Third parties' liabilities relating to backing, including pledge or guarantee, provided by the Company in 2002-2006 and 1Q2007: ***none***

2.3.4. The issuer's other liabilities.

The Company has no such agreements (including forward transactions) not shown on its balance sheet, which may significantly affect the financial position of the Company, its liquidity, sources of funds and terms of their use, performance results and expenses in 2002-2006 and 1Q2007.

2.4. Objectives of the issues and information on the use of funds raised through placement of issuing securities.

The Company did not place any securities from the beginning of 2002 till the end of the reporting quarter.

2.5. Risks related to acquisition of placed issuing securities or those being placed.

2.5.1. Industry risks.

In the course of its business, the Company incurs a number of industry risks, including hydrocarbon prices, industry competition, and technological risks related to specific features of the production process.

World and domestic oil prices remain the most important factor affecting the Company's financial and economic performance.

The major factors shaping world hydrocarbon prices are:

- the rate of economic development of the largest oil consuming countries;***
- global and regional demand and supply balance;***
- geopolitical situation in oil producing regions;***

- weather conditions in oil and petroleum products consuming countries;
- price for and availability of alternative energy sources.

Domestic oil and petroleum products prices are subject to the following:

- transport infrastructure development;
- diversification of export deliveries to new markets;
- taxation and export regulations.

Factors which determine prices for energy resources are beyond the Company's control. If the price trends change, the Company is in a position to redirect commodity flows, reassess its investment projects, and reduce costs.

The Company is competing with other oil companies to obtain field development and production licenses, acquire assets, and gain access to the pipeline system and refining capacities.

Prospecting, field development, oil and gas transportation, processing, and sales are a complex and capital-intensive process fraught with technological and environmental risks. The Company minimizes technological risks by strictly adhering to industry requirements and standards and introducing new technology at all stages of the production process.

2.5.2. Country and regional risks.

The Company's country and regional risks include political, economic, and social risks existing in Russia.

The stable social and political situation and better economic conditions in Russia mitigate the effects of country risks on the Company's operations.

The Company operates in 16 constituent territories of the Russian Federation in Western and Eastern Siberia, the central and northwestern parts of the country. Although these territories are not prone to natural disasters, the Company's oil production operations are concentrated in harsh climate which may affect the Company's general performance.

2.5.3. Financial risks.

The Company is engaged in foreign economic activity and earns a significant part of its income from export of crude oil and refined products to foreign markets. Since export contracts typically use the US Dollar as the main currency for payments, any changes in the national currency/USD rate may substantially influence the Company's financial performance.

Interest rate risks have less impact on the Company's operations owing to its strong financial position, absence of heavy debts, and availability of cash assets necessary to carry out strategic projects. However, changes in interest rates related to the reevaluation of country risks may entail changes in the Company's requirements for investment project returns.

An essential part of the Company's spending depends on the general price level in Russia, in particular, tariffs of natural monopolies, prices for raw materials, supplies, machines and equipment, and is subject to the risk of rising inflation.

The Company does not hedge financial risks but takes into account their impact on its operating and financial activities when developing investment projects, financial plans and budgets.

2.5.4. Legal risks.

Changes in tax legislation and subsurface use requirements, exchange control mechanisms, customs regulations and tariffs, licensing requirements for the Company's core activities or for rights to use objects limited in commerce (including natural resources) may affect the Company's operations.

2.5.5. Risks related to the issuer's operations.

Key risks that may deeply affect the Company's operations include oil price trends on global and domestic markets, transport infrastructure development in the Russian Federation, higher natural monopoly tariffs and prices for engineering and metallurgical products, and more stringent tax regime.

2.5.6. Bank risks.

The Company is not exposed to such risks as it is not a lending institution.

In carrying out its activities, the Company seeks to fulfill its obligations and minimize the impact of risks.

The period when the issuer ceases to exist: **indefinite.**

Summary of the issuer's establishment and development: **The name of oil and gas producing company "Surgutneftegas" goes hand in hand with the discovery of Big Oil in Western Siberia.**

Back in March 1964, the first group of oilmen set foot on Surgut ground. Local climate and terrain did not let people lay out roads, drill wells and

construct pipelines and field facilities in a conventional way. In fact, the oil producing division "Surgutneft" was a real testing ground where various technologies and methods were created and applied to develop fields in severe geological and climatic conditions. The division proved to be a true forge of skilled workers for the whole Western Siberia. Many oil and gas producing companies, such as Yuganskneft, Megionneft, Pravdinskneft, Kogalymneftegas, and Noyabrskneftegas, were once part of Surgutneft and later became separate entities.

Construction of the refinery in the city of Kirishi, Leningradskaya Oblast, began in 1961. As was the common practice of that time, the refinery was an All-Union Top Priority Project, and it indeed was built at a rapid pace: as early as December 1965, the refinery received the first oil tank car, and just four months later, in March 1966, it became fully operational. After it was commissioned, the refinery helped reverse oil products shortage, which hindered economic development of the northwestern region. When the Yaroslavl – Kirishi pipeline was put into service in 1969, the refinery started to process oil delivered from Western Siberia fields. Located close to the Baltic ports, it benefited from exporting oil products to Scandinavia and Northern Europe.

In October 1977, the oil producing division "Surgutneft" was granted the status of the diversified production association "Surgutneftegas" (PO "Surgutneftegas").

On March 19, 1993, the Council of Ministers of the Russian Federation passed a resolution to form Open Joint Stock Company "Neftyanaya Kompaniya "Surgutneftegas" (AOOT "NK "Surgutneftegas"). In the same year, PO "Surgutneftegas" transformed into AOOT "Surgutneftegas" and the Kirishi refinery transformed into AOOT "KNOS" were merged into Open Joint Stock Company "NK "Surgutneftegas".

Under the Soviet system, the Company's subsidiaries, namely Novgorodnefteprodukt, Kaliningradnefteprodukt, Lennefteprodukt, Pskovnefteprodukt, and Tvernefteprodukt, were part of RSFSR Glavneftesnab (Main Department of Oil Supplies) and supplied the corresponding regions with petroleum products. In 1993, they were also converted into open joint stock companies and incorporated in AOOT "NK "Surgutneftegas".

1996 saw the first stage of corporate structure optimization when AOOT "NK "Surgutneftegas" was formed as a vertically integrated company.

In 1997, the Company launched American Depositary Receipt 1 Level program for ordinary shares of OJSC "Surgutneftegas".

In 1998, it launched sponsored American Depositary Receipt 1 Level program for preferred shares of OJSC "Surgutneftegas".

In 2000, the Company embarked on the final stage of share consolidation, which made the oil producing entity OJSC "Surgutneftegas" a parent company of Surgutneftegas Group.

4.5. Oil industry trend analysis.

Oil and gas industry performance results for the last 5 years (2002-2006) demonstrate high growth rate of hydrocarbon production, refinery segment development and sales market expansion.

The main drivers behind the development of Russian oil and gas industry were favorable price environment of oil and oil products markets and high demand for hydrocarbon materials.

Russian oil output grew in 2002-2006 by 26% to 480 mn tons with the Russian share increased from 10.7% to 11.6%. The main factors for higher oil output are new fields put onstream, application of advanced technologies and production stimulation at current fields. But since 2005 the sector witnessed oil output decline: in 2002 the sector demonstrated 9.2% growth rate against moderate 2.2% in 2006.

Russian gas output grew in 2002-2006 by 10.2% and amounted to 656 bcm in 2006. Oil companies were the main contributors to increased gas output. Their share in Russian gas production for the period grew from 5.7% to 8.9% and gas output produced by these oil companies increased to 72%.

Russian refining segment demonstrates a tendency to increase the conversion depth and plants capacity through upgrading production facilities. In 2002-2006 oil refining output at Russian refineries grew by 18% with conversion rate increased by 1.7% which was encouraged by high demand for refined products.

Generally, the Russian oil and gas industry demonstrates the following tendencies: continued favorable price environment at external and domestic markets, oil output decline, higher gas output at integrated oil companies, increased output and depth of conversion at refineries.

In 2002-2006 Surgutneftegas was one of the leaders of the Russian oil industry. The Company increased crude oil production by 33%, gas production – by 10%, oil refining output – by 36% and gas – by 89%.

Surgutneftegas accounted for 13.6% of the total Russian oil production, 2.2% of the country's gas production and 9.2% of oil refining.

Oil output in 2006 amounted to 65.6 mn tons, gas production – 14.6 bcm and oil refining – 20.2 mn tons.

The Company leads the sector in terms of prospecting works and development drilling

4.5.1. Analysis of the factors influencing the Issuer's activity

In 1Q2007 the Company's business was mainly influenced by worse oil and oil products price environment with a continued demand for hydrocarbon materials and higher tariffs of natural monopolies.

In 1Q2007 the Company produced 16.051 mn tons of oil which equals the oil output for the same period last year, gas production amounted to 3.546 bcm and gas processing in the reporting quarter – 1,806.8 mn cub meters.

4.5.2. The Issuer's competitors

The main Company's competitors are major Russian oil companies such as LUKOIL, Rosneft, TNK-BP, Gazprom, Slavneft and Tatneft which are engaged in oil and gas production, oil, gas and oil products sales

Key competitive strengths of the Company in hydrocarbon production include sound resource base in Western and Eastern Siberia and availability

of advanced equipment and technologies for oil production which ensure production of hard to recover deposits and enhanced oil recovery at fields.

Key competitive strength of the Company's refining segment include close proximity to the sea ports and marketing outlets which ensure efficient oil products supply.

The Company has developed a full production cycle of production, utilization and processing of associated petroleum gas which contributes to efficient use of gas resources and is one of the Company's competitive strength.

The Company's Auditing Committee is established to supervise the Company's financial and business activities. The Company's Auditing Committee consists of three members elected by a general shareholders' meeting out of shareholders or their proxies. Shares owned by members of the Board of Directors and the Company's Director General cannot vote to elect members of the Auditing Committee. A member of the Auditing Committee cannot be a member of the Board of Directors; neither can she/he hold a post of the Company's Director General.

Once a financial year is over, the Auditing Committee conducts an annual audit (inspection) of the Company's activities. An unscheduled audit (inspection) is conducted by the Committee at any time on its own initiative, in compliance with the resolution adopted by a general shareholders' meeting, at a shareholder's (shareholders') request in writing, provided the shareholder (shareholders) own(s) an aggregate of at least 10% of the Company's voting shares, or in accordance with the resolution passed by the Board of Directors. As requested by the Auditing Committee, the Company's

officers must timely provide the Auditing Committee with all necessary information and documents on the Company's financial and business activities. Based on its findings, the Auditing Committee prepares a report.

The Auditing Committee is entitled to require an extraordinary general shareholders' meeting to be convened, following the procedure stipulated by the Company's Charter.

To have annual financial statements audited and confirmed, the Company annually hires a professional auditor who does not share any property interests with the Company or with its shareholders.

The Company's auditor is approved by a general shareholders' meeting. The auditor's service payment is determined by the Company's Board of Directors.

An audit of the Company's activities must be conducted at any time at a shareholder's (shareholders') request in writing, provided the shareholder (shareholders) own(s) an aggregate of at least 10% of the Company's placed shares.

“Information on Accounting Policy of OJSC “Surgutneftegas” for 2007 for Accounting Purposes”

1. The Accounting Policy of the Company has been formed in compliance with the legislation, accounting standards, regulatory legal acts and regulatory documents of the Russian Federation.

2. The Company's priority objectives of business accounting are as follows:

to form complete and reliable information on the Company's activity and its property status, which is necessary for external and internal users of accounting reports;

to provide the information required for monitoring the use of material, labor and financial resources in compliance with the approved regulations and estimates;

to prevent negative results of economic activity and to find internal reserves to maintain financial stability;

to coordinate the transfer of expenses, works, services and inventory holdings between business units;

to ensure higher efficiency of accounting information on revenues and expenses of the Company in terms of different activities and business units.

3. Fixed Assets Accounting:

Asset is recorded as fixed assets if the following requirements are met:

item is meant to be used to manufacture products, perform works or render services, based on management requirements and for the purpose of letting on lease at a charge for temporary possession or use or temporary use;

item is meant to be used within a long period of time i.e. over 12 months or during an ordinary operating cycle if the latter exceeds 12 months;

further resale of the item is not planned;

item is able to bring economic income (profit) in future.

The assets meeting the requirements of being accepted as fixed assets of value under RUR 10000 per unit excluding measured fixed assets, real estate properties and fixed assets items with consumer properties unchanged with time (land lots, natural management facilities, items considered as museum piece and museum collection and etc.) are recorded as part of inventories.

Real estate property is recorded as fixed assets based on delivery-acceptance act of fixed assets approved by an executive in accordance with All-Russia Classifier of Capital Assets and order of maintaining the list of the Company's fixed assets.

Real estate property actually being in service after finished capital investments is recorded as fixed assets on the day of submitting documents for state registration of proprietary rights. Movable items are recorded as fixed assets as and when ready for operation.

Fixed assets let on lease for temporary possession or use or temporary use with a view to gain profit are recorded as income-bearing placements into tangible assets since 01.01.2006 (account 03).

If one item has several parts relating to different depreciation groups subject to fixed assets lists approved by Enactment No. 1 of the RF Government "On classification of fixed assets list included in depreciation groups" of January 1, 2002, each part is recorded as a separate inventory item.

Historical cost of fixed assets remains invariable except for the following cases: revaluation (conducted annually as of January 1 of the reporting year) of fixed assets by an independent appraiser in accordance with documented market prices; completion; reconstruction; modernization; installation of auxiliary equipment; partial liquidation.

Historical cost of fixed assets is redeemed through depreciation under the straight-line method in conformity with depreciation rates.

4. Intangible Assets Accounting:

The cost of intangible assets is redeemed through depreciation under the straight-line method within the fixed period of their useful life. If it is impossible to determine the useful life of intangible assets, depreciation rates are deemed to be 20 years.

5. Inventory Accounting:

Purchased inventories (except for goods) are recorded on the basis of their book prices equal to actual expenses known at the moment when they are entered into the accounting records. Goods are recorded on the basis of supplier's prices.

Expenses connected with paid inventories the title on which has not been transferred according to concluded agreement are shown in the debit side of the accounts.

Inventories (except for goods) are written off to production or otherwise retired at their average cost of production. Goods and materials/assets of value under RUR 10,000 are retired at their single cost.

6. Financial Investments Accounting:

Financial investments are entered in the accounting records pursuant to the law in force.

Financial investments with current market value that may be determined are shown in the accounting records as of the end of a reporting year at their current market value. The difference between the assessment of financial investments at their current market value as of the end of a reporting year and the previous assessment of financial investments for accounting purposes are attributed to financial results as part of other revenues or expenses.

When financial investments with current market value that can not be determined are retired, their value is determined on the basis of the historical cost of each unit of financial investments accounting.

7. Formation and Use of Reserves:

An adequate reserve is formed for vacation payments to be evenly included in deferred expenses accounting. The balance at the end of a reporting year is adjusted in line with the inventory results.

8. Deferred Expenses Accounting:

Expenses incurred within the current month but relating to the future periods are shown in Account 97 "Deferred Expenses" and included in the cost of the goods (works, services) of the corresponding reporting period.

9. Definition of Sales Proceeds:

For accounting purposes proceeds from sales of products, works, services, goods and property of the Company to other organizations and natural persons are recognized provided that the requirements stipulated by Item 12 of the Accounting Regulations "Income of an Enterprise" PBU 9/99 are met. If mandatory requirements are not met, to recognize the sales, the shipped products are shown in Account 45 "Goods Shipped".

10. Borrowings and Loans Accounting:
