 RECEIVED

A3 a power of attorney dated 22 November 2006 signed by, Jing Tianliang, a Director of China Coal Energy Company Limited authorizing any other Director(s) in the Company the right to act on his behalf respectively or jointly, including but not limited to approve, sign, deliver, handle, carry out, complete, publish, and announce any or all documents or materials deemed necessary and appropriate. This power of attorney is irrevocable within three months starting from the date of signature, and will become invalid after aforesaid period of time.

A8(a) an acquisition agreement dated 24 March 2005 entered into between Datun Coal Electricity (Group) Limited-Liability Company and Shanghai Datun Energy Resources Co., Ltd. in respect of the electricity power and related assets from the former to the latter for a consideration equal to the net asset value of electricity power and related assets which was valued at RMB699.5685 million as at 31 October 2004 (subject to adjustments).

This acquisition agreement is conditional on ChinaCoal Group's verification of the assessment report, the approval of State-owned Assets Supervision and Administration Commission of the State Council, and the affirmation by both parties' organ of power.

A8(b) a coal export and sales agency framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and ChinaCoal Group in respect of the appointment of ChinalCoal Group as the Company's non-exclusive export and sales agent for its coal products.

Under this framework agreement, agency services provided by ChinaCoal Group shall include export contracts signing, application for export licence and foreign exchange settlement. The Company shall select its overseas customers for its coal products, and determine the price, quantity and other contract provisions. ChinaCoal Group shall consult with the Company before entering into specific provisions of coal export contracts. The Coal Export and Sales Agency Framework Agreement took effect on the date of incorporation of the Company, 22 August 2006, and expires on 31 December 2008, and is subject to renewal.

A8(c) a coal supplies framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and ChinaCoal Group in respect of the exclusive supply of coal products produced from the Mines under Restructuring of the Prospectus by ChinaCoal Group to the Company.

ChinaCoal Group will procure that all coal products produced from the Mines under Restructuring be supplied exclusively to the Company, and has undertaken not to sell any such coal products to any third party. The Company and ChinaCoal Group shall within the last quarter of each calendar year devise a 12-month coal products supply schedule for the next calendar year. The Company (or its relevant subsidiary) shall enter into separate contracts with ChinaCoal Group (or its relevant associate) to set out the specific terms and conditions of supplying coal products according to the principles, and within the parameters, provided for under the Coal Supplies Framework Agreement.

If the coal products supplied by the Mines under Restructuring under the Coal Supplies Framework Agreement cannot satisfy the Company's requirements, including quality or quantity, the Company is entitled to choose the relevant coal products supplied by third parties. The Coal Supplies Framework Agreement took effect on the date of incorporation of the Company, 22 August 2006, and expires on 31 December 2008, and is subject to renewal.

A8(d) an integrated materials and services mutual provision framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and ChinaCoal Group in respect of the mutual provision of materials and services required by the parties' respective operations.

Under the Restructuring, ChinaCoal Group transferred to the Company substantially all assets related to its coal export-related services, comprising its sales and marketing network, port facilities, customer access, tradenames and market experience and knowledge. As ChinaCoal Group is one of only four PRC enterprises authorized to perform coal exports and in respect the quotas allocated to ChinaCoal Group that have not been used by the Company, it continues to provide export quotas and coal export agency services to its other coal export customers. In this connection, ChinaCoal Group has appointed the Company, on an exclusive basis, to provide coal export-related services, such as coal blending, logistics and transportation services, for customers of ChinaCoal Group.

The Company receives revenue for the provision of such coal export-related services, which is at a rate of 0.8% to 1.3% on the FOB price per tonne of coal exported. In contrast with the Coal Export and Sales Agency Framework Agreement, ChinaCoal Group provides export sales agency services such as provision of quotas and agency services for the export of coal by the Company. The Company has to pay for such services, which is at a rate of 0.7% on the FOB price per tonne of exported coal and at a rate of 0.7% on the FOB price plus U.S.$0.5 per tonne of coal exported to the Taiwan market. The Integrated Materials and Services Mutual Provision Framework Agreement took effect on the date of incorporation of the Company, 22 August 2006, and expires on 31 December 2008, and is subject to renewal.

A8(e) a mine construction and design framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and ChinaCoal Group in respect of the provision of coal mine construction services by ChinaGroup and its associates to the Company and the provision of coal mine design services by the Company to ChinaGroup and its associates.

The Company shall provide coal mine design services to support the ancillary businesses of ChinaCoal Group and its associates. ChinaCoal Group and its associates shall provide coal mine construction services to the Company for construction of coal mines and related mining facilities. ChinaCoal Group and its associates shall provide construction services required from the Company in respect of projects the Company undertakes under sub-contracting arrangement with third parties that involve construction of coal mines and related mining facilities. The Mine Construction and Design Framework Agreement took effect on the date of

incorporation, 22 August 2006, and expires on 31 December 2008, and is subject to renewal.

A8(f) a property leasing framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and ChinaCoal Group in respect of the leasing of certain buildings and properties from ChinaCoal Group and its associates to the Company.

The properties leased to the Company (or its relevant subsidiaries) from ChinaCoal Group and its associates comprise 476 properties occupying an aggregate gross floor area of approximately 0.21 million m^2 and are mostly for production and operation uses. The Company is entitled to lease additional properties from ChinaCoal Group during the term of the Property Leasing Agreement. Either party may, at any time before the Property Leasing Framework Agreement expires, by giving not less than 6 months' notice to terminate any lease made pursuant to and comprised under the agreement, and the rentals will accordingly be reduced.

The Property Leasing Framework Agreement is of a term of 10 years commencing on 22 August 2006, being the date of incorporation of the Company, and is subject to renewal. The agreement is of a duration longer than three years as otherwise normally permitted under the connected transactions' regulatory regime of the Hong Kong Listing Rules. This is because 10-year property leases are more desirable for the Company to avoid unnecessary disruption to the Company's operations and to minimize relocation costs. The Company's independent property valuer, Savills, and the Joint Sponsors are also of the view that it is normal business practice for property leasing agreements involving PRC properties to be of such duration.

A8(g) a land use rights leasing framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and ChinaCoal Group in respect of the leasing of certain land use rights from ChinaCoal Group and its associates to the Company. Under the Land Use Rights Leasing Framework Agreement, the land use rights leased to the Company from ChinaCoal Group and its associates comprise land use rights in respect of 93 parcels of land occupying an aggregate gross site area of approximately 2.1 million square metres, mostly for production and operation uses. The Land Use Rights Framework Agreement sets out the particulars of each parcel of land subject to the agreement.

The Land Use Rights Leasing Framework Agreement is of a term of 20 years commencing on 22 August 2006, being the date of incorporation of the Company, and is subject to renewal. The agreement is of a duration longer than three years as otherwise normally permitted under the connected transactions regulatory regime of the Hong Kong Listing Rules. This is because 20-year land use rights leases are more desirable for the Company (or its relevant subsidiaries) to avoid unnecessary disruption to its operations and to minimize relocation costs, especially when the Company has buildings or fixtures constructed on the relevant parcels of land. Savills and the Joint Sponsors are also of the view that it is normal business practice for PRC land use rights leasing agreements to be of such duration. The Company may, at any time before the Land Use Rights Leasing Framework Agreement expires, terminates any lease made pursuant to and comprised under the agreement by giving 2 months' notice, and the rentals payable by the Company will accordingly be reduced.

A8(h) a coal/coke product sales framework agreement dated 8 November 2006 entered into between China Coal Energy Company Limited (the "Company") and Datong Coal Industry Co., Ltd. in respect of the purchase and/or sales of coal/coke products between such Subsidiaries' Substantial Shareholders and the Company.

The Company (or its relevant subsidiary) shall sell to and purchase from the five Subsidiaries' Substantial Shareholders coal and/or coke products as the parties may from time to time mutually agree. The Company (or its relevant subsidiary) shall enter into separate purchase and sales contracts with each of the five Subsidiaries' Substantial Shareholders to set out the specific terms and conditions of sale and purchase of coal and/or coke products according to the principles, and within the parameters, provided for under the Coal/Coke Product Sales Framework Agreements. The Coal/Coke Product Sales Framework Agreements took effect on the date of incorporation of the Company, 22 August 2006, and expires on 31 December 2008, and is subject to renewal.

A8(i) a coal/coke product sales framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and Shanxi Longquan Foundry Coke Company Limited in respect of the purchase and/or sales of coal/coke products between such Subsidiaries' Substantial Shareholder and the Company. The terms of this framework agreement are substantially the same as those with Datong Coal Industry Co., Ltd.

A8(j) a coal/coke product sales framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and Lingshi Jiuxin Coal Preparation Company Limited in respect of the purchase and/or sales of coal/coke products between such Subsidiaries' Substantial Shareholder and the Company. The terms of this framework agreement are substantially the same as those with Datong Coal Industry Co., Ltd.

A8(k) a coal/coke product sales framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and Shuozhou Shuocheng Liu Jia Kou Coal Transportation Terminal in respect of the purchase and/or sales of coal/coke products between such Subsidiaries' Substantial Shareholder and the Company. The terms of this framework agreement are substantially the same as those with Datong Coal Industry Co., Ltd.

A8(l) a coal/coke product sales framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and Shaanxi Yulin Coal Export Group Corporation in respect of the purchase and/or sales of coal/coke products between such Subsidiaries' Substantial Shareholder and the Company. The terms of this framework agreement are substantially the same as those with Datong Coal Industry Co., Ltd.

A8(m) a railway leasing and management entrustment service framework agreement dated 5 September 2006 entered into between China Coal Energy Company Limited (the "Company") and Shuozhou Pingshuo Luda Railway Transportation Co., Ltd. in respect of the lease of railway from and the provision of railway management entrustment services by the Company's subsidiaries.

Pingshuo Luda shall lease railway from the Company (or its relevant subsidiaries) and provide management entrustment services to the Company's relevant subsidiaries, Pingshuo Antaibao and Anjialing Mine. Each party shall enter into separate written service contracts with the Company to set out the specific terms, conditions and price for the provision of each type of railway and management services according to the principles, and within the parameters, provided for under the Railway Leasing and Management Entrustment Service Framework Agreement.

The quality of the railway leasing and management entrustment services provided by Pingshuo Luda under the Railway Leasing and Management Entrustment Service Framework Agreement shall be in accordance with the standards of services specified in the written agreements and shall be based on a reasonable price. Where the standards are specified by rules or regulations, the services provided shall be in accordance with such standards. The parties shall set the standards of services to be provided under the agreement and shall amend such standards from time to time in accordance with the market conditions.

The Stock Exchange of Hong Kong Limited and Hong Kong Securities Clearing Company Limited take no responsibility for the contents of this Prospectus, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this Prospectus.

A copy of this Prospectus (the "Prospectus"), having attached thereto the documents specified in "Appendix XI — Documents Delivered to the Registrar of Companies and Available for Inspection", has been registered by the Registrar of Companies in Hong Kong as required by Section 342C of the Companies Ordinance (Chapter 32 of the Laws of Hong Kong). The Securities and Futures Commission and the Registrar of Companies in Hong Kong take no responsibility for the contents of this Prospectus or any other document referred to above.

The Offer Price is expected to be fixed by agreement among the Joint Global Coordinators (on behalf of the Hong Kong Underwriters) and us on the Price Determination Date. The Price Determination Date is expected to be on or about Wednesday, 13 December 2006 and, in any event, not later than Sunday, 17 December 2006. The Offer Price will be not more than HK$4.05 and is currently expected to be not less than HK$3.20. Applicants for Hong Kong Public Offer Shares are required to pay, on application, the maximum offer price of HK$4.05 for each Hong Kong Public Offer Share together with a brokerage of 1%, a SFC transaction levy of 0.004%, and a Hong Kong Stock Exchange trading fee of 0.005%, subject to refund if the Offer Price should be lower than HK$4.05.

The Joint Global Coordinators (on behalf of the Underwriters, and with our consent) may reduce the indicative Offer Price range below that stated in this Prospectus at any time prior to the morning of the last day for lodging applications under the Hong Kong Public Offering. In such a case, a notice of the reduction in the indicative Offer Price range will be published in the South China Morning Post (in English) and the Hong Kong Economic Times (in Chinese) not later than the morning of the day which is the last day for lodging applications under the Hong Kong Public Offering. If applications for Hong Kong Public Offer Shares have been submitted prior to the day which is the last day for lodging applications under the Hong Kong Public Offering, then even if the indicative Offer Price range is so reduced, such applications cannot be subsequently withdrawn. Further details are set out in "Structure of the Global Offering" and "How to Apply for Hong Kong Public Offer Shares".

If, for whatever reason, we and the Joint Global Coordinators (on behalf of the Underwriters) are not able to agree on the Offer Price, the Global Offering (including the Hong Kong Public Offering) will not proceed and will lapse.

The obligations of the Hong Kong Underwriters under the Hong Kong Underwriting Agreement to subscribe for, and to procure applicants for the subscription for, Hong Kong Public Offer Shares are subject to termination by the Joint Global Coordinators (for themselves and on behalf of the Hong Kong Underwriters) if certain grounds arise prior to 8:00 a.m. on the day that trading in the H Shares commences on the Hong Kong Stock Exchange. Such grounds are set out in the section headed "Underwriting" in this Prospectus. It is important that you refer to that section for further details.

We are incorporated, and substantially all of our businesses are located, in the PRC. Potential investors should be aware of the differences in the legal, economic and financial systems between the PRC and Hong Kong, and the fact that there are different risks associated with investment in PRC-incorporated businesses. Potential investors should also be aware that the regulatory framework in the PRC is different from the regulatory framework in Hong Kong, and should take into consideration the different market nature of our H Shares. Such differences and risks are set out in the section headed "Risk Factors" and in "Appendix VIII — Summary of Principal Legal and Regulatory Provisions" to this Prospectus.

6 December 2006

(This Page Intentionally Left Blank)

EXPECTED TIMETABLE[1]

Application lists open[2]	11:45 a.m. on Monday, 11 December 2006
Latest time to lodge **WHITE** and **YELLOW** Application Forms	12:00 noon on Monday, 11 December 2006
Latest time to give **electronic application instructions** to HKSCC[3]	12:00 noon on Monday, 11 December 2006
Application lists close	12:00 noon on Monday, 11 December 2006
Expected Price Determination Date[4]	Wednesday, 13 December 2006
Announcement of the Offer Price, the level of indication of interest in the International Offering, the results of applications in the Hong Kong Public Offering and the basis of allocation of Hong Kong Public Offer Shares (with successful applicants' identification document numbers, where appropriate) to be published in the South China Morning Post in English and the Hong Kong Economic Times in Chinese on or before	Monday, 18 December 2006
Despatch of H Share certificates and refund cheques on or before[5]	Monday, 18 December 2006
Dealings in H Shares on the Hong Kong Stock Exchange expected to commence at	9:30 a.m. on Tuesday, 19 December 2006

Notes:

(1) All times refer to Hong Kong local time, except as otherwise stated. Details of the structure of the Global Offering, including its conditions, are set out in "Structure of the Global Offering". If there is any change in this expected timetable, an announcement will be published in the South China Morning Post in English and in the Hong Kong Economic Times in Chinese.

(2) If there is a "black" rainstorm warning or a tropical cyclone warning signal number 8 or above in force at any time between 9:00 a.m. and 12:00 noon on Monday, 11 December 2006, the application lists will not open on that day. Further information is set out in "How to apply for Hong Kong Public Offer Shares — Effect of Bad Weather on the Opening of the Application Lists".

(3) Applicants who apply for Hong Kong Public Offer Shares by giving electronic application instructions to HKSCC should refer to "How to Apply for Hong Kong Public Offer Shares — Applying by Giving Electronic Application Instructions to HKSCC".

(4) The Price Determination Date, being the date on which the Offer Price is to be determined, is expected to be on or about Wednesday, 13 December 2006 and, in any event, not later than Sunday, 17 December 2006. If, for any reason, the Offer Price is not agreed by Sunday, 17 December 2006, the Global Offering (including the Hong Kong Public Offering) will not proceed and will lapse.

(5) Applicants who apply for 1,000,000 or more Hong Kong Public Offer Shares and have indicated in their Application Forms that they wish to collect share certificates (if applicable) and refund cheques (if applicable) in person may do so from our H Share registrar, Computershare Hong Kong Investor Services Limited, at Shops 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong from 9:00 a.m. to 1:00 p.m. on Monday, 18 December 2006 or any other date notified by our Company in the newspapers as the date of despatch of share certificates/refund cheques. Applicants being individuals who opt for personal collection must not authorize any other person to make their collection on their behalf. Applicants being corporations who opt for personal collection must attend by sending their authorized representatives each bearing a letter of authorization from his corporation stamped with the corporation's chop. Both individuals and authorized representatives (if applicable) must produce, at the time of collection, evidence of identity acceptable to our H Share registrar. Uncollected share certificates and refund cheques will be despatched by ordinary post to the addressees specified in the relevant Application Forms at the applicants' own risk. Further information is set out in "How to Apply for Hong Kong Public Offer Shares".

Refund cheques will be issued in respect of wholly or partially unsuccessful applications and also in respect of successful applications in the event that the Offer Price is less than the initial price per Hong Kong Public Offer Share payable on application. Part of your Hong Kong Identity Card number/passport number, or, if you are joint applicants, part of the Hong Kong Identity Card number/passport number of the first-named applicant, provided by you may be printed on your refund cheque, if any. Such data would also be transferred to a third party to facilitate your refund. Your banker may require verification of your Hong Kong Identity Card number/passport number before encashment of your refund cheque. Inaccurate completion of your Hong Kong Identity Card number/passport number may lead to delay in encashment of your refund cheque or may invalidate your refund cheque.

H Share certificates will only become valid certificates of title provided that the Hong Kong Public Offering has become unconditional in all respects and neither of the Underwriting Agreements has been terminated in accordance with its terms. Investors who trade H Shares on the basis of publicly available allocation details prior to the receipt of their H Share certificates or prior to the H Share certificates becoming valid certificates of title do so entirely at their own risk.

TABLE OF CONTENTS

This Prospectus is issued by China Coal Energy Company Limited solely in connection with the Hong Kong Public Offering and the Hong Kong Public Offer Shares and does not constitute an offer to sell or a solicitation of an offer to buy any security other than the Hong Kong Public Offer Shares offered by this Prospectus pursuant to the Hong Kong Public Offering. This Prospectus may not be used for the purpose of, and does not constitute, an offer or invitation in any other jurisdiction or in any other circumstance. No action has been taken to permit a public offering of the Offer Shares in any jurisdiction other than Hong Kong and Japan and no action has been taken to permit the distribution of this Prospectus in any jurisdiction other than Hong Kong. The distribution of this Prospectus and the offering and sale of the Offer Shares in other jurisdictions are subject to restrictions and may not be made except as permitted under the applicable securities laws of such jurisdictions pursuant to registration with or authorization by the relevant securities regulatory authorities or an exemption therefrom.

You should rely only on the information contained in this Prospectus and the Application Forms to make your investment decision.

We have not authorized anyone to provide you with information that is different from that contained in this Prospectus.

Any information or representation not made in this Prospectus must not be relied on by you as having been authorized by us, the Joint Global Coordinators, the Joint Sponsors, the Underwriters, any of their respective directors or any other person or party involved in the Global Offering.

This summary aims to give you an overview of the information contained in this Prospectus. As this is a summary, it does not contain all the information that may be important to you. You should read this Prospectus in its entirety before you decide to invest in the Hong Kong Public Offer Shares.

There are risks associated with any investment. Some of the particular risks in investing in the H Shares are set out in "Risk Factors". You should read that section carefully before you decide to invest in the H Shares.

OVERVIEW

We are the second largest coal enterprise in China based on our 2005 revenue. According to *BP Statistical Review 2006*, China is the world's largest producer and consumer of coal, one of the most important energy resources in the world and the most important source of primary energy in China. We sold 92.2 million tonnes and 43.5 million tonnes of coal in 2005 and the six months ended 30 June 2006, respectively. Our total revenue from coal operations in the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2005 and 2006 was RMB11,656.7 million, RMB17,733.0 million, RMB25,147.7 million, RMB12,600.1 million and RMB11,761.0 million, respectively.

According to the SRK Report, we had total marketable coal reserves of 3,003 million tonnes as of 30 June 2006. We sell high-quality thermal coal and coking coal produced from nine operating coal mines and thirteen coal processing plants that we wholly or partially own and/or operate. Located in eastern, northern and northwestern China, our five mining areas consist of nine underground mines and three open pit mines, two of which, the Antaibao Open Pit Mine and the Anjialing Open Pit Mine, are among the largest open pit mines in China. Each of our mines and coal processing plants is situated in close proximity to our customers or with convenient access to transportation networks and facilities. Our raw coal output grew from 33.2 million tonnes in 2003 to 50.1 million tonnes in 2005, representing a CAGR of 22.8%.

We are also one of China's largest coal suppliers, with extensive market experience, well-established brand names and solid customer relationships. Our parent company, ChinaCoal Group, is the largest coal exporter in China. Our extensive sales and marketing network and established supply and distribution channels have contributed to our success in conducting our proprietary coal trading operations and providing coal import agency and export-related services.

As an integrated coal enterprise with coal production, sales and trading as our core business, we further supplement our coal operations with a diversified portfolio of other related operations. We operate one of China's largest coking operations not affiliated with a steelmaker. Our coking operations include the production and sale of coke and coal-based chemicals. We also own China's largest coal mining equipment manufacturing operations in terms of revenue. In addition, we operate ancillary businesses, including coal mine design and transportation services. We believe these operations represent a natural extension of our coal production, sales and trading capabilities while effectively expanding the scope of our product and service offerings and enhancing our core competitiveness.

In the year ended 31 December 2005 and the six months ended 30 June 2006, we had total revenue of RMB30,061.3 million and RMB14,679.7 million, respectively, and net profit of RMB3,343.5 million and RMB1,334.4 million, respectively.

OUR COMPETITIVE STRENGTHS

- We are the second largest coal enterprise in the PRC and have the potential to attain sustainable growth.
- We offer high-quality coal products to our customers by leveraging our abundant, high-quality and diversified coal reserves as well as our advanced coal processing and blending capabilities.
- With our extensive market experience, well-recognized brand names, stable coal supply, comprehensive transportation facilities and solid customer relationships, we have one of the strongest coal sales and marketing networks in China.
- Our coal mines and coal production facilities are situated with convenient access to transportation networks, thereby ensuring the timely, cost-effective and efficient delivery of our coal products.
- We own two of the largest open pit mines in China and rely on advanced mining and recycling technologies to achieve optimal resource utilization and improve environmental protection.
- Our extensive expertise in coal mine design and our position as the largest coal mining equipment manufacturer in China has made us the most integrated enterprise in the domestic coal industry, enabled us to increase our revenue and contributed to the continuing development of our core business.
- Our management team has extensive industry and management experience to effectively manage our operations and maximize shareholder value.

OUR BUSINESS STRATEGIES

- Seek rapid and sustainable growth through organic growth supplemented by external development strategies.
- Maximize our profitability and maintain our competitiveness by improving operating efficiency and controlling costs.
- Expand our sources of income by focusing on the development of high value-added coal-based chemicals products.
- Strengthen our sales and marketing networks, optimize operations, enhance marketing capabilities and increase our market share.
- Increase our research and development efforts to lower production costs and increase the value of our products.
- Improve production safety and environmental protection to ensure our continuing development.
- Optimize internal control by strengthening our financial management and investment decision-making.

RISK FACTORS

There are certain risks involved in our operations and many of these risks are beyond our control. These risks can be characterized as: (i) risks relating to China's coal industry and our businesses; (ii) risks relating to the People's Republic of China; and (iii) risks relating to the Global Offering.

Risks Relating to China's Coal Industry And Our Businesses

- Our business and results of operations are susceptible to the cyclical nature of coal markets and are vulnerable to fluctuations in coal prices.
- Our business operations are extensively impacted by the policies and regulations of the PRC Government. Any policy or regulatory changes may cause us to incur significant compliance costs.
- Our continuing success depends on our ability to continue acquiring and developing coal resources and obtaining the relevant mining rights and land use rights.
- Our business requires significant and continuous capital investment. Our capital investment projects are subject to governmental approval, may exceed our original budgets, may not generate the expected benefits or may not be completed.
- We may experience a shortage of reliable and adequate transportation capacity for our coal products and any increase in transportation costs could have a material adverse effect on our business and results of operations.
- The coal reserve data in this Prospectus are estimates and may be inaccurate, and hence our projected future production volumes, revenue and capital expenditures, which are based on these estimates, may differ materially from actual figures.
- Accidents at our mines or other neighboring coal mines could materially and adversely affect our business and the safety of our coal operations.
- We may not have sufficient insurance coverage against potential operational risks.
- There may be significant reductions in purchases by our major customers and/or terminations of our long-term sales contracts.
- We may be unable to compete effectively against other coal producers and sellers.
- Our indebtedness may materially and adversely affect our financial performance and results of operations.
- Our dividend distributions to our existing shareholders made prior to the completion of the Global Offering should not be treated as indicative of our Company's future dividend policy. These dividend distributions before the Global Offering may adversely impact the total value of our assets and your investment.
- Our profitability and ability to operate our business effectively are dependent on the fulfillment by ChinaCoal Group of its obligations under certain agreements entered into in connection with our Restructuring.
- We will be controlled by ChinaCoal Group, whose interests may differ from those of our other shareholders.
- Any material dispute between our Company and a joint venture partner may adversely affect the results of operations of the relevant joint venture company and our Company.
- Our Company has a limited operating history as an independent entity, which may affect the efficiency of our operations and your ability to evaluate our business and growth potential.

- Our coal mining equipment manufacturing business may be materially and adversely affected by an economic downturn in the domestic coal industry or a decrease in domestic coal consumption, and our coal mining equipment may subject us to product liability claims.
- Our coking operations are dependent on the domestic and international supply of and demand for coke and may be affected by macro-economic regulations and controls.
- We have not obtained the land use rights and building ownership rights to some of our mining sites and facilities.
- There is no assurance that our Company, our subsidiaries or our jointly controlled entities will continue to benefit from preferential tax treatment.
- Exports of certain of our products are subject to new export tax policies, which may adversely affect our business and financial position.
- Any changes in the political and economic conditions in the Asia-Pacific region may adversely affect our business and operations.

Risks Relating to the People's Republic of China

- Adverse changes in China's economic, political and social conditions as well as governmental policies could have a material adverse effect on China's overall economic growth, which could in turn adversely affect our financial condition and results of operations.
- Changes in foreign exchange regulations and future movements in the exchange rate of Renminbi may adversely affect the financial condition and results of operations of our Company and our ability to pay dividends.
- The PRC legal system is continuously evolving and has inherent uncertainties, and the legal protections available to our shareholders may be limited.
- It may be difficult to enforce any judgments obtained from non-PRC courts against our Company or our Directors, Supervisors or senior executive officers residing in China.
- The exemption from withholding tax on dividends and income available to holders of H Shares may not continue in the future.
- Concerns over China's high growth and measures taken by the PRC Government may lead to an increase in interest rates and a slowdown in economic growth.
- There may be an occurrence of a widespread public health problem, such as SARS.

Risks Relating to the Global Offering

- There has been no prior public market for the H Shares. The liquidity and market price of the H Shares following the Global Offering may be volatile.
- Because the Offer Price is higher than the net tangible book value per share of our Company, the holders of the H Shares will incur immediate dilution.
- Disposal of the H Shares by NSSF or transfer of Shares held on our domestic share register into H Shares following the listing of the H Shares may result in an increase in the number of H Shares available on the market and may affect the price of the H Shares.

- Shareholders' interests may be diluted as a result of additional equity fund-raising.
- Forward-looking information included in this Prospectus may prove inaccurate.
- We cannot guarantee the accuracy of facts, forecasts and other statistics with respect to China, the Chinese economy and China's coal and coal-related industries contained in this Prospectus.
- We strongly caution you not to place any reliance on any information contained in press articles or other media regarding us and the Global Offering.

FINANCIAL INFORMATION

Summary Historical Combined Financial Information

The following tables present our summary historical combined financial information for the periods indicated. The summary combined income statement information, cash flow information and other financial information for the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006, and the summary combined balance sheet information as of 31 December 2003, 2004, 2005 and 30 June 2005 and 2006 are derived from, and should be read in conjunction with, the combined financial information set forth in the Accountants' Report in Appendix I to this Prospectus.

Prior to the Restructuring, our business operations were conducted by the companies wholly owned or controlled by ChinaCoal Group (the "Predecessor Operations"). Since ChinaCoal Group controlled the business operations and the related assets that were transferred to us pursuant to the Restructuring, and continues to control us after the Restructuring, our historical combined financial information have been prepared as a combination of businesses under common control in a manner similar to a pooling-of-interests. Accordingly, the assets and liabilities transferred to us have been stated at historical carrying amounts. In addition, the historical combined financial data presented below for each of the years in the three-year period ended 31 December 2005 and the six months ended 30 June 2005 and 2006 also reflect the financial position and results of operations of certain of the businesses and assets historically associated with the Predecessor Operations retained by ChinaCoal Group as part of the Restructuring. Businesses retained by ChinaCoal Group include: (i) equity interests in certain coal gas, coke and coking coal operations and in certain coal-based chemicals manufacturing and sales operations; (ii) operations of the Mines under Restructuring; (iii) coal mine and civil engineering construction operations; (iv) coal bed methane development operations; (v) provision of coal export agency services and a small amount of coal trading and agency services businesses of certain overseas trading companies; (vi) community functions such as schools and hospitals; (vii) a small amount of investment in equity and some non-operational assets; and (viii) other non-core operations including real estate and hotel development and management. Although certain of such businesses and assets retained by ChinaCoal Group were not transferred to us, they have been included in the historical combined financial information up to the effective date of the Restructuring, 22 August 2006, because they were an integral part of, or historically associated with, the assets, liabilities and interests of the Predecessor Operations (the "Transferred Businesses"). Accordingly, the financial information included in this section may not necessarily reflect what our results of operations, financial position and cash flows would have been had we been a separate and stand-alone entity during the periods presented below. For selected historical financial information relating to businesses and assets retained by ChinaCoal Group historically associated with the Predecessor Operations, see Note 2 in the Accountants' Report in Appendix I to this Prospectus.

The selected historical combined financial data should be read in conjunction with our combined financial information as included in the Accountants' Report in Appendix I to this Prospectus.

Other Summary Financial Information

The following table sets forth a full quantitative reconciliation of EBITDA to its most directly comparable IFRS equivalent, profit for the year, and the calculation of EBITDA margin.

	Year ended 31 December			Six months ended 30 June	
	2003	2004	2005	2005	2006
			(RMB millions)		
Profit for the year	238.6	2,435.5	3,551.4	2,392.0	1,482.4
Income tax expense	(93.3)	(730.2)	(758.8)	(586.9)	(627.9)
Share of profits/(losses) of associates	0.7	(1.9)	(6.1)	3.1	(1.2)
Finance costs	(675.4)	(527.8)	(112.3)	(23.7)	(291.5)
Depreciation and amortization	(632.5)	(871.3)	(1,005.5)	(436.4)	(561.4)
EBITDA[(1)] (unaudited)	1,639.1	4,566.7	5,434.1	3,435.9	2,964.4
Revenue	14,480.8	22,163.8	30,061.3	15,011.9	14,679.7
EBITDA Margin[(1)] (unaudited)	11.3%	20.6%	18.1%	22.9%	20.2%

(1) EBITDA, which is used to measure our operating performance, is defined as profit for the year plus finance costs, share of profits/(losses) of associates, income tax expense and depreciation and amortization. EBITDA margin is calculated by dividing EBITDA by total operating revenue. We present our EBITDA and EBITDA margin here to provide additional information regarding our operating performance and because our management believes EBITDA is useful to investors as a measure commonly used by securities analysts, investors and other interested parties in the evaluation of the performance of companies in the mining industry. EBITDA is not a standard measure under IFRS. EBITDA should not be considered in isolation or construed as an alternative to cash flows, net income or any other measure of performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities. EBITDA does not account for taxes, interest expense or other non-operating cash expenses. In evaluating EBITDA, we believe that investors should consider, among other things, the components of EBITDA such as turnover and operating expenses and the amount by which EBITDA exceeds capital expenditures and other charges.

SUMMARY HISTORICAL OPERATING DATA

The following tables set forth summary operating data of each of our segments after elimination of inter-segment sales for the periods indicated:

	Year ended 31 December						Six months ended 30 June

PROFIT FORECAST FOR THE YEAR ENDING 31 DECEMBER 2006

The following sets forth certain preliminary unaudited profit forecast data in the year ending 31 December 2006. See "Appendix III — Profit Forecast".

Forecast consolidated profit attributable to equity holders of our Company for the year ending 31 December 2006 [1]	not less than RMB3,147.1 million
Forecast earnings per Share	not less than
(a) pro forma fully diluted[2]	RMB0.280 (HK$0.278)
(b) weighted average[3]	RMB0.388 (HK$0.384)

(1) The bases and assumptions on which the above profit forecast has been prepared are summarized in Appendix III.

(2) The calculation of the forecast earnings per Share on a pro forma diluted basis is based on the forecast consolidated profit attributable to equity holders for the year ending 31 December 2006 assuming that the Global Offering was completed on 1 January 2006 and a total of 11,246,374,000 Shares were in issue during the entire year. This calculation assumes that (i) the Over-allotment Option is not exercised and (ii) 3,246,374,000 Offer Shares were issued by our Company on 1 January 2006.

(3) The calculation of the forecast earnings per Share on a weighted average basis is based on the forecast consolidated profit attributable to equity holders for the year ending 31 December 2006 and a weighted average number of 8,115,624,279 Shares issued and outstanding during the year. This calculation assumes that (i) the Over-allotment Option is not exercised and (ii) 3,246,374,000 Offer Shares will be issued by our Company pursuant to the Global Offering on 19 December 2006.

GLOBAL OFFERING

The Global Offering by us consists of:

- the offer by us of initially 162,320,000 H Shares, or Hong Kong Public Offer Shares, for subscription by the public in Hong Kong, referred to in this Prospectus as the Hong Kong Public Offering; and
- the offer by us of initially 3,084,054,000 H Shares, or International Offer Shares, referred to in this Prospectus as the International Offering, consisting of the offering of our H Shares (i) in the United States to QIBs in reliance on Rule 144A under the U.S. Securities Act, and (ii) outside the United States in reliance on Regulation S under the U.S. Securities Act. At any time from the date we sign the International Underwriting Agreement until 30 days after the last day for the lodging of applications in the Hong Kong Public Offering, the joint bookrunners, as representatives of the International Offering Underwriters, have an option to purchase up to an additional 486,956,000 H Shares from us, representing 15.0% of the initial size of the Global Offering, at the Offer Price.

The number of Hong Kong Public Offer Shares and International Offer Shares is subject to adjustment and reallocation as described in "Structure of the Global Offering."

OFFER STATISTICS

	Based on an Offer Price of HK$3.20 per H Share	Based on an Offer Price of HK$4.05 per H Share
Market capitalization of our Shares[1]	HK$35,988.4 million	HK$45,547.8 million
Prospective price/earnings multiple		
(a) pro forma fully diluted[2]	11.5 times	14.6 times
(b) weighted average[3]	8.3 times	10.5 times
Unaudited pro forma adjusted net tangible asset value per H Share[4]	HK$1.24	HK$1.47

(1) All statistics in this table are based on the assumption that the Over-allotment Option is not exercised. The calculation of market capitalization is based on 11,246,374,000 Shares expected to be issued and outstanding following the Global Offering.

(2) The calculation of the prospective price/earnings multiple on a pro forma fully diluted basis is based on the forecast earnings per Share in the year ending 31 December 2006 on a pro forma fully diluted basis.

(3) The calculation of the prospective price/earnings multiple on a weighted average basis is based on the forecast earnings per H Share in the year ending 31 December 2006 on a weighted average basis, assuming the Global Offering was completed on 19 December 2006.

(4) The unaudited pro forma adjusted net tangible assets per H Share is calculated after making the adjustments referred to in the Section headed "Unaudited pro forma adjusted net tangible assets statement" in "Appendix II — Unaudited Pro Forma Financial Information" and based on 11,246,374,000 Shares expected to be issued and outstanding following the Global Offering.

USE OF PROCEEDS

We estimate that we will receive net proceeds from the Global Offering of approximately HK$11.3 billion, assuming that the Over-allotment Option is not exercised, after deducting the underwriting commissions and other estimated offering expenses payable by us and assuming an initial public Offer Price of HK$3.625 per H Share, being the mid-point of the indicative Offer Price range set forth on the cover page of this Prospectus. We intend to use these net proceeds for the following purposes:

- A maximum of 65.0%, or approximately RMB7.4 billion (equivalent to approximately HK$7.3 billion) is expected to be used primarily for the construction of future open pit mines and underground mines, related coal processing plants and dedicated railways planned for development in our Pingshuo Mining Area. Of this total amount, we plan to use RMB 6.3 billion for the construction of mines, RMB 0.7 billion for the construction of coal processing plants and RMB 0.4 billion for the construction of dedicated railways;

- A maximum of 25.0%, or approximately RMB2.8 billion (equivalent to approximately HK$2.8 billion), is expected to be used to repay bank loans. The relevant bank loans mainly are borrowings from four PRC commercial banks and their maturity dates range from 1 January 2007 to 20 November 2015. In addition, the annual interest rates of these bank loans range from 4.93% to 6.12%. These loans are used as working capital and for the construction of the Antaibao Mines and the Anjialing Mines; and

- the remaining balance to fund our working capital.

To the extent that the net proceeds of the Global Offering derived from unused capital are not immediately applied to the above purposes, we intend to deposit the proceeds in interest-bearing bank accounts, such as short-term savings accounts or basic short-term money market funds, with licensed commercial banks and/or authorized financial institutions in Hong Kong or China.

In the event that the Over-allotment Option is exercised in full, we estimate that we will receive net proceeds from the sale of these additional Offer Shares of approximately HK$1.7 billion, after deducting the underwriting commissions and other estimated offering expenses payable by us and assuming the same initial public Offer Price as stated above. We intend to use these net proceeds to expand and upgrade our coal mines and coal processing plants.

In the event that the Offer Price is set at the high-end of the proposed Offer Price range and the Over-allotment Option is not exercised at all, our Company will receive net proceeds of approximately HK$12.6 billion. The additional net proceeds of approximately HK$1.3 billion will be used to develop our coal production facilities and ancillary facilities. In the event that the Offer Price is set at the high end of the proposed Offer Price range and the Over-allotment Option is exercised in full, our Company will receive net proceeds of approximately HK$14.5 billion and the additional net proceeds of approximately HK$1.9 billion arising from the exercise of the Over-allotment Option will be used in the construction of our coal production facilities and related ancillary facilities.

In the event that the Offer Price is set at the low end of the proposed Offer Price range and the Over-allotment Option is not exercised at all, our Company will receive net proceeds of approximately HK$9.9 billion. Under such circumstances, the net proceeds allocated to working capital will be reduced. In the event that the Offer Price is set at the low-end of the proposed Offer Price range and the Over-allotment Option is exercised in full, our Company will receive net proceeds of approximately HK$11.4 billion. The additional net proceeds of approximately HK$1.5 billion (when compared to the net proceeds to our Company with the Offer Price being determined at the low end of the stated range and assuming the Over-allotment Option is not exercised) will be used in the construction of our coal production facilities and related ancillary facilities.

DIVIDEND POLICY

After completion of the Global Offering, our shareholders will be entitled to receive dividends declared by us. The payment and the amount of any dividends will be at the discretion of our Board and will depend on our general business condition and strategies, cash flows, financial results and capital requirements, interests of our shareholders, taxation conditions, statutory and regulatory restrictions and other factors that our Board deems relevant. Any dividend distribution shall also be subject to approval of our shareholders. Under the PRC Company Law and our Articles of Association, all of our shareholders have equal rights to dividends and distributions. For holders of our H Shares, cash dividend payments, if any, will be declared by our Board in Renminbi and paid in Hong Kong dollars.

We intend to distribute 20% to 30% of our net distributable profit for the periods subsequent to the Global Offering. See "Financial Information — Dividend policy."

PRE-ESTABLISHMENT DISTRIBUTION AND SPECIAL DIVIDENDS

In accordance with the *"Provisional Regulations Relating to Corporate Reorganization of Enterprises and Related Management of State-owned Capital and Financial Treatment"* (the *"Provisional Regulations"*) issued by the MOF, we are required to make a distribution (the "Pre-establishment Distribution") to ChinaCoal Group, our sole shareholder prior to the Global Offering, in the amount equal to the difference in our Company's net asset value as at 1 October 2005, the date immediately following our last valuation date, and as at 21 August 2006, the date immediately prior to the date on which our Company was incorporated. The Pre-establishment Distribution represents a surplus between the value of our net assets as at our incorporation date over the value of the net assets as at the last valuation date, and we are required by the Provisional Regulations to return such surplus to ChinaCoal Group.

On 23 August 2006, our shareholders' meeting resolved that ChinaCoal Group will be entitled to all of our distributable profits generated from 22 August 2006 to the date at the end of the month prior to the date of capital verification for the Global Offering, which, assuming that the Global Offering is completed on 19 December 2006, would mean up to 30 November 2006 (the "Special Dividends").

We currently estimate the total amount of the Pre-establishment Distribution and the Special Dividends to be RMB 1,210.0 million, of which (i) the Pre-establishment Distribution is based on the difference in our net asset value as stated in our management accounts as of 1 October 2005 and as of 21 August 2006 and (ii) the Special Dividends are calculated on a pro rata basis based on the number of days from 22 August 2006 to 30 November 2006, and a net profit per day calculation based on the net profits as recorded in our management accounts for the three months ended 30 September 2006.

We will determine the actual amount of the Pre-establishment Distribution and Special Dividends by reference to our accounts for the period from 1 October 2005 to 30 November 2006. We will engage PwC to perform a special audit of our accounts for the period from 1 October 2005 to 30 November 2006, which is expected to be completed by 30 April 2007. We expect to finance the Pre-establishment Distribution and the Special Dividends to ChinaCoal Group from our existing cash on hand prior to the Global Offering. Payment of the Pre-establishment Distribution and the Special Dividends will take place after the Global Offering and after the special audit of our accounts for the period from 1 October 2005 to 30 November 2006 is completed. The Pre-establishment Distribution is determined based on audited accounts prepared in accordance with PRC GAAP. The Special Dividends will be determined based on audited accounts prepared in accordance with PRC GAAP and IFRS, whichever is lower, after deducting any contribution made by the Company to the statutory and discretionary reserve funds. We will publish an announcement of the final amount of the Pre-establishment Distribution and the Special Dividends and the outcome of the special audit prior to the payment of the Pre-establishment Distribution and the Special Dividends to ChinaCoal Group.

Holders of H Shares are not entitled to share in the Pre-establishment Distribution or Special Dividends. ChinaCoal Group is the only shareholder entitled to the Pre-establishment Distribution and the Special Dividends. In addition, any distributable profits available for distribution to our shareholders after the Global Offering will exclude the Pre-establishment Distribution and the Special Dividends.

The Pre-establishment Distribution is required to be paid to ChinaCoal Group under regulations issued by the MOF. We decided to distribute the Special Dividends based on our commercial discretion. You should not rely on the Pre-establishment Distribution and Special Dividends as an indication of our future dividend distribution policy or practice.

In this Prospectus, the following terms have the following meanings unless the context otherwise requires. Certain technical terms are explained in the section headed "Glossary" in this Prospectus.

"Application Form(s)"	white application form(s) and yellow application form(s), or where the context so requires, any of them;
"Articles of Association" or "Articles"	the articles of association of our Company, adopted on 23 August 2006 and as amended from time to time;
"Associates"	companies or persons under the meaning ascribed thereto under the Hong Kong Listing Rules;
"Board" or "Board of Directors"	the Board of Directors of our Company;
"BP Statistical Review 2006"	a statistical overview published in June 2006 by British Petroleum that provides data regarding global energy markets, with a series of historical statistics dating back to 1965;
"CAGR"	compound annual growth rate;
"CCASS"	the Central Clearing and Settlement System established and operated by the HKSCC;
"CCASS Broker Participant"	a person admitted to participate in CCASS as a broker participant;
"CCASS Custodian Participant"	a person admitted to participate in CCASS as a custodian participant;
"CCASS Investor Participant"	a person admitted to participate in CCASS as an investor participant, who may be an individual or joint individuals or a corporation;
"CCASS Participant"	a CCASS Broker Participant, a CCASS Custodian Participant or a CCASS Investor Participant;
"ChinaCoal Group"	China National Coal Group Corporation (中國中煤能源集團公司), the Controlling Shareholder of our Company and a Chinese state-owned enterprise, the predecessor of which was called China National Coal Industry Import and Export Corporation (中國煤炭工業進出口總公司) and was established in December 1981;
"CICC"	China International Capital Corporation Limited;
"CICC (HK)"	China International Capital Corporation (Hong Kong) Limited, a wholly owned subsidiary of CICC;
"Citigroup"	Citigroup Global Markets Asia Limited, which is licensed to conduct type one (dealing in securities), type four (advising on securities) and

	type six (advising on corporate finance) regulated activities under the Securities and Futures Ordinance of Hong Kong
"Coal Export Right"	the State Trade Operating Right for Coal Export (煤炭出口國營貿易經營權);
"CSRC"	China Securities Regulatory Commission (中國證券監督管理委員會);
"Companies Ordinance"	the Companies Ordinance (Chapter 32 of the Laws of Hong Kong), as amended, supplemented or otherwise modified from time to time;
"Company Law" or "PRC Company Law"	Company Law of the PRC (中華人民共和國公司法), as adopted at the Fifth Session of the Standing Committee of the Eighth NPC on 29 December 1993, effective 1 July 1994, as amended, supplemented or otherwise modified from time to time;
"Controlling Shareholder"	has the meaning ascribed thereto under the Hong Kong Listing Rules and unless the context requires otherwise, refers to ChinaCoal Group;
"Datun Mining Area"	the coal mining area located in the Jiangsu Province in China consisting of the Yaoqiao, Kongzhuang, Xuzhuang and Longdong mines. The Datun Mining Area is operated by Shanghai Datun Energy;
"Director(s)"	the Director(s) of our Company, including all executive, non-executive and independent non-executive Directors;
"Domestic Shares"	ordinary shares in the capital of our Company, with a nominal value of RMB1.00 each, which are subscribed for and fully paid up in Renminbi by PRC nationals and/or PRC incorporated entities;
"EIA"	Energy Information Administration;
"Global Offering"	the Hong Kong Public Offering and the International Offering;
"H Shares"	overseas-listed foreign invested shares of par value RMB1.00 each in the ordinary share capital of our Company, which are to be subscribed for and traded in HK dollars and for which an application has been made for the granting of listing, and permission to deal, on the Hong Kong Stock Exchange;
"HK$" or "HK dollars" or "Hong Kong dollars"	Hong Kong dollars, the lawful currency of Hong Kong;
"HKSCC"	Hong Kong Securities Clearing Company Limited;
"HKSCC Nominees"	HKSCC Nominees Limited;

"Hong Kong" or "HK"	the Hong Kong Special Administrative Region of the PRC;
"Hong Kong Listing Rules"	the Rules Governing the Listing of Securities on the Hong Kong Stock Exchange (as amended from time to time);
"Hong Kong Public Offering"	the offer by our Company of initially 162,320,000 H Shares for subscription by the public in Hong Kong (subject to adjustment as described in the section headed "Structure of the Global Offering") for cash at the Offer Price (plus brokerage, SFC transaction levies, and Hong Kong Stock Exchange trading fees), on and subject to the terms and conditions described in this Prospectus and the Application Forms as further described in the section headed "Structure of the Global Offering — The Hong Kong Public Offering";
"Hong Kong Public Offer Shares"	the H Shares offered for subscription pursuant to the Hong Kong Public Offering;
"Hong Kong Stock Exchange"	The Stock Exchange of Hong Kong Limited;
"Hong Kong Underwriters"	the underwriters of the Hong Kong Public Offering listed as such in the section "Underwriting — Hong Kong Underwriters" of this Prospectus;
"Hong Kong Underwriting Agreement"	the underwriting agreement relating to the Hong Kong Public Offering which is expected to be entered into among our Company and the Hong Kong Underwriters on or around 5 December 2006;
"Huajin Joint Venture"	Huajin Coking Coal Co., Ltd. (華晉焦煤有限責任公司), a joint venture established as a limited liability company in the PRC, in which our Company and Shanxi Coking Coal Group Co., Ltd. each has a 50% equity interest;
"IFRS"	International Financial Reporting Standards promulgated by the International Accounting Standards Board ("IASB"); IFRS include the International Accounting Standards ("IAS") and their interpretations;
"International Offering"	the offering of an aggregate of 3,084,054,000 H Shares by us to investors (other than to retail investors in Hong Kong) outside China (including to professional and institutional investors in Hong Kong and a public offering without listing in Japan), as further described in the section headed "Structure of the Global Offering";
"International Offer Shares"	the H Shares offered pursuant to the International Offering;
"International Underwriters"	the underwriters of the International Offering, who are expected to enter into the International Underwriting Agreement;

"International Underwriting Agreement"	the underwriting agreement relating to the International Offering, which is expected to be entered into among our Company and the International Underwriters on or around 13 December 2006;
"Joint Global Coordinators"	CICC, Citigroup and Morgan Stanley;
"Joint Sponsors" or "Joint Lead Managers"	CICC(HK), Citigroup and Morgan Stanley;
"Latest Practicable Date"	30 November 2006;
"Liliu Mining Area"	the coal mining area located in Shanxi Province in China consisting of the Shaqu underground mine. The Liliu Mining Area is operated by the Huajin Joint Venture;
"Listing Date"	the date on which dealings in the H Shares commence on the Hong Kong Stock Exchange;
"Macau"	the Macau Special Administrative Region of the PRC;
"Mandatory Provisions"	the Mandatory Provisions for Articles of Association of Companies to be Listed Overseas (到境外上市公司章程必備條款), as amended, supplemented or otherwise modified from time to time, for inclusion in the articles of association of companies incorporated in the PRC to be listed overseas (including Hong Kong), which were promulgated by the former PRC Securities Commission of the State Council and the former State Commission for Restructuring the Economic Systems of the PRC on 27 August 1994;
"Mines under Restructuring"	the five local coal mines, namely the Dongpo Mine, Tangshangou Mine, Yangjian Mine, Danshuigou Mine and Xishahe Mine, operated by ChinaCoal Group;
"MLR"	Ministry of Land and Resources of the PRC (中華人民共和國國土資源部);
"MRL"	the Mineral Resource Law of the PRC;
"MOC"	Ministry of Construction of the PRC (中華人民共和國建設部);
"MOFCOM"	Ministry of Commerce of the PRC (中華人民共和國商務部);
"MOF"	Ministry of Finance of the PRC (中華人民共和國財政部);
"MOR"	Ministry of Railways of the PRC (中華人民共和國鐵道部);
"Morgan Stanley"	Morgan Stanley Dean Witter Asia Limited, licensed to conduct type one (dealing in securities), type four (advising on securities) and type six

	(advising on corporate finance) regulated activities under the Securities and Futures Ordinance of Hong Kong;
"Nanliang Mining Area"	the coal mining area located in Shaanxi Province in China consisting of the Nanliang underground mine;
"NDRC"	National Development and Reform Commission of the PRC (中華人民共和國國家發展和改革委員會);
"NPC"	National People's Congress of the PRC and its Standing Committee (中華人民共和國全國人民代表大會);
"NSSF"	National Council for Social Security Fund of the PRC (中華人民共和國全國社會保障基金理事會);
"OECD"	Organization for Economic Cooperation and Development;
"Offer Price"	the final Hong Kong dollar price per H Share (exclusive of brokerage, SFC transaction levies and Hong Kong Stock Exchange trading fees) at which the H Shares are to be subscribed for and issued pursuant to the Hong Kong Public Offering, to be determined as further described in the section headed "Structure of the Global Offering — Pricing and allocation" in this Prospectus;
"Offer Shares"	the Hong Kong Public Offer Shares and the International Offer Shares together, where relevant, with any additional H Shares issued and sold pursuant to the exercise of the Over-allotment Option;
"Our Company", "we" and "us"	China Coal Energy Company Limited (中國中煤能源股份有限公司), a joint stock limited company established in the PRC on 22 August 2006 and, except where the context otherwise requires, all of its subsidiaries and jointly controlled entities of which the operating results were consolidated into those of China Coal Energy Company Limited;
"Over-allotment Option"	the option granted by us to the International Underwriters to purchase up to 486,956,000 additional H Shares, at the Offer Price, which is exercisable from the date of the International Underwriting Agreement until 30 days after the last date for lodging of applications under the Hong Kong Public Offering;
"Parent Company"	ChinaCoal Group;
"PBOC"	the People's Bank of China (中國人民銀行), the central bank of the PRC;
"PBOC Rate"	the exchange rate for foreign exchange transactions set daily by the PBOC based on the previous day's PRC inter-bank foreign exchange

	rates and with reference to prevailing exchange rates on the world financial markets;
"Pingshuo Mining Area"	the coal mining area located in Shanxi Province in China which mainly consists of the Antaibao Open Pit Mine, the Anjialing Open Pit Mine and the Anjialing Underground Mine;
"PRC" or "China" or the "People's Republic of China"	the People's Republic of China. Except where the context otherwise requires, references in this Prospectus to the PRC or China do not apply to China Hong Kong, China Macau or China Taiwan;
"PRC GAAP"	the PRC Accounting Standards and Accounting Regulations for Business Enterprises and its supplementary regulations;
"PRC National Audit Office" or "NAO"	National Audit Office of the PRC (中華人民共和國審計署);
"PRC National Bureau of the Statistics" or "Bureau of Statistics"	National Bureau of Statistics of the PRC (中華人民共和國國家統計局);
"Price Determination Date"	the date, expected to be on or around 13 December 2006 but no later than 17 December 2006, on which the Offer Price and the number of H Shares in the Global Offering is fixed for the purposes of the Global Offering;
"Promoter" or "Predecessor"	ChinaCoal Group;
"Province" or "province"	each being a province or, where the context requires, a provincial level autonomous region or municipality under the direct supervision of the central government of the PRC;
"PwC"	PricewaterhouseCoopers, our reporting accountants;
"QIBs"	qualified institutional buyers as defined in Rule 144A;
"Regulation S"	Regulation S under the U.S. Securities Act;
"Restructuring"	the restructuring of ChinaCoal Group in preparation for the listing of our H Shares on the Hong Kong Stock Exchange, the particulars of which are described in the sections entitled "Restructuring" and "Statutory and General Information — Further information about our Company — Our Restructuring" in Appendix X to this Prospectus;
"Restructuring Agreement"	the agreement entered into between ChinaCoal Group and us on 5 September 2006 in relation to the Restructuring. Pursuant to this agreement, ChinaCoal Group transferred to us substantially all of the

	assets, liabilities and interests of its coal operations, coking operations, coal mining equipment manufacturing operations and other operations in exchange for our Shares;
"RMB" or "Renminbi"	Renminbi Yuan, the lawful currency of the PRC;
"Rule 144A"	Rule 144A under the U.S. Securities Act;
"SACMS"	State Administration of Coal Mine Safety of the PRC (中華人民共和國國家煤礦安全監察局);
"SEPA"	State Environmental Protection Administration of the PRC (中華人民共和國國家環境保護總局);
"SAFE"	State Administration of Foreign Exchange of the PRC (中華人民共和國國家外匯管理局);
"SASAC"	State-owned Assets Supervision and Administration Commission of the State Council (國務院國有資產監督管理委員會);
"SAT"	State Administration of Taxation of the PRC (中華人民共和國國家税務總局);
"Savills"	Savills Valuation and Professional Services Limited, an independent property valuer;
"SAWS"	State Administration of Work Safety of the PRC (中華人民共和國國家安全生產監督管理總局);
"Services Agreement"	Integrated Materials and Services Mutual Provision Framework Agreement dated 5 September 2006 entered into between ChinaCoal Group and us, pursuant to which we were appointed by ChinaCoal Group as its exclusive coal export services provider to provide all export-related services ancillary to, and required for, coal exports;
"SFC"	the Securities and Futures Commission of Hong Kong;
"SFO" or "Securities and Futures Ordinance"	the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong), as amended, supplemented or otherwise modified from time to time;
"Shares"	shares of our Company of nominal value RMB1.00 each, comprising both Domestic Shares and H Shares;
"Shanghai Datun Energy"	Shanghai Datun Energy Resources Co., Ltd., in which we have a 62.43% shareholding. Shanghai Datun Energy's A shares are listed on the Shanghai Stock Exchange;

"Special Regulations"	the Special Regulations of the State Council on the Overseas Offering and Listing of Shares by Joint Stock Limited Companies (國務院關於股份有限公司境外募集股份及上市的特別規定), promulgated by the State Council on 4 August 1994, as amended, supplemented or otherwise modified from time to time;
"SRK"	Steffen Robertson and Kirsten (Australasia) Pty. Ltd., an independent mining and geological consultant. For qualifications, see "Appendix VI — Independent Technical Report";
"SRK Report"	an independent technical report published by SRK dated 6 December 2006. For qualifications, see "Appendix VI — Independent Technical Report";
"State," "state,", "PRC Government" or "government"	the Government of the PRC including all political subdivisions (including provincial, municipal and other regional or local government entities) and instrumentalities thereof;
"State Council"	State Council of the PRC (中華人民共和國國務院);
"Supervisors"	the members of the Supervisory Committee of our Company;
"Track Record Period"	the period comprising the three years ended 31 December 2005 and the six months ended 30 June 2006;
"Underwriters"	collectively, the Hong Kong Underwriters and the International Underwriters;
"Underwriting Agreements"	collectively, the Hong Kong Underwriting Agreement and the International Underwriting Agreement;
"United States" or "U.S."	the United States of America;
"U.S. Securities Act"	the U.S. Securities Act of 1933, as amended, and the rules and regulations promulgated thereunder;
"U.S.$" or "US dollars"	United States dollars, the lawful currency of the United States;
"VAT"	value-added tax; and
"WTO"	the World Trade Organization.

This glossary contains explanations of certain technical terms used in this Prospectus. Such terminology and meanings may not correspond to standard industry meanings or usages of those terms.

"ash content"	ash is the inorganic residue remaining after the combustion of coal which affects the burning characteristics of coal;
"calorific value"	the heat of combustion of a unit quantity of coal. It is expressed in British Thermal Units per pound (BTU/lb), kilocalories per kilogram (kcal/kg) or megajoules per kilogram (MJ/kg). The gross calorific value includes all heat of vaporization of water. Net calorific value assumes all water is in the vapor phase;
"clean coal technology"	a comprehensive new technology that aims to improve various aspects of coal production, including coal processing, combustion, conversion and pollution control;
"coal"	a solid, brittle, more or less distinctly stratified combustible carbonaceous rock, formed by partial to complete decomposition of vegetation;
"coal blending"	mixing coal in predetermined and controlled quantities to adjust the chemicals or burning characteristics of the resulting coal or to produce a more uniform product;
"coal loadout depot"	a collective term for the various facilities where coal is loaded onto trains;
"coal processing"	the process of selectively removing gangue material from raw coal through beneficiation at a coal processing plant;
"coal seam"	a stratum that contains coal within a defined zone;
"coke"	bituminous coal from which the volatile components have been removed;
"coking coal"	coal which is used in the process of manufacturing steel, also known as metallurgical coal;
"coal products"	coal saleable as products, which may include varying proportions of raw and cleaned coal;
"dense-media cyclone processing", or "DMC"	a coal processing method that processes raw coal by using heavy dense media with a density between coal and waste minerals;
"FOB"	free on board. An FOB contract price does not include insurance and freight from the point of shipping;

"inferred coal resources"	an inferred coal resource is a coal resource for which tonnage, grade and mineral content can be estimated with a low level of confidence. It is inferred from geological evidence and is based on assumed but unverified geological and/or grade continuity. It is based on information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes which may be limited or of uncertain quality and reliability;
"jig processing", or "Jig"	a coal selection method which processes coal in terms of grain density by vibration of a screen;
"JORC Code"	Australian Code of Reporting of Mineral Resources and Ore Reserves, effective December 2004;
"Kcal/kg"	kilocalories per kilogram;
"longwall mining"	a fully mechanized underground mining method in which the mining face is supported by a hydraulic shield while the coal is excavated by a shearer and then transported to the surface by electronic conveyors. When mining of the longwall panel has been completed, the longwall system is moved to a new mining area. The key characteristics of longwall mining include high productivity, comparatively high recovery rates, safety and reliability;
"m^2"	square meters;
"marketable coal reserves".....	the tonnages of coal reserves, at specified moisture and quality, available for sale after accounting for processing plant yields. Marketable coal reserves are reported in terms of probable reserves or proved reserves;
"metallurgical coal"	see "coking coal";
"mining face"	the working area where the extraction of overburden or coal takes place in an underground or open pit mine;
"moisture content"	the amount of moisture in coal, expressed as a percentage of the weight of the coal. Moisture content of coal varies by the type of coal, the region where it is mined and the location of coal within a seam. In general, high moisture content decreases the thermal value and increases the weight of the coal. Two types of moisture can be found in coal, including: (i) free or surface moisture, which can be removed by exposure to air, and (ii) inherent moisture, which is trapped in the coal and can be removed by heating the coal;
"open pit mining"	a mining method which involves removing the overlying strata or overburden and extracting the coal;

"overburden"	the soil and rock that must be removed in order to expose an ore deposit;
"processing plant"	a plant which processes raw coal to improve its quality, so as to convert the raw coal into coal products for specified uses;
"processing plant yield"	the processed coal as a percentage of feed raw coal during coal processing;
"primary energy"	energy embodied in the natural resources that has not undergone any form of artificial conversion or transformation;
"probable reserves"	probable reserves under the JORC Code, which are the economically mineable part of an indicated coal resource and, in some circumstances, measured coal resource. They include diluting materials and allowances for losses which may occur when the material is mined. Probable reserves are based on feasibility studies and other appropriate assessments and take into account relevant mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors. These assessments demonstrate at the time of reporting that extraction could reasonably be justified. Unless otherwise indicated, in this Prospectus, "probable reserves" refers to marketable probable reserves;
"proved reserves"	proved reserves under the JORC Code, which are the economically mineable part of a measured coal resource. They include diluting materials and allowances for losses which may occur when the material is mined and after accounting for processing plant yield. Proved reserves are based on feasibility studies and other appropriate assessments and take into account relevant mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors. These assessments demonstrate at the time of reporting that extraction could reasonably be justified;
"raw coal"	a mineral in its raw, untreated state subsequent to extraction and prior to sizing and other beneficiation;
"reclamation"	in the context of mining, refers to the process of restoring land and the environment to their original state following mining activities. The process commonly includes "recontouring" or reshaping the land to its approximate original appearance, restoring topsoil and planting native grass and ground cover. Reclamation operations generally are initiated before the mining of a site is completed;
"recoverable reserves"	proved and probable reserves prior to adjustment for preparation plant yield;

"recovery rate"	the percentage of coal that can be recovered from the coal deposits at existing mines;
"resource utilization rate"	percentage of total resources that can be utilized in existing mines;
"semi-hard coking coal".....	a strong and adhesive type of coal that has medium to high volatility, which is blended with other coal to produce stronger coke;
"sulphur content"	sulphur contained in coal. Sulphur content may vary from seam to seam and sometimes within each seam. "Low sulphur" coal has a variety of definitions but typically is used to describe coal containing 1% or less sulphur. When coal is burned, it produces sulphur dioxide, the amount of which varies depending on the chemical composition and the concentration of sulphur in the coal;
"surface-and-tunnel extraction mining"	a mining method that employs both techniques of open pit and underground mining to reduce production cost and enhance resource utilization rate;
"thermal coal".....	thermal coal, also normally referred to as "steam" or "steaming coal," is used in combustion processes by power producers and industrial users to produce steam for power and heat. It is generally lower in heat and higher in volatile matter than coking coal;
"tonne kilometer"	load in tonnes multiplied by the distance transported in kilometer;
"truck-and-shovel mining".....	a mining method that involves the removal of overburden and the recovery of coal in open pit mines by shovels, which load the coal into trucks for transportation to preparation plants;
"underground mine"	a mine where the coal is extracted without removing the overburden by using shafts and tunnels;
"underground mining"	the extraction of coal or its products from rock strata by underground mining methods such as room-and-pillar mining, shortwall (continuous mines) mining and longwall mining; and
"volatility"	the percentage of volatile matter contained in coal. All coking coal contains volatile matter, which refers to substances, other than water, that are given off as gas or vapor when coal is heated under certain prescribed conditions. The volatility of coking coal determines the percentage of feed coal that actually becomes coke, known as coke yield. The lower the volatile fraction, the higher the coke yield. Volatile matter is measured on a dry mineral matter-free basis.

You should carefully consider all of the information in this Prospectus including the risks and uncertainties described below before making an investment in our H Shares. You should pay particular attention to the fact that we are a PRC company, our business is located in China and we are governed by a legal and regulatory environment that may differ from that which prevails in other countries and jurisdictions. Our business, financial condition or results of operations could be materially and adversely affected by any of these risks. The trading price of our H Shares could decline due to any of these risks, and you may lose all or part of your investment.

There are certain risks involved in our operations and many of these risks are beyond our control. These risks can be characterized as: (i) risks relating to China's coal industry and our businesses; (ii) risks relating to the Peoples' Republic of China; and (iii) risks relating to the Global Offering.

RISKS RELATING TO CHINA'S COAL INDUSTRY AND OUR BUSINESSES

Our business and results of operations are susceptible to the cyclical nature of coal markets and are vulnerable to fluctuations in coal prices.

As a significant percentage of our revenue is derived from coal and coal-related operations, our business and results of operations are substantially dependent on the domestic and international supply of and demand for coal. Historically, the domestic and international markets for coal and coal-related products have at times experienced alternating periods of increased demand and excess supply. The fluctuations in supply and demand are caused by numerous factors beyond our control, which include, but are not limited to:

- global and domestic economic and political conditions and competition from other energy sources;
- the rate of growth and expansion in industries with high coal demand, such as the power and steel industries; and
- the indirect influence on domestic coal prices by the PRC Government through its regulation of on-grid tariffs and the allocation of transportation capacity on the national rail system.

There can be no assurance that the domestic or international demand for coal and coal-related products will continue to grow, or that the domestic or international markets for coal and coal-related products will not experience excess supply. A significant decline in demand for, or an over-supply of, coal and coal-related products may have a material adverse effect on our business, results of operations and financial condition.

Our business operations are extensively impacted by the policies and regulations of the PRC Government. Any policy or regulatory changes may cause us to incur significant compliance costs.

We, like other coal producers in China, are subject to extensive national, provincial and local governmental regulations, policies and controls. The liabilities, costs, obligations and requirements associated with these laws and regulations may be significant and may delay the commencement of, or cause interruptions to, our operations. Failure to comply with the relevant laws and regulations in our mining operations may even result in the suspension of our operations and thus adversely and materially affect our business and results of operations. Additionally, there can be no assurance that the relevant government agencies will not change such laws or regulations or impose additional or more stringent laws or regulations. Compliance with such laws or regulations may require us to incur significant capital expenditures or other

obligations or liabilities. Specific governmental policies and regulations that have a significant effect on our operations include:

Mining safety regulations. The SACMS is responsible for implementing and supervising the implementation of the relevant safety laws and regulations applicable to coal mines and coal mining operations, as well as conducting regular safety supervision and inspections of coal producers pursuant to the applicable production safety and mining safety laws and regulations. Coal producers that fail to comply with the relevant safety laws and regulations are subject to fines, penalties or even suspension of operations. We cannot predict the timing or the outcome of such safety inspections. If we fail to comply with the relevant safety laws and regulations or fail to pass the SACMS safety inspections, there could be material adverse effects on our corporate image, the reputation and credibility of our management, our financial condition and results of operations. Any remedial measures we are required to adopt may be costly and would adversely impact our financial condition.

Environmental protection policies. We are subject to extensive and increasingly stringent environmental protection laws and regulations that impose fees for the discharge of waste substances, require the establishment of reserves for reclamation and rehabilitation, and impose fines for serious environmental offences. The PRC Government, adopting a rigorous approach when enforcing the applicable laws and regulations and implementing increasingly stringent environmental standards, may shut down any facility that fails to comply with orders requiring it to correct or cease operations that raise environmental concerns. If we fail to comply with existing or future environmental laws and regulations, we may be required to pay penalties or fines or take remedial actions, any of which could have a material adverse effect on our business, operations, financial condition and results of operations.

License and export quota system. Our export of coal and coke is subject to an export permit and quota system. In both 2005 and 2006, the nationwide export quota for coal was set at approximately 80.0 million tonnes, of which the NDRC and MOFCOM have allocated 38.2 million tonnes to ChinaCoal Group. Furthermore, in both 2005 and 2006, the nationwide export quota for coke was set at approximately 14.0 million tonnes, of which the MOFCOM has allocated 650,000 tonnes in 2005 and 570,000 tonnes in 2006 to ChinaCoal Group. If the PRC Government were to reduce the national export quota as a whole and/or the export quota allocated to ChinaCoal Group, our overseas sales may decline, which could adversely affect our financial condition and results of operations if we cannot increase our domestic coal and coke sales to compensate for the reduction in overseas sales.

Coal exploration and mining rights. The exploration and exploitation of coal reserves in China are subject to the approval of, and registration with, the relevant PRC Government authorities. In seeking to obtain an exploration license, a coal producer may either apply directly to the MLR or participate in a public bidding process. Once the initial exploration reveals a deposit worthy of development, the exploration license holder must apply to the MLR in order to obtain a mining right permit. We cannot assure you that we will be successful in procuring the necessary exploration rights, that any initial exploration work will reveal a deposit worthy of development, or that we will be successful in procuring the necessary mining right permit. Failure to procure exploration or exploitation and mining rights could have a material adverse effect on our business and results of operations.

In addition, the NAO from time to time performs audits on state-owned enterprises, such as ChinaCoal Group, our parent company. ChinaCoal Group has not yet been audited by the NAO during the Track Record Period. We cannot predict whether ChinaCoal Group will be the subject of a future audit, nor can we predict whether material irregularities with respect to ChinaCoal Group's businesses will be found.

As substantially all of ChinaCoal Group's businesses are transferred to our Company, the discovery of such irregularities in these businesses may materially adversely affect our corporate image, the reputation and credibility of our management and our business and financial condition.

Our continuing success depends on our ability to continue acquiring and developing coal resources and obtaining the relevant mining rights and land use rights.

Our continuing success depends on our ability to conduct successful exploration and development activities at our existing mines and properties and to acquire valuable recoverable coal resources.

Recoverable reserves at our existing mines decline as we produce coal. According to the SRK Report, as of 30 June 2006, we had a total of 3,420.0 million tonnes of total recoverable reserves. Based on the recoverable reserves and our 2005 production levels, we expect to be able to achieve stable production for the next 68 years. Over time, we may not be able to mine our reserves as profitably as we do currently. In addition, our reserve estimates may change substantially if new information subsequently becomes available. Variations in recovery rates due to factors such as geological conditions and level of technology may ultimately result in revisions to our estimated reserves, and fluctuations in commodities prices and changes in production costs may impact the extent, degree and probability of success of our exploitation activities. If these factors were to result in a substantial reduction of our recoverable reserves at one or more of our major mines, it could materially and adversely affect our financial condition, results of operations and prospects. For more information on our reserves, including the qualifications to the SRK Report, see "Appendix VI — Independent Technical Report".

Our strategies also include acquiring additional mining rights to develop, explore and exploit new coal reserves. We intend to increase our reserve base through applications for new coal reserves, mergers and acquisitions of and joint venture investments in other mines and cooperation with other mine operators. However, we do not have specific timetables for these plans and we cannot assure you that our planned development and exploration projects and acquisition initiatives will result in significant additional reserves or that we will have continuing success developing additional mines. Most of our mining operations are conducted on properties to which we own or lease land use rights. In addition, in order to develop our reserves, we must receive various governmental permits. See "Regulations". We cannot predict whether we will continue to receive the permits or be granted the rights necessary for us to operate profitably in the future.

Our business requires significant and continuous capital investment. Our capital investment projects are subject to governmental approval, may exceed our original budgets, may not generate the expected benefits or may not be completed.

We are in the process of constructing new coal mines and ancillary facilities located at the Pingshuo Mining Area, the Liliu Mining Area, the Datun Mining Area, the Nanliang Mining Area and the Xiangning Mining Area. According to the SRK Report, we incurred RMB1,435.0 million, RMB1,503.0 million and RMB1,581.0 million, respectively, as capital expenditures for our coal operations in the years ended 31 December 2003, 2004 and 2005. We are also investing in construction and capacity expansion projects for coking facilities. Our plans to develop new mining and production projects and to upgrade and expand our facilities require significant capital expenditures. We estimate that the total capital expenditures required for our development and expansion projects until the end of 2008 may be as much as RMB20.6 billion. See "Business" and "Financial Information". Furthermore, like all large enterprises in China, our expansion and development projects are subject to the PRC Government's approval. We cannot assure you that the PRC

Government will grant us the necessary approvals for each of our projects. If we are not granted the required approvals in time or at all, we may not be able to execute our expansion and development projects as planned.

We have in the past funded our capital expenditures primarily by cash generated from our operations and through long-term bank loans. We cannot assure you that the cash generated from our operations will be sufficient to fund our development and expansion plans. We may also require further funding for debt servicing, working capital, investments, potential acquisitions, joint ventures and other corporate requirements. External funding is subject to various factors that are beyond our control, including market conditions, the PRC Government's approval, credit availability and interest rates. If we are unable to secure sufficient external funds to finance our capital investment projects, our business, financial condition and results of operations could be materially and adversely affected. Additionally, actual capital expenditures for our capital investment projects may significantly exceed our budgets because of various factors beyond our control. If our actual capital expenditures for investment projects significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations and prospects. Even if we complete the expansion, development and construction projects as planned, we cannot assure that such projects will be as profitable as expected.

We may experience a shortage of reliable and adequate transportation capacity for our coal products and any increase in transportation costs could have a material adverse effect on our business and results of operations.

Like other coal producers, we depend upon a combination of rail, sea and road transportation to deliver coal to our customers. Of the various means of coal transportation, railway transportation is the principal method we utilize. During the Track Record Period, a substantial amount of our coal was delivered via major railways to domestic customers or to seaports for trans-shipping. In addition to a 180-km rail line that Shanghai Datun Energy legally and validly owns and operates for transporting coal products produced in the Datun Mining Area, we also own and operate four other mine railways used for coal transportation. We cannot assure you that transportation capacity on the major rail lines we generally utilize for the transportation of our coal products, which is currently allocated by the PRC Government, will continue to be sufficient for our operations. If we cannot secure sufficient railway transportation capacity and are unable to secure economically feasible alternative transportation methods to transport our coal products during disruptions of transportation systems caused by weather-related or other problems beyond our control, such as accidents, capacity constraints or other events, our results of operations may be materially and adversely impacted.

The development of China's railway system has not fully kept pace with the coal industry's transportation requirements, and there have been instances in certain areas of China where railway transportation capacities could not meet demand. We have in the past experienced delays in securing transportation capacity or rail cars. The PRC Government is in the course of increasing rail capacity to relieve the pressure caused by the increasing demand for railway transportation. However, we cannot assure you that we will continue to be allocated sufficient rail transport capacity or that we will not experience any significant delay in transporting our products.

Like other coal producers in China, transportation costs represent a significant portion of our total cost of coal. Any significant increase in our transportation costs could have a negative effect on the competitiveness of our coal and coal-related products, which may in turn have an adverse effect on our business and results of operations.

The coal reserve data in this Prospectus are estimates and may be inaccurate, and hence our projected future production volumes, revenue and capital expenditures, which are based on these estimates, may differ materially from actual figures.

We base our production, revenue and expenditure plans on our coal reserve data. The coal reserve data were estimated by us based on the result of geographical exploration, and were reviewed and verified by SRK. The coal reserve data are only estimates and may differ materially from our actual mining results. There are many factors, assumptions and variables beyond our control that result in inherent uncertainties in estimating reserves. Our actual volume of reserves and rates of production may be different from these estimates.

Fluctuations in the price of coal, production costs and transportation costs of coal or a variation in recovery rates may render it necessary to revise the estimates of coal reserves. If such a revision results in a substantial reduction in recoverable reserves at one or more of our major mines, it could materially and adversely affect our results of operations, financial condition and growth prospects. For more information on our reserves, including the qualifications to the SRK Report, see "Appendix VI — Independent Technical Report".

Accidents at our mines or other neighboring coal mines could materially and adversely affect our business and the safety of our coal operations.

Underground mining activities are inherently dangerous if the mines have high concentrations of methane gas, as such activities may result in explosions caused by sparks. Some of the coal mines we currently operate are underground mines, and a small number of them such as the Shaqu Mine in the Liliu Mining Area operated by the Huajin Joint Venture have high concentrations of methane gas. Higher concentrations of methane gas increase the likelihood of accidents.

To prevent underground gas explosions at our coal mines, we control our coal mining operations and the amount of coal we produce based in part on the methane gas concentration and the proper functioning of the ventilation system in our underground coal mines in compliance with the PRC Government's safety requirements. We cannot assure you that the safety measures we currently implement in our mines and the ventilation and methane gas sensor systems we utilize are sufficient to prevent all possible accidents such as gas explosions. An accident at any of our underground mines may have a material adverse effect on our financial condition, results of operations and corporate image.

In addition, mining accidents or safety hazards occurring at neighboring mines operated by local, small mining companies could have a severe impact on our coal mining operations and even create safety hazards in our coal mines. With the involvement of local governments, we are currently negotiating with the mining companies that operate these adjacent mines regarding the possibility of consolidating their operations in order to achieve safer production and higher production efficiency. However, there can be no assurance that such integration can be achieved. The occurrence of any accident at these neighboring mines could interfere with and materially and adversely affect our business as well as the safety of our coal mining operations.

We may not have sufficient insurance coverage against potential operational risks.

Our business operations, particularly our coal mining operations, involve significant risks and occupational hazards that are inherent in such activities and may not be completely eliminated through the implementation of preventive measures. These risks and hazards could result in personal injury, damage to or destruction of properties or production facilities, environmental damage, business interruption, possible legal liability, damage to our business reputation and corporate image and, in severe cases, fatalities. The average

fatality rate of all of our mines, measured by the number of fatalities that occurred in our operational mines for every million tonnes of raw coal we produced, was 0.12, 0.15 and 0.08 during the years ended 31 December 2003, 2004 and 2005, respectively. We cannot guarantee that safety-related accidents will not occur in the future due to adverse operating conditions. Adverse operating conditions that we may experience include:

- unexpected safety-related mining accidents, including fires;
- mining and processing equipment failures and unexpected maintenance problems;
- unfavorable weather conditions; and
- unorganized mining activities by local small mining companies conducted in the surrounding areas of our operational mines or mines under development.

Any of the foregoing could have an adverse effect on our operations and revenue, or increase our production costs, thereby reducing our profit derived from our operations.

The occurrence of any of these events, and the consequences resulting from them, may not be covered adequately, or at all, by our insurance policies. None of our mining operating assets, including our longwall and continuous miner units, coal processing plants and coal loading equipment, are covered by any property insurance. See "Business — Insurance." Losses incurred or payments we may be required to make may have a material adverse effect on our financial condition and results of operations to the extent such losses or payments are not insured or the insured amount is not adequate. Moreover, consistent with what we believe is the industry standard, we do not carry any business interruption insurance or third party liability insurance.

There may be significant reductions in purchases by our major customers and/or terminations of our long-term sales contracts.

We sell coal produced by us and resell coal purchased from third parties on a trading basis. In 2005, a substantial amount of our coal sales were made under long-term sales contracts. These long-term sales contracts are therefore important to the stability and profitability of our operations. As of the Latest Practicable Date, our long-term coal sales contracts generally had remaining terms ranging from one to five years. If a substantial portion of our long-term sales contracts expires or is terminated and we are unable to either renew these contracts or to enter into new contracts with alternative buyers at comparable prices and on comparable terms, or at all, our financial condition and results of operations may be materially and adversely affected.

We rely on our major customers for a substantial portion of our revenue. For the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2005 and 2006, we derived 25.0%, 25.2%, 22.9%, 24.9% and 37.9%, respectively, of our total revenue from sales to our five largest external customers, which include large power plants and steelmakers. If any one of these customers significantly reduces its purchases of coal from us or if we are unable to sell coal to them on similarly favorable terms or at all, our financial condition and results of operations may be materially and adversely affected.

We may be unable to compete effectively against other coal producers and sellers.

We operate in a competitive market. Competition in the coal industry is based on factors such as price, production capacity, coal type and quality, transportation capability and costs, blending capability and brand name recognition. We face competition in both the domestic and international markets from other large domestic and foreign coal mining companies and coal traders. Such domestic and foreign competitors may have greater access to financial resources, higher levels of integration, better operating efficiency, more

advanced technologies, or longer operating histories. Some of the domestic coal mining companies compete for the rights to obtain and exploit coal reserves. These companies may have greater coal production capacities, lower transportation costs, and greater financial, marketing, distribution and other resources than we do. If we are unable to improve our product quality and price competitiveness, maintain our operating efficiency and control our costs in connection with our expansion, raw materials and energy usage, our growth opportunities may be limited and our revenue and profitability may be adversely affected.

We cannot guarantee that future increases in competition in both the domestic and foreign markets will not have a material adverse effect on our financial condition and results of operations.

Our indebtedness may materially and adversely affect our financial performance and results of operations.

Our substantial indebtedness could affect our financial performance. We have relied upon both short-term and long-term borrowings to fund a substantial portion of our capital expenditures and operations and expect to continue to do so in the future. As of 31 December 2005, we had total borrowings of approximately RMB10.7 billion. As of 30 June 2006, we had total borrowings of approximately RMB11.6 billion. Our ability to repay the principal and pay the interest on our debt depends substantially on the operating performance of our subsidiaries, which in turn depends on the general conditions of the domestic and global economy and the economic conditions of the particular market segments they serve, many of which are beyond our control. We cannot assure you that our business will generate sufficient cash flow from our operations or that future borrowings under our revolving credit facilities will continue to be available to enable us to service our debt or to fund our other liquidity needs. Moreover, we may incur additional debt to fund our planned capital expenditures and future projects. The level of our indebtedness could have important consequences to you, including, but not limited to: (i) limiting our ability to pay dividends and satisfy our debt obligations; (ii) increasing our exposure to general adverse economic and industry conditions; (iii) limiting our ability to obtain additional financing to fund future capital expenditures, working capital, research and development or other business development and expansion projects; (iv) requiring us to set aside a substantial portion of cash flow from our operations for the repayment of the principal of, and the interest on, our indebtedness, thereby reducing the availability of cash flow to fund capital expenditures, working capital, research and development or other business development expansion projects; and (v) limiting our ability to plan for, or react to, changes in our business.

We may be required to sell assets, seek additional capital or restructure or refinance our debt as a result of changes in our operating conditions. If we are unable to service our debt, such inability could result in an event of default which, if not cured or waived, could have a material adverse effect on our business, financial condition and results of operations.

Our dividend distributions to our existing shareholders made prior to the completion of the Global Offering should not be treated as indicative of our Company's future dividend policy. These dividend distributions before the Global Offering may adversely impact the total value of our assets and your investment.

In accordance with the *"Provisional Regulations Relating to Corporate Reorganization of Enterprises and Related Management of State-owned Capital and Financial Treatment"* (the *"Provisional Regulations"*) issued by the MOF, we are required to make a distribution to ChinaCoal Group, our sole shareholder prior to the Global Offering, in the amount equal to the difference in our Company's net asset value as at 1 October

2005, the date immediately following our last valuation date, and as at 21 August 2006, the date immediately prior to the date on which our Company was incorporated.

On 23 August 2006, we resolved, as a commercial decision, to make the Special Dividends distributable to ChinaCoal Group, which is equal to all of our distributable profits generated from 22 August 2006 to the date at the end of the month prior to the date of capital verification for the Global Offering.

Holders of our H Shares under the Global Offering will not be entitled to the Pre-establishment Distribution or the Special Dividends. ChinaCoal Group is the only shareholder entitled to the Pre-establishment Distribution and the Special Dividends. In addition, any distributable profits available for distribution to our shareholders after the Global Offering will exclude the Pre-establishment Distribution and the Special Dividends. The payment of the Pre-establishment Distribution and the Special Dividends may adversely impact the total value of our assets and your investment.

The Pre-establishment Distribution and the Special Dividends are not indicative of the dividends that our Company may declare or pay in the future. We cannot guarantee whether and when any dividends will be paid in the future and the amount of dividends that we have declared historically are not indicative of the dividends that we may pay in the future. Details of our Company's dividend policy after completion of the Global Offering are set out in the section headed "Financial Information — Dividend policy". The declaration, payment and the amount of any future dividends will be at the discretion of our Board and will depend upon general business conditions and strategies, our financial results and capital requirements, the interests of our shareholders, taxation conditions, statutory and regulatory restrictions and other factors that our Board deems relevant.

As stipulated under PRC law, dividends may be paid only out of distributable profits, which are our retained earnings, as determined in accordance with PRC GAAP and IFRS, whichever is lower, less allocations to our statutory and discretionary common reserve funds. Any distributable profits that are not distributed in a given year will be retained and available for distribution in subsequent years. The calculation of distributable profits under PRC GAAP is different from the calculation under IFRS in certain respects. As a result, our operating subsidiaries may not have distributable profits as determined under PRC GAAP, even if they have profits for that year as determined under IFRS, or vice versa. Accordingly, we may not receive sufficient distributions from our subsidiaries to enable us to make dividend distributions to our shareholders in the future, including in respect of periods in which our financial statements indicate that our operations have been profitable.

Our profitability and ability to operate our business effectively are dependent on the fulfillment by ChinaCoal Group of its obligations under certain agreements entered into in connection with our Restructuring.

In connection with the Restructuring, we entered into certain agreements with ChinaCoal Group, including a Non-Competition Agreement, the Restructuring Agreement and a number of connected transaction agreements. See "Relationship with ChinaCoal Group" and "Connected Transactions".

Under the Non-Competition Agreement, ChinaCoal Group agreed that, other than the Group Retained Businesses described under "Relationship with ChinaCoal Group", it will not compete with our core businesses. ChinaCoal Group also granted us options and pre-emptive rights to acquire the Group Retained Businesses and certain future businesses from ChinaCoal Group. Under the Coal Export and Sales Agency Framework Agreement, we appointed ChinaCoal Group as our non-exclusive export and sales agent for the export of our coal products. We also entered into the Services Agreement with ChinaCoal Group whereby

ChinaCoal Group appointed us as its exclusive coal export services provider to provide all export-related services to other coal producers which are ancillary to and required for coal exports. In addition, ChinaCoal Group agreed under the Restructuring Agreement to indemnify us for losses and expenses arising from certain matters that have been agreed upon. The fulfillment by ChinaCoal Group of contractual obligations pursuant to these agreements may therefore have a significant impact on our profitability and ability to operate our business effectively. Failure by ChinaCoal Group to fulfill its obligations under any of these agreements may have a material adverse effect on our financial condition, results of operations and future prospects.

We will be controlled by ChinaCoal Group, whose interests may differ from those of our other shareholders.

After the Global Offering, ChinaCoal Group will own approximately 68.25% of our outstanding shares. As a controlling shareholder, ChinaCoal Group will be able to direct the election of all of the members of our Board of Directors and exercise a controlling influence over our business and affairs, including, but not limited to, decisions with respect to:

- mergers or other business combinations;
- the acquisition or disposition of assets;
- the issuance of any additional shares or other equity securities;
- the timing and amount of dividend payments; and
- management of our Company.

As our directors may serve concurrently as managers or officers of ChinaCoal Group, there may be an appearance of conflicts of interest. Furthermore, we cannot give any assurance that the directors appointed by ChinaCoal Group will always vote in a way that is in the best interest of our other shareholders.

Any material dispute between our Company and a joint venture partner may adversely affect the results of operations of the relevant joint venture company and our Company.

Among the assets transferred to us by ChinaCoal Group are certain joint venture companies, including the Huajin Joint Venture and Shaanxi Nanliang Coal Co., Ltd. If a dispute arises between any such joint venture partner and us in connection with the performance of the party's obligations or the scope of a party's responsibilities under the relevant joint venture agreement, the parties may not be able to resolve their differences through negotiation or arbitration. In the event such a material dispute cannot be resolved in a timely manner, the business and operations of the relevant joint venture company may suffer, and the joint venture agreement may even be terminated by mutual consent of the parties or as a result of a material breach by one of them.

We cannot guarantee that we and any such joint venture partner will continue to agree on management matters due to possible conflicts of interest, and any disagreement may result in a dispute between us and the relevant joint venture partner. In the event of a deadlock at a board meeting of such joint venture company, if we cannot resolve the disagreement in a timely manner through the dispute resolution mechanisms provided in our joint venture agreements, such deadlock may cause the board of directors of the relevant joint venture company to fail to make, or delay in making, an important decision, which may adversely affect the financial condition and results of operations of that joint venture company.

Any of the foregoing events could have a material adverse effect on our financial condition and results of operations.

Our Company has a limited operating history as an independent entity, which may affect the efficiency of our operations and your ability to evaluate our business and growth potential.

We were established on 22 August 2006 as a result of the Restructuring, under which ChinaCoal Group transferred to us substantially all of its assets, liabilities and interests in relation to its coal, coking, coal mining equipment manufacturing and other operations in exchange for an equity interest in us in the form of state-owned shares. We have a limited operating history as a separate operating entity, which may impact your ability to evaluate our business and prospects. As each of the subsidiaries of ChinaCoal Group that merged into us had different operating histories, we may experience difficulties in integrating our various business operations to function as a single entity. We may also experience difficulties in managing our future growth and the increased scale of our operations. To take full advantage of the integration of our operations and capture the resulting synergies, we plan to expand the scope of our operations through capital investments and expansions, including the construction of new coal mines and coal processing plants for the production of thermal coal and coking coal. Such expansions and the need to integrate new operations may place a significant strain on our managerial, operational and financial resources. If we are unable to manage our growth efficiently or fully integrate the new operations with our existing operations, our financial condition, results of operations and prospects could be materially and adversely affected.

The development of our management and internal control measures has largely coincided with the evolution of our principal businesses. As we transition from a coal trading company to a diversified business platform integrating coal production and sales, there has been an increasing emphasis on management and internal control mechanisms to address issues relating to coal production, such as mining safety and environmental protection and financial reporting. We are currently working on improving our internal control measures, including: (i) standardizing control policies and procedures among each of our operating segments; (ii) generating more detailed operating data of each operating segment; and (iii) raising the level of experience among our financial and accounting staff. We cannot assure you that we will be able to design and implement an effective management structure and internal control mechanisms that timely and adequately respond to our expanded scope of operations, or that we will be able to implement our reorganization and restructuring plan efficiently or successfully.

Our coal mining equipment manufacturing business may be materially and adversely affected by an economic downturn in the domestic coal industry or a decrease in domestic coal consumption, and our coal mining equipment may subject us to product liability claims.

We are the largest coal mining equipment manufacturer in China based on our 2005 sales revenue. At present, a significant portion of our coal mining equipment sales is derived from domestic sales to major Chinese coal producers. The demand for coal mining equipment is largely driven by the overall business environment of the coal mining industry. A significant decrease in market demand for coal or in coal consumption will likely have a material and adverse effect on the overall business environment of the coal mining industry, which would in turn adversely affect demand for our coal mining equipment.

In addition, if coal mining equipment manufactured by us proves to be defective and results in our customer's financial losses and/or personal injuries, we may be subject to product liability claims under PRC laws. We do not carry product liability insurance and have not implemented any other similar remedy scheme. We cannot give any assurance that we or any of our subsidiaries engaged in the manufacturing of coal mining

equipment will not be exposed to future product liability claims. If any such claim is successful, our business and results of operations may be materially and adversely affected.

Our coking operations are dependent on the domestic and international supply of and demand for coke and may be affected by macro-economic regulations and controls.

Our revenues from coking operations are substantially dependent on the domestic and international supply of, and demand for, coke. The coking industry depends heavily on demand from steelmakers. A decrease in steel prices and steel production in the domestic market could cause a reduction in demand for coking coal and thus adversely affect our financial position and results of operations. In early 2004, the PRC Government implemented macro-economic control measures with an aim to tightening control over investment and over-production in, among other industries, the steel industry. These measures have resulted in a decrease in domestic demand for coking coal and coal-related products, such as coke.

We cannot assure you that the domestic or international demand for coke will continue to grow, or that the domestic or international markets for coke will not experience excess supply, both of which would have a negative impact on our coke operations. Moreover, continuing or further macro-economic measures implemented by the PRC Government may have a material adverse effect on our business, results of operations and financial condition.

We have not obtained the land use rights and building ownership rights to some of our mining sites and facilities.

As of the Latest Practicable Date, we have not obtained land use rights and building ownership rights to some of our mining sites and facilities, including: (i) 12 parcel of land which a total site area of approximately 0.77 million m^2 for which ChinaCoal Group has not established proper legal title and for which we are in the process of applying for the relevant land use rights certificates; (ii) 160 buildings with a total gross floor area of approximately 0.12 million m^2 for which ChinaCoal Group or its relevant subsidiaries does not have proper building ownership certificates; and (iii) 13 buildings that we leased from ChinaCoal Group and third parties that the landlords have not obtained proper building ownership certificates. As the coal mines and the coal and coking facilities are our main assets and operating facilities, our operating rights and production in connection with such mines or facilities may be adversely impacted if any third party claims that it is the legal or beneficiary owner of any of these lands or facilities. We cannot give any assurance that such ownership dispute or claim will not occur. If any such dispute or claim occurs, our business operations and our financial condition could be materially and adversely affected. In addition, there is no assurance that we would not be subject to any claims (including lawsuits) for compensation in respect of any illegal and/or unauthorized use of lands owned by third parties.

There is no assurance that our Company, our subsidiaries or our jointly controlled entities will continue to benefit from preferential tax treatment.

Under the current laws of the PRC, each of our Company, our subsidiaries and jointly controlled entities is subject to PRC income tax. The normal statutory PRC enterprise income tax rate is 33% of taxable income as determined in accordance with the relevant PRC income tax laws and regulations. However, PRC state and local tax laws provide for a number of preferential tax treatments applicable to different enterprises, industries and locations. We are currently subject to an income tax rate of 33%, while some of our subsidiaries and jointly controlled entities are currently subject to various preferential income tax rates, which has resulted in effective tax rates for our Company of 28.1%, 23.1%, 17.6%, 19.7% and 29.8% for the years ended

31 December 2003, 2004 and 2005 and the six months ended 30 June 2005 and 2006, respectively. There is no assurance that members of our Company will continue to benefit from preferential tax treatment previously and currently enjoyed by them. Any change in, or termination of, preferential tax treatment may result in an increase in our tax liability, which would have a negative impact on our net profits.

Exports of certain of our products are subject to new export tax policies, which may adversely affect our business and financial position.

The PRC Government announced on 14 September 2006 that the export tax refund for coal products applied to domestically produced coal would be terminated on 15 September 2006. All export coal products sold under sales contracts signed on or before 14 September 2006 may continue to be entitled to the full export tax refund if the corresponding coal export custom declaration was completed on or before 14 December 2006, and if the sales contracts were registered with the relevant tax authority before 30 September 2006. For the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, we enjoyed export tax refunds for coal products in the amounts of RMB155.5 million, RMB155.5 million, RMB138.7 million and RMB54.3 million, respectively. As of 30 June 2006, we had RMB31.1 million in export tax receivables for our coal products and the Directors of our Company believe that the existing export tax receivables can be fully recovered by fulfilling the legal requirements of the export tax refund. However, according to the newly issued coal export tax refund policy, we will not be able to enjoy similar refunds in the future. As such, our financial position may be adversely affected depending on the volume of coal we will export in the future.

In addition, in order to further encourage the import of resource-related commodities and commodities that are beneficial to the development of new technology, and also to control the export of resources and products involving high energy costs and high pollution, the Customs Tariff Committee of the State Council issued the "*Notice on Adjusting the Provisional Import and Export Tariff Rate of Certain Commodities*" (the "*Notice*") on 27 October 2006, which took effect on 1 November 2006. Under the *Notice*, certain coal and coke products exported by us will be subject to a 5% provisional export duty. The increased export tax on certain of our products may have a material and adverse effect on our operations.

Any changes in the political and economic conditions in the Asia-Pacific region may adversely affect our business and operations.

Our business includes sales of coal, coke products and coal mining equipment to overseas customers. Our overseas customers are mainly located in countries and territories in the Asia-Pacific region, such as Japan, South Korea and China Taiwan. See "Business" and "Appendix I — Accountants' Report". Changes in political or economic conditions in the Asia-Pacific region are difficult to predict. In particular, if the economic conditions in countries in which our overseas customers are located worsen as a result of changes in the Asia-Pacific region's overall economy, our overseas sales volumes could be substantially reduced, resulting in a negative effect on our results of operations, which may reduce our revenues. For example, the recession that many Asia-Pacific countries and regions experienced in 1998 and early 1999 was characterized by currency fluctuations, liquidity shortages and an overall economic decline. Declining economic growth rates in the future may reduce our revenues, causing us to be unable to invest the appropriate expenditures in the construction and development of mines and related mining equipment and facilities. Such events may negatively impact our business and results of operations over time.

Our Asia-Pacific operations also expose us to additional risks inherent in international operations, including:

- difficulties in enforcing agreements and collecting receivables through some Asian legal systems;

- fluctuations in foreign currency exchange rates, which may adversely affect our results of operations and the value of our Asian assets and investments; and
- implementation of foreign exchange controls or other restrictions.

Any of the above risks may adversely affect our financial condition and results of operations.

RISKS RELATING TO THE PEOPLE'S REPUBLIC OF CHINA

Substantially all of our assets are located in China and a significant amount of our revenue is sourced from China. Accordingly, our results of operations, financial condition and prospects are to a significant degree subject to economic, political and legal developments in China.

Adverse changes in China's economic, political and social conditions as well as governmental policies could have a material adverse effect on China's overall economic growth, which could in turn adversely affect our financial condition and results of operations.

The Chinese economy differs from the economies of most developed countries in many respects, including: (i) structure; (ii) level of government involvement; (iii) level of development; (iv) growth rate; (v) control of foreign exchange; and (vi) allocation of resources. The Chinese economy has been transitioning from a planned economy to a more market-oriented economy. For the past two decades, the PRC Government has implemented economic reform measures emphasizing the utilization of market forces in the development of the Chinese economy. We cannot predict whether changes in China's political, economic and social conditions, laws, regulations and policies will have any material adverse effect on our current or future business, financial condition and results of operations.

Changes in foreign exchange regulations and future movements in the exchange rate of Renminbi may adversely affect the financial condition and results of operations of our Company and our ability to pay dividends.

Current foreign exchange regulations have already significantly reduced the PRC Government's foreign exchange control on routine transactions under the current account, including trade and service-related foreign exchange transactions and payment of dividends. Under the existing foreign exchange regulations in the PRC, following completion of the Global Offering, we will be able to pay dividends in foreign currencies without prior approval from the SAFE by complying with certain procedural requirements. However, there is no assurance that these foreign exchange policies regarding payment of dividends in foreign currencies will continue in the future.

Our combined revenue is denominated in RMB, but our revenue derived from overseas sales to customers in the Asia Pacific Region is denominated in foreign currencies. We purchase equipment and spare parts for our equipment from overseas equipment suppliers in foreign currencies, mainly U.S. dollars. As a result, our operations are exposed to the fluctuation of exchange rates of the RMB against these foreign currencies. The value of the RMB may fluctuate due to a number of factors. Since 1994, the conversion of RMB into foreign currencies, including Hong Kong dollars and U.S. dollars, has been based on the rate set by the PBOC and the official exchange rate for the conversion of RMB to U.S. dollars has generally been stable. On 21 July 2005, the revaluation of the RMB resulted in an appreciation of the RMB against the U.S. dollar and the Hong Kong dollar by approximately 2%, and the RMB has appreciated by approximately an additional 3% since that date. As of 21 July 2005, the RMB was no longer pegged to the U.S. dollar but to a basket of currencies. The relaxation of the RMB-U.S. dollar peg may contribute to the volatility or increased fluctuations in the value of RMB. Further appreciation of RMB or any shortage of foreign currency may have

an adverse impact on our overseas sales, operating costs and financial conditions and may cause imported products which compete with those of our Company to be relatively less expensive for Chinese consumers. Conversely, depreciation of the RMB would adversely affect the value of, and dividends, if any, payable on, the H Shares by our Company in foreign currency terms.

The PRC legal system is continuously evolving and has inherent uncertainties, and the legal protections available to our shareholders may be limited.

Our Company was incorporated under PRC law. As substantially all of our businesses are conducted in the PRC, our operations are governed principally by PRC laws and regulations. The PRC legal system is based on written statutes, and prior court decisions can only be cited as reference. Since 1979, the PRC Government has promulgated laws and regulations in relation to economic matters such as foreign investment, corporate organization and governance, commerce, taxation and trade, with a view to developing a comprehensive system of commercial laws. However, due to the fact that these laws and regulations have not been fully developed, and due to the limited volume of published cases and their non-binding nature, the interpretation of PRC laws and regulations still involves a degree of uncertainty.

As a PRC company offering and listing its H Shares outside the PRC, we are subject to the Special Regulations and the Mandatory Provisions. Upon the listing of the H Shares on the Hong Kong Stock Exchange, the Hong Kong Listing Rules will become the principal basis for protection of shareholders' rights. The Hong Kong Listing Rules impose particular standards of conduct and disclosure on our Company, our Directors and the controlling shareholders of our Company. As far as we are aware, China has not published any case report that involves a request by a holder of H shares of a PRC company to exercise his or her rights under any constitutional document of any joint stock company with limited liability, the Company Law or any regulatory provisions of the PRC applicable to PRC joint stock limited companies.

It may be difficult to enforce any judgments obtained from non-PRC courts against our Company or our Directors, Supervisors or senior executive officers residing in China.

The legal framework to which our Company is subject is materially different from the Companies Ordinance or corporate law in Hong Kong and other jurisdictions, including the United States, with respect to certain areas, including the protection of minority shareholders. In addition, the mechanisms for enforcement of rights under the corporate governance framework to which our Company is subject are also relatively undeveloped and untested. However, in 2005, the PRC Company Law was amended to allow shareholders to commence an action against the directors, supervisors, officers or any third party on behalf of a company under certain circumstances, but as far as we are aware, China has not published any case report of such shareholders' derivative action under the newly amended PRC Company Law.

Although we will be subject to the Hong Kong Listing Rules and the Hong Kong Codes on Takeovers and Mergers and Share Repurchases, upon the listing of the H Shares on the Hong Kong Stock Exchange, the holders of H Shares will not be able to bring actions on the basis of violations of the Hong Kong Listing Rules and must rely on the Hong Kong Stock Exchange to enforce its rules. The Hong Kong Codes on Takeovers and Mergers and Share Repurchases do not have the force of law and only provide standards of acceptable commercial conduct for takeover and merger transactions and share repurchases in Hong Kong.

China does not have treaties providing for the reciprocal recognition and enforcement of judgments of courts with countries such as the United States, the United Kingdom and Japan, and therefore enforcement in the PRC of judgments of a court in these jurisdictions may be difficult or impossible. The Articles of Association and the Hong Kong Listing Rules provide that most disputes between holders of H Shares and our

Company, our Directors, Supervisors or officers arising out of the Articles of Association or PRC Company Law and related regulations concerning its affairs, such as the transfer of its H Shares, are to be resolved through arbitration.

There is currently no reciprocal recognition and enforcement of judicial decisions between the PRC and Hong Kong. Although the PRC and Hong Kong signed the "*The Arrangements Relating to Reciprocal Recognition and Enforcement of Civil and Commercial Judgments between the PRC and Hong Kong Pursuant to Choice of Court Agreements Between Parties Concerned*" on 14 July 2006, this arrangement is only another model to assist the judicature on reciprocal recognition over civil and commercial judgments between the PRC and Hong Kong and is not currently an effective rule or regulation. Once the PRC and Hong Kong enact the relevant legislation and implement the corresponding legal processes, each will announce the respective effective and execution dates. In addition, on 18 June 1999, an arrangement was made between Hong Kong and the PRC for the reciprocal enforcement of arbitral awards. This arrangement, made in accordance with the spirit of the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards, was approved by the Supreme Court of the PRC and the Hong Kong Legislative Council and became effective on 1 February 2000. Under the arrangement, awards that are made by the PRC arbitral authorities recognized under the Arbitration Ordinance of Hong Kong can be enforced in Hong Kong, and awards made by Hong Kong arbitral authorities are also enforceable in the PRC. However, so far as we are aware, no action has been brought in the PRC by a holder of H Shares to enforce an arbitral award made by the PRC arbitral authorities or Hong Kong arbitral authorities, and there are uncertainties as to the outcome of any action brought in the PRC to enforce an arbitral award made in favor of a holder of H Shares.

The exemption from withholding tax on dividends and income available to holders of H Shares may not continue in the future.

Under current PRC tax laws, regulations and rulings, dividends paid by our Company to holders of H Shares outside the PRC are currently exempt from PRC income tax. In addition, gains realized by holders of H Shares upon the sale or other disposition of H Shares are currently exempted from PRC income tax. If the exemptions are withdrawn in the future, holders of H Shares may be required to pay PRC income tax, or we may be required to withhold such tax from dividend payments. Such PRC income tax or withholding tax on dividends is currently imposed at the rate of 20%, unless there is an applicable tax treaty between the PRC and the jurisdiction in which such overseas holders of H Shares reside which reduces or exempts the relevant tax.

Concerns over China's high growth and measures taken by the PRC Government may lead to an increase in interest rates and a slowdown in economic growth.

In response to concerns regarding China's high rate of growth in industrial production, bank credit, fixed investment and money supply, the PRC Government has taken measures to slow down economic growth to a more manageable level. Among the measures that the PRC Government has taken are restrictions on bank loans in certain sectors. These measures and any additional such measures, including a possible increase in interest rates, could contribute to a slowdown in the Chinese economy.

There may be an occurrence of a widespread public health problem, such as SARS.

An outbreak of any widespread public health problem in China, such as SARS, could have a negative effect on our operations and results. Our operations may be affected by a number of health-related factors, including quarantines or closures of some of our offices and manufacturing facilities, travel restrictions, the

sickness or death of our key officers and employees, import and export restrictions and a general slowdown in China's economy.

RISKS RELATING TO THE GLOBAL OFFERING

There has been no prior public market for the H Shares. The liquidity and market price of the H Shares following the Global Offering may be volatile.

Prior to the Global Offering, there has been no public market for the H Shares. The initial price range issued to the public for the H Shares was the result of negotiations among our Company and the Underwriters, and the Offer Price may differ significantly from the market price for the H Shares following the Global Offering. We have applied to list and deal in the H Shares on the Hong Kong Stock Exchange. There is no assurance that the Global Offering will result in the development of an active, liquid public trading market for the H Shares. In addition, the price and trading volumes of the H Shares may be volatile. Factors such as variations in our revenue, earnings and cash flows or any other developments of our Company may affect the volume and price at which the H Shares will be traded.

Because the Offer Price is higher than the net tangible book value per share of our Company, the holders of the H Shares will incur immediate dilution.

The Offer Price of the H Shares is higher than the net tangible book value per Share. Therefore, purchasers of the H Shares in the Global Offering will experience an immediate dilution in net tangible book value per H Share.

Disposal of the H Shares by NSSF or transfer of Shares held on our domestic share register into H Shares following the listing of the H Shares may result in an increase in the number of H Shares available on the market and may affect the price of the H Shares.

Pursuant to the approvals of the relevant PRC authorities, ChinaCoal Group is required to transfer to NSSF such number of Domestic Shares as shall in the aggregate be equivalent to 10% of the number of Offer Shares. These Domestic Shares will be converted into H Shares on a one-for-one basis upon completion of the Global Offering and will be held by NSSF immediately thereafter. NSSF will retain approximately 324,637,000 H Shares, representing approximately 2.9% of our total issued share capital, if the Over-allotment Option is not exercised, or 373,333,000 H Shares, representing approximately 3.2% of our total issued share capital if the Over-allotment Option is exercised in full. There is no legal restriction on NSSF to transfer or dispose of such H Shares following the listing of the H Shares. The above-mentioned arrangement will result in an increase of the number of H Shares available on the market if NSSF disposes of its H Shares and such increase may, directly or indirectly, affect the trading price of the H Shares following completion of the Global Offering. For further details, see "Share capital — Transfer of shares to NSSF".

Subject to the approval of the State Council securities regulatory authority, Shares held on our domestic share register may be transferred to overseas investors, and such transferred Shares may be listed or traded on an overseas stock exchange. Any listing or trading of the transferred Shares on an overseas stock exchange shall also comply with the regulatory procedures, rules and requirements of such stock exchange. No class shareholder voting is required for the listing and trading of the transferred Shares on an overseas stock exchange. Therefore, transfer of Shares held on our domestic share register into H Shares following the listing of the H Shares may result in an increase in the number of H Shares available on the market and could negatively impact the market price of our H Shares.

Shareholders' interests may be diluted as a result of additional equity fund-raising.

We may need to raise additional funds in the future to finance further expansion of or new developments relating to our existing operations or new acquisitions. If additional funds are raised through the issuance of new equity or equity-linked securities of our Company other than on a pro-rata basis to existing shareholders, the percentage ownership of such shareholders in our Company may be reduced and/or such new securities may confer rights and privileges that take priority over those conferred by the H Shares.

Forward-looking information included in this Prospectus may prove inaccurate.

This Prospectus contains certain forward-looking statements and information relating to us and the subsidiaries comprising our Company that are based on the beliefs of our management as well as assumptions made by and information currently available to our management. When used in this Prospectus, the words "aim," "anticipate", "believe", "continue", "could", "estimate", "expect", "going forward", "intend", "ought to", "may", "plan", "potential", "predict", "project", "seek", "should", "will", "would" and similar expressions, as they relate to our Company or our management, are intended to identify forward-looking statements. Such statements reflect the current views of our Company's management with respect to future events, operations, liquidity and capital resources, some of which may not materialize or may change. These statements are subject to certain risks, uncertainties and assumptions, including the other risk factors as described in this Prospectus. You are strongly cautioned that reliance on any forward-looking statements involves known and unknown risks and uncertainties. The risks and uncertainties facing our Company which could affect the accuracy of forward-looking statements include, but are not limited to, the following:

- our business prospects;
- our future debt levels and capital needs;
- future developments, trends and conditions in China's coal and coal-related products market;
- our strategy, plans, objectives and goals;
- general economic conditions;
- changes to regulatory or operating conditions in the market in which we operate;
- our ability to reduce costs;
- capital market developments;
- the actions and developments of our competitors;
- certain statements in "Financial Information" with respect to trends in prices, volumes, operations, margins, overall market trends, risk management and exchange rates; and
- other statements in this Prospectus that are not historical fact.

We do not intend to update these forward-looking statements.

We cannot guarantee the accuracy of facts, forecasts and other statistics with respect to China, the Chinese economy and China's coal and coal-related industries contained in this Prospectus.

Facts, forecasts and other statistics in this Prospectus relating to China, the Chinese economy and China's coal and coal-related industry have been derived from official government publications and we can guarantee neither the quality nor the reliability of such source materials. They have not been prepared or

independently verified by our Company, the Underwriters or any of its or their respective affiliates or advisers and, therefore, we make no representation as to the accuracy of such facts or statistics, which may not be consistent with other information compiled within or outside China. The Joint Sponsors and our Directors have reproduced the data and statistics extracted from such official government publications in a reasonably cautious manner. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be relied upon. Further, there is no assurance that they have been stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. In all cases, investors should give consideration as to how much weight or importance they should attach to or place on such facts, forecasts or statistics.

We strongly caution you not to place any reliance on any information contained in press articles or other media regarding us and the Global Offering.

Prior to the publication of this Prospectus, there has been press and media coverage regarding us and the Global Offering, including news articles published in *The Standard*, *Sing Tao Daily*, *Hong Kong Economic Times* and *Apple Daily* on 21 November 2006, which included certain financial information, financial projections, valuations and other information about us that does not appear in the Prospectus. We have not authorized the disclosure of any such information in the press or media. We do not accept any responsibility for any such press or media coverage or the accuracy or completeness of any such information. We make no representation as to the appropriateness, accuracy, completeness or reliability of any such information or publication. To the extent that any such information appearing in publications other than this Prospectus is inconsistent or conflicts with the information contained in this Prospectus, we disclaim it. Accordingly, prospective investors should not rely on any such information. In making your decision as to whether to purchase our H Shares, you should rely only on the financial, operational and other information contained in this Prospectus.

FORWARD-LOOKING STATEMENTS

We have included in this Prospectus forward-looking statements. Statements that are not historical facts, including statements about our intentions, beliefs, expectations or predictions for the future, are forward-looking statements.

These forward-looking statements include, without limitation, statements relating to:

- our business prospects;
- our future debt levels and capital needs;
- future developments, trends and conditions in China's coal and coal-related products market;
- our strategy, plans, objectives and goals;
- general economic conditions;
- changes to regulatory or operating conditions in the market in which we operate;
- our ability to reduce costs;
- capital market developments;
- the actions and developments of our competitors;
- certain statements in "Financial Information" with respect to trends in prices, volumes, operations, margins, overall market trends, risk management and exchange rates; and
- other statements in this Prospectus that are not historical fact.

In some cases, we use the words "aim", "anticipate", "believe", "continue", "could", "estimate", "expect", "going forward", "intend", "ought to", "may", "plan", "potential", "predict", "project", "seek", "should", "will", "would" and similar expressions to identify forward-looking statements.

These forward-looking statements are based on current plans and estimates, and speak only as of the date they are made. We undertake no obligation to update or revise any forward-looking statement in light of new information, future events or otherwise. Forward-looking statements involve inherent risks and uncertainties and are subject to assumptions, some of which are beyond our control. We caution you that a number of important factors could cause actual outcomes to differ, or to differ materially, from those expressed in any forward-looking statement.

Due to these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this Prospectus might not occur in the way we expect, or at all. Accordingly, you should not place undue reliance on any forward-looking information. All forward-looking statements contained in this Prospectus are qualified by reference to this cautionary statement.

DIRECTORS' RESPONSIBILITY FOR THE CONTENTS OF THIS PROSPECTUS

This Prospectus includes particulars given in compliance with the Companies Ordinance, the Securities and Futures (Stock Market Listing) Rules of Hong Kong and the Hong Kong Listing Rules for the purpose of giving information to the public with regard to our Company. The Directors collectively and individually accept full responsibility for the accuracy of the information contained in this Prospectus and confirm, having made all reasonable enquiries, that to the best of their knowledge and belief there are no other facts the omission of which would make any statement in this Prospectus misleading.

CSRC APPROVAL

We have obtained approval from the CSRC for the Global Offering and the making of the application to list the H Shares on the Hong Kong Stock Exchange. In granting such approval, the CSRC accepts no responsibility for the financial soundness of our Company, nor for the accuracy of any of the statements made or opinions expressed in this Prospectus or in the Application Forms.

UNDERWRITING

This Prospectus is published solely in connection with the Hong Kong Public Offering which forms part of the Global Offering. For applicants under the Hong Kong Public Offering, this Prospectus and the Application Forms contain the terms and conditions of the Hong Kong Public Offering.

The listing of the Offer Shares on the Hong Kong Stock Exchange is sponsored by the Joint Sponsors. The Global Offering is managed by the Joint Global Coordinators. The Hong Kong Public Offering is fully underwritten by the Hong Kong Underwriters pursuant to the Hong Kong Underwriting Agreement. The International Underwriting Agreement relating to the International Offering is expected to be entered into on or about 13 December 2006, subject to determination of the pricing of the Offer Shares. If, for any reason, the Offer Price is not agreed among us and the Joint Global Coordinators (on behalf of the Underwriters) by 17 December 2006, the Global Offering (including the Hong Kong Public Offering) will not proceed and will lapse. Further details about the Underwriters and the underwriting arrangements are contained in "Underwriting".

RESTRICTIONS ON THE USE OF THIS PROSPECTUS

Each person acquiring Hong Kong Public Offer Shares will be required to confirm, or by his acquisition of Hong Kong Public Offer Shares will be deemed to confirm, that he is aware of the restrictions on offers of the Hong Kong Public Offer Shares described in this Prospectus.

No action has been taken to permit a public offering of the Offer Shares in any jurisdiction other than Hong Kong and Japan or the distribution of this Prospectus in any jurisdiction other than Hong Kong. Accordingly, and without limitation to the following, this Prospectus may not be used for the purpose of, and does not constitute, an offer or invitation in any jurisdiction or in any circumstances in which such an offer or invitation is not authorized or to any person to whom it is unlawful to make such an offer or invitation.

The distribution of this Prospectus and the offering and sales of the Offer Shares in other jurisdictions are subject to restrictions and may not be made except as permitted under the applicable securities laws of such jurisdictions pursuant to registration with or authorization by the relevant securities regulatory authorities or an exemption therefrom. In particular the Offer Shares have not been offered and sold and will not be offered or sold, directly or indirectly, in the PRC.

CERTAIN MATTERS RELATING TO THE HONG KONG PUBLIC OFFERING

Application for Listing on the Hong Kong Stock Exchange

We have applied to the Listing Committee of the Hong Kong Stock Exchange for the listing of, and permission to deal in, our H Shares including: (i) any H Shares which may be issued by our Company pursuant to the Global Offering and upon the exercise of the Over-allotment Option; and (ii) any H Shares, converted from Domestic Shares, which are to be held by NSSF (including such Domestic Shares converted to H Shares and transferred by ChinaCoal Group to NSSF and such additional Domestic Shares converted to H Shares to be further transferred to NSSF by ChinaCoal Group upon the exercise of the Over-allotment Option, in each case, pursuant to the relevant regulations in relation to the reduction of State-owned shares). Dealings in the H Shares on the Hong Kong Stock Exchange are expected to commence on 19 December 2006.

Our Domestic Shares may be converted to H Shares after obtaining the approval of the CSRC or the authorized securities approval authorities of the State Council and after satisfying certain procedural requirements. See "Share Capital — Transfer of our domestic shares for listing and trading on the Hong Kong Stock Exchange" for further information.

Except as otherwise disclosed in this Prospectus, no part of our share or loan capital is listed on or dealt in on any other stock exchange and no such listing or permission to list is being or proposed to be sought in the near future.

Eligibility for Admission into CCASS

Subject to the granting of listing of, and permission to deal in, the H Shares on the Hong Kong Stock Exchange and the compliance with the stock admission requirements of HKSCC, the H Shares will be accepted as eligible securities by HKSCC for deposit, clearance and settlement in CCASS with effect from the date of commencement of dealings in the H Shares on the Hong Kong Stock Exchange or on any other date HKSCC chooses. Settlement of transactions between participants of the Hong Kong Stock Exchange is required to take place in CCASS on the second business day after any trading day.

All activities under CCASS are subject to the General Rules of CCASS and CCASS Operational Procedures in effect from time to time.

All necessary arrangements have been made for the H Shares to be admitted into CCASS.

H Share Register and Stamp Duty

All of the H Shares issued pursuant to applications made in the Hong Kong Public Offering will be registered on our H Share register to be maintained in Hong Kong. Our principal register of members will be maintained by us at our head office in the PRC.

Dealings in the H Shares registered in our H Share register will be subject to the Hong Kong stamp duty. See "Appendix VII — Taxation and Foreign Exchange".

Dividends Payable to Holders of H Shares

Unless determined otherwise by our Company, dividends payable in Hong Kong dollars in respect of H Shares will be paid to shareholders as recorded in our H Share register, and sent by ordinary post, at the shareholders' own risk, to the registered address of each shareholder.

Professional Tax Advice Recommended

Applicants for the Hong Kong Public Offer Shares are recommended to consult their professional advisers if they are in any doubt as to the taxation implications of subscribing for, purchasing, holding, disposing of, dealing in, or the exercise of any rights in relation to, the H Shares. It is emphasized that neither we nor the Joint Global Coordinators, the Joint Sponsors, the Underwriters, nor their respective directors, nor any other person or party involved in the Global Offering accepts responsibility for any tax effects or liabilities of holders of H Shares resulting from the subscription, purchase, holding, disposal of, dealing in, or exercise of any rights in relation to, the H Shares.

Registration of Subscription, Purchase and Transfer of H Shares

We have instructed Computershare Hong Kong Investor Services Limited, our H Share registrar, and Computershare Hong Kong Investor Services Limited has agreed, not to register the subscription, purchase or transfer of any H Shares in the name of any particular holder unless and until such holder delivers a signed form to our H Share registrar in respect of those H Shares bearing statements to the effect that the holder:

(i) agrees with us and each of our shareholders, and we agree with each shareholder, to observe and comply with the PRC Company Law, the Special Regulations and our Articles of Association;

(ii) agrees with us, each of our shareholders, Directors, Supervisors, managers and officers, and we acting for ourselves and for each of our Directors, Supervisors, managers and officers agree with each of our shareholders, to refer all differences and claims arising from our Articles of Association or any rights or obligations conferred or imposed by the PRC Company Law or other relevant laws and administrative regulations concerning our affairs to arbitration in accordance with our Articles of Association, and any reference to arbitration shall be deemed to authorize the arbitration tribunal to conduct hearings in open session and to publish its award, which arbitration shall be final and conclusive. See "Appendix VIII — Summary of Principal Legal and Regulatory Provisions" and "Appendix IX — Summary of Articles of Association";

(iii) agrees with us and each of our shareholders that the H Shares are freely transferable by the holders thereof; and

(iv) authorizes us to enter into a contract on his behalf with each of our Directors and officers whereby such Directors and officers undertake to observe and comply with their obligations to our shareholders as stipulated in our Articles of Association.

Persons applying for or purchasing H Shares under the Global Offering are deemed, by their making an application or purchase, to have represented that they are not associates (as such term is defined in the Hong Kong Listing Rules) of any of the Directors of our Company or an existing shareholder of our Company of a nominee of any of the foregoing.

Procedure for Application for Hong Kong Public Offer Shares

The procedure for applying for Hong Kong Public Offer Shares is set out in "How to apply for Hong Kong Public Offer Shares" and in the Application Forms.

STRUCTURE OF THE GLOBAL OFFERING

Details of the structure of the Global Offering, including its conditions, are set out in "Structure of the Global Offering".

OVER-ALLOTMENT AND STABILIZATION

Details of the arrangements relating to the Stabilization and Over-allotment Option are set out in "Underwriting" in this Prospectus.

EXCHANGE RATE CONVERSION

Solely for your convenience, this Prospectus contains translations of certain Renminbi amounts into Hong Kong dollars at specified rates. No representation is made that the Renminbi amounts could actually be converted into any Hong Kong dollar amounts at the rates indicated or at all. Unless we indicate otherwise, the translation of Renminbi into HK dollars was made at the rate of RMB1.0403 to HK$1.00, the exchange rate prevailing on 30 December 2005, or at the rate of RMB1.0294 to HK$1.00, the exchange rate prevailing on 30 June 2006, set by PBOC for foreign exchange transactions. Any discrepancies in any table between totals and sums of amounts listed therein are due to rounding. Further information on exchange rates is set forth in "Appendix VII — Taxation and Foreign Exchange".

MARKET SHARE DATA CONVENTION

The statistical and market share information contained in this Prospectus has been derived from official government publications. Unless otherwise indicated, the information has not been verified by us independently. This statistical information may not be consistent with other statistical information from other sources within or outside China. The Joint Sponsors and our Directors have reproduced the data and statistics extracted from such official government publications in a reasonably cautious manner.

This and other sections of this Prospectus contain information relating to the PRC economy and the PRC coal industry and international coal markets. The information contained within has been derived from official government publications or obtained during communications with PRC Government agencies. Neither we, the Underwriters nor any of their respective affiliates or advisers have independently verified the information directly or indirectly derived from these sources, and such information may not be consistent with other information compiled within or outside China. The Joint Sponsors and our Directors have reproduced the data and statistics extracted from such official government publications in a reasonably cautious manner.

THE WORLD COAL INDUSTRY

Coal is one of the most important energy resources in the world. According to *BP Statistical Review 2006*, worldwide primary energy consumption totaled 10,537.1 million tonnes oil equivalent in 2005, of which coal represented 27.8%, and oil and natural gas represented 36.4% and 23.5%, respectively.

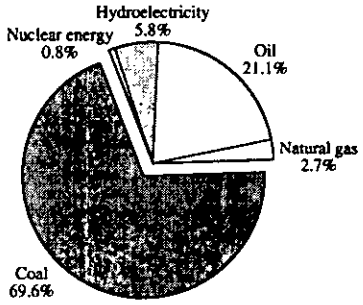
Global Primary Energy Total Consumption in 2005

Source: BP Statistical Review 2006

World coal reserves are abundant. According to *BP Statistical Review 2006* estimates, the world's total proved coal reserve base represents approximately 155 years of production at current mining rates. Coal reserves have a wide distribution pattern, with particular concentration in countries including the United States, Russia, China, India and Australia. According to *BP Statistical Review 2006*, these countries controlled 27.1%, 17.3%, 12.6%, 10.2% and 8.6%, respectively, of the proved worldwide coal reserves at the end of 2005.

The continuous rise in global coal consumption in recent years has resulted from various macro factors, including global economic growth, price increases of other energies such as oil and natural gas and improvements in coal mining and processing technologies and productivity.

The Asia-Pacific region is one of the fastest growing economic regions and the largest and fastest growing energy market in the world. According to *BP Statistical Review 2006*, the region's total primary energy consumption increased from 2,589.5 million tonnes oil equivalent in 2000 to 3,423.7 million tonnes oil equivalent in 2005, representing a CAGR of 5.7%. This growth rate was much higher than the growth rates in North America and Europe, which were 0.5% and 1.1%, respectively, for the same period. In 2005, the Asia-Pacific region's primary energy consumption accounted for 32.5% of the worldwide total, higher than North America and Europe (including Eurasia), which accounted for 26.6% and 28.3% of the worldwide total, respectively, in the same year. Demand for energy, including coal, in the Asia-Pacific region is therefore considered to be high.



Many major coal consumers and producers are located in the Asia-Pacific region. According to *BP Statistical Review 2006*, coal consumption and production in this region in 2005 accounted for 56.3% and 57.0%, respectively, of global consumption and production. From 2000 to 2005, coal consumption and production in the Asia-Pacific region increased by a CAGR of 8.2% and 9.1%, respectively, far exceeding the growth rates of worldwide coal consumption and production during the same period, which were 4.4% and 5.0%, respectively.

We believe that, in addition to the macro factors mentioned above, the rapid growth of coal demand in the Asia-Pacific region is caused by: (i) the continuous growth of installed coal-fired power capacities in the Asia-Pacific region, which has directly impacted the regional demand for thermal coal; and (ii) the growth of the steel industry, which has directly resulted in increasing demand for coking coal.

THE PRC COAL INDUSTRY

According to *BP Statistical Review 2006*, China is the world's largest coal-producing country, with 2,190.0 million tonnes of raw coal output in 2005, which corresponds to 1,107.7 million tonnes oil equivalent and accounts for 37.4% of global coal production. China is also the world's largest coal-consuming country, with domestic coal consumption amounting to 1,081.9 million tonnes oil equivalent in 2005, accounting for 36.9% of global consumption. *BP Statistical Review 2006* considers coal to be China's most important energy resource, accounting for 69.6% of the country's total primary energy consumption in 2005.

Total Primary Energy Consumption in China in 2005

Source: BP Statistical Review 2006

The PRC coal industry is relatively mature compared to other industries, and has the following characteristics:

- abundant coal reserves;
- rapid growth in coal production, demand and transportation capacities; and
- increasingly market-driven pricing mechanisms.

However, the PRC coal industry also faces the following challenges:

- the need for a large transportation infrastructure due to the geographical distances between the locations of coal resources and major coal consumers;

- the PRC coal industry is undergoing a transition involving the consolidation of numerous small mining operations utilizing outdated technologies into large coal mining operations utilizing advanced technologies; and
- increasingly stringent requirements for safe production and environmental protection.

With increased transportation capacities, improved production technologies, increasing industry consolidation and more extensive usage, coal will maintain its strategic importance as the primary energy source and raw material in China.

The foregoing characteristics and challenges are discussed and analyzed in more detail below:

Abundant Coal Reserves and their Distribution

Coal reserves in China are abundant but unevenly distributed. China ranks third in the world in terms of current proved coal reserves, following the United States and Russia. According to *BP Statistical Review 2006*, China had 114.5 billion tonnes of proved coal reserves at the end of 2005, representing 12.6% of world proved coal reserves. According to the PRC Government, 67% of all the proved coal reserves in China are deposited in Shanxi, Shaanxi, Inner Mongolia and Ningxia, 20% are deposited in Xinjiang, Gansu, Qinghai, Yunnan, Guizhou, Sichuan and Chongqing, and 13% are deposited in other areas including Jiangsu, Anhui, Shandong and Henan.

Coalfields in China with good mining conditions are mainly concentrated in Xinjiang, parts of Ningxia, as well as the area referred to in the industry as the "Tri-West Area", which consists of Shanxi, Shaanxi and western Inner Mongolia. The Tri-West Area has favorable geological conditions for coal production. Coal reserves in this area are of high quality and contain a wide variety of coal. However, due to limited local consumption and long distances from major customers and major ports, these high-quality coal reserves have not been fully exploited. See "— Growing capacities in coal production and transportation". The coal reserves in Jiangsu, Anhui, Shandong and Henan are also of a high quality and contain a wide variety of coal. Furthermore, they are close to transportation facilities as they are located in China's more economically developed coastal regions. The coal reserves in these provinces, however, are relatively limited, representing only 9.2% of the reserves in China.

High Energy Demand in China and the Asia-Pacific Region

China's economic growth in recent years has led to a surge in the demand for energy. China's real GDP grew at a CAGR of 9.8% from 2001 to 2005 according to a report by the PRC's Statistics Bureau in February 2006. In the same period, China's total primary energy consumption grew at a CAGR of 11.7%.

Coal consumption in China amounted to 2.14 billion tonnes in 2005. The PRC Government estimates that the domestic demand for coal will increase to 2.5 billion tonnes by 2010.

The factors driving the growing demand for coal are as follows:

- *The power industry* — According to EIA data, China's power industry is the second largest in the world after the United States. According to the Statistics Information Department of China Electricity Council, at the end of 2005, China's total installed capacity was 508.4 GW, 75.6% of which was generated by coal-fired power plants. According to *China Coal Market Report 2005-2006*, the coal-fired power industry in China generated a total of 1,204.5 billion Kwh in 2001 and 2,018.0 billion Kwh in 2005, consuming 645.6 million tonnes and 1,110.0 million tonnes of coal, respectively. From 2001 to 2005, coal-fired power generation in China grew at a CAGR of 13.8%

and the consumption of coal for coal-fired power generation grew at a CAGR of 14.5%. We believe the coal-fired power industry will continue to drive future demand for coal in China.

- *The steel industry* — China's steel industry has experienced rapid growth. According to *China Coal Market Report 2005-2006*, annual production of pig iron grew from 147.0 million tonnes in 2001 to 315.0 million tonnes in 2005. China's steel industry consumed 180.0 million and 340.0 million tonnes of coal in 2001 and 2005, respectively. From 2001 to 2005, annual production of pig iron grew at a CAGR of 21.0% and the underlying consumption of coal for the steel industry production grew at a CAGR of 17.2%. We believe that the steel industry will have a steady demand for coal in the foreseeable future.

- *The construction materials industry* — The construction materials industry in China encompasses a wide range of segments, including cement, glass and ceramics. Taking the cement industry for example, according to the *2001 and 2005 National Economic and Social Development Statistic Reports* issued by the Bureau of Statistics, as well as the *China Coal Market Report 2005-2006*, China produced 640.0 million tonnes of cement in 2001 and 1,060.0 million tonnes in 2005, and the cement industry consumed 113.1 million tonnes and 177.0 million tonnes of coal, respectively. From 2001 to 2005, annual production of cement grew at a CAGR of 13.4% and the underlying consumption of coal grew at a CAGR of 11.8%. Due to China's stable economic growth and its increasing urbanization, we believe that the construction materials industry and its demand for coal will grow rapidly.

- *The chemicals and fertilizer industry* — Coal is widely used as a basic industrial material. According to the *2001 and 2005 National Economic and Social Development Statistic Reports* issued by the Bureau of Statistics, as well as the *China Coal Market Report 2005-2006*, China produced 34.0 million tonnes of fertilizer in 2001 and 52.2 million tonnes in 2005, and the fertilizer industry consumed 54.7 million tonnes and 79.1 million tonnes of coal, respectively. From 2001 to 2005, annual production of fertilizer grew at a CAGR of 11.3% and the underlying consumption of coal grew at a CAGR of 9.6%. In China, the coal-based chemicals industry, which relies on coal as a basic raw material, is under development. High-value coal-based chemicals products include tar, raw benzene, methanol and urea. With the expansion and development of large chemicals production facilities, demand for coal as both a raw material and a fuel is expected to grow. According to a PRC official government source, the coal-based chemicals industry is likely to become a new source of growth in the demand for coal.

In the Asia-Pacific region, coal consumption had grown rapidly from 2000 to 2005 at a CAGR of 8.2%. The primary coal export markets for China are Japan, South Korea and China Taiwan. Japan is one of the world's leading importers of coal. According to *BP Statistical Review 2006*, Japan's coal consumption reached 121.3 million tonnes oil equivalent in 2005, while its domestic coal production amounted to only 0.6 million tonnes oil equivalent in the same year. It is expected that Japan will continue to rely heavily on coal imports to meet the growing demand in its power generation and other industries. Similar to Japan, South Korea relies on imported coal. Coal consumption in South Korea reached 54.8 million tonnes oil equivalent in 2005, while its domestic coal production amounted to only 1.3 million tonnes oil equivalent. In China Taiwan, coal consumption accounted for 38.1% of the total consumption of primary energy in 2005. With very limited coal reserves and low coal production, China Taiwan also relies on coal imports. China's coal industry enjoys a unique competitive advantage in the international coal market given China's geographical proximity to these major coal importers in the Asia-Pacific region. As a result, the international demand for China's coal is large and stable.

China's coal exports are subject to a quota system imposed by the PRC Government. Under this system, only authorized coal exporters may apply for and obtain coal export quotas from the PRC Government. Currently, there are only four authorized coal exporters: ChinaCoal Group, Shenhua Group, China Minmetals Corporation and Shanxi Coal Import & Export Group Company. ChinaCoal Group, our parent company, is currently the largest coal exporter in China. See "Regulation — The Coal Industry — Coal Trading" section in this Prospectus. Although the PRC Government had encouraged coal exports in previous years, serious shortages in coal supply in China since late 2003 led to adjustments in a series of governmental policies including a reduction in the tax refund for exporting coal. See "Regulation — The coal industry — Export". Hence, according to the *China Coal Market Report 2005-2006* published by the Information Centre of the China Coal Transport and Distribution Association, China's coal export volume decreased from 86.7 million tonnes in 2004 to 71.1 million tonnes in 2005.

Growing Capacities in Coal Production and Transportation

The total production of raw coal in China increased from 1,381.5 million tonnes in 2001 to 2,190.0 million tonnes in 2005, representing a CAGR of 12.2%.

China's coal industry is characterized by the uneven distribution of coal reserves and the existence of a large number of small coal production companies. However, the number of large scale coal production enterprises is limited. As of 31 December 2005, according to *China Coal News* published on 3 April 2006, there were a total of 5,206 non-state owned coal production enterprises whose annual revenue exceeded RMB5.0 million and State-owned coal production enterprises. Among these, only 31 enterprises had an annual output of more than 10.0 million tonnes. These 31 enterprises had an aggregate production volume close to 900.0 million tonnes in 2005.

The table below lists the top ten largest raw coal production enterprises in China in 2005:

	Raw coal production (million tonnes)	Percentage of total raw coal production in the PRC (%)
Shenhua Group Corporation	149.7	6.8%
ChinaCoal Group	**71.9**	**3.3%**
Shanxi Coking Coal Group Company	60.8	2.8%
Datong Coal Mining Group Company	56.7	2.6%
Heilongjiang Longmei Mining (Group) Co., Ltd.	48.1	2.2%
Yankuang Group Company	37.0	1.7%
Yangquan Coal Group Co.	32.5	1.5%
Huainan Mining Group Co.	32.4	1.5%
Pingdingshan Coal Group Co.	32.1	1.5%
Jincheng Anthracite Group Co.	30.1	1.4%
Total	551.3	25.2%

Source: Information of Coal Industry January 2006

Most of China's coal resources are concentrated in the inland provinces of northern and northwestern China. In contrast, most industrial centers and many of China's coal-consuming enterprises are concentrated in the eastern and southern regions. According to the PRC Government, coal production in the Tri-West Area will reach 1,272 million tonnes by 2010, while coal consumption in this region will be merely 437 million

tonnes. The Tri-West Area will remain the major coal supplying region for exports and for transport to other regions in China. Two-thirds of its coal is supplied to eastern China, central China, southern China, northern China and northeastern China. As a result of the uneven geographic distribution between coal production and consumption, transportation of coal to the eastern parts of China has been critical to China's coal industry. For most coal producers located in the inland areas of China, the railway system has been the most important means of coal transportation.

According to the February 2006 issue of *Economic Information on Coal* jointly published by the Information Department of China National Coal Association and the Dispatch Center of the SACMS, coal transported by railways increased by 79.3 million tonnes from 2004 to 2005 and reached 1,071 million tonnes, representing a year on year increase of 8.0%. Coal is transported to eastern China via a railway system consisting of the Daqin Line, Shuohuang Line, Shitai Line, Houyue Line, Longhai Line and Ningxi Line. The Daqin Line, 653 km long, is China's largest railway line in terms of transportation capacity dedicated to coal transportation. It connects the major coal production bases in the Tri-West Area with the major ports in eastern parts of China. The railway transportation capacity of the Daqin Line was 150 million tonnes of coal in 2004 and was increased to 200 million tonnes in 2005. The PRC Government plans to further increase the Daqin Line's annual transportation capacity to 400 million tonnes by 2010.

A large portion of outbound coal from the Tri-West Area and the Ningxia Autonomous Region is first transported by railway to major ports in China, and then by sea to customers in eastern and southeastern China and overseas. According to *Economic Information on Coal,* the amount of coal transported through major ports in China amounted to 371 million tonnes in 2005, representing approximately 16.9% of China's total coal production in the same year and an increase of 33.3 million tonnes, or 9.9%, from 2004. The major coal loading ports in China are Qinhuangdao, Tianjin, Qingdao, Rizhao and Lianyungang. The major coal unloading ports are Shanghai, Ningbo, as well as certain ports in the Guangdong and Fujian Provinces.

The PRC Government has significantly increased the transportation capacities of major railways and ports for coal transportation so as to alleviate the pressure on railway transportation by domestic coal companies and other enterprises. As demand for energy continues to rise, coal transportation will continue to play a critical role in the development of the coal industry in China. The PRC Government has provided significant support relating to the transportation requirements of large state-owned coal producers. As a result, these enterprises, including us, possess the distinct advantage of reliable access to rail and shipping capacities.

The Trend Towards Market-Driven Prices

Domestic coal prices have been mainly market-driven since 2002, when the PRC Government eliminated the price control measures for coal used in electric power generation. Prior to 2006, however, the PRC Government continued to implement temporary measures to intervene and control unusual fluctuations in thermal coal prices. This, among other reasons, has caused thermal coal contract prices for major users to be generally lower than spot market prices during the period. On 27 December 2005, the NDRC announced the elimination of such temporary thermal coal price intervention practices, thus completely removing control over thermal coal prices, including contract prices for major users.

China's domestic coking coal price is now completely market-driven. In addition to the demand by the steel industry, other factors affecting the price of coking coal include the overall performance of the Chinese economy, business cycles in the metallurgical industry, and coal production and transportation capacities. Since 2003, due to the shortage in coking coal supply and the rapid growth of global steel production, coking coal prices in the domestic and export markets have increased considerably. This increase was partially offset

by the macro-economic adjustment and control policies implemented by the PRC Government in early 2004 designed to temporarily restrain the growth of the steel industry in China.

Competition in the Coal Market

Affected by factors such as geographical distance between coal mines and coal consumers, supply and demand and timely governmental adjustment, China's domestic coal enterprises mainly compete in the following aspects:

- *Reserves.* To ensure sustainable growth, coal enterprises compete for new resources, the exploration and development of which are subject to governmental approval.
- *Transportation capacities.* Coal enterprises compete for the limited rail and port transportation capacities.
- *Long-term customers.* Coal enterprises compete for long-term customers and sales contracts based on product quality and transportation capacities which can better support their production and operations.
- *Pricing.* Since the price for coal products has become increasingly market-driven, we expect that competition based on price will intensify.

Stricter Regulations on Safety and Environmental Protection

Safe production

Mining safety has always been an area of major concern in China's coal industry. According to SACMS data, there were 5,938 fatalities and 3,306 accidents in China in 2005. 2,480 of such accidents occurred in the coal mines owned and operated by local district governments and private enterprises, 410 occurred in State-owned regional coal mines and 416 occurred in key State-owned coal mines.

In China, both the PRC Government and the country's coal production enterprises have become increasingly aware of the importance of mining safety. The SACMS and the SAWS are the main regulators of mining safety and miners' health. See "Regulations — The coal industry". The PRC Government has also established a Cross-Ministry Coordination Force for Prevention of Gas Incidents in Coal Mines (煤礦瓦斯防治部際協調領導小組) to reduce accidents caused by gas in underground coal mines. In addition, the PRC Government continues to allocate funding in support of improving mining safety.

The PRC Government requires operators of coal mines to regard safe production as their top priority. The PRC Government requires coal production enterprises to set aside funds to maintain and improve safe production. In addition, coal production enterprises offer various training programs to educate their mining workers to raise their awareness of safety.

According to the statistics from the SACMS, in the past several years, with the collective efforts of the relevant authorities and coal production enterprises, the PRC Government has shut down over 60,000 small mining operations that were not equipped with the requisite facilities to ensure safe production. During the same period, the PRC Government increased its efforts in consolidating mining operations. A large number of coal mines have passed safety inspections and have progressively enhanced their standards of safe production.

Environmental protection

In recent years, environmental protection has become an increasingly important factor for the PRC Government to consider when planning for economic development. The PRC Government plans to make further efforts to reduce the discharge and emission of pollutants, such as carbon dioxide and sulphur dioxide, released by certain major industrial sectors. China is a signatory to the Kyoto Protocol and the UNFCCC Convention on Climate Change.

China is making considerable efforts to develop clean coal technology. The PRC Government encourages the development of coal processing, coal blending and coal briquette technologies to improve coal selection and processing, as well as the use of advanced coal-burning and environmentally friendly technologies to increase utilization rates and reduce the emission of pollutants. The PRC Government also actively encourages the comprehensive utilization of coal resources by developing the usage of coal gangue, coal slurry, coal bed methane, the subsurface water and other by-products, as well as developing low thermal coal-fired electric power generators and building materials.

Outlook for the PRC's coal industry

Based on the foregoing, the continued development of the PRC's coal industry depends on the following government and corporate initiatives:

- *Accelerate the construction of large-scale coal production bases*

According to a PRC official government source, the PRC Government is implementing a strategy to establish 13 large coal production bases in the Shaanxi and Shanxi provinces and certain other regions. The objective is to create a number of large enterprises in the next three to five years, each with a minimum annual production capacity of 100 million tonnes. These 13 large coal production bases include 98 major coal mining areas with total coal resources of approximately 852.8 billion tonnes, representing 83.5% of China's total coal resources. In 2005, total production in these 13 coal production bases amounted to 1.8 billion tonnes, representing 83.6% of total coal production in China. In these coal production bases, the resource consolidation process will be considered by the PRC Government in granting mining rights. To centralize coal production, the PRC Government has stated that it will drive structural reforms of the domestic coal industry, develop large production bases and nurture large enterprises. Through structural reforms and integration at these production bases, the PRC Government's objective is to optimize resource allocation, increase production scale and provide a solid platform for the continuing growth of major coal enterprises.

- *Enhance productivity and eliminate outdated methods of production*

The PRC Government supports the restructuring of the coal industry and encourages large coal enterprises to acquire small and mid-sized mines in order to increase production scale and enhance competitiveness in the marketplace. The PRC Government's policy is to improve the overall productivity of the industry and the stability of the coal market by closing down small mines that utilize outdated technologies and are not equipped with the necessary facilities to ensure mining safety. The construction of coal mines must comply with governmental policies. To the extent possible, coal producers should expand their coal mining operations through integration of existing mines. To improve the safety and productivity of the coal industry, the PRC Government has stated that it will give priority to projects involving the construction of large, modernized open pit mines as well as underground mines that have annual production capacities of over 10 million tonnes. The PRC Government has stated that it will also give priority to integrated projects of coal

mining and power generation, and projects of coal mining and coal-based chemical production, thereby strictly controlling the development of small mining operations.

- *Intensify, develop and manage coal resources*

The PRC Government is reforming the coal market based on existing laws and regulations over mineral resources and coal resources. The PRC Government divides coal resources into development, reserve and protection areas in order to establish the preservation mechanism for scarce and high-quality coal resources. Mining rights are controlled and allocated by the central government and the local government of the respective province, autonomous region or municipality directly under the central government. The PRC Government further regulates preservation of coal resources in accordance with the plan for national economic development.

- *Implement a compensation scheme for the exploitation of coal resources*

The PRC Government and the coal industry are focused on the preservation and efficient utilization of coal resources. Through the reform of the resource tax system and the implementation of a compensation scheme for coal resource exploitation, the PRC Government is committed to raising the entry barrier into the coal industry and further preventing the wasteful exploitation of coal resources in order to balance supply and demand. New fees for coal resources exploitation will no longer be calculated on production volume but will instead be based on reserve volume and recovery rate. Therefore, the cost of resources, environmental protection, safety, technology and labor insurance premiums are expected to constitute a higher percentage of the total mining cost.

OVERVIEW

Most of our businesses, including coal production, coal trading and coking operations, are subject to national industrial policies, relevant laws and regulations and extensive governmental supervision. Regulations concerning our coal and coke production and trading activities govern relevant areas such as investments, exploration, production, mining rights, distribution, trading, transportation and exports. In addition, all our business operations in China are subject to fees and taxes, as well as safety and environmental protection laws and regulations.

We are principally subject to governmental supervision and regulations by the following agencies of the PRC Government:

- the State Council, which is the highest level of the executive branch, is responsible for the examination and approval of major investment projects specified in the *2004 Catalogue of Investment Projects* released by the PRC Government;
- the National Development and Reform Commission ("NDRC"), which formulates and implements major policies concerning China's economic and social development, examines and approves investment projects exceeding certain capital expenditure amounts or in specified industry sectors, including examination and approval of foreign investment projects, oversees reform of state-owned enterprises and formulates industrial policies and investment guidelines for the natural resource industries, such as coal and coke production. In addition, the NDRC administers coal export activities and export quotas jointly with the Ministry of Commerce. The NDRC is also responsible for the evaluation and implementation of the price-linking mechanism between the prices of coal and power;
- the Ministry of Land and Resources ("MLR"), which has the authority to grant land use licenses and mining right permits, approves transfer and lease of mining rights, and reviews mining rights premium and reserve valuation;
- the Ministry of Commerce ("MOFCOM"), which determines the total volume of China's coke exports and the allocation of quotas among authorized coke exporters, and approves foreign investment and overseas investment projects by Chinese enterprises. In addition, the MOFCOM also administers coal export activities and export quotas jointly with the NDRC;
- the State Administration of Coal Mine Safety ("SACMS"), which is responsible for the implementation and supervision of the relevant safety laws and regulations applicable to coal mines and coal mining operations;
- the Ministry of Railways ("MOR"), which supervises China's railway operations and provides strategic development plans for railway transportation. The MOR, together with the NDRC, reviews all applications for railway construction plans, including railways designated or used for coal transportation;
- the State Environmental Protection Administration of China ("SEPA"), which supervises and controls environmental protection and monitors China's environmental system at the national level; and
- the Ministry of Construction ("MOC"), which is responsible for the management of survey and design of construction projects, including but not limited to the survey and design of coal mines.

In addition, our controlling shareholder, ChinaCoal Group, is a State-owned enterprise under the direct supervision of the SASAC.

The SASAC will have an indirect influence on us. In particular, the SASAC has the power to select or nominate persons, and request ChinaCoal Group to appoint such persons, as our directors or high-level management personnel. SASAC also has the power to request ChinaCoal Group to remove our Directors or high-level management personnel in accordance with legal procedures and our Articles of Association.

RECENT LEGISLATION

On 16 July 2004, the State Council promulgated, with immediate effect, the *Decision on Institutional Reform of Investment System* (or the "*Investment Reform Decision*"). The objective of the legislation is to reduce the PRC Government's direct intervention into enterprises' activities, to allow the market to allocate resources and to increase investment efficiency and promote the sustained, coordinated and healthy development of the Chinese economy. With the promulgation of the *Investment Reform Decision*, governmental approvals for investment projects have been streamlined. There are three forms of government approval, namely, "approval", "authorization" and "registration". For investment projects that do not require or involve direct government funding, no approval will be required. Instead, only registration will be required for such investment projects, unless the investment projects are major investments and fall within the restricted sectors specified in an annual catalogue released by the State Council.

The 2004 catalogue, which was attached as an annex to the *Investment Reform Decision*, sets forth authorization requirements for major investment projects in restrictive sectors, including, among others, coal mining, railways and ports. It requires that applications for approval or authorization for such investment projects be made pursuant to the *Investment Reform Decision* and relevant administrative rules issued by the NDRC. The *Investment Reform Decision* also provides that large enterprises may submit to the State Council or the NDRC a medium- to long-term development plan, which may include multiple investment projects in different sectors, for pre-approval and registration thereafter instead of submitting projects for approval on an individual basis.

On 14 March 2005, the NDRC announced the PRC Government's decision to revise the Coal Law of the PRC, which was promulgated in 1996 by the National People's Congress. The NDRC concluded the comment-seeking process on 15 October 2005 and has begun the rulemaking process. This decision was made in response to concerns over the lack of a well-coordinated development plan for mining, which contributed to a significant amount of waste of valuable coal resources. The lack of effective penalty provisions or the lenient enforcement of existing provisions in the Coal Law has been cited as another important reason for the current rulemaking effort. With over 5,900 fatalities in coal mining accidents in 2005, the coal mining industry has been called the most dangerous industry in China and has caused the public to demand governmental response to improve mining safety.

The revised Coal Law is expected to strengthen the administration and management of coal reserves, to facilitate and institutionalize coal trading and to promote safe operation of coal mines in China. The revised Coal Law may raise the minimum capital investment requirement for establishing coal mining operations to preclude under-funded, improperly-equipped enterprises and individuals from entering into the coal industry. The revised Coal Law may also contain provisions requiring those that meet the higher capital investment requirement to provide for and set aside a risk prevention and management fund placed under the custody of the relevant government authorities prior to commercial production. The risk prevention and management fund will be used to compensate injured parties in the event of a mining accident. Additionally, to ensure

optimal utilization of coal resources, the NDRC may evaluate the mining techniques and coal extraction capabilities of coal mining operators when allocating new coal reserves. The PRC Government may prefer to allocate larger coal reserves to large coal mining operators with sufficient funding and advance mining and coal extraction techniques to ensure optimal extraction of coal reserves and mining safety.

On 7 June 2005, the State Council promulgated *Several Opinions on Promoting the Healthy Development of the Coal Industry* ("*Opinions*"), announcing the PRC Government's policies with respect to the development and restructuring of the coal industry. The *Opinions* resonated with the NDRC's announcement on the revision of the Coal Law and reiterated the PRC Government's policies with respect to the administration of coal reserves, enhancement of coal mine safety, encouragement of industry consolidation among coal producers, acceleration of the construction of large coal production bases, improvement of mining techniques and equipment for coal production and the organization and regulation of small coal mines.

On 1 September 2006, the SEPA and the General Administration of Quality Supervision, Inspection and Quarantine (GAQSIQ) jointly issued the *Emission Standard for Pollutants from Coal Industry* (煤炭工業污染物排放標準) (the "*Newly Enforced Standards*"), which became effective and enforceable on 1 October 2006. The *Newly Enforced Standards* are applicable to all coal mines, including open pit mines, coal processing facilities and coal waste, storage and loading depots.

In accordance with provisions thereof, all newly-established producing facilities shall adopt the *Newly Enforced Standards* as of 1 October 2006 and all producing facilities currently under operation shall adopt the *Newly Enforced Standards* as of 1 October 2007.

The *Newly Enforced Standards* mainly consist of the following:

- pollutants emission limits for waste water discharged by coal mining and processing business;
- emission limits and non-organized emission limits for gaseous pollutants discharged by the ground producing facilities of coal industry;
- technical requirement for management of the coal slack storage and loading depot; and
- guiding technical requirement for resource utilization and reuse of waste water from coal mining.

In order to further encourage the import of resource-related commodities and commodities that are beneficial to the development of new technology and control the export of resources and products involving high energy costs and high pollution, the Customs Tariff Committee of the State Council issued the *Notice on Adjusting the Provisional Import and Export Tariff Rate of Certain Commodities* (the "*Notice*") on 27 October 2006. Such notice became effective on 1 November 2006. According to the *Notice*, the provisional duty rate levied upon 58 items of import commodities shall be reduced. At the same time, an export duty in the form of a provisional duty shall be levied upon 110 items of commodities, among which a 5% provisional export duty shall be levied upon four resource-related items such as coal and coke.

The Measures for Implementing Work Safety Permits in Coal Mine Enterprises

The State Administration of Work Safety and the SACMS issued the *The Measures For Implementing Work Safety Permits In Coal Mine Enterprises*, which came into effect on 17 May 2004. Pursuant to this document, a coal mine enterprise without a work safety permit may not engage in coal production activities. Coal mining enterprises and their mines that do not satisfy the safety conditions set forth in this document, or those that violate the provisions of this document, will be punished accordingly.

Special Regulations by the State Council on Preventing Work Safety Related Accidents in Coal Mines and Five Sets of Supplemental Rules and Regulations

The *Special Regulations by the State Council on Preventing Work Safety Related Accidents in Coal Mines* was promulgated and entered into effect on 3 September 2005.

This regulation specifies that coal mine enterprises are responsible for preventing coal mine work safety-related accidents. If a coal mine has not obtained, in accordance with the law, a mining right permit, work safety permit, coal production permit or business license and if the mine manager has not obtained, in accordance with the law, a mine manager qualification certificate and a mine manager safety qualification certificate, the coal mine may not engage in production. A coal mine should have adequate safety equipment, facilities and resources and should have in place measures to guard against the occurrence of work safety-related accidents, as well as a sound contingency plan to deal with emergencies. Coal mining enterprises should establish a sound system for the detection, elimination, treatment and reporting of latent work safety-related dangers. If a major latent work safety-related danger as specified exists in a coal mine, the enterprise should immediately suspend production and eliminate the latent danger. Coal mining enterprises should provide their personnel working underground and their special operation personnel with safety education and training in accordance with relevant state regulations. The person in charge of a coal mine and the production and operation management personnel should go into mines and act as foremen on a rotating basis in accordance with state regulations, while a file recording their entry into the mine should be maintained. In addition, the State Administration of Work Safety issued five sets of supplemental measures:

(i) The *Measures for Determining Major Latent Work Safety Related Dangers in Coal Mines (for Trial Implementation)* stipulates the specific criteria for determining major latent work safety-related dangers. It further defines each of the latent safety related dangers specified in the *Special Regulations of the State Council on Preventing Work Safety Related Accidents in Coal Mines,* and lists more than 60 major latent safety related dangers.

(ii) The *Implementing Measures for the Detection and Elimination of Latent Dangers in Coal Mines and the Rectification and Closure of Such Mines (for Trial Implementation)* specifies that coal mining enterprises are responsible for the detection and elimination of latent work safety-related dangers and that the main persons in charge of coal mining enterprises are fully responsible for the detection, elimination and treatment of latent work safety-related dangers in their enterprises.

(iii) The *Measures for the Supervision and Inspection of Coal Mine Safety Training (for Trial Implementation)* specifies that coal mining enterprises must arrange and provide safety education and training to all of their mining personnel in accordance with relevant regulations; select and send their principal persons in charge, work safety management personnel and special operation personnel to qualified coal mine safety training institutions for training in a timely manner; and obtain the corresponding qualification certificates.

(iv) The *Guiding Opinions on Persons in Charge of Coal Mines and Production and Operation Management Personnel Going into Mines as Foremen* requires the various types of coal mines to arrange for their persons in charge and production and operation management personnel to go into the mines to act as foremen and to ensure that each shift has at least one such person on site directing the operations. Coal mining enterprises are required to establish such procedures, clarify foremen's duties and responsibilities and strictly implement internal management and performance appraisal.

(v) The *Measures for Rewarding the Reporting of Major Latent Work Safety Related Dangers in, and Violations of the Law by, Coal Mines (for Trial Implementation)* specifies that all units or individuals have the right to report major latent work safety-related dangers in, and violations of law by, coal mines.

In addition, on 15 December 2004, the NDRC issued a notice announcing a government initiative to impose a price-linking mechanism between the prices of coal and electricity.

THE COAL INDUSTRY

Principal Legislations

The Mineral Resources Law of the PRC ("MRL"), promulgated by the Standing Committee of the National People's Congress on 19 March 1986 and amended on 29 August 1996, governs the exploration, exploitation and mining of mineral resources in China. According to the MRL, all mineral resources, including coal, are owned by the state. Except under limited circumstances, any enterprise planning to engage in the exploration, exploitation and mining of mineral resources must first apply for and obtain exploration rights and mining rights before commencing the relevant activities. The MRL prohibits the transfer of exploration and exploitation rights in general unless the transfer falls within certain specified circumstances.

The Standing Committee of the National People's Congress promulgated the Coal Law of the PRC on 29 August 1996, which became effective on 1 December 1996, to specifically address the exploration, exploitation and mining of coal. The Coal Law sets forth requirements in many areas of coal production, including, among others, exploration, the approval of new mines, the issuance of production permits, the implementation of safety standards, the trading of coal, the protection of mining areas from destructive exploitation, the protection of miners and administrative supervision.

Coal Production

According to the MRL and the Coal Law, the MLR and the local mining resources bureau are the approving and supervising authorities of exploration and exploitation projects. Exploration and exploitation of coal must be approved by the MLR and the relevant local mining resources bureau. The MLR or the relevant local mining resources bureau will issue an exploration licence for each proposed mine or a mining right permit for each mine once it determines that the applicant has met the proscribed requirements under the relevant laws and regulations. The holder of a mining right permit must comply with certain post-approval formalities, such as the filing of annual reports with the relevant mining resources authorities that issued the permit. In addition to the mining right permit, a coal producer must obtain a coal production permit for each of its mines from the competent authorities for coal industry at the national, provincial and municipal government levels in order to commence producing and selling coal in China. The production capacity of each coal mine is subject to annual review by the NDRC or its provincial counterpart. If a coal producer intends to engage in business involving coal products which are not self-produced or self-processed, such as coal trading, it must also obtain an operational licence from the relevant authorities to conduct such business. See "— Coal trading."

Pursuant to the *Investment Reform Decision*, applications for all coal mine development projects within the state plan mining areas are required to be submitted to the NDRC for authorization, while other mining projects are to be submitted to the investment supervisory division of the local governments. The NDRC is required to submit significant mining projects to the State Council for approval.

Under the MRL and the Coal Law, coal producers are required to achieve certain recovery rates. The recovery rates are determined by the relevant department of coal administration under the State Council in

light of different resources and mining conditions at each mining site. Failure to achieve the requisite recovery rate may result in penalties, including the revocation of the coal producer's production permit.

It is unlawful for an entity or individual to conduct mining operations in areas previously authorized for exploitation by other mining operators. An entity whose mining operations cause harm to others in terms of production or living standards must compensate the affected parties and take necessary remedial measures. Under the *Detailed Rules for the Implementation of the Mineral Resources Law*, a mine operator must follow certain procedures in closing a mine, including, among others, submitting a mine closure geology report to the regulatory authority that originally approved the opening of the mine, and submitting a mine closure report to the relevant mineral resources bureau.

Coal Trading

Export

In China, the import and export of goods and technologies and the provision of international trade services are governed by the PRC Foreign Trade Law. The amended PRC Foreign Trade Law became effective on 1 July 2004. Under the amended Foreign Trade Law, the Cargo Import and Export Ordinance and the Administrative Measures of Coal Export Quota, coal exports remain subject to State control and require governmental approval. Under PRC regulations, only state-owned enterprises are authorized to apply for annual export quotas and the relevant coal export permits. Currently, there are only four authorized coal exporters, ChinaCoal Group, Shenhua Group, China Minmetals Corporation and Shanxi Coal Import & Export Group Company. We have entered into a Coal Export and Sales Agency Framework Agreement with ChinaCoal Group, pursuant to which we have appointed ChinaCoal Group as our non-exclusive coal export and sales agent responsible for the export of our coal products. See "Connected Transactions." Pursuant to regulations promulgated in January 2004, China's coal exports have been subject to a government approval system since 1 July 2004, under which the NDRC and the MOFCOM are responsible for determining China's total coal export quota and for allocating the quota among the authorized coal exporters. The total quota will take into consideration China's economic needs, the rational use of coal resources, the PRC Government's economic policy and the dynamics of the domestic and international coal markets. Each year, after the NDRC publishes the total coal export quota for the following year, authorized coal exporters are required to submit written applications for the following year's quota to the NDRC. The NDRC and the MOFCOM then allocate the annual quota for the following year among the authorized coal exporters. Each year's quota expires on December 31. Upon receiving quota approval, authorized coal exporters may apply for coal export permits to the relevant authority designated by the MOFCOM. Authorized coal exporters are also required to report their monthly quota usage to the NDRC.

Domestic trading of coal

Pursuant to the *Measures for the Regulation of Coal Operations* promulgated by the NDRC on 27 December 2004, the state implemented a system to examine coal operation qualifications in respect of coal operations, including the wholesaling and retailing of raw coal and processed coal products, and the processing and distribution of coal for civilian use. Before an enterprise can engage in coal operations, it must obtain a coal operation qualification certificate. A coal production enterprise that deals in coal products which it did not itself produce and process is required to obtain coal operation qualifications. Such enterprise is prohibited from dealing in coal products produced and/or processed by a coal mine enterprise that does not have a coal production permit or in coal products of a coal operation enterprise that does not have coal operation

qualifications, and is also prohibited from selling coal products to a coal operation enterprise that does not have coal operation qualifications.

Pricing

Although the PRC Government indirectly influences coal prices through its broad regulation of electricity prices and control over the allocation of national railway capacity, domestic coal prices have mainly been market-driven since 2002, when the PRC Government eliminated the price control measures for coal used in electric power generation. Prior to 2006, however, the PRC Government continued to implement temporary measures to prevent and control any unusual fluctuations in thermal coal prices. This, among other reasons, has caused thermal coal contract prices for major users to be generally lower than spot market prices during this period. On 27 December 2005, the NDRC announced the elimination of such temporary thermal coal price intervention practice, thus completely removing control over thermal coal prices, including contract prices for major users.

Coke Production

Coke production is supervised by the NDRC. The *Coke Production Industry Entry Requirements*, promulgated by the NDRC and became effective on 1 January 2005 (the "*Entry Requirements*"), sets out the requirements that a coke production plant must meet before it can be permitted to engage in coke production. According to the *Entry Requirements*, a coke production plant must demonstrate to the relevant authorities that it possesses production equipment meeting the PRC Government-proscribed technical standards, and that it is capable of producing coke of or exceeding a minimal grade level. Additionally, a coke production plant must meet the relevant requirements with respect to air pollution and waste handling and ensure that pollutants from the construction and expansion of the coke production do not exceed the legally permitted limits. The new construction, alteration and expansion of a coke production plant must meet all the relevant requirements under the *Entry Requirements* before it is permitted to engage in the commercial production of coke. The NDRC makes periodic announcements of qualified coke producers.

Transportation

Railway

The MOR is responsible for the formulation and administration of the national rail system in China. Any proposed plan for the construction of new railways must obtain prior approval from the MOR or the relevant authorities designated by the MOR. Prior to commencing operations, a rail line must pass the inspection sponsored by the relevant authority that approved the construction plan of the rail line.

Railway has been the primary method of transportation for coal production in provinces and regions far away from major consumers in coastal regions. The MOR engages in the allocation of coal transport capacity on China's national railway system. Coal producers apply each year to the MOR for allocation of annual railway transportation capacity. The MOR, or the relevant authority designated by it, determines and promulgates the annual railway transportation allocation at the Annual National Coal Trading Convention, after taking into consideration requests from various coal producers for railway transportation. Coal producers may file application with the relevant railway and transportation regulatory authorities requesting for the allocation of freight transportation capacity that is not within the scope of the annual railway transportation allocation plan promulgated by the MOR.

The railway operators impose freight rates on coal producers who utilize the railway for the transportation of their coal pursuant to a uniform freight rate guideline approved by the NDRC. Railway operators may not charge more than the maximum freight rate approved by the NDRC, which reflects the construction costs of the rail line as well as a reasonable investment return. Any adjustment to such maximum freight rate requires approval from the NDRC. In May 2004, the PRC Government reinstated mandatory payments to the railway construction fund by coal exporters at RMB0.033 per tonne kilometer for export coal transported on certain east-west coal transport lines of the national rail system. According to *The Notice on Issues Concerning Policies on Disposing of 18 Expired Government Funds* promulgated by the Ministry of Finance on 4 January 2006, the collection of railway construction funds will continue until the end of 2006. In addition, according to the *Notice of Adjustment of Railway Cargo Transportation Price* (關於調整鐵路貨物運輸價格的通知) issued by the NDRC and the MOR on 29 March 2006 (Fa Gai Jia Ge [2006] 510), the standard railway construction fund shall be RMB0.033 per tonne kilometer.

Shipping and port operations

Under the Ports Law of the People's Republic of China, effective from 1 January 2004, a port operator must obtain the approval from the relevant government authorities in charge of transportation, safety, customs and maritime matters before it commences operation. The relevant government authorities in charge of port operations will issue a port operating license to the port operator generally within thirty days of application submission. For port operators wishing to construct new ports and ports with annual shipping capacity exceeding 2.0 million tonnes to service mineral resources, oil and gas, approvals from the NDRC and the MOC must be obtained.

Similar to freight rates, users of port facilities are charged port fees for the import and export of goods. The port fees are either set by the state or subject to a state guidance price promulgated by the MOC and reviewed and approved by the NDRC and the local pricing authority.

Shipping-related businesses, such as vessel or cargo agencies, cargo handling businesses, customs declarations businesses and logistics businesses, must also obtain requisite qualification certificates or licenses.

Safety

China has enacted relatively comprehensive sets of laws, statutes, rules and regulations governing safety and coal mine work safety. Pursuant to the existing regulations, the safety facilities of coal mining projects should be designed, constructed and put into use simultaneously with the main project.

The state insists on comprehensive regulation of coal mines and strengthening of the coal mine work safety assurance system. The SACMS is responsible for carrying out centralized regulation and monitoring of coal mine safety on a regular basis. The ventilation, fire prevention, water prevention, gas prevention, poisoning prevention, dust prevention safety facilities and safety resources of coal mines are required to comply with statutorily mandated requirements. Coal mines must make allocations of and use funds set aside to meet mining safety standards in accordance with the law and other related regulations. Coal mines must strictly implement the gas inspection system.

The SACMS is the PRC Government authority responsible for supervising of the safety of coal production. In order to proceed with the construction of a coal mine project, the project's safety designs and procedures must be examined and approved by the SACMS or its local offices. Upon the completion of a coal mine construction project and before the commencement of production, further inspection and approval by the SACMS or its local offices of the constructed facilities are required. The design of coal mines and the

operation of the ventilation and fire-extinguishing systems all must pass the scrutiny of the SACMS. The equipment, apparatus, instruments, meters and protective articles used by coal mines must comply with safety standards. Under the *Measures for Administrative Punishment of Coal Mines Security Supervision*, promulgated and adopted by the SACMS and effective on 15 August 2003, the SACMS shall conduct regular safety inspections of coal producers pursuant to the applicable production safety and mining safety laws and regulations. Coal producers may not mine coal pillars without authorization or use dangerous coal extraction methods that threaten the work safety of adjacent coal mines. Coal producers whose operations fail to meet safety requirements are subject to penalties, including fines and suspension of operations. In the event of a mining accident involving fatalities or serious injuries, coal enterprises are required to report to the relevant government authorities in charge of labor administration and coal mines within 24 hours.

Each operating coal mine must possess a valid coal production safety permit from SACMS. The coal production safety permits are valid for an initial period of three years, and can only be renewed if the coal mine continues to meet safety requirements imposed by the relevant authorities. No coal mine may operate without having a valid coal production safety permit. To further strengthen the safety regulation of coal mines, the SACMS and SAWS issued the *Amended Coal Mine Safety Procedures* effective 1 January 2005. The *Amended Coal Mine Safety Procedures* set forth higher production safety requirements and stricter safety standards for coal producers in China.

Environmental Protection

Mining operations, including both open pit mines and underground mines, may result in disturbances of surface and underground land and cause water pollution, landslides and other types of environmental damage. To manage the adverse effects that the coal industry has on the environment, China has promulgated a series of laws and regulations.

Through these laws and regulations, China has established national and local environmental protection legal frameworks and issued standards applicable to emission controls, discharges of wastes and pollutants to the environment, generation, handling, storage, transportation, treatment and disposal of waste materials by production facilities, land rehabilitation and reforestation.

The Environmental Protection Law, promulgated by the National People's Congress on 26 December 1989, is the cardinal law for environmental protection in China. The law establishes the basic principle for coordinated advancement of economic growth, social progress and environmental protection, and defines the rights and duties of governments at all levels.

Pursuant to the Environmental Protection Law, the SEPA is empowered to formulate national environmental quality and discharge standards and to monitor China's environmental system at the national level for the purpose of preventing and eliminating environmental pollution and damage to ecosystems. Environmental protection bureaus at the county level and above are responsible for environmental protection within their areas of jurisdiction. Local environmental protection bureaus may set stricter local standards than the national standards and enterprises are required to comply with the stricter of the two sets of standards. The PRC Environmental Protection Law requires any entity operating a facility that produces pollutants or other hazards to incorporate environmental protection measures into its operations and to establish an environmental protection responsibility system, which must adopt effective measures to control and properly dispose of waste gases, waste water, waste residue, dust or other waste materials.

New construction, expansion or reconstruction projects and other installations that directly or indirectly discharge pollutants to the environment shall be subject to relevant state regulations governing environmental

protection for such projects. Entities undertaking such projects must submit a pollutant discharge declaration statement detailing the amount, type, location and method of treatment to the competent authorities for examination. The authorities will allow the construction project operator to release a certain amount of pollutants into the environment and will issue a pollutant discharge license for that amount of discharge subject to the payment of discharge fees. The release of pollutants is subject to monitoring by the competent environmental protection authorities. If an entity discharges more than the amount permitted by the pollutant discharge license, the local environmental protection bureau can fine the entity up to several times the discharge fees payable by the offending entity for its allowable discharge, require the offending entity to close its operations, or take other measures to remedy the problem.

In the environmental impact statement of a construction project, the project operator shall make an assessment regarding the pollution and environmental hazards the project is likely to produce and its impact on the ecosystem, and measures for their prevention and control. The operator shall submit the statement according to the specified procedure to the competent environmental protection authority for examination and approval. The building of sewage outlets within any water conservancy projects, such as canals, irrigation channels and reservoirs, shall be subject to the consent of the competent authority in charge of water conservancy projects.

The facilities for the prevention and control of pollution must be designed, constructed and put into use or operation simultaneously with the main part of a construction project. Such facilities must be inspected by the competent environmental protection authority. If they do not conform to the specified requirements, the operator shall not be permitted to put the new facility into operation or use.

In addition, the *Regulations on Coal Dust Control at Ports* and *Railway Environmental Protection Regulations,* both require port or railway operators to take measures to limit coal dust pollution.

The rehabilitation of mining sites is another important issue the PRC Government has sought to address. Under the Law of Land Administration of the People's Republic of China, promulgated on 25 June 1986, and amended on 28 August 2004, and the Land Rehabilitation Regulations, issued by the State Council in 1988 and effective 1 January 1989, coal producers must undertake measures to restore the mining site to its original state within a prescribed time frame if mining activities result in damage to arable land, grassland or forest. The rehabilitated land must meet rehabilitation standards, as required by law from time to time, and may only be subsequently used upon examination and approval by the land authorities. A coal producers' failure to comply with this requirement or its failure to return the mining site to its original state will result in the imposition of fines, rehabilitation fees and/or rejection of applications for land use rights by the local bureau of land and resources.

Emissions of waste water by coal mines and coking plants are regulated by the Law on Prevention and Control of Water Pollution of the People's Republic of China, promulgated by the National People's Congress in 1984 and effective as amended in 1996, and the Administrative Regulations on the Levy and Use of Discharge Fees, issued by the State Council on 2 January 2003 and effective 1 July 2003. Any new construction projects, such as coal mines and coking plants, must submit an environmental impact statement, which shall include an assessment on the water pollution hazards the project is likely to produce and its impact on the ecosystem. The environment impact statement must also contain measures to prevent and control the water pollution hazards. Every new production facility must be equipped with waste water processing facilities which must be put in use together with the production facilities. Construction projects that discharge pollutants into water shall pay a pollutant discharge fee in accordance with state regulations.

Violators of the Environmental Protection Law and various environmental regulations may be subject to warnings, payment of damages and fines. Any entity undertaking construction work or manufacturing activities before the pollution and waste control and processing facilities are inspected and approved by the environmental protection department may be ordered to suspend production or operations and may be fined. The violators of relevant environment protection laws and regulations may be exposed to criminal liability if violations resulted in severe loss of property, personal injuries or death.

In addition to the PRC environmental laws and regulations, China is a signatory to the 1992 United Nations Framework Convention on Climate Change and the 1998 Kyoto Protocol, which propose emission targets to reduce greenhouse gas emissions. The Kyoto Protocol came into force on 16 February 2005. At present, the Kyoto Protocol has not set any specific emission targets for certain countries, including China.

TAXATION AND FEES

The table below sets forth material taxes and fees that are imposed upon coal producers in China, as well as reserves which we are required to set aside.

Item	Base	Rate	Relevant business segment
Corporate income tax	Taxable income	33% or 15%	All
VAT	Revenue	13% or 17%	All
Business tax	Revenue from service	3% or 5%	Coal trading services and coal mine design services
City construction tax	Amount of VAT and business tax	7% or 5%	All
Education surcharge	Amount of VAT and business tax	3%	All
Resource tax	Aggregate volume of raw coal or coal products sold	RMB 1.5-3.2 per tonne	Coal
Mining rights utilization fee	Mining area covered	RMB 1,000 per square kilometer per year	Coal
Compensation for the depletion of coal resources	Proceeds from the sale of coal	1% of the approved mining recovery rate divided by the actual mining recovery rate	Coal
Maintenance fee	Volume of raw coal produced	RMB 8.50 or RMB 10.50 per tonne[(1)]	Coal
Safety fund	Volume of raw coal produced	No less than RMB 3.0-8.0 per tonne[(1)]	Coal

(1) Pursuant to related regulations, if an enterprise has provided maintenance fees or safety fund according to the standards prescribed by the provincial or higher level of government, it is obligated to keep providing the fees if they are higher than the standard as described herein.

HISTORY AND DEVELOPMENT

We were established as a joint stock limited company under the PRC Company Law on 22 August 2006 following the restructuring of our Controlling Shareholder, ChinaCoal Group, in preparation for the Global Offering. ChinaCoal Group is a State-owned enterprise. Pursuant to the Restructuring Agreement entered into between ChinaCoal Group and us, ChinaCoal Group transferred to us substantially all of the assets, liabilities and interests of its coal operations, coking operations, coal mining equipment manufacturing operations and other related operations in exchange for our Shares. ChinaCoal Group currently owns all of our Shares and, upon completion of the Global Offering, will own an approximately 68.25% interest in us. Further details of the Restructuring are set forth below under "Our Restructuring".

The predecessor to ChinaCoal Group, China National Coal Import and Export Corporation (中國煤炭進出口總公司), was a State-owned enterprise established in December 1981, whose primary business focus was import and export trading of coal products. China National Coal Import and Export Corporation (中國煤炭進出口總公司) changed its name to China National Coal Industry Import and Export Corporation (中國煤炭工業進出口總公司) in 1992, and to China National Coal Industry Imp. & Exp. Group Corp. (中國煤炭工業進出口集團公司) in 1997. In 1998, Pingshuo Coal Industry Company (平朔煤炭工業公司), China National Coal Sales and Transportation Corporation (中國煤炭銷售運輸總公司), China National Local Coal Mines Corp. (中國地方煤礦總公司) and China Coal Production Technology Development Corporation (中煤生產技術開發公司) were merged into China National Coal Industry Imp. & Exp. Group Corp. (中國煤炭工業進出口集團公司).

China National Coal Industry Imp. & Exp. Group Corp. (中國煤炭工業進出口集團公司) underwent further reorganization from 1999 to 2003. Pursuant to the approvals by the authorities of the PRC Government, Datun Coal and Electricity (Group) Limited-Liability Company (大屯煤電(集團)有限責任公司), China Coal Mining Engineering Equipment Group Corporation (中國煤礦工程機械裝備集團公司), Beijing Coal Mining Machinery Factory (北京煤礦機械廠), Zhangjiakou Coal Mining Machinery Co., Ltd. (張家口煤礦機械有限公司), China National Comprehensive Coal Utilization Group Corporation (中國煤炭綜合利用集團公司), China National Coal Materials Industrial Group Corp. (中國煤炭物產集團公司), and China Coal Construction Group Corporation (中煤建設集團公司) merged with China National Coal Industry Imp. & Exp. Group Corp. (中國煤炭工業進出口集團公司) during this period. Following the reorganization mentioned above, China National Coal Industry Imp. & Exp. Group Corp. (中國煤炭工業進出口集團公司) changed its name to China National Coal Group Corporation (中國中煤能源集團公司), or ChinaCoal Group, in 2003.

OUR RESTRUCTURING

We underwent the Restructuring in preparation for the Global Offering. Pursuant to the Restructuring Agreement effective on 5 September 2006, ChinaCoal Group transferred to us substantially all of the assets, liabilities and interests of its coal operations, coking operations, coal mining equipment manufacturing operations and other operations in exchange for our Shares. The specific assets and businesses ChinaCoal Group transferred to us include its entire interests in:

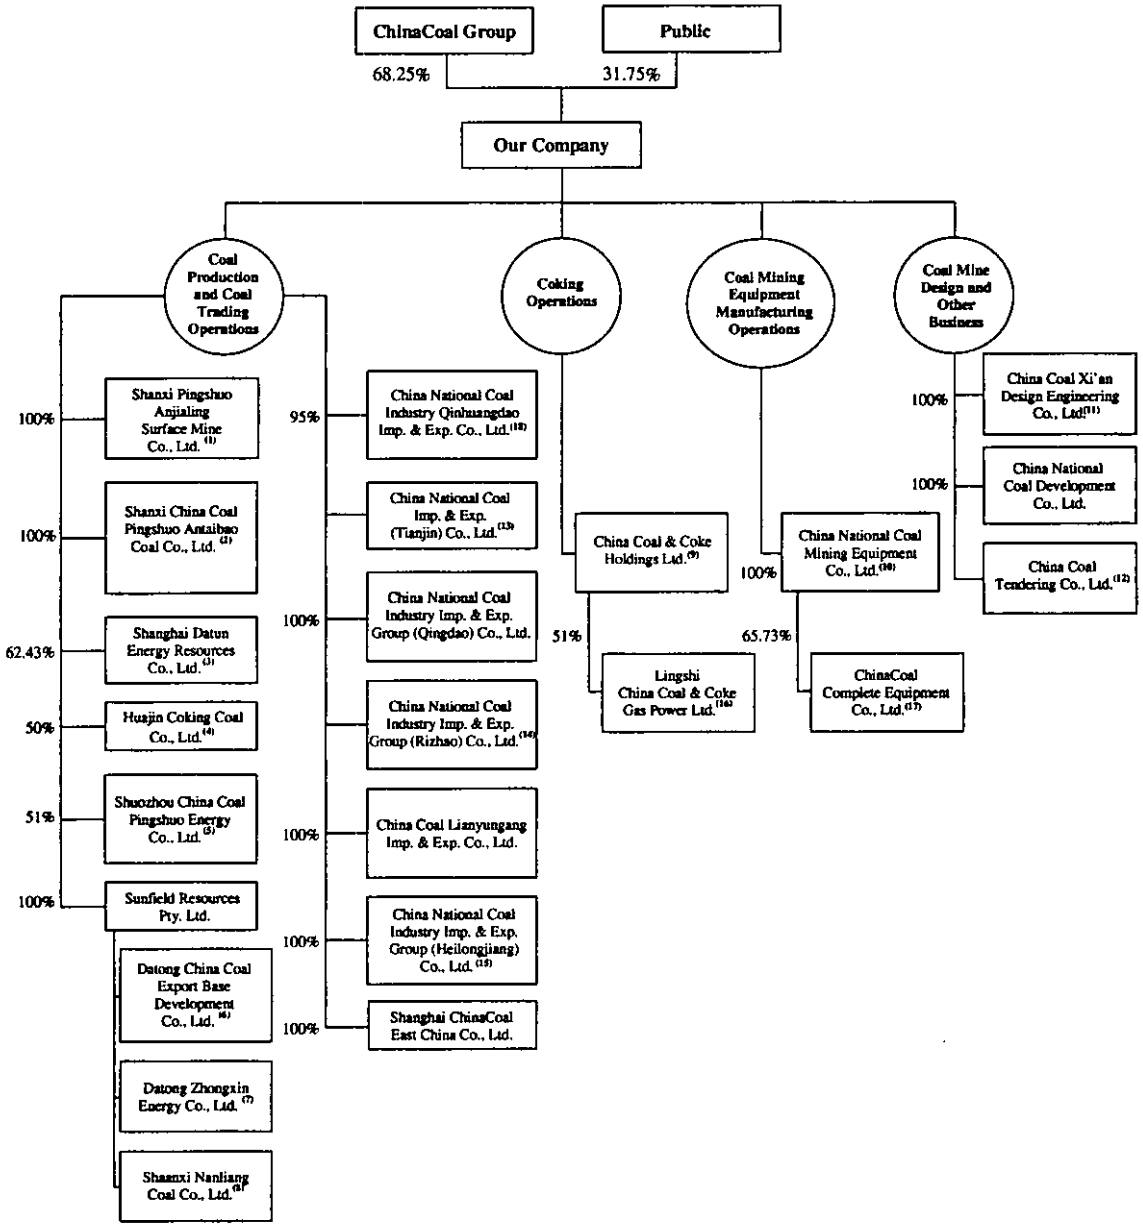
- 12 coal mines, comprising nine mines in operation and three mines under development. The mines transferred by ChinaCoal Group to us are all located in the Shanxi, Shaanxi and Jiangsu provinces, including the Pingshuo Mining Area, the Datun Mining Area (through Shanghai Datun), the Liliu Mining Area, the Xiangning Mining Area (through its 50% interest in Huajin Joint Venture) and the Nanliang Mining Area;

- 13 coal processing plants;
- substantially all businesses related to coal production and sales;
- substantially all businesses associated with coal trading;
- five coking plants, and substantially all businesses related to coke production, sales and trading activities;
- four coal mining equipment manufacturing plants, and substantially all businesses related to coal mining equipment manufacturing operations; and
- two mine design institutes and substantially all businesses related to coal mine design.

Pursuant to the Restructuring Agreement, ChinaCoal Group also transferred to us substantially all assets and liabilities in connection with the above businesses, including the relevant licenses and approvals, contractual rights and obligations, employees, and business and financial books and records. Following the Restructuring, we have focused our business activities on our four core business segments as set out in "— Our corporate structure" below, and have initiated the centralization and integration of various management functions across our businesses.

ChinaCoal Group retained the following businesses and their related assets, liabilities and interests: (i) equity interests in certain coal gas, coke and coking coal operations and in certain coal-based chemicals manufacturing and sales operations; (ii) operations of the Mines under Restructuring; (iii) coal mine and civil engineering construction operations; (iv) coal bed methane development operations; (v) provision of coal export agency services and a small amount of coal trading and agency services business of certain overseas trading companies; (vi) community functions such as schools and hospitals; (vii) a small amount of investment in equity and some non-operational assets; and (viii) other non-core operations including real estate and hotel development and management.

In consideration of the assets and businesses transferred to us, we issued 8.0 billion Domestic Shares to ChinaCoal Group upon our incorporation. Such Domestic Shares represent our entire issued share capital immediately before the Global Offering. Upon completion of the Global Offering, assuming no exercise of the Over-allotment Option, ChinaCoal Group will own approximately a 68.25% interest in us.



In accordance with the relevant regulations of the PRC Government, we are required to make a distribution to ChinaCoal Group in the amount equal to the difference in our Company's net asset value as of 1 October 2005, the date immediately following our last valuation date, and as of 21 August 2006, the date immediately prior to the date on which our Company was incorporated.

As part of the Restructuring, we have also entered into certain agreements with ChinaCoal Group. Pursuant to these agreements, we and ChinaCoal Group and some of ChinaCoal Group's subsidiaries will continue to provide relevant products and support services to one another. See "Connected Transactions" for details.

The Restructuring required approvals from relevant PRC regulatory authorities, including the State Council, the SASAC, the MOF and the MLR of the PRC. Our Restructuring complies with all applicable Chinese laws and regulations, and all necessary approvals from relevant PRC regulatory authorities required for the implementation of the Restructuring have been obtained.

OUR CORPORATE STRUCTURE

The following chart sets out our ownership and corporate structure following the Restructuring and immediately after completion of the Global Offering, assuming no exercise of the Over-allotment Option:

(1) Shanxi Pingshuo Anjialing Surface Mine Company Limited (山西平朔安家嶺露天煤炭有限公司) wholly owns and operates Anjialing Open Pit Mine, Anjialing Underground Mine and Anjialing Coal Processing Plant.

(2) Shanxi China Coal Pingshuo Antaibao Coal Co., Ltd. (山西中煤平朔安太堡煤炭有限責任公司), formerly Pingshuo First Coal Co., Ltd., wholly owns and operates Antaibao Open Pit Mine and Antaibao Coal Processing Plant.

(3) Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司) wholly owns and operates Yaoqiao Mine, Kongzhuang Mine, Xuzhuang Mine, Longdong Mine and ancillary coal processing plants. Shanghai Datun Energy (600508) is a joint stock company incorporated in Shanghai, PRC on 29 December 1999, with its A shares listed on the Shanghai Stock Exchange. As of 30 September 2006, the total issued share capital of Shanghai Datun Energy was 722,718,000 shares, of which

451,191,333 shares or 62.43% were non-listed shares, and 271,526,667 shares or 37.57%, were listed shares. Shanghai Datun Energy is one of our major subsidiaries. As of 30 September 2006, we had an effective equity interest of 62.43% in Shanghai Datun Energy. The remaining 37.57% equity interests were held by other independent third parties. Its operating and financial results are consolidated to our financial statements in accordance with IFRS and PRC GAAP. Shanghai Datun Energy has published on 26 October 2006 its unaudited interim financial statements as of and for the three months ended 30 September 2006. See "Appendix IV — Unaudited PRC GAAP Interim Financial Information of Shanghai Datun Energy". As an integrated coal company, Shanghai Datun Energy's primary products and services include coal, electric power, primary aluminum and transportation. It processes coal mainly extracted from its four coal mines located in the Datun Mining Area and uses a portion of it for power generation at its nine coal-fired power generators. Most of Shanghai Datun Energy's coal customers are located in the region of the Yangtze River Delta, which includes the Jiangsu Province, Zhejiang Province and Shanghai Municipality. Shanghai Datun Energy also owns 180 km of rail lines which link to major national rail lines to provide coal transportation services to independent third parties. For the year ended 31 December 2005, approximately 75.0%, 7.3%, 13.7% and 3.9% of the total revenue of Shanghai Datun Energy were generated from the sales of coal, power and primary aluminum and the provision of transportation services. For the same period, Shanghai Datun Energy procured approximately 11.8% of goods and services from its five largest suppliers and sold approximately 12.4% to its five largest customers. Currently, Shanghai Datun Energy sells its coal products through its own sales force. In the three months ended 30 September 2006, Shanghai Datun Energy generated a total operating revenue of RMB1,058.1 million, representing an increase of 9.2% as compared with the corresponding period in 2005, which was primarily due to the increase in sales volume and the average selling price of its coal products. During the same period, cost of sales increased by 1.6% from RMB748.5 million to RMB760.2 million. Accordingly, the profit from its principal operations increased by RMB75.0 million, or 35.6%, from RMB210.4 million to RMB285.4 million during the 3 month period. Future new business opportunities will be allocated between Shanghai Datun Energy and our Company according to the product and services to be provided and the expertise required by the relevant business opportunities. In relation to the arrangements to be put in place where a business opportunity arises which, having taken into account the foregoing factors, can be taken up either by the rest of our Company or by Shanghai Datun Energy itself, and which therefore represents a potential area of competition with our Company, our independent non-executive directors will be the final decision-makers. The Board of Directors of Shanghai Datun Energy consists of 12 directors, of whom only Mr. Yang Lieke is also our director. There is no other overlap of senior management personnel between our Company and Shanghai Datun Energy. None of the expected net proceeds from the Global Offering is to be allocated to Shanghai Datun Energy.

(4) Huajin Coking Coal Co., Ltd. (華晉焦煤有限責任公司) wholly owns and operates Shaqu Underground Mine and Shaqu Coal Processing Plant and holds the mining rights to Wangjialing Underground Mine. Currently, the company mainly operates the businesses of coal production, processing and sales. Our Company owns a 50% interest in Huajin Coking Coal Co., Ltd., which is jointly controlled by us and Shanxi Coking Coal Group Co., Ltd., an independent third party to our Company. The main business scope of Shanxi Coking Coal Group Co., Ltd. includes coal mining, processing and sales. The paid-up capital of Huajin Coking Coal Co., Ltd. is RMB519,876,590. In 2003, the share of revenue and loss combined of Huajin Coking Coal Co., Ltd. was RMB129.8 million and RMB53.2 million, respectively. In 2004, 2005, and the six months ended 30 June 2005 and 2006, Huajin Coking Coal Co., Ltd. had revenues of RMB288.5 million, RMB447.4 million, RMB194.5 million and RMB239.0 million, respectively, and net profits of RMB47.2 million, RMB63.7 million, RMB35.5 million and RMB53.6 million, respectively.

(5) Shuozhou China Coal Pingshuo Energy Co., Ltd. (朔州中煤平朔能源有限公司) wholly owns and operates Shuozhong Coal Processing Plant. Currently, the company mainly operates the coal processing business. We own a 51% interest in Shuozhou China Coal Pingshuo Energy Co., Ltd. which is jointly controlled by us, and minority shareholders, Datong Luda Railway transportation Co., Ltd., an independent third party to our Company, Shuozhou Shuocheng Liu Jia Kou Coal Transportation Terminal, a connected person to our Company, and Shuozhou Pingshuo Industry Development Co., Ltd, a wholly owned subsidiary of the ChinaCoal Group. Datong Luda Railway Transportation Co., Ltd. mainly operates local dedicated rail lines and cargo transportation by rail. Shuozhou Shuocheng Liu Jia Kou Coal Transportation Terminal mainly operates the coal transportation and sales by rail, cargo transportation by motor vehicle and coal loading and unloading. Shuozhou Pingshuo Industry Development Co., Ltd. is engaged in the business of mechanical maintenance, motor vehicle repairing and trading, etc. The paid-up capital of Shuozhou China Coal Pingshuo Energy Co., Ltd. is RMB150.0 million. In 2004, the share of revenue and net profit combined of Shuozhou China Coal Pingshuo Energy Co., Ltd. was RMB88.5 million and RMB6.3 million, respectively. In 2005 and the six months ended 30 June 2005 and 2006, Shuozhou China Coal Pingshuo Energy Co., Ltd. had revenues of RMB781.4 million, RMB82.8 million and RMB238.9 million, respectively, and net profits of RMB2.5 million, RMB15.1 million and RMB23.4 million, respectively.

(6) Datong China Coal Export Base Development Co., Ltd. (大同中煤出口煤基地建設有限公司) ("Datong Export Base") wholly owns and operates Dazhong Coal Processing Plant. Currently, the company mainly operates the businesses of coal processing and sales. Our Company and Sunfield Resources Pty. Ltd. own a 19% interest and a 41% interest, respectively, in Datong Export Base, which is jointly controlled by us and Datong Coal Industry Co., Ltd., a connected person to our Company. Datong Coal Industry Co., Ltd. is mainly engaged in the coal production and processing businesses. The paid-up capital of Datong Export Base is RMB125.0 million. In 2003 and the six months ended 30 June 2006, Datong Export Base had revenues of RMB479.3 million and RMB352.1 million, respectively, and losses of RMB10.0 million and RMB0.3 million, respectively. In 2004, 2005 and the six months ended 30 June 2005, Datong Export Base had revenues of RMB703.0 million, RMB793.5 million and RMB388.4 million, respectively, and net profits of RMB123.1 million, RMB20.0 million and RMB20.7 million, respectively.

(7) Datong Zhongxin Energy Co., Ltd. (大同中新能源有限公司) ("Datong Zhongxin Energy") wholly owns and operates Zhongxin Coal Processing Plant. Currently, the company mainly operates in the business of coal processing and sales. Our Company and Sunfield Resources Pty. Ltd. own a 5% interest and a 37% interest, respectively, in Datong Zhongxin Energy, which is jointly

controlled by us and three independent third parties to our Company namely Datong Shangshenjian Coal Transportation Terminal, Zhejiang Fuxing Electric Power Fuel Co., Ltd. and Hainan Jingtie Trade and Industry Development General Company. The business scope of Datong Shangshenjian Group Transportation Terminal is coal trading. The business scope of Zhejiang Fuxing Electric Power Fuel Co., Ltd. includes the development of electric power fuel technology, coal sales and wholesale of gasoline, diesel fuel and fuel oil. The major business scope of Hainan Jingtie Trade and Industry Development General Company is the trading of mineral products, coal, coke, chemical products and raw materials. The paid-up capital of Datong Zhongxin Energy is RMB161.0 million. In 2003, 2004, 2005 and the six months ended 30 June 2005, Datong Zhongxin Energy had revenues of RMB149.4 million, RMB202.6 million, RMB410.0 million and RMB178.7 million, respectively, and net profits of RMB11.6 million, RMB7.1 million, RMB17.5 million and RMB12.2 million, respectively. In the six months ended 30 June 2006, the share of revenue and loss combined of Datong Zhongxin Energy was RMB127.7 million and RMB3.8 million, respectively.

(8) Shaanxi Nanliang Coal Co., Ltd. (陝西南梁礦業有限公司) ("Shaanxi Nanliang") wholly owns and operates Nanliang Mine. Our Company and Sunfield Resources Pty. Ltd. own a 23% interest and a 32% interest, respectively, in Shaanxi Nanliang which is jointly controlled by us and a connected person to our Company, namely Shaanxi Yulin Coal Export Group Corporation, and three independent third parties, namely Hainan Jingtie Trade and Industry Development General Company, Zhejiang Fuxing Electric Power Fuel Co., Ltd. and Shaanxi Coal Transportation Group Co., Ltd. The business scope of Shaanxi Yulin Coal Export Group Corporation is the domestic sale and export of coal. Zhejiang Fuxing Electric Power Fuel Co., Ltd. is mainly engaged in the development of electric power fuel technology, coal sales and wholesale of gasoline, diesel fuel and fuel oil. The business scope of Shaanxi Coal Transportation Group Co., Ltd. includes the sale and transportation of coal, coal associated ore products, coke and by-products, clean coal and by-products of coal processing plants. The paid-up capital of Shaanxi Nanliang is RMB68.75 million. In 2003, 2005 and the six months ended 30 June 2005 and 2006, Shaanxi Nanliang had revenues of RMB83.3 million, RMB89.6 million, RMB46.6 million and RMB46.2 million, respectively, and net profits of RMB11.3 million, RMB23.4 million, RMB5.9 million and RMB11.6 million, respectively. In 2004, the share of revenue and loss combined of Shaanxi Nanliang was RMB64.9 million and RMB0.3 million, respectively.

(9) Our Company and China National Coal Industry Imp. & Exp. Tianjin Co., Ltd. (天津中煤進出口有限公司) own 95% and 5% interests in China Coal & Coke Holdings Ltd. (中煤焦化控股有限責任公司) ("Coke Holdings"), respectively. The Coking enterprises controlled by and with Coke Holdings as its Shareholder include China Coal & Coke Longquan Limited (汾陽市中煤龍泉焦化有限責任公司), China Coal & Coke Mudanjiang Limited (中煤牡丹江焦化有限責任公司), China Coal & Coke Jingda Limited (山西省太谷縣中煤京達焦化有限公司), China Coal & Coke Jiuxin Limited (靈石縣中煤九鑫焦化有限責任公司), China Coal & Coke Xuyang Limited (河北中煤旭陽焦化有限公司), Coke Holdings' shareholdings in such enterprises are 60%, 100% (Coke Holdings and China National Coal Industry Imp. & Exp. Group (Heilongjiang) Co., Ltd. (中國煤炭工業進出口集團黑龍江有限公司) holding 95% and 5% respectively), 70%, 75% and 45% respectively. The minority Shareholder of China Coal & Coke Jiuxin Limited, namely, Lingshi Jiuxin Coal Preparation Company Limited is a connected person to our Company. The minority Shareholder of China Coal & Coke Longquan Limited, namely Shanxi Longquan Foundry Coke Company Limited, is a connected person to our Company.

(10) China National Coal Mining Equipment Co., Ltd. (中國煤礦機械裝備有限責任公司) wholly owns and operates China Coal Beijing Coal Mining Machinery Co., Ltd. (中煤北京煤礦機械有限責任公司) and China Coal Zhangjiakou Coal Mining Machinery Co., Ltd (中煤張家口煤礦機械有限責任公司) and is a 40% shareholder of Zhangjiakou China Coal Chuangli Mining Machinery Co., Ltd. (張家口中煤創力採掘設備有限責任公司).

(11) China Coal Xi'an Design Engineering Co., Ltd. (中煤西安設計工程有限責任公司) wholly owns and operates China Coal Handan Design Engineering Co., Ltd. (中煤邯鄲設計工程有限責任公司).

(12) Our Company and China National Coal Development Co., Ltd. (中國煤炭開發有限責任公司) own 60% and 40% interests in China Coal Tendering Co., Ltd. (中煤招標有限責任公司), respectively.

(13) Our Company and China National Coal Development Co., Ltd. (中國煤炭開發有限責任公司) own 90% and 10% interests in China National Coal Imp. & Exp. (Tianjin) Co., Ltd. (天津中煤進出口有限公司), respectively.

(14) Our Company and China National Coal Development Co., Ltd. (中國煤炭開發有限責任公司) own 90% and 10% interests in China National Coal Industry Imp. & Exp. Group (Rizhao) Co., Ltd. (中國煤炭工業進出口集團日照有限公司), respectively.

(15) Our Company and China National Coal Development Co., Ltd. (中國煤炭開發有限責任公司) own 92.6% and 7.4% interests in China National Coal Industry Imp. & Exp. Group (Heilongjiang) Co., Ltd. (中國煤炭工業進出口集團黑龍江有限公司), respectively.

(16) Lingshi China Coal & Coke Gas Power Limited (靈石縣中煤焦化煤氣發電有限責任公司)owns and operates a gas electric power generation plant. Coke Holdings owns a 51% interest in Lingshi China Coal & Coke Gas Power Limited, which is jointly controlled by it and two independent third parties to our Company, namely Shanxi Lingshi Zhongkai Industrial Co., Ltd. and Lingshi Jiuxin Coal Preparation Company Limited. The business scope of Shanxi Lingshi Zhongkai Industrial Co., Ltd. includes the installation and sales of facilities for electric power lines and power generation, etc. The business scope of Lingshi Jiuxin Coal Preparation Company Limited is clean coal and coke processing. The paid-up capital of Lingshi China Coal & Coke Gas Power Limited is RMB1.0 million. In 2005 and the six months ended 30 June 2005 and 2006, Lingshi China Coal & Coke Gas Power Limited had no revenue and it had losses of RMB0.333 million, RMB0.115 million and RMB0.167 million, respectively.

(17) China Coal Complete Equipment Co., Ltd. (中煤設備成套有限公司) mainly provides mining equipments and maintenance and repair services to domestic coal producers. China National Coal Mining Equipment Co., Ltd. owns a 65.73% interest in China Coal Complete Equipment Co., Ltd., which is jointly controlled by it and SDIC Asset Management Company (國投資產管理公司), an independent third party to our Company. SDIC Asset Management Company's business scope includes

asset management, asset restructuring and related businesses. The paid-up capital of China Coal Complete Equipment Co., Ltd. is RMB28.5 million. In 2003, the share of revenue and loss combined of China Coal Complete Equipment Co., Ltd. was RMB45.6 million and RMB1.5 million, respectively. In 2004, 2005 and the six months ended 30 June 2005 and 2006, China Coal Complete Equipment Co., Ltd. had revenues of RMB37.3 million, RMB67.8 million, RMB31.1 million and RMB22.3 million, respectively, and net profits of RMB0.2 million, RMB0.2 million, RMB0.2 million and RMB0.3 million, respectively.

(18) China Coal Trade and Industry Co., Ltd. (中煤實業有限責任公司), a wholly owned subsidiary of ChinaCoal Group, holds the other 5% of the interests.

The minority shareholdings not disclosed in the chart and footnotes above are held by third parties independent to our Company.

Other than the disclosure above, we directly hold the exploration right to Pingshuo East Open Pit Mine and the mining right permit for Antaibao Underground Mine. Both of the foregoing two mines are currently under development.

This section discusses information regarding our mines, reserves and production volumes, including the mines, reserves and production volumes of the Huajin Joint Venture and Shanghai Datun Energy, which are not wholly-owned by us.

Unless otherwise stated, all technical data in this section is based on the SRK Report, which is included as Appendix VI to this Prospectus.

OVERVIEW

We are the second largest coal enterprise in China based on our 2005 revenue. According to *BP Statistical Review 2006*, China is the world's largest producer and consumer of coal, one of the most important energy resources in the world and the most important source of primary energy in China. We sold 92.2 million tonnes and 43.5 million tonnes of coal in 2005 and the six months ended 30 June 2006, respectively. Our total revenue from coal operations in the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2005 and 2006 was RMB11,656.7 million, RMB17,733.0 million, RMB25,147.7 million, RMB12,600.1 million and RMB11,761.0 million, respectively.

According to the SRK Report, we had total marketable coal reserves of 3,003 million tonnes as of 30 June 2006. We sell high-quality thermal coal and coking coal produced from nine operating coal mines and thirteen coal processing plants that we wholly or partially own and/or operate. Located in eastern, northern and northwestern China, our five mining areas consist of nine underground mines and three open pit mines, two of which, the Antaibao Open Pit Mine and the Anjialing Open Pit Mine, are among the largest open pit mines in China. Each of our mines and coal processing plants is situated in close proximity to our customers or with convenient access to transportation networks and facilities. Our raw coal output grew from 33.2 million tonnes in 2003 to 50.1 million tonnes in 2005, representing a CAGR of 22.8%.

We are also one of China's largest coal suppliers, with extensive market experience, well-established brand names and solid customer relationships. Our parent company, ChinaCoal Group, is the largest coal exporter in China. Our extensive sales and marketing network and established supply and distribution channels have contributed to our success in conducting our proprietary coal trading operations and providing coal import agency and export-related services.

As an integrated coal enterprise with coal production, sales and trading as our core business, we further supplement our coal operations with a diversified portfolio of other related operations. We operate one of China's largest coking operations not affiliated with a steelmaker. Our coking operations include the production and sale of coke and coal-based chemicals. We also own China's largest coal mining equipment manufacturing operations in terms of revenue. In addition, we operate ancillary businesses, including coal mine design and transportation services. We believe these operations represent a natural extension of our coal production, sales and trading capabilities while effectively expanding the scope of our product and service offerings and enhancing our core competitiveness.

In the year ended 31 December 2005 and the six months ended 30 June 2006, we had total revenue of RMB30,061.3 million and RMB14,679.7 million, respectively, and net profit of RMB3,343.5 million and RMB1,334.4 million, respectively.

OUR COMPETITIVE STRENGTHS

We are the second largest coal enterprise in the PRC and have the potential to attain sustainable growth.

We are the second largest coal enterprise in China in terms of revenue for 2005. We possess abundant coal reserves and advanced mining and coal processing technologies and facilities. We continue to expand our coal production business. Our total revenue from sales of coal and coal-related products as well as the provision of coal-related services in the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2005 and 2006 was RMB14,480.8 million, RMB22,163.8 million, RMB30,061.3 million, RMB15,011.9 million and RMB14,679.7 million, respectively.

We are also one of China's largest coal suppliers and our parent company, ChinaCoal Group, is the largest coal exporter in China. We rely on our extensive and strong sales network, established port service facilities, strong team of professionals, access to first-hand coal market information, ability to quickly adapt to changing coal market dynamics and relationships throughout the industry demand-supply chain. Our total coal sales revenue from external customers was RMB11,656.7 million, RMB17,733.0 million, RMB25,147.7 million, RMB12,600.1 million and RMB11,761.0 million in the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006, respectively, representing a CAGR of 46.9% from 2003 to 2005. Our total raw coal production volume was 33.2 million tonnes, 39.7 million tonnes and 50.1 million tonnes in the years ended 31 December 2003, 2004 and 2005, respectively, representing a CAGR of 22.8%. From 2003 to 2005, the total production of raw coal in China grew at a CAGR of 12.8%.

We are an integrated coal enterprise with coal production, sales and trading as our core business. While maintaining our leading position in our core business, we also explore and develop coal production-related businesses, such as coal mine design, coal mining equipment manufacturing and the production of coal-based chemicals and coke. Through the comprehensive and balanced development of our coal production, sales and related business portfolio, we have achieved organic growth and effectively diversified our operational risks.

The PRC Government has promulgated a number of policies and regulations since 1999 to shut down or limit the operations of local coal producers and to encourage the integration and transformation of such operations by large coal producers. These policies and regulations were implemented to resolve certain problems arising from local small mining operations, such as low resource utilization and the lack of adequate environmental protection and safety measures. As one of the largest integrated coal producers in China, our mines are the key coal producers in China's Jinbei Base and Jinzhong Base, two of the 13 large coal bases in China designated by the PRC Government. Our controlling shareholder, ChinaCoal Group, as one of the largest coal enterprises in China, is supported by the PRC Government. We believe we are well positioned to take advantage of the favorable regulatory and market conditions. Our efforts to integrate and upgrade local small coal mines will enable us to rapidly expand our production capacity and drive our continuing organic growth and further contribute to our development.

We offer high-quality coal products to our customers by leveraging our abundant, high-quality and diversified coal reserves as well as our advanced coal processing and blending capabilities.

Based on SRK's estimate of our coal reserves as of 31 December 2005 and compared with publicly available sources for other coal companies as of 31 December 2005, we had the fifth largest proved and probable coal reserves among all listed coal companies in the world. Our recoverable coal reserves were 3,420 million tonnes as of 30 June 2006. Based on such recoverable reserves and our 2005 annual production level, we expect to be able to achieve stable production for the next 68 years. These coal reserves are deposited

in five mining areas that include 12 coal mines, two of which, the Antaibao Open Pit Mine and the Anjialing Open Pit Mine, are among the largest open pit mines in China.

Our raw coal is of high quality. Most of our coal reserves are deposited in areas with favorable geological and mining conditions. The Pingshuo Mining Area, one of the largest export bases for thermal coal products in China, produces prime thermal coal featuring a high heat value and high ash fusion temperature. Many domestic power plants are designed to use coal possessing the qualities found in the coal produced in our Pingshuo Mining Area and at other coal mines in the Jinbei Base. The quality of thermal coal is generally determined by its high heat value, ash content and ash fusion temperature, and the quality of thermal coal produced in our Pingshuo Mining Area consistently meets the needs of our major customers. In addition, coking coal produced at our Shaqu Mine in the Liliu Mining Area has been designated by the PRC Government as a scarce and valuable mineral resource vital to national economic development, and significant emphasis has been placed on its exploitation and production.

We also offer a wide variety of coal products. Our nine mines in operation produce thermal coal, hard coking coal and semi-hard coking coal. With our high quality raw coal, advanced technologies and extensive experience, our thirteen coal processing plants are capable of processing and blending various types of raw coal produced and coal purchased from third parties according to the specifications of various industries, such as the electrical, metallurgical, construction and chemicals industries. As a result of our blending capability, we have significantly expanded our product offerings and improved their commercial value. Moreover, a diversified portfolio of our coal products has enabled us to avoid reliance on a single product and hence minimize our exposure to market risks.

We believe our high-quality coal products, abundant and diversified coal reserves and expertise in coal processing and blending provide us with a competitive advantage in both the domestic and international markets and serves as the basis for future growth.

With our extensive market experience, well-recognized brand names, stable coal supply, comprehensive transportation facilities and solid customer relationships, we have one of the strongest coal sales and marketing networks in China.

ChinaCoal Group, our Parent Company, is the largest coal exporter in China and has continued to maintain an important position in the Asia-Pacific regional coal export market. As a result of the Restructuring, except for certain Coal Export Rights which could not be freely transferred under applicable laws and regulations, we obtained all of ChinaCoal Group's sales and marketing resources, including its extensive sales and marketing network, stable coal supply from third parties, comprehensive transportation facilities and valuable market experience.

We believe our market knowledge and reputation are key factors contributing to our brand name recognition and customer satisfaction, which enable us to consistently provide our customers with a wide variety of products tailored to their needs. We believe that the coal products we market bearing the Pingshuo brand names are well recognized by both our domestic and international customers. ChinaCoal Group has over 20 years of sales experience. By leveraging this extensive experience, our understanding of customers' individual needs, our close relationship with long-term customers and our advanced technologies for coal processing and blending, we are able to offer a wide range of customized coal products, enabling us to secure long-term commitment and trust from our customers.

We also cooperate closely with other major coal producers in China. We purchase coal from these producers and process and blend it with our own coal. This enables us to significantly expand our product variety.

With our headquarters in Beijing and a comprehensive distribution network covering major coal transportation ports along the coast of China, including Qinhuangdao, Tianjin, Qingdao, Rizhao and Lianyungang, we are able to respond quickly to customer demands and optimize our distribution capabilities. In addition, our strategically located Shanghai ChinaCoal East China Co., Ltd. in Shanghai will allow us to: (i) better serve our customers in the eastern China region; (ii) strengthen our market information collection capabilities; and (iii) allow us to take advantage of preferential governmental policies of the Shanghai Pudong New District. We believe that we are a leader in the PRC coal industry in terms of the scope of our distribution network and the total number and transportation capacity of ports available to us. Through centralized management from our headquarters, we have integrated our extensive sales network with strong marketing capabilities and strategically coordinated our sales operations and customer service initiatives, including pricing, quality control, transportation and inspection. We believe these efforts have not only improved our sales and marketing efficiency but also offer our customers a cost advantage.

We have established long-term relationships with many of our customers. We have entered into long-term supply agreements of over three years with a number of domestic and international customers. The average aggregate sales volume per annum under these agreements is approximately 62.5 million tonnes in 2006, 2007 and 2008. With the recent rapid economic growth in China resulting in increasing demand for coal, the visibility of our future sales volumes from existing and new clients is enhanced. In addition to our established presence in the long-term coal sales market, we believe we have also established a good reputation in the spot coal market as a result of the variety of coal products we offer and our reliable supply, thereby allowing us to further expand our customer base.

We believe the above factors distinguish our network as the strongest coal sales and marketing network in China and, combined with our position as the exclusive coal export services provider for ChinaCoal Group, will continue to support our domestic coal sales and export agency service offerings so as to allow us to continue to serve our domestic and international customers.

Our coal mines and coal production facilities are situated with convenient access to transportation networks, thereby ensuring the timely, cost-effective and efficient delivery of our coal products.

The distance from coal mines and coal production facilities to customers and transportation networks, such as railways and ports, plays a vital role in the development and operation of a coal producer. Our key mines are located in close proximity, and have convenient access, to coal transportation networks, particularly in the case of our Pingshuo and Datun Mining Areas.

Our largest mining area, the Pingshuo Mining Area, is located in the Jinbei Base, one of the 13 large coal bases in China designated by the PRC Government. Having recognized the importance of the Jinbei Base, the PRC Government constructed China's largest railway line in terms of transportation capacity dedicated to coal transportation, the Daqin Rail Line, mainly for the transportation of coal from the Jinbei Base. The Daqin Rail Line connects the coal production bases of northern and northwestern China with major coal loading ports and certain of our key customers in the coastal regions. The PRC Government plans to further increase the Daqin Rail Line's annual transportation capacity by 2010, which will further enhance and ensure the transportation capacity available to our Pingshuo Mining Area.

Among the major coal mines in the coal-producing provinces of northern and northwestern China, the Pingshuo Mining Area is one of the closest areas to major coal loading ports. In addition to the Daqin Rail Line, the Pingshuo Mining Area is connected by other major regional and national railways and has direct transportation links to major coal loading ports, including the Qinhuangdao Port and the Tianjin Port, as well as to certain of our major customers. Currently, we own and operate the five coal loadout depots in the Jinbei Base for 10,000-tonne trains, ensuring our access to sufficient railway transportation, increasing our efficiency and substantially reducing our transportation costs.

The Datun Mining Area, located in the eastern coastal region of China, is one of the few coal mines in close proximity to the fast-growing industrial centers and coal-consuming regions in eastern China, including Shanghai. Through a 180 km dedicated coal-transport rail line legally and validly owned and operated by Shanghai Datun Energy, the Datun Mining Area is linked to the Longhai Rail Line and its coal products can be transported directly to major coal loading ports in eastern China, such as the Lianyungang Port. As a result, the Datun Mining Area is well-positioned to deliver coal products to our customers in a cost-effective and timely manner.

We own two of the largest open pit mines in China and rely on advanced mining and recycling technologies to achieve optimal resource utilization and improve environmental protection.

The resource utilization rate is an effective criteria for measuring the efficiency of coal mining enterprises and is an important indicator of their environmental protection standards. Open pit mines generally have high recovery rates. We own two of the largest open pit mines in China, the Antaibao Open Pit Mine and the Anjialing Open Pit Mine, which produced 32.8% and 29.9%, respectively, of our total production of raw coal in 2005. As China adopts a more rigorous policy on the exploitation of coal resources through the implementation of a compensation scheme in the future, we believe open pit mines will present even higher economic value. We have achieved a significantly higher recovery rate than the industry average in China.

We engage in both open pit and underground mining at our Anjialing Mines in the Pingshuo Mining Area. The recovery rate in the Pingshuo Mining Area exceeds 95% through surface mining and 75% through underground mining. By employing both surface and underground mining methods at these mines, we have been able to increase our resource utilization rate and expand our products offerings.

The coal seams at the Pingshuo Mining Area are shallow, stable, thick and have a low dipping angle. We maximize resource utilization and mining efficiency at these underground mines by using mechanized coal mining equipment, such as the fully mechanized longwall mining system.

We are also committed to resource recycling and re-utilization, and we are committed to environmental protection by utilizing various advanced equipment and technologies. For example, we reuse the waste coal, coal rejects and coal slurry produced during the coal production process to generate electricity at power plants that we use to support our own coal production or sell to the local power grid.

We believe that we have achieved a leading position in resource utilization and our management will continue to focus on improving our efficiency measures. We are also confident in our ability to further enhance our environmental protection capabilities, meet the increasingly stricter environmental standards imposed by the PRC Government and reduce any exposure to potential incremental costs or contingent liabilities relating to environmental protection.

Our extensive expertise in coal mine design and our position as the largest coal mining equipment manufacturer in China has made us the most integrated enterprise in the domestic coal industry, enabled us to increase our revenue and contributed to the continuing development of our core business.

In addition to coal sales revenue, we generate other operating revenue by providing coal production related services, such as coal mine design, coal mine construction consulting services and coal mining equipment manufacturing. By leveraging our expertise in these areas and our self-owned and -operated mining productions and technologies, we are able to ensure the development and maintenance of our own coal mines.

We own two coal mine design institutes, namely the China Coal Xi'an Design Engineering Co. Ltd. (中煤西安設計工程有限責任公司) and the China Coal Handan Design Engineering Co. Ltd. (中煤邯鄲設計工程有限責任公司). These design institutes are well recognized in the areas of coal mine and large public project design services in China. We are also the largest coal mining equipment manufacturer in China based on our 2005 sales revenue. Our coal mining equipment design and manufacturing subsidiaries have a long operating history and extensive experience in the industry and possess advanced technologies. China Coal Zhangjiakou Coal Mining Machinery Co., Ltd. (中煤張家口煤礦機械有限責任公司) and China Coal Beijing Coal Mining Machinery Co., Ltd. (中煤北京煤礦機械有限責任公司) are two of our most prestigious coal mining equipment manufacturing enterprises and are among the leading Chinese coal mining equipment manufacturers. In addition to the manufacturing of mining equipment, including those used in the longwall mining method, our coal mining equipment design and manufacturing subsidiaries are also capable of providing comprehensive services to domestic and international underground mining enterprises, including design, installation, testing and system integration services, all of which are essential to mechanized underground mines. With our knowledge of and experience in the Chinese coal industry and its practices, as well as our ability to effectively control costs, the coal mining equipment we manufacture and the mining related services we offer are highly suitable for coal mines in China and are well recognized in the market.

We believe that the PRC Government's encouragement of large procurement and the increasing use of domestically produced coal mining equipment will enable us to enjoy significant advantages with respect to the construction of future mines as we leverage our capabilities in coal mine design, construction consulting and coal mining equipment manufacturing.

Our management team has extensive industry and management experience to effectively manage our operations and maximize shareholder value.

Our senior management comprises a group of highly experienced professionals in the fields of coal production, coal trading and other coal-related businesses such as coking, coal mining equipment manufacturing and coal mine design, with average industrial experience exceeding 20 years. We believe that our management team possesses the knowledge critical to the industry in which we operate and is capable of taking advantage of market opportunities, formulating sound business strategies, assessing and managing risks, implementing management and production schemes and increasing our overall profit to maximize our shareholder value. We also have loyal and skilled employees who possess extensive industry experience. In order to align our corporate performance and the interests of our management and employees with those of our shareholders and to further incentivize our management, we plan to implement a long-term incentive program. We believe that our management team possesses the leadership capabilities required to ensure sustained development and our continued success.

OUR BUSINESS STRATEGIES

We operate in a mature industry environment that is stable, fragmented and with strong regional characteristics. With the increasing commercialization of the coal industry in China, the PRC Government has been monitoring the development of local, small and sub-standard mining operations, increasing the consolidation of coal production and effectively raising the entry barrier to restrict the development of small-scale mining operations. Through our accumulated experiences over the years, we have gradually developed competitive strengths in resource control and in marketing and distribution. We have developed an integrated business structure, the ability to integrate other domestic mining operations and form cross-border joint ventures and alliances, and the capability to maximize profit by increasing efficiency and developing new profitable growth areas. We believe that the following strategies will help us to leverage our strengths to capture future growth opportunities in China's coal industry, increase the globalization of our operations and enhance our competitiveness.

Seek rapid and sustainable growth through our organic growth supplemented by external development strategies.

We plan to increase production capacity through organic growth and external expansion, increase our coal reserves, increase our operating scale and reduce production costs.

As of 30 June 2006, we had marketable coal reserves of 3,003 million tonnes. We plan to further expand and upgrade our existing mining operations. We intend to deploy advanced technologies developed from multiple sources, including those from our own research and development initiatives, in the coal production process. Our objective is to ensure full utilization of our existing and newly constructed coal mines and to achieve organic growth.

We are dedicated to further exploring and developing new coal resources, constructing new projects and upgrading and improving our existing facilities to maximize and optimize our coal production. We have commenced construction at our Pingshuo East Open Pit Mine, Antaibao Underground Mine and Wangjialing Mine in the Pingshuo and Xiangning Mining areas. These mines have designed annual production capacities of 20.0 million tonnes, 8.0 million tonnes and 6.0 million tonnes, respectively. Upon commencement of production at these three mines, and together with other expansion projects, we expect our total production capacity of raw coal to exceed 100.0 million tonnes by 2010. Supported by the relevant governmental policies, we plan to further increase our coal reserves and strengthen our competitiveness through applications to the PRC Government for new resources, mergers and acquisitions, joint ventures and other forms of cooperation as follows:

- *Applications for New Coal Reserves.* Taking advantage of the PRC Government's encouragement of the construction of large coal bases, we are currently applying to the PRC Government for the right to exploit new coal reserves.

- *Mergers and Acquisitions.* By taking advantage of governmental support and the favorable regulatory environment, we will continue to explore opportunities to acquire and integrate small-scale coal mines in China. By leveraging our strength in production, management, technology, coal mine design, coal mining equipment manufacturing and research and development capabilities, we believe we can optimize the utilization of coal resources at these small mines through technology improvement and equipment upgrades.

- *Joint Ventures and Cooperation.* We are actively seeking cooperative relationships and joint venture opportunities with provincial governments and large domestic coal producers and operators possessing abundant coal reserves. We also plan to enhance our global presence and to mine coal resources located overseas by cooperating with large coal producers in countries with abundant coal reserves.

We believe that, through these organic and external growth strategies, we will be able to achieve rapid and sustainable growth in our coal production operations, satisfy the growing coal demand in China and overseas and achieve economies of scale.

Maximize our profitability and maintain our competitiveness by improving operating efficiency and controlling costs.

We view improving efficiency and cost control as the critical elements for maximizing our profitability and maintaining our competitiveness. We intend to reduce our per unit production costs and improve our operating efficiency by increasing our production scale, employing advanced automated production systems to increase resource utilization rates and strengthening our management control.

We will continue to expand our production scale by using both organic and external growth strategies in order to further reduce coal production costs and strengthen our competitiveness.

We employ automated production systems and focus on developing coal mines with high yields and high productivity. To improve productivity, we will continue to deploy advanced mining facilities and technologies, such as fully automated top coal caving equipment and related sophisticated mining methods. We will also allocate more management resources to mines which we believe have higher growth potential.

Our coal mining equipment manufacturing and coal mine design capabilities will further enhance our production efficiency and reduce our reliance on imported equipment and services, allowing us to better control and lower the costs of mine construction and coal production.

Expand our sources of income by focusing on the development of high value-added coal-based chemicals products.

To take advantage of government policies emphasizing the use of coal as the primary energy source in China, we intend to cooperate with large domestic and international coal and chemicals producers to develop high value coal-based chemicals products, such as coal-based methanol, dimethylether and alkene. These initiatives will allow us to further develop our core coal production business while contributing to the satisfaction of China's energy demand. We will increase our investment in research and development and cooperate with well-established research institutions in China and abroad. By developing techniques suitable for large-scale production of coal-based chemicals, we intend to build-up our proprietary patented technologies and seek new sources of income.

We further intend to promote the concept of the recycling and reuse of by-products and comprehensive resource utilization. By leveraging our current coking operations, we plan to expand our product lines to include coal-based chemical products such as methanol, tar and refined crude benzene.

Strengthen our sales and marketing networks, optimize operations, enhance marketing capabilities and increase our market share.

With a broad customer base and extensive marketing experience gained from years of operation, coupled with our existing marketing channels, we intend to increase our customer base through the expansion

of our sales network, market research and consolidation of our sales and marketing facilities. We intend to increase our export volumes and achieve increased brand name recognition, with the goal of gaining international market share.

We intend to enhance our capital investment, expand our logistics network and strengthen our control of this network by actively investing in major coal suppliers, railways and ports. We are also dedicated to controlling logistics costs and promoting value-added services. By leveraging our diversified coal products and specialized coal processing and blending capabilities, we will provide a wide variety of customer-specific products and services to our customers. We believe our ability to provide tailored products is one of our competitive advantages.

We are the principal channel for coal export in China. In 2005, we exported approximately 45.7% of China's total coal export volume. We export coal via all the major coal loading ports from northern to southern China, including Qinhuangdao Port, Tianjin Port, Qingdao Port, Rizhao Port and Lianyungang Port.

Guided by this customer-centric principle, we plan to expand our regional sales and customer service centers to further improve and extend pre-sales and after-sales services such as transportation logistics support to our domestic and international customers.

Increase our research and development efforts to lower production costs and increase the value of our products.

We view our continuing development and operations as being dependent upon the research and development efforts in each of our operational segments. Therefore, we have established two design centers in China, the Datun Coal Mine Design Centre and Zhangjiakou Coal Mining Equipment Design Centre Company, for research in coal mining techniques and coal mining equipment. The Datun Coal Mine Design Centre is actively engaged in the research and development of more cost-efficient and effective coal mining techniques in underground coal mines. The Zhangjiakou Coal Mining Equipment Design Centre has recently undertaken projects for the development of domestically produced mining equipment, including heavy-duty armored-face conveyors and a complete set of 6.0 million-tonne face equipment. Through these research and development efforts, we believe we can effectively lower production costs and introduce high value, high quality coal mining equipment to satisfy market needs.

We believe that strengthening our research and development efforts will also allow us to increase our own technological skills. We also believe that by securing intellectual property rights, we will be able to better protect the results of our research and development activities. We will continue to invest in research and development in each of our operational segments, including through the establishment of a new national design center to foster the development of talented researchers and through increased contributions to research funds.

Improve production safety and environmental protection to ensure our continuing development.

We regard production safety as one of our most important corporate objectives. We are committed to maintaining and protecting the health and safety of our employees by formulating and implementing strict safety standards in the workplace. In 2003, 2004 and 2005, the production fatality rate at our mines was 0.12, 0.15 and 0.08 persons per million tonnes of raw coal, respectively. This was substantially lower than the average fatality rate of coal mines in China, which was 4.17, 3.10 and 2.81 persons per million tonnes of raw coal, respectively, during the same period. We will continue to invest in production safety.

We are in the process of improving the technologies and systems currently in use to enhance the efficiency of our coal production and increase our resource utilization. We are committed to the research and

development of clean coal production technology and the development of coal processing and blending technologies. We focus on the environmentally friendly treatment and utilization of coal slack, slime, coal bed gas, surface and subsurface water discharge and other accompanying by-products, and also, in particular, on the development of electric power plants. In our key mining areas, we have installed environmental protection equipment to enhance the utilization of resources. For example, the circulating fluidized bed boilers used in our Datun power plant can effectively burn different types of solid coal waste, and had the capacity to process 720,070 tonnes of low quality coal in 2005. We expect to expand the use of the circulating fluidized bed boilers at our power plants to increase our resource utilization rate. We are equally committed to environmental protection and will ensure compliance with the relevant environmental protection laws and regulations in all aspects of our operations. We conduct environmental feasibility studies for all of our new production and expansion projects and have adopted a strict policy of using appropriate facilities for the discharge and treatment of pollutants and waste.

We believe that our focus on production safety, economic recycling and integrated resource utilization will further lower our accident rate, enhance our productivity and lower our current and future environmental protection costs.

Optimize internal control by strengthening our financial management and investment decision-making.

We are committed to strictly implementing our policies on financial budgeting, financial reporting and internal control. We will further strengthen our financial management through an advanced financial information system.

We plan to enhance the careful and conservative monitoring of our cash flow, accounts receivable and capital expenditures by centralizing the authority to make major investment decisions at the corporate level. We will strictly follow our development strategy and investment return requirements when evaluating investment opportunities. We also plan to improve project management of our investments and improve our investment skills, reduce risks and seek higher returns.

PRINCIPAL PRODUCTS AND SERVICES

Our principal operations include:

- Coal operations, which is our core business and includes coal production and sales and coal trading;
- Coking operations, including the production and sale of coke and coal-based chemical products;
- Coal mining equipment manufacturing operations, including coal mining equipment design, research and development, manufacturing and sales operations and after-sale services; and
- Other operations, including provision of coal mine design services.

The following table sets forth the contributions by each of our operating segments in terms of revenue from outside customers and as a percentage of our total revenue for the periods indicated:

	Year ended 31 December						Six months ended 30 June			
	2003		2004		2005		2005		2006	
	RMB (million)	%	RMB (million)	%	RMB (million)	%	RMB (million)	%	RMB (million)	%
Segments										
Coal operations	11,656.7	80.5	17,733.0	80.0	25,147.7	83.7	12,600.1	83.9	11,761.0	80.1
Coking operations	1,064.9	7.4	2,039.2	9.2	1,591.3	5.3	938.6	6.3	1,012.4	6.9
Coal mining equipment manufacturing operations	1,057.9	7.3	1,479.4	6.7	1,891.2	6.3	889.1	5.9	971.9	6.6
Coal mine design and other businesses	701.2	4.8	912.2	4.1	1,431.1	4.8	584.1	3.9	934.4	6.4
Total	14,480.8	100.0	22,163.8	100.0	30,061.3	100.0	15,011.9	100.0	14,679.7	100.0

COAL OPERATIONS

We generate our coal operations revenue primarily from (i) sales of coal extracted from our mines and coal processed by our facilities, and (ii) proprietary coal trading and the provision of coal import agency and export-related services. Our sales are made both within China through our own sales forces and overseas through ChinaCoal Group. See "Connected Transactions".

We produce thermal coal, coking coal and semi-hard coking coal products from our nine operational coal mines located in four mining areas and thirteen coal processing plants located in northern, northwestern and eastern China. The following table sets forth the revenue from each business activity of our coal operations in the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2005 and 2006:

	Year ended 31 December						Six months ended 30 June			
	2003		2004		2005		2005		2006	
	RMB (million)	%	RMB (million)	%	RMB (million)	%	RMB (million)	%	RMB (million)	%
Coal production and sales	7,508.7	64.4	13,375.1	75.4	17,596.8	70.0	8,254.5	65.5	8,801.9	74.8
Coal trading and services[1]	4,148.0	35.6	4,357.9	24.6	7,550.9	30.0	4,345.6	34.5	2,959.1	25.2
Total	11,656.7	100.0	17,733.0	100.0	25,147.7	100.0	12,600.1	100.0	11,761.0	100.0

(1) Includes resale and proprietary trading of coal purchased from third party coal producers, coal import agency services and coal export-related services.

Coal Production and Sales

Our coal mines

As of the Latest Practicable Date, we had nine operational mines, including two open pit mines and seven underground mines. These mines are located in Shanxi, Shaanxi and Jiangsu Provinces. As of 30 June 2006, we had 9,489 million tonnes of coal resources, including total marketable reserves of 3,003 million tonnes, under our management. The estimated indicative life of our coal reserves may increase significantly when the available Inferred Coal Resources are converted to reserves following further mining and testing. Our mines currently have in excess of approximately 4,000 million tonnes of Inferred Coal Resources. In addition, we plan to increase our exploratory efforts as we continue to develop our reserve areas.

The following table presents the coal reserves for each of our mining areas:

	Proved reserves	Probable reserves	Proved and probable reserves	Recoverable reserves[3]	Marketable reserves[4]
			(million tonnes)		
Mining area[1]					
Pingshuo Mining Area[2]	1,181	1,331	2,512	2,351	2,047
Liliu Mining Area and Xiangning Mining Area[2]	338	390	728	752	684
Datun Mining Area[2]	173	84	257	266	221
Nanliang Mining Area[2]	28	23	51	51	51
Total	1,720	1,828	3,548	3,420	3,003

(1) Reserves data includes reserves of our operational mines and mines under development. According to the SRK Report, we own the rights to 9,489 million tonnes of coal resources. The estimated indicative life of our coal reserves may increase significantly when the available Inferred Coal Resources are converted to reserves following further mining.

(2) Resources and reserves are presented in the SRK Report. For our equity interests in these mining areas, see "Restructuring".

(3) Recoverable reserves of the mining areas are calculated by multiplying proved and probable reserves with mining dilution taking into account mining loss. The mining recovery rate is assumed to be 95% for open pit mines and 75% for underground mines.

(4) Marketable reserves of the mining areas are calculated by multiplying recoverable reserves with the processing plant yield percentages.

The following table sets forth detailed information for each of our twelve mines as of 30 June 2006:

	Pingshuo Mining Area[2]					Liliu Mining Area and Xiangning Mining Area[2]		Datun Mining Area[2]				Nanliang Mining Area[2]
	Operational mines			Mines under development		Operational mine	Mine under development	Operational mines				Operational mine
	Antaibao	Anjialing	Anjialing	Antaibao	Pingshuo[4] East	Shaqu	Wangjialing	Yaoqiao	Xuzhuang	Longdong	Kongzhuang	Nanliang
Background data:												
Start of commercial production	1987	2001	2004	2008	2009	2004	2009	1976	1979	1987	1977	1998

(1) Reserves and resources data includes reserves and resources of our operational mines and mines under development for which we have obtained mining rights certificates.

(2) Resources and reserves are reported on a 100% ownership basis for our wholly and majority owned mines. We own a 100% interest in the Pingshuo Mining Area. We own a 55% interest in the Nanliang Mine and a 62.43% equity interest in Shanghai Datun Energy, which owns the Datun Mining Area. We own a 50% equity interest in the Huajin Joint Venture, which owns and operates the Liliu Mining Area and the Xiangning Mining Area.

(3) Mining method includes open pit ("OP") mines and underground ("UG") mines.

(4) As of the Latest Practicable Date, we obtained the exploration right permit to formulate our production plan for the purpose of applying for the mining right permit in respect of Pingshuo East Open Pit Mine. We are currently applying for the mining rights. Subject to governmental approval, the mining rights are expected to be obtained in March 2007.

The following map illustrates the locations of our mining areas:

Pingshuo Mining Area

The Pingshuo Mining Area is the key mining area within the Jinbei Base, one of only 13 large coal bases in China designated by the PRC Government. The Pingshuo Mining Area currently consists of the Antaibao Open Pit Mine and the Anjialing Open Pit Mine, which are among the largest open pit mines in China in terms of production capacity, as well as the Anjialing Underground Mine. Substantially all coal produced at the Pingshuo Mining Area is high-quality thermal coal.

The Pingshuo Mining Area is located in northern Shanxi Province. Coal products are loaded onto 10,000-tonne trains at five coal loadout depots, and are transported via the Beitongpu and the Daqin Rail Lines directly to major coal loading ports and certain of our key customers in the coastal regions. The commencement of trial operations of three coal loadouts in 2006 will further enhance the transportation capacity of our coal. In addition, the PRC Government plans to increase the Daqin Rail Line's annual transportation capacity from its current capacity of 200 million tonnes to a target capacity of 400 million tonnes by the end of 2010.

We are currently undergoing various capacity expansion projects at our Antaibao Open Pit Mine, Anjialing Open Pit Mine and Anjialing Underground Mine, all of which are located in the Pingshuo Mining Area. In addition, we are constructing the new Antaibao Underground Mine and the Pingshuo East Open Pit Mine within the Pingshuo Mining Area. See "— Expansions of our coal mines — Coal mines under development."

Antaibao Open Pit Mine. We are currently extracting raw coal from three primary coal seams with thicknesses of 10, 14 and 4.5 meters at our Antaibao Open Pit Mine. As of 30 June 2006, the total marketable reserves at Antaibao Open Pit Mine amounted to 131 million tonnes. The Antaibao Open Pit Mine primarily produces thermal coal from an open pit employing the truck-and-shovel mining method. In 2005, the Antaibao Open Pit Mine's annual production output was 16.44 million tonnes. As of 30 June 2006, the recovery rate of Antaibao Open Pit Mine was 96.0%.

Anjialing Mines. The Anjialing Mines consist of an open pit mine and an underground mine. We utilize a surface-and-tunnel extraction mining method in the Anjialing Mines to maximize the recovery rate. We are currently extracting raw coal from four primary coal seams with thicknesses of 9.5, 0.6, 14.4 and 4.2 meters at the Anjialing Open Pit Mine, and 7.3, 3.1, 13.8 and 3.7 meters at the Anjialing Underground Mine.

The total marketable reserves of the Anjialing Open Pit Mine were 572 million tonnes as of 30 June 2006. The Anjialing Open Pit Mine produces thermal coal employing the truck-and-shovel mining method. In 2005, the Anjialing Open Pit Mine's annual production output was 15.01 million tonnes. As of 30 June 2006, the recovery rate of the Anjialing Open Pit Mine was 97.0%.

The Anjialing Underground Mine is an extension of the Anjialing Open Pit Mine, exploiting the same coal seams. The Anjialing Underground Mine is the newest addition to our operational mines, with an annual production capacity of 20.00 million tonnes. It commenced full production in September 2005. The total marketable reserves at the Anjialing Underground Mine were 146 million tonnes as of 30 June 2006. As of 30 June 2006, the recovery rate of the Anjialing Underground Mine was 84.0%.

Liliu Mining Area

Our Liliu Mining Area, the main mining area at the Jinzhong Base, one of only 13 large coal bases in China designated by the PRC Government, is well recognized for its superior quality coking coal, which is ideal for metallurgical usage. Coking coal produced from the Liliu Mining Area has been designated by the PRC Government as a scarce and valuable mineral resource vital to national economic development. To protect this valuable mineral resource from over-exploitation and unauthorized exploitation, the PRC Government has designated the Liliu Mining Area as one of the three most valuable and best-quality coking coal reserves in China subject to national resources protection and supervision. The Liliu Mining Area is located in western Shanxi Province. Our Liliu Mining Area currently includes one operational mine, the Shaqu Mine, operated by the Huajin Joint Venture, in which we hold a 50% equity interest.

We own a 4,356-meter mine railway connecting our coal processing plant in the Liliu Mining Area to the Xiaoliu Rail Line, which in turn runs from Xiaoyi to Liulin and is the main rail line used for transporting our coal products to customers and ports.

Shaqu Mine. We are currently extracting raw coal from five primary coal seams with thicknesses of 3, 2.7, 7, 7 and 7 meters at the Shaqu Mine.

The total marketable reserves at the Shaqu Mine were 379 million tonnes as of 30 June 2006. The Huajin Joint Venture utilizes the longwall mining method in the Shaqu Mine. In 2005, the Shaqu Mine's annual production output was 1.87 million tonnes of coking coal. As of 30 June 2006, the recovery rate of the Shaqu Mine was 69.0%.

Datun Mining Area

The Datun Mining Area is one of the few coal mines that are in close proximity to the fast-growing and strategically important coal-consuming markets of Shanghai and other industrial centers in Eastern China, where we expect future demand for thermal and coking coal to increase significantly. Our Datun Mining Area integrates coal production, power generation and railway transportation facilities. Major coal products produced at the Datun Mining Area include semi-hard coking coal that can be further processed to metallurgical coal or thermal coal. The Datun Mining Area currently consists of four underground mines. We utilize the longwall mining method to extract raw coal from each of these mines.

The Datun Mining Area has convenient access to major transportation arteries and hubs, including the Longhai Rail Line, Rizhao Port and Lianyungang Port, and is in close proximity to major customers such as Baosteel Group. Transportation flexibility is further increased by easy access to a system of inland waterways in the greater Shanghai area. We believe that the location and access to transportation alternatives of the Datun Mines provide significant transportation cost advantages and reduce the risk of disruptions or delays due to transportation capacity constraints.

Yaoqiao Mine. We are currently extracting raw coal from three primary coal seams with thicknesses of 5.5, 3.3 and 1.1 meters at the Yaoqiao Mine. As of 30 June 2006, the total marketable reserves at the Yaoqiao Mine amounted to 130 million tonnes. In 2005, the Yaoqiao Mine's annual production output was 3.40 million tonnes. As of 30 June 2006, the recovery rate of the Yaoqiao Mine was 82.6%.

Xuzhuang Mine. We are currently extracting raw coal from three primary coal seams with thicknesses of 5, 2.9 and 1.1 meters at the Xuzhuang Mine. The total marketable reserves at the Xuzhuang Mine amounted to 40 million tonnes as of 30 June 2006, and its annual production output was 1.41 million tonnes in 2005. As of 30 June 2006, the recovery rate of the Xuzhuang Mine was 76.8%.

Longdong Mine. We are currently extracting raw coal from two primary coal seams with thicknesses of 5.5 and 0.7 meters at the Longdong Mine. The total marketable reserves at the Longdong Mine amounted to 21 million tonnes as of 30 June 2006. According to the SRK report, the Longdong Mine's production output was 1.16 million tonnes in 2005. As of 30 June 2006, the recovery rate of the Longdong Mine was 77.6%.

Kongzhuang Mine. We are currently extracting raw coal from three primary coal seams with thicknesses of 4.9, 3.1 and 0.8 meters at the Kongzhuang Mine. The total marketable reserves at the Kongzhuang Mine amounted to 30 million tonnes as of 30 June 2006 and its annual production output was 1.15 million tonnes in 2005. As of 30 June 2006, the recovery rate of the Kongzhuang Mine was 74.7%.

Nanliang Mining Area

Our Nanliang Mining Area consists of one underground mine, the Nanliang Mine, located in northern Shaanxi Province. We are currently extracting raw coal from five primary coal seams with thicknesses ranging from 1.1 meters to 4.1 meters at the Nanliang Mine. The total marketable reserves of the Nanliang Mine amounted to 51 million tonnes as of 30 June 2006. The Nanliang Mine primarily produces thermal coal by utilizing the longwall mining method. In 2005, the annual production output of this mine was 0.98 million tonnes. As of 30 June 2006, the recovery rate of the Nanliang Mine was 75.0%.

Our Coal Processing Plants

We own and operate a total of thirteen coal processing plants, ten of which are located in close proximity to our mines, and three of which are strategically positioned at major coal collection and transportation centers in Shanxi Province. At these facilities, we process and blend raw coal extracted from our mines, along with coal we purchase from other coal producers. By purchasing raw coal from local and regional producers, we are able to increase our total coal output, and sell such coal through our extensive sales and distribution networks to our customers. We have constructed a new processing plant at the Shaqu Mine, which is currently under trial production. We have also recently commenced trial operations at three new coal processing plants in the Pingshuo Mining Area.

We use modern dense media processing methods for the majority of our coal processing. The following table sets forth key information regarding our coal processing plants:

	Output in 2005	Output in 2006E	Processing method	Coal yield[1]	Designed annual capacity	Utilization rate in 2006E
	(million tonnes)	(million tonnes)		(%)	(million tonnes)	(%)

(1) Coal yield is for wash plant yield only.

(2) Utilization rates of our coal processing plants are estimated as of 30 June 2006 based on the assumption that each coal processing plant will be operated on a 300-day basis annually. As a result, where any one of the coal processing plants is operated for more than 300 days in any given year at its full capacity, its utilization rate may exceed 100%.

(3) New Antaibao commenced trial operations in July 2006.

(4) New Anjialing commenced trial operations in June 2006.

(5) Muguajie commenced trial operations in February 2006.

(6) On 3 August 2005, the new coal processing plant at the Shaqu Mine replaced the Shaqu coal processing plant.

Expansion of Our Coal Mines

Coal mines under development

Antaibao Underground Mine. We commenced construction of an underground mine, the Antaibao Underground Mine, in the Pingshuo Mining Area in 2005. As of 30 June 2006, the total proved and probable

reserves of this mine were 496 million tonnes and the marketable reserves amounted to 380 million tonnes, according to the SRK Report. After its completion, coal from the Antaibao Underground Mine will be used to produce thermal coal products. The Antaibao Underground Mine is scheduled for full production in 2009, and it is expected to have an annual production volume of 8.0 million tonnes of coal. We plan to spend approximately RMB298.0 million, RMB390.0 million and RMB29.0 million, respectively, in 2006, 2007 and 2008 on the construction of the Antaibao Underground Mine.

Pingshuo East Open Pit Mine. We commenced construction of our third open pit mine, the Pingshuo East Open Pit Mine, in the Pingshuo Mining Area in 2006. As of 30 June 2006, the total proved and probable reserves of this mine were 981 million tonnes and the marketable reserves amounted to 818 million tonnes, according to the SRK Report. Coal from the Pingshuo East Open Pit Mine will be used to produce thermal coal products. Full production is scheduled for 2009 with a planned annual output of 20.0 million tonnes of coal. We plan to spend approximately RMB200.0 million, RMB2,447.0 million and RMB2,224.0 million on the construction of the Pingshuo East Open Pit Mine in 2006, 2007 and 2008, respectively. As of the Latest Practicable Date, we obtained the exploration right permit to formulate our production plan to apply for the mining right permit in respect of the Pingshuo East Open Pit Mine. We are currently applying for the mining rights. Subject to the government approval, the mining rights are expected to be obtained in March 2007.

Wangjialing Underground Mine. The Huajin Joint Venture is currently constructing a large underground mine, the Wangjialing Mine. Wangjialing Underground Mine is situated at the southwestern part of the Xiangning Mining Area in the Shanxi Province. All the coal mined at the Wangjialing Underground Mine will be used to produce coking coal products. As of 30 June 2006, the total proved and probable reserves of this mine were 319 million tonnes and the marketable reserves amounted to 305 million tonnes. We expect the Wangjialing Underground Mine to reach a total production capacity of 6.0 million tonnes once it reaches full production in 2010. In addition, the Huajin Joint Venture plans to construct a coal processing plant with a designed production capacity of 6.0 million tonnes per annum and an electric power plant with an installed capacity of 2 x 50 MW using coal tailing from the Wangjialing Underground Mine as fuel to power the mine and the coal processing plant. The total investment in the construction of the Wangjialing Underground Mine and ancillary facilities is estimated to be RMB2,311.2 million. The Huajin Joint Venture plans to spend RMB182.0 million, RMB1,070.0 million and RMB1,023.0 million on the expansion project in 2006, 2007 and 2008, respectively.

We believe that by 2010, after commencement of full production at these three new mines, our total annual coal production capacity will exceed 100.0 million tonnes.

Risk Assessment

Our independent technical consultant, SRK, has performed a risk assessment on each of our coal mines and coal processing plants and has confirmed in its report that none of them is at high risk. SRK has further confirmed that no management problems or foreseeable dangers and risks of decreased production exist at our coal mines and coal processing plants. Our management team is aware of the operational risks and fully understands that the management of safety and production are important elements to reduce the operational risks involved. However, we do not have any provisions for any unforeseeable decreases in production. As all of our production facilities operate on the basis of designed production capacity, in the event that any unforeseeable events result in decreased production, SRK is of the opinion that we do not have additional production capacity to compensate for any loss in production volumes. See "Appendix VI — Independent Technical Report".

Coal products

Our coal products include raw coal extracted from our own mines. We blend coal at our processing plants from various sources, including our own mines, to achieve specific thermal contents, as well as particular chemical and physical properties, in accordance with customer requirements. The required properties may vary depending on the intended use of the coal, such as for power generation, metallurgical production, or other purposes. We produce a variety of coal products based on our customers' needs and subject to the quality and properties of the coal produced from each of our coal mines. The following table sets forth certain coal characteristics of our current principal coal products:

	Calorific value	Sulphur content	Ash content	Moisture content	Ash fusion temperature	Volatile matter content
	(Kcal/kg)	(%)	(%)	(%)	(°C)	(%)
Thermal coal						
Pingshuo No. 1	5,800	1.0	17.0	9.0	1,400	30.5
Pingshuo No. 2	5,500	1.3	20.0	9.0	1,400	30.0
Pingshuo No. 3	5,000	1.2	26.0	9.0	1,400	28.0

Semi-hard coking coal						
Datun Metallurgical	—	0.75	7.5	13.0	—	37.0

Mining rights

The mining rights associated with each of the Pingshuo Mining Area, Liliu Mining Area, Xiangning Mining Area, Datun Mining Area and Nanliang Mining Area are owned by the respective operator of the mine. We hold at least a majority interest in all of these mine operators, except for the Huajin Joint Venture, in which we hold a 50% interest. Registered holders of mining right permits are required to pay mining right permit fees and taxes to the government. See "Appendix VI — Independent Technical Report" for detailed information on our mining right permits. The following table sets forth details of our mining rights.

Mining area/mines	Registered mining right permit holder/certificate number	Mining method*	Area (km^2)	Mining right permit date (year/month)	Mining right validity (years)	Mining right permit renewal date (year/month)

* *Mining method includes open pit ("OP") mines and underground ("UG") mines.*

In addition, as of the Latest Practicable Date, we obtained the exploration right to formulate our production plan for the purpose of applying for the mining right permit in respect of the Pingshuo East Open Pit Mine, which is currently still under development. We are currently applying for the mining right permit. Subject to the government approval, the mining right permit is expected to be obtained in March 2007. According to an opinion issued by our PRC legal adviser, Jia Yuan Law Firm, under PRC laws, there are no legal obstacles to obtaining such mining right permit; however, in the event that we are unable to obtain such mining right permit at the expected date, our business development and financial condition may be adversely affected. We own the mining right permit for the Antaibao Underground Mine.

Where residual reserves remain after the term of the mining rights expires, the holders of such mining rights have a preemptive right to apply for extensions for additional terms, according to the mineral resources regulations of the PRC and corresponding regulations. There is no minimum residual reserve requirement for the renewal of mining rights, provided that any residual reserves remain. Apart from the remaining proved and

probable reserves within a mining area, there are no other conditions affecting the application for extension for additional terms provided that the holder of such mining rights has fulfilled all of its obligations. If any of our mines has any residual proved and probable reserves when its mining right permit expires, we intend to submit an application to renew the mining right permit. The Directors of our Company believe that under the current legal requirements there would be no foreseeable major obstacle in renewing our mining rights when any of them expire. The following table sets forth details of the recoverable reserves, the year the mining rights should be renewed, volumes mined under the current mining right tenure and volumes mined under the renewed mining right tenure of our mines. See also "Appendix VI — Independent Technical Report" to this Prospectus for mining quantities under current mining rights and renewed mining rights.

Mine	Recoverable reserves[1] (Mt)	Year the mining rights should be renewed	Tonnes mined under current mining right tenure (Mt)	Tonnes mined under renewed mining right tenure (Mt)
Pingshua Mining Area				
Antaibao Open Pit	151	2031	151	—
Anjialing Open Pit	656	2029	575	81

(1) Recoverable reserves are based on 30 June 2006 figures.

(2) As of the Latest Practicable Date, we obtained the exploration right permit to formulate our production plan to apply for the mining right permit in respect of the Pingshuo East Open Pit Mine. We are currently applying for the mining rights. Subject to government approval, the mining rights are expected to be obtained in March 2007.

Coal production process

Our mining operations involve five main processes: tunneling and underground mine layout, which is applicable to underground mines only, mining, conveying, coal processing and reclamation.

Tunneling and Underground Mine Layout

When constructing an underground mine, the tunneling process is necessary for the installation of conveyors and for the preparation of the mining work face. We also use tunneling to construct new longwall mining work faces after we finish constructing the underground mine to ensure continuous mining operations. We use high-powered tunneling machines to make tunnels where conditions are suitable. When the geological conditions are not suitable for the use of tunneling machines, we use explosives for tunneling. We send all the

coal extracted from these tunnels to our coal bunkers and store it together with the coal extracted from the longwall coalfaces.

Extracting

We use two principal mining methods for underground mines:

- If the depth and geological conditions of the coal seam are suitable, we utilize an advanced and comprehensive top coal caving mining technology to extract the coal. After utilizing longwall mining technology to mine the coal at the height of the supporting facilities of the mining face and lowering the tail canopy of the hydraulic roof support, the pressure from the roof of the coal seam will cause the coal at the top to naturally drop to the conveyor behind the hydraulic roof support, which will convey the coal outside of the coal mining face. This technology has the benefit of high mining efficiency, safety and high recovery rate.
- The longwall mining technique is a fully mechanized mining method for underground mines. The mining face is supported by hydraulic roof supports, and the coal is extracted by coal shearers, after which the coal is conveyed by a conveyor system to the ground surface. Once the area utilizing the longwall mining has been mined, the longwall mining system will be moved to a new mining area. The benefits of the longwall mining system are high production volumes, high recovery rates, safety and reliability.

Coal extraction at our open pit mines is conducted using the following process:

- At present, coal production at our open pit mines utilizes a truck-and-power shovel mining system. We determine the mining area arrangement and overburden stripping position in accordance with the alignment of the coal deposit. Subsequent to professional blasting of the mines, the rock is removed by power shovel and truck from above the coal seam. Coal is extracted using a power shovel and transported to our processing plant using a truck and conveyor system.
- We believe that with the technological advancements allowing greater access to the mining face in the open pit mines, we will in the future use continuous or semi-continuous mining methods that combine the use of power shovels and removable crushers and conveyors so as to control and reduce costs.

Conveying

We convey the coal we extract from our coal mines either to ground storage or to the respective coal processing plants via an overland conveyor system, such as by conveyor belts or trucks. In addition, we have constructed comprehensive underground roadway systems in each of our underground mines to transport workers and equipment.

Coal processing

We transport raw coal to our coal processing plants after excavation for classification and for further purification to remove slush, rock, inorganic sulfur and other contaminants. We also blend different types of coal to adjust its coal characteristics and quality to meet customer specifications. Each of our four mining areas has one or more coal processing plants. In addition, we have constructed three independent coal processing plants at major coal collection and transportation centers in Shanxi Province, for a total of thirteen coal processing plants owned and operated by us. All of our coal processing plants are highly automated and

equipped with advanced coal processing facilities. We purchase most of our equipment from international manufacturers. After the coal has been processed, it is loaded onto cars through automated, high-speed loadout depots connected to our mine railways.

Reclamation

We believe that the operations at all of our mines are in substantial compliance with environmental and reclamation requirements. We are required by the PRC laws to reclaim and restore mining sites to their prior condition after completion of mining operations. Reclamation activity typically involves the removal of buildings, equipment, machinery and other physical remnants of mining, restoration of land features in mined-out areas, dumping sites and other mining areas, and contouring, covering and revegetation of waste rock piles and other disturbed areas. We had accrued RMB698.5 million for the provision of close down, restoration and environmental costs as of 30 June 2006.

Raw materials, energy and water

We purchase certain raw materials for our coal production and sales, consisting principally of coal purchased from third parties that we blend with our coal. Other materials include facility accessories, diesel fuel, explosives for mining activities and roof supporting materials.

We believe that we have established stable cooperative relationships with our key suppliers of raw materials, which enable us to obtain a reliable supply of most of the materials required by our coal production process. We further believe that many alternative suppliers exist for most of the materials we purchase and, therefore, we do not foresee any difficulty in obtaining an adequate supply of these materials. We generally receive credit terms from our suppliers for our coal operations ranging from ten days to one month.

Electricity and diesel fuel are our main sources of energy.

Our main source of water is underground water. We have not experienced any major disruption in electricity, diesel fuel or water supply in recent years.

Coal sales

The following table sets forth information regarding the domestic and overseas sales of raw coal from our mines and clean coal processed at our coal processing plants:

	Year ended 31 December						Six months ended 30 June			
	2003		2004		2005		2005		2006	
	(Million tonnes)	(% of total)	(Million tonnes)	(% of total)	(Million tonnes)	(% of total)	(Million tonnes)	(% of total)	(Million tonnes)	(% of total)
Domestic sales....	23.2	62.3	31.7	67.7	39.5	77.5	16.9	72.4	21.7	83.0
Overseas sales	14.0	37.7	15.2	32.3	11.5	22.5	6.4	27.6	4.4	17.0
Total.....	37.3	100.0	46.9	100.0	51.0	100.0	23.4	100.0	26.2	100.0

Domestic sales

We conduct coal sales in the domestic market by means of long-term sales contracts and spot market sales. The long-term sales contracts generally have a minimum term of not less than one year, with annual price determination provisions. The spot market sales generally specify the quantities and timing of purchases planned over a period of no more than one year.

Since 2002, the price of domestic coal sales has been largely determined by market forces. For further details on the price of domestic coal, see "Industry Overview — The PRC coal industry". Currently, our pricing decisions take into account: (i) prices in the relevant local coal markets (inclusive of transportation costs); (ii) the grade and quality of the coal; and (iii) the sales volume and the length and stability of relationships with customers. Our long-term contracts contain provisions relating to price adjustment mechanisms, coal quality requirements, coal quantity, permitted sources of supply, future regulatory changes, extension options, force majeure, termination and assignment of contract. Depending on the sales region and the type of customer, our coal prices may be quoted as ex-mine prices, FOB, DES or CFR (all inclusive of VAT). Since 2000, domestic coal prices have been on an upward trend, driven primarily by increased demand from the power and steel industries. The following table sets forth selected price information, for the periods indicated, for our domestic sales to external customers from long-term contract sales and spot market sales:

	Year ended 31 December									Six months ended 30 June					
	2003			2004			2005			2005			2006		
	Price	Sales volume	Percentage of sales volume	Price	Sales volume	Percentage of sales volume	Price	Sales volume	Percentage of sales volume	Price	Sales volume	Percentage of sales volume	Price	Sales volume	Percentage of sales volume
	(RMB/ tonne)	(million tonnes)	(% of total)	(RMB/ tonne)	(million tonnes)	(% of total)	(RMB/ tonne)	(million tonnes)	(% of total)	(RMB/ tonne)	(million tonnes)	(% of total)	(RMB/ tonne)	(million tonnes)	(% of total)
Long-term contract sales ..	202	9.9	42.4	269	26.9	84.7	315	34.4	87.1	318	15.2	89.6	320	21.0	96.7
Spot market sales	154	13.4	57.6	189	4.8	15.3	262	5.1	12.9	267	1.8	10.4	305	0.7	3.3
Total	175	23.2	100.0	257	31.7	100.0	308	39.5	100.0	312	16.9	100.0	320	21.7	100.0

As of the Latest Practicable Date, we had long-term domestic sales contracts for thermal coal with four of the five largest Chinese companies in the power generation sector. In addition, we had 15 long-term coal supply contracts with China's major power companies. Pursuant to the terms and conditions of these long-term domestic sales contracts, we have agreed to supply approximately 46.4 million tonnes, 53.8 million tonnes, and 59.8 million tonnes of thermal coal in 2006, 2007, and 2008, respectively, to our domestic customers.

Overseas sales

Through our licensing arrangement with ChinaCoal Group, our centralized sales force manages all the sales of our coal products to overseas customers, mainly located in countries and territories in the Asia-Pacific region, including Japan, Korea and China Taiwan. ChinaCoal Group generally charges us an agency fee. See "Connected Transactions" for details regarding this agency fee.

Our export contracts generally have terms ranging from one to five years. Contracts of a longer term typically do not include price terms, which are negotiated on an annual basis. These contracts typically stipulate procedures for quality control, sampling and weighing. In some instances, buyers have the option to adjust annual or monthly volumes within a pre-set range as agreed by the parties. We believe we have a good record of meeting our contractual delivery, supply and coal quality requirements.

We generally sell our coal on an FOB basis at the loading port, with purchasers paying the costs of ocean freight. Payments for our overseas sales are made by letter of credit or telegraphic transfer in U.S. dollars.

Coal Trading and Services

The following table sets forth information regarding the revenue generated by our proprietary coal trading and import/export-related services in the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006:

	Year ended 31 December						Six months ended 30 June			
	2003		2004		2005		2005		2006	
	(RMB million)	%	(RMB million)	%	(RMB million)	%	(RMB million)	%	(RMB million)	%
Proprietary coal trading	4,025.5	97.0	4,159.2	95.4	7,263.4	96.2	4,231.5	97.4	2,856.5	96.5
Import and export related services	122.4	3.0	198.7	4.6	287.5	3.8	114.2	2.6	102.6	3.5
Total	4,148.0	100.0	4,357.9	100.0	7,550.9	100.0	4,345.6	100.0	2,959.1	100.0

Proprietary coal trading

We source raw coal and clean coal from both domestic and international coal producers and resell it without further processing to customers, including power plants, steelmakers, coking plants, chemicals plants and other coal traders. In 2005, we resold 18.6 million tonnes of coal directly to domestic customers and 2.5 million tonnes to overseas consumers. Our trading sales are concentrated in the power production sectors.

The weighted average sales prices per tonne for our domestic proprietary trading sales over the past three years were RMB239 in 2003, RMB287 in 2004 and RMB307 in 2005, and the weighted average export sales price per tonne were RMB260, RMB612, and RMB627 in the same periods, respectively.

Import and export-related services

Our parent company, ChinaCoal Group, is the largest coal exporter in China, with coal exports of 14.3 million tonnes in the six months ended 30 June 2006 and over 20 years of trading experience. ChinaCoal Group is one of only four companies in China possessing the Coal Export Right. Coal exports in China must comply with the national export quotas determined annually by the NDRC and MOFCOM. For the years ended 2003, 2004, 2005 and 2006, the total national export quotas for coal were 100.0 million tonnes, 80.0 million tonnes, 80.0 million tonnes and 80.0 million tonnes, respectively. For the same periods, ChinaCoal Group received 49.6 million tonnes, 36.2 million tonnes, 38.2 million tonnes and 38.2 million tonnes, respectively, of the total national export quotas, accounting for nearly 50% of the total national export quotas for each of the relevant periods and among which 14.0 million tonnes, 15.2 million tonnes, 11.5 million tonnes and 4.4 million tonnes, respectively, were allocated to us for the export of our coal products.

Through the Restructuring, we succeeded to the export and domestic trading businesses of ChinaCoal Group, including its sales force, distribution network, customer relationships and port facilities. Pursuant to the Services Agreement, which expires in 2008, we export our coal products through ChinaCoal Group. We intend to renew this agreement upon its expiration to continue exporting our coal products through ChinaCoal Group, and we believe that, given our close relationship with ChinaCoal Group and its interest in our Company, there will be no obstacles to our obtaining such renewal. Furthermore, because the PRC Government allocates export quotas to three other coal exporters in addition to ChinaCoal Group, we are also able to export our coal products through these other coal exporters. Under PRC regulations, only State-owned enterprises are authorized to apply for annual export quotas and the relevant coal export permits, and currently only four coal enterprises have received such authorization. See "Regulations — The coal industry — Coal trading". The coal export agency services industry is generally market-driven, and each of the four Coal Export Right holders generally provides services to any coal producers who engage it for coal export, subject to

the quota allocated to them by the NDRC and MOFCOM. We therefore do not believe that we will face any obstacles in exporting our coal products through these other three coal exporters. Together with ChinaCoal Group (which, as the holder of the Coal Export Right, performs such services as entering into export agreements, customs clearance, and receipt of payment and settlements), we provide a full range of export-related documentary and logistical services. See "Connected Transactions".

The overseas sales for which ChinaCoal Group acts as an export agent, including overseas sales of our coal products, are made principally to coal consumers in the Asia-Pacific region.

We receive service fees for the provision of export-related services to ChinaCoal Group for its export agency services to domestic coal exporters. According to the Services Agreement, we are entitled to deduct 0.8% to 1.3% of the total export transaction amount from the export coal producers as our service fees.

We act as an agent to procure coal in the international markets and from overseas coal producers on behalf of domestic coal consumers. As no operating license is required for the coal import business, we are not restricted by any import quotas and are able to operate our coal import business according to market demand and customers' needs. Our services include one or the combination of: (i) sourcing coal products from international markets or overseas coal producers based on the customers' specifications; (ii) negotiating the price for domestic consumers; (iii) co-signing of sales and purchase contracts with domestic consumers; and (iv) arranging logistics and customs clearance. We believe that our customers are able to receive quality coal products at reasonable prices by benefiting from our market knowledge and relationships with overseas coal producers.

Sales and Marketing

Our coal sales and proprietary trading business are primarily carried out by our centralized sales forces located in Beijing, northern China and the major ports for coal sales. A limited amount of our coal products produced in the Liliu Mining Area and the Datun Mining Area are sold by the sales teams of the Huajin Joint Venture and Shanghai Datun Energy, respectively.

Our domestic sales are conducted primarily through our own sales force. Our centralized sales force sells: (i) raw coal from our mines; (ii) clean coal processed from our coal processing plants; and (iii) raw and clean coal that we purchase from other producers. We are in the process of further centralizing and coordinating our sales and marketing efforts to take full advantage of our extensive sales and distribution channels, wide network of customer relationships and industry knowledge and experience. In China, we have established sales branch offices to sell our own coal products, conduct domestic coal trading and support coal transshipment and export services at such major coal ports as Qinhuangdao, Tianjin, Qingdao, Rizhao and Lianyungang. Our sales personnel periodically visit our customers to provide after-sales services.

We determine a customer's payment method based on factors such as our prior dealings with the customer, volume of sales, the customer's current financial position and the prevailing market conditions. For new or short-term customers, we require full payment prior to delivery. All payments by our domestic customers are made in Renminbi. In recent years, we have not experienced any significant payment collection issues.

Customers

Our customers for coal are located in various regions throughout China and around the world.

We sell thermal coal to large coal-fired power plants, chemical engineering companies, and cement and construction material companies in eastern, southern and northern China. ChinaCoal Group sells our thermal coal under an export agency agreement to power plants and other customers in various industries in other countries and territories, mainly Japan, Korea and China Taiwan.

Our major external coking coal customers include large steelmakers, including Baosteel, Taisteel, and Baogang, and independent coking plants in China. ChinaCoal Group, acting as our export agent, sells our coking coal under an export agency agreement to major overseas customers including Nippon Steel and Posco Iron and Steel. Since August 2003, we have also sold limited amounts of coking coal to our coking plants. Such sales are accounted for as inter-segment sales in our combined financial statements, and are eliminated upon consolidation.

We generally grant our external customers for our coal operations credit terms ranging from three to six months.

Certificates and Compliance with Regulations for Coal Operations

Enterprises that engage in coal production are required to obtain a mining right permit, work safety permit, coal production permit, mine manager qualification certificate and mine principal safety qualification certificate. Jia Yuan Law Firm, our PRC legal adviser, has confirmed that each of our nine mines in operation has obtained all the foregoing certificates and/or permits. Jia Yuan Law Firm has also confirmed that the scope and operations of our coal production business are in compliance with relevant laws, regulations and administrative rules and that we have obtained for our coal production business the requisite licenses, permits, certificates, authorizations and approvals. For details of the laws, regulations and regulatory documents relating to coal production, see "Regulations — The coal industry — Coal production".

Enterprises that engage in the wholesaling and retailing of raw coal, processed coal production and the distribution of coal for residential use shall obtain a Coal Operation Qualification Certificate. Jia Yuan Law Firm has also confirmed that ten of our companies, which are our subsidiaries and joint ventures, have obtained the said certificates, and thus are qualified to conduct the relevant coal operations.

Jia Yuan Law Firm has also confirmed that the controlling shareholder of our Company, ChinaCoal Group, is one of only four coal companies in China possessing a Coal Export Right.

In addition, Jia Yuan Law Firm has confirmed that the scope and operations of our coal trading and export service-related services are in compliance with the relevant laws, regulations and regulatory documents and that we have obtained for our coal trading business the requisite licenses, permits, certificates, authorizations and approvals. For details of the laws, regulations and regulatory documents relating to coal trading and export, see "Regulations — The coal industry — Coal trading".

Our Company is subject to regular inspections and examinations by the relevant PRC authorities, such as the annual review of coal mines by the NDRC. The latest results of regular inspections and examinations by the State Administration of Coal Mine Safety and Administration of Coal Mine Safety in Shaanxi and Shanxi Province for our Yaoqiao Mine, Longdong Mine and Xuzhuang Mine in April 2006, for our Nanliang Mine in August 2006 and for our other mines in September 2006 indicate that such mines meet the relevant requirements. In addition, all the mines of our Company have passed the 2005 Annual Review by the NDRC with respect to their Coal Production Permit.

Competition

A number of factors affect the markets in which we sell our coal products. Coal prices depend primarily on the coal consumption patterns of the electric power and metallurgical industries in China, the availability, location and cost of transportation and price of competing coal and other energy resources. Coal consumption patterns are affected primarily by the demand for electricity, by environmental and other governmental regulations and by technological developments.

We principally compete in China's domestic market and the Asia-Pacific regional market.

Domestic market

China's domestic coal market is characterized by competition among a very large number of coal suppliers, with no individually dominant nationwide supplier. The five and ten largest coal producers in China, including ChinaCoal Group, accounted for only 17.7% and 25.2%, respectively, of the country's total 2005 raw coal production. The domestic coal market is segmented principally by location, given the significant costs associated with coal transport, and also by coal characteristics, such as heat value, sulphur content, ash content and moisture content and volatility. We compete on the basis of reliable and timely delivery, customer service, coal quality and price.

Our principal domestic competitors are a number of large coal producers located in the major coal-producing provinces and regions, including Shanxi and Shaanxi Provinces and the Inner Mongolia Autonomous Region, including Shenhua Group Corporation, Datong Coal Mining Company, Shanxi Coking Coal Company and Yankuang Group Company. Certain of our competitors from these regions have substantial reserves and enjoy better mining conditions, the latter of which allows them to mine coal at a relatively lower production cost. However, competitors from these regions also face significantly higher transportation costs when transporting their coal products to sea ports and to their customers in eastern China due to the greater distances. Our Pingshuo Mining Area is one of the closest to end customers among all major coal mines situated in the major coal-producing provinces in northern and northwestern China, and our Datun Mining Area is located in the heart of one of China's largest coal demand centers. In addition to the large-scale coal producers which are our principal competitors, we also compete to a certain degree with smaller mines located in proximity to our customers. See "Risk Factors — Risks relating to China's coal industry and our businesses — We may be unable to compete effectively against other coal producers and sellers".

We and other domestic coal producers encounter limited competition from imports for our domestic customers. In 2005, only 1.2% of the coal consumed in China was imported.

Export market

We mainly export coal through ChinaCoal Group to several countries and territories in the Asia-Pacific market, including Japan, Korea and China Taiwan. These markets are generally characterized by high energy consumption levels and small coal reserves, creating a significant demand for coal imports. With respect to overseas sales, we compete with certain major overseas coal mining companies, mainly located in Australia and Indonesia, and major Chinese coal exporters. Certain of these competitors have greater financial, marketing, distribution and other resources than we do. However, we believe that we benefit from a more established customer base and sales channel compared to our domestic competitors and shorter transportation distances and lower costs compared to our overseas competitors.

COKING OPERATIONS

Overview

We operate one of China's largest coking businesses not affiliated with a steelmaker. Our main products include coke and coal-based chemicals. In addition, we provide export agency services to China's coke exporters who engage ChinaCoal Group as an export agent. In China, conducting the direct export of coke products is subject to the export quota and export permit system. We plan to apply for export quotas in 2008 to export our coke products directly in 2009. Prior to May 2003 when we started operating our first coking plant, our coking operations focused on the sale of coke in China's domestic market on a trading basis and the provision of export-related services. We have gradually increased our production since the fourth quarter of 2003 by constructing new coking plants and upgrading existing plants. We sold 1.0 million tonnes, 1.0 million tonnes, 1.3 million tonnes and 1.0 million tonnes of coke in 2003, 2004, 2005 and the six months ended 30 June 2006, respectively. The following table illustrates our domestic and overseas sales by revenue and percentage of their contribution to our coking operations segment for the periods indicated:

	Year ended 31 December						Six months ended 30 June			
	2003		2004		2005		2005		2006	
	(RMB million)	(%)	(RMB million)	(%)	(RMB million)	(%)	(RMB million)	(%)	(RMB million)	(%)
Domestic sales.....	83.3	7.8	233.6	11.5	587.3	36.9	215.1	22.9	610.3	60.3
Overseas sales	981.7	92.2	1,805.6	88.5	1,004.0	63.1	723.5	77.1	402.1	39.7
Total	1,064.9	100.0	2,039.2	100.0	1,591.3	100.0	938.6	100.0	1,012.4	100.0

(1) Revenue includes coal-based chemicals and coke export-related services.

Products and Services

Our coke products include mainly metallurgical coke and foundry coke. We process coking coal into coke in our five coking plants pursuant to specifications given by our customers. We also purchase and resell coke in the domestic and international markets. We produce coal-based chemicals in our coking plants and ancillary facilities. Our main chemicals products include coke oven gas, refined tar, benzene, technical and refined naphthalene, methanol, sulfur and phenol. All the coke oven gas we produce is used in power generation so as to increase the efficient use of resources and increase cost-efficient recycling.

ChinaCoal Group, having been granted export quotas by the PRC Government, is one of the largest coke exporters in China. Through the Restructuring, we succeeded to the long-established export and domestic trading business of ChinaCoal Group, including the sales force, distribution network, customer relationships and port facilities.

In 2005, ChinaCoal Group allocated all of its export quotas to us.

Coking Facilities

We, through wholly owned and majority-owned subsidiaries and an associated company, operate coking facilities in five separate locations across northern and northeastern China. Depending on the raw material and production process, as of 30 June 2006, our coking plants and ancillary facilities had an annual production capacity of up to 4.5 million tonnes of coke, 1,532 million cubic meters of coke oven gas, 167,580 tonnes of coal tar, 47,880 tonnes of crude benzol and 36,180 tonnes of ammonium nitrate.

The following table sets forth the designed annual production capacity of our five coking plants:

Coking plant	Designed annual production capacity[1]	Utilization rate Six month period ended 30 June 2006
	(million tonnes)	(%)
Jiuxin Plant	2.0	33.9
Jingda Plant[2]	0.5	23.8
Longquan Plant[2]	0.4	42.3
Mudanjiang Plant[2]	0.4	85.9
Xuyang Plant	1.2	53.7

(1) Designed maximum annual production capacity calculated as of 30 June 2006 on a 300-operational day basis.

(2) The companies that own and operate these coking plants are currently in the process of applying to be included in the qualified producers catalog. We confirm that there are no substantial obstacles in the application process.

As of 30 June 2006, the Jiuxin Plant, Jingda Plant, Longquan Plant and Xuyang Plant were in the start-up stage and not in full operation. As a result, the estimated utilization rates of these four plants were lower than that of Mudanjiang Plant, our first coking plant.

Raw Materials

We have centralized the procurement of raw materials, including coking coal, for all of our coking operations, to obtain the best available pricing and supply terms. Our major sources of coking coal include: (i) mines in the vicinity of our various coking plants; and (ii) the Huajin Joint Venture, which agreed in 2005 to supply us with up to 180,000 tonnes of high-quality coking coal. We generally receive credit terms ranging from five to forty-five days from our suppliers for our coking operations. As of the Latest Practicable Date, we had not experienced any major interruption of raw material supplies for our coking operations.

To date, none of our Directors, their associates or ChinaCoal Group is related to or owns any interest in any of the five largest suppliers for our coking operations.

Sales and Marketing

We sell coke and coal-based chemicals in the domestic and international markets through a specialized sales and marketing force operated by China Coal & Coke Holding Limited, our wholly owned subsidiary, which sets prices for our coking products and enters into sales contracts with our customers. Through the implementation of our centralized management system, including centralizing our sales and marketing forces, we have been able to significantly reduce duplication of marketing efforts and potential competition among our plants.

ChinaCoal Group serves as our agent to export coke produced in our coking plants. See "Connected Transactions".

Customers

Customers of our coking business mainly include steelmakers. We generally grant credit terms ranging from one to two months to our external customers for our coking operations. None of our Directors, their associates or ChinaCoal Group is related to or owns any interest in any of the five largest customers of our coke business.

Certificates and Compliance with Regulations for Coking Operations

From 1 January 2006, the new construction, alteration and expansion of any coking plant must meet the Entry Requirement and be included in the qualified producers catalog. Among the five subsidiaries and joint ventures of our Company, China Coal & Coke Xuyang Limited has already been included in the *Announcement of Qualified Enterprises for Entry Coke Industry* (first group), issued by the NDRC, while the remaining four are in the process of applying to be included in the announcement (second group).

Jia Yuan Law Firm, our PRC legal adviser, has confirmed that the scope and operations of our coke production business, conducted by our subsidiaries and joint ventures, are in compliance with the relevant laws, regulations and administrative rules and, except for those which are in the application process, we have obtained for our coke production business the requisite license, permits, certificate, authorization and approval. We confirm that there are no substantial obstacles preventing our four subsidiaries from being adopted into the announcement. For details of the laws, regulations and regulatory documents relating to coke production, see "Regulations — The coal industry — Coke production".

Our Company is subject to regular inspections and examinations by the relevant PRC authorities, such as the annual review by the NDRC in respect of our coking facilities. However, as of the Latest Practicable Date, no inspection on our coking facilities was scheduled or enforced.

Competition

We compete primarily with domestic coke producers, including: (i) large steelmakers who have their own coking plants; (ii) independent coking plants; and (iii) numerous coal producers in China which are equipped with coke production capabilities. We principally compete on the basis of quality, chemical characteristics of our coke, transportation costs from the coking plants to the customer, the reliability of supply and price. Due to our well established sales and marketing network, as well as our broad range of high quality products, we believe that we are well-positioned to compete with other coke producers. In addition, we believe that by having secure and stable raw material sources, we have a competitive advantage over other coal mining companies with coking capacities.

COAL MINING EQUIPMENT MANUFACTURING OPERATIONS

We are the largest coal mining equipment manufacturer in China based on our 2005 sales revenue. We focus mainly on the production of mining and conveying equipment for longwall mining systems, such as curved armored face conveyors, hydraulic roof supports, coal shearers and coal ploughs. Other than manufacturing mining and conveying equipment, we are also one of the few mining equipment suppliers that are capable of providing comprehensive mining services, including design, production, installation and testing services to underground mines within and outside China. We are also in the process of developing shortwall mining equipment and longwall mining equipment.

Products

Our products include a complete set of equipment for underground mining systems, such as hydraulic roof supports, curved armored face conveyors, shearers, coal ploughs, stage loaders, breakers and mining electric appliances. Our external revenue from coal mining equipment manufacturing increased from RMB1,057.9 million in 2003 to RMB1,891.2 million in 2005.

Manufacturing Facilities

The following table presents the location and principal products manufactured at our equipment manufacturing facilities as of the Latest Practicable Date:

Plant	Location	Principal product
China Coal Zhangjiakou Mining Machinery Co., Ltd. (中煤張家口煤礦機械有限責任公司)	Zhangjiakou, Hebei Province, PRC	Armored face conveyors, coal ploughs, stage loaders and breakers
China Coal Beijing Coal Mining Machinery Co., Ltd. (中煤北京煤礦機械有限責任公司)	Beijing, PRC	Hydraulic roof supports
China Coal Handan Coal Mining Machinery Company Limited (中煤邯鄲煤礦機械有限責任公司)	Handan, Hebei Province, PRC	Hydraulic props
Zhangjiakou China Coal Chuangli Mining Machinery Co., Ltd. (張家口中煤創力採掘設備有限責任公司)	Zhangjiakou, Hebei Province, PRC	Coal shearers

Raw Materials

We use steel as the raw material for our coal mining equipment manufacturing operations. We generally receive credit terms ranging from ten days to one month from our suppliers for our coal mining equipment manufacturing operations after certain delivery conditions have been fulfilled.

To date, none of our Directors, their associates or ChinaCoal Group is related to or owns any interest in any of the five largest suppliers for our coal mining equipment manufacturing operations.

Research and Development

We dedicate significant resources to research and development. At present, we have over 900 professionals engaged in the research and development of underground coal mining equipment. As a result of our research and development activities, we were awarded five top prizes in China's coal industry, were granted three patents for curved armored face conveyors, and developed the first domestically manufactured 6.5 meter, heavy-duty hydraulic roof support and a complete equipment set of the super heavy-duty 3 X 700 KW armored-face conveyor. Our research and development unit was also selected to develop the equipment for a six million tonne integrated mining face as part of a national research and development program. In addition, we successfully developed a fully automated coal plough system.

We are increasing our cooperation with companies outside of China, having acquired the assets and technologies of an internationally renowned industrial chain manufacturing company based in the United Kingdom. We also recently cooperated with British and German businesses to produce gearbox electro-hydraulic control valve systems. We also established a specialized research and development organization to centralize and coordinate our research and development activities.

Sales and Marketing; Customers

We sell our products to domestic and foreign customers, and also utilize them at our Pingshuo Mining Area, Liliu Mining Area, Xiangning Mining Area and Datun Mining Area. In 2005, domestic sales of equipment for use in mines accounted for over 90% of our total coal mining equipment revenue.

We are actively searching for overseas markets to expand our customer base and increase our sales. We recently exported a complete set of coal mining equipment and technology to Russia. At present, we supply to mines in over ten countries and regions.

We generally grant our external customers for our coal mining equipment manufacturing operations credit terms ranging from three to six months.

To date, none of our Directors, their associates or ChinaCoal Group is related to or owns any interest in any of the five largest external customers for our coal mining equipment manufacturing operations.

Competition

We compete with major mining equipment manufacturers in China and abroad. For longwall mining system components such as hydraulic roof supports and curved armored face conveyors, our primary domestic competitors are Ningxia Northwest BN Industrial Group Co. Ltd. (西北奔牛實業有限公司) and Zhengzhou Coal Mining Machinery Group Co. Ltd. (鄭州煤礦機械集團有限責任公司), respectively. In addition, we compete with international mining equipment manufacturers such as DBT and Joy Mining Machinery Company in providing design, installation, testing and system integration services on a turn-key basis for the underground mining industry. We believe that we are well positioned to compete in both the domestic and international markets for coal mining equipment.

COAL MINE DESIGN AND OTHER OPERATIONS

We are among the best coal mine design companies in China. As of 30 June 2006, we had completed more than 1,000 medium and large projects both inside and outside of China. We are the principal designer of China's first 100 million-tonne coal mine, Shendong Coal Mining Area. One-third of all underground coal mines in China with production capacity of 10 million tonnes or above were designed by us.

We have been awarded more than 100 national and provincial awards in recognition of our outstanding mine design capability, among which four awards represented the highest national accolade, more than any of our competitors.

We also engage in the following businesses: (i) primary aluminum production and sales; (ii) electric power generation; (iii) and coal transportation services. For the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006, our coal mine design and other operations accounted for 4.8%, 4.1%, 4.8%, 3.9% and 6.4%, respectively, of our total revenue.

PURCHASES FROM OUR LARGE SUPPLIERS

In the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, 2.6%, 2.1%, 5.7% and 4.1%, respectively, of our total cost of sales were attributable to purchases from our largest supplier. In the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, 9.9%, 6.9%, 11.0% and 12.1%, respectively, of our total cost of sales were attributable to purchases from our five largest suppliers. None of our Directors, their associates or ChinaCoal Group is related to or owns any interest in any of the five largest suppliers.

SALES MADE TO OUR LARGE CUSTOMERS

In the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, 12.9%, 11.9%, 9.9% and 12.7%, respectively, of our total sales were generated from sales made to our largest customer. In the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, 25.0%, 25.2%, 22.9% and 37.9%, respectively, of our total sales were generated from sales made to our five largest customers, including domestic power plants and steel makers. None of our Directors, their associates or ChinaCoal Group is related to or owns any interest in any of the five largest customers.

ENVIRONMENTAL MATTERS

Our operations are subject to numerous national and provincial environmental laws and regulations relating to air and water emissions, hazardous substances and waste management, mining site reclamation and restoration, and groundwater quality and availability. We are committed to following environmentally responsible practices and abiding by relevant environmental laws and regulations in all aspects of our business. We conduct environmental feasibility studies and environmental impact assessments for all of our new building or reconstruction projects. Installation for the prevention and control of pollution at a construction project must be designed, built and commissioned together with the principal part of the project. Before the new facilities may be put to use, the pollution control and waste processing facilities must be inspected and considered to be up to standard by the environmental protection department and be commissioned simultaneously with the new facilities. Each of our coal mines are in compliance with environmental regulations, details of which are as follows:

Pingshuo Mining Area

The holder of the mining right permits for the Antaibao Open Pit Mine, Anjialing Underground Mine and Anjialing Open Pit Mine has obtained the operational licenses at the provincial level for boundary noise, gaseous emissions and water discharge, as well as licenses from the local government for groundwater extraction. Each of our mines in the Pingshuo Mining Area prepares an individual environmental report to SEPA, the Shanxi Environmental Protection Bureau and the local environmental protection bureau twice yearly. These reports incorporate information regarding volumes of solid waste generated, noise data, wastewater data, gaseous emissions data, environmental budgets and completed rehabilitation. They are passed down from state to provincial regulators for approval, then to local county environmental regulators who conduct random inspections. Consequently, we are subject to random inspections carried out by both provincial and local environmental agencies several times a year to ensure compliance. To date, none of our mines in the Pingshuo Mining Area has been fined for any breach of environmental non-compliance.

Liliu Mining Area

The holder of the mining right permit for the Shaqu Mine in the Liliu Mining Area has obtained the operational licenses at the provincial level for boundary noise, gaseous emissions and water discharge, as well as licenses from the local government for groundwater extraction. The Shaqu Mine in the Liliu Mining Area must prepare an individual environmental report to the Shanxi Environmental Protection Bureau. These reports incorporate information on waste volumes generated, noise data, wastewater data and gaseous emissions data. After approval, the report is passed down from the state to provincial regulators and then to the local environmental regulators, both of which conduct random inspections. We are subject to random inspections carried out by the provincial and local environmental agencies several times a year to ensure compliance. We maintain our own in-house environmental monitoring station which collects data on noise,

water and emissions to monitor our continued compliance. To date, the Shaqu Mine has not been fined for any breach of environmental non-compliance.

Datun Mining Area

The holder of the mining right permit for our four mines in the Datun Mining Area, namely the Yaoqiao Mine, the Kongzhuang Mine, the Xuzhuang Mine and the Longdong Mine, has obtained the operational licenses at the provincial level for boundary noise, gaseous emissions and water discharge, as well as licenses from the local government for fuel storage and groundwater extraction. Each of our mines in the Datun Mining Area prepares an individual annual environmental report to the SEPA, incorporating information on waste volumes generated, noise data, wastewater data and gaseous emissions data. This report is passed down from the state to provincial regulators for approval, then to the local county environmental regulators. Both the provincial and local regulators conduct random inspections. Consequently, we are subject to random inspections, which are carried out by the provincial and local agencies several times a year to ensure compliance. To date, none of our mines in the Datun Mining Area has been fined for any breach of environmental non-compliance.

In addition to the environmental inspections conducted by the local and provincial agencies, the China Quality Association audits Datun Coal and Electricity (Group) Limited-Liability Company annually to re-examine its corporate ISO14001:1996 accreditation for environment management systems. Datun Coal and Electricity (Group) Limited Liability Company has achieved sound results with regard to its environmental credentials, has had no fines to date and maintains its ISO14001:1996 accreditation.

Nanliang Mining Area

The holder of the mining right permit for the Nanliang Mine in the Nanliang Mining Area has obtained the environmental licenses at the provincial level for boundary noise, gaseous emissions and water discharge, as well a license from the local government for groundwater extraction. The Nanliang Mine is required to prepare an Annual Environment Report to the Environmental Protection Bureau of Shaanxi Province, incorporating data on waste volumes generated, noise data, wastewater data and gaseous emissions data. Upon approval, the provincial regulators pass the report down to the local county environmental regulators who conduct random inspections. Consequently, we are subject to random inspections, which are carried out by the local agencies several times a year to ensure compliance. To date, Nanliang Mine has not received any fines for breach of any environmental regulations.

Jia Yuan Law Firm, our PRC legal adviser, have advised us that our operational activities are in compliance with the relevant PRC environmental laws and regulations, and that we have not been fined for any material breach of the relevant environmental laws in the past three years.

As the environmental regulatory regime in China develops, we continue to invest in our environmental protection and control systems. We have adopted many environmentally responsible practices in our operations and have installed sophisticated abatement equipment to minimize the impact of our operations on the environment. We have developed comprehensive water management and conservation practices that include the use of surface runoff and infiltrated water for dust suppression, and we have installed closed water recycling and water treatment facilities at all of our coal processing plants, greatly reducing the amount of water used in the coal processing process and the amount of wastewater released. We burn coal waste, tailings and slurry from all of our coal processing plants to generate electric power for use in our own plants and for sale to the local power grids, rather than disposing of such waste. These generating plants are equipped with high-efficiency low-emissions circulating fluidized bed boilers, which substantially reduce sulfur dioxide and

nitrogen monoxide emissions. We recover substantially all of the coke oven gas produced in the coking process and use such gas, after treatment and recovery of coking chemicals co-products, as fuel for the coking ovens and for on-site power generating plants. All of our power generating plants are equipped with high-efficiency particle filtration and desulphurization equipment. We will continue to adhere to the strict environmental requirements by implementing waste handling and processing measures at each of our coal mining areas and coke production plants. We will also undertake measures to protect our coal resources from over-exploitation and unauthorized exploitation by us and by third parties. We will monitor the extraction of our coal reserves and devise coal production plans to maximize resource utilization and to minimize the environmental impact of our operations.

In addition to regular inspections by the relevant government authorities, we undertake routine and periodic inspections of all of our coal mines and coking plants. We have established departments or teams at each principal subsidiary that are responsible for ensuring that all of our coal mines and coking plants are in compliance with applicable environmental laws and regulations. All new mines and plants must conduct environmental impact assessments before beginning construction. Our environmental department coordinates environmental impact assessments, testing, and rehabilitation projects. For the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, we spent approximately RMB179.9 million, RMB261.1 million, RMB197.9 million and RMB23.9 million, respectively, to comply with local and national environmental protection ordinances. As of the Latest Practicable Date, we believe that we have been in full compliance with the applicable PRC environmental laws and regulations in all material respects, and were not subject to any major environmental claims, lawsuits, penalties or disciplinary actions.

The newly promulgated *Emission Standard for Pollutants from Coal Industry*, effective from 1 October 2006, imposes stricter standards and higher technical requirements for our coal mines, coal processing plants and coal waste, storage and loading depots. Our Directors believe that the operations of our coal mines, coal processing plants and depots are in compliance with the newly enforced standards as we had already adopted advanced pollution control technologies and measures prior to the promulgation of the new standards.

OCCUPATIONAL HEALTH AND SAFETY

The PRC Government places significant regulatory requirements on coal mine and employee safety. We regard occupational health and safety as one of our important social responsibilities and have implemented a number of measures at our coal mines to ensure compliance with the stringent regulatory requirements. We have established a safety supervision department at each of our operating coal mines. The safety supervision departments conduct periodic inspections of our mining safety facilities to ensure that all parts of our coal mining operations are in compliance with existing laws and regulations. As we believe that safe practices are the best ways to ensure employee safety, our safety supervision departments also conduct regular training sessions for employees on accident prevention and management.

We have designed and adopted underground mining techniques to minimize the risk of injury at our underground coal mines. Underground mining activities are inherently dangerous as they may trigger explosions from sparks in underground coal mines with high levels of coal dust and methane. We have adopted strict policies, requiring gas to first be extracted from the mine until the concentration level of gas is within a permissible range in accordance with the national standard, before mining activities are permitted to commence. To regularly supervise gas levels, we have installed a mine gas monitoring system in all of our underground mines.

However, our business operations, particularly our coal mining operations, involve significant risks and hazards that are inherent in such activities and may not be completely eliminated by safety measures. These risks and hazards could result in damage to, or destruction of, properties or production facilities, personal injury, environmental damage, business interruption and possible legal liability. See "Risk Factors — Risks relating to China's coal industry and our businesses — We may not have sufficient insurance coverage against potential operational risks."

In 2003, 2004 and 2005, the employee fatality rate for our mines, which includes both full-time and temporary employees, was 0.12, 0.15 and 0.08 persons per million tonnes of raw coal production, respectively. This was substantially lower than the average rate for coal mines in China, which was 4.17, 3.10 and 2.81 persons per million tonnes, respectively, during the same periods. In March 2001, a mining-related accident in which five people died occurred at the Kongzhuang coal mine in the Datun Mining Area. However, no other major accidents, as defined under applicable Chinese laws to mean accidents involving three to nine fatalities, have occurred at any of our coal mines in the past several years. No other accident has had, individually or in the aggregate, a material effect on us. While we are committed to further reducing our fatality rates and maintaining high safety standards at our production facilities, there is no assurance that accidents will not occur in the future.

We provide various healthcare benefits to our employees in accordance with applicable laws and regulations.

INTELLECTUAL PROPERTY

In connection with the Restructuring, we have entered into a trademarks license framework agreement with ChinaCoal Group, pursuant to which ChinaCoal Group has agreed to grant to us the right to use certain trademarks for a nominal fee of RMB1.0 per year for a term of 10 years, and which is automatically renewable at our option. The trademarks license framework agreement contains a non-cancellable provision under which ChinaCoal Group shall not terminate the agreement without our consent.

As of the Latest Practicable Date, we held 21 patents for mining-related technologies, and had 16 additional patent applications pending before the State Intellectual Property Office of China, or SIPO. Our coal mining equipment manufacturing operations hold 5 patents in connection with mining equipment, of which 3 are for the production of armored face conveyor systems.

PROPERTIES

Our head office is located at 1 Huangsidajie, Chaoyang District, Beijing, the PRC. As of 30 September 2006, we operated our businesses through 2,654 properties in the PRC, Hong Kong and Australia for our mines, production facilities, offices and other places of operation. These properties comprised: (i) the land use rights to 160 parcels of land with a total site area of approximately 45.82 million m^2; (ii) 1,788 buildings with a total gross floor area of approximately 1.58 million m^2; (iii) 68 buildings under construction; and (iv) 534 leased properties with a total gross floor area of approximately 0.24 million m^2 and 104 parcels of leased land with a total site area of approximately 3.00 million m^2 . According to the Restructuring Agreement, the above properties were transferred to us or our relevant subsidiaries by ChinaCoal Group as part of the Restructuring.

Savills, an independent property valuer, valued our owned property interests at approximately RMB2,561.62 million as of 30 September 2006. The text of the valuer's letter, summary of values and valuation certificates prepared by Savills in connection with its valuation are set out in "Appendix V — Property Valuation" included in this Prospectus.

Land Use Rights

The land use rights transferred by ChinaCoal Group to us comprise five categories of land use rights as follows:

(i) 82 parcels of granted land with a total site area of approximately 3.09 million m^2 for which ChinaCoal Group or its relevant subsidiaries have obtained granted land use rights certificates;

(ii) 28 parcels of authorized allocated land with a total site area of approximately 3.21 million m^2 for which MLR has authorized ChinaCoal Group to manage and operate, including contributing such land as capital in our Company;

(iii) 32 parcels of retained allocated land with a total site area of approximately 38.74 million m^2 which the relevant subsidiaries of ChinaCoal Group have been authorized by the MLR to retain the land use rights;

(iv) 6 parcels of allocated land with a total site area of approximately 0.01 million m^2 for which ChinaCoal Group has obtained allocated land use rights certificates, but such parcels of land are not included in the authorized allocated land and retained allocated land, respectively, referred to in sub-paragraphs (ii) and (iii) above; and

(v) 12 parcels of land with a total site area of approximately 0.77 million m^2 for which ChinaCoal Group has not established proper legal title and for which we are in the process of applying for the relevant land use rights certificates.

The transfer of registration of the granted land, authorized allocated land and retained allocated land held by ChinaCoal Group to under our name has not yet been completed and as of the Latest Practicable Date, the transfer of registration of approximately 3 parcels of land remains outstanding. According to the legal opinion of our PRC legal adviser, we or our relevant subsidiaries shall not have any legal obstacles to obtaining the relevant land use rights certificates. The land use rights of the 32 parcels of retained allocated land were transferred to us upon ChinaCoal Group transferring to us the equity interests held by it in the relevant subsidiaries.

Buildings

The buildings transferred to us by ChinaCoal Group as part of the Restructuring comprise:

(i) 1,628 buildings with a total gross floor area of approximately 1.45 million m^2 for which ChinaCoal Group has proper building ownership certificates or building title proof. Among these buildings, 1,497 buildings with a total gross floor area of approximately 1.38 million m^2 were built on the land which ChinaCoal Group has proper land use rights certificates; 13 buildings with a total gross floor area of approximately 0.01 million m^2 were built on the land for which ChinaCoal Group has not established proper legal titles as those stated in the above sub-paragraphs (iv) and (v) under "Land Use Rights"; and the remaining 118 buildings with a total gross floor area of approximately 0.06 million m^2 were built on the land leased by ChinaCoal Group. According to the legal opinion of our PRC legal adviser, we or our relevant subsidiaries legally and effectively own such buildings; and

(ii) 160 buildings with a total gross floor area of approximately 0.12 million m^2 for which ChinaCoal Group or its relevant subsidiaries does not have proper building ownership certificates. Among these buildings, 59 buildings with a total gross floor area of approximately 0.06 million m^2 were

built on the land which ChinaCoal Group has proper land use rights certificates; 29 buildings with a total gross floor area of approximately 0.02 million m^2 were built on the land which ChinaCoal Group has not established proper legal titles as those stated in the above sub-paragraphs (iv) and (v) under "Land Use Rights"; and the remaining 72 buildings with a total gross floor area of approximately 0.04 million m^2 were built on the land leased by ChinaCoal Group. According to the legal opinion of our PRC legal adviser, we or our relevant subsidiaries shall not have any legal obstacle to obtaining proper building ownership certificates for those buildings erected on the land with proper land use rights certificates.

The transfer of registration of the buildings with building ownership certificates held by ChinaCoal Group to under our name has not been completed and as of the Latest Practicable Date, the transfer of registration of 3 buildings has not yet been completed. According to the legal opinion of our PRC legal adviser, we or our relevant subsidiaries shall not have any legal obstacle to obtaining the relevant building ownership certificates.

With respect to the land and buildings without proper legal title certificates as referred to in "Land Use Rights" and "Buildings" above, our Directors consider that the absence of proper title certificates in respect of part of the land and buildings will not result in any material adverse impact on the business of our Company because:

(i) most of the land and buildings owned by us but without title certificates are used for office and ancillary production uses. Such land without land use right certificates represent approximately 1.6% of the total site area of land owned by us, while the buildings without property ownership certificates represent approximately 7.5% of the total gross floor area of the buildings owned by us. The absence of title certificates of such land and buildings will not result in any material impact on the operations of our Company; and

(ii) our Directors consider that the relevant land and buildings can be substituted easily without creating additional burdens on our Company.

Regarding the land and buildings used for office administration purpose, our PRC legal adviser, Jia Yuan Law Firm, has confirmed that such use is consistent with the specified use of the relevant land and properties.

Further, Jia Yuan Law Firm has confirmed that in addition to the land and buildings used for office administration purposes, the uses of all other land and buildings owned by our Company but without legal title certificates are consistent with the specified use of the relevant land and properties.

In addition, ChinaCoal Group has undertaken to provide all necessary assistance to us in order to apply for the state-owned land use rights certificates/building ownership certificates within 12 months from the date of establishment of our Company in respect of the properties for which ChinaCoal Group has not obtained proper title certificates under the Restructuring Agreement. ChinaCoal Group has also undertaken to compensate against all losses due to any issue arising from failing to obtain the state-owned land use rights certificates/building ownership certificates, except for the settlement of land grant fees, which shall be paid by us.

Buildings Under Construction

We also obtained from ChinaCoal Group 68 new buildings under construction, which, upon completion, will have an estimated total gross floor area of approximately 0.13 million m^2.

The relevant building ownership certificates of the buildings under construction will be obtained by us or our relevant subsidiaries upon completion of the particular building and after property registration with the relevant authorities. We intend to use these buildings for production and offices and for other ancillary uses.

Our mining operations require land use rights for our mines. Our PRC legal adviser, Jia Yuan Law Firm, have confirmed that we have obtained all the requisite land use rights for our mining operations.

Leased Land and Properties

In addition, our Company or our relevant subsidiaries occupy 104 parcels of leased land with a total site area of approximately 3.00 million m^2. Of this leased land, 93 parcels of land are leased by ChinaCoal Group or its associates to our Company or our relevant subsidiaries and 11 parcels of land are leased by third parties to our Company or our relevant subsidiaries. Such leases were initially entered into by ChinaCoal Group with the relevant lessors but have been transferred to us or our relevant subsidiaries as part of the Restructuring. Of the land leased by us, proper land titles have not been established by ChinaCoal Group and the third parties in respect of 20 and 7 parcels of land, respectively.

As of 30 September 2006, we leased approximately 526 buildings in the PRC, 5 buildings in Hong Kong and 3 buildings in Australia. The total gross floor area of the leased buildings is approximately 0.24 million m^2. Among these leased buildings, we or our relevant subsidiaries leased from ChinaCoal Group or its associates 476 buildings with a total gross floor area of approximately 0.21 million m^2 and we or our relevant subsidiaries also leased 58 buildings from various independent third parties with a total gross floor area of approximately 0.03 million m^2. Of the buildings leased by us in the PRC, building ownership certificates have not been obtained by ChinaCoal Group and the third parties in respect of 3 and 10 buildings, respectively.

In respect of the above land and buildings leased by us from ChinaCoal Group or its associates and for which no proper land titles have been established and no building ownership certificates have been obtained, ChinaCoal Group has undertaken to legalize its relationships with us and obtain the relevant building ownership certificates within 12 months from the date of establishment of our Company.

Waiver From Certain Valuation Report Requirements

As we either own or lease a substantial number of properties, we have applied to the Hong Kong Stock Exchange for a waiver from strict compliance with:

(a) Rules 5.01, 5.06(1) and 5.06(3) of the Hong Kong Listing Rules, which require the particulars of each property to be disclosed in a valuation report on an individual basis;

(b) Rule 19A.27(4) of the Hong Kong Listing Rules relating to preparation of a certified English translation of a valuation report; and

(c) paragraph 3(a) of Practice Note 16 of the Hong Kong Listing Rules relating to the inclusion of a full valuation report in the Prospectus in respect of the properties legally and beneficially owned by us.

We have also applied for an exemption from the SFC from strict compliance with paragraph 34(2) of the Third Schedule to the Companies Ordinance relating to the disclosure of certain particulars of our properties in the valuation report on the grounds that it would not be practical and would be unduly burdensome for us to include a fully compliant valuation report in this Prospectus and the inclusion of such detailed information would be irrelevant to potential investors as we are not a property company and would not

be material to a potential investor's investment decision. The SFC has granted us a waiver pursuant to section 342A(1) of the Companies Ordinance.

The Hong Kong Stock Exchange has also granted us a waiver in respect of the preparation of an English translation of the valuation report since it would be unduly burdensome to prepare an English translation of the report, as substantially all of the properties are located in the PRC and consequently the underlying valuation and title information is in Chinese.

The exemption has been granted by the SFC under section 342(1) of the Companies Ordinance and the waiver has been granted by the Hong Kong Stock Exchange from Rules 5.01, 5.06(1), 5.06(3) and 19A.27(4) and paragraph 3(a) of Practice Note 16 of the Hong Kong Listing Rules, subject to the following conditions:

- a full valuation report in the Chinese language complying with all the applicable requirements of the Hong Kong Listing Rules and paragraph 34(2) of the Third Schedule will be made available for inspection in accordance with "Appendix XI — Documents Delivered to the Registrar of Companies and Available for Inspection";
- the valuer's letter and the valuer's certificate containing a summary valuation of all of our property interests, including particulars of occupancy, market values and the title status thereof, based on the full valuation report, will be included in this Prospectus in the form set out in Appendix V to this Prospectus; and
- this Prospectus must set out particulars of this exemption.

INSURANCE

In accordance with what we believe is customary practice for other companies that conduct the same business that we do, we do not currently maintain fire, liability or other property insurance covering our property, equipment or inventory relating to our principal operations. We carry occupational injury, medical pension and unemployment insurance for our employees, in compliance with applicable regulations. See "Risk Factors — Risks relating to China's coal industry and our businesses — We may not have sufficient insurance coverage against potential operational risks."

We will continue to review and assess our risk portfolio and make necessary and appropriate adjustments to our insurance practice in line with our needs and with industry practice in China.

EMPLOYEES

As of 31 December 2003 and 2004, ChinaCoal Group had approximately 98,167 and 99,490 employees, respectively. During the same periods, ChinaCoal Group had 1,839 and 2,751 temporary

employees, respectively. After the Restructuring, we had 51,792 employees, including 2,242 temporary employees, as of 30 June 2006 . The table below sets forth the number of our employees by their functions:

	As of 31 December 2005		As of 30 June 2006	
	Number of Employees	% of Total	Number of Employees	% of Total
Operations and maintenance				
Coal operations	22,112	43.2	21,149	40.8
Coking operations	3,325	6.5	4,458	8.6
Coal mining equipment manufacturing operations	9,034	17.6	8,906	17.2
Other businesses	16,759	32.7	17,279	33.4
Total	51,230	100.0	51,792	100.0
Management, finance and administrative	4,943	9.6	5,257	10.2
Research and development and technical support	8,585	16.8	8,623	16.6
Sales and marketing	419	0.8	892	1.7
Others	37,283	72.8	37,020	71.5
Total	51,230	100.0	51,792	100.0

We have implemented a number of initiatives in recent years to enhance the productivity of our employees. Our employees are selected through a competitive process. We conduct periodic performance reviews for our employees, and their salaries and bonuses are performance-based. In addition, we have implemented training programs for different job requirements. We believe that these initiatives have contributed to increased employee productivity.

The remuneration package for our employees generally includes salary and bonuses. Employees also receive welfare benefits including medical care, housing subsidies, retirement, occupational injury insurance and other miscellaneous items. As required by applicable regulations, we participate in various pension funds organized by municipal and provincial governments for our staff. We are required to make contributions to the pension funds of approximately 20% of the salaries, bonuses and certain allowances of our staff. A member of the plan is entitled to a pension equal to a fixed proportion of the salary prevailing at his retirement date. We have no other material obligations for the payment of pension benefits associated with these plans beyond the annual contributions described above. Our contributions in the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006 were RMB78.6 million, RMB105.4 million, RMB186.2 million, RMB81.9 million and RMB105.6 million, respectively.

Total remuneration of our employees includes wages and bonuses. We paid our employees an aggregate of RMB1,191.6 million, RMB1,556.4 million, RMB1,847.5 million, RMB976.0 million and RMB1,121.7 million, in wages, bonuses and subsidies in the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006, respectively.

In 2005, total contributions paid by us for our Directors to the pension fund amounted to approximately RMB53,342. In addition, each of our employees currently pays a percentage of his or her salary as contribution to the pension scheme. Upon retirement, our employees are entitled to a pension payment from the scheme.

Currently, all members of our work force are employed under employment contracts which specify the employee's position, responsibilities, remuneration and grounds for termination. We and our subsidiaries have labor unions that protect employees' rights, aim to assist in the fulfillment of our and our subsidiaries' economic objectives, encourage employee participation in management decisions and assist in mediating disputes between us and union members. Each of our and our subsidiaries' operating units has a separate labor union branch. We have not experienced any strikes or other labor disturbances which have interfered with our operations, and we believe that we have positive relations with our employees.

All employees who are unable to work due to illness or disability are entitled to receive certain benefits during their period of absence from the workplace. In addition, the PRC Government requires us to provide work-related injury insurance for each of our employees.

LEGAL PROCEEDINGS

As of the Latest Practicable Date, we were involved in five legal proceedings of which the relief sought amounted to more than RMB5.0 million. Of these five proceedings, our Company is named as plaintiff to three, and defendant to two. The Directors of our Company believe we have recorded adequate provision for potential liabilities relating to any such claims and that there is no individual case or group of related cases pending that is likely to have a material adverse effect on our financial condition, results of operations or cash flows.

Neither we nor any of our subsidiaries is a party to any other litigation or arbitration of which the relief sought amounts to more than RMB5.0 million and no material litigation, arbitration or claim is known to us to be pending or threatened by or against us or our subsidiaries or with respect to any of our properties or operations.

Unless the context otherwise indicates, in the following discussion and analysis, the financial data for the periods referred to herein reflects our financial condition after the Restructuring and has been prepared as if our current structure had been in existence throughout the Track Record Period. In addition, the financial data also includes certain other businesses retained by ChinaCoal Group that were historically associated with the Predecessor Operations.

Unless otherwise indicated, all financial data, whether presented on a combined basis or by segment, is presented net of inter-segment transactions. (i.e., inter-segment and other inter-company transactions have been eliminated).

SELECTED HISTORICAL COMBINED FINANCIAL INFORMATION AND OPERATING DATA

Selected Historical Combined Financial Information

The following tables present our selected historical combined financial information for the periods indicated. The selected summary combined income statement information, segment financial information and cash flow information and other financial information for the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006, and the selected summary combined balance sheet information as of 31 December 2003, 2004, 2005 and 30 June 2006 are derived from, and should be read in conjunction with, the combined financial information set forth in the Accountants' Report included as Appendix I to this Prospectus.

Prior to the Restructuring, our business operations were conducted by the companies wholly owned or controlled by ChinaCoal Group (the "Predecessor Operations"). Since ChinaCoal Group controlled the business operations and the related assets that were transferred to us pursuant to the Restructuring, and continues to control us after the Restructuring, our historical combined financial information has been prepared as a combination of businesses under common control in a manner similar to a pooling-of-interests. Accordingly, the assets and liabilities transferred to us have been stated at historical carrying amounts. In addition, the historical combined financial information presented below for each of the years in the three-year period ended 31 December 2005 and the six months ended 30 June 2005 and 2006 also reflect the financial position and results of operations of certain of the businesses and assets historically associated with the Predecessor Operations retained by ChinaCoal Group as part of the Restructuring. Businesses retained by ChinaCoal Group include: (i) equity interests in certain coal gas, coke and coking coal operations and in certain coal-based chemicals manufacturing and sales operations; (ii) operations of the Mines under Restructuring; (iii) coal mine and civil engineering construction operations; (iv) coal bed methane development operations; (v) provision of coal export agency services and a small amount of coal trading and agency services businesses of certain overseas trading companies; (vi) community functions such as schools and hospitals; (vii) a small amount of investment in equity and some non-operational assets; and (viii) other non-core operations including real estate and hotel development and management. Although certain of such businesses and assets retained by ChinaCoal Group were not transferred to us, they have been included in the historical combined financial information up to the effective date of the Restructuring, 22 August 2006, because they were an integral part of, or historically associated with, the assets, liabilities and interests of the Predecessor Operations (the "Transferred Businesses"). Accordingly, the financial information included in this section may not necessarily reflect what our results of operations, financial position and cash flows would have been had we been a separate and stand-alone entity during the periods presented below. For selected historical financial information relating to businesses and assets retained by ChinaCoal Group historically

associated with the Predecessor Operations, see Note 2 in the Accountants' Report included as Appendix I to this Prospectus.

The selected historical combined financial data should be read in conjunction with our combined financial information set forth in the Accountants' Report included as Appendix I to this Prospectus and included elsewhere in this Prospectus.

Other Selected Financial Information

The following table sets forth a full quantitative reconciliation of EBITDA to its most directly comparable IFRS equivalent, profit for the year, and the calculation of EBITDA margin.

	Year ended 31 December			Six months ended 30 June	
	2003	2004	2005	2005	2006
			(RMB million)		
Profit for the year/period	238.6	2,435.5	3,551.4	2,392.0	1,482.4
Income tax expense	(93.3)	(730.2)	(758.8)	(586.9)	(627.9)
Share of profits/(losses) of associates	0.7	(1.9)	(6.1)	3.1	(1.2)
Finance costs	(675.4)	(527.8)	(112.3)	(23.7)	(291.5)
Depreciation and amortization	(632.5)	(871.3)	(1,005.5)	(436.4)	(561.4)
EBITDA[1] (unaudited)	1,639.1	4,566.7	5,434.1	3,435.9	2,964.4
Revenue	14,480.8	22,163.8	30,061.3	15,011.9	14,679.7
EBITDA Margin[1] (unaudited)	11.3%	20.6%	18.1%	22.9%	20.2%

(1) EBITDA, which is used to measure our operating performance, is defined as profit for the year plus finance costs, share of profits/(losses) of associates, income tax expense and depreciation and amortization. EBITDA margin is calculated by dividing EBITDA by total operating revenue. We present our EBITDA and EBITDA margin here to provide additional information regarding our operating performance and because our management believes EBITDA is useful to investors as a measure commonly used by securities analysts, investors and other interested parties in the evaluation of the performance of companies in the mining industry. EBITDA is not a standard measure under IFRS. EBITDA should not be considered in isolation or construed as an alternative to cash flows, net income or any other measure of performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities. EBITDA does not account for taxes, interest expense or other non-operating cash expenses. In evaluating EBITDA, we believe that investors should consider, among other things, the components of EBITDA such as turnover and operating expenses and the amount by which EBITDA exceeds capital expenditures and other charges.

SELECTED HISTORICAL OPERATING DATA

The following tables set forth selected operating data of each of our segments, after elimination of inter-segment sales, for the periods indicated:

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis in conjunction with our combined financial information set forth in the Accountants' Report included as Appendix I to this Prospectus, and our selected historical combined financial information and operating data and the notes thereto included elsewhere in this Prospectus. Our combined financial information has been prepared in accordance with IFRS.

The following discussion and analysis contains certain forward-looking statements that reflect our current views with respect to future events and financial performance. These statements are based on assumptions and analysis made by us in light of our experience and perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate under the circumstances. However, whether the actual outcome and developments will meet our expectations and predictions depends on a number of risks and uncertainties over which we do not have control. See "Risk Factors" and "Forward-looking Statements".

Overview

We are the second largest coal enterprise in China, the largest coal producing and consuming country in the world, in terms of our revenue in 2005. We operate our coal production and related businesses and services in the following segments to capitalize on growing domestic and international demand:

- *Coal operations.* We are the second largest coal supplier in China as measured by our revenue in 2005. Our raw coal output grew from 33.2 million tonnes in 2003 to 50.1 million tonnes in 2005, representing a CAGR of 22.8%. In 2005 and the six months ended 30 June 2006, we sold 92.2 million tonnes and 43.5 million tonnes of coal products, respectively, and generated revenue of RMB25,147.7 million and RMB11,761.0 million from coal operations, respectively, which accounted for 83.7% and 80.1%, respectively, of our total revenue in the same periods. In certain cases, we blend raw coal from our mines with raw coal supplied by other coal producers in order to meet customers' specifications. We also purchase coal from third party coal producers in China and resell it to domestic customers or to overseas customers through export agents on a proprietary trading basis, import coal from overseas coal producers as an agent, and provide coal export-related services on behalf of ChinaCoal Group for coal exporters in China who engage ChinaCoal Group as their export agent.

- *Coking operations.* Our coking operations include the production and sale of coke and coal-based chemicals generated from our coking process, such as coke gas, coke-gas power generation, refined tar, benzene, industrial refined naphthalene, methanol, sulfur, phenol and their derivative chemicals products. We also resell coke in domestic and overseas markets on a proprietary trading basis. In 2005 and the first six months of 2006, we generated revenue of RMB1,591.3 million and RMB1,012.4 million, respectively, in revenue from our coking operations, which accounted for 5.3% and 6.9%, respectively, of our total revenue in the same periods.

- *Coal mining equipment manufacturing operations.* We are the largest manufacturer of coal mining equipment in China based on our 2005 revenue from coal mining equipment sales and services. We also provide a full range of services ranging from design, production, installation, testing and services to underground mines within and outside China. In 2005 and the first six months of 2006, our revenue from coal mining equipment manufacturing operations was

RMB1,891.2 million and RMB971.9 million, respectively, which accounted for 6.3% and 6.6% respectively, of our total revenue in the same periods.

- *Other operations.* We engage in other operations in addition to our coal operations, coking operations and coal mining equipment manufacturing operations. The other operations include sales of primary aluminum and electric power, as well as provision of coal-related services such as coal mine design. In 2005 and the first six months of 2006, our revenue from these other operations was RMB1,431.1 million and RMB934.4 million, respectively, which accounted for 4.8% and 6.4%, respectively, of our total revenue in the same periods.

The table below presents, for the periods indicated, our revenue from segment operations after inter-segment elimination in terms of amount and as a percentage of our total revenue, as well as the underlying CAGR from 2003 to 2005:

	Year ended 31 December						CAGR	Six months ended 30 June			
	2003		2004		2005		(2003-2005)	2005		2006	
	(RMB million)	(%)	(RMB million)	(%)	(RMB million)	(%)	(%)	(RMB million)	(%)	(RMB million)	(%)
Revenue

Basis of Presentation

Our Company was established in the PRC on 22 August 2006 as a joint stock company with limited liability under the Company Law of the PRC as a result of a group reorganization of ChinaCoal Group. ChinaCoal Group was established in 1981 as a large state-owned enterprise administered directly under the SASAC. Prior to the establishment of our Company, mining and processing of coal, sales of coal and coke products and manufacturing and sales of coal mining equipment operations were carried out by companies wholly owned or controlled by ChinaCoal Group.

Pursuant to the Restructuring, our Company issued 8.0 billion ordinary domestic shares with par value of RMB1.00 per share to ChinaCoal Group in exchange for all subsidiaries now comprising our Company as well as the Transferred Businesses. The Transferred Businesses comprised mainly operations in relation to: (i) coal and coke production, including the mines in operations and under development as well as ChinaCoal Group's equity interests in certain mining companies and coking companies; (ii) trading of coal and coke to customers in the PRC and overseas; (iii) manufacturing and sales of coal mining machinery; and (iv) others (including, among others, power plants and a primary aluminum refinery).

In connection with the Restructuring, certain assets, liabilities and interests historically associated with the Predecessor Operations were not transferred to us and were retained by ChinaCoal Group. These assets, liabilities and interests are principally related to: (i) equity interests in certain coal gas, coke and coking coal operations and in certain coal-based chemicals manufacturing and sales operations; (ii) operations of the Mines under Restructuring; (iii) coal mine and civil engineering construction operations; (iv) coal bed methane development operations; (v) provision of coal export agency services and a small amount of coal trading and agency services businesses of certain overseas trading companies; (vi) community functions such as schools and hospitals; (vii) a small amount of investment in equity and some non-operational assets; and

(viii) other non-core operations including real estate and hotel development and management. For selected historical financial information relating to certain of the businesses retained by ChinaCoal Group, see Note 2 of the Accountants' Report in Appendix I to this Prospectus.

Since ChinaCoal Group controlled the business operations and the related assets that were transferred to us pursuant to the Restructuring, and continues to control us after the Restructuring, our historical combined financial information has been prepared as a combination of business under common control in a manner similar to a pooling-of-interests. Accordingly, the assets and liabilities transferred to us have been stated at historical carrying amounts. In addition to the Transferred Businesses, the historical combined financial information presented below also includes assets, liabilities and results of operations of certain of the businesses retained by ChinaCoal Group as part of the Restructuring. Although these assets, liabilities and interests retained by ChinaCoal Group were not transferred to us, they have been included in the historical combined financial information up to the effective date of the Restructuring, 22 August 2006, because they were an integral part of, or historically associated with, the Transferred Businesses.

The financial information presents the combined results and financial position of our Company as if the current structure of our Company had been in existence throughout the Track Record Periods and as if the Transferred Businesses were transferred to our Company by ChinaCoal Group at the beginning of the earliest period presented or when such businesses were incorporated or acquired by ChinaCoal Group, whichever is the shorter period.

Factors Affecting Our Results of Operations

Our combined financial statements and this discussion present our results of operations as if:

- we had been in existence throughout the relevant periods; and
- our operations and businesses were transferred to us as of 1 January 2003 and were conducted by us throughout the three-year period ended 31 December 2005 and the six months ended 30 June 2006.

Our results of operations and the period-to-period comparability of our financial results are affected by a number of external factors. Our combined financial statements may not be indicative of our future earnings, cash flows or financial position for numerous reasons, including those described below.

Average selling prices of our coal products

We sell our thermal and coking coal products to customers in China and abroad. The average selling prices of our coal products during the Track Record Period are as follows:

	Year ended 31 December						Six months ended 30 June	
	2003		2004		2005		2006	
	Domestic	Export	Domestic	Export	Domestic	Export	Domestic	Export
	(RMB/tonne)							
Thermal coal	163	244	242	340	288	465	301	403
Coking coal	322	313	473	649	626	925	577	945

The main factors affecting the prices of our thermal and coking coal products include:

- the supply of and demand for thermal coal and coking coal in the PRC domestic market and in the Asia-Pacific regional coal market;

- coal characteristics and quality;
- the availability of coal transportation capacity and the means of transportation; and
- the PRC Government's policy regarding coal-consuming industries.

Domestic coal prices have been mainly market driven since 2002, when the PRC Government eliminated the price control measures for coal used in electric power generation. Prior to 2006, however, the PRC Government continued to implement temporary measures to intervene and control unusual fluctuations in thermal coal prices. This, among other reasons, has caused thermal coal contract prices for major users to be generally lower than spot market prices during the period. On 27 December 2005, the NDRC announced the elimination of such temporary thermal coal price intervention practices, thus completely removing control over thermal coal prices, including contract prices for major users.

Sales volume of coal

The sales volume of our coal, which consists of our coal products, coal sold on a proprietary trading basis and coal sold on an agency basis, to external customers increased by 1.1% from 79.2 million tonnes in 2003 to 80.1 million tonnes in 2004, and by a further 15.0% to 92.2 million tonnes in 2005. In the first six months of 2006, we sold a total of 43.5 million tonnes of coal, representing a 0.1% decrease from 43.6 million tonnes of coal we sold in the comparable period of 2005. The main factors affecting our domestic and export coal sales volumes include:

- our coal production capacity;
- market demand for our coal;
- the export quota allocated to ChinaCoal Group by the PRC Government; and
- coal transportation capacity.

Our coal sales volume is largely dependent upon the demand for our coal and our ability to meet such demand. To meet an increasing market demand, we have significantly increased production at all our mines. In the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006, we sold 37.3 million tonnes, 46.9 million tonnes, 51.0 million tonnes, 23.4 million tonnes and 26.2 million tonnes of our coal products, respectively. Growth in the production and sales volumes of our coal products is largely driven by our capital investment in the expansion of existing mines and construction of new mines.

We currently focus on the production of a wide range of thermal coal and coking coal products for use in power generation and steel-making, respectively. We sell our coal mainly to coal-fired power plants and steel mills in the domestic market in China and the Asia-Pacific coal export market. Rapid growth in the PRC economy has created substantial energy demand in China. At the same time, coal demand from the Asia-Pacific region has also increased due to economic expansion and the addition of new coal-fired power generation capacity in the region.

We also purchase coal for proprietary trading purposes. In the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006, our coal sales on a proprietary trading basis were 16.2 million tonnes, 10.0 million tonnes, 21.1 million tonnes, 10.5 million tonnes and 7.3 million tonnes, respectively. We were also involved in the export of 22.9 million tonnes, 21.8 million tonnes, 18.5 million tonnes, 8.9 million tonnes and 8.6 million tonnes, respectively, in the same periods on an agency services basis. Our agency services revenue generally ranged from 1.5% to 2.0% of the corresponding sales on an FOB basis.

Coal export is subject to annual national quotas prescribed by the NDRC and MOFCOM. In 2003, 2004, 2005 and 2006, the national export quota totaled 100.0 million tonnes, 80.0 million tonnes, 80.0 million tonnes and 80.0 million tonnes, respectively. In 2003, 2004, 2005 and 2006, 49.6 million tonnes, 36.2 million tonnes, 38.2 million tonnes and 38.2 million tonnes, respectively, of the national coal export quotas were allocated to ChinaCoal Group, accounting for nearly 50% of China's coal export quotas in each of the relevant periods. Among the export quotas allocated to ChinaCoal Group, 14.0 million tonnes, 15.2 million tonnes, 11.5 million tonnes and 4.4 million tonnes were allocated, respectively, to us for the export of our coal products during the same periods. See "Regulations — The coal industry — Coal trading" for details regarding export quota of coal imposed by the PRC Government.

We generally use the national railway system to transport coal to our customers and major coal shipping ports along the eastern coast of China. We expect that increases in our coal sales volume will continue to be the main driver for our revenue growth in the future. Such increases, however, may be affected by the availability of sufficient transport capacity on the national railway system allocated to us by the PRC Government.

Cost of sales for coal

Cost of sales for coal include: (i) materials costs, including coal, fuel and utilities and accessories, used mainly in mining operations; (ii) transportation costs; (iii) staff costs; (iv) depreciation and amortization expenses; and (v) maintenance expenses for our facilities and equipment. The following factors will impact the cost of sales of our coal operations:

- the effectiveness of our cost reduction measures;
- the effect of economies of scale as we improve the capacity utilization of our own mining operations;
- the application of advanced mining technologies; and
- contractual terms of delivery (e.g., ex-mine sales, FOB or CIF) of our coal products.

In addition, on the same quality basis, the unit cost of coal purchased from third parties are generally higher than the unit cost of coal from our own mines. Furthermore, upward market price movements and purchase volumes of high-quality coal from third party producers will also impact our cost of sales.

Finance costs

We finance a significant portion of our business operations and capital projects with short-term and long-term borrowings. As of 30 June 2006, our outstanding short-term and long-term borrowings amounted to RMB11,619.7 million. See "— Indebtedness". Our borrowings incur interest. Interest rate fluctuations and the balance of our total borrowings will have an impact on our finance costs.

We borrowed funds denominated in foreign currencies, including U.S. dollars and Japanese Yen, through commercial banks, mostly to meet our foreign exchange needs as well as to fund a portion of our capital expenditures. To the extent that the Renminbi depreciates against any of these currencies, our finance costs on these loans would increase. As of 30 June 2006, our foreign currencies borrowings, primarily denominated in Japanese Yen, amounted to RMB2,121.5 million. We incurred net foreign exchange losses of RMB345.1 million and RMB83.4 million, respectively, in 2003 and 2004, and had a net foreign exchange gain of RMB391.5 million in 2005. We had a net foreign exchange gain of RMB155.1 million and incurred a net foreign exchange loss of RMB28.0 million, respectively, for the six months ended 30 June 2005 and 2006.

These changes were mainly caused by fluctuations in the value of the Japanese Yen in recent years. See "— Market risk".

Anticipated capital expenditures

We intend to spend approximately RMB20.6 billion as capital expenditures from 2006 through 2008 primarily to expand the production capacity of our coal, coking, and coal mining equipment manufacturing operations and other operations to upgrade our existing mines, coal processing plants and other production facilities, to make improvements to our coal mining operations, and to undertake other projects. The costs associated with these expansion and improvement plans and the revenue we expect to derive from them could have a significant impact on our future consolidated financial statements. See "— Capital expenditures".

The Restructuring conducted in anticipation of the Global Offering

Prior to the Restructuring conducted in anticipation of this Global Offering, we did not exist as a separate legal entity. Our operations were conducted by ChinaCoal Group and its predecessors. As part of the Restructuring, ChinaCoal Group transferred to us substantially all of the assets, liabilities and interests of its coal operations, coking operations, coal mining equipment manufacturing operations and other operations, including twelve coal mines, five coking plants, four coal mining equipment manufacturing plants and two coal mine design institutes. Because ChinaCoal Group controlled these operations prior to the Restructuring and controls us after the Restructuring, our historical combined financial information included in this Prospectus have been prepared as a combination under common control in a manner similar to a pooling-of-interests. Accordingly, the assets and liabilities transferred to us have been stated at historical amounts in the combined financial statements. The combined financial information present the results of our operations as if our operations had already been transferred to us from ChinaCoal Group as of 1 January 2003. In addition, our combined financial statements also include assets, liabilities, and results of operations of certain of the businesses and assets historically associated with predecessor operations retained by ChinaCoal Group in the Restructuring. Businesses retained by ChinaCoal Group include: (i) equity interests in certain coal gas, coke and coking coal operations and in certain coal-based chemicals manufacturing and sales operations; (ii) operations of the Mines under Restructuring; (iii) coal mine and civil engineering construction operations; (iv) coal bed methane development operations; (v) provision of coal export agency services and a small amount of coal trading and agency services businesses of certain overseas trading companies; (vi) community functions such as schools and hospitals; (vii) a small amount of investment in equity and some non-operational assets; and (viii) other non-core operations including real estate and hotel development and management. Certain of these assets, liabilities, revenue and expenses will not be reflected in our consolidated financial statements after the Restructuring Date. In addition, because of the asset restructuring and the related carve-out accounting, the combined financial statements reflect various historical payments as distributions to ChinaCoal Group that are not expected to be indicative of future practices or results. See Note 2 of the Accountants' Report included as Appendix I to this Prospectus.

Description of Components of Results of Operations

Revenue

We generate all of our revenue from coal operations, coking operations, coal mining equipment manufacturing operations as well as other businesses and services including coal mine design services. Our revenue are presented net of inter-segment sales and other inter-company transactions. The table below presents, for the periods indicated, our revenue from operations in terms of amount and as a percentage of our total operating revenue:

	Year ended 31 December						CAGR	Six months ended 30 June			
	2003		2004		2005		(2003-2005)	2005		2006	
	(RMB million)	(%)	(RMB million)	(%)	(RMB million)	(%)	(%)	(RMB million)	(%)	(RMB million)	(%)
Revenue											
Coal operations	11,656.7	80.5	17,733.0	80.0	25,147.7	83.7	46.9	12,600.1	83.9	11,761.0	80.1
Coking operations	1,064.9	7.4	2,039.2	9.2	1,591.3	5.3	22.2	938.6	6.3	1,012.4	6.9
Coal mining equipment operations	1,057.9	7.3	1,479.4	6.7	1,891.2	6.3	33.7	889.1	5.9	971.9	6.6
Other operations	701.2	4.8	912.2	4.1	1,431.1	4.8	42.9	584.1	3.9	934.4	6.4
Total revenue	14,480.8	100.0	22,163.8	100.0	30,061.3	100.0	44.1	15,011.9	100.0	14,679.7	100.0

We derived the majority of our revenue from our coal operations, historically our largest revenue contributing segment. Our coal operations generate revenue through sales of coal products produced at our four mining areas and stand-alone coal processing plants, and coal trading businesses, consisting of proprietary coal trading, export-related services and import agency services.

We also generated revenue during the Track Record Period from sales of coke and coal-based chemicals produced at our coking facilities. In addition, revenue was derived from sales of coke in domestic and overseas markets on a proprietary trading basis.

Revenue from our coal mining equipment manufacturing operations mainly includes sales of coal mining equipment manufactured by our three coal mining equipment manufacturing plants. In addition, we derive sales revenue from the provision of turn-key services for installation of coal mining equipment.

We also receive revenue from other operations, mainly including sales of primary aluminum produced at our refinery, electric power generated from our own coal-fired power plants, and the provision of coal mine design services to major coal mining companies in China.

Our revenue on a combined basis is presented after elimination of inter-segment sales. As a result, only income generated from sales made to external customers are accounted for as our revenue in our combined results of operations. For the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006, the inter-segment sales revenue amounted to RMB291.1 million, RMB486.9 million, RMB542.1 million, RMB280.9 million and RMB366.2 million, respectively, representing 2.0%, 2.2%, 1.8%, 1.9% and 2.5%, respectively, of our total revenue including external and inter-segment sales. Our inter-segment sales revenue was mainly derived from (i) sales of our coal products from coal operations segment to our coking facilities and power plants; (ii) sales of coal mining equipment from coal equipment manufacturing segment to our coal mines at the Pingshuo and Datun Mining Areas; and (iii) the provision of coal mine design services from our other operations segment to our coal mines.

Gross profits

Our gross profits on a combined basis are presented after elimination of inter-segment sales and cost of sales by deducting the cost of sales from our revenue of each accounting period. Our gross profits before

elimination of inter-segment transactions amounted to RMB1,729.7 million, RMB4,639.6 million, RMB5,631.5 million, RMB3,598.1 million and RMB3,010.7 million, for the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006, respectively, a difference of RMB11.6 million, RMB19.7 million, RMB8.0 million, RMB5.1 million and RMB33.1 million, respectively, for the same periods if the inter-segment transactions had been taken into account.

Cost of sales

Cost of sales represents the direct costs of production, which includes primarily materials costs, staff costs, depreciation and amortization expenses, repair and maintenance costs, transportation costs, sales taxes and surcharges. The following table breaks down our cost of sales for the periods indicated:

	Year ended 31 December						Six months ended 30 June			
	2003		2004		2005		2005		2006	
	(RMB million)	(%)	(RMB million)	(%)	(RMB million)	(%)	(RMB million)	(%)	(RMB million)	(%)
Cost of sales

Sales taxes and surcharges	89.6	0.7	187.2	1.1	288.2	1.2	139.1	1.2	174.9	1.5
Others	446.2	3.5	933.9	5.3	1,546.8	6.3	714.6	6.3	749.7	6.4
Total cost of sales	12,762.7	100.0	17,544.0	100.0	24,437.8	100.0	11,418.9	100.0	11,635.9	100.0

Materials costs were the main component of our cost of sales, representing approximately 69.1%, 60.8%, 66.4%, 65.3% and 61.3%, respectively, of our total cost of sales for each of the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2005 and 2006. Materials used in our coal operations mainly include coal, cement, steel and explosives. Materials used in our coking operations mainly include coal and coke purchased for resale purposes. Materials used in our coal mining equipment manufacturing operations mainly include steel and other raw materials used in the production of coal mining machinery.

Transportation costs were also a large contributor to our cost of sales. Transportation costs mainly include railway, waterway and roadway transportation expenses charged by carriers who deliver our coal and coke products to end customers. Sales on an FOB or CIF basis typically result in higher transportation costs than other terms of sales, such as ex-mine sales, as we are responsible for the transportation costs for delivering the goods to the port or the customers' sites.

Staff costs were also a significant component of our cost of sales during the Track Record Period. They are comprised mainly of wages for our employees working at the coal mines, coal processing plants, coking plants, coal mining equipment manufacturing facilities and other production facilities.

During the Track Record Period, our costs of sales also included other expenses, such as stripping costs, utilities expenses, resources compensation fees and compensation for land sinking.

Our costs of sales on a combined basis are presented after elimination of inter-segment transactions. As a result, only the cost of sales incurred from purchases of goods or services from external suppliers is accounted as cost in our combined results of operations. For the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2005 and 2006, the cost incurred from inter-segment sales amounted to RMB279.4 million, RMB467.1 million, RMB534.0 million, RMB275.8 million and RMB399.3 million, respectively, representing 2.2%, 2.7%, 2.2%, 2.4% and 3.4%, respectively, of our total cost of sales including cost of external and inter-segment purchases. The inter-segment cost of sales was mainly from (i) purchases

of coal mining equipment by our coal operations segment from coal mining equipment manufacturing segment; (ii) procurement of coal mine design services from our other operations segment by our coal operations segment; and (iii) purchases of our coal products from coal operations segment by our coking facilities in the coking operations segment and power plants of our other operations.

Selling, general and administrative expenses

Our selling, general and administrative expenses primarily consist of personnel expenses, depreciation and amortization costs, repairs and maintenance, operating lease charges, public utility charges, allowance for doubtful debts, entertainment and traveling expenses and other miscellaneous expenses. The largest component of our selling, general and administrative expenses is personnel expenses, which were mainly wages paid to our employees not directly involved in the production operations in our coal mines and production facilities. Personnel expenses represented 46.4%, 52.2%, 46.6%, 56.6% and 51.7%, respectively, of our total selling, general and administrative expenses for each of the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006.

Other gains

Other gains are composed of dividend income from unlisted investments, gains on disposal of investments, interest income and government grants and subsidies.

Other operating income, net

Other operating income net of other operating expenses consists of other operating income less other operating expenses. Other operating income consists of sales of surplus of raw materials and components, rental, agency fee relating to non-core products, transportation and other service income. Other operating expenses mainly include the costs directly relate to other operating income.

Finance costs

Finance costs consist of financing payments on (i) interests of bank loans and other borrowings less capitalized interest, (ii) applicable bank charges and (iii) net foreign exchange losses or gains.

Share of profits/(losses) of associates

Our share of losses of associates is the profits/(losses) attributable to us from our associates, pursuant to our equity interests in such associates. Associates are entities over which we have significant influence but not control, in which generally we hold between 20% and 50% of the voting rights. Investments in associates are accounted for by the equity method of accounting and are initially recognized at cost.

Income tax expenses

Under the current laws of the PRC, we, our subsidiaries, associates and jointly controlled entities are subject to PRC income tax on an individual basis. The normal statutory PRC enterprise income tax rate is 33% of taxable income as determined in accordance with the relevant PRC income tax laws and regulations. However, PRC state and local tax laws provide for a number of preferential tax treatments applicable to different enterprises, industries and locations. The effective income tax rates applicable to us for each of the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006 were 28.1%, 23.1%, 17.6%, 19.7% and 29.8%, respectively.

Critical Accounting Policies

The discussion and analysis of our results of operations and financial condition is based on our audited combined financial information, which have been prepared in accordance with IFRS. Our results of operations and financial condition are sensitive to accounting methods, assumptions and estimates that underlie the preparation of our combined financial information. We base our assumptions and estimates on historical experience and on various other assumptions that we currently believe to be reasonable and which form the basis for making judgments about matters that are not readily apparent from other sources. Our management evaluates these estimates on an ongoing basis. Actual results may differ from these estimates as facts, circumstances and conditions change or as a result of different assumptions.

Our management considers the following factors in reviewing our combined financial information:

- the selection of critical accounting policies; and
- the judgments and other uncertainties affecting the application of those critical accounting policies.

The selection of critical accounting policies, the judgments and other uncertainties affecting application of those policies and the sensitivity of reported results to changes in conditions and assumptions are factors to be considered when reviewing our audited combined financial information. Our principal accounting policies are set forth in detail in Note 3 of the Accountants' Report included as Appendix I to this Prospectus. We believe the following critical accounting policies involve the most significant judgments and estimates used in the preparation of our audited combined financial information.

Carrying value of non-current assets

Non-current assets, including property, plant and equipment, land use rights, mining rights and intangible assets, are carried at cost less accumulated amortization. These carrying amounts are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. In estimating the recoverable amounts of assets, various assumptions, including future cash flows to be associated with the non-current assets and discount rates, are made. If future events do not correspond to such assumptions, the recoverable amounts will need to be revised and may impact our results of operations or financial position.

Useful lives of property, plant and equipment

Our management determines the estimated useful lives and related depreciation charges for property, plant and equipment. This estimate is based on the historical experience of the actual useful lives of property, plant and equipment having a similar nature and function. It could change significantly as a result of technical innovations and competitor actions in response to severe industry cycles. Management will increase the depreciation charges where useful lives are less than previously estimates, or it will write-off or write-down technically obsolete or non-strategic assets that have been abandoned or sold.

Trade and other receivables

Our management determines the provision for impairment of trade and other receivables. This estimate is based on the credit history of our customers and current market conditions. Management reassesses the provision at each balance sheet date.

Income taxes

There are certain transactions and calculations for which the ultimate tax determination is uncertain until the end of relevant period. We recognize liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax expense and deferred tax provisions in the period in which such determination is made. In addition, the realization of future income tax assets is dependent on our ability to generate sufficient taxable income in future years to utilize income tax benefits and income tax loss carry-forwards. Deviations of future profitability from estimates would result in adjustments to the value of future income tax assets and liabilities that could have a significant effect on earnings.

Provision for close-down, restoration and environmental costs

The provision for close down, restoration and environmental costs for our coal mining operations is determined by our management based on their past experience and best estimation of future expenditures, after taking into account existing relevant PRC regulations. However, in so far as the effect on the land and the environment from current mining activities becomes apparent in future years, the estimate of the associated costs may be subject to revision from time to time.

Combined Results of Operations

The following table sets forth, for the periods indicated, information relating to certain income and expense items from our combined income statement:

	Year ended 31 December						Six months ended 30 June			
	2003		2004		2005		2005		2006	
	RMB million	%	RMB million	%	RMB million	%	RMB million	%	RMB million	%
	(audited)		(audited)		(audited)		(unaudited)		(audited)	
IFRS										
Revenue	14,480.8	100.0	22,163.8	100.0	30,061.3	100.0	15,011.9	100	14,679.7	100

Six months ended 30 June 2006 compared with six months ended 30 June 2005

Revenue

Our total revenue after elimination of inter-segment sales decreased by 2.2% from RMB15,011.9 million in the six months ended 30 June 2005 to RMB14,679.7 million in the six months ended 30 June 2006. This decrease was attributable to a decrease of RMB839.1 million in revenue from our coal operations, partially offset by an increase in revenue of RMB73.8 million from our coking operations, an increase in revenue of RMB82.8 million from our coal mining equipment manufacturing operations and an increase in revenue of RMB350.2 million from our other operations.

Total revenue generated from external sales of our coal operations decreased from RMB12,600.1 million in the six months ended 30 June 2005 to RMB11,761.0 million in the six months ended 30 June 2006. This decrease was mainly attributable to the decrease in revenue from coal exports and proprietary coal trading, partially offset by the increase in revenue from domestic sales of our coal products.

Exports of our coal products sold to external customers decreased from 6.4 million tonnes in the six months ended 30 June 2005 to 4.4 million tonnes in the six months ended 30 June 2006, mainly because the average market prices for coal exports in the same period were less favorable to coal producers than in the previous period. As a result, we reduced our coal export volumes and focused instead on the domestic market. Consequently, the total revenue from export sales of our coal products decreased from RMBR2,972.4 million in the six months ended 30 June 2005 to RMB1,863.2 million in the six months ended 30 June 2006.

The volumes of coal sold to external customers on a proprietary trading basis decreased significantly. The volumes of our coal sold on a proprietary trading basis decreased from 10.5 million tonnes in the six

months ended 30 June 2005 to 7.3 million tonnes in the six months ended 30 June 2006, mainly because of the increase in the production capacity and coal output of our coal mines, which enabled us to satisfy our customers' needs with our coal products. In addition, the decrease of export sales price of coal we sold on a proprietary trading basis in the six months ended 30 June 2005 compared to the six months ended 30 June 2006 was attributed to the decreases of revenue from proprietary coal trading, although this decrease was partially offset by the increase in the average selling price of coal we sold in the domestic market on a proprietary trading basis in the same period.

In the six months ended 30 June 2006, we sold approximately 26.2 million tonnes of our coal products in China to external customers, compared to approximately 23.4 million tonnes in the six months ended 30 June 2005, representing an increase of 12.0%. The increase in sales volume was due primarily to the increase in production capacity and coal output of our coal mines and coal processing plants. In particular, our newly constructed Anjialing Underground Mine produced 6.6 million tonnes of raw coal in the six months ended 30 June 2006. In addition, the price of our coal products increased in the six months ended 30 June 2006 compared to the six months ended 30 June 2005, which also attributed to the increases of revenue from domestic sales of our coal products.

Our total revenue from coking operations increased by 7.9% from RMB938.6 million in the six months ended 30 June 2005 to RMB1,012.4 million in the six months ended 30 June 2006. This increase was due primarily to the increase in domestic sales volume, which was partially offset by the decrease in prices in international markets.

Domestic sales of coke increased significantly by 215.0% from 200,000 tonnes in the six months ended 30 June 2005 to 630,000 tonnes in the six months ended 30 June 2006, primarily due to increased market demand and the commencement of commercial production of two of our coking facilities, namely the Jiuxin Plant and the Jinda Plant, in late 2005. However, the average selling price of our coke products in the domestic market decreased by 9.9% from RMB1,072.7 per tonne in the six months ended 30 June 2005 to RMB966.4 per tonne in the six months ended 30 June 2006. Although we began to change our product mix in the first six months of 2006 and our unit price of foundry coke, our new product, is relatively higher, there has not yet been an increase in average selling prices because we are still in the initial stages for the production of such product. As a result, our revenue generated from domestic sales of coke increased by 183.8% from RMB215.1 million in the six months ended 30 June 2005 to RMB610.3 million in the six months ended 30 June 2006.

Our export sales of coke products remained relatively stable in the six months ended 30 June 2005 and 2006, but the average selling price decreased as a result of unfavorable market conditions for coke producers. As a result, our revenue generated from export sales of coke decreased by 44.4% from RMB723.5 million in the six months ended 30 June 2005 to RMB402.1 million in the six months ended 30 June 2006.

Total revenue generated from the external sales of our coal mining equipment manufacturing operations was RMB889.1 million in the six months ended 30 June 2005 and RMB971.9 million in the six months ended 30 June 2006. This increase was mainly attributable to an increase in prices as well as an increase in sales as a result of the improved market environment of the coal industry, which stimulated demand for our mining equipment. Rollout of our high end and high quality line of products also enabled us to achieve higher pricing, both of which led to the growth in our revenue from coal mining equipment manufacturing operations.

Revenue from external sales of our other businesses increased by 60.0% from RMB584.1 million in the six months ended 30 June 2005 to RMB934.4 million in the six months ended 30 June 2006. This increase was

mainly due to the increase in revenue from sales of primary aluminum from our new aluminum refinery, and from our coal mine design services to external customers.

Cost of sales

The cost associated with external sales increased slightly by 1.9% from RMB11,418.9 million in the six months ended 30 June 2005 to RMB11,635.9 million in the six months ended 30 June 2006. This increase was mainly due to an increase in staff costs, depreciation and amortization costs, transportation costs and other costs from our coal operations and our other segments, partially offset by the decrease in raw materials costs for our coal operations.

Our materials costs decreased by 4.3% from RMB7,456.2 million in the six months ended 30 June 2005 to RMB7,134.0 million in the six months ended 30 June 2006. The decrease was primarily due to a decrease in volumes of coal purchased from third parties.

Our staff costs increased by 22.6% from RMB562.3 million in the six months ended 30 June 2005 to RMB689.4 million in the six months ended 30 June 2006, mainly caused by the increase in staff costs incurred by our coal and coking operations. The increase in staff costs was mainly attributable to the commercial operation of our newly developed coal mines, coal processing plants and coking facilities.

Our depreciation and amortization costs increased by 30.1% from RMB403.4 million in the six months ended 30 June 2005 to RMB524.7 million in the six months ended 30 June 2006, mainly caused by the increase in depreciation and amortization costs incurred by our coal and coking operations. The increase in depreciation and amortization costs was mainly attributable to the commercial operations of our newly developed coal mines, coal processing plants and coking facilities.

Our transportation costs increased by 8.8% from RMB2,082.2 million in the six months ended 30 June 2005 to RMB2,265.6 million in the six months ended 30 June 2006, mainly caused by the increase in transportation costs for our coal operations. The increase in transportation costs for our coal operations was mainly attributable to the increase in coal products that were delivered to our customers through railways and roadways. However, the increase in transportation costs was partially offset by the increase in ex-mine sales that incurs less transportation costs and the decrease in port fees due to the decrease in coal export volumes.

Gross profit

As a result of the foregoing, our gross profit generated from external transactions decreased by 15.3% from RMB3,593.0 million in the six months ended 30 June 2005 to RMB3,043.8 million in the six months ended 30 June 2006. Our gross profit margin generated from external transactions decreased from 23.9% in the six months ended 30 June 2005 to 20.7% in the six months ended 30 June 2006.

Selling, general and administrative expenses

Our selling, general and administrative expenses increased by 14.3% from RMB731.3 million in the six months ended 30 June 2005 to RMB835.8 million in the six months ended 30 June 2006, mainly due to the expansion of operations in each of our operating segments, which resulted in an increase in personnel expenses, maintenance expenses, marketing and sales expenses and utility charges.

Other gains

Our other gains increased by 98.1% from RMB44.2 million in the six months ended 30 June 2005 to RMB87.5 million in the six months ended 30 June 2006. This increase in other gains was mainly due to: (i) an

increase in government grants and subsidies from RMB5.0 million in the six months ended 30 June 2005 to RMB24.5 million in the six months ended 30 June 2006; and (ii) an increase in dividend income, representing our investments, from RMB4.3 million in the six months ended 30 June 2005 to RMB20.2 million in the six months ended 30 June 2006.

Other operating income, net

Our other operating net income includes other operating income less other operating expenses. Our other operating income net of other operating expenses increased by 14.7% from RMB93.7 million in the six months ended 30 June 2005 to RMB107.5 million in the six months ended 30 June 2006. This increase was due primarily to (i) an increase in transportation income resulting from the increased volume of transportation services we provided to our customers, and (ii) the increases from sales of scraps due to the increases of price and sales volume caused by the increase of market demands.

Finance costs

Our interest expenses relating to bank loans, loans from other financial institution and loans from related parties increased from RMB201.3 million in the six months ended 30 June 2005 to RMB269.0 million in the six months ended 30 June 2006. After deducting interest on the amounts capitalized for construction in progress, our interest expenses increased from RMB155.8 million for the six months ended 30 June 2005 to RMB238.6 million for the six months ended 30 June 2006. In addition, in the six months ended 30 June 2006, we incurred net foreign exchange losses of RMB28.0 million, compared to net foreign exchange gains of RMB155.1 million in the six months ended 30 June 2005. Consequently, our finance costs increased significantly by RMB267.9 million from RMB23.7 million in the six months ended 30 June 2005 to RMB291.5 million in the six months ended 30 June 2006.

Share of profits/(losses) of associates

We incurred share of losses of associates of RMB1.2 million in the six months ended 30 June 2006, compared to share of profits of associates of RMB3.1 million in the six months ended 30 June 2005. Certain of our associate companies recorded less profit or more loss in the six months ended 30 June 2006 compared to the six months ended 30 June 2005. China Coal & Coke Xuyang Limited, our 45% owned associate, generated substantial profit in the six months ended 30 June 2005 from its sales of coke products in the China domestic market, its main revenue source, thus offsetting some losses from other associate companies and contributing to the RMB3.1 million profits of associates in the six months ended 30 June 2005. However, China Coal & Coke Xuyang Limited generated less profit in the first six months of 2006 due to an increase in supply of comparable coke products in the market and therefore increased competition. The decreased profit was insufficient to offset losses from other associate companies, resulting in a share of losses of associates of RMB1.2 million in the six months ended 30 June 2006.

The profits we generated from our investments in China Coal & Coke Xuyang Limited partially offset the losses we incurred from our investment in other associates.

Income tax expenses

Our income tax expense increased by 7.0% from RMB586.9 million in the six months ended 30 June 2005 to RMB627.9 million in the six months ended 30 June 2006. Although we continued to benefit from the preferential tax rates enjoyed by some of our subsidiaries and jointly controlled entities, several of our subsidiaries and jointly controlled entities incurred more tax expenses due to changes in, or termination of,

preferential tax treatments in the six months ended 30 June 2006. As such, our effective income tax rate increased from 19.7% in the six months ended 30 June 2005 to 29.8% in the six months ended 30 June 2006.

Profit for the period

As a result of the foregoing, our profit for the period in the six months ended 30 June 2006 decreased by 38.0% or RMB909.6 million, from RMB2,392.0 million in the six months ended 30 June 2005 to RMB1,482.4 million in the six months ended 30 June 2006.

Minority interests

Minority interests decreased by 30.5% from RMB213.0 million in the six months ended 30 June 2005 to RMB148.0 million in the six months ended 30 June 2006. The decrease in minority interests was primarily due to: (i) the decrease of the net profit of Shanghai Datun Energy due to the commencement of commercial operation of its new primary aluminum plant, which resulted in lower gross profit margin of Shanghai Datun Energy than the comparable period in 2005, and (ii) the decrease of net profit of certain of our coking plants operated by China Coal and Coking Holdings Limited due to intensive competition in the coking industry.

Profit attributable to equity holders

Profit attributable to equity holders decreased by 38.8% from RMB2,179.0 million in the six months ended 30 June 2005 to RMB1,334.4 million in the six months ended 30 June 2006.

Year ended 31 December 2005 compared with year ended 31 December 2004

Revenue

Our total revenue after elimination of inter-segment sales increased by 35.6%, from RMB22,163.8 million in the year ended 31 December 2004 to RMB30,061.3 million in the year ended 31 December 2005. This increase was attributable to an increase of RMB7,414.7 million in revenue from our coal operations, an increase of RMB411.8 million in revenue from our coal mining equipment manufacturing operations and an increase of RMB518.9 million in revenue from our other operations, partially offset by a decrease of RMB447.9 million in revenue from our coking operations.

Total revenue generated from external sales of our coal operations increased by 41.8% from RMB17,733.0 million in the year ended 31 December 2004 to RMB25,147.7 million in the year ended 31 December 2005. The increase was attributable to the increase in revenue generated from sales of coal products and from coal trading due to strong market demand, as well as to the expansion of our production capacity and output. Revenue from our export sales of coal products remained at the same level in 2005 compared to 2004, as the impact from increased average selling price in the export market was offset by the decrease in sales volume.

In the year ended 31 December 2005, we sold approximately 39.5 million tonnes of our coal products in China to external customers, compared to approximately 31.7 million tonnes in the year ended 31 December 2004, representing an increase of 24.6%. The increase in sales volume was primarily due to the expanded production capacity and the increased output of our coal mines and coal processing plants. In particular, our newly constructed Anjialing Underground Mine produced 8.7 million tonnes of raw coal in 2005. Strong market demand resulting from the continuous growth in China's economy, particularly in the power generation, metallurgical, construction materials and chemicals sectors, also contributed to the increase in our coal sales volume. In addition, the average domestic selling price of our coal products increased from RMB257

per tonne to RMB308 per tonne, further contributing to the increase in our total revenue derived from coal sales. The increase in coal sales prices in 2005 was primarily attributable to the continuous increase in coal consumption in recent years resulting from economic growth and the increase in prices of other energy sources such as oil and natural gas.

Although there was a strong demand for coal in the export markets in 2005, the amount of coal products we exported for sale to external customers decreased from 15.2 million tonnes in the year ended 31 December 2004 to 11.5 million tonnes in the year ended 31 December 2005. This decrease was mainly the result of the reduction in the export quota we carried forward from 2004 to 2005 than from 2003 to 2004. See "Regulations — The coal industry — Coal trading". However, the significant increase in the average selling prices in the export coal market due to strong coal demand from neighboring countries and territories of China caused the total revenue from export sales of our coal products in 2005 to remain at approximately the same level as in 2004. For example, the average selling price of our thermal coal in the export market was RMB465 per tonne in 2005, compared to RMB340 per tonne in 2004.

Due to strong market demand, we also increased the trading volume of our proprietary coal trading businesses for sale to external customers by 11.1 million tonnes in 2005 to meet the needs of both our long-term and new customers. Our dominant position in China's coal trading market and ability to secure coal supply sources were further enhanced by the significant increase in our proprietary coal trading volume. In addition to the increase in trading volume, the average selling price of coal sold in the domestic market on a proprietary trading basis increased from RMB287 per tonne in 2004 to RMB307 per tonne in 2005, which further contributed to the increase in total revenue from our proprietary coal trading business. The average selling price of coal sold in the export market on a proprietary trading basis increased from RMB612 per tonne in 2004 to RMB627 per tonne in 2005.

Total revenue from the external sales of our coal mining equipment manufacturing operations increased by 27.8% from RMB1,479.4 million in the year ended 31 December 2004 to RMB1,891.2 million in the year ended 31 December 2005. This increase was mainly due to the increase in sales of coal mining equipment to our external customers. This is attributable to improved market conditions, strong demand for our products as well as our ability to achieve higher prices following the rollout of our high-end and high-quality coal mining equipment.

Revenue from external sales of our other businesses increased by 56.9% from RMB912.2 million in the year ended 31 December 2004 to RMB1,431.1 million in the year ended 31 December 2005. This increase was mainly due to the increase in revenue from coal mine design services to external customers and our other segment and sales of primary aluminum from our new refinery.

Total revenue generated from external sales of our coking operations decreased by 22.0% from RMB2,039.2 million in the year ended 31 December 2004 to RMB1,591.3 million in the year ended 31 December 2005. This decrease was primarily due to the decrease in revenue from export sales, most of which related to proprietary coke trading, partially offset by an increase in revenue from domestic sales, most of which related to coke we produced at our coking facilities. Export sales volumes and average selling prices of our coke products decreased in 2005. As a result of the reduced export quota allocated to ChinaCoal Group by the PRC Government, our export sales volume decreased 13.4% from 760,000 tonnes in 2004 to 660,000 tonnes in 2005. The average selling price of coke we sold in the export market (including coke produced by us and coke sold on a proprietary trading basis) decreased by 35.8% from RMB2,377 per tonne in 2004 to RMB1,526 per tonne in 2005, primarily due to the increased international supply of comparable coke products

and the corresponding price stabilization in the export market. As a result, our revenue generated from export sales of coke decreased by 44.4% from RMB1,805.6 million in 2004 to RMB1,004.0 million in 2005.

In the domestic market, sales volume of our coke products increased by 184.5% from 230,000 tonnes in the year ended 31 December 2004 to 640,000 tonnes in the year ended 31 December 2005, primarily due to strong market demand and the commencement of commercial production of two of our coking facilities, namely the Jiuxin Plant and the Jinda Plant, in 2005. The average selling price of coke we sold in the domestic market (including coke produced by us and coke sold on a proprietary trading basis) decreased by 11.6% from RMB1,036 per tonne in 2004 to RMB915 per tonne in 2005, mainly due to the increased in coke supply and competition in the domestic market. As a result, our revenue generated from domestic sales of coke increased by 151.4% from RMB233.6 million in the year ended 2004 to RMB587.3 million in 2005.

Costs of sales

The cost associated with external sales increased by 39.3% from RMB17,544.0 million in the year ended 31 December 2004 to RMB24,437.8 million in the year ended 31 December 2005. The increase was primarily due to the increase in materials costs and transportation costs incurred by our coal operations, coking operations and coal mining equipment manufacturing operations.

Our materials costs increased by 52.3% from RMB10,661.7 million in the year ended 31 December 2004 to RMB16,237.7 million in the year ended 31 December 2005. The increase was primarily driven by increased production and sales of coal, coke and coal-based chemicals and coal mining equipment. Increase in materials costs in our coal operations was also attributable to (i) the increase in purchase volume and average purchase price of coal from other suppliers, and (ii) the increase in the cost of mining accessories. Increase in materials costs in our coking operations was also attributable to the increase in purchase volume and average purchase price of coal from third party suppliers used as raw materials in coking and, partially offset by the decrease in the cost of coke we purchased for export from other suppliers. The increased materials costs in our coal mining equipment manufacturing operations were primarily due to the increased cost of steel and other raw materials used in our production process.

Our transportation costs increased by 9.3% from RMB3,709.5 million in the year ended 31 December 2004 to RMB4,055.4 million in the year ended 31 December 2005, mainly caused by the increase in transportation costs incurred by our coal operations as a result of increased volume of coal delivered to our customers through railways, roadways and sea-bound vessels. This increase was partially offset by the cost savings as a result of a greater proportion of our sales being shipped on an FOB instead of CIF basis in 2005 relative to 2004.

Gross profit

As a result of the foregoing, our gross profit generated from external transactions increased by 21.7% from RMB4,619.8 million in the year ended 31 December 2004 to RMB5,623.5 million in the year ended 31 December 2005. Our gross profit margin decreased from 20.8% in 2004 to 18.7% in 2005.

Selling, general and administrative expenses

Our selling, general and administrative expenses increased by 30.8% from RMB1,134.6 million in the year ended 31 December 2004 to RMB1,483.8 million in the year ended 31 December 2005, mainly due to the expansion of operations in each of our operating segments, which resulted in an increases in personnel expenses, traveling, marketing and sales expenses, depreciation and amortization costs and utility charges.

Other gains

Our other gains increased by 77.0% from RMB71.5 million in the year ended 31 December 2004 to RMB126.6 million in the year ended 31 December 2005. This increase was mainly due to the increase of interest income from RMB48.6 million in 2004 to RMB71.7 million in 2005.

Other operating income, net

Our other operating net income includes other operating income less other operating expenses. Our other operating income net of other operating expenses increased by 17.1% from RMB138.7 million in the year ended 31 December 2004 to RMB162.4 million in the year ended 31 December 2005, mainly because of the RMB27.2 million increase of net rental income from the dedicated railway located in our Pingshuo Mining Area, which we leased to Shuozhou Pingshuo Luda Railways Transportation Company, a subsidiary of a connected person, based on an agreement entered into in 2004.

Finance costs

In the year ended 31 December 2005, we had net foreign exchange gains of RMB391.5 million, compared to a net foreign exchange loss of RMB83.4 million in the year ended 31 December 2004. As a result, our finance costs decreased significantly by 78.7%, or RMB415.4 million, from RMB527.8 million in 2004 to RMB112.3 million in 2005.

Share of profits/(losses) of associates

Share of losses of associates increased by 223.4% from 1.9 million in the year ended 31 December 2004 to RMB6.1 million in the year ended 31 December 2005. The substantial increase was mainly due to the significant losses incurred by China Coal & Coke Xuyang Limited, our 45% owned associate. We generated a profit of RMB0.1 million from our investment in China Coal & Coke Xuyang Limited in 2004 but incurred a loss of RMB7.8 million 2005.

The profits we generated from our investments in other associates partially offset the losses we incurred from our investment in China Coal & Coke Xuyang Limited.

Income tax expenses

Our income tax expense increased by 3.9% from RMB730.2 million in the year ended 31 December 2004 to RMB758.8 million in the year ended 31 December 2005. In spite of the increased taxable profit, we benefited from preferential tax rates enjoyed by certain of our subsidiaries and jointly controlled entities. Such tax savings lowered our effective income tax rate from 23.1% in 2004 to 17.6% in 2005.

Profit for the year

As a result of the foregoing, our profit for the year ended 31 December 2005 increased by 45.8%, or RMB1,115.9 million, from RMB2,435.5 million in the year ended 31 December 2004 to RMB3,551.4 million in the year ended 31 December 2005.

Minority interests

Minority interests increased by 11.0% from RMB187.3 million in the year ended 31 December 2004 to RMB208.0 million in the year ended 31 December 2005.

Profit attributable to equity holders

Profit attributable to equity holders increase by 48.7% from RMB2,248.2 million in the year ended 31 December 2004 to RMB3,343.5 million in the year ended 31 December 2005.

Year ended 31 December 2004 compared with year ended 31 December 2003

Revenue

Our total revenue after elimination of inter-segment sales increased by 53.1%, from RMB14,480.8 million in the year ended 31 December 2003 to RMB22,163.8 million in the year ended 31 December 2004. This increase was attributable to increases of RMB6,076.3 million, RMB974.3 million, RMB421.4 million and RMB211.0 million in revenue from each of our coal operations, coking operations, coal mining equipment manufacturing operations and other operations, respectively.

Total revenue generated from external sales of our coal operations increased by 52.1% from RMB11,656.7 million in the year ended 31 December 2003 to RMB17,733.0 million in the year ended 31 December 2004. This increase was attributable to the increase in revenue from both domestic and export sales of our coal products, driven by increases in our production capacity and output as well as a sharp increase in average selling price due to strong market demand. Revenue increase from coal sales was slightly offset by a decrease in revenue from proprietary trading of coal during 2004.

In the year ended 31 December 2004, we sold approximately 31.7 million tonnes of coal products in China to external customers, compared to approximately 23.2 million tonnes in the year ended 31 December 2003, representing an increase of 36.5%. The increase in sales volume was driven principally by the expansion of production capacity and output at our coal mines and coal processing plants. In the year ended 31 December 2004, our Anjialing Open Pit Mine and Shaqu Mine commenced full operations and produced 14.5 million tonnes of thermal coal and 1.6 million tonnes of high-quality coking coal, respectively. Strong market demand resulting from the continuous growth in China's economic sectors, particularly the power generation, metallurgical, construction materials and chemicals sectors, also contributed to the increase in our sales volume. In addition, the average domestic selling price of our coal products increased from RMB175 per tonne in 2003 to RMB257 per tonne in 2004 and contributed to the increase in our coal sales revenue. The increase in coal sales prices in 2004 was primarily attributable to the continuous rise in coal consumption in recent years resulting from economic growth and the increase in prices of other energy sources such as oil and natural gas.

The export volume of our coal products sold to external customers increased from 14.0 million tonnes in the year ended 31 December 2003 to 15.2 million tonnes in the year ended 31 December 2004. In addition, higher average selling prices in the export coal market resulting from strong coal demand from neighboring countries and territories contributed to the increase in our revenue from export coal sales. For example, the average selling price of our thermal coal in the export market increased from RMB244 per tonne in 2003 to RMB340 per tonne in 2004.

The revenue we generated from our proprietary coal trading business to external customers increased from RMB4,025.5 million in the year ended 31 December 2003 to RMB4,159.2 million in the year ended 31 December 2004. The average selling price of coal traded domestically increased from RMB239 per tonne in 2003 to RMB287 per tonne in 2004. In addition, the average selling price of coal traded overseas increased from RMB260 per tonne in 2003 to RMB612 per tonne in 2004. The increase in average selling prices was partially offset by the decrease in proprietary trading volume from 16.2 million tonnes in 2003 to 10.0 million

tonnes in 2004. Decrease in our proprietary trading volume was mainly due to the shift of our focus on coal sales of our coal products.

Total revenue from the external sales of our coking operations increased by 91.5% from RMB1,064.9 million in the year ended 31 December 2003 to RMB2,039.2 million in the year ended 31 December 2004. This increase was primarily due to the sharp increase in average selling price and sales volume as a result of the continuous improvement in market conditions.

The increase in export sales revenue was primarily attributable to a 122.2% increase in the average selling price of our coke products sold in the export market, from RMB1,070 per tonne in 2003 to RMB2,377 per tonne in 2004. The significant price increase in the overseas market was caused by a supply shortage during 2004 and also resulted in part from the PRC Government's reduced coke export quotas. Our coke export volume remained at approximately the same level in 2004 and 2003. As a result, our revenue generated from export sales of coke increased by 83.9% from RMB981.7 million in 2003 to RMB1,805.6 million 2004.

The domestic sales volume of our coke products increased by 182.0% from 0.08 million tonnes in the year ended 31 December 2003 to 230,000 tonnes in the year ended 31 December 2004. In addition to strong market demand, the commencement of commercial production at our Fenyang Longquan Plant, which has an annual output capacity of 400,000 tonnes, also contributed to the increase. Meanwhile, the average selling price of our coke products decreased by 0.5% in the domestic market, from RMB1,041 per tonne in 2003 to RMB1,036 per tonne in 2004. As a result, revenue generated from our domestic sales of coke increased by 180.6% from RMB83.3 million in 2003 to RMB233.6 million in 2004.

The revenue from external sales of our coal mining equipment manufacturing operations increased by 39.8% from RMB1,057.9 million in the year ended 31 December 2003 to RMB1,479.4 million in the year ended 31 December 2004. This increase was mainly due to the increase in sales volume of coal mining equipment, whereas the average selling price of our products remained at the same level during this period.

Revenue from external sales of our other businesses increased by 30.1% from RMB701.2 million in the year ended 31 December 2003 to RMB912.2 million in the year ended 31 December 2004. This increase was mainly due to the increase in revenue from coal mine design services.

Costs of sales

The cost associated with external sales increased by 37.5% from RMB12,762.7 million in the year ended 31 December 2003 to RMB17,544.0 million in the year ended 31 December 2004. The increase was primarily due to the increase in transportation costs and materials costs incurred by our coal operations, coking operations and coal mining equipment manufacturing operations.

Our materials costs increased by 20.9% from RMB8,819.8 million in the year ended 31 December 2003 to RMB10,661.7 million in the year ended 31 December 2004. The increase was primarily driven by our increased production and sales of coal, coke and coal-based chemicals and coal mining equipment. Increase in material costs in our coal operations was attributable to: (i) the increase in purchase volume and average purchase price of coal from third party suppliers; and (ii) the increase in the cost of mining accessories. Increase in material costs in our coking operations was attributable to: (i) the increase in purchase volume and average purchase price of coal we purchased from third party suppliers used as raw material in coking; and (ii) the increased purchase volume and average purchase price of coke we purchased from third party suppliers for trading purposes. The increased materials costs in our coal mining equipment manufacturing operations were primarily due to the increased costs of steel and other raw materials used in our production process.

Our transportation costs increased by 101.6% from RMB1,839.8 million in the year ended 31 December 2003 to RMB3,709.5 million in the year ended 31 December 2004, mainly due to the increases in transportation costs incurred by both our coal and coking operations as a result of increased volume of coal and coke delivered to our customers. The addition of railway construction fees imposed by the PRC Government, increased port charges imposed by relevant port authorities for export sales of our coal products, as well as a greater proportion of our sales being shipped on an FOB instead of ex-mine sales basis in 2004 compared to 2003, all contributed to the increase in transportation costs relating to our coal operations.

Gross profit

As a result of the foregoing, our gross profit generated from external transactions increased by 168.9% from RMB1,718.1 million in the year ended 31 December 2003 to RMB4,619.8 million in the year ended 31 December 2004. Our gross profit margin increased from 11.9% in 2003 to 20.8% in 2004.

Selling, general and administrative expenses

Our selling, general and administrative expenses increased by 33.8% from RMB848.1 million in the year ended 31 December 2003 to RMB1,134.6 million in the year ended 31 December 2004, mainly due to the expansion of operations in each of our operating segments, which resulted in an increase in personnel expenses, traveling, marketing and sales expenses, depreciation and amortization costs and utility charges.

Other gains

Our other gains decreased by 17.3% from RMB86.5 million in the year ended 31 December 2003 to RMB71.5 million in the year ended 31 December 2004. This decrease was primarily due to a RMB8.4 million decrease in dividend income from unlisted investments and a RMB3.8 million decrease in interest income.

Other operating income, net

Our other operating net income includes other operating income less other operating expenses. Our other operating income net of other operating expenses increased by 176.4% from RMB50.2 million in the year ended 31 December 2003 to RMB138.7 million in the year ended 31 December 2004. The substantial increase was mainly due to (i) the RMB43.8 million increase of net rental income from the dedicated railway located in the Pingshuo Mining Area, which we leased to Shuozhou Pingshuo Luda Railways Transportation Company, a subsidiary of a connected person, based on an agreement entered into in 2004, and (ii) the RMB44.5 million increase in agency service income relating to non-core products, partially offset by the decrease of RMB10.0 million in miscellaneous income.

Finance costs

Our finance costs decreased by 21.9%, or RMB147.6 million, from RMB675.4 million in the year ended 31 December 2003 to RMB527.8 million in the year ended 31 December 2004, primarily due to a RMB261.7 million decrease in net foreign exchange loss which was partially offset by an increase in interest expenses and bank charges.

Share of profits/(losses) of associates

For the year ended 31 December 2004, we incurred share of losses of associates of RMB1.9 million, compared to the share of profits of associates of RMB0.7 million in the year ended 31 December 2003.

Income tax expenses

Income tax expenses increased by 682.5% from RMB93.3 million in the year ended 31 December 2003 to RMB730.2 million in the year ended 31 December 2004. This increase was primarily due to increase in our taxable profit, which is directly related to our increased profit before income tax of RMB2,833.8 million from RMB332.0 million in 2003 to RMB3,165.8 million in 2004. In spite of the increased taxable profit, we benefited from preferential tax rates enjoyed by some of our subsidiaries and jointly controlled entities. Such tax savings lowered our effective tax rates from 28.1% in 2003 to 23.1% in 2004.

Profit for the year

As a result of the foregoing, our profit for the year increased by 920.6%, or RMB2,196.9 million, from RMB238.6 million in the year ended 31 December 2003 to RMB2,435.5 million in the year ended 31 December 2004.

Minority interests

Minority interests increased by 91.8% from RMB97.7 million in the year ended 31 December 2003 to RMB187.3 million in the year ended 31 December 2004.

Profit attributable to equity holders

Profit attributable to equity holders increased by RMB2,107.3 million from RMB141.0 million in the year ended 31 December 2003 to RMB2,248.2 million in the year ended 31 December 2004.

Liquidity and Capital Resources

To date, we have funded our operations principally from cash generated from our operations, capital contributions from our shareholder and bank borrowings. Any significant decrease in demand for, or pricing of, our products or a significant decrease in the availability of bank loans may adversely impact our liquidity.

Our current assets divided by current liabilities, or current ratio, was 0.85, 0.91, 0.96 and 0.99 as of 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, respectively. Our current assets after subtraction of inventories divided by current liabilities, or quick ratio, was 0.69, 0.73, 0.76 and 0.77 as of 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, respectively.

As of 30 June 2006, our current assets amounted to RMB12,386.2 million, representing an increase of RMB113.7 million from RMB12,272.5 million as of 31 December 2005. The increase was mainly attributable to an increase of RMB858.1 million in trade and notes receivables mainly due to changes of payment terms by our customers.

As of 31 December 2005, our current assets amounted to RMB12,272.5 million, representing an increase of RMB1,922.5 million from RMB10,350.0 million as of 31 December 2004. The increase was mainly attributable to: (i) an increase of RMB890.3 million in trade and notes receivables mainly due to the increase in coal product sales in the fourth quarter of 2005 compared to the same period in 2004; (ii) increase in accounts receivables from connected parties and the increase of RMB865.0 million in prepayments and other receivables; (iii) an increase of RMB475.7 million in inventories, including increases in coal, coke and machinery for sale, auxiliary materials, spare parts and tools; and (iv) an increase of RMB13.7 million in term deposits with initial terms of over three months. The increase in our current assets was partially offset by decreases of RMB215.8 million and RMB106.2 million in restricted bank deposits and cash and cash equivalents, respectively, in the year ended 31 December 2005.

As of 30 June 2006, our current liabilities amounted to RMB12,544.6 million, representing a decrease of RMB250.8 million from RMB12,795.5 million as of 31 December 2005. The decrease was mainly attributable to: (i) a decrease of RMB585.5 million in accrual and other payables mainly to ChinaCoal Group as a dividend payable; and (ii) a decrease of RMB205.1 million in trade and other payables due to decreased purchase of raw materials in the second quarter of 2006 compared to the fourth quarter in 2005 resulting from the decreased trading volume of coal and other products. The decrease was partially offset by the increase of RMB479.7 million in short-term borrowings (including the current portion of long-term borrowings).

As of 31 December 2005, our current liabilities amounted to RMB12,795.5 million, representing an increase of RMB1,456.6 million from RMB11,338.8 million as of 31 December 2004. The increase was mainly attributable to: (i) an increase of RMB995.3 million in accrual and other payables mainly to ChinaCoal Group as a dividend payable; (ii) an increase of RMB776.3 million in trade payables due to increased purchase of raw materials in the fourth quarter of 2005 compared to the same period in 2004 resulting from the increased production volume of coal and other products; and (iii) an increase of RMB155.9 million in taxes payable. The increase in current liabilities was partially offset by a decrease of RMB205.6 million in short-term borrowings from commercial banks, a decrease of RMB195.0 million in our current portion of long-term borrowings, as well as a decrease of RMB70.3 million in our current portion of provisions for shut-downs, restorations and environmental clean-up costs.

Among the sources of the prepayments and other receivables as our current assets, the amounts due from related parties were RMB1,050.1 million as of 31 December 2005 and RMB1,122.3 million as of 30 June 2006, representing increases of RMB437.0 million and RMB72.2 million from 31 December 2004 and 31 December 2005, respectively. The increases were mainly due to the increase in the amount of deposits receivables from ChinaCoal Group to us and from our jointly controlled entity, Datong Zhongxin Energy Co., Ltd., as inter-company advances.

Among the sources of the accruals and other payables as our current liabilities, the amounts due to related parties were RMB897.8 million as of 31 December 2005 and RMB976.2 million as of 30 June 2006, representing increases of RMB120.3 million and RMB78.3 million from 31 December 2004 and 31 December 2005, respectively. The increases were mainly due to the increase of payables due to ChinaCoal Group as considerations for the acquisition of a power plant in 2005 and our inter-company advances from ChinaCoal Group in 2006.

Cash flow

Our primary uses of cash are to invest in mines, production facilities and equipment, repay our indebtedness, and fund working capital and normal recurring expenses. As of 31 December 2005 and 30 June 2006, we had cash and cash equivalents of RMB3,140.3 million and RMB2,294.0 million, respectively, and approximately RMB24,861.7 million and RMB23,774.0 million, respectively, of unutilized bank credit

facilities. The following table sets forth our cash flows in each of the three years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2005 and 2006:

	Year ended 31 December			Six months ended 30 June	
	2003	2004	2005	2005	2006
		(RMB million)		(RMB million)	
Cash and cash equivalents at beginning of year	2,874.5	2,976.2	3,246.5	3,246.5	3,140.3
Net cash generated from operating activities	985.1	3,490.7	2,765.4	1,705.2	1,143.0
Net cash used in investing activities	(2,095.1)	(2,525.7)	(2,717.7)	(1,135.9)	(1,963.4)
Net cash generated from/(used in) financing activities	1,211.8	(694.8)	(153.9)	287.1	(25.9)
Net increase/(decrease) in cash and cash equivalents	101.8	270.2	(106.2)	856.3	(846.3)
Cash and cash equivalents at end of year	2,976.2	3,246.5	3,140.3	4,102.8	2,294.0

Net cash generated from operating activities

Net cash generated from operating activities decreased by 33.0% from RMB1,705.2 million in the six months ended 30 June 2005 to RMB1,143.0 million in the six months ended 30 June 2006. The decrease of RMB562.2 million was primarily due to the decrease of RMB552.4 million in net cash inflows generated from operations mainly attributable to: (i) the decrease in profit in the period; (ii) the increase in accounts receivables due to rising sales volume as well as the increasing proportion of sales made pursuant to long-term sales contracts. Given our established transaction history with long-term contract customers and common industry practice, such customers often enjoy more favorable credit terms which are more toward the higher end of the three to six months range; and (iii) the decrease in trade payables due to early settlement of outstanding construction and materials costs incurred by Huajin Joint Venture, no active major maintenance projects during the first six months of 2006 by Shanghai Datun Energy, and early settlement of purchase price for the procurement of steel and oil inventories in anticipation of significant price increases.

Net cash generated from operating activities decreased by 20.8% from RMB3,490.7 million in the year ended 31 December 2004 to RMB2,765.4 million in the year ended 31 December 2005. The decrease of RMB725.3 million was attributable to the increase in income tax paid, from RMB461.8 million in 2004 to RMB661.9 million in 2005. The decrease in net cash inflow, notwithstanding the RMB1,115.9 million increase in profit for the year, was mainly attributable to the high balance of unpaid accruals to third parties in 2004, consisting of advance from customers, amounts due to related parties, and payable for site restoration, the larger increase in trade receivables in 2005 and the gain in foreign exchange in 2005. The high balance of unpaid accruals to third parties in 2004 was driven by the strictly enforcement of our advanced payment policy due to strong market demand for our coal products. The increase in trade receivables in 2005 was in line with the substantial increase in sales revenue in 2005.

Net cash generated from operating activities increased by 254.4% from RMB985.1 million in the year ended 31 December 2003 to RMB3,490.7 million in the year ended 31 December 2004. The increase of RMB2,505.6 million was attributable to a significant increase in net cash generated from operations of RMB2,636.8 million, from RMB1,733.6 million in 2003 to RMB4,370.4 million in 2004. The substantial increase in net cash generated from operations was mainly due to the increase of RMB2,196.9 million in profit for the year and RMB237.4 million increase in depreciation expenses. This increase was partially offset by an

increase in income tax paid from RMB231.3 million in 2003 to RMB461.8 million in 2004 due to increases in taxable profits in 2004.

Net cash used in investing activities

Net cash used in investing activities increased by 72.8% from RMB1,135.9 million in the six months ended 30 June 2005 to RMB1,963.4 million in the six months ended 30 June 2006. The increase of RMB827.5 million was mainly attributable to (i) an increase of RMB339.8 million in the purchase of property, plant and equipment relating to the construction of our coal mines, coal processing plants and coking facilities and (ii) an increase of RMB363.9 million in increase in investments in associates. The increase was partially offset by the changes in the balance of term deposits. In the six months ended 30 June 2005, our term deposits with terms of more than three months increased by RMB10.0 million and for the six months ended 30 June 2006, our term deposits with the same terms decreased by RMB36.4 million from the previous comparable period.

Net cash used in investing activities increased by 7.6% from RMB2,525.7 million in the year ended 31 December 2004 to RMB2,717.7 million in the year ended 31 December 2005. The increase of RMB192.0 million was mainly attributable to an increase of RMB357.5 million in the purchase of property, plant and equipment, mainly for the construction of our mines and coal processing plants, from RMB2,518.9 million in 2004 to RMB2,876.4 million in 2005.

Net cash used in investing activities increased by 20.5% from RMB2,095.1 million in the year ended 31 December 2003 to RMB2,525.7 million in the year ended 31 December 2004. The increase of RMB430.5 million was mainly attributable to an increase in the purchase of property, plant and equipment for the construction of the Anjialing Underground Mine and the Shaqu Mine.

Net cash generated from/(used in) financing activities

For the six months ended 30 June 2005, we generated RMB287.1 million from financing activities but we used RMB25.9 million in financing activities for the six months ended 30 June 2006. The change was mainly attributable to (i) a decrease of RMB598.6 million in proceeds from long-term borrowings, and (ii) an increase of RMB579.0 million in the dividends paid to ChinaCoal Group. In addition, in the six months ended 30 June 2005, we distributed RMB308.5 million to ChinaCoal Group as consideration for the lump sum purchase of nine power generators. The increase in cash outflow for financing activities was partially offset by the decrease in repayments of long- and short-term borrowings.

Net cash used in financing activities decreased by RMB540.9 million from RMB694.8 million in the year ended 31 December 2004 to RMB153.9 million in the year ended 31 December 2005 mainly due to the change in net repayment of short-term borrowings of RMB574.8 million.

Net cash outflow from financing activities was RMB694.8 million in the year ended 31 December 2004 compared to net cash generated from financing activities of RMB1,211.8 million in the year ended 31 December 2003. The change was mainly due to: (i) net repayments of short-term borrowings of RMB812.6 million in 2004 compared with net proceeds from short-term borrowings of RMB515.0 million in 2003; (ii) the contribution from ChinaCoal Group decreased by RMB413.6 million from 2003 to 2004; and (iii) the dividend and distribution to ChinaCoal Group increased by RMB738.4 million from 2003 to 2004. This was offset by the net change in long-term borrowings of RMB460.5 million in 2004.

Trade receivables, inventories and trade payables turnover

The following table sets forth the turnover days of our trade receivables, inventories and trade payables for the periods indicated:

	Year ended 31 December			Six months ended 30 June
	2003	2004	2005	2006
Turnover days of trade receivables[1]	57.6	38.4	35.7	46.8
Turnover days of inventories[2]	41.4	38.5	34.8	40.5
Turnover days of trade payables[3]	75.8	65.1	57.4	63.9

(1) Turnover days of trade receivables for a year is derived by dividing the arithmetic mean of the opening and closing balances of trade receivables by revenue for the relevant period and then multiplied by 365 days. Turnover days of trade receivables for a six-month period is derived by dividing the arithmetic mean of the opening and closing balances of trade receivables by revenue for the relevant period and then multiplied by 180 days.

(2) Turnover days of inventories for a year is derived by dividing the arithmetic mean of the opening and closing balances of inventory by cost of sales for the relevant period and then multiplied by 365 days. Turnover days of inventories for a six-month period is derived by dividing the arithmetic mean of the opening and closing balances of inventories for the relevant period by cost of sales and then multiplied by 180 days.

(3) Turnover days of trade payables for a year is derived by dividing the arithmetic mean of opening and closing balances of trade payables, by cost of sales for the relevant period and then multiplied by 365 days. Turnover days of trade payables for a six-month period is derived by dividing the arithmetic mean of the opening and closing balances of trade payables by cost of sales for the relevant period and then multiplied by 180 days.

Capital expenditures

We incurred capital expenditures for the construction, expansion and technology upgrade of our mines, coal processing plants and mine railways. In addition, we incurred capital expenditures for the capacity expansion of our coking, coal-based chemicals products and mining equipment manufacturing businesses. Our capital expenditures were RMB2,432.7 million, RMB2,925.9 million and RMB3,098.2 million in the years ended 31 December 2003, 2004 and 2005, respectively. Capital expenditures during these periods were primarily related to property, plant and equipment and intangible assets.

As part of our future growth strategy, we have made capital expenditure plans for 2006, 2007 and 2008, respectively. The following table sets forth our capital expenditures during the Track Record Period as well as the current estimate of our capital expenditures for 2006, 2007 and 2008 relating to our operations:

	Year ended 31 December					
	2003	2004	2005	2006E	2007E	2008E
	(RMB million)					
Coal operations	1,449.1	1,538.2	1,662.9	3,315.0	5,427.0	4,988.5
Coking operations	118.1	595.3	718.3	150.0	650.0	438.0
Coal mining equipment operations	57.5	75.2	159.7	380.0	280.0	280.0
Other operations	807.9	717.2	557.4	1,178.1	1,931.1	1,588.0
Total	2,432.7	2,925.9	3,098.2	5,023.1	8,288.1	7,294.5

Indebtedness

Borrowings

Our combined borrowings as of 31 December 2003, 2004, 2005 and 30 September 2006, for the purpose of calculating the indebtedness of our Company, were as follows:

	As of 31 December			As of 30 September
	2003	2004	2005	2006
		(RMB million)		(RMB million)
Secured bank loans	838.8	669.3	455.0	395.9
Unsecured bank loans	8,548.8	7,615.2	7,074.3	7,841.7
Other unsecured loans[1]	211.4	2,077.5	3,217.0	4,421.2
Total	9,598.9	10,361.9	10,746.3	12,658.8

(1) Include loans from ChinaCoal Group and minority shareholders of certain subsidiaries.

The above borrowings during the Track Record Period and as of 30 September 2006 bore interest as follows:

	As of 31 December			As of 30 September 2006
	2003	2004	2005	
Banks loans and loans from other financial institutions	3.83%-7.89%	4.02%-7.89%	4.66%-7.89%	4.40%-6.39%
Loans from ChinaCoal Group	5.12%-5.94%	5.12%-5.94%	5.12%-5.94%	5.12%-6.39%
Loans from minority shareholders of certain subsidiaries	5.60%	5.60%-5.89%	5.60%-5.89%	5.60%-5.89%

The maturity profile of interest-bearing long-term borrowings of our Company as of 31 December 2003, 2004, 2005 and 30 September 2006 was as follows:

	As of 31 December			As of 30 September
	2003	2004	2005	2006
			(RMB million)	
Banks loans and loans from other financial institutions				
Within one year	449.1	444.0	265.5	354.4
In the second year	859.8	941.0	545.7	325.3
In the third to fifth year	2,435.6	2,258.2	2,045.2	2,625.0
After the fifth year	2,675.8	2,572.8	2,836.1	2,321.4
	6,420.4	6,216.0	5,692.5	5,626.1
Loans from ChinaCoal Group				
Within one year	—	16.5	—	—
In the second year	16.5	—	—	—
In the third to fifth year	—	—	924.2	36.0
After the fifth year	40.0	1,820.0	2,025.8	3,520.0
	56.5	1,836.5	2,950.0	3,556.0
	6,476.9	8,052.5	8,642.5	9,182.1

Our gearing ratio was 0.91, 0.84 and 0.73 and 0.73 as of 31 December 2003, 2004 and 2005 and 30 September 2006, respectively. Gearing ratio is derived by dividing total interest-bearing bank and other borrowings by the sum of interest-bearing bank and other borrowings and shareholders equity. As of

31 December 2005 and 30 September 2006, RMB6,073.9 million and RMB6,088.2 million, respectively, of our total borrowings were guaranteed by ChinaCoal Group and its subsidiaries. All guarantees provided by ChinaCoal Group and its subsidiaries to our Company will be released or withdrawn prior to or upon the Listing Date.

Other than as disclosed above, there has been no material change in our indebtedness since the Latest Practicable Date.

Our Directors confirm that there has been no material change in our indebtedness or contingencies since 30 September 2006.

Net current liabilities

As of 30 September 2006, our net current liabilities were approximately RMB922.2 million, consisting of current assets of RMB12,338.9 million and current liabilities of RMB13,261.1 million. As of the same date, our current assets mainly included trade and notes receivable of approximately RMB3,947.5 million, prepayments and other receivables of approximately RMB2,743.3 million, inventories of approximately RMB2,600.3 million and cash and cash equivalents of approximately RMB3,009.9 million. Our current liabilities on the same date mainly included accruals and other payables of approximately 5,047.3 million, trade and notes payable of approximately RMB3,676.2 million and short-term borrowings of approximately RMB3,476.7 million.

Capital commitments

Capital expenditures contracted for at the balance sheet date but not yet incurred is then as follows:

	As of 31 December			As of 30 June
	2003	2004	2005	2006
	(RMB million)			
Property, plant and equipment	469.3	1,426.2	1,295.1	2,516.7
Others	—	—	110.0	110.0

Contractual obligations

The following table sets forth our material contractual obligations due by period as of 30 June 2006:

	Payments due in			
	Total	2006	2007 to 2010	2011 and thereafter
	(RMB million)			
Debt obligations[1]	11,619.7	2,849.0	3,238.8	5,531.9
Operating lease obligations[2]	118.6	24.6	19.8	74.2
Total	11,738.4	2,873.6	3,258.6	5,606.1

(1) Include bank loans and other borrowings.

(2) Include payments for leases of land, buildings, factories and machinery under operating lease arrangements for terms ranging from one to twenty years.

Contingent liabilities

In connection with the Restructuring, ChinaCoal Group has agreed to assume any undisclosed liabilities of the Transferred Businesses related to the periods prior to the Restructuring.

Bank and other guarantees

As of 31 December 2003, 2004, 2005 and 30 June 2006, the undiscounted maximum amount of potential future payments under guarantees given to banks in respect of banking facilities granted to the parties below were as follows:

	As of 31 December			As of 30 June
	2003	2004	2005	2006
		(RMB million)		
Jointly controlled entity of our Company (after elimination of our Company's proportionate interest in those jointly controlled entities)	44.1	62.1	15.1	—
Third parties	99.0	65.2	6.3	6.3
	143.1	127.3	21.4	6.3

Guarantees to third parties will be released or withdrawn prior to the listing of our Company's Shares on the Hong Kong Stock Exchange.

Lawsuits and other proceedings

Our Company is involved in certain lawsuits and other proceedings arising in the ordinary course of business. While the outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present, we believe that any resulting liabilities will not have a material adverse effect on the financial position or our results of operations. See "Business — Legal proceedings."

Off-balance Sheet Arrangements

As of 30 June 2006, being the date of our most recent financial statements, we did not have any off-balance sheet arrangements.

Market Risk

We are exposed to various types of market risks in the ordinary course of our business, including fluctuations in interest rates and foreign exchange rates and changes in the selling prices for our main products and costs of raw materials. We manage our exposure to these and other market risks through regular operating and financial activities.

Interest rate risk

Our exposure to market risk for changes in interest rates relates primarily to fluctuations in interest rates on our short-term and long-term debt and our ability to borrow further funds. Higher interest rates may adversely affect our revenue, profit from operations and net profit. We have not historically been exposed nor do we anticipate being exposed to material risks due to changes in interest rates on debt denominated in Renminbi, although our future interest income and interest disbursements may fluctuate in line with changes in interest rates on debt denominated in Renminbi.

Foreign exchange risk

In the year ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2005 and 2006, we generated RMB6,583.9 million, RMB9,733.8 million, RMB8,280.7 million, RMB4,616.6 million and RMB2,913.4 million, respectively, in income from foreign currency-denominated export sales of our coal, coke

and other products. We mainly receive U.S. dollars as payment for our export sales. We also have a substantial amount of indebtedness denominated in foreign currencies, including Japanese Yen and U.S. dollars. Consequently, foreign currency fluctuations, particularly fluctuations in foreign currencies against the Renminbi, affect and will continue to affect, our results of operations.

Inflation and monetary risk

Inflation in China has not had a material impact on our results of operations in recent years. According to the National Bureau of Statistics of China, the change in the Consumer Price Index in China was 1.2%, 3.9% and 1.8% in 2003, 2004 and 2005, respectively.

Commodity price risk

We are also exposed to commodity price risk resulting from changes in the prices of our products and the cost of raw materials, mainly including coal produced by third parties.

WORKING CAPITAL CONFIRMATION

Taking into account our cash generated from operating activities, the net proceeds of the Global Offering and our credit facilities maintained with our banks and financial institutions, we are satisfied that we will have available sufficient working capital for our operations during the 12 months following the date of this Prospectus.

ACQUISITION OF SHANXI PINGSHUO SUBSEQUENT TO THE TRACK RECORD PERIOD

After obtaining an approval from the PRC Government in September 2006, our Company acquired the remaining 20% equity interests in Shanxi China Coal Pingshuo Antaibao Coal Co., Ltd. ("Shanxi Pingshuo"), a jointly controlled entity, from ChinaCoal Group and another third-party joint venture partner for an aggregate consideration of approximately RMB247.7 million (the "Pingshuo Acquisition"). Upon completion of the Pingshuo Acquisition in September 2006, Shanxi Pingshuo became our wholly owned subsidiary and, as a result, 100% of its operating results have been consolidated into those of our Company since then. See Note 37(c) of the Accountants' Report included as Appendix I to this Prospectus.

PROPERTY VALUATION

Savills Valuation and Professional Services Limited, an independent property valuer, has valued our property interests as of 30 September 2006. The text of the letter, summary of valuation and the summary valuation certificates are set out in Appendix V to this Prospectus.

A reconciliation of the net book value of the relevant land use rights and properties as of 30 June 2006 to their unaudited net book values of property interests, as stated in Appendix V to this Prospectus, is as follows:

	Properties	Land use rights
	(RMB'000)	
Net book value as of 30 June 2006	3,908,482	132,414
Movements for the period ended from 30 June 2006 to 30 September 2006		
— Additions	135,982	—
— Disposal	(3,195)	(558)
— Depreciation	(170,837)	(542)
— Others	(16,237)	(72)
Net book value as of 30 September 2006	3,854,195	131,242
Valuation appreciation	135,915	972,100
Valuation depreciation	(2,395,889)	—
Valuation as of 30 September 2006 as per Appendix V to this Prospectus	1,458,306	1,103,342

PROFIT FORECAST

We believe that on the bases and assumptions as set forth below and in the absence of unforeseen circumstances as set forth in Rule 11.17 of the Listing Rules, our forecast consolidated profit attributable to equity holders of our Company for the year ending 31 December 2006 is expected to be not less than RMB3,147.1 million under IFRS. On the basis of the prospective financial information and the number of Shares expected to be issued, assuming the Over-allotment Option is not exercised, the forecast consolidated profits attributable to shareholders per Share for the year ending 31 December 2006 would be approximately RMB0.280 on a pro forma fully diluted basis under IFRS.

Bases And Assumptions

The prospective financial information has been prepared based on the accounting policies consistent in all material respects with those adopted by us as set forth in the Accountants' Report included as Appendix I to this Prospectus, and on bases and assumptions including the following:

- there will be no material change in existing political, legal, fiscal, market or economic conditions in China, Hong Kong, or any other country or territory in which we currently operate or which are otherwise material to our business;
- there will be no changes in legislation, regulations or rules in China, Hong Kong or any other country or territory in which we operate or with which we have arrangements or agreements, which materially adversely affect our business;
- there will be no material change in the bases or rates of taxation in China or any other country or territory in which we operate, except as otherwise disclosed in this Prospectus; and
- there will be no material changes in inflation rates, interest rates or foreign currency exchange rates from those currently prevailing.

DIVIDEND POLICY

After completion of the Global Offering, our shareholders will be entitled to receive dividends declared by us. The payment and the amount of any dividends will be at the discretion of our Board and will depend on

our general business condition and strategies, cash flows, financial results and capital requirements, interests of our shareholders, taxation conditions, statutory and regulatory restrictions and other factors that our Board deems relevant. Any dividend distribution shall also be subject to approval of our shareholders. Under the PRC Company Law and our Articles of Association, all of our shareholders have equal rights to dividends and distributions. For holders of our H Shares, cash dividend payments, if any, will be declared by our Board in Renminbi and paid in Hong Kong dollars.

We intend to distribute 20% to 30% of our net distributable profit for the periods subsequent to the Global Offering.

PRE-ESTABLISHMENT DISTRIBUTION AND SPECIAL DIVIDENDS

In accordance with the *"Provisional Regulations Relating to Corporate Reorganization of Enterprises and Related Management of State-owned Capital and Financial Treatment"* issued by the MOF, we are required to make a distribution to ChinaCoal Group, our sole shareholder prior to the Global Offering, in the amount equal to the difference in our Company's net asset value as at 1 October 2005, the date immediately following our last valuation date, and as at 21 August 2006, the date immediately prior to the date on which our Company was incorporated. The Pre-establishment Distribution represents a surplus between the value of our net assets as at our incorporation date over the value of the net assets as at the last valuation date, and we are required by the Provisional Regulations to return such surplus to ChinaCoal Group.

On 23 August 2006, our shareholders' meeting resolved that ChinaCoal Group will be entitled to all of our distributable profits generated from 22 August 2006 to the date at the end of the month prior to the date of capital verification for the Global Offering, which, assuming that the Global Offering is completed on 19 December 2006, would mean up to 30 November 2006.

We currently estimate the total amount of the Pre-establishment Distribution and the Special Dividends to be RMB 1,210.0 million, of which (i) the Pre-establishment Distribution is based on the difference in our net asset value as stated in our management accounts as of 1 October 2005 and as of 21 August 2006 and (ii) the Special Dividends are calculated on a pro rata basis based on the number of days from 22 August 2006 to 30 November 2006, and a net profit per day calculation based on the net profits as recorded in our management accounts for the three months ended 30 September 2006.

We will determine the actual amount of the Pre-establishment Distribution and Special Dividends by reference to our accounts for the period from 1 October 2005 to 30 November 2006. We will engage PwC to perform a special audit of our accounts for the period from 1 October 2005 to 30 November 2006, which is expected to be completed by 30 April 2007. We expect to finance the Pre-establishment Distribution and the Special Dividends to ChinaCoal Group from our existing cash on hand prior to the Global Offering. Payment of the Pre-establishment Distribution and the Special Dividends will take place after the Global Offering and after the special audit of our accounts for the period from 1 October 2005 to 30 November 2006 is completed. The Pre-establishment Distribution is determined based on audited accounts prepared in accordance with PRC GAAP. The Special Dividends will be determined based on audited accounts prepared in accordance with PRC GAAP and IFRS, whichever is lower, after deducting any contribution made by the Company to the statutory and discretionary reserve funds. We will publish an announcement of the final amount of the Pre-establishment Distribution and the Special Dividends and the outcome of the special audit prior to the payment of the Pre-establishment Distribution and the Special Dividends to ChinaCoal Group.

Holders of H Shares are not entitled to share in the Pre-establishment Distribution or Special Dividends. ChinaCoal Group is the only shareholder entitled to the Pre-establishment Distribution and the

Special Dividends. In addition, any distributable profits available for distribution to our shareholders after the Global Offering will exclude the Pre-establishment Distribution and the Special Dividends.

The Pre-establishment Distribution is required to be paid to ChinaCoal Group under regulations issued by the MOF. We decided to distribute the Special Dividends based on our commercial discretion. You should not rely on the Pre-establishment Distribution and Special Dividends as an indication of our future dividend distribution policy or practice.

DISTRIBUTABLE RESERVES

As our Company was only incorporated on 22 August 2006, there were no reserves available for distribution to shareholders as of 30 June 2006.

UNAUDITED PRO FORMA ADJUSTED NET TANGIBLE ASSETS

The following is an illustrative and pro forma statement of adjusted net tangible assets of our Company which has been prepared on the basis of the notes set out below for the purpose of illustrating the effect of the Global Offering as if it had taken place on 30 June 2006. This unaudited pro forma statement of adjusted net tangible assets has been prepared for illustrative purposes only and because of its hypothetical nature, it may not give a true picture of the financial positions of our Company had the Global Offering been completed as of 30 June 2006 or at any future dates.

	Adjusted combined net tangible assets of our Company attributable to the equity holders of our Company as of 30 June 2006 RMB'000[1]	Estimated net proceeds from the Global Offering RMB'000[2]	Net assets not assumed by our Company RMB'000[3]	Unaudited pro forma adjusted net tangible assets RMB'000	Unaudited pro forma adjusted net tangible assets per Share	
					RMB[4]	HK$
Based on the Offer Price of HK$3.20 for each Offer Share	5,021,163	10,021,236	(1,023,470)	14,018,929	1.25	1.24
Based on the Offer Price of HK$4.05 for each Offer Share	5,021,163	12,707,241	(1,023,470)	16,704,934	1.49	1.47

(1) The adjusted combined net tangible assets of our Company attributable to the equity holders of our Company as of 30 June 2006 is extracted from the Accountants' Report set out in Appendix I to this Prospectus, which is based on the audited combined net assets of our Company attributable to the equity holders of our Company as of 30 June 2006 of RMB5,035,250,000 with an adjustment for the intangible assets as of 30 June 2006 of RMB14,087,000.

(2) The estimated net proceeds from the Global Offering are based on an indicative Offer Price of HK$3.20 (equivalent to RMB3.23) and HK$4.05 (equivalent to RMB4.09) per H Share, respectively (after deducting the underwriting fees and other related expenses), and takes no account of any H Shares which may be issued pursuant to the Over-allotment Option. For the purpose of the estimated net proceeds from the Global Offering, the translation of Renminbi into HK dollars was made at the rate of RMB1.0087 to HK$1.00, the exchange rate prevailing on 30 November 2006 set by PBOC for foreign exchange transactions.

(3) Pursuant to the Restructuring, certain businesses and assets will be retained by ChinaCoal Group and will be treated as a deemed distribution upon completion of the Restructuring on 22 August 2006. Consequently, the unaudited pro forma net tangible assets have been reduced accordingly after taking into account this deemed distribution, which is based on the financial information as of 30 June 2006 of certain businesses and assets retained by ChinaCoal Group that were not transferred to us.

(4) The unaudited pro forma net tangible assets per Share is arrived at by dividing the unaudited pro forma adjusted net tangible assets by 11,246,374,000 Shares, being the number of shares in issue assuming that the Global Offering has been completed on 30 June 2006 but takes no account of any Shares which may be issued upon the exercise of the Over-allotment Option.

In accordance with the "Provisional Regulation Relating to Corporate Reorganization of Enterprises and Related Management of State-owned Capital and Financial Treatment" (the "Provisional Regulations") issued by the MOF, which became effective from 27 August 2002, our Company is required to make a distribution to ChinaCoal Group, in an amount equals to the difference in our Company's net asset values as at 1 October 2005 and as at 21 August 2006 (being the date immediately prior to the date on which our Company was incorporated) (the "Pre-establishment Distribution") as determined based on the audited accounts prepared in accordance with PRC GAAP.

In addition, pursuant to the resolution of a shareholders' meeting dated 23 August 2006, the shareholder of our Company has resolved to make a special distribution to ChinaCoal Group, in an amount equal to the distributable profit of our Company for the period from 22 August 2006 to the last day of the month prior to the listing of our Company's shares (the "Special Dividends"). The distributable profit of our

Company for the Special Dividends will be determined based on the audited accounts prepared in accordance with PRC GAAP and IFRS respectively, whichever is the lower, after deducting any contribution made by our Company to the statutory and discretionary reserve funds.

The Directors have preliminarily estimated that the total aggregate amount of the Pre-establishment Distribution and the Special Dividends to be RMB1,210.0 million.

The unaudited pro forma adjusted net tangible assets and the unaudited pro forma adjusted net tangible assets per Share have not taken into account the effect of the Pre-establishment Distribution and the Special Dividends. After taking into account the aforementioned distributions, the pro forma adjusted net tangible assets of our Company and the pro forma adjusted net tangible assets value per Share would be reduced.

Details of our Company's property valuation as of 30 September 2006 are set out in Appendix V to this Prospectus. We will not incorporate any revaluation surplus/deficit in its financial statements for the year ending 31 December 2006. It is our accounting policy to state its property, plant and equipment at cost less accumulated depreciation and any impairment losses rather than at revalued amounts. With reference to the valuation of our properties as set out in Appendix V to this Prospectus, there was a revaluation deficit of our properties of approximately RMB1,288.0 million. Had the properties been stated at such valuation, a reduction in depreciation and amortization charge of approximately RMB51.0 million per annum would have been incurred.

No adjustment has been made to the unaudited pro forma adjusted net tangible assets to reflect any trading result or other transaction of our Company entered into subsequent to 30 June 2006.

DISCLOSURE UNDER RULES 13.13 TO 13.19 OF THE HONG KONG LISTING RULES

Our Directors confirm that as of the Latest Practicable Date, there were no circumstances which would give rise to the disclosure requirements under Rules 13.13 to 13.19 of the Hong Kong Listing Rules had the H Shares been listed on the Hong Kong Stock Exchange on that date.

Our Directors are aware of the requirement under Rule 13.09(2) of the Hong Kong Listing Rules and will ensure to publish share price sensitive information of our Company in the market of Hong Kong and the PRC. As the controlling shareholder of Shanghai Datun Energy, we will inform the Hong Kong Stock Exchange of any information in connection with Shanghai Datun Energy that is of a price sensitive nature and publish the information in Hong Kong. After the proposed listing, our Company will simultaneously release in Hong Kong, among other things, the quarterly and interim reports of Shanghai Datun Energy pursuant to Listing Rule 13.09(2).

NO MATERIAL ADVERSE CHANGE

Our Directors have confirmed that there has been no material adverse change in our financial or trading position since 30 June 2006 (being the date to which our Company's latest combined financial results were prepared, as set forth in the Accountants' Report included as Appendix I to this Prospectus).

OVERVIEW

Our Company was established on 22 August 2006 by our sole Promoter, ChinaCoal Group.

ChinaCoal Group owns 100% of the issued share capital of our Company immediately prior to the Global Offering. Upon completion of the Global Offering, ChinaCoal Group will own approximately 68.25% of our then issued share capital if the Over-allotment Option is not exercised (or approximately 65.00% if the Over-allotment Option is exercised in full), and will be our Controlling Shareholder.

As part of the Restructuring, which took effect on 22 August 2006, ChinaCoal Group transferred to our Company substantially all its assets, liabilities and interests relating to its coal operations, coking operations, coal mining equipment manufacturing operations, coal mine design and other operations. ChinaCoal Group has retained its assets, liabilities and interests relating to its remaining ancilliary businesses.

The major businesses of ChinaCoal Group include:

- equity interests in certain coal gas, coke and coking coal operations and in certain coal-based chemicals manufacturing and sales operations;
- operations of the Mines under Restructuring;
- coal mine construction and civil engineering construction operations;
- coal bed methane development operations;
- provision of coal export agency services and a small amount of coal trading and agency services business of overseas trading companies;
- community functions such as schools and hospitals;
- a small amount of investment in equity and some non-operational assets; and
- other non-core operations including real estate and hotel development and management.

Except for certain coal and coke production as described under "Non-Competition Agreement" below, there is, and the Restructuring was aimed and implemented to provide, clear delineation between our Company's businesses and those retained by ChinaCoal Group. With the implementation of the preventive measures as described in "Non-Competition Agreement" below, our Directors believe that we will not face significant competition, either directly or indirectly, from ChinaCoal Group. Further details regarding our Restructuring are set out in "Restructuring". For details of the businesses and assets retained by ChinaCoal Group after the Restructuring, see "Group Retained Businesses" below.

In connection with the Restructuring, we have entered into a number of agreements and arrangements with ChinaCoal Group and other connected persons (as defined under the Hong Kong Listing Rules). For details of such agreements and arrangements, see "Connected Transactions." In addition, we have entered into a Non-Competition Agreement with ChinaCoal Group. For details, see "Non-Competition Agreement" below.

COMPETITION

Our Main Businesses

The main businesses conducted by us are as follows:

- Coal operations, being our core business, including coal production and sales and coal trading;
- Coking operations, including the production and sale of coke and coal-based chemicals products;

- Coal mining equipment manufacturing operations, including coal mining equipment design, research and development, manufacturing and sales operations and after-sales services; and
- Other operations including provision of coal mine design services.

Group Retained Businesses

Among the businesses retained by ChinaCoal Group after the Restructuring, the following businesses continued to be operated by ChinaCoal Group (collectively, the "Group Retained Businesses") and may compete with our business after listing:

ChinaCoal Group's Coal Production

ChinaCoal Group (through one or more of its subsidiaries other than our Company) will, after our listing, continue to have the right to operate the following coal mines in the Shanxi Province (the "Mines under Restructuring"): the Dongpo Mine (東坡煤礦), the Tangshangou Mine (唐山溝煤礦), the Yangjian Mine (楊澗煤礦), the Danshuigou Mine (澹水溝煤礦) and the Xishahe Mine (西沙河煤礦).

In 2003, 2004 and 2005 and the six months ended 30 June 2006, the Mines under Restructuring produced an aggregate of 0.85 million tonnes, 1.32 million tonnes, 1.09 million tonnes and 1.57 million tonnes, respectively, of coal products, representing approximately 1.1%, 1.6%, 1.2% and 3.6%, respectively, of coal products sold by our Company during these periods. The corresponding revenue from coal sales was approximately RMB58.4 million, RMB124.4 million, RMB134.2 million and RMB198 million, respectively. Total revenue from coal sales by the Mines under Restructuring accounted for 0.5%, 0.7%, 0.5% and 1.7% of our total revenue from coal sales in the same periods. The extent of competition of the coal produced by the Mines under Restructuring is therefore very limited.

The Mines under Restructuring are currently undergoing consolidation and restructuring by ChinaCoal Group pursuant to the relevant PRC Government policies. Before completion of such consolidation and restructuring, ChinaCoal Group's right to operate the Mines under Restructuring will not be transferred to our Company. We intend to acquire from ChinaCoal Group its interests in the Mines under Restructuring, after such consolidation and restructuring have been completed, by exercising our option or pre-emptive right under the Non-Competition Agreement. When deciding whether to exercise the option or pre-emptive right to acquire any of the Mines under Restructuring, our Company will consider the following principal factors: whether this mine (i) has obtained all requisite licences or permits for its operations; and (ii) has been properly established as a mining enterprise with clear corporate and equity structure. See 'Relationship with ChinaCoal Group — Non-Competition Agreement'. Taking into account the above factors and the current progress with regard to the restructuring of these mines, the Directors estimate that three of the Mines under Restructuring, namely, the Yangjian Mine, the Danshuigou Mine and the Xishahe Mine, will meet the above requirements before the end of 2008.

In the meantime, as a transitional arrangement to reduce any possible competition resulting from ChinaCoal Group's operation of the Mines under Restructuring, we have entered into a coal supplies framework agreement with ChinaCoal Group. Under this agreement, ChinaCoal Group shall procure that all coal products from the Mines under Restructuring be supplied exclusively to our Company for our use on normal commercial terms, which we consider fair and reasonable. ChinaCoal Group has further undertaken not to sell any such coal products to any third party. Further details about this arrangement are set out in "Connected Transactions".

The operational management of each Mine under Restructuring is independent of our Company.

ChinaCoal Group's interest in Taiyuan Coal Gas Corporation Limited

ChinaCoal Group holds, and will after our listing continue to hold, a 47.67% interest in Taiyuan Coal Gas Corporation Limited (太原煤炭氣化(集團)有限責任公司) ("Taiyuan Group"), a limited liability company established in the PRC. Taiyuan Group was established by the Shanxi Provincial Government to supply coal gas to Taiyuan City and is controlled and majority owned by Shanxi Provincial SASAC and other minority shareholders. Taiyuan Group owns a 49.45% interest in Taiyuan Coal Gasification Company Limited (太原煤氣化股份有限公司) ("Taiyuan Coal Gasification"), an A share company listed on the Shenzhen Stock Exchange. Taiyuan Group owns the Changgou Mine (長溝煤礦).

ChinaCoal Group has retained instead of transferred its interest in Taiyuan Group to us due to the following reasons:

- Taiyuan Group is required to guarantee the supply of coal gas in Taiyuan City and is therefore carrying a social benefit obligation. It owns and maintains all the infrastructure for coal gas supply in Taiyuan City. Taiyuan Group's coal gas is supplied at government regulated price, which currently does not reflect either the market demand for and supply of coal gas or the cost of investing in and maintaining the coal gas supply infrastructure. As a result, the coal gas business of Taiyuan Group is operating at a loss;
- ChinaCoal Group does not have a majority control of Taiyuan Group, and any transfer of its 47.67% equity interest in Taiyuan Group is subject to the prior consent of other shareholders of Taiyuan Group. Due to Taiyuan Group's social obligation to supply coal gas to Taiyuan City, the Directors are of the view that ChinaCoal Group may not be able to secure such a consent in the event it requests so;
- The Changgou Mine (長溝煤礦) is currently operating at a loss and is undergoing restructuring and assets disposal in accordance with the relevant PRC Government policies. Therefore, it is not appropriate to transfer the interest of Taiyuan Group to us at the current stage.

In 2003, 2004 and 2005, Taiyuan Group generated total revenue of RMB1,385 million, RMB2,092 million and RMB2,809 million, respectively, and incurred net loss of RMB36 million, RMB49 million and RMB14 million, respectively. Taiyuan Group does not manufacture coal gas, but has a coal gas supply agreement with Taiyuan Coal Gasification, which manufactures coal gas. In 2003, 2004 and 2005, Taiyuan Coal Gasification generated revenue of RMB1,137 million, RMB1,705 million and RMB2,465 million, respectively, and net profit of RMB70 million, RMB164 million and RMB186 million, respectively.

Taiyuan Coal Gasification's principal product is coal gas and has a manufacturing capacity of approximately 566.7 million cubic meters per year. Through Taiyuan Group, coal gas produced by Taiyuan Coal Gasification is sold to target customers including residential and industrial customers in Taiyuan City.

Taiyuan Coal Gasification also yields coke as a by-product during the process of converting coal into coal gas and has an annual coke production capacity of 1.7 million tonnes. However, as a by-product, Taiyuan Coal Gasification's coke production capacity is restricted by the volume of coal gas manufactured and therefore cannot be freely adjusted on a market driven basis. For the three years ended 31 December 2005, it produced and sold approximately 0.8 million tonnes, 1.1 million tonnes and 1.5 million tonnes of coke during the coal gas manufacturing process, representing approximately 80.2%, 109.6% and 115.4%, respectively, of the coke sold by our Company during these three years. The coke products from Taiyuan Coal Gasification are sold to the steel factories in Northern and Eastern China.

In addition, Taiyuan Coal Gasification also sells a certain amount of coking coal to local customers in the Shanxi Province. The coal gas manufacturing process also generates certain quantity of low quality coking coal and coal residual stones. For the three years ended 31 December 2005, Taiyuan Group sold approximately 2.4 million tonnes, 2.2 million tonnes and 3.1 million tonnes of coking coal and residual stones. These coking coal and coal residual stones are sold to local customers in the Shanxi Province.

Other than a small number of transactions which took place in 2003 between ChinaCoal Group and Taiyuan Coal Gasification that amounted to RMB62.1 million, there has been no transaction between the two companies since 2004. The Directors believe that there will be no transactions between our Company and Taiyuan Group or Taiyuan Coal Gasification after the listing of our H Shares on the Hong Kong Stock Exchange.

The Directors are of the view that Taiyuan Group and Taiyuan Coal Gasification are not in direct competition with us and even if there is any competition, it is minimal as described below.

Business Focus

Taiyuan Group and Taiyuan Coal Gasification focus on coal gas production as a utility provider. In contrast, our primarily business is coal production, sales and trading. Our Company's coal operations revenue in the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006 was RMB11,656.7 million, RMB17,733.0 million, RMB25,147.7 million and RMB11,761.0 million, respectively, accounting for 80.5%, 80.0%, 83.7% and 80.1%, respectively, of our total revenue.

Product and Customer Differentiations

- Coal gas: The principal product of Taiyuan Coal Gasification is coal gas, which is supplied to customers in Taiyuan City through Taiyuan Group. The primary target customers of Taiyuan Group are the residential and industrial consumers of Taiyuan City. In contrast, our coal gas is a by-product produced from our coke production and its primary customers include power plants and chemicals companies.

- Coke: Coke produced by Taiyuan Group through Taiyuan Coal Gasification is a by-product from its coal gas production. It is primarily comprised of second grade metallurgical coke and is sold to iron and steel manufacturers in Northern and Eastern China, such as Shandong Laiwu Steel International Corp., Jinan Iron & Steel Group Corp., Tangshan Iron and Steel Co., Ltd. and Tangshan Guofeng Iron & Steel Co., Ltd. In contrast, coke is not our by-product. We produce first grade metallurgical coke, and top-grade and first grade foundry coke. Most of our foundry coke is for export purposes while our metallurgical coke is mainly sold to large iron and steel manufacturing enterprises such as Baoshan Iron & Steel Co., Ltd. None of the major coke customers of Taiyuan Gasification overlaps with our major customers.

- Coking coal: Taiyuan Coal Gasification sells coking coal and coal residual stones, to local customers in the Shanxi Province as by-products from coal gas. Our Company's coal mines produce higher quality coking coal primarily used to produce top-grade and first grade coke. As a result, the coal products of Taiyuan Coal Gasification are not in competition with ours.

In particular, in terms of coke production, the Directors believe that if Taiyuan Coal Gasification is in competition with us, such competition is very limited due to the following reasons in addition to the factors mentioned above:

- Relative significance: Our coking operations contributed significantly less revenue relative to our coal operations. In the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, our coking revenue amounted to RMB1,064.9 million, RMB2,039.2 million, RMB1,591.3 million and RMB1,012.4 million, respectively, representing 7.4%, 9.2%, 5.3% and 6.9%, respectively, of the total revenue of our Company. In terms of sales volume, in 2005, our Company sold 92.2 million tonnes of coal, as compared to only 1.3 million tonnes of coke in the same period. The Directors are of the view that our Company's coking operations, as compared to its coal operations, is relatively small both by revenue and sales volume.

- Limited volume: We produced and sold 0.1 million tonnes, 0.2 million tonnes and 0.7 million tonnes of coke, respectively, in each of the three years ended 31 December 2005. In addition, we sold 0.9 million tonnes, 0.8 million tonnes and 0.6 million tonnes of coke, respectively, on a trading basis during the same period. The Directors believe that even if Taiyuan Group is in competition with us, such competition is limited to the extent of our coke output, which amounts to approximately 0.7 million tonnes in 2005. As such, competition, if any, is very minimal.

- Fragmented market: The total volume of coke production in the PRC for the years ended 31 December 2003, 2004 and 2005 was approximately 178 million tonnes, 208 million tonnes and 243 million tonnes, respectively. Taiyuan Group and Taiyuan Gasification's coke sales volume accounted for 0.4%, 0.5% and 0.6%, respectively, of the total sales volume in the PRC during this period. In comparison, our coke sales volume accounted for 0.5%, 0.4% and 0.3% of the total volume during this period. As such, considering the very small market share of Taiyuan Group, Taiyuan Gasification and us in the PRC coke market, the Directors are of the view that the likelihood that coke sold by our Company directly competing with that from Taiyuan Group and Taiyuan Gasification is extremely small.

- Production flexibility: The coke production of Taiyuan Coal Gasification, as a by-product, is restricted by the coal gas demand in Taiyuan City and therefore cannot be freely adjusted in response to sudden change in market demand or supply.

The core management personnel of Taiyuan Group and Taiyuan Coal Gasification are independent of ours. We have been granted an option and a pre-emptive right to acquire ChinaCoal Group's interest in Taiyuan Group under the Non-Competition Agreement, but currently we do not have any plan to exercise such a right.

Other than the competing businesses disclosed in this Prospectus, ChinaCoal Group does not have any other interest in any other business which competes or is likely to compete with our core business.

Non-Competition Agreement

We entered into a Non-Competition Agreement with ChinaCoal Group, under which ChinaCoal Group agreed not to compete with us in our core business and granted us options and pre-emptive rights to acquire the Group Retained Businesses and certain future new business from ChinaCoal Group.

ChinaCoal Group has undertaken in the Non-Competition Agreement that, other than the Group Retained Businesses described above, during the period of the Non-Competition Agreement, ChinaCoal

Group will not compete with us, directly or indirectly, whether on its own or jointly with other entities in any activities or businesses which directly or indirectly competes with our core business, whether inside or outside the PRC. ChinaCoal Group has also undertaken to procure that any other company in which ChinaCoal Group is a Controlling Shareholder (as defined in the Hong Kong Listing Rules) will not compete with us. In addition, ChinaCoal Group has undertaken that the Group Retained Businesses do not generally compete with our core business as some of the Group Retained Business are still currently under restructuring or development. In addition, ChinaCoal Group has granted us options and pre-emptive rights to acquire the Group Retained Businesses under the Non-Competition Agreement.

ChinaCoal Group has undertaken in the Non-Competition Agreement that, during the period of the Non-Competition Agreement:

(a) if ChinaCoal Group becomes aware of a business opportunity which directly or indirectly competes, or may lead to competition, with our core business, ChinaCoal Group or any of its subsidiaries will notify us of such business opportunity immediately upon becoming aware of it. ChinaCoal Group is also obliged to use its best efforts to procure that such opportunity is first offered to us upon terms which are fair and reasonable. ChinaCoal Group has also undertaken to provide us with all information necessary to enable us to make an informed decision on whether to acquire such new business opportunities. ChinaCoal Group shall procure that companies in which it holds an interest as a Controlling Shareholder comply with this provision. Any decision on whether to take up such a business opportunity will be decided by our independent non-executive Directors; and

(b) we have been granted by ChinaCoal Group for the duration of the Non-Competition Agreement:

  (i) options to purchase the following interests on the basis of valuation conducted by an independent valuer jointly appointed by ChinaCoal Group and us, subject to any relevant laws and applicable listing rules and existing third party pre-emptive rights:

    - any interest in the Group Retained Businesses which directly or indirectly competes or is likely to compete with our core business and which is retained by ChinaCoal Group as part of the Restructuring; and
    - any interest in any business of ChinaCoal Group resulting from the business opportunity referred to in paragraph (a) above which has been offered to, but has not been purchased or taken up by us and has been retained by ChinaCoal Group;

  (ii) pre-emptive rights to purchase the following interests on terms no less favorable than those of third parties, if ChinaCoal Group or any of its associates intends to transfer, sell, lease or license such interests to any third party:

    - any interest in the Group Retained Business which directly or indirectly competes with or is likely to compete with our core businesses;
    - any interest in any business of ChinaCoal Group resulting from the business opportunity referred to in paragraph (a) above, which has been offered to, but has not been purchased or taken up by us and has been retained by ChinaCoal Group or any of its subsidiaries or associates; and

  (iii) On the exercise of such option or the pre-emptive right, ChinaCoal Group shall transfer such interest to our Company.

In relation to our pre-emptive rights described in paragraph (b)(ii) above, under the Non-Competition Agreement, ChinaCoal Group must notify us before the transfer of its relevant interest to a third party. It is further provided that such notice must set out full terms of the proposed transfer and any information which may reasonably be required by us in order for us to make a decision as to whether we ought to exercise the pre-emptive rights. Any decision on whether to exercise the pre-emptive rights will be made by our independent non-executive Directors. ChinaCoal Group has undertaken to provide such information as may be reasonably requested by our independent non-executive Directors for them to properly consider whether to exercise such pre-emptive rights.

ChinaCoal Group conducts semi-annual working meetings with all of its subsidiaries, including us, to review the operational and financial performance of its business portfolio and to discuss business plans. Members of our senior management will represent us at these meetings, at which they may make enquiries of the performance of the Group Retained Businesses to enable them to consider whether exercising the options is in our interest. In addition, ChinaCoal Group has also undertaken to provide and use reasonable endeavours to procure the provision to our Company such other information as may be necessary for us to properly consider whether to exercise the options under the Non-Competition Agreement. At least on a semi-annual basis, based on the information from meetings with ChinaCoal Group and other information so provided by ChinaCoal Group, our independent non-executive Directors will consider whether ChinaCoal Group has complied with the non-competition undertakings and whether any option or pre-emptive right should be exercised or not exercised. Further, any exercise or non-exercise of any option under the Non-Competition Agreement would constitute a connected transaction. When our Board decides whether to exercise such an option or a pre-emptive right, only our independent non-executive Directors have the right to vote.

When considering whether to exercise or not to exercise any option or pre-emptive right under the Non-Competition Agreement, our independent non-executive Directors will take into account various factors including, among others, the following:

- whether the competing business under consideration has obtained all requisite licences or permits for its operations;
- in respect of any of the Mines under Restructuring, whether such mines have obtained the requisite mining right permit, safety production permits and have complied with the relevant environmental laws and regulations;
- whether the competing business or new business opportunity under consideration is in line with our then development strategy;
- whether the competing business or new business opportunity has reached a sufficiently developed stage that it would be in the interest of our shareholders as a whole to exercise the options or pre-emptive rights.

If we decide to exercise or not to exercise any option or pre-emptive right under the Non-Competition Agreement, we will also disclose such decision either in our annual reports or public announcements in addition to complying with the disclosure requirements of the Hong Kong Listing Rules. The disclosure requirements for any decision to exercise or not to exercise the options to acquire interests held by ChinaCoal Group will be regulated by the Hong Kong Listing Rules. Accordingly, where a decision to exercise or not to exercise an option under the Non-Competition Agreement is required under the Hong Kong Listing Rules to be disclosed, a public announcement will be made unless a waiver has been obtained from the Hong Kong Stock Exchange. In circumstances where a decision to exercise or not to exercise an option is not required to be announced under the Hong Kong Listing Rules, such as where the relevant percentage ratio is below the relevant de minimis

thresholds, under the Hong Kong Listing Rules, disclosure of the decision will be made in our annual report of the year in which the decision is made. The value of the target company or business will be used for the purpose of calculating the relevant percentage ratio under the Hong Kong Listing Rules. We will also disclose in our annual reports on how the non-competition undertakings are complied with and enforced.

The Non-Competition Agreement took effect on 5 September 2006 and shall remain effective until the earlier of (a) the date on which ChinaCoal Group directly or indirectly beneficially holds less than 30% of our issued share capital; and (b) the date on which our Shares cease to be listed on the Hong Kong Stock Exchange, or any other recognized international stock exchange.

New business opportunities pursued by ChinaCoal Group

To date, ChinaCoal Group has, in accordance with the Non-Competition Agreement, informed us of the following new business opportunities:

- proposed coal-based chemicals project relating to production of coal-based dimethylether in the Inner Mongolia Autonomous Region;
- coal-based chemicals project relating to coal-based methanol and alkene in Harbin City, the Heilongjiang Province;
- proposed investment relating to participation in the consolidation and restructuring of local mines, coal-based chemicals and related projects in the Shanxi Province; and
- cooperation with a research organization at the State level for construction of a coal-based chemicals and new energy research and development centre in the Liaoning Province.

As for coal-based chemicals project relating to coal-based methanol and alkene in Harbin City, the Heilongjiang Province, on 19 September 2006, the SASAC approved the transfer of 57.92% and 100% equity interests in Harbin Coal Industry Company ("Harbin Coal") and Harbin Gasification Company ("Harbin Gasification"), respectively, to ChinaCoal Group for nil consideration. Harbin Coal has a coal mine with an annual production of 1.8 million tonnes, which is predominantly used by Harbin Coal for the production of coal gas, with the remaining being used for production of methanol and electricity generation for its own consumption. Harbin Gasification currently produces approximately 2.42 million cubic meters of gas per day and approximately 140,000 tonnes of methanol annually.

As of the Latest Practicable Date, other than the development of the coal-based chemicals project in Harbin City, the Heilongjiang Province, ChinaCoal Group has only entered into framework agreements with the relevant parties in respect of the above three other new business opportunities.

ChinaCoal Group has, in accordance with the Non-Competition Agreement, informed and invited us to participate in the above four new business opportunities. We have decided not to accept the above new business opportunities at this initial stage after due consideration because:

- coal-based methanol, dimethylether and alkene do not cause any competition with our core business as they are industrial chemicals products processed from coal, and are mainly used as fuel or fuel substitute. The major coal-based products produced by our Company are tar, benezene and refined naphthalene, which are mainly used as productive materials of other industrial chemical products. For example, tar can be used in modified asphalt and coloring agent; benzene and naphthalene can be used in producing explosives and other chemicals products; and

- local coal mines, before the completion of their consolidation and restructuring, are not suitable to be transferred to us since these mines normally have regulatory compliance issues, such as operating without obtaining all requisite licences or permits or in compliance with the relevant environmental and safety laws and regulations. In addition, such mines normally are not properly established as a mining enterprise with clear corporate and ownership structure.

The coal-based chemicals projects in the Inner Mongolia Autonomous Region and in Harbin City, the Heilongjiang Province, as well as the research project in the Liaoning Province all involve research and development or production of coal-based methanol, dimethylether and alkene. Such new business opportunities do not cause any competition with our core business. Further, as ChinaCoal Group has only entered into a framework agreement with the provincial government of the Shanxi Province for the proposed restructuring of local mines in the Shanxi Province, the Directors are also of the view that there is no competition arising from such business opportunity. See "Relationship with ChinaCoal Group - ChinaCoal Group's coal production".

ChinaCoal Group has provided our independent non-executive Directors with the necessary information relating to these new business opportunities. Having reviewed the information and made reasonable enquiries, all independent non-executive Directors are of the view that the new business opportunities are not mature and therefore agree not to accept them at this stage. We will continue to monitor the development of these opportunities and have reserved our rights to exercise our option under the Non-Competition Agreement to acquire ChinaCoal Group's interests in the businesses that may result from such opportunities in the future.

INDEPENDENCE FROM CHINACOAL GROUP

Having considered the following factors, we are satisfied that we can conduct our business independently from ChinaCoal Group and its associates after the Global Offering:

Our Restructuring

The separation of businesses, assets and liabilities between ChinaCoal Group and our Company in connection with the Restructuring, including adopting relevant legal procedures, implementing internal control and management functions, making required governmental registrations and obtaining third party consents, has been, or is expected to be, completed before listing. All governmental approvals required for the completion of the separation have been or will be obtained.

Independence of board and management

Composition of the Board and the senior management

Our Board comprises nine Directors, seven of whom are not associated with ChinaCoal Group. Of these seven Directors, five are independent non-executive Directors and two are executive Directors. Set out below is a table summarising the positions held by the Directors at our Company and ChinaCoal Group:

No	Name	Position with our Company	Position with ChinaCoal Group [1]
Board of Directors			
1.	Jing Tianliang....	Chairman and Executive Director	President
2.	Zhang Baoshan ..	Vice Chairman and Non-Executive Director	Vice President and Chief Engineer
3.	Yang Lieke.....	Executive Director and President	None
4.	Peng Yi.....	Executive Director, Executive Vice-president and Chief Financial Officer	None
5.	Gao Shangquan ..	Independent Non-Executive Director	None
6.	Zhang Ke	Independent Non-Executive Director	None
7.	Peng Ru Chuan ..	Independent Non-Executive Director	None
8.	Wu Rongkang ...	Independent Non-Executive Director	None
9.	Li Yanmeng	Independent Non-Executive Director	None

Apart from those of our Directors set out above with concurrent positions with ChinaCoal Group, none of our senior management hold any position within ChinaCoal Group, and all such senior management members are full-time employees of our Company as shown in the table below:

No	Name	Position with our Company	Position with ChinaCoal Group [1]
Senior Management			
1.	Gao Jianjun	Vice President	None
2.	Li Fuyou.....	Vice President	None
3.	Qi Hegang	Vice President	None
4.	Niu Jianhua	Vice President	None
5.	Zhou Dongzhou ..	Secretary to the Board and Joint Company Secretary	None

(1) ChinaCoal Group does not have a board of directors.

Our Board will function independently from ChinaCoal Group despite that two of the Directors have overlapping positions with ChinaCoal Group for the following reasons:

- The majority, or seven out of nine members, of our Board has no overlapping position with ChinaCoal Group. It is our Board as a whole, and not the individual Directors, which makes decisions for our Company pursuant to our Articles of Association.
- The day-to-day operation of our Company is managed by our senior management, who are all independent of ChinaCoal Group and are our full time employees.
- We have five independent non-executive Directors who are independent from our Company and ChinaCoal Group and they form the majority of our Board.

- Our independent non-executive Directors have diversified skills and expertise and our Board will benefit from their independent advice on different aspects of our operations. We expect to benefit from the advice of our independent non-executive Directors on the following different areas:

Gao Shangquan	We expect to benefit from the substantial experience of Mr. Gao in the economic reforms and systems of China.
Zhang Ke	We expect to benefit from the substantial experience of Mr. Zhang in accounting, finance, corporate governance, internal control and auditing.
Peng Ru Chuan	We expect to benefit from Mr. Peng's substantial experience in advising PRC listed issuers on their compliance obligations under the Hong Kong Listing Rules.
Wu Rongkang	Our Board will benefit from Mr. Wu's extensive professional knowledge and experience of the PRC coal industry.
Li Yanmeng	Mr. Li has extensive experience in the PRC power industry and our Board will benefit from his experience and knowledge in the PRC power and energy industry.

- Our Board has put in place various mechanisms to avoid conflicts of interest to ensure independent decision-making and to safeguard the protective measures of the non-competition undertakings under the Non-Competition Agreement.

The decision-making mechanism of our Board as set out in the Articles of Association includes provisions to avoid conflicts of interest by providing, among other things:

- When our Board is to decide on a matter which involves a transaction between our Company and another company or entity (i) with overlapping Director(s) or (ii) where a Director is engaged as a member of the senior management of the proposed counter-party, the overlapping Director shall abstain from voting on any proposed resolution involving the proposed counter-party;
- Such resolution will only be passed by the affirmative votes of at least half of the total number of Directors not associated with the proposed counter-party voting the resolution; and
- The decision so made at such meeting shall be deemed a decision of the board as if the decision were made by the full board.

In relation to enforceability of the protective measures (such as options, pre-emptive rights or acceptance of new business opportunities) under the Non-Competition Agreement, the Non-Competition Agreement contains the following protective measures:

- Any decision whether (i) to accept or not to accept any new business opportunity; or (ii) to exercise or not to exercise any option or pre-emptive rights under the Non-Competition Agreement, will only be made by our independent non-executive Directors;
- ChinaCoal Group will organize semi-annual working meetings with ChinaCoal Group to review ChinaCoal Group's business portfolio and business plans and to enable our independent non-executive Directors to consider whether to exercise the option under the Non-Competition Agreement; and

- ChinaCoal Group has undertaken to provide and use reasonable endeavours to procure the provision to our Company such other information as may be necessary for us to properly consider whether to exercise the option under the Non-Competition Agreement.

For more details of the enforceability of the protective measures under the Non-Competition Agreement, see "Non-Competition Agreement" in this section.

As such, when conflicts of interest situation arises, for example, when considering a connected transaction with ChinaCoal Group, the two overlapping Directors who are also members of the senior management of ChinaCoal Group shall abstain from voting on the proposed resolution to decide such transaction and hence they will not be in position to affect the decision of the Board on matters in which ChinaCoal Group may be interested. Further, following the listing of our Company on the Hong Kong Stock Exchange, our Board has to comply with the provisions of the Hong Kong Listing Rules and certain matters, in particular, connected transactions shall be referred to the independent non-executive Directors for review and recommendations. When considering the exercise of options or pre-emptive rights under the Non-Competition Agreement, only the independent non-executive Directors will make the decision, thereby ensuring the independence of Board when deciding on such matters.

Based on the above, our Board is satisfied that there are sufficient and effective preventive measures to manage conflicts of interest and that our Board is able to operate independently of ChinaCoal Group.

Non-competition undertaking

As stated in the sub-section headed "Non-Competition Agreement" in this section and as we have put in place various mechanisms to ensure the enforceability of the protective measures of the Non-Competition Agreement, our Directors believe that we will not face significant competition, directly or indirectly, from ChinaCoal Group.

Our assets and businesses

Following the Restructuring, we own five mining areas comprised of nine mines in operations and three mines under development. Our marketable coal reserves were over 3,000 million tonnes, which we expect will provide stable coal resources to fulfill our coal production requirements necessary for carrying on our business. We have also obtained, through the Restructuring, ChinaCoal Group's overall sales-related resources, including its extensive sales and marketing network, integrated port facilities, established customer base, well-recognized brand names, trademarks and valuable market experience.

We have obtained our own business licenses necessary for our headquarters, and substantially all of our other entities have completed their registrations with the local Administrations for Industry and Commerce. We anticipate that those entities which have not yet completed their registrations will be able to complete the registration process before listing.

We also have our own relevant industry licenses required to carry on our business, except for the relevant coal export qualification which could not be freely transferred under the current PRC regulatory regime. We have therefore entered into an agency agreement to appoint ChinaCoal Group as our non-exclusive coal export and sales agent. Under the agreement, the agency services provided by ChinaCoal Group shall be made on terms no less favorable to us than those available from other export agents. The transaction is more fully described under "Connected Transactions". In respect of our coke export, we plan to independently

apply for our coke export licence and quotas after listing, and have appointed ChinaCoal Group as our non-exclusive coke export agent in the interim period.

Operational independence

Pursuant to the Restructuring, ChinaCoal Group has transferred most of its assets, liabilities and interests of its coal operations, coking operations, coal mining equipment manufacturing operations and coal mine design operations to our Company. The chains of production, supply and sales of the above businesses are complete, and their operations are independent.

ChinaCoal Group has partly retained the function of supplying supplemental raw materials, buildings, land use rights, trade marks and the State coal export trading qualification relating to the above businesses. To govern the transactions between ChinaCoal Group and our Company arising from the above retained businesses, ChinaCoal Group and our Company have entered into a series of connected transaction agreements. The terms and conditions of these agreements are on normal commercial terms which we believe to be fair and reasonable and in the interests of our shareholders as a whole. Furthermore, the renewal or modification of the terms and conditions or the entering into of any new agreement with ChinaCoal Group will be subject to the strict regulation of connected transactions under the Hong Kong Listing Rules. If the relevant terms and conditions are unfair, our Company has the right to cease using ChinaCoal Group's services.

We are not dependent on ChinaCoal Group with respect to raw material supplies or buildings and land leases under the relevant connected transaction agreements. These transactions only represented less than 5% of our total cost of operations and provision of these materials and leasing of these buildings and land are supplemental. In addition, pursuant to the connected transaction agreements, if ChinaCoal Group cannot provide the materials, buildings and land use rights upon reasonable terms, our Company is entitled to choose a third party who can provide such materials and services upon better terms. Therefore, these transactions will not have a material impact on the operations of our Company.

We are not dependent on ChinaCoal Group for its export sales agency services. In addition to ChinaCoal Group, there are three other operators who are authorized to export coal. The Coal Export and Sales Agency Agreement stipulates that if the terms provided by other authorized holders of coal export trading rights are more favorable than those provided by ChinaCoal Group, our Company is entitled to use the services of other authorized export agents. We do not expect any difficulties in entering into export agency arrangements with any of these authorized operators.

We have secured the long-term use of ChinaCoal Group's trademarks by entering into a ten-year trademarks license framework agreement, renewable for another ten years. Pursuant to this agreement, ChinaCoal Group has licensed to our Company the right to use its registered trademarks and trademarks in application in the PRC, Japan, Hong Kong and Korea relevant to our business operations. The trademarks license framework agreement contains a non-cancellable clause and ChinaCoal Group is therefore not entitled to unilaterally terminate this agreement.

Based on the above reasons, the Directors are of the view that there is no operational dependence by us on ChinaCoal Group. Further details about these transactions between our Company and ChinaCoal Group are set out in "Connected Transactions".

Further, our operational decisions are made by and through our shareholders' meeting, our Board, our supervisory committee and our management according to their respective duties.

We have our own organizational structure comprised of independent departments and business and administrative units, each with specific areas of responsibility. We have also maintained a set of comprehensive internal control procedures to facilitate the effective operation of our business.

Our Financing

We will have settled all amounts due from us to ChinaCoal Group and its associates and procured the release of all guarantees provided to us by ChinaCoal Group and its associates by the time of listing. We have sufficient capital to operate our business independently, and have adequate internal resources and a strong credit profile to support our daily operations. See "Financial Information — Working capital confirmation".

We have our own finance department and have established our own financial auditing system independent of ChinaCoal Group. We have an independent bank account, have made independent tax registrations and have employed a sufficient number of dedicated financial accounting personnel.

In accordance with an agreement between ChinaCoal Group and China Development Bank, ChinaCoal Group is entitled to allocate, without prior consent from China Development Bank, part or all of a RMB22 billion banking facility under the agreement to any of its subsidiaries. We have applied to China Development Bank for the grant, subject to the bank's credit appraisal and internal approval process, of separate and new banking facilities of not less than RMB22 billion to our Company. The Directors believe that our Company will obtain the new banking facilities prior to the listing.

OUR RESTRUCTURING

Our Company was established on 22 August 2006 as a joint stock limited company under the PRC law. Pursuant to the Restructuring Agreement which took effect on 5 September 2006, ChinaCoal Group transferred to our Company substantially all its assets, liabilities and interests related to its coal operations, coking operations, coal mining equipment manufacturing operations and other related businesses. For further details regarding our Restructuring, see "Restructuring".

Restructuring Agreement

On 5 September 2006, ChinaCoal Group and our Company entered into the Restructuring Agreement. Under the Restructuring Agreement, ChinaCoal Group has made various representations and warranties in relation to the businesses, assets, liabilities and interests transferred to our Company under the Restructuring, and has agreed to be responsible for all tax liabilities associated with such transferred businesses, assets, liabilities and interests incurred before the Restructuring. ChinaCoal Group has also agreed to indemnify our Company against claims, losses or expenses incurred by our Company in connection with or arising from, among other things:

- any breach of any provision of the Restructuring Agreement on the part of ChinaCoal Group or its subsidiaries (excluding our Company);
- the businesses, assets, liabilities and interests retained or held by ChinaCoal Group following the Restructuring;
- any rights and interests in relation to all employees of our Company who were employed by ChinaCoal Group before the Restructuring for the period of their employment by ChinaCoal Group;
- any title defect in respect of properties being acquired by our Company prior to the Restructuring;
- any litigation or other claims against our Company that relate to events or circumstances occurring before the effective date of the Restructuring in relation to businesses, assets, liabilities and interests transferred to our Company under the Restructuring, except those that are disclosed and provided for in the audited financial statements.

Non-Competition Agreement

In connection with the Restructuring, ChinaCoal Group and our Company entered into a Non-Competition Agreement on 5 September 2006. Under that agreement, ChinaCoal Group has undertaken to our Company that except in certain limited circumstances, for so long as the agreement remains effective, it shall not, and shall procure its associates (excluding our Company) not to, directly or indirectly and in whatever manner, engage, participate or be interested in, or provide support to, any business or activity which competes or may compete with our current or future core businesses. ChinaCoal Group has also granted us an option and pre-emptive rights to acquire certain interests retained by ChinaCoal Group following the Restructuring and certain future business. Further details about the Non-Competition Agreement are set out in "Relationship with ChinaCoal Group".

Implications under the Hong Kong Listing Rules

Any transaction that might take place after our listing pursuant to any agreement or arrangement described in this "Our Restructuring" sub-section is made in the performance of the relevant transaction

already entered into before listing. Such transaction will therefore not constitute connected transactions or continuing connected transactions of our Company under Chapter 14A of the Hong Kong Listing Rules, and will not be subject to further regulatory requirements under the Hong Kong Listing Rules, except as described in "Relationship with ChinaCoal Group — Non-Competition Agreement".

CONNECTED PERSONS

In addition to the Restructuring Agreement and the Non-Competition Agreement, our Company has entered into certain other agreements or transactions with entities which will become connected persons (as defined under Chapter 14A of the Hong Kong Listing Rules) of our Company upon listing, and such agreements or transactions will constitute connected transactions or continuing connected transactions of our Company under the Hong Kong Listing Rules. These entities include:

(i) ChinaCoal Group: Immediately following completion of the Global Offering, ChinaCoal Group will own approximately 68.25% of our Company's then issued share capital if the Over-allotment Option is not exercised (or 65.0% if the Over-allotment Option is exercised in full). ChinaCoal Group will therefore be the Controlling Shareholder, and hence a connected person, of our Company by virtue of Rule 14A.11(1) of the Hong Kong Listing Rules.

(ii) Certain associates (as defined under Chapter 19A of the Hong Kong Listing Rules) of ChinaCoal Group, excluding our Company and our subsidiaries: Such associates will be connected persons of our Company by virtue of Rule 14A.11(4) of the Hong Kong Listing Rules.

(iii) The following entities (in alphabetical order), each of which is a substantial shareholder (as defined under the Hong Kong Listing Rules) of a subsidiary of our Company, will therefore become connected persons of our Company by virtue of Rule 14A.11(1) of the Hong Kong Listing Rules. These entities (collectively, our "Subsidiaries' Substantial Shareholders"), except for their respective shareholding interests in the relevant subsidiary of our Company, are otherwise independent of us:

- Datong Coal Industry Co., Ltd. (大同煤業股份有限公司): A company whose A shares are listed on the Shanghai Stock Exchange and is 60.5% owned by Datong Coal Mine Group (大同煤礦集團), a 40% shareholder of Datong China Coal Export Base Development Co., Ltd. (大同中煤出口煤基地建設有限公司) (one of our subsidiaries) of which our Company directly and indirectly owns 60%.

- Shanxi Longquan Foundry Coke Company Limited (汾陽市龍泉鑄造焦有限公司): A 40% shareholder of China Coal & Coke Longquan Limited (汾陽市中煤龍泉焦化有限公司) (one of our subsidiaries) of which our Company has an indirect ownership of 60%.

- Lingshi Jiuxin Coal Preparation Company Limited (靈石縣九鑫選煤有限責任公司): A 25% shareholder of China Coal & Coke Jiuxin Limited (靈石縣中煤九鑫焦化有限責任公司) (one of our subsidiaries) of which our Company has an indirect ownership of 75%.

- Shuozhou Shuocheng Liu Jia Kou Coal Transportation Terminal (朔州市朔城區劉家口煤炭集運站): A 25% shareholder of Shuozhou China Coal Pingshuo Energy Co., Ltd. (朔州中煤平朔能源有限公司) (one of our subsidiaries) which is 51% owned by our Company.

- Shaanxi Yulin Coal Export Group Corporation (陝西榆林煤炭出口(集團)有限責任公司): A 26% shareholder of Shaanxi Nanliang Coal Co., Ltd. (陝西南梁礦業有限公司) (one of our subsidiaries) of which our Company directly and indirectly owns 55%.

- Shuozhou Pingshuo Luda Railway Transportation Co., Ltd. (朔州市平朔路達鐵路運輸有限公司): it is a subsidiary of Datong Luda Railway Transportation Co., Ltd. (大同路達鐵路運輸有限公司) (holding 62.5% interest in Shuozhou Pingshuo Luda Railway Transportation Co., Ltd. (朔州市平朔路達鐵路運輸有限公司)). Datong Luda Railway Transportation Company Limited (大同路達鐵路運輸有限公司) holds a 19% interest in Shuozhou China Coal Pingshuo Energy Co., Ltd. (朔州中煤平朔能源有限公司) (one of our subsidiaries) which is a 51% owned subsidiary of our Company.

(iv) Jiangsu Datun Aluminium Company Limited (江蘇大屯鋁業有限公司) ("Datun Aluminium"): Datun Aluminium is 75% owned by Shanghai Datun Energy (上海大屯能源股份有限公司) (a 62.43% subsidiary of our Company) and 25% owned by China Coal Hong Kong Limited (a wholly-owned subsidiary of ChinaCoal Group). Datun Aluminum is therefore an indirect non wholly-owned subsidiary, and will by virtue of Rule 14A.11(5) of the Hong Kong Listing Rules become a connected person, of our Company.

EXEMPT CONTINUING CONNECTED TRANSACTIONS

Our Company has entered into certain agreements or transactions which will, upon our listing, constitute exempt continuing connected transactions of our Company. These transactions are made on normal commercial terms where each of the relevant "percentage ratios" calculated for the purpose of Chapter 14A of the Hong Kong Listing Rules will, as the Directors currently expect, not be more than 0.1% on an annual basis. By virtue of Rule 14A.33(3)(a), these transactions are exempt from the reporting, announcement and independent shareholders' approval requirements under Chapter 14A of the Hong Kong Listing Rules, and they include:

- ***Coke Export Agency***: ChinaCoal Group has the licence required and valid quotas to perform coke exports in the PRC. On 5 September 2006, we entered into a coke export agency framework agreement to appoint ChinaCoal Group as our non-exclusive coke export agent, and ChinaCoal Group has agreed to allocate all coke export quotas it obtains for our use. ChinaCoal Group also agreed to provide the coke export services free of charge. The agreement took effect on the date of our incorporation and expires on 31 December 2008, and is subject to renewal. After listing, we will independently apply for coke export qualification and quotas, the receipt of which shall automatically terminate this agreement.

- ***Trademarks License***: On 5 September 2006, our Company and ChinaCoal Group entered into a trademarks license framework agreement. Pursuant to that agreement, ChinaCoal Group has agreed to grant to us and our subsidiaries a non-exclusive license to use trademarks, including the "ChinaCoal" brands, registered or being applied for registration by ChinaCoal Group in the PRC, Japan, Hong Kong and Korea for a nominal fee of RMB1 per year for an initial term of 10 years from 22 August 2006, being the date of incorporation of our Company. The trademarks license framework agreement contains a non-cancellable provision upon which ChinaCoal Group shall not terminate the agreement without our consent.

NON-EXEMPT CONTINUING CONNECTED TRANSACTIONS

As a result of our Restructuring, our Company has also entered into certain other agreements or transactions with ChinaCoal Group and other connected persons of our Company which will, upon our listing, constitute non-exempt continuing connected transactions of our Company under Chapter 14A of the Hong Kong Listing Rules. These transactions include:

Transactions	Parties
Continuing connected transactions between our Company (and our subsidiaries), and ChinaCoal Group and its associates	
Coal Export and Sales Agency Framework Agreement	Our Company and ChinaCoal Group
Coal Supplies Framework Agreement	Our Company and ChinaCoal Group
Integrated Materials and Services Mutual Provision Framework Agreement	Our Company and ChinaCoal Group
Mine Construction and Design Framework Agreement	Our Company and ChinaCoal Group
Property Leasing Framework Agreement	Our Company and ChinaCoal Group
Land Use Rights Leasing Framework Agreement	Our Company and ChinaCoal Group
Continuing connected transactions between our Company (and our subsidiaries) and connected persons at our subsidiaries' level	
Coal/Coke Product Sales Framework Agreements	Our Company and each of Datong Coal Industry Co. Ltd. (大同煤業股份有限公司), Shanxi Longquan Foundry Coke Company Limited (汾陽市龍泉鑄造焦有限公司), Lingshi Jiuxin Coal Preparation Company Limited (靈石縣九鑫選煤有限責任公司), Shuozhou Shuocheng Liu Jia Kou Coal Transportation Terminal (朔州市朔城區劉家口煤炭集運站) and Shaanxi Yulin Coal Export Group Corporation (陝西榆林煤炭出口(集團)有限責任公司)
Railway Leasing and Management Entrustment Service Framework Agreement	Our Company and Shuozhou Pingshuo Luda Railway Transportation Co., Ltd. (朔州市平朔路達鐵路運輸有限公司)
Continuing connected transactions between our Company (and our relevant subsidiary), and our non wholly-owned subsidiary, being itself a connected person	
Provision of Intra-Group Guarantees	Our Company and Datun Aluminium

Details of these continuing connected transactions and the associated annual caps, and certain principal terms of the relevant agreements are set out below. Certain charges for the services under the agreements will be determined based on PRC Government-prescribed prices or guidance prices, if available and applicable. Those transactions where the charges are not set by reference to such prescribed or guidance prices are determined based on commercial negotiations between the parties, in each case on an arm's length basis. The terms of these agreements are, as currently anticipated, no less favorable than terms as may be available to our Company and our subsidiaries from independent third parties.

In compliance with the relevant requirements under the Hong Kong Listing Rules, our Company has set maximum annual consideration or values, or annual caps, in respect of each of these continuing connected transactions. These annual caps are determined by reference to factors including previous transactions and figures when available and readily ascertainable.

A. Continuing Connected Transactions Between Our Company (Or Relevant Subsidiaries) And ChinaCoal Group And Its Associates

1. Coal Export and Sales Agency Framework Agreement

Under the PRC law and regulations, coal exports shall only be made through one of four authorized PRC enterprises including ChinaCoal Group. The coal export licence is not freely transferable under current PRC regulatory regime. Our Company has appointed ChinaCoal Group as our coal export sales agent under a Coal Export and Sales Agency Framework Agreement entered into on 5 September 2006.

Pursuant to the Coal Export and Sales Agency Framework Agreement, our Company has appointed ChinaCoal Group as our non-exclusive export and sales agent for the provision of export quotas and export agency services in respect of our coal products. The principal terms of the Coal Export and Sales Agency Framework Agreement are as follows:

- ChinaCoal Group shall ensure that among the coal export quotas allocated to it, there are sufficient quotas to satisfy our Company's coal exports.
- Agency services provided by ChinaCoal Group shall include export contracts signing, application for export licence and foreign exchange settlement.
- We shall select our overseas customers for our coal products, and determine the price, quantity and other contract provisions. ChinaCoal Group shall consult with us before entering into specific provisions of coal export contracts.
- ChinaCoal Group shall receive from our overseas customers the proceeds for coal products sold pursuant to coal export contracts and shall remit the proceeds received from overseas customers to our Company's designated bank account within five days of receipt.
- We shall be responsible for all expenses incurred in transporting the coal products to the port and the associated on-board packaging for exports. In case the relevant export contract incorporates CFR and CIF terms, we shall also be responsible for all shipping expenses incurred and CIF-insurance charges needed.
- The agency services provided by ChinaCoal Group shall be made on terms no less favorable to us than those available from other agents. If the terms offered by other coal export licence holders are more favorable than those offered by ChinaCoal Group, we expect that it will not be difficult for our Company to enter into export agency arrangement with such export licence holders.
- In respect of export sales to the China Taiwan markets, ChinaCoal Group may engage its offshore wholly-owned subsidiaries to perform the relevant export sales services.

The Coal Export and Sales Agency Framework Agreement took effect on the date of incorporation of our Company and expires on 31 December 2008, and is subject to renewal.

Pricing

The agency fees payable to ChinaCoal Group by us shall be determined on the basis of relevant market rates. Currently, (i) the agency fee for coal exports to countries and territories other than the China Taiwan market is 0.7% of the FOB price in respect of each tonne of coal products exported; and (ii) the agency fee for coal exports and sales to the China Taiwan markets is 0.7% of the FOB price, plus U.S.$0.5 per tonne of coal products sold.

The agency fees are payable on a monthly basis in arrears, subject to receipt by us of the proceeds from ChinaCoal Group in respect of coal exports and sales made during that month.

Historical figures

For the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, the total volume and value of our coal products sold overseas were approximately 14.0 million tonnes, 15.2 million tonnes, 11.5 million tonnes and 4.4 million tonnes, respectively, representing sales of approximately RMB4,449.5 million, RMB5,222.8 million, RMB5,427.6 million and RMB1,863.2 million, respectively. Based on the above pricing principles agreed under the Coal Export and Sales Agency Agreement (as if our Company had been incorporated since 1 January 2003 and the agreement had been in place since that date), the estimated agency fees that would have been paid to ChinaCoal Group in 2003, 2004 and 2005 and the six months ended 30 June 2006 were approximately RMB67.2 million, RMB85.9 million, RMB77.8 million and RMB26.7 million, respectively.

Annual caps

We estimate that the export quota to be allocated to ChinaCoal Group will remain stable for the next three years, of which approximately 25% will be allocated for the export of coal produced by us and the remaining 75% will be allocated for coal exported by ChinaCoal Group. We also estimate that our average export price will remain relatively stable at approximately U.S.$60 per tonne through to 2008. The Directors have therefore estimated the annual caps for such connected transactions each of the three years ending 31 December 2008 as follows:

	2006	2007	2008
	(RMB in millions)		
Annual agency fees payable by us to ChinaCoal Group for coal export provided	70	70	70

2. Coal Supplies Framework Agreement

Under the Restructuring, ChinaCoal Group has (through one or more of its subsidiaries other than our Company) retained certain operating rights to operate the Mines under Restructuring as defined and more fully described in "Relationship with ChinaCoal Group — Competition — Group Retained Businesses" and "— ChinaCoal Group's coal production". To minimize the potential competition between the coal products of the Mines under Restructuring with our coal products, our Company and ChinaCoal Group entered into a Coal Supplies Framework Agreement on 5 September 2006. The principal terms of the Coal Supplies Framework Agreement are as follows:

- ChinaCoal Group will procure that all coal products produced from the Mines under Restructuring be supplied exclusively to our Company, and has undertaken not to sell any such coal products to any third party.

- Our Company and ChinaCoal Group shall within the last quarter of each calendar year devise a 12-month coal products supply schedule for the next calendar year. Our Company (or our relevant subsidiary) shall enter into separate contracts with ChinaCoal Group (or its relevant associate) to set out the specific terms and conditions of supplying coal products according to the principles, and within the parameters, provided for under the Coal Supplies Framework Agreement.
- If the coal products supplied by the Mines under Restructuring under the Coal Supplies Framework Agreement cannot satisfy our requirements, including quality or quantity, we are entitled to choose the relevant coal products supplied by third parties.

The Coal Supplies Framework Agreement took effect on the date of incorporation of our Company and expires on 31 December 2008, and is subject to renewal.

Pricing

Under the Coal Supplies Framework Agreement, we (or relevant subsidiaries) shall purchase from ChinaCoal Group (or its relevant associate) coal products produced from the Mines under Restructuring according to the following pricing principles:

- market price, which is determined by reference to the prevailing market rates for comparable coal products as are available on an arm's length basis from independent coal producers located in the region or surrounding areas of the Mines under Restructuring; or,
- where there is no market price, a price to be agreed between the parties, which agreed price will be calculated based on the reasonable costs incurred in supplying the relevant coal products plus 5% profits reasonably earned. In setting the price, the parties may refer to prices for previous related transactions if available.

The purchase prices are payable by us within 30 days upon receipt of the coal products.

Historical figures

For the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, the total volume and value of coal products produced by the Mines under Restructuring were approximately 0.85 million tonnes, 1.32 million tonnes, 1.09 million tonnes and 1.57 million tonnes, respectively, representing approximately RMB58.4 million, RMB124.4 million, RMB134.2 million and RMB198 million, respectively.

Annual caps

The Directors have estimated the annual caps based on the following considerations: (1) ChinaCoal Group intends to invest an aggregate sum of RMB1,680 million to increase the aggregate annual production capacities of the Mines under Restructuring to 12 million tonnes per year. Such investment is to improve the production technologies and safety of the Mines under Restructuring by introducing new mining equipment as well as improving the production facilities and the transport facilities. ChinaCoal Group estimates that the aggregate annual production of the Mines under Restructuring will increase from approximately 3 million tonnes in 2006 to approximately 7.6 million tonnes in 2007 and 9.2 million tonnes in 2008; (2) the average price per tonne will remain stable at RMB130 per tonne for the three years ending 31 December 2008, which is the average price per tonne of coal traded during the Track Record Period; and (3) we have assumed that the Coal Supplies Framework Agreement had been in effect throughout the year ending 31 December 2006. For the six months ended 30 June 2006, the total coal production of the Mines under Restructuring was

approximately 1.57 million tonnes with a total revenue of approximately RMB198 million. On the assumption that the Coal Supplies Framework Agreement had taken effect throughout the year ending 31 December 2006, the Directors estimate that the total sales pursuant to the Coal Supplies Framework Agreement would be approximately 3 million tonnes and an annual amount of approximately RMB400 million for 2006. As such, the Directors estimate that the maximum amounts payable by our Company for each of 2006, 2007 and 2008 will be as follows:

	2006	2007	2008
	(RMB in millions)		
Amounts payable by us for coal products purchased from the Mines under Restructuring	400	1,000	1,200

3. Integrated Materials and Services Mutual Provision Framework Agreement

Under the Restructuring, ChinaCoal Group transferred to our Company substantially all assets related to its coal export-related services, comprising its sales and marketing network, port facilities, customer access, tradenames and market experience and knowledge. As ChinaCoal Group is one of only four PRC enterprises authorized to perform coal exports and in respect the quotas allocated to ChinaCoal Group that have not been used by us, it continues to provide export quotas and coal export agency services to its other coal export customers. In this connection, it has appointed us, on an exclusive basis, to provide coal export-related services, such as coal blending, logistics and transportation services, for customers of ChinaCoal Group. We receive revenue for the provision of such coal export-related services, which is at a rate of 0.8% to 1.3% on the FOB price per tonne of coal exported. In contrast with the Coal Export and Sales Agency Framework Agreement, ChinaCoal Group provides export sales agency services such as provision of quotas and agency services for the export of coal by us. We have to pay for such services, which is at a rate of 0.7% on the FOB price per tonne of exported coal and at a rate of 0.7% on the FOB price plus U.S.$0.5 per tonne of coal exported to the Taiwan market. For more information relating to the Coal Export and Sales Agency Framework Agreement, please refer to "Connected Transactions — Coal Export and Sales Agency Framework Agreement".

Following the Restructuring, ChinaCoal Group has retained certain other ancillary businesses which purchase and continue to purchase other supplies and other support services from us. At the same time, ChinaCoal Group has agreed to provide certain raw materials and services required by us in connection with our operations. It has also retained a small amount of assets and businesses which provide social and support services to us on a continuing basis. To regulate such relationships that will continue following our listing, our Company and ChinaCoal Group entered into an Integrated Materials and Services Mutual Provision Framework Agreement on 5 September 2006, the principal terms of which are as follows:

Mutual provision of materials and services

- We (or relevant subsidiaries) shall provide to ChinaCoal Group and its associates, and ChinaCoal Group and its associates shall provide to us, the following categories of raw materials and services on the principles set out in the agreement:

Production material supplies and ancillary services to be provided by ChinaCoal Group to us:

Production material supplies and ancillary services: production materials including explosives; mining accessories; construction materials; electricity cables and paint and other related or similar production supplies; transportation services (including cars and trucks); electricity and

heat supplies; testing and equipment maintenance services; equipment leasing; communications services; and

Social and support services: security services; staff training; school; medical care and emergency services, etc.

Production material supplies and ancillary services to be provided by us to ChinaCoal Group include coking coal, hydraulic roof support and ancilliary services; related or similar production supplies; electricity supplies; transportation and loading services; gas supply; machinery maintenance; labour; tendering services; water and heat, etc.

- The provision of the above raw materials and services by either party shall be made on terms no less favorable than those available to or, as appropriate, from independent third party under comparable conditions. Otherwise, either party is entitled to engage such other supplier(s) for the raw materials and/or services required.
- The parties (their relevant associates or subsidiaries) shall enter into separate contracts to set out the specific terms and conditions of providing the relevant raw materials and/or services according to the principles, and within the parameters, provided for under the Integrated Materials and Services Mutual Provision Framework Agreement.

Coal export-related services

- We shall provide to ChinaCoal Group and its associates coal export-related services for the export of coal by ChinaCoal Group for third parties. Such services shall include organizing product supplies; performing coal blending; coordinating logistics and transportation; providing port-related services; arranging for inspection and quality verification; and providing services relating to product delivery.

The Integrated Materials and Services Mutual Provision Framework Agreement took effect on the date of incorporation of our Company and expires on 31 December 2008, and is subject to renewal.

Pricing

Mutual provision of materials and services

Under the Integrated Materials and Services Mutual Provision Framework Agreement, either party shall supply production materials, and social and support services to the other party, according to the following pricing principles (and in the following order):

- price prescribed by the PRC Government; or
- where there is no government-prescribed price, the guidance price set by the PRC Government; or
- where there is neither government-prescribed price nor government guidance price, a price determined through tender process or other available market price. Such market price is determined by reference to (i) the prevailing market rates for the supply of that category of product or service as are available on an arm's length basis from independent suppliers located in the region or surrounding areas, or (ii) if failing (i) above, the price then charged under normal commercial terms by independent suppliers in the PRC of that category of product or service; or
- where none of the above is applicable or available, a price to be agreed between the parties. The agreed price will be calculated based on the reasonable costs incurred in making the supplies plus

profits reasonably earned. In setting the price, the parties may refer to prices for previous related transactions if available.

Coal export-related services

In respect of the provision of coal export-related services by us to ChinaCoal Group for the export of coal by its other customers, the service fee payable by ChinaCoal Group shall be determined on the basis of relevant applicable market rates. Currently, such service fee is fixed at 0.8% to 1.3% on the FOB price per tonne of coal products exported.

The purchase prices or service fees under the Integrated Materials and Services Mutual Provision Framework Agreement are payable by either party on a calendar-monthly basis in arrears in respect of supplies and services provided during that month.

Historical figures

On an estimated basis as if our Company had been incorporated since 1 January 2003 and the Integrated Materials and Services Mutual Provision Framework Agreement had been in place since that date, a breakdown of the approximate maximum historical transactions figures is set out as follows. For the three years ended 31 December 2005 and the six months ended 30 June 2006, on an estimated basis, our Company provided coal export-related services for 30.1 million tonnes, 25.8 million tonnes, 21.0 million tonnes and 9.5 million tonnes of coal for the coal export customers of ChinaCoal Group. The coal export-related service fees stated below are calculated on an estimated basis as if our Company had been incorporated during the Track Record Period and that the service fee for the provision of such services is at 1.3% on the FOB price on each tonne of exported coal.

	2003	2004	2005	30 June 2006
	(RMB in millions)			
Amounts paid by us for supplies of production materials and ancillary services by ChinaCoal Group				
Production supplies and ancillary production services	334	445	863	379
Social and support services	48	70	77	35
Amounts received by us for supplies of production materials and ancillary services to ChinaCoal Group				
Production supplies and ancillary services	24	47	39	14
Service fees received by us for provision of coal export-related services to ChinaCoal Group	77	173	151	67

Annual caps

Integrated Materials and Services

The materials to be provided by ChinaCoal Group to our Company are supplemental to our Company's coal production. The cost of these materials will increase as our Company's cost of coal production increases. Considering the upward historical trend of the transaction amount and our Company's future production expansion plan, which will begin to have a more marked impact on our production in 2007, we estimate an upward trend of the cost of the relevant materials and service with an approximately 15%, 27% and 7% increase in the transaction amount in 2006, 2007 and 2008, respectively. Using the transaction amount of materials and production services of RMB863 million for 2005 as the basis of calculation, we estimate that the

transaction amount of materials and production services to be approximately RMB996 million; RMB1,226 million and RMB1,315 million for 2006, 2007 and 2008, respectively.

We estimate that value of social and support services provided by ChinaCoal Group to us will remain relatively stable at approximately RMB80 million for the year ending 31 December 2006, with approximately 10% to 15% increase for the years 2007 and 2008, due mainly to the expansion of our production capacities. We estimate that the annual caps of the social and support services to be approximately RMB80 million, RMB90 million and RMB100 million for the three years ending 31 December 2008, respectively.

The historical average value of materials and ancillary services provided by us to ChinaCoal Group was approximately RMB37 million. As the value of this transaction for the six months ended 30 June 2006 was only approximately RMB14 million, we estimate the annual caps of this type of transaction at approximately RMB35 million, RMB50 million and RMB50 million for each of the three years ending 31 December 2008, respectively.

Coal Export-Related Services

As stated in the sub-paragraph headed "Coal Export and Sales Agency Framework Agreement" above, we estimate that the export quotas to be allocated to ChinaCoal Group will remain stable for the next three years, of which approximately 25% will be allocated for the export of coal produced by us and the remaining 75% will be allocated for export of coal by other coal export customers of ChinaCoal Group. We do not expect wide fluctuation in the coal export price and have estimated the annual caps for this category of transactions at approximately RMB160 million for each of the three years ending 31 December 2008. On the basis that our coal export-related services is at 1.3% on the FOB price per tonne, we have estimated the revenue from our provision of coal export-related services as follows.

	2006	2007	2008
	(RMB in millions)		
Amounts payable by us for supplies of production materials and ancillary services by ChinaCoal Group			
Production supplies and ancillary production services	996	1,226	1,315
Social and support services	80	90	100
Amounts receivable by us for supplies of production materials and ancillary services to ChinaCoal Group			
Production supplies and ancillary services	35	50	50
Service fees receivable by us for provision of coal export-related services to ChinaCoal Group	160	160	160

4. Mine Construction and Design Framework Agreement

Following the Restructuring, ChinaCoal Group has retained certain ancillary coal mine infrastructure construction operations and our Company has received from ChinaCoal Group, and will continue to carry out, its coal mine design operations. As our Company will, in our usual course of business, undertake coal mine design and construction projects for third parties, we will carry out the mine design operations, but may sub-contract the coal mine construction works to ChinaCoal Group or its relevant associates. Further, certain associates of ChinaCoal Group may provide coal mine construction services to us as we may require, and we may provide coal mine design services to ChinaCoal Group and its associates. To regulate the business relationship in these respects following our listing, our Company and ChinaCoal Group entered into a Mine

Construction and Design Framework Agreement on 5 September 2006, the principal terms of which are as follows:

- (i) We shall provide coal mine design services to support the ancillary businesses of ChinaCoal Group and its associates, (ii) ChinaCoal Group and its associates shall provide coal mine construction services to us for construction of coal mines and related mining facilities, and (iii) ChinaCoal Group and its associates shall provide construction services required from us in respect of projects we undertake under sub-contracting arrangement with third parties that involve construction of coal mines and related mining facilities.
- We (or our relevant subsidiary) and ChinaCoal Group (or its relevant associate) shall enter into separate contracts to set out the specific terms and conditions of providing the relevant services according to the principles, and within the parameters, provided for under the Mine Construction and Design Framework Agreement.
- The Mine Construction and Design Framework Agreement took effect on the date of our incorporation and expires on 31 December 2008, and is subject to renewal.

Pricing

If either party requires services under the Mine Construction and Design Framework Agreement, it shall select the service provider and fix the service price through a tender process. When the bidding price and other terms offered by one party to the agreement are equal to or better than those offered by other independent service providers participating in the tender, that party shall be selected in preference to such other independent service providers.

Historical figures

A breakdown of the estimated maximum historical figures is set out as follows:

	2003	2004	2005	30 June 2006
	(RMB in millions)			
Amounts paid by us for provision of construction services by ChinaCoal Group and its associates	96	145	118	56
Amounts received by us from provision of coal mine design services to ChinaCoal Group and its associates	0	0.6	6	14

Annual caps

As stated in the "Financial Information — Capital Expenditures" section of this Prospectus, the capital expenditures for our coal operations for 2006, 2007 and 2008 are estimated at approximately RMB3,315 million, RMB5,427 million and RMB4,988 million, respectively, representing substantial increases as compared with the capital expenditures during the Track Record Period. Of these amounts, approximately RMB800 million per year will be used for equipment maintenance projects which involve only equipment purchase and maintenance. Of the remaining balance, approximately 40% will be used as expenditures for our coal mine expansion works. As the two coal mine construction subsidiaries of ChinaCoal Group have expertise in coal mine construction and other ancillary mining facilities and that there are only three large coal mine construction enterprises (including the two subsidiaries mining construction subsidiaries of ChinaCoal Group) in China with expertise in coal mine construction works, we expect that ChinaCoal Group has a higher chance

of success in tendering for the construction works of our underground mines. Based on the previous coal mine construction services provided by ChinaCoal Group to us, we estimate the success rate of the two coal mine construction subsidiaries of ChinaCoal Group to be at approximately 60% or above. For the six months ended 30 June 2006, the value of the coal mine construction contracts awarded to the subsidiaries of ChinaCoal Group was approximately RMB56 million. However, the value of coal mine construction contracts awarded to the two coal mine construction subsidiaries of ChinaCoal Group up to early November 2006 had increased to approximately RMB470 million. Together with a pending contract of approximately RMB100 million which has been recently awarded to one of the two coal mine construction subsidiaries of ChinaCoal Group, the estimated total annual cap for 2006 is approximately RMB570 million.

The substantial increase from the historical amount of RMB118 million in 2005 to the estimated amount of RMB570 million in 2006 was mainly due to: (i) our estimated capital expenditure in 2006 has increased from RMB1,662 million in 2005 to RMB3,315 million, representing an increase of almost 100%; and (ii) some of the underground coal mine construction works of the Wangjialing Underground Mine were put up for tender in 2006, which, together with the coal mine construction contracts of other mines under development, leads to a substantial increase in the value of coal mining construction transactions with ChinaCoal Group during the year. Based on an estimated successful tender rate of ChinaCoal Group at approximately 60%, we estimate the annual caps of this category of transactions at RMB1,110 million and RMB1,005 million, respectively, for the two years ending 31 December 2008.

As for the coal mine design services to be provided by us to ChinaCoal Group, we have based our annual cap estimates on the following: (i) we expect to provide coal mine design services to ChinaCoal Group in respect of its investments in the Mines under Restructuring. Of the total investment of RMB1,680 million by ChinaCoal Group in the Mines under Restructuring, we estimate the coal mine design service fees will amount to approximately 3% or RMB50.4 million. Based on our experience in coal mine design, the coal mine design fees will normally account for approximately 3% of the total investment of a coal mine project; and (ii) we expect that ChinaCoal Group may invest in and restructure other small local mines in the future, which may also involve the provision of coal mine design services by us. Taking into account the above factors, we propose an annual cap of RMB30 million, RMB50 million and RMB50 million for each of the three years ending 31 December 2008, respectively.

	2006	2007	2008
	(RMB in millions)		
Amounts payable by us for provision of construction services by ChinaCoal Group and its associates	570	1,110	1,005
Amounts receivable by us from provision of coal mine design services to ChinaCoal Group and its associates	30	50	50

5. Property Leasing Framework Agreement

Following the Restructuring, our Company leases from ChinaCoal Group and its associates certain buildings and properties in the PRC for general business and ancillary purposes. Our Company and ChinaCoal Group entered into a Property Leasing Framework Agreement on 5 September 2006 to regulate their relationship in this regard. The Property Leasing Framework Agreement sets out the particulars of each property subject to the agreement. The principal terms of the Property Leasing Framework Agreement are as follows:

- The properties leased to us (or our relevant subsidiaries) from ChinaCoal Group and its associates comprise 476 properties occupying an aggregate gross floor area of approximately 0.21 million m^2 and are mostly for production and operation uses.

- We (or our relevant subsidiary) and ChinaCoal Group (or its relevant associate) shall enter into separate agreements to set out the specific terms and conditions in respect of the relevant properties leased according to the principles, and within the parameters, provided for under the Property Leasing Framework Agreement.

- In respect of properties for which ChinaCoal Group or its relevant associate(s) have not yet obtained property ownership certificates, ChinaCoal Group grants a licence for us (or our relevant subsidiaries) to use such properties, and has undertaken to obtain the requisite property ownership certificates within one year from the date of our Company's incorporation.

- We are entitled to lease additional properties from ChinaCoal Group during the term of the Property Leasing Agreement.

- ChinaCoal Group has agreed to indemnify us against any loss or damage we may suffer or incur because of title issue arising from the use of such properties with title defect.

- If ChinaCoal Group or its relevant associate(s) intend to sell any property leased to us under the Property Leasing Framework Agreement, we shall have the pre-emptive right to purchase such property under the same terms offered to third parties.

- Either party may, at any time before the Property Leasing Framework Agreement expires, by giving not less than 6 months' notice to terminate any lease made pursuant to and comprised under the agreement, and the rentals will accordingly be reduced.

The Property Leasing Framework Agreement is of a term of 10 years commencing on 22 August, 2006, being the date of incorporation of our Company, and is subject to renewal. The agreement is of a duration longer than three years as otherwise normally permitted under the connected transactions' regulatory regime of the Hong Kong Listing Rules. This is because 10-year property leases are more desirable for us to avoid unnecessary disruption to our operations and to minimize relocation costs. Our independent property valuer, Savills and the Joint Sponsors are also of the view that it is normal business practice for property leasing agreements involving PRC properties to be of such duration.

Pricing

Under the Property Leasing Framework Agreement, the rentals shall be determined and paid as follows:

- We (or our relevant subsidiaries) shall pay annual rentals in an aggregate amount of up to approximately RMB70.8 million to ChinaCoal Group and its relevant associates in respect of the buildings and properties leased to us.
- The party taking up any lease shall also be responsible for all utility charges and other miscellaneous expenses (property tax excluded) incurred in using the relevant property during the term of the lease.
- The rentals are payable annually in arrears, and are subject to review and adjustments every three years during the term of the Property Leasing Framework Agreement by reference to the prevailing market rates. The adjusted rentals shall not exceed the then applicable market rates as confirmed by an independent property valuer.
- Further, any downward adjustment in rentals for such properties leased to us may be made at any time during the term of the Property Leasing Framework Agreement notwithstanding the normal three-year rental adjustment mechanism provided for under that agreement as described above.

Savills has confirmed that the rentals under the Property Leasing Framework Agreement reflect, and are no higher than, the prevailing market rates and that the terms of the agreement are fair and reasonable.

Historical figures

The above property leasing arrangement did not exist during the three years ended 31 December 2005, and was put in place as a result of our Restructuring. Accordingly, no relevant or comparable historical figures are available or readily ascertainable.

Annual caps

The annual rentals payable by the parties as provided for under the Property Leasing Framework Agreement are fixed under the agreement as up to RMB70.8 million by us (or our relevant subsidiaries), subject to adjustments and taking into account of market rates, such adjustments may be made once every three years as described above. Such rentals are determined on the basis of the relevant property valuation reports issued by independent qualified PRC property valuers, and Savills has confirmed that such rentals reflect the prevailing market rates. The total annual rentals payable by us (or our relevant subsidiaries) to ChinaCoal Group and its associates are expected to be approximately RMB71 million. This amount is accordingly used as the proposed annual cap for each of the three years ending 31 December 2008.

6. Land Use Rights Leasing Framework Agreement

Following the Restructuring, ChinaCoal Group and its associates lease to our Company certain land use rights in the PRC for general business and ancillary purposes. Our Company and ChinaCoal Group therefore entered into a Land Use Rights Leasing Framework Agreement on 5 September 2006 to regulate their relationship in this regard. Under the Land Use Rights Leasing Framework Agreement, the land use rights leased to our Company from ChinaCoal Group and its associates comprise land use rights in respect of 93 parcels of land occupying an aggregate gross site area of approximately 2.1 million square metres, mostly for production and operation uses. The Land Use Rights Framework Agreement sets out the particulars of

each parcel of land subject to the agreement. The principal terms of the Land Use Rights Framework Agreement are as follows:

- We (or our relevant subsidiary) and ChinaCoal Group (or its relevant associate) shall enter into separate leases to set out the specific terms and conditions in respect of the relevant parcel(s) of lands leased according to the principles, and within the parameters, provided for under the Land Use Rights Leasing Framework Agreement.
- If ChinaCoal Group or its relevant associate(s) intend to transfer any land use rights leased to our Company under the Land Use Rights Leasing Framework Agreement, our Company shall have the pre-emptive right to acquire such land use rights under the same terms offered to third parties.
- Upon expiry of the Land Use Rights Leasing Framework Agreement, if ChinaCoal Group or its relevant associate(s) intend to continue any lease, we shall also have the pre-emptive right to lease the relevant land use rights under the same terms offered to third parties, even if it has not exercised its right of renewal.
- We are entitled to lease additional the land use rights from ChinaCoal Group during the term of the Land Use Rights Leasing Framework Agreement.

The Land Use Rights Leasing Framework Agreement is of a term of 20 years commencing on 22 August 2006, being the date of incorporation of our Company, and is subject to renewal. The agreement is of a duration longer than three years as otherwise normally permitted under the connected transactions regulatory regime of the Hong Kong Listing Rules. This is because 20-year land use rights leases are more desirable for us (or our relevant subsidiaries) to avoid unnecessary disruption to its operations and to minimize relocation costs, especially when our Company has buildings or fixtures constructed on the relevant parcels of land. Savills and the Joint Sponsors are also of the view that it is normal business practice for PRC land use rights leasing agreements to be of such duration.

We may, at any time before the Land Use Rights Leasing Framework Agreement expires, terminate any lease made pursuant to and comprised under the agreement by giving 2 months' notice, and the rentals payable by us will accordingly be reduced.

Pricing

Under the Land Use Rights Leasing Framework Agreement, the rentals shall be determined and paid as follows:

- We shall pay annual rentals in an aggregate amount of approximately RMB8.9 million to ChinaCoal Group and its associates.
- The rentals are payable annually in arrears, and are subject to review and adjustments every three years during the term of the Land Use Rights Leasing Framework Agreement by reference to the prevailing market rates in respect of similar parcels of lands located in the same regions or areas under comparable conditions, provided that the adjusted rentals shall not exceed the then applicable market rates as confirmed by an independent property valuer.
- Further, any downward adjustment in rentals may be made at any time during the term of the Land Use Rights Leasing Framework Agreement notwithstanding the normal three-year rental adjustment mechanism provided for under the agreement as described above.

Savills has confirmed that the rentals under the Land Use Rights Leasing Framework Agreement reflect, and are no higher than, the prevailing market rates and that the terms of the agreement are fair and reasonable.

Historical figures

The above land use rights leasing arrangement did not exist during the three years ended 31 December 2005, and was put in place as a result of our Restructuring. Accordingly, no relevant or comparable historical figures are available or readily ascertainable.

Annual caps

The annual rentals payable by us as provided for under the Land Use Rights Leasing Framework Agreement are fixed under the agreement as RMB8.9 million, subject to adjustments and taking into account of market rates, such rental adjustments can be made once every three years as described above. Such rentals are determined on the basis of the relevant property valuation reports issued by independent qualified PRC property valuers, and Savills has confirmed that such rentals reflect the prevailing market rates.

The total annual rentals payable by us (or our relevant subsidiaries) to ChinaCoal Group and its associates are expected to be approximately RMB9.0 million for each year of 2006 to 2008. This amount is accordingly set as the proposed annual cap for the transactions under the Land Use Rights Leasing Framework Agreement in respect of each of the year ending 31 December 2008.

B. Continuing Connected Transactions Between Our Company And Connected Persons At Our Subsidiary Level

1. Coal/Coke Product Sales Framework Agreements

Each of Datong Coal Industry Co. Ltd. (大同煤業股份有限公司), Shanxi Longquan Foundry Coke Company Limited (汾陽市龍泉鑄造焦有限公司), Shuozhou Shuocheng Liu Jia Kou Coal Transportation Terminal (朔州市朔城區劉家口煤炭集運站), Lingshi Jiuxin Coal Preparation Company Limited (靈石縣九鑫選煤有限責任公司) and Shaanxi Yulin Coal Export Group Corporation (陝西榆林煤炭出口(集團)有限責任公司) of the Subsidiaries' Substantial Shareholders is a joint venture partner of our Company in respect of our coal and coking operations. We will continue to purchase and sell coal / coke products from these five Subsidiaries' Substantial Shareholders. Our Company has therefore entered into a Coal/Coke Product Sales Framework Agreement with each of the Subsidiaries' Substantial Shareholders to regulate our business relationship after listing. The terms of each of the Coal/Coke Supplies Framework Agreements are substantially the same, the principal terms of which are as follows:

- We (or our relevant subsidiary) shall sell to and purchase from the five Subsidiaries' Substantial Shareholders coal and/or coke products as the parties may from time to time mutually agree.
- We (or our relevant subsidiary) shall enter into separate purchase and sales contracts with each of the five Subsidiaries' Substantial Shareholders to set out the specific terms and conditions of sale and purchase of coal and/or coke products according to the principles, and within the parameters, provided for under the Coal/Coke Product Sales Framework Agreements.
- The Coal/Coke Product Sales Framework Agreements took effect on the date of incorporation of our Company and expires on 31 December 2008, and is subject to renewal.

Pricing

Under each of the Coal/Coke Product Sales Framework Agreements, either party shall sell to the other party coal and coke products according to the following pricing principles (in the following order):

- price prescribed by the PRC Government; or
- where there is no government-prescribed price, guidance price set by the PRC Government; or
- market price, which is determined by reference to the prevailing market rates for the same or similar coal or coke products as are available on an arm's length basis from independent coal or coke producers located in the region or surrounding areas; or
- a price to be agreed between the parties, which agreed price will be calculated based on the reasonable costs incurred in supplying the relevant coal or coke products plus 5% reasonable profits. In setting the price, the parties may refer to prices for previous related transactions if available.

Historical figures

During the past three years, the amount of the coal and coke products supplied by the Subsidiaries' Substantial Shareholders to our Company increased continuously. The rate of increase was 26% in 2004 and 66% in 2005. The increase was mainly due to the continuous increase in both the prices and the quantities of the coal and coke products sourced by our Company. For the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, the total value of coal and coke products purchased by our Company from the relevant Subsidiaries' Substantial Shareholders amounted to approximately RMB433 million, RMB547 million, RMB911 million and RMB544 million, respectively, and the total value of coal and coke products sold by our Company to the relevant Subsidiaries' Substantial Shareholders amounted to approximately RMB196 million, RMB69.6 million, RMB162 million and RMB137 million, respectively.

Annual caps

Based on the highest historical amount of RMB196 million during the Track Record Period, and an anticipated 10% annual increase, our Company expects the annual caps would be approximately RMB 216 million for 2006, RMB 237 million for 2007 and RMB261 million for 2008. Considering the increase of coal and coke products produced by our Company in the future and that the prices for coal and coke products would continue to stably increase, the amount of coal and coke products supplied by the Subsidiaries' Substantial Shareholders would not increase at the same rates as in the past three years. On the basis of the revenue of RMB912 million in 2005 and an annual rate of increase of 10%, our Company expects that the annual caps for the amount of the coal and coke products purchased from the Subsidiaries' Substantial Shareholders would be approximately RMB1,003 million for 2006, RMB1,104 million for 2007 and RMB1,214 million for 2008.

	2006	2007	2008
	(RMB in millions)		
Amounts payable by us for purchases of coal and coke products from the four Subsidiaries' Substantial Shareholders	1,003	1,104	1,214
Amounts receivable by us from sales of coal and coke products to the two Subsidiaries' Substantial Shareholders	216	237	261

2. Railway Leasing and Management Entrustment Service Framework Agreement

Shuozhou Pingshuo Luda Railway Transportation Co., Ltd. (朔州市平朔路達鐵路運輸有限公司) ("Pingshuo Luda") of the Subsidiaries' Substantial Shareholders leases railway from our subsidiary Shanxi China Coal Pingshuo Antaibao Coal Co., Ltd. (山西中煤平朔安太堡煤炭有限責任公司), formerly known as Ping Shuo First Coal Co., Ltd. (平朔第一煤炭有限公司) and Shanxi Pingshuo Anjialing Surface Mine Company Limited (山西平朔安家嶺露天煤炭有限公司) ("Anjialing Surface Mine"). Pingshuo Luda also provides railway management entrustment services to Pingshuo Antaibao and Anjialing Surface Mine. Pingshuo Luda will after our listing continue to lease railway from Pingshuo Antaibao and Anjialing Surface Mine, and provide to these two companies management entrustment services. As Pingshuo Luda is a subsidiary of Datong Luda Railway Transportation Co., Ltd. (大同路達鐵路運輸有限公司) ("Datong Luda") and Datong Luda is a connected person for the purposes of the Hong Kong Listing Rules, the transaction between our subsidiary and Pingshuo Luda is also a connected transaction. To regulate our relationship with Pingshuo Luda after our listing, we have entered into a Railway Leasing and Management Entrustment Service Framework Agreement with Pingshuo Luda on 5 September 2006. The principal terms of the agreement are as follows:

- Pingshuo Luda shall lease railway from us (or our relevant subsidiaries) and provide management entrustment services to our relevant subsidiaries, Pingshuo Antaibao and Anjialing Mine.

- Each party shall enter into separate written service contracts with us to set out the specific terms, conditions and price for the provision of each type of railway and management services according to the principles, and within the parameters, provided for under the Railway Leasing and Management Entrustment Service Framework Agreement.

- The quality of the railway leasing and management entrustment services provided by Pingshuo Luda under the Railway Leasing and Management Entrustment Service Framework Agreement shall be in accordance with the standards of services specified in the written agreements and shall be based on a reasonable price. Where the standards are specified by rules or regulations, the services provided shall be in accordance with such standards.

- The parties shall set the standards of services to be provided under the agreement and shall amend such standards from time to time in accordance with the market conditions.

Pricing

The price of the services to be provided under the Railway Leasing and Management Entrustment Service Framework Agreement shall be determined, successively, in accordance with the following pricing principles:

- price for railway leasing and railway management services prescribed by the PRC Government; or

- where there is no government-prescribed price, guidance price for similar services set by the PRC Government; or

- market price, which is determined by reference to the prevailing market rates for similar or the same comparable railway leasing and railway management services as are available on an arm's length basis from independent railway operators located in the region or surrounding areas; or

- a price to be agreed between the parties, which agreed price will be calculated based on the reasonable costs incurred in supplying such services plus profits reasonably earned. In setting the price, the parties may refer to prices for previous related transactions if available.

Historical figures

For the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006, the total value of railway leasing fees paid by Pingshuo Luda to our relevant subsidiaries amounted to approximately RMB3.1 million, RMB47.4 million, RMB75.4 million and RMB41 million, respectively. During the same periods, the total value of the railway management services provided by Pingshuo Luda to our relevant subsidiaries amounted to approximately RMB nil, RMB110.8 million, RMB119.1 million and RMB103.0 million, respectively.

Annual caps

The dedicated rail link under the Railway Leasing and Management Entrustment Service Framework Agreement, which links our Pingshuo Mining Area and the Daqin Rail Line, is approximately 20 kilometres in length and the rate of leasing fees is calculated based on RMB0.12 per kilometre and the rate of management entrustment service fees is calculated based on RMB0.32 per kilometre. Taking into account the production expansion plan of the Pingshuo mines and the recent freight capacity expansion of the Daqin Rail Line, we estimate that the total freight volume of the dedicated rail line will increase from 46 million tonnes in 2006 to 54 million tonnes and 65 million tonnes for 2007 and 2008, respectively. We have therefore estimated the annual caps of this category of transactions as follows:

	2006	2007	2008
	(RMB in millions)		
Amounts receivable by us for railway leasing to Pingshuo Luda	99	130	156
Amounts payable by our relevant subsidiaries for railway management entrustment services provided by Pingshuo Luda	264	346	416

C. *Continuing Connected Transactions Between Our Company, And Our Company's Non Wholly-Owned Subsidiary Being Itself A Connected Person*

Datun Aluminium, in its normal course of business, borrowed funds from PRC banks, and the lender banks required guarantee as security for such bank loan as a matter of usual banking practice in the PRC. The guarantee was, before the Restructuring, provided by ChinaCoal Group or its associates. As part of the Restructuring, such guarantee was replaced by the guarantee given by our Company, which has guaranteed the payment and the performance of obligations by Datun Aluminium in relation to a term loan owned to the lender banks in aggregate amounts of RMB500 million. The loan will expire on 18 November 2010. As of 31 December 2005, the outstanding balance of such guaranteed loan and interests thereon was approximately RMB420 million which will be repaid in installments in accordance with the relevant loan agreement. The guarantee has not been enforced as of the date of this Prospectus. Datun Aluminium is 75% owned by Shanghai Datun Energy (上海大屯能源股份有限公司) (a 62.43% subsidiary of our Company) and 25% owned by China Coal Hong Kong Limited (a wholly-owned subsidiary of ChinaCoal Group). Datun Aluminum is therefore an indirect non wholly-owned subsidiary, and will by virtue of Rule 14A.11(5) of the Hong Kong Listing Rules become a connected person, of our Company. Accordingly, the provision of guarantee by our Company in favour of Datun Aluminium constitutes as a connected transaction.

Implications under Hong Kong Listing Rules — waiver obtained

According to "Our Restructuring" above, any transaction that might take place after our listing pursuant to the Restructuring Agreement is made in the performance of the relevant transaction already entered into before listing. Such transaction will therefore not constitute connected transactions or continuing connected transactions of our Company under Chapter 14A of the Hong Kong Listing Rules, and will not be subject to further regulatory requirements under the Hong Kong Listing Rules. In respect of the indemnities under the Restructuring Agreement, any payment which in the future that might be made by either party in performance of its obligations after the Global Offering also would not constitute a new transaction.

The exercise of any options granted under the Non-Competition Agreement after our listing would constitute a connected transaction under the Hong Kong Listing Rules. In addition, the non-exercise of any option will be treated as if the option were exercised and would constitute a connected transaction. We shall comply with the relevant disclosure and, where appropriate, independent shareholders' approval requirements under the Hong Kong Listing Rules relating to the exercise or non-exercise of any options under the Non-competition Agreement.

The transactions described in paragraphs A2, A3, A4 and B1 above will constitute non-exempt continuing connected transactions under the Hong Kong Listing Rules once the H shares are listed on the Hong Kong Stock Exchange. Pursuant to the Hong Kong Listing Rules, these non-exempt continuing connected transactions in paragraphs A2, A3, A4 and B1 would normally require full reporting, announcement and prior approval by independent shareholders, subject to the nature and the value of the transactions. The transactions described in paragraphs A1, A5, B2 and C above will also constitute non-exempt continuing connected transactions subject to the announcement requirements of the Hong Kong Listing Rules. Our Directors, including our independent non-executive Directors, consider that disclosure and approval of these transactions in full compliance with the Hong Kong Listing Rules would be impracticable and, in particular, add unnecessary administrative costs to us. In addition, our Directors including our independent non-executive Directors believe that it is in our interests to continue with these transactions after the listing of our H Shares on the Hong Kong Stock Exchange and that such transactions are conducted on normal or on better than normal commercial terms, in our ordinary and usual course of business and are fair and reasonable and in the interests of our shareholders as a whole and that the annual limits for the non-exempt continuing connected transactions are fair and reasonable.

Non-exempt Continuing Connected Transactions

Exempt Continuing Connected Transactions

- *Coke Export Agency Framework Agreement*
- *Trademarks License Framework Agreement*

A. ChinaCoal Group

6. *Land Use Rights Leasing Framework Agreement*
Annual rental payable to ChinaCoal Group for lease of land use rights

We have applied to the Hong Kong Stock Exchange for waivers in accordance with Rule 14A.42(3) and the Hong Kong Stock Exchange has granted waivers in relation to the non-exempt continuing connected transactions under the following agreements (being the agreements referred to in paragraphs A2, A3, A4 and

B1 above) from the announcement and independent shareholders' approval requirements of the Hong Kong Listing Rules pursuant to Rules 14A.47 and 14A.48:

- Coal Supplies Framework Agreement
- Integrated Materials and Services Mutual Provision Framework Agreement
- Mine Construction and Design Framework Agreement
- Coal/Coke Product Sales Framework Agreement

We have applied to the Hong Kong Stock Exchange for waivers in accordance with Rule 14A.42(3) and the Hong Kong Stock Exchange has granted waivers in relation to the non-exempt continuing connected transactions under the following agreements (being the agreements referred to in paragraphs A1, A5, B2 and C above) from the announcement requirement of the Hong Kong Listing Rules pursuant to Rules 14A.47. Pursuant to Rule 14A.34 of the Hong Kong Listing Rules, these transactions are exempt from the independent shareholders' approval requirement of the Hong Kong Listing Rules:

- Coal Export and Sales Agency Framework Agreement
- Property Leasing Framework Agreement
- Railway Leasing and Management Entrustment Service Framework Agreement

In applying for the waivers, we have agreed that we will comply with the requirements specified under Chapter 14A of the Hong Kong Listing Rules. In addition, we will procure Shanxi Longquan Foundry Coke Company Limited, a counterparty to one of the Coal/Coke Product Sales Framework Agreements, shall allow our auditors sufficient access to their records for the purpose of reporting on the continuing connected transactions set out in Item B1 above. Our Board will also state in our annual report whether our auditors have confirmed the matters stated in Rule 14A.38.

Our Directors, including our independent non-executive Directors, consider that the maximum aggregate annual values of all the continuing connected transactions described in paragraphs A1 to A5, B1 to B2 and C above are fair and reasonable and all such continuing connected transactions have been entered into and will be carried out in the ordinary and usual course of business, will be conducted on normal or on better than normal commercial terms and are fair and reasonable so far as our shareholders as a whole are concerned.

The transactions under the Coke Export Agency Framework Agreement and the Trademarks Licence Framework Agreement as described in the sub-paragraph headed "Exempt continuing connected transactions" above and the transactions under the Land Use Rights Leasing Framework Agreement (being the agreement referred to in paragraph A6 above) are exempt connected transactions under the Hong Kong Listing Rules as the annual value of each of these transactions falls below the de minimis disclosure threshold set by the Hong Kong Listing Rules.

Confirmation from the Joint Sponsors

The Joint Sponsors are of the view that our Company's continuing connected transactions described in this "Non-exempt Continuing Connected Transactions" sub-section are in the ordinary and usual course of business of our Company, on normal commercial terms, are fair and reasonable and in the interests of the shareholders of our Company as a whole, and that the proposed annual caps (where applicable) for these continuing connected transactions referred to above are fair and reasonable.

MANAGEMENT

Board of Directors

The Board of our Company consists of nine Directors, including five independent non-executive Directors. All of these Directors bear their offices upon being elected in our shareholders' meetings dated 18 August 2006, 23 August 2006 and 21 November 2006. The term of directorship is three years, which is renewable upon re-election or new appointment. The SASAC may assign nominees, and may require ChinaCoal Group to recommend these nominees to be appointed as Directors and members of the senior management team of our Company. It may also require ChinaCoal Group to terminate the offices of Directors and members of the senior management team.

Our Board is accountable to the shareholders, and the powers it may exercise includes but is not limited to the following:

(a) convene shareholders' meetings, and report the work of our Board during such meetings;

(b) implement the resolutions reached in the shareholders' meeting;

(c) determine our business plans and investment proposals;

(d) formulate our annual budget and financial report;

(e) formulate plans for the distribution of profits and the remediation of losses for our Company;

(f) formulate proposals on increasing or decreasing our registered share capital and issuing our debentures;

(g) formulate plans regarding the major acquisitions and share re-purchases by our Company, as well as plans regarding any merger, division or dissolution;

(h) reach decisions on internal management;

(i) appoint or remove the president of our Company, appoint or remove members of the senior management team according to the suggestions of the president, and determine their remuneration, awards and disciplinary matters;

(j) formulate our fundamental management system; and

(k) formulate proposals for any amendments to the constitution of our Company.

Except with regard to items (f), (g) and (k) above and where our Company decides to provide a guarantee for a loan owed by third parties, an affirmative vote of at least two thirds or more of all of our Directors will be required. Resolutions of all other matters as abovementioned can be resolved by the affirmative vote of more than one-half of our Directors.

In addition to Board approval, the approval of the shareholders must be obtained regarding plans for the distribution of profits and the remediation of losses for our Company; changes in the registered share capital; issuance of debentures; amendment of the constitution of our Company; and major transactions including any acquisition, disposal, merger, division or dissolution.

Two of our Directors are currently affiliated with ChinaCoal Group or an affiliate of ChinaCoal Group.

Supervisory Committee

The PRC Company Law provides that a supervisory committee must be set up by a joint stock company with limited liability. The supervisory committee is responsible for overseeing the financial matters of our Company and monitoring the conduct of the Board and members of the management team. The supervisory committee of our Company constitutes three members. One of the members is an employee representative elected by our employees. The remaining members are appointed by shareholders in the general meeting. One of the members serves as the chairman of the supervisory committee. Committee members cannot hold concurrent offices as a Director, the President or the Chief Financial Officer. The term of each committee member is three years, which is renewable upon re-election or new appointment.

The responsibilities and powers of the supervisory committee include:

- review and verify the financial reports and other financial information prepared by the Board and which are proposed to be presented at the shareholders' meetings;
- supervise the Directors, the president, vice-presidents and other senior officers of our Company to prevent them from abusing their powers or infringing upon the interests of our Company;
- propose to hold special general meetings; and
- exercise other powers provided by our Articles of Association.

DIRECTORS, SUPERVISORS AND SENIOR MANAGEMENT

The following table sets out certain information regarding our Directors:

Name	Age	Position
JING Tianliang	61	Chairman of the Board and Executive Director
ZHANG Baoshan	53	Vice-Chairman of the Board and Non-Executive Director
YANG Lieke	48	Executive Director and President
PENG Yi	44	Executive Director, Executive Vice-president and Chief Financial Officer
GAO Shangquan	77	Independent Non-Executive Director
ZHANG Ke	53	Independent Non-Executive Director
PENG Ru Chuan	58	Independent Non-Executive Director
WU Rongkang	66	Independent Non-Executive Director
LI Yanmeng	62	Independent Non-Executive Director

Directors

JING Tianliang, aged 61, has served as Chairman of the Board and an Executive Director of our Company since August 2006. He is also the President of ChinaCoal Group. He held offices in the Deputy Director General of the Ministry of Coal Industry (煤炭工業部), the Ministry of Energy Resources (國家能源部) and China National Coal Corporation (中國統配煤礦總公司); the Director General of the General Office and the Department of Foreign Affairs of the State Administration of Coal Industry (國家煤炭工業局); and the Chairman of the board of directors and the President of China National Coal Industry Import and Export Corporation (中國煤炭工業進出口總公司). He is also the Vice Chairman of the China National Coal Association (中國煤炭工業協會) and the Sub-council of Coal Industry under the China Council for the Promotion of International Commerce (中國貿易促進會煤炭行業分會暨國際商會煤炭行業分會), and a

senior adviser and adjunct professor at China University of Mining and Technology (中國礦業大學). Mr. Jing has extensive experience in enterprise operation and management, and has more than 40 years of management and operation experience in this industry. Mr. Jing is also a professorate senior engineer and a senior professional manager in the coal industry, and enjoys a special government allowance granted by the State Council. Mr. Jing graduated in November 1967 from Xi'an Mining Institute (西安礦業學院) and majored in electrical and mechanical engineering.

ZHANG Baoshan, aged 53, has served as the non-executive Director and Vice-chairman of our Company since August and November 2006, respectively. He is also the Vice President and Chief Engineer of ChinaCoal Group. He held various offices including Mine Manager, Deputy Director General and Director General of Datong Coal Mining Bureau (大同礦務局), and the President and Chairman of the board of directors of Pingshuo Coal Industry Company (平朔煤炭工業公司). Mr. Zhang is familiar with coal mining technology and has profound understanding of the coal mining industry in China. Mr. Zhang has over 30 years of operational and management experience in the industry. Mr. Zhang is a senior engineer and a senior professional manager in the coal industry and enjoys a special governmental allowance granted by the State Council. He graduated in September 1977 from Zhejiang University and majored in applied hydraulic technology.

YANG Lieke, aged 48, has served as the Executive Director and President of our Company since August 2006. He was the Managing Director of China Coal Import & Export Company (中國煤炭進出口公司), and was the Manager of the logistics department and planning department of China National Coal Industry Import & Export Corporation (中國煤炭工業進出口總公司). Mr. Yang is familiar with the process of production, operation and management of coal enterprises and the domestic and international coal mining market. He has extensive experience in enterprise production operation and management, and has more than 20 years of experience in the industry. Mr. Yang is a senior engineer and graduated in June 1982 from Xi'an Mining Institute (西安礦業學院) (now known as Xi'an Science and Technology University (西安科技大學), with a bachelor's degree and majored in mining engineering. Mr. Yang is currently a director of Shanghai Datun Energy, a company listed on the Shanghai Stock Exchange.

PENG Yi, aged 44, has served as the Executive Director, Executive Vice President and Chief Financial Officer of our Company since August 2006. Before joining our Company, Mr. Peng was the Vice President of ChinaCoal Group. He was also the Head of the Design Department of Zhongnan Architectural Design Institute (中南建築設計院設計事務所), the Deputy Head of Zhongnan Architectural Design Institute, Shenzhen Branch (中南建築設計院深圳分院), Head of the Finance Department of Zhongnan Architectural Design Institute (中南建築設計院財務處), Deputy General Manager, Chief Economist and Chief of Finance of Wuhan Kaidi Electric Power Company Limited (武漢凱迪電力股份有限公司), the Chairman of the board of directors of Wuhan Gelin Tiandi Environmental Protection Enterprises Group Company Limited (武漢格林天地環保產業集團有限公司) and Chairman of the board of directors of Wuhan Kaida Lantian Science and Technology Company Limited (武漢凱迪藍天科技有限公司). Mr. Peng is very experienced in enterprise and financial management and capital operation. He graduated in July 1984 from Wuhan Institute of Building Materials Industry (武漢建築材料工業學院) (now known as Wuhan University of Technology (武漢理工大學)) and obtained a Master's Degree in Business Administration (MBA) from Wuhan University (武漢大學) in June 1999. He is also a senior engineer.

GAO Shangquan, aged 77, is a professor and senior researcher. He has served as the independent non-executive Director of our Company since August 2006. Before joining our Company, he was the Vice Minister of State Commission for Restructuring the Economic Systems (國家經濟體制改革委員會), the

President of the China Society of Economic Reform (中國經濟體制改革研究會); the Chairman of China Enterprise Reform and Development Society (中國企業改革與發展研究會); the Head of China (Hainan) Reform and Development Institute (中國(海南)改革發展研究院); a member of the United Nations Development Policies Committee (聯合國發展政策委員會); an adjunct professor and the professor directing PhD students at Beijing University (北京大學), Shanghai Jiaotong University (上海交通大學) and Nankai University (南開大學); and the Dean and professor of the Management Department of Zhejiang University (浙江大學). He has been enjoying a special governmental allowance granted by the State Council since 1993. As a member of the China Society of Economic Reform (中國經濟體制改革研究會), he has been involved in the analysis of the economic systems and reforms and has led several research projects since 1982. Mr. Gao graduated in 1952 from the Department of Economics of Shanghai St. John University (上海聖約翰大學). Mr. Gao is currently an independent director of three A-share companies listed on the Shanghai Stock Exchange, which are China Minsheng Bank Ltd., China Unicom Limited and Minmetals Development Company Limited. He also served as an independent director of Baoshan Iron & Steel Co., Ltd. from February 2001 to May 2006. With his experience and expertise in the economic reforms and systems in China, our Board will benefit from the advice of Mr. Gao on strategic planning and investment plan formulation.

ZHANG Ke, aged 53, a certified public accountant of the Chinese Institute of Certified Public Accountants, has served as the independent non-executive Director of our Company since August 2006. He is also a senior certified accountant with qualification in securities dealing. Mr. Zhang was the Chairman of the board of directors and the principal partner of Shinewing Accountant (信永中和會計師事務所); Vice President of China Institute of Certified Public Accountants (中國註冊會計師協會); adjunct professor at the Department of Accounts of China People's University (中國人民大學); a committee member of the examination board of the Certified Accountants of the Ministry of Finance (財政部註冊會計師考試委員會); the Departmental Manager of China International Economics Consultants (中國國際經濟諮詢公司部門); the Deputy Executive Officer of Zhongxin Accountants Firm (中信會計師事務所); Deputy General Manager of Zhongxin Yongdao Accountants Firm (中信永道會計師事務所); a partner of Coopers & Lybrand International; General Manager of Zhongxin Yongdao Accountants Firm (中信永道會計師事務所), Vice Executive Director of Coopers & Lybrand, China. Mr. Zhang is currently an independent director of China Minsheng Bank Ltd, an A-share Company listed on the Shanghai Stock Exchange and three other H-share Companies, Air China Limited (also listed on the Shanghai Stock Exchange), HC International Inc. and Panva Gas Holdings Limited. Mr. Zhang obtained a Bachelor's degree in Economics from the Industrial Economics Department of China People's University in 1982 (中國人民大學). Mr. Zhang has more than 20 years of experience in reviewing and analyzing financial statements of listed companies. He has supervised a number of domestic and overseas listings and large scale management consultation and investment projects, and has given professional opinions in the course of work. He has extensive experience in dealing with internal and external auditors regarding the supervision of internal control and the auditing of financial statements. The Directors have evaluated Mr. Zhang's education, qualifications and experience and are satisfied that he has the necessary qualification and experience for the purpose of Rule 3.10(2) of the Hong Kong Listing Rules. With Mr. Zhang's accounting and financial management expertise, the board will benefit from the advice of Mr. Zhang in areas relating to accounting and finance as well as matters relating to corporate governance practices such as internal control and internal audit.

PENG Ru Chuan, aged 58, has served as an independent non-executive Director of our Company since August 2006. Mr. Peng currently serves as a Senior Inspector General of the Nomura International (Hong Kong) and a director of Brescia International Ltd., Brescia International (Hong Kong) Ltd. and Artemis International Group Ltd. Prior to joining our Company, he served as a Director of The Stock Exchange of Hong Kong (China), a senior supervisor of the China Development and Listing Promotion Department of the

Hong Kong Stock Exchange, and has engaged in investment and research work in several organizations including the China National Aviation Corporation in China and the LAREI research institute in the United States. Mr. Peng has a Master's degree in arts statistics and a Master's degree in biology statistics from the University of California. The Directors are of the view that our Company can benefit from Mr. Peng's knowledge and experience on the compliance obligations applicable to companies listed on the Hong Kong Stock Exchange.

WU Rongkang, aged 66, graduated from the Mining Department of Huainan Mining Institute (淮南礦業學院) in September 1961. He has served as the independent non-executive Director of our Company since November 2006. He is a professorate senior engineer, and serves in the China National Coal Association (中國煤炭工業協會) as an adviser and in the Technology Consulting Council as a deputy director (技術諮詢委員會) since January 2006. Mr. Wu served as a technician, an engineer, the chief engineer and the deputy general manager of Liyi Coal Mine in Huainan Mining Administration (淮南礦務局李一煤礦). He was appointed deputy director-general in Anhui Coal Mining Industry Company (安徽煤炭工業公司) in April 1983, deputy director-general of Huaibei Coal Mine Bureau (淮北礦務局) in 1986, and deputy director-general of Production Coordination Department of the Ministry of Coal Industry (國家煤炭工業部生產協調司) in May 1993. Since July 1998, he was appointed director-general of Economic Operation Center of the State Administration of Coal Industry (國家煤炭局經濟運行中心), president of the China Coal Enterprises Association (中國煤炭企業協會), and executive vice president of the China National Coal Association. Mr. Wu has extensive professional knowledge in the coal industry and has work experience of over 40 years which is related to coal production and technological management.

Li Yanmeng, aged 62, is a senior engineer. He has served as the independent non-executive Director of our Company since November 2006. Mr. Li graduated from the Electric Engineering Department of Wuhan School of Water Resource and Hydropower (武漢水電學院) in September 1981 with a major in power plant and electric system. Mr Li worked in the Shandong Xinwen Electric Equipment Factory (山東新汶綫路器材廠), and the First Engineering Department of Shandong Electric Construction Corp. (山東電力建設第一工程處). After graduation from college, he worked as a deputy director, a deputy manager and a manager in the Second Engineering Department of Shandong Electric Construction Corp. (山東電力建設第二工程處), as the general manager in Huangtai Power Plant (黃台發電廠), and as a director assistant in Shandong Electricity Power Bureau (山東電力工業局). In 1994, he was appointed deputy director-general of Construction Coordination Department of Ministry of Electric Industry (電力工業部建設協調司), deputy director-general of Key Construction Department (重點建設司), deputy director-general of Investment Department (投資司), director-general of Basic Industry Development Department (基礎產業發展司) of the State Planning Commission (國家計委), and director-general of the Office of the National Electric Reform Working Team (國家電力體制改革工作小組辦公室). In December 2002, he was appointed vice president of State Grid Corporation (國家電網公司). Mr. Li has extensive work experience for substantive periods in various power enterprises and State departments of macro-economic controls relating to basic energy management.

Supervisors

The following table sets out certain information regarding the Supervisors of our Company:

Name	Age	Position
DU Ji'an	45	Chairman of the Supervisory Committee
ZHOU Litao	46	Supervisor
CHEN Xiangshan	50	Employee Representative Supervisor

DU Ji'an, aged 45, has served as the Chairman of the Supervisory Committee of our Company since August 2006. He is also the Chairman of the Labour Union of ChinaCoal Group and has extensive working experience in the Department of Construction (基建司), Department of Personnel (幹部司) and the General Office (辦公廳) of the Ministry of Coal Industry (煤炭工業部). He joined China National Coal Industry Import and Export Corporation in 1994, and has accumulated experience in enterprise management, team building, human resources development and management. Mr. Du is also the Vice Chairman of the board of directors of the China University of Mining and Technology (中國礦業大學), and a deputy chairman of the committee of China Association for Education of Coal Industry (中國煤炭教育協會). Mr. Du obtained a Bachelor's degree in Mine Construction from Shandong Mining Institute (山東礦業學院) (now known as Shandong Science and Technology University山東科技大學) in July 1983. He is a senior engineer and enjoys a special governmental allowance granted by the State Council.

ZHOU Litao, aged 46, has served as a Supervisor of our Company since August 2006. Before taking on this office, he is the General Legal Counsel, Director of the Legal Department and senior economist of ChinaCoal Group. Mr. Zhou was the Director of the Legal Department of China National Coal Industry Import and Export Corporation (中國煤炭工業進出口總公司) since July, 1995 and has been the General Legal Counsel from July 2003. Mr. Zhou is familiar with Chinese Civil Law, Commercial Law, International Commercial Principles, and has rich experience in legal matters involving enterprises. He graduated in 1983 from Hubei Institute of Finance (湖北財經學院) (now known as Zhongnan University of Economics and Law (中南財經政法大學)with a Law Degree and is a qualified consultant on enterprise Law. Before joining our Company, he served as the Vice Chief Engineer, Deputy Head, and Head for the Yaoqiao Mine of Datun Coal and Electricity (Group) Limited — Liability Company (大屯煤電(集團)有限責任公司), and the Chief Engineer of Datun Coal and Electricity (Group) Limited — Liability Company (大屯煤電(集團)有限責任公司). Mr. Qi has been involved in the production, operation and management of coal mining work for an extensive period and has developed extensive knowledge of the coal industry. He has over 30 years of operational and management experience in the industry. He graduated from Datun Coal and Electricity (Group) Limited — Liability Company Intermediate Specialized Institute

(大屯煤電(集團)有限責任公司職工中等專科學校) in August 1986. He obtained a Master's degree in Industrial Construction from China University of Mining and Technology (中國礦業大學) in 2005. He is a senior engineer.

NIU Jianhua, aged 44, has served as the Vice President of our Company since August 2006. He was also the President Assistant of ChinaCoal Group and General Manager of the General Office of ChinaCoal Group. Before he joined ChinaCoal Group in August 1999, he served as an officer of the Department of Personnel of China Coal Research Institute of the Ministry of Coal Industry (煤炭工業部煤炭科學研究總院人事處), the Deputy Director of the Technical Personnel Division of the Department of Personnel and Secretary of the General Office of the Ministry of Coal Industry (煤炭工業部人事司技術幹部處). Mr. Niu has worked in this industry for an extensive period, has developed extensive understanding of the industry, and has rich experience in management. Mr. Niu obtained a Bachelor's Degree in Mathematics from Shandong Mining Institute (山東礦業學院) (now known as Shandong Science and Technology University 山東科技大學) in 1984. He is a senior engineer.

ZHOU Dongzhou, aged 47, has served as the Secretary to the Board and the Joint Company Secretary since August 2006. He served as the Deputy General Manager of China Coal Import & Export Company (中國煤炭進出口公司) before joining our Company. He was the foreign affairs officer of China University of Mining and Technology (中國礦業大學), Department of Science and Education of the Ministry of Coal Industry (國家煤炭工業部科技教育司) and the secretary of the General Office of the Ministry of Coal Industry(煤炭工業部辦公廳) and the General Office of State Administration of Coal Industry (國家煤炭工業局). After joining ChinaCoal Group in August 1999, he served as the Manager of the Department of Market Development, the Deputy General Manager of the Coal Trading Division, and the Deputy General Manager of China Coal Import & Export Company (中國煤炭進出口公司). Mr. Zhou obtained a Bachelor's degree in English from China University of Mining and Technology (中國礦業大學) (formerly known as China Institute of Mining and Technology) (中國礦業學院) in July 1982. He also obtained a Master's degree in Engineering from the same university in May 1997.

JOINT COMPANY SECRETARY

WANG Yuanheng, aged 45, has served as the Joint Company Secretary to our Company since August 2006. He was born in Singapore, and is a qualified lawyer in Hong Kong as well as England and Wales. He is a senior consultant in Livasiri & Co. and a senior foreign lawyer in Qiankun Law Firm in Beijing. He has developed expertise in mergers and acquisitions, listing and raising of finance, project finance, international investments and commercial law for more than 10 years. He obtained a Bachelor's degree in Laws from the University of Wales and a Postgraduate Certificate in Laws from University of Hong Kong.

REQUIREMENTS UNDER RULE 8.17 AND RULE 19A.16

Mr. Zhou Dongzhou does not possess the specified qualifications required by Rule 8.17 of the Hong Kong Listing Rules. Given the important role of the company secretary in the corporate governance of a listed issuer, particularly in assisting the listed issuer as well as its directors in complying with the Hong Kong Listing Rules and other relevant laws and regulations, we have the following arrangements:

- Our Company has engaged Mr. Wang Yuanheng, who meets the requirements under Rule 8.17 of the Hong Kong Listing Rules, as a joint company secretary to assist Mr. Zhou so as to enable him

to acquire the relevant experience (required under 8.17(3) of the Hong Kong Listing Rules) to discharge the functions as company secretary of our Company.

- Mr. Wang will be engaged as our joint company secretary for an initial period of three years from the date of listing of the H Shares. As part of this arrangement, Mr. Wang will communicate regularly with Mr. Zhou on matters relating to corporate governance, the Hong Kong Listing Rules as well as others laws and regulations which are relevant to us and our other affairs. Mr. Wang will also assist Mr. Zhou in organizing board meetings and shareholders' meetings of our Company and other matters which are incidental to the duties of company secretary. Mr. Wang is not resident in the PRC but travels to Beijing regularly and can therefore render assistance to Mr. Zhou by regular contact and visits between them.

- Mr. Zhou had participated in a seminar presented by our Hong Kong legal advisers on the ongoing compliance obligations applicable to companies listed on the Hong Kong Stock Exchange. In order to keep Mr. Zhou abreast of his knowledge on the Hong Kong Listing Rules and other applicable laws and regulations, Mr. Zhou will endeavour to attend further relevant training courses on a regular basis, including briefings on the latest changes to the applicable Hong Kong laws and regulations and the Hong Kong Listing Rules organized by our Hong Kong legal advisers and other professional advisers on an invitation basis, as well as seminars organized by the Hong Kong Stock Exchange for PRC issuers from time to time.

- Mr. Zhou will continue to be assisted by our Joint Compliance Advisers, particularly in relation to Hong Kong corporate governance practices and compliance issues and our Hong Kong legal advisers, on matters concerning our ongoing compliance with the Hong Kong Listing Rules and the applicable laws and regulations.

We have applied to the Hong Kong Stock Exchange for, and have been granted, a waiver from strict compliance with the requirements of Rule 8.17 and Rule 19A.16 of the Hong Kong Listing Rules. Upon expiry of the initial three years period, the qualifications of Mr. Zhou will be re-evaluated to determine whether the appointment of Mr. Zhou as our company secretary will satisfy the requirements laid down in Rules 8.17 and 19A.16 of the Hong Kong Listing Rules.

QUALIFIED ACCOUNTANT

Xu Guannan, aged 29, has served as our Qualified Accountant since August 2006. Ms. Xu is employed by us on a full-time basis and is a member of our senior management as required under Rule 3.24 of the Hong Kong Listing Rules. Ms. Xu became a full member of the ACCA on 31 January 2005. Before she joined ChinaCoal Group in 2006, she was responsible for the internal finance and auditing work of Metro Cash & Carry Co., Ltd; the accounting work of the International Business Department of the Chengjian Office of China Construction Bank Beijing Branch; and was the auditor of Beijing Yongtuo Accountants' Firm (北京永拓會計師事務所). Ms. Xu graduated from Jiangxi University of Finance and Economics with a Bachelor of Economics, where she majored in international finance and international accounting.

MANAGEMENT PRESENCE IN HONG KONG: RULE 8.12 AND RULE 19A.15 REQUIREMENTS

According to Rule 8.12 and Rule 19A.15 of the Hong Kong Listing Rules, an issuer must have sufficient management presence in Hong Kong including at least two of the issuer's executive Directors as ordinary residents in Hong Kong. Since the operation of our Company is in the PRC, we do not and, for the

foreseeable future, will not, have management presence in Hong Kong. Currently, all of our executive Directors reside in the PRC. Accordingly, we have applied to the Hong Kong Stock Exchange for, and the Hong Kong Stock Exchange has granted, a waiver from strict compliance with Rule 8.12 and Rule 19A.15 of the Hong Kong Listing Rules. We have made arrangements to maintain effective communication between us and the Hong Kong Stock Exchange. Both the authorized representatives of our Company, Mr. Peng Yi, Executive Director, and Mr. Zhou Dongzhou, Secretary to the Board and Joint Company Secretary, are PRC residents who will be readily contactable by the Hong Kong Stock Exchange and will be able to meet with the Hong Kong Stock Exchange to discuss any matters in relation to the Company on short notice. Mr. Wang Yuanheng, who is our Joint Company Secretary and resident in Hong Kong, also acts as a channel of communication with the Hong Kong Stock Exchange in addition to our authorized representatives. We believe that Mr. Wang Yuanheng will be in a position to represent our Company. As a Joint Company Secretary of our Company, he will have to familiarize himself with our affairs in order to comply with the obligations imposed on him under the Hong Kong Listing Rules, and he will have sufficient knowledge of our affairs in order to fulfill his responsibilities as an additional channel of communication with the Hong Kong Stock Exchange. We also have one independent non-executive Director (namely, Peng Ru Chuan) who is ordinarily resident in Hong Kong. In addition, we have agreed to retain CICC (HK) and Citigroup as our Joint Compliance Advisers which will serve as our further channel of communication with the Hong Kong Stock Exchange for the period from the Listing Date to the date when we mail our annual reports to our shareholders for the first full financial year immediately after our listing.

EMPLOYEES

Please refer to "Business — Employees".

BOARD COMMITTEES

We have established the following four committees in our Board of Directors: an audit committee, a remuneration committee, a strategy planning committee and a safety, health and environmental committee. The committees operate in accordance with terms of reference established by our Board of Directors.

Audit Committee. We have established an audit committee in compliance with the Code on Corporate Governance Practices as set out in Appendix 14 to the Hong Kong Listing Rules. The primary duties of the audit committee are to review and supervise our financial reporting process. All members of the audit committee are appointed by the Board. The audit committee currently consists of four Directors, namely, Zhang Ke, Gao Shangquan, Peng Ru Chuan and Zhang Baoshan. Zhang Ke currently serves as the chairman of our audit committee.

The responsibilities of our audit committee after the completion of the Global Offering will include, among others:

- appointing and overseeing the work of our independent auditors and pre-approving all non-audit services to be provided by our independent auditors;
- reviewing our annual and interim financial statements, earnings releases, critical accounting policies and practices used to prepare financial statements, alternative treatments of financial information, the effectiveness of our disclosure controls and procedures and important trends and developments in financial reporting practices and requirements;

- reviewing the planning and staffing of internal audits, the organization, responsibilities, plans, results, budget and staffing of our internal audit team and the quality and effectiveness of our internal controls;
- reviewing our risk assessment and management policies; and
- establishing procedures for the treatment of complaints received by us regarding accounting, internal accounting controls, auditing matters, potential violations of law and questionable accounting or auditing matters.

We believe that the composition and functioning of our audit committee following the completion of the global offering will comply with the applicable requirements of the Hong Kong Stock Exchange. We intend to comply with future requirements to the extent they become applicable to us.

Remuneration Committee. We have established a remuneration committee in compliance with the Corporate Governance Code as set out in Appendix 14 to the Hong Kong Listing Rules. The primary duties of the remuneration committee are to formulate the training and compensation policies and to determine and manage the compensation of our senior management. The remuneration committee currently consists of four Directors, namely, Peng Ru Chuan, Zhang Ke, Li Yanmeng and Peng Yi. Peng Ru Chuan currently serves as the chairman of our renumeration committee. The responsibilities of our remuneration committee include, among others:

- approving and overseeing the total compensation package for our executive officers, evaluating the performance of and determining and approving the compensation to be paid to our senior management;
- reviewing and making recommendations to our Board of Directors with respect to Director compensation, including equity-based compensation;
- administering and periodically reviewing and making recommendations to our board of directors regarding the long-term incentive compensation or equity plans made available to our Directors, employees and consultants; and
- reviewing and making recommendations to our Board of Directors regarding executive compensation philosophy, strategy and principles and preparing annual reports on the compensation of our senior management.

Strategic Planning Committee. We have established a strategic planning committee whose primary duties are to formulate our overall development plans and investment decision-making procedures. The strategic planning committee currently consists of six Directors, namely, Jing Tianliang, Gao Shangquan, Li Yanmeng, Wu Rongkang, Zhang Baoshan and Yang Lieke. Jing Tianliang currently serves as the chairman of our strategic planning committee. The responsibilities of our strategic planning committee include, among others:

- reviewing our long-term development strategies;
- reviewing major issues affecting our development; and
- reviewing significant capital expenditure, investment and financing projects that require approval of our Board.

Safety, Health and Environmental Committee. We have established a safety, health and environmental committee, whose primary duties are to ensure that appropriate performance targets and benchmarks are in place for our health, safety and environmental obligations, as well as to monitor potential liabilities, changes in regulations, community expectations and technological changes which relate to safety, health and environmental issues. The safety, health and environment committee currently consists of three Directors, namely, Wu Rongkang, Zhang Baoshan, and Yang Lieke. Wu Rongkang currently serves as the chairman of our safety, health and environmental committee.

COMPENSATION OF DIRECTORS, SUPERVISORS AND SENIOR MANAGEMENT

We were incorporated on 22 August 2006. Prior to that, we did not exist as an independent legal entity and our operations were conducted by ChinaCoal Group. The compensation information set forth below for our Directors, Supervisors and various other employees, insofar as it relates to periods prior to our incorporation, is stated at historical amounts as if our current structure had been in existence throughout the relevant periods.

Our Directors, Supervisory Committee Member and senior management receive compensation in the form of salaries, bonuses, housing allowances and other benefits-in-kind, including our contribution to the pension plan on their behalf. The aggregate fees and compensation paid to our Directors, Supervisory committee and senior management in the years ended 31 December 2003, 2004 and 2005 were approximately RMB2.28 million, RMB3.15 million and RMB4.48 million, respectively. As required by PRC regulations, we participate in various defined contribution pension funds organized by provincial and municipal governments for our employees, including the employees who are also Directors, Supervisory Committee Member, and management personnel. Our Company contributed RMB0.18 million for our Directors, Supervisory Committee Members, and senior management in the year ended 31 December 2005. The aggregate amount of compensation we paid to our five highest paid individual employees during the year ended 31 December 2005 was approximately RMB2.61 million. Under the existing arrangements currently in force, the aggregate remuneration payable to and benefits-in-kind received by our Directors (including five independent non-executive Directors) and Supervisory Committee Members, in respect of the year ending 31 December 2006 are estimated to be approximately RMB2.54 million (including RMB0.48 million received by our independent non-executive Directors) and RMB1.15 million, respectively.

LONG TERM INCENTIVE PLAN

In order to incentivize and reward the management and other key employees of our Company, our Board and the shareholders intend to adopt a long-term incentive plan, which will be implemented after obtaining all applicable approvals.

As of the date of this Prospectus, the entire issued share capital of our Company is beneficially owned by ChinaCoal Group as follows:

Name	Number of domestic shares	Voting power
ChinaCoal Group	8,000,000,000	100.00%

Immediately following the completion of the Global Offering (but without taking into account the Shares which may be taken up pursuant to the Global Offering and assuming that the Over-allotment Option is not exercised), we expect that the only party interested in 10% or more of the voting power at any of our shareholders' general meeting will be:

Name	Shares	Voting power
ChinaCoal Group	7,675,363,000 Domestic Shares	68.25%

If the Over-allotment Option is exercised in full, ChinaCoal Group will own 65.00% of our total Shares then in issue.

None of our Directors or Supervisors is a legal or beneficial owner of any of our Shares. We are not aware of any arrangement currently in place which may at a subsequent date result in a change of control of our Company.

For more information on ChinaCoal Group, see "Restructuring" and "Relationship with ChinaCoal Group".

As of the date of this Prospectus, the registered capital of our Company is RMB8,000,000,000 divided into 8,000,000,000 Domestic Shares of nominal value of RMB1.00 each.

Immediately upon completion of the Global Offering but without taking into account the exercise of the Over-allotment Option, our share capital will be as follows:

	Number of Shares	Percentage of share capital then in issue
Issued and to be issued, fully paid or credited as fully paid:		
Domestic Shares in issue (shares held by ChinaCoal Group)	7,675,363,000	68.25%
H Shares under the Global Offering	3,246,374,000	28.87%
H Shares held by NSSF	324,637,000	2.88%
	11,246,374,000	100.00%

Assuming (1) the Over-allotment Option is exercised in full; and (2) NSSF continues to hold the H Shares (converted from Domestic Shares) transferred to it by ChinaCoal Group up to the time of exercise of the Over-allotment Option, our share capital will be as follows:

	Number of Shares	Percentage of share capital then in issue
Issued and to be issued, fully paid or credited as fully paid:		
Domestic Shares in issue (shares held by ChinaCoal Group)	7,626,667,000	65.00%
H Shares under the Global Offering	3,733,330,000	31.82%
H Shares held by NSSF	373,333,000	3.18%
	11,733,330,000	100.00%

Our Shares

Upon completion of the Global Offering, Domestic Shares and H Shares are both ordinary shares in our share capital. However, subject to the exception stipulated by PRC law, H Shares may only be subscribed for by, and traded in Hong Kong dollars between, legal or natural persons of Hong Kong, Macau, China Taiwan or any country or region other than the PRC. Domestic Shares, on the other hand, may only be subscribed for by, and traded between, legal and natural persons or other qualified entities of the PRC (other than Hong Kong, Macau and China Taiwan) and must be subscribed for and traded in Renminbi. All cash dividends in respect of H Shares are to be paid by our Company in Hong Kong dollars whereas all dividends in respect of Domestic Shares are to be paid by our Company in Renminbi. In addition to cash, dividends may be distributed in the form of Shares. Any distribution of Shares, however, must be approved by special resolution of the shareholders. For holders of H Shares, dividends in the form of Shares will be distributed in the form of additional H Shares. For holders of Domestic Shares, dividends in the form of Shares will be distributed in the form of additional Domestic Shares.

Except as described above and in relation to the despatch of notices and financial reports to shareholders, dispute resolution, registration of shares on different parts of the register of shareholders, the method of share transfer and the appointment of dividend receiving agents, which are all provided for in the Articles of Association and summarized in "Appendix IX - Summary of Articles of Association", the Domestic Shares and the H Shares will rank pari passu with each other in all respects and, in particular, will

rank equally for all dividends or distributions declared, paid or made after the date of this Prospectus. However, the transfer of Domestic Shares is subject to such restrictions as PRC law may impose from time to time.

Under our articles of association, any change or abrogation of the rights of class shareholders should be approved by way of a special resolution of the general meeting of shareholders and by a separate meeting of shareholders convened by the affected class shareholders. However, as provided in our articles of association, the procedures for the approval by separate class shareholders shall not apply:

(i) where we issue, upon approval by a special resolution of our shareholders in a general meeting, either separately or concurrently every twelve months, not more than 20% of each of the existing issued Domestic Shares and H Shares; or

(ii) where our plan to issue A shares and H Shares on establishment is implemented within fifteen months from the date of approval by the securities regulatory authorities of the State Council; or

(iii) upon the transfer of our Domestic Shares by the holders of our Domestic Shares to overseas investors and the listing and trading of such transferred shares on an overseas stock exchange provided that the transfer and trading of such transferred shares shall have obtained the approval of the authorized securities approval authorities of the State Council, including the CSRC.

We have not approved any share issue plan other than the Global Offering as of the date of this Prospectus.

We have given certain undertakings in respect of the issuance of the H Shares and other securities. See "Underwriting".

TRANSFER OF OUR DOMESTIC SHARES FOR LISTING AND TRADING ON THE HONG KONG STOCK EXCHANGE

According to the stipulations by the State Council securities regulatory authority and our articles of association, the holders of our Domestic Shares may transfer our Domestic Shares to overseas investors, and such transferred shares may be listed or traded on an overseas stock exchange provided that the transfer and trading of such transferred shares shall have obtained the approval by the State Council securities regulatory authorities, including the CSRC. In addition, such transfer shall have completed any requisite internal approval process and complied with the regulations prescribed by the State Council securities regulatory authorities and the regulations, requirements and procedures prescribed by the relevant stock exchange. No approval by separate class meeting is required for the listing and trading of such transferred shares on an overseas stock exchange.

In this regard, if any holder of our Domestic Shares is to transfer its Domestic Shares to overseas investors and for listing and trading on the Hong Kong Stock Exchange, such transfer and conversion will need to obtain the approval of the relevant PRC regulatory authorities, including the CSRC. The listing of such converted shares on the Hong Kong Stock Exchange will also need to obtain the approval of the Hong Kong Stock Exchange.

Based on the procedures for the transfer and conversion of our Domestic Shares into H Shares as disclosed below, we can apply for the listing of all or any portion of our Domestic Shares on the Hong Kong Stock Exchange as H Shares in advance of any proposed transfer to ensure that the transfer process can be

completed promptly upon notice to the Hong Kong Stock Exchange and delivery of shares for entry on the H Share register. As any listing of additional Shares after our initial listing on the Hong Kong Stock Exchange is considered by the Exchange to be a purely administrative matter, the Hong Kong Stock Exchange has advised us that it does not require such prior application for listing at the time of our initial listing in Hong Kong. The relevant procedural requirements for the transfer and conversion of our Domestic Shares to H Shares are:

(1) The holder of Domestic Shares is to obtain the requisite approval of CSRC or the authorized securities approval authorities of the State Council for the transfer of all or part of its Domestic Shares into H Shares.

(2) The holder of Domestic Shares is to issue to us a removal request in respect of a specified number of Shares attaching the relevant documents of title.

(3) Subject to obtaining the approval of our board of directors, we would then issue a notice to our H Share registrar with instructions that, with effect from a specified date, our H Share registrar is to issue the relevant holders with H Share certificates for such specified number of Shares.

(4) Such specified number of Domestic Shares to be transferred to H Shares are then re-registered on our H Share register maintained in Hong Kong on the condition that:

   (a) our H Share registrar lodges with the Hong Kong Stock Exchange a letter confirming the proper entry of the relevant shares on the H Share register and the due dispatch of share certificate; and

   (b) the admission of the H Shares (converted from Domestic Shares) to trade in Hong Kong will comply with the Hong Kong Listing Rules and the General Rules of CCASS and CCASS Operational Procedures in force from time to time.

(5) Upon completion of the transfer and conversion, the shareholding of the relevant holder of Domestic Shares in our domestic share register will be reduced by such number of Domestic Shares transferred and the number of H Shares in the H Share register will correspondingly increase by the same number of Shares.

(6) We will comply with the Hong Kong Listing Rules to inform shareholders and the public by way of an announcement of such fact not less than three days prior to the proposed effective date.

Upon completion of the Global Offering, ChinaCoal Group will be subject to the following regulatory transfer restrictions:

- Under the PRC Company Law, Shares which have been issued before we publicly issue Shares are prevented from being transferred within one year from the date of listing on a stock exchange.

- Under the Hong Kong Listing Rules, ChinaCoal Group as our controlling shareholder is prevented from, amongst others (i) disposing of or agreeing to dispose any of our Shares for a period of six months from the date of listing on the Hong Kong Stock Exchange; and (ii) during a period of six months thereafter, disposing of or agreeing to dispose of any of our Shares if, immediately after such disposition, they would respectively cease to be our controlling shareholder.

TRANSFER OF SHARES TO NSSF

According to relevant State policy of the PRC, shareholders who hold State-owned shares are generally required to reduce their shares in an amount of 10% of the entire offering in any overseas public offering and either remit the sale proceeds of such shares to NSSF or transfer such shares to NSSF for retention. Pursuant to the approvals of the relevant PRC authorities, ChinaCoal Group is required to transfer to NSSF such number of Domestic Shares as shall be equivalent to 10% of the number of Offer Shares. These Domestic Shares will be converted into H Shares on a one-for-one basis upon the listing of the H Shares on the Hong Kong Stock Exchange and will be held by NSSF immediately thereafter. Such share transfer to NSSF was one of the conditions of obtaining the necessary PRC regulatory approvals for the Global Offering.

Upon completion of the Global Offering, NSSF will hold approximately 324,637,000 H Shares, representing approximately 2.88% of our total issued share capital, if the Over-allotment Option is not exercised, or 373,333,000 H Shares, representing 3.18% of our total issued share capital if the Over-allotment Option is exercised in full. These H Shares will not constitute any part of the Offer Shares. Neither ChinaCoal Group nor our Company will receive any proceeds from the transfer by ChinaCoal Group to NSSF of such Shares or any subsequent disposal of such H Shares by NSSF.

As advised by our PRC legal adviser, Jia Yuan Law Firm:

- the aforesaid transfer is mandated by the relevant PRC authorities in accordance with the State policy and neither ChinaCoal Group nor our Company has any influence over the decision;
- both the aforesaid transfer and conversion, and the retention of H Shares by NSSF following completion of the Global Offering, have been approved by the relevant PRC authorities and are in compliance with the relevant PRC law;
- the H Shares to be held by NSSF upon completion of the Global Offering shall not be subject to any lock-up under the PRC Company Law; and
- there is no legal restriction on NSSF to transfer or dispose of such H Shares following the listing of the H Shares.

FUTURE PLANS

See "Business — Our business strategies" for a detailed description of our Company's future plans.

USE OF PROCEEDS

We estimate that we will receive net proceeds from the Global Offering of approximately HK$11.3 billion, assuming that the Over-allotment Option is not exercised, after deducting the underwriting commissions and other estimated offering expenses payable by us and assuming an initial public Offer Price of HK$3.625 per H Share, being the mid-point of the indicative Offer Price range set forth on the cover page of this Prospectus. We intend to use these net proceeds for the following purposes:

- A maximum of 65.0%, or approximately RMB7.4 billion (equivalent to approximately HK$7.3 billion), is expected to be used primarily for the construction of future open pit mines and underground mines, related coal processing plants and dedicated railways planned for development in our Pingshuo Mining Area. Of this total amount, we plan to use RMB6.3 billion for the construction of mines, RMB0.7 billion for the construction of coal processing plants and RMB0.4 billion for the construction of dedicated railways;

- A maximum of 25.0%, or approximately RMB2.8 billion (equivalent to approximately HK$2.8 billion), is expected to be used to repay bank loans. The relevant bank loans mainly are borrowings from four PRC commercial banks and their maturity dates range from 1 January 2007 to 20 November 2015. In addition, the annual interest rates of these bank loans range from 4.93% to 6.12%. These loans are used as working capital and for the construction of the Antaibao Mines and the Anjialing Mines; and

- the remaining balance to fund our working capital.

To the extent that the net proceeds of the Global Offering derived from unused capital are not immediately applied to the above purposes, we intend to deposit the proceeds in interest-bearing bank accounts, such as short-term savings accounts or basic short-term money market funds, with licensed commercial banks and/or authorized financial institutions in Hong Kong or China.

In the event that the Over-allotment Option is exercised in full, we estimate that we will receive net proceeds from the sale of these additional Offer Shares of approximately HK$1.7 billion, after deducting the underwriting commissions and other estimated offering expenses payable by us and assuming the same initial public Offer Price as stated above. We intend to use these net proceeds to expand and upgrade our coal mines and coal processing plants.

In the event that the Offer Price is set at the high-end of the proposed Offer Price range and the Over-allotment Option is not exercised at all, our Company will receive net proceeds of approximately HK$12.6 billion. The additional net proceeds of approximately HK$1.3 billion will be used to develop our coal production facilities and ancillary facilities. In the event that the Offer Price is set at the high end of the proposed Offer Price range and the Over-allotment Option is exercised in full, our Company will receive net proceeds of approximately HK$14.5 billion and the additional net proceeds of approximately HK$1.9 billion arising from the exercise of the Over-allotment Option will be used in the construction of our coal production facilities and related ancillary facilities.

In the event that the Offer Price is set at the low end of the proposed Offer Price range and the Over-allotment Option is not exercised at all, our Company will receive net proceeds of approximately HK$9.9 billion. Under such circumstances, the net proceeds allocated to working capital will be reduced. In the event that the Offer Price is set at the low-end of the proposed Offer Price range and the Over-allotment Option is exercised in full, our Company will receive net proceeds of approximately HK$11.4 billion. The additional net proceeds of approximately HK$1.5 billion (when compared to the net proceeds to our Company with the Offer Price being determined at the low end of the stated range and assuming the Over-allotment Option is not exercised) will be used in the construction of our coal production facilities and related ancillary facilities.

THE STRATEGIC PLACING

As part of the International Offering, the Joint Global Coordinators and we have entered into a strategic placing agreement with First Reserve Corporation, FR XI Offshore AIV, L.P., being a private equity fund managed by First Reserve Corporation ("First Reserve Fund" and together with First Reserve Corporation, "First Reserve") and AMCI Capital L.P. ("AMCI") who, by joining each other and becoming our strategic investors, will subscribe for our H Shares at the Offer Price as follows:

(i) First Reserve Fund will subscribe for such number of H Shares that may be purchased with U.S.$100 million; and

(ii) AMCI will subscribe for such number of H Shares that may be purchased with U.S.$25 million.

If either of First Reserve Fund and AMCI fails to subscribe for the relevant number of H Shares under the strategic placing agreement, the other will be required to subscribe for all the H Shares covered by the strategic placing agreement.

Assuming an Offer Price of HK$3.625 (being the mid-point of the indicative Office Price range set forth on the cover page of this Prospectus) and using the exchange rate of HK$7.80 to U.S.$1.00, the total numbers of H Shares subscribed by First Reserve Fund and AMCI would be approximately 215,172,000 and 53,793,000 H Shares, respectively, which represent approximately 1.9% and 0.5%, respectively, of our issued and outstanding share capital, or approximately 6.6% and 1.7%, respectively, of the Offer Shares outstanding upon completion of the Global Offering (assuming the Over-allotment Option is not exercised). Each of First Reserve Fund and AMCI is permitted to subscribe for the relevant number of H Shares through a wholly-owned investment vehicle.

First Reserve Corporation is a global private equity firm headquartered in the U.S. which has expertise in strategic business planning, particularly in the energy sector. Founded in 1983, First Reserve Corporation is one of the oldest and largest private equity firms which specializes in the energy industry. By utilizing its broad base of specialized industry knowledge, First Reserve Corporation actively pursues building a broadly diversified global investment portfolio of companies involved in various sectors of the energy industry. Since 1992, First Reserve Corporation has raised over U.S.$12.7 billion for its funds. Under the strategic placing agreement, First Reserve Corporation has undertaken that it will continue to be the investment manager of First Reserve Fund so long as First Reserve Fund or its wholly-owned subsidiary holds any of our H Shares. First Reserve Fund is a limited partnership organized in the Cayman Islands for the purpose of private equity investment.

AMCI is managed by Hans Mende and Fritz Kundrun, the founders and sole shareholders of American Metals & Coal International, Inc., a global coal and resources company headquartered in the U.S. which has expertise in strategic business planning, particularly in the coal sector. Since 1986, American Metals & Coal International, Inc. has developed a significant volume of coal production, processing, transport and logistics assets in the U.S., Australia, Europe, South America, South Africa and China. It also specializes in investing in the coal, steel raw material supply and related infrastructure industries.

First Reserve and American Metals & Coal International, Inc. have jointly reviewed and invested in a number of coal-related businesses, including Alpha Natural Resources Inc., Foundation Coal Holdings Inc. and several mines in Australia's central Queensland. Recently, First Reserve and American Metals & Coal International, Inc. have jointly bought a minority stake in a Czech coal producer, OKD AS.

Each of First Reserve Corporation, First Reserve Fund and AMCI is an independent third party not connected with our Company.

We believe that First Reserve's and AMCI's interest in us, together with their expertise in strategic planning and coal industry related operations, will help our continuing development in the coal and energy industry. Through our strategic relationship with First Reserve and AMCI, we intend to further raise our profile in the international markets, explore potential business opportunities worldwide and enhance our ability in formulating global business strategies.

Conditions Precedent

The subscription obligations of First Reserve Fund and AMCI are conditional upon the Underwriting Agreements being entered into and having become effective and unconditional.

Areas of Cooperation

If and when opportunities present themselves in the future, First Reserve and we may explore further cooperation. First Reserve has agreed to provide strategic advice to our Company on areas including strategic planning, business development, investment opportunities, international marketing, production safety, efficiency improvement and management issues. Pursuant to a strategic advisory agreement entered into between First Reserve and our Company dated 7 November 2006, First Reserve has agreed to provide such advisory services upon our reasonable request. The strategic advisory agreement will become effective upon completion of the Global Offering (including the strategic and corporate placings) and either party may terminate such agreement by notice upon and following the earlier of: (i) the fifth anniversary of the date of such agreement; and (ii) the date on which First Reserve Fund and its wholly-owned subsidiaries cease to hold at least 50% of their aggregate shareholding in our Company as of the Listing Date. An annual fee in the amount of U.S.$10,000 plus such additional amounts as reasonably agreed by the parties based on the advisory services rendered will be payable by our Company. In order to enable First Reserve to provide the advisory services effectively under the strategic advisory agreement, First Reserve will in some circumstances, subject to applicable law and regulatory rules, be given access to information regarding our Company's affairs.

Restrictions on Disposals by the Strategic Investors

Each of First Reserve Fund and AMCI has agreed that, without the prior written consent of us and the Joint Global Coordinators, and save as provided in the strategic placing agreement:

- it will not for a period of 18 months following the Listing Date (the "Lock-up Period") dispose of any H Shares subscribed for pursuant to the strategic placing agreement, other than transfers to any of its wholly-owned subsidiaries and on the basis that the transferee will be subject to the same restrictions on disposals as those imposed on the subscriber of such H Shares pursuant to the strategic placing agreement; and
- after the Lock-up Period, it shall first notify us before the disposal of any H Shares subscribed by it pursuant to the strategic placing agreement, and it shall use all reasonable endeavours to ensure that any such disposal will not create a disorderly or false market for the H Shares.

For the above purpose, "dispose of" means, in respect of any H Shares (and any other securities derived from the H Shares pursuant to any rights issue, capitalization issue, capital reorganization or

otherwise), offering, pledging, charging, selling, mortgaging, lending, creating, transferring or otherwise disposing of any legal or beneficial interest (including by the creation of or an agreement to create or selling or granting or agreeing to sell or grant any option or contract to purchase or any warrant or right to purchase) in the H Shares or any securities convertible into or exercisable or exchangeable for such H Shares, or contracting to do so, whether directly or indirectly, or entering into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences or incidents of ownership of such H Shares or securities, whether any of the foregoing transactions is to be settled by delivery of H Shares or such other securities, cash or otherwise.

The Lock-up Period will early expire if ChinaCoal Group sells any of its Shares in the share capital of our Company after the Global Offering, save as pursuant to the Over-allotment Option, the issue of new Shares by our Company for public offering or as required by any relevant PRC laws and regulations.

CORPORATE INVESTORS

The Corporate Placing

On 29 November 2006, as part of the International Offering, we have entered into corporate placing agreements with a number of corporate investors (the "Corporate Investors") who in aggregate have agreed to subscribe at the Offer Price for such number of Offer Shares that may be purchased with an aggregate of U.S.$250 million. Assuming an Offer Price of HK$3.625 (being the mid-point of the indicative Offer Price range set forth on the cover page of this Prospectus) and using the exchange rate of HK$7.80 to U.S.$1.00, the total number of H Shares subscribed by the Corporate Investors would be approximately 537,930,000 H Shares, which represent approximately 4.8% of the Shares issued and outstanding upon completion of the Global Offering or 16.6% of the Offer Shares outstanding upon completion of the Global Offering (assuming the Over-allotment Option is not exercised). Each of the Corporate Investors is an independent third-party not connected with our Company. The Offer Shares to be subscribed for by the Corporate Investors will not be affected by any reallocation of the Offer Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering as described in "Structure of the Global Offering — The Hong Kong Public Offering".

Our Corporate Investors

A brief description of our Corporate Investors is as follows:

Cheung Kong (Holdings) Limited

Ideal Offer Limited has agreed to subscribe for such number of H Shares (rounded down to the nearest whole board lot of 1,000 H Shares) as may be purchased with U.S.$50 million at the Offer Price. Assuming an IPO Price of HK$3.625 (being the mid-point of the indicative Offer Price range set forth on the cover page of this Prospectus) and using the exchange rate of HK$7.80 to U.S.$1.00, the total number of H Shares that Ideal Offer Limited will subscribe for would be approximately 107,586,000 H Shares, which represent approximately 1.0% of the Shares outstanding upon completion of the Global Offering or 3.3% of the Offer Shares outstanding upon completion of the Global Offering (assuming the Over-allotment Option is not exercised).

Ideal Offer Limited is an indirect wholly-owned subsidiary of Cheung Kong (Holdings) Limited. Cheung Kong (Holdings) Limited is a company listed on the Main Board of the Hong Kong Stock Exchange,

and its principal activities are investment holding, property development and investment, hotel and serviced suite operation, property and project management and investments in securities.

China Life Insurance (Group) Company

China Life Insurance (Group) Company has agreed to subscribe for such number of H Shares (rounded down to the nearest whole board lot of 1,000 H Shares), which may be purchased with U.S.$50 million at the Offer Price. Assuming an Offer Price of HK$3.625 (being the mid-point of the indicative Offer Price range set forth on the cover page of this Prospectus) and using the exchange rate of HK$7.80 to U.S.$1.00, the total number of H Shares that China Life Insurance (Group) Company will subscribe for would be approximately 107,586,000 H Shares, which represent approximately 1.0% of the Shares outstanding upon completion of the Global Offering or 3.3% of the Offer Shares outstanding upon completion of the Global Offering (assuming the Over-allotment Option is not exercised).

China Life Insurance (Group) Company, headquartered in Beijing, is a large state-owned financial and insurance enterprise. The subsidiaries of China Life Insurance (Group) Company include China Life Insurance Company Limited (a company listed on the Hong Kong Stock Exchange and the New York Stock Exchange), China Life Insurance Asset Management Company Limited and China Life Insurance (Overseas) Company Limited. China Life Insurance (Group) Company and its subsidiaries constitute one of the largest commercial insurance groups in Mainland China. China Life Insurance (Group) Company has been a Global Fortune 500 company since 2003. Apart from strengthening and developing life insurance and related asset management business through its subsidiaries, China Life Insurance (Group) Company focuses on capital management and new business development.

Chow Tai Fook Nominee Limited

Chow Tai Fook Nominee Limited has agreed to subscribe for such number of H Shares (rounded down to the nearest whole board lot of 1,000 H Shares) which may be purchased with U.S.$50 million at the Offer Price. Assuming an Offer Price of HK$3.625 (being the mid-point of the indicative Offer Price range set forth on the cover page of this Prospectus) and using the exchange rate of HK$7.80 to U.S.$1.00, the total number of H Shares that Chow Tai Fook Nominee Limited will subscribe for would be approximately 107,586,000 H Shares, which represent approximately 1.0% of the Shares outstanding upon completion of the Global Offering or 3.3% of the Offer Shares outstanding upon completion of the Global Offering (assuming the Over-allotment Option is not exercised).

Chow Tai Fook Nominee Limited is a company incorporated in Hong Kong and is principally engaged in the investment holding business. It is wholly and beneficially owned by Dato Dr. Cheng Yu Tung.

CITIC Pacific Limited and Mr. Larry Yung Chi Kin

Cranwin Investments Ltd and Silver Lead Enterprises Corp. have each agreed to subscribe for such number of H Shares (rounded down to the nearest whole board lot of 1,000 shares) which may be purchased with U.S.$25 million at the Offer Price. Assuming an offer price of HK$3.625 (being the mid-point of the indicative Offer Price range set forth on the cover page of this Prospectus) and using the exchange rate of HK$7.80 to U.S.$1.00, the total number of H Shares that Cranwin Investments Ltd and Silver Lead Enterprises Corp. will each subscribe for would be approximately 53,793,000 H Shares, which represent approximately 0.5% of the Shares outstanding upon completion of the Global Offering or 1.7% of the

Offer Shares outstanding upon completion of the Global Offering (assuming the Over-allotment Option is not exercised).

Cranwin Investments Ltd and Silver Lead Enterprises Corp. are companies incorporated in the British Virgin Islands. Cranwin Investments Ltd is a wholly-owned subsidiary of CITIC Pacific Limited and Silver Lead Enterprises Corp. is wholly-owned by Mr. Larry Yung Chi Kin, who has entered into the corporate placing agreement as the controlling shareholder of Silver Lead Enterprises Corp.

CITIC Pacific Limited is listed on the Hong Kong Stock Exchange. The main businesses of CITIC Pacific Limited include steel manufacturing, property development and investment, power generation, aviation, tunnels, communications and distribution of motor vehicles and consumer products. Mr. Larry Yung Chi Kin is the chairman of CITIC Pacific Limited.

Shau Kee Financial Enterprises Limited

Futec Limited has agreed to subscribe for such number of H shares (rounded down to the nearest whole board lot of 1,000 shares) which may be purchased with U.S.$50 million at the Offer Price. Assuming an Offer Price of HK$3.625 (being the mid-point of the indicative price range set forth on the cover page of this Prospectus) and using the exchange rate of HK$7.80 to U.S.$1.00, the total number of H shares that Futec Limited will subscribe for would be approximately 107,586,000 H Shares, which represent approximately 1.0% of the Shares outstanding upon completion of the Global Offering or 3.3% of the Offer Shares outstanding upon completion of the Global Offering (assuming the Over-allotment Option is not exercised).

Futec Limited is a private company incorporated in the British Virgin Islands and is indirectly wholly-owned by Shau Kee Financial Enterprises Limited which in turn is wholly-owned by Lee Financial (Cayman) Limited, of which Dr. Lee Shau Kee is a substantial shareholder.

Conditions Precedent

The subscription obligation of each Corporate Investor is conditional upon the Underwriting Agreements being entered into and having become effective and unconditional.

Restriction on the Corporate Investors' Investment

Each of the Corporate Investors has agreed that, without the prior written consent of the Company and the Joint Global Coordinators, it will not, whether directly or indirectly, at any time during the period of twelve months following the Listing Date, dispose of any H Shares subscribed pursuant to the corporate placing agreement (or any interest in any company or entity holding any of the H Shares), other than transfer to any of its wholly-owned subsidiaries (or for Ideal Offer Limited, the wholly-owned subsidiary of Cheung Kong (Holdings) Limited), and such transfer can only be made when the transferee agrees to be subject to the restrictions on disposal imposed on such Corporate Investor.

UNDERWRITING ARRANGEMENTS AND EXPENSES

Hong Kong Public Offering

Hong Kong Underwriting Agreement

Pursuant to the Hong Kong Public Offering, our Company is offering the Hong Kong Public Offer Shares for subscription on, and subject to, the terms and conditions of this Prospectus and the Application Forms. Subject to the Listing Committee of the Hong Kong Stock Exchange granting listing of, and permission to deal in, the H Shares to be offered pursuant to the Global Offering as mentioned herein and to certain other conditions set out in the Hong Kong Underwriting Agreement, the Hong Kong Underwriters have agreed severally and not jointly to subscribe or procure subscribers for the Hong Kong Public Offer Shares which are being offered but are not taken up under the Hong Kong Public Offering on the terms and conditions of this Prospectus, the Application Forms and the Hong Kong Underwriting Agreement.

The Hong Kong Underwriting Agreement is conditional upon and subject to the International Underwriting Agreement having been signed and becoming unconditional.

Grounds for termination

The obligations of the Hong Kong Underwriters to subscribe or procure subscribers for the Hong Kong Public Offer Shares under the Hong Kong Underwriting Agreement are subject to termination, if, at any time prior to 8:00 a.m. on the day that trading in the H Shares commences on the Hong Kong Stock Exchange:

(a) there develops, occurs, exists or comes into force:

(i) any new law or regulation or any change in existing law or regulation, or any change in the interpretation or application thereof by any court or other competent authority of Hong Kong, the PRC, the United States, the United Kingdom and Japan (each a "Relevant Jurisdiction"); or

(ii) any change or development involving a prospective change or development in local, national, regional or international equity securities, financial, political, military, industrial, economic, currency market, fiscal or regulatory or market conditions (including, without limitation, conditions in stock and bond markets and money and foreign exchange markets and inter-bank markets) in or affecting any Relevant Jurisdiction; or

(iii) any event or series of events in the nature of force majeure (including, without limitation, acts of government, strikes, lock-outs, mining accidents involving fire and/or explosion, flooding, civil commotion, acts of war, acts of terrorism (whether or not responsibility has been claimed) or acts of God) in or affecting any Relevant Jurisdiction; or

(iv) any outbreak or escalation of hostilities (whether or not war is or has been declared) or other state of emergency or calamity or wide-spread epidemic or political or social crisis in or affecting any Relevant Jurisdiction; or

(v) (A) any suspension or limitation on trading in shares or securities generally on the Hong Kong Stock Exchange, the New York Stock Exchange, the London Stock Exchange or the Tokyo Stock Exchange or (B) a general moratorium on commercial banking activities in Hong Kong, New York, London, Japan or the PRC declared by the relevant authorities, or a material disruption in commercial banking activities or foreign exchange trading or securities settlement or clearance services in or affecting any Relevant Jurisdiction; or

(vi) any change or prospective change in taxation or exchange controls, currency exchange rates or foreign investment regulations in any Relevant Jurisdiction adversely affecting an investment in the H Shares; or

(vii) any material litigation or claim being threatened or instigated against the Company or any of its subsidiaries,

and which, in any such case and in the sole opinion of the Joint Global Coordinators (for themselves and on behalf of the other Hong Kong Underwriters),

(A) is or will be or is likely to be materially adverse to the business or financial or trading position or prospects of the Company or its subsidiaries; or

(B) has or will have or is likely to have a material adverse effect on the success of the Global Offering or the level of Offer Shares being applied for or accepted or the distribution of Offer Shares and/or make it impracticable or inadvisable for any

material part of the Hong Kong Underwriting Agreement, the Hong Kong Public Offering or the Global Offering to be performed or implemented as envisaged; or

(C) makes or will or is likely to make it impracticable or inadvisable to proceed with the Hong Kong Public Offering and/or the Global Offering or the delivery of the Offer Shares on the terms and in the manner contemplated by the Prospectus; or

(b) there has come to the notice of the Joint Global Coordinators or any of the Hong Kong Underwriters:

(i) that any statement contained in the Prospectus, the Application Forms, the Formal Notice and any announcements in the agreed form issued by the Company in connection with the Hong Kong Public Offering (including any supplement or amendment thereto) has become or been discovered to be untrue, incorrect or misleading in any material respect; or

(ii) any matter has arisen or has been discovered which would or is likely to, had it arisen immediately before the date of the Prospectus, not having been disclosed in the Prospectus, constitute an material omission therefrom; or

(iii) any of the warranties given by our Company in the Hong Kong Underwriting Agreement is (or might when repeated be) untrue or misleading in any material respect; or

(iv) any event, act or omission which gives or may give rise to any material liability of the Company pursuant to the indemnities given by our Company under the Hong Kong Underwriting Agreement; or

(v) any material breach of any of the obligations of our Company under the Hong Kong Underwriting Agreement; or

(vi) any material adverse change or prospective material adverse change in the business, properties, results of operations, in the financial or trading position or prospects of the Company or its subsidiaries,

then the Joint Global Coordinators (for themselves and on behalf of the Hong Kong Underwriters) may, in their sole discretion (and, in the case of paragraph (a) above, after consultation with the Company where practicable) and upon giving notice to the Company and the Hong Kong Underwriters, terminate the Hong Kong Underwriting Agreement with immediate effect.

Undertakings to the Hong Kong Stock Exchange and the Joint Global Coordinators

By us

We have undertaken to the Hong Kong Stock Exchange that no further Shares or securities convertible into our equity securities (whether or not a class already listed) may be issued by us or form the subject of any agreement to such an issue by us within six months from the date on which our H Shares first commence dealing on the Hong Kong Stock Exchange (whether or not such issue of shares or our securities will be completed within six months from the commencement of dealing), except in certain circumstances prescribed by Rule 10.08 of the Hong Kong Listing Rules.

By ChinaCoal Group

ChinaCoal Group has undertaken to the Hong Kong Stock Exchange and the Joint Global Coordinators that it shall not and shall procure that the relevant registered holder shall not:

(a) in the period commencing on the date by reference to which disclosure of the shareholding of ChinaCoal Group is made in this Prospectus and ending on the date which is six months from the date on which dealings in the H Shares commence on the Hong Kong Stock Exchange (the "First Six-month Period"), dispose of, nor enter into any agreement to dispose of or otherwise create any options, rights, interests or encumbrances in respect of, any of those shares or securities of our Company in respect of which it is shown by this Prospectus to be the beneficial owner; or

(b) in the period of six months commencing on the date on which the First Six-month Period expires, dispose of, nor enter into any agreement to dispose of or otherwise create any options, rights, interests or encumbrances in respect of, any of the shares or securities referred to in (a) above if, immediately following such disposal or upon the exercise or enforcement of such options, rights, interests or encumbrances, it would cease to be our Controlling Shareholder.

ChinaCoal Group has also undertaken to the Hong Kong Stock Exchange, the Joint Global Coordinators and us that, within the period commencing on the date by reference to which disclosure of shareholding of ChinaCoal Group is made in this Prospectus and ending on the date which is 12 months from the date on which dealings in the H Shares commence on the Hong Kong Stock Exchange, it will:

(a) when it pledges or charges any Shares or our other share capital beneficially owned by it in favour of an authorized institution (as defined in the Banking Ordinance (Chapter 155 of the Laws of Hong Kong)) for a bona fide commercial loan, immediately inform us of such pledge or charge together with the number of such shares or other securities so pledged or charged; and

(b) when it receives any indications, either verbal or written, from any pledgee or chargee of any Shares or our other securities pledged or charged that such shares or securities will be disposed of, immediately inform us of any such indications.

We will inform the Hong Kong Stock Exchange as soon as we have been informed of the above matters (if any) by ChinaCoal Group and disclose such matters by way of an announcement which is published in the newspapers as soon as possible after being so informed by ChinaCoal Group.

Undertakings pursuant to the Hong Kong Underwriting Agreement

By us

We have, pursuant to the Hong Kong Underwriting Agreement, undertaken to each of the Joint Global Coordinators, the Joint Sponsors and the Hong Kong Underwriters, that except pursuant to the Global Offering or the Over-allotment Option, at any time during the First Six-month Period, we will not without the Joint Global Coordinators' prior written consent and unless in compliance with the Hong Kong Listing Rules:

(a) offer, pledge, charge, allot, issue, sell, contract to allot, issue or sell, sell any option or contract to purchase, purchase any option or contract to sell, grant or agree to grant any option, right or warrant to purchase or subscribe for, lend or otherwise transfer or dispose of, either directly or indirectly, or repurchase, any of our share capital or any securities convertible into or exercisable or exchangeable for or that represent the right to receive such share capital; or

(b) enter into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences of ownership of our share capital,

whether any of such transactions described in (a) or (b) above is to be settled by delivery of our share capital or such other securities, in cash or otherwise, or publicly disclose that we will or may enter into any transaction described above. In the event of a disposal as described in (a) or (b) above of any Shares or any interest therein or any of our securities in the six-month period commencing on the expiry of the First Six-month Period, we will take all reasonable steps to ensure that such a disposal will not create a disorderly or false market for our Shares.

Indemnity

We have agreed to indemnify the Hong Kong Underwriters for certain losses which they may suffer, including losses arising from their performance of their obligations under the Hong Kong Underwriting Agreement and any breach by us of the Hong Kong Underwriting Agreement.

Commission and expenses

The Hong Kong Underwriters will receive an underwriting commission of 2.5% of the aggregate Offer Price payable for the Hong Kong Public Offer Shares initially offered under the Hong Kong Public Offering, out of which they will pay any sub-underwriting commissions. For unsubscribed Hong Kong Public Offer Shares reallocated to the International Offering, we will pay an underwriting commission at the rate applicable to the International Offering and such commission will be paid to the Joint Global Coordinators and the relevant underwriters (but not the Hong Kong Underwriters).

The aggregate commissions and fees, together with listing fees, SFC transaction levy, the Hong Kong Stock Exchange trading fee, legal and other professional fees, and printing and other expenses relating to the Global Offering are estimated to amount to approximately HK$501.9 million (assuming the mid-point of our indicative offer price range, and assuming the Over-allotment Option is not exercised) in total and are payable by us.

Hong Kong Underwriters' interest in our company

Save for its obligations under the Hong Kong Underwriting Agreement, none of the Hong Kong Underwriters has any shareholding interests in our Company or any right (whether legally enforceable or not) to subscribe for or to nominate persons to subscribe for securities in our Company.

International Offering

In connection with the International Offering, it is expected that we will enter into the International Underwriting Agreement with the International Underwriters. Under the International Underwriting Agreement, the International Underwriters would, subject to certain conditions set out therein, severally and not jointly agree to purchase the International Offer Shares being offered pursuant to the International Offering or procure purchasers for such International Offer Shares.

We will grant to the International Underwriters the Over-allotment Option, exercisable by the Joint Global Coordinators on behalf of the International Underwriters until 30 days after the last day for the lodging of applications under the Hong Kong Public Offering, to require us to allot and issue up to an aggregate of 486,956,000 additional H Shares, representing in aggregate not more than 15% of the initial Offer Shares, at the Offer Price per Share, if any.

We have agreed to indemnify the International Underwriters against certain liabilities, including liabilities under the U.S. Securities Act.

RESTRICTIONS ON THE H SHARES

The Hong Kong Public Offer Shares are offered solely on the basis of the information contained and representations made in this Prospectus and the Application Forms, and on the terms and subject to the conditions set out herein and therein. No action has been taken to permit a public offering of the H Shares or the distribution of this Prospectus in any jurisdiction other than Hong Kong. This Prospectus may not be used for the purpose of, and does not constitute, an offer or invitation in any jurisdiction or in any circumstances in which such an offer or invitation is not authorized or to any person to whom it is unlawful to make such an offer or invitation.

In particular, the H Shares have not been offered or sold, and will not be offered or sold, directly or indirectly, in the PRC.

STABILIZATION AND OVER-ALLOTMENT

Stabilization is a practice used by underwriters in some markets to facilitate the distribution of securities. To stabilize, the underwriters may bid for, or purchase, the securities in the secondary market, during a specified period of time, to retard, and if possible, prevent any decline in the market price of the securities below the offer price. In Hong Kong and certain other jurisdictions, the price at which stabilization is effected is not permitted to exceed the offer price.

In connection with the Global Offering, Citigroup Global Markets Asia Limited as stabilizing manager (the "Stabilizing Manager"), or any person acting for it, on behalf of the underwriters, may over-allocate or effect short sales or any other stabilizing transactions with a view to stabilizing or maintaining the market price of our H Shares at a level higher than that which might otherwise prevail in the open market. Short sales involve the sale by the Stabilizing Manager of a greater number of H Shares than the underwriters are required to purchase in the Global Offering. "Covered" short sales are sales made in an amount not greater than the Over-allotment Option.

The Stabilizing Manager may close out any covered short position by either exercising the Over-allotment Option to purchase additional H Shares or purchasing H Shares in the open market. In determining the source of the H Shares to close out the covered short position, the Stabilizing Manager will consider, among other things, the price of H Shares in the open market as compared to the price at which they may purchase additional H Shares pursuant to the Over-allotment Option. Stabilizing transactions consist of certain bids or purchases made for the purpose of preventing or retarding a decline in the market price of the H Shares while the Global Offering is in progress. Any market purchases of our H Shares may be effected on any stock exchange, including the Hong Kong Stock Exchange, any over-the-counter market or otherwise, provided that they are made in compliance with all applicable laws and regulatory requirements. However, there is no obligation on the Stabilizing Manager or any person acting for it to conduct any such stabilizing activity, which if commenced, will be done at the absolute discretion of the Stabilizing Manager and may be discontinued at any time. Any such stabilizing activity shall end on the thirtieth day after the last day for the lodging of applications under the Hong Kong Public Offering. The number of our H Shares that may be over-allocated will not exceed the number of our H Shares that may be sold under the Over-allotment Option, namely 486,956,000 H Shares, which is 15% of the H Shares initially available under the Global Offering.

In Hong Kong, stabilizing activities must be carried out in accordance with the Securities and Futures (Price Stabilizing) Rules (Chapter 571W of the Laws of Hong Kong). Stabilizing action permitted pursuant to the Securities and Futures (Price Stabilizing) Rules includes (i) over-allocation for the purpose of preventing or minimizing any reduction in the market price, (ii) selling or agreeing to sell our H Shares so as to establish a short position in them for the purpose of preventing or minimizing any reduction in the market price, (iii) subscribing, or agreeing to subscribe, for our H Shares pursuant to the Over-allotment Option in order to close out any position established under (i) or (ii) above, (iv) purchasing, or agreeing to purchase, our H Shares for the sole purpose of preventing or minimizing any reduction in the market price, (v) selling our H Shares to liquidate a long position held as a result of those purchases and (vi) offering or attempting to do anything described in (ii), (iii), (iv) or (v).

Stabilizing actions by the Stabilizing Manager, or any person acting for it, will be entered into in accordance with the laws, rules and regulations in place in Hong Kong on stabilization.

As a result of effecting transactions to stabilize or maintain the market price of our H Shares, the Stabilizing Manager, or any person acting for it, may maintain a long position in our H Shares. The size of the long position, and the period for which the Stabilizing Manager, or any person acting for it, will maintain the long position is at the discretion of the Stabilizing Manager and is uncertain. In the event that the Stabilizing Manager liquidates this long position by making sales in the open market, this may lead to a decline in the market price of our H Shares.

Stabilizing action by the Stabilizing Manager, or any person acting for it, is not permitted to support the price of our H Shares for longer than the stabilizing period, which begins on the day on which trading of our H Shares commences on the Hong Kong Stock Exchange and ends on the thirtieth day after the last day for the lodging of applications under the Hong Kong Public Offering. The stabilizing period is expected to end on 10 January 2007. As a result, demand for our H Shares, and their market price, may fall after the end of the stabilizing period. These activities by the Stabilizing Manager may stabilize, maintain or otherwise affect the market price of the H Shares. As a result, the price of the H Shares may be higher than the price that otherwise might exist in the open market. Any stabilizing action taken by the Stabilizing Manager, or any person acting for it, may not necessarily result in the market price of our H Shares staying at or above the Offer Price either during or after the stabilizing period. Bids for or market purchases of our H Shares by the Stabilizing Manager, or any person acting for it, may be made at a price at or below the Offer Price and therefore at or below the price paid for our H Shares by purchasers.

A public announcement in compliance with the Securities and Futures (Price Stabilizing) Rules will be made within seven days of the expiration of the stabilizing period.

ACTIVITIES BY SYNDICATE MEMBERS

We describe below a variety of activities that underwriters of the Hong Kong Public Offering and the International Offering, together referred to as "Syndicate Members", may each individually undertake, and which do not form part of the underwriting or the stabilizing process. When engaging in any of these activities, it should be noted that the Syndicate Members are subject to restrictions, including the following:

(a) under the agreement among the Syndicate Members, all of them (except for Citigroup Global Markets Asia Limited and its affiliates as the stabilizing manager) must not, in connection with the distribution of the Offer Shares, effect any transactions (including issuing or entering into any option or other derivative transactions relating to the Offer Shares), whether in the open market or

otherwise, with a view to stabilizing or maintaining the market price of any of the Offer Shares at levels other than those which might otherwise prevail in the open market; and

(b) all of them must comply with all applicable laws, including the Market Misconduct provisions of the Securities and Futures Ordinance (Cap. 571), including the provisions prohibiting insider dealing, false trading, price rigging and stock market manipulation.

The Syndicate Members and their affiliates are diversified financial institutions with relationships in countries around the world. These entities engage in a wide range of commercial and investment banking, brokerage, funds management, trading, hedging, investing and other activities for their own account and for the account of others. In relation to our H Shares, those activities could include acting as agent for buyers and sellers of the H Shares, entering into transactions with those buyers and sellers in a principal capacity, proprietary trading in the H Shares, and entering into over the counter or listed derivative transactions or listed and unlisted securities transactions (including issuing securities such as derivative warrants listed on a stock exchange) which have as their underlying, assets including the H Shares. Those activities may require hedging activity by those entities involving, directly or indirectly, buying and selling the H Shares. All such activity could occur in Hong Kong and elsewhere in the world and may result in the Syndicate Members and their affiliates holding long and/or short positions in the H Shares, in baskets of securities or indices including the H Shares, in units of funds that may purchase the H Shares, or in derivatives related to any of the foregoing.

In relation to issues by Syndicate Members or their affiliates of any listed securities having the H Shares as their underlying, whether on the Hong Kong Stock Exchange or on any other stock exchange, the rules of the exchange may require the issuer of those securities (or one of its affiliates or agents) to act as a market maker or liquidity provider in the security, and this will also result in hedging activity in the H Shares in most cases.

All of this activity may occur both during and after the end of the stabilizing period described under "Underwriting — Stabilization and Over-allotment". This activity may affect the market price or value of the H Shares, the liquidity or trading volume in the H Shares, and the volatility of the H Shares share price, and the extent to which this occurs from day to day cannot be estimated.

THE GLOBAL OFFERING

This Prospectus is published in connection with the Hong Kong Public Offering as part of the Global Offering. The Global Offering comprises:

(i) the Hong Kong Public Offering of 162,320,000 H Shares (subject to adjustment as mentioned below) in Hong Kong as described below in the section headed "The Hong Kong Public Offering" below; and

(ii) the International Offering of an aggregate of 3,084,054,000 H Shares (subject to adjustment as mentioned below) outside the United States (including to professional and institutional investors within Hong Kong), in offshore transactions in reliance on Regulation S (including a public offer without listing in Japan) and in the United States to QIBs in reliance on Rule 144A or another exemption from the registration requirements under the U.S. Securities Act.

China International Capital Corporation Limited, Citigroup Global Markets Asia Limited and Morgan Stanley Dean Witter Asia Limited are the Joint Global Coordinators and Joint Bookrunners of the Global Offering.

China International Capital Corporation (Hong Kong) Limited, Citigroup Global Markets Asia Limited and Morgan Stanley Dean Witter Asia Limited are the Joint Sponsors and Joint Lead Managers of the Hong Kong Public Offering.

China International Capital Corporation Limited, Citigroup Global Markets Limited and Morgan Stanley & Co. International Limited are the Joint Lead Managers of the International Offering.

Investors may apply for H Shares under the Hong Kong Public Offering or apply for or indicate an interest for H Shares under the International Offering, but may not do both.

The requisite PRC governmental approvals, including the approval of the CSRC, in respect of the Global Offering have been obtained.

PRICING AND ALLOCATION

Pricing

The International Underwriters will be soliciting from prospective investors indications of interest in acquiring H Shares in the International Offering. Prospective professional and institutional investors will be required to specify the number of H Shares under the International Offering they would be prepared to acquire either at different prices or at a particular price. This process, known as "book-building", is expected to continue up to, and to cease on or around, the last day for lodging applications under the Hong Kong Public Offering.

Pricing for the H Shares for the purpose of the various offerings under the Global Offering will be fixed on the Price Determination Date, which is expected to be on or around 13 December 2006, and in any event on or before 17 December 2006 by agreement between the Joint Global Coordinators (on behalf of the Underwriters) and us and the number of H Shares to be allocated under various offerings will be determined shortly thereafter.

The Offer Price will not be more than HK$4.05 per H Share and is expected to be not less than HK$3.20 per H Share unless otherwise announced, as further explained below, not later than the morning of the last day for lodging applications under the Hong Kong Public Offering. **Prospective investors should be**

aware that the Offer Price to be determined on the Price Determination Date may be, but is not expected to be, lower than the indicative offer price range stated in this Prospectus.

The Joint Global Coordinators, on behalf of the Underwriters, may, where considered appropriate, based on the level of interest expressed by prospective professional and institutional investors during the book-building process, and with the consent of our Company, reduce the number of H Shares offered in the Global Offering and/or the indicative offer price range below that stated in this Prospectus at any time on or prior to the morning of the last day for lodging applications under the Hong Kong Public Offering. In such a case, our Company will, as soon as practicable following the decision to make such reduction, and in any event not later than the morning of the day which is the last day for lodging applications under the Hong Kong Public Offering, cause there to be published in the South China Morning Post (in English) and the Hong Kong Economic Times (in Chinese) notices of the reduction. Upon issue of such a notice, the number of H Shares offered in the Global Offering and/or the revised offer price range will be final and conclusive and the Offer Price, if agreed upon by the Joint Global Coordinators (on behalf of the Underwriters) and our Company, will be fixed within such revised offer price range. **Applicants should have regard to the possibility that any announcement of a reduction in the number of H Shares being offered under the Global Offering and/or the indicative offer price range may not be made until the day which is the last day for lodging applications under the Hong Kong Public Offering.** Such notice will also include confirmation or revision, as appropriate, offering statistics as currently set out in the section headed "Summary", and any other financial information which may change as a result of such reduction. **Applicants under the Hong Kong Public Offering should note that in no circumstances can applications be withdrawn once submitted, even if the number of H Shares being offered under the Global Offering and/or the offer price range is so reduced.** In the absence of any such notice so published, the Offer Price, if agreed upon with us and the Joint Global Coordinators, will under no circumstances be set outside the offer price range as stated in this Prospectus.

The final Offer Price, the indications of interest in the Global Offering, the results of applications and the basis of allotment of H Shares available under the Hong Kong Public Offering, are expected to be announced on 18 December 2006 in the South China Morning Post (in English) and the Hong Kong Economic Times (in Chinese).

Allocation

The H Shares to be offered in the Hong Kong Public Offering and the International Offering may in certain circumstances, be reallocated as between these offerings at the discretion of the Joint Global Coordinators.

Allocation of H Shares pursuant to the International Offering will be determined by the Joint Global Coordinators, effected in accordance with the "book-building" process described in the paragraphs headed "Pricing" above and based on a number of factors, including the level and timing of demand, the total size of the relevant investor's invested assets or equity assets in the relevant sector and whether or not it is expected that the relevant investor is likely to buy further H Shares, and/or hold or sell its H Shares, after the listing of the H Shares on the Hong Kong Stock Exchange. Such allocation is intended to result in a distribution of the H Shares on a basis which would lead to the establishment of a solid professional and institutional shareholder base to the benefit of our Company and our shareholders as a whole.

Allocation of H Shares to investors under the Hong Kong Public Offering will be based solely on the level of valid applications received under the Hong Kong Public Offering. The basis of allocation may vary, depending on the number of Hong Kong Public Offer Shares validly applied for by applicants. Such allocation

could, where appropriate, consist of balloting, which would mean that some applicants may receive a higher allocation than others who have applied for the same number of Hong Kong Public Offer Shares, and those applicants who are not successful in the ballot may not receive any Hong Kong Public Offer Shares.

Net Proceeds

The net proceeds from the Global Offering accruing to our Company (after deduction of underwriting fees and estimated expenses payable by our Company in relation to the Global Offering, assuming that the Over-allotment Option is not exercised), are estimated to be approximately HK$12.6 billion, assuming an Offer Price per H Share of HK$4.05, or approximately HK$9.9 billion, assuming an Offer Price per H Share of HK$3.20 (or if the Over-allotment Option is exercised in full, approximately HK$14.5 billion, assuming an Offer Price per H Share of HK$4.05, or approximately HK$11.4 billion, assuming an Offer Price per H Share of HK$3.20).

CONDITIONS OF THE HONG KONG PUBLIC OFFERING

Acceptance of all applications for H Shares pursuant to the Hong Kong Public Offering will be conditional on:

(i) the Listing Committee of the Hong Kong Stock Exchange granting listing of, and permission to deal in, the H Shares being offered pursuant to the Global Offering (including the additional H Shares which may be made available pursuant to the exercise of the Over-allotment Option) (subject only to allotment) and any H Shares, converted from Domestic Shares, which are to be held by NSSF in connection with the Global Offering; and

(ii) the execution and delivery of the International Underwriting Agreement on the Price Determination Date; and

(iii) the obligations of the Hong Kong Underwriters under the Hong Kong Underwriting Agreement and the obligations of the International Underwriters under the International Underwriting Agreement becoming and remaining unconditional and not having been terminated in accordance with the terms of the respective agreements,

in each case on or before the dates and times specified in the Hong Kong Underwriting Agreement or the International Underwriting Agreement (unless and to the extent such conditions are validly waived on or before such dates and times) and in any event not later than the date which is 30 days after the date of this Prospectus.

If, for any reason, the Offer Price is not agreed between us and the Joint Global Coordinators (on behalf of the Underwriters), the Global Offering will not proceed.

The consummation of each of the Hong Kong Public Offering and the International Offering is conditional upon, among other things, the other offering becoming unconditional and not having been terminated in accordance with their respective terms.

If the above conditions are not fulfilled or waived prior to the times and dates specified, the Global Offering will lapse and the Hong Kong Stock Exchange will be notified immediately. Notice of the lapse of the Hong Kong Public Offering will be published by our Company in the South China Morning Post and the Hong Kong Economic Times on the next day following such lapse. In such eventuality, all application monies will be returned, without interest, on the terms set out in the section headed "How to apply for Hong Kong

Public H Shares — Despatch/ collection of share certificates and refund cheques". In the meantime, all application monies will be held in separate bank account(s) with the receiving bankers or other licensed bank(s) in Hong Kong licensed under the Banking Ordinance (Chapter 155 of the Laws of Hong Kong) (as amended).

Share certificates for the H Shares will only become valid certificates of title at 8:00 a.m. on 19 December 2006, provided that (i) the Global Offering has become unconditional in all respects and (ii) the right of termination as described in the section headed "Underwriting — Underwriting arrangement and expenses — Grounds for termination" has not been exercised.

THE HONG KONG PUBLIC OFFERING

Number Of H Shares Initially Offered

Our Company is initially offering 162,320,000 H Shares for subscription by the public in Hong Kong at the Offer Price, representing approximately 5% of the total number of H Shares initially available under the Global Offering. Subject to the reallocation of H Shares between the International Offering and the Hong Kong Public Offering, the Hong Kong Public Offer Shares will represent approximately 1.4% of our enlarged issued share capital immediately after completion of the Global Offering, assuming that the Over-allotment Option is not exercised.

The Hong Kong Public Offering is open to members of the public in Hong Kong as well as to institutional and professional investors. Professional investors generally include brokers, dealers, companies (including fund managers) whose ordinary business involves dealing in shares and other securities and corporate entities which regularly invest in shares and other securities.

Completion of the Hong Kong Public Offering is subject to the conditions as set out in the section headed "Conditions of the Hong Kong Public Offering" above.

Allocation

The total number of H Shares available under the Hong Kong Public Offering (after taking account of any reallocation referred to below) is to be divided into two pools for allocation purposes: pool A and pool B. The H Shares in pool A will be allocated on an equitable basis to applicants who have applied for H Share with an aggregate price of HK$5 million (excluding the brokerage, SFC transaction levy and the Hong Kong Stock Exchange trading fee payable) or less. The H Share in pool B will be allocated on an equitable basis to applicants who have applied for H Shares with an aggregate price of more than HK$5 million (excluding the brokerage, SFC transaction levy and the Hong Kong Stock Exchange trading fee payable) up to the total value of pool B. Investors should be aware that applications in pool A and applications in pool B may receive different allocation ratios. If H Shares in one (but not both) of the pools are under-subscribed, the surplus H Shares will be transferred to the other pool to satisfy demand in this other pool and be allocated accordingly. For the purpose of this paragraph only, the "price" for H Shares means the price payable on application therefor (without regard to the Offer Price as finally determined). Applicants can only receive an allocation of H Shares from either pool A or pool B but not from both pools. Multiple or suspected multiple applications and any application for more than 81,160,000 H Shares, being the number of H Shares initially allocated to each pool, are liable to be rejected.

Reallocation

In view of the substantial size of the Global Offering, the Joint Sponsors have applied on our behalf to the Hong Kong Stock Exchange for, and the Hong Kong Stock Exchange has granted, a waiver from strict compliance with the clawback requirements set out in paragraph 4.2 of Practice Note 18 to the Hong Kong Listing Rules. Pursuant to the waiver, 162,320,000 H Shares, representing 5% of the total number of the H Shares initially available under the Global Offering, will be offered to the public in Hong Kong under the Hong Kong Public Offering, and if the number of H Shares validly applied for under the Hong Kong Public Offering represents (i) 15 times or more but less than 50 times, (ii) 50 times or more but less than 100 times, and (iii) 100 times or more, of the number of H Shares initially available under the Hong Kong Public Offering, the total number of H Shares initially available under the Hong Kong Public Offering will be increased to 243,480,000, 324,638,000 and 649,276,000 H Shares, respectively, representing approximately 7.5% (in the case of (i)), 10% (in the case of (ii)) and 20% (in the case of (iii)) of the total number of H Shares initially available under the Global Offering, assuming the Over-allotment Option is not exercised.

If the Hong Kong Public Offering is not fully subscribed, the Joint Global Coordinators have the authority to reallocate all or any unsubscribed Hong Kong Public Offer Shares to the International Offering, in such proportions as the Joint Global Coordinators deem appropriate.

Applications

Each applicant under the Hong Kong Public Offering will also be required to give an undertaking and confirmation in the Application Form submitted by him that he and any person(s) for whose benefit he is making the application have not applied for or taken up, or indicated an interest for, and will not apply for or take up, or indicate an interest for, any H Shares under the International Offering, and such applicant's application is liable to be rejected if the said undertaking and/or confirmation is breached and/or untrue (as the case may be) or it has been or will be placed or allocated H Shares under the International Offering.

The listing of the H Shares on the Hong Kong Stock Exchange is sponsored by the Joint Sponsors. Applicants under the Hong Kong Public Offering are required to pay, on application, the maximum price of HK$4.05 per H Share in addition to the brokerage, SFC transaction levy and Hong Kong Stock Exchange trading fee payable on each H Share. If the Offer Price, as finally determined in the manner described in the section headed "Pricing and allocation" above, is less than the maximum price of HK$4.05 per H Share, appropriate refund payments (including the brokerage, SFC transaction levy and Hong Kong Stock Exchange trading fee attributable to the surplus application monies) will be made to successful applicants, without interest. Further details are set out below in the section headed "How to Apply for Hong Kong Public Offer Shares" in this Prospectus.

References in this Prospectus to applications, Application Forms, application monies or the procedure for application relate solely to the Hong Kong Public Offering.

THE INTERNATIONAL OFFERING

Number Of H Shares Offered

Subject to reallocation as described above, the International Offering will consist of an aggregate of 3,084,054,000 H Shares, representing approximately 95% of the total number of H Shares initially available under the Global Offering. The International Offering is subject to the Hong Kong Public Offer becoming unconditional. Subject to the reallocation of H Shares between the International Offering and the Hong Kong

Public Offering, the International Offer Shares will represent approximately 26.0% of our enlarged issued share capital immediately after completion of the Global Offering, assuming that the Over-allotment Option is not exercised.

Pursuant to the International Offering, the International Underwriters will conditionally place the H Shares with QIBs in the United States in reliance on Rule 144A or another exemption from the registration requirements under the U.S. Securities Act, as well as with institutional and professional investors and other investors expected to have a sizeable demand for the H Shares in Hong Kong and other jurisdictions outside the United States in reliance on Regulation S (including a public offer without listing in Japan). The Joint Sponsors have applied on our behalf for, and the Hong Kong Stock Exchange has granted a waiver from strict compliance with Hong Kong listing Rule 9.16(6)(b) and Paragraph 11 of Appendix 6 of the Hong Kong Listing Rules.

Professional investors generally include brokers, dealers, companies (including fund managers) whose ordinary business involves dealing in shares and other securities and corporate entities which regularly invest in shares and other securities.

The Joint Global Coordinators (on behalf of the Underwriters) may require any investor who has been offered H Shares under the International Offering, and who has made an application under the Hong Kong Public Offering, to provide sufficient information to the Joint Global Coordinators so as to allow them to identify the relevant applications under the Hong Kong Public Offering and to ensure that it is excluded from any application of H Shares under the Hong Kong Public Offering.

Over-allotment Option

In connection with the Global Offering, our Company is expected to grant the Over-allotment Option to the International Underwriters exercisable by the Joint Global Coordinators on behalf of the International Underwriters.

Pursuant to the Over-allotment Option, the Joint Global Coordinators have the right, exercisable within 30 days from the last day for lodging of applications under the Hong Kong Public Offering, to require us to allot and issue up to 486,956,000 additional H Shares, representing approximately 15% of the initial H Shares initially available in the Global Offering, at the same price per H Share under the International Offering, to, among other things, cover over-allocations in the International Offering, if any. In the event that the Over-allotment Option is exercised, a press announcement will be made.

1. METHODS OF APPLYING FOR THE HONG KONG PUBLIC OFFER SHARES

There are two ways to make an application for the Hong Kong Public Offer Shares. You may apply for the Hong Kong Public Offer Shares by either using a **WHITE** or **YELLOW** Application Form or giving **electronic application instructions** to HKSCC to cause HKSCC Nominees to apply for the Hong Kong Public Offer Shares on your behalf. Except where you are a nominee and provide the required information in your application, you or you and your joint applicant(s) may not make more than one application (whether individually or jointly) by applying using a **WHITE** or **YELLOW** Application Form or by giving **electronic application instructions** to HKSCC.

2. APPLYING BY USING A WHITE OR YELLOW APPLICATION FORM

Which Application Form to use

Use a **WHITE** Application Form if you want the H Shares to be issued in your own name.

Use a **YELLOW** Application Form if you want the H Shares to be issued in the name of HKSCC Nominees and deposited directly into CCASS for credit to your CCASS Investor Participant stock account or your designated CCASS Participant's stock account.

Note: The H Shares are not available to existing beneficial owners of Shares in our Company, the Directors, Supervisors or chief executive of our Company or any of our subsidiaries, or associates of any of them (as "associate" is defined in the Hong Kong Listing Rules) or to legal or natural persons of the PRC or United States persons (as defined in Regulation S) or persons who do not have a Hong Kong address.

You can collect a **YELLOW** Application Form and a Prospectus from:

(1) The **Depository Counter of HKSCC** at 2nd Floor, Vicwood Plaza, 199 Des Voeux Road Central, Hong Kong;

(2) Your stockbroker, who may have such Application Forms and this Prospectus available.

How to complete the Application Form

There are detailed instructions on each Application Form. You should read these instructions carefully. If you do not follow the instructions your application may be rejected and returned by ordinary post together with the accompanying cheque or banker's cashier order(s) to you (or the first-named applicant in the case of joint applicants) at your own risk at the address stated in the Application Form.

You should note that by completing and submitting the Application Form, among other things, you (and if you are joint applicants, each of you jointly and severally) for yourself or as agent or nominee and on behalf of each person for whom you act as agent or nominee:

(i) agree with our Company, for itself and for the benefit of each shareholder of our Company and so that our Company will be deemed by its acceptance in whole or in part of the application, including applications made by HKSCC Nominees, to have agreed for itself and on behalf of each shareholder of our Company, to observe and comply with the Company Law, the Special Regulations, and the Articles of Association;

(ii) agree with our Company, each shareholder, Director, Supervisor, manager and officer of our Company, and our Company acting for itself and for each Director, Supervisor, manager and officer of our Company agrees with each shareholder to refer all differences and claims arising from the Articles of Association or any rights or obligations conferred or imposed by the Company Law or other relevant laws and administrative regulations concerning the affairs of our Company to arbitration in accordance with the Articles of Association, and any reference to arbitration shall be deemed to authorize the arbitration tribunal to conduct hearings in open session and to publish its award, which arbitration shall be final and conclusive;

(iii) agree with our Company and each shareholder of our Company that H Shares in our Company are freely transferable by the holders thereof;

(iv) authorize our Company to enter into a contract on your behalf with each of the Directors, Supervisors and officers of our Company whereby each such Director, Supervisor, and officer undertakes to observe and comply with his obligations to shareholders as stipulated in the Articles of Association;

(v) confirm that you have only relied on the information and representations in this Prospectus in making your application and will not rely on any other information and representations save as set out in any supplement to this Prospectus;

(vi) agree that our Company, the Directors, the Joint Global Coordinators, the Underwriters, any other parties involved in the Global Offering and any of their respective directors, officers, employees, partners, agents or advisers are liable only for the information and representations contained in this Prospectus, the Application Forms and any supplement to this Prospectus;

(vii) undertake and confirm that you (if the application is made for your benefit) or the person(s) for whose benefit you have made the application have not applied for or taken up, or indicated an interest in, or received or been placed or allocated (including conditionally and/or provisionally) and will not apply for or take up, or indicate an interest in, any International Offer Shares under the International Offering, nor otherwise have participated or will participate in the International Offering; and;

(viii) agree to disclose to our Company, the Joint Global Coordinators, the Underwriters, the registrar, receiving bankers and/or their respective advisers and agents personal data and any information which they require about you or the person(s) for whose benefit you have made the application.

In order for the YELLOW Application Forms to be valid:

(i) **If the application is made through a designated CCASS Participant (other than a CCASS Investor Participant):**

(a) the designated CCASS Participant or its authorized signatories must sign in the appropriate box in the Application Form; and

(b) the designated CCASS Participant must endorse the Application Form with its company chop (bearing its company name) and insert its participant I.D. in the appropriate box in the Application Form.

(ii) **If the application is made by an individual CCASS Investor Participant:**

(a) the Application Form must contain the CCASS Investor Participant's name and Hong Kong identity card number; and

(b) the CCASS Investor Participant must insert its participant I.D. and sign in the appropriate box in the Application Form.

(iii) **If the application is made by a joint individual CCASS Investor Participant:**

(a) the Application Form must contain all joint CCASS Investor Participants' names and the Hong Kong identity card number of all the joint CCASS Investor Participants; and

(b) the participant I.D. must be inserted and the authorized signatory(ies) of the CCASS Investor Participant's stock account must sign in the appropriate box in the Application Form.

(iv) **If the application is made by a corporate CCASS Investor Participant:**

(a) the Application Form must contain the CCASS Investor Participant's name and Hong Kong business registration number; and

(b) the participant I.D. and company chop (bearing its company name) endorsed by its authorized signatory(ies) must be inserted in the appropriate box in the Application Form.

Signature(s), number of signatories and form of chop, where appropriate, should match the records kept by HKSCC. Incorrect or incomplete details of the CCASS Participant or the omission or inadequacy of authorized signatory(ies) (if applicable), participant I.D. or other similar matters may render the application invalid.

If your application is made through a duly authorized attorney, our Company and the Joint Global Coordinators (or their respective agents and nominees) as its agent may accept it at their discretion, and subject to any conditions they think fit, including evidence of the authority of your attorney. Our Company and the Joint Global Coordinators, in the capacity as our agent, will have full discretion to reject or accept any application, in full or in part, without assigning any reason.

How Many Applications You May Make

You may make more than one application for the Hong Kong Public Offer Shares if and only if:

You are a **nominee,** in which case you may make an application by: (i) give **electronic application instructions** to HKSCC via CCASS (if you are a CCASS Participant) or (ii) using a white or yellow

Application Form, and lodge more than one Application Form in your own name if each application is made on behalf of different owners. In the box on the Application Form marked "For nominees" you must include:

- an account number; or
- some other identification code

for each beneficial owner (or, in the case of joint beneficial owners, for each such beneficial owner). If you do not include this information, the application will be treated as being made for your benefit.

Otherwise, multiple applications are not allowed.

It will be a term and condition of all applications that by completing and delivering an Application Form, you (and if you are joint applicants, each of you jointly and severally) for yourself or as agent or nominee and on behalf of each person for whom you act as an agent or nominee:

- (if the application is made for your own benefit) warrant that this is the only application which will be made for your benefit on a **WHITE** or **YELLOW** Application Form or by giving **electronic application instructions** to HKSCC; or
- (if you are an agent for another person) warrant that reasonable enquiries have been made of that other person that this is the only application which will be or has been made for the benefit of that other person on a **WHITE** or **YELLOW** Application Form or by giving **electronic application instructions** to HKSCC and that you are duly authorized to sign the Application Form as that other person's agent.

Except where you are a nominee and provide the information required to be provided in your application, **all** of your applications will be rejected as multiple applications if you, or you and your joint applicant(s) together:

- make more than one application (whether individually or jointly) on a **WHITE** or **YELLOW** Application Form or by giving **electronic application instructions** to HKSCC;
- both apply (whether individually or jointly) on one **WHITE** Application Form and one **YELLOW** Application Form or on one **WHITE** or **YELLOW** Application Form and give **electronic application instructions** to HKSCC;
- apply on one **WHITE** or **YELLOW** Application Form (whether individually or jointly) or by giving **electronic application instructions** to HKSCC via CCASS (if you are an CCASS Investment Participant or applying through a CCASS Broker or Custodian Participant) for more than 81,160,000 H Shares, being 50% of the Shares initially being offered for public subscription under the Hong Kong Public Offering, as more particularly described in the section entitled "Structure of the Global Offering — The Hong Kong Public Offering;" or
- have applied for or taken up, or indicated an interest for, or have been or will be placed (including conditionally and/or provisionally) H Shares under the International Offering or otherwise have participated or will participate in the International Offering.

Except as referred to above, all of your applications will also be rejected as multiple applications if more than one application is made for **your benefit** (including the part of the application made by HKSCC

Nominees acting on **electronic application instructions**). If an application is made by an unlisted company and:

- the principle business of that company is dealing in securities; and
- you exercise statutory control over that company,

then the application will be treated as being for your benefit.

Unlisted company means a company with no equity securities listed on the Hong Kong Stock Exchange.

Statutory control means you:

- control the composition of the board of directors of the company; or
- control more than half of the voting power of the company; or
- hold more than half of the issued share capital of the company (not counting any part of it which carries no right to participate beyond a specified amount in a distribution of either profits or capital).

Members of the Public — Time for Applying for Hong Kong Public Offer Shares

Completed **WHITE** or **YELLOW** Application Forms, together with payment attached, must be lodged by 12:00 noon on Monday, 11 December 2006, or, if the application lists are not open on that day, then by the time and date stated in the sub-paragraph headed "Effect of bad weather on the opening of the application lists" below.

Your completed Application Form, together with payment attached in the form of cheque or banker's cashier order crossed "Account Payee Only" payable to "Bank of China (Hong Kong) Nominees Limited — China Coal Energy Public Offer", should be deposited in the special collection boxes provided at any of the branches of the receiving banks listed under the section headed "Where to collect the Application Forms" above at the following times:

Wednesday, 6 December, 2006 — 9:00 a.m. to 4:30 p.m.
Thursday, 7 December, 2006 — 9:00 a.m. to 4:30 p.m.
Friday, 8 December, 2006 —9:00 a.m. to 4:30 p.m.
Saturday, 9 December, 2006 — 9:00 a.m. to 12:30 p.m.
Monday, 11 December, 2006 — 9:00 a.m. to 12:00 noon

The application lists will be open from 11:45 a.m. to 12:00 noon on Monday, 11 December 2006, except as provided in "Effect of bad weather on the opening of the application lists."

No proceedings will be taken on applications for the H Shares and no allotment of any such H Shares will be made until the closing of the application lists. No allotment of any of the H Shares will be made later than Saturday, 6 January, 2007.

Effect of Bad Weather on the Opening of the Application Lists

The application lists will not open if there is:

- a tropical cyclone warning signal number 8 or above, or
- a "black" rainstorm warning

in force in Hong Kong at any time between 9:00 a.m. and 12:00 noon on Monday, 11 December, 2006. Instead they will open between 11:45 a.m. and 12:00 noon on the next Business Day which does not have either of those warnings in Hong Kong in force at any time between 9:00 a.m. and 12:00 noon.

Business Day means a day that is not a Saturday, Sunday or a public holiday in Hong Kong.

If the application lists do not open on Monday, 11 December 2006, the dates mentioned in "Expected Timetable" may be affected in which case a press announcement will be made by us.

Publication of Results

Our Company expects to announce the basis of allotment, the results of applications and the Hong Kong identity card/passport/Hong Kong business registration numbers of successful applicants under the Hong Kong Public Offering on Monday, 18 December, 2006 in the South China Morning Post (in English) and the Hong Kong Economic Times (in Chinese).

Despatch/Collection of Share Certificates and Refund Cheques

If an application is rejected, not accepted or accepted in part only, or if the Offer Price as finally determined is less than the offer price of HK$4.05 per H Share (excluding brokerage, SFC transaction levy and Hong Kong Stock Exchange trading fee thereon) initially paid on application, or if the conditions of the Hong Kong Public Offering are not fulfilled in accordance with the section headed "Structure of the Global Offering — Conditions of the Hong Kong Public Offering" or if any application is revoked or any allotment pursuant thereto has become void, the application monies, or the appropriate portion thereof, together with the related brokerage, SFC transaction levy and Hong Kong Stock Exchange trading fee, will be refunded, without interest. It is intended that special efforts will be made to avoid any undue delay in refunding application monies where appropriate.

No temporary document of title will be issued in respect of the H Shares. No receipt will be issued for sums paid on application but, subject to personal collection as mentioned below, in due course there will be sent to you (or, in the case of joint applicants, to the first-named applicant) by ordinary post, at your own risk, to the address specified on the Application Form:

(a) for applications on **WHITE** Application Forms: (i) share certificate(s) for all the Hong Kong Public Offer Shares applied for, if the application is wholly successful; or (ii) share certificate(s) for the number of Hong Kong Public Offer Shares successfully applied for, if the application is partially successful (for wholly successful and partially successful applications on **YELLOW** Application Forms: share certificates for the H Shares successfully applied for will be deposited into CCASS as described below); and/or

(b) for applications on **WHITE** or **YELLOW** Application Forms, refund cheque(s) crossed "Account Payee Only" in favour of the applicant (or, in the case of joint applicants, the first-named applicant) for (i) the surplus application monies for the Hong Kong Public Offer Shares unsuccessfully applied for, if the application is partially unsuccessful; or (ii) all the application monies, if the application is wholly unsuccessful; and/or (iii) the difference between the Offer Price and the maximum offer price per H Share paid on application in the event that the Offer Price is less than the offer price per H Share initially paid on application, in each case including brokerage of 1%, SFC transaction levy of 0.004% and Hong Kong Stock Exchange trading fee of 0.005%, attributable to such refund/surplus monies but without interest.

Part of your Hong Kong Identity Card number/passport number, or, if you are joint applicants, part of the Hong Kong identity card number/passport number of the first-named applicant, provided by you may be printed on your refund cheque, if any. Such data could also be transferred to a third party for refund purpose. Your banker may require verification of your Hong Kong identity card number/passport number before encashment of your refund cheque. Inaccurate completion of your Hong Kong identity card number/passport number may lead to delay in encashment of or may invalidate your refund cheque.

Subject to personal collection as mentioned below, refund cheques for surplus application monies (if any) in respect of wholly and partially unsuccessful applications and the difference between the Offer Price and the offer price per H Share initially paid on application (if any) under **WHITE** or **YELLOW** Application Forms; and share certificates for wholly and partially successful applicants under **WHITE** Application Forms are expected to be posted on or around Monday, 18 December, 2006. The right is reserved to retain any share certificate(s) and any surplus application monies pending clearance of cheque(s).

Share certificates will only become valid certificates of title at 8:00 a.m. on Tuesday, 19 December 2006 provided that the Hong Kong Public Offering has become unconditional in all respects and the right of termination described in the section entitled "Underwriting — Grounds for termination" has not been exercised.

(a) If you apply using a WHITE Application Form:

If you apply for 1,000,000 Hong Kong Public Offer Shares or more on a **WHITE** Application Form and have indicated your intention in your Application Form to collect your refund cheque(s) (where applicable) and/or share certificate(s) (where applicable) from Computershare Hong Kong Investor Services Limited, Rooms 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong and have provided all information required by your Application Form, you may collect your refund cheque(s) (where applicable) and share certificate(s) (where applicable) from Computershare Hong Kong Investor Services Limited, at Rooms 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong from 9:00 a.m. to 1:00 p.m. on Monday, 18 December 2006 or such other date as notified by our Company in the newspapers as the date of collection/despatch of refund cheques/share certificates. If you are an individual who opts for personal collection, you must not authorize any other person to make collection on your behalf. If you are a corporate applicant who opts for personal collection, you must attend by your authorized representative bearing a letter of authorization from your corporation stamped with your corporation's chop. Both individuals and authorized representatives (if applicable) must produce, at the time of collection, evidence of identity acceptable to Computershare Hong Kong Investor Services Limited. If you do not collect your refund cheque(s) (where applicable) and/or share certificate(s) (where applicable) personally within the time specified for collection, they will be sent to the address as specified in your Application Form promptly thereafter by ordinary post and at your own risk.

If you apply for less than 1,000,000 Hong Kong Public Offer Shares or if you apply for 1,000,000 Hong Kong Public Offer Shares or more but have not indicated on your Application Form that you will collect your refund cheque(s) (where applicable) and/or share certificate(s) (where applicable) in person, your refund cheque(s) (where applicable) and/or share certificate(s) (where applicable) will be sent to the address on your Application Form on Monday, 18 December 2006, by ordinary post and at your own risk.

You will receive one share certificate for all the Hong Kong Public Offer Shares issued to you under the Hong Kong Public Offering (except pursuant to applications made on **yellow** Application Forms or by

electronic application instructions to HKSCC via CCASS where H Share certificates will be deposited into CCASS).

(b) If you apply using a YELLOW Application Form:

If you apply for 1,000,000 Hong Kong Public Offer Shares or more and you have elected on your **YELLOW** Application Form to collect your refund cheque (where applicable) in person, please follow the same instructions as those for **WHITE** Application Form applicants as described above.

If you apply for less than 1,000,000 Hong Kong Public Offer Shares or if you apply for 1,000,000 Hong Kong Public Offer Shares or more but have not indicated on your Application Form that you will collect your refund cheque(s) (where applicable) in person, your refund cheque(s) (where applicable) will be sent to the address on your Application Form on Monday, 18 December 2006, by ordinary post and at your own risk.

If you apply for Hong Kong Public Offer Shares using a **YELLOW** Application Form and your application is wholly or partially successful, your share certificate(s) will be issued in the name of HKSCC Nominees and deposited into CCASS for credit to your CCASS Investor Participant stock account or the stock account of your designated CCASS Participant as instructed by you in your Application Form at the close of business on Monday, 18 December, 2006, or under contingent situation, on any other date as shall be determined by HKSCC or HKSCC Nominees.

If you are applying through a designated CCASS Participant (other than a CCASS Investor Participant):

- for Hong Kong Public Offer Shares credited to the stock account of your designated CCASS Participant (other than a CCASS Investor Participant), you can check the number of Hong Kong Public Offer Shares allocated to you with that CCASS Participant.

If you are applying as a CCASS Investor Participant:

- our Company expects to publish the results of CCASS Investor Participants' applications together with the results of the Hong Kong Public Offering in the newspapers on Monday, 18 December 2006. You should check the announcement published by our Company and report any discrepancies to HKSCC before 5:00 p.m. on Monday, 18 December 2006 or such other date as shall be determined by HKSCC or HKSCC Nominees. Immediately after the credit of the Hong Kong Public Offer Shares to your CCASS Investor Participant stock account, you can check your new account balance via the CCASS Phone System and the CCASS Internet System (under the procedures contained in HKSCC's "An Operating Guide for Investor Participants" in effect from time to time). HKSCC will also make available to you an activity statement showing the number of Hong Kong Public Offer Shares credited to your stock account.

3. APPLYING BY GIVING ELECTRONIC APPLICATION INSTRUCTIONS TO HKSCC

General

CCASS Participants may give **electronic application instructions** to HKSCC to apply for the Hong Kong Public Offer Shares and to arrange payment of the monies due on application and payment of refunds. This will be in accordance with their participant agreements with HKSCC and the General Rules of CCASS and the CCASS Operational Procedures.

If you are a CCASS Investor Participant, you may give **electronic application instructions** through the CCASS Phone System by calling 2979 7888 or through the CCASS Internet System (https://ip.ccass.com)

(using the procedures contained in HKSCC's "An Operating Guide for Investor Participants" in effect from time to time).

HKSCC can also input **electronic application instructions** for you if you go to:

Hong Kong Securities Clearing Company Limited
Customer Service Centre
2/F Vicwood Plaza
199 Des Voeux Road Central
Hong Kong

and complete an input request form.

Prospectuses are available for collection from the above address.

If you are not a CCASS Investor Participant, you may instruct your broker or custodian who is a CCASS Broker Participant or a CCASS Custodian Participant to give **electronic application instructions** via CCASS terminals to apply for the Hong Kong Public Offer Shares on your behalf.

You are deemed to have authorized HKSCC and/or HKSCC Nominees to transfer the details of your application, whether submitted by you or through your broker or custodian, to our Company and its registrar.

Giving Electronic Application Instructions to HKSCC to Apply for Hong Kong Public Offer Shares by HKSCC Nominees On Your Behalf

Where a **WHITE** Application Form is signed by HKSCC Nominees on behalf of persons who have given **electronic application instructions** to apply for the Hong Kong Public Offer Shares:

(i) HKSCC Nominees is only acting as a nominee for those persons and shall not be liable for any breach of the terms and conditions of the **WHITE** Application Form or this Prospectus;

(ii) HKSCC Nominees does the following things on behalf of each such person:

- agrees that the Hong Kong Public Offer Shares to be allotted shall be issued in the name of HKSCC Nominees and deposited directly into CCASS for the credit of the stock account of the CCASS Participant who has inputted **electronic application instructions** on that person's behalf or that person's CCASS Investor Participant stock account;
- undertakes and agrees to accept the Hong Kong Public Offer Shares in respect of which that person has given **electronic application instructions** or any lesser number allocated to you under the application;
- undertakes and confirms that that person has not applied for or taken up or indicated an interest for and will not apply for or take up or indicate any interest in any H Shares under the International Offering nor otherwise participated or will participate in the International Offering;
- (if the **electronic application instructions** are given for that person's own benefit) declares that only one set of **electronic application instructions** has been given for that person's benefit;
- (if that person is an agent for another person) declares that that person has only given one set of **electronic application instructions** for the benefit of that other person and that that person is duly authorized to give those instructions as that other person's agent;

- understands that the above declaration will be relied upon by our Company, the Directors and the Joint Global Coordinators in deciding whether or not to make any allotment of Hong Kong Public Offer Shares in respect of the **electronic application instructions** given by that person and that that person may be prosecuted if he makes a false declaration;
- authorizes our Company to place the name of HKSCC Nominees on the register of members of our Company as the holder of the Hong Kong Public Offer Shares allotted in respect of that person's **electronic application instructions** and to send share certificate(s) and/or refund monies in accordance with the arrangements separately agreed between our Company and HKSCC;
- confirms that that person has read the terms and conditions and application procedures set out in this Prospectus and agrees to be bound by them;
- confirms that that person has only relied on the information and representations in this Prospectus in giving that person's **electronic application instructions** or instructing that person's broker or custodian to give **electronic application instructions** on that person's behalf;
- agrees that our Company and the Directors are liable only for the information and representations contained in this Prospectus, the Application Forms and any supplements to this Prospectus;
- agrees to disclose that person's personal data to our Company, the Joint Global Coordinators, the Underwriters, the registrar, receiving bankers and/or their respective advisers and agents and any information which they may require about that person;
- agrees (without prejudice to any other rights which that person may have) that once the application of HKSCC Nominees has been accepted, the application cannot be rescinded for innocent misrepresentation and you may not revoke it other than as provided in this Prospectus;
- agrees that any application made by HKSCC Nominees on behalf of that person pursuant to electronic application instructions given by that person is irrevocable before Saturday 6 January 2007, such agreement to take effect as a collateral contract with our Company and to become binding when that person gives the instructions and such collateral contract to be in consideration of our Company agreeing that it will not offer any Hong Kong Public Offer Shares to any person before Saturday 6 January, 2007, except by means of one of the procedures referred to in this Prospectus. However, HKSCC Nominees may revoke the application before Saturday 6 January, 2007 if a person responsible for this Prospectus under Section 40 of the Hong Kong Companies Ordinance (as applied by section 342E of the Companies Ordinance) gives a public notice under that section which excludes or limits the responsibility of that person for this Prospectus;
- agrees that once the application of HKSCC Nominees Limited is accepted, neither that application nor that person's **electronic application instructions** can be revoked, and that acceptance of that application will be evidenced by the announcement of the results of the Hong Kong Public Offering published by our Company;
- agrees to the arrangements, undertakings and warranties specified in the participant agreement between that person and HKSCC, read with the General Rules of CCASS and

the CCASS Operational Procedures, in respect of the giving of **electronic application instructions** relating to Hong Kong Public Offer Shares;

- agrees with our Company, for itself and for the benefit of each of our shareholders (and so that our Company will be deemed by its acceptance in whole or in part of the application by HKSCC Nominees to have agreed, for itself and on behalf of each shareholder of our Company, with each CCASS Participant giving **electronic application instructions)** to observe and comply with the Company Law, the Special Regulations and the Articles of Association;
- agrees with our Company, each shareholder, Director, Supervisor, manager and officer, and our Company, for itself and for the benefit of each of our shareholders and each Director, Supervisor, manager and other officer of our Company:
  - (a) to refer all differences and claims arising from the Articles of Association or any rights to obligations conferred or imposed by the Company Law or other relevant laws and administrative regulations concerning the affairs of our Company to arbitration in accordance with the Articles of Association; and
  - (b) that any reference to arbitration shall be deemed to authorize the arbitration tribunal to conduct hearings in open session and to publish its award, which arbitration shall be final and conclusive;
- agrees with our Company (for our Company itself and for the benefit of each of our shareholders) that H Shares in our Company are freely transferable by the holders thereof;
- authorizes our Company to enter into a contract on your behalf with each of the Directors, Supervisors and officers of our Company whereby each such Director, Supervisor and officer undertakes to observe and comply with his obligations to shareholders stipulated in the Articles of Association; and
- agrees that person's application, any acceptance of it and the resulting contract will be governed by and construed in accordance with the laws of Hong Kong.

Effect of Giving Electronic Application Instructions to HKSCC

By giving **electronic application instructions** to HKSCC or instructing your broker or custodian who is a CCASS Broker Participant or a CCASS Custodian Participant to give such instructions to HKSCC, you (and if you are joint applicants, each of you jointly and severally) are deemed to have done the following things. Neither HKSCC nor HKSCC Nominees shall be liable to our Company or any other person in respect of the things mentioned below:

- instructed and authorized HKSCC to cause HKSCC Nominees (acting as nominee for the relevant CCASS Participants) to apply for the Hong Kong Public Offer Shares on your behalf;
- instructed and authorized HKSCC to arrange payment of the maximum offer price, brokerage, SFC transaction levy and Hong Kong Stock Exchange trading fee by debiting your designated bank account and, in the case of a wholly or partially unsuccessful application and/or the Offer Price is less than the offer price per H Share initially paid on application, refund of the application monies, in each case including brokerage, SFC transaction levy and Hong Kong Stock Exchange trading fee, by crediting your designated bank account;

- instructed and authorized HKSCC to cause HKSCC Nominees to do on your behalf all the things which it is stated to do on your behalf in the **WHITE** Application Form.

Multiple Applications

If you are suspected of having made multiple applications or if more than one application is made for your benefit, the number of Hong Kong Public Offer Shares applied for by HKSCC Nominees will be automatically reduced by the number of Hong Kong Public Offer Shares in respect of which you have given such instructions and/or in respect of which such instructions have been given for your benefit. Any **electronic application instructions** to make an application for the Hong Kong Public Offer Shares given by you or for your benefit to HKSCC shall be deemed to be an actual application for the purposes of considering whether multiple applications have been made.

No application for any other number of Hong Kong Public Offer Shares will be considered and any such application is liable to be rejected.

Minimum Subscription Amount and Permitted Multiples

You may give or cause your broker or custodian who is a CCASS Broker Participant or a CCASS Custodian Participant to give **electronic application instructions** in respect of a minimum of 1,000 Hong Kong Public Offer Shares. Such instructions in respect of more than 1,000 Hong Kong Public Offer Shares must be in one of the numbers or multiples set out in the table in the Application Forms. No application for any other number of Hong Kong Public Offer Shares will be considered and any such application is liable to be rejected.

Time for Inputting Electronic Application Instructions

CCASS Broker/Custodian Participants can input **electronic application instructions** at the following times on the following dates:

Wednesday, 6 December 2006 — 9:00 a.m. to 8:30 p.m.[1]
Thursday, 7 December 2006 — 8:00 a.m. to 8:30 p.m.[1]
Friday, 8 December 2006 — 8:00 a.m. to 8:30 p.m.[1]
Saturday, 9 December 2006 — 8:00 a.m. to 1:00 p.m.[1]
Monday, 11 December 2006 — 8:00 a.m.[1] to 12:00 noon

Note:

1. These times are subject to change as HKSCC may determine from time to time with prior notification to CCASS Participants.

CCASS Investor Participants can input electronic application instructions from 9:00 a.m. on Wednesday, 6 December 2006 until 12:00 noon on Monday, 11 December 2006 (24 hours daily, except the last application date).

Effect of Bad Weather on the Opening of the Application Lists

The latest time for inputting your **electronic application instructions** will be 12:00 noon on Monday, 11 December, 2006, the last application day. If:

- a tropical cyclone warning signal number 8 or above; or
- a "black" rainstorm warning signal

is in force in Hong Kong at any time between 9:00 a.m. and 12:00 noon on Monday, 11 December, 2006, the last application day will be postponed to the next Business Day which does not have either of those warning signals in force in Hong Kong at any time between 9:00 am. and 12:00 noon on such day.

Business Day means a day that is not a Saturday, Sunday or a public holiday in Hong Kong.

Allocation of Hong Kong Public Offer Shares

For the purposes of allocating Hong Kong Public Offer Shares, HKSCC Nominees will not be treated as an applicant. Instead, each CCASS Participant who gives **electronic application instructions** or each person for whose benefit each such instructions is given will be treated as an applicant.

Deposit of H Share Certificates into CCASS and Refund of Application Monies

- No temporary document of title will be issued. No receipt will be issued for application monies received.
- If your application is wholly or partially successful, your share certificate(s) will be issued in the name of HKSCC Nominees and deposited into CCASS for the credit of the stock account of the CCASS Participant which you have instructed to give **electronic application instructions** on your behalf or your CCASS Investor Participant stock account at the close of business on Monday, 18 December, 2006, or, in the event of a contingency, on any other date as shall be determined by HKSCC or HKSCC Nominees.
- Our Company expects to publish the application results of CCASS Participants (and where the CCASS Participant is a broker or custodian, our Company will include information relating to the relevant beneficial owner), your Hong Kong identity card/passport number or other identification code (Hong Kong business registration number for corporations) and the basis of allotment of the Hong Kong Public Offering in the newspapers on Monday, 18 December, 2006. You should check the announcement published by our Company and report any discrepancies to HKSCC before 5:00 p.m. on Monday, 18 December, 2006 or such other date as shall be determined by HKSCC or HKSCC Nominees.
- If you have instructed your broker or custodian to give **electronic application instructions** on your behalf, you can also check the number of Hong Kong Public Offer Shares allotted to you and the amount of refund monies (if any) payable to you with that broker or custodian.
- If you have applied as a CCASS Investor Participant, you can also check the number of Hong Kong Public Offer Shares allotted to you and the amount of refund monies (if any) payable to you via the CCASS Phone System and the CCASS Internet System (under the procedures contained in HKSCC's "An Operating Guide for Investor Participants" in effect from time to time) on Monday, 18 December, 2006. Immediately after the credit of the Hong Kong Public Offer Shares to your CCASS Investor Participant stock account and the credit of refund monies to your designated bank account, HKSCC will also make available to you an activity statement showing the number of Hong Kong Public Offer Shares credited to your CCASS Investor Participant stock account and the amount of refund monies (if any) credited to your designated bank account.
- Refund of your application monies (if any) in respect of wholly and partially unsuccessful applications and/or difference between the Offer Price and the offer price per H Share initially paid on application, in each case including brokerage of 1%, SFC transaction levy of 0.004% and

Hong Kong Stock Exchange trading fee of 0.005%, will be credited to your designated bank account or the designated bank account of your broker or custodian on Monday, 18 December, 2006. No interest will be paid thereon.

Section 40 of the Companies Ordinance

For the avoidance of doubt, our Company and all other parties involved in the preparation of this Prospectus acknowledge that each CCASS Participant who gives or causes to give **electronic application instructions** is a person who may be entitled to compensation under Section 40 of the Hong Kong Companies Ordinance.

Personal Data

The section of the Application Form entitled "Personal Data" applies to any personal data held by our Company and the share registrar about you in the same way as it applies to personal data about applicants other than HKSCC Nominees.

Warning

The subscription of the Hong Kong Public Offer Shares by giving **electronic application instructions** to HKSCC is only a facility provided to CCASS Participants. Our Company, the Directors, the Joint Global Coordinators and the Underwriters take no responsibility for the application and provide no assurance that any CCASS Participant will be allotted any Hong Kong Public Offer Shares.

To ensure that CCASS Investor Participants can give their **electronic application instructions** to HKSCC through the CCASS Phone System or the CCASS Internet System, CCASS Investor Participants are advised not to wait until the last minute to input their **electronic application instructions** to the systems. In the event that CCASS Investor Participants have problems connecting to the CCASS Phone System or the CCASS Internet System to submit their **electronic application instructions,** they should either: (i) submit a **WHITE** or **YELLOW** Application Form; or (ii) go to HKSCC's Customer Service Center to complete an input request form for **electronic application instructions** before 12:00 noon on Monday, 11 December 2006.

4. CIRCUMSTANCES IN WHICH YOU WILL NOT BE ALLOTTED HONG KONG PUBLIC OFFER SHARES

Full details of the circumstances in which you will not be allotted the Hong Kong Public Offer Shares are set out in the notes attached to the Application Forms (whether you are making your application by an Application Form or electronically instructing HKSCC to cause HKSCC Nominees to apply on your behalf), and you should read them carefully. You should note in particular the following situations in which the Hong Kong Public Offer Shares will not be allotted to you:

- **If your application is revoked:**

  By completing and submitting an Application Form or electronic application instructions to HKSCC you agree that your application or the application made by HKSCC Nominees on your behalf may not be revoked on or before Saturday, 6 January 2007. This agreement will take effect as a collateral contract with us, and will become binding when you lodge your Application Form or submit your electronic application instructions to HKSCC and an application has been made by HKSCC Nominees on your behalf accordingly. This collateral contract will be in consideration of our Company agreeing that it will not offer any Hong Kong Public Offer Shares to any person on

or before Saturday, 6 January 2007 except by means of one of the procedures referred to in this Prospectus.

Your application or the application made by HKSCC Nominees on your behalf may only be revoked on or before Saturday, 6 January 2007 if a person responsible for this Prospectus under Section 40 of the Companies Ordinance gives a public notice under that section which excludes or limits the responsibility of that person for this Prospectus.

If any supplement to the Prospectus is issued, applicant(s) who have already submitted an application may or may not (depending on the information contained in the supplement) be notified that they can withdraw their applications. If applicant(s) have not been so notified, or if applicant(s) have been notified but have not withdrawn their applications in accordance with the procedure to be notified, all applications that have been submitted remain valid and may be accepted. Subject to the above, an application once made is irrevocable and applicants shall be deemed to have applied on the basis of the Prospectus as supplemented.

For the avoidance of doubt, our Company and all other parties involved in the preparation of this Prospectus acknowledge that each CCASS Participant who gives, or causes to give, **electronic application instructions** is a person who may be entitled to compensation under Section 40 of the Companies Ordinance.

If your application or the application made by HKSCC Nominees on your behalf has been accepted, it cannot be revoked. For this purpose, acceptance of applications which are not rejected will be constituted by notification in the announcement of the results of allocation, and where such basis of allocation is subject to certain conditions or provides for allocation by ballot, such acceptance will be subject to the satisfaction of such conditions or results of the ballot respectively.

- **Full discretion of our Company or its agents to reject or accept your application:**

  Our Company and the Joint Global Coordinators (as agents for our Company), or their respective agents and nominees, have full discretion to reject or accept any application, or to accept only part of any application.

  Our Company, the Joint Global Coordinators and the Hong Kong Underwriter(s), in their capacity as our Company's agents, and their agents and nominees do not have to give any reason for any rejection or acceptance.

- **If the allotment of Hong Kong Public Offer Shares is void:**

  The allotment of Hong Kong Public Offer Shares to you or to HKSCC Nominees (if you give **electronic application instructions** or apply by a **YELLOW** Application Form) will be void if the Listing Committee of the Hong Kong Stock Exchange does not grant permission to list the H Shares either:

  — within three weeks from the closing of the application lists; or

  — within a longer period of up to six weeks if the Listing Committee of the Hong Kong Stock Exchange notifies our Company of that longer period within three weeks of the closing date of the application lists.

- **You will not receive any allotment if:**

  — you make multiple applications or suspected multiple applications;

  — you or the person for whose benefits you apply for have applied for or taken up, or indicated an interest for, or have been or will be placed or allocated (including conditionally and/or provisionally) Hong Kong Public Offer Shares and/or H Shares in the International Offering. By filling in any of the Application Forms or applying by giving **electronic application instructions** to HKSCC, you agree not to apply for Hong Kong Public Offer Shares as well as H Shares in the International Offering. Reasonable steps will be taken to identify and reject applications in the Hong Kong Public Offering from investors who have received H Shares in the International Offering, and to identify and reject indications of interest in the International Offering from investors who have received Hong Kong Public Offer Shares in the Hong Kong Public Offering;

  — your payment is not made correctly or you pay by cheque or banker's cashier order and the cheque or banker's cashier order is dishonored upon its first presentation;

  — your Application Form is not completed in accordance with the instructions as stated in the Application Form (if you apply by an Application Form);

  — the Hong Kong Underwriting Agreement and the International Underwriting Agreement do not become unconditional; or

  — the Hong Kong Underwriting Agreement and the International Underwriting Agreement are terminated in accordance with their respective terms.

  You should also note that you may apply for H Shares under the Hong Kong Public Offering or indicate an interest for H Shares under the International Offering, but may not do both.

5. HOW MUCH ARE THE HONG KONG PUBLIC OFFER SHARES

The maximum Offer Price is HK$4.05 per H Share. You must also pay brokerage of 1%, SFC transaction levy of 0.004% and Hong Kong Stock Exchange trading fee of 0.005% in full. This means that for every board lot of 1,000 H Shares you will pay approximately HK$4,090.86. The Application Forms have tables showing the exact amount payable for multiples of H Shares up to 81,160,000 H Shares. Your application must be for a minimum of 1,000 H Shares. Applications must be in one of the numbers set out in the tables in the Application Forms. No application for any other number of H Shares will be considered and any such application is liable to be rejected.

You must pay the amount payable upon application for the H Shares by one cheque or one banker's cashier order in accordance with the terms set out in the Application Form (if you apply by an Application Form).

If your application is successful, brokerage is paid to participants of the Hong Kong Stock Exchange (as the case may be), the SFC transaction levy and Hong Kong Stock Exchange trading fee are paid to the Hong Kong Stock Exchange (in the case of the SFC transaction levy, collected on behalf of the SFC).

6. REFUND OF APPLICATION MONIES

If you do not receive any Hong Kong Public Offer Shares for any reason, our Company will refund your application monies, including brokerage of 1%, SFC transaction levy of 0.004% and Hong Kong Stock

Exchange trading fee of 0.005%. No interest will be paid thereon. All interest accrued on such monies prior to the date of despatch of refund cheques will be retained for the benefit of our Company.

If your application is accepted only in part, our Company will refund the appropriate portion of your application monies, including the related brokerage of 1%, SFC transaction levy of 0.004% and Hong Kong Stock Exchange trading fee of 0.005%, without interest.

If the Offer Price as finally determined is less than HK$4.05 per H Share (excluding brokerage, SFC transaction levy and Hong Kong Stock Exchange trading fee thereon) initially paid on application, our Company will refund the surplus application monies, together with the related brokerage of 1%, SFC transaction levy of 0.004% and Hong Kong Stock Exchange trading fee of 0.005% attributable to the surplus application monies, without interest. Details of the procedure for refund are set out above in the section headed "Despatch/collection of share certificates and refund cheques".

In a contingency situation involving a substantial over-subscription, at the discretion of our Company, the Joint Sponsors and the Joint Global Coordinators, cheques for applications for certain small denominations of Hong Kong Public Offer Shares (apart from successful applications) may not be cleared.

Refund of your application monies (if any) will be made on Monday,18 December, 2006 in accordance with the various arrangements as described above.

7. COMMENCEMENT OF DEALINGS IN THE H SHARES

Dealings in the H Shares are expected to commence on Tuesday, 19 December, 2006.

The H Shares will be traded in board lots of 1,000 H Shares each. The stock code of the H Shares is 1898.

8. H SHARES WILL BE ELIGIBLE FOR ADMISSION INTO CCASS

If the Hong Kong Stock Exchange grants the listing of, and permission to deal in, the H Shares and our Company complies with the stock admission requirements of HKSCC, the H Shares will be accepted as eligible securities by HKSCC for deposit, clearance and settlement in CCASS with effect from the date of commencement of dealings in the H Shares on the Hong Kong Stock Exchange or any other date HKSCC chooses. Settlement of transactions between participants of the Hong Kong Stock Exchange is required to take place in CCASS on the second business day after any trading day.

All activities under CCASS are subject to the General Rules of CCASS and CCASS Operational Procedures in effect from time to time.

Investors should seek the advice of their stockbroker or other professional adviser for details of the settlement arrangement as such arrangements may affect their rights and interests.

All necessary arrangements have been made enabling the H Shares to be admitted into CCASS.

The following is the text of a report received from the reporting accountants, PricewaterhouseCoopers, Certified Public Accountants, Hong Kong for the purposes of incorporation in this Prospectus.

PRICEWATERHOUSECOOPERS

羅兵咸永道會計師事務所

PricewaterhouseCoopers
22nd Floor, Prince's Building
Central, Hong Kong

6 December 2006

The Directors
China Coal Energy Company Limited.
China International Capital Corporation (Hong Kong) Limited
Citigroup Global Markets Asia Limited
Morgan Stanley Dean Witter Asia Limited

Dear Sirs,

We set out below our report on the financial information relating to China Coal Energy Company Limited (the "Company") and its subsidiaries (hereinafter collectively referred to as the "Group") for each of the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2005 and 2006 (the "Relevant Periods") for inclusion in the prospectus of the Company dated 6 December 2006 (the "Prospectus") in connection with the initial listing of the shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited.

The Company was incorporated in the People's Republic of China (the "PRC" or "China") on 22 August 2006 as a joint stock limited company under the Company Law of the PRC. Pursuant to a group restructuring of China National Coal Group Corporation ("China Coal Group" or the "Parent Company") as described in Note 1 of Section II below (the "Restructuring"), the Company became the holding company of the companies now comprising the Group.

As of the date of this report, the Company had direct and indirect interests in the subsidiaries, jointly controlled entities and associates as set out in Note 36 of Section II below. Except for Sunfield Resources Pty. Limited which has adopted 30 June as its financial year end date, for the purpose of this report, all other companies now comprising the Group and the Group's jointly controlled entities and associates have adopted 31 December as their financial year end date. The accounts of these entities were prepared in accordance with the relevant accounting principles and financial regulations applicable to PRC enterprises ("PRC GAAP") or other accounting principles applicable to those companies in their respective jurisdictions.

No audited financial statements have been prepared for the Company since the date of its incorporation as it was newly incorporated and has not been involved in any significant business transactions other than the Restructuring referred to herein. For the purpose of the Restructuring, the directors of the Company have prepared the combined financial statements of the Group for each of the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006 in accordance with PRC GAAP (the "PRC GAAP Financial Statements"). The PRC GAAP Financial Statements were audited by PricewaterhouseCoopers Zhong Tian CPAs Limited Company (普華永道中天會計師事務所有限公司).

The directors of the Company (the "Directors") have prepared the combined financial information of the Group for the Relevant Periods as set out in Sections I and II below (the "Financial Information") in accordance with International Financial Reporting Standards ("IFRS") promulgated by the International Accounting Standards Board based on the audited PRC GAAP Financial Statements of the Group for the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006 and the unaudited combined PRC GAAP financial statements for the six months ended 30 June 2005, on the basis set out in Note 2(a) of Section II below, after making such adjustments as are appropriate.

For the purpose of this report, we have carried out independent audit procedures on the Financial Information in accordance with Statements of Auditing Standards issued by the Hong Kong Institute of Certified Public Accountant (the "HKICPA"), and have examined the Financial Information and carried out such additional procedures as are necessary in accordance with the Auditing Guideline "Prospectuses and the Reporting Accountant" issued by the HKICPA.

We have reviewed the Financial Information for the six months ended 30 June 2005 in accordance with SAS 700 "Engagements to Review Interim Financial Reports" issued by the HKICPA. A review consists principally of making enquiries of the Group's management and applying analytical procedures to the financial information and based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review excludes audit procedures such as tests of controls and verification of assets, liabilities and transactions. It is substantially less in scope than an audit and therefore provides a lower level of assurance than an audit. Accordingly, we do not express an audit opinion on the Financial Information for the six months ended 30 June 2005.

The directors and management of the respective companies now comprising the Group, its jointly controlled entities and associates, during the Relevant Periods, are responsible for preparing financial statements which give a true and fair view. In preparing the financial statements, it is fundamental that appropriate accounting policies are selected and applied consistently.

The Directors are responsible for the Financial Information. It is our responsibility to form an independent opinion, based on our examination, on the Financial Information and to report our opinion.

In our opinion, the Financial Information, for the purpose of this report and prepared on the basis set out in Note 2(a) of Section II below, gives a true and fair view of the combined state of affairs of the Group as of 31 December 2003, 2004, 2005 and 30 June 2006 and the combined results and combined cash flows of the Group for the years ended 31 December 2003, 2004, and 2005 and the six months ended 30 June 2006.

Moreover, on the basis of our review which does not constitute an audit, we are not aware of any material modifications that should be made to the Financial Information for the six months ended 30 June 2005.

I. FINANCIAL INFORMATION

The following is the combined financial information of the Group for the Relevant Periods, prepared on the basis set out in Note 2(a) of Section II below and after making such adjustments as are appropriate.

II. NOTES TO THE FINANCIAL INFORMATION

1 ORGANIZATION AND PRINCIPAL ACTIVITIES

The Company was established in the PRC on 22 August 2006 as a joint stock limited company as a result of a group restructuring of China Coal Group in preparing for a listing of the Company's shares on the Main Board of The Stock Exchange of Hong Kong Limited. The Group is principally engaged in mining and processing of coal, sales of coal and coke products and manufacturing and sales of coal mining machinery. The address of the Company's registered office is 1 Huang Si Da Jie, Chaoyang District, Beijing, the PRC.

China Coal Group is a state-owned enterprise established in the PRC in December 1981. Prior to the establishment of the Company, the Group's principal activities were carried out by companies wholly owned or controlled by China Coal Group (the "Predecessor Operations").

Pursuant to the Restructuring, the Company issued 8 billion ordinary shares of RMB1.00 per share to China Coal Group in exchange for the equity interests of all subsidiaries now comprising the Group as well as certain assets, liabilities and operations (collectively referred to as the "Transferred Businesses") previously owned by China Coal Group. The Transferred Businesses comprised mainly operations in relation to:

(i) Coal and coke production, including the operating mines and planned mines as well as China Coal Group's equity interest in certain mining companies and coking companies;

(ii) Trading of coal and coke to customers in the PRC and overseas;

(iii) Manufacturing and sales of coal mining machinery ; and

(iv) Others (including, among others, power plants, a primary aluminium factory and coal mine design institutes).

In connection with the Restructuring, certain assets, liabilities and interests historically associated with the Predecessor Operations were not transferred to the Company and were retained by China Coal Group. These assets, liabilities and interests are principally related to, among others, (i) coal trading and agency services businesses of certain overseas trading companies; (ii) non-coal related businesses; (iii) ownership of certain assets and liabilities including schools, hospitals, office buildings, staff quarters, bank balances, investments in securities and tax liabilities, and (iv) provisions of other social welfare and the operations that provided ancillary support services.

2 BASIS OF PRESENTATION

(a) Prior to and following the Restructuring, the Transferred Businesses are directly or indirectly controlled by China Coal Group. Accordingly, the Restructuring has been accounted for as a reorganization of businesses under common control in a manner similar to a uniting of interests.

The Financial Information presents the combined results and financial position of the Group as if the current structure of the Group had been in existence throughout the Relevant Periods and as if the Transferred Businesses were transferred to the Company by China Coal Group at the beginning of the earliest period presented or when such businesses were incorporated or acquired by China Coal Group, whichever is the shorter period.

In addition to the Transferred Businesses, the Financial Information also includes the assets, liabilities and results of operation of China Coal Group that are relevant to the operations of the Transferred Businesses (the "Retained Businesses"). Although these Retained Businesses were not transferred to the Company, the results of these Retained Businesses are combined with the Transferred Businesses up to the date of

Restructuring. This is because the Retained Businesses and the Transferred Businesses are under common control and management by China Coal Group and their businesses together with the assets and liabilities are closely related to those of the Group.

The following are the combined financial position and results of operations of those Retained Businesses that are included in the Financial Information:

(i) Assets and liabilities

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Property, plant and equipment	441,778	479,527	445,952	437,093
Land use rights	5,274	5,131	6,117	4,918
Intangible assets	500	100	95	1,253
Investments in associates	46,451	60,035	75,775	232,179
Available-for-sale financial assets	3,000	—	—	—
Deferred tax assets	—	—	—	1,269
Inventories	120,422	128,718	139,373	107,119
Trade and other receivables	652,662	815,910	1,186,733	1,395,619
Cash and cash equivalents	68,593	112,881	107,327	59,052
Trade and other payables	(772,255)	(1,041,465)	(1,012,405)	(1,115,032)
Borrowings	(140,700)	(99,050)	(32,000)	(100,000)
	425,725	461,787	916,967	1,023,470

(ii) Results of operations

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Revenue	5,329,743	6,980,088	7,629,281	3,956,122	3,115,301
Others gains/(losses)	4,269	4,960	9,303	3,493	(1,488)
Profit from operations	51,816	421,153	94,405	123,080	74,293
Finance costs	—	(799)	(2,302)	(716)	(4,883)
Income tax expense	(14,858)	(83,028)	(25,898)	(26,402)	(10,284)
Profit for the year/period	36,958	337,326	66,205	95,962	59,126

As a result of the segregation and separate management of the Retained Businesses by China Coal Group effective on 22 August 2006, the above assets and liabilities retained by China Coal Group will be reflected as a distribution to the Parent Company in the consolidated statement of changes in shareholders' equity for the year ending 31 December 2006.

Management believes that all historical costs of operations have been reflected in the Financial Information. Expenses that were specifically attributable to the Predecessor Operations, including the costs of ancillary, social and supporting services provided to the Predecessor Operations by China Coal Group, are reflected in the Financial Information. Income taxes have been determined as if the Predecessor Operations were a separate taxable entity for all the periods presented.

The Financial Information set out in this report has been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). IFRS 1, First-time Adoption of IFRS, has been applied in preparing the Financial Information. The Financial Information is the first set of the Group's financial statements prepared in accordance with IFRS. No financial statements for the Group had previously been prepared by the Group's management.

The policies set out below have been consistently applied to all the periods presented except that a subsidiary, Shanghai Datun Energy Resources Co., Ltd., has taken the exemption available under IFRS 1 to use the revaluation under PRC GAAP of property, plant and equipment before the date of transition to IFRS as deemed cost at the date of the revaluation.

The Group has early adopted IFRS 6, Exploration for and Evaluation of Mineral Resources, which is relevant to its operations. The early adoption of IFRS 6 did not result in substantial changes to the Group's accounting policies.

The Financial Information has been prepared under the historical convention, as modified by the revaluation of certain investments at fair value as disclosed in the accounting policies below.

The preparation of the Financial Information in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the Financial Information, are disclosed in Note 5 of this section.

(b) As of 30 June 2006, the Group has net current liabilities of RMB158,424,000. On the other hand, at 30 June 2006, the Group has unutilised banking facilities of approximately RMB23,774,000,000. Based on the Group's history of obtaining finance, its available banking facilities, its operating performance, its working capital forecast and financial obligations in the next twelve months, the Directors consider that there are sufficient financial resources available to the Group to meet its liabilities as and when they fall due and to carry on its businesses in the foreseeable future. Accordingly, the Directors have prepared the Financial Information on a going concern basis.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of the Financial Information are set out below. These policies have been consistently applied throughout the Relevant Periods, unless otherwise stated.

The following new standards, amendments to standards and interpretations are mandatory for the financial year ending 31 December 2006. The adoption of these new standards, amendments and interpretations did not result in substantial changes to the Group's accounting policies.

- Amendment to IAS 1, "Presentation of Financial Statement", effective for annual periods beginning on or after 1 January 2006;
- Amendment to IAS 19, "Actuarial gains and losses, group plans and disclosures", effective for annual periods beginning on or after 1 January 2006;
- Amendment to IAS 39, Amendment to "the fair value option", effective for annual periods beginning on or after 1 January 2006;
- Amendment to IAS 21, Amendment "Net investment in a foreign operation", effective for annual periods beginning on or after 1 January 2006;

- Amendment to IAS 39, Amendment "Cash flow hedge accounting of forecast intragroup transactions", effective for annual periods beginning on or after 1 January 2006;
- Amendment to IAS 39 and IFRS 4, Amendment "Financial guarantee contracts", effective for annual periods beginning on or after 1 January 2006;
- IFRIC 4, "Determining whether an arrangement contains a lease", effective for annual periods beginning on or after 1 January 2006;
- IFRIC 5, "Rights to interests arising from decommissioning, restoration and environmental rehabilitation funds", effective for annual periods beginning on or after 1 January 2006;
- IFRIC 6, "Liabilities arising from participating in a specific market-waste electrical and electronic equipment", effective for annual periods beginning on or after 1 December 2005. This interpretation is not relevant for the Group.

(a) Group accounting

(i) Subsidiaries

Subsidiaries are all entities over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

Inter-company transactions, balances and unrealised gains on transactions among group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

(ii) Associates

Associates are entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of voting rights. Investments in associates are accounted for by the equity method of accounting and are initially recognised at cost. The Group's investment in associates includes goodwill (net of any accumulated impairment loss) identified on acquisition.

The Group's share of its associates' post-acquisition profits or losses is recognised in the income statement, and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

(iii) Jointly controlled entities

A jointly controlled entity is a joint venture in respect of which a contractual arrangement is established among the participating venturers and whereby the Group together with the other venturers undertake an economic activity which is subject to joint control and none of the venturers has unilateral control over the economic activity. The Group's interest in jointly controlled entities is accounted for by proportionate consolidation. Under this method, the Group includes its share of the jointly controlled entities' individual income and expenses, assets and liabilities and cash flows in the relevant components of the Financial Information on a line-by-line basis.

The Group recognises the portion of gains or losses on the sale of assets to jointly controlled entities that it is attributable to the other venturers. The Group does not recognise its share of profits or losses from jointly controlled entities that result from the purchase of assets by the Group from jointly controlled entities until the Group resells the assets to an independent party. However, if a loss on the transaction provides evidence of a reduction in the net realisable value of current assets, or an impairment loss, the loss is recognised immediately.

(b) Segment reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns different from those of other business segments. A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and returns different from those of segments operating in other economic environments.

(c) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "Functional Currency"). The combined financial information is presented in Renminbi ("RMB"), which is the Company's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the Functional Currency using the applicable exchange rates quoted by the People's Bank of China prevailing at the date of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies, other than those capitalised as construction in progress, are recognised in the income statement.

Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit and loss are recognised in the income statement as part of the fair value gain or loss. Translation differences on non-monetary financial assets such as equities classified as available for sale are included in the fair value reserve in equity.

(iii) Group companies

The results and financial positions of all the group entities (none of which has the currency of a hyperinflationary economy) that have a Functional Currency different from the presentation currency are translated into the presentation currency as follows:

(1) Assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;

(2) Income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and

(3) All resulting exchange differences are recognised as a separate component of equity.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities, and of borrowings, are taken to equity. When a foreign operation is sold, such exchange differences are recognised in the income statement as part of the gain or loss on sale.

The Group did not enter into any hedge contracts during any of the periods presented.

(d) Exploration and evaluation expenditures

Exploration and evaluation expenditure comprises costs which are directly attributable to: researching and analysing existing exploration data; conducting geological studies, exploratory drilling and sampling; examining and testing extraction and treatment methods; and compiling pre-feasibility and feasibility studies. Exploration and evaluation expenditure also includes the costs incurred in acquiring mining rights, the entry premiums paid to gain access to areas of interest and amounts payable to third parties to acquire interests in existing projects.

During the initial stage of a project, exploration and evaluation costs are expensed as incurred. Expenditure on a project after it has reached a stage at which there is a high degree of confidence in its viability is capitalised and transferred to property, plant and equipment if the project proceeds. If a project does not prove viable, all irrecoverable costs associated with the project are expensed in the income statement.

(e) Property, plant and equipment

Property, plant and equipment, which consist of buildings, mining structures, plant, machinery and equipment, railway structures and motor vehicles, fixtures and others, are stated at historical cost, less accumulated depreciation and impairment losses. The cost of an asset comprises its purchase price and any directly attributable costs of bringing the asset to its present working condition and location for its intended use. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. Repairs and maintenance are charged to the income statement in the period incurred.

Other than mining structures, depreciation of each asset is calculated using the straight-line method to allocate its cost to its residual value over its estimated useful life. The estimated useful lives of property, plant and equipment are as follows:

Buildings	10-50 years
Plant, machinery and equipment	8-18 years
Railway structures	25-30 years
Motor vehicles, fixtures and others	5-15 years

Mining structures (including the main and auxiliary mine shafts and underground tunnels) are depreciated on the units of production method utilising only proved coal reserves in the depletion base.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 3(k)).

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are included in the combined income statement.

(f) Deferred overburden removal costs

Stripping ratios are determined by comparing the quantity of coal mined to the quantity of overburden, or waste removed to access the coal. Costs are deferred to the balance sheet, where appropriate, when the actual stripping ratios vary from the planned mine average stripping ratios. Deferral of costs to the balance sheet is not made where the actual stripping ratio is expected to be evenly distributed. Costs, which have previously been deferred to the balance sheet (deferred overburden removal costs), are included in the income statement on a units of production basis utilising average stripping ratios. Changes in estimates of average stripping ratios are accounted for prospectively from the date of the change.

(g) Construction in progress

Construction in progress represents property, plant and equipment under construction or pending installation, and is stated at cost less impairment losses. Cost comprises direct costs of construction including borrowing costs attributable to the construction during the period of construction. No provision for depreciation is made on construction in progress until such time as the relevant assets are completed and ready for intended use.

(h) Land use rights

Land use rights are stated at cost less accumulated amortisation and impairment losses. Cost represents consideration paid for the rights to use the land on which various plants and buildings are situated for periods varying from 20 to 50 years. Amortisation of land use rights is calculated on a straight-line basis over the period of the land use right.

(i) Mining rights

Mining rights are stated at cost less accumulated amortisation and impairment losses and are amortised on the units of production method utilising only proved and probable coal reserves in the depletion base.

(j) Intangible assets

Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised over their estimated useful lives of 5 years. Costs associated with developing or maintaining computer software programmes are recognised as an expense as incurred.

(k) Impairment of assets

Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

(l) Financial assets

The Group classifies its financial assets in the following categories: at fair value through profit or loss, loans and receivables and available for sale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition and re-evaluates this designation at every reporting date.

(i) Financial assets at fair value through profit or loss

This category has two sub-categories: financial assets held for trading, and those designated at fair value through profit or loss at inception. A financial asset is classified in this category if acquired principally for the purpose of selling in the short-term or if so designated by management. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if they are either held for trading or are expected to be realised within 12 months of the balance sheet date.

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for those with maturities greater than 12 months after the balance sheet date, which are classified as non-current assets. Loan and receivables are included in "trade receivables" and "prepayments and other receivables" in the balance sheet.

(iii) Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date.

Regular purchases and sales of investments are recognised on the trade-date — the date on which the Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value and transaction costs are expensed in the income statement. Investments are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Group has transferred substantially all risks and rewards of

ownership. Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables are carried at amortised cost using the effective interest method. Gains and losses arising from changes in the fair value of the "financial assets at fair value through profit or loss" category, including interest and dividend income, are included in the income statement in the period in which they arise.

Changes in the fair value of monetary securities denominated in a foreign currency and classified as available for sale are analysed between translation differences resulting from changes in amortised cost of the security and other changes in the carrying amount of the security. The translation differences are recognised in profit or loss, and other changes in carrying amount are recognised in equity. Changes in the fair value of other monetary securities classified as available for sale and non-monetary securities classified as available for sale are recognised in equity.

When securities classified as available for sale are sold or impaired, the accumulated fair value adjustment recognised in equity is included in the income statement as "gains or losses from investment securities". Dividends on available-for-sale equity instruments are recognised in the income statement when the Group's right to receive payment is established.

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models refined to reflect the Group's specific circumstances.

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity securities classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered an indicator that the securities are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss — measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in the income statement is removed from equity and recognised in the income statement. Impairment losses recognised in the income statement on equity instruments are not reversed through the income statement.

(m) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined by the weighted average method. The cost of finished goods and work in progress comprises raw material, direct labour, other direct costs and related production overheads based on normal operating capacity. It excludes borrowing costs. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs to completion and the estimated costs necessary to make the sale.

(n) Receivables

Receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtors, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments are considered indicators that the receivable is impaired. The amount of the provision is the difference between

the carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The amount of the provision is recognised in the income statement within "selling, general and administrative expenses".

(o) Cash and cash equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less.

(p) Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

(q) Deferred income tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Financial Information. However, if the deferred income tax arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss, it is not accounted for. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and jointly controlled entities, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

(r) Employee benefits

(i) Pension obligations

The Group contributes on a monthly basis to various defined contribution retirement benefit plans administered by the PRC Government. The relevant government agencies undertake to assume the retirement benefit obligation payable to all existing and future retired employees under these plans and the Group has no further obligation for post-retirement benefits beyond the contributions made. Contributions to these plans are expensed as incurred.

(ii) Early retirement benefits

Employee early retirement benefits are recognised in the period in which the Group enters into an agreement with the employee specifying the terms of early retirement or after the individual employee has

been advised of the specific terms. The specific terms vary among the early retired employees depending on various factors including position, length of services and district of the employee concerned. Early retirement benefits falling due more than 12 months after the balance sheet date are discounted to present value.

(iii) Housing benefits

All full-time employees of the Group are entitled to participate in various government-sponsored housing funds. The Group contributes on a monthly basis to these funds based on certain percentages of the salaries of the employees. The Group's liability in respect of these funds is limited to the contributions payable in each period.

(s) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

When there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre — tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

(t) Provisions for close down, restoration and environmental costs

One consequence of coal mining is land subsidence caused by the resettlement of the land at the mining sites. Depending on the circumstances, the Group may relocate inhabitants from the mining sites prior to conducting mining activities or the Group may compensate the inhabitants for losses or damage from close down and land subsidence after the sites have been mined. The Group may also be required to make payments for restoration, rehabilitation or environmental protection of the land after the sites have been mined.

Close down and restoration costs include the dismantling and demolition of infrastructure and the removal of residual materials and remediation of disturbed areas. Close down and restoration costs are provided in the accounting period when the obligation arising from the related disturbance occurs, whether this occurs during mine development or during the production phase, based on the net present value of estimated future costs. The cost is capitalised where it gives rise to future benefits, whether the rehabilitation activity is expected to occur over the life of the operation or at the time of close down. The capitalised cost is amortised over the life of the operation and the increase in the net present value of the provision is included in borrowing costs. Where there is a change in the expected decommissioning and restoration costs, an adjustment is recorded against the carrying value of the provision and related assets, and the effect is then recognised in the income statement on a prospective basis over the remaining life of the operation. Provisions for close down and restoration costs do not include any additional obligations which are expected to arise from future disturbance. The cost estimates are reviewed and revised at each balance sheet date to reflect changes in conditions.

(u) Revenue recognition

Revenue comprises the fair value for the sale of goods or services, net of value-added tax, rebates and discounts and after eliminating sales within the Group. Revenue is recognised as follows:

(i) Sales of goods

Revenue associated with the sale of coal, coke, mining machinery and ancillary materials and other goods is recognised when the title to the goods has been passed to the customer, which is at the date when the customer receives and accepts the goods and collectibility of the related receivables is reasonably assured.

(ii) Sales of services

Sales of services are recognised in the accounting period in which the services are rendered.

(iii) Interest income

Interest income is recognised on a time-proportion basis using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised either as cash is collected or on a cost-recovery basis as conditions warrant.

(iv) Dividend income

Dividend income is recognised when the right to receive payment is established.

(v) Borrowing costs

Borrowing costs comprise interest incurred on borrowings, amortisation of discounts or premiums, ancillary costs incurred in connection with the arrangement of borrowings, and exchange differences arising from foreign currency borrowings. Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use are capitalised as part of the cost of that asset. Other borrowing costs are recognised as expenses and included as finance costs in the period in which they are incurred.

(w) Leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

(x) Dividend distribution

Dividends are recognised as a liability in the period in which they are approved.

(y) Government grants

Grants from government are recognised at their fair value where there is reasonable assurance that the grant will be received and the Group will comply with all attached conditions.

Government grants related to cost are deferred and recognised in the income statement over the periods necessary to match them with the related costs that they are intended to compensate.

(z) Recently issued accounting standards

The following new standards and interpretations that have been issued but are not yet effective have not been applied. The impact of initial application is expected to have no significant effect in the Group's financial statements.

		Effective from
IFRS 7	Financial Instruments: Disclosures, and a Complementary Amendment to IAS 1, Presentation of Financial Statements-Capital Disclosures	1 January 2007
IFRIC 7	Applying the Restatement Approach under IAS 29	1 March 2006
IFRIC 8	Scope of IFRS 2	1 May 2006
IFRIC 9	Reassessment of Embedded Derivatives	1 June 2006
IFRIC 10	Interim Financial Reporting and Impairment	1 November 2006

4 FINANCIAL RISK MANAGEMENT

4.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk, credit risk, liquidity risk, cash flow and fair value interest-rate risk. In addition, the Group's operations are affected by certain commodity price fluctuations. The Group historically has not used derivative instruments for hedging or trading purposes. The majority of the financial instruments held by the Group are for purposes other than trading.

(a) Market risk

(i) Foreign exchange risk

The Group's operations (such as export sales, imports of machinery and equipment, and foreign currency borrowings (Note 19(i)) expose it to foreign exchange risk arising from various currency exposures primarily with respect to the United States Dollar ("USD") and Japanese Yen. In addition, RMB is not freely convertible into other foreign currencies and conversion of RMB into foreign currencies is subject to rules and regulations of foreign exchange control promulgated by the PRC Government. The Group historically has not used any forward contracts or other means to hedge the potential fluctuations in foreign exchange rates.

(ii) Commodity price risk

The Group is principally engaged in the production and sale of coal and coke. The coal and coke markets are influenced by global as well as regional supply and demand conditions. A decline in prices of coal or coke could adversely affect the Group's financial performance. The Group historically has not used any commodity derivative instruments to hedge the potential price fluctuations of coal or coke.

(b) Credit risk

The Group has no significant concentrations of credit risk. The carrying amounts of cash and cash equivalents, time deposits, trade and notes receivable and other current assets except for prepayments included in the combined balance sheets represent the Group's maximum exposure to credit risk in relation to its financial assets. The Group has policies in place to ensure that sales of products are made to customers with an appropriate credit history. The Group's historical experience in collection of trade and other receivables falls within the recorded allowance and the directors are of the opinion that adequate provision for uncollectible receivables has been made in the Financial Information.

(c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and cash equivalents and the availability of funding through an adequate amount of committed credit facilities (Note 19(j)). Due to the dynamic nature of the underlying businesses, the Group maintains a reasonable level of cash and cash equivalents, and further supplements this by keeping committed credit lines available.

The Group's primary cash requirements have been for purchases of materials, machinery and equipment and payment of related debts. The Group finances its working capital requirements through a combination of funds generated from operations and bank loans.

(d) Cash flow and fair value interest risk

As the Group has no significant interest-bearing assets, the Group's income and operating cash flows are substantially independent of changes in market interest rates.

The Group's interest-rate risk mainly arises from borrowings. Borrowings at variable rates expose the Group to cash flow interest-rate risk. Borrowings issued at fixed rates expose the Group to fair value interest-rate risk. The Group historically has not used any financial instruments to hedge potential fluctuations in interest rates.

4.2 Fair value estimation

The carrying amounts of the Group's financial assets including cash and cash equivalents, deposits in approved financial institutions, trade and other receivables; and financial liabilities including trade and other payables and short-term borrowings, approximate their fair values due to their short maturities. The face values less any estimated credit adjustments for financial assets and liabilities with a maturity of less than one year, if any, are assumed to approximate their fair values.

The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate available to the Group for similar financial instruments. The fair values of long-term borrowings are disclosed in Note 19(h).

5 CRITICAL ACCOUNTING ESTIMATES AND ASSUMPTIONS

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(i) Carrying value of non-current assets

Non-current assets, including property, plant and equipment, land use rights, mining rights and intangible assets, are carried at cost less accumulated amortisation. These carrying amounts are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. In estimating the recoverable amounts of assets, various assumptions, including future cash flows to be associated with the non-current assets and discount rates, are made. If future events do not correspond to such assumptions, the recoverable amounts will need to be revised, and this may have an impact on the Group's results of operations or financial position.

(ii) Useful lives of property, plant and equipment

The Group's management determines the estimated useful lives and related depreciation charges for its property, plant and equipment. This estimate is based on the historical experience of the actual useful lives of property, plant and equipment of similar nature and functions. It could change significantly as a result of technical innovations and competitor actions in response to severe industry cycles. Management will increase the depreciation charges where useful lives are less than previously estimated lives, or it will write-off or write-down technically obsolete or non-strategic assets that have been abandoned or sold.

(iii) Trade and other receivables

The Group's management determines the provision for impairment of trade and other receivables. This estimate is based on the credit history of its customers and current market conditions. Management reassesses the provision at each balance sheet date.

(iv) Income taxes

There are certain transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made. In addition, the realisation of future income tax assets is dependent on the Group's ability to generate sufficient taxable income in future years to utilise income tax benefits and income tax loss carry-forwards. Deviations of future profitability from estimates would result in adjustments to the value of future income tax assets and liabilities that could have a significant effect on earnings.

(v) Provision for close down, restoration and environmental costs

The provision for close down, restoration and environment costs is determined by management based on their past experience and best estimation of future expenditures, after taking into account existing relevant PRC regulations However, in so far as the effect on the land and the environment from current mining activities becomes apparent in future years, the estimate of the associated costs may be subject to revision from time to time.

6 REVENUE AND SEGMENT INFORMATION

(a) Primary reporting format — business segments

The Group organises its business into four main business segments:

- Coal — Production and sales of coal
- Coke — Production and sales of coke
- Machinery — Manufacturing and sales of mining machinery
- Others, including design of mining structures, trading of other products, generation and sales of electric power, production and sale of primary aluminium, transportation services and agency services. None of these constitutes a separately reportable segment.

Segment assets and liabilities are those assets and liabilities as disclosed in the combined balance sheets in Section I above.

Capital expenditure comprises additions to property, plant and equipment (Note 7), land use rights (Note 8), mining rights (Note 9) and intangible assets (Note 10).

(b) Secondary reporting format — geographical segments

The Group has three geographical segments by location of customers as follows:

- Domestic markets — Customers who are located in the PRC.
- Asia Pacific markets — Export sales to customers who are located outside the PRC principally in Korea, Japan and Taiwan.
- Other markets — Export sales to customers who are located outside the PRC and the Asia Pacific region.

The Group's production or service facilities and other assets are principally located in the PRC. Accordingly, only geographical analysis of revenue is presented.

Revenue is based on the country in which the customer is located. An analysis of revenue by geographical segment is set out below:

Net book value				
At end of the year/period	3,076	4,644	14,815	14,087

Intangible assets mainly represent the purchase costs of computer software.

11 INVESTMENTS IN ASSOCIATES

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Beginning of the year/period	8,025	82,725	96,518	98,911
Additions	73,953	15,709	15,059	377,669
Disposals	—	(39)	(6,596)	(7,294)
Share of profits/(losses)	747	(1,877)	(6,070)	(1,155)
End of the year/period	82,725	96,518	98,911	468,131

Summary financial information of the Group's principal associates, all of which are unlisted, is as follows:

	As of and in the year 31 December			As of and for the six months ended 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Total assets	226,208	234,927	678,114	1,389,980
Total liabilities	(143,483)	(138,409)	(579,203)	(921,849)
Revenue	9,678	149,453	350,795	373,032
Net profit/(losses)	747	(1,877)	(6,070)	(1,155)

Particulars of the Group's associates are set out in Note 36 (iii).

12 AVAILABLE-FOR-SALE FINANCIAL ASSETS

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Beginning of the year/period	140,115	93,126	93,480	125,749
Additions	9,920	28,270	35,272	46,340
Disposals	(56,909)	(27,916)	(3,003)	(7,046)
End of the year/period	93,126	93,480	125,749	165,043

Available-for-sale financial assets comprising principally unlisted equity securities, are classified as non-current assets unless they are expected to be realised within twelve months of the balance sheet date.

13 INVENTORIES

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000

	1,608,647	2,090,445	2,566,187	2,668,030

14 TRADE AND NOTES RECEIVABLE

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Trade receivables, net (note(a))	1,918,712	2,349,265	2,947,409	3,616,428
Notes receivable (note(b))	246,091	147,168	439,275	628,340
	2,164,803	2,496,433	3,386,684	4,244,768

Notes:

(a) Trade receivables are analysed as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Trade receivables				
— Parent Company	—	16,036	16,036	16,036
— Fellow subsidiaries	35,741	40,213	47,108	11,323
— Jointly controlled entities	18,567	44,613	52,787	44,496
— Associates	—	9,624	29,639	21,683
— Other related parties	61,955	6,845	71,189	412,117
— Other state-owned enterprises	720,272	891,468	1,636,019	1,802,316
— Others	1,082,177	1,340,466	1,094,631	1,308,457
Trade receivables, net	1,918,712	2,349,265	2,947,409	3,616,428

Aging analysis of gross trade receivables at the respective balance sheet dates is as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
1-6 months	1,591,897	1,895,326	2,454,100	3,106,543
7-12 months	157,937	265,642	302,725	353,614
1-2 years	115,449	132,511	118,496	111,311
2-3 years	20,690	46,502	84,738	82,452
Over 3 years	308,731	240,163	228,212	229,953
Trade receivables, gross	2,194,704	2,580,144	3,188,271	3,883,873
Less: Impairment of receivables	(275,992)	(230,879)	(240,862)	(267,445)
Trade receivables, net	1,918,712	2,349,265	2,947,409	3,616,428

The credit period of trade receivables is generally from 3 months to 6 months.

Trade receivables from related parties are unsecured, interest free and repayable in accordance with the relevant contract entered into between the Group and the related parties.

There is no concentration of credit risk with respect to trade receivables, as the Group has a large number of customers, domestically and internationally dispersed.

(b) Notes receivable are bills of exchange with maturity dates of less than one year.

(c) The carrying amounts of trade and notes receivable are denominated in the following currencies:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
RMB	1,695,629	1,882,735	2,604,123	3,789,493
United States Dollars	285,692	369,741	576,580	311,603
Japanese Yen	64,268	—	81,000	—
Euro Dollars	30,508	—	812	—
Hong Kong Dollars	88,706	243,957	124,169	143,672
	2,164,803	2,496,433	3,386,684	4,244,768

(d) The carrying amounts of trade and notes receivable approximate their fair values.

15 PREPAYMENTS AND OTHER RECEIVABLES

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Advances to suppliers (note(a))	893,192	1,389,229	1,302,186	1,160,904
Amounts due from related parties, gross (note (b))	337,055	613,117	1,050,149	1,122,344

Other receivables	85,666	138,457	572,025	690,485
	1,315,913	2,234,237	3,099,232	3,161,050

Notes:

(a) Advances to suppliers are analysed as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Advances to suppliers				
— Fellow subsidiaries	13,265	8,501	5,155	610
— Associates	—	—	—	6,151
— Other state-owned enterprises	384,797	569,772	604,783	289,335
— Others	495,130	810,956	692,248	864,808
	893,192	1,389,229	1,302,186	1,160,904

(b) Amounts due from related parties are analysed as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Amounts due from related parties, gross				
— Parent Company	12,608	210,684	380,741	464,499
— Fellow subsidiaries	95,575	19,006	16,094	88,113
— Jointly controlled entities	30,506	121,871	176,877	266,401
— Associates	—	2,998	18,560	6,576
— Other related parties	95,772	138,113	263,249	111,770
— Other state-owned enterprises	102,594	120,445	194,628	184,985
	337,055	613,117	1,050,149	1,122,344

Amounts due from related parties are unsecured, interest free and have no fixed repayment term.

Amounts due from the Parent Company and fellow subsidiaries as of 30 June 2006 have been fully settled as of the date of this report.

(c) Loan to associates represents amounts lent to associates to finance their operations. The amounts are unsecured, bearing interest of 5.22% to 6.90% per annum during the six months ended 30 June 2006 (2005: 5.58% to 6.90%, 2004: 4.54% to 6.90%), and repayable in one year.

(d) The carrying amounts of prepayments and other receivables approximate their fair values.

16 FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

Financial assets at fair value through profit or loss comprise primarily investments in PRC listed debt and equity securities.

17 BANK DEPOSITS

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Restricted bank deposits (note(a))	215,194	231,742	15,949	—
Term deposits with initial terms of over three months	48,834	32,692	46,377	10,000
Cash and cash equivalents				
— Cash on hand	2,812	3,465	1,471	4,845
— Deposits within banks and other financial institutions	2,973,433	3,243,018	3,138,846	2,289,161
	3,240,273	3,510,917	3,202,643	2,304,006

Notes:

(a) Restricted bank deposits mainly include deposits held as security for bank loans of the Group and are restricted for the purposes of the related banking facilities (Note 19(j)). In addition, certain restricted bank deposits are held as security for the settlement of notes payable.

(b) For the years ended 31 December 2003, 2004, 2005, and the six months ended 30 June 2006 the weighted average effective interest rate range on deposits was 0.70% to 2.10%, 0.70% to 1.80%, 0.71% to 1.33% and 0.71% to 2.25% per annum respectively.

(c) Deposits and cash and cash equivalents are denominated in the following currencies:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
RMB	2,551,465	2,893,757	2,663,254	1,809,406
United States Dollar	684,469	614,169	520,797	491,919
Hong Kong Dollar	1,349	1,488	82	130
Euro	—	773	3,738	1,449
Japanese Yen	1,426	179	576	1,102
Other currencies	1,564	551	14,196	—
	3,240,273	3,510,917	3,202,643	2,304,006

Cash and cash equivalents are principally RMB-denominated deposits placed with banks and non-bank financial institutions in the PRC. The conversion of these RMB-denominated deposits into foreign currencies and remittance out of the PRC are subject to certain PRC rules and regulations of foreign exchange control promulgated by the PRC Government. Also, the exchange rates are determined by the PRC Government.

18 OWNER'S EQUITY

(a) Upon incorporation of the Company on 22 August 2006, certain assets and liabilities were transferred to or assumed by the Company from China Coal Group in return for 8 billion shares at par value of RMB1.00 each with all the then existing reserves eliminated and the resulting difference dealt with in capital reserve. Separate classes of reserves, including retained profits, statutory surplus reserve and statutory public welfare fund prior to the incorporation of the Company, are not separately disclosed as all of these reserves had been capitalised and incorporated in the capital reserve pursuant to the Restructuring.

(b) During the year ended 31 December 2003, the Group acquired a 75% equity interest in Jiangsu Datun Aluminium Company Limited ("Datun Aluminum") from an 88.57% subsidiary of China Coal Group at consideration of RMB150,521,000. During the year ended 31 December 2005, the Group acquired nine power generators from such 88.57% subsidiary of China Coal Group at consideration of RMB626,253,000. As Datun Aluminium and the nine power generators acquired were under the control of China Coal Group prior to their acquisition by the Group, these acquisition transactions were considered to be transfers of businesses under common control and the acquired assets and liabilities have been accounted for at historical cost in a manner similar to the uniting of interest method. Accordingly, the combined financial statements for all periods presented have been stated as if the current structure and operations resulting from the acquisition had been in existence since the beginning of the earliest period presented. The cash consideration paid (and to be paid) by the Group is treated as deemed distribution to China Coal Group.

(c) During the year ended 31 December 2005, China Coal Group acquired a 7.78% equity interest in a subsidiary from the minority shareholders. The carrying amount of the additional 7.78% equity interest acquired is reflected in equity as a transaction between the minority interest and China Coal Group which provided the consideration for the purchase.

(d) During the six months ended 30 June 2006, in accordance with a share reform proposal for the conversion of all the unlisted shares in a subsidiary to listed shares, China Coal Group offered to give out three unlisted shares in that subsidiary for every ten listed shares in consideration for such holders of listed shares to agree that all the subsidiary's unlisted shares be converted into listed share. As a result of the share reform proposal, China Coal Group transferred a 7.97% equity interest in the subsidiary to the subsidiary's minority shareholders. Such transfer was accounted for as a decrease in the Group's equity interests by China Coal Group.

19 BORROWINGS AND BANKING FACILITIES

	As of 31 December			As of 30 June

— In the second year	16,500	—	—	—
— In the third to fifth year	—	—	924,200	1,074,200
— After the fifth year	40,000	1,820,000	2,025,800	2,481,800
	56,500	1,836,500	2,950,000	3,556,000
	6,476,866	8,052,520	8,642,498	9,140,020

(c) The amounts represent funds borrowed by the Parent Company from the relevant banks for onward lending to the Group. The amounts will be replaced by bank borrowings prior to the listing of the Company's shares on the Main Board of The Stock Exchange of Hong Kong Limited.

(d) Other loans from the Parent Company have been fully settled as of the date of this report.

(e) Unsecured loans from minority shareholders of certain subsidiaries are fully repayable within one year.

(f) The exposure of the Group's long-term borrowings to interest rate changes and the contractual repricing dates at the balance sheet date are as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Long-term borrowings				
6 months or less	6,475,766	8,051,420	6,542,338	6,423,497
7 to 12 months	—	—	—	—
1 to 5 years	—	—	—	—
Over 5 years	1,100	1,100	2,100,160	2,716,523
	6,476,866	8,052,520	8,642,498	9,140,020

(g) The effective interest rates per annum at the respective balance sheet dates are as follows:

	As of 31 December			As of 30 June
	2003	2004	2005	2006
Banks loans and loans from other financial institutions	3.83%-7.89%	4.02%-7.89%	4.66%-7.89%	4.93%-6.12%
Loans from:				
— Parent Company	5.12%-5.94%	5.12%-5.94%	5.12%-5.94%	4.86%-5.30%
— Minority shareholders of certain subsidiaries	5.60%	5.60%-5.89%	5.60%-5.89%	5.58%-5.85%

(h) The Directors are of the opinion that all of the Group's borrowings approximate their respective fair values.

(i) The Group's total borrowings are denominated in the following currencies:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Long-term borrowings:				
Renminbi	3,170,034	4,991,148	6,543,938	7,018,525
United States Dollars	8,398	33,057	—	—
Japanese Yen	3,298,434	3,028,315	2,098,560	2,121,495
	6,476,866	8,052,520	8,642,498	9,140,020
Short-term borrowings:				
Renminbi	3,122,058	2,309,379	2,103,765	2,479,685
	9,598,924	10,361,899	10,746,263	11,619,705

(j) The Group's borrowing facilities are analysed as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Secured by:				
— Bank deposits	215,342	219,812	—	—
— Property, plant and equipment	396,570	177,220	177,220	136,000
— Accounts receivable	8,398	33,055	17,815	11,000
— Equity interest in a jointly controlled entity	218,463	239,201	259,938	259,938
	838,773	669,288	454,973	406,938
Guaranteed by:				
— Parent Company	4,240,399	3,938,122	4,007,560	4,718,495
— Fellow subsidiaries	2,805,199	2,230,069	2,066,324	1,291,189
— Third parties	10,000	20,000	15,000	21,380
— Other state-owned enterprises	689,475	718,326	697,589	701,077
	7,745,073	6,906,517	6,786,473	6,732,141

All guarantees provided by the Parent Company and fellow subsidiaries will be released or withdrawn upon the listing of the Company's shares on the Main Board of The Stock Exchange of Hong Kong Limited.

As of the respective balance sheet dates, the Group had the following undrawn borrowing facilities:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Floating rates				
— Expiring within one year	—	435,000	5,796,747	5,330,000
— Expiring beyond one year	22,175,000	20,300,000	19,065,000	18,444,000
Fixed rates				
— Expiring within one year	16,000	—	—	—
	22,191,000	20,735,000	24,861,747	23,774,000

20 DEFERRED INCOME TAX

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority. The offset amounts are as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Deferred tax assets:				
Deferred tax assets to be recovered after more than 12 months	345,387	219,259	207,682	380,705
Deferred tax assets to be recovered within 12 months	86,415	190,453	191,625	42,413
	431,802	409,712	399,307	423,118
Deferred tax liabilities:				
Deferred tax liabilities to be settled after more than 12 months	(28,857)	(50,885)	(110,932)	(175,367)
Deferred tax liabilities to be settled within 12 months	(27,198)	(87,904)	(121,578)	(164,644)
	(56,055)	(138,789)	(232,510)	(340,011)
	375,747	270,923	166,797	83,107

The gross movements on the deferred tax account are as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
At beginning of the year/period	256,125	375,747	270,923	166,797
Credited/(charged) to income statement (Note 28)	119,622	(104,824)	(104,126)	(83,690)
At end of the year/period	375,747	270,923	166,797	83,107

Deferred income tax assets are recognised for tax losses carried-forward to the extent that realisation of the related tax benefit through future taxable profits is probable. The Group has not recognised deferred income tax assets of RMB92,383,000, RMB93,099,000 and RMB98,801,000 and RMB86,072,000 as of 31 December 2003, 2004, 2005 and 30 June 2006, respectively, in respect of accumulated tax losses of RMB279,948,000, RMB282,118,000, RMB299,397,000 and RMB260,785,000 as of those dates, respectively, that can be carried forward against future taxable income and will expire between 2007 and 2011.

The movements in deferred tax assets and liabilities during the periods, without taking into consideration the offsetting of balances within the same tax jurisdiction, are as follows:

Deferred tax assets:

	Revaluation surplus (note (a)) RMB'000	Tax losses RMB'000	Pre-operating expenses RMB'000	Provision for employee benefits RMB'000	Impairment of assets RMB'000	Others RMB'000	Total RMB'000
At 1 January 2003	—	96,098	48,734	50,964	60,852	51,917	308,565
Credited to income statement	—	108,180	1,366	2,981	1,362	9,348	123,237
At 31 December 2003	—	204,278	50,100	53,945	62,214	61,265	431,802
Credited/(charged) to income statement	—	(37,905)	2,291	(15)	(5,317)	18,856	(22,090)
At 31 December 2004	—	166,373	52,391	53,930	56,897	80,121	409,712
Credited/(charged) to income statement	91,268	(98,961)	(9,591)	(1,584)	(1,842)	10,305	(10,405)
At 31 December 2005	91,268	67,412	42,800	52,346	55,055	90,426	399,307
Credited/(charged) to income statement	(2,753)	46,327	(6,888)	(572)	9,322	(21,625)	23,811
At 30 June 2006	88,515	113,739	35,912	51,774	64,377	68,801	423,118

Deferred tax liabilities:

	Accelerated tax depreciation RMB'000	Safety funds (note (b)) RMB'000	Others RMB'000	Total RMB'000
At 1 January 2003	(52,440)	—	—	(52,440)
Charged to income statement	(3,615)	—	—	(3,615)
At 31 December 2003	(56,055)	—	—	(56,055)
Credited/(charged) to income statement	3,691	(68,418)	(18,007)	(82,734)
At 31 December 2004	(52,364)	(68,418)	(18,007)	(138,789)
Credited/(charged) to income statement	7,608	(114,428)	13,099	(93,721)
At 31 December 2005	(44,756)	(182,846)	(4,908)	(232,510)
Credited/(charged) to income statement	(19,078)	(89,719)	1,296	(107,501)
At 30 June 2006	(63,834)	(272,565)	(3,612)	(340,011)

(a) This represents revaluation surplus of certain property, plant and equipment of a subsidiary not recorded by the Group, but which are deductible for tax purposes.

(b) Pursuant to the regulations of the State Administration of Work Safety, the Group is required to set aside amounts varying from RMB5 to RMB10 per tonne of raw coal mined beginning 1 April 2004 for the enhancement of a safe production environment and facilities ("safety funds", for the coal mines of a jointly controlled entity, safety funds set aside were increased to RMB35 per tonne of raw coal mined beginning 1 January 2006). Such amounts are deductible for tax purposes when they are set aside. However, such expenditures are expensed for accounting purposes when they are incurred. Accordingly, a deferred tax liability is recorded for the temporary differences in respect of excess funds set aside for tax purposes.

21 TRADE AND NOTES PAYABLE

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Trade payables (note(a))	2,458,183	3,247,990	4,053,607	3,826,846
Notes payable	340,675	206,957	177,599	199,287
	2,798,858	3,454,947	4,231,206	4,026,133

Notes:

(a) Trade payables are analysed as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Trade payables				
— Parent Company	43,694	1,618	57,021	58,638
— Fellow subsidiaries	86,560	100,126	147,860	119,648
— Jointly controlled entities	70,324	76,244	143,648	227,736
— Associates	3,000	—	—	922
— Other related parties	66,616	176,546	339,938	172,652
— Other state-owned enterprises	1,202,903	1,715,211	1,616,739	1,127,748
— Others	985,086	1,178,245	1,748,401	2,119,502
	2,458,183	3,247,990	4,053,607	3,826,846

Ageing analysis of trade payables at the respective balance sheet dates is as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
less than 1 year	2,077,758	2,828,554	3,811,236	3,469,102
1-2 years	96,123	164,724	96,283	146,390
2-3 years	86,160	40,315	18,329	76,118
Over 3 years	198,142	214,397	127,759	135,236
	2,458,183	3,247,990	4,053,607	3,826,846

(b) The carrying amounts of trade and notes payable are denominated in the following currencies:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
RMB	2,764,109	3,330,917	4,196,150	3,790,848
United States Dollars	34,749	124,030	35,056	235,285
	2,798,858	3,454,947	4,231,206	4,026,133

(c) The carrying amounts of trade and notes payable approximate their fair values.

22 ACCRUALS AND OTHER PAYABLES

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Customer deposits and receipts in advance (note(a))	583,511	1,074,104	943,278	816,106
Amounts due to related parties, gross (note(b))	553,033	777,485	897,807	976,152
Amount due to a former joint venture partner (note(c))	987,286	1,002,094	1,002,176	948,879
Dividends payable	141,034	385,400	1,030,914	280,746
Payable for site restoration	26,960	105,923	213,201	136,393
Others	680,857	947,370	1,200,335	1,543,911
	2,972,681	4,292,376	5,287,711	4,702,187

Notes:

(a) Customer deposits and receipts in advances are analysed as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Customer deposits and receipts in advances				
— Fellow subsidiaries	—	—	1,212	1,161
— Jointly controlled entities	—	—	10,325	—
— Other related parties	15,535	66,330	26,434	12,793
— Other state-owned enterprises	157,084	476,547	232,524	455,275
— Others	410,892	531,227	672,783	346,877
	583,511	1,074,104	943,278	816,106

Customer deposits and receipts in advances from related parties are unsecured and interest free.

(b) Amounts due to related parties are analysed below:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Amounts due to related parties, gross				
— Parent Company	114,813	85,056	92,924	227,275
— Fellow subsidiaries	92,618	185,470	484,097	423,641
— Associate	—	—	7,309	4,157
— Jointly controlled entities	1,707	19,249	1,296	12,524
— Other related parties	174,720	143,831	170,927	215,984
— Other state-owned enterprises	169,175	343,879	141,254	92,571
	553,033	777,485	897,807	976,152

Amounts due to related parties are unsecured and interest free.

Amounts due to the Parent Company and fellow subsidiaries as of 30 June 2006 have been fully settled as of the date of this report.

(c) This amount represents consideration payable to a former joint venture partner in respect of an acquisition of a 52.49% interest in a coal mine. Such balance is denominated in United States Dollars and bears interest at London Inter-Bank Offered Rate. It is expected to be settled before 31 December 2006.

(d) The carrying amounts of accruals and other payables approximate their fair values.

23 PROVISION FOR CLOSE DOWN, RESTORATION AND ENVIRONMENTAL COSTS

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Beginning of the year/period	660,080	768,973	769,574	711,283
Provision during the year/period (Note 24)	100,361	—	—	—
Interest charge on unwinding of discount on provision (Note 25)	35,803	38,985	39,238	19,743
Payments during the year/period	(27,271)	(38,384)	(97,529)	(4,742)
End of the year/period	768,973	769,574	711,283	726,284
Less: current portion	(38,382)	(97,530)	(27,237)	(27,782)
	730,591	672,044	684,046	698,502

Mining activities may result in land subsidence, which could lead to losses to the residents of the mining areas. Pursuant to the relevant PRC regulations, the Group is required to make compensation payments to the residents for their losses resulting from land subsidence, or to restore the mining areas back to certain acceptable conditions.

Under existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or results of operations of the Group. The PRC Government, however, has moved and may move further towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainty which affect the Group's ability to estimate the ultimate cost of remediation efforts. These uncertainties include: (i) the exact nature and extent of the contamination at various sites including, but not limited to, coal mines and land development areas, whether operating, closed or sold, (ii) the extent of required cleanup efforts, (iii) varying costs of alternative remediation strategies, (iv) changes in environmental remediation requirements, and (v) the identification of new remediation sites. The amount of such future cost is indeterminable due to the above uncertainties.

The provision for close down, restoration and environmental clean up costs has been determined by management based on their past experience and best estimate of future expenditure by discounting the expected expenditures to their net present value. However, in so far as the effect of the land and the environment from current mining activities becomes apparent in future periods, the estimate of the associated costs may be subject to revision in the future. The amounts provided in relation to close down, restoration and environmental clean up costs are reviewed at least annually based upon the facts and circumstances available at the time and the provisions are updated accordingly.

24 EXPENSE BY NATURE

Expenses included in cost of sales and selling, general and administrative expenses are analysed as follows:

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Depreciation (note (a))	629,488	866,852	1,000,498	434,106	556,050
Amortisation (note (b))	3,023	4,403	5,033	2,323	5,393
Cost of inventories sold	8,819,800	10,661,736	16,237,688	7,456,232	7,134,029
Transportation costs	1,839,769	3,709,458	4,055,441	2,082,212	2,265,609
Sales tax and surcharges	89,633	187,220	288,170	139,145	174,913
Auditors' remuneration	4,425	8,102	10,889	5,083	6,527
Close down, restoration and environmental costs (Note 23)	100,361	—	—	—	—
Losses on disposal of property, plant and equipment	18,254	3,451	4,507	(323)	144
Repairs and maintenance	199,248	285,237	240,199	61,057	97,464
Operating lease rentals	60,954	58,696	69,032	34,669	21,391
Provision for/(reversal of) impairment of receivables	25,755	(15,587)	27,454	4,986	8,093
Staff costs (including directors' emoluments) (Note 27)(d)	1,191,565	1,556,447	1,847,502	976,018	1,121,672
Resource compensation fees(c)	10,807	17,775	23,230	71,812	70,966
Other expenses	617,761	1,334,800	2,111,941	882,879	1,009,411
Total cost of sales, selling, general and administrative expenses	13,610,843	18,678,590	25,921,584	12,150,199	12,471,662

Notes:

(a) Depreciation charged to the income statement is analysed as follows:

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Depreciation for the year/period (Note 7)	637,819	863,105	992,468	453,331	548,551
Less/(add): Amount capitalised as/(released from) cost of inventories which remained unsold as of year/period end	8,331	(3,747)	(8,030)	19,225	(7,499)
Amount charged to income statement	629,488	866,852	1,000,498	434,106	556,050

Charged to:

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Cost of sales	569,786	802,630	913,010	403,399	524,659
Selling, general and administrative expenses	59,702	64,222	87,488	30,707	31,391
	629,488	866,852	1,000,498	434,106	556,050

(b) Amortisation charged to selling, general and administrative expenses is analysed as follows:

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Amortisation of:					
Land use rights (Note 8)	1,312	1,657	2,026	998	2,927
Mining rights (Note 9)	1,089	1,078	1,752	587	1,618
Intangible assets (Note 10)	622	1,668	1,255	738	848
	3,023	4,403	5,033	2,323	5,393

(c) The resource compensation fee represents amounts paid to the PRC Government to compensate for the mineral resources mined.

(d) Staff costs charged to the income statement are analysed as follows:

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Charged to:					
Cost of sales	798,277	963,750	1,156,495	562,289	689,442
Selling, general and administrative expenses	393,288	592,697	691,007	413,729	432,230
	1,191,565	1,556,447	1,847,502	976,018	1,121,672

25 FINANCE COSTS

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Interest expense:					
— Bank loans and loans from other financial institutions					
wholly repayable within five years	257,227	310,631	352,854	133,268	177,688
not wholly repayable within five years	116,146	113,528	105,257	34,672	40,149
— Loans from related parties					
wholly repayable within five years	14,953	22,747	38,662	18,068	25,936
not wholly repayable within five years	—	12,007	46,324	15,256	25,272
	388,326	458,913	543,097	201,264	269,045
Less: Amounts capitalised in construction in progress (note (a))	(100,577)	(64,046)	(92,677)	(45,492)	(30,405)
	287,749	394,867	450,420	155,772	238,640
Interest charge on unwinding of discounts (Note 23)	35,803	38,985	39,238	19,552	19,743
Other incidental borrowing costs and charges	6,722	10,495	14,204	3,468	5,159
Net foreign exchange transaction losses/(gains)	345,088	83,408	(391,522)	(155,120)	27,997
	675,362	527,755	112,340	23,672	291,539

Notes:

(a) Finance costs capitalised in construction in progress are related to funds borrowed specifically for the purpose of obtaining a qualifying asset. Interest rates on such borrowings were as follows:

	Year ended 31 December			Six months ended 30 June	
	2003	2004	2005	2005 (unaudited)	2006
Annual interest rates on the borrowings at which the relevant finance costs were capitalised	3.20% — 5.67%	3.20% — 5.67%	4.71% — 5.89%	3.75% — 5.89%	5.51% — 5.89%

26 OTHER GAINS

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Dividend income — unlisted investments	19,225	10,849	12,612	4,335	20,205
Gains on disposal of investments	49	—	275	142	7,079
Interest income	52,468	48,629	71,659	34,687	35,682
Government grants and subsidies	14,708	12,023	42,028	4,991	24,486
	86,450	71,501	126,574	44,155	87,452

27 STAFF COSTS

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Wages, salaries and allowances	849,865	1,091,383	1,277,801	736,137	807,671
Housing subsidies (note (a))	31,520	65,071	92,451	32,373	49,308
Contributions to pension plans (note (b))	78,602	105,418	186,233	81,904	105,625
Early retirement benefits (note (c))	15,075	15,094	2,565	1,559	—
Welfare and other expenses	216,503	279,481	288,452	124,045	159,068
	1,191,565	1,556,447	1,847,502	976,018	1,121,672

Notes:

(a) During the years ended 31 December 2003, 2004, 2005, and the six months ended 30 June 2006, these mainly include the Group's contributions to government-sponsored housing funds at rates ranging from 5% to 15% of the employees' basic salaries.

(b) The Group participates in various pension plans organized by the relevant municipal and provincial governments under which the Group is required to make monthly defined contributions to these plans at rates ranging from 5% to 20% of the employees basic salaries depending on the applicable local regulations.

(c) Certain employees of the Group were required to retire early during the years ended 31 December 2003, 2004, 2005 and six months ended 30 June 2006. Early retirement benefits are recognised in the income statement in the period in which the Group enters into agreements specifying the terms of early retirement, or after the individual employees have been advised of the specific terms. These specific terms vary among the early retired employees depending on factors such as position, length of service and district of the employee concerned.

The Group has no other obligations for the payment of pensions and other post-retirement benefits of employees or retirees other than those disclosed above.

28 INCOME TAX EXPENSE

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
PRC enterprise income tax(a)	201,053	546,780	631,255	473,784	534,464
Hong Kong profits tax(b)	8,501	67,020	17,051	18,149	7,876
Overseas taxation(c)	3,390	11,598	6,340	3,824	1,843
Deferred income tax (Note 20)	(119,622)	104,824	104,126	91,174	83,690
	93,322	730,222	758,772	586,931	627,873

Notes:

(a) The provision for PRC enterprise income tax ("EIT") is calculated based on the statutory income tax rate of 33% of the assessable income of each of the companies now comprising the Group determined in accordance with the relevant PRC income tax rules and regulations for the Relevant Periods, except for certain subsidiaries and jointly controlled entities which are taxed at preferential tax rates ranging from 0% to 30% based on the relevant PRC tax laws and regulations.

(b) During the years ended 31 December 2003, 2004, 2005 and the six months ended 30 June 2006, Hong Kong profits tax has been provided at the rate of 17.5% on the estimated assessable profit derived from or arising in Hong Kong.

(c) Taxation on overseas profits has been calculated on the estimated assessable profit for the year at the rates of taxation prevailing in the countries in which the Group operates.

(d) The taxation of the Group's profit before tax differs from the theoretical amount that would arise using a weighted average of the rates prevailing in the jurisdictions in which the Group operates.

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Profit before income tax	331,996	3,165,767	4,310,217	2,978,973	2,110,266
Tax calculated at applicable tax rates	109,549	1,044,703	1,422,372	969,027	675,875
Preferential tax rates on the income of certain subsidiaries and jointly controlled entities	(38,565)	(225,815)	(534,243)	(255,906)	(59,894)
Income not subject to taxation	(18,759)	(35,984)	(30,534)	(24,260)	(18,936)
Tax benefit related to restatement of tax base of assets	—	—	(91,268)	(90,351)	—
Expenses not deductible for taxation purposes	21,895	10,462	50,860	15,495	45,799
Utilisation of previously unrecognised tax losses	—	—	—	—	(12,729)
Tax losses for which no deferred income tax assets was recognised	19,202	716	5,702	5,593	—
Additional expenses allowable for tax purposes	—	(63,860)	(64,117)	(32,667)	(2,242)
Income tax expense	93,322	730,222	758,772	586,931	627,873

29 DIVIDENDS

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Dividends					
— interim, paid	147,350	540,550	874,584	178,275	63,684
— final, proposed	256,630	258,330	286,845	—	96,920
	403,980	798,880	1,161,429	178,275	160,604

Dividends disclosed during the Relevant Periods represent dividends declared or proposed by the relevant subsidiaries of the Group to their then shareholders prior to the completion of the Restructuring.

The rates of dividend and the number of shares ranking for dividends are not presented as such information is not meaningful having regard to the purpose of this report.

30 EARNINGS PER SHARE

No earnings per share information is presented as its inclusion, for the purpose of this report, is not considered meaningful due to the Restructuring and the preparation of the results for the Relevant Periods on a combined basis as disclosed in Note 2(a) above.

31 EMOLUMENTS OF DIRECTORS, SUPERVISORS AND FIVE HIGHEST PAID INDIVIDUALS

(a) Details of the directors' emoluments are as follows:

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Basic, salaries, housing allowances, other allowances and benefits-in-kind	115	137	169	96	83
Contributions to pension schemes	11	13	16	8	9
Discretionary bonuses	230	365	750	—	—
	356	515	935	104	92

During the Relevant Periods, the emoluments paid to each of the directors did not exceed HK$1,000,000 (equivalent to RMB1,029,400).

No emoluments were paid to any of the supervisors during the Relevant Periods.

(b) Five highest paid individuals

The five individuals whose emoluments were the highest in the Group during the Relevant Periods are as follows:

	Year ended 31 December			Six months ended 30 June	
	2003	2004	2005	2005 (unaudited)	2006
Directors	1	1	2	—	—
Non-director individuals	4	4	3	5	5
	5	5	5	5	5

The details of emoluments paid to five highest paid individuals who were directors of the Company during the Relevant Periods have been included in Note 31(a) above. Details of emoluments paid to the remaining non-director individuals are as follows:

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Basic, salaries, housing allowances, other allowances and benefits-in-kind	351	435	514	139	64
Contributions to pension schemes	34	31	39	17	16
Discretionary bonuses	852	902	1,125	455	504
	1,237	1,368	1,678	611	584

During the Relevant Periods, the emoluments paid to each of the highest paid non-director individuals did not exceed HK$1,000,000 (equivalent to RMB1,029,400).

(c) During the Relevant Periods, no directors, supervisors of the Company or the five highest paid individuals of the Group waived any emoluments and no emoluments were paid by Group to any of the directors and supervisors of the Company or the five highest paid individuals of the Group as an inducement to join or upon joining the Group or as compensation for loss of office.

32 NOTES TO THE COMBINED CASH FLOW STATEMENTS

(a) Reconciliation of profit for the year to net cash inflows generated from operations

	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000 (unaudited)	2006 RMB'000
Profit for the year/period	238,644	2,435,545	3,551,445	2,392,042	1,482,393
Adjustments for:					
Property, plant and equipment					
— depreciation charge (Note 24)	629,488	866,852	1,000,498	434,106	556,050

Land use rights, mining rights and intangible assets					
— amortisation charge (Note 24)	3,023	4,403	5,033	2,323	5,393
— net losses on disposals	2,470	—	29	—	—
Provision for / (reversal of) impairment of receivables	25,755	(15,587)	27,454	4,986	8,093
Provision for impairment of inventory	—	3,328	—	—	—
Share of (profits) / losses of associates	(747)	1,877	6,070	(3,098)	1,155
Net foreign exchange transaction losses/(gains)	345,088	83,408	(391,522)	(155,120)	27,997
Fair value (gains)/losses (including gains/losses on disposal) on other financial assets at fair value through profit or loss	(49)	158	4,293	(142)	(7,079)
Interest income	(52,468)	(48,629)	(71,659)	(34,687)	(35,682)
Interest expense	323,552	433,852	489,658	175,324	258,383
Dividend income	(19,225)	(10,849)	(12,612)	(4,335)	(20,205)
Income tax expense	93,322	730,222	758,772	586,931	627,873
Changes in working capital:					
Inventories	(306,927)	(488,872)	(483,772)	(203,215)	(110,237)
Trade receivables	442,101	(297,640)	(918,888)	(1,533,662)	(884,665)
Prepayments and other receivables	216,700	(799,039)	(684,844)	(221,491)	(37,664)
Trade payables	(406,132)	361,461	522,920	118,498	(157,661)
Accruals and other payables	253,720	1,144,885	123,848	791,497	99,230
Increase/(decrease) in provision for employee benefits	165	(40)	(8,356)	10,128	(1,786)
Decrease in provision for close down, restoration, and environmental costs	(73,090)	(38,384)	(97,531)	(355)	(4,742)
NET CASH INFLOWS GENERATED FROM OPERATIONS	1,733,644	4,370,402	3,825,343	2,359,407	1,806,990

(b) Major non-cash transactions

(i) During the year ended 31 December 2003, property, plant and equipment of a subsidiary with net book values of approximately RMB8,583,000 were distributed to the Parent Company.

(ii) During the years ended 31 December 2004 and 2005, the Parent Company injected property, plant and equipment with a net book value of approximately RMB97,553,000 and RMB14,939,000, respectively to a subsidiary as capital contribution.

(iii) During the year ended 31 December 2004, an 88.57% subsidiary of China Coal Group assigned bank loans of RMB620,000,000 to a subsidiary of the Group, which was recorded as a reduction of shareholders' equity of the subsidiary.

(iv) During the six months ended 30 June 2006, a loan from China Coal Group amounting to RMB50,000,000 was waived and recorded as a capital contribution.

33 CONTINGENT LIABILITIES

(a) Bank and other guarantees

As of 31 December 2003, 2004, 2005 and 30 June 2006, the undiscounted maximum amount of potential future payments under guarantees given to banks in respect of banking facilities granted to the parties below were as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Jointly controlled entity of the Group (after elimination of the Group's proportionate interest in those jointly controlled entities)	44,080	62,100	15,138	—
Third parties	99,030	65,180	6,280	6,280

Guarantees to third parties will be released or withdrawn prior to the listing of the Company's shares on the Main Board of The Stock Exchange of Hong Kong Limited.

The Group monitors the guarantees to determine whether it is probable that a loss has occurred, and recognises any such losses under guarantees when those losses can be estimated. As of 31 December 2003, 2004, 2005 and 30 June 2006, it was not probable that the Group would be required to make payments under these guarantees.

(b) Lawsuits and other proceedings

The Group is a defendant in certain lawsuits as well as the plaintiff in other proceedings arising in the ordinary course of business. While the outcomes of such lawsuits or other proceedings cannot be determined at present, management believes that any resulting liabilities will not have a material adverse effect on the financial position or operating results of the Group.

34 COMMITMENTS

(a) Capital commitments

Capital expenditure contracted for at the balance sheet date but not yet incurred is as follows:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Property, plant and equipment	469,320	1,426,244	1,295,071	2,516,651
Others	—	—	110,000	110,000

(b) Operating lease commitments — where the Group is the lessee

The Group has commitments to make the following future minimum lease payments under non-cancelable operating leases:

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Land and buildings:				
— No later than 1 year	79,116	75,268	78,963	21,038
— Later than 1 year and no later than 5 years	73,539	5,429	6,786	5,429
— Later than 5 years	—	32,571	29,856	29,178
	152,655	113,268	115,605	55,645

	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Plant and machinery:				
— No later than 1 year	3,600	3,600	3,600	3,600
— Later than 1 year and no later than 5 years	14,400	14,400	14,400	14,400
— Later than 5 years	51,450	47,850	44,250	45,000
	69,450	65,850	62,250	63,000

35 RELATED PARTY TRANSACTIONS

China Coal Group, the immediate parent of the Company, is controlled by the PRC Government. The PRC Government is the Company's ultimate controlling party. In accordance with IAS 24 (revised 2003), "Related Party Disclosures", enterprises directly or indirectly controlled by the PRC Government ("state-owned enterprises") and their subsidiaries, together with the China Coal Group companies, are all related parties of the Group. Neither the China Coal Group nor the PRC Government publishes financial statements available for public use.

The Group has extensive transactions with the China Coal Group and other state-owned enterprises. For the purpose of disclosures of related party transactions, to the extent possible, the Group has in place procedures to assist the identification of the immediate ownership structure of its customers and suppliers as to whether they are state-owned enterprises. Many state-owned enterprises have multi-layered corporate structures and the ownership structures change over time as a result of transfers or privatisation programs. However, management believes that all material related party transactions and balances, of which it is aware, have been adequately disclosed.

Sales of goods and provision of services to the state-owned enterprises are at state-prescribed prices or prices which are also available to other customers. The Group considers that these sales are activities in the ordinary course of business.

In addition to the related party transactions undertaken in connection with the Restructuring described in Note 1 above, the Group enters into various other related party transactions. Set out below is a summary of significant related party transactions and balances in the Relevant Periods.

(a) Related party transactions

	Year ended 31 December			Six months ended 30 June

36 PARTICULARS OF PRINCIPAL SUBSIDIARIES, JOINTLY CONTROLLED ENTITIES AND ASSOCIATES

As of 31 December 2003, 2004, 2005 and 30 June 2006 and as of the date of this report, the Company has interests in the following principal subsidiaries, jointly controlled entities and associates, which in the

opinion of the directors, were significant to the results of the Relevant Periods or formed a substantial portion of the Group at the balance sheet dates:

(i) Principal subsidiaries

Company Name	Country/Place of operation and date of incorporation	Paid up capital	Attributable equity interest held by the Company	Attributable equity interest held by the Group	Principal activities	Type of legal entity
Shanghai Datun Energy Resources Co., Ltd. (Note i)/(上海大屯能源股份有限公司)	Shanghai, the PRC 29 December 1999	RMB 722,718,000	60.35%	62.43%	Coal mining	Joint stock with limited liability; Listed on the Shanghai Stock Exchange
China Coal & Coke Holdings Ltd. (Note ii)/(中煤焦化控股有限責任公司)	Beijing, the PRC 15 August 2003	RMB 100,000,000	95%	100%	Manufacture and sale of coke	Limited liability company
China Coal Tendering Co., Ltd. (Note xviii)/(中煤招標有限責任公司)	Beijing, the PRC 28 November 2001	RMB 8,000,000	60%	100%	Tendering services	Limited liability company
China National Coal Development Co., Ltd. (Note ii) (a) (中國煤炭開發有限責任公司)	Beijing, the PRC 17 February 1981	RMB 23,077,012	100%	100%	Sale of mining equipment	Limited liability company
China Coal Xi'an Design Engineering Co., Ltd. (Note iii)/(中煤西安設計工程有限責任公司) (a)	Xi'an, the PRC 1 September 1954	RMB 77,938,964	100%	100%	Coal mining related design services	Wholly state-owned enterprise
Shanxi Pingshuo Anjialing Surface Mine Company Limited (Note ii)/(山西平朔安家嶺露天煤炭有限公司)	Pingshuo, the PRC 27 November 1997	RMB 538,747,413	100%	100%	Coal mining	Limited liability company
Shuozhou Pingmu Coal Processing Co., Ltd. (Note iv)/(朔州平木煤炭加工有限公司)	Shuozhou, the PRC 4 July 2003	RMB 31,300,000	100%	100%	Coal processing	Limited liability company
China National Coal Industry Imp. & Exp. Group (Heilongjiang) Co., Ltd. (Note xv)/(中國煤炭工業進出口集團黑龍江有限公司)	Harbin, the PRC 26 May 1999	RMB 5,000,000	92.6%	100%	Sale of machinery, mineral and chemicals products	Limited liability company
China National Coal Industry Imp. & Exp. Group (Rizhao) Co., Ltd. (Note xv)/(中國煤炭工業進出口集團日照有限公司)	Rizhao, the PRC 18 May 1999	RMB 10,000,000	90%	100%	Sale of machinery, mineral and chemicals products	Limited liability company

Company Name	Country/Place of operation and date of incorporation	Paid up capital	Attributable equity interest held by the Company	Attributable equity interest held by the Group	Principal activities	Type of legal entity
Lianyungang China Coal Huanneng Coal Processing Co., Ltd. (Note vi)/ (連雲港中煤環能煤炭加工有限公司)	Lianyungang, the PRC 27 December 1999	RMB 5,000,000	75%	75%	Coal processing	Sino-foreign limited liability company
China Coal Lianyungang Imp. & Exp. Co., Ltd. (Note v)/(中煤連雲港進出口有限公司) (a)	Lianyungang, the PRC 5 July 1991	RMB 22,042,401	100%	100%	Sale of machinery, minerals and chemicals products	Limited liability company
Shanghai ChinaCoal East China Co., Ltd. (Note xiii)/ (上海中煤華東有限公司)	Shanghai, the PRC 26 May 2005	RMB 100,000,000	97%	97%	Sale of machinery, minerals and chemical products	Limited liability company
China National Coal Industry Imp. & Exp. Group (Qingdao) Co., Ltd. (Note xv)/(中國煤炭工業進出口集團青島有限公司)	Qingdao, the PRC 2 June 1999	RMB 10,000,000	100%	100%	Importing and exporting of machinery, mineral products, and other related services	Limited liability company
China National Coal Imp. & Exp. Group (Tianjin) Co., Ltd. (Note xv)/(天津中煤進出口有限公司)	Tianjin, the PRC 30 April 1999	RMB 10,000,000	90%	100%	Sale of coal products and other related products	Limited liability company
China National Coal Industry Qinhuangdao Imp. & Exp. Co., Ltd. (Note xv)/ (中國煤炭工業秦皇島進出口有限公司)	Qinhuangdao, the PRC 18 May 1999	RMB 15,000,000	95%	95%	Sale of coal and related product	Limited liability company
Sunfield Resources Pty. Ltd. (Note xvii)/ (華光資源有限公司)	Sydney, Australia 18 June 1997	AUD 500,000	100%	100%	Sale of coal	Limited liability company
Qinhuangdao China Coal Warehousing and Transportation Co., Ltd. (Note xv)/(秦皇島中煤儲運有限公司) (a)	Qinhuangdao, the PRC 1 January 1985	RMB 40,902,985	78.43%	78.43%	Warehousing and freight forwarding of coal	Wholly state - owned enterprise
Qinhuangdao Zhongmei Gangneng Coal Purifying Co., Ltd. (Note xv)/ (秦皇島中煤港能煤炭加工有限公司)	Qinhuangdao, the PRC 25 August 1999	USD 3,545,200	75%	75%	Coal processing	Sino-foreign Limited liability company
China Coal Sales and Transporting Corporation (Note xv)/(中國煤炭銷售運輸總公司)*	Bejing, the PRC 15 March 1983	RMB 44,662,306	100%	100%	Sale of coal and related products	Limited liability company
China Coal & Coke Longquan Limited (Note ii)/ (汾陽市中煤龍泉焦化有限責任公司)	Fenyang, the PRC 29 September 2003	RMB 50,000,000	—	60%	Manufacture, processing and washing of coke	Limited liability company

Company Name	Country/Place of operation and date of incorporation	Paid up capital	Attributable equity interest held by the Company	Attributable equity interest held by the Group	Principal activities	Type of legal entity
China Coal & Coke Mudanjiang Limited (Note ii)/(中煤牡丹江焦化有限責任公司)	Mudanjiang, the PRC 21 April 2003	RMB 15,000,000	—	100%	Manufacture, processing and sale of coke	Limited liability company
China Coal & Coke Jingda Limited (Note ii) (山西省太谷縣中煤京達焦化有限責任公司)	Taigu, the PRC 29 October 2003	RMB 14,920,000	—	70%	Manufacture and sale of coke	Limited liability company
China Coal & Coke Jiuxin Limited (Note xvi) (靈石縣中煤九鑫焦化有限責任公司)	Lingshi, the PRC 2 January 2004	RMB 50,000,000	—	75%	Manufacture and sale of coke	Limited liability company
North Coke (Hong Kong) Company Limited (Note viii)/(北方焦化(香港)有限公司)	Hong Kong 31 March 2003	USD 100,000	—	100%	Sale of coke and related products	Limited liability company
China National Coal Mining Equipment Co., Ltd. (Note ii)/ (中國煤礦機械裝備有限責任公司)(a)	Beijing, the PRC July 1988	RMB 462,726,039	100%	100%	Design, manufacture and sale of machinery and equipment for coal industry	Wholly state-owned enterprise
China Coal Handan Coal Mining Machinery Company Limited (Note ii) (中煤邯鄲煤礦機械有限責任公司)(a)	Handan, the PRC August 1969	RMB 46,282,375	—	100%	Manufacture of mining equipment; export and import services	Wholly state-owned enterprise
Beijing China Coal Zhongzhuang Machinery Materials Co., Ltd. (Note ii) (北京中煤中裝機械物資有限公司)(a)	Beijing, the PRC September 1993	RMB 2,857,500	—	100%	Sale of mining steel and equipment	Wholly state - owned enterprise
China Coal Beijing Coal Mining Machinery Co., Ltd. (Note ii) (中煤北京煤礦機械有限責任公司)(a)	Beijing, the PRC 1 January 1958	RMB 185,892,696	—	100%	Manufacture of mining machinery and equipment	Wholly state - owned enterprise
China Coal Zhangjiakou Coal Mining Machinery Co., Ltd. (Note ii)/ (中煤張家口煤礦機械有限責任公司)(a)	Zhangjiakou, the PRC 16 May 2000	RMB 213,922,696	—	100%	Manufacture of mining machinery and equipment	Limited liability company
China Coal Overseas Development Co., Ltd. (Note ii)/(中國煤炭海外開發有限公司)(a)	Beijing, the PRC 16 June 1981	RMB 10,000,000	—	100%	Import and export services	Wholly state - owned enterprise

Company Name	Country/Place of operation and date of incorporation	Paid up capital	Attributable equity interest held by the Company	Attributable equity interest held by the Group	Principal activities	Type of legal entity
China Mineral Equipment Group Import and Export Co., Ltd. (Note ii)/ (中礦機集團進出口有限責任公司)	Beijing, the PRC 19 March 1996	RMB 5,527,860	—	80%	Sale of mining machinery and equipment	Limited liability company
Tianjin China Coal Mining Equipment and Electronic Co., Ltd. (Note ii)/ (天津中煤煤礦機電有限公司)(a)	Tianjing, the PRC 7 January 1991	RMB 16,201,000	—	100%	Manufacture of mining equipment and electronic products	Wholly state - owned enterprise
Jiangsu Datun Aluminium Co., Ltd. (Note i)/ (江蘇大屯鋁業有限公司)	Xuzhou, the PRC 18 April 2002	RMB 245,576,787	—	46.82%	Manufacture of aluminium products	Sino-foreign limited liability company
China Coal Shaanxi Zhong'an project Management Co., Ltd. (Note iii)/ (中煤陝西中安項目管理有限責任公司)(a)	Xi'an, the PRC 25 Dec 1996	RMB 2,000,000	—	100%	Project Management services	Limited liability company
Xi'an Zhong'an Rock Soil Engineering Co., Ltd. (Note iii)/(西安中安岩土工程有限責任公司)(a)	Xi'an, the PRC 20 May 1993	RMB 1,500,000	—	100%	Surveying services	Limited liability company
Xi'an Meilong Control Engineering Co., Ltd. (Note iii)/ (西安梅隆控制工程有限責任公司)	Xi'an, the PRC 28 January 1997	RMB 500,000	—	60%	Telecom engineering	Limited liability company
Xi'an Zhong'an Printing Co., Ltd. (Note iii)/ (西安中安印務有限責任公司)	Xi'an the PRC 27 September 1995	RMB 807,700	—	100%	Sale of publishing and Photocopying equipment and provision of related services	Limited liability company
China Coal Handan Design Engineering Co., Ltd. (Note ix) (中煤邯鄲設計工程有限責任公司)(a)	Handan, the PRC 7 October 1975	RMB 31,528,574	100%	100%	Design and survey of construction projects	Wholly state - owned enterprise
China Coal Handan Mining Machinery Co., Ltd. (Note ix)/(中煤邯鄲礦山機械有限責任公司) (a)	Handan, the PRC 13 January 1996	RMB 1,074,921	—	100%	Manufacture of mining machinery	Wholly state - owned enterprise
Handan City Guoning Engineering Design Co., Ltd. (Note ix)/(邯鄲市國寧工程設計諮詢有限公司)	Handan, the PRC 8 December 2000	RMB 1,000,000	—	100%	Construction design and consulting services	Limited liability company

Company Name	Country/Place of operation and date of incorporation	Paid up capital	Attributable equity interest held by the Company	Attributable equity interest held by the Group	Principal activities	Type of legal entity
Handan City Qibin Engineering Design and Consulting Co., Ltd. (Note ix)/(邯鄲市奇斌工程設計諮詢有限公司)	Handan, the PRC 30 July 2003	RMB 500,000	—	100%	Provision of construction design and consulting services	Limited liability company
China Coal Handan Zhongyuan Construction Supervision and Consulting Co., Ltd. (Note ix)/(中煤邯鄲中原建設監理諮詢有限責任公司) (a)	Handan, the PRC 1989	RMB 1,384,174	—	100%	Provision of project management services	Wholly state - owned enterprise
China Coal Handan Xinhua Technology Development Co., Ltd. (Note ix)/(中煤邯鄲信華技術開發有限責任公司) (a)	Handan, the PRC 26 March 1993	RMB 1,645,770	—	100%	Provision of telecommunication and computer engineering services	Wholly state - owned enterprise
China Coal Handan Rock Soil Engineering Technology Co., Ltd. (Note ix)/(中煤邯鄲岩土工程有限責任公司) (a)	Handan, the PRC 10 October 1993	RMB 3,567,814	—	100%	Provision of land surveying services	Wholly state - owned enterprise
Handan City Zhongyuan Engineering Quality Testing Co., Ltd. (Note xiv)/(邯鄲市中遠工程質量檢測有限公司)	Handan, the PRC 24 September 2004	RMB 1,000,000	—	100%	Provision of project quality testing services	Limited liability company
China Coal International Technical Consulting Development Co., Ltd. (Note vii)/(中國煤炭工業國際技術諮詢開發有限責任公司)(a)	Beijing, the PRC 1 July 1988	RMB 9,857,655	—	100%	Consulting services	Limited liability company
Shanxi Pingshuo Co., Ltd (Note ii)* (山西平朔實業有限責任公司)	Shuozhou, the PRC 2 November 2001	RMB 42,391,900	100%	100%	Manufacture of mining equipment and electronic products	Limited liability company
Shuozhou City Pinglu District Ping'an Fertilizer Company Limited (Note ii) (朔州市平魯區平安化肥有限責任公司)***	Shanxi, the PRC 31 July 1996	RMB 137,018,257	40.58%	94%	Sale of fertilizer and other chemicals products	Limited liability company
Shanxi Pingshuo Real Estate Co., Ltd (Note ii)* (山西平朔房地產開發有限公司)	Shuozhou, the PRC 15 January 2002	RMB 20,000,000	90%	100%	Real Estate exploitation and management	Limited liability company

Company Name	Country/Place of operation and date of incorporation	Paid up capital	Attributable equity interest held by the Company	Attributable equity interest held by the Group	Principal activities	Type of legal entity
Pingshuo Coal Industry Company (Note ii) (平朔煤炭工業公司)**	Shuozhou, the PRC 6 October 1990	RMB 740,848,400	100%	100%	Coal Mining	Wholly state-owned enterprise
China Coal Import and Export Company (Note xv) (中國煤炭進出口公司)**	Beijing, the PRC 18 October 1988	RMB 423,505,632	100%	100%	Sale of coal products and other related products; import and export services	Limited liability company

* These entities have been retained by the Parent Company in accordance with the Restructuring.

** These entities have been transformed into branches of the Company in accordance with the Restructuring.

*** 70% of the equity interest in this entity has been retained by the Parent Company in accordance with the Restructuring, and this entity became an associate of the Company after the Restructuring.

37 SUBSEQUENT EVENTS

Save as disclosed elsewhere in this report, the significant subsequent events are as follows:

(a) The Company was incorporated on 22 August 2006. Subsequently, China Coal Group and the Company entered into a restructuring agreement (the "Restructuring Agreement") in preparation for a listing of the Company's shares on the Main Board of The Stock Exchange of Hong Kong Limited. Details of the Restructuring are set out in note 1 to the Financial Information. Pursuant to the Restructuring Agreement, China Coal Group has made various representations and warranties in relation to the businesses, assets, liabilities and interests transferred to the Company under the Restructuring and has agreed to be responsible for all tax liabilities associated with the transferred businesses, assets, liabilities and interests incurred before the Restructuring. China Coal Group has also agreed to indemnify the Company against any claims, losses or expenses incurred by the Company in connection with or arising from, among others:

(i) any breach of any provision of the Restructuring Agreement on the part of China Coal Group or its subsidiaries (excluding the Company);

(ii) the businesses, assets, liabilities and interests retained or held by China Coal Group following the Restructuring;

(iii) any rights and interests in relation to all employees of the Company who were employed by China Coal Group before the Restructuring for the period of their employment by China Coal Group;

(iv) any title defect in respect of properties being acquired by the Company prior to the Restructuring;

(v) any litigation or other claims against the Company that relate to events or circumstances occurring before the effective date of the Restructuring in relation to the businesses, assets, liabilities and interests transferred to the Company under the Restructuring, except those that are disclosed and provided for in the Financial Information.

(b) As part of the Restructuring, the Company entered into following agreements with China Coal Group on 5 September 2006:

(i) Coal export sales agency agreement, under which the Company appoints China Coal Group as its non-exclusive export sales agent in respect of its coal products;

(ii) Coal supplies framework agreement in respect of the procurement of coal products from the coal mines operated by China Coal Group;

(iii) Integrated materials and services mutual provision framework agreement for the provision of raw materials and services by either party;

(iv) Mine construction and design framework agreement for the provision of coal mine construction services and coal mine design services by either party;

(v) Property leasing framework agreement for properties leased from China Coal Group and its subsidiaries;

(vi) Land use rights leasing framework agreement for land use rights leased from China Coal Group;

The above framework agreements contemplated that the relevant members of the Group and China Coal Group (including its subsidiaries and associates) will enter into separate agreement to set out the specific terms and conditions in respect of the relevant materials and services to be provided or the relevant properties or land leased according to the principles, within the parameters under the relevant framework agreement.

(c) In September 2006, the Company obtained approval from the PRC government to acquire the remaining 20% equity interests in Shanxi China Coal Pingshuo Antaibao Coal Co., Ltd., a jointly controlled entity, from China Coal Group and another third-party joint venture partner at aggregate consideration of approximately RMB247.65 million. Upon completion of such acquisition in September 2006, Shanxi China Coal Pingshuo Antaibao Coal Co., Ltd. became a wholly owned subsidiary of the Group.

The selected financial information of Shanxi China Coal Pingshuo Antaibao Coal Co. Ltd. during the Relevant Periods is summarised as follows:

The above financial information reflects the balances and operating results as reported by Shanxi China Coal Pingshuo Antaibao Co. Ltd. as an entity, which includes transactions and balances with other companies comprising the Group. Details of these material transactions and balances, which have been eliminated upon consolidation, are as followed:

Transactions	Year ended 31 December			Six months ended 30 June	
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2005 RMB'000	2006 RMB'000
Sales to other group companies	882,364	1,386,271	2,013,640	1,177,042	1,282,139
Purchase from other group companies	(677,545)	(1,073,936)	(1,051,946)	(429,808)	(456,875)
Management and other fees paid and payable to other group companies	(151,957)	(223,415)	(230,232)	(120,322)	(125,733)

Balances	As of 31 December			As of 30 June
	2003 RMB'000	2004 RMB'000	2005 RMB'000	2006 RMB'000
Due from other group companies (included in non-current assets)	1,218,333	1,297,916	1,112,437	1,310,836
Due from other group companies (included in receivable and prepayments)	76,457	104,643	467,961	644,620
Due to other group companies (included in payables and accruals)	128,620	275,904	278,892	304,641

All balances with other group companies are unsecured and non-interest bearing.

(d) In accordance with the "Provisional Regulation Relating to Corporate Reorganization of Enterprises and Related Management of State-owned Capital and Financial Treatment" (the "Provisional Regulations") issued by the Ministry of Finance, which became effective from 27 August 2002, the Company is required to make a distribution to China Coal Group, in an amount equals to the difference in the Company's net asset values as at 1 October 2005 and as at 21 August 2006 (being the date immediately prior to the date on which the Company was

incorporated) (the "Pre-establishment Distribution") as determined based on the audited accounts prepared in accordance with PRC GAAP.

In addition, pursuant to the resolution of a shareholders' meeting dated 23 August 2006, the shareholder of the Company has resolved to make a special distribution to China Coal Group, in an amount equals to the distributable profit of the Company for the period from 22 August 2006 to the last day of the month prior to the listing of Company's shares (the "Special Dividends"). The amount of the Special Dividends will be determined based on the audited accounts prepared in accordance with PRC GAAP and IFRS respectively, whichever is the lower, after deducting any contribution made by the Company to the statutory and discretionary reserve funds.

The Directors have preliminarily estimated that the total aggregate amount of the Pre-establishment Distribution and the Special Dividends to be RMB1,210.0 million.

38 ULTIMATE HOLDING COMPANY

The Company's directors regard China Coal Group, a state-owned enterprise established in the PRC, as being the ultimate holding company of the Company.

III FINANCIAL INFORMATION OF THE COMPANY

As of 30 June 2006, the Company had not yet been incorporated and hence there were no reserves available for distribution to the shareholders of the Company.

IV SUBSEQUENT FINANCIAL STATEMENTS

No audited financial statements have been prepared for the Company or any of the companies now comprising the Group in respect of any period subsequent to 30 June 2006. Save as disclosed in this report, no dividend or distribution has been declared, made or paid by the Company or any of the companies now comprising the Group in respect of any periods subsequent to 30 June 2006.

Yours faithfully,

PricewaterhouseCoopers
Certified Public Accountants
Hong Kong

The information sets out in this Appendix does not form part of the Accountants' Report prepared by PricewaterhouseCoopers, Certified Public Accountants, Hong Kong, the reporting accountants of the Company, as set out in Appendix I to this Prospectus, and is included herein for information only.

The unaudited pro forma financial information should be read in conjunction with the section headed "Financial Information" in this Prospectus and the Accountants' Report set out in Appendix I to this Prospectus.

A. UNAUDITED PRO FORMA ADJUSTED NET TANGIBLE ASSETS STATEMENT

The following is an illustrative and pro forma statement of adjusted net tangible assets of the Group which has been prepared on the basis of the notes set out below for the purpose of illustrating the effect of the Global Offering as if it had taken place on 30 June 2006. This unaudited pro forma statement of adjusted net tangible assets has been prepared for illustrative purposes only and because of its hypothetical nature, it may not give a true picture of the financial positions of the Group had the Global Offering been completed as of 30 June 2006 or at any future dates.

	Adjusted combined net tangible assets of the Group attributable to the equity holders of the Company as of 30 June 2006 RMB'000 (note 1)	Estimated net proceeds from the Global Offering RMB'000 (note 2)	Net assets not assumed by the Group RMB'000 (note 3)	Unaudited pro forma adjusted net tangible assets RMB'000	Unaudited pro forma adjusted net tangible assets per Share RMB (note 4)	Unaudited pro forma adjusted net tangible assets per Share HK$
Based on the Offer Price of HK$3.20 for each Offer Share...	5,021,163	10,021,236	(1,023,470)	14,018,929	1.25	1.24
Based on the Offer Price of HK$4.05 for each Offer Share...	5,021,163	12,707,241	(1,023,470)	16,704,934	1.49	1.47

Notes:

(1) The adjusted combined net tangible assets of the Group attributable to the equity holders of the Company as of 30 June 2006 is extracted from the Accountants' Report set out in Appendix I to the Prospectus, which is based on the audited combined net assets of the Group attributable to the equity holders of the Company as of 30 June 2006 of RMB5,035,250,000 with an adjustment for the intangible assets as of 30 June 2006 of RMB14,087,000.

(2) The estimated net proceeds from the Global Offering are based on an indicative Offer Price of HK$3.20 (equivalent to RMB3.23) and HK$4.05 (equivalent to RMB4.09) per H Share, respectively (after deducting the underwriting fees and other related expenses), and takes no account of any H Shares which may be issued pursuant to the Over-allotment Option. For the purpose of the estimated net proceeds from the Global Offering, the translation of Renminbi into HK dollars was made at the rate of RMB1.0087 to HK$1.00, the exchange rate prevailing on 30 November 2006 set by PBOC for foreign exchange transactions.

(3) Pursuant to the Restructuring, certain businesses and assets will be retained by China Coal Group and will be treated as a deemed distribution upon completion of the Restructuring on 22 August 2006. Consequently, the unaudited pro forma net tangible assets have been reduced accordingly after taking into account this deemed distribution, which is based on the financial information of the Retained Businesses as of 30 June 2006.

(4) The unaudited pro forma net tangible assets per Share is arrived at by dividing the unaudited pro forma adjusted net tangible assets by 11,246,374,000 Shares, being the number of shares in issue assuming that the Global Offering has been completed on 30 June 2006 but takes no account of any Shares which may be issued upon the exercise of the Over-allotment Option.

(5) In accordance with the "Provisional Regulation Relating to Corporate Reorganization of Enterprises and Related Management of State-owned Capital and Financial Treatment" (the "Provisional Regulations") issued by the Ministry of Finance, which became effective from 27 August 2002, the Company is required to make a distribution to China Coal Group, in an amount equals to the difference in the Company's net asset values as at 1 October 2005 and as at 21 August 2006 (being the date immediately prior to the date on which the Company was incorporated) (the "Pre-establishment Distribution") as determined based on the audited accounts prepared in accordance with PRC GAAP.

In addition, pursuant to the resolution of a shareholders' meeting dated 23 August 2006, the shareholder of the Company has resolved to make a special distribution to China Coal Group, in an amount equals to the distributable profit of the Company for the period from 22 August 2006 to the last day of the month prior to the listing of the Company's shares (the "Special Dividends"). The amount of the Special Dividends will be determined based on the audited accounts prepared in accordance with PRC GAAP and IFRS respectively, whichever is the lower, after deducting any contribution made by the Company to the statutory and discretionary reserve funds.

The Directors have preliminarily estimated that the total aggregate amount of the Pre-establishment Distribution and the Special Dividends to be RMB1,210.0 million.

The unaudited pro forma adjusted net tangible assets and the unaudited pro forma adjusted net tangible assets per Share have not taken into account the effect of the Pre-establishment Distribution and the Special Dividends. After taking into account the aforementioned distributions, the pro forma adjusted net tangible assets of the Group and the pro forma adjusted net tangible assets value per Share would be reduced.

(6) Details of the Group's property valuation as at 30 September 2006 are set out in Appendix V to this Prospectus. The Group will not incorporate any revaluation surplus/deficit in its financial statements for the year ending 31 December 2006. It is the Group's accounting policy to state its property, plant and equipment at cost less accumulated depreciation and any impairment losses rather than at revalued amounts. With reference to the valuation of the Group's properties as set out in Appendix V to this Prospectus, there was a revaluation deficit of the Group's properties of approximately RMB1,288.0 million. Had the properties been stated at such valuation, a reduction in depreciation and amortisation charge of approximately RMB51.0 million per annum would have been incurred.

(7) No adjustment has been made to the unaudited pro forma adjusted net tangible assets to reflect any trading result or other transaction of the Group entered into subsequent to 30 June 2006.

B. UNAUDITED PRO FORMA FORECAST EARNINGS PER SHARE

The following unaudited pro forma forecast earnings per Share in the year ending 31 December 2006 has been prepared on the basis of the notes set out below for the purpose of illustrating the effect of the Global Offering as if it had taken place on 1 January 2006. This unaudited pro forma forecast earnings per Share has been prepared for illustrative purpose only and, because of its hypothetical nature, it may not give a true picture of the financial results of the Group following the Global Offering.

Forecast consolidated profit attributable to equity holders of the Company in the year ending 31 December 2006 *(note 1)*	not less than RMB 3,147.1 million (approximately HK$3,114.4 million)
Unaudited pro forma forecast earnings per Share *(note 2)*	RMB0.280 (approximately HK$0.278)

Notes:

(1) The forecast consolidated profit attributable to equity holders of the Company in the year ending 31 December 2006 is extracted from the subsection headed "Profit Forecast" in the section headed "Financial Information" in this Prospectus. The bases and assumptions on which the above profit forecast in the year ending 31 December 2006 has been prepared are summarised in Appendix III to this Prospectus.

The directors of the Company have prepared the forecast consolidated profit attributable to equity holders of the Company in the year ending 31 December 2006 based on the audited combined results of the Group for the six months ended 30 June 2006, the unaudited consolidated results based on management accounts of the Group for the three months ended 30 September 2006 and a forecast of the consolidated results of the Group for the remaining three months ending 31 December 2006. The forecast has been prepared on the basis consistent in all material respects with the accounting policies presently adopted by the Group as set out in Note 3 of Section II of the Accountants' Report contained in Appendix I to this Prospectus.

(2) The calculation of the unaudited pro forma forecast earnings per Share is based on the forecast consolidated profit attributable to equity holders of the Company in the year ending 31 December 2006, assuming that the Global Offering was completed on 1 January 2006 and a total of 11,246,374,000 shares were in issue during the entire year. This calculation assumes that the Over-allotment Option will not be exercised.

C. REPORT FROM THE REPORTING ACCOUNTANTS

The following is the text of a report received from the reporting accountants, PricewaterhouseCoopers, Certified Public Accountants, Hong Kong in connection with the unaudited pro forma financial information of the Group for the purposes of incorporation in this Prospectus.

PRICEWATERHOUSECOOPERS

REPORT FROM REPORTING ACCOUNTANTS ON UNAUDITED PRO FORMA FINANCIAL INFORMATION TO THE DIRECTORS OF CHINA COAL ENERGY COMPANY LIMITED

We report on the unaudited pro forma financial information of China Coal Energy Company Limited (the "Company") and its subsidiaries (hereinafter collectively referred to as the "Group") set out on pages II-1 to II-2 under the headings of "Unaudited Pro Forma Adjusted Net Tangible Assets Statement" and "Unaudited Pro Forma Forecast Earnings Per Share" (collectively the "Unaudited Pro Forma Financial Information") in Appendix II to the Company's Prospectus dated 6 December 2006, in connection with the proposed initial public offering of the shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited (the "Prospectus"). The Unaudited Pro Forma Financial Information has been prepared by the directors of the Company (the "Directors"), for illustrative purposes only, to provide information about how the proposed initial public offering might have affected the relevant financial information of the Group. The basis of preparation of the Unaudited Pro Forma Financial Information is set out on pages II-1 to II-2 of Appendix II to the Prospectus.

Respective Responsibilities of Directors of the Company and Reporting Accountants

It is the responsibility solely of the Directors to prepare the Unaudited Pro Forma Financial Information in accordance with rule 4.29 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules") and Accounting Guideline 7 "Preparation of Pro Forma Financial Information for Inclusion in Investment Circulars" issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA").

It is our responsibility to form an opinion, as required by rule 4.29(7) of the Listing Rules, on the Unaudited Pro Forma Financial Information and to report our opinion to you. We do not accept any responsibility for any reports previously given by us on any financial information used in the compilation of the Unaudited Pro Forma Financial Information beyond that owed to those to whom those reports were addressed by us at the dates of their issue.

Basis of Opinion

We conducted our engagement in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 300 "Accountants' Reports on Pro Forma Financial Information in Investment Circulars" issued by the HKICPA. Our work, which involved no independent examination of any of the underlying financial information, consisted primarily of comparing the audited combined net assets of the Group attributable to equity holders of the Company as of 30 June 2006 and unaudited forecast consolidated

profit attributable to equity holders of the Company for the year ending 31 December 2006 with the accountants' report as set out in Appendix I to the Prospectus and profit forecast as set out in the section headed "Financial Information" in the Prospectus, respectively, considering the evidence supporting the adjustments and discussing the Unaudited Pro Forma Financial Information with the Directors.

We planned and performed our work so as to obtain the information and explanations we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Unaudited Pro Forma Financial Information has been properly compiled by the Directors on the basis stated, that such basis is consistent with the accounting policies of the Group and that the adjustments are appropriate for the purposes of the Unaudited Pro Forma Financial Information as disclosed pursuant to rule 4.29(1) of the Listing Rules.

Our work has not been carried out in accordance with auditing standards or other standards and practices generally accepted in the United States of America or auditing standards of the Public Company Accounting Oversight Board of the United States of America, and accordingly should not be relied upon as if it had been carried out in accordance with those standards and practices.

The Unaudited Pro Forma Financial Information is for illustrative purposes only, based on the judgements and assumptions of the Directors, and because of its hypothetical nature, it does not provide any assurance or indication that any event will take place in the future and may not be indicative of:

- the financial positions of the Group as at 30 June 2006 or any future dates, or
- the earnings per share of the Group for the year ending 31 December 2006 or any future periods.

Opinion

In our opinion:

(a) the Unaudited Pro Forma Financial Information has been properly compiled by the Directors on the basis stated;

(b) such basis is consistent with the accounting policies of the Group; and

(c) the adjustments are appropriate for the purposes of the Unaudited Pro Forma Financial Information as disclosed pursuant to rule 4.29(1) of the Listing Rules.

PricewaterhouseCoopers
Certified Public Accountants
Hong Kong, 6 December 2006

Forecast consolidated profit attributable to equity holders of the Company for the year ending 31 December 2006 is set out in the subsection headed "Profit Forecast" in the section headed "Financial Information" in this Prospectus.

A. BASES AND ASSUMPTIONS

Our Directors have prepared the forecast consolidated profit attributable to equity holders of the Company for the year ending 31 December 2006 based on the audited combined results of the Group for the six months ended 30 June 2006, the unaudited consolidated results based on management accounts of the Group for the three months ended 30 September 2006 and a forecast of the consolidated results of the Group for the remaining three months ending 31 December 2006. The profit forecast has been prepared on the following principal bases and assumptions:

- there will be no material changes in the existing political, legal, fiscal, market or economic conditions in the PRC, Hong Kong or any other countries or territories in which the Group currently operates or which are otherwise material to our business;
- there will be no changes in legislation, regulations or rules in the PRC, Hong Kong or any other countries or territories in which the Group operates or with which the Group has arrangements or agreements, which may materially adversely affect the Group's business or operations;
- there will be no material changes in inflation rates, interest rates or foreign exchange rates from those currently prevailing in the context of the Group's operations;
- there will be no material changes in the bases or applicable rates of taxation, surcharges or other government levies in the countries or territories in which the Group operates, except as otherwise disclosed in this Prospectus;
- there will be no wars, military incidents, pandemic diseases or natural disasters that would have a material impact on the Group's business and operating activities;
- the Group's operations will not be adversely affected by occurrences such as labor shortages and disputes, or any other factors outside the control of its management. In addition, the Group will be able to recruit enough employees to meet its operating requirements during the forecast period;
- the PRC Government will continue to adopt moderate macroeconomic and monetary policies similar to those of 2005, in order to maintain a consistent rate of economic growth; and
- there will be no material changes in coal prices and power tariff setting that will have a material adverse effect on the Group's business.

B. LETTER FROM THE REPORTING ACCOUNTANTS

The following is the text of a letter received from the reporting accountants, PricewaterhouseCoopers, Certified Public Accountants, Hong Kong in connection with the forecast consolidated profit attributable to equity holders of the Company for the year ending 31 December 2006 for the purposes of incorporation in this Prospectus.

PRICEWATERHOUSECOOPERS

羅兵咸永道會計師事務所

PricewaterhouseCoopers
22nd Floor, Prince's Building
Central, Hong Kong

6 December 2006

The Directors
China Coal Energy Company Limited

China International Capital Corporation (Hong Kong) Limited
Citigroup Global Markets Asia Limited
Morgan Stanley Dean Witter Asia Limited

Dear Sirs,

We have reviewed the calculations and accounting policies adopted in arriving at the forecast consolidated profit attributable to equity holders of China Coal Energy Company Limited (the "Company") for the year ending 31 December 2006 (the "Profit Forecast") as set out in the subsection headed "Profit Forecast" in the section headed "Financial Information" in the prospectus of the Company dated 6 December 2006 (the "Prospectus").

We conducted our work in accordance with Auditing Guideline 3.341 "Accountants' Report on Profit Forecasts" issued by the Hong Kong Institute of Certified Public Accountants.

The Profit Forecast, for which the directors of the Company (the "Directors") are solely responsible, has been prepared by the Directors based on the audited combined results of the Company and its subsidiaries (hereinafter collectively referred to as the "Group") for the six months ended 30 June 2006, the unaudited consolidated results based on management accounts of the Group for the three months ended 30 September 2006 and a forecast of the consolidated results of the Group for the remaining three months ending 31 December 2006 on the basis that the current group structure had been in existence throughout the whole financial year ending 31 December 2006.

In our opinion, the Profit Forecast, so far as the calculations and accounting policies are concerned, has been properly compiled in accordance with the bases and assumptions made by the Directors as set out on page III-1 of Appendix III to the Prospectus, and is presented on a basis consistent in all material respects with the accounting policies presently adopted by the Group as set out in Note 3 of Section II of our report dated 6 December 2006, the text of which is set out in Appendix I to the Prospectus.

Yours faithfully,

PricewaterhouseCoopers
Certified Public Accountants
Hong Kong

C. LETTER FROM THE JOINT SPONSORS

China International Capital Corporation (Hong Kong) Limited	Citigroup Global Markets Asia Limited	Morgan Stanley Dean Witter Asia Limited
Suite 2307, 23rd Floor One International Finance Centre, 1 Harbour View Street Central, Hong Kong	50/F, Citibank Tower Citibank Plaza 3 Garden Road Central, Hong Kong	30th Floor Three Exchange Square Central, Hong Kong

The Directors
China Coal Energy Company Limited

6 December 2006

Dear Sirs,

We refer to the forecast consolidated profit attributable to equity holders of China Coal Energy Company Limited (the "Company") and its subsidiaries for the year ending 31 December 2006 (the "Profit Forecast") as set out in the Prospectus issued by the Company dated 6 December 2006 (the "Prospectus").

We have discussed with you the bases and assumptions made by the directors of the Company as set out in Appendix III to the Prospectus upon which the Profit Forecast has been made. We have also considered the letter dated 6 December 2006 addressed to yourselves and ourselves from PricewaterhouseCoopers, Certified Public Accountants, Hong Kong, regarding the accounting policies and calculations upon which the Profit Forecast has been made.

On the basis of the information comprising the Profit Forecast and on the basis of the accounting policies and calculations adopted by you and reviewed by PricewaterhouseCoopers, Certified Public Accountants, Hong Kong, we are of the opinion that the Profit Forecast, for which you as directors of the Company are solely responsible, has been made after due and careful enquiry.

Your faithfully,

For and on behalf of

China International Capital Corporation (Hong Kong) Limited	Citigroup Global Markets Asia Limited	Morgan Stanley Dean Witter Asia Limited
Zhang Xiaoming Managing Director	Frank Slevin Managing Director	Terence F. Keyes Managing Director

In accordance with relevant rules and regulations applicable to enterprises whose shares are listed on a stock exchange in the People's Republic of China ("PRC"), Shanghai Datun Energy Resources Co., Ltd. ("Shanghai Datun"), a 62.43% owned subsidiary of the Group whose shares are listed on the Shanghai Stock Exchange of the PRC, has published its unaudited interim financial report for the nine months ended 30 September 2006 on 26 October 2006.

The following is the text of the unaudited interim financial information of Shanghai Datun, which comprises the audited balance sheet as at 31 December 2005 and unaudited balance sheet as at 30 September 2006; unaudited income statements for the three and the nine months ended 30 September 2005 and 2006; unaudited cash flow statements for the nine months ended 30 September 2005 and 2006 and the notes to the unaudited interim financial statements of Shanghai Datun and its subsidiaries (collectively referred to as "Shanghai Datun Group"), prepared in accordance with the Accounting Standard for Business Enterprises "Interim Financial Reporting" issued by the Ministry of Finance of the PRC. The unaudited interim financial information also includes a reconciliation of the net profit for the three months ended 30 September 2006 and the owners' equity as at 30 September 2006 of Shanghai Datun Group as reported in the interim financial information, which has been prepared in accordance with the relevant accounting principles and financial regulations applicable to enterprises established in the PRC (the "PRC GAAP") to amounts to be reported under the accounting policies of the Group, which comply with International Financial Reporting Standards ("IFRS") promulgated by the International Accounting Standards Board for the purpose of inclusion in this prospectus.

(d) Notes to the unaudited interim financial statements
(prepared in accordance with PRC GAAP)

1. Background and principal activities

Shanghai Datun is a joint stock limited company incorporated in Shanghai, the People's Republic of China (the "PRC") on 29 December 1999 and its A shares have been listed on the Shanghai Stock Exchange of the PRC. As at the date of the interim financial report of Shanghai Datun Group for the nine months ended 30 September 2006, China Coal Energy Company Limited held 62.43% equity interests in Shanghai Datun.

Shanghai Datun Group is principally engaged in the coal mining, processing, sales and transportation of coal and its related products and as well as production and sales of aluminum and electric power.

2. Basis of preparation and principal accounting policies

(a) Basis of preparation

Shanghai Datun has prepared its financial statements in accordance with the accounting principles and financial regulations applicable to enterprises established in the PRC (the "PRC GAAP").

(b) Unaudited interim financial statements

The financial year adopted by Shanghai Datun is from 1 January to 31 December. The directors of Shanghai Datun have prepared its unaudited interim financial statements for the three months and the nine months ended 30 September 2006 in accordance with Accounting Standard for Business Enterprises "Interim Financial Reporting" issued by the Ministry of Finance of the PRC.

(c) Principal accounting policies

The principal accounting policies of Shanghai Datun Group used to prepare the unaudited interim financial statements are consistent with those disclosed in Shanghai Datun's 2005 annual report, which comply with PRC GAAP and was published on the internet web site of the Shanghai Stock Exchange of the PRC on 18 February 2006.

(d) Statutory PRC auditors

The consolidated financial statements of Shanghai Datun Group for the year ended 31 December 2005 were audited by Tian Heng Certified Public Accountants Co., Ltd., which was registered in Jiangsu province, the PRC.

3. Segment information

Revenues and cost from main operations based on the type of products and services are as follows:

	Group			
	Nine months ended 30 September 2006		Nine months ended 30 September 2005	
	Revenues from main operations	Cost of main operations	Revenues from main operations	Cost of main operations
	RMB'000 (unaudited)	RMB'000 (unaudited)	RMB'000 (unaudited)	RMB'000 (unaudited)
Coal	2,161,752	1,274,295	2,279,199	1,406,565
Aluminium	716,382	658,813	340,064	325,610

	3,205,625	2,181,291	2,839,535	1,941,823

	Group			
	Three months ended 30 September 2006		Three months ended 30 September 2005	
	Revenues from main operations	Cost of main operations	Revenues from main operations	Cost of main operations
	RMB'000 (unaudited)	RMB'000 (unaudited)	RMB'000 (unaudited)	RMB'000 (unaudited)
Coal	651,633	406,864	685,846	468,417
Aluminium	308,578	288,102	168,098	160,018
Electric power	58,199	27,596	76,056	98,548
Transportation of coal and others	39,671	37,685	38,507	21,565
	1,058,081	760,247	968,507	748,548

4. Reconciliation of net profit and owners' equity of Shanghai Datun Group for the three months ended and as at 30 September 2006 as reported in the unaudited interim financial statements and the accounting policies of the Group, which comply with IFRS

	Note	Net profit for the three months ended 30 September 2006 RMB'000 (unaudited)	Shareholders' equity as at 30 September 2006 RMB'000 (unaudited)
As reported in the interim financial statements		72,027	2,299,258
Provision for close down, restoration and environmental costs as required under IFRS	(a)	(1,371)	(14,670)
Reversal of future development fund and safety fund expenses not yet incurred under IFRS	(b)	23,071	109,798
Effect of different depreciation policies adopted for mining structures	(c)	3,355	43,455
Recognition of deferred taxation	(d)	(2,988)	71,276
Reversal of revaluation surplus in connection with restructuring of the Company under relevant PRC regulations	(e)	4,996	(238,095)
Effect of early retirement benefits as accounted for under IFRS	(f)	340	(8,457)
Reversal of provision of staff related cost made in prior years		—	98,625
Classification of minority interests as shareholders' equity under IFRS		1,065	53,585
Others		4,515	72,335
As reported under the accounting policies of the Group		105,010	2,487,110

Notes:

(a) Under IFRS, provisions for close down, restoration and environmental costs for coal mines are capitalized when the obligations to pay are established and are depreciated over the useful lives of the coal mines using the unit-of-production method. Under PRC GAAP, such costs are charged to income statement when they are incurred.

(b) Under IFRS, future development fund and safety fund expenses as required under relevant rules of regulations in the PRC to the extent not yet incurred are reversed.

(c) Shanghai Datun Group has adopted a pre-determined fixed amount of depreciation per unit of raw coal produced for mining structures under PRC GAAP while the Group has adopted the unit-of-production method under IFRS. Adjustment was made to account for the different depreciation methods adopted.

(d) Under IFRS, deferred taxation is required to be provided in full using liability method.

(e) Under the relevant rules and regulations in the PRC, businesses acquired from Shanghai Datun's parent company are recorded in the unaudited interim financial statements based on a PRC valuation. The Group has adopted a policy of recognizing assets and liabilities acquired from its parent company at their historical cost and the PRC valuation recorded in the unaudited interim financial statements is reversed for IFRS purposes.

(f) In the unaudited interim financial statements, early retirement benefits have been recognised on an as-incurred basis. Under IFRS, earlier retirement benefits have been recognised in full upon signing of the relevant early retirement agreements.

B. REPORT FROM THE REPORTING ACCOUNTANTS

The following is the text of a report received from the reporting accountants, PricewaterhouseCoopers, Certified Public Accountants, Hong Kong in connection with the unaudited interim financial Information of Shanghai Datun Energy Resources Co., Ltd. for the three months and the nine months ended 30 September 2006 for the purposes of incorporation in this Prospectus.

REVIEW REPORT ON THE UNAUDITED INTERIM FINANCIAL INFORMATION OF SHANGHAI DATUN TO THE DIRECTORS OF CHINA COAL ENERGY COMPANY LIMITED

Introduction

We have been instructed by China Coal Energy Company Limited to review the unaudited interim financial information of Shanghai Datun Energy Resources Co., Ltd. ("Shanghai Datun") and its subsidiaries (hereinafter collectively referred to as the "Shanghai Datun Group") set out on pages IV-1 to IV-9 which comprises audited balance sheet as at 31 December 2005, unaudited balance sheet as at 30 September 2006, unaudited income statements for the three and the nine months ended 30 September 2005 and 2006, unaudited cash flow statements for the nine months ended 30 September 2005 and 2006 and the notes to these unaudited interim financial statements (collectively referred to as the "PRC Interim Financial Information").

Respective Responsibilities of Directors of Shanghai Datun and of China Coal Energy Company Limited and Accountants

The PRC Interim Financial Information is prepared based on the unaudited interim financial statements of Shanghai Datun Group. The China Securities Regulatory Commission of the People's Republic of China (the "PRC") requires enterprises whose securities are listed on any stock exchange in the PRC to prepare interim financial statements, which comply with Accounting Standard for Business Enterprises — "Interim Financial Reporting" issued by the Ministry of Finance of the PRC and the relevant provisions thereof. The interim financial statements are the responsibility of, and have been approved by, the directors of Shanghai Datun. The PRC Interim Financial Information is the responsibility of the directors of China Coal Energy Company Limited.

It is our responsibility to form an independent conclusion, based on our review, on the PRC Interim Financial Information.

Review Work Performed

We conducted our review with reference to Statement of Auditing Standards 700 "Engagements to Review Interim Financial Reports" issued by the Hong Kong Institute of Certified Public Accountants. A review consists principally of making enquiries of management of Shanghai Datun Group and China Coal Energy Company Limited, and applying analytical procedures to the PRC Interim Financial Information and based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review excludes audit procedures such as tests of controls and verification of assets, liabilities and transactions. It is substantially less in scope that an audit and therefore provides a lower

level of assurance than an audit. Accordingly we do not express an audit opinion on the PRC Interim Financial Information.

Review Conclusion

On the basis of our review which does not constitute an audit, we are not aware of any material modifications that should be made to the PRC Interim Financial Information for the three months and the nine months ended 30 September 2005 and 2006.

6 December 2006

The Directors
China Coal Energy Company Limited
1 Huang Si Da Jie
Chaoyang District
Beijing 100011
The People's Republic of China

Dear Sirs,

In accordance with your instructions for us to value the properties of which majority is located in the People's Republic of China (the "PRC") and the remainder is located in Hong Kong and Australia held by China Coal Energy Company Limited (hereinafter referred to as the "Company") and its subsidiaries and its jointly controlled entity (together referred to as the "Group"), we confirm that we have carried out inspections, made relevant enquiries and obtained such further information as we consider necessary for the purpose of providing you with our opinion of values of such properties as of 30 September 2006. The Company was formed as a result of the Restructuring (please refer to "Restructuring" as stated in the section of Definitions in this Prospectus) launched by China National Coal Group Corporation (hereinafter referred to as "ChinaCoal Group"). According to the Restructuring Agreement entered into between ChinaCoal Group and the Company on 5 September 2006 (the "Restructuring Agreement"), all the property interests held by the Group were transferred by ChinaCoal Group as part of the Restructuring.

Our valuation of each of the properties is our opinion of its market value which we would define as intended to mean "The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion."

The market value is the best price reasonably obtainable in the market by the seller and the most advantageous price reasonably obtainable in the market by the buyer. This estimate specifically excludes an estimated price inflated or deflated by special terms or circumstances such as atypical financing, sale and leaseback arrangements, special considerations or concessions granted by anyone associated with the sale, or any element of special value. The market value of a property is also estimated without regard to costs of sale and purchase, and without offset for any associated taxes.

The property interests in Group I are held by the Group for owner occupation. Due to the specific purposes for which the buildings and structures in Group I have been constructed, there are no readily identifiable market comparables available, thus the buildings and structures cannot be valued on the basis of direct comparison. They have therefore been valued on the basis of their depreciated replacement cost. We would define depreciated replacement cost to be our opinion of the land value in its existing use together with an estimate of the new replacement costs of the buildings and structures, including fees and finance charges, from which deductions are then made to allow for age, condition and functional obsolescence. The depreciated replacement cost approach generally provides the most reliable indication of value for property in the absence of a known market based on comparable sales.

Regarding the land use rights transferred to the Group under the Restructuring Agreement, we have classified the land use rights into five categories by reference to its title documents obtained and the legal opinion of the Group's PRC legal adviser, Jia Yuan Law Firm. The five categories of the land use rights are set out below:

(1) The land use rights which ChinaCoal Group or its subsidiaries have obtained granted land use rights certificates ("Granted Land");

(2) The land use rights which ChinaCoal Group or its subsidiaries have obtained allocated land use rights certificates and have been authorized by The Ministry of Land and Resources of the PRC (the "MLR") to manage and operate, including contributing these parcels of allocated land as capital in the Company ("Authorized Allocated Land");

(3) The land use rights which the relevant subsidiaries of ChinaCoal Group have obtained allocated land use rights certificates and have been authorized by the MLR to retain the land use rights of these parcels of land ("Retained Allocated Land");

(4) The land use rights which ChinaCoal Group has obtained allocated land use rights certificates but such parcels of land are not included in the authorized allocated land and retained allocated land respectively referred to in sub-paragraphs (2) and (3) above ("Allocated Land"); and

(5) The land that the Group is in the process of applying for the land use rights certificates ("Without Title Land").

The property interests in Group II which are leased by the Group have no commercial values due to the prohibition against assignment or sub-letting or otherwise due to the lack of substantial profit rents.

We have been provided with copies of extracts of title documents relating to the properties. However, we have not inspected the original documents to verify the ownership or to verify any amendments which may not appear on the copies handed to us. We have relied to a considerable extent on information given by the Group and its legal adviser on PRC laws, regarding to the titles and other legal matters relating to the properties and have accepted advice given to us on such matters as planning approvals or statutory notices, easements, tenure, particulars of occupancy, identification of the properties, floor and site areas and all other

relevant information. Dimensions, measurements and areas included in the valuation certificate are based on information contained in the documents provided to us and are therefore only approximations. We have not been able to carry out on-site measurements to verify the correctness of the site and floor areas of the properties and we have assumed that the site and floor areas shown on the documents handed to us are correct.

We have no reason to doubt the truth and accuracy of the information provided to us by the Group which is material to the valuation. We were also advised by the Group that no material facts have been omitted from the information provided. We consider that we have been provided with sufficient information to reach an informed view.

We have inspected the exterior and, where possible, the interior of the properties valued. In the course of our inspection, we did not note any serious defects. However, no structural survey has been made, we are therefore unable to report that the properties are free of rot, infestation, or any other structural defects. No test has been carried out to any of the services. Moreover, we have not carried out any site investigations to determine the suitability of the ground conditions and the services etc, for any future development. Our valuation is prepared on the assumption that these aspects are satisfactory and that no extraordinary expenses or delays will be incurred during the construction period.

No allowance has been made in our valuation for any charges, mortgages or amounts owing on any property or for any expenses or taxation which may be incurred in effecting a sale. Unless otherwise stated, it is assumed that the properties are free from encumbrances, restrictions and outgoings of an onerous nature which could affect their values.

In preparing our valuation report, we have complied with the relevant provisions of the Companies Ordinance (Chapter 32 of the Laws of Hong Kong) and all the requirements under Chapter 5, and Practice Note 12 and 16 to the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited except for those in respect of which exemptions or waivers have been applied for as described under "Business — Properties" of this Prospectus. We have had also regard to the requirements contained in Valuation Standards on Properties (First Edition 2005) published by The Hong Kong Institute of Surveyors.

Unless otherwise stated, all money amounts stated are in Renminbi (RMB). In valuing property interests in Group II, we have adopted exchange rates of AU$1 to RMB5.9035 and HK$1 to RMB1.0143 which were prevailing as of the date of valuation.

We enclose herewith our summary of values and valuation certificate.

Yours faithfully,
For and on behalf of
Savills Valuation and Professional Services Limited

VALUATION CERTIFICATE

Group I — Property interests held by the Group for owner occupation in the PRC

	Property	Description and tenure	Particulars of occupancy	Market value in existing state as of 30 September 2006
				RMB
1.	Properties held by 華晉焦煤有限責任公司 (Huajin Coking Coal Co., Ltd.) in Shanxi province in the PRC	The properties comprise 2 coal mines and ancillary facilities which are situated on 19 parcels of land with a total site area of approximately 1,044,463.83 sq m (11,242,609 sq ft) located in Shanxi province. The properties comprise 164 buildings, structures and ancillary facilities with a total gross floor area of approximately 150,356.06 sq m (1,618,432 sq ft), completed in various stages between 1991 and 2006. Details of the gross floor areas and uses of the properties are as follows: Approximate Gross Floor Area Use — sq m — sq ft Production — 64,619.40 — 695,563 Office — 13,195.44 — 142,036 Warehouse — 3,706.38 — 39,895 Ancillary facilities — 68,834.84 — 740,938 **Total** — **150,356.06** — **1,618,432** The land use rights of the properties are held for various terms with details as shown in note (1).	The properties are occupied by the Group for production, office, warehouse and other ancillary facilities uses.	78,450,000 (Market value attributable to the Group: 39,220,000)

Notes:

(1) 華晉焦煤有限責任公司 (Huajin Coking Coal Co., Ltd.) ("Huajin Coking"), of which the company owns a 50% equity interest, has 19 parcels of land with a total site area of approximately 1,044,463.83 sq m. Among the land, 2 parcels of land with a total area of approximately 124,208.10 sq m are the Granted Land, 11 parcels of land with a total area of approximately 889,639.99 sq m are the Retained Allocated Land, and the remaining 6 parcels of land with a total area of approximately 30,615.74 sq m are the Without Title Land.

(2) According to the information provided by the Group, the buildings of the properties held by Huajin Coking are as follows:

The land which the buildings erected thereon	No. of building(s)	Approximate gross floor area ("GFA") (sq m)	GFA of building(s) with building ownership certificate ("BOC") (sq m)	GFA of building(s) without BOC (sq m)
Granted Land	21	43,475.90	43,475.90	—
Retained Allocated Land	128	98,514.38	71,546.24	26,968.14
Without Title Land	15	8,365.78	1,351.41	7,014.37
Total	164	150,356.06	116,373.55	33,982.51

(3) We have been provided with a copy of the legal opinion on the title to the properties prepared by Jia Yuan Law Firm, the Group's PRC legal adviser, which contains, inter-alia, the following information:

Land Use Rights

The Granted Land and the Retained Allocated Land are held by the Group legally under the PRC laws. The Group has the rights to use such land legally under the PRC laws.

Regarding the Granted Land, the Group has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the land of the properties by other legal means during the remaining land use rights terms.

Regarding the Retained Allocated Land, the Group only has the rights to occupy and use the land of the properties internally. After completion of land granted formality and settlement of land grant fee, the Group has the rights to transfer, lease or mortgage the land of the properties.

As of the issuance date of this legal opinion, the above land use rights of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

Regarding the Without Title Land and according to the Restructuring Agreement, ChinaCoal Group has undertaken to provide all necessary assistance to the Group in order to apply for the state-owned land use rights certificates in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

Buildings

Regarding the buildings with building ownership certificates erected on the Granted Land, the Retained Allocated Land and the Without Title Land, the Group is the solely owner of these buildings.

Regarding the buildings erected on the Granted Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings.

Regarding the buildings erected on the Retained Allocated Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings by other legal means once completion of land granted formality and settlement of land grant fee.

Regarding the buildings erected the Without Title Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings by other legal means once the Group has completed the granted land formality for the land on which the buildings are erected.

Regarding the buildings without building ownership certificates erected on the Retained Allocated Land and the Without Title Land, once relevant building ownership certificates obtained by the Group, the rights for the Group to transfer, grant, mortgage or dispose of the buildings by other legal means shall be entitled to be consistent with those as stated above.

ChinaCoal Group has undertaken to provide all necessary assistance in order to apply for the building ownership certificates in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

As of the issuance date of this legal opinion, the buildings of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

(4) Due to the restricted rights to the aforesaid buildings erected on the Retained Allocated Land with a total gross floor area of approximately 98,514.38 sq m and insufficient title proof to those buildings erected on the Without Title Land with a total gross floor area of approximately 8,365.78 sq m, we have attributed no commercial value to these buildings. For indication purpose, as of the date of valuation, the depreciated replacement cost of these buildings (excluding the land) was approximately RMB80,080,000.

(5) In the course of our valuation, we have attributed no commercial value to the Retained Allocated Land portion and Without Title Land portion of the properties due to the fact that these portions of the properties are not freely transferable in the market.

Total	261	321,701.81	314,967.81	6,734.00

(3) We have been provided with a copy of the legal opinion on the title to the properties prepared by Jia Yuan Law Firm, the Group's PRC legal adviser, which contains, inter-alia, the following information:

Land Use Rights

The Granted Land, the Authorized Allocated Land and the Retained Allocated Land are held by the Group legally under the PRC laws. The Group has the rights to use such land legally under the PRC laws.

Regarding the Granted Land, the Group has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the land of the properties by other legal means during the remaining land use rights terms.

Regarding the Authorized Allocated Land, the Group only has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the land of the properties by other legal means internally. Caused the land rezoned to other use or transferred to entities outside the Group, relevant land grant fee shall be paid for completion of rezoning or transfer.

Regarding the Retained Allocated Land, the Group only has the rights to occupy and use the land of the properties internally. After completion of land granted formality and settlement of land grant fee, the Group has the rights to transfer, lease or mortgage the land of the properties.

As of the issuance date of this legal opinion, the above land use rights of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third party interest.

Regarding the Allocated Land and the Without Title Land, and according to the Restructuring Agreement, ChinaCoal Group has undertaken to provide all necessary assistance to the Group in order to apply for the state-owned land use rights certificates in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

Buildings

Regarding the buildings with building ownership certificates erected on the Granted Land, the Authorized Allocated Land, the Retained Allocated Land and the Allocated Land, the Group is the solely owner of these buildings.

Regarding the buildings erected on the Granted Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings.

Regarding the buildings erected on the Authorized Allocated Land with building ownership certificates, the Group only has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the buildings by other legal means internally. Caused the buildings are transferred to the entities outside the Group, relevant land grant fee of the land shall be paid for completion of the transfer.

Regarding the buildings erected on the Retained Allocated Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings by other legal means once completion of land granted formality and settlement of land grant fee.

Regarding the buildings erected on the Allocated Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings by other legal means once the Group has completed the granted land formality for the land on which the buildings are erected.

Regarding the buildings without building ownership certificate erected on the Authorized Allocated Land and the Retained Allocated Land, once relevant building ownership certificates obtained by the Group, the rights for the Group to transfer, grant, mortgage or dispose of the buildings by other legal means shall be consistent with those as stated above.

ChinaCoal Group has undertaken to provide all necessary assistance in order to apply for the building ownership certificates in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

As of the issuance date of this legal opinion, the above buildings of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

(4) Due to restricted rights to the aforesaid buildings erected on the Retained Allocated Land with a total gross floor area of approximately 128,535.68 sq m, and insufficient title proof to those buildings erected on the Allocated Land with a total gross floor area of approximately 7,859.25 sq m, we have attributed no commercial value to these buildings. For indication purpose, as of the date of valuation, the depreciated replacement cost of these buildings (excluding the land) was approximately RMB318,820,000.

(5) In the course of our valuation, we have attributed no commercial value to the Retained Allocated Land portion, the Allocated Land portion and the Without Title Land portion of the properties due to the fact that these portions of the properties are not freely transferable in the market.

A total construction cost of RMB79,287,362.72 has been incurred as of the valuation date. They are scheduled for completion in 2006. The land use rights of the properties are held for various terms with details as shown in note (1).	The properties are occupied by the Group for production, office, warehouse and other ancillary facilities uses.	994,650,000 (Market value attributable to the Group: 571,190,000)

Notes:

(1) 上海大屯能源股份有限公司 (Shanghai Datun Energy Resources Co., Ltd.), a 62.43% owned subsidiary of the Company ("Shanghai Datun Energy") has 57 parcels of land with a total site area of approximately 1,748,328.86 sq m. Among the land, 56 parcels of land with a total area of approximately 1,748,328.86 sq m are the Granted Land and the remaining one parcel of land is the Allocated Land.

(2) According to the information provided by the Group, Shanghai Datun Energy also leases 93 parcels of land with a total site area of approximately 2,109,857.91 sq m (the "Leased Land") for the construction of 100 buildings.

(3) According to the information provided by the Group, the buildings of the properties held by "Shanghai Datun Energy" are as follows:

The land which the buildings erected thereon	No. of building(s)	Approximate gross floor area ("GFA") (sq m)	GFA of building(s) with building ownership certificate ("BOC") (sq m)	GFA of building(s) without BOC (sq m)
Granted Land	267	272,447.68	266,983.63	5,464.05
Allocated Land	1	838.18	838.18	—
Leased Land	100	48,669.84	48,669.84	—
Total	368	321,955.70	316,491.65	5,464.05

(4) We have been provided with a copy of the legal opinion on the title to the properties prepared by Jia Yuan Law Firm, the Group's PRC legal adviser, which contains, inter-alia, the following information:

Land Use Rights

The Granted Land are held by the Group legally under the PRC laws. The Group has the rights to use such land legally under the PRC laws.

Regarding the Granted Land, the Group has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the land of the properties by other legal means during the remaining land use rights terms.

As of the issuance date of this legal opinion, the above land use rights of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

Regarding the Allocated Land and according to the Restructuring Agreement, ChinaCoal Group has undertaken to provide all necessary assistance to the Group in order to apply for the state-owned land use rights certificates in 12 months from the date of establishment of the Company. ChinaCoal Group also has undertaken to compensate against all losses due to any issue arising from failing to obtain the state-owned land use rights certificates, but except for settlement of land grant fee which shall be paid by the Group. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding

Regarding the Leased Land, some of the leases for the Leased Land is legal and valid as the land has granted land use rights certificates. To the remaining leases for the Leased Land, the land has no granted land use rights certificates, ChinaCoal Group has undertaken to make the land be used by the Group legally in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

Buildings

Regarding the buildings with building ownership certificates erected on the Granted Land, the Allocated and the Leased Land, the Group is the solely owner of these buildings.

Regarding the buildings erected on the Granted Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings.

Regarding the buildings erected on the Leased Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings by other legal means by getting prior notice from the lessors.

Regarding the buildings erected on the Allocated Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings by other legal means once the Group has completed the granted land formality for the land on which the buildings are erected.

Regarding the buildings without building ownership certificates erected on the Granted Land, once relevant building ownership certificates obtained by the Group, the rights for the Group to transfer, grant, mortgage or dispose of the buildings by other legal means shall be entitled to be consistent with those as stated above.

As of the issuance date of this legal opinion, the above land use rights of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

(5) Due to insufficient title proof to the aforesaid buildings erected on the Leased Land with a total gross floor area of approximately 48,669.84 sq m, and those erected on the Allocated Land with a total gross floor area of approximately 838.18 sq m, we have attributed no commercial value to these buildings. For indication purpose, as of the date of valuation, the depreciated replacement cost of these buildings (excluding the land) was approximately RMB27,990,000.

(6) In the course of our valuation, we have attributed no commercial value to the Allocated Land and the Leased Land of the properties due to the fact that this portion of the properties is not freely transferable in the market.

6.	Properties held by 華光資源有限公司 (Sunfield Resources Pty. Ltd.) in Shanxi and Shaanxi provinces in the PRC	The properties comprise a coal mine and ancillary facility which is situated on 6 parcels of land with a total site area of approximately 429,636.21 sq m (4,624,604sq ft) located in Shanxi and Shaanxi provinces. The properties comprise 90 buildings, structures and ancillary facilities with a total gross floor area of approximately 52,300.04 sq m (562,958sq ft) completed in various stages between 1989 and 2004. Details of the gross floor areas and uses of the properties are as follows: Approximate Gross Floor Area Use — sq m — sq ft Production 24,323.33 261,816 Office 8,175.53 88,002 Warehouse 2,894.87 31,161 Ancillary facilities 16,906.31 181,979 **Total** **52,300.04** **562,958** The land use rights of the properties are held for various terms with details as shown in note (1).	The properties are occupied by the Group for production, office, warehouse and other ancillary facilities uses.	42,530,000 (Market value attributable to the Group: 23,390,000)

Notes:

(1) 華光資源有限公司(Sunfield Resources Pty. Ltd.) ("Sunfield Resources"), a 100% owned subsidiary of the Company, has 2 parcels of the Granted Land with a total site area of approximately 87,944.40 sq m.

(2) According to the information provided by the Group, Sunfield Resources also leases 4 parcels of land with a site area of approximately 341,691.81sq m (the "Leased Land") for the construction of its 52 owned buildings.

(3) According to the information provided by the Group, the buildings of the properties held by Sunfield Resources are as follows:

The land which the buildings erected thereon	No. of building(s)	Approximate gross floor area ("GFA") (sq m)	GFA of building(s) with building ownership certificate ("BOC") (sq m)	GFA of building(s) without BOC (sq m)
Granted Land	38	14,692.24	14,196.24	496.00
Leased Land	52	37,607.80	10,561.12	27,046.68
Total	90	52,300.04	24,757.36	27,542.68

(4) We have been provided with a copy of the legal opinion on the title to the properties prepared by Jia Yuan Law Firm, the Group's PRC legal adviser, which contains, inter-alia, the following information:

Land Use Rights

The Granted Land are held by the Group legally under the PRC laws. The Group has the rights to use such land legally under the PRC laws.

Regarding the Granted Land, the Group has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the land of the properties by other legal means during the remaining land use rights terms.

As of the issuance date of this legal opinion, the above land use rights of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

Regarding the Leased Land, the lessor of the land has not obtained approval from the relevant land administration authorities for the land lease. The leases of the Leased Land are legal and valid. ChinaCoal Group has undertaken to legalize the leases of the land used by the Group legally in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

Buildings

Regarding the buildings with building ownership certificates erected on the Granted Land and the Leased Land, the Group is the solely owner of these buildings.

Regarding the buildings erected on the Granted Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings.

Regarding the buildings erected on the Leased Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings by other legal means by getting prior notice from the lessors.

Regarding the buildings without building ownership certificates erected on the Granted Land and the Leased Land, once relevant building ownership certificates obtained by the Group, the rights for the Group to transfer, grant, mortgage or dispose of the buildings by other legal means shall be consistent with those as stated above.

ChinaCoal Group has undertaken to provide all necessary assistance to the Group in order to apply for the building ownership certificates in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

As of the issuance date of this legal opinion, the buildings of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

(5) Due to insufficient title proof to the aforesaid buildings erected on Leased Land with a total gross floor area of approximately 37,607.80 sq m, we have attributed no commercial value to these buildings. For indication purpose, as of the date of valuation, the depreciated replacement cost of these buildings (excluding the land) was approximately RMB13,090,000.

(6) In the course of our valuation, we have attributed no commercial value to the Leased Land portion of the properties due to the fact that this portion of the properties is not freely transferable in the market.

The properties comprise 21 buildings, structures and ancillary facilities with a total gross floor area of approximately 10,659.53 sq m (114,739 sq ft) completed in various stages between 1985 and 2005. Details of the gross floor areas and uses of the properties are as follows: Approximate Gross Floor Area Use — sq m — sq ft Production 350.30 3,771 Office 6,019.24 64,791 Warehouse 127.41 1,371 Ancillary facilities 4,162.58 44,806 **Total 10,659.53 114,739** The land use rights of the properties are held for various terms with details as shown in note (1).	The properties are occupied by the Group for production, office, warehouse and other ancillary facilities uses.	22,580,000 (Market value attributable to the Group: 22,580,000)

Notes:

(1) 中國煤炭工業秦皇島進出口有限公司 (China National Coal Industry Qinhuangdao Imp. & Exp. Co., Ltd.) ("Qinhuangdao Company"), a 100% owned subsidiary of the Company, has 6 parcels of land with a total site area of approximately 17,290.79 sq m. Among the land, a parcel of land with an area of approximately 5,247.25 sq m is the Authorized Allocated Land, 2 parcels of land with a total area of approximately 11,973.61 sq m are the Granted Land, a parcel of land with an area of approximately 69.93 sq m is the Allocated Land and the remaining 2 parcels of land are the Without Title Land.

(2) According to the information provided by the Group, the buildings of the properties held by Qinhuangdao Company are as follows:

The land which the buildings erected thereon	No. of building(s)	Approximate gross floor area ("GFA") (sq m)	GFA of building(s) with building ownership certificate ("BOC") (sq m)	GFA of building(s) without BOC (sq m)
Granted Land	11	7,004.17	6,246.24	757.93
Authorized Allocated Land	7	2,968.43	2,618.13	350.30
Allocated Land	1	349.65	349.65	—
Without Title Land	2	337.28	—	337.28
Total	21	10,659.53	9,214.02	1,445.51

(3) We have been provided with a copy of the legal opinion on the title to the properties prepared by Jia Yuan Law Firm, the Group's PRC legal adviser, which contains, inter-alia, the following information:

Land Use Rights

The Granted Land and the Authorized Allocated Land are held by the Group legally under the PRC laws. The Group has the rights to use such land legally under the PRC laws.

Regarding the Granted Land, the Group has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the land of the properties by other legal means during the remaining land use rights terms.

Regarding the Authorized Allocated Land, the Group only has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the land of the properties by other legal means internally. Caused the land rezoned to other use or transferred to entities outside the Group, land grant fee shall be paid for completion of rezoning or transfer.

As of the issuance date of this legal opinion, the above land use rights of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

Regarding the Allocated Land and the Without Title Land and according to the Restructuring Agreement, ChinaCoal Group has undertaken to provide all necessary assistance to the Group in order to apply for the state-owned land use rights certificates in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

Buildings

Regarding the buildings with building ownership certificates erected on the Granted Land, the Authorized Allocated Land and the Allocated Land, the Group is the solely owner of these buildings.

Regarding the buildings erected on the Granted Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings.

Regarding the buildings erected on the Authorized Allocated Land with building ownership certificates, the Group only has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the buildings by other legal means internally. Caused the buildings are transferred to the entities outside the Group, relevant land grant fee of the land shall be paid for completion of the transfer.

Regarding the buildings erected on the Allocated Land and the Without Title Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings by other legal means once the Group has completed the granted land formality for the land on which the buildings are erected.

Regarding the buildings without building ownership certificates erected on the Granted Land, the Authorized Allocated Land, the Allocated Land and the Without Title Land, once relevant building ownership certificates obtained by the Group, the rights for the Group to transfer, grant, mortgage or dispose of the buildings by other legal means shall be consistent with those as stated above.

ChinaCoal Group has undertaken to provide all necessary assistance to the Group in order to apply for the building ownership certificates in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

As of the issuance date of this legal opinion, the buildings of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

(4) Due to insufficient title proof to the aforesaid buildings erected on the Allocated Land with a total gross floor area of approximately 349.65 sq m and those erected on the Without Title Land with a total gross floor area of approximately 337.28 sq m, we have attributed no commercial value to these buildings. For indication purpose, as of the date of valuation, the depreciated replacement cost of these buildings (excluding the land) was approximately RMB1,240,000.

(5) In the course of our valuation, we have attributed no commercial value to the Allocated Land portion and the Without Title Land portion of the properties due to the fact that these portions of the properties are not freely transferable in the market.

Details of the gross floor areas and uses of the properties are as follows: Approximate Gross Floor Area Use | sq m | sq ft Office | 7,487.32 | 80,594 **Total** | **7,487.32** | **80,594** The properties also include a number of buildings, structures and ancillary facilities with a total gross floor area of approximately 1,525.00 sq m which were under construction as of the valuation date. A total construction cost of RMB34,887,934.50 has been incurred as of the valuation date. They are scheduled for completion in 2006. The land use rights of the properties are held for various terms with details as shown in note (1).	The properties are occupied by the Group for office use.	52,420,000 (Market value attributable to the Group: 52,420,000)

Notes:

(1) 天津中煤進出口有限公司 (China National Coal Imp. & Exp. (Tianjin) Co., Ltd.) ("Tianjin Company"), a 100% owned subsidiary of the Company, has 5 parcels of land with a total site area of approximately 59,720.02 sq m. Among the land, 3 parcels of land with a total area of approximately 3,075.22 sq m are the Granted Land, a parcel of land with a site area of approximately 144.80sq m is the Allocated Land and the remaining one parcel of land with a site area of approximately 56,500.00 sq m is the Without Title Land.

(2) According to the information provided by the Group, the buildings of the properties held by Tianjin Company are as follows:

The land which the buildings erected thereon	No. of building(s)	Approximate gross floor area ("GFA") (sq m)	GFA of building(s) with building ownership certificate ("BOC") (sq m)	GFA of building(s) without BOC (sq m)
Granted Land	3	6,176.09	6,176.09	—
Allocated Land	1	1,311.23	1,311.23	—
Without Title Land	—	—	—	—
Total	4	7,487.32	7,487.32	—

(3) We have been provided with a copy of the legal opinion on the title to the properties prepared by Jia Yuan Law Firm, the Group's PRC legal adviser, which contains, inter-alia, the following information:

Land Use Rights

The Granted Land are held by the Group legally under the PRC laws. The Group has the rights to use such land legally under the PRC laws.

Regarding the Granted Land, the Group has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the land of the properties by other legal means during the remaining land use rights terms.

As of the issuance date of this legal opinion, the above land use rights of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

Regarding the Allocated Land and the Without Title Land and according to the Restructuring Agreement, ChinaCoal Group has undertaken to provide all necessary assistance to the Group in order to apply for the state-owned land use rights certificates in

12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

Buildings

Regarding the buildings with building ownership certificates erected on the Granted Land and the Allocated Land, the Group is the solely owner of these buildings.

Regarding the buildings erected on the Granted Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings.

Regarding the buildings erected on the Allocated Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings by other legal means once the Group has completed the granted land formality for the land on which the buildings are erected.

As of the issuance date of this legal opinion, the buildings of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

(4) Due to insufficient title proof to the aforesaid building erected on Allocated Land with a gross floor area of approximately 1,311.23 sq m, we have attributed no commercial value to the building. For indication purpose, as of the date of valuation, the depreciated replacement cost of the building (excluding the land) was approximately RMB6,870,000.

(5) In the course of our valuation, we have attributed no commercial value to the Allocated Land portion and the Without Title Land portion of the properties due to the fact that these portions of the properties are not freely transferable in the market.

Total	232	100,454.79	83,922.37	16,532.42

(4) We have been provided with a copy of the legal opinion on the title to the properties prepared by Jia Yuan Law Firm, the Group's PRC legal adviser, which contains, inter-alia, the following information:

Land Use Rights

The Granted Land are held by the Group legally under the PRC laws. The Group has the rights to use such land legally under the PRC laws.

Regarding the Granted Land, the Group has the rights to occupy, use, grant, transfer, lease, mortgage or dispose of the land of the properties by other legal means during the remaining land use rights terms.

As of the issuance date of this legal opinion, the above land use rights of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

Regarding the Without Title Land and according to the Restructuring Agreement, ChinaCoal Group has undertaken to provide all necessary assistance to the Group in order to apply for the state-owned land use rights certificates in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

Regarding the Leased Land, portion of the Leased Land has been leased by China Coal Coking by entering the leases with the relevant land administration authorities and China Coal Coking also has been granted with lease land certificates. To the remaining portion of the Leased Land, the lessor of the land has obtained approval from the relevant land administration authorities for the land lease. The leases of the Leased Land are legal and valid. ChinaCoal Group has undertaken to make the land be used by the Group legally in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

Buildings

Regarding the buildings with building ownership certificates erected on the Granted Land and the Leased Land, the Group is the solely owner of these buildings.

Regarding the buildings erected on the Granted Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings.

Regarding the buildings erected on the Leased Land with building ownership certificates, the Group has the rights to transfer, grant, lease, mortgage or dispose of the buildings by other legal means by getting prior notice from the lessors.

Regarding the buildings with building ownership certificates erected on the Granted Land, the Without Title Land and the Leased Land, once relevant building ownership certificates obtained by the Group, the rights for the Group to transfer, grant, mortgage or dispose of the buildings by other legal means shall be consistent with those as stated above.

ChinaCoal Group has undertaken to provide all necessary assistance to the Group in order to apply for the building ownership certificates in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

As of the issuance date of this legal opinion, the buildings of the properties have not engaged in any litigation, confiscation or disputes and are not subject to any pledges, liens and other third parties interest.

(5) Due to insufficient title proof to the aforesaid buildings erected on Without Title Land with a total gross floor area of approximately 9,603.79 sq m and those erected on the Leased Land with a total gross floor area of approximately 8,859.50 sq m, we have attributed no commercial value to these buildings. For indication purpose, as of the date of valuation, the depreciated replacement cost of these buildings (excluding the land) was approximately RMB18,970,000.

(6) In the course of our valuation, we have attributed no commercial value to the Without Title Land portion and the Leased Land portion of the properties due to the fact that these portions of the properties are not freely transferable in the market.

According to the Restructuring Agreement, ChinaCoal Group has undertaken to make the properties be used by the Group legally in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

	Property	Description and tenure	Particulars of occupancy	Market value in existing state as of 30 September 2006
				RMB
23.	Properties leased by 上海大屯能源股份有限公司 (Shanghai Datun Energy Resources Co., Ltd.) in Shanghai Municipality in the PRC	The properties comprise 69 offices and 397 production buildings in Shanghai Municipality completed in various between 1971 and 2002. Details of the gross floor areas and uses of the properties are as follows: Approximate Gross Floor Area Use / sq m / sq ft Production 125,605.23 1,352,015 Office 70,500 758,862 **Total 196,105.23 2,110,877** The properties are subject to various lease agreements for various terms at a total annual rental of approximately RMB30,345,000	The properties are occupied by the Group for office and production uses.	No commercial value

Notes:

(1) The Group leases 466 properties with a total gross floor area of approximately 196,105.23sq m. Among these properties,the lessors of the 7 properties with a total gross floor area of approximately 4,974.00 sq m have not obtained building ownership certificates and the lessors of the remaining properties have obtained building ownership certificates

(2) We have been provided with a copy of the legal opinion on the lease agreements to the properties prepared by Jia Yuan Law Firm, the Company's PRC legal adviser, which contains, inter alia, the following information:

The lease of the properties without building ownership certificates will be legal and valid once the lessors having obtained the building ownership certificates. According to the Restructuring Agreement, ChinaCoal Group has undertaken to make the properties be used by the Group legally in 12 months from the date of establishment of the Company. The undertaking given by ChinaCoal Group to the Group is legal, valid and binding.

	Property	Description and tenure	Particulars of occupancy	Market value in existing state as of 30 September 2006
				RMB
24.	A property leased by 中煤招標有限責任公司 (China Coal Tendering Co., Ltd.) in Beijing Municipality in the PRC	The property comprise 1 office with a gross floor area of approximately 525.23 sq m(5,654 sq ft) in Beijing Municipality completed in 2004. This property is subject to a tenancy agreement for a term from 1 January 2006 to 31 December 2006 at an annual rental of approximately RMB647,000.	The property is occupied by the Group for office use.	No commercial value

Notes:

(1) The Group leases 1 building with a total gross floor area of approximately 525.23 sq m. The lessor of the building have obtained building ownership certificate for the building.

(2) We have been provided with a copy of the legal opinion on the lease agreements to the properties prepared by Jia Yuan Law Firm, the Company's PRC legal adviser, which contains, inter alia, the following information:

The lease of the building is legal and valid.

	Property	Description and tenure	Particulars of occupancy	Market value in existing state as of 30 September 2006
				RMB
25.	A property leased by 中國煤炭開發有限責任公司 (China National Coal Development Co., Ltd.) in Beijing Municipality in the PRC	The property comprise an office with a gross floor area of approximately 1,096.78 sq m(11,806 sq ft) in Beijing Municipality completed in 2004. This property is subject to a lease agreement for a term from 1 January 2006 to 31 December 2006 at an annual rental of approximately RMB1,382,000	The property is occupied by the Group for office use.	No commercial value

Notes:

(1) The Group leases an office with a total gross floor area of approximately 1,096.78 sq m. The lessor of the office has obtained building ownership certificate.

(2) We have been provided with a copy of the legal opinion on the lease agreements to the properties prepared by Jia Yuan Law Firm, the Company's PRC legal adviser, which contains, inter alia, the following information:

The lease of the office is legal and valid.

CHINA

Dear Sirs,

Independent Technical Adviser Report

The following Report summarises the findings of an independent technical and economic assessment of the coal mines, coal processing plants (CPP's) and exploration areas operated by China Coal Energy Company Limited (Company or China Coal). The Report has been prepared by Steffen Robertson and Kirsten (Australasia) Pty Ltd, trading as SRK Consulting (SRK), located at Level 9, 300 Adelaide Street, Brisbane, Queensland, 4000, Australia.

Purpose of the Report

The purpose of this Report is to provide an independent technical assessment of the Company's mineral assets for inclusion in a prospectus to be issued by the Company to support the proposed listing and fund raising on The Stock Exchange of Hong Kong Limited. The Report is to provide potential investors in the proposed China Coal Initial Public Offering (IPO) with an independent opinion of the condition, production capability and future prospects of the mines and processing facilities that are managed by the Company.

This Report has been prepared in accordance with the Rules Governing the Listing of Securities of The Stock Exchange of Hong Kong Limited, in particular Chapter 18.

The Report set out in Appendix VI to the prospectus of the Company dated 6 December 2006 is the only report provided by SRK and has been compiled to include the details required by the Listing Rules. SRK has no prior association with China Coal in regard to the mineral assets that are the subject of this Report other than the site inspections, data analysis and Report compilation for this report. SRK has no beneficial interest in the outcome of the technical assessment being capable of affecting its independence. Neither SRK nor any of the authors of this Report has any material present or contingent interest in the outcome of this report, nor do they have any pecuniary or other interest that could be reasonably regarded as being capable of affecting their independence or that of SRK. Neither SRK nor any of the authors of this Report holds any share capital of the issuer.

Scope of Work

The findings in this Report are based on information gathered prior to and during site inspections made to the mines and processing plants of the Company by SRK personnel and on information subsequently supplied to SRK through e-mail, facsimile messages, physical meetings or various telephone conversations. During site inspections, SRK personnel held detailed and open discussions with site personnel at each mine or processing plant. Visits were made to the operating mines, the CPP's and planning and administration offices.

SRK conducted investigations into and has reported upon various technical areas including geology and resource estimation, mining engineering and reserves estimation, coal processing, environmental and social aspects, statutory requirements including tenement boundaries, company management methods and structure, operating costs and capital investments.

In particular SRK inspected each of the mines and CPPs listed in the following table.

Operating Company and Mine	CPP
Shanxi China Coal Pingshuo Antaibao Coal Co Ltd

Nanliang Underground	—
Independent China Coal CPPs	
Shuozhou China Coal Pingshuo Energy Co Ltd	Shuozhong
Datong Zhongxin Energy Co Ltd	Zhongxin
Datong China Coal Export Base Development Co Ltd	Dazhong

Resources and Reserves

Coal Resources

SRK's methodology for resource classification has been rigorous, particularly as it relates to both drill-hole spacing and to the treatment of drill-core recoveries. SRK has strictly applied the line spacing criteria as defined by the most recent People's Republic of China (PRC) regulations, resulting in the exclusion of all 'Category C' coal resource blocks from the resources calculation in accordance with the principles of the JORC Code.

Resource estimates are based on estimates that have been validated and authorized by China's leading authority for reporting Chinese resources, the Ministry of Land and Resources (MOLAR). Parameters used by MOLAR are consistent with Chinese standards and include coal seam core recovery >75% from boreholes and categorisation for resources based on the following borehole spacing criteria: Measured: 500 to 1,000metres distance, Indicated: 1,000metres to 2,000metres distance and Inferred: 2,000 to 4,000metres distance.

Coal Reserves

Mine plans reviewed by SRK were prepared on the basis of extraction of the entire resource at each site. Reserves have been estimated incorporating the following parameters:

- Mining recovery factors of 95% for open pit and 75% for underground mines have been applied to the entire resources estimate to estimate recoverable reserves
- A constant beneficiation yield specific to each coal preparation plant and mine site that includes wash plant yield, by-pass coal and rejects sold at a profit, has been applied to estimate marketable reserves for each mine.

Mine plans and supporting information supplied to SRK were used, in principle, to verify the feasibility of mining and recoveries. SRK can deduce from a review of reconciliation of the production records that the reserves estimates are a reasonable indication of future performance of the reserves.

Reporting Standard

The following Report has been prepared to the standard of, and is considered by SRK to be, a Technical Assessment Report under the guidelines of the Valmin Code. The Valmin Code is the code adopted by the Australasian Institute of Mining and Metallurgy (AusIMM) and the standard is binding upon all AusIMM members. It is SRK's opinion that the Report is prepared in accordance with international reporting standards for mineral resources and ore reserves.

In comparing China Coal's practices against international best practice, SRK has made comparisons in the Report which are qualitative in nature. In the case of quantitative comparison, sources of data are provided. This Report is not a Valuation Report and does not express an opinion as to the value of mineral assets. Aspects reviewed in this Report do include product prices, socio-political issues and environmental considerations, however SRK does not express an opinion regarding the specific value of the assets and tenements involved.

Consents

SRK consents to this Report being included, in full, in the China Coal prospectus, in the form and context in which the technical assessment is provided, and not for any other purpose. SRK provides this consent on the basis that the technical assessments expressed in the individual sections of this Report are considered with, and not independently of, the information set out in the complete Report and the Cover Letter.

Yours Sincerely

SRK Consulting

Disclaimer

The opinions expressed in this report have been based on information supplied to SRK Consulting China Ltd (SRK) by China Coal Energy Company Limited (China Coal). China Coal has represented to SRK that full disclosure has been made of all material information and that, to the best of its knowledge and understanding, such information is complete, accurate and true. SRK has no reason to doubt this representation. The opinions in this report are provided in response to a specific request from China Coal to do so. SRK has exercised all due care in reviewing the supplied information. Whilst SRK has compared key supplied data with expected values, the accuracy of the results and conclusions from the review are entirely reliant on the accuracy and completeness of the supplied data. SRK does not accept responsibility for any errors or omissions in the supplied information and does not accept any consequential liability arising from commercial decisions or actions resulting from them.

1 REPORT SUMMARY

1.1 Introduction

China Coal Energy Company Limited (China Coal) requested SRK Consulting China Ltd (SRK) to review the coal mining assets of China Coal to assist with a proposed restructuring and listing of the group. This Competent Persons Report has been prepared in conjunction with the listing of the group on the Stock Exchange of Hong Kong Limited (HKSE), in particular Chapter 18 of the Listing Rules.

Based on our inspection of China Coal's assets and operations, SRK believes China Coal is a well-managed, integrated business enterprise with an excellent portfolio of assets and industry-leading production and distribution capabilities. SRK believes China Coal is well positioned to compete effectively in both the domestic and international markets.

China Coal is one of the largest coal enterprises in China with coal production, sales and trading as their core business. It also has a diversified portfolio of other related operations to supplement its core coal operations. The principal products and services of China Coal include:

- Coal operations, which is the Company's core business and includes coal production, sales, trading and other services
- Coking operations, including the production and sale of coke and coal-based chemicals products
- Coal mining equipment manufacturing operations including coal mining equipment design, research and development, manufacturing and sales operations and after-sale services
- Coal mine design and other related businesses

The locations of China Coal's individual mines are shown in Appendix 1.

China Coal's coal assets are some of the largest and highest quality coal reserves in China with 3.5 Billion tonnes (Bt) of total proved and probable reserves on a 100 percent (%) ownership basis.

The group has:

- Thick seams of good quality coal with reasonable overburden ratios at each of the company's two open-pit mines, at Antaibao and Anjialing (two of China's larger surface mines)
- Varied geological conditions at its seven underground mines, which are supplemented by the use of technologies uniquely tailored to optimise production at each mine
- Coal preparation plants which include some best practice components allowing good product yields and high utilisation
- Contracted access to major rail lines and sea ports
- One of the largest and most experienced coal exporters in China
- A demonstrated commitment to safety and environmental protection

1.1.1 Overview of Findings

SRK's inspection of China Coal's operations revealed well managed and well maintained assets and a demonstrated commitment to providing a safe and efficient workplace at the company's mine sites. Management quality is demonstrated by the good safety record and strong commitment to methane gas management throughout underground operations. SRK also witnessed a strong environmental policy which is effectively implemented and monitored to world class standards.

Open Pit Mines

China Coal's large open-pit mines use modern, imported truck and shovel technology in seams as thick as 22 metres (m) and with strip ratios as low as 5 to 1. China Coal's open-pits are world class assets in terms of both total size and the scale at which the seams are being mined. China Coal operates its machinery efficiently and effectively, and is experimenting with additional improvements to increase efficiency further. China Coal's open cut mines have reasonably flat lying seams.

Underground Mines

China Coal's underground mines have seams which dip as steeply as 40 degrees, and use longwall retreat mining equipment in coal seams of between 1 m and 16 m thickness. The highly productive top caving method has been pioneered in three of the underground mines with thicker seams. This technique allows much improved panel recovery over previous techniques and provides significantly increased resource utilisation.

The Anjialing underground operation has implemented world class infrastructure to support advanced production technology. In particular modern transport facilities and road header technology with continuous haulage systems are utilised, representing leading edge technology for global coal development. Anjialing and Yaoqiao underground mines are highly productive compared to the average of Chinese underground mines. Nanliang mine is likely to become a similarly productive low cost mine following the introduction of longwall mining.

Coal Preparation Plants

The mines transport coal to coal preparation plants (CPPs) which process the coal to remove impurities. China Coal operated nine CPPs in 2004 producing approximately 42 Million tonnes (Mt) of marketable coal, 93% of which was thermal coal and 7% coking coal. During 2005, China Coal expanded existing CPPs, and constructed and commissioned four new CPPs, resulting in production of 44.2 Mt of marketable coal in 2005. China Coal is forecasting an increase in processed output to 52.4 Mt of marketable coal in 2006.

Resources and Reserves

China Coal's resources and reserves provide its mines with an average indicative mine life of 38 years. Two of the group's high production open-pit mines, Anjialing mine and the planned Pingshuo East mine have lives of 26 and 47 years respectively at the current forecast production rate. The resource and reserve estimates have high probability to extend significantly when the available inferred resources are converted to reserves following further in-fill drilling. The mines managed by China Coal have in excess of 4,000 Mt of coal in the inferred resource category which could be converted in this manner. China Coal manages mines which have coal seams of very high quality relative to international standards (due to low ash and low sulphur). The two large and efficient open-pit mines at Antaibao and Anjialing produced 33% and 30% respectively of China Coal's total production in 2005.

Safety

Safety statistics for China Coal's mines are superior to the local industry average. China Coal recorded four fatal accidents at its mines in 2005, and the ratio of fatalities per Mt of production in 2005 of 0.08 is comparable to the best safety performance in the Chinese coal mining industry.

Infrastructure

The mines operated by China Coal are well serviced by existing infrastructure and have reliable supplies of water and electricity, some of which is generated at on-site power stations.

Capital Expenditure

China Coal recorded capital expenditure of RMB1,503 Million (M) in 2004 and RMB1,581 M in 2005, mostly for mine and CPP expansions. Expansion of the Antaibao and Anjialing open-pit mines and the Anjialing underground mine in 2006, 2007 and 2008 is forecast to require capital expenditure for additional mining equipment and modifications to the mines. Construction of the Pingshuo East open-pit mine and the Wangjialing underground mine are scheduled to commence during 2006 and 2007 respectively, which results in a significant increase in total capital expenditure from 2007 onwards.

1.1.2 Overview of Operations

China Coal manages two large open-pit mines and seven underground mines in the Shanxi, Shaanxi and Jiangsu Provinces of China as shown in the following diagram. Location maps for individual mines are set out in Appendix 1.

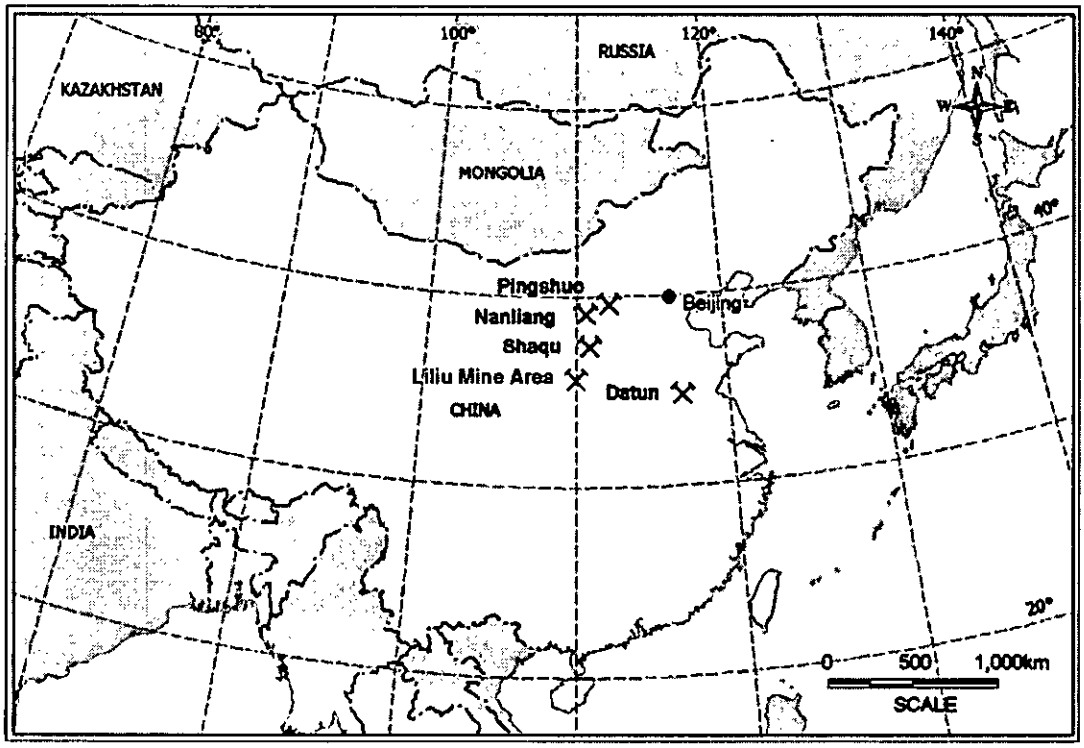

Figure 1-1: Overall Location Map

These mines are conveniently situated with respect to the Chinese rail and port network, as well as key customers. The total managed run-of-mine (ROM) production from these mines for 2005 was approximately 50 Mt of high energy thermal and coking coal. In addition, China Coal has one large open-pit project which will commence with preliminary pre-stripping operations in 2006 and two new underground mines, one of which commenced construction during 2005 and the other planned to commence construction during 2007. The mines managed by China Coal are forecast to produce approximately 64 Mt of ROM coal in 2006. Production from these mines is forecast to increase to approximately 72 Million tonnes per annum (Mtpa) of ROM coal by 2007 and 90 Mtpa by 2008.

1.2 Mining Assets

The group's mining assets have the attributes and characteristics as shown in Table 1-1.

Table 1-1: Mining Assets — China Coal

Operating Company and Mine	Mining Method	Year of Initial Operation	Marketable Reserves[1] (Mt)	Date of MOLAR Reserves Estimate[2]	Product Coal Characteristics		
					Calorific Value (kcal/kg)	Sulphur (%)	Ash (%)
Pingshuo Coal Company[3]							
Antaibao	OP	1987	131	22 June 2005	5,000	1.00-1.70	15-38
Anjialing	OP	2001	572	5 July 2005	5,000	1.00-1.70	15-38

Shanxi Nanliang Coal Co., Ltd.							
Nanliang	UG	1998	51	26 May 1998	6,050	0.35	8-10
Total			3,003				

(1) Marketable Reserves are shown on a 100% basis at 30 June 2006. See Table 1-10 for Effective Equity Interest

(2) Date of certification by the Ministry of Land and Resources

(3) After this report was written China Coal informed SRK of a restructure in Pingshuo Coal Company (refer structure in Section 1.7)

— Antaibao OP Mine is now owned by Shanxi China Coal Pingshuo Antaibao Coal Co Ltd

— Anjialing OP and Anjialing UG Mines are now owned by Shanxi Pingshou Anjialing Surface Mine Co Ltd

— Antaibao UG Mine is now directly owned by China Coal

— Pingshuo East OP Mine is now directly owned by China Coal

— All of the above assets are collectively referred to in this report under "Pingshuo Coal Company"

(4) A Mining Right for the Pingshuo East OP is expected to be granted in March 2007

Amongst the mining assets listed in Table 1-1 are three which are currently being developed and which are forecast to materially increase China Coal's overall production as shown in Table 1-2.

Table 1-2: Mines under Construction — China Coal

Mine	Mining Method	Year of Construction Commencing	Year of Full Production	Production Rate at Full Scale (Mtpa)
Antaibao	UG	2005	2009	8.0
Pingshuo East[1]	OP	2006	2009	20.0
Wangjialing	UG	2007	2010	6.0

(1) A Mining Right for the Pingshuo East OP is expected to be granted in March 2007

Antaibao Underground Mine will utilise top coal caving methods to extract seams up to 16 m thick, and is expected to produce at a low unit cost similar to the Anjialing Underground Mine. Pingshuo East open-pit mine will extract the same seams and have similar strip ratios to both the Anjialing and Antaibao open-pit mines and is therefore expected to produce coal of similarly high quality and low cost. Wangjialing underground mine will utilise longwall methods of mining, and is planning to supply a new CPP and power station in the local area.

Among the mining assets owned and operated by China Coal, Antaibao mine and Anjialing mine are some of the larger open-pit coal mines in China and compare well with large international operations in physical size and output. The seam thickness at the Antaibao and Anjialing open-pit mines is a considerable advantage allowing efficient mining production and low operating costs.

Antaibao and Anjialing open-pit mines use modern shovel and truck mining equipment, imported from manufacturers including Caterpillar, Dresser and Komatsu. The large efficient open-pit mine at Anjialing and the planned mine at Pingshuo East have mine lives in excess of 40 years at the current forecast production rate.

1.3 Coal Processing Assets

China Coal uses dense-media cyclone (DMC) processing methods for over 90% of its coal output, which is the processing method used at best practise CPPs in the coal industry. Details of China Coal's CPPs are shown in Table 1-3.

Table 1-3: Coal Processing Plants — China Coal

Coal Process Plant (CPP)	Design Capacity (Mtpa)	Year of Initial Operation	Output in 2005 (Mt)	Forecast Output in 2006 (Mt)	Processing Method	Fine Coal Process	Coal Yield (%)[1]
Pingshuo Coal Company

Total	76.75		44.18	52.40			

(1) Coal yield is for wash plant yield only

(2) China Coal reported upgrade of plants to 25 Mtpa

(3) China Coal reported coal feed from Anjialing UG sent to Antaibao and Anjialing CPPs from Jan 06 to Jun 06

(4) Design yield

(5) Two stage DMC involves the use of two cyclones in series which can produce two separate products

1.4 Historical and Future Production

China Coal is maintaining production at most mines and increasing coal production by developing new underground and open-pit mines, as shown in Table 1-4. Tonnes of coal planned to be mined under the current mining licences and the renewed mining licence are shown in Table 1-5.

Table 1-4: Historical and Future Production — China Coal

Operating Company and Mine	Mining Method	ROM Output (Mt) 2003	2004	2005	2006H1	Forecast ROM Output (Mt) 2006F	2007F	2008F	Indicative Mine life[1] (years)

(1) Based on recoverable reserves and forecast production capacity

(2) A Mining Right for the Pingshuo East OP is expected to be granted in March 2007

China Coal's total historical ROM coal production has increased by 51% from 2003 to 2005. A further increase of approximately 80% is forecast by 2008, when production is projected to amount to approximately 90 Mtpa, as shown in the following graph (Figure 1-2).

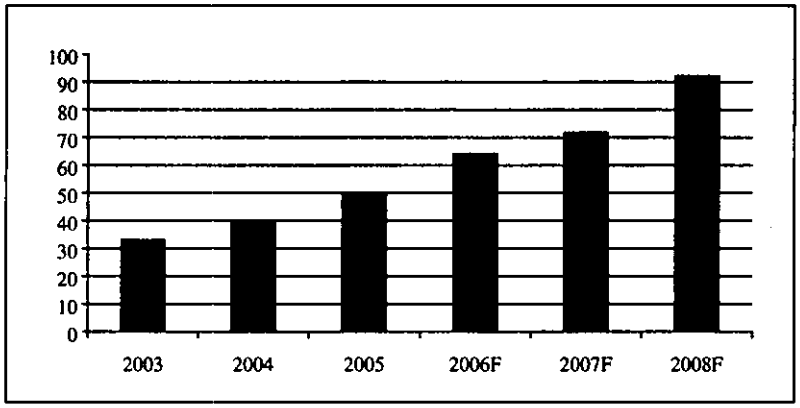

Figure 1-2: China Coal Historical and Forecast Production, 2003 to 2008

While China Coal operates both open-pit and underground mines, production has been dominated by highly productive, low cost open-pit mines using international brands of truck and shovel mining equipment. As shown in the following figure, forecast production over the period from 2005 to 2008 from open-pit mines varies between 57% and 64% and from 37% to 43% from underground mines.

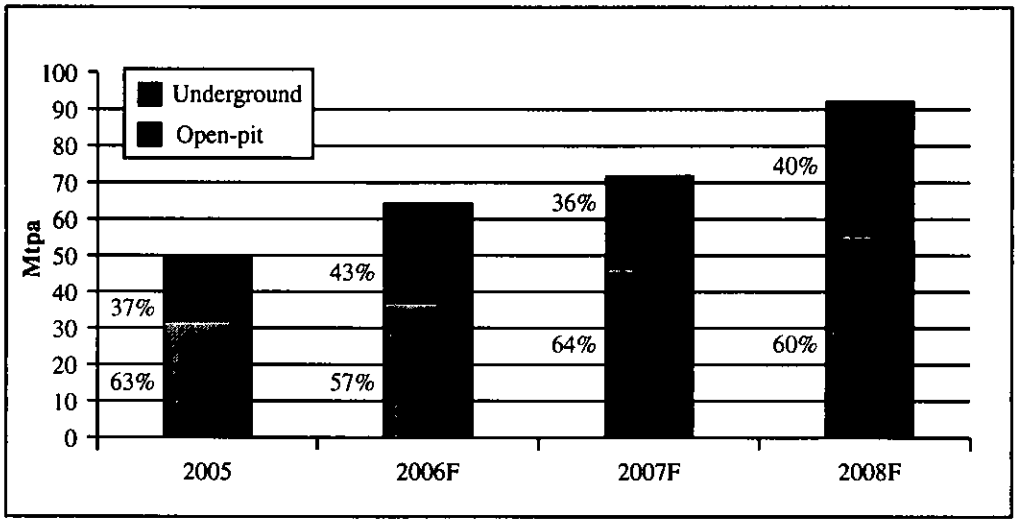

Figure 1-3: China Coal Production by Mining Method, 2005 to 2008

The ROM coal production in 2005 totalled 50.12 Mt with the contribution from each subsidiary company as shown in Figure 1-4 below.

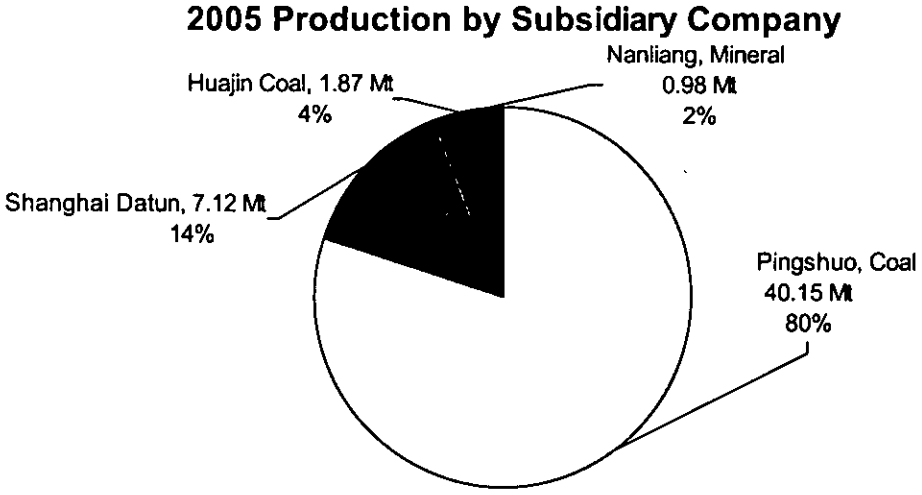

Figure 1-4: China Coal 2005 Production by Subsidiary Company

1.5 Capital Expenditure

China Coal has made considerable investment in production capacity in recent years and plans to invest a further RMB2,840 M in 2006. Forecast capital investment in 2007 and 2008 is RMB5,994 M and RMB5,578 M respectively (Table 1-6) mainly due to increased capital investment for the construction of the Pingshuo East open-pit and Wangjialing underground mine.

Table 1-6: Capital Expenditure — China Coal

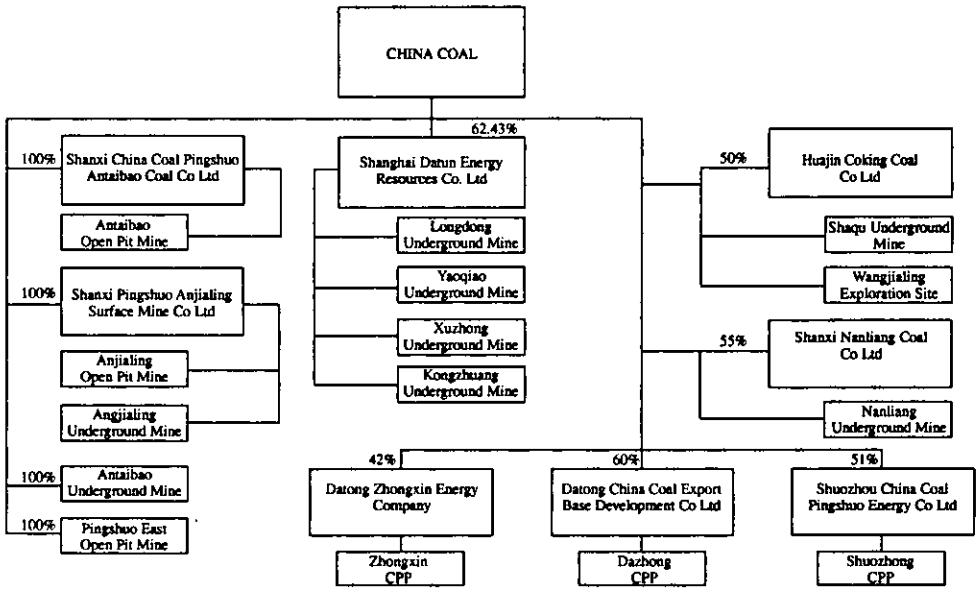
(2) Capital Expenditure reflects 100% ownership — China Coal Ownership and Contribution 50%

1.6 Operating Costs



China Coal has provided mine production costs for all of its managed mines for the period 2003 to 2005. SRK has reviewed and accepted these costs as reflecting China Coal's mining operations. Cash production costs are directly associated with coal production (excluding CPPs) and includes but are not limited to, salaries and wages, consumables, electricity and water, maintenance, rehabilitation, materials, explosives and contract operations. China Coal's low-cost structure from a world industry perspective is driven by efficient coal production, especially from the Pingshuo highly productive open-pit mines and Anjialing Underground Mine, and attractive rates for materials and labour. Historic average annual mine cash costs are shown in Table 1-7.

Table 1-7: Average Annual Mine Cash Costs — China Coal

Operating Company and Mine	Mining Method	Cash Operating Cost (RMB/tonne) 2003	2004	2005
Pingshuo Coal Company

1.7 Organisational Structure and Workforce

The following chart summarises China Coal's organizational structure and the operating mines at each of the subsidiary companies. Diagrams of organizational structures of operating companies are shown in Appendix 2.

The workforce employed at China Coal mines as of December 2005 is shown in Table 1-8. Employee numbers reflect the competitive salaries in China compared to most other coal producing countries.

Table 1-8: Workforce — China Coal

Operating Company	Mining Method	Production[1]	Management[2]	Other	Total Employees[3]
Pingshuo Coal Company					
Antaibao	OP	1,464			
Anjialing	OP	774			
Anjialing	UG	609

(1) Based on workers in production roles only

(2) Shaqu mine not at full production during 2005

1.8 Geology

The geology and types of coal products vary across the mines operated by China Coal, from simple geology to complex and difficult geological conditions and from coking coal to thermal coal suitable for both domestic and export markets.

1.8.1 Pingshuo Coal

At Pingshuo Coal Company, there are two large scale open-pit mines successfully extracting three thick seams (from 2 to 22 m) at depths of up to 200 m. These coal seams are high energy thermal coals. The two basal seams have higher sulphur content and require blending with the upper seam to meet Chinese emission standards. The new Anjialing Underground Mine is performing well as the strata conditions are highly favourable for longwall extraction with the top coal caving method and methane gas levels are very low.

1.8.2 Datun Coal

Geological conditions at Shanghai Datun Energy Resources Co., Ltd. (Datun Coal) operations are quite complex causing difficult conditions for underground extraction of coal seams. Datun Coal has employed good mining strategies to successfully extract coal using mechanised longwall methods. It also uses modern three dimensional (3D) seismic surveys to detect the presence of faulting in the coal seams, allowing more efficient planning of mining. The top two seams are the thickest with best quality coal and are the current mining horizons. The area contains many minor faults which have minimal impact on current mining targets. The lower seam (#17 seam) has a higher sulphur content which will require blending with the upper seams. Datun Coal's products are suited to the domestic coking coal market.

1.8.3 Huajin Coal

Huajin Coking Coal Co., Ltd.'s (Huajin Coal) Shaqu underground mine has relatively high levels of methane gas however these are well managed with gas drainage systems and adequate ventilation. Shaqu mine has excellent geological conditions with good roof conditions and an absence of any imposing structural features. Shaqu mine produces a good domestic coking coal and a smaller quantity of export coking coal.

1.8.4 Nanliang Coal

The Nanliang mine of the Shanxi Nanliang Coal Co., Ltd. (Nanliang Coal) has excellent conditions for underground coal mining including a competent roof, little structural disturbance, no detectable methane gas and produces good quality thermal coal products.

1.9 Resources and Reserves

In order to provide an internationally recognised form of reporting resources and reserves, SRK has used the principles of the Joint Ore Reserves Committee (JORC) Code as guidelines. The methodology employed is set out in greater detail in Section 2.2 of this report.

China Coal has estimated Marketable Reserves of 3 Bt as at 30 June 2006 and 9.5 Bt of coal resources under management, representing a large and high quality resource base for future development. Almost half of this resource base is in measured and indicated categories, and converts to in-situ recoverable reserves of over 3.4 Bt of coal.

As a result of the rigourous methodology applied, the resources reported here are considered by SRK to be conservative relative to other interpretations of the People's Republic of China (PRC) standards, but are

also considered to be highly reliable and transparently verifiable by an independent auditor, thus providing much greater confidence in China Coal's resources.

It is highly probable that a large portion of the inferred resources could be converted to in-situ reserves upon further in-fill drilling. SRK has reached this view because particular assets in the inferred category have a high probability of regular (stable) geology and only reasonably varying quality parameters. These characteristics have been demonstrated, for example, at Shaqu mine.

China Coal is undertaking a resources conversion program well ahead of development and its policy of ongoing exploration is comparable to world best practice in coal asset development and exploration.

SRK is impressed with China Coal's current exploration program, as it includes the use of high technology 3D seismic surveys to map and predict structural and lithological variation ahead of drilling. These predictions allow for efficient utilisation of drilling funds by defining structural variability ahead of drilling.

Using the JORC Code principles as guidelines and incorporating parameters consistent with Chinese industry standards, SRK estimates China Coal's coal resources and reserves as at 30 June 2006 as indicated in Table 1-10 and Table 1-11.

Mining Rights

China Coal holds granted mining rights for each of the mines reviewed in the SRK report. The mining rights are for a defined mining area and for a defined time period. Within these parameters, and as long as China Coal continues to meet its other statutory requirements, the group will continue to enjoy the exclusive rights to mine and process coal from these tenements.

China Coal's mining rights have been renewed over the past six years and provide for mining to continue until approximately 2030 for most mines and until 2020 for the Nanliang mine. Details are provided in the relevant sections of this report.

On the basis of precedent, SRK has assumed that China Coal will be able to renew its mining rights for a further period, possibly 30 years, when the current mining rights are due for renewal.

Table 1-10: SRK JORC Code Resource Categories

Shanxi Nanliang Coal Co., Ltd.									
	Nanliang	UG	55	28	23	51	51	100	51
Total				1,720	1,828	3,548	3,420		3,003

(1) The above table shows 100% of the reserves at each mine managed by China Coal

(2) Based on general mining practice, mining recovery for OP mines assumes at 95% and for UG mines at 75%

(3) Based on current mining practices at China Coal and SRK's general experience, mining loss assumed at 13% for OP mines and 6% for UG mines, except Antaibao UG and Anjialing UG assumed 20% and Nanliang assumed 5%

(4) Based on current mining practices at China coal and SRK's general experience, dilution assumed at 10% for all mines except Nanliang assumed dilution of 5%

(5) Includes wash plant yield, by-pass coal and rejects sold at a profit

(6) A Mining Right for the Pingshuo East OP is expected to be granted in March 2007

1.10 Occupational Health and Safety

At all China Coal mining sites, safety meetings are held at the beginning of each day with resources consistently applied in an attempt to achieve the best possible safety record. All sites appoint safety monitors from management and the workforce to inspect safety matters in the mines and implement changes to improve safety conditions and standards.

The mines conduct formal investigations after accidents or incidents to identify the root cause and to communicate and prevent the occurrence of similar incidents. Safety training at all mines is a formalised and scheduled process which includes both permanent and contract employees. In general, good performance was

reflected in safety statistics and some mines have been reporting zero minor or serious injuries for a number of consecutive years.

The safety performance reported for all operating companies between 2003 and 2005 is shown in Table 1-12.

Table 1-12: Safety Performance — China Coal

Operating Company	Number of Occurrences 2003	2004	2005
Pingshuo Coal Company			
Fatal[1]	0	6	1
Serious[2]	9	10	7
Minor[3]	18	20	15
Shanghai Datun Energy Resources Co., Ltd.			
Fatal[1]	4	0	3
Serious[2]	4	2	3
Minor[3]	0	15	0
Huajin Coking Coal Co., Ltd.			
Fatal[1]	0	0	0
Serious[2]	1	0	0
Minor[3]	1	3	0
Shanxi Nanliang Coal Co., Ltd.			
Fatal[1]	0	0	0
Serious[2]	0	0	0
Minor[3]	0	4	3

(1) Fatal: accident causing death (number indicates lives claimed)

(2) Serious: accident requiring hospitalisation and do not return to work for more than 24 hours (include fatal incidents)

(3) Minor: accident which does not require hospitalisation and the employee returns to work within 24 hours

1.11 Environmental

SRK found China Coal to be an environmentally pro-active and compliant company across the subsidiary companies assessed. SRK found no incidence of environmental breach and that China Coal's environmental compliance procedures either meet or exceed all requirements placed on the company at all statutory levels. At some sites the company's water recycling and treatment technologies are of world-class standard. Based on information provided by China Coal and inspection of the above listed sites, SRK concludes that it is unlikely that China Coal has any major environmental liability concerns.

1.12 Infrastructure

1.12.1 Water

With regard to water the mine sites are all self-sufficient, with supply from surface boreholes controlled by the respective mines. In all cases the supply of water is in excess of usage, and in most cases the boreholes also supply water to local villages and towns for domestic use. Water collected in the underground mines is generally pumped to the surface and treated for use as sewerage handling on the surface or recycled for underground use. In some cases the mines have an inflow of groundwater with infrastructure established to gather water for underground use or pumping water to the surface for alternative uses.

1.12.2 Electricity

Electricity supply to the mines is through the government-owned public grid except for the Kongzhuang, Yaoqiao and Longdong mines, which are supplied by two local power stations owned by Datun Coal. We understand the supply of power varies from reliable to extremely reliable. The power supply is in excess of the required usage for the mines except at Shaqu mine where power supply is insufficient during four months in spring and winter, causing longwall production to cease for between 5 and 10 days per month. Alternative power supply options are already under investigation with the low cost option of a local gas-fired power station being considered. The supply of methane to the power station is likely to be sourced from the underground network at Shaqu mine.

1.12.3 Ventilation and Dust Prevention

Most of the underground mines operated by China Coal use large ventilation shafts connected to the surface to supply fresh air to underground operations. In all cases ventilation quantities in the underground mines are in compliance with Chinese legislative requirements. Roof and sidewalls are sprayed and washed down with water on a periodic basis as required by Chinese regulation. Zero to very low levels of methane were reported or detected during underground visits, except for Shaqu mine which has been identified as a high methane level mine. This situation is being adequately managed by the use of gas drainage systems and adequate ventilation. Dust prevention measures are implemented and maintained at all the mines and personal protective equipment (PPE) is supplied to personnel when required by environmental conditions.

2 INTRODUCTION AND SCOPE OF REPORT

2.1 Background

2.1.1 Nature of the Brief

China Coal commissioned SRK to provide an independent Competent Persons Report on the assets of the company in connection with the proposed listing of the group on the HKSE. This report describes the mines and processing facilities managed by China Coal and reviews all technical aspects of these assets.

2.1.2 Purpose of the Report

The purpose of this report is to provide potential investors in the proposed China Coal Initial Public Offering (IPO) with an independent opinion of the condition, production capability and future prospects of the mines and processing facilities that are managed by the company.

This report is required to comply with the reporting standards under the listing rules of HKSE and may be included in China Coal's information circular to be prepared in conjunction with the proposed listing of the company. This report does not provide a valuation of the mineral assets or any comment on the fairness and reasonableness of any transactions related to the assets of the company.

2.1.3 Reporting Standard

This report has been prepared to the standard of, and is considered by SRK to be a Technical Assessment Report under the guidelines of the Valmin Code. The Valmin Code is the code adopted by the Australasian Institute of Mining and Metallurgy (AusIMM) and the standard is binding upon all AusIMM members. The Valmin Code incorporates the JORC Code (see www.jorc.org.au) for the reporting of Mineral Resources and Coal Reserves.

This report is not a valuation report and does not express an opinion as to the value of mineral assets. Aspects reviewed in this report do include product prices, socio-political issues and environmental considerations, however SRK does not express an opinion regarding the specific value of the assets and

tenements involved. SRK has estimated China Coal's resources using the principles of the JORC Code as guidelines and incorporating parameters consistent with Chinese standards.

2.2 Methodology

2.2.1 Resource Classification

SRK's methodology for resource classification has been rigorous, particularly as it relates to both drill-hole spacing and to the treatment of drill-core recoveries. SRK has strictly applied the line spacing criteria as defined by the most recent PRC regulations, resulting in the exclusion of all 'category C' coal resource blocks from the resources calculation in accordance with the principles of the JORC Code.

Resource estimates are based on estimates that have been validated and authorized by China's leading authority for reporting Chinese resources, the Ministry of Land and Resources (MOLAR). Parameters used by MOLAR are consistent with Chinese standards and include coal seam core recovery >75% from boreholes and categorisation for resources based on the following borehole spacing criteria:

- Measured: 500 to 1,000 m distance
- Indicated: 1,000 to 2,000 m distance
- Inferred: 2,000 to 4,000 m distance

As an example, SRK performed a comparison check using a computer model of a subset of the Antaibao data representing a third of the Antaibao mine area. It was established that the Chinese method of estimation was under-estimating the 'Resources' by 3%, an error well within the limits of the expected 'Measured Resource' estimation accuracy level. In applying additional factors to the conversion/classification of resources, SRK has reviewed the complexity of the geology and overall reconciliation of the operating mines as a guide to future performance of the resource.

2.2.2 Exploration Core Recovery

The JORC Code includes a guideline that exploration core recovery should be greater than 95% for the borehole to be included in 'Resources' calculations. SRK reviewed the core recovery of China Coal exploration boreholes providing an assessment of the quality of the resulting seam core recovery. SRK then assigned each category from the Chinese reserves estimates to equivalent resources categories. As recommended in the guidelines to the JORC Code, where core recovery was less than 95%, SRK assigned the Chinese estimates to a lower resources category.

2.2.3 Coal Resources

Data throughout this report and in the following tables show SRK's resources estimate on a mine site basis and indicate the resources estimate based on 100% ownership of each mine.

2.2.4 Coal Reserves

Mine plans and supporting information supplied to SRK were used, in principle, to verify the feasibility of mining and recoveries. SRK can deduce from a review of reconciliation of the production records that the reserves estimates are a reasonable indication of future performance of the reserves.

Mine plans reviewed by SRK were prepared on the basis of extraction of the entire resource at each site. Reserves have been estimated incorporating the following parameters:

- Mining recovery factors of 95% for open-pit and 75% for underground mines have been applied to the entire resources estimate to estimate recoverable reserves

- A constant beneficiation yield specific to each CPP and mine site that includes wash plant yield, by-pass coal and rejects sold at a profit, has been applied to estimate marketable reserves for each mine

2.2.5 Environmental

SRK completed an environmental assessment of all China Coal's mines. In addition to assessing the actual mine sites, relevant infrastructure associated with coal mining, handling, processing and transporting operations were inspected and reviewed.

2.2.6 Work Program

The SRK work program included the following items:

- Desktop review of data provided by the group and planning for site visits
- Travel to China to inspect assets and discuss technical aspects with the group staff.
- Compilation of a draft report
- Data analysis and completion of draft report
- Review of draft report by China Coal, its lawyers, accountant and advisers, who provided comments to SRK
- Report editing by SRK as required
- Finalisation of the report

SRK relied upon China Coal for the provision of production and cost data which was reviewed and analysed by SRK to confirm the reasonableness of the information.

2.3 Risk analysis

SRK has reviewed a range of risk issues at each mine and CPP operated by China Coal. SRK does not regard China Coal's mining operations to be high risk, inadequately managed or otherwise unduly susceptible to major events. There is no basis to predict or otherwise anticipate major operational shortfalls at any of China Coal's mining operations. China Coal's management is aware of potential risk issues and the sustained proactive safety and engineering controls are an essential component of operations management to minimise and manage risk. Within the context of event risks, it must be recognized that while such events are rare, there is no allowance in China Coal's plans and projections for major production shortfalls. China Coal's major mines are planned to operate at capacity, and in the unlikely case that a material failure occurs at one of China Coal's major mines, there is no excess production capacity available to offset the loss of production and associated revenue stream from the affected mine.

2.4 SRK Consulting

2.4.1 Statement of SRK Independence

Neither SRK nor any of the authors of this report have any material present or contingent interest in the outcome of this report, nor do they have any pecuniary or other interest that could be reasonably regarded as being capable of affecting their independence or that of SRK.

SRK has no prior association with China Coal in regard to the mineral assets that are the subject of this report. SRK has no beneficial interest in the outcome of the technical assessment being capable of affecting its independence.

SRK's fee for completing this report is based on its normal professional rates, plus reimbursement of incidental expenses. The payment of that professional fee is not contingent upon the outcome of the report.

2.4.2 Warranties

China Coal has represented to SRK that full disclosure has been made of all material information and that, to the best of its knowledge and understanding, such information is complete, accurate and true.

2.4.3 Indemnities

As recommended by the Valmin Code, China Coal has provided SRK with an indemnity under which SRK is to be compensated for any liability and/or any additional work or expenditure resulting from any additional work required:

- which results from SRK's reliance on inaccurate information provided by China Coal or relates to China Coal not providing material information, or
- which relates to any consequential extension workload through queries, questions or public hearings arising from this report.

2.4.4 Project Team

The SRK team has extensive experience in reviewing coal mines, coal processing plants, infrastructure and environmental aspects of coal operations. SRK team members who reviewed the operations of China Coal are:

Mr Mike Warren, Principal Consultant (Project Evaluations), BSc (Mining Eng), MBA, MAusIMM, FAICD, is a mining engineer with over 25 years experience. He specialises in open-pit and underground mining analysis, due diligence reports and mine valuations. Mr Warren is a JORC Code competent person.

Dr Yonglian Sun, Managing Director of SRK China, B Eng, PhD (Mining Eng), MIEAust, is a geotechnical engineer with over 16 years experience. He specialises in geotechnical investigation and design aspects of open-pit, underground mines, slope stability analysis, rock mechanics, and numerical modelling for open-pits, underground mining as well as civil tunnels, and assessment of geo-material properties.

Mr Pat Hanna, Principal Consultant (Coal Geology), BSc (Applied Geology), FAusIMM, CPGeo, has more than 25 years experience as a coal geologist in the areas of exploration and evaluation of coal mining projects in Australia, Indonesia and China. He contributed to the Guidelines on Black Coal Resource and Reserve Estimation sub-committee and as a Joint Ore Reserves Committee (JORC) member. Mr Hanna is a JORC Code competent person. China Coal can seek technical advice in relation to its exploration activities from Mr Hanna who is employed by SRK Australia which has an office located at Level 9, 300 Adelaide Street, Brisbane, 4000, Queensland, Australia.

Mr Jack Steenekamp, Principal Consultant (Coal Mining), B.Eng (Mining)(Hons), B.Eng (Mechanical), MBA, FAusIMM has over 15 years experience in the coal mining industry. He has managed major projects for the establishment of surface and underground infrastructure on underground coal mines, and has also led and been involved in various studies for the establishment of new infrastructure and mines. Mr Steenekamp is a JORC Code competent person.

Dr Stuart Winchester, Senior Consultant (GeoEnvironmental), MSc, PhD, has over nine years experience in environmental assessment and has expertise in mine site environmental management, environmental auditing, environmental monitoring and reporting, environmental site investigations and rehabilitation and acid mine drainage management.

Mr Peter Newling, Associate Principal Processing Engineer, BE (Chem. Eng) (Hons II), has over 30 years experience in the coal mining and steel making industries. He has supervised and managed a number of coal processing plants and inspected a wide range of Australian coal processing plants. Mr Newling also has experience in construction and commissioning of coal processing plants.

2.4.5 SRK Experience

SRK was formed over 30 years ago and is an independent consulting group which provides advice to the mining and finance industries on a wide range of geo-scientific disciplines including geology, geo-statistics, geotechnical engineering, hydro-geology, mining engineering and environmental engineering. SRK is wholly owned by its staff. The Group employs approximately 500 professionals internationally and has 25 permanently staffed offices in eight countries on six continents. In Australia SRK has approximately 70 staff in four offices in Perth, Sydney, Maitland and Brisbane.

SRK has provided Competent Persons Reports for the following companies:

Company	Year	Nature of transaction
Yanzhou Coal Limited	2000	Sale of Jining III coal mine by parent company to the operating company
Chalco (Aluminium Corporation of China)	2001	Listing on HKSE and New York Stock Exchange
Fujian Zijin Gold Mining Company	2004	Listing on HKSE
Lingbao Gold Limited	2005	Listing on HKSE
Yue Da Holdings Limited	2006	Acquisition of a shareholding in mines operated by Feilong Holdings Limited

3 PINGSHUO COAL COMPANY

3.1 Introduction

China Coal owns 100% of Pingshuo Coal Company which has three operating companies namely, Pingshuo No. 1 Coal Company, Pingshuo Anjialing OP Coal Company and Pingshuo East OP Mine. These companies own and operate the Antaibao open-pit mine and CPP, the Anjialing open-pit mine and CPP and the Anjialing Underground Mine and Muguajie CPP. The company is proposing to construct a new mine to the east of the existing mines (known as Pingshuo East or the Donglutian Project) and an underground mine (Antaibao underground) to the north of the current Antaibao open-pit mine. The company is actively seeking to expand existing mines and production facilities. Two new CPPs are in final stages of construction and another CPP is proposed to be constructed within the next two years to wash the coal produced at Pingshuo East mine.

In 2004 Pingshuo Coal mined 30.1 Mt of raw coal, purchased 9.1 Mt of raw coal and processed 35.3 Mt of coal to produce 29.7 Mt of product coal. Approximately one-third was exported via the port at Qinhuangdao and approximately two-thirds was sold to power generating stations on the east coast of China.

3.2 Corporate Management Structure

Pingshuo Coal uses a hierarchical management structure as shown in Appendix 2.

Workforce numbers for Pingshuo Coal are shown in Table 3-1.

Table 3-1: Workforce Numbers — Pingshuo Coal

Category	Employees
Production[1]	
Antaibao OP	1,464
Anjialing OP	774
Anjialing UG	609
Management[2]	963
Other[3]	4,996
Total	8,806

(1) Permanent and contractor employees involved in mining activities

(2) Senior management — excludes functional departments

(3) Only personnel involved with the mines — excludes Coal Handling Preparation Plants, rail etc

Salaries for junior staff are generally RMB1,500 per month, those for skilled underground miners are approximately RMB2,000 per month, and those for senior staff are as high as RMB8,000 per month.

3.3 Occupational Health and Safety

Pingshuo Coal has a senior manager who is responsible for safety and training. The mine uses a system of safety monitors appointed from management and staff as well as from underground workers at the mines. The company has an accident and injury reporting system which adheres to Chinese industry standards. The recent accident statistics for Pingshuo Coal are shown in Table 3-2. These figures include the Antaibao open-pit, Anjialing open-pit and Anjialing Underground Mines and the three CPPs. These figures relate to employees of the company and contractors working on the mine sites.

Table 3-2: Accident Statistics, 2003 to 2005 — Pingshuo Coal

Category	2003	2004	2005
Fatal[1]	0	6	1
Serious[2]	9	10	7
Minor[3]	18	20	15

(1) Accident causing death (number indicates lives claimed)

(2) Accident requiring hospitalisation and do not return to work for more than 24 hours (includes fatal incidents)

(3) Accident which does not require hospitalisation and employee returns to work within 24 hours

Three fatalities in 2004 occurred in the CPPs. No fatalities occurred in the open-pit mines, however three fatalities occurred to contractors during 2004 at the Anjialing Underground Mine. One fatality occurred at the Anjialing underground operation during 2005.

The safety statistics for Pingshuo Coal are superior to the average of the Chinese coal industry. The ratio of fatalities to Mt of production in 2005 was a relatively low 0.025. Formal investigations are conducted after an incident to establish the root cause and to formally communicate findings to employees and other mines (if relevant) at the start of shift safety meetings. This communication is delivered by the team leader to company employees.

The company provides a reward of RMB100 to workforce members who report safety hazards. Safety training is conducted annually and amounts to between 48, 60 and 120 hours/year depending on the position of the employee. Pingshuo Coal focuses on safety initiatives and procedures and provides induction and safety training for new employees and contractors.

3.4 Environmental Assessment

3.4.1 Introduction, Scope and Background

SRK conducted an environmental assessment of all Pingshuo Coal's mines including interviews with key environmental staff members of Pingshuo Coal, inspection of relevant environmental documentation and interpretation of responses to an environmental questionnaire provided by SRK.

This environmental assessment is reported entirely at corporate level. This approach was adopted as Pingshuo Coal maintains an environmental group within its technical division located at head office that oversees all operations. Pingshuo Coal's company-wide environmental management model has been developed to allow feedback from all three operational mines, with site-specific variations as required. Comments specific to a particular mine are detailed as appropriate throughout the text of this environmental assessment.

3.4.2 Corporate Environmental Awareness

Pingshuo Coal has ISO14001:1996 accreditation for its environmental management system at the Antaibao open-pit mine and for the management of its residential facilities and infrastructure in Pingshuo town proper. Antaibao open-pit mine is also accredited under ISO9001:2000 for quality system management. Pingshuo Coal has applied for both ISO14001:1996 and ISO9001:2000 accreditation for its Anjialing open-pit mine which was pending in 2005. Anjialing Underground Mine has only been producing coal since 2003 and as a result, Pingshuo Coal has not yet applied for either ISO14001:1996 or ISO9001:2000 but plans to do so in future years. The company has applied for OHSAS18000 safety accreditation for Antaibao and Anjialing open-pit mines, in addition to Anjialing Underground Mine. A decision on accreditation was still pending at the time of this report.

3.4.3 Mining Title and Royalty Payments

Pingshuo Coal is licenced to mine at Antaibao and Anjialing open-pit mines, and also at Anjialing Underground Mine. Pingshuo Coal currently holds an exploration licence for the proposed Pingshuo East open-pit mine, and has received official mining approval from MOLAR, and is currently awaiting receipt of its mining licence. Pingshuo Coal submitted a feasibility study to MOLAR in November 2004 to mine 8 Mtpa from the proposed Antaibao Underground Mine. MOLAR has issued an exclusive resource rights certificate to Pingshuo Coal for the area, and Pingshuo Coal has also received a mining licence for 6 Mtpa from MOLAR, dated 30 August 2006. Mining licence details are provided in Table 3-3.

Pingshuo Coal holds the surface rights on all mining sites, with the only options being held by the government. Pingshuo Coal is not permitted to divest mining licences to other commercial operations. Should Pingshuo Coal still have mineable coal reserves following expiration of the mining licences, the standard accepted procedure is to apply for a new or extended licence. All mining licences were issued by MOLAR.

Table 3-3: Mining Licence Details — Pingshuo Coal

Mine	Mining Licence No.	Mining Area (km^2)	Issue Date	Licence Tenure
Antaibao Open-Pit	1000000120004	24.0	Sept 2004	27 years
Anjialing Open-Pit	1000009940011	54.7	May 1999	30 years[1]
Anjialing Underground	1000009940027	10.7	July 2004	30 years[1]
Pingshuo East Exploration Area	1400000330067 (Exploration licence)[2]	48.7	May 2003	30 years (anticipated)[1]
Antaibao Underground	1000000610106	19.2	August 2006	30 years

(1) The maximum permissible mining tenure under the Mineral Resources Law (1996 as amended) is 30 years

(2) Pingshuo Coal has received MOLAR approval to mine an area of 48.7 km^2, and is presently awaiting a mining licence which is expected in March 2007

Pingshuo Coal pays mining royalties and taxes according to Chinese Mineral Resources Law.

3.4.4 Environmental Licensing, Compliance and Reporting

For all new projects in China, it is a statutory requirement that environmental considerations are factored into a detailed project feasibility study which is presented to the Environmental Protection Bureau of the respective province in which the operation is located (Shanxi in this instance). This environmental component is essentially akin to an environmental impact assessment report. The various operational environmental licences are then granted to the mining company based on the sustainability of the operation according to the environmental feasibility study, in addition to its ability to manage environmental obligations under the National Environment Protection Law (1989).

For Pingshuo Coal operations, operational licences were granted at provincial level for Antaibao open-pit and Anjialing underground and open-pit mines for boundary noise, gaseous emissions and water discharge. Pingshuo Coal maintains licences at individual mine levels from the local Shouzhou County Water Resource Management Commission for groundwater extraction. In 2005 Pingshuo Coal was in the process of applying to the local, provincial and state governments' Environmental Protection Bureaus for individual environmental emission and discharge licences (e.g. water, waste, gaseous emissions etc.) as a new licencing system is being implemented. The project feasibility study for the proposed Pingshuo East open-pit coal mine has been submitted for approval to the Shanxi Environmental Protection Bureau.

Each mine operated by Pingshuo Coal prepares an individual environment report to the Chinese (State) Environmental Protection Bureau, the Shanxi Environmental Protection Bureau and the local Shouzhou Environmental Protection Bureau twice yearly. The reports incorporate information regarding volumes of solid waste generated, noise data, wastewater data, gaseous emissions data, environmental budgets and completed rehabilitation. The reports are passed down from state to provincial regulators for approval, then to local county environmental regulators who conduct random inspections. Pingshuo Coal must, therefore, remain environmentally vigilant and be prepared for random checks, which are carried out by both provincial and local environment agencies several times a year to ensure compliance. In addition, Pingshuo Coal submits a twice-yearly summary environmental planning report to the State Environmental Protection Bureau.

SRK completed random inspections of the following environmental reports and found that all reported environmental data were within relevant guidelines and standards, including:

- Half-yearly Pingshuo Coal corporate summary environmental planning report to the State Environmental Protection Bureau (2004)
- Residential area waste water treatment plant proposed expansion report (2004)
- Application report for ISO14001:1996 compliance at Anjialing open-pit mine (2004)

To date, Pingshuo Coal has not been fined for any breach of environmental non-compliance.

3.4.5 Environmental Staff

Pingshuo Coal has two environmental professionals located in its corporate office, in addition to one environment manager located at Antaibao and another at Anjialing who look after both the underground and open-pit mines. In addition to these four environmental staff, there are up to approximately 30 additional technical and operational staff assisting with data capture and day-to-day environmental assistance across the

sites. Pingshuo Coal ensures that its environmental managers are suitably qualified. In addition to these staff, the waste water treatment plants owned and operated by Pingshuo Coal have a dedicated environmental staff member who oversees environmental issues.

3.4.6 Environmental Planning and Budgets

Pingshuo Coal is proactive in its environmental budgeting, having invested over RMB5.2 M towards mine site rehabilitation at both Antaibao and Anjialing open-pit mines for the year 2004 as reported in the Pingshuo Coal 2004 Annual Environmental Report. A similar amount was spent on noise, dust, water and emissions management equipment and monitoring across the company. A further RMB6.6 M was spent on improvements and upgrades to the Pingshuo 'life area' located in the town proper, which included landscaping, waste water management and heating. A further, RMB11.5 M has been allocated for environmental protection measures for the proposed Antaibao Underground Mine as stated in the 2004 feasibility study. Environmental planning at the mines comprises 10 year progressive rehabilitation and environmental management plans, which is in line with both Chinese and western standards.

3.4.7 Water Management

Pingshuo Coal has a strong company-wide emphasis on water conservation, as demonstrated by extensive on-site recycling. This policy extends across the mines, coal washing plants and waste water treatment plants (WWTP). These plants are all working towards a zero water discharge policy. The town's WWTP, which is operated by Pingshuo Coal, releases water that meets relevant criteria into the Qili River during the wet season.

Pingshuo Coal recently completed an upgrade of its water holding reservoir located between Antaibao and Anjialing open-pit mines. Pingshuo Coal has a recycled water policy with zero discharge during agricultural irrigation periods, and a 95% re-use criterium during non-irrigation periods. The 5% balance is discharged into Dashna Creek under licence. Any surplus run-off water is used for dust suppression on the mines, while treated sewage water is used for coal washing and on rehabilitated areas.

Supplementary water is sourced for the mines from 10 groundwater wells approved by local authorities and located at Liu Jiakou. The majority of this water is used for coal washing. Surface water is managed across the mine sites by a series of drains and sedimentation dams.

3.4.8 Waste Rock, Tailings and Rehabilitation Management

The Chinese mining industry is regulated by MOLAR under the Mineral Resources Law (1996 as amended). Under this law no rehabilitation bond or surety is required, however if mining activities result in damage to arable land, grassland or afforested areas, the mining operator must take appropriate measures to return the land to a suitable condition within a prescribed time frame. Any entity or individual that fails to fulfil its rehabilitation obligations may be fined and denied application for land use rights for new land. Government regulators routinely inspect the progress of rehabilitation in this regard.

Waste rock at both Antaibao and Anjialing open-pit mines is disposed of within the mine voids, though out-of-pit disposal was required during the initial mine development stages at both mines. The waste rock is a mixture of silicious sandstone, calcite and claystone. The claystone contains some visible pyrite, though as the waste is disposed of within the mine pits and subsequently buried, it is not considered to be a potential contamination issue as any sulphides will be stored in an anoxic environment. The minimal volumes of waste rock generated from Anjialing Underground Mine are disposed of in Anjialing open-pit mine. The same waste management and disposal policy is planned for Antaibao Underground Mine. SRK believes that these waste management policies are logical given the centralised location of the coal wash and power station

infrastructure relative to the mine sites. Any potential lack of space in the open-pits due to the 'bulking' of waste rock upon removal is compensated for by the additional space generated by coal extraction from the pits. Waste (or tailings) from the coal wash plants is either burnt in the on-site power station or disposed of in pit. Following completion of the new coal wash plants and upgrades to existing plants, 100% of coal wash rejects will be used as fuel in the power plant. Total solid waste volumes as reported in 2004 across all operations were approximately 5.6 Mt, of which over 99% was waste rock.

Both of the two out-of-pit waste rock dumps at Antaibao open-pit mine have been rehabilitated using a 1.5 m thick clay cap and revegetated using local species. The local clay soil used as a capping layer has a pH value of approximately 8, and therefore has a slightly neutralising effect on any acid generated as a result of oxidising sulphide minerals. Surface water on the dumps is redirected through a series of channels and sedimentation dams. Work is soon to begin on progressive rehabilitation of Anjialing open-pit waste rock dumps.

3.4.9 Dust Management

Dust is managed on-site at the open-pit mines by recycling surface run-off water. Antaibao open-pit has six operating water tankers while Anjialing has five. In addition, dust is suppressed at Anjialing Underground Mine through the use of water sprays attached to the longwall mining equipment. Dust is monitored monthly on the open-pit mine sites by automatic laser sampling methods in line with environmental compliance requirements. A computerised dust monitoring system is operational at Anjialing Underground Mine.

3.4.10 Social and Regulatory Relations

Following discussions with Pingshuo Coal representatives it appears that relations with both local residents and regulatory bodies are sound. Good relations with the local community are primarily due to Pingshuo Coal providing continued local job opportunities and employment for a large number of individuals, with positive flow-on effects on the local and regional economy in service industries. Residents directly affected by both underground and open-pit mining operations are compensated by Pingshuo Coal and relocated from the area as required under the Mineral Resources Law (1996).

In accordance with the legal requirements for rehabilitation of affected agricultural land and re-settlement and compensation of affected persons, Pingshuo Coal includes a budgetary allocation for such activities. One notable impact of Pingshuo Coal's mining activities is surface subsidence, which is the lowering of the land surface due to the extraction of subsurface coal, often with concomitant surface cracking. Pingshuo Coal has removed any such impacts on local landowners at Anjialing Underground Mine by purchasing the surface rights to the land. Pingshuo Coal plans to manage these impacts at the proposed Antaibao Underground Mine by relocating small villages and financially compensating any affected persons, plus financially compensating farmers whose land is affected by subsidence so that rehabilitation may be effected. The budgeted financial consideration will also be used to temporarily relocate any major infrastructure including roads and powerlines prior to sub-surface mining, as SRK observed almost 100% surface expression of the extracted coal seam height due to a combination of its relatively shallow sub-surface depth and the nature of the overlying stratigraphy. In addition, Pingshuo Coal plans to leave coal pillars below major settlements that are not relocated to avoid impacts from surface subsidence.

All indications are that relations with statutory bodies are sound. It should be noted that Pingshuo Coal has never been fined for any environmental mishaps. Pingshuo Coal possesses documentation from the local regulators supporting its environmental record. Further, rapid approval of proposed mining at Pingshuo East and Antaibao underground is testimony to the sound relationships with regulatory authorities.

3.4.11 Environmental Assessment Conclusion

Following interviews with key Pingshuo Coal environmental staff and inspection of environmental documentation and operational sites, it is apparent that Pingshuo Coal takes its environmental responsibilities very seriously. SRK found that Pingshuo Coal has a sound and proactive approach to its environmental responsibilities and is managing its operations in compliance with its environmental obligations. This opinion is supported by the fact that Pingshuo Coal has not been fined for any environmental incident to date across its operations. Specific focus is on water management and conservation, with several plans in place for increasing the use of recycled water.

3.5 Coal Processing and Transport

All coal produced by the Pingshuo Coal mines is washed before it is sold to customers. Two-thirds of the product is sold to power stations in the coastal areas of China, although the majority is handled through port facilities at Qinhuangdao before distribution to customers. The balance of the product is exported through the port. Pingshuo Coal purchases external coal to supply the demand of customers, with between 2.8 Mt and 7.4 Mt purchased per annum over the last four years.

The Materials Handling and Process Plant flowsheets are similar for all CPPs in the Pingshuo area and are applicable to the operating plants, i.e. Antaibao and Anjialing, and the newly constructed plants, i.e. Muguajie and the new Antaibao and Anjialing CPPs. A copy of a typical Materials Handling and Process Plant flowsheet is attached in Appendix 3. Operating plants at Antaibao and Anjialing and the Muguajie plant are all equipped with their own on-site magnetite mills.

Pingshuo Coal utilises the government rail network to rail its coal within the 750 kilometre (km) railway system which is capable of transporting 200 Mtpa. The company has a contractual agreement with Datong Rail for the use of its rail loop, and although this agreement lapsed on 31 July 2004, it remains in place unless further negotiations are called by either party. A separate fee is then paid for use of the government railway system which is controlled by the China National Railway Ministry.

3.5.1 Antaibao CPP

Materials Handling

Three hoppers each with a capacity of 1,800 tonnes per hour (tph) have been installed at the CPP. The feed passes to a single stage plant that can either by-pass ROM coal to product (1,600 tph maximum) to produce high ash power plant product or direct the coal to the CPP. Product bins are dedicated for 120,000 tonne (t) fine coal, 15,000 t low sulphur coal and 15,000 t high sulphur coal. A reject bin accepts the reject stream and no tailings are raised as all fines are included in the product.

Process Plant

The CPP consists of three identical modules each nominally 783 tph and operating to 800 tph. Each module consists of:

- Dense medium bath for 50 millimeter (mm) × 13 mm
- Dense medium cyclone for 13 mm × 0.5 mm
- Drying only for 0.5 mm × 0 mm

A workforce of 242 operates and maintains the Antaibao CPP.

Capital Works

Three new remote dump hoppers are being installed to reduce travel distance of the mine trucks. The raw coal from these hoppers is conveyed to a new ROM area that includes rill towers. The fines are dried in a two-stream drying plant, however this is being replaced by a four-unit hyperbaric filter installation which is in the commissioning phase. The purpose of this is to save power and decrease cost, however the fines product moisture will rise from 10% to 20%. As the fines are a small component of the total product, total product moisture will only increase by a small amount and should not affect the sales price.

Rejects and CPP Yield

Tailings are added into the product stream and the large reject returns to the open-pit. A yield of 75% to 80% is achieved from the CPP which is reasonable.

3.5.2 Anjialing CPP

The construction of this plant commenced in 1998. In 2005 it processed 15.54 Mt and operated at 65 t per man shift.

Materials Handling

Coal handling consists of two feed lines, each with a capacity of 2,500 tph and containing a primary and a secondary MMD crusher. Coal is dumped in two bins of 1,700 and 2,500 t capacity respectively and a rill tower. The dump hoppers are situated 2.2 km from the plant.

Process Plant

There are three, two-stage modules for production of high grade product and middlings and two single stage modules for domestic thermal coal production. A new line with a capacity of 1,300 tph has been added for plant bypass. Scheduled plant maintenance is carried out for 32 hours twice per month and modular maintenance is carried out for eight hours each week. Availability is reported to be above 90%.

The operational capacity of the plant is 2,400 tph and the total capacity including bypass amounts to approximately 17.5 Mtpa. Yield was reported as 75% to 80% and magnetite usage is 1.4 kilograms (kg) per ROM t.

A workforce of 161 operates the plant with an additional 100 people forming the maintenance pool. The plant is generally well-maintained and in very good order.

Quality

Coal quality as shown in Table 3-4 applies to both Anjialing and Antaibao, as both plants are on adjacent sites.

Table 3-4: Coal Quality Parameters, Coal Processing Plants — Pingshuo Coal

		Ash (%)	CV (kcal/kg)	Sulphur (%)	TM (%)
Feed	#4 Seam	37	—	0.6	—
	#9 Seam	28	—	2.0	—
	#11 Seam	37	—	2.0	—
Product	High Grade	15 to 38	—	1 to 1.7	<10
	Middlings	22 to 25	5,000	1 to 1.2	<7.5

3.5.3 Muguajie CPP

Muguajie CPP is a new plant which was commissioned during 2005.

Materials Handling

The plant has been provided with a large ROM area set up with two large rill towers, one for each seam. The product area has three similar rill towers and the stated capacity for each tower is 1 Mt. The Muguajie plant is very closely situated to a plant belonging to another company which will enable sharing of the train loading loop. Each plant will however be equipped with its own loading bin.

Process Plant

Two single stage modules process coal for domestic thermal markets with each module rated at 750 tph. The plant is set up for:

- Dense medium bath for 50 mm x 13 mm
- Dense medium cyclones for 13 mm x 0.5 mm
- Fines unwashed to product for 0.5 mm x 0 mm

Production is budgeted for 300 days/year and 14 hours/day. The plant has a budgeted design rate of 6 Mtpa but is expected to operate at 10 Mtpa. The two bath modules are set up opposing each other with one constructed from imported equipment and the other with locally manufactured equivalent.

The plant will operate with 57 operators and 100 maintenance personnel.

Coal Quality

Quality figures for the feed stream and the product at Muguajie plant are shown in Table 3-5.

Table 3-5: Quality Parameters, Muguajie Coal Processing Plant

		Ash (%)	Sulphur (%)	TM (%)
Feed	#4 Seam	33.5	0.51	6.0
	#9 Seam	27.0	1.20	6.0
Product		17.9	0.88	8.8

3.5.4 New CPPs for Antaibao and Anjialing Underground

Two new plants are in the final stages of construction in close vicinity to the two existing CPPs of the open-pit mines. Each plant is reported to have the same flow chart as Muguajie and has been designed with three modules for a capacity of 10 Mtpa each. These sites were inspected by SRK during May 2005, and at the time the plant at Anjialing was approximately 30% complete. The construction of the body of the plant was well underway, the thickener shell was complete and the conveyor transfer towers were in progress. The plant at Antaibao was approximately 15% built during the site visit, with the rill towers erected and the ground floor of the plant completed.

3.5.5 Coal Production History

The historical production for the Pingshuo Coal processing plants is shown in Table 3-6, Table 3-7 and Table 3-8.

Table 3-6: Coal Processing Plants Production History, 2003 to 30 June 2006 — Antaibao

		2003	2004	2005	30 June 2006
Washed Coal	Mt	7.97	8.68	8.89	5.17
Middlings	Mt	6.50	5.95	6.92	4.22
Raw Coal and Waste	Mt	0	0	0	3.11
Total	Mt	14.47	14.63	15.81	12.50

Table 3-7: Coal Processing Plants Production History, 2003 to 30 June 2006 — Anjialing

		2003	2004	2005	30 June 2006
Washed Coal	Mt	6.44	7.02	5.79	3.31
Middlings	Mt	4.83	8.05	9.75	5.54
Raw Coal and Waste	Mt	0	0	0	3.05
Total	Mt	11.27	15.07	15.54	11.90

Table 3-8: Coal Processing Plants Production History, Jan to June 2006 — Muguajie

		30 June 2006

Middlings	Mt	0.57
Raw Coal and Waste	Mt	0.18
Total	Mt	0.75

3.6 Long Term Plans

Pingshuo Coal demonstrates a determined approach to expansion and production increase through the development of Pingshuo East open-pit and the Antaibao underground mine, as well as a significant production increase planned for the Anjialing underground mine. In the meantime, if there are good opportunities, China Coal proposes it will acquire mines in the Pingshuo area, to further increase their reserves and production.

3.7 Antaibao Open Pit Mine

3.7.1 Introduction

The Antaibao open-pit coal mine was established as a joint venture between China Coal and Island Creek Coal Company of the United States of America. Design work and construction was completed in 1986 and production commenced in 1987. Antaibao took 100% control when Island Creek Coal Company of the United States of America exited the joint venture. Antaibao uses mostly imported mining equipment and produced 14.8 Mt of raw coal during 2004 and 16.4 Mt in 2005. The coal preparation plant processed 15.8 Mt of product coal during 2005. Antaibao open-pit coal mine produces 100% thermal coal with a contracting company employed to conduct pre-stripping operations.

3.7.2 Geology and Mineral Resources

The topography consists of undulating hills with an elevation range from 1,200 to 1,500 m above sea level. The variation is primarily due to the large river systems that wind through the region.

The stratigraphy of the Pingshuo mines is outlined in Table 3-9.

Table 3-9: Stratigraphic Sequence — Antaibao and Anjialing

Stratigraphic Unit	Thickness Range (m)	Average Thickness (m)
Quaternary	0 to 63	25
Tertiary	0 to 59	23
Upper Permian	0 to 148	25
Upper Lower Permian	0 to 97	49
Lower Lower Permian (Shanxi Group)	11 to 98	60
Upper Carboniferous (Taiyuan Group)	57 to 105	79

The Quaternary material is usually unconsolidated and weathered soil, clays, sands and gravel deposited by recent river systems. The Tertiary material, although generally semi-consolidated sediments, has some hard bands of sandy siltstone interspersed throughout the sequence. The Tertiary sediments constitute the bulk of the overburden material and unconformably overlie the Permian sediments.

The #1 seam to the #3 seam belong to the Shanxi Group. Generally the #1 to the #3 seams are either too thin or not present due to being eroded away by the overlying Tertiary sediments. The #4 to the #11 seams are of the Taiyuan Group. Most of the seams are too thin or absent and are not recovered in the mining operations. Only the #4, the #9 and the #11 seams are mined. The #4 seam is often found directly below the unconformity between the Tertiary and Permian sediments. The overburden averages 100 m to the #4 seam, but due to topographic variation the #4 seam can be found as close as 40 m to the surface (see Table 3-10). The top 1 m of the #4 seam is weathered and a parting band at the base of this weathered zone is the marker for the top of the working section.

Table 3-10: Open-pit Seam Statistics — Antaibao

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#4	8 to 14	10	100 (to surface)
#9	10 to 17	14	31
#11	3 to 6	4.5	15

The interburden between the #4 and the #9 seams ranges from 30 to 40 m and is generally comprised of sandstone with minor siltstone and claystone. These sediments are strong, requiring blasting prior to removal. Between the #9 and the #11 seams the interburden ranges from 10 to 20 m. The sediments between the #9 and the #11 seams are generally sandstones and siltstones. The siltstones display abundant pyrite on the bedding planes. As well, extremely hard ironstone nodules (up to 10 centimetres (cm) in diameter) are found to occur in the sandstone sediments which themselves are extremely hard due to silicification.

Structure

The Antaibao area is bound to the east and the west by major faults trending N20°E. Faults within the Antaibao area are small scale (less than 5 m throw), with normal faults trending N15°W, and have little or no affect on the mining recovery of the seams.

Antaibao has one main fold feature 475 m along an axis of N60°W, with dips of 3 to 4 degrees on the flanks of the fold. There is no evidence of igneous activity in the Antaibao coalfield.

Coal Quality

All coal mined at Antaibao produces thermal coal products, primarily for power station use. Although the majority of products are utilised in the domestic market, the lower ash products are generally sold on the export market.

All ROM coal is washed through a dense medium cyclone wash plant at the mine site (see Coal Processing section for more details). The typical quality parameters of each seam are summarised in Table 3-11.

Table 3-11: Typical Coal Quality — Antaibao Open Pit Seams

Seam	Inherent Moisture % (ad)	Raw Ash % (ad)	Washed Ash F1.60 % (ad)	Raw Sulphur % (ad)	Washed Sulphur % (ad)
#4	2.8	27.0	14.0	0.40	0.68
#9	2.1	25.0	13.0	1.50	2.18
#11	2.0	33.0	14.5	3.00	2.17

Resource Estimation

There have been three phases of drilling at Antaibao, each having different levels of reliability in terms of seam tonnage and coal quality.

In the 1960s drilling was performed by the Chinese Central Government using NQ-size (47.6 mm diameter) core drilling equipment. These boreholes were found to have a low core recovery rate (usually less than 90%) but are considered to be reasonably reliable in terms of coal thickness (due to the use of geophysical logs). In the resource estimation process, government boreholes were given a lower reliability rating in accordance with the Chinese Resource Estimation rules.

The second drilling program was conducted in the 1980s using a drilling rig imported from the United States of America. This rig provided PQ-size (85 mm diameter) and proved to be successful in attaining a coal seam recovery rate greater than 95% on average. If the core recovery was lower, the borehole was re-drilled.

The third drilling program commenced in the 1990s and continues on an ongoing basis. The drilling techniques of the 1980s program are the same as used in the third program. A geologist is in attendance at the drilling rig at all times to record chip samples and to determine coring intervals. Seams are sampled as one complete ply for analytical testing and average borehole spacing is 300 m.

Therefore, in terms of reliable data, the boreholes of the 1980s and 1990s (to current) are regarded as highly reliable data points for use in the estimation of coal resources.

The parameters used to estimate coal reserves for all the Pingshuo Coal mines are as follows:

- Minimum coal seam thickness of 1 m
- Maximum ash content of 40% (air dried)
- Maximum sulphur content of 3%
- Tonnage is calculated using coal density only and does not include partings (e.g. for the #11 seam, actual density ranges from 1.5 tonnes per cubic metre (t/m^3) to 1.7 t/m^3, but for resource calculations, a density of 1.42 t/m^3 is used)
- Partings greater than 5 mm within a coal seam have been excluded from the thickness used to estimate coal resources

- For areas where no coal was found or where coal is oxidised, the reserve estimate projects coal to half-way between drill holes
- For known faults with 10 m throw or greater, a zone of 50 m either side of the fault is down-graded to the next category

The coal resources for Antaibao mine are shown in Table 3-12 and were current as at 30 June 2006.

Table 3-12: Coal Resources — Antaibao Open Pit

Seam	Resources (Mt) Measured	Indicated	Inferred	Total Resources (Mt)	Mineable Resources (Mt)
#4	28	15	15	58	43
#9	93	0	0	93	93
#11	30	0	0	30	30
Total	**151**	**15**	**15**	**181**	**166**

3.7.3 Coal Reserves

SRK has applied a 95% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design, such areas as final batters and pit end-walls. Mining loss and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 3-13.

Table 3-13: Coal Reserves — Antaibao Open Pit

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
95	143	14	158	13	10	151	87	131

3.7.4 Mining and Operations

The length of the Antaibao mining area is 4.9 km and the width 2.1 km with the depth of the pit varying between 180 and 240 m. The layout of the seams and open-pit mines is shown in Figure 3-1.

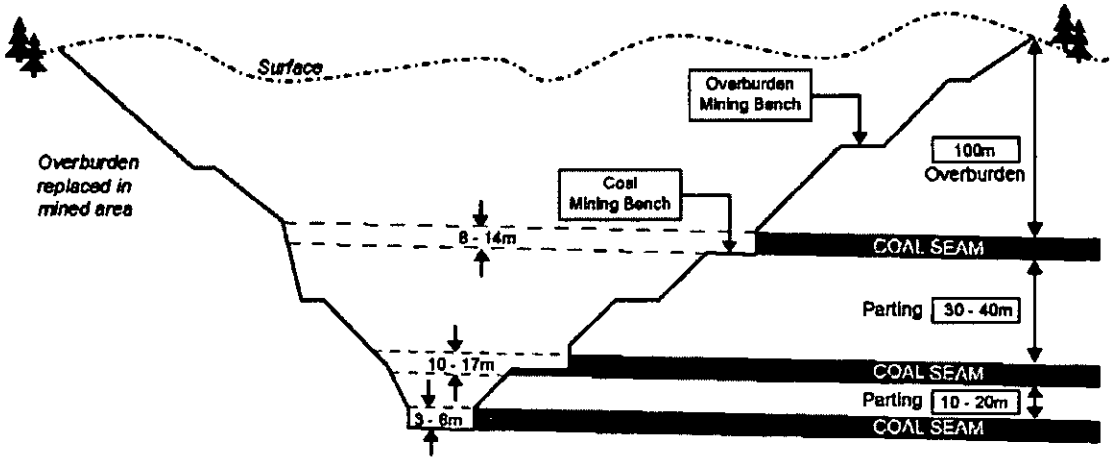

Figure 3-1: General Diagram of Antaibao and Anjialing Open Pit Coal Mines

Antaibao open-pit coal mine uses modern truck and shovel mining methods to remove waste and to mine coal from the #4, #9 and the #11 coal seams. In the pit, drilling is completed by 9 Ingersoll Rand mast drills which can drill the 15 m bench in one pass. Blasting is done using non-electric initiation and ammonium nitrate/fuel oil (ANFO) explosive. 13 P&H 2800XPB electric shovels load blast waste rock into a fleet of trucks of 150 t to 170 t capacity. The truck fleet is a mixture of Caterpillar 789, Dresser R190 and Komatsu 730E trucks. The total truck fleet consists of 125 trucks with 89 trucks in operation at the same time. The mining process at Antaibao mine is supported by 32 track dozers, 14 tyre dozers, 7 graders and 6 water trucks. The strip ratio in 2005 was 6.12 m^3 of waste to 1 t of in-situ coal (6.12:1). Coal is loaded into the truck fleet by 11 front-end loaders (FELs). The trucks transport the coal up the ramp to a dump hopper. The trucking distance is reduced by the dump hopper being located close to the top of the ramp.

Coal loss during mining is estimated by the company at 12.6% and dilution by waste rock is estimated at 10%. Historical production statistics are shown in Table 3-14.

Table 3-14: Mine Production History, 2003 to 30 June 2006 — Antaibao Open Pit

		2003	2004	2005	30 June 2006
Pre-strip	million m^3	13.23	33.55	29.25	11.75
Overburden and inter-burden removed	million m^3	74.33	60.64	71.42	43.97
Total Waste	million m^3	87.56	94.19	100.67	55.72
Strip Ratio	m^3/t	6.43	6.37	6.12	5.92
Total Raw Coal Mined	Mt	13.61	14.78	16.44	9.41

3.7.5 Infrastructure

Electrical power is supplied to Antaibao mine by a connection to the provincial government-owned grid. The 220 kilovolt (kV) supply is fed through the Pushang substation which is situated 13 km from the

mine site. The substation is equipped with a 240 megavolt-ampere (MVA) transformer and feeds the mine at 110 kV via overhead lines. The power supply is stepped down from 110 to 35 kV and subsequently to 6 kV for supply to the open-pit mines. The power supply to site is very reliable with minimum negative impact to the mining operation.

The water source for the Antaibao mine is a borefield at Liujiakou in which 10 bores have been drilled with a production capacity of 34 megalitres (Ml)/day. The borefield is 7 km from the mine and also supplies water to Anjialing open-pit and underground coal mines. Water for domestic use in town is supplied by separate boreholes. The mines are reported to have a usage of 19 Ml/day and 3 Ml/day is also supplied to external parties. At times, the usage can rise to near the capacity of the borefield, but storage facilities of 18 Ml are available on surface. A supplementary water supply is available from the nearby town of Gengzhuang but has not been required recently. Pingshuo Coal is considering construction of a dam on a local river as an alternative supply source for both mines. An application for government approval for this dam construction has been submitted.

3.7.6 Capital and Operating Costs

The historical and forecast capital expenditure for Antaibao open-pit mine is indicated in Table 3-15 and the average annual historical operating expenditure in Table 3-16. Although the cash operating cost has been increasing over the past three years, Antaibao open-pit achieved very competitive unit cost results with the high levels of production realised.

Table 3-15: Capital Expenditure — Antaibao Open Pit

Operating Company and Mine	Mining Method	Capital Expenditure (RMB Million) 2003	2004	2005	2006	2007	2008
Pingshuo Coal Company							
Antaibao	OP	87	116	258	652	352	463

Table 3-16: Average Annual Mine Cash Costs — Antaibao Open Pit

Operating Company and Mine	Mining Method	Cash Operating Cost (RMB/tonne) 2003	2004	2005
Pingshuo Coal Company				
Antaibao	OP	49.55	60.05	77.67

3.8 Anjialing Open Pit Mine

3.8.1 Introduction

Construction at the Anjialing open-pit mine started in May 1998 with production commencing in 2001. Conditions are very similar to Antaibao as the mines are located adjacent to one another and similar seams, i.e. #4 seam, #9 seam and #11 seam, are mined. The mine mainly uses imported equipment and has significantly increased production since 2002 to produce 14.5 Mt during 2004 and 15 Mt in 2005. The mine has adopted a staffing approach of employing young people and actively trains young graduates for the company. A contracting company is employed to conduct pre-stripping operations.

3.8.2 Geology and Mineral Resources

The topography consists of undulating hills with an elevation range from 1,160 to 1,410 m above sea level. The variation is primarily due to the large river systems that wind through the region.

The stratigraphy of Anjialing coal mine is outlined in Table 3-17. The Quaternary and Tertiary material is similar to that at Antaibao. The seams mined in Anjialing are the same as those mined at Antaibao, with the addition of #7 seam which is found in mineable localities. There is less weathering of the top of the #4 seam in Anjialing than in Antaibao.

Table 3-17: Seam Statistics — Anjialing Open Pit

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#4	0.8 to 18.9	9.45	100 (to surface)
#7	0.0 to 2.39	0.59	19
#9	8.2 to 22.4	14.4	11
#11	2.1 to 9.8	4.2	15

The interburden between the #4 and the #9 seams ranges from 30 to 40 m and generally comprises sandstone with minor siltstone and claystone. These sediments are fresh and competent, requiring blasting prior to removal.

The #7 seam occurs sporadically throughout the Anjialing lease, and will be mined in areas where it is thicker than 0.3 m and economically viable.

Between the #9 and the #11 seams the interburden ranges from 10 to 20 m. Sediments between the #9 and the #11 seams are generally sandstones and siltstones. The siltstones display abundant pyrite on the bedding planes. As well, extremely hard ironstone nodules (up to 10 cm in diameter) are found to occur in the sandstone sediments which themselves are extremely hard due to silicification.

Structure

Anjialing geology is more structurally complex than that of Antaibao. At Anjialing, a series of synclines and anticlines cross the area. A major syncline/anticline feature strikes ENE and stretches some 6 km in length, with dips between 5 and 9 degrees. Smaller synclines are oriented NS and EW.

A series of reverse and normal faults are generally found striking in a NNE or NE direction. These faults have significant vertical displacements ranging from 10 to 125 m. These faults will modify the shape and economics of the open-pit design, but will not significantly affect the overall reserves of the mine. There is no evidence of igneous activity in Anjialing coalfield.

Coal Quality

As in Antaibao, all the coal mined at Anjialing produces thermal coal products.

All the ROM coal is washed through a dense medium cyclone wash plant at the mine site (see Coal Processing section for more details). The typical quality parameters of each seam are summarised in Table 3-18.

Table 3-18: Typical Coal Quality — Anjialing Open Pit Seams

Seam	Inherent Moisture % (ad)	Raw Ash % (ad)	Washed Ash % (ad)	Raw Sulphur % (ad)	Washed Sulphur % (ad)
#4	2.8	27.0	17.0	0.61	0.68
#7	2.3	24.7	16.0	3.11	2.30
#9	2.1	22.4	15.0	2.19	2.18
#11	2.0	29.8	18.0	2.75	2.17

Resource Estimation

As Anjialing commenced construction in 1998, the drilling program was executed as recently as the 1990s using a drilling rig imported from the United States of America. Consequently, all boreholes have a high level of reliability due to the excellent core recovery achieved.

The coal resources for Anjialing mine are shown in Table 3-19 and were current as at 30 June 2006.

Table 3-19: Coal Resources — Anjialing Open Pit

Seam	Resources (Mt) Measured	Indicated	Inferred	Total Resources (Mt)	Mineable Resources (Mt)
#4	51	184	147	382	235
#7	3	15	25	43	18
#9	144	206	263	613	350
#11	49	70	58	177	119
Total	247	475	493	1,215	722

3.8.3 Coal Reserves

Similar recovery factors, mining dilution factors and mining losses to Antaibao as indicated in Section 3.7.3 were applied to determine the coal reserves for Anjialing. The resulting figures are shown in Table 3-20.

Table 3-20: Coal Reserves — Anjialing Open Pit

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
95	235	451	686	13	10	656	87.1	572

3.8.4 Mining and Operations

The Anjialing mining operation covers an area of 48 km^2 with the pit bottom in 2005 being mined to a length of 900 m. The layout of the seams and open-pit mines is shown in Figure 3-1. Anjialing coal mine uses standard truck and shovel mining methods. Pre-stripping is completed by a local contractor using a fleet of 5 m^3 FELs and 25 t capacity trucks. In the pit, drilling is completed by 10 Ingersoll Rand mast drills which can drill the 15 m bench in one pass. Blasting is done using non-electric initiation and ANFO explosive. Seven P&H 2800XPB electric shovels load blasted waste rock into a fleet of trucks of 150 to 170 t capacity.

The fleet of 49 trucks is a mixture of Caterpillar 789C, Dresser Haulpack and Komatsu 730E trucks. Anjialing open-pit also operates 13 track dozers, 4 tyre dozers, 5 water trucks and 8 graders. The strip ratio in 2005 was 4.6 m^3 waste to 1 t of in-situ coal (4.6:1). Coal is loaded by two FELs. The trucks transport the coal up the ramp to a dump hopper. The trucking distance is reduced by the dump hopper being located close to the top of the ramp.

Historical production statistics are shown in Table 3-21 below.

Table 3-21: Mine Production History, 2003 to 30 June 2006 — Anjialing Open Pit

		2003	2004	2005	30 June 2006
Pre-strip	million m^3	14.96	25.29	20.14	21.72
Overburden and inter-burden removed	million m^3	36.29	45.13	48.90	21.05
Total Waste	million m^3	51.25	70.42	69.04	42.77
Strip Ratio	m^3/t	4.65	4.81	4.60	4.64
Total Raw Coal Mined	Mt	11.01	14.45	15.01	9.22

3.8.5 Infrastructure

Electrical power is provided to Anjialing mine from the same grid supplying Antaibao open-pit mine with similar reliability. Due to the large demand from electric shovels, electric drills, the CPP and the worksite, Pingshuo Coal receives preferential supply reliability from the provincial suppliers.

The water source for the Anjialing mine is the same borefield which supplies Antaibao coal mine. To conserve water supplies, Anjialing has constructed a dam on the mine site to retain some flood waters during the wet months of June to August every year.

3.8.6 Capital and Operating Costs

Historical capital expenditure for Anjialing open-pit has been reported as a combined number with Anjialing Underground Mine as indicated in Table 3-22. Planned capital expenditure until 2008 has been indicated separately. Similar to Antaibao open-pit mine, cash operating cost has increased since 2003, but Anjialing open-pit has historically achieved very competitive unit cost results as indicated in Table 3-23.

Table 3-22: Capital Expenditure — Anjialing Open Pit and Underground

3.9 Anjialing Underground Mine

3.9.1 Introduction

The Anjialing Underground Mine is an extension of the Anjialing open-pit operation to curb the higher strip ratios in this part of the coal reserve. Construction commenced in 2003 and the mine produced 8.7 Mt during 2005. The underground mine consists of two shaft systems (No. 1 and No. 2 shaft), which are totally independent of each other for ventilation, coal conveyance and man and material transport and access purposes. Each shaft is equipped with a longwall mining system cutting at 3.2 m, while both utilise the top coal caving method of heights up to 10 m.

The design capacity of the mine incorporating both shaft systems and including upgrades to infrastructure and expansion to production equipment, has been estimated at 20 Mtpa through a feasibility study completed by the Design Institute in October 2005. Pingshuo Coal plans to invest RMB1,726 M from 2006 to 2008 as sustaining capital and to implement two additional longwall systems and upgrade current infrastructure to increase production from the two shafts to a combined 20 Mtpa during 2008. Mining is currently done in the #4 and the #9 seam at No. 1 shaft and in the #9 seam at No. 2 shaft.

3.9.2 Geology and Mineral Resources

The topography consists of undulating hills and is similar to that of Anjialing.

The stratigraphy of Anjialing Underground coal mines is outlined in Table 3-24. The Quaternary and Tertiary material is similar to that at Anjialing open-pit mine. The seams mined in Anjialing Underground are the #4^1, the #4^2, the #9 and the #11 seams. The #4 seam has split into the #4^1 and the #4^2 seams in Anjialing underground. There is little or no weathering of the top of the #4^1 seam in Anjialing underground.

Table 3-24: Seam Statistics — Anjialing Underground Mine

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#4^1	4.6 to 14.4	7.3	100 (to surface)
#4^2	0.9 to 4.8	3.1	1
#9	9.9 to 16.5	13.8	45
#11	0.4 to 7.7	3.7	15

The interburden between the #4^1 and the #4^2 seams ranges from 0.5 to 2 m and generally comprises siltstone and claystone.

Between the #4^2 and the #9 seams the interburden ranges from 40 to 50 m, generally consisting of sandstones and siltstones. It is considered that this interval is adequately thick and competent to allow for the subsequent extraction of the #9 seam.

Between the #9 and the #11 seams the interburden ranges from 10 to 20 m. The sediments between the #9 and the #11 seams are generally sandstones and siltstones which are quite strong due to the siliceous cement. It is considered that this interval is also adequately competent to allow for the subsequent extraction of the #11 seam.

Structure

Anjialing underground geology is not as structurally complex as that of Anjialing open-pit. At Anjialing underground, one major syncline crosses the area striking N50°E and stretching for some 6.75 km in length, with dips from 5 to 12 degrees.

Two major faults have been delineated at this stage from exploration drilling. Fault F25 is a normal fault striking N20°E, stretching for 1.5 km in length and with vertical displacements ranging from 40 m to 60 m. Fault F30 is also a normal fault striking N45°W, stretching for 1.1 km in length and with a vertical displacement of 20 m. F30 will only affect Anjialing underground over a 95 m interval. There is no evidence of igneous activity in Anjialing underground coalfield.

Coal Quality

As in Anjialing open-pit, all the coal mined at Anjialing underground produces thermal coal products.

All the ROM coal is washed through a dense medium cyclone wash plant at the mine site (see Coal Processing section for more details). The typical quality parameters of each seam are summarised in Table 3-25. Coal quality at Anjialing underground is very similar to that of Anjialing open-pit.

Table 3-25: Typical Coal Quality — Anjialing Underground Seams

Seam	Inherent Moisture % (ad)	Raw Ash % (ad)	Washed Ash F1.60 % (ad)	Raw Sulphur % (ad)	Washed Sulphur % (ad)
#4[1]	2.8	27.0	17.0	0.61	0.55
#4[2]	2.8	37.0	20.0	0.61	—
#9	2.1	22.4	15.0	2.19	1.70
#11	2.0	29.8	18.0	2.75	2.00

Gas

Methane gas concentration levels have not been measured in the #9 and #11 seams, however gas monitoring in the #4[1] seam indicates low levels (0.01 to 0.03%) of methane, which is expected to be the general case for the rest of the #4[1] and #4[2] seams.

Resource Estimation

As Anjialing underground is a relatively new project, the drilling program was executed as recently as the 1990s using a drilling rig imported from the United States of America. Consequently, all boreholes have a high level of reliability due to the excellent core recovery achieved.

The coal resources for Anjialing Underground Mine are shown in Table 3-26 and were current as at 30 June 2006.

Table 3-26: Coal Resources — Anjialing Underground

Seam	Resources (Mt) Measured	Indicated	Inferred	Total Resources (Mt)	Mineable Resources (Mt)
#4[1]	80	0	7	87	80
#4[2]	0	24	1	25	24
#9	127	0	15	142	127
#11	24	0	7	31	24
Total	231	24	30	285	255

3.9.3 Coal Reserves

SRK has applied a 75% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design. This has been assumed to allow for areas which will not be mineable or fully extractable, such as faults and intrusions, gateroads, main development entries etc.

A recovery factor of 80% has been applied as a mining loss based on the practical experience gained with the top coal caving method applied to mining heights in excess of 10 m during the last year, and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 3-27.

Table 3-27: Coal Reserves — Anjialing Underground

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
75	173	18	191	20	10	168	87	146

3.9.4 Mining and Operations

Anjialing Underground Mine utilises the longwall mining method of extraction with top coal caving behind the hydraulic shields. Coal is extracted at 3.2 m height with the shearer, and coal left in the roof up to a thickness of 10 m cave in when the shields are advanced. This coal is transported with a separate armoured face conveyor (AFC) installed behind the shields, and conveyed through a crusher before the coal is loaded onto a conveyor for transport to surface.

The longwall system at No. 1 shaft commenced production during 2004 and produced 913,000 t combined with development production. The longwall system at No. 2 shaft was commissioned during May 2005, with a combined production of 8.7 Mt achieved between the two systems during 2005 as indicated in Table 3-28. Planned maintenance in the mining panels is scheduled every morning from 08:00am to 12:00pm. All longwall mining equipment has been manufactured and supplied locally in China, except for internationally supplied high-pressure pumps and switchgear. The shearer models are MGTY400/930-3.3D with 800 t, ZFS8000/23/37 shields installed along the mining faces. Pingshuo Coal has planned for additional capital expenditure of RMB360 M during 2006 to install two additional longwall systems and ancillary equipment at each shaft respectively to achieve the increased production capacity of 20 Mtpa in 2008. The implementation of the second longwall system at No. 1 shaft occurred in August 2006 and the additional system at No. 2 shaft is planned to occur during early 2007.

Table 3-28: Mine Production History, 2003 to 30 June 2006 — Anjialing Underground

	2003	2004	2005	30 June 2006
Total Output (Mtpa)	—	0.91	8.70	6.57
Development (m)	—	—	23,867	15,885

Development in the mine is done by a combination of fully mechanised mining systems and blasting operations. The mechanised development panels are equipped with Chinese supplied S-150 roadheaders and the panels utilise continuous haulage for conveyance and hand bolting practices for roof support. Primary development of roadways is conducted with blasting methods.

The longwall faces are approximately 240 m wide and up to 3 km long. The life of mine extends to the western part of the reserve block and longwall panels in this area have been designed up to 6 km long.

Ground conditions are generally good except for localised areas where faults and intrusions occur in the coal seam. Standard bolting patterns require the installation of anchor and cable bolts with mesh as required for specific conditions and steel arches are utilised at spacings of between 0.3 and 2.7 m when required. Standard bolting requirements were displayed in the development panel during SRK's site visit.

No stonedusting practices are employed at the mine. Sidewalls and roof are washed down periodically with water according to the requirements of Chinese legislative requirements. Water barriers are in use as required by local legislation.

Ventilation quantities are generally lower than international standards but comply with local requirements. The quantity reported for the longwall panel is 25 cubic metres per second (m^3/sec) and for the development panel 5 m^3/sec. Low methane levels were reported and detected underground. In-time methane monitoring is available on the surface in a centralised control room and equipment underground is interlocked to trip power when methane levels exceed 1% concentration. Heat is generated during winter months and pumped into the mine to curb the extremely cold conditions experienced during winter.

Dust measurements are taken twice per month and are kept in compliance with legislation. No excessive dust levels were obvious underground during SRK's site visit.

Anjialing Underground Mine utilises modern methods of transportation which allow for lower installation and maintenance cost with flexibility to adapt to production and operational requirements. Coal is transported from the panels to surface by rubber belt conveyor systems and personnel and material are transported by diesel rubber-tyred equipment. Diesel equipment utilised underground complies with statutory flameproof requirements.

3.9.5 Infrastructure

The underground mine is equipped with six shafts. No. 1 shaft system has two incline shafts, one for coal conveyance by conveyor belt to surface and one for men and material transport. The third shaft is vertical for ventilation extraction from the mining area. No. 2 shaft is also equipped with three shafts, with all three constructed as incline shafts.

Capital of RMB2.6 M has been provided during 2006 for additional stockholding of conveyor equipment and parts to ensure minimum impact on the increased production capacity due to possible delays on the coal conveyor systems. China Coal acknowledges the importance of high capacity and reliable incline conveyor systems to convey the coal from underground to surface, and distribute the coal to the various coal handling stations on surface. Therefore, additional capital expenditure of RMB73.4 M(RMB25.6 M for No. 1 shaft and RMB47.8 M for No. 2 shaft) has been provided during 2007 to increase the belt widths at both incline shafts to 2.0m and increase conveyance capacity to approximately 6,000 tph each. Both conveyor systems will be equipped with variable frequency 'soft start' drive systems and the capital provision includes upgrading and replacement of the conveyor drives and control systems as required. The replacement and upgrade plan allows six months for placement of orders and delivery to site, with one month allocated per shaft system to remove the existing conveyor system and replace with the upgraded system. China Coal has reported that it is in the process of planning an increase in production levels during the remaining 11 months of 2007 to ensure minimum negative impact on forecast production levels for the year.

The feasibility study indicated that the current ventilation capacity at No. 2 shaft will require doubling to provide for the ventilation requirements with an increased production capacity of 10 Mtpa. It has been established that this will be achievable by adjusting blade angles on the surface fan, however Pingshuo Coal additionally provided for capital investment in 2007 to the value of RMB1.8 M to install a higher capacity ventilation system and ensure a more reliable system with redundancy.

As reported, the water supply network for the underground mine is similar to the open-pit mines'. Water is recycled for underground use through a surface dam. The approval for the expansion of the water supply network will also serve the underground mine.

The current power supply system has been reliable after a few minor problems were rectified during 2004. The same power supply network for the open-pit mines is used for the underground mine and reports on reliability are consistent with feedback from the open-pit operations. Power is supplied via the two surface substations and supplied to the underground mine at 35 kV. Four lines supply the underground network and the feeds are transformed to 10 kV through two underground 1,250 kVA transformers and distributed to the underground workings. The installed capacity of the supply network currently exceeds the maximum usage of the mine. Pingshuo Coal has provided for additional capital expenditure of RMB25 M during 2006 to upgrade the current distribution system to allow for the increased capacity envisaged for the mine in future.

Capital and Operating Costs

Capital and operating costs for Anjialing Underground Mine are shown in Table 3-29 and Table 3-30. Anjialing Underground Mine commenced operations in 2004, with 2005 the first year to measure and report representative unit operating costs. Production figures increased sharply from 2004 resulting in a very competitive cost result for an underground operation as indicated for 2005. Capital expenditure has been planned separately from Anjialing open-pit mine from 2006 onwards, and an increased expenditure has been allowed for 2006 to fund the upgrading of equipment and infrastructure to increase the production capacity of the mine.

Table 3-29: Capital Expenditure — Anjialing Underground

3.10 Antaibao Underground Mine

3.10.1 Introduction

Pingshuo Coal commenced the establishment of an underground mine to the north of the current Antaibao open-pit mine during 2005. Two of the three shaft systems have been developed to the coal seam and the auxiliary shaft construction has commenced but has been awaiting the anticipated government approval for a mining licence by October 2006 before completion. A mining licence has subsequently been received, dated 30 August 2006.

A feasibility study was completed by the Design Institute in November 2004 to establish an underground operation with an annual capacity of 8 Mt. A schedule of implementation and commissioning

indicates the commencement of one longwall operation 14 months after government approval has been received, with a second longwall unit commencing production 12 months later.

The feasibility study provides for the extraction of the total seam with top coal caving methods similar to the highly successful method applied at the adjacent and operating Anjialing Underground Mine.

As the mining licence for Antaibao underground has been issued earlier as anticipated on 30 August 2006, China Coal management has indicated that all available resources will be applied to further improve on the construction and implementation schedule of the longwalls, and commence production within a reduced timeline compared to that indicated in the feasibility study. It has also been indicated that plans are being developed to implement the two longwall systems simultaneously to reach maximum production levels in the shortest possible time period.

Total project value has been estimated at RMB1.013 Billion with RMB296 M expended up to the end of 2005.

3.10.2 Geology and Mineral Resources

The topography consists of undulating hills and broad valleys and is similar to that of Antaibao open-pit mine.

The stratigraphy of Antaibao underground coal mine is outlined in Table 3-31. The Quaternary and Tertiary material is similar to that at Antaibao open-pit mine. The seams mined in Antaibao underground are the #4 and the #9, while it is planned to mine the #11 seam in the future. There appears to be a washout zone in the #11 seam in the northern part of the area where the seam thins to 0.35 m. Coal less than 0.7 m in this area has been excluded from the resource, however China Coal plans to utilise ploughs or similar technology to mine the thinner areas of the #11 seam between 0.7 and 1.5 m thickness. There is some weathering of the top of the #4 seam in Antaibao underground and these weathered areas have been defined by the borehole data and excluded from the resource estimation.

Table 3-31: Seam Statistics — Antaibao Underground

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#4	5.1 to 15.9	10.5	120 (to surface)
#9	6.7 to 18.6	12.8	40
#11	0.95 to 6.5	2.9	15

The interburden between the #4 and the #9 seams averages 38m to 40m and generally consists of sandstones and siltstones. It is considered that this interval is adequately thick and competent to allow for the subsequent extraction of the #9 seam.

Between the #9 and the #11 seams the interburden ranges from 10m to 20m. The sediments between the #9 and the #11 seams are generally sandstones and siltstones which are quite strong due to the siliceous cement. It is considered that this interval is also adequately competent to allow for the subsequent extraction of the #11 seam.

Seams #6, #8 and #10 have some areas of potential resources, however they are generally thin seams (about 1m thick), have limited aerial extent and have limited borehole data available. Therefore, these three seams have been excluded from the resource estimation for the Antaibao Underground Mine.

Structure

From the current borehole data and resultant structural contour plans of each seam roof, it is deduced that Antaibao underground geology is not structurally complex. The seams are generally flat with the average dip of 5 degrees near the subcrop and less than 2 degrees further down dip. At Antaibao underground, one major fault near the southern boundary of the project area trends East-West and stretches for some 5 km in length. Resources for the project have excluded coal south of the fault.

Minor faults have been delineated but their location and displacement have yet to be accurately defined. These minor faults are expected to have little impact on the mining operations.

Coal Quality

As in Antaibao open-pit, all the coal mined at Antaibao underground will produce thermal coal products.

All the ROM coal will be washed through a heavy-dense medium cyclone wash plant at the mine site (see Coal Processing section for more details). The typical quality parameters of each seam are summarised in Table 3-32. The coal quality at Antaibao underground is very similar to that of Antaibao open-pit.

Table 3-32: Typical Coal Quality — Antaibao Underground Seams

Seam	Inherent Moisture % (ad)	Raw Ash % (ad)	Washed Ash % (ad)	Raw Sulphur % (ad)	Washed Sulphur (ad)
#4	2.0	28.0	8.1	0.42	0.48
#9	2.2	20.7	7.1	2.46	1.05
#11	2.5	23.9	—	2.02	1.27

Gas

Gas samples have been taken for seams #4 and #9 from the boreholes drilled in the Antaibao underground area. All tests indicate very minor volumes of gas (generally less than 1 m^3/tonne) and minor methane content (<5%). No results were available for the #11 seam at the time of writing to assess the concentration of gas in this seam.

Methane gas monitoring in the #4 and #9 seams indicates low levels (0.01 to 0.03%) of methane, which is expected to be the general case for the rest of the resource for these seams.

Resource Estimation

Two phases of drilling were completed in the Antaibao underground mining area. Most of the boreholes were drilled in the 1980s, and subsequently 12 boreholes were completed in 2005. The quality of the results is similar in both programs. Generally the core recovery was less than 90%.

The parameters used to estimate the coal reserves are as follows:

- Minimum coal seam thickness of 0.7 m
- Maximum ash content of 40% (air dried)
- Maximum sulphur content of 3%
- Tonnage is calculated using coal density only and does not include partings (e.g. for the #11 seam, actual density ranges from 1.5 to 1.7 t/m^3, but for resource calculations, a density of 1.42 t/m^3 is used)

- Partings greater than 5 mm within a coal seam have been excluded from the thickness used to estimate the coal resources
- For areas where no coal was found or where coal is oxidised, the reserve estimate projects coal to half-way between drill holes
- For known faults with 10 m throw or greater, a zone of 50 m either side of the fault is down-graded to the next category

A MOLAR approved resources report was completed in 2006 for the northern half of Antaibao underground. However, as the report for the other half of the deposit was not finalised at the time of writing this report, resource estimates are conservatively based on the MOLAR approved report dated 2004.

The coal resources for the Antaibao underground coal mine are shown in Table 3-33 and were current as at 30 June 2006.

Table 3-33: Coal Resources — Antaibao Underground

Seam	Resources (Mt) Measured	Indicated	Inferred	Total Resources (Mt)	Mineable Resources (Mt)
#4	94	96	115	305	190
#9	231	143	170	544	374
#11	41	56	60	157	97
Total	366	295	345	1,006	661

3.10.3 Coal Reserves

SRK has applied a 75% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design. This has been assumed to allow for areas which will not be mineable or fully extractable, such as faults and intrusions, gateroads, main development entries etc. A recovery factor of 80% has been applied as a mining loss based on the practical experience gained with the top coal caving method applied to mining heights in excess of 10 m at Anjialing underground during the last year, and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 3-34.

Table 3-34: Coal Reserves — Antaibao Underground

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
75	275	221	496	20	10	436	87	380

3.10.4 Mining and Operations

According to the feasibility study, longwall production is planned to commence 14 months after government approval for a mining licence has been received. Construction of the shaft systems commenced during the first half of 2005 and orders have already been placed for three roadheader machines to enable development activities to commence immediately after approval has been received.

Mining will commence in the #9 seam and the mining schedule indicates the commissioning of a second longwall system a year later in the #4 seam. A feasibility study was completed in November 2004 to

this effect, forecasting the mine to reach 8 Mtpa at full production levels. The longwall systems will be set up to cut at 3.2 m high with the rest of the coal seam to be extracted with the top coal caving method.

It has been budgeted to implement similar modern transport arrangements with rubber-tyred vehicles to those successfully implemented at Anjialing Underground Mine.

3.10.5 Infrastructure and Coal Processing

Three shaft systems are planned for Antaibao Underground Mine. All three shafts are incline shafts, with the following levels of development advance completed in June 2006.

- Main shaft for coal conveyance at 14 degrees — reached the #9 seam with a length of 487 m
- Auxiliary shaft for transport of men and material at 5.5 degrees — developed 240 m and awaiting government approval. Total shaft length to the #9 seam is planned at 1,300 m
- Ventilation shaft at 20 degrees — length of 359 m and intersected the #9 and the #11 seam

The main shaft reaches the surface within the confines of the Muguajie CPP providing for limited overland conveyance of the ROM coal to the wash plant for processing.

3.10.6 Capital Costs

The forecast capital for the Antaibao Underground Mine are shown in Table 3-35. Capital expenditure is predicted to increase further during 2006 and peak at almost RMB400 M in 2007 with the installation of the longwall unit.

Table 3-35: Capital Expenditure — Antaibao Underground

Operating Company and Mine	Mining Method	Capital Expenditure (RMB Million)					
		2003	2004	2005	2006	2007	2008
Pingshuo Coal Company							
Antaibao	UG	—	68	228	298	390	29

3.11 Pingshuo East (Donglutian Project — Pingshuodong Open Pit)

3.11.1 Introduction

A request for a feasibility study of the mine was submitted to the Design Institute by Pingshuo Coal at the end of April 2005 with the report completed in June 2005. Verification and approval of the feasibility study report was expected to determine the mining method and other detailed information.

Pingshuo Coal has received approval to mine an area of 48.7 km^2 within the lease, and is presently awaiting a mining licence. Preliminary construction activities and the establishment of services have commenced during 2006 to enable pre-stripping operations.

3.11.2 Geology and Mineral Resources

The topography consists of undulating hills and is similar to that of Anjialing open-pit mine.

Table 3-36: Stratigraphic Sequence — Pingshuo East

Stratigraphic Unit	Thickness Range (m)	Average Thickness (m)
Quaternary	0 to 63	25
Tertiary	0 to 59	23
Upper Permian	0 to 148	25
Upper Lower Permian	0 to 97	49
Lower Lower Permian (Shanxi Group)	11 to 98	60
Upper Carboniferous (Taiyuan Group)	57 to 105	79

The Quaternary and Tertiary material is similar to that at Anjialing. The seams to be mined in Pingshuo East are the #4, #5, #6, #7, #8, #9 and the #11 seams. There is little weathering off the top of the #4 seam.

Table 3-37: Seam Statistics — Pingshuo East

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#4	4.4 - 25.7	14.0	100 (to surface)
#9	6.0 - 22.4	13.95	37
#11	0.5 - 10.1	5.4	6

The interburden strata at Pingshuo East are similar in nature to those of Anjialing mine. Samples taken of immediate roof and floor material adjacent to the seams were analysed and showed high sulphur contents:

- The #9 seam roof material averages 10% sulphur (max 14%)
- The #11 seam floor material averages 15% sulphur

Structure

As with Anjialing, Pingshuo East geology is structurally complex. Dips up to 30 degrees and evidence of large scale faults have been interpreted from exploration drilling.

Similar to Anjialing, this complex structure will modify the shape and economics of the open-pit design, but will not significantly affect the overall reserves of the mine. There is no evidence of igneous activity in the Pingshuo East area.

Coal Quality

The coal mined at Pingshuo East will produce thermal coal products.

The ROM coal will be washed through a dense medium cyclone wash plant. The typical quality parameters of each seam are summarised in Table 3-38. Information for seams #5, #6, #7 and #8 is not abundant as reflected in the resource classification.

Table 3-38: Typical Coal Quality — Pingshuo East Seams

Seam	Inherent Moisture % (ad)	Raw Ash % (ad)	Washed Ash % (ad)	Raw Sulphur % (ad)	Washed Sulphur % (ad)
#4	2.3	30.5	16.0	0.49	0.40
#9	3.4	27.7	15.0	2.36	2.20
#11	1.5	33.9	16.0	2.96	2.20

Resource Estimation

The drilling program in the Pingshuo East area was executed in the 1990s using a drilling rig imported from the United States. All boreholes have a high level of reliability due to the excellent core recovery achieved.

The coal resources for Pingshuo East mine are shown in Table 3-39 and were current as at 30 June 2006.

Table 3-39: Coal Resources — Pingshuo East

Seam	Resources (Mt)			Total Resources (Mt)	Mineable Resources (Mt)
	Measured	Indicated	Inferred		
#4	165	336	260	761	501
#5	0	0	23	23	0
#6	0	12	32	44	12
#7	0	0	6	6	0
#8	0	7	33	40	7
#9	180	248	361	789	428
#11	29	56	101	186	85
Total	374	659	816	1,849	1,033

3.11.3 Coal Reserves

SRK has applied a 95% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design, including such areas as final batters and pit end-walls. Mining loss and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 3-40.

Table 3-40: Coal Reserves — Pingshuo East

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
95	355	626	981	13	10	939	87.1	818

3.11.4 Capital Costs

The forecast capital expenditure for the Pingshuo East mine is shown in Table 3-41.

Table 3-41: Capital Expenditure — Pingshuo East

Operating Company and Mine	Mining Method	Capital Expenditure (RMB Million) 2003	2004	2005	2006	2007	2008
Pingshuo Coal Company							
Pingshuo East[1]	OP	—	—	—	200	2,447	2,224

(1) A Mining Right for the Pingshuo East OP is expected to be granted in March 2007

The capital expenditure is being used to construct the new mine and associated infrastruture. Pingshuo East mine is forecast to produce at the rate of 20 Mtpa at full production which is scheduled to occur in 2009. The capital expenditure predicted includes the construction of a CPP and rail facilities with improvement to port facilities as required, to an amount of approximately RMB1,000 M, to support a 20 Mtpa production capacity.

4 SHANGHAI DATUN ENERGY RESOURCES COMPANY

4.1 Introduction

China Coal is the major shareholder (62.43%) in the Shanghai Datun Energy Resources Co., Ltd. (Datun Coal) which owns and operates four underground mines in close vicinity (10 to 20 minutes drive) to the town of Datun. Datun is one hour's drive from Xuzhou in Jiangsu province. The head office of the company is located in the centre of town and staff provide strategic direction for the company. An extensive maintenance facility is also located in town to refurbish the underground mining equipment after use and is leased back to the mines as agreed with the head office in their yearly plans.

Datun Coal operates the Longdong, Yaoqiao, Xuzhuang and Kongzhuang underground mines and also supplies coal to the two power stations owned by the company. The power plants supply electricity for internal and local use with excess sold to the provincial grid. A small portion of the coal product is destined for export purposes. The company also owns a railway line of 86 km to the city of Xuzhou for the transportation of coal and people.

The underground mines operate in difficult to very difficult mining conditions (up to 30 degrees dip in the coal seam in local areas at Kongzhuang mine) and are either currently mining or planning to mine under the Zhaoyang and Weishan Lakes. The mines are operating from 280 to 780 m below surface with sufficient clay content in the overlaying strata to isolate the mines from any inflow of surface water from the lakes.

During 2005, Datun Coal produced a total of 7.12 Mt of raw coal between the four underground mines.

4.2 Corporate Management Structure

Datun Coal management structure is shown in Appendix 2 and workforce numbers are shown in Table 4-1.

Table 4-1: Workforce Numbers — Datun Coal

Category	Employees
Production[1]	
Longdong UG	1,749
Yaoqiao UG	2,833
Xuzhuang UG	2,117
Kongzhuang UG	2,090
Management[2]	11
Other[3]	766
Total	**9,566**

(1) Permanent and contractor employees involved in mining activities

(2) Senior management — excludes functional departments

(3) Only personnel involved with the mines — excludes CHPP, rail etc

The minimum wage paid by the company is RMB900 per month. Salaries and wages are as far as possible set at the same level between the mines with cost figures indicating the average salary at RMB1,690 per month.

4.3 Occupational Health and Safety

The mines in Datun Coal have all implemented a typical structure of a safety vice-president at the mine sites with safety monitors from head office and at the sites to conduct inspections and improve safety conditions. Employees are also encouraged to identify and report hazards and recognition is given by financial means or otherwise when employees participate in this process.

Accident and incident investigations are conducted after an incident occurs in an attempt to determine the root cause. Safety procedures are in place and developed through the accident investigations to prevent a re-occurrence of a similar incident. This information is also communicated at the other mine sites to prevent future occurrences. Safety training is conducted with all personnel on an annual and bi-annual basis.

Safety statistics for the four mines combined since 2003 are listed in Table 4-2.

Table 4-2: Accident Statistics, 2003 to 2005 — Datun Coal

Category	2003	2004	2005
Fatal[1]	4	0	3
Serious[2]	4	2	3
Minor[3]	0	15	0

(1) Accident causing death (number indicates lives claimed)

(2) Accident requiring hospitalisation and do not return to work for more than 24 hours (includes fatal incidents)

(3) Accident which does not require hospitalisation and employee returns to work within 24 hours

SRK observed at all the mines operated by Datun Coal that safety is a significant consideration with resources consistently applied to achieve the best possible result. The safety statistics reflect good performance compared to the Chinese average.

4.4 Environmental Assessment

4.4.1 Introduction, Scope and Background

An environmental assessment of Datun Coal was completed to assess environmental management across its operations. The primary reason for assessing Datun Coal's environmental management was to identify any potential financial liabilities arising from its operations, which include:

- Longdong, Yaoqiao, Xuzhuang and Kongzhuang underground coal mines and associated infrastructure
- Auxiliary facilities located in and around the town of Datun, including a mining equipment maintenance facility, two power plants and a waste water treatment plant

In addition to visiting the above listed major sites, the environmental assessment included interviews with key environmental staff members of Datun Coal, inspection of relevant environmental documentation and interpretation of responses to an environmental questionnaire provided by SRK.

This environmental assessment is reported entirely at corporate level. This approach was adopted as Datun Coal maintains an environmental group within its technical division located at head office that oversees all operations. Its company-wide environmental management model has been developed so that it is reproduced almost identically at all four operational mines, with minor site-specific variations as required. The model allows for site feedback to head office to provide input to fine tune annual environmental plans, a method which appears to operate well. Comments relevant to the operational facilities in the Datun township are incorporated as appropriate.

4.4.2 Corporate Environmental Awareness

In 2005 Datun Coal had ISO14001:1996 accreditation for its corporate environmental management systems, which incorporates the management of Longdong, Yaoqiao, Xuzhuang and Kongzhuang underground mines, as well as the auxiliary facilities in and around Datun township.

In addition to ISO14001:1996 accreditation, Datun Coal also has ISO9001:2000 quality assurance and Chinese GB/T28001 occupational health and safety accreditation, which also incorporates the management of all four mines and auxiliary facilities. All three accreditations are valid until 2007. Independent audits are completed yearly by the China Quality Association to maintain these accreditations. Datun Coal also has a continual environmental improvement program in place across its operations.

4.4.3 Mining Title and Royalty Payments

Datun Coal is licenced to mine coal at all four of its underground mines, each of which were inspected by SRK. Mining licence details are provided in Table 4-3. Datun Coal has surface rights on the mining sites for 50 years, with all mining licences valid until April 2029. Should Datun Coal still have mineable coal reserves following expiration of mining licences, it has the priority right to apply for a new or extended licence. All mining licences were issued by MOLAR. It is understood by SRK that all four mining licences have been transferred from Datun Coal to China Coal for the purpose of the IPO.

Table 4-3: Mining Licence Details — Datun Coal

Mine	Mining Licence No.	Mining Area (km^2)	Issue Date	Licence Tenure
Yaoqiao	1000000020071	63.8	April 2000	29 years
Xuzhuang	1000000320025	38.4	August 2003	26 years
Longdong	1000000020073	25.0	April 2000	29 years
Kongzhuang	1000000020072	44.1	April 2000	29 years

Datun Coal pays mining royalties and taxes according to the Mineral Resources Law (1996 as amended). There are no options held over the mining land other than by the government and Datun Coal is not permitted to divest mining licences to other commercial operations.

4.4.4 Environmental Licencing, Compliance and Reporting

For Datun Coal operations, operational licences were granted at provincial level for boundary noise, gaseous emissions and water discharge. Further to these environmental licences, Datun Coal maintains licences at individual mine level from the local Pei County Water Resource Management Commission for groundwater extraction, in addition to licences from Xuzhou Xushou Public Security Bureau for fuel storage.

Each mine operated by Datun Coal prepares an individual annual environment report to the Chinese (State) Environmental Protection Bureau. This report incorporates information on waste volumes generated, noise data, wastewater data and gaseous emissions data. The report is passed down from state to provincial regulators for approval, then to the local county environmental regulators, both of which conduct random inspections. In this regard, Datun Coal must remain environmentally vigilant and be prepared for these random checks, which are carried out by the provincial agency approximately every six months and by the local agency on average once per month.

Should Datun Coal not meet relevant Chinese National Standards for gaseous emissions, water and noise, it faces either a warning, financial penalty, or criminal liability in extreme cases. Datun Coal ensures it is well prepared for such inspections by maintaining its own in-house environmental monitoring station which collects data on noise, water and emissions to monitor its continued compliance. SRK completed a random check on monthly water quality discharge data from Datun Coal's town WWTP. This data was reported by the local county environment officials to meet national standard GB8978-1996. SRK found that all discharge data was within the relevant criteria. SRK also inspected the Annual Environment Report for Kongzhuang Mine and found all environmental data to be in compliance with relevant criteria.

In addition to these local and provincial environment inspections at the individual mine operational level, the China Quality Association audits Datun Coal annually to maintain its corporate ISO14001:1996 accreditation for environment management systems. Datun Coal has sound results in regard to environmental credentials, with zero fines to date, as well as continued ISO14001:1996 accreditation. SRK has observed that Datun Coal has proactively implemented a continuous environmental improvement program, and it is SRK's opinion that there is a strong likelihood that Datun Coal will maintain its unblemished environmental record.

4.4.5 Environmental Staff

Datun Coal's commitment to the environment is reflected in its allocation of human resources. The head office technical centre has two environmental managers supervising approximately 30 technical staff, with an additional 10 staff employed in a separate environmental monitoring station. Each individual mine has between four and six environmental managers overseeing between 20 and 60 general staff who assist with day-to-day environmental management on site. Auxiliary facilities in Datun township also have at least one on-site

staff member responsible for environmental management. Although none of the operational workforce responsible for environmental management have tertiary qualifications in environmental studies, Datun Coal ensures that environmental managers are suitably qualified. SRK observes that Datun Coal's commitment to its environmental management responsibilities is suitably reflected in the number of staff dedicated to the environment across all operations.

4.4.6 Environmental Planning and Budgets

Datun Coal produces annual environment plans and budgets that are overseen and compiled at corporate level, with input and feedback from the individual mine level throughout the preparatory stages. Individual mines are autonomous with respect to spending the allocated environmental funding, however final sign-off responsibility remains at corporate level.

SRK inspected Datun Coal's 2005 annual environmental plan and budget, which contained details of company-wide environment projects primarily focused on:

- Improving water use and treatment efficiency
- Improving energy efficiency through heating and lighting
- Dust management
- Noise reduction schemes
- Environmental audits
- Purchasing environmental data management software

The environmental plan showed that Datun Coal had allocated approximately RMB4.4 M for environmental projects during 2005. This figure excludes an additional environment budget of RMB18.5 M across all four mines solely dedicated to land rehabilitation over the next five years.

4.4.7 Water Management

Datun Coal has a company-wide emphasis on water conservation, as demonstrated by extensive use of on-site treatment and recycling. SRK visited the water treatment facility on Kongzhuang Mine where American-made reverse osmosis technology was being utilised to treat water to potable standards. This water is re-used across the mine in other applications including staff showering and coal washing. While this technology is not present across all Datun Coal facilities, industrial waste water recycling is. This policy extends across the mines, coal washing plants, site WWTP and power stations, with these plants having a zero water discharge policy. Some treated water that meets relevant criteria is discharged in Datun township from the WWTP, which is owned and operated by Datun Coal as required.

Supplementary water is sourced at each mine and at town facilities by a series of groundwater wells approved by local authorities. Use of this groundwater is being phased out for dust suppression in the underground mines in favour of using recycled water. Similarly, Datun Coal has long term plans to upgrade its WWTP to treat water to potable standards. Surface water is well managed across the mine sites by a series of drains, sedimentation dams and treatment methods.

4.4.8 Waste Rock, Tailings and Rehabilitation Management

Due to the underground nature of all four mines at Datun Coal, the generation of waste rock is significantly less than for an open-pit mine. The waste rock is typically shale, which is non-reactive when exposed to oxygen. Visible pyrite was however noted in the waste rock at the Longdong mine, though no geochemical data was available to review. Each mine has a temporary waste rock stockpile where shale is

stored prior to being re-used to infill mine subsidence in addition to road building. Despite the presence of visible pyrite in the waste, the regulators encourage the re-use of all waste rock as backfill and road base. SRK inspected a rehabilitated area near the Longdong mine and noted after discussion with local residents that they (local residents) appeared to be satisfied with the roads and fish breeding ponds constructed by Datun Coal. Tree planting and landscaping had also been completed on the rehabilitated areas by sub-contractors. There was no visible pyrite or secondary salts evident on road surfaces and SRK noted the presence of near-surface limestone quarries locally, evidence of the potential acid-neutralising capability of the local geology. Datun Coal is also completing a feasibility study to determine if the waste shale can be used in the brick making industry.

Discussions with environment managers at each mine indicated that the temporary waste rock stockpiles were all decreasing in size as wastes were beneficially re-used. All environment managers indicated that they were confident this trend would continue. Environmental management on the waste rock dumps included dust suppression and diversion trenches for surface water run-off that leads to sedimentation ponds. There was also sufficient storage capacity at all four mines for the waste rock generated.

As noted earlier, Datun Coal has a five year budget of RMB18.5 M across all four mines solely dedicated to land rehabilitation over the next five years. No long term closure plans have been compiled as yet, although head office does maintain five year progressive rehabilitation plans, commensurate with the management of mine subsidence.

Coal wash tailings from the Datun Coal wash plant located in Datun township proper are transferred via conveyor to the adjacent power plant and beneficially re-used as fuel. Tailings from the two coal wash plants at Longdong and Kongzhuang mines are either dried and sent to the second Datun Coal power plant in the mine precinct, or sold cheaply to local brick makers as fuel for their kilns. The waste has been classified locally as 'Grade A' and has been approved for re-use. Power plant ash is then sold to the local cement plant where it is also beneficially re-used.

4.4.9 Dust Management

Datun Coal regularly monitors dust as environmental best practice. In this regard, dust is monitored at the underground longwall working face for employee occupational health and safety. Dust suppression underground occurs in the form of water sprays at the longwall working face. Dust suppression also occurs via water sprays on waste rock stockpiles and on conveyors in the coal washing plants.

4.4.10 Social and Regulatory Relations

Following discussions with Datun Coal representatives it appears that relations with both local residents and regulatory bodies are sound. Good relations with the local community are primarily due to continued job opportunities, with approximately 28,000 people employed across all sectors of Datun Coal's business. Employment for this large number of individuals also has positive downstream effects on the local and regional economy in service industries and the like.

Residents directly affected by underground mine site operations are compensated by Datun Coal and relocated from the area. Datun Coal compensates residents for loss of land and as Datun Coal rehabilitates land subsidence into fish breeding ponds, local residents also have access to these facilities.

Relations with statutory bodies are also sound as evidenced by the fact that Datun Coal has never been fined for any environmental incidents. It is SRK's opinion that Datun Coal's proactive approach in addressing its environmental responsibilities helps to maintain these positive relationships with relevant regulatory staff.

4.4.11 Environmental Assessment Conclusions

Following interviews with key Datun Coal environmental staff and inspection of environmental documentation and operational sites, it is apparent that Datun Coal views itself as a champion of environmental management in China and prides itself on its environmental performance to date. SRK believes that Datun Coal has a sound and proactive approach to its environmental responsibilities and is managing its operations in compliance with its environmental obligations. This opinion is supported by the fact that Datun Coal has not been fined for any environmental breaches across its operations to date. Specific focus appears to be on water management and conservation, with several plans in place for increasing the use of recycled water. Plans to increase water recycling is evident both in investment in plant and equipment to treat and re-use water, as well as through messages displayed around various sites reminding staff to minimise their water use. Several constructive plans are also in place to reduce energy use and discharge of emissions.

4.5 Coal Processing and Transport

The CPPs are situated very close to the mines with Yaoqiao and Xuzhuang mines sharing a plant, while Longdong and Kongzhuang are both provided with separate CPPs. Rejects are used in the company-owned power stations in the area, while product coal is railed for 86 km on a company-owned railway to Xuzhou. A small portion of the coal is destined for the export market through Shanghai via Nanjing.

4.5.1 Datun CPP

Datun CPP processes coal from the Yaoqiao and Xuzhuang mines. This processing plant is a jig plant which was constructed in 1996. The plant is well maintained and in good operating order. The ROM feed is delivered by train and dumped with a tippler to two 3,700 t capacity bins. The coal is then screened and the oversize handpicked before it is crushed to 50 mm top size. The full size range is fed to four three-product 2 m jigs. These jigs appeared to be operating overloaded and with insufficient expansion of the bed of solids, resulting in less than optimum separation of waste from coal. This situation provides an opportunity for further performance improvement.

Reject is either used as power station fuel or dumped. A reject pile was examined and no coal was observed. Middlings are stored in a 2,800 t bin for supply to a small power station on an adjacent site which is owned by others. The jig product is de-slimed and the fines reported to a flotation plant. Fine coal is dried with centrifuges and the flotation product is dried with disc vacuum filters. The flotation tailings are dried with plate and frame filters and added to the jig middlings. The train loading station operates at a rate lower than 1,000 tph.

Process Plant

The plant is budgeted to operate for 300 days/year. The ROM stream operates 24 hours a day, seven days a week and the plant operates for 14 hours a day, seven days a week. The capacity of the plant is 428 tph which delivers the required throughput of 1.8 Mtpa. Availability for the plant in 2004 was 76% which is lower than for comparable plants and therefore offers considerable potential for improvement. No flocculent is used in the thickener or filter feed.

Total workforce numbers including train loading and maintenance personnel are approximately 600.

Efficiency

The plant's efficiency is calculated by comparison of plant yield achieved and the software prediction of yield from washability data. The information made available was a predicted yield of 71%, an actual yield of 63% and an efficiency of 63/71 which equates to 88%. Based on these calculations, it is not a good result.

However the near gravity content of the feed was quoted as ± 0.1 Specific Gravity (SG), which equates to near gravity material at 14% of the feed. These tight operating conditions of ±0.1 SG is regarded by SRK as a difficult operating range for jigs. SRK observed the operating jigs and the low froth mobility on the cells, and believes the poor efficiency quoted indicates a real opportunity for improvement. The auto samplers in the plant are also primitive and could provide biased sampling results.

Quality

The plant yield for commercially traded coal is 68% and the product is sold as a blending coal. Ash and sulphur values are indicated in Table 4-4 below.

Table 4-4: Quality Parameters — Datun CPP

		Ash (%)	CV (kcal/kg)	Sulphur (%)	TM (%)
Feed	#7 Seam	21	—	0.9	—
	#8 Seam	24	—	0.7	—
Product	High Grade	7.7	6,500	0.55	11
	Middlings	9.2	6,500	0.7	11

4.5.2 Longdong CPP

The Longdong plant is a small, low capital CPP with the allocated maintenance budget obviously affecting plant condition. It is however in good operating condition but visibly not as tidy as the other CPPs. Due to capital considerations and constraints the plant is operated as a 'lump jig plant'.

It is equipped with a small single elevator jig that washes the 50 mm x 13 mm size range while the 13 mm x 0 mm size is all bypassed to product.

The plant is rated at 200 tph and is budgeted to run 300 days/year but only runs for approximately 10 hours/day as it is constrained by mine output. Availability was not identified as a limiting factor. The raw feed ash content is 20 to 35% and product quality (Calorific Value) is 6,500 kilocalories per kilogram (kcal/kg) for lumps and 5,500 kcal/kg for the fines product. Sulphur is reported to be between 0.70 and 0.75%. The total yield of the plant is approximately 85% including bypass and the entire product is sold as steaming coal. Quality parameters are shown in Table 4-5.

Table 4-5: Quality Parameters — Longdong CPP

		Ash (%)	CV (kcal/kg)	Sulphur (%)	TM (%)
Feed	#7 Seam	27	—	0.7	—
Product	High Grade	23	6,500	0.7	4.5

Total workforce at the Longdong plant is 245.

4.5.3 Kongzhuang CPP

Kongzhuang CPP is small in terms of throughput, however physically it is a very large plant. It has been converted from jig operation to dense medium operation with two new thermal drying units being commissioned. The plant is situated at the head of the mine drift and fed from skips. The plant was observed to be very clean and in good condition.

Materials Handling

The skips report to a single ROM bin with a capacity of 3,000 t. The plant is equipped with three product bins at 1,200 t capacity each, six middling bins with a total capacity of 2,000 t and two reject bins each with a capacity of 400 t. Train loading is done at 1,200 tph for product and 300 tph for middlings.

Process Plant

The 50 mm x 0.5 mm coal is washed in two stages. The first stage is by a Chinese manufactured Larcodem style dense media cyclone. The reject is rewashed in the same medium in a DMC with a wheel-driven shaft in the top to change cut point.

The 0.5 mm x 0 mm is floated in 'jet cells'. The product is dried on a vacuum filter and the tailings are dried on plate frame presses. The fines are planned to be dried further on the thermal driers when they are fully operational. One drier is already operational and is preceded by a feeder and pelletiser. The yield figures for the plant are:

- Product 68%
- Middlings 17%
- Tailings 4%
- Reject 11%

Budgeted operation is 300 days/year and 14 hours/day. Actual operation is 16 hours/day and the total throughput in 2005 was 0.85 Mt ROM.

The Kongzhuang plant is operated and maintained with a workforce of 420.

Quality

The quality parameters at the Kongzhuang plant were quoted as shown in Table 4-6.

Table 4-6: Quality Parameters — Kongzhuang CPP

		Ash (%)	CV (kcal/kg)	Sulphur (%)	TM (%)
Feed	#7 Seam	20	—	0.5	—
	#8 Seam	16	—	0.7	—
Product	High Grade	11	6,500	0.6	11.5

4.5.4 Coal Production History

The historical production for the Datun Coal processing plants is shown in Table 4-7, Table 4-8 and Table 4-9.

Table 4-7: Coal Processing Plants Production History, 2003 to 30 June 2006 — Datun

		2003	2004	2005	30 June 2006

4.6 Long Term Plans

Datun Coal's strategy for the future is to focus on the expansion of the four underground mines to maintain production at very similar rates to current levels. The ROM production volumes for the four mines and the group until 2008 are indicated in Table 4-10.

Table 4-10: ROM Production Forecast per Mine — Datun Coal

	2006 (Mt)	2007 (Mt)	2008 (Mt)

4.7 Kongzhuang Underground Mine

4.7.1 Introduction

Mine development activities at Kongzhuang commenced during 1971 and longwall mining activities started in 1977. The mine is equipped with an operating longwall system and a 'standby' longwall system that is utilised for pre-installation purposes for the next longwall panel. A top coal caving method is utilised for extracting the total coal seam of 5 m during longwall operations.

Two seams are mined at three levels at the Kongzhuang mine, i.e. the #7 and #8 seams. The top level caving method is used in the #7 seam and a slicing method of first taking the top part of the seam and then the lower part, is applied in the #8 seam. The seams mined vary from 375 up to 785 m below surface. Kongzhuang mine is undermining the Weishan Lake, however no inflow of water from the lake is evident due to the composition and thickness of the overlying strata. The mine achieved 1.15 Mt during 2004 and 2005 compared to the respective plans of 1.05 Mtpa.

4.7.2 Geology and Mineral Resources

Topographic relief for the Datun region is considerably flat, averaging 35 m above sea level. The majority of the mining areas underlie farming land.

The general trend of the geology for the Datun region is characterised by the more simple geology occurring in the northern part of the area (Longdong mine) where the Permian strata dip is 10 degrees, with the geology increasing in complexity towards the south (Kongzhuang mine) where the seams are deeper, steeper (25 to 30 degrees) and have higher gas content.

Kongzhuang mine covers an area of approximately 44 km^2. The area is 13.8 km in length along the strike (EW direction) and about 5 km in width. The Permian strata dips to the north and varies from 24 degrees to 31 degrees.

The Kongzhuang area contains a large igneous intrusion in the east, eliminating almost half of the coal resources in the area. Consequently, only the western half of the area can be mined but still contains a large Marketable Reserve.

The stratigraphy of Kongzhuang coal mine is outlined in Table 4-11.

Table 4-11: Stratigraphic Sequence — Kongzhuang

Stratigraphic Unit	Thickness Range (m)	Average Thickness (m)
Quaternary	0 to 195	140
Jurassic and Cretaceous	0 to 320	0(1)
Upper Permian (Shang Shi Hi Zi Group)	200 to 320	270
Upper Lower Permian (Xia Shi Hi Zi Group)	185 to 295	225
Lower Lower Permian (Shanxi Group)	90 to 135	100
Upper Carboniferous (Taiyuan Group)	135 to 160	155

(1) Zero indicates unit does not exist in mining area but range reflects regional geology beyond mining area

The Quaternary material is usually unconsolidated and weathered soil, clay and sand. The Cretaceous and Jurassic material is generally semi-consolidated sediments, but these units have been intersected in only one borehole. Therefore, the Quaternary material is generally found to directly overlie (unconformably) the Permian sediments.

The #1 to the #4 seams belong to the Xia Shi Hi Zi Group. Generally the #1 to the #4 seams are either thin or not present due to being eroded away by the overlying Quaternary sediments. The #5 to the #8 seams belong to the Shanxi Group. Generally the #5 and the #6 seams are too thin for underground mining extraction. The #7 and the #8 seams are both mined at Kongzhuang mine. The #9 to the #22 seams belong to the Taiyuan Group. Most of the seams are generally too thin and cannot be recovered with underground mining operations. The #17 seam is planned to be mined.

The #7 seam is the main seam mined at Kongzhuang. The seam averages 4.9 m in thickness and is extracted using top level caving in longwall panels. The roof conditions are very favourable for this method of mining and the recovery of the total seam is good with minimal dilution involved. The #8 seam is extracted with the slicing method if the seam is too thick for one pass with the longwall shearer. The interburden between the #7 and the #8 seams is between 8 to 20 m thick. It was noted in sections of the main roadways and some gateroads that the floor on the #7 seam level was heaving and consequently pinching the working height. Although this did not prohibit mining, it may cause delays and poor strata conditions as the two seams deepen. The thicknesses and interburdens for the various seams are indicated in Table 4-12.

Table 4-12: Seam Statistics — Kongzhuang

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#7	2.2 to 8.3	4.9	600 (to surface)
#8	0 to 7.5	3.1	16
#17	0.3 to 3.3	0.8	98

The #17 seam is yet to be mined. Two-thirds of the mineable area is situated below a lake.

Structure

The geology at Kongzhuang area is regularly disrupted with faults. The major structural features trend NE-SW, are generally normal faults and have vertical displacements up to 150 m. The average fault has between 3 and 8 m throw which causes minor disruption to the mining operation. Seismic surveys using modern 3D techniques have been conducted over about a 4 km^2 area, with many of these larger faults detected prior to mining.

During the mine inspection, six faults of less than 5 m throw were encountered along one gateroad. These caused minimal disruption to the mining operations.

The western part of Kongzhuang area is affected by igneous activity, prohibiting the mining of coal in this area. In the eastern part of Kongzhuang, there is minor igneous activity in the way of dykes and small areas intruded by sills.

Coal Quality

All the coal mined at Kongzhuang produces coking coal products, primarily for domestic use.

All the ROM coal is washed through a dense medium cyclone wash plant at the mine site (see Coal Processing section for more details). The typical quality parameters of each seam are summarised in Table 4-13.

Table 4-13: Typical Coal Quality — Kongzhuang Seams

Seam	Inherent Moisture % (ad)	Raw Ash % (ad)	Washed Ash % (ad)	Raw Sulphur % (ad)	Washed Sulphur % (ad)	Crucible Swelling Index	Raw Phosphorus % (ad)
#7	2.0	14.9	6.3	0.53	0.56	6	0.014
#8	2.0	12.9	5.5	0.97	1.34	6	0.015
#17	2.0	19.1	8.4	2.82	2.09	6	—

Gas

There were only a few gas samples taken from the bore cores during the exploration program. Very few gas samples have ever been taken from the lower #17 seam.

Gas samples taken from bore cores for the #7 seam indicate generally low levels (less than 0.5 m^3/t) of methane. However, one borehole measured 4.8 m^3/t and pockets of gas (in the order of 5 m^3/t to 8 m^3/t) have been encountered during hydraulic mining of the #7 seam. To date, these areas of higher gas have been well managed by the company.

Resource Estimation

The majority of the exploration boreholes were drilled in the 1970s, while a few were drilled more recently in the 1990s. In general, the core recovery of the seams averaged around 75% of the coal in each of the target seams. Most if not all boreholes were logged using geophysical logging tools to accurately measure the seam thickness which allows the coal tonnage to be accurately calculated.

The coal resources for Kongzhuang mine are shown in Table 4-14 and were current as at 30 June 2006. The #17 seam has been excluded by SRK due to the low seam thickness and high sulphur content.

Table 4-14: Coal Resources — Kongzhuang

Seam	Resources (Mt)			Total Resources (Mt)	Mineable Resources (Mt)
	Measured	Indicated	Inferred		
#7	12	12	51	75	24
#8	8	10	36	54	18
#17	0	2	10	12	0(1)
Total	20	24	97	141	42

(1) #17 seam excluded due to low seam thickness and high sulphur content

4.7.3 Coal Reserves

SRK has applied a 75% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design. This has been assumed to allow for areas which will not be mineable or fully extractable, such as faults and intrusions, gateroads, main and development entries. Mining loss and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 4-15.

Table 4-15: Coal Reserves — Kongzhuang

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
75	15	17	32	6	10	33	92.9	30

4.7.4 Mining and Operations

Coal production is achieved with longwall mining methods supported by development blasting operations and a hydraulic cutting panel. Very difficult mining conditions exist at the mine as the coal seam is extracted at 25 degrees dip and in some localised areas up to 30 degrees.

Development activities are conducted with blasting operations of which five panels mine in coal for longwall panel formation and five panels mine in rock for future mine development. The mine also has access to two roadheaders (Chinese-supplied S-100) for coal development if required.

A panel applying hydraulic cutting methods is operational in the south-eastern part of the mining reserve delivering 300,000 tonnes per annum (tpa). This mining method was implemented to extract coal in the highly faulted areas of the reserve. Total production figures just in excess of 1 Mtpa have been achieved for the mine during the last five years, but the plan is to expand to 1.8 Mtpa. This production expansion will be

achieved by phasing out and replacing the current hydraulic cutting method with an additional longwall system within the next five years. Historical production figures for the mine are shown in Table 4-16.

Table 4-16: Mine Production History, 2003 to 30 June 2006 — Kongzhuang

	2003	2004	2005	30 June 2006
Longwall (Mtpa)	1.20	1.15	1.15	0.64
Development (m)	15,058	15,666	14,506	1,085

Very difficult mining conditions were evident during the site visit underground. The depth of mining and the severe dip in the coal seam contribute to broken roof conditions developing in the coal seam which requires excessive support in localised areas where high levels of stress are concentrated. Intensive support is generally required during development to keep roadways up and to prevent premature collapse during longwall mining. Poor stability is exacerbated in the areas where the slicing method of mining is used and the roadways have to withstand two mining sequences. Normal support during development includes steel and cable anchors combined with wire mesh. Steel straps and steel arches are also utilised as required, with the placement of mechanical and hydraulic props closer to the longwall mining face.

All development for access to future mining panels is carried in rock to assist in stability and to ensure longevity over the mining life of the panels. These roadways are also developed in an arch to further enhance stability for the longer term at a width of 4.2 m and a cross-section of 13.65 m^2. After applying shotcrete, the net area of the roadway is 11.88 m^2. A canal is also formed and grouted on ground level in the corner of the roadway to provide a water channel for water management in the roadways.

No stonedusting practices are employed at the mine. Sidewalls and roof are washed down periodically with water according to the requirements of Chinese legislative requirements. Water barriers are in use as required by local legislation.

Ventilation quantities are generally lower than international standards but comply with local requirements. The airflow quantity reported for the longwall panel is 14 m^3/sec and for the development panel 5 m^3/sec. A total of 150 m^3/sec is circulated through the mine. Low methane levels are reported and detected underground. In-time methane monitoring is available on the surface in a centralised control room and equipment underground is interlocked to trip power when methane levels exceed 1.5% concentration. Heat experienced is high and temperatures measured underground in the panels indicated 27 degree Celsius (°C) and 28°C dry-bulb.

Dust levels were evident and measurements are taken every week in identified areas in compliance with legislation. The following methods to prevent dust generation are implemented:

- Water injection to coal seam prior to mining (holes up to 100 m length)
- Water sprays on production machines
- Water fog in development panels
- Washing of sidewalls and roof on a frequent basis

Kongzhuang mine utilises conventional methods of transportation underground. Coal is transported from the longwall panel to the surface by rubber belt conveyor systems and in development panels initially by a scraper chain conveyor and subsequently by the rubber belt conveyor system. Electric trains are utilised to transport personnel closer to the mining panels and chairlift systems transport personnel between the different levels of the mine. Material and waste are transported by conventional winch and skip systems.

4.7.5 Infrastructure

The mine is serviced by four vertical shaft systems of which two serve as ventilation extraction shafts at a depth of approximately 180 m in the south and east of the mining reserve. The other two shafts are respectively equipped with gear to transport coal, men and material. The main shaft is utilised to convey coal to the surface and has an annual capacity of 1.5 Mt, while the auxiliary shaft is utilised to convey men and material to and from the surface. The depth of the auxiliary shaft is 410 m and is situated very closely to all surface infrastructure and facilities.

Water for underground use is captured in underground dams from the inflowing groundwater in the strata which is the main supply of water for underground use and can be supplemented from a surface reservoir fed by boreholes. The boreholes are situated 200 m from the ventilation shaft in the east and the water supply is piped through the eastern shaft to the underground workings. This supplementary water supply is mainly used to supplement water supply for dust suppression services.

The mine is supplied with electricity by two 35 kV surface substations feeding with a total of four supply lines. The one substation situated at the main shaft is equipped with two 12,500 kVA transformers and the other substation at the east ventilation shaft with two 6,000 kVA transformers. Reports indicate that the maximum power usage for 2004 reached 14,400 kWh with an average of 10,083 kWh. Ringfeeds have been implemented underground with the supply reported as very reliable.

4.7.6 Capital and Operating Costs

Capital cost for Kongzhuang mine has varied historically but is forecast to stabilise at very similar levels to 2005 for 2006 and 2007 and to drop off again in 2008 (refer Table 4-17). The operating unit cost for Kongzhuang mine shows a steady increase during the last three years (refer Table 4-18).

4.8 Xuzhuang Underground Mine

4.8.1 Introduction

Construction of the mine commenced in 1970 and longwall production started in 1979. Xuzhuang mine has increased its production level during the life of the mine from 0.9 Mtpa in 1985 up to 1.5 Mtpa in 1997. Production for 2004 totalled 1.42 Mt compared to a plan of 1.35 Mtpa and 1.41 Mt during 2005 compared to a plan of 1.40 Mt, all within the mine design capacity of 1.5 Mtpa.

Mining at Xuzhuang is conducted at a depth of approximately 400 m and future plans include mining the lower seam at a depth of 750 m. The mine is equipped with two longwall systems employed in different areas of the mine.

4.8.2 Geology and Mineral Resources

Topography in the Xuzhuang area is flat and similar to that of Kongzhuang. The stratigraphic sequence of Xuzhuang coal mine is outlined in Table 4-19.

Table 4-19: Stratigraphic Sequence — Xuzhuang

Stratigraphic Unit	Thickness Range (m)	Average Thickness (m)
Quaternary	0 to 195	140
Jurassic and Cretaceous	0 to 522	0[1]
Lower Permian (Shang Shi Hi Zi Group)	153 to 242	220
Lower Permian (Shanxi Group)	73 to 123	102
Upper Carboniferous (Taiyuan Group)	150 to 164	158

(1) Zero indicates unit does not exist in mining area but range reflects regional geology beyond mining area

Xuzhuang mine covers an area 10 km in length along the strike (EW direction) and about 3.8 km in width. The Permian strata dips to the north and varies from 15 to 30 degrees, averaging around 18 degrees. The stratigraphy of Xuzhuang is outlined in Table 4-20. The Quaternary material is similar to that at Kongzhuang. The seams mined in Xuzhuang are the same as those for Kongzhuang.

Table 4-20: Seam Statistics — Xuzhuang

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#7	1.4 to 8	5	400 (to surface)
#8	0.6 to 6.6	2.9	8
#17	0.2 to 2.4	1.1	110

The #17 seam is yet to be mined.

Structure

The geology at Xuzhuang is similar to the Kongzhuang area. It is frequently disrupted with faults of less than 1 m throw. The major structural features trend NE-SW, are generally normal faults and have vertical displacements up to 70 m. The average fault has between 3 and 8 m throw which causes minor disruptions to the mining operation.

Two dykes have been intersected in old mine workings. It is not expected that any significant igneous intrusions will be found in future workings.

Coal Quality

Coal mined at Xuzhuang produces thermal coal products.

All the ROM coal is washed through a dense medium cyclone wash plant at the mine site (see Coal Processing section for more details). The typical quality parameters of each seam are summarised in Table 4-21.

Table 4-21: Typical Coal Quality — Xuzhuang Seams

Seam	Inherent Moisture % (ad)	Raw Ash % (ad)	Washed Ash % (ad)	Raw Sulphur % (ad)
#7	1.35-1.8	14.2	6.7	0.78
#8	1.35-1.8	12.6	5.7	1.10
#17	1.35-1.8	18.7	13.3	2.14

Gas

There were very few gas samples taken from the bore cores during the Xuzhuang exploration program. Gas samples taken from bore cores for the #7 seam indicate generally low levels (less than 1.5 m^3/tonne) of methane, however one borehole measured 3.7 m^3/tonne.

Resource Estimation

The majority of the exploration boreholes were drilled in the 1970s, while a few were drilled more recently in the 1990s. In general, the core recovery of the seams averaged around 75% of the coal in each of the target seams. Most if not all boreholes were logged using geophysical logging tools to accurately measure the seam thickness which allows the coal tonnage to be accurately calculated.

Coal resources for Xuzhuang mine are shown in Table 4-22 and were current as at 30 June 2006. The #17 seam was excluded by SRK due to low seam thickness and high sulphur content.

Table 4-22: Coal Resources — Xuzhuang

Seam	Resources (Mt) Measured	Indicated	Inferred	Total Resources (Mt)	Mineable Resources (Mt)
#7	23	20	120	163	43
#8	4	17	24	45	21
#17	1	5	49	55	0[1]
Total	28	42	193	263	64

(1) #17 seam excluded due to low seam thickness and high sulphur content

4.8.3 Coal Reserves

SRK has applied a 75% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design. This has been assumed to allow for areas which will not be mineable or fully extractable, such as faults and intrusions, gateroads, main and development entries. Mining loss and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 4-23.

Table 4-23: Coal Reserves — Xuzhuang

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
75	20	28	48	6	10	50	80.8	40

4.8.4 Mining and Operations

Two longwall systems operate in the mine, within difficult mining conditions. The average dip of the seam is at 18 degrees and in localised areas up to 22 degrees. A single lift is taken by the longwall to extract the 3.7 m seam with a panel width of 180 m and generalised length of 1 km per panel. Chinese-supplied longwall equipment is used, namely a MG-475 shearer and 105 shields along the width of the face each rated at 360 t.

Development is done by a combination of roadheader and blasting techniques. Two roadheader panels are in operation producing at an average of 10 m/day. Development is driven through coal for the establishment of gateroads for the longwall and through rock to establish main entries to new areas of the mine to ensure stability in the longer term. Handbolting practices are employed in all development panels. The historical production figures for Xuzhuang for the last three years are shown in Table 4-24.

Table 4-24: Mine Production History, 2003 to 30 June, 2006 — Xuzhuang

	2003	2004	2005	30 June 2006
Longwall (Mtpa)	1.45	1.42	1.41	0.82
Development (m)	13,879	12,520	13,333	1,220

Very difficult mining conditions were present in 2005 requiring intensive support during the development cycle. Areas in the roadways were fractured and broken and required additional support to secure these areas effectively. Roadways are developed at a width of 4.2 m and a height of 2.7 m. Normal support during development includes steel and cable anchors combined with wire mesh. Channel steel beams are installed as required and tensioned by the cable anchors. Hydraulic props are placed closer to the longwall mining face.

The roadways developed in rock are profiled in an arch to further enhance stability for the longer term at a width of 4.6 m and a cross-section of 15.41 m^2. After applying shotcrete the net area of the roadway is 13.76 m^2. A canal is also formed and grouted on ground level in the corner of the roadway to provide a water channel for water management in the roadways.

No stonedusting practices are employed at the mine. Sidewalls and roof are washed down periodically with water and water barriers are in use at strategic points.

Ventilation quantities are in compliance with Chinese legislation. The ventilation quantity reported for the longwall panel is 9 m^3/sec and for the development panel 3 m^3/sec. A total of 103 m^3/sec is circulated through the mine. Low methane levels are reported and detected underground. Real-time methane monitoring on the surface is not available but fixed monitors are fitted in the production panels. Production equipment underground is interlocked to trip power when methane levels exceed 1.5% concentration. Alarm levels are set at 1% concentration and the source of methane is investigated and addressed as soon as alarms are activated. Temperature in the mining panels is high with high levels of humidity present.

Dust in the underground mine were visible at the time of the SRK inspection. Measurements for respirable dust are taken twice a month and are taken at identified areas in production faces and conveyor roadways in compliance with legislation. All other dust measurements are conducted once a month. The following methods to prevent dust generation are relevant to Xuzhuang mine:

- Water sprays on production machines
- Water sprays on conveyor transfer points
- Water curtains 50 m behind roadheaders in development panels

- Washing down of production faces
- Washing of sidewalls and roof on a frequent basis
- PPE for operators exposed to high dust levels, i.e. dust masks

The mine utilises conventional methods of transportation underground. Coal is transported from the longwall panel to the surface by rubber belt conveyor systems and in development panels initially by a scraper chain conveyor and subsequently by the rubber belt conveyor system. Electric trains are utilised to transport personnel closer to the mining panels and chairlift systems transport personnel between the different levels of the mine. Material and waste are transported by conventional winch and skip systems.

4.8.5 Infrastructure

Electricity supply to the mine is via four incoming supply lines at 35 kV. The power station is situated 3 km from the mine and owned by the local government, with a generating capacity of 645 MW. The supply is fed through a surface substation with 2 x 12,500 kVA capacity and distributed to the underground workings at 6 kV. Ringfeeds underground distribute the supply to the various working areas. The shearers operate at 1,100 volts (V) and the development panels at 690 V. The installed underground power capacity is 8,000 kW. Power supply is very reliable with no interruptions or downtime reported, resulting in an availability of 100%.

Water supply for the mining process is sourced from boreholes on the surface and groundwater from the overlying strata. Used water from underground is pumped to a main dam in close proximity to the auxiliary shaft and from there pumped to surface at 250 m^3 per hour. The water is treated in a water treatment plant to be re-used for sewerage handling on the surface and grouting and fire prevention underground. The recycled water is piped back underground through the ventilation shaft.

Two surface boreholes are situated at 100 and 150 m respectively from the mine and are used to supply Xuzhuang mine only. The two boreholes can each deliver at 40 m^3 per hour and store water in two surface reservoirs of 100 and 600 m^3 respectively. Water usage at 5,000 m^3/day, half of which is for domestic use in the adjacent workers' village, is less than the current available supply. In the event of a shortage of water, a fall-back position is available to source water from Weishan Lake or Gang River situated 800 m from the mine.

The mine is equipped with three vertical shafts for ventilation and transportation purposes. One shaft is equipped as a ventilation shaft, the main shaft with an elevator system to convey coal to the surface and the auxiliary shaft to transport men and material to and from the surface.

4.8.6 Capital and Operating Costs

Actual capital expenditure at Xuzhuang mine from 2003 to 2005 and planned expenditure to 2008 is shown in Table 4-25.

The operating unit cost at the mine increased from 2003 to 2005 as indicated in Table 4-26. The significant increase in 2004 was reported as a change in accounting practices and reporting.

Table 4-25: Capital Expenditure — Xuzhuang

4.9 Longdong Underground Mine

4.9.1 Introduction

Longdong mine started production during 1987 and has been designed to produce at 1.2 Mtpa. One longwall face is operational at the mine with five development panels both in coal and rock. In 2005 the mine was extracting one seam, i.e. the #7 seam at a depth varying from 200 to 230 m below the surface, and future plans include the extraction of two lower seams, i.e. the #17 and #21 seams. The slicing method of coal extraction is used in the #7 seam where the top part of the seam is extracted and then the longwall returns to extract the bottom part of the seam.

A production level of 1.2 Mtpa was achieved during 2004 compared to a plan of 900,000 t for the year, and 1.16 Mt was produced in 2005.

4.9.2 Geology and Mineral Resources

Longdong mine is the most northern of the Datun Coal leases and covers an area of 10 km in length along the strike (EW direction) and about 4 km in width. Topography at Longdong is flat, similar to that of Kongzhuang. The Permian strata dips to the north and varies from 3 to 8 degrees, averaging around 5 degrees.

The stratigraphic sequence of Longdong coal mine is outlined in Table 4-27.

Table 4-27: Stratigraphic Sequence — Longdong

Stratigraphic Unit	Thickness Range (m)	Average Thickness (m)
Quaternary	154 to 207	195
Jurassic and Cretaceous	0 to 488	0(1)
Upper Permian (Shang Shi Hi Zi Group)	0 to 59	0(1)
Lower Permian (Shang Shi Hi Zi Group)	270 to 298	285
Lower Permian (Shanxi Group)	89 to 116	103
Upper Carboniferous (Taiyuan Group)	146 to 181	166

(1) Zero indicates unit does not exist in mining area but range reflects regional geology beyond mining area

The stratigraphy of Longdong is outlined in Table 4-28. The Quaternary material is similar to that at Kongzhuang.

The #7 seam is the main seam mined at Longdong. The seam averages 5.5 m in thickness and is extracted using two passes with the longwall shearer. Since the roof conditions are not ideal, wire mesh is placed at the roof on the first pass so as to hold the roof up for the shearer on the second pass.

Table 4-28: Seam Statistics — Longdong

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#7	1.4 to 8	5.5	400 (to surface)
#17	0.1 to 1.2	0.7	100

The #17 seam has yet to be mined.

Structure

The geology at Longdong is considered to be the least complex geology of the four Datun mines. It has gently dipping strata and very few major faults. There are major normal faults (between 50 and 100 m throw) to the north which form the northern boundary of Longdong mine. A major structure forms the southern boundary between Longdong and Yaoqiao mines.

Longdong is transected by a syncline in the northern half of the area and an anticline in the southern half of the area, both trending EW. Many minor faults and fractures are associated with the hinges of these folds causing minor difficulty to mining conditions. The minor faults (generally less than 5 m throw) cannot be detected from either drilling or from 3D seismic surveys which have a minimal vertical resolution of 5 m. These faults are encountered in the gateroads and have minimal affect on the mining operations.

Igneous dykes have minimal affect on the mining operations.

Coal Quality

Coal mined at Longdong produces thermal coal products. All the ROM coal is washed through a dense medium cyclone wash plant at the mine site (see Coal Processing section for more details). The typical quality parameters of each seam are summarised in Table 4-29.

Table 4-29: Typical Coal Quality — Longdong Seams

Seam	Inherent Moisture % (ad)	Raw Ash % (ad)	Raw Sulphur % (ad)	Raw Phosphorus % (ad)
#7	2.1	15.9	0.90	0.002
#17	1.8	14.9	2.50	0.002

Gas

Sixteen gas samples were taken from the bore cores during the Longdong exploration program. Only seven of the results were deemed reliable by Datun Coal.

Gas samples taken from bore cores for the #7 seam indicate generally low levels (less than 0.5 m^3/tonne) of methane. However, two boreholes measured high levels of methane, one recording 5.9 m^3/tonne while the other recorded 11 m^3/tonne. To date, these areas of higher gas have been managed well by the company.

Resource Estimation

The majority of the exploration boreholes were drilled in the 1970s, while a few were drilled more recently in the 1990s. In general, the core recovery of the seams averaged around 75% of the coal in each of the target seams. Most if not all boreholes were logged using geophysical logging tools to accurately measure the seam thickness which allows the coal tonnage to be accurately calculated.

The coal resources for Longdong mine are shown in Table 4-30 and were current as at 30 June 2006.

Table 4-30: Coal Resources — Longdong

Seam	Resources (Mt) Measured	Indicated	Inferred	Total Resources (Mt)	Mineable Resources (Mt)
#7	21	9	12	42	30
#17	0	1	4	5	0(1)
Total	21	10	16	47	30

(1) #17 seam excluded from Mineable Resources due to low seam thickness and high sulphur content

4.9.3 Coal Reserves

SRK has applied a 75% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design. This has been assumed to allow for areas which will not be mineable or fully extractable, such as faults and intrusions, gateroads, main and development entries.

Mining loss and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 4-31.

Table 4-31: Coal Reserves — Longdong

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
75	16	7	23	6	10	23	91	21

4.9.4 Mining and Operations

The #7 coal seam mined at Longdong is approximately 5.5 m thick and dips at between 3 degrees and 8 degrees. The coal seam is extracted with the slicing method by taking 2.6 m at the top of the seam and laying down mesh behind the shields as the longwall retreats. When the panel is completed at the top level the longwall returns to remove the bottom 2.6 m of the coal seam. This method has been successfully operated in previous longwall panels. Although it could be restrictive in productive rates when mining the bottom part of the seam, it ensures complete extraction of the reserves in the panel. Longwall panels were previously restricted to a length of 1 km, as the Design Institute responsible for the mining design orientated panels along the dip at a maximum length of 1 km. This design criterion has subsequently changed and panels up to 2 km are being mined. Future longwall panels have been planned to undermine Zhaoyang Lake and also a dam wall that has been established on the surface.

All equipment used at the mine is supplied by Chinese manufacturers with the shearer a MGTY250/600 model and the shields ZY3600-16/36 models. A total of 124 shields are installed along the width of the current face and have a capacity of 360 t each. Five development panels are deployed of which four utilise conventional blasting methods and one panel utilises an S-100 roadheader. Handbolting practices are used in the development panels with on average development figures of 3 m/day for blasting panels and 15 m/day for the roadheader panel achieved. Development for the forming of longwall panels is done in coal with the roadheader panel supplemented by blasting panels, while development of roadways for future mine life is driven in rock by the blasting panels.

The historical production figures achieved at Longdong mine are shown in Table 4-32.

Table 4-32: Mine Production History, 2003 to 30 June 2006 — Longdong

	2003	2004	2005	30 June 2006
Longwall (Mtpa)	1.10	1.20	1.16	0.65
Development (m)	7,818	7,318	9,458	0

Current mining conditions in the #7 seam are acceptable and manageable. Development of main entry roadways are driven in rock to ensure stability for the mine life. The mining in rock is also done to an arched profile at a width of 4 m with further support and shotcreting with wire mesh applied afterwards. Mining in coal to develop panels for longwall mining is done at a width of 4.2 m and a height of 2.4 m.

Stonedusting is not applied at the mine. Sidewalls and roof are washed down periodically with water and water barriers are in use.

Ventilation quantities are generally lower than internationally accepted standards. The airflow quantity reported for the longwall panel is 30 m^3/sec and for the development panels 1.8 m^3/sec. A total of 115 m^3/sec is circulated through the mine. Low methane levels are reported and detected underground. In-time methane monitoring is available on the surface in a centralised control room and equipment underground is interlocked to trip power when methane levels exceed 1.5% concentration. Although low levels of methane have occurred, it was noted that boreholes in future western mining reserves indicated higher levels of methane up to in-situ values of 11 m^3/tonne. These high methane levels will require a different approach to managing methane content in these areas, e.g. pre-drainage, higher ventilation velocities etc. Temperature levels underground and in the mining panels are acceptable.

Only low levels of dust are evident underground and measurements are taken every 10 days in identified areas in compliance with legislation. A chemical (identified as NCZ-1) is applied to the floors of the main intake roadways to prevent excessive dust generation and carriage into the rest of the mine.

Longdong mine utilises conventional methods of transportation underground. Coal is transported from the longwall panel to the surface by rubber belt conveyor systems and in development panels initially by a scraper chain conveyor and subsequently by the rubber belt conveyor system. Electric trains are utilised to transport personnel closer to the mining panels. Material and waste are transported by conventional winch and skip systems to the main shaft system where it is transported by an elevator system with a capacity of 1.2 Mtpa.

4.9.5 Infrastructure

Three vertical shafts have been established at Longdong mine. One shaft serves as a ventilation extraction shaft, one shaft as the main shaft to transport coal and waste to the surface and one shaft as an auxiliary shaft to transport men and material to and from the surface. The depth of the auxiliary shaft is 328 m.

Electricity for the mine is supplied from a power plant owned by Datun Coal. Power is supplied at 35 kV and three independent feeds have been established. The supply has historically been very reliable with no failures or interruptions occurring. Supply capacity to the mine is 5,237 kWh and the usage is stated at 3,200 kWh.

Water is supplied to the mine from closely situated boreholes at 4,000 cubic metres per day (m^3/day) and stored in reservoirs on surface. A total of 3,000 m^3/day of water is consumed, of which 1,000 m^3/day is for industrial purposes and 2,000 m^3/day for domestic use. Three pumps of 80 cubic metres per hour (m^3/hr) capacity each have been installed on the surface to pump water for underground use with only one pump

required for the underground water supply. Underground water is pumped to the surface and utilised for sewerage handling and coal washing in the CPP. No water is recycled for underground use.

4.9.6 Capital and Operating Costs

Historical capital investment and planned investment for Longdong mine until 2008 is indicated in Table 4-33. Unit cost at Longdong mine increased from 2003 to 2004 due to a change in accounting practice and reporting similar to Xuzhuang mine, with a decrease in operating cost achieved from 2004 to 2005 (refer Table 4-34 below).

Table 4-33: Capital Expenditure — Longdong

4.10 Yaoqiao Underground Mine

4.10.1 Introduction

Yaoqiao is the best performing mine in Datun Coal. The mine started in 1976 and had a design capacity of 1.2 Mtpa. A new shaft was implemented in 2000 to increase production by a further 1.8 Mtpa to reach a total of 3 Mtpa.

Two seams are extracted at Yaoqiao mine, the #7 and #8 seams, of which the #7 is the main mining seam. The seams are located at a depth of approximately 400 m. The mine has already undermined 17.2 km^2 of Zhaoyang Lake, however no inflow of water from the lake has been evident.

Three longwall systems and nine development panels were in operation at the mine in 2005. The top coal caving method is used in the longwall mining process to extract the complete seam at 5.5 m. The mine produced 3.5 Mt in 2003 and 3.4 Mt in 2004 and 2005 respectively.

4.10.2 Geology and Mineral Resources

The stratigraphic sequence of Yaoqiao coal mine is outlined in Table 4-35.

Table 4-35: Stratigraphic Sequence — Yaoqiao

Stratigraphic Unit	Thickness Range (m)	Average Thickness (m)
Quaternary	81 to 227	163
Jurassic and Cretaceous	0 to 449	0[1]
Upper Permian (Shang Shi Hi Zi Group)	180 to 212	200
Lower Permian (Xia Shi Hi Zi Group)	201 to 297	242
Lower Permian (Shanxi Group)	64 to 131	105
Middle and Upper Carboniferous (Benxi and Taiyuan Group)	180 to 200	190

(1) Zero indicates unit does not exist in mining area but range reflects regional geology beyond mining area

Topography at Yaoqiao is flat, similar to that of Longdong. Yaoqiao mine lies adjacent to the south of Longdong mine and covers an area of some 57 km^2, 13.5 km in length along the strike (EW direction) and about 4.2 km in width. The Permian strata dips to the north and varies from 8 degrees to 20 degrees, averaging around 12 degrees. The stratigraphy of Yaoqiao is outlined in Table 4-36. The Quaternary material is similar to that at Kongzhuang.

The #7 seam is the main seam mined at Yaoqiao. The seam averages 5.5 m in thickness and is extracted using top level caving in longwall panels. The roof conditions are very favourable for this method of mining and the recovery of the total seam is good, with minimal dilution involved.

The #8 seam is not present in the western part of the area, but in the east it is mined in selective areas of Yaoqiao. When the interburden between the #7 and the #8 seams is less than 1 m, the seams are mined together using top level caving as their combined thickness reaches a maximum of 11 m. Otherwise, they are mined separately.

Table 4-36: Seam Statistics — Yaoqiao

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#7	1.4 to 9.9	5.5	600 (to surface)
#8	0 to 9.9	3.3	9
#17	0.1 to 2.6	1.1	95

The #17 seam has yet to be mined.

Structure

The geology at Yaoqiao is considerably more complex than that of Longdong mine. It is disrupted with frequent faults of less than 1 m throw. The major structural features trend NE-SW and are generally normal faults. The average normal fault has between 3 and 8 m throw which causes minor disruptions to the mining operation.

The #7 seam is intruded by a number of igneous sills within the Yaoqiao area. A large sill is located in the south, a smaller one in the west (intersected by two boreholes) and another is found on the eastern boundary. As well as sills, the coal seams in Yaoqiao are dissected by large Dioritic dykes up to 150 m wide, some 1 km in length and trending E-W. These dykes generally consist of fresh material and therefore are hard to penetrate for the longwall shearer.

Coal Quality

Coal mined at Yaoqiao produces thermal coal products.

All the ROM coal is washed through a dense medium cyclone wash plant at the mine site (see Coal Processing section for more details). The typical quality parameters of each seam are summarised in Table 4-37.

Table 4-37: Typical Coal Quality — Yaoqiao Seams

Seam	Inherent Moisture %(ad)	Raw Ash %(ad)	Washed Ash %(ad)	Raw Sulphur %(ad)	Washed Sulphur %(ad)	Washed Phosphorus %(ad)
#7	1.3-1.67	14.3	7.2	0.74	0.41	0.013
#8	1.3-1.67	11.6	5.1	0.93	0.81	0.004
#17	1.3-1.67	15.9	7.0	2.08	1.54	0.004

Gas

Twenty-eight gas samples were taken from the bore cores during the Yaoqiao exploration program. Seventeen samples of the #7 seam recorded methane levels between 0 and 0.1m^3/t. Six samples of the #17 seam recorded methane levels between zero and 4.0m^3/t. To date, these areas of higher gas have been well managed by the company.

Resource Estimation

The majority of exploration boreholes were drilled in the 1970s, while a few were drilled more recently in the 1990s. In general, the core recovery of the seams averaged around 75% of the coal in each of the target seams. Most if not all boreholes were logged using geophysical logging tools to accurately measure the seam thickness which allows the coal tonnage to be accurately calculated.

The coal resources for Yaoqiao mine are shown in Table 4-38 and were current as at 30 June 2006.

Table 4-38: Coal Resources — Yaoqiao

Seam	Resources (Mt) Measured	Indicated	Inferred	Total Resources (Mt)	Mineable Resources (Mt)
#7	141	18	102	261	159
#8	22	26	14	62	48
#17	0	0	58	58	0
Total	163	44	174	381	207

4.10.3 Coal Reserves

SRK has applied a 75% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design. This has been assumed to allow for areas which will not be mineable or fully extractable, such as faults and intrusions, gateroads, main development entries etc. Mining loss and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 4-39.

Table 4-39: Coal Reserves — Yaoqiao

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
75	122	33	155	6	10	161	80.8	130

4.10.4 Mining and Operations

The main seam mined at Yaoqiao mine is the #7 seam, however the #8 seam occasionally moves towards the #7 seam with a very small interburden of a few millimetres. In this case the #8 seam is extracted together with the #7 seam, with a cut-off interburden of 1 m. This coalescing of the #7 and #8 seams is more prevalent in the eastern part of the mining reserve, making the extraction of the #8 seam economical in this area.

The mine is equipped with three longwall panels utilising the top coal caving method. One longwall panel visited by SRK (panel 7001), was 170 m wide and 1.4 km long. Equipment is Chinese-supplied with the shearers a MGTY250/600 model and the shields 139 x ZFSB4400, 100 x ZFSB3800 and 133 x ZF2800 for the three panels respectively. Development is undertaken with nine panels, including six conventional blasting panels for rock development and three roadheader panels equipped with S-100 roadheader machines for coal roadway development. The blasting panels produce at an average of 100 m per month and the roadheader panels at 400 m per month. The record development production in coal with a roadheader achieved in the past was 700 m per month. The historical production figures for Yaoqiao mine during the last three years are shown in Table 4-40.

Table 4-40: Mine Production History, 2003 to 30 June 2006 — Yaoqiao

	2003	2004	2005	30 June 2006
Longwall (Mtpa)	3.51	3.41	3.40	1.93
Development (m)	17,018	16,008	16,038	0

The average dip in the coal seam at Yaoqiao mine is 18 degrees. Fair to difficult mining conditions are present requiring relatively intensive support to ensure stability in the long term. Additional secondary support is required in localised areas where faulting and intrusions intersect the mining seam. Coal roadways are developed at 4.2 m width by 2.6 m height and are supported as a standard with steel point and cable anchors.

Development for future expansion of the mine is done through rock with blasting panels. This method of development is conducted to ensure longevity of main access roadways over the life of the mine. The roadway is driven at a base width of 4.8 m and a height of 3.8 m and profiled in an arch to further enhance stability. Shotcrete and mesh are also applied after support has been installed, and a water canal is formed at the side of the roadway to assist in water management.

Ventilation quantities are generally less than international standards. The airflow quantity reported for the longwall panel is 11 m^3/sec and for the development panels 8 m^3/sec. Low methane levels are reported and detected underground. In-time methane monitoring was not available on the surface in 2005, however it was being implemented. Equipment underground is interlocked with local monitors in the panel to trip power when methane levels exceed 1.5% concentration. Temperature levels underground are acceptable.

No stonedusting practices are employed at the mine. Water barriers are in use.

Excessive dust levels are not evident in the underground workings and measurements are taken every week in identified areas in compliance with legislation.

The mine utilises conventional methods of transportation underground. Coal is transported from the longwall panel to the surface by rubber belt conveyor systems and in development panels initially by a scraper chain conveyor and subsequently by the rubber belt conveyor system. Electric trains are utilised to transport personnel closer to the mining panels. Travelling distances of up to 5 km exist between the shaft system and the working panels. Material and waste are transported by conventional winch and skip systems.

4.10.5 Infrastructure

In 2000, Yaoqiao mine implemented an additional shaft system to cater for the increased production capacity of 3 Mtpa. By 2005, a total of seven vertical shafts had been established at Yaoqiao mine. Two auxiliary shafts are utilised to transport men and material to and from surface and two main shaft systems with a combined design capacity of 3.9 Mtpa are utilised to transport coal and waste material to the surface. Three ventilation shafts provide ventilation capacity to the mine.

Electricity is supplied to the mine by the Datun Coal-owned power station via 35k V overhead powerlines. There is a total of 51,150 kVA installed capacity, with the reported required installed capacity underground at a maximum of 15,000 kW and an average of 8,000 kW. The system is reported to be reliable, and other than a few thunderstorms in the past resulting in interruptions, no major delays or interruptions have been experienced.

Water supply to the mine is from four boreholes (spaced at 500 m) with the furthest hole situated approximately 2 km from the mine. The water is stored in a 400 m^3 reservoir on the surface before being piped underground through the three ventilation shafts. These boreholes supply Yaoqiao mine only, but are also used to supply requirements for domestic use. Water is recycled from underground through a water treatment plant to be used as sewerage water.

Mine personnel are aware of and have reported that the water supply capacity from the boreholes is decreasing. To counter this, water restrictions have been implemented for domestic use and domestic supply is cut off every day from 12:00 pm to 5:00 am. A current supply capacity of 7,000 m^3/day is available and 2,700 m^3/day is used, leaving a surplus capacity of 4,300 m^3/day. A further 3,600 m^3/day capacity is available through the water treatment plant.

4.10.6 Capital and Operating Costs

The historical and planned capital investment at Yaoqiao mine is indicated in Table 4-41 below.

Operating cash cost at Yaoqiao mine in 2004 increased compared to 2003 due to a change in accounting practice, with a further cost increase experienced in 2005 (refer to Table 4-42 below).

Table 4-41: Capital Expenditure — Yaoqiao

5 HUAJIN COAL MINING COMPANY

5.1 Introduction

Huajin Coking Coal Co., Ltd. (Huajin Coal) was formed by a joint venture between China Coal (50%) and the Sanshi Coking Group (50%). The company operates the Shaqu underground mine and is

developing the Wangjialing underground mine. The Shaqu mine is situated adjacent to the town of Liulin, 230 km south of Taiyuan in the Liliu Coal Field which is within the Hedong Coal Field which is a 7.6 Bt resource. The Wangjialing exploration site situated south-west of the Xiangning mining area in Shanxi province has been approved for mining by the provincial and state governments. The project plan is to start development of the mine during 2007.

Shaqu mine's current design production capacity is 3 Mtpa and coal is washed at a company-owned wash plant with a capacity of 1.5 Mtpa. In 2005 a second plant with a capacity of 3 Mtpa was under construction. Shaqu mine produced 1.63 Mt in 2004 and 1.87 Mt in 2005. The capacity of the Wangjialing mine at full production is planned at 6 Mtpa for 2010.

Shaqu mine produces coking coal of which approximately one-third is exported to South Korea and Japan, one-third sold to local clients and one-third used by Huajin Coal to produce coke for steel work clients. The export coal is shipped through three ports which are all situated approximately 800 km from the mine.

5.2 Corporate Management Structure

The corporate management structure is shown in Appendix 2. Workforce numbers for Huajin Coal are shown in Table 5-1.

Table 5-1: Workforce Numbers — Huajin Coal

Category	Employees
Production[1]	
Shaqu UG	1,755
Management[2]	10
Other[3]	419
Total	2,184

(1) Permanent and contractor employees involved in mining activities

(2) Senior management — excludes functional departments

(3) Only personnel involved with the mines — excludes CHPP, rail etc

Salaries for skilled non-technical workers start at RMB600 per month while skilled underground mine workers earn RMB1,800 per month. Technical personnel are remunerated at RMB1,900 per month and high level personnel at RMB2,400 per month.

5.3 Occupational Health and Safety

Shaqu mine utilises a safety management system that appoints safety monitors from head office and site personnel to conduct inspections and improve safety conditions. A total of 78 safety monitors are appointed at Shaqu mine. Investigations are conducted after an incident occurs in an attempt to determine the root cause. This information is communicated to all employees and contractors at special workforce meetings and at the start of shift safety meetings. Safety procedures are developed through accident investigations to prevent recurrence of similar incidents.

Employees undergo safety training through a government training centre every year and position-specific training every three years. Workers are also trained and encouraged to identify and report hazards, for which the company offers a financial reward.

The safety statistics for Shaqu mine since 2003 are listed in Table 5-2.

Table 5-2: Accident Statistics, 2003 to 2005 — Huajin Coal

Category	2003	2004	2005
Fatal[1]	0	0	0
Serious[2]	1	0	0
Minor[3]	1	3	0

(1) Accident causing death (number indicates lives claimed)

(2) Accident requiring hospitalisation and do not return to work for more than 24 hours (includes fatal incidents)

(3) Accident which does not require hospitalisation and employee returns to work within 24 hours

Contractors are included in the above figures, which reflect very low levels of injury frequency. Only one serious injury, namely a broken leg, has occurred at the mine since 1999. No minor or serious injuries are planned for, however a maximum limit for a fatality rate of 0.5 persons per Mt of coal mined is set every year.

Mine representatives consistently demonstrate that safety is a priority and that it remains a significant consideration in all aspects of planning and operation. Similarly, the safety statistics reflect good performance.

Shaqu mine is reported to be one of the highest methane level mines in China. Very high levels of methane in the coal seam are apparent and the mine utilises in-seam drilling practices prior to longwall mining to de-gas the seam to mineable levels.

5.4 Environmental Assessment

5.4.1 Introduction, Scope and Background

An environmental assessment of Huajin Coal was completed by SRK to assess Huajin Coal's environmental management across its operations. The primary reason for assessing Huajin Coal's environmental management was to identify any potential financial liabilities arising from its operations, which include:

- Shaqu underground coal mine and Wangjialing Exploration Zone (for the proposed Wangjialing underground coal mine)
- Two coking plants operated under contract to Huajin Coal by the China Coal Coking Group Ltd (Coking Plant No. 1) and the Longquan Cokechem Company Ltd (Coking Plant No. 2)

In addition to visiting the above major sites, the SRK environmental assessment included interviews with key environmental staff members of Huajin Coal, inspection of relevant environmental documentation and interpretation of responses to an environmental questionnaire provided by SRK.

As for environmental assessments of previous China Coal subsidiary companies, this environmental assessment is reported entirely at corporate level. This approach was adopted as Huajin Coal has an office adjacent to its Shaqu mine at Liulin from which the environmental management of both Shaqu underground mine and the proposed Wangjialing underground mine is resourced.

5.4.2 Corporate Environmental Awareness

Huajin Coal has only been operating the Shaqu mine since 2004. ISO9001 and ISO14001 accreditation require a qualifying operational period prior to a mine being permitted to apply for International Standard Organisation (ISO) status. Huajin Coal plans to apply for environmental, quality and safety accreditation for both the Shaqu and Wangjialing mines when they have been operational for several years.

This is also the situation for Coking Plant No. 1, while Coking Plant No. 2 is internally evaluating the ability to meet the requirements for application.

5.4.3 Mining Title and Royalty Payments

Huajin Coal is licenced to mine underground at both its Shaqu and Wangjialing mines. Mining licence details are provided in Table 5-3. Huajin Coal holds both the surface and mineral rights at its Shaqu mine and at the proposed Wangjialing mine, with the mining licences valid until September 2031.

Table 5-3: Mining Licence Details — Huajin Coal

Mine	Mining Licence No.	Mining Area (km^2)	Issue Date	Licence Tenure
Shaqu	1000000420071	138.4	December 2004	27 years
Wangjialing	1000000420072	176.7	December 2004	27 years

Should Huajin Coal still have mineable coal reserves following expiration of its mining licences, it can apply for a new or extended licence. The mining licences were issued by MOLAR in December 1999. Huajin Coal pays mining royalties and taxes at its Shaqu mine according to Chinese Mineral Resources Law (1996 as amended).

There are no options held over the mining land other than by the government and it is not permitted to divest mining licences to other commercial operations.

5.4.4 Environmental Licencing, Compliance and Reporting

As previously noted, it is a statutory requirement that environmental considerations are detailed in the project feasibility study for all new projects in China, which is subsequently presented to the Environmental Protection Bureau of the respective province in which the operation is located, which in this instance is Shanxi province. This environmental component is essentially akin to an environmental impact assessment report and is passed to the state agency if required, commensurate with the scale of the proposed operation. The various operational environmental licences are then granted to the mining company based on the sustainability of the operation according to this environmental feasibility study, in addition to its ability to manage its environmental obligations under the National Environment Protection Law (1989). For the Shaqu operation, environmental licences were granted at provincial level for boundary noise, gaseous emissions and water discharge. Further to these environmental licences, Huajin Coal maintains a licence at Shaqu from the local Liulin County Water Resource Management Commission for groundwater extraction.

Shaqu mine is required to prepare an individual annual environment report to the Shanxi provincial Environmental Protection Bureau that incorporates data on waste volumes generated, noise, wastewater and gaseous emissions. After approval, the report is passed from the provincial regulators to the local county environmental regulators who conduct random inspections approximately every four months. Huajin Coal also maintains its own on-site environmental laboratory to monitor water quality on site. A similar reporting system is in operation at both the coal coking facilities, though Coking Plant No. 1 is still under construction and is only operating at approximately 25% of capacity at this stage.

The plant was expected to be fully operational in early 2006. Coking Plant No. 2 has approval from the local government to expand its coal washing plant capacity by an additional 600,000 tonnes per annum.

The environmental approvals pathway prior to commissioning the Wangjialing mine is approaching completion. The Xian Coal Design Institute designed the mine and submitted the final feasibility study to State Development and Reform Committee in March 2003.

The environmental plan for the mine was approved by the State Environmental Protection Bureau at the end of 2003, while the water plan was approved by the State Ministry of Water Resources also in late 2003. The State Ministry policy changed in August 2004 however, to one that required a series of different

approvals. In this regard, the 'location' report was approved by the Shanxi government in 2004, with the 'land use' report being approved by both the local and provincial governments in late 2004. These were also approved by MOLAR in March 2005, with the only remaining approval required being from the State Development and Reform Committee, which is pending.

SRK inspected the Annual Environment Report for the Shaqu coal wash plant and found all environmental data to be in compliance with relevant criteria.

5.4.5 Environmental Staff

Huajin Coal maintains the following environmental staff at its head office that oversees both the Shaqu and Wangjialing sites. There are two professional environmental managers that are included in the operational staff, with an additional four technical staff in the coal wash plant located at Shaqu dedicated to environmental management. In addition, Huajin Coal maintains an 'environmental protection team' that consists of 13 staff from various departments to oversee environmental compliance. The two coking plants both have two environmental staff members who report on and maintain environmental compliance.

5.4.6 Environmental Planning and Budgets

Huajin Coal produces 10 year long term environment plans for their Shaqu operations, while the environmental planning for Wangjialing is still at the feasibility stage. As noted above however, the environmental and water plans for the proposed Wangjialing mine have been approved by the relevant authorities. No environmental plans were sighted by SRK at either coal coking plant, however, plant No. 1 was still being built with environmental plans approved by the regulators, while plant No. 2 also had expansion plans approved by the regulators. It should be noted that the gas power technology, emissions scrubbing equipment and water recycling equipment being installed at plant No. 1 suggest it will be a leader in environmental or 'clean production' technology in China.

SRK inspected Huajin Coal's 2005 environmental budgets and noted that it planned to spend upwards of RMB500,000 on site rehabilitation. Furthermore, as the plant has been operational for less than one year, all environmental infrastructure is relatively new, and large budgets for upgrading and/or maintaining environmental equipment are not required at this early stage of operation.

5.4.7 Water Management

Huajin Coal has a company-wide policy on water conservation, and is aware that it operates in a semi-arid environment. This awareness is demonstrated by on-site water treatment and recycling. Water is sourced for Shaqu mine by five groundwater wells approved by local authorities. Groundwater also supplies the water for both coking plants with Coking Plant No. 1 having six wells as supply and Coking Plant No. 2 having three wells to supply its water needs. There is no off-site water discharge at either of the coking plants, with all industrial water recycled into either the coal wash plant, the quenching operations and/or used as on-site dust suppression. There is a WWTP under construction at Coking Plant No. 1 (expected to be operational in October 2005), while Coking Plant No. 2 does not have an on-site waste water treatment plant.

Shaqu mine has an on-site WWTP that treats coal wash water prior to it being recycled for on-site industrial use. Limited seasonal discharge of wastewater is undertaken at one discharge point from treated residential wastewater by Huajin Coal. SRK inspected discharge water quality data and found it to be in compliance with relevant Chinese environmental standards. Overall, it is the opinion of SRK that Huajin Coal takes its water management responsibilities seriously and manages its water use accordingly.

5.4.8 Waste Rock, Tailings and Rehabilitation Management

Due to the underground nature of the Shaqu mine, waste rock generation is significantly less than for an open-pit mine. This fact considered, Huajin Coal still produces sufficient waste rock to require a management plan. In this regard, the waste rock from Shaqu mine is disposed of in waste rock dumps on the side of the hillside immediately behind Shaqu Mine. Due to the geotechnical challenges imposed by the method of waste rock disposal at Shaqu, the work is subcontracted out to the Shanxi Rehabilitation Company. Rehabilitation is undertaken in a progressive fashion with a 2 m thick soil cap covering the shale and sandstone waste rock. The soil cap is then covered with a geo-membrane and revegetated. The rehabilitated areas at Shaqu blend in with local geomorphology very well. Sediment traps and channels are also constructed on the rehabilitated areas to manage surface water run-off.

The anticipated life of the waste rock dump at Shaqu is 12 years, after which waste rock will be transported to a new site with an anticipated life of approximately 10 years. The mine life at Shaqu is expected to exceed this timeframe and an alternative waste rock disposal area will be required following expiration of the current and proposed sites. Coal wash tailings at Shaqu mine are beneficially re-used by being dried and sold to local brick makers as a cheap fuel source. This tailings management plan has been approved by local government. Boiler ash at Shaqu mine is disposed of in the waste rock dump and rehabilitated. The presence of boiler ash in the waste rock dump will have a small neutralising effect on any oxidising sulphide minerals potentially present in the waste rock, although none were sighted during SRK's visit.

In 2005, no waste was generated at the Wangjialing site, though SRK was not supplied with the mine plan and can therefore not comment on any proposed waste rock or tailings management plans. The coal wash plant at Coking Plant No. 1 was not yet operational at the time of SRK's visit; therefore, no waste was being generated. When the plant is completed, it is planned to use the coal wash rejects as a fuel in a yet-to-be established power plant. Coal wash plant rejects at Coking Plant No. 2 are sold as briquettes for power generation to the local power plant.

Overall, it is the opinion of SRK that Huajin Coal's plans for waste rock and tailing management are suitable for the operations. Furthermore, considering the remote nature of the operation, it is unlikely Huajin Coal will experience any major problems locating alternate waste rock disposal areas following expiration of the current and proposed sites.

5.4.9 Dust Management

Dust at the proposed Wangjialing site was not an issue in 2005 as the land was being cropped and there were no mining operations on site. Dust is managed at the Shaqu mine in both underground and above ground operations. Water sprays are in place on the longwall cutting equipment to suppress underground dust, while water is sprayed over temporary coal stockpiles above ground. Dust is routinely monitored and data reported for the coal storage area and also in the coal wash facility. In this regard, Huajin Coal attempts to keep the coal damp throughout the coal handling and treatment process in order to suppress dust.

As noted the WWTP at Coking Plant No. 1 is still under construction, however it is planned to use the recycled water from the plant once completed for on-site dust suppression, including in the coal washing facility still under construction. While there is no waste water treatment facility on site at Coking Plant No. 2, waste water is also recycled and used in on-site dust suppression. Both coking plants are required to report on dust emissions as part of their environmental licensing requirements.

5.4.10 Social and Regulatory Relations

Following discussions with Huajin Coal staff it appears that relations with both local residents and regulatory bodies are sound. The good relationship with the local community of Liulin is primarily due to employment opportunities. Direct mine employment also has positive downstream effects on the local and regional economy in service industries.

Residents directly affected by mine site operations are compensated by Huajin Coal and relocated from the area. Relocations are also likely to occur at the proposed Wangjialing operation prior to commencement of mining activities. The remote location of Coking Plant No. 1 minimises impact on residents while also providing good employment opportunities. There is minimal impact on residents from operations at Coking Plant No. 2, due to it being located in a specifically designed 'heavy industry' park.

Huajin Coal's relations with statutory bodies are sound, as evidenced by the fact that Huajin Coal has not been fined for breaching environmental standards at either its Shaqu mine or the operating coking plants. Furthermore, the proposed Wangjialing mine has been approved for operation and such approvals are not granted if the mining company has previously logged a large number of environmental incidents or proved to be environmentally irresponsible. It is the opinion of SRK that Huajin Coal's proactive approach to its environmental responsibilities, in particular its water management requirements, has helped to maintain these positive relationships with relevant regulatory staff.

5.4.11 Environmental Assessment Conclusions

Following interviews with key Huajin Coal environmental and managerial staff, and inspection of environmental documentation and operations, SRK found that Huajin Coal has a sound and proactive approach to its environmental responsibilities and is managing its operations in compliance with its environmental obligations. This opinion is supported by the fact that Huajin Coal has not been fined for any environmental breaches across its operations to date. Specific focus is on water management and conservation, along with cleaner production technology. These areas of focus are evident in investment in plant and equipment at operating sites, as well as of sites under construction.

5.5 Coal Processing and Transport

During 2005, 30% of coal from Huajin was destined for export and 70% for the local market. The export coal is shipped through three ports, each of which is approximately 800 km from the mine site. The three ports are Qingdao, Rizhao and Tianjin. The local product is sold to steel manufacturers and is railed to customers through the public railway network.

The coal is initially transported by train from the mine for 1.5 km on a company-owned rail line to the Muchun railway station. From this railway station the company utilises the public rail network to supply the coal to customers. Trucks are used to deliver coal to local customers within a radius of 100 km and consideration is being given to increase the supply to these customers to minimise congestion on the public railway system.

Huajin Coal is also preparing to expend funds to improve its ability to transport coal by upgrading the current system or by consideration of a new line with electric trains. Finances to initiate these improvements were provided in the 2005 budget.

Furthermore, the government is planning the construction of an additional railway line with a capacity of 16 Mtpa, with construction to commence at the end of 2005.

5.5.1 Shaqu CPP

This site has been equipped with two processing plants, namely a traditional Chinese jig plant with a capacity of 1.5 Mtpa and a new dense medium plant with a capacity of 3 Mtpa. The latter plant commenced trial production in August 2005. It is also planned for the current ROM section to be upgraded to match the increased capacity which will increase efficiency and allow for different quality feeds. Subsequent to the ROM upgrade, the old jig plant will be stripped out and rebuilt as another new dense medium plant.

Jig Plant

The Shaqu jig plant was first operated in 1996 and is still in excellent order. A picking belt system feeds the 200 mm x 50 mm raw feed from the ROM stockpiles with the material then crushed to −50 mm. It then passes through four bins of 360 t capacity each to reach the plant. The full size range is then washed in a 2 m, three-product jig. The jig rejects are discarded and the middlings are either bunkered for the on-site boiler that generates steam for heating, sent to a truck bin for local sales or conveyed to the 3,300 t train loading bin.

The jig product is screened at 10 mm and the oversize is stored in 3 x 2,300 t train loading bins. The fine jig product is separated at 0.5 mm using an elevator separator and screen, and the 10 mm x 0.5 mm product is dewatered in four centrifuges and sent to train loading. The 0.5 mm x 0 mm product is thickened with the thickener underflow cleaned in a flotation plant. The product is dried on two disc filters and the flotation tailings are dried in plate press filters and sold for home fires.

The Shaqu jig plant was due to be taken out of service in late 2005. Workforce numbers in 2005 were 170 plus additional maintenance staff.

New Dense Media Plant

In 2005 a new dense media plant was constructed by an Australian company using equipment sourced from Australia. It was built according to typical Australian design with steel structure and cladding, but typical of Chinese design, is large and very spacious.

The 50 mm x 0.5 mm feed is processed in two stages of dense medium cyclones. The high grade and middlings product are dried by horizontal centrifuges while the fines are floated in conventional cells. The cell product is dried in Chinese manufactured hyperbaric filters and the tailings are thickened in a thickener and dried in a press. The new plant mass balance is shown in Table 5-4.

Table 5-4: New Plant Mass Balance — Shaqu CPP

New Plant	Tonnes/hour	Ash (%)
Feed	650	23
High Grade Product	480	10
Middlings	52	38
Reject	100	71
Tailings	18	42

Forecast availability figures are not considered to be an issue as the plant is only required to run for 10 hours/day. The new plant will however be budgeted to run 16 hours/day.

A workforce of 339 is planned for the new dense media plant.

Quality

Typically ROM float/sink tests show 80% yield at 9% ash for a 1.70 SG cut. The new plant is planned to be run with the primary cyclone at 1.62 SG for 9% to 10% ash and the secondary cyclone at 1.80 SG for 45% ash.

The ROM coal supplied from Shaqu mine is reported to have an ash range of between 21% and 29% and volatiles ranging between 17.5% and 19.0%. The calorific value (CV) of the product is 7,700 kcal/kg with a crucible swelling number (CSN) between 6.5 and 8.0. Sulphur values range between 0.4% and 1.0%.

The quality parameters for the plant are indicated in Table 5-5.

Table 5-5: Quality Parameters — Shaqu CPP

		Ash (%)	CV (kcal/kg)	Sulphur (%)	TM (%)
Feed	#7 Seam	24.0	—	0.5	—
Product	High Grade	10.0	7,700	0.5	11

5.5.2 Coal Production History

The historical production for the Huajin Coal processing plant is shown in Table 5-6.

Table 5-6: Coal Processing Plants Production History, 2003 to 30 June 2006 — Shaqu

		2003	2004	2005	30 June 2006
Washed Coal	Mt	0.64	0.92	0.95	0.65
Middlings	Mt	0.10	0.21	0.24	0.11
Raw Coal and Waste	Mt	0.13	0.24	0.24	0.14
Total	Mt	0.87	1.37	1.43	0.9

5.6 Long Term Plans

Huajin Coal produced 1.63 Mt from Shaqu mine in 2004 and 1.87 Mt during 2005. The production plan indicates an increase to 2.4 Mt for 2006. The five year plan for Shaqu mine includes the increase of production to 8 Mtpa but no formal plan has yet been finalised. An application for approval has been lodged with the local government and pending the outcome, three additional longwalls will be purchased and deployed in the western and eastern sides of the current mine. Planned production figures indicate Shaqu mine to double current production by 2008 as shown in Table 5-7.

Table 5-7: ROM Production Forecast — Shaqu

Year	Production (Mt)
2006	2.40
2007	3.00
2008	5.00

Construction at Wangjialing exploration site was approved by the state government and is planned to commence during 2007. This timeframe implies that longwall production will commence in 2009 with full production capacity of the mine planned at 6 Mtpa. A wash plant with a capacity of 6 Mtpa will also be constructed to wash Wangjialing coal. The total investment for this project is reported at RMB2,311M.

5.7 Shaqu Underground Mine

5.7.1 Introduction

Construction of the mine commenced in 1992 but ceased in 1998 due to a lack of sufficient funds. In February 2002 construction recommenced under a new joint venture between China Coal (50%) and the Sanshi Coking Group (50%). The #4 seam has been mined since 1999, however full-scale operations only commenced again in 2004.

The #4 seam is being mined at a depth of 400 m below the surface. Two longwall systems are in operation at Shaqu mine, one in the north and one in the south. The longwall in the south cuts at the seam height of 2.4 m and the longwall in the north cuts at 4 m in a 4.2 m seam height. The longwall panels are supported by four development panels.

The mine produced 1.63 Mt in 2004 and 1.87 Mtpa during 2005.

5.7.2 Geology and Mineral Resources

General topography over the Shaqu mine consists of a wide river flat and therefore has no relief. Beyond the river flat there are high mountainous areas. The stratigraphic sequence of Shaqu coal mine is outlined in Table 5-8.

Table 5-8: Stratigraphic Sequence — Shaqu

Stratigraphic Unit	Thickness Range (m)	Average Thickness (m)
Quaternary	20 to 130	100
Triassic	0 to 59	0
Upper Permian	0 to 148	25
Upper Lower Permian	0 to 97	49
Lower Lower Permian (Shanxi Group)	11 to 98	60
Upper Carboniferous (Taiyuan Group)	57 to 105	79

The Quaternary material is usually unconsolidated and weathered soil, clays, sands and gravel deposited by recent river systems. Gravel is often found at the base of the Quaternary. The Triassic, which consists of greywacke sandstones with minor siltstones and gravel beds in places, is generally not present in the Shaqu mine area.

Seams #2 to #5 belong to the Shanxi Group. Generally the #2 and #3 seams are either too thin or not present due to being eroded away by the overlying Quaternary sediments. Seam #6 through to #10 seam are of the Taiyuan Group. The #6 and #7 seams are too thin or absent and are not recovered in the mining operations. Only the #4, #5, #8, #9 and #10 seams are mined. The #4 seam is thickest in the north area at 4.2 m and gradually thins towards the south to 2.4 m. The #4 seam can include up to six partings, but generally has only one or two stone bands. The partings are usually less than 0.2 m thick. Roof conditions are good, the roof primarily being a competent mudstone. The #5 seam has little or no partings and has a competent limestone roof.

The #8, #9 and #10 seams often coalesce to form a large working section up to 8 m thick. This combined unit has up to seven partings (each generally less than 0.2 m thick) and has a strong and competent limestone roof.

The average dip of the Permian strata is 7 degrees, but can steepen in some areas to more than 15 degrees.

Table 5-9: Seam Statistics — Shaqu

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#4	0.8 to 6	3	115 to 750 (base plate deeply embedded)
#5	0.1 to 5	2.7	5.5
#8/9/10	1.0 to 9.5	7	44.6

Structure

The Shaqu area has little or no structural features. There are very few faults within the Shaqu area and the few that are found are small scale (less than 1 m throw), with little or no affect on the mining recovery of the seams. Minor folding of the strata was found in places, while the general strike of the seams is NE dipping to the NW at dips ranging from 3 to 7 degrees.

A 3D seismic survey was trialled in the area, but found to be unsuccessful due to the gravel layers at the base of the Quaternary. There is no evidence of igneous activity in Shaqu coalfield.

Coal Quality

All the coal mined at Shaqu produces coking coal products. Approximately 30% of the total product is sold on the export market.

All the ROM coal is washed through a dense medium cyclone wash plant at the mine site (see Coal Processing section for more details). The typical quality parameters of each seam are summarised in Table 5-10.

Table 5-10: Typical Coal Quality — Shaqu Seams

Seam	Inherent Moisture % (ad)	Raw Ash % (ad)	Washed Ash % (ad)	Raw Sulphur % (ad)	Washed Sulphur % (ad)	Washed Phosphorus % (ad)
#4	0.5	20.0	7.0	0.45	—	0.050
#5	0.6	22.0	9.0	1.00	0.70	0.050
#8/9/10	0.6	15.0	6.0	2.50	2.00	0.006

Gas

Many gas samples were taken from the bore cores of the three target seams during the Shaqu exploration program. The Shaqu mine is regarded as one of the highest methane gas mines in China.

Bore core gas samples ranged from 7 to 30 m^3/t. The #4 and #5 seams averaged around 10 m^3/t at 92% methane, while the #8, #9 and #10 seams averaged 15 m^3/t at 96% methane. To date, the areas of higher gas have been well managed by the company using gas drainage systems and adequate ventilation.

More lead time will be required to desorb the gas in the lower seams before the panels are safe to mine. Desorption from surface drilling is being investigated by Huajin Coal.

Resource Estimation

There have been two phases of drilling at Shaqu, each having different levels of reliability in terms of seam tonnage and coal quality.

In the 1970s drilling was performed by the Chinese central government using NQ-size core drilling equipment. These boreholes were found to have a low core recovery rate (usually less than 80%) and are considered to be reasonably reliable in terms of coal thickness (due to the use of geophysical logs).

The second drilling program was conducted in the 1990s using good drilling equipment. This program proved to be successful in attaining a coal seam recovery rate of greater than 95% on average. Therefore, in terms of reliable data, the boreholes of the 1990s (to current) are regarded as very reliable data points for use in the estimation of coal resources. The earlier boreholes are regarded as unreliable due to lower than acceptable core recovery and therefore resulted in a downgrading of the resource categorisation.

Reserves have been estimated in areas where the #8, #9 and #10 seams coalesce to form one thick working section.

The parameters used to estimate the Coal Reserve are as follows:

- Minimum coal seam thickness of 0.6 m
- Maximum seam dip of 15 degrees
- Small mining blocks based on coal rank
- Coal excluded beneath surface infrastructure

The coal resources for Shaqu mine are shown in Table 5-11 and were current as at 30 June 2006.

Table 5-11: Coal Resources — Shaqu

	Resources (Mt)			Total Resources	Mineable Resources
Seam	Measured	Indicated	Inferred	(Mt)	(Mt)
#4	117	161	184	462	278
#5	104	163	106	373	267
#8	131	218	316	665	0(1)
#9	0	0	72	72	0(1)
#10	0	42	210	252	0(1)
Total	352	584	888	1,824	545

(1) #8, #9 and #10 seams excluded from Mineable Resources due to excessive gas levels

5.7.3 Coal Reserves

SRK has applied a 75% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design. This has been assumed to allow for areas which will not be mineable or fully extractable, such as faults and intrusions, gateroads, main and development entries. Mining loss and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 5-12.

Table 5-12: Coal Reserves — Shaqu

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
75	166	243	409	6	10	423	89.7	379

5.7.4 Mining and Operations

Eight seams are present in the resource block of which three are too thin to be economically mined. The #4 seam is being mined, with the #5 seam planned for 2006. The #8, #9 and #10 seams are also deemed to be mineable in future. The #4 seam dips at an average of 7 degrees and is 400 m below the surface.

Two longwall systems are deployed in two separate areas of the mine. The longwall panel visited by SRK during the site visit (panel 14201) is 200 m wide and 1.2 km long. This longwall extracts the whole seam at 2.4 m, however the other longwall extracts 4 m in a seam height of 4.2 m in the northern part of the mine. Equipment is supplied by Chinese manufacturers with the shearer a MGTY300/730-1.1D-model in the north and a MG-200 in the south. The shields are ZZ5200/25/47-models in the north and ZZ4600/16/32 in the south. Three development panels mine in coal and rock, with two roadheader panels equipped with S-120 roadheaders deployed in the north and one blasting panel operating in the south during the time of the visit. The longwall system in the south has a production capacity of 1 Mtpa and the system in the north 2 Mtpa. The historical ROM production figures for Shaqu mine are shown in Table 5-13.

Table 5-13: Mine Production History, 2003 to 30 June 2006 — Shaqu

	2003	2004	2005	30 June 2006
Longwall (Mtpa)	0.98	1.63	1.87	1.25
Development (m)[1]	0	190	1,954	1,417

(1) Development meters reported are low due to development activities completed as part of the establishment period of mine

Development in coal is done at a width of 4 m and a height of 4 m in the north and at a height of 2.6 m in the south. To achieve this height in the south requires cutting into the floor by 200 mm. Mining conditions can become fairly difficult, especially in the tailgate where the roadway is pinching and intensive support in the roof and sidewalls, with additional standing support, is required to keep the roadway open. The high level of stresses on the tailgate side could have been brought about by the widely accepted practice in China of mining a longwall panel with previously mined longwall panels on both sides.

Long term development for mine expansion is done in rock in an arched profile with a base width of 5 m and a height of 4.5 m. A concrete floor of 350 mm is constructed along the roadway and shotcrete applied at a thickness of between 100 mm and 150 mm on the sidewalls and the roof.

Stonedust is not used at the mine. Sidewalls and roof are washed down periodically with water and water barriers are in use as prescribed by legislation.

Ventilation quantities are generally lower than internationally acceptable standards. The airflow quantity reported for the longwall panel is 32.5 m^3/sec and for the development panel measurements indicate 17 m^3/sec in the intake and 8.3 m^3/sec in the mining face. Levels of methane are consistently detected underground. Some of the values detected during the site visit ranged from 0.65 to 1.2%.

Shaqu mine uses in-seam drilling techniques into the longwall block before mining to drain methane to a mineable level. The gas holes are drilled every 10 m to a depth of 150 m and plumbed with hoses to a common pipeline to pipe the methane to the surface for flaring. Surface-to-seam drilling techniques were not used in 2005, however this technique is under investigation to be implemented at a later stage. High concentrations of methane liberates from the #4 seam floor, indicating that the lower seams also contain high levels of methane.

In-time methane monitoring is available on the surface in a centralised control room and equipment underground is interlocked to trip power when methane levels exceed 1.5% concentration in intakes and working faces, and 2% in the longwall return roadway. Monitors are placed in underground workings in

positions prescribed by legislation. A 5% methane peak the day before the site visit was observed on a historical graph in the control room. This peak reading was caused by a power failure and it was reported that all personnel in the ventilation district were evacuated to the main intake until the problem was rectified.

Heat levels experienced underground were acceptable and temperatures are measured in the panels and relayed to surface with the methane and carbon-dioxide readings. Maintenance on underground equipment is scheduled and conducted every day from 4:00pm to 12:00am.

Dust levels were evident during the site visit and measurements are taken every 10 days in identified areas in compliance with legislation and experience of high dust areas. The following methods to prevent dust generation are applied.

- Water injection to coal seam prior to mining
- Sprays on production machines
- Water fog in development panels
- Drilling with water
- Washing of sidewalls and roof on a frequent basis

Shaqu mine utilises conventional methods of transportation underground. Coal is transported from the longwall panel to the surface by rubber belt conveyor systems and in development panels initially by a scraper chain conveyor and subsequently by the rubber belt conveyor system. Personnel travel on foot to their working places and material and waste are transported by conventional winch and skip systems.

5.7.5 Infrastructure

Six shafts in total have been established at Shaqu mine. Four shafts are utilised as intake shafts and two as return shafts. The services installed in each shaft are:

- Intake:
  - Vertical ventilation shaft
  - Vertical auxiliary shaft
  - Incline coal conveyor shaft
  - Incline escape shaft
- Return:
  - Vertical ventilation shaft
  - Incline ventilation shaft

The auxiliary shaft is 378 m deep and is equipped to convey men and material to and from the surface.

The mine is supplied by the local public electricity grid from the Liulin power station (200 Megawatts (MW)) at 110 kV. A surface substation steps the supply down to 10 kV to separately distribute it to the northern side of the mine. This side of the mine is supplied by one supply line over a distance of 2.72 km. For the southern side of the mine, a duplex line of 3.13 km feeds a substation where the supply is transformed to 35 kV to be supplied to a further substation equipped with 2 x 16,000 kVA transformers. Electricity supply is then stepped down to 10 kV and supplied to various substations on the surface and mobile substations underground. Power is supplied to production equipment at 1,140 V and 660 V.

Longwall production is forced to cease during peak times between five and 10 days per month for three to four months of the year because of insufficient supply of power to the mine. The reduced power supply particularly occurs during the seasons of spring and winter.

During this time only development operations and maintenance with other general work can continue. Research and investigative work has commenced to build a company-owned gas-fired power station to utilise the methane drained from underground and alleviate dependency on the local grid.

Water is supplied to the mine from five surface boreholes situated at Kangjiagou, 3.4 km from the mine. The wells have a combined supply capacity of 10,000 m^3/day and in 2005 the total consumption at the mine was 6,397 m^3/day. Only two or three boreholes are required at any given time to sufficiently supply the mine. A total surface storage capacity of 3,200 m^3 is available for mine usage and 600 m^3 for residential use.

5.7.6 Capital and Operating Costs

Historical and planned capital cost figures for Shaqu mine are presented in Table 5-14. A significant increase in capital expenditure is planned for 2007 and 2008 to increase the capacity of the mine.

Table 5-14: Capital Expenditure — Shaqu

Operating company and Mine	Mining Method	Capital Expenditure (RMB Million) 2003	2004	2005	2006	2007	2008
Huajin Coking Coal Co., Ltd.							
Shaqu	UG	678	247	182	48	902	776

Reported actual operating costs at Shaqu mine increased significantly from 2003 to 2004 due to a change in accounting practices. The unit cost showed a further slight increase during 2005 as indicated in Table 5-15.

Table 5-15: Average Annual Mine Cash Costs — Shaqu

Operating Company and Mine	Mining Method	Cash Operating Cost (RMB/tonne) 2003	2004	2005
Huajin Coking Coal Co., Ltd.				
Shaqu	UG	73.00	102.00	118.00

5.8 Wangjialing Underground Mine

5.8.1 Introduction

The Wangjialing resource is situated south-west of the Xiangning mining area in the Shanxi province. Construction of an underground mine is planned to commence during 2007. At full production capacity, the mine will produce 6 Mtpa and a power plant will also be constructed at a capacity of 2 x 50 MW to supply power to the mine and the processing plant. The power plant will be situated 8.66 km from the mine.

The total investment for the project is reported at RMB2,311.24 M of which RMB13.79 M has already been spent.

5.8.2 Geology and Mineral Resources

The topography consists of steep hills with an elevation range from 400 to 1,420 m above sea level. The variation is primarily due to the large river systems and large erosional valleys that have been cut into the thick soft Quaternary cover across the region. The steep hills are aligned with terraced farming.

The stratigraphic sequence of the Wangjialing area is outlined in Table 5-16.

Table 5-16: Stratigraphic Sequence — Wangjialing

Stratigraphic Unit	Thickness Range (m)	Average Thickness (m)
Upper Permian (Shi Qian Feng Group)	0 to 17	0[1]
Upper Permian (Shang Shi Hi Zi Group)	452 to 556	495
Lower Permian (Xia Shi Hi Zi Group)	71 to 119	90
Lower Permian (Shanxi Group)	20 to 36	25
Upper Carboniferous (Taiyuan Group)	43 to 91	60
Middle Carboniferous (Benxi Group)	—	11

(1) Zero indicates unit does not exist in mining area but range reflects regional geology beyond mining area

The Quaternary material is usually unconsolidated and weathered soil and clays, with gravel at the base of the unit. The Neocene sediments are essentially clay material. The Quaternary and Neocene sediments constitute the bulk of the overburden material and unconformably overlie the Permian sediments.

The #2 and #3 seams belong to the Shanxi Group. The #2 seam averages 6 m in thickness (see Table 5-17) and contains between two and five partings which are generally less than 0.2 m thick. The immediate roof consists of mudstone and siltstone, while the immediate floor generally comprises mudstone, siltstone or fine sandstone. Generally the #3 seam is too thin (average 0.8 m) for consideration of underground extraction.

The #7 to #10 seams are of the Taiyuan Group. The #7 seam is generally too thin (averaging 0.5 m) or absent and is unlikely to be recoverable in underground mining operations. The #10 seam averages 2.4 m in thickness and contains between one and two partings which are generally less than 0.2 m thick. The immediate roof consists of sandstone, while the immediate floor generally comprises mudstone or fine sandstone. The #12 seam belongs to the Benxi Group and is generally too thin (average 1.2 m) at the depth it occurs for consideration of underground extraction.

Table 5-17: Seam Statistics — Wangjialing

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#2	3.1 to 8.1	6.2	45 to 638[1]
#3	0.1 to 1.4	0.8	2.2
#7	0 to 1.6	0.5	26.5
#10	0.8 to 6.7	2.4	11.2
#12	0 to 2.7	1.2	26.6

(1) Base plate deeply embedded

Structure

The Wangjialing area has two zones of steep dipping strata. In the east, a small area of the coalfield has strata dipping at 40 degrees over a 250 m wide zone. In the south-east corner of the area, a 500 m wide zone has dips ranging from 15 to 25 degrees.

There have been five significant faults delineated from the borehole exploration.

The major faults generally strike east-west, the largest having a displacement of up to 50 m while the remainder of the faults have between 20 and 30 m displacement.

Coal Quality

The #2 seam produces a mid-ash (average 7% after washing), low sulphur coking coal. The typical quality parameters of each seam are summarised in Table 5.18.

Table 5-18: Typical Coal Quality — Wangjialing Seams

Seam	Inherent Moisture % (ad)	Raw Ash % (ad)	Washed Ash % (ad)	Raw Sulphur % (ad)	Washed Sulphur % (ad)	Raw Phosphorus % (ad)
#2	0.9	19.3	6.9	0.49	0.45	0.032
#3	0.8	24.9	7.5	2.72	1.30	0.010
#7	0.7	24.6	6.5	5.27	3.71	0.015
#10	0.7	19.5	6.5	5.43	4.36	0.004
#12	0.1	28.9	8.0	6.80	2.72	0.021

Resource Estimation

The exploration boreholes at Wangjialing were drilled in the 1970s. In general, the core recovery of the seams averaged around 75% of the coal in each of the target seams. Most if not all boreholes were logged using geophysical logging tools to accurately measure the seam thickness which allows the coal tonnage to be accurately calculated. The coal resources for Wangjialing mine are shown in Table 5-19 and were current as at 30 June 2006

Table 5-19: Coal Resources — Wangjialing

Seam	Resources (Mt) Measured	Indicated	Inferred	Total Resources (Mt)	Mineable Resources (Mt)
#2	229	179	816	1,224	408
#3	0	17	147	164	17
#7	0	0	43	43	0[1]
#10	115	96	475	686	0[2]
#12	0	0	106	106	0[1]
Total	**344**	**292**	**1,587**	**2,223**	**425**

(1) #7 and #12 seams excluded due to low seam thickness and high sulphur content

(2) #10 seam excluded due to high sulphur content

5.8.3 Coal Reserves

SRK has applied a 75% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design. This has been assumed to allow for areas which will not be mineable or fully extractable, such as faults and intrusions, gateroads, main development entries etc. Mining loss and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 5-20.

Table 5-20: Coal Reserves — Wangjialing

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
75	172	147	319	6	10	330	92.6	305

5.8.4 Mining and Operations

Longwall production is planned to commence in 2009. According to planning documentation, a total of 45,007 m would have been developed at that stage, comprising 11,899 m in rock, 14,700 m in rock and coal together and 18,408 m in coal. Development operations will commence 26 months after the start date of the project and are planned to be completed within 17 months. Allowing three months for the longwall installation and preparation, this results in a total of 46 months implementation and commissioning from the start of the project.

The feasibility study was completed in March 2003 and the environmental management report at the end of 2003. All approvals have been received except for final approval from the state government. Huajin Coal has been granted finance for the project by the China Development Bank. In 2005, temporary water and power supply was installed to the site.

5.8.5 Coal Processing and Transport

A processing plant at a capacity of 6 Mtpa is planned to wash coal mined at Wangjialing mine. An established rail network has been identified to rail coal to Rizhao port which is located 1,050 km from the mine. The Hou-Xi rail line, situated on the south-west corner of the mining resource, will be utilised to transport the coal over a distance of 8.8 km to the train loading station. The Hou-Xi line has a capacity of 16 Mtpa and was utilised at 8 Mtpa in 2005.

From there the coal will be transported on the Hou-Yue railway line, which has a design capacity of 70 Mtpa and was utilised at 30 Mtpa during 2005. A range of railway connection lines (Xin-Jiao, Yan-Xin and Yan-Shi rail lines) will lead to the Rizhao port situated 1,050 km from the mine.

5.8.6 Infrastructure

Temporary water and power supply were being installed to service the site.

5.8.7 Capital Costs

Huajin Coal plans to commence construction of the new Wangjialing underground mine during 2007. Capital expenditures to cover the costs of mine development, equipment acquisition and infrastructure establishment until 2008 are indicated in Table 5-21.

Table 5-21: Capital Expenditure — Wangjialing

Operating Company and Mine	Mining Method	Capital Expenditure (RMB Million) 2003	2004	2005	2006	2007	2008
Huajin Coking Coal Co., Ltd.							
Wangjialing	UG	—	—	—	182	1,070	1,023

6 NANLIANG MINERAL COMPANY

6.1 Introduction

Shanxi Nanliang Coal Co., Ltd. (Nanliang Coal) is a joint venture between six shareholders of which three are major shareholders. The major shareholders are Huaguang Resources Ltd Australia (32%), which is 100% owned by China Coal, Yulin Coal Import and Export (26%) and China Coal (23%). Nanliang Coal operates the Nanliang underground mine in the Shenmu County, Shaanxi province, approximately 40 minutes drive by car from the town of Datong.

The project was approved in 1998 and the capital registered for the project was reported as RMB68.75M. Prior to 1995 the mine was owned by the local government and between 1995 and 1998 it was under the ownership of Yulin Coal Import and Export. The mine initially started as a bord and pillar operation with a total of 200,000 t extracted with this mining method. Two seams were extracted, namely the #2 seam and the #3 seam and mining was simply from the outcrop on the side of a hill. In 1998 the joint venture was formed and the Xian Coal Mining Design Institute, which is a national organization, designed the mine. A unique mining method is used in that 220 m wide blocks are formed by development mining and then extracted with blasting methods along the width of the face. Coal is transported from the mining face by a scraper conveyor and the roof is supported behind the face with hydraulic props. A barrier pillar of 10 m thick is left across the panel at intervals of 50 m.

Future plans include the stabilizing of mine production at 1 Mtpa and the possible introduction of a longwall mining system. The subsequent addition of a second longwall system is also under consideration.

Nanliang mine produces steam coal which is sold to local customers only. Coal is loaded on trucks and transported 15 km to be loaded on trains, then transported 600 km by train to the Qinhuangdao port and distributed to customers from there.

6.2 Corporate Management Structure

Nanliang Coal's management structure is illustrated in Appendix 2. Workforce numbers for Nanliang Coal are shown in Table 6-1.

Table 6-1: Workforce Numbers — Nanliang Coal

Category	Employees
Production[1]	
Nanliang UG	566
Management[2]	3
Other[3]	38
Total	607

(1) Permanent and contractor employees involved in mining activities

(2) Senior management — excludes functional departments

(3) Only personnel involved with the mines — excludes CHPP, rail etc

As the Nanliang mine is situated in an isolated area in the countryside, only 15 staff members are employed by the mine on a full-time basis. These staff members are accommodated on site and train-in and train-out over weekends on a scheduled basis. All other mine workers are local to the area and are employed by a contracting company.

Cost figures indicate that the staff members employed by the company are paid at an average of RMB9,833 per month, while contracting employees earn on average RMB1,466 per month.

6.3 Occupational Health and Safety

Nanliang mine employs 15 staff members with all other personnel at the mine employed by a contracting company. Contractor employees are all covered by Nanliang Coal's on-site safety management system. Twelve staff members and six contractors are appointed as safety monitors to inspect and improve safety conditions.

A system of fines has been implemented at Nanliang mine to encourage all parties to prevent any injuries. Staff members are required to pay a deposit at the start of the year (which may be up to 15% of their annual salary), which is forfeited if a fatality occurs. If no fatality occurs during the year, staff members will receive their deposit back and also receive a further bonus of twice the amount. Investigations are conducted after an incident occurs in an attempt to determine the root cause and the responsible party. Depending on the outcome of an incident investigation, the contracting company and workers of the contracting company (including the whole team) can be fined when found responsible for the occurrence of the incident or injury.

Safety procedures are developed through the accident investigations to prevent recurrence of a similar incident. The contracting company has the responsibility to communicate information following on from an investigation.

All employees undergo safety training through a government organization once every two years. Additional safety and procedural training is conducted twice per year per employee by the contracting company, and Nanliang mine permanent personnel are involved in the evaluation of employees after that training. The contracting company has the responsibility to encourage its employees to identify and report hazards.

The supplied historical safety statistics for Nanliang mine since 2003 are shown in Table 6-2.

Table 6-2: Accident Statistics, 2003 to 2005 — Nanliang Coal

Category	2003	2004	2005
Fatal[1]	0	0	0
Serious[2]	0	0	0
Minor[3]	0	4	3

(1) Accident causing death (number indicates lives claimed)

(2) Accident requiring hospitalisation and do not return to work for more than 24 hours (includes fatal incidents)

(3) Accident which does not require hospitalisation and employee returns to work within 24 hours

The accident statistics indicate very low levels of injury frequency, with only four minor injuries in 2004 and three in 2005. Health and safety is clearly given the highest priority at the mine, as reflected in the accident statistics.

6.4 Environmental Assessment

6.4.1 Introduction, Scope and Background

An environmental assessment was completed by SRK to assess Nanliang Coal's environmental management practices. In addition to visiting the Nanliang underground coal mine, the environmental assessment included interviews with key environmental staff members at Nanliang mine, inspection of relevant environmental documentation and interpretation of the responses to an environmental questionnaire provided by SRK.

As for the environmental assessments of the other China Coal subsidiary companies, this environmental assessment is reported entirely at corporate level. This approach was adopted as Nanliang Coal

has its corporate office adjacent to the Nanliang mine in Shaanxi province from which the environmental management of the mine is undertaken.

6.4.2 Corporate Environmental Awareness

While Nanliang mine has been operational since 1989, the joint venture which now operates the Nanliang mine was only established in May 2005. As noted earlier in this report, in order to apply for ISO9001 and/or ISO14001 status, a mine must be operating for a qualifying period of time. Nanliang Coal plans to apply for quality, environmental and safety accreditation when it has operated for a suitable period of time under the new joint venture. Following discussions with staff, site inspection and document review, it is SRK's opinion that Nanliang Coal is an environmentally aware company and should have few problems achieving the quality and environmental accreditations should it apply.

6.4.3 Mining Title and Royalty Payments

Nanliang Coal is licenced to mine underground at Nanliang mine. Mining licence details are provided in Table 6-3. Nanliang Coal holds both the surface and mineral rights at the Nanliang mine, with mining licences valid until 2019. Should Nanliang Coal still have mineable coal reserves following expiration of the mining licences, it has a priority right to apply for a new or extended licence. The mining licence was issued by MOLAR.

Table 6-3: Mining Licence Details — Nanliang

Mine	Mining Licence No.	Mining Area (km^2)	Issue Date	Licence Tenure
Nanliang	1000009920052	19.3	August 1999	20 years

Nanliang Coal pays mining royalties and taxes to the government in respect of it Nanliang mine according to the Mineral Resources Law (1996 as amended). There are no options held over the mining land other than by the government and Nanliang Coal is not permitted to divest mining licences to other commercial operators.

6.4.4 Environmental Licencing, Compliance and Reporting

Environmental licences have been granted to Nanliang Coal at provincial level for boundary noise, gaseous emissions and water discharge. Further to these licences, Nanliang Coal maintains a licence from the local Fugu County Water Resource Management Commission for groundwater extraction to supply the mine.

Nanliang mine is required to prepare an Annual Environment Report to the Shaanxi provincial Environmental Protection Bureau that incorporates data on waste volumes generated, noise, wastewater and gaseous emissions.

After approval, the report is passed from the provincial regulators to the local county environmental regulators who conduct random inspections approximately every six months. In reality, there are very few environmental issues to manage at the Nanliang site, as the mine is underground and there is no coal wash facility on site. There is however a very small capacity waste water treatment plant (maximum capacity 360 m^3/day) and a coal crushing plant on-site.

SRK inspected the final inspection report of the environmental facilities for the proposed mine expansion compiled by the Environmental Protection Station of Yulin City, Shaanxi Province, dated May 2004. SRK found that all environmental factors were in compliance with relevant national standards with the exception of dust at three locations around the site. Upon further investigation, it was revealed that the dust

breaches were due to topsoil removal from local farms by seasonal winds, rather than as a result of mining operations.

6.4.5 Environmental Staff

Due to the relatively simple nature of mining operations at Nanliang and the small amount of environmental infrastructure present at the mine, Nanliang Coal distributes the responsibilities for environmental management between a few senior safety and engineering staff members. In 2005 there were 15 permanent management staff at the mine site, with operational personnel being employed on a contract basis. After inspecting the mine site facilities, the rehabilitated areas, the environmental documentation and completing discussions with key Nanliang Coal staff members, it is the opinion of SRK that Nanliang Coal has suitably qualified and motivated staff to ensure and maintain environmental compliance.

6.4.6 Environmental Planning and Budgets

Nanliang Coal's current environmental plan was approved in 2004 by the local environmental regulators. Since its formation, Nanliang Coal has spent more than RMB7.3 M on landscaping, infrastructure and rehabilitation. This figure represents approximately 5.5% of the total mine budget. No budget for environmental monitoring is required at Nanliang mine as the local Environmental Protection Bureau monitors environmental issues. Nanliang Coal provides an annual report to the local Environmental Protection Bureau. Due to the recent plant expansion, all environmental infrastructure is relatively new, with only a small operating budget required for local waste rock dump management and rehabilitation and operation of the waste water treatment plant. In this regard, SRK concludes that Nanliang Coal has allocated sufficient funds for environmental considerations.

6.4.7 Water Management

Nanliang Coal is aware of its water conservation responsibilities as a result of its mine being located in a semi-arid area. Water is sourced at Nanliang mine by five groundwater wells approved by local authorities. Nanliang Coal draws water from three of these wells. All industrial wastewater at Nanliang mine is treated by the on-site waste water treatment plant and is subsequently recycled on the rehabilitated areas to assist with vegetation establishment.

SRK reviewed data on both industrial and sewage wastewater during a visit to Nanliang Coal and found that results for all treated water met with relevant government environmental standards. Overall, it is SRK's opinion that Nanliang Coal takes its water management responsibilities seriously and manages its water use accordingly.

6.4.8 Waste Rock, Tailings and Rehabilitation Management

Due to the Nanliang mine being underground, volumes of waste rock generated are significantly less than those for an open-pit mine. The total volume of waste rock and soil generated at Nanliang Coal amounts to only approximately 2000 to 3000 m^3 per annum in comparison to a total coal production of approximately 750,000 tpa. This low waste rock generation rate is largely due to the simplicity of the geology at Nanliang mine and the relatively simple accessibility to the mineable coal. Waste rock largely comprises soil and sandstone removed during mine development work, rather than during actual coal mining operations. As a result, SRK does not believe that excess waste rock will be an issue at the Nanliang mine.

The waste rock has been used in the local town to infill large gullies in the landscape. The sandstone is placed in the gullies, with up to 2 m of local topsoil placed over the sandstone. Finally, vegetation is established where required, or else the reclaimed land is used by locals as cultivation areas for food. In this

regard, there is demand from local farmers for rehabilitation on their land far in excess of the waste rock supply from the Nanliang mine.

As there is no coal washing facility at Nanliang mine, there are no coal wash rejects to be stored. A small boiler operates on-site during winter to generate heat for the residential building at the mine, with waste boiler ash disposed of into gullies, along with the waste rock, which are subsequently rehabilitated. SRK believes that Nanliang Coal is proactively and responsibly managing its solid wastes and has a large and low cost waste area in which to dispose of them.

6.4.9 Dust Management

Localised dust at the site is a seasonal issue from exposed cropping surfaces on adjacent farmland, with the source of this dust unlikely to be the Nanliang mine site itself. Dust suppression is undertaken on any stockpiled coal, in addition to Nanliang Coal's utilisation of dust suppression techniques in the boiler area when it is seasonally operating. An inspection of the site indicated that dust should not be a major issue due to the relatively simplistic nature of coal handling on site.

6.4.10 Social and Regulatory Relations

Nanliang Coal enjoys a good relationship with both the local residents as well as the regulatory authorities. The strong relationship with the local residents is based on both employment opportunities and concomitant downstream effects, in addition to the increased area of available arable land following the beneficial re-use of waste rock. This solid relationship with the local residents was reflected in a questionnaire issued by the mine that indicated in excess of 90% of respondents supported the mine, while over 95% said it would have a positive effect on the local economy.

Relations with the local and provincial Environment Protection Bureau staff appear sound, as evidenced by approval of Nanliang Coal's mine expansion plans. Feedback from regulatory staff indicates positive relationships with Nanliang Coal. These relationships are likely to continue given Nanliang Coal's attention to its environmental responsibilities and compliance requirements. To date, Nanliang Coal has not received a fine for breach of any environmental conditions.

6.4.11 Environmental Assessment Conclusions

Following interviews with key Nanliang Coal managerial staff and inspection of environmental documentation and the Nanliang mine site, SRK finds that Nanliang Coal has a sound and proactive approach to its environmental responsibilities and is managing its operations in compliance with its environmental obligations. This opinion is supported by the fact that Nanliang Coal has not been fined for any environmental breaches at its mine to date. SRK believes this sound environmental management is likely to continue into the foreseeable future.

6.5 Long Term Plans

Nanliang Coal plans to produce 1 Mt in 2006 and 2007 respectively and 1.2 Mt in 2008. It is envisaged that a longwall mining system will be introduced to produce at 1 Mtpa from one panel compared to 1 Mtpa from two panels under the current system. Other mines in the area have successfully introduced longwall equipment.

All services are deemed sufficient by Nanliang to support a rate of 1 Mtpa and research and investigative work is underway to specify a suitable longwall shield for the mining conditions. Development panels will also be converted to roadheader mining operations and an additional longwall panel is also envisaged in the future.

6.6 Nanliang Underground Mine

6.6.1 Introduction

Construction at Nanliang mine in its current lay-out commenced in 1998. An initial production level of 150,000 tpa increased to 980,000 t during 2005. The current design capacity of the mine is 750,000 tpa and is supported by services designed for 1 Mtpa. Prior to 1998, the mine started as a bord-and-pillar operation mining the #2 seam and #3 seam, extracting a total of 200,000 t. At that stage the mine belonged to the local government.

In 2005 Nanliang mine was mining the #2 seam. Access to the coal seam is from the side of a hill below the #2 seam to reach it at a depth of 70 m below the surface. In some areas of the mine the seam is as low as 30 m below the surface. Mining is done in a unique way in that 220 m wide blocks are formed by blasting development panels and then extracted with blasting methods along the width of the face. The whole coal seam is mined at a height of 2.4 m with coal transported from the mining face by a scraper conveyor. The roof is supported behind the face with hydraulic props.

The mine is situated in an isolated area of the countryside with the 15 staff members employed by the mine accommodated on site and trained-in and out over weekends on a scheduled basis. All production workers are local to the area and are employed by a contracting company. Approximately 550 workers are employed through the contracting company, however this number would reduce to about 200 if and when longwall equipment is introduced at the mine.

6.6.2 Geology and Mineral Resources

The topography over the Nanliang mine has reasonably high relief (in the order of 200 m) due to the river system cutting deep into the surface. In some places, the coal seams outcrop in the river valleys. The stratigraphic sequence of Nanliang coal mine is outlined in Table 6-4.

Table 6-4: Stratigraphic Sequence — Nanliang

Stratigraphic Unit	Thickness Range (m)	Average Thickness (m)
Quaternary	0 to 50	20
Neocene	0 to 80	50
Jurassic	50 to 250	170

The Quaternary material is usually unconsolidated and weathered sandy soil. The Neocene consists of competent fine sandstones and siltstones. In some parts of Nanliang, the Neocene sediments are absent. The coal seams in Nanliang are of Jurassic age. There are five main seams in Nanliang area, four of which are amenable to underground extraction.

The geology of the Nanliang area is such that in places where the Neocene is absent, the coal seams are close to the surface particularly where the Quaternary can be as little as 30 m thick. This is of concern to underground mining as the highly weathered nature of this thin depth of cover provides a very unstable roof. Consequently, underground mining of the coal seam must advance to a minimum depth of cover of 70 m.

In 2005, the #2 seam was being mined. The roof material was so competent that it did not readily collapse in the goaf area. The roof is drilled and subsequently blasted behind the mining face so as to reduce the potential for wind blasts.

The average dip of the Jurassic strata is 2 degrees. The stratigraphy at Nanliang mine is indicated in Table 6-5.

Table 6-5: Seam Statistics — Nanliang

Seam	Thickness Range (m)	Average Thickness (m)	Average Interburden (m)
#1[2]	0 to 2.4	1.6	70
#2[2]	1.2 to 2.7	2.1	30
#3[1]	1.5 to 2.9	2.1	40
#3[1] combined with 3[1L]	3.8 to 4.7	4.1	0
#3[1L]	0 to 1.6	1.1	3
#5	0.1 to 3.7	1.7	85

Structure

The Nanliang area has little or no structural features. Thirty-two boreholes have been drilled indicating no structural issues. The coal is too shallow for seismic surveys to be successful. No faults have been encountered in the mining operations to date.

There is no evidence of igneous activity in the Nanliang coalfield.

Coal Quality

All the coal mined at Nanliang produces thermal coal products. Although there is potential for a Pulverised Coal Injection (PCI) product, the coal has too high a volatile matter content (around 35%) for the PCI market but can be sold as a high quality energy coal.

The ROM coal does not require beneficiation. The typical quality parameters of each seam are summarised in Table 6-6.

Table 6-6: Typical Coal Quality — Nanliang Seams

Seam	Inherent Moisture % (ad)	Raw Ash[(1)] % (ad)	Raw Sulphur % (ad)	Raw Phosphorus % (ad)
#2[2]	8.37	8.0	0.25	0.005
#3[1]	7.97	7.0	0.25	0.020
#3[1] + 3[1L]	8.23	7.0	0.25	0.020
#3[1L]	—	7.0	0.27	0.010
#5	7.51	10.0	0.30	0.030

(1) Raw ash values exclude partings in the seams

Gas

Due to the shallow depth of cover, there is no gas of any significance in Nanliang mine.

Resource Estimation

The drilling program was conducted in recent years using good drilling equipment which proved to be successful in attaining a coal seam recovery rate of greater than 95% on average. Therefore, in terms of reliable data, the boreholes are regarded as very reliable data points for use in the estimation of coal resources.

The coal resources for Nanliang mine as shown in Table 6-7 were current as at 30 June 2006. Since 26 May 1998, when the reserves for Nanliang mine were certified by MOLAR, approximately 2 Mt has been extracted from the area, mainly in the #3[1] seam.

Table 6-7: Coal Resources — Nanliang

Seam	Resources (Mt) Measured	Indicated	Inferred	Total Resources (Mt)	Mineable Resources (Mt)
#2[2]	14	13	3	30	27
#3[1]	21	8	4	33	29
#3[1L]	0	5	2	7	5
#5	0	4	0	4	4
Total	35	30	9	74	65

6.6.3 Coal Reserves

SRK has applied a 75% mining recovery factor to the coal resources to allow for those resources which will not be accessible in a practical mine design. This has been assumed to allow for areas which will not be mineable or fully extractable, such as faults and intrusions, gateroads, main and development entries. Mining loss and mining dilution factors have also been applied to calculate recoverable reserves. A saleable recovery percentage was then applied to calculate marketable reserves. The resulting coal reserves are shown in Table 6-8.

Table 6-8: Coal Reserves — Nanliang

Mining Recovery (%)	Proved Reserve (Mt)	Probable Reserve (Mt)	Proved + Probable Reserve (Mt)	Mining Loss (%)	Mining Dilution (%)	Recoverable Reserves (Mt)	Saleable Recovery (%)	Marketable Reserves (Mt)
75	28	23	51	5	5	51	100	51

6.6.4 Mining and Operations

The #2 seam mined at Nanliang has a height of 2.4 m and dips at an average of 1.2 degrees. This seam will be mined for the foreseeable future, thereafter the #3[1] seam and the #3[2] seam will be targeted. These seams are situated closely together at 1.6 m thick coal each and a mudstone band of 0.4 m in between. The seams will be mined together at 3.6 m.

The mining method used at Nanliang mine is a combination of longwall mining and blasting methods. Panels at a width of 220 m in total and split by a roadway at 110 m width along the length of the panel are developed utilising blasting and hand-loading methods onto rubber-tyred tractors and trailers. The panels are then extracted by blasting along the width of the face, with the coal transported along the face with a scraper conveyor. The roof behind the mining face is supported with two rows of hydraulic props placed along the width of the face. A total of 9,244 props are owned by Nanliang mine to ensure sufficient support in the two mining faces. A barrier pillar of 10 m thick is formed and left every 50 m along the length of the panel to reduce stresses on the props and the mining face. After retreat of 20 m from the barrier pillar, the roof is drilled behind the props and blasted to fracture the roof strata and ensure collapse of the roof to form a goaf.

Two of these panels, which are supported by two development panels, are operated at the mine and produced 980,000 t in 2005 with the plan set at 1 Mt for 2006. The historical ROM production figures for Nanliang mine are shown in Table 6-9.

Table 6-9: Mine Production History, 2003 to 30 June 2006 — Nanliang

	2003	2004	2005	30 June 2006
Longwall (Mtpa)	0.37	0.78	0.98	0.50
Development (m)	5,479	0	0	877

Nanliang mine has very shallow mining and practically a flat seam with only a 2.4 m mining height, which results in very favourable mining conditions. The roof is undulating and irregular but very competent. No severe levels of stress were apparent in the underground workings.

Strategic roadways for mine life are driven in rock and lined with bricks and cement after development. The thickness of the lining is approximately 300 mm. Roadways are developed in an arch profile at a base width of 4.2 m and a height of 3.7 m. After installation of the brick lining support the net cross section of the roadways is 10 m^2.

No stonedusting is done in the mine. At the time of the SRK inspection, the airflow quantity reported for the longwall panel was 6.3 m^3/sec and for the development panel 3.3 m^3/sec. No methane is reported or detected underground. In-time methane monitoring is available on the surface in a centralised control room and equipment underground is interlocked to trip power when methane levels exceed 1.5% concentration. The alarm level has been set at 1% concentration. After blasting a reading of 32.5 parts per million (ppm) carbon monoxide was observed in the control room. It was reported that the cut-off value for power to be switched off was 240 ppm carbon monoxide.

No heat was experienced during the underground visit with hot air generated during winter months and pumped into the mine to curb the extremely cold conditions (as low as −27°C). Dust levels are not evident underground, and continuous monitoring is done with fixed units and measurements taken every two weeks at 12 points in the mine. Dust prevention methods utilised are water sprays and water curtains at strategic points.

Nanliang mine utilises diesel rubber-tyred transportation underground which allow for lower installation and maintenance cost with flexibility to adapt to production and operational requirements. Coal is transported from the panels to the surface by rubber belt conveyor systems and material is transported by diesel rubber-tyred tractors and trailers and forklifts. All diesel equipment utilised underground complies with statutory flameproof requirements and is certified by suppliers when delivered to the mine. Personnel reach their working places by walking as the production panels are relatively close to the mine entry.

6.6.5 Coal Processing and Transport

ROM coal is supplied from underground to the surface by a rubber belt conveyor. Human stone-pickers remove contamination from the coal stream, thereafter the coal is crushed to −50 mm top size. The coal is dropped in a surface silo and loaded on trucks to be transported to a train loading station 15 km from the mine. The coal is loaded on trains and transported 600 km to the Qinhuangdao Port and distributed to local power stations from there. No coal is sold in the export market.

The train loading station and railway is owned by the government and Nanliang mine is allowed to transport 540,000 tpa of its product on this system. The balance is trucked to local customers in closer vicinity to the mine.

6.6.6 Infrastructure

Three shafts have been established at Nanliang mine to provide for ventilation, men and material access and coal conveyancing respectively. Personnel access the mine and return to the surface in the horizontal auxiliary shaft on foot, with material transported via the auxiliary shaft by rubber-tyred tractors and

trailers and forklifts. Coal is transported by conveyor from underground and draws ROM coal from a coal bin that has been established between the #2 seam and #3 seam. The capacity of the coal bin is 1,500 t.

Electricity is supplied to the mine via the national grid known as the North-West grid. Dual supply lines feed a government-owned substation at 35 kV, one from the north and one from the west. The substation is equipped with 2 x 5,000 kVA transformers which transform the feed to 10 kV. This substation is situated approximately 500 m from the mine site. Dual supply lines feed the mine surface substation at 10 kV to supply power to the surface and underground operations. A 630 kVA transformer feeds surface production equipment and two 400 kVA transformers feed other surface equipment at 380 V. A dual supply line feeds the underground operations at 10 kV which is converted to 660 V at underground substations for underground equipment supply. The total capacity of the underground supply is 2,000 kVA.

Two borehole systems situated 1.3 km and 2.2 km respectively from the site, supply Nanliang mine with water. One borehole system comprises two boreholes with capacities of 300 m^3/day and 180 m^3/day respectively. These two boreholes are 200 m from each other with a 100 m^3 reservoir situated at one borehole to store water pumped from the boreholes. The other borehole has a capacity of 150 m^3/day resulting in a total capacity of 630 m^3/day. A 100 m^3 reservoir is located at this borehole, with a 400 m^3 reservoir on the surface at the mine to store water before it is required for use. Water usage is reported as 300 m^3/day and water from underground is also pumped back to the surface and used for sewerage handling.

6.6.7 Capital and Operating Costs

Capital expenditure figures from 2003 up to 2008 are provided in Table 6-10. Capital investment decreased during 2005 compared to historical annual expenditure, but is expected to increase during 2006 if a decision is made to implement a longwall mining system at the mine.

Table 6-10: Capital Expenditure — Nanliang

Operating Company and Mine	Mining Method	Capital Expenditure (RMB Million) 2003	2004	2005	2006	2007	2008
Shanxi Nanliang Coal Co., Ltd.							
Nanliang	UG	24	29	9	200	12	10

Operating cost figures from 2003 to 2005 are indicated in Table 6-11. Nanliang mine has proven to be a very cost efficient underground operation with the current mining methods and equipment employed at the mine.

Table 6-11: Average Annual Mine Cash Costs — Nanliang

Operating Company and Mine	Mining Method	Cash Operating Cost (RMB/tonne) 2003	2004	2005
Shanxi Nanliang Coal Co., Ltd.				
Nanliang	UG	60.88	36.00	49.00

7 INDEPENDENT CHINA COAL CPPs

7.1 Coal Processing

In addition, China Coal owns and operates three CPPs in Shanxi province (See Section 1.7 of this report for ownership structure). The three plants, Shuozhong CPP, Zhongxin CPP and Dazhong CPP are forecast to produce 1.85 Mt, 1.01 Mt and 1.60 Mt respectively for 2006. All three plants are relatively new and have been constructed by an Australian company.

The plants are each equipped with a dedicated boiler plant to provide heat for the operating areas and prevent freezing of plant equipment and coal during the harsh winter season.

The coal qualities delivered at each plant are indicated in Table 7-1.

Table 7-1: Coal Quality Parameters — Independent China Coal CPPs

Coal Processing Plant		Ash (%)	CV (kcal/kg)	Sulphur (%)	TM (%)
Shuozhong	ROM	33.68	—	1.10	—
	Product — High Grade	20.00	5,200	1.09	10.93
	Middlings	24.33	4,924	1.04	9.81
Zhongxin	ROM	15.83	—	1.70	—
	Product — High Grade	8.50	7,100	0.88	13.53
Dazhong	ROM	16.21	—	0.70	—
	Product — High Grade	8.74	5,800	0.60	14.46

7.1.1 Shuozhong CPP

The historical production throughput for the plant is indicated in Table 7-2:

Table 7-2: Coal Processing Plant Production History, 2003 to 30 June 2006 — Shuozhong

		2003	2004	2005	30 June 2006
Washed Coal	Mt	—	0.73	2.18	1.42
Middlings	Mt	—	0.06	0.33	0.43
Raw Coal and Waste	Mt	—	0.30	0.61	0.57
Total	Mt	—	1.09	3.12	2.42

Materials Handling

The ROM feed is delivered by truck and pushed up with dozers on a stockpile. The ROM stockpile capacity is 650,000 t and the plant is equipped with an underground reclaimer delivering ROM feed by conveyor.

The product coal is stockpiled by aerial conveyor. Total storage capacity for high and low ash products is approximately 100,000 t. The products are reclaimed with an underground feeder and conveyor system and the train loader is operated at 2.5 hours for an 8,400 t train. The system is rated for 5,000 tph and utilises a 'quantity-constant', i.e. an Aliquot loading system, with the local rail line stretching 5 km to the main line.

A bin is used to store the rejects for removal by truck with no tailings disposal required as all the slimes are dried and returned to product.

Processing Plant

The plant is rated at and runs at 850 tph and has been designed to bypass the coal feed and only crush to product, however this bypass facility was not in use at the plant due to product requirements. The plant is relatively new and construction was completed in 2004 by an Australian company. Production in 2005 was 2.51 Mt of product and forecast at 1.85 Mt in 2006.

The plant has been constructed as a single module with the 50 mm x 1.5 mm processed in a two-stage DMC plant. The DMC plant uses a 1.5 m cyclone at 1.5 to 1.6 SG to produce a low ash product and the underflow reports to the secondary cyclone. The secondary cyclone is a 1.15 m model running at 1.85 to 1.95 SG to produce a high ash product. The primary cyclone utilised in this plant is the largest in operation.

The 1.5 mm x 0.1 mm fraction is processed in spirals and the product reports to the low ash product. The 0.1 mm x 0 mm product is thickened and then dried on Plate and Frame filters and reports to either product as required. Quality control is achieved by on-line ash analysers which are calibrated by cross-belt samplers.

Total cost of operations for the Shuozhong plant in 2005 was RMB11.00 per ROM tonne with total workforce numbers of 126.

7.1.2 Zhongxin CPP

The feed coal for this CPP is purchased from various mines resulting in the feed ash fluctuating significantly. Negotiations were in progress in 2005 to purchase a mine to feed the plant on a dedicated basis which will stabilise the feed ash and optimise operations significantly.

This plant was constructed in 2002, followed by a substantial upgrade in 2005 by an Australian company. Table 7-3 indicates the production numbers for the plant since 2003.

Table 7-3: Coal Processing Plant Production History, 2003 to 30 June 2006 — Zhongxin

		2003	2004	2005	30 June 2006
Washed Coal	Mt	1.52	1.55	2.71	1.01
Middlings	Mt	0	0	0	0
Raw Coal and Waste	Mt	0.11	0.16	0.35	0.10
Total	Mt	1.63	1.71	3.06	1.11

Materials Handling

Materials handling conveyors are rated at 1,000 tph capacity to feed a 700 tph plant. The feed entering the plant is delivered by truck and stockpiled by dozer. The ROM capacity of the stockpile is 600,000 t. Feed to the plant is achieved by dozer push to underground feeders, however an older generation reclaimer with restricted rate is also available on site.

Product handling is by aerial conveyor and underground reclaiming feeders to the train loading bin with 6,000 t capacity. The train loader is rated at 3,000 tph and the reject bin is serviced by trucks. No slimes disposal is required, as these are dried and returned to product.

Process Plant

The plant is a single module, 700 tph capacity plant with a single 1.35 m DMC and spirals, with slimes dried in a Plate and Frame press and returned to product. The DMC is utilised to process the 50 mm x 1.5 mm fraction and spirals for the 1.5 mm x 0.1 mm fraction. Thickeners and a Plate and Frame press process the slimes. The product is composed of the qualities shown in Table 7-4.

Table 7-4: Plant Mass Balance — Zhongxin

	Mass (%)	Ash (%)
Feed	100	15
DMC Product	68	7
Spirals product	13	15
Slimes	4	19
Total	85	8-10
Rejects	15	60-65

Sulphur values for the current supply to the plant are typically 1.7% in the feed and 0.88% in the product. Quality control is achieved by on-line ash analysers which are calibrated by cross-belt samplers.

Total cost of operations for the plant in 2005 was RMB11.00 per ROM t with total workforce numbers to operate, maintain and manage the plant being 324.

7.1.3 Dazhong CPP

The production levels for the plant during the last three years are listed in Table 7-5.

Table 7-5: Coal Processing Plant Production History, 2003 to 30 June 2006 — Dazhong

		2003	2004	2005	30 June 2006
Washed Coal	Mt	3.41	3.41	3.31	1.60
Middlings	Mt	0	0	0	0
Raw Coal and Waste	Mt	0.28	0.37	0.32	0.22
Total	Mt	3.69	3.78	3.63	1.82

Materials Handling

The Dazhong plant is fed directly from a drift conveyor belt from an adjacent mine. The drift belt feeds a skyline or aerial conveyor on to a stockpile and the coal is reclaimed to the plant by dozers to underground feeders. Product is fed directly to three 12,000 t bunkers with no provision required for stockpile product on the ground, as the rail service has proven effective and sufficient in the past to prevent delays.

The train loader is rated for 5,000 tph and utilises a 'quantity-constant', i.e. an Aliquot loading system. Reject is removed from site by trucks from a bin.

Process Plant

This plant also incorporates a single module 700 tph, single 1.3 m DMC and spirals, with slimes dried in a Plate and Frame press and returned to product. Similar to the Zhongxin plant, the DMC is utilised to process the 50 mm x 1.5 mm fraction, spirals for the 1.5 mm x 0.1 mm product and thickeners and a Plate and Frame press for the slimes. The plant has been designed and constructed with a spirals bypass and a 13 mm x 0 mm ROM bypass if required, but this has not often been in use due to product requirements.

The scheduled operating time for the plant is set at 20 hours/day with four hours scheduled for maintenance on seven days of the week. Quality control is achieved by on-line ash analysers which are calibrated by cross-belt samplers.

Total cost of operations for the Dazhong plant in 2005 was RMB11.70 per ROM t.

Personnel employed at the plant total 134.

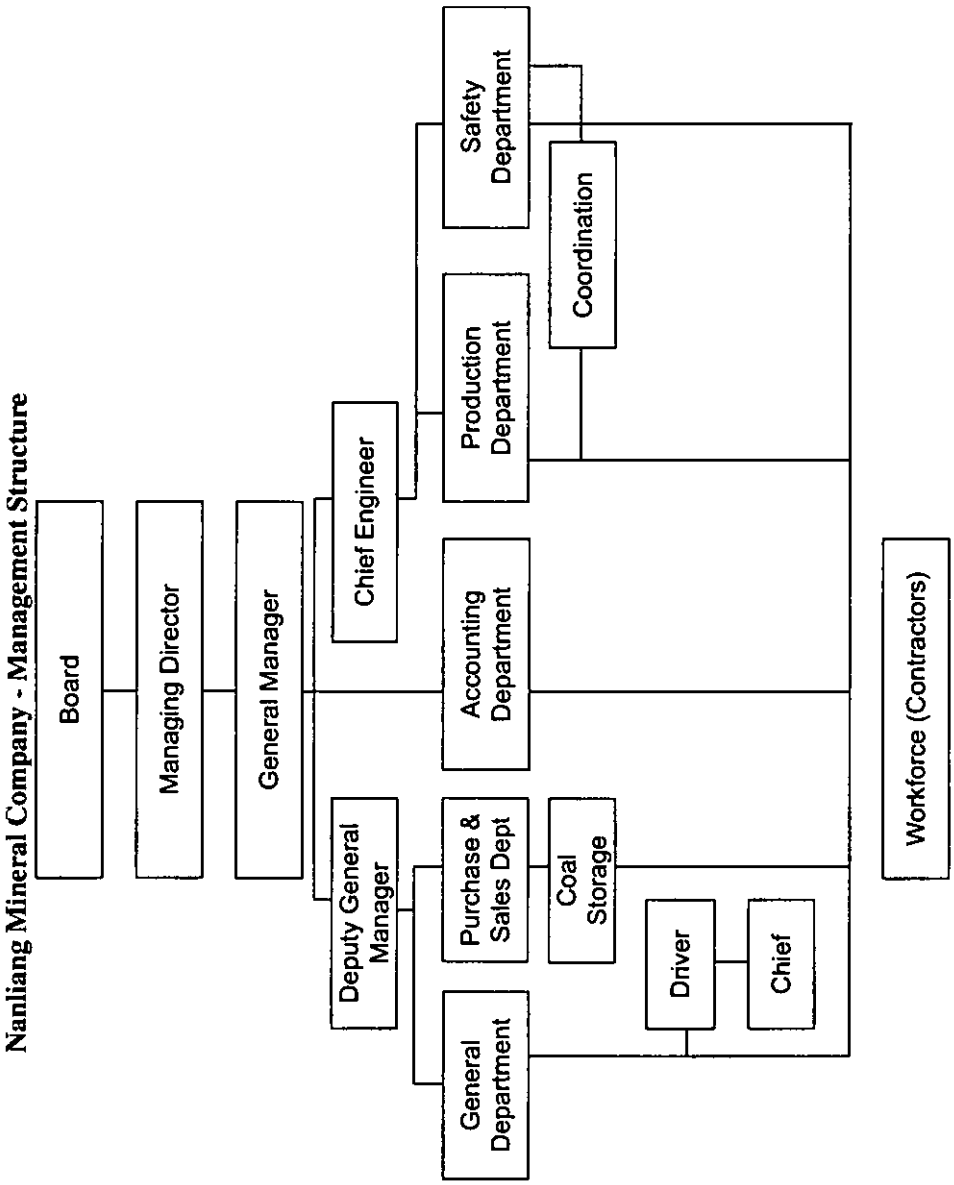
Pingshuo Coal Company – Management Structure



a. After this report was written China Coal informed SRK of a restructure in Pingshuo Coal Company, China Coal reported: "All coal mines, mining rights permits, and other coal business related assets were transferred to China Coal Energy Company Limited during the restructuring of China Coal Group, effective from August 22, 2006." China Coal also reported: "...except the mining assets, all the other assets in the "Pingshuo Coal Company" remained in the China Coal Group, not China Coal, so many of the subsidiaries are no longer in the listed company."

The structure illustrated above does not necessarily reflect these comments.

Appendix 4 — Glossary of Terms

Glossary of Terms

%	Percent
°	Degrees
°C	Degrees Celsius
3D	Three dimensional
AFC	Armoured Face Conveyor
ANFO	Ammonium Nitrate/Fuel Oil
AusIMM	Australasian Institute of Mining and Metallurgy
Bord and Pillar	Method of underground mine extraction characterised by coal removal around non-mined pillars. Also known as room and pillar
Bt	Billion tonnes
China Coal	China Coal Energy Company Limited
cm	Centimetre
Coal Reserve	A Coal Reserve is the economically mineable part of a Measured or Indicated coal resource. It includes diluting materials and allowances for losses which may occur when the material is mined. Appropriate assessments, which may include feasibility studies, have been carried out, and include consideration of the modification by realistically assumed mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors. These assessments demonstrate at the time of reporting that extraction could reasonably be justified. Coal reserves are subdivided in order of increasing confidence into Probable coal reserves and Proved coal reserves
Coal Seam	Portion of the strata that contains solid fossil fuel
Competent Person	A geologist or engineer with at least five years of experience in mineral exploration, mine development or operation or mineral project assessment, or any combination thereof, has experience relevant to the subject matter of the mineral project and the technical report and is a member in good standing of a professional association.
Competent	Strata or rock structure combining sufficient firmness and flexibility to transmit pressure
CPP	Coal Preparation Plant — facility used to selectively remove an undesirable portion (waste) from the ROM/raw coal using chemical or mechanical methods. Also known as a Wash Plant
CSN	Crucible Swelling Number
CV	Calorific Value
Datun Coal	Shanghai Datun Energy Resources Co., Ltd.
Dip	Angle which strata makes with the horizontal

DMC	Dense Medium Cyclone, used to separate material of differing densities
E	East
Feasibility Study	A Feasibility Study assesses in detail the technical soundness and Economic Viability of an undeveloped mining project, and serves as the basis for the investment decision and as a bankable document for project financing. The study constitutes an audit of all geological, engineering, environmental, legal and economic information accumulated on the project. Generally, a separate environmental impact study is required
FELs	Front-End Loaders
Goaf or gob	Spoil material allowed to subside behind the advancement of a longwall
HKSE	Stock Exchange of Hong Kong Limited
Huajin Coal	Huajin Coking Coal Co., Ltd.
Indicated Coal Resource	An Indicated Coal Resource is that part of a coal resource for which tonnage, densities, shape, physical characteristics, grade and mineral content can be estimated with a reasonable level of confidence. It is based on exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes. The locations are too widely or inappropriately spaced to confirm geological and/or grade continuity but are spaced closely enough for continuity to be assumed
Inferred Coal Resource	An Inferred Coal Resource is that part of a coal resource for which tonnage, grade and mineral content can be estimated with a low level of confidence. It is inferred from geological evidence and assumed but not verified geological and/or grade continuity. It is based on information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings, and drill holes which may be limited or of uncertain quality and reliability
IPO	Initial Public Offering
ISO	International Standards Organisation
Jig	Gravity concentration process by the application of vertical pulses of water
JORC Code	Australian Code for Reporting of Mineral Resources and Ore Reserves
JORC	Joint Ore Reserves Committee of The Australasian Institute of Mining and Metallurgy, Australian Institute of Geoscientists and Minerals Council of Australia
kcal/kg	Kilocalories per kilogram, equivalent to 1,000 calories per kilogram

kg	Kilograms
km	Kilometres, equivalent to 1,000 metres
km^2	Square kilometres
kV	Kilovolt, equivalent to 1,000 volts
kVA	Kilovolt-ampere, equivalent to 1,000 volt-ampere
kWh	Kilowatt-hour, equivalent to 1,000 watt-hour
Larcodem	Large coal dense medium separators similar to dense medium cyclones (DMC) but cylindrical in shape as opposed to cone shaped. Can be fed with larger lump sizes than DMC's and have a large capacity relative to their size. Utilised in China and South Africa
LW	Longwall — underground mining technique
m	Metre/s
M	Million
m^2	Square metre (also sq. m)
m^3	Cubic metres
m^3/day	Cubic metres per day
m^3/hr	Cubic metres per hour
m^3/sec	Cubic metres per second
m^3/tonne	Cubic metres per tonne
mg/m^3	Milligrams per cubic metre
Marketable Reserves	Saleable coal from Recoverable Reserves after accounting for preparation plant yield where applicable
Measured Coal Resource	A Measured Coal Resource is that part of a coal resource for which tonnage, densities, shape, physical characteristics, grade and mineral content can be estimated with a high level of confidence. It is based on detailed and reliable exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes
Methane	A colorless, odorless, explosive gas (CH_4) typically associated with coal seams
Ml	Megalitres, equivalent to 1,000,000 litres
mm	Millimetre
MOLAR	Ministry of Land and Resources
Mt	Million tonnes
Mtpa	Million tonnes per annum
MVA	Megavolt-ampere, equivalent to 1,000,000 volt-ampere
MW	Megawatt, equivalent to 1,000,000 watt

N	North
Nanliang Coal	Shanxi Nanliang Coal Co., Ltd.
Normal Fault	A fault in which the hanging wall appears to have moved downward relative to the footwall
NQ	NQ-size (47.6 mm diameter) core
OP	Open Pit, a method of mining similar to open-cut, also known as surface mining
Overburden	Waste material overlying a coal seam
Panel	A block of coal designated for extraction utilizing longwall mining
Parting	Rock material within or between mineable coal seams, sometimes extracted with the coal
PCI	Pulverised Coal Injection
pH	A measure of the acidity or alkalinity of a solution, numerically equal to 7 for neutral solutions, increasing with increasing alkalinity and decreasing with increasing acidity. The pH scale commonly in use ranges from 0 to 14
Pillar	Column of coal left behind for support in a mine
PPE	Personal Protective Equipment
ppm	Parts per million
PQ	PQ-size (85 mm diameter) core
PRC	People's Republic of China
Probable Coal Reserve	A Probable Coal Reserve is the economically mineable part of an Indicated, and in some circumstances Measured, Coal Resource. It includes diluting materials and allowances for losses which may occur when the material is mined. Appropriate assessments, which may include feasibility studies, have been carried out, and include consideration of and modification by realistically assumed mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors. These assessments demonstrate at the time of reporting that extraction could reasonably be justified
Productivity	Measurements of workers'/equipment efficiency usually expressed in terms of tonnes per unit of time
Proved Coal Reserve	A Proved Coal Reserve is the economically mineable part of a Measured Coal Resource. It includes diluting materials and allowances for losses which may occur when the material is mined. Appropriate assessments, which may include feasibility studies, have been carried out, and include consideration of and modification by realistically assumed mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors. These assessments demonstrate at the time of reporting that extraction could reasonably be justified

Raw Coal	Coal on an as-mined basis. May be sold directly or cleaned if necessary
Recoverable Coal	The portion of a coal reserve available for mining exclusive of coal losses due to mining
Recoverable Reserves	Proved and probable reserves prior to adjustment for preparation plant yield
RMB	Renminbi, currency of China, also known as Yuan
ROM	Run-of-Mine — the as-mined material as it leaves the mine prior to any processing
S	South
SG	Specific Gravity
Shearer	Equipment utilized to extract coal from a face in a longwall mine
SRK	SRK Consulting China Limited
Strip ratio	Ratio of overburden to be moved for every corresponding quantity of ROM coal mined, usually expressed as m^3/t
Syncline	A fold in which the core contains the stratigraphically younger rocks; it is generally concave upward
t	Metric ton equal to 1,000 kilogrammes
t/m^3	Tonnes per cubic metre
TM	Total moisture
tpa	Tonnes per annum
tph	Tonnes per hour
UG	Underground
V	Volts
Valmin Code	Code for Technical Assessment and Valuation of Mineral and Petroleum Assets and Securities for Independent Expert Reports
W	West
WWTP	Waste Water Treatment Plants
Yield	Saleable portion of coal cleaned in a preparation plant relative to the total tonnes cleaned

Taxation of Dividends

Individual Investors. According to the Individual Income Tax Law of the PRC of 1980 as amended on 31 October, 1993, 30 August, 1999 and 19 December, 2005, dividends paid by PRC companies are subject to a PRC withholding tax levied at a flat rate of 20%. For a foreign individual who is not resident of the PRC, the receipt of dividends from a company in the PRC is subject to a withholding tax of 20% unless reduced by an applicable tax treaty or specifically exempted by the tax authority of the State Council. However, the PRC State Administration of Taxation ("SAT") issued, on 21 July, 1993, a Notice of the PRC State Administration of Taxation Concerning the Taxation of Gains on Transfer and Dividends from Shares (Equities) Received by Foreign Investment Enterprises, Foreign Enterprises and Foreign Individuals ("Tax Notice") which states that dividends paid by a PRC company to individuals with respect to shares listed on an overseas stock exchange ("Overseas Shares"), such as H Shares, are temporarily not subject to PRC withholding tax.

The Standing Committee of the National People's Congress' Decision on the Amendments to the Individual Income Tax Law of the PRC (the "Amendments") were promulgated on 19 December, 2005 and took effect on 1 January, 2006. The Amendments state that all provisions of any contradictory prior regulations concerning individual income tax which are contradictory to the Amendments shall become invalid upon the entering into effect of the same. Pursuant to the requirements of the Amendments and the amended Individual Income Tax Law and the Implementation Rules of the Individual Income Tax Law, foreign individuals are subject to a withholding tax on dividends paid by a PRC company at a rate of 20%, unless specifically exempted by the tax authority of the State Council or reduced by an applicable tax treaty. However, in a letter dated 26 July 1994 to the State Commission for Restructuring the Economic Systems of the PRC, the Securities Commission and CSRC, the SAT reiterated that the temporary tax exemption as specified in the Tax Notice for dividends received from a PRC company listed overseas should remain effective. In the event that this temporary tax exemption is revoked, a 20% tax may be withheld on dividends in accordance with the Individual Income Tax Law (as amended) and its Implementation Rules. Such withholding tax may be reduced pursuant to an applicable double taxation treaty. To date, the relevant tax authority has not been collecting any withholding tax on dividend payments on Overseas Shares.

Non-individual Investors. According to the Income Tax Law of the PRC Concerning Foreign Investment Enterprises and Foreign Enterprises, dividends paid by PRC companies other than foreign investment enterprises to foreign enterprises (including foreign companies and other economic entities) are ordinarily subject to a PRC withholding tax levied at a flat rate of 20%. However, according to the Tax Notice, a foreign enterprise (including foreign companies and other economic entities) receiving dividends paid with respect to a PRC company's Overseas Shares will temporarily not be subject to the 20% withholding tax. If such withholding tax becomes applicable in the future, the rate could be reduced pursuant to an applicable double taxation treaty.

Tax Treaties. Investors who are not PRC residents and reside in countries which have entered into double-taxation treaties with the PRC, may be entitled to a reduction of the withholding tax imposed on the dividends paid to such investors by a PRC company. The PRC currently has double-taxation treaties with a number of other countries, which include Australia, Canada, France, Germany, Japan, Malaysia, the Netherlands, Singapore, the United Kingdom and the United States. Under each of such double taxation treaties, the rate of withholding tax imposed by PRC's taxation authorities is generally reduced.

Taxation of Capital Gains

Individual Investors. According to the Individual Income Tax Law of the PRC (as amended), and the Implementation Rules of the Individual Income Tax Law of the PRC, gains realized on the sale of equity interests would be subject to income tax at a rate of 20%. The Ministry of Finance has been empowered by the Implementation Rules of the Individual Income Tax Law of the PRC to formulate the detailed implementing measures for levying the individual income tax on the gains realized on the sale of shares in PRC companies. However, to date, no such implementing measures have been promulgated by the Ministry of Finance, and no individual income tax on gains realized on sales of shares has been levied.

Pursuant to the notice jointly issued by the Ministry of Finance and the SAT dated March 30, 1998, in respect of suspending the enforcement of the collection of the individual Income tax on gains realized in connection with sales of shares, gains on sales of shares by individuals are temporarily exempted from individual income tax. In addition, the Tax Notice provides that gains realized by foreign individuals on the sale of overseas shares, such as H Shares, are temporarily not subject to PRC income tax. In the event that such temporary exemption ceases to be effective, individual holders of H Shares may be subject to income tax at a rate of 20% on capital gains, unless such tax is reduced or eliminated by an applicable double taxation treaty.

Non-individual Investors. The Tax Notice provides that gains realized by foreign enterprises, not including their entities or establishment in the PRC, that are holders of H Shares would, temporarily, not be subject to PRC income taxes.

Stamp Duty

PRC stamp duty imposed on the transfer of shares of PRC publicly traded companies should not apply to the acquisition and disposal by non-PRC investors of H shares outside of the PRC by virtue of the Provisional Regulations of China Concerning Stamp Duty, which became effective on 1 October 1988 and which provide that PRC stamp duty is imposed only on documents, executed or received within the PRC that are legally binding in the PRC and are protected under PRC law.

Estate Duty

The PRC does not currently have estate duty law.

Corporate Income Tax

On the Company. The PRC Provisional Regulations on Enterprise Income Tax stipulate that enterprises (including joint stock limited companies) incorporated in the PRC (except for foreign investment enterprises) will pay enterprise income tax at a rate of 33% on income earned from production and operations, and on other income, with tax concessions available where laws and regulations have provided for tax exemption or reduction.

Value-add Tax

The PRC Provisional Regulations on Value-added Tax ("the VAT Regulations") were promulgated on 13 December 1993 and became effective on 1 January 1994. The VAT Regulations apply to domestic and foreign investment enterprises that sell goods, provide processing or repair and replacement services or import goods in the PRC. Except for certain specified categories of goods sold or imported the value-added tax rate for the sale or import of which is 13%, the tax rate for sales or import of goods and provision of processing and repair and replacement services is 17%. The amount of tax payable on the sale of goods or the provision of

taxable services is the balance of the amount of tax on sales for the current period after deducting or setting off the amount of tax on purchases for the current period.

Business Tax

Pursuant to the PRC Provisional Regulations on Business Tax, which became effective on 1 January, 1994, the enterprises (including foreign investment enterprises) and individuals that provide various labor services and that assign intangible assets or sell immovable property in the PRC shall be subject to the business tax either at the rate of three percent or at five percent of the amount of taxable services or other transactions, except for entertainment business the turnover of which is subject to the business tax at a rate of 5%-20%.

FOREIGN EXCHANGE

The lawful currency of the PRC is the Renminbi, which is subject to foreign exchange controls and is not freely convertible into foreign exchange. SAFE, under the authority of the PBOC, is empowered with the functions of administering all matters relating to foreign exchange, including the enforcement of foreign exchange control regulations.

Prior to 31 December 1993, a quota system was used for the management of foreign currency. Any enterprise requiring foreign currency was required to obtain a quota from the local SAFE office before it could convert Renminbi into foreign currency through the PBOC or other designated banks. Such conversion had to be effected at the official rate prescribed by the SAFE on a daily basis. Renminbi could also be converted into foreign currency at swap centers. The exchange rates used by swap centers were largely determined by the demand for, and supply of, foreign currencies and the Renminbi requirements of enterprises in the PRC. Any enterprise that wished to buy or sell foreign currency at a swap center first had to obtain the approval from the SAFE.

On 28 December 1993, the PBOC, under the authority of the State Council, promulgated the Notice of the People's Bank of China Concerning Further Reform of the Foreign Currency Control System (the "Notice"), effective from 1 January 1994. The Notice announces the abolition of the system of foreign exchange quotas, the implementation of conditional convertibility of Renminbi in current account items, the establishment of the system of settlement and payment of foreign exchange by banks, and the unification of the official Renminbi exchange rate and the market rate for Renminbi established at swap centers. On 26 March 1994, the PBOC promulgated the "Provisional Regulations for the Administration of Settlement, Sale and Payment of Foreign Exchange" (the "Provisional Regulations"). The Provisional Regulations set out detailed provisions regulating the sale and purchase of foreign exchange by enterprises, economic organizations and social organizations in the PRC.

On 1 January 1994, the former dual exchange rate system for Renminbi was abolished and replaced by a controlled floating exchange rate system, which is determined by demand and supply. The PBOC sets and publishes daily the Renminbi-US dollar base exchange rate. This exchange rate is determined with reference to the transaction price for Renminbi-US dollar in the inter-bank foreign exchange market on the previous day. The PBOC will also, with reference to exchange rates in the international foreign exchange market, announce the exchange rates of Renminbi against other major currencies. In foreign exchange transactions, designated foreign exchange banks may, within a specified range, freely determine the applicable exchange rate in accordance with the exchange rate announced by the PBOC.

On 29 January 1996, the State Council promulgated new Regulations of the People's Republic of China for the Control of Foreign Exchange ("Control of Foreign Exchange Regulations") which became effective from 1 April 1996. The Control of Foreign Exchange Regulations classify all international payments

and transfers into current account items and capital account items. Most of the current account items are no longer subject to SAFE approval while capital account items still are. The Control of Foreign Exchange Regulations were subsequently amended on 14 January 1997. This latest amendment affirmatively states that the State shall not restrict international current account payments and transfers.

On 20 June 1996, the PBOC promulgated the "Regulations for Administration of Settlement, Sale and Payment of Foreign Exchange" (the "Settlement Regulations") which became effective on 1 July 1996. The Settlement Regulations supersede the Provisional Regulations and abolish the remaining restrictions on convertibility of foreign exchange in respect of current account items while retaining the existing restrictions on foreign exchange transactions in respect of capital account items. On the basis of the Settlement Regulations, the PBOC also published the Announcement on the Implementation of Foreign Exchange Settlement and Sale at Banks by Foreign-invested Enterprises (the "Announcement"). The Announcement permits foreign-invested enterprises to open, on the basis of their needs, foreign exchange settlement accounts for current account receipts and payments of foreign exchange along with specialized accounts for capital account receipts and payments at designated foreign exchange banks.

On 25 October 1998, the PBOC and the SAFE promulgated the Notice Concerning the Discontinuance of Foreign Exchange Swapping Business with effect from 1 December 1998. According to the Notice, all foreign exchange swapping business in the PRC targeted on the foreign-invested enterprises shall be discontinued, while the trading of foreign exchanges by foreign-invested enterprises shall be carried out under the banking system for the settlement and sale of foreign exchange.

Save for the foreign-invested enterprises or other enterprises which are specially exempted by relevant regulations, all entities in China (except for some foreign trading companies and production enterprises having import and export rights, which are entitled to retain part of foreign exchange income generated from their current account transactions and to make payments using such retained foreign exchanges in their current account transactions or approved capital account transactions) must sell their foreign exchange income to designated foreign exchange banks. Foreign exchange income from loans issued by organizations outside the territory or from the issuance of bonds and shares (for example foreign exchange income received by our Company from the sale of shares overseas) is not required to be sold to designated foreign exchange banks, but may be deposited in foreign exchange accounts at the designated foreign exchange banks.

PRC enterprises (including foreign-invested enterprises) which require foreign exchange for transactions relating to current account items, may, without the approval of SAFE, effect payment from their foreign exchange account or at the designated foreign exchange banks, on the strength of valid receipts and proof. Foreign-invested enterprises which need foreign exchange for the distribution of profits to their shareholders, and PRC enterprises which in accordance with regulations are required to pay dividends to shareholders in foreign exchange (like our Company), may on the strength of board resolutions on the distribution of profits, effect payment from their foreign exchange account or convert and pay at the designated foreign exchange banks.

Convertibility of foreign exchange in respect of capital account items, like direct investment and capital contribution, is still subject to restriction, and prior approval from SAFE and/or the relevant branch must be sought.

Dividends to holders of H Shares are declared in Renminbi but must be paid in Hong Kong dollars.

This appendix sets out summaries of certain aspects of PRC law and regulations, which are relevant to the Company's operations and business. Laws and regulations relating to taxation in the PRC are discussed separately in Appendix VII to this prospectus. This appendix also contains a summary of certain Hong Kong legal and regulatory provisions, including summaries of certain of the material differences between PRC and Hong Kong company law, certain requirements of the Hong Kong Listing Rules and additional provisions required by the Hong Kong Stock Exchange for inclusion in the articles of association of the PRC issuers.

1. PRC LAWS AND REGULATIONS

A. The PRC Legal System

The PRC legal system is based on the PRC constitution and is made up of written laws, administrative regulations, local regulations, autonomy regulations, separate regulations, rules and regulations of State Council departments, rules and regulations of local governments and international treaties of which the PRC Government is a signatory. Decided court cases do not constitute binding precedents, although they are used for the purposes of judicial reference and guidance.

The National people's congresses of the PRC (the "NPC") and the Standing Committee of the NPC are empowered to exercise the legislative power of the State. The NPC has the power to formulate and amend basic laws governing State organs, civil and criminal matters and other matters. The Standing Committee of the NPC is empowered to formulate and amend laws other than those required to be enacted by the NPC and to supplement and amend any parts of laws enacted by the NPC during the adjournment of the NPC, provided such supplements and amendments are not in conflict with the basic principles of such laws. The Standing Committee of the NPC is empowered to interpret, enact and amend other laws not required to be enacted by the NPC.

The State Council is the highest organ of State administration and has the power to formulate administrative regulations based on the constitution and laws.

The people's congresses of provinces, autonomous regions and municipalities and their respective standing committees may formulate local regulations based on the specific circumstances and actual requirements of their own respective administrative areas, subject to the constitution, laws and administrative regulations. The people's congresses of larger cities and their respective standing committees may formulate local regulations based on the specific circumstances and actual requirements of such cities and enact the same after submitting to the standing committee of the people's congresses of provinces or autonomous regions for approval. The standing committee of the people's congresses of provinces or autonomous regions shall examine the legality of local regulations submitted for approval, and such approval should be granted within four months if they are not in conflict with the constitution, laws, administrative regulations and local regulations of the province or autonomous region concerned. Where conflicts with the rules and regulations of the People's Government of the province or autonomous region concerned are identified in the examination of local regulations of larger cities by the standing committee of the people's congresses of provinces or autonomous regions, a decision should be made to resolve the issue. "Larger cities" refer to cities where the people's governments of provinces or autonomous regions are located, cities where special economic zones are located and larger cities as approved by the State Council.

People's congresses of national autonomous areas have the power to enact autonomy regulations and separate regulations in the light of the political, economic and cultural characteristics of the nationality or nationalities in the areas concerned. The autonomy regulations and separate regulations of autonomous regions shall be submitted to the standing committees of the national people's congresses of provinces, autonomous regions or municipalities for approval before taking effect. Adaptations of provisions of laws and administrative

regulations may be introduced to the autonomy regulations and separate regulations of autonomous prefectures and counties so long as they do not contravene the basic principles of the laws or administrative regulations, provided that no adaptations shall be made to specific provisions on national autonomous areas contained in the constitution, autonomy law of national areas and other relevant laws and administrative regulations.

The ministries, commissions, People's Bank of China, National Audit Office and institutions with administrative functions directly under the State Council may formulate rules and regulations within the jurisdiction of their respective departments based on the laws and the administrative regulations, decisions and rulings of the State Council. Provisions of departmental rules and regulations should relate to the enforcement of the laws and administrative regulations, decisions and rulings of the State Council. The people's governments of provinces, autonomous regions, municipalities and larger cities may formulate rules and regulations based the laws, administrative regulations and local regulations of such provinces and autonomous regions and municipalities.

According to the Constitution of the People's Republic of China, the power to interpret laws is vested in the Standing Committee of the NPC. According to the Decision of the Standing Committee of the NPC Regarding the Strengthening of Interpretation of Laws passed on 10th June, 1981, the Supreme People's Court has the power to give general interpretation on application of laws in judicial proceedings in addition to its power to issue specific interpretation for specific cases. The State Council and its ministries and commissions are also vested with the power to give interpretation of the statutes and administrative regulations which they have promulgated. At the regional level, the power to give interpretations of the regional laws is vested in the regional legislative and administrative organs which promulgate such laws.

B. The PRC Judicial System

Under the PRC Constitution and the Law of Organisation of the People's Courts of the PRC, the PRC judicial system is made up of the Supreme People's Court, the local people's courts, military courts and other special people's courts. The local people's courts are divided into three levels, namely, the basic people's courts, the intermediate people's courts and the higher people's courts. The basic people's courts are further divided into civil, criminal, economic and administrative divisions. The intermediate people's courts have divisions similar to those of the basic people's courts and other special divisions (such as the intellectual property division). These two level of people's courts are subject to supervision of people's courts at higher levels. The people's procuratorates also have the right to exercise legal supervision over the civil proceedings of people's courts of the same level and lower levels. The Supreme People's Court is the highest judicial organ of the PRC. It supervises the administration of justice by the people's courts at all levels.

The judgement or ruling of the second instance at a people's court is final. A party to the case concerned may appeal against the judgement or ruling of the first instance of a people's court. The people's procuratorate may appeal to the people's court at the next higher level in accordance with procedures stipulated by the laws. In the absence of any appeal by any parties to the case and any appeal by the people's procuratorate within the stipulated period, the judgement or ruling of the people's court shall be the final judgement or rulings. Judgements or rulings of the second instance of the intermediate people's courts, the higher people's courts and the Supreme People's Court are final. Judgements or rulings of the first instance of the Supreme People's Court are also final. If, however, the Supreme People's Court or a people's court at a higher level finds an error in a final and binding judgement which has taken effect in any people's court at a lower level, or the presiding judge of a people's court finds an error in a final and binding judgement which has taken effect in the court over which he presides, a retrial of the case may be conducted according to the judicial supervision procedures.

the Civil Procedure Law of the PRC (the "Civil Procedure Law") adopted on 9th April, 1991 prescribes the provisions for instituting a civil action, the jurisdiction of the people's courts, the procedures to be followed for conducting a civil action, the judicial procedures, and the procedures for enforcement of a civil judgement or ruling. All parties to a civil action conducted within the PRC must comply with the Civil Procedure Law. A civil case is generally heard by a court located in the defendant's place of domicile. The jurisdiction may also be selected by express agreement amongst the parties to a contract provided that the people's court having the jurisdiction is located at the plaintiff's or the defendant's place of domicile, the place of performing the contract or the place of executing the contract or the object of the action.

A foreign national or foreign enterprise is generally given the same litigation rights and obligations as a citizen or legal person of the PRC. Should a court of a foreign country limit the litigation rights of PRC citizens and enterprises, the PRC courts mall apply the same limitations to the citizens and enterprises of that foreign country. If any party to a civil action refuses to comply with a judgement or ruling made by a people's court or an award made by an arbitration tribunal in the PRC, the other party may apply to the people's court for the enforcement of the same within a stipulated period. Specific time limits are imposed on the right to apply for such enforcement. If at least one of the parties to the dispute or arbitration is an individual, the time limit is one year. If both parties to the dispute or arbitration are legal persons or other entities, the time limit is six months. If a party fails to satisfy a judgement which the court has granted approval to enforce within the stipulated time, the court will, upon application of the other party, mandatorily enforce the judgement.

A party seeking to enforce a judgement or ruling of a people's court against a party who is not personally or whose property is not within the PRC may apply to a foreign court with jurisdiction over the case for recognition and enforcement of such judgement or ruling. Similarly, if the PRC has entered into a treaty relating to judicial enforcement with the relevant foreign country or a relevant international treaty, a foreign judgement or ruling may also be recognised and enforced according to PRC enforcement procedures by a PRC court based on the equity principle unless the people's court considers that the recognition or enforcement of a judgement or ruling will violate the basic legal principles of the PRC or its sovereignty or national security, or social and public interest.

C. The Company Law

The Company Law was adopted by the Standing Committee of the Eighth NPC at its Fifth Meeting on 29th December, 1993 and came into effect on 1st July, 1994. It was amended on 25th December, 1999 and on 28th August, 2004 and revised on 27th October, 2005. The revised Company Law came into effect on 1st January, 2006.

The Special Regulations of the State Council on the Overseas Offering and Listing of Shares by Joint Stock Limited Companies ("Special Regulations") were passed at the 22nd Standing Committee Meeting of the State Council on 4th July, 1994 and promulgated and implemented on 4th August, 1994. The Special Regulations are formulated in respect of the overseas share subscription and listing of joint stock limited companies. The Mandatory Provisions for the Articles of Association of Companies Listed Overseas ("Mandatory Provisions") promulgated by Securities Commission and the State Restructuring Commission on 27th August, 1994 prescribe provisions which must be incorporated in the articles of association of joint stock limited companies to be listed on overseas stock exchanges. Accordingly, the Mandatory Provisions have been incorporated in the Articles of Association. References to a "company" made in this Appendix are to a joint stock limited company established under the Company Law with H shares.

Set out below is a summary of the major provisions of the Company Law, the Special Regulations and the Mandatory Provisions.

General

A "joint stock limited company" is a corporate legal person incorporated under PRC Company Law with independent legal person properties and entitlements to such legal person properties. The liability of the company is limited to the full amount of its assets and the liability of its shareholders is limited to the extent of the shares held by them.

Incorporation

A company may be incorporated by promotion or public subscription. A company may be incorporated by a minimum of 2 but not more than 200 promoters. but at least half of the promoters must reside within the PRC.

Companies incorporated by promotion are companies the entire registered capital of which is subscribed for by the promoters. The initial capital contribution by all promoters of the Company shall not be less than 20% of the registered capital. The remainder shall be paid up within two years from the date of incorporation of the company by the promoters. For investment companies, the remainder may be paid up within five years. Share in the company shall not be offered to other persons unless the registered capital has been paid up. For companies incorporated by public subscription, the registered capital of a company is the amount of its total paid up capital as registered with the relevant registration authorities. The minimum registered capital of a joint stock limited company is RMB5 million or as required by the laws or administrative regulations, whichever is higher.

For companies incorporated by way of promotion, the promoters shall subscribe in full in writing for shares required to be subscribed by them by the articles of association. The full amount of capital contribution shall be paid up if payments are made in one lump sum and the first installment shall be paid forthwith if payments are made in installments. Procedures relating to the transfer of titles for nonmonetary assets shall be duly completed if such assets are to be contributed as capital. Promoters who fail to pay up their capital contributions in accordance with the foregoing provision shall assume liabilities for breach of contract in accordance with the covenants laid down in the promoters' agreement. After the promoters have completed the initial capital contribution, a board of directors and a supervisory committee shall be elected and the board of directors shall apply for registration of incorporation by filing the articles of association with the company registration authorities, together with capital verification certificate issued by a capital verification institution established by law and other documents required by the law or administrative regulations.

Where companies are incorporated by public subscription, not less than 35% of their total shares must be subscribed for by the promoters, unless otherwise provided for by the law or administrative regulations. A promoter who offer shares to the public must publish a share offer Prospectus and draft a share subscription form to be signed and sealed by subscribers, specifying the number and amount of shares to be subscribed for and their addresses. The subscribers shall pay up the amounts for the number of shares they have subscribed for. Where a promoter is offering shares to the public, such offer shall be underwritten by securities houses established by law, in relation to which underwriting agreements shall be signed. A promoter offering shares to the public shall also sign an agreement with a bank in relation to the receipt of subscription amounts. The receiving bank shall receive and keep in custody the subscription amounts, issue receipts to subscribers who have paid the subscription amounts and furnish evidence of receipt of subscription amounts to relevant authorities. After the subscription amounts for the share issuance have been paid in full, a capital verification institution established by law must be engaged to conduct capital verification and furnish a report thereon. The promoters shall convene an inaugural meeting within 30 days. The inauguration meeting shall be formed by the subscribers. Where shares issued remain undersubscribed by the cut-off date stipulated in the share

offering Prospectus, or where the promoter fails to convene an inauguration meeting within 30 days after subscription amounts for the shares issued have been fully paid up, the subscribers may demand the promoter to return the subscription amounts so paid up together with interests at bank rates for a deposit for the same term. Within 30 days after the conclusion of the inaugural meeting, the board of directors shall apply to the registration authority for registration of the establishment of the company.

A company is formally established and has the status of a legal person after the approval of registration has been given by the relevant administration bureau for industry and commerce and a business license has been issued.

A company's promoter shall individually and collectively be liable for:

(i) the payment of all expenses and liabilities incurred in the incorporation process if the company cannot be incorporated;

(ii) the repayment of subscription moneys to the subscribers together with interest at bank rates for a deposit for the same term if the company cannot be incorporated; and

(iii) damages suffered by the company as a result of the default of the promoters in the course of incorporation of the company.

According to the Provisional Regulations Concerning the Issue and Trading of Shares promulgated by the State Council on 22nd April, 1993 (which is only applicable to issue and trading of shares in the PRC and their related activities), if a company is established by means of subscription, the promoters of such company are required to assume joint responsibility for the accuracy of the contents of the Prospectus and to ensure that the Prospectus does not contain any misleading statement or omit any material information.

Share capital

The promoter may make capital contribution in currencies, or in kind or by way of injection of assets, intellectual property rights or land use rights based on their appraised value, and may also convert lawfully transferred non-monetary assets into capital contribution with a monetary value, save for assets prohibited to be contributed as capital by the law or administrative regulations. If a capital contribution is made other than in cash, a valuation and verification of the asset contributed must be carried out without any over-valuation or under-valuation, subject to any provisions of the law or administrative regulations on valuation. The amount of monetary contribution by all shareholders shall not be less than 30% of the registered capital of the company.

A company may issue registered or bearer share certificates. The Special Regulations and the Mandatory Provisions provide that shares issued to foreign investors and listed overseas be issued in registered form and shall be denominated in Renminbi and subscribed for in foreign currency. Shares issued to foreign investors and investors from the territories of Hong Kong, Macau and China Taiwan and listed in Hong Kong are classified as H shares, and those shares issued to investors within the PRC other than the territories specified above are known as domestic shares. Under the Special Regulations, upon approval of the CSRC, a company may agree, in the underwriting agreement in respect of an issue of H shares, to retain not more than 15% of the aggregate number of overseas listed foreign invested shares proposed to be issued after accounting for the number of underwritten shares. The share offering price may be equal to or greater than the par value, but may not be less than the par value.

Increase in share capital

According to the PRC Company Law, the issuance of shares shall be conducted in a fair and equitable manner. Shares in the same class shall rank pari passu with one another. Shares of the same class in the same

offer shall be issued on the same terms and at the same price. The same price per share shall be paid by any units or individuals subscribing for shares.

Where a company is issuing new shares, resolutions shall be passed by the shareholders' general meeting or the board of directors in accordance with the articles of association in respect of the class and amount of the new shares, the issue price of the new shares, the commencement and end of the new share issue and the class and amount of new shares to be issued to existing shareholders. When a company launches a public issue of new shares with the approval of the securities regulatory authorities under the State Council, a new share offering Prospectus and financial accounting report must be published and a subscription form must be prepared. After the new share issue of the Company has been paid up, the change must be registered with the company registration authorities and an announcement must be made. Where a company is issuing new shares to increase its registered capital, the subscription of new shares by shareholders shall be conducted in accordance with provisions on the payment of subscription amounts in relation to the incorporation of the company.

Reduction of share capital

Subject to the minimum registered capital requirements, a company may reduce its registered capital in accordance with the following procedures prescribed by the PRC Company Law:

(i) the company shall prepare a balance sheet and financial statement;

(ii) the reduction of registered capital must be approved by shareholders in a shareholders' general meeting;

(iii) the company shall inform its creditors of the reduction in capital within 10 days and publish an announcement of the reduction in the newspaper within 30 days after the resolution approving the reduction has been passed;

(iv) the creditors of the company may within the statutory prescribed time limit require the company to pay its debts or provide guarantees covering the debts; and

(v) the company must apply to the relevant administration bureau for industry and commence for registration of the reduction in registered capital.

Repurchase of shares

A Company may not purchase its own shares other than for one of the following purposes:

(i) to reduce its registered share capital;

(ii) to merge with another company that holds its shares;

(iii) to grant shares to its employees as incentives; and

(iv) to purchase its own shares from its shareholders who vote against the resolution regarding the merger and demerger with other company in a shareholders' general meeting.

The company's acquisition of its own shares on the grounds set out in (i) to (iii) above shall require approval by way of a resolution of the shareholders' general meeting. Following the company's acquisition of its shares in accordance with the foregoing, such shares shall be canceled within 10 days from the date of acquisition in the case of (i) and transferred or canceled within six months in the case of (ii) or (iv).

Shares acquired by the company in accordance with (iii) under paragraph one shall not exceed 5% of the total number of issued shares of the company. Such acquisition shall be financed by funds appropriated

from the company's profit after taxation, and the shares so acquired shall be transferred to the employees within one year.

Transfer of shares

Shares held by shareholders may be transferred in accordance with the relevant laws and regulations. A shareholder may only effect a transfer of its shares on a stock exchange established in accordance with law or by other way as required by the State Council. Registered shares may be transferred after the shareholders endorse their signatures on the back of the share certificates or in any other manner specified by the law or administrative regulations. Following the transfer, the company shall enter the name of the transferee and its address into the share register. No changes of registration in the share register provided in the foregoing shall be effected during a period of 20 days prior to the convening of the shareholders' general meeting or 5 days prior to the record day for the purpose of determining entitlements to dividend distributions, subject to any legal provisions on the registration of changes in the share register of listed companies. The transfer of bearer's share certificate shall become effective upon the delivery of such share certificate to the transferee by the shareholder.

Shares held by a promoter may not be transferred within 1 year after the company's establishment. Shares of the company issued prior to the public issue of shares shall not be transferred within 1 year from the date of the company's listing on a stock exchange.

Directors, supervisors and the senior management of a company shall declare to the company his shareholdings in the company and any changes of such shareholdings. During their term of office, they shall transfer no more than 25% of the shares they hold in the company. They shall not transfer the shares they hold within 1 year from the date of the company's listing on a stock exchange, nor within six months after they have resigned from their positions with the company. The articles of association may lay down other restrictive provisions in respect of the transfer of shares in the company held by the Directors, supervisors and the senior management of the company.

Shareholders

Under the Company Law, the rights of a shareholder include:

(i) to receive return on capital, participate in significant decision-making and be able to choose the management;

(ii) to petition the people's court to revoke any resolution passed at a shareholders' general meeting or a meeting of board of directors that has been convened or whose voting has been conducted in a manner violating the law, or any resolution that is in violation of the articles of association, provided that such petition is submitted within 60 days from the passing of such resolution;

(iii) to appoint a proxy to attend shareholders' general meetings;

(iv) to inspect the articles of association, share register, counterfoil of company debentures, minutes of shareholders' general meetings, board resolutions, resolutions of the supervisory committee and financial and accounting reports and to make proposals or enquiries in respect of the company's operations;

(v) to receive dividends in respect of the number of shares held;

(vi) to receive residual properties of the company in proportion to their shareholdings upon the liquidation of the company; and

(vii) any other shareholders' rights provided for in the articles of association.

The obligations of a shareholder include the obligation to abide by the company's articles of association, to pay the subscription moneys in respect of the shares subscribed for, to be liable for the company's debts and liabilities to the extent of the amount of subscription moneys agreed to be paid in respect of the shares taken up by him and any other shareholders' obligation specified in the company's articles of association.

Shareholders' general meetings

The shareholders' general meeting is the organ of authority of the company, which exercises its powers in accordance with the Company Law.

The shareholders' general meeting exercises the following powers:

(i) to decide on the company's operational policies and investment plans;

(ii) to elect or remove the directors and supervisors (not being staff representative) and to decide on matters relating to the remuneration of directors and supervisors;

(iii) to examine and approve reports of the board of directors;

(iv) to examine and approve reports of the supervisory committee or supervisor;

(v) to examine and approve the company's proposed annual financial budget and final accounts;

(vi) to examine and approve the company's proposals for profit distribution plans and recovery of losses;

(vii) to decide on any increase or reduction of the company's registered capital;

(viii) to decide on the issue of bonds by the company;

(ix) to decide on issues such as merger, division, dissolution and liquidation of the company and other matters;

(x) to amend the company's articles of association; and

(xi) other authorities as provided for in the articles of association.

Shareholders' general meetings are required to be held once every year. An extraordinary shareholders' general meeting is required to be held within 2 months after the occurrence of any of the following:

(i) the number of directors is less than the number stipulated by the law or less than two-thirds of the number specified in the articles of association;

(ii) the aggregate losses of the company which are not made up reach one third of the company's total share capital;

(iii) when shareholders holding 10% or more of the company's shares request the convening of an extraordinary general meeting;

(iv) whenever the board of directors deems necessary; or

(v) when the supervisory committee so requests.

(vi) other circumstances as provided for in the articles of associations.

Shareholders' general meetings shall be convened by the board of directors, and presided over by the chairman of the board of directors. In the event that the chairman is incapable of performing or not performing his duties, the meeting shall be presided over by the vice chairman. In the event that the vice chairman is incapable of performing or not performing his duties, a director nominated by the majority of directors shall preside over the meeting. Where the board of directors is incapable of performing or not

performing its duties of convening the shareholders' general meeting, the supervisory committee shall convene and preside over such meeting in a timely manner. In case the supervisory committee fails to convene and preside over such meeting, shareholders alone or in aggregate holding more than 10% of the company's shares for 90 days consecutively may unilaterally convene and preside over such meeting.

Notice of the shareholders' general meeting stating the time and venue of and matters to be considered at the meeting shall be given to all shareholders 20 days before the meeting. Notice of extraordinary general meetings shall be given to all shareholders 15 days prior to the meeting. For the issuance of bearer's share certificates, the time and venue of and matters to be considered at the meeting shall be announced 30 days before the meeting. Shareholders alone or in aggregate holding more than 3% of the company's shares may submit interim proposals to the board of directors in writing 10 days before the shareholders' general meeting. The board of directors shall notify other shareholders within 2 days after receiving such proposal and table such interim proposal for review by the shareholders' general meeting. Interim proposals shall be within the powers of the shareholders' general meeting and shall carry specific subjects and matters for resolution. A shareholders' general meeting shall not make any resolution in respect of any matters not set out in the two types of notices mentioned above. Holders of bearer's share certificate who wish to attend the shareholders' general meeting shall deposit his share certificates with the company 5 days before the meeting, which share certificates shall remain in the custody of the company until the close of the shareholders' general meeting.

Shareholders present at a shareholders' general meeting have one vote for each share they hold, save that shares held by the company are not entitled to any voting rights. Resolutions of the shareholders' general meeting must be adopted by more than half of the voting rights held by shareholders present at the meeting, with the exception of matters relating to merger, division, dissolution of a company or amendments to the articles of association, which must be adopted by more than two-thirds of the voting rights held by the shareholders present at the meeting. Where the PRC Company Law and the articles of association provide that the transfer or acquisition of significant assets or the provision of external guarantees by a company must be approved by way of resolution of the shareholders' general meeting, the directors shall convene a shareholders' general meeting promptly to vote on the above matters. The accumulative voting system may be adopted pursuant to the provisions of the articles of association or a resolution of the shareholders' general meeting for the election of directors and supervisors at the shareholders' general meeting. Under the accumulative voting system, each share shall be entitled to votes equivalent to the number of directors or supervisors to be elected meeting for the election of directors and supervisors at the shareholders' general meeting , and shareholders may consolidate their voting rights when casting a vote.

Minutes shall be prepared in respect of matters considered at the shareholders' general meeting and the president of the meeting and directors attending the meeting shall sign to endorse such minutes. The minutes shall be kept together with the shareholders' attendance register and the proxy forms.

According to the Mandatory Provisions, the increase or reduction of share capital, the issue of shares of any class, warrants or other similar securities, and bonds or debentures, the liquidation of the company and any other matters in respect of which the shareholders by ordinary resolution so decide, must be approved through special resolutions by more than two-thirds of the voting rights held by shareholders present at the meeting.

There is no specific provision in the Company Law regarding the number of shareholders constituting a quorum in a shareholders' meeting, although the Special Regulations and the Mandatory Provisions provide that a company's annual general meeting may be convened when replies to the notice of that meeting from shareholders holding shares representing 50% of the voting rights in the company have been received 20 days before the proposed date, or if that 50% level is not achieved, the company shall within 5 days of the last day for receipt of the replies notify shareholders again by public announcement of the matters to be considered at

the meeting and the date and place of the meeting and the annual general meeting may be held thereafter. The Mandatory Provisions require class meetings to be held in the event of a variation or derogation of the class rights of a class. Holders of domestic invested shares and holder of H shares are deemed to be different classes of shareholders for this purpose.

Directors

A company shall have a board of directors, which shall consist of 5 to 19 members. Members of the board of directors may include staff representatives, who shall be democratically elected by the company's staff at the staff representative assembly, general staff meeting or otherwise. The term of a director shall be stipulated in the articles of association, provided that no term of office shall last for more than 3 years. A director may serve consecutive terms if re-elected. A director shall continue to perform his duties in accordance with the laws, administrative regulations and articles of association until a duly re-elected director takes office, if re-election is not conducted in a timely manner upon the expiry of his term of office or if the resignation of directors results in the number of directors being less than the quorum.

Under the Company Law, the board of directors exercises the following powers:

(i) to convene the shareholders' general meetings and report on its work to the shareholders' general meetings;

(ii) to implement the resolutions passed by the shareholders in general meetings;

(iii) to decide on the company's business plans and investment proposals;

(iv) to formulate the company's proposed annual financial budget and final accounts;

(v) to formulate the company's profit distribution proposals and for recovery of losses;

(vi) to formulate proposals for the increase or reduction of the company's registered capital and the issuance of the corporate bonds;

(vii) to prepare plans for the merger, division or dissolution of the company;

(viii) to decide on the company's internal management structure;

(ix) to appoint or dismiss the company's general manager and based on the general manager's recommendation, to appoint or dismiss the deputy general managers and financial officers of the company and to decide on their remuneration;

(x) to formulate the company's basic management system; and

(xi) to exercise other powers under the articles of association.

Meetings of the board of directors shall be convened at least twice a year. Notice of meeting shall be given to all directors and supervisors 10 days before the meeting. Interim board meetings may be convened by shareholders representing more than 10% of voting rights, more than one third of the directors or the supervisory committee. The chairman shall convene and preside over such meeting within 10 days after receiving such proposal. The board of directors may provide for a different method of giving notice and notice period for convening an extraordinary meeting of the board of directors. Meetings of the board of directors shall be held only if half or more of the directors are present. Resolutions of the board of directors require the approval of more than half of all directors. Each director shall have one vote for resolutions to be approved by the board of directors. Directors shall attend board meetings in person. If a director is unable to attend a board meeting, he may appoint another director by a written power of attorney specifying the scope of the authorization to attend the meeting on his behalf.

If a resolution of the board of directors violates the law, administrative regulations or the company's articles of association, and as a result of which the company sustains serious losses, the directors participating in the resolution are liable to compensate the company. However, if it can be proved that a director expressly objected to the resolution when the resolution was voted on, and that such objections were recorded in the minutes of the meeting, such director may be relieved from that liability.

Under the Company Law, the following persons may not serve as a director of a company:

(i) persons without civil capacity or with restricted civil capacity;

(ii) persons who have committed the offence of corruption, bribery, taking of property, misappropriation of property or destruction of the social economic order, and have been sentenced to criminal punishment, where less than 5 years have elapsed since the date of completion of the sentence; or persons who have been deprived of their political rights due to criminal offence, where less than 5 years have elapsed since the date of the completion of implementation of this deprivation;

(iii) persons who are former directors, factory managers or managers of a company or enterprise which has become bankrupt and been liquidated and who are personally liable for the bankruptcy of such company or enterprise, where less than 3 years have elapsed since the date of the completion of the bankruptcy and liquidation of the company or enterprise;

(iv) persons who were legal representatives of a company or enterprise which had its business license revoked due to violation of the law and who are personally liable, where less than 3 years have elapsed since the date of the revocation of the business license;

(v) persons who have a relatively large amount of debts due and outstanding.

The election, appointment or engagement of directors elected or appointed by the company in violation of the aforesaid provisions shall be null and void. Directors committing the above during his term of office shall be released of his duties by the company.

Other circumstances under which a person is disqualified from acting as a director of a company are set out in the Mandatory Provisions.

The board of directors shall appoint a chairman and may appoint a vice chairman. The chairman and the vice chairman are elected with approval of more than half of all the directors. The chairman shall convene and preside over board meetings and examine the implementation of board resolutions. The vice chairman shall assist in the work of the chairman. In the event that the chairman is incapable of performing or not performing his duties, the duties shall be performed by the vice chairman. In the event that the vice chairman is incapable of performing or not performing his duties, a director nominated by the majority of directors shall perform his duties.

Supervisors

A company shall have a supervisory committee composed of not less than 3 members. The supervisory committee is made up of representatives of the shareholders and an appropriate proportion of representatives of the company's staff and workers. The actual proportion shall be stipulated in the articles of association, provided that the proportion of representatives of the company's staff and workers shall not be less than one third. Representatives of the company's staff and workers at the supervisory committee shall be democratically elected by the company's staff at the staff representative assembly, general staff meeting or otherwise. The supervisory committee shall appoint a chairman and may appoint a vice chairman. The chairman and the vice chairman of the supervisory committee are elected with approval of more than half of all the supervisors.

The chairman of the supervisory committee shall convene and preside over supervisory committee meetings. In the event that the chairman of the supervisory committee is incapable of performing or not performing his duties, the vice chairman of the supervisory committee shall convene and preside over supervisory committee meetings. In the event that the vice chairman of the supervisory committee is incapable of performing or not performing his duties, a supervisor nominated by the majority of supervisors shall convene and preside over supervisory committee meetings. Directors and members of the officers may not act concurrently as supervisors.

Each term of office of a supervisor is 3 years and he or she may serve consecutive terms if reelected. A supervisor shall continue to perform his duties in accordance with the laws, administrative regulations and articles of association until a duly re-elected supervisor takes office, if re-election is not conducted in a timely manner upon the expiry of his term of office or if the resignation of supervisors results in the number of supervisor being less than the quorum.

The supervisory committee exercises the following powers:

(i) to review the company's financial position;

(ii) to supervise the directors and officers in their performance of their duties and to propose the removal of directors and officers who have violated laws, regulations, the articles of association or shareholders' resolution;

(iii) when the acts of a directors and managers are in a harm to the company's interests, to require correction of these acts;

(iv) to propose the convening of extraordinary shareholders' general meetings and to convene and preside over shareholders' meetings when the board of directors fails to perform the duty of convening and presiding over shareholders' meeting under this law;

(v) to propose resolution in a general meeting;

(vi) to initiate proceedings against directors and officers;

(vii) other powers specified in the articles of association.

Supervisors may be in attendance at board meetings and make enquiries or proposals in respect of board resolutions. The supervisory committee or (where there is no supervisory committee) the supervisors of a company may initiate investigations into any irregularities identified in the operation of the company and, where necessary, may engage an accountant to assist in his work at the company's expense.

Managers and officers

A company shall have a manager who shall be appointed or removed by the board of directors. The manager may exercise the following powers:

(i) supervise the production, business and administration of the company and arrange for the implementation of resolutions of the board of directors;

(ii) arrange for the implementation of the company's annual business and investment plans;

(iii) formulate plans for the establishment of the company's internal management structure;

(iv) formulate the basic administration system of the company;

(v) formulate the company's internal rules;

(vi) recommend the appointment and dismissal of deputy managers and any financial controller;

(vii) appoint or dismiss other administration officers (other than those required to be appointed or dismissed by the board of directors);

(viii) other powers conferred by the board of directors.

Other provisions of the articles of association on the general manager's powers shall also be complied with. The general manager shall be in attendance at board meetings.

According to the PRC Company Law, officers shall mean the general manager, deputy general manager(s), financial controller, board secretaries (in case of a listed company) of a company and other personnel as stipulated in the articles of association.

Duties of the directors, supervisors, general managers and other officers

Directors, supervisors, managers and officers of a company are required under the PRC Company Law to comply with the relevant laws, regulations and the articles of association, carry out their duties honestly and diligently. Directors, supervisors, managers and officers are prohibited from making of their powers to accept bribes or other unlawful income and from appropriating the company's properties. Directors and officers are prohibited from:

(i) Misappropriation of company funds;

(ii) Deposit of company funds into accounts under his own name or the name of other individuals;

(iii) Loaning company funds to others or providing guarantees in favour of others on the back of the company properties in violation of the articles of association or without prior approval of the shareholders' meeting, shareholders' general meeting or board of directors;

(iv) Entering into contracts or deals with the company in violation of the articles of association or without prior approval of the shareholders' meeting, shareholders' general meeting or board of directors;

(v) using one's position and powers to procure business opportunities for oneself or others that should have otherwise been available to the company or operating for one's own benefit or managing on behalf of others businesses similar to that of the company without prior approval of the shareholders' meeting or the shareholders' general meeting;

(vi) Accepting for one's own benefit commission from a third party dealing with the company;

(vii) Unauthorized divulgence of confidential information of company;

(viii) Other acts in violation of the fiduciary duty to the company.

Income generated by directors or officers in violation of the foregoing provisions shall be reverted to the company.

A director, supervisor or officer who contravenes any law, regulation or the company's articles of association in the performance of his duties resulting in any loss to the company shall be personally liable to the company.

Where the attendance of a director, supervisor or officer is requested by the shareholders' general meeting, such director, supervisor or officer shall attend the meeting as requested and answer enquiries of shareholders. Directors and officers should furnish with all truthfulness facts and information to the supervisory committee or the supervisor (for companies with limited liability that do not have supervisory committees) without obstructing the discharge of duties by the supervisory committee or the supervisors.

Where a director or officer who contravenes any law, regulation or the company's articles of association in the performance of his duties resulting in any loss to the company, shareholders holding alone or in aggregate more than 1% of the company's shares consecutively for 180 days may request in writing the supervisory committee to institute litigation at the people's court on his behalf. Where a supervisor violates the law or administrative regulations or the articles of association in the discharge of his duties resulting in losses to the company, the aforesaid shareholders may request in writing the board of directors to institute litigation at the people's court on his behalf. In the event that the supervisory committee or board of directors refuses to institute litigation after receiving the written request of shareholders as provided in the foregoing, or fails to institute litigation within 30 days after receiving the request, or in case of emergency where failure to institute litigation immediately will result in irrecoverable damage to the company's interest, shareholders mentioned in the foregoing shall have the power to institute litigation directly at the people's court in his own name for the company's benefit. For other parties who infringe the lawful interests of the company resulting in losses to the company, shareholders may institute litigation at the people's court in accordance with provisions in the two foregoing sentences. Where a director or officer who contravenes any law, administrative regulation or the articles of association in infringement of shareholders' interests, shareholders may also institute litigation at the people's court.

The Special Regulations and the Mandatory Provisions provide that a company's directors, supervisors, general managers and other officers shall have fiduciary duties towards the company. They are required to faithfully perform their duties, protect the interests of the company and not to use their positions for their own benefit. The Mandatory Provisions contains detailed stipulations on these duties.

Finance and accounting

A company shall establish its financial and accounting systems according to laws, administrative regulations and the regulations of the responsible financial department of the State Council and at the end of each financial year prepare a financial report which shall be audited by an accountant as provided by law. The financial and accounting report shall be prepared in accordance with provisions of the laws, administrative regulations and the regulations of financial department of the State Council.

A company shall deposit its financial statements at the company for the inspection by the shareholders at least 20 days before the convening of an annual general meeting of shareholders. A company established by the public subscription method must publish its financial statements. When distributing each year's after-tax profits, the company shall set aside 10% of its after-tax profits for the company's statutory common reserve fund (except where the fund has reached 50% of the company's registered capital). When the company's statutory common reserve fund is not sufficient to make up for the company's losses of the previous year, current year profits shall be used to make good the losses before allocations are set aside for the statutory common reserve fund. After the company has made appropriations to the statutory common reserve fund from its after-tax profit, it may, with the approval of the shareholders' meeting or the shareholders' general meeting by way of resolution, make further appropriations from its after-tax profit to the discretionary common reserve fund. After the company has made good its losses and made allocations to its common reserve fund, the remaining profits are distributed in proportion to the number of shares held by the shareholders, or otherwise where distributions are stipulated by the articles of association not to be made in a proportionate manner. Profit distributed to shareholders by the shareholders' general meeting or the board of directors before losses have been made good and appropriations have been made to the statutory commons reserve fund in violation of the foregoing provisions must be returned to the company. Shares held by the company shall not be entitled to any distribution of profit.

The premium over the nominal value of the shares of the company on issue and other amounts required by the relevant governmental authority to be treated as the capital common reserve shall be accounted for as capital common reserve. The capital common reserve of a company shall be applied to make up the company's losses, expand the business operations of the company or increase the company's capital, the capital common reserve shall not be used to make good the company's losses. Upon the conversion of statutory common reserve into capital, the balance of the statutory common reserve shall not be less than 25% of the registered capital of the company before such conversion.

The company shall have no other accounting books except the statutory accounting books. The company's assets shall not be deposited in any accounts opened in the name of an individual.

Appointment and retirement of auditors

Pursuant to the PRC Company Law, the appointment or dismissal of accountants responsible for the company's auditing shall be determined by the shareholders' general meeting or the board of directors in accordance with the articles of association. The accountant should be allowed to make representations when the shareholders' general meeting or board of directors is going to conduct a vote on the dismissal of the accountant. The company should provide true and complete accounting evidences, books, financial and accounting reports and other accounting data to the accountant it hires without any refusal, withholding and false information.

The Special Regulations require a company to employ an independent qualified firm of accountants to audit the company's annual report and review and check other financial reports.

Distribution of profits

The Special Regulations provide that the dividends and other distributions to be paid to holders of H shares shall be declared and calculated in Renminbi and paid in foreign currency. Under the Mandatory Provisions, the payment of foreign currency to shareholders shall be made through a receiving agent.

Amendment of articles of association

Any amendments to the articles of association must be made in accordance with the procedures set forth in applicable laws, regulations and the articles of association. Any amendment of provisions incorporated in the articles of association in accordance with the Mandatory Provisions will only be effective after approval by the companies approval department authorized by the CSRC and the State Council and filed with the State Administration of Industry and Commerce or any of its local bureau fo registration. If the amendment to the articles of association falls to be registered and filed and has bee adopted, the company must process registration of changes in accordance with applicable laws and regulations.

Termination and liquidation

A company shall be dissolved by reason of the following:

(i) the term of its operations set down in the company's articles of association has expired or other events of dissolution specified in the company's articles of association have occurred;

(ii) the shareholders in general meeting have resolved to dissolve the company;

(iii) the company is dissolved by reason of its merger or demerger;

(iv) the business licence is invalidated; the operation is suspended, or the company is dissolved by order of the court;

(v) the company is dissolved by the people's court in response to the request of shareholders holding shares that represent more than 10% of the voting rights of all shareholders of the company, on the grounds that he operation of the company experiences serious difficulties that cannot be resolved through other means, rendering ongoing existence of the company a cause for significant losses for shareholders'.

In the event of (i) above, the company may carry on its existence by amending its articles of association. The amendment of the articles of association in accordance with provisions set out in the previous paragraph shall require approval of shareholders holding more than two thirds of voting rights in the case of companies with limited liability and more than two thirds of voting rights of shareholders attending a shareholders' general meeting in the case of a joint stock limited company.

Where the company is dissolved in the circumstances described in (i), (ii), (iv) or (v) above, liquidation must commence with the establishment of a liquidation committee within 15 days. Members of the liquidation committee shall be appointed by the directors or the shareholders in a general meeting. If a liquidation committee is not established within the stipulated period, the company's creditors can apply to the people's court, requesting the court to appoint relevant personnel to form the liquidation committee. The people's court should accept such application and form a liquidation committee to conduct liquidation in a timely manner.

The liquidation committee shall exercise the following powers during the liquidation period:

(i) to handle the company's assets and to prepare a balance sheet and an inventory of the assets;

(ii) to notify creditors or issue public notices;

(iii) to deal with and settle any outstanding businesses of the company;

(iv) to pay any tax overdue as well as tax amounts arising from the process of liquidation;

(v) to settle the company's financial claims and liabilities;

(vi) to handle the surplus assets of the company after its debts have been paid off; and

(vii) to represent the company in civil lawsuits.

The liquidation committee shall notify the company's creditors within 10 days after its establishment, and issue public notices in the newspapers within 60 days. A creditor shall lodge his claim with the liquidation committee within 30 days after receiving notification, or within 45 days of the public notice if he did not receive any notification. A creditor shall state all matters relevant to his creditor rights in making his claim and furnish evidence. The liquidation committee shall register such creditor rights. The liquidation committee shall not make any debt settlement to creditors during the period of claim.

Upon liquidation of the company's properties and the preparation of the balance sheet and inventory of assets, the liquidation committee shall draw up a liquidation plan to be submitted to the shareholders' meeting, shareholders' general meeting or people's court for endorsement.

The remaining assets of the company after payment of liquidation expenses, wages, social insurance expenses and statutory compensation, outstanding taxes and the company's debt shall be distributed to shareholders according to their proportion of capital contribution in the case of companies with limited liability and according to shareholding proportion in the case of joint stock limited companies. The company shall continue to exist during the liquidation period, although it cannot be engaged in any operating activities that are not related to the liquidation. The company's properties shall not be distributed to the shareholders before repayment are made in accordance to the foregoing provisions.

Upon liquidation of the company's properties and the preparation of the balance sheet and inventory of assets, if the liquidation committee becomes aware that the company does not have sufficient assets to meet its liabilities, it must immediately apply to the people's court for a declaration for bankruptcy.

Following such declaration, the liquidation committee shall hand over all affairs of the liquidation to the people's court.

Upon completion of the liquidation, the liquidation committee shall submit a liquidation report to the shareholders' meeting, shareholders' general meeting or the people's court for verification. Thereafter, the report shall be submitted to the companies registration authority in order to cancel the company's registration, and a public notice of its termination shall be issued. Members of the liquidation committee are required to discharge their duties honestly and in compliance with the relevant laws. Members of the liquidation committee shall be prohibited from making of their powers to accept bribes or other unlawful income and from appropriating the company's properties. A member of the liquidation committee is liable to indemnify the company and its creditors in respect of any loss arising from his willful or material default.

Liquidation of a company declared bankrupt according to the law shall be processed in accordance with laws on corporate bankruptcy.

Overseas listing

The shares of a company shall only be listed overseas after obtaining approval from CSRC and the listing must be arranged in accordance with procedures specified by the State Council.

According to the Special Regulations, a company's plan to issue H shares and domestic invested shares which has been approved by CSRC may be implemented by the board of directors of the company by way of separate issues, within 15 months after approval is obtained from the CSRC.

Loss of share certificates

A shareholder may apply, in accordance with the announcement and notice procedures set out in the PRC Civil Procedure Law, to a people's court in the event that share certificates in registered form are either stolen, lost or destroyed, for a declaration that such certificates will no longer be valid. After such a declaration has been obtained, the shareholder may apply to the company for the issuance of replacement certificates.

Merger and demerger

A merger agreement must be signed in the case of a merging of companies and the relevant companies shall draw up their respective balance sheets and inventory of property. The companies should within 10 days of the resolution of the merger inform their respective creditors and publish a notice to the creditors in newspapers. The creditors may, within 30 days for those who have received written notice or within 45 days for those who have not, request the company to satisfy any unpaid debts or provide equivalent guarantees.

When companies merge, the creditor rights and debts of the merging parties shall be assumed by the surviving company or the new company. When a company demerges, its assets must be divided accordingly and a balance sheet and inventory of assets must be drawn up. When a resolution is passed approving the demerger of the company, the company should notify all its creditors within 10 days of such resolution being passed and advertise the same in newspapers within 30 days. Unless otherwise agreed with a creditor, obligations in respect of the liabilities before the demerger of the company shall be jointly and severally borne by the demerged companies.

Changes in registrable particulars of the companies caused by merger or demerger must be registered with companies registration authorities. Cancellation of a company should be registered in accordance with

the law when a company is dissolved. Incorporation of a company shall be registered when a new company is incorporated.

D. Securities Law and Regulations and Regulatory Regimes

Since 1992, the PRC has promulgated a number of regulations in relation to the issue and trading of shares and disclosure of information. In early 1993, the Securities Commission and the CSRC were established under the State Council. The Securities Commission is responsible for coordinating the drafting of the securities, formulating policies on securities affairs, planning the development of securities markets and guiding, coordinating and regulating all PRC institutions involved in securities affairs and supervising the CSRC. The CSRC is the regulatory arm of the Securities Commission and is responsible for drafting regulations governing the securities market, supervising securities companies, regulating the domestic and overseas public issue of securities by PRC companies, supervising securities trading, compiling securities related statistics and conducted research and analysis.

In early 1998, the State Council dissolved the Securities Commission and the functions of the Securities Commission was assumed by the CSRC. On 22 April, 1993, the State Council promulgated the Provisional Regulations Concerning the Issue and Trading of Shares (the "Securities Provisional Regulations"). The Securities Provisional Regulations deal with the application and approval procedures for public offerings of equity securities, trading in equity securities, the acquisition of listed companies, deposit, settlement, clearing and transfer of listed equity securities, disclosure of information, investigation and penalties and dispute settlement with respect to a listed company. The Securities Provisional Regulations specifically provide that the offer of shares by a PRC company directly and indirectly outside the PRC require the approval of the Securities Commission (or the CSRC at present). Provisions of the Securities Provisional Regulations in relation to acquisitions of listed companies and disclosure of information are expressed to apply to companies listed on a stock exchange in general without being confined to companies listed on any particular stock exchange. Such provisions may, therefore, be applicable to joint stock limited companies with shares listed on a stock exchange outside the PRC including, for instance, joint stock limited companies with shares listed on the Stock Exchange such as the Company.

On 12 June, 1993, the CSRC promulgated the Implementation Measures (Provisional) on Disclosure of Information by Companies issuing Public Offerings of Shares pursuant to the Securities Provisional Regulations. Under these measures, the CSRC is responsible for supervising the disclosure of information by companies which have offered shares to the public in the PRC. These measures contain provisions regarding Prospectuses and listing reports to be issued in connection with a public offering of shares in the PRC, publication of interim and final reports and announcement of material transactions or matters by companies which have offered shares to the public. Material transactions or matters are those the occurrence of which may have a material effect on the share price of a company. They include changes to a company's articles of association or registered capital, removal of auditors, mortgage or disposal of major operating assets or writing down the value of such assets where the amount being written down exceeds 30% of the total value of such assets, revocation by a court of any resolution passed by the shareholders or the supervisors of a company and the merger or demerger of a company. These measures also contain disclosure provisions in relation to acquisition of listed companies which supplement the requirements contained in the Securities Provisional Regulations.

On 2 September, 1993, the Securities Commission promulgated the Provisional Measures Prohibiting Fraudulent Conduct Relating to Securities. The prohibitions imposed by these measures include the use of insider information in connection with the issue of or trading in securities (insider information being defined to include undisclosed material information known to any insider, which may affect the market price of

securities); the use of funds or information or through an abuse of power in creating a false or disorderly market or influencing the market price of securities or inducing investors to make investment decisions without knowledge of actual circumstances; and the making of any statement in connection with the issue of and trading in securities which is false or materially misleading or in respect of which there is any material omission. Penalties imposed for contravening any of the provisions of the measures include fines, confiscation of profits and suspension of trading. In serious cases, criminal liability may be imposed.

On 4 August 1994, the State Council promulgated the Special Regulations. These provisions deal mainly with the issue, subscription, trading, declaration of dividends and other distributions of foreign capital stock listed aboard and the disclosure of information of articles of association of joint stock limited companies having foreign capital stock listed aboard.

On 25 December 1995, the State Council promulgated the Regulations of the State Council Concerning Domestic Listed Foreign Shares of Joint Stock Limited Companies. These regulations deal mainly with the issue, subscription, trading, declaration of dividends and other distributions of domestic listed foreign shares and the disclosure of information of joint stock limited companies having domestic listed foreign shares.

On 29 December 1998, the Standing Committee of the NPC promulgated the Securities Law of the PRC which came into effect on 1 July 1999. This is the first national securities law in the PRC and is the fundamental law comprehensively regulating activities in the PRC securities market. On 27 October 2005, the Securities Law was revised. The Securities Law is applicable to the issuance and trading in the PRC of shares, company bonds and other securities designated by the State Council according to law. Where the Securities Law does not apply, the provisions of the PRC Company Law and other applicable laws and administrative regulations will apply.

On 29 March 1999, SETC and the CSRC promulgated the Opinion on the Further Promotion of the Regular Operation and In-Depth Reform of Companies Listed Overseas (the "Opinion"), which is aimed at regulating the internal operation and management of PRC companies listed overseas. The Opinion regulates, amongst others, the appointments and functions of external directors and independent directors in the board of directors; and the appointment and functions of external supervisors in the supervisory committee.

E. Arbitration Laws

The Arbitration Law of the People's Republic of China (the "Arbitration Law") was passed by the Standing Committee of the NPC on 31 August 1994 and came into effect on 1 September 1995. It is applicable to, among other matters, economic disputes involving foreign parties where the parties have entered into a written agreement to refer the matter to arbitration before an arbitration committee constituted in accordance with the Arbitration Law. Under the Arbitration Law, an arbitration committee may, before the promulgation by the PRC Arbitration Association of arbitration regulations, formulate interim arbitration rules in accordance with the Arbitration Law and the PRC Civil Procedure Law. Where the parties have by an agreement provided arbitration as a method for dispute resolution, the people's court will refuse to handle the case if one party institutes legal proceedings in a people's court, unless the arbitration agreement has lapsed.

The Listing Rules and the Mandatory Provisions require an arbitration clause to be included in the articles of association of a company listed in Hong Kong and, in the case of the Listing Rules, also in a contract between the company and each director or supervisor, to the effect that whenever any dispute or claim arises from any rights or obligations provided in the articles of association, the PRC Company Law or other relevant laws and administrative regulations concerning the affairs of a company between (i) a holder of overseas listed foreign shares and the company; (ii) a holder of overseas listed foreign shares and a holder of

domestic shares; or (iii) a holder of H shares and the directors, supervisors or other officers of the company; such parties shall submit that dispute or claim for arbitration before either the China International Economic and Trade Arbitration Commission ("CIETAC") or the Hong Kong International Arbitration Centre ("HKIAC") for arbitration. If the party seeking arbitration elects to arbitrate the dispute or claim at the HKIAC, then either party may apply to have such arbitration conducted in Shenzhen according to the securities arbitration rules of the HKIAC.

CIETAC is a economic and trade arbitration organ in the PRC. In accordance with CIETAC Arbitration Rules as amended on 11 January, 2005 (which amendment became effective on 1 May, 2005), the jurisdiction of CIETAC covers disputes involving Hong Kong. CIETAC is located in Beijing with branch offices in Shenzhen and Shanghai. Under the Arbitration Law, an arbitral award is final and binding on the parties. If a party fails to comply with an award, the other party to the award may apply to the people's court for enforcement. A people's court may refuse to enforce an arbitral award made by an arbitration commission if there is any procedural irregularity (including irregularity in the composition of the arbitration committee or the giving of an award beyond the scope of the arbitration agreement or the jurisdiction of the arbitration commission).

A party seeking to enforce an arbitral award of a foreign affairs arbitration organ of the PRC against a party who or whose property is not within the PRC may apply to a foreign court with jurisdiction over the case for enforcement. Similarly, an arbitral award made by a foreign arbitration body may be recognised and enforced by the PRC courts in accordance with the principles of reciprocity or any international treaty concluded or acceded to by the PRC. The PRC acceded to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards ("New York Convention") adopted on 10 June, 1958 pursuant to a resolution of the Standing Committee of the NPC passed on 2 December, 1986. The New York Convention provides that all arbitral awards made in a state which is a party to the New York Convention shall be recognised and enforced by other parties to the New York Convention subject to their right to refuse enforcement under certain circumstances including where the enforcement of the arbitral award is against the public policy of the state to which the application for enforcement is made. It was declared by the Standing Committee of the NPC simultaneously with the accession of the PRC that (1) the PRC will only recognise and enforce foreign arbitral awards on the principle of reciprocity; and (2) the PRC will only apply the New York Convention to disputes considered under PRC laws to be arising from contractual and non-contractual mercantile legal relations. Arrangements for reciprocal enforcement of arbitral awards between Hong Kong and China was signed on 18 June, 1999. This new arrangement has been approved by the Supreme People's Court of the PRC and the Hong Kong Legislative Council and became effective on 1 February, 2000. The new arrangement is made in accordance with the spirit of the New York Convention, allowing awards made by PRC arbitral authorities to be enforceable in Hong Kong and awards by Hong Kong arbitral authorities to be enforceable in the PRC.

F. Foreign Exchange Control

Foreign exchange control is implemented through three major regulatory regimes. On 28 December, 1993, the PBOC, with the authorisation of the State Council, issued the Notice on Further Reform of the Foreign Exchange Control System which came into effect on 1 January, 1994. Other major regulations and implementation measures include the Foreign Exchange Control Regulations promulgated by the State Council on 29 January, 1996 and came into effect on 1 April, 1996 (as amended on 14 January, 1997) and the Regulations on the Foreign Exchange Settlement, Sale and Payments which were promulgated on 20 June, 1996 by PBOC and took effect on 1 July, 1996 and which contain detailed provisions regulating the holding, sale and purchase of foreign exchange by enterprises, individuals, economic organizations and social

institutions in the PRC. The PBOC publishes the Renminbi exchange rate against other major currencies. Such rate is to be set by reference to the Renminbi trading price against major currencies on the previous day on the inter-bank foreign exchange market. Generally, the foreign exchange earnings of all PRC enterprises, other than those allowed to be retained by foreign enterprises as recurrent exchange income or specifically exempted under the relevant regulations, are to be sold to designated banks. Retained foreign exchange earnings may need to be kept in foreign exchange bank accounts of designated banks. Capital foreign exchange capital must be deposited in foreign exchange bank accounts maintained at designated banks, and may generally be retained in such account.

At present, control of purchase of foreign exchange is relaxed. Enterprises within the PRC which require foreign exchange for their ordinary trading and non-trading activities, import activities and repayment of foreign debts may purchase foreign exchange from designated banks if the application is supported by relevant documents. Furthermore, foreign investment enterprises that require foreign exchange for dividend payments, such as profit distribution to foreign investors, may draw funds in their foreign exchange bank accounts kept with designated banks after paying due dividend taxes. Should such foreign exchange be insufficient, foreign investment enterprises may purchase foreign exchange from designated banks. While foreign exchange control on current account transactions has been relaxed, the drawdown of foreign currency loans by companies, the provision of foreign exchange guarantees, overseas investments and any other types of capital account transactions that involve the purchase of foreign exchange remain subject to the approval of the State Administration of Foreign Exchange Control. When conducting foreign exchange transactions, the designated banks may, based on the exchange rate published by the POBC and subject to certain limits, freely determine the applicable exchange rate.

2. HONG KONG LAWS AND REGULATIONS

(a) Company Law

The Hong Kong law applicable to a company having share capital incorporated in Hong Kong is based on the Companies Ordinance and is supplemented by common law. The Company, which is a joint stock limited company established in the PRC seeking a listing of H Shares on the Hong Kong Stock Exchange, is governed by the PRC Company Law which came into effect on 1 July 1994 and was amended on 25 December 1999, on 28 August 2004 and on 27 October 2005 and all other rules and regulations promulgated pursuant to the PRC Company Law applicable to a joint stock limited company established in the PRC issuing overseas listed foreign shares to be listed on the Hong Kong Stock Exchange.

Set out below is a summary of the material differences between the Hong Kong company law applicable to a company incorporated in Hong Kong and the PRC Company Law applicable to a joint stock limited company incorporated and existing under the PRC Company Law. This summary is, however, not intended to be an exhaustive comparison:

(i) Corporate existence

Under Hong Kong company law, a company having share capital is incorporated by the Registrar of Companies in Hong Kong issuing a certificate of incorporation and upon its incorporation, a company will acquire an independent corporate existence. A company may be incorporated as a public company or a private company. The articles of association of a private company incorporated in Hong Kong are required by the Companies Ordinance to contain certain pre-emptive provisions. A public company does not contain such pre-emptive provisions in its articles of association.

Under the PRC Company Law, a company may be incorporated by either the promotion method or the public subscription method. A company must have a minimum registered capital of RMB5 million, or

higher as may otherwise be required by the laws and regulations. Hong Kong law does not prescribe any minimum capital requirements for a Hong Kong company. Under the PRC Company Law, the monetary contributions by all the shareholders must not be less than 30% of the registered capital. There is no such restriction on a Hong Kong company under Hong Kong law.

(ii) Share capital

Under Hong Kong law, the authorized share capital of a Hong Kong company is the amount of share capital which the company is authorized to issue and a company is not bound to issue the entire amount of its authorized share capital. For a Hong Kong company, the authorized share capital may be larger than the issued share capital. Hence, the directors of a Hong Kong company may, with the prior approval of the shareholders, if required, cause the company to issue new shares. The PRC Company Law does not recognize the concept of authorized share capital. The registered capital of a joint stock limited company is the amount of the issued share capital. Any increase in registered capital must be approved by the shareholders in general meeting and by the relevant PRC Governmental and regulatory authorities.

(iii) Restrictions on shareholding and transfer of shares

Under PRC law, the domestic shares ("domestic shares") in the share capital of a joint stock limited company which are denominated and subscribed for in Renminbi may only be subscribed or traded by the State, PRC legal and natural persons. The overseas listed foreign shares ("foreign shares") issued by a joint stock limited company which are denominated in Renminbi and subscribed for in a currency other than Renminbi may only be subscribed and traded by investors from Hong Kong, Macau and China Taiwan or any country and territory outside the PRC. Under the PRC Company Law, shares in a joint stock limited company held by its promoters cannot be transferred within one year after the date of establishment of the company. Shares in issue prior to the company's public offering cannot be transferred within one year from the listing date of the shares on the Hong Kong Stock Exchange. Shares in a joint stock limited company held by its directors, supervisors and managers and transferred each year during their term of office shall not exceed 25% of the total shares they held in the company, and the shares they held in the company cannot be transferred within one year from the listing date of the shares, and also cannot be transferred within half a year after the said personnel has left office. The articles of association may set other restrictive requirements on the transfer of the company's shares held by its directors, supervisors and officers. There are no such restrictions on shareholdings and transfers of shares under Hong Kong law.

(iv) Financial assistance for acquisition of shares

The PRC Company Law does not contain any provision prohibiting or restricting a joint stock limited company or its subsidiaries from providing financial assistance for the purpose of an acquisition of its own or its holding company's shares. The Mandatory Provisions contain certain restrictions on a company and its subsidiaries providing such financial assistance similar to those under Hong Kong company law.

(v) Variation of class rights

Under Hong Kong company law, if the share capital of a company is divided into different classes of shares, special rights attaching to any class of shares may only be varied if approved by a specified proportion of the holders of the relevant class. The PRC Company Law does not contain any specific provision relating to variation of class rights. The Mandatory Provisions contain detailed provisions relating to circumstances which are deemed to constitute a variation of class rights. Under the Mandatory Provisions, class rights may not be varied or abrogated unless approved by a special resolution of shareholders in general meeting and by two-thirds or more of the votes cast by shareholders of the affected class present in person or by proxy at a separate

class meeting. For the purpose of a variation of class rights, domestic shares and foreign shares are treated as separate classes of shares except in the case of (i) an issue of shares by the joint stock limited company in any 12 month period either separately or concurrently following the approval by a special resolution of shareholders in general meeting not exceeding 20% of each of the existing domestic shares and foreign shares existing as of the date of such special resolution; and (ii) an issue of domestic shares and foreign shares in accordance with the plan of the company approved by the securities authority and which are completed within 15 months from the date of such approval. See "Appendix IX — Summary of Articles of Association — Variation of Rights of Existing Shares or Classes of Shares."

(vi) Directors

The PRC Company Law, unlike Hong Kong company law, does not contain any requirements relating to the declaration of interests in material contracts, restrictions on interested directors being counted towards the quorum of and voting at a meeting of the board of directors at which a transaction in which a director is interested is being considered, restrictions on directors' authority in making major dispositions, restrictions on companies providing certain benefits such as loans to directors and guarantees in respect of directors liability and prohibition against compensation for loss of office without shareholders' approval. The Mandatory Provisions, however, contain requirements and restrictions in relation to the foregoing matters similar to those applicable under Hong Kong law.

(vii) Supervisory committee

Under the PRC Company Law, the board of directors of a joint stock limited company is subject to the supervision and inspection of a supervisory committee but there is no mandatory requirement for the establishment of a supervisory committee for a company incorporated in Hong Kong. The Mandatory Provisions provide that each supervisor owes a duty, in the exercise of his powers, to act in good faith and honestly in what he considers to be in the best interests of the company and to exercise the care, diligence and skill that a reasonably prudent person would exercise under comparable circumstances.

(viii) Derivative action by minority shareholders

Hong Kong law permits minority shareholders to start a derivative action on behalf of a company against directors who have been guilty of a breach of their fiduciary duties to the company, if such directors control a majority of votes at a general meeting thereby effectively preventing a company from suing the directors in breach of their duties in its own name. The PRC Company Law gives shareholders of a joint stock limited company the right that in the event that the directors and senior managers violate their fiduciary obligations to a company, shareholders individually or jointly holding over 1% of the shares in the company for more than 180 days consecutively may request in writing the supervisory committee to initiate proceedings in the people's court. In the event that the supervisory committee violates their fiduciary obligations to a company, the above said shareholders may request in writing the board of directors to initiate proceedings in the people's court. Upon receipt of such request in writing from the shareholders, if the supervisory committee or the board of directors refuse to initiate such proceedings, or has not initiated proceedings within 30 days upon receipt of the request, or if under urgent situations, failure of initiating immediate proceeding may cause irremediable damages to the company, the above said shareholders shall for the benefit of the company's interests, have the right to initiate proceedings directly to the court in its own name. The Mandatory Provisions further provide remedies to the company against directors, supervisors and officers in breach of their duties to the company. In addition, every director and supervisor of a joint stock limited company applying for a listing of its foreign shares on the Hong Kong Stock Exchange is required to give an undertaking

in favor of the company to comply with the company's articles of association. This allows minority shareholders to act against directors and supervisors in default.

(ix) Protection of minorities

Under Hong Kong law, a shareholder who complains that the affairs of a company incorporated in Hong Kong are conducted in a manner unfairly prejudicial to his interests may petition to court to either wind up the company or make an appropriate order regulating the affairs of the company. In addition, on the application of a specified number of members, the Financial Secretary may appoint inspectors who are given extensive statutory powers to investigate the affairs of a company incorporated in Hong Kong. The PRC law does not contain similar safeguards. The Mandatory Provisions, however, contain provisions to the effect that a controlling shareholder may not exercise its voting rights in a manner prejudicial to the interests of the shareholders generally or of some part of the shareholders of a company to relieve a director or supervisor of his duty to act honestly in the best interests of the company or to approve the expropriation by a director or supervisor of the company's assets or the individual rights of other shareholders.

(x) Notice of shareholders' meetings

Under the PRC Company Law, notice of a shareholders' general meeting must be given 20 days before the meeting, while notice of an extraordinary meeting must be given 15 days before the meeting or, in the case of a company having bearer shares, a public announcement of a shareholders' general meeting must be made 30 days prior to it being held. Under the Special Regulations and the Mandatory Provisions, 45 days' written notice must be given to all shareholders and shareholders who wish to attend the meeting must reply in writing 20 days before the date of the meeting. For a company incorporated in Hong Kong, the minimum notice periods of a general meeting convened for passing an ordinary resolution and a special resolution are 14 days and 21 days, respectively; and the notice period for an annual general meeting is 21 days.

(xi) Quorum for shareholders' meetings

Under Hong Kong law, the quorum for a general meeting is two members unless the articles of association of the company otherwise provide. For one member companies, one member will be a quorum. The PRC Company Law does not specify any quorum requirement for shareholders' general meeting but the Special Regulations and the Mandatory Provisions provide that a company's general meeting can be convened when replies to the notice of that meeting have been received from shareholders whose shares represent 50% of the voting rights in the company at least 20 days before the proposed date of the meeting. If that 50% level is not achieved, the company shall within five days notify shareholders by public announcement and the shareholders' general meeting may be held thereafter.

(xii) Voting

Under Hong Kong law, an ordinary resolution is passed by a simple majority of votes cast by members present in person or by proxy at a general meeting and a special resolution is passed by a majority of not less than three-fourths of votes cast by members present in person or by proxy at a general meeting. Under the PRC Company Law, the passing of any resolution requires more than one half of the votes cast by shareholders present in person or by proxy at a shareholders' general meeting except in cases of proposed amendment to the articles of association, increase or reduction of share capital, and merger, demerger or dissolution of a joint stock limited company or changes to the company status, which require two-thirds or more of votes cast by shareholders present at a shareholders' general meeting.

(xiii) Financial disclosure

A joint stock limited company is required under the PRC Company Law to make available at its office for inspection by shareholders its annual balance sheet, profit and loss account, changes in financial position and other relevant annexures 20 days before the annual general meeting of shareholders. In addition, a company established by the public subscription method under the PRC Company Law must publish its financial situation. The annual balance sheet has to be verified by registered accountants. The Companies Ordinance requires a company to send to every shareholder a copy of its balance sheet, auditors' report and directors' report which are to be laid before the company in its annual general meeting not less than 21 days before such meeting.

A joint stock limited company is required under the PRC law to prepare its financial statements in accordance with the PRC accounting standards. The Mandatory Provisions require that the company must, in addition to preparing accounts according to the PRC standards, have its accounts prepared and audited in accordance with International Accounting Standards or Hong Kong accounting standards and its financial statements must also contain a statement of the financial effect of the material differences (if any) from the financial statements prepared in accordance with the PRC accounting standards.

The Special Regulations require that there should not be any inconsistency between the information disclosed within and outside the PRC and that, to the extent that there are differences in the information disclosed in accordance with the relevant PRC and overseas laws, regulations and requirements of the relevant stock exchanges, such differences should also be disclosed simultaneously.

(xiv) Information on directors and shareholders

Under the PRC Company Law, neither the public nor the shareholders of a joint stock limited company have access to information on its directors and shareholders. Under the Mandatory Provisions, shareholders have the right to inspect and copy (at reasonable charges) certain information about shareholders and directors similar to that available under Hong Kong law to shareholders of a company incorporated in Hong Kong.

(xv) Receiving agent

Under both the PRC and Hong Kong law, dividends once declared become debts payable to shareholders. The limitation period for debt recovery action under Hong Kong law is six years while that under the PRC law is two years. The Mandatory Provisions require the appointment of a trust company registered under the Hong Kong Trustee Ordinance (Chapter 29 of the Laws of Hong Kong) as receiving agent to receive on behalf of holders of foreign shares dividends declared and all other monies owed by a joint stock limited company in respect of such foreign shares.

(xvi) Corporate reorganization

Corporate reorganization involving a company incorporated in Hong Kong may be effected in a number of ways, such as a transfer of the whole or part of the business or property of the company in the course of being wound up voluntarily to another company pursuant to section 237 of the Companies Ordinance or a compromise or arrangement between the company and its creditors or between the company and its members pursuant to section 166 of the Companies Ordinance which requires the sanction of the court, Under PRC law, the merger, demerger, dissolution or change to the status of a joint stock limited company has to be approved by shareholders in general meeting.

(xvii) Arbitration of disputes

In Hong Kong, disputes between shareholders and a company incorporated in Hong Kong or its directors may be resolved through the courts. The Mandatory Provisions provide that such disputes should be submitted to arbitration at either the HKIAC or the CIETAC at the claimant's choice.

(xviii) Mandatory transfers

Under the PRC Company Law, a joint stock limited company is required to make transfers equivalent to certain prescribed percentages of its after tax profit to the statutory common reserve fund. There are no such requirements under Hong Kong law.

(b) Hong Kong Listing Rules

The Hong Kong Listing Rules provide additional requirements which apply to an issuer which is incorporated in the PRC as a joint stock limited company and seeks a primary listing or whose primary listing is on the Hong Kong Stock Exchange. Set out below is a summary of such principal additional requirements which apply to the Company:

(i) Accountants' report

An accountants' report for a PRC issuer will not normally be regarded as acceptable by the Hong Kong Stock Exchange unless the relevant accounts have been audited to a standard comparable to that required in Hong Kong. Such report will normally be required to conform to either Hong Kong or international accounting standards.

(ii) Process agent

The Company is required to appoint and maintain a person authorized to accept service of process and notices on its behalf in Hong Kong throughout the period during which its securities are listed on the Hong Kong Stock Exchange and must notify the Hong Kong Stock Exchange of his appointment, the termination of his appointment and his contact particulars.

(iii) Public shareholdings

If at any time there are existing issued securities of a PRC issuer other than foreign shares ("H shares") which are listed on the Hong Kong Stock Exchange, the Hong Kong Listing Rules require that all H shares must be held by the public, the H shares must represent not less than 10% of the PRC issuer's issued share capital and the aggregate amount of H shares and other securities held by the public must constitute not less than 25% of the PRC issuer's issued share capital. If the PRC issuers do not have existing issued securities other than H shares, the H shares must constitute not less than 25% of the issuer's issued share capital unless the expected market value of the H shares at the time of listing is over HK$10,000 million in which case, the Hong Kong Stock Exchange will normally accept a prescribed percentage of between 15% and 25%.

(iv) Independent non-executive directors and supervisors

The independent non-executive directors of a PRC issuer are required to demonstrate an acceptable standard of competence and adequate commercial or professional expertise to ensure that the interests of the general body of shareholders will be adequately represented. The supervisors of a PRC issuer must have the character, expertise and integrity and be able to demonstrate a standard of competence commensurate with their position as supervisors.

(v) Restrictions on purchase and subscription of its own securities

Subject to governmental approvals and the provisions of the Articles of Association, the Company may repurchase its own H shares on the Hong Kong Stock Exchange in accordance with the provisions of the Hong Kong Listing Rules. Approval by way of special resolution of the holders of domestic shares and the holders of H shares at separate class meetings conducted in accordance with the Articles of Association is required for share repurchases. In seeking approvals, the Company is required to provide information on any proposed or actual purchases of all or any of its equity securities, whether or not listed or traded on the Hong Kong Stock Exchange. The Directors must also state the consequences of any purchases which will arise under either or both of the Code on Takeovers and Mergers and any similar PRC law of which the directors are aware, if any. Any general mandate given to the directors to repurchase H shares must not exceed 10% of the total amount of existing issued H shares of the Company.

(vi) Mandatory Provisions

With a view to increasing the level of protection afforded to investors, the Hong Kong Stock Exchange requires the incorporation, in the articles of association of a PRC company whose primary listing is on the Hong Kong Stock Exchange, of the Mandatory Provisions and provisions relating to the change, removal and resignation of auditors, class meetings and the conduct of the supervisory committee of the Company. Such provisions have been incorporated into the Articles of Association, a summary of which is set out in Appendix IX to this Prospectus.

(vii) Redeemable Shares

The Company must not issue any redeemable shares unless the Hong Kong Stock Exchange is satisfied that the relative rights of the holders of the H shares are adequately protected.

(viii) Pre-emptive rights

Except in the circumstances mentioned below, the Directors are required to obtain the approval by a special resolution of shareholders in general meeting, and the approvals by special resolutions of the holders of domestic shares and H shares (each being otherwise entitled to vote at general meetings) at separate class meetings conducted in accordance with the Articles of Association, prior to (1) authorizing, allotting, issuing or granting shares or securities convertible into shares, or options, warrants or similar rights to subscribe for any shares or such convertible securities; or (2) any major subsidiary of the Company making any such authorization, allotment, issue or grant so as materially to dilute the percentage equity interest of the Company and its shareholders in such subsidiary.

No such approval will be required, but only to the extent that, the existing shareholders of the Company have by special resolution in general meeting given a mandate to the Directors, either unconditionally or subject to such terms and conditions as may be specified in the resolution, to authorize, allot or issue, either separately or concurrently once every 12 months, not more than 20% of the existing Domestic Shares and H Shares as of the date of the passing of the relevant special resolution or of such shares that are part of the Company's plan at the time of its establishment to issue Domestic Shares and H Shares and which plan is implemented within 15 months from the date of approval by the CSRC.

(ix) Supervisors

The Company is required to adopt rules governing dealings by its Supervisors in securities of the Company in terms no less exacting than those of the model code (set out in Appendix 10 to the Hong Kong Listing Rules) issued by the Hong Kong Stock Exchange.

The Company is required to obtain the approval of its shareholders in a general meeting (at which the relevant Supervisor and his associates shall not vote on the matter) prior to the Company or any of its subsidiaries entering into a service contract of the following nature with a Supervisor or proposed Supervisor of the Company or its subsidiary: (i) the contract is for a duration that may exceed three years; or (ii) the contract expressly requires the Company to give more than one year's notice or to pay compensation or make other payments equivalent to more than one year's emoluments.

The remuneration committee of the Company or an independent board committee must form a view in respect of service contracts that require shareholders' approval and advise shareholders (other than shareholders with a material interest in the service contracts and their associates) as to whether the terms are fair and reasonable, advise whether such contracts are in the interests of the Company and its shareholders as a whole and advise shareholders on how to vote.

(x) Amendment to the Articles of Association

The Company is required not to permit or cause any amendment to be made to its Articles of Association which would cause the same to cease to comply with the mandatory provisions of the Hong Kong Listing Rules relating to such Articles of Association.

(xi) Documents for inspection

The Company is required to make available at a place in Hong Kong for inspection by the public and shareholders free of charge, and for copying by shareholders at reasonable charges the following:

- a complete duplicate register of shareholders;
- a report showing the state of the issued share capital of the Company;
- the Company's latest audited financial statements and the reports of the Directors, auditors and Supervisors (if any) thereon;
- special resolutions of the Company;
- reports showing the number and nominal value of securities repurchased by the Company since the end of the last financial year, the aggregate amount paid for such securities and the maximum and minimum prices paid in respect of each class of securities repurchased (with a breakdown between Domestic Shares and H Shares);
- a copy of the latest annual return filed with the State Administration of Industry and Commerce of the PRC; and
- for shareholders only, copies of minutes of meetings of shareholders.

(xii) Receiving agents

The Company is required to appoint one or more receiving agents in Hong Kong and pay to such agent(s) dividends declared and other monies owing in respect of the H Shares to be held, pending payment, in trust for the holders of such H Shares.

(xiii) Statements in share certificates

The Company is required to ensure that all its listing documents and share certificates include the statements stipulated below and to instruct and cause each of its share registrars not to register the subscription, purchase or transfer of any of its shares in the name of any particular holder unless and until such

holder delivers to such share registrar a signed form in respect of such shares bearing statements to the following effect that the acquirer of shares:

- agrees with the Company and each shareholder of the Company, and the Company agrees with each shareholder of the Company, to observe and comply with the PRC Company Law, the Special Regulations, the Articles of Association and other relevant laws and administrative regulations;
- agrees with the Company, each shareholder, Director, Supervisor, manager and officer of the Company, and the Company acting for itself and for each Director, Supervisor, manager and officer of the Company agrees with each shareholder, to refer all differences and claims arising from the Articles of Association or any rights or obligations conferred or imposed by the PRC Company Law or other relevant laws and administrative regulations concerning the affairs of the Company to arbitration in accordance with the Articles of Association, and any reference to arbitration shall be deemed to authorize the arbitration tribunal to conduct hearings in open session and to publish its award. Such arbitration shall be final and conclusive;
- agrees with the Company and each shareholder of the Company that the H Shares are freely transferable by the holder thereof; and
- authorizes the Company to enter into a contract on his behalf with each Director and officer of the Company whereby each such Director and officer undertakes to observe and comply with his obligation to shareholders as stipulated in the Articles of Association.

(xiv) Compliance with the PRC Company Law, the Special Regulations and the Articles of Association

The Company is required to observe and comply with the PRC Company Law, the Special Regulations and the Articles of Association.

(xv) Contract between the Company and its Directors, officers and Supervisors

The Company is required to enter into a contract in writing with every Director and officer containing at least the following provisions:

- an undertaking by the Director or officer to the Company to observe and comply with the PRC Company law, the Special Regulations, the Articles of Association, the Codes on Takeovers and Mergers and Share Repurchases and an agreement that the Company shall have the remedies provided in the Articles of Association and that neither the contract nor his office is capable of assignment;
- an undertaking by the Director or officer to the Company acting as agent for each shareholder to observe and comply with his obligations to shareholders as stipulated in the Articles of Association;
- an arbitration clause which provides that whenever any differences or claims arise from that contract, the Articles of Association or any rights or obligations conferred or imposed by the PRC Company Law or other relevant law and administrative regulations concerning the affairs of the Company between the Company and its Directors or officers and between a holder of H Shares and a Director or officer of the Company, such differences or claims will be referred to arbitration at either the CIETAC in accordance with its rules or the HKIAC in accordance with its Securities Arbitration Rules, at the election of the claimant and that once a claimant refers a dispute or claim to arbitration, the other party must submit to the arbitral body elected by the claimant. Such arbitration will be final and conclusive;

- if the party seeking arbitration elects to arbitrate the dispute or claim at HKIAC, then either party may apply to have such arbitration conducted in Shenzhen according to the Securities Arbitration Rules of HKIAC;
- PRC laws shall govern the arbitration of disputes or claims referred to above, unless otherwise provided by law or administrative regulations;
- the award of the arbitral body is final and shall be binding on the parties thereto;
- the agreement to arbitrate is made by the Director or officer with the Company on its own behalf and on behalf of each shareholder; and
- any reference to arbitration shall be deemed to authorize the arbitral tribunal to conduct hearings in open session and to publish its award.

The Company is also required to enter into a contract in writing with every Supervisor containing statements in substantially the same terms.

(xvi) Subsequent listing

The Company must not apply for the listing of any of its foreign shares on a PRC stock exchange unless the Hong Kong Stock Exchange is satisfied that the relative rights of the holders of foreign shares are adequately protected.

(xvii) English translation

All notices or other documents required under the Hong Kong Listing Rules to be sent by the Company to the Hong Kong Stock Exchange or to holders of H Shares are required to be in the English language, or accompanied by a certified English translation.

(xviii) General

If any change in the PRC law or market practices materially alters the validity or accuracy of any of the basis upon which the additional requirements have been prepared, then the Hong Kong Stock Exchange may impose additional requirements or make listing of the equity securities of a PRC issuer, including the Company, subject to special conditions as the Hong Kong Stock Exchange considers appropriate. Whether or not any such changes in the PRC law or market practices occur, the Hong Kong Stock Exchange retains its general power under the Hong Kong Listing Rules to impose additional requirements and make special conditions in respect of the Listing.

(c) Other Legal and Regulatory Provisions

Upon listing, the provisions of the Securities and Futures Ordinance, the Codes on Takeovers and Mergers and Share Repurchases and such other relevant ordinances and regulations as may be applicable to companies listed on the Hong Kong Stock Exchange will apply to the Company.

(d) Securities Arbitration Rules

The Articles of Association provide that certain claims arising from the Articles of Association or the PRC Company Law shall be arbitrated at either the CIETAC or the HKIAC in accordance with their respective rules. The Securities Arbitration Rules of the HKIAC contain provisions allowing an arbitral tribunal to conduct a hearing in Shenzhen for cases involving the affairs of companies incorporated in the PRC and listed on the Hong Kong Stock Exchange so that PRC parties and witnesses may attend. Where any party applies for a hearing to take place in Shenzhen, the tribunal shall, where satisfied that such application is based on bona fide grounds, order the hearing to take place in Shenzhen conditional upon all parties including

witnesses and the arbitrators being permitted to enter Shenzhen for the purpose of the hearing. Where a party (other than a PRC party) or any of its witnesses or any arbitrator is not permitted to enter Shenzhen, then the tribunal shall order that the hearing be conducted in any practicable manner, including the use of electronic media. For the purpose of the Securities Arbitration Rules, a PRC party means a party domiciled in the PRC other than the territories of Hong Kong, Macau and China Taiwan.

PRC LEGAL MATTERS

Beijing Jia Yuan Law Firm, the Company's legal adviser on PRC law, has sent to the Company a letter dated 1 November 2006 confirming that it has reviewed the summaries of PRC company and securities regulations and the summaries of certain material differences between the Hong Kong company law and the PRC company law in so far as they relate to PRC law as contained in this Appendix and that, in its opinion, such summaries are correct summaries of relevant PRC laws and regulations. This letter is available for inspection as referred to in the section of this Prospectus headed "Documents Delivered to the Registrar of Companies and Available for Inspection" in Appendix XI.

Any person wishing to have detailed advice on PRC law and the laws of any jurisdiction with which he is more familiar is recommended to seek independent legal advice.

This Appendix contains a summary of our Articles of Association. The principal objective is to provide potential investors with an overview of our Articles of Association. As the information contained below is a summary form, it does not contain all the information that may be important to potential investors. As stated in the paragraph headed "Documents Delivered to the Registrar of Companies and Available for Inspection" in Appendix XI, a copy of the Articles of Association is available for inspection.

Our Articles of Association and relevant amendments thereto were adopted or authorized by our shareholders in general shareholders' meetings in accordance with applicable laws and regulations, including the PRC Company Law, the Securities Law of the PRC, the Opinion Letter Regarding Supplementary Amendments to Articles of Association of Companies Limited by Shares Seeking Listing in Hong Kong, the Special Regulations, the Mandatory Provisions and the Hong Kong Listing Rules.

Directors and Other Officers

Power to Allot and Issue Shares

There is no provision in the Articles of Association empowering the Directors to allot and issue Shares.

To increase the capital of our Company, the Board is responsible for formulating proposals for approval at a shareholders' general meeting by way of special resolution. Any such increase must be conducted in accordance with the procedures stipulated by the relevant laws and administrative regulations.

Power to Dispose of the Assets of our Company or any Subsidiary

The Board is accountable to the shareholders' general meeting.

The Board shall not, without the prior approval or consent of shareholders' general meeting, dispose or agree to dispose of, any fixed assets of our Company where the anticipated value of the assets to be disposed, together with the value of any fixed assets of our Company that has been disposed in the period of four (4) months immediately preceding the proposed disposition, exceeds 33% of the value of our Company's fixed assets as shown in the last balance sheet placed before the shareholders' general meeting.

The validity of a disposition by our Company of fixed assets shall not be affected by the breach of the above paragraph.

For the purposes of the Articles of Association, a disposition of fixed assets includes an act involving the transfer of an interest in assets but does not include the provision of fixed assets as security.

The Board shall carry its duties in compliance with the laws, regulations, the Articles of Association and resolutions passed by the shareholders' general meetings.

Emoluments and Compensation or Payments for Loss of Office

Our Company shall, with the prior approval of shareholders' general meeting, enter into a contract in writing with each of the Directors or Supervisors wherein his or her emoluments are stipulated. The aforesaid emoluments include:

(1) emoluments in respect of his or her service as a Director, Supervisor or senior executive officer of our Company;

(2) emoluments in respect of his service as a Director, Supervisor or senior executive officer of any subsidiary of our Company;

(3) emoluments in respect of other service the management of our Company and any subsidiary of our Company;

(4) payment by way of compensation for loss of office, or as consideration for or in connection with his retirement from office.

Except under the contract entered into in accordance with the foregoing, no proceedings may be brought by a Director or Supervisor against our Company for any benefit due to him in respect of the above matters.

The contracts concerning the emoluments between our Company and its Directors or Supervisors should provide that, in the event of an acquisition of our Company, the Directors and Supervisors shall, subject to the prior approval of the shareholders' general meeting, have the right to receive compensation or other payment in respect of his loss of office or retirement. An "acquisition of our Company" referred to in this paragraph means either:

(1) an offer made by any person to all shareholders; or

(2) an offer made by any person with a view to the offeror becoming a "controlling shareholder" within the meaning set out in the Articles of Association (see the section headed "Rights of the Minorities in Relation to Fraud or Oppression" below).

If the relevant Director or Supervisor does not comply with the above, any sum so received by him shall belong to those persons who have sold their Shares as a result of the offer made. The expenses incurred in distributing such sum pro rata amongst those persons shall be borne by the relevant Director or Supervisor and not paid out of that sum.

Loans to Directors, Supervisors and Other Officers

Our Company shall not directly or indirectly make a loan to, or provide any guarantee in connection with the making of a loan to a Director, Supervisor, our President or other senior executive officer of our Company or of our Company's holding company or any of their respective associates. However, the following transactions are not subject to such prohibition:

- the provision by our Company of a loan or a guarantee of a loan to a company which is a subsidiary of our Company;
- the provision by our Company of a loan or a guarantee in connection with the making of a loan or any other funds to any of its Directors, Supervisors, our President and other senior executive officers for them to pay for expenditure incurred or to be incurred by him for the purposes of our Company or for the purpose of enabling him to perform his duties properly, in accordance with the terms of a service contract approved by the shareholders' general meeting; and
- Our Company may make a loan to or provide a guarantee in connection with the making of a loan to any of the relevant Directors, Supervisors, our President and other senior executive officers or their respective associates on normal commercial terms, provided that the ordinary course of business of our Company includes the lending of money or the giving of guarantees.

A loan made by our Company in breach of the above provisions shall be forthwith repayable by the recipient of the loan regardless of the terms of the loan.

A guarantee provided by our Company in breach of the above provisions shall be unenforceable against our Company, unless:

1. the guarantee was provided in connection with a loan to an associate of any of the Directors, Supervisors, our President and other senior executive officers of our Company or of our Company's holding company and at the time the loan was advanced the lender did not know the relevant circumstances; or

2. the collateral provided by our Company has been lawfully disposed of by the lender to a bona fide purchaser.

For these purposes:

(a) a guarantee includes an undertaking or property provided to secure the performance of obligations by the obligor; and

(b) a definition of an associate as referred to in sub-section headed "Duties" below applies, mutatis mutandis, to this provision.

Financial Assistance for the Acquisition of Shares in our Company or any Subsidiary

Subject to the exceptions in the Articles of Association, our Company and our subsidiaries shall not, by any means at any time, provide any kind of financial assistance (as defined below) to a person who is acquiring or is proposing to acquire shares of our Company. The said acquirer of shares of our Company includes a person who directly or indirectly incurs any obligations (as defined below) due to the acquisition of the shares. Our Company and our subsidiaries shall not, by any means at any time, provide financial assistance to the said acquirer as referred to above for the purpose of reducing or discharging the obligations assumed by that person.

The following activities shall not be deemed to be prohibited activities:

- the provision of financial assistance by our Company where the financial assistance is given in good faith in the interest of our Company, and the principal purpose in giving the financial assistance is not for the acquisition of shares in our Company, or the giving of the financial assistance is an incidental part of some larger purpose of our Company;

- the lawful distribution of our Company's assets by way of dividend in accordance with law;

- the allotment of bonus shares as dividends;

- a reduction of registered capital, a repurchase of shares of our Company or a reorganization of the share capital structure of our Company effected in accordance with these Articles of Association;

- the lending of money by our Company in the ordinary course of its business, where the lending of money is part of the scope of business of our Company (provided that the net assets of our Company are not thereby reduced or that, to the extent that the assets are thereby reduced, the financial assistance is provided out of distributable profits); and

- the provision of money by our Company for contributions to staff and workers' shares schemes (provided that the net assets of our Company are not thereby reduced or that, to the extent that the assets are thereby reduced, the financial assistance is provided out of distributable profits).

For these purposes:

(a) "financial assistance" includes (without limitation) the following meanings:

(1) gift;

(2) guarantee (including the assumption of liability by the guarantor or the provision of assets by the guarantor to secure the performance of obligations by the obligor), or compensation (other than compensation in respect of our Company's own default) or release or waiver of any rights;

(3) provision of loan or any other agreement under which the obligations of our Company are to be fulfilled before the obligations of another party, or a change in the parties to, or the novation of, or the assignment of rights arising under, such loan or agreement; or

(4) any other form of financial assistance given by our Company when our Company is unable to pay its debts or has no net assets or when its net assets would thereby be reduced to a material extent.

(b) "incurring an obligation" includes the incurring of obligations by the changing of the obligor's financial position by way of contract or the making of an arrangement (whether enforceable or not, and whether made on its own account or with any other persons), or by any other means.

Disclosure of Interests in Contracts with our Company or any of its Subsidiaries

Where a Director, Supervisor, our President or other senior executive officer of our Company is in any way, directly or indirectly, materially interested in a contract, transaction or arrangement or proposed contract, transaction or arrangement with our Company, (other than his contract of service with our Company), he shall declare the nature and extent of his interests to the Board at the earliest opportunity, whether or not the contract, transaction or arrangement or proposal therefor is otherwise subject to the approval of the Board under normal circumstances.

Unless the interested Director, Supervisor, President or other senior executive officer discloses his interests in accordance with the Articles of Association and the contract, transaction or arrangement is approved by the Board at a meeting in which the interested Director, Supervisor, President or other senior executive officer is not counted in the quorum and refrains from voting, a contract, transaction or arrangement in which that Director, Supervisor, our President or other senior executive officer is materially interested is voidable at the instance of our Company except as against a bona fide party thereto acting without notice of the breach of duty by the interested Director, Supervisor, our President or other senior executive officer.

For these purposes, a Director, Supervisor, our President or other senior executive officer of our Company is deemed to be interested in a contract, transaction or arrangement in which an associate of his/hers is interested.

Where a Director, Supervisor, our President or other senior executive officer of our Company gives to the Board a general notice in writing stating that, by reason of the facts specified in the notice, he is interested in contracts, transactions or arrangements of any description, which may subsequently be made by our Company, such notice shall be deemed for the purposes of this paragraph to be a sufficient declaration of his interests, so far as the content stated in such notice is concerned, provided that such general notice shall have been given before the date on which the question of entering into the relevant contract, transaction or arrangement is first taken into consideration on behalf of our Company.

Remuneration

The remuneration of Directors must be approved by the shareholders' general meeting, as referred to under the section headed "Emoluments, Compensation or Payments for Loss of Office" above.

Appointment, Removal and Retirement

The term of office of the chairman of the Board and the other Board members shall be three years. If the term of appointment of a Director expires and he is re-elected, the Director may be reappointed for consecutive terms.

Directors shall be elected and removed by the shareholders' general meeting. A written notice of the intention to propose a person for election as director and a notice in writing by that person indicating his acceptance of such election is required to be given to our Company not earlier than the date of notice but no later than 7 days before the day of meeting.

The Board shall consist of 9 Directors, of which 5 shall be independent non-executive Directors. The Board shall have one chairman and one vice-chairman. The chairman and vice-chairman shall be elected and removed by a majority of all of the Directors. A Director is not required to hold shares of our Company.

A person may not serve as a Director, Supervisor, our President and any other senior executive officer of our Company if any of the following circumstances apply:

- a person without legal or with restricted legal capacity;
- a person who has committed an offence of corruption, bribery, infringement of property, misappropriation of property or sabotaging the social economic order and has been punished because of committing such offence; or who has been deprived of his political rights, in each case where no more than five (5) years has elapsed since the date of the completion of implementation of such punishment or deprivation;
- a person who is a former director, factory manager or manager of a company or enterprise which has entered into insolvent liquidation because of mismanagement and he is personally liable for the insolvency of such company or enterprise, where no more than three (3) years has elapsed since the date of the completion of the insolvency and liquidation of such company or enterprise;
- a person who is a former legal representative of a company or enterprise which had its business license revoked due to a violation of the law and who incurred personal liability, where no more than three (3) years has elapsed since the date of the revocation of the business license;
- a person who has a relatively large amount of debts due and outstanding;
- a person who is under criminal investigation or prosecution by judicial organization for violation of the criminal law which investigation or prosecution is not yet concluded;
- a person who is not eligible for enterprise leadership according to laws and administrative regulations;
- a non-natural person;
- a person convicted of the contravention of provisions of relevant securities regulations by a relevant government authority, and such conviction involves a finding that he has acted

fraudulently or dishonestly, where less than five (5) years has elapsed since the date of the conviction; or

- a person who is a public servant.

There is no provision in our Articles of Association which imposes any age limit for Directors beyond which retirement as a Director is mandatory.

The validity of an act of a Director, our President or other senior executive officer on behalf of our Company is not, vis-à-vis a bona fide third party, affected by any irregularity in his office, election or any defect in his qualification.

Borrowing Powers

Subject to compliance with applicable laws and regulations of the PRC, our Company has the power to raise and borrow money, which power includes, without limitation, the issue of debentures, the charging or mortgaging of part or whole of our Company's business or properties and other rights permitted by PRC laws and administrative regulations. The Articles of Association do not contain any specific provision in respect of the manner in which borrowing powers may be exercised by the Directors nor do they contain any specific provision in respect of the manner in which such powers may be varied, other than: (a) provisions which give the Directors the power to formulate proposals for the issuance of debentures by our Company; and (b) provisions which provide that the issuance of debentures must be approved by the shareholders' general meeting by way of a special resolution.

Duties

In addition to obligations imposed by laws, administrative regulations or required by the stock exchanges on which Shares are listed, each of our Company's Directors, Supervisors, our President and other senior executive officers owes a duty to each shareholder, in the exercise of the functions and powers of our Company entrusted to him:

- not to cause our Company to exceed the scope of the business stipulated in its business license;
- to act honestly in the best interest of our Company;
- not to expropriate in any guise our Company's property, including (without limitation) usurpation of opportunities advantageous to our Company; and
- not to expropriate the individual rights of shareholders, including (without limitation) rights to distribution and voting rights, save pursuant to a restructuring of our Company submitted to shareholders' general meeting for approval in accordance with the Articles of Association.

Each of our Company's Directors, Supervisors, our President and other senior executive officers owes a duty, in the exercise of his powers and discharge of his duties, to exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances. Each of our Company's Directors, Supervisors, our President and other senior executive officers shall exercise his powers or carry on his duties in accordance with the principle of fiduciary and shall not put himself in a position where his duty and his interest may conflict. This principle includes (without limitation) discharging the following obligations:

- to act honestly in the best interests of our Company;
- to exercise powers within the scope of his powers and not to exceed those powers;

- to exercise the discretion vested in him personally and not to allow himself to act under the control of another and, unless and to the extent permitted by laws, administrative regulations or with the informed consent of shareholders' general meeting, not to delegate the exercise of his discretion;
- to treat shareholders of the same class equally and to treat shareholders of different classes fairly;
- except in accordance with the Articles of Association or with the informed consent of shareholders' general meeting, not to enter into any contract, transaction or arrangement with our Company;
- without the informed consent of shareholders' general meeting, not to use our Company's property for his own benefit;
- not to exploit his position to accept bribes or other illegal income or expropriate our Company's property by any means, including (without limitation) opportunities advantageous to our Company;
- without the informed consent of shareholders' general meeting, not to accept commissions in connection with our Company's transactions;
- to abide by the Articles of Association, faithfully execute his official duties and protect our Company's interests, and not to exploit his position and power in our Company to advance his own private interests;
- not to compete with our Company in any form unless with the informed consent of shareholders' general meeting;
- not to misappropriate our Company's funds or lend such funds to others, not to open accounts in his own name or other names for the deposit of our Company's assets and not to provide a guarantee for debts of a shareholder of our Company or other individual(s) with our Company's assets; and
- unless otherwise permitted by informed shareholders' general meeting, to keep in confidence information acquired by him in the course of and during his tenure and not to use the information other than in furtherance of the interests of our Company, save that disclosure of such information to the court or other governmental authorities is permitted if: (i) disclosure is made under compulsion of law; (ii) the interests of the public require disclosure; (iii) the interests of the relevant Director, Supervisor, our President or other senior executive officer require disclosure.

Each Director, Supervisor, our President or other senior executive officer of our Company shall not cause the following persons or institutions ("associates") to do what he is prohibited from doing:

(1) the spouse or minor child of that Director, Supervisor, our President or other senior executive officer;

(2) a person acting in the capacity of trustee of that Director, Supervisor, our President or other senior executive officer or any person referred to in the preceding paragraph;

(3) a person acting in the capacity of partner of that Director, Supervisor, our President or other senior executive officer or any person referred to in paragraphs (1) and(2) above;

(4) a company in which that Director, Supervisor, our President or other senior executive officer, alone or jointly with one or more persons referred to in paragraphs (1), (2) and (3) above and

other Directors, Supervisors, our President and other senior executive officers have a de facto controlling interest; and

(5) the directors, supervisors, general manager and other senior executive officers of the controlled company referred to in the preceding paragraph.

The fiduciary duties of the Directors, Supervisors, our President and other senior executive officers of our Company do not necessarily cease with the termination of their tenure. The duty of confidence in relation to trade secrets of our Company survives the termination of their tenure. Other duties may continue for such period as fairness may require depending on the time lapse between the termination and the act concerned and the circumstances under which the relationships between them and our Company are terminated.

In addition to any rights and remedies provided by the laws and administrative regulations, where a Director, Supervisor, President or other senior executive officer of our Company is in breach of his duties to our Company, our Company has a right to:

- claim damages from the Director, Supervisor, our President or other senior executive officer in compensation for losses sustained by our Company as a result of such breach;
- rescind any contract or transaction entered into by our Company with the Director, Supervisor, our President or other senior executive officer or with a third party (where such third party knows or should know that there is such a breach of duties by such Director, Supervisor, our President or other senior executive officer);
- demand an account of the profits made by the Director, Supervisor, our President or other senior executive officer in breach of his duties;
- recover any funds received by the Director, Supervisor, our President or other senior executive officer that should have been received by our Company, including (without limitation) commissions;
- demand payment of the interest earned or which may have been earned by the Director, Supervisor, our President or other senior executive officer on the funds that should have been paid to our Company; and
- take legal actions to obtain judgment that our Company should own the properties earned by the Director, Supervisor, our President or other senior executive officer in breach of his duties.

Subject to the Articles of Association, a Director, Supervisor, our President or other senior executive officer of our Company may be relieved of liability for specific breaches of his duty by the informed consent of shareholders' general meeting.

Alterations to Constitutional Documents

Our Company may amend its Articles of Association in accordance with the requirements of law, administrative regulation and the Articles of Association.

Amendments to the Articles of Association involving the contents of the Mandatory Provisions shall become effective upon approvals by the companies approving department authorized by the State Council and securities authority of the State Council. If there is any change relating to the registered particulars of our Company, application shall be made for registration of the changes in accordance with law.

Variation of Rights of Existing Shares or Classes of Shares

Holders of Domestic Shares and holders of overseas listed foreign Shares of the Company shall be considered as different classes of shareholders.

Under the recently amended Company Law, all the existing Domestic Shares may not be transferred within a period of one year from the date of the Listing of H Shares on the Stock Exchange. Under the Articles of Association, it is provided that upon approval of the State Council or its authorized supervisory departments and subject to the requirements of the Stock Exchange, the Domestic Shares may be converted into H Shares.

Rights conferred on any class of shareholders in the capacity of shareholders ("class rights") may not be varied or abrogated unless approved by a special resolution of shareholders' general meeting and by holders of Shares of that class at a separate meeting conducted in accordance with the Articles of Association.

Upon the approval of the State Council or its authorized approving authority, the domestic ordinary shares of our Company may be totally or partially transferred or converted to foreign investment shares and become publicly tradable and listed on any overseas stock exchange. Unless the regulatory authorities of the place of listing requires otherwise, the transfer or conversion of the shares of our Company held by domestic shareholders to foreign investment shares and their listing on any overseas stock exchange will not require the approval of separate class meeting of our Company.

The following circumstances shall be deemed to be a variation or abrogation of the class rights of a class:

(1) to increase or decrease the number of Shares of such class, or to increase or decrease the number of Shares of a class having voting or equity rights or privilege equal or superior to those of the Shares of such class, except for where Shares of our Company held on our Domestic Share register may be transferred to overseas investors, and such transferred Shares may be listed or traded on an overseas stock exchange, subject to the approval of the securities authorities of the State Council;

(2) to effect an exchange of all or part of the Shares of such class into Shares of another class or to effect an exchange or create a right of exchange of all or part of the Shares of another class into the Shares of such class, except for where Shares of our Company held on our Domestic Share register may be transferred to overseas investors, and such transferred Shares may be listed or traded on an overseas stock exchange, subject to the approval of the securities authorities of the State Council;

(3) to remove or reduce rights to accrued dividends or rights to cumulative dividends attached to Shares of such class;

(4) to reduce or remove a dividend preference or a liquidation preference attached to Shares of such class;

(5) to add, remove or reduce conversion privileges, options, voting rights, transfer or pre-emptive rights, or rights to acquire securities of our Company attached to Shares of such class;

(6) to remove or reduce rights to receive payment payable by our Company in particular currencies attached to Shares of such class;

(7) to create a new class of Shares having voting or equity rights or privileges equal or superior to those of the Shares of such class;

(8) to restrict the transfer or ownership of the Shares of such class or add to such restriction;

(9) to allot and issue rights to subscribe for, or convert into, shares in our Company of such class or another class;

(10) to increase the rights or privileges of Shares of another class;

(11) to restructure our Company where the proposed restructuring will result in different classes of shareholders bearing a disproportionate burden of such proposed restructuring; and

(12) to vary or abrogate provisions in chapter 9 of the Articles of Association.

Shareholders of the affected class, whether or not otherwise having the right to vote at shareholders' general meetings, shall nevertheless have the right to vote at class meetings in respect of matters concerning paragraphs (2) to (8), (11) and (12) above, but interested shareholder(s) (as defined below) shall not be entitled to vote at class meetings.

Resolutions of a class of shareholders shall be passed by votes representing more than two-thirds of the voting rights of shareholders of that class represented at the relevant meeting who are entitled to vote at class meetings.

Written notice of a class meeting shall be given forty-five (45) days before the date of the class meeting to notify all of the shareholders in the share register of the class of the matters to be considered and the date and the place of the class meeting. A shareholder who intends to attend the class meeting shall deliver his written reply concerning attendance at the class meeting to our Company twenty (20) days before the date of the class meeting.

If the number of Shares carrying voting rights at the meeting represented by the shareholders who intend to attend the class meeting reaches one half or more of the voting Shares at the class meeting, our Company may hold the class meeting; if not, our Company shall within five (5) days notify the shareholders of the class, again by public notice, of the matters to be considered, the date and the place for the class meeting. Our Company may then hold the class meeting after publication of such notice.

Notice of class meetings need only be served on shareholders entitled to vote thereat.

Meetings of any class of shareholders shall be conducted in a manner as similar as possible to that of general meetings of shareholders. The provisions of the Articles of Association relating to the manner of conducting any shareholders' general meeting shall apply to any meeting of a class of shareholders. Holders of domestic-invested Shares and foreign-invested Shares are deemed to be shareholders of different classes.

The special procedures for voting at a class of shareholders shall not apply in the following circumstances:

(1) where our Company issues, upon the approval by a special resolution of its shareholders' general meeting, either separately or concurrently once every twelve months, not more than 20% of each of its existing issued domestic-invested Shares and overseas-listed foreign-invested Shares;

(2) where our Company's plan to issue domestic-invested Shares and overseas-listed foreign-invested Shares at the time of its establishment is carried out within fifteen (15) months from the date of approval of the securities authority of the State Council; or

(3) where upon the approval from the relevant State Council securities regulatory authority, the domestic shareholders of our company may transfer the domestic shares held thereby to overseas investors and such transferred shares may be listed or traded on an overseas stock exchange.

For the purposes of the class rights provisions of the Articles of Association, the meaning of "interested shareholder(s)" is:

(1) in the case of a repurchase of Shares by offers to all shareholders pro rata or public dealing on a stock exchange, a "controlling shareholder" within the meaning of the Articles of Association;

(2) in the case of a repurchase of Shares by an off-market contract, a holder of the Shares to which the proposed contract relates; and

(3) in the case of a restructuring of our Company, a shareholder within a class who bears less than a proportionate burden imposed on that class under the proposed restructuring or who has an interest in the proposed restructuring different from the interest of shareholders of that class.

Resolutions — Majority Required

Resolutions of shareholders' general meetings shall be divided into ordinary resolutions and special resolutions.

To adopt an ordinary resolution, votes representing one half or more of the voting rights represented by the shareholders (including proxies) present at the meeting must be exercised in favor of the resolution in order for it to be passed.

To adopt a special resolution, votes representing two-thirds or more of the voting rights represented by the shareholders (including proxies) present at the meeting must be exercised in favor of the resolution in order for it to be passed.

Voting Rights (generally, on a poll and right to demand a poll)

The ordinary shareholders of our Company have the right to attend or appoint a proxy to attend shareholders' general meetings and to vote thereat. A shareholder (including proxy) when voting at a shareholders' general meeting may exercise voting rights in accordance with the number of shares carrying the right to vote and each share shall have one vote. At any general meeting of shareholders a resolution shall be decided on a show of hands unless a poll is (before or after any vote by show of hands) demanded:

- by the chairman of the meeting;
- by at least two shareholders entitled to vote present in person or by proxy; or
- by one or more shareholders present in person or by proxy and representing 10% or more of all shares carrying the right to vote at the meeting.

Unless a poll be so demanded, a declaration by the chairman that a resolution has on a show of hands been carried, unanimously, or carried by, a particular majority, or lost, and an entry to that effect in the minutes of the meeting shall be conclusive evidence of the fact without proof of the number or proportion of the votes recorded in favor of or against such resolution. The demand for a poll may be withdrawn by the person who makes such demand.

A poll demanded on the election of the chairman of the meeting, or on a question of adjournment of the meeting, shall be taken forthwith. A poll demanded on any other question shall be taken at such time as the chairman of the meeting directs, and any business, other than that upon which a poll has been demanded

may be proceeded with, pending the taking of the poll. The result of the poll shall be deemed to be a resolution of the meeting at which the poll was demanded.

On a poll taken at a meeting, a shareholder (including proxy) entitled to two or more votes need not cast all his votes in the same way.

In the case of an equality of votes, whether on a show of hands or on a poll, the chairman of the meeting at which the show of hands takes place or at which the poll is demanded shall be entitled to one additional vote.

Requirements for Annual General Meetings

The Board shall convene an annual shareholders' meeting once each year and within six (6) months from the close of the preceding financial year.

Accounts and Audit

Our Company shall establish its financial and accounting system in accordance with the laws, administrative regulations and PRC accounting standards formulated by the finance regulatory department of the State Council.

The Board shall place before the shareholders at every annual general meeting such financial reports as are required by any laws, administrative regulations or directives promulgated by competent regional and central governmental authorities to be prepared by our Company.

Our Company's financial reports shall be made available for shareholders' inspection at our Company twenty (20) days before the date of every shareholders' annual general meeting. Each shareholder shall be entitled to obtain a copy of the financial reports.

The financial statements of our Company shall, in addition to being prepared in accordance with PRC accounting standards and regulations, be prepared in accordance with either International Financial Reporting Standards, or that of the overseas place where our Company's shares are listed. If there is any material difference between the financial statements prepared respectively in accordance with the two accounting standards, such difference shall be stated in an appendix to the financial statements. When our Company is to distribute its profits, it is required to distribute dividends based on the lower of the Company's distributable reserves determined under the two accounting standards.

Any interim results or financial information published or disclosed by our Company must also be prepared and presented in accordance with PRC accounting standards and regulations, and also in accordance with either International Financial Reporting Standards or that of the overseas place where our Company's shares are listed.

Our Company shall publish its financial reports twice every fiscal year, that is, the interim financial report shall be published within sixty (60) days after the expiration of the first six (6) months of each fiscal year and the annual financial report shall be published within one hundred and twenty (120) days after the expiration of each fiscal year.

Notice of Meetings and Business to be Conducted thereat

The shareholders' general meeting is the organ of authority of our Company and shall exercise its functions and powers in accordance with law. Our Company shall not, without the prior approval of shareholders' general meeting, enter into any contract with any person other than a Director, Supervisor, our

President or other senior executive officer whereby the management and administration of the whole or any substantial part of the business of our Company is to be handed over to such person. Shareholders' general meetings are divided into annual general meetings and extraordinary general meetings. Shareholders' general meeting shall be convened by the Board. Under any of the following circumstances, the Board shall convene an extraordinary general meeting within two (2) months:

- when the number of Directors is less than the number of Directors required by the PRC Company Law or two-thirds of the number of Directors specified in the Articles of Association;
- when the unrecovered losses of our Company amount to one-third of the total amount of its share capital;
- when shareholder(s) holding 10% or more of our Company's issued and outstanding shares carrying voting rights request(s) the convening of an extraordinary general meeting;
- when deemed necessary by the Board or as requested by the supervisory committee; or
- when at least 2 independent Directors or one half or more of independent Directors request convening of an extraordinary general meeting.

When our Company convenes a shareholders' general meeting, written notice of the meeting shall be given forty-five (45) days before the date of the meeting to notify all of the shareholders in the share register of the matters to be considered and the date and the place of the meeting. A shareholder who intends to attend the meeting shall deliver his written reply concerning the attendance of the meeting to our Company twenty (20) days before the date of the meeting.

When our Company convenes a shareholders' annual general meeting, shareholders holding 3% or more of the total voting shares of our Company shall have the right to propose new motions in writing, and Our Company shall place matters in the proposed motions within the scope of functions and powers of the shareholders' general meeting on the agenda.

A shareholders' extraordinary general meeting shall not decide on those matters not stated in the notice of meeting.

Our Company shall, based on the written replies received twenty (20) days before the date of the shareholders' general meeting from the shareholders, calculate the number of voting shares represented by shareholders who intend to attend the meeting. If the number of voting shares represented by the shareholders who intend to attend the meeting reaches one half or more of our Company's total voting shares, our Company may hold the meeting. If not, then our Company shall within five (5) days notify the shareholders again by public notice of the matters to be considered, the place and the date for the meeting. Our Company may hold the meeting after the publication of such notice.

A notice of meeting of shareholders shall be required to:

- be in writing;
- specify the place, the day and the hour of the meeting;
- list out the share registration date of shareholders who are entitled to attend the meeting;
- state the matters to be discussed at the meeting;
- provide such information and explanations as are necessary for the shareholders to exercise an informed judgment on the proposals before them. Without limiting the generality of the foregoing,

where a proposal is made to amalgamate our Company with another, to repurchase shares, to reorganize the share capital or to restructure our Company in any other way, the terms of the proposed transaction must be provided in detail together with copies of the proposed agreement, if any, and the cause and effect of such proposal must be properly explained;

- contain a disclosure of the nature and extent, if any, of the material interests of any Director, Supervisor, our President or other senior executive officer in the transaction proposed and the effect of the proposed transaction on them in their capacity as shareholders in so far as it is different from the effect on the interests of the shareholders of the same class;
- contain the full text of any special resolution proposed to be voted at the meeting;
- contain conspicuously a statement that a shareholder entitled to attend and vote is entitled to appoint one or more proxies to attend and vote instead of him and that a proxy need not be a shareholder; and
- specify the time and place for lodging proxy forms for the relevant meeting.

Notice of shareholders' general meeting shall be served on the shareholders (whether or not entitled to vote at the meeting), by delivery or prepaid mail to their addresses as shown in the register of shareholders. For the holders of Domestic Shares, notice of the meetings may be issued by way of public notice.

The public notice shall be published in one or more newspapers designated by the securities governing authority of the State Council within the interval between forty-five (45) days and fifty (50) days before the date of the meeting. After the publication of such notice, the holders of domestic invested Shares shall be deemed to have received the notice of the relevant shareholders' general meeting. The accidental omission to give notice of a meeting to, or the non-receipt of notice of a meeting by, any person entitled to receive notice shall not invalidate the proceedings at that meeting.

The following matters shall be resolved by an ordinary resolution at a shareholders' general meeting:

- work reports of the Board and the supervisory committee;
- plans formulated by the Board for the distribution of profits and for making up losses;
- appointment and removal of the members of the Board and members of the supervisory committee, their remuneration and method of payment;
- annual preliminary and final budgets, balance sheets and profit and loss accounts and other financial statements of our Company; and
- matters other than those required by the laws and administrative regulations or by the Articles of Association to be adopted by special resolution.

The following matters shall be resolved by a special resolution at a shareholders' general meeting:

- the increase or decrease of share capital and the issue of shares of any class, warrants and other similar securities;
- the repurchase of the Company's own Shares;
- the issue of debentures of our Company;
- the division, merger, change of the corporate form, dissolution, liquidation, material acquisition and sale in relation to our Company;

- amendments to the Articles of Association, and
- any other matters considered by the shareholders' general meeting, by way of an ordinary resolution, to be of a nature which may have a material impact on our Company and should be adopted by a special resolution.

Transfer of Shares

Subject to the approval of the securities authority of the State Council, Shares of our Company held on our Domestic Share register may be transferred to overseas investors, and such transferred Shares may be listed or traded on an overseas stock exchange. Any listing or trading of the transferred Shares on an overseas stock exchange shall also comply with the regulatory procedures, rules and requirements of such overseas stock exchange.

All the fully paid-up H Shares can be freely transferred in accordance with the Articles of Association. For H Shares listed on the Hong Kong Stock Exchange, unless the requirements stipulated in the Articles of Association are met, the Board may refuse to accept any transfer documents without giving any explanation for such refusal.

The alteration and rectification of each part of the share register shall be carried out in accordance with the laws of the place where the register is maintained.

No changes in the shareholders' register due to the transfer of shares may be made within thirty (30) days before the date of a shareholders' general meeting or within five (5) days before the record date for our Company's distribution of dividends.

Power of our Company to Purchase its Own Shares

In accordance with the provisions of the Articles of Association, our Company may reduce its registered share capital. Our Company may, with approval according to the procedures provided in the Articles of Association and subject to the approval of the relevant governing authority of the State, repurchase its issued shares under the following circumstances:

- cancellation of shares for the reduction of its capital;
- merging with another company that holds shares in our Company; and
- other circumstances permitted by laws and administrative regulations.

Our Company may, with the approval of the relevant State governing authority, repurchase its shares, conducting the repurchase in one of the following ways:

- making a pro rata general offer of repurchase to all of its shareholders;
- repurchase shares through public dealing on a stock exchange; or
- repurchase by an agreement.

Where our Company repurchases its shares by an off-market agreement, the prior sanction of shareholders shall be obtained in accordance with the Articles of Association. Our Company may release, vary or waive its rights under a contract so entered into by our Company with the prior approval of shareholders obtained in the same manner.

A contract to repurchase shares includes (without limitation) an agreement to become obliged to repurchase or an acquisition of the right to repurchase shares. Our Company shall not assign the contracts to repurchase shares and its rights under such contracts.

Shares repurchased in accordance with law by our Company shall be cancelled within the period prescribed by laws and administrative regulations, and our Company shall apply to the original companies registration authority for registration of the change of its registered shares capital. The amount of our Company's registered shares capital shall be reduced by the aggregate par value of those cancelled shares.

Unless our Company is in the course of liquidation, it must comply with the following provisions in relation to repurchase of its issued Shares:

- where our Company repurchases Shares of our Company at par value, payment shall be made out of book surplus distributable profits of our Company or out of proceeds of a fresh issue of Shares made for that purpose;

- where our Company repurchases Shares of our Company at a premium to its par value, payment up to the par value shall be made out of the book surplus distributable profits of our Company or out of the proceeds of a fresh issue of Shares made for that purpose.

Payment of the portion in excess of the par value shall be effected as follows: (i) if the Shares being repurchased were issued at par value, payment shall be made out of the book surplus distributable profits of our Company; or (ii) if the Shares being repurchased were issued at a premium to its par value, payment shall be made out of the book surplus distributable profits of our Company or out of the proceeds of a fresh issue of Shares made for that purpose, provided that the amount paid out of the proceed of the fresh issue shall not exceed the aggregate of premiums received by our Company on the issue of the Shares repurchased nor the current amount of our Company's share premium account (including the premiums on the fresh issue);

- payment by our Company in consideration of the following shall be made out of our Company's distributable profits: (i) acquisition of rights to repurchase Shares of our Company; (ii) variation of any contract to repurchase Shares of our Company; and (iii) release of any of our Company's obligations under any contract to repurchase Shares of our Company; and

- after our Company's registered share capital has been reduced by the total par value of the cancelled Shares in accordance with the relevant provisions, the amount deducted from the distributable profits of our Company for payment of the par value portion of the Shares repurchased shall be transferred to our Company's share premium account.

Power for Any Subsidiary of Our Company to Own Shares in our Company

There are no provisions in the Articles of Association preventing ownership of Shares in our Company by a subsidiary.

Dividends and Other Methods of Profit Distribution

Our Company may distribute dividends in the following manner:

- cash; or

- Stock.

Dividends or other payments declared by our Company to be payable to holders of domestic invested shares shall be declared and calculated in Renminbi, and paid in Renminbi. Those payable to holders of foreign-invested Shares shall be declared and calculated in Renminbi, and paid in foreign currency.

Our Company shall appoint receiving agents on behalf of holders of the H Shares to receive on behalf of such shareholders dividends declared and all other monies owing by our Company in respect of their H Shares. The receiving agents appointed on behalf of holders of the H Shares shall be a company registered as a trust company under the Trustee Ordinance of Hong Kong.

Any dividend declared and payable to holders of H Shares but unclaimed after a period of six (6) years from the date it became due for payment shall be forfeited and shall revert to our Company.

Proxies

Any shareholder entitled to attend and vote at a meeting of our Company shall be entitled to appoint one or more other persons (whether a shareholder or not) as his proxy to attend and vote on his behalf, and a proxy so appointed shall:

- have the same right as the shareholder to speak at the meeting;
- have authority to demand or join in demanding a poll; and
- have the right to vote by hand or on a poll, but a proxy of a shareholder who has appointed more than one proxy may only vote on a poll.

The instrument appointing a proxy shall be in writing signed by the shareholder or signed by the shareholder's agent duly authorized in writing, or if the shareholder is a legal entity, either sealed by the shareholder or signed by a director or agent duly authorized. The instrument appointing a voting proxy and, if such instrument is signed by a person under a power of attorney or other authority on behalf of the appointer, a notary certified copy of that power of attorney or other authority, shall be deposited at the residence of our Company or at such other place as is specified for that purpose in the notice convening the meeting, not less than twenty-four (24) hours before the time for holding the meeting at which the proxy proposes to vote or the time appointed for the passing of the resolution.

If the appointer is a legal entity, its legal representative or such person as is authorized by resolution of its board of directors or other governing body to act as its representative may attend at any meeting of shareholders of our Company as a representative of the appointer.

Any form issued to a shareholder by the Board for use by him for appointing a proxy to attend and vote at a meeting of our Company shall be such as to enable the shareholder according to his intention, to instruct the proxy to vote in favor of or against each resolution dealing with business to be transacted at the meeting. Such a form shall contain a statement that in the absence of instructions by the shareholder the proxy may vote as he thinks fit.

A vote given in accordance with the terms of an instrument of proxy shall be valid notwithstanding the previous death or loss of capacity of the appointer or revocation of the proxy or of the authority under which the proxy was executed, or the transfer of the shares in respect of which the proxy is given, provided that no notice in writing of such death, insanity, revocation or transfer as aforesaid shall have been received by our Company before the commencement of the meeting at which proxy is used.

Calls on Shares and Forfeiture of Shares

There are no provisions in the Articles of Association relating to the making of calls on Shares or for the forfeiture of Shares.

Rights of Shareholders (including inspection of register)

The ordinary shareholders of our Company shall enjoy the following rights:

- the right to dividends and other distributions in proportion to the number of Shares held;
- the right to attend or appoint a proxy to attend shareholders' general meetings and to vote thereat;
- the right of supervisory management over our Company's business operations, and the rights to present proposals or to raise enquires;
- the right to transfer shares in accordance with laws, administrative regulations and provisions of the Articles of Association;
- the right to obtain relevant information in accordance with the provisions of the Articles of Association, including: (i) the right to obtain a copy of the Articles of Association, subject to payment of the cost of such copy; (ii) the right to inspect and copy, subject to payment of a reasonable charge: (a) all parts of the register of shareholders; (b) personal particulars of each of our Directors, Supervisors, President and other senior executive officers as follows: (1) present name and alias and any former name and alias; (2) principal address (residence); (3) nationality; (4) primary and all other part-time occupations; and (5) identification document and its number; (c) report on the state of our Company's share capital; (d) reports showing the number, aggregate par value, quantity, maximum and minimum price paid in respect of each class of Shares repurchased by our Company since the end of the last accounting year and the aggregate amount incurred by our Company for this purpose; and (e) minutes of shareholders' general meetings;
- in the event of the termination or liquidation of our Company, to participate in the distribution of remaining assets of our Company in accordance with the number of Shares held; and
- other rights conferred by laws, administrative regulations and the Articles of Association.

Quorum for Meetings and Separate Class Meetings

Our Company may convene a shareholders' general meeting where the number of voting Shares represented by those shareholders from whom our Company has received, twenty (20) days before the meeting, notices of intention to attend the meeting reaches one half or more of our Company's voting Shares; or, if that number is not reached, our Company shall within five (5) days notify the shareholders again of the matters proposed to be considered at the meeting, the date and the place of the meeting by way of public announcement. After such public announcement, our Company may hold the shareholders' general meeting.

Our Company may convene a class meeting where the number of voting Shares represented by those shareholders from whom our Company has received, twenty (20) days before the meeting, notices of intention to attend the meeting reaches one half or more of the total number of voting Shares of that class; or, if that number is not reached, our Company shall within five (5) days notify the shareholders again of the matters proposed to be considered at the meeting, the date and the place of the meeting by way of public announcement. After such public announcement, our Company may hold the class meeting.

Rights of the Minorities in Relation to Fraud or Oppression

In addition to obligations imposed by laws, administrative regulations or required by the stock exchange on which Shares of our Company are listed, a controlling shareholder shall not exercise his voting rights in respect of the following matters in a manner prejudicial to the interests of the shareholders generally or of some part of the shareholders of our Company:

- to relieve a Director or Supervisor of his duty to act honestly in the best interests of our Company;
- to approve the expropriation by a Director or Supervisor (for his own benefit or for the benefit of another person), in any guise, of our Company's assets, including (without limitation) opportunities beneficial to our Company; or
- to approve the expropriation by a Director or Supervisor (for his own benefit or for the benefit of another person) of the individual rights of other shareholders, including (without limitation) rights to distributions and voting rights save pursuant to a restructuring submitted to shareholders for approval in accordance with the Articles of Association.

For these purposes, a "controlling shareholder" means a person who satisfies any one of the following conditions:

- he alone, or acting in concert with others, has the power to elect half or more of the Board of Directors;
- he alone, or acting in concert with others, has the power to exercise or to control the exercise of 30% or more of the voting rights in our Company;
- he alone, or acting in concert with others, holds 30% or more of the issued and outstanding shares of our Company; or
- he alone, or acting in concert with others, in any other manner controls our Company in fact.

See also the Section headed "Variation of Rights of Existing Shares or Classes of Shares" above.

Procedures on Liquidation

Our Company shall be dissolved and liquidated upon the occurrence of any of the following events:

- a resolution for dissolution is passed by shareholders' general meeting;
- dissolution is necessary due to a merger or division of our Company;
- our Company is legally declared bankrupt due to its failure to repay debts due; or
- our Company is ordered to close down because of its violation of laws and administrative regulations.

Where the Board proposes to liquidate our Company due to causes other than the declaration of insolvency, the Board shall include a statement in its notice convening a shareholders' general meeting to consider the proposal to the effect that, after making full inquiry into the affairs of our Company, the Board is of the opinion that our Company will be able to pay its debts in full within twelve (12) months from the commencement of the liquidation.

Upon the passing of the resolution by the shareholders' general meeting for the liquidation of our Company, all functions and powers of the Board shall cease.

The liquidation committee shall act in accordance with the instructions of the shareholders' general meeting to make a report at least once every year to the shareholders' general meeting on the committee's receipts and payments, the business of our Company and the progress of the liquidation and to present a final report to the shareholders' general meeting on completion of the liquidation.

Other Provisions Material to our Company and our Shareholders

General Provisions

Our Company is a joint stock limited company in perpetual existence.

The Articles of Association constitute a legally binding document regulating our Company's organization and activities, and the rights and obligations between our Company and each shareholder and among the shareholders inter se.

Our Company may invest in other enterprises.

Our Company's liabilities to an investee company shall be limited to the amount of its capital contribution to such investee company.

Our Company may, based on its requirements for operation and development and in accordance with the relevant provisions of the Articles of Association, approve an increase of capital.

Our Company may increase its capital in the following ways:

- offering new shares to non-specialty-designated investors for subscription;
- placing new shares to its existing shareholders;
- distributing new shares to its existing shareholders by way of bonus issues; and
- any other way permitted by law and administrative regulations.

Our Company's increase of capital by issuing new shares shall, after being approved in accordance with the provisions of the Articles of Association, be conducted in accordance with the procedures stipulated by relevant laws and administrative regulations.

Unless otherwise provided by law or administrative regulation, shares in our Company are freely transferable and are not subject to any lien.

When our Company reduces its registered share capital, it must draw up a balance sheet and an inventory of assets. Our Company shall notify its creditors within ten (10) days of the date of our Company's resolution for reduction of share capital and shall publish a notice in a newspaper within thirty (30) days of the date of such resolution. A creditor has the right within thirty (30) days of receiving the notice from our Company or, in the case of a creditor who does not receive the notice, within forty-five (45) days of the date of the first public notice, to demand our Company to repay its debts or provide a corresponding guarantee for such debt. Our Company's registered capital after reduction shall not be less than the statutory minimum amount.

The ordinary shareholders of our Company shall assume the following obligations:

- to abide by the Articles of Association;
- to pay subscription funds according to the number of shares subscribed and the method of subscription; and

- other obligations imposed by laws, administrative regulations and the Articles of Association.

Shareholders are not liable to make any further contribution to the share capital other than as agreed by the subscriber of the relevant shares on subscription.

Board

The Board is responsible to the shareholders' general meeting and exercises the following powers:

(1) to be responsible for convening shareholders' general meetings and to report on its work to the shareholders' general meeting;

(2) to implement the resolutions of the shareholders' general meetings;

(3) to decide on our Company's business plans and investment plans;

(4) to formulate our Company's annual financial budget and final report;

(5) to formulate our Company's profit distribution plan and loss recovery plan;

(6) to formulate proposals for the increases or decrease of our Company's registered capital and the issue of corporate debentures;

(7) to formulate the plans for merger, division, change of form or dissolution of our Company;

(8) to decide on the establishment of our Company's internal management structure;

(9) based on the recommendations of the chairman of the Board, to appoint or remove our Company's President, based on the recommendations of the President, to appoint or remove other senior executive officers and, to decide on their remuneration and award matters;

(10) to formulate our Company's basic management system;

(11) to formulate proposals for any amendment to the Articles of Association;

(12) to propose to the shareholders' general meetings the appointment or change of the accounting firm to conduct auditing of our Company;

(13) to review and approve the proportional change to our Company's affiliates' shareholding in PRC listed companies as a result of a new or allotment offering by such listed companies;

(14) to review and approve the total or partial transfer of, or the creation of pledge or any third-party interest on, the shares held by our Company's affiliates in PRC listed companies;

(15) to review and approve the proposals to be voted on at the shareholders' general meeting of the PRC listed companies by our Company's affiliates according to the articles of association of such listed companies;

Except for the Board's resolutions in respect of the matters specified in the above paragraphs (6), (7) and (9), which shall be passed by two-thirds or more of the Directors, the Board resolutions in respect of all other matters may be passed by at least half of the Directors.

Meetings of the Board shall be held at least four times a year and convened by the chairman of the Board. Notice of the meeting shall be served on all of the Directors ten (10) days before the date of the meeting. In case of emergency and where three or more Directors, or the President of our Company so proposes, an extraordinary meeting of the Board may be held.

Meetings of the Board shall be held only if one half or more of the Directors are present. Each Director shall have one vote. Where the number of votes cast for and against a resolution are equal, the chairman of the Board shall have the deciding vote.

Supervisory Committee

Our Company shall have a supervisory committee. The Directors, our President and other senior executive officers, including but not limited to our Chief Financial Officer, shall not act concurrently as Supervisors. The supervisory committee shall be composed of 3 Supervisors. One of the members of the supervisory committee shall act as the chairman. The term of office of Supervisors shall be three years, renewable upon re-election and reappointment. The election or removal of the chairman of the supervisory committee shall be determined by two-thirds or more of the members of the supervisory committee. Decisions of the supervisory committee shall be made by the affirmative vote of two-thirds or more of the Supervisors.

The supervisory committee shall comprise 2 representatives of shareholders and 1 representative of staff and workers of our Company. The representatives of shareholders and independent supervisors shall be elected and removed by shareholders' general meeting; the representative of workers and staff of our Company shall be elected and removed by the workers and staff of our Company democratically thereby.

The supervisory committee shall be accountable to the shareholders' general meeting and exercise the following powers in accordance with law:

- to examine our Company's financial situation and, if necessary, to engage an accounting firm, in the name of our Company, for an independent audit on our Company's financial situation;
- to supervise the performance by the Directors, President, deputy President, Chief Financial Officer and the secretary of the Board of our Company of their duties, and propose to remove the aforesaid personnel for violation of the applicable laws, regulations, the Articles of Association or the resolutions of the shareholders' general meeting;
- to demand rectification from a Director, President, deputy President, Chief Financial Officer and the secretary of the Board when the acts of such persons are harmful to our Company's interest if necessary;
- to verify the financial information such as the financial report, business report and plans for distribution of profits to be submitted by the Board to the shareholders' general meetings and, should any queries arise, to engage, in the name of our Company, qualified accounting and auditing firms for a re-rectification on aforesaid information;
- to propose to convene an extraordinary shareholders' general meeting and to convene and preside over the shareholders' general meeting when the Board of our Company fails to perform the duties of convening and presiding over the shareholders' general meeting as stipulated in Company Law;
- to represent our Company in communication with Directors or institute proceedings against the Directors, President, deputy President, Chief Financial Officer or Board Secretary;
- to make proposals to the shareholders' general meeting; and
- to exercise other powers specified in the Articles of Association.

Members of the supervisory committee shall be present at meetings of the Board.

President of our Company

Our Company shall have one President, who shall be appointed and dismissed by the Board.

Our President shall be accountable to the Board and exercise the following powers:

- to be in charge of our Company's operation and management and to organize the implementation of the resolutions of the Board;
- to organize the implementation of our Company's annual business plan and investment plan;
- to draft plans for the establishment of the internal organizational structure of our Company;
- to draft our Company's basic management system;
- to formulate basic rules and regulations for our Company;
- to propose the appointment or dismissal of our deputy President and Chief Financial Officer;
- appoint or dismiss management personnel other than those required to be appointed or dismissed by the Board; and
- to exercise other powers conferred by the Articles of Association and the Board.

Our President shall be present at meetings of the Board. However, the President shall have no voting rights at the meetings unless he is also a director. Our President, in performing their functions and powers, shall act honestly and diligently and in accordance with laws, regulations and the Articles of Association.

Chairman of the Board

The chairman of the Board shall exercise the following powers:

- to preside the shareholders' meeting, convene and preside the meetings of the Board;
- to inspect the implementation of the resolutions of the Board;
- to sign the securities issued by our Company; and
- to sign important documents of the Board and other documents which shall be signed by the legal representative;
- to exercise the power of legal representative;
- to exercise other powers authorized by the Board.

In case where the chairman of the Board cannot exercise the powers abovementioned, the chairman of the Board may designate such powers to the vice chairman of the Board.

Secretary of the Board

The secretary of the Board shall be a natural person who has the requisite professional knowledge and experience, and shall be appointed by the Board. His primary responsibilities include, without limitation:

- to ensure that our Company's documents and records are complete;
- to ensure the lawful preparation and submission by our Company of reports and documents as required by relevant authorities (including but not limited to the administration of industry and commerce);

- to ensure that the register of shareholders is properly maintained, and to ensure that persons who are entitled to obtain our Company's records and documents can timely obtain the relevant records and documents;
- to be responsible for the organization and coordination of information disclosure;
- to be responsible for the confidentiality of information sensitive to share price and to formulate a feasible confidentiality system and confidentiality measures; and
- to exercise other duties and obligations imposed by law or by the supervisory authorities of the listing of our Company, and/or such duties and obligations as specified in the Articles of Association (including other powers authorized by the Board).

Accounts and Audit

- Appointment of auditors.

  Our Company shall appoint independent auditors who are qualified under the relevant regulations of the PRC to audit our Company's annual financial statements and review our Company's other financial reports.

  The auditors appointed by our Company shall hold office from the conclusion of the annual general meeting of shareholders at which the appointment is made until the conclusion of the next annual meeting of shareholders.

  Before the convening of the shareholders' general meeting, the Board may fill any casual vacancy in the office of the auditors, but while any such vacancy continues, the surviving or continuing firm, if any, may act.

  The shareholders' general meeting may, by ordinary resolution, remove an accounting firm before the expiration of its office, notwithstanding the stipulations in the contract between our Company and the firm, but without prejudice to the firm's right to claim, if any, for damages in respect of such removal.

  The remuneration of certified public accounting firm or the manner in which such firm is to be remunerated shall be determined by the shareholders' general meeting. The remuneration of a certified public accounting firm appointed by the Board shall be determined by the Board.

- Change and removal of accounting firm.

  Our Company's appointment of, removal of and non-reappointment of a certified public accounting firm shall be resolved by shareholders' general meetings.

  Where it is proposed that any resolution be passed at a shareholders' general meeting concerning the appointment of a certified public accounting firm, which is not an incumbent firm, to fill a casual vacancy in the office of the certified public accounting firm, reappointment of a retiring accounting firm which was appointed by the Board to fill a casual vacancy, or removal of the accounting firm before the expiration of its term of office, the following provisions shall apply:

  — A copy of the proposal shall be sent to the firm proposed to be appointed or proposing to leave its post or the firm which has left its post (leaving includes leaving by removal, resignation and retirement) before notice of meeting is given to the shareholders.

— If the firm leaving its post makes representations in writing and requests our Company to notify such representations to the shareholders, our Company shall (unless the representations are received too late): (i) in any notice of the resolution given to shareholders, state the fact of the representations having been made; and (ii) attach a copy of the representations to the notice and deliver it to the shareholders in the manner stipulated in the Articles of Association.

— If the firm's representations are not sent in accordance with the preceding paragraph, the relevant firm may require that the representations be read out at the shareholders' general meeting and may lodge further complaints.

— A certified public accounting firm which is leaving its post shall be entitled to attend: (i) the shareholders' general meeting at which its term of office would otherwise have expired; (ii) any shareholders' general meeting at which it is proposed to fill the vacancy caused by its removal; and (iii) any shareholders' general meeting convened on its resignation; and to receive all notices of, and other communications relating to, any such meetings, and to speak at any such meeting in relation to matters concerning its role as the former accounting firm of our Company.

- Resignation of accounting firm.

  Where the certified public accounting firm resigns its post, it shall make clear to the shareholders' general meeting whether there has been any impropriety on the part of our Company.

  — Any certified public accounting firm may resign its office by depositing at our Company's legal residence a resignation notice which shall become effective on the date of such deposit or on such later date as may be stipulated in such notice. Such notice shall include the following:

  (1) a statement to the effect that there are no circumstances connected with its resignation which it considers should be brought to the notice of the shareholders or creditors of our Company; or

  (2) a statement of any such circumstances. Where a notice is deposited under the preceding paragraph, our Company shall within fourteen (14) days after receiving of such notice send a copy of the notice to the relevant governing authority. If the notice contains a statement under subparagraph (2) of the preceding paragraph, a copy of such statement shall be placed at our Company's registered office for shareholders' inspection. Our Company shall also send a copy of such statement by prepaid mail to every holder of H Shares at the address registered in the register of shareholders.

  Where the accounting firm's notice of resignation contains a statement of any circumstances which should be brought to the notice of the shareholders or creditors of our Company, the certified public accounting firm may require the Board to convene a shareholders' extraordinary general meeting for the purpose of giving an explanation of the circumstances connected with its resignation.

Dispute Resolution

Whenever any disputes or claims arise between holders of the H Shares and our Company, holders of the H Shares and our Company's Directors, Supervisors, President or other senior executive officers, or

holders of the H Shares and holders of Domestic Shares, based on the Articles of Association or any rights or obligations conferred or imposed by the PRC Company Law or any other relevant laws and administrative regulations concerning the affairs of our Company, such disputes or claims shall be referred by the relevant parties to arbitration.

A claimant may elect arbitration at either the China International Economic and Trade Arbitration Commission in accordance with its rules or the Hong Kong International Arbitration Centre in accordance with its Securities Arbitration Rules. Once a claimant refers a dispute or claim to arbitration, the other party must submit to the arbitral body elected by the claimant.

If a claimant elects arbitration at Hong Kong International Arbitration Centre, any party to the dispute or claim may apply for a hearing to take place in Shenzhen in accordance with the Securities Arbitration Rules of the Hong Kong International Arbitration Centre.

If any disputes or claims of rights as provided in section 180.1 of Articles of Association, the Laws of Peoples' Republic of China shall apply, save as otherwise provided in laws and administrative regulations.

Where a dispute or claim of rights is referred to arbitration, the entire claim or dispute must be referred to arbitration, and all persons who have a cause of action based on the same facts giving rise to the dispute or claim or whose participation is necessary for the resolution of such dispute or claim, shall abide by the arbitration provided that such person is our Company or our Company's shareholder, Director, Supervisor, President or other senior executive officer. Disputes in relation to the identification of shareholders and disputes in relation to the share register need not be referred to arbitration.

The award of an arbitration body shall be final and conclusive and binding on all parties.

FURTHER INFORMATION ABOUT OUR COMPANY

The Company

The Company was established in the PRC as a joint stock limited company on 22 August 2006 by ChinaCoal Group as our sole Promoter in accordance with the provisions under the PRC Company Law. The Company obtained a business license (Registration number 1000001004047) issued by the PRC State Administration for Industry and Commerce on 22 August 2006.

The Company has established a place of business in Hong Kong at Room 2608, 26/F, Office Tower, Convention Plaza, 1 Harbour Road, Wanchai, Hong Kong, and has registered with the Hong Kong Companies Registry as an oversea company in Hong Kong under Part XI of the Companies Ordinance on 14 November 2006. Li Di of Room 2608, 26/F, Office Tower, Convention Plaza, 1 Harbour Road, Wanchai, Hong Kong has been authorized to accept on behalf of the Company service of process and any notices required to be served on the Company in Hong Kong.

As our Company was established in the PRC, it operates subject to the relevant laws and regulations of the PRC and to its constitution which comprises our Articles of Association. Certain relevant aspects of the relevant laws and regulations of the PRC and a summary of certain relevant provisions of the Articles of Association are set out in Appendices VIII and IX to this Prospectus, respectively.

Changes in the Registered Capital of the Company

At the time of the establishment of the Company, its registered capital was RMB8,000 million divided into 8,000 million Domestic Shares of nominal value of RMB1.00 each, all of which were credited as fully paid up and held by ChinaCoal Group. Save as disclosed in this Prospectus, there has been no alteration in the registered capital of the Company since the date of its establishment.

Immediately upon completion of the Global Offering but without taking into account the exercise of the Over-allotment Option, the share capital of the Company will be RMB11,246,374,000 comprising 7,657,363,000 Domestic Shares and 3,571,011,000 H Shares, representing approximately 68.25% and 31.75% of the Company's share capital, respectively.

Resolutions of the Company's Sole Shareholder Passed on 23 August 2006

An extraordinary general meeting of the Company was held on 23 August 2006 at which the following resolutions of the shareholders, among other things, were passed:

(a) conditional upon approval by the relevant PRC authorities, the conversion of our Company into an 'overseas subscription company' was approved;

(b) conditional upon, among others, (i) the Listing Committee of the Hong Kong Stock Exchange granting approval for the listing of, and permission to deal in, the H Shares to be issued and converted as mentioned herein, and (ii) the Underwriting Agreements becoming unconditional and not being terminated in accordance with the terms of such agreements or otherwise, the following matters were approved:

  (i) the issue by our Company of the H Shares and the listing of the H Shares on the Hong Kong Stock Exchange;

  (ii) the granting of the Over-allotment Option; and

(iii) the corresponding increase in the share capital of our Company upon completion of the Global Offering.

(c) our Articles of Association were approved and adopted and the Board was authorised to amend our Articles of Association in accordance with the amendments required by the relevant PRC authorities and the Hong Kong Stock Exchange; and

(d) the Board was authorised, among other things, to do any acts and things relating to the conversion of our Company into an overseas subscription company and the listing of the H Shares on the Hong Kong Stock Exchange.

At an extraordinary general meeting of the Company held on 22 November 2006, resolutions of the sole shareholder of our Company were passed pursuant to which, among other things:

(a) certain amendments to our Articles of Association were approved; and

(b) our Board was authorised to issue Domestic Shares and/or H Shares within a period of 12 months from the date of the resolution on 22 November, 2006 provided that the number of Domestic Shares and/or H Shares to be issued shall not exceed 20% of the number of Domestic Shares and H Shares separately then in issue.

Our Restructuring

In preparation for the Global Offering, we underwent the Restructuring, details of which are set out in "Restructuring." As confirmed by our legal advisers as to PRC law, Jia Yuan Law Firm, our Restructuring complies with an applicable PRC laws and regulations, and all necessary approvals from relevant PRC regulatory authorities required for the implementation of the Restructuring have been obtained. These approvals include:

(1) On 24 February 2006, the SASAC issued an approval document (Guo Zi Gai Ge [2006] No. 176) to approve the proposal relating to the Restructuring;

(2) On 29 March 2006, the MLR issued an approval document (Guo Tu Zi Han [2006] No. 232) to approve the disposal of assets of ChinaCoal Group;

(3) Hua Yuan Real Estate Appraising Co., Ltd. appraised the land use rights which were to be injected into the Company as of 30 September 2005 and issued an appraisal report (Hua Yuan [2006] (Ping) Zi No. 009) on 8 June 2006. The MLR approved the appraisal report by its approval document (Guo Tu Zi Han [2006] No. 409) on 14 July 2006;

(4) On 19 July 2006, the MOF and MLR jointly issued an approval document (Cai Jian [2006] No. 366) to approve the capitalization disposal of mining rights of ChinaCoal Group;

(5) China United Assets Appraisal Co., Ltd. appraised the assets of ChinaCoal Group which are to be injected into the Company as of 30 September 2005 and issued an appraisal report (Zhong Lian Ping Bao Zi [2006] No. 88) on 18 April 2006. The SASAC approved the appraisal report by its approval document (Guo Zi Chan Quan [2006] No. 928) on 31 July 2006;

(6) On 3 August 2006, the SASAC issued an approval document (Guo Zi Chan Quan [2006] No. 944) approving the management of ChinaCoal Group's State-owned equity interests in us;

(7) On 14 August 2006, SASAC issued an approval (Guo Zi Gai Ge [2006] No. 1048) approving our establishment as a joint stock limited company;

(8) On 18 August 2006, ChinaCoal Group convened an inaugural meeting of our Company for the establishment of our Company and the adoption of our initial Articles of Association was approved;

(9) On 22 August 2006, a new business license was issued by the State Administration for Industry and Commerce, whereupon our Company was formally established as a joint stock limited company;

(10) On 1 September 2006, SASAC issued an approval (Guo Zi Chan Quan [2006] No. 1109) approving the transfer of shares by ChinaCoal Group to NSSF according to the policy of the PRC on reduction of State-owned shares;

(11) On 11 September 2006, the SASAC issued an approval (Guo Zi Gai Ge [2006] No. 1134) for the conversion of our Company into an "overseas subscription company";

(12) On 7 November 2006, the CSRC issued an approval (Zheng Jian Guo He Zi [2006] No. 27) with regard to the issue of H Shares and the listing of the H Shares on the Hong Kong Stock Exchange.

Our Principal Subsidiaries

Our principal subsidiaries (for the purposes of the Hong Kong Listing Rules) as of the date of this Prospectus include (i) all entities set out under paragraph (i) of Note 36 to the Accountants' Report as included in Appendix I to this Prospectus and (ii) the following entities which are accounted for as our "jointly controlled entities" under IFRS as reported in the Accountants' Report:

Entity	Total attributable equity interest held by our Company
Shanxi China Coal Pingshuo Antaibao Coal Co., Ltd. [Note] (山西中煤平朔安太堡煤炭有限責任公司)	100%
China Coal Complete Equipment Co., Ltd. (中煤設備成套有限公司)	65.73%
Datong China Coal Export Base Development Co., Ltd. (大同中煤出口煤基地建設有限公司)	60%
Shaanxi Nanliang Coal Co., Ltd. (陝西南梁礦業有限公司)	55%
Shuozhou China Coal Pingshuo Energy Co., Ltd. (朔州中煤平朔能源有限公司)	51%
Lingshi China Coal & Coke Gas Power Limited (靈石縣中煤焦化煤氣發電有限責任公司)	51%

Note:

This company is formerly known as Ping Shuo First Coal Company Limited (平朔第一煤炭有限公司) and was owned as to 80% by the Company as of 30 June 2006. Subsequently, its remaining 20% interest was acquired by the Company and it therefore becomes a wholly-owned subsidiary of the Company.

Save as disclosed in this Prospectus, there has been no alteration in the share capital of any of our subsidiaries mentioned above within the two years immediately preceding the date of this Prospectus.

Sino-foreign Joint Ventures

Information regarding the Sino-foreign equity joint ventures, cooperative or contractual joint ventures in which the Company is interested are set out below:

1. Jiangsu Datun Aluminum Company Limited (江蘇大屯鋁業有限公司) ("Jiangsu Datun")

Parties and equity interest:	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司) (75%) and China Coal Hong Kong Limited (中煤能源香港有限公司) (25%)
Term of joint venture:	20 years
Date of establishment:	18 April 2002
Scope of business:	production and trading of aluminium ingots, aluminium rods, aluminum plate, aluminium wire rod, aluminium steel tubes, aluminium fabrication material, and other aluminium products, as well as carbon anode.
Nature:	Sino-foreign equity joint venture
Total investment amount:	USD 29,670,000
Registered share capital:	USD 23,660,000

All transfers of registered share capital in Jiangsu Datun are subject to pre-emptive rights of the joint venture partners set out in the joint venture contract and the articles of association of Jiangsu Datun. The entitlements of joint venture partners in profits, dividends and other distributions of Jiangsu Datun are in the proportion to their capital contribution ratio. Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司) and China Coal Hong Kong Limited (中煤能源香港有限公司) have the rights to nominate 5 directors (including the chairman) and 2 directors (including the vice chairman) respectively to the board of Jiangsu Datun under the joint venture contract and its articles of association.

Upon expiry of the joint venture, the joint venture partners shall be entitled to the distributable current assets in the proportion to their capital contribution ratio, and Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司) shall be entitled to all the fixed assets of the joint venture.

2. Lianyungang China Coal Huanneng Coal Processing Company (連雲港中煤環能煤炭加工有限公司) ("Lianyungang China")

Parties and equity interest:	China Coal Lianyungang Imp. & Exp. Co., Ltd. (中煤連雲港進出口有限公司) (75%) and China Coal Hong Kong Ltd. (中煤能源香港有限公司) (25%)
Term of joint venture:	25 years
Date of establishment:	27 December 1999
Scope of business:	coal purification, coal categorisation
Nature:	Sino-foreign equity joint venture
Total investment amount:	RMB 5,000,000
Registered share capital:	RMB 5,000,000

All transfers of registered share capital in Lianyungang China are subject to pre-emptive rights of the joint venture partners as set out in the joint venture contract and the articles of association of Lianyungang China. The entitlements of joint venture partners in profits, dividends and other distributions of Lianyungang China are in the proportion to their capital contribution ratio, except as unanimously approved otherwise by the directors of Lianyungang China. China Coal Lianyungang Imp. & Exp. Co., Ltd. (中煤連雲港進出口有限公司) and China Coal Hong Kong Limited (中煤能源香港有限公司) have the rights to nominate 3 directors (including the chairman) and 2 directors (including the vice chairman) respectively to the board of Lianyungang China under the joint venture contract and its articles of association.

Upon expiry of the joint venture, the joint venture partners shall be entitled to the distributable assets in the proportion to their capital contribution ratio.

3. Shaanxi Nanliang Coal Co., Ltd. (陝西南梁礦業有限公司) ("Shaanxi Nanliang")

Parties and equity interest:	Our Company (23%), Shaanxi Yulin Coal Export Group Corporation (陝西榆林煤炭出口(集團)有限責任公司)26%, Hainan Jingtie Trade and Industry Development Company (海南京鐵實業貿易開發總公司) (10%), Zhejiang Fuxing Electric Power Fuel Co., Ltd. (浙江富興電力燃料有限公司) (5%), Shaanxi Coal Transportation Group Co., Ltd. (陝西煤炭運銷(集團)有限責任公司) (4%), and Sunfield Resources Pty. Ltd. (華光資源有限公司) (32%)
Term of joint venture:	30 years
Date of establishment:	5 February 1999
Scope of business:	Production, processing, storage, transportation and trading of coal.
Nature:	Sino-foreign equity joint venture
Total investment amount:	RMB 151,830,000
Registered share capital:	RMB 68,750,000

All transfers or increase of registered share capital in Shangxi Nanliang are subject to pre-emptive rights of the joint venture partners as set out in the joint venture contract and the articles of association of Shangxi Nanliang. The entitlements of joint venture partners in profits, dividends and other distributions of Shangxi Nanliang are in the proportion to their capital contribution ratio. Our Company, Shaanxi Yulin Coal Export Group Corporation (陝西榆林煤炭出口(集團)有限責任公司), Sea Trade Development Corporation (海南京鐵實業貿易開發總公司), Zhejiang Fuxing Electric Power Fuel Co., Ltd. (浙江富興電力燃料有限公司), Shaanxi Coal Transportation Group Co., Ltd. (陝西煤炭運銷(集團)有限責任公司) and Sunfield Resources Pty. Ltd. (華光資源有限公司) have the rights to nominate 3 directors (including the chairman), 3 directors (including the vice chairman), 2 directors, 1 director, 1 director and 3 directors respectively to the board of Shaanxi Nanliang under the joint venture contract and its articles of association.

Upon expiry of the joint venture, the joint venture partners shall be entitled to the distributable assets in the proportion to their capital contribution ratio.

4. Datong China Coal Export Base Development Co., Ltd. (大同中煤出口煤基地建設有限公司) ("Datong ChinaCoal")

Parties and equity interest:	Our Company (19%), Datong Coal Industry Co., Ltd. (大同煤業股份有限公司) (40%) and Sunfield Resources Pty. Ltd. (華光資源有限公司) (41%)
Term of joint venture:	30 years
Date of establishment:	8 August 2000
Scope of business:	coal washing, coal processing and blending, sale of coal, and coal consolidation
Nature:	Sino-foreign equity joint venture
Total investment amount:	RMB 125,000,000
Registered share capital:	RMB 125,000,000

All transfers of registered share capital in Datong China are subject to pre-emptive rights of the joint venture partners as set out in the joint venture contract and the articles of association of Datong ChinaCoal. The entitlements of joint venture partners in profits, dividends and other distributions of Datong ChinaCoal are in the proportion to their capital contribution ratio. Note:

Class 1 relates to silicon, sulphur, industrial chemicals and others. Class 2 relates to food coloring, dyes, paint and others. Class 3 relates to spices, cleaning agents and others. Class 4 relates to lubricants and fuels and others. Class 5 relates to medical and dental materials and bandages. Class 6 relates to railway materials, dyeing machines and other forms of machinery. Class 8 relates to agricultural tools, gardening equipment and others. Class 9 relates to photocopiers, televisions, radiographic machines and others. Class 10 relates to surgical and dental equipment and others. Class 11 relates to air conditioners. Class 12 relates to cars and other vehicles. Class 13 relates to explosive materials, firework and others. Class 14 relates to gems, watches, jewellery and others. Class 15 relates to musical instruments. Class 16 relates to maps, books, painting materials and others. Class 17 relates to rubber and insulating materials etc. class 18 relates to bags, umbrellas, belts and others. Class 19 relates to clay, cement, construction glass. Class 20 relates to non-metallic goods. Class 21 relates to cosmetics and others. Class 22 relates to netting, fabric and others. Class 23 relates to rayon, textiles, etc. Class 24 relates to sanitation gloves and others. Class 25 relates to swimwear, hats, socks and others. Class 26 relates to fashion wear, lace and other fashion materials. Class 27 relates to wallpaper. Non- textile ornament, etc. class 28 relates to chess, ice skating. Class 29 relates to milk-products, edible oils and certain other food stuffs. Class 30 relates to coffee, tea and others. Class 31 relates to meat, fruit and vegetables and other foodstuffs. Class 32 relates to beverages. Class 33 relates to alcoholic beverages and others. Class 34 relates to smoking accessories and others. Class 35 relates to import and export agencies and others. Class 36 relates to financial management, fund investment and others. Class 37 relates to construction and interior designing and others. Class 38 relates to telegraphic and satellite transmission. Class 39 relates to transportation, shipping agency and others. Class 40 relates to film development, water and air purifiers and others. Class 41 relates to education and sports equipment and others. Class 42 relates to geological exploration, safety consultation and others.

On 5 September 2006, our Company and ChinaCoal Group entered into a trademarks license framework agreement. Pursuant to this agreement, ChinaCoal Group agreed to grant to our Company a non-exclusive licence to use the following trademarks which are registered or being applied for by ChinaCoal Group (other than our Company) in the PRC, Japan, Korea and Hong Kong. Details of this agreement are set out in the section headed "Connected Transactions — Exempt Continuing Connected Transactions".

Patents

As of the Latest Practicable Date, our Company has registered the following patents in the PRC which are material to our business:

	Patent	Certificate No.	Effective Date	Application Date	Expiry Date	Registered Owner	Type of Patent
1	Overall Model Forging Track	ZL02285155.0	17 December 2003	11 November 2002	11 November 2012	Zhangjiakou Coal Mining Machinery Co., Ltd. (張家口煤礦機械有限公司)	new utility type
2	Universal Assembly Grippers for Casting Central Slots	ZL02285153.4	24 December 2003	11 November 2002	11 November 2012	Zhangjiakou Coal Mining Machinery Co., Ltd. (張家口煤礦機械有限公司)	new utility type
3	Retractable Head of Sweep Conveyer	ZL02285154.2	4 February 2004	11 November 2002	11 November 2012	Zhangjiakou Coal Mining Machinery Co., Ltd. (張家口煤礦機械有限公司)	new utility type
4	Prepositional Retractable Head of Same-Directional Groove Transferor	ZL03240686.X	18 August 2004	20 March 2003	20 March 2013	Zhangjiakou Coal Mining Machinery Co., Ltd. (張家口煤礦機械有限公司)	new utility type
5	Gear-Driven Double-Roller Crusher	ZL03240685.1	22 September 2004	20 March 2003	20 March 2013	Zhangjiakou Coal Mining Machinery Co., Ltd. (張家口煤礦機械有限公司)	new utility type
6	Conical Tilted-plat Sedimentation Pond	ZL98217081.5	9 October 1999	16 July 1998	16 July 2008	Handan Design & Research Institute of the Ministry of Coal Industry (煤炭工業邯鄲設計研究院)	new utility type
7	Method of Clarifying Mine Well Water in a Well	ZL97112011.0	3 October 2001	14 May 1997	14 May 2017	Handan Design & Research Institute of the Ministry of Coal Industry (煤炭工業邯鄲設計研究院)	invention patent
8	Electrically-Driven Anti-Leakage Garage Gate	ZL200420057461.4	30 November 2005	29 November 2004	28 November 2014	Handan Design & Research Institute of the Ministry of Coal Industry (煤炭工業邯鄲設計研究院)	new utility type
9	Coal Refining Installation	ZL01273073.4	27 December 2002	28 December 2001	27 December 2011	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type

	Patent	Certificate No.	Effective Date	Application Date	Expiry Date	Registered Owner	Type of Patent
10	Arched Rack with Low Curvature	ZL02258269.X	22 October 2003	6 November 2002	5 November 2012	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
11	Wind Direction Surveillance Device of Mine Pit Ventilator	ZL02287695.2	21 January 2004	18 December 2002	17 December 2012	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
12	Tilted-Lane Overhead Safety Protection Device for Workers and Vehicles	ZL200320120512.9	5 November 2003	12 January 2002	4 November 2013	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
13	Anti-Dislocation Device of Mining Vehicles	ZL200420079169.2	11 January 2006	31 August 2004	10 January 2016	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
14	Automatic Restoring Mechanical Shutting Mining Vehicle Lock	ZL200420079167.3	14 September 2005	31 August 2004	13 September 2015	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
15	Composite On-Track String Holding Device	ZL200420079170.5	14 September 2005	31 August 2004	13 September 2015	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
16	Platform Control Device of Industrial Television Monitoring System	ZL200520039688.0	22 March 2006	21 March 2005	21 March 2016	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
17	Universal Hydraulic Machine for Dismantling Studs of Racks	ZL02264031.2	12 November 2003	27 August 2002	11 November 2013	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
18	Specialized Automatic Feeding Reamer	ZL200420079168.8	11 January 2006	31 August 2004	11 January 2016	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
19	Composite Atomizing Vibrating Self-Activating Smoke and Dust-Removing Desulfuration Device	ZL01244698.X	22 May 2002	9 July 2001	21 May 2012	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
20	Automatic Hydraulic Recycled Cleaning Machine	ZL01244697.1	22 May 2002	9 July 2001	21 May 2012	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type

	Patent	Certificate No.	Effective Date	Application Date	Expiry Date	Registered Owner	Type of Patent
21	Heat Dissipation Device of an Insulated Tube of a Mining Converter	ZL01245031.8	22 May 2002	24 July 2001	21 May 2012	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type

As of the Latest Practicable Date, our Company has filed applications for the following patents in the PRC which are or may be material to our business:

	Patent	Application Date	Application No.	Registered Owner	Type
1	Guniting Valve	17 April 2006	200620012429.3	Beijing Coal Mining Machinery Factory (北京煤礦機械廠)	new utility type
2	Change Valve	17 April 2006	200620012428.9	Beijing Coal Mining Machinery Factory (北京煤礦機械廠)	new utility type
3	Safety Valve	17 April 2006	200620012430.6	Beijing Coal Mining Machinery Factory (北京煤礦機械廠)	new utility type
4	One-Way Hydraulic Valve	17 April 2006	200620012431.0	Beijing Coal Mining Machinery Factory (北京煤礦機械廠)	new utility type
5	Filter (1)	17 April 2006	200620012427.4	Beijing Coal Mining Machinery Factory (北京煤礦機械廠)	new utility type
6	Filter (2)	17 April 2006	200620012426.X	Beijing Coal Mining Machinery Factory (北京煤礦機械廠)	new utility type
7	Manual Guiding Control Valve	29 November 2005	200520141942.8	Beijing Coal Mining Machinery Factory (北京煤礦機械廠)	new utility type
8	The Technology and Device Using the Method of Clay to Prevent Automatic and Natural Fix-Quantity Reinforcement of Coal	3 September 2003	03152963.1	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	invention patent
9	Remote-Control Track Moving Device for Mining Vehicles	20 January 2005	200520068531.0	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
10	Sweep Conveyor Cooler	22 March 2005	200520040294.7	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
11	Hydraulic Mining Machine with Remote Control and Wireless Device	22 March 2005	200520040296.6	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
12	Automatic Mining Emulsifier Allocation Device	22 March 2005	200520040295.1	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
13	Gear Preventing Movement of Mining Machine and Anti-Movement System	25 April 2006	200620041293.9	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
14	Water Recycling Utilizing Device	25 April 2006	200620041292.4	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
15	Portable Electrical Switchboard	30 March 2006	200620040638.9	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type
16	Surveillance System for Under Mine Production Safety	30 March 2006	200620040637.4	Shanghai Datun Energy Resources Co., Ltd. (上海大屯能源股份有限公司)	new utility type

FURTHER INFORMATION ABOUT OUR DIRECTORS, SUPERVISORS, PROMOTER AND SUBSTANTIAL SHAREHOLDERS

Our Directors' and Supervisors' Service Contracts

Each of our executive Directors and Supervisors has entered into a service agreement with our Company. Principal particulars of these agreements are summarized below.

(a) Each service agreement is for an initial term of three years commencing on 29 November 2006 (subject to termination in certain circumstances as stipulated in the relevant agreement). Under each agreement, either party may terminate the agreement at any time by giving to the other not less than one (1) month's prior written notice.

(b) Under the current arrangements, the aggregate remuneration payable to the Directors shall be approved by shareholders' meeting from time to time. In addition, each of our executive Directors is entitled to social and welfare benefits provided under the relevant PRC laws and regulations (including, but not limited to, housing, food and childcare subsidy).

(c) Each of our executive Directors shall abstain from voting and not be counted in the quorum in respect of any resolution of the Board regarding the amount of annual salary or management bonus payable to him.

Our Directors' and Supervisors' Remuneration

The aggregate amounts of remuneration paid and benefits in kind granted to our Directors and our Supervisors in respect of the financial year ended 31 December 2003, 2004 and 2005 (being our last completed financial year) were approximately RMB1.24 million, RMB1.88 million and RMB 2.84 million, respectively. Save as disclosed under Note 31 to the Accountants' Report as included in Appendix I to this Prospectus, no Director or Supervisor received other remuneration or benefits in kind from our Company in respect of the three financial years ended 31 December 2005.

Under the existing arrangements currently in force, the aggregate amounts of remuneration payable to, and benefits in kind receivable by, our Directors and Supervisors from our Company in respect of the financial year ending 31 December 2006 are estimated to be approximately RMB2.54 million and RMB1.15 million, respectively.

Our Directors' and Supervisors' Interests and Short Positions

As disclosed in "Substantial Shareholder", none of our Directors and Supervisors is a legal or beneficial owner of any of our Shares.

Immediately following completion of the Global Offering, none of our Directors and Supervisors will have any interest or short position in our Shares, underlying shares or debentures of the Company or any of its associated corporations (within the meaning of Part XV of the SFO) which (i) will have to be notified to the Company and the Hong Kong Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests and short positions which they are taken or deemed to have under such provisions of the SFO) or (ii) will be required, pursuant to section 352 of the SFO, to be entered in the register referred to therein or (iii) will be required to be notified to the Company and the Hong Kong Stock Exchange pursuant to the Model Code for Securities Transactions by Directors of Listed Issuers as contained in Appendix 10 to the Hong Kong Listing Rules, in each case once our H Shares are listed on the Hong Kong Stock Exchange. For this purpose, the relevant regulatory provisions as mentioned above shall be deemed to apply to our Supervisors to the same extent as they apply to our Directors.

Our sole Promoter

As mentioned above, ChinaCoal Group is our sole Promoter. Save as disclosed in this Prospectus, no cash, securities or other benefit has been paid, allotted or given within the two years immediately preceding the date of this Prospectus, or is proposed to be paid, allotted or given, to ChinaCoal Group as our sole Promoter in connection with the Global Offering or the related transactions described in this Prospectus.

Our Substantial Shareholder — Disclosure of Interests

Immediately following completion of the Global Offering, so far as our Directors are aware (and taking no account of H Shares which may be taken up pursuant to the Global Offering and H Shares which may be issued pursuant to the exercise of the Over-allotment Option), the persons who will have interests or short positions in our Shares and underlying Shares which would fall to be disclosed to our Company under the provisions of Divisions 2 and 3 of Part XV of the SFO once our H Shares are listed, or who will be, directly or indirectly, interested in 10% or more of the nominal value of any class of share capital carrying rights to vote in all circumstances at general meetings of any member of our Company are set out in the section headed "Substantial Shareholder" of this prospectus.

Save as disclosed herein, but not taking into account any H Shares which may be taken up under the Global Offering, our Directors are not aware of any legal person or individual (not being a Director or chief executive of our Company) who will, immediately following the completion of the Global Offering, have any interest or short position in our Shares or underlying Shares which would fall to be disclosed to us under the provisions of Divisions 2 and 3 of Part XV of the Securities and Futures Ordinance, or be directly or indirectly interested in 10% or more of the nominal value of any class of share capital carrying rights to vote in all circumstances at general meetings of any other member of the Company.

Disclaimers

Save as disclosed in this Prospectus:

(a) none of our Directors or Supervisors is interested in our promotion, or in any assets which have been, within the two years immediately preceding the date of this Prospectus, acquired or disposed of by or leased to, our Company, or are proposed to be acquired or disposed of by or leased to our Company;

(b) none of our Directors or Supervisors is materially interested in any contract or arrangement subsisting at the date of this Prospectus which is significant in relation to our business;

(c) none of our Directors or Supervisors is a director or employee of ChinaCoal Group, being a company which is expected to have an interest in our Shares falling to be disclosed to the Company and the Hong Kong Stock Exchange under the provisions of Divisions 2 and 3 of Part XV of the SFO once our H Shares are listed on the Hong Kong Stock Exchange;

(d) as of the Latest Practicable Date, none of our Directors, Supervisors, their respective Associates or our sole shareholder, ChinaCoal Group, had any interest in any of our top five suppliers and top five customers in respect of each of our business segments.

OTHER INFORMATION

Estate Duty and Tax Indemnity

Our Directors have been advised by Jia Yuan Law Firm, our legal advisers as to PRC law, that currently there is no PRC law imposing liability for estate duty and that no material liability for estate duty under PRC law is likely to be imposed on our Company.

Pursuant to the Restructuring Agreement, ChinaCoal Group has given indemnities in connection with or arising from, among others, (i) all taxes payable in respect of the transferred assets on or before the effective date of the Restructuring; and (ii) all taxes not provided for by any tax provisions in the audited financial reports that are payable in respect of the transferred assets arising prior to 22 August 2006, the date of establishment of the Company.

Litigation

Save as disclosed in "Business — Legal Proceedings", as of the Latest Practicable Date, our Company was not involved in any other litigation of material importance, and no litigation or claim of material importance was known to our Directors to be pending or threatened against our Company that would have an effect on our Company's results of operations or financial condition.

No Material Adverse Change

Our Directors confirm that there has been no material adverse change in our Company's financial or trading position since 30 June 2006.

Preliminary Expenses

The estimated preliminary expenses incurred or proposed to be incurred are approximately RMB100 million and are payable by our Company.

Joint Sponsors

Each of our Joint Sponsors, namely, China International Capital Corporation (Hong Kong) Limited, Citigroup Global Markets Asia Limited and Morgan Stanley Dean Witter Asia Limited, is independent from our Company pursuant to Rule 3A.07 of the Hong Kong Listing Rules.

The Joint Sponsors have made an application on our behalf to the Listing Committee of the Hong Kong Stock Exchange for the listing of, and permission to deal in, the Offer Shares, including any Offer Shares which may be issued pursuant to the exercise of the Over-allotment Option. All necessary arrangements have been made for the H Shares to be admitted into CCASS.

Joint Compliance Advisers

We have agreed to appoint CICC (HK) and Citigroup, to be our Joint Compliance Advisers upon listing in compliance with Rules 3A.19 and 19A.05 of the Hong Kong Listing Rules. We will enter into a compliance advisers' agreement with the Joint Compliance Advisers prior to the listing date, the material terms of which are as follows:

1. we will appoint CICC (HK) and Citigroup, as our Joint Compliance Advisers for the purpose of Rules 3A.19 and 19A.05 of the Hong Kong Listing Rules for a period commencing on the date of listing of our H Shares on the Hong Kong Stock Exchange and ending on the date on which we comply with Rule 13.46 of the Hong Kong Listing Rules in respect of our financial results for the financial year ending 31 December 2007, or until the agreement is terminated, whichever is earlier;
2. the Joint Compliance Advisers will provide us with services, including providing us with proper guidance and advice as to compliance with the requirements under the Hong Kong Listing Rules and applicable laws, rules, codes and guidelines and to provide advice to our Company on the continuing requirements under the Hong Kong Listing Rules and applicable laws and regulations;
3. the Joint Compliance Advisers will, as soon as reasonably practicable, inform us of any amendment or supplement to the Hong Kong Listing Rules announced by the Hong Kong Stock

Exchange from time to time, and of any amendment or supplement to the applicable laws and guidelines;

4. the Joint Compliance Advisers will act as our principal channel of communication with the Hong Kong Stock Exchange;
5. we will agree to indemnify the Joint Compliance Advisers for certain actions against and losses incurred by the Joint Compliance Advisers arising out of or in connection with the performance by the Joint Compliance Advisers of their duties under the agreement, or any material breach by us of the provisions of the agreement, provided that the indemnity will not apply to any action or loss which is finally judicially determined to have been caused by the willful default, fraud or gross negligence on the part of the Joint Compliance Advisers; and
6. we may terminate the appointment of a joint compliance adviser if such joint compliance adviser's work is of an unacceptable standard or if there is a material dispute over fees payable to the joint compliance adviser (which cannot be resolved within 30 days); the Joint Compliance Advisers will have the right to terminate their appointment if we committed a breach of the agreement, or by service of three months' written notice to us.

Experts

The qualifications of the experts who have given opinions in this Prospectus are as follows:

Name	Qualification
(in alphabetical order)	
China International Capital Corporation (Hong Kong) Limited	Licensed under the Securities and Futures Ordinance for type 1 (dealing in securities), type 4 (advising on securities) and type 6 (advising on corporate finance) as defined under the Securities and Futures Ordinance
Citigroup Global Markets Asia Limited	Licensed under the Securities and Futures Ordinance for type 1 (dealing in securities), type 4 (advising on securities) and type 6 (advising on corporate finance) as defined under the Securities and Futures Ordinance
Morgan Stanley Dean Witter Asia Limited	Licensed under the Securities and Futures Ordinance for type 1 (dealing in securities), type 4 (advising on securities), and type 6 (advising on corporate finance) as defined under the Securities and Futures Ordinance
Jia Yuan Law Firm	Registered law firm in the PRC
PricewaterhouseCoopers	Certified Public Accountants
Savills Valuation and Professional Services Limited	Chartered Surveyors and Valuer
Steffen, Robertson and Kirsten (Australiasia) Pty Ltd trading as SRK Consulting	Mining engineering consultants

Save as disclosed in this Prospectus or in connection with the Underwriting Agreements, none of these experts has any shareholding in our Company or any right (whether legally enforceable or not) to subscribe for or to nominate persons to subscribe for securities in our Company.

Save as disclosed in this Prospectus, none of the experts named above is interested in our promotion, or in any assets which have been, within the two years immediately preceding the date of this Prospectus, acquired or disposed of by or leased to, our Company, or are proposed to be acquired or disposed of by or leased to our Company.

The Joint Sponsors, Jia Yuan Law Firm (as our legal advisers as to PRC law), PricewaterhouseCoopers (as our independent reporting accountants), Savills Valuation and Professional Services Limited (as our independent property valuer) and Steffen, Robertson and Kirsten (Australiasia) Pty Ltd trading as SRK Consulting (as our independent technical consultant) have given and have not withdrawn their respective written consent to the issue of this Prospectus with the inclusion of their respective report(s), valuation certificate(s), letter(s) and/or opinion(s) and summaries of opinion(s) (as the case may be) and the references to their names included herein, all in the form and context in which they respectively appear.

Role of Financial Adviser

The financial adviser advises generally on the Reorganisation, management structure and human resources of our Company, assisting our Company in communicating with the PRC central government in obtaining PRC central government's approvals for the Reorganisation and the Global Offering and in identifying the parties involved in the Global Offering.

Exemptions from the Companies Ordinance provisions and the parallel rules under the Hong Kong Listing Rules

We have applied to the Hong Kong Stock Exchange for a waiver from strict compliance with:

(a) Rules 5.01, 5.06(1) and 5.06(3) of the Hong Kong Listing Rules, which require the particulars of each property to be disclosed in a valuation report on an individual basis;

(b) Rule 19A.27(4) of the Hong Kong Listing Rules relating to preparation of a certified English translation of a valuation report; and

(c) paragraph 3(a) of Practice Note 16 of the Hong Kong Listing Rules relating to the inclusion of a full valuation report in the Prospectus in respect of the properties legally and beneficially owned by us.

We have also applied for an exemption from the SFC from strict compliance with paragraph 34(2) of the Third Schedule to the Companies Ordinance relating to the disclosure of certain particulars of our properties in the valuation report on the grounds that it would not be practical and would be unduly burdensome for us to include a fully-compliant valuation report in this Prospectus and the inclusion of such detailed information would be irrelevant to potential investors as we are not a property company and would not be material to a potential investor's investment decision. The SFC has granted us a waiver pursuant to section 342A(1) of the Companies Ordinance.

The Hong Kong Stock Exchange has also granted us a waiver in respect of the preparation of an English translation of the valuation report since it would be unduly burdensome to prepare an English translation of the report, as substantially all of the properties are located in the PRC and consequently the underlying valuation and title information is in Chinese.

The exemption has been granted by the SFC under section 342(1) of the Companies Ordinance and the waiver has been granted by the Hong Kong Stock Exchange from Rules 5.01, 5.06(1), 5.06(3) and 19A.27(4) and paragraph 3(a) of Practice Note 16 of the Hong Kong Listing Rules, subject to the following conditions:

- a full valuation report in the Chinese language complying with all the applicable requirements of the Hong Kong Listing Rules and paragraph 34(2) of the Third Schedule will be made available for inspection in accordance with "Appendix XI — Documents Delivered to the Registrar of Companies and Available for Inspection";

- the valuer's letter and the valuer's certificate containing a summary valuation of all of our property interests, including particulars of occupancy, market values and the title status thereof, based on the full valuation report, will be included in this Prospectus in the form set out in Appendix V to this Prospectus; and
- this Prospectus must set out particulars of this exemption.

Miscellaneous

Save as disclosed in this Prospectus:

(a) within the two years immediately preceding the date of this Prospectus, our Company has not issued nor agreed to issue any share or loan capital fully or partly paid either for cash or for a consideration other than cash;

(b) no share or loan capital of our Company, if any, is under option or is agreed conditionally or unconditionally to be put under option;

(c) we have not issued any founder or management or deferred shares;

(d) we have no outstanding convertible debt securities or debentures;

(e) within the two years immediately preceding the date of this Prospectus, no commission, discount, brokerage or other special term has been granted in connection with the issue or sale or any capital of our Company;

(f) there is no arrangement under which future dividends are waived or agreed to be waived;

(g) there have been no interruption in our business which may have or have had a significant effect on the financial position in the last 12 months;

(h) no part of our equity or debt securities, if any, is currently listed on or dealt in on any stock exchange or trading system, and no such listing or permission to list on any stock exchange other than the Hong Kong Stock Exchange is currently being or agreed to be sought.

We currently do not intend to apply for the status of a sino-foreign investment joint stock limited company and do not expect to be subject to the PRC Sino-Foreign Joint Venture Law.

Binding Effect

This Prospectus shall have the effect, if an application is made in pursuance hereof, of rendering all persons concerned bound by all the provisions (other than the penal provisions) of sections 44A and 44B of the Companies Ordinance so far as applicable.

Bilingual Prospectus

The English language and Chinese language versions of this Prospectus are being published separately, in reliance upon the exemption provided under section 4 of the Companies Ordinance (Exemption of Companies and Prospectuses from Compliance with Provisions) Notice (Chapter 32L of the Laws of Hong Kong).

1. DOCUMENTS DELIVERED TO THE REGISTRAR OF COMPANIES

The documents attached to the copy of this Prospectus and delivered to the Registrar of Companies in Hong Kong for registration were copies of the WHITE and YELLOW Application Forms, the written consents referred to in Appendix X, the statement of adjustments prepared by PricewaterhouseCoopers referred to in paragraph 2(b) of Appendix XI, and copies of the material contracts referred to under "Our Material Contracts" in Appendix X.

2. DOCUMENTS AVAILABLE FOR INSPECTION

Copies of the following documents will be available for inspection at the offices of Baker & McKenzie at 14th Floor, Hutchison House, 10 Harcourt Road, Central, Hong Kong during normal business hours up to and including 20 December 2006:

(a) the Articles of Association;

(b) the accountants' report prepared by PricewaterhouseCoopers, the text of which is set out in Appendix I, together with the related statement of adjustments;

(c) the report on unaudited pro forma financial information prepared by PricewaterhouseCoopers, the text of which is set out in Appendix II;

(d) the audited accounts of companies comprising the Group for each of the years ended 31 December 2003, 2004 and 2005 and the six months ended 30 June 2006;

(e) the letters relating to the profit forecast of our Company, the texts of which are set out in Appendix III;

(f) the report on unaudited PRC GAAP interim financial information of Shanghai Datun Energy prepared by PricewaterhouseCoopers, the text of which is set out in Appendix IV;

(g) the letter dated 6 December 2006 and valuation certificates relating to our property interests prepared by Savills Valuation and Professional Services Limited, the text of which are set out in Appendix V and the full valuation report of Savills Valuation and Professional Services Limited in Chinese referred to in "Business — Properties" in this Prospectus (in Chinese only);

(h) the report of the independent technical consultant, Steffen Robertson and Kirsten (Australasia) Pty Ltd, which is set out in Appendix VI;

(i) the PRC Company Law, the Special Regulations, the Mandatory Provisions together with unofficial English translation thereof;

(j) the material contracts referred to under "Our Material Contracts" in Appendix X;

(k) the written consents referred to in Appendix X;

(l) the PRC legal opinion issued by Jia Yuan Law Firm, the legal advisors to our Company on PRC law, dated 1 November 2006 confirming that in their opinion, the summary of relevant PRC laws and principal regulatory provisions set out in Appendix VIII is a correct summary of the relevant PRC laws and regulatory provisions; and

(m) the service contracts between the Directors and our Company relating to the terms of appointment of the Directors referred to under "Our Directors' and Supervisors' Service Contracts" in Appendix X.

(This Page Intentionally Left Blank)

Please use this form if you want the Hong Kong Public Offer Shares to be issued in your name 如 閣下欲以本身的名義登記將獲發行的香港公開發售股份，請用本表格

I/We:
- apply for the number of Hong Kong Public Offer Shares set out below, on the terms and conditions of the Prospectus and this application form, and subject to the Articles of Association;
- enclose payment in full for the Hong Kong Public Offer Shares applied for, including 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee;
- undertake and agree to accept the Hong Kong Public Offer Shares applied for, or any lesser number allocated to me/us on this application;
- declare that this is the only application made and the only application intended by me/us to be made whether on a WHITE or YELLOW application form or by giving electronic application instructions to HKSCC, to benefit me/us or the person for whose benefit I am/we are applying;
- undertake and confirm that I/we and the person for whose benefit I am/we are applying have not indicated an interest for, applied for or taken up, or received or been placed or allocated (including conditionally and/or provisionally) and will not indicate an interest for, apply for or take up any International Offer Shares under the International Offering nor otherwise participate in the International Offering;
- understand that this declaration and representation will be relied upon by the Company, the Joint Global Coordinators and the Joint Lead Managers in deciding whether or not to make any allotment of Hong Kong Public Offer Shares in response to this application;
- authorize the Company to place my/our name(s) on the register of members of the Company as the holder(s) of any Hong Kong Public Offer Shares to be allotted to me/us, and (subject to the terms and conditions set out on the pages attached to this Application Form) to send any Hong Kong Public Offer Share certificate(s) and/or any refund cheque(s) by ordinary post at my/our own risk to the address given on this application form except where I/we have applied for 1,000,000 or more Hong Kong Public Offer Shares and have indicated on this application form that I/we wish to collect any share certificate(s) and/or any refund cheque(s) in person in accordance with the procedures prescribed in this application form;
- request that any refund cheque(s) be made payable to me or, in the case of joint applicants the first-named of us in this application form;
- have read the terms and conditions and application procedures set out on the pages attached to this application form and in the Prospectus and agree to be bound by them;
- represent, warrant and undertake that the allotment of or application for the Hong Kong Public Offer Shares to me/us or by me/us or for whose benefit this application is made would not require the Company to comply with any requirements under any law or regulation (whether or not having the force of law) of any territory outside Hong Kong; and
- agree that this application, any acceptance of it and the resulting contract, will be governed by and construed in accordance with the laws of Hong Kong.

本人／吾等：
- 按照招股說明書及本申請表格的條款及條件，並在公司章程所載的各項規限下，申請以下數目的香港公開發售股份；
- 夾附申請香港公開發售股份所需的全數股款（包括1%經紀佣金、0.004%證監會交易徵費及0.005%香港聯交所交易費）；
- 承諾及同意接納本人／吾等於本項申請所申請的香港公開發售股份，或本人／吾等獲配發的任何較少數目的香港公開發售股份；
- 聲明是項認購申請乃為本人／吾等的利益，或本人／吾等所代表人士的利益以白色或黃色申請表格或向香港結算發出電子認購指示所作出及僅作出的唯一認購申請；
- 承諾及確認本人／吾等及本人／吾等為其利益作出申請的人士並無表示有意認購、申請或獲配售或分配（包括有條件及／或暫時性質），亦不會表示有意認購、申請或接納國際發售項下的任何國際發售股份，亦不會參與國際發售；
- 明白 貴公司、聯席全球協調人及聯席賬簿管理人將倚賴本聲明及陳述，以決定是否就是項認購申請配發任何香港公開發售股份；
- 授權 貴公司將本人／吾等的名稱列入 貴公司股東名冊內，作為任何將配發予本人／吾等的香港公開發售股份的持有人，並（在符合本申請表格隨附各頁所載的條款及條件的情況下）按本申請表格上所示地址以普通郵遞方式寄發任何香港公開發售股份股票及／或任何退款支票，郵誤風險概由本人／吾等承擔（除非本人／吾等已申請1,000,000股或以上香港公開發售股份，並已於本申請表格上表明擬按本申請表格所述程序親自領取任何股票及／或退款支票）；
- 要求發出退款支票以本人或（如屬聯名申請人）本申請表格內吾等中排名首位者為抬頭人；
- 已細閱並同意遵守本申請表格隨附各頁及招股說明書所載的條款、條件及申請手續；
- 聲明、保證及承諾向本人／吾等或由本人／吾等或為其利益而提出本申請的人士的香港公開發售股份的配發或申請不會引致 貴公司須遵從香港以外任何地區的法律或法規的任何規定（不論是否具法律效力）；及
- 同意本申請、任何對申請的接納以及因其而產生的合同，將受香港法律規管及按其詮釋。

Warning:
- It is important that you read the terms and conditions and application procedures overleaf.
- Only one application may be made for the benefit of any person on a WHITE or YELLOW Application Form or by way of giving electronic application instructions to HKSCC. Multiple or suspected multiple applications on WHITE and/or YELLOW Application Forms and/or by way of giving electronic application instructions to HKSCC, applications made by one applicant on either a WHITE or YELLOW Application Form or by way of giving electronic application instructions to HKSCC for more than 81,160,000 Hong Kong Public Offer Shares, and applications where cheques or banker's cashier orders are dishonoured upon first presentation will be rejected.
- You may be prosecuted if you make a false declaration.

警告：
- 閣下必須細閱背頁的條款及條件及申請手續。
- 任何人士僅限以白色或黃色申請表格或向香港結算發出電子認購指示以受益人身份作出一次認購申請。以白色及／或黃色申請表格及／或向香港結算發出電子認購指示作出的重複或疑屬重複認購申請，由一位申請人以白色或黃色申請表格或向香港結算發出電子認購指示提出超過81,160,000股香港公開發售股份，以及支票或銀行本票於首次過戶時不獲兌現的認購申請，均會被拒絕受理。
- 閣下如作出虛假聲明，可能會遭受檢控。

* *for identification purposes only*

Your occupation in English 職業(以英文填寫)		**Your Hong Kong Identity Card No./ Passport No./Hong Kong Business Registration No.** (Please delete as appropriate) 閣下的香港身份證號碼／護照號碼／香港商業登記證號碼** (請刪除不適用者)**	
Names of all other joint applicants in English (if any) 所有其他聯名申請人的英文姓名(如有)	(1) (2) (3)	**Hong Kong Identity Card No./ Passport No./ Hong Kong Business Registration No. of all other joint applicants** (Please delete as appropriate) 所有其他聯名申請人的香港身份證號碼／護照號碼／香港商業登記證號碼** (請刪除不適用者)**	(1) (2) (3)
Your address in English (joint applicants should give address of first-named applicant only) Only an address in Hong Kong will be accepted 地址(以英文填寫)(聯名申請人只須填寫排名首位申請人的地址)只接受香港地址		Telephone No. 電話號碼	

For nominees : Please provide an account number or identification code for each (joint) beneficial owner(s).
由代名人遞交：請填寫各(聯名)實益擁有人的賬戶號碼或識別編碼。

If you are a nominee and you do not complete this section, this application will be treated as being made for your benefit. The account number or identification code for each (joint) beneficial owner must be provided.
如 閣下為代名人，而並無填妥本節，則是項認購申請將被視作為 閣下本身利益提出。 閣下必須填寫各(聯名)實益擁有人的賬戶號碼或識別編碼。

** (a) For individuals, you must provide your Hong Kong Identity Card number or passport number. If you hold a Hong Kong Identity Card, please provide your Hong Kong Identity Card number. If you do not hold a Hong Kong Identity Card, please provide your passport number. For a body corporate, please provide your Hong Kong Business Registration number. Such Hong Kong Identity Card number/Passport number/Hong Kong Business Registration Certificate number will be used for checking the validity of application forms and such data would be transferred to a third party for the accomplishment of such purpose. All joint applicants must give (if they are individuals) their Hong Kong Identity Card numbers or, where applicable, passport numbers, or (if they are bodies corporate) their Hong Kong Business Registration Certificate numbers.
如屬個人， 閣下必須填寫香港身份證號碼或護照號碼。如 閣下持有香港身份證，請填寫香港身份證號碼；否則，請填寫護照號碼。如屬法人團體，請填寫香港商業登記證號碼。該等香港身份證號碼／護照號碼／香港商業登記證號碼將用於核實申請表格的有效性，為此，該等資料將轉交予第三方。所有聯名申請人必須提供(如屬個人)其香港身份證號碼或(如適用)護照號碼或(如屬法人團體)其香港商業登記證號碼。

(b) Part of your Hong Kong Identity Card number/passport number or, if you are joint applicants, part of the Hong Kong Identity Card number/passport number of the first-named applicant, provided by you may be printed on your refund cheque (if any). Such data would also be transferred to a third party for refund purpose. Your banker may require verification of your Hong Kong Identity Card number/passport number before encashment of your refund cheque. Inaccurate completion of your Hong Kong Identity Card number/ passport number may lead to delay in encashment of or may invalidate your refund cheque.
閣下所提供的香港身份證號碼／護照號碼的一部分(倘為聯名申請人，名列首位申請人的香港身份證號碼／護照號碼的一部分)可能會列印在 閣下的退款支票(如有)上，為退款目的，該等資料也將轉交予第三方。在兌現 閣下的退款支票前，銀行可能會要求核實 閣下的香港身份證號碼／護照號碼。倘 閣下的香港身份證號碼／護照號碼填寫有誤，可能會導致 閣下退款支票兌現延遲或無效。

☐ Applicants who have applied for 1,000,000 or more Hong Kong Public Offer Shares and wish to collect refund cheque(s) and/or share certificate(s), if any, in person from the Company's H Share registrar, Computershare Hong Kong Investor Services Limited, at Rooms 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong on the dates for collection of refund cheque(s) and/or share certificate(s) (where relevant), which is expected to be on Monday, 18 December, 2006, should mark '✓' in the box on the left.

☐ 凡申請1,000,000股或以上香港公開發售股份，並擬親身於領取退款支票及／或股票(如有)當日(預計為2006年12月18日(星期一))前往本公司的H股過戶登記處香港中央證券登記有限公司(地址為香港灣仔皇后大道東183號合和中心17樓1712-1716室)領取退款支票及／或股票(如適用)的申請人，請在左方空格內填上「✓」號。

CHINA COAL ENERGY COMPANY LIMITED*

中國中煤能源股份有限公司

(A joint stock limited company incorporated in the People's Republic of China with limited liability)

GLOBAL OFFERING

Conditions of your application

A. Who can apply

1. You, the applicant(s), and any person(s) for whose benefit you are applying, must be 18 years of age or older and must have a Hong Kong address.
2. If you are a firm, the application must be in the names of the individual members, not the firm's name. The number of joint applicants may not exceed 4.
3. If you are a body corporate, the application must be signed by a duly authorised officer, who must state his or her representative capacity.
4. Save under the circumstances permitted by the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Hong Kong Listing Rules"), you cannot apply for any Hong Kong Public Offer Shares if you are:
   - an existing beneficial owner of Shares in the Company;
   - the chief executive, a director or a supervisor of the Company or any of its subsidiaries;
   - a connected person (as defined in the Hong Kong Listing Rules) of the Company or a person who will become a connected person of the Company immediately upon completion of the Global Offering;
   - an associate of any of the above (as "associate" is defined in the Hong Kong Listing Rules);
   - a legal or natural person of the People's Republic of China (other than Hong Kong, Macau and Taiwan), a United States person (as defined in the Regulation S under the United States Securities Act of 1933, as amended); or
   - a person who does not have a Hong Kong address.

B. If you are a nominee

You may make more than one application for the Hong Kong Public Offer Shares if and only if you are a nominee, in which case you may make an application by: (i) giving electronic application instructions to HKSCC via CCASS (if you are a CCASS Participant); or (ii) using a WHITE or YELLOW application form, and lodge more than one application in your own name if each application is made on behalf of different beneficial owners. In the box on this application form marked "For nominees", you must include:

- an account number; or
- some other identification code

for each beneficial owner or, in the case of joint beneficial owners, for each such beneficial owner. If you do not include this information, the application will be treated as being for your own benefit.

Lodge only one application for your benefit

Multiple applications or suspected multiple applications will be rejected. Save as referred to above, all of your applications (including the part of the application made by HKSCC Nominees Limited ("HKSCC Nominees") acting on electronic application instructions) will be rejected as multiple applications if you, or you and joint applicants together:

- make more than one application (whether individually or jointly with others) on a WHITE or YELLOW application form or by giving electronic application instructions to HKSCC via CCASS (if you are a CCASS Investor Participant or applying through a CCASS Broker or Custodian Participant); or
- both apply (whether individually or jointly) on one WHITE Application Form and one YELLOW Application Form or on WHITE or YELLOW Application Form and give electronic application instructions to HKSCC via CCASS; or apply on one WHITE or YELLOW application form (whether individually or jointly) or by giving electronic application instructions to HKSCC via CCASS (if you are a CCASS Investor Participant or applying through a CCASS Broker or Custodian Participant) for more than 50% of the H Shares initially being offered for public subscription under the Hong Kong Public Offer Shares; or
- have applied for or taken up, or indicated an interest in, or have been or will be placed (including conditionally and/or provisionally) International Offer Shares under the International Offering or otherwise participated or will participate in the International Offering.

Save as referred to above, all of your applications will also be rejected as multiple applications if more than one application is made for your benefit (including the part of the application made by HKSCC Nominees acting on electronic application instructions). If an application is made by an unlisted company and

- the only business of that company is dealing in securities; and
- you exercise statutory control over that company

then the application will be treated as being made for your benefit.

Unlisted company *means a company with no equity securities listed on the Hong Kong Stock Exchange.*

Statutory control *means you:*

- *control the composition of the board of directors of a company; or*
- *control more than half of the voting power of a company; or*
- *hold more than half of the issued share capital of a company (not counting any part of it which carries no right to participate beyond a specified amount in a distribution of either profits or capital).*

D. Allocation of Hong Kong Public Offer Shares – Pools A and B

The 162,320,000 Hong Kong Public Offer Shares initially being offered for subscription under the Hong Kong Public Offering (after taking into account of any adjustment in the number of Offer Shares allocated between the Hong Kong Public Offering and the International Offering) will be divided into two pools for allocation purposes: Pool A and Pool B. The Hong Kong Public Offer Shares in Pool A will be allocated on an equitable basis to successful applicants who have applied for Hong Kong Public Offer Shares with a total subscription amount (excluding 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee) of HK$5,000,000 or less. The Hong Kong Public Offer Shares in Pool B will be allocated on an equitable basis to successful applicants who have applied for Hong Kong Public Offer Shares with a total subscription amount (excluding 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee) of more than HK$5,000,000 and up to the total value of Pool B. You should be aware that applications in Pool A and applications in Pool B are likely to receive different allocation ratios. If Hong Kong Public Offer Shares in one pool (but not both pools) are undersubscribed, the surplus Hong Kong Public Offer Shares in that pool will be transferred to the other pool to satisfy demand in that other pool and be allocated accordingly. You can only receive an allocation of Hong Kong Public Offer Shares from either Pool A or Pool B but not from both pools. Multiple or suspected multiple applications and any application for more than 81,160,000 Hong Kong Public Offer Shares are liable to be rejected. Allocation of Hong Kong Public Offer Shares to investors under the Hong Kong Public Offering, both in relation to Pool A and Pool B, will be based solely on the level of valid applications received under the Hong Kong Public Offering. The basis of allocation may vary, depending on the number of Hong Kong Public Offer Shares validly applied for by applicants, although the allocation of Hong Kong Public Offer Shares could, where appropriate, consist of balloting, which would mean that some applicants may receive a higher allocation than others who have applied for the same number of Hong Kong Public Offer Shares, and those applicants who are not successful in the ballot may not receive any Hong Kong Public Offer Shares.

Supplemental information

If any supplement to the Prospectus is issued, applicant(s) who have already submitted an application may or may not (depending on the information contained in the supplement) be notified that they can withdraw their applications. If applicant(s) have not been so notified, or if applicant(s) have been notified but have not withdrawn their applications in accordance with the procedure to be notified, all applications that have been submitted remain valid and may be accepted. Subject to the above, an application once made is irrevocable and applicants shall be deemed to have applied on the basis of the Prospectus as supplemented.

F. Effect of completing and submitting this Application Form

By completing and submitting this application form, you (and if you are joint applicants, each of you jointly and severally) for yourself or as agent or nominee and on behalf of each person for whom you act as agent or nominee:

- instruct and authorise the Company and/or the Joint Global Coordinators (or their respective agents or nominees) as agents of the Company to execute any transfer forms, contract notes or other documents on your behalf and to do on your behalf all other things necessary to effect registration of any Hong Kong Public Offer Shares allocated to you in your name(s) as required by the Articles of Association and otherwise to give effect to the arrangements described in the Prospectus and this application form;
- undertake to sign all documents and to do all things necessary to enable you to be registered as the holder of the Hong Kong Public Offer Shares allocated to you, and as required by the Articles of Association;
- confirm that you have received a copy of the Prospectus you have only relied on the information and representations contained in the Prospectus in making your application and will not rely on any other information and representations save as set out in any supplement to the Prospectus;
- agree that the Company, the Directors, the Joint Global Coordinators, the Underwriters, any other parties involved in the Global Offering and any of their respective directors, officers, employees, partners, agents or advisers are liable only for the information and representations contained in the Prospectus, the Application Forms and any supplement to the Prospectus;
- agree (without prejudice to any other rights which you may have) that once your application has been accepted, you may not rescind it because of an innocent misrepresentation and you may not revoke it other than as provided in the Prospectus;
- (if the application is made for your own benefit) warrant that the application is the only application which will be made for your benefit on a WHITE or YELLOW application form or by giving electronic application instructions to HKSCC via CCASS;
- (if the application is made by an agent on your behalf) warrant that you have validly and irrevocably conferred on your agent all necessary power and authority to make this application;
- (if you are an agent for another person) warrant that reasonable enquiries have been made of that other person that this is the only application which will be or has been made for the benefit of that other person on a WHITE or YELLOW application form or by giving electronic application instructions to HKSCC via CCASS, and that you are duly authorised to sign this application form or that other person's agent;
- undertake and confirm that you (if the application is made for your benefit) or the person(s) for whose benefit you have made the application have not applied for or taken up, or indicated an interest in, and will not apply for or take up or indicate any interest in any International Offer Shares under the International Offering, nor otherwise have participated or will participate in the International Offering;
- warrant the truth and accuracy of the information contained in your application;
- agree to disclose to the Company, the H Share registrar, the receiving bankers, the Joint Global Coordinators, the Underwriters and/or their respective advisers and agents personal data and any information which they require about you or the person(s) for whose benefit you have made this application;
- agree that your application, any acceptance of it and the resulting contract will be governed by and construed in accordance with the laws of Hong Kong;
- undertake and agree to accept the Hong Kong Public Offer Shares applied for, or any lesser number allocated to you under this application;
- authorise the Company to place your name(s) on the register of members of the Company as the holder(s) of any Hong Kong Public Offer Shares allocated to you, and the Company and/or its agents to send any share certificate(s) and/or any refund cheque(s) (where applicable) to you or (in case of joint applicants) the first-named applicant in the application form by ordinary post at your own risk to the address stated on your application form (except that if you have applied for 1,000,000 Hong Kong Public Offer Shares or more and have indicated in your application form that you will collect your share certificate(s) and refund cheque(s) (if any) in person, you can collect your share certificate(s) and/or refund cheque(s) (where applicable) in person between 9:00 a.m. and 1:00 p.m. on Monday, 18 December, 2006 from Computershare Hong Kong Investor Services Limited);
- understand that these declarations and representations will be relied upon by the Company, the Directors and the Joint Global Coordinators in deciding whether or not to allocate any Hong Kong Public Offer Shares in response to your application and that you may be prosecuted for making a false declaration;
- if the laws of any place outside Hong Kong are applicable to your application, you agree and warrant that you have complied with all such laws and none of the Company, the Joint Global Coordinators, the Underwriters and the other parties involved in the Global Offering nor any of their respective directors, employees, partners, agents, officers or advisers will infringe any laws outside Hong Kong as a result of the acceptance of your offer to purchase, or any actions arising from your rights and obligations under the terms and conditions contained in the Prospectus;
- agree with the Company, for itself and for the benefit of each shareholder of the Company, and so that the Company will be deemed by its acceptance in whole or in part of the application, to have agreed for itself and on behalf of each shareholder of the Company, to observe and comply with the Company Law, the Special Regulations, and the Articles of Association;
- agree with the Company, each shareholder, Director, Supervisor, manager and officer of the Company, and the Company (acting for itself and for each Director, Supervisor, manager and officer) agrees with each shareholder of the Company, to refer all differences and claims arising from the Articles of Association or any rights or obligations conferred or imposed by the Company Law or other relevant laws and administrative regulations concerning its affairs to arbitration in accordance with the Articles of Association, and any reference to arbitration shall be deemed to authorize the arbitration tribunal to conduct hearings in open session and to publish its award, which arbitration shall be final and conclusive;
- agree with the Company and each shareholder of the Company that H Shares in the Company are freely transferable by the holders thereof; and
- authorise the Company to enter into a contract on behalf of you with each of the Director, Supervisors and officer of the Company whereby such Directors, Supervisors and officers undertake to observe and comply with his obligations to shareholders stipulated in the Articles of Association.

The Company, the Joint Global Coordinators, the Underwriters, other parties involved in the Global Offering and their respective directors, officers, employees, partners, agents and advisers are entitled to rely on any warranty, representation or declaration made by you in this application. In the event of the application being made by joint applicants, all the warranties, representations, declarations and obligations expressed to be made, given or assumed by or imposed on the joint applicants shall be deemed to have been made, given and assumed by and imposed on the applicants jointly and severally.

G. Power of attorney

If your application is made through a duly authorized attorney, the Company and the Joint Global Coordinators (or their respective agents and nominees) as agent for the Company may accept your application at their discretion, and subject to any conditions they think fit, including production of evidence of the authority of your attorney. The Company and the Joint Global Coordinators in their capacity as agent for the Company have discretion to reject or accept any application, in full or in part, without assigning any reason.

H. Determination of Offer Price

The Offer Price is expected to be fixed by agreement between the Joint Global Coordinators (on behalf of the Underwriters) and the Company on or around Wednesday, 13 December, 2006 and, in any event, not later than Sunday, 17 December, 2006. Applicants for Hong Kong Public Offer Shares are required to pay, on application, the maximum offer price of HK$4.05, for each Hong Kong Public Offer Share together with 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee, subject to refund if the Offer Price should be lower than HK$4.05. Please note that the Price Determination Date, being the date on which the Offer Price is to be determined, is expected to be on or around Wednesday, 13 December, 2006, which is during the time period in which applications may be made for Hong Kong Public Offer Shares. The fixed Offer Price will be announced together with the result of application of the Hong Kong Public Offering on Monday, 18 December, 2006 in the South China Morning Post (in English) and in the Hong Kong Economic Times (in Chinese). The Joint Global Coordinators (on behalf of the Underwriters and with the Company's consent) may reduce the number of Offer Shares and/or the indicative offer price range below that stated in the Prospectus (which is HK$3.20 to HK$4.05 per Hong Kong Public Offer Share) at any time prior to the morning of the last day for lodging applications under the Hong Kong Public Offering. In such a case, notices of the reduction in the number of Offer Shares and/or the indicative offer price range will be published in the South China Morning Post (in English) and the Hong Kong Economic Times (in Chinese) no later than the morning of the day which is the last day for lodging applications under the Hong Kong Public Offering. Applicants should have regard to the possibility that any announcement of a reduction in the number of Offer Shares and/or indicative offer price range may not be made until that time. If applications for Hong Kong Public Offer Shares have been submitted prior to the day which is the last day for lodging applications under the Hong Kong Public Offering, then even if the number of Offer Shares and/or the indicative offer price range is reduced, such applications cannot be subsequently withdrawn. If, for any reason, the Offer Price is not agreed between the Company and the Joint Global Coordinators (on behalf of the Underwriters) on or before Sunday, 17 December, 2006 the Global Offering will not proceed.

Allotment of Hong Kong Public Offer Shares

Subject to the terms and conditions as set out herein and in the Prospectus, the application for the Hong Kong Public Offer Shares will not be processed and no allotment of any such Hong Kong Public Offer Shares will be made until the closing of the application lists. No allotment shall be made later than Monday, 11 December, 2006.

The Company expects to announce the basis of allotment and results of applications of the Hong Kong Public Offering and the Hong Kong identity cards/passports/Hong Kong business registration numbers of successful applicants (where supplied) under the Hong Kong Public Offering on Monday, 18 December, 2006 in the South China Morning Post (in English) and the Hong Kong Economic Times (in Chinese).

If your application for Hong Kong Public Offer Shares is successful (in whole or in part)

If you have applied for 1,000,000 Hong Kong Public Offer Shares or more and have indicated on your application form that you wish to collect your Hong Kong Public Offer Share certificate(s), you may collect it/them in person from:

Computershare Hong Kong Investor Services Limited
Rooms 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong

between 9 a.m. and 1 p.m. on the date notified by the Company in the newspapers as the date of despatch of Hong Kong Public Offer Share certificate(s). This is expected to be Monday, 18 December, 2006.

If you are an individual, you must not authorize any other person to make collection on your behalf. You must produce evidence of identity (which must be acceptable to Computershare Hong Kong Investor Services Limited) to collect Hong Kong Public Offer Share certificate(s). If you are a corporate applicant, you must attend by your authorised representative bearing a letter of authorization from your corporation stamped with your corporation's chop. Each authorised representative must produce at the time of collection, evidence of identity acceptable to Computershare Hong Kong Investor Services Limited.

If you do not collect your share certificate(s) personally within the time period specified for collection, they will be despatched to you by ordinary post to the address as specified on this application form at your own risk.

If you applied for less than 1,000,000 Hong Kong Public Offer Shares or if you have applied for 1,000,000 or more Hong Kong Public Offer Shares and have not indicated in your application form that you wish to collect your share certificate(s) in person, then your Hong Kong Public Offer Share certificate(s) will be sent to the address on this application form on the date of despatch, which is expected to be on Monday, 18 December, 2006, by ordinary post and at your own risk. Hong Kong Public Offer Share certificates will only become valid certificates of title provided that the Hong Kong Public Offering has become unconditional and not have been terminated in accordance with its terms, which is expected to be around 8:00 a.m. on Tuesday, 19 December, 2006.

The Company will not issue temporary documents of title. No receipt will be issued for sums paid on application.

In the event that the Offer Price is less than the price per Hong Kong Public Offer Share paid by you, the surplus application monies (including the related 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee attributable to such surplus) will be refunded to you without interest.

Circumstances in which you will not be allotted Hong Kong Public Offer Shares

You may not be allotted Hong Kong Public Offer Shares if:

1. **Full discretion of the Company or its agents to reject or accept your application**
   The Company and the Joint Global Coordinators in their capacity as agent for the Company, or their respective agents and nominees, have full discretion to reject or accept any application, in whole or in part, without assigning any reason therefor.
2. **If your application is revoked or withdrawn**
   By completing and submitting this application form, you agree that you cannot revoke your application on or before Saturday, 6 January, 2007. This agreement will take effect as a collateral contract with the Company, and will become binding when you lodge your application form. This collateral contract will be in consideration of the Company agreeing that it will not offer any Hong Kong Public Offer Shares to any person on or before Saturday, 6 January, 2007 except by means of one of the procedures referred to in the Prospectus.
   You may only revoke your application on or before of Saturday, 6 January, 2007 if a person responsible for the Prospectus under section 40 of the Companies Ordinance gives a public notice under that section which excludes or limits the responsibility of that person for the Prospectus.
   If any supplement to the Prospectus is issued, applicant(s) who have already submitted an application may or may not (depending on the information contained in the supplement) be notified that they can withdraw their applications. If applicant(s) have not been so notified, or if applicant(s) have been notified but have not withdrawn their applications in accordance with the procedure to be notified, all applications that have been submitted remain valid and may be accepted. Subject to the above, an application once made is irrevocable and applicants shall be deemed to have applied on the basis of the Prospectus as supplemented.
   If your application has been accepted, it cannot be revoked or withdrawn. Acceptance of application will be constituted by notification to the press of the results of allocation and, where such basis of allocation is subject to certain conditions or provides for allocation by ballot, such acceptance will be subject to satisfaction of such conditions or the results of such ballot, respectively.
3. **If the allotment of Hong Kong Public Offer Shares is void**
   Your allotment of Hong Kong Public Offer Shares will be void if the Listing Committee of the Hong Kong Stock Exchange does not grant permission to list the H Shares either:
   - within three weeks from the closing of the application lists; or
   - within a longer period of up to six weeks if the Listing Committee of the Hong Kong Stock Exchange notifies the Company of that longer period within three weeks of the closing of the application lists.
4. **You made applications under the Hong Kong Public Offering as well as the International Offering**
   Your application will be rejected if:
   - you make multiple applications or suspected multiple applications; or
   - you or the person for whose benefit you are applying have applied for or taken up, or indicated an interest for or have been or will be placed or allocated (including conditionally and/or provisionally) Hong Kong Public Offer Shares and/or International Offering Shares in the International Offering.

   By filling in this application form, you agree not to apply for Hong Kong Public Offer Share as well as International Offering Shares under the International Offering. Reasonable steps will be taken to identify and reject applications under the Hong Kong Public Offering from investors who have received International Offering Shares in the International Offering and to identify and reject indications of interest in the International Offering from investors who have received Hong Kong Public Offer Shares in the Hong Kong Public Offering.
5. **Incorrect payment**
   You will not receive any allocation of Hong Kong Public Offer Shares if your payment is not made correctly.

* *for identification purposes only*

6. **If your application is not accepted**
Your application will not be accepted if:
- the Hong Kong Underwriting Agreement and the International Underwriting Agreement do not become unconditional; or
- the Hong Kong Underwriting Agreement or the International Underwriting Agreement is terminated in accordance with their respective terms.

7. **Application form not filled in correctly**
Your application will be rejected if your application form is not filled in correctly in accordance with the instructions.

8. **Dishonoured cheque or banker's cashier order**
Your application will be rejected if you pay by cheque or banker's cashier order and the cheque or banker's cashier order is dishonoured on its first presentation.

9. **If you apply for more than 50% of the Hong Kong Public Offer Shares**
Your application will be rejected if you apply for more than 50% of the Hong Kong Public Offer Shares initially being offered to the public for subscription.

Refund of your money

If you do not receive any Hong Kong Public Offer Shares for any of the above reasons, the Company will refund to you your application monies (including the related 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee). No interest will be paid thereon. All interests accrued on your application monies prior to the date of despatch or collection of the refund cheque will be retained for the benefit of the Company. If your application is accepted only in part, the Company will refund to you the appropriate portion of your application monies (including the related 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee) without interest. If the Offer Price as finally determined is less than the maximum Offer Price of HK$4.05 per H Share paid on application, the Company will refund to you the surplus application monies together with the related 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee attributable to the surplus application monies, without interest.

In a contingency situation involving a substantial over-subscription, at the discretion of the Company, the Joint Global Coordinators and the Joint Lead Managers, cheques for applications for certain small denominations of Hong Kong Public Offer Shares (apart from successful applications) may not be cleared. All refunds will be by cheque crossed "Account Payee Only", and made out to you, or, if you are a joint applicant, to the first-named applicant on your application form. Part of your Hong Kong Identity Card number/passport number, or, if you are joint applicants, part of the Hong Kong Identity Card number/passport number of the first-named applicant, provided by you may be printed on your refund cheque, if any. Such data would also be transferred to a third party for refund purpose. Your banker may require verification of your Hong Kong Identity Card number/passport number before encashment of your refund cheque. Inaccurate completion of your Hong Kong Identity Card number/passport number may lead to delay in encashment of or may invalidate your refund cheque.

If you have applied for 1,000,000 Hong Kong Public Offer Shares or more and have indicated on your application form that you wish to collect your refund cheque(s) (if any) in person, you may collect it in person from:

Computershare Hong Kong Investor Services Limited
Rooms 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong

between 9 a.m. and 1 p.m. on the date notified by the Company in the newspaper as the date of collection of refund cheques/despatch of H Share certificates. The date of collection is expected to be on Monday, 18 December, 2006.

If you are an individual who opts for personal collection you must not authorize any other person to make collection on your behalf. You must produce evidence of identity (which must be acceptable to Computershare Hong Kong Investor Services Limited) for collection of your refund cheque. If you are a corporate applicant and opt for personal collection you must attend by your authorised representative bearing a letter of authorisation from your corporation stamped with your corporation's chop. Such authorised representative must produce at the time of collection, evidence of identity acceptable to Computershare Hong Kong Investor Services Limited.

If you do not collect your refund cheque(s) personally within the time specified for collection, they will be despatched to you by ordinary post to the address on this application form at your own risk.

If you have applied for less than 1,000,000 Hong Kong Public Offer Shares or you have applied for 1,000,000 Hong Kong Public Offer Shares or more but have not indicated on your application form that you wish to collect your refund cheque personally, your refund cheque will be sent to the address on your application form on the date of despatch, which is expected to be on Monday, 18 December, 2006, by ordinary post and at your own risk.

It is intended that special efforts will be made to avoid undue delay in refunding monies where appropriate.

Application by HKSCC Nominees

Where this application form is signed by HKSCC Nominees on behalf of persons who have given electronic application instructions to apply for the Hong Kong Public Offer Shares, the provisions of this application form which are inconsistent with those set out in the Prospectus shall not apply and provisions in the Prospectus shall prevail. Without limiting the generality of this paragraph, the following sections of this application form are inapplicable where this form is signed by HKSCC Nominees:

- all warranties on the first page, except the first warranty concerning application for Hong Kong Public Offer Shares on the terms and conditions of the Prospectus and this application form, and subject to the Articles of Association;
- "Warning" on the first page;
- "If you are a nominee";
- "Lodge only one application for your benefit";
- All representations and warranties under the section headed "Effect of completing and submitting this Application Form", except the first two regarding registration of Hong Kong Public Offer Shares in the applicant's name and the signing of documents to enable the applicant to be registered as the holder of the Hong Kong Public Offer Shares applied for;
- "If your application for Hong Kong Public Offer Shares is successful (in whole or in part)";
- "Circumstances in which you will not be allotted Hong Kong Public Offer Shares"; and
- "Refund of your money".

Personal Data

Personal Information Collection Statement

The main provisions of the Personal Data (Privacy) Ordinance (the "Ordinance") came into effect in Hong Kong on 20 December 1996. This Personal Information Collection Statement informs the applicant for and holder of Hong Kong Public Offer Shares of the policies and practices of the Company and its H Share registrar in relation to personal data and the Ordinance.

1. Reasons for the collection of your personal data

From time to time it is necessary for applicants for securities or registered holders of securities to supply their latest correct personal data to the Company or its agents and the H Share registrar when applying for securities or transferring securities into or out of their names or in procuring the services of the registrars.

Failure to supply the requested data may result in your application for securities being rejected, delay or the inability of the Company or its H Share registrar to effect transfers or otherwise render their services. It may also prevent or delay registration of transfers of the Hong Kong Public Offer Shares which you have successfully applied for and/or the despatch of share certificate(s) and/or the despatch or encashment of refund cheque(s) to which you are entitled.

It is important that holders of securities inform the Company and the H Share Registrar immediately of any inaccuracies in the personal data supplied.

2. Purposes

The personal data of the holders of securities may be used, held and/or stored (by whatever means) for the following purposes:

- processing of your application and refund cheque, where applicable, and verification of compliance with the terms and application procedures set out in this application form and the Prospectus;
- registering new issues or transfers into or out of the names of holders of securities including, where applicable, HKSCC Nominees;
- maintaining or updating the register of holders of securities of the Company;
- conducting or assisting the conduct of signature verifications, any other verification or exchange of information;
- establishing benefit entitlements, such as dividends, rights issues and bonus issues;
- distributing communications from the Company and its subsidiaries;
- compiling statistical information and shareholder profiles;
- making disclosures as required by laws, rules or regulations;
- disclosing relevant information to facilitate claims on entitlements; and
- any other incidental or associated purposes relating to the above and/or to enable the Company and the H Share registrar to discharge their obligations to holders of securities and/or regulators and/or any other purposes to which the holders of securities may from time to time agree.

3. Transfer of personal data

Personal data held by the Company and its H Share registrar relating to the holders of securities will be kept confidential but the Company and its H Share registrar may, to the extent necessary for achieving the above purposes or any of them, make such enquiries as they consider necessary to confirm the accuracy of the personal data and in particular, they may disclose, obtain, transfer (whether within or outside Hong Kong) the personal data of the holders of securities to, from or with any and all of the following persons and entities:

- the Company or its appointed agents such as financial advisers and receiving bankers;
- where applicants for securities request deposit into CCASS, HKSCC or HKSCC Nominees, who will use the personal data for the purpose of operating CCASS;
- any agents, contractors or third-party service providers who offer administrative, telecommunications, computer, payment or other services to the Company or the registrars in connection with the operation of their respective businesses;
- any regulatory or governmental bodies (including the Hong Kong Stock Exchange and the SFC); and
- any other persons or institutions with which the holders of securities have or propose to have dealings, such as their bankers, solicitors, accountants or stockbrokers, etc.

4. Access to and correction of personal data

The Ordinance provides the holders of securities with rights to ascertain whether the Company or the registrars hold their personal data, to obtain a copy of that data, and to correct any data that is inaccurate. In accordance with the Ordinance, the Company and the H Share registrar have the right to charge a reasonable fee for the processing of any data access request. All requests for access to data or correction of data or for information regarding policies and practices and kinds of data held should be addressed to the Company for the attention of the Company secretary or (as the case may be) the H Share registrar for the attention of the Privacy Compliance Officer.

By signing this application form, you agree to all of the above.

How to make your application

1. Use the table set out below to calculate how much you must pay for the number of Hong Kong Public Offer Shares you want to subscribe for. Your application must be for a minimum of 1,000 Hong Kong Public Offer Shares. Applications must be in one of the numbers set out in the table below. No application for any other number of Hong Kong Public Offer Shares will be considered and any such application is liable to be rejected. The table also sets out the total amount payable for such multiples of Hong Kong Public Offer Shares up to 81,160,000 Hong Kong Public Offer Shares. On application, you must pay the maximum offer price of HK$4.05 per Hong Kong Public Offer Share, plus 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee. The table below sets out the total amount payable for certain numbers of the Hong Kong Public Offer Shares.

2. Complete the form and sign it. Only written signatures will be accepted.

3. Staple your cheque or banker's cashier order to the form. You must pay for the Hong Kong Public Offer Shares applied for by one cheque or by one banker's cashier order.
Each application must be accompanied by either one separate cheque or one separate banker's cashier order.

If you pay by cheques, the cheque must:
- be in Hong Kong dollars;
- be drawn on your Hong Kong dollar bank account in Hong Kong;
- show your account name. This name must either be pre-printed on the cheque, or be endorsed on the back by a person authorised by the bank. This account name must correspond with your name. If it is a joint application, the account name must be the same as the name of the first applicant;
- be payable to "Bank of China (Hong Kong) Nominees Limited – China Coal Energy Public Offer";
- be crossed "Account Payee Only";
- each application must be accompanied by either a separate cheque or banker's cashier order; and
- the cheque must not be post-dated.

Your application will be rejected if your cheque:
- does not meet all these requirements; or
- is dishonoured upon its first presentation.

If you pay by banker's cashier order:
- you must purchase the banker's cashier order, and have your name certified on the back by a person authorised by the bank. The name on the banker's cashier order and the name on the application form must be the same. If it is a joint application, the name on the back of the banker's cashier order must be the same as the name of the first-named applicant;
- the banker's cashier order must be made payable to "Bank of China (Hong Kong) Nominees Limited – China Coal Energy Public Offer";
- the banker's cashier order must be crossed "Account Payee Only" and;
- the banker's cashier order must not be post-dated.

Your application may be rejected if your banker's cashier order does not meet all these requirements.

4. Tear off the Application Form, fold it once and lodge it in one of the special collection boxes at any one of the following branches of Bank of China (Hong Kong) Limited, Bank of Communications Co., Ltd., Hong Kong Branch, and Standard Chartered Bank (Hong Kong) Limited:

5. Your Application Form can be lodged at these times:

Wednesday, 6 December, 2006	–	9:00 a.m. to 4:30 p.m.
Thursday, 7 December, 2006	–	9:00 a.m. to 4:30 p.m.
Friday, 8 December, 2006	–	9:00 a.m. to 4:30 p.m.
Saturday, 9 December, 2006	–	9:00 a.m. to 12:30 p.m.
Monday, 11 December, 2006	–	9:00 a.m. to 12:00 noon

6. The latest time for lodging your application is 12:00 noon on Monday, 11 December, 2006. The application lists will be open between 11:45 a.m. and 12:00 noon on that day, subject only to the weather conditions. The application lists will not be open if there is:

- a tropical cyclone warning signal number 8 or above, or
- a "black" rainstorm warning signal

in force in Hong Kong at any time between 9:00 a.m. and 12:00 noon on Monday, 11 December, 2006. Instead they will be open between 11:45 a.m. and 12:00 noon on the next Business Day which does not have either of those warnings in force in Hong Kong at any time between 9:00 a.m. and 12:00 noon.

Business Day means a day that is not a Saturday, Sunday or a public holiday in Hong Kong.

7. The right is reserved to present all or any remittance for payment. However, your cheque or banker's cashier order will not be presented for payment before 12:00 noon on Monday, 11 December, 2006. The Company will not give you a receipt for your payment. The Company will keep any interest accrued on your application monies (up until, in the case of monies to be refunded, the date of despatch of refund cheques). The right is also reserved to retain any share certificates and/or any surplus application monies or refunds pending clearance of your cheque or banker's cashier order.

(1) Maximum number of Public Offer Shares you may apply for.

中煤

CHINA COAL ENERGY COMPANY LIMITED*

中國中煤能源股份有限公司

(於中華人民共和國註冊成立的股份有限公司)

全球發售

申請條件

甲. 申請人資格

1. 閣下作為申請人及 閣下為其利益作出申請的任何人士必須年滿18歲或以上並擁有香港地址。
2. 如 閣下屬獲人團體，申請表格須由該法人團體正式授權的負責人簽署，並蓋註明簽署人的職銜。
3. 除非香港聯合交易所有限公司證券上市規則(「香港上市規則」)准許，倘 閣下為下列人士，則不得申請認購任何香港公開發售股份：
   - 本公司股份的現有實益擁有人；
   - 本公司或其任何附屬公司的行政總裁、董事或監事；
   - 本公司的關連人士(定義見香港上市規則)或緊隨全球發售完成後將成為本公司關連人士的人士；
   - 以上任何人士的聯繫人(「聯繫人」一詞的定義見香港上市規則)；
   - 中華人民共和國(不包括香港、澳門及台灣)的法人或自然人，美國人士(定義見美國1933年證券法(經修訂)規例S)；或
   - 無香港地址的人士。

乙. 倘 閣下為代名人

只有 閣下為代名人，方可以遞交超過一份認購香港公開發售股份的申請，在此情況下， 閣下可：(i)透過中央結算系統向非透過結算參與者發出電子認購指示(倘 閣下為中央結算系統參與者)；或(ii)使用白色或黃色申請表格作出申請，並以 閣下名義代表不同實益擁有人或受益人士一項申請。 閣下必須在本申請表格上註有「由代名人遞交」一欄內填上各實益擁有人(或如屬聯名實益擁有人，則為每名該等實益擁有人)的：

- 賬戶號碼；或
- 其他識別編號。

如 閣下未填寫上述資料，則該項申請將被視作為以 閣下的利益而遞交。

丙. 倘 閣下為 閣下的利益遞交一份認購申請

香港中煤或就招股章程刊發不接受第三方提交，除上文所述者外，倘若 閣下或 閣下與聯名申請人作出以下事宜， 閣下的所有申請(包括香港中央結算(代理人)有限公司(「香港結算代理人」)根據電子認購指示提出的申請)將被視為並非申請而不接受：

- (個人或聯同他人)使用白色或黃色申請表格，或透過中央結算系統向香港結算發出電子認購指示(如 閣下為中央結算系統投資者戶口持有人或透過一名中央結算系統參與者發出申請)；或
- (個人或聯同他人)以一份白色申請表格與一份黃色申請表格或以白色或黃色申請表格及透過中央結算系統向香港結算發出電子認購指示作出申請；或(個人或聯同他人)以一份白色或黃色申請表格，或透過中央結算系統向香港結算發出電子認購指示(如 閣下為中央結算系統投資者戶口持有人或透過一名中央結算系統參與者發出申請)，提出申請香港公開發售股份超步可供公開人士認購的H股50%以上；或
- 已申請或接納或表示有意認購或已獲配售或將獲配售(包括有條件及/或暫時性質)任何國際發售項下的國際發售股份或已以其他方式參與或將參與國際發售。

除上述者外，如並無超過一份為 閣下的利益而作的認購申請(包括香港結算代理人根據電子認購指示提出的申請)，則 閣下所有認購申請均將視作重複認購申請而不接受考慮。如申請由非上市公司作出，且

- 股份的唯一最大實益擁有權實質；及
- 閣下對該公司行使法定控制權，

則該申請將視作為 閣下本身利益提出。

為上市公司指在香港聯交所無任何股本證券上市的公司。

法定控制權指 閣下：

- *控制一間公司董事會的組成；或*
- *控制一間公司超半數的投票權；或*
- *持有一間公司超半數的已發行股本(除並無許入在盈利或資本分配時無權分享超出某個特定金額的任何部分股本)。*

退還款項

倘　閣下基於上述任何原因未獲分配任何香港公開發售股份，本公司將退還　閣下的申請股款（包括相關1%經紀佣金、0.004%證監會交易徵費及0.005%香港聯交所交易費），惟不會就此支付利息。　閣下的申請股款在有關或領取退款支票前的所有期間利息歸本公司所有。如　閣下的申請僅部分獲接納，本公司會將　閣下的適當申請股款（包括有關的1%經紀佣金、0.004%證監會交易徵費及0.005%香港聯交所交易費）不計利息退還予　閣下。如最終釐定的發售價低於申請時所繳納的最高發售價每股H股4.05港元，本公司將不計利息退還多收的申請股款，連同就該多收申請股款應收取的相關1%經紀佣金、0.004%證監會交易徵費及0.005%香港聯交所交易費。

倘出現涉及大意超額提costs的特別情況，本公司、聯席全球協調人及聯席全面經辦人可酌情決定不見現申請若干小額香港公開發售股份股款的支票（成功申請者除外），所有退款將以註明「只准入抬頭人賬戶」的劃線支票發出，並以　閣下作為抬頭人，或如屬聯名申請人，則以　閣下申請表格上排名首位的申請人為抬頭人。　閣下所提供的部分香港身份證號碼／護照號碼，或倘若　閣下乃聯名申請人，則排名首位的申請人的部分香港身份證號碼／護照號碼可能會被印在　閣下的退款支票（如有）上，為避款目的，該等資料亦可能轉交予第三方，在兌現　閣下的退款支票前，　閣下的銀行可能會要求核實　閣下的香港身份證號碼／護照號碼。如果　閣下的香港身份證號碼／護照號碼填寫有誤，可能會導致　閣下退款支票兌現延遲或無效。

如　閣下已申請認購1,000,000股或以上的香港公開發售股份並在申請表格上註明親自領取退款支票（如有），　閣下可在本公司於報章上公佈的領取退款支票／寄發H股股票日期當日上午九時正至下午一時正期間，或在以下地點領取退款支票：

香港中央證券登記有限公司
香港皇后大道東183號合和中心17樓1712-1716室

惟該領取日期為2006年12月18日（星期一）。

倘　閣下為個別親自領取退款支票的個人，則　閣下不得授權任何其他人士代領。　閣下領取。　閣下必須於領取退款支票時出示身份證明文件（必須為香港中央證券登記有限公司接受的身份證明文件）。倘　閣下為選擇親自領取退款支票的公司申請人，則　閣下必須由　閣下的授權代表帶同蓋上公司印章的授權書到取。有關授權代表須於領取時出示香港中央證券登記有限公司接受的身份證明文件。

如　閣下未在指定領取時間內親自領取退款支票，則退款支票將會以普通郵遞方式寄往本申請表格上所示地址，郵誤風險由　閣下自行承擔。

如　閣下已申請認購1,000,000股以下香港公開發售股份或倘　閣下已申請1,000,000股或以上香港公開發售股份，但並沒有在申請表格上註明親自領取退款支票，則　閣下的退款支票將於寄發日期（預期為2006年12月18日（星期一））以普通郵遞方式寄往　閣下申請表格上所示地址，郵誤風險概由　閣下自行承擔。

在經濟效益時（倘適用），將特別注意避免出現不當延誤。

香港結算代理人提出的申請

如本申請表格乃由香港結算代理人代表向其發出電子認購指示申請香港公開發售股份的人士簽署，則本申請表格與招股說明書不得的條文將不適用，且以招股說明書所述者為準。在不限制此段一般適用的前提下，本申請表格的以下部分在香港結算代理人作簽署人的情況下並不適用：

- 第一頁所載的所有保證，惟第一項有關根據招股說明書及本申請表格的條款與條件申請認購香港公開發售股份的保證及受公司章程細則者除外；
- 第一頁的「簽名」；
- 「如　閣下為代名人」；
- 「倘可為　閣下的利益提交一份認購申請」；
- 「填妥及遞交本申請表格的效用」一節項下的所有陳述及保證，惟該節項有關以申請人名義登記香港公開發售股份及要求文件按申請人將登記為所申請認購的香港公開發售股份的持有人者除外；
- 「倘成功申請認購香港公開發售股份（全部或部分）」；
- 「寄發　閣下不獲配發香港公開發售股份的股份」；及
- 「退還款項」。

個人資料

個人資料收集聲明

個人資料（私隱）條例（「該條例」）中的主要條文已於1996年12月20日在香港生效，此份個人資料收集聲明是向香港公開發售股份申請人及持有人說明本公司及其H股過戶登記處就個人資料及該條例制訂的政策及實務應用條文。

1. 收集　閣下個人資料的原因

當證券中個人或者聯券登記持有人申請證券或將證券轉往其名下或由其名下轉讓予他人，或要求過戶處提供服務時，須不時向本公司或其代理人及H股過戶登記處提供其最新的正確個人資料。

若未能提供所需資料，則可能會導致　閣下的證券申請遭拒絕受理或有所延誤或本公司或其H股過戶登記處無法進行過戶或提供其他服務。　閣下成功申請認購的香港公開發售股份的過戶登記及／或證券的寄發及／或　閣下應得的退款支票的寄發或兌現亦可能受妨碍或延誤。

證券持有人所提供的個人資料如有任何不確，必須即時知會本公司及H股過戶登記處。

2. 用途

證券持有人的個人資料可以任何方式被採用、持有及／或保存，以作下列用途：

- 處理　閣下的認購申請和退款支票（如適用）及核實是否遵守本申請表格及招股說明書所載的條款及申請手續；
- 登記新證券行或為證券持有人登記轉往其名下或由其名下轉讓予他人的證券，包括（如適用）以香港結算代理人的名義登記；
- 保存或更新本公司證券持有人名冊；
- 核實或協助核實簽名或任何其他資料核實或交換；
- 確定應收利益的資格，例如股息、供股及紅股等；
- 寄發本公司及其附屬公司的公司通訊；
- 編製統計資料及股東資料；
- 履原法例、規則或規例的規定作出披露；
- 披露有關資料以便核查是否遵守有作出當前；及
- 與上述有關及／或令本公司及H股過戶登記處能夠履行其對證券持有人及／或監管機構所負的責任的任何其他附帶或相關目的，及／或證券持有人不時同意的任何其他目的。

3. 向他人提供個人資料

本公司及其H股過戶登記處將會對有關證券持有人的個人資料保密，但本公司及其H股過戶登記處可能會作出該等認為必要的查詢以確定個人資料的準確性，以便資料可用作上述所有或任何用途，尤其該等可能會向下列任何及所有人士及實體披露，取得或轉交證券持有人的個人資料（不論在香港或外地）：

- 本公司或其委任的代理人，例如財務顧問及收款銀行；
- 香港結算及香港結算代理人將就中央結算系統的運作而使用個人資料；
- 任何向本公司或過戶處提供與其各自業務運作有關的行政、電訊、電腦、付款或其他服務的代理人、承包商或第三方服務供應商；
- 任何監管機構或政府機關（包括香港聯交所及證監會）；及
- 與證券持有人有處所往來或擬有處所往來的任何其他人士或機構，例如其銀行、律師、會計師或股票經紀等。

4. 查閱及更正個人資料

條例賦予證券持有人確認本公司或過戶處是否持有其個人資料的權利，並有權索取該等資料副本及更正任何不確的資料，依據條例，本公司及其H股過戶登記處有權就處理任何查閱資料的要求收取合理費用。所有關於查閱資料或更正資料或關於政策及實務應用條文的資料及所持存的資料類別的要求，應向本公司的公司秘書或（視乎情況而定）H股過戶登記處現下的私隱條例事務主任提出。

簽署本申請表格後，即表示　閣下同意上述所有規定。

申請手續

1. 按照下表計算　閣下擬認購的香港公開發售股份數目所應付的認購申購款項。　閣下認購申購的股數最少為1,000股香港公開發售股份，申購認購股數須為下表所列的其中一個數目。任何其他數目的香港公開發售股份認購申購將不予考慮，而該等認購申購將被不受理。下表亦列出申請認購香港公開發售股份有關倍數（最多為81,160,000股香港公開發售股份）的應付款項總額。　閣下須於申請時繳付每股香港公開發售股份4.05港元的最高發售價，另加1%經紀佣金、0.004%證監會交易徵費及0.005%香港聯交所交易費。下表列載申請認購若干香港公開發售股份數目應付的股款總額。

2. 請填妥及簽署申請表格，本公司僅接納親筆簽名。

3. 付款文據或銀行本票須妥釘於表格上。　閣下必須以一張支票或一張銀行本票支付香港公開發售股份的股款。每份申請均須附上一張獨立支票或一張獨立銀行本票。

如以支票付款，請支票必須：
- 為港元支票；
- 從　閣下在香港的港元銀行賬戶中開出；
- 顯示　閣下的賬戶名稱，而該賬戶名稱必須已預印在支票上，或由有關銀行授權的人士在該支票背書，該賬戶名稱必須與　閣下姓名相同。如聯營人士聯同申請，則該賬戶名稱必須與排名首位申請人的姓名相同；
- 註明抬頭人為「中國銀行（香港）代理人有限公司－中銀股份公開發售」；
- 劃線註明「只准入抬頭人賬戶」；
- 每份申請必須附有獨立開出的支票或銀行本票；及
- 支票不得為期票。

在下列情況下，閣下的認購申請將不獲接納：
- 閣下的支票未能得合上述所有規定；或
- 閣下的支票首次過戶不獲兌現。

如以銀行本票付款：
- 閣下應購買銀行本票，並由有關銀行授權的人士在銀行本票背面簽署核證　閣下姓名，銀行本票所示姓名必須與申請表格所示姓名相同。如聯營人士聯同申請，則銀行本票背面所示姓名必須與排名首位申請人的姓名相同；
- 銀行本票必須註明抬頭人為「中國銀行（香港）代理人有限公司－中銀股份公開發售」；
- 銀行本票必須劃線註明「只准入抬頭人賬戶」；及
- 銀行本票不得為期票。

如　閣下的銀行本票不符合上述所有規定，　閣下的認購申請可能不獲接納。

4. 倘閣下申請香港，對每一次，恆生個人中國銀行（香港）有限公司、交通銀行股份有限公司香港分行及渣打銀行（香港）有限公司的下列任何一間分行存款的收集箱內：

(a) 中國銀行（香港）有限公司

	分行名稱	地址

	青衣城分行	青衣青衣城3期308E號舖
	元朗分行	元朗元朗大街140號
	屯門市廣場分行	屯門屯門市廣場第一期地下G047-G052號舖

5. 閣下可於下列時間內遞交申請表格：

2006年12月6日（星期三）	－	上午九時正至下午四時三十分
2006年12月7日（星期四）	－	上午九時正至下午四時三十分
2006年12月8日（星期五）	－	上午九時正至下午四時三十分
2006年12月9日（星期六）	－	上午九時正至下午十二時三十分
2006年12月11日（星期一）	－	上午九時正至中午十二時正

6. 遞交申請表格的截止日期為2006年12月11日（星期一）中午十二時正。本公司將於當日上午十一時四十五分至下午十二時正開始辦理認購申請登記。倘果視乎當日大氣情況而定。如下列警告訊號在2006年12月11日（星期一）上午九時正至中午十二時正內任何時間在香港生效，則本公司不會開始辦理認購申請登記：

- 八號或以上熱帶氣旋警告訊號；或
- 「黑色」暴雨警告訊號。

認購申請登記將改於上午九時正至中午十二時正期間內任何時間在香港並無發出上述任何一項警告訊號的下一個營業日上午十一時四十五分至中午十二時正進行。

營業日指香港的星期六、日或公眾假期以外的日子。

7. 本公司保留將所有或任何認購申請股款過戶的權利，惟　閣下的付款支票或銀行本票將不會於2006年12月11日（星期一）中午十二時正前過戶。本公司不會向　閣下發出付款收據。本公司將保留　閣下的申請股款的所有利息（如屬退款，則於至退款支票寄發日期止）。本公司亦有權在　閣下的支票或銀行本票過戶之前保留任何股票及／或任何多收的申請股款或退款。

I/We:
- apply for the number of Hong Kong Public Offer Shares set out below, on the terms and conditions of the Prospectus and this application form, and subject to the Articles of Association;
- enclose payment in full for the Hong Kong Public Offer Shares applied for, including 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee;
- undertake and agree to accept the Hong Kong Public Offer Shares applied for, or any lesser number allocated to me/us on this application;
- declare that this is the only application made and the only application intended by me/us to be made whether on a WHITE or YELLOW application form or by giving electronic application instructions to HKSCC, to benefit me/us or the person for whose benefit I am/we are applying;
- undertake and confirm that I/we and the person for whose benefit I am/we are applying have not indicated an interest for, applied for or taken up or received or been placed or allocated (including conditionally and/or provisionally) and will not indicate an interest for, apply for or take up any International Offer Shares under the International Offering nor otherwise participate in the International Offering;
- understand that this declaration and representation will be relied upon by the Company, the Joint Global Coordinators and the Joint Lead Managers in deciding whether or not to make any allotment of Hong Kong Public Offer Shares in response to this application;
- authorise the Company to place the name of HKSCC Nominees on the register of members of the Company as the holder of any Hong Kong Public Offer Shares allotted to me/us, and to deposit the relevant share certificate(s) directly into CCASS for the credit of my/our CCASS Investor Participant stock account or the stock account of my/our designated CCASS Participant;
- request that any refund cheque(s) be made payable to me or, in the case of joint applicants, to first-named of us in this application form; and (subject to the terms and conditions set out on the pages attached to this form) to send any refund cheque(s) by ordinary post at my/our own risk to the address given on this application form (except where I/we have applied for 1,000,000 or more Hong Kong Public Offer Shares and have indicated on this application form that I/we wish to collect any refund cheque(s) in person in accordance with the procedures prescribed in this application form);
- have read the terms and conditions and application procedures set out on the pages attached to this application form and in the Prospectus and agree to be bound by them;
- represent, warrant and undertake that the allotment of or application for the Hong Kong Public Offer Shares to me/us or by me/us or for whose benefit this application is made would not require the Company to comply with any requirements under any law or regulation (whether or not having the force of law) of any territory outside Hong Kong; and
- agree that this application, any acceptance of it and the resulting contract, will be governed by and construed in accordance with the laws of Hong Kong.

本人／吾等：
- 按照招股說明書及本申請表格的條款及條件，並在公司章程所載的各項規限下，申請以下載明的香港公開發售股份；
- 夾附申請香港公開發售股份所需的全數股款(包括1%經紀佣金、0.004%證監會交易徵費及0.005%香港聯交所交易費)；
- 承諾及同意接納本人／吾等於本項申請所申請的香港公開發售股份，或本人／吾等獲配發的任何較少數目的香港公開發售股份；
- 聲明是項認購申請乃為本人／吾等的利益，或本人／吾等所代表人士的利益以白色或黃色申請表格或向香港結算發出電子認購指示所作出及擬作出的唯一一項認購申請；
- 承諾及確認本人／吾等及本人／吾等為其利益作出申請的人士並無表示有意認購、申請或接納或獲配售或分配(包括有條件及／或暫時性質)，亦不會表示有意認購、申請或接納國際發售項下的任何國際發售股份，亦不會參與國際發售；
- 明白　貴公司、聯席全球協調人及聯席牽頭經辦人將倚賴本聲明及陳述，以決定是否就是項認購申請配發任何香港公開發售股份；
- 授權　貴公司將香港結算代理人的名稱列入　貴公司股東名冊內，作為任何將配發予本人／吾等的香港公開發售股份的持有人，並將有關股票直接存入中央結算系統，以配存於本人／吾等的中央結算系統投資者戶口持有人股份賬戶或本人／吾等指定的中央結算系統參與者股份賬戶；
- 要求任何退款支票以本人或(倘屬聯名申請人)本申請表格內首名申請人的名義發出，並(在符合本表格隨附各頁所載的條款及條件的情況下)按本申請表格上所示地址以普通郵遞方式寄發任何退款支票，郵誤風險概由本人／吾等承擔(股本本人／吾等已申請1,000,000股或以上的香港公開發售股份，並已於本申請表格上表明擬按本申請表格所述程序親自領取任何退款支票)；
- 已細閱並同意遵守本申請表格隨附各頁及招股說明書所載的條款、條件及申請手續；
- 聲明、保證及承諾向本人／吾等或由本人／吾等或為其利益而提出本申請的人士的香港公開發售股份的配發或申請不會引致　貴公司須遵從香港以外任何地區的法律或法規的任何規定(不論是否具法律效力)；及
- 同意本申請、任何對申請的接納以及因其而產生的合同，將受香港法律規管及按其詮釋。

Signed by (all) applicant(s) (all joint applicants must sign):

Warning:
- It is important that you read the terms and conditions and application procedures overleaf.
- Only one application may be made for the benefit of any person on a WHITE or YELLOW Application Form or by way of giving electronic application instructions to HKSCC. Multiple or suspected multiple applications on WHITE and/or YELLOW Application Forms and/or by way of giving electronic application instructions to HKSCC, applications made by one applicant on either a WHITE or YELLOW Application Form or by way of giving electronic application instructions to HKSCC for more than 81,160,000 Hong Kong Public Offer Shares and applications where cheques or banker's cashier orders are dishonoured upon first presentation will be rejected.
- You may be prosecuted if you make a false declaration.

警告：
- 閣下必須細閱背頁的條款及條件及申請手續。
- 任何人士僅限以白色或黃色申請表格或向香港結算發出電子認購指示以受益人身份作出一次認購申請。以白色及／或黃色申請表格及／或向香港結算發出電子認購指示作出的重複或疑屬重複認購申請，由一位申請人以白色或黃色申請表格或向香港結算發出電子認購指示提出超過81,160,000股香港公開發售股份，以及支票或銀行本票於首次過戶時不獲兌現的認購申請，均會被拒絕受理。
- 閣下如作出虛假聲明，可能會遭受檢控。

Your address in English (Joint applicants should give the address of first-named applicant only) Only an address in Hong Kong will be accepted 地址（以英文填寫）（聯名申請人只須填寫排名首位的申請人地址）只接受香港地址	Telephone No. 電話號碼

For nominees : **Please provide an account number or identification code for each (joint) beneficial owner(s).**
由代名人遞交： **請填寫各（聯名）實益擁有人的賬戶號碼或識別編碼。**

If you are a nominee and you do not complete this section, this application will be treated as being made for your own benefit. The account number or identification code for each (joint) beneficial owner must be provided.
如 閣下為代名人，而並無填妥本節，則是項認購申請將被視作為 閣下本身利益提出。 閣下必須填寫各（聯名）實益擁有人的賬戶號碼或識別編碼。

** (1) If you are a CCASS Investor Participant, please see paragraph 2 under the section "How to make your application" overleaf.
如屬中央結算系統投資者戶口持有人，請參閱背頁「申請手續」一節內第2段。

(2) If you are applying through a designated CCASS Participant (other than a CCASS Investor Participant): For an individual, you must provide your Hong Kong Identity Card number or passport number. If you hold a Hong Kong Identity Card, please provide that number. If you do not hold a Hong Kong Identity Card, please provide your passport number. For a body corporate, please provide your Hong Kong Business Registration number.
如 閣下經指定的中央結算系統參與者（中央結算系統投資者戶口持有人除外）提出申請：如為個人， 閣下必須填寫 閣下的香港身份證號碼或護照號碼；如 閣下持有香港身份證，請填寫身份證號碼。否則，請填寫護照號碼。如為法人團體，請填寫香港商業登記證號碼。

(3) Part of your Hong Kong Identity Card number/passport number, or, if you are joint applicants, part of the Hong Kong Identity Card number/passport number of the first-named applicant, provided by you, may be printed on your refund cheque (if any). Such data will be used for checking the validity of application forms and such data would also be transferred to a third party for such purpose and refund purpose. Your banker may require verification of your Hong Kong Identity Card number/passport number before encashment of your refund cheque. Inaccurate completion of your Hong Kong Identity Card number/passport number may lead to delay in encashment of or may invalidate your refund cheque.
閣下所提供的 閣下香港身份證號碼／護照號碼的一部分（倘為聯名申請人，名列首位申請人的香港身份證號碼／護照號碼的一部分）可能會列印在 閣下的退款支票（如有）上。故等資料將用於核實申請表格的有效性，為此目的和退款的目的，該等資料也將轉交予第三方。在兌現 閣下的退款支票之前，銀行可能會要求核對 閣下的香港身份證號碼／護照號碼。倘 閣下的香港身份證號碼／護照號碼填寫有誤，可能會導致 閣下退款支票兌現延遲或無效。

☐ Applicants who have applied for 1,000,000 or more Hong Kong Public Offer Shares and wish to collect refund cheque(s), if any, in person from the Company's H Share registrar, Computershare Hong Kong Investor Services Limited, at Rooms 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong on the date of collection of refund cheque(s) (where relevant) which is expected to be on Monday, 18 December, 2006, should mark '✓' in the box on the left.
☐ 凡申請1,000,000股或以上香港公開發售股份，並親身於領取退款支票（如有）當日（預計為2006年12月18日（星期一））前往本公司的H股證券登記處香港中央證券登記有限公司（地址為香港灣仔皇后大道東183號合和中心17樓1712-1716室）領取退款支票（如適用）的申請人，請在左方空格內填上「✓」號。

(4) All joint applicants must give (if they are individuals) their Hong Kong Identity Card numbers or, where applicable, passport numbers, or (if they are bodies corporate) their Hong Kong Business Registration Certificate numbers.
所有聯名申請人必須提供（倘為個人）其香港身份證號碼或護照號碼（如適用），或（倘為法人團體）其香港商業登記證號碼。

Please use this form if you want the Hong Kong Public Offer Shares to be issued in the name of HKSCC Nominees Limited ("HKSCC Nominees") and deposited directly into the Central Clearing and Settlement System ("CCASS") for credit to your CCASS Investor Participant stock account or the stock account of your designated CCASS Participant

中煤

CHINA COAL ENERGY COMPANY LIMITED*

中國中煤能源股份有限公司

(A joint stock limited company incorporated in the People's Republic of China with limited liability)

GLOBAL OFFERING

Conditions of your application

A. Who can apply

1. You, the applicant(s), and any person(s) for whose benefit you are applying, must be 18 years of age or older and must have a Hong Kong address.
2. If you are a firm, the application must be in the names of the individual members, not the firm's name. The number of joint applicants may not exceed 4.
3. If you are a body corporate, the application must be signed by a duly authorised officer, who must state his or her representative capacity.
4. Save under the circumstances permitted by the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Hong Kong Listing Rules"), you cannot apply for any Hong Kong Public Offer Shares if you are:
   - an existing beneficial owner of Shares in the Company;
   - the chief executive, a director or a supervisor of the Company or any of its subsidiaries;
   - a connected person (as defined in the Hong Kong Listing Rules) of the Company or a person who will become a connected person of the Company immediately upon completion of the Global Offering;
   - an associate of any of the above (as "associate" is defined in the Hong Kong Listing Rules);
   - a legal or natural person of the People's Republic of China (other than Hong Kong, Macau and Taiwan) or a United States person (as defined in the Regulation S under the United States Securities Act of 1933, as amended); or
   - a person who does not have a Hong Kong address.

B. If you are a nominee

You may make more than one application for the Hong Kong Public Offer Shares if and only if you are a nominee, in which case you may make an application by: (i) giving electronic application instructions to HKSCC via CCASS (if you are a CCASS Participant); or (ii) using a WHITE or YELLOW application form, and lodge more than one application in your own name if each application is made on behalf of different beneficial owners.

In the box on this application form marked "For Nominees", you must include:

- an account number; or
- some other identification code

for each beneficial owner or, in the case of joint beneficial owners, for each such beneficial owner. If you do not include this information, the application will be treated as being for your own benefit.

Lodge only one application for your benefit

Multiple applications or suspected multiple applications will be rejected. Save as referred to above, all of your applications (including the part of the application made by HKSCC Nominees acting on electronic application instructions) will be rejected as multiple applications if you, or you and joint applicants together:

- make more than one application (whether individually or jointly with others) on a WHITE or YELLOW application form or by giving electronic application instructions to HKSCC via CCASS (if you are a CCASS Investor Participant or applying through a CCASS Broker or Custodian Participant); or
- both apply (whether individually or jointly) on one WHITE Application Form and one YELLOW Application Form or on WHITE or YELLOW Application Form and give electronic application instructions to HKSCC via CCASS; or
- apply on one WHITE or YELLOW application form (whether individually or jointly) or by giving electronic application instructions to HKSCC via CCASS (if you are a CCASS Investor Participant or applying through a CCASS Broker or Custodian Participant) for more than 50% of the H Shares initially being offered for public subscription under the Hong Kong Public Offer Shares; or
- have applied for or taken up, or indicated an interest in, or have been or will be placed (including conditionally and/or provisionally) International Offer Shares under the International Offering or otherwise have participated or will participate in the International Offering

Save as referred to above, all of your applications will also be rejected as multiple applications if more than one application is made for your benefit (including the part of the application made by HKSCC Nominees acting on electronic application instructions). If an application is made by an unlisted company and

- the only business of that company is dealing in securities; and
- you exercise statutory control over that company

then the application will be treated as being made for your benefit.

Unlisted company means a company with no equity securities listed on the Hong Kong Stock Exchange.

Statutory control means you:

- *control the composition of the board of directors of a company; or*
- *control more than half of the voting power of a company; or*
- *hold more than half of the issued share capital of a company (not counting any part of it which carries no right to participate beyond a specified amount in a distribution of either profits or capital).*

D. Allocation of Hong Kong Public Offer Shares – Pools A and B

The 162,320,000 Hong Kong Public Offer Shares initially being offered for subscription under the Hong Kong Public Offering (after taking into account of any adjustment in the number of Offer Shares allocated between the Hong Kong Public Offering and the International Offering) will be divided into two pools for allocation purposes: Pool A and Pool B. The Hong Kong Public Offer Shares in Pool A will be allocated on an equitable basis to successful applicants who have applied for Hong Kong Public Offer Shares with a total subscription amount (excluding 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee) of 5,000,000 or less. The Hong Kong Public Offer Shares in Pool B will be allocated on an equitable basis to successful applicants who have applied for Hong Kong Public Offer Shares with a total subscription amount (excluding 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee) of more than HK$5,000,000 and up to the total value of Pool B. You should be aware that applications in Pool A and applications in Pool B are likely to receive different allocation ratios. If Hong Kong Public Offer Shares in one pool (but not both pools) are undersubscribed, the surplus Hong Kong Public Offer Shares in that pool will be transferred to the other pool to satisfy demand in that other pool and be allocated accordingly. You can only receive an allocation of Hong Kong Public Offer Shares from either Pool A or Pool B but not from both pools. Multiple or suspected multiple applications and any application for more than 81,160,000 Hong Kong Public Offer Shares are liable to be rejected. Allocation of Hong Kong Public Offer Shares to investors under the Hong Kong Public Offering, both in relation to Pool A and Pool B, will be based solely on the level of valid applications received under the Hong Kong Public Offering. The basis of allocation may vary, depending on the number of Hong Kong Public Offer Shares validly applied for by applicants, although the allocation of Hong Kong Public Offer Shares could, where appropriate, consist of ballotings, which would mean that some applicants may receive a higher allocation than others who have applied for the same number of Hong Kong Public Offer Shares and those applicants who are not successful in the ballot may not receive any Hong Kong Public Offer Shares.

E. Supplemental information

If any supplement to the Prospectus is issued, applicant(s) who have already submitted an application may or may not (depending on the information contained in the supplement) be notified that they can withdraw their applications. If applicant(s) have been so notified, or if applicant(s) have been notified but have not withdrawn their applications in accordance with the procedures to be notified, all applications that have been submitted remain valid and may be accepted. Subject to the above, an application once made is irrevocable and applicants shall be deemed to have applied on the basis of the Prospectus as supplemented.

F. Effect of completing and submitting this Application Form

By completing and submitting this application form, you (and if you are joint applicants, each of you jointly and severally) for yourself or as agent or nominee and on behalf of each person for whom you act as agent or nominee:

- instruct and authorise the Company and/or the Joint Global Coordinators (or their respective agents or nominees) as agents of the Company to execute any transfer forms, contract notes or other documents on your behalf and to do on your behalf all other things necessary to effect registration of any Hong Kong Public Offer Shares allocated to you in the name of HKSCC Nominees as required by the Articles of Association and otherwise to give effect to the arrangements described in the Prospectus and this application form;
- undertake to sign all documents and to do all things necessary to enable HKSCC Nominees, to be registered as the holder of the Hong Kong Public Offer Shares allocated to you, and as required by the Articles of Association;
- represent and warrant that you understand that the Hong Kong Public Offer Shares have not been and will not be registered under US Securities Act and you are outside the United States (as defined in Regulation S) when completing this application form and are not a United States person (as defined in Regulation S and the US Securities Act);
- confirm that you have received a copy of the Prospectus you have only relied on the information and representations contained in the Prospectus in making your application and will not rely on any other information and representations save as set out in any supplement to the Prospectus;
- agree that the Company, the Directors, the Joint Global Coordinators, the Underwriters, any other parties involved in the Global Offering and any of their respective directors, officers, employees, partners, agents or advisers are liable only for the information and representations contained in the Prospectus, the application forms and any supplement to the Prospectus;
- agree (without prejudice to any other rights which you may have) that once your application has been accepted, you may not rescind it because of an innocent misrepresentation and you may not revoke it other than as provided in the Prospectus;
- (if the application is made for your own benefit) warrant that the application is the only application which will be made for your benefit on a WHITE or YELLOW application form or by giving electronic application instructions to HKSCC via CCASS;
- (if the application is made by an agent on your behalf) warrant that you have validly and irrevocably conferred on your agent all necessary power and authority to make this application;
- (if you are an agent for another person) warrant that reasonable enquiries have been made of that other person that this is the only application which will be or has been made for the benefit of that other person on a WHITE or YELLOW application form or by giving electronic application instructions to HKSCC via CCASS, and that you are duly authorized to sign this application form as that other person's agent;
- understand and confirm that you (if the application is made for your benefit) or the person(s) for whose benefit you have made the application have not applied for or taken up, or indicated an interest in, and will not apply for or take up or indicate any interest in any International Offer Shares under the International Offering, nor otherwise have participated or will participate in the International Offering;
- warrant the truth and accuracy of the information contained in your application;
- agree to disclose to the Company, the H Share Registrar, the receiving bankers, the Joint Global Coordinators, the Underwriters and/or their respective advisers and agents personal data and any information which they require about you or the person(s) for whose benefit you have made the application;
- agree that your application, any acceptance of it and the resulting contract will be governed by and construed in accordance with the laws of Hong Kong;
- undertake and agree to accept the Hong Kong Public Offer Shares applied for, or any lesser number allocated to you under this application;
- authorise the Company to place the name of HKSCC Nominees on the register of members of the Company as the holder of any Hong Kong Public Offer Shares allocated to you, and the Company and/or its agents to deposit any share certificate(s) directly into CCASS and to send any refund cheque(s) (if any) to you or (in case of joint applicants) the first-named applicant on the Application Form by ordinary post at your own risk to the address stated on your application form (except that if you have applied for 1,000,000 Hong Kong Public Offer Shares or more and have indicated in your application form that you will collect your refund cheque(s) (if any) in person, you can collect your refund cheque(s) (if any) in person between 9:00 a.m. and 1:00 p.m. on Monday, 18 December, 2006 from Computershare Hong Kong Investor Services Limited);
- understand that these declarations and representations will be relied upon by the Company, the Directors and the Joint Global Coordinators in deciding whether or not to allocate any Hong Kong Public Offer Shares in response to your application and that you may be prosecuted for making a false declaration;
- if the laws of any place outside Hong Kong are applicable to your application, you agree and warrant that you have complied with all such laws and none of the Company, the Joint Global Coordinators, the Underwriters and the other parties involved in the Global Offering nor any of their respective directors, employees, partners, agents, officers or advisers will infringe any laws outside Hong Kong as a result of the acceptance of your offer to purchase, or any actions arising from your rights and obligations under the terms and conditions contained in the Prospectus;
- agree with the Company, for itself and for the benefit of each shareholder of the Company, and so that the Company will be deemed by its acceptance in whole or in part of the applications, to have agreed for itself and on behalf of each shareholder of the Company, to observe and comply with the PRC Company Law, the Special Regulations, and the Articles of Association;
- agree with the Company, each shareholder, Director, Supervisor, manager and officer of the Company, and the Company acting for itself and for each Director, Supervisor, manager and officer agrees with each shareholder of the Company, to refer all differences and claims arising from the Articles of Association or any rights or obligations conferred or imposed by the PRC Company Law or other relevant laws and administrative regulations concerning its affairs to arbitration in accordance with the Articles of Association, and any reference to arbitration shall be deemed to authorize the arbitration tribunal to conduct hearings in open session and to publish its award, which arbitration shall be final and conclusive;
- agree with the Company and each shareholder of the Company that H Shares in the Company are freely transferable by the holders thereof;
- authorise the Company to enter into a contract on behalf of you with each of the Directors, Supervisors and officers of the Company whereby each Director, Supervisor and officer undertakes to observe and comply with his obligations to shareholders as stipulated in the Articles of Association;
- agree that any Hong Kong Public Offer Shares allocated to you shall be registered in the name of HKSCC Nominees and deposited directly into CCASS operated by HKSCC for credit to your CCASS Investor Participant stock account or the stock account of your designated CCASS Participant, in accordance with your election on this application form;
- agree that each of HKSCC and HKSCC Nominees reserves the right at its absolute discretion (i) not to accept any or part of the Hong Kong Public Offer Shares allocated to you in the name of HKSCC Nominees or not to accept such Hong Kong Public Offer Shares for deposit into CCASS; (ii) to cause such Hong Kong Public Offer Shares to be withdrawn from CCASS and transferred into your name (or, if you are joint applicants, to the name of the first-named applicant) at your own risk and costs; (iii) to cause such allotted Hong Kong Public Offer Shares to be issued in your name (or, if you are a joint applicant, in the name of the first-named applicant) and in such a case, to post the certificates for such allotted Hong Kong Public Offer Shares at your own risk to the address on the application form by ordinary post or to make available the same for your collection;
- agree that each of HKSCC and HKSCC Nominees may adjust the number of Hong Kong Public Offer Shares allocated to you and issued in the name of HKSCC Nominees;
- agree that neither HKSCC nor HKSCC Nominees shall have any liability for the information and representations not so contained in the Prospectus and this Application Form; and
- agree that neither HKSCC nor HKSCC Nominees shall be liable to you in any way.

The Company, the Joint Global Coordinators, the Underwriters, other parties involved in the Global Offering and their respective directors, officers, employees, partners, agents and advisers are entitled to rely on any warranty, representation or declaration made by you in this application. In the event of the application being made by joint applicants, all the warranties, representations, declarations and obligations expressed to be made, given or assumed by or imposed on the joint applicants shall be deemed to have been made, given and assumed by and imposed on the applicants jointly and severally.

G. Power of attorney

If your application is made through a duly authorized attorney, the Company and the Joint Global Coordinators (or their respective agents and nominees) as agent for the Company may accept your application at their discretion, and subject to any conditions they think fit, including production of evidence of the authority of your attorney. The Company and the Joint Global Coordinators in its capacity as agent for the Company have full discretion to reject or accept any application, in full or in part, without assigning any reason.

H. Determination of Offer Price

The Offer Price is expected to be fixed by agreement between the Joint Global Coordinators (on behalf of the Underwriters) and the Company on or around Wednesday, 13 December, 2006 and, in any event, not later than Sunday, 17 December, 2006. Applicants for Hong Kong Public Offer Shares are required to pay, on application, the maximum offer price of HK$4.05 for each Hong Kong Public Offer Share together with 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee, subject to refund if the Offer Price should be lower than HK$4.05. Please note that the Price Determination Date, being the date on which the Offer Price is to be determined, is expected to be on or around Wednesday, 13 December, 2006, which is during the time period in which application may be made for Hong Kong Public Offer Shares. The fixed Offer Price will be announced together with the result of application of the Hong Kong Public Offering on Monday, 18 December, 2006 in the South China Morning Post (in English) and the Hong Kong Economic Times (in Chinese). The Joint Global Coordinators (on behalf of the Underwriters and with the Company's consent) may reduce the number of Offer Shares and/or the indicative offer price range below that stated in the Prospectus (which is HK$3.20 to HK$4.05 per Hong Kong Public Offer Share) at any time prior to the morning of the last day for lodging applications under the Hong Kong Public Offering. In such a case, notices of the reduction in the number of Offer Shares and/or the indicative offer price range will be published in the South China Morning Post (in English) and the Hong Kong Economic Times (in Chinese) no later than the morning of the day which is the last day for lodging applications under the Hong Kong Public Offering. Applications should have regard to the possibility that any announcement of a reduction in the number of Offer Shares and/or the indicative offer price range may not be made until that time. If applications for Hong Kong Public Offer Shares have been submitted prior to the day which is the last day for lodging applications under the Hong Kong Public Offering, then even if the number of Offer Shares and/or the indicative offer price range is reduced, such applications cannot be subsequently withdrawn. If, for any reason, the Offer Price is not agreed between the Company and the Joint Global Coordinators (on behalf of the Underwriters) on or before Sunday, 17 December, 2006, the Global Offering will not proceed.

Allotment of Hong Kong Public Offer Shares

Subject to the terms and conditions as set out herein and in the Prospectus, the application for the Hong Kong Public Offer Shares will not be processed and no allotment of any such Hong Kong Public Offer Shares will be made until the closing of the application lists. No allotment shall be made later than Monday, 11 December, 2006.

The Company expects to announce the basis of allotment and results of applications of the Hong Kong Public Offering and the Hong Kong Identity Cards/passports/Hong Kong Business Registration Certificate numbers of successful applicants (where supplied) under the Hong Kong Public Offering on Monday, 18 December, 2006 in the South China Morning Post (in English) and the Hong Kong Economic Times (in Chinese).

If your application for Hong Kong Public Offer Shares is successful (in whole or in part)

If your application is wholly or partially successful, your share certificate(s) (subject to their becoming valid certificates of title provided that the Hong Kong Public Offering has become unconditional and not having been terminated, which is expected to be around 8:00 a.m. on Tuesday, 19 December, 2006) will be issued in the name of HKSCC Nominees and deposited directly into CCASS for credit to your CCASS Investor Participant stock account or the stock account of your designated CCASS Participant as instructed by you in your application form at the close of application on Monday, 11 December, 2006 or, in the event of a contingency, on any other date as shall be determined by HKSCC or HKSCC Nominees.

- If you are applying through a designated CCASS Participant (other than a CCASS Investor Participant) For Hong Kong Public Offer Shares credited to the stock account of your designated CCASS Participant (other than a CCASS Investor Participant), you can check the number of Hong Kong Public Offer Shares allotted to you with that CCASS Participant.
- If you are applying as a CCASS Investor Participant

  The Company expects to publish the results of CCASS Investor Participants' applications together with the results of the Hong Kong Public Offering in the South China Morning Post (in English) and the Hong Kong Economic Times (in Chinese) on Monday, 18 December, 2006. You should check the announcement published by the Company and report any discrepancies to HKSCC before 5:00 p.m. on Monday, 18 December, 2006 or such other date as shall be determined by HKSCC or HKSCC Nominees. Immediately after the credit of the Hong Kong Public Offer Shares to your stock account, you can check the new total balance via the CCASS Phone System and CCASS Internet System (under the procedures contained in HKSCC's "An Operating Guide for Investor Participants" in effect from time to time). HKSCC will also make available to you an activity statement showing the number of Hong Kong Public Offer Shares credited to your stock account.

The Company will not issue temporary documents of title. Share certificates will only become valid certificates of title provided that the Hong Kong Public Offering has become unconditional and not having been terminated in accordance with its terms. No receipt will be issued for application monies paid. In the event that the Offer Price is less than the price per Hong Kong Public Offer Shares paid by you, the surplus application money (including 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee attributable to such surplus) will be refunded to you without interest.

Circumstances in which you will not be allotted Hong Kong Public Offer Shares

You may not be allotted Hong Kong Public Offer Shares if:

1. **Full discretion of the Company or its agents to reject or accept your application**

   The Company and the Joint Global Coordinators in their capacity as agent for the Company, or their respective agent and nominee, have full discretion to reject or accept any application, in whole or in part, without assigning any reason therefor.

2. **If your application is revoked or withdrawn**

   By completing and submitting this application form, you agree that you cannot revoke your application on or before Saturday, 6 January, 2007. This agreement will take effect as a collateral contract with the Company, and will become binding when you lodge your application form. This collateral contract will be in consideration of the Company agreeing that it will not offer any Hong Kong Public Offer Shares to any person on or before Saturday, 6 January, 2007 except by means of one of the procedures referred to in the Prospectus.

   You may only revoke your application on or before Saturday, 6 January, 2007 if a person responsible for the Prospectus under section 40 of the Companies Ordinance (as applied by section 342E of the Companies Ordinance) gives a public notice under that section which excludes or limits the responsibility of that person for this Prospectus.

   If any supplement to the Prospectus is issued, applicant(s) who have already submitted an application may or may not (depending on the information contained in the supplement) be notified that they can withdraw their applications. If applicant(s) have not been so notified, or if applicant(s) have been notified but have not withdrawn their applications in accordance with the procedure to be notified, all applications that have been submitted remain valid and may be accepted. Subject to the above, an application once made is irrevocable and applicants shall be deemed to have applied on the basis of the Prospectus as supplemented.

   If your application has been accepted, it cannot be revoked or withdrawn. Acceptance of application will be constituted by notification to the press of the results of allocation and, where such basis of allocation is subject to certain conditions or provides for allocation by ballot, such acceptances will be subject to satisfaction of such conditions or the results of such ballot, respectively.

3. **If the allotment of Hong Kong Public Offer Shares is void**

   Your allotment of Hong Kong Public Offer Shares will be void if the Listing Committee of the Hong Kong Stock Exchange does not grant permission to list the H Shares either:

   - within three weeks from the closing of the application lists; or
   - within a longer period of up to six weeks if the Listing Committee of the Hong Kong Stock Exchange notifies the Company of that longer period within three weeks of the closing of the application lists.

4. **You made applications under the Hong Kong Public Offering as well as the International Offering**

   Your application will be rejected if:

   - you make multiple applications or suspected multiple applications; or
   - you or the person for whose benefit you are applying have applied for or taken up, or indicated an interest for or have been or will be placed or allocated (including conditionally and/or provisionally) Hong Kong Public Offer Shares and/or International Offering Shares in the International Offering.

* *for identification purposes only*

Please use this form if you want the Hong Kong Public Offer Shares to be issued in the name of HKSCC Nominees Limited ("HKSCC Nominees") and deposited directly into the Central Clearing and Settlement System ("CCASS") for credit to your CCASS Investor Participant stock account or the stock account of your designated CCASS Participant

By filling in this application form, you agree not to apply for Hong Kong Public Offer Shares as well as International Offering Shares under the International Offering. Reasonable steps will be taken to identify and reject applications under the Hong Kong Public Offering from investors who have received International Offering Shares in the International Offering and to identify and reject indications of interest in the International Offering from investors who have received Hong Kong Public Offer Shares in the Hong Kong Public Offering.

5. Incorrect payment

You will not receive any allocation of Hong Kong Public Offer Shares if your payment is not made correctly.

6. If your application is not accepted

Your application will not be accepted if:

- the Hong Kong Underwriting Agreement and the International Underwriting Agreement do not become unconditional; or
- the Hong Kong Underwriting Agreement or the International Underwriting Agreement is terminated in accordance with their respective terms.

7. Application form not filled in correctly

Your application will be rejected if your application form is not filled in correctly in accordance with the instructions.

8. Dishonoured cheque or banker's cashier order

Your application will be rejected if you pay by cheque or banker's cashier order and the cheque or banker's cashier order is dishonoured on its first presentation.

9. If you apply for more than 50% of the Hong Kong Public Offer Shares

Your application will be rejected if you apply for more than 50% of the Hong Kong Public Offer Shares initially being offered to the public for subscription.

Refund of your money

If you do not receive any Hong Kong Public Offer Shares for any of the above reasons, the Company will refund to you your application monies (including the related 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee). No interest will be paid thereon. All interests accrued on your application monies prior to the date of despatch or collection of the refund cheque will be retained for the benefit of the Company. If your application is accepted only in part, the Company will refund to you the appropriate portion of your application monies (including the related 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee) without interest. If the Offer Price as finally determined is less than the maximum Offer Price of HK$4.05 per H Share paid on application, the Company will refund to you the surplus application monies together with the related 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee attributable to the surplus application monies, without interest.

In a contingency situation involving a substantial over-subscription, at the discretion of the Company, the Joint Global Coordinators and the Joint Lead Managers, cheques for applications for certain small denominations of Hong Kong Public Offer Shares (apart from successful applications) may not be cleared. All refunds will be by cheque crossed "Account Payee Only", and made out to you, or, if you are a joint applicant, to the first-named applicant on your Application Form. Part of your Hong Kong Identity Card number/passport number, or, if you are joint applicants, part of the Hong Kong Identity Card number/passport number of the first-named applicant, provided by you may be printed on your refund cheque, if any. Such data would also be transferred to a third party for refund purpose. Your banker may require verification of your Hong Kong Identity Card number/passport number before encashment of your refund cheque. Inaccurate completion of your Hong Kong Identity Card number/passport number may lead to delay in encashment of or may invalidate your refund cheque.

If you have applied for 1,000,000 Hong Kong Public Offer Shares or above and have indicated on your application form that you wish to collect your refund cheque(s) (if any) in person, you may collect it from:

Computershare Hong Kong Investor Services Limited
Rooms 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong

between 9 a.m. and 1 p.m. on the date notified by the Company in the newspapers as the date of collection of refund cheques/despatch of H share certificates. The date of collection is expected to be on Monday, 18 December, 2006.

If you are an individual who opts for personal collection you must not authorise any other person to make collection on your behalf. You must produce evidence of identity (which must be acceptable to Computershare Hong Kong Investor Services Limited) for collection of your refund cheque(s). If you are a corporate applicant and opt for personal collection you must attend by your authorised representative bearing a letter of authorisation from your corporation stamped with your corporation's chop. Such authorised representative must produce at the time of collection, evidence of identity acceptable to Computershare Hong Kong Investor Services Limited.

If you do not collect your refund cheque(s) personally within the time specified for collection, it/they will be despatched to you by ordinary post to the address on this Application Form at your own risk.

If you have applied for less than 1,000,000 Hong Kong Public Offer Shares or you have applied for 1,000,000 Hong Kong Public Offer Shares or more but have not indicated on your Application Form that you wish to collect your refund cheque personally, your refund cheque will be sent to the address on your application form on the date of despatch, which is expected to be on Monday, 18 December, 2006, by ordinary post and at your own risk.

It is intended that special efforts will be made to avoid undue delay in refunding monies where appropriate.

Personal Data

Personal Information Collection Statement

The main provisions of the Personal Data (Privacy) Ordinance (the "Ordinance") came into effect in Hong Kong on 20 December 1996. This Personal Information Collection Statement informs the applicant for and holder of Hong Kong Public Offer Shares of the policies and practices of the Company and its H Share registrar in relation to personal data and the Ordinance.

1. Reasons for the collection of your personal data

From time to time it is necessary for applicants for securities or registered holders of securities to supply their latest correct personal data to the Company or its agents and the H Share registrar where applying for securities or transferring securities into or out of their names or in procuring the services of the registrars.

Failure to supply the requested data may result in your application for securities being rejected, delay or the inability of the Company or its H Share registrar to effect transfers or otherwise render their services. It may also prevent or delay registration of transfers of the Hong Kong Public Offer Shares which you have successfully applied for and/or the despatch of share certificate(s) and/or the despatch or encashment of refund cheque(s) to which you are entitled.

It is important that holders of securities inform the Company and the H Share Registrar immediately of any inaccuracies in the personal data supplied.

2. Purposes

The personal data of the holders of securities may be used, held and/or stored (by whatever means) for the following purposes:

- processing of your application and refund cheque, where applicable, and verification of compliance with the terms and application procedures set out in this application form and the Prospectus;
- registering new issues or transfers into or out of the names of holders of securities including, where applicable, HKSCC Nominees;
- maintaining or updating the register of holders of securities of the Company;
- conducting or assisting the conduct of signature verifications, any other verification or exchange of information;
- establishing benefit entitlements, such as dividends, rights issues and bonus issues;
- distributing communications from the Company and its subsidiaries;
- compiling statistical information and shareholder profiles;
- making disclosures as required by laws, rules or regulations;
- disclosing relevant information to facilitate claims on entitlements; and
- any other incidental or associated purposes relating to the above and/or to enable the Company and the registrar to discharge their obligations to holders of securities and/or regulators and/or any other purposes to which the holders of securities may from time to time agree.

3. Transfer of personal data

Personal data held by the Company and its H Share registrar relating to the holders of securities will be kept confidential but the Company and its H Share registrar may, to the extent necessary for achieving the above purposes or any of them, make such enquiries as they consider necessary to confirm the accuracy of the personal data and in particular, they may disclose, obtain, transfer (whether within or outside Hong Kong) the personal data of the holders of securities to, from or with any and all of the following persons and entities:

- the Company or its appointed agents such as financial advisers and receiving bankers;
- where applicants for securities request deposit into CCASS, HKSCC or HKSCC Nominees, who will use the personal data for the purposes of operating CCASS;
- any agents, contractors or third-party service providers who offer administrative, telecommunications, computer, payment or other services to the Company or the registrars in connection with the operation of their respective businesses;
- any regulatory or governmental bodies (including the Hong Kong Stock Exchange and the SFC); and
- any other persons or institutions with which the holders of securities have or propose to have dealings, such as their bankers, solicitors, accountants or stockbrokers, etc.

4. Access to and correction of personal data

The Ordinance provides the holders of securities with rights to ascertain whether the Company or the H Share registrar hold their personal data, to obtain a copy of that data, and to correct any data that is inaccurate. In accordance with the Ordinance, the Company and the registrars have the right to charge a reasonable fee for the processing of any data access request. All requests for access to data or correction of data or for information regarding policies and practices and kinds of data held should be addressed to the Company for the attention of the Company secretary or (as the case may be) the H Share registrar for the attention of the Privacy Compliance Officer.

By signing this application form, you agree to all of the above.

How to make your application

1. Use the table set out below to calculate how much you must pay for the number of Hong Kong Public Offer Shares you want to subscribe for. Your application must be for a minimum of 1,000 Hong Kong Public Offer Shares. Applications must be in one of the numbers set out in the table below. No application for any other number of Hong Kong Public Offer Shares will be considered and any such application is liable to be rejected. The table also sets out the total amount payable for such multiples of Hong Kong Public Offer Shares up to $1,160,000 Hong Kong Public Offer Shares. On application, you must pay the maximum offer price of HK$4.05 per Hong Kong Public Offer Share, plus 1% brokerage, 0.004% SFC transaction levy and 0.005% Hong Kong Stock Exchange trading fee. The table below sets out the total amount payable for certain numbers of the Hong Kong Public Offer Shares.

2. Complete the form and sign it. Only written signatures will be accepted.

   If you are applying through a designated CCASS Participant (other than a CCASS Investor Participant):
   - the designated CCASS Participant or its authorised signatories must sign in the appropriate box in the application form; and
   - the designated CCASS Participant must endorse the application form with its company chop (bearing its company name) and insert its participant I.D. in the appropriate box in the application form.

   If you are applying as an individual CCASS Investor Participant:
   - the application form must contain your name and Hong Kong Identity Card number; and
   - you must insert your participant I.D. and sign in the appropriate box in the application form.

   If you are applying as a joint individual CCASS Investor Participant:
   - the application form must contain all joint CCASS Investor Participants' names and the Hong Kong Identity Card numbers of all the joint CCASS Investor Participants; and
   - your participant I.D. must be inserted and authorised signatory(ies) of your stock account must sign in the appropriate box in the application form.

   If you are applying as a corporate CCASS Investor Participant:
   - the application form must contain your company name and Hong Kong Business Registration number; and
   - your participant I.D. and your company chop (bearing your company name) endorsed by your authorised signatory(ies) must be inserted in the appropriate box in the application form.

   Signature(s), number of signatories and form of chop, where appropriate, should match with the records kept by HKSCC. Incorrect or incomplete details of the CCASS Participant or the omission or inadequacy of authorised signatory(ies) (if applicable), participant I.D. or other similar matters may render your application invalid.

3. Staple your cheque or banker's cashier order to the form. You must pay for the Hong Kong Public Offer Shares applied for by one cheque or by one banker's cashier order.

   Each application must be accompanied by either one separate cheque or one separate banker's cashier order.

   If you pay by cheque, the cheque must:
   - be in Hong Kong dollars;
   - be drawn on your Hong Kong dollar bank account in Hong Kong;
   - show your account name. This name must either be pre-printed on the cheque, or be endorsed on the back by a person authorised by the bank. This account name must correspond with your name. If it is a joint application, the account name must be the name of the first-named applicant;
   - be payable to "Bank of China (Hong Kong) Nominees Limited – China Coal Energy Public Offer";
   - be crossed "Account Payee Only";
   - each application must be accompanied by either a separate cheque or banker's cashier order; and
   - the cheque must not be post-dated.

   Your application will be rejected if your cheque:
   - does not meet all these requirements; or
   - is dishonoured upon its first presentation.

   If you pay by banker's cashier order:
   - you must purchase the banker's cashier order, and have your name certified on the back by a person authorised by the bank. The name on the banker's cashier order and the name on the application form must be the same. If it is a joint application, the name on the back of the banker's cashier order must be the same as the name of the first-named applicant;
   - the banker's cashier order must be made payable to "Bank of China (Hong Kong) Nominees Limited – China Coal Energy Public Offer";
   - the banker's cashier order must be crossed "Account Payee Only"; and
   - the banker's cashier order must not be post-dated.

   Your application may be rejected if your banker's cashier order does not meet all these requirements.

4. Tear off the Application Form, fold it once and lodge it in one of the special collection boxes at any one of the following branches of Bank of China (Hong Kong) Limited, Bank of Communications Co., Ltd., Hong Kong Branch, and Standard Chartered Bank (Hong Kong) Limited:

5. Your Application Form can be lodged at these times:

Wednesday, 6 December, 2006	–	9:00 a.m. to 4:30 p.m.
Thursday, 7 December, 2006	–	9:00 a.m. to 4:30 p.m.
Friday, 8 December, 2006	–	9:00 a.m. to 4:30 p.m.
Saturday, 9 December, 2006	–	9:00 a.m. to 12:30 p.m.
Monday, 11 December, 2006	–	9:00 a.m. to 12:00 noon

6. The latest time for lodging your application is 12:00 noon on Monday, 11 December, 2006. The application lists will be open between 11:45 a.m. and 12:00 noon on that day, subject only to the weather conditions. The application lists will not be open if there is:
   - a tropical cyclone warning signal number 8 or above, or
   - a "black" rainstorm warning signal

   in force in Hong Kong at any time between 9:00 a.m. and 12:00 noon on Monday, 11 December, 2006. Instead they will be open between 11:45 a.m. and 12:00 noon on the next Business Day which does not have either of those warnings in force in Hong Kong at any time between 9:00 a.m. and 12:00 noon.

   Business Day means a day that is not a Saturday, Sunday or a public holiday in Hong Kong.

7. The right is reserved to present all or any remittance for payment. However, your cheque or banker's cashier order will not be presented for payment before 12:00 noon on Monday, 11 December, 2006. The Company will not give you a receipt for your payment. The Company will keep any interest accrued on your application monies (up until, in the case of monies to be refunded, the date of despatch of refund cheques). The right is also reserved to retain any share certificates and/or any surplus application monies or refunds pending clearance of your cheque or banker's cashier order.

(1) Maximum number of Public Offer Shares you may apply for.

如欲以香港中央結算(代理人)有限公司(「香港結算(代理人)」)的名義登記將發行的香港公開發售股份，並直接存入中央結算及交收系統(「中央結算系統」)，以記存於　閣下的中央結算系統投資者戶口持有人股份賬戶或　閣下指定的中央結算系統參與者股份賬戶，請用本表格

CHINA COAL ENERGY COMPANY LIMITED*

中國中煤能源股份有限公司

(於中華人民共和國註冊成立的股份有限公司)

全球發售

申請條件

甲. 申請人資格

1. 閣下作為申請人及　閣下為其利益作出申請的任何人士必須年滿18歲或以上並擁有香港地址。
2. 如　閣下屬聯營，則宜以個人或貴的名義而非以聯號的名義作出證明申請。聯名申請人數不得超過4名。
3. 如　閣下屬法人團體，申請表格須由該法人團體正式授權的負責人簽署，並提供證明簽署人的職銜。
4. 除非香港聯合交易所有限公司證券上市規則(「香港上市規則」)准許，倘　閣下為下列人士，則不得申請認購任何香港公開發售股份：
   - 本公司股份的現有實益擁有人；
   - 本公司或其任何附屬公司的行政總裁、董事或監事；
   - 本公司的關連人士(定義見香港上市規則)或緊隨全球發售完成後將成為本公司關連人士的人士；
   - 以上任何人士的聯繫人(「聯繫人」一詞的定義見香港上市規則)；
   - 中華人民共和國(不包括香港、澳門及台灣)的法人或自然人，或美國人士(定義見1933年美國證券法(經修訂)規例S)；或
   - 無香港地址的人士。

乙. 倘　閣下為代名人

只有　閣下為代名人時，方可以遞交超過一份認購香港公開發售股份的申請，在此情況下，　閣下可：(i)透過中央結算系統向香港結算發出電子認購指示(倘　閣下為中央結算系統參與者)；或(ii)使用白色或黃色申請表格作出申請，並以　閣下名義代表不同實益擁有人遞交超過一項申請。

閣下必須在本申請表格上註有「由代名人遞交」一個內填上各實益擁有人(或如屬聯名實益擁有人，則為每名該等實益擁有人)的：

- 賬戶號碼；或
- 其他識別編碼，

如　閣下未填民上述資料，則該項申請將被視作為　閣下的利益而遞交。

丙. 倘閣為　閣下的利益遞交一份認購申請

重複申請或疑屬重複申請將不獲受理。除上文所述者外，倘若　閣下或　閣下與聯名申請人作出以下事宜，　閣下的所有申請(包括香港結算代理人根據電子認購指示提出的申請)將被視為重複申請而不獲受理：

- (個人或聯同他人)使用白色或黃色申請表格，或透過中央結算系統向香港結算發出電子認購指示(如　閣下為中央結算系統投資者戶口持有人或透過一名中央結算系統經紀或託管商參與者提出申請)提出超過一份申請；或
- (個人或聯同他人)以一份白色申請表格與一份黃色申請表格或以白色或黃色申請表格及透過中央結算系統向香港結算發出電子認購指示作出申請；或
- (個人或聯同他人)以一份白色或黃色申請表格，或透過中央結算系統向香港結算發出電子認購指示(如　閣下為中央結算系統投資者戶口持有人或透過一名中央結算系統經紀或託管商參與者提出申請)，提出申請香港公開發售股份項下初步可供公平人士認購的H股50%以上；或
- 已申請或接納或表示有意認購或已獲配售或將獲配售(包括有條件及/或暫時性質)國際發售的國際發售股份或以其他方式已參與或將參與國際發售。

除上述者外，如該等超過一份為　閣下的利益提出的認購申請(包括香港結算代理人根據電子認購指示提出的申請)，則　該下所有認購申請均將視作宣布認購申請而不獲受理。如申請由非上市公司作出，且

- 該公司的唯一業務為經營買賣；及
- 閣下對該公司行使法定控制權，

則該申請將被視作為　閣下本身利益提出。

非上市公司*指在香港聯交所無任何股本證券上市的公司。*

法定控制權指　閣下：

- *控制一間公司董事會的組成；或*
- *控制一間公司過半數的投票權；或*
- *持有一間公司過半數的已發行股本(惟並無計入在盈利或資本分派時無權分享超出某指定金額的任何部分股本)。*

丁. 香港公開發售及發售的分配－A組及B組

就分配而言，根據香港公開發售初步提呈以供認購的162,320,000股香港公開發售股份(已計入香港公開發售及國際發售間按分配任何發售股份改訂的調整)將分為兩組：A組及B組。A組的香港公開發售股份將按公平基準分配予申請認購總額(不包括1%經紀佣金、0.004%證監會交易徵費及0.005%香港聯交所交易費)為5,000,000港元或以下的香港公開發售股份的成功申購人。B組的香港公開發售股份將按公平基準分配予申請認購總額(不包括1%經紀佣金、0.004%證監會交易徵費及0.005%香港聯交所交易費)為5,000,000港元以上及最多為B組總值的香港公開發售股份的成功申購人。　閣下應注意，A組及B組申購所獲的分配比例可能有所不同。如任何一組(按本附錄)的香港公開發售股份出現認購不足的情況，則該組剩餘的香港公開發售股份將轉往另一組，以滿足另一組的需求，並作出相應分配。　閣下僅可提分配A組或B組其中一組而非兩組的香港公開發售股份，並需就獲配置發申購以及超出81,160,000股香港公開發售股份的申購將不獲受理。根據香港公開發售向投資者分配香港公開發售股份(A組及B組)，可視乎按香港公開發售項下所接獲的有效申購的總量而定，分配基準可依據申購人有效申購的香港公開發售股份收回而有所不同，即使香港公開發售股份的分配可能包括抽籤(如適用)，即意味部分申購人提分配股日可能較其他申購同一收日香港公開發售股份的人士為高，而未中籤的申購人則可能不獲發任何香港公開發售股份。

戊. 補充資料

倘就招股說明書刊發任何補充，已遞交申請的申請人可撤會(視乎補充文件所載資料而定)發通知知可撤回其申請。倘申請人未接獲通知，或申請人接獲通知但並無根據所通知的程序撤回申請，則所有已遞交的申請仍屬有效及可能獲接納，在上文所規限下，申請一經提出即不可撤回，而申請人將被視作根據經更補的招股說明書提出申請。

己. 填妥及遞交本申請表格的效用

本申請表格一經填妥及遞交，即表明　閣下(如屬聯名申請人，則各聯名申請人共同及個別)代表本身，或作為代理人或代名人代表各人

- 向本公司及(代表本公司各股東)香港包銷商(或彼等各自的代理人或代名人)(作為本公司代理人)代表　閣下簽立任何過戶表格，或交某銀或其他文件，並根據公司章程的規定，代表　閣下進行所有其他必要事宜，以將任何分配予　閣下的香港公開發售股份，以香港結算代理人的名義登記，以及以其他方式令招股說明書及本申請表格所述的安排得以進行；
- 向聯交所有必要文件及進行所有必要事宜，以及根據公司章程規定，令香港結算代理人登記為　閣下就分配予其公開發售股份的持有人；
- 證明及保證　閣下明白香港公開發售股份從未亦將不會根據美國證券法登記，而　閣下項寫本申請表格時身或美國境外(定義見規例S)，且並非美國人士(定義見規例S及美國證券法)；
- 確認　閣下已收取招股說明書，　閣下申請時，倘該等招股說明書所載資料及陳述，而並無加以修任何其他資料及陳述(招股說明書的任何補充文件所載者除外)；
- 同意本公司、董事、聯席全球協調人、包銷商、參與全球發售的任何其他人士以及任何該等各自的董事、負責人員、僱員、合夥人、代理人或顧問，僅就對本招股說明書、申請表格及本招股說明書任何補充文件所載的資料及陳述負責；
- 同意(在不損害　閣下可能擁有的任何其他權利的情況下)　閣下的申請一經接納，　閣下不可因誤意的失實陳述而撤銷申請，而除按招股說明書所規定者以外，　閣下不得撤回申請；
- (倘申請是為　閣下本身的利益作出)保證是項申請是為　閣下的利益而自色或黃色申請表格或透過中央結算系統向香港結算發出電子認購指示的唯一申請；
- (倘申請是由代理人代表　閣下作出)保證　閣下已有效且不可撤回地賦予　閣下的代理人一切所需權力及授權以作出是項申請；
- (倘　閣下為其他人士的代理人)保證已向該其他人士作出合理查詢，是項申請將會或經已是為該人士的利益使用白色或黃色申請表格或透過中央結算系統向香港結算發出電子認購指示提交的唯一申請，而　閣下及上文授權作為該人士的代理人以作出本申請表格；
- 承諾及確認　閣下(倘申請是為　閣下的利益作出)或　閣下為其利益作出申請的人士並無申請認購或接納或表示有意認購國際發售項下的任何國際發售股份，亦將不會申請認購或接納或表示有意認購國際發售項下的任何國際發售股份，亦無以其他方式參與或將參與國際發售；
- 保證　閣下的申請所載的資料確屬真實及準確；
- 同意每本公司、H股過戶登記處、收款銀行、聯席全球協調人、包銷商及/或彼等各自的顧問及代理人就招股說明書所載的　閣下或　閣下為其利益作出本申請的人士的個人資料及任何資料；
- 同意　閣下的申請、其所發得的任何接納及因此而訂立的合同將受香港法律規管，並按其詮釋；
- 承諾及同意接納　閣下所申請認購或根據本申請提分配的任何較少股數的香港公開發售股份；
- 授權本公司將以香港結算代理人的名義列入本公司的股東名冊以作為　閣下提分配的任何香港公開發售股份的持有人，並授權本公司及/或其代理人將任何股票直接存入中央結算系統，向任何電收支票(如有)則以普通郵遞方式按申請表格上所填寫的地址寄予　閣下(或如屬聯名申請人，則寄予在申請表格上排名首位的申請人)，郵誤風險自負　閣下承擔(惟倘　閣下已提申請1,000,000股或以上香港公開發售股份，並已申請親身註明　閣下將親身收取退款支票(如有)，則　閣下可於2006年12月18日(星期一)上午九時正至下午一時正或本公司在香港中央證券登記有限公司通知　閣下的其他次數(如有))；
- 明白本公司、董事及聯席全球協調人將依賴招股說明書所載資料及陳述，以決定是否就　閣下的申請分配任何香港公開發售股份，　閣下如作出虛假聲明，可能會遭受檢控；
- 倘香港以外任何地區的法律應用於　閣下的申請，則　閣下同意及保證　閣下會遵守所有該等法律，而本公司、聯席全球協調人、包銷商及其他參與全球發售的人士，以及任何該等各自的董事、僱員、合夥人、代理人、負責人員或顧問，概不會因接納　閣下的該股要約，或根據招股說明書所載的條款及條件而　閣下的權利與義務所產生的任何行動，而違反香港以外的任何法律；
- 同意本公司(為其本身及本公司各股東的利益及因此而本公司的全部或部分申購而視為已同意(為其本身及代表其股東)以)遵守和符合中國公司法、特別規定及公司章程；
- 向本公司、本公司各股東、董事、監事、經理及負責人員表示同意，同本公司(代表其本身及為各董事、監事、經理及負責人員)亦向本公司各股東表示同意，根據公司章程的規定將由公司參照或中國公司法或其他有關法律及行政規例所賦予或施加的任何權利或義務得到充分的一切有關本公司事務的爭議及索賠提交仲裁，且倘交仲裁事項被視為授權仲裁庭進行公開聆訊及公佈其裁決，而有關裁決為決定性及最終裁決；
- 向本公司和本公司各股東表示同意本公司H股持有人可自由轉讓其H股；
- 授權本公司代表　閣下與本公司董事、監事及負責人員簽訂合同，據此，該等董事、監事和負責人員承諾遵守和符合公司章程規定其對股東應盡的責任；
- 同意　閣下獲分配的任何香港公開發售股份將以香港結算代理人的名義登記，並直接存入香港結算管理的中央結算系統，以記存入　閣下的中央結算系統投資者戶口持有人股份賬戶或　閣下指定的中央結算系統參與者股份賬戶(按　閣下在本申請表格上的選擇而定)；
- 同意香港結算及香港結算代理人均無義務核實超額的情權利(i)不接納任何或部分以香港結算代理人名義向　閣下分配的香港公開發售股份或不接納該等香港公開發售股份存入中央結算系統；(ii)促使該等香港公開發售股份自中央結算系統中提取及轉入　閣下名下(或倘　閣下為聯名申請人，則於名列首位的申請人名下)，有關風險及費用概由　閣下承擔；(iii)登促使該等已配發的香港公開發售股份以　閣下名義(或倘　閣下為聯名申請人，則以名列首位的申請人名義)發行，在前情況下，將就等已配發的香港公開發售股份的股票以普通郵遞方式寄往申請表格所列地址(郵誤風險概由　閣下承擔)或以供　閣下領取；
- 同意香港結算及香港結算代理人各自可同意分配予　閣下及以香港結算代理人名義發行的香港公開發售股份的股份；
- 同意香港結算及香港結算代理人均毋須就招股說明書及本申請表格中未有載明的資料及陳述負上任何責任；及
- 同意香港結算及香港結算代理人均毋須負責。

本公司、聯席全球協調人、包銷商、參與全球發售的其他各方及該等各自的董事、負責人員、僱員、合夥人、代理人及顧問均有權倚賴　閣下在本招股說明書中作出的任何保證、聲明或陳述，倘本申請乃由聯名申請人所作出，所有由聯名申請人明確作出，表示或承諾或施加於聯名申請人的所有保證、陳述、聲明及義務將被視為由申請人共同及個別作出，表示及承諾以及共同及個別施加於申請人。

庚. 授權書

如　閣下透過正式授權的代理人提出申請，本公司及聯席全球協調人(或彼等各自的代理人或代名人)(作為本公司的代理人)可在彼等認為合適的任何條件(包括出示　閣下代理人的授權證明)證效性的情況時，本公司及連任本公司代理人的聯席全球協調人可全權酌情拒絕或接納任何申請的全部或部分，而毋須提供任何理由。

辛. 股東會議

股東週預期向聯席全球協調人(代表包銷商)及本公司於2006年12月13日(星期三)或該日前後協定，因無論如何不遲於2006年12月17日(星期日)，中華香港公開發售股份的申請人於申購時須支付每股香港公開發售股份的最高發售價4.05港元，另加1%經紀佣金、0.004%證監會交易徵費及0.005%香港聯交所交易費，倘發售價低於4.05港元，則有關的款項將會屬退。臨時會議定個日(即釐定發售價的日期)預計為2006年12月13日(星期三)或前後，即在可申購香港公開發售股份的期間內，本公司將於2006年12月18日(星期一)於(南華早報)(以英文)及(香港經濟日報)(以中文)公佈所釐定的發售價連同香港公開發售的申購結果，聯席全球協調人(代表包銷商及經本公司同意)可於遞交香港公開發售申購表格最後日期早上前臨時調低發售股份數目及/或指示性發售價範圍至低於招股說明書所述者(即每股香港公開發售股份3.20港元至4.05港元)，在此情況下，本公司將會不遲於遞交香港公開發售申購表格最後日期早上在(南華早報)(以英文)及(香港經濟日報)(以中文)刊登其低發售股份數目及/或指示性發售價範圍的公佈，申請人概任意，有關調低發售股份數目及/或指示性發售價範圍的公佈有可能直至該日方會刊登。倘申請人根據香港公開發售遞交申請的最後日期前已遞交香港公開發售股份的申購，則即使如此調低發售股份數目及/或指示性發售價範圍，該等申請其效亦不得撤回。倘本公司與聯席全球協調人(代表包銷商)於2006年12月17日(星期日)或之前因任何原因未能協定發售價，則全球發售將不會進行。

香港公開發售股份的配發

在本申請表格及招股說明書所述條件及按照下，登記聞聯申請結束當日或不會遞選香港公開發售股份的申請，亦不會配發任何超等香港公開發售股份。2006年12月11日(星期一)以後將不會配發發等股份。

本公司預期於2006年12月18日(星期一)在(南華早報)(以英文)及(香港經濟日報)(以中文)公佈香港公開發售的分配基準及申購結果，以及香港公開發售的成功申購人的香港身份證號碼／護照號碼／香港商業登記號碼(如有提供)。

倘成功申請認購香港公開發售股份(全部或部分)

如　閣下的申請全部或部分成功，　閣下的股票(倘香港公開發售成為無條件及發銷終止，預期為2006年12月19日(星期二)上午八時前後，股票方成為有效的所有權證)將以香港結算代理人名義發記，並按　閣下在申請表格的指示於2006年12月18日(星期一)香港時間當天時或(倘出現變故)於香港結算或香港結算代理人選定的任何其他日期存入中央結算系統，以記存於　閣下的中央結算系統投資者戶口持有人股份賬戶或　閣下指定的中央結算系統參與者股份賬戶。

- 倘　閣下提出指定的中央結算系統參與者(中央結算系統投資者戶口持有人除外)提出申請：香港公開發售股份將記存入　閣下指定的中央結算系統參與者(中央結算系統投資者戶口持有人除外)股份賬戶，　閣下可向該中央結算系統參與者查詢所獲配發香港公開發售股份的數目；
- 倘　閣下以中央結算系統投資者戶口持有人身份提出申請：
  本公司預期2006年12月18日(星期一)在(南華早報)(以英文)及(香港經濟日報)(以中文)刊登中央結算系統投資者戶口持有人的申請結果及香港公開發售的結果，　閣下應參閱本公司刊登的公佈，如有任何差誤，須於2006年12月18日(星期一)香港結算或香港結算代理人指定的任何其他日期下午五時正前知會香港結算，香港公開發售股份存入　閣下的股份賬戶後，　閣下即可透過中央結算系統「結算通」電話系統及中央結算系統互聯網系統(「互聯網系統」)(如　閣下為中央結算系統投資者戶口持有人)或任何一間中央結算系統參與者股份賬戶查詢。　閣下應即時查詢有關股份數目，香港結算承認向　閣下提供一份活動結單，列明已記存於　閣下股份賬戶的香港公開發售股份數目。

本公司將不會發出臨時所有權文據，股票僅會於香港公開發售成為無條件及並按照下文所載的終止時才成為有效所有權證。本公司不會就所繳交申請款項發出收據，如發售價低　閣下支付的每股香港公開發售股份股款高於最終釐定的發售價，則多收的認購申請款項(包括就該多收款項而收取的1%經紀佣金、0.004%證監會交易徵費及0.005%香港聯交所交易費)將不計利息退還予　閣下。

導致　閣下不獲配發香港公開發售股份的情況

閣下可能因下列情況而不獲配發香港公開發售股份：

1. 本公司或其代理人可全權決定拒絕或接納　閣下的認購申請
   本公司及聯席全球協調人(作為本公司的代理人)或彼等各自的代理人及代名人可全權的情決定全部或部分拒絕或接納任何認購申請，毋須就其此舉陳原因。
2. 如　閣下的認購申請被撤銷或遭拒
   一經填妥交回申請表格，即表明　閣下同意不得於2007年1月6日(星期六)或之前撤銷認購申請，因此接納將成為與本公司訂立的附屬合同，在　閣下遞交申請表格發即具有約束力。根據該附屬合同，本公司同意，除按招股說明書所述的任何一項程序外，不會於2007年1月6日(星期六)或之前向任何人士發售任何香港公開發售股份，根據公司條例第40條(按公司條例第342E條施行)，負責招股說明書的人士須提招股說明書出公佈，免除或限制其對招股說明書所負責任的情況下，　閣下不可於2007年1月6日(星期六)或之前撤銷申請。
   倘就招股說明書刊發任何補充文件，已遞交申請的申請人可撤會或可能不會(視乎補充文件所載資料而定)發通知可撤回其申請，倘申請人未接獲通知，或申請人接獲通知但並無根據所通知的程序撤回申請，則所有已遞交的申請仍屬有效且可獲接納，在上文所規限下，申請一經提出即不可撤回，而申請人將被視作根據經更補的招股說明書提出申請。
   閣下的申請一經接納，即不可撤銷或撤回，在報章公佈分配結果即構成接納申請，如果有部分配基準受若干條件規限或以抽籤形式分配，則申請僅接納與否視乎有關條件會達成或抽籤結果釐定。
3. 如香港公開發售股份分配作廢
   倘香港聯合交所上市委員會在下列期間並未批准H股上市，則所分配予　閣下的香港公開發售股份(如有)將會作廢：
   - 由截止登記申請起計三個星期內；或
   - 如香港聯合交所上市委員會在截止登記申請後三個星期內知會本公司延長有關期間，則最多由截止登記申請起計六個星期內。
4. 閣下提交超逾香港公開發售以及國際發售提出申請
   在下列情況下，　閣下的申請將會拒絕：
   - 閣下作出重複申請或疑屬重複申請；或
   - 閣下或　閣下為其利益而作出申請的人士已申請或接納，或表示有意認購，或已經提配售或配售或將提配售或配售(包括有條件及/或暫時性質)香港公開發售股份及/或國際發售項下的國際發售股份。

閣下遞交本申請表格，即代表　閣下同意本申請連同香港公開發售股份及國際發售項下的國際發售股份，本公司將採取合理措施識別和拒絕投資者已於國際發售項下獲得國際發售股份的投資者或經香港公開發售作出的申請，亦會識別和拒絕已於香港公開發售項下獲得香港公開發售股份的投資者表示對國際發售的興趣。

5. 未遞妥股款
   倘　閣下並無繳妥股款，　閣下將不會獲分配任何香港公開發售股份。
6. 如　閣下的申請不獲接納
   在下列情況下，　閣下的申請將不獲接納：
   - 香港包銷協議和國際包銷協議未能成為無條件；或
   - 香港包銷協議或國際包銷協議根據各自有關條款予以終止。
7. 未填妥申請表格
   倘　閣下的申請表格並未按指示正確填妥，則　閣下的申請將不予受理。

* *僅供識別*

如欲以香港中央結算(代理人)有限公司(「香港結算(代理人)」)的名義登記所獲發行的香港公開發售股份，並直接存入中央結算及交收系統(「中央結算系統」)，以記存於　閣下的中央結算系統投資者戶口持有人股份賬戶或　閣下指定的中央結算系統參與者股份賬戶，請用本表格

8. 支票或銀行本票未能兌現

倘　閣下所支付的支票或銀行本票未能於首次過戶時成功兌現，則　閣下的申請將不予受理。

9. 倘　閣下申請認購超過50%的香港公開發售股份

倘　閣下申請認購超過50%初步提呈以供公眾人士認購的香港公開發售股份，則　閣下的申請將不予受理。

退還款項

倘　閣下基於上述任何原因未能分配任何香港公開發售股份，本公司將退還　閣下的申請股款(包括相關的1%經紀佣金、0.004%證監會交易費及0.005%香港聯交所交易費)，惟不會就此支付利息。　閣下的申請股款在有關或領取退款支票銀行的所有賬戶利息歸本公司所有。如　閣下的申請僅部分獲接納，本公司會將　閣下的總重申請股款(包括有關的1%經紀佣金、0.004%證監會交易費及0.005%香港聯交所交易費)不計利息退還予　閣下，如是按指定的發售價低於申請時所繳納的最高發售價每股H股4.05港元，本公司將不計利息退還多收的申請股款連同就該多收申請股款收取的相關1%經紀佣金、0.004%證監會交易費及0.005%香港聯交所交易費。

倘出現修改大綱細節的特別情況，本公司、聯席全球協調人及聯席承銷團經辦人可酌情決定不兌現申請若干小額香港公開發售股份股款的支票(或為申請者除外)，所有退款將以註明「只准入入帳戶」的劃線支票發出，並以　閣下作為抬頭人，或如屬聯名申請人，則以　閣下申請表格上排名首位的申請人為抬頭人。　閣下所提供的部分香港身份證號碼／護照號碼，或倘若　閣下乃聯名申請人，則排名首位的申請人的部分香港身份證號碼／護照號碼可能會列印在　閣下的退款支票(如有)上，為退款的目的，該等資料亦可能轉交予第三方。在兌現　閣下的退款支票前，　閣下的銀行可能會要求核實　閣下的香港身份證號碼／護照號碼。如果　閣下的香港身份證號碼／護照號碼填寫有誤，可能會導致　閣下退款支票兌現延遲或無效。

如　閣下已申請認購1,000,000股或以上的香港公開發售股份並在申請表格上註明親自領取退款支票(如有)，　閣下可在本公司於報章上公佈的領取退款支票／寄發H股股票日期當日上午九時正至下午一時正期間，前往以下地點領取退款支票：

香港中央證券登記有限公司
香港灣仔皇后大道東183號合和中心17樓1712-1716室

預期退款領取日期為2008年12月18日(星期一)。

倘　閣下為經授權自領取退款支票的個人，則　閣下不得授權任何其他人士代表　閣下領取。　閣下必須於領取退款支票時出示香港聯合交易所有限公司接受的身份證明文件(倘屬香港中央證券登記有限公司接受的身份證明文件)，倘　閣下為經授權代表領取退款支票的公司申請人，則　閣下必須由　閣下的授權代表帶同蓋上公司印章的授權書到取，有關授權代表須於領取時出示香港中央證券登記有限公司接受的身份證明文件。

如　閣下未在指定領取時間內親自領取退款支票，則退款支票將會以普通郵遞方式寄往　閣下申請表格上所示地址，郵誤風險概由　閣下自行承擔。

如　閣下已申請認購1,000,000股以下香港公開發售股份或倘　閣下已申請1,000,000股或以上香港公開發售股份，但並沒有在申請表格上註明親自領取退款支票，則　閣下的退款支票將於寄發日期(預期將為2008年12月18日(星期一))以普通郵遞方式寄往　閣下申請表格上所示地址，郵誤風險概由　閣下自行承擔。

於退還款項時(倘適用)，將特別注意避免出現不合資格情。

個人資料

個人資料收集聲明

個人資料(私隱)條例(「條例」)中的主要條文已於1996年12月20日在香港生效，此份個人資料收集聲明是向香港公開發售股份申請人及持有人說明本公司及其H股過戶登記處就個人資料及條例而制訂的政策及實際應用條文。

1. 收集　閣下個人資料的原因

當證券申請人或基證券登記持有人申請證券或將證券轉往其名下或由其名下轉讓予他人，或要求過戶處提供證券時，須不時向本公司或其代理人及其H股過戶登記處提供其最新的正確個人資料。

若未能提供所需資料，則可能會導致　閣下的證券申請遭拒絕受理或有所延誤或本公司或其H股股份過戶登記處無法進行過戶或提供服務，　閣下成功申請認購的香港公開發售股份的過戶登記及／或股票的寄發及／或　閣下原有的退款支票的寄發或兌現亦可能受到耽誤或延誤。

證券持有人所提供的個人資料如有任何不確，必須即時知會本公司及H股過戶登記處。

2. 用途

證券持有人的個人資料可以任何方式被採用、持有及／或保存，以作下列用途：

- 處理　閣下的認購申請和退款支票(如適用)及核實是否遵守本申請表格及招股說明書所載的條款及申請手續；
- 登記新股發行或為證券持有人登記轉往其名下或由其名下轉讓予他人的證券，包括(如適用)以香港結算代理人的名義登記；
- 保存或更新本公司證券持有人名冊；
- 核實或協助核實基名或任何其他資料核實或交換；
- 確定獲取利益的資格，例如股息、供股及紅股等；
- 寄發本公司及其附屬公司的公司通訊；
- 編製統計資料及股東資料；
- 遵照法例、規則或規例的規定作出披露；
- 披露有關資料以便依照股事權利作出索償；及
- 與上述有關及／或令本公司及H股過戶處能夠履行其對證券持有人及／或監管機構所負的責任的任何其他附帶或有關目的，及／或證券持有人不時同意的任何其他目的。

3. 向他人提供個人資料

本公司及H股過戶登記處會將對有關證券持有人的個人資料保密，但本公司及其H股過戶處可能會作出該等因為必要的查詢以確定個人資料的準確性，以便資料可用作上述所有或任何用途，尤其按等可能會向下列任何及所有人士及實體披露，取得或轉交證券持有人的個人資料(不論在香港或外地)：

- 本公司或其委任的代理人，例如財務顧問及收款銀行；
- 當申請人要求將證券存入中央結算系統時，香港結算或香港結算代理人將就中央結算系統的運作而使用個人資料；
- 任何向本公司或過戶處提供與其各自業務運作有關的行政、電訊、電腦、付款或其他服務的代理人、承包商或第三方服務供應商；
- 任何監管機構或政府機關(包括香港聯交所及證監會)；及
- 與證券持有人有或將往來或擬有業務往來的任何其他人士或機構，例如其銀行、律師、會計師或股票經紀等。

4. 查閱及更正個人資料

條例賦予證券持有人聯絡本公司或H股過戶登記處是否持有其個人資料的權利，查有權索取該等資料副本及更正任何不確的資料，依據條例，本公司及過戶處有權就處理任何查閱資料的要求收取合理費用。所有關於查閱資料或更正資料或關於政策及實際應用條文的資料及所保存的資料類別的要求，應向本公司的公司秘書處(視乎情況而定)H股股份過戶登記處遞下的私隱條例事務主任提出。

簽署本申請表格後，即表示　閣下同意上述全部規定。

申請手續

1. 按照下表計算　閣下欲認購的香港公開發售股份股數目所應付的認購申請款項。　閣下認購申請的股數最少為1,000股香港公開發售股份。申請認購股數須為下表所列的其中一個股數目。任何其他股數的香港公開發售股份認購申請將不予考慮，而該等認購申請將概不受理。下表亦列出申請認購香港公開發售股份有關佔款(最多為81,160,000股香港公開發售股份)的部份款項總額。　閣下須於遞交申請時繳付每股香港公開發售股份4.05港元的最高發售價，另加1%經紀佣金、0.004%證監會交易費及0.005%香港聯交所交易費。下表列載申請認購若干香港公開發售股份股數目應繳總額。

2. 請填妥及簽署申請表格，本公司僅接納親筆簽名。

如　閣下擬為指定的中央結算系統參與者(中央結算系統投資者戶口持有人除外)申請認購：

- 指定的中央結算系統參與者或其授權簽署人必須在申請表格的適當方格內簽署；及
- 指定的中央結算系統參與者必須在申請表格上加蓋公司印鑑(如有公司名稱)，並在申請表格的適當方格內填上其參與者編號。

如　閣下以個人中央結算系統投資者戶口持有人的身份申請認購：

- 申請表格必須載有　閣下的姓名及香港身份證號碼；及
- 閣下必須在申請表格的適當方格填上　閣下的參與者編號及簽署。

如　閣下以聯名個人中央結算系統投資者戶口持有人的身份申請認購：

- 申請表格必須載有所有聯名中央結算系統投資者戶口持有人的姓名及所有聯名中央結算系統投資者戶口持有人的香港身份證號碼；及
- 在申請表格的適當方格內必須填上　閣下的參與者編號及由　閣下的股份賬戶授權人簽署。

如　閣下以公司中央結算系統投資者戶口持有人的身份申請認購：

- 申請表格必須載有　閣下的公司名稱及香港商業登記證號碼；及
- 在申請表格的適當方格必須填上　閣下的參與者編號及加蓋公司印鑑(倘有公司名稱)，並由　閣下授權簽署人加簽。

簽署、簽署人數目及印鑑形式(如適用)必須與香港結算的記錄相符。

如有關中央結算系統參與者的資料不確或不全，或授權簽署(如適用)、參與者編號或其他額外事宜有遺漏或不當，均可能導致申請作廢。

3. 付款支票或銀行本票須緊釘於表格上。　閣下必須以一張支票或一張銀行本票支付香港公開發售股份的款項，每份申請均須附上一張獨立支票或一張獨立銀行本票。

即以支票付款，該支票必須：

- 為港元支票；
- 從　閣下在香港的港元銀行賬戶中開出；
- 顯示　閣下的賬戶名稱，而該賬戶名稱必須已預印在支票上，或由有關銀行授權的人士在該支票背書，該賬戶名稱必須與　閣下姓名相同。如聯營名稱開申請，則該賬戶名稱必須與排名首位所名的申請人的姓名相同；
- 註明抬頭人為「中國銀行(香港)代理人有限公司－中煤股份公開發售」；
- 劃線註明「只准入抬頭人賬戶」；
- 每份申請必須附有獨立開出的支票或銀行本票；及
- 支票不得為期票。

在下列情況下，　閣下的認購申請將不獲接納：

- 閣下的支票未能符合上述所有規定；或
- 閣下的支票首次過戶未獲兌現。

即以銀行本票付款：

- 閣下應請實銀行本票，並由有關銀行授權的人士在銀行本票背面簽署核證　閣下姓名，銀行本票所示姓名必須與申請表格所示姓名相同。如屬聯名認購申請，則銀行本票背面所示姓名必須與排名首位所名的申請人的姓名相同；
- 銀行本票必須註明抬頭人為「中國銀行(香港)代理人有限公司－中煤股份公開發售」；
- 銀行本票必須劃線註明「只准入抬頭人賬戶」；及
- 銀行本票不得為期票。

如　閣下的銀行本票未符合上述所有規定，　閣下的認購申請可能不獲接納。

4. 請將下申請表格，對摺一次，然後投入中國銀行(香港)有限公司、交通銀行股份有限公司香港分行及遠東銀行(香港)有限公司的下列任何一間分行特設的收集箱內：

(a) 中國銀行(香港)有限公司

	分行名稱	地址

5. 閣下可於下列時間內遞交申請表格：

2008年12月6日(星期三)　－　上午九時正至下午四時三十分
2008年12月7日(星期四)　－　上午九時正至下午四時三十分
2008年12月8日(星期五)　－　上午九時正至下午四時三十分
2008年12月9日(星期六)　－　上午九時正至下午十二時三十分
2008年12月11日(星期一)　－　上午九時正至中午十二時正

6. 遞交申請表格的截止時間為2008年12月11日(星期一)中午十二時正，本公司將於當日上午十一時四十五分或中午十二時正前開始辦理認購申請登記，惟其視乎當日天氣情況而定。如下列警告訊號於2008年12月11日(星期一)上午九時正至中午十二時正內任何時間在香港生效，則本公司不會開始辦理認購申請登記：

- 八號或以上颱風或暴雨訊號；或
- 「黑色」暴雨警告訊號。

認購申請登記將改於上午九時正至中午十二時正期間內任何時間在香港普無發出上述任何一項警告訊號的下一個營業日上午十一時四十五分至中午十二時正進行。

營業日指香港的星期六、星期日或公眾假期以外的日子。

7. 本公司保留拒絕接納任何認購申請股款過戶的權利，惟　閣下的付款支票或銀行本票將不會於2008年12月11日(星期一)中午十二時正前過戶，本公司不會向　閣下發出付款收據，本公司將保留　閣下的申請股款的所有利息(如屬退款，則計至退款支票寄發日期止)，本公司亦有權在　閣下的支票或銀行本票過戶之前保留任何股票及／或任何多收的申請股款或退款。

中国中煤能源股份有限公司
China Coal Energy Company Limited

授权书

本人，经天亮，地址为中国北京市朝阳区北四环东路 108 号千鹤家园 2-2407，身为中国中煤能源股份有限公司 China Coal Energy Company Limited（“公司”）之董事（“董事”），特此不可撤销地授权及委托公司其他任何一位董事个别及/或共同地作为本人的合法授权人（“授权人”），就公司计划以公开发售及配售的方式发售每股面值人民币 1.00 元的 H 股和申请公司 H 股于香港联合交易所有限公司（“联交所”）上市的项目（“发售和上市项目”）（有关详情已载于公司即将刊发的招股书（“招股书”）），代表本人和以本人名义：

(1) 审核、批准、签署、盖章（如适用）、交付、处理、执行、完成、发行、出版和/或发布所有或任何授权人认为必须或适当的文件，并作出合适的声明、保证、赔偿及承诺（在不妨碍前述规定普遍性的前提下，这种文件包括招股书、验证纪录、合规顾问协议、所有承销协议及其他承销文件）；

(2) 按《公司条例》（香港法例第 32 章）和《香港联合交易所有限公司证券上市规则》及其他香港证券法律法规的规定披露有关公司之资料及办理规定送交联交所的文件；

(3) 作出所有或任何与发售和上市项目有关的其他行动和事情（包括签署、盖章（如适用）和交付所有或任何授权人合理认为以上事项所必须或适当的所有其他文件、协议和契据）。

本人在此承诺在所有情况下，授权人代表本人和以本人名义所作出的所有上述行动和事情以及授权人代表本人和以本人名义签署的所有上述文件、协议和契据（包括当中的声明、保证、赔偿及承诺）对本人是有效和具有约束力的。本人保证承认授权人根据本授权书的权力合法采取（或促使他人采取）的任何行动。

本人对上述可能由授权人代表本人和以本人名义批准、签署、盖章、交付、执行及/或完成的协议、契据及其他所有文件的内容承担全责。对于行使本授权书授予的任何权力引起所有各种行动、诉讼、索偿、费用、开支和责任，本人特此保证对每一授权人和其财产作出赔偿。

本人兹委任除本人外的其他每一位董事个别及/或共同作为本人的替任人，代表本人在任何公司董事会会议或董事委员会（本人为成员之一）会议上，在本人未能出席时，就所有与发售和上市项目有关的事宜投票。

本授权书在签署之后 ~~12~~ 3 个月内有效；在有效期间内不可撤消，但在有效期过后不再具有任何效力。

本人同意此授权书的原件或复印件或认可副本可呈送联交所、中国国际金融（香港）有限公司、花旗环球金融亚洲有限公司、摩根士丹利添惠亚洲有限公司及任何其他公司董事会或经董事会正式授权之委员会或获授权之个别董事认为有需要或适合向其披露的人士。

本授权书受中华人民共和国香港特别行政区法律管辖和解释。

本授权书于 2006 年 11 月 22 日经本人签字、盖章及交付。

由签字人签名、盖章及交付：

Dear Sirs

Statement of Adjustments

We refer to our accountants' report dated 6 December 2006, addressed to the directors of China Coal Energy Company Limited (the "Company") on the financial information of the Company and its subsidiaries for inclusion in the prospectus of the Company dated 6 December 2006.

We attach hereto a statement, initialled by us for the purposes of identification, which sets out the adjustments made in arriving at the financial information upon which our report was given and the reasons for making such adjustments. We confirm that in our opinion only such adjustments have been made to the combined income statement and combined balance sheet in respect of each accounting period under review as are necessary, and that no other adjustments have been made thereto.

This letter is provided solely pursuant to paragraph 4.14 of the Rules Governing the Listing of Securities on the Main Board of The Stock Exchange of Hong Kong Limited and Section 342C of the Hong Kong Companies Ordinance and is not to be used for any other purpose.

Yours faithfully,

收购协议

本收购协议（以下简称“本协议”）于2005年3月24日，由下列当事人共同签署：

转让方：大屯煤电（集团）有限责任公司（以下简称“转让方”）

地址：江苏省徐州沛县大屯

受让方：上海大屯能源股份有限公司（以下简称“受让方”）

地址：上海市浦东新区桃林路18号

在本协议中，转让方和受让方单独称为“一方当事人”；共同称为“双方当事人”。

鉴于：

（1）受让方为一家主要从事煤炭采选业的上市公司，转让方为受让方控股股东并为其提供相关服务；

（2）转让方拥有电力资产和其他有关资产，主要从事火力发电、供电、供热、发电设备检修业务，为受让方日常业务运营提供电力服务和供暖服务；转让方电力资产和其他有关资产目前主要由转让方设立的大屯煤电（集团）有限责任公司电业分公司（非独立企业法人）负责经营；

（3）为减少双方当事人之间的关联交易，根据本协议所约定的陈述、承诺和保证，转让方愿意转让，受让方愿意受让电力和其他有关资产。

为此，转让方与受让方本着公平、公正、自愿、诚信之原则，按照《中华人民共和国合同法》和其他有关的法律、法规之规定，就受让方收购转让方电力和其他有关资产约定如下：

第一条 收购标的

1.1 本次收购的标的为大屯煤电(集团)有限责任公司电力及有关资产(以下统称为"电力资产"),收购的范围为大屯煤电集团电力资产及相应债务,并包括电力资产占用的786329.4平方米的国有土地之土地使用权。该等资产的详细情况以北京中企华资产评估有限责任公司(以下简称"评估机构")2005年1月28日出具的中企华评报字(2004)第267号《上海大屯能源股份有限公司拟收购大屯煤电(集团)有限责任公司电力及有关资产项目资产评估报告书》(以下简称"评估报告")所载内容为准。

1.2 根据国家有关规定,同时为维持电力资产的持续经营,双方当事人约定受让方在收购该等资产的同时,聘用原转让方电力资产所涉及的1506名员工,聘用条件为转让方原聘用条件。

第二条 收购价款

2.1 根据评估报告,以2004年10月31日为评估基准日,电力资产的净资产评估值为人民币69956.85万元。

2.2 双方当事人一致同意,本次收购价款以评估报告所确定的电力资产净资产评估值为基础,根据评估基准日至本协议生效日期间电力资产因折旧、存货变动和在建工程新增投入等因素产生的价值变动进行相应调整。双方当事人明确,该收购价款已经包含了电力资产占用的786329.4平方米的国有土地使用权的转让价款。

2.3 根据相关规定,为履行本协议项下进行的交易,转让方应将评估报告报中国中煤能源集团公司(以下简称"中煤集团")审核并报转国务院国有资产监督管理委员会(以下简称"国资委")备案。若中煤集团和国资委对资产评估报告持有异议,双方当事人同意由评估机构对评估报告作相应调整,并以调整后的净资产评估值作为收购价款的基础。

2.4 除以上约定的收购价款之外,双方当事人应按照法律规定分别承担因本次收购所发生的应纳税额和相关费用。受让方无须另行向转让方支付其他的费用。

第三条　特别约定

3.1　转让方和受让方特别约定，由于电力资产中的7号电力机组属在建项目，目前转让方正根据国家有关规定重新履行报批手续，因此在7号电力机组获得批准文件之前，受让方暂不向转让方支付7号电力机组资产相对应的收购价款；在7号机组获得批准文件后受让方再进行支付。若7号机组在本协议生效后一年内未取得批准文件，则受让方不将7号机组纳入本收购之中。

第四条　收购价款支付

4.1　双方约定收购价款扣除7号电力机组资产相对应的价款后的余额由受让方分两期支付。在本协议生效后的十个工作日内，受让方应向转让方支付电力资产收购价款的50%（第一期），剩余的50%的收购价款（第二期）在本协议生效后的一年内付清。

4.2　双方进一步约定7号电力机组资产相对应的价款，在7号电力机组获得审批文件后，计入第二期收购价款。

4.3　上述收购价款的支付应汇入转让方指定的银行帐户。转让方应当在受让方汇款前以书面方式将汇款银行帐户通知受让方。

第五条　协议生效条件

5.1　本协议在满足以下条件后方可生效：

（1）评估报告经中煤集团审核，并报转国资委备案；和

（2）双方当事人各自的权利机关已做出批准本收购协议项下交易的决议。

第六条　资产交接和过户

6.1　双方当事人约定本协议生效后的第三个工作日为收购实施日。自收购实施日起的90日内（"交接期"），双方当事人应按照以下的约定办理完成资产交接和过户手续：

（1）电力资产的接收。转让方应根据受让方的通知，安排其工作人员会同受让方的工作人员按照评估报告资产明细表的记载，清点有形资产和

无形资产并签署确认书。同时，转让方应向受让方真实、全面、准确地提交与该等资产有关的财务、技术、业务等方面的资料、文件及权利证书，并会同受让方就资产的接收履行法律、法规要求的产权过户登记、批准、许可手续。

（2）人员的接收。转让方应同电力资产所涉及的1506名转让方员工解除劳动关系，同时受让方同该等员工订立新的聘用合同。

（3）债权、债务的处理。在本协议签署后，双方当事人应就该等资产涉及的债权债务的转移取得相关债权人的同意，或通知相关的债务人。在交接期，转让方应当及时将电力资产所涉及的债权债务文件移交给受让方。

（4）业务衔接。转让方应按照受让方的要求将该等资产的生产经营业务合同的权力和义务，经交易对方同意后，转移给受让方。

（5）土地使用权的处理。转让方应及时按江苏省国土资源厅出具的《关于核准大屯煤电（集团）有限责任公司土地使用权处置方案的复函》办理电力资产占用的786329.4平方米国有土地之使用权出让手续，并在完成出让手续后立即与受让方签订转让协议将该等土地之使用权转让给受让方。转让方应尽力协助受让方办理该土地使用权过户手续。

第七条　收购完成

7.1　当受让方按照4.1款的约定向转让方支付完毕第一期款项后，且转让方向受让方完成资产交接和过户手续后，本次收购完成。收购完成后，转让方即拥有电力资产的产权并承担相应的义务和风险。

7.2　收购完成之日，双方当事人应当共同签署一份确认函，以明确该等资产接收、过户完成并列明收购完成的日期。

第八条　转让方声明、保证及承诺

8.1　转让方向受让方声明、保证及承诺：

（1）转让方依法有效存续，具备签署和履行本协议的一切必要的权利、授权和能力；

（2）转让方对电力资产拥有合法的、完全的所有权和权益，有权签署本协议并转让电力资产；

（3）在电力资产上，没有涉及任何抵押、质押或其他形式的担保，也无任何查封、扣押、冻结和其他限制资产所有权转让例行使的情形；

（4）转让方未针对电力资产作出任何导致在资产交接后影响或限制受让方拥有处分该等资产的权利及/或利益的任何协议、安排或承诺；

（5）不存在任何第三方行使或声称将行使电力资产的所有权；

（6）转让方未与任何第三方签署与本协议内容相冲突的合同或协议；

（7）转让方承诺于本协议签署后不就电力资产的转让、租赁、承包、托管等事宜与其他任何第三方进行交易性的接触或签订意向书、合同、协议、谅解备忘录等各种形式的法律文件；

（8）就受让方聘用转让方员工提供尽可能的帮助；

（9）将以善意的、合作的方式履行其在本协议项下的义务。

8.2 转让方明确上述声明、保证及承诺事项如有不实或违背将构成违约，应承担本协议第十条所约定的违约责任。

第九条 受让方声明、保证及承诺

9.1 受让方向转让方声明、保证及承诺：

（1）受让方依法设立并合法存续，具备签署和履行本协议的一切必要的权利、授权和能力；

（2）按照本协议约定向转让方支付收购价款，逾期则按银行同期存款利率支付滞纳金；

（3）就本次收购依据法律、法规的规定，履行必要的批准、许可或同意手续；

（4）将以善意的、合作的方式履行在本协议项下的义务。

9.2 受让方明确上述声明、保证及承诺事项，如有不实或违背将构成违约，应承担本协议第十条所约定的违约责任。

第十条 违约责任

10.1 任何一方当事人违反其在本协议项下的任何责任与义务，即构成违约。违约方应承担守约方因其违约行为遭受的实际损失。

10.2 在资产交接和过户时或收购完成后，如果发现转让方于资产交接前未向受让方披露的该等资产的债务、纠纷或其他权利争议，转让方有不可推卸的责任予以解决。因此造成受让方的任何经济损失，转让方应予赔偿.

第十一条 争议的解决

11.1 因本协议发生的或与之有关的任何争议，双方当事人应友好协商解决。若经友好协商无法解决争议，任何一方当事人可以向有管辖权的人民法院提起诉讼。

11.2 在争议期间，除争议的事项外，双方当事人均应继续履行本协议约定的其他各项义务。

第十二条 不可抗力

12.1 不可抗力是指双方当事人不能控制、不可预见亦无法避免的事件。该等事件将妨碍、影响或延误任何一方当事人履行本协议的全部或部分义务，该等事件包括但不限于地震、台风、洪水或其他灾害、战争等事件。

12.2 不可抗力造成任何一方当事人不能履行或不能完全履行本协议的，均不承担违约责任。

12.3 如发生不可抗力事件，遭遇该事件的一方当事人应立即用最快捷的方式通知对方，并在十日内提供证明文件，说明该事件的细节和不能履行或部分不能履行或需延迟履行本协议的原因，然后由双方当事人协商是否延期履行本协议或终止本协议。

第十三条 其他

13.1 本协议签署后至该等资产交接日，转让方和受让方仍需继续执行双方

当事人以前签署的《煤电供应协议》和《综合服务协议》；自该等资产交接完成后，双方当事人需对《煤电供应协议》和《综合服务协议》进行相应变更。

13.2 本协议自双方当事人的法定代表人或授权代表签署之日起成立，满足本协议第四条约定之生效条件后生效。

13.3 本协议签署后，双方当事人可就本协议未尽事宜签署补充协议，该等补充协议为本协议不可分割的组成部分。本协议如有任何修改，需经双方当事人同意并签署书面文件。

13.4 本协议正本一式六份，双方当事人各执二份；其余正本交各有关部门备案。每份正本均具有同等法律效力。

中国中煤能源集团公司

与

中国中煤能源股份有限公司

煤炭出口外销委托代理框架协议

二00六年九月五日

煤炭出口外销委托代理框架协议

本协议由以下双方于 2006 年 9 月 5 日在中华人民共和国(以下简称"中国")北京签订：

甲方：中国中煤能源集团公司

企业法人营业执照注册号：1000001000085

住所：北京市朝阳区黄寺大街 1 号

法定代表人：经天亮

乙方：中国中煤能源股份有限公司

企业法人营业执照注册号：1000001004047

住所：北京市朝阳区黄寺大街 1 号

法定代表人：经天亮

鉴于：

1、 甲方系依据中国法律设立的全民所有制企业，拥有煤炭出口专营权。

2、 甲方获国务院国有资产监督管理委员会批准进行资产重组，作为发起人独家发起设立乙方，将含煤炭生产经营业务和资产投入乙方；惟煤炭出口专营权仍为甲方拥有。

3、 乙方于 2006 年 8 月 22 日成立，拟在境外公开发行股票，并将该等股票在境外上市。

4、 在本协议签订之日，甲方拥有乙方 100%的股权；在乙方公开发行股票

和境外上市完成后，甲方将继续为乙方的控股股东。

5、 根据中国相关法律要求，乙方拟委托甲方代理其煤炭出口、外销。

基于以上所述，根据《中华人民共和国合同法》、《中华人民共和国对外贸易法》等相关法律、法规的规定，为明确甲方与乙方的权利义务关系，以上双方经过友好协商，签订本协议。具体内容如下：

第一条 协议主体

1.1 如适用或除非文意另有所指外，本协议所指甲方为甲方及/或其不时之联系人（“联系人”的定义与不时生效的《香港联合交易所有限公司证券上市规则》（以下简称“《上市规则》”）中的“联系人”的定义相同）。

1.2 如适用或除非文意另有所指外，本协议所指乙方为乙方及/或其附属公司（“附属公司”的定义与《上市规则》中“附属公司”的涵义相同）。

第二条 定义

2.1 除非上下文中另有规定，下述措词在本协议中应有下述含义：

香港联交所：	指香港联合交易所有限公司。
煤炭出口专营：	指根据国家的法律，煤炭产品出口实行国营贸易管理，已获得煤炭出口国营贸易经营权的企业方可以申请煤炭出口配额，出口煤炭产品。
煤炭出口代理：	指甲方根据煤炭出口专营制度和外贸代理制度的规定，应乙方的委托，代表乙方与乙方选定的境外买方就煤炭出口合同进行协商和谈判、代表有关乙方签订煤炭出口合同、申请出口许可证、收汇及其他乙方不时向甲方提出要求的相关事务。
不可抗力事件：	指受影响一方不能合理控制的、无法预料或即使可预料到也不可避免且无法克服，并于本协议签订日之后出现的，使该方对本协议全部或部分的履行在客观上成为不可能或不实际(包括但不限于花费合理金额仍无法履行)的任何事件。此等事件包括但不限于任何政府机构行为（无论有效或无效）、火灾、水灾、风暴、暴乱、爆炸、自然灾害、战争、破坏活动、劳工问题（包括停工、罢工和怠工）以及

法院禁令或裁定。

2.2 除非本协议另有规定，在本协议中：

2.2.1 一方包括其继承者。

2.2.2 甲方、乙方单称"一方"，合称"双方"。

2.2.3 各条款之标题仅为方便查阅而设，不具法律效力或影响本协议的解释。

第三条 委托服务

3.1 乙方同意委托甲方作为非独家的煤炭出口及外销代理人，甲方同意接受乙方之委托，按照本协议的条款，为乙方煤炭产品出口提供煤炭出口及外销代理服务。

3.2 甲方向乙方提供的代理服务条款应与其他同样具有煤炭出口专营权的出口代理商向乙方提供的代理服务条款相同或者更为优惠。如果第三方同样具有煤炭出口专营权且能按照优于本协议下甲方的价格或其它条件，提供相似服务，则乙方有权委托该第三方提供代理服务；但如其它具有煤炭出口经营权的企业的代理条件同等于或逊于甲方的代理条件，乙方应优先选用甲方作为其煤炭产品出口、外销代理商。

第四条 具体执行合同

4.1 为顺利执行本协议，乙方可就出口煤炭产品的煤种、矿别、品名、数量、品质规格以及乙方煤炭产品出口的需求等，确定年度煤炭产品出口计划，以及与甲方可另行订立具体合同或实施细则，订立后的具体合同或实施细则不应违反本协议的约定。

4.2 乙方有权选定其出口煤炭产品的境外买方，并确定出口煤炭产品的煤种、矿别、品名、数量、品质规格和销售价格、运输方式及其他合同条款。

4.3 甲方向乙方提供的出口代理服务包括负责代表乙方与乙方选定的境外买方就煤炭出口合同进行协商和谈判、代表有关乙方签订煤炭出口合同、申请出口许可证、收汇及其他乙方不时向甲方提出要求的相关事务。

4.4 甲方同时作为乙方的煤炭外销代理，就乙方在国际市场销售煤炭，视情况需要，可以将对台湾地区市场的外销代理事务转委托给甲方在中国境外的

全资子公司完成并促使其为乙方提供在台湾地区市场销售煤炭所必需的外销代理服务。在此情况下，该全资子公司亦应被视为乙方的煤炭外销代理，并受本协议的约束。甲方已获该全资子公司授权，代表其签署本协议。

4.5 乙方经甲方邀请，可参加对境外买方的商务谈判，但不得自行签约，乙方不得自行就合同条款对外作任何形式的承诺。煤炭出口合同签署之前甲方应通告乙方并与乙方商定煤炭出口合同的具体条款。

4.6 甲方邀请乙方参与必要的国际市场研讨和对外销售工作，并对出口价格和数量提出建议供乙方参考。甲方应及时向乙方提供有关煤炭出口的国际市场行情，通报国际市场动态和价格动态。

4.7 甲方代理乙方与境外买方之煤炭出口合同一经订立，即通知乙方按船期及煤炭出口合同的条款提前备货。乙方应及时向甲方提供委托出口煤炭的规格、品质、数量和货物装运、出境货物换证凭单等详细资料。

4.8 货物到港后，以船次和指定日期内由货物产地商检部门出具的商检证书作为货物装船、放行依据。

4.9 货物装船后，以口岸商检部门商检结果为最终品质及结汇依据。如果经商检部门认可，同意采用甲方与境外买方在煤炭出口合同中约定的商品检验标准，则商检结果依据该等标准做出。如甲方与境外买方系通过仲裁检验方式完成的煤炭品质检验，则以仲裁检验结果为准。

4.10 乙方保证由甲方进行煤炭出口代理的煤炭产品的质量符合与境外买方订立的协议指标要求。

第五条 代理费及其他费用

5.1 除本协议另有约定外，甲方向乙方提供煤炭出口、外销代理服务收取的代理费应按照当时相关市场收费率确定，即甲方向乙方收取的代理费不高于其他具有煤炭出口专营权的出口、外销代理商代理出口同级同类煤炭产品，按正常商业交易及一般商业条款所收取的代理费。

5.2 在前述原则指导下，甲乙双方同意除非在协议期内双方另有协定以调整和反映当时相关市场收费率以外，煤炭出口、外销代理费按出口结汇当日外汇牌价折成人民币且按照下列费率标准执行：

5.2.1 出口台湾地区以外的市场：每吨煤出口 FOB 价 0.7%（百分之零点七）；

5.2.2 出口、外销台湾地区市场：每吨煤出口 FOB 价 0.7%（百分之零点七）+0.5 美元/吨

5.3 代理费的收取，原则上采取煤炭出口后按船次结清；相应外汇安排按国家有关规定执行。

5.4 乙方负担煤炭运抵港口场地直至装船平仓在内的全部费用。

5.5 如果甲方代表乙方与境外买方签订的煤炭出口合同是 CFR 和 CIF 条款，乙方在支付前款规定的费用的同时，还应承担海运费及 CIF 项下的保险费。

第六条 结算方式

甲方负责根据煤炭出口合同向境外买方收取（包括催收）货款。甲方应于收到境外买方支付的每笔货款后的 5 日内，通过银行原币或折算成人民币将全部货款划转到乙方指定的银行账号内。乙方按月向甲方支付当月收到的货款项下的代理费，但甲方在向乙方付清每份具体出口代理合同项下全部货款前无权要求乙方支付该份出口代理合同项下的代理费。

第七条 协议期限

7.1 本协议经双方法定代表人或授权代表签字并加盖公章后，有效期追溯自乙方依法设立之日起至 2008 年 12 月 31 日止。

7.2 于上述期限届满日之前六个月内，在符合《上市规则》和有关适用法律法规的前提下，乙方有权选择续展本协议之期限，甲方不得拒绝。但乙方任何关于续展本协议的决定均应以书面形式通知甲方。

第八条 双方的陈述和保证

8.1 双方均根据中国法律正式注册成立、有效存在。

8.2 双方已采取一切所需行动，以及（除本协议另有明确规定外）取得签订本协议所需的一切同意书、批文、授权和许可。本协议的签订，不会违反(i)各方的公司章程，(ii)各方的其它任何协议或义务，或(iii)任何中国或其它有关的地域的现行法律、法规或法令。其在本协议上签字的代表已被授予全权签署本协议。

8.3 双方均承诺促使其各自下属企业从事一切需要从事（或不从事一切不应该

从事）的行为或事项以使其能够适当地履行其在本协议中的义务。如任何一方在本协议期限内任何时间要求另一方的任何下属企业就该下属企业对有关本协议的执行和在本协议约定的前提下另行签署一份具体执行或补充协议，双方保证促使有关的下属企业和另一方就所要求的形式签署该协议。

8.4 甲方进一步承诺：

8.4.1 甲方一直依法从事经营活动并从未从事任何超出或违反法律法规的活动或行为。甲方有义务维护煤炭出口专营资格。在国家煤炭出口国有专营制度实施期间，甲方将确保其资格不因甲方原因丧失或者受到限制。

8.4.2 甲方应不时按照前述 4.1 条的约定，确保在其所持有煤炭出口配额限度内，有充分的出口配额以满足乙方煤炭的出口需要。

第九条 协议履行、变更和终止

9.1 若本协议项下的任何交易构成《上市规则》所述之关连交易或持续性关连交易，且根据《上市规则》该等交易需在获得香港联交所豁免或乙方（即中国中煤能源股份有限公司）独立股东的事先批准或遵守《上市规则》有关关连交易或持续性关连交易的任何其它规定后方可进行，则本协议与该等交易有关的履行以按照香港联交所给予豁免的条件进行及/或按照《上市规则》的规定获得乙方（即中国中煤能源股份有限公司）独立股东在股东大会上的事先批准及/或遵守《上市规则》有关关连交易或持续性关连交易的任何其它规定为先决条件。

9.2 若香港联交所的豁免是附条件的，则本协议应按所附条件履行。

9.3 在本协议有效期内，若香港联交所对本协议下某一项关连交易或持续性关连交易的豁免被收回、撤销或失效，或其他原因导致该项交易需要但未能符合不时生效的《上市规则》有关关连交易或持续性关连交易的要求，则本协议该项交易有关的履行中止。

9.4 在本协议有效期内任何时间，若本协议下的交易所涉及的有关财政年度累计交易总金额可能或预期会超越已公布的该年度的总金额上限(如适用)，双方同意乙方尽快通知香港联交所并履行《上市规则》下所有适用和必须履行的监管义务，包括根据《上市规则》召开乙方（即中国中煤能源股份有限公司）独立股东大会对有关关连交易和重新厘定的年度金额上限寻求独立股东批准（如适用)。未满足所有有关监管规定前，双方同意尽力控制有关交易该年度总额不超过已公布的金额上限。否则，本协议下与该项交易有关的履行中止。

9.5 若本协议与所有各项交易有关的履行均按第 9.3 及/或 9.4 条中止，则本协议终止。

9.6 本协议任何一条款成为非法、无效或不可强制执行并不影响本协议其它条款的效力及可强制执行性。如本协议内的任何条款被裁定无效，但如作部分删除或削减可成为有效者，该条款可在作必要的删除或修订使之有效及有可强制执行性后仍可实施。

9.7 本协议的修订仅可经书面协议并经双方授权代表签字且须经双方采取适当的法人行动批准和符合并满足《上市规则》及有关适用法律法规的监管规定的前提下作出。

第十条 公告

任何一方未经另一方事先书面同意，不得作出与本协议事项有关的任何公告，但根据中国法律或中国证监会、香港联交所、香港证券及期货事务监察委员会或任何其他相关的规定作出公告的除外。

第十一条 不可抗力

11.1 如果本协议任何一方因受不可抗力事件的任何事件影响而未能履行其在本协议下的全部或部分义务，该义务的履行在不可抗力事件妨碍其履行期间应予中止。

11.2 由于不能预见并且对其发生和后果不能防止或避免的不可抗力事件，致使直接影响本协议的履行或者不能按约定的条件履行时，遇有上述不可抗力事件的一方，应将事件情况尽可能在最短的时间内以通知书形式通知对方，并应在 15 天内，提供事件详情及本协议不能履行或者部分不能履行，或者需要延期履行的理由的有效证明文件。声称不可抗力事件导致其对本协议的履行在客观上成为不可能或不实际的一方，有责任尽一切合理的努力消除或减轻此等不可抗力事件的影响。

11.3 不可抗力事件发生时，双方应立即通过友好协商决定如何执行本协议。按照不可抗力事件对履行协议影响的程度，由双方协商决定是否解除本协议，或者部分免除履行本协议的责任，或者延期履行本协议。

第十二条 通知

12.1 一方根据本协议规定作出的通知或其它通讯应采用书面形式并以中文书

写，并可经专人手递或挂号邮件发至另一方指定的地址，或传真至另一方指定的传真号码。通知被视为已有效作出的日期应按以下的规定确定：

12.1.1 专人交付的通知应在专人交付对方指定人士签收之日被视为有效；

12.1.2 以挂号邮件寄出的通知应在付邮(以邮戳日期为准)后第 5 天(若最后一天是星期六、日或法定节假日，则顺延至下一个工作日)被视为有效；

12.1.3 以传真形式发出的通知应被视作于传真完毕的时间起为有效。

双方通讯地址如下：

甲方：中国中煤能源集团公司

住 所：北京市朝阳区黄寺大街 1 号

邮 编：100011

传 真：010－82256251

乙方： 中国中煤能源股份有限公司

住 所：北京市朝阳区黄寺大街 1 号

邮 编：100011

传 真：_

12.2 若一方更改其通讯地址，应尽快按本条规定书面通知另一方。

第十三条 适用的法律和争议的解决

13.1 本协议应适用中国法律并应根据中国法律解释。

13.2 凡因本协议引起的或与本协议有关的任何争议，双方均应本着友好协商原则自行解决。如果协商在 30 天内未能取得双方可以接受的结果，任何一方均可向中国国际经济贸易仲裁委员会申请依该委员会的仲裁规则进行仲裁，仲裁裁决为终局裁决，对双方均有约束力。

第十四条 出口、外销合同纠纷

14.1 由于境外买方原因导致货款不能及时回收，甲方应予以催收并及时通知乙

方商讨解决问题的方案。

14.2 煤炭出口、外销合同如出现纠纷，乙方有权决定是以自己名义对境外买方提出仲裁或诉讼还是委托甲方以甲方名义对境外买方提出仲裁或诉讼。如果委托甲方提出该等仲裁或诉讼，甲方不应拒绝。

14.3 如果甲方受乙方委托以甲方名义按煤炭出口、外销合同的规定对境外买方提出仲裁或诉讼，乙方同意并承诺向甲方提交必要的佐证资料和证物、提供费用及协助并承担由此产生的损失或利益，不得向甲方要求赔偿或要求分担理赔费用。

14.4 境外买方向甲方提出仲裁或诉讼时，甲方应按本协议和煤炭出口、外销合同的规定对外应诉，并将进展情况及时通知乙方，乙方有义务协助甲方搜集证据，并以负责全部应诉费用等方式支持甲方依法对外应诉。

第十五条 其他

15.1 双方同意按照中国有关法律的规定分别承担一切因签订本协议而产生的有关费用和开支。如没有法律规定者，则由双方平均分配。

15.2 除非取得本协议一方的事先书面同意，本协议的另一方不得转让其在本协议项下的权利和义务。

15.3 本协议和本协议提及的有关文件，应构成协议双方就所述一切事宜之整体协议和理解，并应取代双方对本协议所述一切有关事宜的所有先前口头或书面协议、合约、理解和通信。

15.4 除非另有规定，一方未行使或延迟行使其在本协议项下的权利、权力或特权并不构成对这些权利、权力或特权的放弃，而单一或部分行使这些权利、权力或特权并不排斥任何其它权利、权力或特权的行使。

15.5 本协议附件（若有）是本协议不可分割的组成部分，并与本协议具有同等约束力。

15.6 本协议正本一式八份，双方各持四份，各份协议具有同等法律效力。

本协议由双方法定代表人或授权代表于文首注明日期在中国北京市签订，以昭信守。

煤炭供应框架协议

二00六年九月五日

煤炭供应框架协议

本协议由以下双方于 2006 年 9 月 5 日在中华人民共和国(以下简称"中国")北京签订：

甲方：中国中煤能源集团公司

企业法人营业执照注册号：1000001000085

住所：北京市朝阳区黄寺大街 1 号

法定代表人：经天亮

乙方：中国中煤能源股份有限公司

企业法人营业执照注册号：1000001004047

住所：北京市朝阳区黄寺大街 1 号

法定代表人：经天亮

鉴于：

1、 甲方系依据中国法律设立的全民所有制企业，重组后，甲方保留部分目前不宜注入乙方的煤矿运营权（主要包括附表一所示 5 个合作煤矿，以下简称“下属煤矿企业”）。

2、 乙方系甲方经国务院国有资产监督管理委员会批准进行资产重组，作为发起人独家发起设立之股份公司。乙方于 2006 年 8 月 22 日成立，拟在境外公开发行股票，并将该等股票在境外上市。

3、 在本协议签订之日，甲方拥有乙方 100%的股权，在乙方公开发行股票和在境外上市完成后，甲方将继续为乙方的控股股东。

4、 乙方合法持有煤炭经营相关资质。为整合资源，甲方同意把其拥有运营权的所有下属煤矿企业生产的煤炭按本协议的规定独家供应及销售给乙方。

基于以上所述，根据《中华人民共和国合同法》、《煤炭经营监管办法》等相关法律、法规的规定，为明确甲方与乙方的权利义务关系，以上双方经过友好协商，签订本协议。具体内容如下：

第一条 协议主体

1.1 如适用或除非文意另有所指外，本协议所指甲方为甲方及/或其不时之联系人（“联系人”的定义与不时生效的《香港联合交易所有限公司证券上市规则》（以下简称“《上市规则》”）中的“联系人”的定义相同）。

1.2 如适用或除非文意另有所指外，本协议所指乙方为乙方及/或其附属公司（“附属公司”的定义与《上市规则》中“附属公司”的涵义相同）。

第二条 定义

2.1 除非上下文中另有规定，下述措词在本协议中应有下述含义：

香港联交所：	指香港联合交易所有限公司。
本协议项下的煤炭：	指甲方通过附件一所列下属煤矿企业及依据第 4.6 条的规定不时拥有运营权的其他煤矿自行生产的煤炭。
市场价	指本协议项下供应的煤炭按同等级的煤炭于同一地区或其附近地区，在正常商业交易情况下按一般商业条款供应同等级或同类煤种和品质的煤炭产品的独立第三方当时收取的价格。
协议价：	指按照“合理成本+合理利润”方式确定的价格。 本协议中，“合理成本”指甲乙双方协商认可的甲方为乙方供应本协议项下的煤炭发生的实际费用。除非甲乙双方另行协商确定，本协议中“合理利润”=“合理成本”×5%。
不可抗力事件：	指受影响一方不能合理运营的、无法预料或即使可预料到也不可避免且无法克服，并于本协议签订日之后出现的，使该方对本协议全部或部分的履行在客观上成为不可能或不实际(包括但不限于花费合理金额仍无法履行)的任何事

件。此等事件包括但不限于任何政府机构行为（无论有效或无效）、火灾、水灾、风暴、暴乱、爆炸、自然灾害、战争、破坏活动、劳工问题（包括停工、罢工和怠工）以及法院禁令或裁定。

2.2 除非本协议另有规定，在本协议中：

2.2.1 一方包括其继承者；

2.2.2 本协议中，甲方、乙方单称"一方"，合称"双方"。

2.2.3 本协议各条款之标题仅为方便查阅而设，不具法律效力或影响本协议的解释。

第三条 独家供应和销售

3.1 自本协议生效之日起，甲方同意所有其下属煤矿企业所生产的煤炭都应根据本协议约定的条件和价格独家供应和出售给乙方，甲方及其不时拥有运营权的所有下属煤矿企业不对除乙方或者乙方指定的机构之外的第三方销售任何下属煤矿企业所生产的煤炭。

3.2 乙方同意自本协议生效之日起，根据本协议约定的条件和价格向甲方购买煤炭。

第四条 运作模式

4.1 为顺利执行本协议，双方可就煤炭品质规格等制订具体标准并根据市场情况不时予以修订以及另行订立具体协议，甲方确保并促使其不时拥有运营权的所有下属煤矿企业履行双方不时签订的煤炭供应合同，订立后的具体协议不应违反本协议的约定。

4.2 在本协议有效期内，每个历年第四季度，双方应协商制订下一个历年度煤炭生产和销售计划，以月为单位确定下一个历年度各月的煤炭生产数量、交货时间等，并不时协商一致予以修改。双方每年应按照该等年度计划安排有关投入、生产、运输工作。该等年度计划须遵照执行，并应作为本协议不可分割的一部分，为本协议的有效附件。

4.3 甲方须确保并促使其不时拥有运营权的所有下属煤矿企业与乙方及/或其第1.2条所述之有关附属公司，按甲乙双方按4.2条认可的供应计划签订符合本协议之原则及规定的具体煤炭供应合同。所有这些具体煤炭供应合同不得违反本协议的约定，凡与本协议有冲突的以本协议为准。如本协议按条

款中止或终止，所有具体煤炭供应合同同步中止或终止。

4.4 对于在本协议生效时已签订的具体煤炭供应合同，甲乙双方根据约定对这些合同续展期限、或者确定合同在新的年度具体执行计划以及根据不时发生的实际情况及需求对合同进行的任何调整，应符合本协议的原则和条件和按照 4.3 条的规定操作。

4.5 除非另有约定，本协议项下的煤炭应包括坑口交货、车板交货、到厂交货及港口到站交货，但以港口到站交货为主。

4.6 除本协议附件一所列下属煤矿企业外，如果甲方发现可获得其他煤矿权益、运营权的业务机会，应当按照甲乙双方另行签订的《不竞争协议》的规定立即书面通知乙方，并尽力促使该业务机会按合理和公平的条款和条件首先提供给乙方或其附属企业。如果乙方在获得甲方的书面通知后决定放弃该等业务机会并将该等决定书面通知甲方，则甲方在获得该等书面通知后始得自行谋求并获得前述其他煤矿的权益或运营权。

第五条 定价原则

甲方向乙方供应和出售煤炭的价格按照如下方式确定：在本协议有效期内，每年 12 月，双方依照下述原则，按照不同的交货方式，商定下一个历年度不同品种的煤炭销售价格：

5.1 凡有市场价的，执行市场价；

5.2 凡没有市场价的或无法在实际交易中适用市场价的，执行协议价。

第六条 结算方式

本协议项下的下属煤矿企业的煤炭销售，按照每批次依据具体合同的约定完成运输及交付后，以 30 日为一个结算周期，由乙方支付本旬中已经完成的批次的煤炭货款。

第七条 期限

7.1 本协议由双方法定代表或授权代表签署并加盖公章后，有效期追溯至乙方依法设立之日起至 2008 年 12 月 31 日止。

7.2 于上述期限届满日之前六个月内，乙方在不违反其上市地上市规则的前提下有权续展本协议之期限，但乙方任何关于续展本协议的决定均应以书面形式通知甲方。

第八条 双方的陈述和保证

8.1 双方均根据中国法律正式注册成立、有效存续。

8.2 双方已采取一切所需行动，以及取得签订本协议所需的一切同意书、批文、授权和许可。本协议的签订，不会违反 (i)各方的公司章程，(ii)各方的其它任何协议或义务，或(iii)任何中国或其它有关的法域的现行法律、法规或法令。其在本协议上签字的代表已被授予全权签署本协议。

8.3 双方均承诺促使其各自下属企业从事一切需要从事（或不从事一切不应该从事）的行为或事项以使其能够适当地履行其在本协议中的义务。如任何一方在本协议期限内任何时间要求另一方的任何下属企业就该下属企业对有关本协议的执行和在本协议约定的前提下另行签署一份具体执行或补充协议，双方保证促使有关的下属企业和另一方就所要求的形式签署该协议。

8.4 甲方同意，如果任何第三方就同等客货的煤炭产品所提出的条件及条款比甲方更佳，则乙方有权选择向第三方购买煤炭产品。

8.5 甲方同意，如果甲方提供的下属煤矿企业的煤炭产品在任何方面（包括数量或质量）不能满足乙方的需要，则乙方有权选择第三方提供的相应煤炭产品。

第九条 双方权利和义务

9.1 甲方的权利和义务

9.1.1 甲方根据年度计划以及不时进行的局部调整通知并及时提供煤炭。

9.1.2 甲方交易的煤炭应符合具体煤炭销售协议中对品质规格标准的要求。

9.2 乙方的权利和义务

9.2.1 乙方应按具体煤炭销售协议规定的煤种、品名、品质规格在交货地点及时接收煤炭。

9.2.2 根据本协议约定的条款和方式，及时向甲方付款。

第十条 合同履行、变更和终止

10.1 若本协议项下的任何交易构成《上市规则》所述之关连交易或持续性关连

交易，且根据《上市规则》该等交易需在获得香港联交所豁免或乙方（即中国中煤能源股份有限公司）独立股东的事先批准或遵守《上市规则》有关关连交易或持续性关连交易的任何其它规定后方可进行，则本协议与该等交易有关的履行以按照香港联交所给予豁免的条件进行及/或按照《上市规则》的规定获得乙方（即中国中煤能源股份有限公司）独立股东在股东大会上的事先批准及/或遵守《上市规则》有关关连交易或持续性关连交易的任何其它规定为先决条件。

10.2 若香港联交所的豁免是附条件的，则本协议应按所附条件履行。

10.3 在本协议有效期内，若香港联交所对本协议下某一项关连交易或持续性关连交易的豁免被收回、撤销或失效，或其他原因导致该项交易需要但未能符合不时生效的《上市规则》有关关连交易或持续性关连交易的要求，则本协议该项交易有关的履行中止。

10.4 在本协议有效期内任何时间，若本协议下的交易所涉及的有关财政年度累计交易总金额可能或预期会超越已公布的该年度的总金额上限(如适用)，双方同意乙方尽快通知香港联交所并履行《上市规则》下所有适用和必须履行的监管义务，包括根据《上市规则》召开乙方（即中国中煤能源股份有限公司）独立股东大会对有关关连交易和重新确定的年度金额上限寻求独立股东批准（如适用)。未满足所有有关监管规定前，双方同意尽力运营有关交易该年度总额不超过已公布的金额上限。否则，本协议下与该项交易有关的履行中止。

10.5 若本协议与所有各项交易有关的履行均按第 10.3 及/或 10.4 条中止，则本协议终止。

10.6 本协议任何一条款成为非法、无效或不可强制执行并不影响本协议其它条款的效力及可强制执行性。如本协议内的任何条款被裁定无效，但如作部分删除或削减可成为有效者，该条款可在作必要的删除或修订使之有效及有可强制执行性后仍可实施。

10.7 本协议的修订仅可经书面协议并经双方法定代表人或授权代表签字且须经双方采取适当的法人行动批准和符合并满足《上市规则》及有关适用法律法规的监管规定的前提下作出。

第十一条 违约责任

11.1 除非本协议另有约定，任何一方违反本协议约定,另一方可以要求或采纳本协议和法律所允许的补救措施,包括但不限于实际履行和补偿经济损失。

11.2 如果一方未能履行本协议规定的义务应视为违反合同，违约方从另一方收

到具体说明违约情况的通知后应在 30 日内纠正该违约行为。如 30 日后，违约没有纠正，则违约方应向另一方负责赔偿违约引起的一切直接和可预见的损失。

第十二条 公告

任何一方未经另一方事先书面同意，不得作出与本协议事项有关的任何公告，但根据中国法律或中国证监会、香港联交所、香港证券及期货事务监察委员会或任何其他相关的规定作出公告的除外。

第十三条 不可抗力

13.1 如果本协议任何一方因受不可抗力事件的任何事件影响而未能履行其在本协议下的全部或部分义务，该义务的履行在不可抗力事件妨碍其履行期间应予中止。

13.2 由于不能预见并且对其发生和后果不能防止或避免的不可抗力事件，致使直接影响本协议的履行或者不能按约定的条件履行时，遇有上述不可抗力事件的一方，应将事件情况尽可能在最短的时间内以通知书形式通知对方，并应在 15 天内，提供事件详情及本协议不能履行或者部分不能履行，或者需要延期履行的理由的有效证明文件。声称不可抗力事件导致其对本协议的履行在客观上成为不可能或不实际的一方，有责任尽一切合理的努力消除或减轻此等不可抗力事件的影响。

13.3 不可抗力事件发生时，双方应立即通过友好协商决定如何执行本协议。按照不可抗力事件对履行协议影响的程度，由双方协商决定是否解除本协议，或者部分免除履行本协议的责任，或者延期履行本协议。

第十四条 通知

14.1 一方根据本协议规定作出的通知或其它通讯应采用书面形式并以中文书写，并可经专人手递或挂号邮务发至另一方指定的地址，或传真至另一方指定的传真号码。通知被视为已有效作出的日期应按以下的规定确定：

14.1.1 专人交付的通知应在专人交付对方指定人士签收之日被视为有效；

14.1.2 以挂号邮务寄出的通知应在付邮(以邮戳日期为准)后第 5 天(若最后一天是星期六、日或法定节假日，则顺延至下一个工作日)被视为有效；

14.1.3 以传真形式发出的通知应被视作于传真完毕的时间作出。

双方通讯地址如下：

甲方：中国中煤能源集团公司

住　所：北京市朝阳区黄寺大街 1 号

邮　编：100011

传　真：010－82256251

乙方：　中国中煤能源股份有限公司

住　所：北京市朝阳区黄寺大街 1 号

邮　编：100011

传　真：_

14.2 若一方更改其通讯地址，应尽快按本条规定书面通知另一方。

第十五条　适用的法律和争议的解决

15.1 本协议应适用中国法律并应根据中国法律解释。

15.2 凡因本协议引起的或与本协议有关的任何争议，双方均应本着友好协商原则自行解决。如果协商在 30 天内未能取得双方可以接受的结果，任何一方均可向中国国际经济贸易仲裁委员会申请依该委员会的仲裁规则进行仲裁，仲裁裁决为终局裁决，对双方均有约束力。

第十六条　其他

16.1 双方同意按照中国有关法律的规定分别承担一切因签订本协议而产生的有关费用和开支。如没有法律规定者，则由双方平均分配。

16.2 除非取得本协议一方的事先书面同意，本协议的另一方不得转让其在本协议项下的权利和义务。

16.3 本协议和本协议提及的有关文件，应构成协议双方就所述一切事宜之整体协议和理解，并应取代双方对本协议所述一切有关事宜的所有先前口头或书面协议、合约、理解和通信。

16.4 除非另有规定，一方未行使或延迟行使其在本协议项下的权利、权力或特权并不构成对这些权利、权力或特权的放弃，而单一或部分行使这些权利、权力或特权并不排斥任何其它权利、权力或特权的行使。

16.5 本协议附件(若有)是本协议不可分割的组成部分，并与本协议具有同等约束力。

16.6 本协议正本一式八份，双方各持两份，各份协议具有同等法律效力。

本协议由双方法定代表人或授权代表于文首注明日期在中国北京市签订，以昭信守。

中国中煤能源股份有限公司

综合原料和服务互供框架协议

二00六年九月五日

综合原料和服务互供框架协议

本协议由以下双方于2006年9月5日在中华人民共和国(以下简称"中国")北京签订：

甲方：中国中煤能源集团公司

企业法人营业执照注册号：1000001000085

住所：北京市朝阳区黄寺大街1号

法定代表人：经天亮

乙方：中国中煤能源股份有限公司

企业法人营业执照注册号：1000001004047

住所：北京市朝阳区黄寺大街1号

法定代表人：经天亮

本协议中，甲方、乙方单称"一方"，合称"双方"。

鉴于：

1、 甲方系依据中国法律设立的全民所有制企业。

2、 乙方系甲方经国务院国有资产监督管理委员会批准进行资产重组，作为发起人独家发起设立之股份公司。乙方于2006年8月22日成立，拟在境外公开发行股票，并将该等股票在境外上市，包括在香港联合交易所有限公司（以下简称"香港联交所"）。

3、 在本协议签订之日，甲方拥有乙方100%的股权，在全球募股完成后，甲方将继续为乙方的控股股东。

4、 甲方向乙方注入重组前属于甲方及其下属企业和单位的"主营业务"及与其相关的资产、负债及/或所有者权益。本协议中，"主营业务"包括煤炭业务（包括煤炭生产、销售、贸易及其它服务）；焦化业务（包括焦炭生产及销售及煤化工产品）；煤矿相关机械装备的制造业务（包括煤矿机械装备设计、研发、制造及销售业务和售后服务）及煤矿设计等业务。

5、 重组完成后，甲方及其下属企业和单位将保留煤炭辅助生产服务、物资供应以及部分目前不宜注入乙方的资产（包括电力资产、煤矿建设资产、土木工程建设资产、合作矿的资产）和煤炭出口、生活及后勤服务及其相关的资产、负债和所有者权益。重组后甲方将从事与煤炭生产、煤矿建设、发电相关的辅助生产服务、原料供应、煤炭及焦炭出口代理、生活及后勤服务等业务。

6、 重组完成后，甲方及其下属企业和单位与乙方及其下属企业或单位将按照本协议的条款互相供应原料和服务。为此，双方同意签订本协议，并保证分别促使其各自的相关下属企业和单位、分公司和其他单位按照本协议的条款和精神，提供本协议规定的原料和服务。

基于以上所述，根据《中华人民共和国合同法》等相关法律、法规的规定，为明确甲方与乙方的权利义务关系，以上双方经过友好协商，签订本协议。具体内容如下：

第一条 协议主体

1.1 如适用或除非文意另有所指外，本协议所指甲方及其下属企业为甲方及/或其不时之联系人（"联系人"的定义与不时生效的《香港联合交易所有限公司证券上市规则》（以下简称"《上市规则》"）中的"联系人"的定义相同）。

1.2 如适用或除非文意另有所指外，本协议所指乙方及其下属企业为乙方及/或其附属公司（"附属公司"的定义与《上市规则》中"附属公司"的涵义相同）。

第二条 定义

2.1 除非上下文中另有规定，下述措词在本协议中应有下述含义：

香港联交所： 指香港联合交易所有限公司。

政府定价： 是指由中华人民共和国中央政府、省级政府或其它监管部门制定的法律、法规、决定、命令或针对煤炭或焦炭

销售确定的价格。

政府指导价： 是指由中华人民共和国中央政府、省级政府或其它监管部门制定的法律、法规、决定、命令或针对该类产品和服务确定的在一定幅度内可由交易双方自行确定的价格。

市场价： 指按照下列顺序依次确定的价格：(1)该类产品和服务的提供地或其附近地区在正常商业交易情况下提供该类产品和服务的独立第三方当时收取的价格；或(2)在正常商业交易情况下提供该类产品的独立第三方当时收取的价格。

协议价： 指按照“合理成本+合理利润”方式确定的价格。

本协议中，“合理成本”指甲乙双方协商认可的甲方为乙方提供该等服务所发生的实际费用。除非甲乙双方依据提供服务的性质另行协商确定，本协议中“合理利润”=“合理成本”×5%。

不可抗力事件： 指受影响一方不能合理控制的、无法预料或即使可预料到也不可避免且无法克服，并于本协议签订日之后出现的，使该方对本协议全部或部分的履行在客观上成为不可能或不实际(包括但不限于花费合理金额仍无法履行)的任何事件。此等事件包括但不限于任何政府机构行为（无论有效或无效）、火灾、水灾、风暴、暴乱、爆炸、自然灾害、战争、破坏活动、劳工问题（包括停工、罢工和怠工）以及法院禁令或裁定。

2.2 除非本协议另有规定，在本协议中：

2.2.1 一方包括其继承者；

2.2.2 本协议中，甲方、乙方单称“一方”，合称“双方”。

2.2.3 本协议各条款之标题仅为方便查阅而设，不具法律效力或影响本协议的解释。

第三条 原料和服务范围

3.1 甲方及其联系人向乙方及其附属公司提供的原料和服务包括：

3.1.1 生产元素及原料供应类：生产物料及其他相关或类似生产物料；运输（包括汽车及货车）；供电及供暖；测试及机械维修服务；设备租赁；及

3.1.2 社会及生活服务类：治安保卫服务；职工培训；学校医疗及急救服务；养老金、失业金和医疗金管理服务、通讯服务、物业服务及其它相关或类似的生活服务。

3.2 乙方及其联系人向甲方及其附属公司提供的原料和服务包括：

3.2.1 生产物料及其他相关或类似生产物料；供电；运输及装车服务；供气；机械维修；劳务；招/投标服务；供水、供电、供热、供暖。

3.3 甲乙双方同意，乙方及其附属公司为甲方及其下属企业煤炭及焦炭出口业务向甲方及其下属企业提供独家及排他的煤炭及焦炭出口配套辅助服务，包括组织货源、混配煤、协调物流、港口事务、验收和检验、单证收集和交接。

第四条 交易原则

4.1 甲乙双方同意，除上述第 3.3 条项下的出口配套服务外，在第三方的销售条件相同或更差时，优先使用对方的原料和服务。

4.2 甲乙双方同意，除上述第 3.3 条项下的出口配套服务外，在第三方购买条件相同或更差时，优先向对方提供原料和服务。

4.3 甲乙双方同意，除上述第 3.3 条项下的出口配套服务外，在一方与另一方进行的任何交易("交易")中，甲方和乙方分别将不会：

4.3.1 以较其向第三方提供原料或服务为差的条款向另一方提供该等原料或服务;及

4.3.2 以较另一方向第三方提供原料或服务为佳的条款从另一方获得任何原料或服务。

4.4 甲乙双方同意，除上述第 3.3 条项下的出口配套服务外，本协议的签订，并不影响甲乙双方自主选择交易对象，与第三方进行交易。如果第三方能按照本协议下优于一方的价格条件，提供相似原料和服务，则另一方有权委托该第三方提供原料和服务。

4.5 就本协议项下的所有原料和服务交易而言，各交易方可按本协议规定的框架范围另行订立具体合同，该具体合同不应违反本协议的约定。各交易方是指甲方、甲方的联系人、乙方及乙方的附属公司。

第五条 定价原则

5.1 本协议项下的各项原料和服务的价格，须按本条的总原则和顺序确定:

5.1.1 凡有政府定价的，执行政府定价；

5.1.2 凡没有政府定价，但有政府指导价的，执行政府指导价；

5.1.3 没有政府定价和政府指导价的，执行市场价(含招标价)；

5.1.4 前三者都没有的或无法在实际交易中适用以上交易原则的，执行协议价。

5.2 在不违反前述第 5.1 条规定的前提下，就上述第 3.3 条项下的出口配套服务，甲方向乙方支付的服务费费率按照每吨煤炭出口 FOB 价的 0.8-1.3%计算。

5.3 甲乙双方就每月所获供应和服务应付的采购价或服务费需按每历月以后付的方式缴付。

第六条 运作方式

6.1 原则上，甲乙双方须于每年十月三十一日前向对方提交下一年度拟从对方获取的原料和服务的需求计划 (以下简称"需求计划")。

6.2 甲乙双方须确保并促使各自的联系人或附属公司（如适用），按双方认可的供应计划签订符合本协议之原则及规定的具体原料和服务合同。

6.3 在本合同执行过程中，如有需要并经甲乙双方同意，可对原料和服务的需求和供应计划及具体合同进行调整。

6.4 乙方的附属公司——上海大屯能源股份有限公司（一家 A 股上市公司）与甲方的全资子公司——大屯煤电（集团）有限责任公司之间按照 A 股上市规则中对关联交易协议的相关规定签订的综合服务协议或类似性质的协议应不违反本协议的约定并作为本协议不可分割的一部分。

第七条 双方的权利和义务

7.1 双方的权利包括：

7.1.1 在保证向对方按照本协议的规定提供原料和服务的前提下，可选择为第三方提供相应的原料和服务，但上述第 3.3 条项下的出口配套服务除外。

7.1.2 在不违反本协议第 6 条的前提下，自主编制年度需求和供应计划并作相应调整。

7.1.3 按照本协议及具体原料和服务合同的规定，收取货款和/或服务费。

7.2 双方的义务包括：

7.2.1 促使并保证其联系人或附属公司（如适用），按照本协议及具体的原料和服务合同规定的标准和价格向对方提供原料和服务。

7.2.2 接受具体原料和服务合同当事人的委托，协调与该具体原料和服务合同有关的事宜。

7.2.3 指定或设立专门机构负责本协议项下有关原料和服务交易的联络、文件的编制、计划和安排、供求平衡、合同执行的监督、协调等事项。

7.2.4 按照本协议及其具体的原料和服务合同的规定支付有关价款和服务费用。

7.3 在符合本协议之规定的前提下，如果一方提供的原料和服务在任何方面(包括数量上或质量上)不能满足另一方的需要，则另一方可以选择第三方提供的相应原料和服务。

第八条 期限和具体原料、产品、服务合同的终止

8.1 在不违反第 8.2 及 8.3 条规定的前提下，签订的具体原料和服务合同(但不包括本协议)的任何一方可以在不少于三个月之前向另一方发出终止提供某种原料、产品或服务的书面通知。通知中必须说明何种原料、产品或服务的提供会予以终止及终止何时生效。经双方协商一致，就该种原料、产品或服务的供应可以解除。若有任何原料、产品或服务根据本条款终止提供，该终止不影响甲方或乙方在本协议项下其他的权利或义务，也不影响按本协议签订的具体原料和服务合同的任何一方在该等合同项下的其他权利或义务。

8.2 如果一方无法方便地从第三方(包括但不限于与另一方有关的任何其他第三方)获得另一方提供的某种原料或服务，且一方需要另一方提供该种原料或服务，另一方不得在任何情况下终止该种原料和服务的提供。

8.3 若任何一方已根据本协议第 8.1 条发出终止通知终止某种原料和服务的提供，除甲乙双方另行约定外，该终止通知将不会终止或影响在发出有关通知时或之前，双方在本协议及与本协议有关的具体原料和服务合同中的义务及已发生的责任。

8.4 在不影响第 9 条的前提下，本协议经双方授权代表签字并加盖公章后，有效期追溯自乙方依法设立之日起至 2008 年 12 月 31 日止。本协议在符合有关法规及乙方上市地上市规则的前提下，经甲乙双方同意可以延长或续期。

8.5 如任何一方违反本协议之任何条款("违约方")，另一方("守约方")可向其发出书面通知告知其构成违约行为，并要求违约方在指定的合理期限内作出补救，而违约方未在上述期限内对此等违约行为作出补救，则守约方可立即终止本协议。守约方保留向违约方追索补偿和其他任何法律允许的权利主张的权利。

8.6 本协议的终止不应影响任何一方的任何根据本协议已经产生的权利或义务。

第九条 双方的陈述和保证

9.1 双方均根据中国法律正式注册成立、有效存在。

9.2 双方已采取一切所需行动，以及（除本协议另有明确规定外）取得签订本协议所需的一切同意书、批文、授权和许可。本协议的签订，不会违反(i)各方的公司章程，(ii)各方的其它任何协议或义务，或(iii)任何中国或其它有关的地域的现行法律、法规或法令。其在本协议上签字的代表已被授予全权签署本协议。

9.3 双方均承诺促使其各自下属企业从事一切需要从事（或不从事一切不应该从事）的行为或事项以使其能够适当地履行其在本协议中的义务。如任何一方在本协议期限内要求另一方的任何下属企业就对有关本协议的执行和在本协议约定的前提下另行签署一份具体执行或补充协议，双方保证促使有关的下属企业和另一方就所要求的形式签署该协议。

第十条 协议的履行、变更和终止

10.1 若本协议项下的任何交易构成《上市规则》所述之关连交易，且根据《上市规则》该等交易在获得香港联交所豁免或遵守《上市规则》有关关连交易的规定后方可进行，则本协议项下与该等交易有关的履行以获得香港联交所的豁免或遵守《上市规则》有关关连交易的规定为先决条件。

10.2 若香港联交所的豁免是附条件的，则本协议应按所附条件履行。

10.3 若香港联交所对某一项关连交易的豁免被收回、撤销或失效或某项关连交易不获得乙方独立股东的批准，且该项交易未能符合《上市规则》有关关连交易的要求，则本协议该项交易有关的履行终止。

10.4 若本协议与所有各项交易有关的履行均按第 10.3 条终止，则本协议终止。

10.5 若关连交易总金额可能超越香港联交所批准的该年度的总豁免额(如适用)，双方同意乙方尽快通知及向香港联交所申请提高该年度的总豁免额或根据《上市规则》召开乙方（即中国中煤能源股份有限公司）独立股东大会寻求独立股东批准（如适用)。未取得香港联交所新豁免额或独立股东批准前，双方同意尽力控制有关交易于该年度总豁免额内。

第十一条 不可抗力

11.1 如果本协议任何一方因受不可抗力事件影响而未能履行其在本协议下的全部或部分义务，该义务的履行在不可抗力事件妨碍其履行期间应予中止。不可抗力事件指受影响一方不能合理控制的、无法预料或即使可预料到也不可避免且无法克服，并于本协议签订日之后出现的，使该方对本协议全部或部分的履行在客观上成为不可能或不实际(包括但不限于花费合理金额仍无法履行)的任何事件。此等事件包括但不限于水灾、火灾、旱灾、风灾、地震、其它自然灾害、交通意外、罢工、骚动、暴乱及战争(不论是否宣战)以及政府部门的作为及不作为。

11.2 声称受到不可抗力事件影响的一方应尽可能在最短的时间内通过书面形式将不可抗力事件的发生通知另一方，并在该不可抗力事件发生后十五日内以专人递送或挂号邮寄向另一方提供关于此种不可抗力事件及其持续时间的适当证据。声称不可抗力事件导致其对本协议的履行在客观上成为不可能或不实际的一方，有责任尽一切合理的努力消除或减轻此等不可抗力事件的影响。

11.3 不可抗力事件发生时，双方应立即通过友好协商决定如何执行本协议。不可抗力事件或其影响终止或消除后，甲乙双方须立即恢复履行各自在本协议项下的各项义务。

第十二条 公告

任何一方未经另一方事先书面同意，不得作出与本协议事项有关的任何公告，但根据中国法律或中国证监会、香港联交所、香港证券及期货事务监察委员会或任何其他相关的规定作出公告的除外。

第十三条 通知

13.1 一方根据本协议规定作出的通知或其它通讯应采用书面形式并以中文书写，并可经专人手递或挂号邮件发至另一方指定的地址，或传真至另一方指定的传真号码。通知被视为已有效作出的日期应按以下的规定确定：

13.1.1 专人交付的通知应在专人交付对方指定人士签收之日被视为有效；

13.1.2 以挂号邮件寄出的通知应在付邮(以邮戳日期为准)后第 5 天(若最后一天是星期六、日或法定节假日，则顺延至下一个工作日)被视为有效；

13.1.3 以传真形式发出的通知应被视作于传真完毕的时间作出。

双方通讯地址如下：

甲方：中国中煤能源集团公司

住 所：北京市朝阳区黄寺大街 1 号

邮 编：100011

传 真：010－82256251

乙方： 中国中煤能源股份有限公司

住 所：北京市朝阳区黄寺大街 1 号

邮 编：100011

传 真：

13.2 若一方更改其通讯地址，应尽快按本条规定书面通知另一方。

第十四条 适用法律和争议的解决

14.1 本协议应适用中国法律并应根据中国法律解释。

14.2 凡因本协议引起的或与本协议有关的任何争议，双方均应本着友好协商原则自行解决。如果协商在 30 天内未能取得双方可以接受的结果，任何

一方均可向中国国际经济贸易仲裁委员会申请依该委员会的仲裁规则进行仲裁，仲裁裁决为终局裁决，对双方均有约束力。

第十五条 其他

15.1 双方同意按照中国有关法律的规定分别承担一切因签订本协议而产生的有关费用和开支。如没有法律规定者，则由双方平均分配。

15.2 除非取得本协议一方的事先书面同意，本协议的另一方不得转让其在本协议项下的权利和义务。

15.3 本协议和本协议提及的有关文件，应构成协议双方就所述一切事宜之整体协议和理解，并应取代双方对本协议所述一切有关事宜的所有先前口头或书面协议、合约、理解和通信。

15.4 除非另有规定，一方未行使或延迟行使其在本协议项下的权利、权力或特权并不构成对这些权利、权力或特权的放弃，而单一或部分行使这些权利、权力或特权并不排斥任何其它权利、权力或特权的行使。

15.5 本协议附件（若有）是本协议不可分割的组成部分，并与本协议具有同等约束力。

15.6 本协议正本一式八份，双方各持四份，各份协议具有同等法律效力。

本协议由双方法定代表人或授权代表于文首注明日期在中国北京市签订，以昭信守。

二00六年九月五日

煤矿建设及设计服务框架协议

本协议由以下双方于 2006 年 9 月 5 日在中华人民共和国(以下简称"中国")北京签订：

甲方：中国中煤能源集团公司

企业法人营业执照注册号：1000001000085

住所：北京市朝阳区黄寺大街 1 号

法定代表人：经天亮

乙方：中国中煤能源股份有限公司

企业法人营业执照注册号：1000001004047

住所：北京市朝阳区黄寺大街 1 号

法定代表人：经天亮

本协议中，甲方、乙方单称"一方"，合称"双方"。

鉴于：

1、 甲方系依据中国法律设立的全民所有制企业。

2、 乙方系甲方经国务院国有资产监督管理委员会批准进行资产重组，作为发起人独家发起设立之股份公司。乙方于 2006 年 8 月 22 日成立，拟在境外公开发行股票，并将该等股票在境外上市。

3、 在本协议签订之日，甲方拥有乙方 100%的股权，在全球募股完成后，甲方将继续为乙方的控股股东。

4、 重组完成后，甲方及其附属企业和单位将按照本协议的条款的规定向乙方及其附属企业或单位提供煤矿建设服务，乙方及其附属企业为甲方及

其附属企业或单位提供煤矿设计服务。为此，双方同意签订本协议，并保证分别促使其各自的相关附属企业和单位(包括双方下属的附属公司（按香港联交所上市规则定义）、分公司和其他单位)按照本协议的条款和精神，提供本协议规定的煤矿建设和煤矿设计服务。

基于以上所述，根据《中华人民共和国合同法》等相关法律、法规的规定，为明确甲方与乙方的权利义务关系，以上双方经过友好协商，签订本协议。具体内容如下：

第一条 协议主体

1.1 如适用或除非文意另有所指外，本协议所指甲方为甲方及/或其不时之联系人（“联系人”的定义与不时生效的《香港联合交易所有限公司证券上市规则》（以下简称“《上市规则》”）中的“联系人”的定义相同）。

1.2 如适用或除非文意另有所指外，本协议所指乙方为乙方及/或其附属公司（“附属公司”的定义与《上市规则》中“附属公司”的涵义相同）。

第二条 定义

2.1 除非上下文中另有规定，下述措词在本协议中应有下述含义：

香港联交所：	指香港联合交易所有限公司。
会计年度：	指每年的公历元月一日至十二月三十一日。
煤矿设计服务：	指乙方及/或其附属公司提供的煤矿设计及煤炭、焦炭生产设计服务。
煤矿建设服务：	指甲方及/或其联系人提供的煤矿建设服务，包括煤矿、矿井、坑道及其辅助设施的建设服务。
不可抗力事件：	指受影响一方不能合理控制的、无法预料或即使可预料到也不可避免且无法克服，并于本协议签订日之后出现的，使该方对本协议全部或部分的履行在客观上成为不可能或不实际(包括但不限于花费合理金额仍无法履行)的任何事件。此等事件包括但不限于任何政府机构行为（无论有效或无效）、火灾、水灾、风暴、暴乱、爆炸、自然灾害、战争、破坏活动、劳工问题（包括停工、罢工和怠工）以及法院禁令或裁定。

2.2 除非本协议另有规定，在本协议中：

2.2.1 一方包括其继承者；

2.2.2 本协议中，甲方、乙方单称"一方"，合称"双方"。

2.2.3 本协议各条款之标题仅为方便查阅而设，不具法律效力或影响本协议的解释。

第三条 服务范围

3.1 甲方（包括其联系人）向乙方（包括其附属公司）提供的煤矿建设服务包括煤矿矿井、坑道及其辅助设施的建设服务。

3.2 甲方（包括其联系人）承揽乙方（包括其附属公司）分包的煤矿矿井、坑道及其辅助设施的煤矿建设工程。

3.3 乙方（包括其附属公司）为甲方（包括其联系人）保留的辅助煤矿、辅助煤炭及焦炭生产业务及按国家政策由甲方不时进行整合改造的地方煤矿提供的设计服务。

第四条 交易及定价原则

4.1 煤矿建设服务及煤矿设计服务均将采取招投标的方式确定服务提供方并确定价格。

4.2 一方应按照招投标法的规定以及另一方邀标书的具体要求投标。

4.3 一方根据矿建及设计项目的具体情况自主确定中标方，在且仅在另一方投标条件优于或者不劣于其他投标方的情况下，一方应优先考虑另一方作为中标方。

4.4 就本协议项下的所有煤矿建设服务及煤矿设计服务交易而言，各交易方可按本协议规定原则及范围另行订立具体合同，约定相关权利义务。各交易方是指甲、乙双方及其相关附属企业或单位。

第五条 双方的权利和义务

5.1 甲方的权利和义务包括：

5.1.1 按照本协议及具体煤矿建设服务合同的规定收取煤矿建设服务费并接受设计服务；

5.1.2 促使并保证其附属企业或单位按照本协议及具体煤矿建设服务合同规定的标准和定价向乙方提供煤矿建设服务，并（如适用）支付设计服务费。

5.2 乙方的权利义务包括：

5.2.1 按照本协议及具体煤矿建设及设计服务合同的规定收取设计服务费并接受煤矿建设服务（如适用）；

5.2.2 促使并保证其附属企业或单位按照本协议及其具体煤矿设计服务合同规定的标准和定价向甲方提供煤矿设计服务，并支付建设服务费（如适用）。

第六条 双方的陈述和保证

6.1 双方均根据中国法律正式注册成立、有效存在。

6.2 双方已采取一切所需行动，以及（除本协议另有明确规定外）取得签订本协议所需的一切同意书、批文、授权和许可。本协议的签订，不会违反(i)各方的公司章程，(ii)各方的其它任何协议或义务，或(iii)任何中国或其它有关的地域的现行法律、法规或法令。其在本协议上签字的代表已被授予全权签署本协议。

6.3 双方均承诺促使其各自下属企业从事一切需要从事（或不从事一切不应该从事）的行为或事项以使其能够适当地履行其在本协议中的义务。如任何一方在本协议期限内任何时间要求另一方的任何下属企业就该下属企业对有关本协议的执行和在本协议约定的前提下另行签署一份具体执行或补充协议，双方保证促使有关的下属企业和另一方就所要求的形式签署该协议。

第七条 协议的期限、履行、变更和终止

7.1 本协议经双方授权代表签字并加盖公章后，有效期追溯自乙方依法设立之日起至 2008 年 12 月 31 日止。

7.2 若本协议项下的任何交易构成《上市规则》所述之关连交易或持续性关连交易，且根据《上市规则》该等交易需在获得香港联交所豁免或乙方（即中国中煤能源股份有限公司）独立股东的事先批准或遵守《上市规则》有关关连交易或持续性关连交易的任何其它规定后方可进行，则本协议与该等交易有关的履行以按照香港联交所给予豁免的条件进行及/或按照《上市规则》的规定获得乙方（即中国中煤能源股份有限公司）独立股东在股东大会上的事先批准及/或遵守《上市规则》有关关连交易或持续性关连交易的任何其它规定为先决条件。

7.3 若香港联交所的豁免是附条件的，则本协议应按所附条件履行。

7.4 在本协议有效期内，若香港联交所对本协议下某一项关连交易或持续性关连交易的豁免被收回、撤销或失效，或其他原因导致该项交易需要但未能符合不时生效的《上市规则》有关关连交易或持续性关连交易的要求，则本协议该项交易有关的履行中止。

7.5 在本协议有效期内任何时间，若本协议下的交易所涉及的有关财政年度累计交易总金额可能或预期会超越已公布的该年度的总金额上限(如适用)，双方同意乙方尽快通知香港联交所并履行《上市规则》下所有适用和必须履行的监管义务，包括根据《上市规则》召开乙方（即中国中煤能源股份有限公司）独立股东大会对有关关连交易和重新厘定的年度金额上限寻求独立股东批准（如适用)。未满足所有有关监管规定前，双方同意尽力控制有关交易该年度总额不超过已公布的金额上限。否则，本协议下与该项交易有关的履行中止。

7.6 若本协议与所有各项交易有关的履行均按第 7.4 条及/或 7.5 条中止，则本协议终止。

7.7 本协议任何一条款成为非法、无效或不可强制执行并不影响本协议其它条款的效力及可强制执行性。如本协议内的任何条款被裁定无效，但如作部分删除或削减可成为有效者，该条款可在作必要的删除或修订使之有效及有可强制执行性后仍可实施。

7.8 本协议的修订仅可经书面协议并经双方授权代表签字且须经双方采取适当的法人行动批准和符合并满足《上市规则》及有关适用法律法规的监管规定的前提下作出。

第八条 不可抗力

8.1 如果本协议任何一方因受不可抗力事件影响而未能履行其在本协议下的全部或部分义务，该义务的履行在不可抗力事件妨碍其履行期间应予中止。不可抗力事件指受影响一方不能合理控制的、无法预料或即使可预料到也不可避免且无法克服，并于本协议签订日之后出现的，使该方对本协议全部或部分的履行在客观上成为不可能或不实际(包括但不限于花费合理金额仍无法履行)的任何事件。此等事件包括但不限于水灾、火灾、旱灾、风灾、地震、其它自然灾害、交通意外、罢工、骚动、暴乱及战争(不论是否宣战)以及政府部门的作为及不作为。

8.2 声称受到不可抗力事件影响的一方应尽可能在最短的时间内通过书面形式将不可抗力事件的发生通知另一方，并在该不可抗力事件发生后十五日内以专人递送或挂号邮寄向另一方提供关于此种不可抗力事件及其持续时间的适当证据。声称不可抗力事件导致其对本协议的履行在客观上

成为不可能或不实际的一方，有责任尽一切合理的努力消除或减轻此等不可抗力事件的影响。

8.3 不可抗力事件发生时，双方应立即通过友好协商决定如何执行本协议。不可抗力事件或其影响终止或消除后，甲乙双方须立即恢复履行各自在本协议项下的各项义务。

第九条 公告

任何一方未经另一方事先书面同意，不得作出与本协议事项有关的任何公告，但根据中国法律或中国证监会、香港联交所、香港证券及期货事务监察委员会或任何其他相关的规定作出公告的除外。

第十条 通知

10.1 一方根据本协议规定作出的通知或其它通讯应采用书面形式并以中文书写，并可经专人手递或挂号邮件发至另一方指定的地址，或传真至另一方指定的传真号码。通知被视为已有效作出的日期应按以下的规定确定：

10.1.1 专人交付的通知应在专人交付对方指定人士签收之日被视为有效；

10.1.2 以挂号邮件寄出的通知应在付邮(以邮戳日期为准)后第 5 天(若最后一天是星期六、日或法定节假日，则顺延至下一个工作日)被视为有效；

10.1.3 以传真形式发出的通知应被视作于传真完毕的时间作出。

双方通讯地址如下：

出租方：中国中煤能源集团公司

住 所：北京市朝阳区黄寺大街 1 号

邮 编：100011

传 真：010－82256251

承租方： 中国中煤能源股份有限公司

住 所：北京市朝阳区黄寺大街 1 号

邮 编：100011

传 真：

10.2 若一方更改其通讯地址，应尽快按本条规定书面通知另一方。

第十一条 适用法律和争议的解决

11.1 本协议应适用中国法律并应根据中国法律解释。

11.2 凡因本协议引起的或与本协议有关的任何争议，双方均应本着友好协商原则自行解决。如果协商在 30 天内未能取得双方可以接受的结果，任何一方均可向中国国际经济贸易仲裁委员会申请依该委员会的仲裁规则进行仲裁，仲裁裁决为终局裁决，对双方均有约束力。

第十二条 其他

12.1 双方同意按照中国有关法律的规定分别承担一切因签订本协议而产生的有关费用和开支。如没有法律规定者，则由双方平均分配。

12.2 除非取得本协议一方的事先书面同意，本协议的另一方不得转让其在本协议项下的权利和义务。

12.3 本协议和本协议提及的有关文件，应构成协议双方就所述一切事宜之整体协议和理解，并应取代双方对本协议所述一切有关事宜的所有先前口头或书面协议、合约、理解和通信。

12.4 除非另有规定，一方未行使或延迟行使其在本协议项下的权利、权力或特权并不构成对这些权利、权力或特权的放弃，而单一或部分行使这些权利、权力或特权并不排斥任何其它权利、权力或特权的行使。

12.5 本协议附件（若有）是本协议不可分割的组成部分，并与本协议具有同等约束力。

12.6 本协议正本一式八份，双方各持四份，各份协议具有同等法律效力。

本协议由双方法定代表人或授权代表于文首注明日期在中国北京市签订，以昭信守。

房屋租赁框架协议

二00六年九月五日

房屋租赁框架协议

本协议由以下双方于 2006 年 9 月 5 日在中华人民共和国(以下简称"中国")北京签订：

甲方或出租方：中国中煤能源集团公司

企业法人营业执照注册号：1000001000085

住所：北京市朝阳区黄寺大街 1 号

法定代表人：经天亮

乙方或承租方：中国中煤能源股份有限公司

企业法人营业执照注册号：1000001004047

住所：北京市朝阳区黄寺大街 1 号

法定代表人：经天亮

鉴于：

1、 甲方系依据中国法律设立的全民所有制企业。

2、 乙方系甲方经国务院国有资产监督管理委员会批准进行资产重组，作为发起人独家发起设立之股份公司。乙方于 2006 年 8 月 22 日成立，拟在境外公开发行股票，并将该等股票在境外（包括在香港联合交易所有限公司，以下简称"香港联交所"）上市。

3、 在本协议签订之日，甲方拥有乙方 100%的股权，在乙方公开发行股票和在境外市完成后，甲方将继续为乙方的控股股东。

4、 甲方及/或其联系人分别拥有本协议项下的房屋所有权且乙方在生产及营运过程中需要租赁甲方房屋。

5、 甲方拥有本协议附件一所列示房屋的所有权并同意将本协议附件一所列其自有房屋按照本协议的规定出租予乙方，乙方同意租赁。

基于以上所述，根据《中华人民共和国合同法》、《中华人民共和国城市房地产管理法》等相关法律、法规的规定，为明确甲方与乙方的权利义务关系，以上双方经过友好协商，签订本协议。具体内容如下：

第一条 协议主体

1.1 如适用或除非文意另有所指外，本协议所指甲方为甲方及/或其不时之联系人（"联系人"的定义与不时生效的《香港联合交易所有限公司证券上市规则》（以下简称"《上市规则》"）中的"联系人"的定义相同）。

1.2 如适用或除非文意另有所指外，本协议所指乙方为乙方及/或其附属公司（"附属公司"的定义与《上市规则》中"附属公司"的涵义相同）。

第二条 租赁房屋

2.1 甲方同意按照本协议的条款和条件将其合法拥有并列于本协议附件一下全部租赁房屋（房屋资料详见附件一，以下称"租赁房屋"）租赁与乙方；乙方愿意依照本协议的规定，向甲方支付相应之对价以承租甲方在本协议项下全部租赁房屋。

2.2 在本协议项下租赁房屋应视为甲方已在乙方成立时移交给乙方。甲方确认本协议项下租赁房屋在移交时处于满足乙方需求的良好状态。

2.3 出租方将促使其下属拥有租赁房屋的联系人或附属公司（视其适用者）将严格按照本协议规定的条款和条件就其所拥有的一处或多处房屋与承租方签署具体租赁合同（以下简称"具体租赁合同"）。具体租赁合同必须依本协议确立的租赁原则签订，凡与本协议有冲突的，以本协议为准。如本协议按条款中止或终止，所有具体租赁合同同步中止或终止。

2.4 承租方须根据各具体租赁合同约定用途使用租赁房屋，并接受出租方的监督；在不违反有关法律法规的前提下，如改变用途，需事先征得出租方书面同意。

2.5 非经出租方事先书面同意和获得必须的法定批准，承租方不得改变租赁房

屋主体结构。

2.6 租赁期满不再续约的，承租方须及时、完整地将租赁房屋交回出租方，并付第四条所述当时应付但尚欠的租金和税费(如适用)。

第三条 租赁期限

3.1 本协议经双方法定代表人或授权代表签署并加盖公章后，有效期追溯至乙方依法设立之日（即 2006 年 8 月 22 日）起计 10 年止。在本 3.1 条的前提下，本协议项下所有租赁房屋的租赁期限在相关租赁合同中明确和规定。

3.2 在本协议签订之后的 90 日内，承租方应协同出租方依有关规定持具体租赁合同和本协议（如需要）向有关主管部门办理租赁登记手续。

3.3 双方约定，本协议有效期届满，在不违反乙方上市地的上市规则的前提下，承租方有权要求延长租赁房屋的租赁期限，但承租方应在前述有效期届满前至少 6 个月以书面形式通知出租方。本协议任何一方作为出租方在收到承租方按前款发出的延长租赁期通知后及租期届满前，应尽最大努力办理完毕一切与相关房屋续租有关的批准和手续，并应同承租方签订新的租赁协议。续租的租金标准依国家的有关规定或（在无该等规定时）按相关房屋附近地区正常商业条款下同等或类似房屋当时的市场价格来确定和执行。

3.4 如承租方未按前述约定行使续约权，但在本协议有效期满时，确因生产经营的原因无法将有关房屋实际交还出租方，在不违反乙方上市地的上市规则或相关监管规定的前提下，出租方应当酌情延长有关房屋的租赁期限，并有权就延长期限向承租方按届时收取的年租金计算应收取的日租金，直至承租方将有关房屋实际交还出租方。

3.5 甲乙双方同意，本协议任何一方作为承租方可以在本协议有效期满前的任何时候提前终止租赁全部或部分租赁房屋,但须在其所要求的终止日前 6 个月书面通知出租方。出租方同意承租方按照该终止租赁的房屋的租金，相应减少承租方向出租方应支付而尚欠的租金总额；如需要，届时双方另行协商并签订补充协议。

第四条 租金和税费

4.1 除本协议另有规定外，乙方应当按照本协议约定，每年向甲方支付租赁房屋的租金，租金数额详见附件一。

4.2 租金每年就对上一个年度的年租金结算一次。年租金的支付方法在具体租赁合同中明确和规定。

4.3 出租方负责办理租赁期间该租赁房屋的房屋税及其他法定税费的缴纳手续和承担有关税费。

4.4 租赁期间，租赁房屋的房屋水、电、暖费、维修费及其他有关使用该租赁房屋的费用由承租方负担。至于有关房屋的房屋管理费，双方个别就每一处房屋约定费用的承担方，并在相关具体租赁合同中明确和规定。对于每一处房屋而言，如果双方约定有关该房屋的房屋管理费由出租方承担，则所涉及的管理费用应包含在本协议附件一下列明的年租金金额。

4.5 在租赁期限内，双方同意租赁期限每满 3 年，双方经协商并参照当时市场价格对租赁房屋的年租金进行调整，惟甲方出租给乙方的租赁房屋调整后的价格不得高于由独立评估师确认的市场价，聘请独立评估师的费用由乙方负担。另，甲方出租给乙方的租赁房屋的租金可于租赁期限内任何时间予以调低而不受前述须满三年的限制。

第五条 出租方、承租方权利和义务

5.1 出租方权利

5.1.1 出租方有权依据本协议的约定收取租金。

5.1.2 出租方有权享有本协议规定的其他权利。

5.2 出租方义务

5.2.1 出租方保证租赁房屋的产权的合法性以及根据本协议出租有关房屋的合法性，同时保证租赁房屋不存在任何抵押权和其他第三方权利。出租方保证采取一切必要措施使根据本协议项下所出租的房屋在租赁期限内持续符合有关法规对出租该等房屋的规定。如果因此类原因使承租方受到损害，出租方保证对承租方进行足额赔偿。

5.2.2 出租方应在本协议生效之日起九十日内向有关主管部门办理房屋租赁登记手续。

5.3 对于甲方暂无法取得房屋证的租赁房屋，甲方授予乙方（或其相关附属公司）该等房屋的使用权。甲方保证自乙方设立之日起一年内办理相关手续，并取得该等租赁房屋无产权争议的合法证明。如果乙方因为租赁或使用该等租赁房屋产权瑕疵受到任何损害，甲方担保对乙方进行足额赔偿。同时，

甲方应立时提供予乙方与有关租赁房屋条件相同的适租房屋，否则甲方应向乙方赔偿由此带来的一切经济损失。在甲方或乙方取得该等房屋的房屋所有权证之后，双方将参照可比市场价格确定该等房屋的租金。

5.4 承租方权利

5.4.1 承租方有权依据各具体租赁合同及本协议约定的原则使用租赁房屋。

5.4.2 承租方可以把有关房屋转租、转让或转借予其附属公司或关联公司，但需经出租方同意。

5.5 承租方义务

5.5.1 承租方必须依法和本协议的约定使用租赁房屋。

5.5.2 依照本协议约定交付租金。

第六条 陈述和保证

6.1 双方的陈述及保证

6.1.1 双方均根据中国法律正式注册成立、有效存续。

6.1.2 双方已采取一切所需行动，以及取得签订本协议所需的一切同意书、批文、授权和许可。本协议的签订，不会违反(i)各方的公司章程，(ii)各方的其它任何协议或义务，或(iii)任何中国或其它有关的法域的现行法律、法规或法令。其在本协议上签字的代表已被授予全权签署本协议。

6.1.3 在本协议的基础上并依据租赁房屋所在地的地方法规，第 1.1 和 1.2 条所述之有关联系人（就甲方而言）和附属公司（就乙方而言）作为本协议责任和义务的承担者（详见附件一）就房屋租赁事项另行具体约定并签署相关具体租赁合同，以便共同遵守。双方保证促使前述各具体租赁合同的签署并获得全面有效的履行。

第七条 甲方的变更

7.1 甲方将本协议项下的租赁房屋出卖时，须在 3 个月前通知乙方。在同等条件下，乙方有优先购买权。

7.2 如果甲方将任何部分租赁房屋的权属转移给任何第三方时，甲方保证本协议对新的房屋所有者继续有效。

第八条 合同履行、变更和终止

8.1 若本协议项下的任何交易构成《上市规则》所述之关连交易或持续性关连交易，且根据《上市规则》该等交易需在获得香港联交所豁免或乙方（即中国中煤能源股份有限公司）独立股东的事先批准或遵守《上市规则》有关关连交易或持续性关连交易的任何其它规定后方可进行，则本协议与该等交易有关的履行以按照香港联交所给予豁免的条件进行及/或按照《上市规则》的规定获得乙方（即中国中煤能源股份有限公司）独立股东在股东大会上的事先批准及/或遵守《上市规则》有关关连交易或持续性关连交易的任何其它规定为先决条件。

8.2 若香港联交所的豁免是附条件的，则本协议应按所附条件履行。

8.3 在本协议有效期内，若香港联交所对本协议下某一项关连交易或持续性关连交易的豁免被收回、撤销或失效，或其他原因导致该项交易需要但未能符合不时生效的《上市规则》有关关连交易或持续性关连交易的要求，则本协议该项交易有关的履行中止。

8.4 在本协议有效期内任何时间，若本协议下的交易所涉及的有关财政年度累计交易总金额可能或预期会超越已公布的该年度的总金额上限(如适用)，双方同意乙方尽快通知香港联交所并履行《上市规则》下所有适用和必须履行的监管义务，包括根据《上市规则》召开乙方（即中国中煤能源股份有限公司）独立股东大会对有关关连交易和重新厘定的年度金额上限寻求独立股东批准（如适用)。未满足所有有关监管规定前，双方同意尽力控制有关交易该年度总额不超过已公布的金额上限。否则，本协议下与该项交易有关的履行中止。

8.5 若本协议与所有各项交易有关的履行均按第 8.3 及/或 8.4 条中止，则本协议终止。

8.6 本协议任何一条款成为非法、无效或不可强制执行并不影响本协议其它条款的效力及可强制执行性。

8.7 本协议的修订仅可经书面协议并经双方法定代表人或授权代表签字且须经双方采取适当的法人行动批准和符合并满足《上市规则》及有关适用法律法规的监管规定的前提下作出。

8.8 承租方有下列情形之一的，出租方有权通知承租方立即终止本协议：

8.8.1 在租赁期内，承租方擅自将租赁房屋转租、转让或转借他人（转租、转让或转借承租方的附属公司或关联人且经出租方同意除外）；

8.8.2 承租方未按照 2.4 条的规定事先征得出租方书面同意而擅自改变租赁房屋的用途，或利用租赁房屋进行非法活动，损害公共利益的。

8.9 出租方同意承租方按照该终止租赁的房屋的租金，相应减少承租方向出租方应支付而尚欠的租金总额；如需要，届时双方另行协商并签订补充协议。

第九条 不可抗力

9.1 如果本协议任何一方因受不可抗力事件(此等事件包括但不限于水灾、火灾、旱灾、台风、地震、其它自然灾害、罢工、骚动、暴乱及战争以及政府部门的作为及不作为)影响而未能履行其在本协议下的全部或部分义务，该义务的履行在不可抗力事件妨碍其履行期间应予中止。

9.2 由于不能预见并且对其发生和后果不能防止或避免的不可抗力事件，致使直接影响本协议的履行或者不能按约定的条件履行时，遇有上述不可抗力事件的一方，应将事件情况尽可能在最短的时间内以通知书形式通知对方，并应在 15 天内，提供事件详情及本协议不能履行或者部分不能履行，或者需要延期履行的理由的有效证明文件。声称不可抗力事件导致其对本协议的履行在客观上成为不可能或不实际的一方，有责任尽一切合理的努力消除或减轻此等不可抗力事件的影响。

9.3 不可抗力事件发生时，双方应立即通过友好协商决定如何执行本协议。按照不可抗力事件对履行协议影响的程度，由双方协商决定是否解除本协议，或者部分免除履行本协议的责任，或者延期履行本协议。

第十条 违约责任

10.1 除非本协议另有约定，任何一方违反本协议约定,另一方可以要求或采纳本协议和法律所允许的补救措施,包括但不限于实际履行和补偿经济损失。

10.2 如果一方未能履行本协议规定的义务应视为违反合同，违约方从另一方收到具体说明违约情况的通知后应在 30 日内纠正该违约行为。如 30 日后，违约没有纠正，则违约方应向另一方负责赔偿违约引起的一切直接和可预见的损失。

10.3 如果由于甲方的过失而产生乙方对租赁房屋占有的延期，则本协议项下的

房屋租赁期限相应推延。

第十一条 公告

任何一方未经另一方事先书面同意，不得作出与本协议事项有关的任何公告，但根据中国法律或中国证监会、香港联交所、香港证券及期货事务监察委员会或任何其他相关的规定作出公告的除外。

第十二条 通知

12.1 一方根据本协议规定作出的通知或其它通讯应采用书面形式并以中文书写，并可经专人手递或挂号邮务发至另一方指定的地址，或传真至另一方指定的传真号码。通知被视为已有效作出的日期应按以下的规定确定：

12.1.1 专人交付的通知应在专人交付对方指定人士签收之日被视为有效；

12.1.2 以挂号邮务寄出的通知应在付邮(以邮戳日期为准)后第5天(若最后一天是星期六、日或法定节假日，则顺延至下一个工作日)被视为有效；

12.1.3 以传真形式发出的通知应被视作于传真完毕的时间作出。

双方通讯地址如下：

甲方：中国中煤能源集团公司

住所：北京市朝阳区黄寺大街1号

邮编：100011

传真：010－82256251

乙方：中国中煤能源股份有限公司

住所：北京市朝阳区黄寺大街1号

邮编：100011

传真：_

12.2 若一方更改其通讯地址，应尽快按本条规定书面通知另一方。

第十三条 适用法律和争议的解决

13.1 本协议应适用中国法律并应根据中国法律解释。

13.2 凡因本协议引起的或与本协议有关的任何争议，双方均应本着友好协商原则自行解决。如果协商在 30 天内未能取得双方可以接受的结果，任何一方均可向中国国际经济贸易仲裁委员会申请依该委员会的仲裁规则进行仲裁，仲裁裁决为终局裁决，对双方均有约束力。

第十四条 其他

14.1 双方同意按照中国有关法律的规定分别承担一切因签订本协议而产生的有关费用和开支。如没有法律规定者，则由双方平均分配。

14.2 除非取得本协议一方的事先书面同意，本协议的另一方不得转让其在本协议项下的权利和义务。

14.3 本协议和本协议提及的有关文件，应构成协议双方就所述一切事宜之整体协议和理解，并应取代双方对本协议所述一切有关事宜的所有先前口头或书面协议、合约、理解和通信。

14.4 除非另有规定，一方未行使或延迟行使其在本协议项下的权利、权力或特权并不构成对这些权利、权力或特权的放弃，而单一或部分行使这些权利、权力或特权并不排斥任何其它权利、权力或特权的行使。

14.5 本协议附件（若有）是本协议不可分割的组成部分，并与本协议具有同等约束力。

14.6 本协议一式八份，各份协议具有同等效力。

本协议由双方法定代表人或授权代表于文首注明日期在中国北京市签订，以昭信守。
