3. Reasons of Revision

(1) Consolidated basis

Firstly, trading transactions for FY2006 is ¥20,550 million, increasing ¥450 million (2.2%) compared with the target because of steady housing starts.

Secondly, ordinary income is forecasted to be ¥555 million. This is 135 million (32.1%) ahead of the early announcement due to expansion of trading transaction & improvement of productivity.

Net income is forecasted to be ¥257 million decreasing ¥13 million (-4.8%) compared with the target due to loss of fixed asset sales (-¥17 million), recognition of impairment loss (-¥30 million), and increase of tax reserve which was caused by retirement allowance (-¥34 million).

(2) Non-consolidated basis

Trading transaction volume is ¥20,509 million increasing ¥409 million (2.0%) compared with target. Ordinary income is forecasted to be ¥445 million, ¥65 million ahead from the target. Net income is forecasted to be ¥191 million decreasing ¥19 million (-9.0%) compared with the target.

- * Revised projected figures include forecasts which are based on future precondition, outlook and projection as of April 20, 2007. These revised projected figures can change from actual figures under the influence of economic situations, market trends, currency fluctuations, and any other indefinite factors.
