

Copenhagen, Helsinki, Oslo, Stockholm, 3 May 2007

Interim Report First Quarter 2007

Organic growth strategy continues to pay off

SUPL

- Operating profit EUR 895m, up 6% excl. contribution from International Moscow Bank (IMB) last year (EUR 853m in the first quarter 2006)
- Net profit EUR 701m, up 7% excl. IMB (EUR 665m)
- Income EUR 1,873m, up 8% excl. IMB (EUR 1,754m)
- Costs up 6% - Including investments in future growth
- Cost/income ratio 53%
- Positive net loan losses of EUR 13m (EUR 31m)
- 12th consecutive quarter with net recoveries
- Earnings per share EUR 0.27 (EUR 0.26)
- Return on equity 18% (20%)
- Risk-adjusted profit up 11%

RECEIVED
2007 MAY 10 A 14 1
OFFICE OF INTERIM REPORTS
CORPORATE FINANCE

Strong performance in strategic growth areas

- Total lending up 17%
- Mortgage lending up 14%
- SME lending up 14%
- Consumer lending up 16% - non-collateralised consumer lending up 22%
- Number of credit cards increased by 22%
- Strong asset growth in Private Banking
- Increased cross-selling of Markets' products to SMEs
- Strong increase in capital markets transactions with large corporates

"Our reinforced organic growth strategy gives us continued strong momentum in our business development in all business areas. While investing in future growth we are on track towards delivering on the ambitious financial targets we set out in December last year. The organisational changes announced last week and the ongoing implementation of our integrated operating model will support our organic growth strategy by improving the quality of our customer relations and increase time spent with customers while reducing time-to-market of our product and services. With the aim of improving our customers' experiences of doing business with us and to meet our high ambitions, we will continue to increase customer focus, people orientation and teamwork in Nordea" says Christian Clausen, President and Group CEO of Nordea.

THOMSON
FINANCIAL

Nordea's vision is to be perceived as the leading Nordic bank, acknowledged for its people, creating superior value for customers and shareholders. We are making it possible for our customers to reach their goals by providing a wide range of products, services and solutions within banking, asset management and insurance. Nordea has around 10 million customers, more than 1,100 branch offices and a leading netbanking position with 4.6 million e-customers. The Nordea share is listed on the stock exchanges in Stockholm, Helsinki and Copenhagen.

⁴ Including the result for the first three months. According to Swedish FSA rules (excluding the unaudited result for Q1): Tier 1 capital EUR 12,724m (31 Mar 2006: EUR 11,348m), capital base EUR 17,721m (31 Mar 2006: EUR 15,911m), Tier 1 capital ratio 6.6% (31 Mar 2006: 6.5%), total capital ratio 9.2% (31 Mar 2006: 9.2%).

The Group

Result summary first quarter 2007

The strong revenue generation continued in the first quarter of 2007 supported by the momentum in the execution of Nordea's organic growth strategy and continued market growth. Strong progress is especially evident in prioritised growth areas like consumer loans, Private Banking, cross-selling of Market's products and growth in Poland and the Baltics.

The strong profit trend continued in all business areas. Total income increased by 8% compared to the first quarter 2006, excluding revenues from International Moscow Bank (IMB) last year. Costs increased by 6% following investments in future growth. Operating profit was EUR 895m, up 6%, and net profit was EUR 701m, up 7% excluding IMB. Return on equity was 18% and the cost/income ratio 53%. Loan losses were positive at EUR 13m.

Nordea's newly presented streamlined organisation will further strengthen the organic growth strategy and focus on customers. By separating responsibilities for customer relations, products and services, operational efficiency will improve.

Income

Total income was EUR 1,873m, up by 8% when excluding last year's revenues of EUR 12m from the now divested holding in IMB.

Net interest income grew by 8% to EUR 1,004m. Total lending to the public increased by 17% to EUR 222bn. Double-digit volume growth continued in most segments and this largely compensated for the margin pressure still present in certain areas. Deposits increased by 11% to EUR 126bn driven by both personal and corporate volumes and deposit margins continued to improve following higher market interest rates.

Net interest income in Retail Banking increased by 7%, supported by growth in SME and consumer lending and improved income from deposits as a result of better margins and higher volumes.

In Corporate and Institutional Banking, net interest income increased by 9% following strong lending growth. In Poland and the Baltic countries lending increased by 53% and net interest income by 22%.

Corporate deposits increased by 21% and contributed positively to the increase in net interest income.

Assets under management (AuM) increased by 12% to EUR 163bn compared to the first quarter last year. Inflow was strong in Private Banking as well as in Institutional Asset management.

Net commission income increased by 6% to EUR 535m. Lending-related commissions increased by 14% to EUR 100m, reflecting the strong volume growth. Savings-related commissions income grew in total by 6%. Of this, asset management commissions increased by 3% following growth in assets under management but lower transaction fees than last year. Commissions from payments increased by 6% to EUR 181m of which card commissions grew by 9% to EUR 73m. The increase is mainly a result of growth in the number of transactions as well as increased penetration among Gold customers.

Net gains/losses on items at fair value increased by 4% to EUR 291m, from an already high level in the first quarter of 2006. Net gains/losses in Business Areas increased by 3% to EUR 273m driven by a continued successful penetration of Nordea's base of small and medium-sized companies. In addition, sale of both fixed-income and equity products grew strongly. In Group Treasury, net gains/losses were unchanged at EUR 40m compared to last year.

Income under equity method was EUR 10m compared to EUR 20m one year ago. The reduction reflects the divestment of the holding in IMB.

Expenses

Total expenses increased by 6% to EUR 992m. The increase is a result of Nordea's growth ambition and prioritised investments in certain areas with sizeable potential, as well as an increase in variable salaries. Excluding the increase in variable salaries and investment in growth areas, total expenses increased by less than 4%.

Staff costs increased by 8% to EUR 585m reflecting Nordea's growth ambitions. The average number of FTEs increased by approx. 300, or 1% compared to last year and the general wage inflation was approx. 4% in the last twelve months. Increased variable salaries accounts for approx. 1.5 %-points of the total increase in staff costs. The increase in staff costs also reflects increased costs for training and leadership development in line with the organic growth strategy.

Excluding the expansion in growth areas such as Poland and the Baltics, the average number of employees was unchanged compared to the first quarter 2006. Within the Group, the shift towards increasing number of advisory and sales-related employees in Business Areas and a falling number in processing and staff units, continued.

Other expenses amounted to EUR 383m, up by 4% compared to last year. Higher business volumes have resulted in an increase in transaction and sales-related expenses.

Total expenses in Business Areas increased by 4%. However, the implementation of strategic projects, mainly Basel II, has led to a cost expansion outside Business Areas. This is related to both staff costs and other expenses.

The cost/income ratio was unchanged at 53% and the gap between income and cost growth was 1.2%-points in the first quarter of 2007 excluding IMB.

Loan losses

Net loan losses were positive at EUR 13m reflecting recoveries maintained at a high level and limited new provisions. Provisions include EUR 20m for collectively assessed loans related to the property market in the Baltics reflecting the increased macroeconomic risk in the region. However, Nordea is confident in the overall quality of its Baltic credit portfolio.

Taxes

In the first quarter the revaluation of the tax asset in Finland has reduced the tax expenses by approx. EUR 50m. The effective tax rate in the first quarter was thus 22%.

Net profit

Net profit was EUR 701m, an increase by 7% excluding IMB. This corresponds to a return on equity of 18% compared to 20% in the first quarter last year. Earnings per share increased by 4% to EUR 0.27.

Risk-adjusted profit and capital management

Economic Capital increased by 10% to EUR 9.9bn. This is explained by the increase in credit risk exposure following the growth in lending and high business activity. Economic Profit increased by 8% to EUR 378m.

Nordea's new financial target is to double the risk-adjusted profit in 7 years which implies an average annual growth of the risk-adjusted profit of 10%. Nordea's performance in the first quarter was well in line with this target with a risk-adjusted profit growth of 11%.

Risk-weighted assets (RWA) increased by 11% to EUR 193bn compared to the first quarter last year reflecting higher business volumes. The Tier 1 capital ratio was 6.8% including the result for the first quarter. The consolidation of Orgresbank reduced the Tier 1 ratio by approx. 15 basis points, mainly reflecting goodwill. The total capital ratio was 9.4%. When applying the Swedish FSA definition, excluding the first quarter profit, the Tier 1 ratio was 6.6% and the total capital ratio 9.2%.

Nordea is in the final phase of implementing Basel II and is, as earlier communicated, expecting to report RWA under the Basel II framework from the second quarter this year.

Credit portfolio

Total lending was EUR 222bn and the share of personal customer lending was 44%. Within personal customer lending, mortgage loans accounted for 79%.

There was no major change in the composition of the corporate loan portfolio during the quarter. Real estate companies remain the largest industry exposure in the credit portfolio and amounts to EUR 31.6bn, representing 14% of the total lending portfolio. The lending portfolio is well diversified.

Nordea share

In the first quarter 2007, the share price of Nordea appreciated by 6% on the Stockholm Stock Exchange from SEK 105.50 on 29 December 2006 to SEK 111.50 on 30 March 2007. Total shareholder return (TSR) was 6%. Nordea reached the target of being among the top five in the European peer group measured by TSR.

Acquisition of Orgresbank completed

Nordea's acquisition of a 75.01% stake in JSB Orgresbank in Russia was finalised according to plan in the first quarter. The balance sheet of Orgresbank, with total assets amounting to EUR 0.8bn, was consolidated into Nordea Group per 31 March 2007. Given the binding exit clause agreed with minority shareholders, Nordea is consolidating 100% of Orgresbank. Financial performance in the first quarter was strong, total income amounted to EUR 18m and total costs to EUR 10m. In the full year 2006, total income was EUR 55m and total expenses EUR 31m. The income statement will be consolidated in the second quarter 2007.

Orgresbank will capture growth opportunities in the Russian corporate and retail segments. Focus areas include Russian corporate customers, Nordic corporate customers and an added focus on personal customers in the high-end segment. For personal customers, product areas in focus are mortgage loans, car loans and cards.

Nordea's new CEO

Christian Clausen succeeded Lars G Nordström as President and Group CEO of Nordea on 13 April 2007. Christian Clausen is 51 years old and he was previously Head of Asset Management & Life and since 2001 member of Group Executive Management in Nordea.

Nordea's changed organisation

The changed streamlined organisational structure, which will be established in the period up to 1 July 2007, implies a stronger customer orientation and a more simple, transparent and efficient product and service delivery chain. In addition, it involves a clear separation of the responsibilities for customer relations and products. The stronger customer orientation will be supported by combining the corporate customer units in the bank and

establishing one Nordic customer area, "Nordic Banking". This customer area will be responsible for sales and customer relationship processes covering retail and corporate segments in the Nordic region.

The product and service delivery chain will be streamlined by organising all products and related processing in the Group in two new product areas, "Banking & Capital Market Products" and "Savings & Life Products" with a simplified governance structure for the interface between customer and product units. Within these two new product areas four product divisions will be formed: Account Products, Cash Management & Payments, Capital Market Products and Savings Products & Asset Management. Segment reporting reflecting the new organisation will be adjusted in the third quarter.

The Group's vision and values foundation have been revised. The vision has been adjusted to mirror the increased ambitions of the Group. The new Nordea vision reads: *"The leading Nordic bank, acknowledged for its people, creating superior value for customers and shareholders"*.

The Group's values foundation has also been adjusted to better support the realisation of the vision and the organic growth strategy. In addition to the existing foundation three new elements "Great customer experiences", "It's all about people" and "One Nordea Team" have been included. As a consequence of this a new business support area, People & Identity will be established. This will also strengthen the Nordea brand and the focus on people management in the Group.

Gunn Wærsted to join Group Executive Management

Gunn Wærsted, former CEO of SpareBank 1 Gruppen in Norway, will 1 August 2007 join the Nordea Group Executive Management as Head of Savings & Life Products and Private Banking as well as Head of People & Identity. Gunn Wærsted will also become Nordea's Country Senior Executive in Norway.

Annual General Meeting

The Annual General Meeting (AGM) of Nordea was held on 13 April in Stockholm. Prior to the AGM, information meetings for shareholders were held in Helsinki and Copenhagen.

The AGM approved the Board of Directors' proposal of a dividend for 2006 of EUR 0.49 per share, corresponding to a payout ratio of 40% of the net profit for 2006. The payout date was 25 April 2007 and the dividend yield on the payout date was 3.9%.

Kjell Aamot, Harald Arnkværn, Hans Dalborg, Birgitta Kantola, Claus Høeg Madsen, Lars G Nordström, Timo Peltola and Björn Savén were reelected for the time period

up to the next annual general meeting. Marie Ehrling, Tom Knutzen and Ursula Ranin were elected new members of the board for the same period. Hans Dalborg was elected chairman of the Board.

The AGM resolved to authorise the board of directors, for the period until the next annual general meeting, to decide on acquisition of shares in the company. Acquisitions may be made up to ten per cent of the total number of shares in the company.

The AGM further resolved to introduce a Long Term Incentive programme (LTIP) comprising up to 400 managers and key employees in the Nordea Group. The main objective of the LTIP is to strengthen Nordea's ability to retain and recruit the best talent for key leadership positions. The new programme is a combined share matching and performance share programme that will replace the existing Executive Incentive Programme in place since 2003. To participate in the programme, the participants are to invest part of their salary in Nordea shares and the outcome of the programme is based on risk-adjusted profit and total shareholder return.

Maximum pay-out in the programme requires that the risk-adjusted profit per share increases by 15% for 2007 and 12% in 2008 and that Nordea's total shareholder return (TSR) in 2007-2008 exceeds the TSR in the peer group by 10 percentage points. With a growth in risk-adjusted profit per share below 15% and 12%, respectively, or a TSR exceeding peer group TSR with less than 10 percentage points, the pay-out will be reduced accordingly. The cost of the LTIP in 2007 is expected to be of the same magnitude as the Executive Incentive Programme in place in 2006, ie approx. EUR 5m.

Rating

Nordea Bank AB (publ)'s long-term rating by Moody's was in the period improved by two notches to Aa1 following the implementation and subsequent refinement of Moody's Joint Default Analysis.

Outlook 2007

The growth strategy is paying off and Nordea is confident to be able to continue to deliver on its financial targets. Nordea believes that the strong revenue growth will continue in 2007.

As previously stated, the cost increase for the full-year 2007 is expected to be of the same magnitude as in 2006, ie 4-5%. The gap between revenue and cost growth is for the full year 2007 expected to be 3-4 %-points.

The gap and the cost forecasts are excluding the impact of Orgresbank.

Retail Banking

- **Key product areas showing double-digit volume growth**
- **Net interest income up 7%**
- **Low cost/income ratio of 53% and high RAROCAR of 25%**

Within Retail Banking, Nordea services 7.4 million active personal customers and 600,000 active corporate customers. The business is conducted through 12 Regional Banks operating in the four Nordic markets.

Business development

The strong growth in volumes continued in the first quarter. Several product areas including corporate lending, mortgages, consumer lending, savings and credit cards noted double-digit growth. In total, revenues increased by 4%.

The double-digit growth rates in the corporate business continued into the first quarter and both corporate lending and corporate deposit experienced a year-on-year growth of 14 %. Competition on corporate lending remains fierce and the pressure on margins remained in the first quarter. Compared to the first quarter 2006 volume largely compensated the impact from the decline in margins. Corporate deposit margins were stable and revenues from corporate deposits are contributing to the income growth. Furthermore Nordea's focus on event-based advisory services eg risk management, acquisitions and generation shifts support growth in corporate lending as well as fee income.

Margins on household deposits are increasing due to the increase in market interest rates. The activity in the deposit market has been very intense. This has led to a fierce competition and Nordea has chosen to offer competitive savings products. The increase in the volumes for these products have more than compensated for the competitive pricing. Year-on-year household deposit volumes have increased by 8 %

Mortgage lending increased by 14% year-on-year. The Nordic average margin was only down 1 basis point in the first quarter, however, the underlying pressure remains. Market shares within mortgages continued to grow in Denmark and Norway and were stable in Finland and Sweden. Market shares in Finland have declined for a period but have stabilised at a very high level following a number of successful product launches. New products like Home-flex contributed to income growth by strong sales and higher margins than traditional mortgages.

Gold customers continue to take advantage of the benefits of the customer program. The Gold credit card including an attractive travel and purchase insurance offer is issued

without fee to Gold customers. During the first quarter 145,000 new credit cards were issued resulting in a 22% increase in the credit card stock. The increase in card stock has led to a 20% increase in outstanding credit volume and double-digit growth in transaction income.

The number of gold customers increased by 8% to 2.3m, while the number of Private Banking customers increased by 15% to 80,000. Business volumes with Gold and Private banking customers increased by 13% year-on-year.

Work to capture the growth opportunities by further leveraging the customer base has continued in the first quarter. A new and more efficient sales process to personal customers including a contact policy has been finalised and is now under implementation. Also the effort to optimise the branch network distribution continued in the first quarter. This effort focuses on freeing up time for sales staff and increasing the ratio of advisers (PBA) among the branch staff.

According to Norsk Kundebarometer - a comprehensive review of customer attitudes - Nordea has experienced a leap in positive customer attitudes within the last year, both in relation to satisfaction and loyalty. Nordea has advanced significantly and now ranks second among all banks in Norway in terms of satisfaction. Loyalty-wise, Nordea has moved towards strongly loyal customers. This is a strong indication that the customer strategies - personal bank advice and customer programmes - are successful and form the platform for future sales growth.

Result

In the first quarter, Retail Banking generated income of EUR 1,287m, an increase of 4% compared to the first quarter of 2006. This was driven by strong growth in Finland and a more moderate growth in Denmark and Sweden. Net interest income increased by 7% to EUR 817m. The decline in net interest income in Norway is a result of margin pressure and the required six weeks lag between the central bank's interest rate increases and the execution of customer rate changes. Margins in Norway are now approaching the Nordic average.

Net fee and commission income increased by 1% from the first quarter 2006, where net fee and commission income was very high.

Total expenses were up 4% at EUR 686m. The number of employees increased by 1%. Loan losses were positive at EUR 35m following recoveries, particularly in Finland.

Operating profit increased by 3% to EUR 636m. RAROCAR was 25% (27%). The cost/income ratio was 53% (53%).

¹Customer base defined as active customers. In the total customer base Nordea also has approx. 1.8 million inactive corporate and personal customers that potentially could be reactivated.

Corporate and Institutional Banking

- Income up 14%, operating profit up 19% excluding IMB
- High business activity, especially in the capital markets area

Corporate and Institutional Banking delivers a wide range of products and services to large corporate and institutional customers and to retail corporate customers. The business area has customer responsibility for large corporate customers listed on the main stock exchanges and other customers with an external credit rating as well as shipping, offshore and oil services companies, and financial institutions. Nordea's banking activities in Poland and the Baltic countries, comprising full-service banking activities for all customer groups, is also part of Corporate and Institutional Banking.

Business Development

In the Corporate Banking Division, customer activity continued on a high level in the first quarter of 2007. Nordea again played a prominent role in a number of large and complex structured transactions. Activity within the acquisition finance area remained on a high level during the first quarter.

Volumes in day-to-day business were high, but continuous fierce competition in the market is putting pressure on margins and prices. Corporate Banking Division is however benefiting from its strong relationship driven approach and its strong coverage in all Nordic countries.

Business activity in the Financial Institutions Division's area was strong, especially towards the end of the quarter. Following a stock market correction in February, business activity picked up significantly during March as customers' appetite for risk increased once again. By the end of the quarter much of the correction had been restored, favouring all activities in the Financial Institutions area, eg the Securities Services activities.

The strength of the Customer Team approach was apparent during the quarter, as several discussions regarding equity derivatives, structured products and leverage were finalised and new ones initiated. The innovative transactions illustrate Nordea's position as a leading supplier of advanced structured products to the Nordic financial industry.

In the first quarter 2007, Nordea continued to maintain its position as a leading provider of financial services to the Shipping, Offshore and Oil Services industries worldwide. The Division's activity level remained firm in all customer segments and particularly high within the offshore and oil services areas. As in the previous quarters, a number of large transactions were closed, including several bond transactions.

The current deal flow is on a satisfactory level, continuing the positive trend from previous years.

In the Markets Division, customer activity continued at high levels during the first quarter, mirroring the high overall activity in the financial markets. The activities targeted towards small and medium-sized Nordic corporates' use of structured solutions continued with good results in the first quarter. The efforts are supported by an increasing number of local sales personnel in larger cities in the Nordic countries.

During the quarter, Nordea led a number of major capital markets transactions, including the Bavarian Nordic and Sponda rights issues, and the TeliaSonera and Elisa Euro bond issues.

Business activity in Poland and the Baltic countries continued to be strong during the quarter. The increase in total lending was 53% compared to the same quarter 2006 and mortgage lending grew by 84%. Nordea almost doubled the number of Gold customers compared to the corresponding quarter in 2006. The larger customer base resulted in increasing sales of investment funds and credit cards.

Poland and the Baltic countries continue to expand their networks and seven new banking units were opened during the first quarter, bringing the total number to 97. The preparations for a more rapid expansion of the network are ongoing and the results will be seen gradually during the latter part of 2007. The new sales capacity will primarily target private customers and SMEs.

In the first quarter of 2007, Orgresbank continued to grow the business at a strong rate and the loan book increased by approx. 60% compared to the first quarter of last year.

During 2007, Orgresbank will continue to focus on the SME sector, while also targeting new customers within the large corporate segment and increase the efforts towards Russian household customers. A new target area for Orgresbank will be the Nordic and Baltic corporates operating in Russia.

Result

The strong business activity in 2006 continued in the first quarter of 2007. Total income reached EUR 339m, up 10% compared to the corresponding quarter of last year. When excluding the IMB equity method income from the first quarter 2006 numbers, the income growth was 14%. The growth was especially strong in Financial Institutions Division, Markets and Poland and Baltic countries.

Net interest income increased by 9% in the quarter on the back of solid growth in both lending and deposit volumes.

The strongest growth contributors were Poland and Baltic countries and Corporate Banking Division. Average lending margins decreased somewhat compared to the first quarter 2006. Commission income decreased by 5% compared to the strong first quarter last year. Net gains/losses on items at fair value increased by 29%, reflecting high customer and market activity.

Total costs increased by 5% in the quarter, with higher staff expenses as the main driver. The total number of FTEs was 3,614 by the end of the quarter, an increase of 378, or 12%, compared to a year ago. The increase is mostly related to Poland and the Baltic countries.

Provisions for loan losses amounted to EUR 22m. Provisions include EUR 20m for collectively assessed loans related to the property market in the Baltics

reflecting the increased macroeconomic risk in the region. However, Nordea is confident in the overall quality of its Baltic credit portfolio.

Operating profit amounted to EUR 165m for the quarter, up 9%. When excluding the impact of the equity method for IMB from the 2006 figures, the growth was 19%. The profit growth is a result of solid topline growth and cost control.

RAROCAR reached 26% in the quarter, up two percentage points. The C/I-ratio was 45% for the quarter, down from 47% in the corresponding quarter in 2006.

Asset Management & Life

- **Asset Management Income up 7%**
- **Asset Management product result up 9%**
- **Life premiums up 5%**
- **Life product result up 4%**
- **Net inflow of AuM EUR 2.6bn**

Asset Management & Life is responsible for the Group's activities within institutional investment management, life insurance and pensions, investment funds, private banking and the savings market in general.

Business development

In the first quarter Nordea's assets under management (AuM) increased by EUR 4.6bn to EUR 162.7bn. The net inflow was EUR 2.6bn, equivalent to an annualised net inflow of 7% of AuM.

AuM of Nordic retail funds ended at EUR 37.0bn, and a net outflow of EUR 0.3bn was realised in the first quarter. The net outflow was mainly from old funds in Sweden.

Performance on new and reengineered products was strong in the first quarter, with 80% of the products outperforming benchmark. In the first quarter 53% of the net inflow was channelled into new products.

In Nordic Private Banking, the first quarter was once again strong with net inflows of EUR 1.2bn leading to an AuM of EUR 44.7bn. The continued growth in Nordic Private Banking was mainly driven by the continuous growth of the customer base.

Again, European Fund Distribution achieved a positive inflow, which in the first quarter amounted to EUR 0.1bn leading to an AuM of EUR 5.8bn. The positive development is a result of good investment performance and intensified client activities with a successful promotion of new products.

Institutional asset management activities reached an AuM of EUR 27.5bn in the first quarter. Net inflow in the first quarter was a solid EUR 1.1bn, which primarily stems from a significant inflow from existing strategic clients in Denmark, and a significant number of new mandates won in Germany.

Nordea Life & Pensions was in 2006 the largest company on the Nordic market with a market share of 10.8% measured in terms of gross written premiums. During the first quarter, the providers within the new ITP corporate pension scheme in Sweden were announced. Nordea Life & Pension was chosen to be one of five providers of the scheme's traditional product, and qualified with the new traditional product "Ålderspension med premiegaranti". The scheme requires that at least 50% of the premiums should be invested in a traditional product.

The Life premium income increased with 5% to EUR 1.0bn in the first quarter compared to the first quarter last year. This solid result was achieved despite a termination of the sale of the "Kapitalpension" product and a temporary stop for transfer of customer's insurance capital from one provider to another in Sweden. The above changes were a result of an alignment of the Swedish legislation with EU principles, and have led to a loss of more than one third of the Swedish premium income. The loss was, however, compensated by strong premium growth in Denmark, Norway and Poland in the first quarter.

The financial buffers of the Life provision were strengthened with 17% compared to first quarter last year ending at EUR 2.3bn in the first quarter. This was, among other things, due to a satisfactory investment return for traditional Life products during first quarter.

Result

Despite a very strong first quarter last year, in which transaction income was at a high level, the asset management activities realised a top line growth of 7%, ending at EUR 193m in the first quarter. The 7% income growth was driven by management fees, up 11%, and transaction-related income down 10% compared to first quarter last year.

The asset management product result ended at EUR 100m in first quarter, which is 9% up compared to same quarter last year, and margins were on average unchanged compared to the first quarter 2006. Costs increased by 5% in the first quarter compared to the first quarter 2006. Due to the higher income growth, the cost/income ratio was reduced by 1%-point compared to the same quarter last year, ending at 48% in the first quarter.

In the first quarter Life saw a stable profit growth of 4%, and a decrease in operating expenses by 2% compared to the first quarter last year.

Group Treasury

- Higher investment earnings and gross investment returns
- Strong funding activity

Group Treasury is responsible for the Group's own investment portfolio and market risk-taking in financial instruments (excluding investments within insurance), raising funding for the Group as well as asset and liability management.

Business development

Financial markets were turbulent in the first quarter. The prime concern was the health of the US economy, amongst reports of increasing defaults on US housing loans. Towards the end of the quarter robust growth figures from around the world however prevailed and the market calmed down. European central banks continued to hike their interest rates, and expectations for further hikes in 2007 increased.

Nordic equity markets were up by 4-7% in the first quarter.

Interest rates increased moderately, the Euro area short-term interest rates rose some 20 bps, while the rise in longer-term rates was more muted.

The liquidity in the Bank's funding programs has been very good. Issuance activities both in the Nordic and international capital markets, including covered bonds have offered the bank good funding at attractive spreads. The French CP program that was established during the fourth quarter 2006 has become a good complement to the bank's funding base.

During second half of 2006 Nordea Hypotek launched its first EUR benchmark covered bond. As part of its funding plan and to establish a credit curve in EUR, Nordea Hypotek issued in February 2007 its second EUR benchmark bond complementary to the outstanding 5-year deal.

At the end of March, the price risk involved in Group Treasury's interest rate positions, calculated as VaR, was EUR 11m compared to EUR 8m at the end of December 2006. The risk related to equities, calculated as VaR, was EUR 24m compared to 25m at the end of December 2006.

The structural interest income risk (SIIR) in the Group, which shows the effect on net interest income in the next 12 months, was EUR 220m assuming increased market rates by 100 basis points and EUR -249m assuming decreased market rates by 100 basis points.

Result

Group Treasury's result is divided into investment-related result and funding-related result. Earnings in Group Investment are defined as the net of return on investment and the return target, ie the expected average medium-term risk-free return over time, defined as the funding cost. The funding cost is directly correlated to the interest paid to Business Areas on their allocated Economic Capital. The rate is set annually and it is adjusted based on the prevailing market rate. For 2007, the funding cost is 4.00%.

Operating profit in Group Investment was EUR 27m compared to EUR 15m in the first quarter last year.

The increase in short-term rates further supported the quarterly return that was 1.25% (5.06% annualised), well above the 0.96% in the first quarter 2006 and 1.17% in the fourth quarter of 2006.

Operating profit in Group Funding was EUR 32m compared to EUR 34m in the first quarter 2006.

Definitions of financial performance measures

Risk-adjusted profit

Risk-adjusted profit is defined as total income minus total operating expenses, minus Expected Losses and standard tax (27 %). In addition, Risk-adjusted profit excludes major non-recurring items.

Economic Profit

Economic Profit is derived by deducting Cost of Equity from Risk-adjusted profit.

Expected Losses

Expected Losses reflects the normalised loss level of the individual loan exposure over a business cycle as well as various portfolios. Based on the current portfolio the Expected Losses used in the Economic Profit calculations is 17 basis points, down from 19 basis points in 2006. This reflects the improved quality and repayment ability of Nordea's customers.

Cost of Equity

Cost of Equity (%) is defined as required return by investors on the Nordea share, measured as the long risk free euro rate plus required average risk premium to invest in equities multiplied by Beta, which reflects the Nordea share's volatility and correlation with market volatility.

Cost of Equity in EUR is defined as Cost of Equity (%) times Economic Capital.

The Cost of Equity is set by management once a year as a parameter to manage risk appetite and investment level. It was in 2006 set to 7.5 % and for 2007 8.0 % following higher interest rates.

Economic Capital

Economic Capital is Nordea's internal estimate of required capital and measures the capital required to cover unexpected losses in the course of its business with a certain probability. EC uses advanced internal models to provide a consistent measurement for Credit Risk, Market Risk, Operational Risk, Business Risk and Life Insurance Risk arising from activities in Nordea's various business areas. The aggregation of risks across the group gives rise to diversification effects resulting from the differences in risk drivers and the improbability that unexpected losses occur simultaneously.

RAROCAR

RAROCAR, % (Risk-adjusted return on capital at risk) is defined as Risk-adjusted profit relative to Economic Capital.

Segment reporting

Nordea's operations are organised into three business areas. The business areas are Retail Banking, Corporate and Institutional Banking and Asset Management & Life. The latter segment is divided into two columns due to transparency reasons. The business areas operate as profit centres.

According to IAS 14 the reporting of vertical integrated activities are encouraged, why, in addition to the results of the business areas, the result for Group Treasury, which conducts Nordea's financial management operations, is also disclosed.

Within Nordea, customer responsibility is fundamental. Nordea's total business relations with customers are reported in the customer responsible unit's income statement and balance sheet.

Economic Capital

Capital allocation is based on the internal framework for calculating economic capital, which reflects each business unit's actual risk exposure considering credit and market risk, insurance risk as well as operational and business risk. This framework optimises utilisation and distribution of capital between the different business areas. Standard tax is applied when calculating risk-adjusted return on economic capital.

Economic Capital is allocated to business areas according to risks taken. As a part of net interest income business units receive a capital benefit rate corresponding to the expected average medium-term risk-free return. The cost above Libor from issued subordinated debt is also included in the business areas net interest income based on the respective use of Economic Capital.

Economic Profit constitutes the internal basis for evaluating strategic alternatives as well as for the evaluation of financial performance.

Allocation principles

Cost is allocated based on calculated unit prices and the individual business areas' consumption. Income is allocated with the underlying business transactions as driver combined with the identification of the customer responsible unit.

Assets, liabilities and economic capital are allocated to the business areas. Group Functions and Eliminations consists of income statement and balance sheet items that are related to the unallocated reconciling items/units.

Asset Management & Life has customer responsibility within investment management and in private banking outside a joint unit with Retail Banking. In addition, Asset Management & Life commands product responsibility for investment funds and life insurance products. The operating profit shown in the accompanying table includes the customer responsible units. The product result for Asset Management and Life respectively represent the Group's total earnings including income allocated to Retail Banking on these products, as well as sales and distribution costs within Retail Banking.

Transfer pricing

Funds transfer pricing is based on current market interest rate and applied to all assets and liabilities allocated to or booked in the business areas or group functions.

Group internal transactions between legal entities are performed according to arm's length principles in conformity with OECD requirements on transfer pricing. The financial result of such transactions is reported in the relevant business area based on assigned product and customer responsibilities. However, the total result related to investment funds is included in Retail Banking, as well as sales commissions and margins from the life insurance business.

Group Functions and Eliminations

Group Functions and Eliminations include the unallocated results of the four group functions: Group Processing and Technology, Group Corporate Centre, Group Credit and Risk Control and Group Legal and Compliance. Group Treasury, which is part of Group Corporate Centre, has been excluded in this calculation as this is treated as a vertical integrated segment and therefore reported separately.

Expenses in Group Functions, not defined as services to business areas, and profits from associated undertakings that are not included in the customer responsible units are reported under this heading.

The following items are included in cash and cash equivalents (EURm):	2007	2006
Cash and balances with central banks	2,771	3,778
Loans and receivables to credit institutions, payable on demand	1,437	1,036

Cash comprises legal tender and bank notes in foreign currencies. Balances with central banks consist of deposits in accounts with central banks and postal giro systems under government authority, where the following conditions are fulfilled:

- the central bank or the postal giro system is domiciled in the country where the institution is established
- the balance on the account is readily available at any time.

Loans and receivables to credit institutions, payable on demand include liquid assets not represented by bonds or other interest-bearing securities.

Notes to the financial statements

Note 1 Accounting policies

Nordea's consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) endorsed by the EU. Additional requirements in accordance with the Swedish Act on Annual Accounts of Credit Institutions and Securities Companies (1995:1559) (ÅRKL), the recommendation RR30:06 "Supplementary Rules for Consolidated Financial Statements" of the Swedish Financial Accounting Standards Council (RR) as well as the accounting regulations of the Financial Supervisory Authority (FFFS 2006:16) have been applied.

These statements are presented in accordance with IAS 34 "Interim Financial Reporting".

Basis for presentation

The accounting policies and the basis for calculations are, in all material aspects, unchanged in comparison with the 2006 Annual Report.

The following change in the presentation has been made:

Consolidation of associated companies

The presentation on the income line "Profit from companies accounted for under the equity method" has been changed from pre- to post taxes.

The effect is a decrease of income by EUR 3m (EUR 5m) on "Profit from companies accounted for under the equity method", and a corresponding decrease on "Tax expense". "Net profit for the period" is unchanged. The comparative figures have been restated accordingly.

Changes in Group structure

In the fourth quarter 2006 Nordea signed an agreement to acquire an 85.72% holding in OOO Promyshlennaya Companiya Vestkon (Vestkon). Vestkon's main operation is to act as a holding company in the Joint Stock Bank Orgresbank (Orgresbank). Vestkon's holding in Orgresbank is 87.50%. This leads to an indirect holding in Orgresbank of 75.01%.

The minority shareholders in Vestkon are three persons in the management of Orgresbank. The direct minority shareholder in Orgresbank is the European Bank for Reconstruction and Development (EBRD).

In addition to the 85.72% holding in Vestkon, Nordea and the minority shareholders have a binding shareholders' agreement, stating that Nordea shall purchase, and the minority shareholders shall sell, the minority shareholders' holdings in Vestkon and Orgresbank at a pre-agreed point in time. The purchase price will be based on Orgresbank's financial performance in the Annual Report 2009. This will lead to a 100% holding in Vestkon and Orgresbank. The binding shareholders' agreement has led to that 100% of Vestkon and Orgresbank is being consolidated into the Nordea Group already in Q1 2007. The future purchase price has been

estimated using the relevant information available at the date of acquisition, and accounted for as an investment in shares and as a liability to the minority shareholders. Going forward, the estimated future purchase price will vary with the financial performance in Orgresbank.

The agreement in the fourth quarter 2006 was subject to necessary approvals. The transaction was therefore not closed until 27 March 2007, which is the date of acquisition. Vestkon is consolidated in the Nordea Group as from 31 March 2007.

The following purchase price allocation (PPA) has been established as of 31 March 2007. The initial accounting is preliminary, and can be updated within the next 12 months.

	31 Mar
EURm	2007
Assets	813
Liabilities	714
Net assets in accordance with IFRS	99
Purchase price, settled in cash	289
Transaction cost	5
Cost of combination	294
Surplus value	195
Customer related intangible asset, post tax	21
Goodwill	174
Total surplus value	195

Goodwill arises mainly due to the fact that Nordea acquires a functional organisation with all necessary resources, processes and licenses to conduct banking business in Russia. Orgresbank has more than 35 branches and outlets. There is a significant value in the local business knowledge and network held by the key management personnel and other employees centrally and within these outlets. The number of employees amounts to around one thousand. There are also significant values in the established processes used to run the day-to-day operations as well as in the current product portfolio. This is a platform, which will be of substantial value in the expected development in Russia. The value for Nordea lies in the possibility to generate future earnings. Orgresbank is operating within an emerging market and is furthermore a fairly young organisation (established 1994), why the expectations on the future development are high. The value of the platform is not possible to separate from goodwill.

A customer-related intangible asset has been separated from goodwill. The part separated is related to future earnings from acquired customers. This relates, however, only to the part over which Nordea has been assessed to have sufficient control. Amortisation is made over 10 years.

For more information on the financial performance of Orgresbank, see the section covering "Corporate and Institutional Banking" in this Interim Report.
