Strong growth and record margins boost profit

- Double-digit growth continued in all regions.
 - 17% organic order growth.
 - 21st consecutive quarter with organic growth.
- Revenues reached MSEK 15 985 (12 444), organic growth 20%.
- Operating profit was MSEK 3 037 (2 337), a margin of 19.0% (18.8).
- Profit before tax increased 46% to MSEK 3 215 (2 200).
 - Capital gain of MSEK 134 related to divestment of shares in RSC Holdings.
- Profit for the period was MSEK 2 377 (2 298).
 - Profit from continuing operations increased 53% to MSEK 2 377 (1 555).
- Basic and diluted earnings per share were SEK 1.94 (1.82).
 - Earnings per share from continuing operations were SEK 1.94 (1.23).
- Operating cash flow for continuing operations was MSEK 1 232 (964).
- Acquisitions of ABAC and Dynapac finalized during the quarter.
- Increased investments in production capacity decided.

Near-term demand outlook

The demand for Atlas Copco's products and services, from most customer segments such as mining, construction and the manufacturing and process industries, is expected to remain at the current high level.

Atlas Copco Group

Summary of half-year results

Orders received in the first six months of 2007 increased 21%, to MSEK 32 855 (27 261). Volume for comparable units increased 18%, price increases added 2% and structural changes 7%, while the negative currency translation effect was 6%. Revenues increased 20%, to MSEK 29 375 (24 392), corresponding to 17% volume growth.

Operating profit increased 26% to MSEK 5 578 (4 433), corresponding to a margin of 19.0% (18.2). The negative impact of changes in exchange rates compared with previous year was approximately MSEK 550 for the first half-year. Profit before tax amounted to MSEK 5 692 (4 232), up 34% and corresponding to a margin

of 19.4% (17.3). This includes an MSEK 134 capital gain from divestment of shares in connection with the initial public offering of common stock in RSC Holdings Inc. Profit from continuing operations increased 38% to MSEK 4 150 (3 018). Profit for the period totaled MSEK 4 203 (4 084), including MSEK 53 (1 066) from discontinued operations. Basic earnings per share were SEK 3.43 (3.24) and diluted earnings per share were 3.43 (3.23). Earnings per share from continuing operations were SEK 3.39 (2.39).

Operating cash flow before acquisitions, divestments and dividends totaled MSEK 2 077 (1 675).

Review of the second quarter

Market development

In **North America** the demand for the Group's products and services continued to grow in most product and customer segments. Sales of industrial equipment and its related aftermarket products increased. Demand for advanced assembly tools and systems from the motor vehicle industry, however, decreased compared to previous year. The demand from the important segments of the mining and construction industries remained at healthy levels.

South America had a continued strong development. Sales increases were recorded for compressors, mining and construction equipment and industrial tools. The development in Brazil was particularly good.

Healthy demand was noted in **Europe**. Investments in compressed air equipment and industrial tools from manufacturing and process industries increased. The demand from the construction and mining industries was strong for both equipment and aftermarket products. Order intake was particularly good in Eastern Europe, Germany, and the Nordic countries.

The **Africa/Middle East** region developed very positively. Demand for construction and industrial equipment increased in the Middle East and sales of mining equipment increased in Africa.

Demand for industrial equipment was good throughout **Asia**, with a particularly strong increase in China. Construction and mining equipment recorded a healthy development throughout the region. In **Australia**, the demand from most customer segments remained strong.

Earnings and profitability

Operating profit increased 30% to MSEK 3 037 (2 337), corresponding to a margin of 19.0% (18.8). All business areas contributed to the improvement in operating profit, primarily an effect of higher revenue volumes and a positive price development. The operating margin was negatively affected by acquisitions with approximately one percentage point compared to previous year. The changes in exchange rates had a negative effect of approximately MSEK 180, also compared to previous year, primarily due to currency hedges at Group level.

Net financial items were MSEK 178 (-137), including a capital gain of MSEK 134 from the divestment of shares in connection with the initial public offering of common stock in RSC Holdings Inc. The interest net was almost neutral at MSEK 6 (-188). A net cash position in the beginning of the quarter turned to a net borrowing position following the large capital distribution, MSEK 27 315 in total, during the period.

Profit before tax improved 46% to MSEK 3 215 (2 200), corresponding to a margin of 20.1% (17.7).

Profit from continuing operations increased 53% to MSEK 2 377 (1 555). Profit for the period totaled MSEK 2 377 (2 298), including the above mentioned capital gain in 2007 and MSEK 743 from discontinued operations in 2006. Basic and diluted earnings per share were SEK 1.94 (1.82). Earnings per share from continuing operations were SEK 1.94 (1.23).

The return on capital employed, including discontinued operations, during the last 12 months, was 33% (34) and the return on equity was 58% (32). The Group currently uses a weighted average cost of capital (WACC) of 8.5%, pre-tax equivalent approximately 11.8%,

as an investment and overall performance benchmark.

Operating cash flow and investments, continuing operations

Net cash from operating activities reached MSEK 1 931 (1 753). Receivables, inventory as well as supplier credits increased as a consequence of the strong sales growth, leading to a net increase in working capital of MSEK 787 (738).

A number of investment projects are being carried out in order to increase manufacturing capacity. Investments will gradually increase as further projects have been approved. Cash flows from investing activities, excluding acquisitions and divestments of businesses, were MSEK -699 (-789).

Operating cash flow equaled MSEK 1 232 (964).

Net indebtedness

The Group's net indebtedness amounted to MSEK 21 934 (8 214), of which MSEK 1 779 (1 783) was attributable to post-employment benefits. The debt/EBITDA ratio, indicating the Group's ability to service its interest bearing debt, was 1.8 (0.8). The debt/equity ratio was 188% (32).

During the quarter, Atlas Copco completed a multi-currency bond issue program of approximately BSEK 16, and the distribution of capital of MSEK 27 315 to the shareholders. This action provides the Group with a more efficient capital structure.

Employees

On June 30, 2007, the number of employees was 30 704 (24 361). For comparable units, the number of employees increased by 2 436 from June 30, 2006.

Compressor Technique

The Compressor Technique business area consists of six divisions in the following product areas: industrial compressors, compressed air treatment products, portable compressors and generators, gas and process compressors, as well as specialty rental.

MSEK	April – June		Change %	January – June		Change %
	2007	2006*		2007	2006*	
Orders received	9 058	6 891	+31	17 383	13 982	+24
Revenues	8 126	6 215	+31	14 920	12 004	+24
Operating profit	1 622	1 275	+27	3 062	2 470	+24
<i>– as a percentage of revenues</i>	<i>20.0</i>	<i>20.5</i>		<i>20.5</i>	<i>20.6</i>	
Return on capital employed, %	66	72				

* Restated to include Prime Energy and Prime Mexico, previously part of the Rental Service Business Area.

- Strong growth continued with double-digit growth in all regions and all product areas.
- Record operating profits; margin affected negatively by recent acquisitions.
- ABAC acquisition closed and cleared with anti-trust authorities.

Sales bridge

MSEK	April – June	
	Orders Received	Revenues
2006	6 891	6 215
Structural change, %	+14	+15
Currency, %	-3	-3
Price, %	+2	+2
Volume, %	+18	+17
Total, %	+31	+31
2007	9 058	8 126

Order volumes for stationary industrial compressors continued to grow, supported by favorable demand and further strengthening of presence and penetration in new and existing market segments. Investments for general capacity increases and investments for energy savings continued to be the important drivers for equipment sales, which grew more than 20% organically. Most customer segments contributed to the strong demand. Compressed air treatment products like medical air equipment, filters and dryers increased significantly, supported among other things by the recent acquisition of Beacon Medaes. The aftermarket business for industrial compressors continued to grow at a steady high pace. Geographically, all regions were strong with particularly good growth in Eastern Europe, North and South America and most countries in Asia.

Orders for gas and process compressors for a variety of applications, e.g. air separation, liquid natural gas transport, power generation, continued at a very high level. Large orders were

won in Asia, North America and Eastern Europe in this quarter.

Sales of portable compressors, primarily serving construction-related customers, grew strongly in Eastern Europe, Asia and South America, while sales in North America were lower than previous year.

The specialty rental business, i.e. rental of portable air and power, developed positively in all markets.

New products and solutions are continuously introduced. A new range of oil-free compressors for outdoor usage was recently launched and the largest gas and process compressor ever built by Atlas Copco was delivered in the quarter.

The acquisition of the Industrial Division of the ABAC Group S.p.A. was closed on April 2, under conditional approval from the anti-trust authorities. These conditions were met in July when the German Alup business was sold to its management group. The total business had a turnover of approximately BSEK 1.7 (MEUR 190) in 2006 of which less than 10% relates to the divested German Alup business.

Operating profit increased 27% to a record MSEK 1 622 (1 275), corresponding to an operating margin of 20.0% (20.5). The margin was negatively affected by the recent acquisitions, primarily ABAC being the largest one. This was partly compensated by positive effects from the higher revenue volumes and price increases. The currency impact was small in the quarter.

Return on capital employed (last 12 months) was 66% (72).

Construction and Mining Technique

The Construction and Mining Technique business area consists of eight divisions in the following product areas: drilling rigs, rock drilling tools, loading equipment, exploration equipment, construction tools, and road construction equipment.

MSEK	April – June		Change %	January – June		Change %
	2007	2006		2007	2006	
Orders received	6 045	5 060	+19	12 126	10 008	+21
Revenues	6 292	4 719	+33	11 385	9 287	+23
Operating profit	1 125	721	+56	2 037	1 424	+43
<i>– as a percentage of revenues</i>	<i>17.9</i>	<i>15.3</i>		<i>17.9</i>	<i>15.3</i>	
Return on capital employed, %	35	33				

- Robust order growth, 16% organically.
- Operating profit up 56% with margin at record high 17.9%.
- Dynapac acquisition finalized end of May, strong revenue contribution first month.

Sales bridge

MSEK	April – June	
	Orders Received	Revenues
2006	5 060	4 719
Structural change, %	+8	+12
Currency, %	-5	-6
Price, %	+3	+3
Volume, %	+13	+24
Total, %	+19	+33
2007	6 045	6 292

The demand from the mining industry continued to be strong in most markets as mining companies and mining contractors continued to invest in new equipment. Sales of underground drilling and loading equipment increased significantly. Order intake for large rotary drill rigs was affected by less demand from coal and gas extraction in the United States, while demand from the rest of the world remained strong. Sales of exploration equipment continued to be strong, reflecting a high activity level among customers. The demand for spare parts, consumables and service remained strong, in line with the high activity level on the market. Most geographic regions recorded growth for both equipment and aftermarket to mining applications, with a particularly strong development in Africa and Asia.

The demand from the construction industry continued to be favorable and sales of drill rigs for surface applications, used in quarries and road construction, increased. Also sales of light construction tools and underground drilling rigs for infrastructure projects, e.g. tunneling and hydropower, remained on a good level. The road

machinery demand was favorable in most markets with the exception of the United States, which showed some decline in growth. Within the construction segment, healthy sales growth was recorded in Eastern Europe, Asia, and the Middle East.

Product development activities continued on a high level. During the quarter, a new 10 ton hydraulic breaker was launched. It is the largest volume-produced hydraulic breaker in the world. Other product introductions were a 10 ton low profile loader and a mine truck for low seam mining.

On April 26, Atlas Copco announced an investment of MSEK 224 in an expansion of its production facility for rock drilling tools in Fagersta, Sweden, to meet the expected demand from the mining and construction industries.

As from June 1, Dynapac, a leading supplier of compaction and paving equipment for the road construction market, is consolidated in the business area. The operations had strong revenues in the first month, up 11% compared to previous year. Revenues for the first six months of the year increased 7%. The acquisition contributed MSEK 65 to the operating profit in the quarter. See page 14 for more information.

Operating profit increased to MSEK 1 125 (721), corresponding to an operating margin of 17.9% (15.3), in line with the record level from the first quarter. The operating profit margin benefited primarily from strong aftermarket and consumables sales and price increases. The currency impact was small in the quarter.

Return on capital employed (last 12 months) was 35% (33).

Industrial Technique

The Industrial Technique business area consists of five divisions in the following product areas: industrial power tools and assembly systems.

MSEK	April – June		Change %	January – June		Change %
	2007	2006		2007	2006	
Orders received	1 758	1 722	+2	3 532	3 456	+2
Revenues	1 714	1 629	+5	3 305	3 305	0
Operating profit	392	336	+17	770	687	+12
<i>– as a percentage of revenues</i>	22.9	20.6		23.3	20.8	
Return on capital employed, %	60	65				

- Strong order growth to general industry offset by weak demand from motor vehicle industry.
- 5% organic revenue growth.
- Record operating profit and continued high margin.

Sales bridge

MSEK	April – June	
	Orders Received	Revenues
2006	1 722	1 629
Structural change, %	+3	+3
Currency, %	-3	-3
Price, %	+2	+1
Volume, %	0	+4
Total, %	+2	+5
2007	1 758	1 714

For comparable units, order intake in local currency was almost in line with the same quarter previous year. This reflects continued healthy demand in general industry, while demand was still relatively weak from the motor vehicle industry in North America.

Order intake for industrial power tools to the general manufacturing industries, e.g. electrical appliances, aerospace, and ship yards, increased compared to previous year, reflecting increased marketing and sales activities, and a generally healthy demand in most important markets. Strong growth was recorded in Asia and Europe.

The demand for advanced industrial tools and assembly systems from the motor vehicle industry continued to be relatively weak in North America, while it was stable in most other

regions. Order intake improved in most European countries and in Asia, but not enough to offset the weak development in North America.

The aftermarket business developed well in most markets except for North America, where demand was affected by the weak business climate in the motor vehicle industry.

The vehicle service business, providing large fleet operators and specialized repair shops with tools, recorded healthy growth for comparable units in most markets, particularly in Europe, but had a bit of a slowdown in North America.

The business area continuously introduces new products with improved productivity. In the quarter a new generation of the successful Tensor series of electric nutrunners was introduced, offering greater torque and higher speed compared to its predecessors.

Operating profit increased to MSEK 392 (336), corresponding to a margin of 22.9% (20.6). The operating margin improvement was primarily due to a favorable sales mix and the result of successful price and product cost management, which more than offset a negative currency impact.

Return on capital employed (last 12 months) was 60% (65).

Previous near-term demand outlook
(Published April 26, 2007)

The demand for Atlas Copco's products and services, from most customer segments such as mining, construction, and the manufacturing and process industries, is expected to remain at the current high level.

Accounting principles

The consolidated accounts of the Atlas Copco Group are prepared in accordance with IFRS as disclosed in the Annual Report 2006.

The interim report is prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Financial Accounting Standards Council's recommendation RR 31 Consolidated Interim Reporting.

The new or amended IFRS standards or IFRIC interpretations, effective since January 1, 2007, have had no material effect on the consolidated income statements or balance sheets.

Risks and factors of uncertainty

Financial risks

Atlas Copco completed a multi-currency bond issue program in the second quarter in order to adjust the balance sheet to a more efficient structure. The higher indebtedness increases the exposure to changes in interest rates, whereas the borrowings partially hedge the currency exposure of net assets of foreign subsidiaries.

Acquisitions

The acquisitions of ABAC and Dynapac were completed in April and May respectively. Although the Group has demonstrated in the past an ability to successfully integrate acquired businesses, the integration of new companies always carries certain risks. Costs related to acquisitions can be higher than anticipated.

Capacity constraints

Atlas Copco's manufacturing strategy is based on manufacturing of core components and outsourcing of non-core components. Currently, capacity utilization is high and if there are interruptions or lack of capacity in the supply chain, this may affect the business, result of operations and financial position negatively.

For further information about risk factors, please see the 2006 Annual Report.

Accounting principles

Atlas Copco AB is the ultimate Parent Company of the Atlas Copco Group. The financial statements of Atlas Copco AB have been prepared in accordance with the Swedish Annual Accounts Act and the accounting standard RR 32:06, "Accounting for Legal Entities" as disclosed in the Annual Report 2006.

Changes in Balance Sheet

At the end of 2006, following the divestment of the North American equipment rental business, an intra-group restructuring gave rise to

substantial increases in the value of shares in Group companies, non-restricted equity and borrowings.

Share split and mandatory redemption of shares and ordinary dividend

In the second quarter Atlas Copco carried out a share split with a mandatory redemption procedure. This led to a distribution of MSEK 24 416 to the shareholders in addition to the MSEK 2 899 which was distributed as ordinary dividend. The distribution reduced non-restricted equity with MSEK 27 315.

Parent Company

Distribution of shares

Share capital equaled MSEK 786 (786) at the end of the period, distributed as follows:

Class of share	Shares
A shares	839 394 096
B shares	418 219 008
Total	1 257 613 104
<i>- of which B-shares held by Atlas Copco</i>	<i>-36 828 400</i>
<i>Total shares outstanding, net of shares held by Atlas Copco</i>	<i>1 220 784 704</i>

On July 4, 28 000 000 of the B-shares held by Atlas Copco were redeemed. At the same time a bonus issue was carried out without issuance of new shares. The two transactions together leave the share capital unchanged. After the redemption, total number of shares equals 1 229 613 104, of which Atlas Copco holds 8 828 400 B-shares.

The remaining 8 828 400 B-shares currently held by the company can be divested and 6 400 000 A-shares can be purchased, in accordance with the resolution by the AGM

2007. The objective is to use proceeds from the B-shares primarily to acquire own shares of Series A, which can, subsequently, be delivered under the Company's personnel option programs. Proceeds can also be used to cover related costs for social security charges.

Risks and factors of uncertainty

Financial risks

Atlas Copco completed a multi-currency bond issue program in the second quarter in order to adjust the balance sheet to a more efficient structure. In addition, the parent company has also borrowed funds internally within the Group. The higher indebtedness increases the exposure to changes in interest rates, whereas the borrowings partially hedge the currency exposure of net assets of foreign subsidiaries.

Related parties

There have been no significant changes in the relationships or transactions with related parties compared with the information given in the Annual Report 2006.

Financial targets

The overall objective for the Atlas Copco Group is to grow and to achieve a return on capital employed that will always exceed the Group's average total cost of capital.

The financial targets are:

- to have an annual revenue growth of 8%;
- to reach an operating margin of 15%; and
- to challenge and continuously improve the efficiency of operating capital in terms of fixed assets, stocks, receivables, and rental fleet utilization.

This will have the result that shareholder value is created and continuously increased.

Forward-looking statements

Some statements in this report are forward-looking, and the actual outcomes could be materially different. In addition to the factors explicitly discussed, other factors could have a material effect on the actual outcomes. Such factors include, but are not limited to, general business conditions, fluctuations in exchange rates and interest rates, political developments, the impact of competing products and their pricing, product development, commercialization and technological difficulties, interruptions in supply, and major customer credit losses.

Atlas Copco AB

Atlas Copco AB and its subsidiaries are sometimes referred to as the Atlas Copco Group, the Group or Atlas Copco. Atlas Copco AB is also sometimes referred to as Atlas Copco. Any mentioning of the Board of Directors or the Directors refers to the Board of Directors of Atlas Copco AB.

A recording of the conference call will be available for 2 days on +44 (0)20 7806 1970 with access code 4602855#.

Interim report on Q3 2007

The third quarter report will be published on October 24, 2007.

The interim report gives a fair overview of the business, financial condition and result of operation of the Parent Company and the consolidated Group. It also describes significant risks and factors of uncertainty that the parent company and its subsidiaries and associated companies are facing.

OFFICE OF INVESTOR RELATIONS

Gunnar Brock comments on Atlas Copco's Q2 results

Stockholm, Sweden, July 16, 2007: Atlas Copco today reported its best quarter ever, with continued double-digit growth in all regions and record profit.

"Our record performance manifests the strength of our three business areas," says Gunnar Brock, President and CEO. "They all have very solid market positions and highly profitable growth strategies in place."

Atlas Copco has now achieved 21 consecutive quarters with organic growth. *"We expect that demand from most customer segments will remain at the current high level in the near term."*

Atlas Copco's revenues increased 28% to MSEK 15 985, corresponding to an organic growth of 20%. The operating profit was up 30% to MSEK 3 037, corresponding to a margin of 19.0% (18.8). *"For the first time ever, our operating profit has exceeded 3 billion SEK."*

During the quarter, Atlas Copco finalized the acquisitions of Dynapac, a leading supplier of compaction and paving equipment for road development, and ABAC, a manufacturer of piston compressors for the small and medium sized industrial market, and for the automotive aftermarket.

Whilst selective acquisitions are an integral part of the Group's growth strategy, the main focus is on organic growth. New products and solutions are continuously introduced to the market. Recently, Atlas Copco launched a new range of oil-free compressors for outdoor usage, the largest volume-produced hydraulic breaker in the world and a new generation of electric nutrunners, with higher speed and torque than the previous generation. *"These, and all other product introductions we make, are a result of dedicated investments to increase our customers' productivity."*

In order to meet anticipated future demand growth, and to improve efficiency, Atlas Copco has decided to invest in increased production capacity both in the Compressor Technique and Construction and Mining Technique business areas.

Atlas Copco is a world leading provider of industrial productivity solutions. The products and services range from compressed air and gas equipment, generators, construction and mining equipment, industrial tools and assembly systems, to related aftermarket and rental. In close cooperation with customers and business partners, and with more than 130 years of experience, Atlas Copco innovates for superior productivity. Headquartered in Stockholm, Sweden, the Group's global reach spans more than 150 markets. In 2006, Atlas Copco had 25 900 employees and revenues of BSEK 51 (BEUR 5.6). CORPORATE RELATIONS

Atlas Copco to utilize mandate in connection to its share value based incentive programs

Stockholm, Sweden, July 16, 2007: The Board of Atlas Copco AB has decided to use the mandate granted by the AGM 2007 to divest own B-shares and purchase own A-shares in connection to its share value based incentive programs.

Up to 8 828 400 B-shares currently held by the company can be divested and 6 400 000 A-shares can be purchased, in accordance with the resolution by the AGM 2007. The objective is to use proceeds from the B-shares primarily to acquire own shares of series A, which will be held for possible delivery under the company's personnel option programs. Proceeds can also be used to cover costs for social security charges.

Purchases of shares are subject to market conditions and regulatory restrictions, and can only be made at a price per share that falls within the registered price range at each given time.

The number of outstanding shares issued is presently 839.4 million A-shares and 390.2 million B-shares for a total of 1 229.6 million shares.

Atlas Copco is a world leading provider of industrial productivity solutions. The products and services range from compressed air and gas equipment, generators, construction and mining equipment, industrial tools and assembly systems, to related aftermarket and rental. In close cooperation with customers and business partners, and with more than 130 years of experience, Atlas Copco innovates for superior productivity. Headquartered in Stockholm, Sweden, the Group's global reach spans more than 150 markets. In 2006, Atlas Copco had 25 900 employees and revenues of BSEK 51 (BEUR 5.6). Atlas Copco acquires Mafi-Trench, expands in oil and gas markets

Stockholm, Sweden, July 23, 2007: Atlas Copco has signed an agreement to acquire the assets of Mafi-Trench Corporation, a leading U.S.-based supplier of turboexpanders for the oil and gas industry.

Mafi-Trench provides machinery including expander compressors and expander generators, which treat gases at cryogenic temperatures. Applications are mainly for the hydrocarbon markets, including natural gas processing, petrochemicals and power generation. The company had sales in 2006 of approximately MSEK 360 (MUSD 54) and more than 120 employees. For more information see <http://www.mafi-trench.com>

"The acquisition of Mafi-Trench will add a strong brand name to the Group and broaden our offering for gas treatment and purification," says Ronnie Leten, President of Atlas Copco's business area Compressor Technique. *"This gives us a solid presence in the entire oil and gas value chain, from upstream to downstream."*

Privately-owned Mafi-Trench is headquartered in Santa Maria, California and also has operations in India. Following the completed acquisition, the company will belong to Atlas Copco's Gas and Process division, which is part of the Compressor Technique business area.

The transaction is planned to be closed during the third quarter.

Atlas Copco is a world leading provider of industrial productivity solutions. The products and services range from compressed air and gas equipment, generators, construction and mining equipment, industrial tools and assembly systems, to related aftermarket and rental. In close cooperation with customers and business partners, and with more than 130 years of experience, Atlas Copco innovates for superior productivity. Headquartered in Stockholm, Sweden, the Group's global reach spans more than 150 markets. In 2006, Atlas Copco had 25 900 employees and revenues of BSEK 51 (BEUR 5.6). Learn more at www.atlascopco.com.

Gas and Process is a division within Atlas Copco's Compressor Technique business area. It develops, manufactures and markets large, customized gas and process compressors and turbo expanders, and their respective aftermarket products. Its products are used primarily by the oil and gas, chemical/petrochemical process and power industries worldwide, and also by industries that specialize in gas production through air separation. The divisional headquarters and main production center is located in Cologne, Germany.

Atlas Copco invests in German turbomachinery production

Stockholm, Sweden, August 6, 2007: Atlas Copco will invest about MSEK 160 (MEUR 17) to expand its site in Cologne, Germany, the company's main production facility for turbo compressors and expansion turbines. The initiative is aimed at cutting delivery times to customers and increasing production capacity.

The capacity expansion, which supports the Atlas Copco Gas and Process division in meeting growing demand for large compressors, will be achieved through extending production and test facilities, office and warehouse spaces, and improving the production flow of the factory. It adds to ongoing substantial investments in high-tech machinery and will be completed in 2009.

"With a market that is currently very strong, this investment will help us meet both the present and future needs of our customers," says Ronnie Leten, President of Atlas Copco's Compressor Technique business area. "By investing into our German hub, we further strengthen our design and manufacturing expertise, leading to a higher degree of flexibility."

Atlas Copco's Gas and Process division supplies custom-made compressors and expanders for air separation, gas-fired power stations, liquid natural gas applications and petrochemical companies. It won a record number of orders in 2006, helped by strong demand from Asia and the Middle East. During the second quarter of 2007, the division delivered the biggest compressor ever built by Atlas Copco, weighing 200 tons.

Atlas Copco is a world leading provider of industrial productivity solutions. The products and services range from compressed air and gas equipment, generators, construction and mining equipment, industrial tools and assembly systems, to related aftermarket and rental. In close cooperation with customers and business partners, and with more than 130 years of experience, Atlas Copco innovates for superior productivity. Headquartered in Stockholm, Sweden, the Group's global reach spans more than 150 markets. In 2006, Atlas Copco had 25 900 employees and revenues of BSEK 51 (BEUR 5.6). Gas and Process is a division within Atlas Copco's Compressor Technique business area. It develops, manufactures and markets large, customized gas and process compressors and turbo expanders, and their respective aftermarket products. Its products are used primarily by the oil and gas, chemical/petrochemical process and power industries worldwide, and also by industries that specialize in gas production through air separation. The divisional headquarters and main production center is located in Cologne, Germany.
