SULTAN MINERALS CONTRACTS CABO DRILLING CORP. TO DRILL JERSEY-EMERALD PROPERTY

Sultan Minerals Inc. (TSX Venture – **SUL**) (“Sultan” or the “Company”) is pleased to report that it has awarded Cabo Drilling Corp.’s (TSX Venture – **CBE**) Advanced Drilling Ltd. division an underground drilling contract to drill up to 14,000 feet of NQ-2 core at Sultan’s Jersey-Emerald Property near Salmo, B.C. The drill program is to commence in early February 2007.

The Jersey-Emerald property is host to the historic Jersey Lead-Zinc Mine, British Columbia’s second largest lead-zinc producer and the former Emerald Tungsten Mine, Canada’s second largest tungsten mine. Year-round gravel roads and power lines cross the property and water is plentiful. Underground workings of the historic Jersey and Dodger deposits are in excellent condition allowing for future underground access with little rehabilitation.

The underground diamond drill program will focus on testing the East Dodger Tungsten and Molybdenum Zones as recommended in the recently completed, 43-101 compliant, initial resource calculations filed in November 2006. The resource evaluation reported on November 8, 2007, shows that at a cut-off grade of 0.15% WO₃, there is a measured plus indicated tungsten resource of 2,510,000 tons averaging 0.37% WO₃ with an additional inferred resource of 1,210,000 tons averaging 0.40% WO₃. The resource evaluation also reported an inferred resource of 481,000 tons averaging 0.103% Mo in the recently discovered Dodger Molybdenum zone. The study shows there is potential to significantly expand both the tungsten and molybdenum resources with exploration in both the historically mined areas and the surrounding terrain.

Drilling will be carried out from the historic Jersey Lead-Zinc Mine workings in order to intersect the underlying tungsten and molybdenum bearing horizons.

Mr. Ed Lawrence, P.Eng., former Manager of the Jersey and Emerald Mines, is managing the exploration drill program. Perry Grunenberg, P.Geo., of PBG Geoscience of Kamloops, B.C., is Sultan’s project supervisor and “Qualified Person” for the purpose of National Instrument 43-101, “Standards of Disclosure for Mineral Projects.”

**Arthur G. Troup, P.Eng., Geological
President and CEO**
