1. BUSINESS PERFORMANCE AND FINANCIAL POSITION

(1) Analysis of Business Performance

[Business Performance in the Subject Fiscal Year]

The Japanese economy continued its recovery during the subject fiscal year against a background of expanding corporate profits, increasing capital investment, and a continuing improvement in the employment situation. On the other hand, the advertising market, despite such major sports events as the 2006 FIFA World Cup in the first half of the subject fiscal year, was stagnant overall due to the impact of a number of negative factors, including the lack of big events on the scale of the Turin Olympics held in the previous fiscal year, no apparent positive sentiment in the personal consumption sector, and voluntary restraints on advertising placements by consumer finance companies.

In this environment, Fuji Television again received a "quadruple crown" in viewer ratings for the subject fiscal year, with viewer support allowing it to capture the top spots in the golden time (19:00-22:00), prime time (19:00-23:00), all day (06:00-24:00), and non-prime time (06:00-19:00 and 23:00-24:00) slots. Retaining this leading position for the third consecutive year has provided the underlying support for Fuji Television's business performance. Nonetheless, Fuji Television's consolidated net sales in the subject fiscal year fell 1.8% to ¥582,660 million due to the fact that television broadcasting revenue, the major source of income for the company, did not reach the level of the previous fiscal year, in which it had posted a new record for sales.

Operating income also decreased 16.6% to ¥42,325 million. Although it increased in Program Production and Related Business due to efficient spending there, it declined in the Broadcasting Businesses. Direct Marketing Business and Other Businesses also saw poor results. Recurring profit fell 8.6% to ¥45,995 million despite an increase in non-operating income that included equity in earnings of unconsolidated subsidiaries and affiliates and an increase in dividend income, as declines in new stock issuance expenses and corporate bond issuance expenses were also recorded.

On the other hand, net income for the subject fiscal year rose 119% to ¥24,846 million, boosted by a huge fall in extraordinary losses resulting from a backlash to the huge losses on the sale of investment securities posted in the previous fiscal year.

Results by operating segment are as follows.

	Net sales			Operating income		
	2006	2007	Change	2006	2007	Change
	Millions of yen	Millions of yen	%	Millions of yen	Millions of yen	%
Broadcasting	410,003	402,789	(1.8)	40,936	36,205	(11.6)
Program Production and Related Business	53,207	52,494	(1.3)	3,230	3,702	14.6
Direct Marketing	69,739	67,321	(3.5)	1,279	(1,664)	—
Video and Music	73,566	74,330	1.0	3,956	3,561	(10.0)
Other	60,096	59,116	(1.6)	2,128	729	(65.7)
Eliminated	(73,120)	(73,392)	—	(807)	(208)	—
Total	593,493	582,660	(1.8)	50,724	42,325	(16.6)

Broadcasting

The Broadcasting segment represents the earnings of Fuji Television and Nippon Broadcasting, and it includes the Television Broadcasting business and the Radio Broadcasting business.

Sales in the Television Broadcasting business fell 1.0% from the previous fiscal year, to ¥377,875 million.

Television broadcasting revenue, the main component of the Television Broadcasting business, fell overall by 1.0% from the previous fiscal year to ¥293,728 million. Although the continued strong performance of Fuji Television's viewer ratings enabled the company to ensure time advertising sales (program sponsorship sales) at about the same level as in the last period, there was a fall in spot advertising sales (sales of commercials that are unrelated to sponsorship and are mainly broadcast before and after programs), which are comparatively susceptible to the impact of advertising market conditions, as they suffered a backlash from the strong results of the same period in the previous fiscal year.

Looking at network time advertising sales, the time advertising sales for nationwide broadcasts, regular program sales were lower in the October new programming season than they had been in the same period in the previous fiscal year but they were still higher over the entire fiscal year because there were fewer cancellations of regular programming in order to schedule one-off programming. In general, one-off programming can be sold at a higher rate than regular programming and this fiscal year featured broadcasts of the 2006 FIFA World Cup Germany in June and July, the 2006 Women's World Volleyball Grand Prix in August and September, and the World Figure Skating Championships 2007 in Tokyo in March, among others. Nonetheless, one-off programming sales were lower than in the previous fiscal year due to the large decline in sales after the end of the Turin Olympics 2006, and also due to a 50% decline in the number of evening baseball games broadcast. As a result, sales in the subject fiscal year decreased to ¥134,830 million, 0.2% lower than in the previous fiscal year.

Looking at local time advertising sales for broadcasts to the Kanto region, regular program sales performed strongly and one-off programming proposed by sponsors also increased. Due to these and other factors, sales in the subject fiscal year rose to ¥22,836 million, 1.2% higher than in the previous fiscal year.

Spot advertising sales were lower in every month of the first half of the fiscal year than in the same month in the previous fiscal year, reflecting the stagnant advertising market. The second half of the year saw the spot market regain its vigor in December and a new record for single-month sales posted in February, and we were able to achieve a better result for the second half overall than in the second half of the previous fiscal year. However, this was not enough to compensate for the decline in the first half, so there was a fall in sales over the entire fiscal year. By industry type, the value of advertising placements increased for companies in such industries as beverages (both alcoholic and non-alcoholic); communications, which performed strongly due to the introduction of the number portability system; business, precision, and optical devices, such as digital cameras, mobiles, etc.; games, which grew solidly thanks to the introduction of next-generation games consoles and related software; and informational entertainment, an industry being driven by the growth in movie revenue. However, this was not enough to make up for the large fall in advertising sales to companies in the finance industry, which saw voluntary restraints on advertising placements implemented by consumer finance companies; and to distribution and retail companies. As a result, sales in the subject fiscal year decreased to ¥136,062 million, 2.1% lower than in the previous fiscal year.

Looking at revenue from our other broadcasting businesses, sales increased to ¥30,875 million, 1.7% higher than in the previous fiscal year. This was the result of strong growth in subscription revenues from our CS broadcasting services and revenue from program sales which exceeded that of the previous fiscal year.

Revenues from other operations in the Television Broadcasting business increased. In the rights business, DVD sales of the *Dragonball Series* remained strong, we produced a large number of hits in the anime, variety, and drama genres, and sales of program spinoff products were also good. In the movie business, "*Limit of Love*," (released on May 7, 2006) was a major hit, becoming the number one movie in the Japanese live action category in 2006. Nonetheless, overall results were not as good as in the highly successful previous fiscal year and revenue declined. In the event business, a production of Cirque du Soleil's *Dralion* commenced a nationwide tour with a performance in Tokyo in February, and has made a successful start, but revenue over the entire fiscal year was down due to the lack of anything to equal the popularity of last year's *Alegria 2*. As a result, revenues from other operations declined to ¥53,271 million, 2.4% lower than in the previous fiscal year.

On the other hand, in terms of expenses, although there was a decline in agency fees, costs in the Broadcasting business increased due to greater depreciation, and costs in Other Operations also increased. As a result, operating expenses in the Television Broadcasting business were higher than in the previous fiscal year.

Looking at broadcasting revenues from the Radio Broadcasting business, sales came to ¥12,855 million, with both time revenue and spot revenue lower than in the previous fiscal year. Production revenue declined in the event business due to our renewed focus on profitability from the subject fiscal year, with sales coming to ¥11,428 million. For the overall Radio Broadcasting business, which includes revenues from program sales, sales decreased to ¥24,947 million, 12.3% lower than in the previous fiscal year. On

the other hand, in terms of expenses, operating expenses declined more than revenue decline due to factors such as the reduction in costs resulting from the revenue decline and the decrease in depreciation.

As a result, sales in the Broadcasting segment fell 1.8% from the previous fiscal year to ¥402,789 million, while operating income was down 11.6% to ¥36,205 million.

Sales by Broadcasting Operations

Years ended March 31

(Figures less than ¥1 million have been omitted.)

	2006	2007	Change from the previous term
Television broadcasting			
Broadcasting operations	326,981	324,604	(0.7)
Broadcasting	296,611	293,728	(1.0)
Network time	135,107	134,830	(0.2)

Radio broadcasting	28,461	24,947	(12.3)
Elimination in the segment	(22)	(33)	—
Total	410,003	402,789	(1.8)

Program Production and Related Business

This segment consists of subsidiaries involved in program production, engineering, set design, and other activities. Although each of our subsidiaries endeavored to increase sales from events and other areas not related to programs and to open up new business relationships with companies outside the Fuji Television Group, it was more difficult to get orders than in the previous fiscal year. As a result, sales in this segment fell 1.3% to ¥52,494 million. Operating income, however, rose 14.6% to ¥3,702 million due to efforts to lower costs.

Direct Marketing

The Direct Marketing segment mainly represents the earnings of Dinos, Inc., which also bought out Fuji Culture Planning, Inc. on October 1, 2006. In the direct marketing industry, specialized TV shopping channels and Internet shopping are currently performing well and Dinos saw 19.3% growth in its sales through the Internet, but both catalogue sales and television sales performed poorly so sales in the Direct Marketing segment decreased to ¥67,321 million, 3.5% lower than in the previous fiscal year. Meanwhile, looking at operating profit and loss, although the cost to sales ratio improved, we posted an operating loss of ¥1,664 million due to the impact of the reduced sales and also due to an increase in direct marketing expenses, including the temporary costs incurred in setting up the new distribution center.

Video and Music:

Although there are many issues to be resolved in the music industry, including the creation of illegal copies of music using file-swapping software and the illegal distribution of music among mobile phones, etc., the music industry overall is beginning to show signs of recovery. In the Video and Music segment, revenue from fees for use of copyright of the music published by Fujipacific Music Inc. performed well. The reasons for this good performance included hits by Daniel Powter and others in the Western music segment, and continued growth in sales of anime and drama DVDs in the Japanese music segment. In addition, sales of Pony Canyon, Inc. DVDs including *Dragonball Z*, *Limit of Love*, *The Suspect: Muroi Shinji*, etc., are strong. As a result, sales rose to ¥74,330 million, 1.0% higher than in the previous fiscal year. Operating income was ¥3,561 million, down 10.0% from the previous fiscal year, despite our efforts to keep down production costs.

Other

In the Other segment, both sales and profits fell at Fujimic, Inc. as orders for software development hit a cyclical trough. Sales of books at Fusosha Publishing, Inc. were given a boost by Lily Franky's book *Tokyo Tower*, but the company did not produce any other hit products and neither advertising revenues from or sales of magazines showed any growth, so the company posted an operating loss. As a result, sales in this segment decreased to ¥59,116 million, 1.6% lower than in the previous fiscal year, and operating income was ¥729 million, 65.7% lower than in the previous fiscal year.

Equity-Method Affiliates

Among equity-method affiliates, Fuji Satellite Broadcasting, Inc. (BS Fuji, Inc.), now in its sixth year of operation, achieved a good performance, posting an increase in sales of 17.9% from the previous fiscal year as the number of households now able to view BS digital broadcasts topped 20 million in December 2006, and posting its first operating profit for an entire fiscal year since its establishment. Sankei Building Co., Ltd. also recorded an improved performance. Due to these results, equity in earnings of affiliated companies (net of dividends) increased to ¥2,536 million, 93.3% higher than in the previous fiscal year.

[Outlook for the Fiscal Year Ending March 31, 2008]

Although listed companies generally posted strong results in their financial statements for the fiscal year ended March 31, 2007, the impact of foreign exchange and financial markets and other aspects of the external environment combined with the spike in crude oil prices preclude excessive optimism for the future.

On the other hand, advertising expenditures in the four major media are expected to grow 1.1% year on year in 2007, better than the 0.6% growth in 2006 (source: *Advertising Expenditures in Japan*, Dentsu Inc.), on the back of such positive factors as expectations for stable expansion in the Japanese economy in 2007 underpinned by a recovery in personal consumption, and a continued increase in advertising placements in a wide range of industries.

Given this economic environment, Fuji Television is continuing to advance its reorganization of its

corporate group, and is endeavoring to select and focus its management resources so as to ensure synergistic benefits are realized throughout the company even more than before.

Firstly, regarding the non-consolidated outlook, broadcasting revenues, the major source of income for the company, are faced with many unpredictable elements including the long-term rise in crude oil prices, etc., but we have high hopes of the overall positive sentiment and recovery of personal consumption in the economy and are forecasting that broadcasting revenues will be slightly higher than in the previous period. Furthermore, we expect that non-advertising revenue, including from movie, video, and events, will remain at about the same level as in the previous fiscal year overall. On the other hand, costs are expected to increase along with the holding of the Volleyball World Cup, a major event held only once every four years, and we have also budgeted for an increase in depreciation and management expenses resulting from commencing operation of the Rinkai Fukutoshin Studios (provisional name). So for the entire fiscal year we anticipate a slight increase in sales and a decline in profits.

Secondly, regarding the consolidated outlook, we are budgeting for a slight increase in the revenue of the non-consolidated Fuji Television (the parent company) and an increase in revenue generated by the integration of the four advertising companies that we are preparing to carry out in second half of the fiscal year as a part of the group reorganization. All of the companies in the group are working to control costs and are on the recovery path, with Video and Music expected to increase profits and Direct Marketing expected to go into the black, but for the entire fiscal year we anticipate a slight increase in sales and a decline in profits, the same as for the non-consolidated result.

As a result, the non-consolidated outlook for the next fiscal year is net sales of ¥378.7 billion, operating income of ¥26.5 billion, recurring profit of ¥28.6 billion, and net income for the subject fiscal year of ¥16.6 billion; and the consolidated outlook is net sales of ¥586.0 billion, operating income of ¥34.1 billion, recurring profit of ¥37.3 billion, and net income for the subject fiscal year of ¥21.0 billion.

(2) Financial Condition

Total assets at the end of the subject fiscal year amounted to ¥731,496 million, an increase of ¥39,138 million from March 31, 2006.

Total current assets amounted to ¥283,029 million, an increase of ¥21,997 million from the end of fiscal 2006. This was mainly due to an increase in marketable securities. Total fixed assets increased by ¥17,158 million from the end of fiscal 2006, reaching ¥448,467 million. Tangible fixed assets, despite such increases as payments of construction fees for Rinkai Fukutoshin Studios (provisional name), declined due to a softening of the market valuation differences of our investments in securities.

Total liabilities amounted to ¥261,909 million, an increase of ¥41,376 million from the end of fiscal 2006. This was due mainly to an increase in accrued income taxes and an increase in other current liabilities, including accounts payable and other items.

Net assets amounted to ¥469,586 million, and there was also a decline in valuation differences on marketable securities. Fuji Television also retired ¥145,346 million in treasury stock in May 2006.

Cash flows during the subject fiscal year were as follows.

Cash flows from operating activities amounted to revenue of ¥60,718 million, ¥14,931 million higher than in the previous fiscal year. This was due mainly to reimbursement of income taxes paid in the previous fiscal year.

Cash flows from investment activities amounted to an expenditure of ¥18,206 million, ¥51,542 million less expenditure than in the previous fiscal year. This was due mainly to a decline in expenditure for the acquisition of investment securities and a tender offer by a consolidated subsidiary in fiscal 2006 to repurchase its own shares.

Cash flows from financing activities amounted to expenditure of ¥9,013 million, ¥19,628 million less expenditure than in the previous fiscal year. This was due mainly to a decrease in outflows for repayment of long-term debt. As a result, the balance of cash and cash equivalents at the end of the subject fiscal year amounted to ¥104,324 million, an increase of ¥33,160 million from the end of fiscal 2006.

Trends in cash flow indices are shown below:

Years ended March 31

	2004	2005	2006	2007
Equity ratio (%)	80.2	70.3	66.9	63.3
Equity ratio, based on market value (%)	116.5	87.3	97.8	86.0
Number of years for amortization (years)	0.1	0.1	1.3	1.0
Interest coverage ratio	356.6	362.8	174.7	57.0

Notes:

1. Equity ratio=total shareholders' equity/total assets
2. Equity ratio based on market value: Total market value of stocks/total assets
3. Number of years for amortization: interest-bearing debt/operating cash flows
4. Interest coverage ratio: operating cash flows/interest payments

*1. All indices are calculated on a consolidated basis.

*2. The total market value of stocks is calculated by multiplying market value at the balance sheet date by the number of shares issued by the balance sheet date.

*3. "Operating cash flows" refers to cash flows used in operating activities as shown in the consolidated balance sheets.

*4. "Interest-bearing debt" refers to all debts listed in the consolidated balance sheets on which the Company pays interest. "Interest payments" denotes interest payments as reflected in the consolidated cash flow statements.

(3) Basic Policies Concerning the Distribution of Company Profits and Dividends in the Subject and Next Fiscal Years

Fuji Television regards the disbursement of profits to shareholders as one of its most important management responsibilities. Under its management policy, the Company pays dividends commensurate with its performance, while aggressively investing in infrastructure and content, and entering new fields of business, in order to respond to changes in the broadcasting industry.

Regarding dividends from surplus, we aim for a standard of a non-consolidated dividend payout ratio of 50% and make decisions regarding the appropriate payment of the dividends for a specified accounting period based on a comprehensive review of the various elements related to the company's income during said period, the investments necessary to develop the business in the future, and other factors.

Based on these policies, we made the dividend payouts at the end of the subject fiscal year (the fiscal year ended March 31, 2007) ¥3,000 per share. This means that the full-year dividend payout came to ¥5,000 per share, including the ¥2,000 interim dividend (a non-consolidated dividend payout ratio of 48.2%). This issue will be on the agenda of the 66th ordinary general meeting of shareholders, scheduled to be held on June 28, 2007.

Furthermore, regarding the next fiscal year ending March 31, 2008, both the interim dividend payout and the year-end dividend payout are expected to be ¥1,800 per share, amounting to a full-year dividend payout of ¥3,600 per share (a non-consolidated dividend payout ratio of 49.9%).

2. ORGANIZATION OF THE FUJI TELEVISION NETWORK GROUP

Fuji Television, its subsidiaries, the Nippon Broadcasting System, Inc. and Pony Canyon, Inc., and its affiliate, Sankei Shimbun Co., Ltd, each have their own corporate groups composed of subsidiaries and affiliates and this constellation of companies is involved in a broad range of businesses that include activities in the fields of culture, entertainment, sports, news and the environment.

The Fuji Television Group is made up of the parent company (Fuji Television) and 55 subsidiaries and 37 affiliates, including Nippon Broadcasting System, Inc. and Pony Canyon, Inc. The companies' major activities are broadcasting, as prescribed by Japan's Broadcasting Law; planning, production, technology and transmissions involving programs for broadcast; direct marketing, and video and music. These companies also provide services related to each of these businesses.

The major business categories of the Fuji Television Network Group are shown below. Note that the categories are the same as the segments used for financial reporting purposes.

3. MANAGEMENT POLICIES

(1) Basic Policies

Fuji Television and the Fuji Television Group recognize the public mission and social responsibility inherent in broadcasting, and have adopted as their basic policy the production and distribution of programs, movies, events, and other high-quality content enjoyed by a wide range of viewers, together with the maximization of the value that is generated from such content.

The business environment of the Group has changed dramatically in recent years with the digitization of terrestrial broadcasts, the launch of digital broadcasts for mobile devices, and the spread of Broadcasting Satellite (BS) and Communication Satellite (CS) media, mobile media devices, and broadband Internet access. The Fuji Television Group, in order to respond readily to changes in the media environment and expand its profit-earning opportunities, has adopted the most effective "content factory" model to provide appealing and high-quality content for a diverse range of transmission routes, which has substantially boosted its content production capabilities. We are also working to restructure the Group and strengthen its management foundation.

As one of the leading companies in the Japanese media content industry, Fuji Television will continue to maximize the value generated from its content and enhance its competitiveness, as well as work to establish a stable management foundation that provides sustainable growth, and enhance its corporate value.

(2) Management Goals and Indices

The Company believes the setting of certain management goals to be meaningful. That said, we believe our operating environment will continue to experience significant changes over the near term, which may make it difficult to evaluate progress toward such goals using fixed management performance indicators. As a result, we attach great importance to the flexibility of our management, which must remain responsive to changes in our operating environment. In light of these considerations, we have not established specific numerical targets. However, by working to improve capital and asset efficiency and setting our liability and -capital structure appropriately, we aim to improve our management efficiency as measured by return on equity and return on assets. And by achieving an appropriate level of capital costs, we will work to boost shareholder and corporate value.

(3) Medium- to Long-Term Management Strategies and Issues to be Addressed

Fuji Television announced its medium-term business plan in November 2006. In this plan, Fuji Television Group declares that its priority management strategies are to further strengthen its content creation capabilities and to maximize its content value, in order to allow for a response to any changes in the media environment. Furthermore, the plan sets a target of consolidated recurring profit of ¥70 billion for FY2011, the year when the transition to terrestrial digital broadcasting is completed. We will achieve this target by practicing thorough cost management, strengthening and further developing existing businesses, and developing new businesses.

The most important part of these strategies is the construction of the Rinkai Fukutoshin Studios (provisional name), located near the Daiba head office building, completed in March 2007, and scheduled to go into full operation in September 2007. This new studio will concentrate in one location the production facilities that are currently spread around Tokyo, allowing for a unified content production system to be established in Daiba that includes all aspects of production, from the planning stage through recording and programming. The Fuji Television Group anticipates a significant increase in the creativity, operational efficiency and cost effectiveness of content production, and plans to make a strong push forward toward improving content quality, and the production of leading content. The Rinkai Fukutoshin Studios (provisional name) will be a true "content factory" that provides for concentration of the content creation capabilities of the Fuji Television Group, and which we also expect to become a symbol for the group on par with the Fuji Television building.

Terrestrial digital broadcasting commenced in December 2003, initially through low-power transmissions. Such transmissions were converted to full 10kW power in December 2005, and digital broadcasts at relay stations have also started, such that the present coverage has extended to over 90% of households in the Kanto region. As the plan is to end the current analog broadcasting format (termination of analog service) and complete the transition to terrestrial digital broadcasting by 2011, we are working to promote the dissemination of terrestrial digital broadcasting and are continuing efforts to make people aware of the upcoming termination of analog service.

In April 2006 Fuji Television launched a terrestrial digital broadcast service for mobile phones and other portable devices (referred to as "one-segment" broadcasts in Japanese). This service allows programs to be viewed anytime and anywhere within the terrestrial digital broadcast reception area, and as a new, independent media has the potential for expanded business opportunities in the future, such as the ability to receive emergency information during disasters, or programming-related information through data broadcasts. The Fuji Television Group plans to offer services linking the "one-segment" broadcasts already underway with mobile Internet access, as well as move ahead with the development of content specifically for broadcast to mobile devices.

In the creation of programming content, Fuji Television is equipping its studios to produce high-definition programming, and is working to raise the percentage of dramas, variety shows, and news and information programs that are offered in a high-definition format. We are also steadily expanding data transmissions linked in real time with programming, and are exploring new types of content creation combining television broadcasts, mobile media and the Internet.

Fuji Television utilizes the airwaves shared by all residents of Japan to operate a broadcast business, and with a deep awareness of the public mission and social responsibilities of such a business strives to contribute to the fulfillment and development of the lives of a broad range of citizens through its programming and business operations. In July 2006 Fuji Television made its CSR Promotion Office an independent division, and established a CSR Committee and CSR Committee Project Team in order to better incorporate the principles of corporate social responsibility in its operations. We are also continuing with efforts to establish a system of internal controls to ensure proper operational conduct, from the standpoint of transparency in management, and the sustaining and enhancement of fairness. We have also established a

Committee for Compliance and Risk Management headed by the president, and designated compliance officers for each workplace in order to ensure that compliance is fully observed.

In its terrestrial digital broadcasting operations Fuji Television makes proactive efforts to ensure stable growth of advertising revenue, strengthen and develop such media as Broadcasting Satellite (BS) and Communication Satellite (CS) broadcasting, and to link programming with the Internet, reinforcing a structure that provides for transmission of content produced by Fuji Television over a wide range of media, and expands earnings. We are also using television broadcasting as a base to actively pursue other businesses that generate non-advertising revenue, such as DVD package sales, character licensing and other rights businesses, a movie business, an event business, and a direct marketing business using a range of media, as we broaden our management foundation.

In April 2006, the Fuji Television Group transitioned to a consolidated management structure with Fuji Television as an operating holding company. In March 2007, the Company purchased the remaining stock in Fuji Television's subsidiaries Pony Canyon, Inc. and Fusosha Publishing, Inc. and made them wholly-owned subsidiaries, and also purchased additional stock in BS Fuji, Inc., an affiliate of Fuji Television. Furthermore, the Company concluded a basic agreement regarding a merger with Fuji Television subsidiaries Bigshot, Inc., Fuji Sankei Advertising Work, Inc., and T*Com Corporation, and Fuji Ad. Systems Corp., a joint venture company of six companies in the Fuyo Group and the Fuji Television Group. The agreement was signed by all the interested parties and lays out a roadmap to an eventual merger. We intend to continue to pursue a flexible program of selection and concentration of management resources with Fuji Television at the core, maximize the power and creativity of each group company, and develop as a highly competitive media corporate group. The integrated business development of the Fuji Television Group—unlike any other in the field—has been highly regarded for some time. Moving forward, to respond to the deep trust placed in us by shareholders and investors, we will further develop various businesses that maximize content value and earnings, ensure stable income so as to provide returns to shareholders and allow for future investments to readily respond to any and all changes in the business environment, and strengthen competitiveness to achieve sustained growth.

Total assets	563,333	30,205	23,360	52,514	30,435	699,849	(7,491)	692,357
Depreciation	14,523	660	480	949	1,970	18,584	(376)	18,208
Capital expenditures	23,893	588	619	475	2,097	27,674	(529)	27,144

Notes: 1. The segments adopted below are those used for internal control purposes.

2. Major operations, products, and services by segment

Business Segment	Major operations, products, and services
Broadcasting business	Sales of TV broadcasting time and programming
Program production and related business	Planning, production, engineering and relay operations as well as other businesses for TV programming
Direct marketing	Direct marketing and sales of fresh flowers
Video and Music	Production and sale of music and video software, management of music copyrights, etc.
Other	Temporary agency services, movables leasing, software development, publishing

3. Changes to segment classifications

Prior to the current fiscal year, Fuji Television's business segments were categorized into Television Broadcasting, Broadcasting-Related Business, Direct Marketing, and Other Businesses. From the interim period, these categories have been reorganized into Broadcasting, Program Production and Related Business, Direct Marketing, Video and Music, and Other.

This realignment reflects a review of the business categories included in our operating segments in line with the changes in the scope of consolidation resulting from Nippon Broadcasting becoming a subsidiary. In other words, we combined Fuji Television's television broadcasting business with Nippon Broadcasting's radio broadcasting business under the Broadcasting segment. In addition, we made Video and Music an independent segment, taking it out of the Other segment to reflect its increased importance now that Pony Canyon Inc. is a consolidated subsidiary.

As a result, compared with the same classifications in the previous fiscal year, sales and operating income increased respectively by ¥28,438 million and ¥1,079 million in the Broadcasting segment compared with the former Television Broadcasting segment. In addition, sales rose by ¥73,566 million and operating income by ¥3,956 million in the Video and Music segment, and sales declined by ¥95,779 million and operating income by ¥4,883 million in the Other segment.

The following table shows segment data assuming that the segment classifications used during the interim period ended September 30, 2005 were applied in the interim period ended September 30, 2004 and the fiscal year ended March 31, 2005.

	Millions of yen							
	Broadcasting	Program production and related business	Direct marketing	Video and music	Other	Total	Eliminations	Consolidated

Notes: 1. The segments adopted below are those used for internal control purposes.

2. Major operations, products, and services by segment

Business Segment	Major operations, products, and services
Broadcasting business	Sales of TV broadcasting time and programming
TV broadcasting-related business	Planning, production, engineering and relay operations as well as other businesses for TV programming
Direct marketing	Direct marketing and sales of fresh flowers
Video and Music	Production and sale of music and video software, management of music copyrights, etc.
Other	Temporary agency services, movables leasing, software development, publishing

3. As stated in the Significant Matters Regarding the Basis for Preparation of the Financial Statements, 4. Matters Concerning Accounting Standards, (4) Accounting Standards for Major Allowances, iii. Allowance for Directors' Bonus (change in accounting policy), from the subject fiscal year Fuji Television has applied the Accounting Standard for Directors' Bonus (Accounting Standards Board of Japan (ASBJ) Corporate Accounting Standard No. 4 of November 29, 2005).

As a result of this change, when compared to the former method, operating expenses during the subject fiscal year increased by ¥111 million in the Broadcasting segment, ¥136 million in the Program Production and Related Business segment, ¥105 million in the Video and Music segment, and ¥49 million in the Other Businesses segment, with operating income reduced in each segment accordingly.

4. As stated in Changes in Significant Matters Regarding the Basis for Preparation of the Financial Statements (Changes in Accounting Standards, etc., Pertaining to Corporate Integration), due to a revision to regulations concerning consolidated financial statements for the period, from the subject fiscal year, goodwill and negative goodwill or amortization of goodwill and negative goodwill will be accounted together. As a result of this change, when compared to the former method, operating expenses during the subject fiscal year increased by ¥497 million in the Broadcasting segment, ¥72 million in the Program Production and Related Business segment, ¥18 million in the Direct Marketing segment, ¥73 million in the Video and Music segment, and ¥9 million in the Other segment, with operating income reduced in each segment accordingly.

Furthermore, assets increased by ¥92 million in the Program Production and Related Business segment, ¥202

million in the Direct Marketing segment, ¥6,379 million in the Video and Music segment, and ¥599 million in the Other segment.

Notice of the Distribution of Retained Earnings

Notice is hereby given that Fuji Television Network, Incorporated (the "Company"), at the meeting of its Board of Directors held on May 15, 2007, adopted a resolution to distribute retained earnings with the record date therefor fixed on March 31, 2007, as described below:

Description

1. Details of dividends:

	Amount determined	Most recent forecast for dividends (publicized on November 16, 2006)	Dividends for the year ended March 31, 2006
Record date	March 31, 2007	Same as on the left	March 31, 2006
Dividend per share	¥3,000	¥2,000	¥2,000
Aggregate amount of dividends	¥6,909 million	-	¥4,606 million
Effective date	June 29, 2007	-	June 30, 2006
Source of dividends	Retained earnings	-	Retained earnings

2. Reason:

The Company regards the disbursement of profits to its shareholders as one of its most important management responsibilities. Under its management policy, the Company pays dividends commensurate with its performance, while aggressively investing in infrastructure and content and entering new fields of business in order to respond to changes in the broadcasting industry.

Regarding the distribution of retained earnings, the Company aims for a standard of a non-consolidated dividend payout ratio of 50% and makes decisions regarding the appropriate payment of dividends for a specified fiscal year based on a comprehensive review of various elements related to the Company's income during the said year, the investments necessary to develop the business in the future and other factors.

Based on this policy, the Company will pay dividends of ¥3,000 per share for the fiscal year ended March 31, 2007. This means that the annual dividends will amount to ¥5,000 per share, including ¥2,000 per share in interim dividends (non-consolidated dividend payout ratio: 48.2%). This issue will be on the agenda of the 66th Ordinary General Meeting of Shareholders to be held on June 28, 2007.

(For reference) Breakdown of the annual dividends

Record date	Dividend per share		
	Interim	Year-end	Annual
Year ended March 31, 2007	¥2,000	¥3,000	¥5,000
Year ended March 31, 2006	¥2,000	¥2,000	¥4,000
