Gentlemen:

EXEMPTION NUMBER 82-3494

To continue the exemption of our securities from Section 12(g) of the Securities Exchange Act of 1934 ("the Act") and in accordance with Rule 12g-3-2(b)(iii) under the Act, we enclose announcements which information we have sent to The Australian Stock Exchange (Perth) Ltd, the only Stock Exchange on which, to our knowledge, our Company's securities are traded, and which was made public by the Exchange with which we filed.

The information is being furnished under Rule 12g-3-2(b)(iii), with the understanding that such information will not be deemed "filed" with the Securities and Exchange Commission or otherwise subject to the liabilities of Section 18 of the Act, and that neither this letter nor the furnishing of such information shall constitute and admission for any purpose that this Company is subject to the Act.

Yours faithfully,

TED BRINDAL
Company Secretary

ASX ANNOUNCEMENT AND MEDIA RELEASE

DRILLING UPDATE

USA Gulf Coast

Kicker Prospect, Vermillion Parish, South Louisiana (FAR 5%)

Marceaux #1 drilling ahead at 7,654 feet

The Marceaux #1 well spudded on 28 February using Great Wall Drilling Rig 172 and is drilling ahead at 7,654 feet after running 13 and 3/8 inch casing to 4,015 feet.

The well will evaluate the Kicker Prospect located on a 1,017 acre lease block in Vermillion Parish, South Louisiana. The prospect is supported by a combination of subsurface well control and 3D seismic and is located on the northwest flank of the Kaplan field that has produced 300 BCF gas.

The Kicker Prospect is a three-way dip fault closure that will be evaluated by a dry land straight hole test to a planned total depth of 13,200 feet. The well has a planned drilling duration of approximately 42 days.

The test well is prognosed to be approximately 200 feet structurally high to a well that encountered excellent oil and gas shows. There are two objective sands, the Alliance 2 and 3 Sands which are estimated by the operator to have potential in the order of 22.8 BCF gas and 2.2 million barrels of condensate if both sands are successful. The objective sands are productive in several adjacent fault blocks.

Existing infrastructure lies nearby providing for quick sales turnaround in the event of a successful well.

The Operator is Sandalwood Exploration LP of Houston, Texas. In the event of a successful well, FAR's working interest reduces to 3.75% after payout. All other participants are North American entities.

For information on FAR's drilling activities visit our website at www.far.com.au
