- Press release : “Arkema sells its Urea Formaldehyde Resins business to Hexion”

Paris, May 24<sup>th</sup> 2007

## **Arkema announces twofold increase of its production capacities for Platamid<sup>®</sup> copolyamide powders in China**

**Arkema is to double production capacities for Platamid<sup>®</sup> copolyamide powders at its Nanhui site, China, effective September 2007.**

Lando Ferretti, Group President of the Technical Polymers business unit, explains: "For over a decade now Arkema has been a key player in the Chinese specialty copolyamide powder market. Over this period, the textile interlining sector has evolved considerably, and we have ably assisted our historical customers, in Europe, the US, Korea and Japan, with their relocation to China. Today, the doubling of our capacities and the concentration of our production facilities on the modern and efficient Nanhui site in China are a concrete sign of our commitment to serving our customers over the long term. This substantial investment strengthens our world-leading position in the textile interlining market".

*With global brands like Rilsan<sup>®</sup>, Pebax<sup>®</sup> and Kynar<sup>®</sup>, unique products like Rilsan<sup>®</sup> PA 11, and leading capacities in Rilsan<sup>®</sup> PA 11 and PA 12, Arkema offers its customers global coverage with superior technical and logistics support from its production facilities and research centers in Europe, Asia, and the USA.*

*A global chemical player, Arkema consists of 3 coherent and related business segments: Vinyl Products, Industrial Chemicals, and Performance Products. Present in over 40 countries with 17,000 employees, Arkema achieves sales of 5.7 billion euros. With its 6 research centers in France, the United States and Japan, and internationally recognized brands, Arkema holds leadership positions in its principal markets.*

## Arkema sells its Urea Formaldehyde Resins business to Hexion

**Arkema announces the sale to the company Hexion Specialty Chemicals of its Urea Formaldehyde Resins business, based on the Leuna site in Germany. The sale of this activity, which reports annual sales close to € 100 M, falls in line with Arkema's strategy for a selective management on its asset portfolio.**

Announced in September 2006, the proposed sale of Arkema's Urea Formaldehyde Resins business has today been confirmed by the signing of an agreement with the American company Hexion, world leader in thermoset resins. The deal, which should come into force in the third quarter of 2007, is subject to approval by antitrust authorities.

The Urea Formaldehyde Resins business, solely based on the Leuna site, Germany, following the closure of the French production unit based at Villers-Saint-Paul (France), offered very little synergy with Arkema's other activities.

Urea Formaldehyde Resins are used in particular as binders for particle board and chipboard, and in paper impregnation for the manufacture of laminated board.

This transaction is part of Arkema's transformation process initiated at the time of its creation, and represents a new step in its portfolio management, after the sale at the beginning of the year of its agrochemicals business unit Cerexagri, and the announcement early May of the sale of its Specialty Amines activity produced in Riverview in North America.

*Headquartered in Columbus, Ohio, Hexion Specialty Chemicals is the world leader in thermoset resins. With a wide range of specialty products and technologies, Hexion serves the global wood and industrial sectors. With over 7,000 employees, Hexion reported sales of \$ 5.2 M in 2006. [www.hexion.com](http://www.hexion.com)*

*A global chemical player, Arkema consists of 3 coherent and related business segments: Vinyl Products, Industrial Chemicals, and Performance Products. Present in over 40 countries with 17,000 employees, Arkema achieves sales of 5.7 billion euros. With its 6 research centers in France, the United States and Japan, and internationally recognized brands, Arkema holds leadership positions in its principal markets.*
