Dear Sir,

DIVIDEND REINVESTMENT PLAN - PRICING FOR INTERIM DIVIDEND

Oxiana Limited advises that participants in the Oxiana Dividend Reinvestment Plan (DRP) will be allotted ordinary shares under the DRP at the price of $3.6758 each, inclusive of a discount of 2.5%, on the dividend payment date, which is 4 October 2007. The Record Date for entitlements was 20 September 2007.

In accordance with Oxiana's DRP Rules, this price represents the volume weighted average sale price for the fully paid ordinary shares in the capital of Oxiana sold on the Australian Stock Exchange, from 21 September 2007 to 27 September 2007 inclusive, being the 5 trading days following the record date rounded down to the nearest full cent less a discount of 2.5%.

Information relating to the Company's DRP is available on Oxiana's website under Investor Information at www.oxiana.com.au.

Yours faithfully,

David J. Forsyth

ASX Release

TORO ENERGY LIMITED

AUSTRALIAN STOCK EXCHANGE AND MEDIA RELEASE

AGINCOURT (OXIANA) ACCEPTS TORO'S OFFER

Toro Energy Limited ("Toro") is pleased to advise that it has received acceptance to its Offer for Nova Energy Limited ("Nova") from Nova's major shareholder, Agincourt Resources Limited (a wholly-owned subsidiary of Oxiana Limited).

Together with acceptances received from other Nova shareholders, Toro's relevant interest in Nova is now at 60.24%.

Toro encourages all Nova shareholders that have not yet accepted its Offer to ACCEPT the Offer prior to its scheduled close of 12 October 2007.

As outlined in the Bidders Statement, the merger of Nova Energy and Toro Energy via the Offer will create a significant ASX listed uranium explorer, with a management team combining the skills and capacity to advance the company through project development and emerging production. The company will have the capacity to evaluate and pursue additional opportunities within the uranium sector, with an increased market strength and liquidity.

Further Information

Further information on the Offer is contained in the Toro Bidder's Statement which can be obtained from the Toro website on www.toroenergy.com.au . Nova shareholders can also direct their enquiries to the Toro Offer Information Line on 1300 659 062 (within Australia) or +61 2 8986 9350 (outside Australia).

Jabiru Metals Limited

ASX:JML

ASX046-AT-07

ASX/MEDIA RELEASE 26 September 2007

Jaguar Cashflow Commences

Jabiru Metals Limited (Jabiru) is pleased to advise that the first payment for concentrate deliveries have been made to Jabiru by Oxiana Ltd (Oxiana). The sum of US$2.5million was received for our August deliveries of zinc concentrate into the Oxiana facility at the Geraldton Port.

Jabiru is also pleased to announce that haulage of copper concentrate has commenced, with 1,347 tonne (wet) of concentrate hauled to Geraldton port to date ready for shipment. Payment for this material is expected in October.

Copper and zinc concentrate grades to date are ahead of those predicted in the Bankable Feasibility Study, with all concentrate marketable on normal terms.

The achievement of readily saleable copper and zinc concentrates at this early stage of production is an excellent result.

WOOLGAR GOLD PROJECT – NORTH QUEENSLAND

- **SOAPSPAR PRE- FEASIBILITY STUDY UPDATE**

A preliminary report on the metallurgical test work results from the Soapspar gold deposit has been received. The metallurgy forms part of ongoing pre-feasibility work at Soapspar, and is being conducted by the consulting firm of Como Engineers Pty. Ltd.

Other pre- feasibility work to date has been positive. In the first half of 2007, an upgraded JORC compliant resource estimate was completed by SRK Consulting Engineers & Scientists. The new resource model demonstrates an approximate 120% increase in the estimated contained ounces within the Soapspar deposit (an estimated 95,200oz Au as opposed to the previously published estimate of 43,250oz Au).

The Resource has been estimated with open cut mining and heap leach processing in mind. Full details of the resource update are outlined in SMC June Quarterly Report.

The metallurgical testwork requirements have been greater than initially anticipated. The test work conducted to date indicates that higher grade mineralisation should leach satisfactorily at a medium crush size of 6.3 – 3.3mm.

Results from lower grade mineralisation are inconsistent at coarse-medium crush sizes and Como Engineers have recommended the completion of at least two additional stages of test work on the lower grade mineralisation.

The first stage will include additional bottle rolls and sizing tests, which will take at minimum 3 weeks to complete. The second stage will be the completion of an additional bulk column leach test. Overall the conclusion of the metallurgical test work for the pre-feasibilty study is forecast to take at least another 6-8 weeks to complete.

STRATEGIC / OXIANA FARM IN J/V- 2007 DRILLING PROGRAM

The drill program of Oxiana, to test the depth potential of some of the veins comprising the Sandy Creek epithermal vein system has been completed, however the results of the program have not yet been received.

Yours sincerely

W A C Martin

Managing Director

Note: The information in this report that relates to exploration results is based on information compiled by Strategic Mineral Corporation NL's Technical Director Mr Roland Bartsch MSc. BSc. (Hons.) who is a member of the Australian Institute of Mining and Metallurgy. He has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration, and to the activity undertaken. He is qualified as a competent person as defined in the 2004 Edition of the "Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves ". He has consented to the inclusion of this information in the form and context in which it appears. The Australian Stock Exchange has not reviewed and does not accept responsibility for the accuracy or adequacy of this release.

THANK YOU

For the purposes of the Forward-Looking Statements Safe Harbor provisions of the US securities laws

This presentation contains statements which constitute forward-looking statements within the meaning of the US securities laws. Such statements include, but are not limited to, statements with regard to capacity, future production and grades, projections for sales growth, estimated revenues and reserves, targets for cost savings, the construction cost of new projects, projected capital expenditures, the timing of new projects, future cash flow and debt levels, the outlook for minerals and metals prices, the outlook for economic recovery and trends in the trading environment and may be (but are not necessarily) identified by the use of phrases such as "will", "expect", "anticipate", "believe" and "envisage".

By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future and may be outside Oxiana's control. Actual results and developments may differ materially from those expressed or implied in such statements because of a number of factors, including levels of demand and market prices, the ability to produce and transport products profitably, the impact of foreign currency exchange rates on market prices and operating costs, operational problems, political uncertainty and economic conditions in relevant areas of the world, the actions of competitors, activities by governmental authorities such as changes in taxation or regulation.
