Media Release

Holcim has substantially increased its stake in Ambuja Cements in India

Holcim has successfully completed the transaction to expand its stake in the Indian Group company Ambuja Cements Ltd (ACL) as announced in August 2007. Through the acquisition of a block of shares from the founding families, the related mandatory offer to the other shareholders and open market purchases, the Group has increased its shareholding in ACL by roughly 13 percent to around 46 percent. Thereof, just over 5 percent have been tendered in the public takeover offer.

The transaction corresponding to a total investment of USD 780 million is entirely financed through internal resources and existing credit facilities.

Holcim is one of the world's leading suppliers of cement and aggregates (crushed stone, gravel and sand) as well as further activities such as ready-mix concrete and asphalt including services. The Group holds majority and minority interests in more than 70 countries on all continents.

This media release is also available in German.
