Corporate announcement

Commenting on the results, Jan Callewaert, Founder and CEO of Option said,

"In 2006, Option enjoyed revenue growth of 40.9% from 2005 to EUR279.9 million representing very strong performance for the company. Net earnings for 2006 were EUR35.3 million, an increase of 21.8% compared with last year, reflecting our continuing focus on profitable growth.

While technology delays pushed a substantial volume of year-end data card sales into 2007, Q4 revenues of EUR 63.4 million were still in line with what was a record fourth quarter in 2005. In line with our announcement in January, the data cards have now been successfully certified, shipments are underway and a revised delivery schedule will eliminate the backlog over the coming months.

Notwithstanding reduced deliveries in Q4, Option had record shipments of 1.82 million devices in 2006, up 64% compared with 2005. As a result, Option's global market share improved to 35% from 32% last year based on ABI Research's global market estimate of 5.2 million devices.

Our growing market leadership reflects the investment we have made, and continue to make, in developing close working relationships with our operator partners: our customer list grew from 70 to more than 90 during 2006.

We started 2007 with an unprecedented order book for all our products. In addition, we are at the forefront of a new category of 'finger-top' wirelessly-connected portable multimedia devices that will shortly debut in Japan.

We also continue to diversify our revenue streams both geographically and across product lines. In 2007, we are anticipating a tripling of our revenue from Asia and the U.S. as well as significant growth in our non-data card business.

For 2007, we expect that strong sales in the first half of the year will be followed by further acceleration of the business in the second half. We remain comfortable with our previously stated 2007 revenue guidance of EUR 355 – 375 million."

Total revenues of EUR 63.4 million for the fourth quarter of fiscal year 2006 were in line with the revenues realized in the last quarter of 2005.

Gross Profit

Gross margin in the full year 2006 was 37.4% on total revenues, compared with gross margin of 42.5% in 2005. Costs of goods sold of EUR 175.3 million during 2006 resulted in a gross profit of EUR 104.6 million, an increase of 23.9% compared to EUR 84.4 million in 2005 equivalent period.

Gross margin in Q4 2006 was 32.9% on total revenues, compared to a gross margin of 38.1% of Q4 2005. Excluding one-off adjustments on the stock, the gross margin would have reached 34.5% in Q4 2006.

Operating expenses

During the full year 2006, the operating expenses, including depreciation and amortization charges, were EUR 62.5 million, compared to EUR 45.6 million in 2005.

Thanks to an extended focus on royalty commitments, accounted as variable operating costs, the company obtained improved conditions which had a favourable impact on the sales and marketing expenses at year-end.

The quarterly operating expenses, including depreciation and amortization charges, were EUR 13.8 million for the fourth quarter of 2006, compared to EUR 12.4 million in the fourth quarter of 2005.

EBIT

EBIT increased to EUR 42.1 million or 15.1% on total revenues during the full year 2006 compared to EUR 38.8 million or 19.5% on total revenues in 2005, representing a growth of 8.7%.

The quarterly EBIT amounted to EUR 7.1 million or 11.2% on total revenues compared to EUR 11.9 million or 18.7% during the corresponding period in 2005.

Financial Result

During 2006, Option obtained a positive financial result of EUR 600 thousand. The total exchange rate gains amounted to EUR 881 thousand mainly thanks to USD rates and Option received EUR 1.112 thousand from risk free investments of the available cash.

A total of EUR 1.253 thousand financial discounts were given to customers for cash payments and the other financial costs of EUR 140 thousand were mainly related to financial leases and bank charges.

Net Profit

On April 24th, 2006, the company executed a four for one stock split. Applying the transaction retroactively, earnings per share would have been the following:

Net profit of fiscal year 2006 was EUR 35.3 million, or EUR 0.86 per basic share and EUR 0.86 per diluted share. This compares with a net profit of EUR 29.0 million, or EUR 0.71 per basic share and EUR 0.70 per diluted share in 2005, representing an increase of 21.8%.

Net profit for the fourth quarter of fiscal year 2006 amounted to EUR 6.4 million, or EUR 0.16 per basic share and EUR 0.16 per diluted share. This compares with a net profit of EUR 9.2 million, or EUR 0.22 per basic share and EUR 0.22 per diluted share in Q4 2005.

BALANCE SHEET

Cash decreased from EUR 49.2 million at the end of 2005 to EUR 36.1 million at the end of 2006 mainly due to prepayments related to royalty agreements and an increased need for working capital, mainly related to inventories and trade receivables.

During 2006, inventories increased from EUR 19.5 million to EUR 40.6 million. This increase is explained by an increase of the work in progress stock and components due a production delay in the fourth quarter and the building of finished goods ready for delivery in the beginning of the first quarter of 2007. The level of finished goods at year-end remained low, representing 8.4% of total inventory value.

Trade and other receivables increased from EUR 37.1 million at the end of 2005 to EUR 54.2 million at the end of 2006. This increase was mainly related to the trade receivables.

Fixed assets were EUR 42.1 million (net book value) as at December 31st 2006, an increase of EUR 22.7 million compared to the net book value of EUR 19.4 million at the end of the previous fiscal year. During 2006, the total investments in tangible assets, mainly test equipment, amounted to EUR 6.4 million and the Company invested EUR 27.4 million in intangible assets of which 10.0 million for capitalized development projects and 17.4 million mainly for additional licenses.

Total current liabilities increased from EUR 49.6 million at the end of 2005 to EUR 53.1 million at year-end 2006. This increase is mainly related to the increased trade and other payables (+EUR 2.1 million) and increased income tax payable (+EUR 1.6 million).

The Company generated a deferred tax liability mainly as a result of the capitalization of the commercial development projects under IFRS. In 2006, this deferred tax liability decreased by EUR 569 thousand which was nearly fully related to capitalization of development projects.

On total assets of EUR 176.5 million, the equity amounted to EUR 111.6 million, which results in a solvency ratio of 63.2% at year-end.

Cash flow generated from operating activities during 2006 amounted to EUR 4.9 million compared to EUR 34.8 million in the previous year. The decrease is attributable to the combination of a higher net profit in 2006 and a decrease of the cash generated from operations.
