information and statements about ScottishPower plc and Iberdrola S.A. and their combined businesses after completion of the proposed Acquisition. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words “expects,” “anticipates,” “believes,” “intends,” “estimates” and similar expressions. Although the managements of ScottishPower plc and Iberdrola S.A. believe that the expectations reflected in such forward-looking statements are reasonable, investors and holders of ScottishPower plc and Iberdrola S.A. shares are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of ScottishPower plc and Iberdrola S.A., that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include those discussed or identified in the public documents sent by ScottishPower plc and Iberdrola S.A. to the *Comisión Nacional del Mercado de Valores* and under “Risk Factors” in the annual report on Form 20-F for the year ended March 31, 2006 filed by ScottishPower plc with the SEC on June 30, 2006. Except as required by applicable law, neither ScottishPower plc nor Iberdrola S.A. undertakes any obligation to update any forward-looking information or statements.

The Spanish General Office for Markets and Investors (*Dirección General de Mercados e Inversores*) hereby submits the following reasoned trading resumption proposal to the Chairman of the National Securities Market Commission (*Comisión Nacional del Mercado de Valores*) who, pursuant to the powers authorised by the Board of the Securities Market Commission on 29th June 2006, hereby resolves as follows:

"To lift, with effect from 11:00 hours on today's date, the provisional suspension of trading agreed today in relation to IBERDROLA S.A. in the following markets:

- On the Securities Exchanges and the Spanish Electronic Market (*Sistema de Interconexión Bursátil*): shares and other securities giving rise to the right to purchase or subscribe for them;
- On MEFF RENTA VARIABLE, S.A.: contracts on the above mentioned shares;
- On AIAF, Mercado de Renta Fija, S.A.: its Fixed Income Issues.

since sufficient information regarding the circumstances which made it advisable to adopt the suspension resolution has been made available to the public at the Stock Exchange Managing Companies and the National Securities Market Commission."

Aviso Legal

EXONERACIÓN DE RESPONSABILIDAD

El presente documento ha sido elaborado por Iberdrola S.A. en relación a la posible adquisición de las acciones de ScottishPower plc. y para su utilización en presentaciones a los medios de comunicación, inversores y analistas, etc. En consecuencia, no podrá ser divulgado, ni hecho público ni utilizado por ninguna otra persona física o jurídica con una finalidad distinta a la arriba expresada, sin el consentimiento expreso y por escrito de Iberdrola S.A.

Todas las proyecciones y estimaciones utilizadas y que se contienen en el informe han sido preparadas con efectos meramente ilustrativos. Las proyecciones y estimaciones se basan en numerosos juicios y estimaciones subjetivas, que podrán resultar ciertas o no. El presente documento no puede considerarse una garantía, implícita o explícita, acerca de la exactitud e integridad de dichas proyecciones y estimaciones, o del pasado, presente o futuro de Iberdrola S.A.

El presente documento se dirige a personas que carecen del conocimiento del negocio y actividades de Iberdrola S.A. y, por tanto, ni Iberdrola S.A. ni sus respectivos asesores legales, financieros o contables asumen ninguna responsabilidad por el informe si éste es utilizado con una finalidad distinta a la expresada anteriormente. Iberdrola S.A. no asume obligación alguna de actualizar o revisar el presente informe.

Este documento no constituye una oferta de compra, de venta o de canje de valores de Iberdrola o de ScottishPower plc., ni una solicitud de una oferta de compra, de venta o de canje de dichos valores.

Aviso Legal

REGLA 425 LEGEND INFORMACIÓN IMPORTANTE EN EE.UU.

Esta comunicación no constituye una oferta de compra, de venta o de canje, ni una solicitud de una oferta de compra, de venta o de canje de títulos valores, ni una solicitud de voto alguno o aprobación respecto a la adquisición de ScottishPower plc propuesta por Iberdrola S.A. (la "Adquisición"); tampoco existirá compra, venta o canje de valores, ni solicitud de ello en ninguna jurisdicción en la que dicha oferta, venta o canje fuese ilegal sin su previa notificación o registro conforme a las leyes de tal jurisdicción.

En el caso en que – y cuando - Iberdrola S.A. inicie la Adquisición de las acciones ordinarias de ScottishPower plc y que la Adquisición sea implementada a través de un "scheme of arrangement" conforme a la ley de sociedades británica (U.K. Companies Act 1985, según modificada), (el "Scheme") los títulos de Iberdrola S.A. no se registrarán conforme a la Ley de Valores Americana (U.S. Securities Act de 1933, según modificada, la "Securities Act"), sino que serán emitidos teniendo en cuenta la exención prevista en la Sección 3(a)(10) de la misma, y ScottishPower plc proveerá el documento de adquisición a la SEC bajo el formulario Form 6-K. Si en lugar de a través del "scheme" Iberdrola S.A. decide realizar la Adquisición a través de una oferta pública de adquisición (takeover offer) conforme al derecho bursátil británico (The City Code on Takeovers and Mergers of the United Kingdom), (la "Oferta"), en la medida en que las acciones emitidas en relación a la Adquisición requieran su notificación en los Estados Unidos, Iberdrola S.A. procederá a depositar ante la comisión del mercado de valores de los Estados Unidos ("United States Securities and Exchange Comisión", "SEC") una declaración de notificación (registration statement) bajo el formulario Form F-4, que incluirá un folleto. Se aconseja seriamente a los inversores que lean los documentos que les serán facilitados, incluyendo la declaración de notificación y el folleto cuando se disponga de ellos, así como cualquier otro documento relevante que se ponga a su disposición o a la de la SEC u otras autoridades regulatorias competentes, así como cualquier modificación o suplementos a tales documentos, ya que contendrán información importante relativa a Iberdrola S.A., ScottishPower plc, la Adquisición y a cualquier oferta.

Los accionistas de ScottishPower plc, deben también leer la declaración de solicitud / recomendación relacionada prevista en el anexo 14D-9, que podrá ser notificada a la SEC por ScottishPower plc, en relación a la Adquisición. En el caso en que se notifique, los inversores podrán obtener copias gratuitas de la declaración de notificación, del folleto, así como de otros documentos relevantes notificados a la SEC, en la página web de la SEC (www.sec.gov) y recibirán información puntual sobre cómo obtener los mencionados documentos relacionados con la transacción gratuitamente a través de las partes afectadas o a través de un agente nombrado a tal efecto.

En algunos países la distribución de esta comunicación puede estar limitada o restringida por la legislación aplicable. En consecuencia, las personas poseedoras de tal documento deben mantenerse informadas sobre tales restricciones y respetarlas. Las sociedades partes en la Adquisición excluyen toda responsabilidad, dentro de lo permitido por la legislación aplicable, por cualquier violación de tales restricciones por parte de tales personas.

Las acciones a emitir en relación con la Adquisición no pueden ser ofrecidas ni vendidas en los Estados Unidos, salvo si se efectúa a través de una notificación efectiva de una declaración de las previstas en la Securities Act, o al amparo de una exención válida del deber de notificación.

Aviso Legal

AFIRMACIONES O DECLARACIONES CON PROYECCIONES DE FUTURO

Esta comunicación contiene información, afirmaciones o declaraciones con proyecciones de futuro sobre ScottishPower plc e Iberdrola S.A. y sobre el grupo resultante tras la ejecución de la Adquisición propuesta. Las declaraciones con proyecciones de futuro no constituyen hechos históricos. Tales declaraciones incluyen proyecciones financieras y estimaciones y las presunciones subyacentes, declaraciones relativas a planes, objetivos, y expectativas en relación a operaciones futuras, productos y servicios, y declaraciones sobre resultados futuros. Las declaraciones con proyecciones de futuro se identifican generalmente por el uso de términos como “espera,” “anticipa,” “cree,” “pretende,” “estima” y expresiones similares. Si bien los directivos de ScottishPower plc y de Iberdrola S.A. consideran que las expectativas recogidas en tales afirmaciones son razonables, los inversores y titulares de las acciones de ScottishPower plc y de Iberdrola S.A. son advertidos de que la información y las afirmaciones con proyecciones de futuro quedan expuestas a varios riesgos e incertidumbres, muchos de los cuales son difíciles de prever y están, de manera general, fuera del control de ScottishPower plc y de Iberdrola S.A., riesgos que podrían ser el causante de que los resultados y desarrollos reales difieran significativamente de aquellos expresados o implícitos en, o proyectados en, las afirmaciones e información con proyecciones de futuro. Entre tales riesgos e incertidumbres están aquellos identificados y tratados en los documentos públicos enviados por ScottishPower plc e Iberdrola S.A. a la Comisión Nacional el Mercado de Valores y aquellos tratados como “factores de riesgo” (“Risk Factors”) en el Informe Anual sobre el formulario Form 20-F, para el ejercicio finalizado el 31 de marzo de 2006, notificado por ScottishPower plc a la SEC el 30 de junio de 2006. Salvo en la medida en que lo requiera la ley aplicable, ni ScottishPower plc ni Iberdrola S.A. asumen obligación alguna de actualizar sus afirmaciones o información con proyecciones de futuro.

IMPORTANT INFORMATION

This communication does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval with respect to the proposed acquisition by Iberdrola S.A. of ScottishPower plc (the "Acquisition"), nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

If and when Iberdrola S.A. commences the Acquisition for the ordinary shares of ScottishPower plc and the Acquisition is implemented by way of a scheme of arrangement under the U.K. Companies Act 1985, as amended (the "Scheme"), any securities of Iberdrola S.A. will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), but will be issued in reliance on the exemption provided by Section 3(a)(10) thereof, and ScottishPower plc will furnish the acquisition document to the SEC under cover of a Form 6-K. If and when Iberdrola S.A. determines to commence the Acquisition by way of a takeover offer under The City Code on Takeovers and Mergers of the United Kingdom (the "Offer") rather than the Scheme, Iberdrola S.A. will, to the extent that the shares issued in connection with the proposed Acquisition are required to be registered in the United States, file a registration statement on Form F-4, which will include a prospectus, with the United States Securities and Exchange Commission ("SEC"). **Investors are strongly advised to read the documents that will be made available to them, including the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information regarding Iberdrola S.A., ScottishPower plc, the Acquisition and any Offer. ScottishPower shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower relating to the Acquisition.** If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's web site at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.

The distribution of this communication may, in some countries, be restricted by law or regulation. Accordingly, persons who come into possession of this document should inform themselves of and observe these restrictions. To the fullest extent permitted by applicable law, the companies involved in the proposed Acquisition disclaim any responsibility or liability for the violation of such restrictions by any person. The shares to be issued in connection with the proposed Acquisition may not be offered or sold in the United States except pursuant to an effective registration statement under the Securities Act or pursuant to a valid exemption from registration.

FORWARD-LOOKING STATEMENTS

This communication contains forward-looking information and statements about ScottishPower plc and Iberdrola S.A. and their combined businesses after completion of the proposed Acquisition. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words “expects,” “anticipates,” “believes,” “intends,” “estimates” and similar expressions. Although the managements of ScottishPower plc and Iberdrola S.A. believe that the expectations reflected in such forward-looking statements are reasonable, investors and holders of ScottishPower plc and Iberdrola S.A. shares are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of ScottishPower plc and Iberdrola S.A., that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include those discussed or identified in the public documents sent by ScottishPower plc and Iberdrola S.A. to the *Comisión Nacional del Mercado de Valores* and under “Risk Factors” in the annual report on Form 20-F for the year ended March 31, 2006 filed by ScottishPower plc with the SEC on June 30, 2006. Except as required by applicable law, neither ScottishPower plc nor Iberdrola S.A. undertakes any obligation to update any forward-looking information or statements.

The Spanish General Office for Markets and Investors (*Dirección General de Mercados e Inversores*) hereby submits the following reasoned trading suspension proposal to the Chairman of the National Securities Market Commission (*Comisión Nacional del Mercado de Valores*) who, pursuant to the powers authorised by the Board of the Securities Market Commission on 29th June 2006, hereby resolves as follows:

"To provisionally suspend trading in relation to IBERDROLA S.A., with immediate effect and pursuant to Article 33 of the Spanish Securities Market Law (Law 24/1988 of 28 July 1988, *Ley del Mercado de Valores*), in the following markets:

- On the Securities Exchanges and the Spanish Electronic Market (*Sistema de Interconexión Bursátil*): shares and other securities which may give rise to the right to purchase or subscribe for them;
- On MEFF RENTA VARIABLE, S.A.: contracts on the above mentioned shares;
- On AIAF, Mercado de Renta Fija, S.A.: its Fixed Income Issues.

while relevant information regarding the above mentioned entity is publicised."

Director del Área de Mercado
Madrid

Ref.: Relevant fact

Dear Sirs,

We are pleased to communicate to you that IBERDROLA ⁽¹⁾, after the announcement of the payment of the interim dividend corresponding to 2006 financial year, is going to offer to its shareholders the Dividend Reinvestment Program (*Programa de Reinversión de Dividendo*), by means of which, the shareholders voluntarily adhering the Program may reinvest the dividend acquiring shares of the Company.

The main goal is still to provide the shareholders with the option of strengthening its interest in Iberdrola in a periodical and systematic way.

We attach hereto the Dividend Reinvestment Program.

We are still at your and the CNMV disposal.

Yours sincerely,

Federico San Sebastián

(1) Legal Notice applicable only to IBERDROLA, S.A.: this announcement does not constitute an offer for the purchase, sale or exchange of shares, nor is it a request for an offer for the purchase, sale or exchange of shares. The shares of Iberdrola, S.A. may not be offered or sold in the USA unless a registration statement is registered in accordance with the Securities Act or unless a registration exception is applicable.

DIVIDEND REINVESTMENT PROGRAM DETAIL

To Article 82 of the Spanish Stock Exchange Act (*Ley del Mercado de Valores*), the terms and conditions of the Dividend Reinvestment Program (PRD) to acquire the shares of Iberdrola, S.A. (**Iberdrola o la Company**) that the Company shall put in place for the dividend payment that shall take place next 2 January 2.007.

1) Board of Directors resolution regarding the payment of the dividend.

The Board of Directors of the Company, at the meeting held on 10 November 2.006 approved the payment of an interim dividend, against 2006 results, amounting to 0.45 gross euros per share, what represents 405,697,131.45 euros in total.

Likewise, the Ordinary General Shareholders' Meeting of the Company held last 30 March 2.006 resolved to allow the acquisition by the Company of its own shares and the possibility of using those shares to the development of the dividend reinvestment programs.

2) Dividend Reinvestment Program of the Company.

2.1) Investors.

The PRD is addressed to those persons being shareholders of the Company at trade closing on the previous day of the date of the payment of the dividend.

2.2) Amount and price of the reinvestment; number of shares received.

IBERDROLA shall pay in cash to all shareholders the amount corresponding to the 2006 interim dividend, withholding the relevant taxes according to the applicable law on the payment date.

Those shareholders adhering to the PRD may reinvest the amount of the net dividend received in cash by acquiring Company shares with the same political and economical rights as the shares currently dealt.

In any case, the reinvestment must be for the total amount of the net dividend received by the relevant shareholder. Therefore, no partial reinvestment is allowed.

The price of the reinvestment corresponding to each share shall be the simple average of the weighted average changes of the Company's shares (*media simple de los cambios medios ponderados de la acción de la Sociedad*) in the Spanish SIBE corresponding to the five (5) market business days immediately previous to the date of the dividend payment, less the gross amount of the dividend. Sociedad Rectora de la Bolsa de Valores de Bilbao SAU (the managing company of the Bilbao Stock Exchange) shall issue a certificate with the calculation of the average price according to the above mentioned criteria. Said price shall be communicated by IBERDROLA to CNMV on the payment date of the dividend through Relevant Fact, and likewise it shall be available at the Company's web (www.iberdrola.com)

The number of shares each shareholder shall be entitled to acquire shall be the result of dividing the net dividend amount received by each shareholder into the share price (calculated according to the previous paragraph). If the result of said division is not an entire number, it shall be rounded down to the closest entire number. The excess (the decimals) shall increase the in cash amount.

2.3) Steps of the Dividend Reinvestment Program corresponding to the 2 January 2007 interim dividend.

Please find below a description of the main steps of the dividend reinvestment program of the Company:

- (i) The depositary entities (*entidades depositarias*) to make available to the shareholders of Iberdrola the reinvestment order form from 4 December 2006 onwards.
- (ii) **Reinvestment period.** The shareholders willing to reinvest the net amount received corresponding to dividends shall execute reinvestment orders from **11 December 2006 until 29 December 2006 closing of trading**—save from those entities having a previous closing hour—.
- (iii) Reinvestment revocation orders period: from 11 December 2006 until 29 December 2006 closing of dealing—save from those entities having a previous closing hour—.
- (iv) Calculation of the Reinvestment Price term: from 21 December 2006 until 29 December 2006.
- (v) Publication of the relevant fact of the Reinvestment Price setting out: 2 January 2007.
- (vi) Dividend payment date: 2 January 2007.
- (vii) Dealing date: 5 January 2007.
- (viii) Settlement of the acquisitions date: 10 January 2007.

2.4) Reinvestment in Iberdrola shares process.

During the reinvestment period, those persons giving evidence of them being a shareholder of Iberdrola may delivery to the entity where they have their shares deposited, a reinvestment order for an amount equal to the net amount of the dividend received (gross dividend less the applicable withholding) in order to receive a number of shares to be calculated according to section 2.2 above. The reinvestment orders shall be delivered by the usual ways of each entity (office, telephone, post, Internet, etc.).

The orders delivered by the shareholders shall be final. Therefore, once the dividend amount is paid, the relevant amount shall be frozen in the cash account opened at the entity.

Notwithstanding the above, the orders shall be understood having been revoked (i) if, due to the transfer of all the Iberdrola shares, those persons delivering the reinvestment orders are, on closing dealing of the previous day to the day the dividend is paid, are not an Iberdrola shareholder; (ii) if those persons delivering the reinvestment order have not right to freely dispose the Iberdrola shares dividends obtained; or (iii) if, within the relevant term, the shareholder expressly revokes the order to the entity to which it was delivered. In this last case, no partial revocations would be accepted.

The delivery of reinvestment orders by Iberdrola shareholders shall imply the acceptance of the terms and conditions of the PRD.

2.5) Fees and expenses corresponding to the acquiror.

The settlement fees of Iberclear and the dealing ones of the Stock Markets shall be in all cases paid by IBERDROLA.

IBERDROLA shall not pay any fee or expense that, eventually and if applicable, the depositary entities may charge to their clients for processing the reinvestment orders. Several depositary entities have

communicated to IBERDROLA their intention of not charging any fee to their clients in connection with the reinvestment orders they process.

13 December 2006

REC. JUN 23 A 10:12

UNIVERSITY OF BILBAO

IBERDROLA

The company's CEO today held a meeting with 650 employees in the Bilbao Euskalduna Centre

IGNACIO GALÁN: "THE AMICABLE TRANSACTION BETWEEN IBERDROLA AND SCOTTISHPOWER WILL BE BENEFICIAL FOR THE WORKERS OF BOTH COMPANIES"

- **During the meeting, held for the fifth year running, Galán highlighted the fact that the project "represents a new milestone in the history of IBERDROLA" and "has been made possible thanks to the growth and value created by all of us over the last five years"**

"The integration of ScottishPower in IBERDROLA will basically be beneficial for the workers of both companies", Ignacio Galán, CEO of the company, declared during today's meeting with 650 employees in the Bilbao Euskalduna Centre.

Along these lines, Galán pointed out that, "the resulting group will offer us new opportunities and great possibilities for professional development on all the markets on which we are present, adding a new dimension and boost to training to ensure that the company's growth focuses on the growth of the individuals on which it is based".

During the meeting, which was held for the fifth year running and was followed live over the company's intranet by approximately 1.500 employees, the CEO of IBERDROLA explained that, "belonging to a business group of this size will provide us with a level of stability and occupational safety even higher than the one we have at present, ensuring the continuity of our growth project".

Ignacio Galán also made mention of the fact that the proposed transaction with ScottishPower "represents a new milestone in the more than 100 years of IBERDROLA's history and has been made possible thanks to the growth and value created by all of us over the last five years".

Similarly, the CEO referred to the fact that IBERDROLA has more than fulfilled the objectives it set in its Strategic Plan 2002-2006,

increasing the power installed and the production of electricity by 80%, the energy distributed by 40% and the supply quality in Spain by 30%.

Galán also declared that the integration of ScottishPower in IBERDROLA will enable, among other things, "an increase in the company's size, generating more value for all its shareholders, turning us into a leading enterprise in the energy sector with a more balanced business portfolio at the fore of the wind energy sector on a world scale. It will also provide access to new opportunities for long-term growth".

New Strategic Plan 2007-2009

Ignacio Galán referred to the integration with ScottishPower as part of IBERDROLA's new strategic plan 2007-2009, which was presented on 4 October last and, besides continuing with the company's organic growth, also takes in inorganic growth.

Accordingly, the CEO explained, the transaction, which reinforces the company's commitment to its shareholders, customers, individuals and society in general, complies with all the strategic and financial criteria laid down by IBERDROLA: it is to be carried out in a country whose energy market is deregulated and with an enterprise that integrates generation, distribution and commercialisation activities and the results will have a positive effect on both profits and cash flow to maintain financial soundness.

During the meeting, Galán put forward the guidelines for the Strategic Plan 2007-2009, "a plan by people for people", which continues along the lines of the successful strategy of five years ago. This new plan includes the start-up of a new investment cycle, which is to include the allocation of €9000 million (+20% in comparison with the previous three-year period) as a commitment to the basic energy business both in our country and abroad.

Of the total, 37% will be used for the renewable energy business, while the deregulated and regulated businesses in Spain and the Latin American business will represent approximately 20% each. International investments will be given increasing significance, rising from just over 25% during the 2001-2006 period to almost 40% over the next three years.

IBERDROLA

2007 JUN 23 AM 10:22
OFFICE OF THE
CORPORATE FIN. Madrid, 21st December, 2006

NATIONAL SECURITIES MARKET COMMISSION

To the Attention of Mr. Antonio Mas Sirvent
Markets Area Director
Madrid

RE: Additional Communications

Dear Sirs,

Further to our communication of 30 November, 2006 with respect to the Dividend Reinvestment Plan, please find enclosed the final version of the Plan Report, in which the only variation with respect to the previous version is the inclusion of Point 3) restricting participation in the Plan to all those shareholders who are U.S. Persons, (as defined in Regulation S of the U.S. Securities Act of 1933).

Yours truly,

Federico San Sebastián

DIVIDEND REINVESTMENT PLAN REPORT

For the purpose of complying with the provisions of article 82 of the Securities Market Act, we hereby notify the terms and conditions of the Dividend Reinvestment Plan (PRD) concerning the shares of the company Iberdrola, S.A. ("Iberdrola" or the "Company") to be implemented by the Company for the forthcoming dividend payment to be made on 2 January, 2007.

1) Resolution of the Board of Directors with respect to the distribution of the dividend.

At its meeting held on 10 November 2006, the Company Board of Directors passed a resolution to distribute an interim dividend corresponding to the results of financial year 2006 for the amount of 0.45 gross euros, representing a total of 405,697,131.45 euros.

Likewise, the Company's Ordinary General Shareholders Meeting held on 30 March 2006 passed a resolution authorising the acquisition derived from IBERDROLA shares and the option of using such shares for the development of dividend reinvestment plans.

2) Plan for reinvesting the dividend in Company shares.

2.1) Investors group.

The PRD is intended for all those persons who were Iberdrola shareholders at the time of the close of the trading session on the day prior to the date of payment of the dividend.

2.2) Amount and price of the reinvestment; number of shares received.

IBERDROLA will pay all shareholders the amount of the interim dividend corresponding to the Results for the financial year 2006 in cash, withholding the pertinent tax amount in accordance with the application legislation in force on the payment date.

Shareholders opting for the PRD may reinvest the amount of the net interim dividend received in cash in Company shares, with the same voting and economic rights as the shares currently in circulation.

In all cases, the reinvestment will be for the total net dividend received by the shareholder and consequently no partial reinvestments of the dividend may be made.

The reinvestment price of each share will be equal to the simple average of the average weighted exchange rates of the Company share in the continuous market (SIBE) corresponding to the five (5) Stock Exchange business days immediately prior to the dividend payment date, less the gross amount of the dividend. The Governing Entity of the Bilbao Stock Exchange (Sociedad Rectora de la Bolsa de Valores de Bilbao SAU) will issue a certificate indicating the calculation of the average price, based on the established criterion. That price will be notified by IBERDROLA to the CNMV on the day of payment of the dividend, in the form of a Significant Event and it will also be posted in the Company's corporate website (www.iberdrola.com)

The number of shares that each shareholder is entitled to purchase will be the result of dividing the net dividend amount collected as a dividend by that shareholder by the price per share calculated based on the provisions of the preceding paragraph. In the event of the calculation of the number of shares to be purchased by each shareholder based on the above formula should be less than a whole number, the decimal number of shares will be rounded off to the whole number, and the remainder (decimal amount) credited to the cash account.

2.3) Phases of the reinvestment procedure for the interim dividend to be paid on 2 January 2007.

Below is a list of the principal milestones that comprise the procedure for reinvestment of the dividends in Company shares:

- (i) Delivery of the reinvestment order form to the Iberdrola shareholders by the depositary entities from 4 December 2006.
- (ii) **Reinvestment period.** Shareholders wishing to reinvest the net amount of the dividend collected in Company shares will complete the reinvestment order forms **between 11 December 2006 and 29 December 2006 at the time of the close of the trading session** –with the exception of the participating banks closing before this time–.
- (iii) Period for revoking reinvestment orders: from 11 December 2006 to 29 December 2006 at the time of the close of the trading session –except for participating banks closing before this time–.
- (iv) Period for calculating the Reinvestment Price: from 21 December 2006 to 29 December 2006.
- (v) Publication of the significant event of setting the Reinvestment Price: 2 January 2007.
- (vi) Dividend payment date: 2 January 2007.
- (vii) Date of the stock exchange transaction: 5 January 2007.
- (viii) Date of settlement of the share purchase transaction: 10 January 2007.

2.4) Procedure involved in formalising the reinvestment in Iberdrola shares.

During the dividend reinvestment period, those persons who are able to accredit their status as Iberdrola shareholders may formalise their reinvestment orders with the participating banks in which their shares are deposited for a sum equivalent to the net dividend amount (gross dividend less the legally established withheld amount) received in the form of a dividend for the number of Iberdrola shares to which they are entitled, based on the calculation set forth in paragraph 2.2 above. The reinvestment orders will be formalised through the habitual channels established by each bank (visit to the branch, by telephone, by mail, through the Internet, etc.).

The orders formalised by the shareholders will be firm, in such a way that once the amount of the dividend has been paid, the funds to be used for the reinvestment will be blocked in the cash account opened in the participating bank.

Notwithstanding the above, the orders will be deemed revoked (i) in the event that, as a result of the transfer of all their Iberdrola shares, those persons who have issued the pertinent reinvestment instructions are not Iberdrola shareholders at the time of the close of the trading session on the day prior to payment of the dividend; (ii) in the event that those persons who have issued the pertinent reinvestment instructions are unable to freely dispose of the dividends received on their shares in Iberdrola; or (iii) if, during the period established for the effect, a shareholder were to expressly ask the bank to which the order has been sent to revoke that order. In this case, no partial revocations will be possible.

Subscribing of reinvestment orders by shareholders will mean acceptance of the terms of the PRD.

2.5) Fees and charges for the purchasers.

Fees for settlement through Iberclear and Stock Exchange charges will be paid by IBERDROLA in all cases.

IBERDROLA will not assume payment of any eventual fees or expenses charged by the depository banks to their customers for processing the reinvestment orders. Several depository banks have informed IBERDROLA of their decision not to charge their customers any commission for the reinvestment orders processed by them.

3) Shareholders who are unable to participate in the PRD

Shareholders who are "U.S. Persons" (as defined in Regulation S of the U.S. Securities Act of 1933) may not participate in the PRD and consequently may not opt for the cash dividend due on 2 January 2007 to be reinvested by the depository bank in Iberdrola shares.

IMPORTANT INFORMATION

This communication is not a purchase, sale or exchange offer or an offer of purchase, sale or exchange of securities, or a request for any vote or approval whatsoever with respect to the acquisition of ScottishPower plc proposed by Iberdrola S.A. (the "Acquisition"); neither will any purchase, sale or exchange of securities exist, or any such request in any jurisdiction in which that offer, sale or exchange were to be illegal without its prior notification or registration, in accordance with the laws of such a jurisdiction.

In the case that -and if- Iberdrola S.A. commences the Acquisition of the ordinary shares of ScottishPower plc and the Acquisition is implemented through a "scheme of arrangement" pursuant to the British Companies Act (duly modified UK Companies Act 1985), (the "Scheme") the Iberdrola S.A. shares will not be registered in accordance with the US Securities Act (duly modified U.S. Securities Act of 1933, the "Securities Act"), but will be issued taking into account the exemption provided for in Section 3(a)(10) of the same, and ScottishPower plc will furnish the acquisition document to the SEC using Form 6-K. If instead of through the "scheme" Iberdrola S.A. should decide to make the Acquisition through a takeover offer pursuant to British stock exchange law (The City Code on Takeovers and Mergers of the United Kingdom), (the "Offer"), insofar as the shares issued in relation into the Acquisition require to be notified to the United States, Iberdrola S.A. will proceed to deposit with the US securities market commission ("United States Securities and Exchange Commission", "SEC") a registration statement using Form F-4, which will include a prospectus. **Investors are advised to read the documents provided to them carefully, including the registration statement and the prospectus when these become available, as well as any other relevant document made available to them or that of the SEC or any other competent regulatory authorities, and any modification or supplement to those documents, since they contain important information on Iberdrola S.A., ScottishPower plc, the Acquisition and all offers. The shareholders of ScottishPower plc should also read the registration statement / related recommendation foreseen in appendix 14D-9, which might be notified to the SEC by ScottishPower plc, in relation to the Acquisition.** In the event that this notification is made, investors may obtain a free copy of the registration statement, the prospectus and all other relevant documents notified to the SEC, in the website of the SEC (www.sec.gov) and they will receive precise information on how to obtain these documents related to the transaction free of charge through the affected parties or through an agent designated for that purpose.

In some countries, the distribution of this communication may be limited or restricted by the applicable legislation. As a result, all persons in possession of this communication must find out about these restrictions and respect them. The companies participating in the Acquisition assume no liability (as far as this is possible under the current legislation), for any infringement of such restrictions by any person.

The shares to be issued in relation with the Acquisition may not be offered for sale or sold in the United States, unless this is done through an effective registration statement from among those foreseen in the Securities Act or based on any valid exemption from the duty of registration.

Comments
THE COMPANY IS NOT AWARE OF ANY INDIVIDUAL OR LEGAL ENTITY THAT EXERCISES OR MAY EXERCISE CONTROL OVER IT PURSUANT TO SECTION 4 OF THE SECURITIES MARKET LAW.

A.8. Complete the following tables about the Company's treasury stock:

As of year end:

Number of direct shares	Number of indirect shares (*)	Total % of share capital
7,378,392	0	0.818

(*) Through:

Individual or corporate name of direct shareholder	Number of direct shares
Total:	

Describe any significant changes, pursuant to the provisions of Royal Decree 377/1991, that have occurred during the fiscal year:

Date	Number of direct shares	Number of indirect shares	Total % of share capital
02-17-2005	13,167,771	0	1.461
10-26-2005	5,094,852	0	0.565

Gain (loss) on treasury stock transactions (In thousands of Euros)	2,479
---	-------

A.9. Describe the term(s) and condition(s) of the authorization(s) given by the shareholders acting at the General Shareholders' Meetings to the Board of Directors in order to acquire or transfer the Company's own stock described in A.8.

The treasury stock transactions conducted in FY 2005 were made under the authority granted by the shareholders acting at the General Shareholders' Meetings held on April 3, 2004 and March 18, 2005, according to the following terms and conditions:

"The Board of Directors is expressly authorized to make a derivative acquisition of IBERDROLA's own stock, with the power to delegate this authority to the Executive Committee pursuant to Section 75 of the current Consolidated Text of the Companies Law, subject to the following terms and conditions:

- a) Purchases may be made directly by IBERDROLA, S.A. or indirectly through any of its controlled companies.
- b) Purchases shall be made by means of a purchase and sale agreement, a swap arrangement or any other transaction whatsoever permitted by law.
- c) Purchases may be made at any time, up to the maximum sum permitted by law.
- d) Purchases may not be made at a higher price than that quoted on the Stock Exchange.
- e) The authorization is granted for a period not exceeding 18 months.

In addition, for the purposes provided for in the second paragraph of Section 75.1 of the Companies Law, the shareholders acting at the General Shareholders' Meeting expressly authorize the purchase of shares in the Company by any of its controlled companies subject to the same terms of the resolution described above.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

It is expressly put on record that the shares purchased under this authorization may be sold, retired or applied to the compensation systems contemplated in the third paragraph of Section 75.1 of the Companies Law."

A.10. Indicate, if applicable, any legal or by-law restrictions on the exercise of voting rights, and any legal restrictions on the acquisition or transfer of interests in share capital:

1. RESTRICTIONS ON THE EXERCISE OF VOTING RIGHTS:

1.1 BY-LAW RESTRICTIONS:

Article 29.3: "No shareholder may cast a number of votes greater than those corresponding to shares representing ten (10%) percent of share capital, even if the number of shares held exceeds such percentage of capital. This limitation does not affect votes corresponding to shares with respect to which a shareholder is holding a proxy as a result of the provisions of Article Twenty-Three of these By-Laws, although, with respect to the number of votes corresponding to the shares of each shareholder represented by proxy, the limitation set forth above shall apply."

Article 29.4: "The limitation set forth in the foregoing paragraph shall also apply to the maximum number of votes that may be collectively or individually cast by two or more shareholders which are entities or companies belonging to the same group. Such limitation shall also apply to the number of votes that may be cast collectively or individually by an individual and the shareholder entity, entities or companies controlled by such individual. A group shall be deemed to exist under the circumstances set forth in Section Four of the Securities Market Law, and an individual shall be deemed to control one or more entities or companies, under the circumstances of control set forth in such Section Four."

Article 30.1: "Shareholders participating in a merger or split-off with the company or who are called to subscribe to an increase in capital with the exclusion of pre-emptive rights or to acquire by overall assignment all of the Company's assets, may not exercise their voting rights for the approval of such resolutions by the shareholders acting at the General Shareholders' Meeting."

Article 30.2: "The provisions of the foregoing paragraph shall also be applicable when the resolutions affect, (i) in the case of an individual shareholder, the entities or companies controlled by such individual, and (ii) in the case of shareholders which are legal entities, the entities or companies belonging to its group (in the sense indicated in paragraph four of Article Twenty-Nine), even when these latter companies or entities are not shareholders."

Article 54: "The limitation on the maximum number of votes that may be cast by a single shareholder contained in Article Twenty-Nine (paragraphs three to five) and the voting prohibition of Article Thirty which is imposed upon shareholders affected by conflicts of interest, shall have no effect upon the occurrence of the following circumstances:

(a) when the Company is the target of a public tender offer aimed at the share capital as a whole; and

(b) when, as a result of the public tender offer, an individual or a legal entity, or several of them acting jointly, acquire an interest equal to two-thirds of the voting capital of the Company; provided the full consideration thereof consists only of cash; or, alternatively,

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

(c) when, as a result of the public tender offer, an individual or a legal person, or several of them acting jointly, acquire an interest equal to three-quarters of the voting capital of the Company, provided that the consideration thereof consists, in whole or in part, of securities, without giving the recipient an alternative right to receive such consideration wholly in cash."

1.2 LEGAL RESTRICTIONS:

Section 34 of Royal Decree-Law 6/2000, of June 23, on Urgent Measures to Intensify Competition in the Goods and Services Markets, as amended by Law 14/2000, of December 29 and by Royal Decree-Law 5/2005, of March 11, provides that individuals or legal entities that have a direct or indirect interest in the share capital or voting rights of two or more companies that qualify as a Principal Operator in the same market or industry among those specified in the aforementioned provision (including electric power generation and supply and natural gas production and supply), in a proportion equal to or greater than 3 percent, may not exercise the voting rights corresponding to the excess with respect to such percentage in more than one entity. The same rule applies in the event that a company that qualifies as Principal Operator holds an interest in the capital or voting rights of another Principal Operator in the same economic industry.

However, and in either of both cases, the competent entity regulating the industry (i.e., the National Energy Commission in the case of energy markets) may grant an authorization allowing for the free exercise of voting rights in excess of the above-mentioned percentage.

Along these lines, it should be noted that the Official Gazette (*Boletín Oficial del Estado*) of February 18, 2005 has published the Resolution of the National Energy Commission, pursuant to which the lists of Principal Operators in the Energy Industries is established and made public for purposes of the provisions of Section 34 of Royal Decree-Law 6/2000, of June 23. Identified therein as Principal Operators in the Electricity Industry are: Grupo Endesa, Grupo Iberdrola, Grupo Unión Fenosa, Grupo Hidrocantábrico and Grupo Red Eléctrica. With respect to the Gaseous Hydrocarbon Industry, the Principal Operators are identified as: Grupo Repsol-Gas Natural, Grupo Enagas, Grupo Hidrocantábrico, Grupo Iberdrola and Grupo BP.

In addition, pursuant to Additional Provision No. 27 of Law 55/1999, of December 29, on Tax, Administrative and Social Order Measures (as amended by Law 62/2003, of December 30, on Tax, Administrative and Social Order Measures), public-sector entities or persons and entities of any nature which are controlled or in which a majority interest is held by public-sector entities or Agencies, regardless of the corporate structure adopted, that directly or indirectly acquire the control of or significant interests in government companies that engage in activities in the energy markets shall notify the *Secretaría de Estado de Energía, Desarrollo Industrial y PYMES* (Department of Energy, Industrial Development and SMEs) of any takeover or acquisition made, thus triggering an administrative proceeding for the purpose of determining whether or not to recognize the exercise of the related voting rights or to impose certain conditions on the exercise thereof.

In any event, from the date of takeover or acquisition of significant interests in public-sector companies that engage in business in the power markets, and so long as the Council of Ministers has not stated its decision by means of an express resolution or tacitly by lapse of time, if it does not issue a resolution within a period of two months, the entities or persons referred to in the preceding paragraph may not exercise the voting rights corresponding to the equity interests therein indicated.

Failure to issue a resolution in the proceedings within the aforementioned two-month period shall mean permitting the exercise of the corresponding voting rights.

2. LEGAL OR BY-LAW RESTRICTIONS ON THE ACQUISITION OR TRANSFER OF INTERESTS IN SHARE CAPITAL:

There are no limitations, whether legal or arising from the By-laws, on the free transferability of interests in the company's share capital.

B STRUCTURE OF THE COMPANY'S MANAGEMENT

B.1. Board of Directors

B.1.1. Describe the maximum and minimum number of Directors set forth in the By-laws:

Maximum number of directors	21
Minimum number of directors	9

B.1.2. Complete the following table identifying the members of the Board of Directors:

OTHER EXTERNAL DIRECTORS

Individual or corporate name of director	Committee that has proposed the nomination of the director
Mr. JOSÉ ANTONIO GARRIDO MARTÍNEZ	EXECUTIVE COMMITTEE
Mr. JAVIER HERRERO SORRIQUETA	EXECUTIVE COMMITTEE
Mr. IGNACIO DE PINEDO CABEZUDO	EXECUTIVE COMMITTEE

Reasons for which they cannot be considered independent or proprietary directors:

The Other External Directors do not represent or have not been nominated by the holders of significant stable interests in the share capital of the Company and, in addition, they have performed executive duties at the Company.

In that respect, as set forth in Article 37.1(b) of the By-laws, External Proprietary Directors are "those non-executive Directors who own, or represent owners of, stable interests in the share capital of the Company."

In addition, Article 37.1(c) of the By-laws sets forth that External Independent Directors are "those non-executive Directors not representing a major shareholder who are appointed based on their personal and professional prestige and their experience and knowledge for the

performance of their duties. Such Directors shall have no substantial direct or indirect connection to the Company."

Moreover, Article 10.2 of the Regulations of the Board of Directors establishes "The following persons may not be appointed as independent Directors if such persons are, or have been during the last two (2) years:

- a) Managers of the Company or of any of the companies that are members of the IBERDROLA Group.
- b) Directors of any of the companies that are members of the IBERDROLA Group, except if they have acted as independent directors thereof.
- c) Recipients of any kind of remuneration or compensation payable by the Company or by any of the companies that are members of the IBERDROLA Group other than such as they may be entitled to collect for serving office as Directors.
- d) Significant shareholders or managers of companies to which the Company or any of the companies that are members of the IBERDROLA Group has paid, or from which the Company or any of the companies that are members of the IBERDROLA Group has received, substantial payments."

Indicate the changes, if any, in the type of director during the period:

Individual or corporate name of director	Date of change	Former type	Current type
Mr. JOSÉ IGNACIO BERROETA ECHEVARRÍA (SEE SECTION G)	04-20-2005	EXTERNAL PROPRIETARY DIRECTOR	EXTERNAL INDEPENDENT DIRECTOR

	YES	NO
Is information about these clauses provided to the shareholders at the General Shareholders' Meeting?		X

B.1.11. Describe the process to set the compensation of the members of the Board of Directors and the relevant provisions of the By-laws with regard thereto.

As provided by Article 50 of the By-laws, the compensation of the Board of Directors' members is established such that it does not exceed two (2%) percent of consolidated group profits, which are annually submitted for approval by the shareholders at the General Shareholders' Meeting.

Article 34.2(d) of the By-Laws provides that one of the powers of the Board of Directors is to "set the compensation of the members of the Board of Directors, after a report from the Nominating and Compensation Committee."

In turn, Article 45.2 of the By-laws provides that the Nominating and Compensation Committee has, among other powers, the power to:

"d) Propose to the Board of Directors the system and amount of annual Director compensation."

"f) Report to the Board of Directors regarding the compensation of the Chairman, Chief Executive Officer and senior-level managers, the latter at the proposal of the Chief Executive Officer, if any."

Finally, Article 50 of the By-laws governs the compensation of Directors in the following terms:

"1. The Company shall allocate as an expense an amount equal to up to two (2) percent of consolidated group profits obtained during the fiscal year for the following purposes:

a) To compensate the members of the Board of Directors based on the offices held, and dedication to and attendance of meetings of the corporate decision-making bodies.

b) To endow a fund to meet the obligations of the Company regarding pensions or the payment of Life Insurance premiums in favor of current and former members of the Board of Directors.

The allocation of the maximum limit of two percent shall only occur if profits for the fiscal year are sufficient to cover legal and other mandatory reserves and the issuance to the shareholders of a dividend of at least four percent.

2. Independently of the provisions of the foregoing paragraph, and subject always to the approval of the shareholders at the General Shareholders' Meeting, the compensation of the members of the Board of Directors may also consist of the delivery of shares or options thereto, as well as a payment which takes as its reference the value of the Company's shares.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

3. All rights and duties arising from membership on the Board of Directors shall be compatible with all other rights, duties and indemnification to which the Director may be entitled by reason of other employment or professional relationships, if any, that such Director may have with the Company."

B.1.12. Indicate the identity of the members of the Board of Directors, if any, who are also members of the board of directors or managers of companies that hold a significant interest in the listed company and/or in companies within its Group:

Individual or corporate name of director	Individual or corporate name of significant shareholder	Position
Mr. XABIER DE IRALA ESTÉVEZ	BILBAO BIZKAIA KUTXA (BBK)	CHAIRMAN OF THE BOARD
Mr. JESÚS MARÍA CADENATO MATÍA	BANCO BILBAO VIZCAYA ARGENTARIA, S.A. (BBVA)	DIRECTOR OF THE LARGE INDUSTRIAL CORPORATIONS AREA

Describe, if applicable, any significant relationships other than the ones contemplated in the prior item, of the members of the Board of Directors linking them to significant shareholders and/or in companies within its Group:

Individual or corporate name of director	Individual or corporate name of the significant shareholder	Description of relationship
Mr. SEBASTIÁN BATTANER ARIAS	CAJA DE AHORROS DE SALAMANCA Y SORIA (CAJA DUERO)	PROPRIETARY DIRECTOR APPOINTED FOLLOWING A PROPOSAL OF THE SAVINGS ASSOCIATIONS ASSOCIATED IN FEDERACIÓN DE CAJAS DE AHORRO DE CASTILLA Y LEÓN.
Mr. SEBASTIÁN BATTANER ARIAS	CAJA ESPAÑA DE INVERSIONES, CAJA DE AHORROS Y MONTE DE PIEDAD	PROPRIETARY DIRECTOR APPOINTED FOLLOWING A PROPOSAL OF THE SAVINGS ASSOCIATIONS ASSOCIATED IN FEDERACIÓN DE CAJAS DE AHORRO DE CASTILLA Y LEÓN.

Mr. JESÚS MARÍA CADENATO MATÍA	BANCO BILBAO VIZCAYA ARGENTARIA, S.A. (BBVA)	PROPRIETARYDIRECTOR APPOINTED FOLLOWING A PROPOSAL OF BBVA.

B.1.13. Indicate the amendments made during the fiscal year to the Regulations of the Board of Directors, if any.

The Regulations of the Board of Directors were approved by the Board of Directors at the meeting held on February 25, 2004, and no amendments have been made since the date of approval thereof.

B.1.14. Indicate the procedures for the appointment, re-election, evaluation and removal of Directors. List the competent bodies, the procedures to be followed and the criteria applied in each of such procedures.

1. APPOINTMENT AND REMOVAL OF DIRECTORS

Pursuant to the By-Laws, the shareholders at the General Shareholders' Meeting will decide the appointment and removal of Directors (Article 17.1.a).

Vacancies which occur may, in turn, be filled by the Board of Directors on a interim basis until the next General Shareholders' Meeting, whereat the shareholders shall confirm the appointments or elect the persons who should replace Directors which are not ratified, or it shall withdraw the vacant positions (Article 48.3 of the By-Laws).

Finally the Nominating and Compensation Committee shall bring Director designation proposals to the Board of Directors for the appointment thereof and subsequent submission to a decision by the shareholders at the General Shareholders' Meeting, at the request of the Chairman or any other member of the Board of Directors (Article 3.2 of the Regulations of the Nominating and Compensation Committee).

The Board of Directors (and the Nominating and Compensation Committee within its area of authority) shall endeavor to ensure that candidates proposed to the shareholders at the General Shareholders' Meeting for their appointment as directors, and the directors directly appointed by the Board to fill vacancies in the exercise of its power to make interim appointments, will be persons widely recognized for their expertise, competence and experience, and will be particularly rigorous in connection with the selection of those persons who are to hold office as independent Directors (Article 13 of the Regulations of the Board of Directors).

The Nominating and Compensation Committee, at the request of the Board of Directors, will select possible candidates who might be appointed as Directors of the Company, and will present their proposals to the Board of

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Directors through the Chairman of such Board of Directors, in accordance with the procedure set forth in Article 14 of the Regulations of such Committee:

- The Committee must verify that all candidates for Director of the Company meet the general requirements provided for by statute, the By-Laws and in the Regulations of the Board of Directors of the Company.

- In the case of candidates for the position of independent Director, the Committee must verify compliance with the specific requirements for this type of Director provided for in the By-Laws and in the Regulations of the Board of Directors, and gather adequate information regarding the personal qualities, experience, knowledge, and effective availability of the candidates.

- The Committee must submit to the Board of Directors a duly-substantiated report containing its proposal for the appointment of Directors for designation thereof by the shareholders at the General Shareholders' Meeting or, if applicable, by the Board of Directors itself in the exercise of its powers to fill vacancies by interim appointment.

The proposals that the Committee submits to the Board of Directors must contain an assessment of the qualities of the various candidates and assign them to one of the four categories of directors contemplated by the By-Laws of the Company.

2. RE-ELECTION OF DIRECTORS

Pursuant to Article 16.1 of the Regulations of the Board of Directors, the proposals for re-election of Directors that the Board of Directors resolve to submit to the decision of the shareholders at the General Shareholders' Meeting will be subject to a formal process of elaboration, which shall include a report issued by the Nominating and Compensation Committee.

Article 15 of the Regulations of the Nominating and Compensation Committee provides that, prior to the end of the term for which a Director has been appointed, the Committee must examine the advisability of their re-election, as well as the continuance, if applicable, on the Committee of the Board of Directors of which such Director is a member.

For the foregoing purposes, the Committee must verify that the Director to be re-elected continues to comply with the requirements referred to above, as well as evaluate the quality of work and dedication to office of the Director in question.

Once the procedure described above has been completed, the Committee must present a well-reasoned report to the Board of Directors with its proposal regarding the re-election of Directors.

3. EVALUATION OF DIRECTORS

Pursuant to Article 27.1 of the Regulations of the Board of Directors, the Board of Directors must evaluate, on an annual basis, its operation and the quality of its work.

Pursuant to the above article, the Board of Directors has conducted a self-evaluation and the following substantial issues were analyzed:

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

1. Corporate Governance and transparency: Following the extensive amendments to the internal corporate governance rules and regulations carried out during fiscal year 2004, no amendments thereto were made during fiscal year 2005. However, the Board has analyzed the legislative news published during November 2005 in the Companies Law and through the publication of Royal Decree 1333/2005 on market abuse, and has taken actions accordingly in order to make the appropriate changes to the By-laws and the Internal Regulations for Conduct during fiscal year 2006.

In addition, the actions taken by the Board of Directors have complied with the laws and regulations thereunder and conformed to the Company's By-laws and Regulations.

2. Frequency of meetings: The Board of Directors has held periodic meetings at the minimum intervals set forth in Article 27.1 of the Regulations of the Board of Directors. Specifically, 14 meetings were held during fiscal year 2005. For ordinary sessions, the Board itself establishes a schedule at the beginning of the fiscal year in order for the Directors to know beforehand the dates on which the ordinary meetings will be held, without prejudice to notice of such meetings being given again at least three days in advance of the date set therefor, when a formal call to the meeting is issued.

Notwithstanding some justified absences, a large majority of Directors was present at the Board of Directors' meetings during fiscal year 2005. It should be pointed out that no meeting was held without the presence of the Chairman, the Vice Chairman & CEO or the Secretary of the Board of Directors.

The Executive Committee, the Audit and Compliance Committee, and the Nominating and Compensation Committee have held regular meetings to discuss their business, as set forth in this Report under section B.1.23.

3. Proceedings at the Board's meetings: During the meetings, the Directors have given their opinions and have freely stated their position with regard to the various matters discussed on the Board and have actively participated in the decisions and deliberations thereof or, when necessary, they have refrained from participating therein.

4. Information available to the Directors and dedication: All meetings of the Board and meetings of the Committees have been called sufficiently in advance and had their respective Agenda. All Directors have timely received full information of the business transacted and the resolutions adopted at the various meetings, have had the chance to obtain the additional information they have deemed necessary and have devoted to their duties the time and effort required to discharge them effectively.

5. Duties of the Chairman and of the Secretary of the Board: The Chairman of the Board of Directors has effectively coordinated the operations of the Board and has encouraged debate at the meetings. The Board has also regarded as positive the performance of the Secretary of the Board, who has complied with the duties assigned to him under Article 22 of the Regulations of the Board of Directors, by channeling the relationships between the Company and the Directors in all matters relating to the operations of the Board.

6. Relationships between the Board and the Committees: The three Committees periodically report to the Board of Directors on their activities and the business discussed and the decisions adopted at their meetings, as provided by Article 24.5 of the Regulations of the Board (as far as the Executive Committee is concerned), Article 20 of the Regulations of the Audit and Compliance Committee, and Article 19.1 of the Regulations of the Nominating and Compensation Committee.

The Audit and Compliance Committee has prepared a report on the activities carried out during fiscal year 2005, which was approved by the Board of Directors at its meeting held on February 22, 2006 and which has been made available to the shareholders in connection with the call to the Ordinary General Shareholders' Meeting for fiscal year 2006. For its part, the Nominating and Compensation Committee has submitted to the Board a report on its activities during fiscal year 2005.

In addition, within the framework of the information provided to the Board, the Audit and Compliance Committee carried out a self-assessment of its operations at two meetings held on November 11, 2004 and January 13, 2005, and submitted its conclusions and the resulting Action and Improvement Plan to the Board of Directors at the meeting held on June 28, 2005.

7. Training of Directors: In order for the Directors to keep abreast of the latest developments, presentations have been made on matters such as the International Financial Reporting Standards, the latest news as to regulation of the industry, and the applicable rules and regulations in the area of Corporate Governance.

8. Strategy: Within the scope of the duties of general supervision and strategic guidance of the Company entrusted to the Board of Directors, the Strategic Plan has been regularly monitored at its meetings.

In sum, the Board of Directors believes that, in FY 2005, it has performed its duties in accordance with the Law, the By-Laws and its internal Regulations, achieving transparency and efficiency in its operations.

B.1.15. Indicate the circumstances under which the resignation of Directors is mandatory.

Pursuant to Article 48.1 of the By-laws, the Directors will serve in their positions for a term of five (5) years, so long as the shareholders at the General Shareholders' Meeting do not resolve to remove or dismiss them and they do not resign from their position.

In particular, the Directors should submit their resignation from the position and formalize their withdrawal upon the occurrence of any of the instances of incompatibility or prohibition against performing the duties of director provided by Law, as well as the events in which the Regulations of the Board of Directors so provide.

In this sense, Article 17.2 of the Regulations of the Board of Directors sets forth that the Directors will tender their resignation to the Board of Directors and formally resign from their position in the following cases:

a) When they reach the age of seventy (70).

b)When they are involved in any circumstance of incompatibility or prohibition governed by provisions of a general nature or set forth in Article Twelve of the Regulations of the Board of Directors (*).

c) When as a result of acts attributable to the Director in his capacity as such, serious damage is caused to the value of the Company or the Director ceases to deserve the commercial and professional respect required to hold the position of Director of the Company.

d) When they are seriously reprimanded by the Board of Directors because they have breached their duties as Directors and such reprimand is approved by a two-thirds majority of the members of the Board at the proposal of the Audit and Compliance Committee.

e)When their continuance in office on the Board may jeopardize the interests of the Company or when the reasons why the Director was appointed cease to exist and, in any case, when a Proprietary Director transfers his shareholding in the Company and when an Independent Director is affected, at any time following his appointment as such, by any of the prohibitions on holding office provided for in section two of Article Ten of the Regulations of the Board of Directors.

(*) Article 12 of the Regulations of the Board of Directors:

The following may not be appointed Directors:

a) Domestic or foreign companies competing with the Company in the energy industry, or the directors or senior managers thereof.

b) Persons holding the position of director in more than four (4) companies with shares trading on domestic or foreign securities exchanges.

c) Persons who, during the two (2) years prior to their appointment, have occupied high-level positions in the government which are incompatible with the simultaneous performance of the duties of a director of a listed company under national or autonomous community legislation, or positions of responsibility with entities regulating the energy industry, the securities markets or other industries in which the Company operates.

d) Persons who are subject to any other circumstance of incompatibility or prohibition governed by provisions of a general nature.

As was reported to the National Securities Market Commission as a significant event on April 20, 2005, the Directors Mr. Javier Aresti y Victoria de Lecea and Mr. José Luis Antoñanzas Pérez-Egea withdrew from their position upon reaching the regulatory age, and the Directors Mr. Santiago Mayner Oyarbide and Mr. José Antonio Fernández Rivero submitted their resignation as proprietary Directors.

B.1.16. Explain whether the powers of the top executive of the Company are vested in the Chairman of the Board. If so, indicate the measures that have been taken to mitigate the risks of accumulation of powers in a single person:

YES NO

Measures to mitigate risks

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

The Vice Chairman & CEO, as an Individual Decision-Making Unit, has been delegated all the powers that may be delegated under the law and the By-laws.

The main measures adopted to mitigate the risks of accumulation of powers are:

- The duties attributed to the Executive Committee (Article 43 of the By-laws and the delegation resolution adopted by the Board of Directors at the meeting held on July 3, 1991).
- The duties attributed to the Audit and Compliance Committee and to the Nominating and Compensation Committee (Articles 44 and 45 of the By-laws).
- The general risk policy and the risk management systems described in items D.1 and D.2 of this Report, developed on the basis of the general duty of supervision assigned to the Board of Directors, which is required to identify the main risks to which the Company is exposed and to organize adequate internal control and information systems [Article 7.5(c) of the Regulations of the Board of Directors].
- The activities of cooperation and support entrusted to the Management Committees within the framework of the general risk policy, as set forth in item D.4 of this Report.

In addition, we must take into account the following powers granted to the Directors under the Regulations of the Board:

- All and every Director may contribute to the scheduling of the Board meetings, because "Prior to the commencement of each fiscal year, the Board of Directors shall set a schedule for its ordinary meetings" (Article 27.2).
- The Board of Directors shall also meet when the Chairman resolves to call an extraordinary meeting thereof, and "when such extraordinary meeting is requested by one-fourth of the Directors" (Article 27.3).
- The Chairman shall decide on the agenda for the meeting, but shall be required to include therein the matters requested by the Directors "when such request has been made by at least three (3) Directors not less than ten (10) days in advance of the date set for the meeting" (Article 27.5).
- Directors have "the broadest powers to obtain information regarding any aspect of the Company, to examine its books, records, documents and other records of corporate transactions, to inspect its facilities, and to communicate with the senior-level managers of the Company," the exercise of which powers of information shall first be channeled through the Chairman, the Chief Executive Officer or the Secretary (Article 31).
- Any Director "may request the hiring of legal, accounting, technical, financial, commercial or other expert advisors, whose services shall be paid for by the Company" in order to be assisted in the performance of his duties, which request shall be channeled through the Chairman or the Secretary, who may subject it to the prior approval of the Board of Directors (Article 32).

Finally, it must also be stressed that no qualified majorities are required to resolve the removal of the Chairman when the Board deems it necessary. Therefore, the Board's power of censure with respect to the Chairman could materialize through a resolution for removal of the Chairman, which could be adopted upon a simple majority.

B.1.17. Are qualified majorities, different from the statutory majorities, required to adopt any type of decision?

YES NO

Describe the method used by Directors to adopt resolutions, including at least the minimum quorum required to hold a valid meeting and the kind of majorities required to adopt resolutions:

Adoption of resolutions

Description of resolution	Quorum	Type of majority
Amendment to the Regulations of the Board of Directors (Article 29.4.b of the Regulations of the Board of Directors).	One half plus one of the Directors.	Two thirds of the Board members present in person or represented by proxy.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

B.1.18. Explain whether there are specific requirements, other than the requirements relating to Directors, to be appointed Chairman.

YES NO

Description of requirements

B.1.19. Does the Chairman have a tie-breaking vote?:

YES NO

Business to which the tie-breaking vote applies

B.1.20. Indicate whether the By-laws or the Regulations of the Board of Directors set forth any age limit for directors:

YES NO

Age limit for the Chairman	70
Age limit for the CEO	65
Age limit for directors	70

B.1.21. Indicate whether the By-laws or the Regulations of the Board of Directors establish any limit on the term of office for independent directors:

YES NO

Maximum term of office	0
------------------------	---

B.1.22. Indicate whether there are formal procedures for proxy voting at meetings of the Board of Directors. If so, briefly describe them.

Pursuant to Articles 40.2 of the By-laws and 29.2 and 33.2.(b) of the Regulations of the Board of Directors, Directors will use their best efforts to attend the meetings of the Board and, when unable to attend in person, they will attempt to give a proxy to another Director, to whom they will give any appropriate instructions.

The proxy will be a special proxy for the Board meeting in question, and may be communicated by any of the means to call a meeting of the Board, i.e. letter, fax, telegram, e-mail or any other means.

B.1.23. Indicate the number of meetings that the Board of Directors has held during the fiscal year. In addition, specify the number of meetings, if any, at which the Chairman was not in attendance:

Number of meetings of the Board	14
---------------------------------	----

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Number of meetings of the Board at which the Chairman was not in attendance	0
---	---

Indicate the number of meetings held by the different committees of the Board of Directors during the fiscal year:

Number of meetings of the Executive Committee	21
Number of meetings of the Audit Committee	12
Number of meetings of the Nominating and Compensation Committee	5
Number of meetings of the Strategy and Investment Committee	0
Number of meetings of the Committee	0

B.1.24. Indicate whether the annual individual financial statements and the annual consolidated financial statements that are submitted to the Board of Directors for approval have been previously certified:

YES NO

Identify, if applicable, the person/persons that has/have certified the annual individual and consolidated financial statements of the Company for their preparation by the Board:

Name	Position
Mr. JOSÉ IGNACIO SÁNCHEZ GALÁN	VICE CHAIRMAN & CEO
Mr. JOSÉ LUIS SAN PEDRO GUERENABARRENA	ADMINISTRATION, CONTROL AND REGULATION DIRECTOR

B.1.25. Explain the mechanisms, if any, adopted by the Board of Directors to avoid any qualifications in the audit report on the annual individual and consolidated financial statements submitted to the General Shareholders' Meeting and prepared by the Board of Directors.

Pursuant to Article 44.2 of the By-laws, the Audit and Compliance Committee is vested with the following powers, among others:

- Know the process for gathering financial information and associated internal systems for monitoring risks relevant to the Company.
- Receive information from the Auditors regarding matters that might risk the independence thereof which are related to the auditing procedure and generally regarding any other information provided for in legislation regarding the auditing of financial statements and in the technical auditing regulations in effect at any time.

In addition, Article 47.5 of the Regulations of the Board of Directors sets forth that "the Board of Directors shall use its best efforts to definitively prepare the financial statements such that there is no room for comments by the auditor. However, when the Board believes that its opinion must prevail, it shall provide a public explanation of the content and scope of the discrepancy."

In addition, Article 5.c) of the Regulations of the Audit and Compliance Committee contemplates, among the main duties of such Committee, related to the audit of the accounts the power to "review the contents of the Auditors' Reports, prior to the issuance thereof, in order to avoid qualified reports, and act as a liaison between the Board of Directors and the Auditors."

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

In practice, this duty is performed by such Committee continuously over the fiscal year by means of the reports it submits to the Board of Directors on the interim financial information of the Company presented on a quarterly basis to the National Securities Market Commission.

The reports of the Audit and Compliance Committee, presented by its Chairman to the Board of Directors before the approval of the information, are mainly intended to disclose such aspects that may give, if any, rise to qualifications in the Audit Report of Iberdrola and its consolidated group, making the appropriate recommendations to avoid such qualifications.

Accordingly, the Audit and Compliance Committee has submitted the following reports to the Board of Directors related to the economic and financial information of the Company to be filed with the National Securities Market Commission for fiscal year 2005:

- Report dated April 19, 2005, on the economic and financial information related to Q1 2005.
- Report dated July 19, 2005, on the economic and financial information related to H1 2005.
- Report dated October 18, 2005, on the economic and financial information related to Q3 2005.
- Report dated February 7, 2006, on the economic and financial information related to H2 2005.
- Report dated February 21, 2006, on the annual financial statements of Iberdrola, S.A. and its Consolidated Group for fiscal year 2005.

As disclosed in the information about Iberdrola, S.A. included in the web page of the National Securities Market Commission, the audit reports on the annual financial statements prepared by the Board of Directors have been issued without qualifications.

B.1.26. Describe the measures adopted so that the information released to the securities markets is transmitted in an equitable and symmetric way.

Article 46.1 of the Regulations of the Board of Directors provides that the Board will "immediately inform the public regarding:

- a) All relevant facts that might materially influence the stock exchange prices of securities issued by the Company.
- b) All changes in the Company's ownership structure, such as fluctuations in significant direct or indirect interests, voting trusts and other forms of coalition of which the Board has had notice.
- c) All substantial amendments to the Company's governance rules and regulations.
- d) The policies, if any, in the area of treasury stock that the Company intends to pursue on the basis of any approvals granted by the shareholders at the General Shareholders' Meeting.
- e) All changes to the composition and to the rules of organization and operation of the Board and the Committees thereof, or to the duties and

positions of each Director in the Company, as well as any other modification relevant to the corporate governance system."

In addition, Article 46.2 of the Regulations of the Board of Directors provides that "The Board of Directors shall adopt appropriate measures to ensure that the semiannual, quarterly and any other financial information that it may be prudent to make available to the Securities Markets is prepared in accordance with the same principles, standards and professional practices used to prepare the annual financial statements and is as reliable as such financial statements. For this latter purpose, such information shall be reviewed by the Audit and Compliance Committee."

In this respect, the most significant events related to the Company and all the relevant information (which might have an effect on the listing) which is released is first communicated to the National Securities Market Commission as a significant event. Once the information has been submitted to the National Securities Market Commission through the appropriate channels, it is released to the media, international, national and regional news agencies and to analysts, and it is published on the corporate web page (www.iberdrola.com). For such purposes, all the information given to the media, agencies, analysts and investors is released at the same time.

During fiscal year 2005, all quarterly submissions of results were re-transmitted live via the Internet through the Company's website, with both image and sound and simultaneous translation into English, as well as by telephone, in accordance with the recommendations of the National Securities Market Commission.

Likewise, following the recommendations of the National Securities Market Commission, the website has continued to allow direct access to the recordings of the complete event of submission of results during a term of 3 months until the following quarterly publication.

Iberdrola already complied with all recommendations regarding meetings with analysts, institutional investors and other securities market professionals, contained in the communication of the National Securities Market Commission of December 22, 2005, before publication thereof.

B.1.27. Is the Secretary of the Board of Directors a Director?

YES NO

B.1.28. Indicate the mechanisms, if any, used by the Company to preserve the independence of the auditors, the financial analysts, the investment banks and the rating agencies.

External Auditor

Iberdrola's "Auditor Hiring Policy," approved by the Audit and Compliance Committee at its November 23, 2005 meeting, contains the internal regulations of the Company that have been established in order to preserve the independence of the Auditor in its review of the Company's annual financial statements.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Thus, Article 44.2.e) of the By-laws provides that one of the powers of the Audit and Compliance Committee is to "receive information from the Auditors regarding matters that might risk the independence thereof..."

In addition, Article 47.3 of the Regulations of the Board of Directors provides that "the Audit and Compliance Committee shall not submit a proposal to the Board of Directors, and the Board of Directors shall not submit a proposal to the General Shareholders' Meeting, for appointment as the Company's Auditor of an audit firm when it has evidence that:

- Such firm is affected by any circumstance of incompatibility pursuant to the legal provisions governing audits.
- the fees that the Company intends to pay it for any and all services are greater than five percent of its total income during the last fiscal year."

Article 5(b) of the Regulations of the Audit and Compliance Committee provides that one of the main duties of such Committee will be to "ensure the independence of the auditors..." For such purposes, the Committee establishes a number of control mechanisms, such as:

- Requiring an annual certificate of independence of each of the Iberdrola Group's audit firms, which includes both the firm as a whole and the members of the team that participate in the audit process.

- Prior authorization by the Committee of all work other than audit work, according to a procedure approved by the Company's Board of Directors at its March 26, 2003 meeting upon a proposal made by the Committee. For purposes of such prior approval, the Committee takes into account:

1. The nature of the engagement.
2. An estimate of the fees and hours to be billed.
3. The reason for which the organization recommends that the professional services to be retained might or should be provided by the audit firm in question.
4. The procedure set forth to award the contract: either a request for quotations, by default, or by direct negotiation after a showing that there is no equivalent alternative.
5. An express statement that there is no circumstance or consideration that should be taken into account by the Committee to assess the independence of the auditor.

- The annual evaluation of the auditor, in which various aspects of its work are assessed, and specifically, the existence of any circumstance that may jeopardize its independence.

- The analysis of the quality assurance and independence safeguarding internal procedures implemented by the audit firms.

- The establishment of guidelines for the segregation of responsibilities at the time of retaining the auditors; therefore, after the auditor has been appointed by the shareholders acting at the General Shareholders' Meeting, the audit contract is negotiated by the Procurement Division of Iberdrola, which reports to the Economy and Finance Division. This relation is independent from the relation existing during the audit process, which is under the authority of the Administration, Control and Regulation Division of the Company.

- The rotation of partners and managers of the audit firm. The last rotation by Deloitte as Iberdrola's main auditor took place in 2003.

Financial Analysts, Investment Banks and Rating Agencies

The principles on which the relation of the Company with financial analysts, investment banks and rating agencies are based are transparency and non-discrimination. The Economy and Finance Division coordinates the relations with them and deals with all their requests for information and with the requests submitted by institutional or retail investors (in the case of retail investors, through the Office of the Shareholder). On the other hand, the Strategy and Development Division grants, within the framework of its powers, advisory mandates from time to time to Investment Banks in coordination with the Economy and Finance Division.

The independence of financial analysts is protected by the existence of a specific Division in charge of dealing with analysts. This guarantees an objective, fair and non-discriminatory treatment of analysts.

To actualize the principles of transparency and non-discrimination, always in strict compliance with regulations regarding the Securities Market, the Company has a number of communication channels:

- Personalized assistance for Analysts, Investors and Rating Agencies.
- Publication of information regarding quarterly figures.
- E-mail through the web page (accionistas@iberdrola.com) and a toll-free line for shareholders (900 100 019).
- Presentations either in person or re-transmitted over the telephone and Internet.
- Release of announcements and news.

All this information is also available on the Company's website, www.iberdrola.com.

B.1.29. Indicate whether the audit firm performs other non-audit work for the Company and/or its Group. If so, state the amount of the fees paid for such work and the percentage they represent of the aggregate fees charged to the Company and/or its Group.

YES NO

	Company	Group	Total
Amount of other non-audit work (thousands of Euros)	93	760	853
Amount of non-audit work/ Aggregate amount billed by the audit firm (%)	8.000	25.000	20.000

B.1.30. Indicate the consecutive number of years for which the current audit firm has been auditing the annual financial statements of the Company and/or its Group. In addition, please state the percentage

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

represented by such number of years with respect to the total number of years in which the annual financial statements have been audited:

	Company	Group
Number of consecutive years	13	13

	Company	Group
Number of years audited by the current audit firm / Number of years in which the company has been audited (%)	100.000	100.000

B.1.31. Indicate the interests of members of the Board of Directors in the share capital of companies that engage in the same, similar or complementary activities, both with respect to the Company and its Group, and which have been reported to the Company. In addition, state the position or duties of such Directors in such companies:

Individual or corporate name of director	Name of company in which shares are held	% interest	Position or duties
Mr. IÑIGO DE ORIOL E YBARRA	EMPRESA DE ALUMBRADO ELÉCTRICO DE CEUTA, S.A.	2.110	LEGAL COUNSEL

B.1.32. Indicate whether there is any procedure to for Directors to hire external advisory services and, if so, describe it:

YES NO

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Description of procedure

Procedure set forth in Article 32 of the Regulations of the Board of Directors:

1. In order to be assisted in the performance of his duties, any Director may request the hiring of legal, accounting, technical, financial, commercial or other expert advisors, whose services shall be paid for by the Company.

The assignment must deal with specific issues of certain significance and complexity arising during the performance of the Director's duties.

2. The request for an expert to be hired shall be channeled through the Chairman or the Secretary of the Board of Directors, who may subject it to the prior approval of the Board of Directors; such approval may be denied in well-founded instances, including the following circumstances:

- a) That it is not necessary for the proper performance of the duties entrusted to the Directors.
- b) That the cost thereof is not reasonable in light of the significance of the issues and the assets and income of the Company.
- c) That the technical assistance sought may be adequately provided by the Company's own experts and technical personnel.
- d) That it may entail a risk to the confidentiality of the information that must be made available to the expert.

In addition, Article 16.3 of the Regulations of the Nominating and Compensation Committee and Article 24.1 of the Regulations of the Audit and Compliance Committee provide that such Committees may obtain advice from outside professionals who will send their reports directly to the Chairman of the Committee.

B.1.33. Indicate whether there is any procedure for Directors to obtain sufficiently in advance the information required to prepare for meetings of management-level decision-making bodies and, if so, describe it:

YES NO

Description of procedure

Article 27.4 of the Regulations of the Board of Directors, further developing the provisions of Article 39.2 of the By-laws, provides that "The call to meeting of the Board of Directors shall be carried out by letter, fax, telegram, e-mail or any other means, and shall be authorized under the signature of the Chairman, or under the signature of the Secretary or Assistant Secretary by order of the Chairman. Notice of the call shall be given in a manner such that the Directors receive it not later than the third day prior to the date of the meeting, except in the case of emergency meetings. Excepted from the foregoing provision shall be those instances in which these Regulations prescribe that greater notice be given. The call shall always include the agenda for the meeting and an attachment containing any required information."

In addition, Article 33.2(a) of the Regulations of the Board of Directors provides that the Director is specifically required to "properly prepare the meetings of the Board and, if applicable, the meetings of the Executive Committee or of the Committees of which the Director is a member, for which purposes the Director must diligently inform himself of the running of the Company."

B.1.34. Indicate whether there is any liability insurance policy for the benefit of the Company's Directors.

YES NO

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

B.2. Committees of the Board of Directors

B.2.1. List the management-level decision-making bodies:

Name of decision-making body	Number of members	Powers
BOARD OF DIRECTORS	19	AS A GENERAL RULE, THE BOARD OF DIRECTORS, WHICH HAS THE WIDEST POWERS AND AUTHORITY TO MANAGE, DIRECT, ADMINISTER AND REPRESENT THE COMPANY, WILL ENTRUST THE DAY-TO-DAY MANAGEMENT OF THE COMPANY TO THE REPRESENTATIVE MANAGEMENT DECISION-MAKING BODIES AND WILL FOCUS ITS ACTIVITY ON THE GENERAL DUTY OF SUPERVISION AND ON CONSIDERATION OF THOSE MATTERS WHICH ARE OF PARTICULAR IMPORTANCE TO THE COMPANY (ARTICLE 34.2 OF THE BY-LAWS).
EXECUTIVE COMMITTEE	8	ALL OF THE POWERS INHERENT IN THE BOARD OF DIRECTORS, EXCEPT THOSE POWERS THAT MAY NOT BE DELEGATED PURSUANT TO LEGAL OR BY-LAWS RESTRICTIONS, TO WIT: THE RENDERING OF ACCOUNTS, THE PRESENTATION OF BALANCE SHEETS TO THE GENERAL SHAREHOLDERS' MEETING AND THOSE POWERS WHICH ARE GIVEN BY THE SHAREHOLDERS AT THE GENERAL SHAREHOLDERS' MEETING TO THE BOARD OF DIRECTORS WITHOUT THE POWER OF DELEGATION (ARTICLES 43 OF THE BY-LAWS AND 24 OF THE REGULATIONS OF THE BOARD OF DIRECTORS).
CHAIRMAN	1	CHAIRMAN OF THE COMPANY, OF THE BOARD OF DIRECTORS AND OF THE EXECUTIVE COMMITTEE, WHICH HE WILL PERMANENTLY REPRESENT WITH THE BROADEST POWERS, BEING AUTHORIZED IN URGENT CASES TO ADOPT SUCH MEASURES AS THE CHAIRMAN DEEMS ADVISABLE IN THE INTERESTS OF THE COMPANY.
VICE CHAIRMAN & CEO	1	THE VICE CHAIRMAN & CEO, AS AN INDIVIDUAL DECISION-MAKING UNIT, HAS BEEN DELEGATED ALL POWERS THAT MAY BE DELEGATED UNDER THE LAW AND THE BY-LAWS.

STRATEGY AND INVESTMENT COMMITTEE

Name	Position

B.2.3. Describe the rules of organization and operation of, and the duties allocated to, each of the Board committees.

Article 42.1 sets forth that the "Board of Directors must create and maintain an Executive Committee, an Audit and Compliance Committee and a Nominating and Compensation Committee."

Executive Committee

Pursuant to Article 43 of the By-Laws, the Executive Committee will be composed of the number of members decided by the Board of Directors, with a minimum of five (5) Directors and a maximum of eight (8). In all cases, members of the Executive Committee will include the Chairman of the Board of Directors, who will preside over meetings of the Executive Committee, the Vice Chairman or Vice Chairmen and the Chief Executive Officer, if any. The Secretary of the Board of Directors or, in the absence thereof, the Assistant Secretary of the Board of Directors or, in the absence of both, the member of the Committee appointed from among the members attending the meeting in question, will act as Secretary of the Committee (Article 43.2 of the By-Laws).

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

The Executive Committee will meet at least two (2) times per month and as many other times as deemed appropriate by the Chairman, who may also suspend one or more of the ordinary meetings when deemed appropriate in the sole judgment of the Chairman. The Executive Committee will deal with all matters within the power of the Board of Directors which, in the sole judgment of the Committee, should be resolved without further delay, excepting only the rendering of accounts, the presentation of the balance sheets at the General Shareholders' Meeting and those powers which are given by the shareholders at the General Shareholders' Meeting to the Board of Directors without the power of delegation. Resolutions adopted by the Executive Committee will be reported to the Board of Directors at its next meeting.

The Executive Committee also performs the duties of the STRATEGY AND INVESTMENT COMMITTEE, proposing or reporting to the Board of Directors all strategic decisions, investments and divestitures that are important for the Company or the Group, ensuring that they are in line with the budget and strategic plans and undertaking the analysis and monitoring of business risks.

The provisions of the By-Laws regarding the operation of the Board of Directors will apply to the Executive Committee, to the extent they are not incompatible with the nature thereof.

Audit and Compliance Committee

Pursuant to Article 44 of the By-Laws, the Board of Directors will create a permanent Audit and Compliance Committee, which shall be composed of a minimum of three (3) Directors and a maximum of five (5) Directors appointed by the Board of Directors from among the external Directors who are not members of the Executive Committee.

The Audit and Compliance Committee will have a Chairman and a Secretary appointed by the Board of Directors from among the members of such Committee.

The members of the Audit and Compliance Committee will carry out their duties for a maximum period of four (4) years, and may be re-elected. The position of Chairman will be held for a maximum period of four (4) years, after which period such person may not be re-elected until the passage of one year from ceasing to act as such, without prejudice to such person continuing or being re-elected as a member of the Committee.

In all events, the Audit and Compliance Committee will have the power to:

- (a) Report to the General Shareholders' Meeting with respect to matters raised therein by shareholders regarding its powers.
- (b) Propose appointments of the Company's Auditors to the Board of Directors for submission to the General Shareholders' Meetings.
- (c) Supervise the management of the Internal Audit Area, which will be functionally controlled by the Chairman of the Audit and Compliance Committee.
- (d) Know the process for gathering financial information and associated internal systems for monitoring risks relevant to the Company.
- (e) Receive information from the Auditors regarding matters that might risk the independence thereof which are related to the auditing procedure and

generally regarding any other information provided for in the legislation regarding the auditing of financial statements and in the technical auditing regulations in effect at any time.

(f) Inform itself in advance of the Company's annual corporate governance report and ensure compliance with legal requirements and those of the Codes of Professional Conduct and Good Governance adopted by the Board of Directors.

(g) Such other powers, if any, that may be assigned to it by the Board of Directors.

For purposes of the operation of the Committee, it shall meet as many times as its Chairman deems necessary for the fulfillment of its obligations, and at least four (4) times per year, or when requested by one-half of its members.

Meetings of the Committee will be validly held when one-half plus one of its members are present in person or by proxy, and will adopt resolutions by majority of the members present in person or by proxy. In the event of a tie, the Chairman will have the tie-breaking vote.

Finally, this Committee will submit for approval of the Board of Directors a Report of its activities during the fiscal year, which will thereafter be made available to shareholders and investors.

Nominating and Compensation Committee

Pursuant to Article 25 of the By-Laws, the Board of Directors will create a permanent Nominating and Compensation Committee, which will be an internal informational and consultative body without executive powers, and which will have the information, advisory and proposal-making powers within its scope of action as set forth in paragraph second of this Article.

The Nominating and Compensation Committee will be composed of a minimum of three (3) Directors and a maximum of five (5), appointed by the Board of Directors from among the external Directors. The Board of Directors will also appoint the Chairman thereof from among the members of such Committee, as well as its Secretary, who need not be a member of the Committee.

Unless otherwise decided by the Board of Directors, the members of the Nominating and Compensation Committee will hold their positions for so long as they remain Directors of the Company. Renewal, re-election to and removal from office of the members of the Committee will be governed by resolution of the Board of Directors.

The Nominating and Compensation Committee shall have the power to supervise the procedure for selecting Directors and senior-level managers (the latter at the proposal of the Chief Executive Officer, if any) of the Company, and of its Group and those other companies in which the Company is responsible for management, as well as to assist in the Board of Directors in the determination and supervision of the compensation policy for such persons.

In particular, the Nominating and Compensation Committee will have the power to:

(a) Report on and review the criteria that should be followed in composing the Board of Directors and in selecting candidates.

- (b) Bring Director designation proposals to the Board of Directors for the nomination thereof and subsequent submission to a decision by the shareholders at the General Shareholders' Meeting.
- (c) Propose to the Board of Directors the members who should make up each of the Committees.
- (d) Propose to the Board of Directors the system and amount of annual Director compensation.
- (e) Report to the Board of Directors regarding the appointment of senior-level managers of the Company, at the proposal of the Chief Executive Officer, if any.
- (f) Report to the Board of Directors regarding the compensation of the Chairman, Chief Executive Officer and senior-level managers, the latter at the proposal of the Chief Executive Officer, if any.
- (g) Report on incentive plans and pension supplements.
- (h) Periodically review the compensation programs, evaluating the adequacy and results thereof.
- (i) Such other powers, if any, that are assigned to it by the Board of Directors.

For the purposes of operation of the Committee, it shall meet as many times as needed, in the opinion of its Chairman, to fulfill its obligations, and at a minimum once each quarter or when so requested by one-half of its members. The Committee will validly meet when one-half plus one of its members are present in person or by proxy, and will adopt its resolutions by majority of the members present in person or by proxy. In the case of a tie, the Chairman shall have the tie-breaking vote.

B.2.4. Indicate, if applicable, the advisory and consulting powers and the powers of delegation of each of the committees:

Name of Committee	Brief Description
EXECUTIVE COMMITTEE	SEE B.2.3
AUDIT AND COMPLIANCE COMMITTEE	SEE B.2.3
NOMINATING AND COMPENSATION COMMITTEE	SEE B.2.3

B.2.5. Indicate, if applicable, the existence of regulations of the Board committees, where such regulations may be consulted and the amendments made during the year. Also indicate if any annual report of the activities performed by each committee has been voluntarily prepared.

Both the Audit and Compliance Committee and the Nominating and Compensation Committee have their own Regulations, which are available on the Company's web site: www.iberdrola.com.

On October 20, 2004 the Board of Directors of IBERDROLA, S.A. approved an amendment to both sets of Regulations, to adapt their contents to the provisions of the new By-Laws approved on April 3, 2004 and the Regulations of the Board of Directors approved on February 25, 2004.

As provided in Article 19.2 of the Regulations of the Audit and Compliance Committee, further developing the provisions of Article 44.4 of the By-laws, this Committee will "prepare an annual Report of its activities, which, once approved by the Board of Directors, shall be made available to the shareholders for purposes of the Ordinary Shareholders' Meeting." The

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Reports from 1999 to date prepared by this Committee are available on the Company's website.

Article 19.2 of the Regulations of the Nominating and Compensation Committee also provides that "within three (3) months following the close of the Company's fiscal year, the Committee shall deliver a report to the Board of Directors detailing its work for the fiscal period covered by the report."

B.2.6. If there is an Executive Committee, please indicate its delegation powers and its level of independence in the exercise of its duties to adopt resolutions regarding the management of the company.

Both Article 43 of the By-Laws and Article 24 of the Regulations of the Board of Directors provide that "there shall be an executive committee permanently operating as the representative of the Board of Directors, which committee shall be called the Executive Committee, and which shall have all the powers inherent to the Board of Directors, unless otherwise determined by the Board of Directors and except for those powers that may not be delegated pursuant to legal or by-law restrictions."

Article 24.4 provides that "The Executive Committee shall deal with all matters within the power of the Board which, in the sole judgment of the Committee, should be resolved without further delay, excepting only the rendering of accounts, the presentation of the balance sheets at the General Shareholders' Meeting and those powers which are given by the shareholders at the General Shareholders' Meeting to the Board without the power of delegation."

B.2.7. Indicate whether the composition of the Executive Committee reflects the participation of the different directors in the Board of Directors based on their category:

YES NO

If no, please explain the composition of your Executive Committee

B.2.8. If the Company has a Nominating Committee, indicate whether all of its members are external directors:

YES NO

C RELATED TRANSACTIONS

C.1. Describe the relevant transactions that involve a transfer of resources or obligations between the Company or entities within its Group and the Company's significant shareholders:

ASOCIACIÓN ESPAÑOLA DE LA INDUSTRIA ELÉCTRICA (UNESA)	FINANCING AGREEMENTS: INSTALLMENTS	5,280

C.4. Identify, if applicable, the conflict of interest situations in which directors of the company are involved, pursuant to Section 127 ter of the Companies Law.

The specific conflict of interest situations that arose during 2005 were resolved in accordance with the procedures set forth in the applicable rules and regulations described in section C.5 of this Report.

In this regard, all of Iberdrola's financial transactions in which significant shareholder BBVA participated (i) were negotiated and resolved without the participation of the Proprietary Director Mr. Jesús María Cadenato or of any other of the Directors who previously had such status until April 20, 2005, (ii) were submitted to the Board of Directors for approval, and (iii) were made public pursuant to applicable regulations.

The same procedure was applied to supplies and other transactions contracted by Iberdrola with Lázaro Ituarte, S.A., with Gamesa Corporación Tecnológica, S.A. and with Corporación Eólica CESA, S.L., in which the Director Mr. Juan Luis Arregui Ciársolo is or was during 2005 a shareholder, Director, and Chairman of the Board, respectively, as well as with Turkish company DAS Engineering & Energy Investments Inc., in which a brother of the Director Mr. Lucas María de Oriol López-Montenegro was a member of the Board at the time of execution with the Company of a services agreement for the development of energy business in Turkey.

Finally, it must be stressed that the Vice Chairman & Chief Executive Officer, Mr. José Ignacio Sánchez Galán, did not participate in the resolution adopted by the Board of Directors at its April 20, 2005 meeting, whereby it was approved, upon a proposal made by the Chairman, Mr. Iñigo de Oriol e Ybarra, that upon his ceasing to hold office as Chairman of the Board of Directors of Iberdrola, pursuant to the provisions of the Regulations of the Board of Directors, he would be replaced in such position as Chairman by the current Vice Chairman & Chief Executive Officer, Mr. José Ignacio Sánchez Galán.

C.5. Describe the mechanisms used to detect, determine and resolve potential conflicts of interest between the company and/or its Group, and its directors, managers or significant shareholders.

Directors

Firstly, Article 36.1 of the Regulations of the Board of Directors defines conflict of interest situations in which Directors may be involved as "A conflict of interest shall be deemed to exist in those cases in which there is a conflict, whether direct or indirect, between the interest of the Company and the personal interest of the Director."

The Article also provides that "A personal interest of the Director shall be deemed to exist when a matter affects the Director or a Related Person. For the purposes of these Regulations, the following shall be deemed Related Persons:

- a) The Director's spouse or other persons related to the Director by a like relationship of affection.
- b) The ascendants, descendants or siblings of the Director or of the Director's spouse (or another person related to the Director by a like relationship of affection).
- c) The spouses of the Director's ascendants, descendants and siblings.
- d) The companies in which the Director, acting personally or through a third party, falls within any of the cases provided for in Section 4 of Law 24/1988 of July 28 on the Securities Market."

In the event legal entities are appointed as Directors, the following "shall be deemed to be Related Persons:

- a) The shareholders who, in respect of the legal entity acting as Director, fall within any of the cases provided for in Section 4 of Law 24/1988 of July 28 on the Securities Market.
- b) The companies that form part of the same group, as such is defined in Section 4 of Law 24/1988 of July 28 on the Securities Market, and the shareholders thereof.
- c) The individual acting as a representative, the directors (in fact or in law) and the liquidators of, and the representatives holding general powers of attorney granted by, the legal entity acting as Director.
- d) Those persons who, in respect of the representatives of the legal entity acting as Director, are deemed related persons pursuant to the provisions of the preceding paragraph applicable to individuals acting as Directors."

The rules governing these conflicts of interest are described in Article 36.2 of such Regulations:

- a) Communication: the Director must give notice to the Board of Directors, in the person of the Chairman or the Secretary, of any conflict of interest in which the Director is involved.
- b) Abstention: the Director will not attend or participate in the deliberation and voting on those matters in which the Director is affected by a conflict of interest.

Proprietary directors will abstain from voting on those matters that may entail a conflict of interest between the shareholders who have proposed their appointment and the Company.

c) Transparency: in the Corporate Governance Report, the Company will report any cases of conflict of interest involving the Directors and of which the Company is aware by reason of notice given thereto by the Director affected by such conflict or by any other means.

These rules are supplemented by the provisions of Article 40 of the Regulations of the Board of Directors, whereby any transaction by the Company with its Directors "shall be subject to the approval of the Board of Directors, which may make it conditional upon a prior report from the Audit and Compliance Committee." In this sense, "The Board of Directors (and the Audit and Compliance Committee, when a prior report is requested from it) shall evaluate the transaction in light of market conditions."

However, "in the case of customary or recurring transactions in the ordinary course of business, it shall be sufficient to give a generic approval of the kind of transaction and of the conditions for performance thereof."

The aforementioned rules have been further developed through the "Procedure for Conflicts of Interest and Related Transactions Involving Directors and Senior Management," approved by the Board of Directors at its May 25, 2005 meeting, whereby such transactions are negotiated and decided without the participation of the affected Director, submitted to the Board of Directors for approval, and subsequently made public pursuant to applicable regulations.

Article 7 of the Internal Regulations for Conduct in the Securities Markets provides that the members of the Board of Directors as well as any other person who, pursuant to applicable regulations, is designated by the Regulatory Compliance Unit, must refrain from taking part in or influencing decisions that represent or may represent a conflict of interest between such members' or persons' own interests and those of the Company and/or the Group. Any of these members or persons who believe that they may be subject to a conflict of interest shall consult with the Unit before taking part in or influencing any such decisions.

In this sense, the Board of Directors, at the meeting held on July 9, 2003, resolved to create the Regulatory Compliance Unit, which is presided over by the General Secretary and the Secretary of the Board and also includes the Director of Capital Management and the Chief of the Accounting Rules and Internal Control Department.

Managers

The above-mentioned "Procedure for Conflicts of Interest and Related Transactions Involving Directors and Senior Management" subject conflicts affecting managers who report directly to the Vice Chairman & Chief Executive Officer to the same rules of communication, abstention and approval that apply to the Directors.

In addition, the Code of Professional Conduct, which was approved by the Board of Directors at its meeting on February 27, 2002, is applicable to all managers and employees of the Group, regardless of their rank, and dedicates a specific chapter to conflicts of interest.

In dealing with this material, the Code provides that "professional decisions must be based on the best defense of the interests of the Iberdrola Group and may not be influenced by personal or family relationships or any other private interests of the

Group professionals.”

The Code also includes examples of situations that could give rise to a conflict of interest:

- a) Being involved personally or through relatives in a financial transaction or operation to which the Iberdrola Group is a party.
- b) Negotiating or formalizing contracts on behalf of the Iberdrola Group with individuals or entities in which the Group professional has a relative –up to the fourth degree by blood relationship or second degree by marriage– holding a management position, whether as a significant shareholder or director.
- c) Being a significant shareholder or director of customers, suppliers, or direct or indirect competitors of the Iberdrola Group for private purposes.
- d) Using the resources of the Iberdrola Group for private purposes.

The Code of Professional Conduct also provides that “Under no circumstance may professional activities be performed within the Iberdrola Group that entail or might entail a conflict of interest, except with prior written authorization of the Human Organization and Resources Division.” To that effect, “Written notice must be given to an immediate superior regarding any occurrence or possible occurrence of a conflict of interest. The superior shall notify the Human Organization and Resources Division, which shall maintain and manage a Registry covering this type of situation.”

Significant shareholders

The transactions by the Company with significant shareholders are regulated by Article 40 of the Regulations of the Board of Directors, which provides that such transactions “shall be subject to the approval of the Board of Directors, which may make it conditional upon a prior report from the Audit and Compliance Committee.” In this sense, “The Board of Directors (and the Audit and Compliance Committee, when a prior report is requested from it) shall evaluate the transaction in light of market conditions”, and will also examine these transactions with significant shareholders “in light of the principle of equal treatment of shareholders.”

As to transactions between the Company and its Directors, such Article also provides that “in the case of customary or recurring transactions in the ordinary course of business, it shall be sufficient to give a generic approval of the kind of transaction and of the conditions for the performance thereof.”

Article 30 of the By-Laws expressly refers to conflicts of interest of shareholders providing that “Shareholders participating in a merger or split-off with the company or who are called to subscribe to an increase in capital with the exclusion of pre-emptive rights or to acquire by overall assignment all of the Company’s assets, may not exercise their voting rights for the approval of such resolutions by the shareholders acting at the General Shareholders’ Meeting.”

This Article also establishes that “The provisions of the foregoing paragraph shall also be applicable when the resolutions affect, (i) in the case of an individual shareholder, the entities or companies controlled by such individual, and (ii) in the case of shareholders which are legal entities, the entities or companies belonging to its Group (in the sense indicated in paragraph four of Article Twenty-Nine), even when these latter companies or entities are not shareholders.”

It finally provides that “If the shareholder prohibited from voting as set forth above attends the General Shareholders’ Meeting, such shareholders’ shares shall be deducted from the shares in attendance at the General Shareholders’ Meeting for

purposes of determining the number of shares upon which the majority needed for approval of the resolution with respect to which there is a conflict of interest shall be calculated."

Pursuant to Article 54 of the By-Laws, this voting prohibition will have no effect "upon the occurrence of the following circumstances:

- (a) when the Company is the target of a public tender offer aimed at the share capital as a whole; and
- (b) when, as a result of the public tender offer, an individual or a legal entity, or several of them acting jointly, acquire an interest equal to two-thirds of the voting capital of the Company; provided the full consideration thereof consists only of cash; or, alternatively,
- (c) when, as a result of the public tender offer, an individual or a legal person, or several of them acting jointly, acquire an interest equal to three-quarters of the voting capital of the Company, provided that the consideration thereof consists, in whole or in part, of securities, without giving the recipient an alternative right to receive such consideration wholly in cash."

Article 55 of the By-Laws provides that the removal of this limitation shall be effective from the date of publication of the result of the settlement of the offer in the Listing Bulletin (*Boletín de Cotización*) of the Bilbao Stock Exchange, and the Directors of the Company will have the power –and the duty– to execute the corresponding public instrument formalizing the by-law amendment and to seek registration thereof with the Commercial Registry.

D RISK CONTROL SYSTEMS

D.1. General description of the risk control policy adopted by the company and/or its group, describing and assessing the risks covered by the system and a justification for the adjustment of such system to the profile of each kind of risk.

The General Risk Policy approved by the Board of Directors of Iberdrola in November 2004 is intended to provide the maximum level of guarantees to the shareholders, to other stakeholders and the market in general, as well as to increase the creation of value through an adequate management of the risk-opportunity combination.

Through this Policy, Iberdrola commits itself to developing all its capabilities so that relevant risks of any kind are adequately identified, measured, managed and controlled. For these purposes, a "relevant risk" is any threat that an event, action or omission might prevent the Iberdrola Group from successfully attaining its goals and executing its strategies.

This commitment has been undertaken by the Board of Directors as it has been set forth in the By-laws, specifically in Article 34.3.c, and it is extended to all the activities and business of the Company, including affiliated companies over which the Company exercises effective control.

In order to implement the commitment assumed, the Board of Directors and the Executive Committee have the cooperation of the Audit and Compliance Committee that, in its capacity as consultative body, supervises and reports on the adequacy of the internal control and evaluation system for the relevant risks, all the above taking into account the following Basic Action Principles:

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

- INTEGRATE the risk/opportunity vision into the management of the company by defining the risk strategy and profile, and incorporating this variable into strategic and operating decisions.
- SEGREGATE, at operating level, the duties of the risk-taking areas and of the areas in charge of analyzing, controlling and supervising risks.
- ASSURE corporate and financial stability in the short and long-term, maintaining an appropriate balance between risk, value and benefit.
- ENSURE the correct use of financial risk hedging instruments and registration thereof as required by the applicable accounting and financial standards.
- REPORT with transparency about the Group's risks and the operation of the systems developed for control thereof to the regulators and main external agents, maintaining appropriate channels to benefit communication.
- FOSTER the development of a culture of risk/opportunity control and management within the Iberdrola Group.
- ALIGN all the specific risk policies that need to be developed with this general policy.
- COMPLY with the applicable laws and regulations related to the control, management and supervision of risks.
- ADOPT the international best practices on Transparency and "Good Governance" relating to risk control, management and supervision as a benchmark for continuous improvement.

In order to implement this policy and put these principles into effect, a Comprehensive Risk Control and Management System is established, supported by an appropriate definition and allocation of duties and responsibilities at the operating level, by specific policies and limits, and by support procedures, methodologies and tools that are described in depth in sections D.4. and D.2., respectively.

Iberdrola's Comprehensive Risk System – which was granted the ISO 9001:2000 quality certificate by AENOR in December 2005 – covers all activities and business divisions of the Company, including affiliated companies over which effective control is exercised, and contemplates all kinds of risks existing in deregulated and regulated activities, at both the domestic and the international level.

- Market risks
- Credit risks
- Business risks
- Regulatory risks
- Operating risks

The control and management of each of these risks at the operating level is carried out by means of appropriate specific systems, both in terms of the tools used and the organizations involved, which fall under the scope of the Group's Comprehensive Risk System.

Owing to its universal and dynamic nature, the systems allow for the consideration of new risks that may affect the Iberdrola Group following changes in its operating

environment or revisions of objectives and strategies, as well as adjustments resulting from ongoing monitoring, verification, review and supervision activities.

D.2. Indicate the control systems that are currently in place to assess, mitigate or reduce the main risks of the company and its group.

As mentioned in the foregoing section, Iberdrola has a "Comprehensive Risk System" in place, which has been certified under ISO 9001:2000 and is supported by:

- A STRUCTURE OF RISK POLICIES AND LIMITS, both qualitative and quantitative, ensuring that risk management is carried out in accordance with the Company's risk profile and effectively contributing to the achievement of the objectives set forth in the Strategic Plan with controlled volatility.

- Monitoring and control of the PROFIT AND LOSS STATEMENT RISKS, which has the twofold purpose of controlling the volatility of the annual income of the Iberdrola Group and optimizing its indebtedness.

- Analysis and control of RISKS ASSOCIATED WITH NEW INVESTMENTS, which allows for the making of balanced decisions in terms of profitability-value-risk by considering the analysis of the risks associated with each investment as an essential element in decision-making.

The process that supports and articulates the development of this system is formed by sequential stages that facilitate the transparency of roles and responsibilities and afford it the necessary systematic elements. The organizations participate in each of the stages according to the responsibilities defined and the procedures in place (see section D.4). All of the foregoing is subject to independent control and monitoring and ongoing supervision.

Due to inherent complexity in the quantification, control and management of risks, Iberdrola has a number of specific risk alert and simulation TOOLS, at both the corporate integration level and the business/risk integration level. The following are worth mentioning:

CORPORATE INTEGRATION TOOLS:

1. Annual Profit and Loss Statement:

This is an integrated tool that reflects the performance of the Group's different business divisions, to which a probability analysis is applied by means of a Monte Carlo simulation. The integrated risk profile of the Group is thus obtained, and so is the individual impact of each of the risks considered.

2. Strategic Plan:

The methodology used is based on the definition and analysis of alternative scenarios that permit a quantification of the effects of the main risks affecting compliance with the goals set in the Strategic Plan and in the definition of action strategies.

3. Analysis of new investments:

All strategic investments are subjected to an exhaustive risk analysis, by means of which the market, credit, business, regulatory, operational and other risks that may compromise the value/profitability objectives of the project are identified and

quantified (by means of a Monte Carlo simulation). This analysis is included, as relevant information, in the decision-making process corresponding to such investment.

BUSINESS/RISK TOOLS:

There are also other tools with more specific application to a given business transaction or risk (fuel, power purchase/sale transactions, financial risks, client risks, etc.), which are used to manage that particular area and are integrated with the corporate systems on an organizational and reporting level.

D.3. In the event some of the risks affecting the company and/or its group materialized, indicate the circumstances giving rise to them and whether the established control systems have worked.

As described in section D.1, Iberdrola's Comprehensive Risk System contemplates all risks inherent in the activities carried out by the Group and in the different markets in which it operates, and which may therefore materialize to a greater or lesser extent throughout the year, which justifies the existence of specific systems aimed at the control and management thereof.

Regarding the set of risks associated with deregulated activities that have had a significant impact on the Profit and Loss Statement, especially notable have been:

- The coming into effect, on January 1, 2005, of the Directive that governs trading in CO2 emission rights in the European Union. In Spain, this Directive has been developed by Royal Decree-Law 5/2004 and Royal Decree 1866/2004; the latter provides for the National Plan for Allocation of Emission Rights, which assigns the electricity industry 268.98 million tons of CO2 for the 2005-2007 period, of which 38.34 million correspond to Iberdrola's facilities; this amount nears the average emissions estimated by the Iberdrola Group.
- The steep drop in hydraulic production (-47.3% compared to the previous year), as a result of one of the lowest rainfalls in the last 60 years.
- The high international prices of fuels and emission rights.

However, the current generation mix, together with the heavy investments made in gas and renewables technologies under the current Strategic Plan have allowed for a significant mitigation of the impact of such risks.

In the area of regulated activities, it must be noted that, in 2005, regulated income in Spain was not sufficient to cover the system costs, which has resulted in an estimated deviation of 3,595 million euros in the industry. Pursuant to Royal Decree-Law 5/2005, of March 11, the financing percentage of such rate deviation corresponding to Iberdrola comes to 35.01%, which equals 1,259 million euros before taxes.

In accordance with the principle of adequacy of rates that governs compensation of all regulated activities and costs (which principle has been upheld by the courts), as well as the obligation to compensate regulated activities through the use of objective, transparent and non-discriminatory standards, as laid down in Section 15 of the Electricity Industry Law, such deviation must be reimbursed to the companies financing it.

As provided in Section 1 of Royal Decree 1556/2005, of December 23, which establishes electricity rates for 2006, negative balances for fiscal year 2005 will be

reimbursed with a charge to the collection on electricity rates in the following fiscal years.

D.4. Indicate whether there is any committee or other decision-making body in charge of establishing and supervising these control mechanisms, and describe the duties thereof.

- The BOARD OF DIRECTORS and the EXECUTIVE COMMITTEE, in the exercise of their duties, are in charge of ensuring the adequate identification, measurement, management and control of all significant risks, of defining the Company's strategy and risk profile, and of approving internal policies and the information to be released regarding risks.

- The AUDIT AND COMPLIANCE COMMITTEE, as a consultative body reporting to the Board of Directors, supervises compliance with risk policies, procedures and limits and reports on the adequacy of the internal system for assessing and controlling risks relevant to the Company.

To that effect, it is supported by the INTERNAL AUDIT DIVISION, which functionally reports to the Chairman of the Audit and Compliance Committee and which, as a governance function, is responsible for supervising the management and control of significant risks relevant to the Company and its Strategic Plan, pursuant to the Basic Internal Audit Regulations of November 26, 2003, approved by the Audit and Compliance Committee and by the Vice-Chairman & Chief Executive Officer of the Company, to which it directly reports.

- For appropriate performance of its duties, the Executive Committee is supported by the following committees/organizations at the operating level:

* OPERATING COMMITTEE: manages and controls the Group's balance of risks according to approved risk policies and limits.

* STRATEGY AND DEVELOPMENT DIVISION: through the Risk Analysis Division, it performs integrated analyses of risks, designs risk policies and limits, and prepares risk information for the different external agents.

* ADMINISTRATION, CONTROL AND REGULATION DIVISION: through the Control Division, it controls the risks and opportunities related to the annual profit and loss statement and new investments, quantifying the effect of the Group's risks at the individual and consolidated level.

* BUSINESS AND CORPORATE UNITS: they identify and manage the risks of their business or areas of authority (financial, legal, regulatory, etc.) according to the policies established at corporate level and within the approved limits.

D.5. Identification and description of the compliance procedures included in the various regulations that affect the company and/or its group.

The Iberdrola Group is present in different countries where it is subject to compliance with different laws and regulations. In particular, the power industry in Spain, where the principal activities of the Group are carried out, is subject to strict regulations that have undergone significant changes in recent years.

Each of the Group's business divisions has specific control, legal affairs and human resources departments which are functionally subordinate to the corresponding corporate divisions and which act in coordination with the business divisions. These departments are responsible for ensuring compliance with applicable laws in

each case.

This includes business divisions abroad, which receive local advice in connection with the specific laws and regulations affecting the business division and the Group in each country.

Additionally, as established in Article 44.2.f) of Iberdrola's By-laws, the Audit and Compliance Committee ensures compliance with legal requirements and the requirements of the Codes of Professional Conduct and Good Governance adopted by the Board of Directors.

E GENERAL SHAREHOLDERS' MEETING

E.1. Indicate the quorum required to hold valid a general shareholders' meeting as established in the by-laws. Describe how it is different from the minimum quorum required by the Companies Law.

Pursuant to Article 21.1 of the By-Laws, "The Ordinary as well as the Extraordinary General Shareholders' Meeting shall be validly established with the minimum quorum required by applicable legislation in effect at all times, taking into account the matters appearing on the agenda."

Section 102 of the Companies Law provides that "The General Shareholders' Meeting shall be validly established at first call if shareholders representing at least 25% of the subscribed share capital with voting rights are present at the meeting in person or by proxy", while "at second call the General Shareholders' Meeting shall be validly established no matter the share capital with voting rights represented therein."

In turn, Section 103 of such Law provides that "to adopt resolutions regarding the issue of debentures, the increase or reduction in share capital, the transformation, merger or split-off of the company and in, general, any amendment of its by-laws, the general or extraordinary general shareholders' meeting shall be validly established if shareholders holding at least fifty percent of the subscribed capital with voting rights are present at the meeting either in person or by proxy." "At second call, shareholders representing twenty-five percent of the capital of the company shall suffice."

As the only exception to the rules provided by the Companies Law, Article 21.2 of the By-Laws increases the quorum required to hold a valid meeting "in order to adopt resolutions regarding a change in the corporate purpose, transformation, total split-off, dissolution of the Company and amendment of this second paragraph of this Article," in which case "shareholders representing two-thirds of subscribed capital with voting rights must be in attendance at the first call of the General Shareholders' Meeting, and shareholders representing sixty (60%) percent of such capital must be in attendance at the second call."

E.2. Explain the rules governing the adoption of corporate resolutions. Describe how they are different from the rules provided by the Companies Law.

Procedures for deliberation and voting

Section 9.i) of the Companies Law provides that the by-laws will set forth "the manner for deliberating upon and adopting resolutions by the collective management decision-making bodies of the company."

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

With respect to the General Shareholders' Meeting, Article 27 of the By-Laws governs the manner of deliberation and adoption of resolutions upon the following terms:

"1. The Chairman shall: direct the meeting such that deliberations are carried out pursuant to the agenda; accept or reject new proposals relating to matters on the agenda; direct the deliberations, granting the floor to shareholders who so request it, and taking the floor away or refusing to grant it when the Chairman deems that a particular matter has been sufficiently debated, is not included in the agenda or hinders the progress of the meeting; indicate the time for voting; calculate the votes, with the assistance of the Secretary to the General Shareholders' Meeting; proclaim the results thereof; temporarily suspend the General Shareholders' Meeting; close the meeting; and, in general, exercise all powers, including those of order and discipline, which are required to properly hold the General Shareholders' Meeting.

2. The Chairman, even when present at a session, may entrust management of debate to a Director the Chairman deems appropriate, or to the Secretary, who shall carry out these duties on behalf of the Chairman, and the Chairman may remove them at any time. In the event of temporary absence or unexpected disability, the appropriate person pursuant to the provisions of paragraph one of Article Twenty-Five shall assume the duties of Chairman.

3. Votes shall be cast by hand, if needed, but resolutions may be adopted by general consent of the shareholders, without prejudice to applicable provisions regarding the need to record the opposition of shareholders, if any, in the minutes."

In turn, Article 33 of the Regulations for the General Shareholders' Meeting establishes the procedure for voting on proposed resolutions:

"1. Once the shareholder presentations have ended and responses have been made to requests for information pursuant to the provisions of these Regulations, the proposed resolutions regarding matters included in the agenda or which are not legally required to be set forth therein, including proposals made by the shareholders during the meeting, shall be submitted to a vote.

The adoption of resolutions shall proceed following the agenda set forth in the call to meeting. Resolutions proposed by the Board of Directors shall be first submitted to vote and then, if appropriate, resolutions proposed by others shall be voted upon following their priority in time. In any event, once a proposed resolution has been adopted, all others relating to the same matter and which are incompatible therewith shall be withdrawn and therefore need not be voted upon.

If proposals have been made regarding matters that may be approved at the General Shareholders' Meeting without having appeared in the agenda, the Chairman shall decide the order in which they shall be submitted to a vote.

It shall not be necessary for the Secretary to previously read aloud the text of the proposed resolutions which has been provided to the shareholders at the beginning of the meeting, except when deemed appropriate by the Chairman for some or all of the proposals. In any event, the attendees shall be told to which item on the agenda the proposed resolution being submitted to vote refers.

2. As a general rule, and without prejudice to the use of other alternative systems, at the election of the Chairman, voting on the proposed resolutions referred to in the preceding paragraph shall be by show of hands, if necessary, although resolutions may also be adopted upon the general consent of the shareholders. The foregoing

is without prejudice to the shareholders (or their proxies) who desire to abstain, to vote in the negative or in blank or to make known their opposition to or withdrawal from the meeting prior to the voting on the proposal in question, from so stating to the Notary Public (or, in the absence thereof, to the Secretary), or assistants thereto, in order for note to be taken thereof for inclusion in the Minutes of the General Shareholders' Meeting, after verification of their identity and the shares that they own or represent by proxy. In any event, votes validly cast from a distance and which have not been revoked shall also be taken into consideration."

Form of exercising voting rights

Section 105.4 of the Companies Law (incorporated by Law 26/2003, of July 17, on Transparency) provides that, in accordance with the provisions of the by-laws, shareholders may vote "by mail, electronic means or any other distance method of communication, provided that the identity of the voter is duly guaranteed."

To permit shareholders to cast their votes from a distance, Article 28 of the By-Laws provides that shareholders may "cast their vote regarding proposals relating to the items included in the agenda by mail or by electronic communication."

It particularly provides that "Mail votes shall be cast by sending to the Company a document in which such vote is recorded, accompanied by the attendance card issued by the entity or entities in charge of the book-entry registry", while "votes by electronic communication shall be cast using a recognized electronic signature or other type of guarantee that the Board of Directors deems best ensures the authenticity and identification of the shareholder exercising the right to vote."

Article 28.4 of the By-Laws provides that "Votes cast by any means set forth in the preceding paragraphs must be received by the Company before midnight on the day immediately prior to the date provided for the holding upon first call of the General Shareholders' Meeting. Otherwise, the vote shall be deemed not to have been cast."

Article 28.5 empowers the Board of Directors "to elaborate upon the foregoing provisions by establishing the rules, means and procedures adjusted to current techniques in order to organize the casting of votes and grant of proxies by electronic means, following the rules and regulations issued for such purpose, if applicable." It also provides that "The implementing rules adopted by the Board of Directors pursuant to the provisions of this paragraph shall be published on the Company's website."

Finally, Article 28.7 of the By-Laws allows shareholders to revoke their votes from a distance and Article 32.4 of the Regulations for the General Shareholders' Meeting provides that "The distance voting referred to in this Article shall be rendered void:

- a) By subsequent express revocation made by the same means used to cast the vote and within the period established for such voting.
- b) By attendance at the meeting in person or by proxy of the shareholder casting the vote."

Restrictions on voting rights

Article 29.1 (last part) of the By-Laws provides that "Each voting share, whether cast in person or by proxy at the General Shareholders' Meeting, shall grant the holder the right to one vote."

Pursuant to the provisions of Section 105.2 of the Companies Law, a maximum limit

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

is established on the votes that a single shareholder may cast, and the exercise of voting rights is also prohibited for shareholders involved in certain situations of conflict of interest with the Company.

Along these lines, Article 29.3 of the By-Laws provides that "no shareholder may cast a number of votes greater than those corresponding to shares representing ten (10%) of share capital, even if the number of shares held exceeds such percentage of capital. This limitation does not affect votes corresponding to shares with respect to which a shareholder is holding a proxy as a result of the provisions of Article Twenty-Three of these By-Laws, although, with respect to the number of votes corresponding to the shares of each shareholder represented by proxy, the limitation set forth above shall apply."

Article 29.4 of the By-Laws also provides that "The limitation set forth in the foregoing paragraph shall also apply to the maximum number of votes that may be collectively or individually cast by two or more shareholders which are entities or companies belonging to the same group. Such limitation shall also apply to the number of votes that may be cast collectively or individually by an individual and a shareholder entity, entities or companies controlled by such individual. A group shall be deemed to exist under the circumstances set forth in Section Four of the Securities Market Law, and an individual shall be deemed to control one or more entities or companies, under the circumstances of control set forth in such Section Four."

Finally, Article 29.5 provides that "Shares deprived of voting rights pursuant to the application of the foregoing paragraphs shall be deducted from the shares in attendance at the General Shareholders' Meeting for purposes of determining the number of shares upon which the majorities needed for the approval of resolutions submitted to the shareholders shall be calculated."

Article 30 of the By-Laws provides that "Shareholders participating in a merger or split-off with the company or who are called to subscribe to an increase in capital with the exclusion of pre-emptive rights or to acquire by overall assignment all of the Company's assets, may not exercise their voting rights for the approval of such resolutions by the shareholders."

This provision adds that "The provisions of the foregoing paragraph shall also be applicable when the resolutions affect, (i) in the case of an individual shareholder, the entities or companies controlled by such individual, and (ii) in the case of shareholders which are legal entities, the entities or companies belonging to its group (in the sense indicated in paragraph four of Article Twenty-Nine), even when these latter companies or entities are not shareholders."

Finally it provides that "If the shareholder prohibited from voting as set forth above attends the General Shareholders' Meeting, such shareholder's shares shall be deducted from the shares in attendance at the General Shareholders' Meeting for purposes of determining the number of shares upon which the majority needed for approval of the resolution with respect to which there is a conflict shall be calculated."

Pursuant to Article 54 of the By-Laws, these restrictions shall not apply "upon the occurrence of the following circumstances:

- (a) when the Company is the target of a public tender offer aimed at the share capital as a whole; and
- (b) when, as a result of the public tender offer, an individual or a legal entity, or several of them acting jointly, acquire an interest equal to two-thirds of the voting

capital of the Company; provided the full consideration thereof consists only of cash; or, alternatively,

(c) when, as a result of the public tender offer, an individual or a legal person, or several of them acting jointly, acquire an interest equal to three-quarters of the voting capital of the Company, provided the consideration thereof consists, in whole or in part, of securities, without giving the recipient an alternative right to receive such consideration wholly in cash."

Article 55 of the By-Laws provides that the removal of such limitations will be effective from the date of publication of the result of the settlement of the offer in the Listing Bulletin (*Boletín de Cotización*) of the Bilbao Stock Exchange and that the directors of the Company will have the power –and the duty– to execute the corresponding public instrument formalizing the by-law amendment and to seek registration thereof with the Commercial Registry.

Majority required for making decisions

Article 29.1 of the By-Laws provides that "The shareholders, acting at an ordinary or extraordinary General Shareholders' Meeting, shall adopt resolutions with the majorities required by the Companies Law based on votes represented in person or by proxy."

Along these lines, Article 29.2 provides that "The majority needed to approve a resolution shall require the favorable vote of one-half plus one of the voting shares cast in person or by proxy at the General Shareholders' Meeting. The foregoing does not affect situations in which the Law or these By-Laws provide for a greater majority."

In accordance with Section 103.2 of the Companies Law, when at second call, shareholders are in attendance that represent less than fifty percent of the subscribed capital with voting rights, any resolution related to the issuance of debentures, the increase or reduction of capital, the transformation, merger or split-off of the Company and, in general, resolutions involving the amendment of the bylaws, may only be adopted with the affirmative vote of two-thirds of the capital present at the meeting in person or by proxy.

Article 56 of the By-Laws provides that resolutions intended to eliminate or amend the provisions contained in Title III (related to the inapplicability of restrictions in the case of public tender offers), in Articles 29.3 through 29.5, and in Article 30, will require the affirmative vote of three-quarters of the share capital in attendance at the General Shareholders' Meeting.

Finally, pursuant to Article 34.3 of the Regulations for the General Shareholders' Meeting, "For the purposes of determining the number of shares upon which the majority needed to adopt the various resolutions shall be calculated, all shares appearing on the list of attendees shall be deemed to be in attendance, present or represented at the meeting, less: (i) shares whose owners or representatives have left the meeting prior to the voting on the proposed resolution or resolutions in question and have recorded their withdrawal with the Notary Public or, in the absence thereof, with the Secretary or assistants thereto; and (ii) shares which, by application of the provisions of Articles Twenty-Nine and Thirty of the By-Laws, are deprived of the right to vote in general or for the particular resolution in question."

E.3. Explain the rights of the shareholders regarding general shareholders' meetings which are different from the rights provided in the Companies Law.

Right to receive information

In addition to the rights to receive information provided in the Companies Law, Article 20.4 of the By-Laws provides that "There shall be a statement in the call of the General Shareholders' Meeting that any shareholder may obtain from the Company, without charge and on immediate basis, the documents that must be submitted for approval by the shareholders at the General Shareholders' Meeting, as well as the Management Report and the Auditors' Report."

Article 20.5 of such By-Laws further provides that "When the shareholders are to deal with an amendment to the By-Laws, besides the statements required in each case by the Law, the notice of the call must make clear the right of all shareholders to examine at the Company's registered office the complete text of the proposed amendment and the report thereon and to request that such documents be delivered or sent to them without charge."

To facilitate the exercise of the right to receive information prior to the General Shareholders' Meeting, Article 9 of the Regulations for the General Shareholders' Meeting provides that requests for information may be made "by delivery of the request to the Company's registered office, or by delivery to the Company via mail or other means of electronic or long-distance data communication sent to the address specified in the announcement of the meeting or, in the absence of such specification, to the Office of the Shareholder (*Oficina del Accionista*)," regulating the substance and the format of the request for information.

Shareholders may use the website of the Company to exercise such rights, as well as to view any relevant information that may be needed for the exercise of their rights at the General Shareholders' Meeting.

In connection with the exercise of the right to receive information during the General Shareholders' Meeting, Article 17 of the Regulations for the General Shareholders' Meeting provides that "The Company shall set up an Office of the Shareholder in a visible place at the stated premises of the meeting, for the purpose of (i) answering questions regarding the proceedings raised by the shareholders prior to the commencement of the session, without prejudice to the shareholders' legal and by-law rights to take the floor, make proposals and vote, and (ii) assisting and informing attendees and shareholders who wish to take the floor, preparing for such purpose a list of those who previously state their desire to participate, as well as collecting the text of their statements, if such statements are available in writing."

Right to be present at the meetings and to be represented by proxy

In this area, Article 23.2 of the By-Laws provides that "Proxies may be given by postal or electronic correspondence, in which case the provisions of Article Twenty-Eight of the By-Laws for the issuance of votes shall apply to the extent not incompatible with the nature of the proxy."

In addition, Article 24.2 of the By-Laws provides that "The General Shareholders' Meeting may be attended by going to the place where the meeting is to be held or, if applicable, to other places provided by the Company and indicated in the call to meeting, and which are connected therewith by video conference systems that allow recognition and identification of the parties attending, permanent communication among the attendees regardless of their location, and participation and voting. The principal place of the meeting must be located in the municipal area

of the Company's registered office, but supplemental locations need not be so located. For all purposes relating to the General Shareholders' Meeting, attendees at any of the sites shall be deemed attendees at the same individual meeting."

Right to cast votes from a distance

Article 28 of the By-Laws provides that shareholders having the right to attend meetings and to vote thereat may "cast their vote regarding proposals relating to the items included in the agenda by mail or by electronic communication," thus further developing the provisions of Article 32 of the Regulations for the General Shareholders' Meeting relating to the casting of votes from a distance.

E.4. Indicate, if applicable, the measures adopted to encourage the participation of shareholders at General Shareholders' Meetings.

In addition to the rights to receive information, to be present at meetings, to be represented by proxy and to cast votes from a distance mentioned above, the Company develops a policy encouraging the participation of shareholders at the General Shareholders' Meeting with the following measures:

- Publication of the call of the meeting in numerous media, exceeding the legal requirements and the requirements set forth in the By-laws, ensuring broad dissemination of the call.
- Dissemination in the press of the announcement that the meeting cannot be held on first call, and calling the shareholders to attend the meeting on the second call.
- Practices followed to encourage the participation of shareholders, such as gifts and even the payment of attendance bonuses.
- Holding the General Shareholders' Meeting at the best possible site that facilitates the development of the meeting, with high capacity and located at the center of the locality where the Company's registered office is located.
- If necessary, the use is contemplated of accessory locations for attendance at the General Shareholders' Meeting, which are connected to the primary location by videoconference systems permitting recognition and identification of those in attendance, permanent communication among attendees regardless of the place where they are, and participation and voting.
- Hiring of financial brokers or agencies for better distribution of the information about the Shareholders' Meeting among our wide base of institutional and international investors.
- Personalized assistance and guidance to shareholders who wish to participate, through the Office of the Shareholder.
- The provision to shareholders of means for translating the various presentations.
- The possibility of accessing the live transmission of the meeting through the www.iberdrola.com website.

E.5. Indicate whether the chairman of the General Shareholders' Meeting is also the chairman of the Board of Directors. Describe, if applicable, the measures adopted to ensure independence and proper operation of the General Shareholders' Meeting:

YES NO

Description of measures
<p>- On its own initiative, the Board of Directors traditionally requires that a Notary Public attend the Shareholders' General Meeting and prepare the minutes thereof (Article 8.6 of the Regulations for the General Shareholders' Meeting). Therefore, the Chairman and the Secretary of the General Shareholders' Meeting do not prepare the minutes thereof, which is delegated to a notary public, thereby guaranteeing neutrality for the shareholders.</p> <p>- As to the verification of the valid holding of the meeting, the Company has the necessary means to control and electronically compute the proxies and votes from a distance (by mail or electronic communication), as well as to prepare the list of shareholders present –in person or by proxy- at the General Shareholders' Meeting, which list is electronically recorded and attached to the minutes of the meeting, and to compute the quorum to hold meetings and to adopt resolutions (Article 16.2 of the Regulations for the General Shareholders' Meeting).</p> <p>To that effect, the Company prepares and proposes to the entities participating in the <i>Sociedad de Gestión de Sistemas de Registro, Compensación y Liquidación de Valores, S.A.</i> (Iberclear) the format of the attendance card to be issued to the shareholders in order for the cards issued to be uniform and to include a bar code or other system which allows for the electronic reading thereof in order to facilitate the computerized calculation of attendees (Article 12.2 of the Regulations for the General Shareholders' Meeting).</p> <p>These computerized systems are also useful to resolve or clarify doubts or claims in connection with the list of attendees.</p> <p>- From the moment they enter the site, shareholders are assisted by the staff of the Office of the Shareholder (Article 18.1 of the Regulations for the General Shareholders' Meeting), which staff is permanently available to resolve any issues and to facilitate shareholders' participation in the General Shareholders' Meeting, as indicated in section E.3 of this Report.</p> <p>- Regarding the powers of the Chairman with respect to the shareholder participation period at the General Shareholders' Meeting, pursuant to Article 27.3 of the Regulations for the General Shareholders' Meeting, the Chairman, in the exercise of his ordering powers:</p> <p>a) may extend the time initially allocated to each shareholder, when the Chairman so deems it appropriate;</p> <p>b) may request the presenting parties to clarify issues that have not been understood or which have not been sufficiently explained during the presentation;</p> <p>c) may call the presenting shareholders to order so that they limit their presentation to business properly before the General Shareholders' Meeting and refrain from making improper statements or exercising their right in an abusive or obstructionist manner;</p> <p>d) may announce to the presenting parties that the time for their presentations will soon be ending so that they may adjust their discourse and, when the time granted for their presentation has ended, or if they persist in the conduct described in the preceding paragraph, may withdraw the floor from them, and, if the Chairman believes that their presentation might alter the proper order and normal conduct of the meeting, the Chairman may adopt appropriate measures in order to comply with this provision; and</p> <p>e) may deny the floor when the Chairman believes that a particular matter has been sufficiently debated, is not included in the agenda, or hinders the progress of the meeting.</p> <p>Such provision also charges the Chairman with maintaining order in the room "in order to allow the participants to make their presentations without undue interruption."</p> <p>- If there are disturbances which temporarily prevent the normal progress of the meeting, Article 30.1 of the Regulations for the General Shareholders' Meeting empowers the Chairman "to suspend the session for the time the Chairman deems appropriate (but not for more than two (2) hours) in order to reestablish the conditions needed for the continuation thereof."</p> <p>- Article 31.1 of the Regulations for the General Shareholders' Meeting provides that at the proposal of the Directors or at the request of shareholders representing at least one-fourth of the capital present at the General Shareholders' Meeting, the attendees may agree to a continuation of their sessions over one or more consecutive days.</p>

In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

E.6. Indicate, if applicable, the amendments made during the fiscal year to the Regulations for the General Shareholders' Meeting.

The Regulations for the General Shareholders' Meeting were approved by the shareholders at the General Shareholders' Meeting held on April 3, 2004, and no amendment has been recorded since then.

However, the Board of Directors has submitted to the shareholders acting at the General Shareholders' Meeting called to take place on March 29, 2006, upon first call, and on March 30, 2006, upon second call, the proposal to amend the By-laws and the Regulations for the General Shareholders' Meeting, in order to extend the term to call the Meeting from 15 days to 1 month and in order to grant shareholders the right to request the inclusion of new items on the Agenda, pursuant to the provisions of Law 19/2005, of November 14, on European corporations registered in Spain.

Furthermore, the Board has submitted to the shareholders acting at the 2006 General Shareholders' Meeting the proposal to amend the By-laws and the Regulations for the General Shareholders' Meeting in order to eliminate the requirement relating to the minimum number of shares granting the right to attend the General Shareholders' Meeting.

E.7. Indicate the data on attendance at the general shareholders' meetings held during the fiscal year referred to in this report:

Attendance data

Date of General Shareholders' Meeting	% of shareholders present in person	% of shareholders represented by proxy	% distance voting	Total %
03-18-2005	25.470	26.820	0.030	52

E.8. Briefly describe the resolutions adopted by the shareholders acting at the general shareholders' meetings held during the fiscal year referred to in this report and the percentage of votes by which each resolution was passed.

GENERAL SHAREHOLDERS' MEETING HELD ON MARCH 18, 2005

One.- Examination and approval, if applicable:

a).- Of the Individual Annual Financial Statements (Balance Sheet, Profit and Loss Statement, and Annual Report) of the Company and of the consolidated annual financial statements of the Company and its controlled Companies, for the Fiscal Year ended on December 31, 2004. (AFFIRMATIVE VOTES: 99.01% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

b).- Of the Management Reports of the Company and its Consolidated Group, as of December 31, 2004, as well as of the corporate management for such fiscal year. (AFFIRMATIVE VOTES: 99.04% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

Two.- Allocation of profits/losses and distribution of dividends for the Fiscal Year ended on December 31, 2004. (AFFIRMATIVE VOTES: 99.84% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

Three.- Delegation to the Board of Directors, for the term of five years, of the power to issue: a) bonds or simple debentures and other fixed-income securities of a like nature (other than notes), as well as preferred stock, up to a maximum amount of

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

€5.0 billion, and b) notes up to a maximum amount, independently of the foregoing, of up to €3.0 billion; and authorization to the Company to guarantee, within the limits set forth above, new issuances of securities by controlled companies, for which purpose the delegation approved at the General Shareholders' Meeting held on April 3, 2004 is hereby deprived of effect to the extent of the unused amount. (AFFIRMATIVE VOTES: 98.15% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

Four.- Authorization to the Board of Directors for the derivative acquisition of the Company's own shares by the Company itself and/or by its controlled Companies pursuant to the provisions of the Law, for which purpose the authorization granted at the General Shareholders' Meeting held on April 3, 2004 is hereby deprived of effect to the extent of the unused amount. Reduction in share capital and amendment of Article 5 of the By-Laws as a result. (AFFIRMATIVE VOTES: 99.11% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

Five.- Authorization to the Board of Directors to apply for the listing on and delisting from Spanish or foreign organized secondary markets of the shares, debentures or other securities issued or to be issued, and to adopt such resolutions as may be necessary to ensure the continued listing of the shares, debentures or other securities of the Company that may then be outstanding. (AFFIRMATIVE VOTES: 99.84% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

Six.- Authorization to the Board of Directors to create and fund Associations and Foundations pursuant to the applicable legal provisions in effect, with the Board of Directors being empowered to carry out such resolution. (AFFIRMATIVE VOTES: 99.07% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

Seven.- Re-election of Deloitte & Touche España, S.L. as the Auditor of the Company and its Consolidated Group for Fiscal Year 2005. (AFFIRMATIVE VOTES: 98.74% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

Eight.- Ratification of the appointment of Mr. Sebastián Battaner Arias as Director designated by interim appointment to fill a vacancy. (AFFIRMATIVE VOTES: 99.03% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

Nine.- Partial re-election of Directors:

a).- Re-election of the Executive Vice Chairman & Chief Executive Officer, Mr. José Ignacio Sánchez Galán. (AFFIRMATIVE VOTES: 97.08% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

b).- Re-election of the Director Mr. Víctor de Urrutia Vallejo. (AFFIRMATIVE VOTES: 97.08% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

c).- Re-election of the Director Mr. Ricardo Álvarez Isasi. (AFFIRMATIVE VOTES: 97.08% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

d).- Re-election of the Director Mr. José Ignacio Berroeta Echevarría. (AFFIRMATIVE VOTES: 97.08% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

e).- Re-election of the Director Mr. Juan Luis Arregui Ciársolo. (AFFIRMATIVE VOTES: 97.08% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

f).- Re-election of the Director Mr. Julio de Miguel Aynat. (AFFIRMATIVE VOTES: 97.08% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

g).- Re-election of the Director Mr. Sebastián Battaner Arias. (AFFIRMATIVE VOTES: 97.08% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

Ten.- Authorization to the Board of Directors of the Company, to the fullest possible extent, for the full development and execution of the foregoing resolutions, expressly including the power to interpret, remedy and complete such resolutions and have them evidenced in the form of public instruments, as well as the right to delegate the powers granted by the shareholders at the General Shareholders' Meeting. (AFFIRMATIVE VOTES: 99.10% OF THE CAPITAL HELD BY SHAREHOLDERS PRESENT IN PERSON OR BY PROXY).

E.9. Indicate, if applicable, the number of shares required to attend the General Shareholders' Meeting and whether there is any by-law limitation in that respect.

As set forth in sections 1 and 2 of Article 22 of the By-laws:

"1. Shareholders holding one hundred (100) or more voting shares may attend the General Shareholders' Meeting and take part in deliberations thereof, with the right to be heard and to vote. Those who hold a lesser number of shares may combine and give their proxy to another shareholder who, in combination therewith, completes the requirement for one hundred (100) shares or more.

2. In order to exercise the right to attend, shareholders' must cause the shares to be registered in their name in the corresponding book-entry registry at least five (5) days prior to the day on which the General Shareholders' Meeting is held. This circumstance must be evidenced by means of the appropriate attendance card or validation certificate issued by the entity or entities in charge of book-entry registries, or in any other form allowed by applicable legislation."

However, the Board of Directors has submitted to the shareholders acting at the General Shareholders' Meeting called to take place on March 29, 2006, upon first call, and on March 30, 2006, upon second call, the proposal to amend the By-laws and the Regulations for the General Shareholders' Meeting, in order to eliminate the requirement relating to the minimum number of shares granting the right to attend the General Shareholders' Meeting.

E.10. Indicate and justify the policies followed by the company with respect to proxy-voting at the general shareholders' meeting.

First of all, it is a policy of the Company to encourage the attendance of shareholders at the General Shareholders' Meeting.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Regarding proxy-voting, Article 12.2 of the Regulations for the General Shareholders' Meeting provides that the Company may propose to the entities participating in the *Sociedad de Gestión de Sistemas de Registro, Compensación y Liquidación de Valores, S.A.* (Iberclear) the format of the attendance card to be issued to the shareholders, "as well as the formula to be recited in such document in order to delegate proxy representation at the meeting in favor of another shareholder, which should also set forth the way in which the proxy-holder will vote on each of the resolutions proposed by the Board of Directors for each item on the agenda in the absence of specific instructions of the shareholder being represented."

The Board of Directors calls the General Shareholders' Meeting and establishes that the following formula may be used for proxy-voting at the General Shareholders' Meeting:

"I hereby grant my proxy for this General Shareholders' Meeting to Shareholder _____ or, absent express appointment, to the Chairman of the Board of Directors of the Company, who shall vote in favor of the proposals included in the Agenda and such others as may be validly submitted, in the same manner as proposed by the Board of Directors, unless voting instructions are indicated in the table below. In the event that the representative is subject to a conflict of interest when voting on any of the items to be submitted to the shareholders at the General Shareholders' Meeting, I hereby authorize such representative to appoint a third shareholder to act as representative."

As a consequence, the voting power under the proxy may be granted to the Chairman of the Board of Directors, in his capacity as shareholder, who, in light of his special knowledge of the Company's business, is in the best position to act in the common interest of all the shareholders and to take into consideration any other legitimate interest, whether public or private, that might influence the development of business activities.

In addition, the shareholder may authorize the proxy holder so that, in the event a conflict of interest affecting the proxy holder with respect to the voting of any of the items submitted for the consideration of the shareholders, he may appoint another shareholder to exercise the proxy.

Notwithstanding the possibility of drafting more detailed instructions, the space included in the attendance card for the voting instructions permits the shareholders to check the box to abstain, to vote in the affirmative, in the negative or in blank in order to facilitate the indications that the represented shareholder desires to give to the proxy holder. Therefore, the voting instructions may be recorded easily in the corresponding computerized system.

Pursuant to Article 23 of the By-laws and Article 11 of the Regulations for the General Shareholders' Meeting, shareholders have the following alternatives to prove the validity of the proxy granted:

- a) By submission of the attendance card or a certificate of good standing at the shareholders' registration desks at the place and on the date set for the General Shareholders' Meeting.
- b) By mail addressed to the Company including the duly signed proxy and signing the corresponding attendance card for such purpose.
- c) By e-mail sent with the recognized electronic signature of the shareholder, by means of a communication to the Company through the website

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

www.iberdrola.com. The communication will state the name of the proxy holder and of the represented shareholder.

Regardless of the manner in which they are received, all proxies are recorded in a computerized application, which is also used to control and compute proxies and voting instructions, prepare the list of attendees and verify the quorum required to hold valid meetings and the majority required to adopt resolutions, pursuant to Article 16.2 of the Regulations for the General Shareholders' Meeting.

E.11. Indicate whether the company is aware of any policy of institutional investors as to participating or not in the decisions of the company:

YES NO

Describe the policy

E.12. Indicate the address and manner for accessing corporate governance content on your website.

5.- Comments:

Size of the Board of Directors: reasonable number of members

Since 1991, the number of Directors has fallen from 40 to 19, below the maximum number permitted by Article 36.1 of the By-laws.

The Company has made public its commitment to continue applying the policy to reduce the number of Directors in accordance with good governance recommendations.

Existence of Board Committees

Regarding the committees of the Board of Directors, the Aldama Report provides that "the Committees that should be created for better corporate governance, notwithstanding any other committee that might be created by companies or by the division of the Committees mentioned below into any number of committees, are: (i) the Executive Committee, which has executive powers for the adoption of binding resolutions regarding the Company within the framework of the powers delegated to it; (ii) the Audit and Control Committee, the Nominating and Compensation Committee and, if applicable, the Strategy and Investment Committee, which only have reporting duties and the power to submit proposals to the Board, and such other powers and duties as might be attributed to them by Law, the By-laws or the Regulations of the Board of Directors."

In line with such recommendation, as provided by Article 42 of the By-laws and as described in section B.2.3 of this Report, the Board of Directors of Iberdrola has decided to create and maintain the following committees:

- an Executive Committee;
- an Audit and Compliance Committee; and
- a Nominating and Compensation Committee.

In particular, the Executive Committee, which held 21 meetings in FY 2005, also performs the role, among other duties, of a STRATEGY AND INVESTMENT COMMITTEE, to the extent that it invests most of its time in submitting proposals or information to the Board of Directors about such strategic decisions, investments and divestitures that are relevant for the Company or the Group, assessing their conformity with the budget and the Strategic Plan and performing analysis and follow-up of the business risks.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. G OTHER INFORMATION OF INTEREST

If you believe that there is any relevant principle or aspect regarding the corporate governance practices applied by your company that has not been discussed in this Report, please mention and explain it below.

In this section, you may include any other information, clarification or comment relating to the prior sections of this report to the extent that it is relevant and not repetitive.

Specifically, indicate whether the company is subject to laws other than Spanish laws regarding corporate governance and, if applicable, include such information that the company is required to release and that is different from the information released in this Report.

Comments:

Section A.1

- The shareholders acting at the June 16, 2001 General Shareholders' Meeting authorized the Board of Directors of the Company to increase the share capital by half the amount of the then existing share capital through the issuance of new shares in consideration of cash contributions or the conversion of freely-available reserves, and granted it the power to exclude the pre-emptive right. This authorization was granted until June 16, 2006, and has not yet been exercised.

- The shareholders acting at the April 3, 2004 General Shareholders' Meeting authorized the Board of Directors for a term of 5 years to issue debentures or bonds convertible into and/or that may be swapped for shares in the Company and to issue warrants with respect to new shares or outstanding shares of the Company, up to one (1) billion euros, with the power, in the case of convertible bonds and warrants on new shares, to exclude the pre-emptive right of the shareholders and holders of convertible bonds.

- At the aforementioned General Shareholders' Meeting, the shareholders also authorized the Board of Directors for a term of 5 years to issue debentures or bonds convertible into and/or that may be swapped for shares in the Company and to issue warrants with respect to new shares or outstanding shares of the Company, up to one (1) billion euros, without the power to exclude the pre-emptive right of the shareholders and holders of convertible bonds.

- Finally, the Board of Directors has submitted to the shareholders acting at the General Shareholders' Meeting called to be held on March 29, 2006, upon first call, and on March 30, 2006, upon second call, the proposal to authorize the Board of Directors to increase, within a maximum period of five years and if it deems it fit, the share capital up to one-half of the current share capital, on one or more occasions, and at such time and by such amount as the Board deems appropriate, with the power to exclude the pre-emptive right, thus terminating the authorization granted by the shareholders at the June 16, 2001 General Shareholders' Meeting.

Section A.2

- Given that the shares are represented by book entries, extremely accurate information about the interest of shareholders in the share capital is not available. The information provided has been taken from the annual reports of our significant shareholders and from different press releases.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

- For purposes of this Corporate Governance Report and in conformity with Schedule I of the National Securities Market Commission Communication 1/2004, of March 17, significant shareholders are the holders of interests that reach the threshold set forth by Royal Decree 377/1991, of March 15, or that, even when they do not reach the percentage established in that Royal Decree "permit the exercise of a significant influence on the company. Unless otherwise shown, significant influence shall mean 'the possibility of appointing or removing any member of the board of directors of the company or of proposing the appointment or removal of any member of the board of directors of the company and, in general, whatever is provided in the regulations implementing Section 35 of the Securities Market Law.'" As a consequence, the savings associations associated in the Federación de Cajas de Ahorro de Castilla y León have been considered significant shareholders during Fiscal Year 2005, given that they have proposed the appointment of Mr. Sebastián Battaner Arias as Member of the Board of Directors.

However, at its February 22, 2006 meeting, the Board of Directors resolved, following a proposal made by the Nominating and Compensation Committee, to re-characterize Mr. Sebastián Battaner Arias as Independent Director, given that he has now severed his ties with the said savings associations and in view of his extensive professional background, his proven independence of opinion and his sound personal prestige, in addition to his broad institutional presence in an area of great significance to Iberdrola, S.A. This means that, starting on the date of this resolution, the above-mentioned savings associations will cease to be considered holders of significant interests, in view of their shareholdings and the fact that they do not have a representative on the Board of Directors. All of the foregoing was timely reported to the National Securities Market Commission on February 22, 2006.

- The approximate distribution of interests in share capital by type of shareholder is as follows:

- Foreign institutions	38%
- Domestic institutions	33%
- Retail investors	29%

- On June 30, 2005, Santander Investment Services, S.A. submitted to the National Securities Commission, in its capacity as reporting party with respect to Chase Nominees Ltd., a report of significant interests consisting of 75,357,975 shares in the share capital of Iberdrola, S.A., representing 8.359% of the share capital, expressly stating that Chase Nominees Ltd. is required to report its participation as nominee (Section 3.1 of Royal Decree 377/1991, of March 15) acting on behalf of its clients, none of which is, in turn, subject to report a significant interest if only the individual shareholding registered with Chase Nominees Ltd is taken into account.

- On February 2, 2005, State Street Bank and Trust Co. submitted to the National Securities Commission a report of significant interests reflecting a total interest consisting of 53,449,557 shares, representing 5.929% of the share capital, expressly stating that it acts as nominee and confirming that none of its clients domiciled in a tax haven holds an interest equal to or greater than 1% and that none of its clients domiciled outside of a tax haven holds, according to its records, interests equal to or greater than 5%.

- Although they are not deemed significant shareholders, below is a list, for information purposes, of other shareholders with a stable presence in the share capital:

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Shareholder	Number of shares	% capital
Montes de Piedad y Caja de Ahorros de Ronda, Cádiz, Almería, Málaga y Antequera (Unicaja)	11,859,382	1.32%
Caja de Ahorros de Valencia, Castellón y Alicante (Bancaja)	9,050,000	1.00%
Sociedad de Desarrollo de Navarra, S.A. (Sodena)	9,015,492	1.00%
Caja de Ahorros de Murcia (Caja Murcia)	6,761,618	0.75%
Caja de Ahorros Castilla La Mancha	4,361,774	0.48%
Caja de Ahorros de Vitoria y Álava (Caja Vital)	1,040,200	0.12%
Caja de Ahorros y Monte de Piedad de Extremadura	1,000,000	0.11%

Section A.3

- Pursuant to the provisions of Article 49 of the By-laws, each Director must show the recordation of a lien upon ten thousand (10,000) shares of the Company as a guarantee for any liabilities which may be incurred in the performance of the Director's duties.

- Adding the interests of significant shareholders and the shares owned by Directors, the percentage of shares held by the Board of Directors is 17.089%.

Section A.5

- "Uragua, S.A. en Liquidación" is a Uruguayan company, and therefore, has no CIF (Tax Identification Code) but has the corresponding Uruguayan tax identification.

On November 30, 2005, the shareholders acting at the General Shareholders' Meeting resolved its dissolution and the commencement of the liquidation proceeding.

- The description of related transactions with significant shareholders is contained in Section C of this Report.

Section A.8

At year-end 2005, the number of shares of the Company's own stock and derivatives on treasury shares is 7,378,392, which accounts for 0.818% of the share capital. Of such amount, 109,537 correspond to the Company's own stock and 7,268,855 are call options on the Company's own stock expiring in 2006.

Based on the authorizations granted to the Board of Directors by the shareholders acting at the General Shareholders' Meeting, mentioned in Section A.9 of this Report, during fiscal year 2005, Iberdrola S.A. acquired 15,974,485 shares of its own stock in the amount of 319.5 million euros. In addition, 16,082,326 shares of its own stock were sold in the amount of 321.1 million euros.

Section B.1.2

At its April 20, 2005 meeting, the Board of Directors of Iberdrola approved, following a proposal made by its Chairman, Mr. Iñigo de Oriol e Ybarra, to the effect that upon his ceasing to hold office as Chairman of the Board of Directors of Iberdrola, pursuant to the provisions of the Regulations of the Board of Directors, he would be replaced in such position as Chairman by the current Vice Chairman & Chief Executive Officer, Mr. José Ignacio Sánchez Galán.

Since the integration in 1991 of the companies that gave rise to Iberdrola, S.A., to date, the number of Directors has decreased from 40 to 19, below the maximum number of Directors set by Article 36 of the By-laws.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

In this regard, as was reported to the National Securities Market Commission as a significant event on April 20, 2005, the Directors Mr. Javier Aresti y Victoria de Lecea and Mr. José Luis Antoñanzas Pérez-Egea ceased to hold office upon reaching the regulatory age and Mr. Santiago Mayner Oyarbide and Mr. José Antonio Fernández Rivero submitted their resignation as proprietary Directors.

On the above-mentioned date, the Board of Directors of the Company resolved to appoint, on an interim basis, the shareholders Mr. Xabier de Irala Estévez and Mr. Jesús María Cadenato Matía, on behalf of BBK and BBVA, respectively, thus filling the vacancies left by Mr. Santiago Mayner Oyarbide and by Mr. José Antonio Fernández Rivero. These appointments will be submitted for ratification by the shareholders at the General Shareholders' Meeting called to take place on March 30, 2006.

The Company has made public its commitment to continue applying the policy to reduce the number of Directors in line with good governance recommendations.

Section B.1.3

- On April 20, 2005, it was communicated to the National Securities Market Commission as a significant event that the Board of Directors of the Company resolved, at the meeting held on such date, to approve the characterization of Mr. José Ignacio Berroeta Echevarría as external independent Director, in view of the time passed since he stepped down as chairman of BBK, his professional and personal prestige, as well as his independence of opinion.

- At its February 22, 2006 meeting, the Board of Directors resolved, following a proposal made by the Nominating and Compensation Committee, to re-characterize Mr. Sebastián Battaner Arias as Independent Director, given that he has now severed his ties with the savings associations associated in the Federación de Cajas de Ahorro de Castilla y León and in view of his extensive professional background, his proven independence of opinion and sound personal prestige, in addition to his broad institutional presence in an area of great significance to Iberdrola, S.A.

Section B.1.6

On April 21, 2005, Iberdrola, S.A., the sole shareholder of "Apex 2000, S.A.," resolved to change the corporate name of this real estate subsidiary to "Iberdrola Inmobiliaria, S.A."

Sections B.1.8 and B.1.9

In addition to the variable compensation accrued during the fiscal year, which is set forth in the table under section B.1.8, Executive Directors have received an achievement bonus accrued on a multi-annual basis in the amount of 2.301 million euros. Also, in addition to the compensation accrued during the fiscal year, which is set forth in section B.1.9, Senior Management members other than Directors have received a like bonus in the amount of 4.816 million euros.

The information contained in section B.1.8 of this Report coincides with the information reflected in Note 39 to the Annual Financial Statements for fiscal year 2005 relating to the compensation paid to the Board of Directors, although it is classified differently due to the regulated nature of the contents of this section B.1.8 of this Report pursuant to the provisions of the National Securities Market Commission Communication 1/2004.

Section B.1.10

In the 1990s, the Company began to include these kinds of clauses in contracts with its managers, although most of the contracts with indemnity clauses were executed in October 2000. Such contracts currently encompass 89 managers, including the 15 members of the Senior Management of the Company (i.e., the two Executive Directors and the 13 managers listed in Section B.1.9 of this Report).

The purpose is to attain an effective and sufficient degree of loyalty from the senior-level executives required for the management of the Company and thus avoid the loss of experience and knowledge that might jeopardize the achievement of the strategic goals. Essentially, these clauses include severance packages for the members of the management team on the basis of length of service to the Company, with annual payments ranging from a minimum of 2 years to a maximum of 5 years.

Section B.1.27

The Secretary of the Board of Directors also acts as Legal Counsel to the Company's Management Decision-Making Bodies, thus reinforcing his duty to assure the formal and substantive legality of the actions of such Bodies.

In addition, the Secretary is a member of the executive team, given that he is the General Secretary of the Company.

Section B.1.29

Of the 853,000 euros of non-audit work performed by the audit firm, 535,000 euros corresponds to certification engagements which are mandatory to comply with certain requirements.

Section B.1.30

The self-assessment process carried out by the Audit and Compliance Committee in 2005 showed that it was timely to formalize the auditor hiring policy pursued by Iberdrola, thus reflecting the internal regulations and the practices adopted by the Company in its relationship with the Group's auditors.

The "Auditor Hiring Policy" was approved by the Committee at its November 23, 2005 meeting, and is fully contained in the Committee's Activities Report for fiscal year 2005.

Within the framework of this policy, the Committee has resolved that the proposal to the Board for appointment of the auditor of the Company's annual financial statements for the 2006-2008 period to be submitted to the shareholders at the next General Shareholders' Meeting be implemented by means of a competition among firms meeting the requirements that the Committee has established in the past in order for them to qualify as auditor of Iberdrola and its Group.

The suitability of carrying out this competition is in line with the recommendations that the Committee has made to the effect that guidelines for the appointment of auditors should be in place, consistent with "Good Governance" practices which have evolved in keeping with the requirements of the operating environment, based on standards of prudence, cogency and rigor.

Thus, the implementation of an audit competition guarantees the most transparent, effective and equitable appointment procedure, consistent with the standards so far applied by the Committee.

Section B.1.31

The Director Mr. José Orbegozo Arroyo has an interest of 24.6% in the capital of Olaguibel Servicios Generales, S.L., which, in turn, holds 19.6% of the capital of Fanox Electronic, S.L. As a consequence, such Director is attributed an indirect interest of 4.82% in Fanox Electronic, S.L. which, added to its direct interest of 0.4%, results in a total interest of 5.22%.

At year-end 2005, the Director Mr. Juan Luis Arregui Ciársolo had an interest of 26.48% in the capital of Ceatesalás, S.L., which, in turn, holds 93.13% of the share capital of Corporación Eólica CESA, S.L. As a consequence, such Director is attributed an indirect interest of 24.66% in the latter company.

However, as of January 24, the Director Mr. Juan Luis Arregui Ciársolo has transferred his entire interest in Ceatesalás, S.L. to Acciona, S.A., pursuant to an agreement for the purchase/sale of equity interests, and by virtue of which he does not maintain any direct or indirect interest in Corporación Eólica CESA, S.L. This purchase/sale agreement is subject to the condition precedent that the transaction be given the express or implied approval of the Competition Service (Servicio de Defensa de la Competencia), which was notified on January 30, 2006. Furthermore, pursuant to the provisions of such purchase/sale agreement, it is expected that at the next General Shareholders' Meetings of Ceatesalás, S.L. and Corporación Eólica CESA, S.L., his resignation as Chairman of the Board of both companies will be accepted, and he will not from that time hold any position within the management decision-making bodies thereof.

Section B.2.2

In clarification of the information provided in this section, it should be noted that Mr. José Ignacio Sánchez Galán is the Vice Chairman & Chief Executive Officer and that Mr. José Antonio Garrido Martínez and Mr. Javier Herrero Sorriqueta are Vice Chairmen of the Board of Directors.

Section C

All the information on related transactions contained in this 2005 Annual Corporate Governance Report is also contained in the Semi-Annual Information that on February 9, 2006 was communicated by the Company as a significant event, by using the form of Periodic Public Information established for these purposes by the National Securities Market Commission.

Section C.1

The transactions conducted with significant shareholders in FY 2005 have been carried out in the ordinary course of business and have conformed to arm's length terms. The information about such transactions is not needed to state the true financial position and results of operations of the Company. However, the most significant transactions have been:

1. Bank financing transactions:

On April 13, a loan in the amount of 1.200 billion euros was formalized with 16 prime financial entities, in two tranches, the first of which (in the amount of 500 million euros) consisted of the renewal of the "Club-Deal"-type loan formalized in May 2004, with a new repayment term of seven years, and the second of which was implemented as a 7-year credit line in the amount of 700 million euros. In the first tranche, BBVA reduced its share

from 100 million euros to 50 million euros, and took up 70 million euros in the second tranche.

On May 25, within the framework of a liquidity strengthening strategy, by means of the formalization of bilateral transactions in the amount of 500 million euros with prime financial entities, a bilateral credit line was signed with BBVA in the amount of 60 million euros, with availability during a three-year period. On the same date, the 364-day loan agreement was reduced by such amount.

2. Interest rate and exchange rate derivative instruments

Interest rate and exchange rate hedging transactions for an amount equivalent to 1.440 billion euros were conducted, of which 230 million correspond to transactions with BBVA.

Derivative transactions were awarded through competitive biddings among financial institutions of proven solvency.

3. Surplus deposits and drawdowns under credit lines

Drawdowns under checking account overdraft and credit facilities amounted to a daily average amount equivalent to 400 million euros, of which 54 million euros corresponded to BBVA.

In addition, treasury surpluses for an average daily amount equivalent to 48 million euros were deposited, and the transactions with BBVA accounted for 25% of such amount.

These transactions are conducted daily in order to regulate the liquidity of the Group by previously requesting quotations from about 20 financial institutions.

4. Capital Market Transactions

On June 1, BBVA acted as placement agent of a private issuance of bonds made by Iberdrola Finanzas, S.A. and guaranteed by Iberdrola, S.A. in the amount of 60 million euros. In addition, on June 22, Iberdrola Finanzas, S.A. made a public issuance of bonds in the Euromarket with the guarantee of Iberdrola, S.A. in the amount of 500 million euros, placed through 8 entities, in which BBVA acted as Manager and Underwriter together with three other prime entities. On September 30, such issuance was enlarged by the amount of 250 million euros, in which only the Managers and Underwriters of the original issuance participated (BBVA together with three other prime entities).

In short-term capital markets, notes have been issued in the amount of 742 million euros, of which BBVA placed 34% and BBK placed 5%. In addition, and supplementing the domestic notes program,

Iberdrola International BV has issued, with the guarantee of Iberdrola, S.A., 1.853 billion euros, of which 5 million euros were placed through BBVA.

5. Purchase and sale of shares

Transactions have been carried out through BBVA for a consideration of 296 million euros.

6. Guarantees and suretyships

BBVA has issued bank guarantees in favor of companies belonging to the Iberdrola Group in the amount of 86 million euros.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

7. Purchase and sale of foreign currency

Transactions for a consideration of 1.324 billion euros have been carried out, of which 42% have been made with BBVA.

8. Equity derivatives

Equity and treasury stock derivatives have been contracted with BBVA in the amount of 169 million euros.

Section C.2

In addition to the compensation accrued during the fiscal year, Executive Directors and Senior-Management members have received an achievement bonus accrued on a multi-annual basis in the amount of 7,116.74 thousand euros, of which 5,836.37 thousand euros have been paid by Iberdrola, S.A. and the remaining 1,280.37 thousand euros have been paid by other companies within the Group.

Also included are transactions made with Corporación Eólica CESA, S.L., in which Director Juan Luis Arregui Ciársolo was Chairman of the Board during 2005, as well as with the Turkish company DAS Engineering & Energy Investments Inc., in which a brother of Director Lucas María de Oriol López-Montenegro was a member of the Board at the time of execution with the Company of a services agreement for the development of energy business in Turkey. In all cases, they are transactions carried out in the ordinary course of business, made under arm's length conditions, and in respect of which no information is needed in order to accurately reflect the financial situation and the results of operations of the Company.

Section C.3

Transactions made with subsidiaries and affiliated companies that have not been terminated in the consolidation process are in the ordinary course of the Company's business, carried out under arm's length conditions and of little significance to accurately reflect the financial situation and results of operations of the Company.

In addition to intra-group transactions, also included are the fees paid by Iberdrola to the Asociación Española de la Industria Eléctrica (UNESA).

Section E.7

Regarding the data on proxy-voting and distance voting at the General Shareholders' Meeting held on March 18, 2005, 3,695 shares voted and another 6,745 carried out the formalities for proxy-voting by electronic means, by using the procedure established for such purpose on the Company's website, www.iberdrola.com. In addition, a total of 229,229 shares cast their vote and another 935,961 carried out the formalities for proxy-voting by mail.

This annual corporate governance report was approved by the Board of Directors of the company at the meeting held on February 22, 2006.

Indicate the Directors that voted against the approval or that abstained from voting in connection with the approval of this Report.

REGULATIONS FOR THE GENERAL SHAREHOLDERS' MEETING OF IBERDROLA, S.A.

PREAMBLE

In order to reinforce the transparency of listed companies, Law 26/2003 of July 17 (the "Transparency Law"), which modifies Law 24/1988 of July 28 on the Securities Market (the "Securities Market Law") and the consolidated text of the Companies Law, has introduced a new Article 113 into the Securities Market Law pursuant to which, and in accordance with the recommendations of the Special Commission for the Promotion of Transparency and Security in the Securities Markets and Listed Companies (*Comisión Especial para el Fomento de la Transparencia y Seguridad en los Mercados Financieros y las Compañías Cotizadas*), listed companies are required to have rules governing all matters relating to the General Shareholders' Meeting vis-à-vis the provisions of Law and the By-Laws.

In compliance with this provision, and drawing upon the standard that the Company's relationship with its shareholders is based upon principles of equal treatment among shareholders, transparency and the broad and continuous supply of information, Iberdrola, S.A. (hereinafter, "Iberdrola" or the "Company") hereby adopts these Regulations for the General Shareholders' Meeting, which systematize and develop the guidelines for this corporate decision-making body so that all of the shareholders can sufficiently understand the Company's situation and fully exercise their rights at the General Shareholders' Meeting.

PRELIMINARY TITLE

Article 1. Purpose of the Regulations.

These Regulations are intended to determine the basic rules for the preparation, call, quorum, conduct, adoption of resolutions at, conclusion and documentation of the General Shareholders' Meeting of the Company, as well as for the exercise for such purpose of the voting rights belonging to the shareholders of Iberdrola.

These Regulations are also intended to facilitate the effective exercise by the shareholders of their powers at a General Shareholders' Meeting, pursuant to the provisions of Law and the By-Laws.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Article 2. Scope of Application of the Regulations.

These Regulations shall apply to all General Shareholders' Meetings of the Company, whether Ordinary or Extraordinary.

Article 3. Dissemination of the Regulations.

These Regulations shall be communicated to the National Securities Market Commission (*Comisión Nacional del Mercado de Valores*) and registered with the Commercial Registry (*Registro Mercantil*) pursuant to applicable rules and regulations. The current text of these Regulations shall also be made available on the website of the Company.

Article 4. Order of Priority.

These Regulations further elaborate and supplement the legal and by-laws provisions applicable to the General Shareholders' Meeting, which provisions shall prevail in the event of a conflict with the provisions of these Regulations.

Article 5. Amendment of the Regulations.

The Board of Directors, and shareholders who individually or collectively hold interests equal to or greater than five (5%) percent of the share capital of the Company, shall have the right to propose amendments to these Regulations.

TITLE I. DEFINITION, TYPES AND POWERS OF THE GENERAL SHAREHOLDERS' MEETING

Article 6. Definition and Types of General Shareholders' Meetings.

1. The group of all duly convened shareholders meeting at a General Shareholders' Meeting to debate and decide by the required majorities those matters within their power, or to be informed of those other matters that the Board of Directors deems appropriate, constitutes the sovereign decision-making body of the Company. The decisions thereof are binding upon all shareholders, including those who are absent, dissenting, abstain from voting and who lack the right to vote, without prejudice to the rights such shareholders may have to challenge such decisions.
2. General Shareholders' Meetings may be ordinary or extraordinary.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

The shareholders acting at an Ordinary General Shareholders' Meeting, which shall be previously called for such purpose, must meet within the first six (6) months of each fiscal year in order to review corporate management, approve financial statements from the prior fiscal year, if appropriate, and decide upon the allocation of profits from such fiscal year. Resolutions may also be adopted at the Ordinary General Shareholders' Meeting regarding any other matter within the power of the shareholders, which powers are set forth in Article Seven, provided that such matters appear on the agenda and that shareholders with the required capital are in attendance at the General Shareholders' Meeting.

Any General Shareholders' Meeting not provided for in the foregoing paragraph shall be deemed an Extraordinary General Shareholders' Meeting and shall meet at any time of the year, provided that the Board of Directors deems such meeting to be appropriate.

Article 7. Powers of the Shareholders Acting at a General Shareholders' Meeting.

1. The shareholders at a General Shareholders' Meeting shall decide the matters assigned thereto by Law or the By-Laws, and particularly regarding the following:
 - a) Appointment and removal of Directors.
 - b) Appointment and removal of Auditors.
 - c) Review of corporate management; approval, if appropriate, of financial statements from the prior fiscal year and decision regarding the allocation of the results thereof.
 - d) Increase or reduction in share capital, and delegation to the Board of Directors of the power to increase capital.
 - e) Issuance of debentures and other negotiable obligations and delegation to the Board of Directors of the power for the issuance thereof.
 - f) Approval of the derivative acquisition of the Company's own shares.
 - g) Approval and amendment of these Regulations.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

- h) Amendment of the By-Laws.
 - i) Merger, split-off, transformation of the Company, dissolution and overall assignment of assets and liabilities.
2. In addition, the shareholders acting at a General Shareholders' Meeting shall decide any matter submitted to them by the Board of Directors.

TITLE II. ORGANIZATION OF THE GENERAL SHAREHOLDERS' MEETING

Article 8. Call of the General Shareholders' Meeting.

1. Pursuant to the provisions of the By-Laws, the General Shareholders' Meeting must be formally convened by the Board of Directors through an announcement published in the Official Bulletin (*Boletín Oficial*) of the Commercial Registry and in one of the newspapers of wider circulation in Vizcaya at least one month prior to the date set for the holding thereof, except in cases where the Law provides for a different period, in which case the provisions thereof shall apply.
2. The Board of Directors must call a General Shareholders' Meeting in the following events:
 - a) In the event set forth in paragraph two of Article Six above.
 - b) In the event that the meeting is requested in writing by shareholders who hold or represent at least that percentage of capital provided for by Law, which request sets forth the matters to be addressed. In this event, the Board of Directors shall call for the General Shareholders' Meeting to be held within thirty (30) days following the date on which a notarized request for such call has been made. The Board of Directors must include the requested matters in the agenda.
 - c) In the event a tender offer is made for the securities of the Company, in order to report to the shareholders regarding the tender offer and to debate and decide upon those matters submitted for their consideration. Any shareholder holding voting shares representing at least one (1%) percent of share capital shall have the right to request inclusion of matters in the agenda of the General Shareholders' Meeting to be called for this purpose.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

3. Notice of the call must contain all statements required by Law under such circumstances and must in all events set forth the day, place and time of the meeting upon first call and all matters to be dealt with. The announcement may also, if appropriate, set forth the date on which the General Shareholders' Meeting shall proceed upon second call.
4. The Company shall deliver a copy of the notice of the call to the National Securities Market Commission. The text of the announcement shall also be accessible through the Company's website.
5. Beginning on the date of the announcement of the call, such information as is deemed appropriate to facilitate the attendance of the shareholders at the General Shareholders' Meeting and their participation therein shall be contained in the Company's website, including at least the following:
 - a) Documents relating to the General Shareholders' Meeting that are required by Law, with information regarding the agenda, proposals made by the Board of Directors, and any other relevant information that the shareholders might need in order to cast their vote.
 - b) The existing channels of communication between the Company and the shareholders and, in particular, explanations pertinent to the exercise of a shareholder's right to information, indicating the postal and e-mail addresses to which the shareholders may direct their requests.
 - c) The means and procedures for granting a proxy to attend the General Shareholders' Meeting.
 - d) The means and procedures for distance voting, including, where applicable, the forms required to evidence attendance and the casting of votes by means of data transmission at the General Shareholders' Meeting.
6. Shareholders representing at least five (5%) percent of the Share Capital may request the publication of a supplement to the call of the General Shareholders' Meeting including one or more items in the Agenda. The exercise of this right must be made by duly authenticated notice that must be received at the company's registered address within five (5) days of the publication of the call to meeting. The supplement to the call to meeting must be published at least fifteen (15) days prior to the date indicated for the holding of the Meeting.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

7. The Board of Directors may require that a Notary Public attend the General Shareholders' Meeting and prepare the minutes thereof. It must do so under the circumstances provided by Law.

Article 9. Right of the Shareholders to Receive Information Prior to the Holding of the General Shareholders' Meeting.

1. From the first date of publication of the call to the General Shareholders' Meeting through and including the seventh day prior to the date provided for the first call to meeting, the shareholders may request in writing such reports or clarifications that they deem are required, or ask written questions that they deem pertinent, regarding the matters contained in the agenda. In addition, upon the same prior notice and in the same manner, the shareholders may request reports or clarifications or ask written questions regarding information accessible to the public which has been provided by the Company to the National Securities Market Commission since the holding of the last General Shareholders' Meeting.

All such requests for information may be made by delivery of the request to the Company's registered office, or by delivery to the Company via mail or other means of electronic or long-distance data communication sent to the address specified in the announcement of the meeting or, in the absence of such specification, to the Office of the Shareholder (*Oficina del Accionista*). Requests shall be allowed in which the electronic document by virtue of which the information is requested includes a recognized electronic signature used by the requesting party or other mechanisms which, pursuant to a resolution previously adopted for such purpose, the Board of Directors deems sufficient to ensure the authenticity and identity of the shareholder exercising such right to receive information.

Whatever the means used to issue the requests for information, the request of the shareholder must include the shareholder's first and last names, with evidence of the shares owned, in order for this information to be checked against the list of shareholders and the number of shares in the shareholders' name provided by the *Sociedad de Gestión de los Sistemas de Registro, Compensación y Liquidación de Valores, S.A.* [Securities Registration, Clearing and Payment Systems Management Company] (Iberclear), for the General Shareholders' Meeting in question. The shareholder shall be responsible for maintaining proof of delivery of the request to the Company as and when due. The Company's website shall provide detailed explanations

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

regarding the exercise of the shareholders' right to receive information in compliance with the provisions of applicable rules and regulations.

2. The Board of Directors shall be required to provide the information requested pursuant to the preceding paragraphs in the form and within the periods provided by Law, except in cases in which (i) it is requested by shareholders representing less than twenty-five (25%) percent of share capital and publication thereof may, in the opinion of the Chairman, prejudice the interests of the Company; (ii) the request for information or clarification does not refer to matters included in the agenda or information accessible to the public which has been provided by the Company to the National Securities Market Commission since the holding of the last General Shareholders' Meeting; (iii) the information requested is deemed abusive for any reason; or (iv) legal or regulatory provisions provide otherwise.
3. The Board of Directors may authorize any of its members or its Secretary to respond on behalf of the Board of Directors to shareholder requests for information.

TITLE III. RIGHT TO ATTEND AND PROXY REPRESENTATION

Article 10. Right to Attend.

1. All holders of voting shares may attend the General Shareholders' Meeting and take part in deliberations thereof, with the right to be heard and to vote.
2. In order to exercise the right to attend, shareholders must cause the shares to be registered in their name in the corresponding book-entry registry at least five (5) days prior to the day on which the General Shareholders' Meeting is held. This circumstance must be evidenced by means of the appropriate attendance card or validation certificate issued by the entity or entities in charge of the book-entry registry, or in any other form allowed by applicable legislation.

Article 11. Right to Proxy Representation.

1. Shareholders may exercise the right to attend the General Shareholders' Meeting personally or through proxy representation by another shareholder, if the requirements and formalities of Law and the By-Laws are met. Representation by a person who cannot show a proxy in accordance with Law shall be invalid and ineffective.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

2. Without prejudice to the provisions of the Companies Law (*Ley de Sociedades Anónimas*), proxy representation must be granted directly in writing or by mail or email. When granted by means of mail or e-mail, only those proxies which are granted in the following manner shall be deemed valid:
 - a) by mail, delivering to the Company an instrument evidencing the proxy granted and accompanied by the attendance card issued by the entity or entities in charge of the book-entry registry.
 - b) by e-mail, through notice to the Company setting forth the details of the proxy being granted and the identity of the shareholder being represented, and using a recognized electronic signature of the shareholder or other type of guarantee that the Board of Directors deems best ensures the authenticity and identification of the shareholder granting the proxy, and which shall be accompanied by an unalterable electronic copy of the attendance and ballot card.

A proxy granted by either of the above-mentioned means of long-distance communication must be received by the Company before midnight on the day immediately prior to the day set for the holding upon first call of the General Shareholders' Meeting. Otherwise, the proxy shall be deemed not to have been granted.

3. The Board of Directors has the power to further elaborate upon the foregoing provisions by establishing rules, means and procedures adjusted to current techniques in order to organize the grant of proxies by electronic means, in accordance with the rules and regulations issued for such purpose, if any.

Specifically, the Board of Directors may (i) establish rules for the use of guarantees other than electronic signatures for granting of proxies by mail or e-mail, and (ii) reduce the advance period for receipt by the Company of proxies granted by mail or e-mail.

4. The Chairman of and Secretary to the General Shareholders' Meeting shall have the widest legal powers to recognize the validity of a document or media evidencing representation by proxy; only those which fail to meet the minimum legal requirements may be deemed invalid, and only provided that such failure cannot be cured.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

5. The proxy is always revocable. Personal attendance at the General Shareholders' Meeting of the shareholder granting the proxy shall have the effect of revoking the proxy.
6. In cases where the directors of the Company make a public solicitation for proxies, the rules contained in the Companies Law, the Securities Market Law and rules and regulations further elaborating upon the provisions thereof shall apply. In particular, the document evidencing the proxy must contain or attach the agenda, as well as the solicitation of instructions for the exercise of voting rights and the way in which the proxy-holder will vote in the event that specific instructions are not given, subject in all cases to the provisions of Law. The delegation may also include those matters which the law allows to be dealt with at the General Shareholders' Meeting even when not provided for in the agenda.

Article 12. Attendance Cards.

1. Entities participating in the *Sociedad de Gestión de Sistemas de Registro, Compensación y Liquidación de Valores, S.A.* (Iberclear) may be authorized to issue cards for attendance at the General Shareholders' Meeting in favor of their respective depositing shareholders, which cards may also be issued by the Company itself in exchange for the deposit of documents evidencing ownership of the shares.
2. For such purpose, the Company may propose to such entities the format of the attendance card to be issued to the shareholders in order for the cards issued by such entities to be uniform and to include a bar code or other system which allows for the electronic reading thereof in order to facilitate the computerized calculation of attendees. The Company may also propose the formula to be recited in such document in order to delegate proxy representation at the meeting in favor of another shareholder, which should also set forth the way in which the proxy-holder will vote on each of the resolutions proposed by the Board of Directors for each item on the agenda in the absence of specific instructions of the shareholder being represented.

Article 13. Other Attendees.

1. The members of the Board of Directors must attend the General Shareholders' Meetings. Managers, experts and other persons interested in the efficient running of corporate affairs may also be authorized by the Board of Directors

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

to attend General Shareholders' Meetings. The absence of any of the foregoing shall not affect the validity of the General Shareholders' Meeting.

2. The Chairman of the General Shareholders' Meeting may grant access to the press, financial analysts or any other person the Chairman deems appropriate. However, the shareholders may revoke such authorization.

TITLE IV. INFRASTRUCTURE AND EQUIPMENT

Article 14. Place of the Meeting.

1. The General Shareholders' Meeting shall be held at the place indicated in the call to meeting within the municipality where the Company's registered office is located. If no place is indicated in the call, it shall be deemed that the meeting will take place at the Company's registered office. The premises shall have the equipment, personnel and infrastructure needed for the meeting. In addition, the Company may make available other premises with similar characteristics where the General Shareholders' Meeting can be held in the event of an emergency.
2. The General Shareholders' Meeting may be attended by going to the place where the meeting is to be held, or to other places provided by the Company, if any, and indicated in the call to meeting, and which are connected by video conference systems that allow recognition and identification of the parties attending, permanent communication among the attendees regardless of their location, and participation and voting. The principal place of the meeting must be located in the municipal area of the Company's registered office, but supplemental locations need not be so located. For all purposes relating to the General Shareholders' Meeting, attendees at any of the sites shall be deemed attendees at the same individual meeting. The meeting shall be deemed to be held at the principal location thereof.

Article 15. Infrastructure, Means of Communication and Services Available at the Premises.

1. The premises to be used to hold the General Shareholders' Meeting shall have the personnel, technical equipment and safety, assistance and emergency measures matching the nature and location of the property, as well as the importance of the event. In addition, the premises for holding the meeting shall have the emergency and evacuation measures required by law, as well other measures deemed appropriate in light of the circumstances.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

2. Appropriate safety controls and surveillance and protection measures, as well as systems for controlling access to the meeting, shall be established in order to ensure the safety of the attendees and the orderly conduct of the General Shareholders' Meeting.
3. At the entrance to the premises where the meeting is being held, the attendees shall be delivered a copy of the full text of the resolutions proposed by the Board of Directors for submission to the shareholders regarding each item on the agenda. Excepted from the foregoing are those proposal which have been prepared immediately prior to the holding of the meeting and which for such reason cannot be delivered in written form to all attendees. In addition, there shall be made available to the attendees copies of the management reports and other documentation which, pursuant to legal or by-laws provisions, must be made available to the shareholders with respect to such proposed resolutions.
4. The entire proceedings of the General Shareholders' Meeting may be the subject of audiovisual recording, if so determined by the Chairman thereof. The attendees may not use photographic, video, image and/or sound recording equipment or other similar equipment in the room where the meeting is taking place, except to the extent allowed by the Chairman. Means allowing for the simultaneous interpretation of debate may also be made available when deemed appropriate for any reason.

Article 16. Computer System for the Recording of Proxies and Voting Instructions, Preparation of the List of Attendees, and Calculation of Voting Results.

1. Sufficiently in advance of the day set forth for the holding of the General Shareholders' Meeting, the Company shall provide the personnel and technical equipment required to perform computer monitoring and calculation of the proxies (with the corresponding voting instructions, if any) received by the Company's Board of Directors, as well as those which might be received directly by the members of such Board of Directors.
2. In addition, on the day of the General Shareholders' Meeting, the premises indicated for the meeting shall be supplied with the above-mentioned computer personnel and technical equipment for the purpose of recording the entry of shareholders attending the meeting in order to calculate the provisional and final quorum for the General Shareholders' Meeting and the preparation of the list of shareholders present in person and by proxy, which shall be electronically recorded in duplicate and sealed, and the cover of

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

which shall show the appropriate identification procedure signed by the Secretary with the approval of the Chairman, and the procedure, if any, followed by the Notary Public, which shall be attached to the minutes of the meeting. Such personnel and equipment shall also be provided in order to calculate the voting.

3. In order to undertake such activity, the Company shall, pursuant to applicable rules and regulations, ask the *Sociedad de Gestión de los Sistemas de Registro, Compensación y Liquidación de Valores, S.A.* (Iberclear) to provide, in electronic format and within the deadlines provided for such purpose, the list of the Company's shareholders and the number of shares appearing in the name of each shareholder.

Article 17. Office of the Shareholder.

The Company shall set up an Office of the Shareholder in a visible place at the stated premises of the meeting, for the purpose of (i) answering questions regarding the proceedings raised by the shareholders prior to the commencement of the session, without prejudice to shareholders' legal and by-laws rights to take the floor, make proposals and vote, and (ii) assisting and informing attendees and shareholders who wish to take the floor, preparing for such purpose a list of those who previously state their desire to participate, as well as collecting the text of their statements, if such statements are available in writing.

TITLE V. CONDUCT OF THE GENERAL SHAREHOLDERS' MEETING

Article 18. Opening of the Premises and Monitoring Access Thereto

1. In the place and on the day provided, whether on first or second call, for the holding of the General Shareholders' Meeting, and beginning one hour prior to the time announced for the commencement of the meeting (unless otherwise specified in the notice of the call), the shareholders or their valid representatives may present their respective attendance cards, proxies and, if applicable, the documents evidencing their status as legal representative, to the staff of the Office of the Shareholder. The registration of shareholders attending the meeting in person and by proxy shall be carried out through optical scanning or other similar technical media, pursuant to the provisions of Article Sixteen above.

2. In the event that a second call is made due to the failure to attend of the number of shareholders legally required to hold the General Shareholders' Meeting on the first call, such circumstance shall be properly recorded in the Minutes of the General Shareholders' Meeting.

Article 19. Chairmanship of the General Shareholders' Meeting

1. The Presiding Committee (*Mesa Presidencial*) shall be formed at the time stated in the call of the General Shareholders' Meeting.
2. The Chairman of the Board of Directors or, in the absence thereof, the Vice-Chairman, shall act as the Chairman of the General Shareholders' Meeting; if there are several Vice-Chairmen, they shall act in the order set forth in the By-Laws; in the absence of the foregoing, the longest-serving Director shall serve, and in the absence of all of the above, the shareholder designated by the shareholders themselves shall serve.
3. The Chairman shall be assisted by the Secretary. The Secretary of the Board of Directors and, in the absence thereof, the Assistant Secretary of the Board of Directors, shall act as Secretary to the General Shareholders' Meeting; in the absence of both, the Director with the least amount of time in such position shall serve, and in the absence of all of the above, the shareholder designated for such purpose by the shareholders themselves shall serve.

The Chairman may also, if so desired, obtain the assistance of any expert the Chairman deems appropriate.

4. The Chairman and the Secretary, along with the remaining members of the Board of Directors in attendance, shall constitute the Presiding Committee of the General Shareholders' Meeting.

Article 20. Powers of the Chairman of the General Shareholders' Meeting.

1. The Chairman of the General Shareholders' Meeting, who is responsible for presiding over the meeting, shall generally have the broadest powers needed for the best progress of the General Shareholders' Meeting, including the following:
 - a) To call the meeting to order.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

- b) To verify that there is a valid quorum for the General Shareholders' Meeting and, if applicable, to declare it to be validly in session.
 - c) To take notice of the request, if any, made by the Board of Directors for the presence of a Notary Public to take the Minutes of the General Shareholders' Meeting.
 - d) Together with the Secretary to the General Shareholders' Meeting, to make decisions regarding questions, requests for clarification or claims raised with respect to the list of attendees and delegated powers or proxies.
 - e) To direct presentations such that the debate adheres to the Agenda.
 - f) To direct the deliberations by granting the floor to shareholders who so request it, and taking the floor away or refusing to grant it when the Chairman deems that a matter has been sufficiently debated, is not on the agenda or hinders the progress of the meeting.
 - g) To accept or reject new proposals with respect to matters included in the agenda.
 - h) To indicate the time for voting.
 - i) To organize the voting and, with the assistance of the Secretary, to perform the calculation thereof.
 - j) To announce the results of the voting.
 - k) To temporarily suspend the General Shareholders' Meeting.
 - l) To adjourn the meeting.
 - m) And, in general, to exercise all other powers, including those of order and discipline, which are required to properly hold the General Shareholders' Meeting.
2. The Chairman, even when present at the meeting, may entrust management of debate to a member of the Board of Directors the Chairman deems appropriate, or to the Secretary, who shall carry out these duties on behalf of the Chairman, who may remove them at any time.

3. If the Chairman of the General Shareholders' Meeting is absent for any reason during the holding of the meeting, the replacement thereof in the exercise of his duties shall be carried out in accordance with the provisions of the paragraph two of Article Nineteen above and the By-Laws.

Article 21. Powers of the Secretary to the General Shareholders' Meeting.

1. The powers of the Secretary shall be the following:
 - a) To declare the Presiding Committee to be formed, and to announce the members thereof.
 - b) To inform the shareholders, by delegation from the Chairman, of the provisional and final quorum of shareholders attending the General Shareholders' Meeting, indicating the number of shareholders represented in person and by proxy, as well as the number of shares they represent in person and by proxy, and the percentage of share capital represented thereby, and also indicating the total number of shares represented at the General Shareholders' Meeting as well as the percentage such number represents of the total share capital of the Company, for which purpose the Company's treasury shares shall not be counted.
 - c) To read, if applicable, or to make a summary report of the essential terms of the call to meeting, the text of the proposed resolutions, the Financial Statements (Balance Sheet, Profit and Loss Statement and Annual Report), the Company's Management Report and Consolidated Group Report, the Proposal for Allocation of Results and the Auditors' Report.
 - d) Together with the Chairman, to make decisions regarding questions, requests for clarification or claims raised with respect to the list of attendees and delegated powers or proxies.
 - e) To draft the Minutes of the General Shareholders' Meeting, if applicable.
2. If the Secretary to the General Shareholders' Meeting is absent for any reason during the holding of the meeting, the replacement thereof in the exercise of the Secretary's duties shall be carried out in accordance with the provisions of the paragraph three of Article Nineteen above and the By-Laws.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Article 22. Establishment of a Quorum for the General Shareholders' Meeting.

1. The General Shareholders' Meeting, whether Ordinary or Extraordinary, shall be validly established with the minimum quorum required by applicable legislation, taking into account the matters appearing in the agenda.
2. Notwithstanding the provisions of the foregoing paragraph, shareholders representing two-thirds of subscribed capital with voting rights must be in attendance at the first call of the General Shareholders' Meeting, and shareholders representing sixty (60%) percent of such capital must be in attendance at the second call, in order to adopt resolutions regarding a change in the corporate purpose, transformation, total split-off, dissolution of the Company and amendment of paragraph two of Article Twenty-One of the By-Laws.
3. The absence of shareholders occurring once a quorum for the General Shareholders' Meeting has been established shall not affect the validity of the meeting.
4. If the attendance of shareholders representing a particular percentage of share capital or the consent of specific interested shareholders is required pursuant to applicable legal or by-laws provisions in order to validly adopt a resolution regarding one or more items on the agenda of the General Shareholders' Meeting, and such percentage is not reached or such shareholders are not present in person or by proxy, the shareholders shall be limited to deliberation and decision regarding those items on the agenda which do not require such percentage of capital or such shareholders in order to be decided.

Article 23. List of Attendees.

1. Once the Presiding Committee has been formed, and prior to beginning with the agenda, a list of attendees shall be prepared which sets forth the nature or representation of each attendee and the number of their own or other parties' shares present. At the end of the list, there shall be a determination of the number of shareholders present in person or by proxy, as well as the amount of capital they own, with a specification as to which capital corresponds to shareholders with the right to vote. The list of attendees shall include as present those shareholders who have cast votes from a distance pursuant to

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

the provisions of the By-Laws and these Regulations. The list shall be contained in electronic media, the cover of which shall show the appropriate identification procedure signed by the Secretary to the General Shareholders' Meeting with the approval of the Chairman.

If the meeting takes place in different places pursuant to the provisions of these Regulations, the list of attendees shall also include the capital represented in person or by proxy in each room. In such case, distance votes shall be included in the room where the Presiding Committee is located.

2. The Secretary has the power, exercised by delegation from the Chairman, to prepare the list of attendees.
3. The list of attendees shall be placed at the beginning of the Minutes of the General Shareholders' Meeting or shall be attached thereto by means of an annex signed by the Secretary and approved by the Chairman.

Article 24. Opening of the Session.

1. Prior to the commencement of the General Shareholders' Meeting, the Chairman or, by delegation therefrom, the Secretary, shall announce the provisional information relating to the number of shareholders with the right to vote attending the session in person or by proxy or by distance voting, with an indication of their capital interests. In view of such information, the Chairman shall, if appropriate, provisionally declare the existence of a quorum for the General Shareholders' Meeting and shall open the session.
2. If appropriate, the Chairman shall announce of the presence of a Notary Public at the meeting, and shall identify such Notary Public, and shall disclose the request he has made of the Notary Public to prepare the Minutes of the General Shareholders' Meeting.

Article 25. Shareholder Requests to Address the General Shareholders' Meeting.

1. Once the Chairman has declared the General Shareholders' Meeting to have commenced, those shareholders who desire to address the meeting and, if applicable, to request information or clarifications regarding the items on the agenda or to make proposals, shall identify themselves to the Notary Public or persons assisting him or, in the absence thereof, to the Secretary or assistants thereto provided for such purpose or, if so indicated, to the Office of the

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Shareholder, and state their first and last names, the number of shares they own and the number they represent. The Chairman may request speakers to deliver the text of their presentation to the Notary Public (or, in the absence thereof, to the Secretary) or assistants thereto or the Office of the Shareholder. In any event, if they desire such presentation to be literally reflected in the minutes of the General Shareholders' Meeting, they must at such time deliver it in writing to the Notary Public (or, in the absence thereof, to the Secretary) in order for the latter to be able to compare it to the shareholder's presentation.

2. In addition, regarding the right to make an address in order to take the floor, the Chairman shall inform the attendees that, in order to speed up the progress of the General Shareholders' Meeting, those shareholders who wish to speak must provide the Office of the Shareholder with their name and the number of shares they hold, as well as the text of their presentation if they have it in writing, in order to make a copy to facilitate the preparation of the Minutes of the General Shareholders' Meeting.

Article 26. Reports

1. While the shareholders who desire to take the floor are identified pursuant to the provisions of the foregoing article, the Secretary, at the direction of the Chairman, shall inform the shareholders of the various publications of the pertinent notice of the call to meeting, and shall proceed to a reading thereof, unless the shareholders resolve that such publications be deemed to have been read.
2. Thereafter, the General Shareholders' Meeting shall continue with the presentation of reports by the Chairman and the reports, if any, of the members of the Board of Directors or persons designated for such purpose.
3. Thereafter, and in any event prior to voting on the business included in the agenda, the Chairman shall commence the period for presentations by the shareholders.

Article 27. Shareholder Presentation Period

1. Presentations by the shareholders shall occur in the order in which they are called by the Presiding Committee, after the setting of the periods for such presentations by the Chairman. No shareholder may make a presentation

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

dealing with business not included in the Agenda or without being granted the floor by the Chairman of the General Shareholders' Meeting.

2. The shareholders shall initially have a maximum of five (5) minutes for each presentation, without prejudice to the Chairman's power to extend such period. Notwithstanding the foregoing, when the number of presentations requested or other circumstances so require, the Chairman may set a maximum presentation period of less than five (5) minutes, giving due regard in each case to the equal treatment of presenting shareholders and the principle of non-discrimination.
3. In the exercise of the Chairman's powers to preside over the General Shareholders' Meeting, and without prejudice to other action that may be taken, the Chairman:
 - a) may extend the time initially allocated to each shareholder, when the Chairman so deems it appropriate;
 - b) may request the presenting parties to clarify issues that have not been understood or which have not been sufficiently explained during the presentation;
 - c) may call the presenting shareholders to order so that they limit their presentation to business properly before the General Shareholders' Meeting and refrain from making improper statements or exercising their right in an abusive or obstructionist manner;
 - d) may announce to the presenting parties that the time for their presentations will soon be ending so that they may adjust their discourse and, when the time granted for their presentation has ended, or if they persist in the conduct described in the preceding paragraph, may withdraw the floor from them, and, if the Chairman believes that their presentation might alter the proper order and normal conduct of the meeting, the Chairman may adopt appropriate measures in order to comply with this provision; and
 - e) may deny the floor when the Chairman believes that a particular matter has been sufficiently debated, is not included in the agenda, or hinders the progress of the meeting.

The Chairman shall endeavor to maintain order in the room in order to allow the presenting parties to make their presentations without undue interruption.

4. During their presentation, the shareholders may make proposals regarding any matter on the agenda except in those cases in which the Law provides that they must be made available to the shareholders at the Company's registered office at the time the call to meeting is published. They may also propose the adoption of resolutions on those matters which may be debated and decided at the General Shareholders' Meeting without such matters appearing on the agenda of the meeting, as well as exercising their right to receive information as described in the next article.
5. When several shareholders ask to make a presentation regarding the same matter, any of them may withdraw their presentation and cede their period to the others.
6. If one of the shareholders desires to make a new presentation, such shareholder shall so request the Chairman of the General Shareholders' Meeting, who may grant the floor again to such shareholder if the Chairman deems it appropriate based on the progress of the meeting.

Article 28. Right to Receive Information During the General Shareholders' Meeting.

1. During the presentation period, all shareholders may verbally request information or clarifications that they deem are necessary regarding the matters contained in the agenda. They must have previously identified themselves for this purpose in accordance with the provisions of Article Twenty-Five above.

The Directors shall be required to provide the information requested pursuant to the preceding paragraph in the form and within the periods provided by Law, except in those cases in which (i) it has been requested by shareholders representing less than twenty-five (25%) percent of share capital, and the Chairman believes that publication thereof may prejudice the interests of the Company; (ii) the request for information or clarification does not refer to matters included in the agenda; (iii) the requested information or clarification is not needed to form an opinion regarding the matters submitted to the shareholders, or is deemed abusive for any reason; or (iv) legal or regulatory provisions so provide.

2. The requested information or clarification shall be provided by the Chairman or, if applicable and if directed by such Chairman, by the Chairman of the

Audit and Compliance Committee, the Secretary, a Director or, if appropriate, any employee of the Company or expert on the matter. The Chairman shall direct the manner in which an answer shall be provided to the shareholder who had made a request or requested a clarification in such shareholders' oral presentation. In particular, it may be decided to provide a collective response to the shareholder presentations at the end of the presentation period.

In the event that for any reason it is not possible to satisfy the shareholder's right to receive information during the proceedings of the General Shareholders' Meeting, the Directors shall provide the requested information in writing to the interested shareholder within seven (7) days of the close of the General Shareholders' Meeting.

Article 29. Establishment of a Final Quorum for the General Shareholders' Meeting

1. The list of attendees shall be finalized no later than at the end of the presentations, and the Chairman or, by delegation thereof, the Secretary, shall read the overall information contained in the list of attendees, detailing the number of shareholders with the right to vote who are present in person or by proxy at the meeting (including those who have exercised their right to vote from a distance pursuant to the provisions of these Regulations), the number of shareholders corresponding thereto and the percentage of share capital they represent.
2. Once this information has been announced by the Chairman or the Secretary, the Chairman shall, if appropriate, declare the existence of a proper and sufficient quorum at the General Shareholders' Meeting on first or second call, as the case may be, and shall decide if the shareholders can debate and adopt resolutions regarding all matters contained in the agenda or if, on the contrary, debate must be limited to only some of them, based on attendance at the General Shareholders' Meeting in accordance with the list of attendees.
3. Once the definitive establishment of a quorum for the General Shareholders' Meeting has been declared, and if the minutes are being prepared by a Notary Public, the attending shareholders may state to the Notary Public any reservation or protest they may have regarding the existence of a valid quorum for the General Shareholders' Meeting or regarding the overall information from the list of attendees which was previously read aloud, in order to duly record such reservation or protest in the minutes of the General Shareholders' Meeting.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Article 30. Temporary Suspension

1. In exceptional cases, when there are disturbances which materially hinder the order of the meeting or any other extraordinary circumstance which temporarily prevents the normal progress of the General Shareholders' Meeting, the Chairman may agree to suspend the session for the time the Chairman deems appropriate (but not for more than two (2) hours) in order to reestablish the conditions needed for the continuation thereof. The Chairman of the General Shareholders' Meeting may adopt such additional measures as the Chairman deems appropriate to ensure the safety of those present and to avoid the repetition of circumstances which might again affect the proper conduct of the meeting.
2. Once the session has resumed, if the situation which gave rise to the suspension persists, the Chairman shall consult with the Presiding Committee in order for the shareholders to agree to continue the session on the next day. In the event the continuation is not approved for any reason, the Chairman shall immediately adjourn the meeting.

Article 31. Continuation

1. At the proposal of the Directors or at the request of shareholders representing at least one-fourth of the capital present at the General Shareholders' Meeting, the attendees may agree to a continuation of their sessions over one or more consecutive days.
2. Once the General Shareholders' Meeting has been continued, there shall be no need to repeat compliance with the provisions of Law or these By-Laws in subsequent sessions for them to be validly held. Without prejudice to the provisions of paragraph three of Article Thirty-Four, if any shareholder included in the list of attendees prepared at the beginning of the meeting does not thereafter attend the subsequent meetings, the majorities needed to adopt resolutions shall continue to be those determined based on the results of such list.

Article 32. Casting of Votes from a Distance

1. Shareholders having the right to attend the meeting and to vote may cast their vote regarding proposals relating to the items included in the agenda by mail or by electronic communication.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Mail votes shall be cast by sending to the Company a document in which such vote is recorded, accompanied by the attendance card issued by the entity or entities in charge of the book-entry registry.

Votes by electronic communication shall be cast using a recognized electronic signature or other type of guarantee that the Board of Directors deems best ensures the authenticity and identification of the shareholder exercising the right to vote, and to which shall be attached an unalterable electronic copy of the attendance card and ballot.

2. In order to be valid, votes cast by either of the above-mentioned means must be received by the Company before midnight on the day immediately prior to the day provided for the holding upon first call of the General Shareholders' Meeting. Otherwise, the vote shall be deemed not to have been cast. The Board of Directors may provide a lesser period in accordance with the provisions of the By-Laws.
3. Shareholders with the right to attend the meeting and who cast votes from a distance pursuant to the provisions of this Article and the By-Laws shall be deemed present for purposes of determining the establishment of a quorum for the General Shareholders' Meeting in question.
4. The distance voting referred to in this Article shall be rendered void:
 - a) By subsequent express revocation made by the same means used to cast the vote and within the period established for such voting.
 - b) By attendance at the meeting in person or by proxy of the shareholder casting the vote.
5. The Board of Directors is empowered to elaborate upon the foregoing provisions by establishing rules, means and procedures adjusted to current techniques in order to organize the casting of votes and the grant of proxies by electronic means, following the rules and regulations issued for such purpose and the By-Laws, if applicable.

Specifically, the Board of Directors may (i) establish rules for the use of guarantees other than electronic signatures for casting electronic votes pursuant to the provisions of paragraph three above, and (ii) reduce the advance period set forth in paragraph four above for receipt by the Company of votes cast by postal or electronic communication.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

In any event, the Board of Directors shall adopt the measures needed to avoid possible deception and to ensure that the person casting a vote or granting a proxy by postal or electronic communication has the right to do so pursuant to the provisions of the By-Laws and these Regulations.

Article 33. Voting on Proposed Resolutions.

1. Once the shareholder presentations have ended and responses have been made to requests for information pursuant to the provisions of these Regulations, the proposed resolutions regarding matters included in the agenda or which are not legally required to be set forth therein, including proposals made by the shareholders during the meeting, shall be submitted to a vote.

The adoption of resolutions shall proceed following the agenda set forth in the call to meeting. Resolutions proposed by the Board of Directors shall be first submitted to vote and then, if appropriate, resolutions proposed by others shall be voted upon following their priority in time. In any event, once a proposed resolution has been adopted, all others relating to the same matter and which are incompatible therewith shall be withdrawn and therefore need not be voted upon.

If proposals have been made regarding matters that may be approved at the General Shareholders' Meeting without having appeared in the agenda, the Chairman shall decide the order in which they shall be submitted to a vote.

It shall not be necessary for the Secretary to previously read aloud the text of proposed resolutions which has been provided to the shareholders at the beginning of the meeting, except when deemed appropriate by the Chairman for some or all of the proposals. In any event, the attendees shall be told to which item on the agenda the proposed resolution being submitted to vote refers.

2. As a general rule, and without prejudice to the use of other alternative systems, at the election of the Chairman, voting on the proposed resolutions referred to in the preceding paragraph shall be by show of hands, if necessary, although resolutions may also be adopted upon the general consent of the shareholders. The foregoing is without prejudice to shareholders (or their proxies) who desire to abstain, to vote in the negative or in blank or to make known their opposition or withdrawal from the meeting prior to the voting on the proposal in question, from so stating to the Notary Public (or, in the

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

absence thereof, to the Secretary), or assistants thereto, in order for note to be taken thereof for inclusion in the Minutes of the General Shareholders' Meeting, after verification of their identity and the shares that they own or represent by proxy. In any event, votes validly cast from a distance and which have not been revoked shall also be taken into consideration.

Article 34. Adoption of Resolutions and Announcement of Voting Results.

1. The shareholders, whether acting at an ordinary or extraordinary General Shareholders' Meeting, shall adopt resolutions with the majorities required by the Companies Law based on votes represented in person or by proxy. Each voting share, whether represented in person or by proxy, shall grant the holder the right to one vote, without prejudice to the limitations on the maximum number of votes that may be cast by a shareholder and to conflicts of interest provided for in Articles Twenty-Nine and Thirty of the By-Laws.
2. The majority needed to adopt a resolution shall require the favorable vote of onehalf plus one of the voting shares cast in person or by proxy at the General Shareholders' Meeting. The foregoing does not affect situations in which the Law or the By-Laws provide for a greater majority.
3. For purposes of determining the number of shares upon which the majority needed to adopt the various resolutions shall be calculated, all shares appearing on the list of attendees shall be deemed to be in attendance, present and represented at the meeting, less: (i) shares whose owners or representatives have left the meeting prior to the voting on the proposed resolution or resolutions in question and have recorded their withdrawal with the Notary Public or, in the absence thereof, with the Secretary or assistants thereto; and (ii) shares which, by application of the provisions of Articles Twenty-Nine and Thirty of the By-Laws, are deprived of the right to vote in general or for the particular resolution in question.
4. Once the Chairman has evidence of sufficient favorable votes, the Chairman shall declare the resolutions to be adopted, without prejudice to the statements that the attending shareholders (or their representatives) may make to the Notary Public (or, in the absence thereof, to the Secretary) or assistants thereto, regarding the direction of their vote.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Article 35. Closure of the General Shareholders' Meeting

Once the voting on the proposed resolution has been completed and the Chairman has announced the approval thereof, if any, the General Shareholders' Meeting shall end and the Chairman shall bring the meeting to a close, adjourning the session.

Article 36. Minutes of the General Shareholders' Meeting

1. The minutes of the General Shareholders' Meeting may be approved by the shareholders at the end of the meeting, and otherwise within a period of fifteen days by the Chairman and two Inspectors, one on behalf of the majority and the other on behalf of the minority.
2. Once the minutes are approved, they shall be signed by the Secretary to the General Shareholders' Meeting or the particular session thereof, with the approval of the person acting therein as the Chairman. In the event the above-mentioned persons are unable to do so for any reason, they shall be replaced by the persons established by Law or the By-Laws.
3. In the event that a Notary Public takes part in the General Shareholders' Meeting, the notarial minutes shall be deemed the minutes of the General Shareholders' Meeting, and shall not require approval.

Article 37. Publication of Resolutions

Without prejudice to registration with the Commercial Registry of recordable resolutions and applicable legal provisions regarding the publication of corporate resolutions, the Company shall communicate to the National Securities Market Commission the literal text or a summary of the contents of the approved resolutions by means of a timely notice of a significant event. The text of the resolutions shall also be accessible through the website of the Company. In addition, at the request of any shareholder or their representative at the General Shareholders' Meeting, the Secretary shall issue a certification of the resolutions or of the minutes, including the notarial minutes, if any.

TITLE VI. INTERPRETATION

Article 38. Interpretation of the Regulations.

The Chairman of the General Shareholders' Meeting shall have the power to decide any questions or disputes raised during the meeting regarding the application or interpretation of these Regulations, without prejudice to subsequent consideration thereof by the Board of Directors, which shall, if applicable, propose such amendments to the text of these Regulations as it deems appropriate.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

IBERDROLA

RECEIVED

2007 JUN 23 A.M. 03

Bilbao, February 27, 2006

UNION DE EMPRESAS
IBERDROLA S.A.

NATIONAL SECURITIES MARKET COMMISSION

To the attention of Mr. Antonio Mas Sirvent
Director of the Market Area
Pº de la Castellana, 19
28046 Madrid

Dear Sirs:

Please find attached the amended text of the Resolution relating to Item Nine on the Agenda for the General Shareholders' Meeting of this Company, which replaces the text sent on February 23.

The previous text contained a typographical error in the fifth line of the second paragraph, which read "*at the principal [international audit] firms ...*" [*"en las principales firmas ..."*] whereas the correct text is "*among the principal [international audit] firms ...*" [*"entre las principales firmas ..."*].

Sincerely,

IBERDROLA, S.A.

The General Secretary & Secretary of the Board of Directors

Federico San Sebastián

ITEM NINE ON THE AGENDA

Appointment of the Auditor of the Company and its Consolidated Group.

RESOLUTION RELATING TO ITEM NINE

To appoint the company "ERNST & YOUNG, S.L." as the Auditor of the Company and its consolidated Group, which Auditor shall perform the auditing for a period of 3 years, pursuant to Section 8.4 of Law 19/1988, of July 12, on Auditing of Financial Statements, for the annual financial statements for fiscal years 2006, 2007 and 2008, the Board of Directors being granted the power, which it may delegate to the Executive Committee for such purpose, to execute the corresponding contract for the provision of services, subject to such terms and conditions as it deems appropriate, and also being empowered to make any pertinent amendments thereto pursuant to legislation applicable at any time.

This resolution is adopted at the proposal of the Board of Directors, after a favorable report from the Audit and Compliance Committee issued in accordance with the provisions of the Eighteenth Additional Provision of the Securities Market Law and Article 44.2.b) of the By-Laws and after the conduct of an audit competition among the principal international audit firms within the framework of the "Auditor Hiring Policy of the Iberdrola Group" approved by the aforementioned Committee on November 23, 2005.

It is noted for the record that "ERNST & YOUNG, S.L." has its registered address in Madrid, at Plaza Pablo Ruiz Picasso, No. 1, having Tax I.D. No. B-78970506. It is registered with the Commercial Registry of Madrid at Volume 12749, Book 0, Folio 215, Section 8, Page M-23123, Entry 116, and with the Official Registry of Auditors (*Registro Oficial de Auditores de Cuentas*) (ROAC) under number S0530.

PRELIMINARY TITLE

Article 1.- Purpose.

The purpose of these Regulations is to establish the principles that are to govern all action taken by the Board of Directors of IBERDROLA, S.A., the basic rules for the organization and operation thereof, and the rules of behavior to be observed by its members, in order to achieve the greatest degree of transparency, effectiveness and dynamism, supervision and control of its management duties and representation of the Company's interests.

Article 2.- Scope.

1. These Regulations shall apply directly to the Board of Directors, the representative decision-making bodies thereof (whether collective or single-person) and its internal Committees or Commissions, as well as to all members thereof who, in the performance of their duties, decide the direction thereof.
2. The persons to whom these Regulations apply shall have the duty to be apprised of them, to comply with them and to enforce them, for which purpose the Secretary of the Board of Directors of IBERDROLA, S.A. shall provide them with a copy, the delivery of which such persons shall acknowledge by means of a signed receipt.
3. For purposes of these Regulations, the IBERDROLA Group shall be deemed to consist of those companies in which IBERDROLA, S.A. holds, whether directly or indirectly, an interest greater than fifty (50%) percent of the share capital thereof and in which it exercises effective control of the management thereof.

Article 3.- Dissemination.

These Regulations shall be reported to the National Securities Exchange Commission and filed with the Commercial Registry, pursuant to applicable rules and regulations. Furthermore, the current text of these Regulations shall be available on the Company's website.

Article 4.- Priority of Provisions.

1. These Regulations are based upon the recommendations contained in the "Report of the Special Commission for the Study of an Ethical Code for Corporate Boards of Directors" [*"Informe de la Comisión Especial para el Estudio de un Código Ético de los Consejos de Administración de las Sociedades"*] (Olivencia Report), and on the "Report of the Special Commission for the Promotion of Transparency and Safety in Financial Markets and Listed Companies" [*"Informe de la Comisión Especial para el Fomento de la Transparencia y la Seguridad en los Mercados Financiers"*] (Aldama Report).
2. These Regulations further elaborate upon and supplement the legal and by-laws

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

provisions applicable to the Board of Directors of the Company, which provisions shall prevail in the event of conflict with the provisions of these Regulations.

Article 5.- Amendments.

1. The Board of Directors may amend these Regulations upon the proposal of its Chairman, of one-third of the Directors, or of the Audit and Compliance Committee, with the proposal to be accompanied by a description of the reasons for and the scope of the amendment sought. In all cases, the Audit and Compliance Committee shall prepare a report on the proposal for submission thereof to the Board of Directors of IBERDROLA, S.A.
2. Notice of the Board of Directors meeting called to decide upon the above-mentioned proposal shall be given not less than fifteen (15) days in advance of such meeting, and shall be accompanied with the entire text of the proposed amendment, a description of the reasons for the amendment, and the report of the Audit and Compliance Committee.
3. In order to be valid, an amendment to these Regulations must be approved by a two-thirds majority of the Directors present in person or by proxy.
4. The Board of Directors shall give notice to the shareholders of any amendment to these Regulations approved thereby at the next General Shareholders' Meeting. In addition, amendments to these Regulations shall be subject to the dissemination provisions set forth in Article Three above.

TITLE I. STRUCTURE OF THE COMPANY'S MANAGEMENT AND MISSION OF THE BOARD

Article 6.- Structure.

Management of the Company is vested in a Board of Directors, its Chairman, an executive committee called the Executive Committee (*Comisión Ejecutiva Delegada*), and, if any and if agreed to by the Board of Directors, a Chief Executive Officer (*Consejero Delegado*).

Article 7.- Powers of the Board of Directors.

1. The Board of Directors has the power to adopt resolutions regarding all matters not assigned by Law or the By-Laws to the shareholders.
2. As a general rule, the Board of Directors, which has the widest powers and authority to manage, direct, administer and represent the Company, shall entrust the day-to-day management of the Company to its representative decision-making bodies and shall focus its activity on the general duty of supervision and on consideration of those matters which are of particular importance to the Company.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

3. Those powers reserved by law or the By-Laws for direct exercise by the Board of Directors may not be delegated.
4. Without prejudice to the legal powers, if any, of delegation and proxy-granting for the implementation of any particular resolutions adopted, the Board of Directors shall directly exercise the following powers, acting upon its own initiative or at the proposal of the corresponding internal decision-making body,:
 - a) Draw up the annual financial statements, the management report and the proposal for the allocation of profits or losses, as well as the consolidated financial statements and management report, ensuring that such documents provide a true and fair view of the assets and liabilities, the financial condition and the operating income of the Company, pursuant to applicable legal provisions.
 - b) Designate Directors to fill vacancies by interim appointment and propose to the shareholders the appointment, ratification, re-election or removal of Directors.
 - c) Designate and renew internal positions within the Board of Directors and the members of and positions on the Committees.
 - d) Set the compensation of the members of the Board of Directors and the funding of retirement plans, after a report from the Nominating and Compensation Committee and within such limits as are established in the By-Laws.
 - e) Approve the appointment, compensation and removal of senior-level managers of the Company, as well the approval of their retirement plans, at the proposal of the Chief Executive Officer, if there is such a proposal, and with the report from the Nominating and Compensation Committee. For such purposes, senior-level managers shall be such persons as perform their duties by reporting directly to the Board of Directors, the Executive Committee, or the Chief Executive Officer, if any.
 - f) Approve the payment of interim dividends.
 - g) Enter into strategic alliances with domestic or foreign industrial, commercial or financial groups.
 - h) Approve the disposition of substantial assets of the Company and, in general, all industrial, commercial or financial transactions which are particularly significant or risky to IBERDROLA and its single-person subsidiaries.
 - i) Approve mergers, consolidations, split-offs or concentrations materially affecting any of the Affiliated Companies.

- j) Decide upon proposals submitted to it by the Executive Committee, the Chief Executive Officer or the Committees of the Board of Directors.
 - k) Declare its position regarding the submission of all tender offers for the Company's securities.
 - l) Approve the policy to be followed by the Company in connection with treasury stock.
 - m) Approve and amend the Regulations of the Board of Directors governing its internal organization and operation.
 - n) Prepare the annual corporate governance report, as well as the environmental, social and sustainable development reports.
 - o) Call the General Shareholders' Meeting.
 - p) Carry out resolutions approved by the shareholders at the General Shareholders' Meeting with respect to which the power of delegation has not been granted, and perform any duties that the shareholders have assigned to the Board of Directors.
 - q) Make decisions regarding any other matter within its authority which, in the judgment of the Board of Directors, is deemed to be in the interests to the Company.
5. The Board of Directors, within the scope of its authority relating to the general duty of supervision, acting on its own initiative or at the proposal of the appropriate internal decision-making body, shall also deal with the matters set forth below (as an example only):
- a) Prepare the Company's strategy and general lines of policy, draft programs and state objectives in order to carry out all business activities included in the corporate purpose.
 - b) Encourage and supervise the management of the Company, as well as the fulfillment of established objectives.
 - c) Identify the principal risks to the Company and organize appropriate internal monitoring and information systems.
 - d) Set the foundations of the corporate organization in order to ensure the greatest efficiency thereof and effective supervision by the Board of Directors.
 - e) Set policy regarding the provision of information to shareholders and to the markets in general under the standards of transparency and truthfulness of the information.

Article 8.- Corporate Interest.

1. The Board of Directors shall perform its duties in furtherance of the corporate interest, which shall be understood to mean the common interest of all the shareholders and which shall not prevent consideration of other lawful public or private interests that converge in the development of any business activity, particularly those of the employees. In this context, regard shall be paid to the optimization of the value of the Company as an interest common to all the shareholders, and therefore, as a standard that is to at all times govern the action taken by the Board of Directors and its representative decision-making bodies.
2. By way of application of the above-mentioned standard, the Board shall formulate and review the business and financial strategies of the Company, and shall establish a reasonable balance between the proposals selected and the risks assumed.
3. In the area of corporate organization, the Board shall take such measures as are required to ensure:
 - a) That both the Executive Committee and the Chief Executive Officer pursue the creation of value for the shareholders and have appropriate means to do so.
 - b) That both the Executive Committee and the Chief Executive Officer remain under the effective supervision of the Board.
 - c) That no person or small group of persons enjoys decision-making power which is not subject to checks and balances.
 - d) That the strategies for the coordination of relations between the Company and the affiliated companies which are members of the consolidated Group are established and reviewed on an ongoing basis in order to obtain the greatest possible advantage for the benefit of both the Company and its affiliated companies.

TITLE II. COMPOSITION OF THE BOARD

Article 9.- Number of Directors.

1. The Board of Directors shall be composed of a minimum of nine (9) member Directors and a maximum of twenty-one (21), who shall be appointed at the General Shareholders' Meeting, subject to applicable legal and by-law provisions.
2. The Board of Directors shall submit a proposal at the General Shareholders' Meeting setting forth the number of Directors that, in view of the circumstances affecting the Company and taking into account the maximum and minimum numbers established in the paragraph above, is deemed most appropriate to ensure a

In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

proper degree of representation and the effective operation of the Board.

Article 10.- Types of Directors.

1. The following shall be deemed:
 - a) Executive Directors: those Directors who perform executive or management duties within the Company or within one of the companies included within the IBERDROLA Group, and those with any title who are professionally and permanently connected to the Company performing duties in the day-to-day management thereof.
 - b) External Proprietary Directors (representing a major shareholder): those non-executive Directors who own, or represent owners, of relevant stable interests in the share capital of the Company.
 - c) External Independent Directors: those non-executive Directors not representing a major shareholder who are appointed based on their personal and professional prestige and their experience and knowledge for the performance of their duties. Such Directors shall have no substantial direct or indirect connection to the Company, as provided in the paragraph immediately below within this Article.
 - d) Other External Directors: those external Directors who do not have status as proprietary or independent directors.
2. The following persons may not be appointed as independent Directors if such persons are, or have been during the last two (2) years:
 - a) Managers of the Company or of any of the companies that are members of the IBERDROLA Group.
 - b) Directors of any of the companies that are members of the IBERDROLA Group, except if they have acted as independent directors thereof.
 - c) Recipients of any kind of remuneration or compensation payable by the Company or by any of the companies that are members of the IBERDROLA Group other than such as they may be entitled to collect for serving office as Directors.
 - d) Significant shareholders or managers of companies to which the Company or any of the companies that are members of the IBERDROLA Group has paid, or from which the Company or any of the companies that are members of the IBERDROLA Group has received, substantial payments.
3. The Board of Directors shall be composed such that the external or non-executive Directors, with the presence of the independent Directors, represent a majority over

In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

the executive Directors. This is a mandatory instruction for the Board of Directors itself, which must follow it in the exercise of its powers to propose appointments of Directors to the shareholders and to make interim appointments of Directors to cover vacancies, and merely constitutes guidance for the shareholders.

TITLE III. APPOINTMENT AND WITHDRAWAL OF DIRECTORS

Article 11.- Appointment of Directors.

1. The Directors shall be appointed by the shareholders acting at the General Shareholders' Meeting pursuant to the provision of the Companies Law and the By-Laws.
2. The proposals for appointment of Directors that the Board of Directors submits to a decision by the shareholders acting at a General Shareholders' Meeting, and the decisions made by the Board in the exercise of the legally-assigned power to make interim appointments to fill vacancies, shall be preceded by the corresponding report of the Nominating and Compensation Committee, which must assign the new Director to one of the categories contemplated in these Regulations.
3. When the Board deviates from the recommendations of the Nominating and Compensation Committee, it shall give reasons for so acting and shall record such reasons in the minutes.

Article 12.- Incompatibilities.

The following may not be appointed as Directors:

- a) Domestic or foreign companies competing with the Company in the energy industry, or the directors or senior managers thereof.
- b) Persons holding the position of director in more than four (4) companies with shares trading on domestic or foreign securities exchanges.
- c) Persons who, during the two (2) years prior to their appointment, have occupied high-level positions in the government which are incompatible with the simultaneous performance of the duties of a director of a listed company under national or autonomous community legislation, or positions of responsibility with entities regulating the energy industry, the securities markets or other industries in which the Company operates.
- d) Persons who are under any other circumstance of incompatibility or prohibition governed by provisions of a general nature.

Article 13.- Designation of Directors.

The Board of Directors (and the Nominating and Compensation Committee within its area of authority) shall endeavor to ensure that the candidates proposed to the shareholders at the General Shareholders' Meeting for their appointment as directors, and the directors directly appointed by the Board to fill vacancies in the exercise of its power to make interim appointments, shall be persons widely recognized for their expertise, competence and experience, and shall be particularly rigorous in connection with the selection of those persons who are to hold office as independent Directors.

Article 14.- Term of Office.

1. The Directors shall serve in their positions for a term of five (5) years, so long as the shareholders acting at a General Shareholders' Meeting do not resolve to remove or dismiss them and they do not resign from their position.
2. Directors may be re-elected to one or more terms of five (5) years.
3. Vacancies which occur may legally be filled by the Board of Directors on an interim basis until the next General Shareholders' Meeting, which shall confirm the appointments or elect the persons who should replace Directors which are not ratified, or it shall withdraw the vacant positions.

Article 15. Guarantees.

Each Director must show the recordation of a lien upon ten thousand (10,000) shares of the Company as a guarantee for any liabilities which may be incurred in the performance of the Director's duties. Such shares may not be transferred after vacation of office by the Director for so long as the shareholders have not approved the corporate transactions corresponding to the fiscal year or years in which such Director held that position.

Article 16.- Re-election of Directors.

1. The proposals for re-election of Directors that the Board of Directors resolves to submit to the decision of the shareholders at the General Shareholders' Meeting shall be subject to a formal process of elaboration, which shall include a report issued by the Nominating and Compensation Committee containing an analysis of the quality of the work performed and the dedication to the position shown by the proposed Directors during the preceding term of office.
2. The members of the Nominating and Compensation Committee shall be evaluated by the Committee itself for such purpose, and each of them shall abstain from participating in the debate and voting that may affect them.
3. The Chairman, Vice Chairmen and, if applicable, the Secretary and Assistant Secretary of the Board of Directors who are re-elected as members of the Board by

the shareholders acting at a General Shareholders' Meeting shall continue to perform the duties they previously held within the Board, without the need for a new election and without prejudice to the Board of Director's power of revocation with respect to such positions.

Article 17.- Resignation and Withdrawal of Directors.

1. The Directors shall cease to hold office upon the expiration of the term of office for which they have been appointed and when it is so resolved by the shareholders at a General Shareholders' Meeting in the exercise of the powers granted to them by law or the By-Laws.
2. The Directors shall tender their resignation to the Board of Directors and formally resign from their position in the following cases:
 - a) When they reach the age of seventy (70). The Director shall cease to act as such and shall vacate office at the first meeting of the Board of Directors that is held following the General Shareholders' Meeting at which the shareholders approve the Financial Statements for the Fiscal Year during which the Director reaches the above-mentioned age.

The content of this sub-section shall be communicated to all individuals or legal entities who are designated as members of the Board of Directors, and the express and formal acceptance thereof by any person who is to be proposed as a member of the Board or to fill any position thereon shall be a condition precedent for the Board itself to propose the appointment of such person. In the event that legal entities are to be designated, the terms of this sub-section shall be deemed accepted by the individuals that are designated as their representatives.

- b) When they are involved in any circumstance of incompatibility or prohibition governed by provisions of a general nature or set forth in Article Twelve of these Regulations of the Board of Directors.
- c) When, as a result of any acts attributable to the Director in his capacity as such, serious damage is caused to the value of the Company or the Director ceases to deserve the commercial and professional respect required to hold the position of Director of the Company.
- d) When they are seriously reprimanded by the Board of Directors because they have breached their duties as Directors and such reprimand is approved by a two-thirds majority of the members of the Board at the proposal of the Audit and Compliance Committee.
- e) When their continuance in office on the Board may jeopardize the interests of the Company or when the reasons why the Director was appointed cease to

exist and, in any case, when a Proprietary Director (representing a major shareholder) transfers his shareholding in the Company and when an independent Director is affected, at any time following his appointment as such, by any of the prohibitions to hold office provided for in section two of Article Ten of these Regulations.

3. In the event that an individual representing a legal entity acting as Director falls under any of the circumstances set forth in paragraph two above, such individual shall be disqualified from acting as a representative thereof.

Article 18.- Debate and Voting.

The Directors affected by proposals for appointment or re-election to or dismissal from office shall abstain from participating in the debate and voting on such matters.

TITLE IV. THE BOARD OF DIRECTORS: INTERNAL POSITIONS AND COMMITTEES

Section 1. Internal Positions on the Board of Directors

Article 19.- Chairman of the Board of Directors.

1. The Chairman of the Board of Directors shall be appointed from among its members and shall be considered the President of the Company and of all of the management decision-making bodies thereof of which the Chairman is a member, which he shall permanently represent with the broadest powers, having a duty to carry out its resolutions and the power, in urgent cases, to adopt such measures as the Chairman deems advisable in the interests of the Company.
2. The Chairman, who holds the senior management of the Company and is the representative thereof, has the following powers in addition to the powers conferred by Law and by the By-Laws:
 - a) To call and preside over meetings of the Board of Directors and the Executive Committee, setting the agenda for the meetings and directing discussion and debate.
 - b) To preside over the General Shareholders' Meeting and direct the discussion and debate therein.
 - c) To bring to the Board those proposals which the Chairman deems appropriate for the efficient running of the Company, particularly those corresponding to the operation of the Board itself and other corporate decision-making bodies, as well as to propose the persons who shall hold office as Vice Chairman, Chief

Executive Officer, Secretary and, if applicable, Assistant Secretary of the Board.

- d) To represent the Company before public entities and any industry or employer' bodies.
3. The Board of Directors may appoint one or more Honorary Chairmen of the Company.

Article 20.- Vice Chairman or Vice Chairmen.

1. The Board may elect from among the Directors one or more Vice Chairmen, who shall replace the Chairman in the event of absence, sickness or disability.
2. If there is more than one Vice Chairman, the person replacing the Chairman shall be the Vice Chairman who also holds the position of Chief Executive Officer; if none, the Vice Chairman having the longest length of service and, if equal lengths of service, the oldest; and if there is no Vice Chairman, the longest-serving Director and, in case of equal lengths of service, the oldest.

Article 21.- Chief Executive Officer.

1. The Board of Directors may, acting upon a proposal of the Chairman and following a report from the Nominating and Compensation Committee, and with the favorable vote of two-thirds of its members, appoint a Chief Executive Officer from among its members, with the powers it deems appropriate and which may be delegated pursuant to legal provisions and the provisions of the By-Laws, with due regard being paid to the standard set forth in paragraph two of Article Seven hereof.
2. The Chief Executive Officer may propose to the Board of Directors, for its approval after a report from the Nominating and Compensation Committee, the definition and reorganization of the Company's management structure and the appointment of senior-level managers, with the duties and powers that they determine.
3. The position of Chief Executive Officer entails the power to represent the Company in court and out of court, acting individually.
4. In the event of a vacancy in the office or sickness or disability of the Chief Executive Officer, the duties and responsibilities thereof shall be temporarily assumed by the Chairman, who shall immediately call the Board to hold a meeting in order to deliberate and resolve upon the appointment, if appropriate, of a new Chief Executive Officer.
5. The Chief Executive Officer shall cease to hold office as such upon reaching the age of sixty-five (65), without prejudice to his continuance in office as Director.

Article 22.- Secretary and Assistant Secretary of the Board.

1. At the proposal of the Chairman, the Board of Directors shall appoint a Secretary and, if appropriate, an Assistant Secretary, who need not be Directors. In addition, the Secretary or the Assistant Secretary, as determined by the Board, shall perform the duties of Corporate Counsel if either of them is an attorney and if such position is required.
2. If there is an Assistant Secretary, such person shall, in the absence of the Secretary, attend the meetings of the administrative decision-making bodies. In the absence of the Secretary and the Assistant Secretary, the Director appointed by the Board from among those attending the meeting in question shall act as such.
3. The Secretary of the Board of Directors shall have the following duties in addition to those assigned thereto by Law and the By-Laws:
 - a) Keep custody of the corporate documents, duly record the proceedings of meetings in the minute books, and attest to the resolutions adopted by the collective management decision-making bodies.
 - b) Ensure the formal and substantive legality of all action taken by the Board of Directors and compliance with regulations and by-law provisions, and ensure observance of the principles or standards of corporate governance of the Company and the provisions of these Regulations of the Board of Directors.
 - c) Verify compliance with orders of regulatory entities, and that the recommendations thereof, if any, are taken into consideration.
 - d) Generally act as a channel in relations between the Company and the Directors in connection with all matters relating to the operation of the Board of Directors, in compliance with the Chairman's instructions.
 - e) Process all requests from the Directors regarding the information and documentation of those matters that fall within the purview of the Board of Directors.
 - f) Act as Secretary of the Executive Committee.
 - g) Act as Secretary to the General Shareholders' Meetings.
4. The Secretary may also serve as General Secretary, if so resolved by the Board of Directors, in which latter capacity the Secretary shall be accountable to the Chief Executive Officer and shall contribute to the integration, coordination and consolidation between the Company and its affiliated companies.

Section 2. Committees of the Board of Directors

Article 23. Committees of the Board of Directors.

1. The Board of Directors shall create and maintain, on a permanent basis, an Executive Committee, an Audit and Compliance Committee, and a Nominating and Compensation Committee. These Committees shall be composed in such manner and shall have such duties as are described below.
2. The Board of Directors may also create other Committees or Commissions of purely internal scope, with such powers as determined by the Board of Directors. The Chairman, the remaining members, and the Secretary of such Committees and Commissions shall be appointed by a simple majority of the members of the Board of Directors.
3. The Chairman of each Committee shall inform the Board of Directors of the activities performed and the resolutions adopted by it, and the Board may make any and all suggestions or recommendations that it deems advisable.
4. The Committees shall be governed by their own specific rules and regulations approved by the Board of Directors, supplemented by the operating rules set forth in these Regulations as applicable to the Board of Directors, insofar as they are compatible with the nature and duties of each Committee.

Article 24.- Executive Committee.

1. There shall be an executive committee permanently operating as the representative of the Board of Directors, which committee shall be called the Executive Committee, and which shall have all of the powers inherent to the Board of Directors, unless otherwise determined by the Board of Directors and except for those powers that may not be delegated pursuant to legal or by-law restrictions. The Executive Committee shall be composed of the Directors designated by favorable vote of two-thirds of the members of the Board, and renewals shall occur at the times, in the manner and in the number determined by the Board of Directors, which shall also establish rules for the operation thereof.
2. The Executive Committee shall be composed of the number of members decided by the Board, with a minimum of five (5) Directors and a maximum of eight (8). In all cases, members of the Executive Committee shall include the Chairman of the Board of Directors, who shall preside over meetings of the Executive Committee, the Vice Chairman or Vice Chairmen, and the Chief Executive Officer, if any. The Secretary of the Board of Directors and, in the absence thereof, the Assistant Secretary of the Board of Directors, and in the absence of both, the member of the Committee appointed from among its members at the meeting in question, shall act as Secretary of the Committee.

3. The members of the Executive Committee shall continue to hold office for so long as they remain members of the Board of Directors, and their renewal as members of such Executive Committee shall occur at the same time as their re-election as Directors.
4. The Executive Committee shall meet at least two (2) times per month and as many other times as deemed appropriate by the Chairman, who may also suspend one or more of the ordinary meetings when deemed appropriate in the sole judgment of the Chairman. In addition, it shall meet when so requested by two of its members. The Executive Committee shall deal with all matters within the power of the Board which, in the sole judgment of the Committee, should be resolved without further delay, excepting only the preparation of the financial statements, the presentation of the balance sheets at the General Shareholders' Meeting and those powers which are given by the shareholders to the Board without the power of delegation.
5. The Executive Committee shall inform the Board, at the next meeting thereof, of the matters dealt with and the resolutions adopted by it during its sessions.
6. The provisions of these Regulations regarding the operation of the Board of Directors shall apply to the Executive Committee, to the extent that they are not incompatible with the nature thereof.

Article 25. Audit and Compliance Committee.

1. The Board of Directors shall create a permanent Audit and Compliance Committee, which shall be composed of a minimum of three (3) Directors and a maximum of five (5) Directors appointed by the Board of Directors from among the external Directors who are not members of the Executive Committee. The Audit and Compliance Committee shall have a Chairman and a Secretary appointed by the Board of Directors from among the members of such Committee.
2. The members of the Audit and Compliance Committee shall carry out their duties for a maximum of four (4) years, and may be re-elected. The position of Chairman shall be held for a maximum period of (4) years, after which period such person may not be re-elected until the passage of one year from ceasing to act as such, without prejudice to such person continuing or being re-elected as a member of the Committee.
3. In all events, the Audit and Compliance Committee shall have the power to:
 - a) Report to the General Shareholders' Meeting with respect to matters raised therein by shareholders regarding its powers.
 - b) Propose appointments of the Company's Auditors to the Board of Directors for submission to the General Shareholders' Meeting.

- c) Supervise the management of the Internal Audit Area, which will be functionally controlled by the Chairman of the Audit and Compliance Committee.
 - d) Know the process for gathering financial information and associated systems for monitoring risks relevant to the Company.
 - e) Receive information from the Auditors regarding matters that might risk the independence thereof which are related to the auditing procedure and generally regarding any other information provided for in legislation regarding the auditing of financial statements and in the technical auditing regulations in effect at any time.
 - f) Inform itself in advance of the Company's annual corporate governance report and ensure compliance with legal requirements and those of the Codes of Professional Conduct and Good Governance adopted by the Board of Directors.
 - g) Inform the Board of Directors in advance regarding all matters within its area of authority provided for in Title VIII of these Regulations.
4. For purposes of the operation of the Committee, it shall meet as many times as its Chairman deems necessary for the fulfillment of its obligations, and at least four (4) times per year, or when requested by one-half of its members. Meetings of the Committee shall be validly held when one-half plus one of its members are present in person or by proxy, and shall adopt resolutions by majority of the members present in person or by proxy. In the event of a tie, the Chairman shall have the tie-breaking vote.
 5. The Audit and Compliance Committee shall submit for approval of the Board of Directors a Report of its activities during the fiscal year, which shall thereafter be made available to shareholders and investors.
 6. The foregoing rules shall be developed by the Board of Directors into corresponding Regulations of the Audit and Compliance Committee, always favoring independence in the operation of the Committee. For information purposes, the current Regulations of the Audit and Compliance Committee are attached to these Regulations of the Board of Directors as Annex 1.

Article 26. Nominating and Compensation Committee.

1. The Board of Directors shall create a permanent Nominating and Compensation Committee, which shall be an internal informational and consulting body without executive powers, and which shall have the information, advisory and proposal-making powers within its scope of action as set forth in paragraph four of this Article.

2. The Nominating and Compensation Committee shall be composed of a minimum of three (3) Directors and a maximum of five (5), appointed by the Board of Directors from among the external Directors. The Board of Directors shall also appoint the Chairman thereof from among the members of such Committee, as well as its Secretary, who need not be a member of the Committee.
3. Unless otherwise decided by the Board of Directors, the members of the Nominating and Compensation Committee shall hold their positions for so long as they remain Directors of the Company. Renewal and re-election to and dismissal from office by the members of the Committee shall be governed by resolution of the Board of Directors.
4. The Nominating and Compensation Committee shall have the power to supervise the procedure for selecting Directors and senior-level managers (the latter at the proposal of the Chief Executive Officer, if any) of the Company, members of its group and those other companies in which the Company is responsible for management, as well as to assist the Board of Directors in the determination and supervision of the compensation policy for such persons. In particular, the Nominating and Compensation Committee shall have the power to:
 - a) Report on and review the criteria that should be followed in composing the Board of Directors and in selecting candidates.
 - b) Bring Director designation proposals to the Board of Directors for the appointment thereof and subsequent submission to a decision by the shareholders at the General Shareholders' Meeting.
 - c) Propose to the Board of Directors the members who should make up each of the Committees.
 - d) Propose to the Board of Directors the system and amount of annual Director compensation.
 - e) Provide information to the Board of Directors regarding the appointment of senior-level managers of the Company, at the proposal of the Chief Executive Officer, if any.
 - f) Provide information to the Board of Directors regarding the compensation of the Chairman, Chief Executive Officer and senior-level managers, the latter at the proposal of the Chief Executive Officer, if any.
 - g) Provide information regarding incentive and pension supplement plans.
 - h) Periodically review the compensation programs, evaluating the adequacy and results thereof.

5. For purposes of the operation of the Committee, it shall meet as many times as needed, in the opinion of its Chairman, to fulfill its obligations, and at a minimum once each quarter or when so requested by one-half of its members. The Committee shall validly meet when one-half plus one of its members are present in person or by proxy, and shall adopt its resolutions by majority of the members present in person or by proxy. In the case of a tie, the Chairman shall have the tie-breaking vote.
6. The foregoing rules shall be developed by the Board of Directors into corresponding Regulations of the Committee. For information purposes, the current Regulations of the Nominating and Compensation Committee are attached to these Regulations of the Board of Directors as Annex 2.

TITLE V. OPERATION OF THE BOARD

Article 27.- Meetings of the Board of Directors.

1. The Board of Directors shall meet with the frequency it deems appropriate, but at least once a month unless the Chairman, in his sole judgment, deems it appropriate to suspend such sessions. The Board of Directors shall evaluate, on an annual basis, its operation and the quality of its work.
2. Prior to the commencement of each fiscal year, the Board of Directors shall set a schedule for its ordinary meetings. Such schedule may be modified by a resolution adopted by the Board of Directors or upon a decision made by the Chairman, who shall report the modification to the Directors not less than five (5) days in advance of the date originally set for the meeting or of the new date set in lieu thereof, if the latter date occurs earlier.
3. The Board of Directors shall also meet when the Chairman resolves to call an extraordinary meeting thereof, or when such extraordinary meeting is requested by one-fourth of the Directors.
4. The call to meeting of the Board of Directors shall be carried out by letter, fax, telegram, e-mail or any other means, and shall be authorized under the signature of the Chairman, or under the signature of the Secretary or Assistant Secretary by order of the Chairman. Notice of the call shall be given in a manner such that the Directors receive it not later than the third day prior to the date of the meeting, except in the case of emergency meetings. Excepted from the foregoing provision shall be those instances in which these Regulations prescribe that greater notice be given. The call shall always include the agenda for the meeting and an attachment containing any required information.
5. The Chairman shall decide on the agenda for the meeting. The Directors may submit a request to the Chairman for the inclusion of matters in the agenda, and the

Chairman shall be required to include them when such request has been made by at least three (3) Directors not less than ten (10) days in advance of the date set for the meeting.

6. Without prejudice to the foregoing, the Board of Directors shall be deemed to have validly met without the need for a call if all of its members are present and unanimously agree to hold the meeting and to the items of the agenda to be dealt with.

Article 28.- Place of Meetings.

1. Meetings shall be held at the registered office of the Company, or at such other place as is designated in the call to the meeting, either in Spain or abroad.
2. Meetings of the Board of Directors may also be held in several places connected by a conference system which permits the recognition and identification of the attendees, permanent communication among the attendees regardless of their location, and participation in discussion and the casting of votes. Attendees at any of such places shall be deemed to have attended the same meeting for all purposes relating to the Board of Directors. The meeting shall be deemed to have been held where the majority of the Directors are located and, if they are located in different places in equal numbers, where the Director chairing the meeting is located.

Article 29.- Conduct of the Meetings.

1. In order for resolutions within the authority of the Board of Directors to be valid, at least one-half plus one of the Directors must be present in person or by proxy at the meetings at which they are adopted, except in the case set forth in the last paragraph of this Article.
2. The Directors shall use their best efforts to attend the meetings of the Board and, when unable to attend in person, they shall attempt to give a proxy to another Director, to whom they shall give any appropriate instructions. The proxy granted shall be a special proxy for the Board meeting in question, and may be communicated by any of the means set forth in paragraph four of Article Twenty-Seven above in connection with notice of the call to meetings.
3. The Chairman shall organize the debate, stimulating the participation of all of the Directors in the deliberations of the Board.
4. Resolutions shall be adopted by a majority of votes cast in person or by proxy, except in the following cases:
 - a) Permanent delegation of powers and the appointment of Directors to exercise such powers, which shall require the favorable vote of two-thirds of the members of the Board.

- b) Amendments to the Regulations of the Board of Directors, which shall require the favorable vote of two-thirds of the Directors present at the meeting in person or by proxy.

TITLE VI. DIRECTOR COMPENSATION

Article 30.- Director Compensation.

1. A Director shall be entitled to the compensation provided for in the By-Laws.
2. Within the limits established in Article Fifty of the By-Laws, the Board of Directors shall ensure that the compensation payable to the Directors is commensurate with the compensation paid at similarly-sized companies carrying on similar business in the market and with the same dedication to the Company.
3. In addition, the Board of Directors shall ensure that the amount of the compensation of independent Directors is such that it provides incentives to their dedication while not risking their independence.

TITLE VII. INFORMATION TO DIRECTORS

Article 31.- Powers of Information and Inspection.

1. A Director shall have the broadest powers to obtain information regarding any aspect of the Company, to examine its books, records, documents and other records of corporate transactions, to inspect its facilities, and to communicate with the senior-level managers of the Company.
2. The exercise of the powers of information shall first be channeled through the Chairman, the Chief Executive Officer or the Secretary of the Board of Directors.

Article 32.- Assistance of Experts.

1. In order to be assisted in the performance of his duties, any Director may request the hiring of legal, accounting, technical, financial, commercial or other expert advisors, whose services shall be paid for by the Company.

The assignment must deal with specific issues of certain significance and complexity arising during the performance of the Director's duties.

2. The request for an expert to be hired shall be channeled through the Chairman or the Secretary of the Board of Directors, who may subject it to the prior approval of the Board of Directors; such approval may be denied in well-founded instances, including the following circumstances:

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

- a) That it is not necessary for the proper performance of the duties entrusted to the Directors.
- b) That the cost thereof is not reasonable in light of the significance of the issues and the assets and income of the Company.
- c) That the technical assistance sought may be adequately provided by the Company's own experts and technical personnel.
- d) That it may entail a risk to the confidentiality of the information that must be made available to the expert.

TITLE VIII. DUTIES OF DIRECTORS

Article 33.- General Duties of Directors.

1. In the performance of his duties, a Director shall act in good faith and with the diligence of a prudent businessman and a faithful representative, and shall comply with the duties prescribed by Law, the By-Laws and these Regulations, acting in furtherance of the corporate interest.
2. Without prejudice to such other duties as may be set forth in these Regulations, a Director is specifically required to:
 - a) Properly prepare the meetings of the Board and, if applicable, the meetings of the Executive Committee or of the Committees of which the Director is a member, for which purposes the Director must diligently inform himself of the running of the Company.
 - b) Attend the meetings of the Decision-Making Bodies and Committees of which the Director is a member and actively participate in the deliberations in order that the Director's opinion may be an effective contribution to decision-making. In the event that, due to well-founded reasons, the Director is unable to attend a meeting of which notice has been given, the Director shall give instructions to the Director who is to represent him.
 - c) Fulfill any specific obligation which is entrusted to the Director by the Board of Directors or by the Chairman of the Board or the Chief Executive Officer and which reasonably falls within the Director's scope of dedication.
 - d) Inquire into and give notice to the Board of any irregularities in the management of the Company of which the Director may have had notice, and monitor any situation of risk.

- e) Propose a call to an extraordinary meeting of the Board or the inclusion of new matters in the agenda of the next meeting to be held, in order that deliberations may be conducted on such issues as the Director deems advisable.
- f) Oppose resolutions which are contrary to Law, the By-Laws or the Company's interest, request that such opposition be recorded in the minutes, and seek the invalidation of such resolutions.

Article 34.- Director's Duty of Confidentiality.

- 1. The Director shall keep confidential the deliberations of the Board of Directors, of the Executive Committee or of the Committees of which the Director might be a member and, in general, not disclose any information, data, reports or background information which the Director may have had access to while in office, and not use any of the foregoing for the Director's own benefit or for the benefit of third parties, without prejudice to the duties of transparency and information imposed by applicable law.
- 2. The Director's duty of confidentiality shall survive even after the Director no longer holds such position.

Article 35.- Duty Not to Compete.

- 1. A Director may not be a director or officer of, or provide services to, another company whose corporate purpose is totally or partially analogous to the corporate purpose of the Company or which is a competitor of the Company. Excepted from the foregoing restriction are the duties that may be performed and the offices that may be held (i) in companies belonging to the IBERDROLA Group, (ii) in companies in which the Director acts as a representative of the interests of the IBERDROLA Group, (iii) in companies in which any of the companies belonging to the IBERDROLA Group has an interest and in which the Director does not act as a representative of the interests of the IBERDROLA Group, unless the Board of Directors, following a report from the Audit and Compliance Committee, believes that the Company's interests are jeopardized; and (iv) in those other instances in which the Board of Directors, following a report from the Audit and Compliance Committee, relieves the Director from observing such restriction based on the belief that the interests of the Company are not at risk.
- 2. A Director who ends his term of office or who, for any other reason, ceases to act as such, may not be a director or officer of, or provide services to, any entity whose corporate purpose is totally or partially analogous to that of the Company or which is a competitor of the Company, for a term of two (2) years. The Board of Directors, may, if it deems it appropriate, relieve the outgoing Director from this restriction or reduce it to a lesser period.

Article 36.- Conflicts of Interest.

1. A conflict of interest shall be deemed to exist in those cases in which there is a conflict, whether direct or indirect, between the interest of the Company and the personal interest of the Director. A personal interest of the Director shall be deemed to exist when a matter affects the Director or a Related Person.

For purposes of these Regulations, the following shall be deemed Related Persons:

- a) The Director's spouse or other persons related to the Director by a like relationship of affection.
- b) The ascendants, descendants or siblings of the Director or of the Director's spouse (or another person related to the Director by a like relationship of affection).
- c) The spouses of the Director's ascendants, descendants and siblings.
- d) The companies in which the Director, acting personally or through a third party, falls within any of the cases provided for in Section 4 of Law 24/1988 of July 28 on the Securities Market.

In the case of a legal entity acting as Director, the following shall be deemed to be Related Persons:

- a) The shareholders who, in respect of the legal entity acting as Director, fall within any of the cases provided for in Section 4 of Law 24/1988 of July 28 on the Securities Market.
- b) The companies that form part of the same group, as such is defined in Section 4 of Law 24/1988 of July 28 on the Securities Market, and the shareholders thereof.
- c) The individual acting as a representative, the directors (in fact or in law), and the liquidators of, and the representatives holding general powers of attorney granted by, the legal entity acting as Director.
- d) Those persons who, in respect of the representative of the legal entity acting as Director, are deemed related persons pursuant to the provisions of the preceding paragraph applicable to individuals acting as Directors.

2. Conflicts of interest shall be governed by the following rules:

- a) Communication: the Director must give notice to the Board of Directors, in the person of the Chairman or the Secretary, of any conflict of interest in which the Director is involved.

- b) Abstention: the Director shall not attend or participate in the deliberation and voting on those matters in which the Director is affected by a conflict of interest. Proprietary Directors (representing a major shareholder) shall abstain from voting on those matters that may entail a conflict of interest between the shareholders who have proposed their appointment and the Company.
- c) Transparency: in the Corporate Governance Report, the Company shall report any cases of conflict of interest involving the Directors and of which the Company is aware by reason of notice given thereto by the Director affected by such conflict or by any other means.

Article 37.- Use of Corporate Assets.

- 1. A Director may not use the Company's assets or profit from the Director's position in the Company in order to obtain any financial benefit, unless adequate consideration has been paid.
- 2. On an exceptional basis, the Director may be relieved from the obligation to provide such consideration, but in any such case, the financial benefit shall be deemed indirect compensation and shall be approved by the Board following a report from the Audit and Compliance Committee.

Article 38.- Non-Public Information.

- 1. The Director may use non-public information of the Company for private purposes only if the following conditions are satisfied:
 - a) That such information is not applied in connection with transactions for the purchase or sale of securities or financial instruments of the issuer to which the information directly or indirectly refers.
 - b) That it does not place the Director in a position of advantage vis-à-vis other suppliers and clients.
 - c) That the use thereof does not cause any harm to the Company.
 - d) That the Company does not own proprietary rights in, or is not in a similar legal position with respect to, the information that the Director wishes to use.
- 2. Additionally, the Director shall observe the rules of behavior established in the legal provisions governing the securities and, in particular, those contained in the Company's "Internal Regulations for Conduct in the Securities Markets" ("*Reglamento Interno de Conducta en los Mercados de Valores*").

Article 39.- Business Opportunities.

1. A Director may not take a business opportunity of the Company, either for the Director's own benefit or for the benefit of Related Persons, unless the investment or transaction has previously been offered to the Company, the Company has chosen not to take advantage of it without any pressure from the Director, and the Director has been authorized by the Board to profit from the transaction, following a report from the Audit and Compliance Committee.
2. For purposes of the preceding paragraph, a business opportunity shall be deemed to be any possibility of making an investment or a business transaction that has arisen or has been discovered in connection with the Director's performance of duties as such, or through the use of means and information belonging to the Company, or in circumstances such that it is reasonable to believe that the third party's offer was in fact addressed to the Company.
3. Likewise, the Director shall not use the Company's name and shall not invoke the Director's position as director of the Company in order to carry out transactions for the Director's own account or for the account of Related Persons.

Article 40.- Transactions by the Company with Directors and Significant Shareholders.

1. Any transaction by the Company with Directors and significant shareholders shall be subject to the approval of the Board of Directors, which may make it conditional upon a prior report from the Audit and Compliance Committee.
2. The Board of Directors (and the Audit and Compliance Committee, when a prior report is requested from it) shall evaluate the transaction in light of market conditions, and shall also examine transactions with significant shareholders in light of the principle of equal treatment of shareholders.
3. In the case of customary or recurring transactions in the ordinary course of business, it shall be sufficient to give a generic approval of the kind of transaction and of the conditions for performance thereof.
4. The Company shall report its transactions with Directors, Significant Shareholders and Related Persons in the periodical financial information to be provided on a semi-annual basis, to the extent provided for by Law. Likewise, the Company shall include in the report accompanying the annual financial statements information regarding the transactions by the Company or by the companies that form part of the IBERDROLA Group with the Directors and those persons who act for the account of the latter when such transactions are conducted other than in the ordinary course of the Company's business or other than under normal market conditions.

Article 41.- Director's Duty of Information.

1. A Director shall disclose to the Company any interest that the Director may hold in the capital of any company pursuing a business that is the same as or similar or complementary to the business which the corporate purpose consists of, as well as any offices held or duties performed therein and the conduct, for the Director's own account or for the account of another, of any kind of business that is complementary to the business that the corporate purpose of the Company consists of. Such information shall be included in the Annual Report.
2. A Director shall also disclose to the Company:
 - a) All positions the Director holds in and services the Director provides to other companies or entities. In particular, before accepting office as Director or officer in another company or entity, the Director shall give notice thereof to the Audit and Compliance Committee.
 - b) Any substantial change in the Director's professional status that may affect the condition or capacity by virtue of which the Director may have been appointed as Director.
 - c) Any judicial, administrative or other proceedings instituted against the Director which, because of their significance or characteristics, may seriously reflect upon the reputation of the Company.
 - d) In general, any fact or event that may be relevant to the holding of office as a Director of the Company.

Article 42.- Extension of Director's Duties.

The duties prescribed in this Title of these Regulations in connection with the relations between the Directors and the Company shall also be deemed applicable by analogy to their potential relations with companies forming part of the IBERDROLA Group.

TITLE IX. POLICY REGARDING THE PROVISION OF INFORMATION AND RELATIONSHIPS ESTABLISHED BY THE BOARD

Section 1. Policy regarding the Provision of Information

Article 43. Annual Corporate Governance Report

1. The Board of Directors shall, on an annual basis and following a report by the Audit and Compliance Committee, annually approve a corporate governance report for the

Company which shall include all specifications provided for by law and any others which the Board of Directors deems appropriate to include therein.

2. The corporate governance report shall be approved prior to the publication of the call of the Company's General Shareholders' Meeting for the fiscal year to which such report refers, and shall be made available to the shareholders together with other documents relating to the General Shareholders' Meeting.
3. In addition, public notice shall be given of the annual corporate governance report as provided in the securities market rules and regulations.

Article 44. Website.

1. The Company shall maintain a website for shareholders' information, which shall include the documents and information provided for by Law, and at least the following:
 - a) The By-Laws.
 - b) The Regulations for the General Shareholders' Meeting.
 - c) The Regulations of the Board of Directors and, if applicable, the rules and regulations applicable to the Committees of the Board of Directors.
 - d) The annual report.
 - e) The internal regulations for conduct in the securities markets.
 - f) The corporate governance reports.
 - g) The documents relating to Ordinary and Extraordinary General Shareholders' Meetings, including information regarding the agenda, proposals made by the Board of Directors, and any other relevant information that the shareholders may need in order to vote.
 - h) Information on the proceedings of prior General Shareholders' Meetings, and particularly, the composition of the General Shareholders' Meeting at the time when it is convened, and resolutions adopted, with a statement of the number of votes cast and the direction of such votes on each of the proposals included in the agenda.
 - i) The existing channels of communication between the Company and the shareholders and, in particular, explanations pertinent to the exercise of the shareholders' right to receive information, indicating the postal and e-mail addresses to which the shareholders may direct their requests.
 - j) The means and procedures for granting a proxy to attend a General

Shareholders' Meeting.

- k) The means and procedures for casting votes from a distance, including, where applicable, the forms required to evidence attendance and the casting of votes by means of data transmission at General Shareholders' Meetings.
 - l) All relevant events of which notice has been given to the National Securities Market Commission.
2. The Board of Directors shall have the duty to update the information in the Company's website and to bring its content into line with that of the documents filed and recorded with the applicable public registries.

Section 2. Relationships Established by the Board of Directors

Article 45.- Relationships with the Shareholders.

1. The Board of Directors shall establish any appropriate channels to hear proposals that the shareholders may make in connection with the management of the Company.
2. The Board of Directors, assisted by such members of the Senior Management as it deems appropriate, may organize meetings for the provision of information on the progress of the Company and of its Group or other matters of interest to the shareholders residing in locations with the most relevant financial markets in Spain and abroad. The Board of Directors shall guarantee equality of treatment in its relationships with the shareholders.
3. Likewise, the Board of Directors shall establish appropriate mechanisms for the regular exchange of information with those investors that are holders of a significant financial interest in the share capital of the Company and are not represented on the Board; provided, however, that in no event may such mechanisms imply the provision to the above-mentioned investors of any information that places them in a privileged or advantageous position vis-à-vis the other shareholders.
4. All public requests for delegation of voting powers made by the Board of Directors or by any of its members shall disclose, where applicable, the existence of a conflict of interest, and shall provide detailed reasons for the direction in which the representative shall vote in the event that no instructions are given by the shareholder, subject always to the provisions of Law.
5. The Board of Directors shall encourage the informed participation of the shareholders at the General Shareholders' Meetings, and shall take all such measures as may be appropriate to make it easier for the shareholders acting at a

General Shareholders' Meeting to effectively exercise the powers conferred upon them by Law and the By-Laws, with due observance of the provisions set out in the Regulations for the General Shareholders' Meeting.

Article 46.- Relationships with the Securities Markets.

1. The Board of Directors shall immediately inform the public regarding:
 - a) All relevant facts that might materially influence the stock exchange prices of securities issued by the Company.
 - b) All changes in the Company's ownership structure, such as fluctuations in significant direct or indirect interests, voting trusts and other forms of coalition of which the Board has had notice.
 - c) All substantial amendments to the Company's governance rules and regulations.
 - d) The policies, if any, in the area of treasury stock that the Company intends to pursue on the basis of any approvals granted by the shareholders at the General Shareholders' Meeting.
 - e) All changes to the composition and to the rules of organization and operation of the Board and the Committees thereof, or to the duties and positions of each Director in the Company, as well as any other modification relevant to the corporate governance system.
2. The Board of Directors shall adopt appropriate measures to ensure that the semi-annual, quarterly and any other financial information that it may be prudent to make available to the Securities Markets is prepared in accordance with the same principles, standards and professional practices used to prepare the annual financial statements and is as reliable as such financial statements. For this latter purpose, such information shall be reviewed by the Audit and Compliance Committee.

Article 47.- Relationship with the External Auditor.

1. The Board of Directors shall establish an objective, professional and ongoing relationship with the Company's External Auditor, and shall have the utmost respect for its independence.
2. The relationship referred to in the foregoing paragraph shall be channeled, as a rule, through the Audit and Compliance Committee provided for in these Regulations.
3. The Audit and Compliance Committee shall not submit a proposal to the Board of Directors, and the Board of Directors shall not submit a proposal to the General Shareholders' Meeting, for appointment as the Company's Auditor of an audit firm

when it has evidence that (i) such firm is affected by any circumstance of incompatibility pursuant to the legal provisions governing audits, or (ii) the fees that the Company intends to pay it for any and all services are greater than five percent (5%) of its total income during the last fiscal year.

4. The Board of Directors shall make public the fees that it has paid the audit firm, both in consideration for audit services and for services other than auditing, by specifying the fees paid to the auditors and those paid to any company forming part of the same group of companies to which the auditor belongs or to any other company to which the auditor is related under a relationship of joint ownership, management or control.
5. The Board of Directors shall use its best efforts to definitively prepare the financial statements such that there is no room for comments by the auditor. However, when the Board believes that its opinion must prevail, it shall provide a public explanation of the content and scope of the discrepancy.

Article 48.- Relationships with Senior-Level Managers.

Relations between the Board of Directors and the Company's senior-level managers, as provided in these Regulations, must be channeled through the Chief Executive Officer.

TITLE X. INTERPRETATION

Article 49.- Interpretation of these Rules.

1. These Regulations shall be interpreted in accordance with the priority of provisions and the recommendations contained in the "Report of the Special Commission for the Study of an Ethical Code for Corporate Boards of Directors" (Olivencia Report), in the "Report of the Special Commission for the Promotion of Transparency and Safety in Financial Markets and Listed Companies" (Aldama Report), and such other good governance principles and recommendations as are most widely recognized at all times.
2. The full Board of IBERDROLA, S.A. shall resolve any questions or discrepancies that may arise in connection with the application or the interpretation of these Regulations, following a report from the Audit and Compliance Committee and an opinion issued by Counsel to the Board of Directors.

Madrid, 26 April 2006

NATIONAL SECURITIES MARKET COMMISSION

Att: Mr. Antonio Mas Sirvent

Director of Markets Area

Pº de la Castellana, 19

28046 Madrid

RECEIVED
2007 JUN 23 10:03
NATIONAL SECURITIES MARKET COMMISSION

Dear Sirs,

We are pleased to inform you that the Board of Directors of this company, at its meeting held on the date hereof, has unanimously adopted the following resolutions:

1. To accept the resignations from their post as Directors, effective as of today, submitted by the following members: Mr. IÑIGO DE ORIOL YBARRA, Mr. JOSE ANTONIO GARRIDO MARTINEZ, Mr. JAVIER HERRERO SORRIQUETA and Mr. IGNACIO DE PINEDO CABEZUDO.

2. To execute and carry out the resolution adopted by the Board of Directors at its meeting held on 20 April 2005, which was reported to the National Securities Market Commission [*Comisión Nacional del Mercado de Valores*] (CNMV) on the date thereof under Registration number 2005 035264, whereby Mr. JOSÉ IGNACIO SÁNCHEZ GALÁN was appointed Chairman of the Board of Directors to replace Mr. IÑIGO DE ORIOL YBARRA as Chairman, maintaining his position as Chief Executive Officer but relinquishing the position of Vice-Chairman, all of which he accepts.

3. To execute and carry out the resolution referred to in paragraph 2 above, whereby it was resolved that, upon the occurrence of a vacancy, and subject to approval or ratification of the shareholders at the next General Shareholders' Meeting, there would be an interim appointment of the individual shareholder Mr. IÑIGO VÍCTOR DE ORIOL IBARRA as a Member of the Board of Directors, with the classification "Other External Director," and who accepts the position.

4. To execute and carry out the resolution adopted by the Board of Directors at the meeting held on 22 June 2005, which was reported to the CNMV on the date thereof under Registration number 2005 066734, whereby it was resolved that the Director Mr. XABIER DE IRALA ESTÉVEZ, in his capacity as Chairman of BBK, a stable reference shareholder of IBERDROLA, would fill the next vacancy to occur on the Executive Committee of the Board of Directors. Therefore, given that vacancies have occurred on the Executive Committee due to the resignation of the members referenced in paragraph 1 above, Mr. XABIER DE IRALA ESTÉVEZ is appointed as a member of the Executive Committee. He accepts the position and resigns as a member of the Audit and Compliance Committee.

All of which we hereby communicate to this National Commission for all pertinent purposes. As always, we are at your disposal for any clarification or explanation that may be required.

Yours faithfully,

Federico San Sebastián

COMISION NACIONAL DE VALORES

Bilbao, June 7, 2006

RE: Notice of Significant Event

Dear Sirs:

We are pleased to inform you that, as of the date hereof, the Board of Directors of Iberdrola, S.A. has unanimously adopted the following resolutions.

1. To accept the resignation from his position as Board Director and member of the Executive Committee, effective as of today, submitted by the Proprietary Director MR. JESUS MARIA CADENATO MATIA.
2. To appoint as members of the Board of Directors, on an interim basis and subject to approval or ratification by the shareholders at the next General Shareholders' Meeting, the individual shareholders Ms. INÉS MACHO STADLER, Mr. BRAULIO MEDEL CÁMARA and Mr. JOSÉ CARLOS PLA ROYO, and, once there is evidence of their respective acceptances in one of the forms set forth in Article 142 of the Commercial Regulations, the first two shall be classified as "Independent Directors" and the last as a "Proprietary Director", at the proposal of BBVA, a shareholder of "Iberdrola, S.A.".
3. To appoint Mr. JOSÉ CARLOS PLA ROYO as member of the Executive Committee, and, as mentioned above, once there is evidence of his acceptance, he shall be classified as a "Proprietary Director".

All of which we report to the National Commission for the appropriate purposes. We are always available to provide any clarification or supplemental information that you may require.

Sincerely.

Federico San Sebastián

I. INTRODUCTION

The Code of Professional Conduct of the Iberdrola Group (hereinafter the Code of Conduct) has been created with the aim of developing and formalizing the Principles and Values of the Group as established in the 2002-2006 Strategic Plan and serving as guidelines for the action of the Group's professionals in a global, complex and ever-changing environment.

The Code of Conduct is also intended to respond to the growing demand for Good Governance initiatives and practices in Listed Companies.

Approval

The Code of Conduct was unanimously approved at the meeting of the Board of Directors of IBERDROLA, S.A. held on February 27, 2002, upon recommendation by the Vice Chairman & Chief Executive Officer and after being studied by the Audit and Compliance Committee.

Scope of Application

The Code of Conduct is binding on all employees of the Group, regardless of their rank or their geographical or functional location.

The employees of the Iberdrola Group will hereinafter be referred to collectively as the professionals.

In those companies in which the Iberdrola Group has a majority interest, and those in which, although not having a majority interest, it has the ability to control or is responsible for management, the professionals representing the Iberdrola Group will promote the application of the Principles and Values of the rules of conduct established herein.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Development

By its nature, the Code of Conduct cannot and should not cover all possible situations, but should establish the criteria for guiding the conduct of its professionals and, where appropriate, resolve any questions that might arise in course of their professional activities.

Each of the Iberdrola Group's divisions may develop and implement specific Policies and Rules of Action in its particular area of activity, which shall be commensurate in all cases with the Principles and Values and the rules of professional conduct established in this Code.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

II. PRINCIPLES AND VALUES

The Principles and Values of the Iberdrola Group, which are necessary references for all activities of the Group's professionals, are:

- The **PERSON**, the basis for all action;
- The **CUSTOMERS**, recipients of the products and services of the Iberdrola Group;
- **COMPETITIVENESS**, the search for professional excellence, a constant challenge in any day-to-day work;
- **RESULTS**, the ultimate goal of the activities of the Iberdrola Group;
- **WORK**, effort applied to the creation of value and wealth;
- **ABILITY**, competence and talent for good professional performance;
- **HONESTY**, truthful, honest and transparent professional conduct;
- **LOYALTY**, defense of the interests of the Iberdrola Group; and
- **TEAM SPIRIT**, group of professionals organized and motivated to achieve results.

The Iberdrola Group believes that professional conduct in accordance with these Principles and Values is the best assurance of its commitment to creating value for its **SHAREHOLDERS**.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

III. GENERAL RULES OF PROFESSIONAL CONDUCT

Compliance with the Law

Iberdrola Group professionals will strictly comply with the applicable legal provisions where they carry out their activity, heeding the spirit and purpose of such provisions.

The Legal Affairs Division will be consulted in the event any well-founded questions arise regarding the interpretation or application of current legislation.

The Iberdrola Group reserves the right to file such appeals as may be appropriate of any legal, judicial or administrative decisions or resolutions that are contrary to its interests. The Iberdrola Group will respect and abide by judicial and/or administrative decisions passed in this respect.

Irreproachable Professional Conduct

The principles guiding the conduct of Iberdrola Group professionals shall be professionalism and integrity.

Professionalism is considered to be proactive, efficient, diligent and responsible conduct focusing on excellence, quality and innovation.

Integrity is considered to be loyal, honest, good faith and objective conduct which is in keeping with the Group's interests.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

IV. IBERDROLA GROUP PROFESSIONALS

Principle of Non-Discrimination and Equal Opportunities

The Iberdrola Group respects and will promote non-discrimination by reason of race, sex, ideology, nationality, religion or any other personal, physical or social condition of its professionals.

The Iberdrola Group rejects any expression of harassment, whether physical, sexual, psychological, moral or otherwise, abuse of authority at work and any other conduct generating an atmosphere which is intimidating or offensive to the personal rights of its professionals.

Right to Privacy

The Iberdrola Group respects the right to privacy of its professionals, particularly, by way of example and not of limitation, regarding personal data, medical data, financial data and communications.

The Iberdrola Group respects the personal communications of its professionals by internet and other means of communication.

The professionals of the Iberdrola Group undertake to use in a responsible manner the means of communication and, generally, any other means that the Iberdrola Group may make available to them.

The Iberdrola Group undertakes not to disclose the personal data of its professionals without their prior written acceptance, except when so required by law, the government or the courts.

The professionals of the Iberdrola Group who by reason of their activity have access to the personal data of other professionals in the Group shall promise in writing to respect the confidentiality thereof.

Workplace Health and Safety

The Iberdrola Group shall promote a workplace health and safety policy and adopt preventive measures required by applicable legislation and any other legislation as may be established in the future.

The Iberdrola Group shall promote the application of its rules and policies regarding workplace health and safety measures by the contractors with which it works.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Selection and Assessment

The Iberdrola Group shall maintain a strict, objective selection policy, considering only the academic, personal and professional merits of the candidates and the needs of the Group.

The Iberdrola Group shall assess its professionals rigorously and objectively on the basis of their individual and collective professional performance. Iberdrola Group professionals shall have a say in the setting of their objectives and be informed on the assessments made of them.

Training Policies

The Iberdrola Group shall promote the training of its professionals. Training programs shall foster equal opportunities and professional career development and shall contribute to achieving the Group's objectives.

Iberdrola Group professionals undertake to update their technical and managerial knowledge and take advantage of the Group's training programs.

Information Policies

The Iberdrola Group will inform its professionals of the outlines of the Strategic Plan and the progress of the Group.

Gifts and presents

Iberdrola Group professionals may not give or accept gifts or presents in the performance of their professional activities.

As an exception, the delivery and acceptance of gifts and presents shall be allowed if:

- a) They are of insignificant financial value;
- b) They correspond to customary commercial treatment, such as lunches, publicity items, etc.;

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

- c) They are permitted by law and generally accepted commercial practice.

Under no circumstances may Group professionals give or accept any kind of bribe or commission. Money may not be received from customers or suppliers on a personal level, even as a loan or advance.

Conflict of Interests

Professional decisions must be based on the best defense of the interests of the Iberdrola Group and may not be influenced by personal or family relationships or any other private interests of Group professionals; otherwise there will be a conflict of interests.

By way of example, but not limitation, the following are situations that might give rise to a conflict of interests:

- a) Being involved personally or through relatives in a financial transaction or operation to which the Iberdrola Group is party.
- b) Negotiating or formalizing contracts on behalf of the Iberdrola Group with individuals or entities in which the Group professional has a relative -up to the fourth degree by blood relationship or second degree by marriage- holding a management position, whether as a significant shareholder or director.
- c) Being a significant shareholder, director, etc. of customers, suppliers or direct or indirect competitors of the Iberdrola Group.
- d) Using the resources of the Iberdrola Group for private purposes.

Written notice must be given to an immediate superior regarding any occurrence or possible occurrence of a conflict of interests. The superior shall notify the Human Organization and Resources Division, which shall maintain and manage a Registry covering this type of situation.

Under no circumstance may professional activities be performed within the Iberdrola Group that entail or might entail a conflict of interests, except with prior written authorization of the Human Organization and Resources Division.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Resources and Means of the Iberdrola Group

The Iberdrola Group undertakes to make available to its professionals the necessary and appropriate resources and means for them to perform their professional duties.

Group professionals agree to responsibly use the resources and means made available to them, carrying out professional activities solely in the interests of the Iberdrola Group.

Privileged and Confidential Information

Information owned by and/or entrusted to the Iberdrola Group shall generally be considered confidential information.

The Iberdrola Group and all its professionals shall be responsible for taking sufficient security measures to protect privileged and confidential information.

The disclosure of privileged and confidential information or the use of privileged and confidential information for personal reasons is a breach of the Code of Conduct.

Any reasonable indication of a release of privileged and confidential information or the personal use thereof must be communicated by those with knowledge thereof to their immediate superior or, should the circumstances so require, to the Human Organization and Resources Division. The immediate superior must give written notice thereof to the Human Organization and Resources Division.

In the event of severance of an employment or professional relationship, privileged and confidential information, including documents and storage media (floppy disks, computers, etc.), shall be returned to the Iberdrola Group.

Outside Activities

The provision of services as an employee or professional, for one's own or another's account, to companies or entities other than the Iberdrola Group, as well as the performance of academic activities, must be authorized in advance and in writing by the Human Organization and Resources Division; otherwise, there will be a breach of this Code of Conduct.

The Iberdrola Group respects the performance of social and public activities by its professionals.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

V. IBERDROLA GROUP ENVIRONMENT

. CUSTOMERS

Quality of Service and Products

The Iberdrola Group commits to offering quality services and products in accordance with quality requirements and standards required by law.

Confidentiality

The Iberdrola Group shall guarantee the confidentiality of all personal data of its customers, undertaking not to disclose such data to third parties without the prior written consent of the customer, except when so required by law, the government or the courts.

Iberdrola Group professionals who have access to the personal data of customers by virtue of their activity shall promise in writing to maintain the confidentiality of such data.

Drafting of Clear and Simple Contracts

Contracts with customers of the Iberdrola Group shall be drafted in a clear and simple manner, shall promote transparency and shall provide information regarding different available alternatives, especially regarding of services, products and rates.

. PROVIDERS AND SUPPLIERS

Selection Policy

The Iberdrola Group's procedures for the selection of providers and suppliers shall conform to an objective and impartial standard, and shall avoid any conflict of interests or favoritism in the selection thereof.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

Confidential information

The prices and information submitted by providers and suppliers during a process of selection shall be treated confidentiality and shall not be disclosed to third parties without the prior written consent of the providers or suppliers, or when required by law, the government or the courts.

Iberdrola Group professionals who have access to the personal data of providers and suppliers by virtue of their activity shall promise in writing to maintain the confidentiality thereof.

• COMPETITORS

Fair Competition

The Iberdrola Group undertakes to compete fairly in the marketplace, and not to engage in advertising which is deceptive or which denigrates its competition or third parties.

Third-party Information

The acquisition of information from third parties, including information regarding competitors, must be carried out in a legal manner.

Defense of Competition (Antitrust)

The Iberdrola Group undertakes to promote free competition for the benefit of consumers and users.

The Iberdrola Group shall comply with antitrust rules and regulations, avoiding any conduct which constitutes or might constitute collusion, abuse or the restriction competition.

• SOCIETY

Authorities, Regulatory Organizations and Government

Relations with authorities, regulatory organizations and the government shall be conducted under the principle of cooperation and transparency.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

True and Proper Information

The Iberdrola Group shall provide true, proper and appropriate information regarding its policies and actions.

The economic-financial information of the Iberdrola Group -especially the Annual Financial Statements- shall accurately reflect its economic and financial position and net worth in accordance with generally accepted accounting principles.

A lack of honesty in the communication of information, whether internal or external (auditors, analysts, regulatory organizations, etc.) is a breach of the Code of Conduct. This includes the delivery of incorrect information, organizing it in an incorrect manner or attempting to confuse those who receive it.

All relations with analysts, the media, etc. shall be channeled through the Management of the Institutional Relations and External Communications Area.

Defense of the Environment and Social Action

The Iberdrola Group expresses its firm commitment to the defense of the environment, and shall carry out its activities with a view towards the actual achievement of sustainable economic, environmental and social development.

• SHAREHOLDERS

The Iberdrola Group expresses its intention to continuously create value for its shareholders.

Group professionals shall avoid any practices, especially unnecessary conduct and expenditures, which might cause a decline in the creation of value for the Group's shareholders.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

VI. COMMUNICATION, DISSEMINATION AND ASSESSMENT

The Code of Conduct shall be communicated to and disseminated among the professionals of the Iberdrola Group in accordance with the Plan designed for such purpose by the Human Organization and Resources Division.

The Management of the Institutional Relations and External Communication Area shall be responsible for the external dissemination of the Code of Conduct.

Any questions which might arise regarding the interpretation of the Code of Conduct or the application thereof must be referred to an immediate superior. Should circumstances so require, the Human Organization and Resources Division may be consulted.

Management of the Internal Audit Area shall assess and issue an annual report on the degree of compliance with the rules of professional conduct. The report shall be remitted to the Audit and Compliance Committee and the Vice Chairman & Chief Executive Officer.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

VII. DISCIPLINARY SYSTEM

The Iberdrola Group shall develop the measures needed to ensure the efficient application of the Code of Conduct, and shall punish any breach thereof.

Nobody, regardless of rank or position, is authorized to request that a professional commit an unlawful act or breach the provisions of the Code of Conduct. No professional may justify improper or unlawful conduct based on an order from a superior.

If there are reasonable indications of the commission of an act which is unlawful or which breaches the rules of the Code of Conduct, such information shall be provided to an immediate superior or, if circumstances so require, to the Human Organization and Resources Division. The immediate superior of the person communicating such information shall in turn inform the Human Organization and Resources Division in writing.

The identity of the person reporting irregular action shall be considered confidential information.

If the Human Organization and Resources Division decides that an Iberdrola Group professional has engaged in activities which breach the provisions of law or this Code of Conduct, disciplinary measures shall be applied in accordance with the system of offenses and penalties set forth in the collective bargaining agreement of the company where such professional is employed.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

VIII. EFFECTIVENESS

The Code of Conduct shall be reviewed and updated from time to time, taking into account the annual report of the Management of the Internal Audit Area and the suggestions and proposals made by the Group's professionals.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

IX. ACCEPTANCE AND CONSENT

The professionals of the Iberdrola Group expressly accept the Principles and Values and the rules of action set forth in the Code of Conduct.

Professionals who join or become part of the Iberdrola Group in the future shall expressly accept the Principles and Values and the rules of action set forth in the Code of Conduct, which shall be attached to their respective employment agreements.

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document which this translation is intended to reflect, the text of the original Spanish-language document shall prevail.

B) EVOLUTION OF BUSINESS

(Although brief in nature, given the summarised nature of this quarterly information, the comments included in this section must allow investors to form a sufficiently clear opinion on the activities carried on by the company and the profits or losses obtained during the period covered by this quarterly information, as well as on its financial and net asset situation and other essential information on the general progress of company affairs). Lastly, comments on the consolidated and individual financial statements must be clearly distinguishable).

See annex

C) BASES FOR PRESENTATION AND VALUATION RULES

(In preparing the financial and accounting information included in this periodical public announcement, the same principles, valuation bases and accounting criteria must be used as those contemplated in current regulations governing the presentation of financial and accounting information incorporated in the annual accounts and financial statements applicable to the annual period to which the public information is made available. If, exceptionally, generally accepted accounting principles and criteria required by relevant applicable regulations have not been applied to the attached information, this fact must be duly indicated and justified, and explanation given of the influence of their non-application on the net asset situation, financial situation and profits or losses of the company or group. In addition and with a similar purpose as mentioned above, any modifications which, as the case may be, may be made in the accounting criteria employed in preparing the attached information in relation to the previous year's audited accounts, must be mentioned and commented upon. If the same principles, criteria and accounting policies as used in the prior annual accounts have been applied, and if those comply with the provisions of current accounting regulations as applicable to the company, the fact should be expressly indicated. When any adjustments or reclassifications in the previous year have been made, in accordance with applicable regulations, due to changes in accounting policies, corrections of any mistakes or changes in the classification of accounts, quantitative and qualitative data that is required to understand such adjustments or reclassifications must be included in this section).

On 9 May the Periodic Public Information published on 27 April 2006 was modified, as a consequence of a mistake in the arithmetic calculation in the "Results before Tax" and "Results of the Period" of Iberdrola (on an individual basis).

	Notified on 27/04/06	Corrected
Results before tax	87.239	71.354
Results of the period	76.768	60.882

The financial and accounting information included in this period public information has been prepared, as regards the consolidated data, according to the International Financial Reporting Standards (IFRS), being those adopted by the European Commission in accordance with the procedure established by Regulation (CE) 1606/2002 of the European Parliament and Council of 19 July 2002.

This applies to both the quarterly information provided about the current period and the comparative data in relation to the previous period.

The same accounting principles, criteria and policies have been applied as in the last annual financial statements.

On 28 February 2006, Royal Decree-Law 3/2006 of 24 February was published in the Official Journal (BOE), modifying the means for matching offers for sale and purchase of energy presented simultaneously on the daily and interdaily electricity production market by actors in the electricity sector belonging to the same corporate group.

This Royal Decree Law is subject to further implementation and, so long as its real effect is not known, the main implications taken into account in this period public information are:

- Cancellation of the emission rights that are issued for free.
- The provisional price considered by the National Energy Commission as regards payment for regulated activities will be the average cost set out in the 2006 tariff for energy generated under the ordinary regime for the peninsular, including costs of adjustment services and power guarantee that amounts to 42.35 €/MWh.

In addition, and in relation to the consolidated IFRS information of the previous year, the following points must be stated: in the first term of 2005, some companies were integrated using the equity method while in the half-yearly and annual information they were fully integrated.

No changes having been made in respect of the methods for consolidation for annual information, the consolidated results for the current year and previous year for the first term are not homogeneous. If the same consolidation methods had been used, the items "Net turnover" and "Profit/Loss before tax" would have been as follows:

	As reported	Fully integrated
Net turnover	2.675.151	2.740.028
Results before tax	538.422	539.622

For the same reason the average consolidated number of employees of the group would have increased by 915 persons, from the 15,825 that were announced to 16,740 if the companies had been fully integrated.

D) PROFITS DISTRIBUTED DURING THE PERIOD

(Dividends actually paid since the beginning of the financial year should be mentioned)

		% of nominal value	Euros per share (x,xx)	Amount (thousands euros)
1. Ordinary Shares	3100	12.2	0.37	330,828
2. Preference Shares	3110			
3. Redeemable Shares	3115			
4. Shares without votes	3120			

Additional information on the distribution of dividends (on account, additional, etc.)

- On 2 January 2006, an advance dividend for 2005 of 0.367 euros per share was paid.

E) SIGNIFICANT EVENTS (*)

1. Acquisitions or disposals of shares in listed companies giving rise to the disclosure requirement contemplated in Art. 53 of the Spanish Stock Exchange Law (5% and multiples).
 2. Acquisitions of own shares giving rise to the disclosure requirement contemplated in the 1st additional disposition of the Spanish Public Limited Companies Act (1%)
 3. Other significant increases or reductions of fixed assets (stakes of over 10% in non listed companies, relevant tangible investments or disinvestments, etc).
 4. Increases and reductions in share capital or the values of shares
 5. Issues, redemptions or cancellations of debt
 6. Changes of Directors or the Board of Directors
 7. Modifications to the Articles of Association
 8. Conversions, mergers or demergers
 9. Changes in the institutional regulation of the sector that significantly affect the economic and financial situation of the Company or Group.
 10. Suits, actions or disputes which might materially affect the net asset situation of the Company or Group
 11. Situations involving insolvency, suspension of payments, etc.
 12. Special agreements limiting, assigning or totally or partially waiving the political and economic rights of shares in the company.
 13. Strategic agreements with national or international groups (exchanges of blocks of shares, etc.).
 14. Other significant events
- (*) Mark with an "X" the relevant box, and if affirmative, attach an explanatory annex which sets out the date of the notification to the CNMV and the SRBV

F) ANNEX EXPLAINING SIGNIFICANT EVENTS
See annex

INSTRUCTIONS FOR FILLING IN THE QUARTERLY REPORT OF RESULTS (GENERAL)

- Numeric data, except if otherwise mentioned, should be in thousands of euros, with no decimal points, and rounding up or down the totals.

- Negative amounts should be mentioned with a minus (-) sign before the relevant number.

- For each number, except if mentioned otherwise, the corresponding number of the previous period should be included.

- International Financial Reporting Standards (IFRS) are those adopted by the European Commission in accordance with the procedure set out in Regulation CE 1606/2002 of the European Parliament and Council, of 19 July 2002.

- Financial information set out in this report must be filled in accordance with regulations and recognised accounting and evaluation principles that are applicable to the entity for preparing the financial statements for the annual period to which the Periodic Public Information refers.

Until financial years starting 11 January 2007, and except for credit entities, companies that are obliged under the Commercial Code to draw up consolidated annual accounts and who at the end of financial period have issued listed fixed rate debentures and who have opted to continue applying the standards set out in Section 3, Title III of the first book of the Commercial Code and implementing regulations, provided they have not applied the "adopted IFRS", must present consolidated public periodic information in section A under "Consolidated under national rules".

- DEFINITIONS:

(1) Net turnover: this will include all sales of products and the provision of all services corresponding to the normal activities of the company, deducting any rebates and other reductions made on sales, as well as VAT and other taxes directly related to the aforementioned turnover. For consolidated numbers presented according to adopted IFRS, the information to be included in this section must be pursuant to these standards.

(2) Profit before tax on continuing operations: Issuers who present periodic financial information in accordance with adopted IFRS, will include in this item profits or losses before tax on continuing activities.

(3) Profit of the financial year on continuing activities: this item will only be completed by issuers who present periodic financial information in accordance with adopted IFRS, and will show the profits or losses after tax on continuing activities.

(4) Profits/Losses Issuers who present periodic financial information in accordance with adopted IFRS will show in this line the profits or losses after tax on continuing activities, increased or decreased by results after taxes on discontinued activities.

ANNEX EXPLAINING SIGNIFICANT EVENTS

E - 3. Other significant increases or reductions of fixed assets (stakes of over 10% in unlisted companies, significant investments or divestments of fixed assets, etc).

Increase in share capital of NEOTEC CAPITAL RIESGO SOCIEDAD DE FONDOS, S.A., S.C.R., in which IBERDROLA maintains a direct interest of 7.93%.

Ancillary investment in IBERDROLA PORTUGAL ELECTRICIDAD E GAS, S.A. (100% held by IBERDROLA, S.A.). Following this operation the indirect interest of IBERDROLA, S.A. in that company remains unchanged.

Increase in share capital of IBERDROLA DISTRIBUCIÓN DE GAS, SAU, by IBERDROLA, S.A. Following this operation the direct interest of IBERDROLA, S.A. in that company remains unchanged. (pending registration at the Commercial Registry).

Sale by IBERDROLA, S.A. of 100% of its stake in MEDIA PARK, S.A. to IBERDROLA INMOBILIARIA, S.A., (100%-owned by IBERDROLA, S.A.), so that IBERDROLA S.A.'s shareholding in that company remains unchanged.

Purchase by VINZEO TECHNOLOGIES, S.A. (50%-owned by CORPORACION IBV, PARTICIPACIONES EMPRESARIALES, S.A., in turn 50%-owned by IBERDROLA, S.A.) of 100% of the company named ARC, giving IBERDROLA, S.A. a 50% indirect interest in that company.

Sale by IBERDROLA INMOBILIARIA, S.A. (100%-owned by IBERDROLA, S.A.) of 30% of FIUNA, S.A., leaving IBERDROLA an indirect interest of 70% in that company.

Increase in share capital of MEDIA APPLICATIONS, S.A. (50% held by MEDIA PARK, S.A. and IBERDROLA, S.A. respectively), by capitalisation of debt. After this operation, MEDIA PARK, S.A. holds 71.38% and IBERDROLA, S.A. holds 28.62% of the shares in the company, bringing IBERDROLA's direct interest in that company to 100%.

Purchase by IBERENOVA PROMOCIONES (100%-owned by IBERDROLA ENERGIA RENOVABLES, II, in turn 100%-owned by IBERDROLA, S.A.) of 100% of the capital of NATURENER, S.A., and change of corporate name to PARQUES EÓLICOS REUNIDOS, SAU, giving IBERDROLA an indirect interest of 100% in that company.

Increase in share capital of the German company IBERDROLA REGENERATIVE ENERGIEN GmbH (100%-owned by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.). Following this operation the indirect interest of IBERDROLA, S.A. in that company remains unchanged.

Incorporation, by IBERDROLA ENERGÍA RENOVABLES II, S.A., (100%-owned by IBERDROLA, S.A.) of the US company IBERDROLA RENEWABLE ENERGIES USA LIMITED, giving IBERDROLA an indirect interest of 100% in that company.

Additional funding provided AEOLIA PRODUÇÃO DE ENERGIA (100%-owned by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.). Following this operation the indirect interest of IBERDROLA, S.A. in that company remains unchanged.

Incorporation by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A.U. (100% owned by IBERDROLA, S.A.) of the Polish company IBERDROLA ENGINEERING AND CONSTRUCTION POLAND SP. Z.O.O., giving IBERDROLA an indirect interest of 100% in that company.

Incorporation by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A. (100% owned by IBERDROLA, S.A.) of the English company IBERDROLA ENGINEERING AND CONSTRUCTION UK LTS., giving IBERDROLA an indirect interest of 100% in that company.

Incorporation by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A. (100% owned by IBERDROLA, S.A.) of the Russian company IBERDROLA INZHINIRING I STROITEISTVO LIMITED LIABILITY COMPANY, giving IBERDROLA an indirect interest of 100% in that company (registered but pending issue of certificate of registration).

E - 6. Changes of Directors or the Board of Directors

The resolutions adopted at the General Meeting held on 30 March 2006 included the following:

*RESOLUTIONS RELATING TO ITEM 10
(Item Ten on the Agenda)*

- Ratification of Directors appointed by cooptation since the last General Meeting:
 - a) Ratification of the appointment as Director of Mr Xabier de Irala Estévez, agreed by the Board Meeting dated 20 April 2005.
 - b) Ratification of the appointment as Director of Mr Jesús María Matía, agreed by the Board Meeting dated 20 April 2005.

The General Meeting of Shareholders, on the proposal of the Board of Directors, adopted the following resolutions.

- a) "To ratify, pursuant to s. 138 of the Consolidation of the Corporations Act and Art. 48.3 of the Articles of Association, the appointment by cooptation by the Board on 20 April 2005 of Mr Xabier de Irala Estévez as Director, whose appointment was made by resolution stating litteral as follows, which is fully ratified by the General Meeting:

"5°.- To appoint as member of the Board of Directors by cooptation, pursuant to s. 138 of the Consolidation of the Corporations Act and Art. 48.3 of the Articles of Association, on the proposal of the Board of BBK - shareholder of IBERDROLA, S.A. – and to reserve approval or ratification until the first subsequent General Meeting of Shareholders, of Mr Xabier de Irala Estévez, who is a shareholder of the company, of full age, married, with Spanish nationality and whose business address for this purpose is Calle Gran Vía nº 30, Bilbao, with National ID Nº 04.847.996-X to cover the vacancy in the Board left by Mr. Santiago Mayner Oyarbide. The new Board Member will be classified as external director representing substantial shareholders, and will exercise his duties as such until 16 June 2006, the date corresponding to the end of the term of Mr. Santiago Mayner Oyarbide whom he substitutes.

The Board of Directors expressly noted that Mr. Xabier de Irala Estévez, attending the meeting, accepted the position as member of the Board of Directors of the Company, as well as his declaration of not being affected by any legal incompatibility for performing the corresponding duties.

The express formal acceptance of Mr Xabier de Irala Estévez of the terms of Article 17 of the Rules governing the Board of Directors relating to resignation and removal from the Board, as well as the obligation set out in Article 49 of the Articles of Association to deposit ten thousand (10,000) shares of the Company as a guarantee for any liability he may incur during the performance of his duties was noted, and the Secretary delivered to him a copy of the Company Articles of Association and Regulations that govern the Company."

- b) "To ratify, pursuant to s. 138 of the Consolidation of the Corporations Act and Art. 48.3 of the Articles of Association, the appointment by cooptation by the Board on 20 April 2005 of Mr Jesús María Cadenato Matía as Director, which appointment was made by resolution stating litteral as follows, which is fully ratified by the General Meeting:

"6°.- "To appoint as member of the Board of Directors by cooptation, pursuant to s.138 of the Consolidation of the Corporations Act and Art. 48.3 of the Articles of Association, on the proposal of the Board of BBVA - shareholder of IBERDROLA, S.A. – and to reserve approval or ratification until the first

subsequent General Meeting of Shareholders of Mr Jesús María Cadenato Matía, who is a shareholder of the company, of full age, married, with Spanish nationality and whose business address for this purpose is Paseo de la Castellana nº 81, Madrid, , with National ID N° 14.917.785-P to cover the vacancy in the Board left by Mr. José Antonio Fernández Rivero. The new Board Member will be classified as external director representing substantial shareholders, and will exercise his duties as such until 16 June 2006, the date corresponding to the end of the term of Mr. José Antonio Fernández Rivero whom he substitutes.

The Board of Directors expressly noted that Mr. Jesús María Cadenato Matía, attending the meeting, accepted the position as member of the Board of Directors of the Company, as well as his declaration of not being affected by any legal incompatibility for performing the corresponding duties.

The express formal acceptance of Mr Jesús María Cadenato Matía of the terms of Article 17 of the Rules governing the Board of Directors relating to resignation and removal from the Board, as well as the obligation set out in Article 49 of the Articles of Incorporation to deposit ten thousand (10,000) shares of the Company as a guarantee for any liability he may incur during the performance of his duties was noted, and the Secretary delivered to him a copy of the Company Articles of Association and Regulations that govern the Company.”

E -7 Modifications to the Articles of Association

The resolutions adopted at the General Meeting held on 30 March 2006 included the following:

AGREEMENTS RELATED TO ITEM THREE (Item Three on the Agenda)

- Modification of certain articles of the Articles of Association and Regulation governing the General Meeting of Shareholders:
 - a) Modification of Article 19 of the Articles of Association and Article 8 of the Regulations of Shareholders Meetings, in order to adapt them to the provisions of the First Final Provision of Law 19/2005, of 14 November, on the European Corporations registered in Spain, as regards the extension of the term for publishing the calling of a General Meeting and the right of shareholders to request the publication of an any additional notification including new items on the Agenda.
 - b) Modification of Article 22 of the Articles of Association and Article 10 of the Regulations of Shareholders Meetings in order to eliminate the requirement for a minimum number of shares in order to be able to attend a General Meeting of Shareholders.

The General Meeting of Shareholders, on the proposal of the Board of Directors, adopted the following resolutions.

- a) Approval of the new text of Article 19 of the Articles of Association as well as that of Article 8 of the Regulations of the Shareholders Meetings, in order to adapt them to the provisions of the First Final Provision of Law 19/2005, of 14 November, in the following terms:

Articles of Association

“Article 19. Notice of General Meeting

1. *The General Meeting must be called formally by the Board of Directors by notice published in the Gazette of the Commercial Registry and in one of the newspapers with the largest circulation in Biscay, at least one month before the date fixed for the meeting, except if the law provides otherwise, in which case the legal provisions shall apply.*
2. *The Board of Directors must call a General Meeting in the following cases:*
 - a) *In accordance with the provisions of Article 18 of the Articles of Association.*
 - b) *On written request by shareholders who hold or represent at least a shareholding as established by law, setting out in the request the items to be considered. In this case, the Board of Directors will call the General Meeting to be held within thirty (30) days of the date on which it was requested by notarial deed to call such meeting. The Board of Directors will establish the Agenda for the meeting, which must include the items set out in the request.*
 - c) *When a public offer is made to purchase the shares issued by the Company, in order to inform the General Meeting about the public bid and to discuss and decide on such matters as may be put to their consideration. Any shareholder holding a right to vote representing at least one percent (1%) of the Share Capital will have the right to request matters to be included in the Agenda of the General Meeting that is called for this purpose.*
3. *The notice must contain all the items required by law for each case, and in all events will determine the date, place and time for the meeting on first*

calling and all the matters that must be considered. The notice may in addition set the date, if need be, for holding the General Meeting on second call.

- 4. Shareholders representing at least five per cent (5%) of the Share Capital may request a supplementary notice to be published in addition to the notice calling the General Meeting, setting out one or more items for the Agenda. This right must be exercised by certified notification that must be received at the corporate registered address within five (5) days of publication of the notice. The supplementary notice must be published at least fifteen (15) days before the date set for the General Meeting.*
- 5. The General Meeting may not consider nor decide on any matter that is not included in the Agenda."*

Regulations of the General Meeting

"Article 8. Notice of General Meeting.

- 1. In accordance with the terms of the Articles of Association, the General Meeting must be called formally by the Board of Directors by announcement published in the Gazette of the Commercial Registry and in one of the newspapers with the largest circulation in Biscay, at least **one month** before the date fixed for the meeting, except if the law provides otherwise, in which case the legal provisions shall apply.*
- 2. The Board of Directors must call a General Meeting in the following cases:*
 - a) In accordance with the provisions of Article 6(2) above.*
 - b) On written request by shareholders who hold or represent at least a shareholding as established by law, setting out in the request the items to be discussed. In this case, the Board of Directors will call the General Meeting to be held within thirty (30) days of the date on which it was requested by notarial deed to call such meeting. The Board of Directors will establish the Agenda for the meeting, which must include the items set out in the request.*

- c) When a public offer is made to purchase the shares issued by the Company, in order to inform the General Meeting about the public bid and to discuss and decide on such matters as may be put to their consideration. Any shareholder holding a right to vote representing at least one percent (1%) of the Share Capital will have the right to request matters to be included in the Agenda of the General Meeting that is called for this purpose.*
- 3. The notice must contain all the items required by law for each case, and in all events will determine the date, place and time for the meeting on first calling and all the matters that must be considered. The notice may in addition set the date, if need be, for holding the General Meeting on second call.*
- 4. The Company will send a copy of the notice to the National Stock Exchange Commission (CNMV). The text of the notice will also be accessible on the website of the Company.*
- 5. From the date of the notice, all information that is deemed fit to ensure the attendance and participation of shareholders at the Meeting will be published on the Company's website, including at least the following:*
- a) The documents relating to the General Meeting required by Law, with information on the Agenda, the proposals that are made by the Board of Directors, and any relevant information that shareholders may need in order to vote.*
- b) The means of communication between the Company and shareholders and, in particular, explanations of how to exercise the shareholder's right to be informed, indicating the postal and electronic addresses to which shareholders may request information.*
- c) The means and procedures to appoint a proxy for the Meeting.*
- d) The means and procedures for voting remotely, including as the case may be any forms to certify assistance and voting at the General Meeting via a telecommunication network.*

6. *Shareholders representing at least five per cent (5%) of the Share Capital may request a supplementary notice to be published in addition to the notice calling the General Meeting, setting out one or more items for the Agenda. This right must be exercised by certified notification that must be received at the corporate registered address within five (5) days of publication of the notice. The supplementary notice must be published at least fifteen (15) days before the date set for the General Meeting.*
 7. *The Board of Directors may require a Notary to attend the General Meeting and prepare the minutes of the meeting. They must do so in those circumstances established by Law.”*
- b) Approval of the new text of Article 22 of the Articles of Association and Article 10 of the Regulations of Shareholders Meetings in order to eliminate the requirement for holding a minimum number of shares in order to be able to assist a General Meeting of Shareholders, in the following terms.

Articles of Association

“Article 22. Right to attend

1. *Any person holding shares with voting rights may attend a General Meeting and take part in its deliberations with right to be heard and to vote.*
2. *To exercise the right of attendance, shareholders must have the shares registered in their name in the corresponding company books five (5) before the day the General Meeting is to be held. This shareholding shall be certified using an attendance card or certificate of legitimacy issued by the entity or entities responsible for the company books, or any other means admitted by laws in force.*
3. *The members of the Board of Directors must attend the General Meetings. The Directors, Technical staff and other persons who have an interest in the proper functioning of corporate matters may be authorised by the Board of Administration to attend the General Meeting. The non-attendance of either will not affect the validity of the General Meeting.*

4. *The Chairman may allow the press, financial analysts and any other person s/he considers fit to have access to the General Meeting, however the General Meeting may revoke this permission.*

Regulations of the General Meeting

"Article 10. Right to attend

1. *Any person holding shares with voting rights may attend a General Meeting and take part in its deliberations with right to be heard and to vote.*
2. *To exercise the right of attendance, shareholders must have the shares registered in their name in the corresponding company books five (5) before the day the General Meeting is to be held. This shareholding shall be certified using an attendance card or certificate of legitimacy issued by the entity or entities responsible for the company books, or any other means admitted by laws in force.*

E - 9 Changes in the institutional regulation of the sector that significantly affect the economic and financial situation of the Company or Group.

Until the 31st March 2006, the following regulations were published, which may have a relevant effect on the activity of the electricity and gas sector:

ELECTRICITY SECTOR

- Royal Decree-Law 3/2006 of 24 February, modifying the means for matching offers for sale and purchase of energy presented simultaneously on the daily and interdaily electricity production market by actors in the electricity sector belonging to the same corporate group.
- Correction of errors in Royal Decree-Law 3/2006 of 24 February.

In this provision, the matching amounts of electrical energy offered and matched for these actors were assimilated to physical bilateral contracts, made prior to the program resulting from matching the daily market (before correcting the textual mistake, it read "before matching on the daily market"), so that these actors can only participate in the program resulting from the matching on the basis of the net position of the group to which they belong (before correction, the text indicated "they may only participate in the matching of the net position").

Only offers for sale under the ordinary regime and the purchase offers made by distributors will be taken into account for this. In relation to payment of the activities regulated by the CNE (National Energy Commission) during 2006,

the provisional price to be taken in account for distributors of energy purchased on the basis of this assimilation mechanism was 42.35 €/MWh.

In addition, due to the internalisation of the value of greenhouse gas emission rights in price formation in the wholesale electricity market, this Royal Decree reduces the remuneration of the affected generating units by equivalent amounts. What's more, due to the high volume of tariff shortfalls generated to date in 2006 it is advisable to discount the value of the emission rights in order to determine the quantity of this deficit.

- Royal Decree-Law 4/2006 of 24 February, modifying the functions of the CNE (National Energy Commission).

This Royal Decree-law modifies the functions of the CNE establishing a new text for Additional Provision 11 of Law 34/1998 of 7 October on the Hydrocarbon Sector, which corrected a situation that was considered inadequate from two perspectives.

Thus, on the one hand it expanded the 14th Function of the CNE both as regards purchases that require its authorisation: "purchase of shareholdings in companies with activities considered regulated or activities that are subject to administrative intervention implying special control" (nuclear and coal-fired power stations, activities in the electricity systems in the islands and outside the peninsular, gas storage activities using international gas pipelines that terminate or transit through the Spanish territory). This authorisation will also be required for direct purchases of assets required to carry out these activities.

On the other hand, in relation to any denial to grant this authorisation, a new cause is added to that of the existence of significant risks, being "protection of the general interest in the energy sector and, in particular, guaranteeing that the policy objectives of the sector are adequately followed, with special concerns relating to assets that are considered strategic".

- Order ITC/913/2006 of 30 March, approving the method for calculating the cost of each of the fuels used and the procedure for dispatching and payment of energy in the island and extra-peninsular electricity systems.

The content is summarised below with the following order.

- Order ITC/914/2006 of 30 March, establishing a method for calculating the retribution for the power guarantee for energy generation plants under the ordinary regime for island and extra-peninsular electricity systems.

Both develop the terms of Royal Decree (RD) 1747/2003 regulating the extrapeninsular electricity systems. Being regulatory instruments, they do not modify the contents of this RD, so the characteristics regarding retribution and performance of activities and basic operation do not change, i.e.:

- Regulated payment of investment costs via the Power Guarantee
- Right to charge for the Power Guarantee from planned facilities
- Dispatching on standard costs

- Intermediate payments of distributors and marketers at the peninsular market price
- The CNE makes the final payment of the retribution regulated by the Ministerial Orders.

These Ministerial Orders permit the provisional 2001-2005 cycle to be closed, essentially based on book costs and establishes the basis for future retribution based on standards. This refers to electricity production, and does not cover transport and distribution.

The methodology for dispatching and payment allows the REE to start performing its functions under the RD and enables the energy that has been traded since publication of the RD to be paid for.

- Resolution of 17 March 2006, of the General Secretary for Energy, approving Operation Procedures 4.1 "Resolution of congestion on the France-Spain interconnection" and 3.1 "Programming Generation", to adapt them to Order ITC/4112/2005 of 30 December.

This resolution approves procedure PO 4.1 which develops a process for resolving congestion on the France-Spain interconnection using a system of explicit coordinated auctions (Phase I) set out in Annex I of Order ITC/4112/2005 of 30 December, which establishes the regime for performing intra-community and international electricity exchanges.

In addition Red Electrica de España S.A. was authorised to participate in the explicit auction process for power capacity on the France-Spain interconnection to purchase the exchange capacity required to perform the energy supply contracts with EDF to REE and REE to EDF, referred to in Transitional Provision Nine of Law 54/1997.

The resolution also approves PO 3.1 to establish a process for the daily scheduling of electricity generation on the basis of matching offers for sale and purchase of energy resulting from the daily and interdaily markets and from the communication of performance of bilateral contracts with physical delivery, so that demand is covered and the safety of the system is guaranteed.

- Resolution of 16 February 2006 of the National Energy Commission establishing, pursuant to Article 34 of Addition Provision Three of Royal Decree 6/2006 of 23 June, the list of main and dominant operators in the energy sectors.

This Resolution also affects the gas sector, so it is not mentioned in the following section.

The list of main operators takes into account the structure of corporate groups that exist at the time the list is made up. The list is set out below, together with last year's list so as to show changes:

Main Operators in the Electricity Sector		
	2005	2006
1	Endesa Group	Endesa Group
2	Iberdrola Group	Iberdrola Group
3	Unión Fenosa Group	Unión Fenosa Group
4	Hidrocantábrico Group	Hidrocantábrico Group
5	Red Eléctrica Group	Viesgo Generación, S.L.

Main Operators in the Gas Hydrocarbon Sector		
	2005	2006
1	Repsol YPF-Gas Natural Group	Repsol YPF-Gas Natural Group
2	Enagas Group	Iberdrola Group
3	Hidrocantábrico-Naturcorp Group	BP España Group
4	Iberdrola Group	Hidrocantábrico-Naturgas Group
5	BP España Group	Endesa Group

Other provisions of less interest are as follows:

- Resolution of 8 February 2006, approving the regulations for registering, evaluating and informing on greenhouse gas emission rights.

This resolution develops aspects relating to the accounting treatment of emission rights referred to in Law 1/2005 of 9 March, regulating the regime for trading greenhouse gas emission rights and it is also considered to develop the current General Accounting Plan, approved by Royal Decree 1643/1990 of 20 December.

GAS SECTOR

- Resolution of 13 March 2006, of the General Directorate for Energy Policy and Mining, establishing detailed protocols for the Rules governing the Technical Management of the Gas System.

This resolution publishes the following Detailed Protocols relating to technical management of the gas system:

- PD-01. Measurement.
- PD-02. Procedures for distribution.
- PD-03. Demand forecasts.
- PD-04. Communication Mechanisms.
- PD-05. Procedure for determining the energy unloaded by methane ships.
- PD-06. Operating rules for unloading methane ships.

- Resolution of 29 March 2006, of the General Directorate for Energy Policy and Mining, publishing new maximum prices for the sale of gas for use as raw material.

E - 14 Other significant events

On 9 January 2006, the following Relevant Event was notified to the National Stock Market Commission:

"We are glad to announce that IBERDROLA has bought from Naturener 100% of its subsidiary Naturener Eólica, which has 280 Megawatts (MW) of electricity power at an advanced stage of development in the autonomous communities of Castilla-La Mancha, Andalucía and Castilla y León."...

On 9 January 2006, the following notification was made to the National Stock Market Commission:

The Company delivers a note relating to the position of Iberdrola Portugal in relation to EDP, Galp and the reorganisation of the Portuguese electricity sector.

On 18 January 2006, the following notification was delivered to the National Stock Market Commission:

Iberdrola and Gamesa, through the Nuevas Energías Ibéricas consortium, which includes Visabeira, Alberto Mesquita, MECI y Galucho, have presented in Lisbon today an industrial project for building five aerogenerator factories in Portugal, representing a significant investment.

On 27 January 2006, the following notification was made to the National Stock Market Commission:

"Iberdrola notifies that its (non audited) results for 2005 will be presented to the CNMV and the Governing Councils of the Stock Markets on Thursday 9 February 2006 before the market opens (9 a.m. Madrid time).

A presentation will be made on the same day in Madrid."

On 1 February 2006, the following notification was made to the National Stock Market Commission:

"We are glad to inform you that IBERDROLA, with approval of the Board of Directors, will offer its employees, for the second year in a row, the possibility of receiving part of their salary in shares. Shares will be delivered during March 2006." ...

On 3 February 2006, the following Relevant Event was notified to the National Stock Market Commission:

Decision of the Council of Ministers pursuant to Article 17(b) of Law 16/1989 of 17 July on Competition Control, to subject the approval of the merger resulting from the taking of control of Endesa S.A. by Gas Natural SDG, S.A. to certain conditions. ...

On 3 February 2006, the following notification was made to the National Stock Market Commission:

Iberdrola communicates a Press Release relating to the Government's decision regarding Gas Natural's public offer for Endesa.

On 6 February 2006, the following notification was made to the National Stock Market Commission:

The Company communicates that the Presentation of the Results of 2005 will be moved by half an hour, to 9.30 a.m. on 09/02/2006.

On 9 February 2006, the following Relevant Event was notified to the National Stock Market Commission:

The Company provides information on the results of the second semester of 2005.

On 9 February 2006, the following notification was made to the National Stock Market Commission:

The Company provides a presentation of the results of the second semester of 2005.

On 22 February 2006, the following Relevant Event was notified to the National Stock Market Commission:

"We are glad to announce that today the Board of Directors of Iberdrola approved unanimously the following resolutions:

I. To present the 2005 Annual Accounts, the Management Report and the Proposal for Distributions as well as the 2005 Consolidated Annual Accounts and Management Report.

II. To call a General Meeting of Shareholders on the 29 and 30 March on first and second notice, respectively, with the following Agenda:"...

On 23 February 2006, the following Relevant Event was notified to the National Stock Market Commission:

The company presents the Annual Report on Corporate Governance for 2005.

On 24 February 2006, the following Relevant Event was notified to the National Stock Market Commission:

"Following our notification made on 22 February, we attach a copy of the documentation (on paper and scanned onto CD) that will be available for shareholders on 24th of this month, on our website and at the corporate domicile, in relation to the Notice of General Meeting of Shareholders, as set out in the notice of call. The Report on Corporate Governance has already been presented to the Commission". ...

On 28 February 2006, the following Relevant Event was notified to the National Stock Market Commission:

We attach the corrected text of the Resolution relating to Item nine of the Agenda of the General Meeting of Shareholders of this Company, which substitutes the notice provided on 23 February. ...

On 2 March 2006, the following notification was made to the National Stock Market Commission:

"We are glad to announce that IBERDROLA, through the Nuevas Energías Ibéricas (NEI) Consortium, which includes Gamesa and the following Portuguese companies: Visabeira, Alberto Mesquita, MECI y Galucho, has bidden on 24 February for the distribution of windpowered electricity in Portugal, pursuant to a call made by the Portuguese government in 2005. ...

On 7 March 2006, the following Relevant Event was notified to the National Stock Market Commission:

Unicaja notifies that it has increased its shareholding in Iberdrola to 1.5% of share capital.

On 10 March 2006, the following notification was made to the National Stock Market Commission:

"Following the Notification made on 1st February this year, we are glad to announce that Iberdrola will deliver shares in the Company to its employees during next week, as part of their variable retribution." ...

On 30 March 2006, the following Relevant Event was notified to the National Stock Market Commission:

"We are glad to announce that the General Meeting of Shareholders held today has approved, with the favourable vote representing more than two thirds of the share capital present and represented at the meeting, each and all the resolutions set out in the Agenda which was communicated to you on 22nd February this year, documentation pertaining to which - in addition to being made available to shareholders - was provided to you on 23rd February." ...

B) EVOLUTION OF BUSINESS

(Although brief in nature, given the summarised nature of this quarterly information, the comments included in this section must allow investors to form a sufficiently clear opinion on the activities carried on by the company and the profits or losses obtained during the period covered by this quarterly information, as well as on its financial and net asset situation and other essential information on the general progress of company affairs). Lastly, comments on the consolidated and individual financial statements must be clearly distinguishable).

- SEE ANNEX

C) BASES FOR PRESENTATION AND VALUATION RULES

(In preparing the financial and accounting information included in this periodical public announcement, the same principles, valuation bases and accounting criteria must be used as those contemplated in current regulations governing the presentation of financial and accounting information incorporated in the annual accounts and financial statements applicable to the annual period to which the public information is made available. If, exceptionally, generally accepted accounting principles and criteria required by relevant applicable regulations have not been applied to the attached information, this fact must be duly indicated and justified, and explanation given of the influence of their non-application on the net asset situation, financial situation and profits or losses of the company or group. In addition and with a similar purpose as mentioned above, any modifications which, as the case may be, may be made in the accounting criteria employed in preparing the attached information in relation to the previous year's audited accounts, must be mentioned and commented upon. If the same principles, criteria and accounting policies as used in the prior annual accounts have been applied, and if those comply with the provisions of current accounting regulations as applicable to the company, the fact should be expressly indicated. When any adjustments or reclassifications in the previous year have been made, in accordance with applicable regulations, due to changes in accounting policies, corrections of any mistakes or changes in the classification of accounts, quantitative and qualitative data that is required to understand such adjustments or reclassifications must be included in this section).

REGULATIONS IN FORCE

The financial and accounting information included in this period public information has been prepared, as regards the consolidated data, according to the International Financial Reporting Standards (IFRS), being those adopted by the European Commission in accordance with the procedure established by Regulation (CE) 1606/2002 of the European Parliament and Council of 19 July 2002.

This applies to both the quarterly information provided about the current period and the comparative data in relation to the previous period.

CHANGES IN ACCOUNTING CRITERIA

On 28 February 2006, Royal Decree-Law 3/2006 of 24 February was published in the Official Journal (BOE), modifying the means for matching offers for sale and purchase of energy presented simultaneously on the daily and interdaily electricity production market by actors in the electricity sector belonging to the same corporate group.

This Royal Decree Law is subject to further implementation and, so long as its real effect is not known, the main implications taken into account in this period public information are:

- Cancellation of the emission rights that are issued for free. In the quarterly information:

§ The emission rights are accounted for in the intangible assets.

§ An account payable in relation to the assigned emission rights is established, credited with an amount corresponding to the market value of the emission rights on assignation.

§ The counterpart of the provision made in relation to consuming emission rights will be the profit and loss account, in the item "Supplies".

- The provisional price considered by the National Energy Commission as regards payment for regulated activities will be the average cost set out in the 2006 tariff for energy generated under the ordinary regime for the peninsular, including costs of adjustment services and power guarantee that amounts to 42.35 €/MWh.

Except as mentioned above, the same accounting principles, criteria and policies have been applied in the quarterly results as in the last annual financial statements.

D) PROFITS DISTRIBUTED DURING THE PERIOD

(Dividends actually paid since the beginning of the financial year should be mentioned)

		% of nominal value	Euros per share (x,xx)	Amount (thousands euros)
1. Ordinary Shares	3100	29.5	0.89	797,871
2. Preference Shares	3110			
3. Redeemable Shares	3115			
4. Shares without votes	3120			

Additional information on the distribution of dividends (on account, additional, etc.)

- On 2 January 2006, an advance dividend for 2005 of 0.36700 euros per share was paid.
- On 3 July 2006, the remaining amount of dividend for 2005 of 0.51810171 euros per share was paid.

E) SIGNIFICANT EVENTS (*)

1. Acquisitions or disposals of shares in listed companies giving rise to the disclosure requirement contemplated in Art. 53 of the Spanish Stock Exchange Law (5% and multiples).
 2. Acquisitions of own shares giving rise to the disclosure requirement contemplated in the 1st additional disposition of the Spanish Public Limited Companies Act (1%)
 3. Other significant increases or reductions of fixed assets (stakes of over 10% in non listed companies, relevant tangible investments or disinvestments, etc).
 4. Increases and reductions in share capital or the values of shares
 5. Issues, redemptions or cancellations of debt
 6. Changes of Directors or the Board of Directors
 7. Modifications to the Articles of Association
 8. Conversions, mergers or demergers
 9. Changes in the institutional regulation of the sector that significantly affect the economic and financial situation of the Company or Group.
 10. Suits, actions or disputes which might materially affect the net asset situation of the Company or Group
 11. Situations involving insolvency, suspension of payments, etc.
 12. Special agreements limiting, assigning or totally or partially waiving the political and economic rights of shares in the company.
 13. Strategic agreements with national or international groups (exchanges of blocks of shares, etc.).
 14. Other significant events

F) ANNEX EXPLAINING SIGNIFICANT EVENTS
- SEE ANNEX

INSTRUCTIONS FOR FILLING IN THE QUARTERLY REPORT OF RESULTS (GENERAL)

- Numeric data, except if otherwise mentioned, should be in thousands of euros, with no decimal points, and rounding up or down the totals.

- Negative amounts should be mentioned with a minus (-) sign before the relevant number.

- For each number, except if mentioned otherwise, the corresponding number of the previous period should be included.

- International Financial Reporting Standards (IFRS) are those adopted by the European Commission in accordance with the procedure set out in Regulation CE 1606/2002 of the European Parliament and Council, of 19 July 2002.

- Financial information set out in this report must be filled in accordance with regulations and recognised accounting and evaluation principles that are applicable to the entity for preparing the financial statements for the annual period to which the Periodic Public Information refers.

Until financial years starting 11 January 2007, and except for credit entities, companies that are obliged under the Commercial Code to draw up consolidated annual accounts and who at the end of financial period have issued listed fixed rate debentures and who have opted to continue applying the standards set out in Section 3, Title III of the first book of the Commercial Code and implementing regulations, provided they have not applied the "adopted IFRS", must present consolidated public periodic information in section A under "Consolidated per national rules".

- DEFINITIONS:

(1) Net turnover: this will include all sales of products and the provision of all services corresponding to the normal activities of the company, deducting any rebates and other reductions made on sales, as well as VAT and other taxes directly related to the aforementioned turnover. For consolidated numbers presented according to adopted IFRS, the information to be included in this section must be pursuant to these standards.

(2) Profit before tax on continuing operations: Issuers who present periodic financial information in accordance with adopted IFRS, will include in this item profits or losses before tax on continuing activities.

(3) Profit of the financial year on continuing activities: this item will only be completed by issuers who present periodic financial information in accordance with adopted IFRS, and will show the profits or losses after tax on continuing activities.

(4) Profits/Losses: Issuers who present periodic financial information in accordance with adopted IFRS will show in this line the profits or losses after tax on continuing activities, increased or decreased by results after taxes on discontinued activities.

ANNEX EXPLAINING SIGNIFICANT EVENTS

E - 1. Acquisitions or disposals of shares in listed companies giving rise to the disclose requirement contemplated in Art. 53 of the Spanish Stock Exchange Law (5% and multiples).

Acquisition by IBERDROLA PARTICIPAÇÕES SGPS, S.A. (100% held by IBERDROLA PORTUGAL ELECTRICIDAD E GAS, S.A., in turn 100% held by IBERDROLA, S.A.), of 3.8% of the shares of ENERGIAS DE PORTUGAL, S.A. (EDP). Following this operation the indirect interest of IBERDROLA, S.A. in that company is 9.5%.

Acquisition by IBERDROLA, S.A. of 11% of the shares of GAMESA S.A. (50 % held by IBERDROLA S.A. and CORPORACIÓN IBV). Following this operation the direct and indirect interest of IBERDROLA, S.A. in that company is 24.39%.

E - 3. Other significant increases or reductions of fixed assets (stakes of over 10% in non listed companies, relevant tangible investments or disinvestments, etc).

Increase in share capital of NEOTEC CAPITAL RIESGO SOCIEDAD DE FONDOS, S.A., S.C.R., in which IBERDROLA maintains a direct interest of 7.93%.

Ancillary investment in IBERDROLA PORTUGAL ELECTRICIDAD E GAS, S.A. (100% held by IBERDROLA, S.A.). Following this operation the indirect interest of IBERDROLA, S.A. in that company remains unchanged.

Increase in share capital of IBERDROLA DISTRIBUCIÓN DE GAS, SAU, by IBERDROLA, S.A. Following this operation the direct interest of IBERDROLA, S.A. in that company remains unchanged. (pending registration at the Commercial Registry).

Sale by IBERDROLA, S.A. of 100% of its stake in MEDIA PARK, S.A. to IBERDROLA INMOBILIARIA, S.A., (100%-owned by IBERDROLA, S.A.), consequently IBERDROLA S.A.'s interest in that company remains unchanged.

Purchase by VINZEO TECHNOLOGIES, S.A. (50%-owned by CORPORACION IBV, PARTICIPACIONES EMPRESARIALES, S.A., in turn 50%-owned by IBERDROLA, S.A.) of 100% of the company named ARC, giving IBERDROLA, S.A. a 50% indirect interest in that company.

Sale by IBERDROLA INMOBILIARIA, S.A. (100%-owned by IBERDROLA, S.A.) of 30% of FIUNA, S.A., leaving IBERDROLA an indirect interest of 70% in that company.

Increase of share capital of MEDIA APPLICATIONS, S.A. (50% held by MEDIA PARK, S.A. and IBERDROLA, S.A. respectively), by capitalisation of debt. After this operation, MEDIA PARK, S.A. holds 71.38% and IBERDROLA, S.A. holds 28.62% of the shares in the company, bringing IBERDROLA's direct interest in that company to 100%.

Purchase by IBERNOVA PROMOCIONES (100%-owned by IBERDROLA ENERGIA RENOVABLES, II, in turn 100%-owned by IBERDROLA, S.A.) of 100% of the capital of NATURENER, S.A., and change of corporate name to PARQUES EÓLICOS REUNIDOS, SAU, giving IBERDROLA an indirect interest of 100% in that company.

Increase in share capital of the German company IBERDROLA REGENERATIVE ENERGIEN GmbH (100%-owned by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.). Following this operation the indirect interest of IBERDROLA, S.A. in that company remains unchanged.

Incorporation by IBERDROLA ENERGÍA RENOVABLES II, S.A. (100%-owned by IBERDROLA, S.A.) of the US company IBERDROLA RENEWABLE ENERGIES USA LIMITED, giving IBERDROLA an indirect interest of 100% in that company.

Additional funding provided AEOLIA PRODUÇÃO DE ENERGIA (100%-owned by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.). Following this operation the indirect interest of IBERDROLA, S.A. in that company remains unchanged.

Incorporation by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A.U. (100% owned by IBERDROLA, S.A.) of the Polish company IBERDROLA ENGINEERING AND CONSTRUCTION POLAND SP. Z.O.O., giving IBERDROLA an indirect interest of 100% in that company.

Incorporation by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A. (100% owned by IBERDROLA, S.A.) of the English company IBERDROLA ENGINEERING AND CONSTRUCTION UK LTS., giving IBERDROLA an indirect interest of 100% in that company.

Incorporation by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A. (100% owned by IBERDROLA, S.A.) of the Russian company IBERDROLA INZHINIRING I STROITEISTVO LIMITED LIABILITY COMPANY, giving IBERDROLA an indirect interest of 100% in that company.

Acquisition by IBERDROLA S.A. of 10% of REFINERIA BALBOA, S.A., in which IBERDROLA maintains a direct interest of 10%.

Increase in share capital of REINO DE DON QUIJOTE, S.A. (3.60%-owned by IBERDROLA INMOBILIARIA, S.A., in turn 100%-owned by IBERDROLA, S.A.), so that IBERDROLA S.A. has an indirect interest of 3.86%.

Incorporation by IBERDROLA INMOBILIARIA (100%-owned by IBERDROLA, S.A.) of IBERD-ROS, S.L., such that IBERDROLA has an indirect interest of 50% in that company.

Winding up of TELEMATICS, S.A., MEDIA PARK HANNOVER 2000, S.L. Y MOTOR CHANNEL, S.A. (held by MEDIA PARK, 100% owned by IBERDROLA INMOBILIARIA, S.A., 100% owned in turn by IBERDROLA, S.A.), such that the indirect participation of IBERDROLA, S.A. in these companies is cancelled.

Incorporation by IBERENOVA PROMOCIONES, S.A. (100%-owned by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.), of GLOBAL SOLAR ENERGY, S.A., giving IBERDROLA an indirect interest of 90% in that company.

Acquisition by IBERDROLA RENEWABLE ENERGIES OF UK LIMITED (100% owned by IBERDROLA ENERGÍA RENOVABLES II, S.A., in turn 100%-owned by IBERDROLA, S.A.) of the HIGHER DARRACOTT MOOR WIND FARM LIMITED, giving IBERDROLA an indirect interest of 100% in that company .

Increase in share capital in IBERDROLA RENEWABLE ENERGIES USA, LIMITED (100%-owned by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.), consequently IBERDROLA's indirect interest in that company remains unchanged.

Acquisition by BERDROLA RENEWABLE ENERGIES USA LIMITED (100% owned by IBERDROLA ENERGÍA RENOVABLES II, S.A., in turn 100%-owned by IBERDROLA, S.A.) of the COMMUNITY ENERGY INC, giving IBERDROLA an indirect interest of 100% in that company .

Incorporation by IBERENOVA PROMOCIONES, S.A. and IBERDROLA ENERGIAS RENOVABLES II (100%-owned by IBERDROLA, S.A.), of ELECTRA DE MALVANA S.A., with a shareholding of 0.001% and 44.999% respectively, giving IBERDROLA an indirect interest of 45% in that company.

Incorporation by IBERENOVA PROMOCIONES, S.A. and IBERDROLA ENERGIAS RENOVABLES II (100%-owned by IBERDROLA, S.A.), of ELECTRA DE SIERRA DE SAN PEDRO, S.A., with a shareholding of 0.001% and 79.999% respectively, giving IBERDROLA an indirect interest of 80% in that company.

Incorporation by IBERENOVA PROMOCIONES, S.A. and IBERDROLA ENERGIAS RENOVABLES II (100%-owned by IBERDROLA, S.A.) of ELECTRA DE MONTANCHEZ, S.A, with a shareholding of 0.001% and 39.999% respectively, giving IBERDROLA an indirect interest of 40% in that company.

Incorporation by IBERENOVA PROMOCIONES, S.A. and IBERDROLA ENERGIAS RENOVABLES II (100%-owned by IBERDROLA, S.A.), of

SISTEMAS ENERGETICOS LOS CAMPILLOS, S.A., with a shareholding of 50% each, giving IBERDROLA an indirect interest of 100% in that company.

Increase in share capital in ENERGIA DE CASTILLA Y LEON (ENCALSA) (90%-owned by BIOVENT HOLDING, 85% held by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.), such that IBERDROLA's indirect interest in that company remains unchanged.

Incorporation by ENERGIA DE CASTILLA Y LEON (ENCALSA) (90%-owned by BIOVENT HOLDING, 85% held by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.), of ECOBARCIAL, S.A., with a shareholding of 51%. Following this operation the direct and indirect interest of IBERDROLA, S.A. in that company is 39.02%.

Acquisition by IBERDROLA REGENERATIVE ENERGIEN, GMBH (100% held by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.), of 100% of the German company DELTUS, so that the indirect interest of IBERDROLA S.A. in that company is 100%.

Increase in share capital in IBERDROLA ENERGIA RENOVABLES DE LA RIOJA, S.A. (100% held by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.), with new partners who contribute their shareholdings in EOLICAS DE LA RIOJA. As a consequence of this operation IBERDROLA ENERGIAS RENOVABLES II, S.A. has 63.5% of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA and this company holds 100% of EOLICAS DE LA RIOJA, accordingly the indirect interest of IBERDROLA S.A. in this company is 63.5%.

Increase in share capital in IBERDROLA ENERGIA RENOVABLES DE LA RIOJA, S.A. (100% held by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.), with new partners who contribute their shareholdings in DESARROLLOS ENERGIA RENOVABLES DE LA RIOJA (DERSA). As a consequence of this operation IBERDROLA ENERGIAS RENOVABLES II, S.A. has 63.5% of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA and this company holds 63.75% of DESARROLLOS ENERGIA RENOVABLES DE LA RIOJA (DERSA), accordingly the indirect interest of IBERDROLA S.A. in this company is 40.48%.

Increase in share capital in IBERDROLA ENERGIA RENOVABLES DE LA RIOJA, S.A. (100% held by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.), with new partners who contribute their shareholdings in MOLINOS DE CIDACOS. As a consequence of this operation IBERDROLA ENERGIAS RENOVABLES II, S.A. has 63.5% of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA and this company holds 50% of MOLINOS DE CIDACOS, accordingly the indirect interest of IBERDROLA S.A. in this company is 31.75%.

Increase in share capital in IBERDROLA ENERGIA RENOVABLES DE LA RIOJA, S.A. (100% held by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.), with new partners who contribute their

shareholdings in MOLINOS DE LA RIOJA. As a consequence of this operation IBERDROLA ENERGIAS RENOVABLES II, S.A. has 63.5% of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA and this company holds 66.66% of MOLINOS DE LA RIOJA, accordingly the indirect interest of IBERDROLA S.A. in this company is 42.33%.

Incorporation through NEOENERGIA, S.A. (39%-owned by IBERDROLA ENERGIA, S.A., in turn 100%-owned by IBERDROLA, S.A.) of the company named BAGUARI-UHE, giving IBERDROLA, S.A. an indirect interest of 39% in that company.

Incorporation through NEOENERGIA, S.A. (39%-owned by IBERDROLA ENERGIA, S.A., in turn 100%-owned by IBERDROLA, S.A.) of the company named GOIAS SUL PCH, giving IBERDROLA, S.A. an indirect interest of 39% in that company.

Increase in share capital of TERMOAÇU, held by NEOENERGIA, S.A. (39%-owned by IBERDROLA ENERGIA, S.A., in turn 100%-owned by IBERDROLA, S.A.). As NEOENERGIA S.A. did not participate in the capital increase, its shareholding in TERMOAÇA fell from 60.52% to 37.57%, leaving IBERDROLA an indirect interest of 14.65% in that company.

Incorporation by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A. (100% owned by IBERDROLA, S.A.) of the Venezuelan company IBERDROLA INGENIERIA Y CONSTRUCCIÓN VENEZUELA, S.A., giving IBERDROLA an indirect interest of 98% in that company.

Incorporation by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A. (100% owned by IBERDROLA, S.A.) of the Greek company IBERINCO HELLAS TECHNIKI KAI KATASKEVASTIKI EPE., giving IBERDROLA an indirect interest of 100% in that company.

Incorporation by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A. (100% owned by IBERDROLA, S.A.) of the US company IBERINCO ENGINEERING AND CONSTRUCCION, US, INC., giving IBERDROLA an indirect interest of 100% in that company.

Additional funding by IBERDROLA S.A. in IBERDROLA PORTUGAL ELECTRICIDAD E GAS, S.A. Following this operation the direct interest of IBERDROLA, S.A. in that company remains unchanged.

Increase in share capital of SOCIEDAD PARA EL DESARROLLO INDUSTRIAL DE CASTILLA Y LEÓN, SCR., S.A. Following this operation the direct interest of IBERDROLA, S.A. in that company remains unchanged.

Return of the additional funding by IBERDROLA PORTUGAL ELECTRICIDAD E GAS, S.A. to IBERDROLA, S.A. Following this operation the direct interest of IBERDROLA, S.A. in that company remains unchanged.

Return of the additional funding by IBERDROLA PARTICIPAÇÕES SGPS, S.A. to IBERDROLA PORTUGAL ELECTRICIDAD E GAS, S.A. Following this operation the indirect interest of IBERDROLA, S.A. in that company remains unchanged.

Sale by IBERDROLA S.A. of 15.84% of IBERDROLA CONSULTORIA E SERVIÇOS DO BRASIL, LTDA to IBERDROLA INGENIERA Y CONSTRUCCIÓN, S.A. (100% owned by IBERDROLA, S.A.). Following this operation the indirect interest of IBERDROLA, S.A. in that company remains unchanged.

Sale of 100% in AZERTIA TECNOLOGIAS DE LA INFORMACIÓN, S.A. (100% owned by CORPORACIÓN IBV, in turn 50% held by IBERDROLA, S.A.). After this operation, the indirect participation of IBERDROLA, S.A. in this company is cancelled.

Sale of MEDIA APPLICATIONS and MEDIA STB (100%-owned by MEDIA PARK, 100% owned by IBERDROLA INMOBILIARIA, S.A., in turn 100%-owned by IBERDROLA, S.A.), so that the indirect participation of IBERDROLA, S.A. in these companies is cancelled.

Increase in share capital of HIDROLA I, SLU, 100% owned by IBERDROLA S.A., so that the direct interest of IBERDROLA, S.A. in that company remains unchanged.

Increase in share capital of HIDROELECTRICA ESPAÑOLA, SLU, 100% owned by IBERDROLA S.A., such that the direct interest of IBERDROLA, S.A. in that company remains unchanged.

Increase in share capital of BILBAO BIZKAIA GAS, S.L., (25% owned by IBERDROLA S.A.). Following this operation the direct interest of IBERDROLA, S.A. in that company remains unchanged.

Acquisition by IBERDROLA S.A. of 0.38% of DISTRIBUIDORA ELECTRICA DE ELORRIO (DISELEC), such that IBERDROLA has a direct interest of 96.82%.

Acquisition by IBERDROLA S.A. of 100% of EMPRESA ELECTRICA DEL CABRIEL, such that IBERDROLA has a direct interest of 100%.

Reduction in share capital of ENERGYWORKS VENEZUELA (100%-owned by IBERDROLA GENERACIÓN, in turn 100%-owned by IBERDROLA, S.A.), such that the interest of IBERDROLA S.A. in that company remains unchanged.

Increase in share capital in IBERDROLA RENEWABLE ENERGIES USA, LIMITED (100%-owned by IBERDROLA ENERGÍA RENOVABLES II, in turn 100%-owned by IBERDROLA, S.A.), such that IBERDROLA's indirect interest in that company remains unchanged.

Acquisition, by IBERDROLA ENERGÍA RENOVABLES SAU, (100%-owned by IBERDROLA, S.A.), of 80% of the Estonian company OUSAÜHING RAISNER, giving IBERDROLA, S.A. an indirect interest of 80% in that company.

Acquisition, by IBERDROLA ENERGÍA RENOVABLES SAU (100%-owned by IBERDROLA, S.A.) of 100% of the Hungarian company EC ENERGOCONSULT MERNÖKSZOLGALATI, giving IBERDROLA, S.A. an indirect interest of 100% in that company.

Incorporation by IBERDROLA ENERGÍA RENOVABLES SAU, (100%-owned by IBERDROLA, S.A.), of ENERGIAS MARINAS DE CANTABRIA S.A., with a shareholding of 60%. Following this operation the indirect interest of IBERDROLA, S.A. in that company is 60%.

Acquisition by IBERDROLA ENERGÍA RENOVABLES SAS (100%-owned by IBERDROLA ENERGIAS RENOVABLES, SAU, in turn 100% held by IBERDROLA S.A.) of 100% of the French company PERFECT WIND, giving IBERDROLA, S.A. an indirect interest of 100% in that company.

Acquisition by PERFECT WIND (100%-owned by IBERDROLA ENERGIAS RENOVABLES, SAS, in turn 100% held by IBERDROLA ENERGIAS RENOVABLES, SAU, in turn 100% held by IBERDROLA S.A.) of 100% of the French company FERME EOLIEN DE BUCHFELDM SARL, giving IBERDROLA, S.A. an indirect interest of 100% in that company.

Acquisition by IBERDROLA ENERGÍA RENOVABLES SAS (100%-owned by IBERDROLA ENERGIAS RENOVABLES, SAU, in turn 100% held by IBERDROLA S.A.) of 100% of the French company PARC EOLIEN LA NOURAI, giving IBERDROLA, S.A. an indirect interest of 100% in that company.

Acquisition by IBERDROLA REGENERATIVE ENERGIEN, GMBH (100% held by IBERDROLA ENERGÍA RENOVABLES SAU, in turn 100%-owned by IBERDROLA, S.A.) of 100% of the German company WINDFARM WIRFUS GmbH, so that the indirect interest of IBERDROLA S.A. in that company is 100%.

Acquisition by IBERDROLA REGENERATIVE ENERGIEN, GMBH (100% held by IBERDROLA ENERGÍA RENOVABLES SAU, in turn 100%-owned by IBERDROLA, S.A.) of 100% of the German company EBV WINDPARK 23, GmbH, so that the indirect interest of IBERDROLA S.A. in that company is 100%.

Acquisition by IBERDROLA REGENERATIVE ENERGIEN, GMBH (100% held by IBERDROLA ENERGÍA RENOVABLES SAU, in turn 100%-owned by IBERDROLA, S.A.) of 100% of the German company RASTENBERG, GmbH, so that the indirect interest of IBERDROLA S.A. in that company is 100%.

Acquisition, by PERFECT WIND (100%-owned by IBERDROLA ENERGIAS RENOVABLES, SAS, in turn 100% held by IBERDROLA ENERGIAS RENOVABLES, SAU, in turn 100% held by IBERDROLA S.A.) of 100% of the

French company PARC EOLIEN DE LANEUVILLE AU RUPT, giving IBERDROLA, S.A. an indirect interest of 100% in that company.

Acquisition by IBERDROLA ENERGIA ÖDNEWIANA (100% held by IBERDROLA ENERGÍA RENOVABLES SAU, in turn 100%-owned by IBERDROLA, S.A.) of 100% of the Polish company ENERGIA WIATROWA KARSCINO S.p. Z.O.O.EWK, so that the indirect interest of IBERDROLA S.A. in that company is 100%.

Increase in share capital in ENERBRASIL (100%-owned by IBERDROLA ENERGÍA RENOVABLES SAU, in turn 100%-owned by IBERDROLA, S.A.), such that IBERDROLA's indirect interest in that company remains unchanged.

Acquisition, through EME DÓLAR UNO, EME HUENEJA TRES, EME DÓLAR TRES Y EME FERREIRA DOS, each with a shareholding of 10.45% (each company being 100% held by IBERDROLA ENERGIAS RENOVABLES DE ANDALUCIA, SAU, in turn 100% held by IBERDROLA ENERGIAS RENOVABLES, SAU, in turn 100% held by IBERDROLA, S.A.), of 41.80% of SISTEMA ELÉCTRICO DE CONEXIÓN HUENÉJA, S.L., such that IBERDROLA'S interest in this company is 41.80%.

Incorporation, through EMPRESA ELECTRICA DE GUATEMALA Y CREDIEGSA (80,88%-owned by DECA II, with is 49.01% owned by IBERDROLA ENERGIA S.A., in turn 100% held by IBERDROLA S.A.), of 39,64% of the real estate company INMOBILIARIA DESARROLLADORA EMPRESARIAL DE AMERICA, S.A. (IDEA), giving IBERDROLA, S.A. an indirect interest of 39.64% in that company.

Capital buy-back in DECA II (49.01%-owned by IBERDROLA ENERGÍA S.A., in turn 100%-owned by IBERDROLA, S.A.), such that IBERDROLA's indirect interest in that company remains unchanged.

Incorporation by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A. (100% owned by IBERDROLA, S.A.) of the Kenyan company IBERDROLA ENGINEERING AND CONSTRUCTION KENYA INTERNATIONAL, giving IBERDROLA an indirect interest of 100% in that company.

Acquisition by IBERDROLA INGENIERIA Y CONSTRUCCION, S.A. (100% owned by IBERDROLA, S.A.) of the German company BLITZ 2004 B415, GmbH, which changed its name to IBERDROLA ENGINEERING AND CONSTRUCTION GERMANY, GMBH, giving IBERDROLA an indirect interest of 100% in that company.

Acquisition by IBERDROLA INGENIERIA Y CONSTRUCCIÓN, S.A. (100% owned by of IBERDROLA S.A.) of 15.84% in IBERDROLA CONSULTORIA E SERVIÇOS DO BRASIL, LTDA, such that IBERDROLA's indirect interest in that company remains unchanged.

E - 6. Changes of Directors or the Board of Directors

One of the resolutions adopted at the General Meeting held on 30 March 2006 was the following:

RESOLUTIONS RELATING TO ITEM 10 (Item Ten on the Agenda)

- Ratification of Directors appointed by cooptation since the last General Meeting:
 - a) Ratification of the appointment as Director of Mr Xabier de Irala Estévez, agreed by the Board Meeting dated 20 April 2005.
 - b) Ratification of the appointment as Director of Mr Jesús María Matía, agreed by the Board Meeting dated 20 April 2005.

The General Meeting of Shareholders, on the proposal of the Board of Directors, adopted the following resolutions.

- a) To ratify, pursuant to s. 138 of the Consolidation of the Corporations Act and Art. 48.3 of the Articles of Association, the appointment by cooptation by the Board on 20 April 2005 of Mr Xabier de Irala Estévez as Director, which appointment was made by resolution stating literal as follows, which is fully ratified by the General Meeting:

“5º.- To appoint as member of the Board of Directors by cooptation, pursuant to s. 138 of the Consolidation of the Corporations Act and Art. 48.3 of the Articles of Association, on the proposal of the Board of BBK - shareholder of IBERDROLA, S.A. – and to reserve approval or ratification until the first subsequent General Meeting of Shareholders of Mr Xabier de Irala Estévez, who is a shareholder of the company, of full age, married, with Spanish nationality and whose business address for this purpose Calle Gran Vía nº 30, Bilbao, with National ID Nº 04.847.996-X to cover the vacancy in the Board left by Mr.

Santiago Mayner Oyarbide. The new Board Member will be classified as external director representing substantial shareholders, and will exercise his duties as such until 16 June 2006, the date corresponding to the end of the term of Mr. Santiago Mayner Oyarbide whom he substitutes.

The Board of Directors expressly noted that Mr. Xabier de Irala Estévez, attending the meeting, accepted the position as member of the Board of Directors of the Company, as well as his declaration of not being affected by any legal incompatibility for performing the corresponding duties.

The express formal acceptance of Mr Xabier de Irala Estévez of the terms of Article 17 of the Rules governing the Board of Directors relating to resignation and removal from the Board, as well as the obligation set out in Article 49 of the Articles of Association to deposit ten thousand (10,000) shares of the Company as a guarantee for any liability he may incur during the performance of his duties was noted, and the Secretary delivered to him a copy of the Articles of Association and Regulations that govern the Company.”

b) To ratify, pursuant to s. 138 of the Consolidation of the Corporations Act and Art. 48.3 of the Articles of Association, the appointment by cooptation by the Board on 20 April 2005 of Mr Jesús María Cadenato Matía as Director, which appointment was made by resolution stating literal as follows, which is fully ratified by the General Meeting:

“6°.- To appoint as member of the Board of Directors by cooptation, pursuant to s.138 of the Consolidation of the Corporations Act and Art. 48.3 of the Articles of Association, on the proposal of the Board of BBVA - shareholder of IBERDROLA, S.A. – and to reserve approval or ratification until the first subsequent General Meeting of Shareholders of Mr Jesús María Cadenato Matía, who is a shareholder of the company, of full age, married, with Spanish nationality and whose business address for this purpose is Paseo de la Castellana nº 81, Madrid, , with National ID Nº 14.917.785-P to cover the vacancy in the Board left by Mr. José Antonio Fernández Rivero. The new Board Member will be classified as external director representing substantial shareholders, and will exercise his duties as such until 16 June 2006, the date corresponding to the end of the term of Mr. José Antonio Fernández Rivero whom he substitutes.

The Board of Directors expressly noted that Mr. Jesús María Cadenato Matía, attending the meeting, accepted the position as member of the Board of Directors of the Company, as well as his declaration of not being affected by any legal incompatibility for performing the corresponding duties.

The express formal acceptance of Mr Jesús María Cadenato Matía of the terms of Article 17 of the Rules governing the Board of Directors relating to resignation and removal from the Board, as well as the obligation set out in Article 49 of the Articles of Incorporation to deposit ten thousand (10,000) shares of the Company as a guarantee for any liability he may incur during the performance of his duties was noted, and the Secretary delivered to him a copy of the Articles of Association and Regulations that govern the Company.”

- The Board of Directors, in meeting on 26 April 2006, adopted unanimously the following resolutions:

1 – To accept the resignation as Director, effective from the date of the meeting, presented by the following members: Mr. Iñigo De Oriol Ybarra, Mr. Jose Antonio Garrido Martinez, Mr. Javier Herrero Sorriqueta and Mr. Ignacio de Pinedo Cabezudo.

2 – To carry out the resolution adopted by the Board of Directors in meeting held on 20 April 2005, notified to the CNMV on the same date, registered under Entry No 2005 035264, pursuant to which Mr José Ignacio Sánchez Galán was named Chairman of the Board, substituting Mr Iñigo de Oriol Ybarra, remaining as Chief Executive Officer and resigning as Vice-Chairman, all of which he accepted.

3 – To carry out the resolution referred in paragraph 2 above pursuant to which it was agreed, when a vacancy arose, to name as member of the Board of Directors by cooption, subject to approval or ratification by the first subsequent General Meeting of Shareholders, of Mr. Iñigo de Oriol Ybarra, shareholder of the company, who will be classified as “Other external Director”, and who accepts the position.

4 - To carry out the resolution adopted by the Board of Directors in meeting held on 22 April 2005, notified to the CNMV on the same date, registered under Entry No 2005 066734, pursuant to which it was agreed that Mr Xabier de Irala Estévez, as Chairman of BBK, long term shareholder of IBERDROLA, would cover the first available vacancy on the Executive Committee of the Board of Directors. Accordingly, there being a vacancy on the Executive Committee of the Board of Directors due to the resignation of the members mentioned in paragraph 1 above, Mr Xabier de Irala Estévez is named member of the Executive Committee, accepting this position and resigning as member of the Auditing and Oversight Committee.

- The Board of Directors, in meeting on 24 May 2006, adopted unanimously the following resolutions:

1 – To accept the resignation as Director, effective from the date of the meeting, presented by the following members: Mr. César de la Mora Armada, Mr. Antonio Garay Morenés and Mr. Antonio M^a de Oriol y Diaz-Bustamante.

2- To name as Vice-Chairmen of the Company the Independent Directors Mr. Juan Luis Arregui Ciarsolo and Mr. Victor de Urrutia Vallejo.

3 – To name as members of the Audit and Compliance Committee the Independent Directors Mr. Julio de Miguel Aynat – who will be Secretary of the committee – and Mr. Sebastian Battaner Arias.

4 – To appoint Mr. Julian Martinez-Simancas Sanchez as Vice-Secretary of the Board of Directors of the Company.

- The Board of Directors, in meeting on 7 June 2006, adopted unanimously the following resolutions:

1 – To accept the resignation as Director and member of the Executive Committee, effective from the date of the meeting, presented by Mr. Jesús María Cadenato Matía, external director representing substantial shareholders.

2 - To appoint as members of the Board of Directors by cooptation, subject to approval or ratification at the first subsequent General Meeting of Shareholders, Mrs. Inés Macho Stadler, Mr. Braulio Medel Cámara and Mr. José Carlos Pla Royo, who, once the respective acceptances are recorded pursuant to any of the forms established by Article 142 of the Commercial Regulations, will be classified as "Independent Directors" for the first two, and "external director representing substantial shareholders" for the last, on proposal by BBVA, shareholder of Iberdrola, S.A. "

3 – To appoint Mr. José Carlos Pla Royo as member of the Executive Committee, classifying him, as has been noted as "external director representing substantial shareholders" once his acceptance has been recorded.

E -7 Modifications to the Articles of Association

One of the resolutions adopted at the General Meeting held on 30 March 2006 was the following:

RESOLUTIONS RELATED TO ITEM THREE (Item Three on the Agenda)

- Modification of certain articles of the Articles of Association and Regulations governing the General Meeting of Shareholders:
 - a) Modification of Article 19 of the Articles of Association and Article 8 of the Regulations of Shareholders Meetings, in order to adapt them to the provisions of the First Final Provision of Law 19/2005, of 14 November, on the European Corporations registered in Spain, as regards the extension of the term for publishing the notice of General Meeting and the right of shareholders to request the publication of an any additional notification including new items on the Agenda.
 - b) Modification of Article 22 of the Articles of Association and Article 10 of the Regulations of Shareholders Meetings in order to eliminate the requirement for a minimum number of shares in order to be able to assist a General Meeting of Shareholders.

The General Meeting of Shareholders, on the proposal of the Board of Directors, adopted the following resolutions.

- a) To approve the new text of Article 19 of the Articles of Association as well as that of Article 8 of the Regulations of the Shareholders Meetings, in order to adapt them to the provisions of the First Final Provision of Law 19/2005, of 14 November, in the following terms:

Articles of Association

“Article 19. Notice of General Meeting

1. *The General Meeting must be called formally by the Board of Directors by an announcement published in the Gazette of the Commercial Registry and in one of the newspapers with the largest circulation in Biscay, at least **one month** before the date fixed for the meeting, except if the law establishes otherwise, in which case the legal provisions shall apply.*
2. *The Board of Directors must call a General Meeting in the following cases:*
 - a) *In accordance with the provisions of Article 18 of the Articles of Association.*
 - b) *On written request by shareholders who hold or represent at least a shareholding as established by law, setting out in the request the items to be discussed. In this case, the Board of Directors will call the General Meeting to be held within thirty (30) days of the date on which it was requested by notarial deed to call such meeting. The Board of Directors will establish the Agenda for the meeting, which must include the items set out in the request.*
 - c) *When a public offer is made to purchase the shares issued by the Company, in order to inform the General Meeting about the public bid and to discuss and decide on such matters as may be put to their consideration. Any shareholder holding a right to vote representing at least one percent (1%) of the Share Capital will have the right to request matters to be included in the Agenda of the General Meeting that is called for this purpose.*
3. *The notice must contain all the items required by law for each case, and in all events will determine the date, place and time for the meeting on first calling and all the matters that must be considered. The notice may in addition set the date, if need be, for holding the General Meeting on second call.*

4. *Shareholders representing at least five per cent (5%) of the Share Capital may request a supplementary notice to be published in addition to the notice calling the General Meeting setting out one or more items for the Agenda. This right must be exercised by certified notification that must be received at the registered address of the Company within five (5) days of publication of the notice. The supplementary notice must be published at least fifteen (15) days before the date set for the General Meeting.*
5. *The General Meeting may not consider nor decide on any matter that is not included in the Agenda."*

Regulations of the General Meeting

"Article 8. Notice of General Meeting.

1. *In accordance with the terms of the Articles of Association, the General Meeting must be called formally by the Board of Directors by notice published in the Gazette of the Commercial Registry and in one of the newspapers with the largest circulation in Biscay, at least one month before the date fixed for the meeting, except if the law provides otherwise, in which case the legal provisions shall apply.*
2. *The Board of Directors must call a General Meeting in the following cases:*
 - a) *In accordance with the provisions of Article 6(2) above.*
 - b) *On written request by shareholders who hold or represent at least a shareholding as established by law, setting out in the request the items to be discussed. In this case, the Board of Directors will call the General Meeting to be held within thirty (30) days of the date on which it was requested by notarial deed to call such meeting. The Board of Directors will establish the Agenda for the meeting, which must include the items set out in the request.*
 - c) *When a public offer is made to purchase the shares issued by the Company, in order to inform the General Meeting about the public bid and to discuss and decide on such matters as may be put to their consideration. Any shareholder holding a right to vote representing at*

least one percent (1%) of the Share Capital will have the right to request matters to be included in the Agenda of the General Meeting that is called for this purpose.

- 3. The notice must contain all the items required by law for each case, and in all events will determine the date, place and time for the meeting on first calling and all the matters that must be considered. The notice may in addition set the date, if need be, for holding the General Meeting on second call.*
- 4. The Company will send a copy of the notice to the National Stock Exchange Commission. The text of the notice will also be accessible on the Company's web site.*
- 5. From the date of the notice, all information that is deemed fit to ensure the attendance and participation of shareholders at the Meeting will be published on the Company's website, including at least the following:*
 - a) The documents relating to the General Meeting required by Law, with information on the Agenda, the proposals that are made by the Board of Directors, as well as any relevant information that shareholders may need in order to vote.*
 - b) The means of communication between the Company and shareholders and, in particular, explanations of how to exercise the shareholder's right to be informed, indicating the postal and electronic addresses to which shareholders may request information.*
 - c) The means and procedures to appoint a proxy for the Meeting.*
 - d) The means and procedures for voting remotely, including as the case may be any forms to certify assistance and voting at the General Meeting via a telecommunication network.*
- 6. Shareholders representing at least five per cent (5%) of the Share Capital may request a supplementary notice to be published in addition to the notice calling the General Meeting setting out one or more items for the Agenda. This right must be exercised by certified notification that must be received at the registered address of the Company within five (5) days of publication*

of the notice. The supplementary notice must be published at least fifteen (15) days before the date set for the General Meeting.

7. *The Board of Directors may require a Notary to attend the General Meeting and prepare the minutes of the meeting. They must do so in those circumstances established by Law.”*

- b) To approve the new text of Article 22 of the Articles of Association and Article 10 of the Regulations of Shareholders Meetings in order to eliminate the requirement for a minimum number of shares in order to be able to assist a General Meeting of Shareholders, in the following terms:

Articles of Association

“Article 22. Right to attend

1. *Any person holding shares with voting rights may attend a General Meeting and take part in its deliberations with right to be heard and to vote.*

2. *To exercise the right of attendance, shareholders must have the shares registered in their name in the corresponding company books five (5) before the day the General Meeting is to be held. This shareholding shall be certified using an attendance card or certificate of legitimacy issued by the entity or entities responsible for the company books, or any other means admitted by laws in force.*

3. *The members of the Board of Directors must attend the General Meetings. The Directors, Technical staff and other persons who have an interest in the proper functioning of corporate matters may be authorised by the Board of Administration to attend the General Meeting. The non-attendance of either will not affect the validity of the General Meeting.*

4. *The Chairman may allow the press, financial analysts and any other person s/he considers fit to have access to the General Meeting, however the General Meeting may revoke this permission.*

Regulations of the General Meeting

“Article 10. Right to attend

1. *Any person holding shares with voting rights may attend a General Meeting and take part in its deliberations with right to be heard and to vote.*
2. *To exercise the right of attendance, shareholders must have the shares registered in their name in the corresponding company books five (5) before the day the General Meeting is to be held. This shareholding shall be certified using an attendance card or certificate of legitimacy issued by the entity or entities responsible for the company books, or any other means admitted by laws in force.*

E -8 Transformations, mergers or splits

Change in the corporate name of IBERDROLA ENERGIAS RENOVABLES II, SAU, which becomes IBERDROLA ENERGIAS RENOVABLES, SAU.

Merger by absorption, by IBERENOVA PROMOCIONES, S.A. (100%-owned by IBERDROLA ENERGÍA RENOVABLES SAU, in turn 100%-owned by IBERDROLA, S.A.), of its subsidiary PARQUES EÓLICOS REUNIDOS, effective as of 01-01-06.

E - 9 Changes in the institutional regulation of the sector that significantly affect the economic and financial situation of the Company or Group.

Up to the 30th September 2006, the following regulations were published, which may have a relevant effect on the activity of the electricity and gas sector:

ELECTRICITY SECTOR

- Royal Decree-Law 3/2006 of 24 February, modifying the means for matching offers for sale and purchase of energy presented simultaneously on the daily and interdaily electricity production market by actors in the electricity sector belonging to the same corporate group.
- Correction of errors in Royal Decree-Law 3/2006 of 24 February.

In this provision, the matching amounts of electrical energy offered and matched for these actors were assimilated to physical bilateral contracts, made prior to the program resulting from matching the daily market (before correcting the textual mistake, it read "before matching on the daily market"), so that these actors can only participate in the program resulting from the matching on the basis of the net position of the group to which they belong (before correction, the text indicated "they may only participate in the matching of the net position").

Only offers for sale under the ordinary regime and the purchase offers made by distributors will be taken into account for this. In relation to payment of the activities regulated by the CNE (National Energy Commission) during 2006, the provisional price to be considered for distributors of energy purchased on the basis of this assimilation mechanism was 42.35 €/MWh.

In addition, due to the internalisation of the value of greenhouse gas emission rights in price formation in the wholesale electricity market, this Royal Decree reduces the remuneration of the affected generating units by equivalent amounts. What's more, due to the high volume of tariff shortfalls generated to date in 2006 it is advisable to discount the value of the emission rights in order to determine the quantity of this deficit.

- Royal Decree-Law 4/2006 of 24 February, modifying the functions of the CNE (National Energy Commission).

This Royal Decree-law modifies the functions of the CNE establishing a new text for Additional Provision 11 of Law 34/1998 of 7 October on the Hydrocarbon Sector, which corrected a situation which was considered inadequate from two perspectives.

Thus, on the one hand it expanded the 14th function of the CNE as regards purchases that require its authorisation: "purchase of shareholding in companies with activities considered regulated or activities that are subject to administrative intervention that implies a special control" (nuclear and coal-fired power stations, activities in the electricity systems in the islands and outside the peninsular, gas storage activities using international gas pipelines that terminate or transit through the Spanish territory). This authorisation will also be required for direct purchases of assets required to carry out these activities.

On the other hand, in relation to any denial to grant this authorisation, a new cause is added to that of the existence of significant risks, being "protection of the general interest in the energy sector and, in particular, guaranteeing that the policy objectives of the sector are adequately followed, with special concerns relating to assets that are considered strategic".

- Order ITC/913/2006 of 30 March, approving the method for calculating the cost of each of the fuels used and the procedure for dispatching and payment of energy in the island and extra-peninsular electricity systems.

The content is summarised below with the following order.

- Order ITC/914/2006 of 30 March, establishing a method for calculating the retribution for the power guarantee for energy generation plants under the ordinary regime for island and extra-peninsular electricity systems.

Both these orders develop the terms of Royal Decree (RD) 1747/2003 regulating the extra-peninsular electricity systems. Being regulatory instruments, they do not modify the contents of this RD, so the characteristics regarding retribution and performance of activities and basic operation do not change, i.e.:

- Regulated payment of investment costs via the Power Guarantee
- Right to charge for the Power Guarantee from planned facilities.
- Dispatching on standard costs
- Intermediate payments of distributors and marketers at the peninsular market price
 - The CNE makes the final payment of the retribution regulated by the Ministerial Orders.

These Ministerial Orders permit the provisional 2001-2005 cycle to be closed, essentially based on book costs and establishes the basis for future retribution based on standards. This refers to electricity production, and does not cover transport and distribution.

The methodology for dispatching and payment allows the REE to start performing its functions under the RD and enables the energy that has been traded since publication of the RD to be paid for.

- Resolution of 17 March 2006, of the General Secretary for Energy, approving Operation Procedures 4.1 “Resolution of congestion on the France-Spain interconnection” and 3.1 “Programming Generation”, to adapt them to Order ITC/4112/2005 of 30 December.

This resolution approves procedure PO 4.1 which develops a process for resolving congestion on the France-Spain interconnection using a system of explicit coordinated auctions (Phase I) set out in Annex I of Order ITC/4112/2005 of 30 December, which establishes the regime for performing intra-community and international electricity exchanges.

In addition Red Electrica de España S.A. was authorised to participate in the explicit auction process for power supply on the France-Spain interconnection, to purchase the exchange capacity required to perform the contracts to supply energy from EDF to REE and from REE to EDF, referred to in Transitional Provision Nine of Law 54/1997.

The resolution also approves PO 3.1 to establish a process for daily scheduling electricity generation on the basis of matching offers for sale and purchase of energy resulting from the daily and interdaily markets and from the communication of performance of bilateral contracts with physical delivery, so that demand is covered and the safety of the system is guaranteed.

- Resolution of 16 February 2006 of the National Energy Commission establishing, pursuant to Article 34 of Addition Provision Three of Royal Decree 6/2006 of 23 June, the list of main and dominant operators in the energy sectors.

This Resolution also affects the gas sector, so it is not mentioned in the following section.

The list of main operators takes into account the structure of corporate groups that exist at the time the list is made up. The list is set out below, together with last year's list so as to show changes:

Main Operators in the Electricity Sector		
	2005	2006

1	Endesa Group	Endesa Group
2	Iberdrola Group	Iberdrola Group
3	Unión Fenosa Group	Unión Fenosa Group
4	Hidrocantábrico Group	Hidrocantábrico Group
5	Red Eléctrica Group	Viesgo Generación, S.L.

Main Operators in the Gas Hydrocarbon Sector		
	2005	2006

1	Repsol YPF-Gas Natural Group	Repsol YPF-Gas Natural Group
2	Enagas Group	Iberdrola Group
3	Hidrocantábrico-Naturcorp Group	BP España Group
4	Iberdrola Group	Hidrocantábrico-Naturgas Group
5	BP España Group	Endesa Group

- Royal Decree 470/2006 of 21 April, modifying the percentage on electricity tariffs destined to cover the nuclear moratorium.

The amount of this cost that is specifically attributed to the nuclear moratorium is set at 0.33 per cent of the electricity tariff.

- Royal Decree-law 7/2006 of 23 June, adopting emergency measures in the energy sector.

The measures for the electricity sector are:

- Elimination of the CTCs as they are currently considered inefficient and unnecessary. Their removal enables the contributions projected for this item to 2010 to go to benefit consumers. They are considered inefficient because they distort prices and were calculated on the basis of hypotheses that are currently obsolete. They are considered unnecessary as their degree of amortisation, as recently certified by the CNE, is very high.
- A system of incentives to consume local coal, pursuant to which the Government is authorised to approve, for security motives, a system of premiums up to 10€/MWh; this includes a mechanism for varying these premiums according to the evolution of market prices for the production of electricity.
- In line with the guidelines provided by the EU, energy performance through cogeneration is supported through a series of measures such as removing the need for self-consumption of electricity rewarding not only electricity excesses but all co-generated electricity, removing thereby the asymmetry that exists to date.
- Updating the system for premiums set out in the Law establishing the possibility that all plants be paid an additional amount as a premium over the market price.

- Removing the compensation band for renewable energies between 80 and 90% of the average reference tariff, as in certain cases it does not permit the compensation to be sufficient for the development of alternative technologies.
- Removing the limits imposed on the tariff calculation methodology to review the average or reference tariff (currently set at a maximum of 1.4% plus an additional 0.6% for variations).
- Unlinking the evolution of premiums and prices of plants in the special regime as regards the latest increase in average or reference electricity price set for July.
- In the aim of establishing a mechanism for enabling bilateral contracts as an alternative for certain consumer groups, the contract period resulting from virtual auctions – currently limited to a maximum of 12 months – is increased in the medium and long term.

The measure established for the gas sector is equality for operators as regards gas storage. In the aim of guaranteeing stability of supply, a provision guaranteeing this equality is introduced. In particular, the general purpose time-based criteria is substituted by a distribution system based on objective and transparent criteria, specifically the percentage of sales of the previous year. This provision will permit the use of capacity attribution mechanisms that are most appropriate for current needs in the system, enabling existing infrastructure to be optimised and avoiding situations of monopolisation.

- Royal Decree 777/2006 of 23 June, modifying Royal Decree 1866/2004 of 6 September, approving the National Plan for Assigning emission rights for 2005-2007.

The reform of the NPA is centred on modifying the table in point 3 of the Plan, setting out the attribution per industrial sector. Thus,

1. Emission rights and the categories of activities are adjusted according to the extension made in application of by Law 1/2005, as amended by Royal Decree Law 5/2005 of 11 March.
2. The reserve for new entrants is unified.
3. Sector attribution ceilings are increased, at the expense of the reserve, for those sectors which include installations for which judicial review has been conceded.

- Royal Decree 774/2006 of 23 June modifying the Regulation of Special Taxes approved by Royal Decree 1165/1995 of 7 July.

Law 22/2005 of 18 November, incorporating into the Spanish legal system several community directives relating to taxation of energy products and electricity, and the common tax regime applicable to mother and subsidiary companies in different Member States, and regulating the tax regime on transborder contributions to pension funds within the European Union, introducing modifications to Law 38/1992 of 28 December on Special Taxes, which require in turn the adaptation of the corresponding regulations set out

in the Regulation of Special Taxes, approved by Royal Decree 1165/1995 of 7 July.

- Royal Decree 809/2006 of 23 June revising the electricity tariff from 1 July 2006.

This Royal Decree establishes the average increase in the average or reference tariff for the sale of electricity, which as from 1 July 2006 is set at 1.38% over the price set on 1st January 2006, as well as how it applies to the current tariff structure, as a result of increasing the costs by the amount corresponding to the annuity for recovering on a lineal basis the annual net value over a period of 14 and a half years of the shortfall in income on payment of the regulated activities generated between 1 January 2005 and 31 December 2005, which amounts to 3,810,520 thousand Euros.

The average or reference tariff is set at 7.7644 €/kWh.

The tariff for the sale of electricity applied by distributors is increased on an average for all of them by 2.07% and the tariffs for access to the transport and distribution networks are maintained.

- Order ITC/2129/2006 of 30 June regulating term contracts for electricity for distributors during the second semester of 2006.

This Order aims to establish, for the transitory period of the second semester of 2006, the obligations of distributors regarding the purchase of electricity in the term market managed by OMIP-OMIClear.

Other provisions of less interest are as follows:

- Resolution of 8 February 2006, approving the regulations for registering, evaluating and informing on greenhouse gas emission rights

This resolution develops aspects relating to the accounting treatment of emission rights referred to in Law 1/2005 of 9 March, regulating the regime for trading greenhouse gas emission rights and it also considers itself as developing the current General Accounting Plan, approved by Royal Decree 1643/1990 of 20 December.

- Resolution of 7 April 2006 of the General Secretary for Energy, approving Operating Procedures 8.1 "Definition of networks operated and monitored by the System Operator" and 8.2 "Operation of the production and transport system".

This resolution approves two Operative Procedures. OP 8.1 defines the network which is operated under the responsibility of the SO, together with the installations of other networks whose structural and real time operating data must be known by the SO so as to guarantee the security and reliability of the system.

OP 8.2 establishes the basic criteria that govern the activities of the SO regarding the technical management of the production and transport system

for which it is responsible, setting out the obligations and actions of all the actors to whom this procedure applies.

- RESOLUTION of 28 April 2006 of the Secretariat General for Energy, approving a set of technical and instrumental procedures required for the adequate technical management of the island and extra-peninsular electricity systems.

- RESOLUTION of 11 May 2006 of the Secretariat General for Energy, modifying certain Rules of Operation of the electricity production market.

This resolution publishes the modifications made to the text of the Rules of Operation of the Electricity Production Market to include the content of Annex II of RD 1454/05 of 2 December, modifying certain provisions relating to the electricity sector, as well as the content of Instruction 1/2006 which describes the procedure for applying Article 4(3)(1) of Order ITC/4112/2005 which establishes the regime applicable for intracommunity and international exchanges of electricity.

- Resolution of 18 May 2006 of the General Secretary for Energy, modifying resolution of 17 March, approving Operation Procedures 4.1 "Resolution of congestion on the France-Spain interconnection" and 3.1 "Programming Generation", to adapt them to Order ITC/4112/2005 of 30 December.

Taking into account the agreement reached with the French Energy Regulation Commission (CRE) in relation to the Rules for Assigning Capacity for the France-Spain Interconnection (IFE Rules), which implement from 1 June a coordinated system of explicit annual, monthly, daily and interdaily auctions, this Resolution modifies that of 17 March so as to carry out the coordinated auctions for June.

- RESOLUTION of 24 May 2006 of the Secretariat General for Energy, approving the Rules of Operation of the daily and interdaily electricity production market.

This Resolution includes in one single text the Rules which establish improvements and reduce complexity in the system, which have been subject to a series of modifications to which they have been progressively submitted previously.

- Resolution of 7 April 2006 of the CNE, modifying Resolution of 26 February 2004, establishing the implementation of the procedure for self-assessment and payment and the conditions for paying the fees set out in parts two and three of additional provision 12.2, of Law 34/1998 of 7 October, on the electricity and gaseous hydrocarbons sector.

- Order ITC/1652/2006 of 20 April, declaring the definitive end of operations of the José Cabrera (Guadalajara) Nuclear Power Station and establishing the conditions for activities to be performed until decommissioning is authorised.

- Order EHA/1094/2006 of 6 April, developing special characteristics of official secondary markets of derivative financial instruments relating to energy.

In accordance with the Final Provision of Royal Decree 1814/1991 of 20 December, this Order aims to regulate the special characteristics that, as regards the general purpose rules for official secondary markets of financial futures and options, apply to the official secondary markets of futures and options relating to energy.

- Resolution of 28 April 2006 of the General Secretary for Energy, approving Operating Procedures 3.5 "Scheduling of maintenance of the distribution networks which affects the Electricity System".

This describes the information flows and processes required to present and authorise the plans for maintaining the distribution network when this may appreciably affect the operation of the system, so that they are compatible with the plans for maintaining the production units and the transport network.

GAS SECTOR

- Resolution of 13 March 2006, of the General Directorate for Energy Policy and Mining, establishing detailed protocols for the Rules governing the Technical Management of the Gas System.

This resolution publishes the following Detailed Protocols relating to technical management of the gas system:

- PD-01. Measurement
- PD-02. Procedures for distribution.
- PD-03. Demand forecasts.
- PD-04. Communication Mechanisms.
- PD-05. Procedure for determining the energy unloaded by methane ships.
- PD-06. Operating rules for unloading methane ships.

- Resolution of 29 March 2006, of the General Directorate for Energy Policy and Mining, publishing new maximum prices for the sale of gas for use as raw material.
- Resolution of 26 April 2006 of the General Directorate for Energy Policy and Mining, publishing new maximum prices for the sale of gas for use as raw material.
- Resolution of 29 May 2006 of the General Directorate for Energy Policy and Mining, publishing new maximum prices for the sale of gas for use as raw material.

- Royal Decree-law 7/2006 of 23 June, adopting emergency measures in the energy sector.

This provision has been commented on in the section on the electricity sector.

- Resolution of 26 June 2006 of the General Directorate for Energy Policy and Mining, publishing new maximum prices for the sale of gas for use as raw material.

- Royal Decree 919/2006 of 28 July, approving the technical rules regarding distribution and use of gaseous fuels and supplementary technical instructions ICG 01 to 11.

This provision establishes the technical conditions and guarantees that plants for distributing and using gaseous fuels and gas devices must comply with.

- Resolution of 25 July 2006, of the General Directorate for Energy Policy and Mining, regulating the conditions for assignation and the implementing procedure relating to the interruption of the gas system.

This Resolution develops Article 12 of Min. Order ITC/4100/2005 establishing the basic implementing conditions for interruptible tolls. It modifies section 10.6.1 of the NGTS. It came into force on 6 August 2006.

- Resolution of 27 July 2006 of the General Directorate for Energy Policy and Mining, publishing new maximum prices for the sale of gas for use as raw material.

- Resolution of 28 August 2006 of the General Directorate for Energy Policy and Mining, publishing new maximum prices for the sale of gas for use as raw material.

- Resolution of 27 September 2006 of the General Directorate for Energy Policy and Mining, publishing new maximum prices for the sale of gas for use as raw material.

- Order ITC/2348/2006 of 14 July establishing the rules for presenting accounting information by companies that carry out activities relating to natural gas and gases created by canalisation. This develops the obligation to present accounting information, including standard models. This establishes the obligation to ensure that no income transfers are made. Companies must name an interlocutor.

- Resolution of the General Directorate for Energy Policy and Mining determining which projects initiated in 2005 and 2006 have a right to specific payment: it approves the specific payment for distribution installation for 2005 and 2006.

- Resolution of 28 July 2006 of the General Secretary for Energy, modifying section 3.6.3 “Viability of ship unloading schedules” of the Technical Management Rules for the Gas System “NGTS-3”: It establishes a maximum limit for tank reserves of 8 days or 300 GWh as a monthly average. It came into force on 18 August 2006.

E - 14 other significant events

On 9 January 2006, the following Relevant Event was notified to the National Stock Market Commission:

“We are glad to notify you that IBERDROLA has bought from Naturener 100% of its subsidiary Naturener Eólica, which has 280 Megawatts (MW) of electricity power at an advanced stage of development in the autonomous communities of Castilla-La Mancha, Andalucía and Castilla y León.”...

On 9 January 2006, the following notification was made to the National Stock Market Commission:

The Company delivers a note relating to the position of Iberdrola Portugal in relation to EDP, Galp and the reorganisation of the Portuguese electricity sector.

On 18 January 2006, the following notification was made to the National Stock Market Commission:

On 7 March 2006, the following Relevant Event was notified to the National Stock Market Commission:

Unicaja notifies that it has increased its shareholding in Iberdrola to 1.5% of Share capital.

On 10 March 2006, the following notification was made to the National Stock Market Commission:

“Following the Notification made on 1st February this year, we are glad to announce that Iberdrola will deliver shares in the Company to its employees during next week, as part of their variable retribution.” ...

On 30 March 2006, the following Relevant Event was notified to the National Stock Market Commission:

“We are glad to announce that the General Meeting of Shareholders held today has approved, with the favourable vote representing more than two thirds of the share capital present and represented at the meeting, each and every resolutions set out in the Agenda which was communicated to you on 22nd February this year, documentation

pertaining to which - in addition to being made available to shareholders - was provided you on 23rd February." ...

On 5 April 2006, the following notification was made to the National Stock Market Commission:

La sociedad remite nota de prensa de la Conferencia sobre Energías Renovables celebrada en Toledo.

On 17 April 2006, the following notification was made to the National Stock Market Commission:

The Company publishes the evolution of the Energy Balance for the first semester of 2006

On 17 April 2006, the following notification was made to the National Stock Market Commission:

The Company provides information on the forthcoming presentation of results of the first quarter of 2006.

On 27 April 2006, the following Relevant Event was notified to the National Stock Market Commission:

The Company publishes information on the results for the first term of 2006.

On 27 April 2006, the following Relevant Event was notified to the National Stock Market Commission:

The Company announces that Iberdrola Portugal has increased its shareholding in EDP – Energias de Portugal, from 5.7% to 9.5%.

On 27 April 2006, the following Relevant Event was notified to the National Stock Market Commission:

The Company provides more information on the increase in shareholding in EDP-Energias de Portugal.

On 27 April 2006, the following notification was made to the National Stock Market Commission:

The Company publishes its presentation on the results for the first term of 2006.

On 2 May 2006, the following Relevant Event was notified to the National Stock Market Commission:

Iberdrola has entered the wind power generation market in the USA having signed a contract to purchase 100% of Community Energy Inc. (CEI), based in Wayne (Pennsylvania). In addition, Iberdrola has signed a framework agreement with the Municipality of Bayannaer, in North

China, to study locations where it may install wind power generators for at least 1.000 MW.

On 16 May 2006, the following notification was made to the National Stock Market Commission:

The Company publishes a press release on the selection of candidates for 500 positions for the Novas Energias Ibericas (NEI) Consortium in the Portuguese regions of Beira Interior and Valle del Sousa. The NEI Consortium is led by Iberdrola and Gamesa and includes the following Portuguese companies: Visabeira, Alberto Mesquita, MECI and Galucho.

On 1 June 2006, the following notification was made to the National Stock Market Commission:

We are pleased to announce that Iberdrola will offer its shareholders a dividend re-investment scheme pursuant to which shareholders who voluntarily subscribe to the scheme may re-invest their dividends in shares in the Company”...

On 28 June 2006, the following notification was made to the National Stock Market Commission:

The Company announces that on the 3rd July 2006 the Additional Dividend for 2005 will be paid, being 0.51810171 euros (gross) per share.

On 3 July 2006, the following notification was made to the National Stock Market Commission:

“Following the notice of Relevant Event made to the Commission on 1st June 2006 in relation to the Dividend Re-investment Scheme, we announce that the reinvestment price for each share under the scheme will be 25.77 euros”...

First
quarter results
2006
Quarterly report

**NET PROFIT UP 16.3%
TO 403.2 MILLION EUROS**

Investments in Wind Energy and International Business Driving Growth

Record in quarterly production (23,143 GWh; +8.2%), while CO₂ emissions in Spain reduce 12.5%

- The production of combined cycles and wind energy in Spain up to 2,253 GWh (+27.3%) surpassing for the first time the hydro production.
- In Spain, CO₂ emissions dropped by 12.5%, reaching 62% of production free of emissions.
- In Mexico and Brazil production increases 17.5% over Q1 2005.

Gross Operating Profit (EBITDA) grows 21.3% to reach 1,056.6 million euros

- Wind Energy and International, drivers of growth, represent 30.7% of total EBITDA vs. 22.1% in Q1 2005
 - The Wind Energy Business registers an EBITDA of 182.7 million euros.
 - The EBITDA of International Business reaches 142.1 million euros.

Strategic Plan

- The Strategic Plan 2007-2011 will be launched in Q4 2006.
- New goal for Wind Energies for 2011: 10,000 MW in operation, 25% of which pertains to international investment developments.

Corporate Governance

- Ignacio Galán, in execution of the resolution adopted a year ago by the Board of Directors, replaces Iñigo de Oriol as Chairman of IBERDROLA Group.
- The General Shareholders' Meeting held this past 30 March, approved an increase of 15.2% in the dividend charged to year 2005, reaching 0.885 euro per share.

Regulation

- ROYAL DECREE-LAW 3/2006, which amends the mechanism for matching offers in the wholesale market setting a provisional energy price of Eur 42.35 MWh. In addition, the value of CO₂ allowances allocated will be subtracted.

Highlights

- First quarter of 2006 was characterized by the contribution from new investments in combined cycles and wind energy, that enabled IBERDROLA to reach a record increase in production to 23,143 gwh (+8.2%). In Spain the growth reached 5.6%, reducing emissions by 12.5%. Other figures reached were the following:
 - Production increase 41.1% from combined cycle in Spain reaching 4,062 gwh, already representing 22.9% of the production and strengthening as the number two technology in terms of total production volume in Spain, behind nuclear energy.
 - Wind farm production grew 27.3% with a weight of 12.7% in the generation mix for the period, higher than that of hydroelectric energy, reaching 12.1%. Production under the Special Regimen as a whole, including the contribution from cogeneration plants, amounts to 14.8% in Spain.
 - Significant reduction in production from the energy sources that contaminate most, with a decline of 14.4% in production from coal and of 53.6% from fuel-oil.
- Net Operating Profit displayed a significant change both in gross terms (EBITDA +21.3%) as well as in net terms (EBIT +24.5%). The Wind Energy and International businesses, with strong growth in their activity, have been the engines of growth for the Group in the first quarter of 2006:
 - Wind Energy: The EBITDA has increased to 182.7 million euros through a 27.3% increase in production and an increase in Net Sales (+78.4%).
 - International: Growth of 47.3% in terms of the EBITDA, exceeding 142.1 million euros, thanks to the good development of the businesses in Mexico and Brazil. What stands out is the 17.5% increase in production, both from the addition of new capacity as well as from improvements in its availability in the generation business, and the 4.8% in distributed energy. On the other hand, the positive change in the exchange rate for the reference currencies in the period should be mentioned, positively affecting the evolution of business in the area.
- Net Profit reaches 403.2 million euros (+16.3%).
- With respect to Regulation, this past February 24, the Government approved Royal Decree-Law 3/2006 modifying the regimen for placement on the wholesale market and reconsideration of the value of emission rights. It is established in it that "with respect to the settlement of dealings regulated by the National Energy Commission, during the year 2006 the

provisional price to be considered for distributors for energy acquired through the assimilation mechanism described in Part 1 will be the average cost provided for in the 2006 price schedule for energy generated under the normal regimen for the territory on the peninsula, including the costs of the services of power guaranty and adjustment, corresponding to 42.35 €/mwh."

- With respect to aspects of Corporate Governance, it is pointed out that on 26 April Ignacio Galán, up to then Executive Vice President and Chief Executive Officer, in execution of the resolution adopted a year ago by the Board of Directors, replaces Iñigo de Oriol as Chairman of IBERDROLA Group.

Development of the Strategic Plan

1. INVESTMENTS IN GENERATION

During the first quarter of 2006 IBERDROLA put 104 MW of additional power on line in relation to what existed at December 2005, reaching 27,895 MW of total installed capacity. The new power put on line pertains entirely to new wind energy facilities. Spain represents 88.2% of the total installed capacity, with 24,606 MW, of which 4,000 MW pertain to combined cycles and 3,914 MW to wind energy and mini-hydroelectric.

In comparative annual terms, the installed capacity at the end of the first quarter of 2006 is 7.7% higher than what existed at the end of the first quarter of 2005. The following is a breakdown of the added amounts achieved in the last 12 months:

Additional capacity (MW)	MW	Facilities put on line in the last 12 months
Combined cycle	1,213	Aceca and Arcos III in Spain
Wind farms	653	New facilities in Spain, Europa and Latin America
Cogeneration	87	New operating facilities in Spain
Traditional generation	51	Recognized capacity increases
Total	2,004	

1.1 SPAIN

- Combined Cycle Plants:

Installed capacity

The total operating capacity of IBERDROLA in Combined Cycle Plants in Spain at the end of the first quarter of 2006 reached 4,000 MW corresponding to nine combined cycles. The load factor of the combined cycle plants in the period has been 53.75%, amounting to 64.59% during working days.

In comparative annual terms, the installed capacity at combined cycles in Spain ended in March 2006 42.9% higher than what it ended at March 2005, from putting the Aceca and Arcos III combined cycles on line.

- Wind Energy and Mini-hydro

Installed Capacity

At the end of the first quarter of 2006 IBERDROLA's installed capacity reached 3,914 MW (3,598 MW of wind energy and 316 MW of mini-hydro), which strengthens IBERDROLA as worldwide leader in this business. In the first quarter of 2006, 104 MW of additional wind energy capacity was brought on stream, 72.4 MW in Spain and 31.6 MW in International. In comparative annual terms the installed capacity at the end of March 2006 is 20% higher than what existed at the end of March 2005.

IBERDROLA envisions exceeding 10,000 MW in installed capacity in the year 2011 after hiking its previous targets, that consisted of reaching 6,200 MW in operating capacity in 2008,

1,200 MW of which pertain to International. The strategy of the Company between 2002 and 2006 focused on developing wind energy, giving priority focus on Spain, as well as on initiating international expansion. In the period of 2007-2011 the development of this technology will be accentuated, both in our country as well as abroad, and others, such as solar, will be promoted.

With respect to the installed capacity per geographic area, the wind farm generation inventory of the Company is now present in twelve independent Spanish communities and in four countries, which are Greece, Portugal, France, and Brazil. In addition, it has projects in an advanced state of development in the United Kingdom, Italy, Poland, Germany, and Mexico. 93.3% of the installed capacity of IBERDROLA in renewable energies is located in Spain, with 3,650 MW. With regard to projects outside of Spain, IBERDROLA already is availed of a total of 267.8 MW in operation: Greece (193.3 MW), Portugal (18 MW), Francia (31.7 MW), and Brazil (24.8 MW). As a whole, 99% of the 3,914 MW of total installed capacity of IBERDROLA is located in Europe.

Operating capacity:

Spain

The new capacity put on line in Spain during the first quarter of 2006 reaches a total of 72.4 MW, corresponding entirely to new facilities put into operation: Luzón Norte (16 MW) and Escalón (18 MW) in Castilla - La Mancha; Tarayuela (20 MW) and Urbel del Castillo (12 MW) in Castilla y León, and Igea-Cornago (6 MW) in La Rioja.

International

The new capacity put on line in the first quarter of 2006 reaches 31.6 MW, corresponding to the new facility put into operation in France, La Butte des Fraus with 12 MW, and the expansion of two facilities that already existed, 18.4 MW has been added to the wind-farm of Rio do Fogo in Brazil and 1.2 MW to the wind-farm of Modi, in Greece.

Portfolio of Projects

IBERDROLA is already availed of a portfolio of projects of about 15,500 MW in various states of development both in Spain and in other countries.

MW	In development	Validated resource	Rights of connection to network and under construction
Spain	11,093	5,992	1,817
Wind energy	9,758	5,578	1,686
Small-scale hydroelectric	210	189	111
Solar photovoltaic	720	225	20
Biomass	400		
International (Wind energy)	4,339	3,223	734
Total	15,437	9,215	2,601

- Other sources of renewable energy (other than wind energy)

The technologies of interest to IBERDROLA in this field are basically:

Thermosolar energy

The 2011 target is to reach 250 MW. The present portfolio of projects reaches 605 MW, comprised of a total of 12 projects in promotion located in Seville, Ciudad Real, Madrid, Murcia, Badajoz, Zamora, Albacete, Soria, Teruel and Almería.

Photovoltaic energy

IBERDROLA is availed of a portfolio of 115 MW and has a target for 2011 of having 20/25 MW in Spain. The priority is the development of its own portfolio within the facilities of IBERDROLA for combined cycle and nuclear plants.

Biomass

IBERDROLA is availed of a portfolio of 400 MW and a 2011 target of having 20/40 MW; it will reach by undertaking its projects very selectively, with guaranties of raw material supply on the long term.

R.E. small-scale hydroelectric

IBERDROLA has a 2011 target of 189 MW, availed of a portfolio of projects of 210 MW on the domestic level and 100 MW on the international level.

- Cogeneration

Operating capacity

IBERDROLA is availed of operating capacity in cogeneration plants in Spain of 387 attributable MW, equivalent to a total of 562 MW installed, pertaining to the 28 cogeneration plants in which

IBERDROLA has a stake. IBERDROLA has five liquid manure processing plants, of which the two located in Castilla y León are already in operation. IBERDROLA's commitment to cogeneration is part of its global commitment to reduce CO₂ emissions as a way to comply with the Kyoto Protocol.

Capacity under construction

Since 2005, the liquid manure treatment plants of Fonz and Monzón in Huesca and Fudepor in Murcia have been under construction, with an electrical capacity of 7.4 MW, 14.8 MW and 14.8 MW, respectively. Their placement into operation will take place during 2006. In addition, in 2005 there was the signing of the agreement on forming the company that will promote the construction and operation of the Barcial del Barco Bioethanol Plant in Zamora.

1.2 LATIN AMERICA

Mexico

IBERDROLA has strengthened as the top private producer of electricity in Mexico and number two in this country behind CFE. The Company is already availed of installed capacity in Mexico of 2,696 MW.

Project	Capacity (MW)	Start of Operations
Enertek	120	100% operational
Monterrey	1,037	100% operational
Altamira IV	1,036	100% operational
La Laguna	500	100% operational
Altamira V	1,121	2006
Tamazunchale	1,135	2007
Total	4,949	

The Company is building another two combined cycle plants in this country: Altamira V, at 1,121 MW, which will be put into operation in November of 2006, and Tamazunchale, at 1,135 MW, which will start to operate in June of 2007, the two biggest plants awarded up to now in Mexico.

In the field of wind energy, IBERDROLA is developing promotions in the State of Oaxaca that add up to 150 MW in capacity.

Brazil

In Brazil, IBERDROLA has the 450 MW hydroelectric plant of Itapebí (175 MW attributable to IBERDROLA) and the combined cycle of Termopernambuco, with an installed capacity of 520 MW (203 MW attributable to IBERDROLA). In addition, IBERDROLA has six cogeneration plants (93 MW) for private customers through its subsidiary Energyworks Brazil (100% IBERDROLA).

During the first quarter of 2006, Neoenergía (39% IBERDROLA) was awarded concessions for building, maintaining, and operating the hydroelectric generating plant of Baguari and the mini-hydro plants of Nova Aurora and Goiandira, which add up to a total of 188 MW of installed capacity.

In the wind energy business, as already mentioned, IBERDROLA has put into operation the Rio do Fogo wind farm on line, considered as a Clean Development Mechanism (CDM) project. Located in the State of Rio Grande do Norte (Brazil), its total capacity amounts to 49.3 MW of capacity, 24.8 MW of which are already in operation, after bringing into service an additional 18.4 MW in this quarter.

1.3 Europe

Greece

In the **wind energy business**, IBERDROLA has 193.3 MW of wind energy in operation and 44 MW under construction. IBERDROLA is a strategic partner of Rokas, top promoter and operator of wind farms in Greece, in which it has a 49.9% share. Also in Greece, iberenova will soon acquire 56 MW from Gamesa by means of an agreement signed for such purpose in the month of July.

Portugal

In the **wind energy business**, IBERDROLA has 18 MW in operation in Portugal, pertaining to the Catefica wind farm. In addition to the capacity already operating, IBERDROLA has connection points for 150 MW that will enter into operation in the next two years.

Additionally, IBERDROLA and GAMESA, through the consortium Nuevas Energías Ibéricas (NEI), in which shares are also held by the Portuguese companies Iusas Visabeira, Alberto Mesquita, MECI, and Galucho, submitted their application on February 24, for bidding in the distribution of the wind energy capacity in Portugal called by the Portuguese government in 2005. The NEI consortium, which was the first to submit an application in that bidding, includes an ambitious global proposal valued at some 1,200 million euros: On the one hand, a wind energy project for 1,055 million euros and, on the other, an industrial project that contemplates the construction of five wind generating plants in Portugal involving an investment of 135 million

euros. The proposal was analyzed by the Ministerial authorities of Portugal, deciding its admission to the process. At present, the process of evaluation and consultation has started, and a decision in principle is already expected by the second half of the fiscal year.

Other Countries in the European Union

IBERDROLA has various projects in other countries in the EU, basically in the area of wind energy:

- In **Germany**, in **wind energy**, IBERDROLA will have 28 MW in operation by the end of 2006, after the agreement reached with Gamesa. In addition, the Company is developing 54 MW which currently are in various phases of development.
- In **Poland**, IBERDROLA will have 58.5 MW of **wind energy** in operation at the end of 2006 and has a portfolio of 103 MW, which will be developed in the coming years.
- In **France**, in **wind energy**, IBERDROLA has of 31.7 MW in operation and 95 MW in its portfolio of projects. The Company has a strategic interest in the acquisition of rights and farms in an advanced stage of development, or in positioning itself as an investing partner for local promoters. IBERDROLA has an agreement with the German promoter PT&T Technology and its financial services subsidiary EECH AG for the purchase of wind farm development rights both in France (100 MW) and Italy (200 MW). Furthermore, IBERDROLA has entered into an agreement with Total and OPT to develop wave energy projects and it will start studying sites in France.

- In Italy, in the area of wind energy, IBERDROLA through the agreement with PT&T has an acquisition right over 100 MW, with an option to increase it by another 100 MW. In addition, IBERDROLA will acquire from Gamesa a total of 100 MW during the period 2006-2009 by means of the agreement signed in 2005.
- In the United Kingdom, its own projects are being developed in the area of wind energy and, although they are in the initial phases, they could reach 145 MW.

Other Geographical Areas

In Latvia, IBERDROLA has been awarded the construction, as well as the operational supervision and maintenance, of a combined cycle plant of 420 MW in installed capacity in Riga (Latvia).

In Morocco, IBERDROLA and the Office National de l'Electricité (ONE) this past 26 December signed an agreement in Madrid on cooperation in the energy field for the development of wind farms and combined cycle plants in Morocco.

Trading

The Company is developing a major trading business in Europe, with operations in Austria, Belgium, France, Germany, the Netherlands, Portugal, Spain and Switzerland. During the first quarter of 2006, IBERDROLA started doing business on the Italian electricity market, marketing electricity through interconnections with France.

In addition, IBERDROLA is participating in the monthly and daily auctions carried out by the

French electricity system operating company (RTE), which enables it to access interconnection with Italy.

The Company aims to extend these energy buying and selling activities in the short term in Europe to other countries such as Poland, Greece, the United Kingdom.

2. DISTRIBUTION

2.1 SPAIN

At the end of the first quarter of fiscal year 2006 IBERDROLA is availed of 9.7 MM costumers in Spain and the total distributed energy measured on the grid reaches 26,173 GWh, with an increase of 3.2% over the same period in the previous fiscal year. 75% of the energy was distributed through the regulated market, at 19,503 GWh, registering an increase of 22.7% over the same period in the previous fiscal year.

2.2. LATIN AMERICA

At the end of the first quarter of 2006, IBERDROLA has already exceeded the figure of 8.2 million costumers under management in the region and the energy distributed has reached 6,830 GWh, with an increase of 4.8% in relation to the same period in the previous fiscal year.

3. MARKETING

3.1 ELECTRICITY

- Spanish business: Eligible electricity users

IBERDROLA finished the first quarter of the fiscal year with 729,000 users in the deregulated electricity market. The energy sold on this market reached 3,248 GWh, a reduction of 56% compared to the same period in 2005.

- Portuguese business

On the Portuguese market, IBERDROLA is maintaining its position, already availed with 1,000 supply contracts that represent annual consumption of 421 million kWh. At March the sales made reached 116 GWh.

- French business

The position of the Company on the French electricity market is already availed of various end users of electricity .

3.2 Gas

Procurement:

During the first quarter of 2006, IBERDROLA has strengthened as the number two supplier of gas in Spain. In addition, IBERDROLA ended the quarter with a global supply portfolio of 8.9 bcm per annum, of which 7.35 bcm cover its supply requirements in Spain and 1.55 bcm do so in Mexico and Brazil.

In the quarter, the most significant gas procurement operations have been the following:

- Receipt of the first cargo of natural gas at the regasification plant of Sagunto with capacity to process 6 bcm per annum since its entry into operation this past 1 April. The vessel Al Thakhira, coming from the Emirate of Qatar, unloaded 145,000 m³ of LNG at the terminal of Saggas, equivalent to 900 GWh of natural gas.
- Receipt of the first cargo of liquid natural gas (LNG), of 145,000 cubic meters in capacity, under the procurement contract signed with Nigeria LNG on 1 April 2002. The methane tanker vessel LNG Enugu unloaded at the regasification plant of Huelva, where the Company is availed of the pertinent contracts for accessing the gas networks. The amount transported is equivalent to 900 GWh of natural gas. This cargo falls within the framework of the agreement signed with Nigeria LNG contemplating the acquisition by IBERDROLA of 10 bcm of LNG on the long term.

Infrastructures

In order to assure the entry of the LNG into the gas system, IBERDROLA has signed the pertinent contracts for access to the networks and is promoting top-ranked infrastructures; besides what was already mentioned for Sagunto, it is participating in the regasification plant of Bahía Bizkaia Gas (BBG), where it holds 25% of the equity, and which, with capacity for 6 bcm per annum, has been in operation since August 2003, and has already received more than 100 methane tankers.

In addition, it holds 12% of the company Medgaz, which promotes a direct underwater gas pipeline between Algeria and Spain, with capacity for 8 bcm per annum, characterized in 2005 as a priority for the Government. IBERDROLA has already assured the receipt of at least 1.6 bcm per annum of gas through this new pipeline starting in 2009.

Commercial:

Spain

In the first quarter of 2006, IBERDROLA strengthened its position as the number two marketer of gas in Spain with a deregulated market share of 13.8% including both the gas supplied to customers as well as that supplied to combined cycles, which represents a significant increase compared to the 11.4% of the previous year. The total volume of gas marketed by IBERDROLA in 2005 reached 15,466 GWh (+9.2%).

Europe

IBERDROLA, developing pioneer business in the deregulation of the French market, started to supply gas to industrial users in that country in 2005. In parallel, it was also the first domestic company to export gas from Spain to France through the interconnection gas pipeline, contributing to the articulation of the domestic market for energy in the European Union.

4. NON-ENERGY BUSINESSES

IBERDROLA Inmobiliaria

At the end of the first quarter of 2006 IBERDROLA Inmobiliaria had 16 residential promotions in execution representing 1,352 homes. During the first quarter of the fiscal year 128 homes were sold. As for promotions of a non-residential character, the company is continuing with the AQUA MULTIESPACIO (Valencia) development of 83,000 square meters in constructed surface area, as well as with the project for completing a warehouse at the Landaben (Pamplona) industrial park.

The most significant transactions carried out in the period were the following:

- Investments acquisition of 68,000 square meters in the Porta Firal complex in Barcelona for the third-party development of offices; acquisition of 35,000 square meters of ground in Zaragoza destined for residential development for 258 homes and the purchase of 8,700 square meters of buildable ground in Denia (Alicante) for the development of another 124 homes.

- Starting up the marketing of various projects: Various promotions in Jun (Granada), including the first promotion of bioclimatic and ecological homes and the promotion of Las Terrazas de Gran Vía 2 in Alicante, a complex of 134 homes.

IBERDROLA Ingeniería y Construcción

During the first quarter of 2006 it continued to drive the growth of its activity within and outside of the Group, while strengthening its international expansion. In the first quarter of the fiscal year its presence abroad has been strengthened with the obtaining of four contracts of special significance: the construction of the combined cycle plant in Syria (760 MW), a project valued at 430 million euros, the contract awarded for reinforcing the electricity infrastructure of the State of Falcón in Venezuela for nearly 80 million dollars, a new contract put up for bids by the Mexican public electricity company, Comisión Federal de Electricidad (CFE), for reinforcing the electricity infrastructure of the State of Tamaulipas for 63.6 million dollars, and a project for modernizing the control system for the main hydroelectric plants in Kenya, the budget of which reaches 5.5 million euros.

5. REGULATION

Royal Decree-Law 3/2006 modifying the regimen for placement on the wholesale market and reconsidering the value of emission rights
The Council of Ministers, in its meeting this past 24 February, approved a Royal Decree-Law modifying the regimen for placement on the wholesale market and reconsidering the value of emission rights. The following are extracts of the main lines from the

press release issued by the Ministry of Industry, Tourism, and Trade:

- "Its main provision is to require generating and distribution companies that belong to the same business group to make bilateral contracts among each other for the acquisition of energy produced by facilities under the normal regimen."
- "Although the purchases and sales among these companies are made at a free price, during this year, and in a **provisional manner**, the National Energy Commission will only consider - for the purposes of settlement for such contracts - the average cost provided for in the 2006 price schedule for the energy generated under the normal regimen for the territory of the peninsula, corresponding to 42.35 €/MWh".
- "That rule also includes that the emission rights granted free of charge to companies by means of the National Emissions Allotment Plan will be taken into account."
- "The Government envisions that, with the rules approved, there will be a substantial decrease in the prices on the wholesale electricity market. In concrete terms, the estimates done by the Ministry of Industry, Tourism, and Trade forecast that the measure of making it mandatory to make bilateral contracts among generating and distribution companies of the same business group will enable a reduction in the volume of transactions on the daily market ... which, without doubt, will have a direct effect on reducing the deficit."

- "With respect to discounting the value of the emission rights granted free of charge to the electricity generating companies by means of the National Allocation Plan, forecasts indicate that, by virtue of an average price estimated at the end of 2005 to be 18 euros per ton, and given the fact that 78 million tons have been allotted free of charge, the value of these rights would be about 1,400 M€, which amount could be applied to reducing the tariff insufficiency, if there is one."

Royal Decree-Law 4/2006 modifying the National Energy Commission functions

In the same Council of Ministers abovementioned, Government approves Royal Decree-Law 4/2006, modifying the functions of the National Energy Commission with the aim of establishing a new regime for the authorizations for the acquisition of stakes in companies with activities that are to be considered regulated or that are subject to administrative intervention. The new rule establishes, among other dispositions, the compulsory condition for the companies presenting takeover bids in the energy markets to obtain the approval of the National Energy Commission previous to the approval of such bid according to the stock market procedures. By this means, some insufficiencies and asymmetries of the current legislation are rectified.

Draft bill for the transposition of the european directives

Likewise, the Government has approved the draft bills for the transposition of the european directives related to the common rules to be applied in the domestic electricity and gas markets.

6. TARIFF INSUFFICIENCY

The Company has not registered the tariff insufficiency corresponding to 2006, considering that the applicable regulation establishes the necessary mechanisms to assure its recovery.

The effect before taxes in the Income Statement of the Group would have reached -324 MM€ (35.01% of the insufficiency is attributable to Iberdrola) once deducted the amount of the CO₂ allowances allocated according with the interpretation done of RD 3/2006 regarding this matter.

7. GENERAL SHAREHOLDERS' MEETING

The 2006 General Shareholders' Meeting of IBERDROLA held on Thursday, 30 March and the last chaired by Iñigo de Oriol, was constituted with the attendance of a quorum of 55.42% of the Share Capital. All of the resolutions were approved by a favourable vote of more than 95% of the capital present and represented at the Meeting.

In addition, the General Shareholders' Meeting approved an increase of 15.2% in the dividend pertaining to fiscal year 2005, reaching 0.885 euro per share. This dividend is in fulfilment of the commitment of the company to increase the remuneration of its shareholders in the same proportion as the net profit increases.

8. IGNACIO GALÁN TAKES ON THE CHAIRMANSHIP OF THE IBERDROLA GROUP

On 26 April Ignacio Galán, up to then Executive Vice President and Managing Director of the Company, assumed the chairmanship of the IBERDROLA Group in execution of the resolution adopted a year ago by the Board of Directors.

Ignacio Galán took on the chairmanship of IBERDROLA upon the retirement of Iñigo Oriol, who, as established in the bylaws for the Board of Directors, remained in office up to the first meeting held by that body after the General Shareholders' Meeting of 2006 upon reaching 70 years of age.

Analysis of Q1 2006

Energy Production

ENERGY PRODUCTION	GWh	vs. Q1 2005		% Weight
Gas combined cycle	9,097	1,944	27.2%	39.3%
Wind energy and mini-hydroelectric	2,253	483	27.3%	9.7%
Wind farms	2,093	448	27.2%	-
Hydroelectric	2,382	9	0.4%	10.3%
Nuclear	6,662	219	3.4%	28.8%
Fuel-oil	557	-644	-53.6%	2.4%
Coal	1,696	-285	-14.4%	7.3%
Cogeneration	496	24	5.1%	2.1%
TOTAL NET PRODUCTION	23,143	1,750	8.2%	100.0%
ENERGY DISTRIBUTED	33,003		3.5%	

Energy Production in Spain

ENERGY PRODUCTION IN SPAIN	GWh	vs. Q1 2005		% Weight
Gas combined cycle	4,062		41.1%	22.9%
Wind energy and mini-hydroelectric	2,253		27.3%	12.7%
Wind farms	2,093		27.2%	-
Hydroelectric	2,152		-0.2%	12.1%
Nuclear	6,662		3.4%	37.5%
Fuel-oil	557		-53.6%	3.1%
Coal	1,696		-14.4%	9.6%
Cogeneration	374		-0.8%	2.1%
TOTAL NET PRODUCTION	17,756		5.6%	100.0%
ENERGY DISTRIBUTED	26,173		3.2%	
HYDRO ELECTRIC RESERVE LEVELS AT 31.03.06			54.7% (6,170 GWh)	

Energy Production: Latin America

ENERGY PRODUCTION: LATIN AMERICA	GWh	vs. Q1 2005		% Weight
Gas combined cycle	5,035		17.8%	93.5%
Hydroelectric	230		6.5%	4.3%
Cogeneration	122		28.4%	2.3%
TOTAL NET PRODUCTION	5,387		17.5%	100.0%
ENERGY DISTRIBUTED (managed)	6,830		4.8%	

1. PRODUCTION: SPAIN

Net production of the Group in Spain displayed an increase of 5.6% in the first quarter of fiscal year 2006, reaching 17,756 GWh. The investments in combined cycles and wind energy were the key for the progress achieved. The two technologies have already reached a joint weight of 35.6% in the Spanish generation mix of IBERDROLA, which presents a similar contribution from nuclear energy (37.5%).

The most notable events recorded are:

- Increase of 41.1% in the production of the combined cycles up to 4,062 GWh, already reflecting 22.9% of the production compared to the 17.1% of the first quarter of 2005. In this period, the combined cycles were strengthened as the number two technology in terms of total production volume in Spain.
- Wind energy and mini-hydroelectric production increased 27.3% with a weight of 12.7% in the generation mix for the period, already higher than that of hydroelectric energy, which reaches 12.1%. The combined production under the Special Regimen, including the contribution from cogeneration plants, amounts to 14.8%. Likewise, international wind energy production for this quarter reached 151 GWh.
- Significant reduction in production from the sources of energy that contaminate most, with a decline of 14.4% in production from coal and of 53.6% in production from fuel.

With respect to emissions, there has been a reduction of -12.5% in the first quarter of 2006 to reach 209 gr/KWh, a very significant figure considering the low hydroelectric production. Free emissions production grows to 62.3%, increasing from the 61.7% reached in the first quarter of 2005.

IBERDROLA has obtained a market share of 26.4% in the wholesale production market in the first quarter of 2006.

Comparatively speaking, energy production can be broken down as follows:

	Q1 2006	Q1 2005
Gas combined cycle	22.9%	17.1%
Renewable energy	12.7%	10.5%
Hydroelectric	12.1%	12.8%
Nuclear	37.5%	38.3%
Fuel-oil	3.1%	7.1%
Coal	9.6%	11.8%
Cogeneration	2.1%	2.2%
Total	100%	100%

In addition, the changes displayed in relation with CO₂ emissions are as follows:

	MM Tn	Average Price
Rights allocated	3.8	26.47
Rights consumed	4.1	25.89

2. PRODUCTION: LATIN AMERICA

In Latin America, total production is up 17.5% to 5,387 GWh. This significant growth has been achieved thanks to the new investments in combined cycles representing 93.5% of the total production.

	Production	Change
Mexico (cycle)	4,652	19.6%
South America	735	5.9%
Combined cycle	383	0.0%
Hydroelectric	230	6.5%
Cogeneration	122	28.4%
Total	5,387	17.5%

The increase recorded in the area is mainly due to the full functioning and better availability of the Mexican plants of Monterrey (1,040 MW), Altamira (1,036 MW), Enertek (120 MW), and La Laguna (500 MW), and, secondly, to the Termopernambuco plant in Brazil. With respect to hydroelectric energy, this recorded growth of 6.5%.

3. MARKET: SPAIN

In the domestic market the total demand of Iberdrola measured on the grid increased 3.2% reaching 26,173 GWh. As for the number of costumers, this has reached 9.7 MM.

4. MARKET: LATIN AMERICA

The trend for demand at the three distributors in which Iberdrola has an interest in Brazil is reflected in the following table:

Energy distributed (GWh) (under management)	vs. 2004	
	Q1 2006	2004 2005
Coelba	2,987	5.5%
Cosern	889	6.6%
Celpe	2,132	3.8%
Total	6,008	5.1%

Analysis of results for the period (Unaudited)

The most notable aspects of the results for Q1 2006 are as follows:

Million €	Jan-Mar 2006	vs. 2005
NET SALES	2,978.4	+8.7%
GROSS MARGIN	1,493.9	+21.8%
EBITDA	1,056.6	+21.3%
EBIT	788.4	+24.5%
NET PROFIT	403.2	+16.3%

1. NET SALES

The Group's Net Sales stood at 2,978.4 million euros in the first quarter of fiscal year 2006, representing an increase of 8.7% over the same period in 2005, with the main growth drivers being the Renewables business, where the Net Sales grew 78.4%, and the International business, which grew 55.4%. As for the Other Businesses, the Net sales there recorded an increase of 51.1%.

On the contrary, Domestic Business reduces its Net Sales by 4.1%, mainly attributable to the effects of the Royal Decree 3/2006 and the consolidating eliminations due to the existence of a bilateral contract between Generation and Supply (189 MM€).

With respect to the tariff insufficiency estimated for the first quarter of 2006, at the industry level, and discounting the value of the emission rights consumed, the tariff insufficiency estimated for the first quarter of 2006 could reach a figure close to 925 million euros. In accordance with Royal Decree-Law 5/2005 of 11 March, the provisional percentage of financing for this insufficiency that would pertain to Iberdrola comes out at 35.01%, representing an approximate deviation of 324 million euros.

According to the interpretation of Royal Decree-Law 3/2006, that number for industry deviation includes 497 million euros pertaining to the value to be reapplied for the emission rights allotted by virtue of the NAP and consumed in the period, according to the following criteria:

- For the months of January and February "any eventual negative balances in the settlement of the 2006 price will be deducted."
- For the subsequent months, "the remuneration for the electrical energy production business ... will decline by an amount equivalent to the value of the greenhouse effect emission rights allotted..."

In the other hand, the application of R.D. 3/2006, which decreases the income from the business by 47.6 million euros. Its ultimate effect will depend on the price finally recognized, given that R.D. 3/2006 establishes the price of 42.35 €/MWh that has been applied since this past 3 March to be "provisional": "With respect to the settlement of activities regulated by the National Energy Commission, during the year 2006 the provisional price to be considered for distributors for energy acquired through the assimilation mechanism described in Part 1 will be the average cost provided for in the 2006 price schedule for energy generated under the normal regimen for the territory on the peninsula, including the costs of the services of power guaranty and adjustment, corresponding to 42,35 €/MWh".

2. GROSS MARGIN

On a consolidated level, the Gross Margin came out at 1,493.9 million euros, representing an increase of 21.8% in relation to the same period in 2005.

The following contrasting aspects can be highlighted regarding this change in the Gross Margin:

2.1 Domestic Energy Business

Gross Margin reached 1,145.5 million euros and grew 15% over the same period in 2005. There are a number of factors that have influenced in the evolution of both the Net Sales and the Procurements:

- The application of R.D. 3/2006: 47,6 million euros

- The effect of the bilateral contract between Generation and Supply, 189 MM€
- The negative impact reflected from the cost of the emission rights in the period, at 107.4 million euros.

Regarding the bilateral contract between Generation and Supply, at present, Generation is selling energy to Supply directly by the use of a bilateral contract so that an inter-company transaction is constituted and, therefore, in the accounts on the group level, the effect of purchases and sales by means of these contracts are zeroed out by set-off. Final impact at the Gross Margin level is null (zero), but there is a relevant effect of these items at an individual level.

Likewise, Gross Margin includes an expense for the consumption of emission allowances in an amount of 107.4 MM€.

2.2 International Business

Gross Margin is situated at 195.9 million euros, reflecting growth of 41.6% due to the good performance of the businesses of the Group in the region and the positive evolution of the exchange rate for the reference currencies in the region, the real in Brazil (+23.7%) and the dollar, that affects Mexico (+8.4%).

2.3 Other Businesses

These have contributed 152.6 million euros to the total Gross Margin, representing growth of 66.1%, basically attributable to **Ingeniería y Servicios**, also highlighting the contribution from **Corporación IBV** and **Other Services**.

2.4 Basic Margin

Basic Margin for the period increases by 19%, totalling 1,500.1 MM€, as shown in the following table:

	Q1 2006	Q1 2005	Change %
GROSS MARGIN	1,493.9	1,226.2	21.8%
EMISSION ALLOWANCES	6.2	34.4	-82.0%
BASIC MARGIN	1,500.1	1,260.6	19.0%

Basic Margin includes an income from the emission allowances granted to the cogenerators in an amount of 6.2MM€. After Royal Decree Law 3/2006 of February 24, no revenues have been considered for emission allowances allocated except for those granted to such technology. By March 2006, the negative impact of not considering the revenues corresponding to the emission allowances granted to the rest of generation technologies amounts 101.3 MM€. In 2005, prior to the application of this Royal Decree Law, it was considered as revenue the total amount of the subsidies coming from these emission allowances.

Without the emission allowances effect coming from this RDL 3/2006, Basic Margin would have reached 1,601.4 MM€ (+27.3%).

3. EBITDA / GROSS OPERATING RESULT

Consolidated EBITDA grew by 21.3% to reach 1,056.6 million euros, resulting from both the change occurring in the Gross Margin as well as from the improved efficiency achieved in

increasing the Net Operating Expenses at a level below the increase in the Gross Margin.

The highlights include:

- Increase in Personnel Expenses of 7.8%, basically connected with the increase in personnel costs in the growing businesses such as renewables, combined cycles, and Mexico.
- Increase of 16.7% in the External Services due to the higher activity in connection with the new facilities of combined cycles, renewables, and Latin America, as well as expenses of sales activity. This also includes 15million euros in costs for the second nuclear fuel cycle (Enresa).
- Other Operating Income basically reflects compensations received.

In addition, there is a positive impact from exchange rate differences of 12.8 million euros due to the performance of the currencies in Latin America businesses.

It should be pointed out that the Net Operating Expenses homogeneous with the first quarter of 2005 reached 6.9% (14.3% reported) after deducting the effect of the evolution of currencies and expenses for the second cycle of nuclear fuel (Enresa).

Net Operating Expenses can be broken down as follows:

Million €	Q1 2006	vs. 2005
Net personnel expenses	211.4	8.3%
Personnel	253.1	7.8%
In-house work on fixed assets	-41.7	5.3%
Net External Services	179.8	22.2%
External Services	222.5	16.7%
Other operating income	-42.7	-1.8%
TOTAL	391.2	14.3%

On the other hand, Tax increased 11.0% reaching 52.3 million euros, with the change basically explained by the taxes paid for the new facilities entering operation and the higher payments deriving from the increase in the energy billed under the tariff.

5. EBIT / NET OPERATING RESULT

EBIT was situated at **788.4 million euros**, with an increase of 24.5% in relation to the first quarter of 2005, with the contribution from new businesses standing out. The item of Amortizations and Provisions, which increased 30.3 million euros (+12.7%), offsets the increase generated by the operations of the business and that referred to earlier. The increase in Amortizations and Provisions is mainly due to:

- Amortizations registered an increase of 8.6% to reach 249 million euros. This increase was basically caused by the new facilities that entered into operation since the end of the first quarter of fiscal year 2005, bringing about a 21.3% increase in the installed capacity in combined cycles on the group level and 20% with respect to wind alone. In relation to Latin America, it must also be taken into account that the business contributed 7 million euros more due to the effect of the exchange rate.
- Provisions recorded an increase of 123.8% reaching 19 million euros, with 84% of the total pertaining to activities in Spain and the remaining 16% to Latin America.

Million €	Q1 2006	Q1 2005	Change %
Amortizations	249	230	+8.6%
Provisions	19	8	+123.8%
TOTAL	268	238	12.7%

6. FINANCIAL RESULT

The Financial Result was situated at 163.4 million euros, 52.3% higher than in the first quarter of 2005. The increase was basically due to the 23.5% increase in the financial expenses, due to the impact that the tariff insufficiency had in the period, causing a higher average balance of debt in relation to the first quarter of 2005, of 1,997.7 million euros, as well as to the inclusion of a provision for the discount of the amount over the nominal value of the potential debt to be securitize.

Financial income reached 40.7 million euros

As for the average financial cost of the debt, this was 4.6% during the first quarter of 2006.

Million €	Q1 2006	Q1 2005	Change %
Financial revenues	40.7	58.0	(29.8)
Financial expenses	(204.1)	(165.3)	23.5
TOTAL	(163.4)	(107.3)	52.3%

7. RESULTS OF COMPANIES CONSOLIDATED BY EQUITY METHOD

Results of Companies Consolidated Using the Equity Method recorded a reduction of 11.9 million euros, to 4.1 million euros, with most of the result contributed from Other Businesses. The results can be broken down as follows:

Million €	Q1 2006	Q1 2005	Change % Million €
Other Businesses	2.7	11.1	-8.4
Rest	1.4	4.9	-3.5
TOTAL	4.1	16.0	-11.9

The reduction in these results under Other Businesses was due to departures from the scope of consolidation, such as that of Cementos Portland, as well as the lower contribution from non-energy businesses.

8. NET PROFIT

Income from Non-Current Assets amounted to 1.6 million euros, deriving from the real estate business.

The Pre-Tax Earnings grew +16.9% to reach the figure of 630.7 million euros.

The effective tax rate for the first quarter of fiscal year 2006 was 35.1%, in line with the same period in fiscal year 2005 (34.9%).

Lastly, Net Profit rose to 403.2 million euros, up 16.3% on the same period in 2005.

Results by business

1. GENERATION

a) Gross Margin

The change in this entry in the first quarter of 2006 is the result of the 3.2% increase recorded in production thanks to the new investments in combined cycles increasing the production thereof 41.1%, strengthening as the number two technology in terms of contributing to the total generation mix with a weight of 22.9%, almost 6 percentage points above its contribution in the first quarter of fiscal year 2005.

In this context the Gross Margin of the Generation business increased 34.7%. It is appropriate to point out the following factors:

- Generation Net Sales grow by 55.7%, as a result of the aforementioned increase in production, in an environment of higher prices (+27.3%). In addition, it must be pointed out that, at present, Generation is selling energy directly to Supply, by using the bilateral contract.

Fuel Cost* & CO₂

Eur/MWh	2006	2005	%
Avg. Fuel Cost*	33.5	32.0	+4.7%
CO ₂ Cost (Eur/ton)	25.9	14.3	+81.1%

* Includes C. Cycles, Coal & Oil

- Procurements increase 79.5% as a consequence of the behaviour of the prices

of the oil derived products in the international markets.

It should be highlighted that Procurements item is including 107.4 MM€ of cost of the emission allowances consumed. Taking into account the revenues coming for the allowances granted to cogeneration plants, net impact represents 101.3 MM€.

	MM Tn	Average Price	Million €
Rights allocated	3.8	26.47	101.3
Rights consumed	4.1	25.89	107.4

b) Operating Profit/EBIT

EBIT recorded an increase of 34.3% in relation to the previous fiscal year, reaching 455.1 million euros. At the level of the EBITDA (551.5 million euros) there was an increase of 27.5%. In addition to that already mentioned concerning the Gross Margin, an increase of 28.7% took place in the Net Operating Expenses (26.4 million euros), as a result of various factors:

- External Services rose 22.4% due to the entry into operation of combined cycle plants. It should also be pointed out that this item includes 15 million euros in expenses from the second part of the cycle of the nuclear fuel (ENRESA), a situation that did not arise in the first quarter of 2005.
- Personnel expenses recorded a moderate increase of 2.7%.

Net Operating Expenses are broken down as follows:

Million €	Q1 2006	vs. 2005
Net personnel expenses	53.1	6.4%
Personnel	57.8	2.7%
In-house work on fixed assets	(4.7)	-26.6%
Net External Services	65.4	55.0%
External Services	73.1	22.4%
Other operating income	(7.7)	-56.0%
TOTAL	118.5	28.7%

Tax increased 14.6% as a result of the new facilities brought into service.

Increase of 2.8% in the item for Amortizations and Provisions, reaching 96.4 million euros, basically from the entry into operation of the new combined cycles, with 1,200 MW put into operation in terms of annual comparison.

- The key operating figures for this business are as follows:

GENERATION (Million €)	Q1 2006	vs. 2005
Net sales	1,345.8	55.7%
Gross Margin	681.8	34.7%
Basic Margin	688.0	27.3%
EBITDA	551.5	27.5%
EBIT	455.1	34.3%

2. RENEWABLES

a) Gross Margin

Renewables Business has been affected by various factors which can be summarized as follows:

- The installed capacity increased 20% (+653 MW), which resulted in an increase of 27.3% in the total production generated by renewable energy source, reaching 2,253 GWh. An increase in the wind energy index for the period was also added to this.
- At March 2006, 98% of the wind facilities operated under the market participation system. In the first quarter of 2005, a majority of such facilities were still operating under the fixed remuneration system. With this, prices have increased 41%.
- Changes were also made in the scope of consolidation, the most significant of which were the full consolidation of Rokas, as a consequence of having increased the stake of IBERDROLA up to 49.9%.
- Thus, the mentioned increase in production, in conjunction with the acceleration in the growth achieved by transferring most of the facilities to the market participation system, has enabled an increase in the Gross Margin of this business by 78.4%, reaching 215.2 million euros. Renewables Gross Margin already represents 24% of the total obtained by the generation in Spain.

b) Operating Profit/EBIT:

EBIT increased by 76.5 million euros (+118.6%) due to the following factors:

- EBITDA grew 87.6%, in line with the increase in the Gross Margin and despite the rise (+38.5%) in Net Operating Expenses as a result of the new capacity brought on line. The EBITDA margin rose to 85%, compared to the 80% recorded in previous periods.

- This growth is even greater at the level of the EBIT (118.6%), reaching 141 million euros, after the increase in the Amortizations and Provisions of 26.7%, an increase due the addition of 20% of installed capacity during the fiscal year.
- Net Operating Expenses can be broken down as follows:

Million €	Q1 2006	vs. 2005
Net personnel expenses	5.3	103.8%
Personnel	6.5	71.1%
In-house work on fixed assets	(1.2)	0.0%
Net External Services	25.3	29.7%
External Services	27.7	35.1%
Other operating income	(2.4)	140.0%
TOTAL	30.6	38.5%

- The key operating figures for this business are as follows:

RENEWABLES (million €)	Q1 2006	vs. 2005
Net sales	215.2	+78.4%
Gross Margin	215.2	+78.4%
EBITDA	182.7	+87.6%
EBIT	141.0	+118.6%

3. DISTRIBUTION
a) Gross Margin

Gross Margin of the Distribution business experienced a decline of -24.9%, as a result of various factors:

- It registers the provisional negative impact of -47.6 million euros deriving from the application of R.D. 3/2006 of 24 February.
- The Distribution business recognizes the positive effect of the improvement in the remuneration for activities regulated under the 2006 tariffs (R.D. 1556/2005).

Nevertheless, the recurring gross margin, that is, without considering the effect of Royal Decree-Law 3/2006, amounts to 309.7 million euros, 2.8% above 2005.

b) Operating Profit/EBIT:

The Distribution EBITDA fell 43.5%, given that 13.1% growth in the taxes item is added to the decline recorded in the level of the Gross Margin and it is not offset by improvements in efficiency achieved at the level of the Net Operating Expenses, which declined 1.7%.

Nevertheless, the recurring EBITDA, that is, without considering the effect of Royal Decree-Law 3/2006, amounts to 161.0 million euros, 0.7% above 2005.

Net Operating Expenses can be broken down as follows:

Million €	Q1 2006	vs. 2005
Net personnel expenses	51.5	6.2%
Personnel	69.0	-0.1%
In-house work on fixed assets	(17.9)	-14.8%
Net External Services	73.4	-6.6%
External Services	89.7	-8.8%
Other operating income	(16.3)	-17.7%
TOTAL	124.5	-1.7%

The greater efficiency achieved by reducing the Net Operating Expenses 1.7% was basically due to the containment in the External Services item, which went down 8.8% and, despite the decline of 17.7% in Other Operating Income and of 14.8% in In-house work on fixed assets. It should also be pointed out the containment recorded in Personnel Expenses, which reduced slightly (-0.1%).

Amortizations and provisions increased 7.6% due to the provisions created. This caused the decline recorded in the level of the EBITDA to be 21.2 points lower than what was recorded at the level of the EBIT, amounting to 64.7%.

- The key operating figures for this business are as follows:

DISTRIBUTION (million €)	Q1 2006	vs. 2005
Income	262.1	-25.5%
Gross Margin	262.1	-24.9%
EBITDA	113.4	-43.5%
EBIT	50.0	-64.7%

4. SUPPLY

a) Gross Margin

First quarter of 2006 has registered a significant decrease in the volumes of electricity sold, that, following a strategy of lower business exposure, represents 56%. This reduction is reflected both in the Net Sales figure, with a decrease of 20%, as well as in the Procurements, that are reduced by 18.2%.

Despite of this, the environment of high prices, along with the cost of cancelling some contracts, have caused a decrease of 15.8 MM€ in the Gross Margin of this business, amounting 6,6 MM€.

b) Operating Profit/EBIT

At the EBIT level, a significant reduction was displayed in the Operating Expenses of the business, reaching 42.2%, with declines in the Personnel Expenses (-20.5%) and in the External Services (-49.5%) connected with less activity.

Net Operating Expenses can be broken down as follows:

Million €	Q1 2006	vs. 2005
Net personnel expenses	11.4	-21.9%
Personnel	11.6	-20.5%
In-house work on fixed assets	(0.2)	N/A
Net External Services	2.7	-72.4%
External Services	9.8	-49.5%
Other operating income	(7.1)	-26.0%
TOTAL	14.1	-42.2%

In addition, the EBIT of the Commercial Business achieved a reduction in its losses in relation to those recorded in the same period of the prior fiscal year, going to losses of -27.8 million euros from losses of -30.5 million euros recorded in the first quarter of 2005, thanks also to additional reductions in the entries for Amortizations and Provisions, as well as in Tax:

- Reduction of 54.7% in Amortizations and Provisions
- Decline of 40.3% in Tax
- The key figures for this business are as follows:

COMMERCIAL Million €	Q1 2006	vs. 2005
Net sales	622.4	-20%
Gross Margin	-6.6	N/A
EBITDA	-24.4	N/A
EBIT	-27.8	N/A

5. CORPORATION

This includes eliminations of intergroup expenses between the corporation and the businesses.

6. INTERNATIONAL BUSINESS

a) Gross Margin

The Net sales from International has increased 55.4% to reach 584.6 million euros. Mexico, with a 64.1% contribution, is the area that makes the greatest relative contribution, also displaying growth of 51.3% thanks to the increase in the production and plant availability. Also of note is the increase in the income figure for Brazil, at 63.3%, basically the result of an increase in demand and in tariff adjustments. In addition, it reflects the positive impact of the favourable performance of the exchange rate for the reference currencies in Brazil and Mexico in the period.

The Gross Margin is up 41.6% (+57.6 million euros) to 195.9 million euros. The change in the overall Gross Margin for the Latin America region can be broken down as follows:

- Increase in the Gross Margin in functional currency: +18.6 million euros
- Exchange rate effect: 39 million euros in total, mainly from the increase in the value of the Brazilian currency in relation to the euro (+23.7%).

In Mexico-Guatemala, Gross Margin amounted to 79 million euros (+36.2%). This increase is basically due to the full yield from the

contribution to results from the combined cycle of La Laguna (500 MW), by virtue of its entry into operation at the end of the first quarter of the past fiscal year, and, secondly, combined cycle plant availability. In addition, the dollar registered a gain of 8.4%, with an effect of 7 MM€.

In Brazil, Gross Margin displayed positive evolution up 45.6% (reaching 116.9 million euros), thanks to: A greater contribution from the distribution businesses from growth in demand (+5.1%) and tariff revisions and adjustments taking place in April each year and positively affecting the results of the first quarter of 2006 in relation to that of the past fiscal year. The gain in value of the real in relation to the euro (23.7%) also stands out with a positive effect of 32 million euros.

b) Operating Profit/EBIT

In the International business, EBIT increased 60.5% to 102.1 million euros, reflecting the increase in EBITDA (47.3%) and the higher levels of amortizations recorded (+21.6%), which, although they increased, grew at a lower rate than the EBITDA mentioned.

With respect to the EBITDA, this registered growth of +48.3% in Mexico, mainly as the result of the greater activity of Generation from the increasing contribution from the La Laguna combined cycle, in operation since the end of the first quarter of 2005. In South America, this increased +46.4% from the change in the Gross Margin item as already detailed. In this way, total EBITDA growth in the International Business comes out at 47.3%.

EBITDA per region and business is broken down as follows:

- *Mexico-Guatemala*

Million €	Q1 2006	vs. 2005
Generation	45.5	56.4%
Distribution	17.1	30.5%
TOTAL	62.6	48.3%

- *South America*

Million €	Q1 2006	vs. 2005
Generation	18.9	56.2%
Distribution	60.6	43.6%
TOTAL	79.5	46.4%

- The change in Net Operating Expenses for the entire Latin America region can be broken down as follows:

Million €	Q1 2006	vs. 2005
Net personnel expenses	18.0	42.9%
Personnel	21.6	42.1%
In-house work on fixed assets	(3.6)	38.5%
Net External Services	33.9	21.5%
External Services	46.1	40.5%
Other operating income	(12.2)	149.0%
TOTAL	51.9	28.1%

The 28.1% increase in the Net Operating Expense was affected by the impact of the performance of the exchange rate. Eliminating this effect, this item grew only 3.5%.

This can be broken down by region as follows:

Million €	Q1 2006	vs. 2005
Mexico-Guatemala	16.4	3.8%
Personnel	3.9	34.5%
In-house work on fixed assets	12.5	-3.1%
Net External Services	35.5	43.7%
External Services	14.1	45.4%
Other operating income	21.4	42.7%
TOTAL	51.9	28.1%

- Amortization and Provisions are up 21.6%, primarily due to the effect of the increase in amortizations booked as a result of the Altamira and La Laguna combined cycles plants in Mexico and the Termopernambuco plant in Brazil entering into service and operating at full capacity.

The key operating figures for this business are as follows::

INTERNATIONAL		
Million €	Q1 2006	vs. 2005
Income	584.6	+55.4%
Gross Margin	195.9	+41.6%
EBITDA	142.1	+47.3%
EBIT	102.1	+60.5%

7. OTHER BUSINESSES

a) Gross Margin

Net sales from Other Businesses has increased 51.1% to reach 345.2 million euros, as the result of activity in the businesses of Ingeniería y

Servicios, and the contribution of IBV, which grew at similar rates, while Iberdrola Inmobiliaria shows a performance according to the seasonal nature of this business.

Gross Margin grows 66.1% to 152.6 million euros. It can be broken down as follows:

Million €	Q1 2006	Q1 2005	Change % Million
Ingeniería y Servicios	45.1	17.9	27.2
IBERDROLA Inmobiliaria	22.7	36.2	-13.5
IBV Corporation	41.4	33.6	7.8
Other services	43.4	4.2	39.2
TOTAL	152.6	91.9	60.7

The increase of 27.2 million euros in Ingeniería y Servicios was basically due to the margin recorded by third parties services. The increase in Other Services derives from including within this business the activities that, up to the third quarter of 2005, were included within the Distribution business, and that, since the end of fiscal year 2005, have been posted following the criterion of the 2005 Legal Report.

b) Operating Profit/EBIT

The following table breaks down the EBITDA:

	Q1 2006	Q1 2005	% Change
EBITDA	87.5	40.6	+115.5%
Real estate	15.2	30.2	-50%
Ingeniería y Servicios	30.4	4.3	607%
IBV Corporation	7.4	4.6	61%
Other services	34.5	1.5	N/A

- The contribution from Iberdrola Ingeniería y Servicios also stands out, the EBITDA of which reached 30.4 million euros, in line with the higher margins obtained and an increase in Net Operating Expenses well below the one registered at the Gross Margin level.
- The contribution from Other Services is 34.5 MM€, influenced by the change of imputation criterion mentioned before regarding Gross Margin.
- The contribution from Inmobiliaria is 15.2 MM€, following the seasonal trend shown at the Gross Margin level, adding up an increase in Net Operating Expenses, especially those related to External Services in connection with its portfolio.
- Corporación IBV, which is consolidated by proportional consolidation according to the IFRS, has contributed 7.4 million euros through its various industrial businesses.

The key operating figures for this business are as follows:

Million €	Q1 2006	vs. 2005
NET SALES	345.2	+51.5%
GROSS MARGIN	152.6	+66.1%
EBITDA	87.5	+115.5%
EBIT	71.2	+101.1%

The main items for IBERDROLA Inmobiliaria at the end of the first quarter of fiscal year 2006 are the following:

- IBERDROLA Inmobiliaria business data:

PORTFOLIO OF BUILDABLE AREA RESIDENTIAL USE (m ²)	
Total	1,433,837
Under construction	138,692
Under management	154,045
In planning	1,141,100

PORTFOLIO OF BUILDABLE AREA COMMERCIAL USE (m ²)	
Total	560,478
Under construction	37,814
Under management	51,375
In planning	471,289

- IBERDROLA Inmobiliaria balance sheet data:

	Million €
TOTAL ASSETS	1,534
INTANGIBLE FIXED AND INVESTMENT ASSETS	564
CURRENT ASSETS	906
SHAREHOLDERS' EQUITY	628
FINANCIAL DEBT	53

Net Net Asset Value (NNAV) for 2005 reaches 6,5% to 1,056 MM€, following Richard Ellis calculations.

- IBERDROLA Inmobiliaria income statement data:

	Million €	vs. 2005
NET SALES	43.7	-50.7%
GROSS MARGIN	22.7	-37.1%
EBITDA	15.2	-49.6%
EBIT	14.0	-52.3%
NET PROFIT	5.9	-61.2%

Balance sheet

January-March 2006

	Million €	vs. Dec. 2005
TOTAL ASSETS	31,712	+4.0%
TANGIBLE & INTANG.		
FIXED ASSETS	21,730	+1.8%
LONG-TERM INVESTMENTS	1,762	+8.1%
SHAREHOLDERS' EQUITY	9,486	+0.8%
NET DEBT	13,031	+6.7%

At 31 March 2006, Iberdrola's total assets came to 31,712 million euros, highlighting the maintenance of its strong capital position, even taking into account the large volume of investments made over the period (435 million euros). The leverage ratio was situated at 57.9% (54.7% without the tariff insufficiency effect), 240 pb above that recorded in March of 2005, mainly affected by the financing of the tariff insufficiency pertaining to IBERDROLA that, at March 2006, amounted to 1,583 million euros (1,259 million euros already recognized in 2005).

Analysis of the Balance Sheet

1. FIXED ASSETS

The total investments until March 2006 amounted to 435 million euros. They can be broken down as follows:

	Jan-Mar 2006	%
Spain	302	69.4%
Generation	88	
Renewable energy	59	
Distribution	113	
Other	42	
Mexico	83	19.1%
Generation	82	
Distribution	1	
South America	36	8.2%
Generation	5	
Distribution	31	
International: other	14	3.3%
TOTAL	435	100.0

With respect to the investments in Spain, those made on production activities stand out, with 147 million euros, broken down as follows:

- 88 million euros on the Generation Business.

- 59 million euros on the Renewables Business.

Investments in Mexico were mainly focused to both the combined cycles of Tamazunchale and Altamira V&VI, with 63 and 11 million euros, respectively. In Brazil, investments have primarily been made on the distribution business, most of them financed by funds raised in Brazil.

The figure given for "International: other" reflects the investments made on Renewables outside of Spain, representing a total of 14 million euros, basically for projects in Brazil, France and Greece.

2. SHARE CAPITAL

Share Capital as of 31 March 2006 was comprised of 901,549,181 bearer shares with a par value of 3 euros each.

The General Shareholders' Meeting held this past 30 March approved the distribution of a total dividend of 0.885 euro per share charged against fiscal year 2005, representing an increase of 15.2% per share over the dividend paid in 2005. This ratified the commitment assumed by IBERDROLA to increase the remuneration to shareholders in line with the growth in Net Profit.

On 2 January 2006 an interim dividend was paid against fiscal year 2005 in the amount of 0.367 euro per share and on 1 July 2006 a supplementary dividend of 0.518 euro per share will be paid

3. FINANCIAL DEBT

The net financial debt at the end of December amounted to 13,031 million euros and the financial leverage stood at 57.9%, 240 basis points above the 55.6% recorded at March of 2005. It should be pointed out that the debt figure mentioned includes 1,583 million euros from financing the tariff insufficiency effect corresponding to Iberdrola. Without such effect, financial leverage would have been 54.7%.

With respect to the average cost of debt, at 31 March 2006 it was situated at 4.60%, 3 bp higher than at March 2005.

The debt structure can be broken down by currency and interest rate as follows:

	March 2006	March 2005
Euro	84.1%	86.4%
Dollar	10.5%	9.5%
Real	5.0%	3.9%
Other currencies	0.5%	0.2%
Fixed Rate	61%	57%
Capped	13%	15%
Floating Rate	26%	28%

In line with the policy to minimise financial risks on debt, foreign currency risks have continued to be mitigated through the financing of investments in Latin America in local currencies (the real, in the case of Brazil) or in their functional currencies (dollar, in the case of Mexico).

The debt structure per company is shown in the following table:

	March 2006	March 2005
IBERDROLA S.A.	84.7%	83.6%
Mexico	4.7%	5.2%
South America	5.0%	5.7%
Renewable energy	2.8%	2.9%
Iberdrola Inmobiliaria and other	2.8%	2.6%
Total	100%	100%

Debt can be broken down by product type as follows:

	March 2006	March 2005
Euro bonds	39.7%	39.5%
US PP	5.1%	3.9%
Other Bonds	5.4%	4.6%
Domestic commercial paper	3.6%	3.3%
Euro commercial paper (ECP)	3.7%	5.4%
Euro loans	33.8%	33.6%
Loans in other currencies	8.7%	9.7%
Total	100%	100%

In addition, as a result of the refinancing policy followed by IBERDROLA, the average life of the debt increased from 4.3 years in March of 2005 to 4.7 years in March of 2006.

Lastly, the change in financial leverage has been as follows:

Million €	March 2006	December 2005
Shareholders' equity	9,486	9,415
Gross Debt	13,662	13,111
Derivatives (assets)	94	90
Temporary Financial Investments	286	601
Cash	252	215
Net debt	13,031	12,211
Leverage*	57.9%	56.5%

* Without the effect of the tariff deviation, leverage is 54.7% in March 2006 and 53.8% in December 2005.

4. WORKING CAPITAL

The figure for the Net Working Capital rose to 393 million euros, representing a decline of 154 million euros in relation to the 547 million euros recorded at the end of fiscal year 2005. This increase is broken down as an increase of 472 million euros in Current Assets and an increase of 626 million euros in Current Liabilities.

5. FUNDS GENERATED FROM OPERATIONS

The Funds Generated from Operations at March 2006 was situated at 665,7 million euros, representing an increase of 17% in relation to March 2005.

In the last quarterly review done by Moody's agency, the rating of "Excellent" for liquidity granted in June 2005 was maintained.

Breakdown of business contribution to Profits, Losses and Assets

	Sales	Oper. profit	Net Profit	Assets

IBERDROLA's Credit Rating		
Agency	Rating	Outlook
Standard & Poors (*)	A+	Negative
Moody's (*)	A2	Negative
Fitch IBCA (*)	AA-	Negative

(*) By virtue of the agreement for the acquisition of assets signed with Gas Natural and subject to the approval of the pertinent authorities:

- S&P has placed IBERDROLA at "credit watch with negative implications"
- Moody's has placed IBERDROLA at "review for a possible downgrade"
- After Government approval of Gas Natural bid over Endesa, Fitch placed the ratings for IBERDROLA at "credit watch negative" (RWN). On February of 2006, it upgraded its rating from A+ to AA- as a result of a change in its analysis methodology.

APPENDIX.- IBERDROLA and sustainability

The contribution of IBERDROLA to sustainable development is reflected in several social responsibility practices that attend to the needs and expectations of its Interest Groups, with whom the Company maintains a complex of means of communication and dialogue.

By these practices IBERDROLA achieves: communication on goals, activities, and successes achieved in the three aspects of sustainable development (economic, environmental, and social), as well as receiving the evaluations and requests from the parties involved.

1. SUSTAINABILITY INDICATORS

Corporate governance	
FTSE ISS Corporate Governance Index (CGI)	IBERDROLA has been included in the index

IBERDROLA, one of the companies with the best corporate reputation in the country

Fulfilment of the commitments to its Interest Groups and responsible conduct by the Company have won IBERDROLA recognition as one of the companies with the best corporate reputation in our country. According to the results of the 2006 issue of the Monitor Español de Reputación Corporativa (MERCO), the main index on

reputation among those published in Spain, IBERDROLA holds the number eight position among 100 companies that comprise the general ranking and is the leader in the energy, gas, and water industry.

With respect to the company leaders, the Vice President and Managing Director of Iberdrola, Ignacio Galán, is ranked among the top ten of the 100 executives evaluated and, furthermore, is at the top of the ranking for the industry.

3. ENVIRONMENTAL COMMITMENT

IBERDROLA is situated in the group of the 5 "Best in class utilities" in Socially Responsible Investment according to the ranking done by Innovest SRI Rating & Société Générale

Since the end of February 2006 the SRI ratings done by Innovest have been available for companies in Europe and nearby countries, covering a total of 681 companies. The Socially Responsible Investment Analysis Team of Société Générale has processed this data, obtaining the companies that are the Best in Class for each industry. The ranking of "Best in Class" obtained for the utilities industry is as follows:

"Best in class" Companies in Socially Responsible Investment, Utilities Industry	
1	Centrica
2	IBERDROLA
3	Scottish & Southern Energy
4	Scottish Power
5	Verbund

Source: Innovest, SG Equity Research

We are improving our handling of Corporate Social Responsibility according to the analysts of VIGEO

IBERDROLA has improved its score by 5 points in the preliminary 2005 evaluation done by the analysts of VIGEO, reaching 50 points, compared to the 45 obtained in 2004. IBERDROLA is thus situated closer to the maximum grade for the utilities industry, which is situated at about 62 points. The areas where IBERDROLA has significantly increased its evaluation were the prevention and control of contamination, going from 14 to 46 points, and the protection and control of biodiversity, going from 59 to 65 points. In addition, IBERDROLA continues to maintain leadership grades in other important areas such as the development of green products and services, with 96 points, and environmental strategy and eco-design, at 73 points.

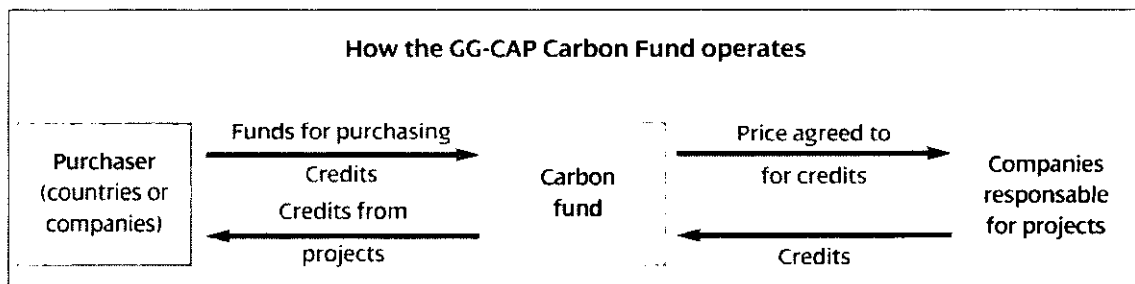

IBERDROLA has become the principal private participant in the Fondo Español de Carbono

IBERDROLA has become the principal private participant in the Fondo Español de Carbono for trading in greenhouse effect gases and emissions, after making a commitment to acquire 1,645,000 tons of CO₂. This fund, in which the Government and 12 companies participate, is managed by the World Bank and it enables IBERDROLA to fulfil

the commitments deriving from application of the Kyoto Protocol at a cost lower than what is now negotiated on the European CO₂ markets, with a price per credit at about 27 euros.

The Fondo Español de Carbono will acquire such credits from projects that avoid CO₂ emissions in developing countries that have ratified Kyoto but are exempt from reducing their emissions between 2008 and 2012. The money obtained for the credits will make such projects possible, which will make a significant reduction possible in greenhouse effect gases that cause global warming, the ultimate objective of the Protocol. Joining the Fondo Español de Carbono represents a further demonstration of the commitment of IBERDROLA to the environment and sustainable development. In this respect, it has been a pioneer in the implementation of cleaner electricity energy generation technologies, as demonstrated by its historical commitment to hydroelectric since its founding already more than 100 years ago.

4. CONTRIBUTION TO SOCIAL DEVELOPMENT

For IBERDROLA, the key events of the first quarter of 2006 for social aspects were as follows:

Specific projects

- **Support for disabled persons.** IBERDROLA is continuing to develop its ambitious "Implica2" Project, meant for training disabled persons so that they can participate in the labour market. What stands out in this quarter is its support for the Council of Castile-La Mancha, cooperating in various presentations and visits for availing the Asprona organization in Albacete of the experience of Fundación Lantegi Batuak. The ultimate objective of IBERDROLA is to extend this "model" of support to its other areas of influence. Furthermore, it has continued to cooperate with various initiatives that help the disabled in the Basque Region, Castile and León, Castile-La Mancha, and the Community of Valencia.
- **Family Responsibility Business Certificate.** In this period there has been a review of the basic processes required for obtaining certification. The most significant indicators are being defined and the systems are being designed for the measurement, control, and monitoring of the conciliation policies implemented for obtaining the certificate, issued by the *Fundación + Familia*.

"Surrounding Economic Development" Programme

- **Regional Advisory Boards.** Various meetings have been held of the Advisory Boards of

Castile and León, and of the Community of Valencia, respectively, comprised of important industrial and financial groups from these autonomous communities.

- **Support for companies in Castile and León.** IBERDROLA intends to help improve the competitiveness of small businesses in Castile and León by incorporating participation in the Foro de Empresas and Organizaciones Inductoras de la Excelencia. This forum was created as an advisory body for the Council of Castile and León on the subject of innovation and excellence in business management.
- **Dissemination of Corporate Social Responsibility.** IBERDROLA participated in 4 conferences promoting corporate social responsibility practices, presenting the "IBERDROLA model" in business and academic circles.

"Art and Culture" Programme

- **Reconstruction and Illumination of Monuments.** Agreements have been signed for cooperation in executing the following projects: Illumination of the cathedral and the murals in Ciudad Rodrigo (Salamanca), restoration of the Zeanuri (Vizcaya) parish church, illumination of the Casita del Príncipe in the Escorial (Madrid), and illumination of the sanctuary of La Virgen del Rosario in Hellín (Albacete). In addition, the Chairman, the Vice Chairman, and the Vice President and Managing Director of IBERDROLA inaugurated the "La luz de Flandes" exposition in Burgos, displaying the restoration work on the Cartuja de Miraflores, undertaken with the cooperation of our Company.

- **Publications.** The Fundación IBERDROLA, within the context of commitment to the dissemination of culture and science, has published two new books: *La democracia en América* (Alexis de Tocqueville) and *Recuerdos de mi vida. Santiago Ramón and Cajal* (published by Juan Fernández Santarén).
- **V International Forum of the Alliance of Cities Against Poverty.** IBERDROLA has supported the municipality of Valencia in holding this forum, organized jointly by that administration and the United Nations Programme for Development, with the cooperation of the Parliament of Valencia.

"Education and Training" Programme

- **Promotion of Energy Savings and Efficiency.** An agreement has been made with the Community of Madrid for the development of a plant of action (seminars, energy audits, etc.), with the purpose of informing public opinion as to the rational use of energy and thus being able to reach more sustainable development.
- **Museo de la Electricidad.** The IBERDROLA Museo de la Electricidad, located in San Agustín de Guadalix (Madrid), has received more than 20,000 visits since its inauguration (in the year 2003).
- **Electrical Safety Training.** Among its training campaigns in handling electricity facilities for occupational groups, IBERDROLA has provided a course meant for the fire-fighters of Guadalajara focused on the specific aspects of extinguishing fires at wind farms.

"Solidarity" Programme

- **Fundación IBERDROLA projects.** Fundación IBERDROLA has committed its support to 11 new social action projects meant for the disabled, immigrants, and other disadvantaged groups.

5. CORPORATE GOVERNANCE

The highlights for Corporate Governance over the first quarter of 2006 were as follows:

General Shareholders' Meeting

This past 30 March 2006, a regular general shareholders' meeting was held in which the Chairman, Mr. Iñigo de Oriol, said goodbye to the shareholders making reference to the meeting of the board of 20 April 2005 which, among other things, adopted the resolution, made public appropriately thereafter, that the Vice Chairman and Managing Director, Mr. Ignacio Sánchez Galán, was succeeding him as Chairman on the board that was to meet on the coming 26 April 2006.

In addition, that meeting of the board resolved to modify certain articles of the charter and of the bylaws of the general shareholders' meeting:

- a) Modification of Article 19 of the charter and Article 8 of the bylaws of the general shareholders' meeting to adapt the wording of both provisions to that established in the First Final Provision of Law 19/2005 of 14 November on European joint stock companies domiciled in Spain with respect to extending the term for publication of the

notice of meeting for a general shareholders' meeting and the right of shareholders to request publication of a supplement to the notice of meeting including new points on the agenda of meeting.

- b) Modification of Article 22 of the charter and Article 10 of the bylaws of the general shareholders' meeting so as to eliminate the requirement relating to the minimum number of shares conferring the right to attend a general shareholders' meeting.

Furthermore, it was resolved that the firm "ERNST & YOUNG, S.L." be appointed as auditor for the Company and its Consolidated Group, which firm will do the auditing for a period of 3 years for the annual reports for fiscal years 2006, 2007, and 2008. This resolution was adopted upon the proposal of the Board of Directors upon the prior favourable report from the Committee on Auditing and Compliance and after the holding of bidding among the major international auditing firms within the context of the "IBERDROLA Group Policy on Retaining Auditors" approved by that committee on 23 November 2005.

Finally, it was resolved to ratify the appointment of Mr. Xabier de Irala Estévez and of Mr. Jesús María Cadenato Matía, directors designated by cooption on 20 April 2005.

Board of Directors

The Board of Directors, in its session held this past 22 February, unanimously resolved, upon the proposal of the Committee on Appointments and Remuneration, to reinstate Mr. Sebastián

Battaner Arias as independent director, considering the fact of his present disassociation from the savings institutions grouped within Federación de Cajas de Ahorro de Castile y León, his lengthy professional experience, his demonstrated independence in judgment and solid personal prestige, as well as his broad institutional presence in an area of extreme importance to IBERDROLA, S.A.

This assumes that the mentioned savings institutions, as of the date of that resolution, ceased to be deemed the holders of significant shares, considering the equity share thereof and the lack of representation on the board.

Reports and other resolutions

This past 22 February 2006, the Board approved the Annual Report on Corporate Governance for 2005, in accordance with the form required by Circular 1/2004 of 17 March of the Spanish securities regulator (CNMV).

On the same date, the Board of Directors approved the Report on the Activities of the Audit and Compliance Board for fiscal year 2005, the publication of which is intended to contribute to "good practices" in corporate governance by disseminating the annual activities of the latter Board.

Disclosure

One of our Company's core corporate governance principles is to promote maximum transparency in the information -financial and other- provided to shareholders and markets. In line with this commitment, in the first quarter of 2006, the

company maintained a high level of activity with regard to information for institutional investors and financial analysts, which no doubt contributed to the excellent performance of IBERDROLA's stock over the period.

Furthermore, the Spanish stock market commission has been informed as to all of the pertinent facts arising in relation to the Corporate Governance of the Company, such as the notice of meeting, documentation, and resolutions of the general shareholders' meeting held this past 30 March, providing as well the Periodic Public Information and the Annual Financial Statements for 2005, which include material on related transactions.

Spanish stock market commission (GNMV): Principal relevant facts and other communications since January

Event	Registration No.

Senior Unsecured Debt Credit Rating	Outlook
A+	Credit watch negative
A2	Credit watch negative
AA-	Credit watch negative

(*) By virtue of the agreement for the acquisition of assets signed with Gas Natural and subject to the approval of the pertinent authorities:
 - S&P has placed IBERDROLA Senior Unsecured Debt Credit Rating at "credit watch with negative implications"
 - Moody's has placed IBERDROLA Senior Unsecured Debt Credit Rating at "review for a possible downgrade"
 - After Government approval of Gas Natural bid over Endesa, Fitch placed the Senior Unsecured Debt Credit Rating of IBERDROLA at "credit watch negative" (RWN). On February of 2006, it upgraded such rating from A+ to AA- as a result of a change in its analysis methodology.

Nine months
results
2006
Quarterly report

NET PROFIT TOTALS 1,236.4 MILLION EUROS IN NINE MONTHS

Maintaining the growth trend of the First Half of the year, in line with the targets of Net Profit set in the Strategic Plan 2001-2006

More production (66,613 GWh; +8.9%), while reducing CO₂ emissions by 8.2%.

- Increase in hydro (+10.7%) and nuclear production (+14.5%).
- Wind and mini-hydroelectric production increases to 5,608 GWh (+15.1%; 494 GWh International).
- Production from combined cycles in Spain increases by 13.7%.
- CO₂ emissions reduced by 14.8% in Spain, reaching 30,948 GWh of emission-free production, 62.1% of the total generated.
- In Mexico and Brazil, production increases by 14.3% over the same period in 2005.

EBITDA up 22.6% to €2,934.9 million.

- Domestic Energy business (excluding Renewables) increases EBITDA by 23.3% due to the improving evolution of Supply and Gas businesses.
- Renewables and International business represent 31% of EBITDA, compared with 27.5% for same period in 2005.
 - Wind Energy business EBITDA reaches €410.1 million (+42.5%).
 - EBITDA of International business totals €501.3 million (+35.1%).

2007-2009 Strategic Plan.

- A growth Plan based on Energy business: Investments for Eur 9 Bn along the period
- Creating a larger, more efficient, more profitable, more international and more solid IBERDROLA
- Strategic Plan's targets: Net Profit of Eur 2,350 MM, dividend to grow in line with Net Profit, leverage below 55%, Net Operating Expenses to Gross Margin ratio lower than 28%.

(1) Includes the amounts corresponding to the tariff insufficiency: €1,341 million as at December 2005 and €427 million corresponding to 2006 accumulated as at September 2006.

(2) Net debt/(Net debt + Shareholder's equity). Includes financing of the tariff insufficiency. Not including this issue, leverage as at September 2005 would stand at 54.8% and at 54.9% in September 2006.

Highlights of the period

- As at 30 September 2006, IBERDROLA achieved a new record in Group's production, which grew 8.9% to 66,613 GWh, driven by the use of the most environmentally efficient technologies. This high growth has been achieved while reducing CO₂ emissions by 8.2%. In Spain, emissions were reduced by 14.8%, which led emission-free production to contribute 62.1% to total production, which reached 49,870 GWh. It is also worth highlighting that:
 - Hydro production increased by 10.7%
 - Wind production grew 17.2% to 5,181 GWh (494 GWh international).
 - High availability of nuclear power plants, with an output increase of 14.5% compared to 2005.
 - Production from combined cycles increased by 13.7% in Spain and by 14.3% in Latin America.
 - Reduction in production from the most-polluting energy sources, with a decline of 14.9% in production from coal and 38.1% from fuel oil.
- Operating Profit recorded a significant improvement both in gross terms (EBITDA +22.6%) and in net terms (EBIT +21.5%).
- The Domestic Energy business (ex-Renewables) increased its EBITDA by 23.3% due to the growing contribution from Commercial and Gas, which reduced the impact of Royal Decree-Law 3/2006 on the Distribution business. It should also be noted that IBERDROLA Distribution, SAU initiated operative actions on 9 June 2006 for the purpose of minimising the effects of the Royal Decree-Law mentioned above.
 - Renewables: EBITDA grew to €410.1 million, after a 17.2% increase in wind energy production.
 - International: EBITDA up 35.1% to €501.3 million, due to the positive development of business in Mexico and Brazil. Of particular note is the 14.3% increase in production, obtained as a result of improvements in efficiency and availability in generation, and a 4.4% increase in distributed energy. The positive development in the exchange rates for the reference currencies in the period, which had an impact of around € 49 million, should also be mentioned.
- Net Profit was €1,236.4 million (+25.7%), slightly above the 21.5% improvement seen in EBIT and in line with that obtained in the first half of the year. In addition, Net Profit

includes €178 million accounted for as Income from Non-Current Assets derived from the recurrent real estate business, as well as the sale of Azertia, which was partially offset by a higher tax rate of 31.9% compared to 29.4% in 2005, and greater financial expenses resulting from the increase in average net debt due to the effect of the tariff insufficiency.

- In October, IBERDROLA signed two transactions with Gamesa that will allow the Company to achieve the growth targets included in the Strategic Plan. Under the first transaction, IBERDROLA will purchase from Gamesa 2,700 MW of wind turbines for Eur 2.3 Bn in the period 2007-2009; under the second transaction, IBERDROLA will purchase wind parks in the US for a capacity close to 1,000 MW.
- On October 4th, IBERDROLA presented its 2007-2009 Strategic Plan, with the following highlights:
 - A larger size: The Company will invest € 9 billion in the period.
 - More internationalization: Almost 40% of total investments will be allocated outside Spain.
 - More strength and solidity: Leverage below 55%.
 - Improvements in efficiency: Net Operating Expenses to Gross Margin ratio will be below 28%.
- More profitability: Increasing Net Profit (€ 2,350 million in 2009) and more dividends (over € 3 billion).

Development of the Strategic Plan 2001-2006

1. INVESTMENTS IN GENERATION

Installed capacity

During the first nine months of 2006, IBERDROLA commissioned 176 MW of additional capacity over the levels of December 2005, reaching 28,065 MW of total installed capacity. The new capacity put on line is derived entirely from new wind energy and mini-hydroelectric facilities. Spain represents 88.25% of total installed capacity, with 24,768 MW.

Year-on-year, the installed capacity at the end of the first nine months of 2006 is 2.9% higher than at the end of the same period in 2005. The following is a breakdown of the capacity added in the last 12 months:

Additional capacity (MW)	MW	Facilities commissioned in the last 12 months
Wind and mini-hydroelectric	772	New plants in Spain, Europe and Latin America
Conventional generation	23	Recognised capacity increases
Total	795	

1.1 SPAIN

- Combined Cycle Plants

Installed capacity

Total operating capacity of IBERDROLA in Combined Cycle plants in Spain at the end of September 2006 was 4,000 MW (4,800 MW under management), corresponding to eight plants.

Project	Capacity (MW managed)	Start of operations
Castellón	800	2002
Castejón	400	2003
BBE	800	2003
Tarragona	400	2003
Santurce	400	2004
Arcos Grupos I y II	800	2004
Aceca	400	2005
Arcos Grupo III	800	2005
Escombreras	800	2006
Total 2006	5,600	
Castellón 4	800	2007
Total 2002-2007	6,400 (5,600 OWNED)	2007

Escombreras Combined Cycle

In October, IBERDROLA is finishing the testing period before the start of commercial operation of its new combined-cycle group in Escombreras (800 MW), in Cartagena (Murcia), the ninth built by the Company in Spain since the 2001-2006 Strategic Plan was implemented. This group will begin to contribute to results in the fourth quarter of this fiscal year, bringing attributable capacity installed to 4,800 MW at the close of the 2006 fiscal year.

Construction of this new combined cycle implied dismantling the old fuel oil-powered groups 1, 2 and 3, with a total capacity of 280 MW that the Company had in place on the same land, while maintaining operational groups 4 and 5 with a total capacity of 554 MW.

- Hydroelectric energy

The Ministry of the Environment has authorised two new hydroelectric plants, corresponding to a new unit in the La Muela plant, in Valencia, which will multiply by two its current capacity (630 MW), and a increase in capacity of 175 MW in the San Esteban plant, in the basin of river Sil.

- Wind and Mini-hydroelectric energy

As of 30th September 2006, IBERDROLA had a **installed capacity** of 4,076 MW (3,743 MW of wind energy and 333 MW of mini-hydroelectric plants), which strengthens

IBERDROLA's position as worldwide leader in this business. In the first nine months of this fiscal year, 266 additional MW were installed (249 MW of wind energy and 17 MW mini-hydroelectric). Year-on-year, installed capacity at the end of September 2006 is 23.4% higher than at the end of September 2005.

IBERDROLA plans to reach 10,000 MW of installed power by 2011. With this aim, the Company has carried out a number of operations in the area of renewable energies outside Spain during the nine months of 2006, which increases the project portfolio, now standing at 18,000 MW.

In respect to the **installed capacity by geographic area**, the Company's wind generation facilities now include wind farms in twelve autonomous communities in Spain and in four additional countries: Greece, Portugal, France, and Brazil. In addition to development in countries where it is already present, it has projects at an advanced stage of

development in the UK, Greece, Poland, Germany, France and the US. 91% of the installed capacity of IBERDROLA in renewable energy is located in Spain (3,728 MW). With regard to projects outside of Spain, IBERDROLA already has a total of 348 MW in operation. As a whole, 9% of the 4,076 MW of total installed capacity of IBERDROLA is located outside Spain. IBERDROLA has incorporated into its CORE (Renewables Operation Centre) its wind farms operating in France, Brazil and Portugal, and intends to gradually include all facilities abroad.

New operational capacity:

Spain: The new capacity installed in Spain during the first nine months of 2006 totalled 154 MW, of which 121 MW were installed in Castilla y León and Castilla-La Mancha.

International: New capacity entering into operation during the first nine months of 2006 totalled 112 MW, represented by, among others, 28 MW in Germany as a result of the agreement with Gamesa Energía, 22 MW in France and the completion of existing facilities in Brazil and Greece.

Pipeline of projects

IBERDROLA already has a pipeline of projects totalling 18,000 MW at different stages of development, both in Spain and abroad.

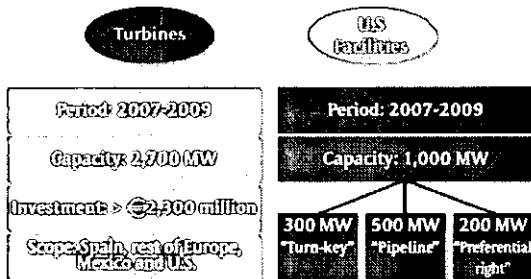

During the first nine months of the year, several international operations were carried out involving additions to the IBERDROLA project portfolio. Of these, the most important is the agreement with Gamesa:

MW	Under development	Validated resource	Connection rights and under construction
Spain	6,142	6,427	2,039
<i>Wind power</i>	5,288	4,946	1,941
<i>Mini-hydro</i>	192	192	90
<i>Other technologies</i>	662	289	58
International (Wind power)	11,777	6,580	1,203
Total	17,920	11,008	3,292

- **Agreements with Gamesa.** The Boards of Directors of IBERDROLA and Gamesa approved the signing of the largest contract for the supply of wind turbines in the history of the wind energy sector (more than €2,300 million), which will be carried out between 2007 and 2009.
 - Under the terms of this agreement, IBERDROLA will acquire wind turbines from Gamesa with total generation capacity of 2,700 MW. Gamesa will make available turbines for its wind energy projects in Spain, the rest of Europe, the United States and Mexico. The amount of the contract includes the assembly and placing in operation of the wind turbines, as well as operation and maintenance services for those turbines during the guarantee period.
 - In addition, the Boards of Directors of the two companies have approved the conclusion of a wind farm sales agreement in the United States between 2007 and 2009 with installed capacity of about 1,000 MW that will be located in

the states of Pennsylvania, Texas and Illinois. Under this agreement, IBERDROLA will acquire wind-energy facilities with about 500 MW of generation capacity that Gamesa will put into operation by the end of 2009. Of these, there is a firm commitment for 300 MW, with an option on the other 200 MW. The other 500 MW will correspond to the acquisition of projects under development. The price of this transaction, that will be in the range between USD 700 million and USD 1,000 million, will be determined as a function of technical and time variables and the final number of megawatts of wind power acquired by IBERDROLA.

The turbine agreement is the largest transaction in IBERDROLA history.

- **Acquisition of Community Energy in the US**, with headquarters in Wayne, Pennsylvania, which has a portfolio of projects totalling 2,000 MW of wind energy in various locations on the country's East Coast in the preliminary study stage and with high likelihood of receiving authorisation, with an additional 200 MW

at an advanced stage of development. Community Energy Inc. is the leader in renewable energy certificate trading in the Northeast of the United States, with around 75,000 residential customers and 350 industrial and commercial customers.

- **Acquisition of French company Perfect Wind**, considered one of the companies with the greatest potential for development in the wind energy sector in France, with a project portfolio of 600 MW, of which 10 MW correspond to a wind farm now in the testing period and 86 MW from projects at an advanced stage of development.
- **Signing of Framework Agreement in China** with the district council of Bayannaer, to study locations where at least 1,000 MW of wind energy output could be installed. Installation depends both on the results of wind measurements and on the approval of the regulatory framework in China, which must be stable and allow for the project's profitability.
- In addition, IBERDROLA has reached an agreement with Guanxi Guidong Electric (300 MW in hydroelectric generation and electric transmission) for the acquisition of a 29% stake in the above-mentioned company.
- New developments have been initiated in Poland, the UK, France, Hungary and Estonia.

- Other Renewable Energy Sources

Solar thermal Energy

In its portfolio IBERDROLA has a total of 13 projects for thermoelectric solar energy in Spain, totalling 605 MW of installed capacity located in Sevilla, Ciudad Real, Madrid, Murcia, Badajoz, Zamora, Albacete, Soria, Teruel and Almeria.

Photovoltaic Energy

The priority is the development of an own pipeline in IBERDROLA's combined cycle and nuclear plants. Currently IBERDROLA has an advanced portfolio of 30 MW in Spain.

Biomass

Development of biomass projects will be done on a very selective basis, always including guarantees that raw material will be supplied over the long term. IBERDROLA plans to install Spain's first timber biomass plant, which will be located in the municipality of Corduente (Guadalajara). IBERDROLA also has two other projects at an advanced stage which will bring the portfolio of the most advanced projects up to 25 MW.

Mini-Hydroelectric within Special Regime

IBERDROLA has a portfolio of 192 MW in Spain and 100 MW at international level.

- Cogeneration

Operating capacity

IBERDROLA has operating capacity in cogeneration plants in Spain of 387 attributable MW, equivalent to a total of 562 MW installed,

corresponding to 28 cogeneration plants. IBERDROLA has five liquid manure processing plants, of which the two located in Castilla y León are already in operation.

Capacity under construction

In the month of June, IBERDROLA and its partners began steps for construction of the bioethanol production plant at Barcial del Barco (Zamora). This plant will mean lower levels of CO₂ emission into the atmosphere, amounting to 110,000 tonnes annually.

1.2 Latin america

Mexico

IBERDROLA has consolidated its position as the top private electricity producer in Mexico. The Company already has installed capacity of 2,696 MW, and is building another two combined cycle plants: Altamira V with 1,121 MW, which will be put into operation in November 2006, and Tamazunchale with 1,135 MW, which will start operating in June 2007, the two biggest plants awarded to date in Mexico.

Project	Capacity (MW)	Start of Operations
Enertek	120	100% operational
Monterrey	1,037	100% operational
Altamira IV	1,036	100% operational
La Laguna	500	100% operational
Altamira V	1,121	2006
Tamazunchale	1,135	2007
Total	4,949	

In the area of wind energy IBERDROLA is developing projects in the State of Oaxaca with total capacity up to 150 MW.

Brazil

In Brazil, IBERDROLA has the hydroelectric plant of Itapebí, 450 MW (175 MW attributable to IBERDROLA) and the combined cycle of Termopernambuco with an installed capacity of 520 MW (203 MW attributable to IBERDROLA). In addition, IBERDROLA has six cogeneration plants (93 MW) for private customers through its subsidiary Energyworks Brazil (100% IBERDROLA).

During the first quarter of the year, Neoenergia (39% IBERDROLA) was awarded concessions for building, maintaining, and operating the hydroelectric plant at Baguari and the mini-hydroelectric plants of Nova Aurora and Goiandira, totalling 188 MW of installed capacity.

In the field of wind energy, during the first nine months of the fiscal year IBERDROLA has continued to put into operation the Rio do Fogo wind farm, a Clean Development Mechanism (CDM) project. Located in the state of Rio Grande do Norte (Brazil), this project totals 49.3 MW fully installed and at test stage.

1.3 Europe

Greece

In the field of wind energy, IBERDROLA has 193.3 MW on line and 44 MW under construction. IBERDROLA is a strategic partner

of Rokas, the top developer and operator of wind farms in Greece, in which it has a 49.9% share. Also in Greece, in October IBERDROLA will finalize the acquisition of the first wind farm in operation (17 MW), which forms part of the agreement on 56 MW signed for this purpose in July 2005.

In the area of **combined cycles**, in the third quarter IBERDROLA acquired from Motor Oil Hellas a 70% interest in Korinthos Power, a Greek company licensed to participate in the bidding process for new combined-cycle capacity begun by the Greek government. Motor Oil will retain 30% of the capital of Korinthos after IBERDROLA buys its stake, and through this agreement both companies intend to enter into the bidding process jointly. The operation carried out with Motor Oil strengthens the Company's commitment to the Greek energy market, which is considered as strategic by IBERDROLA.

Portugal

In the **wind energy** sector, IBERDROLA has 18 MW in operation in Portugal, from the Catefica wind farm. In addition, IBERDROLA has connection points for 150 MW that will enter into operation in the next two years.

Other Countries in European Union

IBERDROLA has various projects in other countries of the EU, mostly in the area of wind energy:

- In **Germany**, 28 MW of **wind** energy have entered into operation at three wind farms. These were the result of a purchase agreement with Gamesa. Additionally, 54 MW are being developed by IBERDROLA and are at various stages of development.
- In **Poland**, IBERDROLA will have 40.5 MW of **wind** energy in operation at the end of 2006 and will begin construction on another 18 MW in October. It also has 103 MW in its portfolio, to be developed in the coming years.
- In **France** IBERDROLA has 42 MW of **wind** energy in operation. The company has a strategic interest in the acquisition of rights and farms in an advanced stage of development, or in positioning itself as an investing partner for local developers. IBERDROLA has an agreement with the German developer P&T Technology and its financial services subsidiary EECH AG for the purchase of farm development rights both in France (100 MW) and in Italy (200 MW). In addition to these agreements, there are the projects acquired from Perfect Wind of 600 MW in portfolio, of which 86 MW are projects at an advanced stage. IBERDROLA has also entered into an agreement with Total and OPT to develop wave energy projects and will start studying sites in France.
- In the **wind** energy sector in **Italy**, through an agreement with P&T, IBERDROLA has the right to acquire 100 MW with an optional expansion of a further 100 MW.

IBERDROLA will also acquire a total of 100 MW from Gamesa over the 2006-2009 period under the agreement signed in 2005.

- In the **United Kingdom**, IBERDROLA is developing projects in the area of wind energy that, although in the initial phases, could total 145 MW. In addition, IBERDROLA has completed its first acquisition of wind farms in the UK - two wind farms with a total of 20.55 MW that will enter into operation at the end of 2007.

Other Geographical Areas

In **Latvia**, IBERDROLA has been awarded the construction and the operational supervision and maintenance during 12 years of a combined cycle plant of 420 MW of installed capacity in Riga.

Trading

The Company is developing a major trading business in Europe, with operations in Austria, Belgium, France, Germany, the Netherlands, Portugal, Spain, Switzerland and Italy. In addition, IBERDROLA is participating in monthly and daily auctions carried out by the French electricity system operating company (RTE), which enables it to access the interconnection with Italy. The Company aims to extend these activities in the short term in Europe to other countries such as Poland, Greece and the United Kingdom.

2.- DISTRIBUTION

2.1 Spain

At the end of the first nine months of fiscal year 2006, IBERDROLA had 9.7 million users in Spain, with total energy distributed on the grid totalling 74,553 GWh, a 4.0% increase over the same period the previous fiscal year. 78.5% of the energy (58,496 GWh) was distributed to the market under integral tariffs.

2.2. Latin America

At the close of the first nine months of 2006, IBERDROLA has already more than 8.4 million users under management in the region, with energy distributed totalling 20,592 GWh, an increase of 4.4% over the same period in the previous fiscal year.

3.- SUPPLY

3.1 Electricity

- Spanish business: eligible electricity customers

The energy sold on this market totalled 5,674 GWh, a decline of 74.9% from the same period in 2005, as a consequence of the policy of optimisation of results followed.

3.2 Gas

Procurements:

In the first nine months of 2006, IBERDROLA consolidated its position as Spain's second-largest gas supplier, providing 14.4% of total gas consumed in the deregulated market. IBERDROLA also ended the period with a global supply portfolio of 16.5 bcm per annum, 7.60 bcm of which cover its supply requirements in Spain, with 8.90 bcm in Mexico and Brazil.

During the period, the most significant gas procurements activities were the following:

- Receipt of the first cargo of natural gas at the Sagunto regasification plant, which has the capacity to process 6 bcm per annum since it began operations on 1 April of this year. The vessel Al Thakhira, from Qatar, unloaded 145,000 m³ of LNG at the Saggas terminal, equivalent to 900 GWh of natural

gas. IBERDROLA is the plant's largest shareholder, with a 30% stake.

- Receipt of the first cargo of liquefied natural gas (LNG), with capacity of 145,000 cubic meters, under the procurement contract signed with Nigeria LNG on 1 April 2002. This shipment falls within the agreement signed with Nigeria LNG for IBERDROLA's long-term acquisition of 10 bcm of LNG.
- Exports to France through the Larrau-Calahorra international gas pipelines and the new Euskadour pipeline. IBERDROLA has already accumulated 1,500 GWh exported in 2006. IBERDROLA was the first company to export gas through Euskadour after it entered into service in June 2006.
- During the fiscal year, to optimise the flexibility of its gas basket, the Company has developed various trading activities, the financial results of which will be discussed below.
- In April, IBERDROLA successfully passed the inspection of the Oil Products Strategic Reserves Company (Corporación de Reservas Estratégicas de Productos Petrolíferos) or CORES with respect to minimum security inventories of natural gas, maintaining 36.5 days, as against the 35 required by Spanish regulations.

Infrastructure:

In order to guarantee the entry of LNG into the gas system, IBERDROLA signed the

corresponding agreements for access to the networks, and is promoting first-class infrastructures: the Sagunto regasification plant, in which IBERDROLA is a major shareholder, with 30%, recently approved a 50% expansion of capacity to 9 bcm per annum. The Bahía Bizkaia Gas regasification plant (BBG, 25% IBERDROLA stake) has also been received a classification of "A" in Ministry of Industry planning for carrying out a similar expansion. The Bahía Bizkaia Gas plant has been operating since August 2003 and has received over 100 methane tankers.

It also holds 12% of the company Medgaz, which is developing a direct submarine gas pipeline between Algeria and Spain, with capacity for 8 bcm per annum. It was granted in 2005 as a priority project for the Government, and recently received administrative authorisation from Spain. IBERDROLA has already guaranteed the receipt of at least 1.6 bcm per annum of gas through this new pipeline, beginning in 2009.

In the second quarter of 2006 the company announced it will distribute natural gas for the first time to five cities in the Community of Madrid, to which end it will invest € 30 MM in developing the necessary gas infrastructure, which will benefit over 35,000 homes.

Supply:

In the first nine months of 2006, IBERDROLA consolidated its position as second-largest gas supplier in Spain.

In Europe, in groundbreaking activities in the deregulation of the French market, IBERDROLA began supplying gas to industrial users in that country in 2005.

4. NON-ENERGY BUSINESSES

iberdrola Inmobiliaria

At the close of the first nine months of 2006, IBERDROLA (through the holding company and its subsidiary Iberdrola Inmobiliaria) is working on 18 residential developments (1,488 houses). In the first nine months of the fiscal year, 445 homes were sold. With regard to non-residential projects, construction of the AQUA MULTIESPACIO real estate development (Valencia), with 83,000 square metres in constructed surface area, has been completed, and was inaugurated in May. This real estate business is being operated through company Oceanic Pacific Centre, in which Iberdrola Inmobiliaria holds a 50% stake. The construction of the Landaben (Pamplona) Industrial Polygon has been completed as well.

Investments made to purchase land under public deed from 1/1/06 to 9/30/06 totalled €240.2 million. Investments made in development and other items related to land purchases totalled €5.7 million. Investments made in construction works totalled €56.1 million. Likewise, at the end of September the capital gains of several recurrent transactions have been included. Of special note are those done with assets in Vicálvaro and Aguacate.

Iberdrola Ingeniería y Construcción

Iberdrola Ingeniería y Construcción is executing projects in over 20 countries and has offices in Mexico, Brazil, Russia, Qatar, Greece, Poland, United Kingdom, US, Venezuela, Tunisia, Latvia, Albania, Kenya and Slovakia. The value of the project portfolio is €2 billion.

In the third quarter of 2006, Iberdrola Ingeniería y Construcción obtained an important award for the 225 MW expansion of a open cycle plant in Fujairah (Arab Emirates) for \$144 million.

Likewise, IBERDROLA Ingeniería has strengthened its overseas presence in the nine months of the fiscal year by securing 13 major contracts: the construction of the 760 MW combined-cycle plant in Syria (valued at €430 million); the contract to reinforce the electricity grid of the state of Falcón, in Venezuela (USD 80 million); a new contract awarded by the Mexican public electricity company (CFE) to reinforce the electricity grid in the state of Tamaulipas (USD 63.6 million); a contract for the supply of new tubular beams of optimised design for the four condensers of the units 3 and 4 of the Bohunice V2 nuclear plant in Slovakia (about €11 million), as well as other contracts in Italy, Brazil, for the Nuclear plant of Angra, and in Russia, Taiwan and China, three contracts in nuclear plants for maintenance, fuel management and criticality calculations, respectively.

In Spain, we note the following as the most significant projects awarded: the construction of the substations and transmission lines necessary for the transmission of the power generated at the Arcos de la Frontera Combined-Cycle Plant (€18.6 million), the construction of a 1 MW photovoltaic solar plant in Toledo (€6 million) and phase V of the photovoltaic solar project for Telefónica (€1 million).

5. TARIFF INSUFFICIENCY

The Company has not registered the tariff insufficiency corresponding to 2006 as it considers that the current regulation establish the necessary mechanisms in order to guarantee its recoverability. The impact of the tariff insufficiency is treated in detail in a specific chapter.

6. STRATEGIC PLAN 2007-2009

IBERDROLA's Strategic Plan for 2007-2009 and projections through 2011 ratify the Company's commitment to Spain and to its investors, customers, employees and the society in general, and increase the process of internationalisation begun in 2002. In keeping with the successful path laid out five years ago, IBERDROLA's strategy for the coming years contemplates the beginning of a new investment cycle, during which €9,000 million (+20% over the previous three-year period) will be invested in the basic energy business, both in Spain and abroad.

In this regard, the Company will invest almost €5,600 million (62% of the total) in continuing to ensure that the energy requirements of Spain are met while strengthening its leadership in quality of supply. The remainder of the planned investment (more than €3,400 million) will be used to take advantages of profitable business opportunities abroad. Some of the funds for IBERDROLA's planned investments will derive from the divestment of non-strategic assets: The Company plans to obtain €1,000 million from the sale of its participations in various companies, as well as some real estate assets.

Among the main operating objectives IBERDROLA planned in its 2007-2009 Strategic Plan are:

- **Liberalised Business in Spain:**

IBERDROLA will invest about €1,750 million in the Liberalised business in Spain (19% of the total), which includes the areas of generation and supply of electricity and gas.

The strategy of the Company in this area for the coming years will be to anticipate the new scenario in Spain, characterised by an increase in installed capacity through combined-cycle plants (22,000 MW in 2009), increased environmental requirements and new system's needs.

IBERDROLA plans to finish bringing on line two combined cycles in the period: Escombreras (800 MW), in Murcia, which is already being tested this summer, and Castellón 4 (800 MW). With these plants, IBERDROLA will have total managed cycle capacity of 6,400 MW in Spain.

Once it has been guaranteed that demand is covered by the new combined-cycle plants brought on line and under construction, IBERDROLA will focus in this stage on increasing the system's reliability and flexibility by investing in hydroelectric plants capable of covering peaks of demand. In addition, and taking into account the possibility that increases in consumption could be greater than expected, the Company has a broad portfolio of combined cycles in a

very advanced stage of administrative authorisation.

With the investments in these clean generation technologies, IBERDROLA is reiterating its more than one-hundred-year-old commitment to sustainable development, which has made it the global leader in wind energy and a pioneer in defending the Kyoto Protocol to fight against climate change caused by greenhouse gases. Along these lines, the Company intends to confirm during the period its position as one of the most environmentally friendly utilities in Europe.

- **Regulated Business in Spain**

The Regulated Business in Spain (distribution of electricity and gas) will take 20% of all investment (€1,800 million). In the next few years, IBERDROLA wants to strengthen its leadership position in quality of supply in Spain, reflected in a record ICEIT of 1.68 hours in 2005.

In this way, the Company intends to end the 2009 fiscal year with a 25% improvement over the average quality of service of the period 2000-2005.

- **Renewable Energy**

37% of the total investment of the Plan will be made in this business (about €3,250 million), with the objective of having installed capacity rising to at least MW 7,000 at the end of the period, which will represent growth of 84% over 2005 year end (3,810 MW).

The Company intends to have installed renewable operating capacity of 10,000 MW in the year 2011.

- **Latin America**

The Company will continue to explore new business opportunities in Latin America, where it will invest about €1,550 million (17% of the total), much of it coming from the cash flow generated in the region. The Company intends to consolidate its position as the top private electricity producer in Mexico, with installed capacity of 5,500 MW.

- **Engineering and Non-energy**

Although the Strategic Plan is focused on the energy business, the Company remains diversified in profitable activities. In this way, engineering and the non-energy business, which account for 7% of all investment for the period from 2007-2009 (€650 million) will continue to be a growth vector for IBERDROLA.

- **IBERDROLA Ingeniería y Construcción.** This subsidiary, which in terms of sales has become the largest engineering company in Spain, employs more than 1000 professionals and has a global portfolio of projects valued at about €1,500 million. Its new strategic planning is based on progressive internationalisation - in 2009, 70% of its total sales will be made abroad - and on winning clients outside the IBERDROLA Group.

- **IBERDROLA Inmobiliaria.** This company, with assets valued over 3,000 million euros, has a broad portfolio of products: primary residence, tourist accommodations, offices, industrial buildings and shopping centres. Its objective for the coming years is to replicate the model of success developed to date in Spain in the countries in which IBERDROLA is increasing its presence.

Improvements in efficiency continuing

IBERDROLA, will continue to make progress in efficiency, with additional improvements of 20% in Generation and Distribution until 2009. In addition, it is expected that by that date net operating expenses will be less than 28% of the gross margin.

Operating profit increase

This combination of further investments and the increase in efficiency mentioned will lead the Company to an important annual average growth of the EBITDA, estimated above 10%. Renewables, Latin America, Engineering and Non-Energy will be the drivers of this operating result, with annual growths above estimated above 15% in the case of Renewables.

As a consequence, IBERDROLA's portfolio of business will be increasingly balanced. Thus, while in 2000 only Liberalised and Regulated Businesses contributed to the results in a significant way, in 2009, other two businesses, Renewables and International, will contribute by around 20%.

IBERDROLA, which will maintain leveraging at less than 55% at the end of the period, is also planning an attractive dividend policy, with the distribution of 3,000 million euros in dividends between 2007 and 2009.

PROJECTIONS FOR THE PERIOD 2010-2011

The 2007-2009 Strategic Plan also includes projections for the years 2010 and 2011. IBERDROLA will invest more than €6,000 million in the 2010-2011 period and will balance out the allocations of the investment effort to continue strengthening internationalisation.

• *Net Profit and Dividends targets*

Company expects obtaining a Net Profit at the end of the period of 2,350 million euros, amount that supposes a 70% growth (close to 1,000 million euros) when compared to the result after taxes achieved in 2005 (1,382 million euros).

Thus, 56% of the investments will be made abroad, versus 38% in the in the period 2007-2009. The Company's growth beyond our borders will come from the new generation plants in Europe, wind farms, especially in Europe and the United States, and additional plants in Mexico and Brazil.

As a result of this strategy, IBERDROLA's net profit, which will grow by 14% between 2003 and 2009, will continue to see double-digit increases in the 2010-2011 period.

2011 Projection

... that will continue at double digit beyond 2009

Analysis of the first nine months of fiscal year 2006

Energy balance

	GWh		vs. 9M 2005	% Weight
Gas combined cycle	27,225	3,356	14.1%	40.9%
Wind energy and mini-hydroelectric	5,608	735	15.1%	8.4%
Hydroelectric	7,521	729	10.7%	11.3%
Nuclear	18,729	2,371	14.5%	28.1%
Fuel oil	1,766	-1,088	-38.1%	2.7%
Coal	4,338	-759	-14.9%	6.5%
Cogeneration	1,426	86	6.4%	2.1%
TOTAL NET PRODUCTION	66,613	5,430	8.9%	100.0%
ENERGY DISTRIBUTED	95,145	4.1%		

Energy balance Spain

	GWh		vs. 9M 2005	% Weight
Gas combined cycle	11,764		13.7%	23.6%
Wind energy and mini-hydroelectric ⁽¹⁾	5,608		15.1%	11.2%
Wind farms	5,181		17.2%	-
Hydroelectric	6,611		11.1%	13.3%
Nuclear	18,729		14.5%	37.6%
Fuel oil	1,766		-38.1%	3.5%
Coal	4,338		-14.9%	8.7%
Cogeneration	1,054		0.1%	2.1%
TOTAL NET PRODUCTION	49,870		7.2%	100.0%
ENERGY DISTRIBUTED	74,553		4.0%	
HYDRO ELECTRIC RESERVE LEVELS AT 30/09/2006			40.6% (4,580 GWh)	

Energy balance Latin America

	GWh		vs. 9M 2005	% Weight
Gas combined cycle	15,461		14.3%	92.3%
Hydroelectric	910		8.1%	5.4%
Cogeneration	372		29.2%	2.2%
TOTAL NET PRODUCTION	16,743		14.3%	100.0%
ENERGY DISTRIBUTED (managed)	20,592		4.4%	

(1) Includes 348 MW of international capacity with an output of 494 GWh.

1. PRODUCTION: SPAIN

Net production of the Group in Spain rose 7.2% in the first nine months of 2006, reaching 49,870 GWh. The highlights of this period were as follows:

- Hydroelectric production was up 11.1%, due to an active management of the existing reserves and the flexibility of the production facilities.
- Wind production was up 17.2%, and total renewable energies production (including mini-hydro) increased by 15.1%. In addition, international wind production rose to 494 GWh over the quarter.
- Good level of availability of nuclear plants, up 14.5%.
- Combined cycle production is up 13.7% to 11,764 GWh, representing 23.6% of the company's generation mix in Spain and the technology making the second-largest contribution to the total mix after nuclear, which accounts for 37.6%.
- The significant reduction in production based on the most-polluting energy sources, further to efforts launched over the first quarter of the year, has been consolidated, with coal production down -14.9% and fuel-oil down -38.1%.

Emissions were reduced by 14.8% over the first nine months of 2006 to 206 gr/kWh, a very significant figure given the low level of hydroelectric production. The percentage of emission-free production rose to 62.1%, up from 58.4% over the first nine months of 2005.

IBERDROLA obtained a market share in the wholesale market of 25.8% in the first nine months of 2006. Comparatively speaking, energy production can be broken down as follows:

	9M 2006	9M 2005
Gas combined cycle	23.6%	22.2%
Renewables	11.2%	10.5%
Hydroelectric	13.3%	12.8%
Nuclear	37.6%	35.2%
Fuel oil	3.5%	6.1%
Coal	8.7%	11.0%
Cogeneration	2.1%	2.3%
Total	100%	100%

The changes recorded in CO₂ emissions were as follows.

	Mil. Tn	Average Price
Rights allocated	10.6	22.35
Rights consumed	10.9	20.37

(*) Approximate figure for comparison purposes, as allocation of allowances are made on an annual basis and are managed over a three-year period.

2. PRODUCTION: LATIN AMERICA

In Latin America, total production is up 14.3% to 16,743 GWh, with this strong growth driven by the new investments made in combined-cycle plants, representing 92.3% of the total.

	Production	Change
Mexico (combined cycles)	14,298	15.7%
South America	2,445	6.7%
Combined cycles	1,163	0.0%
Hydroelectric	910	8.1%
Cogeneration	372	29.6%
Total	16,743	14.3%

The growth recorded in this region reflects firstly the greater availability of the Mexican plants in Monterrey (1,040 MW), Altamira (1,036 MW), Enertek (120 MW), and La Laguna (500 MW), running at full capacity, with production up 15.7%. Hydroelectric energy is up 8.1%.

3. MARKET: SPAIN

In the domestic market IBERDROLA's total demand measured on the grid rose 4.0% to 74,553 GWh, while the number of customers is up to 9.7 million.

4. LATIN AMERICA MARKET

Changes in demand for IBERDROLA's three distribution companies in Brazil are presented in the following table:

Energy distributed (GWh) (under management)	9M 2006	vs. 2005
Coelba	8,923	4.9%
Cosem	2,733	6.3%
Celpe	6,276	2.3%
Total	17,932	4.2%

Analysis of the results for the period (Unaudited)

The most notable aspects of the results for the first nine months of 2006 are as follows:

€million	Jan-Sep 2006	vs. 2005
NET SALES	8,152.7	-3.4
GROSS MARGIN	4,284.6	+22.5
EBITDA	2,934.9	+22.6
EBIT	1,997.0	+21.5
NET PROFIT	1,236.4	+25.7

1. NET SALES

The Group's Net Sales came to 8,152.7 million euros in the first nine months of 2006, down 3.4% on the same period in 2005, with the strong growth in International (+20.2%) and Non-Energy (+12.0%) offset by the fall in the Domestic Energy Business (-11.2%).

The Domestic Energy Business saw its Net Sales fall 11.2%, primarily due to the low level of sales

in the Supply business, the eliminations in consolidation figures due to the existence of a bilateral agreement between Generation and Supply (-€325 million) and the impact of Royal Decree-Law 3/2006 on the Distribution Business. Nevertheless, Net Sales at Renewables grew by 43.2%.

Tariff Insufficiency

With regard to the estimated tariff insufficiency for the first nine months of 2006 at sector level, and after discounting the value of emission allowances consumed, the estimated insufficiency for this period in 2006 could reach a figure close to €1,218.8 million. In accordance with Royal Decree-Law 5/2005 of 11 March, the provisional percentage of financing for the tariff insufficiency corresponding to IBERDROLA is 35.01%, representing a deviation of 426.7 million euros.

Initial tariff insufficiency for the sector (e)	2,589.7
Deduction Co ₂ allowances Jan+Feb	-331.8
Deduction Co ₂ allowances since March	-1,039.1
Final tariff insufficiency for the sector (e)	1,218.8
IBERDROLA's percentage	-35,01% (e) 426.7

RDL 3/2006 Impact

According to the interpretation of Royal Decree-Law 3/2006, the figure given above for the sector's tariff insufficiency includes 1,370 million euros, which corresponds to the value of the emission allowances allocated under the National Allocation Plan and consumed over the period, based on the following criteria:

- For January and February "any eventual negative balances in the settlement of the 2006 tariff will be deducted."
- For subsequent months, "remuneration for the electrical energy production business ... will be reduced by an amount equivalent to the value of the greenhouse effect emission allowances allocated ...".

RDL 3/2006 Impacts	Assimilation to bilateral contracts	€ -153 MM recorded in Distribution
	CO ₂ emission allowances	€ -202 MM recorded in Generation
	Other Impacts	€ -167 MM recorded in Distribution

The impact on IBERDROLA corresponding to Emissions Allowances in accordance with the interpretation mentioned is -202 million euros, accounted for in the Generation business.

In addition, the application of Royal Decree Law 3/2006 reduced revenues from the activity by -153 million euros, accounted for in the Distribution business.

Its final impact will depend on the price ultimately recognised, given that Royal Decree Law 3/2006 sets as "provisional" the price of €42.35/MWh, which has been applied as of 3 March: "with respect to payment for activities regulated by the National Energy Commission, during 2006 the provisional price to be considered for distributors for energy acquired through the assimilation mechanism described in Section 1 will be the

average cost provided for in the 2006 tariff for energy generated under the ordinary regime for mainland Spain, including the costs of ancillary services and the capacity payment, representing €42.35/MWh." In addition, another negative impact has been recorded for 167 million euros, based on differences between the actual cost and the standard cost accounted for in the Distribution business as a result of the bidding policy followed in the wholesale market since 9 June.

2. GROSS MARGIN

The consolidated Gross Margin came out at 4,284.6 million euros, an increase of 22.5% on the same period in 2005. This positive development is due to the increasing contribution of Domestic Energy Business (ex-Renewables), growing 21.9% and Renewables and International Businesses, amounting 40% of the increase in the Gross Margin. In local currency, growth represents 20.6%.

Regarding the performance of the Gross Margin by business, it is highlighted:

2.1 Domestic Energy Business

The Gross Margin rose to 3,162.2 million euros, up 24.9% on the same period in 2005. The Domestic Energy business (excluding Renewables) is up 21.9%, while Renewables grew more than 43.2%.

Gross Margin evolution has been influenced by various factors:

- The good performance of Generation as a consequence of higher productions (+6.9%) and prices.
- The increasing contribution of Supply and Gas Businesses, derived of the policy followed in the Liberalised market.
- The application of Royal Decree 3/2006, with a negative impact due to the assimilation to bilateral agreements for -153 million euros, accounted for in the Distribution business.
- In addition, an impact from deviations of -167 million euros accounted on in the Distribution business, reflecting differences between actual and standard costs.
- The negative impact of the cost of emission allowances consumed over the period, for -202 million euros recorded in Generation.

2.2 International Business

The Gross Margin reached 666.5 million euros, up 31.6%, reflecting the solid performance seen on the Group's businesses in the region, with a

14.3% increase in energy produced, with a higher level of availability and improvements in efficiency, and a 4.4% increase in energy distributed; as well as the positive evolution in the exchange rate for the region's reference currencies, the real in Brazil (+14.7%) and the US dollar, which affects Mexico (+1.9%).

2.3 Other Businesses

Other businesses contributed 455.9 million euros to the total Gross Margin, maintaining the levels of 2005 in spite of the seasonality of the third quarter in the Real Estate and Engineering businesses.

3. EBITDA/GROSS OPERATING PROFIT

Consolidated EBITDA is up 22.6% to 2,934.9 million euros. In addition to the Gross Margin evolution, already explained, it is important to analyse the evolution of the Net Operating Expense, which increased by 14.9%.

- 5.7% increase in Personnel Expenses, basically linked to the increase in personnel costs in growing businesses such as Renewables, combined cycles, and Mexico. The domestic electricity business has seen a moderate increase, rising 3.3%.
- 19.5% increase in External Services due to the higher level of activity in connection with the new combined cycle and renewable facilities, Latin America and Supply expenses. This also includes 23.9 million euros in costs for the second nuclear fuel cycle (Enresa), which had no equivalent in 2005.

In addition, there is a positive impact resulting from exchange rate differences (17 million euros) due to changes in currencies for the Latin American businesses. Like-for-like, Net Operating Expenses are up 11.0% (compared with the 14.9% reported), after deducting the impact of exchange rates and expenses for the second nuclear fuel cycle (Enresa). This growth of 11% of recurring Net Operating Expenses is in line with the Company's continued efforts towards efficiency, and is once again much lower than the growth seen in the Gross Margin (+22.5% versus 11.0%).

Net operating expenses can be broken down as follows:

Million euros	9M 2006	vs. 2005
Net personnel expenses	631.7	6.4%
Personnel	756.7	5.7%
In-house work on fixed assets	-125	2.1%
Net External Services	591.8	25.4%
External Services	722.9	19.5%
Other operating revenues	-131.1	-1.5%
TOTAL	1,223.5	14.9%

In addition, taxes are up 6.5% to 148.3 million euros, primarily factoring in taxes paid on the new facilities brought into service and the higher payments stemming from the increase in energy billed under tariff.

4. EBIT/NET OPERATING PROFIT

EBIT rose to 1,997.0 million euros, up 21.5% compared to the same period in 2005. Amortisation and Provisions are up 25.1% (188.4 million euros). This increase in Amortisation and Provisions is mainly due to:

- Amortisation increases 5.3%, to 761 million euros. This increase is due to the new facilities brought into service since the end of the first nine months of 2005.
- Provisions increased by 150 million euros to 177 million euros, primarily due to the inclusion of a provision for future efficiency measures to be adopted according to Strategic Plan 2007-2009:

Million euros	9M 2006	9M 2005	Change %
Amortisation	761	723	+5.3%
Provisions	177	27	N/A
TOTAL	937.9	749.5	25.1

5. FINANCIAL RESULT

The Financial Result came to -372 million euros, 24.8% higher than in the first nine months of 2005. This increase basically reflects the 23.6% increase in financial expenses, due to the impact of the tariff insufficiency over the period, causing a higher average balance of debt in relation to the same period in 2005 of 2,482 million euros, as well as to the inclusion of a provision for discounting the amount over the nominal value of potential debt to be securitised.

Furthermore, financial revenues are up 21.9% to 272 million euros.

€ million	9M 2006	9M 2005	Change %
Financial revenues	272	223	21.9
Financial expenses	(644)	(521)	23.6
TOTAL	(372)	(298)	24.8%

Lastly, it is important to highlight that the average financial cost of debt came out at 4.39% over the first nine months of 2006, compare to the 4.56% for the same period of 2005.

6. RESULTS OF COMPANIES CONSOLIDATED USING THE EQUITY METHOD

Results of companies consolidated using the equity method registered an increase of 10.9 million euros to 46.6 million euros, with most of the result contributed by Non-Energy and Engineering. It can be broken down as follows:

Million euros	9M 2006	9M 2005	Change Mill. Eur.
Non-Energy and Engineering	41.5	30.0	11.5
Resto	5.1	5.7	-0.6
TOTAL	46.6	35.7	10.9

The increase in these results in Non-Energy was basically due to the large contribution by Gamesa, which was partially offset by companies withdrawn from the scope of consolidation, such as Cementos Portland.

7. NON-CURRENT ASSETS RESULTS

Recurrent income from Non-current Assets amounted to 178.1 million euros, as a consequence of the sale of real estate assets.

It is worth highlighting in the third quarter of the year the sale of Azertia to the company Indra, which resulted in a net gain of 23 million euros.

8. NET PROFIT

Pre-tax Earnings grew +31.1% to 1,850.1 million euros. The effective tax rate for the first nine months of 2006 came out at 31.9%, higher than the 29.4% recorded for the first nine months of 2005.

Finally, Net Profit rose to 1,236.4 million euros, up 25.7% compared to the same period of 2005 and in line with the targets set up for the end of 2006 in the 2001-2006 Strategic Plan.

Results by business

1. DOMESTIC BUSINESS

1.1 Generation

a) Gross Margin

The change in the Gross Margin over the first nine months of 2006 primarily reflects the 6.4% increase in production under the Ordinary Regime. Combined cycles production is up 13.7% and production from the most polluting technologies - fuel oil (-38.1%) and coal (-14.9%) - have been greatly reduced, while both nuclear and hydroelectric production levels are up, rising +14.5% and +11.1% respectively.

Prior to analysing these results, it is important to note that the figures for the Generation business are influenced by the change followed in the internal financing contract (IFC) between this business and Supply.

In terms of reported accounts, the Gross Margin for the Generation business is up 53.5%. Highlights:

- Net Sales in the Generation business up 42.8%, reflecting the above-mentioned increase in production, in an environment of higher prices.
- The average cost of fuel (without including nuclear) stands at €41.7/MWh, close to the cap set under Royal Decree Law 3/2006 (42.35 Euros/GWh). Procurements

are up 26.4%, in line with the general downwards trend of last months as a consequence of the increase in production coming from technologies with low fuel costs (hydroelectric and nuclear).

Fuel and CO₂ cost

Eur/MWh	2006	2005	%
Average fuel cost*	41.7	33.7	+23.7%
CO ₂ Cost (Eur/tonne)	20.4	10.4	+95.7%

* Includes combined cycles, coal and fuel

In addition to the cost of Procurements, a negative impact of 223.9 million euros has been recorded on the cost of emission allowances used. Factoring in revenues for allowances granted to cogeneration plants, the net impact amounts to 201.8 million euros.

Taking out the impact of the Internal Financial Contract (IFC) in both fiscal years, Gross Margin in Generation would increase 18.9%, to 2,092.7 millones de euros.

b) Operating Profit/EBIT

EBIT is up 73.4% compared to the previous year, amounting 1,288.8 million euros. EBITDA (1,586.2 million euros) rose 53.1%. Taking out the impact of the internal financial contract (IFC) in both years, the increase would stand in 12.9%, amounting 1,703.3 million euros.

In addition to the statements under Gross Margin, Net Operating Expenses rose 17.1% to 52.3 million euros as a result of various factors:

- External Services are up 19.3%, due to the new capacity installed. This item also includes 44 million euros in expenses for the second part of the nuclear fuel cycle (ENRESA).
- Personnel expenses showed a slight increase, rising 4.4%.

Net Operating Expenses can be broken down as follows:

€ million	9M 2006	vs. 2005
Net personnel expenses	158.3	6.3%
Personnel	172.5	4.4%
In-house work on fixed assets	(14.2)	-13.4%
Net External Services	199.4	27.4%
External Services	240.2	19.3%
Other operating revenues	(40.8)	-8.9%
TOTAL	357.7	17.1%

Taxes are up 17.7% as a result of the new facilities brought into service.

- Basic figures of the business:

GENERATION (MM de euros)	9M 2006	vs. 2005
Sales	3,651.8	42.8%
Gross Margin	1,975.6	53.5%
EBITDA	1,586.2	53.1%
EBIT	1,288.8	73.4%

1.2 Supply and Gas

a) Gross Margin.

Additional highlights in the breakdown by business:

- **Electricity:** With regard to the -14.5 million euros reported in Gross Margin as against the 9.1 million euros in the same period in the prior fiscal year, in addition to the reduction in volumes mentioned above, it should be taken into account that in 2005, 15 million euros in Neo-Sky were accounted for in Non-Energy. In addition, as mentioned in the section on Generation, the internal financing contract (IFC) has an impact on the results presented for the business. Thus, the Gross Margin for the business, factoring in the impact of the internal financing contract, is up 355 million euros, thanks to the policy of scaling down this activity over the last few months.
- **Gas:** Optimisation of the gas strategy has been completed as a result of the flexibility of the contracts signed, increasing this business' contribution to the gross margin by 68.4 million euros coming in at 50.4 million euros over the first nine months of 2006.

* Internal Financial Contract

** Includes +15.0 MM€ of Neo-Sky (in 9M 2005 reported in Non-Energy Business)

Of special relevance in the first nine months of 2006 is the optimisation of the gas strategy, which, together with the significant reduction in the volume of electricity sold (-74.9%) in accordance with the strategy of reducing exposure to the business, resulted in a significant improvement in Gross Margin, which shows a positive contribution of €35.9 million, as against the -€8.9 million recorded in the same period of the previous fiscal year. The contribution from commercial gas is €50.4 million. In electricity, the lower volumes are reflected both in total Net Sales of Supply, down -28.7%, and in Procurements, dropping -30.3%.

b) Operating Profit/EBIT

The policy of optimisation in gas and of reducing exposure to the electricity business has minimised losses in EBITDA (-€1.4 million), compared with nine months of 2005, -109.3 million euros.

In addition to the elements already presented in relation to the Gross Margin, the business significantly improved after the policy followed, reflected in a significant reduction in Operating Expenses, down 40.6 million euros (-49.5%), with Personnel Expenses down -51.8% and External Services down -60.2%, linked to the lower level of activity within the framework of a new more effective organisation. Net Operating Expenses can be broken down as follows:

€ million	9M 2006	vs. 2005
Net personnel expenses	22.6	-51.4%
Personnel	22.6	-51.8%
In-house work on fixed assets	-	N/A
Net External Services	18.8	-47.0%
External Services	25.6	-60.2%
Other operating revenues	(6.8)	-76.4%
TOTAL	41.4	-49.5%

The EBIT of the Supply business has minimised its losses (-€6.7 million), thanks also to the further reductions seen on Amortisation and Provisions as well as on Taxes:

- -88.6% reduction in Amortisation and Provisions
- -122.3% reduction in Taxes
- The key figures for this business are as follows:

SUPPLY (€ million)	9M 2006	vs. 2005
Net Sales	1,840.5	-28.7%
Gross Margin	35.9	N/A
EBITDA	-1.4	N/A
EBIT	-6.7	N/A

1.3 Renewables

a) Gross Margin

The following factors in evolution of the Renewables business during the first nine months of 2006 should be highlighted:

- Total installed capacity rose 23.4% (+772 MW), reflected in a significant increase in national and international wind production, up 17.2% to 5,181 GWh, with this growth achieved despite the low wind energy index of 2006. Total output using renewable energies (wind and mini-hydroelectric) is up 15.1%.
- In September 2006, 99% of the facilities were running under the market participation system. Prices were up 28% year-on-year.

- Various changes have also been seen in the perimeter of consolidation, with the most significant including the full consolidation of Rokas, after IBERDROLA increased its stake in this company to 49.9%.
- As such, the abovementioned increase in production, in an environment in which most of the facilities operate under the market participation system, has enabled the company to increase its Gross Margin for this business by 43.2%, up to 514.2 million euros. International Renewables account for 6.5% of the total. The Gross Margin on Renewables now represents 20.7% of IBERDROLA's total generation activities in Spain.

b) Operating Profit/EBIT:

EBIT increased by 90.6 million euros (+49.3%) due to the following factors:

- EBITDA up 42.5%, practically in line with the increase in the Gross Margin and despite the +46.9% rise in Net Operating Expenses as a result of the new capacity brought on line. The EBITDA margin remains at levels of about 80%. In addition, the contribution of Renewables to

total EBITDA of the Group has continued to trend up, rising to 14%.

- EBIT is up 49.3% to 274.3 million euros, reflecting a 30.5% increase in Amortisation and Provisions, with 23.4% of new additional installed capacity brought online over the period.
- Net Operating Expenses can be broken down as follows:

€ million	9M 2006	vs. 2005
Net personnel expenses	18.2	85.7%
Personnel	21.6	60.0%
In-house work on fixed assets	(3.4)	-8.1%
Net External Services	80.4	40.3%
External Services	85.9	42.2%
Other operating revenues	(5.5)	77.4%
TOTAL	98.6	46.9%

- The key operating figures for this business are as follows:

RENEWABLES € million	9M 2006	vs. 2005
Net Sales	514.2	+43.2%
Gross Margin	514.2	+43.2%
EBITDA	410.1	+42.5%
EBIT	274.3	+49.3%

1.4 Distribution

a) Gross Margin

The Gross Margin on the Distribution business is down 28.9% as a result of the following factors:

- 153 million euros for the provisional negative impact resulting from the application of RD 3/2006 of 24 February.
- Negative impact from deviations of -167 million euros resulting from differences between real and standard costs.
- Positive impact of 23 million euros reflecting the increase in remuneration for regulated activities in line with the tariffs plan (RD 1556/2005).

€ MM	1T 2006	2T 2006	3T 2006	9M 2006	% vs. 9M 2005*
Gross Margin	262.0	159.0	221.4	642.5	23.9
Impact of RDL 3/2006	-47.6	-116.2	10.5	-153.3	
Impact of deviations	N/A	-43.0	-124.0	-167.0	
EBITDA	108.2	9.2	70.9	198.5	60.8
EBIT	50.0	39.9	20.1	110.0	91.8

* 9 M 2005 results standardised including e 110.0 million measured in Non-Energy.

** Does not include e 22.4 million of regulated activities in gas business.

The recurrent Gross Margin, i.e. not factoring in the impact of RDL 3/2006 and excluding the effects of non-regulated activities over the first nine months of 2006, comes out at 940.5 million euros, up 4.0% compared with 2005, basically in line with the increase in remuneration of the regulated business.

b) Operating Profit/EBIT:

EBITDA on Distribution is down 60.5%, reflecting the downturn on the Gross Margin combined with an 28.5% increase in Taxes, not offset by the efficiency improvements achieved on Net Operating Expenses, which limits its growth to 5%.

- Net Operating Expenses can be broken down as follows:

€ million	9M 2006	vs. 2005
Net personnel expenses	158.1	16.9%
Personnel	212.9	13.6%
In-house work on fixed assets	(54.8)	5.0%
Net External Services	212.1	-2.5%
External Services	264.9	-3.8%
Other operating revenues	(52.8)	-8.7%
TOTAL	370.2	5.0%

The improvement in efficiency achieved, limiting growth in Net Operating Expenses to 5%, is primarily due to efforts to keep External Services under control, with these costs down -2.5%. Of special note is the limited growth in Personnel Costs, up 16.9%, factoring in the costs resulting from the impact of employees energy and the additional cost for transferring part of the workforce from the Supply business, not registered 2005.

Amortisation and Provisions are up 10.2%, to 162.3 million euros.

- The key operating figures for this Business are as follows:

DISTRIBUTION € million	9M 2006	vs. 2005
Net Sales	643.4	-28.8%
Gross Margin	642.5	-28.9%
EBITDA	193.4	-60.5%
EBIT	31.1	-90.9%

1.5 Corporation

This basically includes eliminations of inter-group expenses between the corporation and the different businesses.

2. INTERNATIONAL BUSINESS

a) Gross Margin

Net Sales from **International** have increased 20.2% to reach 1,668.9 million euros. Mexico, with a 57.7% contribution, is the area that makes the greatest relative contribution, also displaying growth of 10.4% thanks to increases in production and plant availability. It is also notable that there has been an increase in Net Sales in Brazil by 36.6%, essentially resulting from an increase in demand and tariff adjustments, as well as a favourable change in the currency exchange rate with the Brazilian real in this period.

In International Business, the Gross Margin is up 31.6% (+160.1 million euros) to 666.5 million euros. The change in the overall Gross Margin for the Latin America region can be broken down as follows:

- Increase in the Gross Margin (functional currency): 600 million euros.
- Exchange rate impact: 66.5 million euros in total, mainly from the increase in value of the Brazilian currency in relation to the euro (+14.7%).

In Mexico/Guatemala, the Gross Margin amounted to 230.3 million euros (+21.6%). This

increase is basically due to the full contribution to the results of the combined cycle of La Laguna (500 MW), as a result of its entry into operation and to the significant improvements in efficiency and availability of the combined cycle plants, totalling a 15.7% output increase in the area. In addition the dollar appreciated by 1.9%, which created an effect equivalent to 4.5 million euros.

In **Brazil**, the Gross Margin showed an improvement of 37.6% (to 436.2 million euros), thanks to a greater contribution from distribution businesses arising from growth in demand (+4.1%), tariff adjustments and revisions and the larger contribution of the Generation business. The revaluation of the real in relation to the euro (14.7%), with a positive effect of 62 million euros, is also noteworthy.

b) Operating Profit/EBIT

In International Business, EBIT increased 49.1% to 392.8 million euros, as a consequence of the increase in EBITDA (35.1%) and the stabilisation of amortisation, which was at practically the same levels as in the same period in 2005. In local currencies, growth of EBITDA is 22%.

EBITDA registers growth of 23.9% in Mexico, mainly as the result of greater activity in Generation because of the increasing contribution from the La Laguna combined cycle and the improvement in efficiency and availability of the region's combined cycles. In South America there was a rise of 42.3% due to the change already described in Gross Margin and efficiency increase. Thus, total

EBITDA growth in International Business comes out at 35.1%.

The EBITDA per region and business is broken down as follows:

- *Mexico-Guatemala*

Million euros	9M 2006	vs. 2005
Generation	135.1	+34.3%
Distribution	45.2	+0.6%
TOTAL	180.3	+23.9%

- *South America*

Million euros	9M 2006	vs. 2005
Generation	69.9	+54.3%
Distribution	251.1	+38.5%
TOTAL	321.0	+42.3%

- The change in Net Operating Expenses for the entire Latin America region can be broken down as follows:

Million euros	9M 2006	vs. 2005
Net personnel expenses	59	26.3%
Personnel	70.8	26.4%
In-house work on fixed assets	(11.8)	26.9%
Net External Services	100.2	19.0%
External Services	126.4	22.5%
Other operating revenues	(26.2)	37.9%
TOTAL	159.2	21.6%

The 21.6% increase in Net Operating Expenses was affected by the impact of the evolution in the exchange rate. Once this effect is deducted, this item grows by only 8.8%.

This can be broken down by region as follows:

Million euros	9M 2006	vs. 2005
Mexico/Guatemala	49.7	13.7%
Net Personnel Expenses	11.1	13.3%
Net External Services	38.6	13.9%
South America	109.5	25.6%
Net Personnel Expenses	47.9	29.8%
Net External Services	61.6	22.5%
TOTAL	159.2	21.6%

- Amortisation and Provisions stabilise at practically the same levels as in the same period in 2005.

The key operating figures for this business are as follows:

INTERNATIONAL (Million euros)	9M 2006	vs. 2005
Net Sales	1,668.9	20.2%
Gross Margin	666.5	31.6%
EBITDA	501.3	35.1%
EBIT	392.8	49.1%

3. NON-ENERGY BUSINESSES

a) Gross Margin

Net Sales from Other Businesses grew 12% to 1,060.2 million euros, as an effect of activity in

Engineering and Services, contributing with 345.2 to Net Sales, and the contribution made by IBV, which had notable growth, while Iberdrola Inmobiliaria showed growth in line with the seasonal nature of its business.

Gross Margin rose to 455.9 million euros, maintaining the same levels for the same period in 2005 in spite of the seasonality in the Real Estate and Engineering businesses. It can be broken down as follows:

Million euros	9M 2006	vs. 2005
Engineering and Services	127.4	+13.5%
IBERDROLA Inmobiliaria	77.9	-29.7%
IBV Corporation	105.2	+2.4%
Other services	145.4	+8.6%
TOTAL	455.9	-0.8%

The increase of 15.2 million euros in Engineering and Services was basically due to the margin

recorded by Third Parties Services. The increase in Other Services derives from including business activities here that, up to the third quarter of 2005, were included in the Distribution business and which, since the end of fiscal year 2005, have been accounted following the criterion of the 2005 Legal Report.

b) Operating Profit/EBIT

- IBV Corporation, which is consolidated by proportional consolidation according to IFRS, has contributed 24.5 million euros (+45.8%) through its various industrial businesses.

- The EBITDA of Iberdrola Engineering and Services contributed 69.3 million euros.
- The contribution made by Other Services was 105.2 million euros, which was influenced by changes in the accounting criterion already referred to under Gross Margin.
- The contribution made by Real Estate was 57.3 million euros, which follows the seasonal

trend visible under Gross Margin, to which must be added growth in Net Operating Expenses, particularly in relation to External Services linked to projects on the portfolio. Its evolution is in line with what was budgeted for 2006, with various transactions pending closure in the fourth quarter of the fiscal year.

The key operating figures for this business are as follows:

€ million	9M 2006	vs. 2005
NET SALES	1,060.2	+12.0%
GROSS MARGIN	455.9	-0.8%
EBITDA	256.3	-15.0%
EBIT	208.1	-16.0%

The main items for **IBERDROLA Inmobiliaria** at the end of the first nine months of fiscal year 2006 are the following:

- **IBERDROLA Inmobiliaria** business data:

PORTFOLIO OF BUILDABLE AREA RESIDENTIAL USE (m ²)	
Total	1,544,417
Under construction	145,120
Under management	397,389
In planning	1,001,908

PORTFOLIO OF BUILDABLE AREA COMMERCIAL USE (m ²)	
Total	536,608
Under construction	3,279
Under management	245,079
In planning	288,250

- IBERDROLA Inmobiliaria balance sheet data:

	Million euros
TOTAL ASSETS	1,671
INTANGIBLE FIXED AND INVESTMENT ASSETS	579
CURRENT ASSETS	1,039
SHAREHOLDERS' EQUITY	644
FINANCIAL DEBT	65

- IBERDROLA Inmobiliaria income statement data:

	Million euros	Vs 2005
NET SALES	150.3	-44.7%
GROSS MARGIN	77.9	-29.6%
EBITDA	57.3	-41.9%
EBIT	52.9	-44.8%
Non Current Assets	42.7	N/A
Net	59.1	+12.8%

Balance sheet

January – September 2006

	Million Euros	vs. Dec. 2005
TOTAL ASSETS	32,787	7.6%
TANGIBLE & INTANGIBLE		
FIXED ASSETS	21,856	2.4%
LONG-TERM INVESTMENTS	2,451	50.3%
SHAREHOLDERS' EQUITY	10,304	9.4%
ADJUSTED NET DEBT	14,325	17.3%

At 30 September 2006, IBERDROLA's total assets came to 32,787 million euros, highlighting the maintenance of its strong capital position even taking into account the important investments made in the period (1,929 million euros).

The leverage ratio in September 2006 was 58.6%, compared to 56.5% registered in December 2005. Taking into account the financing of the tariff insufficiency, adjusted leverage ratio in September 2006 is 54.9% (53.6% in December 2005), close to the 54.8% equivalent registered in September 2005.

In this sense, the adjusted financing of the tariff insufficiency corresponding to IBERDROLA amounts 1,768 million euros by September 2006, with 1,341 million euros already recognized for 2005.

Analysis of the Balance Sheet

1. FIXED ASSETS

Investments in the period from January to September 2006 totalled 1,929 million euros, broken down as follows:

	Jan-Sep 2006	%
Spain	1,134	58.8%
Generation	270	
Renewables	168	
Distribution	309	
Other	387	
Mexico	157	8.2%
Generation	147	
Distribution	10	
South America	108	5.6%
Generation	7	
Distribution	101	
Other International	530	27.5%
TOTAL	1,929	100%

With respect to investments in Spain, those made on core business activities stand out, totalling

747 million euros, broken down as follows:

- 270 million euros on the Generation Business.
- 168 million euros on the Renewables Business.
- 309 million euros on the Distribution Business.

In "Others", included in the chapter Spain, it is worth to mention the operation carried out in June 2006 by which IBERDROLA increased its stake in Gamesa, by buying such stake to Corporación IBV.

Investments in Mexico were mainly focused on both the combined cycles of Tamazunchale and Altamira V and VI, with 84 and 25 million euros respectively. In Brazil investments have primarily been made in distribution, mostly financed through funds generated in Brazil.

Under the heading "International: Other", the following investments are basically included:

- **Increased stake in the share capital of Energías de Portugal (EDP) up to 9.5%.**
- **Renewables outside of Spain (207 million euros), basically for the projects in the United States, France and Brazil.**

2. SHARE CAPITAL

Share Capital as at 30 September 2006 was comprised of **901,549,181** bearer shares with a par value of €3 each.

The General Shareholders' Meeting held last 30 March approved the distribution of a total dividend of 0.885 euros per share charged against fiscal year 2005, representing an increase of 15.2% per share over the dividend paid in 2005. This ratified the commitment assumed by IBERDROLA to increase remuneration to shareholders in line with the growth in Net Profit.

On 2 January 2006 an interim dividend was paid against fiscal year 2005 in the amount of 0.367 euros per share, and on 3 July 2006 a supplementary dividend of 0.518 euros per share was paid.

3. FINANCIAL DEBT

Adjusted net financial debt totalled 14,325 million euros at the end of September, and the financial leverage stood at 58.6%. Taking into account the financing of the tariff insufficiency, which at September 2006 amounted, in the case of IBERDROLA, 1,768 million euros (1,341 million euros already recognised for 2005 and 427 million euros accrued in the first nine months of 2006), net financial debt would be of 12,557 million euros and the leverage would stand at 54.9%

It is worth highlighting the reduction in the average cost of debt of the Company, that in September 2006 was 4.39%, 17 basis points

lower than the one registered in September 2005, despite the upward trend in interest rates.

The debt structure can be broken down by currency and interest rate as follows:

	September 2006	September 2005
EURO	87.0%	86.5%
DOLLAR	8.2%	8.1%
REAL	4.4%	5.1%
OTHER CURRENCIES	0.4%	0.3%
FIXED RATE	51%	53%
CAPPED	9%	11%
FLOATING RATE	40%	36%

In line with the policy to minimise financial risks on debt, foreign currency risks have continued to be mitigated through the financing of investments in Latin America in local currencies (the real, in the case of Brazil) or in their functional currencies (the dollar, in the case of Mexico).

The debt structure per company is shown in the following table:

	September 2006	September 2005
IBERDROLA S.A.	86.0%	84.4%
MEXICO	3.8%	5.0%
SOUTH AMERICA	4.2%	5.6%
RENEWABLES	3.5%	2.6%
IBERDROLA INMOBILIARIA AND OTHER	2.5%	2.4%
TOTAL	100%	100%

Debt can be broken down by product type as follows:

	September 2006	September 2005
Euro bonds	36.8%	33.4%
US PP	4.3%	3.5%
Other Bonds	3.1%	5.0%
Domestic commercial paper	6.3%	3.8%
Euro commercial paper (ECP)	6.1%	5.6%
Euro loans	36.4%	39.9%
Loans in other currencies	7.0%	8.8%
TOTAL	100%	100%

In addition, as a result of the active refinancing policy followed by IBERDROLA, despite of having passed one year, the average life of the debt has been increased from 4.9 years in September of 2005 to 5.0 years in September of 2006.

Lastly, the change in financial leverage has been as follows:

MM€	September 2006	December 2005	September 2005
Shareholders' equity	10,304	9,415	9,463
Gross debt	15,212	13,111	12,889
Capitalized derivatives	81	90	119
Short term financial assets	300	601	266
Cash	255	215	179
CNE settlements adjustments	251	0	0
Adjusted Net Debt	14,325	12,211	12,325
Leverage*	58.2%	56.5%	56.6%

* Without the effect of the tariff insufficiency, adjusted leverage is 54.9% in September 2006, close to the 54.8% registered in September 2005 (53.6% in December 2005).

4. WORKING CAPITAL

Net Working Capital rose to 1,574 million euros, representing an increase of 1,494 million euros in relation to the 80 million euros recorded at the end of fiscal year 2005. This increase is broken down as an increase of 724 million euros in Current Assets, mainly due to the financing of the tariff insufficiency and an increase in the inventories, and a decrease of 770 million euros in Current Liabilities, basically caused by a decrease of the accounts to be paid by Renewables and a reduction in Supply procurements.

5. FUNDS GENERATED FROM OPERATIONS

In September 2006 Funds Generated from Operations amounted to €1,949.6 million, reflecting an increase of 17% compared to September 2005.

In the last quarterly review by Moody's agency, the rating of "Excellent" for liquidity, granted in June 2005, was maintained.

Breakdown of business contribution to Profits, Losses and Assets

	Sales	Operating Profit	Net Profit	Assets
Business Spain	79.5%	80.3%	80.8%	85.0%
Business International	20.5%	19.7%	19.2%	15.0%

IBERDROLA Senior Unsecured Debt Credit Rating

Agency	Rating	Outlook
Standard & Poor's (*)	A+	Negative
Moody's (*)	A2	Negative
Fitch IBCA	AA-	Negative

(*) By virtue of the agreement for the acquisition of assets signed with Gas Natural and subject to the approval of the pertinent authorities:

- S&P has rated IBERDROLA Senior Unsecured Debt at "credit watch with negative implications"
- Moody's has rated IBERDROLA Senior Unsecured Debt at "review for a possible downgrade"
- Fitch rated IBERDROLA Senior Unsecured Debt at "credit watch negative (RWN)", after approval by the Spanish government of the tender offer for Gas Natural and Endesa. Later, in February of 2006, it raised its rating from A+ to AA- as a result of a change in its method of analysis

Appendix.- IBERDROLA and Sustainability

The contribution of IBERDROLA to sustainable development is reflected in several social responsibility practices that attend to the needs and expectations of its Interest Groups, with whom the Company maintains a combination of open communication channels and dialogue,

which are designed for: communication on goals, activities and successes achieved in the three areas of sustainable development (economic, environmental and social), as well as receiving evaluations and requests from the parties involved.

CR- Risk Premium Survey. University of Hamburg & SRI Deutsche Bank	30.5 points. IBERDROLA in leading Group in utilities
EIRIS- evaluator of FTSE4GOOD	IBERDROLA is in the process of evaluation
Corporate reputation	
MERCO 2006	Leading in Energy, Gas & Water sector
Corporate governance	
FTSE ISS Corporate Governance Index (CGI)	IBERDROLA has been included in the index

Acknowledgements

IBERDROLA selected as the best European electricity company in investor relations, according to the IIRG

For analysts, IBERDROLA is the best electricity company in investor relations and the best Spanish company in this group, as taken from the results of a survey carried out by the prestigious Institutional Investor Research Group (IIRG) for the European Investor Relations Study. Ignacio Galán, CEO of IBERDROLA, has been chosen best CEO in the sector of European utilities for the fourth year in a row, and analysts have recognised the Company's leadership in two other categories of the survey: best CFO (José Sainz Armada) and best Investor Relations Manager (Ignacio Cuenca).

3. ENVIRONMENTAL COMPROMISE AND RESPONSIBLE SOCIAL INVESTMENT

Assessment by Analysts and Investors on Socially Responsible Investment

IBERDROLA becomes the only Spanish electricity company in the 'Climate Leadership Index' because of its climate change strategy

IBERDROLA has become the only Spanish electricity company in the 'Climate Leadership Index', after being named Best in Class in its sector worldwide because of its consistent climate change strategy. IBERDROLA's inclusion for the second year in a row in this

selective index, which includes only the 50 best companies in the world, is a response to IBERDROLA's fourth participation in the Carbon Disclosure Project (CDP).

This study, which was driven by 225 international investors who manage USD 31.5 billion in assets, evaluates 10 key aspects of the initiatives adopted by companies to slow climate change. IBERDROLA was evaluated not just on its current strategy, one pillar of which is the defence of the environment and emphasis on sustainable development, but also for the appropriate evaluation of the risks and opportunities that are derived from climate change in its activities, as well as on the quality and effectiveness of its plans for reducing the emission of greenhouse gases.

IBERDROLA was the pioneering Spanish electricity company advocating that the objectives set under the Kyoto Protocol should be met. In the opinion of the Company, the electricity sector, in contrast with the other industrial sectors included in the European Directive on Emissions Trading, is the only sector that has the potential technology to reduce emissions and the ability to internalise the costs of emissions without affecting its competitiveness.

Dow Jones Dow Jones Sustainability World and Stoxx Index 06

IBERDROLA was included in the Dow Jones Sustainability World and the Dow Jones Sustainability Stoxx Index 06, with 74 points, which is only three points behind the leader

(at 77 points), and well above the average, which is around 60 points.

IBERDROLA has been included in this Index continuously since its founding in 2000. Only two other companies in the sector "Electric Utilities" (Companhia Energetica de Minas Gerais and Transalta) have been included in the Index continuously for this period, while 23 companies in the sector have entered and left at various times.

Action taken and investment to reduce emissions

IBERDROLA, the first Spanish firm to negotiate Joint Application projects to fulfil Kyoto

IBERDROLA has become the first Spanish firm to negotiate Joint Application (JA) mechanisms to facilitate compliance with the Kyoto Protocol, after starting the procedure with two wind farms in Poland. In particular, this refers to the farms that the company is building in Poland known as Malbork and Kisielice, with an installed capacity of 18 and 40.5 MW and that will start operation at the end of 2006 and beginning of 2007, respectively. These installations will enable reduction of the emission into the atmosphere of more than 93,000 tonnes of CO₂ annually.

As a first step, the Designated National Authority (DNA) has already certified that IBERDROLA has sufficient capacity to carry out wind energy and AC energy projects under Art. 6 of the Kyoto Protocol, a formality

required by the host country, Poland, for the Company to be able to obtain approvals for both these initiatives.

IBERDROLA will now continue with the remaining phases of the application procedure: validation of the project by an Accredited Independent Entity (AIE), obtaining the approvals from the Spanish DNA, and the final approval from the Joint Application Supervisory Committee (JASC). The AC projects, which are one of the flexible mechanisms being contemplated in order to facilitate compliance with the Kyoto Protocol, enable investment in sustainable projects in countries undergoing transition to the market economy which will reduce CO₂ emissions.

IBERDROLA is reducing nitrogen oxide emissions by 35% at the Velilla thermal plant.

IBERDROLA has been able to reduce nitrogen oxide emission by 35% from the Velilla del Río Carrión (Palencia) thermal plant through installing a system called ABACO which minimises the formation of pollutant products during the combustion process. This system, which has begun operation during the past two years in this 515 MW capacity plant, has represented an investment by IBERDROLA of 1.1 million euros. The Company will invest an additional €700,000 in the second half of 2006 in order to optimise it and improve the performance of the boiler. Thanks to this initiative, with this thermal plant IBERDROLA has managed, two years in advance, to comply with the 2008 limits established for major electric combustion plants.

4. CONTRIBUTION TO SOCIAL DEVELOPMENT

The key events for IBERDROLA in the Jan-Sep period of 2006 for social aspects were as follows:

a) "Education and Training" Programme

- **Promotion of Energy Savings and Efficiency.** An agreement has been made with the Community of Madrid for the development of a plan of action, with the purpose of increasing public awareness as to the rational use of energy and thus being able to achieve more sustainable development.
- **Promotion of Electrical Safety.** IBERDROLA participates in the Renove plan for electrical installations in housing blocks, which has been set up by the Madrid Regional Authority to improve electrical safety, and has already supervised electrical installations in more than 2,000 buildings.
- **Summer courses.** IBERDROLA has sponsored and participated in various Summer Courses at Spanish universities. Special highlights were "Energía Inteligente para el siglo XXI" (Intelligent Energy for the 21st Century), taught at San Benito de Alcántara (University of Extremadura), and the course "Energía y Medio Ambiente: Perspectivas Científico-Técnicas y Sociales" (Energy and the Environment: Scientific and Social Perspectives), at the Polytechnical University of Cartagena (Murcia).

b) Specific Projects

- **"Implica2" Project for the disabled.** What stands out in this quarter is its support for the Council of Castilla - La Mancha, allowing the Asprona organization in Albacete to benefit from the experience of Fundación Lantegi Batuak (which collaborated on "Implica2" in Vizcaya). The ultimate objective of IBERDROLA is to extend this model of support to its other areas of influence.
- **Website accessible for disabled persons.** The new IBERDROLA website has obtained an Accessibility Certificate, at AA level, issued by Technosite (a company belonging to the ONCE Foundation).
- **Volunteers' Day.** IBERDROLA conducted "IBERDROLA Volunteers' Day" workshops in Cáceres and Toledo, in which more than 600 disabled persons from Extremadura participated and Castilla-La Mancha. In this area, the Association of Paraplegics and the Disabled of Cuenca (Aspaym) awarded the "Silla de Oro" prize to IBERDROLA for its support for the disabled.
- **Family Responsibility Business Certificate.** The +Familia Foundation has awarded IBERDROLA its Family Responsibility Certificate according to Regulation 1000-1. The Certificate is valid for three years, during which time annual audits are carried out.
- **Internal Corporate Culture Management Model.** IBERDROLA has launched a project for managing Internal Corporate Culture,

understood as the sum of all shared values, behaviour guidelines, work habits and conduct with organisation members, aimed at supporting the commitments acquired in the Strategic Plan.

c) "Local Economic Development" Programme

- **Regional Advisory Boards.** Meetings have been held of the Consultative Committees for Castilla y León, and the Comunidad Valenciana, which were formed by major industrial and financial groups of these communities.
- **Support for companies in Castilla y León.** IBERDROLA intends to help improve the competitiveness of small businesses in Castilla y León by incorporating participation in the Foro de Empresas and Organizaciones Inductoras de la Excelencia. This forum on innovation and excellence in corporate management was formed as the consultative body of the Council of Castilla y León.
- **Promotion of Corporate Social Responsibility.** IBERDROLA participated in 15 conferences promoting corporate social responsibility practices, presenting the "IBERDROLA model" to business and academic circles. Our Company, together with the BBVA Foundation and the Fundación Entorno, promoted an online course named "RSE+5", which is intended to help small and medium companies to develop sustainable strategies.

d) Art and culture programme

- **Reconstruction and Illumination of Monuments.** The following projects have been implemented to illuminate Spanish cultural monuments: Cathedral and Walls of Ciudad Rodrigo (Salamanca); Prince's Residence, at El Escorial (Madrid); Sanctuary of the Virgen del Rosario de Hellín (Albacete) and the Plaza de Sancho Gracia in Espinosa de los Monteros (Burgos). The exhibition "La Luz de Flandes" was opened in Burgos, and the Company participated in the reconstruction of the "Patio Embajador Vich", which is in the Fine Arts Museum of Valencia.
- **Publications.** The IBERDROLA Foundation has published four new books on culture and the sciences and also two new Guides to assist disabled persons and the socially marginalised.

e) "Solidarity" Programme

- **IBERDROLA Foundation projects.** The IBERDROLA Foundation has committed its support to 11 new social action projects meant for the disabled, immigrants, and other disadvantaged groups.
- **V International Forum of the Alliance of Cities Against Poverty.** IBERDROLA has supported the Comunidad Valenciana in holding this forum, organized jointly by that administration and the United Nations Programme for Development, with the cooperation of the Parliament of Valencia.

5. CORPORATE GOVERNANCE

The highlights for Corporate Governance 1 January to 30 September of 2006 were as follows:

Composition of the Board of Directors

At a meeting held on 26 April 2006 the Board of Directors accepted the resignation of D. Iñigo de Oriol Ybarra and enacted the agreement adopted by the Board at a meeting on 20 April 2005 by which D. José Ignacio Sánchez Galán was appointed as the Chairman of the Board of Directors, and consequently replaced D. Iñigo De Oriol Ybarra as Chairman, while remaining as CEO.

On the same date D. José Antonio Garrido Martínez, D. Javier Herrero Sorriqueta and D. Ignacio de Pinedo Cabezudo also tendered their resignations, thus formalising the appointment as board member, by co-optation and subject to approval or ratification by the General Meeting of Shareholders, of D. Iñigo Víctor de Oriol Ibarra, who is classified as one of the "other external board members".

On 24 May 2006 the Board agreed to accept the resignation of D. César de la Mora Armada, D. Antonio Garay Morenés and D. Antonio M^a de Oriol y Díaz-Bustamante, and also to appoint as Vice-presidents the independents D. Juan Luis Arregui Ciársolo and D. Víctor de Urrutia Vallejo. D. Julián Martínez-Simancas Sánchez was also appointed as Deputy Secretary of the Board.

Finally, at a meeting on 7 June 2006, the resignation of the external board member representing substantial shareholders, D. Jesús María Cadenato Matía, was accepted. Also, by co-optation and subject to the approval or ratification by the General Meeting of Shareholders, the appointment as board members of Dña. Inés Macho Stadler, D. Braulio Medel Cámara and D. José Carlos Pla Royo, (the first two classified as independent board members and the latter as director representing substantial shareholders) was formalised.

As a result, the Board of Directors is currently composed of 15 members, of which only the Chairman is classified as an executive. The remaining 14 directors include 11 independents, 2 representing substantial shareholders and 1 is classified as "other external shareholders".

Details on the identity and category of the Directors, and also the composition of the Executive Board, the Auditing and Performance Board, and the Appointments and Salaried Committee, are available in continuously updated form at www.iberdrola.com (information for shareholders and investors / corporate governance / board).

Amendments to the Company Regulations

The General Shareholders' Meeting held on 30 March 2006 ratified the following amendments to the Company's By-laws and the Regulations of the General Shareholders' Meeting:

- Modification of Article 19 of the By-laws and Article 8 of the Regulations of the General Shareholders' Meeting to adapt the wording of both provisions to that established in the First Final Provision of Law 19/2005 of 14 November on European joint stock companies domiciled in Spain, with respect to extending the term for publication of the notice of meeting for a general shareholders' meeting and the right of shareholders to request publication of a supplement to the notice of meeting, including new points on the agenda of meeting.
- Modification of Article 22 of the By-laws and Article 10 of the Regulations of the General Shareholders' Meeting so as to eliminate the requirement relating to the minimum number of shares conferring the right to attend a general shareholders' meeting.

The full text of the Company By-laws, the Regulations of the General Meeting of Shareholders and other remaining internal regulations of the corporate bodies currently in force may be consulted at www.iberdrola.com (information for shareholders and investors/corporate governance).

Other Agreements

It was also resolved that the firm "ERNST & YOUNG, S.L." be appointed as auditor for the Company and its Consolidated Group, which firm will do the auditing for a period of 3 years for the annual reports for fiscal years 2006, 2007, and 2008". This resolution was adopted at the

proposal of the Board of Directors after a favourable report from the Committee on Auditing and Compliance and after bidding among the major international auditing firms within the context of the "IBERDROLA Group Policy on Retaining Auditors" approved by that committee on 23 November 2005.

Information Transparency

One of the Company's core Corporate Governance principles is to promote maximum transparency in the information – financial and other – provided to shareholders and markets. In line with this commitment, in 2006 the company maintained a high level of activity with regard to information for institutional investors and financial analysts, which no doubt contributed to the excellent performance of IBERDROLA's stock over the period.

On 22 February 2006, the Board approved the Annual Report on Corporate Governance for 2005, in accordance with the form required by Circular 1/2004 of 17 March of the Spanish securities regulator (CNMV).

On the same date, the Board of Directors approved the Report on the Activities of the Audit and Compliance Board for fiscal year 2005, the publication of which is intended to contribute to best practices in corporate governance by covering the annual activities of the Audit and Compliance Board.

The National Stock Market Commission was informed as to all relevant facts connected with the Company's Corporate Government, including the convocation, recording and agreements reached by the General Shareholders' Meeting held on 30 March 2006, as well as the changes among the Board of Directors. The policy of maximum transparency was also applied to the acquisition by the ACS Group of a major shareholding in the Company (10% of the share capital), which is reflected both in the announcement to this effect by the ACS Group on 28 September 2006, as well as on the corporate website at www.iberdrola.com (information for shareholders and investors/capital-fixed income/significant shareholdings and treasury stock).

The appropriate notifications were also made in relation to publishing periodic information on the current financial year, including information relating to operations with associated undertakings.

All information published in the section on corporate governance of the website www.iberdrola.com is available in Spanish and English.

Spanish stock market commission (CNMV): Significant Events and Other Communications since July

III. BASES OF PRESENTATION AND VALUATION POLICIES

(The financial and accounting data and information included in this regular public report should be prepared in accordance with the principles and criteria for recognition and measurement stipulated in prevailing legislation for drawing up financial and accounting information to be included in the annual accounts corresponding to the annual period to which this report refers. If, by exception, the generally accepted accounting criteria and principles stipulated in the corresponding legislation have not been applied to the data and information attached hereto, this fact and the underlying reasons should be stated, indicating the effect that such non-application could have on the net worth, the financial position and the results of the company or its consolidated group. Furthermore, and with a similar scope, any modifications in respect of the last audited annual accounts that may have been made in the accounting principles used in drawing up the attached information must be mentioned and explained. If the same accounting policies, criteria and principles have been applied as in the last annual accounts, and if the latter were drawn up in accordance with the prevailing accounting standards applicable to the company, this should be expressly stated. If any adjustments and/or reclassifications have been made during the preceding period in pursuance of prevailing legislation, to allow for changes in accounting policies, correction of errors or changes in the classification of accounting items, the necessary quantitative and qualitative information shall be included in this section to understand those adjustments and/or reclassifications.)

The consolidated financial and accounting information included herein has been drawn up in accordance with the International Financial Reporting Standards (IFRS), as adopted by the European Commission following the procedure established in Regulation (EC) No 1606/2002 of the European Parliament and of the Council of 19 July 2002.

Consequently, the consolidated financial statements for 2004 presented for comparison differ from those published in the latest audited consolidated annual accounts issued in accordance with mercantile law and according to the accounting principles and standards prevailing for that year.

The accompanying consolidated financial statements have been drawn up in accordance with the accounting principles established for the first-time adoption of International Financial Reporting Standards (hereinafter IFRS), including the International Accounting Standards (IAS), the interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) and the Standing Interpretations Committee (SIC).

The consolidated financial statements have been prepared in accordance with IFRS 1, which establishes, for certain specific cases, alternatives that entities applying IFRS for the first time may use in the preparation of their financial and accounting information. The alternatives chosen by the IBERDROLA Group are described below:

- The Group has opted not to restate the business combinations as though they had taken place under IFRS, and has eliminated against reserves the assets and liabilities recorded under Spanish GAAP that do not have this consideration under the IFRS.

- The book value of the assets under Spanish GAAP has been taken as the amortised cost of tangible and intangible fixed assets at 31 December 2003, as the IBERDROLA Management assumes that the restatement of assets made under the accounting standards prevailing in the countries in which companies belonging to the IBERDROLA Group operate reflect, approximately, the price variations in those countries.

- The translation differences generated prior to 31 December 2003 have been transferred to reserves. Consequently, in the event of disposal of an investee company, the profit and loss account would only show the translation differences generated after said date.

- When recording the production plant decommissioning costs, the IBERDROLA Group has opted to record the provision required to meet said future costs at their current value at the date of commissioning the respective asset, against the item "Tangible fixed assets" on the accompanying consolidated balance sheet.

Both the cumulative depreciation and amortisation of assets at 31 December 2003 and the financial adjustment of the corresponding provision at that date are based on the estimates made by the IBERDROLA Group at that date, recorded as debit and credit, respectively, in the item "Unappropriated reserves" on the accompanying consolidated balance sheet.

The IFRS also establish certain alternatives in their application, including the following:

- i) The IFRS establish the alternative of capitalising financial expenses generated on the external financing assigned to construction in progress and nuclear fuel stocks. The IBERDROLA Group has opted to capitalise these financial expenses.

- ii) Interests in joint ventures may be recognised by proportionate consolidation or by the equity method, using the same criteria for all interests held by the Group in joint ventures. The IBERDROLA Group applies proportionate consolidation to all jointly controlled entities.

- iii) Both intangible assets and the assets recorded under "Property, plant and equipment" and "Investment properties" may be carried at fair value or purchase cost after deducting any accumulated depreciation and accumulated impairment, if any. The IBERDROLA Group has opted to record these assets at cost.

iv) The IFRS allow two treatments for recognising capital grants: deducting the amount of the capital grants from the book value of the asset or recording capital grants as deferred income on the liabilities side of the balance sheet. The IBERDROLA Group has chosen the latter option.

Finally, the transactions performed on the electricity generation market by Iberdrola Generación, S.A. and Iberdrola, S.A. (as electricity supply undertaking) have not been offset in the accompanying financial information.

IX. EVOLUTION OF BUSINESS

(The information included in this section, in addition to complying with the instructions for completing this half-year report, must expressly mention the following aspects: evolution of turnover and related costs; composition and analysis of the principal transactions giving rise to the extraordinary profit obtained, if any; comment on the most important investments and disinvestments, explaining their effect on the working capital of the company and especially on the company's cash situation; adequate explanation of the nature and effects of any items that may have caused a significant change in the turnover or profits of the company during this six-month period in respect of those reported in the previous quarter. Furthermore, entities submitting consolidated balance sheets and profit and loss accounts prepared in accordance with the IFRS adopted must provide detailed information on any transactions producing a significant effect on the financial positions, the profits or the net worth of the company or its group as a result of the impairment of assets or reversion thereof, the valuation of assets and liabilities at reasonable value, including derivatives and hedging, exchange differences, provisions, business combinations, discontinued operations or any other operations having a significant effect, and a description of the material changes in the item "non-current assets held for sale and discontinued operations" and related liabilities, any significant changes in the risk assumed and operations effected to reduce it, and events after the balance sheet date, which, although significant, are not recorded in the financial information presented. Finally, a clear distinction should be made between comments referring to consolidated financial statements and those, if any, referring to separate financial statements.)

See annexed sheets

X.1.) ISSUES, REDEMPTIONS OR CANCELLATIONS OF DEBENTURES & NOTES

(This section will include specific information on each issue, redemption or cancellation of debentures and notes made since the beginning of the year by the company obliged to file the regular public report or, as the case may be, by a company included within the consolidation perimeter, indicating for each issue, redemption or cancellation the information indicated in the attached tables. This information must be set out separately, distinguishing between issues, redemptions or cancellations for which a prospectus for the issue or placement of the securities has had to be filed with a Competent Authority (24) of a member State of the European Union and those for which this has not been required. In the case of issues, redemptions or calculations made by associates or any investee other than the parent, subsidiaries or jointly controlled entities, that information will only be included insofar as the issue or cancellation is fully or partially guaranteed by the parent, or any subsidiary or jointly controlled entity thereof. Issues or placements of securities on the monetary market (25) may be added (26) by type of transaction (27), just like issues made by one entity within one country, provided they have similar features. If an issue, redemption or cancellation is made through a special purpose vehicle (28), this circumstance must be expressly mentioned.)

X.2.) THIRD-PARTY ISSUES UNDERWRITTEN BY THE GROUP

(This section will include specific information on each issue, redemption or cancellation of debentures and notes secured since the beginning of the year by the company obliged to file the regular public report or, as the case may be, by a company included within the consolidation perimeter, for issues or placements not included in X.1.) above, indicating for each one the information indicated in the attached table. If secured by an associate or any other entity included within the consolidation perimeter other than the parent, subsidiaries or jointly controlled entities, this information will only be included if enforcement of the guarantee could produce a material effect (32) on the consolidated financial statements. Issues or placements of securities made on the monetary market (25) may be added (26) by type of transaction (27), just like issues made by one entity within one country, provided they have similar features. If an issue, redemption or cancellation is made through a special purpose vehicle (28), this circumstance must be expressly mentioned.)

Other aspects (43)

The transactions effected with significant shareholders during the first half of 2005 were made in the normal course of business, on arm's length conditions, and the information thereon is not necessary to give a true and fair view of the net worth, financial position and results of the company, although the most significant transactions are described below:

1. Bank financing:

On 13 April a loan of 1.2 billion euro was arranged with 16 top-ranking financial institutions, with two tranches, the first (500 million euro) being a renewal of the 'Club Deal' loan made in May 2004, with a new repayment period of seven years, and the second, a 7-year credit facility of 700 million euro. BBVA reduced its share from 100 million euro to 50 million euro in the first tranche and took up 70 million euro in the second.

On 25 May, within a strategy of strengthening liquidity through bilateral transactions of 500 million euro with top-ranking financial institutions, a bilateral credit facility of 60 million euro was arranged with BBVA for a period of three years. On the same date, the loan agreement was reduced to 364 days for the same amount.

2. Interest and exchange rate derivatives

Interest and exchange rate hedges have been arranged for the equivalent of 1,440 million euro, 230 million of which correspond to transactions contracted with BBVA.

The derivatives were contracted following a competitive bid among prestigious financial institutions.

3. Placements of surpluses and drawdown under credit facilities

Credit current accounts and credit facilities have been drawn down in an average daily sum equivalent to 400 million euro, some 54 million of which correspond to BBVA.

Cash surpluses have been placed in an average daily sum equivalent to 48 million euro; BBVA accounts for 25% of that sum.

These transactions are effected on a daily basis to regulate the Group liquidity, following competition among approximately 20 financial institutions.

4. Capital Market Transactions

On 1 June, BBVA acted as issue manager for a private bond issue made by Iberdrola Finanzas, S.A., guaranteed by Iberdrola, S.A., for 60 million euro.

On 22 June, Iberdrola Finanzas, S.A., guaranteed by Iberdrola, S.A., made a public bond issue on the Euro Market for 500 million euro, placed through 8 financial institutions, in which BBVA was Lead Manager and Underwriter, together with another three top-ranking institutions.

On 30 September, this issue was extended by 250 million euro, in which only the Lead Managers and Underwriters of the original issue participated (BBVA and another three top-ranking institutions).

Promissory notes for the value of 742 million euro have been issued on the short-term capital markets, of which BBVA placed 34% and BBK 5%. Supplementing the domestic notes issuance facility, Iberdrola International BV has also issued 1,853 million euro, guaranteed by Iberdrola, S.A., of which 5 million were placed through BBVA.

5. Share trading

Transactions have been effected through BBVA for an equivalent value of 296 million euro.

6. Bonds and guarantees

BBVA has furnished bank guarantees for companies in the Iberdrola Group in a value of 86 million euro.

7. Foreign exchange

Transactions have been made for an equivalent of 1,324 million euro, 42% of which were contracted with BBVA.

8. Equity derivatives

Portfolio and treasury stock derivatives have been contracted with BBVA in an aggregate sum of 169 million euro.

To enable a better understanding of the information supplied, the description is completed below of transactions with no specific identification code:

§ Row 5 contains the amount of the current accounts with BBK, amounting to 2,083.52 thousand euro.

§ Row 6 shows the balance at year-end of deposits held at BBK, totalling 50,000 thousand euro.

§ Row 7 indicates the notes issues made with BBK as issue manager, in a sum of 26,400 thousand euro.

§ Row 11 includes a credit facility arranged with BBVA in a sum of 60,000 thousand euro.

§ Row 21 includes debt derivatives transactions with BBVA begun prior to 2005, totalling 761,652.08 thousand euro.

§ Row 22 indicates the amount held in current accounts with BBVA, amounting to -17,912.55 thousand euro.

§ Row 23 shows the balance at year-end of deposits held at BBVA, totalling 258,000 thousand euro.

§ Row 24 includes debt derivatives transactions with BBVA begun during 2005, totalling 230,000 thousand euro.

§ Row 25 contains the foreign exchange insurance taken out with BBVA in a sum of 63,868.42 thousand euro.

§ Row 26 shows portfolio and treasury stock derivatives contracted with BBVA in an aggregate sum of 169,074.71 thousand euro.

§ Row 27 includes foreign exchange transactions effected with BBVA in a sum of 550,659.20 thousand euro.

§ Row 28 indicates the amount of share dealings with BBVA acting as broker, amounting to 446,722.12 thousand euro.

§ Row 29 shows the amount of notes issues made with BBVA acting as issue manager, amounting to 255,200 thousand euro.

§ Row 34 indicates the balance held in current accounts with Caja de Ahorros y Monte de Piedad del Circulo Católico de Obreros de Burgos, of 45.30 thousand euro.

§ Row 39 indicates the balance held in current accounts with Caja de Municipal de Burgos, of 13.30 thousand euro.

§ Row 41 indicates the balance held in current accounts with Caja de Ahorros de Salamanca y Soria (Caja Duero), of 108.28 thousand euro.

§ Row 46 shows the balance held in current accounts with Caja España de Inversiones, Caja de Ahorros y Monte de Piedad, of 786.47 thousand euro.

§ Row 51 includes the invoicing for gas and electricity supplied to BBVA, totalling 7,184.60 thousand euro.

2. TRANSACTIONS WITH DIRECTORS AND EXECUTIVES OF THE COMPANY (36)

Code (37)	Description of the transaction (37)	A/I (38)	Cu/Pr (39)	Amount (thous.euro)	Profit/Loss (40) (thous.euro)	ST/LT (41)	Related Party (42)

010	Services Received	Aggregate Information	Current	86	0	st	Das
023	Dividends and other distributed earnings	Aggregate Information	Current	37,098	0	st	Corporación Eólica Cesa, S.L.

Other aspects (43)

The remunerations accrued during the year include a multi-year bonus of 5,836.37 thousand euro for meeting objectives.

The value is also included of transactions effected with Corporación Eólica CESA, S.A., in which the Director Juan Luis Arregui Ciársolo is Chairman of the Board, and with the Turkish company DAS Engineering & Energy Investments, Inc., in which a brother of the Director Lucas María de Oriol López-Montenegro was member of the Board when signing a services contract with the Company to develop energy businesses in Turkey. These are in all cases transactions made in the normal course of business, on arm's length conditions, and the information thereon is not necessary to give a true and fair view of the net worth, financial position and results of the company.

Other aspects (43)

The transactions described were made in the normal course of business, on arm's length conditions, and the information thereon is not necessary to give a true and fair view of the net worth, financial position and results of the company.

Apart from intercompany transactions, this table has also been used to include transactions between subsidiaries and associated companies of the Iberdrola Group and the significant shareholders, regarding which we refer to Table 1 above.

The fees paid by Iberdrola to the Spanish Electricity Industry Association (UNESA) are also included.

Finally, in order to enable a better understanding of the information supplied, the description is completed below of transactions with no specific identification code:

§ Row 6 contains debt derivatives transactions with BBK begun prior to 2005 in a sum of 1,291.02 thousand euro.

§ Row 7 shows the balance at year-end of the deposits held with BBK, totalling 3,380.70 thousand euro.

§ Row 8 indicates the balance of current accounts with BBK, amounting to -149.96 thousand euro.

§ Row 11 includes a credit facility arranged with BBVA for 23,500 thousand euro.

§ Row 19 contains debt derivatives transactions with BBVA begun prior to 2005 in a sum of 549,385.22 thousand euro.

§ Row 20 shows portfolio and treasury stock derivatives contracted with BBVA in an aggregate sum of 644.95 thousand euro.

§ Row 21 shows the balance at year-end of the deposits held with BBVA, totalling 133,833.73 thousand euro.

§ Row 22 contains debt derivatives transactions with BBVA begun during 2005 in a sum of 37,148.61 thousand euro.

§ Row 23 includes the foreign exchange insurance taken out with BBVA for 120,071.94 thousand euro.

§ Row 24 includes foreign exchange transactions effected with BBVA in a sum of 214,16.53 thousand euro.

§ Row 25 includes the value of share dealings effected with BBVA acting as broker, amounting to 5,919.83 thousand euro.

§ Row 26 contains the amount of debenture issues made with BBVA acting as issue manager, amounting to 227,500 thousand euro.

§ Row 27 contains the amount of ECP issues made with BBVA acting as issue manager, amounting to 5,000 thousand euro.

§ Row 32 indicates the balance of current accounts held with Caja de Ahorros de Salamanca y Soria (Caja Duero), in a sum of 34.93 thousand euro.

§ Row 37 indicates the balance of current accounts held with Caja España de Inversiones, Caja de Ahorros y Monte de Piedad, amounting to 910.34 thousand euro.

§ In Row 47, apart from the remuneration accrued during the year, a multi-year bonus for meeting objectives has been paid to top executives in a sum of 1,280.37 thousand euro.

XV. SPECIAL AUDITORS' REPORT

(This section shall be completed only in the report corresponding to the first half of the year following the last financial year closed and audited and shall be applicable for all issuing companies which, pursuant to section thirteen of the Ministerial Order of 18 January 1991, are obliged to submit a special report issued by their auditors, when the auditors' report of the annual accounts of the immediately preceding financial year included no opinion or a negative or qualified opinion. The report shall mention that said special auditors' report is annexed to the half-year report, together with a copy of the information provided or declarations made by the company directors on the current situation of the reservations included by the auditors in their auditors' report on the annual accounts of the preceding financial year, on which, in pursuance of the applicable Technical Rules for Audit, the special report was based.)

II. VARIATION IN THE COMPANIES MAKING UP THE CONSOLIDATED GROUP (1)

NEW ENTRIES:

Renewables subgroup:

PARQUES EOLICOS REUNIDOS
IBERDROLA RENEWABLE ENERGIES USA, LTD.
COMMUNITY ENERGY INC.

Brazil subgroup:

GOIAS SUL PCH
BAGUARI-UHE

Mexico subgroup:

IBERDROLA SERVICIOS DE CAPACITACION

During the 2006 financial year Grupo Iberdrola has purchased and set up a number of companies that will be included within the scope of consolidated interim and annual accounts. The breakdown of these companies is as follows:

Renewables subgroup:

GLOBAL SOLAR ENERGY, S.A.
HIGHER DARRACOTT MOOR WIND FARM LIMITED
ELECTRA MALVANA, S.A.
ELECTRA DE SIERRA DE SAN PEDRO, S.A.
ELECTRA MALVANA, S.A.
ECOBARCIAL, S.A.
DELTUS
SISTEMAS ENERGÉTICOS LOS CAMPILLOS, S.A.

Non-energy subgroup

IBERD-ROS, S.L.

Iberdrola engineering and construction subgroup

IBERDROLA ENGINEERING AND CONSTRUCTION POLAND SP. Z.O.O.
IBERDROLA INGENIERIA Y CONSTRUCCION UK LTD.
IBERDROLA INZHINIRING I STROITEISTVO LIMITED LIABILITY COMPANY
IBERDROLA INGENIERIA Y CONSTRUCCIÓN VENEZUELA, S.A.
IBERINCO HELLAS TECHNIKI KAI KATASKEVASTIKI EPE
IBERINCO ENGINEERING AND CONSTRUCTION, US. INC

The impact of not consolidating these companies with the group at the half-year end in June 2006 is not significant. This is basically because these companies are not yet active businesses.

III. ACCOUNTING POLICIES AND VALUATION STANDARDS

(The principles and criteria of registration and valuation envisaged in the legislation in force must be used to prepare the financial and accounting data in the annual accounts for the financial year to which this periodically published report refers and which is used in the preparation of the financial and accounting data and information included in this report). If, exceptionally, generally accepted accounting principles and criteria required by the legislation in force were not applied to the data and information included herein, this fact must be stated and adequately explained. The influence that the non-application of these accounting principles and criteria might have on the net worth, financial situation and profit or loss of the company or consolidated group must also be explained. Additionally, with similar scope to the foregoing, any modifications that may have taken place in the accounting criteria used in the preparation of the information herewith must be mentioned and discussed. If the same accounting principles, criteria and policies have been applied as when preparing the preceding year's annual accounts, and if they coincide with those envisaged in the accounting regulations in force which are applicable to the company, this must also be expressly stated. When, in accordance with the applicable legislation, adjustments and/or reclassifications have taken place in the preceding period, due to changes in accounting policies, corrections of errors or changes in the classification of items, this section will include the quantitative and qualitative information necessary to understand these adjustments and/or reclassifications).

On 21 July the information sent on 20 July was modified as an error was detected in the classification of the items "Other income 4510" and "Staff costs 4540" in the profit and loss statement of the consolidated group.

	Reported 20-07-2006	modified 21-07-06
Other income	189,603	105,643
Staff costs	-515,075	-431,115

LEGISLATION IN FORCE

The financial and accounting information included in this regular published report was prepared, as far as the consolidate data are concerned, in accordance with International Financial Reporting Standards (IFRS), these being understood to be those adopted by the European Commission under the procedure established by Regulation (EC) No. 1606/2002 of the European Parliament and of the Council, 19 July 2002.

The foregoing applies both to the information in the half-yearly interim report on the year's profits and the comparison with the previous financial year's figures.

CHANGES IN ACCOUNTING CRITERIA

On 28 February the official state gazette (BOE) published Royal Decree-Law 3/2006 of 24 February 2006, modifying the mechanism for matching offers for sale and purchase of energy submitted simultaneously to the daily and intraday production market by electricity sector entities belonging to the same business group.

This Royal Decree-Law is pending implementation, and therefore until its effective scope is clarified, the main implications for this regularly published information are:

- Cancellation of freely allocated emission rights: In half-yearly reporting:
 - Emission rights are recognised under the heading of intangible assets.
 - An account payable is established for those allocated emission rights the value of which corresponds to the market value of emission rights at the time of their allocation.
 - The balancing item of the provision set aside for the consumption of emission rights will be the profit and loss account, under the heading "Raw materials and consumables".
- The provisional price to be considered by the National Energy Commission (CNE) for the settlement of regulated activities will be the average cost envisaged in the 2006 tariff for energy generated in the ordinary regime for mainland Spain, including the cost of adjustment services and the power guarantee, which is 42.35 €/MWh.

With the exception of the above, the same accounting principles, criteria and policies have been applied in the half-yearly information as in the annual accounts.

TOTAL PERSONS EMPLOYED	3000	2,137	2,528	17,749	16,815

IX. PROGRESS OF BUSINESS

(The information to be included in this section, as well as complying with the provisions of the instructions for the completion of this half-yearly report, must expressly state the following points: progress of revenues and costs incurred in earning those revenues; composition and analysis of the main operations enabling extraordinary earnings, if any, to be obtained; comments on any significant investments and divestments, explaining their effect on the company's working capital and in particular on its cash position; adequate explanation of the nature and effects of any items that have caused a significant change in revenues or earnings in the current half-year, with respect to the preceding period. Additionally, those companies sending a balance sheet and profit and loss statement for a consolidated group in accordance with the IFRS adopted, must provide detailed information about those operations with a significant impact on the financial position, profit or loss, and equity of the company or its group as a result in the deterioration of assets or their reversion, from the valuation of assets and liabilities at fair value, including derivative instruments and accounting hedges, differences in exchange rates, provisions, business combinations, operations classified as "discontinued" or any other operation with a significant effect, and a description of material changes under the heading "non-current assets classified as being held for sale and from discontinued operations" and related liabilities, significant variations in the risk taken on, and transactions to mitigate it, and events subsequent to the end of the year, which although significant, have not been reflected in the financial information presented. Lastly, any comments on the consolidated financial statements and on the individual financial statements should be clearly distinguishable from one another).

- In annex

X.1.) ISSUES, REDEMPTIONS OR REPAYMENTS OF DEBENTURES

(This section is to include individualised information on each issue, redemption or repayment of debentures since the beginning of the financial year by the company obliged to publish periodic information, or by any entity within the scope of consolidation with it, indicating for each issue, redemption or repayment the information detailed in the boxes below. This information must be supplied separately so as to distinguish between the issues, reimbursements or repayments that, in relation to an issue or share placement, have required the registration of an information prospectus with a competent authority (24) in a member state of the European Union, from those that have not. In the case of issues, reimbursements or repayments by associates or any entity other than the dominant company, dependent companies or multigroup companies, this information will only be included insofar as the issue or repayment is guaranteed, in whole or in part, by the dominant company, or any dependent or multigroup entity. Share issues or placements in the money market (25) may be aggregated (26) by type of operation (27), as may issues by a single entity, within a single country, provided they are of similar characteristics. In the case of issues, redemptions or repayments that take place through a "special purpose entity" (28), this fact must be expressly stated).

X.2.) THIRD-PARTY ISSUES UNDERWRITTEN BY THE GROUP

(This section is to include individualised information on each issue, redemption or repayment of debentures since the beginning of the financial year underwritten by the company obliged to publish periodic information, or by any entity within the scope of consolidation with it, in relation to issues or placements not included in section X.1.) above, indicating for each the information detailed in the boxes below. The guarantee was given by an associated company or any other entity within the scope of consolidation other than the dominant company, dependent or multigroup companies, this information will only be included in the event that the exercise of the guarantee might have a material effect (32) on the consolidated financial statements. Share issues or placements in the money market (25) may be aggregated (26) by type of operation (27), as may issues by a single entity, within a single country, provided they are of similar characteristics. In the case of issues, redemptions or repayments that take place through a "special purpose entity" (28), this fact must be expressly stated).

Issuing entity	Relationship (29)	Country of domicile	Characteristics of the issue, redemption or repayment of debentures									
			Operation (27)	ISIN Code (30)	Type of securities	Date of issue/redemption	Outstanding balance	Interest rate	Redemption and mode of repayment	Market(s) where listed	Credit rating	Collateral posted (31)

XI. DIVIDENDS DISTRIBUTED DURING THE PERIOD:

(a note is to be made of the dividends effectively paid since the start of the financial year).

		% of nominal	Euros per share (x.xx)	Amount (Thousands of euros)
1. Ordinary shares	3100	12.2	0.37	330,828
2. Preference shares	3110			
3. Redeemable shares	3115			
4. Non-voting shares	3120			

Additional information on the distribution of dividends (interim dividend, supplementary dividend, etc.)

Included in annex on following sheet (G-11b)

XII. SIGNIFICANT EVENTS (*)

	YES	NO
1. Purchases or transfers of shares in the capital of companies listed on the Stock Exchange giving rise to the obligation to report pursuant to the Stock Market Act s. 53 (5% and multiples thereof)	3200	X
2. Purchases of treasury shares giving rise to the obligation to inform pursuant to Supplementary Provision 1 of the Stock Market Act (1%)	3210	X
3. Other significant increases or reductions of fixed assets (stakes of over 10% in unlisted companies, significant investments in or divestments of fixed assets, etc)	3220	X
4. Increases or reductions of the share capital or nominal value of shares.	3230	X
5. Issues, redemptions or repayments of debentures.	3240	X

Other aspects (43)

- In order to facilitate comprehension of the information supplied, a fuller description is given of the following operations:
- The amounts in rows 5,6,8,20,21,25 and 26 are the balances at the end of the period.
- The amounts in rows 7,28 and 29 relate to transactions in which the related party acted as an intermediary.
- The amounts in rows 17 and 18 are the balances committed at the end of the period.
- The transactions listed in rows 5 and 20 relate to current accounts.
- The transactions listed in rows 6 and 21 relate to deposits.
- The transactions listed in rows 7 and 29 relate to emissions of promissory notes.
- The transactions listed in rows 19 and 22 relate to emissions of debt derivatives.
- The transactions listed in rows 23 and 24 relate to exchange insurance.
- The transactions listed in rows 25 and 26 relate to emissions of portfolio and treasury stock derivatives.
- The transactions indicated in row 27 relate to the sale and purchase of foreign exchange.
- The transactions indicated in row 28 relate to the sale and purchase of shares.
- Rows 31 and 32 list the revenues from the supply of electricity and gas to major shareholders.

The transactions undertaken by Iberdrola, S.A. with its major shareholders during the first month of 2006 are the result of its normal business and took place under normal market conditions. It is not necessary to report them in order to give a true and fair view of the company's equity, finances or earnings position.

Financial instruments are contracted on the basis of competition between banks, choosing the most beneficial for the company at the time. Iberdrola's financial risk policy establishes a series of limits on contracting with a single financial institution in order to avoid an excessive concentration of risk. This maximum contracting limit, which also depends on the credit rating of the financial institution, applies to all financial institutions, including the company's major shareholders.

2. TRANSACTIONS WITH DIRECTORS AND MANAGERS OF THE COMPANY(36)

Other aspects (43)

Rows 1 to 5 list transactions between Iberdrola, S.A. and Montes de Piedad y Caja de Ahorros de Ronda, Cádiz, Almería, Málaga y Antequera (UNICAJA), of which the director Braulio Medel Cámara is president.

The transactions listed in row 5 concern current accounts.

Row 6 includes transactions under a contract for the provision of services for the development of energy businesses in Turkey with the Turkish company DAS Engineering & Energy Investments, Inc., in which a brother of the director Lucas María de Oriol López-Montenegro is a member of the board.

At all events, these are transactions within the normal business of the company, entered into under normal market conditions, which do not need to be reported in order to give a true and fair view of the company's equity, finances or earnings position.

Financial instruments are contracted on the basis of competition between banks, choosing the most beneficial for the company at the time. Iberdrola's financial risk policy establishes a series of limits on contracting with a single financial institution in order to avoid an excessive concentration of risk. This maximum contracting limit,

which also depends on the credit rating of the financial institution, applies to all financial institutions, including UNICAJA.

Other aspects (43)

The table above includes transactions between part-owned companies and major shareholders of Iberdrola, S.A. (rows 1 to 27). Intragroup operations are also listed (rows 28 to 29). Finally, transactions between part-owned companies and Montes de Piedad y Caja de Ahorros de Ronda, Cádiz, Almería, Málaga y Antequera (UNICAJA), of which the director Mr Braulio Medel Cámara is the president, are listed (rows 40 to 44), along with information regarding the compensation certain executives receive from these part-owned companies (rows 45 and 46).

In order to facilitate comprehension of the information supplied, a fuller description is given of the following operations:

- The amounts in rows 4,5,7,8,21,22 and 23 are the balances at the end of the period.
- The amounts in rows 6,19 and 20 are the balances committed at the end of the period.
- The amounts in rows 9 and 10 related to contracted operations.
- The transactions listed in rows 4 and 21 relate to emissions of debt derivatives.
- The transactions listed in rows 5, 23 and 44 relate to current accounts.
- The transactions listed in row 22 relate to deposits.
- The transactions listed in rows 24 and 25 relate to exchange insurance.
- The transactions indicated in row 26 relate to the sale and purchase of foreign exchange.
- Rows 37 to 39 list the revenues from the supply of electricity and gas to various part-owned companies.

The transactions listed here fall within the normal business of the company, were entered into under normal market conditions, and so do not need to be reported in order to give a true and fair view of the company's equity, finances and earnings.

Financial instruments are contracted on the basis of competition between banks, choosing the most beneficial for the company at the time. Iberdrola's financial risk policy establishes a series of limits on contracting with a single financial institution in order to avoid an excessive concentration of risk. This maximum contracting limit, which also depends on the credit rating of the financial institution, applies to all financial institutions, including the company's major shareholders and UNICAJA.

XV. SPECIAL AUDITORS' REPORT

(This section should be completed with the information corresponding to the 1st half of the financial year following the last audited annual period, and shall be applicable to all issuing companies that, pursuant to the provisions of the thirteenth section of the Ministerial Order of 18 January 1991, are obliged to present a special report from their account auditors, when in their report on the annual accounts of the preceding year, the auditors had refused to give an opinion, stated a negative opinion or expressed their reservations. In this report a note will be included to the effect that the half-yearly information referring to the special auditors' report is included as an annex, along with a copy of the information or declarations made by the directors of the company regarding the updated situation of the reservations made by the auditors in their report on the annual accounts for the preceding financial year, and pursuant to the applicable technical standards of auditing, was used as the basis for the preparation of the aforementioned special report).

INSTRUCTIONS FOR THE COMPLETION OF THE HALF-YEARLY REPORT (GENERAL)

- The numerical data required, unless the contrary is indicated, must be expressed in thousands of euros, without decimals, and balanced after rounding.
- Negative amounts should be shown with a minus sign (-) in front of the number concerned.
- Together with each item of data expressed in figures, unless stated otherwise, the figure for the same period of the preceding year must also be shown.
- Adopted international financial reporting standards (adopted IFRS) are understood to mean those adopted by the European Commission under the procedure established by Regulation 1606/2002 of the European Parliament and of the Council, 19 July 2002.
- The financial information contained in this model shall be completed in accordance with the accounting standards and principles for registration and valuation that are applicable to the institution when preparing its annual financial statements for the year to which the periodic public information presented here refers.
In the case of financial years starting after 1 January 2007, companies other than credit institutions, which pursuant to the Code of Commerce are obliged to prepare consolidated annual accounts, and on the date of the end of the financial year have only issued fixed income securities traded on a stock exchange, and which have opted to continue applying the standards laid down in section three of title III of the first book of the Code of Commerce, and the regulations implementing them, provided they have not applied the adopted IFRS in previous years, shall present their consolidated periodic public information using the models included in sections IV and V referring to the national accounting standards in force in Spain.
- The information that is to be included under the heading of progress of the business should allow investors to reach a sufficiently well grounded opinion on the company's business and the profit or loss it obtained, financial situation and other essential details of the general progress of the company's business during the period covered by the interim report.
- Definitions:
 - (1) Variation in the companies making up the consolidated group: this will include only those companies that, in relation to the consolidated annual accounts of the immediately preceding financial year, have been included or excluded from the process of consolidation.
 - (2) The various headings making up the fixed assets will be presented net of accumulated depreciation and provisions.
 - (3) Deferred expenses include the cost of formalising debt (cost of issue and modification of fixed income securities and the cost of formalising debt, including notary's fees, taxes, preparation of certificates, etc.), deferred interest on tradable securities (difference between redemption value and issue price of fixed income securities and other analogous liabilities) and the cost of deferred interest (difference between the redemption value and the amount received on in the case of debt other than that in the form of fixed income securities). Companies in the electricity sector must also include the accrual accounts typical of their sector under this heading.
 - (4) Deferred income includes capital subsidies, positive exchange rate differences, income from deferred interest (interest incorporated in the nominal amount of loans given during normal business operations, which have to be entered against profit and loss in future financial years) and other income to be distributed over several years.
 - (5) The share of long-term debts with a maturity of less than 12 months must be reclassified under the appropriate heading in short term payables.
 - (6) The net turnover will include the price at which products are sold and services provided during ordinary business net of rebates and other discounts on sales, and of value added tax and other taxes directly related to the foregoing revenues.
 - (7) The "Other income" heading covers income from other sources than operating the business, work done by the company to improve its assets (except capitalised interest and exchange rate differences) and operating subsidies (capital subsidies transferred to the period's earnings are not included).

- (8) The following items are to be included under the heading of external and operating expenses:
- Work done by other companies, external services (leases, repairs, transport, insurance, power, etc.); taxes (excluding corporation tax) and other management expenses.
 - The allocations to provisions for operating risks and liabilities (major repairs, etc.; excluding contributions to pensions and similar obligations, which are to be registered under staff costs).
- (9) Other income and expenses will include the profit or loss of unit-holders other than unit-trust managers in operations regulated by articles 239 to 243 of the Code of Commerce and in other joint transactions of similar characteristics.
- (10) The variation in working capital provisions will include allocations made during the period, net of surpluses and applications, intended for use to make value corrections in the case of reversible deterioration in the value of inventories, customer receivables and other receivables. It will also include losses due to definitive insolvency of customers and other debtors.
- (11) Allocations to depreciation and financial provisions will include allocations made during the period, net of surpluses and applications, intended to be used to make value corrections in the case of reversible deterioration in the value of securities (except those corresponding to holdings in the share capital of group or associate companies), other tradable securities, and short and long-term non-commercial loans.
- (12) Earnings from intangible assets, tangible assets and the control portfolio will include the profit or loss on the sale of tangible and intangible assets and on long-term holdings in the share capital of group, multigroup or associate companies, or their total or partial removal from the inventory, as a result of losses due to the irreversible deterioration of these assets.
- (13) Variation in provisions for intangible and tangible assets and the control portfolio will include allocations made during the period, net of surplus and applications, intended for use correcting valuations due to reversible deterioration in the value of tangible and intangible assets, and long-term holdings in the share capital of group and associate companies.
- (14) Earnings from transactions involving treasury stock and the company's own bonds will include the profit and loss resulting from the redemption of bonds or the transfer of securities and bonds issued by the company.
- (15) Profit or loss brought forward will include earnings from previous years, which given their materiality, cannot be entered on the accounts according to their nature.
- (16) Other extraordinary earnings will include:
- The value of capital subsidies transferred to the period's earnings.
 - Extraordinary income and expenses whose value is significant, which are not considered periodic when assessing the future earnings of the company.
- (17) The company's consolidated reserves will include both those corresponding to companies consolidated using the global or proportional integration and those that correspond to companies consolidated by the equity method.
- (18) and (19) The earnings and conversion differences headings (which appear only during consolidation) include exchange rate differences arising from the conversion of consolidated companies' balances in foreign currency (whichever consolidation technique is used).
- (20) Other reserves: under this heading will be included the revaluation reserves for tangible and intangible assets, and other reserves other than accrued earnings.
- (21) Accrued earnings: under this heading will be included the earnings produced in the current financial year and those from previous financial years that have not been distributed to shareholders.
- (22) Other non-current liabilities: under this heading will be included, among other items, liabilities for post-employment benefits due to employees or other long-term remuneration.
- (23) Profit/loss after tax of discontinued operations (net): under this heading the figure, net of tax, corresponding to the following items will be presented:
- (i) profit/loss after tax of discontinued operations, and
 - (ii) the profit after tax recognised by the valuation at fair value less cost of sale, or by sale or

disposal by other means, of assets or disposable groups of items constituting the discontinued operation.

- (24) Competent authority of a member state of the European Union: the authority designated by the home member state, as defined in article 2.1.m. of Directive 2003/71/EC of the European Parliament and of the Council of 4 November 2003 on the prospectus to be published when securities are offered to the public or admitted to trading.
- (25) Issues of securities in the money market: for the purposes of this Circular, these will be considered to be issues of securities that enjoy high liquidity, and at the same time that they are admitted for trading in an organised secondary market, whether official or not, that they are readily realisable securities and that their time to maturity is less than or equal to eighteen months.
- (26) Aggregation of issues or placements: the total outstanding balance on the date of this periodic published information will be aggregated, giving averaged values in the case of the interest rate, maturity and credit rating, or other values, provided they are more significant.
- (27) Transaction: one of the following keys will be entered, depending on the type of transaction: "E" for issues, "R" for redemptions, or "C" or cancellations.
- (28) Special purpose vehicle: any type of entity, belonging or not to the group to which the entity obliged to present periodic public information, created to achieve a specific purpose which is clearly defined beforehand (for example, to undertake a financial leasing operation, research and development activities or asset securitisation), whatever its legal form. Such entities are commonly subject to legal conditions imposing strict, and sometimes permanent, limits on the powers of their governing bodies, directors or managers over the activities of the entity.
- (29) Relationship (issues, redemptions or repayments of debentures): the type of relationship with the entity presenting the periodic public information will be stated: dominant company, dependent company, multigroup, associate, or any other entity that falls within the scope of consolidation.
- (30) ISIN (International Securities Identification Numbering system): the relevant ISIN number is to be entered in those issues with which there is an associated ISIN code. Otherwise, "N/A" is to be entered.
- (31) Guarantees given: the type of guarantee given is to be indicated, along with the entity giving it.
- (32) Guarantee that might have a material effect on the financial statements: for the purposes of this information, it will be considered that the exercise of the guarantee may have a material effect when the omission or erroneous inclusion of the impact of execution of the guarantee in the information provided could, individually or on an aggregate basis, influence the financial decisions of users of this information.
- (33) Relationship (third-party issues underwritten by the group): this is to include the type of relationship existing between the entity presenting the periodic public information or any entity included in the scope of consolidation, and the entity whose issue or placement has been underwritten, whatever it is. Where applicable, the relationship between the underwriting entity and the undertaken obliged to present periodic public information is to be stated.
- (34) Related parties: one party is considered to be related to another or a group acting in concert when it exercises or has the possibility of exercising, directly or indirectly, or by virtue of pacts or agreements between shareholders, control over the other or a significant influence in the financial and operational decision-making of the other.
The existence of control is presumed when any of the situations arise envisaged in article 4 of Law 24/1988, 28 July 1988, on the Stock market.
Significant influence is understood to mean influence enabling one party exercising to influence the financial and operational decisions of the other party, even though the former does not control the latter. For the purposes of this circular, evidence of influence is deemed to exist, unless demonstrated otherwise, in each of the following cases:
- a) representation on the board of directors or equivalent governing body of the part-owned entity;
 - b) participation in the processes whereby policies are set, including decisions on dividends and other distributions;

- c) material transactions between the investor and the part-owned entity;
- d) exchange of management staff; or
- e) supply of essential technical information.

Without prejudice to the foregoing, when deciding whether significant influence may be deemed to exist, the cases envisaged in Directive 2002/87/EC, 16 December 2002, will be taken into account.

- (35) Related-party transactions: Order EHA/3050/2004, of 15 September 2004, considers related-party transactions to include all transfers of resources, services or obligations between related parties, regardless of whether there is any form of consideration. It shall not be necessary to report transactions between companies or entities belonging to the same consolidated group, provided that they have been eliminated in the process of preparing the consolidated financial information and that their purpose and the conditions under which they take place are such that they fall within the scope of the usual business of the companies or entities concerned. Nor shall it be necessary to report operations that, while being a part of the company's ordinary business, are carried out under normal market conditions and are immaterial, understood to be those which do not need to be reported in order to give a true and fair view of the company's equity, finances and earnings.
- (36) Information on related-party transactions is to be presented broken down under the headings established in section four of Order EHA/3050/2004, of 15 September 2004. For the purposes of section four letter C) of the aforementioned Order, only those transactions between related parties that affect the reporting entity or its group are to be reported.
- (37) Code and description of the transaction: at all events, the following types of related-party transactions should be reported. The associated codes are given in the table below:

Code	Transaction
001	Purchase of goods (finished and unfinished)
002	Sale of goods (finished and unfinished)
003	Purchases of tangible assets
004	Purchases of intangible assets
005	Purchases of financial assets
006	Sale of tangible assets
007	Sale of intangible assets
008	Sale of financial assets
009	Provision of services
010	Receipt of services
011	Collaboration contracts
012	Financial leasing contracts
013	Operating lease contracts
014	Research and development transfers
015	Licence agreements
016	Financing agreements: loans
017	Financing agreements: provision of capital (whether in cash or kind)
018	Financing agreements: other (specify)
019	Interest paid
020	Interest charged
021	Interest due but not paid
022	Interest due but not collected
023	Dividends and other distributed earnings
024	Guarantees
025	Management contracts
026	Compensation
027	Indemnities
028	Contributions to pension schemes and life insurance
029	Payment for services in financial instruments in the company (stock option plans, convertible bonds, etc.)
030	Call option commitments
031	Put option commitments
032	Other instruments that might imply a transfer of resources or obligations between the company and the related party
033	Other (specify)

- (38) **Aggregate (A) or Individualised (I) information:** the information to include in the table may be aggregated in the case of items with similar content: Nevertheless, individual information must be provided regarding those transactions that are significant in view of the sums involved or their relevance for the proper understanding of the periodically published information. As regards whether a transaction is considered significant in view of the sums involved or their relevance for the proper understanding of the financial statements, the provisions of the fifth section of Order EHA/3050/2004, 15 September 2004, on the reporting of related party transactions, shall apply. Related-party transactions shall be considered to be significant due to the sums involved when they exceed the company's normal business and are significant from the standpoint of the parameters envisaged in Directive 2002/87/EC, 16 December 2002. At all events, for the purposes of this Circular, related-party transactions shall be considered significant on account of the sums involved when they need to be broken down in order for the financial information supplied to be properly understood. Moreover, transactions shall be considered relevant for the proper understanding of the periodically published information when members of the board of directors of the company or any group company are involved, directly or indirectly, provided such transactions are not part of the normal business of the company and are not carried out under normal market conditions.
- (39) **Current (Curr.)/Previous(Prev.):** period in which the transaction took place. Transactions taking place between the start of the current financial year and the date to which the periodic public information refers (Curr.) and those taking place before the start of the current financial year which have not yet expired (Prev.) must both be included.
- (40) **Profit/loss:** the accrued profit or loss is understood as the difference between the book value and the price at which the transaction took place.
- (41) **Payment conditions and periods:** if the information is presented in aggregate form it should be sorted by time remaining to maturity of the transaction, i.e. short term (s/t) or long term (l/t). If, on the other hand, the information is presented in individualised form, the time to maturity and the payment conditions of each specific transaction should be stated.
- (42) **Related party or parties:** in the case of individualised information, the name of the related party involved in the transaction, whether an individual or company, must be stated. It will not be necessary to complete this field if the information is presented in aggregate form.
- (43) **Other aspects:** in this section any information regarding pricing policies applied, guarantees given and received, or any other aspect of the transactions allowing them to be properly interpreted must be given. This is to include information about any transactions that have taken place under non-market conditions, and in the case of such transactions the profit or loss the reporting entity or its group would have registered if the transaction had taken place at market prices must be stated.

First half
Results 2006
Quarterly report

NET PROFIT REACHES 817.8 MILLION EUROS FOR THE FIRST TIME IN A HALF-YEAR PERIOD

Wind Energy, International and Non-Energy Business, Drivers of Growth

Record production in a half-year period (43,701 GWh; +9.2%), while reducing CO₂ emissions by 11.1%.

- Wind energy and mini-hydroelectric production increases to 3,988 GWh (+14.9%). This includes 281 GWh in international wind energy production.
- In Spain, production from combined cycles increases by 18.1%.
- CO₂ emissions reduced by 18.4% in Spain, reaching 21,171 GWh of emissions-free production, 65% of the total generated.
- In Mexico and Brazil, production increases by 19.7% over 2005.

EBITDA up 20.0%, reaching 1,916 MM€

- Renewables and International business represent 33.2% of EBITDA, compared with 26.3% for same period in 2005.
 - The Wind Energy Business registers an EBITDA of 303.5 million euros (+60.0%).
 - EBITDA of International reaches 332.5 million euros (+44.1%).
- Domestic Energy business (ex-Renewables) increases its EBITDA 4.1% due to the growing contribution of the Gas business. Without this effect, it would have dropped 2.3%.
- The improved results in Commercial and Gas business compensates for the impact of RDL 3/2006 registered on Distribution business
- Non-energy business, source of recurring profits, grew at the EBITDA level 49.7% to 183.7 million euros.

International Growth in Renewables and Engineering:

- Renewables: Acquisitions in France, USA and China consolidates growth strategy.
- Engineering: 1,500 million euros of backlog, with developments in 20 countries.

Basic figures for the businesses

Operating Data		H1 2006	H1 2005	%
Net production	GWh	43,701	40,022	9.2
Gas combined cycle	GWh	17,645	14,763	19.5

Debt /equity ratio	Times	1.39	1.30

(1) Includes the amounts corresponding to the tariff insufficiency: 1,341 million euros at December 2005 and 353 million euros at June 2006.

(2) Net Debt/(Net Debt+Shareholder's equity). Includes financing of the tariff insufficiency. Without including this issue, leverage as at December 2005 would stand at 53.6% and at 54.9% in June 2006.

Highlights

- As at 30 June 2006, IBERDROLA achieved a new half-year record in Group production, which grew 9.2% to 43,701 GWh, driven by use of technologies more environmentally efficient. This high growth has been achieved while reducing CO₂ emissions by 11.1%. In Spain, the emissions were reduced by 18.4%, resulting in an emission-free production figure of 64.8% on a total of 32,681 GWh produced. It is also worth highlighting:
 - Wind production grew 16.2% to 3,663 GWh (281 GWh international). Special Regime production, including cogenerators contribution, represented 14.4% in Spain, similar level to the one achieved by hydroelectric production.
 - High availability of nuclear power plants, with an output increase of 15.2% compared to 2005.
 - Production from combined cycles increased in Spain by 18.1%, and by 20.6% in Latin America.
 - Significant reduction in production with the most pollutant energy sources, with a decline of 19% in production from coal and 58% from fuel oil.
- Net Operating Profit recorded a significant improvement both in gross terms (EBITDA +20.0%) and in net terms (EBIT +24.9%). Renewables, International and Non-Energy businesses, with strong growth in activity, were the engines of growth for the Group in the first half of 2006:
 - Domestic Energy business (ex-Renewables) increased its EBITDA by 4.1% due to the growing contribution from Gas, without which Gross Operating Profit would have dropped by 2.3%. In addition, results obtained by Commercial and Gas made it possible to reduce the impact on EBITDA of Royal Decree (RDL) 3/2006. On the other hand, it should be noted that IBERDROLA Distribution, SAU set up on 9 June 2006 operative actions aimed to minimize the effects of the Royal Decree mentioned above.
 - Renewables: EBITDA grew to 332.5 million euros, after a 16.2% increase in wind energy production.
 - International: 44.1% EBITDA growth, exceeding 332 million euros, due to good development of business in Mexico and Brazil. It emphasizes the 19.7% increase in production, due to improvements in efficiency and availability in generation, and a 4.8% increase in distributed energy. The positive development in the exchange rate for the currencies of reference in the period should also be mentioned.
 - Non-energy business, an important source of recurring profit, achieved EBITDA of 183.7 million euros, an increase of 49.7%. Engineering and Services (+61%)

represented the majority of growth in EBITDA for this area of business.

- Net Profit was 817.8 million euros, a growth of 25.2%, in line with EBIT and after application of an effective tax rate of 35%.
- IBERDROLA made new strides in its international expansion during the first half in Renewables and Engineering:
 - Renewables: acquisition of the French wind energy producer Perfect Wind (600 MW portfolio), the US producer Community Energy (2,200 MW portfolio), and an agreement in China with local authorities to obtain a 1,000 MW portfolio. All these operations consolidate the growth strategy by increasing the portfolio. In addition an agreement was concluded in China with Guanxi Guidong Electric (300 MW in hydroelectric generation and electricity transmission), for the acquisition of a 29% stake in such company.
 - Engineering: With a 1,500 million euros backlog, Iberdrola Ingeniería has presence now in 20 countries worldwide.
- Publication of Spanish NAP 2008-2012, which includes the following important points:
 - All efforts are now focused on the electricity sector, compared with other sectors.
 - Electricity companies represent the only sector which can internalize CO₂ costs.
 - Technological change is being favoured.
- As regards Regulation, in the first quarter of the year was published Royal-Decree 3/2006 modifying the matching regime in the wholesale market, as well as the new consideration of the emission allowances. Afterwards, beginning June, there were a number of developments on the regulatory front aimed at producing greater liberalization within the sector:
 - Recognition of tariff insufficiency corresponding 2005.
 - Elimination of CTCs and end of the transition period.
 - Start of contracting electrical energy by distributors in the Iberian forward market.

Development of the Strategic Plan

1. INVESTMENTS IN GENERATION

Installed capacity

During the first half of 2006 IBERDROLA put 202 MW of additional power on line in relation to what existed at December 2005, reaching 27,993 MW of total installed capacity. The new power put on line relates entirely to new wind energy and mini-hydroelectric facilities. Spain represents 88.2% of total installed capacity, with 24,696 MW.

In comparative annual terms, the installed capacity at the end of the first half of 2006 is 6.2% higher than what existed at the end of the first half of 2005.

The following is a breakdown of the added amounts achieved in the last 12 months:

Additional capacity (MW)	MW	Facilities put on-line in the last 12 months
Combined cycle	800	Arcos III in Spain (400 MW Aceca in tests)
Wind and Mini-hydroelectric	724	New plants in Spain, Europe and Latin America
Cogeneration	92	New plants operating in Spain
Traditional generation	24	Recognized capacity increases
Total	1,640	

1.1 Spain

- Combined Cycle Plants

Installed capacity

The total operating capacity of IBERDROLA in Combined Cycle plants in Spain at the end of the first half of 2006 reached 4,000 MW (4,800 MW under management). Year-on-year the installed capacity in combined cycles in Spain at the end of June 2006 is 25% higher than for the same period in 2005. The increase in operational power relates to Arcos III, 800 MW.

Plants at test stage or under construction
The Escombreras Combined Cycle

IBERDROLA has started the testing period for its combined cycle new group at Escombreras (800 MW), in Cartagena (Murcia), where synchronisation with the electricity grid took place on 1 July. This IBERDROLA combined cycle is the ninth built by the Company in Spain since the 2002-2006 Strategic Plan was implemented.

Project	Capacity (MW)	Start of operations
Castellón A	800	2002
Castejón	400	2002
BBE	800	2003
Tarragona	400	2004
Santurce	400	2004
Arcos I and II	800	2004
Aceca	400	2005
Arcos III	800	2005
Total 2002-2005	4,800	2005
Escombreras	800	2006
Castellón B	800	2007
TOTAL '02-'07	6,400 (5,600 OWNED)	

It is forecasted that the Escombreras cycle will start commercial operation during the last quarter of this year. Construction of this new group at the Escombreras plant meant dismantling the old fuel oil-powered groups 1, 2 and 3, while maintaining groups 4 and 5 of 554 MW in operation.

- Wind Energy and Mini-hydroelectric
Installed capacity

At the end of the first half of 2006 IBERDROLA has installed capacity of 4,004 MW (3,672 MW of wind energy and 332 MW of mini-hydroelectric), which strengthens IBERDROLA as worldwide leader in this business. In the first half of this fiscal year 194 additional MW were installed (178 wind energy MW and 16 mini-hydro-electric MW). In comparative annual terms the installed capacity at the end of June 2006 is 22.1% higher than what existed at the end of June 2005.

In this context, IBERDROLA envisions reaching 10,000 MW of installed power by 2011. With this aim, IBERDROLA has carried out a number of operations in the area of renewable energies outside Spain during the first half of 2006, which increases the project portfolio, now standing at 16,000 MW.

In respect to the installed capacity per geographic area, the wind generation park now includes wind farms in twelve Spanish communities and in four countries, Greece, Portugal, France, and Brazil. In addition to development in countries where it is already present, it has projects at an advanced stage of development in the UK, Italy, Poland, Germany, Mexico and the US. 92.3% of the installed capacity of IBERDROLA in renewable energy is located in Spain, with 3,696 MW. With regard to projects outside of Spain, IBERDROLA already has a total of 308 MW in operation. As a whole, 7.7% of the 4,004 MW of total installed capacity of IBERDROLA is located outside Spain. IBERDROLA has incorporated into its CORE (Renewables Operation Centre) its wind farms operating in France, Brazil and Portugal, and intends to include gradually all facilities abroad.

Additional capacity

The new capacity installed in Spain during the first half of 2006 reached 121.5 MW, as follows: Alarcón (15,8 MW), Luzón Norte (20 MW) and Escalón (14 MW) in Castilla - La Mancha; Los Campillos (34 MW), Tarayuela (20 MW) and Urbel del Castillo II (12 MW) in Castilla y León, and Igea-Cornago (6 MW) in La Rioja region.

International

New capacity entering operation during the first half of 2006 achieved 72.1 MW, represented by, among others:

- France (La Butte des Fraus, 12 MW).
- Completion of already existing plants in Brazil, Rio do Fogo, up to 49.3 MW and in Greece, Modi ext., up to 4.8 MW.

Project Portfolio

IBERDROLA already has a project portfolio totalling 16,000 MW at different stages of development, both in Spain and in other countries.

MW	Potential development	Validated resource	Grid connection rights & under construction
Spain	8,446	5,254	2,031
<i>Wind</i>	7,234	4,773	1,933
<i>Mini-hydro</i>	192	192	90
<i>Other</i>	1,020	288	58
International	7,561	3,966	732
Total	16,007	9,219	2,813

During the first half of the year several international operations were carried out which mean additions to the IBERDROLA project portfolio:

- **Acquisition of Community Energy in the USA**, located at Wayne (Pennsylvania), which has a project portfolio totalling 2,000 MW of wind energy in various locations on the country's east coast, at preliminary study stage and with high likelihood of receiving authorisation, to which 200 MW at an advanced development stage should be added. Community Energy Inc. leads green energy certificates trading in the north-east of the United States, by supplying close to 75,000 domestic consumers and 350 industrial and commercial customers.

USA

Acquisition of Community Energy
(Total portfolio: 2,200 MW)

- Acquisition of French company Perfect Wind, considered as one of the companies with the greatest potential for development in the wind energy sector in our neighbouring country, having a project portfolio of 600 MW, of which 10 MW comes from a wind farm now at test stage and 86 MW from projects in an advanced stage of development.

France

Acquisition of Perfect Wind
(Total portfolio: 600 MW)

- Signing of Framework Agreement in China with the district council of Bayannaer, to study locations where at least 1,000 MW of

wind energy output could be installed.

Installation is subordinate both to results from wind measurements and to the approval of the regulatory framework in China, which must be stable and allow for the project's profitability.

China

Framework agreement

- In addition, IBERDROLA has reached an agreement with Guanxi Guidong Electric (300 MW in hydroelectric generation and electric transmission) for the acquisition of a 29% stake in the above mentioned company.
- New developments have been initiated in UK, France, Hungary and Estonia.
- Other Sources of Renewable Energy (other than wind energy)

Thermosolar Energy

In its portfolio IBERDROLA has a total of 13 projects for thermoelectric solar energy in Spain, adding up to 605 MW of installed capacity located in Sevilla, Ciudad Real, Madrid, Murcia, Badajoz, Zamora, Albacete, Soria, Teruel y Almeria.

Photovoltaic Energy

The priority is the development of an own portfolio in IBERDROLA combined cycle and nuclear plants. Currently IBERDROLA has an advanced portfolio of 30 MW in Spain.

Biomass

Development of biomass projects will be done on a very selective basis, always including guarantees that raw material will be supplied over the long term. IBERDROLA is intending to instal Spain's first timber biomass plant, which will be located in the municipality of Corduente (Guadalajara). IBERDROLA also has two other projects at an advanced stage which will bring the portfolio of the most advanced projects up to 25 MW.

Mini-Hydroelectric within Special Regime

IBERDROLA has a portfolio of 192 MW at national level and 100 MW at international level.

- Cogeneration

Operating capacity

IBERDROLA has operating capacity in co-generation plants in Spain of 387 attributable MW, equivalent to a total of 562 MW installed, from the 28 co-generation plants in which IBERDROLA has a stake. IBERDROLA has five liquid manure processing plants, of which the two located in Castilla y León are already in operation.

Capacity under construction

Since 2005, the liquid manure processing plants of Fonz and Monzón in Huesca and Fudepor in Murcia have been under construction, with an electrical capacity of 7.4 MW, 14.8 MW and

14.8 MW, respectively. They will be put into operation during 2006. Also, this June IBERDROLA and its partners began steps for construction of the bioethanol production plant at Barcial del Barco (Zamora). This plant will mean lower levels of CO₂ emission into the atmosphere, amounting to 110,000 tonnes annually.

1.2 Latin America

Mexico

IBERDROLA has consolidated its position as the top private electricity producer in Mexico. The Company already has installed capacity in Mexico of 2,696 MW, and is building another two combined cycle plants in that country: Altamira V with 1,121 MW, which will be put into operation in November 2006, and Tamazunchale with 1,135 MW, which will start operating in June 2007, the two biggest plants awarded up to now in Mexico.

Project	Capacity (MW)	Start of Operations
Enertek	120	100% operational
Monterrey	1,037	100% operational
Altamira IV	1,036	100% operational
La Laguna	500	100% operational
Altamira V	1,121	2006
Tamazunchale	1,135	2007
Total	4,949	

In the area of wind energy IBERDROLA is developing projects in the State of Oaxaca with total capacity of 150 MW.

Brazil

In Brazil, IBERDROLA has the hydroelectric plant of Itapebí, 450 MW (175 MW attributable to IBERDROLA) and the combined cycle of Termopernambuco with an installed capacity of 520 MW (203 MW attributable to IBERDROLA). In addition, IBERDROLA has six co-generation plants (93 MW) for private customers through its subsidiary Energyworks Brazil (100% IBERDROLA).

During the first quarter of the year, Neoenergia (39% IBERDROLA) was awarded concessions for building, maintaining, and operating the hydroelectric plant at Baguari and the mini-hydroelectric plants of Nova Aurora and Goiandira, which add up to a total of 188 MW of installed capacity.

In the field of wind energy, during this semester IBERDROLA has continued to put into operation the Rio do Fogo wind farm, a Clean Development Mechanism (CDM) project. Located in the state of Rio Grande do Norte (Brazil), this project totals 49.3 MW fully installed and at test stage.

1.3 Europe

Greece

In the field of wind energy, IBERDROLA has 193.3 MW on line and 44 MW under construction. IBERDROLA is a strategic partner of Rokas, the top developer and operator of wind farms in Greece, in which it has a 49.9% share. Also in Greece, IbeRenova will soon acquire

56 MW from Gamesa by an agreement signed for this purpose in July 2005.

Portugal

IBERDROLA has 18 MW in operation in Portugal, relating to the Catefica wind farm acquired from Gamesa. In addition, IBERDROLA has connection points for 150 MW that will enter into operation in the next two years.

Other Countries in European Union

IBERDROLA has various projects in other countries of the EU, mostly in the area of wind energy:

- In **Germany**, during 2006, 28 MW of wind energy will start operation at three wind farms which were the result of a purchase agreement with Gamesa. Two of these are already installed and the other one being tested. An additional 54 MW are being developed by IBERDROLA itself, and are at various stages of development.
- In **Poland**, IBERDROLA will have 58.5 MW of wind energy in operation at the end of 2006 and has 103 MW in its portfolio, to be developed in the coming years.
- In **France** IBERDROLA has 31.7 MW of wind energy in operation. The company has a strategic interest in the acquisition of rights and farms in an advanced stage of development, or in positioning itself as an investing partner for local developers. IBERDROLA has an agreement with the

German developer P&T Technology and its financial services subsidiary EECH AG for the purchase of farm development rights both in France (100 MW) and in Italy (200 MW). To these agreements must be added the projects acquired from Perfect Wind of 10 MW (at test stage) and 600 MW in portfolio, of which 86 MW relates to projects at an advanced stage. Furthermore, IBERDROLA has entered into an agreement with Total and OPT to develop wave energy projects and will start studying sites in France.

- In Italy IBERDROLA has an agreement with P&T, having the right to acquire 100 MW with an optional expansion of a further 100 MW. IBERDROLA will also acquire a total of 100 MW from Gamesa over the 2006-2009 period under the agreement signed in 2005.
- In the United Kingdom its own projects are being developed in the area of wind energy and, although they are in the initial phases, they could reach 145 MW.

Other Geographical Areas

In Latvia, IBERDROLA has been awarded the construction, as well as the operational supervision and maintenance during 12 years of a combined cycle plant of 420 MW of installed capacity in Riga (Latvia).

Trading

The Company is developing a major trading business in Europe, with operations in Austria, Belgium, France, Germany, the Netherlands,

Portugal, Spain, Switzerland and Italy. In addition, IBERDROLA is participating in monthly and daily auctions carried out by the French electricity system operating company (RTE), which enables it to access interconnection with Italy. The Company aims to extend these energy buying and selling activities in the short term in Europe to other countries such as Poland, Greece and the United Kingdom.

2.- DISTRIBUTION

2.1 Spain

At of the end of the first six months of fiscal year 2006, IBERDROLA had 9.75 MM costumers in Spain, with total energy distributed on the grid totalling 49,581 GWh, a 2.5% increase over the same period the previous fiscal year.

2.2. Latin America

At of the close of the first six months of 2006, IBERDROLA has already exceeded a total of 8.3 million customers under management in the region, with energy distributed totalling 13,815 GWh, an increase of 4.8% over the same period in the previous fiscal year.

3. SUPPLY

3.1 Electricity

- Spanish business: eligible electricity customers

The energy sold on this market totalled 4,615 GWh, a decline of 69.5% from the same period in 2005, as a consequence of the P&L optimization policy.

3.2 Gas

Procurements

In the first half of 2006, IBERDROLA consolidated its position as Spain's second-largest gas supplier, providing 14% of total gas consumed. IBERDROLA also ended the half with a global supply portfolio of 16.25 bcm per annum, 7.35 bcm of which cover its supply requirements in Spain, with 8.90 bcm in Mexico and Brazil.

During the first half, the most significant gas procurements activities were the following:

- Receipt of the first cargo of natural gas at the Sagunto regasification plant, which has capacity to process 6 bcm per annum since its start-up of operations this past 1 April. The vessel Al Thakhira, from the Emirate of Qatar, unloaded 145,000 m³ of LNG at the Saggas terminal, equivalent to 900 GWh of natural gas. IBERDROLA is the plant's largest shareholder, with a 30% interest.
- Receipt of the first cargo of liquefied natural gas (LNG), with capacity of 145,000 cubic meters, under the procurements contract signed with Nigeria LNG on 1 April 2002. The methane tanker vessel LNG Enugu unloaded at the Huelva regasification plant, where the Company has entered into the corresponding agreements for access to the gas networks. The amount transported is equivalent to 900 GWh of natural gas. This shipment falls within the agreement signed with Nigeria LNG for IBERDROLA's long-term acquisition of 10 bcm of LNG.
- Exports to France through the Larrau-Calahorra international gas pipelines and the new Euskadour pipeline. IBERDROLA has already accumulated 1,500 GWh exported in 2006. IBERDROLA was the first company to export gas through Euskadour since its start-up in June 2006.
- During the fiscal year, to optimize the flexibility of its gas basket, the Company has

developed various trading activities, the satisfactory economic results of which will be discussed below.

- In April, IBERDROLA successfully passed the inspection of the Oil Products Strategic Reserves Company *Corporación de Reservas Estratégicas de Productos Petrolíferos*, or CORES with respect to minimum safety inventories of natural gas, maintaining 36.5 days compared to the 35 required by Spanish regulation.

Infrastructure

To guarantee the entry of LNG into the gas system, IBERDROLA signed the corresponding agreements for access to the networks and is promoting first-class infrastructures: in addition to the aforementioned Sagunto, it holds a 25% interest in the Bahía Bizkaia Gas (BBG) regasification plant, which has been operating since August 2003 at a capacity of 6 bcm per annum, and has received over 100 methane tankers.

It also holds 12% of the company Medgaz, which is promoting a direct submarine gas pipeline between Algeria and Spain, with capacity for 8 bcm per annum, and which was granted in 2005 as a priority project for the Government, having recently been subject to a favourable environmental impact report. IBERDROLA has already guaranteed the receipt of at least 1.6 bcm per annum of gas through this new pipeline, beginning in 2009.

Supply

Spain

In the first half of 2006, IBERDROLA consolidated its position as second-largest gas supplier in Spain. In the second quarter of 2006 the company announced it will distribute natural gas for the first time to five cities in the Community of Madrid, to which end it will invest € 30 MM in developing the necessary gas infrastructure, which will benefit over 35,000 homes.

Europe

In groundbreaking activities to deregulate the French market, IBERDROLA began supplying gas to industrial users in that country in 2005. At the same time, it has also become the first domestic company to export gas from Spain to France through the interconnection gas pipeline.

4. NON-ENERGY BUSINESSES

Iberdrola Inmobiliaria

IBERDROLA (through the holding company and its subsidiary Iberdrola Inmobiliaria) currently controls over 3.8 MM buildable square meters. At the close of the first half of 2006, IBERDROLA Inmobiliaria had 16 **residential developments**, representing 1,426 homes. In the first half of the fiscal year, 277 homes were sold. With regard to **non-residential projects**, construction of the AQUA MULTIESPACIO real estate development

(Valencia), with 83,000 square meters in constructed surface area, has been completed, and was inaugurated in May. This real estate business is being operated through Sociedad Oceanic Center, in which IBERDROLA holds a 50% stake. The building of the Landaben (Pamplona) Industrial Polygon also continues under construction.

Investments made to purchase land under public deed from 1/1/06 to 3/31/06 totalled € 95.7 MM. Investments totalling another € 119.5 MM were made in the second quarter, bringing accumulated investment in land purchases to € 215.3 MM during the period from January to June 2006. Investments made in development and other items related to land purchases totalled € 4.2 MM. Investments made in construction works totalled € 31.5 MM.

Likewise, the capital gains of several recurrent transactions have been included in the first half, worth mentioning those done with assets in Vicálvaro and Aguacate (Madrid area).

Iberdrola Ingeniería y Construcción

Iberdrola Ingeniería y Construcción is executing projects in over 20 countries and has offices in Mexico, Brazil, Russia, Qatar, Greece, Poland, United Kingdom, US, Venezuela, Tunisia, Latvia, Germany, Albania, Kenya, India, and Slovakia. The value of the backlog is € 1,500 MM.

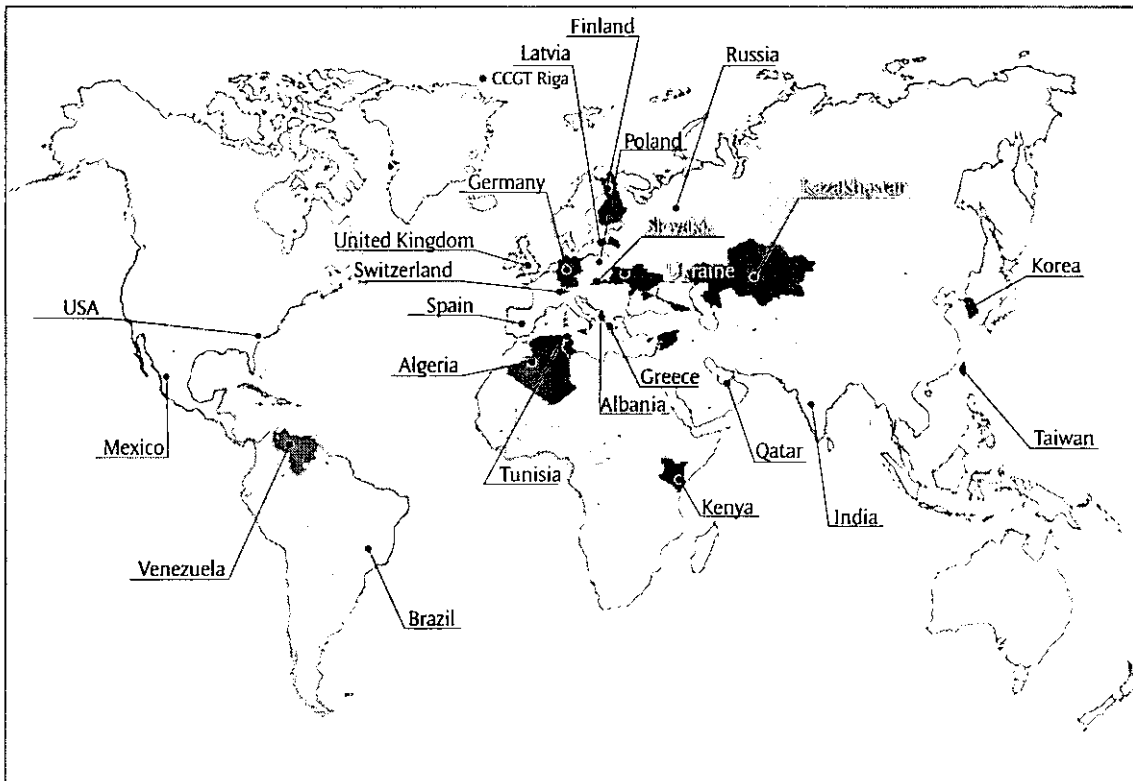

- In the first half of the year, IBERINCO strengthened its overseas presence by been

awarded with the reinforcing of the electricity grid of the state of Falcón, in Venezuela, for 80 million dollars; a new agreement with the Mexican public electricity company (CFE) to reinforce the electricity grid in the state of Tamaulipas, for 63.6 million dollars; a project to modernize the control system of the main hydroelectric plants in Kenya, with a budget of 5.5 million euros and a contract for the supply of new tubular beams of optimized design for the four condensers of the units 3 and 4 of the Bohunice V2 nuclear plant in Slovakia, for an amount close to 11 million euros. IBERINCO has been recently awarded with a 16.5 million euros contract in Bulgaria for building the Kozloduy-Plovdiv transmission lines.

With regard solely to the second quarter of the year, the most significant deals are the following:

- New international agreement for the supply of new tubular beams of optimized design, to the Bohunice Nuclear Plant V2 in Slovakia, for some € 11 MM.
- IBERINCO won an international competition for building the Fujairah electricity plant of 220 MW in the United Arab Emirates, for a total of 70 million euros, and is awaiting receipt of notification of award of both contracts.
- In Spain, we note the following as the most significant projects awarded: the construction

of 2 MW photovoltaic solar plants in Mohorte (Cuenca) for 12 million euros; a high-tension, 220 kV line from Celada to Hornillos to Grijota, for a total amount close to 4 million euros; the Hornillos 220/30 kV substation for 3.4 million euros; and phases III and IV of the Telefónica photovoltaic solar project totalling over 5 million euros.

5. OPTIMIZATION AND RATIONALIZATION OF FINANCIAL RESOURCES

Main Financial Transactions

Over the first half of 2006, the limit of the outstanding balance of the EMTN program was increased to 10 billion euros, from the previous 6 billion euros. As a result of this increase, which occurred in April, and the current favourable trend in this market, this instrument, along with the Commercial Paper programs, has become the Company's principal financing source, with seven issuances made.

Within this EMTN program, the following issuances were the most significant:

- 15 billion Japanese yen maturing in 2018, with option to extend to 2036.
- 200 million pounds sterling maturing in 2010.
- 300 million euros at 4 years.

Financial investments:

- **IBERDROLA increased its stake in Energías de Portugal (EDP) to 9.5%.** Last April 27 IBERDROLA reported it had increased its stake in Energías de Portugal, S.A. (EDP) from 5.7% to 9.5%. The purchase was made on the market for a total of € 332 MM. Given the guidelines of the National Energy Strategy, approved by the Portuguese Council of Ministers Resolution of 24 October 2005, IBERDROLA was prepared to concentrate its

entire shareholder position in one of the two companies (EDP or Galp), depending upon the option considered most favourable for this new energy strategy by the Portuguese government. Once the decision was made to concentrate on EDP, IBERDROLA Portugal then communicated to the Portuguese government its willingness to sell the 4% it still holds in Galp, within the framework of the Portuguese government's partial privatization of that company.

- **IBERDROLA acquired an 11% stake in Gamesa from Corporación IBV.** Last 5 July, IBERDROLA closed the purchase of 11% of the capital of Gamesa from Corporación IBV, a holding company owned in equal parts by the Company and BBVA, in a deal involving an investment of € 222 MM. In this way, the Company has a 17% direct stake in Gamesa, reinforcing its presence in one of the world's largest manufacturers of wind turbines.

7. REGULATION

National Allocation Plan

IBERDROLA considers as positive the draft of the 2008-2012 National Allocation Plan (NAP) for Emissions Rights, since it was able to combine the goals of protecting the industry and encouraging the renovation of the Spanish generation park. The NAP, presented by Environment Minister Cristina Narbona, leaves to the electricity sector a very significant part of the effort to reduce emissions, with a view to encouraging a renovation of the electricity generation park and the gradual replacement of

the most polluting and obsolete plants, as well as reducing greenhouse gas emissions in order to fulfil the Kyoto Protocol.

In this regard, the Spanish NAP is based on the idea that "Spain's future energy balance will be based on a greater contribution of clean and renewable energies, with growing participation by end customers in the context of a liberalized market, to ensure the rational and efficient use of energy and the large-scale introduction of technology, which will enable a significant increase in energy efficiency".

Thus, the document states that "in the supply structure, significant changes were noted with respect to the current situation, by significantly increasing the weight of natural gas and renewable energy." Specifically, the document accentuates the trend already noted in the first NAP, when it points out that production using coal will drop from 65,845 gigawatt hours (GWh) in 2007 to 47,778 GWh in 2011, while combined-cycle production will increase from 57,761 GWh to 74,701 GWh during the same period.

For IBERDROLA, the NAP proposed by the Government is in line with the signals for new investments - which can become the growth engine for the economy -, making it easier to achieve emissions reductions in Spain in areas where it is more possible, allowing the adaptation of other sectors with less capacity for reducing greenhouse gases, and guaranteeing the supply of electricity.

Summary table of emissions allocation (Millions of Tonnes):

	Allocation		Actual Emissions		Allocation 2006-2012	
	2005-2007	1990	2005	A. Average	o/1990%	o/05-07
Electricity Sector	85,400	61,610	101,240	54,694	-11.2%	-36.0%
Other	96,775	70,050	88,615	97,965	39.9%	1.2%
TOTAL	182,175	131,660	189,855	152,659	15.9%	-16.2%

Royal Decree 809/2006 of 30 June, increasing the tariff as of 1 July 2006 by 1.38%

Pursuant to Royal Decree 1556/2005 of 23 December setting the 2006 electricity tariff, the Government has made a review of the tariff as of 1 July 2006, including a recovery of the tariff insufficiency for fiscal year 2005, as well as its possible assignment to third parties.

This Royal Decree sets the average increase in the average or reference tariff at 1.38 percent, leaving it at 77.664 euros/MWh.

The breakdown of this increase is as follows:

- Residential: 0.8%
- Industrial: 6.0%

The Government regulates the purchase of energy by Distribution companies in the Iberian forward market.

In the second half of 2006, energy distributors must acquire 5% of energy sold to customers at the regulated tariff on the forward market managed by OMIP, pursuant to the Ministerial Order that, in fact, assumes the start-up of operations from 1 July of the Iberian Electricity Market [Mercado Ibérico de Electricidad, or Mibel].

The requirement to purchase energy on the forward market is set through the establishment of a specific number of futures contracts with physical delivery to be assumed by each distributor in the monthly auctions to be held the first and third Wednesdays of each month and in the quarterly auctions held on the third Wednesdays of each month.

Through this energy acquired on the forward market, distributors will be recognized with the realized cost resulting from applying to this energy the price of each auction corresponding to the negotiation session, in which it is required to participate; therefore, the electricity matched in this market will not be subject to the fixed price of 42.35 euros for contracts on the Spanish wholesale market.

Approval of Urgent Measures in the Energy Sector

Last 23 June the Council of Ministers approved a Royal Decree-Law of Urgent Measures in the Energy Sector, the provisions of which may be summarized as follows:

Electricity Sector

- Elimination of Costs of Transition to Competition (CTCs), because they are considered inefficient and unnecessary. They are considered inefficient because they distort prices, and unnecessary because of their high amortization level, as recently confirmed by the National Energy Commission.
- Incentives for the consumption of indigenous coal: For security of supply reasons, the Government is authorized to approve a system of premiums of up to a maximum of ten euros per MWh produced.
- Cogeneration: The need for electricity self-consumption in plants that use cogeneration has been eliminated, granting premiums not only for electricity surpluses, but also all for all cogenerated electricity. Furthermore, it allows all plants to receive a premium above the market price, while currently only plants of less than 10 MW receive a premium. Finally, it eliminates the remuneration range for these facilities, of between 80 and 90 percent of the reference tariff.
- Elimination of the limits imposed on the tariff methodology for reviewing the average or reference tariff (currently stipulated at +2 percent) and changes in supply and access tariffs (+0.6 percent of the average tariff). This ensures that revisions of average or reference tariffs can cover all costs, and, as with the 2006 tariff, it avoids having to elaborate them with an estimated deficit because of a methodology developed when oil had a stable price of 25 dollars per barrel, while it currently exceeds 70 dollars per barrel.
- Special Regime: With the aim of bringing remuneration for Special Regime generation facilities more closely into line with the actual evolution in the costs of such technologies, the new standard specifies that changes in

premiums and tariffs for Special Regime facilities will not be limited by the revision of the average tariff.

- Virtual capacity auctions: In order to have a mechanism enabling the possibility of bilateral contracts for specific groups of consumers, the contracting period resulting from virtual auctions, currently capped at 12 months, is being extended to cover medium and long term periods.

Gas sector

- Gas storage: the general chronological criterion is being replaced by a allocation system based on objective and transparent criteria, and specially in the percentage of sales from the previous year.

Royal Decree-Law 3/2006 modifying the regimen for matching energy on the wholesale market and reconsidering the value of emission rights

The Council of Ministers, in its meeting this past 24 February, approved a Royal Decree-Law modifying the regime for matching energy on the wholesale market and reconsidering the value of emission rights. The following are extracts of the main lines from the press release issued by the Ministry of Industry, Tourism, and Trade:

- "Its main provision is to require generation and distribution companies that belong to the same business group to make bilateral

contracts among each other for the acquisition of energy produced by facilities under the ordinary regime."

- "Although the purchases and sales among these companies are made at a free price, during this year, and in a **provisional manner**, the National Energy Commission will only consider - for the purposes of settlement for such contracts - the average cost provided for in the 2006 price schedule for the energy generated under the ordinary regimen for the territory of mainland Spain, corresponding to 42.35 €/MWh."

- "That rule also includes that the emission rights granted free of charge to companies by means of the National Emissions Allocation Plan will be taken into account."

- "The Government envisions that, with the rules approved, there will be a substantial decrease in the prices on the wholesale electricity market. In concrete terms, the estimates done by the Ministry of Industry, Tourism, and Commerce forecast that the measure of making it mandatory to make bilateral contracts among generation and distribution companies of the same business group will enable a reduction in the volume of transactions on the daily market ... which, without doubt, will have a direct effect on reducing the deficit."

- "With respect to discounting the value of the emission rights granted free of charge to the electricity generating companies by means of

the National Emissions Allocation Plan, forecasts indicate that, by virtue of an average price estimated at the end of 2005 to be 18 euros per ton, and given the fact that 78 million tons have been allocated free of charge, the value of these rights would be about 1,400 M€, which amount could be applied to reducing the tariff deficit, if there is one."

In addition, and as a result of the effects of the abovementioned Royal Decree-Law, IBERDROLA Distribución Eléctrica, S.A.U. modified its purchasing strategy in the pool on June 9 in order to preserve the integrity of the Company's assets (and its value for the shareholders), such that, from this day onwards, it is no longer submitting bids to buy energy at a price that, under the regulations in force, might result in an energy acquisition cost for the Company that will not be acknowledged by the National Energy Commission later on. The System Operator (REE) and the Market Operator (OMEL) were informed of this decision in order to ensure that, in the exercise of their duties and in line with the corresponding operating procedures, they would be able to adopt suitable measures to keep the electricity system and its various markets running smoothly at all times.

8. TARIFF INSUFFICIENCY

The Company has not recorded any tariff insufficiency for 2006, assuming that the applicable regulation provides for the mechanisms required to guarantee that such insufficiency would be recovered. The effect before taxes in the Income Statement of the Group is expected to come out at -353.2 million euros (35.01% of the insufficiency attributable

to IBERDROLA) once deducted the amount of CO₂ allowances allocated according with the interpretation done of RD 3/2006 regarding this matter. In accounting terms, this has been recorded as an Account Receivable in the Balance Sheet.

Initial sector's tariff insufficiency (e)	1,993.9
Deduction CO ₂ allowances Jan + Feb	-331.8
Deduction CO ₂ allowances from March & onwards	-653.2
Final sector's tariff insufficiency (e)	1,008.9
IBERDROLA's share of tariff insufficiency -35,01% (e)	353.2

9. SHAREHOLDER COMPENSATION

IBERDROLA offers its shareholders the possibility to reinvest their dividend in shares

At the same time of the payment of the supplementary dividend corresponding to 2005, done past 3 July, IBERDROLA launched the Dividends Reinvestment Plan (DRP), which offers the opportunity to all of its shareholders to reinvest such dividend in shares of the Company.

Thus, IBERDROLA has become the first non-financial company in the IBEX-35 index in offering this investment possibility to its shareholders.

The success of the plan is shown in the numbers obtained when launched: It has been joined by more than 22,000 shareholders, of which 97% are physical persons, representing 7% of Total Share Capital.

Analysis of H1 2006

Energy Production

	GWh	vs. H1 2005	% Weight
Gas combined cycle	17,645	2,882	19.5%
Wind energy and mini-hydroelectric	3,988	518	14.9%
Wind farms	3,663	511	16.2%
Hydroelectric	5,274	330	6.7%
Nuclear	12,427	1,640	15.2%
Fuel-oil	787	-1,086	-58.0%
Coal	2,629	-617	-19.0%
Cogeneration	951	12	1.3%
TOTAL NET PRODUCTION	43,701	3,679	9.2%
ENERGY DISTRIBUTED	63,396	3.0%	

Energy Production in Spain

	GWh	vs. H1 05	% Weight
Gas combined cycle	7,379	18.1%	22.6%
Wind energy and mini-hydroelectric ⁽¹⁾	3,988	14.9%	12.2%
Wind farms	3,663	16.2%	-
Hydroelectric	4,756	6.4%	14.6%
Nuclear	12,427	15.2%	38.0%
Fuel-oil	787	-58.0%	2.4%
Coal	2,629	-19.0%	8.0%
Cogeneration	715	-0.6%	2.2%
TOTAL NET PRODUCTION	32,681	6.1%	100.0%
ENERGY DISTRIBUTED	49,581	2.5%	
HYDRO ELECTRIC RESERVE LEVELS AT 30/06/06		51.3% (5,788 GWh)	

Energy Production in Latin America

	GWh	vs. H1 2005	% Weight
Gas combined cycle	10,266	20.6%	93.2%
Hydroelectric	518	9.3%	4.7%
Cogeneration	236	7.3%	2.1%
TOTAL NET PRODUCTION	11,020	19.7%	100.0%
ENERGY DISTRIBUTED (managed)	13,815	4.8%	

(1) Includes 308 MW of international capacity with an output of 281 GWh.

1. PRODUCTION: SPAIN

Net Production of the Group in Spain rose 6.1% in the first half of 2006, reaching 32,681 GWh. It is worth mentioning the evolution of the Special Regime, which now accounts for 14.4% of total generation in Spain, close to the level for hydroelectric generation, thanks primarily to the 16.2% increase seen in wind generation. Combined cycle production is up 18.1%, representing 22.6% of the total output.

IBERDROLA has consolidated the position of its generation mix in Spain as the least polluting in the sector, after reducing emissions by 18.4%. The highlights of this period were as follows:

- The good availability of nuclear plants, up 15.2%, combined with an increase in hydroelectric production (+6.4%), despite the adverse operating conditions.
- Wind production is up 16.2%, and total renewable energies production increases by 14.9%. Special Regime, including cogeneration, now accounts for 14.4% of the generation mix, the same level as hydroelectric. In addition, international wind production rose to 281 GWh over the quarter.
- Combined cycle production is up 18.1% to 7,379 GWh, representing 22.6% of the company's generation mix in Spain and the technology making the second biggest contribution to the total mix after nuclear, which accounts for 38.0%.
- The significant reduction in production based on the most polluting energy sources, further to efforts launched over the first quarter of

the year, has been consolidated, with coal production down -19% and fuel-oil down -58%.

Emissions were reduced by 18.4% over the first half of 2006 to 189 gr/KWh, a very significant figure given the low level of hydroelectric production. The percentage of emission-free production rose to 64.8%, up from 60.8% over the first half of 2005.

IBERDROLA obtained a market share in the wholesale market of 25.5% in the first half of 2006.

Comparatively speaking, energy production can be broken down as follows:

	H1 2006	H1 2005
Gas combined cycle	22.6%	20.3%
Renewable energy	12.2%	11.3%
Hydroelectric	14.6%	14.5%
Nuclear	38.0%	35.0%
Fuel-oil	2.4%	6.1%
Coal	8.0%	10.5%
Cogeneration	2.2%	2.3%
Total	100%	100%

The changes recorded in CO₂ emissions were as follows.

	Million tons	Average price
Rights allocated	6.3 (*)	22.35
Rights consumed	6.5	23.32

(*) Approximate figure for comparison purposes, as allocation of allowances are made on a yearly basis and are managed over a three year period.

2. PRODUCTION: LATIN AMERICA

In Latin America, total production is up 19.7% to 11,020 GWh, with this strong growth driven by the new investments made in combined cycle plants, representing 93% of the total.

	Production	Change
Mexico (combined cycles)	9,495	22.6%
South America	1,525	4.1%
Combined cycles	771	0.0%
Hydroelectric	518	9.3%
Cogeneration	236	7.3%
Total	11,020	19.7%

The growth recorded in this region reflects firstly the greater availability of the Mexican plants in Monterrey (1,040 MW), Altamira (1,036 MW), Enertek (120 MW), and La Laguna (500 MW), running at full capacity, with production up 22.6%, and, secondly, the Termopernambuco plant in Brazil, where production has remained stable. Hydroelectric energy is up 9.3%.

3. MARKET: SPAIN

In the domestic market IBERDROLA's total demand measured on the grid rose 2.5% to 49,581 GWh, while the number of customers is up to 9.75 million.

4. MARKET: LATIN AMERICA

Changes in demand for IBERDROLA's three distribution companies in Brazil are presented in the following table:

Energy distributed (GWh) (under management)	H12006	vs. 2005
Coelba	5,981	5.8%
Cosern	1,792	5.0%
Celpe	4,290	2.8%
Total	12,063	4.6%

Analysis of results for the period (Unaudited)

The most notable aspects of the results for H1 2006 are as follows:

Million euros	Jan-Jun 2006	vs. 2005
NET SALES	5,496.6	+0.7%
GROSS MARGIN	2,845.8	+21.9%
EBITDA	1,916.4	+20.0%
EBIT	1,388.5	+24.9%
NET PROFIT	817.7	+25.2%

1. NET SALES

The Group's Net Sales came to 5,496.6 million euros over the first half of 2006, up 0.7% on the same period in 2005.

The domestic energy business saw its Net Sales fall -11.1%, primarily due to the low level of sales in the Supply business, the eliminations in consolidation figures due to the existence of a bilateral agreement between Generation and

Supply (-268.6 million euros) and the impacts of Royal Decree-Law 3/2006.

However, in the renewable energy business, Net Sales is up 57.1% and International business is up 36.7%. In relation to Non-energy business, its Net Sales has seen an increase of 32.3%, with strong growth in the Engineering business.

Domestic Energy	3,610.9	-11.1%
International	1,134.6	+36.7%
Non-energy	751.0	+32.3%

With regard to the estimated tariff insufficiency for the first six months of 2006 at sector level, and after discounting the value of emission allowances consumed, the estimated insufficiency for H1 2006 could reach a figure close to 1,009 million euros.

In accordance with Royal Decree-Law 5/2005 of 11 March, the provisional percentage of financing for the tariff insufficiency corresponding to IBERDROLA is 35.01%, representing a deviation of 353 million euros.

According to the interpretation of Royal Decree-Law 3/2006, the figure given above for the sector's tariff insufficiency includes 985 million euros corresponding to the value of the emission rights allocated under the National Allocation Plan and consumed over the period, based on the following criteria:

- For January and February "any eventual negative balances in the settlement of the 2006 tariff will be deducted."

- For subsequent months, "remuneration for the electrical energy production business ... will be reduced by an amount equivalent to the value of the greenhouse effect emission rights allocated ..."

On the other hand, the application of Royal Decree 3/2006 reduced revenues from the activity by -163.8 million euros accounted in the Distribution business. Its definitive impact will depend on the price ultimately recognized, given that Royal Decree 3/2006 sets as "provisional" the price of 42.35 euros/MWh, which has been applied as of 3 March: "with respect to payment for activities regulated by the National Energy Commission, during 2006 the provisional price to be considered for distributors for energy acquired through the assimilation mechanism described in Section 1 will be the average cost provided for in the 2006 tariff for energy generated under the ordinary regime for mainland Spain, including the costs of ancillary services and the capacity payment, representing 42.35 euros/MWh." Furthermore, another negative impact has been recorded for 43 million euros, based on differences between the actual cost and the standard cost in the Distribution business as a result of the bidding policy followed in the wholesale market since June 9th.

2. GROSS MARGIN

The consolidated gross margin came out at 2,845.8 million euros, up 21.9% on the same period in 2005. The 0.7% increase in Net Sales up to 5,496.6 million euros, already explained, is compensated by the 18% reduction in

procurement costs, down to 2,496.5 million euros, which includes a negative impact of -154.3 million euros for the consumption of emission allowances.

The Renewable and International business lines account for 52% of the total 21.9% increase in the gross margin. In local currencies, this growth comes out at 19.1%.

The following contrasting aspects can be highlighted regarding this change in the Gross Margin:

2.1 Domestic Energy Business

The Gross Margin rose to 2,069.4 million euros, up 15.2% on the same period in 2005.

The Domestic Energy business (excluding Renewables) is up 8.9%, while Renewables grew more than 57%.

Net Sales and Procurements changes have been influenced by various factors, highlighting:

- The application of Royal Decree 3/2006, with a negative impact due to the asimilation to bilateral agreements for -163.8 million euros, booked under the Distribution business.
- In addition, an impact from deviations of -43 million euros recorded on the Distribution business, reflecting differences between actual and standard costs.
- The negative impact for the cost of emission allowances consumed over the period, for -154.3 million euros recorded in Generation.

A flexible management approach has made it possible to compensate for the above mentioned impacts on the Distribution business, with its gross margin like-for-like down -207 million euros (directly linked to Royal Decree-Law 3/2006), with significant improvements in the Supply and Gas business (including IFC), up +192 million euros at the gross margin level. The positive trend registred in the Supply and Gas business has been achieved after reducing exposure to the Supply business and implementing a range of management efficiency improvements, while also reflecting a positive contribution by Gas Trading. These management improvements combined with the contribution by the Renewables business, accounting for 372.3 million euros of the gross margin, have paved the way for a 15.2% increase in the Domestic Energy business.

It is important to note that Generation currently sells energy directly to Supply under a bilateral contract, which constitutes an inter-company transaction. As such, in the Group-level accounts, the impact of purchases and sales under these contracts is eliminated, with the final impact on the Gross Margin coming out at zero, although they do have a significant effect at individual level for the various items.

2.2 International Business

The Gross Margin reached 446.3 million euros, up 40.2%, reflecting the good performance seen on the Group's businesses in the region, with a 19.7% increase in energy generated, showing a higher level of availability, and a 4.8% increase in energy distributed; as well as the positive evolution in the exchange rate for the region's reference currencies, namely the real in Brazil (+20.2%) and the US dollar, which affects Mexico (+5.1%).

2.3 Other Businesses

These businesses contributed 330.1 million euros to the total Gross Margin, representing an increase of 49.6%, driven primarily by **Engineering and Services**, with Corporación IBV, Other Services and Iberdrola Inmobiliaria making key contributions.

3. BASIC MARGIN

The Basic Margin over the period rose 19.2% to 2,859.0 million euros, as can be seen in the following table:

	H1 2006	H1 2005	Change %
GROSS MARGIN	2,845.8	2,334.7	21.9%
EMISSION			
ALLOWANCES	13.2	64.2	-79.4%
BASIC MARGIN	2,859.0	2,398.9	19.2%

The Basic Margin reflects 13.2 million euros in income for emission allowances granted to cogenerators. Further to Royal Decree-Law 3/2006 of 24 February, income from emission allowances granted has not been taken into consideration, with the exception of those received from this technology. The negative impact at March 2006 resulting from not factoring in income from emission rights allocated to the rest of generation comes out at -141.1 million euros, with this impact reflected in the Generation business. In 2005, prior to the application of this Royal Decree-Law, the total amount of any subsidies for emission allowances was considered to represent revenues.

Without the impact resulting from the application of Royal Decree-Law 3/2006 relative to emission allowances, the Basic Margin would have come out at 3,000.1 million euros (+25.1%)

4. EBITDA

Consolidated EBITDA is up 20.0% to 1,916.4 million euros. In addition to the Gross Margin evolution, already explained, it is important to analyze the evolution of the Net Operating Expense:

- 8.4% increase in Personnel Expenses, basically linked to the increase in personnel costs in growing businesses such as Renewables, combined cycles, and Mexico. The traditional electricity business has seen a slight increase, rising 2.8%.
- 25.7% increase in External Services due to the higher level of activity in connection with the new combined cycle and renewable facilities, Latin America as well as Supply expenses. This also includes 29 million euros in costs for the second nuclear fuel cycle (Enresa), which had no equivalent in 2005.

In addition, there is a positive impact resulting from exchange rate differences (17 million euros) due to changes in currencies for the Latin American businesses. Like-for-like, Net Operating Expenses are up 13.1% (compared with the 18.3% reported), after deducting the impact of exchange rates and expenses for the second nuclear fuel cycle (Enresa).

Net operating expenses can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	431.1	9.8%
Personnel	515.1	8.4%
In-house work on fixed assets	-84	1.7%
Net External Services	406.1	28.9%
External Services	498.5	25.7%
Other operating revenues	-92.4	13.1%
TOTAL	837.2	18.3%

In addition, taxes are up 11.1% to 105.4 million euros, primarily factoring in taxes paid on the new facilities brought into service and the higher payments stemming from the increase in energy billed under tariff.

5. EBIT

EBIT rose to **1,388.5 million euros**, up **24.9%** compared to the first half of 2005. Amortisation and Provisions are up **8.8%** (42.9 million euros), way below the **20.0%** growth achieved in EBITDA, offsetting the increase generated by the business operative as already outlined above, paving the way for an increase in EBIT almost five percentage points higher than the level recorded for EBITDA. This increase in Amortisation and Provisions is mainly due to:

- The 7.3% increase in Amortisation, up to 503.7 million euros. This increase is due to the new facilities brought into service since the end of the first half of 2005.
- Provisions are up 57.7% to 24,2 million euros, with 90% relating to activities in Spain and the remaining 10% to Latin America.

Million euros	H1 2006	H1 2005	Change%
Amortisation	503.7	470	+7.3%
Provisions	24.2	15	+57.7%
TOTAL	527.9	485	+8.8%

6. FINANCIAL RESULT

The **Financial Result** came to **-273.5 million euros**, **39.5% higher** than in first half of 2005. This increase basically reflects the **26.1%** increase in financial expenses, due to the impact of the tariff insufficiency over the period, causing a higher average balance of debt in relation to the first half 2005 of 1,978 million euros, as well as to the inclusion of a provision for the discount of the amount over the nominal value of potential debt to be securitised and the effect of the evolution of the exchange rates in the currencies from Latin America businesses.

Furthermore, financial revenues are up 9.3% to 170.3 million euros.

Million euros	H1 2006	H1 2005	Change %
Financial revenues	170.2	155.8	9.3
Financial expenses	(443.8)	(351.9)	26.1
TOTAL	(273.5)	(196.1)	39.5

The average financial cost of debt came out at 4.43% over the first half of 2006, compare to the 4.57% for the same period of 2005.

7. RESULTS OF COMPANIES CONSOLIDATED BY EQUITY METHOD

Results of companies consolidated using the equity method registered a reduction of 12.7 million euros to 12.5 million euros, with most of the result contributed by Other Businesses.

It can be broken down as follows:

Million euros	H1 2006	H1 2005	Change Mil. euros
Other Businesses	10.6	19.6	-9.1
Rest	1.9	5.6	-3.6
TOTAL	12.5	25.2	-12.7

The reduction in Other Businesses was due to companies withdrawn from the perimeter of consolidation, such as Cementos Portland, as well as the lower contribution made by Non-energy businesses.

8. NON-CURRENT ASSETS RESULTS

Recurrent income from Non-current Assets amounted 152.6 million euros, as a

consequence of the sale of real estate assets, and included under recurrent business. IBERDROLA (through the holding company and its subsidiary Iberdrola Inmobiliaria) now controls more than 3,800 buildable square meters. In this way, of the capital gains in the semester for the sales done, 53 million euros came from Iberdrola Inmobiliaria assets and 100 million euros came from the holding company.

9. NET PROFIT

Pre-tax Earnings grew +32.5% to 1,280 million euros. The effective tax rate for the first half of 2006 came out at 35%, higher than the 31.7% recorded for the first six months of 2005.

Lastly, **Net Profit** rose to **817.7 million euros**, up 25.2% compared to the same period of 2005, in line with the 24.9% increase recorded in EBIT.

Results by business

1. DOMESTIC BUSINESS

1.1 Generation

a) Gross margin

The change in the Gross Margin over the first half of 2006 primarily reflects the 5.1% increase in production under the Ordinary Regime. Combined cycles production is up 18.1% and the most polluting technologies – fuel oil (-58%) and coal (-19%) – have strongly reduced their production levels, while both nuclear and hydroelectric production levels are up, rising +15.2% and +6.4% respectively.

Prior to analysing these results, it is important to note that the figures for the Generation business are influenced by the change followed in the internal financing contract (IFC) between this business and Supply. The results can be broken down as follows:

GENERA	H1 2006	vs.	H1 2006	vs.
Mill.eur.	(ex-IFC)	2005	CFI (report.)	2005
Gross Margin	1,353.5	+18.7%	-119	1,234.5 +44.5%
Net Oper.exp.	238.8	+20.5%		238.8 +20.5%
EBITDA	1,091.9	+12.0%		972.9 +41.3%

In terms of reported accounts (without compensating the mentioned IFC), the Gross Margin for the Generation business is up 44.5%. Highlights:

- Net Sales on the **Generation** business up 47.0%, reflecting the abovementioned

increase in production, in an environment of higher prices (16.2%). In addition, it is important to note that Generation currently sells energy to Supply on a direct basis, by using a bilateral contract.

Fuel Cost & CO₂

Eur/MWh	2006	2005	%
Avg. Fuel Cost*	40.7	28.3	+44.2%
CO ₂ Cost (Eur/ton)	23.3	10.4	+124.0%

* Includes C. Cycles, Coal & Oil

- The average cost of fuel (without including nuclear) stands at 40.7 euros/MWh, close to the cap set under Royal Decree 3/2006. In this way, procurements are up 44.2%, almost 3 percentage points lower than the increase recorded in Net Sales, and well below their 79.5% increase at the end of March, with a mix focused on the least polluting technologies and a significant reduction in conventional thermal generation in a situation of high prices for oil-based products on the international markets. Keeping Procurements under control in this way has enabled the company to achieve an increase in its Gross Margin higher than that seen in Net Sales.

In addition to the cost of Procurements, a negative impact of 154.3 million euros has been recorded relative to the cost of emission allowances consumed. Factoring in revenues

for allowances granted to cogeneration plants, the net impact amounts 141.1 million euros.

	Mil. Tn	Average Price	Million euros
Rights allocated	6.3 ⁽¹⁾	22.35	141.1
Rights consumed	6.5	23.32	154.3 ⁽²⁾

(1) Approximative calculation of the comparative effects, given that the allowances allocation are done on an annual basis, managed over a three year period.

(2) Including cost of reduction in consumption.

b) Operating Profit / EBIT

EBIT is up 55.4% compared to the previous year, reaching 777.6 million euros. At the EBITDA level (972.9 million euros) there is an increase of 41.3%. In addition to what has been said at Gross Margin, Net Operating Expenses rose 20.5% to 40.6 million euros as a result of various factors:

- External Services are up 21.3%, due to the combined cycle plants brought into service, with the capacity in operation up 42.9%. This item also includes 29 million euros in expenses for the second part of the nuclear fuel cycle (ENRESA), a situation without any equivalent over the first half of 2005.
- Personnel expenses showed a slight increase, rising 5.3%.

Net Operating Expenses can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	106.8	8.0%
Personnel	116.3	5.3%
In-house work on fixed assets	(9.5)	-17.4%
Net External Services	132.0	32.9%
External Services	162.6	21.3%
Other operating revenues	(30.6)	-11.8%
TOTAL	238.8	20.5%

Taxes are up 13.6% as a result of the new facilities brought into service.

1.2 Supply and Gas

a) Gross Margin

The first half of 2006 saw a significant reduction in the volumes of electricity sold, in line with the strategy of lower business exposure, dropping 69.5%. This reduction is reflected both in Net Sales, down -20.3%, and in Procurements, dropping -22.0%.

In this way, it has been achieved a significant improvement in the Gross Margin, with a positive contribution up to 43 million euros, compared with 17.9 million euros in the same period the previous year.

In the breakdown by business, it is important to highlight:

- Electricity: as mentioned in the section on Generation, the internal financing contract (IFC) has an impact on the results presented for the business. In this way, the Gross Margin for the business, factoring in the

impact of the internal financing contract, is up 126 million euros, thanks to the policy to scale down this activity over the last few months.

- Gas: optimization of the gas strategy have been completed in line with the flexibility of the contracts signed, increasing this business' contribution to the gross margin by 66.1 million euros, coming in at 53.2 million euros over the first half of 2006. Gas trading has also seen its contribution rise 40.6 million euros, with gas Supply up 25.5 million euros.

b) Operating Profit/EBIT

The policy to reduce exposure to the electricity business and the contribution of the gas business have paved the way for a positive contribution to EBITDA of 6.8 million euros, compared with the -51.7 million euros losses seen over the same period in the previous year.

In addition to the elements already presented in relation to the Gross Margin, the business significantly improved its efficiency following the restructuring carried out, reflected in a significant reduction in Operating Expenses, down 87.9 million euros (-47.4%), with Personnel Expenses down -42.1% and External Services down -54.9%, linked to the lower level of activity within the framework of a new more effective organization.

Net Operating Expenses can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	17.3	-45.3%
Personnel	18.3	-42.1%
In-house work on fixed assets	(1.0)	
Net External Services	13.0	-50.0%
External Services	20.4	-54.9%
Other operating revenues	(7.4)	-61.5%
TOTAL	30.3	-47.4%

In this way, the trend for negative contributions to EBIT on the Supply business has basically ended (-0.6 million euros), thanks also to the further reductions seen on Amortisation and Provisions as well as on Taxes:

- -76.5% reduction in Amortisation and Provisions
- -50.8% reduction in Taxes
- The key figures for this business are as follows:

SUPPLY (million euros)	H1 2006	vs. 2005
Net Sales	1,345.4	(20.3)
Gross Margin	43.0	140.2
EBITDA	6.8	N/A
EBIT	(0.6)	N/A

1.3 Renewables

a) Gross Margin

Over the first half of 2006, the Renewables business was affected by the following factors:

- Total installed capacity rose 22.1% (+724 MW), reflected in a significant increase in national and international wind production, up 16.2% to 3,663 GWh, with this growth achieved despite the low wind energy index seen over a few months of the first half. Total output using renewable energies (wind and mini-hydroelectric) is up 14.9%.
- In June 2006, 98% of the facilities were running under the market participation system. In the first half of 2005, a majority of the plants were still operating under the fixed remuneration system. In this way, prices are up 37%.
- Various changes have also been seen in the perimeter of consolidation, with the most significant including the full consolidation of Rokas, after IBERDROLA increased its stake in this company to 49.9%, and the inclusion of the Catefica wind farm in Portugal in the perimeter of consolidation.
- As such, the abovementioned increase in production, combined with the acceleration in growth achieved by transferring most of the facilities over to the market participation system, has enabled the company to increase its Gross Margin for this business by 57.1%, up to 372.3 million euros. International Renewables account for 5.5% of the total. The Gross Margin on Renewables now represents 23.2% of IBERDROLA's total generation activities in Spain.

b) Operating Profit/EBIT:

EBIT increased by 91.2 million euros (+74.2%) due to the following factors:

- EBITDA up 60.0%, in line with the increase in the Gross Margin and despite the +46.6% rise in Net Operating Expenses as a result of the new capacity brought on line. The EBITDA margin rose to 81.5%, compared with 80% over previous periods. In addition, the contribution of Renewables to total EBITDA has continued to trend up, rising to 15.8%.

- EBIT is up 74.2% to 214.1 million euros, reflecting a 33.8% increase in Amortisation and Provisions, with 22.1% additional installed capacity brought online over the period.
- Net Operating Expenses can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	12.6	90.9%
Personnel	14.9	63.7%
In-house work on fixed assets	(2.3)	-8.0%
Net External Services	52.8	38.9%
External Services	57.7	45.3%
Other operating revenues	(4.9)	188.2%
TOTAL	65.4	46.6%

- The key operating figures for this business are as follows:

RENEWABLES (mil. euros)	H1 2006	vs. 2005
Net Sales	372.3	57.1
Gross Margin	372.3	57.1
EBITDA	303.5	60.0
EBIT	214.1	74.2

1.4 Distribution
a) Gross Margin

The Gross Margin on the Distribution business is down -39.3% as a result of the following factors:

- 163.8 million euros for the provisional negative impact resulting from the application of Royal Decree 3/2006 of February 24.
- Negative impact from deviations of -43 million euros resulting from differences between real and standard costs.
- Positive impact of 15 million euros reflecting the increase in retribution for regulated

activities in line with the tariffs plan (Royal Decree 1556/2005).

The recurrent Gross Margin, i.e. not factoring in the impact of Royal Decree-Law 3/2006 and excluding the effects of non-regulated activities over the first half of 2006, comes out at 627.9 million euros, up 0.4% compared with 2005, and in line with the increase in the retribution of the regulated business. Breakdown of the various effects is as follows:

MM€	H1 2006	%
Recurrent Gross Margin*	627.9	+3.1%
RDL 3/2006 impact	-163.8	n/a
Impact from deviations	-43.0	n/a
Reported Gross Margin	421.1	-30.9
Net Operating Expenses	-248.1	+1.7%
Recurrent EBITDA*	329.4	+1.9%
Reported EBITDA	122.6	-62.1%

(* Excluding for 2005 non regulated business)

b) Operating Profit/EBIT

EBITDA on Distribution is down -69.4%, reflecting the downturn on the Gross Margin combined with an 18.3% increase in Taxes, not offset by the efficiency improvements achieved on Net Operating Expenses, which are down 1.3%.

Nevertheless, recurring EBITDA, i.e. without factoring in the impact of Royal Decree-Law 3/2006, totalled 329.4 million euros, 1.9% lower than for the same period in 2005.

Net Operating Expenses can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	106.2	12.4%
Personnel	142.0	4.1%
In-house work on fixed assets	(35.8)	-14.6%
Net External Services	141.9	-9.6%
External Services	175.2	-10.9%
Other operating revenues	(33.3)	-16.3%
TOTAL	248.1	-1.3%

The improvement in efficiency achieved, reducing Net Operating Expenses by 1.3%, is primarily due to efforts to keep External Services under control, with these costs down 10.9%. Personnel costs were also kept under control, rising by only 4.1%, factoring in the costs resulting from the reduction in energy used and the additional cost for transferring part of the workforce from the Supply business.

Amortisation and Provisions are down 4.7% to 112.5 million euros, with the reduction in EBITDA some 27 percentage points lower than the level seen for EBIT, coming in at -96.4%.

- The key operating figures for this business are as follows:

DISTRIBUTION (mil. euros)	H1 2006	vs. 2005
Net Sales	421.1	-39.6
Gross Margin	421.1	-39.3
EBITDA	122.6	-69.4
EBIT	10.1	-96.4

1.5 Corporation

This basically includes eliminations of inter-group expenses between the corporation and the different businesses

2. INTERNATIONAL BUSINESS

a) Gross Margin

Net Sales from **International** have increased 36.7% to reach 1,134.6 million euros. Mexico, with a 58.4% contribution, is the area that makes the greatest relative contribution, also displaying growth of 31.2% thanks to increases in production and plant availability. It is also notable that there has been an increase in Net Sales in Brazil by 45.2%, essentially resulting from an increase in demand and price adjustments, as well as a favourable change in the currency exchange rate with the Brazilian real in this period.

In **International Business**, the **Gross Margin** is up 40.2% (+128 million euros) to 446.3 million euros. The change in the overall **Gross Margin** for the Latin America region can be broken down as follows:

- Increase in the **Gross Margin** (functional currency): 62.7 million euros.
- Exchange rate effect: 65.3 million euros in total, mainly from the increase in value of the Brazilian currency in relation to the euro (+20.2%).

In **Mexico/Guatemala**, the **Gross Margin** amounted to 158.2 million euros (+29.8%). This increase is basically due to the full contribution

to the results of the combined cycle of La Laguna (500 MW), as a result of its entry into operation at the end of the first quarter of the past fiscal year, and, secondly, the significant improvements in efficiency and availability of the combined cycle plants, totalling a 22.6% output increase in the area. In addition the dollar appreciated by 5.1%, which created an effect equivalent to 8.4 million euros.

In **Brazil**, the **Gross Margin** showed an improvement of 46.7% (reaching 288.1 million euros), thanks to: a greater contribution from distribution businesses arising from growth in demand (+4.6%) and tariff revisions and adjustments taking place in April each year and positively affecting the results of the first half of 2006 in relation to that of the past fiscal year. It is also noteworthy the revaluation of the real in relation to the euro (20.2%), with a positive effect of 57 million euros.

b) Operating Profit/EBIT

In **International Business**, **EBIT** increased 60.6% to 258.2 million euros, reflecting the increase in **EBITDA** (44.1%) and the smaller increase of amortisation recorded (+6.1%), which, although they rose, grew at a lower rate than the **EBITDA** mentioned.

With respect to the **EBITDA**, it registers growth of +34.9% in Mexico, mainly as the result of greater activity in Generation because of the increasing contribution from the La Laguna combined cycle, in operation since the end of the first quarter of 2005, and the improvement in efficiency and availability of the region's combined cycles. In South America there was a rise of +50.2% due to the change

already described in Gross Margin. Thus, total EBITDA growth in International Business comes out at 44.1%.

The EBITDA per region and business is broken down as follows:

• *Mexico-Guatemala*

Million euros	H1 2006	vs. 2005
Generation	93.7	46.9%
Distribution	30.3	7.8%
TOTAL	124.0	+34.9%

• *South America*

Million euros	H1 2006	vs. 2005
Generation	47.7	103.0%
Distribution	160.8	39.5%
TOTAL	208.5	+50.2%

- The change in Net Operating Expenses for the entire Latin America region can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	41.4	28.6%
Personnel	49.1	30.2%
In-house work on fixed assets	(7.7)	40.0%
Net External Services	68.5	30.2%
External Services	88.6	42.9%
Other operating income	(20.1)	113.8%
TOTAL	109.9	29.6%

The 29.6% increase in Net Operating Expenses was affected by the impact of the evolution in the exchange rate. Once this effect is deducted, this item grows by only 9.6%.

This can be broken down by region as follows:

Million euros	H1 2006	vs. 2005
Mexico/Guatemala	34.0	13.7%
Net Personnel Expenses	7.4	15.6%
Net External Services	26.6	13.2%
South America	75.9	38.3%
Net Personnel Expenses	34.0	31.8%
Net External Services	41.9	44.0%
TOTAL	109.9	29.6%

- Amortisation and Provisions are up 6.1%, primarily due to the effect of increased amortizations booked as a result of the Altamira and La Laguna combined cycles plants in Mexico and the Termopernambuco plant in Brazil entering into service and operating at full capacity.

The key operating figures for this business are as follows:

INTERNATIONAL (million euros)	H1 2006	vs. 2004 2005
Net Sales	1,134.6	36.7%
Gross Margin	446.3	40.2%
EBITDA	332.5	44.1%
EBIT	258.2	60.6%

3. NON-ENERGY BUSINESSES

a) Gross Margin

Net Sales from Non Energy Businesses grew 32.3% to 751.0 million euros, as an effect of activity in Engineering and Services and the contribution made by IBV, which grew in similar proportions, while Iberdrola Inmobiliaria showed growth in line with the seasonal nature of its business. Iberdrola Ingeniería y Construcción (Iberinco) contributed 221.4 million euros in Net Sales after doubling its contribution.

Gross Margin increased to 330.1 million euros, representing growth of 49.6%. The results can be broken down as follows:

Million €	H1 2006	H1 2005	Chan. MM
Engineering and Services	89.3	55.6	38.7
IBERDROLA Inmobiliaria	60.8	88.4	-27.6
IBV Corporation	84.4	68.2	16.2
Other services	95.6	8.4	87.2
TOTAL	330.1	220.6	109.5

The increase of 33.7 million euros in Engineering and Services was basically due to the margin recorded by Third Parties Services. The increase in Other Services derives from including business activities here that, up to the third quarter of 2005, were included in the Distribution business and which, since the end of fiscal year 2005, have been accounted following the criterion of the 2005 Legal Report.

b) Operating Profit / EBIT

The following table breaks down the EBITDA:

	H1/2006	H1 2005	% Chan.
EBITDA	183.7	122.7	49.7%
Real Estate	47.3	77.2	-38.7%
Engineering and Services	51.2	31.8	61.0%
IBV Corporation	16.4	10.6	54.7%
Other Services	68.8	3.1	N/A

- It is noteworthy the contribution made by Iberdrola Engineering and Services, where EBITDA reached 51.2 million euros, in line with the higher margins achieved, and growth in Net Operating Costs that was considerably below the figure recorded under Gross Margin.
- The contribution made by Other Services was 68.8 million euros, which was influenced by changes in the accounting criterion already referred to under Gross Margin.
- The contribution made by Real Estate was 47.3 million euros, which follows the seasonal trend visible under Gross Margin, to which

must be added growth in Net Operating Costs, particularly in relation to External Services linked to projects on the portfolio.

- IBV Corporation, which is consolidated by proportional consolidation according to IFRS, has contributed 16.4 million euros through its various industrial businesses.

The key operating figures for this business are as follows:

Million €	H1 2006	vs. 2005
NET SALES	751.0	32.3%
GROSS MARGIN	330.1	49.6%
EBITDA	183.7	49.7%
EBIT	149.6	38.4%

The main items for Iberdrola Inmobiliaria at the end of the first half of fiscal year 2006 are the following:

- Iberdrola Inmobiliaria business data:

PORTFOLIO OF BUILDABLE AREA RESIDENTIAL USE (m ²)	
Total	1,610,633
Under construction	140,323
Under management	316,088
In planning	1,154,222

PORTFOLIO OF BUILDABLE AREA COMMERCIAL USE (m ²)	
Total	526,462
Under construction	37,814
Under management	228,841
In planning	259,807

- Iberdrola Inmobiliaria balance sheet data:

Million €	
TOTAL ASSETS	1,658
INTANGIBLE FIXED AND INVESTMENT ASSETS	574
CURRENT ASSETS	1,020
SHAREHOLDERS' EQUITY	644
FINANCIAL DEBT	56

- Iberdrola Inmobiliaria income statement data:

Million €		
		vs. 2005
NET SALES	136.9	-37.2%
GROSS MARGIN	60.8	-31.2%
EBITDA	47.3	-38.7%
EBIT	44.7	-40.7%
Non Current Assets	42.7	N/A
NET PROFIT	58.6	+36.6%

Balance Sheet

January - June 2005

	Million euros	vs. Dec. 2005
TOTAL ASSETS	32,013	5.0%
TANGIBLE & INTANG.		
FIXED ASSETS	21,533	0.9%
LONG-TERM INVESTMENTS	2,025	24.2%
SHAREHOLDERS' EQUITY	9,795	4.0%
NET DEBT	13,605	11.4%

The balance sheet of Iberdrola at June 30, 2006, presents Total Assets of 32,013 million euros. It is worth highlighting the maintenance of its strong capital position even taking into account the investments made in the period (1,153 million euros). The leverage ratio in June 2006 was 54.9% (58.1% if taking into account the financing of the tariff insufficiency). In December 2005, leverage ratio was 53.6% (56.5% if taking into account the financing of the tariff insufficiency). Tariff insufficiency corresponding to Iberdrola added up 1,694 million euros by June 2006, with 1,341 million euros already recognized for 2005.

Analysis of the Balance Sheet

1. FIXED ASSETS

Total investment in the period from January to June 2006 amounted to 1,153 million euros, broken down as follows:

	Jan-Jun 2006	%
Spain	570	49.5%
Generation	176	
Renewables	98	
Distribution	209	
Other	87	
Mexico	116	10.1%
Generation	110	
Distribution	6	
South America	72	6.2%
Generation	6	
Distribution	66	
International: other	395	34.2%
TOTAL	1,153	100.0

With respect to investments in Spain, those made on production activities stand out, totalling 274 million euros, broken down as follows:

- 176 million euros on the Generation Business.
- 98 million euros on the Renewables business.

Investments in Mexico were mainly focused to both the combined cycles of Tamazunchale and Altamira V and VI, with 76 million and 14 million euros respectively. In Brazil investments have primarily been made in distribution, mostly financed through funds generated in Brazil.

Under the heading "International: Other", and totalling 395 million euros, the following investments are included:

- **Stake increase in the share capital of Energías de Portugal (EDP) up to 9.5%.** Past April 27th Iberdrola raised its stake in Energías de Portugal, S.A. (EDP) from 5.7% to 9.5%. The acquisitions were made in the market amounting 332 MM euros.
- **Renewables outside of Spain (63 MM euros),** basically for the projects in the United States, Brazil and France.

2. SHARE CAPITAL

Share Capital as of June 30, 2006 was comprised of 901,549,181 bearer shares with a par value of 3 euros each.

The General Shareholders' Meeting held last 30 March approved the distribution of a total dividend of 0.885 euros per share charged against fiscal year 2005, representing an increase of 15.2% per share over the dividend paid in 2005. This ratified the commitment assumed by IBERDROLA to increase remuneration to shareholders in line with the growth in Net Profit.

On 2 January 2006 an interim dividend was paid against fiscal year 2005 in the amount of 0.367 euros per share, and on 3 July 2006 a supplementary dividend of 0.518 euro per share was paid.

3. FINANCIAL DEBT

Net financial debt amounted to 11,911 million euros at the end of June, and the financial leverage stood at 54.9%. If it is taken into account the financing of the tariff insufficiency, which at June 2006 amounted, in the case of Iberdrola, 1,694 million euros (1,341 million euros already recognized for 2005 and 353 million euros for the period corresponding from January to June of 2006), net financial debt would be of 13,605 million euros and the leverage would stand at 58.1%

Average cost of debt was situated at 4.43% in June 2006, 14 basis points lower than the one registered in June 2005, despite the upward trend in interest rates.

The debt structure can be broken down by currency and interest rate as follows:

	June 2006	June 2005
Euro	86.3%	86.1%
Dollar	8.6%	8.4%
Real	4.7%	5.1%
Other currencies	0.4%	0.4%
Fixed Rate	57.4%	58.2%
Capped	11.2%	12.0%
Floating Rate	31.4%	29.8%

In line with the policy to minimise financial risks on debt, foreign currency risks have continued to be mitigated through the financing of investments in Latin America in local currencies (the real, in the case of Brazil) or in their functional currencies (the dollar, in the case of Mexico).

The debt structure per company is shown in the following table:

	June 2006	June 2005
IBERDROLA, S.A.	85.3%	83.9%
Mexico	4.1%	5.2%
South America	4.4%	5.6%
Renewable energy	3.5%	2.8%
Iberdrola Inmobiliaria and other	2.7%	2.5%
Total	100%	100%

Debt can be broken down by product type as follows:

	June 2006	June 2005
Euro bonds	39.1%	35.4%
US PP	4.5%	3.7%
Other Bonds	3.7%	4.8%
Domestic commercial paper	5.4%	3.8%
Euro commercial paper (ECP)	4.4%	5.2%
Euro loans	35.3%	37.5%
Loans in other currencies	7.6%	9.6%
Total	100%	100%

In addition, as a result of the refinancing policy followed by IBERDROLA the average life of the debt increased from 4.9 years in June of 2005 to 5.0 years in June of 2006.

Lastly, the change in financial leverage has been as follows:

Million €	June 2006	December 2005
Shareholders' equity	9,795	9,415
Gross debt	14,390	13,111
Capitalized derivatives	91	90
Temporary financial investments	462	601
Cash	232	215
Net debt	13,605	12,211
Leverage*	58.1%	56.5%

* Without the effect of the tariff insufficiency, leverage is 54.9% in June 2006 and 53.6% in December 2005

4. WORKING CAPITAL

The figure for Net Working Capital rose to 931 million euros, representing an increase of 384 million euros in relation to the 547 million euros recorded at the end of fiscal year 2005. This increase is broken down as an increase of 648 million euros in Current Assets and an increase of 264 million euros in Current Liabilities. The origin of this change is founded in the Inventories item, with an increase of 208 million euros, basically due to Real Estate (+179 million euros).

5. FUNDS GENERATED FROM OPERATIONS

In June 2006 Funds Generated from Operations amounted 1,180.6 million euros, reflecting an increase of 9% compared to June 2005.

In the last quarterly review done by Moody's agency, the rating of "Excellent" for liquidity, granted in June 2005, was maintained.

Breakdown of business contribution to Profits, Losses and Assets

	Sales	Oper. profit	Net Profit	Assets
Spanish business	79.4%	81.4%	81.8%	85.4%
International business	20.6%	18.6%	18.2%	14.6%
TOTAL	100%	100%	100%	100%

IBERDROLA Senior Unsecured Debt Credit Rating		
Agency	Rating	Outlook
Standard & Poor's (*)	A+	Negative
Moody's (*)	A2	Negative
Fitch IBCA	AA-	Negative

(*) By virtue of the agreement for the acquisition of assets signed with Gas Natural and subject to the approval of the pertinent authorities:

- S&P has rated IBERDROLA Senior Unsecured Debt at "credit watch with negative implications"
- Moody's has rated IBERDROLA Senior Unsecured Debt at "review for a possible downgrade"
- Fitch put the ratings for IBERDROLA Senior Unsecured Debt at "credit watch negative (RWN)", after approval by the Spanish government of the tender offer for Gas Natural and Endesa. Later, in February of 2006, it raised its rating from A+ to AA- as a result of a change in its method of analysis

APPENDIX.- IBERDROLA and sustainability

The contribution of IBERDROLA to sustainable development is reflected in several social responsibility practices that attend to the needs and expectations of its Interest Groups, with whom the Company maintains a combination of open communication channels and dialogue,

which are designed to: communication on goals, activities and successes achieved in the three areas of sustainable development (economic, environmental and social), as well as receiving evaluations and requests from the parties involved.

1. SUSTAINABILITY INDICATORS

Recognition

"Best Online Investor Relations Service" Expansión

IBEDROLA web page, in its section corresponding to Investor Relations and Attention to Shareholders has won the price "Best Online Investor Relations Service" of "Favoritos Expansión" prices.

IBERDROLA is First Private Company in Information Transparency in Annual Reports and Economic and Financial Documents, according to the eighth ranking of Information Transparency from El Nuevo Lunes

In May 2006 El Nuevo Lunes conducted a survey for the eighth year running among Analysts on Information Transparency in Annual Reports and other financial, economic and stock market information, covering the same private firms, banks, savings institutions and public companies analysed by the media. IBERDROLA achieved first place in the ranking of private firms, repeating its position from the previous year, with a total of 7.96 points.

3. ENVIRONMENTAL COMPROMISE AND RESPONSIBLE SOCIAL INVESTMENT

Assessment by Analysts and Investors on Socially Responsible Investment

In the University of Hamburg CR-Risk Premium Survey, which is sponsored by the SRI area of Deutsche Bank, IBERDROLA leads

the utilities sector with 30.5 points, compared with an average of 19.2 points for the utilities analysed.

The University of Hamburg CR-Risk Premium study focuses on studying the influence of Corporate Responsibility in the company's cost of capital, by evaluating different areas of the company. The total points which enabled IBERDROLA to achieve lead position were 30.5 points, compared with 19.2 points for the rest of the utilities sector.

The break down by areas of the points achieved by IBERDROLA is as follows:

Areas assessed / Criteria	Points
CR Management	
Strategy and Organisation; Reporting Quality	5.5
Financial Responsibility	
Good Investor Relations; Corporate Governance; Supplier Policy; Client Relations	5.5
Environment Management	
Existence of environmental policy; fixed environment goals; environmental certifications, follow-up of environmental impacts; information on energy mix; energy efficiency programmes; use of renewable energy programmes; adequate focus on climatic strategy and emissions	11
Social Responsibility	
Equal opportunities; Health care programs for employees; Human Resources development programs; Belonging to supra-national organisations; Analysis of social impact of new infrastructures	4.5
Citizenship and relations with environment	
Strategy; Policies, and inclusion in public information	3.0
Management of stakeholders	
Description, consideration of their interests and crisis management	1.0
IBERDROLA ranking	30.5

Action taken and investment to reduce emissions

IBERDROLA, the first Spanish firm to negotiate Joint Application projects to fulfil Kyoto.

IBERDROLA has become the first Spanish firm to negotiate Joint Application (JA) mechanisms to facilitate compliance with the Kyoto Protocol, after starting the procedure with two wind farms in Poland. In particular, this refers to the farms that the company is building in Poland known as Malbork and Kisielice, with an installed capacity of 18 and 40.5 MW and that will start operation at the end of 2006 and beginning of 2007, respectively. These installations will enable reduction of the emission into the atmosphere of more than 93,000 tonnes of CO₂ annually.

As a first step, the Designated National Authority (DNA) has already certified that IBERDROLA has sufficient capacity to carry out wind energy and AC energy projects under Art. 6 of the Kyoto Protocol, a formality required by the host country, Poland, for the Company to be able to obtain approvals for both these initiatives.

IBERDROLA will now continue with the remaining phases of the application procedure: validation of the project by an Accredited Independent Entity (AIE), obtaining the approvals from the Spanish DNA, and the final approval from the Joint Application Supervisory Committee (JASC). The AC projects, which are one of the flexible mechanisms being contemplated in order to facilitate

compliance with the Kyoto Protocol, enable investment in sustainable projects in countries undergoing transition to the market economy which will reduce CO₂ emissions.

IBERDROLA is reducing nitrogen oxide emissions by 35% at the Velilla thermal plant.

IBERDROLA has been able to reduce nitrogen oxide emission by 35% from the Velilla del Río Carrión (Palencia) thermal plant through installing a system called ABACO which minimises the formation of pollutant products during the combustion process. This system, which has begun operation during the past two years in this 515 MW capacity plant, has represented an investment by IBERDROLA of 1.1 million euros. The Company will invest additional 700,000 euros in the second half of 2006 in order to optimise it and improve the performance of the boiler. Thanks to this initiative, IBERDROLA has managed to comply in this thermal plants, and two years in advance, with the limits established for major electric plants of combustion.

4. CONTRIBUTION TO SOCIAL DEVELOPMENT

The key events for IBERDROLA in the first quarter of 2006 for social aspects were as follows:

"Education and Training" Programme

- **Promotion of Energy Savings and Efficiency.** An agreement has been made with the Community of Madrid for the development of a plan of action (seminars, energy audits, etc.), with the purpose of awaring public opinion as to the rational use of energy and thus being

able to achieve a more sustainable development.

- **Promotion of Electrical Safety.** IBERDROLA participates in the Renove plan for electrical installations in housing blocks, which has been set up by the Madrid Regional Authority to improve electrical safety, and has already supervised electrical installations in more than 2,000 buildings. It has continued its education campaigns promoting measures to prevent electrical risks among various professional bodies: contractors and installers (in the País Vasco and Extremadura); firemen (in Guadalajara and Murcia), and police (in Madrid).

Specific Projects

- **"Implica2" Project for the disabled.** IBERDROLA continues developing its ambitious "Implica2" Project, meant to train disabled persons so that they can participate in the labour market. What stands out in this quarter is its support for the Council of Castilla - La Mancha, allowing the Asprona organization in Albacete to benefit from the experience of Fundación Lantegi Batuak. The ultimate objective of IBERDROLA is to extend this model of support to its other areas of influence.
- **Website accessible for disabled persons.** The new IBERDROLA website has obtained an Accessibility Certificate, at AA level, issued by Technosite (a company belonging to the ONCE Foundation). This level guarantees top-

level accessibility to all persons navigating the site.

IBERDROLA is becoming a pioneer company in this area within the Spanish energy sector, and is the first to receive the double A grading from Technosite.

- **Volunteers' Day.** IBERDROLA conducted a Volunteers' Day in Cáceres, in which more than 300 disabled persons from Extremadura participated.

Family Responsibility Business Certificate. The +Familia Foundation has awarded IBERDROLA its Family Responsibility Certificate according to Regulation 1000-1. The Certificate is valid for three years, during which time annual audits are carried out.

- **Internal Corporate Culture Management Model.** IBERDROLA has launched a project for managing Internal Corporate Culture, understood as the sum of all shared values, behaviour guidelines, work habits and conduct with organisation members, aimed at supporting the commitments acquired in the Strategic Plan.

"Surrounding Economic Development" Programme'

- **Regional Advisory Boards.** Meetings have been held of the Consultative Committees for Castilla y León, and the Comunidad Valenciana.

- **Support for companies in Castilla y León.** IBERDROLA intends to help improve the competitiveness of small businesses in Castilla y León by incorporating participation in the Foro de Empresas and Organizaciones Inductoras de la Excelencia.
- **Dissemination of Corporate Social Responsibility.** IBERDROLA participated in 13 conferences promoting corporate social responsibility practices, presenting the "IBERDROLA model" to business and academic circles. Our Company, together with the BBVA Foundation and the Fundación Entorno, presented an online course named "RSE+5", which is intended to help small and medium companies to develop sustainable strategies.

Art and culture programme

- **Reconstruction and Illumination of Monuments.** The following projects have been implemented to illuminate Spanish cultural monuments: Cathedral and Walls of Ciudad Rodrigo (Salamanca); Sanctuary of the Virgen del Rosario de Hellín (Albacete) and the Plaza de Sancho Gracia in Espinosa de los Monteros (Burgos). The exhibition "La Luz de Flandes" was opened in Burgos, showing the work that went into the Cartuja de Miraflores, as carried out with the cooperation of IBERDROLA.
- **Publications.** The IBERDROLA Foundation has published four new books on culture and the sciences and also two new Guides to assist

disabled persons and the socially marginalised.

"Solidarity" Programme

- **IBERDROLA Foundation projects.**
The IBERDROLA Foundation has committed its support to 11 new social action projects meant for the disabled, immigrants, and other disadvantaged groups.
- **V International Forum of the Alliance of Cities Against Poverty.** IBERDROLA has supported the Comunidad Valenciana in holding this forum, organized jointly by that administration and the United Nations Programme for Development, with the cooperation of the Parliament of Valencia.

5. CORPORATE GOVERNANCE

The highlights for Corporate Governance during the first half of 2006 were as follows:

Composition of the Board of Directors

At a meeting held on 26 April 2006 the Board of Directors accepted the resignation of D. Iñigo de Oriol Ybarra and enacted the agreement adopted by the Board at a meeting on 20 April 2005 by which D. José Ignacio Sánchez Galán was appointed as the Chairman of the Board of Directors, and consequently replaced D. Iñigo De Oriol Ybarra as Chairman, while remaining as CEO.

On the same date D. José Antonio Garrido Martínez, D. Javier Herrero Sorriqueta and D. Ignacio de Pinedo Cabezudo also tendered their resignations, thus formalising the appointment as board member, by coopting and subject to approval or ratification by the General Meeting of Shareholders, of D. Iñigo Víctor de Oriol Ibarra, who is classified as part of "other external board members".

On 24 May 2006 the Board agreed to accept the resignation of D. César de la Mora Armada, D. Antonio Garay Morenés and D. Antonio M^a de Oriol y Díaz-Bustamante, and also to appoint as Vice-presidents the independents D. Juan Luis Arregui Ciársolo and D. Víctor de Urrutia Vallejo. D. Julián Martínez-Simancas Sánchez was also appointed as Deputy Secretary of the Board.

Finally, at a meeting on 7 June 2006, the resignation of external board member representing substantial shareholders, D. Jesús María Cadenato Matía, was accepted. Also, by coopting and subject to the approval or ratification by the General Meeting of Shareholders, the appointment as board members of Dña. Inés Macho Stadler, D. Braulio Medel Cámara and D. José Carlos Pla Royo, (the first two classed as independent board members and the latter as director representing substantial shareholders) was formalised.

As a consequence the Board of Directors is currently composed of 15 members, from which only the Chairman is classed as executive. The remaining 14 directors include 11 independents, 2 representing substantial shareholders and 1 is classified as "other external shareholders".

Details on the identity and category of the Directors, and also the composition of the Executive Board, the Auditing and Performance Board, and the Appointments and Salaried Committee, are available in constantly updated form at www.iberdrola.com (information for shareholders and investors / corporate governance / board).

Amendments to the Company Regulations

The General Shareholders' Meeting held on 30 March 2006 ratified the following amendments to the Company's By-laws and the Regulations of the General Shareholders' Meeting:

1. Modification of Article 19 of the By-laws and Article 8 of the Regulations of the General Shareholders' Meeting to adapt the wording of both provisions to that established in the First Final Provision of Law 19/2005 of 14 November on European joint stock companies domiciled in Spain, with respect to extending the term for publication of the notice of meeting for a general shareholders' meeting and the right of shareholders to request publication of a supplement to the notice of meeting, including new points on the agenda of meeting.
2. Modification of Article 22 of the By-laws and Article 10 of the Regulations of the General Shareholders' Meeting so as to eliminate the requirement relating to the minimum number of shares conferring the right to attend a general shareholders' meeting.

The full text of the Company By-laws, the Regulations of the General Meeting of Shareholders and other remaining internal regulations currently in force may be consulted at www.iberdrola.com (information for shareholders and investors / corporate governance).

Other Agreements

Furthermore, it was resolved that the firm "ERNST & YOUNG, S.L." be appointed as auditor for the Company and its Consolidated Group, which firm will do the auditing for a period of 3 years for the annual reports for fiscal years 2006, 2007, and 2008". This resolution was adopted at the proposal of the Board of Directors after a favourable report from the Committee on Auditing and Compliance and after bidding among the major international auditing firms within the context of the "Iberdrola Group Policy on Retaining Auditors" approved by that committee on 23 November 2005.

Information Transparency

One of the Company's core Corporate Governance principles is to promote maximum transparency in the information – financial and other – provided to shareholders and markets. In line with this commitment, in the first half of 2006, the company maintained a high level of activity with regard to information for institutional investors and financial analysts, which no doubt contributed to the excellent performance of Iberdrola's stock over the period.

Last 22 February 2006, the Board approved the Annual Report on Corporate Governance for 2005, in accordance with the form required by Circular 1/2004 of 17 March of the Spanish securities regulator (CNMV).

On the same date, the Board of Directors approved the Report on the Activities of the Audit and Compliance Board for fiscal year 2004, the publication of which is intended to contribute to "good practices" in corporate governance by disseminating the annual activities of the latter Board.

The National Stock Market Commission was informed as to all relevant facts connected with the Company's Corporate Government, including, the calling, recording and agreements reached by the General Shareholders' Meeting held on 30 March 2006, as well as the changes among the Board of Directors.

The appropriate notifications were also made in relation to publishing of quarterly and half-yearly information on the current financial year, including information relating to operations with associated undertakings.

All information published in the section on corporate governance of the website www.iberdrola.com is available in Spanish and English.

Spanish stock market commission (CNMV): Significant Events and Other Communications as of April

XII - 6. Changes of Directors or of the Board of Directors

The resolutions of the General Shareholders' Meeting of 30 March 2006 include those transcribed below:

RESOLUTIONS CONCERNING POINT TEN

(Point ten on the Agenda)

- Ratification of the appointment of the board members co-opted since the last general shareholders' meeting was held:
 - a) Ratification of the appointment as director of Mr Xabier de Irala Estévez, agreed by the Board of Directors at its meeting on 20 April 2005.
 - b) Ratification of the appointment as director of Mr Jesús María Cadenato Matía, agreed by the Board of Directors at its meeting on 20 April 2005.

The General Shareholders' Meeting, at the proposal of the Board of Directors, adopted the following resolutions:

a) To ratify, in pursuance of s. 138 of the Consolidated Text of the Corporations Act (*Ley de Sociedades Anónimas*) and Art. 48.3 of the Articles of association, the appointment by co-option by the Board on 20 April 2005 of Mr XABIER DE IRALA ESTÉVEZ as Director. This appointment was made by a resolution of the board, ratified in full by the General Meeting. The text of the resolution was as follows:

"5.- To appoint to the Board of Directors by co-option, pursuant to s. 138 of the Consolidated Text of the Corporations Act (*Ley de Sociedades Anónimas*) and Art. 48.3 of the Articles of association, at the proposal of the Board of BBK, shareholder of Iberdrola, S.A., and subject to approval or ratification at the first general shareholders' meeting to be held, the individual shareholder Mr XABIER DE IRALA ESTÉVEZ, of full age, married, Spanish nationality, resident for these purposes at Gran Vía nº 30, Bilbao, tax identification number 04.847.996-X, to fill the vacancy on the board left by Mr SANTIAGO MAYNER OYARBIDE. The new member of the board shall be classed as an external proprietary director, and shall hold his office until 16 June 2006, as corresponded to the former board member Mr SANTIAGO MAYNER OYARBIDE, whom he replaces.

The Board of Directors expressly recognises the acceptance by Mr XABIER DE IRALA ESTÉVEZ, being present in person, of his appointment as a member of the Board of Directors of the company and his declaration that he is not prevented by any legal prohibitions or incompatibilities from holding this office.

Thus, the formal acceptance by Mr XABIER DE IRALA ESTÉVEZ of the content of Article 17 of the Regulations of the Board of Directors on the Dismissal and Resignation of Directors, and the obligation envisaged in article 49 of the company's articles of association on the obligation to attest to the pledging of ten thousand (10,000) shares as a guarantee against possible liability incurred in the post is hereby minuted and the secretary of the board has given him a copy of the company's articles of association and the regulations that govern it."

b) To ratify, in pursuance of s. 138 of the Consolidated Text of the Corporations Act (*Ley de Sociedades Anónimas*) and Art. 48.3 of the Articles of association, the appointment by co-option by the Board on 20 April 2005 of Mr JESÚS MARÍA CADENATO MATÍA as Director. This appointment was made by a resolution of the board, ratified in full by the General Meeting. The text of the resolution was as follows:

"6.- To appoint to the Board of Directors by co-option, in pursuance of s. 138 of the Consolidated Text of the Corporations Act (*Ley de Sociedades Anónimas*) and Art. 48.3 of the Articles of association, at the proposal of the Board of BBVA, shareholder of Iberdrola, S.A., and subject to approval or ratification at the first general shareholders' meeting held, the individual shareholder Mr JESÚS MARÍA CADENATO MATÍA, of full age, married, Spanish nationality, resident for these purposes at Paseo de la Castellana nº 81, Madrid, tax identification number 14.917.785-P, to fill the vacancy on the board left by Mr JOSÉ ANTONIO FERNÁNDEZ RIVERO. The new member of the board shall be classed as an external proprietary director, and shall hold his office until 16 June 2006, as corresponded to the former board member Mr JOSÉ ANTONIO FERNÁNDEZ RIVERO, whom he replaces.

The Board of Directors expressly recognises the acceptance by Mr JESÚS MARÍA CADENATO MATÍA, being present in person, of his appointment as a member of the Board of Directors of the company and his declaration that he is not prevented by any legal prohibitions or incompatibilities from holding this office.

Thus, the formal acceptance by Mr JESÚS MARÍA CADENATO MATÍA of the content of Article 17 of the Regulations of the Board of Directors on the Dismissal and Resignation of Directors, and the obligation envisaged in article 49 of the company's articles of association on the obligation to attest to the pledging of ten thousand (10,000) shares as a guarantee against possible liability incurred in the post is hereby minuted and the secretary of the board has given him a copy of the company's articles of association and the regulations governing the company."

- At its meeting on 26 April 2006 the Board of Directors unanimously adopted the following resolutions:

1- To accept the resignation from the post of director, with immediate effect, of the following directors: Mr IÑIGO DE ORIOL YBARRA, Mr JOSE ANTONIO GARRIDO MARTINEZ, Mr JAVIER HERRERO SORRIQUETA and Mr IGNACIO DE PINEDO CABEZUDO.

2.- To execute and carry out the resolution adopted by the board of directors at its meeting on 20 April 2005, of which the National Securities Market Commission (CNMV) was notified that same day (entry register number 2005 035264), by virtue of which Mr JOSÉ IGNACIO SÁNCHEZ GALÁN was appointed chairman of the board, replacing Mr IÑIGO DE ORIOL YBARRA, while remaining chief executive officer and resigning as deputy chairman, all of which he accepted.

3.- To execute and carry out the resolution referred to in section 2 above, by virtue of which it was agreed, when the vacancy arose, that the individual shareholder Mr IÑIGO VÍCTOR DE ORIOL IBARRA should be co-opted to the board of directors, subject to approval or ratification at the first general shareholders' meeting to be held, and that he should be classified as an "other external director". The afore-named party accepted the post.

4.- Execute and carry out the resolution of the Board of Directors at its meeting on 22 June 2005, of which the CNMV was notified on that same day (entry register number 2005 066734), by virtue of which the director Mr XABIER DE IRALA ESTÉVEZ, as president of BBK, a long-standing key shareholder in IBERDROLA, should fill the first vacancy arising on the board of directors' executive committee. As a result, vacancies having arisen on the executive committee due to the resignation of the directors mentioned in section 1 above, Mr XABIER DE IRALA ESTÉVEZ was appointed to the executive committee. He accepted the appointment and resigned his position as a member of the audit and compliance committee.

- At its meeting on 24 May 2006 the Board of Directors unanimously adopted the following resolutions:

1- To accept the resignation from the post of director, with immediate effect, by the following directors: Mr CÉSAR DE LA MORA ARMADA, Mr ANTONIO GARAY MORENÉS and Mr ANTONIO M^a DE ORIOL Y DIAZ-BUSTAMANTE.

2.- To appoint the independent directors Messrs JUAN LUIS ARREGUI CIARSOLO and VICTOR DE URRUTIA VALLEJO as vice presidents of the company.

3.- To appoint the independent directors Messrs JULIO DE MIGUEL AYNAT –as secretary- and SEBASTIAN BATTANER ARIAS as members of the Audit and Compliance Committee.

4.- To appoint Mr JULIAN MARTINEZ-SIMANCAS SANCHEZ as deputy secretary of the Board of Directors of the company.

- At its meeting on 7 June 2006 the Board of Directors unanimously adopted the following resolutions:

1.- To accept the resignation from his post of director and member of the executive committee of proprietary director Mr JESÚS MARÍA CADENATO MATÍA with immediate effect.

2.- To appoint as members of the board of directors, by co-option and subject to approval or ratification at the first general shareholders' meeting to be held, the individual shareholders Ms INÉS MACHO STADLER, Mr BRAULIO MEDEL CÁMARA and Mr JOSÉ CARLOS PLA ROYO, who, once their acceptance has been minuted in the manner envisaged in article 142 of the company regulations, shall be classified as "independent directors", in the case of the first two, and "proprietary director" in the case of the latter, who is proposed by BBVA, a shareholder in "Iberdrola, S.A.".

3.- To appoint Mr JOSÉ CARLOS PLA ROYO to the executive committee once his acceptance of being classed a "proprietary director" has been minuted.

XII -7. Modifications to the Articles of association

The resolutions of the General Shareholders' Meeting of 30 March 2006 include those transcribed below:

RESOLUTIONS CONCERNING POINT THREE (Point three on the Agenda)

- Modification of specific articles of the articles of association and the regulations of the general shareholders' meeting:
 - a) Modification of article 19 of the articles of association and article 8 of the regulations of the general shareholders' meeting, in order to adapt the drafting of each to the provisions of the first final provision of Law 19/2005, 14 November 2005, on European joint-stock companies domiciled in Spain, as regards the extension of the deadline for publication of the announcement of a general shareholders' meeting and the right of shareholders to request the publication of a supplement to the announcement including new points on the agenda.
 - b) Modification of article 22 of the articles of association and article 10 of the regulations of the general shareholders' meeting in order to eliminate the requirement concerning the minimum number of shares required in order to be entitled to attend the general shareholders' meeting.

The General Shareholders' Meeting, at the proposal of the Board of Directors, adopted the following resolutions:

- a) To approve the new text of article 19 of the articles of association, and article 8 of the regulations of the general shareholders' meeting, in order to adapt them both to the provisions of the final first provision of Law 19/2005, 14 November 2005, under the terms described below:

Articles of Association

"Article 19. Calling the General Shareholders' Meeting

1. *The general shareholders' meeting must be formally called by the board of directors by means of an announcement published in the official gazette of the register of companies (Boletín Oficial del Registro Mercantil) and in one of the newspapers with the broadest circulation in Vizcaya at least **one month** before the date set for it to be held, except in those cases where the Law establishes a different period of advanced notice, in which case, this latter is to be followed.*

2. *The Board of Directors shall be obliged to call a General Shareholders' Meeting in the following cases:*
 - a) *In the circumstances envisaged in the first section of the eighteenth article of the articles of association.*
 - b) *If shareholders holding or representing the percentage of the company's share capital stated in the Law ask for a meeting in writing, indicating in their request the matters they wish to be discussed. In this case, the Board of Directors shall call General Shareholders' Meeting within thirty (30) days of being notified by a notary of the requirement to do so. The Board of Directors shall draw up the Agenda, and shall be obliged to include on it those matters that were stated in the request for a meeting.*
 - c) *When a takeover bid is made for the shares issued by the company, in order to inform the General Shareholders' Meeting about the takeover bid and discuss and decide on the subjects put before the meeting for its consideration. Any shareholder owning voting shares representing at least one per cent (1%) of the company's share capital shall be entitled to request the inclusion of matters on the Agenda of the General Shareholders' Meeting that must be called for this purpose.*
3. *The announcement must contain all the notices required by the Law, depending on the circumstances, and at all events, must state the date, time and place of the first session of the meeting and all the matters that are to be discussed. It may also state the date on which the second session of the meeting will be held, if applicable.*
4. *Shareholders representing at least five per cent (5%) of the company's share capital may request that a supplement to the announcement of the General Shareholders' Meeting be published with the addition of one or more points to the Agenda. This right may only be exercised if notice is received at the company's registered offices by reliable means not more than five (5) days after the publication of the announcement of the meeting. The supplementary notice must be published not less than fifteen (15) days before the date set for the meeting.*
5. *The General Shareholders' Meeting may not discuss nor decide upon matters that are not on the Agenda."*

Regulations of the General Shareholders' Meeting.

"Article 8. Calling the General Shareholders' Meeting

1. *In accordance with the provisions of the Articles of Association, the General Shareholders' Meeting must be formally called by the board of directors by means of an announcement published in the official gazette of the register of companies (Boletín Oficial del Registro*

Mercantil) and in one of the newspapers with the broadest circulation in Vizcaya at least **one month** before the date set for it to be held, except in those cases where the Law establishes a different period of advanced notice, in which case, this latter is to be followed.

2. The Board of Directors shall be obliged to call a General Shareholders' Meeting in the following cases:

a) In the circumstances envisaged in section two of article six above.

b) In the event that shareholders holding or representing the percentage of the company's share capital stated in the Law ask for a meeting in writing, stating in their request the matters they wish to address. In this case, the Board of Directors shall call General Shareholders' Meeting within thirty (30) days of being notified by a notary of the requirement to do so. The Board of Directors shall draw up the Agenda, and shall be obliged to include on it those matters that were stated in the request for a meeting.

c) When a takeover bid is made for the shares issued by the company, in order to inform the General Shareholders' Meeting about the takeover bid and discuss and decide on the subjects put before them for their consideration. Any shareholder owning voting shares representing at least one per cent (1%) of the company's share capital shall be entitled to request the inclusion of matters on the Agenda of the General Shareholders' Meeting that must be called for this purpose.

3. The announcement calling the meeting must contain all the notices required by the Law, depending on the circumstances, and at all events, must state the date, time and place of the first session of the meeting and all the matters that are to be discussed. It may also state the date on which the second session of the meeting will be held, if applicable.

4. The company shall send a copy of the announcement of the meeting to the National Securities Market Commission (CNMV). The text of the announcement will also be accessible on the company's website.

5. As of the date on which the announcement of the calling of the meeting is published, all the information considered to be of use to shareholders to facilitate their attendance at the meeting and participation in it will be posted on the company's website. This will include at least the following:

a) Documents relating to the General Shareholders' Meeting that are required by law, with information about the Agenda, proposals made by the Board of Directors, and any relevant information shareholders may need in order to cast their votes.

- b) *The channels of communication between the company and its shareholders, and in particular, the explanations shareholders need in order to exercise their right to obtain information, indicating the postal and e-mail addresses they may use to do so.*
 - c) *The means and procedures for granting representation at the General Shareholders' Meeting.*
 - d) *The means and procedures enabling remote voting, including, where applicable, the means to prove attendance and voting at the general shareholders' meeting by telematic means.*
6. *Shareholders representing at least five per cent (5%) of the company's share capital may request that a supplement to the announcement of the General Shareholders' Meeting be published including one or more points on the Agenda. This right may only be exercised if notice is received at the company's registered offices by reliable means not more than five (5) days after the publication of the announcement of the meeting. The supplementary notice must be published not less than fifteen (15) days before the date set for the meeting.*
 7. *The Board of Directors may require that a notary be present at the General Shareholders' Meeting and take the minutes of the meeting. It must do so when the circumstances envisaged in the Law apply."*
- b) *Modification of article 22 of the Articles of Association and article 10 of the Regulations of the General Shareholders' Meeting in order to eliminate the requirement concerning the minimum number of shares required in order to be entitled to attend the general shareholders' meeting.*

Articles of Association

"Article 22. Right to attend

1. *All holders of voting shares may attend the General Shareholders' Meeting, take part in its deliberations, speak and vote.*
2. *In order to exercise their right to attend the meeting, shareholders must have their shares registered in their name in the corresponding book entry register at least five (5) days before the date of the General Shareholders' Meeting. Proof of this fact must be given by the relevant attendance card or certificate of validity issued by the institution or institutions responsible for maintaining the book entry register, or in any other form accepted by the legislation in force.*
3. *The members of the Board of Directors must attend General Shareholders' Meetings. Managers, technical staff and others who have an interest in the proper functioning of the company's business may be authorised by the Board of Directors to attend the General Shareholders' Meeting. The non-attendance of any of the foregoing shall not affect the validity of the General Shareholders' Meeting.*

4. *The chairman may allow the press, financial analysts and any other people he sees fit, access to the General Shareholders' Meeting. However, the General Shareholders' Meeting may revoke this authorisation.*

Regulations of the General Shareholders' Meeting.

"Article 10. Right to attend

1. *All holders of voting shares may attend the General Shareholders' Meeting, take part in its deliberations, speak and vote.*
2. *In order to exercise their right to attend the meeting, shareholders must have their shares registered in their name in the corresponding book entry register at least five (5) days before the date of the General Shareholders' Meeting. Proof of this fact must be given by the relevant attendance card or certificate of validity issued by the institution or institutions responsible for maintaining the book entry register, or in any other form accepted by the legislation in force."*

XII - 9. Changes in the institutional regulations governing the sector with a material effect on the Company or Group's economic or financial position

The following legislation was published prior to 30 June 2006 which could have a significant impact on the electricity and gas sectors:

ELECTRICITY SECTOR

- ROYAL DECREE-LAW 3/2006, 24 February 2006, modifying the mechanism for matching offers for sale and purchase of energy submitted simultaneously to the daily and intraday production market by electricity sector entities belonging to the same business group.
- Correction of errors in Royal-Decree Law 3/2006, 24 February 2006.

The current provision treats as bilateral physical contracts, prior to the programme resulting from matching in the daily market (before the error was corrected this indicated those "being prior to matching on the daily market") those quantities of energy that coincide with the sale and purchase presented and matched by the aforementioned subjects, such that only these subjects might participate in the programme resulting from matching with the net position of the group to which they belong (before the correction this was "can only participate in matching the net position").

Pursuant to this law, only offers for sale under the ordinary regime and offers to buy made by distributors will be included. As regards the settlement of activities regulated by the CNE in 2006, the provisional price applicable to distributors for buying energy under this assimilation mechanism was 42.35 €/MWh.

Also, due to the internalisation of the value of greenhouse gas emission rights in the formation of prices in the wholesale electricity market, this Royal Decree reduces the payment to affected generating units by an equivalent amount. Moreover, the large tariff deficit produced in the period from 2006 makes it advisable to discount the value of emissions rights for the purposes of determining the size of this deficit.

- ROYAL DECREE-LAW 4/2006, 24 February 2006, modifying the functions of the CNE.

This Royal Decree-Law modifies the functions of the CNE, amending the text of the eleventh additional provision of Law 34/1998, 7 October 1998, on the Hydrocarbons sector, to correct what was seen as a double inadequacy.

Thus, it expands the fourteenth function of the CNE in terms of an expansion of the range of purchases that require its authorisation: "purchase of shareholdings by companies with activities that are considered regulated or activities which are subject to administrative intervention implying a special relationship of control" (nuclear power stations, coal-fired power stations, activities affecting the electricity systems on the islands and elsewhere outside mainland Spain, gas storage or transport involving international gas pipelines terminating in or travelling through Spain). This same authorisation will be required when the assets required for such activities are bought directly.

Moreover, as regards the refusal of this authorisation, due to the existence of significant risks, a clause has been added on the "protection of the general interest in the energy sector and, in particular, the guarantee of an adequate maintenance of the goals of policy in the sector, with particular application to assets considered to be of a strategic nature."

- ORDER ITC/913/2006, 30 March 2006, approving the method of calculating the cost of each of the fuels used and the procedure for despatch and settlement of energy in the electricity systems on the islands and elsewhere outside mainland Spain.

Summarised together with the following order.

- ORDER ITC/914/2006, 30 March 2006, establishing the method for the calculation of the remuneration for guaranteed power generation for facilities generating electricity under the ordinary regime for electrical systems on the islands and elsewhere outside mainland Spain.

These two orders implement RD 1747/2003 regulating the electricity system outside mainland Spain. As they implement the Royal Decree they in no way modify its content. Therefore the characteristics of the system of payment for activities, their development and basic operations are:

- Regulated payments of costs of investment under the power guarantee heading
- Right of facilities envisaged in the plans to charge for the power guarantee
- Despatch at standard costs
- Interim payments of distributors and marketers at the market price on the peninsula
- The CNE makes final settlement of remuneration regulated by these ministerial orders.

The ministerial orders enable the provisional 2001-2005 cycle to be closed, fundamentally based on accounting costs, and laying the foundations for future standards-based remuneration. All the foregoing relates to electricity generation and does not go into the valuation of transport and distribution activities.

The despatch and settlement methodology enables the grid operator, REE, to start performing the functions given to it in the Royal Decree and settle the price of energy sold as of the time of its publication.

- RESOLUTION of 17 March 2006 from the General Secretariat for Energy, approving Operating Procedures 4.1 "Resolution of congestion on the France-Spain interconnection" and 3.1 "Generation scheduling" in order to adapt them to Order ITC/4112/2005, 30 December 2005.

For this provision procedure P.O. 4.1 was approved, implementing the process to resolve the congestion on the France-Spain interconnection by means of a system of explicit coordinated auctions (Phase I) established in annex I of Order ITC/4112/2005, 30 December 2005, which

established the regime applicable to the intracommunity and international exchange of electrical power.

Moreover, Red Eléctrica de España, S. A. is empowered to take part in the explicit capacity auctions on the France-Spain interconnection in order to buy the exchange capacity necessary to perform the contracts of electricity supply between EDF and REE, referred to in the ninth transitional provision of Law 54/1997.

The resolution also approves P.O.3.1, establishing the daily scheduling process for generation from the matching of buy and sell orders for electricity arising from the day and intraday markets and notification of execution of bilateral contracts for physical delivery, so as to guarantee that demand is met and the system is secure.

- RESOLUTION of 16 February 2006 by the National Energy Commission establishing the lists of main and dominant operators in the energy sector for the purposes of the provisions of article 34 and the third additional provision of Royal Decree-Law 6/2000, 23 June 2000.

This Resolution also affects the gas sector, hence it is not mentioned in the corresponding section of this report.

The list of main operators considers the structure of the groups of companies existing at the time it was drawn up. The list is shown below, together with that of the previous year, so changes can be observed:

Main operators in the electricity sector		
	2005	2006
1	Grupo Endesa	Grupo Endesa
2	Grupo Iberdrola	Grupo Iberdrola
3	Grupo Unión Fenosa	Grupo Unión Fenosa
4	Grupo Hidrocantábrico	Grupo Hidrocantábrico
5	Grupo Red Eléctrica	Viesgo Generación, S.L.

Main operators in the gaseous hydrocarbons sector		
	2005	2006
1	Grupo Repsol YPF-Gas Natural	Grupo Repsol YPF-Gas Natural
2	Grupo Enagas	Grupo Iberdrola
3	Grupo Hidrocantábrico-Naturgas	Grupo BP España
4	Grupo Iberdrola	Grupo Hidrocantábrico-Naturgas
5	Grupo BP España	Grupo Endesa

- ROYAL DECREE 470/2006, 21 April 2006, modifying the percentage of the electricity tariff considered under the nuclear moratorium to be a cost with a specific allocated purpose.

The cost with a specific allocated purpose under the nuclear moratorium is set at 0.33 per cent of the electricity tariff.

- ROYAL DECREE-LAW 7/2006, 23 June 2006, on the adoption of urgent measures in the energy sector.

The measures envisaged for the electricity sector are:

- Elimination of the CTCs as they are felt to be ineffective and unnecessary today. Their elimination allows the contributions envisaged for this item up until 2010 to be reinvested to benefit consumers. CTCs are considered inefficient as they distort prices and they were calculated based on hypotheses that are currently out-of-date. They are considered unnecessary because their degree of depreciation, as recently attested by the CNE, is very high.

- A system of incentives is established for the use of domestically produced coal, under which, for reasons of security of supply, the government is empowered to set up a system of premiums up to a maximum limit of 10€/MWh. This system defines the mechanism whereby these premiums are modified depending on how prices in the electricity generating market evolve.
- In line with the EU's directives, energy efficiency is being bolstered through cogeneration, using a series of measures such as eliminating the need for cogenerators to use their own electricity by paying a premium on all the electricity produced rather than only on the surplus, thereby eliminating the asymmetry that existed previously.
- Updating the system of premiums set out in the Law by establishing the possibility that all plants will be paid a supplement in the form of a premium over the market price.
- Eliminating the remuneration band for renewable energy facilities of between 80% and 90% of the average reference tariff, as in some cases it prevents compensation from being sufficient for various technologies to be developed.
- Eliminating the limits imposed on the tariff methodology when the average or reference tariff is revised (currently stipulated at a maximum of 1.4% plus an additional 0.6% for deviations).
- Decouple the changes in premiums and prices of facilities operating under the special regime from the most recent increase in the average or reference electricity tariff envisaged for July.
- In order to have a mechanism with which to enable the alternative of bilateral contracting by specific groups of consumers, the medium and long-term contracting period resulting from virtual auctions, which currently has an upper limit of twelve months, is extended.

The measure envisaged for the gas sector is to give equal treatment to all operators storing gas. In order to ensure stability of supply, a provision has been added that guarantees this equality. Specifically, the generally applicable chronological criterion is replaced by a system of distribution based on objective and transparent criteria, and in particular, the previous year's percentage of sales. This provision will allow the use of capacity assignment mechanisms that are better suited to the current needs of the system, allowing optimisation of the existing infrastructure and avoiding monopolistic situations.

- ROYAL DECREE 777/2006, 23 June 2006, modifying Royal Decree 1866/2004, 6 September 2004, approving the national emission rights allocation plan for 2005-2007.

The reform of the national emission rights allocation plan (PNA) centres on modifying the table in point 3 of the plan that sets out the allocation to the various sectors of industry. Thus:

1. The volumes of rights and the categories of activities are adapted to the expanded scope of Law 1/2005, following the modifications made by Royal Decree-Law 5/2005, 11 March 2005.
2. The volume reserved for new entrants is unified.
3. The upper limits on allocations to each sector are increased, with the corresponding reduction in the volume reserved, in those sectors in which facilities are included with respect to which replacement resources have been considered.

- ROYAL DECREE 774/2006, 23 June 2006, modifying the regulations on special taxes approved by Royal Decree 1165/1995, 7 July 1995.

Law 22/2005, 18 November 2005, transposing into Spanish law various community directives on the taxation of energy products and electricity, and on the tax system applicable to parent companies and subsidiaries in different member states, and regulating the tax system applicable to cross-border contributions to pension funds within the European Union, made modifications to Law 38/1992, 28 December 1992, on special taxes, which in turn required the adaptation of the precepts of the regulation on special taxes, approved by Royal Decree 1165/1995, 7 July 1995.

- ROYAL DECREE 809/2006, 23 June 2006, revising the electricity tariff as of 1 July 2006.

This Royal Decree establishes the average increase in the average or reference tariff for the sale of electricity after 1 July 2006, setting the increase at 1.38% more than that coming into force on 1 January 2006, and applying it to the tariff structure in force, as the result of increasing the costs in the amount corresponding to the annual payment needed to recoup linearly the net annual value over 14 and a half years the deficit in income in the settlement of regulated activities generated between 1 January 2005 and 31 December 2005, which total 3,810,520 thousand euros.

The value of the average or reference tariff is set at 7.7644 €/kWh.

The tariffs for the sale of electricity applied by distributors increase on average overall by 2.07% and the tariffs for access to transport and distribution grids remain unchanged.

- ORDER ITC/2129/2006, 30 June 2006, regulating forward contracts on electricity by distributors in the second half of 2006.

This order sets out to establish, for the transitional period of the second half of 2006, the obligations of distributors to contract for electricity in the forward market managed by OMIP-OMIClear.

Other provisions of lesser interest are:

- Resolution of 8 February 2006, approving rules for the registration, valuation and notification of greenhouse gas emission rights.

This resolution implements aspects relating to the accounting treatment of emission rights covered by Law 1/2005, 9 March 2005, regulating the regime for the trading of greenhouse gas emission rights and is also set within the framework of the implementation of the national chart of accounts, approved by Royal Decree 1643/1990, 20 December 1990.

- RESOLUTION of 7 April 2006, by the General Secretariat for Energy, approving operating procedures 8.1 "Definition of grids operated and monitored by the system operator" and 8.2 "Operation of the production and transport system."

Two operating procedures are approved in this resolution. In 8.1 the grid which the OS is responsible for operating is defined, as are the installations of other grids whose structural details and real time functional variables need to be known in order to guarantee the security and reliability of the operation of the system.

P.O. 8.2 establishes the basic criteria that will govern the OS's actions in relation to the operation of the system of production and transport for which it is responsible for providing the technical management. It therefore deals with the obligations and actions of all subjects to which this procedure applies.

- RESOLUTION of 28 April 2006, by the General Secretariat for Energy, approving a set of technical and instrumental procedures required for the adequate technical management of the electricity systems on the islands and elsewhere outside mainland Spain.

- RESOLUTION of 11 May 2006, by the General Secretariat for Energy, modifying certain rules of operation of the energy production market.

In this provision modifications were published to the text of the rules of functioning of the market for the production of electricity so as to include appropriately the content of annex II of RD 1454/05, 2 December 2005, which modified certain provisions relating to the electricity sector, and the content of Instruction 1/2006 describing the procedure for application of the first paragraph of article 4 section 3 of Order ITC/4112/2005, establishing the regime applicable to intracommunity and international exchanges of electricity.

- RESOLUTION of 18 May 2006 by the General Secretariat for Energy, modifying the resolution of 17 March 2006 approving Operating Procedures 4.1 "Resolution of congestion on the France-Spain interconnection" and 3.1 "Generation scheduling" in order to adapt them to Order ITC/4112/2005, 30 December 2005.

Bearing in mind the agreement reached with the French energy regulating commission (CRE) regarding the rules for assigning capacity for the France-Spain interconnection (IFE rules), which envisage the implementation on 1 June of a coordinated system of explicit annual, monthly, daily and intraday auctions, this resolution modifies that of 17 March in order to proceed with the application of the coordinated auctions in June.

- RESOLUTION of 24 May 2006, by the General Secretariat for Energy, approving rules of operation of the daily and intraday energy production market.

This resolution includes the rules in a single text in order to systematise them better and reduce their complexity, given the successive modifications they have undergone in the past.

- RESOLUTION of 7 April 2006, by the CNE, modifying the resolution of 26 February 2004, establishing the application of the procedure for the presentation of the self-assessed settlement and the conditions for payment of the fees established in the twelfth additional provision, 2nd and 3rd paragraph, of Law 34/1998, 7 October 1998, in relation to the electricity and gaseous hydrocarbons sector.

- ORDER ITC/1652/2006, 20 April 2006, declaring the definitive cessation of operation of the José Cabrera Nuclear Power station (Guadalajara) and establishing the conditions under which activities at the plant are to take place until its decommissioning is authorised.

- ORDER EHA/1094/2006, of 6 April 2006, implementing the specialities applicable to official secondary markets for derivative financial instruments on energy.

In accordance with the Final Provision of Royal Decree 1814/1991, 20 December 1991, the aim of this order is to regulate the specialities that, with respect to the rules established in a general way for official secondary markets for financial futures and options, will be applicable to official secondary markets for financial futures and options on energy.

GAS SECTOR

- RESOLUTION of 13 March 2006, by the Directorate-General for Energy Policy and Mines, establishing the detailed protocol for the rules for the technical management of the gas system.

This resolution published the following detailed protocols relating to the technical management of the gas system:

PD-01. Measurement.

PD-02. Procedures for distribution.

PD-03. Forecasting demand.

PD-04. Communication mechanisms.

PD-05. Procedure for determining the energy unloaded by methane ships.

PD-06. Operating rules for the activities involved in unloading methane ships.

- RESOLUTION of 29 March 2006 by the Directorate-General for Energy Policy and Mines, publishing the new maximum prices for the sale of natural gas for use as a raw material.

- RESOLUTION of 26 April 2006 by the Directorate-General for Energy Policy and Mines, publishing the new maximum prices for the sale of natural gas for use as a raw material.
- RESOLUTION of 29 May 2006 by the Directorate-General for Energy Policy and Mines, publishing the new maximum prices for the sale of natural gas for use as a raw material.
- ROYAL DECREE-LAW 7/2006, 23 June 2006, on the adoption of urgent measures in the energy sector.
This provision was discussed in the section on the electricity sector.
- RESOLUTION of 26 June 2006 by the Directorate-General for Energy Policy and Mines, publishing the new maximum prices for the sale of natural gas for use as a raw material.

XII – 14. Other significant events

On 9 January 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

“We are pleased to inform you that IBERDROLA has purchased from Naturener 100% of its subsidiary Naturener Eólica, which has 280 megawatts (MW) power generating capacity at an advanced state of implementation in the autonomous regions of Castilla-La Mancha, Andalusia and Castilla-León”...

On 9 January 2006, the National Securities Market Commission was sent the following notification:

“The company sends a note on Iberdrola Portugal’s position regarding EDP, Galp and the reorganisation of the Portuguese electricity sector.”

On 18 January 2006, the National Securities Market Commission was sent the following notification:

Iberdrola and Gamesa, through the consortium Nuevas Energías Ibéricas, in which the Portuguese companies Visabeira, Alberto Mesquita, MECI and Galucho are also present, have today submitted plans in Lisbon for the construction of five wind turbine generating system manufacturing plants, involving a considerable investment.

On 27 January 2006, the National Securities Market Commission was sent the following notification:

“Iberdrola wishes to inform you that the profit and loss figures for the 2005 financial year (unaudited) will be submitted to the National Securities Market Commission and the stock exchange governing bodies on Thursday 9th February 2006 before the markets open (9.00 a.m. Madrid time).

A presentation will be held on the same day in Madrid.”

On 1 February 2006, the National Securities Market Commission was sent the following notification:

"We are please to inform you that, in compliance with the resolution of the Board of Directors, IBERDROLA will be offering its employees, for the second consecutive year, the possibility of receiving part of their variable remuneration in the form of shares. These shares will be distributed in March 2006." ...

On 3 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

"Resolution of the Council of Ministers whereby, in accordance with the provisions of letter b) of article 17 of Law 16/1989, 17 July 1989, on the defence of competition, it has been decided to subordinate observance of the conditions of approval of the economic concentration operation consisting of the exclusive takeover of control of Endesa, S.A. by Gas Natural SDG, S.A."

On 3 February 2006, the National Securities Market Commission was sent the following notification:

Iberdrola sends a press release concerning the government's decision on Gas Natural's takeover bid for Endesa.

On 6 February 2006, the National Securities Market Commission was sent the following notification:

The company announces that the presentation of the profit and loss figures for the 2005 financial year will be put back half an hour: 9/02/06 at 9.30 a.m.

On 9 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

The company reports on its second half 2005 earnings.

On 9 February 2006, the National Securities Market Commission was sent the following notification:

The company sends herewith a presentation on its second half 2005 earnings.

On 22 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

"We are please to inform you that the board of directors of IBERDROLA has today unanimously passed the following resolutions:

I. To formulate the annual accounts, management report and proposed distribution of profits, and the consolidated annual accounts and management report, all referring to the 2005 financial year.

II. To call a general shareholders' meeting to be held on 29 and 30 of March, first and second sessions, respectively, with the following agenda..."

On 23 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

The company sends herewith its Annual Report on Corporate Governance for 2005.

On 24 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

"Further to our notification of 22 inst., please find enclosed copies of the documents relating to the annual shareholders' meeting (hardcopy and scanned on a CD), which are made available to shareholders as of 24 February on its web site and at its registered office, as indicated in the

announcement of the calling of the meeting. The Commission has already received the Report on Corporate Governance." ...

On 28 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

"We send you herewith the corrected text of the resolution concerning point nine on the agenda of the general shareholders' meeting which replaces that sent on 23 February." ...

On 2 March 2006, the National Securities Market Commission was sent the following notification:

"We are pleased to inform you that on Friday 24 February IBERDROLA, through the consortium Nuevas Energías Ibéricas (NEI), in which Gamesa and the Portuguese companies Visabeira, Alberto Mesquita, MECI and Galucho, are also taking part, submitted its candidacy for the distribution of wind generating capacity in Portugal, called by the Portuguese government in 2005." ...

On 7 March 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

Unicaja has notified the company that it has increased its stake in Iberdrola to 1.5% of its share capital.

On 10 March 2006, the National Securities Market Commission was sent the following notification:

"Following on from our notification on 1 February, we are pleased to inform you that next week IBERDROLA will proceed to distribute shares in the company to its employees as part of their variable remuneration." ...

On 30 March 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

"We are pleased to inform you that the ordinary general shareholders' meeting held on 18 March passed, with votes in favour of more than two-thirds of the capital present and represented, all of the resolutions included on the Agenda, of which you were notified on 23 February, the corresponding documents (made available to the shareholders) having been sent to you on 23 of that month." ...

On 5 April 2006, the National Securities Market Commission was sent the following notification:

The company sends herewith a press release on the Renewable Energy conference held in Toledo.

On 17 April 2006, the National Securities Market Commission was sent the following notification:

The company submits herewith its energy balance for the first quarter of 2006.

On 17 April 2006, the National Securities Market Commission was sent the following notification:

The company hereby reports on its first quarter 2006 earnings.

On 27 April 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

The company hereby reports on its first quarter 2006 earnings.

On 27 April 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

The company hereby gives notice that Iberdrola Portugal has increased its stake in EDP (Energias de Portugal) from 5.7% to 9.5% of the company's share capital.

On 27 April 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

The company hereby expands upon the information given on the increase in its stake in the share capital of EDP –Energias de Portugal.

On 27 April 2006, the National Securities Market Commission was sent the following notification:

The company sends herewith its presentation on its first quarter 2006 earnings.

On 2 May 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

Iberdrola has entered the US wind energy market with the signing of a contract for the purchase of 100% of the company Community Energy Inc. (CEI), headquartered in Wayne (Pennsylvania). Iberdrola has also signed a framework agreement with Bayannaoer town council, northern China, to study the siting of at least 1,000 MW of wind generating capacity.

On 16 May 2006, the National Securities Market Commission was sent the following notification:

On 16 May 2006, the National Securities Market Commission was sent the following notification:

The company sends herewith a press release on the selection of candidates for 500 jobs with the Consorcio Novas Energias Ibericas (NEI) in the Portuguese regions of Beira Interior and Valle del Sousa. The NEI consortium is led by Iberdrola and Gamesa, and it also includes the Portuguese companies Visabeira, Alberto Mesquita, MECI and Galucho.

On 1 June 2006, the National Securities Market Commission was sent the following notification:

"We are pleased to inform you that Iberdrola intends to offer its shareholders a dividend reinvestment programme, whereby shareholders voluntarily joining this programme will be able to reinvest their dividends in the Company's shares..."

On 28 June 2006, the National Securities Market Commission was sent the following notification:

The company hereby gives notice that on 3 July 2006 it will pay out the supplementary dividend from the 2005 financial year of 0.51810171 gross per share.

II. VARIATION IN THE COMPANIES MAKING UP THE CONSOLIDATED GROUP (1)

NEW ENTRIES:

Renewables subgroup:

PARQUES EOLICOS REUNIDOS
IBERDROLA RENEWABLE ENERGIES USA, LTD.
COMMUNITY ENERGY INC.

Brazil subgroup:

GOIAS SUL PCH
BAGUARI-UHE

Mexico subgroup:

IBERDROLA SERVICIOS DE CAPACITACION

During the 2006 financial year Grupo Iberdrola has purchased and set up a number of companies that will be included within the scope of consolidated interim and annual accounts. The breakdown of these companies is as follows:

Renewables subgroup:

GLOBAL SOLAR ENERGY, S.A.
HIGHER DARRACOTT MOOR WIND FARM LIMITED
ELECTRA MALVANA, S.A.
ELECTRA DE SIERRA DE SAN PEDRO, S.A.
ELECTRA MALVANA, S.A.
ECOBARCIAL, S.A.
DELTUS
SISTEMAS ENERGÉTICOS LOS CAMPILLOS, S.A.

Non-energy subgroup

IBERD-ROS, S.L.

Iberdrola engineering and construction subgroup

IBERDROLA ENGINEERING AND CONSTRUCTION POLAND SP. Z.O.O.
IBERDROLA INGENIERIA Y CONSTRUCCION UK LTD.
IBERDROLA INZHINIRING I STROITEISTVO LIMITED LIABILITY COMPANY
IBERDROLA INGENIERIA Y CONSTRUCCIÓN VENEZUELA, S.A.
IBERINCO HELLAS TECHNIKI KAI KATASKEVASTIKI EPE
IBERINCO ENGINEERING AND CONSTRUCTION, US. INC

The impact of not consolidating these companies with the group at the half-year end in June 2006 is not significant. This is basically because these companies are not yet active businesses.

III. ACCOUNTING POLICIES AND VALUATION STANDARDS

(The principles and criteria of registration and valuation envisaged in the legislation in force must be used to prepare the financial and accounting data in the annual accounts for the financial year to which this periodically published report refers and which is used in the preparation of the financial and accounting data and information included in this report). If, exceptionally, generally accepted accounting principles and criteria required by the legislation in force were not applied to the data and information included herein, this fact must be stated and adequately explained. The influence that the non-application of these accounting principles and criteria might have on the net worth, financial situation and profit or loss of the company or consolidated group must also be explained. Additionally, with similar scope to the foregoing, any modifications that may have taken place in the accounting criteria used in the preparation of the information herewith must be mentioned and discussed. If the same accounting principles, criteria and policies have been applied as when preparing the preceding year's annual accounts, and if they coincide with those envisaged in the accounting regulations in force which are applicable to the company, this must also be expressly stated. When, in accordance with the applicable legislation, adjustments and/or reclassifications have taken place in the preceding period, due to changes in accounting policies, corrections of errors or changes in the classification of items, this section will include the quantitative and qualitative information necessary to understand these adjustments and/or reclassifications).

On 21 July the information sent on 20 July was modified as an error was detected in the classification of the items "Other income 4510" and "Staff costs 4540" in the profit and loss statement of the consolidated group.

	Reported 20-07-2006	modified 21-07-06
Other income	189,603	105,643
Staff costs	-515,075	-431,115

LEGISLATION IN FORCE

The financial and accounting information included in this regular published report was prepared, as far as the consolidate data are concerned, in accordance with International Financial Reporting Standards (IFRS), these being understood to be those adopted by the European Commission under the procedure established by Regulation (EC) No. 1606/2002 of the European Parliament and of the Council, 19 July 2002.

The foregoing applies both to the information in the half-yearly interim report on the year's profits and the comparison with the previous financial year's figures.

CHANGES IN ACCOUNTING CRITERIA

On 28 February the official state gazette (BOE) published Royal Decree-Law 3/2006 of 24 February 2006, modifying the mechanism for matching offers for sale and purchase of energy submitted simultaneously to the daily and intraday production market by electricity sector entities belonging to the same business group.

This Royal Decree-Law is pending implementation, and therefore until its effective scope is clarified, the main implications for this regularly published information are:

- Cancellation of freely allocated emission rights: In half-yearly reporting:
 - Emission rights are recognised under the heading of intangible assets.
 - An account payable is established for those allocated emission rights the value of which corresponds to the market value of emission rights at the time of their allocation.
 - The balancing item of the provision set aside for the consumption of emission rights will be the profit and loss account, under the heading "Raw materials and consumables".
- The provisional price to be considered by the National Energy Commission (CNE) for the settlement of regulated activities will be the average cost envisaged in the 2006 tariff for energy generated in the ordinary regime for mainland Spain, including the cost of adjustment services and the power guarantee, which is 42.35 €/MWh.

With the exception of the above, the same accounting principles, criteria and policies have been applied in the half-yearly information as in the annual accounts.

IX. PROGRESS OF BUSINESS

(The information to be included in this section, as well as complying with the provisions of the instructions for the completion of this half-yearly report, must expressly state the following points: progress of revenues and costs incurred in earning those revenues; composition and analysis of the main operations enabling extraordinary earnings, if any, to be obtained; comments on any significant investments and divestments, explaining their effect on the company's working capital and in particular on its cash position; adequate explanation of the nature and effects of any items that have caused a significant change in revenues or earnings in the current half-year, with respect to the preceding period. Additionally, those companies sending a balance sheet and profit and loss statement for a consolidated group in accordance with the IFRS adopted, must provide detailed information about those operations with a significant impact on the financial position, profit or loss, and equity of the company or its group as a result in the deterioration of assets or their reversion, from the valuation of assets and liabilities at fair value, including derivative instruments and accounting hedges, differences in exchange rates, provisions, business combinations, operations classified as "discontinued" or any other operation with a significant effect, and a description of material changes under the heading "non-current assets classified as being held for sale and from discontinued operations" and related liabilities, significant variations in the risk taken on, and transactions to mitigate it, and events subsequent to the end of the year, which although significant, have not been reflected in the financial information presented. Lastly, any comments on the consolidated financial statements and on the individual financial statements should be clearly distinguishable from one another).

- In annex

X.1.) ISSUES, REDEMPTIONS OR REPAYMENTS OF DEBENTURES

(This section is to include individualised information on each issue, redemption or repayment of debentures since the beginning of the financial year by the company obliged to publish periodic information, or by any entity within the scope of consolidation with it, indicating for each issue, redemption or repayment the information detailed in the boxes below. This information must be supplied separately so as to distinguish between the issues, reimbursements or repayments that, in relation to an issue or share placement, have required the registration of an information prospectus with a competent authority (24) in a member state of the European Union, from those that have not. In the case of issues, reimbursements or repayments by associates or any entity other than the dominant company, dependent companies or multigroup companies, this information will only be included insofar as the issue or repayment is guaranteed, in whole or in part, by the dominant company, or any dependent or multigroup entity. Share issues or placements in the money market (25) may be aggregated (26) by type of operation (27), as may issues by a single entity, within a single country, provided they are of similar characteristics. In the case of issues, redemptions or repayments that take place through a "special purpose entity" (28), this fact must be expressly stated).

13. Strategic alliances with national or international groups (exchanges of packages of shares, etc.)	3330	X
14. Other significant events.	3340	X

(*) Mark the relevant box with an "X", including, if applicable explanations, in an annex, together with the date of notification of the CNMV and SRBV.

Additional information on the distribution of dividends (interim dividend, supplementary dividend, etc.)

- On 2 January 2006 an interim dividend of 0.367 euros per share was paid from the profits from 2005.

XIII. ANNEX EXPLAINING SIGNIFICANT EVENTS

- In annex.

XIV. RELATED-PARTY TRANSACTIONS (34)

In relation to the information to be included in this section, the provisions of Order EHA/3050/2004 of 15 September 2004 regarding the reporting of related-party transactions(35) by companies issuing securities traded on an official secondary market shall apply, bearing in mind the instructions for the completion of the half-yearly report.

I. TRANSACTIONS WITH MAJOR SHAREHOLDERS IN THE COMPANY(36)

033	Other (specify)	Aggregate information	Current	53	0	s/t	BBVA

Other aspects (43)

- In order to facilitate comprehension of the information supplied, a fuller description is given of the following operations:

- The amounts in rows 5,6,8,20,21,25 and 26 are the balances at the end of the period.
- The amounts in rows 7,28 and 29 relate to transactions in which the related party acted as an intermediary.
- The amounts in rows 17 and 18 are the balances committed at the end of the period.
- The transactions listed in rows 5 and 20 relate to current accounts.
- The transactions listed in rows 6 and 21 relate to deposits.
- The transactions listed in rows 7 and 29 relate to emissions of promissory notes.
- The transactions listed in rows 19 and 22 relate to emissions of debt derivatives.
- The transactions listed in rows 23 and 24 relate to exchange insurance.
- The transactions listed in rows 25 and 26 relate to emissions of portfolio and treasury stock derivatives.
- The transactions indicated in row 27 relate to the sale and purchase of foreign exchange.
- The transactions indicated in row 28 relate to the sale and purchase of shares.
- Rows 31 and 32 list the revenues from the supply of electricity and gas to major shareholders.

The transactions undertaken by Iberdrola, S.A. with its major shareholders during the first month of 2006 are the result of its normal business and took place under normal market conditions. It is not necessary to report them in order to give a true and fair view of the company's equity, finances or earnings position.

Financial instruments are contracted on the basis of competition between banks, choosing the most beneficial for the company at the time. Iberdrola's financial risk policy establishes a series of limits on contracting with a single financial institution in order to avoid an excessive concentration of risk. This maximum contracting limit, which also depends on the credit rating of the financial institution, applies to all financial institutions, including the company's major shareholders.

2. TRANSACTIONS WITH DIRECTORS AND MANAGERS OF THE COMPANY(36)

Code (37)	Description of the transaction(37)	AI (38)	Curr./Prev. (39)	Amount (Thousands of euros)	Profit/loss(40) (Thousands of euros)	ST/LT (41)	Related Party(42)

028	Contributions to pension schemes and life insurance	Aggregate information	Current	671	0	s/t	Directors and managers

Other aspects (43)

Rows 1 to 5 list transactions between Iberdrola, S.A. and Montes de Piedad y Caja de Ahorros de Ronda, Cádiz, Almería, Málaga y Antequera (UNICAJA), of which the director Braulio Medel Cámara is president.

The transactions listed in row 5 concern current accounts.

Row 6 includes transactions under a contract for the provision of services for the development of energy businesses in Turkey with the Turkish company DAS Engineering & Energy Investments, Inc., in which a brother of the director Lucas María de Oriol López-Montenegro is a member of the board.

At all events, these are transactions within the normal business of the company, entered into under normal market conditions, which do not need to be reported in order to give a true and fair view of the company's equity, finances or earnings position.

Financial instruments are contracted on the basis of competition between banks, choosing the most beneficial for the company at the time. Iberdrola's financial risk policy establishes a series of limits on contracting with a single financial institution in order to avoid an excessive concentration of risk. This maximum contracting limit,

which also depends on the credit rating of the financial institution, applies to all financial institutions, including UNICAJA.

3. TRANSACTIONS BETWEEN PEOPLE, COMPANIES OR ENTITIES IN THE GROUP(36)

Other aspects (43)

The table above includes transactions between part-owned companies and major shareholders of Iberdrola, S.A. (rows 1 to 27). Intragroup operations are also listed (rows 28 to 29). Finally, transactions between part-owned companies and Montes de Piedad y Caja de Ahorros de Ronda, Cádiz, Almería, Málaga y Antequera (UNICAJA), of which the director Mr Braulio Medel Cámara is the president, are listed (rows 40 to 44), along with information regarding the compensation certain executives receive from these part-owned companies (rows 45 and 46).

In order to facilitate comprehension of the information supplied, a fuller description is given of the following operations:

- The amounts in rows 4,5,7,8,21,22 and 23 are the balances at the end of the period.
- The amounts in rows 6,19 and 20 are the balances committed at the end of the period.
- The amounts in rows 9 and 10 related to contracted operations.
- The transactions listed in rows 4 and 21 relate to emissions of debt derivatives.
- The transactions listed in rows 5, 23 and 44 relate to current accounts.
- The transactions listed in row 22 relate to deposits.
- The transactions listed in rows 24 and 25 relate to exchange insurance.
- The transactions indicated in row 26 relate to the sale and purchase of foreign exchange.
- Rows 37 to 39 list the revenues from the supply of electricity and gas to various part-owned companies.

The transactions listed here fall within the normal business of the company, were entered into under normal market conditions, and so do not need to be reported in order to give a true and fair view of the company's equity, finances and earnings. -

Financial instruments are contracted on the basis of competition between banks, choosing the most beneficial for the company at the time. Iberdrola's financial risk policy establishes a series of limits on contracting with a single financial institution in order to avoid an excessive concentration of risk. This maximum contracting limit, which also depends on the credit rating of the financial institution, applies to all financial institutions, including the company's major shareholders and UNICAJA.

XV. SPECIAL AUDITORS' REPORT

(This section should be completed with the information corresponding to the 1st half of the financial year following the last audited annual period, and shall be applicable to all issuing companies that, pursuant to the provisions of the thirteenth section of the Ministerial Order of 18 January 1991, are obliged to present a special report from their account auditors, when in their report on the annual accounts of the preceding year, the auditors had refused to give an opinion, stated a negative opinion or expressed their reservations. In this report a note will be included to the effect that the half-yearly information referring to the special auditors' report is included as an annex, along with a copy of the information or declarations made by the directors of the company regarding the updated situation of the reservations made by the auditors in their report on the annual accounts for the preceding financial year, and pursuant to the applicable technical standards of auditing, was used as the basis for the preparation of the aforementioned special report).

INSTRUCTIONS FOR THE COMPLETION OF THE HALF-YEARLY REPORT (GENERAL)

- The numerical data required, unless the contrary is indicated, must be expressed in thousands of euros, without decimals, and balanced after rounding.
- Negative amounts should be shown with a minus sign (-) in front of the number concerned.
- Together with each item of data expressed in figures, unless stated otherwise, the figure for the same period of the preceding year must also be shown.
- Adopted international financial reporting standards (adopted IFRS) are understood to mean those adopted by the European Commission under the procedure established by Regulation 1606/2002 of the European Parliament and of the Council, 19 July 2002.
- The financial information contained in this model shall be completed in accordance with the accounting standards and principles for registration and valuation that are applicable to the institution when preparing its annual financial statements for the year to which the periodic public information presented here refers.
In the case of financial years starting after 1 January 2007, companies other than credit institutions, which pursuant to the Code of Commerce are obliged to prepare consolidated annual accounts, and on the date of the end of the financial year have only issued fixed income securities traded on a stock exchange, and which have opted to continue applying the standards laid down in section three of title III of the first book of the Code of Commerce, and the regulations implementing them, provided they have not applied the adopted IFRS in previous years, shall present their consolidated periodic public information using the models included in sections IV and V referring to the national accounting standards in force in Spain.
- The information that is to be included under the heading of progress of the business should allow investors to reach a sufficiently well grounded opinion on the company's business and the profit or loss it obtained, financial situation and other essential details of the general progress of the company's business during the period covered by the interim report.
- Definitions:
 - (1) Variation in the companies making up the consolidated group: this will include only those companies that, in relation to the consolidated annual accounts of the immediately preceding financial year, have been included or excluded from the process of consolidation.
 - (2) The various headings making up the fixed assets will be presented net of accumulated depreciation and provisions.
 - (3) Deferred expenses include the cost of formalising debt (cost of issue and modification of fixed income securities and the cost of formalising debt, including notary's fees, taxes, preparation of certificates, etc.), deferred interest on tradable securities (difference between redemption value and issue price of fixed income securities and other analogous liabilities) and the cost of deferred interest (difference between the redemption value and the amount received on in the case of debt other than that in the form of fixed income securities). Companies in the electricity sector must also include the accrual accounts typical of their sector under this heading.
 - (4) Deferred income includes capital subsidies, positive exchange rate differences, income from deferred interest (interest incorporated in the nominal amount of loans given during normal business operations, which have to be entered against profit and loss in future financial years) and other income to be distributed over several years.
 - (5) The share of long-term debts with a maturity of less than 12 months must be reclassified under the appropriate heading in short term payables.
 - (6) The net turnover will include the price at which products are sold and services provided during ordinary business net of rebates and other discounts on sales, and of value added tax and other taxes directly related to the foregoing revenues.
 - (7) The "Other income" heading covers income from other sources than operating the business, work done by the company to improve its assets (except capitalised interest and exchange rate differences) and operating subsidies (capital subsidies transferred to the period's earnings are not included).

- (8) The following items are to be included under the heading of external and operating expenses:
- Work done by other companies, external services (leases, repairs, transport, insurance, power, etc.); taxes (excluding corporation tax) and other management expenses.
 - The allocations to provisions for operating risks and liabilities (major repairs, etc.; excluding contributions to pensions and similar obligations, which are to be registered under staff costs).
- (9) Other income and expenses will include the profit or loss of unit-holders other than unit-trust managers in operations regulated by articles 239 to 243 of the Code of Commerce and in other joint transactions of similar characteristics.
- (10) The variation in working capital provisions will include allocations made during the period, net of surpluses and applications, intended for use to make value corrections in the case of reversible deterioration in the value of inventories, customer receivables and other receivables. It will also include losses due to definitive insolvency of customers and other debtors.
- (11) Allocations to depreciation and financial provisions will include allocations made during the period, net of surpluses and applications, intended to be used to make value corrections in the case of reversible deterioration in the value of securities (except those corresponding to holdings in the share capital of group or associate companies), other tradable securities, and short and long-term non-commercial loans.
- (12) Earnings from intangible assets, tangible assets and the control portfolio will include the profit or loss on the sale of tangible and intangible assets and on long-term holdings in the share capital of group, multigroup or associate companies, or their total or partial removal from the inventory, as a result of losses due to the irreversible deterioration of these assets.
- (13) Variation in provisions for intangible and tangible assets and the control portfolio will include allocations made during the period, net of surplus and applications, intended for use correcting valuations due to reversible deterioration in the value of tangible and intangible assets, and long-term holdings in the share capital of group and associate companies.
- (14) Earnings from transactions involving treasury stock and the company's own bonds will include the profit and loss resulting from the redemption of bonds or the transfer of securities and bonds issued by the company.
- (15) Profit or loss brought forward will include earnings from previous years, which given their materiality, cannot be entered on the accounts according to their nature.
- (16) Other extraordinary earnings will include:
- The value of capital subsidies transferred to the period's earnings.
 - Extraordinary income and expenses whose value is significant, which are not considered periodic when assessing the future earnings of the company.
- (17) The company's consolidated reserves will include both those corresponding to companies consolidated using the global or proportional integration and those that correspond to companies consolidated by the equity method.
- (18) and (19) The earnings and conversion differences headings (which appear only during consolidation) include exchange rate differences arising from the conversion of consolidated companies' balances in foreign currency (whichever consolidation technique is used).
- (20) Other reserves: under this heading will be included the revaluation reserves for tangible and intangible assets, and other reserves other than accrued earnings.
- (21) Accrued earnings: under this heading will be included the earnings produced in the current financial year and those from previous financial years that have not been distributed to shareholders.
- (22) Other non-current liabilities: under this heading will be included, among other items, liabilities for post-employment benefits due to employees or other long-term remuneration.
- (23) Profit/loss after tax of discontinued operations (net): under this heading the figure, net of tax, corresponding to the following items will be presented:
- (i) profit/loss after tax of discontinued operations, and
 - (ii) the profit after tax recognised by the valuation at fair value less cost of sale, or by sale or

disposal by other means, of assets or disposable groups of items constituting the discontinued operation.

- (24) Competent authority of a member state of the European Union: the authority designated by the home member state, as defined in article 2.1.m. of Directive 2003/71/EC of the European Parliament and of the Council of 4 November 2003 on the prospectus to be published when securities are offered to the public or admitted to trading.
- (25) Issues of securities in the money market: for the purposes of this Circular, these will be considered to be issues of securities that enjoy high liquidity, and at the same time that they are admitted for trading in an organised secondary market, whether official or not, that they are readily realisable securities and that their time to maturity is less than or equal to eighteen months.
- (26) Aggregation of issues or placements: the total outstanding balance on the date of this periodic published information will be aggregated, giving averaged values in the case of the interest rate, maturity and credit rating, or other values, provided they are more significant.
- (27) Transaction: one of the following keys will be entered, depending on the type of transaction: "E" for issues, "R" for redemptions, or "C" or cancellations.
- (28) Special purpose vehicle: any type of entity, belonging or not to the group to which the entity obliged to present periodic public information, created to achieve a specific purpose which is clearly defined beforehand (for example, to undertake a financial leasing operation, research and development activities or asset securitisation), whatever its legal form. Such entities are commonly subject to legal conditions imposing strict, and sometimes permanent, limits on the powers of their governing bodies, directors or managers over the activities of the entity.
- (29) Relationship (issues, redemptions or repayments of debentures): the type of relationship with the entity presenting the periodic public information will be stated: dominant company, dependent company, multigroup, associate, or any other entity that falls within the scope of consolidation.
- (30) ISIN (International Securities Identification Numbering system): the relevant ISIN number is to be entered in those issues with which there is an associated ISIN code. Otherwise, "N/A" is to be entered.
- (31) Guarantees given: the type of guarantee given is to be indicated, along with the entity giving it.
- (32) Guarantee that might have a material effect on the financial statements: for the purposes of this information, it will be considered that the exercise of the guarantee may have a material effect when the omission or erroneous inclusion of the impact of execution of the guarantee in the information provided could, individually or on an aggregate basis, influence the financial decisions of users of this information.
- (33) Relationship (third-party issues underwritten by the group): this is to include the type of relationship existing between the entity presenting the periodic public information or any entity included in the scope of consolidation, and the entity whose issue or placement has been underwritten, whatever it is. Where applicable, the relationship between the underwriting entity and the undertaken obliged to present periodic public information is to be stated.
- (34) Related parties: one party is considered to be related to another or a group acting in concert when it exercises or has the possibility of exercising, directly or indirectly, or by virtue of pacts or agreements between shareholders, control over the other or a significant influence in the financial and operational decision-making of the other.
The existence of control is presumed when any of the situations arise envisaged in article 4 of Law 24/1988, 28 July 1988, on the Stock market.
Significant influence is understood to mean influence enabling one party exercising to influence the financial and operational decisions of the other party, even though the former does not control the latter. For the purposes of this circular, evidence of influence is deemed to exist, unless demonstrated otherwise, in each of the following cases:
 - a) representation on the board of directors or equivalent governing body of the part-owned entity;
 - b) participation in the processes whereby policies are set, including decisions on dividends and other distributions;

- c) material transactions between the investor and the part-owned entity;
- d) exchange of management staff; or
- e) supply of essential technical information.

Without prejudice to the foregoing, when deciding whether significant influence may be deemed to exist, the cases envisaged in Directive 2002/87/EC, 16 December 2002, will be taken into account.

- (35) Related-party transactions: Order EHA/3050/2004, of 15 September 2004, considers related-party transactions to include all transfers of resources, services or obligations between related parties, regardless of whether there is any form of consideration. It shall not be necessary to report transactions between companies or entities belonging to the same consolidated group, provided that they have been eliminated in the process of preparing the consolidated financial information and that their purpose and the conditions under which they take place are such that they fall within the scope of the usual business of the companies or entities concerned. Nor shall it be necessary to report operations that, while being a part of the company's ordinary business, are carried out under normal market conditions and are immaterial, understood to be those which do not need to be reported in order to give a true and fair view of the company's equity, finances and earnings.
- (36) Information on related-party transactions is to be presented broken down under the headings established in section four of Order EHA/3050/2004, of 15 September 2004. For the purposes of section four letter C) of the aforementioned Order, only those transactions between related parties that affect the reporting entity or its group are to be reported.
- (37) Code and description of the transaction: at all events, the following types of related-party transactions should be reported. The associated codes are given in the table below:

Code	Transaction
001	Purchase of goods (finished and unfinished)
002	Sale of goods (finished and unfinished)
003	Purchases of tangible assets
004	Purchases of intangible assets
005	Purchases of financial assets
006	Sale of tangible assets
007	Sale of intangible assets
008	Sale of financial assets
009	Provision of services
010	Receipt of services
011	Collaboration contracts
012	Financial leasing contracts
013	Operating lease contracts
014	Research and development transfers
015	Licence agreements
016	Financing agreements: loans
017	Financing agreements: provision of capital (whether in cash or kind)
018	Financing agreements: other (specify)
019	Interest paid

033	Other (specify)

- (38) Aggregate (A) or Individualised (I) information: the information to include in the table may be aggregated in the case of items with similar content: Nevertheless, individual information must be provided regarding those transactions that are significant in view of the sums involved or their relevance for the proper understanding of the periodically published information. As regards whether a transaction is considered significant in view of the sums involved or their relevance for the proper understanding of the financial statements, the provisions of the fifth section of Order EHA/3050/2004, 15 September 2004, on the reporting of related party transactions, shall apply.
- Related-party transactions shall be considered to be significant due to the sums involved when they exceed the company's normal business and are significant from the standpoint of the parameters envisaged in Directive 2002/87/EC, 16 December 2002. At all events, for the purposes of this Circular, related-party transactions shall be considered significant on account of the sums involved when they need to be broken down in order for the financial information supplied to be properly understood.
- Moreover, transactions shall be considered relevant for the proper understanding of the periodically published information when members of the board of directors of the company or any group company are involved, directly or indirectly, provided such transactions are not part of the normal business of the company and are not carried out under normal market conditions.
- (39) Current (Curr.)/Previous(Prev.): period in which the transaction took place. Transactions taking place between the start of the current financial year and the date to which the periodic public information refers (Curr.) and those taking place before the start of the current financial year which have not yet expired (Prev.) must both be included.
- (40) Profit/loss: the accrued profit or loss is understood as the difference between the book value and the price at which the transaction took place.
- (41) Payment conditions and periods: if the information is presented in aggregate form it should be sorted by time remaining to maturity of the transaction, i.e. short term (s/t) or long term (l/t). If, on the other hand, the information is presented in individualised form, the time to maturity and the payment conditions of each specific transaction should be stated.
- (42) Related party or parties: in the case of individualised information, the name of the related party involved in the transaction, whether an individual or company, must be stated. It will not be necessary to complete this field if the information is presented in aggregate form.
- (43) Other aspects: in this section any information regarding pricing policies applied, guarantees given and received, or any other aspect of the transactions allowing them to be properly interpreted must be given. This is to include information about any transactions that have taken place under non-market conditions, and in the case of such transactions the profit or loss the reporting entity or its group would have registered if the transaction had taken place at market prices must be stated.

ANNEX EXPLAINING SIGNIFICANT EVENTS

XII - 1. Purchases or transfers of shares in the capital of companies listed on the Stock Exchange giving rise to the obligation to report pursuant to the Stock Market Act s. 53 (5% and multiples thereof)

Purchase by IBERDROLA PARTICIPAÇÕES SGPS, S.A. (100% owned by IBERDROLA PORTUGAL ELECTRICIDAD E GAS, S.A., 100% owned by IBERDROLA, S.A.), of 3.8% of the shares of the company ENERGIAS DE PORTUGAL, S.A. (EDP). Following this operation IBERDROLA S.A.'s percentage indirect interest in this company rose to 9.5%.

XII - 3. Other significant increases or reductions of fixed assets (stakes of over 10% in unlisted companies, significant investments in or divestments of fixed assets, etc)

Increase of the capital of NEOTEC CAPITAL RIESGO SOCIEDAD DE FONDOS S,A, S.C.R., in which IBERDROLA has a direct interest of 7.93%.

Ancillary contribution ("prestación accesoria") in IBERDROLA PORTUGAL ELECTRICIDAD E GAS, S.A. (100% owned by IBERDROLA, S.A.). IBERDROLA, S.A.'s indirect interest in this company was unchanged by this operation.

Increase in the capital of IBERDROLA DISTRIBUCIÓN DE GAS, SAU, by IBERDROLA, S.A. Following this operation the percentage of IBERDROLA, S.A.'s direct interest in this company remains unchanged. (Pending notarisation and entry on the register of companies)

Sale by IBERDROLA, S.A., of 100% of its interest in the company MEDIA PARK, S.A., to IBERDROLA INMOBILIARIA, S.A., (100% owned by IBERDROLA, S.A.), such that IBERDROLA, S.A.'s indirect interest in this company remains unchanged.

Purchase by VINZEO TECHNOLOGIES, S.A., (50% owned by CORPORACION IBV, PARTICIPACIONES EMPRESARIALES, S.A., in turn 50% owned by IBERDROLA, S.A.) of 100% of ARC, taking IBERDROLA, S.A.'s indirect interest in this company to 50%.

Sale by IBERDROLA INMOBILIARIA, S.A., (100% owned by IBERDROLA, S.A.) of 30% of FIUNA, S.A. reducing IBERDROLA, S.A.'s indirect interest in this company to 70%.

Increase in capital of MEDIA APPLICATIONS, S.A. (50% owned by MEDIA PARK, S.A. and 50% owned by IBERDROLA, S.A.), by capitalising a loan. Following this operation MEDIA PARK, S.A. owned 71.38% and IBERDROLA S.A. 28.62%, such that IBERDROLA S.A.'s direct and indirect interest in the company stood at 100%.

Purchase by IBERENOVA PROMOCIONES (100% owned by IBERDROLA ENERGÍA RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), of 100% of NATURENER, S.A., together with a change of its name to PARQUES EÓLICOS REUNIDOS, SAU, after which IBERDROLA's indirect interest in this company was 100%.

Increase in the capital of the German company IBERDROLA REGENERATIVE ENERGIEN GmbH (100% owned by IBERDROLA ENERGÍA RENOVABLES II, which is in turn 100% owned by IBERDROLA, S.A.). IBERDROLA, S.A.'s indirect interest in this company was unchanged by this operation.

Organisation by IBERDROLA ENERGÍA RENOVABLES II, (100% owned by IBERDROLA, S.A.), of the US company IBERDROLA RENEWABLE ENERGIES USA LIMITED, such that IBERDROLA's indirect interest in this company stands at 100%.

Supplementary contribution to AEOLIA PRODUÇÃO DE ENERGIA (100% owned by IBERDROLA ENERGÍA RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.). IBERDROLA, S.A.'s indirect interest in this company was unchanged by this operation.

Organisation by IBERDROLA INGENIERIA Y CONSTRUCCIÓN, S.A. (100% owned by IBERDROLA, S.A.), of the Polish company IBERDROLA ENGINEERING AND CONSTRUCTION POLAND SP. Z.O.O., such that IBERDROLA's indirect interest in this company stands at 100%.

Organisation by IBERDROLA INGENIERIA Y CONSTRUCCIÓN, S.A. (100% owned by IBERDROLA, S.A.), of the UK company IBERDROLA INGENIERIA Y CONSTRUCCIÓN UK LTD., such that IBERDROLA's indirect interest in this company stands at 100%.

Organisation by IBERDROLA INGENIERIA Y CONSTRUCCIÓN, S.A. (100% owned by IBERDROLA, S.A.), of the Russian company IBERDROLA INZHINIRING I STROITEISTVO LIMITED LIABILITY COMPANY, such that IBERDROLA's indirect interest in this company stands at 100%.

Purchase by IBERDROLA, S.A. of 10% of REFINERIA BALBOA, S.A., such that IBERDROLA S.A.'s direct interest in this company stands at 10%.

Increase in the capital of REINO DE DON QUIJOTE, S.A. (3.60% owned by IBERDROLA INMOBILIARIA, S.A. in turn 100% owned by IBERDROLA, S.A.), such that IBERDROLA S.A.'s indirect interest in this company stands at 3.86%.

Organisation by IBERDROLA INMOBILIARIA, (100% owned by IBERDROLA, S.A.), of IBERDROS, S.L., such that IBERDROLA S.A.'s indirect interest in this company stands at 50%.

Winding up of TELEMATICS, S.A., MEDIA PARK HANNOVER 2000, S.L. and MOTOR CHANNEL, S.A. (owned by MEDIA PARK which is 100% owned by IBERDROLA INMOBILIARIA, S.A., in turn 100% owned by IBERDROLA, S.A.), thereby cancelling IBERDROLA, S.A.'s indirect interest in said companies.

Organisation by IBERENOVA PROMOCIONES, S.A. (100% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), of GLOBAL SOLAR ENERGY, S.A., such that IBERDROLA's indirect interest in this company stands at 90%.

Purchase by IBERDROLA RENEWABLE ENERGIES OF UK LIMITED (100% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), of HIGHER DARRACOTT MOOR WIND FARM LIMITED, such that IBERDROLA S.A.'s indirect interest in this company stands at 100%.

Increase in the capital of IBERDROLA RENEWABLE ENERGIES USA, LIMITED (100% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), such that IBERDROLA S.A.'s indirect interest in this company is unchanged.

Purchase by IBERDROLA RENEWABLE ENERGIES USA LIMITED (100% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), of COMMUNITY ENERGY INC, such that IBERDROLA's indirect interest in this company stands at 100%.

Organisation by IBERENOVA PROMOCIONES, S.A. and IBERDROLA ENERGIAS RENOVABLES II, (100% owned by IBERDROLA, S.A.), of ELECTRA DE MALVANA S.A., with an interest of 0.001% and 44.999% respectively, such that IBERDROLA's indirect interest in this company stands at 45%.

Organisation by IBERENOVA PROMOCIONES, S.A. and IBERDROLA ENERGIAS RENOVABLES II, (100% owned by IBERDROLA, S.A.), of ELECTRA DE SIERRA DE SAN PEDRO, S.A., with an interest of 0.001% and 79.999% respectively, such that IBERDROLA's indirect interest in this company now stands at 80%.

Organisation by IBERENOVA PROMOCIONES, S.A. and IBERDROLA ENERGIAS RENOVABLES II, (100% owned by IBERDROLA, S.A.), of ELECTRA DE MONTANCHEZ, S.A., with an interest of 0.001% and 39.999% respectively, such that IBERDROLA's indirect interest in this company stands at 40%.

Organisation by IBERENOVA PROMOCIONES, S.A. and IBERDROLA ENERGIAS RENOVABLES II (both 100% owned by IBERDROLA, S.A.), of SISTEMAS ENERGETICOS LOS CAMPILLOS, S.A., each with a 50% interest, such that IBERDROLA's indirect interest in this company stands at 100%.

Increase in the capital of ENERGIA DE CASTILLA Y LEON (ENCALSA) (90% owned by BIOVENT HOLDING, 85% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), such that IBERDROLA S.A.'s indirect interest in this company is unchanged.

Organisation by ENERGIA DE CASTILLA Y LEON (ENCALSA) (90% owned by BIOVENT HOLDING, 85% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), of ECOBARCIAL, S.A., with a 51% interest. Following this operation IBERDROLA's indirect interest in this company is 39.02%.

Purchase by IBERDROLA REGENERATIVE ENERGIEN, GMBH (100% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), of 100% of the German company DELTUS, such that IBERDROLA, S.A.'s indirect holding in this company is 100%.

Increase in the capital of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA, S.A. (100% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), with the entry of new partners contributing their shareholding in the company EOLICAS DE LA RIOJA. As a result of this operation IBERDROLA ENERGIAS RENOVABLES II, S.A. now holds 63.5% of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA and this company holds 100% of EOLICAS DE LA RIOJA, such that IBERDROLA, S.A.'s indirect interest in this company is now 63.5%.

Increase in the capital of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA, S.A. (100% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), with the entry of new partners who contributed their interest in the company DESARROLLOS ENERGIA RENOVABLES DE LA RIOJA (DERSA). As a result of this operation IBERDROLA ENERGIAS RENOVABLES II, S.A. now holds 63.5% of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA and this company holds 63.75% of DESARROLLOS ENERGIA RENOVABLES DE LA RIOJA (DERSA) such that IBERDROLA, S.A.'s indirect interest in this company is now 40.48%.

Increase in the capital of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA, S.A. (100% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), with the entry of new partners who contributed their interest in the company MOLINOS DE CIDACOS. As a result of this operation IBERDROLA ENERGIAS RENOVABLES II, S.A. now holds 63.5% of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA and this company holds 50% of MOLINOS DE CIDACOS such that IBERDROLA, S.A.'s indirect interest in this company is now 31.75%.

Increase in the capital of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA, S.A. (100% owned by IBERDROLA ENERGIAS RENOVABLES II, in turn 100% owned by IBERDROLA, S.A.), with the entry of new partners who contributed their interest in the company MOLINOS DE LA RIOJA. As a result of this operation IBERDROLA ENERGIAS RENOVABLES II, S.A. now holds 63.5% of IBERDROLA ENERGIA RENOVABLES DE LA RIOJA and this company holds 66.66% of MOLINOS DE LA RIOJA such that IBERDROLA, S.A.'s indirect interest in this company is now 42.33%.

Organisation, through NEOENERGIA, S.A. (39% owned by IBERDROLA ENERGIA, S.A., in turn 100% owned by IBERDROLA, S.A.), of BAGUARI-UHE, such that IBERDROLA's indirect interest in this company stands at 39%.

Organisation, through NEOENERGIA, S.A. (39% owned by IBERDROLA ENERGIA, S.A., in turn 100% owned by IBERDROLA, S.A.), of GOIAS SUL PCH, such that IBERDROLA's indirect interest in this company stands at 39%.

Increase in the capital of TERMOAÇU, owned by NEOENERGIA, S.A. (39% owned by IBERDROLA ENERGIA, S.A., in turn 100% owned by IBERDROLA, S.A.). As NEOENERGIA, S.A. did not take part in the capital increase, its interest in TERMOAÇU has been diluted from 60.52% to 37.57%, such that IBERDROLA's indirect interest in this company now stands at 14.65%.

Organisation by IBERDROLA INGENIERIA Y CONSTRUCCIÓN, S.A. (100% owned by IBERDROLA, S.A.), of the Venezuelan company IBERDROLA INGENIERIA Y CONSTRUCCIÓN VENEZUELA, S.A., such that IBERDROLA's indirect interest in this company stands at 98%.

Organisation by IBERDROLA INGENIERIA Y CONSTRUCCIÓN, S.A. (100% owned by IBERDROLA, S.A.) of the Greek company IBERINCO HELLAS TECHNIKI KAI KATASKEVASTIKI EPE., such that IBERDROLA, S.A.'s indirect interest in this company is now 100%.

Organisation by IBERDROLA INGENIERIA Y CONSTRUCCIÓN, S.A. (100% owned by IBERDROLA, S.A.), of the American company IBERINCO ENGINEERING AND CONSTRUCTION, US, INC., such that IBERDROLA, S.A.'s indirect interest in this company is now 100%.

XII - 6. Changes of Directors or of the Board of Directors

The resolutions of the General Shareholders' Meeting of 30 March 2006 include those transcribed below:

RESOLUTIONS CONCERNING POINT TEN

(Point ten on the Agenda)

- Ratification of the appointment of the board members co-opted since the last general shareholders' meeting was held:
 - a) Ratification of the appointment as director of Mr Xabier de Irala Estévez, agreed by the Board of Directors at its meeting on 20 April 2005.
 - b) Ratification of the appointment as director of Mr Jesús María Cadenato Matía, agreed by the Board of Directors at its meeting on 20 April 2005.

The General Shareholders' Meeting, at the proposal of the Board of Directors, adopted the following resolutions:

a) To ratify, in pursuance of s. 138 of the Consolidated Text of the Corporations Act (*Ley de Sociedades Anónimas*) and Art. 48.3 of the Articles of association, the appointment by co-option by the Board on 20 April 2005 of Mr XABIER DE IRALA ESTÉVEZ as Director. This appointment was made by a resolution of the board, ratified in full by the General Meeting. The text of the resolution was as follows:

"5.- To appoint to the Board of Directors by co-option, pursuant to s. 138 of the Consolidated Text of the Corporations Act (*Ley de Sociedades Anónimas*) and Art. 48.3 of the Articles of association, at the proposal of the Board of BBK, shareholder of Iberdrola, S.A., and subject to approval or ratification at the first general shareholders' meeting to be held, the individual shareholder Mr XABIER DE IRALA ESTÉVEZ, of full age, married, Spanish nationality, resident for these purposes at Gran Vía nº 30, Bilbao, tax identification number 04.847.996-X, to fill the vacancy on the board left by Mr SANTIAGO MAYNER OYARBIDE. The new member of the board shall be classed as an external proprietary director, and shall hold his office until 16 June 2006, as corresponded to the former board member Mr SANTIAGO MAYNER OYARBIDE, whom he replaces.

The Board of Directors expressly recognises the acceptance by Mr XABIER DE IRALA ESTÉVEZ, being present in person, of his appointment as a member of the Board of Directors of the company and his declaration that he is not prevented by any legal prohibitions or incompatibilities from holding this office.

Thus, the formal acceptance by Mr XABIER DE IRALA ESTÉVEZ of the content of Article 17 of the Regulations of the Board of Directors on the Dismissal and Resignation of Directors, and the obligation envisaged in article 49 of the company's articles of association on the obligation to attest to the pledging of ten thousand (10,000) shares as a guarantee against possible liability incurred in the post is hereby minuted and the secretary of the board has given him a copy of the company's articles of association and the regulations that govern it."

b) To ratify, in pursuance of s. 138 of the Consolidated Text of the Corporations Act (*Ley de Sociedades Anónimas*) and Art. 48.3 of the Articles of association, the appointment by co-option by the Board on 20 April 2005 of Mr JESÚS MARÍA CADENATO MATÍA as Director. This appointment was made by a resolution of the board, ratified in full by the General Meeting. The text of the resolution was as follows:

"6.- To appoint to the Board of Directors by co-option, in pursuance of s. 138 of the Consolidated Text of the Corporations Act (*Ley de Sociedades Anónimas*) and Art. 48.3 of the Articles of association, at the proposal of the Board of BBVA, shareholder of Iberdrola, S.A., and subject to approval or ratification at the first general shareholders' meeting held, the individual shareholder Mr JESÚS MARÍA CADENATO MATÍA, of full age, married, Spanish nationality, resident for these purposes at Paseo de la Castellana nº 81, Madrid, tax identification number 14.917.785-P, to fill the vacancy on the board left by Mr JOSÉ ANTONIO FERNÁNDEZ RIVERO. The new member of the board shall be classed as an external proprietary director, and shall hold his office until 16 June 2006, as corresponded to the former board member Mr JOSÉ ANTONIO FERNÁNDEZ RIVERO, whom he replaces.

The Board of Directors expressly recognises the acceptance by Mr JESÚS MARÍA CADENATO MATÍA, being present in person, of his appointment as a member of the Board of Directors of the company and his declaration that he is not prevented by any legal prohibitions or incompatibilities from holding this office.

Thus, the formal acceptance by Mr JESÚS MARÍA CADENATO MATÍA of the content of Article 17 of the Regulations of the Board of Directors on the Dismissal and Resignation of Directors, and the obligation envisaged in article 49 of the company's articles of association on the obligation to attest to the pledging of ten thousand (10,000) shares as a guarantee against possible liability incurred in the post is hereby minuted and the secretary of the board has given him a copy of the company's articles of association and the regulations governing the company."

- At its meeting on 26 April 2006 the Board of Directors unanimously adopted the following resolutions:

1- To accept the resignation from the post of director, with immediate effect, of the following directors: Mr IÑIGO DE ORIOL YBARRA, Mr JOSE ANTONIO GARRIDO MARTINEZ, Mr JAVIER HERRERO SORRIQUETA and Mr IGNACIO DE PINEDO CABEZUDO.

2.- To execute and carry out the resolution adopted by the board of directors at its meeting on 20 April 2005, of which the National Securities Market Commission (CNMV) was notified that same day (entry register number 2005 035264), by virtue of which Mr JOSÉ IGNACIO SÁNCHEZ GALÁN was appointed chairman of the board, replacing Mr IÑIGO DE ORIOL YBARRA, while remaining chief executive officer and resigning as deputy chairman, all of which he accepted.

3.- To execute and carry out the resolution referred to in section 2 above, by virtue of which it was agreed, when the vacancy arose, that the individual shareholder Mr IÑIGO VÍCTOR DE ORIOL IBARRA should be co-opted to the board of directors, subject to approval or ratification at the first general shareholders' meeting to be held, and that he should be classified as an "other external director". The afore-named party accepted the post.

4.- Execute and carry out the resolution of the Board of Directors at its meeting on 22 June 2005, of which the CNMV was notified on that same day (entry register number 2005 066734), by virtue of which the director Mr XABIER DE IRALA ESTÉVEZ, as president of BBK, a long-standing key shareholder in IBERDROLA, should fill the first vacancy arising on the board of directors' executive committee. As a result, vacancies having arisen on the executive committee due to the resignation of the directors mentioned in section 1 above, Mr XABIER DE IRALA ESTÉVEZ was appointed to the executive committee. He accepted the appointment and resigned his position as a member of the audit and compliance committee.

- At its meeting on 24 May 2006 the Board of Directors unanimously adopted the following resolutions:

1- To accept the resignation from the post of director, with immediate effect, by the following directors: Mr CÉSAR DE LA MORA ARMADA, Mr ANTONIO GARAY MORENÉS and Mr ANTONIO M^a DE ORIOL Y DIAZ-BUSTAMANTE.

2.- To appoint the independent directors Messrs JUAN LUIS ARREGUI CIARSOLO and VICTOR DE URRUTIA VALLEJO as vice presidents of the company.

3.- To appoint the independent directors Messrs JULIO DE MIGUEL AYNAT –as secretary- and SEBASTIAN BATTANER ARIAS as members of the Audit and Compliance Committee.

4.- To appoint Mr JULIAN MARTINEZ-SIMANCAS SANCHEZ as deputy secretary of the Board of Directors of the company.

- At its meeting on 7 June 2006 the Board of Directors unanimously adopted the following resolutions:

1.- To accept the resignation from his post of director and member of the executive committee of proprietary director Mr JESÚS MARÍA CADENATO MATÍA with immediate effect.

2.- To appoint as members of the board of directors, by co-option and subject to approval or ratification at the first general shareholders' meeting to be held, the individual shareholders Ms INÉS MACHO STADLER, Mr BRAULIO MEDEL CÁMARA and Mr JOSÉ CARLOS PLA ROYO, who, once their acceptance has been minuted in the manner envisaged in article 142 of the company regulations, shall be classified as "independent directors", in the case of the first two, and "proprietary director" in the case of the latter, who is proposed by BBVA, a shareholder in "Iberdrola, S.A."

3.- To appoint Mr JOSÉ CARLOS PLA ROYO to the executive committee once his acceptance of being classed a "proprietary director" has been minuted.

XII -7. Modifications to the Articles of association

The resolutions of the General Shareholders' Meeting of 30 March 2006 include those transcribed below:

RESOLUTIONS CONCERNING POINT THREE (Point three on the Agenda)

- Modification of specific articles of the articles of association and the regulations of the general shareholders' meeting:
 - a) Modification of article 19 of the articles of association and article 8 of the regulations of the general shareholders' meeting, in order to adapt the drafting of each to the provisions of the first final provision of Law 19/2005, 14 November 2005, on European joint-stock companies domiciled in Spain, as regards the extension of the deadline for publication of the announcement of a general shareholders' meeting and the right of shareholders to request the publication of a supplement to the announcement including new points on the agenda.
 - b) Modification of article 22 of the articles of association and article 10 of the regulations of the general shareholders' meeting in order to eliminate the requirement concerning the minimum number of shares required in order to be entitled to attend the general shareholders' meeting.

The General Shareholders' Meeting, at the proposal of the Board of Directors, adopted the following resolutions:

- a) To approve the new text of article 19 of the articles of association, and article 8 of the regulations of the general shareholders' meeting, in order to adapt them both to the provisions of the final first provision of Law 19/2005, 14 November 2005, under the terms described below:

Articles of Association

"Article 19. Calling the General Shareholders' Meeting

1. *The general shareholders' meeting must be formally called by the board of directors by means of an announcement published in the official gazette of the register of companies (Boletín Oficial del Registro Mercantil) and in one of the newspapers with the broadest circulation in Vizcaya at least **one month** before the date set for it to be held, except in those cases where the Law establishes a different period of advanced notice, in which case, this latter is to be followed.*

2. *The Board of Directors shall be obliged to call a General Shareholders' Meeting in the following cases:*
 - a) *In the circumstances envisaged in the first section of the eighteenth article of the articles of association.*
 - b) *If shareholders holding or representing the percentage of the company's share capital stated in the Law ask for a meeting in writing, indicating in their request the matters they wish to be discussed. In this case, the Board of Directors shall call General Shareholders' Meeting within thirty (30) days of being notified by a notary of the requirement to do so. The Board of Directors shall draw up the Agenda, and shall be obliged to include on it those matters that were stated in the request for a meeting.*
 - c) *When a takeover bid is made for the shares issued by the company, in order to inform the General Shareholders' Meeting about the takeover bid and discuss and decide on the subjects put before the meeting for its consideration. Any shareholder owning voting shares representing at least one per cent (1%) of the company's share capital shall be entitled to request the inclusion of matters on the Agenda of the General Shareholders' Meeting that must be called for this purpose.*
3. *The announcement must contain all the notices required by the Law, depending on the circumstances, and at all events, must state the date, time and place of the first session of the meeting and all the matters that are to be discussed. It may also state the date on which the second session of the meeting will be held, if applicable.*
4. *Shareholders representing at least five per cent (5%) of the company's share capital may request that a supplement to the announcement of the General Shareholders' Meeting be published with the addition of one or more points to the Agenda. This right may only be exercised if notice is received at the company's registered offices by reliable means not more than five (5) days after the publication of the announcement of the meeting. The supplementary notice must be published not less than fifteen (15) days before the date set for the meeting.*
5. *The General Shareholders' Meeting may not discuss nor decide upon matters that are not on the Agenda."*

Regulations of the General Shareholders' Meeting.

"Article 8. Calling the General Shareholders' Meeting

1. *In accordance with the provisions of the Articles of Association, the General Shareholders' Meeting must be formally called by the board of directors by means of an announcement published in the official gazette of the register of companies (Boletín Oficial del Registro*

Mercantil) and in one of the newspapers with the broadest circulation in Vizcaya at least **one month** before the date set for it to be held, except in those cases where the Law establishes a different period of advanced notice, in which case, this latter is to be followed.

2. The Board of Directors shall be obliged to call a General Shareholders' Meeting in the following cases:
 - a) In the circumstances envisaged in section two of article six above.
 - b) In the event that shareholders holding or representing the percentage of the company's share capital stated in the Law ask for a meeting in writing, stating in their request the matters they wish to address. In this case, the Board of Directors shall call General Shareholders' Meeting within thirty (30) days of being notified by a notary of the requirement to do so. The Board of Directors shall draw up the Agenda, and shall be obliged to include on it those matters that were stated in the request for a meeting.
 - c) When a takeover bid is made for the shares issued by the company, in order to inform the General Shareholders' Meeting about the takeover bid and discuss and decide on the subjects put before them for their consideration. Any shareholder owning voting shares representing at least one per cent (1%) of the company's share capital shall be entitled to request the inclusion of matters on the Agenda of the General Shareholders' Meeting that must be called for this purpose.
3. The announcement calling the meeting must contain all the notices required by the Law, depending on the circumstances, and at all events, must state the date, time and place of the first session of the meeting and all the matters that are to be discussed. It may also state the date on which the second session of the meeting will be held, if applicable.
4. The company shall send a copy of the announcement of the meeting to the National Securities Market Commission (CNMV). The text of the announcement will also be accessible on the company's website.
5. As of the date on which the announcement of the calling of the meeting is published, all the information considered to be of use to shareholders to facilitate their attendance at the meeting and participation in it will be posted on the company's website. This will include at least the following:
 - a) Documents relating to the General Shareholders' Meeting that are required by law, with information about the Agenda, proposals made by the Board of Directors, and any relevant information shareholders may need in order to cast their votes.

- b) *The channels of communication between the company and its shareholders, and in particular, the explanations shareholders need in order to exercise their right to obtain information, indicating the postal and e-mail addresses they may use to do so.*
 - c) *The means and procedures for granting representation at the General Shareholders' Meeting.*
 - d) *The means and procedures enabling remote voting, including, where applicable, the means to prove attendance and voting at the general shareholders' meeting by telematic means.*
6. *Shareholders representing at least five per cent (5%) of the company's share capital may request that a supplement to the announcement of the General Shareholders' Meeting be published including one or more points on the Agenda. This right may only be exercised if notice is received at the company's registered offices by reliable means not more than five (5) days after the publication of the announcement of the meeting. The supplementary notice must be published not less than fifteen (15) days before the date set for the meeting.*
7. *The Board of Directors may require that a notary be present at the General Shareholders' Meeting and take the minutes of the meeting. It must do so when the circumstances envisaged in the Law apply."*
- b) *Modification of article 22 of the Articles of Association and article 10 of the Regulations of the General Shareholders' Meeting in order to eliminate the requirement concerning the minimum number of shares required in order to be entitled to attend the general shareholders' meeting.*

Articles of Association

"Article 22. Right to attend

1. *All holders of voting shares may attend the General Shareholders' Meeting, take part in its deliberations, speak and vote.*
2. *In order to exercise their right to attend the meeting, shareholders must have their shares registered in their name in the corresponding book entry register at least five (5) days before the date of the General Shareholders' Meeting. Proof of this fact must be given by the relevant attendance card or certificate of validity issued by the institution or institutions responsible for maintaining the book entry register, or in any other form accepted by the legislation in force.*
3. *The members of the Board of Directors must attend General Shareholders' Meetings. Managers, technical staff and others who have an interest in the proper functioning of the company's business may be authorised by the Board of Directors to attend the General Shareholders' Meeting. The non-attendance of any of the foregoing shall not affect the validity of the General Shareholders' Meeting.*

4. *The chairman may allow the press, financial analysts and any other people he sees fit, access to the General Shareholders' Meeting. However, the General Shareholders' Meeting may revoke this authorisation.*

Regulations of the General Shareholders' Meeting.

"Article 10. Right to attend

1. *All holders of voting shares may attend the General Shareholders' Meeting, take part in its deliberations, speak and vote.*
2. *In order to exercise their right to attend the meeting, shareholders must have their shares registered in their name in the corresponding book entry register at least five (5) days before the date of the General Shareholders' Meeting. Proof of this fact must be given by the relevant attendance card or certificate of validity issued by the institution or institutions responsible for maintaining the book entry register, or in any other form accepted by the legislation in force."*

XII - 9. Changes in the institutional regulations governing the sector with a material effect on the Company or Group's economic or financial position

The following legislation was published prior to 30 June 2006 which could have a significant impact on the electricity and gas sectors:

ELECTRICITY SECTOR

- ROYAL DECREE-LAW 3/2006, 24 February 2006, modifying the mechanism for matching offers for sale and purchase of energy submitted simultaneously to the daily and intraday production market by electricity sector entities belonging to the same business group.
- Correction of errors in Royal-Decree Law 3/2006, 24 February 2006.

The current provision treats as bilateral physical contracts, prior to the programme resulting from matching in the daily market (before the error was corrected this indicated those "being prior to matching on the daily market") those quantities of energy that coincide with the sale and purchase presented and matched by the aforementioned subjects, such that only these subjects might participate in the programme resulting from matching with the net position of the group to which they belong (before the correction this was "can only participate in matching the net position").

Pursuant to this law, only offers for sale under the ordinary regime and offers to buy made by distributors will be included. As regards the settlement of activities regulated by the CNE in 2006, the provisional price applicable to distributors for buying energy under this assimilation mechanism was 42.35 €/MWh.

Also, due to the internalisation of the value of greenhouse gas emission rights in the formation of prices in the wholesale electricity market, this Royal Decree reduces the payment to affected generating units by an equivalent amount. Moreover, the large tariff deficit produced in the period from 2006 makes it advisable to discount the value of emissions rights for the purposes of determining the size of this deficit.

- ROYAL DECREE-LAW 4/2006, 24 February 2006, modifying the functions of the CNE.

This Royal Decree-Law modifies the functions of the CNE, amending the text of the eleventh additional provision of Law 34/1998, 7 October 1998, on the Hydrocarbons sector, to correct what was seen as a double inadequacy.

Thus, it expands the fourteenth function of the CNE in terms of an expansion of the range of purchases that require its authorisation: "purchase of shareholdings by companies with activities that are considered regulated or activities which are subject to administrative intervention implying a special relationship of control" (nuclear power stations, coal-fired power stations, activities affecting the electricity systems on the islands and elsewhere outside mainland Spain, gas storage or transport involving international gas pipelines terminating in or travelling through Spain). This same authorisation will be required when the assets required for such activities are bought directly.

Moreover, as regards the refusal of this authorisation, due to the existence of significant risks, a clause has been added on the "protection of the general interest in the energy sector and, in particular, the guarantee of an adequate maintenance of the goals of policy in the sector, with particular application to assets considered to be of a strategic nature."

- ORDER ITC/913/2006, 30 March 2006, approving the method of calculating the cost of each of the fuels used and the procedure for despatch and settlement of energy in the electricity systems on the islands and elsewhere outside mainland Spain.

Summarised together with the following order.

- ORDER ITC/914/2006, 30 March 2006, establishing the method for the calculation of the remuneration for guaranteed power generation for facilities generating electricity under the ordinary regime for electrical systems on the islands and elsewhere outside mainland Spain.

These two orders implement RD 1747/2003 regulating the electricity system outside mainland Spain. As they implement the Royal Decree they in no way modify its content. Therefore the characteristics of the system of payment for activities, their development and basic operations are:

- Regulated payments of costs of investment under the power guarantee heading
- Right of facilities envisaged in the plans to charge for the power guarantee
- Despatch at standard costs
- Interim payments of distributors and marketers at the market price on the peninsula
- The CNE makes final settlement of remuneration regulated by these ministerial orders.

The ministerial orders enable the provisional 2001-2005 cycle to be closed, fundamentally based on accounting costs, and laying the foundations for future standards-based remuneration. All the foregoing relates to electricity generation and does not go into the valuation of transport and distribution activities.

The despatch and settlement methodology enables the grid operator, REE, to start performing the functions given to it in the Royal Decree and settle the price of energy sold as of the time of its publication.

- RESOLUTION of 17 March 2006 from the General Secretariat for Energy, approving Operating Procedures 4.1 "Resolution of congestion on the France-Spain interconnection" and 3.1 "Generation scheduling" in order to adapt them to Order ITC/4112/2005, 30 December 2005.

For this provision procedure P.O. 4.1 was approved, implementing the process to resolve the congestion on the France-Spain interconnection by means of a system of explicit coordinated auctions (Phase I) established in annex I of Order ITC/4112/2005, 30 December 2005, which

established the regime applicable to the intracommunity and international exchange of electrical power.

Moreover, Red Eléctrica de España, S. A. is empowered to take part in the explicit capacity auctions on the France-Spain interconnection in order to buy the exchange capacity necessary to perform the contracts of electricity supply between EDF and REE, referred to in the ninth transitional provision of Law 54/1997.

The resolution also approves P.O.3.1, establishing the daily scheduling process for generation from the matching of buy and sell orders for electricity arising from the day and intraday markets and notification of execution of bilateral contracts for physical delivery, so as to guarantee that demand is met and the system is secure.

- RESOLUTION of 16 February 2006 by the National Energy Commission establishing the lists of main and dominant operators in the energy sector for the purposes of the provisions of article 34 and the third additional provision of Royal Decree-Law 6/2000, 23 June 2000.

This Resolution also affects the gas sector, hence it is not mentioned in the corresponding section of this report.

The list of main operators considers the structure of the groups of companies existing at the time it was drawn up. The list is shown below, together with that of the previous year, so changes can be observed:

Main operators in the electricity sector		
	2005	2006
1	Grupo Endesa	Grupo Endesa
2	Grupo Iberdrola	Grupo Iberdrola
3	Grupo Unión Fenosa	Grupo Unión Fenosa
4	Grupo Hidrocantábrico	Grupo Hidrocantábrico
5	Grupo Red Eléctrica	Viesgo Generación, S.L.

Main operators in the gaseous hydrocarbons sector		
	2005	2006
1	Grupo Repsol YPF-Gas Natural	Grupo Repsol YPF-Gas Natural
2	Grupo Enagas	Grupo Iberdrola
3	Grupo Hidrocantábrico-Naturgas	Grupo BP España
4	Grupo Iberdrola	Grupo Hidrocantábrico-Naturgas
5	Grupo BP España	Grupo Endesa

- ROYAL DECREE 470/2006, 21 April 2006, modifying the percentage of the electricity tariff considered under the nuclear moratorium to be a cost with a specific allocated purpose.

The cost with a specific allocated purpose under the nuclear moratorium is set at 0.33 per cent of the electricity tariff.

- ROYAL DECREE-LAW 7/2006, 23 June 2006, on the adoption of urgent measures in the energy sector.

The measures envisaged for the electricity sector are:

- Elimination of the CTCs as they are felt to be ineffective and unnecessary today. Their elimination allows the contributions envisaged for this item up until 2010 to be reinvested to benefit consumers. CTCs are considered inefficient as they distort prices and they were calculated based on hypotheses that are currently out-of-date. They are considered unnecessary because their degree of depreciation, as recently attested by the CNE, is very high.

- A system of incentives is established for the use of domestically produced coal, under which, for reasons of security of supply, the government is empowered to set up a system of premiums up to a maximum limit of 10€/MWh. This system defines the mechanism whereby these premiums are modified depending on how prices in the electricity generating market evolve.
- In line with the EU's directives, energy efficiency is being bolstered through cogeneration, using a series of measures such as eliminating the need for cogenerators to use their own electricity by paying a premium on all the electricity produced rather than only on the surplus, thereby eliminating the asymmetry that existed previously.
- Updating the system of premiums set out in the Law by establishing the possibility that all plants will be paid a supplement in the form of a premium over the market price.
- Eliminating the remuneration band for renewable energy facilities of between 80% and 90% of the average reference tariff, as in some cases it prevents compensation from being sufficient for various technologies to be developed.
- Eliminating the limits imposed on the tariff methodology when the average or reference tariff is revised (currently stipulated at a maximum of 1.4% plus an additional 0.6% for deviations).
- Decouple the changes in premiums and prices of facilities operating under the special regime from the most recent increase in the average or reference electricity tariff envisaged for July.
- In order to have a mechanism with which to enable the alternative of bilateral contracting by specific groups of consumers, the medium and long-term contracting period resulting from virtual auctions, which currently has an upper limit of twelve months, is extended.

The measure envisaged for the gas sector is to give equal treatment to all operators storing gas. In order to ensure stability of supply, a provision has been added that guarantees this equality. Specifically, the generally applicable chronological criterion is replaced by a system of distribution based on objective and transparent criteria, and in particular, the previous year's percentage of sales. This provision will allow the use of capacity assignment mechanisms that are better suited to the current needs of the system, allowing optimisation of the existing infrastructure and avoiding monopolistic situations.

- ROYAL DECREE 777/2006, 23 June 2006, modifying Royal Decree 1866/2004, 6 September 2004, approving the national emission rights allocation plan for 2005-2007.

The reform of the national emission rights allocation plan (PNA) centres on modifying the table in point 3 of the plan that sets out the allocation to the various sectors of industry. Thus:

1. The volumes of rights and the categories of activities are adapted to the expanded scope of Law 1/2005, following the modifications made by Royal Decree-Law 5/2005, 11 March 2005.
2. The volume reserved for new entrants is unified.
3. The upper limits on allocations to each sector are increased, with the corresponding reduction in the volume reserved, in those sectors in which facilities are included with respect to which replacement resources have been considered.

- ROYAL DECREE 774/2006, 23 June 2006, modifying the regulations on special taxes approved by Royal Decree 1165/1995, 7 July 1995.

Law 22/2005, 18 November 2005, transposing into Spanish law various community directives on the taxation of energy products and electricity, and on the tax system applicable to parent companies and subsidiaries in different member states, and regulating the tax system applicable to cross-border contributions to pension funds within the European Union, made modifications to Law 38/1992, 28 December 1992, on special taxes, which in turn required the adaptation of the precepts of the regulation on special taxes, approved by Royal Decree 1165/1995, 7 July 1995.

- ROYAL DECREE 809/2006, 23 June 2006, revising the electricity tariff as of 1 July 2006.

This Royal Decree establishes the average increase in the average or reference tariff for the sale of electricity after 1 July 2006, setting the increase at 1.38% more than that coming into force on 1 January 2006, and applying it to the tariff structure in force, as the result of increasing the costs in the amount corresponding to the annual payment needed to recoup linearly the net annual value over 14 and a half years the deficit in income in the settlement of regulated activities generated between 1 January 2005 and 31 December 2005, which total 3,810,520 thousand euros.

The value of the average or reference tariff is set at 7.7644 €/kWh.

The tariffs for the sale of electricity applied by distributors increase on average overall by 2.07% and the tariffs for access to transport and distribution grids remain unchanged.

- ORDER ITC/2129/2006, 30 June 2006, regulating forward contracts on electricity by distributors in the second half of 2006.

This order sets out to establish, for the transitional period of the second half of 2006, the obligations of distributors to contract for electricity in the forward market managed by OMIP-OMIClear.

Other provisions of lesser interest are:

- Resolution of 8 February 2006, approving rules for the registration, valuation and notification of greenhouse gas emission rights.

This resolution implements aspects relating to the accounting treatment of emission rights covered by Law 1/2005, 9 March 2005, regulating the regime for the trading of greenhouse gas emission rights and is also set within the framework of the implementation of the national chart of accounts, approved by Royal Decree 1643/1990, 20 December 1990.

- RESOLUTION of 7 April 2006, by the General Secretariat for Energy, approving operating procedures 8.1 "Definition of grids operated and monitored by the system operator" and 8.2 "Operation of the production and transport system."

Two operating procedures are approved in this resolution. In 8.1 the grid which the OS is responsible for operating is defined, as are the installations of other grids whose structural details and real time functional variables need to be known in order to guarantee the security and reliability of the operation of the system.

P.O. 8.2 establishes the basic criteria that will govern the OS's actions in relation to the operation of the system of production and transport for which it is responsible for providing the technical management. It therefore deals with the obligations and actions of all subjects to which this procedure applies.

- RESOLUTION of 28 April 2006, by the General Secretariat for Energy, approving a set of technical and instrumental procedures required for the adequate technical management of the electricity systems on the islands and elsewhere outside mainland Spain.

- RESOLUTION of 11 May 2006, by the General Secretariat for Energy, modifying certain rules of operation of the energy production market.

In this provision modifications were published to the text of the rules of functioning of the market for the production of electricity so as to include appropriately the content of annex II of RD 1454/05, 2 December 2005, which modified certain provisions relating to the electricity sector, and the content of Instruction 1/2006 describing the procedure for application of the first paragraph of article 4 section 3 of Order ITC/4112/2005, establishing the regime applicable to intracommunity and international exchanges of electricity.

- RESOLUTION of 18 May 2006 by the General Secretariat for Energy, modifying the resolution of 17 March 2006 approving Operating Procedures 4.1 "Resolution of congestion on the France-Spain interconnection" and 3.1 "Generation scheduling" in order to adapt them to Order ITC/4112/2005, 30 December 2005.

Bearing in mind the agreement reached with the French energy regulating commission (CRE) regarding the rules for assigning capacity for the France-Spain interconnection (IFE rules), which envisage the implementation on 1 June of a coordinated system of explicit annual, monthly, daily and intraday auctions, this resolution modifies that of 17 March in order to proceed with the application of the coordinated auctions in June.

- RESOLUTION of 24 May 2006, by the General Secretariat for Energy, approving rules of operation of the daily and intraday energy production market.

This resolution includes the rules in a single text in order to systematise them better and reduce their complexity, given the successive modifications they have undergone in the past.

- RESOLUTION of 7 April 2006, by the CNE, modifying the resolution of 26 February 2004, establishing the application of the procedure for the presentation of the self-assessed settlement and the conditions for payment of the fees established in the twelfth additional provision, 2nd and 3rd paragraph, of Law 34/1998, 7 October 1998, in relation to the electricity and gaseous hydrocarbons sector.

- ORDER ITC/1652/2006, 20 April 2006, declaring the definitive cessation of operation of the José Cabrera Nuclear Power station (Guadalajara) and establishing the conditions under which activities at the plant are to take place until its decommissioning is authorised.

- ORDER EHA/1094/2006, of 6 April 2006, implementing the specialities applicable to official secondary markets for derivative financial instruments on energy.

In accordance with the Final Provision of Royal Decree 1814/1991, 20 December 1991, the aim of this order is to regulate the specialities that, with respect to the rules established in a general way for official secondary markets for financial futures and options, will be applicable to official secondary markets for financial futures and options on energy.

GAS SECTOR

- RESOLUTION of 13 March 2006, by the Directorate-General for Energy Policy and Mines, establishing the detailed protocol for the rules for the technical management of the gas system.

This resolution published the following detailed protocols relating to the technical management of the gas system:

- PD-01. Measurement.
- PD-02. Procedures for distribution.
- PD-03. Forecasting demand.
- PD-04. Communication mechanisms.
- PD-05. Procedure for determining the energy unloaded by methane ships.
- PD-06. Operating rules for the activities involved in unloading methane ships.

- RESOLUTION of 29 March 2006 by the Directorate-General for Energy Policy and Mines, publishing the new maximum prices for the sale of natural gas for use as a raw material.

- RESOLUTION of 26 April 2006 by the Directorate-General for Energy Policy and Mines, publishing the new maximum prices for the sale of natural gas for use as a raw material.
- RESOLUTION of 29 May 2006 by the Directorate-General for Energy Policy and Mines, publishing the new maximum prices for the sale of natural gas for use as a raw material.
- ROYAL DECREE-LAW 7/2006, 23 June 2006, on the adoption of urgent measures in the energy sector.
This provision was discussed in the section on the electricity sector.
- RESOLUTION of 26 June 2006 by the Directorate-General for Energy Policy and Mines, publishing the new maximum prices for the sale of natural gas for use as a raw material.

XII – 14. Other significant events

On 9 January 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

“We are pleased to inform you that IBERDROLA has purchased from Naturener 100% of its subsidiary Naturener Eólica, which has 280 megawatts (MW) power generating capacity at an advanced state of implementation in the autonomous regions of Castilla-La Mancha, Andalusia and Castilla-León”...

On 9 January 2006, the National Securities Market Commission was sent the following notification:

“The company sends a note on Iberdrola Portugal’s position regarding EDP, Galp and the reorganisation of the Portuguese electricity sector.”

On 18 January 2006, the National Securities Market Commission was sent the following notification:

Iberdrola and Gamesa, through the consortium Nuevas Energías Ibéricas, in which the Portuguese companies Visabeira, Alberto Mesquita, MECI and Galucho are also present, have today submitted plans in Lisbon for the construction of five wind turbine generating system manufacturing plants, involving a considerable investment.

On 27 January 2006, the National Securities Market Commission was sent the following notification:

“Iberdrola wishes to inform you that the profit and loss figures for the 2005 financial year (unaudited) will be submitted to the National Securities Market Commission and the stock exchange governing bodies on Thursday 9th February 2006 before the markets open (9.00 a.m. Madrid time).

A presentation will be held on the same day in Madrid.”

On 1 February 2006, the National Securities Market Commission was sent the following notification:

"We are please to inform you that, in compliance with the resolution of the Board of Directors, IBERDROLA will be offering its employees, for the second consecutive year, the possibility of receiving part of their variable remuneration in the form of shares. These shares will be distributed in March 2006." ...

On 3 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

"Resolution of the Council of Ministers whereby, in accordance with the provisions of letter b) of article 17 of Law 16/1989, 17 July 1989, on the defence of competition, it has been decided to subordinate observance of the conditions of approval of the economic concentration operation consisting of the exclusive takeover of control of Endesa, S.A. by Gas Natural SDG, S.A."

On 3 February 2006, the National Securities Market Commission was sent the following notification:

Iberdrola sends a press release concerning the government's decision on Gas Natural's takeover bid for Endesa.

On 6 February 2006, the National Securities Market Commission was sent the following notification:

The company announces that the presentation of the profit and loss figures for the 2005 financial year will be put back half an hour: 9/02/06 at 9.30 a.m.

On 9 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

The company reports on its second half 2005 earnings.

On 9 February 2006, the National Securities Market Commission was sent the following notification:

The company sends herewith a presentation on its second half 2005 earnings.

On 22 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

"We are please to inform you that the board of directors of IBERDROLA has today unanimously passed the following resolutions:

I. To formulate the annual accounts, management report and proposed distribution of profits, and the consolidated annual accounts and management report, all referring to the 2005 financial year.

II. To call a general shareholders' meeting to be held on 29 and 30 of March, first and second sessions, respectively, with the following agenda..."

On 23 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

The company sends herewith its Annual Report on Corporate Governance for 2005.

On 24 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

"Further to our notification of 22 inst., please find enclosed copies of the documents relating to the annual shareholders' meeting (hardcopy and scanned on a CD), which are made available to shareholders as of 24 February on its web site and at its registered office, as indicated in the

announcement of the calling of the meeting. The Commission has already received the Report on Corporate Governance.” ...

On 28 February 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

“We send you herewith the corrected text of the resolution concerning point nine on the agenda of the general shareholders' meeting which replaces that sent on 23 February.” ...

On 2 March 2006, the National Securities Market Commission was sent the following notification:

“We are pleased to inform you that on Friday 24 February IBERDROLA, through the consortium Nuevas Energías Ibéricas (NEI), in which Gamesa and the Portuguese companies Visabeira, Alberto Mesquita, MECI and Galucho, are also taking part, submitted its candidacy for the distribution of wind generating capacity in Portugal, called by the Portuguese government in 2005.” ...

On 7 March 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

Unicaja has notified the company that it has increased its stake in Iberdrola to 1.5% of its share capital.

On 10 March 2006, the National Securities Market Commission was sent the following notification:

“Following on from our notification on 1 February, we are pleased to inform you that next week IBERDROLA will proceed to distribute shares in the company to its employees as part of their variable remuneration.” ...

On 30 March 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

“We are pleased to inform you that the ordinary general shareholders' meeting held on 18 March passed, with votes in favour of more than two-thirds of the capital present and represented, all of the resolutions included on the Agenda, of which you were notified on 23 February, the corresponding documents (made available to the shareholders) having been sent to you on 23 of that month.” ...

On 5 April 2006, the National Securities Market Commission was sent the following notification:

The company sends herewith a press release on the Renewable Energy conference held in Toledo.

On 17 April 2006, the National Securities Market Commission was sent the following notification:

The company submits herewith its energy balance for the first quarter of 2006.

On 17 April 2006, the National Securities Market Commission was sent the following notification:

The company hereby reports on its first quarter 2006 earnings.

On 27 April 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

The company hereby reports on its first quarter 2006 earnings.

On 27 April 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

The company hereby gives notice that Iberdrola Portugal has increased its stake in EDP (Energias de Portugal) from 5.7% to 9.5% of the company's share capital.

On 27 April 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

The company hereby expands upon the information given on the increase in its stake in the share capital of EDP –Energias de Portugal.

On 27 April 2006, the National Securities Market Commission was sent the following notification:

The company sends herewith its presentation on its first quarter 2006 earnings.

On 2 May 2006, the National Securities Market Commission (CNMV) was notified of the following significant event:

Iberdrola has entered the US wind energy market with the signing of a contract for the purchase of 100% of the company Community Energy Inc. (CEI), headquartered in Wayne (Pennsylvania). Iberdrola has also signed a framework agreement with Bayannaer town council, northern China, to study the siting of at least 1,000 MW of wind generating capacity.

On 16 May 2006, the National Securities Market Commission was sent the following notification:

On 16 May 2006, the National Securities Market Commission was sent the following notification:

The company sends herewith a press release on the selection of candidates for 500 jobs with the Consorcio Novas Energias Ibericas (NEI) in the Portuguese regions of Beira Interior and Valle del Sousa. The NEI consortium is led by Iberdrola and Gamesa, and it also includes the Portuguese companies Visabeira, Alberto Mesquita, MECI and Galucho.

On 1 June 2006, the National Securities Market Commission was sent the following notification:

"We are pleased to inform you that Iberdrola intends to offer its shareholders a dividend reinvestment programme, whereby shareholders voluntarily joining this programme will be able to reinvest their dividends in the Company's shares..."

On 28 June 2006, the National Securities Market Commission was sent the following notification:

The company hereby gives notice that on 3 July 2006 it will pay out the supplementary dividend from the 2005 financial year of 0.51810171 gross per share.

CORPORATE COMMISSION

IBERDROLA

First half
Results 2006
Quarterly report

NET PROFIT REACHES 817.8 MILLION EUROS FOR THE FIRST TIME IN A HALF-YEAR PERIOD

Wind Energy, International and Non-Energy Business, Drivers of Growth

Record production in a half-year period (43,701 GWh; +9.2%), while reducing CO₂ emissions by 11.1%.

- Wind energy and mini-hydroelectric production increases to 3,988 GWh (+14.9%). This includes 281 GWh in international wind energy production.
- In Spain, production from combined cycles increases by 18.1%.
- CO₂ emissions reduced by 18.4% in Spain, reaching 21,171 GWh of emissions-free production, 65% of the total generated.
- In Mexico and Brazil, production increases by 19.7% over 2005.

EBITDA up 20.0%, reaching 1,916 MM€

- Renewables and International business represent 33.2% of EBITDA, compared with 26.3% for same period in 2005.
 - The Wind Energy Business registers an EBITDA of 303.5 million euros (+60.0%).
 - EBITDA of International reaches 332.5 million euros (+44.1%).
- Domestic Energy business (ex-Renewables) increases its EBITDA 4.1% due to the growing contribution of the Gas business. Without this effect, it would have dropped 2.3%.
- The improved results in Commercial and Gas business compensates for the impact of RDL 3/2006 registered on Distribution business
- Non-energy business, source of recurring profits, grew at the EBITDA level 49.7% to 183.7 million euros.

International Growth in Renewables and Engineering:

- Renewables: Acquisitions in France, USA and China consolidates growth strategy.
- Engineering: 1,500 million euros of backlog, with developments in 20 countries.

Basic figures for the businesses

Operating Data		H1 2006	H1 2005	%
Net production	GWh	43,701	40,022	9.2
Gas combined cycle	GWh	17,645	14,763	19.5

Debt /equity ratio	Times	1.39	1.30

(1) Includes the amounts corresponding to the tariff insufficiency: 1,341 million euros at December 2005 and 353 million euros at June 2006.

(2) Net Debt/(Net Debt+Shareholder's equity). Includes financing of the tariff insufficiency. Without including this issue, leverage as at December 2005 would stand at 53.6% and at 54.9% in June 2006.

Highlights

- As at 30 June 2006, IBERDROLA achieved a new half-year record in Group production, which grew 9.2% to 43,701 GWh, driven by use of technologies more environmentally efficient. This high growth has been achieved while reducing CO₂ emissions by 11.1%. In Spain, the emissions were reduced by 18.4%, resulting in an emission-free production figure of 64.8% on a total of 32,681 GWh produced. It is also worth highlighting:
 - Wind production grew 16.2% to 3,663 GWh (281 GWh international). Special Regime production, including cogenerators contribution, represented 14.4% in Spain, similar level to the one achieved by hydroelectric production.
 - High availability of nuclear power plants, with an output increase of 15.2% compared to 2005.
 - Production from combined cycles increased in Spain by 18.1%, and by 20.6% in Latin America.
 - Significant reduction in production with the most pollutant energy sources, with a decline of 19% in production from coal and 58% from fuel oil.
- Net Operating Profit recorded a significant improvement both in gross terms (EBITDA +20.0%) and in net terms (EBIT +24.9%). Renewables, International and Non-Energy businesses, with strong growth in activity, were the engines of growth for the Group in the first half of 2006:
 - Domestic Energy business (ex-Renewables) increased its EBITDA by 4.1% due to the growing contribution from Gas, without which Gross Operating Profit would have dropped by 2.3%. In addition, results obtained by Commercial and Gas made it possible to reduce the impact on EBITDA of Royal Decree (RDL) 3/2006. On the other hand, it should be noted that IBERDROLA Distribution, SAU set up on 9 June 2006 operative actions aimed to minimize the effects of the Royal Decree mentioned above.
 - Renewables: EBITDA grew to 332.5 million euros, after a 16.2% increase in wind energy production.
 - International: 44.1% EBITDA growth, exceeding 332 million euros, due to good development of business in Mexico and Brazil. It emphasizes the 19.7% increase in production, due to improvements in efficiency and availability in generation, and a 4.8% increase in distributed energy. The positive development in the exchange rate for the currencies of reference in the period should also be mentioned.
 - Non-energy business, an important source of recurring profit, achieved EBITDA of 183.7 million euros, an increase of 49.7%. Engineering and Services (+61%)

represented the majority of growth in EBITDA for this area of business.

- Net Profit was 817.8 million euros, a growth of 25.2%, in line with EBIT and after application of an effective tax rate of 35%.
- IBERDROLA made new strides in its international expansion during the first half in Renewables and Engineering:
 - Renewables: acquisition of the French wind energy producer Perfect Wind (600 MW portfolio), the US producer Community Energy (2,200 MW portfolio), and an agreement in China with local authorities to obtain a 1,000 MW portfolio. All these operations consolidate the growth strategy by increasing the portfolio. In addition an agreement was concluded in China with Guanxi Guidong Electric (300 MW in hydroelectric generation and electricity transmission), for the acquisition of a 29% stake in such company.
 - Engineering: With a 1,500 million euros backlog, Iberdrola Ingeniería has presence now in 20 countries worldwide.
- Publication of Spanish NAP 2008-2012, which includes the following important points:
 - All efforts are now focused on the electricity sector, compared with other sectors.
 - Electricity companies represent the only sector which can internalize CO₂ costs.
 - Technological change is being favoured.
- As regards Regulation, in the first quarter of the year was published Royal-Decree 3/2006 modifying the matching regime in the wholesale market, as well as the new consideration of the emission allowances. Afterwards, beginning June, there were a number of developments on the regulatory front aimed at producing greater liberalization within the sector:
 - Recognition of tariff insufficiency corresponding 2005.
 - Elimination of CTCs and end of the transition period.
 - Start of contracting electrical energy by distributors in the Iberian forward market.

Development of the Strategic Plan

1. INVESTMENTS IN GENERATION

Installed capacity

During the first half of 2006 IBERDROLA put 202 MW of additional power on line in relation to what existed at December 2005, reaching 27,993 MW of total installed capacity. The new power put on line relates entirely to new wind energy and mini-hydroelectric facilities. Spain represents 88.2% of total installed capacity, with 24,696 MW.

In comparative annual terms, the installed capacity at the end of the first half of 2006 is 6.2% higher than what existed at the end of the first half of 2005.

The following is a breakdown of the added amounts achieved in the last 12 months:

Additional capacity (MW)	MW	Facilities put on-line in the last 12 months
Combined cycle	800	Arcos III in Spain (400 MW Aceca in tests)
Wind and Mini-hydroelectric	724	New plants in Spain, Europe and Latin America
Cogeneration	92	New plants operating in Spain
Traditional generation	24	Recognized capacity increases
Total	1,640	

1.1 Spain

- Combined Cycle Plants

Installed capacity

The total operating capacity of IBERDROLA in Combined Cycle plants in Spain at the end of the first half of 2006 reached 4,000 MW (4,800 MW under management). Year-on-year the installed capacity in combined cycles in Spain at the end of June 2006 is 25% higher than for the same period in 2005. The increase in operational power relates to Arcos III, 800 MW.

Plants at test stage or under construction
The Escombreras Combined Cycle

IBERDROLA has started the testing period for its combined cycle new group at Escombreras (800 MW), in Cartagena (Murcia), where synchronisation with the electricity grid took place on 1 July. This IBERDROLA combined cycle is the ninth built by the Company in Spain since the 2002-2006 Strategic Plan was implemented.

Project	Capacity (MW)	Start of operations
Castellón A	800	2002
Castejón	400	2002
BBE	800	2003
Tarragona	400	2004
Santurce	400	2004
Arcos I and II	800	2004
Aceca	400	2005
Arcos III	800	2005
Total 2002-2005	4,800	2005
Escombreras	800	2006
Castellón B	800	2007
TOTAL '02-'07	6,400	(5,600 OWNED)

It is forecasted that the Escombreras cycle will start commercial operation during the last quarter of this year. Construction of this new group at the Escombreras plant meant dismantling the old fuel oil-powered groups 1, 2 and 3, while maintaining groups 4 and 5 of 554 MW in operation.

- Wind Energy and Mini-hydroelectric
Installed capacity

At the end of the first half of 2006 IBERDROLA has installed capacity of 4,004 MW (3,672 MW of wind energy and 332 MW of mini-hydroelectric), which strengthens IBERDROLA as worldwide leader in this business. In the first half of this fiscal year 194 additional MW were installed (178 wind energy MW and 16 mini-hydro-electric MW). In comparative annual terms the installed capacity at the end of June 2006 is 22.1% higher than what existed at the end of June 2005.

In this context, IBERDROLA envisions reaching 10,000 MW of installed power by 2011. With this aim, IBERDROLA has carried out a number of operations in the area of renewable energies outside Spain during the first half of 2006, which increases the project portfolio, now standing at 16,000 MW.

In respect to the installed capacity per geographic area, the wind generation park now includes wind farms in twelve Spanish communities and in four countries, Greece, Portugal, France, and Brazil. In addition to development in countries where it is already present, it has projects at an advanced stage of development in the UK, Italy, Poland, Germany, Mexico and the US. 92.3% of the installed capacity of IBERDROLA in renewable energy is located in Spain, with 3,696 MW. With regard to projects outside of Spain, IBERDROLA already has a total of 308 MW in operation. As a whole, 7.7% of the 4,004 MW of total installed capacity of IBERDROLA is located outside Spain. IBERDROLA has incorporated into its CORE (Renewables Operation Centre) its wind farms operating in France, Brazil and Portugal, and intends to include gradually all facilities abroad.

Additional capacity

The new capacity installed in Spain during the first half of 2006 reached 121.5 MW, as follows: Alarcón (15,8 MW), Luzón Norte (20 MW) and Escalón (14 MW) in Castilla - La Mancha; Los Campillos (34 MW), Tarayuela (20 MW) and Urbel del Castillo II (12 MW) in Castilla y León, and Igea-Cornago (6 MW) in La Rioja region.

International

New capacity entering operation during the first half of 2006 achieved 72.1 MW, represented by, among others:

- France (La Butte des Fraus, 12 MW).
- Completion of already existing plants in Brazil, Rio do Fogo, up to 49.3 MW and in Greece, Modi ext., up to 4.8 MW.

Project Portfolio

IBERDROLA already has a project portfolio totalling 16,000 MW at different stages of development, both in Spain and in other countries.

MW	Potential development	Validated resource	Grid connection rights & under construction
Spain	8,446	5,254	2,031
Wind	7,234	4,773	1,933
Mini-hydro	192	192	90
Other	1,020	288	58
International	7,561	3,966	732
Total	16,007	9,219	2,813

During the first half of the year several international operations were carried out which mean additions to the IBERDROLA project portfolio:

- Acquisition of Community Energy in the USA, located at Wayne (Pennsylvania), which has a project portfolio totalling 2,000 MW of wind energy in various locations on the country's east coast, at preliminary study stage and with high likelihood of receiving authorisation, to which 200 MW at an advanced development stage should be added. Community Energy Inc. leads green energy certificates trading in the north-east of the United States, by supplying close to 75,000 domestic consumers and 350 industrial and commercial customers.

USA

Acquisition of Community Energy
(Total portfolio: 2,200 MW)

- Acquisition of French company Perfect Wind, considered as one of the companies with the greatest potential for development in the wind energy sector in our neighbouring country, having a project portfolio of 600 MW, of which 10 MW comes from a wind farm now at test stage and 86 MW from projects in an advanced stage of development.

France

Acquisition of Perfect Wind
(Total portfolio: 600 MW)

- Signing of Framework Agreement in China with the district council of Bayannaer, to study locations where at least 1,000 MW of

wind energy output could be installed. Installation is subordinate both to results from wind measurements and to the approval of the regulatory framework in China, which must be stable and allow for the project's profitability.

China

Framework agreement

- In addition, IBERDROLA has reached an agreement with Guanxi Guidong Electric (300 MW in hydroelectric generation and electric transmission) for the acquisition of a 29% stake in the above mentioned company.
- New developments have been initiated in UK, France, Hungary and Estonia.
- Other Sources of Renewable Energy (other than wind energy)

Thermosolar Energy

In its portfolio IBERDROLA has a total of 13 projects for thermoelectric solar energy in Spain, adding up to 605 MW of installed capacity located in Sevilla, Ciudad Real, Madrid, Murcia, Badajoz, Zamora, Albacete, Soria, Teruel y Almeria.

Photovoltaic Energy

The priority is the development of an own portfolio in IBERDROLA combined cycle and nuclear plants. Currently IBERDROLA has an advanced portfolio of 30 MW in Spain.

Biomass

Development of biomass projects will be done on a very selective basis, always including guarantees that raw material will be supplied over the long term. IBERDROLA is intending to instal Spain's first timber biomass plant, which will be located in the municipality of Corduente (Guadalajara). IBERDROLA also has two other projects at an advanced stage which will bring the portfolio of the most advanced projects up to 25 MW.

Mini-Hydroelectric within Special Regime

IBERDROLA has a portfolio of 192 MW at national level and 100 MW at international level.

- Cogeneration

Operating capacity

IBERDROLA has operating capacity in co-generation plants in Spain of 387 attributable MW, equivalent to a total of 562 MW installed, from the 28 co-generation plants in which IBERDROLA has a stake. IBERDROLA has five liquid manure processing plants, of which the two located in Castilla y León are already in operation.

Capacity under construction

Since 2005, the liquid manure processing plants of Fonz and Monzón in Huesca and Fudepor in Murcia have been under construction, with an electrical capacity of 7.4 MW, 14.8 MW and

14.8 MW, respectively. They will be put into operation during 2006. Also, this June IBERDROLA and its partners began steps for construction of the bioethanol production plant at Barcial del Barco (Zamora). This plant will mean lower levels of CO₂ emission into the atmosphere, amounting to 110,000 tonnes annually.

1.2 Latin America

Mexico

IBERDROLA has consolidated its position as the top private electricity producer in Mexico. The Company already has installed capacity in Mexico of 2,696 MW, and is building another two combined cycle plants in that country: Altamira V with 1,121 MW, which will be put into operation in November 2006, and Tamazunchale with 1,135 MW, which will start operating in June 2007, the two biggest plants awarded up to now in Mexico.

Project	Capacity (MW)	Start of Operations
Enertek	120	100% operational
Monterrey	1,037	100% operational
Altamira IV	1,036	100% operational
La Laguna	500	100% operational
Altamira V	1,121	2006
Tamazunchale	1,135	2007
Total	4,949	

In the area of wind energy IBERDROLA is developing projects in the State of Oaxaca with total capacity of 150 MW.

Brazil

In Brazil, IBERDROLA has the hydroelectric plant of Itapebí, 450 MW (175 MW attributable to IBERDROLA) and the combined cycle of Termopernambuco with an installed capacity of 520 MW (203 MW attributable to IBERDROLA). In addition, IBERDROLA has six co-generation plants (93 MW) for private customers through its subsidiary Energyworks Brazil (100% IBERDROLA).

During the first quarter of the year, Neoenergia (39% IBERDROLA) was awarded concessions for building, maintaining, and operating the hydroelectric plant at Baguari and the mini-hydroelectric plants of Nova Aurora and Goiandira, which add up to a total of 188 MW of installed capacity.

In the field of wind energy, during this semester IBERDROLA has continued to put into operation the Rio do Fogo wind farm, a Clean Development Mechanism (CDM) project. Located in the state of Rio Grande do Norte (Brazil), this project totals 49.3 MW fully installed and at test stage.

1.3 Europe

Greece

In the field of wind energy, IBERDROLA has 193.3 MW on line and 44 MW under construction. IBERDROLA is a strategic partner of Rokas, the top developer and operator of wind farms in Greece, in which it has a 49.9% share. Also in Greece, IbeRenova will soon acquire

56 MW from Gamesa by an agreement signed for this purpose in July 2005.

Portugal

IBERDROLA has 18 MW in operation in Portugal, relating to the Catefica wind farm acquired from Gamesa. In addition, IBERDROLA has connection points for 150 MW that will enter into operation in the next two years.

Other Countries in European Union

IBERDROLA has various projects in other countries of the EU, mostly in the area of wind energy:

- In Germany, during 2006, 28 MW of wind energy will start operation at three wind farms which were the result of a purchase agreement with Gamesa. Two of these are already installed and the other one being tested. An additional 54 MW are being developed by IBERDROLA itself, and are at various stages of development.
- In Poland, IBERDROLA will have 58.5 MW of wind energy in operation at the end of 2006 and has 103 MW in its portfolio, to be developed in the coming years.
- In France IBERDROLA has 31.7 MW of wind energy in operation. The company has a strategic interest in the acquisition of rights and farms in an advanced stage of development, or in positioning itself as an investing partner for local developers. IBERDROLA has an agreement with the

German developer P&T Technology and its financial services subsidiary EECH AG for the purchase of farm development rights both in France (100 MW) and in Italy (200 MW). To these agreements must be added the projects acquired from Perfect Wind of 10 MW (at test stage) and 600 MW in portfolio, of which 86 MW relates to projects at an advanced stage. Furthermore, IBERDROLA has entered into an agreement with Total and OPT to develop wave energy projects and will start studying sites in France.

- In Italy IBERDROLA has an agreement with P&T, having the right to acquire 100 MW with an optional expansion of a further 100 MW. IBERDROLA will also acquire a total of 100 MW from Gamesa over the 2006-2009 period under the agreement signed in 2005.
- In the United Kingdom its own projects are being developed in the area of wind energy and, although they are in the initial phases, they could reach 145 MW.

Other Geographical Areas

In Latvia, IBERDROLA has been awarded the construction, as well as the operational supervision and maintenance during 12 years of a combined cycle plant of 420 MW of installed capacity in Riga (Latvia).

Trading

The Company is developing a major trading business in Europe, with operations in Austria, Belgium, France, Germany, the Netherlands,

Portugal, Spain, Switzerland and Italy. In addition, IBERDROLA is participating in monthly and daily auctions carried out by the French electricity system operating company (RTE), which enables it to access interconnection with Italy. The Company aims to extend these energy buying and selling activities in the short term in Europe to other countries such as Poland, Greece and the United Kingdom.

2.- DISTRIBUTION

2.1 Spain

At the end of the first six months of fiscal year 2006, IBERDROLA had 9.75 MM costumers in Spain, with total energy distributed on the grid totalling 49,581 GWh, a 2.5% increase over the same period the previous fiscal year.

2.2. Latin America

At the close of the first six months of 2006, IBERDROLA has already exceeded a total of 8.3 million customers under management in the region, with energy distributed totalling 13,815 GWh, an increase of 4.8% over the same period in the previous fiscal year.

3. SUPPLY

3.1 Electricity

- Spanish business: eligible electricity customers

The energy sold on this market totalled 4,615 GWh, a decline of 69.5% from the same period in 2005, as a consequence of the P&L optimization policy.

3.2 Gas

Procurements

In the first half of 2006, IBERDROLA consolidated its position as Spain's second-largest gas supplier, providing 14% of total gas consumed. IBERDROLA also ended the half with a global supply portfolio of 16.25 bcm per annum, 7.35 bcm of which cover its supply requirements in Spain, with 8.90 bcm in Mexico and Brazil.

During the first half, the most significant gas procurements activities were the following:

- Receipt of the first cargo of natural gas at the Sagunto regasification plant, which has capacity to process 6 bcm per annum since its start-up of operations this past 1 April. The vessel Al Thakhira, from the Emirate of Qatar, unloaded 145,000 m³ of LNG at the Saggas terminal, equivalent to 900 GWh of natural gas. IBERDROLA is the plant's largest shareholder, with a 30% interest.
- Receipt of the first cargo of liquefied natural gas (LNG), with capacity of 145,000 cubic meters, under the procurements contract signed with Nigeria LNG on 1 April 2002. The methane tanker vessel LNG Enugu unloaded at the Huelva regasification plant, where the Company has entered into the corresponding agreements for access to the gas networks. The amount transported is equivalent to 900 GWh of natural gas. This shipment falls within the agreement signed with Nigeria LNG for IBERDROLA's long-term acquisition of 10 bcm of LNG.
- Exports to France through the Larrau-Calahorra international gas pipelines and the new Euskadour pipeline. IBERDROLA has already accumulated 1,500 GWh exported in 2006. IBERDROLA was the first company to export gas through Euskadour since its start-up in June 2006.
- During the fiscal year, to optimize the flexibility of its gas basket, the Company has

developed various trading activities, the satisfactory economic results of which will be discussed below.

- In April, IBERDROLA successfully passed the inspection of the Oil Products Strategic Reserves Company *Corporación de Reservas Estratégicas de Productos Petrolíferos*, or CORES with respect to minimum safety inventories of natural gas, maintaining 36.5 days compared to the 35 required by Spanish regulation.

Infrastructure

To guarantee the entry of LNG into the gas system, IBERDROLA signed the corresponding agreements for access to the networks and is promoting first-class infrastructures: in addition to the aforementioned Sagunto, it holds a 25% interest in the Bahía Bizkaia Gas (BBG) regasification plant, which has been operating since August 2003 at a capacity of 6 bcm per annum, and has received over 100 methane tankers.

It also holds 12% of the company Medgaz, which is promoting a direct submarine gas pipeline between Algeria and Spain, with capacity for 8 bcm per annum, and which was granted in 2005 as a priority project for the Government, having recently been subject to a favourable environmental impact report. IBERDROLA has already guaranteed the receipt of at least 1.6 bcm per annum of gas through this new pipeline, beginning in 2009.

Supply

Spain

In the first half of 2006, IBERDROLA consolidated its position as second-largest gas supplier in Spain. In the second quarter of 2006 the company announced it will distribute natural gas for the first time to five cities in the Community of Madrid, to which end it will invest € 30 MM in developing the necessary gas infrastructure, which will benefit over 35,000 homes.

Europe

In groundbreaking activities to deregulate the French market, IBERDROLA began supplying gas to industrial users in that country in 2005. At the same time, it has also become the first domestic company to export gas from Spain to France through the interconnection gas pipeline.

4. NON-ENERGY BUSINESSES

Iberdrola Inmobiliaria

IBERDROLA (through the holding company and its subsidiary Iberdrola Inmobiliaria) currently controls over 3.8 MM buildable square meters. At the close of the first half of 2006, IBERDROLA Inmobiliaria had 16 residential developments, representing 1,426 homes. In the first half of the fiscal year, 277 homes were sold. With regard to non-residential projects, construction of the AQUA MULTIESPACIO real estate development

(Valencia), with 83,000 square meters in constructed surface area, has been completed, and was inaugurated in May. This real estate business is being operated through Sociedad Oceanic Center, in which IBERDROLA holds a 50% stake. The building of the Landaben (Pamplona) Industrial Polygon also continues under construction.

Investments made to purchase land under public deed from 1/1/06 to 3/31/06 totalled € 95.7 MM. Investments totalling another € 119.5 MM were made in the second quarter, bringing accumulated investment in land purchases to € 215.3 MM during the period from January to June 2006. Investments made in development and other items related to land purchases totalled € 4.2 MM. Investments made in construction works totalled € 31.5 MM.

Likewise, the capital gains of several recurrent transactions have been included in the first half, worth mentioning those done with assets in Vicálvaro and Aguacate (Madrid area).

Iberdrola Ingeniería y Construcción

Iberdrola Ingeniería y Construcción is executing projects in over 20 countries and has offices in Mexico, Brazil, Russia, Qatar, Greece, Poland, United Kingdom, US, Venezuela, Tunisia, Latvia, Germany, Albania, Kenya, India, and Slovakia. The value of the backlog is € 1,500 MM.

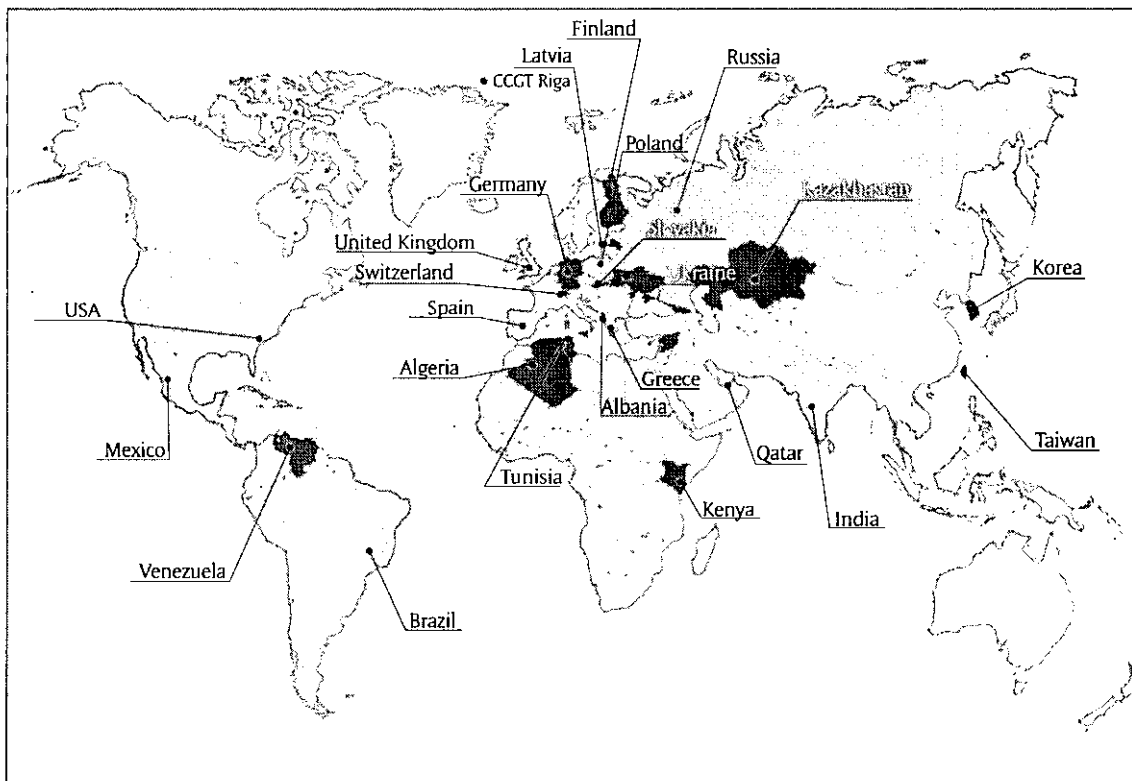

- In the first half of the year, IBERINCO strengthened its overseas presence by been

awarded with the reinforcing of the electricity grid of the state of Falcón, in Venezuela, for 80 million dollars; a new agreement with the Mexican public electricity company (CFE) to reinforce the electricity grid in the state of Tamaulipas, for 63.6 million dollars; a project to modernize the control system of the main hydroelectric plants in Kenya, with a budget of 5.5 million euros and a contract for the supply of new tubular beams of optimized design for the four condensers of the units 3 and 4 of the Bohunice V2 nuclear plant in Slovakia, for an amount close to 11 million euros. IBERINCO has been recently awarded with a 16.5 million euros contract in Bulgaria for building the Kozloduy-Plovdiv transmission lines.

With regard solely to the second quarter of the year, the most significant deals are the following:

- New international agreement for the supply of new tubular beams of optimized design, to the Bohunice Nuclear Plant V2 in Slovakia, for some € 11 MM.
- IBERINCO won an international competition for building the Fujairah electricity plant of 220 MW in the United Arab Emirates, for a total of 70 million euros, and is awaiting receipt of notification of award of both contracts.
- In Spain, we note the following as the most significant projects awarded: the construction

of 2 MW photovoltaic solar plants in Mohorte (Cuenca) for 12 million euros; a high-tension, 220 kV line from Celada to Hornillos to Grijota, for a total amount close to 4 million euros; the Hornillos 220/30 kV substation for 3.4 million euros; and phases III and IV of the Telefónica photovoltaic solar project totalling over 5 million euros.

5. OPTIMIZATION AND RATIONALIZATION OF FINANCIAL RESOURCES

Main Financial Transactions

Over the first half of 2006, the limit of the outstanding balance of the EMTN program was increased to 10 billion euros, from the previous 6 billion euros. As a result of this increase, which occurred in April, and the current favourable trend in this market, this instrument, along with the Commercial Paper programs, has become the Company's principal financing source, with seven issuances made.

Within this EMTN program, the following issuances were the most significant:

- 15 billion Japanese yen maturing in 2018, with option to extend to 2036.
- 200 million pounds sterling maturing in 2010.
- 300 million euros at 4 years.

Financial investments:

- **IBERDROLA increased its stake in Energías de Portugal (EDP) to 9.5%.** Last April 27 IBERDROLA reported it had increased its stake in Energias de Portugal, S.A. (EDP) from 5.7% to 9.5%. The purchase was made on the market for a total of € 332 MM. Given the guidelines of the National Energy Strategy, approved by the Portuguese Council of Ministers Resolution of 24 October 2005, IBERDROLA was prepared to concentrate its

entire shareholder position in one of the two companies (EDP or Galp), depending upon the option considered most favourable for this new energy strategy by the Portuguese government. Once the decision was made to concentrate on EDP, IBERDROLA Portugal then communicated to the Portuguese government its willingness to sell the 4% it still holds in Galp, within the framework of the Portuguese government's partial privatization of that company.

- **IBERDROLA acquired an 11% stake in Gamesa from Corporación IBV.** Last 5 July, IBERDROLA closed the purchase of 11% of the capital of Gamesa from Corporación IBV, a holding company owned in equal parts by the Company and BBVA, in a deal involving an investment of € 222 MM. In this way, the Company has a 17% direct stake in Gamesa, reinforcing its presence in one of the world's largest manufacturers of wind turbines.

7. REGULATION

National Allocation Plan

IBERDROLA considers as positive the draft of the 2008-2012 National Allocation Plan (NAP) for Emissions Rights, since it was able to combine the goals of protecting the industry and encouraging the renovation of the Spanish generation park. The NAP, presented by Environment Minister Cristina Narbona, leaves to the electricity sector a very significant part of the effort to reduce emissions, with a view to encouraging a renovation of the electricity generation park and the gradual replacement of

the most polluting and obsolete plants, as well as reducing greenhouse gas emissions in order to fulfil the Kyoto Protocol.

In this regard, the Spanish NAP is based on the idea that "Spain's future energy balance will be based on a greater contribution of clean and renewable energies, with growing participation by end customers in the context of a liberalized market, to ensure the rational and efficient use of energy and the large-scale introduction of technology, which will enable a significant increase in energy efficiency".

Thus, the document states that "in the supply structure, significant changes were noted with respect to the current situation, by significantly increasing the weight of natural gas and renewable energy." Specifically, the document accentuates the trend already noted in the first NAP, when it points out that production using coal will drop from 65,845 gigawatt hours (GWh) in 2007 to 47,778 GWh in 2011, while combined-cycle production will increase from 57,761 GWh to 74,701 GWh during the same period.

For IBERDROLA, the NAP proposed by the Government is in line with the signals for new investments - which can become the growth engine for the economy -, making it easier to achieve emissions reductions in Spain in areas where it is more possible, allowing the adaptation of other sectors with less capacity for reducing greenhouse gases, and guaranteeing the supply of electricity.

Summary table of emissions allocation (Millions of Tonnes):

	Allocation		Actual Emissions		Allocation 2008-2012	
	2005-2007	1990	2005	A. Average	a/1990%	a/05-07
Electricity Sector	85,400	61,610	101,240	54,694	-11.2%	-36.0%
Other	96,775	70,050	88,615	97,965	39.9%	1.2%
TOTAL	182,175	131,660	189,855	152,659	15.9%	-16.2%

Royal Decree 809/2006 of 30 June, increasing the tariff as of 1 July 2006 by 1.38%

Pursuant to Royal Decree 1556/2005 of 23 December setting the 2006 electricity tariff, the Government has made a review of the tariff as of 1 July 2006, including a recovery of the tariff insufficiency for fiscal year 2005, as well as its possible assignment to third parties.

This Royal Decree sets the average increase in the average or reference tariff at 1.38 percent, leaving it at 77.664 euros/MWh.

The breakdown of this increase is as follows:

- Residential: 0.8%
- Industrial: 6.0%

The Government regulates the purchase of energy by Distribution companies in the Iberian forward market.

In the second half of 2006, energy distributors must acquire 5% of energy sold to customers at the regulated tariff on the forward market managed by OMIP, pursuant to the Ministerial Order that, in fact, assumes the start-up of operations from 1 July of the Iberian Electricity Market [Mercado Ibérico de Electricidad, or Mibel].

The requirement to purchase energy on the forward market is set through the establishment of a specific number of futures contracts with physical delivery to be assumed by each distributor in the monthly auctions to be held the first and third Wednesdays of each month and in the quarterly auctions held on the third Wednesdays of each month.

Through this energy acquired on the forward market, distributors will be recognized with the realized cost resulting from applying to this energy the price of each auction corresponding to the negotiation session, in which it is required to participate; therefore, the electricity matched in this market will not be subject to the fixed price of 42.35 euros for contracts on the Spanish wholesale market.

Approval of Urgent Measures in the Energy Sector

Last 23 June the Council of Ministers approved a Royal Decree-Law of Urgent Measures in the Energy Sector, the provisions of which may be summarized as follows:

Electricity Sector

- Elimination of Costs of Transition to Competition (CTCs), because they are considered inefficient and unnecessary. They are considered inefficient because they distort prices, and unnecessary because of their high amortization level, as recently confirmed by the National Energy Commission.
- Incentives for the consumption of indigenous coal: For security of supply reasons, the Government is authorized to approve a system of premiums of up to a maximum of ten euros per MWh produced.
- Cogeneration: The need for electricity self-consumption in plants that use cogeneration has been eliminated, granting premiums not only for electricity surpluses, but also all for all cogenerated electricity. Furthermore, it allows all plants to receive a premium above the market price, while currently only plants of less than 10 MW receive a premium. Finally, it eliminates the remuneration range for these facilities, of between 80 and 90 percent of the reference tariff.
- Elimination of the limits imposed on the tariff methodology for reviewing the average or reference tariff (currently stipulated at +2 percent) and changes in supply and access tariffs (+0.6 percent of the average tariff). This ensures that revisions of average or reference tariffs can cover all costs, and, as with the 2006 tariff, it avoids having to elaborate them with an estimated deficit because of a methodology developed when oil had a stable price of 25 dollars per barrel, while it currently exceeds 70 dollars per barrel.
- Special Regime: With the aim of bringing remuneration for Special Regime generation facilities more closely into line with the actual evolution in the costs of such technologies, the new standard specifies that changes in

premiums and tariffs for Special Regime facilities will not be limited by the revision of the average tariff.

- Virtual capacity auctions: In order to have a mechanism enabling the possibility of bilateral contracts for specific groups of consumers, the contracting period resulting from virtual auctions, currently capped at 12 months, is being extended to cover medium and long term periods.

Gas sector

- Gas storage: the general chronological criterion is being replaced by a allocation system based on objective and transparent criteria, and specially in the percentage of sales from the previous year.

Royal Decree-Law 3/2006 modifying the regimen for matching energy on the wholesale market and reconsidering the value of emission rights

The Council of Ministers, in its meeting this past 24 February, approved a Royal Decree-Law modifying the regime for matching energy on the wholesale market and reconsidering the value of emission rights. The following are extracts of the main lines from the press release issued by the Ministry of Industry, Tourism, and Trade:

- "Its main provision is to require generation and distribution companies that belong to the same business group to make bilateral

contracts among each other for the acquisition of energy produced by facilities under the ordinary regime."

- "Although the purchases and sales among these companies are made at a free price, during this year, and in a **provisional manner**, the National Energy Commission will only consider - for the purposes of settlement for such contracts - the average cost provided for in the 2006 price schedule for the energy generated under the ordinary regimen for the territory of mainland Spain, corresponding to 42.35 €/MWh."

- "That rule also includes that the emission rights granted free of charge to companies by means of the National Emissions Allocation Plan will be taken into account."

- "The Government envisions that, with the rules approved, there will be a substantial decrease in the prices on the wholesale electricity market. In concrete terms, the estimates done by the Ministry of Industry, Tourism, and Commerce forecast that the measure of making it mandatory to make bilateral contracts among generation and distribution companies of the same business group will enable a reduction in the volume of transactions on the daily market ... which, without doubt, will have a direct effect on reducing the deficit."

- "With respect to discounting the value of the emission rights granted free of charge to the electricity generating companies by means of

the National Emissions Allocation Plan, forecasts indicate that, by virtue of an average price estimated at the end of 2005 to be 18 euros per ton, and given the fact that 78 million tons have been allocated free of charge, the value of these rights would be about 1,400 M€, which amount could be applied to reducing the tariff deficit, if there is one."

In addition, and as a result of the effects of the abovementioned Royal Decree-Law, IBERDROLA Distribución Eléctrica, S.A.U. modified its purchasing strategy in the pool on June 9 in order to preserve the integrity of the Company's assets (and its value for the shareholders), such that, from this day onwards, it is no longer submitting bids to buy energy at a price that, under the regulations in force, might result in an energy acquisition cost for the Company that will not be acknowledge by the National Energy Commission later on. The System Operator (REE) and the Market Operator (OMEL) were informed of this decision in order to ensure that, in the exercise of their duties and in line with the corresponding operating procedures, they would be able to adopt suitable measures to keep the electricity system and its various markets running smoothly at all times.

8. TARIFF INSUFFICIENCY

The Company has not recorded any tariff insufficiency for 2006, assuming that the applicable regulation provides for the mechanisms required to guarantee that such insufficiency would be recovered. The effect before taxes in the Income Statement of the Group is expected to come out at -353.2 million euros (35.01% of the insufficiency attributable

to IBERDROLA) once deducted the amount of CO₂ allowances allocated according with the interpretation done of RD 3/2006 regarding this matter. In accounting terms, this has been recorded as an Account Receivable in the Balance Sheet.

Initial sector's tariff insufficiency (e)	1,993.9
Deduction CO ₂ allowances Jan + Feb	-331.8
Deduction CO ₂ allowances from March & onwards	-653.2
Final sector's tariff insufficiency (e)	1,008.9
IBERDROLA's share of tariff insufficiency -35,01% (e)	353.2

9. SHAREHOLDER COMPENSATION

IBERDROLA offers its shareholders the possibility to reinvest their dividend in shares

At the same time of the payment of the supplementary dividend corresponding to 2005, done past 3 July, IBERDROLA launched the Dividends Reinvestment Plan (DRP), which offers the opportunity to all of its shareholders to reinvest such dividend in shares of the Company.

Thus, IBERDROLA has become the first non-financial company in the IBEX-35 index in offering this investment possibility to its shareholders.

The success of the plan is shown in the numbers obtained when launched: It has been joined by more than 22,000 shareholders, of which 97% are physical persons, representing 7% of Total Share Capital.

Analysis of H1 2006

Energy Production

	GWh		vs. H1 2005	% Weight
Gas combined cycle	17,645	2,882	19.5%	40.4%
Wind energy and mini-hydroelectric	3,988	518	14.9%	9.1%
Wind farms	3,663	511	16.2%	-
Hydroelectric	5,274	330	6.7%	12.1%
Nuclear	12,427	1,640	15.2%	28.4%
Fuel-oil	787	-1,086	-58.0%	1.8%
Coal	2,629	-617	-19.0%	6.0%
Cogeneration	951	12	1.3%	2.2%
TOTAL NET PRODUCTION	43,701	3,679	9.2%	100.0%
ENERGY DISTRIBUTED	63,396		3.0%	

Energy Production in Spain

	GWh		vs. H1 05	% Weight
Gas combined cycle	7,379		18.1%	22.6%
Wind energy and mini-hydroelectric ⁽¹⁾	3,988		14.9%	12.2%
Wind farms	3,663		16.2%	-
Hydroelectric	4,756		6.4%	14.6%
Nuclear	12,427		15.2%	38.0%
Fuel-oil	787		-58.0%	2.4%
Coal	2,629		-19.0%	8.0%
Cogeneration	715		-0.6%	2.2%
TOTAL NET PRODUCTION	32,681		6.1%	100.0%
ENERGY DISTRIBUTED	49,581		2.5%	
HYDRO ELECTRIC RESERVE LEVELS AT 30/06/06			51.3% (5,788 GWh)	

Energy Production in Latin America

	GWh		vs. H1 2005	% Weight
Gas combined cycle	10,266		20.6%	93.2%
Hydroelectric	518		9.3%	4.7%
Cogeneration	236		7.3%	2.1%
TOTAL NET PRODUCTION	11,020		19.7%	100.0%
ENERGY DISTRIBUTED (managed)	13,815		4.8%	

(1) Includes 308 MW of international capacity with an output of 281 GWh.

1. PRODUCTION: SPAIN

Net Production of the Group in Spain rose 6.1% in the first half of 2006, reaching 32,681 GWh. It is worth mentioning the evolution of the Special Regime, which now accounts for 14.4% of total generation in Spain, close to the level for hydroelectric generation, thanks primarily to the 16.2% increase seen in wind generation. Combined cycle production is up 18.1%, representing 22.6% of the total output.

IBERDROLA has consolidated the position of its generation mix in Spain as the least polluting in the sector, after reducing emissions by 18.4%. The highlights of this period were as follows:

- The good availability of nuclear plants, up 15.2%, combined with an increase in hydroelectric production (+6.4%), despite the adverse operating conditions.
- Wind production is up 16.2%, and total renewable energies production increases by 14.9%. Special Regime, including cogeneration, now accounts for 14.4% of the generation mix, the same level as hydroelectric. In addition, international wind production rose to 281 GWh over the quarter.
- Combined cycle production is up 18.1% to 7,379 GWh, representing 22.6% of the company's generation mix in Spain and the technology making the second biggest contribution to the total mix after nuclear, which accounts for 38.0%.
- The significant reduction in production based on the most polluting energy sources, further to efforts launched over the first quarter of

the year, has been consolidated, with coal production down -19% and fuel-oil down -58%.

Emissions were reduced by 18.4% over the first half of 2006 to 189 gr/KWh, a very significant figure given the low level of hydroelectric production. The percentage of emission-free production rose to 64.8%, up from 60.8% over the first half of 2005.

IBERDROLA obtained a market share in the wholesale market of 25.5% in the first half of 2006.

Comparatively speaking, energy production can be broken down as follows:

	H1 2006	H1 2005
Gas combined cycle	22.6%	20.3%
Renewable energy	12.2%	11.3%
Hydroelectric	14.6%	14.5%
Nuclear	38.0%	35.0%
Fuel-oil	2.4%	6.1%
Coal	8.0%	10.5%
Cogeneration	2.2%	2.3%
Total	100%	100%

The changes recorded in CO₂ emissions were as follows.

	Million tons	Average price
Rights allocated	6.3 (*)	22.35
Rights consumed	6.5	23.32

(*) Approximate figure for comparison purposes, as allocation of allowances are made on a yearly basis and are managed over a three year period.

2. PRODUCTION: LATIN AMERICA

In Latin America, total production is up 19.7% to 11,020 GWh, with this strong growth driven by the new investments made in combined cycle plants, representing 93% of the total.

	Production	Change
Mexico (combined cycles)	9,495	22.6%
South America	1,525	4.1%
Combined cycles	771	0.0%
Hydroelectric	518	9.3%
Cogeneration	236	7.3%
Total	11,020	19.7%

The growth recorded in this region reflects firstly the greater availability of the Mexican plants in Monterrey (1,040 MW), Altamira (1,036 MW), Enertek (120 MW), and La Laguna (500 MW), running at full capacity, with production up 22.6%, and, secondly, the Termopernambuco plant in Brazil, where production has remained stable. Hydroelectric energy is up 9.3%.

3. MARKET: SPAIN

In the domestic market IBERDROLA's total demand measured on the grid rose 2.5% to 49,581 GWh, while the number of customers is up to 9.75 million.

4. MARKET: LATIN AMERICA

Changes in demand for IBERDROLA's three distribution companies in Brazil are presented in the following table:

Energy distributed (GWh) (under management)	H12006	vs. 2005
Coelba	5,981	5.8%
Cosern	1,792	5.0%
Celpe	4,290	2.8%
Total	12,063	4.6%

Analysis of results for the period (Unaudited)

The most notable aspects of the results for H1 2006 are as follows:

Million euros	Jan-Jun 2006	vs. 2005
NET SALES	5,496.6	+0.7%
GROSS MARGIN	2,845.8	+21.9%
EBITDA	1,916.4	+20.0%
EBIT	1,388.5	+24.9%
NET PROFIT	817.7	+25.2%

1. NET SALES

The Group's Net Sales came to 5,496.6 million euros over the first half of 2006, up 0.7% on the same period in 2005.

The domestic energy business saw its Net Sales fall -11.1%, primarily due to the low level of sales in the Supply business, the eliminations in consolidation figures due to the existence of a bilateral agreement between Generation and

Supply (-268.6 million euros) and the impacts of Royal Decree-Law 3/2006.

However, in the renewable energy business, Net Sales is up 57.1% and International business is up 36.7%. In relation to Non-energy business, its Net Sales has seen an increase of 32.3%, with strong growth in the Engineering business.

Domestic Energy	3,610.9	-11.1%
International	1,134.6	+36.7%
Non-energy	751.0	+32.3%

With regard to the estimated tariff insufficiency for the first six months of 2006 at sector level, and after discounting the value of emission allowances consumed, the estimated insufficiency for H1 2006 could reach a figure close to 1,009 million euros.

In accordance with Royal Decree-Law 5/2005 of 11 March, the provisional percentage of financing for the tariff insufficiency corresponding to IBERDROLA is 35.01%, representing a deviation of 353 million euros.

According to the interpretation of Royal Decree-Law 3/2006, the figure given above for the sector's tariff insufficiency includes 985 million euros corresponding to the value of the emission rights allocated under the National Allocation Plan and consumed over the period, based on the following criteria:

- For January and February "any eventual negative balances in the settlement of the 2006 tariff will be deducted."

- For subsequent months, "remuneration for the electrical energy production business ... will be reduced by an amount equivalent to the value of the greenhouse effect emission rights allocated ..."

On the other hand, the application of Royal Decree 3/2006 reduced revenues from the activity by -163.8 million euros accounted in the Distribution business. Its definitive impact will depend on the price ultimately recognized, given that Royal Decree 3/2006 sets as "provisional" the price of 42.35 euros/MWh, which has been applied as of 3 March: "with respect to payment for activities regulated by the National Energy Commission, during 2006 the provisional price to be considered for distributors for energy acquired through the assimilation mechanism described in Section 1 will be the average cost provided for in the 2006 tariff for energy generated under the ordinary regime for mainland Spain, including the costs of ancillary services and the capacity payment, representing 42.35 euros/MWh." Furthermore, another negative impact has been recorded for 43 million euros, based on differences between the actual cost and the standard cost in the Distribution business as a result of the bidding policy followed in the wholesale market since June 9th.

2. GROSS MARGIN

The consolidated gross margin came out at 2,845.8 million euros, up 21.9% on the same period in 2005. The 0.7% increase in Net Sales up to 5,496.6 million euros, already explained, is compensated by the 18% reduction in

procurement costs, down to 2,496.5 million euros, which includes a negative impact of -154.3 million euros for the consumption of emission allowances.

The Renewable and International business lines account for 52% of the total 21.9% increase in the gross margin. In local currencies, this growth comes out at 19.1%.

The following contrasting aspects can be highlighted regarding this change in the Gross Margin:

2.1 Domestic Energy Business

The Gross Margin rose to 2,069.4 million euros, up 15.2% on the same period in 2005.

The Domestic Energy business (excluding Renewables) is up 8.9%, while Renewables grew more than 57%.

Net Sales and Procurements changes have been influenced by various factors, highlighting:

- The application of Royal Decree 3/2006, with a negative impact due to the assimilation to bilateral agreements for -163.8 million euros, booked under the Distribution business.
- In addition, an impact from deviations of -43 million euros recorded on the Distribution business, reflecting differences between actual and standard costs.
- The negative impact for the cost of emission allowances consumed over the period, for -154.3 million euros recorded in Generation.

A flexible management approach has made it possible to compensate for the above mentioned impacts on the Distribution business, with its gross margin like-for-like down -207 million euros (directly linked to Royal Decree-Law 3/2006), with significant improvements in the Supply and Gas business (including IFC), up +192 million euros at the gross margin level. The positive trend registered in the Supply and Gas business has been achieved after reducing exposure to the Supply business and implementing a range of management efficiency improvements, while also reflecting a positive contribution by Gas Trading. These management improvements combined with the contribution by the Renewables business, accounting for 372.3 million euros of the gross margin, have paved the way for a 15.2% increase in the Domestic Energy business.

It is important to note that Generation currently sells energy directly to Supply under a bilateral contract, which constitutes an inter-company transaction. As such, in the Group-level accounts, the impact of purchases and sales under these contracts is eliminated, with the final impact on the Gross Margin coming out at zero, although they do have a significant effect at individual level for the various items.

2.2 International Business

The Gross Margin reached 446.3 million euros, up 40.2%, reflecting the good performance seen on the Group's businesses in the region, with a 19.7% increase in energy generated, showing a higher level of availability, and a 4.8% increase in energy distributed; as well as the positive evolution in the exchange rate for the region's reference currencies, namely the real in Brazil (+20.2%) and the US dollar, which affects Mexico (+5.1%).

2.3 Other Businesses

These businesses contributed 330.1 million euros to the total Gross Margin, representing an increase of 49.6%, driven primarily by **Engineering and Services**, with Corporación IBV, Other Services and Iberdrola Inmobiliaria making key contributions.

3. BASIC MARGIN

The Basic Margin over the period rose 19.2% to 2,859.0 million euros, as can be seen in the following table:

	H1 2006	H1 2005	Change %
GROSS MARGIN	2,845.8	2,334.7	21.9%
EMISSION			
ALLOWANCES	13.2	64.2	-79.4%
BASIC MARGIN	2,859.0	2,398.9	19.2%

The Basic Margin reflects 13.2 million euros in income for emission allowances granted to cogenerators. Further to Royal Decree-Law 3/2006 of 24 February, income from emission allowances granted has not been taken into consideration, with the exception of those received from this technology. The negative impact at March 2006 resulting from not factoring in income from emission rights allocated to the rest of generation comes out at -141.1 million euros, with this impact reflected in the Generation business. In 2005, prior to the application of this Royal Decree-Law, the total amount of any subsidies for emission allowances was considered to represent revenues.

Without the impact resulting from the application of Royal Decree-Law 3/2006 relative to emission allowances, the Basic Margin would have come out at 3,000.1 million euros (+25.1%)

4. EBITDA

Consolidated EBITDA is up 20.0% to 1,916.4 million euros. In addition to the Gross Margin evolution, already explained, it is important to analyze the evolution of the Net Operating Expense:

- 8.4% increase in Personnel Expenses, basically linked to the increase in personnel costs in growing businesses such as Renewables, combined cycles, and Mexico. The traditional electricity business has seen a slight increase, rising 2.8%.
- 25.7% increase in External Services due to the higher level of activity in connection with the new combined cycle and renewable facilities, Latin America as well as Supply expenses. This also includes 29 million euros in costs for the second nuclear fuel cycle (Enresa), which had no equivalent in 2005.

In addition, there is a positive impact resulting from exchange rate differences (17 million euros) due to changes in currencies for the Latin American businesses. Like-for-like, Net Operating Expenses are up 13.1% (compared with the 18.3% reported), after deducting the impact of exchange rates and expenses for the second nuclear fuel cycle (Enresa).

Net operating expenses can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	431.1	9.8%
Personnel	515.1	8.4%
In-house work on fixed assets	-84	1.7%
Net External Services	406.1	28.9%
External Services	498.5	25.7%
Other operating revenues	-92.4	13.1%
TOTAL	837.2	18.3%

In addition, taxes are up 11.1% to 105.4 million euros, primarily factoring in taxes paid on the new facilities brought into service and the higher payments stemming from the increase in energy billed under tariff.

5. EBIT

EBIT rose to 1,388.5 million euros, up 24.9% compared to the first half of 2005.

Amortisation and Provisions are up 8.8% (42.9 million euros), way below the 20.0% growth achieved in EBITDA, offsetting the increase generated by the business operative as already outlined above, paving the way for an increase in EBIT almost five percentage points higher than the level recorded for EBITDA. This increase in Amortisation and Provisions is mainly due to:

- The 7.3% increase in Amortisation, up to 503.7 million euros. This increase is due to the new facilities brought into service since the end of the first half of 2005.
- Provisions are up 57.7% to 24,2 million euros, with 90% relating to activities in Spain and the remaining 10% to Latin America.

Million euros	H1 2006	H1 2005	Change %
Amortisation	503.7	470	+7.3%
Provisions	24.2	15	+57.7%
TOTAL	527.9	485	+8.8%

6. FINANCIAL RESULT

The **Financial Result** came to **-273.5 million euros, 39.5% higher** than in first half of 2005. This increase basically reflects the 26.1% increase in financial expenses, due to the impact of the tariff insufficiency over the period, causing a higher average balance of debt in relation to the first half 2005 of 1,978 million euros, as well as to the inclusion of a provision for the discount of the amount over the nominal value of potential debt to be securitised and the effect of the evolution of the exchange rates in the currencies from Latin America businesses.

Furthermore, financial revenues are up 9.3% to 170.3 million euros.

Million euros	H1 2006	H1 2005	Change %
Financial revenues	170.2	155.8	9.3
Financial expenses	(443.8)	(351.9)	26.1
TOTAL	(273.5)	(196.1)	39.5

The average financial cost of debt came out at 4.43% over the first half of 2006, compare to the 4.57% for the same period of 2005.

7. RESULTS OF COMPANIES CONSOLIDATED BY EQUITY METHOD

Results of companies consolidated using the equity method registered a reduction of 12.7 million euros to 12.5 million euros, with most of the result contributed by Other Businesses.

It can be broken down as follows:

Million euros	H1 2006	H1 2005	Change Mil. euros
Other Businesses	10.6	19.6	-9.1
Rest	1.9	5.6	-3.6
TOTAL	12.5	25.2	-12.7

The reduction in Other Businesses was due to companies withdrawn from the perimeter of consolidation, such as Cementos Portland, as well as the lower contribution made by Non-energy businesses.

8. NON-CURRENT ASSETS RESULTS

Recurrent income from Non-current Assets amounted 152.6 million euros, as a

consequence of the sale of real estate assets, and included under recurrent business. IBERDROLA (through the holding company and its subsidiary Iberdrola Inmobiliaria) now controls more than 3,800 buildable square meters. In this way, of the capital gains in the semester for the sales done, 53 million euros came from Iberdrola Inmobiliaria assets and 100 million euros came from the holding company.

9. NET PROFIT

Pre-tax Earnings grew +32.5% to 1,280 million euros. The effective tax rate for the first half of 2006 came out at 35%, higher than the 31.7% recorded for the first six months of 2005.

Lastly, Net Profit rose to 817.7 million euros, up 25.2% compared to the same period of 2005, in line with the 24.9% increase recorded in EBIT.

Results by business

1. DOMESTIC BUSINESS

1.1 Generation

a) Gross margin

The change in the Gross Margin over the first half of 2006 primarily reflects the 5.1% increase in production under the Ordinary Regime. Combined cycles production is up 18.1% and the most polluting technologies – fuel oil (-58%) and coal (-19%) – have strongly reduced their production levels, while both nuclear and hydroelectric production levels are up, rising +15.2% and +6.4% respectively.

Prior to analysing these results, it is important to note that the figures for the Generation business are influenced by the change followed in the internal financing contract (IFC) between this business and Supply. The results can be broken down as follows:

GENERA.	H1 2006	vs.	H1 2006	vs.
Mil.eur.	(ex-IFC)	2005	GFI (report.)	2005
Gross Margin	1,353.5	+18.7%	-119	+44.5%
Net Oper.exp.	238.8	+20.5%	238.8	+20.5%
EBITDA	1,091.9	+12.0%	972.9	+41.3%

In terms of reported accounts (without compensating the mentioned IFC), the Gross Margin for the Generation business is up 44.5%. Highlights:

- Net Sales on the Generation business up 47.0%, reflecting the abovementioned

increase in production, in an environment of higher prices (16.2%). In addition, it is important to note that Generation currently sells energy to Supply on a direct basis, by using a bilateral contract.

Fuel Cost & CO₂

Eur/MWh	2006	2005	%
Avg. Fuel Cost	40.7	32.8	+26.2%
CO ₂ Cost (Eur/ton)	23.3	10.4	+124.0%

- Includes C. Cycles, Coal & Oil
- The average cost of fuel (without including nuclear) stands at 40.7 euros/MWh, close to the cap set under Royal Decree 3/2006. In this way, procurements are up 44.2%, almost 3 percentage points lower than the increase recorded in Net Sales, and well below their 79.5% increase at the end of March, with a mix focused on the least polluting technologies and a significant reduction in conventional thermal generation in a situation of high prices for oil-based products on the international markets. Keeping Procurements under control in this way has enabled the company to achieve an increase in its Gross Margin higher than that seen in Net Sales.

In addition to the cost of Procurements, a negative impact of 154.3 million euros has been recorded relative to the cost of emission allowances consumed. Factoring in revenues

for allowances granted to cogeneration plants, the net impact amounts 141.1 million euros.

	Mil. Tn	Average Price	Million euros
Rights allocated	6.3 ⁽¹⁾	22.35	141.1
Rights consumed	6.5	23.32	154.3 ⁽²⁾

(1) Approximative calculation of the comparative effects, given that the allowances allocation are done on an annual basis, managed over a three year period.

(2) Including cost of reduction in consumption.

b) Operating Profit / EBIT

EBIT is up 55.4% compared to the previous year, reaching 777.6 million euros. At the EBITDA level (972.9 million euros) there is an increase of 41.3%. In addition to what has been said at Gross Margin, Net Operating Expenses rose 20.5% to 40.6 million euros as a result of various factors:

- External Services are up 21.3%, due to the combined cycle plants brought into service, with the capacity in operation up 42.9%. This item also includes 29 million euros in expenses for the second part of the nuclear fuel cycle (ENRESA), a situation without any equivalent over the first half of 2005.
- Personnel expenses showed a slight increase, rising 5.3%.

Net Operating Expenses can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	106.8	8.0%
Personnel	116.3	5.3%
In-house work on fixed assets	(9.5)	-17.4%
Net External Services	132.0	32.9%
External Services	162.6	21.3%
Other operating revenues	(30.6)	-11.8%
TOTAL	238.8	20.5%

Taxes are up 13.6% as a result of the new facilities brought into service.

1.2 Supply and Gas

a) Gross Margin

The first half of 2006 saw a significant reduction in the volumes of electricity sold, in line with the strategy of lower business exposure, dropping 69.5%. This reduction is reflected both in Net Sales, down -20.3%, and in Procurements, dropping -22.0%.

In this way, it has been achieved a significant improvement in the Gross Margin, with a positive contribution up to 43 million euros, compared with 17.9 million euros in the same period the previous year.

In the breakdown by business, it is important to highlight:

- Electricity: as mentioned in the section on Generation, the internal financing contract (IFC) has an impact on the results presented for the business. In this way, the Gross Margin for the business, factoring in the

impact of the internal financing contract, is up 126 million euros, thanks to the policy to scale down this activity over the last few months.

b) Operating Profit/EBIT

The policy to reduce exposure to the electricity business and the contribution of the gas business have paved the way for a positive contribution to EBITDA of 6.8 million euros, compared with the -51.7 million euros losses seen over the same period in the previous year.

- Gas: optimization of the gas strategy have been completed in line with the flexibility of the contracts signed, increasing this business' contribution to the gross margin by 66.1 million euros, coming in at 53.2 million euros over the first half of 2006. Gas trading has also seen its contribution rise 40.6 million euros, with gas Supply up 25.5 million euros.

In addition to the elements already presented in relation to the Gross Margin, the business significantly improved its efficiency following the restructuring carried out, reflected in a significant reduction in Operating Expenses, down 87.9 million euros (-47.4%), with Personnel Expenses down -42.1% and External Services down -54.9%, linked to the lower level of activity within the framework of a new more effective organization.

Net Operating Expenses can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	17.3	-45.3%
Personnel	18.3	-42.1%
In-house work on fixed assets	(1.0)	
Net External Services	13.0	-50.0%
External Services	20.4	-54.9%
Other operating revenues	(7.4)	-61.5%
TOTAL	30.3	-47.4%

In this way, the trend for negative contributions to EBIT on the Supply business has basically ended (-0.6 million euros), thanks also to the further reductions seen on Amortisation and Provisions as well as on Taxes:

- -76.5% reduction in Amortisation and Provisions
- -50.8% reduction in Taxes
- The key figures for this business are as follows:

SUPPLY (million euros)	H1 2006	vs. 2005
Net Sales	1,345.4	(20.3)
Gross Margin	43.0	140.2
EBITDA	6.8	N/A
EBIT	(0.6)	N/A

1.3 Renewables

a) Gross Margin

Over the first half of 2006, the Renewables business was affected by the following factors:

- Total installed capacity rose 22.1% (+724 MW), reflected in a significant increase in national and international wind production, up 16.2% to 3,663 GWh, with this growth achieved despite the low wind energy index seen over a few months of the first half. Total output using renewable energies (wind and mini-hydroelectric) is up 14.9%.
- In June 2006, 98% of the facilities were running under the market participation system. In the first half of 2005, a majority of the plants were still operating under the fixed remuneration system. In this way, prices are up 37%.
- Various changes have also been seen in the perimeter of consolidation, with the most significant including the full consolidation of Rokas, after IBERDROLA increased its stake in this company to 49.9%, and the inclusion of the Catefica wind farm in Portugal in the perimeter of consolidation.
- As such, the abovementioned increase in production, combined with the acceleration in growth achieved by transferring most of the facilities over to the market participation system, has enabled the company to increase its Gross Margin for this business by 57.1%, up to 372.3 million euros. International Renewables account for 5.5% of the total. The Gross Margin on Renewables now represents 23.2% of IBERDROLA's total generation activities in Spain.

b) Operating Profit/EBIT:

EBIT increased by 91.2 million euros (+74.2%) due to the following factors:

- EBITDA up 60.0%, in line with the increase in the Gross Margin and despite the +46.6% rise in Net Operating Expenses as a result of the new capacity brought on line. The EBITDA margin rose to 81.5%, compared with 80% over previous periods. In addition, the contribution of Renewables to total EBITDA has continued to trend up, rising to 15.8%.

- EBIT is up 74.2% to 214.1 million euros, reflecting a 33.8% increase in Amortisation and Provisions, with 22.1% additional installed capacity brought online over the period.
- Net Operating Expenses can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	12.6	90.9%
Personnel	14.9	63.7%
In-house work on fixed assets	(2.3)	-8.0%
Net External Services	52.8	38.9%
External Services	57.7	45.3%
Other operating revenues	(4.9)	188.2%
TOTAL	65.4	46.6%

- The key operating figures for this business are as follows:

RENEWABLES (mil. euros)	H1 2006	vs. 2005
Net Sales	372.3	57.1
Gross Margin	372.3	57.1
EBITDA	303.5	60.0
EBIT	214.1	74.2

1.4 Distribution
a) Gross Margin

The Gross Margin on the Distribution business is down -39.3% as a result of the following factors:

- -163.8 million euros for the provisional negative impact resulting from the application of Royal Decree 3/2006 of February 24.
- Negative impact from deviations of -43 million euros resulting from differences between real and standard costs.
- Positive impact of 15 million euros reflecting the increase in retribution for regulated

activities in line with the tariffs plan (Royal Decree 1556/2005).

The recurrent Gross Margin, i.e. not factoring in the impact of Royal Decree-Law 3/2006 and excluding the effects of non-regulated activities over the first half of 2006, comes out at 627.9 million euros, up 0.4% compared with 2005, and in line with the increase in the retribution of the regulated business. Breakdown of the various effects is as follows:

MM€	H1 2006	%
Recurrent Gross Margin*	627,9	+3,1%
RDL 3/2006 impact	-163,8	n/a
Impact from deviations	-43,0	n/a
Reported Gross Margin	421,1	-30,9
Net Operating Expenses	-248,1	+1,7%
Recurrent EBITDA*	329,4	+1,9%
Reported EBITDA	122,6	-62,1%

(*) Excluding for 2005 non regulated business

b) Operating Profit/EBIT

EBITDA on Distribution is down -69.4%, reflecting the downturn on the Gross Margin combined with an 18.3% increase in Taxes, not offset by the efficiency improvements achieved on Net Operating Expenses, which are down 1.3%.

Nevertheless, recurring EBITDA, i.e. without factoring in the impact of Royal Decree-Law 3/2006, totalled 329.4 million euros, 1.9% lower than for the same period in 2005.

Net Operating Expenses can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	106.2	12.4%
Personnel	142.0	4.1%
In-house work on fixed assets	(35.8)	-14.6%
Net External Services	141.9	-9.6%
External Services	175.2	-10.9%
Other operating revenues	(33.3)	-16.3%
TOTAL	248.1	-1.3%

The improvement in efficiency achieved, reducing Net Operating Expenses by 1.3%, is primarily due to efforts to keep External Services under control, with these costs down 10.9%. Personnel costs were also kept under control, rising by only 4.1%, factoring in the costs resulting from the reduction in energy used and the additional cost for transferring part of the workforce from the Supply business.

Amortisation and Provisions are down 4.7% to 112.5 million euros, with the reduction in EBITDA some 27 percentage points lower than the level seen for EBIT, coming in at -96.4 %.

- The key operating figures for this business are as follows:

DISTRIBUTION (mil. euros)	H1 2006	vs. 2005
Net Sales	421.1	-39.6
Gross Margin	421.1	-39.3
EBITDA	122.6	-69.4
EBIT	10.1	-96.4

1.5 Corporation

This basically includes eliminations of inter-group expenses between the corporation and the different businesses

2. INTERNATIONAL BUSINESS

a) Gross Margin

Net Sales from **International** have increased 36.7% to reach 1,134.6 million euros. Mexico, with a 58.4% contribution, is the area that makes the greatest relative contribution, also displaying growth of 31.2% thanks to increases in production and plant availability. It is also notable that there has been an increase in Net Sales in Brazil by 45.2%, essentially resulting from an increase in demand and price adjustments, as well as a favourable change in the currency exchange rate with the Brazilian real in this period.

In **International Business**, the Gross Margin is up 40.2% (+128 million euros) to 446.3 million euros. The change in the overall Gross Margin for the Latin America region can be broken down as follows:

- Increase in the Gross Margin (functional currency): 62.7 million euros.
- Exchange rate effect: 65.3 million euros in total, mainly from the increase in value of the Brazilian currency in relation to the euro (+20.2%).

In **Mexico/Guatemala**, the Gross Margin amounted to 158.2 million euros (+29.8%). This increase is basically due to the full contribution

to the results of the combined cycle of La Laguna (500 MW), as a result of its entry into operation at the end of the first quarter of the past fiscal year, and, secondly, the significant improvements in efficiency and availability of the combined cycle plants, totalling a 22.6% output increase in the area. In addition the dollar appreciated by 5.1%, which created an effect equivalent to 8.4 million euros.

In **Brazil**, the Gross Margin showed an improvement of 46.7% (reaching 288.1 million euros), thanks to: a greater contribution from distribution businesses arising from growth in demand (+4.6%) and tariff revisions and adjustments taking place in April each year and positively affecting the results of the first half of 2006 in relation to that of the past fiscal year. It is also noteworthy the revaluation of the real in relation to the euro (20.2%), with a positive effect of 57 million euros.

b) Operating Profit/EBIT

In **International Business**, EBIT increased 60.6% to 258.2 million euros, reflecting the increase in EBITDA (44.1%) and the smaller increase of amortisation recorded (+6.1%), which, although they risen, grew at a lower rate than the EBITDA mentioned.

With respect to the EBITDA, it registers growth of +34.9% in **Mexico**, mainly as the result of greater activity in Generation because of the increasing contribution from the La Laguna combined cycle, in operation since the end of the first quarter of 2005, and the improvement in efficiency and availability of the region's combined cycles. In **South America** there was a rise of +50.2% due to the change

already described in Gross Margin. Thus, total EBITDA growth in International Business comes out at 44.1%.

The EBITDA per region and business is broken down as follows:

• *Mexico-Guatemala*

Million euros	H1 2006	vs. 2005
Generation	93.7	46.9%
Distribution	30.3	7.8%
TOTAL	124.0	+34.9%

• *South America*

Million euros	H1 2006	vs. 2005
Generation	47.7	103.0%
Distribution	160.8	39.5%
TOTAL	208.5	+50.2%

- The change in Net Operating Expenses for the entire Latin America region can be broken down as follows:

Million euros	H1 2006	vs. 2005
Net personnel expenses	41.4	28.6%
Personnel	49.1	30.2%
In-house work on fixed assets	(7.7)	40.0%
Net External Services	68.5	30.2%
External Services	88.6	42.9%
Other operating income	(20.1)	113.8%
TOTAL	109.9	29.6%

The 29.6% increase in Net Operating Expenses was affected by the impact of the evolution in the exchange rate. Once this effect is deducted, this item grows by only 9.6%.

This can be broken down by region as follows:

Million euros	H1 2006	vs. 2005
Mexico/Guatemala	34.0	13.7%
Net Personnel Expenses	7.4	15.6%
Net External Services	26.6	13.2%
South America	75.9	38.3%
Net Personnel Expenses	34.0	31.8%
Net External Services	41.9	44.0%
TOTAL	109.9	29.6%

- Amortisation and Provisions are up 6.1%, primarily due to the effect of increased amortizations booked as a result of the Altamira and La Laguna combined cycles plants in Mexico and the Termopernambuco plant in Brazil entering into service and operating at full capacity.

The key operating figures for this business are as follows:

INTERNATIONAL (million euros)	H1 2006	vs. 2004 2005
Net Sales	1,134.6	36.7%
Gross Margin	446.3	40.2%
EBITDA	332.5	44.1%
EBIT	258.2	60.6%

3. NON-ENERGY BUSINESSES

a) Gross Margin

Net Sales from Non Energy Businesses grew 32.3% to 751.0 million euros, as an effect of activity in Engineering and Services and the contribution made by IBV, which grew in similar proportions, while Iberdrola Inmobiliaria showed growth in line with the seasonal nature of its business. Iberdrola Ingeniería y Construcción (Iberinco) contributed 221.4 million euros in Net Sales after doubling its contribution.

Gross Margin increased to 330.1 million euros, representing growth of 49.6%. The results can be broken down as follows:

Million €	H1 2006	H1 2005	Chan. MM
Engineering and Services	89.3	55.6	38.7
IBERDROLA Inmobiliaria	60.8	88.4	-27.6
IBV Corporation	84.4	68.2	16.2
Other services	95.6	8.4	87.2
TOTAL	330.1	220.6	109.5

The increase of 33.7 million euros in Engineering and Services was basically due to the margin recorded by Third Parties Services. The increase in Other Services derives from including business activities here that, up to the third quarter of 2005, were included in the Distribution business and which, since the end of fiscal year 2005, have been accounted following the criterion of the 2005 Legal Report.

b) Operating Profit / EBIT

The following table breaks down the EBITDA:

	H1 2006	H1 2005	% Chan.
EBITDA	183.7	122.7	49.7%
Real Estate	47.3	77.2	-38.7%
Engineering and Services	51.2	31.8	61.0%
IBV Corporation	16.4	10.6	54.7%
Other Services	68.8	3.1	N/A

- It is noteworthy the contribution made by Iberdrola Engineering and Services, where EBITDA reached 51.2 million euros, in line with the higher margins achieved, and growth in Net Operating Costs that was considerably below the figure recorded under Gross Margin.
- The contribution made by Other Services was 68.8 million euros, which was influenced by changes in the accounting criterion already referred to under Gross Margin.
- The contribution made by Real Estate was 47.3 million euros, which follows the seasonal trend visible under Gross Margin, to which

must be added growth in Net Operating Costs, particularly in relation to External Services linked to projects on the portfolio.

- IBV Corporation, which is consolidated by proportional consolidation according to IFRS, has contributed 16.4 million euros through its various industrial businesses.

The key operating figures for this business are as follows:

Million €	H1 2006	vs. 2005
NET SALES	751.0	32.3%
GROSS MARGIN	330.1	49.6%
EBITDA	183.7	49.7%
EBIT	149.6	38.4%

The main items for Iberdrola Inmobiliaria at the end of the first half of fiscal year 2006 are the following:

- Iberdrola Inmobiliaria business data:

PORTFOLIO OF BUILDABLE AREA RESIDENTIAL USE (m ²)	
Total	1,610,633
Under construction	140,323
Under management	316,088
In planning	1,154,222

PORTFOLIO OF BUILDABLE AREA COMMERCIAL USE (m ²)	
Total	526,462
Under construction	37,814
Under management	228,841
In planning	259,807

- Iberdrola Inmobiliaria balance sheet data:

Million €	
TOTAL ASSETS	1,658
INTANGIBLE FIXED AND INVESTMENT ASSETS	574
CURRENT ASSETS	1,020
SHAREHOLDERS' EQUITY	644
FINANCIAL DEBT	56

- Iberdrola Inmobiliaria income statement data:

Million €		
		vs. 2005
NET SALES	136.9	-37.2%
GROSS MARGIN	60.8	-31.2%
EBITDA	47.3	-38.7%
EBIT	44.7	-40.7%
Non Current Assets	42.7	N/A
NET PROFIT	58.6	+36.6%

Balance Sheet

January - June 2005

	Million euros	vs. Dec. 2005
TOTAL ASSETS	32,013	5.0%
TANGIBLE & INTANG.		
FIXED ASSETS	21,533	0.9%
LONG-TERM INVESTMENTS	2,025	24.2%
SHAREHOLDERS' EQUITY	9,795	4.0%
NET DEBT	13,605	11.4%

The balance sheet of Iberdrola at June 30, 2006, presents Total Assets of 32,013 million euros. It is worth highlighting the maintenance of its strong capital position even taking into account the investments made in the period (1,153 million euros). The leverage ratio in June 2006 was 54.9% (58.1% if taking into account the financing of the tariff insufficiency). In December 2005, leverage ratio was 53.6% (56.5% if taking into account the financing of the tariff insufficiency). Tariff insufficiency corresponding to Iberdrola added up 1,694 million euros by June 2006, with 1,341 million euros already recognized for 2005.

Analysis of the Balance Sheet

1. FIXED ASSETS

Total investment in the period from January to June 2006 amounted to 1,153 million euros, broken down as follows:

	Jan-Jun 2006	%
Spain	570	49.5%
Generation	176	
Renewables	98	
Distribution	209	
Other	87	
Mexico	116	10.1%
Generation	110	
Distribution	6	
South America	72	6.2%
Generation	6	
Distribution	66	
International: other	395	34.2%
TOTAL	1,153	100.0

With respect to investments in Spain, those made on production activities stand out, totalling 274 million euros, broken down as follows:

- 176 million euros on the Generation Business.
- 98 million euros on the Renewables business.

Investments in Mexico were mainly focused to both the combined cycles of Tamazunchale and Altamira V and VI, with 76 million and 14 million euros respectively. In Brazil investments have primarily been made in distribution, mostly financed through funds generated in Brazil.

Under the heading "International: Other", and totalling 395 million euros, the following investments are included:

- **Stake increase in the share capital of Energías de Portugal (EDP) up to 9.5%.**
Past April 27th Iberdrola raised its stake in Energías de Portugal, S.A. (EDP) from 5.7% to 9.5%. The acquisitions were made in the market amounting 332 MM euros.
- **Renewables outside of Spain (63 MM euros),** basically for the projects in the United States, Brazil and France.

2. SHARE CAPITAL

Share Capital as of June 30, 2006 was comprised of 901,549,181 bearer shares with a par value of 3 euros each.

The General Shareholders' Meeting held last 30 March approved the distribution of a total dividend of 0.885 euros per share charged against fiscal year 2005, representing an increase of 15.2% per share over the dividend paid in 2005. This ratified the commitment assumed by IBERDROLA to increase remuneration to shareholders in line with the growth in Net Profit.

On 2 January 2006 an interim dividend was paid against fiscal year 2005 in the amount of 0.367 euros per share, and on 3 July 2006 a supplementary dividend of 0.518 euro per share was paid.

3. FINANCIAL DEBT

Net financial debt amounted to 11,911 million euros at the end of June, and the financial leverage stood at 54.9%. If it is taken into account the financing of the tariff insufficiency, which at June 2006 amounted, in the case of Iberdrola, 1,694 million euros (1,341 million euros already recognized for 2005 and 353 million euros for the period corresponding from January to June of 2006), net financial debt would be of 13,605 million euros and the leverage would stand at 58.1%

Average cost of debt was situated at 4.43% in June 2006, 14 basis points lower than the one registered in June 2005, despite the upward trend in interest rates.

The debt structure can be broken down by currency and interest rate as follows:

	June 2006	June 2005
Euro	86.3%	86.1%
Dollar	8.6%	8.4%
Real	4.7%	5.1%
Other currencies	0.4%	0.4%
Fixed Rate	57.4%	58.2%
Capped	11.2%	12.0%
Floating Rate	31.4%	29.8%

In line with the policy to minimise financial risks on debt, foreign currency risks have continued to be mitigated through the financing of investments in Latin America in local currencies (the real, in the case of Brazil) or in their functional currencies (the dollar, in the case of Mexico).

The debt structure per company is shown in the following table:

	June 2006	June 2005
IBERDROLA, S.A.	85.3%	83.9%
Mexico	4.1%	5.2%
South America	4.4%	5.6%
Renewable energy	3.5%	2.8%
Iberdrola Inmobiliaria and other	2.7%	2.5%
Total	100%	100%

Debt can be broken down by product type as follows:

	June 2006	June 2005
Euro bonds	39.1%	35.4%
US PP	4.5%	3.7%
Other Bonds	3.7%	4.8%
Domestic commercial paper	5.4%	3.8%
Euro commercial paper (ECP)	4.4%	5.2%
Euro loans	35.3%	37.5%
Loans in other currencies	7.6%	9.6%
Total	100%	100%

In addition, as a result of the refinancing policy followed by IBERDROLA the average life of the debt increased from 4.9 years in June of 2005 to 5.0 years in June of 2006.

Lastly, the change in financial leverage has been as follows:

Million €	June 2006	December 2005
Shareholders' equity	9,795	9,415
Gross debt	14,390	13,111
Capitalized derivatives	91	90
Temporary financial investments	462	601
Cash	232	215
Net debt	13,605	12,211
Leverage*	58.1%	56.5%

* Without the effect of the tariff insufficiency, leverage is 54.9% in June 2006 and 53.6% in December 2005

4. WORKING CAPITAL

The figure for Net Working Capital rose to 931 million euros, representing an increase of 384 million euros in relation to the 547 million euros recorded at the end of fiscal year 2005. This increase is broken down as an increase of 648 million euros in Current Assets and an increase of 264 million euros in Current Liabilities. The origin of this change is founded in the Inventories item, with an increase of 208 million euros, basically due to Real Estate (+179 million euros).

5. FUNDS GENERATED FROM OPERATIONS

In June 2006 Funds Generated from Operations amounted 1,180.6 million euros, reflecting an increase of 9% compared to June 2005.

In the last quarterly review done by Moody's agency, the rating of "Excellent" for liquidity, granted in June 2005, was maintained.

Breakdown of business contribution to Profits, Losses and Assets

	Sales	Oper. profit	Net Profit	Assets
Spanish business	79.4%	81.4%	81.8%	85.4%
International business	20.6%	18.6%	18.2%	14.6%
TOTAL	100%	100%	100%	100%

IBERDROLA Senior Unsecured Debt Credit Rating		
Agency	Rating	Outlook
Standard & Poor's (*)	A+	Negative
Moody's (*)	A2	Negative
Fitch IBCA	AA-	Negative

(*) By virtue of the agreement for the acquisition of assets signed with Gas Natural and subject to the approval of the pertinent authorities:

- S&P has rated IBERDROLA Senior Unsecured Debt at "credit watch with negative implications"
- Moody's has rated IBERDROLA Senior Unsecured Debt at "review for a possible downgrade"
- Fitch put the ratings for IBERDROLA Senior Unsecured Debt at "credit watch negative (RWN)", after approval by the Spanish government of the tender offer for Gas Natural and Endesa. Later, in February of 2006, it raised its rating from A+ to AA- as a result of a change in its method of analysis

APPENDIX.- IBERDROLA and sustainability

The contribution of IBERDROLA to sustainable development is reflected in several social responsibility practices that attend to the needs and expectations of its Interest Groups, with whom the Company maintains a combination of open communication channels and dialogue,

which are designed to: communication on goals, activities and successes achieved in the three areas of sustainable development (economic, environmental and social), as well as receiving evaluations and requests from the parties involved.

Recognition

"Best Online Investor Relations Service" Expansión

IBEDROLA web page, in its section corresponding to Investor Relations and Attention to Shareholders has won the price "Best Online Investor Relations Service" of "Favoritos Expansión" prices.

IBERDROLA is First Private Company in Information Transparency in Annual Reports and Economic and Financial Documents, according to the eighth ranking of Information Transparency from El Nuevo Lunes

In May 2006 El Nuevo Lunes conducted a survey for the eighth year running among Analysts on Information Transparency in Annual Reports and other financial, economic and stock market information, covering the same private firms, banks, savings institutions and public companies analysed by the media. IBERDROLA achieved first place in the ranking of private firms, repeating its position from the previous year, with a total of 7.96 points.

3. ENVIRONMENTAL COMPROMISE AND RESPONSIBLE SOCIAL INVESTMENT

Assessment by Analysts and Investors on Socially Responsible Investment

In the University of Hamburg CR-Risk Premium Survey, which is sponsored by the SRI area of Deutsche Bank, IBERDROLA leads

the utilities sector with 30.5 points, compared with an average of 19.2 points for the utilities analysed.

The University of Hamburg CR-Risk Premium study focuses on studying the influence of Corporate Responsibility in the company's cost of capital, by evaluating different areas of the company. The total points which enabled IBERDROLA to achieve lead position were 30.5 points, compared with 19.2 points for the rest of the utilities sector.

The break down by areas of the points achieved by IBERDROLA is as follows:

Areas assessed / Criteria	Points
CR Management	
Strategy and Organisation; Reporting Quality	5.5
Financial Responsibility	
Good Investor Relations; Corporate Governance; Supplier Policy; Client Relations	5.5
Environment Management	
Existence of environmental policy; fixed environment goals; environmental certifications, follow-up of environmental impacts; information on energy mix; energy efficiency programmes; use of renewable energy programmes; adequate focus on climatic strategy and emissions	11
Social Responsibility	
Equal opportunities; Health care programs for employees; Human Resources development programs; Belonging to supra-national organisations; Analysis of social impact of new infrastructures	4.5
Citizenship and relations with environment	
Strategy; Policies, and inclusion in public information	3.0
Management of stakeholders	
Description, consideration of their interests and crisis management	1.0
IBERDROLA ranking	30.5

Action taken and investment to reduce emissions

IBERDROLA, the first Spanish firm to negotiate Joint Application projects to fulfil Kyoto.

IBERDROLA has become the first Spanish firm to negotiate Joint Application (JA) mechanisms to facilitate compliance with the Kyoto Protocol, after starting the procedure with two wind farms in Poland. In particular, this refers to the farms that the company is building in Poland known as Malbork and Kiselice, with an installed capacity of 18 and 40.5 MW and that will start operation at the end of 2006 and beginning of 2007, respectively. These installations will enable reduction of the emission into the atmosphere of more than 93,000 tonnes of CO₂ annually.

As a first step, the Designated National Authority (DNA) has already certified that IBERDROLA has sufficient capacity to carry out wind energy and AC energy projects under Art. 6 of the Kyoto Protocol, a formality required by the host country, Poland, for the Company to be able to obtain approvals for both these initiatives.

IBERDROLA will now continue with the remaining phases of the application procedure: validation of the project by an Accredited Independent Entity (AIE), obtaining the approvals from the Spanish DNA, and the final approval from the Joint Application Supervisory Committee (JASC). The AC projects, which are one of the flexible mechanisms being contemplated in order to facilitate

compliance with the Kyoto Protocol, enable investment in sustainable projects in countries undergoing transition to the market economy which will reduce CO₂ emissions.

IBERDROLA is reducing nitrogen oxide emissions by 35% at the Velilla thermal plant.

IBERDROLA has been able to reduce nitrogen oxide emission by 35% from the Velilla del Río Carrión (Palencia) thermal plant through installing a system called ABACO which minimises the formation of pollutant products during the combustion process. This system, which has begun operation during the past two years in this 515 MW capacity plant, has represented an investment by IBERDROLA of 1.1 million euros. The Company will invest additional 700,000 euros in the second half of 2006 in order to optimise it and improve the performance of the boiler. Thanks to this initiative, IBERDROLA has managed to comply in this thermal plants, and two years in advance, with the limits established for major electric plants of combustion.

4. CONTRIBUTION TO SOCIAL DEVELOPMENT

The key events for IBERDROLA in the first quarter of 2006 for social aspects were as follows:

"Education and Training" Programme

- **Promotion of Energy Savings and Efficiency.** An agreement has been made with the Community of Madrid for the development of a plan of action (seminars, energy audits, etc.), with the purpose of awaring public opinion as to the rational use of energy and thus being

able to achieve a more sustainable development.

- **Promotion of Electrical Safety.** IBERDROLA participates in the Renove plan for electrical installations in housing blocks, which has been set up by the Madrid Regional Authority to improve electrical safety, and has already supervised electrical installations in more than 2,000 buildings. It has continued its education campaigns promoting measures to prevent electrical risks among various professional bodies: contractors and installers (in the País Vasco and Extremadura); firemen (in Guadalajara and Murcia), and police (in Madrid).

Specific Projects

- **"Implica2" Project for the disabled.** IBERDROLA continues developing its ambitious "Implica2" Project, meant to train disabled persons so that they can participate in the labour market. What stands out in this quarter is its support for the Council of Castilla - La Mancha, allowing the Asprona organization in Albacete to benefit from the experience of Fundación Lantegi Batuak. The ultimate objective of IBERDROLA is to extend this model of support to its other areas of influence.
- **Website accessible for disabled persons.** The new IBERDROLA website has obtained an Accessibility Certificate, at AA level, issued by Technosite (a company belonging to the ONCE Foundation). This level guarantees top-

level accessibility to all persons navigating the site.

IBERDROLA is becoming a pioneer company in this area within the Spanish energy sector, and is the first to receive the double A grading from Technosite.

- **Volunteers' Day.** IBERDROLA conducted a Volunteers' Day in Cáceres, in which more than 300 disabled persons from Extremadura participated.

Family Responsibility Business Certificate.

The +Familia Foundation has awarded IBERDROLA its Family Responsibility Certificate according to Regulation 1000-1. The Certificate is valid for three years, during which time annual audits are carried out.

- **Internal Corporate Culture Management Model.** IBERDROLA has launched a project for managing Internal Corporate Culture, understood as the sum of all shared values, behaviour guidelines, work habits and conduct with organisation members, aimed at supporting the commitments acquired in the Strategic Plan.

"Surrounding Economic Development" Programme'

- **Regional Advisory Boards.** Meetings have been held of the Consultative Committees for Castilla y León, and the Comunidad Valenciana.

- Support for companies in Castilla y León. IBERDROLA intends to help improve the competitiveness of small businesses in Castilla y León by incorporating participation in the Foro de Empresas and Organizaciones Inductoras de la Excelencia.
- Dissemination of Corporate Social Responsibility. IBERDROLA participated in 13 conferences promoting corporate social responsibility practices, presenting the "IBERDROLA model" to business and academic circles. Our Company, together with the BBVA Foundation and the Fundación Entorno, presented an online course named "RSE+5", which is intended to help small and medium companies to develop sustainable strategies.

Art and culture programme

- **Reconstruction and Illumination of Monuments.** The following projects have been implemented to illuminate Spanish cultural monuments: Cathedral and Walls of Ciudad Rodrigo (Salamanca); Sanctuary of the Virgen del Rosario de Hellín (Albacete) and the Plaza de Sancho Gracia in Espinosa de los Monteros (Burgos). The exhibition "La Luz de Flandes" was opened in Burgos, showing the work that went into the Cartuja de Miraflores, as carried out with the cooperation of IBERDROLA.
- **Publications.** The IBERDROLA Foundation has published four new books on culture and the sciences and also two new Guides to assist

disabled persons and the socially marginalised.

“Solidarity” Programme

- **IBERDROLA Foundation projects.**
The IBERDROLA Foundation has committed its support to 11 new social action projects meant for the disabled, immigrants, and other disadvantaged groups.
- **V International Forum of the Alliance of Cities Against Poverty.** IBERDROLA has supported the Comunidad Valenciana in holding this forum, organized jointly by that administration and the United Nations Programme for Development, with the cooperation of the Parliament of Valencia.

5. CORPORATE GOVERNANCE

The highlights for Corporate Governance during the first half of 2006 were as follows:

Composition of the Board of Directors

At a meeting held on 26 April 2006 the Board of Directors accepted the resignation of D. Iñigo de Oriol Ybarra and enacted the agreement adopted by the Board at a meeting on 20 April 2005 by which D. José Ignacio Sánchez Galán was appointed as the Chairman of the Board of Directors, and consequently replaced D. Iñigo De Oriol Ybarra as Chairman, while remaining as CEO.

On the same date D. José Antonio Garrido Martínez, D. Javier Herrero Sorriqueta and D. Ignacio de Pinedo Cabezudo also tendered their resignations, thus formalising the appointment as board member, by coopting and subject to approval or ratification by the General Meeting of Shareholders, of D. Iñigo Víctor de Oriol Ibarra, who is classified as part of “other external board members”.

On 24 May 2006 the Board agreed to accept the resignation of D. César de la Mora Armada, D. Antonio Garay Morenés and D. Antonio M^a de Oriol y Díaz-Bustamante, and also to appoint as Vice-presidents the independents D. Juan Luis Arregui Ciársolo and D. Víctor de Urrutia Vallejo. D. Julián Martínez-Simancas Sánchez was also appointed as Deputy Secretary of the Board.

Finally, at a meeting on 7 June 2006, the resignation of external board member representing substantial shareholders, D. Jesús María Cadenato Matía, was accepted. Also, by coopting and subject to the approval or ratification by the General Meeting of Shareholders, the appointment as board members of Dña. Inés Macho Stadler, D. Braulio Medel Cámara and D. José Carlos Pla Royo, (the first two classed as independent board members and the latter as director representing substantial shareholders) was formalised.

As a consequence the Board of Directors is currently composed of 15 members, from which only the Chairman is classed as executive. The remaining 14 directors include 11 independents, 2 representing substantial shareholders and 1 is classified as “other external shareholders”.

Details on the identity and category of the Directors, and also the composition of the Executive Board, the Auditing and Performance Board, and the Appointments and Salaried Committee, are available in constantly updated form at www.iberdrola.com (information for shareholders and investors / corporate governance / board).

Amendments to the Company Regulations

The General Shareholders' Meeting held on 30 March 2006 ratified the following amendments to the Company's By-laws and the Regulations of the General Shareholders' Meeting:

1. Modification of Article 19 of the By-laws and Article 8 of the Regulations of the General Shareholders' Meeting to adapt the wording of both provisions to that established in the First Final Provision of Law 19/2005 of 14 November on European joint stock companies domiciled in Spain, with respect to extending the term for publication of the notice of meeting for a general shareholders' meeting and the right of shareholders to request publication of a supplement to the notice of meeting, including new points on the agenda of meeting.
2. Modification of Article 22 of the By-laws and Article 10 of the Regulations of the General Shareholders' Meeting so as to eliminate the requirement relating to the minimum number of shares conferring the right to attend a general shareholders' meeting.

The full text of the Company By-laws, the Regulations of the General Meeting of Shareholders and other remaining internal regulations currently in force may be consulted at www.iberdrola.com (information for shareholders and investors / corporate governance).

Other Agreements

Furthermore, it was resolved that the firm "ERNST & YOUNG, S.L." be appointed as auditor for the Company and its Consolidated Group, which firm will do the auditing for a period of 3 years for the annual reports for fiscal years 2006, 2007, and 2008". This resolution was adopted at the proposal of the Board of Directors after a favourable report from the Committee on Auditing and Compliance and after bidding among the major international auditing firms within the context of the "Iberdrola Group Policy on Retaining Auditors" approved by that committee on 23 November 2005.

Information Transparency

One of the Company's core Corporate Governance principles is to promote maximum transparency in the information – financial and other – provided to shareholders and markets. In line with this commitment, in the first half of 2006, the company maintained a high level of activity with regard to information for institutional investors and financial analysts, which no doubt contributed to the excellent performance of Iberdrola's stock over the period.

Last 22 February 2006, the Board approved the Annual Report on Corporate Governance for 2005, in accordance with the form required by Circular 1/2004 of 17 March of the Spanish securities regulator (CNMV).

On the same date, the Board of Directors approved the Report on the Activities of the Audit and Compliance Board for fiscal year 2004, the publication of which is intended to contribute to "good practices" in corporate governance by disseminating the annual activities of the latter Board.

The National Stock Market Commission was informed as to all relevant facts connected with the Company's Corporate Government, including, the calling, recording and agreements reached by the General Shareholders' Meeting held on 30 March 2006, as well as the changes among the Board of Directors.

The appropriate notifications were also made in relation to publishing of quarterly and half-yearly information on the current financial year, including information relating to operations with associated undertakings.

All information published in the section on corporate governance of the website www.iberdrola.com is available in Spanish and English.

Spanish stock market commission (CNMV): Significant Events and Other Communications as of April

Event	Registration No.
The Company issues a historic press release at the Conference on Renewable Energy	20345
The Company issues its Energy Balance Sheet for the first quarter of 2006	20382
The Company communicates financial results for H1 2006	20383
The Company announces its financial results for Q1 2006	20451/66091
The Company announces that Iberdrola Portugal has strengthened its participation in EDP - Energías de Portugal – from 5.7% to 9.5% of equity	66093

LEGAL NOTE

" This communication does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities. The shares of Iberdrola S.A. may not be offered or sold in the United States except pursuant to an effective registration statement under the Securities Act or pursuant to a valid exemption from registration."

Málaga, March 7, 2006

Dear Sir,

Through this communication, I inform the National Energy Commission that Unicaja has increased its stake in Iberdrola to 1.5% of its capital share, after making consecutive purchases in the Stock Exchange.

Yours sincerely,

Antonio López López
Investment Banking Director

ACS, Actividades de Construcción y Servicios, S.A.

Madrid, 27th September 2006

Sirs,

Pursuant to the provisions of Article 82 of Law 24/1988 of 24th July regulating the Stock Exchange and ancillary provisions, I bring the following event to your attention.

ACS Group has acquired a shareholding of 6.31% in Iberdrola at 37 euros per share for a total amount of 2,105,896,884 million euros, of which 1.8% has been acquired through a derivative contract. This purchase has been made using a bridging loan granted by BBVA to be refinanced without resorting to shareholders, i.e. without affecting in part or in full any assets of ACS. We consider that this investment has no relevant impact on the consolidated results of the Group.

ACS Group has not undertaken any obligation to acquire further shares at the same price conditions and will decide freely how to act in the market taking into account the circumstances, while communicating any action according to current regulation.

With this shareholding, ACS Group reaffirms its investment in the energy sector, which had already started with a shareholding in Union Fenosa without ACS Group taking any decision to promote the merger between Union Fenosa and Iberdrola.

This financial stake is stable, is made in a company that is a leader in the energy sector, with a management that is led by a Chairman with reputed qualities, and has been performed with the knowledge of Iberdrola.

ACS expressly declares that it has no agreement, contract or understanding with any of the shareholders of Iberdrola, that it has no member on the Board of Directors of this company and that it has no intention to propose the nomination of one.

Faithfully

José Luis del Valle Pérez
Director and Secretary General

IBERDROLA

Note from Iberdrola SA

Iberdrola SA is aware of the information disseminated by the CNMV relating to the purchase by ACS Group of 6.3% of the share capital of Iberdrola SA, an operation which it considers positive as it brings in a new shareholder with a long term perspective.

Madrid, 27th September, 2006

Stamp of Iberdrola

IBERDROLA

Madrid, 5th July 2006

Dear Sirs:

We are pleased to inform you that today, Wednesday 5th July, IBERDROLA has reached an agreement to acquire 11% of the capital of Gamesa from Corporación IBV, a holding company 50% owned by the company and by BBVA. The transaction took place at €16,64/share, which means a total amount of 445 million euros.

With this acquisition, Iberdrola now directly holds 17% of the capital in Gamesa.

Initially, Iberdrola does not plan on designating directors for the purchase of this 11%.

Federico San Sebastián

Madrid, July 10, 2006
National Securities Market Commission

Subject: Notification of significant event

Dear Sirs:

It is our pleasure to inform you that Iberdrola concluded today the purchase of the French company Perfect Wind, considered as one of the firms with more potential in wind developments in France. The operation, to which the Company has earmarked 52 million euros of total expenditure, frames in the international expansion strategy and reinforces Iberdrola as world leader in wind energy.

Perfect Wind has a portfolio of 600 megawatts (MW), 10 MW of which correspond to a wind farm in the testing phase and 86 MW correspond to projects in an advanced stage of development.

With kind regards,
Federico San Sebastian

IMPORTANT INFORMATION

This communication does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval with respect to the proposed acquisition by Iberdrola S.A. of ScottishPower plc (the "Acquisition"), nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

If and when Iberdrola S.A. commences the Acquisition for the ordinary shares of ScottishPower plc and the Acquisition is implemented by way of a scheme of arrangement under the U.K. Companies Act 1985, as amended (the "Scheme"), any securities of Iberdrola S.A. will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), but will be issued in reliance on the exemption provided by Section 3(a)(10) thereof, and ScottishPower plc will furnish the acquisition document to the SEC under cover of a Form 6-K. If and when Iberdrola S.A. determines to commence the Acquisition by way of a takeover offer under The City Code on Takeovers and Mergers of the United Kingdom (the "Offer") rather than the Scheme, Iberdrola S.A. will, to the extent that the shares issued in connection with the proposed Acquisition are required to be registered in the United States, file a registration statement on Form F-4, which will include a prospectus, with the United States Securities and Exchange Commission ("SEC"). **Investors are strongly advised to read the documents that will be made available to them, including the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information regarding Iberdrola S.A., ScottishPower plc, the Acquisition and any Offer. ScottishPower shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower relating to the Acquisition.** If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's web site at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.

The distribution of this communication may, in some countries, be restricted by law or regulation. Accordingly, persons who come into possession of this document should inform themselves of and observe these restrictions. To the fullest extent permitted by applicable law, the companies involved in the proposed Acquisition disclaim any responsibility or liability for the violation of such restrictions by any person. The shares to be issued in connection with the proposed Acquisition may not be offered or sold in the United States except pursuant to an effective registration statement under the Securities Act or pursuant to a valid exemption from registration.

FORWARD-LOOKING STATEMENTS

This communication contains forward-looking information and statements about ScottishPower plc and Iberdrola S.A. and their combined businesses after completion of the proposed Acquisition. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words “expects,” “anticipates,” “believes,” “intends,” “estimates” and similar expressions. Although the managements of ScottishPower plc and Iberdrola S.A. believe that the expectations reflected in such forward-looking statements are reasonable, investors and holders of ScottishPower plc and Iberdrola S.A. shares are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of ScottishPower plc and Iberdrola S.A., that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include those discussed or identified in the public documents sent by ScottishPower plc and Iberdrola S.A. to the *Comisión Nacional del Mercado de Valores* and under “Risk Factors” in the annual report on Form 20-F for the year ended March 31, 2006 filed by ScottishPower plc with the SEC on June 30, 2006. Except as required by applicable law, neither ScottishPower plc nor Iberdrola S.A. undertakes any obligation to update any forward-looking information or statements.

IMPORTANT INFORMATION

This communication does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval with respect to the proposed acquisition by Iberdrola S.A. of ScottishPower plc (the "Acquisition"), nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

If and when Iberdrola S.A. commences the Acquisition for the ordinary shares of ScottishPower plc and the Acquisition is implemented by way of a scheme of arrangement under the U.K. Companies Act 1985, as amended (the "Scheme"), any securities of Iberdrola S.A. will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), but will be issued in reliance on the exemption provided by Section 3(a)(10) thereof, and ScottishPower plc will furnish the acquisition document to the SEC under cover of a Form 6-K. If and when Iberdrola S.A. determines to commence the Acquisition by way of a takeover offer under The City Code on Takeovers and Mergers of the United Kingdom (the "Offer") rather than the Scheme, Iberdrola S.A. will, to the extent that the shares issued in connection with the proposed Acquisition are required to be registered in the United States, file a registration statement on Form F-4, which will include a prospectus, with the United States Securities and Exchange Commission ("SEC"). **Investors are strongly advised to read the documents that will be made available to them, including the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information regarding Iberdrola S.A., ScottishPower plc, the Acquisition and any Offer. ScottishPower shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower relating to the Acquisition.** If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's web site at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.

The distribution of this communication may, in some countries, be restricted by law or regulation. Accordingly, persons who come into possession of this document should inform themselves of and observe these restrictions. To the fullest extent permitted by applicable law, the companies involved in the proposed Acquisition disclaim any responsibility or liability for the violation of such restrictions by any person. The shares to be issued in connection with the proposed Acquisition may not be offered or sold in the United States except pursuant to an effective registration statement under the Securities Act or pursuant to a valid exemption from registration.

FORWARD-LOOKING STATEMENTS

DISCLAIMER

This report and has been prepared by Iberdrola S.A. in relation to the potential acquisition of the shares of ScottishPower plc. and for presentations to the media, investors and analysts. Therefore, this report can not be disclosed, released or relied or be used by any other person for any purpose other than the purpose stated above, except with the written consent of Iberdrola S.A.

The estimates, projections and forecasts used in this report have been prepared for illustration purposes only. The projections and forecasts involve significant assumptions and subjective judgments, which may or may not prove to be correct. No representation or warranty, express or implied, is or will be given by Iberdrola S.A. as to the accuracy, completeness or fairness of any information contained in this report and, nothing in this report should be relied upon as a promise or representation as to the past, current situation or future of Iberdrola S.A.

The content of this report is addressed to individuals and corporations who do not have the appropriate knowledge of Iberdrola S.A. or its activity, and therefore neither Iberdrola S.A. nor its legal advisers, accountants or financial advisers assume any liability whatsoever for this report or its use for any other purpose other than as set forth above. By delivering this report Iberdrola S.A. does not undertake any obligation to update any of the information contained herein or to correct any inaccuracies which may include.

This report does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase or exchange any securities with respect to Iberdrola S.A. or ScottishPower plc.

Rule 425 Legend

IMPORTANT INFORMATION IN THE US

This communication does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval with respect to the proposed acquisition by Iberdrola S.A. of ScottishPower plc. (the "Acquisition"), nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

If and when Iberdrola S.A. commences the Acquisition for the ordinary shares of ScottishPower plc. and the Acquisition is implemented by way of a scheme of arrangement under the U.K. Companies Act 1985, as amended (the "Scheme"), any securities of Iberdrola S.A. will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), but will be issued in reliance on the exemption provided by Section 3(a)(10) thereof, and ScottishPower plc. will furnish the acquisition document to the SEC under cover of a Form 6-K. If and when Iberdrola S.A. determines to commence the Acquisition by way of a takeover offer under The City Code on Takeovers and Mergers of the United Kingdom (the "Offer") rather than the Scheme, Iberdrola S.A. will, to the extent that the shares issued in connection with the proposed Acquisition are required to be registered in the United States, file a registration statement on Form F-4, which will include a prospectus, with the United States Securities and Exchange Commission ("SEC"). Investors are strongly advised to read the documents that will be made available to them, including the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information regarding Iberdrola S.A., ScottishPower plc., the Acquisition and any Offer.

ScottishPower plc. shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower plc. relating to the Acquisition. If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's web site at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.

The distribution of this communication may, in some countries, be restricted by law or regulation. Accordingly, persons who come into possession of this document should inform themselves of and observe these restrictions. To the fullest extent permitted by applicable law, the companies involved in the proposed Acquisition disclaim any responsibility or liability for the violation of such restrictions by any person.

The shares to be issued in connection with the proposed Acquisition may not be offered or sold in the United States except pursuant to an effective registration statement under the Securities Act or pursuant to a valid exemption from registration.

FORWARD-LOOKING STATEMENTS

This communication contains forward-looking information and statements about ScottishPower plc. and Iberdrola S.A. and their combined businesses after completion of the proposed Acquisition. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expects," "anticipates," "believes," "intends," "estimates" and similar expressions. Although the managements of ScottishPower plc. and Iberdrola S.A. believe that the expectations reflected in such forward-looking statements are reasonable, investors and holders of ScottishPower plc. and Iberdrola S.A. shares are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of ScottishPower plc. and Iberdrola S.A., that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include those discussed or identified in the public documents sent by ScottishPower plc. and Iberdrola S.A. to the Comisión Nacional de Valores and under "Risk Factors" in the annual report on Form 20-F for the year ended March 31, 2006 filed by ScottishPower plc. with the SEC on June 30, 2006. Except as required by applicable law, neither ScottishPower plc. nor Iberdrola S.A. undertakes any obligation to update any forward-looking information or statements.

Notes

The Notes on Form 8.1 can be viewed on the Takeover Panel's website at www.thetakeoverpanel.org.uk

IMPORTANT INFORMATION

This communication does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval with respect to the proposed acquisition by Iberdrola S.A. of ScottishPower plc (the "Acquisition"), nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

If and when Iberdrola S.A. commences the Acquisition for the ordinary shares of ScottishPower plc and the Acquisition is implemented by way of a scheme of arrangement under the U.K. Companies Act 1985, as amended (the "Scheme"), any securities of Iberdrola S.A. will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), but will be issued in reliance on the exemption provided by Section 3(a)(10) thereof, and ScottishPower plc will furnish the acquisition document to the SEC under cover of a Form 6-K. If and when Iberdrola S.A. determines to commence the Acquisition by way of a takeover offer under The City Code on Takeovers and Mergers of the United Kingdom (the "Offer") rather than the Scheme, Iberdrola S.A. will, to the extent that the shares issued in connection with the proposed Acquisition are required to be registered in the United States, file a registration statement on Form F-4, which will include a prospectus, with the United States Securities and Exchange Commission ("SEC"). **Investors are strongly advised to read the documents that will be made available to them, including the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information regarding Iberdrola S.A., ScottishPower plc, the Acquisition and any Offer. ScottishPower shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower relating to the Acquisition.** If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's web site at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.

The distribution of this communication may, in some countries, be restricted by law or regulation. Accordingly, persons who come into possession of this document should inform themselves of and observe these restrictions. To the fullest extent permitted by applicable law, the companies involved in the proposed Acquisition disclaim any responsibility or liability for the violation of such restrictions by any person.

The shares to be issued in connection with the proposed Acquisition may not be offered or sold in the United States except pursuant to an effective registration statement under the Securities Act or pursuant to a valid exemption from registration.

Additional communications regarding IBERDROLA's operation for ScottishPower.

IMPORTANT INFORMATION

This communication does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval with respect to the proposed acquisition by Iberdrola S.A. of ScottishPower plc (the "Acquisition"), nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

If and when Iberdrola S.A. commences the Acquisition for the ordinary shares of ScottishPower plc and the Acquisition is implemented by way of a scheme of arrangement under the U.K. Companies Act 1985, as amended (the "Scheme"), any securities of Iberdrola S.A. will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), but will be issued in reliance on the exemption provided by Section 3(a)(10) thereof, and ScottishPower plc will furnish the acquisition document to the SEC under cover of a Form 6-K. If and when Iberdrola S.A. determines to commence the Acquisition by way of a takeover offer under The City Code on Takeovers and Mergers of the United Kingdom (the "Offer") rather than the Scheme, Iberdrola S.A. will, to the extent that the shares issued in connection with the proposed Acquisition are required to be registered in the United States, file a registration statement on Form F-4, which will include a prospectus, with the United States Securities and Exchange Commission ("SEC"). **Investors are strongly advised to read the documents that will be made available to them, including the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information regarding Iberdrola S.A., ScottishPower plc, the Acquisition and any Offer. ScottishPower shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower relating to the Acquisition.** If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's web site at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.

The distribution of this communication may, in some countries, be restricted by law or regulation. Accordingly, persons who come into possession of this document should inform themselves of and observe these restrictions. To the fullest extent permitted by applicable law, the companies involved in the proposed Acquisition disclaim any responsibility or liability for the violation of such restrictions by any person.

The shares to be issued in connection with the proposed Acquisition may not be offered or sold in the United States except pursuant to an effective registration statement under the Securities Act or pursuant to a valid exemption from registration.

IMPORTANT INFORMATION

This communication does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval with respect to the proposed acquisition by Iberdrola S.A. of ScottishPower plc (the "Acquisition"), nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

If and when Iberdrola S.A. commences the Acquisition for the ordinary shares of ScottishPower plc and the Acquisition is implemented by way of a scheme of arrangement under the U.K. Companies Act 1985, as amended (the "Scheme"), any securities of Iberdrola S.A. will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), but will be issued in reliance on the exemption provided by Section 3(a)(10) thereof, and ScottishPower plc will furnish the acquisition document to the SEC under cover of a Form 6-K. If and when Iberdrola S.A. determines to commence the Acquisition by way of a takeover offer under The City Code on Takeovers and Mergers of the United Kingdom (the "Offer") rather than the Scheme, Iberdrola S.A. will, to the extent that the shares issued in connection with the proposed Acquisition are required to be registered in the United States, file a registration statement on Form F-4, which will include a prospectus, with the United States Securities and Exchange Commission ("SEC"). **Investors are strongly advised to read the documents that will be made available to them, including the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information regarding Iberdrola S.A., ScottishPower plc, the Acquisition and any Offer. ScottishPower shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower relating to the Acquisition.** If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's web site at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.

The distribution of this communication may, in some countries, be restricted by law or regulation. Accordingly, persons who come into possession of this document should inform themselves of and observe these restrictions. To the fullest extent permitted by applicable law, the companies involved in the proposed Acquisition disclaim any responsibility or liability for the violation of such restrictions by any person.

The shares to be issued in connection with the proposed Acquisition may not be offered or sold in the United States except pursuant to an effective registration statement under the Securities Act or pursuant to a valid exemption from registration.

AGREEMENT OF THE COUNCIL OF MINISTERS, by which, in accordance with the provisions in section b) of article 17 of the Law 16/1989 of 17 July for the Defence of Competition, it decides, subject to compliance with conditions, the approval of the economic concentration operation, consisting of the exclusive takeover of ENDESA, S.A. by GAS NATURAL SDG, S.A.

The Second Vice-President of the Government and the Minister of Economy and Finance propose the following Agreement to the Council of Ministers:

WHEREAS the notification given to the Service for the Defence of Competition by GAS NATURAL SDG, S.A., in accordance with the provision in part 1 of article 15 of Law 16/1989 of 17 July for the Defence of Competition, relating to the economic concentration operation, consisting of the exclusive takeover of ENDESA, S.A. by GAS NATURAL SDG, S.A. via a public tender offer for all of its capital stock, which notification gave rise to the Service's dossier N-05082.

WHEREAS the Service for the Defence of Competition proceeded to the study of the aforementioned dossier, raising a proposal, accompanied by a report to the Second Vice-President of the Government and the Minister of Economy and Finance who, pursuant to article 15 of the aforementioned Law 16/1989, resolved to send the dossier to the Court for the Defence of Competition. WHEREAS the National Energy Commission has issued a report in which, taking account of the horizontal, vertical and conglomerate effects of the operation in the different markets, it recommended to the Government the authorization of the operation, subject to various, essentially structural, conditions, to compensate all the detected effects. WHEREAS the Court for the Defence of Competition, following a study of the aforementioned dossier, has issued a report in which, taking into account the damage that the operation could cause on competition, and after evaluating the possible compensatory elements of the acknowledged restrictions, it considered it appropriate to declare the announced operation inadmissible. WHEREAS, pursuant to article 17 of Law 16/1989, it is incumbent on the Government, by proposal of the Minister of Economy and Finance, to decide on the admissibility of the economic concentration operation concerned, subjecting its approval to the observance of conditions. IN VIEW OF the applicable regulations. THE COUNCIL OF MINISTERS, by proposal of the Second Vice-President of the Government and the Minister of Economy and Finance, AGREE: In accordance with the provisions in section b) of article 17 of the Law 16/1989 of 17 July for the Defence of Competition, to subject the approval of the economic concentration operation, consisting of the exclusive takeover of ENDESA, S.A. by GAS NATURAL SDG, S.A., on the fulfilment of the following conditions:

First – GAS NATURAL will release onto the market an annual quantity of natural gas, equal to that imported into the Spanish market by ENDESA in 2005.

Second – GAS NATURAL will release onto the market the annual excess of the SAGANE I contract over the quantity necessary to guarantee the tariff supply, with a maximum of 1bcm, that will be allocated in monthly quantities with an annual horizon.

RECEIVED
15 JUN 23 10 59
OFFICE OF THE
SECRETARY OF STATE
FOR ENERGY

Third – a) The allocation of the gas, in accordance with the first and second conditions, will take place via a public call for tenders, in which any operator may bid that can provide evidence of satisfying the requirements set out in condition sixteen.

b) The release of gas corresponding to the first and second conditions will be carried out over three years, starting from 2007 inclusive. The first call for tenders will be made prior to 31 December 2006.

c) The National Energy Commission will set the exact terms of the procedure for the call for tenders within three months following the adoption of the present Agreement by the Council of Ministers. In any event, the call for tenders will guarantee the transparent and non-discriminatory application by any present or potential bidder involved in the natural gas market in Spain. The conditions of the corresponding gas supply contracts will be in line with the usual practices of the Spanish market.

d) As a result of the call for tenders, GAS NATURAL will supply the corresponding quantity of gas to the selected tenderer via any of the entry points to the Spanish peninsula's system.

e) Determination of the minimum starting price for bids will be based on the corresponding, effective gas supply cost. Pursuant to the second condition, the price that GAS NATURAL receives as payment for the purchased gas during the two first years will correspond with the price in the SAGANE I contract. GAS NATURAL will apply any excess above said price, resulting from the tender, to increasing the planned investments for the improvement of the infrastructures for gas storage, transport networks and energy distribution.

Fourth – GAS NATURAL will proceed with the sale of the ENDESA, S.A. shares in the SAGGAS S.A. and REGANOSA S.A. companies.

Five – GAS NATURAL will sell any direct or indirect shareholding stake in ENGENAS S.A. that exceeds 1% and cannot have any representative in the administration council of said company.

Six – GAS NATURAL will sell electricity power plants with an installed capacity on the Spanish peninsula equivalent to 4300MW of removable generation sources with a remaining useful life of at least 10 years, which will include a minimum of 400MW in both Catalunya and Andalucia. In particular, it must transfer power plants with combined cycle or pondage system with an installed capacity equivalent to 1200 MW.

Seven – Over a period of two years, starting from the implementation of the concentration operation, GAS NATURAL will not be able to acquire from third-parties, directly or indirectly, any combined cycle electricity-generating power plant that is functioning or under trials.

Eight – GAS NATURAL will grant a right to unilateral cancellation without penalization to its current clients for the provision of natural gas, for combined cycle generation.

Nine – GAS NATURAL will sell the equivalent amount to its retail supply business at a free price (retail) of electricity and to ENDESA's gas retail business. For this purpose, the corresponding assets and contracts will be divested into one company, at least, that combines all of the requirements provided for in condition sixteen.

Ten – GAS NATURAL will sell any direct or indirect shareholding stakes that it holds in any independent competitor in the gas and electricity retail business. Specifically, it will transfer its share in Naturgas Energía Grupo, S.A. (formerly Naturcorp Multiservicios, S.A.) and in Gas Natural de Álava, S.A.

Eleven – GAS NATURAL will sell natural gas distribution assets that incorporate complete networks and tariff supply contracts with a minimum of 1,500,000 supply points, giving rise to at least two new operators with a minimum of 250,000 supply points each.

Twelfth – Within six months from the implementation of the concentration operation, GAS NATURAL will hand over to a company or entity independent of any energy supply activity, the capacity to formalize the changes of supplier that take place on behalf of those electricity and natural gas customers, at both tariff and free market prices, whose supply points are in zones where the implementation of the operation will lead to the overlap of electricity and natural networks under GAS NATURAL's control.

To fulfil this condition, it will be essential to make available to this company or independent entity, responsible for managing the changes of supplier, the databases referred to in article 43 of the Royal Decree 1434/2005 of 27 December, which regulate the transport, distribution, marketing, supply activities and procedures for the authorization of natural gas installations, and those in article 7 of the Royal Decree 1435/2005 of 27 December, which regulate the basic conditions of the contracts for purchasing energy and for access to the low-voltage networks.

Thirteen – GAS NATURAL must adapt its structure in order to ensure the functional separation between the regulated and non-regulated businesses. In particular, GAS NATURAL will guarantee the functional separation of the distribution network and retail supply businesses.

Fourteen – For the purposes of the previous conditions, it will be understood that GAS NATURAL is made up of GAS NATURAL SDG S.A. and the companies under its control.

Fifteen – The assets divested in application of the abovementioned conditions must be transferred, together with the contracts, staff and other material and immaterial resources necessary for their adequate autonomous functioning. In this case, the corresponding gas supply contracts will be included, as well as the

supply contracts with customers at free or tariff price. In regard to the combined cycle power stations referred to in the sixth condition, GAS NATURAL will offer the supply of gas necessary for its operation during the two years following the transfer of these power stations, in conditions equivalent to the conditions existing prior to the concentration operation.

Sixteen – The transfer of the assets to disinvest in accordance with the aforementioned conditions will be subject, following a report from the National Energy Commission, to the prior authorization of the Service for Defence of Competition, which will evaluate the competence of the buyer proposed by GAS NATURAL, agreeing to fulfil the following requirements:

a) To be a viable, existing or potential bidder, with no links whatsoever to GAS NATURAL.

b) To have financial resources unconnected to the seller, the proven experience and incentive to maintain and develop the transferred activity. In particular, the buyer must be in condition to guarantee the fulfilment of the requirements set out in the applicable, sectorial regulations, to carry out the corresponding activity and to assume the original strategic plans of the corresponding networks.

c) To not create new problems of competition or cause risks that will delay the application of the agreement. This condition is understood without prejudice to the authorizations that may result as mandatory in application of the regulations currently in force and, particularly, of those that derive, in this case, from the control of the business concentrations on behalf of the corresponding competition authorities.

Seventeen – The transfer of assets provided for in the previous conditions will be carried out in accordance with the timetable shown below, which will start to count from the moment the concentration operation is implemented via the takeover of ENDESA:

a) GAS NATURAL will have a confidential deadline in which to conclude purchase and sales agreements for said assets with third-party operators. Said purchases and sales may be agreed under the conditions that the parties freely negotiate, whenever that does not include the exchange of assets in Spain.

b) If GAS NATURAL has not managed to achieve the condition corresponding to the term of the deadline set out in the previous section, a mandate will be awarded to an independent third-party to proceed with the divestment (divestment trustee) with the purpose of subscribing the corresponding purchase and sales agreements in a confidential maximum deadline. In accordance with the provisions in condition six with reference to the sale of electricity generation assets, GAS NATURAL will transfer power plants with an installed capacity equivalent to 2800MW, including the power stations in Catalunya and Andalucia, in accordance with the timetable set out in the previous points a) and b). The assets equivalent to the additional 1500MW must be sold via a similar process and according to the deadlines set out in sections a) and b) above, which will be counted from the end of the maximum deadline provided for in these same sections. It will be understood that the corresponding condition has been fulfilled when GAS NATURAL has signed a

purchase or sales contract that is solely subject to the suspensive condition of the buyer's approval, pursuant to the provision in condition sixteen, to the detailed legal and technical examination of the assets and, in this case, to the mandatory authorities in application of the current regulations. If some circumstance arises that delays the effective execution of the divestments set out in the previous conditions, GAS NATURAL will immediately inform the Service for the Defence of Competition. On the request of GAS NATURAL and following a report from the National Energy Commission, the Council of Ministers may agree to an extension of the maximum deadlines for the divestment, in respect of the concurrent conditions set out in this condition. Where the proposed purchase or sale is subject to concentrations control and the corresponding competition authorities do not authorise it, the Service for the Defence of the Competition may agree, in regards of the concurrent circumstances, that the corresponding assets are sold by the trustee for divestment in accordance with the provisions in section b) of this condition.

Eighteen – During the transition period between the acquisition of the control of ENDESA by GAS NATURAL and the effective transfer of the assets set out in the previous conditions, GAS NATURAL will abstain from adopting decisions that could jeopardize the autonomous management and the guarantee of the retention value of these assets. Also, GAS NATURAL, will not have access to the sensitive information relating to ENDESA's assets that are included in the divestment package.

With the aim of guaranteeing the fulfilment of this condition, the Government will nominate an independent administrator of the assets to divest, by proposal of GAS NATURAL and the previous report by the National Energy Commission. This administrator will be paid by GAS NATURAL, where the structure of the corresponding payment cannot jeopardize the independency and efficiency of said administrator in the fulfilment of their duties.

Nineteen – Within a month from the date of this Agreement by the Council of Ministers, GAS NATURAL SDG, S.A. must present a detailed, confidential plan of actions and deadlines for the implementation of the conditions contained within, to the Service for the Defence of Competition. The Action Plan will contain a concrete proposal for the appointment and mandate to the trustee of the divestment set out in section b) of condition seventeen, as well as the procedure to nominate the independent administrator of condition eighteen. In any event, adequate guarantees must be set in regards to the access to sensitive commercial information regarding the assets to divest that were not controlled by GAS NATURAL prior to the concentration operation.

Within the maximum period of one month, said plan must be approved, following the report of the National Energy Commission, by the Service for the Defence of the Competition, which may introduce the modifications it considers appropriate for the adequate fulfilment of the conditions in this Agreement. GAS NATURAL will supply to the Service of the Defence of the Competition, to the independent administrator and to the trustee of the divestment, all of the relevant information for the adequate exercise of their functions. In particular, in relation to the asset

transfer process, GAS NATURAL will inform the Service for the Defence of Competition, at least once a month, of the contacts and negotiations with potential purchasers of the assets to divest and will supply a rough draft of the purchase and sales contract as well as a report about the potential purchaser, which contains all the relevant information in order to fulfil the requirements contained in condition sixteen.

Twenty - By virtue of article 18.3 of the Law 16/1989, of 17 July, about Defence of Competition, the Service for the Defence of Competition is entrusted with the monitoring of the execution and fulfilment of this Agreement of the Council of Ministers, counting on the cooperation of the National Energy Commission to achieve this. Similarly, the Service may request information from, or demand actions by, the trustee of the divestment, as provided for in condition seventeen, and of the independent administrator of the assets to divest during the transitional period set out in condition eighteen.

This Agreement understands without prejudice of the authorizations may be mandatory in application of the current regulations. Also, it understands without prejudice of the provision by the National Energy Commission in its resolution of 8 November 2005, ruled in application of function 14 of the Additional Resolution XI, of the Law 34/1998 of 7 October of the Hydrocarbons sector.

IMPORTANT INFORMATION

This communication does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval with respect to the proposed acquisition by Iberdrola S.A. of ScottishPower plc (the "Acquisition"), nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

If and when Iberdrola S.A. commences the Acquisition for the ordinary shares of ScottishPower plc and the Acquisition is implemented by way of a scheme of arrangement under the U.K. Companies Act 1985, as amended (the "Scheme"), any securities of Iberdrola S.A. will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), but will be issued in reliance on the exemption provided by Section 3(a)(10) thereof, and ScottishPower plc will furnish the acquisition document to the SEC under cover of a Form 6-K. If and when Iberdrola S.A. determines to commence the Acquisition by way of a takeover offer under The City Code on Takeovers and Mergers of the United Kingdom (the "Offer") rather than the Scheme, Iberdrola S.A. will, to the extent that the shares issued in connection with the proposed Acquisition are required to be registered in the United States, file a registration statement on Form F-4, which will include a prospectus, with the United States Securities and Exchange Commission ("SEC"). **Investors are strongly advised to read the documents that will be made available to them, including the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information regarding Iberdrola S.A., ScottishPower plc, the Acquisition and any Offer. ScottishPower shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower relating to the Acquisition.** If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's web site at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.

The distribution of this communication may, in some countries, be restricted by law or regulation. Accordingly, persons who come into possession of this document should inform themselves of and observe these restrictions. To the fullest extent permitted by applicable law, the companies involved in the proposed Acquisition disclaim any responsibility or liability for the violation of such restrictions by any person. The shares to be issued in connection with the proposed Acquisition may not be offered or sold in the United States except pursuant to an effective registration statement under the Securities Act or pursuant to a valid exemption from registration.

FORWARD-LOOKING STATEMENTS

This communication contains forward-looking information and statements about ScottishPower plc and Iberdrola S.A. and their combined businesses after completion of the proposed Acquisition. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expects," "anticipates," "believes," "intends," "estimates" and similar expressions. Although the managements of ScottishPower plc and Iberdrola S.A. believe that the expectations reflected in such forward-looking statements are reasonable, investors and holders of ScottishPower plc and Iberdrola S.A. shares are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of ScottishPower plc and Iberdrola S.A., that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include those discussed or identified in the public documents sent by ScottishPower plc and Iberdrola S.A. to the *Comisión Nacional del Mercado de Valores* and under "Risk Factors" in the annual report on Form 20-F for the year ended March 31, 2006 filed by ScottishPower plc with the SEC on June 30, 2006. Except as required by applicable law, neither ScottishPower plc nor Iberdrola S.A. undertakes any obligation to update any forward-looking information or statements.

NOT FOR RELEASE, PUBLICATION OR DISTRIBUTION, IN WHOLE OR IN PART, IN, INTO OR FROM ANY JURISDICTION WHERE TO DO THE SAME WOULD CONSTITUTE A VIOLATION OF THE RELEVANT LAWS OF SUCH JURISDICTION

FOR IMMEDIATE RELEASE

28 November 2006

**RECOMMENDED CASH AND SHARE OFFER
FOR
SCOTTISH POWER PLC
BY
IBERDROLA, S.A.**

Summary

- The Board of Iberdrola, S.A. ("**Iberdrola**") is pleased to announce that it has secured the unanimous recommendation of the Board of Scottish Power plc ("**ScottishPower**") of the terms of an Offer for the acquisition of ScottishPower by Iberdrola and/or a wholly owned subsidiary of Iberdrola (the "**Offer**").
- Under the terms of the Offer, ScottishPower Shareholders will receive 400 pence (Euro 5.90) in cash and 0.1646 of a New Iberdrola Share, for every ScottishPower Share.
- ScottishPower ADS Holders will receive 1600 pence (Euro 23.61) in cash and 0.6584 of a New Iberdrola Share, for every ScottishPower ADS.
- Before the Effective Date, ScottishPower will declare a special dividend of 12 pence (Euro 0.18) (the "**Special Dividend**") for every ScottishPower Share (which will amount to 48 pence (Euro 0.71) for every ScottishPower ADS) payable to ScottishPower Shareholders on the register of ScottishPower on the Scheme Record Date and will be paid shortly after the Effective Date.
- The Offer values each ScottishPower Share at 777 pence (Euro 11.47) and the entire issued ordinary share capital of ScottishPower at approximately £11.6 billion (Euro 17.1 billion) (inclusive of the Special Dividend) (based on the Closing Price of an Iberdrola Share on 27 November 2006 of Euro 32.75 and on an exchange rate of Euro 1.4755: £1).
- Under the terms of the Offer ScottishPower Shareholders will:
 - receive approximately 53.0 per cent. of the consideration in the form of cash, including the Special Dividend; and

- retain an ongoing investment in the Enlarged Iberdrola Group.
- The Offer will include a Mix and Match Facility, allowing ScottishPower Shareholders to elect to vary the proportions of cash and New Iberdrola Shares they receive, subject to the elections made by other ScottishPower Shareholders.
- A Loan Note Alternative will also be offered (other than to ScottishPower Shareholders in Loan Note Restricted Jurisdictions and US resident holders of ScottishPower Shares or ScottishPower ADS Holders).
- The New Iberdrola Shares to be issued are expected to represent approximately 21.4 per cent. of the issued share capital of Iberdrola as enlarged by the acquisition of the ScottishPower Group.
- Established over 100 years ago, Iberdrola is a leading European utility, headquartered in Spain, with business operations in gas and electricity across 28 countries. As of 30 September 2006 it was also one of the world's leading producers of wind energy. In the financial year ended 31 December 2005 it reported total revenues of £7,955 million (Euro 11,738 million) and profit from operations of £1,533 million (Euro 2,262 million).
- ScottishPower is an international energy company, involved in the business of electricity transmission and distribution services in the UK, the supply of electricity and gas services to homes and businesses across the UK and has electricity generation and gas storage facilities in the UK and North America. In the financial year ended 31 March 2006 it reported total revenues of £5,446 million (Euro 8,036 million) and an operating profit of £870 million (Euro 1,283 million) from continuing operations.
- Iberdrola believes the combination with ScottishPower is strategically attractive, creating a leading European integrated utilities group with a broad geographical presence and a strong platform for future growth:
 - the third largest European utility company with a pro forma Enterprise Value of £43.2 billion (Euro 63.8 billion);
 - aggregate installed generation capacity on a pro forma basis of 36,603 MW and 21.4 million electricity points of supply as at 30 September 2006;
 - 5,707 MW of installed wind generation capacity and 333 MW of installed small hydro generation capacity on a pro-forma basis making the combined Group the leading global renewable energy company;

- annual pre-tax operating cost savings of at least £88 million (Euro 130 million)¹ and average annual capital expenditure savings of £30 million (Euro 44 million).¹
- The proposed acquisition is expected to be immediately earnings enhancing.²
- Iberdrola attaches great value to the skills and experience of the business management and employees of ScottishPower. They will be critical to the success of the Enlarged Iberdrola Group and Iberdrola fully expects that they will continue to play a vital role in the business going forward.
- It is intended that the Offer will be made by Iberdrola and/or a wholly owned subsidiary of Iberdrola, and will be implemented by way of a scheme of arrangement under section 425 of the Act.
- The Offer is conditional on, among other things, the approval of both companies' shareholders. In addition to the sanction of the Court, to become effective, the Scheme also requires, amongst other things, the approval of a majority in number representing 75 per cent. or more in value of the relevant ScottishPower Shareholders present and voting in person or by proxy at the Court Meeting and the passing of the ScottishPower EGM Resolution at the ScottishPower EGM. The approval of certain regulatory authorities, including the European Commission, the US Federal Energy Regulatory Commission and US state regulatory commissions or authorities will also be required. In addition, all applicable waiting periods under the United States Hart-Scott-Rodino Antitrust Improvements Act of 1976 and the regulations thereunder, and the Exon-Florio provision of the Defence Production Act of 1950, as amended by Section 5021 of the Omnibus Trade and Competitiveness Act of 1988, will need to have expired.
- The ScottishPower Board, which has been so advised by Morgan Stanley & Co. Limited, consider the terms of the Offer to be fair and reasonable. In providing advice to the ScottishPower Board, Morgan Stanley & Co. Limited has taken into account the commercial assessments of the ScottishPower Board.
- Accordingly, the ScottishPower Board unanimously recommends that ScottishPower Shareholders vote in favour of the Scheme at the Court Meeting and the ScottishPower EGM as they have undertaken to do in respect of their own beneficial holdings of ScottishPower Shares, representing as at the date of this announcement, in aggregate, approximately 0.1 per cent. of the existing ScottishPower Shares.
- The Scheme will be put to ScottishPower Shareholders at the Court Meeting and at the ScottishPower EGM, which will be convened in due course. It is expected that the Scheme Document will be posted to ScottishPower Shareholders in March 2007 and that, subject to the satisfaction of the Conditions, the Scheme will become Effective during April 2007.

¹ The expected cost savings have been calculated on the basis of the existing cost and operating structures of the current Iberdrola Group and ScottishPower Group. These statements of estimated cost savings relate to future actions and circumstances which by their nature involve risks, uncertainties, contingencies and other factors. As a result, the cost savings referred to may not be achieved, or those achieved may be materially different from those estimated.

² This statement does not constitute a profit forecast and should not be interpreted to mean that earnings for the year to 31 December 2007 or any subsequent financial period would necessarily be greater than those for any preceding financial period.

Commenting on today's announcement, Ignacio Galán, Chairman and CEO of Iberdrola, said:

"The proposed integration of ScottishPower with Iberdrola is fully in line with our respective strategies. It will create Europe's third largest utility; it will create value for both our companies; and it will be very positive for employees and consumers, who will benefit from the competitive advantages of the new group. We will be able to achieve near term synergies and access economies of scale in the medium and long term through common systems and processes. The new group will be well positioned for the future European energy market and will enjoy a strong growth platform in Spain, the United Kingdom, Continental Europe, North America and the global market, particularly in renewable energy, a sector in which it will be a world leader. All of this will be positive for all our stakeholders."

Philip Bowman, CEO of ScottishPower, said:

"While ScottishPower has demonstrated strong performance across all its businesses over the past 12 months, consolidation activity has resulted in massive change within the European utilities landscape. ScottishPower needs to expand its geographical presence, diversify operating risks, achieve greater economies of scale and have the financial strength to invest in substantially larger infrastructure projects over coming years. This transaction achieves these objectives without the adverse social consequences for employees that would be likely in most other merger scenarios. The combination of the two businesses will enable ScottishPower to compete on a global scale in an increasingly competitive environment and the terms offered by Iberdrola provide an attractive price for ScottishPower Shareholders and allow shareholders the opportunity to maintain an interest in the Enlarged Iberdrola Group."

Iberdrola will host a conference call and webcast for analysts in Spain at 09.30 (CET) today to discuss this announcement. The dial-in numbers are +34 91 789 5117 (this call will be in Spanish), +34 91 789 2387 (this call will have an English translation) and +44 207 107 0685 (this call will have an English translation). The webcast URL is www.iberdrola.com.

This summary should be read in conjunction with the full text of the following announcement and the Appendices to it.

Appendix I sets out the Conditions and certain further terms of the Scheme. Appendix II sets out the bases and sources of certain of the information contained in this announcement. Appendix III contains the definitions of certain terms used in this announcement.

Iberdrola's financial adviser is ABN AMRO Corporate Finance Limited; Allen & Overy LLP, Uría Menéndez, Milbank, Tweed, Hadley & McCloy LLP, Latham & Watkins, CMS Albiñana & Suárez de Lezo and Dickson Minto W.S. are providing legal advice. ScottishPower's financial adviser is Morgan Stanley & Co. Limited; Linklaters, Sullivan & Cromwell LLP, Garayar Asociados and Shepherd & Wedderburn LLP are providing legal advice.

Each of ABN AMRO Corporate Finance Limited and Hoare Govett Limited, which are authorised and regulated in the United Kingdom by the Financial Services Authority, are acting exclusively for Iberdrola and no one else in connection with the Offer and will not be responsible to anyone other than Iberdrola for providing the protections afforded to the clients of ABN AMRO Corporate Finance Limited or Hoare Govett Limited nor for providing advice in relation to the Offer or any matter or arrangement referred to in this announcement.

Each of Morgan Stanley & Co. Limited and Morgan Stanley & Co. International Limited are acting exclusively for ScottishPower and no one else in connection with the Offer and will not be responsible to anyone other than ScottishPower for providing the protections afforded to their clients nor for providing advice in relation to the Offer or any matter or arrangement referred to in this announcement.

JP Morgan Cazenove Limited is acting exclusively for ScottishPower and no one else in connection with the Offer and will not be responsible to anyone other than ScottishPower for providing the protections afforded to its clients nor for providing advice in relation to the Offer or any matter or arrangement referred to in this announcement.

Further Information on the Offer

The release, publication or distribution of this announcement in jurisdictions other than the United Kingdom may be restricted by law and therefore any persons who are subject to the laws of any jurisdiction other than the United Kingdom should inform themselves about, and observe, any applicable restrictions.

Any failure to comply with the applicable restrictions may constitute a violation of the securities laws of any such jurisdiction. To the fullest extent permitted by applicable law, the companies involved in the proposed Offer disclaim any responsibility or liability for the violation of such restrictions by any person.

This announcement has been prepared for the purposes of complying with English law, the Listing Rules, the rules of the London Stock Exchange and the City Code and the information disclosed may not be the same as that which would have been disclosed if this announcement had been prepared in accordance with the laws and regulations of any jurisdiction outside of the United Kingdom.

This announcement does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval in any jurisdiction pursuant to the Offer or otherwise, nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

This announcement does not constitute a prospectus or prospectus equivalent document. ScottishPower Shareholders are advised to read carefully the formal documentation in relation to the Offer once the Scheme Document has been despatched.

The availability of the New Iberdrola Shares, the Mix and Match Facility and the Loan Note Alternative

under the terms of the Offer to persons who are not resident in the United Kingdom may be affected by the laws of the relevant jurisdictions in which they are located. Persons who are not resident in the United Kingdom should inform themselves of, and observe, any applicable requirements. Further details in relation to Overseas Persons who are ScottishPower Shareholders will be contained in the Scheme Document.

The Iberdrola Shares and any Loan Notes to be issued in connection with the proposed Offer may not be offered or sold in the United States except pursuant to an effective registration statement under the US Securities Act or pursuant to a valid exemption from registration.

To the extent that the Offer is effected by way of the Scheme, the New Iberdrola Shares to be issued to ScottishPower Shareholders under the terms of the Scheme have not been, and will not be, registered under the US Securities Act, or under the securities laws of any state, district or other jurisdiction of the United States, or of Canada, Australia or Japan and no regulatory clearances in respect of the New Iberdrola Shares have been, or will be, applied for in any jurisdiction. It is expected that the New Iberdrola Shares will be issued in reliance upon the exemption from the registration requirements of the US Securities Act provided by Section 3(a)(10) thereof. Under applicable US securities laws, ScottishPower Shareholders who are or will be deemed to be 'affiliates' of ScottishPower or Iberdrola prior to, or of Iberdrola after, the Effective Date will be subject to certain transfer restrictions relating to the New Iberdrola Shares received in connection with the Scheme.

The Loan Notes to be issued pursuant to the Loan Note Alternative have not been, and will not be, listed on any stock exchange and have not been, and will not be registered under the US Securities Act or under the securities laws of any state or other jurisdiction of the United States; the relevant clearances have not been, and will not be, obtained from the securities commission of any province of Canada; nor has any prospectus been lodged with, or registered by, the Australian Securities and Investments Commission; nor have any steps been taken, nor will any steps be taken, to enable the Loan Notes to be offered in compliance with the applicable securities laws of Japan. Accordingly, unless an exemption under relevant securities law is available, the Loan Notes may not be offered, sold, resold, delivered or transferred, directly or indirectly, in or into a Loan Note Restricted Jurisdiction in which an offer of Loan Notes would constitute a violation of the relevant laws of, or require registration of the Loan Notes in, such jurisdiction or to, or for the account or benefit of, a person located in a Loan Note Restricted Jurisdiction.

Whether or not a ScottishPower Shareholder votes at any Court Meeting or at the ScottishPower EGM, if the Offer becomes Effective, the ScottishPower Shares held by all ScottishPower Shareholders will be acquired pursuant to the Scheme and ScottishPower Shareholders will, subject to the Mix and Match Facility and Loan Note Alternative, receive a payment of 400 pence (Euro 5.90) in cash and 0.1646 of a New Iberdrola Share for every ScottishPower Share.

ScottishPower will prepare the Scheme Document to be distributed to ScottishPower Shareholders. Iberdrola and ScottishPower strongly advise ScottishPower Shareholders to read the Scheme Document when it becomes available because it will contain important information relating to the Offer.

Any response in relation to the Offer should be made only on the basis of the information contained in the Scheme Document or any document by which the Takeover Offer is made.

Iberdrola reserves the right to elect to implement the Offer by way of a Takeover Offer, subject to the prior consent of ScottishPower. If the Offer is carried out by way of Takeover Offer, the Takeover Offer may not be made, directly or indirectly, in or into Canada, Australia or Japan, or possibly certain other jurisdictions, and will not be capable of acceptance from or within Canada, Australia or Japan or any such other jurisdictions. Accordingly, copies of this announcement and all other documents relating to any Takeover Offer will not be, and must not be, mailed or otherwise forwarded, distributed or sent in, into or from Canada, Australia or Japan or any such other jurisdictions.

If the Offer were to be made by way of a Takeover Offer, to the extent that the Iberdrola Shares issued in connection with the proposed Takeover Offer are required to be registered in the United States, a registration statement on Form F-4, which will include a prospectus, will be filed with the SEC. If an exemption from the registration requirements of the US Securities Act is available, the Iberdrola Shares issued in connection with the proposed Offer will be made available within the United States pursuant to such exemption and not pursuant to an effective registration statement on Form F-4. **ScottishPower Shareholders are strongly advised to read the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information. ScottishPower Shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower relating to any takeover offer.** If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's website at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.

Persons receiving copies of this announcement and all other documents relating to the Offer (including, without limitation, nominees, trustees and custodians) should observe these restrictions and must not mail or otherwise forward, distribute or send such documents in, into or from Canada, Australia, Japan or any such other jurisdictions in violation of these restrictions and applicable laws. Doing so could, among other things, invalidate any related purported acceptance of the Takeover Offer. The Takeover Offer would be made in accordance with the requirements of the City Code.

The Offer relates to the shares of a Scottish company and is proposed to be made by means of a scheme of arrangement under Section 425 of the Act which will be governed by Scots law. A transaction effected by means of a scheme of arrangement is not subject to the tender offer rules under the Exchange Act. Accordingly, the Scheme is subject to the disclosure requirements, rules and practices applicable in the United Kingdom to schemes of arrangement, which differ from the requirements of US tender offer rules. Financial information included in the relevant documentation will have been prepared in accordance with accounting standards applicable in the UK that may not be comparable to the financial statements of US companies.

Forward Looking Statements

This announcement contains statements about Iberdrola and ScottishPower that are or may be forward

looking statements, including for the purposes of the US Private Securities Litigation Reform Act of 1995. All statements other than statements of historical facts included in this announcement may be forward looking statements. Without limitation, any statements preceded or followed by or that include the words “targets”, “plans”, “believes”, “expects”, “aims”, “intends”, “will”, “should”, “may”, “anticipates”, “estimates”, “synergies”, “cost savings”, “projects”, “strategy” or, words or terms of similar substance or the negative thereof, are forward looking statements. Forward looking statements include statements relating to the following: (i) the expected timetable for completing this transaction, future capital expenditures, expenses, revenues, earnings, synergies, economic performance, indebtedness, financial condition, dividend policy, losses and future prospects of Iberdrola, ScottishPower or the Enlarged Iberdrola Group; (ii) business and management strategies and the expansion and growth of Iberdrola’s, ScottishPower’s or the Enlarged Iberdrola Group’s operations and potential synergies resulting from the acquisition; and (iii) the effects of government regulation on Iberdrola’s, ScottishPower’s or the Enlarged Iberdrola Group’s business.

These forward looking statements are not guarantees of future performance. They have not been reviewed by the auditors of Iberdrola or ScottishPower. These forward looking statements involve known and unknown risks, uncertainties and other factors which may cause them to differ from the actual results, performance or achievements expressed or implied by such forward looking statements. These forward looking statements are based on numerous assumptions regarding the present and future business strategies of such persons and the environment in which each will operate in the future. Investors are cautioned not to place undue reliance on the forward looking statements, which speak only as of the date they were made. All subsequent oral or written forward looking statements attributable to Iberdrola or ScottishPower or any of their respective members, directors, officers or employees or any persons acting on their behalf are expressly qualified in their entirety by the cautionary statement above. All forward looking statements included in this announcement are based on information available to Iberdrola and ScottishPower on the date hereof. Investors should not place undue reliance on such forward looking statements, and we undertake no obligation to publicly update or revise any forward looking statements.

Dealing Disclosure Requirements

Under the provisions of Rule 8.3 of the City Code, if any person is, or becomes, “interested” (directly or indirectly) in one per cent. or more of any class of “relevant securities” of Iberdrola or of ScottishPower, all “dealings” in any “relevant securities” of that company (including by means of an option in respect of, or a derivative referenced to, any such “relevant securities”) must be publicly disclosed by no later than 3.30 pm (London time) on the London business day following the date of the relevant transaction. This requirement will continue until the date on which the acquisition becomes Effective, lapses or is otherwise withdrawn or on which the “offer period” otherwise ends. If two or more persons act together pursuant to an agreement or understanding, whether formal or informal, to acquire an “interest” in “relevant securities” of Iberdrola or ScottishPower, they will be deemed to be a single person for the purpose of Rule 8.3.

Under the provisions of Rule 8.1 of the City Code, all “dealings” in “relevant securities” of Iberdrola or of ScottishPower by Iberdrola or ScottishPower, or by any of their respective “associates”, must be disclosed by no later than 12.00 noon (London time) on the London business day following the date of the relevant transaction.

A disclosure table, giving details of the companies in whose “relevant securities” “dealings” should be disclosed, and the number of such securities in issue, can be found on the Panel’s website at www.thetakeoverpanel.org.uk.

“Interests in securities” arise, in summary, when a person has long economic exposure, whether conditional or absolute, to changes in the price of securities. In particular, a person will be treated as having an “interest” by virtue of the ownership or control of securities, or by virtue of any option in respect of, or derivative referenced to, securities.

Terms in quotation marks are defined in the City Code, which can also be found on the Panel’s website. If you are in any doubt as to whether or not you are required to disclose a “dealing” under Rule 8, you should consult the Panel.

NOT FOR RELEASE, PUBLICATION OR DISTRIBUTION IN WHOLE OR IN PART, IN, INTO OR FROM ANY JURISDICTION WHERE THE SAME WOULD CONSTITUTE A VIOLATION OF THE RELEVANT LAWS OF SUCH JURISDICTION

28 November 2006

**RECOMMENDED CASH AND SHARE OFFER
FOR
SCOTTISH POWER PLC
BY
IBERDROLA, S.A.**

1. Introduction

The Board of Iberdrola, S.A. ("**Iberdrola**") is pleased to announce that it has secured the unanimous recommendation of the Board of Scottish Power plc ("**ScottishPower**") of the terms of an Offer for all of the issued and to be issued ScottishPower Shares. The Offer will be made by Iberdrola and/or a wholly owned subsidiary of Iberdrola. The Offer is proposed to be effected by means of a scheme of arrangement under section 425 of the Act (the "**Scheme**").

Established over 100 years ago, Iberdrola is a leading European utility, headquartered in Spain, with business operations in gas and electricity across 28 countries. In 2005, it had a gross energy production of 85.7 billion KWh. As of 30 September 2006 Iberdrola had total installed generation capacity of 28,065 MW and managed 18.1 million electricity supply points. It is also the world's leading producer of wind energy with 3,743 MW of installed capacity as of 30 September 2006. Iberdrola has an integrated position in the Spanish electricity market. Additionally, it is also involved in engineering and construction and real estate services. For the financial year ended 31 December 2005, the Iberdrola Group had total revenue of £7,955 million (Euro 11,738 million) and a profit from operations of £1,533 million (Euro 2,262 million).

Further information on Iberdrola is set out in paragraph 9 of this announcement.

2. The Offer

It is intended that the Offer will be implemented by way of the Scheme. Under the terms of the Scheme, which will be subject to the further terms and Conditions set out below in Appendix I to this announcement, ScottishPower Shareholders and holders of ScottishPower ADSs at the Scheme Record Date will receive, subject to the elections made under the Mix and Match Facility and the Loan Note Alternative:

for each ScottishPower Share	400 pence (Euro 5.90) in cash; and
for each ScottishPower ADS	1600 pence (Euro 23.61) in cash; and
	0.6584 of a New Iberdrola Share

Before the Effective Date, ScottishPower will declare a special dividend of 12 pence (Euro 0.18) (the "Special Dividend") for every ScottishPower Share (which will amount to 48 pence (Euro 0.71) per ScottishPower ADS) payable to ScottishPower Shareholders on the register of ScottishPower on the Scheme Record Date. This will be paid shortly after the Effective Date.

Based on the Closing Price of an Iberdrola Share on 27 November 2006 (being the last business day prior to this announcement) of £22.20 (Euro 32.75) per Iberdrola Share, the terms of the Offer value each ScottishPower Share at 777 pence (Euro 11.47).

These terms represent:

- a premium of 4.2 per cent. to the Closing Price of 746.00 pence (Euro 11.01) for each ScottishPower Share on 27 November 2006 (being the last day prior to the date of this announcement);
- a premium of 15.8 per cent. to the Closing Price of 671.50 pence (Euro 9.91) for each ScottishPower Share on 7 November 2006 (being the last day prior to the commencement of the offer period); and
- a premium of approximately 21.5 per cent. to the average daily Closing Price of 639.65 pence (Euro 9.44) per ScottishPower Share for the three months ended 7 November 2006 (being the last day prior to the commencement of the offer period).

Fractions of New Iberdrola Shares will not be allotted, but will be aggregated and sold in the market after the Effective Date and the net proceeds of such sale shall be paid in cash to ScottishPower Shareholders entitled thereto in accordance with their fractional entitlements.

The New Iberdrola Shares are expected to represent approximately 21.4 per cent. of the issued share capital of Iberdrola as enlarged by the Offer.

If the Scheme becomes Effective, the Depositary will provide registered holders of ScottishPower ADSs with information regarding the surrender of their ScottishPower ADSs. Additional settlement arrangements for ScottishPower ADS Holders will be set out in the Scheme Document.

The ScottishPower B Shares and the ScottishPower Deferred Shares will not be included in the Offer and the rights attaching to the ScottishPower B Shares and the ScottishPower Deferred Shares will be unaffected by the Offer. The B Share Dividend will continue to be payable annually in arrears on 28 May or such later date as the Directors of Iberdrola and/or ScottishPower may determine. Further details regarding the treatment of the ScottishPower B Shares and the ScottishPower Deferred Shares will be set out in the Scheme Document.

The New Iberdrola Shares will be issued credited as fully paid and will rank pari passu in all respects with existing Iberdrola Shares and will be entitled to all dividends and other distributions declared, made or paid by Iberdrola by reference to a record date on or after the Effective Date but not otherwise. If the Effective

Date is later than 31 May 2007, a final dividend will be declared by ScottishPower which will be retained by ScottishPower Shareholders on the register on such date.

3. Mix and Match Facility

ScottishPower Shareholders will be entitled to elect to vary the proportions of New Iberdrola Shares and cash (with a Loan Note Alternative available to certain ScottishPower Shareholders) consideration they receive in respect of their holdings of ScottishPower Shares, via a mix and match facility (the “**Mix and Match Facility**”), subject to elections made by other ScottishPower Shareholders. To the extent that elections cannot be satisfied in full, they will be scaled down on a pro rata basis. As a result, ScottishPower Shareholders who make an election under the Mix and Match Facility will not necessarily know the exact number of New Iberdrola Shares or the amount of cash (and/or Loan Notes, if applicable) they will receive until settlement of the consideration under the Offer. ScottishPower Shareholders should note that the total number of New Iberdrola Shares and the total amount of cash to be received by the ScottishPower Shareholders in terms of the Offer will not be varied as a result of any mix and match election. Elections under the Mix and Match Facility will not affect the entitlements of those ScottishPower Shareholders who do not make any such elections.

Further information on the Mix and Match Facility and the Loan Note Alternative will be included in the Scheme Document.

If the Scheme becomes Effective then, subject to the Mix and Match Facility and Loan Note Alternative, a payment of 400 pence (Euro 5.90) together with the amount of the Special Dividend in cash and 0.1646 of a New Iberdrola Share per ScottishPower Share will be despatched or, where appropriate, credited through CREST to ScottishPower Shareholders within 14 days of the Effective Date. ScottishPower ADS Holders will receive their consideration from the Depositary through the ScottishPower ADS programme in accordance with the terms of the Deposit Agreement.

4. Recommendation

The ScottishPower Board, which has been so advised by Morgan Stanley & Co. Limited, consider the terms of the Offer to be fair and reasonable. In providing advice to the ScottishPower Board, Morgan Stanley & Co. Limited has taken into account the commercial assessments of the ScottishPower Board.

Accordingly, the ScottishPower Board unanimously recommends that ScottishPower Shareholders vote in favour of the Scheme at the Court Meeting and the ScottishPower EGM as they have undertaken to do so in respect of their own beneficial holdings of ScottishPower Shares, representing as at the date of this announcement, in aggregate, approximately 0.1 per cent. of the existing ScottishPower Shares.

5. Background to and reasons for the Offer

Iberdrola believes that the acquisition will accelerate the achievement of a number of Iberdrola’s objectives, outlined in its 2007-2009 Strategic Plan. The combination of Iberdrola and ScottishPower creates one of the leading European integrated utility companies and the leading global renewable energy player. Based on pro

forma Enterprise Value, the Enlarged Iberdrola Group will be Europe's third largest utility company, valued at £43.2 billion (Euro 63.8 billion). It will have:

- a leading position in the rapidly growing UK and US renewables markets;
- a reinforced market presence in Europe and the US which will provide enhanced opportunities for gas trading and procurement in the increasingly global and LNG-driven gas marketplace;
- an installed generation capacity base of 36,603 MW including 5,707 MW of wind generation capacity and 333 MW of small hydro generation capacity; and
- a regulated networks business with approximately 21.4 million electricity points of supply

The proposed acquisition affords Iberdrola an exceptional opportunity to acquire a vertically integrated utility company, with complementary skills in the attractive liberalised UK market with scope for significant ongoing investment in new generation capacity and networks. The Enlarged Iberdrola Group is well diversified in terms of:

- geographical spread (Spain, United Kingdom, Latin America and North America);
- generation mix (nuclear, coal, wind, hydro and gas); and
- business mix (regulated and non-regulated).

Iberdrola will be able to draw on ScottishPower's considerable experience in deregulated markets and its strong skill sets in retailing and trading. In return, ScottishPower will also benefit from Iberdrola's best-in-class standards in generation and distribution activities.

The Iberdrola Directors believe that the Enlarged Iberdrola Group can achieve annual pre-tax operating cost savings of at least £88 million (Euro 130 million)³ based on the existing cost and operating structures and plans of Iberdrola and ScottishPower. The full annual run rate of these savings will be achieved by the end of the third year after deal following completion of the Offer. Annual capital expenditure savings are anticipated to average at least £30 million (Euro 44 million)³ over the first five years following completion of the Offer.

Annual operating and capital expenditure savings will result from:

- reduction in corporate overheads;
- optimisation of operations and maintenance;

³ The expected cost savings have been calculated on the basis of the existing cost and operating structures of the current Iberdrola Group and ScottishPower Group. These statements of estimated cost savings relate to future actions and circumstances which by their nature involve risks, uncertainties, contingencies and other factors. As a result, the cost savings referred to may not be achieved, or those achieved may be materially different from those estimated.

- transfer of best practice in the generation, supply and distribution businesses; and
- scale efficiencies in the procurement of gas, and of renewable and other generation capital equipment.

The balance sheet and cash flow strength of the Enlarged Iberdrola Group will enable it to capitalise upon and accelerate investment in a number of attractive growth opportunities in existing as well as new markets in both Europe and the Americas.

The proposed acquisition is expected to be immediately earnings enhancing.⁴

6. Management, employees and locations

Iberdrola attaches great value to the skills and experience of the business management and employees of ScottishPower. They will be critical to the success of the Enlarged Iberdrola Group and Iberdrola fully expects that they will continue to play a vital role in the business going forward.

On completion of the Offer, Iberdrola has given assurances to ScottishPower that it will honour the contractual terms and conditions, benefits and existing severance policy of ScottishPower's employees (including pension rights) for at least two years.

Iberdrola will continue to be headquartered in Spain and does not envisage changing the principal locations of ScottishPower's business in the UK and in the US.

7. Share Schemes and Convertible Bonds

The Offer will affect share options and incentive awards granted under the ScottishPower Share Schemes and the Convertible Bonds. Participants in the ScottishPower Share Schemes and Convertible Bondholders will be contacted regarding the effect of the Offer on their rights and appropriate proposals will be made in due course to participants in the ScottishPower Share Schemes and to Convertible Bondholders. Iberdrola has agreed to consider and implement alternative benefits to replace existing share schemes.

Iberdrola has agreed to consider and implement alternative benefits to replace existing share schemes.

8. Information on ScottishPower

ScottishPower is an international energy company, involved in the business of electricity transmission and distribution services in the UK, the supply of electricity and gas services to homes and businesses across the UK and has electricity generation and gas storage facilities in the UK and North America. In the UK, it has a generation capacity of 6,366 MW (including 288 MW of installed wind capacity), a strong presence in the transmission and distribution business (with a RAB of £2.9 billion, as at 31 March 2006) and 5.25 million customers at 31 March 2006, including both electricity and gas. In North America, ScottishPower is active in

⁴ This statement does not constitute a profit forecast and should not be interpreted to mean that earnings for the year to 31 December 2007 or any subsequent financial period would necessarily be greater than those for any preceding financial period.

the thermal generation, wind and gas storage business. ScottishPower had 1,405 MW of wind technology generation capacity as at 31 March 2006.

In the financial year ended 31 March 2006, the ScottishPower Group reported total revenues of £5,446 million (Euro 8,036 million) and an operating profit of £870 million (Euro 1,283 million) from continuing operations.

9. Information on Iberdrola

Iberdrola was founded in 1901. At present, Iberdrola is listed on the Spanish Continuous Market (ticker: IBE.SM) and has a market capitalisation of approximately Euro 29.5 billion (£20 billion) (as of 27 November 2006). Iberdrola's share performance is included in the computation of the Spanish IBEX 35 index and of the Euro Stoxx 50, Dow Jones Sustainability World Index and DJSI Stoxx indexes.

As at 30 September 2006, Iberdrola employed 15,884 people.

In Spain, Iberdrola's generation capacity amounts to 24,420 MW, including 3,728 MW of renewable energy and 4,000 MW of CCGTs as at 30 September 2006. In the distribution business, Iberdrola accounts for 9.7 million electricity points of supply. For the full year ending 31 December 2005, Iberdrola produced 66.2 TWh and distributed energy of 96.3 TWh.

Iberdrola forecasts achieving 7,000 MW of installed renewable power by 2009 and 10,000 MW by 2011. Its strong bid for renewable energy is part of its commitment to the environment, sustainable development and the objectives of the Kyoto Protocol. Iberdrola has become the only Spanish electricity company included in the Climate Leadership Index, an international recognition that demonstrates its firm strategy for combating climate change.

In Europe, in countries outside the Iberian peninsula, Iberdrola's activities are currently focused around electricity trading (with a presence in Switzerland, Germany, the Netherlands, France, Austria, Italy and Belgium) and renewables (in France, Italy, UK, Greece, Germany and Poland).

Iberdrola has consolidated its position as the second largest gas wholesale supplier in Spain.

Iberdrola has signed long-term LNG supply contracts that amount to 6 bcm (thousand million cubic metres) of gas annually. These supply contracts have been entered into with a range of counterparties and each has different commercial terms. This contractual structure, in part, allows Iberdrola to reduce its exposure to currency risks and oil price fluctuations.

Pursuant to the agreements with Sonatrach, Nigeria LNG, GNA, ENI and Snohvit, supplies which originate in Algeria, Nigeria, the Persian Gulf and Trinidad and Tobago are to be delivered to the re-gasification plants of Bilbao, Barcelona, Cartagena, Huelva and Sagunto. Iberdrola also has a long term supply contract via the direct gas pipeline between Algeria and Spain, MEDGAZ, for 1.6 bcm annually.

In addition, Iberdrola has become the main developer of new gas infrastructure in Spain. As of 30 September

2006, Iberdrola owns 25 per cent. and 30 per cent. of the re-gasification plants of BBG (Bilbao) and SAGGAS (Sagunto), respectively, and owns a 12 per cent. interest in the MEDGAZ gas pipeline.

In Latin America, Iberdrola is present in the generation business in Mexico, Chile and Brazil and the distribution business in Brazil, Guatemala and Bolivia. As of 30 September 2006, Iberdrola accounted for 8.4 million connected customers and 3,364 MW of total installed generation capacity in Latin America.

Iberdrola Ingeniería, the engineering and construction company of the group, has wide experience in electric power generation, distribution and control facilities services worldwide and employs more than 1,000 people. At present, the company has projects underway in more than 20 countries and has branches in Mexico, Brazil, Russia, Qatar, Greece, Poland, the UK, the US, Venezuela, Tunisia, Latvia, Kenya and Slovakia. As of today, Iberdrola Ingeniería is Spain's leading electrical engineering company by sales.

Iberdrola Inmobiliaria is a nationally based company offering an extensive portfolio of products, including first homes, holiday homes, offices, industrial buildings and shopping centres. In 2005 it generated a net profit of £64.8 million (Euro 95.6 million), an increase of 8.8 per cent. on the previous year. In 2005 revenue was £317.1 million (Euro 467.9 million), 13.7 per cent. more than in 2004, and gross operating profit (EBITDA) rose 11.0 per cent. to £110.1 million (Euro 162.4 million). During 2005, Iberdrola Inmobiliaria had planned and completed investments of £200.5 million (Euro 295.9 million). As of 30 September 2006, Iberdrola Inmobiliaria had a portfolio of developable land of 2.081 million sqm.

On 3 October 2006, the Iberdrola Directors unanimously approved its 2007-2009 strategic plan - continuing the strategy pursued in the previous five years. This plan contemplates a new investment cycle of £6.1 billion (Euro 9.0 billion) (representing a 20 per cent. increase on the previous three-year period) and illustrates Iberdrola's commitment to the energy sector, both in Spain and internationally.

This new strategic plan, the aim of which is to increase profitability through growth, efficiency and internationalisation, confirms Iberdrola's commitment to the environment and sustainable development. Iberdrola is committed to extending its global leadership in the renewable energy sector by reaching 10,000 MW in 2011 and continuing its investment in clean electricity generation technologies.

10. Endesa S.A./Gas Natural

On 5 September 2005, Iberdrola and Gas Natural SDG ("Gas Natural") signed an agreement whereby Iberdrola would acquire certain assets from the combined company resulting from the acquisition of Endesa, S.A. by Gas Natural. This agreement is subject to, among other things, completion of the takeover bid for Endesa, S.A. that was launched by Gas Natural on 5 September 2005.

The agreement relates to power generation and electric distribution facilities in Spain, power generation facilities in Europe (SNET in France and certain others in Italy) and certain gas distribution systems in Spain where Iberdrola currently operates. Under the terms of the agreement, the relevant assets would be acquired at market values which would be determined by internationally recognised investment banks. At the time of the announcement in September 2005, the consideration for these assets was estimated to be in the range of £4.7 billion to £6.1 billion (Euro 7.0 billion to Euro 9.0 billion). At the present time Gas Natural's bid for

Endesa is substantially lower than a third party competing bid. Also Endesa has obtained a temporary injunction from a Spanish commercial court and the Spanish Supreme Court prohibiting performance of the agreement between Iberdrola and Gas Natural. If Iberdrola is required to purchase assets under this agreement, and provided it obtains all necessary clearances from applicable regulatory and competition authorities. It expects to finance approximately half the price through debt and the remainder with the proceeds of a capital increase.

11. Dealing facility

Subject to clarifying certain legal and regulatory issues and with the agreement of the Panel, Iberdrola has agreed to offer a dealing facility to ScottishPower Shareholders (including UK and US shareholders and holders of ADSs) who own 5,000 or fewer ScottishPower Shares (or 1,250 or fewer ADSs) at the Scheme Record Date. Under such facility, the New Iberdrola Shares to which such shareholders become entitled may be sold for their benefit at no cost provided that they sell their entire holding. Further details of such facility will be included in the Scheme Document.

12. Receipt of Iberdrola Dividends in Sterling

Following completion of acquisition, ScottishPower Shareholders will, subject to complying with certain requirements, be able, if they so wish, to have amounts in respect of dividends paid on New Iberdrola Shares converted into, and paid to them in Sterling. Further details of these arrangements will be set out in the Scheme Document.

13. Financing

The consideration payable to ScottishPower Shareholders under the terms of the Offer will be in cash (or, at the option of certain eligible individual ScottishPower Shareholders, Loan Notes) and New Iberdrola Shares and provided through a combination of new committed credit facilities and the issue of New Iberdrola Shares.

Iberdrola has obtained committed debt financing arranged by ABN AMRO Bank N.V., Barclays Capital and The Royal Bank of Scotland plc in the sum of £7.955 billion. To satisfy acceptances of the share element of the consideration, Iberdrola will also issue approximately 245 million New Iberdrola Shares to ScottishPower Shareholders. As a result, on completion of the Offer, ScottishPower Shareholders will own approximately 21.4 per cent. of the issued share capital of Iberdrola as enlarged by the Offer.

ABN AMRO, financial adviser to Iberdrola, is satisfied that Iberdrola has sufficient resources available to satisfy in full the cash consideration payable to ScottishPower Shareholders under the terms of the Scheme. Further information on the financing will be set out in the Scheme Document.

14. Irrevocable undertakings

Iberdrola has received undertakings to vote in favour of the Offer and the resolutions to be proposed at the Court Meeting and the ScottishPower EGM from the ScottishPower Directors in respect of 142,128

ScottishPower Shares, representing approximately 0.1 per cent. of the ScottishPower Shares. These undertakings are in respect of their aggregate entire beneficial holdings of ScottishPower Shares. These undertakings will cease to have any effect if: (i) the Scheme is withdrawn; or (ii) the ScottishPower Directors withdraw, qualify or modify their recommendation to ScottishPower Shareholders in accordance with the terms of the Implementation Agreement; or (iii) the Implementation Agreement is terminated in accordance with its terms.

15. Structure of the Offer, delisting and de-registration of ScottishPower

It is intended that the Offer will be effected by means of a Scheme. The procedure will involve an application by ScottishPower to the Court to sanction the Scheme. The ScottishPower Shareholders will receive cash (or, other than US resident holders of ScottishPower Shares or ADSs and certain Overseas Persons, Loan Notes pursuant to the Loan Note Alternative in respect of the Loan Note Elected Shares) and New Iberdrola Shares as described in paragraph 2 of this announcement. The implementation of the Scheme is subject to the further terms and Conditions set out in Appendix I and the full terms and Conditions which will be set out in the Scheme Document and will only become Effective if, among other things, the following events occur:

- a resolution to approve the Scheme is passed by a majority in number representing not less than three-fourths in value of the holders of ScottishPower Shares present and voting, whether in person or by proxy, at the Court Meeting(s) (or any adjournment thereof);
- the ScottishPower EGM Resolution is passed by the requisite majority at the ScottishPower EGM;
- the Scheme is sanctioned (with or without modification (but subject to such modification being acceptable to Iberdrola and ScottishPower)), and the associated Capital Reduction is confirmed by the Court and the Scheme becomes Effective by registration of the Court Orders (and the minute of such reduction attached thereto) with the Registrar of Companies and the issue by the Registrar of Companies of a certificate under section 138 of the Act in relation to the Capital Reduction associated with the Scheme; and
- the negotiation and filing with the CNMV of the applicable documentation relating to the issue of the New Iberdrola Shares.

Whether or not a ScottishPower Shareholder's ScottishPower Shares are voted at any Court Meeting or the ScottishPower EGM, if the Offer becomes Effective, those ScottishPower Shares will be acquired pursuant to the Scheme and ScottishPower Shareholders will, subject to the Mix and Match Facility and the Loan Note Alternative, receive a payment of 400 pence (Euro 5.90) in cash and 0.1646 of a New Iberdrola Share for every ScottishPower Share.

Iberdrola shareholder approval will be required for the capital increase of Iberdrola necessary to issue the New Iberdrola Shares required under the terms of the Offer. The Iberdrola Shareholders' Meeting will be convened for the purposes of considering, amongst other things, and, if thought fit, passing resolutions to approve an increase in Iberdrola's share capital, to exclude the pre-emption rights of Iberdrola Shareholders

over the issue of New Iberdrola Shares and to give effect to the Offer. For the resolutions relating to the capital increase to be validly passed, the meeting will require on first call the presence (in person or by proxy) of shareholders representing at least 50 per cent. of the voting capital of Iberdrola (in which case the resolutions may be passed by a simple majority of those voting). On second call, the meeting will require the presence (in person or by proxy) of shareholders representing at least 25 per cent. of the voting capital of Iberdrola (in which case, if shareholders representing less than 50 per cent. of the voting capital of Iberdrola are present (either in person or by proxy) at the meeting, the resolutions must be passed by shareholders representing at least two thirds of the Iberdrola Shareholders present or represented at such meeting, and, if shareholders representing 50 per cent. or more of the voting capital of Iberdrola are present or represented at the meeting, the resolutions may be passed by shareholders representing a simple majority of those shareholders present or represented at such meeting). Iberdrola's by-laws include a voting limitation that prevents any shareholder (individually or jointly with its group or controlled entities) from voting in respect of more than 10 per cent. of the share capital of Iberdrola. Any shares whose votes cannot be cast as a result of the limitation will not be taken into account for the purposes of calculating the majority to approve the relevant resolution. It is expected that the meeting will be held on second call.

The ScottishPower B Shares and the ScottishPower Deferred Shares shall not be included in the Offer and the rights attaching to the ScottishPower B Shares and the ScottishPower Deferred Shares will be unaffected by the Offer. Further details regarding the treatment of the ScottishPower B Shares and the ScottishPower Deferred Shares will be set out in the Scheme Document.

The Scheme is expected to become Effective during the second quarter of 2007, subject to satisfaction of the Conditions set out in Appendix 1 to this announcement, with consideration being despatched to ScottishPower Shareholders (and the Depositary on behalf of ScottishPower ADS Holders) no later than 14 days after the Effective Date. If the Scheme has not become Effective by 31 July 2007, or such later date as Iberdrola and ScottishPower may agree (with, where applicable, the consent of the Panel) and the Court may allow, it will lapse.

Upon the Scheme becoming Effective, it will be binding on all ScottishPower Shareholders, irrespective, in the case of ScottishPower Shareholders, of whether or not they attended or voted at the Court Meeting or the ScottishPower EGM (and if they attended and voted, whether or not they voted in favour). Although ScottishPower ADS Holders will not be entitled to attend the Court Meeting or the ScottishPower EGM, they will be given the opportunity to instruct the Depositary as to how to vote the ScottishPower Shares underlying their ScottishPower ADSs.

ScottishPower intends to make applications to the FSA for the listing of the ScottishPower Shares to be cancelled and to cease to be admitted to trading on the London Stock Exchange's market for listed securities with effect as of or shortly following the Effective Date. The last day of dealings in ScottishPower Shares and ScottishPower ADSs is expected to be the Business Day immediately before the Effective Date and no transfers will be registered after 6.00 pm on that day. It is also expected that, following the Effective Date, the ScottishPower ADS programme and the Deposit Agreement will be terminated and the ScottishPower ADSs will be delisted from the New York Stock Exchange. Iberdrola intends to de-register the ScottishPower Shares and ADSs from the Exchange Act at the earliest practicable date following the Effective Date.

Iberdrola reserves the right to elect, subject to receiving ScottishPower's consent, to implement the Offer for the ScottishPower Shares by way of a Takeover Offer. In such event, the Offer will be implemented on the same terms (subject to appropriate amendments), so far as applicable, as those which would apply to the Scheme except that any such Offer may exclude ScottishPower Shareholders resident in Australia, Japan and Canada.

Further details of the Scheme, including an indicative timetable for its implementation, will be contained in the Scheme Document, together with details of how ScottishPower Shareholders and ScottishPower ADS Holders may participate in the Offer.

16. Loan Note Alternative

As an alternative to some or all of the cash consideration which would otherwise be receivable under the Scheme, ScottishPower Shareholders (other than ScottishPower Shareholders in Loan Note Restricted Jurisdictions and US resident holders of ScottishPower Shares or ScottishPower ADS Holders) will, subject to the conditions and further terms which will be set out in the Scheme Document and the Loan Note Form of Election, be able to elect to receive Loan Notes to be issued by Iberdrola (or by a wholly owned subsidiary of Iberdrola with a guarantee from Iberdrola) on the following basis:

For every £1 of cash consideration	£1 nominal value of Loan Notes
------------------------------------	--------------------------------

Up to a maximum amount of £750 million of Loan Notes in aggregate nominal value will be available under the Loan Note Alternative. To the extent that ScottishPower Shareholders validly elect to receive Loan Notes pursuant to the Loan Note Alternative which in aggregate nominal value exceed such amount, the entitlement of each ScottishPower Shareholder who so validly elects will be scaled down pro rata to the number of ScottishPower Shares in respect of which he has elected for the Loan Note Alternative.

The Loan Notes will be issued by Iberdrola, or a wholly owned subsidiary of Iberdrola, credited as fully paid, in amounts and integral multiples of £1 and the balance of any entitlement that is not a whole multiple of £1 will be disregarded and not issued. The Loan Notes will constitute direct, unsecured and unsubordinated obligations of Iberdrola or, if they are issued by a wholly owned subsidiary, will constitute direct, unsecured and unsubordinated obligations of that subsidiary and such obligations will be guaranteed by Iberdrola. The Loan Notes will bear interest at a rate of 0.50 per cent. below six-month sterling LIBOR to be determined on the first business day of each interest period. Interest will be payable by half-yearly instalments in arrears (less any tax) on 30 June and 31 December in each year. The first payment of interest will be made on the first payment date. On the first payment date, interest will be paid in respect of the period from (and including) the date of issue on the relevant Loan Notes to (but excluding) the first payment date. The Loan Notes will be redeemable, on not less than 14 days' notice, in whole or in part for cash at par at the option of noteholders on any business day between the first payment date and five years from the Effective Date (both dates inclusive).

Unless Iberdrola decides otherwise, no Loan Notes will be issued by Iberdrola unless, on or before the date on which the Scheme becomes Effective, the aggregate nominal value of all Loan Notes to be issued as a

result of valid election for the Loan Note Alternative exceeds £20 million. If such aggregate nominal value is less than £20 million, any such election shall, unless Iberdrola decides otherwise, be void and the relevant ScottishPower Shareholders will be deemed to have elected for cash. Iberdrola (or its wholly owned subsidiary) may redeem all (but not some only) of the Loan Notes (so long as they have been in issue for at least 6 months) if the aggregate nominal value of the outstanding Loan Notes falls below £2 million. Iberdrola may purchase any Loan Notes which have been in issue for at least 6 months at a price by tender available to all holders of Loan Notes alike, or otherwise by agreement with any holders of Loan Notes. The Loan Notes may be redeemed in minimum denominations of £1,000. If not previously redeemed, the final redemption date will be five years from the Effective Date. Any Loan Notes outstanding on the final redemption date will be redeemed at par together with any accrued interest (less any tax) on that date. The Loan Notes will not be transferable, and no application will be made for them to be listed on, or dealt on, any stock exchange or other trading facility.

Loan Notes that may be issued pursuant to the Offer have not been and will not be registered under the US Securities Act or under the relevant securities laws of any state or territory or other jurisdiction of the United States. Accordingly, Loan Notes may not be offered or sold in the United States, except in a transaction not subject to, or in reliance on an exemption from, the registration requirements of the US Securities Act and state securities laws.

Unless Iberdrola otherwise determines, the relevant clearances and registrations have not been, nor will they be, sought or obtained, nor have any steps been taken, nor will any steps be taken, to enable the Loan Notes to be publicly offered in compliance with applicable securities laws of Australia, Canada or Japan or any other jurisdiction. Accordingly, the Loan Notes (subject to certain exceptions) may not be offered, sold, resold, transferred, or delivered, directly or indirectly, in, into or from Australia, Canada or Japan or any other jurisdiction where to do so would violate the laws of that jurisdiction or would require registration thereof in such jurisdiction.

The Loan Note Alternative will be conditional upon the Scheme becoming unconditional and effective and will remain open for election until the date which is 3 months after the Effective Date.

The Loan Notes and the relevant Loan Note instrument will be governed by, and construed in accordance with English law and will be unsecured obligations of Iberdrola or the wholly owned subsidiary of Iberdrola (as the case may be). The due authorisation of the Loan Notes, if issued by Iberdrola, the ranking of the Loan Notes (or the guarantee, as the case may be) and the regulations governing the syndicate of the holders of the Loan Notes (*sindicato de obligacionistas*) will be governed by Spanish Law.

The terms of the Loan Notes will be such that the Loan Notes will not constitute qualifying corporate bonds for individuals for the purposes of UK taxation. Full details of the Loan Notes and the Loan Note Alternative will be contained in the Scheme Document.

17. Implementation Agreement and Inducement Fee

Iberdrola and ScottishPower have entered into an Implementation Agreement which contains certain assurances in relation to the implementation of the Scheme and certain further assurances and confirmations

between the parties, including to implement the Scheme as soon as reasonably practicable. Further information regarding this Implementation Agreement will be set out in the Scheme Document.

As part of the Implementation Agreement, ScottishPower has agreed to pay an Inducement Fee of £50 million (the “**Inducement Fee**”) to Iberdrola if, amongst other things, after the date of this announcement:

- (a) the ScottishPower Directors fail unanimously to recommend the Offer or withdraw or adversely modify or qualify their unanimous recommendation of the Offer; or
- (b) the ScottishPower Directors determine not to implement the Offer by refusing to put forward the Scheme; or
- (c) the Offer is not approved by the ScottishPower Shareholders at the Court Meeting or the ScottishPower EGM Resolution is not approved at the ScottishPower EGM; or
- (d) where the Offer is being made by way of a Scheme, following the resolutions proposed at the Court Meeting and the ScottishPower EGM having been passed by the requisite majorities, the ScottishPower Directors do not seek the Court Orders at the Court Hearings; or
- (e) an Alternative Proposal is made and:
 - (i) such Alternative Proposal (whether or not recommended by the ScottishPower Directors) is declared unconditional in all respects, becomes effective or otherwise completes; or
 - (ii) that Alternative Proposal is referred to the competition authorities, lapses, and the relevant third party makes another offer for ScottishPower which completes, or becomes effective or becomes or is declared unconditional in all respects,

provided that the Inducement Fee is not payable if Iberdrola is in material breach of its obligations under the Implementation Agreement.

ScottishPower has undertaken in the Implementation Agreement not to solicit, or otherwise seek to procure any Alternative Proposal, save that ScottishPower shall not be prohibited from complying with its obligations under Rule 20.2 of the City Code nor shall ScottishPower’s Directors be prohibited from fulfilling their fiduciary duties.

Iberdrola has also agreed to pay ScottishPower the Inducement Fee if, amongst other things, the resolution in respect of the Offer is not passed by the requisite majority of Iberdrola Shareholders at the relevant Iberdrola Shareholders’ meeting or if Iberdrola fails to convene or adjourns and fails to reconvene the Iberdrola Shareholders’ Meeting (other than with the prior written consent of ScottishPower) provided that the Inducement Fee is not payable if ScottishPower is in material breach of its obligations under the Implementation Agreement.

18. Settlement, listing and dealing

Applications will be made for the New Iberdrola Shares to be listed on at least one of the Bolsas de Valores, quoted through the Automated Quotation System of the Bolsas de Valores and cleared and settled through Iberclear, the Spanish clearance and settlement system. Iberclear and its member entities maintain a book-entry system on which details of shareholders' holdings of, and trades in, Iberdrola Shares will be recorded. A statement of ownership of the New Iberdrola Shares will not be issued by Iberclear unless one is requested by the ScottishPower Shareholder. Such statement is not a definitive certificate of title.

Spanish listed companies are obliged to have all of their shares in uncertificated (book entry) form (*anotaciones en cuenta*) and listed on at least one of the Bolsas de Valores. Accordingly, all New Iberdrola Shares delivered to ScottishPower Shareholders will be represented in uncertificated (book entry) form and share certificates will not be issued in respect of such shares. Cheques for the Special Dividend will be despatched to ScottishPower Shareholders no later than fourteen days after the Scheme becomes Effective.

In accordance with Rule 12g-3 of the Exchange Act, on the Effective Date, the Iberdrola Shares will be deemed to be registered with the SEC under the Exchange Act. Accordingly, Iberdrola will succeed to ScottishPower's status as a registrant under the Exchange Act and will therefore become subject to the ongoing reporting obligations of the Exchange Act for so long as Iberdrola remains a registrant. Such reporting obligations include the requirement to file with the SEC annual reports on Form 20-F and to submit to the SEC periodic and other reports on Form 6-K. The Iberdrola Shares will not be listed on the New York Stock Exchange or any other US stock exchange in connection with the deemed registration of the Iberdrola Shares. Iberdrola has not determined whether it will list the Iberdrola Shares on the New York Stock Exchange (either directly or in the form of ADSs) or whether, to the extent possible under applicable US Securities laws as amended from time to time, it will seek to de-register the Iberdrola Shares under the Exchange Act, in each case following the Offer.

Iberdrola intends to de-register ScottishPower's ordinary shares and ADSs under the Exchange Act at the earliest practicable date following the Effective Date.

Further details on settlement, listing and dealing will be included in the Scheme Document.

19. Taxation

Spain

Under Spanish law, Iberdrola is generally required to withhold 15 per cent. on account of Spanish Non Resident Income Tax on dividend payments to shareholders not resident in Spain. Commencing on 1 January 2007, the withholding rate will be increased to 18 per cent. however, Iberdrola will not be obliged to levy such withholding on certain non-resident shareholders who may be exempt from this obligation pursuant to Spanish domestic regulations, or on those shareholders for whom relief may be available in accordance with double tax treaties entered into by Spain. Iberdrola and ScottishPower will further assess the viability of mechanisms that might mitigate these withholding obligations.

United Kingdom

United Kingdom resident shareholders are informed that it is intended that an application for clearance under Section 138 of the Taxation of Chargeable Gains Act 1992 will be made.

United States

United States Internal Revenue Service Circular 230 Notice: To ensure compliance with Internal Revenue Service Circular 230, shareholders are hereby notified that:

- (a) any discussion of US federal tax issues contained or referred to in this press release or any document referred to herein is not intended or written to be used, and cannot be used by shareholders for the purpose of avoiding penalties that may be imposed on them under the US Internal Revenue Code;
- (b) such discussion is written for use in connection with the promotion or marketing of the transactions or matters addressed herein; and
- (c) shareholders should seek advice based on their particular circumstances from an independent tax adviser.

For United States federal income tax purposes, the receipt of New Iberdrola Shares in exchange for ScottishPower Shares or ScottishPower ADSs pursuant to the Scheme will not qualify as a tax-free reorganisation. As a result, individual holders who are US citizens or residents, and other holders that are subject to US taxation in respect of ScottishPower Shares or ScottishPower ADSs, generally will recognise a taxable gain or loss in an amount equal to the difference between the fair market value of the New Iberdrola Shares and the amount of cash received and the tax basis in the ScottishPower Shares or ScottishPower ADSs exchanged. In general, the gain or loss would likely constitute capital gain or loss, but the exact US tax treatment will depend on the holder's particular circumstances, including such holder's holding period for the ScottishPower Shares or ScottishPower ADSs and whether the holder is a dealer in securities or otherwise has a special US tax status. Further information regarding the US federal income tax consequences of the Offer will be provided in the Scheme Document. All holders of ScottishPower Shares and ScottishPower ADSs are urged to consult their own tax advisers to determine the tax consequences of the Offer in their particular circumstances, including the application of federal, state, local and foreign tax laws.

20. Disclosure of interests in ScottishPower

Except as disclosed in this paragraph 20, as at 27 November 2006, the last practicable day before this announcement neither Iberdrola, nor any of the directors of Iberdrola, nor their close relatives and related trusts nor, so far as Iberdrola is aware, any person acting in concert with Iberdrola, (i) has any interest in or right to subscribe for any relevant ScottishPower securities, nor (ii) has any short positions in respect of relevant ScottishPower securities (whether conditional or absolute and whether in the money or otherwise), including any short position under a derivative, any agreement to sell or any delivery obligation or right to

require another person to take delivery, nor (iii) has borrowed or lent any relevant ScottishPower securities (save for any borrowed shares which have been on-lent or sold).

The interests of the ABN AMRO Bank N.V. consist of, as at 27 November 2006, a net long position of 394,935 ScottishPower shares and a net short position of 3,658,843 ScottishPower Shares.

21. Overseas shareholders

The availability of the Mix and Match Facility and the Loan Note Alternative to persons not resident in the United Kingdom may be affected by the laws of their relevant jurisdictions. Such persons should inform themselves about and observe any applicable requirements. Further details in relation to overseas shareholders will be contained in the Scheme Document.

Under the terms of the Offer, Iberdrola has reserved the right, subject to ScottishPower's prior consent, to elect to make a Takeover Offer for ScottishPower as an alternative to a Scheme. If Iberdrola exercises its right to implement the Offer by means of a Takeover Offer, any such offer will be made in compliance with applicable laws and regulations.

22. General

The Scheme will be proposed on the terms and subject to the Conditions set out in this announcement and in Appendix I, and to be set out in the Scheme Document. Following discussions with the Panel, it has been agreed that the Scheme Document will be posted to ScottishPower Shareholders, ScottishPower ADS Holders, participants in the ScottishPower Share Schemes and Convertible Bondholders in March 2007 and that, subject to the satisfaction of the Conditions, the Scheme will become Effective in April 2007.

The Scheme will be governed by Scots law. The Scheme will comply with the applicable requirements of the City Code, the Panel, the London Stock Exchange and the FSA. In addition, the acquisition will be subject to the applicable requirements of Spanish law and regulation.

Neither Iberdrola nor, so far as Iberdrola is aware, any person acting in concert with Iberdrola, has any arrangement in relation to relevant ScottishPower securities. For these purposes, "arrangement" includes any indemnity or option arrangement, any agreement or understanding, formal or informal, of whatever nature, relating to relevant ScottishPower securities which may be an inducement to deal or refrain from dealing in such securities.

Appendix I sets out the Conditions and certain further terms of the Scheme. 0 sets out the bases and sources of certain of the information contained in this announcement. 0 contains the definitions of certain terms used in this announcement.

Each of ABN AMRO Corporate Finance Limited and Hoare Govett Limited, which are authorised and regulated in the United Kingdom by the Financial Services Authority, is acting exclusively for Iberdrola and no one else in connection with the Offer and will not be responsible to anyone other than Iberdrola for providing the protections afforded to the clients of ABN AMRO Corporate Finance Limited or Hoare Govett Limited nor for providing advice in relation to the Offer or any matters or arrangement referred to in this announcement.

Each of Morgan Stanley & Co. Limited and Morgan Stanley & Co. International Limited are acting exclusively for ScottishPower and no one else in connection with the Offer and will not be responsible to anyone other than ScottishPower for providing the protections afforded to their clients nor for providing advice in relation to the Offer or any matter or arrangement referred to in this announcement.

JP Morgan Cazenove Limited is acting exclusively for ScottishPower and no one else in connection with the Offer and will not be responsible to anyone other than ScottishPower for providing the protections afforded to its clients nor for providing advice in relation to the Offer or any matter or arrangement referred to in this announcement.

Further Information on the Offer

The release, publication or distribution of this announcement in jurisdictions other than the United Kingdom may be restricted by law and therefore any persons who are subject to the laws of any jurisdiction other than the United Kingdom should inform themselves about, and observe any applicable restrictions.

Any failure to comply with the applicable restrictions may constitute a violation of the securities laws of any such jurisdiction. To the fullest extent permitted by applicable law, the companies involved in the proposed Offer disclaim any responsibility or liability for the violation of such restrictions by any person.

This announcement has been prepared for the purposes of complying with English law, the Listing Rules, the rules of the London Stock Exchange and the City Code and the information disclosed may not be the same as that which would have been disclosed if this announcement had been prepared in accordance with the laws and regulations of any jurisdiction outside of the United Kingdom.

This announcement does not constitute an offer to purchase, sell or exchange or the solicitation of an offer to purchase, sell or exchange any securities or the solicitation of any vote or approval in any jurisdiction pursuant to the acquisition or otherwise, nor shall there be any purchase, sale or exchange of securities or such solicitation in any jurisdiction in which such offer, solicitation or sale or exchange would be unlawful prior to the registration or qualification under the laws of such jurisdiction.

This announcement does not constitute a prospectus or prospectus equivalent document. ScottishPower Shareholders are advised to read carefully the formal documentation in relation to the Offer once the Scheme Document has been despatched.

Iberdrola reserves the right to elect to implement the Offer by way of a Takeover Offer, subject to the prior

consent of ScottishPower. If the Offer is carried out by way of Takeover Offer, the Takeover Offer may not be made, directly or indirectly, in or into Canada, Australia or Japan, or possibly certain other jurisdictions, and will not be capable of acceptance from or within Canada, Australia or Japan or any such other jurisdictions. Accordingly, copies of this announcement and all other documents relating to the Takeover Offer will not be, and must not be, mailed or otherwise forwarded, distributed or sent in, into or from Canada, Australia or Japan or any such other jurisdictions.

The availability of the New Iberdrola Shares, the Mix and Match Facility and the Loan Note Alternative under the terms of the Offer to persons who are not resident in the United Kingdom may be affected by the laws of the relevant jurisdictions in which they are located. Persons who are not resident in the United Kingdom should inform themselves of, and observe, any applicable requirements. Further details in relation to Overseas Persons who are ScottishPower Shareholders will be contained in the Scheme Document.

The Iberdrola Shares and any Loan Notes to be issued in connection with the proposed Offer may not be offered or sold in the United States except pursuant to an effective registration statement under the US Securities Act or pursuant to a valid exemption from registration.

To the extent that the Offer is effected by way of the Scheme, the New Iberdrola Shares to be issued to ScottishPower Shareholders under the terms of the Scheme have not been, and will not be, registered under the US Securities Act, under the securities laws of any state, district or other jurisdiction of the United States, or of Canada, Australia or Japan and no regulatory clearances in respect of the New Iberdrola Shares have been, or will be, applied for in any jurisdiction. It is expected that the New Iberdrola Shares will be issued in reliance upon the exemption from the registration requirements of the US Securities Act provided by Section 3(a)(10) thereof. Under applicable US securities laws, ScottishPower Shareholders who are or will be deemed to be 'affiliates' of ScottishPower or Iberdrola prior to, or of Iberdrola after, the Effective Date will be subject to certain transfer restrictions relating to the New Iberdrola Shares received in connection with the Scheme.

The Loan Notes to be issued pursuant to the Loan Note Alternative have not been, and will not be, listed on any stock exchange and have not been, and will not be registered under the US Securities Act or under the securities laws of any state or other jurisdiction of the United States; the relevant clearances have not been, and will not be, obtained from the securities commission of any province of Canada; nor has any prospectus been lodged with, or registered by, the Australian Securities and Investments Commission; nor have any steps been taken, nor will any steps be taken, to enable the Loan Notes to be offered in compliance with the applicable securities laws of Japan. Accordingly, unless an exemption under relevant securities law is available, the Loan Notes may not be offered, sold, resold, delivered or transferred, directly or indirectly, in or into a Loan Note Restricted Jurisdiction in which an offer of Loan Notes would constitute a violation of the relevant laws of, or require registration of the Loan Notes in, such jurisdiction or to, or for the account or benefit of, a person located in a Loan Note Restricted Jurisdiction.

Whether or not a ScottishPower Shareholder's ScottishPower Shares are voted at any Court Meeting or the ScottishPower EGM, if the Offer becomes Effective, the ScottishPower Shares held by all ScottishPower Shareholders will be acquired pursuant to the Scheme and ScottishPower Shareholders will, subject to the Mix and Match Facility and the Loan Note Alternative, receive a payment of 400 pence (Euro 5.90) in cash

and 0.1646 of a New Iberdrola Share for every ScottishPower Share.

ScottishPower will prepare the Scheme Document to be distributed to ScottishPower Shareholders. Iberdrola and ScottishPower urge ScottishPower Shareholders to read the Scheme Document when it becomes available because it will contain important information relating to the Offer. ScottishPower Shareholders may obtain a free copy of the Scheme Document when it becomes available.

Any response in relation to the Offer should be made only on the basis of the information contained in the Scheme Document or any document by which the Takeover Offer is made.

*If the Offer were to be made by way of a Takeover Offer, to the extent that the Iberdrola Shares issued in connection with the proposed Takeover Offer are required to be registered in the United States, a registration statement on Form F-4, which will include a prospectus, will be filed with the SEC. If an exemption from the registration requirements of the US Securities Act is available, the Iberdrola Shares issued in connection with the proposed Offer will be made available within the United States pursuant to such exemption and not pursuant to an effective registration statement on Form F-4. **ScottishPower shareholders are strongly advised to read the registration statement and prospectus, if and when available, and any other relevant documents made available to them and/or the SEC or other applicable regulatory authorities, as well as any amendments or supplements to those documents, because they will contain important information. ScottishPower Shareholders should also read the related solicitation/recommendation statement on Schedule 14D-9 that may be filed with the SEC by ScottishPower relating to any takeover offer.** If and when filed, investors may obtain free copies of the registration statement, the prospectus as well as other relevant documents filed with the SEC, at the SEC's website at www.sec.gov and will receive information at an appropriate time on how to obtain these transaction-related documents for free from the parties involved or a duly appointed agent.*

Persons receiving copies of this announcement and all other documents relating to the Offer (including, without limitation, nominees, trustees and custodians) should observe these restrictions and must not mail or otherwise forward, distribute or send such documents in, into or from Canada, Australia, Japan or any such other jurisdictions in violation of these restrictions and applicable laws. Doing so could, among other things, invalidate any related purported acceptance of the Takeover Offer. The Takeover Offer would be made in accordance with the requirements of the City Code.

The Offer relates to the shares of a Scottish company and is proposed to be made by means of a scheme of arrangement under Section 425 of the Act which will be governed by Scots law. A transaction effected by means of a scheme of arrangement is not subject to the tender offer rules under the Exchange Act. Accordingly, the Scheme is subject to the disclosure requirements, rules and practices applicable in the United Kingdom to schemes of arrangement, which differ from the requirements of US tender offer rules. Financial information included in the relevant documentation will have been prepared in accordance with accounting standards applicable in the UK that may not be comparable to the financial statements of US companies.

Forward Looking Statements

This announcement contains statements about Iberdrola and ScottishPower that are or may be forward looking statements, including for the purposes of the US Private Securities Litigation Reform Act of 1995. All statements other than statements of historical facts included in this announcement may be forward looking statements. Without limitation, any statements preceded or followed by or that include the words "targets", "plans", "believes", "expects", "aims", "intends", "will", "should", "may", "anticipates", "estimates", "projects", "strategy" or, words or terms of similar substance or the negative thereof, are forward looking statements. Forward looking statements include statements relating to the following: (i) the expected timetable for completing this transaction, future capital expenditures, expenses, revenues, earnings, synergies, economic performance, indebtedness, financial condition, dividend policy, losses and future prospects of Iberdrola, ScottishPower or the combined group; (ii) business and management strategies and the expansion and growth of Iberdrola's, ScottishPower's or the Enlarged Group's operations and potential synergies resulting from the Offer; and (iii) the effects of government regulation on Iberdrola's, ScottishPower's or the Enlarged Group's business.

These forward looking statements are not guarantees of future performance. They have not been reviewed by the auditors of Iberdrola or ScottishPower. These forward looking statements involve known and unknown risks, uncertainties and other factors which may cause them to differ from the actual results, performance or achievements expressed or implied by such forward looking statements. These forward looking statements are based on numerous assumptions regarding the present and future business strategies of such persons and the environment in which each will operate in the future. Investors are cautioned not to place undue reliance on the forward looking statements, which speak only as of the date they were made. All subsequent oral or written forward looking statements attributable to Iberdrola or ScottishPower or any of their respective Directors, officers or employees or any persons acting on their behalf are expressly qualified in their entirety by the cautionary statement above. All forward looking statements included in this announcement are based on information available to us on the date hereof. Investors should not place undue reliance on such forward looking statements, and we undertake no obligation to publicly update or revise any forward looking statements.

Dealing Disclosure Requirements

Under the provisions of Rule 8.3 of the City Code, if any person is, or becomes, "interested" (directly or indirectly) in one per cent. or more of any class of "relevant securities" of Iberdrola or ScottishPower, all "dealings" in any "relevant securities" of that company (including by means of an option in respect of, or a derivative referenced to, any such "relevant securities") must be publicly disclosed by no later than 3.30 pm (London time) on the London business day following the date of the relevant transaction. This requirement will continue until the date on which the Offer becomes effective, lapses or is otherwise withdrawn or on which the "offer period" otherwise ends. If two or more persons act together pursuant to an agreement or understanding, whether formal or informal, to acquire an "interest" in "relevant securities" of Iberdrola or ScottishPower, they will be deemed to be a single person for the purpose of Rule 8.3.

Under the provisions of Rule 8.1 of the City Code, all "dealings" in "relevant securities" of Iberdrola or of ScottishPower by Iberdrola or ScottishPower, or by any of their respective "associates", must be disclosed by no later than 12.00 noon (London time) on the London business day following the date of the relevant transaction.

A disclosure table, giving details of the companies in whose “relevant securities” “dealings” should be disclosed, and the number of such securities in issue, can be found on the Panel’s website at www.thetakeoverpanel.org.uk.

“Interests in securities” arise, in summary, when a person has long economic exposure, whether conditional or absolute, to changes in the price of securities. In particular, a person will be treated as having an “interest” by virtue of the ownership or control of securities, or by virtue of any option in respect of, or derivative referenced to, securities.

Terms in quotation marks are defined in the City Code, which can also be found on the Panel’s website. If you are in any doubt as to whether or not you are required to disclose a “dealing” under Rule 8, you should consult the Panel.

APPENDIX I
CONDITIONS TO THE IMPLEMENTATION OF THE SCHEME AND
THE OFFER AND CERTAIN FURTHER TERMS OF THE OFFER

The Offer will, if it is implemented by way of the Scheme, be conditional upon the Scheme becoming Effective by 31 July 2007 or such later date as Iberdrola and ScottishPower may, with the consent of the Panel, agree and (if required) the Court may allow.

1. The Scheme will be subject to the following conditions:
 - (a) the approval by a majority in number representing not less than three-fourths in value of the holders of ScottishPower Shares present and voting, whether in person or by proxy, at the Court Meeting(s) (or any adjournment thereof);
 - (b) the ScottishPower EGM Resolution being duly passed by the requisite majority at the ScottishPower EGM (or any adjournment thereof);
 - (c) the sanction of the Scheme (with or without modification (but subject to such modification being acceptable to Iberdrola and ScottishPower)) and the confirmation of the associated Capital Reduction by the Court, an office copy of the Court Order and the minute of such reduction attached thereto being delivered for registration to the Registrar of Companies and, in relation to the Capital Reduction, being registered by him;
 - (d) the negotiation and filing with the CNMV of the applicable documentation relating to the issue of the New Iberdrola Shares; and
 - (e) the passing at the Iberdrola Shareholders' Meeting (or at any adjournment of such meeting) of such resolution or resolutions as may be necessary or desirable to approve, effect and implement the Offer and the acquisition of ScottishPower Shares pursuant to the Offer (as such resolutions may be set out in the Iberdrola Shareholder Circular, including a resolution or resolutions to increase the share capital of Iberdrola and authorise the creation and allotment of New Iberdrola Shares), the making of any offer, proposal or other arrangement to holders of options under the ScottishPower Share Schemes and any necessary increases of the authorised share capital of Iberdrola and allotment and issue of Iberdrola Shares in relation thereto.

2. In addition, Iberdrola and ScottishPower have agreed that the Offer will be conditional upon the following matters and, accordingly the necessary actions to make the Scheme Effective will not be taken unless such Conditions have been satisfied or waived prior to the Scheme being sanctioned by the Court in accordance with this paragraph 0 below:
 - (a) (i) the European Commission indicating that it will not initiate proceedings under Article 6(1)(c) of Council Regulation (EC) No. 139/2004 (the "Regulation") in

relation to the proposed Offer or any matter arising from or relating to the proposed Offer;

- (ii) if the European Commission makes a referral under Article 9 of the Regulation to the competent authorities of the UK it being established, in terms reasonably satisfactory to Iberdrola, that neither the proposed Offer nor any matter arising from or relating to the proposed Offer will be referred to the Competition Commission;
 - (iii) if the European Commission makes a referral under Article 9 of the Regulation to the competent authorities in Spain it being established, in terms reasonably satisfactory to Iberdrola that neither the proposed Offer nor any matter arising from or relating to the proposed Offer will be referred to the Tribunal de Defensa de la Competencia for a second phase review; and
 - (iv) no member state of the European Union taking steps to protect its legitimate interests pursuant to Article 21(4) of the Regulation which could reasonably foreseeably involve the imposition of measures which would be material in the context of the Iberdrola Group; and
- (b) the Spanish national energy commission (*Comision Nacional de la Energia*) ("CNE") has approved the Offer, to the extent applicable, in terms reasonably satisfactory to Iberdrola;
- (c) all consents, authorisations, orders, permits and approvals of (or registrations, declarations, notices or filings with) (hereinafter referred to as "**Filings and Approvals**") any court, tribunal, arbitrator, authority, agency, commission, official or other instrumentality of the United States or any state, county, city or other political subdivision thereof (including, without limitation, the US Federal Trade Commission, the US Department of Justice, the US Treasury Department, the US Federal Energy Regulatory Commission and any state public utility commissions) (each a "**US Regulatory Authority**") required in connection with the execution, delivery and performance of this announcement and the consummation of the Offer (including, but not limited to, Filings and Approvals under the US Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, the Exon-Florio provision of the Defence Production Act of 1950, as amended by Section 5021 of the Omnibus Trade and Competitiveness Act of 1988, Sections 203, 204 and 205 of the US Federal Power Act, including implementing regulations, as amended, the Public Utility Holding Act of 2005, including implementing regulations, the Public Utility Regulatory Practices of 1978, including implementing regulations, the Omnibus Trade and Competitiveness Act of 1988 and any applicable state legislation) having been obtained or made and the expiration of all or any applicable waiting periods, including any extensions thereof, no action by the relevant regulatory authority having been reversed, stayed, enjoined, set aside, annulled or suspended, all conditions to the consummation of such transactions prescribed by law, regulation or order having been satisfied and all opportunities for rehearing and/or appeals having been exhausted, except for filings in connection with the Offer and any other

documents which shall be filed after the Effective Date and except where failure to have obtained or made any such consent, authorisation, order, permit, approval, filing or registration would not be material in the context of the Wider ScottishPower Group;

- (d) no Relevant Authority having decided to take, institute, implement or threaten any action, proceeding, suit, investigation, enquiry or reference or enacted, made or proposed and there not continuing to be outstanding any statute, regulation, notice, order or decision that would or might be reasonably expected to:
- (i) make the Offer or the acquisition or proposed acquisition of any shares or any securities in, or control or management of, ScottishPower by Iberdrola or any member of the Wider Iberdrola Group void, unenforceable and/or illegal in any jurisdiction or directly or indirectly prohibit, restrain, prevent or otherwise restrict, materially delay or otherwise interfere with the implementation of, or impose material additional conditions or obligations with respect to, or otherwise challenge or interfere with, the Offer or the acquisition of any shares or any securities in, or control or management of, ScottishPower by any member of the Wider Iberdrola Group;
 - (ii) require, prevent or delay the divestiture (or alter the terms of any proposed divestiture) by the Wider Iberdrola Group or the Wider ScottishPower Group of all or any part of their respective businesses, assets or properties, ownership of any of their respective assets or properties or any part thereof which is material in the context of the Wider Iberdrola Group;
 - (iii) impose any limitation on, or result in any delay in, the ability of any member of the Wider Iberdrola Group to acquire or hold or exercise effectively, directly or indirectly, all or any rights of ownership of shares or other securities (or the equivalent) in, or to exercise management control over, any member of the Wider ScottishPower Group or on the ability of any member of the Wider ScottishPower Group to hold or exercise effectively, directly or indirectly, all or any rights of ownership of shares or other securities (or the equivalent) in, or to exercise management control over, any other member of the Wider ScottishPower Group in a manner which is material in the context of the Wider ScottishPower Group;
 - (iv) other than in the implementation of the Offer, require any member of the Wider Iberdrola Group or of the Wider ScottishPower Group to acquire or offer to acquire any shares or other securities (or the equivalent) or interest in any member of the Wider ScottishPower Group or any member of the Wider Iberdrola Group which is material in the context of the Wider Iberdrola Group;
 - (v) impose any material limitation on the ability of any member of the Wider Iberdrola Group or the Wider ScottishPower Group to integrate or co-ordinate its business, or any part of it, with the businesses or any part of the businesses of any

member of the Wider Iberdrola Group and/or the Wider ScottishPower Group or conduct all or part of their respective businesses which is material in the context of the Wider ScottishPower Group; or

- (vi) otherwise adversely affect the business, assets, financial or trading position or profits or prospects of any member of the Wider Iberdrola Group or of the Wider ScottishPower Group to an extent which would be material in the context of the Wider Iberdrola Group or the Wider ScottishPower Group (as the case may be),

and all applicable waiting and other time periods during which any such Relevant Authority could decide to take, institute, implement or threaten any such action, proceeding, suit, investigation, enquiry or reference or take any other step under the laws of any jurisdiction having expired, lapsed or been terminated;

- (e) all necessary filings, applications and/or notifications having been made and all appropriate waiting periods (including any extensions thereof) under any applicable legislation or regulation of any jurisdiction having expired, lapsed or been terminated in each case in respect of the Offer and the acquisition of any shares or other securities in, or control of, ScottishPower by Iberdrola or any member of the Wider Iberdrola Group and all authorisations, orders, grants, recognitions, confirmations, licences, consents, clearances, permissions and approvals (“**authorisations**”) necessary in any jurisdiction for or in respect of the Offer and the proposed acquisition of any shares or other securities in, or control or management of, ScottishPower by Iberdrola or any member of the Wider Iberdrola Group being obtained in terms and in a form satisfactory to Iberdrola, acting reasonably, from appropriate Relevant Authorities or from any persons or bodies with whom any member of the Wider Iberdrola Group or the Wider ScottishPower Group has entered into contractual arrangements and such authorisations together with all authorisations necessary or appropriate for any member of the Wider ScottishPower Group to carry on its business remaining in full force and effect in each case where the absence of such authorisation would have a material adverse effect on the Wider ScottishPower Group and there being no notice or other intimation of any intention to revoke, suspend, restrict or modify or not to renew any of the same having been made and all necessary statutory or regulatory obligations in any jurisdiction having been complied with;

For the avoidance of doubt, Iberdrola acknowledges that the Offer will not be conditional upon any steps which OFGEM may or may not take prior to the Effective Date, including but not limited to any steps which OFGEM may take to seek modifications to any of the licences held by ScottishPower;

- (f) save as fairly disclosed to Iberdrola by or on behalf of ScottishPower or as publicly announced by ScottishPower by the delivery of an announcement to a Regulatory Information Service before the date of this announcement, or as disclosed in the Annual Report and Accounts or the US Annual Report on Form 20-F of ScottishPower for the financial year ended 31 March 2006 or in ScottishPower’s financial statements for the six

months ended 30 September 2006 announced on 14 November 2006 or included herein, there being no provision of any agreement, arrangement, licence, permit, franchise or other instrument to which any member of the Wider ScottishPower Group is a party or by or to which any such member or any of its assets is or may be bound, entitled or subject which in consequence of the Offer or the acquisition or proposed acquisition by any member of the Wider Iberdrola Group of any shares or other securities in the control or management of, ScottishPower, would or might result in:

- (i) any monies borrowed by or any other indebtedness (actual or contingent) of, or any grant available to, any such member of the Wider ScottishPower Group becoming repayable or capable of being declared repayable immediately or earlier than the stated repayment date or the ability of such member to borrow monies or incur any indebtedness being or becoming capable of being withdrawn or inhibited;
- (ii) the creation or enforcement of any mortgage, charge or other security interest over the whole or any part of the business, property or assets of any such member of the Wider ScottishPower Group or any such security interest (whenever arising or having arisen) becoming enforceable;
- (iii) any assets or interest of any such member of the Wider ScottishPower Group being or falling to be disposed of or charged or any right arising under which any such asset or interest could be required to be disposed of or charged;
- (iv) the interest or business of any such member of the Wider ScottishPower Group in or with any other person, firm or company (or any agreements or arrangements relating to such interest or business) being terminated or adversely affected;
- (v) any such member of the Wider ScottishPower Group ceasing to be able to carry on business under any name under which it presently does so;
- (vi) the value of any such member of the Wider ScottishPower Group or its financial or trading position or prospects being prejudiced or adversely affected;
- (vii) any such agreement, arrangement, licence, permit, franchise or other instrument or the rights, liabilities, obligations or interests of any such member being terminated or adversely modified or any onerous obligation arising or any adverse action being taken or arising thereunder; or
- (viii) the creation of any liabilities (actual or contingent) by any such member,

and which in each such case would be material in the context of the Wider ScottishPower Group, and no event having occurred which, under any provision of any agreement, arrangement, licence, permit, franchise or other instrument to which any member of the

Wider ScottishPower Group is a party or by or to which any such member or any of its assets may be bound or be subject, is likely to result in any events or circumstances as are referred to in subparagraphs 0 to 0 of this paragraph 0 and which in each such case would be material in the context of the Wider ScottishPower Group;

- (g) save as fairly disclosed to Iberdrola by or on behalf of ScottishPower or as publicly announced by ScottishPower by the delivery of an announcement to a Regulatory Information Service before the date of this announcement, or as disclosed in the Annual Report and Accounts or US Annual Report on Form 20-F of ScottishPower for the year ended 31 March 2006 or in ScottishPower's financial statements for the six months ended 30 September 2006 announced on 14 November 2006, no member of the Wider ScottishPower Group having since 31 March 2006:
- (i) issued or agreed to issue or authorised the issue of additional shares or securities of any class, or securities convertible into or exchangeable for, or rights, warrants or options to subscribe for or acquire, any such shares or convertible securities;
 - (ii) save in respect of the ScottishPower B Shares, recommended, declared, paid or made any bonus, dividend or other distribution, whether payable in cash or otherwise or proposed to do any of the foregoing (other than a distribution by any wholly-owned subsidiary of ScottishPower) and save for the interim dividend of 11.4p per ScottishPower Share payable by ScottishPower to the ScottishPower Shareholders in respect of the six months ended 30 September 2006 and any final dividend in respect of the financial year ending 30 March 2007 to the extent such dividend is in the ordinary course of business and is consistent with ScottishPower's publicly announced dividend policy; provided however, that and notwithstanding any disclosure to ScottishPower prior to the date of this announcement, ScottishPower shall not be entitled to pay and ScottishPower Shareholders shall not be entitled to receive such final dividend in the event that the Offer becomes Effective prior to 11:59 pm on 31 May 2007;
 - (iii) implemented or authorised any merger or demerger or acquired or disposed of or transferred, mortgaged or charged, or created any other security interest over, any asset or any right, title or interest in any asset or authorised, proposed or announced its intention to propose the same in each case which is material in the context of the Wider ScottishPower Group;
 - (iv) entered into, implemented or authorised any reconstruction, amalgamation, scheme or other transaction or arrangement other than transactions between wholly-owned members of the ScottishPower Group;
 - (v) save in respect of the ScottishPower B Shares and the ScottishPower Deferred Shares, purchased, redeemed or repaid any of its own shares or other securities or reduced or made or authorised any other change in its share capital;

- (vi) made, proposed, authorised or announced its intention to make, propose or authorise any change in its loan capital or issued or authorised the issue of any debentures or incurred or increased any material indebtedness or become subject to any material contingent liability;
- (vii) entered into, varied or terminated, or authorised the entry into, variation or termination of, any contract, commitment or arrangement (whether in respect of capital expenditure or otherwise) which is outside the ordinary course of business or which is of a long term, onerous or unusual nature or magnitude or which involves or could involve an obligation of a nature or magnitude which is material in the context of the Wider ScottishPower Group;
- (viii) entered into any contract, commitment or arrangement which would be restrictive on the business of any member of the Wider ScottishPower Group which is material in the context of the Wider ScottishPower Group;
- (ix) been unable, or admitted in writing that it is unable, to pay its debts or having stopped or suspended (or threatened to stop or suspend) payment of its debts generally or having entered into or taken steps to enter into a moratorium, composition, compromise or arrangement with its creditors in respect of its debts or ceased or threatened to cease carrying on all or a substantial part of its business;
- (x) taken any corporate action or (to an extent which is material in the context of the Wider ScottishPower Group) had any step, application, filing in court, notice or legal proceedings started or served or threatened against it for its winding-up (voluntary or otherwise), dissolution or reorganisation (or for any analogous proceedings or steps in any jurisdiction) or for the appointment of a receiver, administrator, administrative receiver, liquidator, trustee or similar officer (or for the appointment of any analogous person in any jurisdiction) of all or any of its assets and revenues;
- (xi) waived, compromised or settled any claim to an extent which is material in the context of the Wider ScottishPower Group;
- (xii) entered into or varied or made an offer (which remains open for acceptance) to vary the terms of any contract, commitment or arrangement with any director or senior executive of ScottishPower or changed or entered into any commitment to change the terms of any ScottishPower Share Schemes;
- (xiii) made or consented to any change to the terms of the trust deeds constituting the pension schemes established for its directors and/or employees and/or their dependants or to the benefits which accrue, or to the pensions which are payable

thereunder, or to the basis on which qualification for or accrual or entitlement to such benefits or pensions are calculated or determined, or to the basis upon which the liabilities (including pensions) of such pension schemes are funded or made, or agreed or consented to, any change to the trustees in each case as would be material in the context of the pension schemes operated by the ScottishPower Group; or

- (xiv) entered into any contract, commitment or arrangement or passed any resolution or made any offer (which remains open for acceptance) which is material in the context of the Wider ScottishPower Group with respect to, or proposed or announced any intention to effect or propose, any of the transactions, matters or events referred to in this condition;
- (h) since 31 March 2006 save as fairly disclosed to Iberdrola by or on behalf of ScottishPower or as publicly announced by ScottishPower by the delivery of an announcement to a Regulatory Information Service before the date of this announcement, or as disclosed in the Annual Report and Accounts or US Annual Report on Form 20-F of ScottishPower for the year ended 31 March 2006 or in ScottishPower's financial statements for the six months ended 30 September 2006 announced on 14 November 2006:
- (i) no adverse change or deterioration having occurred in the business, assets, financial or trading position or profits or prospects of any member of the Wider ScottishPower Group which in any such case is material in the context of the Wider ScottishPower Group;
 - (ii) no litigation, arbitration proceedings, prosecution or other legal proceedings having been threatened, announced, instituted or remaining outstanding by, against or in respect of any member of the Wider ScottishPower Group or to which any member of the Wider ScottishPower Group is a party (whether as claimant or defendant or otherwise) and no investigation by any Relevant Authority or other investigative body against or in respect of any member of the Wider ScottishPower Group having been threatened, announced, instituted or remaining outstanding by, against or in respect of any member of the Wider ScottishPower Group which in any such case is material in the context of the Wider ScottishPower Group;
 - (iii) no contingent or other liability having arisen which would or might materially and adversely affect any member of the Wider ScottishPower Group taken as a whole; and
 - (iv) no steps having been taken which are likely to result in the withdrawal (without replacement), cancellation or termination of any licence permit or consent held by any member of the Wider ScottishPower Group which is necessary for the carrying on by the ScottishPower Group of the business and is material in the

context of the Wider ScottishPower Group;

(i) save as fairly disclosed to Iberdrola by or on behalf of ScottishPower or as publicly announced by ScottishPower by the delivery of an announcement to a Regulatory Information Service before the date of this announcement, or as disclosed in the Annual Report and Accounts or US Annual Report on Form 20-F of ScottishPower for the year ended 31 March 2006 or in ScottishPower's financial statements for the six months ended 30 September 2006 announced on 14 November 2006, Iberdrola not having discovered:

(i) that any financial, business or other information concerning the Wider ScottishPower Group publicly disclosed at any time by any member of the Wider ScottishPower Group is misleading, contains a misrepresentation of fact or omits to state a fact necessary to make the information contained therein not misleading;

(ii) that any member of the Wider ScottishPower Group or any partnership, company or other entity in which any member of the Wider ScottishPower Group has an interest is subject to any liability, contingent or otherwise, which is material in the context of the Wider ScottishPower Group; or

(iii) any information which affects the import of any information disclosed at any time by or on behalf of the Wider ScottishPower Group and which is material in the context of the Wider ScottishPower Group;

(j) save as fairly disclosed to Iberdrola by or on behalf of ScottishPower or as publicly announced by ScottishPower by the delivery of an announcement to a Regulatory Information Service before the date of this announcement, or as disclosed in the Annual Report and Accounts or US Annual Report on Form 20-F of ScottishPower for the year ended 31 March 2006 or in ScottishPower's financial statements for the six months ended 30 September 2006 announced on 14 November 2006, Iberdrola not having discovered that:

(i) any past or present member of the Wider ScottishPower Group has failed to comply with any applicable legislation, regulation or common law of any jurisdiction or any notice, order or requirement of any Relevant Authority with regard to the use, treatment, storage, handling, transport, disposal, discharge, spillage, presence, release, leak or emission of any waste or hazardous or harmful substance or any substance likely to impair the environment or harm human or animal health or otherwise relating to environmental and/or health and safety matters or that there has otherwise been any such use, treatment, storage, handling, transport, disposal, discharge, presence, spillage, release, leak or emission (whether or not the same constituted non-compliance by any person with any such legislation or regulation, and whenever the same may have taken place), any of which would be likely to give rise to any liability (whether actual or contingent) or cost on the part of any member of the Wider ScottishPower Group

1

which would be material in the context of the Wider ScottishPower Group; or

- (ii) there is or is likely to be any unplanned obligation or liability (whether actual or contingent) to make good, repair, reinstate, remediate or clean up any property now or previously owned, occupied, operated or made use of or controlled by any past or present member of the Wider ScottishPower Group or any other property or controlled water under any environmental legislation, regulation, common law, notice or circular or order of any Relevant Authority in any jurisdiction which would be material in the context of the Wider ScottishPower Group.

Iberdrola reserves the right to waive all or any of the conditions in 2, in whole or in part.

For the avoidance of doubt, Iberdrola will not invoke the conditions set out in paragraph 2(a) to (j) inclusive so as to cause the Offer to lapse or to be withdrawn unless the circumstances which give rise to the right to invoke the relevant condition(s) are of material significance to Iberdrola in the context of the Offer or unless a failure to do so would result in Iberdrola being in breach of any Law.

If Iberdrola is required by the Panel to make an offer or offers for any ScottishPower Shares under Rule 9 of the City Code, Iberdrola may make such alterations to the above conditions as are necessary to comply with the provisions of that Rule.

The Offer will not proceed if, before the date of the Court Meeting and the ScottishPower EGM, the European Commission initiates proceedings under Article 6(1)(c) of the Regulation in respect of the Offer or any matter arising from or relating to the Offer or, following a referral by the European Commission to a competent authority in the United Kingdom under Article 9(1) of the Regulation the Offer or any matter arising from or relating to the Offer is referred to the Competition Commission.

Iberdrola reserves the right to elect to effect the Offer by way of a Takeover Offer, subject to the prior consent of ScottishPower. In such event, such offer will be implemented on and subject to the same terms and conditions (subject to appropriate amendments, including (without limitation) an acceptance condition set at 90 per cent. of the ScottishPower Shares to which such offer relates (but capable of waiver in accordance with Rule 10 of the City Code) in substitution for condition 1), so far as applicable, to those that would apply to the Scheme.

The Offer will be governed by English law and will be subject to the jurisdiction of the English Courts. The rules of the City Code will, so far as they are appropriate, apply to the Offer and the Scheme. The Scheme will be governed by Scots law and will be subject to the jurisdiction of the Scottish Courts.

**APPENDIX II
BASES AND SOURCES**

In this announcement:

- (a) the value placed by the Offer on the existing ScottishPower Shares (approximately £11.6 billion) (Euro 17.1 billion) is based on 1,488,277,092 ScottishPower Shares in issue on 27 November 2006, the last Business Day prior to the date of this announcement;
- (b) the Closing Prices of the ScottishPower Shares referred to in this announcement are derived from the Daily Official List of the London Stock Exchange;
- (c) the Closing Prices of the Iberdrola Shares referred to in this announcement are derived from the data of the SIBE (as published in the official bulletin (*boletín de cotización*) of the Madrid Stock Exchange);
- (d) the exchange rate used in this announcement is Euro 1.4755:£1; and
- (e) unless otherwise stated, the financial information relating to ScottishPower and Iberdrola is extracted from the consolidated financial statements of ScottishPower and Iberdrola for the relevant period.

APPENDIX III DEFINITIONS

Act	means the Companies Act 1985, as amended;
Alternative Proposal	means a proposed offer, merger, acquisition, scheme of arrangement, recapitalisation or other business combination relating to any direct or indirect acquisition of 50 per cent. or more of the ScottishPower Shares or all or any material part of the business or assets of the ScottishPower Group proposed by any third party which is not a concert party (as defined in the City Code) of Iberdrola;
Automated Quotation System	means the electronic trading system which links the Bolsas de Valores (stock exchanges) in Spain;
Bolsas de Valores	means the Bolsas de Valores (stock exchanges) of Madrid, Barcelona, Bilbao and Valencia;
Business Day	means a day (other than Saturday or Sunday) on which banks are generally open for business in the City of London, Edinburgh, New York and Madrid;
Capital Reduction	means the proposed reduction of share capital of ScottishPower pursuant to the Scheme;
CCGTs	means combined cycle generating turbines;
City Code	means the UK City Code on Takeovers and Mergers;
Closing Price	means the closing middle-market price of the relevant share as derived from, in the case of ScottishPower, the Daily Official List of the London Stock Exchange and, in the case of Iberdrola, the closing price of the SIBE as published in the official bulletin (<i>boletín de cotización</i>) of the Madrid Stock Exchange;
CNMV	means Comisión Nacional del Mercado de Valores;
Conditions	means the conditions to the Offer set out in Appendix 1;
Convertible Bondholders	means the holders of the Convertible Bonds;
Convertible Bonds	means US\$700,000,000 4 per cent. step-up perpetual subordinated guaranteed convertible bonds issued by ScottishPower Finance

	(Jersey) Limited convertible into fully paid 4 per cent. exchangeable redeemable preference shares of ScottishPower Finance (Jersey) Limited which are guaranteed by and which will be exchangeable immediately upon issue for ScottishPower Shares;
Court	means Court of Session in Edinburgh, Scotland;
Court Hearings	means the hearings by the Court of the petition to sanction the Scheme and to confirm the cancellation and extinguishment of the ScottishPower Shares provided for by the Scheme under section 137 of the Act;
Court Meeting	means the meeting or meetings of the ScottishPower Shareholders (or any adjournment thereof) to be convened pursuant to the order of the Court under section 425 of the Act for the purpose of considering, and if thought fit, approving the Scheme (with or without amendment);
Court Order(s)	means the order(s) of the Court sanctioning the Scheme under section 425 of the Act and confirming the reduction of share capital provided for by the Scheme under section 137 of the Act;
CREST	means the computerised settlement system to facilitate the transfer of title to shares in uncertificated form operated by CrestCo Limited;
Deposit Agreement	means the amended and restated deposit agreement between ScottishPower and Morgan Guaranty Trust Company of New York, as depository, and the holders from time to time of the ADSs thereunder, including the form of ADSs as filed on Form F-6 with the SEC on 24 April 2001;
Depository	means JPMorgan Chase Bank N.A.;
EBITDA	means earnings before interest, tax and depreciation;
Effective	means: if the Offer is implemented by way of the Scheme, the Scheme having become effective pursuant to its terms; or if the Offer is implemented by way of a Takeover Offer, the Takeover Offer having been declared or become unconditional in all respects in accordance with the City Code;
Effective Date	means the date on which the Offer becomes Effective;

Enlarged Iberdrola Group	means the Iberdrola Group (including the ScottishPower Group) following the Effective Date;
Enterprise Value	means market capitalisations (as at 27 November 2006) plus latest reported net debt including minority interests);
Euro	means the lawful currency of the member states of the European Union that have adopted a single currency in accordance with the treaty establishing the European Community as amended by the treaty on the European Union;
Exchange Act	means US Securities Exchange Act of 1934, as amended;
Exon-Florio Filing	means the filing pursuant to the Exon-Florio provision of the Defence Production Act of 1950, as amended by Section 5021 of the Omnibus Trade and Competitiveness Act of 1988 administered by the US Treasury Department through the Committee on Foreign Investment in the United States;
FSA	means the Financial Services Authority acting in its capacity as the competent authority for the purposes of Part VI of the UK Financial Services and Markets Act 2000;
Groups	means the Iberdrola Group and the ScottishPower Group;
Iberclear	Sociedad de Gestión de los Sistemas de Registro, Compensación y Liquidación de Valores, SAU;
Iberdrola	means Iberdrola, S.A.;
Iberdrola Directors or Board of Iberdrola or Iberdrola Board	means the board of directors of Iberdrola;
Iberdrola Group	means Iberdrola and its subsidiaries and, where the context permits, each of them;
Iberdrola Shareholder Circular	means the notice convening the Iberdrola Shareholders' Meeting and the information and documentation to be made available to Iberdrola Shareholders outlining the Offer;
Iberdrola Shareholders' Meeting	means the general shareholders meeting of Iberdrola to be convened to consider, and if thought fit, approve, amongst other things, the issue of the New Iberdrola Shares in connection with Offer;

Iberdrola Shares	the common shares (<i>acciones ordinarias</i>) of Euro 3 each in the capital of Iberdrola;
Implementation Agreement	means the implementation agreement between Iberdrola and ScottishPower dated 28 November 2006;
Inducement fee	means £50,000,000;
KWh	means kilowatt hours;
Laws	means all laws, statues, secondary and subordinate legislation, judgements, orders, decisions and interpretation of any law by any court, authority and/or government department of agency plus any international or EU treaties and regulations;
LIBOR	means the rate of interest determined by Iberdrola on the basis of the average (rounded down where necessary to the nearest whole multiple of one-sixteenth of 1.0 per cent.) of the respective rates per annum at which any two London clearing banks selected by Iberdrola are prepared to offer six month Sterling deposits of £2 million to leading banks in the London inter-bank market at or about 11.00 am (London time) on the first Business Day of the relevant interest period and a certificate in writing, under the hand of a duly authorised official of Iberdrola, shall be conclusive evidence of that rate;
Listing Rules	means the Listing Rules of the FSA as amended from time to time and contained in the FSA's publication of the same name;
LNG	means liquefied natural gas;
Loan Note Alternative	means the alternative whereby ScottishPower Shareholders (other than ScottishPower Shareholders in Loan Note Restricted Jurisdictions, US resident holders of ScottishPower Shares and ScottishPower ADS Holders) may elect to receive Loan Notes instead of some or all of the cash consideration to which they would otherwise be entitled under the Offer;
Loan Note Elected Shares	means the ScottishPower Shares (if any) in respect of which valid elections for the Loan Note Alternative are made in accordance with its terms;
Loan Note Form of Election	means the forms of election relating to the Offer which will accompany the Scheme Document;

Loan Notes	means the floating rate unsecured loan notes of Iberdrola, or a wholly owned subsidiary of Iberdrola and guaranteed by Iberdrola, issued pursuant to the Loan Note Alternative;
Loan Note Restricted Jurisdictions	means any of the United States, Australia, Canada or Japan or any jurisdiction where extension or acceptance of the Loan Note Alternative would violate the law of that jurisdiction;
London Stock Exchange	means The London Stock Exchange plc;
Mix and Match Facility	means the mix and match facility under which ScottishPower Shareholders may, subject to availability, elect to vary the proportions of New Iberdrola Shares and cash they will receive under the Offer, subject to the elections made by other ScottishPower Shareholders;
MW	means megawatt;
MWh	means megawatt hours;
New Iberdrola Shares	means the Iberdrola Shares proposed to be issued to ScottishPower Shareholders, credited as fully paid, under the Offer;
Offer	means the proposed acquisition of the ScottishPower Shares by Iberdrola or Iberdrola and a member of the Iberdrola Group to be implemented by means of the Scheme (or, if Iberdrola so elects, subject to ScottishPower's prior consent, a Takeover Offer) on the terms and subject to the Conditions set out in this announcement and to be set out in the Scheme Document (or the Offer Document (as the case may be)) and where the context admits, any subsequent revision, variation, extension or renewal thereof;
Offer Document	means in the event Iberdrola elects, subject to ScottishPower's prior consent, to conduct the Offer by means of a Takeover Offer the document containing the offer to be sent to ScottishPower Shareholders;
Official List	means The Official List of the FSA;
OFGEM	means the Office of Gas and Electricity Markets;
Overseas Persons	means Iberdrola Shareholders who are resident in, ordinarily resident in, or citizens of, jurisdiction outside the United Kingdom;
Panel	means the Panel on Takeovers and Mergers;

RAB	means regulated asset base;
Registrar of Companies	means the Registrar of Companies for Scotland;
Regulatory Information Service	means any of the services set out in Appendix 3 to the Listing Rules;
Relevant Authority	means the European Commission, the Office of Gas and Electricity Markets, the Comision Nacional de Energia and any other court or competition, antitrust or supervisory body or other government, governmental, trade or regulatory agency or body in each case in any jurisdiction whose consent or clearance is required or desirable in connection with the Offer including the US Federal Energy Regulatory Commission, US Department of Justice, US Federal Trade Commission, US Treasury Department and US state regulatory commissions or authorities and Relevant Authorities shall mean all of them;
Scheme	means the acquisition of the ScottishPower Shares by way of a scheme of arrangement under section 425 of the Act, on the terms and subject to the Conditions set out in this announcement;
Scheme Document	means the document to be sent to ScottishPower Shareholders which will, among other things, contain the terms and conditions of the Scheme;
Scheme Record Date	means 6.00 p.m. on the Business Day before the Scheme becomes Effective;
Scheme Shareholders	means the holders of the ScottishPower Shares;
Scheme Shares	means the ScottishPower Shares;
ScottishPower	means Scottish Power plc;
ScottishPower ADS	means an American depository share comprising four underlying ScottishPower Shares;
ScottishPower ADS Holder	means the holders of ScottishPower ADSs;
ScottishPower B Shares	means the non-cumulative preference shares of 50 pence each in the share capital of ScottishPower;
ScottishPower Deferred Shares	means the deferred shares of 50 pence each in the share capital of

	ScottishPower;
ScottishPower Directors or Board of ScottishPower or ScottishPower Board	means the board of directors of ScottishPower;
ScottishPower EGM or ScottishPower Extraordinary General Meeting	means the extraordinary general meeting of ScottishPower (or any adjournment thereof) to be convened in connection with the Scheme;
ScottishPower EGM Resolution	means the special resolution to approve, amongst other things, the cancellation of the ScottishPower Shares, the alteration of ScottishPower's articles of association and such other matters as may be necessary to, connected with or desirable for the implementation of the Offer;
ScottishPower Group	means ScottishPower and its subsidiaries and, where the context permits, each of them;
ScottishPower Share Schemes	means the ScottishPower Employee Share Ownership Plan, the ScottishPower 2000 Long Term Incentive Plan, the ScottishPower 2006 Long Term Incentive Plan, the ScottishPower Sharesave Scheme, the ScottishPower Executive Share Option Plan 2001, the PacifiCorp Stock Incentive Plan and the Annual Incentive Plan Deferred Share Programme;
ScottishPower Shareholders	means the holders of ScottishPower Shares;
ScottishPower Shares	means the ordinary shares of 42 pence each in the capital of ScottishPower;
SEC	means the US Securities and Exchange Commission;
Special Dividend	means the special dividend of 12 pence (Euro 0.18) per ScottishPower Share to be paid to ScottishPower Shareholders on the ScottishPower register of members on the Scheme Record Date;
Sterling or £	means pounds sterling;
Subsidiary Undertaking, Associated Undertaking and Undertaking	have the meanings given by the Act (but for these purposes ignoring paragraph 20(1)(b) of Schedule 4A to the Act) and substantial interest means a direct or indirect interest in 20 per cent. or more of the equity capital of an Undertaking;

Takeover Offer	means a takeover offer as such term is defined in paragraph 1 of Schedule 2 to the Takeovers Directive (Interim Implementation) Regulations 2006;
TW	means terawatt;
TWh	means terawatt hours;
United Kingdom	means the United Kingdom of Great Britain and Northern Ireland;
US Securities Act	means The United States Securities Act of 1933, as amended.
Wider Iberdrola Group	means Iberdrola and its Subsidiary Undertakings, Associated Undertakings and any other Undertakings in which Iberdrola and such Undertakings (aggregating their interests) have a substantial interest; and
Wider ScottishPower Group	means ScottishPower and its Subsidiary Undertakings, Associated Undertakings and any other Undertakings in which ScottishPower and such Undertakings (aggregating their interests) have a substantial interest.

DEPT. OF INTERNATIONAL
CORPORATE FINANCE

Madrid, 20 April 2005

SUBJECT: Notification of significant event

Please be advised that at a meeting held today, the Board of Directors of this company has unanimously adopted the following resolutions:

1. To approve, upon recommendation by the Chairman, IÑIGO DE ORIOL E YBARRA, his succession as Chairman of the Board of Iberdrola when he steps down in accordance with the Regulations of the Board, by the current Vice-Chairman/Chief Executive Officer, IGNACIO SÁNCHEZ GALÁN.

2. To accept the retirements from the Board of the directors JAVIER ARESTI Y VICTORIA DE LECEA and JOSÉ LUIS ANTOÑANZAS PÉREZ-EGEA, on reaching the statutory retirement age.

3. To accept the resignation tendered by the director SANTIAGO MAYNER OYARBIDE, substituting him, by cooptation, with the shareholder XABIER DE IRALA ESTÉVEZ, who will be classified as a "Non-executive domanial director" proposed by BBK.

4. To accept the resignation tendered by the director JOSÉ ANTONIO FERNÁNDEZ RIVERO, substituting him, by cooptation, with the shareholder JESÚS MARIA CADENATO MATÍAS, who will be classified as a "Non-executive domanial director" proposed by BBVA.

5. To appoint the director JESÚS MARÍA CADENATO MATÍAS member of the Executive Committee, substituting JOSÉ ANTONIO FERNÁNDEZ RIVERO.

6. To approve the substitution of the Chairman IÑIGO DE ORIOL E YBARRA on his retirement as Board member by IÑIGO VÍCTOR DE ORIOL E IBARRA, as member, filling the vacancy by the procedure of cooptation and classified as "another non-executive director".

7. To approve the classification of JOSÉ IGNACIO BERROETA ECHEVARRIA as an independent non-executive director.

You are informed of the foregoing to all effects and purposes and we are, as ever, at your disposal for any further information or explanations you may require.

Federico San Sebastián

DEPT. OF INTERNATIONAL
CORPORATE FINANCE

Bilbao, 22 June 2005

SUBJECT: Notification of Significant Event

Dear Sirs,

Please be advised that at a meeting held today the Board of Directors of this Company resolved, upon recommendation by the Chairman and in the light of the favourable report issued by the Nomination and Remuneration Committee, that when the governing bodies of the company are restructured under the resolutions adopted by the Board on 20 April 2005, the Director Xabier de Irala Estévez, as Chairman of BBK, one of the stable reference shareholders of Iberdrola, will fill the first vacancy produced on the Executive Committee.

The Board further resolved to appoint Mr. Irala as member of the Audit and Compliance Committee, which position he will hold from now until he fills the first vacancy produced on the Executive Committee, as indicated above, pursuant to Article 12.c) of the Committee Regulations.

This is for your information and to all effects and purposes, and we are at your disposal for any clarifications or further information you may require.

Yours faithfully,

IBERDROLA, S.A.
The Secretary

Federico San Sebastián

Private & Confidential

US\$ 300,000,000
Senior Notes due 2012 / 2015 / 2017 / 2020
Private Placement Memorandum

November 21, 2005

This private placement memorandum (the "Memorandum") is submitted on a confidential basis for use by prospective investors in the proposed placement described herein. The receipt of this Memorandum constitutes the agreement on the part of the recipient hereof to maintain the confidentiality of the information contained herein. This Memorandum may not be reproduced, in whole or in part, and its use for any purpose other than to evaluate participation in the proposed placement described herein is strictly prohibited. This Memorandum, (as well as other material that subsequently may be provided by ABN AMRO Bank N.V. or ABN AMRO Incorporated (together "ABN AMRO"), Dresdner Bank AG or Dresdner Kleinwort Wasserstein Securities LLC (together "Dresdner") or Iberdrola S.A. (the "Company", "Iberdrola", or, together with its consolidated subsidiaries, the "Group") is to be returned promptly if the recipient decides not to proceed with its investigation of, or participation in, the proposed placement or if the recipient's proposal is not accepted or if the proposed placement is terminated.

The Senior Notes offered hereby (the "Notes") are being issued pursuant to a private placement to a limited number of prospective investors meeting certain suitability standards. The Notes are subject to restrictions on transferability and resale and may not be transferred or resold except as permitted under the United States Securities Act of 1933, as amended (the "Securities Act"), and applicable state securities laws pursuant to registration or exemption therefrom. In making an investment decision, investors must rely on their own examination of the financing and the terms of the placement, including the merits and risks involved.

Iberdrola reserves the right to reject any commitment to subscribe for the Notes, in whole or in part, and to allot to any prospective investor less than the full amount of Notes subscribed for by such investor.

Although the information contained in this Memorandum has been obtained or compiled from data furnished by Iberdrola and its management, and other sources deemed reliable, no assurance can be given by any party as to the accuracy or completeness of such information and no responsibility is or will be accepted by any party or by any of its respective directors, officers, employees, servants, agents or advisors as to or in relation to the accuracy or completeness of this Memorandum or any other written or oral information made available to any interested party or its advisors and any liability therefore is hereby expressly disclaimed (except any such liability arising from fraud).

No person has been authorized to give any information or to make any representation not contained herein and, if given or made, such other information or representation must not be relied upon as having been authorized by Iberdrola, ABN or Dresdner. Neither the delivery of this Memorandum at any time nor any subsequent commitment to enter into any financing shall, under any circumstances, create any implication that there has been no material change in the information set forth herein or in the affairs of Iberdrola since the date hereof.

Prospective investors are not to construe the contents of this Memorandum as investment, legal or tax advice. Each investor should consult its own counsel, accountant and other advisors as to legal, tax, business, financial and related aspects of a purchase of these Notes. Representatives of Iberdrola will be available, on request, to discuss this Memorandum with prospective investors (and, if applicable, any prospective investor's representative). This Memorandum does not constitute an offer to sell nor is it a solicitation of an offer to buy any of the Notes described herein in any jurisdiction to any person to whom it is unlawful to make such solicitation in such jurisdiction.

The Notes have not been registered under the Securities Act or the securities laws of any state and are to be placed in reliance on exemptions from the registration requirements of the Securities Act and such laws. The Notes are subject to restrictions on transferability and resale and may not be transferred or resold except as permitted under the Securities Act and such state laws pursuant to registration or exemption therefrom. The Notes have not been approved or disapproved by the Securities and Exchange Commission, any state securities commission or other regulatory authority, nor have any of the foregoing authorities passed upon or endorsed the merits of this offering or the accuracy or adequacy of this Memorandum. Any representation to the contrary is a criminal offense.

The Notes may not be offered or sold in the United Kingdom except in circumstances which do not constitute an offer to the public within the meaning of the Public Offers of Securities Regulations 1995 (the "POS Regulations") or the Financial Services and Markets Act 2000 (the "FSMA"). Iberdrola has not authorized the Notes to be offered to the public in the United Kingdom within the meaning of the POS

Regulations or the FSMA and may only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) in connection with the issue of the Notes in circumstances in which Section 21(i) of the FSMA does not apply to Iberdrola. All applicable provisions of FSMA must be complied with in respect to anything done in relation to the Notes in, from or otherwise involving the United Kingdom.

The Notes may not be offered, sold or distributed in Spain by means of a public offer of securities in Spain within the meaning of Spanish securities laws and regulations, except in compliance with the requirements of the Spanish Securities Market Law (*Ley 24/1988, de 28 de julio, del Mercado de Valores*), as amended and restated, and Royal Decree 291/1992, of 27 March, on issues and public offerings of securities (*Real Decreto 291/1992, de 27 de marzo, sobre Emisiones y Ofertas Públicas de Venta de Valores*), as amended and restated, and the decrees and regulations made thereunder. This Memorandum has not been registered with the *Comisión Nacional del Mercado de Valores* and therefore it is not intended for any public offer of the Notes in Spain.

All and each statement contained in this document referring to the agreement with Gas Natural are subject not only to the condition of the success of the Gas Natural bid, but also to those coming from the necessary administrative approvals that is, the Eleventh Additional Disposition from the Hydrocarbons Sector Act (Ley 34/1998 del Sector de Hidrocarburos); the applicable merger control regulation, and the Spanish Golden Share Act (Ley 5/1995 de Enajenación de Participaciones Públicas en determinadas empresas).

The information contained herein for the nine months ended September 30, 2005 is unaudited. Such information should be read in conjunction with the press release issued by Iberdrola dated October 20, 2005 describing the financial performance of the Company and attached to this Memorandum.

The date of this Memorandum is November 21, 2005.

I. EXECUTIVE SUMMARY

INTRODUCTION

Iberdrola S.A. (the "Company", "Iberdrola" or, together with its consolidated subsidiaries, the "Group") is the highest rated Spanish electric utility and the second largest in terms of market capitalization of approximately €20.19 billion as of November 15th, 2005. Its year-end 2004 assets totaled €26.2 billion, full-year sales were €10.3 billion and EBITDA (Earnings before Interest, Taxes, Depreciation and Amortization) was over €2.85 billion. For the nine months ended September 30, 2005, the Company reported assets of €28.96 billion (€26.32 billion for 9 months 2004), net sales of €8.44 billion (€6.36 billion for 9 months 2004) and EBITDA €2.39 billion (€2.16 billion for 9 months 2004).

Iberdrola's long-term senior unsecured debt ratings are A2 (Moody's Investors Services), A+ (Standard & Poor's) and A+ (Fitch).

The Group is vertically integrated, where different legal entities, following law and regulation in its different areas of operation, carry out its various activities (generation, distribution, retailing, and international).

The Company concentrates on the generation and distribution of electricity throughout mainland Spain, where it has a gross installed generation capacity of 22,547 megawatts (MW). Total 2004 gross production was 68,422 GWh (GWh means Gigawatt hours and is a unit of measurement) representing a 30.1% share of Spanish generation. In Spain, its core market, Iberdrola ranks second in the regulated electricity distribution market with a 40% share. The Group also holds a 38.1% market share in the deregulated electricity business (retailing) and 10.8% market shares in the deregulated Spanish natural gas market. In total, over 95% of the Company's revenues are energy-related. In addition, Iberdrola is Spain's leader in renewable energy and also worldwide (Source: "Global Wind Plant Ownership: Trends and Review" by Emerging Energy Research), providing it with a significant competitive advantage, as renewable energy is a key feature of public European Union and Spanish energy policy.

Among Spanish utilities, Iberdrola has the greatest domestic focus and the smallest presence in the emerging markets measured by both revenues and profits (only 13% of 2004 revenues and 10% of profits of Iberdrola in 2004 came from emerging markets). Furthermore, within Latin America, the Company is focused in larger, more stable economies such as Mexico and Brazil. In Mexico, Iberdrola is the largest privately owned generator in the country, ranking second only to the state-owned electricity company.

The Company is strategically divided into six divisions as follows:

Division	Description	% Group Gross Margin*	% Group EBITDA*
Generation	Produces electricity, markets and trades energy products, supplies fuel and power services in general (Spain only)	42.5%	45.4%
Distribution	Distributes electricity via its distribution network throughout Spain	29.0%	23.4%
Renewable Energy	Generates renewable energy from mini hydroelectric and wind.	8.0%	9.0%
Retailing	Provides electricity and gas supplies to the liberalized market, in addition to various non-energy related products and services	2.5%	0.4%
International Business	Generation and distribution of electricity internationally, primarily across Mexico and Brazil	11.6%	11.7%
Non-Energy	Energy consulting and real estate and engineering	6.7%	9.0%

(*) Based on year end 2004 financial information.

Spain remains one of the most attractive electricity markets in Europe due to its combination of size (5th largest in European Union), demographics, economic growth and positive regulatory environment. Over the period from 1997 to 2002, the country's power demand grew 5% vs. a 3.6% growth in GDP. In 2003, power demand increased a very strong 6% vs. 2.4% GDP growth. In 2004, power demand increased 3.5% vs. 3.1% GDP growth. This trend is continuing in 2005. In the first nine months 2005, the electricity demand increased 5.4% over the comparable period in 2004.

The last three years (2002, 2003 and 2004) have brought positive regulatory developments. Among them, a National Energy Planning that outlined government expectations regarding growth and investment in the power and natural gas sectors for the 2002-2011 period; a new clear tariff methodology for tariff increases of between 1.4% - 2% per annum through 2010 that ended a six year period of tariff decreases; the recognition of a € 1.5 billion of Tariff Deviation for the years 2000, 2001 and 2002, along with the right of the electricity companies to recover it through the tariff in subsequent years and a new regulation for renewable energies that provides much more stability, predictability and visibility to these technologies.

Right now, the sector is under a regulatory review and the Government has recently approved several measures in order to improve the current situation: a Spanish National Reform Plan that has laid the foundations of the Government's policy in the Electricity and Gas sectors; a new Renewable Energies Plan for 2005-2010, increasing substantially the target of installed capacity for these technologies, specially wind energy (from 13,000 MW to 20,000 MW) and a 2005-2011 National Energy Planning to substitute the 2002-2011 where its main modification is a substantial increase in the target of CCGTs for 2011 (from 14,800 MW to 24,000 MW).

In recent years, Iberdrola has achieved excellent growth in its sector, against a backdrop of increasing electricity demand in Spain (see table below) and a positive regulatory environment.

Long-term drivers of the markets served by the Company include:

- Forecasted growth in power demand in Spain compares very favorably with other European markets and, despite considerable planned Combined Cycle Gas Turbine ("CCGT") capacity, the supply reserve margin is expected to remain below the EU average of 15-20%, which is considered optimal.
- Spain's limited interconnection capacity with other countries limits foreign competition.
- Spanish regulatory environment remains favorable.
- The need to comply with environmental commitments.
- Lower operating costs driven by further cost savings (e.g. through workforce reduction plan).

The demand of electricity by Iberdrola's customers has exceeded the production of electricity by Iberdrola for the past two years as shown in the table below. This trend has continued for the first nine months of 2005. See pages 1 and 2 of the Nine Months Results 2005.

	In Spain		Overall (Iberdrola)		
	2004	2003	2004	2003	%Variation
Installed Capacity (MW)	22,547	20,288	25,237	22,788	+10.7
Gas combined cycle	2,800	1,600	5,183	3,793	+36.6
Renewable Energy	3,206	2,257	3,206	2,257	+42.0
Hydroelectric	8,776	8,662	9,083	8,969	+1.3

Coal	7,061	5,710	7,061	5,710	+23.7
Cogeneration	1,412	1,350	1,412	1,350	+4.6
Total Demand (GWh)	92,184	87,694	117,092	110,710	+5.8

STRATEGY

In order to meet the challenges of the progressive deregulation of the Spanish energy market, as mandated by EU and Spanish directives, Iberdrola's Board of Directors implemented in 2001 a comprehensive Strategic Plan for the period of 2002 – 2006. In view of being ahead of forecasts at the year-ended December 31, 2003, Iberdrola updated the Plan to 2008 in February 2004, reaffirming the 2001-2006 strategic targets. Investments for the period 2004-2008 will total €8.6 billion based on core businesses in the core markets.

The Plan outlines its strategy for the energy sector, concentrating its efforts for growth on the basic energy business in the domestic market, mainly in electricity generation using cleaner and more efficient sources such as renewable energy and gas combined plants. This follows the guidelines established by the government's National Infrastructure Plan of September 2002 (which Iberdrola's Strategic Plan had anticipated in October 2001) and the commitments accepted by Spain as a signatory of the Kyoto Protocol and the EU directives in CO₂ emissions reduction. In the context of increasing regulatory emphasis on less pollutant energy generation, Iberdrola, as the leader in gas combined cycle plants and renewable energy generation in Spain, has and will continue to have a significant advantage over its competitors (whose electricity generation capability is concentrated on less-environmentally-friendly means) in the coming years.

GENERATION ASSETS

At year-end 2004, Iberdrola operates and has investments in the following main generation facilities (excluding Latin America and the special regime: mini-hydro, wind farms and cogeneration):

	Number of Facilities	Installed Capacity (MW)
Hydroelectric power stations	377	8,776
Nuclear power stations	7	3,335
Oil/ gas thermal power stations	9	2,888
Combined cycle facilities	7	2,800
Coal thermal power stations	5	1,247

During the first nine months of 2005, the Company brought 2,033 MW of additional capacity into service, taking the total installed capacity up to 27,270MW with 88% of this capacity in Spain.

FINANCIAL HIGHLIGHTS

For full year-ended December 31, 2004, consolidated EBITDA and EBIT were € 2.9 billion and € 2.0 billion respectively, representing increases of 9% and 17% over 2003. Importantly, EBITDA increased across each line of business with the exception of Generation due to the fall in hydroelectric production due to low rainfall and the

subsequent increase in thermal production in the context of rising oil prices which was not completely reflected in wholesale market prices. At the end of December 2004, net financial debt totaled € 10.6 billion, up € 191 million from 2003. The Company's Net Debt to EBITDA ratio improved to 3.7x from 4.0x and the leverage ratio fell to 54.8% from 55.8%. EBITDA coverage of interest improved to 7.4 times from 5.8 in 2003.

For the first nine months of 2005, consolidated EBITDA and EBIT were € 2.39 billion and €1.64 billion, respectively representing increases of 10.7% and 12.1% over the 9 months of 2004. At September 30, 2005, the Company's Net Debt to EBITDA ratio stood at 3.93x (on a rolling 12 months EBITDA basis) and the Financial Leverage ratio stood at 56.6%. Not accounting for the €873mm Tariff Deviation, the Net Debt to EBITDA ratio is 3.65x and the Financial Leverage ratio is 54.8%.

The tables below demonstrate the Company's strong and improving financial condition.

GENERAL INFORMATION

Iberdrola's shares are listed on the top tier of the Spanish Stock Exchange, the IBEX 35, and included in the FTSE Eurotop 100 index. At November 15th, 2005, the Company's market capitalization was €20.19 billion.

Iberdrola was included in Eurostoxx 50 in September 2003. The Company's inclusion in this select index of the Eurozone's 50 largest quoted companies offers further endorsement to the Company's strategic importance amongst European utilities, ratifying confidence in management, strategy, results and financial solidity. Moreover, it increases the liquidity of the stock, reflected in the fact that Iberdrola's stocks were one of the most liquid on the Spanish stock market in 2003. Also in June, the Company was included in the FTSE Eurotop 100 index, which includes the biggest European utilities in terms of market capitalization.

The Company's website is www.iberdrola.com. The website is not part of the Memorandum.

SUMMARY HISTORICAL FINANCIAL DATA

The following table sets out selected consolidated audited financial information for the Group for years ended December 31, 2000 to 2004 and unaudited financial statements for the last twelve months (LTM) period ended September 30, 2005. Additional information can be obtained from the Audited Financial Statements of the Company attached to this Memorandum. The Group's auditors are Deloitte & Touche España, S.L.

Also, for a commentary on the economic and financial information for the full year-ended December 31, 2004, please see section 'Business Overview' section.

€ million	Fiscal Year Ended, December 31st					3Q'05

³ – In December 2001, Businesses in Brazil and Guatemala were consolidated by the equity method. Therefore, data for 2001 is non-homogenous.

* Not accounting for the €873mm Tariff Deviation, the Net Debt to EBITDA ratio is 3.65x and the Financial Leverage ratio is 54.8%.

NOTE: FY2005 financial results are under IFRS. The numbers for 3Q'05 LTM are under IFRS and all the previous years under Spanish GAAP.

PRO FORMA CAPITALIZATION

The following table sets forth the consolidated capitalization of the Group on a pro-forma basis after giving effect to the issuance of the Notes and the application of the proceeds there from. This pro-forma is based upon the unaudited balance sheet of the Group as of September 30, 2005. The pro-forma amounts have been adjusted to reflect the translation of the proceeds from the Note issuance at an exchange rate of €1.00 = US\$ 1.2026, the US/€ exchange rate as of September 30, 2005.

€ million	At September 30, 2005	Adjustments	Pro-forma (as adjusted)
Short-term debt	1,973	300	1,673
Long-term debt*	10,916		10,916
US\$300 million Senior Notes	-	300	300
Total borrowings	<u>12,889</u>	<u>-</u>	<u>12,889</u>

Shareholders Equity	9,464		9,464
Financial Leverage	56.6%		56.6%

* Not accounting for the €873mm Tariff Deviation, the Financial Leverage ratio is 54.8%.

LIQUIDITY AND CAPITAL RESOURCES

Financing the Iberdrola Group

The financial policy of Iberdrola is to finance its debt requirements through a range of international capital markets operations, taking advantage of Company solvency and credit quality, supported further by regular investor presentations throughout the financial year. The most notable transactions of the first nine months of 2005 are:

- €1,200 Million 7-year bank loan

On May 13th, Iberdrola signed a € 1,200 Million 7-year syndicated loan with 16 top financial entities. The transaction is divided in two parts, €500 million under syndicated loan format that replaces a 2004 May transaction and the remaining € 700 million under credit line format.

- € 500 Million 10-year EMTN issue

On June 10th, Iberdrola signed a € 500 Million 10-year issue (under the EMTN program) at a 3.50% fixed rate, the lowest rate ever for any Spanish company for a similar transaction. The issue was distributed among 50 European investors, mainly investment funds, insurance companies, Pension funds and commercial banks.

On September 22nd, Iberdrola signed a € 250 Million retapping of the 3.50% fixed rate June 10-year issue (under the EMTN program)

Debt Analysis

The financial cost on Company debt was 4.39% in 2004 (under IFRS the financial cost was 4.63%), 38 basis points lower than the prior year. The financial cost at September 30, 2005 was 7bps lower than at year-end 2004. Iberdrola took advantage of the low rates to continue increasing the relative weighting of fixed-rate debt, which now represents 52% of the total (plus 1,350 million already pre-hedged at fixed or capped rate for future financing), down from 58% FY2004. 14% of the total is capped. Hence, with 66% of debt fixed or capped, Iberdrola is well protected against interest rate rises.

In terms of currency, 87% of debt is in Euro, 8% in US Dollar, and 5% in Real. By origin/company, 84.4% of debt originates from Iberdrola S.A., 5.0% from Mexico, 5.6% from South America, 2.6% from Renewable Energy, and 2.4% from Iberdrola Inmobiliaria and others, as of September 30th, 2005. Operations in Brazil and investments in renewable energy in which Iberdrola does not have 100% effective control of the ownership are non-recourse.

Nearly all debt (84.4%) is assumed at the Iberdrola, S.A. level, with a central financing function based in Spain.

Structure of Debt
As of September 30th, 2005

Type of Debt
As of September 30th, 2005

Average maturity of debt increased by 0.6 years to 4.3 years at year-end 2004. In light of the refinancing policies pursued by Iberdrola during the first nine months of 2005, the average maturity of debt increased to 4.9 years from 4.3 years at year-end 2004.

The Company has NO nuclear or pension liabilities:

- Nuclear provisions: Back-end nuclear costs and responsibility fully externalized through ENRESA (a state owned company)
- Pension's provisions: Pensions are fully externalized. The Company runs a defined contribution model.

Liquidity Analysis

At September 30, 2005, the Company had the following available facilities to draw-on.

- Cash & Short term financial investments	€447 million
- Credit Lines	€1,520 million undrawn: <ul style="list-style-type: none">- €700 million 5 year (+1+1) Revolving Credit Line- €495 million 3 year Revolving Credit Line- €325 million 1 year Revolving Credit Line
- Loans	€342 million undrawn
- EMTN	€250 million (bonds issued but cash not collected)
- Commercial Paper	Domestic Program: €1.0 billion (€525 million undrawn) ECP Program: €1.0 billion (€300 million undrawn)

Iberdrola's strong credit rating provides the Company with the opportunity to access the debt capital markets at competitive levels. As of September 30, 2005, the Company has 1,862 million of liquidity available plus 447 million of cash resources and 250 million of bonds issued but cash not collected, in order to comply with Moody's Liquidity Analysis of covering the next twelve months of financing needs in advance.

THE OFFERING AND USE OF PROCEEDS

The Company has engaged Dresdner Kleinwort Wasserstein (DrKW) and ABN AMRO Incorporated (ABN AMRO) to serve as its agents in the private placement of approximately US\$300,000,000 Senior Guaranteed Notes (the "Notes"). The Notes will have multiple series of maturities, targeting a range of 7-/10-/12- and 15-year bullet maturities. The Notes will be issued by Iberdrola International, B.V. and guaranteed by Iberdrola, S.A. Proceeds from the Notes will be used to refinance existing senior indebtedness and for general corporate purposes.

The Notes will contain, among other provisions, a Most Favored Lenders provision and other covenants customary for transactions of this type and consistent with those in the

Company's previous private placements. Please refer to Section 3 for the Terms and Conditions for the offering of the Notes. A draft Note Purchase Agreement ("NPA") will be forwarded to prospective investors under separate cover. The NPA will be blacklined to show the adjustments versus the Company's previous US private placement Note purchase agreement.

The Company currently has the following series of Notes outstanding in the US Private Placement Market:

- 5.14% \$69 million due 2011
- 4.48% \$75 million due 2012
- 5.57% \$115 million due 2014
- 5.72% \$142 million due 2016
- 5.92% \$124 million due 2019

II. INVESTMENT MERITS

Significant Market Position

Iberdrola is currently the second largest producer and distributor of electricity in Spain with market shares of 30% for production and 40% for distribution. At year-end 2004, the Company had in excess of 9.6 million customers, an increase of 2.1% over 2003 (9.4 million). In addition, Iberdrola had a gross installed capacity of electricity of 22,547MW in Spain (11.1% increase over 2003) and produced 65,861MW (4.1% increase).

In the first nine months of 2005, the Company added an additional 130,000 customers and increased the installed capacity in Spain by an additional 1,344MW.

Vertically Integrated Business and Diversified Generation Portfolio

Iberdrola benefits from its vertically integrated electricity (generation and market) business in Spain. It is composed of a diversified generation portfolio and strong presence in distribution and supply that gives the Company considerable financial stability. This is one of the defining reasons why the electricity sector in Spain has high barriers to entry - small players specializing in one source of power generation are neither cost effective nor hedged against different weather conditions.

Energy Production (as of September 30th 2005)

	GWh	Vs. 2004	%	Weight
Gas combined cycle	23,874	7,628	47.0%	39.0%
Renewable energy	4,873	1,067	28.0%	8.0%
Wind energy	4,419	1,073	32.1%	-
Hydroelectric	6,787	-5,517	-44.8%	11.1%
Nuclear	16,359	-3,664	-18.3%	26.7%
Fuel-oil	2,855	1,055	58.6%	4.7%
Coal	5,094	-202	-3.8%	8.3%
Cogeneration	1,341	13	9.1%	2.2%
TOTAL NET PRODUCTION ENERGY DISTRIBUTED	61,183	380	0.6%	100%

Strong Management Team

The current management team of Iberdrola has been in place since 2001. The team put in place the current Strategic Plan 2002-2006 (updated in 2004 until 2008) and has achieved the milestones it set out in its strategic plan. The operational management has been with the Company for a long time. For the second year in a row, Iberdrola's Vice-Chairman and CEO was chosen the top executive in the European utilities industry. The Company also has good labor relations and has not witnessed any labor issues in over 100 years of Iberdrola's existence.

In addition, the management team has also delivered a strong and consistent financial performance as shown below:

EBITDA
For Year-Ended December 31

* Last twelve months ended September 30, 2005

NOTE: FY 2005 financial results are under IFRS. The numbers for 3Q'05 LTM are under IFRS and all the previous years under Spanish GAAP.

**Leading
Environmental
Credentials**

Iberdrola is the leader in renewable electricity generation, which gives it a significant advantage over its Spanish competitors (whose electricity generation capability is concentrated on less environmentally-friendly means) in the coming years in light of the Kyoto treaty implementation and the EU Directive in CO₂ emissions reduction.

Following investments in recent years, as of end of 2004, 20.5% of Iberdrola's Group generation capacity consists of state-of-the-art, environmentally-friendly combined cycle technology. In addition, 12.7% of the Group's capacity is in renewable energy. This is a low pollutant and well-balanced generation mix, and considered optimal in Spain given the current regulatory environment and flight to renewable energy.

In 2004, 70.3% of Spanish production was emission-free. As the table below demonstrates, Iberdrola (IBE) has significantly cleaner generation than the vast majority of its competitors.

CO2 Emissions per kWh

Source: PWC 'Climate Change & Power Industry' Oct 2002

Furthermore, the final allocation of emission rights announced by the Government on January 21st, 2005 consolidates the technological change in the Spanish electricity sector and proves right the strategy of Iberdrola of investing in new gas fired plants and renewable energies.

Reaffirming this approach, the Company has recently raised its target in renewable energies for 2008 from 5,500 MW to 6,200 MW. Renewable energy is a key feature of public European Union and Spanish energy policy, as it contributes to the reduction of energy dependence, improvements in the efficiency of electricity generation and the prevention of greenhouse gases and other emissions into the atmosphere. Iberdrola's plans to increase this generation park based on renewable energy are in line with the Renewable Energies Plan, the Kyoto Protocol and the European Directive on the reduction of CO₂ emissions.

Liquidity and Capital Resources

Iberdrola's strong credit rating provides the Company with the opportunity to access the debt capital markets at competitive levels. As of September 30, 2005, the Company has 1,862 million of liquidity available plus 447 million of cash resources and 250 million of bonds issued but cash not collected, sufficient to cover the next twelve months of financing needs.

In addition, Iberdrola can readily approach the equity market evidenced by its inclusion in the Eurostoxx 50 on September 2003. The Company's inclusion in this select index of Eurozone's 50 largest quoted companies gives further backing to the Strategic Plan, ratifying confidence in management, strategy, results and financial

solidity. Moreover, it increases the liquidity of the stock, reflected in the fact that Iberdrola's stocks were one of the most liquid on the Spanish stock market in 2004, with daily trading of 6.4 million. Also, on June 2003, the Company was included in the FTSE Eurotop 100 Index, which includes the biggest European Utilities in terms of market capitalization.

Financial Flexibility to Finance the Strategic Plan

Iberdrola is in a unique position to strengthen its competitive position in the energy market in Spain. Under the Strategic Plan 2002-2006 (and now updated to 2008), Iberdrola's installed capacity is intended to increase from 16,088MW as of year-end 2000 to over 32,000MW in 2008 and electricity production from 51,169GWh in 2000 to 127,000 GWh in 2008. This will enable Iberdrola to increase its competitiveness and maintain its cost leadership with a flexible and balanced production mix, thanks to the investment in CCGT plants and renewables.

Iberdrola enjoys significant financial flexibility to finance its Strategic Plan (approximately €16.2 billion in the period 2001-2008). The majority of the investments will be financed through Iberdrola's strong cash flow generation capacity, jointly with proceeds from the divestiture of non-strategic assets, and the rest will be financed via debt, which will allow the Company to maintain its current financial strength. The financial leverage (gearing) ratio is expected to fall to 50% by the end of 2008.

Solid Investment Grade Profile

Iberdrola has a long-term debt rating of A2 (neg; on review for possible downgrade following the agreement with Gas Natural) by Moody's Investors Services, A+ (stable) by Standard & Poor's and A+ (stable; on credit watch with negative implications following the agreement with Gas Natural) by Fitch. The credit ratings are based on:

- (i) Strong market position (#2) in its sector
- (ii) The stable and robust cash flows provided by its relatively low-risk domestic electricity operations
- (iii) Group's good business profile as a Spanish vertically integrated utility
- (iv) Conservative business strategy whereby the Company has refrained from undertaking a debt-funded international acquisition policy, focusing instead on organic growth as set out in the Strategic Plan. As a result, financial leverage is comparatively low and Iberdrola's credit ratings are superior to its Iberian competitors. The Company's gearing is lower than its key Spanish competitors (see Appendix 'Industry Overview' for a Industry competitive snapshot with Iberdrola and its industry peers).
- (v) Solid liquidity profile
- (vi) Environmentally friendly production portfolio

- (vii) Location in a country (Spain) with one of the EU's highest electricity demand growth rates and physically protected market
- (viii) A regulatory environment that remains favorable
- (ix) Consistent delivery in the targets set forth in the Strategic Plan leading to a gradual improvement of the credit profile

Conservative International Expansion

Iberdrola has taken a conservative approach to its international expansion, which represents 13.2% (€1,357 million) and 11.7% (€336 million) of the Group's consolidated revenue and EBITDA, respectively in 2004. The risk of international projects is mitigated by: (1) entering at the outset of each project into long-term power purchase agreements with host government and quasi-government agencies; (2) favorable long-term gas source contracts (allowing for a complete pass through of the gas prices in Mexico, buying the gas directly from Pemex and with both revenues and procurement costs in US dollars); and (3) regulated distribution and transport activities. Also, Iberdrola is less exposed to the more unstable Latin American countries than other Spanish utilities, and, hence, concentrates its business on Mexico and Brazil.

Clear Strategy in Gas Business

Despite its recent access to the gas market, Iberdrola has been able to achieve outstanding results. Iberdrola Gas S.A.U. began marketing and selling gas in October 2001 and in just over three years the Company has been able to achieve a 10.8% share of the liberalized market.

The Company's policy is to have approximately 70% of the forecasted gas needs covered in advance through long-term contracts leaving the rest for spot and short-term contracts. Iberdrola has achieved a diversified and flexible basket of contracts that ensures the supply of gas at reasonable prices, reducing the exchange rate risk and the exposure to fluctuations of the price of oil. In fact, the Company expects that 50% of its gas contracts will not be linked to oil prices by 2006.

Positive Sector Fundamentals

The attractiveness of the Spanish market resides in its huge growth potential, as consumption per capita is still below European average. Spain is, essentially, an energy island, with limited interconnection capacity with other countries. Iberdrola is very well placed to continue to benefit from the forecast growth in the Spanish market, which is one of the fastest growing electricity markets and the fifth largest in the European Union (CAGR close to 5% for the 1997-2004 period and 5.4% demand growth for the first nine months of 2005).

Due to a lack of investment and rapid demand growth, Spain currently has a low reserve margin (estimated by Iberdrola at 3% on Q1 2005 peak demand day), compared with a 15-20% EU average, which is considered the optimum level of reserve to operate an

efficient system while guaranteeing supply. This position is further compounded by Spain's high reliance on hydro generated power which represents 25% of total installed capacity which is clearly dependent on rainfall. However, the reliance on hydro generated power will inevitably decrease as new plants begin operation. This will result in Iberdrola (and the sector in general) having a much better generation mix, more balanced and less dependent on rainy conditions. Additionally, there is limited interconnection capacity with neighboring countries.

**Spanish
Regulatory
Environment
Remains Favorable**

The last three years (2002, 2003 and 2004) have brought positive regulatory developments. Among them, a National Energy Planning that outlined government expectations regarding growth and investment in the power and natural gas sectors for the 2002-2011 period; a new clear tariff methodology for tariff increases of between 1.4% - 2% per annum through 2010 that ended a six year period of tariff decreases; the recognition of a € 1.5 billion of Tariff Deviation for the years 2000, 2001 and 2002, along with the right of the electricity companies to recover it through the tariff in subsequent years; and a new regulation for renewable energies that provides much more stability, predictability and visibility to these technologies.

Right now, the sector is under a regulatory review and the Government has recently approved several measures in order to improve the current situation: a Spanish National Reform Plan that has laid the foundations of the Government's policy in the Electricity and Gas sectors; a new Renewable Energies Plan for 2005-2010, increasing substantially the target of installed capacity for these technologies, specially wind energy (from 13,000 MW to 20,000 MW) and a 2005-2011 National Energy Planning to substitute the 2002-2011 where its main modification is a substantial increase in the target of CCGTs for 2011 (from 14,800 MW to 24,000 MW).

**Sheltered Market
Despite
Deregulation
Process**

The only part of the industry that is still monopolistic in nature is the physical transfer of electricity through geographical networks. Generation units compete in a wholesale market and provide a growing number of customers with the opportunity to choose supplier. The liberalized market consists of a pool system whereby the last bidder - i.e. the highest cost supplier - sets the price for all electricity used on each day/hour/quarter-hour. From 1998, the basic industry was able to choose energy provider or buy it directly from the pool. Since then, approximately 45% out of the 68,000 large clients have chosen to sign new bilateral contracts (with relatively low discounts from its reference price, i.e. the regulated tariff, of approximately 5-10%). The election has been extended to the 23 million Spanish consumers from January 2003. Nevertheless, on overall basis only 1% of total consumers have decided to change.

Within Spain, the incumbent providers (Endesa, Iberdrola, Union

Fenosa), continue to dominate both generation and distribution within their well-differentiated regions and are not seen competing in terms of price. Although the market is deregulated, the tariff is capped and, therefore, there is little room to compete in terms of price; it is difficult to offer discounts.

Foreign investment in Spain since 1997 has been relatively low and located in very specific regions or specific projects (EdP through Hidrocantábrico; Enel in Viesgo).

Focused and Well Thought-Out Strategic Plan

Iberdrola designed a Strategic Plan (see 'Business Overview' section) for the period 2002-2006 in order to meet all the challenges of the progressive deregulation of the Spanish energy market. This Strategic Plan anticipated industry trends, later confirmed by the Spanish National Energy Plan ('NEP').

In view of being ahead of forecasts at the year-ended December 31, 2003, Iberdrola updated the Plan to 2008 in February 2004, reaffirming the 2001-2006 strategic targets. Investments for the period 2004-2008 will total €8.6 billion based on core businesses in the core markets.

The performance of the Company in 2004 and during the first nine months of 2005 shows that it is on the right path to achieve its goals.

Sustainability Ranking

According to Dow Jones Index, Iberdrola is among the global leaders in sustainability and is ranked #3. The Dow Jones Index is the main international reference for measuring the contribution of companies to economic, environmental and social sustainability. In addition, the Company also increased Quality Aspects certificates in 2004 as shown below:

	2004	2003	
ISO 9001 Certificates	14	13	(Quality Management System)
ISO 14001 Certificates	16	23	(Environmental Mgmt. System)
OHSAS 18001 Certificates	4	5	(Occupational Risk Prevention)

III. SUMMARY OF TERMS AND CONDITIONS

The following is a summary description of the Notes and their material terms and should be read in conjunction with the Draft Note Purchase Agreement (Section V of this Memorandum). Terms not defined herein have the same definitions as in the enclosed Draft Note Purchase Agreement. The Draft Note Purchase Agreement is blacklined against the Company's previous U.S. Private Placement Note Purchase Agreement.

Issuer:	Iberdrola International B.V.
Guarantor:	Iberdrola, S.A.
Issue:	US\$300,000,000 Senior Notes (the "Notes").
Ranking:	The Notes will rank <i>pari passu</i> with all other senior, unsubordinated and unsecured indebtedness of the Company, present and future.
Maturity:	7, 10, 12 and 15-year bullets.
Use of Proceeds:	General corporate purposes
Optional Prepayment of Principal:	Callable at any time at the greater of par and Make Whole. Make Whole discount rate is market standard at Treasuries + 50 basis points.
Financial Covenants: (Please refer to the Draft Note Purchase Agreement for full and complete covenant language)	Most Favored Lenders Provision (see the next page for full text) Transactions with Affiliates Mergers and Consolidations Limitations on Liens (15% of Adjusted Consolidated Assets) Disposition of Assets (15% annually and 30% cumulative of Consolidated Total Assets) Subsidiary Indebtedness (15% of Adjusted Consolidated Assets)
Representations & Warranties:	Standard for this type of transaction.
Affirmative Covenants:	Standard for this type of transaction.
Events of Default	Standard for this type of transaction including cross-default provisions
Governing Law:	The Note Purchase Agreement and the Notes will be governed by and construed in accordance with the laws of the State of New York.
Investors' Counsel:	Bingham McCutchen LLP
Issuer's Counsel:	White & Case

Favored Lenders Provision.

If at any time (a) any Principal Lending Agreement shall include any financial covenant, undertaking, or other provision (or any thereof shall be amended or otherwise modified) that provides for limitations on measures of indebtedness, interest expense, net worth, stockholders' equity or net assets (however expressed and whether stated as a ratio, as a fixed threshold, as an event of default or otherwise), or (b) without limiting the generality of the foregoing, the 2004 Bank Agreement should have a gearing covenant or an interest cover covenant, and such financial covenant, undertaking, restriction or other provision as contemplated by such clauses (a) and (b) is not contained in this Agreement or would be more beneficial to the holders of Notes than any analogous provision contained in this Agreement (any such provision, an "Additional Covenant"), then the Company or the Guarantor shall provide a Most Favored Lender Notice in respect of such Additional Covenant. Thereupon, unless waived in writing by the Required Holders within five days of each holder's receipt of such notice, such Additional Covenant shall be deemed incorporated by reference into this Agreement, mutatis mutandis, as if set forth fully herein, effective as of the date when such Additional Covenant shall have become effective under the Principal Lending Agreement or the 2004 Bank Agreement, as the case may be. Thereafter, upon the request of any holder of a Note, the Obligors shall enter into any additional agreement or amendment to this Agreement reasonably requested by such holder evidencing any of the foregoing. Any Additional Covenant incorporated into this Agreement (herein referred to as an "Incorporated Covenant") pursuant to this Section 10.6: (i) shall remain unchanged herein notwithstanding any waiver of such Additional Covenant under the applicable Principal Lending Agreement or the 2004 Bank Agreement, (ii) shall be deemed automatically amended herein to reflect any subsequent amendments made to such Additional Covenant under the applicable Principal Lending Agreement or the 2004 Bank Agreement, and (iii) shall be deemed deleted from this Agreement at such time as such Additional Covenant is deleted or otherwise removed from the applicable Principal Lending Agreement or the 2004 Bank Agreement or such applicable Principal Lending Agreement or 2004 Bank Agreement shall be terminated and no amounts shall be outstanding thereunder. Upon the occurrence of any event described in sub-clause (ii) above, upon the request of either any Obligor or any holder of Notes, the holders of Notes and the Obligors shall enter into any additional agreement or amendment to this Agreement reasonably requested by the Obligors or the holder of Notes, as the case may be, evidencing the amendment of any such Additional Covenants. Upon the occurrence of any event described in sub-clause (iii) above, upon the request of any Obligor, the holders of Notes shall enter into any additional agreement or amendment to this Agreement reasonably requested by the Obligors evidencing the deletion and termination of any such Additional Covenants.

For purposes of this Agreement, the following terms have the following meaning:

"Principal Lending Agreement" means any agreement, instrument or facility, and any renewal, refinancing, refunding or replacement thereof, or any two or more of any of the foregoing forming part of a common or interrelated financing or other transaction, entered into after the date of this Agreement and representing Indebtedness (other than Project Company Indebtedness) of the Guarantor, the Company and, when the aggregate Indebtedness of the Guarantor, the Company and Iberdrola Finanzas, S.A.U. is less than 80% of Consolidated Group Indebtedness, any Subsidiary (other than any Subsidiary where no holder of Indebtedness of such Subsidiary has any recourse to the

assets of the Guarantor, Iberdrola Distribución Eléctrica, S.A.U. or Iberdrola Generación, S.A.U. or any Subsidiary of Iberdrola Distribución Eléctrica, S.A.U. or Iberdrola Generación, S.A.U.) in the aggregate in excess of €100,000,000 (or the equivalent thereof in any other currency); provided, however, that the term "Principal Lending Agreement" shall not include any agreement, instrument or facility with the European Investment Bank or similar multi-lateral agency, unless any such agreements, instruments or facilities represent Indebtedness incurred after the date of this Agreement in an outstanding amount, in the aggregate for all such Indebtedness, which is more than 15% of Consolidated Group Indebtedness. Notwithstanding anything contained herein to the contrary, any syndicated bank facility entered into by any Subsidiary after the date of this Agreement pursuant to which the lenders thereunder have any recourse to the assets of the Guarantor, Iberdrola Distribución Eléctrica S.A.U., Iberdrola Generación S.A.U. or any Subsidiary of Iberdrola Distribución Eléctrica S.A.U. or Iberdrola Generación S.A.U., shall be considered a Principal Lending Agreement.

"Most Favored Lender Notice" means, in respect of any Additional Covenant, a written notice to each of the holders of the Notes delivered promptly, and in any event within five (5) Business Days after the inclusion of such Additional Covenant in any Principal Lending Agreement or the 2004 Bank Agreement (including by way of amendment or other modification of any existing provision thereof), by a Senior Financial Officer of the Company or the Guarantor, as the case may be; referring to the provisions of this Section 10.6 and setting forth a verbatim statement (together with an English translation thereof, if applicable, as contemplated by Section 20) of such Additional Covenant (including any defined terms used therein) and related explanatory calculations, as applicable; provided that, if such Additional Covenant is included in the 2004 Bank Agreement on the date of Closing, such notice shall be a certificate of such Senior Financial Officer delivered to each holder of Notes on the date of Closing and setting forth such Additional Covenant (including any defined terms used therein) as contained in the 2004 Bank Agreement.

"Consolidated Group Indebtedness" means, at any time, the aggregate Indebtedness of all members of the Group, determined after elimination of intercompany items among members of the Group.

IV. BUSINESS OVERVIEW

HISTORY OF THE GROUP

Iberdrola, S.A. is currently the second largest producer and distributor of electricity in Spain with a market share of 30.1% of the total gross output and 40% of the total electricity distributed in 2004. The Group has over 17.4 million clients and a gross installed capacity of 25,237 MW, producing 81,812 GWh in 2004.

Iberdrola's long-term senior unsecured debt ratings are as follows:

Fitch Ratings:	A+ (Outlook: Stable)
Moody's Investors Services:	A2 (Outlook: Negative; on review for possible downgrade)
Standard & Poor's:	A+ (On Creditwatch with negative implications)

The ratings by Moody's and S&P were put under review for possible downgrade in September 2005, following Iberdrola's agreement to buy assets from Gas Natural should its bid for Endesa be successful. Please see Section V for more details on this agreement.

Iberdrola is the result of the merger of five major electricity utilities, which, in chronological order of foundation, were

- Hidroeléctrica Ibérica,
- Hidroeléctrica Española,
- Saltos del Duero,
- Iberduero, and
- Saltos del Sil.

On July 19, 1901, with the support and backing of the newly created Banco de Vizcaya, a group of entrepreneurs led by mining engineer Juan Urrutia founded Hidroeléctrica Ibérica in Bilbao. The new company had concessions on the river Ebro and immediately acquired further licenses to operate on the Leizarán, Urdón, Mijares, Júcar, Segura and Tajo rivers. The new company's mission was to supply electricity first to the Basque Country and then to Valencia, Madrid and Santander, finally reaching Castellón and Catalonia.

In 1906, another group of Bilbao-based entrepreneurs, led by civil engineer José Orbegozo, set up the Sociedad General de Transportes Eléctricos, with a view to harnessing power from the river Duero, in its international stretch between the mouths of the rivers Tormes and Huebra.

On May 13, 1907, a group of businessmen from the Basque Country and Madrid led by Lucas Urquijo and José Luis Oriol got together with Juan Urrutia, Hidroeléctrica Ibérica and the Banco de Vizcaya to create Hidroeléctrica Española, conceived to service the Madrid and Valencia markets. Hidroeléctrica Ibérica, which contributed its concessions on the rivers Tajo, Júcar and Mijares, held 44 per cent of the new company's capital. In 1909, the Salto del Molinar power station came into operation and a line was built to supply the Spanish capital.

In 1918, the Sociedad General de Transportes Eléctricos reached an agreement with the Banco de Bilbao and Basque entrepreneur Horacio Echevarrieta to form the Sociedad Hispano Portuguesa de Transportes Eléctricos. After its merger with Consorcio de Saltos del Duero, it was eventually renamed as Saltos del Duero. The new company inaugurated Spain's first major hydroelectric station, Salto de Ricobayo on the river Esla, in 1935. The Spanish Civil War brought developments in the country's electricity industry to an abrupt halt. The 1940s were years of major social and economic difficulties, which had a considerable negative influence on industry in general and the electricity sector in particular. Against this background, Hidroeléctrica Ibérica and Saltos del Duero merged in 1944 to form Iberduero.

In the 1950s, with the problems of importing technology overcome, both Hidroeléctrica Española and Iberduero began to build a series of major hydroelectric and thermal power stations to meet the substantial increases in demand for electricity. Over the following decades, a number of power stations, including Aldeadávila, Valdecañas, José María Oriol, Villarino, Escombreras and Santurce, were linked to the network. Some years later, nuclear technology appeared on the industrial market and in 1971 the Santa María de Garoña nuclear power station came into operation. Ten years later, in response to the 1973 energy crisis, the latest generation of nuclear power stations, at Almaraz and Cofrentes, were brought into service.

In 1992 Hidroeléctrica Española and Iberduero merged to create Spain's largest private electricity company, Iberdrola. The incorporation of the Company meant a major increase in competitiveness and the capacity to take a leading role in the Spanish and international electricity industries.

Since then, drastic changes have affected regulation, the raw material markets, technology and financial markets. Iberdrola has managed to adapt fast, efficiently and without fuss to all of them. Now, a hundred years after its original creation, Iberdrola is one of the world's leading private electricity companies in terms of market capitalization and the number of clients it serves, with a mission to increase value to benefit shareholders, customers and employees.

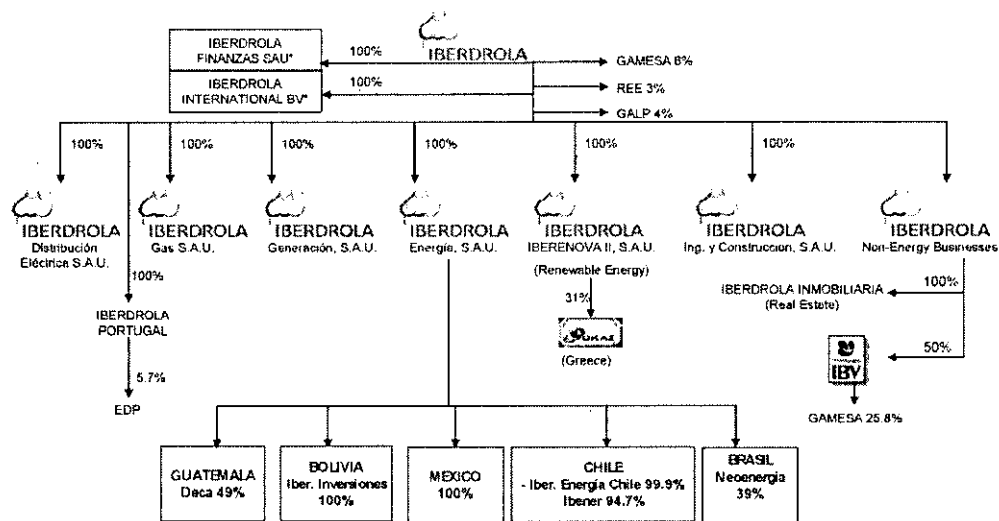

The Spanish Electricity Law (Ley 54/1997) required that the corporate purpose of companies that carry out any of the activities regulated in the law (economic and technical management of the system, transmission and distribution) must be confined exclusively to such activities. Accordingly, these companies may not carry non-regulated activities, such as production, retailing to eligible customers, other non-electric activities or activities abroad. Incompatible activities may be carried out within the same group of companies, provided that different companies perform them.

As a result of this regulatory requirement, in the course of 2000 and 2001, Iberdrola S.A. split its activities in different fully owned subsidiaries.

Iberdrola S.A. is today the holding company that controls, supervises and manages the activities of a group of companies with interests in the Spanish energy sector as well as in other diversified activities in Spain and internationally. Additionally, Iberdrola S.A. is responsible for the marketing of non-regulated electricity activity.

The graph over page shows the corporate structure of Iberdrola S.A. as of today:

(*) Issuing financial vehicles

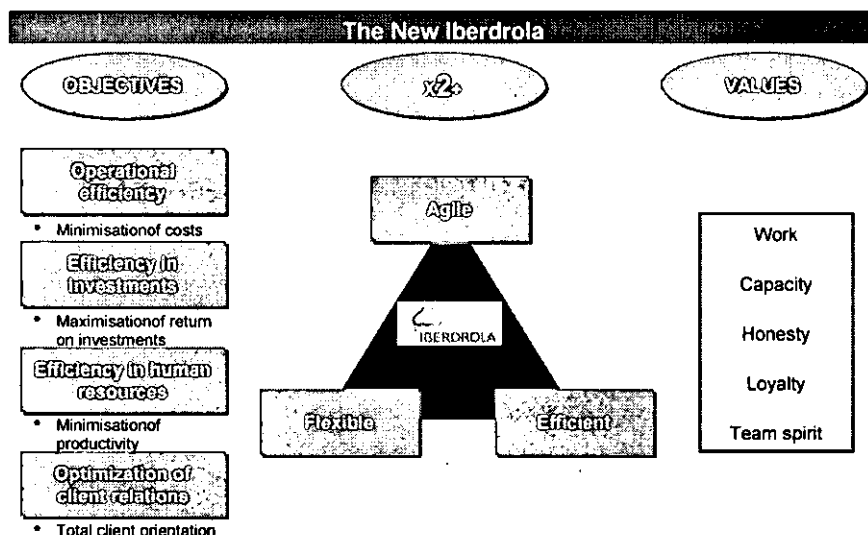

CORPORATE STRATEGY

In order to meet the challenges of the progressive deregulation of the Spanish energy market, Iberdrola's Board of Directors approved a comprehensive Strategic Plan for the period 2002 to 2006, which paved the way for the electricity sector, concentrating its efforts for growth on the basic energy business in the domestic market mainly in electricity generation using cleaner and more efficient sources such as renewable energy and gas combined plants. The Plan also concentrates on organic growth, with strict investment criteria (WACC +2-3%) and through divesting in non-core assets. Since its launch, the Plan has earned market recognition and follows the guidelines established by the Government's National Infrastructure Plan (in fact, Iberdrola anticipated that National Infrastructure Plan, a trend which the Company's competitors later followed) and the commitments accepted by Spain as a signatory of the Kyoto Protocol (and the EU Directives on CO₂ emissions reduction).

The plan includes a major combined cycle facility construction program, a firm commitment to renewable energy, a substantial increase in the gas business and a profitable international expansion, mainly focused in a low risk country such as Mexico with a cautious approach towards Brazil, combined with efficient risk management.

The plan establishes a deep change in the activities of the Company, doubling the size of the Group, and maximizing the profitability and the creation of value for its clients, its employees and the shareholders.

The graph below summarizes the key goals of the Strategic Plan 2002-2006, as originally set out:

Source: Iberdrola.

Under the Strategic plan Iberdrola expects to double its installed capacity (from 16,088 MW in 2002 to 30,800 MW in 2006) as well as its electricity production (51,169 GWh in 2002 to 120,000 GWh in 2006). In this process, Iberdrola expects to increase the contribution from the generation business and also aims to achieve larger international presence, but also a well-balanced revenue mix.

The table below summarizes the targets of the Strategic Plan 2002-2006:

Doubling Size and Results	
Total Investment	€12 billion
Net Profit '06	€1.6 billion
Leverage '06	Below 50%
Dividend Growth	Growth in line with Net Profit (minimum 5% DPS growth)

Source: Iberdrola.

The Strategic Plan 2002-2006 focuses on four main variables:

- **Operational efficiency:** through the improvement of revenues, production, installed capacity and customers, while reducing external costs, personnel and purchases.
- **Efficient human resources management:** Iberdrola has already completed its initial planned target in terms of workforce reduction (8,936 employees by 2006 in the Traditional Energy Business in Spain) and set a new target for 2008 aiming for a further 1,000 employees workforce reduction (in net terms).

The success in the workforce reduction is a consequence of the new efficiency measures approved in 2003 and in particular, the Early Retirement Plan agreed with the Unions.

- **Optimization of the Company's relations with its clients:** One of the key objectives of the Strategic Plan is to maximize the value of its portfolio of clients, taking advantage of the opportunities that the full deregulation of the Spanish energy market in 2003 will bring.

The Company aims to increase the breadth of its service to clients, offering new products and services (such as gas supply and industrial products) and better address its needs by segmenting the client base.

- **Efficiency in investments:** Under the Strategic Plan, Iberdrola had planned to invest €12 billion from 2002 to 2006. These investments would be financed with the high cash flow generation during the period, proceeds from the divestiture of non-strategic assets and from the current borrowing capacity of the Group.

Under the Strategic Plan Iberdrola expects to take the leading role in Spain in the development of CCGT (Combined-Cycle Generating Technology) and renewable plants with a total investment plan of more than €4,000 million for the period. According to the Strategic Plan 2002-2006, Iberdrola will invest €1,900 million in the construction of CCGT plants, for a total installed capacity of 4,000 MW. Iberdrola is currently running the most advanced CCGT program in Spain, taking the lead in this sector.

The Company will also invest around €2.4 billion in the development of generation capacity from renewable sources. The group expects to have a total installed capacity of almost 4,000 MW in 2006, mostly produced in wind farms. This investment program will consolidate Iberdrola's leadership as a clean energy producer.

The table below shows the investment program contemplated by the Strategic Plan 2002-2006:

Investment Program	Investment Target	Investment Results
SPAIN (Over 70% of total Investments)	Reduce the gap in Generation-Distribution	- CCGTs: 4,000 MW :€1.9 billion - Renewables: 3,800 MW :€2.4 billion
	Improve quality of service	- Increase Investments in Distribution :€2.1 billion
	Leading Supplier	- Leadership in Electricity 8% share in Gas
INTERNATIONAL (Presence in the 2 major markets in Latin America)	Mexico – Expand generation capacity	- CCGTs: 5,000 MW :€2.5 billion
	Brazil – Optimize position with limited investment	- Limited Investment in Distribution and Generation :€1.0 billion

Financing of Iberdrola's Investment Plan 2002-2006

	€ billion	%
Cash flow	6.6	55%
Divestments	3.0	25%
Debt	2.4	20%

Source: Iberdrola.

The investment program has two basic points:

- **Growth of generation capacity in Spain:** based on Iberdrola's current leadership in the development of combined cycle generation facilities and in the renewable energy field, with a view to increase the convergence between production capabilities and marketing; and
- **International growth in generation:** particularly in Mexico and, to a lesser extent, in Brazil.

The Company has successfully divested of non-core assets and financial stakes that have allowed them to raise €3 billion since 2002, as originally forecast.

Iberdrola's management believes that the Strategic Plan will ensure the growth of Iberdrola, increasing its profitability and financial strength. To assure that the Company as a whole is compliant with the Strategic Plan, Iberdrola has adapted its organization to a simple, direct and flexible client and results oriented management model. This

organizational reshuffle has enabled Iberdrola to meet the new challenges derived from the growing deregulation and increasing competition in global energy markets. (For details concerning divisional success in implementing the Strategic Plan, please see the Business Sectors).

Updating the Strategic Plan

In view of the high level of compliance with the objectives set in the 2002-2006 Strategic Plan, Iberdrola updated it to 2008. The objectives for 2004-2008 reaffirm the strategic lines of the Plan implemented in 2002, focused on the energy business, basically in Spain. The Company will continue to stimulate organic growth over the next few years, making investments in line with the energy policy approved by the Government, based on guaranteeing the security of supply, the bid to introduce cleaner generation technologies and efficiency. This growth will be obtained at low financial risk, with low leverage and without goodwill to amortize.

Between 2004 and 2008, Iberdrola plans to invest €8,600 million that, in addition to the €7,600 million invested from 2001 to 2003, brings the total investments to €16,200 million (73% in Spain). Iberdrola is thus the electric Company that has invested most and is currently investing most in the electricity industry at the present time, with the objective of achieving double-figure growth in profit and dividends.

Specifically, Iberdrola plans to invest €6,700 million in Spain between 2004 and 2008, €4,700 million of which will be assigned to generation and renewable energies and €1,500 million to distribution. Investments in the international area will amount to €1,900 million, €1,700 million to be assigned to Mexico and €200 million to South America.

Strategic Plan Investment Schedule

€ billion	2001-2003	2004-2008	Total
Generation	1.9	2.4	4.3
Renewables	1.7	2.3	4.0
Distribution	1.5	1.5	3.0
Other	0.5	0.5	1.0
Spain	5.6	6.7	12.3
Mexico	1.4	1.7	3.1
S. America	0.6	0.2	0.8
International	2.0	1.9	3.9
Total	7.6	8.6	16.2

Operating objectives

The operating objectives for this period focus on having capacity under management in Spain of more than 6,000 MW in combined cycle plants and 5,500 MW in renewable energy (1,000 MW out of Spain). The Company has recently raised its renewable energies target for 2008 from 5,500 MW to 6,200 MW.

The strategy is also to bring into service 5,000 MW in combined cycles in Mexico and 500 MW in South America.

It is worth noting that as of September 30, 2005, the Company is fully meeting its targets in the building program of CCGTs and renewable energies in Spain.

Also, with the latest project awarded in Mexico in June 2004 the Company will be able to achieve its 5,000 MW target in this country.

Finally, after the commissioning of the Termopernambuco's CCGT plant in Brazil, the Company has also achieved its 500 MW target for the South American region.

In the distribution business, Iberdrola will continue to maintain its position with regards to service quality in Spain.

Financial objectives

The Company will be seeking to achieve average growth in results of two figures, leverage less than 50%, growth in dividends in line with net profit and ROE of more than 15% (13.9% as of year end 2004, having increased from 12.0% in 2002). Efficiency will also continue to improve, with net operational expenses over gross margin of 25%.

The rest of the investment plan up to 2008 will be mostly financed through internally generated cash flows and approximately €200 million in divestments per annum primarily in real estate. It is worth mentioning that the cash flow generation capacity of the Group is going to increase substantially in the following years as the Strategic Plan advances and more plants become operational.

Commitment to the environment

In this period, Iberdrola will also reinforce its environmental commitments thanks to a model of growth based on sustainable development that contributes towards compliance with the EU Directive on the reduction of emissions and Kyoto protocol at a lower cost for Spain.

Iberdrola is the electricity company in Spain with the generation portfolio with the least pollutants and, therefore, the best positioned in respect of the CO₂ emissions trading issue that began across the European Union on January 1, 2005.

ABN-AMRO

Dresdner Kleinwort Wasserstein

COMPANY OVERVIEW

The Company is strategically divided into six divisions as follows as of FY2004:

Division	Description	% Gross Margin	% EBITDA
Generation	Produces electricity, markets and trades energy products, supplies fuel and power services in general (Spain only)	42.5%	45.4%
Distribution	Distributes electricity via its distribution network throughout Spain	29.0%	23.4%
Renewable Energy	Generates renewable energy from hydroelectric, wind.	8.0%	9.0%
Retailing	Provides electricity and gas supplies to the liberalized market, in addition to various non-energy related products and services	2.5%	0.4%
International Business	Generation and distribution of electricity internationally, primarily across Mexico and Brazil	11.6%	11.7%
Non-Energy	Energy consulting and real estate and engineering	6.7%	9.0%

Financials as Split by Business Activity

The following tables below illustrate the gross margin and EBITDA for the six divisions of the Company for years 2002, 2003, and 2004.

Generation				Renewables			
€ million	2002	2003	2004	€ million	2002	2003	2004
Gross Margin	1,645.1	1,791.3	1,753.5	Gross Margin	95.2	235.9	329.5

At the end of 2002 the Company sold the High Voltage Grid (Transmission Business)

Iberdrola Group Operating Data

The demand of electricity by Iberdrola's customers has exceeded the production of electricity by Iberdrola for the past two years as shown in the table below. This trend has continued for the first nine months of 2005. See pages 1 and 2 of the Nine Months Results 2005.

	2004	2003	%Variation 04/03
Installed Capacity (MW)	25,237	22,788	10.7
Gas combined cycle	5,183	3,793	36.6

FY2004 FINANCIAL RESULTS (UNDER SPANISH GAAP)

The comments below refer to the Annual Accounts for 2004 and 2003.

	Million €	Vs. 2003
NET SALES	10,314	+8.7%
GROSS MARGIN	4,168	+8.4%
EBITDA	2,858	+9.2%
EBIT	2,019	+10.7%
ORDINARY PROFIT	1,699	+15.3%
NET PROFIT	1,211	+14.2%

Results for the year

In 2004, Iberdrola posted net income of € 1,210.7 million, up 14.2% from € 1,060.3 million during the previous year.

Analysis of the result for the year

- **Net sales**

Iberdrola's sales totaled € 10,314.5 million in 2004, up 8.7% from 2003, mainly due to the 13.9% increase in the group's total production despite a lower level of rainfall during the period.

- **Gross Margin**

Gross margin continued to rise in 2004, increasing 8.4% over 2003 to € 4,168.3 million, thanks to the larger contribution of the domestic business, renewable (+39.7%), supply (+42.6%) and distribution (+7%) activities, and the international (31.7%) and non-energy (+19.6%) business.

- **Domestic energy business**

Gross margin was up 5.3% to € 3,517.2 million. Highlights here were:

- The stabilization of the gross margin in generation (-2.1%), in a year in which there was a 30% drop in rainfall levels and greater combined cycle production (+92.8%).
- Sales of renewable energy grew by 39.7% to € 329.5 million as a consequence of the increase in production during the period (+38%).
- The gross margin on retail sales was up 42.6% to € 103.8 million, due to greater activity of this business line in electricity and gas.
- In distribution, the gross margin was up 7% to € 87.7 million, thanks to the increase in the compensation of the regulated business recognized in the 2004 rate and to the positive balance stemming from resettlement differentials from prior years.

- **International business**

Gross margin was up by 31.7% to € 478.2 million as a result of the good performance of the group's business lines on the international scene:

- In Mexico-Guatemala, gross margin totaled € 208.9 million (+57.4%) thanks largely to the contribution made by the Altamira plant and despite negative movements in the exchange rate during the period. The strong performance of the distribution business in Guatemala should also be noted.
- In Brazil, gross margin increased by 16.9% (€ 269.3 million) following an upturn in demand and the increase in rates approved for the distribution companies Coelba, Cosern and Celpe.

- **Non-energy businesses**

Non-energy businesses contributed € 172.9 million to the total gross margin, an increase of € 28.3 million, primarily due to the APEX real estate business.

EBITDA (Gross Operating Profit)

The company's EBITDA (gross operating profit) was up 9.2% to € 2,857.7 million as a result of the growth in gross margin and efficiency improvements. This increase, marked by a 13.9% rise in the group's total production due to ongoing investment efforts, translated into a controlled increase of 5.8% in net operating expenses.

Significantly, net personnel expenses were down 1.4% after the Workforce Reduction Plan went into operation. In addition, taxes rose by 11.8% to € 180.8 million, as a result of the increase of this item in the retailing business and a higher Real Estate Tax (IBI) due to new facilities in operation.

EBIT (Net Operating Profit)

The company's net operating profit (EBIT) reached € 2,018.9 million (+10.7%) as a result of the growth in gross margin, improvements in efficiency and the controlled amortization, depreciation and provisions item (+5.7%).

Amortization and depreciation were up slightly to € 828 million (+6.2%) as a result of new investments in combined cycle plants in Spain and Mexico and in renewable plants. Provisions rose by € 4 million.

Financial result (Net Financial Expenses)

Iberdrola's financial result was € -389.7 million, an improvement of 13.3% over 2003. Financial expenses fell by 10.2% from January to December 2004, as a result of a reduction in the average cost of debt by 38 basis points to 4.39%, as compared to 4.77% during the previous year.

This improvement was reached despite a decline in financial profit (-3.8%), as a result of lower financial expenses from the start-up of commercial facilities and of lower dividends and interest collected for the period.

Results of companies consolidated by the equity method

Results of companies consolidated by the equity method dropped by € 30.3 million to € 69.5 million, because Repsol YPF is no longer consolidated following the company's sale of its interest in it during the second half of 2003, and because of a lower contribution from Corporación IBV which at December 2003 included € 30 million from the gains obtained from the sale of the 6% stake in Gamesa. Excluding both effects, this item improved by almost 99%.

Ordinary Profit

The combination of an increase in operating profit and an improvement in financial profit allowed a considerable rise in profit from recurring operations, up 15.3% in 2004 to € 1,698.7 million, notwithstanding the lower contribution of companies consolidated by the equity method.

Net Profit

As a result of the gains obtained from divestments of real estate assets, Iberdrola's extraordinary profit totaled € 58.9 million in 2004, compared to the extraordinary loss totaling € 198.2 million in 2003. Also worth noting is the change in the corporate profit

tax of € 327.5 million, with an increase in the effective rate to 30.4% from 16.2%, which resulted in higher tax expenses compared to 2003.

BALANCE SHEET

Iberdrola's balance sheet as of December 31, 2004, reflected total assets of € 25,934 million. Iberdrola's financial strength stands out, even with the sizeable investments it made in the period.

	Million €	Vs. 2003
TOTAL ASSETS	25,934	+6.1%
TANGIBLE & INTANGIBLE FIXED ASSETS	18,961	+7.6%
FINANCIAL FIXED ASSETS	2,671	+14.7%
SHAREHOLDERS' EQUITY	8,717	+6.0%
NET DEBT	10,569	+1.0%

The following headings in the consolidated Balance Sheet are worthy of note:

Fixed assets

Iberdrola made investments of Eur 2,713 million in 2004. It should be pointed out that this amount includes Eur 587 million which were not invested in 2004 but which were included in the balance sheet for 2004. The breakdown of investments is shown in the following table:

Million euros	Jan-Dec 2004	%
Spain	2,186	80.6
Generation	594	
Renewables	811	
Distribution	451	
Other	330	
Mexico	329	12.1
Generation	321	
Distribution	8	
South America	49	1.8
Generation	4	
Distribution	45	
Other International	149	5.5
TOTAL	2,713	100.0

Among investments in Spain, which came to € 2,186 million, or 80.6% of total investment, those in the renewable business (€ 811 million) and in generation (€ 594 million), mainly for the construction of combined cycle plants, are noteworthy.

In Mexico, investment focused mainly on the Altamira V and VI (€ 185 million) and the Laguna II combined cycle plants, which will be operational in 2005, and in which Iberdrola invested € 56 million. Iberdrola also launched the construction of the

Tamazunchale combined cycle (€ 42 million). In Brazil, investments were channeled into the distribution business and financed with funds generated within the country.

Financial fixed assets

Financial investments made during the period totaling € 305 million and reflecting the acquisition of the stake in the Greek company Rokas, the 3% increase in the stake in Gamesa and the subscription to the capital increase in EDP, were the main cause of the € 343 million increase in Financial Fixed Assets in 2004.

Share capital

At December 31, 2003, Iberdrola's share capital consisted of 901,549,181 bearer shares with a par value of 3 euros per share.

On January 2, 2004, a gross interim dividend of € 0.286 per share was paid out for FY 2003, a 10% increase over the interim dividend paid out for FY 2002. In addition, on July 1, a supplemental dividend of € 0.3867 per share was distributed for FY 2003.

That brought the total dividend for FY 2003 to € 0.6727 per share, up 10.2% over the previous year.

Financial debt

At the end of December, net financial debt stood at € 10,569 million and financial leverage was 54.8%, a 100 basis point improvement from 55.8% in 2003. The average cost of debt dropped by 38 basis points to 4.39% at the end of 2004.

The debt structure by currency and interest rate and by geographical area, company and product type is shown in the 'Liquidity and Capital Resources' section within the Executive Summary.

Mention should be made here of the reduction in debt attributed to the renewable energy business following the reorganization in 2003 of the activities in that business and which brought Iberdrola 100% ownership in the majority of the wind farms. As a result, in 2004, Renewables' non-recourse debt has been repaid, and from now on, activities in this business will be financed at Iberdrola S.A. level at a lower cost. Therefore, the 2.7% attributed to renewable energy in the above table refers to those wind farms in which Iberdrola does not yet have 100% effective control of the ownership. This debt is non-recourse.

In line with the company's policy of minimizing financial risk, currency risk was offset by financing investments in local currency (Brazilian Reals, in the case of Brazil) or functional currency (US dollars, in the case of Mexico) in Latin America.

In December 2004, all the Company's expected liquidity needs for the next 12 months had been covered in advance.

Working capital

Net working capital totaled € 838 million, a € 411 million decrease from December 2003, as a result of a € 305 million decrease in current assets and a € 106 million rise in current liabilities.

**NINE MONTHS ENDED SEPTEMBER 30TH, 2005 FINANCIAL RESULTS
(UNDER IFRS)**

The most notable aspects of Iberdrola's financial results for the first nine months of 2005 (unaudited) are as follows:

Million €	9M 2005	Vs. 9M 2004 (%)
NET SALES	8,442.7	+32.6
GROSS MARGIN	3,497.8	+5.7
EBITDA	2,393.2	+10.7
EBIT	1,643.7	+12.1
Net Profit	984.0	+12.6

NOTE: In the accounts for the first nine months of 2005, and in order to increase transparency and visibility in the Company's businesses, the Third Party Services are now recorded at the Gross Margin level, instead of in the Net Operating Expenses. The effect is shown in the two following tables:

CURRENT REPORTING	9M 2005	9M 2004	Change%
Gross Margin ex-Third Party Services	3,437.3	3,291.0	
Third Party Services	60.5	16.7	
TOTAL GROSS MARGIN	3,497.8	3,307.7	5.7%
Net Operating Expenses	-1,065.9	-1,008.4	5.7%

PREVIOUS REPORTING	9M 2005	9M 2004	Change%
Total Gross Margin	3,437.3	3,291.0	4.4%
Net Operating Expenses	-1,065.9	-1,008.4	
Third Party Services	60.5	16.7	
Total Net Operating Expenses	-1,005.4	-991.4	1.4%

NET SALES

The Group's Net Sales totaled 8,442.7mm euros in the first nine months of 2005, up 32.6 % on the same period in 2004, reflecting the positive evolution of all of the Group's businesses: the Domestic Energy business, the main growth driver, rose 34.0% and contributed 73.9% to the Group's Net Sales; the International business was up 36.8% and contributed 16.4% to total Net Sales; and finally the Non-Energy businesses rose 17.4% to reach a 9.7% contribution to the total.

The main drivers of this change in each of the businesses were as follows:

- In the Domestic Energy Business, Net Sales rose 34% as a result of:
 - The increase recorded on Generation (29.2%): due to the following factors:
 - The current situation in pool prices.

- Ordinary regime production is down 8.4% in a half-year period marked by a sharp fall in hydroelectric production in Spain (-46.8%), combined with a 18.3% reduction in nuclear production due to the Cofrentes (100% Iberdrola) and Vandellós II (28% Iberdrola; 72% Endesa) nuclear power plants being shut down temporarily for refueling. Both plants have already connected to the grid.
- Net Sales in the Supply business rose 29.5%, mainly due to the increase in activity, especially in gas, with a 61.2% increase in volumes supplied.
- In Renewables, Net Sales is up 60.2% to 359.1mm euros, factoring in the 32.1% increase in wind production vs. the first nine months of 2004, as well as the current situation in pool prices, with 94% of the wind parks already under the market participation scheme.
- Net Sales grew 4.0% in Distribution business, in line with the increase in its regulated revenues, being the incentive for losses worth highlighting as well.
- In the International business, Net Sales is up 36.8% to 1,388.9mm euros. Mexico is the region that made the biggest relative contribution (62.8%), showing a 33.8% growth despite the depreciation of the dollar registered along the period. Also of note is the increase in Net Sales in Brazil (42.2%), primarily as a result of the increase in demand and upward readjustment in tariffs, as well as the favorable evolution of the Real's exchange rate.
- On Non-Energy businesses, Net Sales is up 17.4% to 816.7mm euros, with this growth driven primarily by the increase in activities in real estate business, Engineering and Services. Regarding this last chapter, it is worth mentioning that since the third quarter of this year Third Party Services is recorded at Gross Margin level in order to increase visibility and transparency.

On the other hand, and regarding the Tariff Deviation generated over the first nine months of 2005, it is necessary to take the following aspects into consideration:

- 1) On a sector basis, the aforementioned Tariff Deviation for 9M 2005 might reach an amount close to 2,493mm euros.
- 2) In accordance with Royal Decree-Law 5/2005 of March 11, the provisional share for the financing of such Tariff Deviation comes out at 35.01% for Iberdrola, representing approximately 873mm euros before taxes.
- 3) In addition, in order to support the accounting treatment of the Tariff Deviation, the following aspects have been factored:
 - a) Articles 15 to 20 of the Electricity Sector Law 54/1997 of November 27, governing the economic regime of the various sector activities. In general terms, the remuneration of the generation activities is established in those articles accordingly to the prices resulting from the functioning of a liberalized market.

- b) The precedent set by the recognition in full of the Tariff Deviation for 2000, 2001 and 2002 (Art 94.2 Law 53/2002).
- c) The objectives set in IAS 18: An "ordinary revenue is recognized when it is probable that future economic benefits flow to the company and the amount of revenue can be measured reliably".

As is already known, although in the existing regulatory framework this deviation is borne by the generation companies, the services rendered by this business complies with all the requirements included in that rule:

- * Revenues can be measured reliably, as generation prices are determined for the pool.
- * The periodic C.N.E. settlements explicitly specify the revenues corresponding to each generator.

However, there are not enough revenues collected by the distribution companies. In light of the factors outlined above, it is possible to conclude that there are currently enough reasons for the confirmation at the end of the current fiscal year of the recoverability of the Tariff Deviation that might arise during 2005.

GROSS MARGIN

On a consolidated level, the Gross Margin came out at 3,497.8mm euros, representing an increase of 5.7% in relation to the same period in 2004. As outlined below, the Domestic Energy Business reflects the cost of consumption for emission rights which has totaled 121.3mm euros over the period. The following contrasting aspects can be highlighted regarding this evolution of the Gross Margin in each business:

Domestic Energy Business

The Gross Margin remained stable (-0.5%) at 2,663mm euros in a challenging production environment:

- The change in the Gross Margin of the Generation business in Spain (1,287.1mm euros, -5.6%) can be explained in the following context:
 - The evolution of the output and prices along the period, as explained at Net Sales level.
 - Increase in fuel costs because of the change in the production mix (less hydroelectric and nuclear production and greater thermal production) and a context of higher fuel prices, reflected in an 86.4% increase in procurement costs.
 - 121.3mm euros booked as expenses for emission rights consumed during the period.

- The Gross Margin of Renewables is up 60.2%, in line with Net Sales, and represents 21.8% of the total Gross Margin obtained by Iberdrola's generation assets in Spain.
- The Gross Margin of the Distribution business grew 4.0% (1,035.2mm euros) in line with the increase in remuneration from the regulated business recognized in the tariff for 2005.
- The Supply business saw its Gross Margin fall 115.5mm euros to -8.9mm euros, due to the lower margins as a consequence of the energy prices over the period, which resulted in the negative contribution being recorded. Furthermore, the first nine months of 2004 saw an extraordinary contribution of 11mm euros for resettlements of energy sales, network costs and energy purchases in 2000 and 2001.

International Business

The Gross Margin was 506.4mm euros, reflecting growth of 43.5%, resulting from the good performance of the Group's businesses in the region and the positive evolution of the exchange rate of the Brazilian real, more than offsetting the effect of the depreciation of the dollar in the accounts of Mexico.

- In Mexico-Guatemala, the Gross Margin was 189.4mm euros (+27.7%), representing an increase of 41.1mm euros. This increase primarily reflects the contribution to results made by the 500 MW La Laguna combined cycle plant after it was brought into service in the first quarter, and the efficiency improvements at the Monterrey plant (I and II). A 3.3% depreciation of the dollar was recorded along the period.
- In Brazil, the Gross Margin is up 55.0% to 317.0mm euros, thanks to the growth in demand and the additional tariff adjustments adopted for Coelba, Cosern, and Celpe, as explained previously. It is also worth noting the appreciation of the real against the euro (14.5%).

Non-energy Business

These contributed 328.4mm euros to the total Gross Margin, reflecting an increase of 51.2mm euros, primarily generated by **Engineering and Services**, **IBERDROLA Inmobiliaria** and **Corporación IBV**, which, following the application of the IFRS, is now proportionately consolidated. The results can be broken down as follows:

€ million	9M 2005	9M 2004	Change in mm's
Engineering & Services	112.2	57.0	55.2
Iberdrola Inmobiliaria	110.8	118.1	-7.3
IBV Corporation	102.7	93.7	9.0
Other	2.7	8.4	-5.7
TOTAL	328.4	277.2	51.2

BASIC MARGIN

This chapter reflects the global effect of the emission allowances in the Company's accounts that comprises:

- An expense reflecting the consumption of such emission allowances up to 121.3mm euros, recorded at Gross Margin level.
- Revenues reflecting the emission allowances granted for free worth 100.5mm euros, recorded below Gross Margin.

All in all, the Basic Margin is obtained adding those revenues due to the allowances received for free to the Gross Margin, so that the net effect of the allowances is recorded in the Company's accounts at that level. Such net effect amounts to Eur -20.8mm in the first nine months of 2005.

The Basic Margin rose 8.8%, up to Eur 3,598.3mm, as detailed in the following table:

€ million	9M 2005	9M 2004	% Change
Gross Margin	3,497.8	3,307.7	5.7
Emission Allowances (Revenues)	100.5	-	na
Basic Margin	3,598.3	3,307.7	8.8

EBITDA / GROSS OPERATING PROFIT

Consolidated EBITDA increased 10.7% to 2,393.2mm euros as a result, in addition to the factors previously explained, of the control in Net Operating Expenses that rose 5.7%, more than 3% below the growth recorded at the Basic Margin. The controlled increase of 5.7% in Net Operating Expenses has been achieved thanks to the moderation in traditional businesses and an increase in new businesses in connection with the upturn in activity. The highlights include:

- The moderate change in Personnel Expenses (+3.0%), despite reflecting the effects of the salary adjustments adopted based on the Labor Agreement and the CPI.
- A 74.8mm euros increase (+14.1%) in External Services linked to the upturn in activity in connection with the new combined cycle and renewable facilities and the commercial activity. This also includes 20mm euros in costs for the second stage of nuclear fuel cycle (Enresa).

Net Operating Expenses can be broken down as follows:

€ million	9M 2005	Vs. 2004 (%)
Net Personal Expenses	593.7	1.0
Personnel	716.0	3.0
In-house work on fixed assets	-122.3	14.0
Net External Services	472.2	12.3
External Services	604.9	14.1
Other Operating Revenues	-132.7	21.2
TOTAL	1,065.9	5.7

The Traditional Energy Business workforce is down 2.9% compared with the same period in 2004 to 8,344 employees, with the Domestic Energy Business' Gross Margin remaining stable.

As such, the Gross Margin to employee ratio improved by 2.4% in the Domestic Energy Business, as can be seen in the following table:

	9M 2005	9M 2004	% Change
Gross Margin (Domestic Energy Business) (€mm)	2,663.0	2,677.7	-0.5
Domestic Ener. Bus. Workforce (Spain)	8,344	8,593	-2.9
Gross Margin / employee ratio (€000s)	319.1	311.6	+2.4

On the other hand, the Tax item is up 1.5% to 139.2mm euros, mainly due to the impact in Latin America resulting from the application of IFRS.

EBIT / NET OPERATING RESULT

EBIT rose 12.1% to 1,643.7mm euros compared with the same period in 2004, with this rise driven by the operating evolution already mentioned combined with the change in Amortizations and Provisions (+7.7%).

- Amortizations are up 6.9% to 723mm euros.
- Provisions rose 34.8% to 27mm euros, basically as a result of the criteria followed in the Engineering business regarding guarantees and contract margins.

€ million	9M 2005	9M 2004	% Change
Amortization	723	676	6.9
Provisions	27	20	34.8
Total	750	696	7.7

FINANCIAL RESULT

The Financial Result came to 298.5mm euros, 7.8% higher than in the same period in 2004. This increase was mainly due to the 20.4% increase in financial expenses in a period marked by a higher average debt balance in relation to the same period in 2004, affected by the impact of the Tariff Deviation. This was partially offset by the 42.8% rise in Financial Revenues up to 222.8mm euros.

In addition, the average cost of debt remained stable at 4.56%.

€ million	9M 2005	9M 2004	% Change
Financial Revenues	222.8	156.0	42.8
Financial Expenses	-521.3	-432.9	20.4
Total	-298.5	-276.9	7.8

RESULTS OF COMPANIES CONSOLIDATED BY THE EQUITY METHOD

The Results of Companies Consolidated by the Equity Method rose 2.0mm euros to 35.7mm euros, with 82.6% of the results contributed by Non-Energy up to 29.5mm euros. Following the implementation of IFRS, EDP and REE have been removed from the scope of consolidation, and the consolidation method for other companies, such as Corporación IBV, has been modified.

The results can be broken down as follows:

€ million	9M 2005	9M 2004	% Change
Non-Energy	29.5	35.8	-17.4
Other	6.2	-2.1	na
Total	35.7	33.7	+6.0

NET PROFIT

Lastly, Net Profit rose to 984.0mm euros, up 12.6% on the same period in 2004, in line with the change seen on Operating Profit. Results from noncurrent assets fell by 50.3mm euros and Profit before Taxes grew +8.2%. The effective tax rate came out at 29.4%, slightly below the same period in 2004 (32.5%).

BALANCE SHEET

JANUARY – SEPTEMBER 2005

€ million	9M 2005	Vs. 9M 2004 (%)
TOTAL ASSETS	28,958	+10.0%
TANGIBLE & REAL ESTATE FOR INVESTMENT ASSETS	19,908	+6.2%
LONG-TERM INVESTMENTS	2,151	+16.7%
SHAREHOLDERS' EQUITY	9,463	+9.7%
NET DEBT	12,325	+15.5%

At 30 September 2005, Iberdrola's total assets came to 29,958 million euros, highlighting the maintenance of its strong capital position, even taking into account the large volume of investments made over the period (1,354 million euros). The leverage ratio was 56.6%, which is 130 basis points higher than in December 2004 with the accounts in IFRS format, mainly affected by the financing of the Tariff Deviation corresponding to Iberdrola, which in September 2005 rose to 873 million euros. Without this effect, leverage would have come out at 54.8%.

Fixed Assets

Investments (Jan - Sept 2005)

Investments in the first nine months of 2005 totaled 1,354 million euros and can be broken down as follows:

€ million	Jan - Sep 2005	(%)
Spain	915	67.6%
Generation	400	
Renewable energy	209	
Distribution	258	
Other	48	
Mexico	320	23.6%
Generation	316	
Distribution	4	
South America	59	4.3%
Generation	2	
Distribution	57	
Other International	60	4.4%
TOTAL	1,354	100.0

As regards investments in Spain, those made on energy production activities stand out, with 609 million euros that can be broken down as follows:

- 400 million euros on the Generation Business.
- 209 million euros on the Renewables Business.

In Mexico, investments have focused on the Altamira V and VI combined cycle plants (133 million euros) and Tamazunchale (153 million euros). In Brazil, investments have primarily been made on the distribution business, financed by funds generated in Brazil.

The figure given for "Other International" reflects the investments made on Renewables outside of Spain, representing a total of 60 million euros, including the acquisition of an additional 8% in the Greek company Rokas.

Financial Debt

Net financial debt totaled 12,325.4 million euros at the end of September, with financial leverage coming out at 56.6%, 130 basis points higher than the 55.3% seen in December 2004. The figure given for debt includes 873 million euros for financing the Tariff Deviation corresponding to Iberdrola. Without the effect of this deviation, financial leverage would have been 54.8%, 50 basis points lower than the level seen in December 2004.

With respect to the average cost of debt, it came to 4.56% at 30 September 2005, 7 bp lower than in December 2004.

In line with the policy to minimize financial risks on debt, foreign currency risks have continued to be mitigated through the financing of investments in Latin America in local currencies (the real, in the case of Brazil) or in their functional currencies (dollar in Mexico).

Furthermore, in light of the refinancing policy pursued by IBERDROLA during the first nine months of 2005, the average maturity of debt has increased significantly to nearly 5 years as at September 2005 from 4.3 years recorded at December 2004.

Working Capital

Net Working Capital rose to 1,911 million euros, up 1,357 million from the 554 million euros recorded at the end of 2004, with current assets up 1,035 million euros and current liabilities down 322 million euros.

Funds from Operations

In September 2005, Funds from Operations totaled 1,667.9 million euros, reflecting an increase of 14.6% on September 2004.

BUSINESS SECTORS

1. GENERATION

Nine Months Ended September 30th, 2005

Please find below Iberdrola's nine month 2005 results for its Generation business. For more detailed information regarding its nine month results please refer to Iberdrola's full nine months results for 2005 report.

€ million	9M 2005	Vs. 9M 2004 (%)
Net Sales	2,557.5	+29.2%
Gross Margin	1,287.1	-5.6%
Basic Margin	1,408.4	+3.3%
EBITDA	1,036.0	+0.2%
EBIT	743.0	-2.9%

FY2004 Annual Results

€ million	2004	% of Total	% Increase vs. 2003
Gross Margin	1,753.5	42.5	(2.1)
EBITDA	1,302.8	45.4	(4.1)
EBIT	963.4	47.7	(5.6)

Operating Plants as of December 31, 2004
(excluding Special Regime: wind, mini-hydro and cogeneration)

The generation division produces electricity, markets and trades energy products, and supplies fuel and power services.

The generation activity is operated by Iberdrola Generación S.A.U., a 100%-owned subsidiary of Iberdrola, S.A. This is the holding company of the national generation division.

Iberdrola's commitment to updating its electricity generation facilities with cleaner technologies -mainly combined cycle plants and renewable energy- allowed it to reach the end of fiscal year 2004 with a total of 25,237 MW of installed capacity worldwide (+2,449 MW of additional capacity), 11% more than 2003 and 52% more than at the start of the Strategic Plan.

The company has 22,547 MW of capacity in peninsular Spain, an increase of 11.1% over 2003 and 36% over the capacity it had at the start of the Strategic Plan. Specifically, in 2004 the company brought into operation an additional 2,259 MW of capacity in Spain, of which 1,200 MW (53%) corresponded to combined cycle plants, 949 MW (42%) to renewable energy (see 'Renewable Energy' section further on), and 110 MW (5%) to capacity expansions at several generating facilities.

In fiscal year 2004, the consolidated earnings of Iberdrola's generation business came to € 829.8 million before tax and € 531.8 million after tax. Its contribution to the group's results was 43.9%. Total generation assets amounted to € 7,975 million.

Production equipment

Iberdrola increased its installed capacity under the ordinary system by more than 1,300 MW to 19,046 MW in 2004, which entails a 7.3% increase over fiscal year 2003. The gain was due to the start of operation of the combined cycle plants of Santurce, with 400 MW of capacity, and Arcos de la Frontera (Cádiz), with 800 MW of capacity (units I and II), and the rest is from capacity expansions at several generators.

Depending upon the various energy sources used, the company's production structure under the ordinary regime in 2004 was as follows: 24%, hydroelectric plants; 14.5%, combined cycle plants; 45.2%, nuclear plants; 4.1%, fuel-oil plants, and 12.2%, coal-fired plants. This mix emphasizes a distinct movement towards more environmentally friendly power generation methods, in line with the Strategic Plan:

Ordinary Regime Energy Balance 2004
Company Own Production

Million kWh	2004	2003	2004/2003(%)	%Mainland
Own Production	61,044	59,799	+2.1	29.5
Gas combined cycle	8,811	4,569	+92.8	29.8
Hydroelectric	14,626	20,860	(29.9)	48.8
Nuclear	27,580	25,874	+6.6	43.7
Fuel Oil	2,528	2,437	+3.7	32.1
Coal	7,499	6,058	+23.8	9.8
Internal use for generation	2,119	1,929	+9.8	24.2
Net Production	58,925	57,870	+1.8	29.8
Power used in pumping	1,544	1,798	(14.1)	33.8
Energy Demand	57,381	56,072	+2.3	29.7

System operation

Iberdrola's investments in generation in recent years have made it possible to enhance the balance and diversification of the company's production structure, which mitigates the impact on its accounts of possible decreased output through the use of some of its technologies.

In fact, the better energy balance under the ordinary system in 2004 was accomplished despite lower rainfall than in 2003, thanks to the contribution of new combined cycle plants, whose output already exceeds that of coal-fired plants.

In 2004, Iberdrola's gross output under the ordinary system came to 61,044 million kWh, which represents a 2.1% increase from the previous year. It accounted for a 29.5% share of the total electricity volume generated in peninsular Spain. In addition, energy demand came to 57,381 million kWh, a 2.3% increase over 2003.

The six combined cycle plants managed by Iberdrola in Spain -Castellón (800 MW), Castejón (400 MW), Bahía de Bizkaia de Electricidad (800 MW, Iberdrola has 25%), Tarragona (400 MW, the Company has 50%), Santurce (400 MW), and Arcos de la Frontera (800 MW)- generated 8,811 million kWh, or a 92.8% increase over the previous year, and accounted for a 30% share of the total electricity volume generated under the ordinary system in peninsular Spain.

Iberdrola generated almost 49% of the hydroelectric power in mainland Spain under the ordinary system in 2004, contributing a total of 14,626 million kWh, equal to 21% of the company's generation mix in Spain. In addition, the company's hydroelectric facilities turned in an excellent performance, with 78% availability during the year.

Nuclear plants generated 27,580 million kWh, 6.6% more than in 2003. Once again, especially noteworthy was the high availability of the nuclear stations, which reached an

average usage level of 94.1% during the year. The output of the traditional thermal power plants was 10,027 million kWh, 18% more than in the previous year.

During the course of 2004, installed capacity at cogeneration facilities in Spain in which Iberdrola had an interest reached 423 MW, of which 295 MW were attributable to the company. These facilities generated 2,900 million kWh, of which 1,965 million kWh correspond to the company, 4.4% more than in 2003.

Iberdrola's bid for more efficient and environmentally-friendly generation technologies is in tune with the company's commitment to the renewal of the Spanish generation plants, which is indispensable for compliance with the Kyoto Protocol and the EU Emissions Trading Directive and which is in line with the requirements set out in the National Allocation Plan approved by the government.

National Allocation Plan

On January 21, 2005, the Council of Ministers approved the allocation of emission rights by facility. In accordance with the government's proposal to meet the emissions goal, combined cycle plants would have to produce more than coal-fired plants as early as 2006, and the tendency would become more pronounced in 2007. Thus, the allocation to combined cycles, one of the main goals under Iberdrola's Strategic Plan, entails an average 5,250 annual operating hours between 2005 and 2007, while the allocation to coal-fired plants equals 4,950 annual operational hours. In this way, the Company will receive an annual average 12.78 million tons of emission rights during the 2005-2007 period.

Emissions in 2002-2007 (millions of tons)

Energy balance 2002-2007 (TWh)

(*) Emissions in 2002-2007 according to the Ministry of Industry, Tourism and Trade (Mainland Spain); Iberdrola's estimates.

Iberdrola in the wholesale electricity market

The main factors characterizing the operation of the wholesale electricity market in 2004 were growth in demand, which was 3.5% higher than in 2003, low rainfall (0.8 index for

Iberdrola) and the entry into operation of new combined cycle plants (the company already has 2,800 MW in operation).

Prices in the wholesale electricity market had a disparate performance. From January to June 2004, prices were low if we take into account the system costs (record prices for Brent crude oil and gas in international markets), while they recovered appreciably during the second half of the year.

In this scenario, Iberdrola sold 57,892 million kWh at € 2,208 million, which resulted in an average price of € 38.1/MWh, which was 5.8% higher than the average market price. Thus, the company had a 28.2% share of all energy sold and 29.4% of total revenues.

In 2004, the energy sold by Iberdrola in the markets managed by OMEL was 57,991 million kWh, 27.9% of the total. Transactions in supplemental services markets entailed the acquisition of 99 million kWh, with compensation of € 89 million, which translates into a 34% share. These percentages, which are well above Iberdrola's overall market share, result from utilizing the efficient generating plants and capitalizing on the opportunities offered by real-time markets.

With regard to the compensation for guaranteed capacity, Iberdrola collected E 314 million in 2004, or 33% of the total brought in by generation plants in mainland Spain, which shows the significant role the company's hydroelectric facilities play in guaranteeing supply.

With respect to the purchase of energy in the wholesale market for Iberdrola's customers, the company bought a total 78,806 million kWh. Of these purchases, 47,923 million kWh were allocated to customers under the rate system, 29,827 million to eligible customers, and 1,056 million kWh to exports.

Iberdrola in the Spanish wholesale electricity markets 2004

	Energy (Million kWh)	Iberdrola/ System (%)	Revenues (Million €)	Iberdrola/ System (%)
Markets	57,991	27.9%	1,805	28.6%
Complementary services	(99)	37%	89	34%
Total production market	57,892	28.2%	2,208	29.4%

Energy trading in Europe

In 2004, Iberdrola handled the purchase and sale of 10,799 million kWh of energy in France, Switzerland, Germany, Austria, Belgium, the Netherlands, Spain and Portugal, transactions worth € 283 million.

Especially remarkable were the transactions carried out through the electrical interconnections between different countries, which accounted for 34.14% of the energy volume traded by Iberdrola.

Iberdrola's presence in the French market is essential to maximize the value of its generating assets in Spain. Thus, the company participated in all of EDF's capacity

auctions, acquiring the right to provide up to 362 million kWh for 2004, 2005 and 2006. Also, a total 276 million kWh of electric power was supplied to RTE and to EDF GRD, the managers of the French electricity transmission and distribution network, in order to cover network losses in France.

In addition, Iberdrola started to participate actively in the French balancing market (managed by RTE) thanks to the flexibility of its electrical power generation plants and its presence in European trading markets. It is the first Spanish company to be present in this market through the Spain-France interconnection.

In 2004, Iberdrola continued its daily operations in Powernext, a French organized market, in which the total volume traded was 1,260 million kWh. The company is also present in the German (EEX) and Dutch (APX) electricity markets, in which it carried out continued transactions in significant volumes.

Iberdrola played a significant part in auctions organized by the companies Nuon and Electrabel, in which it was awarded 87.6 million kWh of generating capacity in the Netherlands for 2005 and 263 million kWh in Belgium for 2004 and 2005. Also, the company signed contracts for the supply of 317 million kWh in Germany and Austria in 2005.

At the end of 2004, Iberdrola was the leading electricity company in the sale of green energy in Europe. It signed contracts for the sale of 1,489 million kWh, of which 1,230 million kWh comprised sales to energy companies in several European countries. It also started to sell green energy in the United Kingdom.

Start-up and improvement of generating facilities

The investments made by Iberdrola in the energy business in Spain, primarily in cleaner generation technologies, are making possible the renewal of Spanish production plants. Thus, the company allocated € 594 million to this area, or 36.9% more than in 2003 and 27.2% of total investments in Spain in 2004.

Particularly important were investments in gas combined cycle plants (€ 460 million) and in hydroelectric production facilities (€ 50 million), an increase of 53.3% and 25%, respectively, compared to fiscal year 2003.

In 2004, Iberdrola brought into operation two combined cycle plants totaling 1,200 MW: the Santurce plant (400 MW), in Biscay, and the Arcos de la Frontera plant (800 MW), in Cádiz. Over the next few years, the company will continue to develop its program for the construction of combined cycles, which is the largest and most advanced program in the entire Spanish energy industry, and expects to have more than 6,400 MW of managed capacity in 2007, of which at least 5,600 MW will be owned by the company.

Thus, in 2005, Iberdrola will contribute another 1,200 MW of capacity to the Spanish electrical system, corresponding to the plants of Aceca, in Toledo (400 MW) and Arcos de la Frontera (Unit III) (800 MW), which will mean reaching the goals set in the Strategic Plan one year ahead of schedule. During the course of 2006 and 2007, the company expects to have 1,600 MW available: the Escombreras generators, in Cartagena, (800 MW), and Castellón B (another 800 MW).

Investments in hydroelectric facilities primarily went to the Power Plant Reconstruction Project -optimization of 940 MW, corresponding to 10 units at 10 plants- and to the expansion of new capacity at several generating plants.

In 2004, Iberdrola continued with its project for equipment updating at 39 hydroelectric plants, distributed among the Sil, Duero, Tajo and Mediterranean basins, which will make it possible to improve their performance. Since the startup of the project in 2001, the company has carried out improvements for capacity of 3,202 MW. This initiative, which allows for the extension of the plants' useful lives, will entail an investment of € 173 million (contemplated in the investment plans) and will affect plants with a combined capacity of 5,975 MW, which accounts for 68% of the company's installed hydroelectric capacity. The modernization of the various units will be carried out on an alternating basis through 2010, on a schedule that ensures the productive capacity of the system without causing disruption to the electricity supply. Specifically, Iberdrola will rebuild the main electro-mechanical equipment installed at the power plants by means of technology improvements and automation. In addition, it will reinforce some equipment and systems by using stronger materials, and minimize environmental impact.

As for cogeneration facilities, Iberdrola is building waste treatment biomass plants at Fonz and Monzón (Huesca), and Fudepor (Murcia), with capacity of 7.4 MW, 14.8 MW and 14.8 MW, respectively.

The following graph shows how the Company will be balancing its Generation mix throughout the Strategic Plan, thereby making it more flexible. The low emission characteristics of this mix will be maintained thanks to the low proportion of highly pollutant and inefficient thermal energy. At the same time, 70% of the generation portfolio is not affected by the possible volatility of commodity prices, a percentage that will be maintained by 2008.

Combined Cycle Plants

Natural gas combined cycle plants are another key factor in public energy policy. In Spain, the 2001-2011 Energy Planning Document for the Electricity and Gas Industries identify them as essential for guaranteeing supply safety and security and for compliance with the Spanish Energy Efficiency and Saving Strategy and the Kyoto Protocol commitments.

The environmental advantages of these plants arise from their high performance, 55% compared to the 35% achieved by conventional coal and fuel plants. Furthermore, they emit 40% less gases into the atmosphere and, by using sulfur-free gas as a fuel, the gases given off in the combustion process are pollutant-free. They do not emit particles and they are composed of less carbon and more hydrogen than fuels used at other facilities, which means the proportion of carbon dioxide is lower, thereby reducing any possible greenhouse effect.

Combined cycles plants are also fitted with burners specially designed to reduce the concentration of nitrogen oxides in fuel gases. Finally, this kind of plant emits one third of the heat into the cooling water used by a conventional plant of the same capacity, as two-thirds of the electricity generated is produced in the air-gas (gas turbine) cycle and the other third in the water-vapor (steam turbine) cycle.

Iberdrola plans to invest €2,400 million in generation in Spain between 2004 and 2008, with the objective of managing a capacity of over 6,000 MW in gas combined cycle plants and building this new capacity in high growth demand areas. Today, the Company participates in cycle plants that contribute 3,200 MW to the domestic electricity system.

2. RENEWABLE ENERGY

Nine Months Ended September 30th, 2005

Please find below Iberdrola's nine month 2005 results for its Renewable Energy business. For more detailed information regarding its nine month results please refer to Iberdrola's full nine months results for 2005 report.

€ million	9M 2005	Vs. 9M 2004 (%)
Net Sales	359.1	60.2%
Gross Margin	359.1	60.2%
EBITDA	287.8	60.1%
EBIT	183.7	145.3%

FY2004 Annual Results

€ million	2004	% of Total	% Increase vs. 2003
Gross Margin	329.5	8.0	+39.7
EBITDA	258.2	9.0	+38.1
EBIT	149.5	7.4	+74.6

Iberdrola secured its position as the world leader in the renewables energy industry in 2004, reaching an operational capacity of 3,206 MW. The goal of this area, which is one of the Company's main growth engines and which constitutes one of the main planks of the Strategic Plan, is to manage 5,500 MW by 2008, of which 4,500 will be in Spain and around 1,000 MW abroad.

These goals are supported by Iberdrola's acquisition of wind farms in Greece, Portugal and Spain, as well as by wind farm developments started in France, Italy and Latin America during the fiscal year. The company's strategy to grow in the renewable energy industry is in line with its commitment to the environment and sustainable development, and also fits with compliance with the Kyoto Protocol and the EU Emissions Trading Directive.

Renewable energy is a key feature of public European Union and Spanish energy policy, as it contributes to the reduction of energy dependence, improvements in the efficiency of electricity generation and the prevention of greenhouse gases and other emissions into the atmosphere.

The environmental advantages of electricity production using renewable energy sources are evident. They are highly efficient in terms of primary energy, being close to 100% for hydroelectric, wind and solar production and 60% for advanced biomass production systems, as opposed to the average value of 35% of the conventional thermal park. Further, major benefits include the absence of emissions, waste and tipping.

At year's end, Iberdrola's renewable energy area posted gross operating income (EBITDA) of € 258.2 million (+38%) and consolidated earnings of € 86 million before taxes and of € 54.9 million after taxes. The contribution of the renewable energy division to the results of the Iberdrola group was 4.5%. Gross operating assets in this business division came to € 3,137 million, 44% more than in the previous fiscal year.

Spain: Iberdrola, a driving force for the expansion of renewable energy

In 2004, Iberdrola confirmed its leadership as a manager of wind farms and a driving force for the expansion of renewable energy in Spain, with wind powered operational capacity of 2,891.15 MW which, together with the 314.68 MW of mini-hydroelectric plants, added up to a renewable capacity of 3,206 MW, 42% more than in 2003 and more than six times their capacity at the beginning of the Strategic Plan.

In this regard, the Plan has become a driving force for renewable energy, and the company's impetus has been a key factor in the tripling of Spain's wind power capacity since 2001, to 8,000 MW at the end of 2004.

By the end of 2004, the energy Iberdrola generated from renewable sources came to 5,413 million kWh -4,846.4 of which were wind-powered and 566.3 of which were minihydro-, which represented a 38% increase from 2003. The figure represents 8% of the company's total output in Spain in 2004.

Iberdrola invested 811 million euros in renewable energy in Spain, accounting for 37% of

Installed Capacity in Renewable Energy

Renewable Energy Production

total investment in Spain. As a result of those investments in Spain, the company boosted its operational capacity by 949 MW, of which 910 MW corresponded to new wind farms in Castilla-La Mancha, Castilla y León, Galicia, Aragón, Murcia and La Rioja. The other 39 MW was provided by various minihydroelectric plants placed online by the company: Santa Eulalia de Tábara (Zamora) and Fontanar I, II and III (Albacete). The annual output of these plants will be approximately 133 GWh.

The total operational capacity acquired by the company from Gamesa came to 329.5 MW in 2004. Specifically, in the first ten months of 2004 Iberdrola bought plants at Chambón (33.15 MW), Capiruza II (42 MW) and Pena da Cruz II (10.20 MW), and brought online the wind farms of Valbonilla III (1 MW), Pedregal II (14 MW) and Capiruza I (24 MW). In addition, capacity was expanded by 1.70 MW at the El Navazo II and Valbonilla II plants.

In addition, in November 2004, the company purchased from Gamesa five wind farms with 218.9 MW of installed capacity, as part of the above-mentioned agreement. It also bought 100% of the Zaragoza company Sistemas Energéticos Fuendetodos, which was the owner of the Fuendetodos I (46 MW) and Fuendetodos II (47.6 MW) wind farms. The Company acquired 100% of the company Sistemas Energéticos Entredicho, owner of the wind farm of the same name (36 MW), and 100% of the company Sistemas Energéticos Goia Peñote, a developer of a 40 MW wind farm. Finally, it bought the company Serra de Meira, which is developing a facility with 49.3 MW of capacity (34 MW in operation in 2004).

Promotion and construction of new facilities

Iberdrola continued its activities in the development and construction of new wind power and minihydroelectric facilities. At the end of 2004, the company had 149.35 MW of capacity under construction, and development rights it considered to be firm at 585.56 MW.

Among the remarkable events in 2004 was the execution of agreements by Biovent -a company in which Iberdrola has an 85% interest- for the promotion of wind farms in the Autonomous Community of Castilla y León and the progress made in the construction of

the minihydroelectric plant of Piarrejas (La Rioja) (1.18 MW), which will come online in the spring of 2005. In the area of thermoelectric solar energy, the company started several 50 MW projects, in which the overall investment is expected to be € 200 million.

During the course of 2004, Iberdrola, OPT (Ocean Power Technologies), Sodercan (Sociedad para el Desarrollo de Cantabria) and IDAE (Instituto para la Diversificación y el Ahorro Energético) formed a joint venture for the development of the first European wave-energy plant, to be located in Santoña (Cantabria). The goal is to install plants with these characteristics along the Cantabrian coast, for a combined output of 100 MW.

International expansion: entry into the wind power markets of Greece and Portugal and promotions in France, Italy and Latin America

During 2004, Iberdrola boosted its international activity in the renewable energy industry with the purchase of wind farms in Greece and Portugal and developments launched in France, Italy and Latin America.

Iberdrola entered the Portuguese wind-power market in April 2004, after purchasing from Gamesa the Catefica (Lisbon) wind farm, with 18 MW of capacity. In addition, the company reached a new agreement with Gamesa in November for the acquisition of 250 MW of installed capacity in wind farms in Portugal, which will come online before 2007, and the joint development of this kind of facility within the country, which includes all the promotions carried out by both companies as well as those carried out by Aeolia, a Portuguese company formed by the company in September, together with the Portuguese companies Alberto Mezquita and Visabeira.

Iberdrola has become the strategic partner of Rokas, the largest producer of wind energy in Greece, which plans to invest more than 600 million euros in that country up to 2008. Iberdrola's entry into Greece will be made through the initial acquisition in 2004 of a 21% stake in Rokas, which produces 45% of Greece's wind energy, for an amount close to 32 million euros. This stake will be gradually increased until it reaches 49.9% in 2009, for a total investment of 85 million euros. Rokas has more than 400 MW of capacity, of which 188.5 MW are already in operation, and the aim is to reach 600 MW in the next few years.

Moreover, the acquisition of a stake in Rokas makes Greece one of the important markets for the development of Iberdrola's objectives in the area of renewable energy. Greece offers great potential in this business, because it has only 409 wind-powered MW in operation, of the 2,000 MW it has established as a target for 2010. The government's willingness to foster growth of this energy through the enactment of appropriate legislation also stands out.

Also, in 2004, Iberdrola examined new business opportunities in Europe and Latin America that will enable it to maintain its position at the top of the world wind power market in coming years. In France, it signed an agreement with an international developer for the development and construction of several wind farms, of which 32 MW are scheduled to come online in 2005 and an additional 100 MW in the period 2006-2007. The agreement also foresees the development of 100 MW in Italy over the next few years.

In Latin America, the company started negotiations for its entry into the wind power market. It plans to build a 100 MW wind farm in the Mexican state of Oaxaca, and construction of the Rio do Fogo wind farm (50 MW) in the Brazilian state of Rio Grande do Norte is already being planned.

3. DISTRIBUTION

Nine Months Ended September 30th, 2005

Please find below Iberdrola's nine month 2005 results for its Distribution business. For more detailed information regarding its nine month results please refer to Iberdrola's full nine months results for 2005 report.

€ million	9M 2005	Vs. 9M 2004 (%)
Net Sales	1,035.4	4.0%
Gross Margin	1,035.2	4.0%
EBITDA	600.9	8.4%
EBIT	423.2	13.8%

FY2004 Annual Results

€ million	2004	% of Total	% Increase vs. 2003
Gross Margin	1,195.8	29.0	+3.8
EBITDA	672.5	23.4	+12.8
EBIT	466.6	23.1	+26.5

At the end of 2004, Iberdrola had more than 9.6 million customers in Spain, 900,000 more than at the beginning of the Strategic Plan, to whom it supplied 92,184 million kWh, 5.1% more than in 2003. The supply represented a 32% increase since the start of the Plan. Iberdrola have presence in the highest growth areas and the best quality of service in terms of Installed Capacity Equivalent Interruption Time ("ICEIT").

In addition, the energy supplied by the company in 2004 earned it a share of almost 40% of the total mainland market. Among especially noteworthy sectors of activity were the residential and services sectors, with an increase of 6.5% and 6.7%, respectively.

Energy distributed in the Iberdrola market

FULL YEAR 2004

Iberdrola's customer-driven efforts paid off again in 2004. It reached a historical level in quality of supply in Spain, which was less than two hours for the first time, upon recording an Installed Capacity Equivalent Interrupt Time (ICEIT) of 1.87 hours, 14% less than in 2003. It achieved these results thanks to the excellent maintenance tasks carried out by an expert and efficient team and to the investment program included in the company's Network Plan, which enabled it to bring into service new infrastructure and modernize existing sites.

Iberdrola has reached the goals set in the Network Plan, which focuses on the expansion of the supply network infrastructure and the maximization of supply quality, a year ahead of schedule. Since the start of the Plan, the company has installed 120 substations (37 new and 83 major expansions) and 9,800 new transformer centers and has laid 10,000 km of new high-, medium- and low-voltage lines.

In line with its policy of commitment to customers, Iberdrola will allocate € 2,200 million to this business line during the 2004-2008 period in order to maintain a significant position in service quality in Spain. In fiscal year 2004, Iberdrola's distribution business division had consolidated pre-tax earnings of € 476.9 million and after-tax earnings of €

331.8 million. This area contributed 27.4% to the Iberdrola group's results. Total distribution assets came to € 5,281 million.

Transmission and distribution network

Iberdrola's transmission and distribution network in Spain runs across 14 Autonomous Communities and 32 provinces, covering a surface area of 190,000 square meters and serving a population of more than 15 million people.

The network is equipped with more than 17,900 kilometers of high-voltage lines and around 198,200 kilometers of medium- and low-voltage lines. In addition, the company has 835 transformer substations and more than 72,000 transformer centers.

Supply quality

Iberdrola improved its supply quality yet another year, by bringing its ICEIT (Installed Capacity Equivalent Interrupt Time) to 1.87 hours/year, a 14% improvement compared with the 2.17 hours/year the previous year, despite a 5.1% rise in demand in 2004. This figure means that availability stands at 99.98%. The company achieved general improvements in almost all Autonomous Communities, of which the following were particularly noteworthy: Extremadura (28%), Madrid (24%), Murcia (23%), Castilla y León (22%), and the Basque Country (14%).

Moreover, in 2004, the company handled both a sharp increase in usage and two demand peaks recorded in March (15,276 MWh) and June (14,749 MWh), with no significant disruptions.

Expansion and improvement of facilities

In 2004, Iberdrola devoted remarkable efforts to the expansion and improvement of its facilities. Thus, investments in distribution in Spain amounted to € 451 million, which accounted for 20.6% of the company's total investments in Spain.

Investments in 2004 were allocated to transformer substations, which made it possible to increase capacity at the various transformation levels up to the installation of an additional +1.000 MVA on the grid. In addition, the company laid 2,787 kilometers of new transmission lines, and installed 2,443 new transformer centers.

In 2004, the main expansions of capacity in substations were carried out in the Autonomous Communities of Castilla-La Mancha, La Rioja, Valencia and the Basque Country. Also, new transformer substations were installed at Castilla y León, Extremadura, Madrid, Murcia, Navarra, Valencia and the Basque Country. The installed capacity at transformer centers came to 1,625 MVA.

Among these projects, especially worthy of note is the completion of the dual-line conversion program at the VHV (Very High Voltage) network in the Levante area, with work having been performed on the Teulada-Jávea and San Vicente-Jijona lines in Alicante, and Fausita-Hoya Morena in Murcia, making it possible to double their transmission capacity and to improve system reliability in the supply of power to the Costa Blanca region.

4. SUPPLY

Nine Months Ended September 2005

Please find below Iberdrola's nine month 2005 results for its Supply business. For more detailed information regarding its nine month results please refer to Iberdrola's full nine months results for 2005 report.

EBITDA	10.1	0.4	+55.6
EBIT	(6.6)	(0.3)	N/A

From January 1, 2003 all Spaniards could choose their electricity and natural gas supplier. This move rounded off the deregulation of the energy market initiated in 1998.

Iberdrola in 2004 boosted its presence in deregulated markets, which account for 36% of total energy sales in Spain, as compared to 64% of sales coming from the regulated market. The increase enabled the Company to consolidate its leadership in the deregulated electricity market, with a share of more than 38%, and position itself as the second-largest seller of natural gas, with a 10.8% share of the deregulated market.

These significant results reflect Iberdrola's strong focus on its customers and underline the goals set out in the Commercial Plan included within the company's Strategic Plan, whose targets include extending the business to all autonomous communities and maximizing the number of clients served.

Deregulated electricity and gas market

At year's end, Iberdrola had more than 520,000 customers in the deregulated electricity market, 10 times more than in 2003, consolidating its leadership in the supply business, with a 38.1% share (Chart 22) and sales of 30,000 million kWh, up 14.5% over the previous year.

Sales in the Liberalized Energy Market

Liberated Electricity Market Share in 2004

Also, Iberdrola consolidated its position as the second-largest seller of gas in Spain, building up a 10.8% share of the deregulated market in 2004, up 260 b.p. over the previous year. This percentage includes both gas provided to customers and gas used by the company's combined cycle plants.

In 2004, the company also consolidated its leadership in the sale of green energy in Spain, with 52,900 contracts with household consumers and 1,100 with businesses and official agencies. This initiative, which is a pioneering one in Spain, consists of the sale of electricity obtained from 100% renewable sources of energy, i.e., free of CO₂ emissions and greenhouse gases, as set out in EU Directive 2001/77/CE, of September 27, 2001. Energía Verde Iberdrola (Iberdrola Green Energy) has been certified by the association RECS International, which is represented in Spain by REE, and by the external entity Bureau Veritas Quality International.

The sales of electricity and gas, as well as of other energy products and services, brought Iberdrola's sales in the deregulated market to more than € 2,500 million in 2004, up 31% over the prior year

In addition, Iberdrola raised its presence in Portugal, where it has more than 350 supply contracts to serve 842 Portuguese industrial customers, representing annual consumption of 966 million kWh and a share of almost 10% of the deregulated market.

In 2004, as part of the process of deregulation in the French gas market, Iberdrola was awarded 330,000 MWh at an auction organized by Gaz du Sud Ouest (GSO), a subsidiary of TotalFina Elf. The company will start to sell gas to large customers in south-western France in 2005.

Products and services

Within the framework of its strategy of total focus on customers, Iberdrola offers them products and services tailored to their needs. In 2004, sales of non-energy products and services to household customers and businesses rose 126% compared with the previous year.

Especially noteworthy is the launch of the multi-product/multi-service campaign, which Iberdrola implemented last year in order to offer all of its Spanish customers fixed telephone services, Internet services (ADSL or PLC), home security, heating, air conditioning, and payment protection plans, as well as natural gas and electricity. In this area, there was an increase in the sale of Power Line Communications (PLC) technology, which consists of access to the Internet through the electrical grid. The Company holds a pioneering position in this market and has deployed its network in Madrid and Valencia, where coverage is already provided to more than 70,000 customers.

In addition, Iberdrola offers to sell businesses a number of products and services, including: infrastructure installation and maintenance, voice and data transmission, advice on and management of environmental contracts or audits, among other services.

Lines of communications with customers

As part of this strategy to focus on customer care and service, Iberdrola offers several lines of communication. The company has 60 commercial agencies and 52 customer service points, where customers can complete all sorts of commercial paperwork. In addition, the company has stores in Madrid and Bilbao, using the concept La tienda de soluciones para tu vida (The store with solutions for your life), which is an innovating marketing and customer-service concept in the industry.

During 2004, Iberdrola answered more than seven million calls on the Customer Service Telephone Line (901 20 20 20). About 31% of commercial matters were handled using this service.

The Web site, www.iberdrola.com, which provides customers with information and the opportunity to handle many matters through its virtual office, recorded more than 600,000 individual users in 2004 and a 29% increase in the number of sessions, while the Virtual Customer Office had 92,000 users.

A unique and differentiated brand

According to a poll carried out by Tracking GFK Group in 2004, Iberdrola was the best-known electric power company among Spain's inhabitants, with a brand awareness rate of 69.1% (spontaneous + suggested).

In addition, Iberdrola was perceived by consumers as the brand that best responds to the values of trust and accessibility, and to the attributes of leadership and dynamism. The poll also indicates that the company had the best score among electricity companies in connection with consumers' appraisal of the quality of the products it sells.

Gas supply and infrastructure

In 2004, oil and natural gas prices reached peaks in North America and Asia. However, the flexibility of Iberdrola's gas contracts allowed it to have the required volumes for fuel consumption at the combined cycle plants and for supply to end customers at all times.

In July, Iberdrola reached an agreement with the Algerian state-owned company Sonatrach for the purchase and sale of 1 bcm (1,000 million cubic meters) of natural gas per year starting in 2008 and over the long term, to be supplied through the new Medgaz underwater gas pipeline, which will directly link Algeria and Spain.

Thus, at year-end 2004, Iberdrola had a supply base of 15.6 bcm per annum, 6.7 bcma of which cover its supply needs in Spain and 8.9 bcma of which cover its supply needs in Mexico and Brazil.

During 2004, the company received 107 shipments of liquefied natural gas (LNG). About 66% of the gas supplied to Iberdrola came from Algeria. Qatar provided 27%; 6% came from Nigeria, and the remaining 1% came from Oman.

In 2004, Iberdrola cemented its position as the top Spanish company (after Enagas) in investment in large gas infrastructure projects, with the aim of reinforcing the guarantee of gas supply to its customers and combined cycle plants. The investments, in varying percentages, have gone to the regasification and liquefied natural gas (LNG) storage plants at Bahía de Bizkaia Gas (Bilbao), in which the Company has a 25% interest and which have run at full capacity since the end of 2003, and at Sagunto (Valencia), in which it has a 30% interest and which will come online at the end of 2005. Added to this is the projected Algeria-Spain gas pipeline, being developed by Medgaz (12% owned by the company), as well as several gas transportation pipelines that will supply the company's combined cycle plants at various integrated sections of the National Gas Pipeline Network.

Iberdrola's has a low risk strategy to secure its gas needs, with contracts signed with a well diversified range of sources and based on various economic conditions, enabling the Group to reduce its exposure to exchange rate risks and fluctuations in oil prices.

The contracts include price indexing formulae, with 48% on non-oil products and 52% on oil products, with flexible clauses such as:

- CIF contracts that do not prevent trading.
- Joint management of contracts with the option to allocate gas for Generation or Commercial activities and among plants, and the possibility to generate economies of scale in logistics and management of stocks.

- Price reviews, both periodical (every three to five years) and on an extraordinary basis in the event of a change in circumstances.
- Make-up and carry-forward clauses to make adjustments for changes in demand over the short term.

5. INTERNATIONAL

Nine Months Ended September 2005

Please find below Iberdrola's nine month 2005 results for its International business. For more detailed information regarding its nine month results please refer to Iberdrola's full nine months results for 2005 report.

€ million	9M 2005	Vs. 9M 2004 (%)
Net Sales	1,388.9	+36.8%
Gross Margin	506.4	+43.5%
EBITDA	371.1	+56.8%
EBIT	263.4	+63.8%

FY2004 Annual Results

€ million	2004	% of Total	% Increase vs. 2003
Gross Margin	478.0	11.6	+31.7
EBITDA	335.7	11.7	+36.4
EBIT	231.0	11.4	+28.9

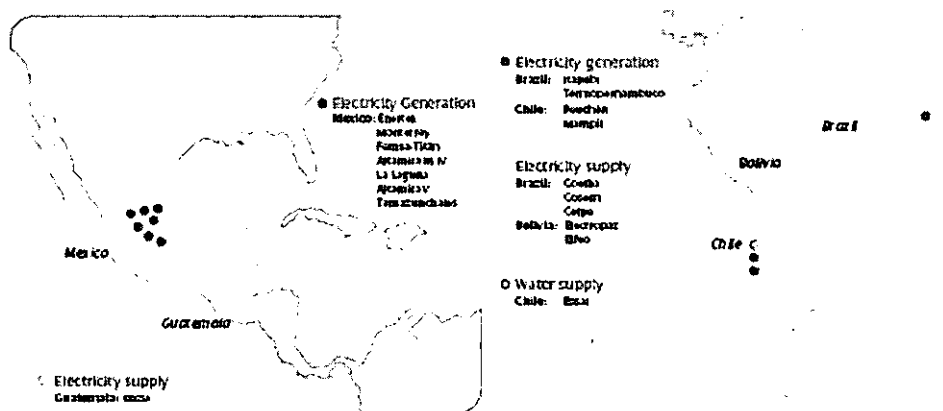

Iberdrola's international division, one of its main growth engines in 2004, continued to focus on Latin America, primarily in Mexico and Brazil, although it also does business in Guatemala, Bolivia and Chile. In all, the company manages more than 30 companies, whose equity value (the shareholdings attributable to the company) is € 1,328 million, with assets amounting to € 3,362 million and revenue of € 1,357 million.

The international division's growing contribution was especially noteworthy in 2004: 11.4% of operating profit and 9.7% of net profit.

Specifically, Mexico-Guatemala consolidated its position as the region contributing the largest percentage of international sales (64.5%), thanks to the operational start-up of the Altamira III and IV combined cycle plant (1,036 MW).

The Company pursues very low risk activities in Mexico. They have 25-year contracts with the CFE and buy directly from Pemex and are hence able to pass through the gas prices completely. All gas-associated costs and revenues are denominated in US dollars.

Also significant was the increase in sales in Brazil (35.5%), as a result of the start-up of the Termopernambuco combined cycle plant (520 MW) and the increase in demand and prices.

Iberdrola invested € 378 million in the international division in 2004, which accounted for 14% of total group investment. In order to consolidate its Latin American growth strategy, based upon reliability, solidity and risk-control standards, the Company expects to invest a total € 2,300 million in the 2004-2008 period.

FULL YEAR 2004

Mexico: consolidation as the leading private company in electricity generation

In 2004, Iberdrola confirmed its position as the top private company in electricity generation in Mexico and achieved the goals set out in its Strategic Plan, with almost 5,000 MW of contracted capacity, approximately 4,293 MW of which will be used to provide electric power to the Comisión Federal de Electricidad (CFE), while 657 MW will serve a number of important industrial customers in Mexico.

Iberdrola in July was awarded the construction and operation of the combined cycle plant at Tamazunchale (San Luis Potosí) (1,135 MW), which will involve an investment of 500 million dollars through 2007, when it is scheduled to start commercial operation.

In Mexico, Iberdrola has almost 2,200 MW of operational capacity, at the combined cycle plants at Monterrey (1,000 MW), Altamira III and IV (1,036 MW) and the cogeneration plants of Enertek (Tamaulipas) (120 MW) and Fosem-Titán (Monterrey) (37 MW). The output of its combined cycle plants in this country came to 14,091 million kWh in 2004, up 87.2% over year-end 2003.

In addition, Iberdrola is building another two combined cycle plants in Mexico: La Laguna II (Durango) (500 MW), which will come online in April 2005, and Altamira V (Tamaulipas) (1,121 MW), which will become operational in November 2006.

Brazil: the leading electricity supply company in the north-east of the country

Iberdrola is the leading electricity supply company in the north-east of Brazil, thanks to the interest it holds, through Neoenergia (the new name of Consorcio Guaraniana) in the companies Coelba (Companhia de Electricidade do Estado da Bahia), Celpe (Companhia Energética de Pernambuco) and Cosern (Companhia Energética do Rio Grande do Norte).

In 2004, these companies supplied 21,654 million kWh (+8.2%) to almost seven million customers, or a 58% share of the regional market and a 7% share of the national market. The three companies had combined sales of E 462 million. They have made remarkable improvements in quality of service since they were privatized, with an average quality increase of almost 50%.

At year-end 2004, Iberdrola had almost 400 MW of installed capacity in Brazil, corresponding to the combined cycle plant at Termopernambuco (520 MW, 190 MW of which are attributable to the Company) and the hydroelectric plant at Itapebí (450 MW, 183 MW of which are attributable to the Company). The total output attributable to the Company from both plants came to 1,424 million kWh: 969 million kWh at Itapebí and 455 million kWh at Termopernambuco.

Other businesses in Latin America

- **Guatemala**

Iberdrola operates in electricity supply through its subsidiary Empresa Eléctrica de Guatemala, S.A. (EEGSA), the leading company in this area in Guatemala. During 2004, the company sold 3,255 million kWh to more than 750,000 customers, giving it a 62% share of the market.

- **Bolivia**

Iberdrola is the leading company in electricity supply in Bolivia. In 2004, the group's two supply companies, Electropaz and Elfeo (of which Iberdrola controls 56.76% and 58.85%, respectively) provided 1,194 million kWh (+5.6%) to 395,000 customers, accounting for almost 40% of the energy supplied in Bolivia.

- **Chile**

Iberdrola generates electricity through its subsidiary Iberoamericana de Energía (Ibener). In 2004, its two hydroelectric plants, Peuchén (75 MW) and Mampil (49 MW) generated 436 million kWh and posted sales of 15 million dollars. In the water industry, the affiliate Empresa de Servicios Sanitarios de los Lagos (Essal) increased its income by 9% in 2004 and brought eight new plants online, covering 90% of the water treated.

6. NON-ENERGY BUSINESS

Nine Months Ended September 2005

Please find below Iberdrola's nine month 2005 results for its Non-Energy business. For more detailed information regarding its nine month results please refer to Iberdrola's full nine months results for 2005 report.

€ million	9M 2005	Vs. 9M 2004 (%)
Net Sales	816.7	+17.4%
Gross Margin	328.4	+18.5%
EBITDA	190.5	+40.9%
EBIT	167.1	+44.9%
Net Profit	136.5	+13.7%

FY2004 Annual Results

€ million	2004	% of Total	% Increase vs. 2003
Gross Margin	278.2	6.7	+27.8
EBITDA	259.4	9.0	+19.9
EBIT	217.4	10.8	+21.1

The main companies that operate the non-energy related activities are:

- i) **Iberdrola Ingenieria y Consultoria (IBERINCO):** a 100% subsidiary of Iberdrola S.A., it provides a wide range of consultancy services for clients on national and international markets, while supporting the group in the design of facilities and project development. It is Spain's leading electricity facility installation engineering firm.
- ii) **Apex:** Iberdrola Group's real estate and property company.
- iii) **IBV:** a company owned 50:50 by Iberdrola and Banco Bilbao Vizcaya Argentaria (BBVA). It is a holding company, with shares in electronics, IT, and services (logistics) companies. Most importantly, IBV owns 25.8% of Gamesa (listed on the top tier of the Spanish stock exchange, the IBEX-35), a company that specializes in engineering such things as wind farms and aerospace.

IBERINCO Turnover

Apex net profit

FULL YEAR 2004

IBERINCO (currently named Iberdrola Ingeniería y Construcción)

The year 2004 was key to the growing business of Iberdrola Ingeniería y Consultoría (IBERINCO), which recorded sales of € 332.5 million, a 31.8% increase from the previous year. IBERINCO, the leader in electrical facilities engineering in Spain, posted net profit of € 21.7 million, up 35.6% over year-end 2003.

In 2004, the Iberdrola Ingeniería y Consultoría subsidiary furthered the growth of its business both within and outside of the Group, and consolidated its international expansion. In line with the strategic goal of bringing the company into the international arena, IBERINCO already has offices in Mexico City, Moscow and Qatar.

Among the most significant contracts signed in 2004, especially noteworthy are the awards by Mexico's Comisión Federal de Electricidad (CFE) to construct electrical infrastructure in the north of the country and the Altamira V combined cycle plant, for an aggregate amount of more than 100 million dollars; the installation of a remote control system for the Peruvian company SEAL; the modernization of the electricity supply network in six regions in Tunisia, and the improvement of the electrical network at Fieri (Albania).

In Spain, the most significant turnkey projects carried out by IBERINCO were: two wind farms of 89 MW at Albacete and Cuenca; the base of the hydroelectric plant at Itoiz (Navarra); the project for the modernization of the hydroelectric plant at Silvón for Viesgo Generación, and the construction of a solar facility at Navarra. IBERINCO was also in charge of the construction of 12 wind farms, the enlargement of another two, and a minihydroelectric plant for Iberdrola's renewable energy division.

In the area of combined cycle generation, the Iberdrola subsidiary won a contract to build Tamazunchale (1,135 MW), in Mexico, and started work at Escombreras (800 MW), in Cartagena and at Altamira V (1,121 MW), also in Mexico. The plants at Santurce (400 MW) and Arcos I and II (800 MW) came into commercial operation this year, and projects at Aceca (400 MW), Arcos III (800 MW), La Laguna (520 MW) and Altamira V (1,121 MW) (the latter two in Mexico) continued under development, all of them meeting their construction schedules.

In supply, IBERINCO brought online 1,235 MVA of transformation capacity, 11 new substations and 13 new facilities of 220 kV, and carried out 45 expansions of existing facilities. In Mexico, the La Laguna substation and others came into service for the Comisión Federal de Electricidad (CFE). In addition, it started construction of the 400 kV substations for Altamira V and Tamazunchale, two combined cycle plants that Iberdrola is building.

APEX INMOBILIARIA (currently named Iberdrola Inmobiliaria)

APEX (now Iberdrola Inmobiliaria), the real estate division of the Iberdrola Group, posted net income of € 93 million in 2004, which represents a 7.7% increase over the previous year and confirms the uninterrupted growth of the company in recent fiscal years. Pretax earnings came to € 138.4 million, up 9.6%, while the real estate division's operating profit rose by 12.6% to € 142.6 million; sales climbed 8.8% to 401.1 million.

At the end of 2004, the real estate division's assets were worth € 1,481 million. With equity of € 561.8 million, following approval of the distribution of € 50 million in interim dividends, and an average pretax return on equity of 25.61%, the company has cemented its position as one of the leading real estate companies in Spain.

Approved investments in real estate made by Iberdrola's real estate division amounted to € 476 million in 2004. In addition, APEX Inmobiliaria (now Iberdrola Inmobiliaria) ended fiscal year 2004 with 21 residential developments under construction, for a total of 2,164 housing units, and 16 residential developments under management, which comprise another 1,491 housing units.

IBV Corporation

Corporación IBV, a venture in which Iberdrola and BBVA each hold a 50% stake, posted net earnings of € 186.88 million in 2004, an increase of 39% from a year earlier. In December, Corporación IBV sold 6% of Gamesa's share capital to Iberdrola at a price of € 10.16 per share. Following the sale, Corporación IBV's stake was 25.8%, while Iberdrola owned 18.89%: 12.89% through IBV and 6% directly.

CUSTOMERS

At year-end 2004, Iberdrola has a total of 17.4 million customers. Of these 9.6 million customers are in Spain and 7.8 million in Latin America. The table below shows the energy used by various customer segments of Iberdrola in 2004:

Million kWh	Fiscal Year Ended		
	2004	2003	% Growth
Sector			
Residential	24,552	23,059	6.5
% of Total	26.6	26.3	
Industrial	38,983	37,561	3.8
% of Total	42.3	42.8	
Services	27,644	25,921	6.7
% of Total	30.0	29.6	
Other	1,005	1,153	(12.8)
% of Total	1.1	1.3	
Total	92,184	87,694	5.1

Iberdrola conducts customer satisfaction surveys on a regular basis. Iberdrola has continued to improve customers' overall satisfaction and purchase predisposition indexes in the last couple of years.

SUPPLIERS

66% of Iberdrola Group's 65,000 suppliers for Spain and Latin America are Spanish. In 2004, the Company processed procurements totaling €4,842 million. Investments and companies under Iberdrola management in Latin America have nearly 19,000 suppliers and made procurements of more than €1,800 million in 2004.

EMPLOYEES

Iberdrola at year-end 2004 had 8,546 employees in Spain; 1,779 at Iberdrola's wholly owned subsidiaries in Spain and 3,133 equivalent employees at Iberdrola's affiliated companies in Latin America (based on Iberdrola's stake). In Spain, all employees, except executives, are covered by collective bargaining agreements (approximately 95.8% at year-end 2004). The last collective bargaining agreement was executed in July 2004 and is effective through December, 2006.

Approximately 60% of the employees at year-end 2004 were members of the trade unions. Iberdrola has not had any significant labor shortages or disruptions due to strikes of any kind in the past 5 years as the Company maintains positive relations with its employees. In fact, the Company has not had any single strike throughout its more than 100 years of history.

The Code of Professional Conduct of the Iberdrola Group (available at www.iberdrola.com) was approved by the Board of Directors on February 27, 2002 and distributed to all employees. This code establishes the criteria for guiding the conduct of professionals and the principles and values of the Group: the person, the customers, competitiveness, results, ability, honesty, loyalty and team spirit.

The application of the Code of Professional Conduct reinforces the company's ethical commitment to complying with the human resources and labor principles included in the UN Global Compact, the principles declared by the International Labor Organization and the OECD's recommendations included in its Guidelines for Multinational Enterprises.

Iberdrola complies with domestic laws protecting human rights, especially where labor is concerned. Therefore, no claims have ever been made against the company in this area. Thus, the company reaffirms its decision to promote and comply with the principles of non-discrimination, equal opportunity, freedom of association, collective bargaining, protection of ethnic minorities, and the rejection child and forced labor.

Iberdrola invests both in Spain and in its Latin American affiliates in the development and training of its professionals by means of specific technical and management programs.

The Programa Desarroll@, program was re-launched in 2004. It is directed towards managers and technicians and its main goal is to make strengthen their to improve, stimulate their development, and consolidate values, attitudes and behavior that we want to incorporate in the culture of the Iberdrola Group, and foster participatory leadership based on communication.

ENVIRONMENTAL MATTERS

Iberdrola maintains a leadership position in the area of environmental management with the implementation of Environmental Management Systems based on UNE-EN-ISO 14000:1996 standard throughout the organization. The Company has also published an annual environmental report since 1996. The environmental function is distributed to all the organizational and hierarchical levels of the Company. Environmental competence at Iberdrola is distributed at four levels or planes of action, in which everyone from the Chairman down to the people with local competence in their milieu are represented. All environmental action is coordinated through the Environment Committees, which meet on a regular basis. These are a major factor in inter-level association, coordination, communication and exchange of experiences.

The Corporate Environment Management (CEM) is entrusted with the task of coordinating all committees and of detecting and analyzing emerging and strategic factors in the environmental area of Iberdrola. The CEM also promotes the implementation of best environmental practices in Group organizations. A full description of the Company's environmental activities can be found in the Company's 2004 audited accounts.

Environmental Costs and Investments

The costs incurred in connection with the environmental activities undertaken during the 2004 fiscal year amounted to approximately 43,363,000 Euros, including the costs arising from direct and indirect activities with an environmental component, such as those pertaining to ecological fees and taxes. The overall figure also includes the costs incurred in connection with the human resources dedicated to these activities. Direct investments during the 2004 fiscal year were 63,836,000 Euros.

Regarding potential environmental contingencies, the Group believes that such events are sufficiently covered by the civil liability insurance policies that it has obtained, and by the corresponding reserves that it has created. As of Year-end 2004, the Company has 15.1 million of provisions for environmental work on the balance sheet. To the best of its knowledge, the Company also believes that it does not have any significant environmental liabilities. As well, any pending environmental lawsuits do not represent material risks to the Company.

LEGAL MATTERS

The Group recognizes litigation is expensive in terms of both cost and management time. It seeks to avoid litigation whenever possible.

No member of the Group is, to the best of the management's knowledge, party to any legal proceedings which management believes would reasonably be expected to have a material adverse effect on the Group's operations or its consolidated financial condition.

DIVIDEND POLICY

The Company's aim is to remunerate shareholders with the progressive increase in dividends in line with the growth of net profit, with a minimum dividend growth of 5%, as set out in the Strategic Plan.

HEALTH AND SAFETY

For Iberdrola, safety is a social, ethical and economic imperative integrated into how it understands sustainability and social responsibility. Loyal to its goal of outperforming its results and with the ambitious objective to completely eradicate accidents, in 2003, Iberdrola launched a Special Occupational Risk Prevention Plan, which is based on a maximum commitment to occupational safety and health, the main aspects of which are:

- Integration of prevention standards within the organization.
- Continuous improvement of efficiency in the prevention system.
- Promotion of training and corporate participation.
- Increased preventive monitoring of outsourced work.

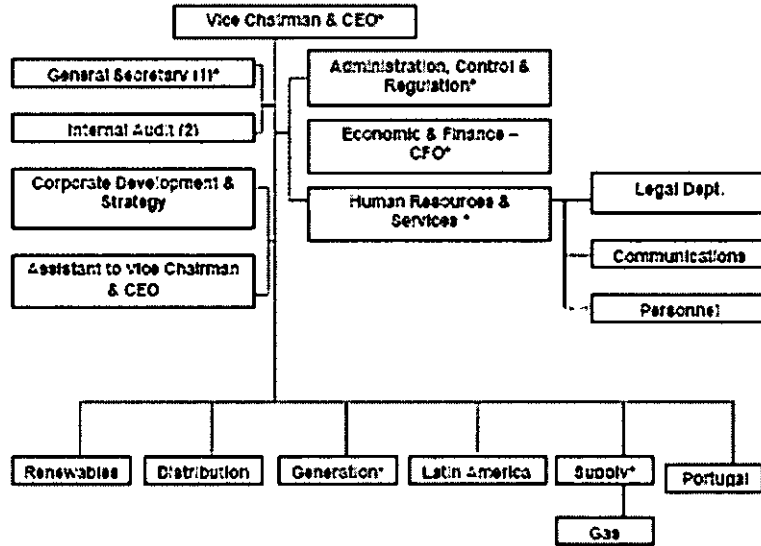

Iberdrola was awarded the OHSAS 18001 Occupational Hazard Prevention Certification for Iberdrola S.A., Iberdrola Generación S.A., Iberdrola Distribución Eléctrica S.A. and Iberdrola Ingeniería y Consultoría S.A. In 2003, it successfully passed its first follow-up audit, and in December 2004, it successfully passed the second one.

The company's own medical services monitor the health of employees by means of the preventive treatment of illnesses and regular checkups to monitor health. 7,294 checkups were performed in 2004, and in 97.2% of the cases the employees were fit for their job.

Iberdrola's commitment to prevention is reflected in the continuous decrease in the employee accident rate. Thus, in 2004, the number of accidents resulting in leaves dropped by 5% from 2003. The Accident Frequency Index, which in 2004 was quite similar to the one in 2003, has remained well below the average figures for Spain and for the electricity industry.

BOARD AND MANAGEMENT

Iberdrola's corporate structure is as follows:

* Member of the Operating Committee

(1) General Secretary is also Secretary of the Board of Directors and reports to it

(2) Reports to Auditing & Compliance Commission of the Board of Directors

Management

The Table below demonstrates the current composition of Iberdrola's management team:

Position	Name
Vice-Chairman & CEO	José Ignacio Sánchez Galán
General Secretary	Federico San Sebastián Flechoso
Deputy to Vice-Chairman & CEO	Julián Martínez-Simancas Sánchez
Corporate	
Chief Administration, Control & Regulation Officer	José L. San Pedro Guerenabarrena
Chief Financial Officer	José Sáinz Armada
Chief Human Resources & Services Officer	Fernando Becker Zuazua
Chief Strategy & Development Officer	José Luis del Valle Doblado
Chief Internal Audit Officer	Luis Javier Aranaz Zuza
Business	
Generation Director	Francisco Martínez Córcoles
Distribution Director	Javier Villalba Sánchez
Supply Director	Salvador Font Estrany
Renewable Energy Director	Pedro Barriuso Otaola
Latin America Director	Gonzalo Pérez Fernández
Portugal Director	Joaquim Pina Moura

Board of Directors

The Table below demonstrates the current composition of Iberdrola's Board of Directors:

	Title	Type of Director
Iñigo de Oriol e Ybarra (1)	Chairman	Executive
José Ignacio Sánchez Galán (1)	Vice Chairman & Chief Executive Officer	Executive
José Antonio Garrido Martínez (1)	Non-Executive Vice Chairman	External
Francisco Javier Herrero Sorriqueta (1)	Non-Executiva Vice Chairman	External
Víctor de Urutia Vallejo (1) (3)	Member	External Independent
José Orbegetxo Arroyo	Member	External Independent
César de la Mora y Armada (2)	Member	External Independent
Ignacio de Pinedo Cabezudo (2)	Member	External
Lucas María de Oriol López-Montenegro	Member	External Independent
Antonio Garay Morenés	Member	External Independent
Ricardo Álvarez Isasi (2)	Member	External Independent
Antonio María de Oriol y Díaz-Bustamante	Member	External Independent
Mariano de Ybarra y Zubiria	Member	External Independent
José Ignacio Berroeta Echevarría (1) (3)	Member	External Independent
Juan Luis Arregui Ciársolo (1) (3)	Member	External Independent
Julio de Miguel Aynat	Member	External Independent
Sebastián Battaner Arias	Member	External Proprietary (Cajas De Ahorros agrupadas en la Federación de Cajas de Ahorro de Castilla y León)
Xabier de Irala Estevez (2)	Member	External Proprietary (BBK)
Jesús María Cadenato Matía (1)	Member	External Proprietary (BBVA)

- 1) Executive Committee.
- (2) Audit and Compliance Committee.
- (3) Nominating and Compensation Committee.

The Secretary of the Board of Directors, Counsel to the Board and General Secretary of the Company is Federico San Sebastián Flechoso.

On April 20, 2005, the Board of Directors voted that when Iñigo de Oriol e Ybarra retires as Chairman of the Company's Board of Directors, in accordance with the internal statutes governing the Board of Directors, he will be replaced in this position by the current Executive Vice-chairman and Chief Executive Officer, José Ignacio Sánchez Galán.

Also, on April 20, 2005, the Directors Javier Aresti y Victoria de Lecea and José Luis

Antoñanzas Pérez-Egea retired from the Board after reaching the age limit set by company statutes, and the Directors Santiago Mayner Oyarbide and José Antonio Fernández Rivero tendered their resignation as members of the Board.

As of the same date, the Board of Directors of the Company resolved to appoint the shareholders Xabier de Irala Estévez and Jesús María Cadenato Matia in representation of the shareholdings owned by BBK and BBVA, respectively, as interim members of the Board of Directors of IBERDROLA, S.A., subject to ratification by the shareholders at the next general shareholders' meeting, filling the vacancies left by Santiago Mayner Oyarbide and José Antonio Fernández Rivero.

Directors of the Company representing significant shareholders:

Director	Shareholder	Description of the relationship
Sebastián Battaner Arias	Cajas de Ahorros agrupadas en la Federación de Cajas de Ahorros de Castilla y León	Representative
Xabier de Irala Estévez	BBK	Representative, Chairman of BBK
Jesús María Cadenato Matia	BBVA	Representative, Director of Large Industrial Corporations of BBVA

REGULATORY BODIES

Relations with Regulatory Bodies

Iberdrola maintains permanent relations with energy regulation and market supervision agencies and institutions. These contacts mean Iberdrola has detailed knowledge of the main concerns of these regulatory bodies, can communicate the Company's opinions and points of view and defend its legitimate interests.

Iberdrola has a system of experts on regulation working together and coordinating activities at corporate level, providing an overview of the Group and its businesses.

Institutions

A. European Union Institutions

The Commission, the Council and the Parliament of the European Union are responsible for the development of community rules and regulations that must thereafter be adopted and applied at the national level. The influence of the European Union, which is already very significant, will continue to increase as the consolidation process unfolds.

Well aware of this significant influence, IBERDROLA has opened a permanent office in Brussels from which it is regularly in contact with these institutions, which also allows the company to apprise itself of the issues that are major concerns to the European authorities and of the prevailing tendencies in the area of energy policy.

B. Spanish institutions

The national institutions that have greater influence on regulatory aspects include the following:

Ministry of Economy: Responsible for the formulation of economic policy.

Ministry of Industry, Tourism and Trade: Responsible for regulatory provisions applicable to the industry.

Ministry of the Environment: Responsible for environmental regulations, many of which have a considerable impact on the energy industry. Especially noteworthy, because of its social repercussions throughout 2004, is the development of regulations relating to the fight against climate change and the implementation of trading in emissions rights.

National Energy Commission: The independent regulatory entity in charge of ensuring the proper operation of the market. During 2004, the company participated in various working groups whose goal was to obtain improvements in the regulation of the gas industry and in the electricity deregulation process.

Other governmental organizations at the national level: Iberdrola also maintains separate relationships with other organizations that are responsible for aspects that affect the company's business, such as the Antitrust Service and the Antitrust Tribunal and the National Securities Markets Commission.

Autonomous communities and local authorities

Pursuant to applicable legislation, various powers and duties that influence business in the energy industry have been assigned to the Autonomous Communities, which are also actively involved in the development of national regulatory provisions. Among such powers and duties, we can mention the approval of facilities within the Autonomous Communities, quality of supply, environmental issues, etc. Within the Autonomous Communities, the energy and environmental areas have the greatest influence on the energy business. Similarly, local institutions also have powers and duties in connection with the approval and construction of facilities, though such powers and duties are confined to the local level.

Being aware of the fact that it is necessary to come as close as possible to local problems in order to find the most appropriate solution, Iberdrola has an institutional presence in most Autonomous Communities, through which presence it participates and cooperates in the development of regulations and in the scheduling of activities generally.

INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS): THE EFFECT ON FY2004 ACCOUNTS

In conformity with Regulation (EC) no. 16/2002, The Group will have to present its consolidated financial statements for 2005 in accordance with the IFRSs adopted by the European Union.

Although the first consolidated statements prepared in accordance with IFRS will, in the case of the Group, be those for the year ending December 31, 2005, it will be necessary to include, for comparison purposes, the figures for the preceding year 2004.

The effect of adapting Iberdrola's 2004 financial statements to IFRS is very slight, therefore proving the consistency of Iberdrola's accounting practices.

With respect to the Balance Sheet, the main changes are summarized as follows:

Assets

Million Euros	NOTE	Spanish GAAP	Absolute change	IFRS
Tangible & intangible fixed assets	A	18,961.1	+324.3	19,285.4
Financial assets	B	1,989.7	-88.5	1,901.2
Long term taxes receivable	C	767.2	+447.3	1,214.5
Consolidation Goodwill	D	323.9	-323.9	-
Deferred charges	E	175.3	-175.3	-
Current assets – inventories	F	1,142.4	-112.1	1,030.3
Current assets – rest & other	G	2,838.2	-63.0	2,775.2
Total assets		26,197.8	+8.8	26,206.6

A) Tangible and intangible fixed assets

- Increased due to changes in the scope of consolidation (379 million), the provision for plants decommissioning (74 million), reclassification of nuclear fuel from Inventories to Fixed Assets (240 million), and other (47 million).
- Decreased for the write-off of Start-up Costs (-52 million) and the reallocation of merger differences (-363 million).

B) Financial Fixed Assets

- Decreased due to changes in the scope of consolidation (-238 million) and increased for the valuation of Long-Term Financial Derivatives (81 million) and other (69 million).

C) Long Term Taxes Receivable

- Increased for the tax effects associated with the provisions for dismantling (74 million), the valuation of derivatives (109 million), the merger differences (127 million), the change in the scope of consolidation (81 million), and other (56 million).

D) Goodwill

- Disappears, being allocated to:
 - Intangible fixed assets: companies consolidated fully or proportionally (-24 million).
 - Financial investments: companies consolidated using the equity method (-118 million).
 - Change in the scope of consolidation due to EDP, valued on a market basis (-183 million).

E) Deferred charges

- Disappear for reclassification as debt (-175 million).

F) Current assets – Inventories

- Reclassification of nuclear fuel, now accounted for as a Fixed Asset (-240 million), the effect of recognizing revenues from developments sold at the real estate division (80 million), change in the scope of consolidation (45 million) and other (2 million).

G) Current assets – Other

- Change in the scope of consolidation: net impact of the increase due to proportional consolidation of subsidiaries (58 million), and the decrease due to the recognition of revenues from developments sold at the real estate division (-100 million) and other (-21 million).

Liabilities

Million Euros	NOTE	Spanish GAAP	Absolute change	IFRS
Shareholders' equity and minority interests	K	8,794.2	-166.6	8,627.6
Merger differences	L	236.4	-236.4	-
Deferred revenues	M	484.3	-10.6	473.7
Provisions	N	1,034.8	+236.1	1,270.9
Financial debt	O	10,800.3	+304.6	11,104.9
Long-term taxes payable	P	488.5	+109.1	597.6
Other long-term payables	Q	309.4	+13.1	322.5
Other short-term payables	R	4,049.9	-240.5	3,809.4
Total equity & liabilities		26,197.8	+8.8	26,206.6

H) Shareholders equity

- Adjustments against reserves for the valuation of EDP (-46 million), REE (23 million), GALP (8 million) and others (8 million), valuation of derivatives (-93 million), update of provision for plants decommissioning (-59 million), write-off of Intangible Fixed Assets (-34 million) and increase in Minority Interests and others (25 million).

I) Merger differences

- Eliminated against lower value of tangible fixed assets associated (-236 million).

J) Deferred revenues

- Positive exchange gains booked on P&L; elimination of capital subsidies linked to research & development expenses written off in assets.

K) Provisions

- Increased by the provision for plants decommissioning (202 million), change in the scope of consolidation (54 million) and others (-20 million).

L) Financial Debt

- Increases by:
 - Changes in the scope of consolidation (192 million).
 - Valuation of hedging derivatives (224 million).
- Decreased by the reclassification of debt expenses (-49 million) and leasing (-63 million).

M) Long-term taxes payable

- Increases by the tax effect of the valuation of derivatives (109 million).

N) Other long-term payables

- Changes in the scope of consolidation (integration of the liabilities of consolidated companies) (13 million).

O) Other short-term payables

- Changes in the scope consolidation (elimination of payables to equity accounted subsidiaries) (-240 million).

In terms of the Income Statement, the changes have been as follows:

Million euros	NOTE	Spanish GAAP	Absolute change	IFRS
Net sales	1	10,314.5	-1,741.9	8,572.6
Procurement costs	2	6,146.2	-1,959.5	4,186.7
Gross margin		4,168.3	+217.5	4,385.8
Net operating expense	3	1,129.8	+168.8	1,298.6
Taxes	4	180.8	+14.5	195.3
EBITDA		2,857.7	+34.3	2,892.0
Amortizations & provisions	5	838.8	+51.3	890.1
EBIT		2,018.9	-17.1	2,001.8
Financial result	6	389.7	+5.4	395.1
Cos. carried by Equity Method	7	69.5	-16.2	53.3
Extraordinary results	8	58.9	-58.9	-
Earning from discontinued operations	9	-	+89.5	89.5
Corporate tax & minorities	10	546.9	-8.6	538.3
Net profit		1,210.7	+0.6	1,211.3

1) Net sales

- Reduction of energy sales for distribution (-2,328 million), changes in the scope of consolidation (619 million). Real estate division: recognition of revenues from developments sold (-45 million), reclassification of extraordinary results (12 million).

2) Procurements

- Reduction of energy sales for distribution (-2,328 million), change in the scope of consolidation (398 million). Real estate division: recognition of costs for developments sold (-27 million) and others (-3 million).

3) Net operating expenses

- Changes in the scope of consolidation (155 million), reclassification of extraordinary results (35 million) and major maintenance costs and others (-21 million).

4) Taxes

- Reclassification of extraordinary results (13 million) and others (2 million).

5) Amortizations & provisions

- Changes in the scope of consolidation (67 million), lower intangible assets amortization (-28 million) and others (12 million).

6) Financial result

- Changes in the scope of consolidation (-10 million), valuation of derivatives (34 million) and others (-19 million).

7) Results of companies accounted for by the Equity method

- Changes in the scope of consolidation. No goodwill amortization (-16 million).

8 & 9) Extraordinary results

- These disappear under IFRS and are reclassified to the Earnings from discontinued operations account (89 million) and others (-30 million).

10) Corporate tax & minorities

- Changes in the scope of consolidation.

Other considerations:

1. Change in scope of consolidation:

- Global or proportional consolidation of Corporación IBV, Energy Works, Mediapark, Neosky and Iberdrola Energía Chile.
- Removal of EDP and REE (market valuation).

2. Non-energy businesses

- Change in the accounting method for the real estate business developments. Under Spanish GAAP, the whole profit from developments sold could be accounted for upon 80% of completion, while under IFRS no accounting of profit is done until full and final delivery of the development.

3. Quarterly change in net debt, equity and leverage: IFRS vs. Spanish GAAP.

Spanish GAAP	Q1 2004	Q2 2004	Q3 2004	Q4 2004
Net debt	10,284	10,211	10,557	10,569
Equity	8,533	8,450	8,750	8,717
Leverage	54.7%	54.7%	54.7%	54.8%

IFRS	Q1 2004	Q2 2004	Q3 2004	Q4 2004
Net debt	10,353	10,274	10,607	10,685
Equity	8,433	8,395	8,679	8,628
Leverage	55.1%	55.0%	55.0%	55.3%

Legal Note:

The financial information presented in this document about the IFRS has been prepared on the basis of all International Financial Reporting Standards (IFRSs) and their interpretation done by the Standing Interpretations Committee (SIC) and International Financial Reporting Interpretations Committee (IFRIC-IASB), effective for the year ended 31 December 2005.

In this respect, all of the following should be noted:

- The financial information has been internally prepared by the Company and has not been audited.
 - This information has been prepared on the assumption that current IFRSs will all be in the future endorsed by the European Commission (EC), therefore providing them with full legal value. If the EC fails to endorse some of these standards and interpretations in time for the publication of the Group's Financial Statements for 2005, the information presented in this document might be changed.
- Standards currently in issue and adopted by the European Union are subject to interpretations issued from time to time by the IFRIC. Also, further standards might be issued by the IASB that may be applicable for financial years beginning on or after 1 January 2005.
- Up to now, IFRSs have undergone a significant revision process and are currently being applied in the European Union and in a large number of countries simultaneously for the first time. Accordingly, there is not yet a significant body of well established practice and detailed regulation on which to base the resolution of certain technical issues occasionally arising during the application of these standards to patterns not specifically addressed by IFRSs.
- Changes arising from any of the above listed items or from the evolution of industry practice might also impact certain decisions and interpretations currently adopted by the Iberdrola Group for the preparation of the information contained in this document.
- As a result of all of the above, it is possible that further changes might be required to this information before it is published as comparative financial information in the 2005 Annual Report of the Iberdrola Group.

**V. AGREEMENT WITH GAS NATURAL
FOR THE FUTURE PURCHASE OF
ASSETS OF THE COMPANY RESULTING
FROM THE TAKEOVER BID FOR
ENDESA PRESENTED BY GAS
NATURAL**

On September 5th of this year, Iberdrola and Gas Natural SDG entered into an agreement for the purchase and sale of certain assets of the company resulting from the takeover of Endesa by the gas company. This agreement is subject to the success of Gas Natural's public offer to acquire Endesa and, consequently, is subject to approval by the relevant authorities. Furthermore, the acquisition of assets by Iberdrola will also require its approval by the corresponding authorities.

The method established to assess the value of these assets ensures that the price will be determined through an objective and transparent process and at market prices. Iberdrola and Gas Natural will select two leading international investment banks, one chosen by each party, which will perform the valuation. If the difference between both valuations is less than 10%, the final price will be the average of both. If the difference between the prices they establish exceeds 10%, a third bank will act as arbiter. This third bank will be selected by lottery from among financial entities that are of equal global prestige, and will carry out its own valuation. The final price will be calculated based on the average of this final estimate and the closer of the two previous ones.

The Gas Natural-Iberdrola agreement is already available to the National Energy Commission (CNE), the Spanish securities regulator (Comisión Nacional del Mercado de Valores - CNMV), and the Spanish authorities for the Defence of Competition (SDC).

The Company will not modify its financial commitments when completing the agreement: it will use debt and capital increases to fund the purchase of assets, while maintaining the objective established in its Strategic Plan to reduce leverage to 50%.

Acquisition of assets

The agreement entered into between Iberdrola and Gas Natural provides for the purchase and sale of regulated assets as the Balearic Islands and gas supply points, and other non regulated assets of electricity generation as well as assets in other countries.

1. Regulated assets:

1.1 Balearic Islands:

The agreement includes the acquisition of the entire electricity system of the Balearic Islands, both generation and distribution assets.

- Generation assets with a total installed capacity of 1,800 MW:
 - 2 combined cycle plants with a total capacity of 450 MW.
 - 1 imported coal plant of 500 MW.
 - 6 fuel-oil plants with a total capacity of 850 MW.
- Electricity distribution network in the Balearic Islands:
 - 600,000 points of supply with a 5,000 GWh demand.

On the islands, the price-setting mechanism is different from that of the mainland, as the energy sold is remunerated according to the costs of production of each plant.

Distribution, as on the mainland, is a natural monopoly. For this reason, Iberdrola's entry into the Balearic Islands market would not modify the current situation.

In addition, following the same model applied to all of the Autonomous Communities in which it operates, Iberdrola will make the necessary investments to better guarantee the supply and quality of service, with the resulting benefits for consumers.

Today, the generation and distribution of electricity, both on the Balearic Islands and on the other so-called "sistemas insulares y extrapeninsulares" or "non-mainlands systems", are regulated activities carried out by only one player. Having a new operator managing one of the island systems will provide the regulator with a benchmark element in order to settle the specific conditions for energy remuneration in the islands, which would imply a higher degree of transparency than currently exists.

1.2 Distribution of gas and electricity:

In addition to the electricity distribution network on the Balearic Islands, the agreement also calls for the transfer of pipeline networks that distribute natural gas on the Balearic Islands and in Madrid, Valencia and Murcia (with a total of 1,250,000 points of supply). These networks are used by all suppliers under equal conditions and at the same fees. The price of these third-party access fees is set by the Government.

There are currently several agents that manage the gas and electricity networks in the same Autonomous Community. This is the case in Asturias, Aragón and Extremadura. In addition, this situation is common in other countries, such as Germany, Italy and Portugal.

The synergies derived from the joint management by the same operator of the electricity and gas networks in certain geographical areas will result in a better service for consumers.

2. Non-regulated assets: Generation on the mainland

The agreement includes generation assets on the mainland with a total installed capacity of 3,020 MW:

- As Pontes' coal plant (1,400 MW), currently under the process of conversion to imported coal.
- Teruel's coal plant, with 1,100 MW.
- Foix's fuel-oil plant in Barcelona with a capacity of 520 MW and a license to build 800 MW of combined cycle plants.

Electricity generation on the mainland is a competitive business. Iberdrola's acquisition of plants brings several beneficial effects:

- a) Both the new Group that will be created through the Gas Natural takeover bid and Iberdrola will have a lower market share in electricity production than the current largest generation company in Spain.

b) In addition, the purchase of coal plants by Iberdrola will also improve competition in price setting with this technology, contributing to resolve an issue that has been pointed out by all of the agents in the industry.

3. Assets in Italy:

- Generation: 2,600 MW of installed capacity, with an annual production over 13,000 GWh.
- Renewable energies: 200 MW in wind farms under development.

4. Assets in France:

The 65% stake in the company SNET:

- 2,600 MW of installed capacity in France, with a total annual production of 11,300 GWh.
- 140 MW equivalent in Poland and 13 MW in Turkey.

5. Assets in Latin America:

Lastly, the agreement contemplates the interest of Iberdrola in assets to be defined in those Latin-American countries where it already has operating presence.

The operation is coherent with the Strategy of Iberdrola, by consolidating the Company project in Spain, increasing the international presence and entering into new regulated business. It is another milestone in the development of its Strategic Plan; whose solid results have given it increased credibility and the support of the markets.

Iberdrola considers that the agreement entered into on September 5th with Gas Natural for the purchase and sale of assets, subject to the success of its takeover and the required authorizations, is a firm commitment to the market, as opposed to other ideas that defend interventionism.

The agreement, which follows the trend in other European countries, will open up new opportunities to advance the liberalization of energy in Spain, increase competition in electricity and gas, improve electricity service, accelerate the construction of new gas distribution networks, increase competition in the generation of electricity and result in advantages for the consumer and the Spanish economy.

LEGAL NOTE

All and each statement contained in this document referring to the agreement with Gas Natural are subject not only to the condition of the success of the Gas Natural bid, but also to those coming from the necessary administrative approvals that is, the Eleventh Additional Disposition from the Hydrocarbons Sector Act (Ley 34/1998 del Sector de Hidrocarburos); the applicable merger control regulation, and the Spanish Golden Share Act (Ley 5/1995 de Enajenacion de Participaciones Publicas en determinadas empresas).

VI. DRAFT NOTE PURCHASE AGREEMENT

The Note Purchase Agreement is available upon request. The document has been prepared by the Issuer's special US counsel, White & Case, and is blacklined against the Company's previous U.S. Private Placement Note Purchase Agreement.

APPENDIX: THE ENERGY INDUSTRY OVERVIEW

EUROPE

Significant energy and environmental regulations were approved in the European Union during 2004. Throughout the year, directives on the promotion of cogeneration and gas supply safety were published, as well as regulations on financial assistance for trans-European networks.

In September, the European Commission presented new versions of draft directives on the safety of nuclear facilities and the treatment of waste, since the previous drafts presented in January 2003 were blocked by the Council.

It should be noted that the period for transposition into Spanish law of the directives that complete the domestic gas and electricity markets, as well as for regulations on access to electricity interconnections, expired on July 1. At the end of the year, Spain and 17 other countries had not met this requirement.

In the environmental sector, the main initiative was the launch of trading within the European Union of the right to emit greenhouse gases, which came into effect on January 1, 2005 and has significant repercussions for the energy industry.

In January, the European Commission published guidelines for the development of National Allocation Plans (NAP) and in February it made public two decisions on the monitoring and reporting of greenhouse gases. In July and December, the NAPs of 21 member States were approved; some of them subject to conditions, and in November a directive was published allowing the incorporation of clean development mechanisms and joint application to the trading of emission rights.

Another significant event was the official ratification of the Kyoto Protocol by Russia in November, which enabled compliance with the minimum requirements for its entry into force. This provides legal support for the EU's initiatives in the fight against climate change, which include communitywide trading of emission rights. Also within this framework, it is important to mention the publication in April of the directive on environmental responsibility.

SPAIN

From a regulatory standpoint, the approval of the National Allocation Plan (NAP) by the Spanish Government was the most significant event in Spain. During the year, the following initiatives were launched in connection with it:

- The Spanish strategy for compliance with the Kyoto Protocol was approved in February.
- Royal Decree Law 5/2004, which transposes the directive on the trading of emission rights, and Royal Decree 1866/2004 which approves the NAP for emission rights for the 2005-2007 period, were published after the summer.
- The proposal for the allocation of emission rights by facility was presented in late November and approved by the Cabinet of Ministers on January 21, 2005, with minor adjustments.

- The NAP was finally sent to the European Commission in December, and was conditionally approved by the Commission.

The NAP will contribute to attaining the goals established in the Kyoto Protocol and will enable the replacement of Spanish generation facilities with clean technologies, mainly gas combined cycle plants and renewable energy.

Another important environmental regulation for the energy industry that became effective during the year was Royal Decree 430/2004, which transposes the directive on the limitation of polluting emissions into the air from large combustion facilities.

During the year, the following regulations also came into effect in both the electricity and gas industries:

- In March, Royal Decree 436/2004 was published establishing a new legal and economic framework for the production of electricity under the Special Regime, which enhances regulatory stability for investments in renewable energy and cogeneration.
- Resolutions establishing the remuneration rate for the transmission of electricity for 2002, approving a set of procedures to perform appropriate technical management of the system, setting the final amount pending set-off due to revenue imbalances from regulated activities prior to 2003, and establishing the new system for communication, execution and control of interruptions.
- Royal Decree 1716/2004 was approved, providing for the obligation to keep minimum safety stocks of natural gas equivalent to 35 days of firm consumption or sales, and the diversification of supply. It also regulates the activities of the Corporación de Reservas Estratégicas de Productos Petrolíferos, which acquires powers to control minimum stocks and the diversification of natural gas.
- Orders ECO/31/2004, ECO/32/2004 and ECO/33/2004 updating the remuneration of regulated activities, tolls and fees linked to third-party access to gas facilities, and natural gas meter rental rates.

IBERIAN ELECTRICITY MARKET (MIBEL)

In 2004, the Spanish and Portuguese authorities continued advancing towards the creation of the Iberian Electricity Market (MIBEL) following the signing of two agreements, one in January and the other in October. The October agreement set the date for the launch of the MIBEL for June 30, 2005, establishing and defining the most important points regarding the technical and economic management of the single market.

In addition, both countries committed to coordinated development of internal regulations for the sector and to creating a number of groups, a supervisory entity and a MIBEL follow-up commission.

In June 2005, the scheduled deadline was postponed due to the ongoing restructuring of the Portuguese energy sector.

Tariffs and the price of Electricity Evolution

Royal Decree 1802/2003, of December 26, increased the average or reference rate for the sale of electricity in 2004 by 1.72%, which is below the maximum 2% increase established by Royal Decree 1432/2002.

Integral rates for the sale of electricity applied by distribution companies rose by an average of 1.54%, while transmission and distribution network access rates increased by 1.6%. This increase was lower than inflation in 2004, and the price of electricity in real terms dropped by 1.48%. Looking at the past six years, the average price of electricity went from 7.41 c€/kWh in 1999 to 7.21 c€/kWh in 2004, a drop of 2.8% in real terms. During that period, the CPI climbed by 17.62%.

As the deregulation process advances in a number of European Union countries, comprehensive official rates begin to disappear and are replaced by free supply prices, which are usually confidential and negotiated freely between the supplier and the end-user. However, official data continues to indicate that Spain is among the EU countries with the lowest electricity prices.

Price of Electricity for Domestic Use in EU Countries
Prices at January 1, 2004 (C1 domestic customer type: 3,500kWh
(c€/kwh). Taxes included.)

 Taxes included, except VAT.)

The Spanish Electricity Sector

Good prospects for the Spanish Electricity Market

The current high degree of interest in the Spanish electricity market is related to the good prospects for the sector that has shown high growth rates in the last years and has undergone a deregulation process.

Attractive Fundamentals of the Spanish Electricity Market

(Source: JP Morgan)

Strong Growth Demand

Spain is one of the fastest growing electricity markets in the European Union. From 1997 to 2004, electricity demand showed a Compounded Average Growth Rate (CAGR) close to 5%. This strong growth has continued during 2005, being the demand for the first nine months of 2005 5.4% higher over the same period in 2004.

At the end of 2004, demand amounted to 233,551 GWh, making of Spain the fifth-largest European electricity market after Germany, France, UK and Italy. The chart below shows the evolution of electricity demand in Spain in the period 1997-2004:

Evolution of Electricity Demand in the Spanish Mainland System 1997-2004
 (Mainland system excluding capacity generation located outside the Iberian Peninsula)
 Source: REE

Peak demand has also increased significantly in recent years: from 31,247 MW on 16 Dec. 1999 to 38,210 MW on 9 Dec. 2004. A new record has been set in 2005, when peak demand on 27 Jan. 2005 reached 43,378 MW, a 13.5% increase over the 2004 level. It is also worth mentioning that the peak demand in summer is converging to the winter levels. Therefore, the growth of the peak demand is even higher than the annual electricity demand.

It is remarkable that the coverage of this increase in peak demand has been possible thanks to the contribution of the new CCGTs built over the period, of which 44% are managed by Iberdrola (as of Q1 2005):

Peak demand growth vs. new c. cycles
 ('01-'05)

The chart below shows the evolution of the hourly average peak demand for the period 1999-2005:

Evolution of Peak Demand (MW)

Accordingly to the National Energy Plan (NEP) approved in September 2002, electricity demand is forecasted to grow at a CAGR of approximately 3.5% p.a. in the 2002-2011 period in Spain, which is higher than the CAGR for the EU in the same period.

Shrinking Capacity Margin / Installed capacity in the system

Despite strong demand increases, recurrent tariff reductions (more than 30% drop in real terms for the period 1996-2001) discouraged new investments in generation. Therefore, there were very few capacity additions during those years. The combination of both effects (strong demand and no capacity additions) resulted in a reduction of the reserve margin to levels close to 0% and the subsequent blackouts, like the one suffered in 17 Dec. 2001.

The following table shows the evolution of the installed capacity in mainland Spain for the period 1999-2004, including Special Regime facilities (source: REE & CNE):

MW	1999	2000	2001	2002	2003	2004
Hydro	16,524	16,524	16,586	16,586	16,657	16,657
Nuclear	7,686	7,799	7,816	7,871	7,876	7,876
Coal	11,238	11,542	11,565	11,565	11,565	11,565
Fuel oil	8,214	8,214	8,214	7,494	6,930	6,930
CCGT	-	-	-	2,794	4,394	8,259
Total Ordinary Regime	43,662	44,079	44,181	46,310	47,422	51,287
Wind	1,591	2,184	3,385	4,872	6,104	7,849
Hydro (Spec. Regime)	1,396	1,424	1,516	1,550	1,622	1,661
Cogeneration	4,152	4,910	5,321	5,559	5,637	5,745
Other (Biomass, solar...)	382	466	726	1,039	1,238	1,421
Total Special Regime	7,521	8,984	10,948	13,020	14,601	16,676
Total	51,183	52,063	55,129	59,330	62,023	67,963

As can be seen, the Spanish electricity system is still characterized by its significant hydro capacity (27% of the total installed capacity including hydro in the Special Regime at year end 2004). This is partly explained by historical circumstances. Up until the 1960s, hydro capacity was the main source of electricity generation. However, following the oil crisis of the 1970s, the sector carried out a significant investment in the construction of nuclear plants until a moratorium was imposed in 1984, when emphasis turned to expansion of the coal-fired capacity.

Nowadays, the overall generation mix is much more balanced (as the table above shows) thanks to the new combined cycle plants and renewable energies, specially wind. This trend will continue in the next years, as elsewhere in Europe, so that new generation capacity is expected to come from gas-fired CCGT capacity and renewable energies.

Given the hydro dependency of the Spanish electricity system, rainfall levels are key to the supply/demand balance. Thus, the available generation capacity may be much lower than the nominal 68,000 MW installed capacity shown above, as a result of the large hydro capacity and the variability of rainfall in Spain. For these two reasons, the fuel generation mix tends to vary significantly from year to year.

Also, due to this hydro dependence and this variability of rainfall, the Spanish system should tend to have a higher reserve margin compare to other European countries in order to cope with extreme situations as a severe drought and a strong demand taking place at the same time. This is exactly what happened in the current winter peak demand of 27 January 2005 in which the reserve margin dropped to 3% according to Iberdrola's estimates. This situation will progressively be solved thanks to the CCGTs and renewable energy plants building programme now underway in Spain.

The following graph shows the evolution of the gross electricity output in Spain by fuel type in the period 2000-2004, excluding output from Special Regime facilities:

Gross Production Structure

Source: REE

The following exhibit shows the annual electricity supply and demand in the Spanish mainland system for the period 2000-2004:

GWh	2000	2001	2002	2003	2004
Hydro	27,842	39,424	22,525	38,773	29,977
Nuclear	62,206	63,708	63,016	61,875	63,153
Coal	76,374	68,091	78,768	72,249	76,234
Fuel oil	10,249	12,398	16,474	8,035	7,886
CCGT	-	-	5,308	14,990	29,555
Gross Output (supply)	176,672	183,622	186,090	195,922	206,806
- Auxiliary Consumption	7,827	7,584	8,346	8,061	8,766
- Pump Storage Consumption	4,907	4,131	6,957	4,678	4,562
Net Output (supply)	163,938	171,906	170,788	183,182	193,479
+ International Exchanges	4,441	3,458	5,329	1,264	-2,939
+ Special Regime	26,631	30,270	35,094	41,242	43,011
Demand (at plant busbars)	195,010	205,634	211,211	225,688	233,551

Limited International Interconnection

Transmission links with neighboring countries are limited, making the Spanish market one of the most isolated systems in Europe. Current international connections with France, Portugal, and Morocco amount to a maximum of 3,500 MW, equivalent to 5.1% of installed capacity on the Spanish mainland system. Therefore, the contribution of interconnections to the coverage of electricity demand is low. Plans announced by the relevant grid companies indicate that interconnection capacity will remain as a relatively small percentage of total capacity.

The following table shows the balance of interconnections for the period 2000-2004 and their contribution to the coverage of demand (positive balance: importer; negative balance: exporter).

GWh	France	Portugal	Andorra	Morocco	Total	% of demand
2000	7,907	-931	-272	-2,263	4,441	3.1%
2001	5,552	-265	-249	-1,780	3,258	2.3%
2002	8,835	-1,899	-292	-1,315	5,329	1.7%
2003	5,785	-2,794	-270	-1,457	1,264	2.5%
2004	5,174	-6,254	-287	-1,572	-2,939	N/A

In March 2002, the EU members reached an agreement in Barcelona, which implies that each country will have interconnection capacity of at least 10% of total installed capacity by 2005. In accordance with this, the power interconnections between France and Spain will have to increase to over 3,500 MW.

The Spanish National Reform Plan recently approved aims to improve this interconnection capacity. In fact, one of its objectives is to "expand connections on the power grid until the equivalent of 10% of 2005's power production capacity is reached by 2010". One of the measures also included in that plan specifically states:

- "Expand connections on the power grid with France and Portugal, increasing commercial capacity and improving coverage of demand in areas with insufficient generation".

Slow Progress for Applications for New Capacity

New capacity additions are no longer subject to central energy sector planning but must comply with relevant authorization and permitting processes for industrial facilities of this type.

In recent years, considerable interest has been shown in building new generation capacity in Spain, given the falling reserve margin and the limited interconnectivity with neighboring markets. As has been the case in other liberalized markets, almost all-new capacity applications have been for CCGT plants and renewable energies, mainly wind.

However, the number of new players building new capacity in Spain remains limited largely due to the fact that independents are not really able to compete on sole generation source basis and without a balanced generation mix in order to manage the different weather conditions (ie., a very good hydro year might adversely affect a player with only CCGTs in its portfolio).

Clear Market Structure

The Spanish market is characterized by a stable industry structure with, after Viesgo sale by ENDESA (effective in 2002), five vertically integrated operators and a well-established competitive environment.

- **Endesa** is the largest producer and distributor of electricity in Spain. The company was reorganized into five divisions in 1999, and all regional distribution and generation companies now come under the umbrella of Endesa Distribución and Endesa Generación, respectively. There are three other divisions in the restructured company, Endesa Internacional, Endesa Diversificación and Endesa Energía. The first two deal, respectively, with international activities and non-core business, such as telecommunications, gas and water. The last was set up to manage Endesa's marketing and supply strategies for eligible customers.
- **Iberdrola** concentrates on the generation and distribution of electricity throughout mainland Spain, where it has a gross installed generation capacity of 22,547 megawatts (MW). Total 2004 gross production was 68,422 GWh, representing a 30.1% share of Spanish generation. In Spain, its core market, Iberdrola ranks second in the regulated electricity distribution market with a 40% share. The Group also holds a 38.1% market share in the deregulated electricity business (retailing). In addition, Iberdrola is Spain's leader in renewable energy, providing it with a significant competitive advantage, as renewable energy is a key feature of public European Union and Spanish energy policy.
- **Unión Fenosa** produces and distributes electricity. It is the third largest generator of electricity in the Spanish market. Around 50% of the Company's installed capacity production is thermal, 33% hydro, and much of the remainder is nuclear. Unión Fenosa has adopted a multi-utility approach. The company is diversifying into the telecommunications and water businesses as well as the Internet and financial services, leveraging on its customer base of 8 mm customers. Recently ACS has become its largest shareholder after acquiring a 22% stake in the company from Santander Central Hispano (Spain's largest bank).
- **Hidrocantábrico** is the fourth largest utility in the Spanish market. The Company operates principally in the province of Asturias in Northern Spain. Hidrocantábrico was established in 1919 as an electricity generation, transmission and distribution company. Today, it is a diversified energy company involved in all areas of the energy chain and is controlled by Electricidade de Portugal (96% stake).
Hidrocantábrico operates through seven business units:
 - Hidrocantábrico Distribución Eléctrica and Gas de Asturias: deal, respectively, with electricity and natural gas distribution;

- Hidrocantábrico Generación: responsible for electricity generation;
- Hidrocantábrico Energía retails electricity and gas and provides other energy services to eligible customers, and also manages HidroCantábrico's active marketing policy, which has increased activity over the recent years;
- Sinae Energía y Medioambiente: involved in renewable energies including wind farms and waste-to-energy projects. It is also responsible for the engineering and construction of plants and in the promotion and collaboration of renewable energy projects and cogeneration; and
- Telecable and Retecal are operators of integral telecommunications optic-fibre cable.

- In January 2002, ENEL (the Italian electricity group) completed the purchase of Grupo Viesgo from Endesa after having received the authorizations from both Spanish and EU authorities. The price paid by ENEL was €1.87 billion for 100% of the company's share capital, in addition to which €277 million of debt and provisions were assumed by the buyer. This transaction implies the entry of a new operator (the fifth in terms of installed capacity) into the Spanish market, with distribution assets in the regions of Asturias, Cantabria, Castilla y León and Galicia, and generation assets in Andalucía, Aragón, Asturias, Cantabria, Castilla-La Mancha, Castilla y León and Catalonia. This contributes positively and effectively to a higher degree of competition in the market.

€ million	Iberdrola SA	Endesa SA	Union Fenosa SA

Well-Established Regulatory Framework

Historically, the "Stable Legal Framework" of 1987 governed the Spanish electricity industry. Under this system, the combined overall remuneration of the participants in each year was intended to cover the total projected costs of the industry. This was achieved through a system of aggregated fixed and variable standard costs. Any differences between projected and actual costs and demand for each year were adjusted in subsequent years.

The Electricity Law of 1994 was created the Comisión Nacional del Sistema Eléctrico ("CNSE") or Commission for the National Electric System) and now absorbed into the Comisión Nacional de la Energía or Commission for the National Energy ("CNE"). The CNSE was responsible for the effective competition in energy systems, and objectivity and transparency in their functioning. The Ministry of Industry and Energy retained

responsibility for the management of the long-term planning process, including authorization of new investments, as well as ultimately determining overall allowable returns by the utilities. The Electricity Law of 1994 was the first step to increase transparency and the degree of deregulation of the electric system and thereby reducing tariffs whilst ensuring a maintained quality of service.

Article 37 of this Law provided for third party access to both transmission and distribution grids. CNSE was empowered to resolve any disputes or questions arising from negotiations to secure such access.

In December 1996, the Ministry of Industry and the most important Spanish electric utilities at that time (Iberdrola, Endesa, Unión Eléctrica Fenosa, FECSA, Sevillana and HC) reached an agreement (the December 1996 Protocol). This agreement set the basis to gradually transform the highly regulated Spanish electricity sector into a free market for generation and supply, whilst preserving the natural monopoly of electricity transmission and distribution.

On 27th November 1997, the Law 54/1997 (the "Electricity Sector Law") was approved, representing the starting point for the deregulation of the Spanish electricity sector. Key aspects implemented by the Electricity Sector Law are:

- The dispatching and generation of electricity is based on a competitive bidding process;
- Acceptance of new generators with no entry barriers;
- Gradual deregulation of electricity generation sources, except for domestic coal, which is subject to the 1998-2005 Coal Plan; and
- Separation of liberalized (generation and supply) and regulated activities (transmission and distribution). This is known as 'unbundling'.
- A transitory system (CTCs, Competition Transition Costs commonly known also as "stranded costs") was established to compensate electric companies for the transition from a highly regulated market to free competition.

The New Electricity Sector Law established the requirement to establish two new operating entities, a Market Operator, Compañía Operadora del Mercado Español de Electricidad, S.A. (OMEL), and a System Operator, Red Eléctrica de España, S.A. (REE):

- **OMEL** is the Market Operator and manages the electricity pool, whilst simultaneously operating a day-ahead spot market and an intra-day market for adjustments. This entity supervises and operates the pool's bidding process and settles all the commercial transactions connected with the bidding process. OMEL was originally set up as a subsidiary of REE, but was subsequently floated separately. Today, OMEL is a private company on which a single shareholder cannot hold a stake over 10%. Additionally, the aggregate direct/indirect stake owned by companies operating in the Spanish electricity sector must not exceed 40%.

- REE is the System Operator and operates the system used for the transmission of electricity. REE owns a large majority of the high voltage grid assets and is responsible for real-time operation of the network. As such, REE is responsible for overseeing the technical aspects related to the operation of the electricity system, along with the continuity and safety of the electricity supply and the co-ordination of the generation and transmission system. Due to the nature of its activity, the System Operator works in co-operation with the Market Operator. REE has the same ownership limitations as OMEL. In addition to this limitation, the Spanish Government, through SEPI (Sociedad Estatal de Participaciones Industriales), was required to hold at least a 25% stake in REE until December 31, 2003, thereafter this percentage should be reduced to at least 10%. The major Spanish utilities own 3% of REE and 35% is free float. According to a Royal Decree Law approved in February 2005, the major Spanish Utilities will be required to lower their stake in REE to 1% before 1 January 2008.

The gradual deregulation of supply along with the establishment of the Pool is one of the most relevant aspects of the Electricity Sector Law. Supply deregulation is based on the freedom of end consumers to choose the electric supplier. Since 1 January 2003 all the electricity consumers are eligible, defined as those with the right to choose electricity supplier.

On 7th October 1998, the Law 34/1998 (The Hydrocarbons Law) was approved. Among other things, this law established the CNE ("Comisión Nacional de la Energía"), replacing the former CNSE ("Comisión Nacional del Sistema Eléctrico"). The CNE has the mission of guaranteeing effective competition and transparency of the Spanish energy sector, including electricity, natural gas and other forms of energy.

REGULATION

Energy planning

Spanish National Reform Plan

Spain is now under the process of a regulatory review. Based on the 1997 Electricity Law, the Government has approved on 13 October 2005 the Spanish National Reform Plan which lays the foundations for its policy in the Electricity and Gas sectors. The principles of this Plan concerning the Energy sector are outlined below:

"The consolidation of deregulation in the various sub-sectors and the context of strong growth in demand require a transparent regulatory framework that guarantees energy supplies, new investments, non-discriminatory access to the grid for third parties, the gradual reduction of entrance barriers for new agents, and a pricing system based on market mechanisms, internalising environmental costs".

"In this regard, limits have been placed on cross participations in the capital of the main companies in the sector and measures have been approved to eliminate market distortion, helping promote more effective competition. More specifically, in the case of the electricity sector, various topics have been addressed such as

competition transition charges, the transparency of market information and the internalisation of environmental costs for power generation into electricity prices. As regards natural gas, various measures have been approved with a view to guaranteeing the security of supplies and making it easier to change suppliers”.

“These reforms are in line with a sustainable development strategy, supplemented by actions that will make it possible to meet the Kyoto Protocol and Water Directive commitments. In concrete terms, the 2005-2007 Action Plan, the Energy Efficiency and Savings Strategy (E4) and the 2005-2010 Renewable Energy Plan have recently been approved, aiming to improve the Spain's energy efficiency and reduce its dependency on energy imports”.

Objectives

- Expand connections on the power grid until the equivalent of 10% of 2005's power production capacity is reached by 2010.
- Provide incentives for and optimise the development of new energy infrastructures.
- Improve coordination between power systems in order to ensure that demand is met.

Measures

- Electricity
 - Reform the wholesale power generation market in order to improve conditions for effective competition and guarantee pricing based on competitive mechanisms.
 - Reform the mechanism for collecting competition transition charges (CTCs) in such a way that it does not distort market pricing.
 - Develop a new guaranteed capacity payment system that ensures the availability of generation plants and new investment to cover growth in demand in order to safeguard supplies over the medium term.
 - Expand connections on the power grid with France and Portugal, increasing commercial capacity and improving coverage of demand in areas with insufficient generation.
 - Prepare a new transparent and objective method for setting electricity prices that takes into account all recognised costs, enables the development of commercial activities and promotes efficiency in the consumption, production and supply of electricity.
 - Increase independence and transparency in the management of distribution networks in order to avoid any discriminatory situations for access to these infrastructures by third parties.
 - Apply the new methodology for electricity distribution compensation developed by the CNE and agreed upon by all agents in the sector, so that each company covers the costs associated with its own network, factoring in the corresponding demand, the geographic characteristics of the distribution areas, the percentages of losses on its grids, and the quality of supplies and efficiency in the development of grids.

- Develop information and awareness-building programmes to communicate to the general public on the need to build power lines and revise administrative procedures to facilitate their construction.
- Natural gas
 - Phase out tariffs for large consumers of natural gas over the medium term when there is effective commercial competition.
 - Improve the coordination mechanisms for Technical Gas System Management with Electricity System Operations.
 - Develop the Technical Gas System Management Standards in order to improve management procedures, gas supplies and production, introducing the mechanisms required to better guarantee supplies and ensure that the system is managed more effectively.
 - Increase independence and transparency in the management of distribution networks in order to avoid any discriminatory situations for access to these infrastructures by third parties.
 - Review the fee structure and methodology in order to resolve congested situations and improve efficiency in the use of networks, creating a constant fee, increase the efficiency of planning, building and operating mechanisms for transport networks.
 - Review compensation for the distribution of natural gas in order to ensure the quality of supplies and the effective rollout of new infrastructures.
 - Develop secondary gas markets and reserve capacity for gas facilities.
 - Implement further reforms to eliminate obstacles to changing suppliers and continue driving deregulation of the retail gas market.
 - Structure international transit fees.

Renewable Energies Plan 2005-2010

On 26 August, the Council of Ministers approved the Renewable Energies Plan for Spain 2005-2010. This Plan reviews the objectives defined in the Promotion Plan of 1999 and in the 2002 Energy Planning Document and proposes a number of measures to achieve them.

The general objectives in that Plan are the following:

- Reduce excessive dependence on energy imports (80%).
- Meeting environmental commitments.
- That renewable energies cover:
 - 12.1% of the total primary energy consumption in 2010 (this objective was already part of the previous Plan)
 - 29.4% of the gross consumption of electricity production (Directive 2001/77/EC).
 - 5.75% of bio fuels in transportation (Directive 2003/30/EC).

According to this new Plan to Promote Renewable Energies, the growth in these technologies will not be sufficient to reach the objectives defined in the Sector Law and in the Renewables Directive (12.1% of primary energy and 29.4% of electricity from

renewable sources in 2010, respectively). This is basically due to two factors: 1) electricity demand has increased more than was forecasted and 2) some technologies, such as biomass, remain underdeveloped.

The table below presents the new objectives, by technology, defined in the new Promotion Plan and compares with those defined in the 2002 Energy Planning Document.

Sources	2002 Planning Document	Plan 2005-2010	Difference
Hydroelectric (10-50 MW)	3,151	3,257	+106
Hydroelectric (<10 MW)	2,380	2,199	-181
Biomass	3,098	2,039	-1,059
Biomass plants	3,098	1,317	-1,781
Co-combustion	0	722	+722
SUW	262	189	-73
Wind	13,000	20,155	+7,155
Solar photovoltaic	144	400	+256
Biogas	78	235	+157
Solar thermoelectric	200	500	+300
TOTAL	22,313	28,927	+6,661

There are basically three key aspects to the Plan:

- The wind energy objectives are being increased significantly, from 13,000 MW in 2011 to more than 20,000 MW in 2010. This involves major support to Iberdrola's strategy, to which it firmly committed in its Strategic Plan for developing wind energy.
- Biomass objectives are being adjusted (reduced) from 3,098 MW to 2,039 MW in 2010, of which 1,317 MW is from biomass plants and 722 MW is from co-combustion.
- The solar technologies objectives are being raised (from 200 to 500 MW thermo-solar and from 144 to 400 MW photovoltaic).

In addition, it should be emphasized that the premiums for the remuneration of renewable energies foreseen in RD 436/2004 approved in March 2004 are maintained; only rising for biomass and setting for the first time those for co-combustion.

2005-2011 National Energy Planning

In late October, the Ministry of Industry also published the 2005-2011 Planning for the Electricity and Gas Sectors. This Plan reviews the objectives defined in the previous 2002 Energy Planning. The aforementioned 2005-2010 Renewable Energies Plan has been included in this new document.

The most significant modification in the electricity sector refers to the substantial increase in the target of installed capacity for CCGTs by 2011: a minimum of 24,000 MW vs. 14,800 Mw contemplated in the 2002 Plan.

This means that the Spanish energy mix by 2011 will be marked by the higher contribution of gas and renewable energies.

Competitive Wholesale Market for generation ('Pool')

The Electricity Sector Law established the conditions for a wholesale electricity market based on a Pool system co-coordinated by the Market Operator in which generators compete on price for the electricity to be dispatched. The operation of the Pool is further regulated by the Royal Decree 2019/1997. The Pool has been operating since 1 January 1998.

Generation companies are required to bid into the Pool their available output and required price for all their plants with an installed capacity of over 50 MW and all their generating units, which operated under the ordinary regime under the previous regulation ("marco legal estable" or "MLE").

Both plant output and prices are determined according to the system marginal price model, which is co-coordinated by the Market Operator. OMEL receives plant bids and ranks each plant in an ascending cost order until forecast hourly demand for the following day is met with the aim of matching demand with the least-cost combination of generation. All plants that are scheduled to run receive the Pool price, which is established hourly as the price bid by the last and therefore most expensive plant to be called into service in that hour.

Given the differences that may arise between forecast and actual demand of electricity and technical constraints that may prevent an economic dispatch of generation, the Pool bidding and dispatching process is made up of four separate, consecutive and interrelated processes:

- o The Daily Market ("Mercado Diario") functions as a "day-ahead market" in which forecast electricity demand for the following day is matched by OMEL with the lowest-cost combination of available generation. OMEL draws up an Economic Dispatch schedule based on the bids received from each plant and notifies all market participants.

- The market for "Management of Technical Restrictions" is co-coordinated with REE to take into account changes that need to be made to the Economic Dispatch schedule due to limitations in the transmission network and the need to guarantee supply. On the basis of such constraints and the need to schedule more expensive plants, a Technical Dispatch schedule is drawn up and notified to market participants.
- The Intra-day Market ("Mercado Intradía") is a balancing market, managed by OMEL, where additional supply is negotiated to cover shortfalls between forecast demand of the Daily Market and actual demand. The Intra-day Market began operations on 1 April 1998 and currently consists of six sessions.
- A market for "Ancillary Services", managed by REE, exists to provide additional generation services, such as "Secondary, Tertiary reserve", "Deviation management mechanism" and, in the immediate future, reactive capacity requirements.

The real-time operation of the system is managed by REE, according to a final schedule and using the complementary services that have been contracted.

As aforementioned, the Spanish National Reform Plan also aims to improve the current pool market:

- "Reform the wholesale power generation market in order to improve conditions for effective competition and guarantee pricing based on competitive mechanisms".

Pool Prices/ Ancillary Services/ Capacity Payments

In addition to the system marginal price derived from the Daily Market, the pool price includes additional cost elements, which reflect the following:

- Costs of the units that are called into service through the Market for Technical Restrictions. Such plants are remunerated at their individual bid price, but are supposed to limit their bids to actual costs incurred (including start-up costs) during hours in which constraints occur. Consequently, prices in the Market for Technical Restrictions result in a premium over Daily Market prices; and
- Costs of secondary and tertiary reserve requirements, which are established through separate auction processes occurring daily and every quarter of an hour, respectively.

In addition to the pool price, electricity generators are remunerated with a capacity payment. The total amount of this payment is calculated based on a unit charge expressed in kWh terms, which is applied to annual demand (net of sales related to Special Regime, bilateral contracts and imports). This total is then allocated to generation companies on the basis of the contribution of each of their units to the total available generation for the system during each scheduling session.

A future review of the capacity payments is also contemplated in the Spanish National Reform Plan:

- "Develop a new guaranteed capacity payment system that ensures the availability of generation plants and new investment to cover growth in demand in order to safeguard supplies over the medium term".

Electricity Tariffs

After six years of consecutive decreases in the tariff, the Government stated in 2001 for the first time that the new regulation will allow for tariff increases up to 2% per annum.

On 27 December 2002, a new tariff methodology was approved that ended the period of continuous tariff reductions. The most notable aspects of this new methodology are:

- a) A new stable, transparent and predictable regulation:**
In the first place, the new regulatory framework reasonably responds to the principal aspiration of the sector, given that it calls for stability and permanence.
- b) Tariff increases: +1.4% base through 2010.**
The Government thus demonstrating the need to send positive signals to the players in the sector in the face of the major investment process that had already begun, in which IBERDROLA is playing a major role.
- c) Tariff revision clauses:**
