**SUPPL**

Lady's and Gentleman:

We are pleased to announce that, on 13 February, 2007, we are going to be transferred and start our work at the West Building of the "Tokyo Midtown," Tokyo's newly-developed urban complex in the Roppongi district of Tokyo.

The head office functions of the three companies, FUJIFILM Holdings, FUJIFILM Corporation, and Fuji Xerox will be consolidated at the new facility to reinforce more synergistic benefits and to strengthen the Group Management structure.

Our new address and contact numbers are as follows;

ADDRESS: Midtown West, 7-3, Akasaka 9-chome  
Minato-ku, Tokyo 107-0052, Japan

TEL: 81-3-6271-1111 (Operator)  
81-3-6271-1070 (IR Office)

FAX: 81-3- 6271-1146 (IR Office)

Should you have any questions regarding the above, please do not hesitate to contact our IR office.

We thank you for your understanding in this matter and look forward to a continued cooperative business relationship.

With-best regards,

FUJIFILM Holdings Corporation

Junji Okada  
General Manager  
IR Office,  
Corporate Planning Div.

Re: FUJIFILM Holdings Corporation- 12g3-2(b) exemption

Ladies and Gentlemen:

In connection with our exemption as a foreign private issuer pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934, we hereby furnish the Securities and Exchange Commission with the following information required by Rule 12g3-2(b):

- (a) Financial Results for the Nine months ended December 31, 2006
- (b) Company's press release dated on January 9, 2007
- (c) Company's press release dated on January 11, 2007

Very truly yours,

FUJI FILM Holdings Corporation

Junji Okada  
General Manager  
IR Office,  
Corporate Planning Div.

Enclosure

# 1. Operating Results

## **(1) An overview of consolidated operating results for the nine months ended December 31, 2006**

Consolidated revenue for the nine months of the fiscal year ending March 31, 2007 (April 1, 2006 to December 31, 2006) amounted to ¥2,068.5 billion, an increase of 4.2% over the same period of the previous fiscal year. Although sales of the Imaging Solutions segment declined, principally because of lower sales of color films and digital cameras, sales of the Information Solutions segment rose substantially, especially in the medical products and services, computer-to-plate (CTP) plate businesses and flat panel display materials. In addition, sales of the Document Solutions segment rose as sales of digital multifunction devices expanded, principally in overseas markets. Another factor contributing to growth in revenue was the weakening of the yen against the U.S. dollar and the euro, compared with the same period of the previous fiscal year.

During the nine months under review, sales in Japan amounted to ¥960.2 billion, a decline of 1.7% year on year, and overseas sales were ¥1,108.3 billion, an increase of 9.8% year on year. Regarding profits, the increases in prices of principal raw materials, especially of silver and aluminum, pushed costs upward, and the implementation of concentrated structural reform measures, from the previous fiscal year into the period under review, resulted in the recording of the related charges. However, the beneficial effect of improvement in the gross profit because of increases in the unit volume of sales, reductions in fixed costs, and the strategic allocation of expenditures enabled Fujifilm to offset the increases in costs mentioned previously, and operating income amounted to ¥121.5 billion, an increase of 19.5% year on year. In the period under review, income before income taxes rose to ¥112.3 billion, 2.2% above the same period of the previous fiscal year, despite recognition of the decline in value of investment securities as part of structural reforms. Net income amounted to ¥48.4 billion, 19.6% lower than for the same period a year earlier.

The effective currency exchange rates for the U.S. dollar and the euro against the yen during the nine months under review were ¥116 and ¥147, respectively.

## **(2) An overview of consolidated operating results for the third quarter ended December 31, 2006**

Consolidated revenue for the third quarter of the fiscal year ending March 31, 2007 (October 1, 2006 to December 31, 2006) rose to ¥716.5 billion, 5.1% higher than for the same quarter of the previous fiscal year. While sales of the Imaging Solutions segment declined, principally because of lower sales of color films and digital cameras, sales of the Information Solutions segment rose substantially, especially in the medical products and services, CTP plate businesses and flat panel display materials. In addition, sales of the Document Solutions segment rose as sales of digital multifunction devices expanded, principally in overseas markets. Another factor contributing to growth in revenue was the weakening of the yen against the euro, compared with the previous year.

During the third quarter, sales in Japan amounted to ¥325.7 billion a decline of 1.3% year on year, while overseas sales were ¥390.8 billion, an increase of 11.1% year on year. Regarding profits, the continued high prices of principal raw materials, especially of silver and aluminum, pushed costs upward. However, the beneficial effect of improvement in the gross profit because of increases in the unit volume of sales and reductions in fixed costs as well as the more efficient use of expenditures enabled Fujifilm to offset the increases in costs mentioned previously, and operating income amounted to ¥70.7 billion, a substantial increase of 69.7%

year on year. Income before income taxes rose to ¥55.6 billion, 20.0% above the same quarter of the previous fiscal year, despite the recognition of the decline in value of investment securities as part of structural reforms. Net income amounted to ¥24.6 billion, 9.2% lower than for the same quarter of a year earlier.

The effective currency exchange rates for the U.S. dollar and the euro against the yen during the third quarter were ¥118 and ¥151, respectively.

In its structural reforms during the current fiscal year, Fujifilm is implementing a reorganization of its business systems in the Imaging Solutions segment, including a realignment of its global tripolar production system for photosensitive materials. In addition, along with the realignment in production operations, the Company is working to reduce the number of personnel in its manufacturing divisions and moving forward with measures to create a slimmer, optimal work force in all divisions, including R&D, production, marketing and distribution, and photoprocessing laboratory. The costs incurred in connection with structural reforms in the third quarter amounted to ¥24.2 billion, including ¥21.6 billion in the decline in value of investment securities that were reported within other expenses. For the nine months through the end of the third quarter, these structural reform charges came to a total of ¥66.2 billion, and the impact on operating income was ¥44.6 billion.

### **Imaging Solutions**

Consolidated revenue of the Imaging Solutions segment in the third quarter of the fiscal year ending March 31, 2007, was ¥170.9 billion, down 12.3% year on year. The principal factors accounting for this decline were lower sales of color films and film development and print services of photoprocessing laboratories and a drop in digital camera sales, owing to the intensification of price competition.

Amid declining sales of color films due to the increasing popularity of digital cameras, Fujifilm has begun structural reforms designed to keep the scale of its film operations in line with the scale of demand and thereby maintain the stable profitability of these operations. These structural reform initiatives advanced steadily during the third quarter under review, as during the interim period.

Color paper sales increased, reflecting the rise in Fujifilm's market share in major countries and continued growth in digital camera prints. Regarding digital cameras, in addition to sales of high sensitivity and high image quality digital cameras, Fujifilm announced the FinePix Z5fd, with a slim body, and the FinePix F31fd compact digital camera, featuring the fastest\* Face Detection technology in the world, and both products got off to a good start with strong sales. However, fierce price competition is continuing, principally in the entry-level market. Fujifilm is working to further improve the profitability of its digital camera operations through its key product strategy, which is designed to promote the sales of products with special features, such as high levels of sensitivity and image quality as well as Face Detection technology, and through such measures as shifting manufacturing operations to China and strengthening supply-chain management. In the photofinishing equipment field, sales are declining because major customers have already installed Fujifilm minilabs. However, Fujifilm is moving ahead with efforts to install print ordering terminals in small and medium-scale print shops and expand sales through its alliance with Noritsu Koki Co., Ltd. In the color films area, as the size of the market continues to decrease, the withdrawal of competing companies from the market has enabled Fujifilm to increase its market share.

\* As of a November 2006 Fujifilm survey

## Information Solutions

Consolidated revenue of the Information Solutions segment in the third quarter of the fiscal year ending March 31, 2007, was ¥265.1 billion, an increase of 19.5% over the same quarter of the previous fiscal year. Principal factors supporting this increase included expansion in sales of endoscopes, CTP plates and flat panel display materials and the contribution of subsidiaries newly consolidated in the fourth quarter of the previous fiscal year and the third quarter of the current fiscal year. These subsidiaries were FUJIFILM IMAGING COLORANTS LIMITED, which has developed a favorable position in ink materials for ink-jet printers, and Daiichi Radioisotope Laboratories, Ltd., which is engaged in radiopharmaceutical business (name to be changed to FUJIFILM RI Pharma Co., Ltd. on April 1, 2007).

In the medical imaging business, sales of such equipment and materials as FCR (Fuji Computed Radiography) and dry films expanded. In addition, sales of SYNAPSE, a medical-use picture archiving and communications system, posted steady growth. Among endoscope products, domestic and overseas customers gave high evaluations to Fujifilm's lineup of distinctive products centered on the Transnasal Endoscope, and sales of these products showed marked expansion during the period under review.

In the graphic arts business, the increasing use of CTP products resulted in a decline in sales of graphic arts film, but sales of Fujifilm's CTP system-related products expanded greatly.

In the flat panel display (FPD) materials business, sales of mainstay FUJITAC and WV Film products grew, reflecting the contribution of the increase in production capacity that Fujifilm undertook in response to steady demand for these products.

Regarding recording media, in the mid-range data storage media market, sales of Fujifilm's mainstay LTO Ultrium\* 3 increased amid price competition. In the high-end enterprise data storage product market, sales of data cartridge products for the IBM TotalStorage® Enterprise Tape Drive 3592 increased. In addition, Fujifilm began shipments to IBM of the world's first 700GB IBM System Storage 3592 Extended Data high-capacity tape media for enterprise-grade system and is working to achieve further business expansion in this field.

Regarding Fujifilm's office and industrial operations, in the field of optical lens products, Fujifilm's lens units for cellphones with cameras were highly evaluated in the market for their compactness, lightness, high image quality, and autofocus and zoom capabilities, resulting in expansion in sales.

\* LTO Ultrium is a registered trademark of IBM, Hewlett-Packard, and Quantum in the United States and other countries.

\* TotalStorage is a trademark of IBM in the U.S., other countries, or both.

## **Document Solutions**

Consolidated revenue of the Document Solutions segment in the third quarter of the fiscal year ending March 31, 2007, was ¥280.5 billion, an increase of 5.8% over the same quarter of the previous fiscal year. Driving this growth was exports of digital color multifunction devices to North America and Europe and strong sales in the Asia region including China.

In the Office Products business, the Company have strengthened its domestic lineup of multifunction devices through the introduction of the ApeosPort-II Series that responds to the rising need for improved document security and integrated document management that has followed the implementation of e-Document Law and Personal Information Protection Act in Japan. Moreover, at the same time, the Company has responded to the need for greater diversity in functions by introducing the medium- to high-speed DocuCentre-II Series of color multifunction devices that respond to requirements for handling information in electronic form and linking into network environments. Overseas, exports to North America and Europe and sales of color devices to the Asia region including China have remained strong, and the number of units sold has risen markedly.

In the Office Printers business, although unit sales declined due to inventory adjustments by domestic OEM customers, sales of its own brand products expanded steadily as the Company introduced the low-priced, space-saving, A3 capable color laser printer, the DocuPrint C3050, which is silent during waiting time due to fanless system.

In the Production Services business, the Company strengthened its product lineup by introducing the Nuvera 120 Digital Production System, a monochrome on-demand publishing system, featuring high image quality and high resolution, for the digital printing market that is forecast to expand in the years ahead. In addition, in the Asia region including China, a broad range of products posted expansion in unit sales, including both color and monochrome publishing systems as well as low- to high-speed units.

In the Office Services business, sales of electronic household administration systems declined, reflecting a high level of deliveries during the same period of the previous year, owing to a spike in demand. However, the document outsourcing business reported continued expansion. Also, as strengthening internal control systems has become an important management issue in response to the Corporate Law of Japan and the legal requirements related to internal control systems (i.e., J-SOX), the Company has introduced the Apeos PEMaster 1.2 software to support internal control systems.

## **VISION75 Medium-Term Management Plan**

### **Building New Growth Strategies**

In the flat panel display materials business, Fujifilm is expecting further growth in demand for its mainstay products FUJITAC and WV Film and is therefore aggressively expanding production capacity. During the third quarter under review, the first FUJITAC production line of FUJIFILM Kyushu Co., Ltd went into operation in October. FUJIFILM Kyushu will implement further increases in production capacity as the core production base for FUJITAC, while placing emphasis on working to build symbiotic ties with the local community by working to contribute to the promotion of the culture of the region through participation in culture-related activities and to stress environmental preservation through such activities as endeavoring to reduce its usage of well water and lower CO<sub>2</sub> emissions.

In addition, Fujifilm has made the decision to build a new plant with R&D capabilities for flat panel display materials at the Kanagawa Factory Ashigara Site (scheduled to go into operation in April 2008). In response to the trend toward ever larger LCDs, the new plant will work to develop and manufacture ultrawide FUJITAC, which permits the effective production of materials for large LCD televisions of over 40 inches.

In the medical imaging business, through one of its U.S. sales subsidiaries, FUJIFILM Medical Systems USA, Inc., Fujifilm purchased all shares of Problem Solving Concepts, Inc., a U.S. company. Problem Solving Concepts developed and sells its original Cardiology-PACS medical imaging information system, which is used to facilitate the diagnosis and treatment of heart disease. Through this acquisition, Fujifilm will now be able to integrate Cardiology-PACS with its SYNAPSE system, thus making it possible to advance the SYNAPSE system to become a diagnostic imaging information system capable of handling a broader range of medical imaging. Fujifilm will introduce the integrated SYNAPSE to cardiology departments and facilities worldwide that require image information sharing solutions between radiology and cardiology departments.

In the graphic arts business, through FUJIFILM Australia Pty. Ltd. (FFAU) and FUJIFILM NZ Ltd. (FFNZ), which are Fujifilm's sales subsidiaries in Oceania, Fujifilm acquired the equipment and materials sales and technical support business of graphic arts system distributor, Graphic Systems Australasia Pty Ltd. Following this acquisition, FFAU and FFNZ have begun direct sales. As a result of the establishment of this direct sales system, it has become possible to further the development of operations under a unified, fast-moving global strategy in the graphic arts business in Oceania. By undertaking marketing and sales activities that respond closely to the diverse needs of the market, Fujifilm will be well positioned to further expand its graphic arts business in Oceania.

#### **Implementing Comprehensive Structural Reforms at All Management Levels**

Among its structural reform initiatives from an overall management perspective, Fujifilm has been moving forward with reforms in the Imaging Solutions segment, focusing on the color films and other photosensitive materials businesses and digital cameras business in the electronic imaging business. These structural reforms are proceeding ahead of schedule, and completion is expected during the current fiscal year.

#### **Enhancing Consolidated Management**

The FUJIFILM Group ("the Group") shifted to a holding company structure as of October 1, 2006. Under FUJIFILM Holding Corporation, which is now responsible for the overall management of the Group, the Group is developing its operations through a new Group management structure centered on FUJIFILM Corporation, which is responsible for imaging solutions and information solutions operations, and Fuji Xerox Co., Ltd., which is responsible for document solutions operations. In February 2007, all three of these core Group companies will move into the Tokyo Midtown West, a newly developed complex in Roppongi, Tokyo. This amalgamation of Group forces is expected to result in expanded strategic collaboration and the realization of specific synergistic benefits. In addition, building on the opportunity that this transition to a new system of organization represents, the Group has begun to implement its "Slim and Strong Drive" (S&S Drive) to realize an even stronger corporate position. Key to this drive will be the implementation of thoroughgoing measures to enhance the efficiency of and prioritize the allocation of selling, general and administrative (SG&A), R&D, manufacturing, and other expenditures in all Group entities. One of the targets of the S&S Drive will be to lower the ratio of SG&A expenses to revenue to the 20% to 25% range by the fiscal year ending March 31, 2010, which will be the final year of VISION75 Medium-Term Management Plan.

### (3) Outlook for the full fiscal year

The structural reforms focusing on the Imaging Solutions segment are proceeding and expected to be completed within the current fiscal year, as scheduled. Expenses related to these reforms, however, are likely to exceed the initially planned amounts because the decline in the value of the yen is raising the yen value of structural reform charges in overseas locations. Moreover, under its S&S Drive, the Company has kicked off thoroughgoing initiatives to improve the efficiency and prioritize the allocation of all expenses, with the aim of creating a strong corporate management position. At present, in its all business segments including the Document Solutions segment, the Company has begun to review its organization as well as work processes and systems from a wide range of perspectives.

These reforms and S&S Drive measures are expected to cause the recording of a total of about ¥110.0 billion in the current fiscal year and the other expenses of ¥21.6 billion out of ¥110.0 billion was recognized as non-operating expenses in the third quarter under review. Considering such positive and negative factors as its favorable performance for the nine months under review and the expenses described above, the Company is revising its estimated performance forecast upward as for the current fiscal year as follows; the consolidated revenue is ¥2,750.0 billion, operating income, ¥110.0 billion, income before income taxes, ¥90.0 billion, and net income, ¥40.0 billion.

The Company intends to complete the structural reforms in its Imaging Solutions segment during the current fiscal year as scheduled and implement a stronger growth strategy. Also, by moving ahead speedily and surely with its S&S Drive, the Company will work to realize the management goals set for the current and subsequent fiscal years under our VISION75 (2006) Medium-Term Management Plan.

#### The Consolidated Forecast

(Millions of yen)

	Revenue	Operating income	Income before income taxes	Net income

### Daiichi Radioisotope Laboratories announces New Company Name

January 9, 2007

**D**aiichi Radioisotope Laboratories, Ltd. (DRL) of FUJIFILM group will be renamed FUJIFILM RI Pharma Co., Ltd., effective as of April 1, 2007.

The new company name indicates the company's identity as a member of FUJIFILM group and its business field of radiopharmaceuticals.

DRL took a fresh start in October last year as a wholly owned subsidiary of FUJIFILM Corporation. With this new company name, the company will further advance the fusion of DRL's expertise on radiopharmaceutical technology and FUJIFILM group's broad technology and aim to benefit nuclear medicine. Also, from a standpoint of a company specialized in radiopharmaceutical products, the company will play an important role in the expansion of the medical business, which FUJIFILM group regards as one of the most important fields.

## News Releases

FUJIFILM Acquires Problem Solving Concepts, Inc.,  
a Provider of Medical Imaging Information Systems for Cardiology  
and expands its medical imaging business.

January 11, 2007

**F**UJIFILM Corporation (President and CEO: Shigetaka Komori; hereinafter referred to as “Fujifilm”) has acquired all shares of Problem Solving Concepts Inc. (head office: Indianapolis, Indiana; hereafter, “ProSolv”) through its US sales subsidiary FUJIFILM Medical Systems USA, Inc. ProSolv, a provider of medical imaging information systems for cardiology, will become a wholly-owned subsidiary of Fujifilm.

Since its formation, ProSolv has steadily accumulated an impressive body of advanced software technologies, and since 2000 has marketed its unique Cardiology-PACS (Picture Archiving and Communications System), a medical imaging information system for the circulatory system that is primarily used to facilitate the diagnosis of heart disease and other circulatory disorders. The ProSolv Cardiology-PACS is highly regarded for its customizable and comprehensive reporting solutions, along with other advanced functions necessary for diagnosis of heart disease and other circulatory disorders, including dynamic image displays, electrocardiogram synchronization and quantitative analysis capabilities. The ProSolv Cardiology-PACS has been introduced at approximately 350 sites in the U.S. and other parts of the world.

Under the corporate philosophy of using leading-edge,

of people worldwide”, Fujifilm has globally expanded its medical imaging business, which has become one of its core businesses. Fujifilm has earned global recognition for developing the digital x-ray imaging diagnostic system FCR (Fuji Computed Radiography) in 1981, and subsequently its Web-integrated PACS, SYNAPSE network system, to store and process medical imaging information. With the delivery of these products, Fujifilm has been contributing to improvements in the quality and efficiency of medical imaging diagnosis.

With the rapid progress of IT in medical fields, demand for PACS installations is growing as it enables unified diagnostic information management, accurate and quick reporting and recording of diagnostic results, and allows doctors in charge of diagnosis and treatment and other medical staff to share this information at any time. Accordingly, cardiovascular departments are now expected to move quickly to incorporate PACS, thus expanding the market. Moreover, large facilities are increasingly required to internally manage and integrate the data of multiple departments, including radiology departments, which handle particularly large quantities of medical images and increasingly need to share their image information with cardiovascular departments. More than 1000 health care facilities around the world have installed SYNAPSE, proving its high quality and reliability. Through the acquisition of ProSolv, Fujifilm will now be able to integrate cardiology-PACS with SYNAPSE, thereby further enhancing the sophisticated functions of its system. Fujifilm will introduce the integrated SYNAPSE to cardiology departments and facilities worldwide that require information sharing solutions between radiology and cardiology departments.

Fujifilm is now making further headway toward new growth strategies that revolve around growing and prospective business fields including medical and life science businesses. The company is considerably strengthening its capital and R&D investments, while enlarging its new businesses through active mergers and acquisitions. The acquisition of ProSolv is one facet of this growth strategy. In keeping with its corporate philosophy, Fujifilm will continue to enhance its

improvements in the quality and efficiency of medical care as well as the health and quality of life of people worldwide.

**<Overview of Problem Solving Concepts Inc.>**

Establishment: December 1989

President and CEO: Thomas Feigenbaum

Location of HQ: Indianapolis, Indiana, U.S.A.

Operations: Development, sales, and maintenance of Cardiology-PACS, a medical imaging information system for cardiovascular departments
